# BREEDER AND SPORTSMAN

Vol. V, No. 1.  
NO. 508 MONTGOMERY STREET.

147799 SAN FRANCISCO, SATURDAY, JULY 5, 1884.

SUBSCRIPTION  
FIVE DOLLARS A YEAR.

## TURF AND TRACK.

### The King and the Queen.

Just as the *Gazette* was going to press last week the news came from Cleveland that the six-year-old gelding, Jay-Eye-See, whose name and fame are known the world over, had trotted a mile on the Cleveland track in 2:12—it being by far the fastest performance ever made by a trotter at this season of the year, and the fact of its having been done without an effort to get from the horse the very last atom of speed that was in him shows that the little son of Dictator and Midnight is in better form this year than ever before, and that he will, barring accident, eclipse the 2:10 of Maud S. is now only a question of time, and not a long time at that. Before leaving Louisville for Cleveland Jay-Eye-See was given a mile in 2:16, which was considered good enough for the time of year, but the following week W. H. Crawford, who is managing the Cesse stable of trotters this season, came to Chicago, and while at the trotting meeting here saw some things that set him to thinking. He saw Lynwood, that had received his preliminary work at the Louisville track in company with the Case horses, and that could never beat 2:28 there, lap out Maybird in the fourth heat of a fast race in 2:22, the official time on Linwood being 2:22.

He also saw King Mitus, another Louisville horse, trot the Chicago track in 2:22 one morning, and Misfortuna, his stable companion, do the distance in 2:23. This was enough for Crawford, and his return to Cleveland was made forthwith. "I must sharpen up a little," he said to a friend, and the result shows that the sharpening has been done wisely and well, as in addition to the mile by Jay-Eye-See in 2:12, Phallas has been given a move that was in every respect satisfactory, and the pacer Gargle has also done what was asked of her in a manner with which no fault could be found. Exactly what was done with Phallas the *Gazette* is not at liberty to state, but no confidence will be violated when it is said that one-half of his mile was better than 1:06, from which it will be seen that when he comes to Chicago next week to do battle with Robert McGregor there will be no lack of speed in either camp. McGregor's mile in 2:17 in Texas, last Winter, was done with such apparent ease that it was evident 2:16 could have been beaten if necessary, and since that time a challenge from his owner to any entire horse for from \$1,000 to \$5,000 a side has been unaccepted.

But hardly had the excitement over Jay-Eye-See's great mile subsided, when the news came of an equally good performance by the fastest trotter of them all, Maud S. Last Friday, between the heats of the races at the Gentlemen's Driving Park, New York city, Bair brought out the mare, at the request of Mr. Vanderbilt, and drove her in 2:13 over a track which is confessedly two seconds slower than Chicago or Cleveland, and as it was the second fast move which the queen has had this year, all doubts as to her having retained her speed are put at rest. And now that the two cracks of the trotting course have shown themselves to be in such fine fettle, the question of whether or not they will come together in a race during the year is one in which the entire public is interested. Those who have the best opportunity of knowing Mr. Vanderbilt's intentions regarding his mare say with great positiveness that she will never again appear in a race against other horses, but it is not at all certain that she will not engage in a contest against the watch when the proper time comes. It is an open secret that after Jay-Eye-See trotted the Providence track in 2:10 last fall, the owner of Maud S. took an interest in the little black gelding that he had never before exhibited. It was about that time that numerous people who fancied that they knew all about Jay-Eye-See, began telling ghost stories as to the condition of his feet, it being freely asserted that they had contracted to such an extent as to render his appearance on the track another season extremely improbable. But in spite of all the talk, a very intimate friend of Mr. Vanderbilt's came to the little horse's stall one day and examined those feet very carefully, indeed. What his opinion was can only be judged by the fact that soon after this visit Mr. Vanderbilt shipped Maud S. to Bair, at Cincinnati, sending word that she was to be wintered carefully, and put in condition to do her best in the way of trotting. That his intention is to once more test her speed to its full extent in case, as now seems almost certain, Jay-Eye-See lowers the record, there can be little doubt, and it is therefore more than probable that the present season will witness something in the way of trotting never before seen—two horses beating 2:10.—*Breeders' Gazette*.

St. Dennis, by Blue Bull, got a record of 2:27, at Kalamazoo, Mich., June 10th, making two new ones of Blue Bull's get that have already entered the 2:30 list this season.

## Racing at Baker City, Oregon.

EDITOR BREEDER AND SPORTSMAN:—Please find notes of the Spring meeting of the Baker City Jockey Club, which opened June 19th and continued three days. The first race was a purse of \$50 for saddle horses; three-quarters of a mile. It had five starters, and was won by a mare called Sally, after a close finish. Time—1:24.

Same day.—Purse \$100; \$20 entrance; half added; heats of five-eighths of a mile.

J. Gentry's ch c Echo, 3 years, by Monte Christo.....	2	1	1
F. T. Gleason's b g Major Anderson, 4 years, by Geo. Wilkes.....	3	3	2
J. W. Wisdom's ch h Othello, aged, by Monte Christo.....	1	2	2

Time—1:04, 1:06, 1:07½.

Dundrum was named in the race, but did not start. The first heat was won by Othello, hands down, Echo second, Major Anderson third.

After considerable scoring the word was given in the second heat to a poor start, Echo, winning after a sharp finish, Othello second, Major Anderson third.

Othello was drawn and Echo took the third and last heat Major Anderson second.

June 20th, purse and stake \$125, for two-year-olds; half a mile.	
J. Gentry's Dutchman, by Monte Christo.....	1
J. T. Wisdom's Pat Dempsey, by Monte Christo.....	2

Time—50½.

June 21st, purse and stake \$175, for all ages; heats of a mile.	
J. Froud's br f Repetta, 4 years, by Alarm.....	1
J. Gentry's ch c Echo, 3 years, by Monte Christo.....	2
F. T. Gleason's b g Major Anderson, 4 years, by Geo. Wilkes.....	3

Time—1:49, 1:52½.

Repetta won as she liked. On the second day's programme was a trotting purse for four-year-olds, that had two starters; mile heats which was won very easily in straight heats.

June 20.—Trotting; purse, \$50; for four-year-olds; mile heats.	
E. Gleason's b g Henry, by Clay.....	1
J. Ferguson's blk s Tyro, by Gen. Knox.....	2

Time 3:08, 3:10.

The meeting was a success and I understand that a rousing Fall meeting is on foot in which our trotters will be well represented.

There is a Spring meeting at Union, commencing July 2d, that promises to be larger than ours.

Billy Leigh is here with Repetta and Othello and expects to clean out Union.

We have not had more than three days dry weather, at a time, since I came to the webfoot country. If it ever clears up you can look for good times here this Fall, both running and trotting.

Baker City, June 22d.

LONERS.

## Jim Renwick's Pedigree.

We cannot understand just why it is that the California papers persist in calling Jim Renwick a "half-bred" horse; perhaps they would have it that Joe Hooker could bring such runners as Jim out of scrub mares. The fact is, Old George, the sire of Big Gun, Jim Renwick's mother, was a fast racehorse, and a sire of racehorse. It is generally believed that he (Old George) was at least three-quarter thoroughbred. English Veto, sire of the mother of Big Gun, was nearly a thoroughbred, and a very fast half-miler. Jeff, the sire of Renwick's great-grandmother, was a fast mile and repeat horse, and was regarded as thoroughbred by those who knew him. Pedigree: Jim Renwick, ch g, by Joe Hooker, dam Big Gun, by Old George; 2d dam by English Veto; 3d dam by Jeff. There is no Lummux blood in Renwick, as has been reported.—*Rural Spirit*.

I have always contended that, in due time, Smuggler's fame will be perpetuated by his colts, because his shape, gait, temper and breeding are calculated to beget speed. Already this season two young entire sons are doing him honor, Commodore Kittson's Revenue, in the West, and Mr. Hines' Young Smuggler, in the East. The latter is comparatively unknown, and the following particulars have reached me concerning him since he came to the front last week, at Washington: He is eight years old, and was bred by L. W. Hurlburt, of Utica, N. Y., out of the noted broodmare, Parpea Rosa, by Andrew Jackson. He is owned by John W. Hines, Chestertown, Md. A gentleman at Washington advised me that the horse was given a trial there in 2:20. Mr. Hines will not force him during the Summer months, but if everything goes well he will be started at Hartford the last week in August. In his two races at Washington he never "lifted his nose."—*Veritas*.

## Panique Was Not All.

Although Erdenheim, the birthplace of Parole, Iroquois, Sensation and other good horses, has changed hands since these great horses gambled in the pretty meadows on the banks of the Wissanickon, winners still continue to come from that beautiful earthly home where lay the remains of Leamington, the great progenitor of not only the horses named but of many others, as was shown by the success of Panique at Jerome Park and by the greatest success of Rataplan in capturing the Emporium stakes at Sheephead Bay, on June the 19th. When it was announced that Com. Kittson, had sold Panique to the Dwyers, two stories were set afloat. One was that he had something better in his stable; the other that something had been discovered in Panique which promised an early break-down. It is scarcely possible that the latter is true. But as to the former it may or may not be true. Time alone will tell. Certainly Rataplan showed himself to be a good horse, and if he can take up the regular three-year-old weight of 113 pounds, why not only Panique but all the three-year-olds seen so far this season have a dangerous rival to contend with.

He was trained to the hour, and so well was he kept in hand that when Major Hubbard was asked, a few days after the Withers, at Jerome Park, as to what horse would win the Emporium, he promptly answered that Rataplan would. When asked how about Eolite (since renamed by his owner, Mr. Fred. Gebhardt, St. Saviour, it compliment to Mrs. Langtry, it being her birthplace or the parish over which her father rules as Dean), the Major replied: "Well, Rataplan will have four pounds the best of the weights over Eolite, and that will make a big difference at a mile and a half." The result of the race was exactly as set forth. St. Saviour was the most dangerous horse, and although the three lengths difference between him and Rataplan at the end was greater than it should have been at four pounds difference in weight, there will certainly be great curiosity to see the two come together at even weights, for, perhaps, after all the Emporium may have brought out two "cracks" instead of one. Both colts are well engaged, and meet at Monmouth Park for the Newark, Raritan, Barnegat, or in the Omnibus Stakes' it will be close betting between the two.

## A Fast Morgan Patriarch.

Mr. M. T. Grattan, of Preston, Minnesota, an enthusiast on the subject of the Morgans, has an eighteen-year-old stallion named Herod, which lately made a remarkable performance for a horse of his years and training. Mr. Grattan is a thorough horseman, whose contributions to the current turf literature are familiar to our readers over his signature of "M. T. G.," and he feels happy over the exhibition of speed by his stallion, a feeling which will be shared by his many friends and the admirers of the Morgans everywhere. The following account of the trial is from a local paper published at Preston, and is misleading in one respect in as much as it conveys the impression that Herod was driven double with running mate. He was hitched singly to sulky, the runner being driven alongside to urge him along: "Pursuant to announcement an exhibition race came off over the Preston track last Saturday which gave those present an opportunity of seeing an eighteen-year-old horse trot a mile wonderfully fast. It was a trial, for money, to beat 2:30, and the exhibition was to have been between M. T. Grattan's Morgan stallion, Herod, and H. Knox's fine mare, Hettie V. The latter, however, acted badly and was withdrawn and Harry Conkey's horse substituted as a running mate. The first half-mile was a beautiful race, the running mate keeping well alongside of the old monarch who attended strictly to his work and seemed to realize that he was surprising even his owner, who was in the sulky. Under the wire the horses were nearly even and on they went to the quarter pole where the runner began to lag. At this point Herod showed an increase of speed and came down the homestretch like the wind, yet steady and majestic, and as his nose went under the wire the timer in C. P. Walter's hand registered 2:26. The horse was not urged by his driver, and made the mile without a break in perfect ease. Preston track, at the pole, is 84 feet more than a mile; when this, together with the fact that Mr. G. drove at least six feet from the pole, is considered, there is no telling what Herod will do on a fast track. It is the fastest mile ever trotted over a half-mile track in the State, and the fastest mile ever trotted by an eighteen-year old horse.

H. S. Woodruff, a wealthy and well-known horse-fancier, of Janesville, Wis., has purchased Bashaw Goldcup, the sire of Johnston, the fastest pacer in the world. This is not made public.

The Kick in Kanakodom—Another Re-calculator.

EDITOR BREEDER AND SPORTSMAN.—Being a subscriber of your valuable paper and somewhat fond of horse flesh I enclose a few notes concerning our great racing day as it took place June 11th, knowing that you would like to hear from us occasionally. The attendance was quite large, the band performed unusually well, the saddling paddock under the management of genial Jim Dodd was conducted in first-class order; the clerk of the course, Chas. Wilson, performed his duties to the satisfaction of all. The starter, Capt. Hayley, showed great patience, and that he knew his business cannot be denied by horsemen.

The most important positions to be filled in racing is the selection of judges, and I am sorry to say that I never in all my life saw such a lot of incompetent men in the judges' stand. The senior member acknowledged, after the races, that it was the first race he had ever seen, or something similar, and we are willing to take his word for it; the other two were not much better, and all three received a blessing from the crowd before the day was over. I send you the Daily Hawaiian, with snurmary of the day's races, also a copy of the Saturday Press, containing same also, and you can see what they think about it. The junior member made himself very officious, and put on considerable airs in ordering people around when quite uncalled for. A young gentleman who had a horse entered in the one-half mile dash presented a protest to the judges and was treated most shamefully by being talked to rather severely and ordered out of the stand and off the track. Fines were imposed without reason, decisions given before the jockeys were weighed, or before they reached the stand to enter protests for fouls, etc. Owners of horses were allowed access to the judges' stand during the pendency of a heat in which they were interested. Horses were allowed to be handled and decorated with wreaths, etc., after winning and before the rider had weighed, or reached the wire even. The most shameful and bare-faced piece of work on the part of the judges was in the two-mile race, for which there was three entries: Cornwall's Waterford, His Majesty's Telephone and Agnew's Idle Girl, the latter winning by more than eighteen inches notwithstanding a foul by the jockey on Waterford, having crowded Idle Girl against the inside rail on the home-stretch so that he could not use his whip. The horses had hardly passed the wire when the judges gave their decision to Waterford. After the decision was given the jockeys reached the stand and before dismounting Clifford, a horse imported by Mr. Agnew to ride Idle Girl, claimed foul riding by the boy on Waterford, the judges called the jockey of Telephone into the stand and he gave his testimony as to being behind, close up, and that he witnessed the foul. Not finding the hide torn off that side of Idle Girl they paid no attention to the claim of foul. A friend of one of these judges met him on the street the next day and asked him to decide a bet that had been made on which horse had the pole at the finish of the two-mile race and he answered, "I think Waterford had it, but am not sure." The senior member being told that there was a foul on the home-stretch, said that he saw no foul although he had his specs on. He evidently thought the boy meant a chicken till he was told it meant in the riding.

Gentlemen who won money on the decision given openly owned up that Agnew's Idle Girl had won the race fairly. Even the owner of Waterford, in the presence of a large crowd, said that the most he could expect would be to have it called a dead heat. In the free-for-all trotting race, the first heat was won handily by Dodd's Thomas H. with something to spare—the foals called it a dead heat. Mr. Dodd very wisely withdrew his horse after making his protest, to which no attention was paid. A well-known business man who had been asked to make an application to join this high-toned Jockey Club, withdrew the same after hauding it in, and so ought all straightforward men do who wish to have horse racing done on the square.

The Agricultural Show holds its second meeting on the 13th inst., and I predict a good deal of squealing at the awarding of prizes, as the judges selected on horses are with but one exception better judges of anything else. OAHU. Honolulu, June 12th.

Entries in the Montana Colt Stakes.

The Colt Stakes, to be run and trotted for at the Fifteenth Annual Exhibition of the Montana Agricultural, Mineral, and Mechanical Association closed June 1, with the following nominations:

Helena Stakes, for two-year-olds; \$50 each, half forfeit; \$100 added; to the colt making the best time under 3:00, \$100 extra; mile heats.

- S. E. Larabee's ch c Critmore, by Crittenden, dam by Strathmore.
S. E. Larabee's gr f Fickle, by Herod—Flight.
S. Scott's ch c Prince Edward, by Herod—Bay Fannie.
C. Russell's h c Harry Smiley, by Milton Medium—Black Bess.

- Hundley & Prentitt's b g J. M. S., by Bonny Castle—The Hiatoqa Mare.
W. H. Raymond's h c Fowler, by Com. Belmont—Gracie H.
W. H. Raymond's h f Fonda, by Com. Belmont—Charm.
D. Lawrence's blk c Alarie, by Doncaster—Molly Adams.
N. Armstrong's h c Thora, by Mambrino Patchen—Lady Ayers.

Running; Derby Stakes for three-year-olds; \$50 each, half forfeit; \$500 added; one mile and a half.

- Potts & Harrison's ch f Lucy Hayes, by Balaklava—Belle Mahone.
C. E. Williams' b c Basil, by Carrihoo—Reply.
D. Heyfron's b f Little Sis, by Regent—Beulah.
A. Work's ch c Glenite, by Glenelm—Lady Humboldt.
H. R. Baker's h c Sunday, by Sun Dance—Norma.
Hundley & Prentitt's ch f Australid, by Red Bluff—Peggy Morgan.

- Hundley & Prentitt's ch f Glendelia, by Glenelm—Cordelia.
Running; Pioneer Stakes, for two-year-olds; \$50 each, half forfeit; \$250 added; three-quarters of a mile.
Potts & Harrison's b c Post Trader, by Balaklava—Missaidie.
S. E. Larabee's ch g Vice Regent, by Regent—Christine.
C. E. Williams' b f Angerback, by Carrihoo—Reply.
A. Plummer's b c Great Joy, by Carrihoo—Beulah.
A. Werk's ch f Ida Glenn, by Glenelm—Queen.
Hundley & Prentitt's ch Yogo, by Red Bluff—Lady Bassett.
Hundley & Prentitt's ch f Kalata, by Scotland—Calumity.
N. Armstrong's gr g Grey Cloud, by Hyder Ali—Interpose.
N. Armstrong's b f Evaline, by Hyder Ali—Grouback.
Montana Stakes for three-year-olds and under; \$50 each, half forfeit; \$150 added; to the colt making the best time under 2:50 \$100 extra; mile heats.

- Potts & Harrison's ch c Sam Tilden, by Clariou—Martha M.
S. E. Larabee's blk c President, by Swigert—Patsy Lee.

- H. A. Ramsden's ch f Drama, by Lexington Goldpist—Comedy.
C. Russell's b c Metropolitan, by Echo, dam by Ten Broeck.
J. H. Nixon's b c Pointer, by Sotaway—Nancy.
J. S. Crosby's b c Northward, by Volunteer Star, dam by Pilot Duroc.
S. Scott's William L., by Alexander's Belmont—Maggie Gaines.
H. De Witt's b f Lady Fantasia, by Rancho—Lady Kate.
E. Burke's ch f Elnora, by Com. Belmont—Lenora.
S. E. Larabee's b g Herod, Jr., by Herod—Nettie Morris.
W. H. Raymond's b f Evening Star, by Com. Belmont—Twilight.
W. H. Raymond's b c Edison, by Com. Belmont—Blossom.
W. H. Raymond's h c Fowler, two years, by Com. Belmont—Gracie H.
W. H. Raymond's b g Ehony, by Com. Belmont—Flighty.
A. A. Mott's h c Wyoming King, by Strathmore, dam by McCConnell's Mambrino.
A. A. Mott's h f Villine, by Strathmore—Young Rhody.
N. Armstrong's b f Annie Wilkes, by George Wilkes—Annie Ware.

Belle Echo's Beginning.

At the Summer meeting, at Kalamazoo, Mich., held June 10th, 11th, 12th and 13th, Belle Echo made her first appearance and an indifferent one it was. The Kalamazoo track holds its reputation for being fast. In the four days ten races were given and forty-one heats trotted and paced, every heat better than 2:30. Overman took part in the race for the 2:19 class, winning the second heat in 2:23. He was third in the other five heats and ranked fourth in the summary. The following is the Chicago Horseman's report of Belle Echo's performance:

The first on the programme was the 2:23 class. In this five came to the wire, Stranger and Rolla were drawn. Gladiator, who last year did so well in Wm. McDonald's hands, who was not himself at all, and was distanced in the first heat, by the judges.

After a long and tedious amount of scoring on account of Gladiator's continued bad action, they were sent away, with Gladiator in the lead, closely followed by Felix, Belle Echo following close. At the quarter Echo left her feet and lost all chance of the heat. Adelaide went to the front and never was headed again, winning the heat in 2:26.

Second Heat.—The lot were sent away at the second attempt going round the turn all in a bunch. At the quarter Felix was in the lead, which he held to the three-quarters, when he was collared by Wilkes closely followed by Adelaide. A great race it was down the stretch, when near the wire they were greeted with cheers; and amid the greatest enthusiasm Turner landed Wilkes the winner by a head, in 2:23. Then you could hear the crowd say, "That is what we come to see, a horse race." Belle Echo, who had sold favorite before the race at 10 to 5, was last.

Third heat.—Pools were very much mixed, Wilkes, \$5; Adelaide, \$5; field, \$3, and considerable business was done, some thinking Echo would do better in this heat, but they were sadly disappointed, as Adelaide went away on Wilke's wheel, at the quarter she had lapped him, with Felix following in close attendance. In this way they went round the upper turn, here Wilkes went well out, leaving a place for McCarty to come inside with Felix, and as they came down the stretch one could not tell whose heat it was until they were near the wire. All of the drivers were using their best endeavors to get their favorite in first, but Rood landed Adelaide a winner by a half length, in 2:22, Wilkes second.

Fourth heat.—This heat was a repetition of the third, the drivers trying their utmost to win, but Rood, with his great game mare, Adelaide, got there first by a half a length, in 2:21.

I heard each of the drivers remark that their horses were better to-day than they had been this year, with the exception of Novelty and Echo, who were clear off, and were shnt out in the last heat. This race gave the best of satisfaction. The following is the summary:

Table with 4 columns: Name, Race, Time, and Result. Includes entries for Eugene Rood's b m Adelaide, J. Turner's b s King Wilkes, Peter Schatz's b g Felix, M. M. Hedges' ch m Novelty, and L. M. Titus' b m Belle Echo.

Table with 4 columns: Quarter, Half, Three-quarters, Mile. Shows times for First, Second, Third, and Fourth heats.

At East Saginaw, the following week, she did better, and was evidently improving in form. The race resulted thus:

- June 20th.—Purse \$700, 2:23 class.
Adelaide, b m, by Milwaukee, dam by Bay Mambrino..... 3 1 1 1
Belle Echo, b m, by Echo, dam by Belmont, (thoroughbred)..... 1 4 3 3
King Wilkes, br b, by Geo. Wilkes, dam by Brignoll..... 2 3 2 2
Felix, b g, by Nutwood, dam by Adalab Obief..... 4 2 4 4
Stranger, b g, by Mambrino Hambletonian..... 5 5 5 5
Gladiator, b g, by Blue Bull, dam by Jim Monroe..... dis.

Walton Returns.

Walton, the Plunger, has brought his entire stable to New York, and to all appearances this sensational turfite has given up England for the year at least. The horses are a well-bred lot, and are catalogued as follows:

- Bay colt Wagner, 2, by Prince Charlie, dam Duchesse of Malt.
Chestnut colt Harold, by Reverberation, dam Lady Blanch, by Voltigeur.
Bay colt Hambleton, 2, by Standard, dam Gisela.
Bay colt Richmond, 3, by Wild Dayrell, dam Miss Harriot.
Chestnut colt Hopeful, 3, by Uncas, dam Fair Weather.
Bay colt Deceiver, 4, by Wenlock, dam Boot and Saddle.
Bay horse Mr. Pickwick, 6, by Hermit, dam Tamato.
Bay horse Sauter, aged, by Pace or Vaucresson, dam Barbitone (bred in France).

Seven of them carried Mr. Walton's colors at several meetings in twenty-two races, of which only Mr. Pickwick, and he won a welter handicap, at Sandown Park, ridden by Billy Donohue at 128 pounds, was successful. Two of the two-year olds are recent purchases, Mr. Walton paying 470 guineas for Wagner after it had won the Wilton Park Stakes, at Salisbury, and he paid 300 guineas for Hambleton after it had won the Palace Two-Year-Old Plate, at Alexandra Park, near London. There will be much curiosity to see Richmond run, for he certainly must have some pretensions to be a good horse, considering his prominence in the City and Suburban and the way he was backed for the Derby. He will, no doubt, have plenty of chances to show his "form" in some of the Autumn handicaps. The horses are in quarters at Jerome Park, and will be trained for the Fall meetings by Charles Miller, other wise known as "Brock."

Will the Records be Reduced?

If present appearances go for anything there is little doubt that during the coming season the fastest records at both trotting and pacing in harness will be lowered, and it is possible that so material a reduction in these figures will be made that a mark will be set which shall stand for some time to come. Of course, such reduction, it is supposed, will come from Jay-Eye-See and Johnston, these horses being unquestionably the fastest at their respective gaits now on the turf. Of the former, it may be said that he was never in better condition than at the present time. Last year, at about this season, it will be remembered that he was driven a mile over the Cleveland track in 2:16, and that performance was rightly deemed a wonderful one for a horse of his age. When the news of this fast mile by Jay-Eye-See went abroad, there were not wanting prophets to predict that the result of such work so early in the season would be anything but beneficial to the little black horse. But as he trotted on, week after week, and continued to improve, this fact plainly showed that the theory of overwork was a false one. The fact of the matter is, that at no time last year was Jay-Eye-See over-trained or given too much fast work; and this is evidenced by his trotting his best mile late in the year, and at a time when, according to the theorists, he should have been broken down. A race a week was the most ever given him, and these races never involved more than one fast mile, just enough of speeding to keep the horse at his best. Some who noticed that in his jogging exercise the little black horse nodded somewhat, were long in their assertions that he was lame, that he would break down, and that sundry other mishaps were certain to occur if the plan of letting a 2:10 horse trot at that rate of speed when only five years of age was followed. It is hardly necessary to state that Jay-Eye-See has never been troubled with lameness. It is true that his feet were not all that could have been desired, but after the campaign of 1883 was over, he was allowed to run all Winter without shoes, and the result has proven beneficial, his hoofs being now worn out nicely and seeming in every way perfect. The long rest and light jogging during the months of cold weather did him a world of good, and when taken to Louisville six weeks ago he was in excellent condition to begin the work of the year. No hurrying was done with him, but it was soon evident that the son of Dictator and Midnight had all his old time speed, and a few days since he was driven a mile over the Louisville track in 2:16, the last quarter being done in 32 1/2 seconds. The stable to which he belongs has since that time been sent to the Cleveland track, and should no mishap befall him, Jay-Eye-See will be ready by the middle of next month to renew, with brilliant prospects of success, his battle against the scythe-bearer. It is the firm belief of the best posted horsemen that he will this year trot a mile in 2:10.

Gebhardt and his Groom.

An exquisitely dressed young man, on whose cheek the bloom of health mantled in glowing colors, and on whose dapper little person the latest novelty in Summer suits fitted like a glove, wandered among the crowd of horsemen who pervaded Madison-square Garden, where the sale of the American Horse Exchange was continued. All the horsey gentlemen gazed at the youth. None recognized him. He held himself aloof from the common herd. For two hours he sucked the top of his walking-stick, and seemed to derive inestimable comfort therefrom. At last, however, the fate that comes to all who endeavor to elude the questions of the curious came to the mysterious visitor to Madison-square Garden. Baffled by his silence, a sagacious horse-dealer at length announced that the gentleman was none other than Frederick Gebhardt. He had come to witness the sale of a gray mare, and wished to avoid observation. As the supposed owner of the name still continued along the even tenor of his way, disdainful to speak, a tenacious young dnc, accompanied by two boon companions approached him.

"Hallo, Gebhardt," the leader of the triumvirate exclaimed, "that gray mare of yours is a daisy. We've all been admiring her."

The youth addressed turned around and stared in amazement. "Heard you'd gone to Newport, Mr. Gebhardt," hazarded the second duc.

"Is it Gebhardt you're a-calling me?" at length came from the dazed youth. "Well you're kinder previous, ain't ye now? Don't know whether Freddie would be complimented or not. I am, though."

The dundesque triumvirate blushed simultaneously. There was a Hibernian ring in the voice which answered them, speaking of a long acquaintance with the Emerald Isle.

"I'm Mr. Gebhardt's groom," he continued proudly, "and a d-d poor man for all that, though I kinder turn out trim when it suits me," he added, straightening his immaculate coat. Then up came half a dozen men, with open mouths, and a general air of stupefaction.

"So you're only a groom?" they asked in tones of disappointment.

"Let me tell you, sirs," was the answer, "that I'm groom to the only gentleman in America. Gebhardt is the only gentleman in the United States."

"Your experience has been limited," murmured Officer Smith courageously.

"No, it hasn't," was the reply. "Don't you call it an honor to possess the finest horse in the country?"

"And to be acquainted with the prettiest lady in England," added Officer Smith wickedly.

"Never you mind the lady. That's all right. Freddie is the only gentleman in America, and I'm proud to be his groom, and don't you forget it." And "Pete" Smith walked off to the bar with a mild-looking youth and drank Fred Gebhardt's health in a bumper of ginger ale.—New York Paper.

The training of the greatest pacer the world has ever seen, Johnston, has been carried forward very slowly. Splan being determined not to make the mistake of hurrying matters too much at the start. He was rather light in flesh when delivered to his present owner last Fall, and during the Winter was given plenty of chance to put on muscle, being jogged steadily and fed in a generous manner. The result of this plan of action is shown in his present robust condition. While not at all fat, he has an abundance of flesh that can readily be turned into hard muscle, and that none of his marvelous speed has departed is evidenced by the easy manner in which he goes a quarter at a 2:20 gait. He has been driven plenty of miles in about 2:30, but not one faster than that. That he will during the coming season heat 2:10 there can be no reasonable doubt, as it is simply a question of health. His more ardent admirers place the notch at 2:08, and this does not seem unreasonable when one remembers how easily he paced a mile in 2:10 over a track that was not particularly fast.—Breeder's Gazette.

### The Dwyers' Second Belmont.

Thursday, 5th, was Belmont Day at Jerome Park, a day which has from the beginning of its career been one of the red-letter days of the Spring racing carnival. The Belmont was instituted in 1867, and it was intended that it should occupy the turf a position similar to that occupied by the Epsom Derby in England. The stake has thoroughly filled its mission, for, as a rule, it has brought out the best three-year-olds of each successive season. Ruthless, who won in 1867, was far away the best of her year, and we do not think anything in the stakes was better than General Duke, (since called Judge Curtis), who won in 1868. Kingfisher won the stake in 1870, and in 1871 Harry Bassett won it from a field composed of no less famous a field than Stockwood, Monarchist, Nellie Gray, Tinman, Wanderer, etc. In 1872 Cape Race came from the South with a great certificate of character, but Joe Daniels and Meteor had the finish between them, and in 1873 Springbok defeated the crack field of Connt D'Orsay, The Ill-Used, Waverley, Strachino, etc. 1874 is memorable for the heroic finish of Barbee with Saxon, beating Grinstead, and 1875 saw Calvin win with Aristides, Miller, Chesapeake, Ozark, and Rhadamantus behind him. The finish of 1876 was a desperate one, in which the Virginia colt, Algerine, just beat Fiddlestick a head, and 1877 was sensational through Cloverbrook's rush, when Holloway had to hit him over the head with the butt end of his whip to keep him straight. In 1878 Duke of Magenta spreadeagled his field in a pouring rain, and '79 saw Spendthrift win the stakes for Mr. Keene, as '80 did Grenada for Mr. G. L. Lorillard. Then came 1881, in which Saunterer and Eole ran first and second, and 1882 was a canter for Forester, while 1883 was another for George Kinney. Thus it will be seen that the Belmont has from the outset attracted all the best colts of the country. Up to 1879 the Western owners always considered it the acme of their ambition to win it. Since then, however, racing in the West has grown to such an extent that there are less Western nominations than formerly. But the constant accessions in the East have filled the breach, and the race is still the great test of early three-year-old form, notwithstanding that many owners prefer the shorter race for the Withers.

That "Belmont Day" had lost none of its attractiveness, the large attendance at Jerome Park amply proved. It was much the largest attendance seen on the grounds since Decoration Day, and, while small compared with that magnificent outpouring, it was still extremely large and enthusiastic. Panique's grand victory in the Withers, and his sale the night before to the Dwyers, had the effect to stimulate his backers, and he was heavily supported. The Knight of Ellerslie, a very fine colt by Eolus, from Lizzie Hazlewood, by Scathe-lock, was also well backed. The colt had passed through the ordeal at Washington and Baltimore with an unbeaten record. He came to Jerome in the midst of a heavy storm, and caught a bad cold. He was coughing all the week, but despite this, he did his work so well as to please every critic on the grounds, and the money went on him thick and fast. Himalaya was third choice, and well supported by many who had remembered his race for the Withers. Vocalic, too, did not want followers. He had done his mile in 1:48 at home, and ran away below his private form in the Withers. Both Himalaya's and Vocalic's followers believed that their colts were capable of greater things, and the result of the Withers, therefore, had not discouraged them.

The Belmont was the second race on the card, and excitement ran high. Lee brought Panique to the post as "hit as a hiddle." The colt's coat was blooming, and he moved with great liberty and dash. Knight of Ellerslie looked a trifle light, but he is a colt of much finer action than most of the sons of his sire, a chestnut, with a white stripe and hind feet white, and, while on a smaller pattern than most of the get of Eolus, he has more quality and is not so sluggish. Himalaya, thoroughly racing-like as usual, looked well enough, albeit a trifle big, while Vocalic's followers could not complain of their colt's want of preparation. He led past the stand at the end of the first half-mile, but at "The Bluff" Knight of Ellerslie went to the front and led around the lower turn. McLaughlin, who, acting under Lee's orders, had trailed with Panique, now began urging his gallant little steed, who closed on the Knight as they wheeled into the stretch, and the stand began to cheer. The cheering broke out afresh as, half-way down, Douohue began whipping and the Knight drew away, but Panique was answering McLaughlin's call with wonderful gameness, and, closing again, passed the Knight and won a desperate race by half a length. Himalaya, several lengths away, pulled up, as was Vocalic, who was well back.

There was quite an ovation awaiting Panique when he returned to scale. The colt showed more distress than he had at the finish of the Withers, but he was less so than Knight of Ellerslie, who was clearly not in the best trim for a bruising race such as the Belmont proved. Himalaya was also quite tired; Vocalic not so much so, as he had been eased in the last quarter. As an exhibition of gameness, the finish between Panique and the Knight was unsurpassed, and stamps Panique as a worthy half brother to Harold and Iroquois. That Knight of Ellerslie is capable of better things there is reason to believe, and Appleby & Johnson seemed to share the opinion, as immediately after the race they purchased him for \$10,000, which is not a dollar below his value. Himalaya's party could not explain his utter inability to keep with his horses. That a distance of ground is not his forte they have all along admitted; but he did not, at any stage of the game, show any of that electric burst of speed which enabled him to almost clutch victory out of the jaws of defeat in the Withers.—N. Y. Spirit.

### Training Racehorses.

If the diary of some old trainer could be brought to light to compare with an ordinary training report for a morning in these days, there would be changes in the character of preparations. It would be very useful, also, in deciding several questions as to the merits of modern racehorses in comparison with those of our forefathers. It is said that horses used to stay better than they do now, and such champions as Benningborough, Hambletonian, Orville, Tramp, etc., are spoken of as altogether a hardier race than the horses of the present day. It is forgotten, however, that the preparations they necessarily received were of a kind to fit them to go over a distance of ground, though it must have been at a certain pace, as trained as our horses are at the present day, races could not be won under all the disadvantages experienced by the ancients.

If it was announced that Harvester was going to walk from Newmarket to Epsom to meet his engagement for the Derby, he would go back to an outside price, as the feat would be deemed impossible; but that would have been thought an easy journey less than fifty years ago, and the question may well arise as to how it was done from the north of England

to Epsom before railway times. John Scott must have brought St. Giles down the whole way by road from Malton to win the Derby of 1832, as the lines to the north were not opened for some years later. We know the great northern trainer brought his team of horses down some little time before the meeting, and he had another place at Piggarn, near Doncaster, but there was all the same a pedestrian journey to be performed at a time thought in these days most critical in the period of a preparation. The horse van, which was subsequently utilized a great deal, was comparatively a modern invention, and it certainly did not exist during the first fifty or sixty years of the Derby, so the competitors from afar must have been walked down on the public roads. This must have been training itself of a certain description, and it doubtless left the idea for many years that a good deal of walking was necessary to get a racehorse fit. Trainers not long passed away used to consider two or three hours' walking exercise a *sine qua non*, and this was to be twice a day.

All this has been changed. Long walking and long sweats have been dying out in favor of sharp gallops over shorter distances, and quite a revolution has taken place in the training of racehorses, greyhounds and athletes. It is argued by the modern school that the fastest runners mostly spring from shoemakers, tailors, or artisans who are pretty well confined all day, but steal time to exercise their running abilities for short spells mornings and evenings. Such men as these can always beat gamekeepers, postmen, or others of like vocations, demanding much walking, and it would be maintained that there must be a loss of speed where the duration of a muscular effort is continued. A sort of stationary condition, like a hunter, must have represented the fettle of old Derby winners, and a good pipe opener a day or two before the race was considered the most essential part of the final preparation.

There are some curious accounts of the early journeys of racehorses to meetings. *Orton's Turf Annals* gives one of the famous John Singleton, who began life in no very luxurious way, as his father was a laborer at 4d a day. Rising from a boy to clean the boots to the stable, he lived with a very needy gentleman called Read, who bred a few racehorses. As Singleton increased in importance in the eyes of his master, they entered into schemes together, and as money was badly wanted toward the end of a season young Singleton started off with a filly called Lucy, from Pocklington to Morpeth, distance 120 miles, with but ten and sixpence in his pocket. The lad was groom, trainer, and jockey. Sore beset at saddling time—by roughs and busybodies—a friendly butcher turned up to give a helping hand, and the race was run and won, and several others besides, in continuing the trip. Great trainers were wont to take expeditions of this sort at a much later date. Old John Day rode Little Red Rover from Stockbridge to Plymouth, in 1833, to win the Salt-ram Stakes, and another race the same day. He reached his journey's end two days before the meeting, and the next morning a sportsman, who is alive now, led him a gallop on a hunter that could race a bit round the Plymouth Course. Old John probably stopped on the road at his friend, Mr. Wreford's, but anyway Little Red Rover must have traveled close on 360 miles there and back to win two races. I wonder how he went to Epsom when he ran second in the Derby to Priam! But it was odd training to regard it from the point of view we take of such matters in these days.—*Bell's Life*.

### Abe Buford.

Shortly after the assassination of Judge Elliott by Tom Buford, a relative of the Buford's told me, in Louisville, that there was a pronounced vein of insanity in the family. A sane person could hardly have wantonly killed such an upright man as Judge Elliott, and if Gen. Abe Buford, the brother of Tom, were entirely sane, he would not have deliberately taken his own life.

A dozen years ago or over, when I first set foot on a race course, General Buford was at the zenith of his popularity and success as a turfman. He was then the owner of the Bosque Bonita breeding establishment, had probably the best running stable in the South or West, and stood high socially and financially. The story of his subsequent troubles is pretty well known. From ease and affluence he was, in the course of a few years, reduced to virtual poverty. This, added to deaths in his family, and his brother's terrible crime, undoubtedly preyed on his mind to such an extent as to induce the terrible act, the taking of his own life.

I don't think the General had been engaged in any avocation of late. A couple of years since, in Louisville, he acted as agent and correspondent of a Chicago turf paper, and used to be seen soliciting subscribers. I believe he did not feel at home in the business, or could not make it pay, and dropped it after a time. His old love for the turf apparently never left him, and he could always be seen at the Louisville meetings. I saw him at the Spring meeting there a few weeks ago, and I noticed at the time that he looked abstracted and dejected, as if his mind wandered back to the heyday of his success, when he was a power on the turf.

General Buford was a man of strict integrity, and had a nice sense of honor. Nearly a generation on the turf, his name was never once associated with transactions smacking of the sharp or disreputable. He lived, however, in a State where men are too handy with the revolver, and where there is not a high estimate on the value of human life. Public opinion, indeed, and the teachings of a portion of the newspaper press, recognize a "higher law" for the redress of grievances, real or imaginary, than an appeal to the tribunals of justice. A sad and shocking illustration was afforded a few short weeks ago, when an upright, Christian Judge was publicly cowed because of a decision adverse to a prominent client in his court. A tawdry, vicious sentimentalism, only too pronounced in his State, dictated he must kill the man who had cowed him; the teachings of his church, the precepts of the Master, urged him in the other direction. The conflict between the promptings of duty and the clamors of a pernicious public sentiment unbalanced his mind, and he solved the cruel dilemma by putting a bullet through his brain.

The dead Buford had his inspiration and training under a civilization quasi chivalrous but semi-barbarous, for there can be no genuine civilization where the pistol and shotgun usurp the domain of law and order. This is not meant in the way of a censorious homily, with personal reference, because it does not exactly fit in connection with the deceased; but the suicide suggests a train of reflections going beyond the individual to the society in which he moved. Censure would be sadly out of place in referring to a mind diseased, clouded, harassed—to a man who, having lost almost all he considered worth living for, found surcease of sorrow in a terrible tragedy—"the last scene of all."—*Broad Church, in New York Spirit*.

When Will Cody made his record of 2:19, his owner made his harness, boots and shoes, and drove him in the race.

### Old Volunteer.

Feeling a lively interest in the recent Horse Show, I was a frequent visitor to Madison Square Garden during show week. I found light comedy in the scenes presented by the imitators of cockneydom, and was quite amused by the efforts of some of the upper ten thousand to follow the habits and fashions of the English aristocracy. Concerning the trotters and roadsters, with all that pertains to them, I am happy to say that everything was truly American. One of the first horses which I hastened to visit was the illustrious Volunteer. In company with Judge Ingraham and Mr. Guy Miller, of Chester, I took a long look at him, and as I gazed on the grand old horse, now in his thirtieth year, I could not help wondering what son would rise up to repeat his achievements in the stud. Although he has so long ago passed the prime of his existence, he carries his years lightly, and were it not for the deep hollow in his back, he would pass for a horse ten years younger. The son of "the old sod," his faithful attendant for years, kindly stripped the blanket from him, and I saw that his coat was still bright and cherry red, his eyes full and prominent, his legs cool and free from puff or hlemish.

As I noted these things I remarked to the groom, "He looks as if he still enjoyed his meals." "Yes, sir, no mill grinds his feed yet. Dr. Horse fixed his teeth some years ago, and they are still good." Now a tall, lank, inquisitive down Easter darkens the door, saying, "Wal, I declare, this is old Volunteer. How old is he now?" "Thirty years," was the reply. "When did he stop serving mares?" was the next inquiry. On being told that he was still doing duty, and had served a mare a week ago, he looked incredulous and passed on. Then Mr. Guy Miller commenced to chat with me about the horse as he looked on him with pride. "There," said he, "is the greatest sire that ever lived, and the Patriot blood inherited from his dam should never be lost sight of. He shows it in his high finish and gait. I think the vitality he shows is almost remarkable, and, as a rule, it goes hand in hand with power to beget great speed. Volunteer is extremely vigorous. I bred seven mares to him in the past three years, and all produced colts. One of them, now twenty-three years old, had four colts by him, and was only four times served." "I suppose you knew him in his early days?" "Oh, yes, and when that old Presbyterian deacon showed him as a four-year-old through the stretches on the Goshen track I think he was the grandest trotter I've ever seen."—*Veritas in New York Spirit*.

### Why Trotting is Not Popular in England.

Hiram Woodruff, in his standard work on "The Trotting Horse of America," speaking about severe bits for horses, says: "If a man has a horse that can not be driven with a bar-bit or snaffle (? plain snaffle, there being eight different kinds), he may as well sell him, except in a very exceptional case." He then proceeds to inquire, "Where are these kinds of severe complicated bits most in use?" "Why in England?" This assertion is followed by some extraordinary statistics. Then follows the somewhat irrelevant question, "Where do the horses trot best?" Let us answer for argument's sake, "Why in America?" Americans pride themselves very much on their trotting horses, and justly so, for have they not developed the highest degree of speed, in that particular pace, of any nation in the world? Granted; but is it fair on this account to draw individual comparisons between the trotting horse of America and the English "hackney" (for the question practically resolves itself into this), as though people in the old country were straining every nerve to succeed their trans-Atlantic consins in that particular line? This, however, is not the case. To begin with, trotting horses have gone out of fashion in England. At the commencement of the present century there were ten good performers in the trot to one now. Secondly, it is scarcely likely that trotting will become popular in England without an entire alteration in the taste and habits of its people and also a decided revolution in the present system of road making, (all the pikes being academized). Under existing conditions, therefore, as regards roads, a trotter would pound his legs and feet to pieces in a week. "But," people say, "why not construct regular trotting tracks? Then the difficulty would be obliterated at once." The reason is this: Racing men will not take the trouble for what they consider an inferior amusement. Running is the national sport in England, just as trotting is in America. Very few men could be found to give their minds and money to both these being such an essential difference between the two. Trotting is hardly a natural pace, and it is only by dint of constant practice on the track that perfection is attained. The idea of riding a fast trotter with anything like comfort is obviously out of question, for this reason, viz: That to give a pleasant "feel" to the rider, elastic fetlocks are a *sine qua non*, and this property in a trotting horse is of course fatal to speed.—*Kentucky Stock Farm*.

### Budd Doble's Skill.

"A poor driver, or even a second-class one, would have lost that heat and the race with it," said a man at the Driving Park, Saturday, who has been identified with the trotting turf as owner, driver and trainer for fifteen years. The remark was called forth by the masterly manner in which Budd Doble rallied May Bird at the finish of the concluding heat in the 2:26 race and landed her a winner by the shortest of heads. The mare had gone three very fast heats and by reason of previous sickness was not in condition to stay out a four-heat contest where the pace was so strong. An ordinary driver would have made so much use of her speed in the first two heats as to render her unable to compete successfully for the others; but Doble made no such mistake. Winning the second and third heats with as little distance as possible between the first and second horses, he went away for the third with the mare seemingly in possession of as much speed as ever, but when half-way down the home-stretch it was evident that she was becoming leg-weary, and by the time the distance stand was reached she was ready to make a tired break, which would undoubtedly have lost her the heat. The other horses were at her wheel and coming fast. An ordinary driver would have put all his energy into a last despairing effort to make the mare carry her brush to the wire—and have lost. Doble did nothing of the kind. On the contrary, he took May Bird back until two of the others were ahead of her. Then, when everybody thought the heat was lost, he gave the mare a rallying shake of the bit at the exact instance when it was most effective and beat Lywood by a few inches. It was as fine a bit of driving as has been seen for many a day, and when it is known that the man with whose remark this paragraph begins is not on terms of friendship with Doble, its justness will be denied.—*Breeders' Gazette*.

Californians at Chicago.

The Summer running meeting at the Chicago Driving Park began June 20th. An outline of the performances of the California representatives there, the glorious victories and disastrous and unexpected defeats have been duly wired to most of our readers. From our Chicago exchanges we compile the details of the events in which California horses took part, the record covering the first four days.

The opening event was the Inaugural Rush, one mile for all ages, for which six came to the post. Finality, a full brother to Force, who was put about as a particularly good thing, but turned out quite a stiff, and was at the tail end throughout; Gano, who has grown and thickened since his last visit, and is a clean, powerful colt; Ascender, who, on the strength of past performances, was backed to win a good deal of money; and Leman, Hollywood and King Troubler were the field. Gano showed his stable to be in excellent form by coming away from his horses at the right time, winning with the greatest ease.

The Illinois Oaks introduced to the crowd the great mare of the West, Fallen Leaf, to meet whom only Mona and Europa responded. The famous daughter of a famous mother is a magnificent filly, built on grand lines, and, though Mona and Europa are good mares, it was simply an exercise gallop for the Californian to beat them.

CHICAGO DRIVING PARK, June 20th.—The Inaugural Rush; purse \$250, for all ages, \$50 of which to second; one mile. E. J. Baldwin's b c Gano, 4, by Grinstead—Santa Anita, 118 pounds (Holloway) 1 C. B. Long's b c Leman, 5, by Lelaps—Talaria, 119 lbs. (Riley) 2 P. A. Brady's blk h Finality, 4, by West Roxbury—Nora North, 113 pounds. (Jackson) 3 R. C. Pate's b g Ascender, 4, by Buckden—Ascension, 115 pounds. (Withers) 4 W. B. Feeland's cb g King Troubler, 3, by King Ban—Heresay, 100 pounds. (Allen) 5 Charles Logan's b m Hollywood, 4, by Highlander—Lady of the Lake, 113 pounds. (Saxon) 6 Time—1:43

Pools sold: Gano \$70, Finality \$50, Ascender \$40, the field \$17. Books: 6 to 5 against Gano, 5 to 2 Ascender, 8 to 2 Finality, 16 to 2 Hollywood; 30 to 2 King Troubler. At the tap of the drum Hollywood cut out the work, King Troubler close up, Ascender third, the balance bunched; in this order they ran past the quarter; approaching the half Gano shot past his horses, and Ascender and Leman raced neck and neck together two lengths behind, Finality next and King Troubler and Hollywood away in the rear. Turning for home Ascender and Leman made a punishing finish, but could not catch the Californian, who lauded by two lengths ahead, Leman second, Ascender a fair third. Time, 1:43. French mutuels paid \$10.30.

Same Day.—The Illinois Oaks, for three-year-old fillies, \$50 entrance, \$25 for 1st, with \$800 added, \$100 of which to second; one mile and a quarter.

E. J. Baldwin's br f Fallen Leaf, by Grinstead—Mollie McCarthy, 109 lbs. (Holloway) 1 William Cottrill's ch f Mona, by Buckden—Monomania, 100 lbs. (Stovel) 2 O. H. Lefevre's cb f Europa, by Hurrah—Sunrise, 110 lbs. (O'Hara) 3 Time 2:14

Pools sold: Fallen Leaf, \$160; field, \$51. Books: 3 to 1 on Fallen Leaf, 2 to 1 against Mona, 4 to 1 Europa. This race requires no description. Fallen Leaf cut out her own work, held the lead throughout, and cantered in a half a dozen lengths ahead of Mona. Time, 2:11½. French mutuels paid, \$6.60.

SECOND DAY.

The track was fast, and the defeat of several prominent favorites was immensely popular with the fielders. The opening event of the day, the Nursery Stakes, brought five good two-year-olds together, for which Verano, a good looking chestnut colt in the lucky Californian stable, was made favorite, although Joe Cotton carried the confidence of a large portion of the public, and was a strong second choice, while Tennessee was put about as a real good tip, and was backed accordingly. Verano won in a gallop by six lengths, causing the army of backers to think the "Lucky Baldwin Stable invincible," with disastrous results later on.

The Club Purse, seven furlongs, induced ten to sport silk, and the weight of public money made Sweetbriar first choice, the reliable Sadie McNairy taking second honors, Swinney selling also on even terms. The backers of the favorite only got a thorn for their pains, as Sweetbriar was never formidable, McNairy winning cleverly, with the rank outsider, Ailee, second.

The Board of Trade Handicap was conspicuous for a very small field, a very hot favorite and a great surprise. Shenandoah's remarkable two-year-old performances, coupled with the splendid form of the stable, and the confidence with which the party planked down the greenbacks, made it look as if the race was all over except the shouting. That shrewd horseman, Clifton Bell, backed his entry, Colorado, and a few of the talent followed his example. Stoval had the mount, and after a very fast race from end to end, the Californian tired at the finish, Colorado winning, Pate second, the favorite third. The pace was so hot that Aliunde, though he lived with the party to the distance stand, had hopelessly broken down, and limped to the stable on three legs.

June 21st.—The Nursery Stakes, for two-year-old colts and fillies; \$50 entrance, \$25 forfeit, with \$800 added, \$100 of which to second. One mile. Madens allowed 5 lbs. The winners of two or more stakes to carry 5 lbs extra.

E. J. Baldwin's cb c Verano, by Grinstead—Jennie D., 105 lbs. (Holloway) 1 J. T. Williams' ch c Joe Cotton, by King Alfonso—Inverness, 110 lbs. (Duffy) 2 H. Monk, Mason & Co.'s b c Tennessee, by Ten Broeck—Lizzie Hoover, 105 lbs. (Allen) 3 J. N. Thorburn's b c Red Cloud, by Thunderstorm—Matie Pendleton, 105 lbs. (Stoval) 4 R. C. Pate's b g Tenfellow, by Ten Broeck—Rebecca, 102 lbs. (Withers) 5 Time—1:44½

Pools sold: Verano, \$35; Joe Cotton, \$25; Tennessee, \$20, the field, \$20. Book betting: 1 to 1 against Joe Cotton, 8 to 5 Verano, 5 to 2 Tennessee, 4 to 1 Red Cloud, and 8 to 1 Tenfellow. Verano was determined to make no waiting race of it, but at the tap of the drum at once cut out the work, Joe Cotton and Red Cloud being next in order, the others in close attendance. The Californian led his field at a clinking gait past the quarter, where Tennessee had forged into second place, and Joe Cotton had fallen back to last. Past the half Red Cloud moved up to Tennessee, the favorite still sailing along two lengths ahead of the party. Rounding for home, Joe Cotton made his effort, and under whip and spur passed Red Cloud and Tennessee, but was unable to catch the leader, who won easily by six lengths. Time—1:44½. French Mutuels paid, \$9.60.

Same Day.—Club Purse, \$350, for all ages, \$50 of which to second. Seven furlongs. James Murphy's b m Sadie McNairy, 4, by Enquirer—Nannie McNairy 114 lbs. (Todd) 1 O. E. Lefevre's b f Ailee, 3, by imp. Hurrah—Wananta, 102 lbs. (O'Hara) 2 M. A. Walden & Co's blk m Thady, 4, by Tom Bowling—Colleen Bawn, 113 lbs. (Gibbs) 3

J. G. McFadden's b c Swinney, 3, by Ten Broeck—Nora Crelna, 107 lbs. (Withers) 0 R. Jervis' ch g Nippon, 6, by Tom Bowling—Kate Duncan, 117 lbs. (Murphy) 0 G. W. McDaniels & Co's b g Vennor, 4, by Vermont Belle—T. Lyons, 115 lbs. (G. Walker) 0 J. B. Haggins' b f Sweetbriar, 3, by Virgil—Impudence, 102 lbs. (Kelly) 0 Cyrus James' ch c Jase Phillips, 3, by Great Tom—Mohur, 107 lbs. (Stoval) 0 Arch Spring's ch b Bob Burns, 4, by Barney Williams—Queen, 118 lbs. (Riley) 0 Wiley Buckle's br c Hallway, 3, by Harkaway—Mollie Lee, 104 lbs. (Allen) 0 Time—1:30

Pools sold: Sweetbriar \$25, Swinney \$17, Sadie McNairy \$17, Thady \$9; field \$20. Books: 2 to 1 against Sweetbriar, 3 to 1 Sadie McNairy, 4 to 1 Swinney, 5 to 1 Jase Phillips, Nippon and Ailee, 8 to 1 Thady, 10 to 1 Bob Burns, and 20 to 1 Hallway. The delay at the post was tedious, Thady refusing to come up to her horses, but the lot got away to a good start, with the exception of Hallway who was left at the post. Stoval sent Jase Phillips to the front, Sadie McNairy, Swinney and Sweetbriar next, the balance of the field bunched; up the backstretch Swinney joined the front division; at the top turn the flying field closed up considerably; here Sadie McNairy shot to the front, with Ailee second, and Thady, with a splendid sprint tried to catch the leaders, but could not get there, Sadie winning by a length. Time, 1:30. French mutuels paid, \$14.60.

Same Day.—The Board of Trade Handicap; a sweepstakes for all ages; \$50 entrance, \$25 forfeit, of which \$10 must positively accompany the nomination, and which is the only liability if declared out by May 1st; \$800 added, \$200 of which to second; weights to be published April 1st; winners of any race after publication of weights to carry 5 lbs. extra; two or more races, 10 lbs. extra; one mile and a half. Clifton Bell's h g Colorado, 4, by Germantown—Coliseum, 105 lbs. (Stoval) 1 R. C. Pate's ch b Bol Pate, (The Colt), 4, by St. Martin—Sophy Baddeley, 105 lbs. (Withers) 2 E. J. Baldwin's b c Shenandoah, 3, by Shannon—Demirep, 103 lbs. (Holloway) 3 Gray & Co's ch h Aliunde, aged, by Alarm—Lady Richards, 115 lbs. (Murphy) 0 Time—2:33½

Pools sold: Shenandoah, \$100; field, \$40. Books: 4 to 1 on Shenandoah, 4 to 1 against Colorado, 8 to 1 Aliunde, 10 to 1 Boh Pate. With the tap of the drum the Californian cut out the work in the hottest kind of a way, with Boh Pate second, Colorado last; around the upper turn Shenandoah led by two lengths, and passing the stand the positions were unchanged, but the tremendous pace told us they went up the backstretch, and the favorite began to come back to his horses; on the back turn Colorado passed Aliunde and got on even terms with Pate, while it was quite evident that Shenandoah was already receiving punishment; the finish home was a cracker, and Colorado, who had been admirably ridden, came at the right time with a splendid rush, winning by a length, Boh Pate second, the favorite third. Time—2:39½. French mutuels paid, \$25.10.

Same Day.—Club Purse, \$250 for all ages, \$50 of which to second; three-quarters of a mile.

Weildman & Day's b m Jocose, by Hurrah—Idaeso, 113 lbs. (Grimes) 1 Jas. Murphy's b m Sadie McNairy, 4, by Enquirer—Nanny McNairy, 113 lbs. (Todd) 2 J. B. Haggins' ch m Premium, aged, by Castor—Flying Cloud, 115 lbs. (Duffy) 3 Ben. Howard's ch c Venture, 3, by Commerce—Belle Robinson, 107 lbs. (Turner) 4 T. H. Lindsley's b g Dudley Oaks, 5, by Nathan Oaks—Carrie P., 117 lbs. (Dutton) 0 C. B. Long's ch f Beverly, 3, by Fellowcraft—Lou Pike, 102 lbs. (Beem) 0 Thomas Walker's sr h Tony Pastor, 3, by Billy Melburn—Nellie Bly, 107 lbs. (Richard) 10 Jas. T. Williams' ch f Laura Gould, 3, by Pat Malloy—Fanchon, 102 lbs. (Withers) 0 Hodge & Walker's blk g Friday, 5, by Morse—Phoebe Couzine, 117 lbs. (Logan) 0 Cyrus James' ch c Jase Phillips, 3, by Great Tom—Mohur, 107 lbs. (Stoval) 0 E. V. Martin's b m Miss Goodrich, 4, by Kingbird—Betsy Branch, 113 lbs. (T. Riley) 0 Time—1:55½

Pools sold: Premium \$65, Sadie McNairy \$60, and the field \$100. Books 2 to 1 against Premium, 3 to 1 Miss Goodrich, 3 to 1 Sadie McNairy, 5 to 1 Jocose, 7 to 1 Dudley Oaks, and 10 to 1 against each of the others.

As the flag dropped the favorite made the running, followed by Venture, Miss Goodrich and Dudley Oaks; up the back stretch the whole party were hunched, though Premium still held the lead; the pace was a red hot one, and turning for home the jocks freely used both whip and spur; half way home Jocose and Sadie McNairy challenged for victory, and a grand finish ensued; it seemed impossible for either mare to get the best of it, but in the last stride Jocose got her nose in front, winning by the short end of that useful member. Time 1:55½. French mutuels paid, \$32.60.

THIRD DAY.

June 23.—The Green Stakes for three-year-old colts and fillies that have not won a race prior to Jan. 1, 1884, \$25 entrance, p, with \$500 added, \$100 of which to second. One mile and an eighth:

T. J. Meighen's b g Strickland, by Springbok—Lorena, 115 lbs; Ellis 1 E. J. Baldwin's ch f Savana, by Grinstead—Josie C, 113 lbs. (Holloway) 2 Ed. Weeks' ch c Madam, by Hurrah—Foster, 113 lbs. (Withers) 3 Ben. Howard's ch c Venture, by Commerce—Belle Robinson, 113 lbs. (Turner) 4 W. B. Feland's ch g King Troubler, by King Ban—Heresay... (Duffy) 0 Wm. Mulkey's blk c Joquita, by Lucifer—Chiquita, 118 lbs. (Murphy) 0 G. L. Lefevre's b g Actor, by Trump—Little Six, 115 lbs. (O'Hara) 0 F. M. Lilly's br f Bonita, by Kyle Daly—Phaeton, 113 lbs. (Hawkins) 0 Wm. Cottrill's h f Cora Baker, by Bueden—On Time, 113 lbs. (Stoval) 0 Wiley Buckle's b g Hallway, by Hallway—Mollie Lee, 115 lbs. (Spaulding) 0 Time, 2:02½

Pools: Joquita, \$27; field, \$25. Books: 3 to 5 against Joquita, 4 to 1 against Savana, 8 to 1 against Cora Baker, 8 to 1 against Strickland, 10 to 1 each against Venture, Actor, Bonita and Madison, 20 to 1 against King Troubler and Hallway. When the starter tapped his drum Strickland at once shot to the front, King Troubler and Venture second, Bonita third; passing the stand Strickland increased his lead and at the quarter pole had opened up quite a gap of daylight, King Troubler second, Venture third, Bonita leading the rear division. Along the backstretch the leader led the party a merry clip and when the turn was made for home a desperate effort was made to close the gap, the Californian, Savana, securing second place, six lengths behind. Time, 2:02½. French mutuels paid, \$10.10.

Same Day.—Club Purse, \$400 for all ages, \$50 of which to second: one mile and three-quarters.

J. T. Williams' ch c Bob Miles, 3, by Pat Malloy—Dollie Morgan, 101 lbs. (Withers) 1 C. L. Hunt's ch c April Fool, 4, by Intruder—Etta Powell, 110 lbs. (Sayers) 2 W. C. Ma Cuvock's ch b Boulevard, aged, by Bonnie Scotland—Marpessa, 123 lbs. (Murphy) 3 G. D. Wilson's ch c Keene, 3, by Dutch Skater—Kapanga, 101 lbs. (Kelley) 0 E. J. Baldwin's b c Shenandoah, 3, by Shannon—Demirep, 103 lbs. (Holloway) 0 John Forbes' b g George L., 4, by Nigili—Zea, 115 lbs. (Gules) 0 Time—3:15½

Pools: April Fool, \$75; Bob Miles, \$40; Shenandoah, \$36; field, \$25. Books, 13 to 10 against April Fool, 2 to 1 against

Shenandoah, 5 to 2 against Bob Miles, 7 to 1 against Boulevard, 10 to 1 against Keene and 10 to 1 against George L. The field got a quick send-off, April Fool and Boulevard leading, at the half April Fool had a good lead and continued to cut out the work, Boulevard two lengths behind, Shenandoah third, Bob Miles, George L. and Keene well together in the order named. After passing the head of the stretch Bob Miles moved up to second place and passing the stand Shenandoah shot by his horses, and got on even terms with Miles. The struggle in the backstretch was pretty and exciting, Miles, April Fool and Shenandoah going like one horse, while a couple of lengths behind came the balance of the party. The pace was too hot for the Californian, who fell back. April Fool was again first just past the three-quarters, but going wide. Miles vigorously ridden got on even terms with him in the stretch. A punishing finish ensued, Bob getting there by a head. Time 3:15½. French mutuels paid, \$21.50.

THIRD DAY.

The Ladies' Stake turned out all right, Rhadima, the favorite, a very handsome filly by Rhadamantus—Volante, romping home as easy winner. In the mile heats Leman also rewarded their confidence. These two small successes led up to the heaviest betting race of the day, the Merchants' Stakes for which Gano, John Davis, Ascender, Idle Pat and Thady put in an appearance. The last three were considered out of all calculations, the race being looked upon as a match between Gano and Davis; only six Paris tickets were sold on the winner, Ascender. The win was a very popular one, as the blue and white stripes are popular colors, and the public were glad to see the Pate stable getting into the ancient form. No one was more surprised at the victory than Mr. Pate himself, who had not a dollar on.

The Merchants' Stakes, for all ages; \$50 entrance, \$25 forfeit, with \$500 added, \$100 of which to second; one mile and a quarter; closed January 16th, 1884, with twenty-one nominations. R. J. Pate's h g Ascender, 4, by Buckden—Ascension, 115 lbs. (Withers) 1 C. H. Hunt's ch g John Davis, aged, by Harry O'Fallon—Bette, 119 lbs. (Savers) 2 E. J. Baldwin's b c Gano, 4, by Grinstead—Santa Anita, 118 lbs. (Holloway) 3 M. A. Walden & Co's blk m Thady, 4, by Tom Bowling—Colleen Bawn, 113 lbs. (O'Hara) 0 J. J. Connelly's ch g Idle Pat, 4, by Pat Malloy—Fanchon, 110 lbs. (Bayer) 0 Time—2:12½

Pools sold: Gano, \$100; John Davis, \$65; Thady, \$9; Ascender, \$8; Idle Pat, \$5. Books, 8 to 5 against Gano, even against John Davis, 10 to 1 each against Ascender and Thady, and 10 to 1 against Idle Pat. After several breaks away, the cry "they are off" was heard, and Idle Pat at once rushed to the front, with Gano second, John Davis close up, Ascender fourth, and Thady last. Passing the stand the positions were unchanged, but at the club house turn John Davis let out a link, going to the front, while Ascender ran into second place, with Gano third. The race to the half was a keen one, and the Californian got on even terms with Ascender, but soon lost it again, as Ascender gradually but surely gained on the leader, who he collared at the three-quarter pole, and at the turn for home was on even terms. From here to the wire he came away with ease, while Gano and Davis fought a desperate finish for second place. Ascender came home a handsome winner by two lengths, Davis taking second honors by a head. Time—2:12½. French mutuels paid, \$180.50.

Jay-Eye-See has trotted this season a mile in 2:12, Mand S. a mile in 2:13½ and Clingstone a mile in 2:14½, the first half in 1:06. The performances of Jay-Eye-See and Clingstone were made on the Cleveland track, which, in its present condition, is some two seconds faster than that of the New York Driving Club. The 2:13½ of Mand S., taking everything into consideration, is the best mile shown up to this time. Trinket is reported as going fast, and hopes are entertained that St. Julien will do credit to his 2:11½ reputation. Should Mand S., Jay-Eye-See, Clingstone, Trinket and St. Julien come together in a race the excitement which would blaze over the country would dwarf into insignificance that of the Presidential canvass, and the man who picked the winner would pass into history as a lucky individual. There is not much prospect of a star battle. The owners of great horses are always timid about putting them into races which are open to all comers. They prefer to give exhibitions, or to trot against a single competitor.—Turf, Field and Farm.

At Cedar Rapids, Iowa, on the 13th inst., the race for 2:48 class was won by the bay mare Nellie L., by George Wilkes, best time, 2:29½. This makes at least twenty-seven of the get of Wilkes which have records of 2:30 or better. On the same day and track as above the free-for-all trotting race was won by Will Cody, by Blue Bull. Those who are anxiously looking for instances where aged mares have produced winners can point with pride to Will Cody, whose dam, Celia, was about twenty-five years old when Cody was dropped, he being her second foal. Cody was foaled in 1871. His record, 2:19½, was made at Chicago, Ill., July 23d, 1880. He has now won sixty-four heats in 2:30 or better. It is doubtful if there is another case on record where so old a mare has produced so fast and game a trotter. Cody's dam was a heathen gray of unknown breeding.

Butterfly obtained at the Boston meeting a record of 2:23½. She is by Young Jim, out of a mare by George Wilkes, second dam by Daniel Lambert, and third dam thoroughbred. Young Jim was got by George Wilkes, out of a mare by Lear's Sir William, son of Howard's Sir Charles. The trotting blood in Butterfly is well supported by thoroughblood, and the young mare has finish with plenty of courage.

It is a well-known fact that Panique, the winner of the Withers and Belmont, will not stand the whip. His party say that when Fitzpatrick hit him, in his trial before the Withers, the colt half turned his head and rolled his eye back, which, as "Fitz" says, seem to mean: "Now, don't you try that again; if you do it will be a case of monkey and parrot."

At Brighton Beach, on June 20th, colored jockey Stoue evinced his pleasure at being passed by superior horseflesh in both the third and fourth races, by striking Spellman in the mouth during the progress of the third race, and Cowal with the butt end of his whip in the fourth race. For the first offense he was suspended for the season, and for the second he was ruled off.

The 1:04½ of Mand S. to the half-mile pole of the New York Driving Club track struck the very notch made by Pocahontas on the same track before it had been improved. Lucy Cnyler pulled a top road wagon to the half last Summer in 1:05.

## Inbreeding.

We have always been an advocate of in and inbreeding when not so close as to constitute incestuous crossing. In England the system has proved a success, as is shown in the two great horses of the country, Stockwell and Retaplan, who are descended on both sides from the celebrated Penelope, having no less than two direct crosses to this mare on the sire's side and one on the maternal side. We need not go so far back as the days of the noted Highflyer to establish the success of the principle, as in that early day there was scarcely diversity enough of good blood to avoid inbreeding. The present season so far has developed no really first-class two or three-year-olds; but in those which have shown the best the close consanguinity of blood is very apparent. We will, for example, commence with the two-year-olds. The best ones, so far, in the West and East are Favor, Redstone, Triton and Wanda. The first mentioned have won all his engagements and is by Pet Malloy, son of Lexington, dam Favorite, by imp. King Ernest; second dam Jersey Belle, by Australian, out of Aerolite, by Lexington. He is inbred to Lexington, and much inbred through the collateral branches in the pedigrees of King Ernest and Australian, and through the large infusion of Diomed blood in both sire and dam. Redstone, another good one, is by Wanderer, son of Lexington and Coral, by Vandal, dam Katie Pierce, by Leamington, out of Stamps, by Lexington, she out of Mildred, by Glencoe, so that he has a double cross of Lexington, and a double cross of Glencoe, and traces on the side of the sire to an own sister to Glencoe, while both Glencoe and Leamington give him a very large infusion of the blood of English Eclipse. Triton, the sensational colt of the year, is acknowledged to be by Sensation, although credited with double paternity, dam Ocean Queen, by Carnival. Leamington, the sire of Sensation and Carnival, are inbred to Blacklock and Pantaloon, whilst both on the sire's end dam's sides he is closely inbred to the English Eclipse, through the Wbelebene and Tremp blood. Wanda, one of the most promising two-year-old fillies in the West, is by imported Billet, dam Wieland, by Wanderer, son of Lexington, out of Iodide, by Lexington. Florio, one of the best two-year-olds in the East this year, is by Virgil, son of Vandal, by Glencoe, dam Florence I., by Australian, out of Charlotte Buford, by Lexington, she out of Kitty Clarke, by Glencoe, doubling in Glencoe and tracing on both sire's and dam's side to the noted Cub mare imported by Gen. DeLucey. Loftin, one of the prominent and successful three-year-olds of the West, is by Monarchist, son of Lexington, dam Lily Babbitt, by Victory, son of Uncle Vic, by Lexington; second dam Bessie Eagle, by Mahomet, out of Stamps, by Lexington. Knight of Ellerslie, a reputable performer, is by Eolus, son of Leamington and Fanny Washington, by Revenue, dam Lizzie Hazlewood, by Seethelock, out of War Song, by War Dance; Seethelock, by imported Eclipse out of Fanny Washington, the dam of Eolus. Panique is by Alarm, inbred to Waxy through Whalebone and Whisker, and to Sultan through Glencoe and Bay Middleton. Pemique's dam, Maggie B. B., by Australian, out of Madeline, by Boston, and through her dam Magnolia, by Glencoe to Sultan again, end through Australian doubled on Waxy through Whalebone and Whisker. Panique is the well-known winner of the Withers and Belmont Stakes. Rataplan, the winner of the great Emporium Stakes, is by Alarm or Reform, generally credited to the latter. If by either he is a very much inbred horse. In Alarm he would get a large infusion of both Waxy and Sultan blood, and through Reform a much larger infusion of the same blood, while through his dam, Lady Lumley, by Retaplan, he traces twice to Glencoe. Rataplan being by The Baron, out of Pocahontas, by Glencoe, and Knight of the Kars, sire of Reform's dam, is by Nutwith, out of the same noted Pocahontas, with a number of crosses of Waxy on both sides. The great three-year-old filly, Fallen Leaf, is very much inbred, being by Grinatead, son of Gilroy, son of Lexington and Megolia, by Glencoe, dam Mollie McCarthy, by Monday, son of Colton, he by Lexington, out of Topaz, by Glencoe; second dam Hennie Ferrow, by Shamrock, out of Ida, by Belshazzar. Shamrock was by St. Patrick, dam Delight, by Reveller, out of Defiance, by Rahens. Topaz, the dam of Colton, was by Glencoe, out of Eliza, own sister to Defiance, and the filly is doubled in on the Blacklock blood through Trauby in Grinstead, and Belshazzar in the dam. These few facts concisely stated go far to establish the fact that inbreeding is not the hugar that some of our inexperienced objectors claim. In fact, there is scarcely one horse in a hundred possessing real merit which is not more or less inbred, and some so closely that it almost amounts to incestuous breeding. It is a well established fact that many of the most noted racehorses and stallions which have flourished and made a name on the turf and in the stud were bred incestuously.—*Turf, Field and Farm.*

## The Racing Problem.

The running of the two and three-year-olds up to the present time has not developed a first-class colt or filly at either age. When Hindoo came out at two years old he won seven important stakes without a skip, and when three years old lost only two races out of twenty in which he started. The same may be said of Spendthrift; in his two-year-old form he won all his engagements, and a majority of those the season he was three years old. Scusatation also made an unbroken record as a two-year-old, and was in high form at three years old, until he met with the accident which caused his retirement. In the present season Favor has won three times, his only starts, and the other stakes in the West have been won by different colts in very ordinary time. Triton won his only start so far, and the only other two-year-old which has shown any high form is the Virgil filly, Florio. She is, doubtless, a good one, and should she keep well, will win a large majority of her engagements. The three-year-olds so far have developed no really first-class horse. Panique won the Withers and Belmont, but failed to show any quality in the Tidel Stakes. Young Duke won the Tidal, but was easily defeated by Greystone in the Coney Island Derby. Rataplan won the Emporium, so that our prediction that the stakes would be well distributed has been verified. The events yet to be run will be no sure things for any of the colts which have yet shown. Knight of Ellerslie won four stakes in succession, but has gone back on his form, whether from lack of merit or condition we are not prepared to say. We believe St. Saviour is not yet in true form, and will show himself to be a much better horse later on; he has not the best of action, and neither has his own brother, Eole, but both are good horses. Duchess is unquestionably the best filly yet out. She won her races in hollow style, and evidenced great speed at the finish of her races. Lonisette, the crack filly last year, must be amies, or she has gone back on the promise of her two-year-old form. Mittie B. has quality, but she has yet to meet

Duchess and the California wonder, Fallen Leaf, which she will do at Saratoga. When they do meet, unless we are deceived, there will be a fast, good race, and may the best horse win. The four-year olds have been so heavily handicapped that one (Barnes) was stopped. He ran a good race for a part of the journey at Sheephead, but fired badly at the finish. George Kinney also failed to show first-class form with weight, although his mile race in 1:41 is the best one of the year. Miss Woodford seems to be all right, and has won her races so far in hollow style, but she has not yet carried any heavy impost, her races so far being with weight for age. It is clear that the events to come are involved in much uncertainty, and we shall for the balance of the season expect to see the prominent fixed events well divided up.—*Turf, Field and Farm.*

## What St. Simon Looks Like.

The race for the Gold Cup, at Ascot, was the leading article in Thursday's programme, and this was correctly judged as a foregoing conclusion for St. Simon, who has now set the seal to his name as one of the best, if not the very best, three-year-old that the turfmen of the present generation have had under their notice. Indeed, it is quite fair to suppose that Simon is the best all-round horse in the world, and worthy of being termed the Eclipse of the nineteenth century. Whenever Archer asks him to go at a finish he shoots out like a telescope, and wins all his races in a center, so that we never know how much he has in hand. It is, indeed, both instructive and humiliating to breeders of the racehorse for them to know that, with all their line-drawn theories and expensive practice, they are generally a long way from attaining the summit of equine excellence, as proved to be possible in the production of St. Simon. Still, it may be said that the champion three-year-old is something of a chance horse, as two of his own sisters, born in the seasons immediately previous to him, came to nothing on the turf. It is something strange to me that even reputed good judges find fault with the appearance of Simon. "He is a light and leggy horse," said one critic—a master of hounds—to me, after looking him over in the paddock on Thursday. Hunters are just now decidedly "beefy," and if a gentleman carries his eye from one of these up to about 16 stone to St. Simon, trained to gallop all the best thoroughbreds down in a race of two miles and a half, he may be excused for his description of the latter as a "light end leggy horse." The winner of the Ascot Gold Cup has, what is seldom seen in a racehorse, perfect shoulders, which enables him to show such tremendous speed. He has also an extraordinary strong back end loins, and this prevents him from tiring under weight. To stand behind him he is not remarkable for the breadth of his quarters, but he shows great muscular development over his rump, that is, from his hip bones to the root of his tail. The latter is set on rather low, and he carries it in a rather slanting direction, not "cocked" like the plume in the sheko of a light dragoon, nor close between his gaskins in the style of the dorsal appendage of a donkey, with a thistle under it. His thighs are longer than agree with the notions of some critics, but they are broad and muscular, and joined to large, well-shaped, and perfectly clean hocks. His hind shanks are very powerful, and although both were enveloped in stitched cloths during his race for the Cup, they are broad, strong, clean and well formed. His forearms are long and muscular, his knees large and clean all round, while his cannon bones are very strong, the back sinews and suspensory ligament being well defined and perfectly free from blemish—in short what may be termed the *tout ensemble* of St. Simon is of a rather peculiar type, not so taking to the eye of the generality of people as it is noticeable for really all the points essential to a racehorse of the very highest class.—*London Sportsman.*

## FISH.

## The Walton Fishing Club.

The first thing demanding our attention in the fish column, this week, is the monthly trip of the Walton Fishing Club, the last, for the present, at least, under the presidency of Clem Dixon, who, as we have already stated, leaves next month for the land of cakes and thistles. Under these circumstances, of course, it was made a special occasion to do honor to the old veteran chieftain of legitimate sport in California, and in every respect it was a success. Among those who have known him intimately since pioneer days, few men in San Francisco have made more sterling and sincere friends than Clem Dixon, and it speaks well both for him and the members of the Walton Fishing Club, his own club it may be said, that every member and every other man who could be present, made it a duty of being out on Sunday. Of course we received an invitation and a peremptory order to attend, and scared by the threats of Manager John Muller, the prince of ceterers, and Major Klose, the jolliest fellow out of goal, if we did not attend, we allowed our esteem for the president to outweigh our dislike to and suffering on the water, and went with the crowd. Well, we are glad now we did, for a pleasanter day on the water, apart from the merriment of the occasion, it was impossible to enjoy. This time the large roomy Elia, one of the stanchest boats in a stiff breeze on her own coast, was chartered, and by half-past eight in the morning, crammed with living souls, eatables and drinkables, etc., etc., she drew out into the stream. Our first point of destination was Alcatraz Island, where we obtained a permit to fish within regulation limits off the wharf, on condition of not giving intoxicating liquors to anyone on shore. Here the fishing commenced. The usual pool of ten cents a head was made up, and prizes of one dollar, seventy and fifty cents offered for the lucky captors of the first, second and third fish. We considered we had a mortgage on that dollar, but somehow, no sooner had the whole-sonled secretary, Mr. Pitcher, given the word to drop lines, certainly before the sinker could reach the bottom, that fellow Barry, of the Western Union Telegraph, who is always up to his infernal jokes, howled out, "first fish," and snare enough he had one. The fact could not be disputed, but the fish was never seen to flip its tail or wink its eye once after being caught. Of course it was a put up job between Barry and Dixon, who had a dead fish concealed on their persons somewhere and so we were out one dollar and ten cents right there wrongfully, for we never put on a prettier bait to ensnare a fish with if it had ever been allowed to reach the bottom. This conviction of treachery is strengthened by the equally rapid manner in which Al. Haven's and Capt. McIlhinny caught second and third fish, for then not a soul had a bite for one solid hour. Some may think he men named are incapable of such a job. Well, we don't, for we know them, and the significant smile that spread over the month

of the genial John Muller said as plainly as words could do "why, my friend, I know them too." However, we have faithfully chronicled the fact, and the public may form its own opinion. Whatever those opinions may be, we only know, that if ever we go out e-fishing with that crowd again, they won't get away with us so slick and easily as they did on Sunday.

If we don't have a dead fish for them and a two-pound sinker that will just fly like lightning to the bottom, it will be because there are none to be had in the market. We are bound to have that dollar and ten cents back.

As we have said, after the prize-fish were all caught, no one got a bite for an hour and the catch for the day was small. We hear it was the same all over the bay, although the tides were favorable for good sport. But, then, fish bite at all times, just as they please or they don't, and no one can tell why it is so. Under the water man is not boss, and has to take things as he finds them. By this time we had moved from Alcatraz to Angel Island, where we found the fish as obstinate or as wise, whichever you please to call it, and we had nothing to do but to ring six bells, which McIlhinny, Barry, Klose, Havens or some one else took precious good care to ring every ten minutes at most, and then eight bells peeled forth, the joyful summons to lunch, which carried delight to the stomach, for unlike the fish we all wanted to bite now. It is no use wasting time to tell the pleasures and the fun of that lunch; to speak of the feeling farewell speech of the president, or the applause and hurrahs that followed. Those who know John Muller, know what the lunch was; those whose know Clem Dixon, can well imagine what the others were. We, perhaps, were the only sufferer during that joyous hour. Knowing, that like Mrs. Wittertly, we have two much soul for common whisky and beer, friend Muller, had kindly provided some Celery, Beef and Iron for our special use, two bottles, we believe, but Major Klose got one bottle, the McIlhinny, Havens, Barry crowd, and the six-bells men generally got the other, and so by the time lunch was gone our tippie was gone, and we had to descend to the common beverage of soulless men or go without, and that generally is not our style. It is strange people will be so mean, but, though, they did not a great wrong in this case, we forgive them—that is, we forgive them this time, for it will be our own fault if they repeat the trick hereafter. Well, the lunch is over, throats are sore with yelling, and the President, like a brave, old admiral in a sinking ship, insists upon all going before him, as he does not intend moving until the last men is safe on the Elia. Then as he came down to the water alone some wondered what he was trying to do, his back seemed so weak and his leg worked so funny; swaying backward and forward, then zig-zag on one side and zig-zag on the other, now on his toes, now on his heels. Altogether it was funny, but not surprising, for Clem Dixon, President of the W. F. C., is one of the most inveterate jokers living. When all were aboard, the crowd led by Havens, Muller, McIlhinny & Co., found a pious streak in their souls, and as the boat flew over the water, got up a praise service that would have done honor to the Salvation Army or Moody and Sautkey, "Nearer My God to Thee;" "The Golden Shore;" "Sweet By-and-By;" "Glory Hallelujah;" "The Ship That Never Returned," with other emotional lyrics were sung so well, with so much harmony and power, that the vast crowd in the Telegraph Hill conservatory turned out to see what on earth was coming. For twenty years we have been considered one of the sweet singers of Israel in this city, but on that day we were obscured, nay literally extinguished. As we passed along to South San Francisco, to leave Mr. Baile, candidate for the presidency, near home, and whose only chance of success is to buy up the BREEDER AND SPORTSMAN, the crowd saluted such ships as they know the captains of, especially selecting the Rutenbeck and her commander, Captain Stitt. After a delightful sail with breeze enough to make it exciting, the wharf was reached about seven in the evening, and then closed one of the happiest days this jolly club and their friends ever enjoyed.

It would be wrong to close without mentioning the presence of a guest whom all were pleased to honor. This is Mr. Whitfield, one of the city fathers of Worthington, Scotland, a gentleman of ample fortune made by intelligence in business, who is now staying in this city for a short time on his second tour round the world. Mr. Whitfield is just the man for such a party, and is delighted with the charms of California and the hospitality of her people. He is also a clever angler, and according to the eternal fitness of things, caught more fish than any of us on Sunday. We doubt if in his tour round the world he will meet with a day in which he will make more friends, or have more enjoyment than on his trip last Sunday with the Walton Fishing Club of San Francisco. We heartily wish him *bon voyage*.

## BICYCLING.

J. Lord and brother recently made the round trip from Baltimore to Washington for the first time.—Lord Chief Justice Williams, of Melbourne, Australia, rides into the Assize towns upon a bicycle.—At Leicester, May 24th, Lees rode a bicycle 20 miles in the unprecedented time of 1 hour 7 min. 15 sec.—The Springfield tournament promises to be the greatest cycling event of the century.—The Cyclists Touring Club, of England, has over 13,000 members.—For the benefit of wheelmen with slim calves C. E. Dryden recommends a daily exercise of about fifteen minutes of raising and lowering the heels while standing in an erect position.—There are 150 bicycle manufacturers in England.

At the Williamette Park, East Portland, yesterday, there was a five-mile bicycle race for a silver cup, and the amateur championship of Oregon. The principal contestants were Hatch and Newcastle, the former winning by less than a lap in 16 minutes and 45 seconds. At no time in the race was there a difference of a lap between them. On the last lap Newcastle made a terrific spurt, and in attempting to pass on a turn, lost control on his machine and fell.—*Oregonian*, June 23d.

We have written for full particulars regarding this performance, and which, if correct, is the best time ever made by an amateur on the Coast.

At the Philadelphia Bicycle Tourney, held at Junbo Park on June 16, 17, 18, a great many of the events were won in time unprecedented in America. The time made in the events, however, will not go on record till the measurement of the course is authenticated as correct. At the present time it is generally believed to be a little short.

The contest for the bicycle championship, for road and trick riding, was held at Chicago, June 15th, between the and Canary, and resulted as expected, in a victory for the latter.

THE GUN.

The Game Law.

Table with columns for months (January to December) and rows for various game species (Quail, Partridge, Mallard, etc.).

At Bird's Point.

For some reasons which do not present themselves distinctly, there was a lull in our shooting matches this week.

The event of the week in our local circles was the usual open match to all comers at Bird's Point on Sunday, which has come to be a regular thing, and about which we have a few words to say.

The conditions of the match on Sunday were the same as the preceding ones, fifteen birds each, handicap distance, \$0 yards boundary, ground traps, \$10 entrance with \$10 added, and two purses of \$40 and \$30.

Table showing scores for Robins, Kerrigan, Pearson, Walsh, Lambert, and Morgan across various yardage categories.

Table showing scores for Robins, Kerrigan, Walsh, and Morgan under 'FIRST TIES' and 'SECOND TIES' categories.

A sweepstake, \$5 each, at 6 birds, was then shot for Messrs. Robins, Morgan and Pearson killing all their birds.

In the freeze-out matches, and in fact throughout the day, Mr. Robins made another splendid record, killing in the different matches twenty-six birds straight.

We find quite a number of gentlemen, prominent in their devotion to field sports absent this week from their usual haunts.

The Alameda County Club will have their regular monthly shoot for medals to-day, that is, if the festivities of the national holiday allow them to a shoot at all.

At Sacramento.

The Forester Gun Club held its monthly pigeon-shooting contest at Agricultural Park, June 22d. The birds were a fine lot, flying swiftly, and as there was a strong southerly wind prevailing, nearly all were "tailers," and got out of range in short order.

Following is the score of the main match yesterday, John Gerber winning the first medal by a clean score:

Table showing scores for various shooters at Sacramento, including Todd, Zaver, Stevens, Eckhardt, Gerber, Miller, Watson, Gerber, Tibbets, and McKune.

This was followed by a match at 31 yards, both barrels' Watson getting first money, with a clean score, and Zaver and Nesbitt dividing second and third monies, with a score of four each.

Subsequently there were several matches at clay pigeons, shot while it was raining, the following being a good sample, the entrance being \$2.50.

Table showing scores for various shooters at Sacramento in clay pigeon matches, including Tibbets, Watson, Todd, Stevens, McKune, Denny, and Chapman.

Clay Pigeons.

The progress made by the clay pigeon in the estimation of gunmen in general, is shown by the following extract which we clip from an Eastern contemporary.

"R—How is the demand for clay pigeons now? B—Very good, though this is our off season. We have only two weeks' production on hand to-day.

R—Do you anticipate any opposition this season? B—No, sir, we do not. A number of parties have endeavored to infringe upon our patents, but thus far unsuccessfully.

By means of our patent process we are selling clay pigeons cheaper at retail than ordinary potters could manufacture them at wholesale. True, we sank \$20,000 in devising this process, and we have the same amount on hand with which to fight any party who might try to infringe our patents.

English Partridge.

We have recently heard several gentlemen, who have estates suitable for the purpose, express an intention of introducing this grand game bird into California.

"European partridges I turned out last Spring, but the vermin must have killed them, as I could find no traces of them. A friend of mine fifty miles from me has been quite successful raising them. I shall try again this Spring with a direct importation. They can be had abroad for one dollar each.

We hope the country districts will send some more of their dark men at the trap down to us to astonish our cracks. Two weeks ago it was Mr. Graff, of Solano, last week, Mr. Morgan of Butte.

The way they made our fellows open their eyes was the jolliest thing of the day. There are two things in this life very jolly to the man who has the spirit of genuine fun in his nature. One is to see an expert on the mash, one of these miserable wretches who think they have only to smile serenely on a woman to catch her, taken down about two feet and a half, by a saucy, dashing, everlasting widow who understands herself and mankind in general.

The Red Bluff Cause says a squirrel has taken up its quarters in the rear of a store, where it is leading a luxurious life. It eats from one's hand, has made friends with the cats, and repairs to the nut and cracker boxes regularly at lunch time.

This mystical life of ours, Is not just as we take it; It is either a bed of thorns or flowers Just as we choose to make it.

How to Hunt.

The following, about snipe and quail shooting, from a correspondent of the Sportsman, is not very new or original, but it may benefit some one for all that:

"I never hunt snipe with a dog. I use the dog as a retriever. I hunt snipe down wind, because they almost always rise up wind and come to the gun. When they are wild and are hunted up wind to give a dog a chance to scent them, they will rise wild, but when they see you bearing down on them, knowing they must go toward you when they rise, they will lie, and when they do rise they rise toward you and you get your shot.

Here's another of the same kind, only as many accidents occur in not carrying properly when out shooting with others, it may be of more use:

J. D. Dougal writes that all the most expert, and yet at the same time most prudent sportsmen within his experience, carry their guns upon full-cock. Originally trained by his father to carry rigidly on half-cock, he had great unwillingness to do otherwise, but having made it his business to associate with the most skillful shots, so as to gain practical knowledge of all shooting matters, he eventually carried always on full-cock, except while passing over or through a fence.

Several of our friends thought we squealed a little too much about the Marin county mosquitos, which so delightfully interviewed us at the Gun Club picnic. We have since obtained the exact description of a mosquito's instrument of torture, and as they have a peculiar delight for our blood, and select us in preference to all others, reasonable people, we are sure, will not think on reading it that we were too hasty. It is thus:

"An English scientist had an American mosquito under the microscope, and finds it to be a thoroughly equipped surgeon. In its bill there are five instruments—a lance, two meat-saws, a suction pump, and a small steam engine. It appears that when a "skeeter" settles down to his work upon a nice tender portion of the human frame the lance is first pushed into the flesh, then the two saws, placed back to back, begin to work up and down to enlarge the hole, then the pump is inserted, and the victim's blood is siphoned up to the reservoirs carried behind, and finally, to complete the cruelty of the performance, the wretch drops a quantity of poison into the wound to keep it irritated. Then the diminutive fiend takes a fly around just to digest your gore, and makes tracks for a fresh victim, or if the first one has been of unusually good quality he returns to the same happy hunting ground."

All this is bad enough in the ordinary mosquito, but the Marin county animal is extraordinary, both in size and powers of torture. When they get hold of blood unmixed with San Rafael and Petaluma whisky, they set a score of lances, circular saws, and force pumps to work and suck him dry in a jiffy, knowing they will not be poisoned in return. We were neither hasty nor unjust.

Quail on toast is conceded by all to be a "dish to set before a king," and by no one is the delicacy better relished than by the invalid just recovering from a protracted illness. Bear this in mind when, with ruddy cheeks and bounding pulse, you return from your pleasant trip, laden with the spoils of the chase, and with the timely gift of a brace or two of the beautiful birds make glad the hearts of the suffering ones, and sweeter will be your dreams and keener your enjoyment when again you take a turn among the quail.—Forest and Stream.

The above is well said, and ought to have a good effect. As we are likely to have a good quail season this year we desire to have it read and remembered. By the true sportsman it will be appreciated, but we have no hope of its influencing those who claim at all times to be a law unto themselves, for their souls are insensible to legal rights or human amenities. It is to be deplored we have so many of the latter class among us.

A Philadelphia paper tells a tale of rascality that may be useful to gentlemen owning fine guns. The practice might reach this innocent city of ours, so it is just as well to be on our guard:

"Some very cute thieves have been operating in our city among the owners of fine guns, and for a time their trick was carried on quite successfully. Their mode of conducting operations was to call at a residence during the day and represent to the person who responded to their call that they had been sent by the owner to secure the gun for the purpose of repairing it. Twenty or thirty sportsmen were victimized, and among the number some very fine guns were obtained. The fellows at last fell into the hands of the authorities and are now safely put away. A number of the guns were recovered from pawnbrokers' shops, and thus ended the raid of the "gun thieves."

A tale was current during the week, that our worthy Postmaster, General Backus, was treading by a grizzly during a recent pleasure trip to the interior. Grizzlies will do this thing to those foolish enough to invade their haunts, for they are vicious brutes, and no respecters of persons; but as the General is said to have been kept in durance vile for several hours, he declines to know anything about the matter.

Lambert has not yet accepted Robinson's challenge, the terms of which we gave last week. We do not think he intends to accept or he would have done so at once on the terms offered. Mr. Robinson's shooting on Sunday is not likely to accelerate an acceptance.

### THE RIFLE.

#### At Shell Mound.

The beautiful weather on Sunday and the many interesting matches that will come off in the near future drew together a large attendance at Shell Mound, though those present mainly confined themselves to practice. Among such matches as were held the most important was that between four members of the "Big Six," as they are familiarly called, of the Nationals, Company C, First Infantry—F. Cumming and L. G. Perkins against T. E. Carson and J. E. Klein. The match was strictly a private affair, to test the superiority of the gentlemen named and for a dinner, which the losers, of course, had to pay for. The distance was 200 yards with ten strings of ten shots each. The score, though not up to the record of the State under the same conditions for the individual, was nevertheless more than creditable as a whole. The aggregate possible for either two men was 1,000 points, and the total score made by the winners was 893, and by the losers 889, leaving a difference of only four points. The percentage of the winners was 89.3, and of the losers 89.1. The average of each individual string, as given below, will bear comparison with the average shooting of the Eastern men under similar conditions. In this case the record is above suspicion, no doubt being cast upon any score claimed being made. This is just as it ought to be among gentlemen, and so far as we are concerned just as it shall be. The score:

	Cummings.	Perkins.	Carson.	Klein.
String 1.....	44	44	45	43
String 2.....	44	47	45	44
String 3.....	46	45	46	43
String 4.....	46	42	42	43
String 5.....	44	45	44	44
String 6.....	45	44	45	45
String 7.....	43	43	44	42
String 8.....	46	46	47	46
String 9.....	47	45	46	47
String 10.....	44	43	42	46
Totals.....	449	444	446	443

The members of the Fifth Infantry Battalion were also out in force, practicing with laudable spirit for the important matches they have in view, and contending also with spirit for positions held by their comrades under the new order of things inaugurated by Col. Ranlett. Under this system some unexpected changes took place, showing, too, that the system adopted for keeping up the reputation of the corps is a most excellent one. For instance, on Sunday the following changes occurred: Pierce, No. 1, beat Kellogg, No. 8, with a total of 126 out of a 150 possible, to 123 points. MacDonald, No. 2, held his own against Nick Williams, with a total of 124 Williams being absent. Moore, No. 7, had challenged Waltham, No. 4, but was absent, and Waltham kept his place, while Carroll, No. 11, captured Moore's medal with 117 points. Col. Ranlett, No. 14, took Lieutenant Brown's, No. 6, medal with a score of 115 points, the Lieutenant not appearing to defend his property and his honor.

At the practice afterwards, with 15 shots each, and a possible 75 to the man, the following scores were made:

AT 200 YARDS.													
	4	4	6	4	3	5	4	5	5	5	4	5	Total.
Waltham.....	4	4	6	4	3	5	4	5	5	5	4	5	5-65
Kellogg.....	4	4	6	4	4	4	5	4	5	4	4	4	4-64
Carroll.....	4	5	3	5	4	5	4	3	4	4	4	4	3-62
MacDonald.....	4	4	4	4	4	4	4	4	4	4	4	4	4-62
Ranlett.....	4	6	4	4	4	4	4	4	5	4	3	3	5-61
Pierce.....	4	3	4	4	4	4	4	4	4	4	4	4	4-60

AT 500 YARDS.													
	5	4	5	5	4	4	5	4	5	4	4	5	Total.
Pierce.....	5	4	5	5	4	4	5	4	5	4	4	5	2-66
Waltham.....	5	4	5	4	5	3	5	4	5	4	4	3	4-64
MacDonald.....	5	3	4	4	4	5	3	5	3	5	4	3	5-62
Kellogg.....	4	3	4	4	3	3	5	4	6	5	6	6	5-59
Ranlett.....	3	4	4	3	3	5	5	5	3	0	5	3	5-67
Carroll.....	3	2	5	5	4	4	5	3	2	4	3	3	3-55

In this connection we may state, Captain Whetton, of San Jose, has been kind enough to promise to furnish the scores made by his company, and we hope Captain Fairbanks, of Petaluma, and Captain Lancaster, of Vallejo, will be equally kind. In order that the records of our State Militia organizations may be properly preserved and given to the world, as the BREEDER AND SPORTSMAN desires to preserve and give them, it will, in fact, be found to be of interest of all to give us the scores now asked for. It is only by mutual aid that a proper State record can be published weekly, and as we shall at all times be found ready to do our duty, we trust those who can aid us will do so.

#### At Harbor View.

The Swiss Rifle Club, on Sunday, met at this range for their monthly prize match and club dinner. It is unnecessary to say, we believe, that both passed off with the usual spirit and hilarity of the club. The score:

BEST CENTRES.	
200 YARDS OFF-HAND.	
Jno. Lemmann.....	9 E. Zahn.....6
M. Stuber.....	8 A. Free.....6
J. Huguenin.....	6 T. Wetzel.....6
J. Croce.....	7

Huguenin.....	94 Free.....80
Croce.....	92 Wetzel.....78
Lemmann.....	85 Zahn.....76
Stuber.....	83

The best score at same distance, 10 shots each with a possible 120.

At Schuetzen Park, Alameda, the attendance was very light on Sunday, and there was nothing worthy of report. The shooting done was confined principally to the Eintracht Rifles practicing with military rifles for their second match with the German Fusiliers.

#### Matches to Come.

S. I. Kellogg, Adjutant of Fifth Infantry Battalion, is out with the following order in reference to another match for the elegant Silver Trophy, which has so long been in contention among the corps, and lately won for the third and last time by the Field and Staff. It is the latter who now put it up again. The order giving the conditions runs thus:

"The Battalion Trophy, won recently, after a long series of matches, by the Field and Staff, is hereby again placed in competition, to be shot for between the companies only of this command, upon the following terms:

It shall be won twice by any company to become its property. Each team to shoot on its own company range, and to consist of four men each, together with members of the Field and Staff, selected to shoot for said companies, in a manner to be determined at these headquarters between the captains of companies entering for competition. Competitors in each match to shoot 15 shots each at 200 and 500 yards, without sighting shots. Practice before the match not prohibited; but when the match is commenced it must be finished without intermission. All scores to be certified on honor within twenty-four hours after they are made to these headquarters, where dates of the matches will be fixed and announced, as well as all minor details.

Company commanders intending to enter teams will immediately communicate the fact, and state the method in which they desire the Field and Staff to be distributed among the companies."

For this match there will be three teams certainly, and most probably Company D, of Vallejo, under its new and spirited commander will also send a team. It is hoped so.

The most interesting match on hand, fixed for Sunday, 13th instant, is the match by teams of the same corps to reduce the State record of 100 shots at 200 yards. In reference to this match Lieutenant Kellogg's official order says:

"A match between teams of four men each, from the Staff and from the Companies of this command (each competitor firing 100 shots at 200 yards), will take place on July 13th, next. Staff and Co. A teams will shoot at Shell Mound Park, commencing at 11 A. M. Teams entered from Companies B, C, and D, will shoot on their own ranges at as nearly the same hour as practicable, and all scores will be certified on honor by a commissioned officer of the command to these headquarters within 24 hours after the conclusion of the match.

457 points out of a possible 500 being the highest score heretofore known to have been made, a champion medal will be awarded to the competitor making the highest score in this match, provided the same is 455 or more points. The winner must be prepared to defend such champion medal on 30 days notice from any military marksman of the Pacific Coast, who, in like manner, will be subject to a challenge for the same."

In connection with this match we may remark that Kuhnle, Kellogg, Williams, and Hovey will be selected for the Field and Staff team. Their records respectively are:

Kuhnle.....	457 Williams.....	447
Kellogg.....	453 Hovey.....	444

Making a total of 1800 out of a possible 2,000. Under favorable conditions, we have, no doubt, these distinguished sharpshooters will increase their record. Most certainly they will make every effort to do so. On Sunday last, it is interesting to note that under the same conditions. Cumming, Perkins, Carson, and Klein made 1,782 out of a possible 2,000 or in other words, 18 points less than Kuhnle, Kellogg, Williams, and Hovey. As a team, therefore, they hold first place in our State riflemen. Again, we find that on Sunday Cumming and Carson made 895 out of a possible 1,000, while Kellogg and Hovey, to say nothing of Kuhnle, had previously made 896 or one point more, so that individually as well as collectively the team selected to shoot on the 13th to reduce the record, a very tough job, is the best by performance that could be selected. This is no slight honor to the Fifth Infantry battalion, and the figures we have given show that much credit is due to Col. Ranlett for his persistent efforts to place his command in the front rank of our military riflemen. We shall always be glad, indeed, to say as much for other commanders when they merit the praise, for it is the shooting soldier that is to be depended upon in time of need. It is one thing to be brilliant on parade; it is another thing to be effective in battle.

The German Fusiliers were also out in numbers practicing with their Mauser rifles, with improved sights. By the new order of sights, this fine company of men, under the leadership of Captain Stettin, an able and enthusiastic officer and thorough gentleman, have lately done some excellent shooting which promises great results in a short time. This departure on the part of the Fusiliers, whoever may have originated it, is of more public importance than generally supposed. The Mauser rifle is the regulation firearm of Germany, and as a military rifle for general use is held to be superior to the American regulation rifle in just so much as it is less liable to get out of order with rapid, long continued firing. For delicate and accurate shooting, however, it is inferior to the American rifle, and it is to remove this deficiency that new sights have been tried. The result may prove of great national utility, and for that reason we give Captain Stettin and his company all the credit they deserve. The result so far gives hopes, with a little more experience, of equalling the best American rifles at the target.

The columns of this paper, under no circumstances, can ever become the mouthpiece of any one man or organization to the prejudice of others, but at the same time we shall always be glad to recognize enterprise and support merit. In this spirit this week we mention the adoption of the new system of match shooting established lately in England and the Atlantic States among ourselves. This is doing away with the two preliminary "sight-shots" to test the atmosphere, range, and wind, which it is now held no rifleman, entitled to the name, ought to be allowed. No doubt this will be seriously felt at first, but by practicing regularly and keeping a proper record of all points essential to good shooting, there is no doubt the change may be adopted with advantage. As in many other cases to excite the ambition and keep up the practice of his corps, Col. Ranlett is the first to adopt the new system in our State, and has accordingly arranged a match of this sort between teams in his command at 200, 500, and 600 yards, with seven shots to the man. This match will come off right away and we shall watch the result with interest.

### CRICKET.

#### The Trophy Game.—The Occidents Victorious.—A Hard Fight.

The second match for the Harrison Trophy was decided at the Olympic Grounds, Oakland, last Saturday afternoon, before the largest audience of the season. The Occident captain, with his usual luck, won the toss, and, of course, elected to handle the willow. J. Knox and Ben Clarke were the first to represent the Occident Cricket Club, while Banner and Miller were entrusted with the trundling. Knox was

badly run out on the second ball through the fault of his *ris-a-vis*, and Purdy, the new comer, was cleaved bowled in Miller's first once. Waterman now partnered Clark, and just began to look dangerous when he was splendidly dismissed by a one-handed catch by Jules Mathieu. Bristowe made three before Miller lowered his wickets. Sanderson helped the score along to the tune of five before he was caught in slips by Miller. Carr played unusually vigorous for 7, the second top score of his side. Francis sent a high one into the willing hands of De Golia, and Cookson came in to see Ben Clarke bowled by Banner. Clarke's innings of 22 was the salvation of his team, and the value of the contribution can be gathered from the fact that notwithstanding the many good batsmen on his side none other reached double figures. The innings were characterized by patience and sound defense. Campbell joined Cookson, but after breaking his egg sent an easy catch to Ben Benjamin. Richardson carried out his bat for one, as he was not long at the creases, when his partner was bowled by Banner, and the innings closed for the total of 58, which included ten extras owing to the non-appearance of the Merions long stop. After the usual rest the Merions defended the *sticks*, J. Mathien and Miller opening the innings to the bowling of Waterman and Cookson. Miller was soon *hors de combat*, and F. Mathieu, the next man, was soon in a like predicament, Waterman claiming both wickets. With three to his credit Mathieu fell a victim to one of Cookson's insidious deliveries, and a little later Cookson got one by the defense of Theobald, but not before the Merion wicket keeper conclusively demonstrated that he was a runner of no ordinary ability. Ben Benjamin was cleaved bowled by Cookson for nothing, while Barney Benjamin hit well for 5 before he was caught at cover point by Campbell—a magnificent catch. Hill, Creighton and Banner fell before the onslaught of the left-handed bowler. De Golia and Goewey, the last men, made the best stand of the day, and ran the score from 21 to 48 before Clarke lowered De Golia's wicket. Both batsmen deserve a considerable amount of credit for the manner in which they played an uphill game. Goewey played with a great amount of confidence and stopped many a ball that would have proved fatal to more experienced players. De Golia has only played cricket for a month, and when this is taken in consideration, his score of 15 against the undeniably good bowling of the Occidents is simply astounding. De Golia hit both Clarke and Cookson clean out of the grounds well on the way to Brooklyn. The Merions held on to every chance, and the catches made by Mathieu, Miller and De Golia were excellent; their fielding, however, was not as good as usual. The Occidents played up well in the field, and the catch made by Campbell was one of the best ever seen on the ground. Banner did not bowl as effectually as usual. Miller, a late addition to the Merions, proved himself a valuable acquisition to the bowling department of the M. C. C. The victory of the Occidents must certainly be ascribed to the batting of Clarke, and the irresistible bowling of Cookson. It was generally conceded that the Occident team of last Saturday was the best that ever represented the pioneer club. The Merions will have to strengthen their batting department if they desire to wrest a victory from the O. C. C. The score:

OCCIDENTS.	
Ben Clarke, b Banner.....	22
J. Knox, run out.....	0
J. S. Purdy, b Miller.....	1

The Staten Island cricketers defeated the Baltimoreans by an innings and 51 runs.—Cambridge University has just beaten a very strong team of the Gentlemen of England.—On Wednesday, June 18th, at Hoboken, N. J., the St. Georges defeated Columbia College by an inning and 102 runs. A. M. Cox and J. S. Cox, Jr., formerly of San Francisco, played with Columbia College.—H. Dawson, the Captain of the Swiftsure Team of cricketers, passed through the city in the early part of the week en route to England to join another ship.—The largest gathering of spectators that ever assembled on the college park grounds were present to witness the match of the Philadelphians against the Dublin University.—Of the American team, Scott's style of balling impressed the Irish critics most.—The Philadelphian cricketers were present at the Ascot races.

#### Cheshire vs. Philadelphia.

This match was played at Stockport, June 21st. The Philadelphians compiled the magnificent total of 520, Scott, 64; Thayer, 63; Newhall, 26; Brewster, 38; Stoever, 106; Newhall, 55; Fox (not out), 12; being the principal contributors. The Cheshire contingent made 83 and 145, consequently the Philadelphians won in an innings and 292 runs. A glorious victory.

#### Australians vs. Yorkshire.

The Yorkshire Team were out for 55 runs and the Australians for 60. The Yorkshire men did little better in the second innings, being all disposed of for 72 runs. The Australians lost 6 wickets before they compiled the runs necessary for a victory.

On June 7th, the Australians made 174, while the Lancashire Team responded with 195. The Australians made 315, with the loss of 8 wickets in their second attempt. Match drawn.

London, June 20th.—The cricket match between the North of England Team and the Australiana resulted in a victory for the former team, by an innings and 22 runs.

The Honolulu Cricket Club were announced to be in collusion with H. M. S. Swiftsure, on June 14th.

# THE Breeder and Sportsman.

PUBLISHED WEEKLY BY THE  
BREEDER AND SPORTSMAN PUBLISHING CO.

THE TURF AND SPORTING AUTHORITY OF THE  
PACIFIC COAST.

OFFICE, 508 MONTAGMERY STREET  
P. O. Box 2603

Five dollars a year; three dollars for six months; one dollar and a half for three months. Strictly in advance.

MAKE ALL CHECKS, MONEY ORDERS, ETC., PAYABLE TO ORDER OF BREEDER AND SPORTSMAN PUBLISHING CO.

Money should be sent by postal order, draft or by registered letter, addressed to the "Breeder and Sportsman Publishing Company, San Francisco, Cal."

Communications must be accompanied by the writer's name and address, not necessarily for publication, but as a private guarantee of good faith

JOSEPH CAIRN SIMPSON, - - - EDITOR

## NEW YORK AGENCY.

Mr. C. C. Pettus at the office of the "Sportsman," 46 Murray Street, is duly authorized special representative of the BREEDER AND SPORTSMAN in New York to receive subscriptions and arrange advertising contracts.

## SACRAMENTO AGENCY.

Residents of Sacramento and vicinity, desiring to subscribe or advertise in the BREEDER AND SPORTSMAN, can do so through our agent, Mr. M. J. Henley, Russ House, 1,009 J street.

## ADVERTISING RATES.

Displayed, \$1 50 per inch each insertion or pro rata for less space. Reading Notices set in heavier type and having no foot marks, 30 cents per line each insertion. Lines will average ten words. A discount of 10 per cent will be allowed on 3 months, 20 per cent on 6 months and 30 per cent on 12 months contracts. No extra rate charged for cuts or cutting of columns rules. No reading notice taken for less than 60 cents each insertion.

San Francisco, - - - Saturday, July 5, 1884.

## Dates Claimed.

Bay District, San Francisco (Fall Meeting), August 2d, 5th, 7th, and 9th.

Santa Cruz Fair Association, Santa Cruz, August 12th to 16th.

Sonoma County Agricultural Association, Santa Rosa, August 18th to 23d.

Sonoma and Marin District Association, Petaluma, August 25th to 30th.

Thirteenth District, Marysville, Aug. 26th to 30th.

Golden Gate Fair, Oakland, August 1st to 6th.

Chico Fair Association, Chico, Sept. 1st to 6th.

State Fair, Sacramento, Sept. 11th to 20th.

Ninth District Fair Association, Rohnerville, Sept. 23d to 26th.

San Joaquin District Fair, Stockton, September 22d to 27th.

Santa Clara District Fair, San Jose, September 29th to October 4th.

Monterey Agricultural Association, Salinas, Oct. 7th to 11th.

Fresno Fair Association, Fresno, October 7th to 11th.

Los Angeles Fair Association, Los Angeles, October 13th to 18th.

## No. 1—Vol. V.

Again we start in another heat and come to the score with a good deal of confidence, our readers having generally conceded that we have kept the promise of the initial number. The aim has been to do all in our power to elevate outdoor sports, to aid in putting them on a plane that would secure the support of those whose support is worthy of laboring for, and to eliminate objectionable features wherever they were found. Not that these recreations are so utterly bad as many people think, as after many years' active participation and in a position to see and become fully cognizant of everything pertaining to the sports of the turf, we write with confidence that at the present time there is a great deal of good to a trifle of evil. The organization of the Pacific Coast Blood-Horse Association was a potent factor in relieving the California turf of incumbrances that had brought racing in disrepute, and now the swindles that prevailed in former days are practically unknown. Trotting as it now stands gives little chance for unfavorable comments. This is partially due to the more stringent enforcement of the rules and the punishment for violation of the laws being more effective through the agency of the National Trotting Association, but the major cause is the resolve of those who are engaged in the business to go straight, convinced that honesty is the best policy.

In correcting those who are not guided by the good old rule, we are entirely influenced by the desire to relieve the sports of the odium which crooked actions bring. There is far more pleasure to us to praise than blame, and when necessary to condemn it is with sorrow. That hereafter there will be still less necessity for castigation is so evident that we anticipate little trouble in that direction, while there will be great doings to chronicle. Therefore in that department of the *Breeder and Sportsman*, there are good causes to anticipate plain sailing with few headwinds or contrary currents to encounter. Our aim is to present a paper that will be instructive, and while giving the sunny spots of life due prominence, every effort will be continued to make this journal profitable to the farmer, breeder and owner of domestic animals. There is wonderful progression in breeding, rearing and training horses, and to keep up with advanced ideas will be the constant desire. With an exchange list that includes nearly all the prominent journals which pay particular attention to the topics that are treated in the *Breeder and Sportsman*, we have the benefit of the

teachings of hundreds of men of great capacity in all of the departments, and among our correspondents are those which will rank with the best of any country. For thirty years we have studied assiduously to acquire knowledge about horses, their breeding, rearing and training. The study has been accompanied by practice, and theories that appeared plausible have been tested as thoroughly as came within our power, before indorsement. The practical application has been of vast service in determining the value, and the results corroborated theories in some cases, in others, proved that the most plausible in appearance were wrong when put in operation. There is a fascination in breeding that is mainly due to uncertainty. Could animals be produced with the exactness of mechanical construction the charm would be destroyed. There is the "pleasure of hope" to keep up the excitement, the gratification resulting from success stimulates to renewed exertion. Failures are valuable lessons, and to persons who have a real fondness for the pursuit, defeat is a token of future victories. While there is almost an unlimited range in breeding, and from the productions of song birds up, attractions that never pall, the various duties to which the horse is reared for, give a wide interest and offer a series of rewards. To breed those that are to figure on the turf and track and the road there is the chance to demonstrate how successful the venture has been. It is not sufficient that the form be of the most approved model, the pedigree beyond question, and the beauty faultless; the former to lead in hotly contested fields is the supreme test and failing in this the efforts of years are naught. In all pertaining to this branch nothing will be spared to obtain information and impart what is worthy of consideration to our readers. The experiments in relation to shoeing and the proper care of the feet of horses are still continued. In our opinion the experimental stage has been passed so far as to convince us that the prevailing treatment of the feet is wrong, and from which faulty treatment a large proportion of ailments are due.

For more than eight years we have followed the system advocated, with occasional changes to determine the value of so radical a departure from received opinions, and every month adds to the conviction that the method is correct. When the articles are resumed there will be further data to present, and we confidently anticipate presenting such an array of facts as will go a long way towards removing the absurd dogmas that depend on the malpractice of centuries to sustain them. When the departure was made notwithstanding that the theory seemed founded on a logical ground, it was not anticipated that it would be received with the attention awarded.

So radical a change as the removal of incumbrances from horses' feet, and only protecting the portion that needed protection was sufficient to awaken the antagonism of those who imagined their business was threatened, and this corp was strengthened by the addition of objectors, the objections being unsupported otherwise than by iterations of denial of any merit in the plan.

While the horse is given the prominence that is due, all things pertaining to breeding will be allotted a full share of space. In fact every department of the paper will be strengthened, and as intimated last week, the chances are favorable for an enlargement in a short time, and this will afford the opportunity for extension in all directions.

The field is large, and to cover the ground a great deal of work has to be done, a big expense entailed. Rather than make promises of what will be done in the future, we refer to the past four volumes, agreeing however, that as additional support is obtained there will be corresponding outlay to make the *Breeder and Sportsman* still more satisfactory to our readers.

## Purchase of the Oakland Trotting Park.

There has not been the progress made in securing subscriptions to the stock for the purchase of the Oakland Trotting Park that was anticipated. There have been several drawbacks, among them the absence of men who are likely to subscribe liberally, and whose example will induce others to favor the project. Although the bond which Mr. Wiard executed expired on the 1st inst., in response to urgent solicitation, he has extended the time until the 1st of August, provided there is a reasonable show of getting the required number of subscribers. In order to determine whether this can be accomplished or not, a meeting is called at the office of the Home Insurance Co., 924 Broadway, Oakland, next Monday, at 8 P. M. Should that afford grounds for the belief that the stock will be taken, Mr. Wiard will grant the extension; if not, immediate steps will be taken to throw the property into market, either in lots or subdivisions. There is a singular feature in connection with this business. Were the property entirely here, not a fence, post or

building upon it, the price it is offered at would induce investment. A real estate association with such a scheme in view, an assured chance whereby there could not be a risk of loss, and a probable appreciation of two hundred per cent. advance in ten years, would have no difficulty in marketing the stock. There could not be a return in such a case. Taxes and interest on the money would figure, and until the property came into the market there would be liabilities. The name of *racetrack* is the bugbear. Property of that kind is held to be unproductive, and very many associate the idea with land restricted to a brown oval a few rods in width, and stabling and sheds. The advantages of these etceteras are overlooked. There is what represents an outlay of at least \$30,000 in addition to the land, and this is the productive portion. Twenty thousand dollars added to the expense already incurred, and there is a property which will rent for interest and taxes at once, and with a prospect of an increase for further improvements. There is no hazard in making the statement that every share of stock will double in value in five years, and at the expiration of ten years will be worth four times as much as the cost.

From the view-point of a safe and profitable investment it is sound; from the advantages that will follow to the stock-breeding interests of the coast, it is manifestly to the interest of every one engaged in the pursuit to lend a hand in carrying it through. Every person in San Francisco who has a fondness for the sports of the turf and track, has a direct connection with the matter. Every hotel proprietor in the metropolis is more or less interested. Quite a large proportion of those who attend the fairs and races stop in San Francisco, and when the fairs and meetings are on a scale that is sure to follow the contemplated improvements, the attendance of people outside of San Francisco and Oakland will be numbered by thousands.

While San Francisco has an interest in whatever will bring people in the vicinity, the benefits to Oakland will be more direct. A pleasure ground such as will follow the consummation of the project, will be one of the greatest attractions to induce permanent residency. There is a growing desire on the part of wealthy men to own good road horses. No matter how good the roads are, without a track to test their abilities with the watch, the pleasure of owning harness flyers is curtailed to small proportions.

This class of people when looking for a home will take this into consideration, and it is not a fanciful estimate which places a high valuation on that which influences the desire to gratify the propensity. With such a fair ground as will follow the Oakland Park becoming the property of an association that will make the contemplated improvements, it will not be long until the annual exhibition will be the great fair of the coast. With grounds, buildings, etc., in accordance with the plan marked out, there will be a corresponding effort on the part of the managers, and a grand exposition rivaling those of St. Louis and Chicago be the result. There is population enough within a circuit of sixty miles to justify a premium list that estimates an average attendance of twenty thousand spectators each day, and with suitable adjuncts it will be done. But apart from what is sure to follow should this project be carried through, there is the reliable basis of real estate to build upon. We trust that the meeting on Monday will be well attended.

## Bay District Association—Fall Trotting Meeting.

The programme for the Trotting Meeting of the Bay District Association appears in the advertising column, and from which the classes and conditions can be obtained. As this is the initiatory meeting of the circuit, and commencing after the others close, there is a certainty of large numbers making engagements in all the classes.

It is nearly certain that horses which take part in the first meetings will be in better order than those which delay, as it is generally conceded that there is nothing like actual and fierce contests to put on the finishing touches of the grand preparation. Then there is another advantage in commencing at home, so that the prophesy of large fields and exciting races is based on good ground.

In the advertising department will be found the card of Mr. M. J. O'Leary, of San Buena Ventura, maker of racing plates and training shoes. Samples of his work on plates may be seen at this office, and they show Mr. O'Leary to be master of the art. We never saw finer plates from any maker's hands.

The annual fair of the Monterey Agricultural Association will be held at Salinas City, commencing on Oct. 7th and ending on the 11th.

## Fancy Farming.

Elsewhere will be found an editorial from the S. F. *Evening Bulletin*, in regard to the good that has followed the efforts of amateur farmers. Those who remember the state of rural affairs half a century back will readily appreciate the great improvements which have been wrought, and which are largely due to those who engaged in it for pleasure, and welcome recreation from pursuits that had engrossed their attention. To this class and the inventors of labor saving machinery the farmers of the present are indebted for a large proportion of the benefits they now enjoy, and still more to the press that has given the result of experiments, and made knowledge general that was confined to districts. We can remember when "book farming" was a term of reproach, and in the region in which we spent our boyhood the books in most of the farm houses were confined to the Bible, an almanac and a few elementary school-books. To these might be added, in some families, *Pilgrim's Progress* and *Fox's Book of Martyrs*, though anything in the shape of "light reading" was held to be worse than frivolous, and sure to lead astray those who wasted their time in perusing even standard works of poetry and romance.

It was a rough country in which the hardy pioneer had a constant and arduous battle to hew out farms. The soil was poor after it was cleared of the forest, and the struggle to obtain a livelihood entailed hard work for every day in the year. Paradoxical as it may appear to make the statement, they were an intelligent race when intelligence is measured by natural ability, if in a measure illiterate, and when succeeding generations took the place of the old folks the value of the blood was shown. Once in a while a book farmer would introduce innovations. It might be a merchant from the larger towns who desired a rural home; it might be a lawyer, doctor or storekeeper in the county seat, who had acquired a surplus that he could use to gratify his fancy in trying his hand at farming. Many of them never realized anything from large investments in a pecuniary sense; as educators they were worth untold sums to the country. Scrub stock surrendered to improved breeds introduced by them. The sickle gave way to the cradle when the stumps had rotted away so as to permit the blade being swung, and then came the mowing machine and the reaper. In these boyhood days the measured beat of the flail came clear and distinct through the frosty air of Northern winters from every barn, to be replaced by the hum of the threshing, and the huge scoop-shaped winnowing fan was driven out by the fanning mill. There was fully as great a change in house affairs. The woodpile was moved to the rear of the house, and the unsightly logs split and neatly "corded" under shelter, and in place of the chip yard in front, shrubbery and flowers. Musical instruments, hooks, periodicals, newspapers, pictures in pleasant rooms, and though grandfather's old flint-lock rifle still hung in the sapling fork nailed against the wall, the red deer and the wolf, the bear and the panther live only in tradition.

The transformation was largely due to the example of the fancy farmer. The ornamental grounds, which were thought so anomalous at first, gained a place in the affections, and after a time the efforts of the "wimmin folk" were rewarded by a grass plat, bordered by holly-hocks, with rosebushes and lilacs, sweetbriars and it might be honeysuckles and woodhines trailing over a homemade trellis. The beautifyings came after the useful had gained disciples. The Shorthorn, the Devon, and the Ayrshire were found to be a vast improvement on the natives, and Berkshires smoothed away the angles of the swine, and gave early maturity and predisposition to take on flesh in place of running to legs and snout. On every farm in those days were small flocks of sheep. Two or three pounds of wool was a fair clip from each, and sixty pounds above the ordinary for a carcass of mutton. Leceisters and Cotswolds gave size, though the wool was coarse and long, but then the Southdown remedied that, while the flavor of the mutton was so much improved that the old prejudices were done away. It would take a volume to recount a portion of the advantages that have followed fancy farming, and to give the young agriculturists of the present an idea of the wonderful changes since Jackson was President. A complete revolution in nearly every branch, and from book-farmers being an exception, it is rare nowadays to find a successful tiller of the soil, who does not bring brains as well as muscle into the service.

## The Auction Sales of Stock.

The time is drawing near for the auction sales advertised in this paper; Rancho del Rio, at Sacramento, on the 17th inst., at which time and place will also be offered Major Beck's Jerseys; on the 19th the Newland and Pumyea sale at the Oakland Trotting Park, and on the 24th of July the sale of S. J. Tennent, at Pinole Station.

## The Running at Chicago.

On another page of this issue will be found the details of the races at the Chicago Driving Park in which California horses were engaged, the record including the first four days. Rain made racing impossible on the fifth day and mail advices are therefore not at hand for the concluding days. The meagre accounts of the telegraph, giving only the placed horses, do not tell the whole story, and leave us in the dark as to whether or not we were represented in many of the events. On Thursday Lucky B. fought a gallant fight for the Garden City Cup over a muddy track, being beaten a length by April Fool. Time—4:12. It is described as a punishing run, and in such a race the time shows the track to have been in better shape for a postponement than a race.

Saturday was the first day of the Washington Park Club. In the Lakeside Stakes there were no Pacific Coast starters. Mr. Baldwin had two nominations, but the fillies were not taken East with the stable. Mr. Winters also had two nominations in the stake, but they were canceled early in the year. The American Derby was run on that day and the feeling of disappointment was general among Western horsemen that no California colt faced the starter. Mr. Baldwin had three nominations, Mr. Haggin four, Palo Alto four, and Mr. Winters one, but not one of these twelve chances weighed in for the race. Palo Alto had scratched. The Santa Anita Stable was not in a position to make a start. Marie Stuart and Savanna had not shown a form equal to some other colts that figured in the Mississippi Valley meetings, mainly because they had had no early Spring work on account of the rains and floods that made 1884 a year long to be remembered in Los Angeles county. Fallen Leaf, whose performances have shown her to be the jewel of the stable this year, was heavily penalized for previous winning, and as the track was new and heavy she could hardly have beaten the winner, Ed. Corrigan's Modesty, in at lighter weights. On a better track Mollie McCarty's daughter would undoubtedly have been in the company. Mr. Haggins' stable has also been under the cloud. Of his four nominations in the Derby Hironelle did not go East at all, Winnebucca was amiss, Marc Daly went lame and was sent home, and Sweetbriar, though not declared out had not shown winning form and stood little show for a place. She was not among the starters. Mr. Winters' colt, Prince of No folk, was scratched as he did not leave home. The stake amounted to a trifle over \$11,000, the largest Western plum of the year, and we should have felt in a pleasurable frame of mind for the national anniversary if Holloway or Patsy Duffy had placed those greenbacks to the credit of California.

On Monday the Driving Park closed their meeting, the only Pacific Coaster in at the death being Premium. The old mare won a half-mile dash in 48½, the first performance since she went East that shows anything near her home form. She has been beaten several times three-quarters of a mile in 1:15 and 1:15½, figures that cannot throw her in the rear when she is anywhere near fit. Possibly the climate of Chicago agrees with her better. If she recovers her spirit and speed, there is likely to be some fast short races before the season closes.

Wednesday was the second day of the Washington Park Club's meeting, and one of Mr. Baldwin's secured place in the Kenwood Stakes for two-year-old colts, five furlongs. Verano finished second, the race being won by Corrigan's Isaac Murphy. The winner was known earlier in the season by the name of Harry White, and is the colt Corrigan was so anxious to match against Mr. Haggin's Tyrant.

The telegraph is silent as to any racing on Thursday, and we infer that rain has again necessitated postponement. Mr. Baldwin has reason to feel satisfied with the brackets won by his colts so far, and at the Fall meetings further East, with settled tracks and full condition we expect to see them add to the record.

## Santa Cruz Fair.

On August 9th, the Bay District comes to an end, and on the 12th Santa Cruz opens. Thus there are two clear days to make and recover from the trip, which is ample for the short distance intervening. In the paper of next week we will describe fully the meetings and fairs which are to be held in August, and in the following numbers those of later date. In the mean time, the advertisements will give the particulars so that owners can be cogitating over the matter. That this is to be a very busy season in the turf and track annals of California is evident, and from the 2d of August until well along in November there will be no cessation in the sport.

The clay covering of the Sacramento track promises to make a perfect course.

## "Fixed Events," 1885-6.

The following are the fixed events of the Pacific Coast Blood-Horse Association that close on the 1st of August next. At the meeting of the Trustees to be held next Monday the rest of the programme for the Fall meeting will be arranged, and the date fixed.

We publish this much now, in order that breeders may be in readiness, as all but the Baldwin Stake are for foals of 1883, the stakes to be run when they are two and three years old.

## Spring meeting, first day:

Winters' Stake—For three-year-olds, to be run the first day of the Spring meeting; dash of one and a half miles; \$100 each, \$25 forfeit, \$300 added; second to have \$150, third to save stake. Nominations in above to be made for 1885.

Same Day—California Stake; for two-year-olds; \$50 each, \$25 forfeit, \$250 added; to be run on the first day of the Spring meeting; second to save stake; dash of half a mile. Nominations in above to be made for 1885.

## Second day:

Pacific Cup—Handicap of \$100 each, \$50 forfeit, \$20 declaration, \$600 added; second to receive \$300, third to save stake; two and a quarter miles; to be run on the second day of the Spring meeting. Will close the first of March, 1885.

## Third day:

"Spirit of the Times" Stake—Dash of one and three-quarters miles for all three-year-olds; \$100 each, \$25 forfeit, \$300 added; \$150 to second, third to save stake. Nominations in above to be made for 1885.

Same Day—Gano Stake; dash of three-quarters of a mile for two-year-olds; \$50 each, \$25 forfeit, \$250 added; second horse to save stake. When any California two-year-old beats the time of Gano, 1:15 for three-quarters of a mile, the stake to be named after the colt which beats it. Nominations to be made for 1885.

## Fall meeting, first day:

Ladies' Stake—For two-year-old fillies; \$50 entrance, \$25 forfeit, \$200 added; three-quarters of a mile; second to save entrance. Nominations to be made for 1885.

Same Day—The Vestal Stake; for three-year-old fillies; one and a quarter miles; \$25, p. p., \$300 added; second to receive \$100, third to save stake. Nominations to be made for 1885.

## Second day:

Stallion Stake—Conditions: Only those three-year-olds are eligible which are the get of stallions owned in this State. The stallions have to subscribe the amount charged for their services to the fund; private stallions at the price of their last season, and those which have not made a public season, to pay \$50, that sum being the minimum price. The owner of the get of a stallion is competent to name. The stake for the colts shall be \$100 each, \$25 forfeit; plate or money added at the discretion of the committee; distance one and three-quarters miles. To close for 1884 on the 1st of August next, at which time both stallions and colts (progeny) must be named.

## Third day:

Fingian Stake—For two-year-olds; dash of a mile; \$50 each, \$25 forfeit, \$250 added; second to save stake. Nominations to be made for 1885.

Same Day—Fame Stake—For three-year-olds; dash of two miles; \$100 each, \$25 forfeit, \$300 added; second to have \$150, third to save stake. Nominations to be made for 1885.

The Association reserves the right to change the day of running stakes.

All of these stakes close on the first day of August next, the colts racing now as yearlings, foals of 1883.

The attempt of Counsel Crawford, in behalf of Mr. Case and Jay-Eye-See, to make a match with W. H. Vanderhilt and Mand S., has resulted in failure. The owner of Maud S. declines to engage in any races, preferring to drive the queen to the road, and roll the best record like a sweet morsel under his tongue, taking no risks of a beating, and consequent loss of glory. That the little black horse is going well there is no manner of doubt, and if a race cannot be got on with Maud S. the only way to lift the laurel from her handsome head is to break her record in an exhibition. This once done, and Mr. Vanderhilt will most likely overcome his scruples and consent to a race, for a queen dethroned is no longer a ruler, and nothing could restore the lost prestige but an emphatic "downing" of the adversary. Then will come the tug of war. An hundred thousand people would crowd to see it, and it would mark an epoch in the annals of driving races. The records of the last four years are so replete with sensations that they have palled upon the popular sense, and nothing less than 2:10 or better will cause a considerable ripple this season. Mr. Case evidently has confidence in his horse and means business. If the railroad magnate would avoid further annoyance by caricaturists and graceless wags he had had show some game-ness in his composition, and defend the claims of his great mare against all comers by the gage of battle.

We send the paper to press this week one day earlier than usual on account of the Fourth. Such a proceeding is common with weekly papers, and we did not announce the intention so to do last week, because we did not think it necessary. Some matters of interest have reached us too late and their non-appearance this week will be explained to the friends concerned by this statement.

Pete Fitzgerald's pacing stallion, Killarney, is showing fast quarters and is reported to be moving at a 2:20 gait very easily. He has been making a season in the stud, but it is expected that he will appear in the circuit this Fall.

The Chico Fair Association has extended the date of closing entries to August 1st, thus making the closing day uniform all round. A proviso has also been inserted in the conditions saving stakes to the second horse in all running races.

The death of Walter Welch left Buchanan alone in the management of Jim Renwick, and Levi Knott to New York to attend to the business.

ATHLETICS.

Seward's Speed.

"Atalanta," in *Afloat and Ashore*, gives the following interesting particulars regarding the wonderful speed of the champion runner, George Seward:—"It may not be generally known that some twenty-five years back Seward and Gale, the wonderful endurance pedestrian, bought a large canvas booth, which they turned into a hippodrome, and traveled the country in partnership as circus proprietors. Seward, being almost as good an equestrian as he was a pedestrian, undertook to do the horsemanship, while Gale used to amuse the company with some feat of walking. During their travels the topic of conversation at the inn where they used to make headquarters frequently turned upon running, and Gale, who always had an eye to the main chance, often made a match for his partner to run the local champions. Seward, who was a man of very retiring disposition, and spent nearly all his spare time in reading, would sometimes decline to run, and even when he did consent it was only by dint of a considerable amount of persuasion, although the business always proved more profitable than that of the circus. Of course, in these off-hand matches Seward ran entirely untrained, and generally had to meet the fastest man in the district. In spite of this Gale has told me that he never lost, and frequently would let his opponent get several yards' start before he would leave his mark, but it would be at his shoulder before running fifty yards, and win as he liked. In one of these affairs Seward met an opponent who was said to be a sound half-second man. The local champion was very unsteady in toeing the mark, and frequently got over before the pistol was fired. At length Seward, to the consternation of Gale, went down on his knees, and told the starter to fire. Away went the local celebrity, but Seward was up like a cat, and ere 60 of the 100 yards they were running had been covered was on level terms, and, shooting out like a flash of lightning in the last 30, was fully four yards. The above are but a few of the many instances of Seward's remarkable speed that Gale related to me, and if space permitted I could enumerate many others equally astonishing. Now, if Seward could (and I have not the slightest doubt he did) perform like this out of condition, there is some reason to believe that when fit he was even capable of having run as fast as he was credited with in the records in *Bell's Life*.

Farewell to a Champion.

On Wednesday last, just previous to the departure of the steamship Anrania with the representative team of American athletes, an interesting scene was enacted on the pier, in which Frank Murray, the champion walker, figured conspicuously.

It was close upon the hour for sailing, and the first hell wailing visitors to leave the vessel had been rung, and Murray had not as yet put in an appearance. Various rumors were flying about, the substance of which were that he had decided at the last moment not to go. Murmurs of dissatisfaction were plentiful, and the two hundred or more Williamsburg boys who were assembled on the dock to give their champion a rousing send off, felt sorely disappointed. Presently a club cry was heard from the entrance to the pier, and all eyes were turned in that direction, only to behold "Cinders" coming down the dock, arm in arm with Frank Price, the Vice-President of the W. A. C. A perfect ovation awaited him, cheers and shouts filled the air, and a crowd of his club-mates rushed towards him with outstretched hands for a farewell shake with the departing champion. No greater evidence of Murray's popularity could be given, as his friends gathered around him and began to whisper words of encouragement and congratulation. "Cinders" became visibly affected, tears came into his eyes, and turning to a friend, he said, with a voice full of emotion: "Well, S., I shall never forget this day. I am glad to know that I have the approval of the 'boys,' and they can depend upon it, that wherever I wear the blue and gold it shall be done with credit to myself and the club which I have the honor to represent." Soon after Murray went on board and the gangways were hoisted on board. The crowd rushed to the end of the dock to catch a parting glimpse of the "old man." As the huge vessel swung slowly into the stream, a preconcerted signal was given by Gil Badeau, and the "Rah, Rah, Rah, W. A. C.—Wac—Rah" was given with a will, and a moment after an answering cry came faintly from the steamer, in Murray's well-known voice, "Weigates, Chestnuts.—N. Y. Sportsman.

At the Caledonian games, held at Dublin, June 2d, J. Purcell cleared 46 ft. 7 1/2 in. in a running hop, step and jump.—Our English exchange consider H. A. Fife the coming sprinter.—The American Lacrosse Team were beaten for the first time, at Belfast, Ireland, by the United Kingdom Team by 5 goals to 3, June 14th. There were 225 entries at the late games of the American A. C., of New York.—C. B. Wheelright won the fifty mile roller-skating championship of England, at the Mosely skating rink, Birmingham, May 31st. Time, 4 hours.—Cummings, the professional champion runner, is to visit Australia at an early date. He offers O'Briou, the Australian champion, 50 yards start in a mile.

An American Record Lowered.

At the Warrensburg Athletic Club Games, held at Glen's Fall, June 14th, T. F. Delaney, of the Williamsburg Athletic Club, ran two miles in 9m. 43 1/2 s., beating the best previous American record—10m. 1 1/2 s., made by W. O. Davies, Sept. 17, 1880.

In a letter dated Atlanta, Ga., June 9, H. M. Johnson says:—"I have given up the athletic business and will hereafter recognize no challenges, but will some time at a New York athletic meeting try and beat 'evens' for 75, 100, 110, 125 and 150 yards; also, will beat the standing-long, standing-high and three standing-jumps records, without weights. I will train especially for the occasion, and will bet 100 to 30 that I succeed."

Messrs. Myers, Waldron, Fredericks, and Murray, the American athletes, who have just arrived in England, were banqueted by the South London Harriers, at Holborn Restaurant, on the night of June 14th. Nearly all the leading members of the English athletic clubs were present, excepting W. G. George.

At the Banker Athletic Association, of Toronto, J. T. Belcher, formerly of this city, won the 220-440 yard race.

The Mile Record Broken.

By cablegram, we learn that the Annual Championship meeting of the English Amateur Athletic Association took place at Birmingham, June 21st, and was attended by over 5,000 spectators. Messrs. Myers and Murray, the New York athletes, were among the audience, which also contained a large number of other Americans. The weather was perfect, the athletes in excellent form, and the various events were won in fine style. George defeated Snook in the mile race, making the distance in 4m. 18 2/5 s., and beating his own best on record of 4m. 19 3/5 s., made June 3, 1882. Meek, of the Westside Athletic Club of New York, made lots of friends by winning the seven-mile championship walk in splendid style in 54m. 27s., and finishing 100 yards ahead of Whyatt, of Nottingham, the former champion.

At the games of the Blackheath Harriers, on May 24th, George won the half-mile in 2 minutes, the mile in 4 min. 32 sec, 4 miles in 21 min. 2 1/2 sec, and a one and a half-mile Steeplechase in 7 min. 23 2/5 sec. This is a rather good afternoon's work for the champion.

YACHTING.

The following has been taken from the *Forest and Stream*, which has always been a strong advocate of deep boats of the cutter type, while the *N. Y. Herald*, from which it quotes, in turn, for a long time opposed that kind of a model, and the article explains itself.

A Candid Admission.—"As the imported cutter Madge is again to make her appearance this season with a fighting crew on board," said a yachting expert yesterday, "it may be well to reflect a moment on what has occurred in the American yachting world since her victories in New York and Eastern waters in 1881. Up to that time few men were so bold as to say that a deep boat could sail with the world renowned skimming dishes, but the manner in which the stranger disposed of her antagonists, though the measurement for time allowance was very favorable to her, caused experts to conclude that, after all, Americans, perhaps, did not know everything about the principles of speed. Since that memorable yachting year a great many changes in type and ballast have taken place among us in the designing and construction of pleasure vessels. Nowadays very few yachtsmen will have a shallow boat, except that local cases compel the selection of the type. On the contrary the majority make it imperative that they shall have good draft of water, and once pronounced advocates of light draft and light weight have made a complete aquatic somersault by building deep boats with heavy weights, so that the fastest vessels of the present day in smooth water are those carrying a great weight of ballast. The feeling of the yachting public in this matter became so strong a number of cutters were built until now 'the real Simon Pure' housing bowsprit 'and a' that' is frequently seen in American waters. And, really, you must allow me to say that the cutter rig is the more beautiful to the eye, while it is the best fitted to fight old Neptune yet devised. Almost all our sloops have taken to the double-headed rig, so that long topmasts, backstays, runners, etc., are so common, critics make no remarks, except at the absence of them. All these things show that Americans have taken advantage of an example set them, and not allowed prejudice to blind them. They have adopted what seemed to be good for our waters, and as experiments are yet being made, time alone will show what will be the final result. Boston yachtsmen have taken to a type evolved from the wide sloop, and the result is a heavy draft sloop—in fact, more draft than that of a cutter of the same length and almost the beam of the sloop. The type carries as much, if not more, weight than the cutter, is as costly to build, and requires an enormous sail area to obtain speed.

Length measurement, however, combined with canvas, restricts this type to very small boats, and though great internal room is obtained, the principle is carried far enough to develop fatal errors. That is to say, large boats cannot be made to carry such sails, and even if they could, the first time they were caught outside with a big sea and no wind spare would be thrashed out of them or gear so worn or strained that owners would hesitate long before repeating the experiment. For these reasons Boston practice cannot be taken as a guide, except for very small boats. In New York the results of the trials with the Madge and other cutters have been to induce builders to timidly add more depth and slightly reduce the beam, and, while the centerboard is retained, the forestay has been put out on the bowsprit in order to obtain a better shape forestaysail. The measurement system adopted by the prominent sloop clubs has no doubt had much to do with this, though the inability of many yachtsmen for want of time to make extended cruises, and the shallowness of the water in numerous harbors are also causes which have their effect. Depend upon it, we are on the eve of a great change. The tendency is to restrict the beam and increase the depth. Once well started in this path, there is no telling where the stopping point will be, as it will soon be found that the ballast on the keel is worth more than the beam. The season of yachting now at hand may dispel much of the doubt surrounding the all important subject, and to this end the results of the many races arranged will be anxiously looked forward to by all thoughtful yachtsmen."—*N. Y. Herald*.

A look at the fleet of yachts that will assemble three times this week on New York Bay will give convincing evidence of the victory of *Forest and Stream* in the long fight for honest boats. The presence of a fine fleet of thoroughbred cutters, while important in itself, is no more so than the changes to be noted in the sloops of to-day compared with the same vessels of a few years ago, but besides such indisputable evidence, we quote the above as an index of the feeling among a large majority of yachtsmen, who have burst the shell of habit, prejudice, ancient dogmas, and so-called patriotism that has so long retarded our yachting, and are willing to examine fairly and intelligently all that is placed before them and to accept or reject on merit only.

The self-satisfaction, over confidence and unwillingness to examine or adopt anything new or unknown has virtually disappeared among the great body of American yachtsmen, while at the same time the sport has advanced proportionately. Such truths are now proven so conclusively by Madge, and were then only accepted unwillingly because they were beyond dispute, are now received readily, weighed carefully and impartially, and adopted or condemned only after a fair hearing.

The work of the last four years has made possible a fair and thorough test of the questions in dispute, many of them have already been decided conclusively, and the contests of this week open a season that promises to end the controversy finally.

A Model Cutter.

EDITOR BREEDER AND SPORTSMAN.—The following particulars of Wm. Dixon Kemp's new yacht, recently built in England, may interest some of your readers. She is a true "plank on edge" style, as you will see:

Length over all.....	60 ft.	Meta centre above centre	0.11 ft.
Length L. W. L.....	38.5 ft.	of buoyancy.....	3.6 ft.
Beam extreme.....	3 ft.	Meta centre above center of	gravity M. G.....
Draft of water.....	11 ft.	Area of wet surface.....	616 sq. ft.
Least freeboard.....	4 ft.	Area of L. W. L.....	105 sq. ft.
Area of L. W. L.....	105 sq. ft.	Sail area wet surface.....	293 sq. ft.
Area of midship section.....	32 sq. ft.	Area lower sails.....	1,600 sq. ft.
Displacement.....	19.8 tons	Area whole sails.....	1,870 sq. ft.
Ballast on keel.....	15 tons	Most deck to hounds.....	28 ft.
Surplus buoyancy.....	13 tons	Main boom.....	38 ft.
Center of buoyancy below	2.9 ft.	Main gaff.....	25 ft.
L. W. L.....	3 ft.	Tonnage, Thames Rule.....	1.7 tons
Center of lateral resistance	4 ft.	Tonnage Y. R. A.....	3 tons
L. W. L.....	4 ft.		

In short you have a 3-ton yacht 60 feet long, 3 feet beam, carrying 1,870 square feet of canvas on a mast of 28 feet, boom 38, gaff 25 feet, with 11 ton of lead ballast on the keel.

Yours, E.

The Eastern sporting papers have come to hand, giving us particulars of the recent race on their side of the continent. None of them are particularly interesting to readers on this Coast, except as to demonstrating the superiority of the cutters over the beamy sloops in heavy weather and the reverse in going down with the wind after again getting into the harbor. The New York Yacht Club pitched on the 12th ult. for their general regatta, but were compelled to sail it over again the next day, as the yachts from lack of wind were unable to finish inside the prescribed time the first day. Calm weather on the days appointed in Autumn on this Coast for annual regattas, is a thing heretofore unknown, thanks to our steady westerly wind. It must be excessively irritating to the leading yacht, when only a short distance from the winning line, to hear the signal announcing "no race," and, of course, correspondingly agreeable to the hindmost one.

It is a pity that the yachts towed to sea, instead of sailing from Meiggs' wharf, as originally intended, as this gave the larger yachts, more especially the keel boats, an advantage over the smaller ones, who have, of course, more chance to keep up with the van in the comparatively narrow waters in the channel, than they have on the ocean, as, under the system of time allowance adopted for this cruise, the time allowance is reckoned on the actual mileage, and not a specific amount of time for the run. For instance, should a small boat manage to keep even with a larger one from Meiggs' wharf to Point Bonita, she would then start at the same time from that point, as when towing, and would have the advantage of time allowance gained in the distance sailed.

A novel craft was seen on the bay last Sunday. It consisted of two *bidakus* or Esquimaux canoes lashed together and roughly hoarded over, with a fore and aft sail, about the size usually carried by whitehalls, but instead of a sprit it had a regular gaff. Two young men made the run in this craft, from Saucelito to Alameda, in the remarkably quick time of two hours and thirty-five minutes.

We desire to express our thanks, through this column, to Mr. Melville, Secretary of the Pacific Yacht Club, for the promptness he has shown in sending us sailing orders and informing the office of any important action that his club has taken. Such courtesy is very appreciable, and we may state in this matter, that he is the only one of the Secretaries that does so.

The Chispa went up to Turners again last Saturday, and only made to the windward of Angel Island on Sunday afternoon, from where her passengers were compelled to row to Saucelito, in order to catch the last boat.

The Annie bent on a longer gaff last Sunday, in order to carry more canvas on the Santa Cruz trip.

HERD AND SWINE.

Should Cows Have any Rest.

A writer in one of our leading exchanges gives utterance to the following, and the attention of those who believe in crowding everything is called to the points in the article. Those who study the character, constitution and nature of their cows will learn that it is not best to crowd them when young, either in breeding or forcing their milk supply. After a heifer has dropped her second calf the crowding may be commenced. The writer says:

"Many breeders, eager to secure the earliest possible returns from their stock, breed their cattle, sheep, swine and other animals long before they have got their growth. Many heifers drop their first calf before they have themselves reached the age of two years, and several instances in which heifers very little more than a year old have given birth to calves have recently been reported in these columns. From the time of the birth of her first calf many a valuable cow is required to support three lives during a large part of her existence. She must work to supply her own bodily needs, those of the calf she bears, and, to some degree, the wants of the calf by her side. If she is a butter producing cow, like the Jerseys for example, she may not be called upon to suckle a calf, but she will be required to give a large quantity of milk rich in butter. If such a tremendous task is to be imposed upon a cow from the time she drops her first calf until she shall have ceased breeding, will it not be well to prepare her for her life-work by permitting her to reach maturity, or to at least make a growth of two years or even more before setting her at work?"

The charge is made that the Jersey cattle are little rats, which are of no use as beeves; that they have little or no constitutional vigor; that deaths from milk fever are becoming alarmingly frequent among them, and that the race is not gaining in size and vigor as all other breeds gain, under the influence of American climate and treatment. This may be true of some Jerseys; it certainly is not true of all, for the breed has improved greatly in butter-making capacity under American management, and there are reasons for believing that under proper methods it will gain in vigor and hardness; but prematurely breeding and constantly taxing to the utmost the powers of the cows, cannot be the best way for reaching the best and most lasting development of which the breed is capable.

The extremely fine bone, the almost entire absence of fat, the smallness and seeming weakness of the calves of Jerseys, are cited as proof that breeders make a serious error in taxing their cows so severely as they do. And, in-

deed, it appears more reasonable to believe that this is true than that those faults result from inbreeding, for, if like produces like, then by the selection of animals having exceptional size, even though they be closely related, there is apparently no reason for supposing their vigor and size would not appear in their offspring intensified and increased, as the better power of the Jerseys has been developed to a wonderful extent by a judicious use of the two-edged sword, inbreeding.

Would it not be well to prevent the coupling of cattle until the male and the female shall have reached the age of two years, and to give breeding cows a rest of three months after calving before requiring them to begin supporting another life? Not a few cows of the better class are almost continuous milkers; some never go dry, and so never get a rest. By keeping them from the bull for three months after calving, the strain upon them would be considerably lessened and the vigor of the calves increased."

### Black Cattle.

The Galloway Polled, or hornless cattle, which are attracting so much attention from stock growers at the present time, are among the oldest families and certainly from practical experience entitled to a position in the front rank of beef animals.

While the origin of the breed is not definable their earliest mention is with favor. Orelinus, who wrote as early as 573, says: "In Carrick (part of Galloway, Scotland, from whence the breed originated), an oxen of large size, whose flesh is tender and sweet and juicy."

Immediately after the union of England and Scotland the graziers and farmers of Norfolk and other southeastern counties of England became extensive purchasers of these Scotch Polled cattle. The active demand at good prices induced the breeders of Galloway to do their utmost to produce excellent beasts.

Toward the end of the last century in the neighborhood of thirty thousand head were sent from Galloway to these English counties.

The principal recommendation of the Galloway in this country is its admirable rustling qualities, added to which is his propensity for heavy and delicious beef growth. They have from time immemorial been compelled to shift entirely for themselves, and in all the improvements made upon them the retention of their exceptionally hardy character has ever been kept in view. The newly dropped Galloway calves are well covered with hair and can stand extreme cold at a very early period.

Mr. H. H. Metcalf, Director of the American Galloway Breeders' Association, and one of the most prominent stock growers of Colorado, whose ranch is near River Bend, became impressed with the value of this breed some time since, and purchased by selection from the choicest herds of thoroughbred Polled cattle of England a number of the finest bulls and cows. From this stock he has bred a herd of seventy thoroughbred and graded Polled cattle, which are well worthy the admiration of all lovers of fine stock.

Mr. Metcalf has devoted considerable attention to the crossing of Black Galloways with Durhams, Herefords and Shorthorns, and with flattering success.

The remarkable impressiveness of the Galloways when crossed with other breeds is well known. It is said that breeders of cross-bred Galloways never have less than 95 per cent. of Polled offspring. In fact, it is fairly safe to predict that if a cross-grade black Polled bull be bred and sold at a price within the reach of stock-growers it will at once come into general favor, as they seem to combine more nearly than any other breed the desirable qualities to meet the wants of this country. Here, unless the grower has but a small number of cattle, it is practically impossible to provide feed for the winter months.

The writer, from a personal observation of a number of these black cattle compared with a like number of Durhams and Herefords just off from the Winter range, is enabled to state positively that the "negroes" wintered at least 25 per cent. better than their consins, the Durhams and Herefords.

The good qualities of the Polled Galloways is no longer a matter of surmise, and it now rests with American breeders to reduce the expense of placing them on our ranges so as to make their general adoption feasible.—*Denver News.*

### Prize Essay on Cheese Making.

Last year the Wisconsin Dairymen's Association offered \$15 for the best essay, containing not more than 250 words, on cheese making. The prize was won by Mr. T. D. Curtis, of Syracuse, N. Y. Of course it is a model of brevity, and, in the estimation of the awarding committee, which was composed of eminent dairymen, its teachings are worthy the attention of all cheese-makers.

Pure, whole milk from healthy cows, in luxuriant pastures or fed fully balanced rations in stall, is requisite. The more directly it goes to the vat, the better. If kept over night, reduce the milk to sixty-five degrees Fahr. An agitator, to keep the cream from rising, is desirable. Mix night's and morning's milk when ready to work. If cream is mixed in, warm it and pass it through a wire strainer. Heat the milk slowly to eighty-four or eighty-six degrees. Add your coloring matter and rennet enough to begin coagulation in ten to twenty minutes, as desired. Cut the curd as soon as it can be done without waste, as fine as beechnuts. Slowly raise the temperature, gently stirring all the while, to ninety-eight degrees. Hold it there to the end. Draw the whey as soon as there is the least sign of acid, or a little before. Get sufficient rennet action to expel the whey before the acid develops. This prevents the phosphates from washing out and insures a digestible cheese, when properly cured. If you cheddar and grind or not, thoroughly stir and air the curd, to get rid of bad odors and develop flavor. Put to press not above eighty degrees, and place in an even tempered curing room at sixty-five to seventy degrees. Avoid draughts of air, and carefully turn and rub the cheese, which will be prime.

### Indian Stock Raisers.

Cattle raising seems to be the only legitimate business in which the Indians of the plains will take any interest, and at which they are at all apt. In agriculture they always fail, but they have been uniformly successful when they were given cattle, and some attention to their manner of handling them paid by the agents who had them in charge. The Mes-calero Apaches began several years ago with a bunch of 1,200 cattle, and they now possess about 8,000, through the ordinary increase and further purchases for them by the Government, as it was seen that they were successful in their stock growing.

The San Carlos Apaches, in Arizona, own several thousand

head of cattle. The Utes, formerly in Colorado, but now in Utah, have some stock. Several of the tribes in the Indian Territory are rich and their cattle prosperous.

The Navajos, of New Mexico, who are the richest tribe of Indians in the United States, count their wealth entirely in their cattle, sheep and horses, having over a million sheep, six or seven thousand head of cattle, and about five thousand head of horses. Their reservation is an immense one and generally isolated, and good weather prevailing on it the increase of their flocks and herds have been rapid. None of the stock-owning Indians can be counted hostile to the whites, and it is probable that the solution of the Indian problem will have for its most important factor, cattle raising.—*Republican.*

### The Advantage of Spaying.

Some of our ranchmen have struck a chord which could have been sounded long since to their great advantage and independence. It is simply the spaying of heifers and old cows. It is just as easy to send off to market a full grown fat animal, which will bring more than a steer, as to sell surplus of the range a sorry yearling to some other fellow who makes all the profits of the growth. And it is just as easy to have an old cow go fat to market as to die poor in the prairie or hog. To some extent this expedient was resorted to last year on those ranges whose prolific stock had outgrown the bounds, and with results entirely satisfactory and happy. One of our Panhandle ranches spayed last year 2,000 heifers, and this year the little experiment will be followed by the same ranch as well as others. Mr. J. Willis, veterinary surgeon, an acknowledged adept at this art, is now here en route to the Palo Duro ranch, where a number of heifers and calves of lesser promise and objectionable colors will be added to the herd. In those ranges where the selling mania of recent times have caused an enhancement in value of heifers, this may be regarded as clear waste, but to those with prospective overstock it is a means of saving grace and profit most apparent.—*Texas Panhandle.*

The first cattle that were brought into the American colonies, were landed at the James plantation in Virginia about the year 1608 or 1609, and are supposed to have come from the West Indies, having descended from the cattle brought by Columbus on his second voyage in 1493. In 1710 several cows were landed, and 100 were brought to the plantation in 1611, and here was the beginning of cattle production in America. In order to encourage the production of cattle to the fullest possible extent, an order was passed forbidding the slaughter of any animal of the kind under penalty of death.

### Fools Who Make the World Wise.

(Evening Bulletin.)

Henry Ward Beecher recently made an off-handed address before the Storrs Agricultural School, in Mansfield, Conn., in which he defended fancy farming: "A gentleman must have two stores in the city to support one farm in the country. He has fancy barns, fancy stock, fancy poultry, fancy stone-walls. I am one of 'em. It takes six months of lecturing to pay for six months of farming. Plain farmers laugh at all this. But, after all, it is a good thing, for men with money may thus show farmers without money how such things can be done. Since I came to Peekskill every farm around that neighborhood has increased in market value 25 per cent. They have better farms, better stock. The fancy farmer is the fool that makes all the neighborhood wise. Let us speak kindly of the fancy farmer." In the one remark that the fancy farmer is the fool who makes all men wise in his neighborhood, he hit the nail on the head. What he wanted at present, is more "fools," of this sort. There are now a considerable number in this State. It is doubtful if they ever get credit for the good they do. The pioneers in every calling are those who run before the multitude and herald better things to come. The wealthy and prosperous denizens of the larger cities of the Atlantic States have raved many a waste place in the old and half-deserted towns. They have taken some of their money to the country and have expended it in "improvements." Now the majority of business men in large cities have been brought up in the country. They never forget their early associates. No merchant who, when a boy, drove cows to pasture barefoot, will ever forget his country life. He will dream about it sleeping and waking. He will go back if he ever has an opportunity to have another "bout with nature." This time, very likely, he will go full-handed. He will buy a farm somewhere in the country, and will perhaps spend a great deal of money on it. Some of his neighbors may secretly think him a fool. He will, of course, be classed as a "fancy farmer."

When Nicholas Longworth spent something like a hundred thousand dollars in experiments to find out what grapes was the best to grow in Southern Ohio, and what was the best strawberry for the market gardeners in that vicinity to produce, no doubt there were a great many who considered him little better than a fool. But he went on with his experiments, and added many hundreds of thousands of dollars to the wealth of his State. The fruit-growers profited by his "fancy farming." They could not afford to make such costly experiments. But here was a wealthy and public-spirited man who could do it. He consented to be a fool in order that he might make others wise.

Now the "fools" in this sense are continually teaching wisdom. A wealthy citizen buys a place in the country. He can afford, in most instances, to make costly experiments. He does not need an immediate profit on his investment. His public spirit suggests improvements. He makes fences, roads, bridges, builds houses and barns, plants orchards and vineyards, sets out shade trees, brings down water, it may be from the neighboring hills, or bores for it a thousand feet, more or less. After a while the dull and unimproving place which he bought has been radically changed. Its natural resources have been developed. The "fancy farmer" has not made much money. Perhaps he has made his city business contribute to his country improvements. But he has got a great deal of satisfaction out of his work. He has made one spot in the world, which might have been dreary and repulsive, to become a delight to the eye and a solid satisfaction. In his fight with nature he has triumphed. It may have involved a larger expenditure than any neighboring farmer could stand. But all his country neighbors will profit by it. They will in their own way undertake improvements on a smaller scale, and will probably make them with much greater economy. It is the "fancy farmer" who inoculates the whole country with the spirit of improvement.

He consents to be considered a fool that he may teach wisdom. When he has converted his bald and bleak country estate into an attractive landscape—has planted vineyards

and orchards, erected good farm buildings, brought his land up by the use of fertilizers into the best possible condition, and is making it produce the largest crop, then his country neighbors cease to speak derisively of his operations. It is none of their business as to how much money he has expended. He has redeemed a waste place and made a rural picture of it. If they can do the same thing by an expenditure of a small per cent. of the money, so much the better. It was something to have a "fool" teach by example. In many New England towns wealthy men from the large cities have doubled the value of real estate. They have made communities rich in that way—not that they have done everything in the way of improvements, but they led off and inspired others to follow.

The same changes, in a smaller way, are going on in California. And, by the way, there never was a State in which the "fools" were more needed to teach by example. They have already doubled the value of land in many districts. They have ascertained by experiments what are the best varieties of grapes for different soils, what are the most profitable varieties of small fruits, and large stone fruits—they have brought seeds and cuttings from remote places of the world. Some of these men have visited vineyards and orchards in foreign countries, and have given all the information they have gathered up to their neighbors. The "fancy farmer" is continually doing something new. If ten experiments fail and the next one is a success, he is content. New varieties of fruit, new breeds of cattle, new methods of culture are among the more tangible results. The farmer with a small capital, dependent on the annual proceeds of his crops for a support, cannot embark in costly experiments. But men who have created capital in the prosecution of business in cities undertake experiments without a thought of immediate profit. A great deal of capital goes from the city to the country every year for such purposes.

The ideal country life, which has been the dream of so many years, may not be wholly realized. The world for the boy can never be the same world for the man. Yet, probably in no other expenditure does one get more satisfaction than in what is called "fancy farming." The gain or loss in dollars and cents is not the most important consideration. There is satisfaction in an honest triumph—a series of successful experiments in which others will derive an indirect benefit. One can hardly go amiss of such instances. It is not worth while to inquire minutely as to immediate dividends. The "fool" is everywhere in the country teaching by example. He has already enriched California by many millions, and he has only just begun his experiments.

## STABLE AND PADDOCK.

### Weaning Colts.

It is important that the foal should be full fed from birth, and in case the dam does not yield milk enough to give a strong and steady growth, this should be supplemented with cow's milk. The foal can easily be taught to take warm cow's milk. The foal should be handled from the first, and learn to regard man as its friend. It can usually be taught to drink warm milk from a pail. Some, however, think it easier to teach to suck from a bottle. It will not be necessary to give it new milk more than a few days, when sweet, warm, skim milk, with occasionally a little boiled flax-seed in it, will produce just as good a result.

When it becomes necessary to wean such a foal, it is only required to increase the amount of cow's milk, and also teach it to eat a few oats. And when the foal has had sufficient milk from the dam, it will only be necessary to teach it to drink milk and eat oats some two weeks before weaning. Skim milk is perhaps the very best food to wean a colt on, because, having lost of its cream, or oil, it still retains its casein, or cheese principle, its whey, or sugar, and its phosphate of lime, being well adapted to give a strong growth to the muscles and bones. After the colt gets used to taking milk, it may be given moderately sour without any injurious effects. A few oats or quarts of bran or middlings should also be given the colt at weaning. The object is to keep the colt growing steadily, without losing anything, at weaning.

### Lien Law for Horsemen.

For the protection and benefit of stallion owners in the State of Ohio, the following act was passed by the General Assembly, March 13th. There is no question but that it will meet with the approval of those who are trying to raise the standard of the horse interests in that State, by keeping good stallions, and will not be objected to by honest men who will patronize them:

Sec. 1. That the keeper of any stallion shall have a lien upon the get of any such stallion for a period of one year after birth of same for the payment of the service of any such stallion.

Sec. 2. Such keeper or owner of any stallion, in order to obtain and perfect such lien, shall, within ninety days from the time of the rendition of such service by any stallion, file with the Recorder of the county where the service has been rendered, an affidavit of the amount due such keeper or owner for the said service, and for filing or making any copy of such affidavit, or the certificate of the date of such filing, the Recorder shall be entitled to the same fees as are provided by law for like services in regard to chattel mortgages.

The smell of blood will sometimes cause horses to lose their colts. This has been observed by many horsemen without knowing just why it should so affect them. The reason is that the nervous system is excited, the uterus, which is abundantly supplied with nerves, is contracted, and the foetus is expelled. Abortion is much more easily prevented at the first than cured afterward, when it has appeared in a stable, and the greatest care should be exercised in the treatment of pregnant animals; more especially to avoid contact with dead matter, of which they have a strong instinctive dislike.

It will be but little expense and no trouble to give the stables a coat of whitewash. Keep the walls clear of cobwebs and the floor clean. Make the stable such a place that you can go into it with your best clothes and not get them soiled. A few pictures on the wall will add greatly to the appearance, even if they have to be tacked up without frames. Make the stable the coziest place on the farm, except the house, and you will find that the boys and hired hands will find more pleasure keeping it so than they will in trying to shirk the work that is required to keep it in only ordinary or half-kept condition.

Are your stalls arranged so that the horses get the benefit of all the fresh air that is stirring during the day hour?

## Color of Horses.

Some weeks ago I saw an article in your journal in which the writer argued that Hill's Vermont Black Hawk could not have been a son of Sherman Morgan, because the latter was a chestnut while the former was black, and also because there was so little similarity in the general character of their get. He also uses the same argument to show that Black Hawk could not have been the sire of Ethan Allen, the latter being a bay. By the same argument he might have shown that the chestnut stallion, Daniel Lembert, could not have been a son of Ethan Allen. He might also have proved that Comee, Jim and Jubilee Lambert could not have been sons of Daniel Lambert, because the first named was bay, the second roan and the third brown. If some mischievous stable boy should come forward and say he, unknown to any other person, bred the grey mare Midnight to some little black horse after she was bred to the brown stallion Dictator, the season before Jay-Eye-See was produced, what an argument could he make to prove the story of the hoy, especially if it could be shown that some one owning a black stallion went fishing down in the Blue Grass region that season. How easy it would be to prove that Dictator, from the hay mare Dolly, ought not to be black, hence could not have been by the brown stallion Dictator, full brother to Dexter. McCurdy's Hambletonian was the tenth foal of the bay mare Belle. All her previous produce had been bay with the exception of one brown, by Woodford Mambrino, yet McCurdy's Hambletonian was a chestnut. He was by the bay stallion Harold, as were her three previous foals, all of which were bays. The Charles Kent mare was brown. Her sire, imported Bellfounder, is described as a "beautiful bright bay." In 1846 this mare was bred to the bay stallion Abdallah, whose sire was the bay stallion Mambrino, and in due season produced a chestnut filly. She was bred back to Abdallah in 1847, and in 1848 produced a brown colt, and again bred back, the produce being the world-renowned bay stallion Rysdyk's Hambletonian. Such instances are common, as every man of close observation must know, even though he has had no experience as a breeder. Not only in color, but in disposition, gait and conformation do horses out of the same mare and by the same horse differ.

In a work entitled "The Perfect Horse," by W. H. H. Murray, Dr. George B. Loring, who has been breeding horses for years, gives a leaf from his experience, which has a bearing on this question, and is in substance as follows: From an Abdallah mare standing 15½ hands high and weighing 1,050 pounds, of a bay color, he bred five foals by Trotting Childers, son of Hill's Vermont Black Hawk. The first was a shrewd, sagacious, but tempestuous, little black horse, 14½ hands high, but possessing the endurance of a locomotive, black as a coal, twice as big moving as when standing, and could trot in 2:35." The second was a black mare which, when matured, stood about fifteen hands high, a little dull in her temperament but very kind, not quite so large when moving as when standing, and capable of trotting a mile in about three minutes. The next was a delicate, incapable, fine drawn, light-limbed mare, which at maturity stood about 14½ hands, and was practically of no value.

The fourth was a solid, inactive chunk of a bay horse, homely and slow, that would not go unless whipped, and then would make for the nearest stone wall. The last was an airy-gated, elastic, vigorous bay excellent in all his points, capable of roading seventy-five miles in a day, and trotting a mile always, when asked, in 2:40. This is one family, three of which were good, the other two poor, no two alike in respect to speed, shape, size, temperament or appearance. Yet they were all by the same horse and from the same dam. He mentions another family quite as remarkable. From a large white Messenger made standing 15½ hands high and weighing 1,100, he bred a very valuable, intelligent animal, standing 14½ hands, described him as a perfect bundle of well-balanced bone and muscle, with a stride equal to that of a sixteen-hand horse, the best animal he ever drove, and known as the "White Mare." She was by Doncaster, a son of Trotting Childers. This mare was bred five seasons to a young stallion, also by Doncaster out of a long, low, strong, rapid Eastern mare.

From animals so closely related, the doctor felt confident of seeing uniformity of size, color, gait and temperament in the offspring. The first was a light sorrel or chestnut with a lighter mane and tail, and stood about fourteen hands high at maturity. He was a very intelligent, courageous, speedy little horse. The second was an unattractive gray mare, not worthy of her ancestry; the third a gray horse no better than the mare; the fourth a bay horse with immense strength, great, even gait, an abundance of calm determination, steady courage and a personal pride which will not be trifled with. His experience is, doubtless, the same as that of a majority of breeders. How can the writer who attempts to prove that Black Hawk was not by Sherman, account for the color of the first colt in the last family? Both sire and dam were by a grandson of Vermont Black Hawk, yet this colt threw back to something, possibly Sherman, Black Hawk's sire.

The noted brood mare Kate, dam of Bruno, Young Bruno and Breeze, was black. She was bred ten times to Rysdyk's Hambletonian, and in every case the produce was brown or bay. Her second foal was by Vergennes' Black Hawk, he by Hill's Vermont Black Hawk. Vergennes' Black Hawk was black, Kate was black, yet the produce was a chestnut filly. Where did she get her color unless from Sherman, sire of Hill's Black Hawk? There is one fact which those who try to disprove the breeding of Black Hawk and Ethan Allen will find difficult to handle. It has been proved and is a matter of history that the dam of Black Hawk was bred to Sherman, and the dam of Ethan Allen to Black Hawk, the seasons before these horses were foaled. This fact no one attempts to deny. Now a stable boy or any one else who would breed either of those mares to a different horse, without the knowledge of the owner of the mare, must be so destitute of honor that he certainly would not scruple to lie to such an extent that a statement from him under oath would have no weight before an intelligent jury.

The watering-trough for the horse is too often neglected. It is not an uncommo thing to find troughs filled with green moss and litter which has fallen into them. It requires but a few moments each day to remove all this, and it should not be counted as a duty, but a pleasure, to attend to it regularly at least once a day, or oftener, if necessary. Your horses enjoy drinking from a clean trough as much as you do from a clean glass, and they detest a filthy one as much as you do a filthy glass; the only difference is that they cannot express themselves concerning it, and you can.

An Australian has invented a saddle pad which is inflated with air. It is easily adjusted to the horse's back and will certainly be more pleasant for the animal than those which are commonly in use.

## THE KENNEL.

## Cocker Spaniels.

We are informed that E. Leavesley, of Gilroy, has imported from the kennel of H. P. McKoon, Franklin, New York, a black and tan Cocker spaniel bitch of pure breed and pedigree. She arrived, after being boxed up ten days, in the finest condition. This breed of dogs is very rare in California, only one party being in possession of them, and one could not be bought for love or money. They were imported here by the late Mr. Gilmore, a wealthy Englishman, of Solano county. Cocker spaniels are said to be the best dogs for hunting California quail, and far ahead of the pointer or setter, as they will dart into any kind of brush, and make the quail "git up and git." Gilroy is fortunate in having obtained this valuable breed of dogs, which are as beautiful as they are useful for hunting, as well as for horse dogs and ladies' pets. Their weight varies from 20 to 25 pounds, and they possess all the docility and affectionate dispositions for which the spaniel is proverbial. They are mostly used in England for hunting the English pheasants, which live in the woods, and are fond of running before the dog, much like our quail. The Cocker possesses very fine scent, and on coming on the track of a pheasant gives tongue, thus notifying the sportsman to be on the alert, and then rushes the bird up with amazing rapidity. They also make fine retrievers, and to see one bringing in a cock pheasant, half as large as himself, is a sight delightful to the sportsman. When properly broke they are allowed to range about thirty yards from the gun, and to drop to shot. They are generally hunted in braces or leashes of three, and on a fine day in November, with the many varied colors which adorn the woods of England, the sportsman with his leash of cockers and a man to carry the game, birds in plenty with the crimson and golden plumage of the cocks, (for they never shoot the hens), as they dart through the trees, enjoys a pleasure not easily surpassed by any other kind of shooting. There is a peculiar and inexpressible pleasure in hunting in woods, whether it be an undefined poetical feeling, like that which Wadsworth could not help expressing in verse, and which to some extent is natural to mankind, or whether it be the stillness of everything around, except the humming of bees or insects, or the caution and skill required to find the game, which in those quietudes are ever on the alert. It is difficult to say, but all sportsmen who have hunted much in the woods find in it a fascination that lasts with life. Where do you find any hunting more pleasant than that of the still hunter for deer. His eye ever on the alert, his ear strained to catch the slightest sound, his cautious tread, fearing to break a twig under his feet, his sudden eagerness when he sees the indistinct glimmer of a pair of horns shining through a hush, his uncertainty whether it is certainly a buck looking at him and trying to make out who and what he is, his mind at last made up and his palpitation allowed to quiet down, when up goes the rifle with careful aim and inward determination to shoot low, and at the sound of the gun, the animal looking at him through the brush, makes a sudden spring in the air and falls lifeless to the ground. His happiness for that day is consummated, and a pleasure laid by to be reproduced while "memory holds its seat."

## A Few Words to "W. Bradford."

It appears to me that a little less talk through the columns of a sportsman's paper, until you have more knowledge about dogs and the handling of the same, will not only save "X," but others also the trouble of noticing your communications. In regard to yours in the BREEDER AND SPORTSMAN, of June 14th last, entitled "natural and acquired qualities," I have a few words to say which I will preface by saying that I have hunted and broken dogs in all of the New England States, New York, North Carolina, Virginia, Minnesota, Missouri, Nebraska, and Indiana, working on partridge, quail, woodcock, snipe and prairie chicken, and have had my dog placed wherever run in a field trial. A dog that will not point at his first trials, and do it staunchly after a few trials is not worth handling. The "point" has got to be born in them, and no amount of training can ever bring it forth if it be not congenital. I have had pups that, when on their first point, I could take by the tail, bringing it to the nose without a movement of the head, and I have one to-day, a nine months old, that I think will fill the bill. But if she should break I will take old Dorr, characterized by you, I believe, "as a cross-bred colley," by the tail, and lay him on his back without his breaking point. When you get a little practical experience (which from your letters you evidently never have had) it will be a better time for you to attempt to instruct "X" and other readers of the BREEDER AND SPORTSMAN. Truckee, June 23d, 1884. "DORR."

Capt. A. J. Hutchinson, of Los Angeles, who imported from England, last Spring, a pure bred deerhound bitch, has quite a kennel of the stock, ten living puppies having been added. These pups were aired by E. de la Pole's Hector, erstwhile the champion dog of England, and a famous sire of prize winners. The Captain hopes to see an interest in these dogs grow up in this country, and as he will make the circuit of the faire this Fall, with a herd of Devon cattle, he will probably bring up some of his hounds for exhibition and sale.

A. E. Brown's bitch, Queen, has visited Frad. A. Taft's Gordon sattu, Dorr.

## Answers to Correspondents.

Question answered only through these columns. No replies by mail or telegraph.

L. J. A., Tuscon, Arizona.

Director went through the circuit in 1882, trotting at Santa Rosa, Oakland, Sacramento, Stockton and San Jose. His best performance was 2:23½, made at Stockton.

Reader, Oakland.

The race was run on April 27th, 1882. Jim Renwick, 115 pounds, finished first. Atlanta, 101 pounds, second; Night-hawk, 115 pounds, third. Won by three lengths. Time—1:15.

F. L. R., Canterville, Oregon.

The rules of base ball are published in book form, and sold by most news dealers. We do not keep them.

## OUR NEW YORK LETTER.

## Jim Renwick's Defeats and Victories—Great Racing at Jerome Park and Coney Island—Baldwin's Stable in the West—General Sporting Notes, etc., etc.

Lest week, at Jerome Park, your noted campaigner, Jim Renwick, made his second and third appearance in this vicinity, and it is safe to say that from this time out, no matter in what company he starts, the big chestnut will be well supported by the public. The wires have doubtless informed you that at Jerome, with 119 pounds, he beat Rica and three others a mile in 1:47, Donohue, his rider, waiting in the rear until nearly seven furlongs had been run, when he came loose and won in a big gallop, making the second fastest mile of the meeting. Two days afterwards, however, he was beaten nine furlongs by Strathspey, Sandoval and Buckstone, and most persons now consider him only a miler. That they will alter their opinion of the gelding's capabilities before the season is much older is certain. To-day, at the opening day of the Coney Island Jockey Club, he won the first race of the meeting, five furlongs in 1:02, with 117 pounds. He was ridden by McLanghin, and defeated a large and fast field of sprinters. This makes two victories for the horse out of four starts, and when he meets the cracks at Monmouth Park in his next stake engagements Jim is likely to do himself and his party credit. Welch has been sick of late. He was not at Jerome to see the horse win there, and Buchanan, the trainer, was feirly inundated with interviewers, amateur and professional. The Jerome Park meeting ended on Saturday last, with very hot, dusty weather, and a fast track. Mr. Withers' Mimi colt, three years, winning the mile dash in 1:45½, the fastest time of the meeting. The seven days' racing brought out some superior two-year-olds, G. L. Lorillard's Triton by Sensation or Tom Ochiltree winning the Juvenile in great style, the half mile being run in 49½. The winner is a fine big colt, but none too sound unfortunately, and there is doubt as to his filling all of his numerous engagements. Triton is by Sensation beyond a doubt, as the mare was stunted to that extent last, and foaled the colt just eleven months afterwards. Detective by Virgil beat all but Triton in the Juvenile and the Dwyers have in him a very promising youngster, in looks a second edition of old Parole. Richmond and Elemendorf by Virgil, also in the Dwyers' stable, both won their maiden essays at Jerome in good style, beating good fields. Of the three-year-olds Panique, the Withers and Belmont winner, bears off the palm, and his sale to the Dwyers for \$10,000, the night before the Belmont, was followed by the sale after the race of the Knight of Ellerslie who gave him such a hard race in the latter event. Appleby & Johnston, the new owners of the Knight for whom they gave \$10,000, and 60 per cent of his winnings for 1884, are leading book-makers here, and as there is great rivalry between them and the Dwyers the public will be treated to some great struggles between these two fine colts. Panique only beat the Virginia colt a short half length in the Belmont, and as the latter had been coughing before the race he was clearly not at his best. Since the sale of Panique the Kitten party have broadly hinted that they have a better three-year-old yet left. Issaquena is ailing in her right fore foot and opinion points to Rataplan by Alarm or Reform out of Lady Lumly as the one meant. He is not likely to be seen out before the 19th when he is engaged in the rich Emporium stakes, worth nearly \$10,000, to be run at the Sheepshead Bay meeting.

Of the older horses that ran at Jerome, General Monroe bears off the highest honors, beyond question. Few persons thought four years ago that the doubted two-year-old Tom Bowling colt, who was wintered by being ridden through the snows of Westchester, would ever become the first-class race-horse he is now. Last year Monroe was a good one, but this season he has come out a giant, reposted and filled out into as grand a looking horse as one would wish to see anywhere. And that his performances are on a par with his looks his recent races of Jerome, where he gave away weight to large fields, and heat them easily, show clearly. George Kinney and Miss Woodford were in against him in these handicaps, but as the disparity in weight was considerably in Monroe's favor, the Dwyers did not start either of their cracks against him. To-day, however, Monroe set the seal on his already great reputation, by winning in grand style and under the adverse circumstances of a poor beginning, the great race for the Suburban Handicap, at Coney Island, defeating the largest field of race-horses that ever started in America. The nineteen against him included the pick of the Dwyer, Rancocas, Maryland, Islip, Brookdale, Virginia, Preakness and Brighton Beach stables, and were weighted at from 132 down to 85 pounds. General Monroe, with 124 pounds and Donohue in the saddle, got off nearly last of the twenty, and passing the stand at the end of the odd quarter of a mile, he was about fifteenth. His rider said afterwards that he had no hopes whatever of making up the gap between him and the leaders, but when he got safely round the first turn, which, at the new track is rather an abrupt one, he called on Monroe to do his best, and the horse responded with such speed and gameness that in running the nearly straight hacketch he passed nine or ten of those in front of him, and before reaching the homestretch was a good third to War Eagle and Pizarro. How he won the race in the last furlong's run is now a matter of history, and suffice it to say that there is no more popular horse in America than this best son of Tom Bowling. The Coney Island cup run next Saturday is at his mercy in the absence of Eole and Moutier, and after filling that engagement he will be shipped to Chicago, where the Washington Park cup, worth about \$8,000, will claim his attention. In this race he will meet John Davis, April Fool, Mary Gilmore and perhaps Lucky B., but is apt to down every one of them in spite of his panalties. The Baldwin stable is, however, doing so well at Latonia that there is no telling what they may do at Chicago. The good form of Fallen Leaf, Savanna, Marie Stuart, Rapido, etc., is apt to be followed by more surprises when Gano, Suenadoah, Varuto and Freda make their appearances on the track. This stable's appearance in this vicinity is awaited with great interest, for it is undoubtedly a formidable one under the management of Albart Cooper and Cyrus Holloway. Walton, the Plunger, is expected here daily, and his whole stable of English-bred horse is also an route for these sboras. The betting has thus far been rather lukewarm, but as soon as these new factors make their appearance it will improve beyond a doubt. The owners of Monroe had on to-day's race the next bet, made three months ago, of \$10,000 to \$400.

Yours, PACIFIC.

New York, June 10th, 1884.

The Farmer's Liability for the Acts of His Beasts.

[Cor. American Agriculturist.]

General Rule as to Trespasses.—It is the duty of every one to keep his domestic animals upon his own premises.

Exceptions to General Rule.—This general statement is modified by the fact that where the owner of lands trespassed upon is under obligation to keep them fenced against these particular animals, and to fail to do it, then no damages can be recovered.

Injuries by Vicious Animals.—For the vicious acts of unruly domestic animals, like kicking, hooking or biting, the owner is generally liable.

As to what amounts to notice of a vicious temper, the rule is that it should be sufficient to put a prudent man on his guard.

It is no defense to a vicious injury by a domestic animal that it was committed on the owner's own premises, and that the person injured was at the time a trespasser.

Contributory Negligence Excuses.—As the right to damages depends upon negligence on the part of the owner, any contributory negligence on the part of the person injured excuses the owner and relieves him from liability.

unjust to allow a man to recover damages for an injury which he himself helped to bring about. Consequently, if I go into my neighbor's pasture and begin teasing his mad bull, I cannot complain if the bull tosses me over the fence, and injures me in so doing.

As to the liabilities of owners of dogs, for injuries done by them the statutes of nearly, if not all of the States, have made provision.

Kickers.

It is astonishing how men who follow a pursuit for pleasure and profit continually try to lower and degrade its standard by their own action and conduct.

Many of these false charges are stated by that class known as "kickers," who having lost a pitiful sum cannot excuse for their failure to win, except to saddle the fault on the jockey, judges, or horse being pulled, stuffed, etc.

THE DRAMA.

Vienna Garden.

The return of the Gypsy Band to the Vienna Garden during the week has been a source of pleasure and delight to the lovers of good music, and the audiences showed emphatically the estimation in which they hold these wonderful musicians, by their extent and enthusiasm.

THIRD ANNUAL MEETING OF THE SANTO CRUZ COUNTY Agricultural Fair Association. At Santa Cruz.

COMMENCING Tuesday, Aug. 12, 1884, AND ENDING Saturday, August 16th, 1884. SPEED PROGRAMME

- FIRST DAY, Tuesday, August 12th. No. 1—Trotting race; three-minute class; Purse, \$400. No. 2—Trotting race; 2:40 class; Purse, \$200. SECOND DAY, Wednesday, August 13th. No. 3—Trotting race; 2:27 class; Purse, \$500. No. 4—Trotting race; Purse, \$150; three-minute class. THIRD DAY, Thursday, August 14th. No. 5—Pacing race; 2:20 class; Purse, \$400. No. 6—Trotting race; 2:50 class; Purse, \$150; for all horses owned in the district. FOURTH DAY, Friday, August 15th. No. 7—Trotting race; 2:40 class; Purse, \$400. No. 8—Running race; Purse \$150. FIFTH DAY, Saturday, August 16th. No. 9—Trotting race; 2:22 class; Purse, \$500. No. 10—Trotting race; Purse, \$250; for all horses owned in the district.

CONDITIONS. All trotting races are best three in five. Entrance fee, ten per cent, on all purses, to accompany nomination. In all races five to enter and three to start. But the Board reserves the right to hold a less number than five to fill, by the withdrawal of a proportionate amount of the purse.

Bay District ASSOCIATION Fall Meeting, 1884.

ENTRIES FOR... TROTTING SEASON, SATURDAY, Aug. 2d, 2:27 Class.

Purse, \$750. Divided, \$450, \$225, and \$75 to first, second and third horses. Wednesday, Aug. 6th—2:40 class; purse of \$500. Divided, \$300, \$150, and \$50 to first, second and third horses.

RACING PLATES OR TRAINING SHOES OF any size or weight, forwarded on receipt of price, \$2.50 per set. All plates and shoes guaranteed to be of the best material and workmanship.

BIRCHS WILLIAMS' KEY AND NOT SOLD by watchmaker. By mail 25c. Circulars sent by J. S. Bircha & Co., 28 Dey St., N. Y.

IMPROVED Blind Bridle & Winkers FOR RACE HORSES.

Secured by Letters Patent, July 25, 1882. Having thus described my invention, what I claim as new, and desire to secure my letters patent, is: The part D supported by the side straps of the bridle, extending back as shown, the front having an opening into which the blind is fitted, substantially, as herein described.

The above are the claims allowed by the patent office, and though the corresponding letters do not appear on the cut, the general principle will be understood. It meets with universal approbation, doing away with all the objections urged against blinds, and at the same time giving complete control of the line of vision.

KERR'S ASTHMA CURE

Cures Asthma, Bronchitis, Throat and Lung affections, Coughs, Colds, Quinzy, Sore Throat, Soreness in the Chest or Lungs, Weakness in the Back, Pains in the Back, Bowels, Sides, Collar, Croup, Pneumonia, Measles, Whooping Cough and Indigestion. It heals the entire system. Pleasant tasted as ice cream. For sale by all druggists. Price, 50 cents and \$1.00 per bottle. Post-office box 1870.

REDDINGTON & CO., Wholesale A 631 Market Street, San Francisco.

THE Thirty-first Annual STATE FAIR

- AT - SACRAMENTO, CAL. Commencing Monday, Sept. 8th. - AND - CLOSING SATURDAY, SEPT. 20th, 1884.

TWO WEEKS.

Speed Programme.

First Day, Thursday, Sept. 11th.

TROTTING.

No. 1 - THE OCCIDENT STAKE - Closed in 1882 with thirty nominations. No. 2 - PACING PURSE, \$1,000. 2-25 Class. No. 3 - TROTTING PURSE, \$4,200. 2-25 Class.

RUNNING.

No. 4 - THE INTERSECTION STAKE - For two-year olds. \$25 entrance; \$10 forfeit; \$200 added; \$50 to second; third to save stake. Three-quarters of a mile. No. 5 - THE CALIFORNIA DERBY STAKE - For three-year olds. Closed in 1882 with sixteen nominations. One mile and a half.

Second Day, Friday, Sept. 12th.

TROTTING.

No. 1 - THE DEL PASO STAKE - For all ages. \$50 entrance; \$15 forfeit; \$250 added; \$75 to second; third to save stake. Three-quarters of a mile. No. 2 - THE CALIFORNIA ANNUAL STAKE - For two-year olds. Closed in 1883 with nineteen nominations. One mile.

RUNNING.

No. 3 - THE PREMIUM STAKE - For all ages. \$25 entrance; \$10 forfeit; \$200 added; of which \$50 to second; third to save stake. Three-quarters of a mile. No. 4 - THE CALIFORNIA ANNUAL STAKE - For two-year olds. Closed in 1883 with nineteen nominations. One mile.

Third Day, Saturday, Sept. 13th.

TROTTING.

No. 1 - TROTTING PURSE, \$1,000 - For four-year olds. Closed March 10th, 1884, with ten entries. No. 2 - THE ANNUAL TWO-YEAR OLD TROTTING STAKE - Closed January 1st, with twenty-one nominations. No. 3 - TROTTING PURSE, \$1,200 - 2-27 Class.

RUNNING.

No. 4 - THE MATUREY STAKE - Closed in 1883, with nominations. Three miles. No. 5 - THE PREMIUM STAKE - For all ages. \$25 entrance; \$10 forfeit; \$200 added; of which \$50 to second; third to save stake. Three-quarters of a mile. No. 6 - THE CALIFORNIA ANNUAL STAKE - For two-year olds. Closed in 1883 with nineteen nominations. One mile.

Fourth Day, Monday, Sept. 15th.

TROTTING.

No. 1 - FREE HANDICAP STAKE. \$50 entrance; \$25 forfeit; \$15 added; \$75 to second; third to save stake. Weights announced September 5th; declaration September 8th, by 8 P. M. Two and one-quarter miles. No. 2 - FREE PURSE, \$300 - For all ages. \$50 to second; \$25 to third. One mile and repeat.

RUNNING.

No. 3 - THE ORANGE STAKE - For two-year olds. \$25 entrance; \$10 forfeit; \$150 added; \$50 to second. Five-eighths of a mile. No. 4 - THE BREEDERS' STAKE - For three-year olds. REMARKS AND CONDITIONS.

All trotting and pacing races are the best three in five, except the two-year old trot, unless otherwise specified; five to enter, and three to start. But the Board reserves the right to hold a less number than five to fill, by the withdrawal of a proportionate amount of the purse. Entrance fee, ten per cent. on purse, to accompany nomination. Trotting and pacing purses divided at the rate of fifty per cent. to first horse, twenty-five per cent. to second, fifteen per cent. to third, and five per cent. to fourth.

National Association Rules to govern trotting, but the Board reserves the right to trot heats of any two classes alternately, if necessary to finish any day's racing, or to trot a special race between heats. A horse making a walk-over shall be entitled only to the entrance money paid in. When less than the required number of starters appear, they may contest for the entrance money, to be divided as follows: 66 2-3 to the first, and 33 1-3 to second.

In all races, entries not declared out by six p. m. of the day preceding the race, shall be required to start.

Where there is more than one entry by one person or in one interest, the particular horse they are to start must be named at 6 p. m. of the day preceding the race. No added money paid for a walk-over. Rules of the State Agricultural Society to govern running races, except when conditions named are otherwise.

Non-starters in running races will be held for entrance under Rule 3. Racing colors to be named in entries. In trotting races, drivers will be required to wear caps of distinct colors, which must be named in their entries.

Entries to all of the above races (except fixed events) to close with the Secretary on Friday, August 1st, 1884. Entry blanks and racing rules will be furnished upon application to the Secretary.

P. A. FINIGAN, President. EDWIN F. SMITH, Secretary.

REMARKS AND CONDITIONS.

National Trotting Association Rules to govern all Trotting and Pacing Races. But the Directors reserve the right to change the order of the programme so as to alternate if necessary to save time, and furnish more than one race the same day.

In all Trotting and Pacing Races, five to enter, three to start. Entrance ten per cent. of purse, to accompany all nominations. Horses distancing the field will be entitled to the first and third money only.

Horses entered in purses can only be withdrawn by consent of the Judges. The Pacific Coast Blood Horse Association Rules to govern all Running Races. Non-starters for Running Races will be held for entrance.

Non-starters must be declared out the day previous to the race they are engaged in, before eight o'clock p. m. In all Running Races the second horse saves entrance. No money paid for a race without a contest.

All entries for races to close with the Secretary or President, at Chico, Aug. 1st, 1884, at ten o'clock p. m. The Board of Directors will have absolute change of the Track and Grounds during the week of Races, and guarantee that they will be kept in first-class condition.

The above rules in regard to entries and conducting the races will be strictly enforced, and all purses and stakes will be paid when the Judges have rendered their decision, and before leaving the Stand.

N. B. In all running races the second horse saves entrance. The time of closing entries extends to August 1st, at 10 o'clock p. m.

C. C. MASON, PRESIDENT, ROLAND DILLER, SECRETARY.

Dissolution Sale of Trotting Stallions, BROOD MARES, Roadsters, Colts, Etc.

In consequence of the Dissolution of Co-partnership of Messers NEWLAND & PUMYEA, we will offer for sale on SATURDAY, July 19, 1884,

OAKLAND TROTTING PARK,

FIFTY HEAD OF WELL-BRED HORSES. AMONG the yearlings and two-year-olds are the get of Steinway, Grand Moor and Poscora Hayward. The brood mares are principally Hambletonian. The stallions are the well known Grand Moor, by the Moor, dan Vashki, by Mambrino Patchen; and the two-year-old colt by Newland's Hambletonian (the by Speculation) out of Phaeola by Silverthreede, her dam Minnehaha, dam of Beautiful Bells, Eva, Sweetheart and others. The roadsters comprise fine matched horses, both single and double, and several matched carriage and road teams. There will also be offered good and track cutkies, light and heavy driving carts, etc.

The horses, with the exception of brood mare, will be at stables of Newland & Pumyea, Seventh street, near Broadway, Oakland, until July 17th, after that date all may be seen at Oakland Park.

The sale will be absolute. Terms Cash. Catalogues will be issued in a few days.

KILLIP & CO., Auctioneers, 116 Montgomery St., SAN FRANCISCO.

Important Sale of Thoroughbred Horses.

BY DIRECTION OF

THEODORE WINTERS, ESQ.

We will Offer for Sale

Thursday, July 17th, 1884.

At the Stables of C. H. SHEAR, opposite Agricultural Park, Sacramento,

Seventeen Head of Thoroughbred Horses COMPRISING

All his two-year olds and yearlings, together with the crack three-year-old Prince of Norfolk and the famous hurdle mare Hattie B.

It is Mr. Winters positive intention to retire from the turf and confine himself strictly to breeding. Hence his entire string will be offered without reserve. The colts in training will be galloped until day of sale, that they may be kept in order for racing purposes. The horses may be seen previous to sale at the Winters' Ranch, Riverside Road, near Sacramento. A competent Veterinary will be in attendance, to make all examinations desired by purchasers. Killip & Co. will execute commissions for intending buyers who cannot be present.

Catalogues giving full pedigrees, etc., will shortly be issued. For information apply to

KILLIP & CO., Live Stock Auctioneers, 116 Montgomery Street, S. F.

AUCTION SALE

—OF—

Pure Bred Jersey Cattle,

THE PROPERTY OF

ROBERT BECK, ESQ.,

—TO TAKE PLACE—

Thursday, July 17, 1884.

IMMEDIATELY UPON THE CONCLUSION OF THE sale of Mr. Winters' horses, we will offer twenty head of THOROUGHBRED JERSEY BULLS, COWS and HEIFERS, all registered in the American Jersey Cattle Club, and in Pacific Coast Jersey Cattle Club Registers. These cattle are of the choicest milk strains, being chiefly descended from Touchstone, the most famous Jersey bull imported into California. Several high grade cows and heifers will also be offered.

The sale will take place at stables of C. H. Shear, opposite Agricultural Park, Sacramento.

Catalogues giving pedigree and full information will be issued in a few days.

FIVE DOLLARS A YEAR.

## TURF AND TRACK.

### Events at Chicago.

The inaugural meeting of the Washington Park Club began on June 28th, and from the telegraphic reports it was inferred that no Pacific Coast colors were seen on the track that day, but from the following detailed account it appears that Freda was in the field in the inaugural dash, but to little purpose. The races in which Californians figured are thus reported in the Chicago Horseman:

WASHINGTON PARK, June 28, 1884.—The Inaugural Dash; purse, \$500, of which \$100 to the second horse; for all ages. Maidens allowed, if 3 years old, 5 lbs; if 4 years, 10 lbs; if 5 years, or upwards, 15 lbs. One mile.  
Clay & Woodward's br c The Admiral, 3, by Vidette—Regatta, 103 lbs; (Taylor) 1  
Gustave Cook's b c Ferg Kyle, 4, by Rebel—Anna McKinney, 118 lbs; (O'Neill) 2  
R. R. Owing's b g Mammonist, 6, by Buckden—Monomania, 119 lbs; (Conkling) 3  
F. Water's gr g Vanguard, 4, by Foster—Victress, 116 lbs; (Todd) 0  
A. L. Brock's cb m Eulalie, 6, by Pilgrim—Virginia, 102 lbs; (Jos. Butler) 0  
W. L. Cassidy's cb g Saunterer, 6, by Leamington—Lemonade, 119 lbs; (Rivers) 0  
J. W. Reagan's cb g Athlete, 6, by Vauxhall or Narragansett—Elizabeth, 119 lbs; (Quaintrell) 0  
F. Harrison's cb c Banquo, 4, by Barney Williams—Sanganona, 115 lbs; (Harrington) 0  
J. W. & R. H. Loud's cb f Lady Loud, 3, by Monarchist—Lady Hardaway, 98 lbs; (Taylor) 0  
J. E. McDonald's b c Rothschild, 4, by General Rossau—Barbary, 108 lbs; (Jones) 0  
Young & Crowley's cb f Helianthus, 3, by Hyder Ali—Kitty, 92 lbs; (Covington) 0  
S. Farrell's cb g Revoke, 6, by Harry O'Fallon—Sally Doswell, 119 lbs; (Swiney) 0  
McCloy & Co.'s b g Transmittan, 3, by Hunter's Lexington—Mollie A., 95 lbs; (Casey) 0  
E. J. Baldwin's blk f Freda, 3, by Wildide—Frolic, 98 lbs; (Casey) 0  
Time, 1:45.

Pools sold: Mammonist, \$60; Admiral, \$21; Ferg Kyle, \$17; the field, \$75. Books: 2 to 1 against Mammonist, 3 to 1 against Freda and Lady Loud, 5 to 1 against Saunterer, Ferg Kyle and The Admiral, and from 15 to 20 to 1 against any other. Starter Sheridan had considerable trouble with his field, but after a dozen false starts the flag dropped with Saunterer in the lead, Eulalie second, Rothschild third, the balance of the field strung out. At the club house turn Saunterer led by two lengths with Revoke second, Admiral third. On the backstretch Admiral fell back to fourth and Mammonist went up to second place, and at the turn Ferg was third; turning for home Mammonist was lapped on Saunterer, Ferg Kyle a good third, with The Admiral in close attendance; the pace was too hot for the favorite and the little Admiral came away, winning very cleverly by over a length, Ferg Kyle second, Mammonist third. Time, 1:45. French mutuals paid, \$66.40.

July 1st, 1884.—Purse \$500, of which \$100 to the second horse. For all ages. Winner of any race of the value of \$1,000, to carry 5 pounds; if \$2,000, 7 pounds; if \$3,000, 10 pounds extra. Winner of the first race the first day of the meeting to carry 5 pounds additional. Maidens allowed, if three years, 6 pounds; if four years or upward, 10 pounds. One mile and half a furlong.  
Clay & Woodford's br c The Admiral, 3, by Vidette—Imp. Regatta, 110 lbs; (Taylor) 1  
S. Bryant's cb c General Harding, 3, by Great Tom—Liza Davis, 112 lbs; (Bryant) 1  
Ed. Corrigan's b c Templehof, 3, by Ten Brock—Ida Kinney, 100 lbs; (West) 3  
J. G. Greener's ch f Easter, 3, by Engineer—Mollie W., 100 lbs; (Harris) 0  
Gustav Cook's b c Ferg Kyle, 4, by Rebel—Anna McKinney, 118 lbs; (O'Neill) 0  
H. R. Tervet's cb g Nippon, 6, by Tom Bowling—Kate Duncan, 117 lbs; (Marlin) 0  
R. A. Johnson & Co.'s b c Powhattan III, 3, by Glenelg—Florence, 110 lbs; (Williams) 0  
E. J. Baldwin's blk f Freda, 3, by Wildide—Frolic, 105 lbs; (Witbers) 0  
E. Harrison's cb c Banquo, 4, by Barney Williams—Sanganona, 115 lbs; (Henderson) 0  
D. E. Le Fevre's b g Actor, 3, by Trumps—Little Sis, 97 lbs; (O'Hare) 0  
Time, 1:52.

Pools: Field, \$100; Ferg Kyle, \$55; The Admiral, \$40; Freda, \$20; General Harding, \$10. Books: 2½ to 4 against The Admiral, 4 to 1 against Ferg Kyle, 6 to 1 against General Harding, 3½ to 1 against Freda, 10 to 1 against Nippon, and from 25 to 30 to 1 against any other. The field got the flag to a capital start, passing the stand General Harding led, Actor second, Admiral third, Templehof fourth, Ferg Kyle fifth. The lot closed up a little as they passed the quarter, but at the half Admiral moved up to second place with Ferg Kyle third; here Freda and Actor fell out of the race, around the turn Harding came back to his horses, and at the three-quarter pole the little Admiral went to the front, Templehof also came

with a rush but could not catch the leaders. Admiral winning by a length, Harding second a length in front of Templehof. Time, 1:52. French mutuals paid, \$19.90.

Same Day—The Kenwood Stake, a sweepstakes for colts 2-year-old (foals of 1882), \$50 entrance, p. p.; or only \$10 if declared out on or before Feb. 1, 1884; or \$15 by April 1, 1884; or \$20 if on May 15, 1884. All declarations void unless accompanied with the money, with \$1,200 added, the second to receive \$200, and the third \$100 out of the stakes. Winners of any stake race of the value of \$750 to carry 2 pounds; of \$1,200, 5 pounds; of \$1,500, 7 pounds; of three or more stakes of any value, 10 pounds extra. Five furlongs.  
Ed. Corrigan's Isaac Murpby, by Vigil—Mary Howard, 110 lbs; (Murphy) 1  
E. J. Baldwin's cb c Verano by Lexington—Mollie McCarthy, 110 lbs; (Holloway) 2  
Milton Young's b c Troubadour, by Lisbon—Glenelgue, 117 lbs; (Taylor) 3  
G. D. Wilson's br c Favor, by Pat Malloy—Favorite, 115 lbs; (Duffy) 0  
Ed. Corrigan's b g Court Ban, by King Ban—Herzogovina, 102 lbs; (West) 0  
J. R. Swiney's cb c Redstone, by Wanderer—Katie Pearce, 112 lbs; (Ellis) 0  
McCollough and Savage's b c Middlesex, by Harlaway—Altitude, 105 lbs; (Kelly) 0  
J. T. Williams' cb c Joe Cotton, by King Alfonso—Imp. Inverness, 102 lbs; (Conkling) 0  
W. Cottrell's b g Jim Guest, by Buckden—Mrs. Grigsby, 102 lbs; (Stoval) 0  
Time, 1:04½.

Pools: Favor, \$100; Isaac Murpby, \$50; Redstone, \$30; Verano, \$25; Troubadour, \$10, and the field, \$17. Books: even money against Favor, 3½ to 1 against Verano, 4 to 1 against Redstone, 3 to 1 against Troubadour, and from 12 to 25 to 1 against any other. Isaac Murpby jumped to the front at the start, Redstone second, Favor third, the balance well hunched, the green colors of Murpby showed in the van all the way round, but at the top of the turn Verano and Troubadour made a good race for second place, the Californian finished two lengths behind Murpby, and the same distance in front of Troubadour. Time, 1:04½. French mutuals paid, \$24.30.

Same Day—The Oakwood Handicap. A sweepstakes for all ages; \$50 each b f, or only \$10 if declared out on or before May 1, 1884, with \$1,000 added, the second to receive \$200, and the third \$100 out of the stakes. Weights to be announced April 1, 1884. A winner of any race, after the publication of weights, of the value of \$1,000, to carry five pounds extra. One mile and a furlong.  
Louisiana Stables, b g Fosteral, 6, by Goster—Minnie T. Morgan, 95 pounds; (Arnold) 1  
Ed. Corrigan's cb m Ada Glenn, 6, by Glenelg—Catina, 108 pounds; (Murphy) 2  
Rosebud Stables, b m Mattie Rapture, 6, by Bapture—Lizzie Belield, 107 pounds; (Duffy) 3  
H. L. Cassidy's cb g Saunterer, 6, by Leamington—Lemonade, 112 pounds; (Walker) 0  
Milton Young's cb g Cardinal McCloskey, 4, by Ten Brock—Waterwitch, 107 pounds; (Taylor) 0  
L. Curran's b g Sovereign Pat, 4, by Pat Malloy—Nora, 105 pounds; (Todd) 1  
P. A. Brady's blk c Finality, 4, by West Rokbury—Nora Worth, 106 pounds; (Jones) 0  
T. M. Berry's br b John Henry, 5, by Saunterer—Lida Gaines, 114 pounds; (Conkling) 0  
J. B. Haggins' ch m Nellie Peyton, 5, by Hurrah—Emily Peyton, 104 pounds; (Kelly) 0  
O. E. Le Fevre's b f Ailee, 3, by Hurrah—Wanania, 96 pounds; (O'Hara) 0  
T. J. Megibbin's b g Strickland, 3, by Springbok—Lorena, 101 pounds; (Wethers) 0  
Louisiana Stables, b g Wallensee, 5, by Waverly—Peasma, 116 pounds; (Stoval) 0  
D. H. Mosher's b g Chantilly, aged, by Tipperary—Agnes Donovan, 106 pounds; (Thayer) 0  
S. Powers & Son's b c Aretino, 4, by Aramis—Spriggly, 113 pounds; (Ellis) 0  
Wildwood Stable's b g Boreas, 3, by Billet—Maggie Morgan, 92 pounds; (Tompkins) 0  
Time, 1:54.

Pools: Field, \$100; John Henry, \$60, and Ada Glenn, \$24. Books: 2 to 1 against John Henry, 6 to 1 each against Finality and Ada Glenn, 4 to 1 against Sovereign Pat, 5 to 1 each against Nellie Peyton and Wallensee, and 12½ to 25 to 1 against any other.

The large field were sent away evenly, Ailee cutting out the work, Strickland second, Finality third. Passing the stand Ailee still led, Chantilly close up, Strickland third, Nelly Peyton, Ada Glenn and John Henry close up, the rest straggling. The first two went past the quarter together, with John Henry fourth, here Fosteral began to move through his field and joined the first division, turning for home, the finish became very exciting, Ada Glenn making a grand finish with Fosteral, while Mattie Rapture made a big run for a situation. Steel and whip were freely plied, but Fosteral won by a neck, a length between second and third. Time, 1:53½. French mutuals paid, \$30.30.

At the Driving Park the rain which brought about a postponement, made the track sticky and it was not in condition when racing was resumed on the 26th.

CHICAGO DRIVING PARK, June 26th.—The Garden City Cup, for all ages, \$50 entrance, \$25 forfeit, with \$1,000 added, \$150 of which to second, \$100 to third. Two miles and a quarter.

C. L. Hunt's cb c April Fool, 4, by Intruder—Etta Powell, 118 lbs; (Ellis) 1  
E. J. Baldwin's br c Lucky B., by Rutberford—Maggie Emerson, 118 lbs; (Holloway) 2  
C. L. Hunt's cb g John Davis, aged, by Harry O'Fallon—Belle, 121 lbs; (Sayers) 3  
R. C. Pate's cb c Bob Pate, 4, by St. Martin—Sophy Baddeley, 118 lbs; (Murphy) 0  
Time, 4:12.

Pools: Hunt's pair, \$150; Lucky B., \$92; Bob Pate, \$30. Books: Even money against John Davis, 3 to 2 against Lucky B., 3 to 1 against April Fool, and 5 to 1 against Bob Pate. With the drop of the flag April Fool made the running, and soon had a big gap of daylight between him and John Davis. Pate and Lucky B. lapped on each other a length behind. At the quarter the party moved up a little on April Fool, who still led by three lengths. At the half Lucky B. moved into second place, but the leader still went galloping on four lengths in front, Davis a length behind Lucky B., Pate last, in which position they passed the stand the second time. From here to the half Lucky B. improved his position, but Davis, who was expected here to make his run, was already beaten, Lucky B. was sent for all he was worth, and in the stretch Murpby had to use the persnader on April Fool, who won a grand game race from end to end by a length, Lucky B. second, Davis a poor third. Time, 4:12. French mutuals, \$9.90.

June 30th—Club Purse, \$200, for all ages, \$50 of which to second. One-half mile.  
J. B. Haggins' cb m Premium, aged, by Castor—Flying Cloud, 115 lbs; (Duffy) 1  
Marvin & Douglas' gr m Bluebird, 6, unknown—unknown, 115 lbs; (Spalding) 2  
D. De Camp's cb m P. D. Q., aged, by Marlon—Humming, 115 lbs; (Keley) 3  
James Todd's cb g Sorrel Dan, aged, by Jeff—unknown, 117 lbs; (O'Hara) 0  
P. McKeller's b m Lucy Walker, aged, by Tipperary—Lucy Fowler, 116 lbs; (Thayer) 0  
G. W. McDonald's b g Verner, 4, by Vermont—Belle Demons, 115 lbs; (Yettman) 0  
Thomas Watkins' s b Tony Pastor, 3, by Billy Gilmour—Nellie Bly, 107 lbs; (Richardson) 0  
C. Martain's b c Leonardo, 2, by Voltiguer—unknown, 82 lbs; (Sedgely) 0  
Peter Holdridge's b g Jim Fisk, 6, by Gold Stone—Spotted Fawn, 117 lbs; (Hess) 0  
Charles Logan's b m Hollyood, 4, by imp. Higbander—Lady of the Lake, 118 lbs; (Logan) 0  
Time, 0:48½.

Pools: Premium, \$100; field, \$100. Books: Even money against Premium, 3 to 1 against Bluebird, 5 to 1 each against P. D. Q., Verner and Leonardo, and from 7½ to 15 to 1 against each of the others.

Another poor start with Lucy Walker in the lead, with Verner, Sorrel Dan, Premium and P. D. Q. in close attendance, the balance in the rear. At the top of the stretch Premium went to the front, followed by Bluebird and P. D. Q., who finished in the order named, Premium winning by a length. Time, 0:48½. French mutuals paid, \$9.20.

Same day—Club Purse, \$250 for all ages, \$50 of which to second. Three-quarters of a mile.  
Alexander Stables' cb g Lloyd Daly, 3, by Kyrle Daly—Leveret, 104 lbs; (Martin) 1  
Eugene Leigh's br m La Belle N., 6, by Reform—Megara, 100 lbs; (Kiley) 2  
Marvin & Douglas' b b Lycurgus, by Billet—Easter Monday, 118 lbs; (Spalding) 3  
Ed. Corrigan's cb m Gilt, 4, by fom Sawyer—Agnes, 113 lbs; (Witbers) 0  
John Forbes' ch b Disturbance, aged, by Terror—Lucy, 120 lbs; (Gilles) 0  
J. B. Haggins' cb m Premium, aged, by Castor—Flying Cloud, 116 lbs; (Deary) 0  
John Mason & Son's b m Eva K., aged, by John Morgan—Lottie Daswell, 115 lbs; (Turner) 0  
Time, 1:15.

Pools: Gilt, \$175; Disturbance, \$100; Premium, \$65; La Belle N., \$40; Eva K., \$13; field, \$20. Books: 4 to 5 against Gilt, 2 to 1 against Disturbance, 3 to 1 against Premium, 4 to 1 against Eva K., 5 to 1 against La Belle N., and from 7½ to 10 to 1 against each of the others.

At the drop of the flag Eva K. went to the front, Lloyd Daly second, Premium third. At the half, Gilt was fourth, Disturbance fifth. At the half Eva K., Lloyd Daly, Gilt and Disturbance were all bunched, but in the stretch Daly came away like a race horse, winning by a length, La Belle N. second, Lycurgus third. Time, 1:15. French mutuals paid, \$155.50.

Dalauy & Ayer's chestnut gelding Harry Rose, while being led around the Sacramento track one day last week, broke away and attempted to jump the fence separating the two tracks. He broke the fence down, badly lacerating one of his flanks with the splinters. The wound was dressed by a veterinary and the horse will probably recover.

Matt Storms, the well known trainer of racehorses, present unengaged. He may be addressed at this office.

Trotting Necrology.

[Turf, Field and Farm.]

Below we give a record of the more prominent trotting-bred animals that died during the year 1883:

Ahdallah West, ch h 1877, by Allie West; dam Miss Coont (dam of Wilson, 2:16) by Clark Chief.

Happy Traveler, h h 1873, by Hambletonian Prince; dam Lady Larkin by Little Jack. Record of 2:27 in 1881.

Idol (Akers' formerly Peck's, b h 1855, by Mambrino Chief; dam by American Eclipse. Four-year-old record of 2:41, and sire of Don, 2:22, John R., 2:23, Barbara Patchen, 2:24, etc.

Keno, b g (pacer). Record of 2:30.

Lady Bowman, h m 1879, by Bourbon Chief; dam by Colossus. She was the dam of Pickard, record 2:18.

Lady Martin, h m by Dowling Abdellan. Record of 2:23 in 1883.

Lady McNair, gr m (about 1860). She was the dam of Rose of Washington, record 2:21.

Majolica Maid, b m 1878, by Startle; dam Jessie Kirk by Clark Chief. She was a full sister to Majolica 2:17, and very promising.

Mamie B., h m 1868, by Edward Everett; dam St. Lawrence Maid, (Commodore Vanderbilt's favorite road mare). Being owned by Mr. Robert Bonner she was never on the turf, but frequently showed trials in 2:29.

Mand R., b m 1876, by Gooding's Champion; dam Lady Ross. Record of 2:34, but could beat 2:30. Burned to death at the Pittsburg Fair Grounds, September 23.

Pemherton, br b 1873, by Farnaugh, Jr.; dam by Dirigo. Record of 2:29 in 1879.

Pulke Dot, ch m 1878, by Pocahontas Boy; dam by Blue Bull. Record of 2:28 in 1883. Burned to death at the Pittsburg Fair Grounds, September 23.

Pride, h f 1880, by Buccanear; dam Lightfoot by Flexail. Yearling record of 2:44 and a two-year-old record of 2:33.

Slow Go, m g (about 1865), by Sharatack, Jr. Record of 2:38 in 1877.

Sam H., gr g 1876, by Swigert; dam by son of Ethan Allen. Record of 2:32 in 1882.

Sue Dudley, b m 1858, by Alexander's Edwin Forrest; dam Madama Dudley, by a Bashaw horse. She was the dam of Hambrino Dudley; record of 2:22.

Tom Walter, ch g, by Gray Messenger. Record of 2:29 in 1873.

Geo. Kinney's Fast Mile.

As to the card of the day it was excellent. The opening event was a spin of a mile, for which seven came out. George Kinney, with 7 lbs. off, was favorite, of course, and Breeza, 17 lbs. off, was at first second choice, but Donohue's party backed Stratspey so determinedly that he was soon selling close up to Kinney, as well as he might, his form at Jerome Park on the 6th, being acknowledged high. Duplex was strongly supported. The fact is, that while Kinney was a good favorite, the others were backed with a greater amount of money than would seem proper to lay against a horse of Kinney's acknowledged merit. The public feeling in regard to the race was a queer kind. While they looked for Kinney to win, the fact that the phenomenal luck of the Dwyers had seemed to have deserted them, led them to think that Kinney's defeat was not altogether an improbability. The horse had not shown out quite as brilliantly in public as he might have, and the belief seemed to haunt many that the tide which had seemed to set against the Dwyers would reach its ebb with the grand comp, which should lay the Withers, Belmont, and Kenner winner of 1883 low.

How they were mistaken in this, the result of the race proved. Kinney was slow to join his horses, and was standing when they got away, and before they had gone a furlong he was fully eight lengths behind the leader, while the flyers, Breeza and Markland, cut out the work from the very outset. The pace was now fast. At the end of half a mile Markland led, with Breeza at his heels, in 49 seconds, Kinney having worked into third place. Making the turn the pace became killing, Markland leading, but at "The Woods" Kinney shot to the front and led, but Donohue was working like a beaver on Stratspey, and heading Kinney as they swung into the straight, passed him, and the whole stand rose and began to shout. There was only a furlong to go, and Stratspey was in front. It was a case of do or die, but McLaughlin was equal to the emergency, and rising in his stirrups, began flogging Kinney. Talk of his being a quitter? He fairly rose out of the ground, and, with a bull dog courage, forged past and beat Stratspey three lengths, amid considerable applause.

When the time was hung out, showing 1:41, it took the crowd like an inspiration, and there was a rattle of applause all along the stand, and a rush was made for the paddock, where Kinney received a popular outburst as he returned, a trifle blown, but out otherwise as good as gold.—N. Y. Spirit.

The Plunger's Stable.

Mr. Walton brought over eight, viz.: Giroffe, Sutler, Mr. Pickwick, Deceiver, Hopful, Richmond, Wagner, and Herold. His two year-old, Hambleton, was claimed in a race previous to leaving England.

Richmond is one of the finest race-horses we ever saw. He is a three-year-old chestnut, somewhat the shade of Rataplan, the Emporium winner, whom he greatly resembles, only that he is a heavier-muscled horse, and of a darker shade. He has a large star and snip, right fore and left hind pasterns white. His head is a model, and his neck is as deep as a board, with grand shoulders, the points of the scapula and humerus standing well out, and he has a great brisket, with ample depth in the haart. His back is perfect, and his barrel one of the best ever seen, coupled closely, and with great full flanks. His only defect is that he cuts off rather short behind, but his hips and quarters are enormous, and he is as wide as a barn-door when you lift his tail. His stifle development is wonderful, and he has tremendous gaskins. His knees and hocks are large and well formed. He shows marks of a crib on his off hock. He is a son of Bold Dayrell (son of Wild Dayrell), from Miss Harriot, by Kettledrum; 2d dam Tha Doe, by Turnus; 3d dem The Fawn, by Venison. Hence, as will be seen, he is a horse of the most royal breeding. Last season he won three out of eight races, the Anglesey Plate, at Four Oaks; the Stanley Stakes, at Epsom, and the Herdwick, at Stockton, beating St. Medard and others. He was a good fourth in the City and Suburban the past Spring, but was unplaced in the Derby. Richmond is one of the highest type of the modern racer, as he joins to a bloodlike outline the most heroic mould of bone and muscle, and his importation will be of lasting benefit to the blood of the country.

Giroffe looks badly. She does not look like a mare that has eaten well, and is in sad contrast to the flyer of '82, whom race-goers remember, as she came out, buoyant in health and spirit, to cut down Eole, Barrett and Monitor with that stride, as elastic as the English bows on the field of Cressy. There she stood, hack in her old home once more, after a lapse of fourteen months, among a people who worship her as fondly as ever the Northumbrians did old Beeswing of yore, and it seemed that the distant vesper bell of the village church, as it rang out on the evening air, was glad again that Fordham, which had cherished her since the day she was playing at Ratan's foot, had reclaimed its darling.

Of the horses in Mr. Walton's string it may be said they are a decidedly good lot, with more bone than we are accustomed to see in English horses, and seem to have been carefully selected. Mr. Pickwick, six years, is a bay horse, by Harmit, from Tomato, by King Tom. Tomato, won the One Thousand of 1864, and her dam, Mincebeat, the Oaks of 1854. Hence, in addition to his Hermit blood, Mr. Pickwick is a monstrously high-bred one. He is a plain looking bay, of the Glenelg stamp, and a most useful-looking horse. Hopeful is a chestnut colt, three years, by Uncas—Fair-weather, by Master Richard. He is a big, lengthy, angular fellow, with a blaze and left hind heel white, and has a speedy look. Sutler, by Pace or Vancresson—Barbillone, is a nine-year-old brown horse, with a star. He is a horse which would remind old race-goers of Climax, but is an animal of excellent parts, a fine hack and big arms, with great width across the hips. Deceiver, by Wenlock (winner of the St. Leger and son of Lord Clifden), from Boot-and Saddle, by Trumpeter; 2d dam Rinderpest, by Alarm; 3d dam Adine, by Slave, is not only splendidly bred, but is exceedingly racelike. He is a yellow bay, with black points, and is a horse of great length, with excellent hack ribs. Wager is a son of Prince Charlie—Duchess of Malfi, by Elland; 2d dam Duchess, by St. Albans. He is a two-year-old, a black, with star and snip, and is a colt of great size, but is rather leggy, besides being sway-backed. Harold is a two-year-old, by Reverberation—Lady Blanche, by Voltiger. He is a chestnut, with a blaze, very neat looking and lengthy, but has not done well.

Mr. Walton's horses will remain at Jerome Park for some time. They will be trained by "Top" McAdam, formerly with Sneider's stable, and will then be taken to Monmouth Park, and will no doubt be seen there in August. They have certainly stood the trip across the ocean well, and, with the exception of Giroffe and Harold, are ready to go to work at once. It is quite likely that Eph. Sneider will take Giroffe and prepare her for her Autumn campaign, as she is a hard mare for one who does not know her, and Eph's long experience with her here will no doubt bring her out again if she has not lost all form.—N. Y. Spirit.

Walter Welch.

With peculiar tenderness and regret I note the death of Mr. Walter J. Welch, on Saturday last, at his residence in this city, for I have passed many pleasant hours in his company, and will forever miss his exuberant kindness, his enthusiastic business talk, and his entertaining reminiscences. Although an Eastern man, he went to California in the early days of the gold fever. Only a few weeks ago he was telling me of a hairbreadth escape he had in recovering his horses from a corral in which they had been driven by a Mexican and an Indian. He made and lost two or three fortunes, and shortly before leaving California was proprietor of the Oakland Trotting Park. On arriving in New York he plunged into the turbulent sea of speculation with varying success, and shortly before his death was actively engaged in forming a company to supply San Francisco with water, and he assured me "there was millions in it," also in promoting the Hathaway Printing, Telegraph, and Telephone Co., which he was confident will supersede the present telephone system. Like many men of speculative mind, he took to horses, and at the time of his death had Jim Renwick engaged at Sheepshead Bay, and owned the very promising young trotting stallion Income, by Inheritor. But the struggles and toils, the weariness of brain, nerve, and head which a man of his organization undergoes, broke up a constitution by no means strong, and his spirit took flight to a better land. Peace to his ashes.—Veritas in N. Y. Spirit.

The juvenile appearance of the driver of Boston Davis in the 2:30 trot at the Indianapolis races last Tuesday attracted the attention of every one, especially the ladies in the grand stand, who made complimentary remarks about the gentlemanly demeanor of the straight figure dressed in a tidy suit of Navy blue. A few old-time habitués of the turf recognized in the pilot of Boston Davis, the well-known knight of the ribbons, O. Dimick, the most aged living driver of American trotters and pacers, having passed his 74th year. Temperate habits and an iron constitution have served him well, and his appearance of a well preserved man of forty or less. As he belongs to the honest school of Hiram Woodruff, a clear conscience has enabled him to sleep soundly, and this, too, has added to his lease on life.—Western Sportsman.

The Get of Grinstead.

[Tom. Merry, in Oregonian.]

From Chicago comes the unwelcome rumor that bad luck has overtaken both Mr. Baldwin's and Mr. Haggin's stables; that Lucky B. has a quarter crack and Marc Daly some other ailment of the foot, and that Fallen Leaf, believed by the best judges to be the best three-year-old filly in America, has strained herself at exercise so badly that she will not be able to start for the Derby to-day, (this is written on Saturday), but will be obliged to pay forfeit and leave the race to be contested by Audrian and Venture, with Modesty not far off. I sincerely hope this is untrue, as the mare has had about ten days to round to since my informant wrote. If Fallen Leaf can win the Illinois Darby, with a penalty of five pounds for winning the Glidelia stake at Latonia, it is worth \$20,000 to California, outside of whatever her owner may win, the stake or his outside bets. In Kentucky and Tennessee the average price of thoroughbred yearlings, at auction, is over \$350, while in California it is a difficult matter to average \$250 for large and well-grown two-year-olds. Mr. Baldwin's stallion Grinstead was bracketed as a winning sire twice in one day at Chicago, this week—Gano and Fallon Leaf being his representatives; and this is an honor that has never before fallen to any California stallion. Grinstead was a great racehorse, and looked more like pictures of English racers than any horse I ever saw. Of his ability to go four miles I never had a doubt, notwithstanding his defeat by Wildidle, in the Wise Plate. He had a good lead of half a length at the head of the stretch, and was apparently winning easily from the big horse who had cut out all the work. All of a sudden he fell back, and Wildidle crossed the wire three lengths ahead.

I have no hesitancy in saying that for the number of his colts that have appeared on the turf, Grinstead has done as well as any grandson of Lexington through the male line that has yet been kept for service in America. And should his get prove victorious elsewhere through the Eastern campaign, it will have the effect of selling untried sons and daughters of Grinstead to go East. Just now Mr. Theodore Winters is offering for sale at auction some eighteen or twenty head of thoroughbreds, of which seven are yearlings, while three of the older ones are already bracketed as winners; and one of them is, in my belief, the best hurdle mare in America. Now it is a good bet that Mr. Winters does not average \$250 per head for the lot, whereas if he were to take them back East and sell them at Saratoga during race week, he would probably get enough over twice that figure to pay the railroad freight. The truth is that California has such mild Winters that horses keep on growing all through December and January, whereas in New York and New Jersey they have all they can do to keep a horse alive during those months, and his growth is entirely suspended. In California, on the contrary, a two-year-old will attain 15½ hands easily in the Spring if properly wintered as a yearling. When Gano won the rich Eclectic Stakes at Baltimore in 1882, Governor Bowie filed a protest to the effect that the colt was being run under his true age, and called for an examination. Veterinary surgeons were summoned, who decided that Gano was a foal of 1880, and no more. The old Governor, being President of the Club, then ordered the stakes to be paid over to Mr. Baldwin, who told his groom to bring out Lucky B. who was of the same age as Gano, and over an inch taller. The Governor walked off with his hat pulled down over his eyes, while Bill Bird's melodious voice was heard to sing:

"De elephant walks de rope—  
Flewy Andy John!"

Stock Exhibition.

The horse breeders of San Luis Obispo made a very creditable exhibition of their equine stock in front of the court house in this city on Tuesday last, the 1st inst. The exhibition was in competition for medal premiums offered for thoroughbreds, draught animals and roadsters. Stock was present from all parts of the country and the contiguous regions of Santa Barbara. Following is the list of medals given: Best thoroughbred, Sir Edgerton, Edmund Watkins; best trotting stallion, Altoona, Geo. Steele; best draft stallion, Fullon, James Guthrie; second best draft stallion, Norman, T. Salisbury; best draft mare J. L. Oiler's; second best draft mare, John Price's; best span roadsters, Geo. Steele; second best span roadsters, R. S. Brown; best snoking colt, J. Pennington; best work horses, C. H. Jespersion; best yearling colt, Wm. Ryan; best two-year-old, R. Elliott; best mare and colt, C. L. Woods; second best two-year-old, V. Hansen; best trotting colt, Phil Ready's Farnell, a magnificent animal. The medals are now being engraved by Mr. Geyer of this city.

In an examination of the stock we were particularly pleased with the young stallion, Sir Edgerton, which looks like a racer of speed and endurance; also a mare by Belmont and colt by Silver Duke belonging to John L. Oiler. The mare is one of the last of the direct descendants of famous old Belmont, the sire of some of the best racers of California, and the colt, although but a few months old, looks as if he could already haul a drayload. The prancing and handsome steeds were admired by all, but a little incident occurred that threatened to mar the pleasures of the exhibition. One impatient colt threw out its heels while flourishing in the crowd, and they came in contact with the breast of Mr. C. H. Jespersion, knocking the breath from his body and stretching Mr. J. upon the ground. He was taken into the Eagle Hotel where restoratives were applied and the gentleman soon recovered. We hope the exhibition will lead to others and to a complete Agricultural Fair. Mr. A. Pennington, Secretary of the Agricultural Society, will give orders for medals to those entitled to them.—Tribune.

"Broadchurch," the Western commissioner of the New York Spirit, in his report of the racing at the Chicago Driving Park, has this to say about Fallon Leaf: "The noteworthy events of the opening day were the easy victories of the two California cracks, Fallen Leaf and Gano. They simply ran away from their company, the performance of the daughter, of Mollie McCarthy pretty clearly demonstrated that she is the best three-year-old of the year, regardless of sex or section. The company was nothing extra, it is true, but Mona had easily vanquished nearly all the available three-year-old fillies of the West, and it was thought, by some shrewd judges, would be able to give the California filly a race in the Illinois Oaks. Just imagine how Luke Blackburn used to dispose of inferior company, and you can tell how Fallen Leaf ran away from Mona. She actually passed under the string in an easy gallop, I might almost say canter, and that, too, in the fast time of 2:11, with stake weights up. Mollie McCarthy, in her palmist days, never saw the time she could hold her own with her sensational daughter. The latter is simply an equine wonder. Her performance on Friday was the more remarkable when it is borne in mind that she had been a trifle off after her Covington races, and had not entirely rounded to."

## Smuggler as a Sire.

Ever since Smuggler made his unequalled stallion record of 2:15, at Utica, in 1876, he has been doing service in the harem. He was then only ten years old, and sound in every respect, with the single exception of the ankylosis of his off fore ankle. It was, therefore, expected, that he would give to his progeny not only the inheritance of his great speed, but his physical soundness, his enormous great constitutional stamina, and the exuberant vitality of his matured horsehood. Eight years have passed. Smuggler is now eighteen years old, and many record hunters have been confidently predicting that, as a sire, the greatest performer on the turf is a failure. Like all over-confident predictions, this will promises to be sadly out of tune. Previous to last season there was a somewhat beggarly showing. Only his son Humboldt had made a record of 2:33, and a mare by him, in her four-year-old form, had won her race in 2:30. But last year his promises as a sire began to be realized. The beautiful mare Smuggler's Daughter, out of a Mambrino Chief mare, made an easy record of 2:29. While thus early in this season his handsome son Revenue won his maiden race at Columbus, Ind., making a record of 2:32, and the 3:00 race at Chicago, best time 2:34, and scored, at the same place, within a few days thereafter, his best record of 2:28.

The week previous, his equally promising son, Young Smuggler, gained a record of 2:29, at Washington. When last season had well nigh passed, Smuggler had no son or daughter within the standard list. Now he has placed three there, with many more promising ones, to prove the possession of great speed. This is certainly coming on with great rapidity for a sire that has been pronounced a failure. Like their sire, his entire sons seem to be gifted with phenomenal speed. Revenue was not trotted in his class last year, simply because Phallas, Duquesne, Majorca, and others had shown so much speed as green horses, that he was not forced to compete with them. But he was a looker on in Venice. While traveling with his stable throughout the circuit, he made an exhibition trot last year, at Cleveland, of a half mile in 1:07, and had then trotted full mile trials in better time than Flora Temple's best record. Moreover, his action was marked with the same earnest, powerful stroke that distinguished his sire.

Young Smuggler has done almost as well this Spring. After his successful race, he trotted over the Ivy City course a public trial in 2:20. These are wonderful trial miles for untied horses, and revive the recollection of the sensational trials their sire Smuggler made when Col. H. S. Russell gave forty thousand dollars for him. Young Smuggler is eight years old, while Revenue is his junior only a single year. It seems highly probable that not only will the trotting season of this season prove to be two entire sons of Smuggler, making records better than 2:20 during the first year of their debut on the turf, but that either one or both will endanger the champion stallion record of their sire.

It will be noted that these three performers are of diverse lineage on the side of their dams. Smuggler's daughter, it is thought, has the most royal breeding, as her dam came from the loins of Mambrino Chief, and his daughters have dropped such performers as Director and Thorndale. Revenue is out of May Day, by Daniel Lambert. She could trot below 2:30, but her repeats were not praised as very creditable. The dam of young Smuggler is Parepa Rosa, by the Canadian Andrew Johnson. Their size is commanding, approaching to sixteen hands, and their action strongly resembles the powerful stroke of their sire, while their earnest resolution and great ambition to forge ahead reminds one of the peculiar ambition of their great sire in his famous contests with the kings and queens of the trotting turf. Smuggler was so richly endowed with speed and endurance, in addition to being an inbred pacer, that great predictions of his success in the harem were expressed by many turf writers, on the principle that, like the inbred pacer Blue Bull, he would send to the turf a great many trotters. Other authorities, who believed in trotting prepotency as the result of a long trotting lineage, claimed that Smuggler's gift of trotting was simply an accident—a freak of Nature—that would not be transmitted. Both of these predictions will doubtless prove to be extreme. Inbred pacer sires may occasionally produce great trotters, but not with the remarkable frequency of Blue Bull, who was not only exceptionally great among the pacers, but in the long lists of richly bred trotting sires. But Smuggler's capacity to trot fast was not an accident. His sire, Blanco, was the son of Iron's Cadmus, who not only produced, in Southern Ohio, a race of elegant road horses, but many superb track horses, like the model, John Paul, who trotted a full mile in 2:31, over the Buckeye Course, while his daughter, the superbly crested Pocahontas, not only produced Mr. Bonner's Pocahontas, that has shown a full mile in 2:17, but she is the dam of Tom Rolfe, that sired Lady Rolfe, whose six-year-old trotting record is 2:22, and of many others of recent turf renown.

The fact is apparent to any student of the best representatives of the Cadmus family that, like the Clays, their fame does not rest so much upon the great numbers of their performers, as upon the great excellence of their lesser number of turf celebrities. Now and then, only occasionally, does a descendant of Cadmus, like the great Pocahontas, and then the great Blind Tom, and then the great Smuggler, and then the great Buffalo Girl, appear on the turf; but their individual greatness is always sufficient to electrify the turf community. We would not have been disappointed if Smuggler had thus followed the peculiarity of the Cadmus family; yet he bids fair to eclipse any descendant of that elegant thoroughbred horse in the frequency of his great performers on the turf. When Phallas and Director, during the same year, trotted in 2:15 and 2:17, respectively, the turf journals rang with all hail to the great sire Dictator. If Smuggler's two sons accomplish the same feat this year, it will certainly redound more to his credit, because he is simply pacer-bred and has not the reinforcement of a grand trotting lineage as an heritage to his offspring. The showing would be largely in favor of Smuggler, also, in respect to age, for Dictator was twenty when his great sons appeared, while Smuggler is only eighteen. Then, it must be remembered, that Smuggler did not enter the harem till after he was ten years old, while Ryadyk's Hambletonian was a sire at three years of age, and many others of his sons, including Dictator, began their careers at equally early years of their childhood. The sons and daughters begotten by Smuggler during the first two or three years of his career as a sire, are just now making their appearance on the turf. If these introductory performances are an earnest of their future success, then Smuggler will certainly, in the course of a few years, rank among the greatest of trotting sires in turf history.

The trotting journals occasionally mention others of his produce that evince fine promise. If they result in successful fruition, then it will demonstrate not only that the acquired habit of trotting can be as certainly transmitted as the inherited predisposition, but that thorough, yea, extreme development of physical capacity, which results from ex-

haustive campaigns of trotting races, does not impair the procreative vitality to reproduce both speed and endurance, provided the developed sire is retired before old age has brought upon him the decrepitude of natural decay. In many points of view, therefore, the stud career of Smuggler is an interesting study, and will be followed by careful students of the trotting problem with great eagerness. If it terminates with anything like the success of George Wilkes, then development of speed, even in the exhaustive contests of public races, will be deemed in no wise injurious, for two such illustrious examples cannot be regarded as exceptions. On the contrary, they will be cited as proofs that the sire of trotters should be developed to the extreme limit of his capacity in order to reproduce to the greatest extent both his speed and endurance.—S. T. H., in *Live Stock Journal*.

## The Grand Prix.

[Correspondence N. Y. Spirit.]

Now, the first hell rings, and handsomely dressed jockeys hurry into scales. Their top boots are brightly polished; their silken breeches and satin jackets are without spot or stain; their eyes are bright and their faces aglow with eager expectation. Some old in years and experience, like Tom Cannon, who has already won four Grand Prix races, and is to mount the favorite in this one; others young, but already great in their calling; one or two mere boys, fresh from the stables, to whom their masters are giving a realization of their life's dream—a chance to win the Grand Prix. In the paddock impatient steeds being saddled; three-year-olds so nervous and restive that it is about all the men can do to get them prepared; others take the matter more quietly, and patiently submit to the last details of their toilette. Now jocks are legged into pigskin, and the glossy thoroughbreds are cantered in front of the stands. Proudly the riders sit in their seats, looking neither to the right nor to the left, only intent on the movements of their mounts. They canter up for a furlong, and the slowly return towards the starting point. This is the all-important moment, and a feverish love of sport animates the whole crowd. People who know not the difference between a thoroughbred and a Percheron become all of a sudden vastly learned on size, style, form, symmetry, and make free and unrestrained comments on the going of this or the action of that animal. The ladies pay more attention to the colors of the riders, and make up their minds according to the shades and combinations of their silken attire. The starter lets the flag fall, and, as one horse, the satin-coated racers spring forward, while a mighty shout goes up from the vast multitude. Past the old windmill, crowded with people who love to take their pleasures picturesquely; pass the cascade, where crowds of people are continuously coming and going; behind the bushes and up the hill towards the village of Boulogne; around the bend by the Saint Cloud end, and headed now towards the hay ricks, towards the omnibuses, the "ring," the grand stands, the private tribune of the President of the Republic, our coach and all the rest of the world, Little Duck—little darling for me, as I have drawn his name in two sweeps—leading the lot a hundred feet and more; and it could have been a hundred yards if Tom Cannon had been minded to let the favorite "ace 'is 'ed," as a bold Britisher said in my hearing. Of course, there was great cheering, and Cannon came in for quite a reception on his return to weigh in after the race was over. As soon as I could I asked him if anything had occurred during the run worth talking about. "Nothing in the world," he replied, "except that I took the lead when I wanted it, and I kept it to the finish. As soon as ever we got past the windmill, I knew I 'ad 'em; and so I did." The Duke de Castries made Cannon a present of \$800, and now to the names of Ceylon, Treut, Thurio, and Frontin he can add that of Little Duck, fifth of the lot, which, between his legs, has won the Grand Prix de Paris.

This result gives the French a good lead in the international contests now going on these twenty odd years. I have told you, more than once, I think, of how the Grand Prix originated; but did you ever hear of the rather curious quarrel which the French and English had, back yonder in 1862, over this same race? There was a difference of opinion as to the day on which the race should be run. Sunday was picked out by the French as being most in accordance with national habits; but the idea of allowing their horses to run on the Lord's day so shocked Englishmen that their Jockey Club opened a correspondence with the French institution of the same name, begging that the race might be changed to a week day. As the French firmly declined to yield, the English accused them of seeking to keep their promise to the ear and break it to the understanding, by making it impossible for the Sabbath-keeping English to compete for the \$20,000. The French declined to be hulled into changing the day, and they had the satisfaction of being able to console themselves over the defeat of their champion, La Toques, by the English crack, The Ranger, by sneering at the hypocrisy of the English, for out of the twelve starters on Sunday, May 31, 1863, no fewer than five belonged to the God-fearing islanders.

I am quite sure that if La Toques had won, the English would have declared that their defeat was a judgment of the Lord; as the race went in their favor, they pocketed the money, and came to the conclusion that Sunday horse-racing in France was one of those venial sins at which the Almighty winked out of charity for a people that did not know any better. Ever since that day not a Grand Prix has been run without there being one or more English horses in the race, and eight times in twenty-one they have won it. Including to-day's race the French have won eleven Grand Prix; once a Hungarian horse came in first, and, in 1881, the famous American colt Foxhall added it to his other laurels. A few years ago another dispute arose between English and French sportsmen. The former claimed that the French Jockey Club ought to amend their rules so as to allow English horses to run in all important French races. The French couldn't see it in that light, and then a certain set of Englishmen made a howl for reciprocity, and threatened to make reprisals. In 1876, Lord Falmouth gave notice of a motion, to come before the Jockey Club the following year, to exclude foreign horses from all "weight for age" races, and an active controversy ensued. In April, 1877, Falmouth's motion was adjourned to the Houghton Meeting, and, eventually, it was allowed to drop. Perhaps his successes in 1877, which placed him at the head of winning owners with more than \$170,000 to his credit, had something to do with Falmouth's willingness to let his motion slide, and, at all events, the French had some grounds for their assertions that the victories of their horses on the English turf had a great deal to do with the sudden desire exhibited by some Englishmen to warn them off. The controversy also demonstrated that the noblemen and gentlemen of England no longer regarded horse racing as a "sport of kings," to be carried on *en grand seigneur*, but, to quote Falmouth's own words, as a matter of hard business in which

British interests are involved. This "Reciprocity Question," therefore, marks an important era in the history of French horse racing, for, if it showed that the French did not relish the idea of being excluded from the English turf, it also proved that they had reached a period when their thoroughbred stock was able to compete on equal terms with that of England. A few years later a French sire, Flageolet, was able to command the highest price ever paid for the services of a stallion, the \$1,000 demanded for the peerless Stockwell when at his best not excepted.

## A Queer Race.

The 2:28 race at Narragansett Park, Providence, R. I., on June 30th, was a rather remarkable one. There were seven horses to start, but after six heats had been trotted, the third heat of which was made in 2:22 and declared "no heat," Lizzie M. was found to be the only legitimate starter in the race, and therefore had a walk-over for the final heat. The balance of the horses were either distanced or ruled out under the rules, which state that a horse not winning a heat in five retires to the stable. R. F. C. showed up in his usual fast form in the first two heats by capturing both very cleverly, Breeze Medium being second. In the third heat Lizzie M. and R. F. C. made a close finish, with John Love in no better than fifth place in a field of six, one of the horses being drawn after the first heat. By some mistake the judges took John Love for Lizzie M., and announced a dead heat between Love and R. F. C. The driver of John Love ran up excitedly in the stand and claimed that he was no better than fourth or fifth. After talking the matter over the judges came to the conclusion that there was a mistake and announced a dead heat between R. F. C. and Lizzie M., and then Scattergood, the driver of the latter, strongly protested. This placed the judges in a fearful quandary. They appeared to be like fish out of water. As a last resort they called all the drivers into the stand. All hands talked the matter over, and at last the judges decided it "no heat." This appeared to take with the drivers better than a dead heat, for the 2:22 in that event would have been declared a record.

In the next heat R. F. C. held a winning advantage to the distance post, when he stopped and staggered and the blood poured out of his nostrils. He came down to a walk, and Lizzie M. passed to the front and won. The fourth heat was awarded to John Love, after a sharp finish with Lizzie M. and Breeze Medium. In the fifth heat, which proved to be the deciding heat, Haight, the driver of Black Prince was adjudged guilty of foul driving on the stretch and was distanced, much to the disgust of those who hacked him. It appeared there was a side bet between the drivers of Bonnie L. and John Love, and at the conclusion of the last heat the former stopped his horse below the wire, near where Mahoney, the driver of John Love, was "rubbing down" between rests. When the latter came up a shout was heard, and one of Love's "rnhlers" was seen trying to tuck his weight, wrapped up in a blanket under Mahoney. Accordingly the judge distanced the horse and expelled him and his driver. Subsequently the judges announced that they had changed their decision on the John Love affair and reinstated the horse, but distanced him and fined his driver \$100. Lizzie M. won the heat, and as Bonnie L. and Breeze Medium had not won a heat in five, Lizzie M. was the only horse allowed to start in the next heat, and she was declared winner of the race.

## Lake District Fair.

The fair of the twelfth district will be held at Lakeport, September 23d to 26th inclusive. The following is the speed programme:

First day—No. 1. Running Race—Purse, \$50—half mile dash for 2-year-olds.

No. 2. Running Race—Purse, \$100—three-quarter mile dash. Free for all in the district.

No. 3. Running Race—Purse, \$100—mile and repeat for untied horses.

No. 4. Running Race—Purse, \$100—mile heats, 3 in 5. Free to all in the district.

Second day—No. 5. Running Race—Purse, \$100—half mile and repeat, for 3-year-olds.

No. 6. Trotting Race—Purse, \$100—mile and repeat, for 3-year-olds.

No. 7. Trotting Race—Purse, \$100—mile heats, 3 in 5; 3 minute class.

Third day—No. 8. Running Race—Purse, \$200—quarter mile dash. Free for all in the State.

No. 9. Trotting Race—Purse, \$200—mile heats, 3 in 5. Free for all in the district.

No. 10. Trotting Race—Purse, \$100—mile heats, 3 in 5; for four-year-olds.

Fourth day—No. 11. Ladies Riding—best lady rider, \$5; most graceful lady rider, \$5; best lady hare back rider, \$5; fine ladies' riding whip to each lady rider.

No. 12. Trotting Race—Purse, \$50—mile and repeat, double team to road wagon.

No. 13. Saddle Race—Purse, \$50—Free for all saddle horses in district, one-half mile.

Entrances 10 per cent; 5 to enter, 3 to start. Races to close at 7 o'clock the evening before the race, with Jno. R. Cook, Secretary, Lakeport.

## A Contract Terminated by Death.

The Portland *Oregonian* of June 29th, gives the following particulars of the business arrangements connected with Jim Renwick's journey East:

Levi Knott and wife left here for New York on Thursday's train, intending to put in a month at Saratoga and Long Branch before they return. The cause of his sudden departure for the opposite side of the continent is the death of Walter J. Welch in New York some time last week. Welch had leased the racing qualities of Jim Renwick for \$2,500 a year, and was to advance the moneys for transportation of the big horse across the continent, which he did. As soon as he won a race with him he was to remit Mr. Knott the entire amount due for rent of the horse, which he did not do. The horse having won two or three races while Welch was too ill to win anything on him, and Buchanan, the trainer, had no money at his command with which to back the animal the outsiders were winning all the money. Hence Mr. Knott thought, as he was getting nothing for the use of his horse and his trainer could not even win his expenses, that he would go on and either bring the horse back or sell him in New York, or else lease him to some parties who would be willing to pay their rent in advance. Jim Renwick is a handy horse in almost any sort of company. Under a mile he can beat seven horses out of ten, on a good track; and up to a mile and a half he can win all three times. Winter in the out-of-the-way tracks in the G. & N. Knott should have no difficulty in selling his horse for \$5,000 East.

Major Beck's Jerseys.

The following is the catalogue of the Jersey cattle to be sold at auction, at Sacramento, on the 17th:

BULLS.

- No. 1—Hamlet. No. 20 Pacific Coast Jersey Cattle Club Register. Dropped March 13, 1882. Sire Buffalo Bill, No. 17 P. C. J. C. C. R. Grand sire Keystone, No. 3191 American Jersey Cattle Club Register. Great grandsire Touchstone, No. 315 A. J. C. C. R. Dam Pauline, (hy Touchstone), No. 15, P. C. J. C. C. R. Grand-dam Dinah 5th, No. 10 P. C. J. C. C. R. Description—Solid dark mahogany brown, black points.
No. 2—Iago. No. 21 P. C. J. C. C. R. Dropped July 24, 1882. Sire Buffalo Bill, No. 17 P. C. J. C. C. R. Dam Murdoch Heifer, No. 1. Description—Solid dark mahogany brown, black points.
No. 3—Cortez. No. 22 P. C. J. C. C. R. Dropped October 14, 1882. Sire Buffalo Bill, No. 17 P. C. J. C. C. R. Dam Murdoch Cow, No. 13 P. C. J. C. C. R. Imported by Messrs. Oront & Beck. Description—Solid dark mahogany brown, black points.
No. 4—McGregor. No. 23 P. C. J. C. C. R. Dropped April 6, 1882. Sire Buffalo Bill, No. 17 P. C. J. C. C. R. Dam Norah, No. 489 P. C. J. C. C. R. Description—Fawn; some white spots.
No. 5—Pluto. No. 24 P. C. J. C. C. R. Dropped December 1, 1882. Sire Buffalo Bill, No. 17 P. C. J. C. C. R. Dam Ida C, No. 22, P. C. J. C. C. R. Description—Solid brown, full black points.
No. 6—Arthur L. No. 205 P. C. J. C. C. R. Dropped December 25, 1882. Sire Buffalo Bill, No. 17 P. C. J. C. C. R. Dam Young Beauty, No. 18, P. C. J. C. C. R. Description—Fawn, very little white.
No. 7—Juno's Son. No. 206 P. C. J. C. C. R. Dropped March 1, 1883. Sire Buffalo Bill, No. 17 P. C. J. C. C. R. Dam Diana, No. 17 P. C. J. C. C. R. Description—Solid very dark brown.
No. 8—Joe Little. No. 207 P. C. J. C. C. R. Dropped April 24th, 1883. Sire Buffalo Bill, No. 17 P. C. J. C. C. R. Dam Ida 4th, No. 9 P. C. J. C. C. R. Description—Solid brown, black points.
No. 9—Prince Charlie. No. 208 P. C. J. C. C. R. Dropped May 24, 1883. Sire Buffalo Bill, No. 17 P. C. J. C. C. R. Dam Jersey Doll 2d, No. 19 P. C. J. C. C. R. Description—Solid fawn.
No. 10—Toodles. No. 209 P. C. J. C. C. R. Dropped July 16th, 1883. Sire Othello, No. 19 P. C. J. C. C. R. Dam Chiquita, No. 491 P. C. J. C. C. R. Description—Solid dark brown, black points.
No. 11—Rupert. No. 210 P. C. J. C. C. R. Dropped August 12th, 1883. Sire Buffalo Bill, No. 17 P. C. J. C. C. R. Dam Murdoch Cow, No. 13 P. C. J. C. C. R. Description—Solid brown, black points.
No. 12—Pet. No. 211 P. C. J. C. C. R. Dropped January 4th, 1884. Sire Buffalo Bill, No. 17 P. C. J. C. C. R. Dam Beauty 2, No. 12 P. C. J. C. C. R. Description—Fawn and a little white.
No. 13—Gen. Scott. No. 212 P. C. J. C. C. R. Dropped February 27th, 1884. Sire Buffalo Bill, No. 17 P. C. J. C. C. R. Dam Pauline, No. 15 P. C. J. C. C. R. Description—Fawn and a little white.

COWS AND HEIFERS.

- No. 14—Murdoch Heifer No. 1, No. 16 P. C. J. C. C. R. Dropped June 1, 1879. Sire Buffalo Bill, No. 17 P. C. J. C. C. R. Dam Murdoch Cow, No. 13 P. C. J. C. C. R. Description—Light fawn. Served by Jersey Duke, April, 1884. Jersey Duke, No. 18 P. C. J. C. C. R. Sire Mouchard; dam Duchess, imported direct from the Isle of Jersey upon the clipper Glory of the Seas. Monarch by the Hayward bull, out of Mr. Hayward's cow. Both imported from the Isle of Jersey.
No. 15—Diane. No. 17 P. C. J. C. C. R. Dropped June, 1879. Sire Touchstone, No. 315 A. J. C. C. R. Dam Pauline, No. 15 P. C. J. C. C. R. Description—Solid fawn, black points. Served by Jersey Duke, No. 18, Nov. 2, 1883.
No. 16—Ida H. No. 21 P. C. J. C. C. R. Dropped July 19th, 1880. Sire Dana Perkins. Grand sire Buffalo Bill, No. 17 P. C. J. C. C. R. Dam Ida 3d, No. 3 P. C. J. C. C. R. Description—Solid fawn; no white. Served by Jersey Duke, March 1st, 1884.
No. 17—Ida C. No. 22 P. C. J. C. C. R. Dropped July 19th, 1880. Sire Dana Perkins. Grand sire Buffalo Bill, No. 17 P. C. J. C. C. R. Dam Ida 4th, No. 9 P. C. J. C. C. R. Description—Solid fawn, no white. Served by Jersey Duke October 10th, 1883.
No. 18—Chiquita. No. 491 P. C. J. C. C. R. Dropped January, 1881. Sire Buffalo Bill, No. 17 P. C. J. C. C. R. Dam Murdoch Cow, No. 13 P. C. J. C. C. R. Description—Dark brown, white spots.
No. 19—Maid of Lorne. No. 20 P. C. J. C. C. R. Dropped 1880. Sire Buffalo Bill, No. 17 P. C. J. C. C. R. Dam Murdoch Cow, No. 13 P. C. J. C. C. R. Description—Fawn, marked with white spots. Served by Jersey Duke September, 1883.
No. 20—Murdoch Cow. No. 13 P. C. J. C. C. R. Dropped 1877. Sire Jarndyce, No. 65 P. C. J. C. C. R. Dam Murdoch.
No. 21—Lida H. No. 492 P. C. J. C. C. R. Dropped January, 1882. Sire Buffalo Bill, No. 17 P. C. J. C. C. R. Dam Ida C, No. 22 P. C. J. C. C. R. Description—Fawn, with white. Served by Hamlet, No. 20 P. C. J. C. C. R.
No. 22—Julia H. No. 495 P. C. J. C. C. R. Dropped May 27, 1882. Sire Buffalo Bill, No. 17 P. C. J. C. C. R. Dam Boston Beauty 2d, No. 490 P. C. J. C. C. R. Description—Solid fawn. Served by Hamlet, No. 20 P. C. J. C. C. R.
No. 23—Grade Cow. Seven-eighths bred. Dropped June 1, 1881. Description—Reddish fawn and white. Served by Jersey Duke.
No. 24—Grade Cow. Seven-eighths bred. Dropped March 17, 1883. Description—Solid light fawn. Served by Hamlet.

OUR NEW YORK LETTER.

Death of W. J. Wslch—Jim Renwick's Fast Race at Brighton—Grsat Sport at Shesps-head Bay—The California Stables in the West—Gnsral Sport-ing News, etc.

Your townsman, W. J. Welch, who has been ailing here for some time, died to-day of consumption. His mining interests have made him quite well known in financial circles, and as the lessee of Jim Renwick, he was equally prominent in sporting circles here. G. R. Buchanan will now run the big chestnut in his own name, and judged by the horse's race, at Brighton, this week, he will win more honors for the Pacific Coast before the season is over. With 110 pounds up,

ridden by Jimmy McLanghlin, he made a show of snob fast horses as Little Fred, Hilarity, and others, winning the nine furlongs in 1:56 1/2. Renwick was ridden a waiting race until the last quarter when McLanghlin cut him loose and won easily. Nine-tenths of the race goes here had made up their minds from the horse's running at Sheepshead, that he could not stay out a full mile, hence it was about 5 to 1 against him in the race at Brighton. Waltou, the Plunger, has brought all his English horses along with Girofle back to this country, and they arrived on Wednesday, by the Wyoming. Suedeker has them in charge at Jerome Park, and they are a fine looking lot, Richmond, the Derby horse, in particular. They will run at Monmouth Park, sometimes in August probably, and are likely to acquit themselves with credit. Girofle is only the shadow of her former self, having lost much flesh.

Since my last letter the Sheepshead Bay course has seen some notable gatherings and many great races, at various distances. Gen. Monroe won the Coney Island Cup, in the mud, from Blue Grass Belle, and the next day was shipped to Chicago, where he will meet the pick of the Western horses, including your Lucky B, Gano, etc., in the Washington Park Cup, and other stakes to be run at the inaugural meeting of the New Washington Park Jockey Club. The Driving Park, at Chicago, began the first Summer meeting yesterday, and both Gano and Fullen Leaf were winners in fast time. To-day, however, Shenandoah was pulled out in the Board of Trade handicap only to suffer defeat at the hands of the Denver horse, Colorado. Fullen Leaf will be hard to heat in the American Derby on Saturday next. In that race she will meet Harding, Bob Miles, Modesty, Kosciusko, and a number of dark ones. If she wins she will be accepted as the best of her age in America. If the two-year-olds that have run at Coney Island, Florio, by Virgil, Richmond, by Virgil, and Wanda, by Mortemer are the best that have shown. A number of others, however, have not yet run and Triton, the Jerome Park winner, is suffering from bad feet which may prevent his running again this season. The Islip stables has been very unfortunate thus far, and with Triton, Monitor and others amiss, the outlook for this great stable is rather a gloomy one. Mr. Wither's Brookdale stable is in equally hard luck. Two purse races, at Jerome, are all that have been credited to the "all black." But its a "long lane," etc.

The Tidal Stakes, one mile, on Thursday, was captured by the dark Rancocas colt, Young Duke, by the Duke of Magenta. A fine big hay, he ran through a heavy track better than any of his competitors, who included the Withers and Belmont winner, Panique. Two days afterward however, Young Duke was again pulled out in the Coney Island Derby, half a mile further, and was beaten with ease by the Erie colt Greystone. The latter, though a light-built grey, plunged away through a stiff, soggy track in game style, and won a hollow victory. His owner, Mr. W. L. Scott, of Erie, Pa., by the aid of Florio, Greystone and Blue Grass Belle, has done well so far this meeting, securing a lion's share of the prizes. Betting has so far been rather light. Since last Fall the bookmakers' quarters have been removed from the south to the north end of the stand, and they now vociferate the odds in a mammoth betting booth, about 200x100 feet in dimension, over fifty book-makers having stands this year. North of this yet is the mutual stand, and off to one side the auction stand. When it is said that all this betting paraphernalia is in constant use on a majority of the days, some idea may be formed of the amount of business done. Very frequently \$500,000 changes hands on a single day's racing, but as said before, the speculation is rather limited as yet. Women are fast becoming great speculators, some of them attending the races day after day, rain or shine, having all the horses' records at their fingers' ends, the same as the oldest sports on the ground.

But as the French proverb says, "a woman can never win with dignity, or lose with equanimity," a trite adage judged by the daily scenes at Sheepshead and Brighton. At the latter course the other day, two low-looking females who were evidently of the demi monde, were engaged in an animated colloquy before a race about to be run, and one of them asked the other within hearing of the persons around, what she thought would win? The one addressed mentioned a horse that was selling in the field, and the questioner straightway hailed one of the uniformed messengers, and sent him for a \$5.00 ticket on the animal spoken of. The race was run and the woman's selection got badly beaten, the horses no sooner passing under the wire than the buyer of the ticket created a sensation by furiously elaborating the other woman over the head with her parasol, the unlucky tip being the cause of her fury. Another woman, who goes regularly with her husband to the sport, was the cause one day last week of her liege lord losing a neat sum. Going over on the boat, the pair were with some friends and all were discussing the day's card. The man of family declared that as he left his house that morning, he met a girl wearing a dress of "blue and polka dots." "Now," says he, "if there is a horse carries those colors to-day, he carries my shakers." Looking at the card Markland in the first race was found to have the colors to an identical dot. The lady now spoke up, "Now John, don't throw away your money on that horse. You know you had the nose bleed to-day and that signifies loss of money. Besides the horse is of no account." The husband like a dutiful sponse deferred to the superior wisdom, and did not touch the race. But when Markland won, with odds of 15 to 1 against him, the couple were at loggerheads all the rest of the day.

Yours, PACIFIC.

Balls Echo and Overman.

At Detroit, Michigan, on June 26th, Belle Echo started in the race for the 2:23 class, and although she did well at the outset she was not keyed up to the requirements of such a bruising hattle as the race proved to be. Following is the summary:

Table with 4 columns: Name, Time, and other details. Rows include Detroit, June 26, 1884; 2:24 class; purse \$700. P. Schatz's b m Fix, by Nutwood; L. M. Titus' ch m Belle Echo; J. E. Turner's br s King Wilkes; G. I. Fuller's b m Almath; E. Rood's b m Adelaide; W. H. Saunders' b g Index; F. L. Noble's b g Gladiator.

The next day, the 27th, Overman won the purse for the 2:19 class, after one of the hardest fought and gamest races ever seen on that track.

Table with 4 columns: Name, Time, and other details. Rows include June 27th; 2:19 class; purse \$800. J. C. Turner's ch g Overman; G. W. Saunders' ch g George V; J. B. McCarthy's b m Zoe B; M. M. Hedge's b g Tony Newell; Andy Coleman's b m Deck Wright.

A half-mile track is being built at Ione, Amador county, and two days racing will be given on the 18th and 19th insts., under the auspices of the Ione Racing Club.

Answers to Correspondents.

Questions answered only through these columns. No replies by mail or telegraph.

W. H. P., Cedarville, Cal.

Please decide the following bona fide bets giving date, names and place. 1. A bet B \$10 against \$90 that the time of 1:43 for a mile running, has not been beaten by three different horses (or mares) in a race or races run on the Pacific Coast previous to 1884. 2. A bet B \$100 against \$50 that the time of 1:42 1/2 has not been beaten by any horse (or mare) in a race run on the Pacific Coast previous to 1884.

Answer.—A loses in both instances. The following, while not all the cases on record, are sufficient to decide these bets. 1. Red Boy, Oakland, Sept. 4, 1882, 1:42 1/2; Nightbawk, Sacramento, Sept. 13, 1882, 1:42 1/2; Joe Howell, Oakland, April 25, 1883, 1:42; Jim Renwick, Oakland, Aug. 18, 1883, 1:41 1/2; Freda (2 years), Oakland, Aug. 18, 1883, 1:42 1/2; Lucky B., Stockton, Sept. 19, 1883, 1:42 (second heat); Shenandoah, (2 years), San Jose, Sept. 26, 1883, 1:42 1/2. 2. See Joe Howell, Jim Renwick and Lucky B. in answer to No. 1.

Oregonian, Astoria, Or.

Who ran the fastest 100-yard foot race, and what is the time? Has Kittlemen and Harmon ever beaten 10 seconds in public? If so, name their time.

Answer.—Several sprinters have run in 10 seconds, which is the fastest authentic time. Kittleman and Harmon have been credited with ability to run in 9 3/4, but have no technical record of that kind. In the race between these men at the Recreation Grounds in this city last Spring, several watchees were held on the run and there is scarcely a doubt but that Kittleman ran in less than even time, but there were no official timers; consequently no record.

G. H. B., Fresno, Cal.

Please inform me, through your paper, the pedigree of Black Ralph; also of G. Valensin's mare, Humming Bird, (pacer).

Answer.—1. Black Ralph by David Hill, dam by Major Winfield, (now called Edward Everett), son of Rysdyk's Hambletonien. 2. We have no knowledge of Humming Bird's breeding except as it is given in Mr. Valensin's catalogue, viz.: by Tecmsch, dam by St. Clair. We have no reason to doubt its correctness.

Constant Reader, Santa Rose, Cal.

What is the market value of a greyhound? What is their fastest time? What are the points of a greyhound? What prizes do they generally offer at coursing races? What counts a point? In what part of the State are coursing races generally held?

Answer.—1. The market value of greyhounds varies with the breeding and quality of the dogs. An average good dog for coursing purposes is worth about \$100. Some can be bought for less, and some command a great deal more. 2. Dogs are never timed in coursing races, as they do not follow any regularly defined or measured track, but good judges estimate their speed to be about that of the race horse, or about 50 feet per second. 3. The points of a greyhound are: Head wide between ears, flat at top, with powerful jaws, but which must not be thick or coarse, but depend for their strength on the muscles at the side of the head. Eyes dark and bright. Ears small and fine. Shoulders sloping and muscular. Chest deep and rather wide. Back square and rather long. Loins powerful and muscular, with outline from conpling to root of tail curved in a true arc of a circle. Forelegs straight and set well under the body. Hindlegs well bent at hocks and muscular. Tail fine, long and curled. 4. The prizes offered are generally sweepstakes, the entrance money being divided into first, second and third premiums. 5. The points of a race are numerous, and it will occupy too much space to give them here. If you will forward a five cent stamp we will mail you a book of coursing rules, with the points enumerated and described. 6. The San Francisco clubs hold their meetings in Merced county.

BILLIARDS.

Pool Tournament.

In regard to attendance and financial success, the fifteen-ball pool tournament at the Saylor Brothers came to a brilliant termination. As it is usual in all tournaments, the weaker players were played in first, leaving an open field for the stronger ones, who in this case came in ball and ball at the finish.

Until the very last evenings Saylor was expected to come out ahead, he having won six consecutive games out of eight that he was to play. However, the other two against Lowry and Anderson proved dangerous issues. The former was first to enter against the favorite, and succeeded in catching him in off play. The initial frame was broken by Lowry, who left Saylor a good opening to begin with, and he pocketed ten balls, the remaining five being held by Kentucky, in his usual neat style. It looked very much as if Saylor was about to treat his adversary as he had already done the others, and the betting was \$20 to \$10 in his favor. The second frame was broken again by Lowry, one ball being out a couple of inches from the rest, admitting of a desperate cut shot and general scattering of the balls. Saylor attempted it and failed to hold the sphere, which stopped in the jaw of the pocket. Lowry downed it, and as he was about to play again he fouled, but the claim was not allowed by the referee, whose attention seemed centered any place else but on the point in question. Lowry continued to play and pocketed thirteen consecutive balls, his opponent getting the remaining two. Had not this oversight occurred on the part of the referee, the result of the tournament would have been greatly changed. Saylor was slightly in the rear, but caught up on the sixth frame, the score standing then 45 balls for each.

Lowry dropped behind after this and on the 11th frame, when Saylor broke the balls, the score stood, Lowry 68, Saylor 82. The former had somewhat of a similar and desperate cut shot left, that Saylor failed on in the beginning of the play. The successful execution of that one shot won the game for "Kentucky," who pocketed 14 straight, followed in the next two frames with 6 and 12.

Summary: Saylor—10, 2, 7, 9, 8, 9, 11, 5, 10, 11, 1, 9, 1. Total 93; lost balls 3.

Lowry—5, 13, 8, 6, 7, 6, 4, 10, 5, 4, 14, 6, 12. Total 100. Lowry had already been beaten by Anderson, who had defeated in turn each of his opponents. The consequence was that the stranger's stock went up as it was necessary that Saylor should beat him twice to capture the laurels. In the meantime Schmeckel met Lowry and defeated him, which placed both those players on an equality and a tie for the 4th, 3d and 2d monies, or 4th and 3d monies according to the result of the Anderson-Saylor play.

On the night when they crossed cues the cosy rooms of the brotbers were crowded to their utmost. Both Saylor and Anderson were reported to be in excellent play, and as they went through the preliminaries of "chalking up" before the game, they were critically examined by the interested spectators, much as trotters are eyed on the track. From the break Saylor managed to lead his opponent who seemed to have completely lost that acnecy of play for which his game was generally noted. His very correct combinations would fail him, and although every few trials he would prove successful with some unlooked for, and by the audience, totally unexpected play, he gradually went to the rear. Saylor seemed slightly "rattled" but all in all, did very well, considering that he won the issue.

Summary: Anderson—3, 5, 4, 12, 11, 4, 7, 6, 7, 7, 4. Total 70; lost balls, 1.

Saylor—12, 10, 11, 3, 4, 11, 8, 9, 8, 8, 11, 5. Total 100; lost balls, 2.

Thirty-six games, the entire number, had been played, which resulted, as the following summary will show, in a tie between Anderson and Saylor for 1st and 2d, and between Lowry and Schmeckel for 3d and 4th.

Table with 10 columns: Name, 1st, 2nd, 3rd, 4th, 5th, 6th, 7th, 8th, 9th, 10th, Total, Lost balls. Rows include Lowry, Schmeckel, Anderson, Saylor, Kieser, Brown, Hunt, Holman, O'Neill.

Anderson was very much put out at losing the final game on account of what he termed his "bad luck," and he was so much more vexed that he had backed himself very heavily. The proposition was made and accepted, the saw-off game should take place there and then. Saylor opened the play with a poor showing, while his opponent played brilliantly; on the third frame Anderson had captured 30 balls to 15. After this, caution was in order, and each played seldom except for safety. This manoeuvre benefited Saylor so that on the sixth frame he stood only 2 balls behind. On the eighth, he went ahead 4 points, and on the tenth the score stood: Anderson 65, Saylor 55.

The issue was getting desperate, and each successful shot was warmly applauded. Anderson played one of his combinations from the bunch, and pocketed fourteen straight. Saylor held the last ball and broke the next frame, leaving a fair opening. Anderson profited by it, held the ball and eleven others, sending his score to 91, against 86. The next frame was almost a repetition of the last, Saylor succeeding in holding but three balls, while his opponent pocketed the necessary nine with comparative ease. Summary: Saylor—4, 6, 5, 6, 10, 13, 5, 13, 14, 9, 1, 3. Total, 89. Lost balls, 2.

Anderson—11, 9, 10, 9, 5, 2, 10, 2, 1, 6, 14, 12, 9. Total, 100. Lost balls, 5.

Schmeckel and Lowry met to play off their tie, which resulted in a victory for "Dutchy."

Anderson and Schmeckel are to leave in a coup'e of days for Los Angeles and way stations, in search of Dame Fortune. It is probable that when they return Saylor's challenge to play fifteen-ball pool will be accepted. Hank Saylor is ready, he says, to back his brother against Anderson for \$250 against \$300; and he is satisfied to have the game take place on a 5x10 table.

The raid which was made a few days ago on the billiard rooms of G. W. Jones, has brought to the public's notice probably the only prosperous resort of the kind open during the Summer months. The institution in question is a novel one, where billiards and pool may be played gratis, providing the player invests in a cup of coffee, this second establishment being attached to the first. The result of this new departure is that eleven tables are in constant use, the players being mostly telegraph boys and others. Gambling, drinking or profanity are strictly prohibited, and it is easily understood that the young ones in many instances are better off there than on the streets. The raid which took place was for selling liquor in a place frequented by minors, and to sneatn the charge, Mr. Jones' private stock, consisting of three bottles of beer, was brought against him. The whole thing was a ridiculous affair, prompted by professional jealousy.

Sol Honigsberg, the one-armed young gentleman who so easily defeated the fifteen-ball pool amateurs for the prize offered by the Exchange some months ago, has gone back to his home in the East.

William Roach is complaining that certain dailies have given accounts of games in which he is supposed to have played and in which he was defeated. He says that he must have "done it in his sleep."

"Texas" Jack, the old-timer who showed up for a couple of days last week, probably thought that the boys were too strong, and has taken to the interior towns.

ATHLETICS.

The Stockton Pilgrimage.

EDITOR BREEDER AND SPORTSMAN:—I have no doubt but that your Athletic Editor will have an exceedingly accurate and concise report this week of the Merion Cricket Club Athletic Sports, at Stockton, on the glorious Fourth, including the precise records by his trusty "flyback," with various commentaries on form, style, etc. But the hard, dry pen of a statistical reporter cannot do justice to a description of a trip like that we all had, and I venture to send you a short account of the excursion, which was not only an innovation for this Coast, but one which proved so enjoyable to all as to ensure a certain repetition before long. I will leave to your reporter the unpleasant duty of describing the sad failure of the venture in a financial sense, merely pausing to drop a tear for their treasurer, when it comes to settling up.

The party, (a full list of whom is given below), left on the 5 P. M. boat, Tuesday, July 3d, for the city on the slough. It comprised members of the Merion, Olympic, and Nemean Athletic Clubs, principally of the first named, and a large contingent from the Hazel Club, whose members have shown a very praiseworthy interest in all amateur athletic matters, also friends and "outsiders." Nearly all of the party were more or less decorated with medals, and these together with the

crimson and white of the Merion, the red and blue of the Hazel, and the (abem!) imposing appearance of all the athletes, fully distinguished them. No one expected that the trip was to partake of the character of an excursion, but no sooner had the more serious matter of dinner been disposed of than the fun commenced. The Captain of the Mary Garratt, with an indulgence which his colleague might have well imitated on the return, permitted the use of the upper deck, (or rather roof), and chairs having been hauled up, and pipes and cigars ignited, all enjoyed the beautiful moonlight night to the fullest extent. Presently the Hazel boys started in with some of their college songs, and the example was infectious. A break was made for the cabin, and the fine piano therein taken possession of, and choruses with vocal and instrumental solos furnished enjoyment during the evening for all except those vainly endeavoring to get their "forty winks" in the staterooms. A return was made to the upper deck, and more singing indulged in. At each landing a few of the boys would rush off for—? and in several instances only succeeded in catching the boat "by the skin of their teeth."

Early the next morning the boat arrived at Stockton, after having stuck in the mud and bumped against the bank so often that the sleeping athletes fancied themselves in the midst of a tug-of-war, with the endeavors to stick in their berths. The sports came off and were a great success (artistically speaking), and then in the evening, with ranks somewhat thinned by the afternoon boats and trains, the boys proceeded to help Stockton "celebrate"—and right nobly did they do it! Coats and eyebrows suffered from "Roman candle" sparks, the ear was deafened with "double headers," and the streets of Stockton resounded with numerous "Ts-s-s boom! Ah-b-h-hs!" from city throats. Later, some of the boys "took in" the K. of P. ball at the Temple and got badly taken in by a woeful lack of partners. But the singing of the Stockton girls, both at the exercises in the square and by the Cecelia Choral at the hall, was grand enough to atone for their timidity in the dancing line. And talking of the Stockton girls, the sight of so many lively and energetic damsels out in pure white dresses was truly refreshing; their sashes and jaunty hats were quite captivating, but when it comes to beauty, San Francisco carries off the palm.

The next morning many were up betimes and out boating and swimming; and the only other event to chronicle before the return was the visit to the asylum. And here was the formation of the "Fan and Parasol Brigade," a suggestion by Stewart (who, it might be mentioned, formed with Cbase the life and soul of the party). The beat throughout had been most oppressive and so each one was provided with Japanese fan and parasol, and thus accoutered the expedition to that most extensive caravansary of lunatics was made. The keeper must have thought us a fresh batch of arrivals, especially when the effect of a huge snowflour on each (Stewart, again) is further considered. When it came to the return, Capt. Benjamin was missed; search was made and he was discovered attempting to organize a cricket team from among the inmates. The march was concluded by a halt at Bert Moore's for a "shaking lemonade," without a reference to which this account would be very incomplete.

The return on the boat formed a fitting conclusion. Everybody and everything was cheered as the steamer scraped along amid the bushes, straggling citizens and suburban, passing tugs and all. The singing in the cabin this time took the form of an impromptu concert by all the passengers. One young lady especially sang so sweetly that nothing less than three encores would satisfy her friendly audience. Then there was a precocious boy who could play everything, the piano, the cornet, the violin—and the dickens generally, and wasn't slow to do it. A quartette of gentlemen aboard gave some fine selections, and the Hazel choruses and Frank Day's good voice were in great demand. The "Fan and Parasol" brigade paraded, and Flynn, whom we unanimously voted the best combination of good looks and cheek in the party, was set to work to get up a dance. He succeeded—partly. In short all returned, feeling that they had had a grand time, but unanimous in the opinion that Stockton not only furnished the slimmest attendance for athletic meetings, but could also boast of the hottest weather, the worst grub and the homeliest girls of any place they were ever in.

The excursionists included: Capt. Cummings, Mr. Cummings, Jr., C. J. Robertson, C. H. Goewey, J. B. Benjamin, B. S. Benjamin, B. A. Benjamin, L. G. Burnett, R. P. Cbase, V. C. Driffield, H. Tenney, F. R. Cook, J. W. Flynn, F. M. Day, W. R. Stewart, C. Creighton, E. Freese, R. D. Bristol, C. U. Brewster, Horace Coffin, W. G. Mngan, H. M. Whitely, Chas. B. Hill, Geo. Jones, R. B. Jones, A. B. Tennent, A. W. Brown, M. McIlwaine, A. M. Brown, R. Gibson, T. Jennings, R. Luttinger, J. Masterson, P. J. Curtis, — Holt, W. Randolph, Geo. Day.

The Merion Club Games at Stockton.

REFEREE—George Jones. STARTER—B. S. Benjamin. JUDGES—Bert Moore, R. D. Bristol, Geo. B. Sperry. TIMEER—V. C. Driffield, J. Masterson, C. U. Brewster. CLERK OF THE COURSE—C. H. Goewey. ATHLETIC COMMITTEE—Geo. Clark, Bert Moore, W. Clifford.

The athletic meeting held by the Merion Cricket Club of this city, at the Agricultural Grounds, Stockton, on the 4th of July, was poorly attended notwithstanding the fact that the games were well advertised. The management was fairly good. Mr. Briggs, the urbane superintendent of the track, worked hard with the limited material at hand to get the track in good condition, but nevertheless it was slow, particularly for the bicyclists. The weather was frightfully hot and the strong wind, blowing against the runners and which varied considerably, will in a great measure account for the diversity of the time in the trial heats and final of the one hundred yard race. There were only three absentees from the long list of competitors, which speaks volumes for the satisfactory adjustment of the handicaps. The events were all keenly contested, especially the foot racing, and they afforded so much pleasure to the limited number of spectators, (the majority of whom were ladies), that they contentedly endured the suffocating atmosphere. The most meritorious performance of the day was the splendid running of Jennings in the mile race. Starting from scratch he won the mile in 4 minutes 45 seconds, which is the best amateur time ever made on the Coast. We are sure the same race on the Olympic Grounds would be better than 4:40. Jennings is to be congratulated upon his magnificent effort and the ovation he received at the finish was well earned. It was certainly the grandest mile race ever seen on the Pacific Slope. Gibson ran with great pluck and finished very strong. The mile walk was also very interesting—the fight for second position between Hill and Coffin was very severe and resulted in the bare victory for the Philadelphian. Coffin is a walker of more than ordinary ability and will prove a valuable addition to the ranks of the very moderate number of walkers in this city. Great interest was centered in the quarter-mile race and properly, for it was a hard race from start to finish, but the

Nemean representative secured the coveted position though Tennent and Benjamin pressed him very closely. The time, 54 3-5 seconds, seems a little fast when the many disadvantages the runners had to contend with are taken into consideration. This is the first gold medal won by Flynn who, for the short time he has been running, has secured seven silver medals, having been beaten on every occasion for the gold medal by the shortest possible distance. Cook worked hard in the bicycle races, and if the conditions had been favorable, the coast record in both events would have been lowered a great many seconds. The excursion was thoroughly enjoyed and the greatest amount of good feeling prevailed throughout. The result follows:

One Hundred Yard Race (novices)—H. Tenney, 1st; R. P. Chase, 2d; V. C. Driffield, 3d; C. B. Hill, 0; L. G. Burnett, 0. Won after an exciting race. All close up at the finish. Time, 12 seconds.

One Half Mile Scratch Bicycle Race (open)—F. R. Cook, S. F. B. C., 1st; H. Tenney, M. C. C., 2d. Cook assumed the lead at the start and won easily. Time, 1 minute, 41 3-5 seconds. The wind was against the riders at least 7-8 of the distance.

One Hundred Yard Race Handicap (open)—The first and second in each beat to start in the final. First heat—Barney Benjamin, M. C. C., 4 yards, 1st; J. W. Flynn, N. A. C., scratch, 2d; J. Bargmann, 5 yards, 0; F. M. Day, M. C. C., 7 yards, 0. Benjamin beat the pistol about 2 1/2 yards. Time, 10 2-5 seconds. Second heat—C. Creighton, M. C. C., 4 yards, 1st; W. R. Stewart, O. A. C., 1 yard, 2d; E. Freese, 5 yards, 0; C. J. Robertson, N. A. C., 9 yards, 0. Time, 11 seconds. Third heat—A. B. Tennent, M. C. C., 4 1/2 yards, 1st; R. B. Jones, M. C. C., 1 1/2 yards, 2d; A. W. Brown, C. A. C., 6 yards, 0. Time 11 seconds. Final heat—A. B. Tennent, 1st; J. W. Flynn, 2d; W. R. Stewart, 0; Barney Benjamin, 0; C. Creighton, 0; R. B. Jones, 0. A splendid start was effected. The whole distance was desperately fought, towards the end Benjamin looked like the winner, but the whole field closed right up and from the struggling sprinters Tennent and Flynn gained the honors by the shortest of distances. The balance were so close up it was impossible to separate them. There could not have been 5 feet between the six starters at the finish. The winners of the beats were so well handicapped that should the final race be run on three different occasions, we believe that the winners would be different every time. A strong wind was blowing right against the runners. Time, 11 seconds.

One Mile Handicap Walk (open)—J. B. Benjamin, O. A. C., scratch, 1st; C. B. Hill, M. C. C., 60 yards, 2d; H. Coffin, 150 yards, 3d; M. MacIlwaine, 150 yards, 0; L. G. Burnett, M. C. C., 150 yards, 0; A. M. Brown, M. C. C., 175 yards, 0; R. P. Cbase, M. C. C., 200 yards, 0. A well contested event, the struggle between Hill and Coffin for second position being particularly worthy of record.

Running High Jump (open)—Barney Benjamin, and R. B. Jones, 1st; M. MacIlwaine, 0; F. M. Day, 0.

Benjamin and Jones both cleared the beam at 4 ft. 10 in. They will jump off on some later date.

One Mile Handicap Bicycle Race (open)—F. R. Cook, S. F. B. C., scratch, 1st; H. Tenney, M. C. C., 35 yds., 2d. This was another easy victory for Cook. Time, 3 minutes 24 seconds.

440 Yards Race Handicap (open)—J. Flynn, N. A. C., scratch, 1st; A. B. Tennent, M. C. C., 7 1/2 yds., 2d; Barney Benjamin, M. C. C., scratch, 3d; F. M. Day, M. C. C., 20 yds., 0; M. McIlwaine, 20 yds., 0. The course was a straight one and against the wind. This race was another splendid contest and was secured by the Nemean representative in fine style, though both Tennent and Benjamin pressed him very hard at the finish. All were completely run out at the end. Time, 54 3-5 seconds.

One Mile Handicap Run (open)—T. Jennings, O. A. C., scratch, 1st; R. Gibson, 80 yds., 2d; M. MacIlwaine, 100 yds., 3d; R. Luttinger, 90 yds., 0; A. M. Brown, M. C. C., 175 yds., 0; C. Creighton, N. C. C., 100 yds., 0. The prevailing opinion among athletes is that this race was the grandest mile race ever seen on the Coast. Jennings gained on his men very rapidly, and was on even terms with the leader 400 yards from home. The plucky Gibson, however, made a splendid struggle with Jennings, and was only beaten by a few yards. When the weather and the track are taken into consideration, this is a great performance.

The Fourth at Skaggs' Springs.

EDITOR BREEDER AND SPORTSMAN:—Fourth of July was duly celebrated by a number of amateurs who had gathered at Skaggs' Springs. There being quite a number of young men among the guests at the hotel who have taken an active interest in athletics, it was thought wise to give an outdoor entertainment in the cool of the morning. The track was the level lawn in front of the hotel. The following officers of the day had charge of the sport: Referee, Col. R. G. Horn; Starter, Webster Jones. Judges, A. Viguer and M. H. Livingston. Promptly at 9 o'clock the games commenced. Foot race for boys under ten was won by Charles Zevliser, who also won the race for boys under thirteen. Irving Lunborg won the race for boys under eighteen. An interesting race with five starters was won by R. P. Doolan, Thomas W. Church a close second. Three-legged race was won by H. Schroth and Frank E. Harris. Standing jump won by Thomas W. Church, who cleared nine feet and ten inches, and also won the running long jump, nineteenth feet four inches. Ladies' spoon and egg race; first, Miss Emma Westerfield; second, Miss Libbie Henry. Running race for ladies; first, Miss Lucy Schroth; second, Miss Emma Westerfield. Sack race for boys; first, Willie Westerfield; second, P. Martin. Novelty race; first, Col. Horn; second, Webster Jones.

At the Caledonian Games at Portland on the Fourth of July, the quarter-mile race open to all amateurs was won by J. S. Dunbar, with W. Sprague second. Time, 1 minute. The 150 yards was won by F. Lewis in the time, 15 1/2 seconds. D. A. McMillan, of this city, won a great many of the contests, particularly the weight putting. J. W. Geogan won the hop-step-and-jump with 40 feet 5 1/2 inches.

At the Birchfield Harriers' Sports, held on June 14th at Aston Lower Grounds, Birmingham, England, W. Sook defeated W. G. George in a 1,500 yard run in 3 min., 35 2-5 seconds. This time is only 1-5 of a second slower than the best amateur time ever made.

F. R. Cook, the bicyclist, has joined the Nemean Athletic Club. The Nemeans have two good men in J. W. Flynn and F. R. Cook.

There will be a ten-mile foot race at the race meeting of the Ione Racing Club. The amount of purse to be announced.

Hunting in the Coast Range—The First Deer for 1884.

DEAR EDITOR:—To fulfill my promise that you should hear from me, I will endeavor to give you a slight sketch of our first deer hunt of the season, at our old camp ground near Highland Springs, Lake county. We spent one day in arranging our camp, and making things as comfortable as possible, our larder being wellstocked with good things to eat and drink, which was supplied by Bowen & Co. of Oakland. Our location for our camp ground is a beautiful spot, situated on the bank of a creek of fine cool water, the grounds being well sheltered and shaded with oaks, buckeyes, alders and willows, and interwoven with wild grape vines, which seems to be the favorite resort of numerous mountain songsters. The weather is not oppressively warm, but a balmy atmosphere, which is refreshing as well as invigorating. We are also favored with cool soda and Iron Spring water for drinking. On the morning of the 2d of July, at 4 A. M., we might have been seen marching in single file, well mounted on good mountain horses, with rifles in good order and hounds fresh with a season's rest, taking the trail that leads from camp to High Valley. Our steward gave us a good send off with a fine breakfast well served of ham and eggs, broiled bacon, hot biscuit, and a cup of coffee, that seemed never to have tasted better, and a lunch put up with care and placed upon each saddle. We wound our way, crossing streams, ridges and gulches till nearly half way up the mountain, when suddenly one of our young hounds made a break. He had taken the track of a deer that had crossed apparently but a short time ahead of us. One of the old hounds following suit before we could check him, away they went making the canyon echo. The balance of the pack we managed to keep back, but a difficult job it was, for they were all eager for the chase. A spirited and beautiful sight it was, for we could see the hounds for a long distance running at a rapid pace. Soon the deer was raised from his hiding place, and made a break for the opposite ridge and came in full view, although a little too far for our open sights; fortunately for two of our party they bed lagged back, and the deer was in good range for them to shoot. They were not long in availing themselves of the opportunity, for one, two, three, four, five shots was fired in rapid succession, when they both sang out, "I have got him." The hounds soon closed upon him, and had him by the neck. It was not long before the hunters were on the spot and preparing the deer for packing on the horse. On examination it was seen that but one ball had hit the deer and that one broke his hind leg. The question now arose who had fired the shot that hit the deer. They both claimed the shot, but as the reports of their rifles were almost simultaneous, this was a hard question to decide, and will ever remain so. The deer proved to be a fine spike buck. This called for us all to regale ourselves from our flasks over the death of the first deer of the season, which was heartily done, and when the corks were replaced there was a vacancy that appears as though a whole day's hunt had been made. We were soon on our way winding up the grade, and at 6 A. M. reached the summit. Now our course was changed, for we took the trail that leads due south. We had scarcely gone one-half mile from the valley, when raising a small ridge and glancing across a gulch not over seventy-five yards, I saw a fine large buck standing in the edge of a clump of scrub oaks. He evidently saw us for he looked amazed at seeing us so suddenly appear before him. I was not long in dismounting, and the balance of the party followed suit; I had the first shot. The buck was standing head on and slightly quartering. My shot was well aimed and hit him just back of the shoulder ranging back. The deer made a bound in the brush and several shots were fired in rapid succession. In a moment another buck jumped up from his hiding place and several shots were fired at him. He fell, but quick as a flash jumped up and made a bound over the ridge. We supposed we had one laying in the brush, but on prospecting we found that he had dodged up and we had not seen him leave. The hounds were now in full run and partly separated, but running in the same course. Soon one gang came to the dead buck, the others running fiercely down a deep gorge to a creek. Their course was not to be accurately discerned. They returned in about an hour, and we supposed they must have caught the deer, but the underbrush being so dense it was impossible for us to leave the ridge, and, much to our regret, had to abandon the idea of following him. The buck found was a very large one, extremely fat and fine. On examination, two balls had hit him, either one of which was fatal, although he had made a long run after being shot. This most certainly called for the uncorking of our flasks, which was dessert to our feast. A short rest now for our hounds and we continued our course, but had not gone one half mile before the hounds raised two more deer. As they were in a dense cover, but two shots were made at them, one of which hit the mark as the deer fell, but was up and making over the ridge the hounds close up. Three of the party followed, and after a long tramp over chaparral and brush the chase was abandoned, although blood was plainly seen in their course. Fifteen minutes might have elapsed when I espied the captain, who was sitting down near me, reach for his rifle and placing himself on firm footing raised his gun to his shoulder. I said, "Cap., what do you see?" but not a word; he evidently anticipated having this all to himself. He no sooner pointed his rifle before I had the course, and looking on the side hill in the brush I espied a deer running. The second shot was mine, the third his, and the fourth mine. I sang out, "Cap., the deer is hit!" but not a word from him. He however ceased firing and the two young hounds seeing the course we were shooting, made a run and were soon on the deer, which now jumped up and started

down the side hill. Captain starts down the grade and sings out, "I killed him." The captain made good time for a short distance, but he found the deer gaining on him and he abandoned the chase and had some difficulty in again reaching the top of the ridge. He was well fagged out and evidently came to the conclusion that he could not outrun a deer down hill, if it had only three legs. The deer and the hounds were making rapid time, but the hounds were gaining on him, and a moment more had him by the throat. A tussle and the deer breaks away, as the side bill was steep and rocky. Again the deer is caught and a struggle takes place. The hounds could not hold him; as they roll down the steep side-bill the deer becomes loosened. I anticipate their course, and starting down the spur of the ridge, soon reach the bottom, the hounds having the deer again. This time my favorite hound, Prize, had him by the throat; Dau had him by the ham. Down they came to the very spot where I was standing. I made for the deer, and getting him by the horns, with knife in hand, dispatched him in double quick. In a short time two of the party came to my rescue and assisted me in bringing the game to the top of the ridge, where the Captain lay fanning himself and feeling happy over his imaginary success of having no one to dispute his killing this deer alone. He was evidently astonished when I told him that I had fired three shots and "Van" had fired one. He says: "You don't tell me so! I did not know that any one shot but myself." Captain meant what he said for he started outright to have it all to himself. He was easily reconciled to what is correct, and said: "Well, I know I shot, by gosh." The party now came together, and a repetition of uncorking to Captain's success and chase down the grade. We now continued our course, following the trail, and finally gain the extreme point of the ridge which divides Lake valley from Russian river. We divide—two of us with the hounds take a course below the ridge, the balance following the top. We had not gone far when the hounds raise a young buck. He makes a good run, but his course was north and the party had gone in a southerly direction; two of us had several shots but at a long range. Although our shots were made as he was running at a rapid rate, yet the balls could be seen to strike direct on him, but failed to bring him down. He was soon out of range and after a short run the dogs returned evidently well fagged and tired. We now had to rest for a short time, finally continuing in our course slowly. A short distance had been made when a deer was seen jumping over the brush about 100 yards ahead of us. We all dismount and run to a point, anticipating a shot as the deer would raise on the opposite ridge. He came in sight, and Mack fired. He made a fine shot, as it struck him on the hind leg. The hounds were now closing up and down he went for the gulch again, the dogs running for dear life. Three of the party starting down the steep grade were soon out of sight. Presently we heard a shot, then another, and so continue until fifteen shots had been fired. Then a cessation for five minutes, and fire then commenced in good earnest as twenty-one shots were fired in rapid succession. We now became anxious, and spurring up came in sight of them and found that they had killed two deer, as the dogs in their course had raised three more. We had now five deer—one each—and as the day was far gone, the hounds worn out and a long way from home, we closed our day's hunt and arrived in camp at 6 P. M., well pleased with our first day's sport of the season. A. C. D.

HIGHLAND SPRINGS, July 4.

At San Bruno.

The leading event occurring at the trap since our last issue, and they were very few in this neighborhood or in the interior so far as we learn, was the fourth shoot of the season of the California Wing Club at San Bruno. As we have stated, the custom of this distinguished club is to vary its method of shooting at each club-medal meeting, and it is a very wise custom as it keeps the members up in each variety of shooting upon which his success on the field must necessarily in a great measure depend. So far, the results of each club meeting are as follows, which we give in collected form for reference when needed: The first match of the season was at twelve birds, twenty-one yards rise, ground traps. It was won by P. Walsh, one of our coming champions, with a clean score, Lanerstein second. The next shoot was at six pairs of double birds, and was won by F. H. Putzman with eleven. T. Jellett tied, and the ownership of the medals was decided by a toss up. The third match was at thirty yards, ground traps, and was won by Crittenden Robinson with twelve straight, Mr. Fay being second with eleven. Up to to-day Robinson and Walsh were close together for the first aggregate score of the club, Robinson being one ahead. Sunday's shoot made them even. The conditions, on Sunday, were twelve birds each, plunge traps, twenty-one yards rise, single barrel. Owing to the time the attendance was very small, only eight out of the long list of members appearing. The day was all that could be desired save the wind, and the positive gale that blew from the west made reliable shooting entirely out of the question. The birds were supplied by Murphy, and like his birds in general, were a grand lot, which it would have been hard to kill at any time. In Sunday's gale they went off like lightning on greased wires, and Mr. Slade said he never was so much at fault how to hold his gun or in what direction to shoot. Under these circumstances the scores may be considered remarkably good, for in such a gale one eleven, two tens, and five nines, out of eight men, in our opinion is most excellent shooting, better indeed than we had any right to expect. We must again compliment Walsh, who is one of the coming champions and who always shoots in a quick, clean, effective style. An analysis of the score shows that although Mr. Robinson's record is not up to his average yet it is still good, as it gives thirty-five birds killed out of forty-four. Considering he had not his thirty yard gun along and that he had shot with a strange one, his score on Sunday may be considered an exhibition worthy his fame. Mr. Fay did still better, killing twenty-nine out of thirty-eight, a feat, with such birds and such wind, that sets at rest the question about his nerve and ability with the gun forever. Of course Walsh's eleven, taking first medal, were all well and cleanly killed. Golcher, Sr., with his traditional ten, tied Robinson for second medal, and on tossing up a quarter for ownership fate favored Golcher. We have no better or truer sportsman among us than Mr. Golcher, and we are only surprised that the champion, from his well-known polite and genial nature, did not give it up gracefully without a further contest. Such a compliment would have done both me credit. Of the others, killing nine birds each, Lachman shot best, Slade, Putzman and Thompson showing anything but their usual form, especially Slade. The score:

Table with columns for names (Walsh, Golcher, Robinson, Fay, Lachman, Thompson, Putzman, Slade) and rows of scores.

After the match of the day was over the usual pool shooting commenced, opening with a sweepstakes, at twenty-one yards, eight birds each, \$5 entrance. Five entered, Robinson, Walsh, Fay, Lachman, and Bulkley. Robinson won with a clean score.

The plunge traps were now removed for ground traps, and the handicap contest following was brilliant, Fay shooting very accurately all through, and beating the champion. The conditions were ten birds each, thirty yards rise. Robinson missed his second, third, and ninth bird, presumably from not having his gun, which generally, at that distance, does such terrible execution. Fay, with nine birds to his credit, won the pool. The score:

Table with columns for names (Fay, Bulkley, Robinson, Slade, Thompson) and rows of scores.

Dissatisfied with his defeat, Robinson got up a second handicap under the same conditions, except that 8 birds only were used. For this four entered. Fay tied Robinson on five birds each, and in the final shoot-off, at six birds, beat him by one. In this match Mr. Fay did some grand shooting, killing several birds with his second barrel that seemed altogether beyond reach. The honor was well earned and is another feather in Mr. Fay's cap. The score:

Table with columns for names (Robinson, Fay, Slade, Bulkley) and rows of scores.

Table with columns for names (Fay, Robinson) and rows of scores.

The day was pleasantly spent. On such a day, with a gale blowing, San Bruno all agreed was the place to try a man's ability at the trap. So it may be, but at the same time it destroys the pleasure of the members and spectators and keeps many of both away. There is about as much pleasure at a San Bruno pigeon match in one of the gales that so often sweep across the ground, as in playing cricket in a drenching rain.

The Deer Season.

The week's news from our deer hunters is meagre, and in some degree unpleasant as regards the animals. We have for some time past heard much about the abundance of deer in all parts of the State, which led us to hope great results from the perpetual protection of does and fawns. The public market apply, the best evidence we can have of the abundance of bucks, does not support this statement, for although the supply in the market is generally good in quality it shows a great falling off in quantity even for the opening week of the season. For the last few days we have been regularly through the markets to satisfy ourselves on this point. Mr. Mowry, of the California Market, and one of the most responsible men in the business, is really dependant on the existence of our deer, and places their extermination in about five years. He says that the supply of late has not averaged for the whole season what he formerly received in one week. He is very anxious for reform in regard to illegal destruction and desires to give the State Sportsman's Association all the aid he can. The first buck he received on the 2d inst., was really decomposed and must have been killed several days before the 1st. Benton & Co., of the same market, speak much the same, though a little more favorably of the present market supply. Lemoine, Turel & Co., a prominent and responsible firm in the old Washington Market, have had the largest and best supply during the week we have seen, and Anzadon & Co., of the same market, the next. Such bucks as we saw were large and in prime condition, but they will be much fatter in about a month. The meat sells readily at wholesale from ten to twelve and a half cents a pound. Taking the evidence of the supply in general, for all it suggests, we feel certain that if we desire to perpetuate our deer in the public domain, the legislature must next session stop all market butting for at least five years. The same policy was adopted by Pennsylvania to save her quail and she has now abundance of that bird. We have to come to it sooner or later, and it is the best wisdom to commence while we have some stock to work upon. The does and fawns may not be marauded so much as in former years, but the bucks, in all quarters and at all times from January to December, are mercilessly slaughtered, and by those, too, who ought to know better and act better.

The glorious Fourth, the day of all others in the calendar, that gave America birth and freedom in its purest form to the world, for the progress of men in all that relates to human happiness, brought to ourselves and others responsibilities which none desired to ignore; but the celebration, obearing as it was to the lover of freedom, checked in no small way those events we have to chronicle each week in our gun department. If, therefore, we are less copious or interesting than usual in giving the events of the week, the true sportsman, who is always a true patriot we are sure, will not unduly censure us because we threw aside our duties to sport for the higher duties to country. Still we hope even in spite of the festivities of our national holiday, to find something to say worthy the attention of the American gentleman sportsman.

The most successful parties we have heard of were two on the Shafter estate, one killing four fine bucks, and the other three. Mr. Chas. Kaeding was in Mr. Willie Shafter's party and brought three down, which were generously distributed among friends. By Mr. Orr's party only one was killed up to the 3d, when he returned to spend the 4th with his family. Harry Babcock was in this party, and killed one of the largest male coyotes seen for many years. It was well the brute had no chance to fasten on any of the dogs for his principal teeth were nearly an inch long. Babcock did good work by the shot, which was long and well made.

The Napa Reporter says Pope Valley is a great hunting ground and a favorite place for Nimrods. Deer are plentiful farther up the valley towards the Berryessa hills, and small game is abundant.

Mr. Wm. McIntosh, formerly a prominent member of the Club, is in town on a visit. It is the intention of the Club to give this gentleman a complimentary shoot and dinner.

Pigeon Shooting in England.

It has been stated in our local press that another bill, more prohibitive in principle than the former, will be immediately introduced into the House of Lords seeking the abolition of pigeon shooting.

In reply to the solid language of Lord Wemyss, Lord Dalhousie for the Government, said the Secretary of State had no means at his disposal of reaching the truth and that the Government had no intention whatever of making the inquiries suggested.

Lord Redesdale, who moved the rejection of the bill, then explained the nature of the lies gotten up by the Exeter Hall fools, headed by the bishops, against pigeon shooting and how such lies were manufactured.

Lord Redesdale added that he should take into consideration the propriety of introducing another bill and there the matter ended. We do not know if the English Exeter Hall idea of abolition would have any influence in this country outside of a similar class.

Julian R. Brandon killed a grizzly bear, weighing 1,100 pounds, in the mountains near Sheep Ranch, Calaveras county, a few days ago. We were once in at the death of a 1,200 pound grizzly, but only once, for we were then satisfied with that styia of thing.

Speaking of the illegal destruction of deer, we learn it is most disgracefully carried on, all the year round, in the locality of Highland Springs, Lake County. It is the same, we are told, throughout the mountain range of Santa Cruz county.

A cable special to New York this week, says, the greatest novelty in the way of sport is the organization by certain rich noblemen of a select number for hunting elk and other big game in the Rocky Mountains next Autumn.

If these English ewells behave themselves, we trust they will be well treated and enjoy themselves. But if they come for indiscriminate slaughter, we hope they will be arrested and punished.

At Gilroy.

Our readers are aware that the Gilroy Rod and Gun Club have recently been contending for a handsome rifle presented by Mr. Wm. Curtis.

N. P. CURTIS: This is to certify that Mr. Harry Frutig is entitled to the Winchester rifle offered by you as a special prize to be contested for by the members of the Gilroy Rod and Gun Club.

Messrs. Bennett and Briggs had a pleasant shoot with the Bassford family. They did not hunt deer, but they killed about sixty doves among them.

The Alameda County Sportsmen's Club will have its fifth monthly medal shoot to-day at Bird's Point, Alameda.

Those preferring clay pigeon shooting can have it every Sunday, at Adam's Point, Oakland. Apply on Saturday to the Messrs. Pierce & Co., Broadway, Oakland.

We cannot ascertain whether there will be a shoot at Sau Bruno, and at Bird's Point to-morrow. At the time of writing neither seemed likely.

THE RIFLE.

At Shell Mound.

The same as in gun matters the celebration of the Fourth materially interfered with the rifle practice, and with the exception of Shell Mound, all the bouts were pretty nearly deserted.

Table with 3 columns: Name, Score 1, Score 2, Total. Includes Hovey, Waltham, Robertson, Moore.

By this it will be seen Hovey kept up his reputation as an able man at the 200 range. His total of 175 out of a possible 200 leaves a very high percentage.

It is to be regretted that in the match to-morrow Lieut. Fred. Knhle cannot be present. His business on his ranch will not admit of his absence at the present time.

The Forest and Stream recently gave the scores at the opening of the new range at Thomaston, Conn., the leading one of which are worthy the notice of our readers for their excellence.

The shooting tournament of the Empire Rifle Club, at the opening of their new range here on the 21st and 22d, was the biggest kind of a success. The weather was perfect, and a large delegation of visiting riflemen were present.

Table with 3 columns: Name, Score 1, Score 2, Total. Includes G. W. Ellsworth, W. Charles, O. B. Hull.

The other competitors made all the way from 165 to 125. G. W. Ellsworth took a special prize of \$10 for the largest number of bull's-eyes, 102. We have some good men for making bull's-eyes, but so far Ellsworth beats them.

An official paper on woods and forest states that there was killed last season "in Austria proper, as distinguished from Hungary, 6,550 stags, 2,224 hinds, 44,485 roebucks, 6,116 chamois, 2,372 wild boar, 1,025,508 hares, 9,103 wood hens, 4,075 varattelles, 59,209 pheasants, 789,885 partridges, 50,032 quail, 23,633 woodcock, 17,065 snipe, 760 wild geese and 43,908 wild ducks."

Every train coming from the mountains has brought with it the carcasses of many deer. Venison is upon all the restaurant bills of fere and the open season is generally taken full advantage of.

Apart from the interest of the figures given, this statement is otherwise important. It shows two things well worth the notice of the American people—the commercial and domestic value of national game birds and animals, and that abundance can only come from strict preservation.

The new kind of gunpowder lately introduced by M. Himley is superior to all others now in use in the ease and rapidity of its production and the entire absence of danger in the process of manufacture.

This may be all true, but those who, like ourselves, have been through powder mills at work, will not be able to see readily how any powder can be made without some danger in its manufacture.

While on the subject of the Nevada Riflemen, we may ask what has been done in reference to selecting a California team to do them battle, or whether it is the intention to select on this year?

A few weeks ago there was a second match between the crack Boston Walnut Hill team and the crack Springfield Armory team.

Table with 3 columns: Name, Score 1, Score 2, Total. Includes Massachusetts Rifle Association, Springfield Armory Club, E. F. Richardson, J. B. Fellows, J. Francis, W. Charles, O. M. Jewell, H. G. Bixby.

The Carson Tribune says: "Last Sunday week was a field day among the rifle shooters. A team of eleven men, picked from the different rifle organizations of the Comstock, came down to contest in a friendly match with a like number from the Carson Guard."

EDITOR BREEDER AND SPORTSMAN.—Will not some one of your many rifleman readers be so kind as to give in your next issue's correspondents' column, what he considers the best ingredients for and how to mix a good lubricant for grooved bullets?

On account of sickness Miss Lillian Smith, the champion female shot of the State, did not leave for Chicago last month and now will not make the trip until September.

The State Rifle Association had a meeting during the week, but as a majority of the directors was not present, nothing definite was reached as to the new range which it contemplates starting.

A lad of 16 years, named Otie Evans, shot a deer just outside the door of the Skaggs' Springs Hotel on Tuesday last.

Captain Stettin had quite a delegation from the German Fusilier Guard out on Sunday, to improve the marksmanship of his corps.

The contemplated second match between the Eintrachts and the San Francisco Fusiliers, which should have taken place at the later part of the month, at Schnetzen Park, is off by mutual agreement, as the time fixed does not suit.

The Eintracht Rifle Club will have their regular medal shoot at Schnetzen Park, to-morrow.

JOSEPH CAIRN SIMPSON, - - - EDITOR

## NEW YORK AGENCY.

Mr. C. C. Pettus at the office of the "Sportsman," 46 Murray Street, is duly authorized special representative of the BREEDER AND SPORTSMAN in New York to receive subscriptions and arrange advertising contracts.

## SACRAMENTO AGENCY.

Residents of Sacramento and vicinity, desiring to subscribe or advertise in the BREEDER AND SPORTSMAN, can do so through our agent, Mr. M. J. Henley, Russ House, 1,093 J street.

## ADVERTISING RATES.

Displayed, \$1 50 per inch each insertion or pro rata for less space. Reading Notices set in briefer type and having no foot marks, 30 cents per line each insertion. Lines will average ten words. A discount of 10 per cent will be allowed on 3 months, 20 per cent on 6 months and 30 per cent on 12 months contracts. No extra rate charged for cuts or cutting of column rules. No reading notice taken for less than 60 cents each insertion.

San Francisco, - - Saturday, July 12, 1884.

## Dates Claimed.

Bay District, San Francisco (Fall Meeting), August 2d, 5th, 7th, and 9th.  
Santa Cruz Fair Association, Santa Cruz, August 12th to 16th.  
Sonoma County Agricultural Association, Santa Rosa, August 18th to 23d.  
Sonoma and Marin District Association, Petaluma, August 25th to 30th.  
Thirteenth District, Marysville, Aug. 26th to 30th.  
Golden Gate Fair, Oakland, September 1st to 6th.  
Chico Fair Association, Chico, Sept. 1st to 6th.  
State Fair, Sacramento, Sept. 11th to 20th.  
Ninth District Fair Association, Robinsonville, Sept. 23d to 26th.  
San Joaquin District Fair, Stockton, September 22d to 27th.  
Santa Clara District Fair, San Jose, September 29th to October 4th.  
Monterey Agricultural Association, Salinas, Oct. 7th to 11th.  
Fresno Fair Association, Fresno, October 7th to 11th.  
Los Angeles Fair Association, Los Angeles, October 13th to 18th.

## The August Fairs.

Bay District course, San Francisco, Santa Cruz, Santa Rosa, Petaluma and Marysville take the golden month of August to celebrate the harvest-home of the year. The first is rather on the urban order, and the district which is immediately tributary does not lay claims to fruit or cereals. But there are many famous horses within a circuit of a few miles, and there is no better course in the whole domain for them to prove their mettle and show paces to enthuse the spectators.

As this is the first meeting after the closing of entries for the circuit, there will be a great deal of anxiety to see how the horses perform which are likely to meet every week for some time thereafter. It has been the case in former years that such a palpable superiority was shown as to weaken the interest after a few races had been trotted, but at present there are indications that in nearly every class there will be close contests all through. This is partly due to the large number of horses in training, and also to the fact that in all sections of the State there has been an opportunity to select the best strains of blood to breed from. Neither are the crack animals confined to those owned in San Francisco and vicinity, and the country will put in claims for consideration that will compel recognition.

The meeting on the Bay District course is entirely for trotting, and on the first day, August 2d, is the 2:22 class purse of \$600. August 5th is the second day of the series, when a \$500 purse is offered for four-year-olds. On the 6th of August a purse of \$500 for the 2:40 class. On the 7th of August there is \$500 for pacers that have not beaten 2:20, and on Friday, the 8th, the 2:27 class is tempted with a purse of \$750. The meeting closes on Saturday, August 9th, with a free-for-all, Director being penalized with four wheels to haul, the amount being \$750. In all of these purses there is a division into "three moneys," and the entries close on July 21st.

The second on the list is the fair of the Santa Cruz Association, the opening day being Tuesday, August 12th. It is almost supererogatory to say anything in relation to the beauty of Santa Cruz and its environs. To describe them in anything like deserving terms would require a volume. What is of more importance to the owners of horses than beauty of scenery, and even personal comfort, is the track on which they will perform, and in this respect there is no break in the harmony. The shape is after the most approved pattern, the soil

is first-rate, and very little work is required to keep it in admirable condition. The situation could not be improved. It is built on a terrace which is near the shore of the bay, the ground nearly level, and with the valuable adjunct of fine roads. The ocean drive is particularly fine, and as the distance is short between the course and the centre of the town there is no trouble in reaching it. There are five days included in the programme from August 12th to 16th, and on each of these is a race in which horses from any section can participate, and also one for horses owned in the district. In the "open" there are three-minute class, purse \$400; 2:27 class, purse \$500; pacing 2:20 class, purse \$400; 2:40 class, purse \$400, and 2:22 class, purse \$500. The district races are 2:40, purse \$200; three-minute class, purse \$150; 2:50 class, purse \$150, and a purse of \$250 for all horses owned in the district. There is also a running race heats of half a mile, and as there are a good many fleet short horses in that section it is likely to be a merry spin. The Santa Rosa Fair commences on Tuesday, August 19th. This will give plenty of time for the horses to reach there from Santa Cruz, and the purses are so arranged that the participants in analogous classes at Santa Cruz will have plenty of time to recover. We can safely say that the Santa Rosa track is as good as there is in any country. Furthermore the appointments are complete, and nothing is lacking for the comfort and well-doing of horses and men. That is also convenient to the hotels, and only a short trip from the depot where the horses will be unloaded from the cars. There are fourteen races on the card, the time embraced covering five days. On the first day there is a running stake of \$25 each, \$150 added; dash of three-quarters of a mile for two-year-olds, and No. 2, is trotting three-minute class, for a purse of \$500. The second day, Wednesday, August 20th, there are three races. The first is running, stake of \$25 each, \$200; dash of a mile; the second is the 2:40 class, purse \$500, and the third pacing 2:20 class, purse \$500. The third day, Thursday, has also three races, viz., running, 1½ mile for three-year-olds, a stake of \$25 each, \$200 added, and the second race, No. 7, on the programme, is running heats of half a mile. The finishing race for that day is the 2:22 class, purse \$750, so that there are four intervening days from the same class at Santa Cruz. On Friday there are three races, first being a "selling race" for a purse of \$200; entrance free with the usual allowance and penalties rated by the valuation. The 2:27 class comes next for a purse of \$600, and then there is a purse of \$500, for the horses of the district which are eligible for the 2:45 class. Saturday can be called the Cup Day, as on that there is running stake of \$30 each, \$250 added, 2¼ miles. Then comes the free-for-all for a purse of \$800. Director being complimented by having to pull a wagon which is a flattering testimonial to his merit, as shown in races. The winding up is the stockholders' race, there being the somewhat novel condition of the winner of the first heat getting \$125, after which he retires and the winner of the second heat is recompensed with \$100, and the winner of the third heat, not having to contend with former winners, is paid \$25. This programme is certainly well worthy the attention of owners, the purses being liberal and the classification judicious.

Sonoma county can show what no other shire in the United States can parallel. Without any large towns, with a population scarcely exceeding that of the city of Oakland, within its boundaries are two fair grounds on which are tracks of a mile in circuit with stands, stabling and all the accessories of first-class places for agricultural exhibitions. While some may associate this to jealousy between the two thriving towns of Santa Rosa and Petaluma, no one will deny that whatever was the motive the result has been happy. There may have been some of that feeling at first, but if there were, all that can be averred now is that the main feeling is a friendly rivalry that is of great benefit. The exhibitions, coming as they do in consecutive weeks, is a double inducement for people to make entries both in speed departments and exhibition rings. The aggregate of the premiums offered is a large amount, and when the fair closes at Santa Rosa on the 23d, that of Petaluma opens on the 25th. A short walk, if the preference is given to that method of overcoming the few intervening miles, or an hour's journey on the rail and the transfer in either case is not more arduous than that from Oakland to the Bay District.

It must be a hypercritical "cuss" who finds fault with the arrangements at either of the places. The new course at Petaluma has been put in admirable order, and in respect of good management these Sonoma county exhibitions cannot be excelled. There are, emphatically, the right men in the right place, and the machinery moves with as little jar as is possible. The following is the programme at Petaluma:

First Day. No. 1—Running, free for all, dash of one mile. Purse \$300.

No. 2—Trotting, 2:40 class. Purse \$800.

No. 3—Trotting, district, for three-year-olds. Purse \$300. Second Day. No. 4—Running, district. \$25 entrance, \$10 forfeit. \$100 added. \$25 to second horse. One mile dash.

No. 5—Trotting, 2:22 class. Purse \$1,000.

No. 6—Trotting, district, 2:40 class. Purse \$400.

Third Day. No. 7—Running, for two-year-olds. \$25 entrance, \$10 forfeit, \$150 added. \$50 to second horse. Three-quarters of a mile dash.

No. 8—Running, free for all, purse \$500. Mile and repeat.

No. 9—Pacing, 2:20 class. Purse \$600.

Fourth Day. No. 10—Running, selling purse, \$200; entrance free; \$50 to second horse; fixed valuation, \$1,000; to carry entitled weight, two pounds off for each \$100 below fixed valuation, and three pounds added for each \$100 above fixed value. One and one-fourth mile dash.

No. 11—Trotting, district, for yearlings, purse \$150. Mile dash.

No. 12—Trotting, 2:27 class. Purse \$1,000.

Fifth Day. No. 13—Running, free for all, purse \$600. Two mile dash.

No. 14—Running, consolation purse, \$150. \$50 to second horse. Horses beaten once allowed 5 lbs., twice 10 lbs., three times 15 lbs., from their entitled weight. One mile dash.

No. 15—Trotting, free for all, Director to wagon. Purse \$1,000.

No. 16—Trotting, district, for gentlemen's roadsters; purse \$150; owners to drive; to road wagons or carts weighing not less than 150 pounds.

While Marysville occupies the same week as Petaluma the clash in dates will not be as serious a drawback to the prosperity of both as many imagine. The places are so far apart that there will be no reduction of attendance to speak of, and with the large number of horses in training, there can be a division of forces and leave enough to make fine sport. A few would attend both places if it were not for clashing, a large number will choose the "handiest" location for them to reach, and thus keep up the interest, notwithstanding the unison in the point of dates.

The bill for the Marysville fair shows the following classification:

First day—No. 1. Trotting—Purse \$300; 3:00 class.

No. 2. Trotting—Purse \$50; novelty contest, the horse trotting the nearest to four minutes to be declared the winner.

Second day—No. 3. Trotting—Purse \$300; for three-year-olds.

No. 4. Walking contest—Purse \$50; for double teams, and \$30 for single horses; to go in harness.

No. 5. Trotting—Purse \$300; for four-year-olds owned in that and the third district.

Third day—No. 6. Trotting—Purse \$300; for horses owned in the district that have not beaten 2:40.

No. 7. Trotting—Consolation purse; \$250 for beaten horses.

No. 8. Trotting—Purse \$200; for yearlings owned in the district; dash of one mile.

Fourth day—No. 9. Trotting—Purse \$800; 2:22 class.

No. 10. Trotting—Purse \$200; for two-year-olds owned in this and the third district.

Fifth day—No. 11. Trotting—Purse \$400; 2:30 class.

No. 12. Pacing—Purse \$250; free for all.

On the fourth day of the fair there will be a ladies' tournament, free for all in the district; entrance free.

It must be admitted that the showing for the August exhibition is capital, and that the month, which has been usually regarded as one of the dullest in the calendar, will be very lively this year. The September series is still more engrossing and will require full space to outline.

## Death of Haddington.

The accident which caused the death of Haddington, at Grass Valley, a week ago, is one of the most singular in the history of the turf. The circumstances can be briefly stated so as to give an idea of how it occurred, but the catastrophe can only be explained by inference. The course is half a mile in circuit, and all who attended concede that it is as good as they ever saw. There were three horses engaged—Rondo, Billy the Kid, and Haddington. The manager of Haddington felt that the race laid between his horse and Billy the Kid, and instructed his rider to pay the greatest attention to that horse. Rondo was leading, Haddington a short distance in front of Billy, and when making the last turn preparatory to the run home, Haddington was pulled away from the pole. The rider of Billy shaped his course for the inside, and according to the testimony of the jockey of Haddington and others caromed against him. Immediately the rider felt him give way and stopped him as soon as he could. On dismounting he discovered that both hind legs were broken, the fractures being between the ankles and feet. Both were completely shattered, and yet the horse did not fall. It was a merciful act to put him out of his misery with a pistol bullet, as it was evident that he could not recover. There was no cut or abrasion of the part which proved that the injury was not due to a direct blow, and the cause of the trouble was hidden to the observers.

It must have resulted from the blow which the horse in the rear inflicted, but that result following without a wound was the inexplicable part of the conundrum. Heretofore the explanation would have been unsatisfactory; now that the instantaneous photographs have depicted every phase in the action, it is easily understood. After the bound through the air the whole weight of horse and rider is thrown on one hind leg, which

sustains it until the body is carried so far forward as to bring the hind leg to aid in supporting the weight. At this point, the first contact of the foot with the ground, the shock was given, and the blow on the hip was like striking the long end of the lever. The foot was firmly pressed to the ground by the weight of more than one thousand pounds, and the strength of the bone being inadequate to sustain the combined force it was broken. There was also the centrifugal force of going around the turn to add to the power of the concussion, and when the other leg came into position it had also to succumb. In rounding a curve the feet are thrown outside of the centre of gravity in order to overcome the centrifugal force, and had the shock come from the opposite side the animal would have been thrown down. Even the breaking of the bones did not effect this, and the horse was sustained by the bearing on the ankles. In a conversation with a gentleman we met at Colonel Thornton's he propounded the question whether the breaking of a hind or foreleg would be most likely to stop an animal when galloping? The query came after the statement that the last great impulse to throw the body through the air was given by the foreleg. Answering from the data given by the Palo Alto photographs our reply was that the breaking of the hindleg would be the most effectual stoppage. He admitted that such was the case as shown by his experience in shooting, as in cases where the foreleg of a deer had been broken by the bullet the animal had run long distances. When a hindleg was broken very little distance was covered, and, in some instances, the limb uninjured by the bullet was also found fractured. He appeared to think that this sustained the old notion that the final impulse to propel the body through the air was correct in ascribing to the hindlegs the main agency. Hereafter we will show by a publication of the cuts that this ancient idea is not sustained by the illustration he presented, and that an anatomist would come to a contrary conclusion from a study of the pictures.

The untimely end of Haddington was a serious loss to California as well as his owner. He was the only entire son of imported Haddington that we know of, and the blood was valuable. He was an honest and "useful" racehorse, and seemed to grow better as he increased in years. He never showed so much speed as he did this season, and besides his fast mile at Fresno, 1:43, his work marked improvement on his previous form. Notwithstanding the many races he had run he was sound in every respect, and one of the handsomest horses on the turf. The people of Grass Valley awarded fitting honors to his remains. He was buried within the track enclosure with due ceremonies, and the pluck he exhibited will be the theme of many tales in after gatherings among the pines. He was bred and owned by James McM. Shafter, though Lee Shaner had his racing qualities for this season. Both Lee and the jockey who rode him, Fred Ross, have moisture in their eyes and huskiness of voice when recounting the incidents preceding his death, and though the money loss to the stable is serious that is not felt at all in comparison with his sad and untimely end.

#### AUCTION SALES OF HORSES.

Winters, Newland & Pumyea, Tennent.

A short time ago we gave a full description of the colts that will be offered for sale by Mr. Winters, at Sacramento next Thursday, and now having received the catalogues of the other sales that will follow, we are enabled to write more definitely. The Newland & Pumyea sale will take place at the Oakland Trotting Park, on Saturday, July 19th, commencing at 11 a. m. There are forty-two animals catalogued at the head of which is Grand Moor. In the *Breeder and Sportsman*, of January 27, 1883, appeared a capital likeness of Grand Moor, and from the accompanying description the following is copied:

The subject of this sketch can also show a rich inheritance on the side of his dam, and when Mr. Newland purchased him from Mr. Rose he was guided in his choice and made the selection on this account. He visited Sunny Slope with the intention of buying the best, the price being a secondary consideration, and the form of The Grand Moor being satisfactory, the blood of his dam Vashti settled the question, and he selected the son in preference to anything he saw. Her sire, Mambrino Patchen, a "full brother" to Lady Thorne, and combining Mambrino Chief, American Eclipse and Sir Archy blood, was a token that the offspring must be all right in this important point. The get of Mambrino Patchen had achieved distinction on the tracks, and his daughters take high rank in the stud. He has several representatives in the 2:30 list, and among others of his daughters there is Thornleaf, the dam of Cleora, who trotted last summer in 2:18½, her first season in public.

The dam of Vashti was Kate Taber, by the Dunkin Horse, an animal that figures quite frequently in the trotting pedigrees of Kentucky.

In form The Grand Moor is a capital representation of the family. It is seldom that more "hoodlike" trotters are seen than are shown by the descendants of The Moor. Nearly all of them are of fine size and highly finished. As the illustration exemplifies, this horse is of very fine shape; his color is a glossy black, in height sixteen hands, and of fine length of

body. His legs are capital, thighs end arms muscular, and the lower portion showing plenty of bone and tendon. The hocks end knees are broad, and all the angles from the croup and withers to feet are right. That he would have trotted fast if given the opportunity is beyond question. We have seen him haul the heaviest kind of a breaking cart with a driver of 200 pounds in 2:50, and as there must have been over 500 pounds behind him it was a proof of speed and weight-pulling combined. Hitched to the same big cart but with a lighter driver, N. D. Pumyea, he trotted the mile in 2:42, and went through the hackstretch in 37½ seconds.

Owing to the injury to Mr. Newland, that left him totally blind, little was done with his trotters after the accident, and hence it cannot be said that The Grand Moor has had the opportunity in this line to show his family characteristics.

Had that chance been granted, there are good reasons for the belief that he, too, would have excelled and made a name which it must now rest with his offspring to perpetuate. As we have oftentimes stated, California has a greater variety of trotting strains than any State in the Union. All of the Eastern blood that have obtained celebrity and others which have gained distinction in the land of their birth to add to the numbers. That the blood of The Moor will continue to figure prominently in the calendar is as certain as anything in the future can be foretold, and if we are not greatly mistaken there will be an addition to those who have achieved renown before the close of this year.

No. 2, in the catalogue, is a hay colt, foaled 1882 by Newland's Hambletonian, his dam Phaeola by Silver Thread, and she from Minnehaha, the dam of Beautiful Bells, Sweetheart, Eva, etc., this is a "royally-bred" youngster combining the blood which produced Hinda Rose, or at least that portion of it embraced in Hambletonian, the Moor and Minnehaha. It may be considered a rash prediction, and yet we are tempted to prophesy that Hinda Rose will yet reach, and, perhaps beat the figures which are at the head of the record. From what we saw on our last visit to Palo Alto, we feel the utmost confidence that she will be able to reduce the four-year-old record so many seconds as to leave it below 2:15, and then she is as fine looking a mare as can be found in any country. The dam of the colt offered, Phaeola, was very fast ranking with the best ever bred at Sunny Slope when Mr. Newland purchased her.

There are some finely bred animals among the broodmares and the colts from them are promising. California Abdallah, Whipple's Hambletonian, Belmont, Norfolk, Echo, and Newland's Hambletonian are among the sires of the dams, and the foals, yearlings and two-year-olds are by Grand Moor, Steinway and Poscora Hayward. Beside the trotting stock there is a valuable collection of matched pairs, roadsters and workhorses. Catalogues can be obtained of Newland & Pumyea, Oakland, or Killip & Co., 116 Montgomery street.

The sale of S. J. Tennent is set for Thursday, July 24th, at his Pinole Stock Farm, Pinole Station, near Port Costa, on C. P. R. R. The farm is close by the depot so that there is no trouble to reach it, and the run is made from San Francisco in an hour. By taking the 8 a. m. boat from the foot of Market street there will be time to look over the stock before the sale commences, and that which leaves at 9:30 a. m., will also land passengers in time. There are eighty-three animals in the catalogue, embracing nearly all the fashionable strains of trotting blood, and some large horses that are well fitted for heavy work. Several of those included in the sale catalogue are now in exercise at the Oakland Trotting Park, and of these we can write from personal observation. The four-year-old filly Twinkle can scarcely fail to make a fast trotter. Her gait is perfect and she is very highly formed. Alert is a fine colt in every respect, and as nearly as can be foretold from present indications will go fast, and his size, form, color, and breeding will give him high value in the stud. Sobraute also moves like a trotter, and so does Pinole, Jr. To obtain full information catalogues should be got, and which Killip & Co. will supply.

#### Second Payments.

It must be borne in mind by those interested that the second payments on the trotting colt purses at Sacramento and Stockton fall due on the 15th inst. Although duly notified by the Secretaries, there is a proneness to forget, and, therefore, reminders are not out of place. From all that we can learn, it is not likely that there are any very wonderful colts to be in dread of this season, and though there are more than the usual number of promising youngsters, there is not, so far as we can learn, one of overshadowing phenomenal powers. Failure to post the second five per cent. entails the loss of that already paid in, and assuredly it is worth the further investment to retain a chance in the rich prizes. As there is an interval of two months before the races will be trotted, there is plenty of time for improvement, and these sixty days may add wonderfully to the capacity of those which are a trifle behindhand now.

#### Closing of Entries.

Though nearly all of the fairs advertised close the entries on the 1st of August for the purses offered by the Bay District Association, the time expires on the 21st of July. That is close at hand, and it will not answer to get it mixed up with the dates which come later. As the trotting commences on the 2d of August, it was necessary to have a little space for advertising. We feel confident that there will be a general response, and with plenty of horses to take part the circuit will open auspiciously.

#### Auction Sale of Jerseys.

On the same day as the sale of the Rancho del Rio colts, and immediately after that is concluded, a choice draft from the herd of Major Robert Beck, will be offered. In another column will be found a list of the animals, and to those who are familiar with the displays that Major Beck has made at the State Fairs there is no necessity for other intelligence than that they are to be sold. The owner has pursued the breeding of this popular race with enthusiasm, and from the opportunities he had of obtaining the best stock for a foundation that most important part was secured. Intelligent mating was followed by an improvement on the parent stock, so that at the present time it is within bounds to assert that they are as good as there is in the country. This is the general decision of those who have seen the animals, and have an acquaintance with their milking properties, and which opinion has been endorsed by the many premiums awarded at the fairs. The young hulls will be valuable to those who desire to increase the milk-giving characteristics of their cattle. Jersey grades are only slightly inferior to those of full blood, and in many of the part breeds there is an increase in milk and only a slight diminution in the amount of butter for the quantity. There is convincing proof that the Channel Island cattle are at the head for amount and quality of butter, and it is useless to take up space with arguments to prove that which nearly all are convinced of. The sale is to be held at the same place, Charles Shears, opposite the entrance to the fairgrounds.

#### Endorsement of Tips.

We were much gratified to learn from James McCord that after a test of tips on a horse which he drives daily, and others, that he is convinced of the adaptability, and also that the claim we have made of them being a cure for corns is well founded. The animal had become nearly useless from the pain occasioned by corns, the inflammation extending to his ankles and legs, and since the change in shoeing he has gone comparatively sound. We have not the least fear of the results when an intelligent man and one with the large experience which Mr. McCord has had when tips are granted a fair trial. The trouble is to get them properly put on, the smiths being determined in their opposition. Mr. McCord also informs us that he intends to use tips on over a hundred horses under his charge the coming winter, and this will be a trial which will show the applicability to horses that have to labor many hours daily.

#### Death of Bill Bird.

Bill Bird, one of the greatest of the old school of colored trainers, of which there are few now left, died at Chicago, on the 27th ult., of consumption. The following sketch of his career is from the pen of "Vigilant" of the *New York Spirit*: Few trainers have played a more conspicuous part in turf affairs, and his name was a household word wherever in America the merits of racehorses are discussed. Bird was born in Tennessee, some sixty years ago. He was brought up in the Carter family, and rode with some success while a boy. He trained for the Carters and for the late Hon. Baillie Peyton. In 1856 he accompanied Mr. Ten Broeck's horses to England, and upon his return was with Gen. Harding. Subsequently he was with Gen. Woolfolk and Mr. Campbell, of Baltimore. He was also attached for a short time with Captain Moore, who at the time had the noted Idlewild. When Judge Bryan purchased Lodi of Mr. Clay, Bill Bird took him to California. He was subsequently with Dr. Weldon and Ahner Turner. But the present generation of turf lovers know him best as trainer for Gov. Bowie, of Maryland, for whom he trained the famous gelding Crickmore, also Compensation, Belle, and Oriole in 1880 and 1881. In 1882 he returned to his home in Tennessee; but Gov. Bowie was so persistent, that he returned in 1883, and succeeded in pulling off all the great things at Baltimore and Washington with Crickmore, and with Empruss beat Miss Woodford at Saratoga. Mr. Bathgate tried to get him for Mr. J. R. Keene the present season, but he had signed with Captain Cottrill. It may be said that Bird never had a more successful year than the present, as he won the Kentucky Derby and Clark stakes with Buchanan and other races with Moua. As a cocker Bill Bird was not less famous than as a trainer. Like Sam Chifuey, Frank Butler, the late "Tiny" Wells and other famous horsemen, he delighted in the sports of the pit, and his strain of fowls were celebrated throughout the South, and the old man has often declared to us that he "never felt at home" around the stable without the presence of his noted brown-reds. He was an exemplary man, as guileless as a child, and his character for honesty to his employer we have never heard questioned. Like all the old school of trainers, he trained his horses very "fine," and disliked bringing them to the post unless thoroughly fit, and a horse that ran best in fleeh was a puzzle to him. Unlike Snedeker or Sutcliffe, he lacked the fine art of handling a had-legged one, but in the details of ordinary preparation was without a peer. His death removes a landmark of the old turf, and his example is a wholesome one to the present generation of trainers, of one who, despite the temptations which beset men of their profession,

"Went forward undetested."

#### Bay Frank Sold.

The estate of H. Eldred has sold the bay gelding Bay Frank to B. M. Richmond, of Sacramento, and the horse has gone into the stable of H. S. Hogohom at Agricultural Park to be trained. The price paid was \$5,000. Frank, if not famous is at least notorious, and possesses all the essential points of a great trotter except reliability. He is now seven years old, and if age brings sense Frank ought to be a better horse than he has been heretofore. We hope Mr. Richmond will find it so, and bring this speedy fellow to the front this year.

## HERD AND SWINE.

## Grooming Cattle.

(Western Rural.)

To a Nebraska correspondent who asks if there is any advantage in grooming cattle, we reply that there is. Under some circumstances, as for instance when cattle from any cause are exposed to much filth which may adhere to the skin, grooming would prove very valuable, and perhaps under all circumstances would be of marked benefit. The skin is an important excretory organ, of so much importance indeed that but few have a full conception of it. With regard to cattle some strangely entertain the idea that their skins are somehow different from those of other animals, and that they do not excrete. The fallacy probably arises from a notion that the skin is too thick to contain conveyances for the effete matters within the body. It is sufficient to say that the skin of every live thing is excretory. Strictly speaking it is an excretory apparatus, and is constantly, if in proper condition, exhaling vapors or gaseous matters which are the result of chemical changes going on within the system. There have been many careful experiments made to show the importance of the skin as a transmitter of the invisible perspiration. It has been shown that such inferior animals as toads, fish and frogs give off a waste through the skin that amounts to but slightly less than half the weight of the body every twenty-four hours. But the most conclusive experiments have been in the form of covering the surface of the skin with varnish, tar, paste, glue, pitch and other plastic material. This was tried in France a few years ago with the most marked results. In some cases the entire surface was covered, and in others spots, but in every case the health of the animal was impaired and its life endangered. These same facts will be established if we will observe the result of checking perspiration in human beings in whom some of the internal organs are weak. Take, for instance, a man with debilitated liver or kidney. If he perspires freely he often gets along very well and feels comparatively well. But let the weather change and the perspiration stop, and the weak internal organs are unable to do the increased work that is thrown upon them. If all the organs are healthy and strong, such results under such circumstances may not be observable, but the effects in the case of weak organs show plainly what the effects even with strong internal organs are, whether we see them or not. We are all very familiar with the fact that catarrh, bronchitis, pneumonia, pleurisy, and severe congestions often result from a sudden checking of perspiration. It is clear, therefore, that the freer the pores of the skin are kept, the better condition the system is in to throw off the poisonous matters that are within it, and the question then arises, how can these pores be stopped and how can they be opened?

We know how the pores of the human skin are plugged, and though it is true that the skin of cattle is not liable to be affected in precisely the same way, it is in a somewhat similar way. In a word the dirt by various means gets into the pores and clogs them. No doubt an occasional bath would do cattle good, but the results of a bath are in some measure attained by scratching the skin. By that process the dirt that has accumulated upon the surface of the skin at least is dislodged and the opening of the orifices of the skin are more or less freed. The thing, therefore, looks well in theory, but what is better, it has proved good in practice. Some of our most practical writers upon live stock have said that it pays as well to groom cattle as it does to groom horses; and they have said that oxen that are groomed will eat less, look better, do more work and do it more easily. It would often be of benefit in more ways than one to groom cows. A cow ought to be kept in a very cleanly condition, but she is not always. The advice is frequently given to the milker to brush off the udder. Well, he or she ought always to do that. That is good as far as it goes. But of how much use is it, when the cow is dirty everywhere else? The parts of the animal that are over the milk pail certainly ought to be brushed off, and while we are at that, it will not be much additional trouble to brush her all off. It is true that what brushing would be necessary for the purpose in view in such a case would not be very much grooming, but it would be in that direction. We can be as thorough as we like.

Perhaps some of us may think that these are new fangled notions that will do well enough for kid gloved farmers, but are not practical. All there is to that is this: if the kid gloved fellows are making by any method more from their cows than are we who do not wear kid gloves from ours, we are not wise to let the kid glove stand between us and the adoption of the method. We are quite willing to milk in kid gloves, if it will pay. But as a matter of fact it is not a new fangled idea at all. It is a very old fangled idea.

## Dutch Dairies.

At a recent meeting of the Vermont Dairymen's Association one of the members gave a very interesting description of the dairies he had seen in Holland during a visit there. Such absolute, systematic cleanliness and pains taking are what are needed to make our American butter worth more in the markets. Mr. Burnett said he was much impressed with the thrift of the Dutch dairymen, who cultivate land that lies from six to twenty feet below the level of the sea. A Dutch dairy is the most interesting and remarkable place he had ever visited; everything is so wonderfully clean and bright; wooden utensils with brass hoops and trimmings polished until they shine like mirrors; milk vessels of porcelain; attendants with the whitest of clippers, and the stables so clean from washing and scrubbing that they are sweet enough for the storage of dairy goods.

He saw quantities of cheese curing upon the cool, canted, stone floors of apartments used in winter for cattle. The only odor perceptible anywhere was that of soap and water. The butter made by these exquisitely nice Dutchmen is sold in Amsterdam at sixty cents per pound, while ordinary butter brings only forty cents. The carriages used upon these soft, rich meadows have wheel tires from five to eight inches wide, and the land is so level that no hold back straps are required upon the teams that draw them.

He thought much of the success of the Hollander was due to the rich herbage which grows upon the reclaimed meadows, and believed that Americans would do well to grow much more clover than they do for their dairy cows. The Darlington butter of Pennsylvania, which stands so high in our markets, doubtless owes much of its fine quality to the sweet clover grown in the pastures there.

One of the grand secrets in feeding calves, as in feeding all live stock, is to change to any new food gradually, and to give no more than will be eaten with a good appetite. Young animals, too, need to be fed more frequently than older ones.

## A Titled Cowboy.

[New York World.]

One of the most interesting young men in the West just now is the Marquis de Mores, son-in-law of the New York banker Von Hoffman. Two years ago this Summer vague little paragraphs began to be seen in the Bismarck and other Western papers about a handsome young Frenchman who was buying vast acreage of grazing land out on the Little Missouri river and offering in a Quixotic way to furnish anybody who came along a hundred sheep to keep on shares. Everybody thought another Count Joannes had arisen and wandered out here. It took the best part of a year to convince people that De Mores was a sane man with money and a purpose. This now needs no argument to prove. The young Frenchman has laid the foundations of a fortune which will rival that of Von Hoffman himself. At first it was his intention simply to raise cattle. He then discovered that there was no systematic shipment of Montana beef to the Eastern market. Hotels in Fargo and Bismarck, with the fine young Montana cattle right at their doors, were paying 35 and 40 cents a pound for Chicago steaks. The reason for this absurdity was that no one could buy cattle in either of these towns in less than car-load lots. Montana steers were shipped on to Chicago, there slaughtered and the dressed meat shipped back. De Mores decided to remedy this by establishing abattoirs along the Northern Pacific Railroad at points where stockmen could drive their cattle in easily from the ranches. To complete the system he would erect refrigerating storehouses in every town where the beef demand warranted it. With refrigerator cars plying between slaughter-houses and distributing points, fresh meat could be furnished consumers regularly at prices 50 per cent. lower than by the old way.

De Mores has carried out this plan. He owns a dozen ranches, and has built abattoirs at Medora, Billings, Miles City and Helena. These houses are in full operation. Refrigerators have been built at St. Paul, Duluth and Fargo, and others are being put up at Granger, Mandan and Winnipeg. Incidentally to the scheme the pretty little town of Medora has been built up at the Northern Pacific crossing of the Little Missouri. When De Mores stepped off the train at Comba, the town that had been started at the crossing, his welcome was not a cordial one. The cowboys had the idea that he had come to drive them all off their ranches. The hunters said he would buy up their buffalo grounds. The young man really did act as if he were going to buy the earth. It was not long before words came to shots. Three cowboys undertook to drive the Marquis off a ranch he had bought just across the river. But De Mores was brought up in the French army, and was fresh from service in Algiers. The cowboys drove him to his hut, but their shots missed and his hit. One man, Reily, was killed and two others were badly wounded. The Marquis has had a fair field ever since. Medora has grown into one of the thriftiest towns on the Northern Pacific. The railroad station is a gem of architectural beauty. The hotel which De Mores built is as big as any on the line and as fine in every appointment. A freight line to the Black Hills has been established, which is always a source of rapid growth in these frontier trading posts.

Medora was named after the wife of De Mores, Medora Hoffman, who is the namesake of her aunt, the famously beautiful Medora Grimes. Her memory is freshened by the reminiscences of the late Sam Ward, who won her for his second wife when she was already the betrothed of a rich young Frenchman. The Marquis de Mores delights in sharing the wild life of her husband. In St. Paul she is the most rich and tastefully dressed woman you will see. On the plains she rides and shoots faultlessly. Galloping over the prairie, an eagle plume in her hat and a rifle slung from her saddle, she is the picture of wild beauty. De Mores on the frontier dresses in fringed buckskin shirts, top-boots and a cowboy hat. In St. Paul he is a polished French gentleman, open-hearted, witty, hospitable. The Marquis has an income of \$90,000 a year from a fortune which has been secured by her father beyond all possibility of loss. De Mores has 45,000 acres of farming lands along the Northern Pacific, besides vast estates in France and Italy.

## Chewing the Cud.

[Scientific American.]

Every child living in the country has stood and watched this curious operation, and wondered what the lump was which he saw come up in the cow's throat, and then go down again after she had chewed it for a certain length of time. And perhaps he may have seen the anxiety and turmoil produced on the farm by the report that some one of the cows had "lost her cud" and as the result of this excitement he may have seen the abstruse attempt to "make a new cud," in the hope that the cow would by such means be restored to good condition. There is in the minds of a large proportion of the readers of the *Scientific American* (which simply means the community) so little correct understanding of the true nature of "chewing the cud," that a few words concerning it may not be amiss.

A very large tribe of animals, of which sheep and cows are only familiar examples, are called in works of natural history *Ruminantia* because they all *ruminates*, they chew the cud. They do so because their peculiar organs of digestion require it; they can get their nourishment in no other way. They have, it is said in the books, four stomachs, but the statement is not strictly correct, for the entire digestion is done in a single one, that which is called the fourth, the other three being only places for preparatory work. Their food is swallowed without being chewed; the chewing is to come later. When this unchewed food is swallowed it passes directly into the first stomach, to use the common term; but drink which the animal takes goes straight past the entrance of the first into the second. These two serve only to soak and soften the coarse food. When the first has done what it can, the food passes out of it into the second, and then the cow or sheep is ready to "chew the cud."

The second stomach, while busy at work in soaking the food, keeps it in motion, and gradually rolls it up into masses, so that in the small upper part there is formed an oblong solid lump of the size that we recognize as the "cud." This the animal throws up into the mouth, and chews with evidently as much satisfaction as the same act of mastication gives us when we put the most delicate morsels between our teeth. When it is sufficiently chewed, the mass is swallowed and its place taken by another which had been rolled up in the mean time.

But the "cud" thus masticated does not return to the second stomach, from which it had come. It passes smoothly into the third, a place for additional lubrication, and then into the fourth, where the true digestion begins and ends.

## Don't Corner Youself.

The breeder who is always ready and anxious to sell the best he has to the first buyer who comes along can never for any great length of time hold his position at the front in his business. If he permits his flock or herd to be culled over by visiting purchasers, keeping for himself only what they see fit to leave him, the fame of his stock will be short-lived indeed. The moment his best breeders are parted with that moment does he remove the incentive for the same buyer to come to him again. His prestige and leadership leave him, in company with the animals on whose superiority his reputation is based. In view of this it is easily understood why breeders of experience and sagacity very often have something on which no price is set and for which no bid will be entertained. It may be an old and well-proven sire or dam, or it may be a young thing whose value is yet only a matter of promise. It is in either case in a measure priceless, and in giving it up the owner feels that, no matter what it may bring, to sell it would be a sacrifice. This idea may of course be carried too far—but it is difficult to say just how far it may be legitimately followed. This is a point for the proper decision of which no fixed principle may be laid down, and it must be left wholly to judgment and circumstance. We believe, however, that a man is often warranted in holding an animal at a price which no one else could pay for it, and which he himself could hardly pay for another of equal merit. There are many nice points centering just here, which can be much more clearly appreciated by the thoughtful breeder than explained on the printed page, and in them much of the success of the breeding business lies. One thing is certain—one cannot afford to build up and increase his stock on culls. He should always reserve a sufficient number of animals of unquestionable merit to insure the next season's produce to be fully up to his recognized standard. A high sale is a dear one indeed if it carry away with it the elements which establish local reputation and character.—*Pittsburg Stockman.*

## Desirable Hogs.

The different breeds of hogs have their fast friends, and no doubt they each have what their friends admire in them, but the average feeder who does not care to raise pigs to sell for breeding purposes, should strive to get a hog that will make him the most money for the feed put into it. In the first place a hog should have a good coat of hair; not bristles, but hair. A black hog will not get scurvy on his back; the sun will not blister him. A hog should have a good constitution, with round sprung ribs and good girth around the heart, short neck and head well put on, short face and nose, tail put on not way up on his back nor yet too low down, hams round and well filled, not too sluggish disposition nor yet too wild. By the purchase of the right kind of a male pig, the feeder can raise just such pigs as he wants to feed, and have much more profitable and healthy animals than he can buy.

The brood sows can be run on clover pasture in Summer at very little expense, and if provided with some good clover hay in Winter it will reduce their feed bills. Not enough attention is paid to providing good pasture for the pigs; they are generally kept in a barren lot with a generous sized mud hole in it, in which the water is so foul that just the smell of it is sickening let alone having to drink it. As for a change of pasture it is never thought of on account of the trouble of fencing it. The sensible way to provide for them is to have enough land devoted to their use so the pigs can have a good sweet pasture of clover all the time. Do not keep them on the same old poisoned ground for ten years, but when the grass gets run out plow it, and take off a couple of crops; then reseed to clover, and then let their hogships take fresh comfort, health and fat from the new, fresh ground and grass. This ground will then supply the living for the pigs, while in the other way of doing the pig lot is full of weeds, bare of grass and the bare ground covered with mud and hog wallows.—*Breeder's Journal.*

An Iowa man says in the *Country Gentleman*: "I have for two years raised all the young calves I could get in the Fall at a low price. I take them away from the cow at once, teach them to drink, then scald one part of oil meal, one part of corn meal, and eight parts of bran; wet enough to drink at first, but as soon as possible I feed them the same dry, as they are apt to sour on mash in cold weather. I have yearlings taken from the cow at three days old, which never tasted milk again. They weigh 750 pounds each, and are worth \$20 apiece. I consider that they cost me \$6."

The butter record secured by H. E. Alvord, of New York, from his Jersey cows, is certainly remarkable. In a test of 10 cows he secured an average for a year of 6 pounds 7½ ounces of merchantable butter for every 100 pounds of milk, and at times as much as 7 pounds 12 ounces of butter were made from 100 pounds of milk. The 10 cows averaged 398 pounds 10 ounces for the year; 12 cows 387 pounds, and 15 cows 377 pounds, or over a pound a day.

## SHEEP.

## A Century's Fluctuations in the English Wool Market.

A hundred years ago English lustre wool of fair average quality was, reducing the English currency to America equivalents, about 12½ cents per pound. Wools of the quality mentioned rose steadily until 1791, when an average price of 17 cents a pound was reached. In the next year this rose to 20½ cents, but in 1797 the price had fallen to 16 shillings 6 pence, or about 14 cents per pound. In the following years the markets fluctuated, until in 1802 a strong upward movement carried prices up to 62½ cents, "which must at that time," says the article from which these figures are obtained, "have seemed a very excessive price." A shrinkage in prices followed, but the market rallied, and quotations ranged from 24 to 28½ cents up to the year 1814, when a strong hull movement carried the figure up to the extravagant point of 37½ cents. The upward movement did not stop there, however, for in 1815 the average price reached 43 cents. The reverse which followed in 1816 brought good wools tumbling from 43 down to 27½ cents, a decline of 15½ cents per pound, or about 35 per cent.

"After these fluctuations," says *Home News*, "a period of calm attended the prices of wool, and from this time up to 1842 the value was but little altered, the range being from 24 to 27½ cents; but in the autumn of 1834 another upward bound was experienced, when wool jumped up suddenly to 46 shillings per tod (39½ cents per pound) and the value re-

maintained above 40 shillings for a considerable time. In 1843 a great decline was seen, and in midsummer of that year only 22 cents could be obtained for excellent wool. The next three years prices jumped a level of 25¢ to 27¢, but they fell back in 1847 and 1848 to 23 cents, and in 1849 brought them to the remarkably low limit of 19 cents. The next year a little of the lost ground was recovered, 22¢ cents having been secured and in the year following 26 cents was got, and this rose in 1852 to 32 cents. In 1863, when the civil war in the United States caused so great a demand for wool, prices rose suddenly to 44¢ cents, and in 1864 the highest point reached in England during the century was gained, 56 cents having been paid. From that time there was a decline, year by year, till 1870, when 31 cents was the average price. In 1871 the market rallied, and 46 cents was reached, while in 1872 a still further advance took quotations to 45¢ cents.

From 1872 the general course of the wool market has been downward. This was checked in 1879 and 1880, when prices rose from 23¢ to 32 cents, but in 1881 the value of fine-grown English wool was about 22¢ cents per pound; and from this low figure 1883 brought a still further decline to 19 cents per pound, the lowest point on record since 1849. *Home News* says the decline of last year was, "with the exception of the single depression of 1849, which lasted only for one year, the most remarkable decline in values which has been experienced in the present century. From the highest point of 56 shillings per tod in 1864 to that of 22 shillings at the present moment, there is represented a startling decline, and the difference in the value of the clip of English wool at these varying figures is something enormous. It may be interesting to point out that, taking the wool product of England at 15,400,000 pounds per annum, the value of the product in the year 1864 was £17,554,166, whereas the same quantity at the present would represent a value of £6,104,427—that is, taking the mean average of wool in 1874 at 63 shillings, 10 pence per tod (about 54¢ cents per pound), and at the present moment at 22 shillings 2½ cents per tod, or about 22½ cents per pound. The difference in value between the produce of these two years is thus no less than £11,449,730—a sum which indicates how enormous has been the shrinkage in the value of this portion of agricultural produce in the course of nineteen years."

Here is in brief the record of a century of fluctuations in prices of wool which 100 years ago stood at a figure 10 cents per pound below that of last year. In the century the price has reached a point 44 cents above that of the beginning of the century.

The *U. S. Economist* is of the opinion that wool is as good an article of merchandise to hold to-day as any commodity in market, simply because the available supply procurable will be found below the wants of the mills, and it is to the demand we must look for the establishment of prices, regardless of other considerations.

A flock-master expresses the opinion that for spring lamb a Merino ewe crossed with a pure South Down, will give the tenderest, sweetest, juiciest flesh that the most exacting epicure could desire.

## STABLE AND PADDOCK.

### Glanders in California.

That glanders is to a certain extent prevalent among the horses in some parts of the State, there can be no doubt. Reports and rumors are much more plentiful than affected animals, but well developed and carefully diagnosed cases have been found, and in four or five counties the authorities have appointed veterinarians to examine the stock of their jurisdiction and have taken measures to enforce the law regarding the destruction of such diseased horses. It is a contagious disease that has no remedy known to veterinary science. It can only be stayed by heroic treatment; the destruction of infected animals and the sequestration of suspicious cases until the actual presence of the disease is known or disproved. The experience of the Illinois State Veterinarian with glanders last Summer shows that this horrible disease can be only by the greatest watchfulness prevented from spreading from farm to farm and from town to town. There are but few cases of glanders in this country, and every trace of this incurable disease could be eradicated in a few months by prompt and thorough measures. But those whose horses are exposed to the deadly poison, or even show signs of the presence of the malady, are slow to confess its existence and ready to deny the correctness of the opinion of educated veterinarians who declare the animals to be suffering from glanders.

Those who should be most ready to make the existence of maladies of a serious nature known, and first to help in putting an effectual stop to their spread, are unfortunately disposed to shut their eyes to the facts, and refuse to listen to the reasons for at once ending all danger of their continued existence, when that can be done, as it can be in the case of the fatal contagious disease which have closed the doors of England against American cattle.

That anything but harm can come from temporizing; that any half-way halting measures will save the live stock interests of the country from heavy losses, no one who is acquainted with the truth will claim. Those who have studied the history of plague, aware of the enormous losses which have been caused by those scourges, join in the declaration that the only safe course to take is that which will in the most speedy manner utterly eradicate the germs of contagious disease whenever they may be found. The interests of any individual or of any class of dealers should not be permitted to hinder the work of each importance to the general public.

### Castration.

The effect of castration, in reference to its action as a modifier of the character, is so well known and admitted, that no further consideration is needful, but the influence it exerts upon conformation is not equally well understood.

Many persons advocate the operation for foals of six to nine months old, some defer it until the colts are one year, while others prefer the age of two years. It is not wise, however, to fix the period by a prescribed rule, for the results of castration vary according to the age of the animal upon which it is practiced. Its influence upon the form of those operated on in early life conduces to increased growth of body, and of those parts of the frame which are by nature more extensively developed in the mare than in the entire horse. The inference to be drawn from a knowledge of this result is, that the time selected for the operation should be subordinate to the physical features of the colt. If possessing, as a foal, a grand forehead, and comparatively mean hindquarters, castration can not be performed too early; if, on the other hand, there is ample development of the rear, associated with an imperfect forehead, the colt will profit by a postponement of the operation until he is two years old.—*Reynolds on Draught Horses.*

### To Make a Mare Allow Her Foal to Suck

Hitch the mare securely to a strong ring or timber in a corner of a large box-stall, pen or barn floor so that her right side may come against the partition on one side of the pen. This will bring another well of the partition directly in front of her, so that she cannot go forward. Take a strong leather strap with a buckle on one end, a pole strap to double harness or a strong hold back of single harness will answer. Take up the left fore foot, bending the knee so as to bring the foot well up to the back of her fore arm, just below the body, pass the strap twice around both fore arm and cannon bone and buckle tightly. After she finds she cannot free herself she will probably stand quietly on three legs, when, with the assistance of one or two other parties, the foal can be placed so that he will soon be helping himself.

Be as gentle as possible, for her refusal to nurse the foal is probably due as much to nervousness as anything. After a few lessons she will probably allow the youngster to take his milk without having her foot strapped up, and in a day or two will, in most cases, take proper care of it without assistance or care from any one. In very severe cases it may be necessary to put down posts to which strong planks can be nailed at the proper height, and two strong, short bars be arranged one in front of her breast, the other about the height of the breeching strap behind her. One plank on each side will be sufficient. The posts can be set firmly into the ground, selecting a smooth, level spot. Lead her between the planks, put the bars in front and behind her, and then strap her foot up, and in a short time the foal, with a little assistance, will have his fill.—*American Cultivator.*

The majority of overworked horses are found in teams that are not evenly mated, and not, as is generally supposed, where too heavy loads are imposed or when too long journeys are made. But very little attention is paid by many of our farmers and teamsters to the equal distribution of their working animals. We find too often a small horse hitched beside a large one, or a weak horse mated with a robust horse of perhaps double his strength. Such positions are much more tiresome and wearing on a horse than is generally supposed. Another thing is not frequently taken into consideration—that is, the condition of the roads over which loads have to be drawn. Light loads and quick trips are not taken advantage of as they might be, greatly to the benefit of the team. It is too often the case that so many hundred pounds are considered a load regardless of where it has to be hauled. A team may be able to haul an extraordinary load, but the question is, can it do it without injury? The old man who, when handling shingles, thought that if his team could haul as many as he already had on his wagon it could haul one more, and so kept on until he had an over-load, illustrates pretty well the theory upon which a great many of our teamsters act. It is a pretty nice matter to know just how much a team can pull, but it is a much nicer matter to know how to properly adjust the loads to the roads over which they have to be drawn. It is a very easy matter to permanently injure a horse by straining it, and in no other way is a horse more likely to be strained and injured than by being compelled to draw too heavy a load.

Men who would complain if they would be compelled to labor eight or ten hours per day think but little of compelling their horses to work from twelve to fifteen hours out of every twenty-four, and think nothing of it. Driving horses are generally the class of horses that sniffer the most from long hours, on account, perhaps, of the light labor of those who handle them.

Iowa horsemen are certainly reaping a reward for the enterprise they have displayed, and the money they have invested in this line of live stock. The breeders of Mahaska county, of that State, alone claim to have disposed of two hundred and twenty-five thousand dollars worth of horses in 1883.

A good remedy for lice on horses is to take soft soap 2 lbs., palm oil 1 lb., crude carbolic acid 1 lb., potash 4 oz.; melt and mix, then add four gallons of boiling water. When cool enough not to scald, wash the horse all over with the solution. Keep them from getting cold.

For worms in horses, feed a bran mash with plenty of salt, then give spigelia tincture in one dram doses. Syringe the rectum with two teaspoonfuls of turpentine and aqua ammonia, equal parts, in a strong solution of soap water quite warm.

The lighter the harness during the Summer season the better will it be for the horse. Superfluous harness is not only injurious and unpleasant for the horses, but it is also expensive.

Anything that would assist your horses in avoiding the flies should not be neglected. Rest does a horse but little good if he is continually annoyed by these pests.

One of the easiest things to do during this hot weather is to injure your horses by overheating them.

## POULTRY.

### When to Sell Chickens for Profit.

The complaint is often heard that there is no money to be made in rearing Spring chickens and selling them at the prices that generally prevail during the Summer months.

Likely this is the case with some, but the fault is with the producer and not with the chickens.

There is a good profit to the farmer in rearing several hundred Spring chickens each year, if properly managed and sold at the right time. Some may desire to know when is the proper time to sell for profit; to each my reply is, just as soon as they become of marketable size.

A chick eight to ten weeks old, if properly cared for from the time it was hatched, will be of fair frying size, and will, the first of May, sell at the stores of almost any railroad town for \$3 to \$4 per dozen, and at each an age has scarcely consumed one-fifth that value in food. Three bushels of meal will keep ten hens and one hundred and fifty chicks until the chicks are a month old; four bushels more will keep them the second month, at the end of which time most of the hens will have laid another litter of eggs and are ready to sit again; so three bushels will keep them two weeks longer, when they will be of good marketable size, sell for good prices and ought to be sold, for after this age they will consume about as much food as grown fowls. It costs but little more to keep chicks the first ten weeks of their lives, than it does per month, after that age; therefore, the great

profit to be derived from them, is in selling before they have consumed any considerable amount of food.

So you see the ten hens and one hundred and fifty chickens, until they are ten weeks old, have consumed only ten bushels of meal, which we will estimate at fifty cents per bushel, or \$5. To be on the safe side we will say that only one hundred of the chickens lived to be of marketable size, and they sell for only \$3 per dozen, which is a very low price, if the chicks are hatched out during February and March and to be sold in May. At \$3 per dozen they sell for \$25; or \$20 over and above the cost of feed.

During the months of April and May, three hundred more may be hatched out and as the early hatched ones are sold off as soon as they become of marketable size, the second lot will be more healthy and thrifty, and ready for the market earlier than the first lot had been kept. As the second lot becomes of marketable size they should be sold off also, and a third lot reared, which, if the producer wishes, may be kept for the Winter market.

By selling them off this way, just as soon as they become of marketable size, anyone may rear three times as many during the season as they would be likely to by keeping all of them for the Winter market. By so doing they would also realize at least five, and probably, ten times the profits from their sales of poultry that they would if they kept all until Winter; besides when they are sold as soon as they are of marketable size, there is no more risk of losing them by disease, or by accidents, hawk, owls, etc.

Almost anyone knows that a chicken during the first month of its age cannot consume much food, or any considerable amount during its second month, but after it becomes two and a half months old it will then consume nearly as much as a full grown fowl.

So if it requires ten bushels of meal to produce one hundred chickens to the age of two and a half months, how many bushels will be required to produce them to the age of nine or ten months—say until Thanksgiving or Christmas? And how much more, if any, will chickens hatched in February or March sell for during the Winter following, than they would have sold for the first of May, or as soon as they become of marketable size? These are important questions to be considered by the farmer or those who produce poultry for the market. But if it is desired to keep hens through the Winter for laying purposes, I would by no means advise the selling of all the early hatched pullets, for it is the very early hatched pullets that produce the most eggs during the Winter, and pullets hatched as late as the first of June, unless of the early maturing varieties, such as Leghorns, seldom begin to lay before the last of Winter or Spring; but I would say most emphatically, sell all that are intended for the market, as soon as they are of marketable size.—*Farming World.*

## THE KENNEL.

### The Pointing Quality in Dogs.

EDITOR BREEDER AND SPORTSMAN:—I have noticed the communications in your paper from "X" and "Dorr," in reply to Mr. Bradford. I think Mr. Bradford is right, and that the pointing quality or faculty in pointers and setters is the result of tuition and hereditary transmission, the same as the trotting faculty in horses. 'Tis true there is a natural tendency to point in dogs, as well as to trot in horses, but what I contend for is, that the constant development of this one particular faculty has become so prominent that in all thoroughbred animals that faculty may be looked for to exist with considerable certainty. I quote from Stonehenge, a modern authority: "The setter is, without doubt, either descended from the spaniel, or both are offshoots from the same parent stock. Originally it is believed, that he was merely a spaniel taught to stop or set, as soon as he came upon the scent of a partridge, when a net was drawn over the covey by two men. But when shooting flying came into vogue, breakers made the attempt to assimilate the attitude of the setting spaniel or setter as he is now called, to that of the pointer; and in process of time, and possibly also by crossing with that dog, they succeeded, though, even after the lapse of more than a century, the catoplectic condition is not so fully displayed by this setter as by the pointer." Again in crossing the pointer, he says: "In the endeavor to increase the speed and stamina of the pointer, the foxhound has been used as a cross by Col. Thornton and others. I have seen several pointers more or less crossed with foxhounds, and most of them have been very fast and stout, but in every instance there was unsteadiness behind, however carefully the dog was broken, and great difficulty has been experienced in getting any back whatever."

Gervase Markham, an ancient authority, whose quaint style reminds one of "honest Isaac," in his "Art of Fowling," says: "I know that in divers places in this kingdom the setting dogs are to be taught; yet, likewise I know they are sold at such great rate and prices, that no industrious man whatever, (which either loves the sport, or would be partaker of the benefit), but will be glad to learn how to make a dog himself, and so both save his purse and make his pleasure and profit more sure and delicate. The first thing, therefore, you must learn in this art, is to make a true selection of your dog, which you intend to apply to this purpose of setting; and, in this selection, you shall observe that, although any dog which is perfect and of good scent, and naturally addicted to the hunting of feathers, as whether it be the land spaniel, water spaniel, or else the mongrels between either or both of these kinds, or the mongrels of either of these kinds, crossed either with the shallow-flewed hound, the tumbler, the lurcher, or indeed the small bastard mastiff, may be brought to this perfection in setting (as I have seen by daily experience, both in this and in other nations); yet there is none so excellent indeed as the true bred land spaniel, being of a nimble and good size, rather small than gross, and of outrageous and fiery metal, evermore loving and desiring toil when toil seems most irksome and weary, which although you cannot know in a whelp so young, as it is intended he must be, when you first begin to train him to this purpose, yet you may have a strong speculation therein if you choose him from a right litter or breed, wherein by succession you have known that the whole generation have been endowed with all these qualities, or namely, that he is a strong, lusty and nimble ranger, both of active foot, wanton tail and busy nostril, etc. I confess, I have seen excellent rare setting dogs made in the low countries which have been of bastard tumbler's kind, and indeed I have found in them, (if I may so term it), a greater wisdom (which, indeed, is but a greater fear), than in our land spaniels, etc." The italics are mine.

Without quoting from more authorities, which I could if I had certain works that I have read within reach, I think it must be evident to any sportsman who will take the trouble to reflect upon the matter that the fine pointer faculty in setters and pointers is not born in them, but is due to training and what Markham calls "encession for whole generations."

GILROY, July, 7th.

E. LEAVELL.

YACHTING.

The Ocean Cruise of the Pacific Yacht Club.

By far the most successful and enjoyable yacht cruise ever sailed on the Pacific Coast, was the one of the Pacific Yacht Club the last holidays.

On Wednesday the 21st., the Aggie, sailed by ex-Commodore Macdonough; the Halcyon, Capt. Bruce of the Coasting Service; the Lurline, Capt. Matthew Turner, and the Lady Mine, Capt. Ott, got under way from Front St. wharf, at about 7:45, A. M., the former in tow of the Transit, the latter in tow of the Rescue, and the two others behind the Etne.

A sixteen knot breeze was blowing when the vessels cast off from the tags and light canvas came immediately into requisition, and soon the three leaders were jammed on the wind with fore end main gaff topsails, steyesails, jib topsails and water sails, in addition to their working sails.

The vessels soon afterwards came together, when the Aggie rapidly began to close the gap between her and the Halcyon when the latter hoisted an immense staysail which ran from the end of the jibboom to the end of the mainboom, and was made fast up aloft to the mainmast.

Now ensued one of the most glorious and magnificent marine spectacles ever witnessed anywhere near these latitudes. The three handsome schooners of our yacht fleet, with all the wind they could stagger under, with every available stitch of canvas pulling like a team of horses, tearing over the blue expanse of ocean, striving for first place.

The two leaders now ran neck and neck the balance of the way to Santa Cruz, each vessel as she rushed down a sea forging slightly ahead of the other, only to be overtaken as she met the next one.

The rest of the fleet got scattered over such a long course, the only other exacting test of speed being between Nellie and Fleur de Lis, the former carrying off the honor.

The subjoined table is official and gives the times with the exception of the Ariel, which failed to arrive until long after night-

fall, and does not give any correct time for the Lady Mine, which was not in the race. Of course her correct time would be the same as her actual time she being the longest vessel, but as the time allowance was figured on the Halcyon's water line this would change all the corrected time.

Table with columns: YACHTS, Start, A. M., Finish, P. M., Actual salngtm, Corrected time. Lists yachts like Aggie, Casco, Lurline, Halcyon, Nellie, Fleur-de-Lis, Annie, Ariel, Lady Mine with their respective times.

As will be seen the Aggie made the best actual time over her larger competitors and sufficiently so over the smaller ones to give her the race and the prize, a flag of white bunting with a red game cock in the centre, and the letters P. Y. C. and the year 1834 on it.

It was amusing to a disinterested observer to hear the various 'ifs' advanced by the losers and which ran somewhat as follows: Lurline—"If we had had enough wind we would have beaten you out of sight."

Halcyon—"If Captain Bruce and the crew had not been new to the vessel that flag would now heat our mast head."

Lady Mine—"We were not in the race and therefore did not try very hard."

Casco—"If our bottom was clean we would have showed you."

Nellie—"If we had not torn our staysail and come near losing a man you would never have had a show."

Fleur de Lie—"We kept too far to see or we would have 'knocked you out.'"

Annie—"If the wind had continued light we would have won the race with time allowance."

Ariel—"By gad, sir! If Jack had not mistaken a barn for the Light House we would have beaten the fleet, sir. Yes, sir, the whole fleet."

In response to all this the Aggie calmly responded, "Let those laugh who win."

The next day yachtsmen were kept busy entertaining the people of Santa Cruz who visited the yachts in great numbers, all the ladies receiving as a souvenir, a handsome ribbon with the name of the yacht on it.

Parties innumerable were gotten up in honor of the mariners, and the Fourth was spent as was the preceding day, "only much more so."

In response to a request of the Mayor of Santa Cruz, the race across Monterey Bay was postponed one day in order that there should be no possibility of any of the yachts failing to return in time to display their fireworks on the night of the Fourth.

This was a glorious sight; all the vessels with the exception of the Lurline were decorated with innumerable Chinese lanterns, and the fireworks were unique in character and very large in quantity. The Nellie made the best showing, while the Lurline, Casco, and Aggie were next with about the same exhibit.

The Halcyon had gone to Monterey and had not returned. The 5th saw all the yachtsmen with their working togs on and at ten o'clock the preparatory gun was fired, when the yachts got under way and jockeyed considerably for the windward position and for first place.

The wind was light from E. S. E. and the vessels crossed as follows: Annie, 10:17:43. Nellie, 10:22:04. Lurline, 10:25:43. Fleur de Lis, 10:26:43, and Aggie at 10:28:00, the three latter being well to the eastward, and consequently to the windward with the wind as it then was. The Lady Mine, Clare, and Nautilus (x Josephine x Mist x Reven x Lotus) started with the fleet while the Casco declined to race and started about an hour later.

About three miles off shore the fleet ran into a celer streak, and lay rolling and tossing in a heavy cross sea, without a breath of wind for some minutes, when the Annie caught the sea breeze and bending gracefully before it started off like a scared deer with sheets started and everything drawing. She was soon followed by the Lady Mine and Nellie in the order named, and then Lurline to leeward of the Aggie and about on a line with Fleur de Lis, caught the welcome breeze and scooted off leaving the two latter to keep each other company.

Finally Aggie's sails bellied gracefully out leaving Fleur de Lis alone. All that could be seen of the rest of the fleet was their kites, but Aggie soon afterwards hove up their hulls and passed little Annie, carrying spinnaker and gaff topsails making magnificent weather for a small boat in the heavy sea then running. Lurline rounded the Monterey stakeboat at 1 P. M., followed four minutes later by Nellie, six minutes by Lady Mine, twelve minutes later by Aggie, sixteenth minutes later by Annie, and thirty-seven minutes later by Fleur de Lis, whose ceiling master showed a great deal of determination in not going back to Santa Cruz after getting out of the calm streak.

Rounding the stakeboat all the vessels took in light canvas, and got under working sails with the exception of Lurline which carried staysail and Aggie which carried main gaff topsail. The leaders after rounding the stakeboat, kept away with a good full, and were followed by Annie, while Aggie sheeted home and reached to windward; Fleur de Lis adopting similar tactics.

This was not so much the result of the wind, but was mostly occasioned by the balloon jib, which was furled along the bowsprit, holding so much water when she plunged into the head sea. For fear of losing her bowsprit, and consequently her foretop mast as well, she was compelled to square away for Monterey to repair demages. This is to be regretted as from her position to windward she had a splendid chance to win the race, as was demonstrated by the Fleur de Lis taking second prize when at the time of the accident to Aggie she was fully eight miles to leeward end eastern of her. One of the morning papers unjustly scored Macdonough for turning back, and as the article in question contained many mis-statements, we desire to call attention to some of them here. In the first place it says that, 'Fleur de Lie caught Aggie, head over fist, and then on catching up with her, etc.' These are not the facts, and the merest tyro in yachting matters on this Coast is well aware that Aggie can beat Fleur de Lie under all circumstances, more especially when on the wind in a heavy sea way, such as we then running. Again it says that nothing could be seen damaged on Aggie. This shows that the truth was purposely distorted or that the writer of the article is not sufficiently informed on nautical matters to observe a hobstey hanging in coils from the end of the jib boom.

To show that the Aggie was correct in squaring away we have to say that Capt. Sayer, Agent of the P. C. S. S. Co., at Santa Cruz, who was on board, who is a man of many years experience on the water, counselled a return, in spite of the fact that it was necessary for him to be at Santa Cruz that night. So anxious in fact was he, that Aggie was hove to in the middle of the bay and he was transferred et considerable risk on board the steamer San Vincente which happened to pass at that time.

It is to be regretted that a journalist, representing a large daily, should allow his private enmities to so warp his judgment as to descend to personal vituperation in a matter of this kind.

About half-way over the yachts met a very very heavy blow. Nellie which had taken out some ballast previous to the start, (which by the way we believe is contrary to the rules of the Pacific Yacht Club), was compelled to reef down and take the bonnet off her jib.

Annie, which was holding up well, carried away her jib and was compelled to run way to leeward before pointing her course again. Halcyon also carried away her jib but being a large boat was able to stay in the seaway. The boats arrived in the following order: Lurline, Lady Mine, Halcyon, Fleur de Lis, Nellie and Annie.

Halcyon had not gone over the course but had joined the fleet at Monterey, consequently she was not entitled to a prize, so the prizes go to Lurline, Fleur de Lis, Nellie and Annie, as the subjoined table will show.

Table with columns: YACHTS, Start, Monterey, Home, Actual time, Corrected time. Lists yachts like Lurline, Fleur-de-Lis, Nellie, Annie, Aggie with their respective times.

For some reasons we are glad Aggie did not finish, as it gives the Commodore and his gallant little loop a place in the race.

On reaching Santa Cruz the fleet was no longer controlled by sailing orders, and no other concerted action was taken during the cruise.

The race demonstrates one thing, which is that Monterey by is no place for yacht racing, with its calms, heavy seas and theu gales, a fact that even the victors ere glad to admit.

TIPS AND TOE WEIGHTS.

A Natural and Plain Method

Horse Shoeing, With an Appendix,

Treating of the Action of the Race Horse and Trotter as shown by instantaneous photography.

BY JOS. CAIRN SIMPSON, AUTHOR OF HORSE PORTRAITURE.

'Round-hoof'd, short-jointed, fetlocks shag and long. Shakespeare.

PRICE RETAIL: In Paper Covers \$1.00 In Cloth \$1.50

TRADE SUPPLIED ON USUAL TERMS. Mailed to any part of the United States or Canada on receipt of price.

Send orders to SAN FRANCISCO NEWS CO., or BREEDER AND SPORTSMAN, San Francisco.

508 Montgomery Street, San Francisco.

Annual Fair OF THE SONOMA and MARIN DISTRICT AGRICULTURAL ASSOCIATION. (DISTRICT NO. 4.) AT

Petaluma, August 26, 27, 28, 29 and 30, 1884.

The District comprises the counties of Sonoma, Marin, Napa, Solano and Lake.

SPEED PROGRAMME.

First Day—Tuesday, August 26, 1884. No. 1—Running, free for all, dash of one mile. Purse \$800.

No. 2—Trotting, 2:30 class. Purse \$800. No. 3—Trotting, district, for three-year-olds. Purse \$300.

Second Day—Wednesday, August 27. No. 4—Running, district, \$25 entrance, \$10 forfeit \$100 added. \$25 to second horse. One mile dash.

No. 5—Trotting, 2:22 class. Purse \$1,000. No. 6—Trotting, district, 2:40 class. Purse \$100.

Third Day—Thursday, August 28. No. 7—Running, for two-year-olds. \$25 entrance, \$10 forfeit, \$150 added. \$50 to second horse. Three-quarters of a mile dash.

No. 8—Running, free for all, purse \$500. Mile and repeat. No. 9—Pacing, 2:20 class. Purse \$600.

Fourth Day—Friday, August 29. No. 10—Running, selling purse, \$200; entrance free: \$50 to second horse; fixed valuation, \$1,000; to carry entitled weight, two pounds off for each \$100 below fixed valuation, and three pounds added for each \$100 above fixed value. One and one-fourth mile dash.

No. 11—Trotting, district, for yearlings, purse \$150. Mile dash. No. 12—Trotting, 2:27 class. Purse \$1,000.

Fifth Day—Saturday, August 30. No. 13—Running, free for all, purse \$600. Two mile dash.

No. 14—Running, consolation purse, \$150. \$50 to second horse. Horses beaten once allowed 5 lbs., twice 10 lbs., three times 15 lbs. from their entitled weight. One mile dash.

No. 15—Trotting, free for all, Director to wagon. Purse \$1,000.

No. 16—Trotting, district, for gentlemen's roadsters; purse \$150; owners to drive; to road wagons or carts weighing not less than 150 pounds.

Horses in all district races must have been owned in the district June 1, 1884.

The track has just received a dressing and is in first rate condition—both fast and safe.

Entries to close August 1, 1884.

REMARKS AND CONDITIONS.

All trotting and pacing races are the best three in five, except the yearling trot, unless otherwise specified; five to enter and three to start. But the Board reserves the right to hold a less number than five to fill, by the withdrawal of a proportionate amount of the purse. Entrance fee, ten per cent. on purse, to accompany nomination. All purses unless otherwise specified divided at the rate of fifty per cent. to first horse, twenty-five per cent. to second, fifteen per cent. to third, and ten per cent. to fourth.

National Association Rules to govern trotting; but the Board reserves the right to trot heats of any two classes alternately, if necessary to finish any day's racing, or to trot a special race between heats. A horse making a walk-over shall be entitled only to the entrance money paid in. When less than the required number of starters appear, they may contest for the fifteen per cent. to be divided as follows: 65% to the first and 35% to the second.

In all races entries not declared out by 6 P. M. of the day preceding the race shall be required to start. Where there is more than one entry by one person or in one interest, the particular horse they are to start must be named at 6 P. M. of the day preceding the race. No added money paid for a walk-over.

Entries for the State Agricultural Society to govern running races, except when conditions named are otherwise.

Non-starters in running races will be held for entrance under Rule 3.

Racing colors to be named in entries. In trotting races, drivers will be required to wear caps of distinct color, which must be named in their entries.

Entries to all of the above races to close with the Secretary on Friday, August 1, 1884.

Entry blanks and racing rules will be furnished upon application to the Secretary.

J. McM. SHAFER, President. W. E. Cox, Secretary.

Bay District ASSOCIATION Fall Meeting, 1884.

The horse winning the first heat to take \$125 and go to the stable, the horse winning second heat to take \$100 and go to the stable, the horse winning third heat to take \$75 and close the race.

Remarks and Conditions.

All trotting and pacing races are the best three in five; five to enter and three to start. But the Board reserves the right to hold a less number than five to fill, by the withdrawal of a proportionate amount of the purse. Entrance fee, ten per cent. on purse to accompany nomination. Trotting and pacing purses divided at the rate of sixty per cent. to first horse thirty per cent. to second, and ten per cent. to third.

National Association rules to govern trotting; but the Board reserves the right to trot heats of any two classes alternately, if necessary to finish any day's racing, or to trot a special race between heats. A horse making a walk-over, shall be entitled only to the entrance money paid in. When less than the required number of starters appear, they may contest for the entrance money, to be divided as follows: 66% to the first and 34% to the second.

In all races, entries not declared out by six P. M. of the day preceding the race, shall be required to start. When there is more than one entry by one person or in one interest, the particular horse they are to start must be named at 6 P. M. of the day preceding the race. No added money paid for a walk-over.

Except as otherwise specified, running races will be conducted under the rules of the Pacific Coast Blood Horse Association.

Non-starters in running races will be held for entrance under rule 3.

Racing colors to be named in entries.

In trotting races, drivers will be required to wear caps of distinct colors, which must be named in their entries.

Entries to all of the above races, except fixed events, to close with the Secretary on Saturday, August 1, 1884.

Entry blanks and racing rules will be furnished upon application to the Secretary.

HAVING CONDUCTED SOME OF THE MOST successful sales, notably those of Messrs. Whipple, Colgrove, Dietz, Conits, Dougherty, Newland & Hammond, Daniel Cook and others, we feel assured of our ability to give satisfaction in all business entrusted to our care. Sales will be made in all cities and counties in the State. We have in contemplation a series of combination or breeders' sales, similar to those so successfully held at the East. We will be pleased to enter into correspondence with parties desiring to participate in such sales. Private purchases and sales of improved live stock of all descriptions will be made on commission and stock shipped with utmost care. Several fine ranches at private sale. Purchases and sales made of land of every description.

**Important Sale of Thoroughbred Horses.**  
BY DIRECTION OF  
**THEODORE WINTERS, ESQ.**  
We will Offer for Sale  
Thursday, July 17th, 1884.

At the Stables of C. H. SHEAR, opposite Agricultural Park, Sacramento,  
Seventeen Head of Thoroughbred Horses  
COMPRISING

All his two-year olds and yearlings, together with the crack three-year-old Prince of Norfolk and the famous hurdle mare Hattie B.  
It is Mr. Winters positive intention to retire from the turf and confine himself strictly to breeding. Hence his entire string will be offered without reserve. The colts in training will be galloped until day of sale, that they may be kept in order for racing purposes. The horses may be seen previous to sale at the Winters' Ranch, Riverside Road, near Sacramento. A competent Veterinary will be in attendance, to make all examinations desired by purchasers. Killip & Co. will execute commissions for intending buyers who cannot be present.  
Catalogues giving full pedigrees, etc., will shortly be issued. For information apply to

**AUCTION SALE**  
—OF—  
Pure Bred Jersey Cattle,  
THE PROPERTY OF  
**ROBERT BECK, ESQ.**  
—TO TAKE PLACE—  
Thursday, July 17, 1884.

IMMEDIATELY UPON THE CONCLUSION OF THE sale of Mr. Winters' horses, we will offer twenty head of THOROUGHBRED JERSEY BILLS, COWS and HELFERS, all registered in the American Jersey Cattle Club, and in Pacific Coast Jersey Cattle Club Registers. These cattle are of the choicest milk strains, being chiefly descended from Touchstone, the most famous Jersey bull imported into California. Several high grade cows and helpers will also be offered.  
The sale will take place at stables of C. H. Shear, opposite Agricultural Park, Sacramento.  
Catalogues giving pedigree and full information will be issued in a few days.

The Board of Directors will have absolute charge of the Track and Grounds during the week of Races, and guarantee that they will be kept in first-class condition.

The above rules in regard to entries and conducting the Races will be strictly enforced, and all purses and stakes will be paid when the Judges have rendered their decision, and before leaving the Stand.

N. B. In all running races the second horse saves entrance. The time of closing entries extends to August 1st, at 10 o'clock P. M.

C. C. MASON, PRESIDENT.

ROLAND DILLER, SECRETARY.

Dissolution Sale of Trotting Stallions, BROOD MARES, Roadsters, Colts, Etc.

In Consequence of the Dissolution of Co-partnership of Messrs NEWLAND & PUMYEA, we will offer for sale on SATURDAY, July 19, 1884,

AT OAKLAND TROTTING PARK,

FIFTY HEAD OF WELL-BRED HORSES. AMONG the yearlings and two-year-olds are the get of Steinway, Grand Moor and Poscoro Hayward.

The brood mares are principally Hambletonian. The stallions are the well known Grand Moor, by the Moor, dam Vashiti, by Manbrino Patchen; and the two-year-old colt by Newland's Hambletonian (the by Speculation) out of Phaeola by Silverthreads, her dam Minuchaha, dam of Beautiful Bells, Eva, Sweetheart and others.

The roadsters comprise fine driving horses, both single and double, and several matched carriage and road teams. There will also be offered road and track sulkies, light and heavy driving carts, etc.

The horses, with the exception of brood mares, will be at stables of Newland & Pumyea, Seventh street, near Broadway, Oakland, until July 17th, after that date all may be seen at Oakland Park.

The sale will be absolute. Terms Cash. Catalogues will be issued in a few days.

KILLIP & CO., Auctioneers, 116 Montgomery St., SAN FRANCISCO.

IMPORTANT BREEDERS' SALE OF Trotting Stallions, COLTS AND FILLIES, Brood Mares, Roadsters, WORK HORSES, Etc.

The Property of S. J. TENNENT, at his Ranch, PINOLE STATION. Near Martinez, upon the line of the C. P. R. R., at 10:30 A. M. on THURSDAY, July 24th, 1884.

THIS SALE WILL BE ONE OF THE MOST important that has yet taken place in California, and will include Colts and Fillies by Echo, Steinway, Whipple's Hambletonian, Arthurton, Piale Patchen, Alexander, Gus, Reliance, and other noted Stallions.

Catalogues, giving full pedigrees and description, will be issued in a few days.

KILLIP & CO., Auctioneers.

THIRD ANNUAL MEETING

OF THE

SANT CRUZ COUNTY

Agricultural Fair Association. At Santa Cruz.

COMMENCING

Tuesday, Aug. 12, 1884,

AND ENDING

Saturday, August 16th, 1884

SPEED PROGRAMME

FIRST DAY, Tuesday, August 12th.

No. 1-Trotting race; three-minute class; Purse, \$400. No. 2-Trotting race; 2:40 class; Purse, \$200. Free for all horses owned in the district.

SECOND DAY, Wednesday, August 13th.

No. 3-Trotting race; 2:27 class; Purse, \$500. No. 4-Trotting race; Purse, \$150; three-minute class. Free for all horses owned in the district.

THIRD DAY, Thursday, August 14th.

No. 5-Pacing race; 2:20 class; Purse, \$400. No. 6-Trotting race; 2:50 class; Purse, \$150; for all horses owned in the district.

FOURTH DAY, Friday, August 15th.

No. 7-Trotting race; 2:40 class; Purse, \$400. No. 8-Running race; Purse \$150. Free for all; half mile and repeat.

FIFTH DAY, Saturday, August 16th.

No. 9-Trotting race; 2:22 class; Purse, \$500. No. 10-Trotting race; Purse, \$250; for all horses owned in the district.

CONDITIONS.

All trotting races are best three in five. Entrance fee, ten per cent. on all purses, to accompany nomination.

In all races five to enter and three to start. But the Board reserves the right to hold a less number than five to fill, by the withdrawal of a proportionate amount of the purse.

National Trotting Association rules to govern trotting, but the Board reserves the right to trot heats with any two classes alternately, if necessary to finish a day's racing, or to trot a race between heats.

No money will be paid for a walk-over. Horses entered in purses can only be drawn by consent of the Judges.

Rules of the Pacific Coast Blood Horse Association to govern running races.

All entries to be made in writing, to give sex, color and marks of horse; also name and residence of owner, and, in running races, colors to be worn by rider.

All purses divided at the rate of sixty per cent. to first horse, thirty per cent. to second, and ten per cent. to third. A horse distancing the field shall be entitled to only first and third money.

Entries to all the above races will close with the Secretary on Friday, August 1st, 1884.

R. A. KIRBY, President,

JAMES O. WANZER, Secretary.

Thoroughbred Berkshire Pigs.

I have now on hand, and offer for sale at reasonable prices, at my stock-farm, Oak Grove, San Mateo Co., a choice lot of pure Berkshire Pigs from two to twelve months old, bred from the best strains of Premium stock, which I import yearly from England direct. Apply to

Wm. Corbit, 218 California St., San Francisco.

RACING PLATES.

RACING PLATES OR TRAINING SHOES OF any size or weight, forwarded on receipt of price, \$2.50 per set. All plates and shoes guaranteed to be of the best material and workmanship. Samples can be seen at the office of the BREEDER AND SPORTSMAN.

DIETZ'S PATENT

CHECK HOOK.

Simple in its Structure and Practical in its Use.

The horse never loosens the check-rein when this Check Hook is used. Horsemen can appreciate the value of a Check Hook of this kind.

There being no springs or hinges to break connected with it, makes it serviceable and easily appended, as the check-rein passes through a solid ring attached to the front of the hook.

Orders sent to A. C. DIETZ, No. 9 Front St., San Francisco, Cal.

Will receive prompt attention. When ordering state whether gold or silver plate required.

## ATHLETICS.

### Americans at Lilliebridge.

[Special cable to the World.]

London, July 5.—The Lilliebridge athletic meeting took place to-day. The meeting was held under the joint management of the South London Harriers and the Manhattan Athletic Club, of New York. Six thousand people were present. There was much enthusiasm. The Americans were in hard luck. Waldron sprained his ankle and was easily beaten in the 100-yard dash by Cowie, who came in two lengths ahead, with Wood second and Waldron third. Fredericks was also beaten in the 1,320-yard dash. For the latter event there were only two starters—Snooks and Fredericks. Snooks won easily. Fredericks was evidently out of training. He ran prettily, and his style was much admired. The race was not an especially fast one. Snooks is a steady-going fellow, and his very steadiness would have defeated almost any one laboring under the disadvantage of part-training. Myers, Musprat and Ball competed in the 440-yard race. Myers won as he pleased in the very good time of 49 3-5s. Musprat was second and Ball third.

For the four-mile walk Murray led throughout. His time was 30m. 12s. Jervis was second and Meeks third. Murray's style was denounced as unfair.

W. G. George was present, and was an interested spectator. But, although much had been expected of him, he could not take part in the races. His feet were sore, presumably from much running or walking. There is a suspicion that the results were arranged beforehand, and indeed there was an unusually large number of casualties.

The latter part of the cablegram referring to the events being prearranged is simply nonsense. The victory of Myers in the quarter was expected on all sides. Fredericks of course had not a ghost of a show in the mile race. That Murray's style of walking should be denounced as unfair is much to be regretted, particularly when the slow time made is considered. Waldron is certainly not the best 100-yard runner in America and his defeat by Cowie and Wood is not a surprise.

### An Extraordinary Runner.

A correspondent writes to an English paper:—"Ernst Mensen, a Norwegian sailor, in the British navy, having distinguished himself in the battle of Navarino, (1827), left the navy and became a professional runner. He first attracted attention by running from London to Portsmouth in nine hours, and after that he ran from London to Liverpool in 32 hours. Subsequently he undertook to run from Paris to Moscow. Starting from the Place Vendome, at 4 P. M., June 11th, 1831, he entered the Kremlin, at 10 A. M., June 25th, having done the distance, (1,760 miles), in 13 days 18 hours. He soon got employment as a public courier, and became an object for sporting bets in European Courts, invariably beating mounted couriers when matched against him. He never walked, but always ran, his usual refreshment being one biscuit and an ounce of raspberry syrup per day, and two short rests of 10 or 15 minutes each in 24 hours. These rests he took standing, and slept with a handkerchief covering his face. In 1836 Mensen carried dispatches, in the East India Company's service, from Calcutta to Constantinople through Central Asia; he performed the distance, 5,615 miles, in 59 days. He died on one of his extraordinary tours, and was found resting against a tree as if asleep. He was buried just outside the village of Syang, in Upper Egypt."

### Personal.

Mr. Louis Gerichten, the well known professor of gymnastics, is organizing classes in boxing and fencing at his rooms, 316 Post St., between Stockton and Powell. His open time is Wednesday and Friday evenings, and Tuesday, Thursday and Saturday afternoons. Private lessons given at the rooms or at gentlemen's residences. The Professor's position as instructor to the Olympic Club and the Verein Eintracht are a sufficient certificate of his qualifications as a teacher, which are of the highest order.

Craig Wilmer, the winner of the 100-yard race at the W. A. C. Games, is the popular Captain of the New York Athletic Club, and one of the few men credited with running a hundred yards in even time. Mr. Wilmer's absence from the cinderpath extends about five years.

### How the Team Feel.

A well-known American, now in London, writes a private letter, from which we culled the following interesting paragraphs:

London, Eng., June 19.— \* \* \* The team are at last settled in what I may call "home quarters," and are getting along finely. I think Myers will win all of his races, notwithstanding that he has to run George three races, of a half mile, 1,000 yards, and 1,200 yards. I know his friends do not care to see him go over 1,000 yards, but if Myers did not consent to give George apparently the best of it at at least one distance, he would not run. Snook, of course, will be a competitor, now that he is running so well. Myers has gained several pounds, and will run at 116 to 118 lbs. When at this weight and form he is capable of almost anything. It is more than likely that he will "do" several records. They are all afraid of him even now, and every one swears that he runs easier and faster than he did in 1881.

Fredricks is suffering with a sore knee and a bruised shin, caused by his striking himself while skipping a rope on board the steamer, but he will, no doubt, shortly recover, as he has put on an American porous plaster. Notwithstanding this drawback, he ran 587 yards yesterday in 1m. 14s., which is quite equal to 1m. 16s. for 600 yards, and this, too, all alone.

Waldron, as yet, has not set out for hard work, but will no doubt do so in a day or two.

Myers ran 150 yards, yesterday, in 15 1-5s., and didn't try a bit, and this, too, after he had finished his other work.

Cowie ran a trial, and only did 10 2-5s. on one watch, and 10 1-5s. the other, for 100 yards.

I wish Waldron had more confidence.

Myers says he feels like a "fighting-cock." \* \* \* They will have a glorious meeting, July 5th, if it is a good day.—N. Y. Spirit.

### Williamsburgh Athletic Games.

The meeting of the Williamsburgh A. C., of New York, held on the afternoon of the 4th of July, was only moderately attended owing to the wet weather. The track was soft and heavy. Result:

One Hundred Yards Run—W. C. Wilmer, 4 yds., 1st; L. P. Smith, 5 yds., and A. M. Riddle, 8 yds., ran a dead heat for second position. Time, 10 2-5.

Half Mile Run—F. Smith, 50 yds., 1st; T. J. Murphy, scratch, 2d. Very close. Time, 2 minutes 0 2-5 seconds.

One Mile Walk—E. A. Kraft, 20 seconds, 1st; E. Lange, 5 seconds, 2d. Time, 7 minutes 27 seconds.

220 Yards Run—P. Martin, 10 yds., 1st; W. C. Adams, 3 yds., and H. Kraft, 12 yds., ran a dead heat for second position. Time, 24 3-4.

One Mile Run—C. M. Smith, 1st; E. Cunningham, 2d. Time, 4 minutes 18 3-5 seconds.

Hurdle Race—M. W. Ford, scratch, 1st; S. Russel, 16 yds., 2d. Time, 18 3-5 seconds.

Quarter Mile Run—T. J. Convey, 15 yds., 1st; P. A. Gilmore, 5 yds., 2d. Time, 55 seconds.

Running High Jump—M. W. Ford, 1st, 5 ft. 7 in.; S. Tumble, 2d, 5 ft.

Bicycle Race, Five Miles—Ed Pettus, 1st; H. J. Hall, 2d. Time, 21 minutes 54 3-5 seconds.

Jack McMaster's dog Tommy ran 100 yds. in 7 2-5 seconds, and 125 yds in 8 2-5 seconds.

### T. M. Malone and J. W. Byrne.

The three-event match for \$250 a side, between the above named athletes, was recently decided at Sydney, Australia. The first contest was the running high jump. Both cleared the bar at 5 feet 7 inches, and at 5 feet 10 inches Byrne also cleared the bar, but Malone failed. Malone cleared 21 feet 1 1-2 inches with ease and won the running high jump. Therefore the actual result rested on the 120-yard-hurdle race, over 10 hurdles, 3 feet 6 in. high. Malone led all the way by a couple of yards until the last hurdle was reached, when by a magnificent jump Byrne got on even terms with the Irish athlete, and after a desperate finish was just beaten. Time, 17 1-5 seconds.

The issue of June 21st of *The Illustrated Sporting and Dramatic News*, of London, contains an excellent grouping of the American athletes, Myers, Murray, Waldron and Fredericks.

### Crescent Athletic Club of San Diego.

Mr. Wallace Leach, a leading citizen of San Diego, furnished a large building with all the paraphernalia necessary for a well equipped gymnasium, and then invited the admirers of muscular development, in San Diego, to form a club. In response to the invitation a meeting was held on the night of June 27th, which was numerously attended. Dr. Gregg, who is an expert in gymnastics, remarked that a building like that in which they had assembled ought to have been constructed years ago, but no one could be found to invest, until Mr. Leach with his well known liberality and public spirit had built it. A gymnasium is the best place for a young man to spend his time, as it was excellent for promoting physical development and contributed to general good health, besides keeping the young men from bad company and associations. He heartily endorsed the suggestion of forming a gymnastic club, and was willing to do all in his power to further the object. The result of the meeting was the appointment of a committee on constitution and by-laws, etc., and at the next meeting the constitution was adopted and 72 members joined the Crescent Athletic Club. From a private source we are informed that the club now numbers over 100 members. The following gentlemen were appointed officers of the club for the ensuing year: President, G. W. Jorres; Vice-Presidents, W. E. Williams and C. L. Loomis; Secretary, J. M. Dodge; Treasurer, O. S. Hubbel; Executive Committee; Dr. R. J. Gregg, E. C. Briggs, James L. Copeland, G. W. Jorree and J. M. Dodge. Success to the Crescent Athletic Club of San Diego.

### Myers Breaks the Record.

The second international meeting, under the joint management of the Manhattan Athletic Club and the South London Harriers, was held at the Aston Lower Grounds, Birmingham, on July 7th. Half-mile Run—L. E. Myers, M. A. C., 1st; time 1 minute, 55 2-5 seconds, which now becomes the fastest amateur record in the world. 120-yards Run—G. G. Wood, L. A. C., 1st; A. Waldron, M. A. C., 2d by 18 inches; time 12 1-5 seconds. One-mile Run—W. Snook, Mosely Harriers, 1st; H. Fredericks, M. A. C., 2d, close up; time 4 minutes, 27 seconds. Two-mile Walk—F. Murray, W. A. C., 1st; time 14 minutes, 15 seconds.

The American team of Lacrosse players who returned triumphant from their English tour on July 6th, met the Canadian Lacrosse champions from Toronto July 9th on the Staten Island Cricket Grounds, and the home team were defeated by the Canadians with almost as much ease as the former had whipped the English Lacrosse team.

The five-mile footrace which took place at Toronto, July 9th, on the Woodbine Course, between David Bennett, of Toronto, and Edward Case, of Hamilton, for \$200 a side, was won by Bennett, by seventy-five yards, in 26 min. 26 sec. There was heavy betting on the result, Case being the favorite.

June 18th, on the New Market Field, seventh annual sports of the Limerick Athletic and Bicycle Club. Putting 42-lb. shot, with follow—W. Reel, Limerick, won at 28ft 1in. This is now the longest amateur record, supplanting 27ft. 10in., made by E. O'Grady, on same grounds, in 1878.

G. G. Wood, who ran second in the 100 and 440 yds. races at the late English championship games, is a very poor starter. *The Field* says:—"With constant practice at starting and getting into his running more quickly, Wood should make a good man indeed."

June 22d, at Stamford Bridge Grounds, London, Eng., annual Scottish Gathering. Putting 22-lb. shot—D. McKinnon, L. S. R. V., 35ft. 10in., which is now the longest amateur record.

W. Cummings, of Scotland, and N. Cox, of Bristol, England, are matched to run a four mile-race for \$250 a side, at Frailworth, on July 26th.

Herry Hitchens, the English phenomenal sprinter, has offered to give 10 yards start in 300 to any one who cares to meet him.

## TURF AND TRACK.

## The Five-Year-Olds at Chicago.

[Breeder's Gazette.]

In the four-year-old race given last year by the Chicago Driving Park the principal contestants were Alghath and Eva, and those who were present remember the race with interest and pleasure. In the first heat the contest was entirely between Alghath and Governor Stanford's filly Bonita. Both were accounted to have a great deal of speed, and consequently when they shot out at the first turn from the other spectators looked for a fast mile, and in this they were not disappointed, as Alghath came first to the wire in 2:23, which was a very creditable showing indeed for a four-year-old. Alghath had gained a record of 2:25½ as a three-year-old, and as Bonita had gone even faster than that it was considered that the contest for the first place lay between them, but in the succeeding heats Eva, another Californian, had things pretty much all her own way, and won the race in four heats with comparative ease. In the last heat of this race the attention of the crowd was drawn to a powerfully built gray colt. He had not been prominent in the previous heats, owing to his driving, but with a new man in the sulky he trotted an exceeding good mile, considering the use that had been previously made of him, being beaten only a neck by Eva in 2:26½, and had the distance to be traveled been a little further it is doubtful if the bay filly would have succeeded in keeping ahead of him. This horse was at that time called Billy Clinker, and his performance in this race impressed a Chicago man so favorably that at its close he purchased him for \$3,000.

These three horses, Eva, Alghath and Billy Clinker (now called Lynwood), again met each other on the Chicago track last Monday, they being this time engaged in a race for five-year-olds, and the only other competitor being Endymion, the black son of Dictator, for whom J. I. Case paid \$10,000 last fall. The race was watched with interest by a large number of breeders who were present, and by others all over the country the news of the result will be anxiously awaited. The owners of all the horses except Endymion thought they had a chance to win. Mr. Case's horse was known to be out of it from the start, from the fact of his not having a tith of the speed that of right belonged to him when in condition. Early in the Spring he was very fast, but steadily retrograded, until about three weeks ago a mile in three minutes was about his mark. It was then discovered that he was suffering from corns, and since treatment looking to their cure has been begun he has improved wonderfully, and is now again able to beat 2:30, but was, of course, in no condition for a race against horses of his age which had been carefully prepared and were in every way fit for the fray. The Alghath party were very confident that their mare would win. They knew that she had plenty of speed, and in a race between young horses this is fully as important an element of success as gameness. The few races she had trotted in Michigan it was thought must have done her good, and at Detroit, over a track that was not fast, the California mare, Belle Echo, beat her a nose only in 2:23½, and Andy McDowell, the driver of Belle Echo, openly announced his belief that Alghath would prove the victor. But public success is always the strongest hold upon public esteem, and for this reason Eva ruled favorite in the betting almost from start to finish. It was known that the gentleman to whom she belonged, Mr. John W. Mackay, cared nothing at all about the money features of her campaign. He turns over to the driver of Eva, Orrin Hickok, all the money that the mare wins, and, in addition to this, foots the training bills. What he desires is that she shall never be started in a race unless her chance to win is a good one, and knowing this the public naturally concluded that so good a manager as Hickok would not be on hand with his mare unless she was fully prepared for a long race and a fast one. The Lynwood people thought they held the key to the situation. While admitting the speed shown by Alghath in her work and races this year, they pointed to the fact that their colt had been beaten a head only by Maybird in 2:22½ over the Chicago track, and that he had since then improved in speed somewhat they were ready to admit. To the claims that he was not well-bred enough to stay, made by the partisans of the other horses, they replied that in the race last year he was as game as the best of them, and that his superior speed would more than cover any margin of gameness which the others might have over him.

It was under these terms that the race was begun. As the smart ones had predicted, Alghath won the first heat with comparative ease in 2:24, her only competitor being Endymion, and he was so clearly out of form as to not be able to make her go a hard heat. Eva's break just after the word was given caused her to fall far behind, and Hickok drove only with a view of getting inside the distance, which he accomplished without in any way distressing his mare. The Alghath people were jubilant over the result and confident for the future, and this confidence was increased when in the next heat there came away with Eva and beat her with comparative ease in 2:23. "I can come home the next heat in 2:21," said Fuller, who was driving Alghath, and the result showed that he had not overestimated the abilities of the daughter of Cnyler. She had the best of Eva all the way, and when inside the distance flag the Californian made a tired break, it looked as though the race was ended. But in carrying Eva wide on the lower turn, Alghath had necessarily left a gap between herself and the pole, and this opening proved the cause of her defeat, as McCarthy, behind Lynwood, took advantage of it at a critical moment, and coming with a wonderful burst of speed, beat Alghath to the wire a neck in 2:20½.

The third heat showed that Lynwood was strong as well as fast, but in spite of it all Alghath held her position as first choice in the betting, and in the fourth heat seemed to justify the confidence of her backers, as she went away very strongly, with Eva in second place. For seven-eighths of a mile the two horses had the fight all to themselves, but at the end of that distance Eva was clearly beaten, and a tired break settled whatever chance of winning the heat she might have had. But again Lynwood proved himself a trotter of merit. Fully two lengths behind the leaders when Eva broke, he pulled out and came down the home stretch at better than a 2:20 gait, and at the finish was an easy winner at 2:22½. It was now evident that Alghath must have a rest if her chance of winning the race was not to be entirely thrown away, and consequently she made no effort for the fifth heat. Thinking her to be his principal opponent, McCarthy did not make a move until it was too late to overtake Eva, with whom Hickok had put off in the lead and opened up as great a gap as possible. The result was that she won the heat easily in 2:25, thus enabling her to stay in the race, while otherwise she would have been sent to the barn for not winning a heat in five. It was this move on the part of McCarthy that lost the race to his horse,

as in the succeeding heats Eva was clearly the best one of the party, and had no difficulty in defeating Alghath and Lynwood in 2:25½ and 2:27½.

## Lake City Notes.

EDITOR BREEDER AND SPORTSMAN.—With most consummate stupidity the Chicago Driving Park gave no racing yesterday or to-day, simply because it was damp and unpleasant during the forenoon of each day, up until nearly eleven o'clock.

On the 5th instant, the sun shone brightly after half past one, and the track was in excellent shape. Washington Park held its sport, and Gen. Monroe's performances in the Cup clearly proved the day to be well suited for racing, while the performances of Nippon and Sedie McNairy, in the heat race further satisfied the dissatisfied trotting devotees that Tuesday was not so had a day for sport.

There was no racing at Washington Park Wednesday, and this fact gave the Driving Park every opportunity to gather in the multitude of visitors which thronged the city, anxious to go to some place of resort. But no, a slight mist in the morning dampened the ardor of the management, and they assured the public that under no circumstances would owners of horses speed their animals over such a track as they knew the Driving Park to be in. To prove how poor a day Tuesday was, I need only say that the chg Westmont paced three-quarters of a mile hitched with running mate, in 1:30, a two minute gait. Very slow track, I think.

On Wednesday I saw Jay-Eye-See trot a mile in 2:15, and repeat in 2:14, the last quarter in 31½ seconds, which certainly proves that the track was not in such bad condition.

At present Jay-Eye-See wears a bar shoe and on one of his ankles shows signs of a recent blister. He has thickened up quite a considerable since last season, though he remains the same incomparable performer.

The result of Westmont's fast mile was the making of a wager between J. S. Campbell and John Murphy, which will in the course of three weeks bring Frank and mate and Westmont and mate together in a race for \$2,500 a side. This race is intended to be a bona fide affair and I hope that for once a pacer can give the public the pleasure of witnessing a genuine race. Steeplechasers, hurdlers and pacers belong to the uncertainties of life and it is far better for a man to take his little pile of dollars and hand them to the side-wheeler at the beginning of each season, than to dream of winning anything from such contests. It is no use, the money is certainly thrown away, and why not give it to them at once and then go home and attend to one's business?

On the 3d of July, at Washington Park, Johnny Campbell stated that if he did not win the free for all pace on the following day he would bring Richhall over to the park and enter him in a selling race.

Those whose heads him make the assertion, now ask that he carry out the letter of his assertion, after which it is to be hoped that lightning will strike the balance of the side wheelers, thus removing from the turf as grand a combination of fraud and dishonesty as ever disgraced legitimate sport in any country.

Almont is dead. The wires have probably brought you news of this, and my statement will contain but little information. Still we cannot refrain from speaking of it, as with all friends of the breeding interests we deeply regret his sudden death.

Gov. Sprague is dead, Geo. Wilkes is dead, and now Almont's days of service are ended; surely the great State of Kentucky has cause to think herself twice robbed of her royal heritage of stallions, for concede what one will regarding those left, the fact is nevertheless true that the three most popular and valuable sires of trotters in the blue grass region have died with the past two years.

Almont mares and Almont stallions will jump still higher in the popular opinion of the world, and why shouldn't they? Certainly no other stallion has achieved greater success during so few years of service, either in his direct or remote descendants. Great-grand sons and daughters of Almont are coming rapidly to the front, all within the life of a not very aged horse.

Too liberal a supply of water and green grass were the immediate causes of Almont's death, which induced acute inflammation of the bowels and death was the result within forty-eight hours.

Clingstone went lame after an exercising mile in 2:17, and nothing further need be expected regarding his race with Jay-Eye-See until the Cleveland meeting. COLUMBUS.

CHICAGO, Ill., July 4th, 1884.

## Sale of Foxhall.

A cablegram from London states that Mr. James R. Keene, New York City, has sold to Lord Roseberry, for £4,800, or \$23,600, the American-bred horse Foxhall, bay, bred by A. J. Alexander, Woodburn Farm, Spring Station, Ky., foaled 1878, by King Alfonso, dam Jamaica by Lexington; her dam Fanny Lndlow by imp. Eclipse, out of Mollie Jackson by Vandal, etc.

Foxhall was purchased by Col. S. D. Bruce for Mr. Keene at the Woodburn Sale, June 18th, 1879, for \$650, and was shipped to England early in 1880. At two years old Foxhall started in three races, winning twice at Newmarket, October, 13th; won the Bedford Stakes, Bretly Stakes Course, with 122 lbs. up, beating Myra, Ishmael and Mynheer; won by a head. Value £175. Same place October 14th, ran second, with 122 lbs. up, to Savoyard, 122 lbs, for the Ashley Stakes, beating three others. Same place October 23th, won the Nursery Handicap, value £202, with 124 lbs. up, beating Heyday, 96 lbs. second, Accelerato, 91 lbs. third, and fifteen others; won by a head.

At three years old he started in seven races. At Epsom, April 27th, Foxhall, 92 lbs., ran second to Bend Or, 126 lbs., for the City and Suburban Handicap, about a mile and a quarter, beating Post Obit third, Petronel, Prestonpans, Barrett, and eighteen others.

At Ascot, June 16th, with 108 lbs., ran unplaced to Robert the Devil, 126 lbs., Petronel, 4 yrs. old, 126 lbs., second, Exeter, 5 yrs. old, 130 lbs., third, and Zealot, 4 yrs. old, 126 lbs., for the Gold Cup, about two and a half miles.

At Newmarket, September 29th, Foxhall, 129 lbs., won the Grand Duke Michael Stakes, across the flat, beat his stable companion, Don Filano, 122 lbs., second, Ishmael, 122 lbs., third, and Maskelyne, 122 lbs., fourth. Won by four lengths. Value, £747.

Same place, Oct. 11th, Foxhall 110 lbs, won the Cesarewitch Stakes, about two and a quarter miles, beating Chippendale, 5 yrs., 124 lbs., second, Fiddler, 3 yrs., 96 lbs., third, and sixteen others; won in a canter by twelve lengths. Value, £1,287.

Same place, Oct. 12th, Foxhall, 127 lbs. won the Select Stakes, Rowley mile, value £445, beating Tristan, 122 lbs., second, and Maskelyne, 122 lbs., third, won by nearly a length.

Same place, Oct. 25; Foxhall, 126 lbs, won the Cambridge-shire Stakes, about a mile and a quarter, beating Lucy Glitters, 3 yrs., 91 lbs. second, Tristan, 3 years., 107 lbs., third, Peter, 5 yrs., 140 lbs., Bend Or., 4 yrs., 136 lbs., Petronel, 4 yrs., 126 lbs., Mistake, 4 yrs., 102 lbs., Wallenstein, 4 yrs., 97 lbs., and twenty-four others; won by a head. Value £2,017. Foxhall is the second horse that has ever won the Cambridge-shire and Cesarewitch Handicaps in the same year; Roseberry, a four-year-old, being the other.

At Paris, June 12, Foxhall won the Grand Prix de Paris of 153,950 francs, with 121 lbs. up, beating Tristan second, Albion third and seven others.

At four years old started twice, winning once. At Ascot, June 8th, Foxhall, 126 lbs., won the Gold Cup, about 2½ miles, value 1,000 sovs., beating Faugh-a-Ballagh, 3 years 10½ lbs., second, and Petronel 5 years, 130 lbs. third; won by a neck, value \$1,240.

Same place, June 9th, Foxhall 131 lbs., ran second to Fiddler 4 years, 126 lbs., beating Petronel 4 years, 137 lbs., and Exeter 6 years 133 lbs., for the Alexandra Plate, about three miles. This finished his racing career as he went lame and could not be trained again. Foxhall made the season of 1884 at Leybourne Grange.

## Betting on the Races.

The year 1884 is a bad one for favorites so far and the effect is to reduce the volume of money staked very sensibly. This is the complaint in the East at present. In the book system, when the favorite wins a great many people, who have backed the certainty at short odds, win a little money, and ever so little won is a deal more satisfactory than a loss. But when a rank outsider gallops away with a race, only some few, who are in possession of a well kept stable secret, or lay on a little "just for a flyer" at long odds, get off with anything, the bulk of the money being scooped by the book-makers. The effect is not so noticeable in the auction pools, as the unpromising horses are generally bunched as "the field," and speculators are apt to take a field ticket or two as a saver. The following from the New York World gives an idea of how extensively the favorites have failed:

With the exception of the racing at Washington Park, Chicago, during the past week, the sport has not been of a very high order. The most conspicuous feature has been the almost total failure of the favorites. The recent meeting at Ascot, England, has been named "Black Ascot" from the same cause, and it was feared that the settlement on the following Monday would be very unsatisfactory. But the London sporting press agree that the settlement was not only prompt, but very satisfactory.

In this country, the betting being entirely in the ready-money system, there can be no such thing as an unsatisfactory settlement, for the professionals get their money in advance. But the continued failure of the favorites is beginning to tell on the general public, and the betting at Monmouth Park both on Friday and Saturday was very light, even more so than at Sheepshead Bay. How badly the favorites suffered during the week will probably be better understood by saying that out of seventy-six races run at Sheepshead Bay, Brighton Beach, Monmouth Park and at Chicago only twenty-eight were won by the favorites to forty-eight by non-favorites. A few years ago it was just the reverse. Then the favorites invariably won, and to that fact was due the retirement of the betting firm, Reed & Haughton, whose motto was to "pepper the favorites," the Englishman—as Mr. Haughton was known—being always ready to lay a trifle more against them than any one else, and the result was, it is said, the firm lost nearly a quarter of a million dollars in two seasons. But the present non success of the favorites is even more injurious to the turf. It takes the money out of the public's pockets, and instead of a hundred different individuals each winning a trifle the majority are losers and the minority are winners.

## A Question of Pedigree.

On June 13th the Hawaiian Agricultural Society held its annual fair at Kapiolani Park, Honolulu, and a speck of war has arisen in the equine world of the Islands, over the decision of the judges in the class of thoroughbred stallions. The horses exhibited for prizes were Waterford, Langford, Jr., and Gen. Garfield. The blue ribbon was awarded to Langford, Jr., and the owner and admirers of Waterford protested vigorously, but without effect. The Honolulu papers have criticised the decision freely and caustically, asserting that Langford, Jr., was not a thoroughbred and the owners of the winning animal have responded with a statement of his pedigree and an offer to match Langford, Jr., against any horse in the kingdom, except Bazaar, for \$2,000 to \$5,000, giving the acceptor the choice of any distance from two to four miles. Both parties have written us for a decision on the question of pedigree. The owner of Waterford asks us to state which we consider the better bred horse, Waterford or Langford, Jr. Probably Mr. Cornwell did not mean all the words convey, for if he had reflected a moment he would have seen that it was obviously an improper thing for us to do. The fact is both horses are strictly thoroughbred and the matter of which is the best bred is one of opinion only. Waterford's breeding has not been brought in question and as his pedigree has been repeatedly published and is familiar to all who have any knowledge of thoroughbreds it is not necessary to repeat it here. The impression that Langford, Jr., is "half bred," or something akin to it, is not confined to the Islands, but prevails to a certain extent among horsemen here, and to clear up that question we give his blood lines, of the correctness of which there is no manner of doubt.

Langford, Jr., chestnut horse, foaled 1876. By Langford, son of Belmont.

First dam Flora by Cosmo.

Second dam Fanny Harper by Grey Eagle.

Third dam Julia Ann by Medoc.

Fourth dam by imp. Eagle.

Fifth dam by Gallatin.

Sixth dam by Albert.

Seventh dam by Union.

Eighth dam by Tippeco Saib.

Flora was bred by A. M. Stevenson and at the time she was sent to Langford was owned by R. S. Carey of Sacramento. A short time afterward she was sold with the foal in utero, to W. L. Pritchard of Sacramento, and Langford, Jr., was foaled in Mr. Pritchard's ownership. There is no flaw in the pedigree of either horse, and the question of superiority was one for the judges to determine. Errors in judgments of this kind are among the risks exhibitors assume when they enter their animals for competition, and if the duties of judges are not always intelligently performed it is a condition not peculiar to Hawaii.

The Hawaiian Agricultural Show.

EDITOR BREEDER AND SPORTSMAN.—Once more I pen you a few lines in connection with our Island affairs. The Royal Hawaiian Agricultural Society held its second show on the 13th and 14th of June at their new site at Kapiolani Park.

The attendance was not as large as it should have been, probably because it was too far from the city and too expensive to get there for quite a number who, no doubt, would have attended had it been held at its former site.

The horses formed the principal exhibit, and I must say that they were a fine lot, numbering in all over one hundred, the accommodation being very good but scant this year.

Among the stallions we noticed "Boswell," the property of Col. C. H. Judd. This horse was imported from the farm of Gen. Withers, Lexington, Kentucky.

Next came Triumph, also imported from same place by the same party. Triumph was sired by Strader's Cassin's M. Clay, Jr.; dam the Martin mare claimed to be a thoroughbred.

We also noticed some of our California friends in Eureka, the property of B. F. Dillingham; Waterford, the property of W. Cornwell; Langford, Jr., Gen. Garfield and Old Venture.

The first prize was given to Boswell; second to Eureka, for the best imported stallions for carriage use.

The first prize was also given to Langford, Jr., as the best thoroughbred stallion, but according to my mind, Waterford was entitled to it (one of the judges claimed that he was not entitled to it because he was lame.)

The display of imported mares was rather slim and was confined to H. J. Agnew's bay mare Maude, sired by Major Rathburn's Bertrand Black Hawk; dam by Hamilton Chief.

B. F. Dillingham's black mare Baby, sired by Royal George.

H. J. Agnew's bay mare Idle Girl, sired by Wildidle, dam Robin Girl, and ten others whose owners neglected to furnish the pedigree. In this class the first prize was awarded to H. J. Agnew's Idle Girl.

The exhibit of native-hred mares was rather large, there being no less than twenty-one. The prize in this class was awarded to Col. Judd's Venns, though more than 90 per cent of the attendance favored H. J. Agnew's gray mare Kitty Malone, sired by Patchen Vernon, dam Baby, by Royal George, a beautifully formed mare, dapple grey, 16 hands, perfectly broken, and a flyer.

The produce of Venture, Boswell, Triumph, Waterford and Patchen Vernon was very good and the following claim special attention: Patchen Vernon, Jr., the property of B. F. Dillingham, sired by Patchen Vernon, dam pedigree unknown.

H. J. Agnew's Boswell, Jr., dam Maude, by Hamilton Chief.

Col. Judd's Norman Clay, sire Triumph, dam Sigmata, by Alamo, son of Almont.

Puss, sired by Gen. Knox, Jr., dam Sue; and Jas. Campbell's Starlight, by Venture.

Miles Bros. secured first prize for best carriage team, best imported stallion for draft use, and best imported jack, there being no others in competition in the two last named classes. There were also several fine horses and mares exhibited, but for some reason omitted in catalogues.

Mr. Gay's "Mystery," a fine imported mare, no pedigree furnished.

Gov. Dominis' Cator colt.

H. J. Agnew's bay colt Idle Boy, by Wildidle, dam Montana, by Harry of the West.

Same owner's bay filly Eva, by Flood, dam Rivulet.

Jas. Gay's ch filly Fiamma, by Monday, dam Abbie W., and several others.

There was a great deal of dissatisfaction at the result of the awards, and I must say that the judges selected for the occasion, either favored their friends or know very little about horses. In other countries, I have seen the judges take each class by itself and examine each entry individually in the stalls as well as on the parade ground, but perhaps the heat of the day was too much for them, for they sat down and had the stock led up to them for inspection; first a native bred mare, then a jack, then a thoroughbred, then a mule, then a saddle horse, next a four in hand, and so on. They would ask the name of the animal, who owned it, age, etc., and then pass it on. Native-hred mares led up and exhibited with imported mares and so everything was in confusion; no order, no classification or system. Many exhibits were not led up as no one seemed to know when or how they were wanted. After having gone through them in this straggling order, the judges went to town where they met and awarded the prizes. Several parties were so disgusted at the management that they took their stock home; Waterford taking the lead and hanging his head as if ashamed at getting the prize for best saddle horse when he was exhibited as a thoroughbred stallion. It is to be hoped that next year those having charge or management of this show will select horsemen for judges.

OAHU.

HONOLULU, July 3d.

Trotting at Portland.

CITY VIEW PARK, June 29.—Purse, \$250; three-quarter mile heats; 3 in 5. Florence E., ch m, Pathfinder, dam by Jack Miner—Buchtel. Sunset, ch g, by Geo. M. Patchen, Jr., dam by Belmont—Miner. Snowflake, gr m, by Snowstorm—Smiley. Johnny Blue, b g, by Alexander—Ruiter.

July 4th.—Purse, \$500; 2 1/2 class. Johnny Blue b g—Ruiter. Snowflake gr m—Smiley. Florence E., ch m—Buchtel. Sunset ch g—Miner. Venita, h f, by Almont—Beach.

July 5.—Purse, \$500; 2:30 class. Attamont, b h, by Almont, dam by Brown Chief—Beach. Johnny Blue, h g—Ruiter. Florence E., ch f—Leiby. Melrose, br g, by Sultan—Miner.

Racing at Union, Oregon.

The July meeting at Remillard's track, Union, Oregon, began on the 2d inst., with good weather and fair track. The events disposed of were as follows:

July 2.—Purse, \$60; for all horses that never contested for public money. One mile. J. W. Gentry's ch f Tiny A., 2, by Monte Cristo—by Dasher. Chas. Marsh's br g Brown Jug, 4, by Red Dollar. W. Water's br g Sprague, 3, by Osceola.

Won easily by a length and a half; Sprague a had third. Pools, Tiny A., \$20, Brown Jug, \$10, Sprague, \$4.

Same day.—Purse \$150; free for all ages; half mile heats. John Early's b g Dundrum, 6, by Melbourne, Jr.—Pironette. Jos. Kinney's b g Policy, 6, by Osceola—unknown. John Young's b b Bankroll, 5, by Dr. Lindsay—Rosa Mansfield. Wm. Leigh's ch h Othello by Monte Cristo—unknown.

Both heats easily won. Othello acted badly and was left at the post in the last heat. Pools: Dundrum, \$20; Othello, \$15; Bankroll, \$10; Policy, \$7.50.

July 3d.—Purse \$150; for three year olds bred in Oregon, Washington, and Idaho. One mile. Carman and Gentry's ch c Echo by Osceola—Sunshine by Dasher. John Young's ch c Dr. Lindsay, Jr., by Dr. Lindsay—Rosa Mansfield. W. Water's br g Sprague, by Osceola.

Won by four lengths. Echo a hot favorite in the hetting. Same day.—Purse \$200; for all ages; heats of 7/8 of a mile. Wm. Leigh's b m Repetta, 4, by Alarm or Reform—Long Nine. John Early's b g Dundrum by Melbourne, Jr.—Pironette. Jos. Kinney's b g Policy, by Osceola.

Both heats won hands down. Pools: Dundrum, \$30; Repetta, \$15; Policy, \$8.

July 4th.—Purse and stake \$500 for all two-year-olds; 5-8 of a mile. J. W. Gentry's ch f Tiny A., by Monte Cristo—by Dasher. J. W. Gentry's ch c Billy Mosby, by Monte Cristo—by Dasher. John Young's br c Villard, by Lodi—Rose Mansfield. M. W. Lasley's ch f Elva R., by Ophir—by Langford. M. W. Lasley's ch c Oro, by Ophir—by Langford.

Won at a gallop. Pools: Gentry's pair, \$20; Lasley's pair, \$10; Villard, \$5.

Same day.—Special purse for named horses; half a mile. W. Water's br g Brown Jug, by Red Dollar. Owner's ch h Joe Daniels. Owner's ch g Slasher.

The only trotting event of the meeting was a purse for two-year-olds.

July 4th.—Purse \$125; trotting for two-year-olds; mile heats. Pontius b g by Black Stranger, dam by Pathfinder—J. N. Ferguson. Redshaw s c by Bashaw, dam Nellie 3d.—W. Deal. Mary Sumner h f by Leman, dam by Bashaw—McKissick.

July 5th.—Purse \$100; for all ages; three quarters of a mile. S. J. Jones' hr h Forest King, by Monday—Abbie W. W. G. Scoggin br g Jim Merritt, by Langford—Sweetwater. R. E. Bybee's h f Neyella, by California—Lana Barnes. Murphy's ch g Bogus, by Ophir—by Imbrie's Heenan.

July 5.—Purse, \$100; for all ages; three quarters of a mile. S. J. Jones' hr h Forest King, by Monday—Abbie W. W. G. Scoggin br g Jim Merritt, by Langford—Sweetwater. R. E. Bybee's h f Neyella, by California—Lana Barnes. Murphy's ch g Bogus, by Ophir—by Imbrie's Heenan.

The Turf at Portland.

CITY VIEW PARK, July 4.—Purse, \$500; for all ages; half-mile. S. J. Jones' blk m Blue Mountain Belle, by Naps, 115 lbs. R. E. Bybee's h f Neyella, by California—Lana Barnes, 113 lbs. Murphy's ch g Bogus, by Ophir—by Imbrie's Heenan, 117 lbs.

July 5.—Purse, \$100; for all ages; three quarters of a mile. S. J. Jones' hr h Forest King, by Monday—Abbie W. W. G. Scoggin br g Jim Merritt, by Langford—Sweetwater. R. E. Bybee's h f Neyella, by California—Lana Barnes. Murphy's ch g Bogus, by Ophir—by Imbrie's Heenan.

At Chicago.

Mail dates from the Lake City are to the 10th inst., up to which time seven days of the Washington Park Meeting had been disposed of. The races in which Pacific Coast people will feel an interest are particularized as follows:

July 3d.—The Englewood Stakes, a sweepstakes for fillies, 3-year-olds (foals of 1881); \$1000 entrance, h. f.; or only \$10 if declared out on or before Feb. 1, 1884; or \$20 April 1, 1884; or \$30 if on May 15, 1884. All declarations void unless accompanied with the money; with \$1,500 added, the second to receive \$300 and the third \$100 out of the stake. Winners of any 3-year-old stake race of the value of \$1,000, to carry 5 pounds; of \$1,500, 7 pounds; of 3 or more than 3-year-old stake races of any value, 10 pounds extra. Maidens allowed 5 pounds. One mile.

Wm. Cottrell's ch f Mona, 3, by Buckden—Monomania, 115 lbs. Geo. W. Bowen's h f Binnette, 3, by Billet—Mira, 105 lbs. D. R. Harness' ch f Malaria, 3, by Bob Wolley—Margin, 105 lbs. Ed Corrigan's ch f Modesty, 3, by War Dance—Billet, 120 lbs. T. D. Pulsifer's ch f Hanap, 3, by King Ban—Hazem, 105 lbs. Fleetwood Stables' hr f Fac Simile, 3, by Enquirer—Faruletta, 105 lbs. E. J. Baldwin's ch f Savanna, 3, by Grinstead—Jesse C., 105 lbs. J. G. Greene & Co's ch f Easter, 3, by Enquirer—Mollie W., 110 lbs.

Pool: Modesty, \$50; Savanna, \$20; Mono, \$11; Binnette, \$9; field, \$11. Books, 4 to 5 against Modesty, 5 to 1 each against Mona, Savanna and Binnette, 10 to 1 against Fac Simile, 12 to 1 against Hanap, 20 to 1 against Malaria, and 30 to 1 against Easter. The flag fell to a capital start, with Modesty and Mona in the lead, Hanap third, Savanna fourth, the rest hunched, and Easter left at the post. Before the quarter was reached, Modesty was taken back, and Savannah went to the front, Mona second, two lengths behind, Fac Simile third. The race up the back stretch was a pretty one, the Californian etill leading, but at the three-quarters Bennette had forged into second place, with Mona lapped, here the favorite hung out signs of distress, and it was evident the extra weight was too much for her. In the stretch Mona came away and won by half a length, Binnette second, Malaria third. Time, 1:45 1/2. French mutuels paid, \$30.

Same Day.—The Boulevard Stakes, a sweepstakes for all ages, \$50 each, half forfeit, or only \$10 if declared out on or before May 15th, 1884, with \$1,000 added, the second to receive \$200 and the third \$100 out of the stakes. One mile and a quarter. Ed. Corrigan's b g Freeland, 5, by Longfellow—Belle Knight, 117 lbs. Perry & Walker's b g Long Knight, 4, by Longfellow—Belle Knight, 117 lbs. M. A. Walden & Co's blk f Thady, 4, by Tom Bowling—Cottell Bawn, 113 lbs. E. J. Baldwin's ch Gano, 4, by Grinstead—Santa Anita, 118 lbs.

Pool: Freeland, \$50 and the field \$20. Books, 2 to 5 against Freeland, 3 to 1 against Long Knight, 8 to 1 against Gano, and 25 to 1 against Tbody. At the start Long Knight got out on the work, with Freeland close up, Gano third, Thady last. At the stand Gano jumped to the front, leading the party to the quarter, Long Knight and Freeland along side, Thady fourth, going up the back stretch Freeland and Long Knight passed Gano and went neck and neck to the three-quarters, and from here to the wire the race was a clipper,

Freeland winning by half a length, Thady third. Time, 2:11 1/2. French mutuels paid, \$7.10.

July 4.—The Columbia Stakes; a sweepstakes for all ages, \$101 each, h. f., or only \$15 if declared out on or before May 15, 1884, with \$2,000 added; the second to receive \$400, and the third \$150 out of the stakes. Weights 5 lbs. below the scale. A winner of any race in 1884 of the value of \$1,500 to carry 5 lbs. extra. One mile and three-quarters. Ed. Corrigan's h g Freeland, 5, by Longfellow—Belle Knight, 118 lbs. T. J. Megibben's ch c Audrain, 3, by Springbok—Aime, 103 lbs. E. J. McElmeel's General Monroe, 6, by Tom Bowling—Minnie T., Morgan, 122 lbs. C. L. Hunt's ch g John Davis, aged, by Harry Tallon—Belle Savers. E. J. Baldwin's g Lucky B., 5, by Longfellow—Belle Knight, 118 lbs. W. L. Cassidy's br h Blazes, 6, by Leamington—Lady Motley, 117 lbs.

Pool: Gen. Monroe, \$100; Freeland, \$60; Audrain, \$50; field, \$25. Books—6 to 5 against General Monroe; 2 to 1 against Freeland; 5 to 1 against Audrain; 7 to 1 against Blazes; 8 to 1 against Lucky B., and 10 to 12 against John Davis.

John Davis jumped to the front when the flag fell and led to the stable turn where he gave place to Lucky B., the others being well up, Blazes being in the last position. John Davis again assumed the lead in the stretch and passing the stand he was half a length ahead of Lucky B., he the same distance ahead of Freeland. On the club house turn Hennessey sent the favorite into second place, passing the quarter Stoval gave Andrian his head and the game little fellow rushed to the front, he leading Monroe by a length at the half, Freeland being third and Lucky B. and John Davis running neck and neck in the rear, Blazes out of it. Murphy now began riding Freeland, and entering the stretch the green and green of the Corrigan stables were in the second place. Freeland now raced to the front and overhauled Audrain at the seven eighths pole, he beat him home by two lengths, the favorite being three lengths further away. Time, 3:07 1/2. Paris mutuels paid, \$15.00.

Same Day.—Purse \$700, of which \$100 to the second and \$50 to the third horse. Winner of any heat race during the meeting to carry 10 pounds extra. Three-quarters of a mile heats, best three in five. J. E. Haggin's ch m Nellie Peyton, 5, by Hurrah—Emily Peyton, 110 lbs. James Murphy's ch f Salara, 3, by Salvalor—Lady Stockwell, 99 lbs. R. Jervis' ch g Nippon, 6, by Tom Bowling—Kate Duncan, 112 lbs. J. M. Ackerman's br g Nimblefoot, aged, by Waverly—Mollie Cad, 212 lbs. John Forch's h m Bonnie Bird, aged, by Judge Curtis—Bonnie Braes, 110 lbs. D. Farrell's ch g Revoke, 5, by Harry O'Fallon—Sally Dowe, 112 lbs. T. L. Lewis' b c Trouble, 4, by Albert—Bonnie Maggie, 113 lbs.

First Heat—Pools: Nellie Peyton, \$80; Nippon, \$65; Salara, \$25; Bonnie Bird, \$20; Trouble, \$9. Books: 2 to 1 against Nellie Peyton, 5 to 1 against Salara, 7 to 1 against Revoke, 5 to 1 against Nippon, 18 to 1 against Nimblefoot, 40 to 1 against Bonnie Bird, and 50 to 1 against Trouble. Nippon led the bunch clear into the stretch, where Salara, Nellie Peyton, Bonnie Bird and Nimblefoot joined issue with him. Nellie Peyton was eased up at the seven-eighths pole, and Nippon and Salara drawing clear of the others had a driving finish, the former winning by a short half length, there being two lengths between second and third. Time, 1:18 1/2.

Second heat—Pools: Nellie Peyton, \$70; Salara, \$30; field, \$50. Books, 3 to 5 against Nellie Peyton, and 5 to 2 against Salara, the others as before. Nippon showed up in front before the half was half reached, and retaining his position he led into the stretch followed by Salara, Nellie Peyton and Bonnie Bird. Nellie Peyton and Salara soon ran away from the others, and a magnificent race to the wire ensued, the former winning by three-fourths of a length, there being three lengths between second and third. Time, 1:18.

Third heat—Pools: Nellie Peyton, \$50; field, \$10. Nimblefoot led the way to the half with Bonnie Bird and the favorite running neck and neck a half length in the rear, the others out of it. Nellie Peyton and Bonnie Bird heading the leader on the stable turn, and the trio came into the stretch all in a bunch. A driving finish followed, the favorite winning by three-quarters of a length, there being three lengths between second and third. Time, 1:18 1/2.

Fourth heat—The betting was all over, Nellie Peyton and Salara were the only starters, and they ran neck and neck to the half, when Salara gave it up, and Nellie Peyton coming away won by five lengths in a big gallop. Time, 1:20. Paris mutuels paid, \$9.60, \$7.20, and \$6.10.

July 5th.—The Hyde Park Stakes. A sweepstakes for 2-year-olds (foals of 1882); \$50 entrance, p. p.; or only \$10 if declared out on or before Feb. 1, 1884; or \$15 by April 1, 1884, or \$20 on May 15, 1884. All declarations void, unless accompanied with the money; with \$2,000 added, the second to receive \$300, and the third \$200 out of the stakes. Winners of any stake race of the value of \$1,000 to carry 5 pounds; of \$1,500, 7 pounds; or three or more stake races of any value, 10 pounds extra. Three-quarters of a mile. E. J. Baldwin's ch c Verano, 2, by Grinstead—Jennie D., 110 lbs. R. C. Fats' h f Belle Pate, 2, by Great Tom—Variety, 100 lbs. J. T. Williams' ch c Joe Cotton, 2, by King Alfonso—Imp. Inverness 105 lbs. Milton Young's h c Bootblack, 2, by King Alfonso—Beatitude, 105 lbs. J. E. Swiney's ch c Redstone, 2, by Wanderer—Rudie Pearce, 112 lbs. E. J. Baldwin's b c Volante, 2, by Grinstead—Sister to Clara D., 105 lbs. W. Cottrell's b g Jim Guest, 2, by Buckden—Mrs. Grigsby, 102 lbs. Ed Corrigan's h c Isaac Murphy, 2, by Virgil—Mary Howell, 115 lbs. Ed Corrigan's ch c Irish Pat, 2, by Pat Malloy—Ethel 105 lbs. Gray & Co's ch g Celsius, 2, by Faustus—Lady Restless, 112 lbs. J. G. Greener & Co's ch f Enfilade, 2, by Enquirer—Capitola, 100 lbs. H. Woodford's ch c Minniech, 2, by Charleston—Flower Wine, 100 lbs. T. J. Megibben's b f Vallisea, 2, by Virgil—Mollie Cad, 100 lbs. P. G. Speth's ch c Thistle, 2, by Great Tom—Ivy Leaf, 105 lbs. G. D. Wilson's ch c Favor, 2, by Pat Malloy—Favorite, 115 lbs.

Pool: Corrigan's pair, \$50, Baldwin's pair, \$40, and the field, \$31. Books: 2 to 1 from each against Isaac Murphy and Verano, and all the way from 6 to 10 to 1 against each of the others. The large field was sent away in a bunch, and passing the half Vallisea was in the lead with Belle Pate in the second place. Belle Pate ran to the front on the stable turn and showed the way into the stretch, Verano now came with a rush and joining issue with the leader near the seven-eighths pole, the pair had a driving finish, Verano winning by a length, with distance between second and third. Time, 1:19.

Pool: Freeland, \$50 and the field \$20. Books, 2 to 5 against Freeland, 3 to 1 against Long Knight, 8 to 1 against Gano, and 25 to 1 against Tbody. At the start Long Knight got out on the work, with Freeland close up, Gano third, Thady last. At the stand Gano jumped to the front, leading the party to the quarter, Long Knight and Freeland along side, Thady fourth, going up the back stretch Freeland and Long Knight passed Gano and went neck and neck to the three-quarters, and from here to the wire the race was a clipper,

Freeland winning by half a length, Thady third. Time, 2:11 1/2. French mutuels paid, \$7.10.

July 4.—The Columbia Stakes; a sweepstakes for all ages, \$101 each, h. f., or only \$15 if declared out on or before May 15, 1884, with \$2,000 added; the second to receive \$400, and the third \$150 out of the stakes. Weights 5 lbs. below the scale. A winner of any race in 1884 of the value of \$1,500 to carry 5 lbs. extra. One mile and three-quarters. Ed. Corrigan's h g Freeland, 5, by Longfellow—Belle Knight, 118 lbs. T. J. Megibben's ch c Audrain, 3, by Springbok—Aime, 103 lbs. E. J. McElmeel's General Monroe, 6, by Tom Bowling—Minnie T., Morgan, 122 lbs. C. L. Hunt's ch g John Davis, aged, by Harry Tallon—Belle Savers. E. J. Baldwin's g Lucky B., 5, by Longfellow—Belle Knight, 118 lbs. W. L. Cassidy's br h Blazes, 6, by Leamington—Lady Motley, 117 lbs.

Pool: Gen. Monroe, \$100; Freeland, \$60; Audrain, \$50; field, \$25. Books—6 to 5 against General Monroe; 2 to 1 against Freeland; 5 to 1 against Audrain; 7 to 1 against Blazes; 8 to 1 against Lucky B., and 10 to 12 against John Davis.

John Davis jumped to the front when the flag fell and led to the stable turn where he gave place to Lucky B., the others being well up, Blazes being in the last position. John Davis again assumed the lead in the stretch and passing the stand he was half a length ahead of Lucky B., he the same distance ahead of Freeland. On the club house turn Hennessey sent the favorite into second place, passing the quarter Stoval gave Andrian his head and the game little fellow rushed to the front, he leading Monroe by a length at the half, Freeland being third and Lucky B. and John Davis running neck and neck in the rear, Blazes out of it. Murphy now began riding Freeland, and entering the stretch the green and green of the Corrigan stables were in the second place. Freeland now raced to the front and overhauled Audrain at the seven eighths pole, he beat him home by two lengths, the favorite being three lengths further away. Time, 3:07 1/2. Paris mutuels paid, \$15.00.

Same Day.—Purse \$700, of which \$100 to the second and \$50 to the third horse. Winner of any heat race during the meeting to carry 10 pounds extra. Three-quarters of a mile heats, best three in five. J. E. Haggin's ch m Nellie Peyton, 5, by Hurrah—Emily Peyton, 110 lbs. James Murphy's ch f Salara, 3, by Salvalor—Lady Stockwell, 99 lbs. R. Jervis' ch g Nippon, 6, by Tom Bowling—Kate Duncan, 112 lbs. J. M. Ackerman's br g Nimblefoot, aged, by Waverly—Mollie Cad, 212 lbs. John Forch's h m Bonnie Bird, aged, by Judge Curtis—Bonnie Braes, 110 lbs. D. Farrell's ch g Revoke, 5, by Harry O'Fallon—Sally Dowe, 112 lbs. T. L. Lewis' b c Trouble, 4, by Albert—Bonnie Maggie, 113 lbs.

First Heat—Pools: Nellie Peyton, \$80; Nippon, \$65; Salara, \$25; Bonnie Bird, \$20; Trouble, \$9. Books: 2 to 1 against Nellie Peyton, 5 to 1 against Salara, 7 to 1 against Revoke, 5 to 1 against Nippon, 18 to 1 against Nimblefoot, 40 to 1 against Bonnie Bird, and 50 to 1 against Trouble. Nippon led the bunch clear into the stretch, where Salara, Nellie Peyton, Bonnie Bird and Nimblefoot joined issue with him. Nellie Peyton was eased up at the seven-eighths pole, and Nippon and Salara drawing clear of the others had a driving finish, the former winning by a short half length, there being two lengths between second and third. Time, 1:18 1/2.

Second heat—Pools: Nellie Peyton, \$70; Salara, \$30; field, \$50. Books, 3 to 5 against Nellie Peyton, and 5 to 2 against Salara, the others as before. Nippon showed up in front before the half was half reached, and retaining his position he led into the stretch followed by Salara, Nellie Peyton and Bonnie Bird. Nellie Peyton and Salara soon ran away from the others, and a magnificent race to the wire ensued, the former winning by three-fourths of a length, there being three lengths between second and third. Time, 1:18.

Third heat—Pools: Nellie Peyton, \$50; field, \$10. Nimblefoot led the way to the half with Bonnie Bird and the favorite running neck and neck a half length in the rear, the others out of it. Nellie Peyton and Bonnie Bird heading the leader on the stable turn, and the trio came into the stretch all in a bunch. A driving finish followed, the favorite winning by three-quarters of a length, there being three lengths between second and third. Time, 1:18 1/2.

July 9th—Purse \$500, of which \$100 to the second horse; for maiden 2-year-olds; horses not having run second for a sweepstakes of the value of \$1,000 allowed 5 pounds; three-quarters of a mile.

Table listing race results for July 9th, including names of horses and jockeys, such as E. J. Baldwin's b c Volante, 2, by Grinstead—Sister Annie, 105 lbs.

Pools: field, \$50; Tennessee, \$42; Volante, \$35. Books: 2 to 1 each against Tennessee and Volante, 3 to 1 against Mary Hamilton, 4 to 1 each against Exile and Constellation, and from 10 to 12 to 1 against each of the others.

Same Day—Purse \$500, of which \$100 to the second horse. Winner of any race during the meeting to carry 10 pounds, of any two races during the meeting 15 pounds extra. Five-eighths of a mile heats.

First Heat—Pools: Field, \$100; Mammonist, \$70; Sadie McNairy, \$50, and Premium, \$22. Even money against Mammonist, 5 to 2 against Sadie McNairy, 4 to 1 against Premium, 10 to 1 against Nippon, 10 to 1 against Lady Lond, and 50 to 1 against each of the others.

Second Heat—Mammonist, \$115; field, \$135. Books: 2 to 5 against Mammonist, and the others as before. P. D. Q., Mammonist and Nippon were in front at the start, but the latter was soon taken back, and at the half the leader was P. D. Q., Sadie McNairy being in the second place.

Third Heat—Pools: Sadie McNairy, \$100; Nippon, \$27. Books: No odds against Sadie winning, and 2 to 1 against Nippon. The pair ran almost neck and neck to the head of the stretch, where Sadie gave it up, and Nippon coming home in a gallop, won by three lengths, amid the cheers of the crowd.

July 10th—Quikstep Stakes, for two-year-olds, at 50 each, half furlong, \$10 only if declared by May 15th, 1884, with \$1,000 added, the second to receive \$20, the third \$10 out of the stakes; closed with 105 subscribers, of which 22 declared out; half a mile.

Table listing race results for July 10th, including names of horses and jockeys, such as E. J. Baldwin's b f Mission Belle, by Grinstead, dam Josie C, 107 lbs.

Pools—Misaion Belle, \$100; Lady Wayward, \$100; Gold Ban, \$50; Lady of the Lake, \$40; the field, \$100. Post odds, 2 to 1 against Mission Belle. Mutuals paid, \$16.

State Fair Colt Stakes.

The second payment in the trotting colt stakes of the State Agricultural Society was due on the 15th, and Secretary Smith sent us the following list of payments received. Others may be in transit and extend the list:

Four-year-olds—Happy Jim, Thapsin, Ha Ha, Regina, Center, Lincille.

Three-year-olds—Voucher, Antevolo, Roht Lee, Bay Rose, Tabbie Roecubann, Pope Leo, Nona Y, Lelepps.

Two-year-old—Lohengrin.

Colt Trotting at Colusa.

At Colusa on the 4th the match between the Tilton Almont colts Bella A., owned by W. R. Merrill, of Willows, and California Piedmont, owned by Wm. Billups, of Colusa, was trotted and won by Bella A. These colts are two-year-olds and the race was a private match.

Table listing race results for Colusa, July 4th, including names of horses and jockeys, such as Bella A., by Tilton Almont—W. R. Merrill, 111 lbs.

Another instance of having two foals reported, this time from Washington Territory. The Portland Rural Spirit says: "Mr. Alf. Banker, of Watsburg, W. T., under date of June 26, writes: 'Yesterday morning a Boffonvander mare foaled a fine horse colt, bright bay. I took her up to look after her for 24 hours. The foal was strong, eucked well and the mare was all right. At noon to-day, just 24 hours, she dropped a filly foal, black as a coal, large and strong.'

California Racehorses in the East.

The performances of the Pacific Slopers—Fallen Leaf, Verano, and Gano—at Latonia and Chicago have been such as to attract the attention of the turf world at large to these home-bred members of the Baldwin stable. All three from the loins of Grinstead, a first-class racehorse himself, were bred and raised on the sunny slopes of Santa Anita Farm, near Los Angeles, Cal., a section of our Union not inappreciatedly styled the garden spot of America.

In the Mountains.

The fair of the 11th district, comprising the counties of Plumas, Lassen, Sierra and Modoc, will be held at Greenville, commencing September 29th, and continuing five days. In the contest for location Quincy bid \$1,750 and Greenville \$2,220 bonus. The following is the speed programme, and it is more liberal than that of many other districts more favored in climate and topography.

Trotting—Class 3 m. 3 in 5, mile heats. Purse \$225. 1st horse, \$135, 2d, \$67.50, 3d, \$22.50. Free for district horses. Running—Mile heats, 3 in 5. Purse \$225. 1st horse, \$135, 2d, \$67.50, 3d, \$22.50. Free for all district horses.

Trotting—Class 2:34, 3 in 5, mile heats. Purse \$300. 1st horse, \$180, 2d, \$90, 3d, \$30. Free for all.

Running—3 mile and repeat. Purse \$140. 1st horse, \$84, 2d, \$42, 3d, \$14. Free for all.

Running—1 mile and repeat. Purse \$75. 1st horse, \$45, 2d, \$22.50, 3d, \$7.50.

Trotting—Go as you please, to make nearest time to 4:30. Purse \$50. 1st horse, \$30, 2d, \$15, 3d, \$5. Entries to close at time of starting.

Running—Mile dash. Purse \$150. 1st horse, \$90, 2d, \$45, 3d, \$15. Free for all.

Trotting—Free for all, 3 in 5, mile heats. Purse \$600. 1st horse, \$360, 2d, \$180, 3d, \$60.

Ladies' Equestrianism—Purse \$100. Best lady rider, \$30; 2d, \$25; 3d, \$20; 4th, \$15; 5th, \$10.

Trotting—2 year-olds, mile heats, 2 in 3. Purse \$200. 1st horse, \$120, 2d, \$60, 3d, \$20. Free for all.

Running—2 miles, 2 in 3. Purse \$500. 1st horse, \$300; 2d, \$150, 3d, \$50. Free for all.

The Santa Anita Stable holds its prominence on the Eastern tracks. The Chicago correspondent of the New York Spirit, discussing Verano, says: The result of the Hyde Park Stakes stamps the winner as probably the best two-year-old of the year, regardless of locality. The field, a very large one, embraced nearly all the best two-year-olds in the West, including Favor, Isaac Murphy and Redstone, all winners in good company. The start was not a good one, Joe Cotton and Verano being away in the rear.

At Fort Bidwell, Surprise Valley, on the 4th, the old stallion Conner made his appearance after a long absence from the track, and won a mile dash very handsily in 1:51, beating Hancock, Harry B. and Burtie R. The same day Della Walker won a half mile in :53, beating a field with the euphonious titles of Sage Brush Sam and Rim Rock Belle.

An Ancient Turfman.

And speaking of Captain Moore, did you ever meet him? If not, half of your life is gone. He is a tall, spare man, past 70 years of age, and as full of fire as most men at 45. He came up here about ten years ago, when his horse Foster was kept at Billy Bigham's place on Rock Creek in Wasco county. The following year I met him at Sacramento, where he was managing Mark Littell's horse Wildside. The latter horse went lame in his race with Grinstead, and it became necessary to substitute Foster in his place in the big \$30,000 race, which was won by Foster. There was a great outcry at the time about an Oregon horse beating Californians, but it was wholly without warrant, for Foster was bred in Kentucky and only taken away from there to save him from seizure for debt.

The Ascot Gold Cup, valued at \$5,000, won by Foxhall in 1882, is held by the Custom House authorities for the ad valorem duty of 45 per cent. The tax upon the trophy is over \$2,000, and this Mr. James R. Keene has declined to pay. There seems to be no way of admitting the cup free without the aid of Congress, and the Secretary of the Treasury has given Mr. Keene permission to export the cup to England without the payment of duty, provided it is sent within thirty days from July 2. When an owner has enterprise enough to send an American bred horse to compete against the best representatives of English breeding farms, and when that horse reflects credit upon our own breeding establishments by winning one of the most cherished trophies, it seems like a travesty upon justice to require the owner to pay nearly half of its value to the Government before he can place it in the show window of Tiffany's to gratify the curiosity of his countrymen who join in the Broadway promenade.

The late sensational trot of Phallas does not seem to disturb Director or his owner. In a conversation with Mr. Salisbury he said he had always liked Phallas, but still thought Director was his equal in every way. He will send the little black stallion East again next season if nothing unfavorable prevents, and in the meantime we suggest that California is a good place for Mr. Case's stable to Winter, and mayhap do a little business while resting the flyers. We gather this latter idea from the tone of Mr. Salisbury's talk.

Last week at Chicago, John Murphy and J. C. Campbell made a match which should provide a genuine sensation. The match is for \$2,500 a side between Westmont to pace and running mate, and Frank to trot and running mate; \$500 a side has been put up as forfeit in the hands of Secretary D. L. Hall, the match is to come off within three weeks, and any association adding a purse, the same will go with the stake to the winner.

L. Hewlett, Jr., lost another stallion last Friday, his general purpose horse George Washington. The horse was in the stable that was burned on the 4th, and sustained injuries from which he died.

The dun gelding Pride of the Bay died at Red Bluff last week, of lung fever. Pride was brought out from the East by J. L. Eoff, and figured quite prominently in the trotting race in the "way back" times.

Answers to Correspondents.

Questions answered only through these columns. No replies by mail or telegraph.

W. H. K., Virginia City, Montana.

I have a five-year-old mare in training that I think shows signs of being in foal. If she is she is now six months gone. Her races will come off three months before she will be due to foal. She works well and fast, shows 1 1/2 miles in 1:11 and full miles better than 2:30. Do you think it would be safe to continue to train her, I have seen Pocahontas facing a fast race when she was several months in foal. This is a very promising young mare, and probably the fastest horse in our Territory. I write hoping you will please give me your opinion which I would value, as I am aware you are a practical trainer of valued experience. What I wish to know would she probably retain her present rate of speed, or could it be possible for her to improve?

Answer.—It would appear rather risky to continue fast work and trotting in races when within so near the time of foaling. There was quite a number of prominent horsemen present when we received the letter, and their opinion was that risks would be slight. With an animal of so much promise, however, we would rather be on the safe side and not subject her to the danger of abortion, and, consequently, a chance to lose dam as well. The great pacer Pocahontas paced in New Orleans as late as February 24th, 1854, and her son, Tom Rolf, was foaled the same year. Unless a very late foal she must have been kept at work as far into pregnancy as our correspondent refers to. On June 21st, 1855, she beat Hero in New York, distancing him the first heat in 2:17. This was to wagon and driver of 265 pounds, so that before and after the birth of Tom Rolf she showed wonderful speed. When in New Orleans her manager offered to wager that she could pace a mile in 2:10. The great English mare, Pocahontas, dam of Stockwell, Ratanplan, King Tom, etc., ran the best race of her life when five months gone, and Lulu Riggs ran wonderful trials in March and gave birth to her foal in June.

YACHTING.

The S. F. Y. C. Napa Cruise.

The yachts of this club that had not gone to Santa Cruz assembled at Front street wharf, together with a lot of outsiders, on Thursday, the 3d inst., and started for Napa at six P. M. The fleet was as follows: Whitawing, Chispa, Frolic, Emerald, Startled Fawn, Rambler, Eva, Lolita, Megic, sloop Nellie, Spray, Dawn, Idlehour, Thetis, Ripple and Nava, while Sea Nymph with canoes and small boats had gone ahead. The first vessel to Vallejo, the first stopping place, was Whitewing followed closely by Startled Fawn. Then came Eva, Lolita, Chispa, Emerald and Rambler, while the rest of the fleet came straggling in at all hours.

At nine A. M. the next day, all the fleet with the exception of Eva and Nava got under way for Napa. A very light wind was blowing, and the vessels slowly proceeded up Napa Creek. The Chispa got stuck at Slaughter House Point, a few miles from Vallejo, and was towed off and then right up to Napa, consequently arriving first. Whitewing ran ashore near Napa and failed to reach her destination until nine P. M. Thetis also ran ashore but was gotten off without much difficulty. Of the vessels that sailed the whole way the Lolita arrived first, with Emerald second, Rambler third and Megic fourth. The usual festivities were gone through with at Napa, and on the fifth some boat races took place on the creek.

The race for yacht owners was won by Mr. W. A. Wilson, of the Rambler, and he got for his efforts a handsome tea service, and Mr. Story, of the Startled Fawn, was tendered the leather medal. Fouls did not count so there was any amount of bumping and banging of boats. The race for the men on the boats was rowed in heats. In one of the heats the Rambler's boat and the Spray's boat rowed a dead heat, but it was given to the Rambler's man.

The other heats were won by the Megic and Whitewing. In the final heat between these two the Rambler's man got pumped out and stopped. The other two men fouled and in endeavoring to retard each other's progress came to blows, which opportunity was seized by the Rambler's man and he came across the line first, but was not allowed the money because the other men fouled. The judge was addressed in language much more forcible than polite, but remained obdurate and decided that another heat should be rowed. No arrangements could, however, be made until the Spray's boat was allowed to enter after being decided against in the first heat, and finally won, while \$5 was given the Rambler's man. The vessels towed down from Napa in three divisions, as follows: Chispa and Sea Nymph, behind the launch Garnet, while Frolic and Whitewing, Rambler and Dawn, Nellie and Ripple, Spray and Megic towed behind a stern wheel steamer, and the third lot consisted of Emerald and Startled Fawn, Thetis and Lolita, Idlehour and Lizzie, a Napa craft. The only misap was in the Chispa again hitting a mud bank and staying there for some hours, finally getting to Benicia the following night. On Sunday the fleet started for home about midday. Gibson had sent up one of his men to Vallejo to sail the Magic down, and he did so in fine shape, beating the whole fleet. The Eva did very well also, for although she did not start until late, she was the third boat to pass the Brothers, following closely on the heels of Whitewing. The Startled Fawn and Emerald lowered their mainsails at Pinole and finished under jib and driver, as they had ladies on board. The rest of the fleet got scattered, and as there was no time taken nothing definite can be given as to the speed of the yachts in addition to what we have said.

The Master Mariners' Regatta.

We were unable from lack of space last week to give any report of the event which took place on the 4th inst., and now give only a summary of same. The wind was just right for the smaller vessels participating, while the big vessels desired heavier weather. The vessels were classed as follows: Square riggers, round-bottom schooners, starns, first-class scows and second-class scows.

The course and rules have already been published in this paper.

The list of vessels with the time made is as follows:

Vessels.	Time of leaving.	Time arrived.	Time made.
Sch. Gen. Banning.....	1:31.29	3:57.03	2:25.34
Sch. Lizzie Merrill.....	1:13.49	3:39.24	2:25.35
Sch. Guatala.....	1:27.53	3:57.10	2:29.18
Sch. Electra.....	1:16.90	3:49.11	2:33.41

Sch. Novato.....	1:30.10	4:27.16	2:57.06
Sch. Plute.....	1:03.47	4:21.32	3:10.45

This it will be seen gives the Gen. Banning the race by the exceedingly small time of one second. But one accident of any importance occurred during the regatta, and this was a collision between the Gen. Banning, and Robert and Minnie, the latter having her head gear carried away compelling her to drop out of the race. The winner had her sails torn, but continued on her course and developed a good deal of seamanship in the thoroughway in which they repaired damages without much loss of time. We have seen some cards from the Lizzie Merrill, protesting against the decision because forsooth one of her owners was one of the Regatta Committee, and furthermore because she was only beaten by one second. The rules of the Association only bar boats from taking a prize from fouling a stakeboat, and it would be very ridiculous to give the Lizzie Merrill first place on account of her being such a short distance behind. If anything the Gen. Banning deserves more credit for the showing, she made after being disabled, than if she had gone round without an accident.

All the yachts have returned from down the coast, with the exception of the Azalea, Clara and Nantils, the latter two intending to spend the season there. The last of the arrivals was the Annie, which came in on Sunday and proceeded direct to Sausalito.

Last Sunday was a beautiful day for yachting. There was sufficient wind to keep the vessels moving well and not enough to be disagreeable, while the sky was overcast, thus preventing that glare on the water which is so objectionable to many. The yachts took advantage of this and were out in full force.

In the channel about noon it looked as though a regatta was being held. The Halcyon, Fleur de Lis, Eva, Larline, and Emerald, all beating out at one time, while the Rambler and Spray were going down with the wind. The Larline left Sausalito early, and running over to Black Point hauled her wind to leeward, and astern of Halcyon, and after a close struggle finally passed her.

There was a collision last Sunday, off the sea-wall, between Fleur de Lis and Halcyon. Both vessels were on the port tack, heading out from the city. Halcyon was to leeward and forging ahead of Fleur de Lis endeavored to cross her bows, but Pilot Ott, who was sailing the larger vessel miscalculated his distance, or the rate at which Fleur de Lis was driving through the water, as the end of his jib boom caught along the foot of Fleur de Lis' mainsail, tearing it pretty badly. The vessels remained foul for some minutes, but owing to the calm sea no other damage was done, and the Fleur de Lis ran in shore and after putting a single reef in her mainsail again got under way.

In the Whiteball race, on Sunday, between the "Captain Sannett" and the "Stewart Manzies," from Section 1, of the sea-wall, to Fort Point and return, the former vessel won by a little over a minute, thus redeeming herself for her poor time on the Fourth when, out of a large fleet, she came in last. The two boats fouled off Black Point, but without injury to either and the "Sennatt" soon afterwards took the lead and maintained it to the finish. The time was one hour and thirty-six minutes. The winner was sailed by Wm. Ellison, Jr., and the "Manzies" by D. Crowley.

There is in contemplation a race between Aggie, Halcyon and Larline round the Farralones and back. As most of the talk comes from outsiders, we cannot say definitely whether it will come to any head or not, but we will look forward to the event with interest, in which we will be joined by every yachtsman on this Coast. All the owners of these vessels think that their craft is superior to the others, so there is some probability of the race coming off.

One of the novel features of the race in Monterey Bay was an addition to the jib on the Nallie, which we believe is an invention of Pilot Murphy. It is laced along the foot and up the luff rope of the main jib and leads way aft, thus filling up all the space between the foot of the jib and the bowsprit. Of course this cannot be carried on the wind in any kind of heavy weather.

The Aggie on the Fourth, at Santa Cruz, exhibited on her jack stay four champion flags, one for every year since 1850, or the champion flag for every year since she has been afloat, something to be proud of.

The Startled Fawn was taken off the ways expressly for the Napa cruise and is again hauled up. It is a pity that she is not kept afloat.

The Spray has gone on Stone's Ways to clean and fit up generally.

FISH.

The King of Fish.

Did you ever see a salmon take the fly? Well, then, when your first salmon appears to you, you won't know whether to faint or shout "Hallelujah!" The salmon's haunt, when he is lying in wait for prey, is in some deep, quiet pool, where the water eddies and hesitates, and then passes slowly on. From the bank above this pool, or from your canoe, you cast your fly on its surface. Now, the beauty about salmon fishing is that your tackle isn't much heavier than if you were whipping some mountain brook for trout. Your rod is elastic and strong, and your reel must hold at least three hundred feet of fine silk line. Your fly drops lightly on the surface, and if the salmon is in the humor he goes for it at once. Now, a trout rises to a fly with a swoop and a whirl, and away he goes. Your salmon darts from his hiding place in meteor fashion also, but before he reaches the fly he pauses within a few inches of it. The pious guides cross themselves at this interesting moment. "Ha is saying his grace," they say. Then the salmon rises, opens his mouth and draws it in, and drops back toward the bottom. That is, when he gets himself in trouble. In dropping down he sets the hook firmly in his upper jaw, and then is when he begins to get you in trouble. As soon as he feels the hook things begin to hoil, away he'll go, and take a hundred feet of your line off your reel before you know it. Then the chances are that he'll take another course, perhaps straight toward you, and then you've got to work to take up that slack line. As soon as you draw it taut on the reel, and he feels the pull on the hook, whiz! he will come out of that water and shoot into the air a dozen feet. Taking a header, he darts down to the depths again, tearing this way and that way, round and round, and keeping your fingers busy at the reel. Then suddenly out of the water he comes again, throwing himself high above water, and describing a capricious arc in mid-air, falls back into his element again, quivering with excitement and pain, and sparkling with spray.

Finding that those tactics fail to release him from the hook, the chances are that he may take it into his head to seek another part of the river, and down the stream he goes like a race-horse. He may lead you a mile or two miles, keeping your attendants busy at the oars, and yourself on the alert for any sudden change in his manœuvring. It may be that after the chase he will have recourse to his former tactics, and give you a lively struggle for a half hour or so. By and by, however, discouraged and exhausted, he will give up absolutely, and allow himself to be reeled in and gaffed. The whole fight has been science and skill against cunning and strength, and the former will win every time. It may be that when your salmon finds himself hooked he will surprise you by making no fight at all, but will sink straight to the bottom and sulk. If he does you may know at once he is a big one, and may as well make up your mind that there is to be a grand trial of patience between you and him. It would be a violation of the code that governs salmon fishing for the angler to give up first, and if he had to sit three days before he could make the salmon fight he must do it without a murmur. I eat from seven o'clock in the morning until four

o'clock in the afternoon waiting for that big one I hooked last season to get over his sulk, and when he did get over it he got over it a humming. He took me a mile down stream, and then worried me till half past five o'clock before he got the gaff. That was the famous forty-pounder.

Since the establishment of the New York Fish Commission in 1868, over \$5,000,000 young shad have been hatched out and placed in the rivers of that State.

These figures not only show the value of artificial propagation, but they painfully show both the incompetency and do-nothing policy of our own Commissioners. Much has been said about 25,000 to 50,000 young Tahoe lake trout, hatched at Grass Valley, being ready for distribution. Is that any work for the time the Commissioners have been in office? The day has now arrived when the Governor should either insist upon their discharging the duties of the office they were selected to fill, or dismiss them. On behalf of the people, we feel it our duty to ask the following questions:

How many foreign fish have been distributed by the present Commissioners?

How many native fish and what varieties have been distributed by the present Commissioners?

In what streams were they distributed?

What have been the traveling expenses of the Commissioners since they went into office?

What has been the cost per 1,000 of batching and distributing fish since they went into office?

Will the majority throw aside vague reports of what is going to be done, and tell us what the probabilities are of something actually being done?

Will or dare the majority give us an itemized report, showing the precise extent to which the State has benefited or suffered by their administration?

Will they give us the items of the big \$1,100 bill?

This is business—plain, honest business. What we ask is due to the people, and due to the reputation of the Commissioners themselves. Those papers at the capital which have at times defended the Commissioners against our strictures and accused us of injustice to them, have now an opportunity to defend their proteges again by answering the questions given, and if they do so, we opine they will undertake a pretty tough job. We have no sympathy with lazy officials, be who they may, but we have all sympathy with the people, whose money they squander and whose interests they sacrifice, whether by incompetency or dishonesty. The commissioners have now published their individual addresses, *Cui bono?* We guess we know the current market price of salmon without referring to them.

A Farewell Tribute.

A week ago the members of the Walton Fishing Club met at Clem Dixon's place on Summer street, to present their veteran President with a token of their respect and esteem, as he leaves for Scotland to-day. Dr. Hughes was the spokesman of the occasion and acquitted himself very ably. We had intended to have written a parting farewell to our good old friend, but the closing words of Dr. Hughes' speech will answer our purpose better. He said: "In view of the past, the Waltonians have deputed me to present you with this emblem of the grand object that has banded us together so firmly. It is intended as a token of the high esteem in which you are held among us, and of the kindly feeling toward you of your fellow Waltonians. With it goes the wish that you may have a pleasant journey across our own broad land, a prosperous voyage over the stormy Atlantic, and great joy among your old friends in the country of your birth. Doubtless they will be as pleased to see, as we are sorry to lose you. We wish you continued health through all your trip, and assure you a most hearty welcome when you return to us." To all of which we piously say amen. The token is a golden emblem representing a fishing rod with reel and all other things necessary, and very suitable for the purpose. It is with no small pride that the veteran sportsman shows and appreciates the testimonial of his fellow Waltonians.

The reports from all parts of the State show that our streams have been liberally patronized during the holidays by those who are wise enough to leave the cares of business for a time to enjoy the charms of nature and true sport. The reports of individual success are all good except that the catches in some cases have been too large, running at times into the hundreds. In such cases many fish must be caught that are of no earthly use to the catcher, except to gratify a silly vanity as to number. We are led to believe that a taste for angling is growing among our people rapidly, for all the stores in this city and Sacramento report the sales of tackle larger than ever known before. We are glad this is so, for the more our better classes learn to love the genuine sport of fishing, the better will be our chances of getting wise laws for the preservation of fish.

BICYCLING.

John S. Prince met with a severe accident at Blossburg, Pa., July 3. While spurting at a 2:30 gait the wheel collapsed, and Prince was hurled to the ground with great force, his face being scratched, his eyes blacked and the handle-bar striking him in the side, injuring him severely. He is not expected to be in trim for some time.

At the National 'Cyclists' Union Amateur Championship meeting, the twenty-five mile triecyle championship was won by Liles, of the London A. C., who did the distance in 1 h. 25 min. 58 sec., and beat all previous records from 12 miles upward.

Mr. A. Edwards, of the Sydney Bicycle Club, recently rode from Sydney to Melbourne, a distance of 571 miles, for the first time. A great performance.

At the University bicycle races, at Cambridge, England, recently, J. S. Wharton rode the last quarter of a two-mile race in 37 1-5 secs.

The English professionals, Keene, James and Howell, have signified their intention to be present at the Springfield meeting.

A long distance rider recommends soaping the saddle as an effectual remedy for chafing while on a long run.

There were 5,000 spectators at the meeting of the Victorian 'Cyclists' Union, recently held at Melbourne.

The mile bicycle record for Canada is 3m. 6s.

THE GUN.

The Game Law.

Table with columns for months (January to December) and rows for various game species (Quail, Partridge, Rail, Grouse, etc.).

At Bird's Point.

The effect of the holidays was not quite over last week, judging from the attendance at the hunts and traps. For instance, on Saturday, the Alameda County Sportsman's Club had their regular monthly medal shoot, and though one of the largest and most enthusiastic in the State, the attendance was small, only eight members turning out.

At Colma.

The Parker Gun Club, composed of an excellent class of young men, met at Colma, on Sunday, for their regular monthly medal shoot. This club invariably use clay pigeons, and considering the conditions of their shooting which only allows one barrel, the scores of some of the members are always most excellent.

Score table for At Colma with names (P. B. Bekeart, W. A. Bryan, etc.) and scores.

The Forester Club of this city has determined to do no duck shooting this season until September 15th, in order to give the young ducks a chance. The club has leased the three lakes of Goulay, Warner and Fox, below the city.

Henry Gerber, of the Forrester Club, Sacramento, and a right good sportsman, too, says deer are more plentiful in Lake county than they have been for years.

The Deer Season.

From all parts of the State we hear pleasant news from our deer hunters. The parties out for the opening season have been numerous, and so far as we bear, successful. All report a pleasant, enjoyable time. On going through the markets again this week, we noticed the supply fairly good, including some very fine bucks.

A party of four Petaluma returned last week from a sixteen days' hunt in Humboldt county, bringing with them twenty-seven deer, having killed forty and captured two fawns on the trip.

For ourselves we see nothing to boast of in such an exploit of wanton slaughter. It might do for an annual feast or drunken pow-wow of Digger Indians, but it is altogether out of place among respectable, native born American citizens.

Good for Jacoby.

A very merry party pitched their tents during the Fourth of July week on Anstin's Creek, some eight miles from Fort Ross, in the wilds of Sonoma county, and named their little camping place "Camp Jacoby."

The Woodland Democrat of the fifth, says: Messrs. Frank Spragne and Dr. Clark, at the sink of Cache Creek, killed one of the finest deer ever brought to market.

A clay pigeon tournament, open to all comers, will be held at Agricultural Park, Sacramento, to-morrow, under the direction of Chas. Flohr.

Crittenden Robinson left this week for Nevada county for ten days. His trip was a purely business one, but he will do a little fishing and hunting.

The Bassford brothers are getting up a party for a fortnight's hunt in the mountains. They will leave in a day or two.

THE RIFLE.

The range, at Shell Mound was well attended on Sunday, notwithstanding the great attraction, the 100-shot match of the Fifth Battalion Infantry, did not take place, owing to the compelled absence of several leading marksmen who are relied upon chiefly to accomplish the objects of the match—that of lowering the State, if not national record.

Score table for The Rifle with names (Ed Hovey, etc.) and scores.

Score table for Wallham, Co. A with names and scores.

Score table for Macdonald, Co. A with names and scores.

Score table for Pierce, Co. A with names and scores.

Score table for Moore, Co. A with names and scores.

Score table for Williams with names and scores.

Companies C and G also held their regular medal matches in which the shooting for the first and second prizes was good, especially that of Perkins. The winners were:

Table of winners for Companies C and G across four classes.

At Schutzen Park.

The favorite range was not crowded last Sunday, the Eintracht Rifles being the only organization out for regular monthly medal shooting, of which spirited corps fourteen members fed the butt.

Score table for Schutzen Park with names (Kuhls, Klotz, etc.) and scores.

Table of winners for Schutzen Park across three classes.

Comparative Shooting.

The ability to use the rifle with effect has ever since the arm was used in war determined, in a great measure, the military standing of all nations using it. How far it is the gun, or how far the man handling it for the time being that determines the distinction, we shall not stop to argue, because all we care for just now is an efficient use of the rifle, and to promote this we do not think we can do better than reproduce national performances where greatness is achieved, that our own marksmen may have a competent standard to guide them and tell them truly where they stand.

main event of the meeting was an International contest between teams of twenty men each from England, Scotland and Ireland—representing the volunteers of those countries. The distances were 200, 500 and 600 yards, seven shots at each range; weapons, Martini-Henry rifles, regulation pull and sights. The scores need no remarks other than the telling:

Table with 4 columns: Name, 200 Yds., 500 Yds., 600 Yds., Total. Lists names like Bates, Kemp, Waterworth, West, Warwick, Hart, Comery, Heap, Smith, Gattwick, Pearce, Rosenthal, Prest, Kelsey, Akerrig, Creary, Gortis, Parry, Angel, Rothon.

Table with 4 columns: Name, 200 Yds., 500 Yds., 600 Yds., Total. Lists names like Dods, Young, Paterson, Rae, Heaton, McQuie, Caldwell, McIsaac, Hall, McAuslad, Geddes, Brown, Buchanan, Caldwell, MacGibbon, Paton, Stewart, Ingram, Yates.

The aggregate of the Irish team was 1,615 points—584 at 200 yards, 576 at 500 yards and 497 at 600 yards. The English team won by 6 points. The average of the winning team was 90.85 points, or over 80 1/2 per cent. The above scores are taken from the London Volunteer Record and Shooting Times, the editor of which states the records to be "simply marvelous," as he will say.

This next instance of remarkable shooting was done at Creedmoor by our own riflemen, when the best individual score ever made was made by Capt. W. W. De Forest. It is a score too, in which we may all feel proud. We find the record in the World.

"The members of the Amateur Rifle Club shot at Creedmoor yesterday for the Leech Cup, given in 1875 by Major Blennerhasset Leech, of Ireland. It was won by Capt. W. W. De Forest, who made the highest individual score ever made on the range, 221 out of a possible 225. The score is as follows:

Table with 2 columns: Name, Yds. Lists names like W. W. De Forest, H. P. O'Neil, H. F. Clark, L. Geiger, N. D. Ward, J. W. Todd.

Before this 1,000 yards range was shot a heavy rain storm set in, and the weather conditions at that range made the score most remarkable."

A Youthful Sharpshooter.

The Bodis Free Press says: "Harry Butler, a thirteen-year-old son of Wilson Butler, astonished the local crack shots yesterday by making three bull's-eyes and one four, scoring twenty-four out of a possible twenty-five at the 200-yard range. Harry shoots an improved Sharp's, off-hand and military pull. This boy is rather undersized for his age, and it was marvelous to watch the manner in which he takes advantage of the recoil from seventy-five grains of strong powder."

This is very good for Bodie, indeed, and redeems the errors of her traditional "bad man."

A fortnight ago the Virginia and Carson teams shot a tismatch, each making 931 in their total score, an average of 847-11 per cent. This match was decided according to Creedmoor, which gave it to Carson. Last week the Carson boys had another match with a team selected from the Comstock companies, and were again successful. The score was:

Table with 2 columns: Name, Score. Lists Virginia and Carson.

This gives the invincibles, of Carson, a majority of 42 points. The match was shot at Virginia, and considering the gale blowing at the time the shooting is held to his most excellent.

We spoke last week of G. W. Ellsworth, one of the celebrities among the Eastern riflemen, making 102 bull's-eyes at the tournament of the Empires Rifle Club, held in honor of opening their new range. As this report comes to us, it is probable Ellsworth made this grand score in our day, as it took the prize of \$10. Allowing this, which makes it all the better for our purpose, we find on referring to back records, which we had not time to do last week, that Philo Jacoby, on August 8th, 1883, at Schutzen Park, made 139 bull's-eyes in one day. This eclipses Ellsworth's performance altogether, and this comparison shows it takes big work to beat California. There is no uncertainty in this record.

The teams for the 100-shot match, at Shell Mound, to-morrow, will be pretty near, if not quite as follows: Field and Staff team—Kellogg, Williams, Hovey, and Kuhls, with Lieut. Brown as substitute for Kuhle, if he should not be able to be present. The Company A team will be Pirce, Waltham, Macdonald and Moors.

German Fusileer Guard.

There are few if any better corps of men in our militia than the one named above. To-morrow, at Schutzen Park, Alameda, they hold their annual picnic for the benefit of their sick fund. Prizes to the amount of \$900 will be raffled for under a system of fairness and honesty that no one can object to. There will also be cash prizes at the bowling alley some little shooting, and all the other festivities of such an occasion. If the day be favorable the grounds doubtless will be crowded.

"The Regimental Shooting Club of the First Infantry is now a fact. All the captains are in favor of it and promise it a hearty support. The plan of organization is about determined and a committee has been appointed to select a range. This committee is composed of Captain Tilden of Company G, Captain Teller of Company E, and Lieutenant J. E. Klein of Company C.

Company H, First Infantry, Captain Bush, has started in shooting again, and has fitted up its old range at San Bruno." It is the man who can use the rifle effectually that makes the true soldier. We are, therefore, pleased to record such facts as above and hope to have more in future.

On the first Sunday in August next, the Schutzen Club have their grand annual prize shooting festival at Schutzen Park. As the festival is open to all and offers prizes amounting to \$750, we hope Jacoby will give us the particulars in due time.

The Directors of the State Rifle Association, accompanied by Col. Dimond, President, will certainly visit Tiburon Point, we understand, next Sunday, in search of a new range for the Association.

THE KENNEL.

The Pointing Quality in Dogs.

EDITOR BREEDER AND SPORTSMAN:—In your last issue, that very pleasant writer on topics of interest to sportsmen, Mr. E. Leavesley, announces his adherence to the heterodox doctrine enunciated by a contributor to your kennel column of June 14th last, viz: That the pointing quality in setters and pointers is not born in them.

Mr. Leavesley states this as his conclusion, but to my mind, such a conclusion cannot logically be deduced from his premises.

He believes the pointing faculty to be the result of tuition and inheritance. Suppose this to be admitted, how does that affect the point under discussion? We are not writing of setters and pointers as they were, but of those dogs as they are.

And whatever may have been the origin of the pointing faculty, if it is now shown by youngsters without teaching, how can it be said to be other than born in them and therefore natural?

But Mr. Leavesley in his next sentence begs the question by admitting that there is "a natural tendency to point in dogs." This is a fatal admission from one who is trying to sustain the opinion that dogs do not point intuitively. The quotations from Stonehenge and Markham upon the origin of the pointing faculty are not relevant to this discussion, but in order that side issues may not again be raised and in order that a common ground may be settled in the discussion, let me quote from Stonehenge a passage which should have been studied by Mr. Leavesley, before formulating his opinion. And I may say that the passage to be quoted has this indorsement of very many professed experts in dogs and sportsmanship, and is probably the belief of about all sportsmen who reflect upon, as well as utilize the wonderful powers of their setters and pointers. Stonehenge says: "At first the spaniel was taught to hunt the birds within a given distance of his master and showed his proximity to his game by working his tail and giving tongue. This last sign being inconvenient, in consequence of its alarming the birds, mints spaniels were employed, and also a large smooth dog, this pointer, resembling the spaniel in delicacy of nose and mode of working. These dogs were taught to work with great caution, and were at last broken so carefully that when they caught the body scent instead of rushing in and putting up the birds, they were so excited, yet so afraid of incurring their master's displeasure that they became stiffened from fear, yet still anxiously desiring to rush upon their prey. This has been cultivated and improved, till at last we possess in this setter and pointer the three essentials which combine to make the most extraordinary specimens of subservience to man's purposes which any domestic animal affords. There is still the hunting power of the spaniel, its delicacy of nose, its power of standing work, and its lashing of the tail, but the tongue is mutes, and the stop from fear has been developed and naturalized into a dead halt, which is really a true cataleptic condition, and which is often shown without the slightest fear of man, in the young puppy pointing in the fowl yard."

This is sound doctrine, and accords with the experience not only of Dorr, but with that also, I venture to say, of every other actual sportsman.

Again Stonehenge says, "Pointing, setting, or standing; these three appellations are given to the stiff cataleptic condition which the pointer or setter assumes when near his game. I have already remarked that it comes on without teaching in the well-bred young dog."

I quote Stonehenge, not because he is better authority than Shaw, or Hutchinson, or Clement, or Rowe, or Dorr, but because Mr. Leavesley seems to regard his opinions as conclusive, and because he is so apt upon the subject matter.

Quotations from authorities confirming those given could be multiplied indefinitely, if it seemed necessary. But Mr. Leavesley's opinion is so directly opposed to the teachings of experience, that but for the sake of those who have had no experience, such as your contributor of June 14th, this writing would be supererogatory. It is my good fortune to know Mr. Leavesley personally, and to know something of the opportunities which that gentleman has had throughout the last three or four years to observe the growth, and development of well-bred setters and pointers, and how he has brought himself to believe that the pointing faculty was not born in Moreau's Jeff, or H. M. Brigg's Count Warwick, or Anzer's Lola, or Kaeding's Fauvy, I cannot understand. It is perhaps an unusual thing to ask an opponent to establish his own weakness, but I cannot help asking Mr. Leavesley to sit down some pleasant evening in the shadow of his vine and fig trees, and let sturdy little Joe turn down a dozen or so of the nervous little thoroughbred setter pups, and note the

number of points made as the pups exercise for an hour. There is a hidden bit of meat, or a hiding young chicken about I am sure Mr. Leavesley will be turned from the error of his ways, and instead of supporting the conditions of your contributor of June 14th, will believe as do Dorr and all others of his sportsman friends. X.

Gilroy Rod and Gun Club.

At the regular meeting of the Club, on the 11th, on motion it was decided to withdraw from the State Sportsmen's Association.

On motion: The Secretary was instructed to draw a warrant in favor of the Ladies' Benevolent Society, of Gilroy, for \$25, at the request of Miller & Lux, being the amount of rent due to them for the privilege of hunting at the Soap Lake.

Committee on Field Trials reported as follows: Your Committee are fully impressed with the great improvement in the breed of sporting dogs, owned by members of this Club, since its organization, and also the knowledge generally diffused throughout this part of the country, with respect to the manner in which hunting dogs should be handled in the field. They note, with pleasure, that although three years ago not a single thoroughbred dog was owned by any member of this Club, they can now boast of dogs containing the blood of the best English and Irish setters in the United States, or in England. In their English setters they combine the blood of Comates, Pride of the Border, Carlowitz, Leicester, Royal Duke, Drake, Dart, Daisy, Llewellyn's Dan, Duke and Rhoebe, Warwick, Queen Mab, Rob Roy, Carl, Belton and Belle, Regent, Mayberry's Dan, Miller's Drake, Lulu Laverack, the Ralston stock, etc. Their Irish setters are a careful selection from the best imported stock from Ireland, which have proved their excellence at Bench shows and in the field. They combine the blood of Elcho, Rose, Larry, Red Ben, Don Zooler and Mollie Plunket. They hope, by judicious crossing, to produce, in time, dogs which shall rival the fame of Count Windham, Gath, Gladstone, and Elcho 5th. The science of breeding is yet in its infancy, but the attention that is being paid to it by numerous breeders in the East, and the discussions now pending between Mr. Buckall, of England, and Dr. Rows and Professor Ellzy, of the United States, cannot fail to develop new facts which will not fail to be noticed by this Club in crossing their breeds. But without field trials, no sound judgment can be made of our success for however well proportioned and otherwise handsome dogs may appear on the Bench, (and at the late show the Gilroy Club carried off many prizes,) it is only by public exhibition and competition in the field on game, that we can judge of our real progress. Your committee have noted with much satisfaction the interest excited in other parts of the State by the Gilroy trials, leading to the formation of a Pacific Coast Field Trial Club, composed of many of our best sportsmen in the city and northern part of the State, and they feel especial pleasure in learning that their first meeting last year, at Folsom, was well attended, and that the quality and the performance of their dogs was, for a first effort, everything that could be desired. Your committee, speaking in behalf of this Club, tender their congratulations and best wishes, and assure them of their hearty support and co-operation, wherever the locality selected for holding their future trials shall be reasonably accessible to Gilroy. Your committee, fully realizing the advantages resulting from field trials, recommend that the fourth annual meeting shall be held in December —, and that the prizes shall be the same as at former meetings. They recommend honorary, in preference to pecuniary prizes—medals and cups which may be preserved as remembrances of pleasant and friendly gatherings of brother sportsmen, and mementoes of our faithful dogs, to be handed down as heirlooms to posterity.

E. LEAVESLEY, D. M. PYLE, GEO. HOLLAWAY.

Report received and adopted and committees discharged.

Pointing Quality Again.

EDITOR BREEDER AND SPORTSMAN:—I have read the communications in your paper from X., Bradford, Dorr, and E. Leavesley. Well, I am very much pleased to see there are a few men on this Coast that take some interest in good dogs. These little disputes, or arguments, if carried on properly will disseminate a great deal of good information, as I think we can all still learn something about dogs. And by talking this subject up pleasantly through the columns of the BREEDER AND SPORTSMAN, it might do us all some good. Now for my opinion in regard to this pointing problem. I have come to the firm conclusion that W. Bradford and Mr. Leavesley have either not given their dogs a chance to point or have a very poor breed of dogs. It must be one of those two things.

I have had considerable experience with pointers for at least eighteen years. I have bred, raised and handled for my own use not less than fifteen pointers and two setters, and I have never yet had to teach one to point or back. I have seen puppies point staunch as a dog possibly can point the first opportunity they ever had, without any training whatever of any kind. My pointer bitch, Queen, that I now own, at six months old I took in the field. She had never seen a quail or even seduced ones. She made nine distinct points within one hour—just as staunch then as she is now. And I believe that dog does not exist that is any more staunch than she is on a point. The first time she ever was hunted in company was with my setter dog Don, and she backed him the first opportunity she had; and just as staunch then at backing as she is now. And as to her staunchness at backing, she never moves until the dog pointing moves.

This is only one instance that I cite, but I have seen time and again puppies point and back at their first opportunity without any training whatever. And if it ever becomes my luck to have a pup that will not naturally point and back, or does not point without teaching to do it, I would very soon come to the conclusion he was not worth my time and attention, and I would not own such a dog, (no, sir, not for Joseph!) It is trouble and bother enough to raise the best one and let the poor ones go. It seems very ridiculous to me to hear a man say a thoroughbred dog has to be taught to point. Why, it sounds absurd to me. Mr. Leavesley quotes "Stouhenge" and "Gervaso Markham," which I think are good ancient authorities, but what I have seen and what I know, I know, just as well as any ancient authorities. And I believe it is just as natural for pointers and setters to point, as it is natural for ducks to swim. I am positive I will never try to teach my dogs to point, and I will have dogs that will point staunchly, and do it naturally. So true is it that nature has capacities that art cannot imitate. I do not believe a man ever existed who could teach a dog to point in the modern style, that staunch, cataleptic condition that they do get into themselves. Very respectfully, VACAVILLE, July 13th, 1884. J. M. BASS

## NEW YORK AGENCY.

Mr. C. C. Pettus at the office of the "Sportsman," 46 Murray Street, is duly authorized special representative of the BREEDER AND SPORTSMAN in New York to receive subscriptions and arrange advertising contracts.

## SACRAMENTO AGENCY.

Residents of Sacramento and vicinity, desiring to subscribe or advertise in the BREEDER AND SPORTSMAN, can do so through our agent, Mr. M. J. Henley, Russ House, 1,009 J Street.

## ADVERTISING RATES.

Displayed, \$1.50 per inch each insertion or pro rata for less space. Reading Notices set in briefer type and having no foot marks, 30 cents per line each insertion. Lines will average ten words. A discount of 10 per cent will be allowed on 3 months, 20 per cent on 6 months and 30 per cent on 12 months contracts. No extra rate charged for cuts or cutting of column rules. No reading notice taken for less than 50 cents each insertion.

San Francisco, - - Saturday, July 19, 1884.

## Dates Claimed.

Bay District, San Francisco (Fall Meeting), August 2d, 5th, 7th, and 9th.  
Santa Cruz Fair Association, Santa Cruz, August 12th to 16th.  
Sonoma County Agricultural Association, Santa Rosa, August 18th to 23d.  
Sonoma and Marin District Association, Petaluma, August 25th to 30th.  
Thirteenth District, Marysville, Aug. 26th to 30th.  
Golden Gate Fair, Oakland, September 1st to 6th.  
Chico Fair Association, Chico, Sept. 1st to 6th.  
State Fair, Sacramento, Sept. 11th to 20th.  
Ninth District Fair Association, Colusa, Sept. 23d to 26th.  
San Joaquin District Fair, Stockton, September 22d to 27th.  
Santa Clara District Fair, San Jose, September 29th to October 4th.  
Monterey Agricultural Association, Salinas, Oct. 7th to 11th.  
Fresno Fair Association, Fresno, October 7th to 11th.  
Los Angeles Fair Association, Los Angeles, October 13th to 18th.

## September Fairs.

While, as shown in the paper of last week, there is plenty to do during the month of August for the horses, there is no falling off in the second month of the season. In fact, the grand month of September is so crowded with events that there is a brilliant succession from start to finish, and with the exception of the few days from the close of the Golden Gate and Chico Fairs, on the 6th of September, until the opening of the speed department of the State Fair, on September 11th, there is scarcely an idle hour. As the harvest will be practically over in all sections of California when September is ushered in, there is a better showing for attendance, and there is another advantage in the better display of fruit and vegetables than in the preceding month. Though Chico is the same week as Oakland, for the same reasons as those which were advanced last week in regard to the clash between Marysville and Petaluma, it is not so disastrous. A few horses would visit both places if the opportunity offered, though a large number will participate which would not make the long journey. The great number of horses in training in California gives even enough to divide into moieties, and then have plenty of starters, so that with the "up country" horses at Chico and those which are handier to Oakland to fill the purses there is a capital prospect for both places. The Golden Gate purses are as follows:

- No. 1. Running—Golden Gate Purse. Purse, \$500; for two-year-olds; in four monies; three-quarter mile dash.
- No. 2. Running—Pardee Purse—Purse, \$500; free for all; four monies; one mile and repeat.
- No. 3. Trotting; 2:22 class—Purse, \$800; four monies.
- No. 4. Trotting—Purse, \$600; for all four-year-olds and under; four monies.
- No. 5. Trotting; three minute class—Purse, \$600; four monies.
- No. 6. Running—Free for all; two-mile dash; purse, \$500; \$300 to first; \$150 to second, and \$50 to third.
- No. 7. Running—Free for all; three-quarters of a mile and repeat; purse, \$500; \$300 to first; \$150 to second, and \$50 to third.
- No. 8. Trotting; 2:30 class—Purse, \$800; four monies.
- No. 9. Trotting—Three-year-olds and under; purse, \$600; four monies.
- No. 10. Trotting—For yearlings; purse, \$250; three monies; mile dash.
- No. 11. Pacing—Free for all; purse, \$500; four monies. (Corette to wagon).
- No. 12. Trotting; 2:35 class—Purse, \$800; four monies.
- No. 13. Trotting—For two-year-olds; purse, \$400; four monies.
- No. 14. Trotting; 2:26 class—Purse, \$800; four monies.
- No. 15. Ladies Tournament—Purse, \$100; \$25 for the

most graceful rider; second, \$15; third, \$10; for the most skillful rider, \$25; second, \$15; third, \$10.

No. 16. Bicycle Race—Free for all; one mile dash; purse, \$100; first, \$50; second, \$30; third, \$20.

No. 17. Trotting—Free for all; purse \$1,000; four monies. (Director to wagon).

No. 18. Running—Four mile dash, purse, \$1,000; four monies.

It is within bounds to claim that the horses after participating in the races during August will be in prime fettle for those at Oakland. It is nearly superfluous to state that the track will be in good order as that is assured, and in fact, the California fairground tracks are all so good that it seems invidious to specify one as preferable to the others. This is one of the great features of the fairs of this State. With the exceptions of the courses at the main points of the Eastern circuits none can be compared to ours, and owing to the exegencies of the climate, an amount of work is entailed to keep them in order that would appal Eastern proprietors. There has been a great improvement in the Oakland track in late years, and for that matter every year has made it easier to keep in order. Originally there were more streaks of adobe which have been completely mollified by the addition of manure, sand and sediment. These have rendered it easily "cut up" so that there is comparatively soft footing while the surface is of uniform grade, and then the shape is after the improved pattern, viz.: Stretches of one-quarter of a mile each connected with semi-circles of the same length. The trip from Petaluma at the conclusion of the fair there is only a few hours on the steambot.

While it is several years since we visited Chico it will be a long time ere we forget the pleasant sojourn in that lively town. The town is not only one of the brisket and cleanest in the State, but there is a grand country surrounding it—grand in every meaning of the term. Rich in agricultural resources, beautiful scenery, enterprising and hospitable inhabitants, there is everything to make a good exhibition, and one that can always depend on proper support.

The track is worthy of encomiums, being the same in shape as that of Oakland, and only a short distance from the centre of the town. There are so many horses in the immediate vicinity that with reinforcements from Marysville and Sacramento there will be plenty of competitors. There are some fine breeding establishments in the neighborhood of Chico; among them, that of J. T. McIntosh and D. Reavis. Mr. McIntosh has the get of Singleton and Prompter, and Mr. Reavis the progeny of Blackbird. Then there are Brigadiers, Tilton Almonts and others, to offer a warm dispute for supremacy, and when there are such good grounds for differences of opinion the upshot must be controversies, "hot-and-hot."

No. 1. Trotting—For two-year-old colts owned in the district. Mile heats, best 2 in 3, to harness and to rule, for a purse of \$200. First colt to receive \$120; second, \$60, and third, \$20.

No. 2. Trotting—2:30 class. Mile heats, best 3 in 5, to harness and to rule, for a purse of \$400. First horse to receive \$240; second, \$120, and third, \$40.

No. 3. Running—Dooley Stake—Three-quarter dash for two-year-olds. Entrance, \$25, p. p., \$125 added.

No. 4. Running—Union Hotel Stake—One-and-a-half-mile dash for all three-year-olds. Entrance, \$25, p. p., \$200 added.

No. 5. Running—Three-fourths of a mile and repeat, for all. Entrance, \$25, \$175 added.

No. 6. Trotting—For yearling colts owned in the district. One mile, to harness and to rule, for a purse of \$150. First colt to receive \$90; second, \$46, and third, \$15.

No. 7. Trotting—2:35 class. Mile heats, best 3 in 5, to harness and to rule, for a purse of \$300. First horse to receive \$180; second, \$90, and third, \$30.

No. 8. Trotting—For single road horses to buggy, to be driven by the owners, best 3 in 5, for a purse of \$150. First horse to receive \$90; second, \$45, and third, \$15.

No. 9. Running—For all, one mile dash. Entrance, \$25, p. p., \$150 added.

No. 10. Running—Seven-eighths of a mile dash, for two-year-olds. Entrance, \$25, p. p., \$150 added.

No. 11. Running—Society Stake—For all, two-mile dash. Entrance, \$50, \$25 forfeit, \$300 added.

No. 12. Trotting—For two-year-old colts owned in 3d and 13th districts. Mile heats, best 2 in 3, to harness and to rule, for a purse of \$250. First colt to receive \$150; second, \$75, and third, \$25.

No. 13. Trotting—For all, mile heats, best 3 in 5, to harness and to rule, for a purse of \$400. First horse to receive \$240; second, \$120, and third, \$40.

No. 14. Pacing—2:20 class. Mile heats, best 3 in 5, to harness and to rule, for a purse of \$400. First horse to receive \$240; second \$120, and third \$40.

These are the opening fairs for September, and the first week in the month is well provided for. The second and third weeks are occupied by the State Fair at Sacramento, and then comes the fair at Stockton. San Jose fills out the month with the 29th and 30th, and leaps over into October with four days. At Sacramento the speed department is inaugurated on Thursday, the 11th, so that ten days are devoted to running, trotting and pacing. There are none more spirited than those who have the management of the San Joaquin exhibition, and the big amounts hung up are an evidence which cannot be successfully controverted. As we shall visit Sacramento before our next issue, and make a note of the improvements, that and succeeding fairs will be the text for the next chapter.

## Barefooted Horses.

When a person is induced to let a horse go unshod, the general inference is, that all that is necessary is to pull the shoes off and give no further heed to the matter. Even the feet of horses that never were encumbered with metallic attachments require constant care, while those which have been more or less injured by shoeing call for constant attention. Among those who are tolerably well versed in the structure of the feet of horses, some are prone to think that the horn is entirely devoid of life, and from the wall being insensitive argue that it cannot be injured unless by excessive mutilation. The wall is formed of a number of small tubes agglutinated together, the minute orifices being filled with a viscid matter secreted by the coronary band. The outside of the wall is hard, the thickness of this extremely hard portion being about the same as heavy foolscap paper, and is called the enamel from its density and polish. The object of the enamel is to give greater strength to the crust and render it impervious to water. That even an extreme thinness gives strength is evident from a comparison with analagous structures. A piece of bamboo will resist a heavy strain before it breaks, with the enamel cut it is easily fractured. Friction on the ground surface of the wall solidifies the lower portion of the tubes until there is nearly as much hardness as in the enamel, and thus closing the holes so as to prevent the ingress of moisture under ordinary circumstances. The enamel is so dense that there is little change after separation from the foot, the rest of the wall will shrink away so much from the evaporation of the filling of the tubes as to surprise those who have not seen it proved.

We have a practical exemplification before us. In the foot of a colt which had been laid up for some time, there was an excess of growth which was removed by large cutting nippers. The section cut off was about half an inch at the toe, a trifle less at the heel. When first removed it was four and a half inches across at the widest portion of the foot, five inches in length. It laid on a table in the library for several months, and as it dried it was forced into a circle gradually contracting until now the portion which formed the crust where it merges into the bars, overlap so that the diameters are reduced to 2½ and 3 inches.

The enamel is intact, and the shrinkage comes from the reduction of space occupied by the interior tube. Now it is evident that if this section of horn had been composed of such material as many imagine, it would have retained nearly the same appearance as when cut off, but when it is taken into consideration that in place of solid material there is a mass of tubes filled with matter that evaporates, and the supply being cut off, there must be a diminution of bulk. Had it been all alike, the original shape would have been kept. The enamel, however, was like a metal band which did not shrink and the softer part drew it into the circular shape. From this it will be admitted that if anything is done to impair the life of the tubes, there must be contraction, and that in a direction from the outside to the inner. Every nail that is driven cuts off the supply of nutriment and all below perish. Everytime that the feet are soaked there is a wasting of the life-giving fluid driven out by the water, and as water is readily vaporized, the tubes collapse. The bare foot is protected by the enamel and the closing of the ground surface of the pores by the friction of progression. When the enamel is destroyed by the blacksmith, when the tubes are sundered by the hoof knife, the water readily enters; the semi-fluid, deposited by the recesses in the coronary band, is diluted and there is not a sufficient supply to make good the loss. The action of water in expelling a thicker fluid is shown by the seasoning of fine lumber. Boards taken from the saw and immersed in water for two or three weeks, when put in the kiln will season in one-half of the time of those which were subjected to heated air from the start.

It may appear foreign to the caption of this article to dilate on the ill effects of water when it is so well known that unshod horses are rarely subjected to the "soaking outs" which are administered so frequently to those that have steel and iron-clad feet.

The digression came from the allusion to the structure of the feet, and though there is no danger apprehended from maceration in the case of barefooted horses, it does not follow that there should not be incidental reference. But notwithstanding that the worst features of shoeing are not met there is necessity for attention.

In horses that do not get much exercise the growth far exceeds the wear and there is danger of the horn breaking away in large pieces. Few wear the horn away regularly and in every case it is imperative that the edges be kept rounded to guard against breaking. In every instance among our horses there is a surplus of horn to be removed on the heels of the forefeet, and

in the hindfeet nearly all the wear comes on the outside. As the horn is replaced with greater rapidity than when the feet are shod, the unequal bearing must be guarded against by frequent lowering of the inside. By attending to this every few days the level bearing can be kept, and at the same time the edges rounded so as to prevent the breaking away of the enamel in small scales. A very great percentage of trotters wear away the outside of the foot, and when shod the only opportunity for correcting the wearing out of the feet is when the edges are rounded. The bare foot, or one-sided tip, affords the chance at any time, and there is no excuse for a "twist" to the ankle, which may result in serious trouble.

#### Death of Almont.

It is beyond question that Almont was as widely and favorably known as any trotting stallion in the United States. With the exception of his illustrious grandsire, Rysdyk's Hambletonian, he has engaged more attention than any other sire, and his get have been even more generally disseminated than the sons and daughters of the patriarch. There is scarcely a State or Territory in the Union without several of his sons, and their merit has been so universally conceded that foreign countries joined in the demand. It was a fortunate circumstance that General Withers secured Almont at the commencement of his operations as a trotting-horse breeder as the merit of the stock was apparent from the start. Fortunately, too, for the breeding interests of the whole country as the proprietor of Fairlawn has given his influence to sustain the dignity of the pursuit, and from the prominent position he occupied has been of the greatest service in establishing a reputation which is shared by the main breeders of the country. The business of breeding and selling harness horses is now recognized to be as reputable as any, while thirty years ago there was a tendency to associate it with fraud and chicanery. It is again fortunate for General Withers that he had made ample preparations so that even the great pecuniary loss attending the death of Almont is not so severely felt as it would have been a few years ago. With Happy Medium and Aherdeen, two of the best sons of Rysdyk's Hambletonian, and the sons of Almont, Alecto and Starmont, each of which has a further infusion of the blood of the "Hero of Chester," there is no danger of Fairlawn falling from the high position occupied for so many years. The appended letter from General Withers gives full information in regard to the death of Almont, and from it will be seen that his demise was accidental and in no way attributable to age or infirmity.

JOSEPH CAIRN SIMPSON, Esq.—Dear Sir: Almont died yesterday morning at nine o'clock from an attack of spasmodic colic. The attack was sudden and violent and resisted all efforts to check it, until it continued so long that it brought on inflammation of the bowels. He was sick only about twenty-four hours; he was in high health and full vigor when attacked; in fact he was the best preserved twenty-year-old stallion I ever saw. He looked, acted and moved as if in the very prime of life.

The usual custom was to feed and water him early in the morning and about 8 o'clock to turn him out to graze and exercise in a large blue grass paddock. As it was very warm on the 3d inst., his groom turned him out quite early in the morning and before he was fed and watered. As usual he trotted rapidly around his paddock, stopping only now and then to graze a little, and after being out about an hour, was taken up. While heated from the exercise he was given a bucket of water fresh from the cistern. This no doubt brought on the attack of colic.

The pecuniary loss to me is great, but I feel but little concerned at this. I and all my family, however, were so deeply attached to Almont that we were deeply affected by his sudden and untimely death. He was so kind and docile, and so intelligent and affectionate that all who knew him well became greatly attached to him. If any stallion ever merited the title of "Equine King" I think that Almont was fairly entitled to the distinction.

He was absolutely faultless in his disposition and behavior whether in harness or in his stable or paddock. A stranger, a lady or a little child could enter his box stall, or paddock with entire safety. He never showed the slightest animosity to any person but one, and that person had without cause or reason struck him severely with a whip. The kindly nature of Almont resented the injury and insult, and the party who gave him the cruel blow was always in danger whenever afterwards he entered Almont's box stall. Descendants of Almont are owned in almost every State and Territory of the Union, in the Dominion of Canada, in Europe, and the Sandwich Islands, and invariably are highly esteemed by their owners. The announcement of his death will be deplored by sympathizing friends and admirers from the Atlantic to the Pacific; from the Gulf of Mexico to and beyond the Great Lakes of the North and across the Ocean. To provide for the contingency of Almont's death, I had most fortunately reserved from sale three of his sons, out of very highly-bred dams; each of which I hope and believe will prove a worthy successor of his illustrious sire. But for this I would be greatly discouraged in my breeding enterprise. I have an abiding confidence, though the equine king is dead, that he will become more and more famous each successive year through his numerous sons and daughters and their descendants.

WM. T. WITHERS.

LEXINGTON, KY., July 5th, 1884.

Mr. S. J. Jones, of Portland, Oregon, arrived in this city by the last steamer with Forest King, and the somewhat celebrated Oregon mare, Blue Mountain Belle. The horses will take part in the races of the circuit this Fall.

#### Death of Monday.

The grand old thoroughbred sire Monday is numbered among the things that were. He never recovered from the siege of pinkeye that kept him in the veterinary's charge all last season, and this Spring has been but a shadow of his former self. The disease lingered in his system, and the immediate cause of his death was an internal abscess. He left an impress upon the thoroughbred stock of this Coast rarely equaled by any sire in the history of turf breeding. Monday was bred by Captain Moore and foaled May 23d, 1864. His sire Colton was a son of Lexington out of Topaz by Glencoe, the dam of Waterloo, Wagram, Lodi, Rivoli, and others. Colton was a successful racer, winning at two-mile heats over such horses as Uncle Vic, Joe Stoner, Rebel and Sherwood. He ran against Mollie Jackson by Vandal in the great race of three-mile heats, which stamped her as one of the greatest of any day, and the speed and stamina shown by Colton on that day, induced Capt. Moore to breed Mollie Jackson to him. The result was Monday. In his younger days, Monday showed himself a worthy scion of such a parentage. He won the trial stakes at Jerome Park in 1866. In 1867 he won at Jerome Park, May 23d, a purse of \$600 and on the next day a purse of \$700. On June 4th, at Paterson, New Jersey, he won the American Derby from a field of 33 starters; four years after Norfolk had established his character as a performer by winning the same stake. He was brought to California in 1870 by A. Maillard, of San Rafael, in a stable containing Young Eclipse, Hennie Farrow, Ballerina, May Flower, and others, whose descendants have ever since been prominent in the turf records of California. It is as a sire that Monday is best known on this Coast, as he was never trained in this State. His get includes a long list of winners at all distances and some of the noted runners of the Coast. The list contains Raven, Mark L., Frank Hastings, Lottery, Carrie C., Forest King, Sunday, Duke of Monday, Flou Flou, Augusta E., Sister to Lottery, Bryant W., Fiammi, John A., Phoebe Anderson, Rita and many more not now called to mind. His best uick was on Norfolk mares, where the divergent strains from Lexington and Glencoe were reunited. He was a bay horse, but marked some of his get jet black. It has been observed that these black colts were better than those of any other color of Monday's progeny, and with the trainers and other experts who have handled the stock it has come to be an axiom that if you have a black Monday, you have a clinker sure. Monday was a horse of exceptional substance and power and of invincible courage, qualities which he handed down to his colts, with great uniformity. He divided with young Eclipse the honor of hegetting Mollie McCarthy. The evidence that weighed against Monday's claim was the fact that Shannon, unmistakably by Monday out of the dam of Mollie McCarthy was only a fair performer, but Shannon has been a short time in the stud at Palo Alto and his get are so promising as to lead to the belief that he is an instance of the racing quality holding over. It certainly appears in Shannon's get. Monday has some fine representatives in the stables at Palo Alto, and the very day he died a two-year-old son of his, barely bridle-wise, ran a quarter in 23 seconds over the Palo Alto track, which is slow compared to the courses of the circuit.

#### Mr. Winters' Sale.

The sale at Sacramento last Thursday was quite satisfactory to all concerned, Mr. Winters being agreeably disappointed in the average of the prices realized. The following is a statement of the result, and we will reserve the privilege of analysis till next week:

The fourteen horses sold for \$19,200, and the average was \$1,371.43. The first animal offered for sale was Alf, Estill, a fine sorrel colt, foaled in 1882, by Norfolk, dam Lady Jane, by Marauder. The first bid was \$250, and the horse was finally knocked down to Wm. H. Murray for \$625.

A chestnut colt, foaled in 1883, by Norfolk, first dam Illusion, by Alarm, was next offered for sale. The first bid was \$150, and the horse was finally sold to W. B. Todhunter for \$700.

The Prince of Norfolk was next led out and was met with a wild hezza by the horsemen assembled. The first bid was \$1,000, which kept growing \$100 at a time until \$3,750 was reached, and the Prince was knocked down to Matt. M. Allen, of Oakland. Later in the day Mr. Allen was offered \$5,000 for the Prince and refused it.

Alta, a chestnut colt, was next led out. He was foaled in 1882, by Norfolk, first dam Ballinette, by Monday. The first offer was \$1,000, and the bids rapidly rose to \$3,750, when he was knocked down to W. B. Todhunter for \$3,750.

No. 9 on the catalogue was next offered for sale—a chestnut colt, foaled in 1883, by Norfolk, first dam Marion, by Malcom. The bids started at \$1,000, and rose rapidly until \$2,050 was reached, when he was knocked down to W. B. Todhunter.

The next animal offered was the celebrated hurdle mare Hattie B., a chestnut mare foaled in 1879, by Norfolk, first dam Maggie Dale, by Owen Dale. A gentleman from St. Louis started the bidding at \$500, stayed with it up to \$1,600, but finally let John Mackey have her for \$1,650.

Bonanza, a chestnut gelding foaled in 1882, was next led out, and started at \$1,000. The bidding was spirited between

California and Eastern horsemen. J. D. Christy, of St. Louis, got him for \$1,850.

No. 15 on the catalogue, a chestnut filly, foaled in 1883, by Norfolk, first dam Neapolitan, by War Dance, was next offered. From \$300 the bidding rapidly rose to \$1,550, when it was knocked down to M. M. Allen, of Oakland, for \$1,550.

No. 13, a bay filly, foaled in 1883, by Norfolk, first dam Kitten, by imported Eclipse, was started at \$200, and sold to John Mackey for \$425.

No. 11, a chestnut colt, foaled in 1883, by Norfolk, first dam Mattie Glenn, by imported Glen Athol, started at \$350, and was sold to W. B. Todhunter for \$850.

No. 12, a chestnut colt, foaled in 1883, by Hooker, first dam Abbie W., by Norfolk, was sold to J. T. Courtney for \$400.

No. 7, a gray gelding, foaled in 1882, by Hooker, first dam Queen, by Norfolk, was sold to Tom Delany for \$310.

No. 8, a bay filly, foaled in 1882, by Hooker, first dam Abbie W., by Norfolk, was sold to John Mackey for \$1,025.

The last one of the sale was a chestnut gelding, foaled in 1882, by Hooker, first dam Bay Kate, by Norfolk. She was started at \$150, and sold to D. J. McCarthy for \$315.

#### Fall Race Meeting.—Pacific Coast Blood-Horse Association.

By fixing the time as late as November 8th, 11th, 13th and 15th, there is an absolute assurance of a first rate meeting this Fall. It is the intention to add enough races to the fixed events so as to make a full bill, and by that time all of the California horses will have returned from their Eastern trip, and be on hand to take part in the sport. There is every appearance of success so far as it can be predicted before hand. Notwithstanding the high form shown by the Santa Anita colts at the meetings at Covington and Chicago, there are good reasons to think that there are others of equal promise at home, and that the very best of those which have taken part in Oriental racing will find worthy competitors on this Coast. Being so far in the future, the committee having the arrangement of the programme in charge will not hurry in completing the task, and the first or middle of October will be soon enough to publish. This will enable them to arrange stakes and purses so as to meet the wishes of those who have horses to engage, and also ensure larger fields of starters. There is little question of the coming meeting excelling any which have preceded it.

#### Wonderful Feats.

We will await mail advices before indulging in extended comments on the wonderful performances of Westmont and Phallas. Both are surprising displays of speed, and in the case of Phallas, admirable endurance. The fourth heat in an actual race in 2:13½ and the last half in 1:06½ is an example of these rare qualities never before equalled. So far as known, every line in the blood of Phallas extends to the thoroughbred. Through his sire, Dictator, to Mambrino and Duroc, his dam to Mambrino. The immense speed shown by Westmont, while partially due to the assistance of the running mate is so much faster than has heretofore been shown in public in any sort of a rig, by a trotter or pacer, that it must be pronounced wonderful, too, if made outside of legitimate methods recognized as the supreme test. The pacers, by the way, are showing that this peculiar gait is not dependent on plebian origin, and as Westmont is a son of Almont, the benefits of good blood are exemplified in his case.

#### Fixed Events.

Elsewhere appears the advertisement of the fixed events of the Pacific Coast Blood-Horse Association, which close on the 1st of August. It is so evidently to the advantage of breeders to engage their colts in these stakes that it is only necessary to call their attention to the conditions and date of closing. Should they be offered for sale, these engagements will enhance their value far beyond the cost entailed, and no one can claim superiority for his stock who declines the opportunity. The advertisement is so explicit that further explanations are not needed, except that by an oversight in the typographical department the Baldwin Stake was omitted. This will close for 1884 on the same date as the other fixed events, and is a stake for all ages, \$250 each p. p., \$1,000 added; \$400 to second; third to save stake; dash of four miles.

The *Western Sportsman* says: Those who are anxiously looking for instances where aged mares have produced winners can point to Will Cody, whose dam, Celia, was about twenty-five years old when Cody was dropped, he being her second foal. He was foaled in 1871. His record, 2:19½, was made at Chicago on July 3d, 1880. He has now won sixty-four heats in 2:30 or better. It is doubtful if there is another case on record where so old a mare has produced so fast and game a trotter. Cody's dam was a flea-bitten mare of unknown breeding.

The gelding Dundrum, by Melbourne, Jr., owned by John Early, of Boise City, Idaho, was sold during the recent Union, Oregon, to Chas. Marsh, for \$250.

## HERD AND SWINE.

### Dairy Farming in Holland.

The agriculture of Holland is based primarily on its grass lands and its Holstein cattle. Dairying is the principal industry. It has a humid climate not unlike that of England. Its peculiar race of cattle has existed and has been the subject of improvement for more than 1,900 years. Neither the Shorthorn nor the Hereford will thrive in Holland like the Holstein. The latter are the result of special adaptation to special ends. The farmers in North Holland devote their farms almost wholly to the production of cheese. It is here that the famous Edam cheese is made, which commands double the price of ordinary cheese. It is a full-milk cheese. The Friesian farmers made all the butter they can, devoting the skim-milk to the production of skim-milk cheese.

Almost everyone knows that the great farming districts of Holland have been reclaimed from the sea, that its vast areas of rich soil really formed in years gone by the bottom of the sea, yet few realize that these magnificent stretches of fertile fields are even now eight, ten, twenty and in some instances seventy feet below the sea level. Costly dykes measuring eighty to one hundred feet in width at the base, eight to seventy feet in height and twenty to thirty feet in width at the top shut out the sea from the meadows and pastures of that country. These dykes have paved roads on the top, while the surface exposed to the sea is faced with stone or brick. Hundreds of windmills and scores of pumping engines, some of the latter costing \$75,000 to \$150,000 each, are kept continually in motion freeing the inner ditches and canals of surplus spring and rain water. The streets of Amsterdam are seven feet below the sea level, the province of North Holland twelve to fourteen feet, the Beemster district seventy feet under the sea, in fact the whole country averaging six to eighty feet below the level of the sea. This great expense is incurred by the government, which imposes a tax upon the land reclaimed in reimbursement. Droughts seldom occur in Holland, but when they do water is admitted from the sea into the ditches and canals, which thus serve the double purpose of irrigation as well as drainage. Singular as it may seem this salt water becomes freshened in its passage through the soil, and is thus rendered suitable for irrigation.

Holstein cattle have been bred for centuries for the combined points of value, beef, butter and cheese. No cow can yield large products without corresponding supplies of food. In the animal economy it is always desirable to encourage the greatest consumption of food which can be properly digested and assimilated. The Holstein cow is the outgrowth of good farming, of abundant and nutritious pasture and meadow. Each of the prominent breeds of cattle enhances its own purpose. While the Devon or the Ayrshire may subsist upon hilly pastures and scanty herbage, the Holstein and the Shorthorn demand more generous feeding. Each is valuable in its proper place. Many mistakes have been made in attempting to place the right animal in the wrong place. One that would thrive in a congenial location does poorly when out of place. No breed of animals is adapted equally well to all localities. Those who expect the highest success from the Holsteins must study their antecedents. One element of value in Holstein cattle is that they are not a pampered, over-fed race, forced to their utmost by grain and oil meal, but are the simple, natural product, at least in their native home of grass and hay.

Holland is almost exclusively devoted to grass and pasture. Small areas of grain are raised, but hundreds of farmers have never owned or used a plow, a harrow or a cultivator. Grass is indigenous to the soil. Natural pastures abound. Field after field has not been plowed for years. All manure is applied as top dressing. A little red clover is sown in certain sections, but the principal grasses grown are fine rye grass and two or three kinds of fescue. Of course, the old pastures contain quite a variety of fine and nutritious grasses, yielding a heavy weight of feed every year. Every farm is thoroughly ditched, and ditching tools, spades and shovels are about the only farm tools seen outside the buildings in Holland. Of course there are some notable exceptions. In some sections we find fine gardeus, fields of grain and even silos and ensilage.

Holland raises few or no steers, its beef product being mainly derived from the fattening of farrow cows. All bull calves, except for breeding purposes, are sold as veal. The cows generally come in at two years old, and are turned off for beef at the age of seven or eight. Old cows are seldom seen except when kept as breeders, as it is considered far more profitable to turn them off at an early age, before the shrinkage and hardening in the muscular tissues yields but inferior beef. Cattle seldom have any other feed than grass in Summer and hay in Winter. The motive power on the farms is mainly horse. The cows are generally timed to drop their calves in February, March and April. The system of caring for the calves is quite different from that which prevails in the United States. The cow never sees her calf; it is taken immediately away, fed on milk a few days, then mainly on whey, with perhaps some hay tea, until when about six weeks old it is turned to grass where it thrives wonderfully. A large percentage of calves die under such early treatment, but the calf is often neglected because the farmer cannot afford to allow the cows to suckle their calves except in the case of breeding stock.

Holland has somewhat more Winter than is usual in our Northern States, but the cattle are much better protected and cared for than here. The cows are put in the barn about the first of November and are not allowed to go out or even to move about in the building until they are turned out the following April or May. The barns are warm and tight, being constructed of brick. They are low studded, so much so that a man who measures six feet in height is obliged to stoop in passing along where the cows are tied. Water is pumped from adjacent wells and passes through troughs in front of the animals. In the Winter season these barns, warmed only by animal heat, seem hot, stifling and ill ventilated to an American farmer, yet the cows appear in good health, give double the average yield which is secured in our country, and the hair is smooth and fine. They receive only hay as a Winter feed. They are dried off two months before calving for the necessary rest and recuperation.

Unusual care is exercised in the management of the manure. Liquid manure is saved, stored in tanks and after dilution with water is distributed over the farm in sprinkling carts. The cows stand some two feet above the gutters which receive the voidings, the latter being frequently cleaned out and added to the compost heap. The latter is a formidable affair, being wedge-shaped in construction; often measuring sixty feet in length by thirty feet in width commencing at nothing at one end, the other being elevated several feet above the ground to facilitate the shedding of water. The

manure is never allowed to ferment. In forming the compost heap first a layer of earth is provided, then a layer of manure, and so on through the heap. The manure is all removed from the barns in wheel-barrows.

Farming in Friesland will perhaps be better understood by giving some of the details of a certain 125-acre farm, used almost exclusively as a dairy farm. The annual rental is \$28 per acre, or a total of \$3,500 a year in addition to which about \$100 in taxes is paid by the tenant. With the average productivity of American farms it would stagger one of our farmers to attempt to pay \$3,600 for twelve months' use of a 125-acre farm and buildings, but money is made and a good living secured on such a farm in Holland.

The farm above mentioned has not a single acre of waste meadow or pasture. It is all available, and aside from the ditches, every foot is in grass or pasture. The land was originally reclaimed from the sea, and its surface is now fourteen feet below the level of the sea, protected by dykes. This very farm, which is not above the average of land in the country, is worth \$600 to \$700 per acre. The soil of all these farms is strong and alluvial, containing a large percentage of shell manure.

Now let us note the live stock this farm carries. Two months ago there were forty-six cows, including nine two-year-old heifers, thirty yearlings, thirty calves, thirty sheep and three horses kept on the 125 acres of grass and pasture. Again, the forty-six cows give more milk than eighty average American cows. Every acre in grass is cut three times during the season, the last cutting a light one, though the three cuttings give at least seven tons per acre, year in and year out. Such capacity and production are practically unknown in this country, but a consideration of these facts will show why the tenant farmer in Holland can pay an annual rental of \$28 per acre. Again, butter sells at thirty-two to thirty-three cents per pound, and skim-milk cheese at nine cents. The sheep kept are usually mutton breeds or the long-wooled variety. The yield of wool is double the average weight obtained per sheep in the United States. Ewes are milked, and such of the product as is not used in the family is mixed with and applied to the enrichment of skim-milk in the manufacture of cheese.

Farrow cows are commonly milked through the Winter and fed limited quantities of linseed oil cake. Turned out to grass, they fatten very quickly, and average at killing time a live weight of 1,200 to 1,600 pounds. At present beef there commands thirteen cents per pound live weight; mutton also sells at proportionally high rates, while the lambs are fattened early and sold when not needed to replenish the flocks.

This farm, to which the above description especially applies, was occupied by the father of the present tenant during his life, and the present tenant expects to occupy the farm as long as he lives, handing its occupancy down to the next generation, thus showing that such leases are sought for and considered valuable. This farmer lives well, is worth \$15,000 to \$20,000, has a wife and four children, all well dressed and well cared for. He has good driving horses and carriages, works with his brains rather than his hands, employs eight to ten laborers and appears to live and enjoy life far better than the average American farmer.

Trained farm labor is abundant and offered at low wages. Men servants or laborers command \$1.50 to \$2.00 per week, and women \$1.00 to \$1.25 per week, with board included. Many a hundred-acre farm employs eight or nine laborers. The fare is nutritious and abundant, though the dietary includes very little meat. The black bread, so common throughout the country, is made of a mixture of rye, millet seed and oats. Large quantities of milk, butter, skim-milk, cheese and soups from joints are also consumed. Fish, though apparently plenty in the country, is in price generally beyond the reach of the poor.

If good roads are to be taken as a measure of civilization, then Holland must take front rank, as heavy outlays are made for permanent and superior roadways. Good roads are considered good economy, while poor roads are not allowed in any section. All main and important roads, even through the farming districts, are paved with hard-burnt bricks set edgewise; less important highways are gravelled and drained with care and skill. This work is never slighted, and seems to be done for all time, and thus greatly facilitates internal transportation.

The farm buildings, generally built of brick, are spacious and well arranged, considering the customs of the country. The barn, generally fronting the main highway, is connected in the rear with the servants' quarters, next following, though all connected, the farmers' living rooms, and finally the creamery at the farther end.

Rains are so frequent in Holland and continuous sunshine so rare that great difficulty is experienced in curing hay. Though sweet and apparently relished by the cattle, such hay would at first be counted almost worthless by the American farmer. It is black in color and forbidding in appearance. The stalks are not hollow to the sight and seem solid, adding to the difficulty of curing.

### How Many Acres Support a Cow.

In reply to the query how much land is required for the support of a cow? the *Farmers' Union* says: "This question depends for an answer so much on the circumstances of the soil as not to admit of a very definite answer. Mr. Schell, of Little Falls, N. Y., estimates that the land in pasture and requisite for the support of a cow is three acres; and this is the estimate of Mr. Carrington for modern good dairy farms in England. In Belgium 10 acres of land supports two cows, one heifer, and one yearling calf; but when the calves are sold off young, and cows in full milk only are kept, the proportion is two cows to seven and one-half acres. Colman estimates three acres of pasture as requisite for a cow in Berkshire county, Mass., while in some towns two acres of pasture are sufficient. Mr. Farrington, in the report of the American Dairymen's Association, thinks that on an average four acres are required per cow for Summer and Winter keep; while the late Professor X. A. Willard thought that in Herkimer county, N. Y., one and one-half or two acres of pasture per cow would answer, and in some exceptional cases one acre. Dr. Tefft, President of the Illinois Dairymen's Association, recently informed the writer that in Illinois he considered from two and one-half to three acres about what would be required. The doctor is a practical farmer, and is the owner of a very fine dairy, but his statement seems a little wild when we refer to the fact that Mr. Lord, an Elgin dairyman, keeps 100 cows on 300 acres, besides the horses necessary for the farm work, while the Oatman Bros., near Elgin, keep 84 cows and the requisite number of horses to do the farm work on 200 acres. They use ensilage largely in the place of hay."

Good butter and cheese cannot be made from the milk of cows which are deprived of pure water.

### Darlington Butter.

Mr. O. M. Tinkham, Secretary of the Vermont Dairymen's Association, sends the *Prairie Farmer* his notes of a recent trip to the celebrated 650-acre dairy farm owned and managed by Jesse and Jared Darlington. The farm is in Delaware county, Pa., eighteen miles from Philadelphia. The country is hilly, the soil is a clay loam, in excellent cultivation, and very productive. Nearly the entire farm is tillable, and has at one time or another been under the plow.

The barns are substantial structures, but with little modern and improved "style" about them. The cow stables are in the basement; have cemented floors, slightly inclined lengthwise of the stable so one cow stands a trifle higher than her next neighbor. A gutter behind the cows conveys the liquids out into the yard. The cows are littered with straw. In two of the barns the cows are tied with chains; in one the swing stanchions are used. The stables while clean, like those of any good farmer, are not painfully neat, as some dairy writers describe the cow stable as it should be. The cows are of no particular breed, but considerable Shorthorn blood is noticeable, the proprietors keeping an eye to the final end of cattle—the butcher's block. The average number of the herd is about 150 head. They are kept in stables the year through except being allowed a few hours per day in an inclosure, where they can indulge in a bite of grass and a little exercise. Their regular feed is bright clover hay, cut and mixed with equal quantities, by weight, of corn meal and wheat bran—about 8½ pounds each of the three per day. Meal that is in any way the least "off" from heating or other cause is rejected. The gentlemen would not feed such even if given to them.

The milk is poured from the milking pail through a wire gauze strainer into a can, which is taken, when full, to the creamery, where it is again strained, this time through a cloth, when it passes directly to the tank holding it for separation from the cream. They formerly set the milk in six-quart pans, when it took about 10½ quarts of 2½ pounds each for a pound of butter, on a yearly average. They have for the last year been using a Centrifugal with much satisfaction, and, as nearly as they can judge from their monthly averages, they gain about twelve per cent in butter over the former method, and without deterioration of quality. The milk is separated directly after it is brought in, the separators being run by an engine in the creamery, and the cream set aside in the cans to ripen, or sour, before churning, which is done twice a week; and in cold weather a little sour cream is left in the cream can to hasten the process. The churn is made of cedar, barrel-shaped, except being of uniform size and with three narrow staves projecting inside. The butter is washed by pouring cold spring water into the churn after the butter-milk is drawn out and before the butter is "gathered." It is worked by hand, not salted by guess, and after standing about an hour is reworked, lumped and printed, then put away in coolers to be shipped next day. The prints are half-pound and pound lumps, each wrapped in muslin, and are shipped in galvanized iron cans, in cedar tubs, with ice in warm weather, and holding from a pound and a half to seventy pounds of butter.

The average product of this dairy is about 1,200 lbs. per week, and it is sent to Philadelphia, New York, Boston, Washington, etc. They are now sending to families which have been supplied by their father and grandfather for 75 years.

Mr. Tinkham sums up the lessons learned from the Darlington's methods as follows: That careful feeding, the making of a uniform article all the time, and that getting a reputation for butter always means profit. The great mass of butter is sold anonymously. The maker does not put his name on it, and the consumer has no means of getting the same again if he wishes to do so. In other manufactures it is considered a suspicious circumstance if the maker's name does not appear on the goods. Another point is, that none of the conditions here are beyond the reach and practice of the ordinary farmer on a small scale. The quality of the product does not depend on the following of certain sets of rules formulated by impractical theorists; still the large dairyman will secure larger profit over the one who has not cows enough to use a separator if, as the Darlington's say, it will give an additional pound of butter for every eight or ten pounds secured in the old way.

The farmer who is hardest to convince of his errors is the one who possesses a single instance within his own experience with which to combat your arguments. If you maintain that Jerseys are good butter cows, he once knew one that could not make a pound of butter. If you hold that roots are good for dairy cows, he once knew one to get choked to death on them. His one swallow makes a Summer, and he forgets that though experience is a good teacher, it should be the experience of many who have tried several ways, rather than the experience of one, that always creates but a limited knowledge. The Good Book tells us not to be over-wise in our own judgment. This should especially be the case in matters pertaining to farming, where every man's experience is so varied in different seasons. Then there are so many conflicting elements about farming, and especially that most fickle of all things, the weather, makes or mars a thousand fortunes every year, and nowhere is able more potent than on the farm.

American dairymen have little to fear from competition of New Zealand butter in the British markets. The experiment of shipping butter from there is not likely to prove successful, judging from the reported results so far. A Sydney paper publishes a letter from the London Commission firm to whom a consignment of New Zealand butter was made. It said the butter was "rank and too soft for the London market." As about 1,000 casks more were arriving, the shipment in question was put upon the market for what it would fetch. This was \$15 per cwt., making \$133.52. The freight, commissions, and other charges amounted to \$313.22, leaving a net loss of \$179.70. This was not an encouraging result of the experiment. Further reports were that the 1,000 casks of New Zealand butter with which this lot came into direct competition "hung fire at 56s.," which was a cent a pound less than this sold for.

A putrid carcass polluting the air of a pasture will spoil not only the milk of the cows running there but also the entire contents of the vat into which the tainted milk is poured at the factory.

The patron who will bring impure or imperfect milk to the factory, is like a passenger boring holes in the ship which keeps him and all the others afloat.

The exclusive feeding of clover to cows gives hard cheese and soft butter.

The one sure way to have good cows is to raise them yourself.

The Cow is Queen.

A few years ago many people stood ready to claim that cotton was king, indeed there are many gasping slaves-to-day who claim the same thing. Statistics are abundant by means of which this claim can be, in part at least, substantiated, but very few persons seem desirous of claiming that King Cotton ever did much to improve society, education, or condescend to fight such a vulgar thing as a mortgage. Cotton may be king or not just as people care to think. We don't believe he is, but we do believe that the good old cow is queen, and that with a gentle and rovel purpose she is seeking to build up the land that the old monarch has wasted. There is very little style about the old cow. She stens slowly and clumsily about her business, but she makes the business pay well. She plods along in heat or cold, wet or dry, eating what is given her, feeling interest enough in the family to look out for the dairy interest under circumstances that would discourage any other living creature; and when she is petted and fed and cared for as should be, she responds like a queen. She should be crowned with a new milking pail and an extra feed of meal. The good old cow has paid off mortgages, and paid for more farms than any other known production. She is the mother of all our beef. In many a household she catches the wolf on her horns and tosses it far from the door. She has turned the tide of our agricultural prosperity in many parts of the country from a downward course in raising grain or cotton to an upward and prosperous one in raising stock, grass and hay. Flowers and grass spring from beneath her feet on the most barren soil. The old cow don't stop to enthuse over them, but converts them into good, solid, hard cash. King Cotton may well tremble when he sees good old Queen Cow marching in his direction. She comes marching along in advance of better schools, better morals, better farms, better men and women. The dead old cotton fields will burst forth into grass at her touch, and contentment and happiness will leap out of her milking pail. We take of off our hats to Queen Cow. May her shadow never grow less.—Southern Live Stock Journal.

One cow, which will give 5,000 pounds of milk in a season, will bring more net profit than 3 cows producing only 3,000 lbs. each.

The milking qualities of a cow depend more upon those of her sire's mother than upon those of her own mother.

STABLE AND PADDOCK.

Recreation for Campaigners.

[Live Stock Journal.]

If the flowers bloom in the Summer in the garden, then not all the nursing and forcing of the florist in the hot-house can make them bloom with gratifying results in the Winter. The same law obtains in the growth of the forest trees and all vegetation. Now there is absolute persistence in the physical laws, whether they relate to animate or inanimate nature. The horse that is kept up to the full tension of his muscular capacity, on the race-course in the Summer season, and on the roads in the Winter, has no season of rest, no opportunity for recuperation, and, therefore, is not enabled to concentrate his full capacities upon special seasons or great events. But the question arises, "How much recreation should the trotting horse receive?" Should he be permitted to run out all Winter long, without any restraint, till his muscular system becomes completely relaxed, in spite of his warm bed at night and nutritious food in the day time? Some experienced horsemen insist upon this liberal treatment, while others claim that it takes almost as long to season the muscles, balance the action, and key the horse up to the perfection of condition that he had acquired when this deteriorating vacation began, as it does for the horse to recover from the old-fashioned "freezing out" process. In this matter, as in all the other processes of human thought and practice, those trainers seem to succeed the best who practice the golden mean.

This train of thought has been suggested by observing the methods of William W. Bair with Maud S., the swiftest trotter, and John Splan with Johnson, the fastest pacer in the world. They were given the benefit of rest, but it was not continued to the point of deterioration. Their shoes were removed in the early Fall, and they were allowed to run at large when the grass was still full of growth and nutrition. The surface of the skin was relieved from the irritation of grooming, and the quantity, though not the quality of their food was lessened. Inclement weather always found them under shelter, and the depth of their clean straw beds effectually prevented the possibility of hide chafing and joint sores, that mar the bodies and limbs of horses that sleep upon the hard ground. This vacation continued about two months. When the bells of the watch tower had rung out the old year and rang in the new, then the vacation of these phenomenal performers had ended. Inaction, with generous treatment, had made them fat and lusty. The gradual process of reducing them to muscle, sinew, and frame, with all burdensome flesh eliminated, was then carefully begun. Their shoes were put on, the cleaning brush and rubbing cloths at first lightly applied, and they received for ten days walking exercise, before they were ever permitted to indulge in the slow jog-trot. Their cleaning and work was increased every day, but from New Year's Day to the first day of April they were never speeded fast enough to produce a glow of perspiration. Thus their muscles were gradually seasoned and the fat reduced, whilst their work and diet were increased, so that when the Spring campaign fairly opened, they were in superb condition to make creditable public performances. During this Spring preparation they were not deprived of the tender grass, but every day to the halter they were treated to the life-restoring, medicinal qualities of the green grass.

To our mind this treatment is both humane and scientific. It is not obnoxious to the censure of the extreme practice of undue exposure, enervating seasons of long continued rest, or the severe tension of uninterrupted work on the racecourse, and on the road, or continuously on the track in the centre and towards the east of the continent in Summer, and in the extreme west, on the peninsula of California, in the Winter.

Horses subjected to these judicious periods of work and rest, of change of life from the stable and dry grain, and the blanket and grooming, to the field unshod, and the natural vegetation of the pasture, will last longer, and trot faster than when exposed to the exhaustive vicissitudes of any of the extreme practices we have considered.

Vertigo.

Horses are now and then attacked with a sort of giddiness, which is apt to come on while going fast. The animal all at once commences shaking his head, staggers, reels and stops short. If permitted to rest awhile, he recovers and travels on as if nothing had happened. This is vertigo, and these symptoms are apt to return; therefore, a horse having once had an attack must be managed with caution. The disease is generally supposed to be connected with some pathological state of the brain or nervous system, and must, therefore, be considered incurable so long as that organ or system remains in a pathological condition.

The first object in the treatment of vertigo is to act on the digestive surface by means of a full dose of physic. Mustard, moistened with vinegar, should be rubbed along each side of the neck near the head. Some practitioners recommend setons through the temples or along the nepe of the neck; others blister the head. Blood-letting is generally resorted to for most diseases of the brain, but the practice should be avoided unless absolutely necessary. Benefit will be derived from the daily use of an anti-spasmodic draught composed of powdered gum assafoetida, 1 drachm, sweet spirits of nitre, 2 drachms, thin gruel, 1 pint, to be given as soon as the bowels have responded to the purge and this to be continued until the patient appears better. Good grooming, light diet, clean stables, well-ventilated, and light work are among the best remedies for warding off an attack of vertigo. At present most veterinary doctors agree in seeking the proximate cause, not, as formerly, in the brain, but in the abdominal organs and in considering the cerebral affections as purely secondary. The vertigo often succeeds acute encephalitis, the intensity of which has diminished to a certain degree; but very frequently, also, it comes on without having been preceded by inflammation of the brain. It recognizes the same causes as the latter, isolation, confinement in hot and badly aired stables, cold, extreme fatigue, blows and injuries on the head, indigestion, unwholesome or too much food in proportion to the exercise taken. The fear of punishment, especially of the whip, occasionally gives rise to it in sensitive and irritable animals. Some horses have an hereditary predisposition to it, and mares are considered more subject to it than stallions. Further, it is scarcely ever observed except in hot weather, and it is generally at the beginning of Summer that it commences to appear. It goes away also in Autumn, at least with respect to its chief symptoms. These are the following: The horse, a little before lively and active, begins all of a sudden to appear heavy and indolent; he is dejected, and prefers to keep himself in the darkest corner of the stable, eyes dull, look fixed and stupid, eyelids half shut, inattention to everything, forgetting even himself, and, as it were, asleep and head hanging to the ground and resting on the manger or on the rack. His gait is heavy, slow and unsteady; he raises his feet very high and puts the entire sole to the ground, raising and letting down the limbs in a manner purely mechanical, and, as it were, unconsciously. He exhibits much awkwardness in turning, and cannot be pulled back except by depressing the head very much, and pushing it laterally, also, he leans on one side in walking. To maintain his equilibrium the better he places the forelegs beneath the belly and moves his ears in a peculiar manner backward. According as the disease progresses he becomes less and less accessible to external impressions; mastication is performed slowly; he takes from time to time a mouthful of food, masticates it, swallows a portion of it, but keeps the remainder in his mouth. He prefers taking his food off the ground rather than any other way, and when drinking he plunges his head into the water, even above his nostrils. During and after some rather violent movements his symptoms become much aggravated, and the signs of complete insensibility become more and more marked. The animal runs on quite blind till some obstacle stops him. He then turns round or remains tranquil, with his head depressed and the legs crowded beneath the body, without being able to change this unusual attitude unless assisted to do so. There is never any fever; the pulse is often from ten to twelve pulsations slower than in the normal state. In the same way, also, the respiration is constantly slow, deep and frequently of a sighing character; in almost all cases the tongue is foul, and the mouth dry and clammy.

Horses—Necessity of Exercise.

Exercise is requisite for the production of a good and substantial breed of horses, says the *Prairie Farmer*. Without labor, as well for breeding mares as for stallions, we can never grow stock for hard work. Too much inaction extinguishes the generative power. In this respect wild horses show us an example worthy of imitation. And, besides, the powerful stallion has always an advantage over the weak one; for mares in a state of nature always give preference to the more active and vigorous, the indolent stallion, without energy, being refused and frequently ill treated by them. In a herd of wild horses the weakly cannot keep pace in their laborious course with the stronger, but are forced to stop for breath; the laggards behind are dispersed and separated, and become the prey of ferocious beasts.

The domesticated horse has neither to fear teeth of the wolf nor the inclemencies of seasons, and yet he is no longer the same animal. His whole nature has undergone notable modification. Nowadays man directs the intercourse of the sexes. Our present breed of domestic horses is, in truth, man's own, making allowance for the instinct of self-preservation, modified by domesticity. The horse no longer breeds but at our command. Since, then, man has made himself absolute master over horses, it is his duty to find means to make amends for the privileges he has deprived them of, and this compensation will be found in work. It is in well-regulated exercise alone that the domesticated animal finds any guarantee for a long and supportable life.

The foal inherits direct reciprocity of qualities from its parents; but the attributes of the mare descend most directly, and have the longest duration; those which descend (with the most certainty) are a good constitution and endurance of work. Want of exercise, and too long standing in the stable, causes the blood to become morbid, and the muscles to lose their elasticity and energy. The horse, in health, using his strength in the open air, and thus exhausting his powers, breathes with expanded lungs; every muscle, every fibre of his body, is on the stretch, ready ever for renewed efforts; so that it is not the muscles only that become augmented by a well regulated exercise, but the organs of respiration benefit by it. The lung of the working horse presents a healthy aspect; it is voluminous, and plays its part with freedom; while on the other hand, in the stallion, on whom too much indulgence has been bestowed, and too little activity, we find a lung shrunk and doughy, and without energy. In the growing colt which we deprive of exercise, we stifle the most promising qualities; and he, having them undeveloped in

himself, in his turn robs all his posterity of them. Thus it is that we have, step by step, arrived at the deterioration of a such excellent stock, the original of which exists no longer but in our imagination. Furthermore, we must take care not to breed from mares of delapidated constitutions, worn out by work. Nothing is better for mares kept for breeding than the work they get out in the open fields. The intelligent farmer may, in this way, breed from mares up to their twentieth year. Not only can she work during gestation, but she does so both to her own end and her offspring's welfare; and the success of the breeder will be the greater as he proportions the feed of the mare to her work. This well ordered, it is that constitutes the whole mystery of breeding the domestic horse.

Our aim is to develop the utmost strength and celerity of which a horse is capable; and it is by well-regulated exercise that these two qualities are developed. Exercise produces suppleness in a horse, and strength and endurance under the severest trials and the most laborious work. Nothing is so contrary to the horse's nature, destined as he is for exertion, as lengthened and continuous rest.

With a view of setting forth the indispensable necessity of exercise for horses, it will be as well to enumerate the inconveniences resulting from lack of it. Prolonged repose in the stable favors in the animal the plastic process. His fibres become distended, the cellular tissue surcharged with fat, inasmuch that the whole body grows weak in proportion as it grows bulky, and in short time becomes a spongy mass, lacking altogether energy and vigor. In such a condition the horse proves a burden to himself. The muscular system grows weak not only in proportion to the relaxation of its fibre and to the softening of the whole body, but, in addition, as the surcharge of useless fat incommodes in particular the extensor muscles in their movements which succumb under the weight of fat; and thus it is that we see horses over-fed and under-worked become short-steppers, fondered, etc.

CRICKET.

The Merions Double Their Opponents.

The third match for the Harrison Trophy came off last Saturday afternoon at the Olympic Grounds, Oakland, before the largest audience of the season. The Merions had a stronger team than usual, while the Occidents played two men short. John Theobald and Webster played with the Merions for the first time this season, and the high value set on their service by the Merions is not misplaced, judging by their performances in the match. Theobald made top and Webster second top score, while the latter, though not howling any way near previous form, secured three wickets for five runs—an undoubted good performance. Banner proved disastrous to a great many of the Occidents. His bowling was particularly good. Purdy bowled in splendid form and the game would have had a different aspect if his efforts were called into use a little earlier in the game. The fielding of the winning team was very good.

The Occident Captain with his usual luck won the toss and at 2:30 the Merions took the field. Banner and Webster were entrusted with the leather and Carr and Clarke handled the willow. Carr sent the first ball he received from Banner high up to long off, where it was eagerly taken possession of by Hill. Purdy was not at the creases long when he allowed Banner to get one by his defence. Waterman also fell a victim to Banner; Sanderson joined Clark only in time to see the latter send a catch to short leg. Knox was bowled by Webster and Cookson by Banner. Campbell hit Banner nicely to leg for three but after making a single succumbed to the left-handed bowler. Kip, the last man in, made two when he spooned one to Barney Benjamin, and owing to the non-appearance of two of the O. C. Sanderson carried out his bat for 5, the top score of his side, the innings closing for 21 runs. After the usual interval Spiro and Webster appeared at the creases; the former was bowled in Cookson's first over. Burnett was soon given out by J. Theobald now made his first appearance this year, and successfully, as together with Webster the score, notwithstanding frequent changes of the bowler, was brought ahead of the Occident's total. Theobald at last was bowled by Purdy, and Webster allowed one of Waterman's to scatter his timbers. G. Theobald put six together in good shape before he was unfortunate enough to be bowled off his foot. Both Benjamins were cleaned bowled by Purdy. Hill was particularly unfortunate, Mathieu was hadly run out, Banner did not trouble the scorers and Miller was not out, the innings after all only realizing 43 runs. The score follows:

OCCIDENTS.		MERIONS.	
Carr, c Hill, b Banner.....	0	Knox, b Webster.....	0
Clark, c Barney Benjamin, b Webster.....	0	Cookson, b Banner.....	0
Webster.....	3	Kip, c Barney Benjamin, b Banner.....	2
Purdy, b Banner.....	2	ner.....	2
Waterman, b Banner.....	2	Campbell, b Webster.....	4
Sanderson, not out.....	5	Byes, 2; Wides, 1.....	3
Total.....	21	Total.....	43

BOWLING ANALYSIS.

Banner.....	40	13	5	Clark.....	15	7	1
Webster.....	38	5	3	Sanderson.....	10	4	0
Waterman.....	64	9	3	Purdy.....	32	3	4
Cookson.....	20	4	1				

H. M S. Swiftsure vs. Honolulu.

This match took place at Honolulu on the 14th of June, and resulted in a draw. The Swiftsure team scored 47 in the first and 80 in the second innings. Honolulu made 60 in the first and had lost 4 wickets for 46 runs when the game ended. Mr. Lnard, 26, Capt. Aitchison, 10, Lieut. Bethel, 13, were the highest individual scores.

The 438 run made by the Philadelphians in their match against Scarborough, was the highest score ever made on the grounds.

The Philadelphians defeated Gloucester by 116 runs. Thayer batted in grand style.

Oxford heat Cambridge University by seven wickets on July 1st.

A Fateful Day.

At Monmouth Park, on the 8th, the race for the Lorillard stakes, formerly called the Jersey Derby, was of a sensational character, a rank outsider winning the stake and a brace of accidents going to make up the quota of surprises. The race had eight starters, viz.: W. L. Scott's Greystone, Appleby & Johnson's Orator, Wyudham Walden's Welcher, Leslie Bruce's Vocalic, Pierre Lorillard's Leo, the Preakness Stable's Himalaya and the Dwyer Brothers' Panique and Ecuador. Welcher and Greystone were equal favorites, with Himalaya and Panique the next in estimation, then Orator, Ecuador, Vocalic and Leo in that order. The N. Y. Spirit records the incidents:

There was little or no delay at the post. A dash was noticed, the flag fell, and then came the usual cry, "They're off," and the usual running fire of comment, which sounds like the murmur of thesea. Ecnador was leading, with Greystone next, but they had hardly gone a quarter of a mile when the "black-and-yellow sleeves" of Preakness was seen to vanish, and, as the horses came into the stretch, all eyes were searching for the colt who had been the morning "tip," and on whose chances so many people's money was depending. Far in the rear and on the outside of the track a riderless horse was seen coming. It was Himalaya, and the next instant Feakes was seen walking slowly over the field. Ecnador was passed by Greystone, who led at the stand, with Ecuador and Orator close up, and there was no change until on the turn for home. The race looked Greystone's as the gray was running as steady as a clock, but as they swung into the stretch Ecnador closed again, and at the same instant Leo ran up. Lewis, on Greystone, drew his whip, as did Shauer, on Leo, but 'twas of no avail. "It's Panique! Panique!" yelled the crowd. They could not realize that the colt who led the van in the red jacket of the Dwyers was the handsome but despised Ecuador, who before they had realized the difference, dashed up the stretch and landed a winner of the richest stake of the year, with Greystone and Leo at his heels, Orator a close fourth.

The horses had scarcely pulled up when Orator was seen to fall and Hayward was seen standing at his side. A rusb was made toward the spot, and the colt was found to be stone dead.

"How did it happen?" we asked Hayward, as we reached the spot.

"It was the strangest thing I ever saw, sir," he replied; "he finished well up, and seemed strong when I pulled him up, but I had hardly done so when I felt him totter, and I had hardly time to slip off when he fell and died without a struggle."

Himalaya was caught near the paddock. The colt was covered with dust from his fall, and blood was flowing freely from his nostrils. It was a sad blow to his owner, one of the most representative sportsmen the American turf has ever known, but whose ill-fortune has been of a most exasperating character. No colt ever started since Harold for the Withers Stakes, with more fond hopes on the part of his stable, hopes which were dashed by an unlooked-for incident, and now when at last the colt had recovered his form, and was deemed to have the best chance he has ever had at any time during the year, the accident which blasted his chances was maddening.

"How in the world did he come to fall?" we asked Mr. Galway, as the accident, happening on the far turn, had not been seen by more than a dozen people.

"I have no idea," was his reply. "I haven't seen Feakes yet, but it's clear that there was a collision."

"He's an unfortunate colt," we remarked. "It beats all I ever saw," replied Mr. Galway. "He was never doing better, and, if it hadn't happened, I feel certain he would have won."

We met Feakes soon after, and sought an explanation as to Himalaya's accident.

"It was just as we made the turn," said Feakes. "Welcher was in front of me, when, all of a sudden, I saw him stumble and fall back, almost on his boots, and, before I could pull out my colt struck Welcher and fell headlong. He went whirling out into the middle of the track, falling on his head, and sent me fifty feet ahead of him. I thought I'd never stop rolling. Before I could get up the colt scrambled to his feet and ran away after the others."

"Were you injured at all?" "No, sir; it was bad enough to lose the race without being hurt. When I got up I could hardly walk. My legs are badly bruised, and now my head begins to ache from the jar I got in falling."

"But you say it was Welcher's stumbling that upset Himalaya. How came Welcher not to fall?"

"I don't know, sir. He was falling backwards. I think, perhaps, my horse hitting him from behind sent him on his feet again."

Himalaya's fall injured him to an extent which has not been determined. The colt bled at the nose for nearly an hour after the race, and Farley, the veterinarian who examined him, was busy with him when we left. It was not then settled whether the flow of blood was from concussion, or the rupture of an artery, but grave doubts were felt as to whether the colt could be got fit again for some time.

Welcher did not escape injury, as after the race he was found to have been badly cut down, the accident happening at the time of

his collision with Himalaya, and he was uaver in the race after. Whether the cutting down was done by Himalaya, or Leo, who was at his side, cannot be ascertained. Feakes, on Himalaya, says he saw Welcher falter before Himalaya ran into him. At all events, it places Welcher on the shelf for awhile.

THE DRAMA.

Vienna Garden.

To-morrow the Gipsy Band who have so long delighted us with their charming music, will play their "Good-Bye to San Francisco," for the last time at the Telegraph Hill Observatory in the afternoon matinee, for on Monday morning they positively leave for Chicago. To say we are sorry to lose them but poorly expresses our feelings. To ourselves, like thousands of others in this city who love pure music ably rendered, they have been a revelation in many ways, but in none so strongly as in their power of interpretation, which gives new life and spirit to everything they play. To say we thank them for the pleasure they have given, and the good they have done us, also but poorly expresses our feelings. Their visit to San Francisco has been a success socially, financially and professionally. Not the least reward they have earned on going away is that they carry with them the appreciation and respect of our community. For ourselves, we wish them a long continued and prosperous career.

To-night, until further notice, the Royal Marionettes will be the attraction at the Vienna. Our readers will recollect how popular the Marionettes were when they first appeared among us some years ago. Their attractions are greater as they will appear at the Vienna.

We are requested to say the mishap with the Telegraph Hill cable on Wednesday was owing to the ignorance or carelessness of the workmen who were putting another car on the road to meet the traffic of the afternoon's matinee. It got the better of them and flew down the hill as there was no one aboard to apply the brakes. The public need lose no confidence in the safety of the line when under the direction of the proper officers.

The two-year-old race, at Union, on the 4th of July, was won by the two Monte Cristo fillies, owned by J. E. Gentry, of North Powder river, they securing both the first and second moneys. Mr. John Young's handsome brown colt, Villard, by Lodi, out of Rosa Mansfield, by Rivoli, did not seem a place better than third, but that does not put us out of conceit with the youngster, for there has been many a good colt that did not show up for much in his two-year-old form, notably Luke Blackburn and Freeland. My own idea of Villard is that he is the most sumptuous looking colt yet foaled north of California, and if he does not turn out a good one to go, after he acquires age and growth, I am badly mistaken. His legs are full of bone and his muscular development is unusually fine. If Joe Crabb had got hold of the black rascal he might have told a different story. His half sister, by Patsy Duffy, is a very shapely filly and quite large for her age. Rosa Mansfield was bred to Richard III. this year, as well as her six-year-old daughter by Dr. Lindsay-Tom. Merry.

Lida Stanhope pulled up very lame after her race in the Washington Park Cup. Surely she has won money enough to be sent to the stud.

Annual Fair OF THE SONOMA and MARIN DISTRICT AGRICULTURAL ASSOCIATION.

(DISTRICT NO. 4.)

—AT—

Petaluma,

August 26, 27, 28, 29 and 30, 1884.

The District comprises the counties of Sonoma, Marin, Napa, Solano and Lake.

SPEED PROGRAMME.

First Day—Tuesday, August 26, 1884.

No. 1—Running, free for all, dash of one mile, Purse \$300. No. 2—Trotting, 2:27 class, Purse \$800. No. 3—Trotting, district, for three-year-olds, Purse \$300.

Second Day—Wednesday, August 27.

No. 4—Running, district, \$25 entrance, \$10 forfeit \$100 added, \$25 to second horse, One mile dash. No. 5—Trotting, 2:27 class, Purse \$1,000. No. 6—Trotting, district, 2:40 class, Purse \$100.

Third Day—Thursday, August 28.

No. 7—Running, for two-year-olds, \$25 entrance, \$10 forfeit, \$150 added, \$50 to second horse, Three-quarters of a mile dash. No. 8—Running, free for all, purse \$500, Mile and repeat. No. 9—Pacing, 2:20 class, Purse \$600.

Fourth Day—Friday, August 29.

No. 10—Running, selling purse, \$200; entrance free; \$50 to second horse; fixed valuation, \$1,000; to carry entitled weight, two pounds off for each \$100 below fixed valuation, and three pounds added for each \$100 above fixed value. One-and-one-fourth mile dash. No. 11—Trotting, district, for yearlings, purse \$150, Mile dash.

No. 12—Trotting, 2:27 class, Purse \$1,000.

Fifth Day—Saturday, August 30.

No. 13—Running, free for all, purse \$600, Two mile dash. No. 14—Running, consolation purse, \$150, \$50 to second horse. Horses beaten once allowed 5 lbs., twice 10 lbs., three times 15 lbs. from their entitled weight. One mile dash.

No. 15—Trotting, free for all, Director to wagon, Purse \$1,000.

No. 16—Trotting, district, for gentlemen's roadsters; purse \$150; owners to drive; to road wagons or carts weighing not less than 150 pounds.

Horses in all district races must have been owned in the district June 1, 1884. The track has just received a dressing and is in first-rate condition—both fast and safe. Entries to close August 1, 1884.

REMARKS AND CONDITIONS.

All trotting and pacing races are the best three in five, except the yearling trot, unless otherwise specified; five to enter and three to start. But the Board reserves the right to hold a less number than five to fill, by the withdrawal of a proportionate amount of the purse. Entrance fee, ten per cent on purse, to accompany nomination. All purses unless otherwise specified divided at the rate of fifty per cent to first horse, twenty-five per cent to second, fifteen per cent to third, and ten per cent to fourth. National Association Rules to govern trotting; but the Board reserves the right to trot heats of any two classes alternately, if necessary, to finish any day's racing, or to trot a special race between heats. A horse making a walk-over shall be entitled only to the entrance money paid in, when less than the required number of starters appear, they may contest for the entrance money, to be divided as follows: 66% to the first and 33% to the second.

In all races entries not declared out by 6 P. M. of the day preceding the race shall be required to start. Where there is more than one entry by one person or in one interest, the particular horse they are to start must be named at 6 P. M. of the day preceding the race. No added money paid for a walk-over.

Rules of the State Agricultural Society to govern running races, except when conditions named are otherwise.

Non-starters in running races will be held for entrance, under Rule 3. Racing colors to be named in entries.

In trotting races drivers will be required to wear caps of distinct color, which must be named in their entries. Entries to all of the above races to close with the Secretary on Friday August 1, 1884. Entry blanks and racing rules will be furnished upon application to the Secretary. J. M. SHAFER, President. W. E. Cox, Secretary.

LOUIS CERICHTEN,

Teacher of

BOXING, FENCING and GYMNASTICS,

NO. 316 POST STREET, Bet, Powell and Stockton.

Lessons Given at Above Place or Gentlemen's Residences.

GRAND PRIZE SHOOTING OF THE CALIFORNIA Scheutzen Club,

OPEN TO ALL COMERS.

ALAMEDA SCHEUTZEN PARK, Sunday and Monday, August 3d and 4th.

THE SHOOTING IS OFF-HAND. ALL RIFLES not over 45 calibre, shooting no more than 70 grains of powder, and all sights, except telescopic, and any pull of trigger allowed.

Over 225 Prizes.

—\$850 in Cash and \$750 worth of—

JEWELRY, SILVERWARE, and other Valuable Prizes.

Bulls-Eye Targets, Man Targets, Honorary Targets, Shooting for Ladies' Prizes,

All Marksman are Invited.

The Ferryboats and Trains of the South Pacific Coast Railroad go direct to the Park.

SPORTSMEN'S HEADQUARTERS.

MESSERS. WINSLOW AND KELLY BEG TO ANNOUNCE the opening of their Headquarters, in connection with their wholesale and retail liquor establishment, 321 Market St., San Francisco.

All necessary materials for writing, and conveniences for keeping club books and records left in their charge, will be found.

It will be the purpose of the proprietors to study the comfort of their patrons at all times.

WINSLOW & KELLY.

IN THE STUD.

Llewelin Setter Dog

CARL,

BY LIECESTER OUT OF DART.

Color, Black, White and Tan; aged five years. Bred by L. H. Smith, of Stratroy, Ontario, Canada; broken by R. B. Morgan, now of Akron, Ohio; also handled one season by N. B. Nesbitt, of the Harvard Kennel Club, at Storm Lake, Iowa. Will be bred to a few first-class bitches.

Fee.....\$400

Address W. W. MOORE, Oakland, Cal., or J. Y. ROSS, 123 California Street, San Francisco.

The Firm also carries a large stock of HARDWARE, RIFLES, GUNS, PISTOLS, Of every make CARTRIDGES, FISHING TACKLE, RODS and FLIES,

in every variety, and all articles belonging to the Sportsman's outfit on REASONABLE TERMS.

TIPS.

Tips of all sizes for Trotting, Running, and Road horses can be obtained by application to this office or to

PAUL FRIEDHOFER, 116 Washington St., San Francisco

Found at Last! HODD SEEKERS FRIEND If you will send us TEN CENTS Silver, you'll get by mail our NEW CASE & CONTENTS that will help you to more READY CASE AT ONCE, than any other method in the world. NEVER fails. World Mfg Co. 122 Nassau St. New York.

Bay District ASSOCIATION Fall Meeting, 1884.

...ENTRIES FOR...

TROTTING SEASON,

Saturday, Aug. 2d—2:22 class; purse, \$600. Divided, \$350, \$180, and \$90 to first, second and third horses. Tuesday, Aug. 5th—Four-year-olds; purse \$600. Divided, \$100, \$125, and \$75 to first, second and third horses.

Wednesday, Aug. 6th—2:40 class; purse of \$500. Divided, \$350, \$100, and \$50 to first, second and third horses. Thursday, Aug. 7th—2:20 pacing; purse \$500. Divided, \$350, \$100, and \$50 to first, second and third horses.

Friday, Aug. 8th—2:27 class; purse, \$500. Divided, \$150, \$225, and \$75 to first, second and third horses. Saturday, Aug. 9th—Free for all, Director to wagon; purse \$750; \$150, \$225, \$75 to first, second and third horses.

All the above to be mile heats, 3 in 5, in harness. National Rules to govern. Entrance 10 per cent of purses. Secretary on Friday August 1, 1884. Entries close with the Secretary, Monday, July 21st, 1884.

T. W. HINCHMAN, Secy. 145 California St.

REMARKS AND CONDITIONS.

All trotting and pacing races are the best three in five, except the two-year old trot; unless otherwise specified: five to enter and three to start. But the Board reserves the right to hold a less number than five to fill, by the withdrawal of a proportionate amount of the purse. Entrance fee, ten per cent. on purse, to accompany nomination. Trotting and pacing purses divided at the rate of fifty per cent. to first horse, twenty-five per cent. to second, fifteen per cent. to third, and ten per cent. to fourth.

National Association Rules to govern trotting, but the Board reserves the right to trot heats of any two classes alternately, if necessary to finish any day's racing, or to trot a special race between heats. A horse making a walk-over shall be entitled only to the entrance money paid in. When less than the required number of starters appear, they may contest for the entrance money, to be divided as follows: 66 2-3 to the first, and 33 1-3 to second.

In all races, entries not declared out by six p. m. of the day preceding the race, shall be required to start. Where there is more than one entry by one person or in one interest, the particular horse they are to start must be named at 6 p. m. of the day preceding the race. No added money paid for a walk-over.

Rules of the State Agricultural Society to govern running races, except when conditions named are otherwise.

Non-starters in running races will be held for entrance, under Rule 3. Racing colors to be named in entries.

In trotting races, drivers will be required to wear caps of distinct colors, which must be named in their entries.

Entries to all of the above races (except fixed events) to close with the Secretary on Friday, August 1st, 1884.

Entry blanks and racing rules will be furnished upon application to the Secretary.

P. A. FINIGAN, President. EDWIN F. SMITH, Secretary.

No. 14.—PACING RACE.—2:20 class. Mile heats, best 3 in 5, to harness and to rule, for a purse of \$400. First horse to receive \$240; second \$120, and third \$40.

REMARKS AND CONDITIONS.

National Trotting Association Rules to govern all Trotting and Pacing Races. But the Directors reserve the right to change the order of the programme so as to alternate if necessary to save time, and furnish more than one race the same day.

In all Trotting and Pacing Races, five to enter, three to start. Entrance ten per cent. of purse, to accompany all nominations.

Horses distancing the field will be entitled to the first and third money only.

Horses entered for purses can only be withdrawn by consent of the Judges.

The Pacific Coast Blood Horse Association Rules to govern all Running Races.

Non-starters for Running Races will be held for entrance.

Non-starters must be declared out the day previous to the race they are engaged in, before eight o'clock P. M.

In all Running Races the second horse saves entrance.

No money paid for a race without a contest.

All entries for Races to close with the Secretary or President, at Chico, Aug. 1st, 1884, at ten o'clock P. M.

The Board of Directors will have absolute charge of the Track and Grounds during the week of Races, and guarantee that they will be kept in first-class condition.

The above rules in regard to entries and conducting the Races will be strictly enforced, and all purses and stakes will be paid when the Judges have rendered their decision, and before leaving the Stand.

X. B. In all running races the second horse saves entrance. The time of closing entries extends to August 1st, at 10 o'clock P. M. C. C. MASON, PRESIDENT. ROLAND DILLER, SECRETARY.

Dissolution Sale of Trotting Stallions, BROOD MARES, Roadsters, Colts, Etc.

In consequence of the Dissolution of Co-partnership of Messers NEWLAND & PUMYEA, we will offer for sale on SATURDAY, July 19, 1884,

OAKLAND TROTTLING PARK,

FIFTY HEAD OF WELL-BRED HORSES. AMONG the yearlings and two-year-olds are the get of Steinway, Grand Moor and Posocora Hayward. The brood mares are principally Hambletonian. The stallions are the well known Grand Moor, by the Moor, dam Vashiti, by Mambriro Patchen; and the two-year-old colt by Newland's Hambletonian (the by Speculation) out of Phaeola by Silverthreads, her dam Minnehaha, dam of Beautiful Bells, Eva, Sweetheart and others. The roadsters comprise fine driving horses, both single and double, and several matched carriage and road teams. There will also be offered coach and track sulkies, light and heavy driving carts, etc.

The horses, with the exception of brood mares, will be at stable of Newland & Pumyea, Seventh street, near Broadway, Oakland, until July 17th, after that date all may be seen at Oakland Park.

The sale will be absolute. Terms Cash. Catalogues will be issued in a few days.

KILLIP & CO., Auctioneers, 116 Montgomery St. SAN FRANCISCO.

IMPROVED Blind Bridle & Winkers FOR RACE HORSES.

Secured by Letters Patent, July 25, 1882.

Having thus described my invention, what I claim as new, and desire to secure by letters patent, is:

- 1. The part D, supported by the side straps of the bridle, extending back as shown, the front having an opening into which the blind is fitted, substantially, as herein described. 2. In a bridle, in combination with the extensions D, the curved blinds F, secured to such extensions, and as shaped, to give full freedom and ventilation to the eye while circumscribing the vision, substantially as herein described. 3. In a bridle, and in combination with the extensions D, blinds F, and side straps A, the screw, nut and washer E, connecting the branches of extensions above and below the eyes, and having the adjusting slides or buckles, substantially as an for the purpose herein described. 4. In a bridle, and in combination with the checkpieces D and blinds F, as shown, the straps or bands G and H, connecting the branches of extensions above and below the eyes, and having the adjusting slides or buckles, substantially as an for the purpose herein described. 5. In a bridle, and in combination with the blinds F, supported as a pivoted to the bridle so as to be movable about the point of support, the adjustable front straps or bands G and H, and the ear band I and the throat-latch or latch connected with the blinds, and adjustable, substantially as herein described.

The above are the claims allowed by the patent office, and though the corresponding letters do not appear on the cut, the general principle will be understood.

It meets with universal approbation, doing away with all the objections urged against blinds, and at the same time giving complete control of the line of vision. By throwing the lower portion of the blind up something of the same effect on the action follows as is induced by toe-weights. This is especially the case when young colts are the pupils, teaching them to bend the knee without the strain of weights on the feet.

For bridle of all descriptions apply to J. H. BERRON, No. 230 and 232 Ellis St., San Francisco.

IMPORTANT BREEDERS SALE OF Trotting Stallions, COLTS AND FILLIES, Brood Mares, Roadsters, WORK HORSES, Etc.

The Property of S. J. TENNENT, at his Ranch,

PIÑOLE STATION, Near Martinez, upon the line of the C. P. R. R., at 10:30 A. M. on THURSDAY, July 24th, 1884.

THIS SALE WILL BE ONE OF THE MOST IMPORTANT that has yet taken place in California, and will include Colts and Fillies by Echo, Steinway, Whipple's Hambletonian, Arthurton, Pinole Patchen, Alexander, Gns, Reliance, and other noted Stallions. Catalogues, giving full pedigrees and description, will be issued in a few days.

The horse winning the first heat to take \$125 and go to the stable, the horse winning second heat to take \$100 and go to stable, the horse winning third heat to take \$25 and close the race.

Remarks and Conditions.

All trotting and pacing races are the best three in five; five to enter and three to start. But the Board reserves the right to hold a less number than five to fill, by the withdrawal of a proportionate amount of the purse. Entrance fee, ten per cent. on purse to accompany nomination. Trotting and pacing purses divided at the rate of six per cent. to first horse, thirty per cent. to second, and ten per cent. to third.

National Association rules to govern trotting; but the Board reserves the right to trot beats of any two classes alternately, if necessary to finish any day's racing, or to trot a special race between heats. A horse making a walk-over, shall be entitled only to the entrance money paid in. When less than the required number of starters appear, they may contest for the entrance money, to be divided as follows: 66% to the first and 34% to the second.

In all races, entries not declared out by six P. M. of the day preceding the race, shall be required to start. When there is more than one entry by one person or in one interest, the particular horse they are to start must be named at 6 P. M. of the day preceding the race. No added money paid for a walk-over.

Except as otherwise specified, running races will be conducted under the rules of the Pacific Coast Blood Horse Association.

Non-starters in running races will be held for entrance under rule 2.

Racing colors to be named in entries. In trotting races, drivers will be required to wear caps of distinct colors, which must be named in their entries.

Entries to all of the above races, (except fixed events), to close with the Secretary on Saturday, August 2, 1884.

Entry blanks and racing rules will be furnished upon application to the Secretary.

THIRD ANNUAL MEETING

OF THE

SANT CRUZ COUNTY

Agricultural Fair Association.

At Santa Cruz.

COMMENCING

Tuesday, Aug. 12, 1884,

AND ENDING

Saturday, August 16th, 1884.

SPEED PROGRAMME

FIRST DAY, Tuesday, August 12th.

No. 1-Trotting race; three-minute class; Purse, \$400. No. 2-Trotting race; 2:40 class; Purse, \$200. Free for all horses owned in the district.

SECOND DAY, Wednesday, August 13th.

No. 3-Trotting race; 2:27 class; Purse, \$500. No. 4-Trotting race; Purse, \$150; three-minute class. Free for all horses owned in the district.

THIRD DAY, Thursday, August 14th.

No. 5-Pacing race; 2:20 class; Purse, \$400. No. 6-Trotting race; 2:50 class; Purse, \$150; for all horses owned in the district.

FOURTH DAY, Friday, August 15th.

No. 7-Trotting race; 2:40 class; Purse, \$400. No. 8-Running race; Purse \$150. Free for all; half mile and repeat.

FIFTH DAY, Saturday, August 16th.

No. 9-Trotting race; 2:22 class; Purse, \$500. No. 10-Trotting race; Purse, \$250; for all horses owned in the district.

CONDITIONS.

All trotting races are best three in five. Entrance fee, ten per cent. on all purses, to accompany nomination.

In all races five to enter and three to start. But the Board reserves the right to hold a less number than five to fill, by the withdrawal of a proportionate amount of the purse. National Trotting Association rules to govern trotting, but the Board reserves the right to trot heats with any two classes alternately. If necessary, to finish a day's racing, or to trot a race between heats.

No money will be paid for a walk-over. Horses entered in purses can only be drawn by consent of the Judges.

Rules of the Pacific Coast Blood Horse Association to govern running races. All entries to be made in writing, to give sex, color and marks of horse; also name and residence of owner, and, in running races, colors to be worn by rider.

All purses divided at the rate of sixty per cent. to first horse, thirty per cent. to second, and ten per cent. to third. A horse distancing the field shall be entitled to only first and third money.

Entries to all the above races will close with the Secretary on Friday, August 15, 1884.

R. C. KIRBY, President,

JAMES O. WANZER, Secretary.

DIETZ'S PATENT

Simple in its Structure and Practical in its Use. The horse never loosens the check-rein when this Check-Hook is used. Horsemen can appreciate the value of a Check-Hook of this kind.

There being no springs or hinges to break connected with it, makes it serviceable and easily appended, as the check-rein passes through a solid ring attached to the front of the hook. Orders sent to

A. C. DIETZ,

No. 9 Front St., San Francisco, Cal.

Will receive prompt attention. When ordering state whether gold or silver plate required.

W. H. Woodruff,

TICKET OFFICES - Passenger Depot, Townsend street, Valencia-street station, and No. 613 Market street, Grand Hotel. A. C. BASSETT, Superintendent. H. R. JUDAH, Asst. Pass. & Tkt. Agt.

For points on Southern Divisions and the East, see C. P. R. R. Time Schedule.

TO Sportsmen & Pleasure-Seekers.

SOUTHERN PACIFIC R. R. CO.

RESPECTFULLY CALLS ATTENTION TO THE SUPERIOR FACILITIES AFFORDED BY ITS LINE FOR REACHING A with speed and comfort the best places in the State for

Sea Bathing, Shooting and Fishing. TRAINS LEAVE SAN FRANCISCO DAILY FOR

MONTEREY,

THE MOST CHARMING Summer and Winter Resort of the Pacific Coast.

with its beautiful Groves and delightful Drives. Trout in abundance can be obtained from the several streams in the vicinity of Monterey, and the best of shooting may be had in season.

THE BAY OF MONTEREY Is noted for the extent and variety of fish which abound in its waters, notably Salmon, Rock Cod, Baracuda, Pompano, Spanish Mackerel, and Flounder.

The above-mentioned attractions, in connection with the low rates of fare, rapid transit, and the superior accommodations furnished at the "HOTEL DEL MONTE," have made Monterey a paradise for sportsmen.

THE BATHING FACILITIES AT THE "HOTEL DEL MONTE," ARE UNSURPASSED,

having a MAGNIFICENT BEACH of pure white sand for surf bathing. The BATH-HOUSE contains

SPACIOUS SWIMMING TANKS (150x50 feet) for warm salt water plunge and swimming baths, with ELEGANT ROOMS connecting for individual baths, with douche and shower facilities.

THE FAVORITE ROUTE to those well-known Watering Places, APTOS, SOQUEL AND SANTA CRUZ IS VIA THE

Southern Pacific Railroad, (Broad Gauge).

The S. P. R. R. runs through the counties of San Mateo, Santa Clara, San Benito, Santa Cruz and Monterey, in each of which game abounds in great variety. Notably

Quail, Pigeon, Snipe, Duck, Geese, Deer and Bear.

Lakes PILARCITO and SAN ANDREAS are reached by this line. Stages connect with trains daily at San Mateo for those well-known Retreats, PUBISIMA, SAN GREGORIO and PESCADERO. We would particularly call attention to the unlimited extent of range at and about SAN BRUNO and McMAHON'S JO RIFLE PRACTICE.

These resorts are but a short distance from San Francisco and offer special inducements to the lovers of this manly sport.

SPECIAL NOTICE. Sportsmen and others presenting Passage Tickets will be entitled to

FREE TRANSPORTATION OF THEIR DOGS when carried in Baggage Cars and put in charge of Train Baggage-men. Train Baggage-men are instructed to issue CHECKS for all dogs received in Baggage Cars.

In order to guard against accidents to Dogs while in transit, it is necessary that they be provided with COLLAR AND CHAIN. Guns and Fishing Tackle will be carried free of charge. Gunstaken apart and securely packed in wood or leather cases may be taken in Passenger Cars.

TICKET OFFICES - Passenger Depot, Townsend street, Valencia Station, and No. 613 Market st., Grand Hotel. A. C. BASSETT, Superintendent. H. R. JUDAH, Asst. Pass. and Tkt. Agt.

LINES OF TRAVEL.

C. P. R. R.

TIME SCHEDULE.

TUESDAY, JULY 1st, 1884

## TURF AND TRACK.

### Henry Clay's Sorrel Stallion.

"I recollect Henry Clay's turnout very well," said an old resident of Washington. "He had one of the old style Concord buggies, with a top that suggested a Mother Hubbard bonnet. It was evidently a second-hand affair that Mr. Clay had picked up in a trade, and nowadays would do very well for an old woman to haul vegetables around town in."

"The cushions were stuffed with moss, and so well worn you could see the moss sticking out at the sides. I'll bet Henry Clay didn't know what a lap robe was, and as for a whip he didn't have any. He used to slash his old sorrel stallion with the ends of the reins so loud you could hear it a block off. The steps of the buggy were gone, and Mr. Clay used to jump over the wheels. When he wanted to get in he put one foot on the hub and swung the other round over the wheels and dashboard. The wheels were so high he had to let the top down to get out. They had axle grease in those days, but Mr. Clay had evidently never found it out. He always drove his horse at a canter, and you could hear the wheels of his buggy squeaking as many notes as there are on the piccolo."

"Ah, well do I remember that sorrel stallion," continued the old-timer. "Henry Clay won him one night at poker in John Hancock's saloon, which is still running on the avenue, from Col. Jim Bright, who lived at Falls Church, Va. Bright used to come over every week and play poker with Clay, and he generally went back to Falls Church with a pocketful of money. But that was Clay's lucky night. He got away with \$1,200 of Bright's money, his watch, saddle and bridle, overcoat, saddle bags, a new suit of clothes that were in the saddle bags, three finger rings and a breastpin, a brace of pistols and a pair of boots."

"Oh, you needn't laugh," said the old-timer, with great animation; "that's the way they played poker in them days. A man went the whole hog or nothing. Why, didn't you never hear of the time Henry Clay bet himself clean down to his undershirt, and he offered to pull that off, but the other fellow didn't wear an undershirt to put up against it? Well, sir, it's so anyhow, and the very table he played the game on is now in the front room on three feet over Hancock's saloon. It's an old pine table about three feet square, with a hole in the middle to drop the percentages through for threes, fives, flushes, and jack-pots. Well, sir, about that old stallion. He was well known around Washington for several years. He always nickered when Clay came near him. Clay carried a pocketful of shelled corn, and he gave the horse a handful every time he got into the buggy. The boys knew the stallion well, and they used to give him pieces of bread, cakes, nuts, or anything of the sort. He'd eat watermelon and meat, and I've seen him eat wads of paper, as though he was trying to make the boys laugh. Well, sir, Clay had a nigger named Sam. One day he loaned the stallion to Sam to drive to Alexandria. Sam got drunk before he left town, and he started out on a gallop. He didn't stop till he got to Mount Vernon, twenty miles off. Then he turned around and galloped all the way back. The old stallion dropped dead at the edge of South Washington. There were over 100 boys at the funeral. In revenge Clay sold the nigger to a Louisiana sugar planter, with a proviso in the bill of sale that the planter should hitch Sam in shafts and work him in a cane mill. Fact, sir!"—*Houston Post.*

The steeple chase Saturday, the 12th inst., at Long Branch, resulted in the death of two horses and probably fatal injury to one rider. Eight horses started. Kate Cronin broke her neck and died under the shadow of the hurdle fronting the club house. Wooster fell on the backstretch, and his rider, Mike Kenney, had his collar-bone broken. Response bolted at the water jump and afterwards fell. Chipola fell over the last hurdle, crushing her rider, Gueren, so seriously that a physician said he would die of internal injuries. The boy was apparently dying while being carried away. Chipola broke her neck, never stirring after she struck the track on her head. The accident occurred in the same spot where Billy Midgeley, the famous steeple-chase jockey, was killed four years ago.

The report that M. L. Hare was about to sell the trotting stallion Hambrino, 2:21½, for \$7,500 is without foundation. Mr. H. says three times that amount would not buy him. He has been asked by a California party to price him and answered \$25,000. Hambrino is the sire of the Stockton stallion Nephew.

A fall meeting at Washington Park is stated as among the possibilities of the Chicago racing season.

### Westmont's 2:01½.

The following account of Westmont's 2:01½ with running mate is from the *Breeders' Gazette*:

The event of the day in point of general public interest was the wonderful performance with running mate made by the pacer Westmont. Ever since Frank and mate went such a good mile last Fall that way rigged there have been efforts on the part of various horses to surpass the record of 2:08½ made by the Lambert gelding, and some of them have been creditable. What put it into the head of Westmont's owner to try him with a runner will perhaps never be known, but last Tuesday the few people at the track were surprised to see the chestnut pacer come out with a runner by his side, and a little later those who held watches on him were astounded by his pacing three-quarters of a mile in 1:30, the first quarter being done in 29½ seconds. It was the speed shown on this occasion that induced the management to offer the driver of Westmont a purse for an exhibition of speed Thursday, and without any preliminary work the horse was brought on the track between the heats of the 2:24 race, and after being jogged a mile and a half came up and took the word. Going away from the wire strongly and steadily he reached the quarter pole in 30½ seconds, and it was at once apparent that a fast mile was to be made. Down the back stretch the pace was still faster, and as the nose of the chestnut struck the half mile pole the watches marked exactly one minute. By this time the crowd were beginning to be enthusiastic, and when the outside timers announced in loud tones that the three-quarters had been done in 1:30, there were hoarse murmurs of applause. Down the home stretch came the team, there being no faltering in the stride of the pacer, and it was evident that unless some accident prevented two minutes would surely be beaten. But the accident occurred. Just at the distance stand the runner began to tire badly, and Campbell struck him with the whip. He sprang forward, but the result of this move was that the pacer was pulled off his feet, making a break from which he never recovered until the wire had been passed, and even with this great loss of speed the mile was made in 2:01½. With the history of Westmont the readers are familiar. He is a trotting-bred pacer, being by Almont, and out of a mare by Cottrill Morgan, and has a record of 2:15½ at pacing. Not long after his wonderful performance over the Chicago track he was purchased for \$20,000 by Mr. J. M. Hill, of this city, and will hereafter be driven by Peter V. Johnston. At present the plan is to give exhibitions with him through the Central Circuit.

### Chicago Colt Stakes.

The Colt Stakes of the Chicago Driving Park were decided on the 12th. The Ashland Stakes for three-year-olds had originally 35 entries, of which 6 were Californians, viz., J. W. Mackey's Aloise, by Sultan; J. C. Simpson's Antevolo, by Electioneer; Palo Alto's Alban, by Electioneer; Alta Belle, by Electioneer; Edos, by Gen. Benton and Morning Glory, by Electioneer. Aloise was the only Pacific Coaster to start and she was not in time judging from the press reports of the race. Unless Reference had a link or two of speed beyond what was required in the race some of the absent California colts that we know of could have shown him the way, we feel sure. The following is the summary:

CHICAGO DRIVING PARK, July 11th.—Ashland Stakes, for three-year-olds; closed March 1st, 1883, with ninety-eight nominations, of which sixty-three paid \$10, thirty-five paid \$25, and thirteen paid \$50.  
C. W. Story's blk g Reference, by Referee, dam Modjeska, by Enfield..... 1 1 1  
R. B. Terrill's blk c Gambetta, by George Wilkes, dam by Gill's Vermont..... 2 2 2  
W. A. Sanborn's ch c Superior, by Egbert, dam Mary, by Woodford Mambruno..... 3 3 3  
J. W. Mackey's b f Aloise, by Sultan, dam Belle, by Belmont.... 4 4 4  
Time, 2:32, 2:33½, 2:33.

The Chicago Stakes for four-year-olds followed. From this side the list contained Mr. Hickok's Ruby, by Sultan; Jas. Garland's Regina, by Electioneer; Palo Alto's Helou, by Gen. Benton, and Hinda Rose and Flower Girl, by Electioneer. Ruby was among the starters, but was nervous and off her gait. After the withdrawal of Hinda Rose Don Carlos was generally regarded as safe for the race.

Same day—Chicago Stakes, for four-year-olds; closed March 1, 1883, with 59 nominations, of which 46 paid \$10, 13 paid \$25 and 7 paid \$50.  
J. R. Graham's h c Don Carlos, by Cuyler Clay, dam Lady Abdallah, by Alexander's Abdallah..... 1 1 1  
H. C. McDowell's b f Fugue, by King Rene, dam Fuga, by Geo. Wilkes..... 2 2 2  
O. A. Hickok's b f Ruby, by Sultan, dam by Hambletonian..... 3 3 4  
Nat Bruen's br c Wildmont, by Edgemont, dam Advance, by Administrator..... 4 4 3  
Time, 2:29½—2:26—2:29½.

### Fall Meeting at Fresno.

The Fresno Fair Association have issued the following programme for their Fall meeting, commencing October 7th, and continuing to and including the 11th:

First day—Running. Three-quarters of a mile dash. Free for all. \$25 entrance; \$10 forfeit; \$150 added; \$50 to the second horse.

Running—One mile dash for two-year-olds. \$25 entrance; \$10 forfeit; \$150 added; \$50 to the second horse.

Trotting—Purse \$250; three moneys; open for all horses owned in Fresno, Merced, Mariposa, Tulare and Kern counties July 1st, 1884.

Second day—Running. One-quarter mile dash; free for all. \$15 entrance; \$10 forfeit; \$150 added; \$50 to the second horse.

Running—Three-fourths of a mile and repeat. \$25 entrance; \$10 forfeit; \$150 added; three moneys.

Trotting—2:30 class; mile heats. Purse \$500; three moneys.

Third day—Running—One and three-fourths mile dash. \$25 entrance; \$10 forfeit; \$250 added; three moneys.

Pacing—2:40 class; mile heats. Purse \$200; three moneys.

Trotting—2:27 class; mile heats. Purse \$500; three moneys.

Fourth day—Running—Two mile dash. \$25 entrance; \$10 forfeit; \$300 added; three moneys.

Running—Half-mile and repeat. Purse \$150; \$50 to second horse.

Pacing—2:22 class; mile heats. Purse \$500; three moneys.

Fifth day—Trotting—2:22 class; mile heats. Purse \$750; three moneys.

### Bay District Entries.

Entries for the August meeting at the Bay District closed last Monday. The pacing, four-year-old and free for all purses did not fill. The following are the nominations received:

2:40 class—Guy Wilkes, Blauche, James H., Col. Hocking.  
2:22 class—Allan Roy, Arab, Albert W., Vanderlyn.  
2:27 class—Adair, Bob H., B. B., Tump Winston, Sister, Marin, Adriaan, Rarus, Jr.

These purses will be trotted for on the days named in the programme, viz.: 2:22 class, Aug. 2d; 2:40 class, Aug. 6th; 2:27 class, Aug. 8th.

Wm. S. Woodward has sold the gray stallion, Engene Casserly, to Fred Brown, of Windsor, Sonoma county. Casserly is by Gen. Taylor, son of the Morse horse and is the sire of Sweetbriar, 2:26½. The dam of Sweetbriar was by Geo. M. Patchen, Jr., and Casserly ought to find plenty of that kind of nicks in Sonoma county. The terms of the transfer have not been made public.

J. M. Hill, of Chicago, who purchased Westmont for \$20,000 after the 2:01½ at the Driving Park, says he will send the horse on an exhibition tour around the circuit and then drive him on the road. He proposes to hitch him with another pacer and take dust from nobody.

The Narragansett Park Club, of Providence, R. I., have an arrangement with Mr. Case, whereby Jay-Eye-See and Pallas will both try to lower their records on the 30th inst. Narragansett Park is the track where Jay-Eye-See made his present record of 2:10½.

Baccarat, by imp. Bonnie Scotland, dam Robinet, who fell in the steeple chase at Chicago, was so badly injured that he had to be destroyed. He belonged to the Alexander Stable, and was valued at \$2,000.

Mr. E. C. Walker, "Trnr and Track" of the New York Spirit, won a good race with the bay stallion Aladdin early in the month and is having greatness as a driver thrust upon him by the newspapers.

The State Fair Stake for two-year-old trotters is reduced to a walk over, Mr. Haggis's Lohengrin, by Echo, being the only one to make second payment. The other entries were two from Palo Alto and two from Sunny Slope.

The old gelding, Ballast, strained his muscles so badly at Brighton Beach, in the King's County Cup, that he had to be shot the following Saturday.

The fifth of Blue Bull's get to enter the 2:30 circle this season is Dayton Belle. She trotted in 2:29½, at Jamaica, Wia., June 21. Her dam, Lady Jackson, it is said, by Clarke's Mohawk, Jr.

The Finish at Chicago.

The Santa Anita Stable was in the midst of the fray on the two last days of the Washington Park Club, but not in first place. Results:

July 11th—Purse \$500, of which \$100 to second and \$50 to third horse. For maiden two-year-olds. Those who have run second in any stake at this meeting to carry 5 lbs. extra. Three-quarters of a mile. P. G. Speth's c c Thistle, 2, by Great Tom—Ivy Leaf, 110 lbs. (Taylor) 1

Pools: Thistle, \$40; Gold Ban, \$38; Rapido, \$19; Tennessee, \$10; Constellation, \$8. Books: Even money against Thistle, 2 to 1 against Gold Ban, 4 to 1 each against Rapido and Tennessee, 8 to 1 against Constellation. Ultimatum took the lead at the start, followed by Gold Ban, Tennessee and the bunch. The white jacket and red stars of Thistle's jockey moved into the second place on the stable turn. Ultimatum fell back beaten at the head of the stretch, leaving Thistle and Gold Ban to fight it out between themselves.

Same Day—Purse \$500, of which \$100 to second and \$50 to third. For maiden three-year-olds. Those who have run second in any stake at the meeting to carry 5 lbs. extra. One and an eighth miles. G. Elmore's b c Top Sawyer, 3, by Tom Sawyer, dam by Gilroy, 118 lbs. (O'Hara) 1

Pools: Savanna, \$50; field, \$20. Books: 1 to 1 against Savanna, 6 to 1 against Top Sawyer, 8 to 1 against Benita, 12 to 1 each against Tony Pastor and Tom Moore. Tony Pastor got off with the track, and led the way to the half, where he was two lengths in front of Tom Moore and Top Sawyer, who were running neck and neck in the second place, Savanna being away in the rear. Holloway began riding Savanna on the stable turn, and she moved into the second place, Top Sawyer being the leader, with Tony Pastor and Tom Moore, both of whom had shot their bolt, out of it. Top Sawyer had the race won at the head of the stretch, and coming on he won by three open lengths, with four lengths between second and third. Time, 2:02 1/2. Paris mutuels paid, \$21.

July 12—Purse, \$500, of which \$100 to the second horse; for all ages. Winner this year of any race of the value of \$500, to carry 5 lbs.; or \$1,000, 10 lbs. extra; non-winners this year allowed 7 lbs.; maidens allowed 12 lbs.; one mile. W. L. Cassidy's c b g Saunterer, 6, by Leamington—Lemonade, 110 lbs. (Conkling) 1

Pools: Santerer, \$100; The Admiral, \$70; Templehof, \$40; Lady Loud, \$20; Nippon, \$10; field, \$30. Books: 3 to 2 against Santerer, 5 to 2 each against Templehof and Admiral, and from 10 to 20 to 1 each against the others. The start was an excellent one with Lady Loud, Templehof and the Admiral in the front rank. Lady Loud led the bunch to a point half way down the back stretch where she gave place to Joe Murry, who was a head in front of her at the half, with Light third, Santerer fourth, and the others well up. On the stable turn there was a general bunching up, and at the head of the stretch the leaders were Joe Murry, Templehof, Lady Loud and Light; Santerer came with a rush in the straight and collaring Templehof at the seven-eighths pole, the two had a driving finish, the favorite winning by a short nose, with two lengths between second and third. Time, 1:44 1/2. Paris mutuels paid, \$12.20.

Same Day—The Woodlawn Stakes, a sweepstakes; for three-year-olds. (foals of 1881); \$50 each b f, or only \$10 if declared out on or before May 15, 1884, with \$1,200 added, the second to receive \$200, and the third \$100 out of the stakes. The winner of the American Derby or Sheridan stakes to carry 5 lbs., a winner of both stakes 10 lbs. extra. One mile and five furlongs. Ed. Corrigan's c b f Modesty, 3, by War Dance—Ballet, 118 lbs. (Murphy) 1

Pools: Modesty, \$105; Kosciusko, \$80; Freda, \$35; field, \$300. Books: 4 to 5 against Modesty, 8 to 5 against Kosciusko, 8 to 1 against Strickland, and 10 to 1 each against Freda and Jim Carlisle. Strickland went off with the lead, and running like a quarter horse, he was leading Kosciusko by ten lengths as they passed the stand, with Freda third, Modesty fourth, and Jim Carlisle out of it. On the club house turn the black jacket and red Maltese cross of the California stable rushed into the second place and Strickland began to come back to his followers. Strickland quit badly on the stable turn and Freda dashed to the front, with Modesty in the second place, Kosciusko third and Strickland out of it. Freda, Modesty and Strickland fought over every inch of the way to the distance pole where Freda and Modesty drew slightly to the front and running neck and neck they neared the wire; it looked like anybody's race, but Murphy's magnificent riding; landed the pride of Corrigan's stable first under the wire by a short nose, there being half a length between second and third. Time, 2:56. Paria mutuels paid, \$3.70.

Same Day—Purse \$700, of which \$100 to the second and \$50 to the third horse; for all ages; winner of the Commercial or Columbia Stakes to carry 5 lbs.; of the Washington Park Cup, 10 lbs. extra; non-winners this year allowed 10 lbs. Two miles. J. W. and R. H. Loid's c h m Lida Stanhope, 6, by Waverly—Ada Cheatham, 108 lbs. (Murphy) 1

Pools: Lucky B., \$100, Waters' entries, \$65; field, \$17. Books: 2 to 1 against Stanhope, 3 to 5 against Lucky B., 4 to 1 each against Vanguard and Binnette, and from 25 to 50 to 1 against each of the others. Lucky B. went to the front when the flag fell, followed by Stanhope and the bunch; Holloway took Lucky B. back before the half was reached and Binnette rushing to the front showed the way for a mile and a half, with Lucky B. in the second place, Tom Moore third and Stanhope and Easter neck and neck in the fourth place, and Vanguard in the fifth. Vanguard and Tom Moore quit on the stable turn, and entering the stretch the leaders were Binnette, Lucky B. and Lida Stanhope, there being a length between them all around; Stanhope and the Californian drew to the front in the stretch and ran neck and neck for a few strides when the Baldwin entry gave it up, and Stanhope coming on won by three lengths, with four lengths between second and third. Time, 3:38. Paria mutuels paid, \$18.20.

Same Day—Consolation purse \$500, of which \$100 to the second and \$50 to the third horse. Horses beaten once at this meeting allowed 5 lbs.; twice, 8 lbs.; three times, 12 lbs.; and four times, 16 lbs. One mile and a furlong. J. Murphy's c b f Salara, 3, by Salvator—Lady Stockwell, 88 lbs. (Kelly) 1

Pools: Long Knight, \$200; Lizzie S., \$75; Lloyd Daly, \$25; Billy Gilmore, \$20; Athlone, \$17; field, \$61. Books: 2 to 1 against Long Knight, 3 to 1 against Lizzie S., 5 to 1 each against Billy Gilmore, Salara, Savanna and Lloyd Daly, and from 10 to 30 to 1 against each of the others. The flag fell with Lizzie S. in the lead, but she soon fell back, and passing the stand Billy G. led by a head, with Savanna in the third place, and the rest well up. Billy G. showed the way nearly to the half, where Lizzie S. took command, she leading by a head at that point. On the stable turn there was a general closing up of the ranks. Billy Gilmore gave it up at the head of the stretch, where the first rank consisted of Lizzie S., Long Knight, Salara and Lloyd Daly. A magnificent race to the seven furlong pole followed; here the green and green of Salara's jockey drew to the front and coming on she won by three lengths, with a length between second and third. Time, 1:57 1/2. Paris mutuels paid, \$60.60.

The following colts have been paid up in the stakes of the San Joaquin Fair Association. Two-year-olds. Purse, \$1,000. Kismet, b c, by Sultan, dam Sancebox, by Sampson—L. J. Rose, San Gabriel. Apex, b c, by Prompter, dam by Firetail—S. K. Trefry, Sacramento. Paul Shirley, b c, by Nephew, dam by Messenger Duroc—G. W. Trahern, Stockton. Luella, blk f, by Sultan, dam Ella Lewis, by Vermont—Ira L. Ramsdell. Three-year-olds. Purse, \$1,000. Bay Rose, b c, by Sultan, dam by The Moor—E. Giddings, Lemoore. Mona Y., b f, by Admiral, dam Flora—A. A. Yeager, Sniann. Mt. Vernon, b c, by Nntwood, dam Daisy, by Chieftain—J. A. McClond, Stockton. Voucher, br c, by Nephew, dam by Vernon Patchen—G. W. Trahern, Stockton. Tabbie Rosenbann, br f, by Nntwood, dam by Blackhawk—D. S. Rosenbann, Stockton. Lelaps, c b, by Nntwood, dam a Clay mare—John Williams, (H. C. Smith), Stockton. Antevolo, br c, by Electioneer, dam Colombine, by A. W. Richmond—J. C. Simpson, Oakland. McVeagh, b c, by Conductor—J. E. Dnrham, Pacheco. Pope Leo, g c, by Romero, dam by Crichton—C. Thomas, Oak Grove. Quaker Girl, b f, by Nutwood, dam by Henry Clay—L. U. Shippee, Stockton. Four-year-olds. Purse, \$1,000. Regina, br f, by Electioneer—James Garland, Oakland. Thapsin, blk g, by Berlin, dam Lady Hubbard, by Beneficia Boy—W. F. Smith, Sacramento. Lucilla, br f, by Nephew, dam by Gen. McClellan—John Williams, (Mrs. Lucy Goff), Stockton.

Portland Driving Park, July 12, 1884.—Trotting. Purse, \$150. Startle, b g, by Millman's Bellfounder (Lindsey) 1 2 1 1 Florence E., c h m, by Pathfinder (Waterford) 2 1 2 2 Snowflake, g m, by Snowdrift (Smithey) 4 3 3 3 Johnnie Blue, b g, by Alexander (Beach) 3 4 4 4 Time, 2:36, 2:36 1/2, 2:36, 2:38. Pools: Startle, \$20; the others, \$10 each. John Splann's volubility got him into trouble during the Chicago trotting meeting. During the 2:22 pacing race on the 12th the horses scored a good while without getting away, and the drivers were called to the stand and sharply reprimanded. Splann's abnormal looseness of tongue got the better of his judgment, and he protested too loudly, whereat the Judges fined him a hundred "for insolence."

Bashaw Goldust, the sire of Johnston, the great pacer, has been renamed Joe Bassett. H. S. Woodruff, his present owner, paid \$8,000 for him.

A Bonnie Scotland Pacer.

"Chips" gave the following account of the pacer, J. H. Mackie, in the Canadian Sportsman: J. H. Mackie, the pacer that beat Mr. Farrell's gelding in a match at Woodbine Park, a week or two ago, promises to prove a phenomenal mover. He has already quite a history. He was bred by General Harding, of Tennessee, in June, 1877, being sired by imp. Bonnie Scotland, out of a Prince Plunket mare. His breeder, thinking him of no value, sold him for a trifle. His purchaser was scared to put him between the shafts and so used him as a saddle horse. Getting tired of him, although he went well, he resolved to sell him, and accordingly disposed of him with six others to Mr. Dyke, a conductor on the Lake shore road. Dyke brought the lot to Erie, where Mr. J. O. Sweegles, being in want of a driver, bought Mackie and shipped him to Buffalo. When he first drove him he started to squat, switched his tail and pranced around, threatening instant destruction to wagon and everything else in reach of his obstreperous heels. Mr. Sweegles then resolved to try a lighter and noiseless buggy. Mackie acted better, and being driven on the snow, occasionally showed splendid bursts of speed. But he was still scarcely quiet enough for everyday use, having a little too much blood in him for ignominious work. Mr. Sweegles consequently resolved to part with him. Just at this juncture our friend and clever judge of a horse, Mr. J. Sheridan, appeared on the scene and bid three hundred from him. Sweegles accepted the offer and magnanimously threw in a blanket. It was a cold day—the quicksilver hovering around zero—when Mackie struck Toronto after a two days' journey as freight from Buffalo. He was a wretched looking object, and the Custom House officer on taking stock of him to see if he was worth more than the three hundred he was entered for, declared he was dear to Sheridan at a tenth of that price. The latter consigned him (the pacer, not the Custom House officer) to the genial Doc. Hodgins' gentle care. Doc. took a drive behind the friendless, outcast son of Bonnie Scotland. He stepped out beautifully, and Doc. seeing a bargain ahead, strove to make a bid before Sheridan fully appreciated the risk he had made. He offered a centry and a half advance on the original three hundred. Sheridan told him to count the dust out quick. He did, and the horse was his. Doc. then took the fellow in hand, but in three days he could not pace in better than three minutes, but he was evidently coming. A let up for a couple of weeks was followed by some jogging, and four or five weeks ago he opened the eyes of his owner by stopping the watch for a mile in 2:32 and showing a half in 1:14. Mr. Farrell's pacer came in view about this time, and Doc. and a friend posted \$1,000 to \$220 that Mackie could do him. How he walked in over a heavy track and secured 2:42 1/2 as a record is now a matter of history. But a few days ago he paced fifteen feet over a mile at Woodbine in 2:24 1/2, covering the last half in 1:10. If the streak lasts the day can scarcely be far distant when some of the smartest jiggers will tremble for their laurels. His blood fully warrants a belief in his future, and his friends even now regard him as the wonder of the day. Such is the over true tale of a horse.

Winning Owners at Washington Park.

Value of Washington Park Stakes.

Table listing the value of various stakes at Washington Park. Includes stakes like The American Derby, The Washington Park Cup, The Hyde Park Stakes, etc., and their respective values.

Sir John Willoughby a few days before the Derby went into a hair dresser's, in Bond street, to be improved. With the exuberant verbosity which belongs to the craft, the operator began to talk about the Derby, and asked Sir John "if he was going down?" The owner of Harvester and Queen Adelaide said he was thinking of it, whereon the man of art said: "If you do, sir, don't hack Sir John Willoughby's horses. He was in here and told me confidentially they had not a chance."

In the selling race, at Mounouth Park, on Tuesday last, the running of Boulette was so suspicious and indicated so clearly that she was pulled, that the judge called both trainer and jockey into the stand; neither could tell who owned the filly and the matter was laid over for future action. "Where ignorance is bliss, 'tis folly to be wise." Strathairn by Strathmore, recently showed three heats at Kanawa City in 2:30, 2:29 and 2:27 1/2.

A Turn in Himalaya's Luck.

Himalaya has scored a win at last securing the brackets in the Stockton Stakes at Monmouth Park on the 12th. His ill luck seems to have culminated in the collision and hard fall in the Lorillard Stakes on the 8th, for in this next start he came first to the winning post, to the delight of his owner and friends. The race itself revives recollections of old turfmen. In naming two of its stakes the "Stockton" and the "Stevens," the Monmouth Park Association pays a worthy compliment to the two Jersey owners who just half a century ago were among the foremost turfmen of America, and their names are not likely to be forgotten by many generations of the admirers of racing yet to come, both gentlemen breeding and training some of the best horses ever raised in this country, or in England or France. During the "thirties" John C. Stevens, the grandfather of the present John Stevens, of Hoboken, bred and owned the famous mare, Black Maria, whose race of five heats in a four-mile-heat race over the old Union Course, on October 15th, 1832, stands as the most memorable race of the kind ever run. Capt. R. F. Stockton, the father of the present Attorney-General of New Jersey, and grandfather of "Young Dick," bred and owned Shark, a brother of Black Maria, whose race of three heats on May 9th, 1834, also over the Union Course, when he beat Black Maria, then eight years old, and his subsequent sale for \$17,500, the highest price paid for a horse in the United States up to that date, were the talk of the country from New Orleans to New York. That Capt. R. F. Stockton is entitled to the posthumous honor paid him, is certain. He owned a horse called Monmouth (by John Richards) which won him a number of good races, but he lost one, the conditions of which would cause much amusement in these more matter-of-fact times. A Mr. G. C. Craig, of Philadelphia, owned a quantity of the then famous "Bingham wine," some of which Capt. Stockton was very desirous of having, but as Mr. Craig would not sell, and being an owner of thoroughbreds, Capt. Stockton matched Monmouth against Mr. Craig's Fanny Chine for two miles, laying \$1,200 against twelve dozen of the Bingham. He lost the match, but had he won he would not have got the wine, for upon examination Mr. Craig found that his vault had been entered and a greater part of his stock stolen.

The initial race for the Stockton Stakes could not have been won by a gentleman more worthy of sustaining the honor of the name. Although a resident of New York his stable is in every respect a New Jersey one, being no other than the famous Preakness Stable, which for years has been identified with racing in New York and vicinity. It was from the Preakness Stable that the late Milton H. Sanford bought such famous horses as Loadstone, La Polka, Niagara, Preakness, Monarchist and Mate, and although the present owner has not had the good fortune to own such an array of winners, his colors are not wholly unknown, and with the success of Himalaya it is to be hoped that the spell of ill luck which since the first day of the season at Jerome Park has clung to the son of Virgil and Kentucky Belle is now removed. The crowds at Monmouth and elsewhere will often cheer him on to victory, for there is no more loyal and honorable owner on the turf than the master of the Preakness Stable, nor a more conscientious trainer than John Hyland, who has charge of it. Of the others who started for the Stockton, Messrs. Appleby & Johnson came near landing a very clever surprise with Turk, who ran second, while the forward position of Thackeray who was third, it is to be hoped is an arguery that so clever and promising a horse as the winner of the Turf Stakes and the Red Bank Stakes in 1883 is gradually getting into something like good form again. Among the others that started were Mr. Withers' Caesar and Panpero and many hoped to see one of them a winner, for as a Jersey breeder and owner not a few have likened Mr. Withers to the old standbys of the turf who bred, trained and raced their horses against Capt. Stockton and the Stevens of half a century ago.

With the flag Thackeray showed in front, followed by Ecuador, Leo and the Withers pair. Before they reached the seven-furlong post Hughes got through next the rails on Caesar and with a lead of half a length he ran past the stand, with Ecuador second in the middle of the track, with Panpero and Thackeray in between, followed by Turk, Leo and Himalaya. Caesar held the lead to the turn, when he was passed by Ecuador, who, running out, was nearly clear at the quarter, and keeping on was a length and a half in front at the three-furlong post, with the Withers pair leading the others, followed closely by Himalaya. The last named quickly improved his position, and at the half-mile post he was at Ecuador's saddle skirts, with McLanghin riding for life, while a scant length behind Himalaya laid Hayward with Turk, followed by Caesar and Leo. Half way round the railroad turn Caesar gave it up, and just before they finished the mile Himalaya took the lead, and although Ecuador was still second, Turk was at his saddle skirts, with Leo and Thackeray well up. The instant they were round the turn Turk showed second and Leo third. The presence of the Preakness colors in front started the applause, and as Hayward and Shauer in turn went to work on Turk and Leo, Feakes in turn began to ride Himalaya. The result was a grand finish between the three, in which Himalaya held his own to the end and winning by three parts of a length from Turk, he half a length in front of Thackeray, who ran very fast up the stretch, with Leo close up fourth, Ecuador fifth, followed by the Withers pair, they having run a very disappointing race. Time, 2:12. Value to the winner, \$3,390.

Mares Bred to Mambrino Wilkes, Season of 1884.

- Jan. 15—David Young's mare, no description.
Feb. 26—L. M. Morse's bay, by Drew.
Feb. 26—S. P. Bailey's black, by Ben Lippincott, he by Belmont.
Feb. 26—C. R. Waterman's bay, by Somer's horse.
Feb. 27—Ben E. Brown's sorrel, Etta—no description.
Feb. 27—Ben E. Brown's sorrel, Rosa, by Chieftain.
March 1—S. P. Adams' sorrel, Pnss, by Priam.
March 2—G. W. Wiggins' dun—the Bradley mare.
March 5—McIntire's bay, by son of Sherman Black Hawk, dam, thoroughbred.
March 8—Wm. Walker's brown—no description.
March 9—Lewis Gerlach's sorrel, by Priam.
March 9—Charles Yolland's sorrel, by Bonner, he by Whipple's Hambletonian.
March 10—Wm. Johnson's bay, by Jack Hawkins, dam by Jim Crow.
March 12—Thos. Still's bay, Dolly—no description.
March 15—L. M. Merse's roan, by Col. Lewis, dam the dam of Cora.
March 19—C. P. Allison's bay, by Black Boy, he by Black Hawk.
March 20—Nicholas Randall's white, pacer—no description.

- March 20—F. Schofield's bay, by son of Pacific, dam by Jack Hawkins.
March 21—Thos. Wall's sorrel—no description.
March 23—C. H. Reynold's bay, by Jim Crow.
March 25—C. T. Elliott's bay, by Belshazzer.
March 25—O. Norton's brown, by son of Sherman Black Hawk.
March 25—Thos. Wall's bay, by Chieftain.
March 31—Cyrus Moring's sorrel—no description.
March 31—John Davis' white—no description.
April 1—Ed. Elliott's bay—no description.
April 1—L. M. Morse's bay, by Drew, dam by Chieftain.
April 2—W. H. Post's bay, by Winthrop, dam thoroughbred.
April 3—C. H. Bailey's bay, by Norfolk.
April 4—Thos. Wall's bay, by Chieftain.
April 4—Ben Snow's sorrel, by Drew McClellan, dam by Holden's Black Bird.
April 5—John Davis' bay, by Nephew, dam by Gen. Dana.
April 6—C. H. Reynold's sorrel—no description.
April 9—J. S. Lewis' sorrel, by son of Chieftain.
April 13—John Hall's sorrel, by Carrol's Clay.
April 13—Jno. Randall's—no description.
April 16—T. C. Shaw's sorrel, by Dan Voorhees.
April 16—T. C. Shaw's grey, by Dan Voorhees.
April 16—J. C. Lewis' sorrel, by son of Chieftain.
April 17—Geo. Mosier's brown, by Black Boy.
April 17—E. J. Hughes' sorrel—no description.
April 18—Ben Snow's sorrel, by McClellan, dam by Holden's Black Bird.
April 18—A. J. Packard's brown, by Nephew, dam Nellie Packard.
April 19—A. J. Packard's brown—no description.
April 19—W. D. Ashley's brown—no description.
April 20—J. S. Lewis' sorrel—no description.
April 22—L. M. Morse's black—no description.
April 23—J. Erstine's bay, by Davis' Hunter.
April 25—S. H. Boardman's sorrel—by Frank Hunter.
April 25—John Patterson's sorrel, by Priam.
April 26—John Davis' brown—no description.
April 27—S. M. Boardman's bay, by Frank Hunter.
April 28—C. T. Elliott's chestnut, by La Rock.
April 29—M. J. Packard's bay—no description.
April 30—R. Pixley's bay, by Jack Hawkins.
April 30—R. Pixley's sorrel, by Veto, dam by Jack Hawkins.

- May 1—F. W. Scofield's grey, by McClellan.
May 5—L. M. Morse's sorrel, by Jack Hawkins.
May 8—C. H. Bailey's bay—no description.
May 8—Scott's black, by Jo Daniels.
May 9—J. G. Rnsell's black—no description.
May 10—Nich Randall's bay, by Drew.
May 10—D. P. Martin's bay, by Jack Hawkins.
May 12—Charles McClond's sorrel, by Chieftain.
May 12—Henry Erstine's bay, by Davis' Hunter, dam a Hambletonian.
May 13—E. B. Beck's sorrel, by Jack Hawkins, dam by John Nelson.
May 13—C. T. Elliott's brown, by Black Hawk.
May 14—J. M. Sallinger's brown, by Chieftain.
May 14—W. H. Meek's bay, by Woodburn, dam Bonnie Belle, by Belmont.
May 15—Wm. Walker's bay—no description.
May 16—Charles Yolland's chestnut—no description.
May 17—Senator Poole's black, by Son of Lodi, dam by Son of Belmont.
May 17—Henry Pierce's bay—no description.
May 18—G. W. Wiggins' bay—no description.
May 20—Ed Elliott's sorrel—no description.
May 21—Frank Brothers' brown—no description.
May 22—Gen. Ketchum's sorrel—no description.
May 22—Gen. Ketchum's sorrel—no description.
May 23—B. R. Prince's bay, by Chieftain, dam by Sou of Belmont.
May 27—S. Wardrobe's brown—no description.
May 30—S. H. Boardman's sorrel, by Frank Hunter.
May 30—Arch Wright's sorrel, by Old Hunter.
June 6—D. C. Shepherd's sorrel, by Romulus, dam by Jack Hawkins.
June 15—H. O. Southworth's bay—no description.
June 15—David Young's sorrel—no description.
June 16—H. O. Southworth's bay—no description.
June 26—John Patterson's sorrel, by Chieftain, dam by Wm. Wallace.
June 30—Capt. Johnson's roan, by Lad's Hunter.
July 1—John Waterman's sorrel—no description.

Pedigrees of some of the best mares were not furnished to the manager of the horse and some very imperfectly. Number of mares bred, 89.

Belle Echo in the 2:20 List.

At Chicago, on the 15th, Belle Echo won the 2:24 race in fine style and took her place among the 2:20 horses. We clip from the Breeder's Gazette:

The 2:24 class had been looked forward to with a great deal of interest by horsemen, since it would bring together for the first time a number of animals that had been doing good work in the different circuits and that would find plenty of backers. Among them was the California mare, Belle Echo, that was brought over the mountains early last Spring, by Andy McDowell. During the journey she was thrown in the cars and her back so badly strained that for a time her complete recovery was deemed extremely doubtful. But Cash Ward, who drives trotters in Wisconsin, and who has more State pride than any other man in the country, had gone to McDowell and told him that Waukesha water was just what the mare wanted to insure a complete and speedy recovery. McDowell did not put much faith in the talk, but as all other remedies had failed he sent for a few barrels of the water, and the result was that by the time the mare reached this city she was in pretty good shape for a race, and, of course, Cash Ward attributed her improvement to the virtues of Waukesha water. He tried unsuccessfully to sell "Knap" McCarthy a few barrels, and then went to John Turner and induced him to buy some for Edwin Thorne. Turner tried the water two years ago, and is free to admit that it had a beneficial effect on his horse. But to the race. In the pools Belle Echo was first choice, selling about even with Felix, while the field brought about as much as either of them, and on this basis a large amount of money was put in. When the horses were called out and began to score it was very soon seen that Belle Echo had the speed of the entire party, but whether she could keep up the clip remained to be seen. She had won heats in almost all her races since coming this side of the mountains, but had invariably quit so badly as to lose the race. This was attributed by her driver to the fact that she had not become thoroughly acclimated, and was also

suffering from the injury alluded to above. When the word for the first heat was given she went away like a race-horse, closely attended by Felix, and, after passing the first turn, these two had the race for the heat all to themselves. George Voorhies had established himself comfortably in third position with waiting, and remained there all the way, Belle Echo and Felix having a merry contest of it all the way around, but half way down the home-stretch the mare gave Felix the go-by and won handily in 2:20, and this after a break on the lower turn whereby she lost at least two lengths. The result of this heat should have satisfied thinking people as to which was the best horse of the two, but there were not wanting gamblers who asserted that McCarthy had not driven Felix to win, and after Belle Echo had won the second heat as she liked in 2:21 these dissatisfied ones made so much talk that the judges called McCarthy to the stand and warned him that he must do his best. The result of all this talk was that in the third heat Felix made two breaks before going a quarter of a mile, leaving the job of chasing out the California mare to the black gelding, Prince. He had finished sixth in the previous heat, but in spite of this disadvantage managed to come second to Belle Echo in 2:20, although she beat him so easily as to show that had it been necessary she could have trotted the mile at least a second faster, and there were not a few present who thought her capable of a mile in 2:18 or better. Of the others in the race not much can be said. Prince has been contented a fast horse for the last year, but his driver is one of the timid class who fear to go into a crowd of horses, and this is a disadvantage not easily overcome. With a first-class jockey behind him Prince should prove a good horse in his class, but as at present situated he stands but little chance to win.

SUMMARY.

Table with 4 columns: Name, Class, Time, and other details. Includes entries like Belle Echo, b, b, by Echo, dam by Belmont (thoroughbred) 1 1 1, Prince, blk g, by Royal Revenge, dam Lady, 7 6 2, etc.

The King of Stallions.

The record tumbling rush by Phallas at the Chicago Driving Park is thus reported in the Turf, Field and Farm:

Tuesday, June 15th, proved a red-letter day in trotting turf history and wound up in a most brilliant meeting. The stallion trotting notch of 2:15, which has stood to the credit of Smuggler since 1876, is now obliterated and a new king among sires is enthroned. It remained for Phallas, the fast son of Dictator and Betsy Trotwood, to make the new mark, and it is so low that it will not soon be wiped out by any other horse, though it is not unlikely that Phallas will himself beat the performance before the season is over. He will be lucky, however, if he finds a track equally perfect and conditions in every way so favorable. After the seventh and deciding heat of the postponed 2:27 race had been won by Adelaide in 2:21, the fast party were rung on the track, Phallas, Catchfly, Clemmie G. and Fanny Witherspoon responding to the bell. Somehow the betting men had got a notion that Catchfly was due to astonish the world with her speed, and they made the mare a favorite at odds of \$100 to \$43 over the field. They felt mightily encouraged when the Milwaukee mare won the first heat in 2:19, Phallas being laid up after making a break. Bither, however, had instructions from Mr. Case to give the young stallion a record, and he proceeded to do it in the second, third and fourth heats.

When once the near relative of Jay-Eye-See was fairly cut loose, there were no other horses in the race, and the field of trotters did little more than get inside the flag. Without a particle of urging Phallas trotted the second heat in 2:15, and when he had done the third mile in 2:16, he cooled out beautifully and was as fresh as a daisy. For the fourth and last heat he was sent away level and fast, and sped to the quarter-pole in 33 seconds. The half was reached in 1:07, and then came the real work. He responded to Bither's call, and did the third quarter in 33 seconds, coming home from the three-quarter pole in 33, and crossing the score in 2:13, or a second and a half faster than Smuggler's time. The first and second quarters were trotted as a 2:15 gait, the third at the rate of 2:12, and the last quarter at the rate of 2:13. Besides being the best stallion record, this was the fastest fourth heat ever trotted.

Purse, \$2,500, free for all. Table with 4 columns: Name, Class, Time, and other details. Includes entries like J. I. Case's b b Phallas, by Dictator, dam Betsy Trotwood, 4 1 1 1, R. P. Pepper's b m Catchfly, by Administrator, dam Cuckoo, 1 4 3 4, etc.

TIME.

Table with 4 columns: Heat, Quarter, Half, Three-quarter, Mile. Includes entries like First heat, 34 1/2, 1:07, 1:45, 2:19, etc.

Trotting at Vallejo.

The second match between the Denecia horses, Ben and Mambrino, was trotted at Vallejo on the 12th. Ben was handled by Sperry and won the first heat, but made a tumbling break in the second, that gave him the flag and ended the race. Mambrino was the favorite in the betting at \$10 to \$7.

SUMMARY.

Table with 4 columns: Name, Class, Time, and other details. Includes entries like Vallejo, July 12th; match for \$500 a side, 2 1, M. Quarley's blk s Mambrino, (Edge) 2 1, J. William's b g Ben, (Sperry) 1 ds, Time, 2:58, 2:55.

At Chicago on the 11th Jay-Eye-See essayed to beat his record, but failed. The day was very warm, with no air moving, and the track fast. He came out before the event was called, for exercise, and went around the course, and was timed the last quarter, which he made in :31. The first trial was more in the order of preliminary work, and was done in 2:19. The second trial he was started at a terrific clip, and he went to the half in 1:03, which was too fast for the little horse, and he gradually slowed up and quit at about the second distance stand, coming under the wire in 2:14. The third trial was simply a slow working one, and was done in 2:21. There was some betting on the event, pools selling \$70 to \$35 that he would not beat 2:11.

Robert McGregor has gone wrong—lame behind the hind leg. He will be, or has already been sent to Lexington stud service.

## FISH.

## Fishing in the Santa Cruz Mountains.

Fishing in the Santa Cruz mountains, for those who are in the habit of yearly visiting the lakes of the Sierra Nevadas and the headwaters of the large rivers, is comparatively a tame sport; but for the angler who loves fishing not solely for the fish he kills; who loves to surround himself with the solitude of virgin forests of pine and redwood; to breathe the pure air of heaven; to love nature for what it really is, and who is content with a well filled creel, the mountains give source to much pleasure and sport. Of these many streams, perhaps none are so well known as the Lorenzo. This stream finds its headwaters high up in the mountains, runs in a southerly direction for thirty or more miles, and finally empties itself into the sea at Santa Cruz. Like all streams its body of water at the head is small, but its volume increases by being fed from tributaries until the town of Felton is reached, after which it becomes a maddening, rushing torrent, affording delight and pleasure, not only to the angler, but to the tourist and traveler, on the narrow gauge railroad who looks out of his car window to behold hundreds of feet below him, its torrents of water, impatient to reach the sea. Think of it, thirty miles of fishing, and with rare exceptions not a pool or an eddy but what can be attacked by the fisherman. So open is its water bed, and so free from over hanging branches, that there is little to annoy the angler. He may cast at will without fear of tangling flies or leaders. Waterfalls, riffles and eddies are varied by long stretches of still, open and deep water. They are frequent, and by many are pronounced a nuisance, but the quiet, careful angler often strikes his largest fish in these places, especially about the middle of the day, when the lazy fellows are basking in the sun. What a thrill of pleasure the sight of one affords! Like stalking for a deer, make no noise and keep out of sight. Select well your grounds for attack. Don't get impatient. Cast long and skillfully. Your fish is either wary or sulky, but always cunning. If he has not seen you or otherwise become disturbed, the moment your fly touches the water he strikes, a light twitch of the rod and he is fast. In a few moments he is in your creel. For the time and trouble thus taken the angler is well rewarded. His companion who has skipped the still holes is begrimed at the end of the day when notes are compared, and he vows that next time he will not be in a hurry. The trout found in the Lorenzo are comparatively small; but for brook trout they average well, providing the angler will return to the water the fingerlings. A fairly skillful fisherman can basket an hundred fish in one day, all of fair size, and this may be done with but little walking, say two miles of the stream. The Lorenzo is easy of access and is reached without much loss of time. Take the narrow gauge railroad to Felton, and at this point one may go up or down the stream at pleasure. If the choice of selection is no stream, conveyance by stage may be had which runs daily to and from Boulder creek. A hotel and store are located about seven miles from Felton, at the forks of Boulder creek, a large tributary of the Lorenzo. Here, nestled amid a pretty grove of redwoods, is Denuison's Hotel. Mine host is a true sportsman; he knows the wants of his fellows. Come with or without your rod, nature and Denuison will cater to all your wants, and your stay will be one long holiday. The good wife superintends the table, and if you come without appetite, so many tempting kinds of berries, rich cream and other good things are set before you that after all you think there is something in life worth living for. From the hotel you are within a stone's throw of Boulder creek, a fine body of water with about two miles of fishing Bear creek, which you may ascend for seven miles or more, and the Lorenzo. If one's stay is long, horses can be obtained and a visit to the Waddell made. But do not go there if you are afraid of the sight of bears' tracks. You will see plenty of them. As to fishing in the Waddell, trout are so plenty that the killing ceases to afford pleasure. If one tires of fishing, and you are there in proper season, Denuison will take you where you can get venison, and if you want bear and are real hungry for that kind of meat, he will show you where to find them.

What greater variety of pleasure can a sportsman ask for? I have just come from there. I am ready and willing to labor and toil for another year, and my labors will be lightened with anticipation of the pleasure of spending my next vacation fishing in the Santa Cruz mountains.

FRANK FOWLER.

There is little to comment upon this week in the anglers world, save that the streams generally are yielding good sport to those who understand their business. One feature of the season is the number of large fish caught. To the other unusually large trout taken, the *Plumas Herald* this week speaks of another, 23 inches long, 5 1/2 inches deep, and the largest, it is said, ever caught in that section with hook and line. It weighed 6 pounds. Charles Kaeding recently caught a fine 3-pound trout in Lake Temescal, the private preserve of the California Sportsmen's Club. The black bass in that lake are not biting well. While fishing recently in the eel at Santa Ana two gentlemen caught eight rock-cod, the largest of which weighed 20 pounds, and the smallest 8 pounds. Those were fish worth catching. The north-eastern lakes over the mountains are not yielding good sport at last accounts. Whoever knew the week when the Tahoe trout were not fastidious and uncertain?

The *Carson Appeal* says: The Indians are constantly spear-fishing trout on Lake Tahoe, back of McKinney's. The trout are now heavy with spawn, and all the fish brought up by the Indians are females. They build screens of brush over the creeks with a hole in the centre, and as the trout pass the hole they are speared. Some trout weighing as high as seven pounds are taken in this way and each carries from five to ten thousand eggs. The law against taking with a spear applies to Indians as well as white men, and it would seem that the Fish Commission are negligent of their duty if they do not take official cognizance of this destruction of fish and punish the offenders.

When was this not the case? Instead of grumbling about it, would it not be more sensible for the better class of white men to unite together and stop such vile abuses? There is a limit even to the liberality of freedom. This Indian abuse of national privileges is better stopped than complained of. The local residents can do it if they please.

A desirable change is coming over our trout fishers. It is said they are more desirous of catching one large fish than a hundred fingerlings. This is pleasant news, but we know we have yet too many fingerling eelers amongst us. If the latter were struck with lightning the country would be much benefited. A fingerling sharp has no business and no place in this world.

Mrs. Benjamin C. Truman is credited with the boss catch of trout of the season, by trolling at Donner Lake, with a small spoon, highly polished, a No. 1 clusher hook, and 75 feet of line, she caught 33 fish, weighing 40 pounds, in three hours. Depend upon it, the lady did not enjoy the fish any the less for catching them herself. Major Truman caught 60 the trout in five hours, and Mr. Bissell, 94 in eleven hours. The last looks like pushing things too severely and making a toil of pleasure. Enthusiasts will do strange things. Some will catch hundreds of fingerlings in a couple of days and call it sport. Would it not be better for all concerned if people enjoying the privileges of their country and its laws should somewhat moderate their enthusiasm?

It is to be regretted the Government has decided to abandon the United States battery on Cloud river. The information comes from Livingstone Stone through Fish Commissioner Buckingham, and is therefore reliable.

The hake, it is said, has recently been caught in the Columbia river.

## ATHLETICS.

## Myers Lowers Another Record.

Another series of amateur athletic games, open to all comers, was held on July 12th, at Nottingham, under the same management as the meeting at Birmingham. The weather was all that could be desired, and fully 5,000 persons paid admission. The sport, however, was poor and the competitions in the various events seemed unreal. The only one of the American athletes who especially distinguished himself was Myers, who won the 600-yard race in 1m 13 2-5s, beating the English record by over 1 sec. Cowie beat Waldron in the 150-yard race in 153-5s. Snook won the 1,500-yard race in 3m 4ft 2-5s, with Fredericks 15 yards behind. Murray beat Whyatt in the three mile walk, but complaints were again made against what is alleged to be Murray's unfair style of walking.

A meeting of young gentlemen interested in bicycling and running was held at the residence of F. R. Cook. Sufficient money was subscribed at the meeting for the purpose of putting down a track at the Recreation Grounds, so that athletes could have a ground in this city where some exercising could be done. The track (which is calculated to be ready in two weeks) will be one-sixth of a mile in circumference. The lessee of the grounds, Andrew Piercy, Esq., will derive the benefit from the spirited action of the athletes, but this, much as it is to be regretted, could not well be avoided, as a ground on this side of the bay where some training can be obtained for approaching meetings is an absolute necessity. A great many clubs and organizations have announced their intention of obtaining grounds on this side of the bay, but as yet have taken no active steps towards securing them. This last move will probably awaken heads of clubs to the importance and urgency of the occasion.

A cablegram informs us that at Aston Lower Grounds, Birmingham, July 14th, was held the fourth international amateur athletic meeting under the joint management of the Manhattan Athletic Club and South London Harriers. The remaining information is very meagre, but we learn that some one, (probably Cowie), beat Waldron in the 75-yard run, in 7 4-5 seconds, that some one, (probably Snook), beat Fredericks in the 2,000-yards run, in 5 minutes, 15 1-5 seconds; that Murray won the 1-mile walk in 6 minutes, 45 seconds, and Myers the 1,200-yards run in time slower than 2 minutes, 53 seconds.

Omaha correspondence to *Mirror of American Sports*: Pete Duffy, of this city, and Archie McComb, of San Francisco, ran a 100-yard foot-race at the Athletic park in this city for \$500, \$250 a side, Pete Duffy winning by two feet in ten seconds. Duffy is known to cover the distance in 9 1/2 seconds, but owing to the strong wind which was blowing at the time he could not get there. Every town in America will shortly have a ten second man.

A Swedish tourist has arrived at Warsaw in fulfillment of a wager made with two Englishmen, the conditions of which are that during the year from January 1st, he shall visit all the cities of Europe which are, or have been at any time, capitals, and numbering, according to his reckoning, 106. He has visited all the capitals of Germany (26). If he succeeds he is to receive \$25,000 and his traveling expenses.

By telegraph we learn that the wrestling match between Muldoon and Ross did not come off on the 21st, owing to the funking of the former. This is probably a new trick hatched for the especial purpose of creating a greater amount in public interest in the match, which will take place at some later date. Duncan and William are away ahead of all rivals at the hippodrome business.

Mr. Pietro Delmas, the French wrestler, was expected to arrive in the city the latter part of the week. Delmas is matched to wrestle Cannon.

## CRICKET.

The match between the Merions and a team of cricketers selected from the British ships Nebo, Carmarthen Castle, Pionore, John Gamble, and W. H. Perrie, took place at the Olympic Grounds last Saturday afternoon and was thoroughly enjoyed by all. The afternoon was beautifully fine. The Merions were the first to bat and compiled 57 runs before the last wicket fell. Benjamin (11) and Burnett (8) showed up most prominently. Fenton howled fairly well while Baird kept wicket in excellent style. The Mariners essayed with the bat but were particularly unfortunate, owing to the deadly howling of Barney Benjamin and Miller, and were all dismissed for the small score of 14. Benjamin secured seven wickets, and it is conceded on all hands that he never howled better in his life. (We are sorry we cannot agree with the generally accurate and impartial reporter on the San Francisco *Alta*.) Miller bowled splendidly but was terribly unlucky. In their second attempt the Merions made 91, of which Burnett by steady play claimed 25 not out, and Benjamin and Creighton by lively play accumulated 18 and 17, respectively.

The Mariners went in for a second innings and had lost 6 wickets for 35 runs, when stumps were drawn for the day, the match resulting in a victory for the local club by 43 runs on the first innings. Dix, of the John Gamble, was the most successful batsman for the Mariners. Kennedy longstopped

very well. The fielding of the mariners was sometimes very good, but oftener very bad. The two youngest members of the Merion Club, Goewey and Wigmore, both did well, the former showing very good defense in both innings, while the latter hit out with considerable vigor considering it was his first attempt. Score:

MERIONS.		SECOND INNINGS.	
G. Theobald, b Fenton.....	2	b Fenton.....	0
B. A. Benjamin, b Dix.....	2	c Kip, b Dix.....	5
D. Burnett, b W. Dix.....	8	Not out.....	25

Total.....	14	Total for 6 wks.....	35

That O'Brien should have been bowled for "0" in both his innings in the Oxford and Cambridge match is one more proof of the uncertainty of cricket. Had he been snapped at the wicket, or caught off a ball that would get up a thought higher than he intended, his failure would have been more explicable, but twice to fail in keeping the ball off his wicket before he had made a solitary run is to fail indeed, for one who is esteemed and has proved himself to be an excellent bat. Another surprise was to find the gentlemen of Philadelphia walking away from the gentlemen of Gloucester. The latter team had a tall to it no doubt, but still Messrs. W. G. Grace, E. M. Grace and W. R. Gilbert are big names. Mr. W. Leatham was useful in the second Philadelphia innings, and there were others who can play cricket. The Americans have certainly some reason to feel proud.—*The Illustrated Sporting and Dramatic News*.

Winnipeg has ten cricket clubs.—The Australians defeated the Gentlemen of England, June 29th. W. G. Grace made 107 for England, while Blackham and Midwinter batted splendidly for Australia.—The match Derbyshire against Philadelphia resulted in a draw, but greatly in favor of the latter team. Thayer scored 60 in the first and 93 in the second innings.—On July 3d the Players were defeated by the Australians, by six wickets. Bonner scored 95 not out in his second innings.—At Newcastle, on July 12th, the Philadelphians defeated Northumberland, by 96 runs.—After an interesting game the Philadelphians beat Liverpool, by 4 runs. Scott made 93 in the first innings by grand batting. Lowry howled splendidly.

## BICYCLING.

## How to Ride.

Perhaps our readers will speak of the little tale concerning the transportation of the products of the coal mine to the town of Newcastle, and remind us that they all know how to ride, and any remarks on the subject are entirely unnecessary. While we do not propose to dispute this subject with the veteran rider, we would remind him that there are many readers of this paper who have just barely managed to climb into the saddle with safety, and propel their wheels with a moderate degree of speed. These men are usually in search of information, and to them we address a few words of advice.

The lines of the bicycle are mostly curves, which, although they betoken beauty, should not extend to the rider, and the position of the body being perhaps the most important, it should receive the most attention. While in the bicycle the backbone is curved and the forks straight, a reversal of these circumstances on the part of the rider will result in a more graceful attitude. By all means sit erect, at least while riding at an ordinary gait on the road.

As we refer entirely to road work, we will not touch upon racing, which to our mind is an entirely different branch of the sport. The shoulders should be thrown back, with the elbows drawn close to the body, though not necessarily touching it, and to facilitate ease in this position, a handlebar at least twenty-four inches in length should be used. The position of the hands is a matter of choice, and should be occasionally shifted, according to the character of the work. The under-grip is perhaps the most effective for hill climbing, and many prefer it at all times.

Too much attention cannot be paid to the action of the ankle, which should be an independent motion of itself. The novice is apt at first to keep the joint stiff, especially if he wears high boots, which gives the knees an awkward, pumping motion, besides soon becoming tiresome. By depressing the fore part of the foot, and elevating the heel on the downward stroke, and reversing the action as the pedal rises, with the ankle joint comparatively limber, the rocking movement can easily be acquired with very little practice, and when once learned will never be forgotten. Strive to acquire "form" in preference to speed. The race is not always to the swift, especially in road riding, and a graceful rider looks better and more impressive than one with his nose on the grindstone. Again speed will come with practice, and the young rider should not be anxious to outdo the veteran.—*Wheel*.

United States ranks next to England in number of wheelmen and manufacturing, there being some 15,000 wheelmen in America at the present time, with two large manufacturers. There are also several makers of cheaper grades of bicycles. The United States has 350 bicycle and tricycle clubs, and between thirty and forty importers and firms dealing in wheels and sundries, with their agents in numberless towns.

The San Francisco Bicycle Club, under the command of Captain Eggers, made their first long run of the season last Sunday. The trip, which was from Sausalito to San Rafael, was thoroughly enjoyed, notwithstanding the very bad condition of the roads. The party consisted of Captain Eggers, Bugler Gibson, H. C. Finkler, M. Feintuch, G. Day, C. McLaughlin, A. Neil, W. J. Munro, F. R. Cook and J. Ehrenberg.

### The Gospel on Wheels.

Rev. R. E. Macduffy, a Cleveland clergyman, was recently arrested in that city for riding a bicycle on the sidewalk. He pleaded guilty, but explained that the street was in bad order, compelling him therefore to take to the walk, and said in extenuation of his offense:

"My parish is a very large one. I am often called to the bedside of a sick or dying person and must get there as fast as I can. I hope I am a law-abiding citizen, but when I receive a call of this kind I am going to respond at all hazards. I consider that in following my calling as a minister I am obeying the law of humanity, a higher law, even though I violate the law made by man."

In fining the reverend gentleman, the Justice said: "When the laws of humanity, or higher laws, as you call them, conflict with the laws of this State and city, the higher laws are going to come off second best. I respect your calling—it is a noble one; but the laws to enforce which I am placed here are applicable to everybody without distinction as to person, or occupation. For the present I'll stand by the ordinance. My advice to you is 'to keep in the middle of the road.' If you take to the sidewalk, you must go afoot."

The entire tour around the Lake of Geneva has just been accomplished on a tricycle in a day by Mr. Hutchinson, a member of the Alpine Club. The time occupied in running was 11 hours, distance, 112 miles.

At the meet of the National Cyclists Union, at England, June 28th, R. Chambers won the five-mile amateur championship in 15m. 36 4-5s., a stiff breeze against the rider.

Five hundred and ninety riders were present at the annual meet of the Scottish Wheelmen at Edinburgh June 14th.

It is quite likely that one of the Boston clubs will have a hill climbing contest shortly.

Nearly \$8,000 in prizes will be given at the Springfield meet.

The mounted orderlies in the Italian army now use the bicycle.

## STABLE AND Paddock.

### Equine Influenza.

This annoying disease lingers among us and fresh outbreaks are reported in interior districts. The following consideration of the symptoms and treatment is by an Eastern veterinary of large experience and has the merit of plain English and lucidity:

There is no disease that assumes so great a variety of symptoms at its commencement as influenza. The first noticeable is that the horse is dumpy, which signifies debility. This is a remarkable feature, and one that seldom if ever presents itself in any other form of disease so early. To a casual observer the horse looks as if he had been sick for months. The eye is indicative also of the disease; its vessels are turged, have an arterial red appearance, (this has, perhaps, led to the term pink eye); the lids become swollen and the animal shrinks from the light as if its rays caused pain; the tears trickle over, and now and then a particle of purulent or lymph matter can be seen in the angles of the eye. The animal seems unable to support the weight of its head; it either remains in a drooping position or he rests it in the crib. First one hind leg and then the other swells; become infiltrated with fluid which constitutes anasarca; or they may both commence to swell at once; in fact other parts of the body become dropsical, so that the patient sometimes more resembles an elephant than a horse. This swelling of the legs, let it be more or less, is considered, in connection with other the features, the diagnostic symptoms. It is very different from that tumefaction which we observe in the limbs of many horses, occasioned by want of exercise. It comes on suddenly, and affects the whole limb, groin, and sheath. The hair from the first has an unhealthy aspect and rough feel; the ears, nose and limbs are cold or not, according to the stage of the disease. The appetite is poor from the first, and every attempt to swallow tells us that the throat is excessively sore. Inspect the fancies and they will be found inflamed; the tongue is foul, thickly coated and saliva runs freely, although not always, for in many cases the mouth is dry and feverish; the excrements are voided in small quantities; the excretory as well as the secretory functions are as torpid as the animal himself. In the course of a few days' discharge sets up, and this is considered a favorable crisis. In some subjects, however, the disease terminates in submaxillary abscess; the animal sometimes has a troublesome cough.

These are the main features of this form of influenza. They vary in different subjects, both in the mode of attack, intensity and termination, and in the progress of the disease, although self-limited, it depends much on treatment and still more on the management of the horse during the sickness.

**Treatment.**—Give the patient pure atmosphere (this is the best medicine for the lungs), for the blood being loaded with carbon, owing to its languid circulation, requires pure air to decarbonize it. Clothe the body according to the temperature of the stable. If the limbs are cold they should be well rubbed, and if any difficulty is experienced in increasing their temperature some stimulating liniment should be rubbed on and flannel bandages applied if necessary. The natural clothing of the animal is all that is necessary, however, provided the atmosphere be comfortable. The following dose should be given early, as it helps to clear out the digestive cavity of all morbid material: Sulphur, 5 drachms; cream of tartar, 2 drachms; salt, 1 ounce. Mix with flaxseed for a drench. Salt is good for this disease, therefore, allow the patient all he will eat. This will cause thirst, and the best drink is flaxseed tea, acidulated with cream of tartar and thickened with powdered licorice. Don't give too much drink at once; a quart or two at a time is enough, and have it warm if the patient will drink it so. As regards diet, a plethoric horse should be half starved, both in view of reducing his fat and lessening the fever, which, as matter of course, will accompany the malady. In fact, sloppy drinks and shorts are all that are needed in any case until the disease turns for the better.

Should the throat be sore let it be rubbed occasionally with warm vinegar and salt. The discharge from the nostrils must be encouraged by steaming. The rectum may be emptied occasionally with warm soapsuds. In view of guarding

against subsequent cough and debility give the following equal parts of powdered elecampane, powdered pleurisy root, powdered licorice, slippery elm, salt and gentian. Dose one ounce daily. The swollen limbs should be rubbed frequently, and the patient must have walking exercise as soon as the state of his health permits.

### Lameness in Horses.

[London Field.]

In previous articles we have referred to cases of sudden lameness from various causes, and also to the injuries resulting from shoeing. Lameness, as a consequence of the application of iron shoes, may be due to accidents in driving the nails; to derangements of the functions of the foot, from the altered position of sole and frog in the shod foot, as compared with the unshod; or to the effects of concussion. The latter cause is commonly looked upon as the most fruitful in the production of various degrees of lameness, navicular disease, and generally disease of the joints in the vicinity of the foot, being the chief among the alleged results.

In the consideration of the causes which occasion defective action or lameness, an important factor is frequently omitted—viz, rapidity of movement. Most horses, either harness horses or hacks, are required to move quickly, as well as to carry or draw weight; and the influence of pace as a cause of concussion and sprain is far more marked than is generally suspected.

It is obvious that in the case of horses which are used for slow work the pace cannot be a cause of disease; it is also true that these animals are generally exempt from the affections of the locomotory organ to which animals which are habitually used for quick work are most liable. Accepting that an accidental false step may cause concussion or sprain, a draught horse may be looked upon as an animal which is exempt from such injuries, on account of the character of his work not necessitating rapid movement. It must be evident that muscles, tendons, and ligaments are capable of resisting any force which may be applied slowly to a much greater extent than is possible when their action is suddenly called into play. This point is illustrated very perfectly in the case of an animal supporting a heavy burden while going down a steep hill. During the animal's progress it will be seen that the fetlock joints of the forelegs are subjected to severe extension, which they can effectively resist by the aid of the suspensory ligament and the flexor muscles, because the extension is gradually effected. At the same time, the hind fetlocks are flexed at every step to such an extent that the fronts of the joints are often close to the ground. No harm results in this case either, for the reason previous given, viz., the deliberate character of the movement. If the fore fetlocks were extended or the hind ones flexed to the same extent by a sudden and rapid movement, it is almost a matter of certainty that an instinctive and violent effort would be made to control or resist the action, and the result would be that either muscle, tendon, or ligament would give way.

Concussion and all its consequences is avoided when the movements are slowly conducted, because time is allowed for the proper adjustment of each successive step, and no movement is made for which the animal is unprepared. Young animals suffer most from the effects of work at a quick pace, as shown in the premature breaking down of tendons and joint structures generally. This is so well known that the term "used" is often applied to the legs of horses in such cases.

Practical horsemen are quite familiar with the appearance of "used legs," and also know very well the difficulty of restoring them to a state of soundness. In the least prominent form of the derangement there will be an evident want of firmness in the tendons, and the joints will be inclined to "puffiness." Swelling of the legs below the knees and hocks occurs after a short period of rest in the stable, but the swelling subsides after exercise. In more advanced cases the horse "kneekles over"—that is to say, he stands with the fetlocks, of the forelegs chiefly, slightly flexed. In other instances this defect may be associated with "standing over at the knees," in which case the knees are held in a bent or flexed position.

Bursal enlargements (windgalls) in both the fore and hind joints, the fetlock especially, and in the hocks, as "thoroughpins" and "bog spavin," are also among the indications of excessive or premature use.

An expert, in looking at an animal with used legs, in order to determine what extent of damage his limbs have sustained, and what are the chances of recovery, has to take into account, first the animal's age, and next the position and character of the injuries which have been experienced by the muscles, tendons, ligaments, or joint capsules. The cases which promise the best results under treatment are those in which there is nothing more than a general softness of sinews below the hocks and knees, and tendency to swelling of the legs in the stable.

When a horse is affected with relaxed ligaments, causing flexion of fetlocks or knees, the defect is, under all circumstances, grave in its character. An old horse may be looked upon, as incurable, and even in a young one there is but little chance of doing much good without a long course of treatment, including perfect rest during the whole time.

The art of getting an animal "fresh on its legs" after it has suffered from the effects of too much hard work has yet to be acquired. There is no patent process for the purpose; if there were the possessor of the secret would soon be on the high road to fortune. Treatment for "worn" or "used" legs will be regulated by the condition of the animal. Some cases will be materially benefited by the constant use of the cold water douche, followed by the application of wet linen bandages, which should be so put on as to press firmly and equally on the legs from the knee or hock to the foot. Some manual tact is required for the proper adjustment of a bandage, and the necessary skill is not so generally possessed by groomers as might be desired.

Bursal enlargements, in the form of "windgalls," "thoroughpins," and "bog spavins," are difficult to cure. Blisters and setons, and even the firing iron, are not always successful in affecting their reduction. Pressure is the most effective remedy, but difficult of application in many cases, especially when the disease affects the hock. A truss which was invented by Mr. Broad, veterinary surgeon, of Bath, has been used with good effect in these cases.

In a veterinary legal point of view, the defects which we have been considering as constituting used or worn legs must be classed in the list of non-soundnesses. It cannot but be evident that relaxed ligaments and tendons, weakness of joints, and dropsy of synovial or joint capsules, are defects which interfere at the time with the animal's usefulness in ordinary work; and experience proves that they are likely to become more instead of less detrimental in the future.

### How Much Does A Horse Know.

Several remarkable instances of the intelligence exhibited by various animals, have recently been given in the *Prairie Farmer*. We once owned a colt that seemed to understand very many things said to him. When we went to the yard or field in the morning he would come running up and raise a fore foot for a good morning shake. When he sometimes raised the left leg, the simple remark "that is not polite," caused him at once to put it down and offer the right foot. A column could be filled with instances of his intelligence, and yet he received little training, none that a farmer boy did not give. This experience is recalled by an account in *Harper's Young People*, of an interview with Prof. Bartholomew, the successful horse trainer. To the question, "How much does a horse know?" he promptly answered:

"About as much as the average man—more than a great many. You don't believe it? Will you give me half an hour to prove it?" "But," I objected, "you can teach a horse certain tricks, which become a mere matter of habit, and it proves nothing of the horse's knowledge." The Professor smiled pleasantly. "I won't argue with you. Wait. Nellie!"

A slight scuffling followed in the stalls at one side of the stage, and a beautiful little bay mare came trotting up to where we stood. She stepped beside the Professor, and rubbed her head against his arm caressingly, gazing curiously at me the while. "Bow to the gentleman. Now shake hands," the teacher continued, as she nodded her pretty head toward me, and lifted her left fore foot. "Is that the right foot?" asked the Professor approvingly. One could actually see a look of confusion on her intelligent face as she quickly corrected her mistake.

"Nellie is like some children. She can't seem to distinguish between her right and left hand," said the Professor, patting her affectionately. "Now count one, two, three," he added. Tap, tap, tap, went the iron-shod hoof on the floor. "Good," said the Professor. "Now get the gentleman a chair." I must confess I thought this was going a little too far. The tricks she had exhibited were ordinary enough; they displayed careful training; but this quiet request rather surprised me. I watched to see what she would do. She trotted over to the opposite side of the stage, and in a few moments returned, bringing a chair in her teeth. "Here," said Professor Bartholomew, pointing to the place where he wanted me to sit. "Now," he said, "wait until I bring on the rest of my scholars," and he put his hand on the swinging door which led to the stalls. Nellie started to follow him.

"Why don't you stay with the gentleman?" he said, quietly, without turning his head, just as one would speak to a child. Nellie turned obediently, and came back to my side. I must confess that I felt rather embarrassed, and in my confusion hardly knew how to treat this little lady-horse. Suddenly I thought of some candy which I had in my pocket, and soon we were getting on rather finely, eating candy together. In the meantime Professor Bartholomew had returned, followed by about a dozen horses, who marched solemnly on the stage, and ranged themselves along one side.

It would be impossible to describe all the performances they went through; march and counter-marching, dancing in perfect time to the professor's whistle, lying down, kneeling, bowing, jumping—all at the quiet command of the teacher. In fact his voice was so low and gentle that it could hardly be called a command; it was more like a suggestion on his part, with which they complied readily.

One handsome Arabian attracted my attention, and the Professor at once called him over to him. "How do you do, Selim?" said the teacher. The horse bowed. "Is that the way you bow in Arabia?" Selim at once dropped upon his knees, and touched his forehead to the floor. The Professor gave him the signal for getting up. Then turning to me, he said, "That is an extremely difficult feat. For some reason a horse hates to do it."

"Does he understand what you say?" I asked. "Does he not act as if he did?" was the Professor's answer. Then he continued: "There is no doubt that the horses understand every word I say to them. I could see no reason why if a horse can comprehend the meaning of 'Whoa,' 'G'long,' 'Huddup,' he could not learn more, so I began to teach two or three, and soon had this school around me."

"I notice that you speak in such a low tone, while so many who have to do with horses seem to think it necessary to yell at the top of their lungs." "A horse is not deaf; his hearing is more acute than a man's, and yelling at him only tends to make him harder to manage. You can lay it down as a rule that the louder a man shouts at a horse, the less he knows about horses. But then half of the men who have charge of horses now should be made to practice ten years on a clothes-horse before they are allowed to touch a live one." "How do you manage to teach them so much?" I asked. The Professor smiled. Any one with patience can train horses, and almost any horse can be trained. The trouble is that most people have but very little patience, and a great many good horses are spoiled by half-witted owners who are not fit to have charge of a saw-horse." But the scholars are becoming restive, and the professor said, "School is dismissed." Each horse left his place, came up to the Professor, and walked off the stage. "Now, how much does a horse know?" said the Professor, turning to me, and repeating my own question. "A great deal more than some men, for he knows enough to do his duty cheerfully, and to the best of his ability," I answered, as I took my leave.

The horse that kicks while being groomed, mostly does so from being ticklish, although some do it from habit, and in either case mean no harm. Men used to handling horses, generally know how to keep out of danger with such a horse. If he is in earnest, let him get a rap, and he will learn better; such a horse is not very objectionable. Many horses kick in the stable, as soon as the lights are put out and the men gone. They merely kick at the stall posts, but with what intention, "no fellow can find out." Idleless, we conclude, first induced them to do it, and habit to keep it up. It is a bad trick, for it not only keeps them from their rest, but disturbs other horses. A strap buckled around the pastern, to which is attached a piece of chain, about a foot long, usually stops this practice. If it does not, let the horse go loose in a roomy box stall. Some horses have a habit of kicking on being mounted, but this is not an indication of their being kickers in any other way, or any presumptive evidence of vice. It is an acquired habit of which probably they will never be broken: correction would be likely to spoil their temper, and probably induce them to kick at us instead of in the air.

Bog spavin or distention of the capsular ligament of the hock joint cannot be removed and the horse worked. The treatment for one just come on is rest, pressure and cauterization; afterwards fire and blister. If of long standing it should be removed with an instrument for that purpose, and fired and blistered.

THE GUN.

The Game Law.

Table with columns for months (January to December) and rows for various game animals (Quail, Partridge, Rail, Grouse, etc.).

As a general rule we object to poetry for newspaper use unless specially good. When, however, an old veteran...

White, white is my hair, yet I feel the blood tingle, At the thoughts of old times, though my web's nearly spun.

Once more is my shoulder the rifle caressing, Whilst eager at heel lies the silent Scotch hound;

A tide to my thoughts brings a change o'er my dreaming, Now I fancy my foot presses velvety sod,

Yes, again from the green bank I see the fish gliding, And hear in the distance the water-wheel's song

Aye! aye! but it's time that I now stop this thinking My face is quite flushed as if burned by the sun;

Pigeon Shooting—Bird's Point.

On Saturday last the Neophyte Club had their fourth medal shoot at Bird's Point, but the attendance was not as large as usual...

Table with columns for names (Bennett, Kellogg, Rambo, etc.) and rows of scores for various months.

After the match there was a lively sweepstake pool, which was divided by Messrs. Bennett and Haskell.

The Open Match.

On Sunday, at the same place, the third match, open to the State, came off, and though not advertised in a proper business manner...

Table with columns for names (Bassford, Walsh, Hopper, etc.) and rows of scores for various months.

Then followed a second match under the same conditions only with six birds each and \$5 entrance, making two pools of \$30 and \$15.

Table with columns for names (Pearson, Bassford, Slade, etc.) and rows of scores for various months.

Here again it was equally hard to reach a decisive result so determined was each man on victory. But in the first round Pearson and Greely fell...

Table with columns for names (Lambert, Bassford, Fay, etc.) and rows of scores for various months.

The attendance was large and all went away well pleased with the day's sport.

At Colma.

The Lincoln Gun Club held its fourth monthly shoot at Colma on Sunday. The shooting all through was very good.

Table with columns for names (Edler, Richter, Parks, etc.) and rows of scores for various months.

Table with columns for names (Frisch, Ford, Northrup, etc.) and rows of scores for various months.

Table with columns for names (Richter, Edler) and rows of scores for various months.

At the Six Mile House.

The Occidental Wing Club, who, we understand, are comparatively inexperienced at the trap, held their fifth medal shoot on Sunday...

Table with columns for names (Blanken, Funcke, Rojas, etc.) and rows of scores for various months.

Table with columns for names (Blanken, Rojas, Funcke) and rows of scores for various months.

Table with columns for names (Blanken, Rojas) and rows of scores for various months.

This Club will have its sixth meeting on the third Sunday in August.

Matches to Come.

The first in importance is the complimentary shoot given by the Gnn Club of San Francisco to-day at Bird's Point...

A purse of \$500 is to be shot for at San Bruno to-morrow. The conditions are: Hurlingham rule, forty birds, \$50 entrance fee...

Dick Cunningham, of San Bruno Hotel, it is said, has determined to give a purse of \$200, to be shot for on his grounds within a short time.

A pigeon match is to take place in Sacramento toward the end of the month between George W. Watson and P. D. Weeke for \$25 a side, 25 birds each.

General Notes.

Quoting a paragraph from our columns on the criminal and illegal killing of deer, Mr. N. White in his paper, the Sunday Capital, says: "While in San Francisco a week ago we saw a truck-load of well-dried deer skins in front of a store on Sacramento street,

and inquired of the proprietor where they came from. He replied that they were from Michigan Bluffs, Pleacer county, and that the load contained 450 skins.

Mr. White has always been a faithful co-laborer in the good cause, and we are glad he is not to desert us in future.

Sportsmen complain loudly against the killing of quail in Kern county, now that the game law is in force. The accounts reaching us indicate a very poor quail season.

Mr. Joseph Bassford was in town last week. Like others he reports a great scarcity of young quail, which he attributes to the late rains destroying their first eggs.

The July woodcock shooting in New Jersey opened fairly July 31st, and the best grounds were overrun with sportsmen on the opening day.

"A curious fact happened the other day at Flatbush, L. I. A cock quail was shot by a young boy, and not knowing the misfortune of his act, or the bird he had killed, I readily procured the same from him and had it mounted.

This only corroborates the experience of observant men as to the value of quail in vineyards and orchards. Mr. Baldwin keeps both of his at Los Angeles well supplied with quail, and the above quotation proves his wisdom in doing so.

"As buffalo are no longer numerous enough to make skin hunting pay, both Indian and whites have gone into the bone business. The Stauding Rock Indiana have collected and sold 170 tons of bone this season at \$8 per ton.

Very good indeed. As the whites and the Indians have for years criminally slaughtered our buffalo, as if with a pre-determination to exterminate them, we think they get more than they deserve in having their old dry bones to fall back upon to make a living.

Mr. A. G. Platt, of this city, has just received a letter from Mr. Charles Slotterbek, of Lakeport, in which he says he recently saw a band of eleven deer all standing together and quite within range, which said by their indifference as plainly as they could, "help yourself."

Mr. A. G. Platt, of the Alameda Gnn Club, has just had ten young Japanese pheasants hatched out by a pet domestic hen. Up to writing the young birds were doing well.

A very unpleasant but specific complaint comes to us of a prominent market hunter and trap shooter killing quail all the year round. If the investigation now going on proves the report to be true, he will be expelled from the club he belongs to, and refused admittance into any public matches with gentlemen sportsmen.

The markets during the week have not been over plentifully supplied. The season, however, has produced some remarkably fine bucks. Since the one we saw at Lamouine, Turel & Co.'s, last week, that weighed 135 pound dressed, one is reported killed at Healdsburg weighing 128 pounds.

Last week the Union Hill Sportsmen's Club, of Grase Valley, held a trap shooting tournament at Glenbrook. Five pigeons were used, and many good scores made.

At the regular meeting of the Gilroy Rod and Gun Club on the 11th, on motion it was decided to withdraw from the State Sportsmen's Association. It would be impertinent in us to make any particular comment on this action of the Gilroy Club. What we may not condemn, however, we may be permitted to regret, and such action we do regret sincerely. It will be strange if the club itself does not come hereafter to regret it also. Without a union of all the clubs, under the leadership of the State Association, little or nothing can be done by the press in obtaining good laws or punishing bad men. In seeking amendments to our existing laws from the next Legislature for the benefit of all, it will be in order now to ignore the wants of the Gilroy people, and by themselves they can do nothing in that direction. We doubt the sincerity of the member, as a true sportsman, who advised such a step and we deplore the action of the club in taking it. It is a bad business all round. Let the example be followed by other interior clubs, and then there will be a general rejoicing in the vagabond army of poachers all over the State, whose rascalities are measurably checked at present by the State Association prosecutions, that will give us the true conditions of things and open the eyes of the most skeptical. If any good is to be done, the subordinate clubs must have a representative with whom and the press there must be perfect harmony and action. That's all.

A Portland, Oregon, correspondent of the American Field writes to that paper: "I was out through the Willamette Valley a couple of weeks ago, and the prospect for grouse, pheasants and quail was never better. The farmers all say they never before saw so many young birds. It is my opinion that we shall have better sport this year than any previous year." We have often commended the people and sportsmen of Oregon and Washington Territory for the care they take of their game. This is the result—abundance for all. We, in California, can have the same, if we will be equally wise.

The Eastern woodcock season opened on 1st inst. Upon the whole, it has been successful; the birds being numerous and in good condition. A feature of the season was that old haunts were found abandoned and new ones discovered. On the moors of England, where the bird is only found, the same thing often occurs. It is only a question of food, which is governed at times by very slight causes.

The pigeon Baby Mine, liberated in Atlanta, Ga., June 20th, arrived in the loft of E. H. Conover, its owner, at Keyport, at half-past 5 P. M., July 1st, in an almost unwaried condition from its 725 miles record, being the second to have a record for that distance.

At Sacramento.

On Sunday last there was a clay pigeon tournament at Agricultural Park, Sacramento. The principal match was at 25 birds each, \$5 entrance, the purse being divided into five purses; The shooting was good. The score: Klug, 23; Parrott, 22; Watson, 22; Weeks, 21; Pedlar, 21; Todd, 19; Chapman, 17; Stevens, 16; Tebbetts, 16.

Comparative Shooting.

The last mail brings us the record of the third competition for the Victoria Cup, No. 2, Australia. The shooting in some cases, considering the distance, was good, but in no case, at the same distances, better than our own. Speaking of the match a local paper said:

"The usual weekly meeting of the Melbourne Gun Club was held at the Club grounds, Brighton Park, on Saturday afternoon last, the principal event being the third competition for the Victoria Cup, No. 2, which must be won twice before becoming the property of a member. Messrs. W. Sayers and Norman Wilson have each a "leg in" for the cup, but neither gentleman was present upon the occasion under notice. Mr. L. Clarke and Mr. W. D. Clarke tied, each killing their nine consecutive birds. In shooting off Mr. L. Clarke killed his first and Mr. W. D. Clarke missed, so that the former was adjudged the winner of the Cup, an arrangement having been previously made to divide the £1 optional sweep. The following are the results of Saturday's shooting:—

VICTORIA CUP, NO. 2—THIRD COMPETITION.

Table with 2 columns: Name and Score. Includes Mr. L. Clarke (31 yds), Mr. W. D. Clarke (30 yds), Mr. G. Peppin (30 yds), Mr. P. Laws (21 yds), Mr. W. Williams (28 yds), Mr. A. Frew (27 yds), Mr. J. Stephenson (28 yds).

TIES.

Table with 2 columns: Name and Score. Includes Mr. L. Clarke (31 yds), Mr. W. D. Clarke (30 yds).

Mr. L. Clarke also won the two £1 sweeps which followed, in a style that shows he is quite a trap-fiend.

THE RIFLE.

Shell Mound.

The event most discussed during the week was the 100-shot match of the Fifth Infantry Battalion, 200-yards off-hand, instigated by its commanding officer, Lieutenant-Colonel Ranlett, which took place on Sunday last, at Shell Mound. The match has distinctive features in two ways. In one way it shows what enterprise in a commander and practice in his corps will do. In the other it shows the wonderful capacity of California's sharpshooters at the target. We have occasion, as a people, to feel proud of the result of the match on Sunday, for it places California at the head of the world's record, and yet the total, 1,810 out of a possible 2,000, grand as it is, was not quite up to the figure we named. While Lieut. Fred Kuhnle and Sergeant Hovey excelled all their previous scores by making 460 and 456 out of a possible 500 respectively, Lieut. I. S. Kellogg, Jr., and Sergeant Nick Williams both fell below their records by a united total of some twelve or fourteen points. On these calculations, based on the excellent shooting recently, by Kellogg and Williams, we placed the total for the staff team on Sunday at 1,820. However, so little disturbs the eye and nerve in a match like this, that we gladly accept the result as it stands, for the 1,810 is not only the best score in the world under the conditions, but it beats the score of four of the "Big Six," made at Shell Mound on the 5th instant, by 28 points, quite a respectable beating, too, for such men with the rifle as the "Big Six" are known to be. Hence, to-day the staff are the crack team of the State at 200 yards, and

as the foundation of the honor has only recently been laid by sterling enterprise in the commander, and punctual practice by the corps, both Col. Ranlett and the Fifth Battalion have every reason to be proud of the honor.

So much for the winning team. Now for a few words on the losing team selected from men of Company A. The match in question was to have been shot on the previous Sunday, and was not officially postponed, only so far as related to the shooting of the staff team owing to the absence of Lieut. Fred Kuhnle. The team of Company A were on the ground and all fired under the regulation conditions. Owing to the unfortunate accident that happened to private Macdougald on Sunday, by which he only fired twenty shots out of 100, and the ill condition of private Waltham, which reduced his score, we think Company A's team ought to be credited with the score of the previous week published in our columns, which of course, is much higher than the one made last Sunday, which we publish in this issue. The score we refer to, and which, in our opinion, ought to be given in detail again, but we give the gross numbers:

Table with 2 columns: Name and Score. Includes Waltham (446), Moore (435), Macdonald (435), Pierce (434), Total (1,750).

Which gives a percentage of 88 2/3 against 90 1/2 for the staff team last Sunday. Allowing for the disadvantages mentioned the total of both teams, 3,113, with a percentage of 88.35 is quite respectable, but then it is not as good as both teams have done. The score of the two teams last Sunday:

Table with 2 columns: Name and Score. Includes Kuhnle (547), Hovey (545), Kellogg (444), Williams (445), Total (444).

Table with 2 columns: Name and Score. Includes Kellogg (444), Williams (445), Total (444).

Table with 2 columns: Name and Score. Includes Williams (445), Total (444).

Table with 2 columns: Name and Score. Includes Williams (445), Total (444).

COMPANY A. TEAM.

Table with 2 columns: Name and Score. Includes Pierce (444), Waltham (445), Total (444).

Table with 2 columns: Name and Score. Includes Waltham (445), Total (444).

Table with 2 columns: Name and Score. Includes Moore (443), Total (419).

The grand success of Kuhnle, on Sunday, is a bitter rebuke to all concerned in robbing him of the honors he won recently at the State Rifle Tournament, by giving the champion medal to one who did not, beyond question, win it. Kuhnle is alone the champion of California, and his 60 bull's-eyes out of 100 shots, and a score of 460 out of a possible 500, on Sunday, attest the fact beyond controversy. By this score, beating his previous record of 457, Lieutenant Kuhnle has been awarded the champion medal, given by Col. Ranlett. The medal will probably be made this week according to a design to be furnished by the Colonel. It will be a very handsome one. Battalion Orders No. 6, dated June 25th, 1884, call the attention of marksmen to the fact that the winner of the champion medal must be prepared to defend such champion medal on thirty days' notice from any military marksman of the Pacific Coast, who, in like manner, will be subject to a challenge for the same. Only members of the regular army, Marine Corps and the National Guards of the Pacific Coast are therefore entitled to shoot for the medal.

Major Parsons won the medal of Lieutenant Wright of Company A, last Sunday, No. 15, by a score of 124 to 108 points at 200 and 500 yards. The score:

Table with 2 columns: Name and Score. Includes Parsons (124), Wright (108), Total (108).

In reference to these matches the rule of challenges has been changed and is as follows: The original rule allowed any member of the second five in the battalion team to challenge any member of the first five, any member of the third five to challenge any member of the second, and any member of the battalion to challenge any man in the third five. The present rule allows a member of the team to challenge only the member next above him, No. 15 being open to challenge from the battalion. By this rule a marksman will go up step by step as he improves.

Major Parsons, No. 15, will probably challenge Lieutenant-Colonel Ranlett, No. 14, next Sunday, and the latter will challenge No. 13. The Colonel made a good record on Sunday, but if they shoot this match we lay a cigar on the Major.

Fine Shooting at Carson.

Ten members of the Carson Guard shooting team made the following score over their 200-yard range at Treadways Park:

Table with 2 columns: Name and Score. Includes Saffell (548), Alley (547), Laing (545), Slocomb (544), Kennedy (544), Heritage (544), Thaxter (543), Cheney (543), Cowing (542), Borges (542), Total (442).

In this connection we again ask what has been done, or what is likely to be done, about selecting the California team to shoot for the Inter-State Trophy? Nevada won it last time, and has the right thereby to name the place, if not the day, of the next match. Suppose from negligence or indifference on the part of the California authorities, the Nevada men find they have to suit their own convenience, name a day, and shoot according to regulation? Then the trophy goes by default for this year sees the deciding contest. In our opinion it is the duty of Colonel Charles Soutag, Inspector-General of Rifle Practice, to select the team, but he is on the Governor's staff and is reported to take no interest in rifle shooting generally, or in the team matter particularly. The public of California, however, will be very indignant if the trophy is lost from negligence. Somebody will get into trouble about this team matter if it is not speedily arranged.

The New Winchester Rifle.

Mr. Allen has on exhibition at his gun store, 416 Market street, a splendid specimen of this gun which is well worthy the attention of the connoisseur in rifles. In mechanism it is perfect and beautiful to look at. The barrel is 28 inches long and the whole weight of the gun 10 1/2 pounds. The magazine carries twelve cartridges. The shell is 1 1/2 inch long, and presents the principal improvement of the new gun. It tapers slightly to the end, and while its length is sufficient to keep it from turning end over end, it is free from all the recoil of the bottle-nosed shells. The price is only the same as older guns. The Winchester Arms' Company are always inventing something new to keep ahead of their competitors, and their last improvement seems to make their Winchester rifle perfect. We recommend our readers to inspect their last production.

Personal.

We had much pleasure in receiving a visit during the week from Col. W. Milton Farrow, of Springfield, Mass., who ranks as one of the leading riflemen of the Eastern States. Col. Farrow is on a visit to some relatives in this city, and will remain about a fortnight with us. He intends to be present at the Schuetzen Tournament, to-morrow week, so the local cracks had better be prepared to do something very good, or the first prize is likely to go East. We guess Jacoby, Kuhls, Stanton, Strecker, Freese and other leaders will sustain the honor of the State. We are sure, however, the California Schuetzen Club, and all other of our rifle organizations, will give Colonel Farrow the welcome due to one of his prominence and standing in the brotherhood. We hope to see the Colonel as often as he can conveniently call upon us.

We shall next week publish the Creedmoor rules which we have just received from New York. It will then be seen there is no such rule as claimed by those who gave Linville the champion medal, which justifies their decision.

The Eintracht Rifles.

On Sunday this club had a practice shoot at Schuetzen Park, but the number out was small. The score:

Table with 2 columns: Name and Score. Includes Lieut. F. Kuhls (399), Klutz (370), Gumbel (367), Len (317), Kruger (245).

The father of Lilian Smith, our wonderful girl rifle shot, is again after Carver, Bogardus and Stubbs for a match with his phenomenal child. He gives a great latitude in his last defiant challenge, but we believe that Lilly can do all he claims for her.

Another Good Score.

By the kindness of Mr. P. Jacoby we were furnished with the score of H. C. Smith, made at Schuetzen Park, Alameda, on the 13th inst. We regret our rifle department was filled up before we received the score last week.

Table with 2 columns: Name and Score. Includes H. C. Smith (2223), Total (413).

The Schuetzen Club.

We shall have something pleasant to say next week about the prize tournament on 3d and 4th of August of this distinguished body of riflemen, when it will do them most. In the meantime we call attention to their advertisement in another column.

# THE Breeder and Sportsman.

PUBLISHED WEEKLY BY THE  
BREEDER AND SPORTSMAN PUBLISHING CO.

THE TURF AND SPORTING AUTHORITY OF THE  
PACIFIC COAST.

OFFICE, 508 MONTGOMERY STREET  
P. O. Box 2603

Five dollars a year; three dollars for six months; one dollar and a half for three months. Strictly in advance

MAKE ALL CHECKS, MONEY ORDERS, ETC., PAYABLE TO ORDER OF BREEDER AND SPORTSMAN PUBLISHING CO.

Money should be sent by postal order, draft or by registered letter, addressed to the "Breeder and Sportsman Publishing Company, San Francisco, Cal."

Communications must be accompanied by the writer's name and address, not necessarily for publication, but as a private guarantee of good faith

JOSEPH CAIRN SIMPSON, - - - EDITOR

## NEW YORK AGENCY.

Mr. C. C. Pettus at the office of the "Sportsman," 46 Murray Street, is duly authorized special representative of the BREEDER AND SPORTSMAN in New York to receive subscriptions and arrange advertising contracts.

## SACRAMENTO AGENCY.

Residents of Sacramento and vicinity, desiring to subscribe or advertise in the BREEDER AND SPORTSMAN, can do so through our agent, Mr. M. J. Henley, Russ House, 1,009 J street.

## ADVERTISING RATES.

Displayed, \$1.50 per inch each insertion or pro rata for less space. Reading Notices set in brier type and having no foot marks, 30 cents per line each insertion. Lines will average ten words. A discount of 10 per cent will be allowed on 3 months, 20 per cent on 6 months and 30 per cent on 12 months contracts. No extra rate charged for cuts or cutting of column rules. No reading notice taken for less than 60 cents each insertion.

San Francisco, - - Saturday, July 26, 1884.

## Dates Claimed.

Bay District, San Francisco (Fall Meeting), August 2d, 5th, 7th, and 9th.

Santa Cruz Fair Association, Santa Cruz, August 12th to 16th.

Sonoma County Agricultural Association, Santa Rosa, August 18th to 23d.

Sonoma and Marin District Association, Petaluma, August 25th to 30th.

Thirteenth District, Marysville, Aug. 26th to 30th.

Golden Gate Fair, Oakland, September 1st to 6th.

Chico Fair Association, Chico, Sept. 1st to 6th.

State Fair, Sacramento, Sept. 11th to 20th.

Ninth District Fair Association, Robnerville, Sept. 23d to 26th.

San Joaquin District Fair, Stockton, September 22d to 27th.

Santa Clara District Fair, San Jose, September 29th to October 4th.

Monterey Agricultural Association, Salinas, Oct. 7th to 11th.

Fresno Fair Association, Fresno, October 7th to 11th.

Los Angeles Fair Association, Los Angeles, October 13th to 18th.

## Veterinary Education.

At a recent meeting of the Regents of the University of California, the faculty of the College of Agriculture was authorized to procure the services of Dr. de Tavel for occasional lectures on veterinary science. This is a recognition of the importance of the subject, which it is to be hoped will lead to the establishment in the near future of a class in this branch of medicine. The fine stock interest of this Coast already represents millions of dollars and is steadily increasing. The necessity of proper medical skill is apparent, and this action of the Regents of the University indicates their determination to provide for it. At the recent meeting of the Illinois State Veterinary Association a committee was appointed to prepare a bill, to be presented to the next Legislature, requiring all practicing veterinarians to provide themselves with proper certificates showing their fitness for the work of treating ailing domesticated animals, these certificates to be signed by three competent veterinarians to be appointed by the Governor. This is a blow aimed at the rights of the country cow doctors, who have as long enjoyed the privilege of dosing suffering cattle and horses without undergoing a preparatory course of study to fit themselves for the work. If the veterinary profession had done this years ago it would now have more of the confidence and respect of the general public than it ever had, for the sins of ignoramuses have been ascribed to the legitimate profession, and brought it into contempt with many. The "cow doctors" will of course claim that such a movement has only the object of securing the graduate vets a monopoly of the business, but the fact is that stock owners have an equal interest in promoting the highest order of veterinary skill. The live stock of this country is getting to be too valuable to be killed off by ignorance or to be made the subject of experimental practice. We have some skillful practitioners on this Coast, but they are few and were all educated in foreign parts. Some of them are of the non-progressive sort and adhere to methods long since obsolete with the thoroughly schooled veterinary. The profession has advanced with everything else in this world, and young blood and brains is the most certain to keep in the van of progress. The proposed lectures by Dr. de Tavel will be of benefit to the young gentlemen who attend them, by conveying hints that are valuable. In occasional

lectures only the Doctor can but treat the subjects generally, but in so doing he will expose to view the length and breadth of the field, and thus lead on to the establishment of a thorough course in the science, a consummation that will be more important to our live stock interest than most people imagine. It will be a fitting adjunct to the State educational institution.

## Grinstead as a Sire.

The fame of Santa Anita does not rest alone on its wines and brandies, its succulent pastures and its precocious equine youngsters. Grinstead looms up as a sire of racers and promisea to soon dispute the palm with all comers East or West. Grinstead was a horse of most decided quality in the turf himself, but in a few years his performances there will only figure as a supplement to his record. Gano and Grismer brought him into notice last season and the year before, but 1884 has already brought him into prominence with the season less than half expired. The stable left the ranch last Spring in bad condition, the condition of the weather having been such as to preclude any material preparation. Work was begun after the horses arrived at Covington and carried along as well as circumstances would allow, but the engagements came on in quick time and found them yet far from that form that was necessary to do justice to the colts. They started in some and forfeited in others and when the exercises began at Chicago Mr. Baldwin was on hand with the condition of the stable somewhat improved, but yet below the fine point desirable, considering the importance of the Driving Park and Washington Park Meetings and the number and quality of the other horses that contended. Under the circumstances the Santa Anita representatives did well. At Covington the get of Grinstead started six times and were placed four times; at Chicago they started sixteen times and secured ten places. Up to the close at Chicago, July 14th, they had won \$15,625, distributed as follows:

Fallen Leaf, 3, dam Mollie McCarthy	\$4,715
Verano, 2, dam Jennie D., by Glenelg	6,640
Mission Belle, 2, dam Josie C., by Leamington	3,370
Volanthe, 2, dam Sister Anne, by Glenelg	400
Savanna, 3, dam Josie C., by Leamington	300
Gano, 4, dam Santa Anita, by Virgil	200
Total	\$15,625

The stable proceeded from that point to Saratoga where the racing has been in progress this week. No details have been received, but it is intimated in the Associated Press dispatches that Volanthe won the Flash Stakes last Tuesday, adding another credit to Grinstead's account. Fallen Leaf, unquestionably one of the best, if not the greatest three-year-old of the year, is reported to have a bowed tendon and it is doubtful if she ever comes to the post again. But this is rumor and may be an exaggeration. If she drops out it will affect Grinstead's record unfavorably for this year, but he is thirteen years old, in his prime, and has time enough before him to achieve a full measure of greatness.

## Coney Island Stakes.

In the advertising department will be found the notice of the Coney Island Jockey Club inviting entries to their June stakes for 1885-6. The stakes for 1885 are the Foam and Surf Stakes, both for two-year-olds, foals of 1883. The Foam is a sweepstakes of \$25 each p. p. with \$1,000 added, five furlongs; the Surf with the same conditions except that the winner of the Foam Stakes is penalized seven pounds. The stakes for 1886 are the Mermaid for three-year-old fillies, foals of 1883, at \$100 each, half forfeit, and only \$20 if declared before July 1st, 1885, with \$1,250 added; one mile and an eighth. The Tidal, for all three-year-olds, at \$100 each, half forfeit, or only \$20 if declared before July 1st, 1885, with \$2,500 added; one mile. The Coney Island Derby, with same conditions, one mile and a half. These are all rich stakes, and yearlings with such engagements are well placed upon the turf. The entries close August 15th, with the Secretary, J. G. K. Lawrence, N.E. corner Fifth avenue and Twenty-second street, New York.

## Latonia Fall Meeting.

In addition to the regular stakes of the Latonia Jockey Club for the Fall meeting this year, a series of extras for the especial benefit of beaten horses. They are the Maiden Stakes for two-year-olds that have not won prior to August 1st, with penalties for those having run second. The Tobacco Stakes for three-year-olds that have not won prior to August 1st. The Merchant Stakes for all ages, with penalties for previous winnings this year; one mile and an eighth, and the Cincinnati Hotel Stakes with same conditions; two miles and an eighth. The details of the stakes will be found in the advertising column. Closing day, August 1st, with the Secretary, E. D. Lawrence, Covington, Ky.

## At the Tricks.

George Saunders, whose "Confessions" ran in serial form for some weeks in the *Breeders Gazette* last Winter, is evidently making data for a second volume. The New York *Spirit's* correspondent, in describing the Chicago Trotting Meeting, says:

The 2:17 class developed a job which was promptly defeated by the judges. The supposed-to-be unimpeachable Saunders, driving for an owner whose instructions are to win, and who has frequently complained of combinations, was discovered trying to give the race away to Fanny Witherspoon. Perhaps this explains some of the apposed combinations in which Mr. Gordon's horses were defeated. First heat, Witherspoon made a bad break, and Edwin Thorne was allowed to win, in 2:33. Second heat, Thorne led to the half, in 1:13, but Witherspoon closed with him in the stretch and made a dead heat, in 2:23. The contestants of the previous heat made the fight in third heat, going almost side by side to the half, in 1:11, and so on to the finish, when Witherspoon spurred and won by a neck. Time, 2:22. The others wayback. Fourth heat, Thorne was wisely laid up, and Phyllis went for Witherspoon, but the latter won easily, in 2:25. Fifth heat, Clemmie G. came out fresh, and, after Witherspoon made a bad break at the half, Saunders sent his big mare for the heat, but Phyllis made her show up what stuff she was made of, Clemmie G. winning by a neck, in 2:21. Now, old man Wagner, who proved a thorn in the side of the conspirators last season, had to take his mare to the stable for not winning a heat in five, and Clemmie G. easily led into the homestretch of the sixth heat. Then Witherspoon passed her, but made a break very near the wire, and Clemmie G. had to take the heat, in 2:27. "Now for sure money," and a tripartite agreement appeared to have been formed, for Witherspoon was allowed to go to the half at a little better than a 2:40 gait the seventh heat. A show of racing was made coming home, but Witherspoon was permitted to finish first, in 2:31. The judges, however, were equal to the emergency, and, casting aside the usual fear of the high and mighty men in the sulky, called the heat "no heat," and administered a cation to George Saunders, who appeared to have the better horse, that if he did not let Clemmie G. win, he would be visited with the full penalty provided by the rules. The eighth heat condemned him, but proved the justice of the judges' conclusions. Witherspoon broke badly after passing the first turn; then Thorne tried to win the heat, but Clemmie G. gave chase, and forced Thorne off his feet within a short distance of the wire, winning the heat and race by a neck.

## Sunny Slope Colts Sold.

The following is the result of the auction sale of colts from Sunny Slope, held at Chicago on the 11th and 12th:

1. Bay stallion, 2 years, by Sultan, dam by The Moor—Armstrong & Co.	\$465
2. Bay stallion, 2, by Sultan, dam Atalanta, by The Moor—same.	475
3. Bay stallion, 2, by Sultan, dam Minnehaha, by Bald Chief—Wm. Emmett.	1,500
4. Gray filly, 2, by Sultan, dam by The Moor—Wm. Emmett.	450
5. Bay filly, 2, by Sultan, dam Bellevue Maid, by Peck's Idol—Wm. Emmett.	400
6. Brown filly, 2, by Sultan, dam said to be by Chieftain—J. Wilkes Ford.	375
7. Black filly, 2, by Sultan, dam Gulgare, by The Moor—Wm. Emmett.	505
8. Bay filly, 2, by Sultan, dam Peg Woffington, by Spencelation—Rich & Lakeland.	1,600
9. Black filly, 2, by Del Sur, dam Vastbi, by Mambrino Patchen—Jno. R. Graham.	1,475
10. Bay gelding, 2, by Sultan, dam Gertrude, by The Moor—Herdic.	500
11. Bay gelding, 2, by Sultan, dam by Ecco—Wm. Emmett.	350
12. Sorrel gelding, 4, by Del Sur, dam Sunny Slope Belle, by The Moor—Wm. Emmett.	1,500

There is a current disposition on the part of American turfmen to give over their English campaigning and run their horses at home. The current issue of the New York *Spirit* says:

Mr. P. Lorillard may be said to have practically abandoned his venture on the English turf, as his agent, Mr. Bishop, left last week for England, and will, upon his return, bring with him such of Mr. Lorillard's horses now in Tom Cannon's hands, that are not sold or claimed in races. Mr. Lorillard finds there is now a very different state of affairs from that existing in 1873, when he sent Parole and Uncas as an advance guard. Now there is quite as much racing here as he needs, and those in Cannon's hands have turned out a very bad lot. He may send over a few, if they race to please him, but no untried ones. Apropos of Americans racing in England, it seems that our future will depend upon Mr. A. J. Cassatt. That gentleman has several of his colts, now two-year-olds, engaged in the Epsom Derby, among them Brookwood. They are so fine a lot that already there is a great deal of conjecture as to whether or not the "tri-color" will be seen in England next season. It is insinuated, rather than stated, that should the colts show first-class form, "Mr. Kello" may send over a contingent, and Jacob Pincus, it is hinted, may be the trainer.

Parole has at last been retired from the turf, after campaigning nine seasons, during which he ran 126 races, won 59, and \$81,884.25. The old horse is not really broken down, but his trainer says he is lame, and thinks it needless to go on with him. The career of this splendid old horse surpasses those of Caller Ou and Fisherman, and rivals that of Boaton. He began in 1875, and was the best two-year-old of his year. Indeed, Parole was probably the best two-year-old performer ever seen in this country, with the exception of Sensation. It has been the custom of most writers to disparage Parole, but with the late Mr. Foster, we were from the first his warm admirer. Whether or not he was strictly first-class is a matter of opinion, but from the day he came upon the turf he has defeated the first-raters of each season. Ten Broeck, Tom Ochiltree, Monitor, Eole, in America, and Isomy, in England, have all struck their colors to him, and he is perhaps the most popular race-horse America has ever known, and never made his appearance without a reception from the stand.

"Broadchren" on the two-year-olds; The Quickstep Stakes brought to the fore another California juvenile wonder. Although the distance was only half a mile, and twenty starters were bracketed, Mission Belle was backed heavily by her owner and others, apparently not caring how she got off in such a short spiu. She didn't get off in front, nor yet at the tail end, but before they had gone forty yards she flew past everything in front of her, and won in the extraordinary fast time of 49 seconds. She is another of the Grinstead get, and is formed something on the quarter-horse pattern. Baldwin has got three wonders in Verano, Volanthe and Mission Belle. There is no stable in the country that can boast of such a trio of two-year-olds.

Gossip about Westmont.

[Chicago Correspondence N. Y. Spirit.]

The sensation of the meeting and of the year was the marvelous and as yet unapproachable performance of the pacer, Westmont. The performance has been the all-absorbing theme since among turfmen, causing no little discussion among them as to the merit attaching to the performance of either a trotting or pacing horse hitched with running mate. We find, as might be expected among envious and jealous horsemen, a disposition to give little or no credit to Westmont for his wonderful exhibition of speed and staying qualities; to me it was really a revelation. Only think of it—a mile in two minutes; he will certainly accomplish it. I consider the horse entitled to recognition as the wonder of the turf, and the king of pacers so far shown to the public. There are two or three dark ones yet to be unveiled, but at present Westmont is to the fore.

Your numerous readers I hear exclaim, "Upon what grounds do you base so broad a proposition, when you know a horse is dragged over a distance of ground?" In answering I will ask this question: "Do you believe that there is a horse living that can pull a skelton wagon a mile in two minutes?" You hesitate; well, concede that there is, but I do not believe it. I will now ask you one more question: "Do you believe that, added to the resistance of a wagon, a horse can drag another in the breaching a mile in two minutes?" Anticipating the answer I will comment no farther, but shall be pleased to hear those holding different views through *The Spirit*.

Meeting Johnny Murphy, I put this question:

"John, do you believe any horse can pull a wagon a full mile in two minutes?" Hesitatingly he answered, "Yes."

"Do you believe, added to the resistance of the wagon, that he could literally drag a trotter or pacer in same time?" He quickly replied, "No."

"Then it follows, as a matter of course, that in the performance of Westmont and mate, that Westmont, for a good portion of his mile, went up to the bit and shared the burden of the wagon?" His answer was, "Yes."

I then referred to Frank and his mate, and learned from him that he had been badly handicapped in his race against Winship, as his horse, formerly reliable, has become unsteady, caused by bad handling at Jerome Park this season. I then remarked to Murphy that I have given some thought to the matter of double team trotting and it seems to me that Little Frank and Winship should be able to wipe out all double team records. Murphy said he agreed with me, and would like to see them hitched together.

Meeting to-day upon the club-house veranda a gentleman whose opinion of turf affairs is second to no man in America—Mr. Henry Graves—I asked him his views on the running to wagon question. He was most emphatic in his expression that he did not believe a horse could be produced that could pull a wagon weighing 100 lbs., driver and weights up, in 2:00 (Campbell's wagon, without pole, weighed 78 lbs.; with pole would approximate 100 lbs.) Said he, "I offered to bet \$50, and did put up the money, that Firebrand could not do it." The party who proposed to bet him \$50 came back from a journey to Campbell's stable, and said he would not run the horse for less than \$200. Mr. Graves replied he did not want to bet at all, but he would give up his \$50 to see a horse do it. Friend Taylor, the harness maker, broke in with, "Why, all down the backstretch Westmont had his head to the front. The performance was wonderful."

It is an old axiom of the turf that "it is speed that kills." Then, for a moment, think of calling upon a pacer that has not shown a mile better than 2:12 (which Westmont has shown in private), this season, to go a mile in 2:00 and share, which he did, for a good part of a mile, the resistance of a wagon. Will you not now admit that it was a marvellous performance? Why, coming home, before the pacing wonder broke, did not you all see Campbell making free use of the whip upon the runner? Had he run strong and free up the home-stretch I believe Westmont would have finished his mile, without a break, in better time than 2:00.

Let us now refer to the performance of the nonpariel Jay-Eye-See. He was accompanied by a running horse in a sulky, driven by the skillful Splan. He went to the quarter in 31½ seconds. "Too fast!" the experienced turfman exclaims. At the half in 1:03½. "Too fast!" He cannot come home; "his speed that kills;" right. Into the homestretch he slackens his flight; he comes home game and fast, too; but 2:11½ verifies the old adage—"A slow quarter for a fast mile." But did you keep one eye on the racehorse coming home? He was the quitter in the race, and had a full benefit of Splan's whip. So we find it takes a good horse to pull even a sulky a mile in 2:11½.

Now, will you not admit 2:01½ the marvel of the nineteenth century? Think of the strain in the motive forces and respiratory organs. If beaten in the nineteenth century, will it be by Westmont, Gnrgle, or Johnston? Many remarked he made a great performance, but 2:15½ is as fast as he can pace to harness. Did he not beat Richball, Fuller, etc., in the free-for-all? How do you know that to be a limit of his speed?

Meeting Mr. Johnson, who sold him, I asked: "How fast can Westmont pace, for blood, in single harness? You once told me he could pace in 2:12." Mr. Johnson replied:

"When the sale was first mentioned I was offered \$15,000 for what he had already shown. I refused, telling Mr. Hill he could have the gelding for \$20,000, and I would show him 2:12. The next morning Mr. Hill came around and said he would take Westmont if I would show 2:12. I replied as I felt, 'I don't care to sell for \$20,000; if I do I will not be ready for several days, after his fast work, to show a mile.' I finally told him I would show at any time. Mr. Hill then replied, 'You need not show him up, I will take him anyhow.'"

Mr. Johnson further stated that Westmont could pace a mile, good day and track, in 2:11 or better.

Westmont is a chestnut sorrel, 15½ hands. No race-horse carries a more bloodlike head, and his limbs are in the catgut and steel mould of the high bred race-horse. His general appearance is that of a well bred and highly formed trotter, not in the generally accepted form of the pacer, not unlike, in this respect, Johnston and Gnrgle. He was sired by, all things considered, a horse that I think the equal of, if not the peer, any trotting bred stallion that ever lived, the dead Almont. Meeting Col. John W. Conley, he remarked to me, "I purchased the dam of Westmont in Virginia. She was a chestnut sorrel, sired by Cottrill Morgan, out of a thoroughbred mare, and I sold her to Col. West. I then remembered her, and was also painfully reminded of a beautiful filly that I saw at Edge Hill out of her, by Dictator, that I greatly fancied and foolishly did not buy."

YACHTING.

The sloop Lively, lately of Stockton, has again changed hands and will soon belong as of old to the local fleet. We rejoice in the fact that small yachts are again coming into favor. We can recollect, and not many years back either, when every Saturday afternoon and Sunday that the bay was alive with small yachts and pleasure boats, sailed mostly by young men who were commencing sailing.

These amateurs as they grew more expert and became older naturally drifted into larger vessels, which was as it should be, but seemingly left no one to follow them in the small craft. Sailing and nautical experience generally cannot be learnt in a moment and the hardest place to learn is aboard a large vessel, which the tyro is contemptuously referred to as a "Greek" and finds out as best he may the reason for anything being done; whereas, on the other hand, on a small boat, if the novice has some of his friends to sail the boat, he can ask questions and receive answers which he can comprehend and before long he is able to take the tiller himself, which latter is very properly would not be allowed to do on board a large yacht.

Yachting is like any other study; to learn it properly one must commence at the beginning and not at the end. It would be ridiculous to teach a child mathematics by jumping him at once, say at the multiplication table, and allowing him to flounder round there until he got some indistinct idea of the meaning, before he learnt the alphabet, and the same reason applies to boating matters. So our advice to young men desiring to become proficient yachtsmen is to learn first of all to manage a small plunger, the simplest rig there is, and when fully confident that he thoroughly understands that, to go up a peg and so on and in a few seasons, with any kind of application, he will be able to handle any reasonably large vessel with perfect safety.

The Enid is hauled out on the beach near the Presidio and propped up. She is being changed from a yawl back into a sloop. She was the pioneer of the yawl rig on this Coast, and although but a very small vessel excited criticism sufficient to induce others to build yachts after that rig, with, according to the owners' side of the question, great success. The Enid is the first vessel in these waters to be transformed to her original rig after once having a driver. Extensive repairs, inside and out, are contemplated, and if everything is carried out as arranged she will hardly be recognized by those who knew the boat in early times.

The wind last Saturday, about sundown, fell very light, several of the yachts started up the bay, but after passing Point Blunt ran into a calm belt and were unable to proceed farther. The Rambler endeavored to go back to Sausalito but could only get about half way between there and the island, where she was compelled to anchor all night.

We are in receipt of the American Yacht Register for the season of 1884. This book is published in New York, and contains a full list of all the yachts belonging to yacht clubs in the United States with their dimensions and the name of the owner and the club to which they belong. Any one interested in yachting can find very interesting statistics in this book.

The habit of keeping horse on board the yachts at Sausalito seems to be coming rapidly into fashion. Mr. Lee, of the Whitewing, was, we think, the first to inaugurate this, and he enjoyed it so that he has been followed by the Rambler, Frolic and Eva, the two latter having ladies on board.

The 40-foot schooner, built by Stone, which has already changed hands since being in frame, still remains on the ways with her spars and iron work all completed. It is to be regretted that she is not finished and put in the water, as lying there exposed to wind and weather will hardly improve her any.

The yachtsmen seem to be satisfied with their exertions on the Napa and Santa Cruz trips on the Fourth, and to take more pleasure in talking over their achievements than than to act now, so in consequence there is very little to report this week in yachting circles.

The model of the Carmelita, Mr. Coleman's new yacht, has excited a good deal of talk among our local scribes, but as there seems to be little probability of her appearing in these waters for some time yet, we will withhold our ideas until her arrival.

The Spray came off Stone's ways last week cleaned and painted. She went to Vallejo last Saturday and returned the following day. Enjoyable weather was experienced on both trips. She will be kept for the balance of the season at Sausalito.

The sloop Nellie, since she was made into a mule, by having a cross between a centreboard and the keel attached to her bottom, if not used much. She was a much better boat with a centreboard.

On Saturday night a dance was arranged by Commodore Harrison at the San Francisco Yacht Club House, to which there was a goodly attendance, both from the yachts and from Sausalito.

Pacific Y. C. Ocean Race.

San Francisco yachtsmen have made a departure from the usual routine of bay cruises, and on July 5th the Pacific Y. C. turned out for an ocean race. There was plenty of variety—light winds, calms, and at last a tearing breeze with rough water accompaniment, making lively work and an exciting finish.

The fleet was ready early in the morning, but there was very little wind, what there was being from S. E. A large number of spectators were present at Santa Cruz to witness the start, which took place at 10 A. M., Annie crossing at 10:17, Nellie 10:21, Lurline 10:24, Fleur de Lis 10:25, Aggie 10:27. Besides the racers were Casco, Nautiline, Lady Mine and Clara to witness the race.

Fleur de Lis started for Monterey, carrying a breeze for some two miles, when it left her becalmed, the others who had gone further off shore in search of wind, being in a like predicament. When the wind did come, it was from northwest, Annie catching it first and the others a little later, all but Fleur de Lis, which lay way astern until 11:50, when a breeze found her, and away she went with all drawing to catch the leaders, only Aggie being within sight of her.

Running on to the stakeboat, the Lurline turned first, then Nellie, Lady Mine, Aggie, Annie, all passing Fleur de Lis going one way as they went the other, the leader being ten miles ahead of her.

For a time the wind was light, with calms at intervals, but Fleur de Lis still held on, overhauling the others, and at

passing Aggie, the latter withdrew soon after for no apparent reason. After the tempers of the yachtsmen had been thoroughly tried by calms and catspaws, old Eolus released and sent them wind enough in a lump for two or three good races in the shape of a blow from the west, soon rolling up an ugly sea.

Annie lost her jib at once, and ran into smoother water to set matters right, while the others quickly reefed down. Now was Fleur de Lis' chance, and she was driven through in a way that soon put Annie under her lee, and finally placed her less than a minute behind Lurline at the finish, the full time being:

Table with 4 columns: Name, Start, Finish, Actual, Corrected. Rows include Lurline, Fleur de Lis, Nellie, and Annie.

The prizes, which are of silver, were awarded: First to Lurline, second to Fleur de Lis, third to Nellie, and fourth to Annie. In the evening a ball was given at the Ocean House, at which the prizes were presented.—Forest and Stream.

The foregoing article from the Forest and Stream is not characterized by the spirit of fairness that generally seems to predominate in that yachting authority, but it is evidently taken from one of our dailies, the correspondent of which had evidently strong Fleur de Lis predilections.

In the first place the time of starting, when first mentioned, does not correspond with the time-table published in the same article, thus contradicting itself, and, moreover, the article says Fleur de Lis finished less than a minute behind Lurline, whereas the same table referred to showed the Lurline to finish ahead of Fleur de Lis exactly 59m. and 18s. on actual time, and 45m. and 16s. ahead of her on the corrected time. If our esteemed New York contemporary desires to see the reason why Aggie squared away for Monterey, he is respectfully referred to our issue of the 12th inst., and we beg furthermore to state that Fleur de Lis did not pass Aggie until several minutes after the latter kept off the wind, when consequently the vessels were sailing in diametrically opposite directions; under which circumstances it is not very difficult for the vessels to pass one another. We do not know why the Forest and Stream failed to publish an account of this race from San Francisco to Monterey, when Fleur de Lis did not win.

Answers to Correspondents.

Questions answered only through these columns. No replies by mail or telegraph.

Mrs. J. W. W., Linden, Cal.:

Will you please tell me what a set of tips for road work will cost, and what measurements are needed to insure the right size? 2. What is the matter with my horse? He seems all right, eats well and hearty and is full of life and energy as a horse possibly can be; but the trouble seems to be in his coat. While carefully groomed and as clean and glossy as a bird's wing, there are spots that the hair falls off and leaves the skin bare. His mane has commenced falling, and he seems determined to rub off the hide as well as the hair on his neck. There are no signs of vermin, for I have looked very carefully, and there are no fowls of any kind about the stable. I have tried all the remedies I can think of, and have heard of, and now come to you for help.

Answer—Paul Friedhofer makes fine steel tips for \$3 per set. We do not know what he charges for those made of malleable iron. Place the horse's foot on paper and draw outline with pencil. 2. In all probability mange is the trouble. The mange insect is so minute as to be invisible to the naked eye. An efficacious liniment is composed of common sulphur, 6 oz.; sperm or train oil, 1 pint; spirits of turpentine, 3 oz. Mix thoroughly and rub into the skin with flannel, or, better still, a painter's brush. Application should be made every third day for at least three or four weeks. The stall should be washed with corrosive sublimate, 1 oz.; in ethylated spirits of wine, 6 oz.; water, 1 gallon. Dissolve the sublimate in the spirit by rubbing in a mortar, then mix with the water, and use with a brush, stirring it up continually to prevent its setting.

C. A. D., Los Angeles, Cal.

Trotting race advertised under National Turf Congress Rules, 5 to enter and 3 to start; four horses entered and three started by consent of proprietors. The fourth went amiss or was sick, and was withdrawn before the race, after being duly entered. Is owner of such horse liable for entrance money?

Answer—He is liable. Associations and proprietors have a right to accept a less number of entries than the advertised conditions call for, if they so elect, and no entry is released unless they decline to so accept and declare the race off.

B. C. P., Los Angeles, Cal.

There is nothing historical in print that we know of regarding Lady Vernon, except in the racing records. She figured on the turf in the East, in 1852-3, and in California, in 1854-5. She was brought to California, in December, 1853, by Pat. Hunt.

N. S. G., Ione, Cal.

Three horses start, half mile heats, best two in three. Barney.....2 1 3 1 Body.....3 3 1 2 Emma.....1 2 2 3

What horse is entitled to second money? Answer.—Emma is entitled to second money. Rule 52 provides: "In deciding the rank of horses other than the winner as to second, third and fourth places, etc., to be assigned among such as remain in the race, entitled to be placed at the conclusion of the last heat thereof, the several positions which have been contending shall be considered as to every heat in the race."

A horse that has been placed second twice better than a horse that has been placed second only once, etc." See conclusion of Rule 52 on page 47, P. C. B. H. A. Rules.

THE KENNEL.

Recent Importations.

Mr. E. H. Myers, of Ventura, Cal., has recently imported from the kennel of J. A. Hammou, Falls City, Neb., two dogs and two bitches. One of the bitches, Belle by name, is Irish red in hood and comes of most excellent heuch and field stock, being a grand-daughter of Kate-Berkeley and Letty-Kirby. The others are cross-bred setters, combining English and Irish blood, their grandparents being Joe, Jr., Blue Daisy II., France and Russia. It will be interesting to note what success Mr. Myers has in breeding from his cross-breeds. They may prove good, but we suspect that he will be disappointed in their qualities.

## HERD AND SWINE.

### Treatment of Copious Milking Cows.

[Henry Stewart, in Rural New Yorker.]

A large development of the milk organs, with a corresponding yield of milk is very desirable in a cow; but, like all other good things, it has its drawbacks. These are the inevitable trouble before and after calving, and the danger of garget or milk fever; but these risks can always be avoided by judicious management. It is not impossible for a dairymen to get through twenty-five or thirty years' experience with cows without having any accident or trouble in anyway whatever with his cows at the most critical periods; yet some have frequent bad luck (?)—as it is termed—at such times with their best cows. I have always believed that "bad luck" should be a synonym for carelessness, neglect, and bad management, and that good or bad luck is the result of one's own carelessness or mistakes. It is especially so in regard to the management of cows, especially the heavy milkers and those which are hard to dry off, and also young heifers with their first calves, and the management of the latter should be precisely the same in principle as that of the former. The greatest trouble with heavy milkers approaching the period of calving is in reducing the flow of milk. A good deal of unnecessary trouble, however, is borrowed in this direction. It is a popular idea that it is indispensable that the cow should be dried off before she calves, chiefly for the reason that otherwise the calf will suffer. With ordinary cows there is no difficulty in this matter, because the milk secretion begins to fall almost as soon as the cow becomes pregnant, and the trouble is rather to retain the flow of milk than to lessen it. But with copious and persistent milkers, which keep on milking, the owner becomes alarmed when the time has passed at which the other cows are dry, and imagines all sorts of mischief. Now it is simply a question of adequate and nutritious feeding whether a cow can keep on milking and produce a strong, healthy calf, or not; for there is no draft whatever on the system that cannot be supplied and made up by proper food. If the food is of the right kind, and of sufficient quantity, there is no reason whatever for the owner to make any special efforts to dry the cow. Usually the milk secretion is small, varying from three to fourteen ounces of solid matter, of which a large part is fat, so that there is no special necessity for any very great change in the feeding, except to supply the needed phosphates and the nitrogen for the building up of the frame of the calf. The kind of food most required is bran, which is rich in these two elements, as indeed in all the elements of both milk and blood, which, in point of fact, consists essentially of the very same substances, and two pounds of bran would amply supply all the material required for the perfection of the fetus.

The great mischief is done by unwise efforts to dry up the cow, under the impression that some great injury will happen unless the flow of milk is stopped. I have known farmers and dairymen to bathe the udder with a solution of alum, a decoction of oak or willow bark, and even give these deleterious substances to the cow for the purpose of drying the milk. At times they succeed in arresting the flow; but they do so only by producing an attack of garget, with all its accompanying mischief. Nothing should ever be applied to the udder outwardly for such a purpose as this. If one wants to stop a stream, the flow must be arrested at the source; by damming it, the flow is simply turned in another direction, and this is precisely what is done in efforts to stop the milk by outward applications. The udder may be contracted or the contents may be absorbed, as when iodine is used; but the milk is merely thrown back into the blood with the effect of producing inflammation and congestion of the glands, and a serious injury is caused. The milk may be stopped by reducing the food, but this is injurious, because the calf may suffer instead of the milk secretion. The only way is to rely upon nature, supplying such food as is required and giving no other. Cornmeal, and especially cotton-seed meal, should be avoided; bran only should be used, and this should be given dry; and whatever milk is produced should be drawn with regularity, the udder being drained perfectly dry every time. It is not safe to leave a little milk in the udder in the hope to dry the cow. This will not do with large milkers, as it clogs the milk ducts and engorges the very small secreting lobules of the glands, which, during milking, are in active stimulation, and thus gives these very sensitive organs a severe shock, which may result in an attack of garget, or pave the way to milk fever. It is best not to make any effort whatever to check the milk secretion, but at the same time not to encourage it by the use of sloppy food; also to avoid all inflammatory tendencies by refraining from highly carbonaceous and nitrogenous food, as the oil meal, or any grain food excepting bran. The whole system should be kept loose, free and cool, if necessary, by the use of small doses of Epsom or Glauber salts, for costiveness may easily be the precursor of serious mischief. Lastly, all fanning should be avoided; the cow should not be annoyed by extra care or worrisome attentions, but having done all that is wise, and avoided all that is otherwise, the owner of the valuable animal should leave the rest to nature, which is the best physician and nurse, after all, if we do not foolishly interfere with her.

For a month before calving, the milk is not fit for food, as it contains so much saline matter as to give it a strong salty flavor. As the time of calving approaches, the milk changes in character and the udder becomes more solid; but if the milk is drawn regularly there will be little danger of harm from this last change, and the gradual alteration of the udder to its new condition will take place gradually and safely.

### Judging at Fairs.

A correspondent of the *Breeders' Gazette* makes the following suggestions, apropos at this time, about judging stock at fairs: That exhibitors have reasons to complain of unfairness on the part of the judges in their awards, is too often the case. Officers of agricultural fairs attach too little importance to the election of experts, and leave the matter to be attended to a few days before the exhibition. To secure a committee of three desirable men, whose character and integrity are above suspicion, is almost impossible. One is more or less influenced by friends, another by some stock he has bred, and another does not believe in giving all the premiums to one exhibitor, even if he deserves it.

I would, as already suggested, favor one man instead of three. Let him be well paid for his labor, and above all extend to him the courtesies due a man above the "common herd;" elevate the calling, inspire confidence in your exhibitors, and satisfy them of your desire to deal fairly with them. Three months is not too soon to look after your committee and make a success of your fair. It is to be

a public educator, a place where the novice can gain information he could not practically get elsewhere. Enjoin on experts the necessity, in judging animals, of laying stress on types. All thoroughbred should be typical. Let them, with care, separate beef-producing animals from those bred for the dairy, as we cannot with success breed animals to subserve both purposes.

Already in the West some would-be breeders claim the Jersey a good beef producer, and, of course, would have a judge on Jerseys look on them as such. Have a breeder for beef pass on beef-producing animals, a man engaged in dairymaking make the awards on milk cows, and let them look to their laurels.

A first-class expert should be able to tell at a glance which of two animals is the best, and how many points they should score. No animal ought to be awarded a first premium unless scoring ninety points, fixing eighty points for second and seventy points for third. The practice of giving first, second and third premiums to the best animals exhibited is wrong, pernicious and deceiving to the world.

A ring, sheltered from the weather, ought to be provided for the judging of animals, and an officer, whose duty should be to have the subjects to be passed on ready when called forth by the expert, should be in attendance. Experts, after the premiums have been put up, should hold themselves ready to answer any question from exhibitors, and do it with good grace, satisfying them, if possible—which is rather difficult sometimes—but I have seen a man who would not be convinced by your arguments, nevertheless profit by it, bring better stock the following year, and swear by you then. A fair of this kind ought to be a place where agriculturists generally come to verify their mistakes and improve their future labors.

### Cheese for Home Use.

[Ontario Farmers' Advocate.]

Every pound of cheese requires ten pounds of milk, and a ten-pound cheese is about as small a one as can be conveniently made. A clean tub which will hold the milk, and a boiler large enough to hold ten gallons, will be needed. A small press, which any smart boy can make, with a lever to hang a stone upon, will also be required, and then the "know how" is all the rest. Making cheese is a chemical operation, and depends greatly, like all other such work, upon temperature. One cannot be safe without a thermometer, as a rule of thumb will not be precise enough.

The first thing to do is to bring the milk to a temperature of ninety degrees. This makes a soft cheese; a higher temperature will make a hard one. The milk may be of two milkings; the evening milk set in a deep pail in the cellar, and stirred late at night and early in the morning to keep the cream from separating, and the morning milk mixed with it as it is stirred after milking. If any cream has risen on the evening's milk it may be skimmed off. The evening's milk may be warmed to one hundred degrees and then added to the fresh morning's milk, which will be about eighty degrees; the whole will then be about the right temperature, which is ninety degrees. The rennet is then added. This is a liquid made by steeping a piece of the dried stomach of a sucking calf in warm water.

For one hundred pounds of milk, or forty-five quarts, a piece of the rennet about as large as one's thumb, or two inches long by one inch wide, is put in a quart of warm water in the evening with a half tablespoonful of salt. In the morning this liquid is strained into the warmed milk in the tub and well stirred through it. The tub is then covered to keep the milk warm until the curd is formed, which will be in about half an hour. As soon as the curd is formed enough to cut a long-bladed knife is drawn through it both ways, so as to cut the mess into inch cubes. This causes the whey to separate, and when this separation has been effected, the whey is dipped out or drawn off, and the curd gathered into a mass at one side of the tub, the tub being raised at one side to cause the whey to drain off.

The tub if kept covered to retain the heat, or, if the curd has cooled considerably, the whey that has been drawn off, is heated up to 100 degrees and turned on to the curd until it is warmed through again, and the whey is then drawn off. The curd remains thus for about an hour, until it attains a very slight degree of acidity, when it is broken up fine with the hands, salted with about half an ounce of salt to the pound of curd, and put into the hoop. The hoop for a ten-pound cheese should be about eight inches in diameter and ten inches deep. It has neither top nor bottom. It is placed upon a smooth board, and the curd is pressed down into it with the hands.

When the curd is all loose a cover is placed on it, and the hoop is put under the lever, which presses down upon a block resting on the cover. Very little pressure is required, and this only until the curd has become solid enough to keep its shape; twenty-four hours in the press is quite enough, the cheese being turned twice in that time. The cheese is then taken out and the outside is rubbed with butter and wrapped in a cotton bandage, the edges of which are turned down on the two faces for an inch or so. The cheese is then placed in a cool room or cellar, and is turned every day for a month, after which it should be turned once a week for another month, when it is fit for use.

### Business Capacity in the Creamery.

Brains win in every department of business. The man that thinks, plans; he thinks again, and knows less than he did before; then he meditates, calculates and reduces his business to a satisfactory starting point. By thinking, comparing, planning and figuring, he has made discoveries not dreamed of before, is more confident, more resolute and means business. He knows he is right and is going ahead.

Corn is no longer king; cotton—even with its 6,000,000 bales—is entitled to that honor no more. *Grass is king*, and he who knows best how to utilize it, is the man who puts money in his purse.

Now let any man sit down and figure out what a steer, ripe for the butcher, will cost him at say four years old, then what he can realize for it on the market; then what the tillage of his land in corn, wheat or tobacco would have cost him, including harvesting and marketing; and then what he could have done with his land in grass for milk cows—properly selected and bred—and what will be discovered? Why this, that his beef has paid him better than either crop, with much less care, anxiety and labor, and that the cows have paid him three times as much.

This is no ideal sketch, no editorial fancy or dictum, it is absolute fact, as any man may see that will figure it out. Take, for illustration, the best quoted figures discovered at our fat stock shows in so far as beef is concerned, and the steer that will put on two pounds of weight per day throughout the year is an extraordinary animal. He will sell for say

six cents at the stock yards. Then take an equally good average milk cow that will make a pound of butter a day for eight months in the year, butter that is worth 25 cents per pound, and see where the difference comes in. The difference is even more striking if we willingly stretch the estimate in regard to the butter cow, for she will hold out much longer than eight months, and what is more, if selected with the same care that the steer is that will put on two pounds of flesh per day, will make much nearer a pound and a half of butter.

When farmers determine to breed their milk cows only to thoroughbred bulls we will very soon have a race of animals that will make from 24 to 32 ounces of butter per day, and, just here is where the thinking end the figuring comes in. It is brains that rules the world not numbers, the latter without the former are but led as sheep to the slaughter. —*Rural World*.

### History of Alfalfa.

Five hundred years or more before the birth of Christ, alfalfa, or lucerne, was well known and prized as a forage plant in ancient Media. The history of the discovery of its value and first cultivation is lost in the haze of bygone ages. From Media lucerne spread to Greece and to the Roman Empire. In the days of Cato, Virgil, and Varro it was among the cultivated plants, while Columella and other Roman writers on husbandry gave full directions for the cultivation of what was then held valuable as a crop for rotation with wheat and other cereals. From Rome to France and Spain, where it received the pleasantly-flowing name of alfalfa; thence it accompanied those agreeable and right gentlemen, the Spanish discoverers, to make some recompense for the evils resulting from their visits, and lend force to the adage: "Tis an ill wind that blows nobody good." In this new and congenial home it grew wild, growing luxuriantly for centuries on the plains of Buenos Ayres, until it was supposed to be a plant native to those broad pampas. At the time of the conquest it was in Mexico a staple crop. From Chili the plant was taken to California, where it passed under the name of Chili clover.

Since the live stock business of the plains has become so important an industry alfalfa has spread widely through the Western States and Territories, yet it may be truly said that it has obtained footing in areas but very limited in comparison with those it will occupy a decade later. The arid plains of Kansas, Nebraska, Colorado, and New Mexico have already given satisfactory proof of the value of this plant, and there is abundant reason for believing that by its cultivation the beef-producing capacity of the West will be quadrupled. In the higher regions of New Mexico from four to six tons of alfalfa per acre can be grown, while on the lower lands the yield is yet heavier. Stockmen estimate that ten acres of those lands, in their natural state, are required for the support of each head of cattle; it is plain that by the cultivation of alfalfa the number of cattle on those lands may be enormously increased. —*Chicago Tribune*.

### Sun and Shade.

If there is anything that makes us tired it is this everlasting-talk about shade in the pasture, just as though a cow could not stand the weather any better than a city young lady. No farmer, for instance, hesitates a moment to send his young son, not out of his teens yet, into the field along with his favorite horse to plow all day long in the hot sun. That is, they not only must stand the heat of the sun, but they must labor in it; and yet when this same farmer comes to talk about his cows they must not only be kept up to their knees in clover, but must have a cool shade to lie down in, and a pond to stand in, and all that sort of nonsense. Some of the "professors" go so far as to say the hot sun makes a cow's milk feverish. We have not the slightest hesitation in denominating all this kind of talk superlative nonsense. A cow can stand as much heat as a horse that labors or a mare that suckles her colt, or the boy that follows the plow in the hot field, or makes hay when everything is steaming. There is no reason that we can understand why a cow should not work as well as any other animal, and we all know that when she has the opportunity of shade and water she is as great a loafer as doth live, and many men complain of the loss of milk when the whole herd stands in the pond all day. They should be upon the hill feeding and earning their daily food like the other animals, and you can rest assured that the milk of cows that eat all day long, no matter how hot the sun may be, is just as good as the milk of a cow that loaf all day long. This sort of favor is a mistaken kindness, that is all. We remember once talking to a dairyman who said that his cows spent so much time in an old apple orchard he had that he was compelled to cut all the trees down to make them go out in the sun to eat. —*American Dairyman*.

The following is from the pen of Col. F. D. Curtis, in the columns of a contemporary: It is a mistake to liberally feed any animal which has a large udder, and is liable to store up a good deal of milk, before giving birth. It is liable to cause milk fever. This is especially the case with cows or sows. It is just as much a mistake to feed heavily just after giving birth. When a sow is left to follow her own instincts, she will not leave her nest for several days after the pigs are born, except to get a drink; and this is really all that she requires. For a week she should not be given any food which would increase the flow of milk. A few roots or raw potatoes, or coarse bran, would be the best. If left to herself, she would remain more quiet, and will not be so liable to die or step on her pigs. It is a feverish condition which causes a sow to destroy her young, and this is indeed by giving her concentrated food. I am trying to prevent constipation and fever by feeding my breeding sows at this time of the year twice a day on roots and raw potatoes, and also allowing them to eat as much as they will of bright clover hay. The last is a new kind of food with me; but as the hogs seem to relish it, I think it is good for them. It has the merit, also, of being cheap, and I think it will help to keep them in a healthful condition.

In a majority of cases there is good reason for the formation of the habit of kicking in cows. While there are natural kickers among cows there are more kickers which acquire their ugly distinguishing characteristic through retaliation for wrongs inflicted by the milkman or some one else who has their treatment in hand. Who can blame a cow that is worried by the dog, pounded by the hired man or swore at by the boss for defending herself with heel and horn?

There are now 1,200 cows owned in the town of Utica, Winnebago county, Wis., which gave a yearly product of \$48,000. The yield has been increased 30 per cent within a few years by improvement in stock and better keeping.

## Some Points on Pig Breeding.

The *Swine Journal* of A. C. Moore & Sons, the Poland China breeders of Canton, Illinois, gives the following items of their experiences:

We breed our sows to come in April, May and June and sometimes later, and do not raise but one litter a year from each breeder. In order to get two litters, the first one must come too early, and the second too late in the year, and both are liable to become stunted. We believe that one good litter, in the right season of the year, is worth any two litters that can be raised for breeding purposes, though in a different climate this may not be true. The Spring litter has a great advantage in the quality of milk they suckle—milk from grass-fed animals is not so rich and feverish as that from corn, but is cooling and more abundant and naturally adapted to piggy condition. Milk from feed is richer but less of it, and is more apt to cause scouring and to make pigs feverish and worrisome. The quantity being usually so much less, the pigs oftener tease the mother, and being themselves unquiet, they make the sow restive, and these frequent moves increase the liability of the pigs being laid on. Another gain for the one litter system is that the sows, after weaning their pigs, in June or July, may be turned out to grass, and require no more feed until late in the Fall, or if desired, they may be readily prepared for the next Winter's market.

As sows go sixteen weeks, with little variation, the time when pigs come is readily controlled. For many years we have tried the plan of standing the boar, and allowing the sow with him but once, and have had better success with this method than any other. If this course is followed consistently, one boar, in condition and thrift, will successfully serve two to four sows per day during the season. If he runs with the sows and serve them each from two to four times, as is often the case, the result will be he will soon "run down" and his pigs will be weaker—not so large. By standing the boar as stated, he will be capable of getting three or four times as many pigs, without being injured, as he would by promiscuous service and running together.

We breed our sows so as to have pigs come from first of April to the middle or last of May, if possible, though occasionally they come in June or July, and sometimes later, but we have only one litter a year. While the sow is preparing to grow our next litter, running on grass from July to November, her system becomes thoroughly cleansed, cooled and strengthened. Being entirely free from grain, the fluids that are in the secretions connected with maternity assume their normal condition. She is getting strength and vitality to impart to her young, which she could not do by having two or more litters a year, constantly tasked to her utmost, with no rest and no chance for recuperation. We have no doubt that many diseases are the direct result of this pressure of breeding.

The effects of in and in breeding seems to be worse in swine than with horses and cattle, for the probable reason that their lives are so very short. Such breeding would perhaps secure nearly uniform points, but at the sacrifice of health and breeding qualities—barrenness is the usual penalty. If a boar or a sow pig is thrifty and in good condition, it may copulate at eight months of age, without any risk or injury. In some cases well-developed sows may have young when between eleven and twelve years of age; but for purposes of breeding stock, I can recommend it younger.

The truth seems to be, that, if we foster any desirable point in breeding, by a long course of persistent effort, it is usually at a sacrifice of some other quality just as certainly as in mechanics we must sacrifice power to gain motion, or vice versa, and in this connection we desire to caution our customers against crossing with any other breed. The result may be seeming satisfactory for one or two crosses, but after that the decline comes, and soon you are in possession of scrub stock.

## Hints on Testing Cows.

[From "Butter Tests of Jerseys."]

There is no mystery about testing. The thing is to understand your business of dairying, or put the test into the hands of some one who does understand it. Then all becomes simple. But a few suggestions and cautions may be worth giving.

In the first place do not be in too great a hurry to test. Let your cow be ready before you start. It is well to begin gradually and cautiously "feeding up" for a test as much as ten days before you expect to commence it. Increase the food by degrees to the point you wish to reach, unless the cow shows signs of being surfeited before you attain it, in which case you had as well break off and begin again, making up your mind to test on less feed. When your cow is eating as much as you wish her to have during the test, let her have a few days for the increased ration to take effect. Then begin your test and do not increase or change her feed during the test, unless she is falling below your expectations and you are ready to experiment. I have known several excellent tests broken off by a slight change in feed.

Don't be discouraged too soon. If your cow fails on her first trial, the milk may not have been properly handled, or the cow may have been ever so little out of health or condition. Try her from time to time by churning a day's milk separately, varying her rations occasionally, till you have hit upon the proper management of the milk or the food best suited to the cow. I once had a cow whose milk required twelve hours more than the average of the herd to ripen for churning, and had to be treated accordingly.

Have a good churn, and see that it is properly handled by whoever manages it. There are many excellent churns, and a few bad ones. As a rule, all those patterns which claim to bring butter in some marvellously short time are hard to manage. You can often tell whether your churn is doing its part well by weighing in the milk or cream several successive days, and seeing whether the yield of butter in proportion to milk is satisfactory and regular. A better way is to have two patterns, and try them together or alternately. I have one churn which does well in Winter, but not in Summer.

Repeated tests are often necessary to ascertain a cow's capacity. If satisfied with one's breeding and appearance, do not reject her on the evidence of a single test. It may be an off year with her, or she may not have reached her maturity. I know of two bulls, both standing high as successful sires, but the daughters of one are in their prime at four years, while those of the other improve until they are six or seven.

Again, I sold two cows from my herd because I did not believe either would ever reach 14 lbs. One has given nearly 22 lbs. in an officially conducted test, and the other 18 lbs.

Do not wait for your cow to give a large quantity of milk before testing. Many of the best tests have been made when the cows were giving between 20 and 30 lbs. of milk daily.

As to the feed during the test, we state the practice of a

number of breeders which our readers can study and compare for themselves. No rule of general application can be laid down, as cows differ endlessly in ability to assimilate food and in preferences for one kind or another, and their tastes must be consulted and their peculiarities carefully studied in order to reach the best results.

I have generally found cooked or steamed food rather unsatisfactory, and cut hay slightly moistened preferable to uncut hay. Corn and oats are better ground quite coarse. They are quite as well digested, and the animals eat them more readily than when ground fine. Corn-field peas boiled are occasionally much relished. Wheat bran increases the milk, but, unless unusually rich in flour, seems to have little effect on the yield of butter. One sample of bran may have five times as much nutriment in it as another. That made at the large merchant mills by the new process is usually about the dearest feed a butter dairyman can buy, so thoroughly is it stripped of all valuable elements. Cottonseed meal in small quantities I have found useful, especially when there is no grass.

We often hear dairymen complain of the difficulty of securing bired men that are willing to milk. One principal cause of this is that the farmer wants the hired man to do a full day's work besides the milking, and no wonder he does not like it. Hon. Hiram Smith said once, in a convention, that he found no difficulty in getting and keeping good help. He considers that the dairy work is part of the regular day's work, and his men are contented. There is no reason why the farmer who milks from ten to thirty cows or more, should not do his milking in good season. He makes as good a profit on that part of the farm labor as on any other, and he has no right to expect the hired man will look at it in any other light.

A. B. Allen pronounces the escutcheon theory fallacious, and ignores it in selecting their stock. In selecting a good dairy cow for ourselves, he says, in doing so properly we pay attention almost entirely to the shape of her body, the size and form of the bag when full, and also empty, together with the size and zig-zag of the milk veins.

Nothing can more quickly dry up a cow than irregularity in milking, though bad treatment, change of milkers, inadequate food, etc., are also contributing causes. In the light of what cows go through with, it is strange indeed that the period of milking is not somewhat shortened in much of the dairy stock of the country.

Notwithstanding constant importations, the growth of the fine stock interests in this country is marked by a less and less proportion of foreign blood. The time will come when the headquarters for nearly all the pure breeds which our breeders are now handling will be found in America.

The pasture is an excellent place for turning breeding sows after the pigs have been taken away. They will nearly get their living from the pasture through the Summer, and will come up in Autumn healthy, strong and hungry, and hearty.

## POULTRY.

## Remedy for Chicken Cholera.

The Department of Agriculture publishes the following remedy, recommendation by Dr. Salmon, for preventing this destructive disease that annually carries off so many thousand fowls:

"For this disease a very cheap and most effective disinfectant is a solution made by adding three pounds of sulphuric acid to forty gallons of water (or one-fourth pounds of sulphuric acid to three and a half gallons of water), mixing evenly by agitating or stirring. This may be applied to small surfaces with a small watering pot, or to larger grounds with a barrel mounted on wheels and arranged like a street sprinkler. In disinfecting poultry houses the manure must be first thoroughly scraped up and removed beyond the reach of the fowls; a slight sprinkling is not sufficient, but the floors, roosts and grounds must be thoroughly saturated with the solution so that no particle of dust, however small, escapes being wet. It is impossible to thoroughly disinfect if the manure is not removed from the roosting places. Sulphuric acid is very cheap, costing at retail not more than twenty-five cents a pound; and at wholesale but five or six cents; the barrel of disinfecting solution can, therefore, be made for less than a dollar, and should be thoroughly applied. It must be remembered, too, that sulphuric acid is a dangerous drug to handle, as when undiluted it destroys clothing and cauterizes the flesh wherever it touches."

## Hens Eating Eggs.

Hens often learn to eat their eggs from eating the egg shells which are given to them with their food. They find it easy to crush the shells which are thus scattered in their way, and mayhap the taste of a portion of their contents, which is left in the fresh shells, is not the least incentive to break other eggs in the nest. If you have plenty of oyster or clam shells, or ground bone, the amount of lime in the egg shells is scarcely worth saving for your fowls, but had better be thrown into the fire to be pulverized and go out with the ashes. However, if one desire to save them, pound them fine and mix in their feed, thus avoiding all semblance of egg-eating. Perhaps all the fowls in a flock could never learn, independently, this bad trick; but there are always a few apt pupils in every school who easily learn the bad things, and they teach the rest. If you have valuable fowls which have learned the trick of egg-eating, cut off the point of the beak one-eighth of an inch and scar it over with a hot iron, and eggs will generally resist their attacks. We would put it down as one of your rules for care of poultry: Pulverize egg shells before putting them where fowls can get at them.—*Poultry World*.

It is no unusual thing to have fleas in a poultry house. Ordinary dust will not provide against them; it must be wood ash or very fine limestone gravel. Mix with it the flour of sulphur, and put it under a shed or in a corner of a poultry house, where it cannot be wetted. You will see your fowls burying themselves in it, raising their wings and throwing the dust into their feathers. This is a cure. It is supposed that the exertion of moving over and among the particles of grit is no more comfortable to the parasites than used to be a pilgrimage to a distant shrine with half a pint of pens in the boots, and they give in. Thoroughly cleanse your house; then whitewash it thoroughly.

The difference between an egg laid by a plump, healthy hen, fed with good, fresh food daily, and an egg laid by a thin, poorly fed hen, is as great as the difference between good beef and poor. A fowl fed on garbage and weak slops with very little grain of any kind, may lay eggs, to be sure, but when these eggs are broken to be used for cakes, pies, etc., they will spread in a weak, watery way over your dish, or look a milky white, instead of having a rich, slightly yellow tinge. A "rich egg" retains its shape as far as possible, and yields to the beating of the knife or spoon with more resistance, and gives you the conviction that you are really heating something thicker than water or diluted milk.

## OUR NEW YORK LETTER.

Jim Renwick's Disqualifications—Close of the Sheephead Bay June Meeting—California Horses at Chicago—General Sporting News, Etc.

It has been definitely decided that by the death of W. J. Welch, on the 20th, your famous chestnut gelding, Jim Renwick, has been disqualified from his future engagements at Monmouth Park and elsewhere. Several of these, however, were handicaps in which the big horse was nearly certain to be allotted pretty stiff weights, so perhaps the misfortune is only apparent, not real. Buchanan has the horse now at Sheephead Bay, and last week started him against the best field of sprinter that have contested any dash of the year. Such horses as Fellowplay, Strathspay, Markland, Duplex, Nimrod, Breeze and others, any one of whom can run three-quarters of a mile in 1:15 or better, composed the kind of opponents Renwick had opposed to him, and there was very heavy speculation of the result. At the finish Strathspay, (Donohue), Jim Renwick, (Spellman), and Fellowplay, (McLaughlin), were all three head and head, these three riders, the best we have, all riding like demons to get their mounts home first. Strathspay weakened slightly near home, and Fellowplay beat Renwick a short head in 1:15, Strathspay half a length away third. To-day the tenth day of the Coney Island Trotting Club's meeting was run off, and tomorrow the last day will be held. Already the hegira of the stables to Long Branch has commenced and Monmouth Park will open her gates on the 4th of July. This course, like the one at Sheephead, has been widened, leveled and improved greatly since last Winter, and is now one of the fastest in America. The approaching meeting will last through July and the greater part of August, during which over \$150,000 in stakes and purses will be given.

The stables now at or on their way to Long Branch include all the best horses in this vicinity, and on the close of Chicago's great inaugural race meeting at Washington Park some of the Western horses will be sent on. The latter great meeting opened on Saturday with great success, and some 20,000 persons swarmed the stand and lawns of the new Jockey Club grounds, baying nothing but praise for the good work shown on every side. No more elegant race grounds can be found in America than these, and the track proper, while not yet as fast as it will be made by another season, is so well constructed and so admirably drained that the water after a heavy rain absorbs so quickly as to be a very slight drawback. The racing of the opening day was most exciting, and the telegraph has doubtless informed you of the results ere this. The American Derby fell to Modesty, the Corrigan filly, though Kosciusko and Boh Cook gave a tight struggle for victory. Had the Santa Anita filly, Fallen Leaf, not been sick however, there is very little reason to doubt that the stake would have been credited to the now famous daughter of Grinstead, as she has shown her ability to gallop away from these horses when fit. Cooper will, however, make every attempt to get her round in time for Saratoga, where she is engaged in the Travers' Stakes and other rich bouts. Gano appears to have retrograded on his form of a week ago, when he beat a strong field a mile in 1:43. Lucky B., Savanna, Freda, Marie Stuart and Shenandoah have also failed to do themselves credit thus far, and it looks as if the two-year-olds in the Baldwin stable will be the only bread winners until Fallen Leaf comes round again. Verano and Volante, Missiou Belle and Rapido are, however, as promising two-year-olds as are in America to-day, and in the present open character of the two-year-olds running East, it is by no means certain that they are not the peers of any of their age. Floria, by Virgil, is the best two-year-old that has appeared East, though Wanda, Richmond and others are not far behind her in point of merit, and Triton, the winner of the Juvenile, at Jerome Park, who showed faster heats than did his sire, the great Sensation, is unfortunately *hors de combat*, by reason of sore feet. However the season is young yet, and the valuable stakes for youngsters at Monmouth Park, with their varying weights and favorable allowances, will probably bring out the reserve corps of the two-year-old divisions, many of the great stables having yet to show up their youngsters. The remarkable feature of the present racing season thus far is the more even distribution of the honors. The Dwyers and Rancocas Stables, usually a long ways ahead of the other owners in races and money, now have been compelled to be content with an occasional slice, like the great majority of turf owners. W. L. Scott's Erie Stable secured the bulk of the honors at Coney Island, a gratifying showing to the many friends of this recent accession to the turf. Mr. Scott has now at Erie, Pa., a stud farm rapidly approaching the best in the country, and his superior collection of stud native, presided over by the great French stallion, Rayon D'or, and his great liberality and enterprise in connection with the turf, has merited a just recompense. Other owners have also had a measurable share of success, and the old cry of "Lorillards and Dwyers gobbling everything" is hushed and silent. The George Lorillard stable has won but three races so far this year, and the formidable Brookdale stable of Mr. Withers but one, Appleby and Johnson but two, and so it goes. The latter's recent purchase, the Knight of Ellerslie, has been let up in his work and turned out until Fall. This is rather hard lines for these turfmen after their outlay of \$10,000 for the colt. Aella, the noted sister to Ferida, has broken down and will be bred, and other horses are under more or less suspicion as to their soundness. The reinstatement of Daly and the horse McGowan, after all the talk of the last six months, has surprised many persons. The Washington Jockey Club, after flatly refusing to reinstate them last Spring, has now done so, almost of their own volition, it seems. Probably they reason that the example has already borne good fruit, and that Daly has already been punished enough. The present season has indeed been unusually free from scandals of any sort, and people are beginning to realize that racing officials are determined to exercise "eternal vigilance." This is as it should be, for any lapse from their constant watchfulness would be sure to put in the harpies of the turf, and their rule means ruin to the sport as a national institution and pastime.

New York, June 30th.

Yours,

ROWING.

Hanlan in the Colonies.

A gentleman of this city, now on a visit to the Colonies, attended the Hanlan-Leycock exhibition, and writes as follows, under date of Sydney, June 19th:

The race was, as everyone here expected, a money-making affair, without a contest. Beach was the intended contestant by the getter-up of the race, but, by the advice of his backers, Beach positively declined to row on the Nepean, and hence Laycock was induced for a money consideration to enter into the show. Financially the show was a failure, for the promoters. Hanlan got £750, Laycock £300 and the getters up a deficit. The real object for having the race on the Nepean was in the interest of the owners of the land there. It was such a failure I doubt if it will be attempted again for a long time. It is a pretty piece of water for such races, but it is difficult to reach. Laycock has been a good man, but is used up, having a broken leg and finger. Beach is the only man here fit to row Hanlan, and the match between them is genuine and for blood, and will be won by the best men. I will send you the particulars of the race.

J. M. F.

Teemer Lowers the Record.

Meadville (Pa.) advices state that fully 30,000 people witnessed the preliminary heats in the Conneant Lake regatta, July 15th. The rowing course was perfect and weather all that could be desired. There were sixteen contestants in the single scull race, and John Teemer, the hoy sculler, who came to the front by his performance at Pullman in 1883, won after a magnificent race, in the fastest time on record, being officially reported as 20.05 while other advices give the phenomenal time of 19.38. The first heat was won by J. McKay in 21.47, Albert Hamm being second in 21.50. Second heat, Teemer first, 21.49 1/2, Jake Gaudaur second, Layberger third. Teemer won easily by three lengths. Third heat, Priddy first, 20.38 1/2; Ten Eyck second, Weiegerber third. Lee broke down halfway over the course.

The final heat was rowed in darkness, time being called at eight o'clock. The six starters pulled together to the buoy which Teemer passed in ten minutes, the positions of the others being uncertain owing to the darkness. Teemer led all the way home from the turning buoy and came in first in 20.05 (or 19.38 as yet unsettled); Gaudaur second, Hamm third, McKay fourth, Ten Eyck fifth, Priddy sixth.

An improvement in paper boats, suggested by Mr. J. A. St. John, of St. Louis, is described by that gentleman as a "peculiarly shaped stiff keelson, an idea of my own, which I think will be an advantage. Nearly all shells are not stiff enough in the backbone. Either in turning or in keeping a straight bottom, the tendency is to turn up at the ends and sink at the cockpit. The broad base will prevent the bending in the turn, and the high part will prevent doubling up."

The race between the Ariels and South Ends for \$500, the BREEDER AND SPORTSMAN'S Cup and the championship, will be rowed at Alameda, on Sunday, August 3d. To ensure against any further foul-separate courses will be flagged for the crews. The referee has not yet been selected.

Ruddock, the Boston boat-builder, says the shell he is now turning out for Teemer, will be the finest in America. It will have planking one-twentieth of an inch in thickness, the lightest yet used in the construction of a shell.

Hosmer is to have a new boat from Ruddock before he rows Teemer. The shell will be equally as valuable and as well made as the one which that celebrated builder is at present at work upon for Teemer.

THE DRAMA.

Vienna Garden.

The place so long filled by the Gypsy Band has been filled during the week by the Royal Marionettes, but not with the success we anticipated. In sterling merit they rank very high, while some of the imitations are so very clever and life-like that it is scarcely possible for even grown-up folks to realize the deception. The scenery is most excellent. It is quite a mistake to suppose the Marionettes are only fit for children. The best and most deserving feature of the exhibition is the ventriloquism of Mr. Negrirroc. When associated with the whole performance, for extent and variety it is really wonderful. The Irish song of the boy, Billy, while sitting on his knee, and the song of old Mr. Anderson, have been warmly and justly applauded all week. Still, while admitting the merit of the Royal Marionettes, as far as they go, it cannot be denied they lack vigor and variety enough to keep such audiences together as assemble at the Vienna. Last night, therefore, closed their engagement at this establishment. Next week will see an entire change of programme, a union of intellect, speciality and mirth which promise to satisfy all. With the change, we imagine, we shall again witness the old crowded house.

Vulcanized Fibre Washers.

Far superior to Leather. Warrented not affected by Oil or Grease. One set will outwear three to four sets of the best pressed Leether Washers. Ask dealers for

GREATLY REDUCED PRICE LIST,

Which is far below any Leather Washer List.

Remarks and Conditions.

All Trotting and Pacing Races, except when otherwise specified, best 3 in 5. Five to enter and three to start. To fill Running Races, five or more subscribers are necessary.  
In all races, except where otherwise expressly stated, entrance fee ten per cent. on purse, to accompany nominations.  
Purses divided at the rate of 60 per cent. for first horse, 30 per cent. for second, and ten per cent. to third.  
National Association rules to govern Trotting, and Pacific Coast Blood Horse Association to govern Running Races.  
The Board reserves the right to trot heats of any two classes alternately, or to trot or run a special race between heats. No money for a walk over. Horses entered for purses can only be drawn by consent of Judges.  
All entries to be made in writing, giving name, sex, color and marks of horses; also name and residence of owner.  
In Running Races, full colors must be worn by riders. Drivers in Trotting Races are requested to wear caps of distinct colors, to be named in their entries, as their horses will be designated upon programmes by colors worn by drivers.  
Entries to all the above Races to close with the Secretary on Friday, August 15th, 1884.  
All races in which District Horses are entered, they must have been owned in the District prior to July 1st, 1884, except when specified "free for all."  
Address all communications to  
GEORGE FLETCHER,  
Assistant Secretary,  
Hobrooke Hotel, Grass Valley, Cal.  
GEO. O. BLANCHARD, President.

LATONIA JOCKEY CLUB, Covington, Ky.

The following additional stakes for the Fall meeting are now open, to name and close August 1st:

**MAIDEN STAKES.**  
For two-year-olds that have not won prior to August 1st, of \$25 each, \$15 forfeit, with \$500 added, of which \$100 to the second and the third to save entrance; those having run second in a stake of the value of \$1,500 to carry 4 lbs. extra; winners after the closing of this stake to carry 6 lbs. extra; six furlongs.  
NOTICE.—American Racing Rules require entries to be named.

**TOBACCO STAKES.**  
For three-year-olds that have not won prior to August 1st, of \$25 each, p. p., with \$750 added by the warehousemen, dealers and buyers of Cincinnati, of which \$150 to the second horse and \$50 to the third; winners after the closing of this stake to carry 5 lbs. extra; one mile and a quarter.

**MERCHANTS STAKES.**

WINSLOW & KELLY.

Pacific Coast BLOOD HORSE Association

FIXED EVENTS, Spring and Fall Meetings 1885-6.

SPRING MEETING FIRST DAY.

Winters' Stake—For three-year-olds, to be run the first day of the Spring meeting; dash of one and a half miles; \$100 each, \$25 forfeit, \$300 added; second to have \$150, third to save stake.

Same day—California Stake; for two-year-olds; \$50 each, \$25 forfeit, \$250 added; to be run on the first day of the Spring meeting; second to save stake; dash of half a mile. Nominations in above to be made for 1885.

SECOND DAY.

Pacific Cup—Handicap of \$100 each, \$50 forfeit, \$50 declaration, \$800 added; second to receive \$300, third to have stake; two and a quarter miles; to be run on the second day of the Spring meeting. Will close the list of March, 1885.

THIRD DAY.

"Spirit of the Times" Stake—Dash of one and three-quarters miles for all three-year-olds; \$100 each, \$25 forfeit, \$300 added; \$150 to second, third to save stake. Nominations in above to be made for 1886.

Same Day—Gano Stake; dash of three-quarters of a mile for two-year-olds; \$50 each, \$25 forfeit, \$50 added; second horse to save stake. When any California two-year-old beats the time of Gano, 1:15 for three-quarters of a mile, the stake to be named after the colt which beats it. Nominations to be made for 1885.

FALL MEETING.

FIRST DAY.

Ladies' Stake—For two-year-old fillies; \$50 entrance, \$25 forfeit, \$200 added; three-quarters of a mile; second to have entrance. Nominations to be made for 1885.

Same Day—The Veal Stake; for three-year-old fillies; one and a quarter miles; \$25 p. p. \$300 added; second to receive \$100, third to save stake. Nominations to be made for 1886.

SECOND DAY.

Stallion Stake—Conditions: Only those three-year-olds are eligible which are the get of stallions owned in this State.

The stallions have to subscribe the amount charged for their services to the fund; private stallions at the price of their last season, and those which have not made a public season, to pay \$50, that sum being the minimum price. The owner of the get of a stallion is competent to name. The stake for the colts shall be \$100 each, \$25 forfeit; plate or money added at the discretion of the committee; distance one and three-quarters miles. To close for 1884 on the 1st of August next, at which time both stallions and colts (progeny) must be named.

THIRD DAY.

The Baldwin Stake.—Post stake for all ages; dash of four miles; \$250 each, p. p.; \$1,000 added; second, \$500, third to save stake. Nominations to be made for 1884.

Finigan Stake—For two-year-olds; dash of a mile; \$50 each, \$25 forfeit, \$250 added; second to save stake. Nominations to be made for 1885.

Same Day—Fame Stake—for three-year-olds; dash of two miles; \$100 each; \$25 forfeit, \$300 added; second to have \$150, third to save stake. Nominations to be made for 1886.

The Association reserves the right to change the day of running stakes.

All of these stakes (except the Pacific Cup as noted above) close on the 1st day of August next, the colts now rating as yearlings foals of 1883. Nominations to be made with Jos. Cairn Simpson, Secretary, 308 Montgomery street, San Francisco; Post Office box 2938. To be ready they must be plainly postmarked on or before that day, 1st of August.

JAS. V. COLEMAN, President. HENRY SCHWARTZ, Vice-President. JOS. CAIRN SIMPSON, Secretary. P. A. FINIGAN, Treasurer.

Horses in all district races must have been owned in the district June 1, 1884.

The track has just received a dressing and is in first rate condition—both fast and safe.

Entries to close August 1, 1884.

REMARKS AND CONDITIONS.

All trotting and pacing races are the heat three in five, except the yearling trot, unless otherwise specified, five to enter and three to start. But the Board reserves the right to hold a less number than five to fill, by the withdrawal of a proportionate amount of the purse. Entrance fee, ten per cent on purse, to accompany nomination. All purses unless otherwise specified divided at the rate of fifty per cent, to first horse, twenty per cent, to second, fifteen per cent, to third, and ten per cent, to fourth.

National Association Rules to govern trotting; but the Board reserves the right to trot heats of any two classes alternately, if necessary, to finish any day's racing, or to trot a special race between heats. A horse making a walk-over shall be entitled only to the entrance money paid in. When less than the required number of starters appear, they may contest for the entrance money, to be divided as follows: 66% to the first and 34% to the second.

In all races entries not declared out by 6 P. M. of the day preceding the race shall be required to start.

Where there is more than one entry by one person or in one interest, the particular horse they are to start must be named at 6 P. M. of the day preceding the race. No added money paid for a walk-over.

Rules of the State Agricultural Society to govern running races, except when conditions named are otherwise.

Non-starters in running races will be held for entrance, under Rule 3.

Racing colors to be named in entries.

In trotting races, drivers will be required to wear caps of distinct color, which must be named in their entries.

Entries to all of the above races to close with the Secretary on Friday, August 1, 1884.

Entry blanks and racing rules will be furnished upon application to the Secretary.

J. McM. SHAFTER, President. W. E. Cox, Secretary.

The Firm also carries a large stock of HARDWARE, RIFLES, GUNS, PISTOLS,

Of every make CARTRIDGES, FISHING TACKLE, RODS and FLIES,

in every variety, and all articles belonging to the Sportsman's outfit on REASONABLE TERMS.

TIPS.

Board of Directors for 1884. L. U. SHIPPEE, J. H. O'BRIEN, JOHN E. MOORE, JAS. A. SHEPHERD, JAMES A. LOUITT, FRED ARNOLD, R. C. SARGENT, R. W. RUSSELL, A. W. SIMPSON, Treasurer.

ASHLAND PARK TROTTING STU NEAR LEXINGTON, KY.

B. J. TREACY, PROPRIETOR.

THIS IS STRICTLY A BREEDING FARM, FOR though training is done, it is only for the stock belonging to the place, or those purchased from the proprietor. The proprietor of Ashland Park has no pet trotting family; his aim is to secure and have at all times for sale choice representatives of each of the leading families, these being the Hambletonians, Mambrino Chiefs, Clays, Pilots, Black Hawks, At Ashland Park may now be seen splendid specimens of the get of such stallions as George Wilkes, Almont, Mambrino Patchen, Clark Chief, Edwin Forrest, Blackwood, Sentinel, American Clay, Administrator, North Star Mambrino, Bourbon Chief, Regular, Balsora, Howard's Mambrino and Homer. The steady aim is to possess nothing that does not trace through the best class of speed-producing trotting crosses, along all the blood lines, right to the thoroughbred. For catalogues or further particulars address

## REMARKS AND CONDITIONS.

All trotting and pacing races are the best three in five, except the two-year old trot, unless otherwise specified; five to enter and three to start. But the Board reserves the right to hold a less number than five to fill, by the withdrawal of a proportionate amount of the purse. Entrance fee, ten per cent. on purse, to accompany nomination. Trotting and pacing purses divided at the rate of fifty per cent. to first horse, twenty-five per cent. to second, fifteen per cent. to third, and an per cent. to fourth.  
National Association Rules to govern trotting, but the Board reserves the right to trot heats of any two classes alternately, if necessary to finish any day's racing, or to trot a special race between heats. A horse making a walk-over shall be entitled only to the entrance money paid in. When less than the required number of starters appear, they may contest for the entrance money, to be divided as follows: 66 2-3 to the first, and 33 1-3 to second.  
In all races, entries not declared out by six p. m. of the day preceding the race, shall be required to start.  
Where there is more than one entry by one person or in one interest, the particular horse they are to start must be named at 6 P. M. of the day preceding the race. No added money paid for a walk-over.  
Rules of the State Agricultural Society to govern running races, except when conditions named are otherwise.  
Non-starters in running races will be held for entrance money, under Rule 3.  
Racing colors to be named in entries.  
In trotting races, drivers will be required to wear caps of distinct colors, which must be named in their entries.  
Entries to all of the above races (except fixed events) to close with the Secretary on Friday, August 1st, 1884.  
Entry blanks and racing rules will be furnished upon application to the Secretary.  
**P. A. FINGAN,** President.  
**EDWIN F. SMITH,** Secretary.

## REMARKS AND CONDITIONS.

National Trotting Association Rules to govern all Trotting and Pacing Races. But the Directors reserve the right to change the order of the programme so as to alternate if necessary to save time, and furnish more than one race the same day.  
In all Trotting and Pacing Races, five to enter, three to start. Entrance ten per cent. of purse, to accompany all nominations.  
Horses distancing the field will be entitled to the first and third money only.  
Horses entered for purses can only be withdrawn by consent of the Judges.  
The Pacific Coast Blood Horse Association Rules to govern all Running Races.  
Non-starters for Running Races will be held for entrance money.  
Non-starters must be declared out the day previous to the race they are engaged in, before eight o'clock P. M.  
In all Running Races the second horse saves entrance.  
No money paid for a race without a contest.  
All entries for Races to close with the Secretary or President, at Chico, Aug. 1st, 1884, at ten o'clock P. M.  
The Board of Directors will have absolute charge of the Track and Grounds during the week of Races, and guarantee that they will be kept in first-class condition.  
The above rules in regard to entries and conducting the Races will be strictly enforced, and all purses and stakes will be paid when the Judges have rendered their decision, and before leaving the Stand.  
N. B. In all running races the second horse saves entrance. The time of closing entries extends to August 1st, at 10 o'clock P. M.  
**C. C. JASON,** President.  
**ROLAND DILLER,** Secretary.

OAKLAND TROTTING PARK,

FIFTY HEAD OF WELL-BRED HORSES, AMONG the yearlings and two-year-olds are the get of Steinway, Grand Moor and Poscora Hayward. The brood mares are principally Hambletonian. The stallions are the well known Grand Moor, by the Moor, dam Vashit, by Hambrino Patchen; and the two-year-old colt by Newland's Hambletonian (he by Speculation out of Phacela by Silverthreads, her dam Minnehaha, dam of Beautiful Bells, Eva, Sweetheart and others. The roadsters comprise fine driving horses, both single and double, and several matched carriage and road teams. There will also be offered coach and track sulkies, light and heavy driving carts, etc.  
The horses, with the exception of brood mares, will be at stables of Newland & Pumye, Seventh street, near Broadway, Oakland, until July 17th, after that date all may be seen at Oakland Park.  
The sale will be absolute. Terms Cash. Catalogues will be issued in a few days.  
**KILLIP & CO.,**  
Auctioneers, 116 Montgomery St.  
SAN FRANCISCO.

## IMPROVED Blind Bridle & Winkers FOR RACE HORSES.

Secured by Letters Patent, July 25, 1882.  
Having thus described my invention, what I claim as new, and desire to secure my letters patent, is:  
1. The part D supported by the side straps of the bridle, extending back as shown, the front having an opening into which the blind is fitted, substantially, as herein described.  
2. In a bridle, in combination with the extensions D, the curved blinds F, secured to such extensions, and as adapted, to give full freedom and ventilation to the eye while circumscribing the vision, substantially as herein described.  
3. In a bridle, and in combination with the extensions D, blinds F, and side straps A, the screw, nut and washer E, to secure the blind and allow it to be set, substantially as herein described.  
4. In a bridle, and in combination with the checkpieces D and blinds F, as shown, the straps or bands G and H, connecting the branches or extensions above and below the eyes, and having the adjusting slides or buckles, substantially as a part for the purpose herein described.  
5. In a bridle, and in combination with the blinds F, supported and pivoted to the bridle so as to be movable about the point of support, the adjustable front straps or bands G and H, and the rear band I and the throat-latch or lash connected with the blinds, and adjustable, substantially as herein described.

The above are the claims allowed by the patent office, and though the corresponding letters do not appear on the cut, the general principle will be understood.  
It meets with universal approbation, doing away with all the objectionable urged against blinds, and at the same time giving complete control of the line of vision. By throwing the lower portion of the blind up something of the same effect on the action follows as is induced by toe-weights. This is especially the case when young colts are the pupils, teaching them to bend the knee without the strain of weights on the feet.  
For bridesof all descriptions apply to  
**JOHN A. McKERRON,**  
No. 230 and 232 Ellis St., San Francisco.

## IMPORTANT BREEDERS' SALE OF Trotting Stallions, COLTS AND FILLIES, Brood Mares, Roadsters, WORK HORSES, Etc.

— The Property of —  
**S. J. TENNENT,** at his Ranch,  
PINOLE STATION, near Martinez, upon the line of the C. P. R. R., at 10:30 A. M.  
**THURSDAY, July 24th, 1884.**

THIS SALE WILL BE ONE OF THE MOST important that has yet taken place in California, and will include Colts and Fillies by Echo, Steinway, Whipple's Hambletonian, Arthurton, Pinole Patchen, Alexander, Gus, Reliance, and other noted Stallions. Catalogues, giving full pedigrees and description, will be issued in a few days.  
**KILLIP & CO.,** Auctioneers.

## Notice.

## OUR NEW YORK LETTER.

### Sports of Independence Day—Eole's Brother to the Front at Monmouth Park—Great Racing at the Long Branch Track—Chicago's Great Meeting—Gossip, Etc.

The past week has been a very busy one for turf goers all over the country. At Chicago, at Brighton Beach, and at Monmouth Park the thousands have assembled *en masse* day after day to witness the flying steeds and their gaily attired riders strive in friendly efforts for the mastery. At the elegant new racecourse in the Garden City the largest crowd and fields of horses of the year has been the order of each day. People here turned out in good force on Independence Day, at Brighton Beach and Monmouth in spite of the weather. Long Branch racecourse on the Fourth of July seems to be almost indissolubly connected with wet weather. In past years this has happened so frequently, that to the majority of race-goers it is an axiom, and the old timers went down on Friday last prepared for all emergencies. The sequel showed their wisdom and forethought, for the day was not of the pleasant kind. Of course, the track was heavy; that was to be expected, but the racing came off just the same. Naturally there was plenty of sensations. Probably the most unexpected victory of the day was that of Eole's brother, Eolist, in the Long Branch Handicap. People who saw him run at Jerome Park last month against Geo. Kinney and Hartford, when he ran well for a mile, seemed to overlook the horse entirely. That did not the Wizard of Westchester and his friends however, and the track just suiting Eolist's bad feet, he pulled off a clever victory. The race showed that when Eolist was backed last March to win \$20,000 in the betting books on the Suburban Handicap his party had some substantial grounds for their support of the horse. The Hopeful Stakes was a clever victory for Richmond, who was, however, tiring fast at the end. Tecumseh, as usual, got away badly, and this fine looking youngster has had aggravating luck thus far. The Ocean Stakes was a gallop for the Dwyer pair. Too much praise cannot be awarded the Association for the many improvements to the track and enclosure. On every hand their good work is visible, and the course proper is now one of the fastest in the land, as was shown on Tuesday.

On Saturday, though the skies were propitious enough, the weather had been so unfavorable almost up to the hour for beginning that the track was a perfect sea of mud and water. Lawns and walks were in a disheartening condition, though by the aid of planks and boards people waded round after a fashion. Of course the sport, under these circumstances, was full of surprises. To select winners was an impossibility, and even the astute Pinner himself began the day by backing the Islip filly, Glideaway, in the first race won by his own mare, Woodflower. The latter won easily enough, but until Fellowplay became disabled he showed a hold front, and would probably have beaten her out for the accident.

Before the second race a rabbit bounded across the track, opposite the lower end of the stand. He came from the inner field and ran directly into the midst of a large crowd, several of whom captured the little rodent. Many persons remembered that at Louisville in May last, a rabbit was seen on the course each time Buchanan won his great races, but as there was no Buchanan at Monmouth, to whom did the good omen apply? Perhaps to Kinsman, who won the second race cleverly enough, after Meaton gave him a reminder with the catgut. Kinsman is a fine big colt and that he is not the worst of the Chester Valley Stables his race today shows. It was the first time the Kello colors have been in the van since Heel-and-Toe's victory at Jerome Park. The hurdle race on Saturday furnished some genuine excitement. In the first place, Chipola's disinclination to join the field gave the spectators a gladiatorial display in the inner field, of which the principal actors were the Canadian mare, her rider and rubber. Coaxed she would not be, and when her jockey tried the lash she reared and wheeled in circles, but would not go on the track. Blindfolding was then tried with equally poor success, and the people waxing impatient, it looked as if the race would have to go on without Chipola. Finally the attendant on foot succeeded in backing the stubborn brute out on the track, a furlong distant, and she at once gave up the fight and took her position with the others. During the race the knocking down of half the hurdle in the stretch played no unimportant part in the result. Col. Watson led Bonairetta a neck to this point, where the mare's more wide-awake rider went over the prostrate half of the hurdle, Watson's jump of his un-

doubtedly putting his chances out. And, as for Marshall, the winner, the prostrate hurdle let him up, beyond a doubt, for if he had had the jump to make his speed would not have told in time. Hurley looked the demon rider, and no mistake, as he furiously rode the brother to Glenmore towards the wire, both horse and rider so plastered with mud as to be unrecognizable. The run home Saturday evening between the first special over the main line and the second special fifteen minutes later over the Pennsylvania R. R., was a close thing, both making it in a trifle over one hour. The accommodations on the Pennsylvania trains are of the best, and people are beginning to find this out.

Tuesday furnished the most sensational racing of the season at Monmouth Park. The track was better than any person expected it would be, and a few more days of sun and wind will put it in apple-pie order. After George Kinney had beaten Jack of Hearts in a fast dash of nine furlongs, the upsets began with the defeat of the favorites in the July Stakes. Brookwood, the winner, however, was clearly the best of the party at the weights, for he got away badly and won at the end like a racehorse. Richmond's temper, however, with the weight, militated against his chances, while Wanda is evidently a trifle stale. The Lorrain Stakes saw Panique out once more, and many persons looked to see him duplicate his Belmont victory at Jerome. The colt, however, did not look well, and the stable made no secret of their liking Ecnador the best of the two. The race will long be remembered by the onlookers and participants. Himalaya's misstep, this most unlucky of colts seeming to be perpetually in trouble, Panique's defeat, Ecnador's unexpected triumph and Orator's dramatic death followed so quickly, the one upon the other, that people could hardly realize the situation. The owners of Orator came in for much sympathy on the loss of so promising a colt, coming so soon after Knight of Ellerslie's loss of form and the death of Carnation last Fall. However, they are plucky as well as enterprising, and will not allow these setbacks to discourage them. The handicap on Tuesday showed Drake Carter in a better light than at any time since last Fall. Barnes, however, would probably have won, but for a disappointment or hindrance of some sort at the head of the stretch in the last mile.

At Chicago Gen. Monroe has, during the week, met with one defeat and gained one victory. As, however, the latter was the great race for the Washington Park Cup, the prize that called the son of Tom Bowling West, he may be said to have fulfilled his mission. There was not much betting on the race in this city. The odds here were ridiculously low, and many people therefore refrained from backing Monroe. Bob Miles in the race gave evidence that he has the makings of a good horse at a distance, and if sound by another year he should be a good cup performer.

New York, July 11th.

PACIFIC.

## Notes from Marysville.

EDITOR BREEDER AND SPORTSMAN:—On Sunday, the 27th inst., Mr. Jenkins, the popular liveryman of Marysville, took Mr. Latham, of the *Appeal*, and myself out to the race track to witness the performance of Brigadier, as Mr. McDonald had informed us that he intended to speed him one or two quarters. The track is under the management of Mr. Frank Grant, who is doing the work very creditably, keeping the track in fine condition for the working of the youngsters, a number of which he has in training, notably a large, handsome, chestnut three-year-old filly named Night Hawk. She is by Brigadier, her dam by Billy McCracken; she is the property of Mr. D. E. Knight; and Constantine, a fine, rangy two-year-old by Steinway, dam Kitty Miller, by Speculation. Soon after our arrival Mr. McDonald put in an appearance behind Brigadier, who looked as bright and fresh and appeared to be in as good condition and as sound as at a four-year-old. Mr. McDonald drove him three-quarters on different portions of the track, and although not intending to move him at his best speed, still the horse's feet moved in a way to show that they have by no means lost their cunning, and, as his groom says, "Whoever tackles him this Fall has got a race on his hands." It was not the intention of Mr. McDonald to trot Brigadier this season but to give him a rest after his arduous work for over six years, and bring out some of his youngsters, but the distemper got among them, unfitting them for work, and as he didn't want to go to the races alone, he concluded to put the old horse to work again and take him along just for company. He is liable to prove company for some of the best of them, and people do not want to go to sleep with the idea that some of his colts are not going to do the same at no distant day.

July 25th.

MARYSVILLE.

## YACHTING.

Yachting matters still remain quiet, nothing of any particular importance having happened during the week past. The yachts move about in a desultory way, but no concerted actions are taken. A few cruises would enliven matters.

The recent remarkable run of the steamship *America* across the Atlantic, should compel yacht-builders to put on their "thinking caps," and endeavor to figure out whether they are in the right in building yachts on the conventional type. This steamship is built with a good deal of beam, and she is broadest about the fore rigging. She was modeled on the principle that a triangular piece of wood could be moved through the water, butt end first, with less resistance than with the point first, and she met with wonderful success. Whether the same rule would apply to sailing vessels, that of course sail more or less on their sides and very rarely upright, remains to be seen, and can only be demonstrated satisfactorily by a practical experiment. This is such an abrupt change from our deep, narrow steam vessels that it is well worth studying.

The *Aggie* has hosed her fore topmast, moved her jib stay several feet farther inboard, and has put on her flying jib again, instead of carrying that big jib and a balloon jib outside of that. This rig, although it deteriorates slightly from her appearance, makes her much easier in heavy weather. If she had gone under that rig to Santa Cruz, the result of the race in Monterey Bay on July 5th, might have been different, as she then probably would not have carried away her bobstays. It has been discovered that her bowsprit was cracked considerably during the race.

Last week we unjustly scored the *Forest and Stream* for publishing only the Monterey race of the Pacific Yacht Club, without giving any account of the run down the Coast. The only trouble was that they got the "cart before the horse," as in the edition just to hand is described the ocean cruise. It, however, again contradicts itself, saying *Nellie* arrived only one minute behind *Aggie*, while in the table that immediately follows it gives the correct time, which makes *Nellie* arrive 1 hour 8 minutes and 50 seconds after *Aggie*.

The *Lurline* went out for a short time, last Sunday, and returned to Sancelito about noon. As soon as she had picked up her moorings, and not before, the *Haleyon* made sail and started off. It appeared like a desire on their part to avoid a brush with *Lurline*, and so the latter seemed to imagine, for she immediately got under way again and went after *Haleyon*, passing her in a calm streak, just beyond the Pacific Club House and maintaining her advantage after both yachts were in equal winds in the channel.

Off Sancelito the wind sometimes is very variable. At one time in the afternoon the *Emerald* going home had the wind on the port tack, or from the eastward, and about one hundred yards further in shore the *Whitewing* had the wind from the westward, while a few hundred yards from both of them the *Spray* had a fine south wind. Had an artist painted a picture of such a scene, he would be ridiculed without end for his lack of marine knowledge.

The *Virginia*, (s. Con. O'Connor), is hauled up on the beach at Sancelito, and has been scraped down to the bare wood, preparatory to a new coat of paint. She will also be fixed up somewhat inside. It is to be regretted that her owner does not accompany the fleets on some of the cruises, so that one might see if she has any of her old time speed left, in comparison to the later models we now have on the bay.

Mr. Jas. V. Coleman has gone to Europe for a brief trip and has placed the building of his yacht, *Carmelita*, in the hands of A. Cary Smith with full powers. She will be built at the yard of John J. Driscoll, Greenpoint, L. I.

The *Cbispa* stays on the ways at Turner's much more than she does afloat. As her owner always avoids races of any kind, we fail to understand the necessity of keeping her with such a clean bottom.

In the Whitehall boat race last Sunday, accounts of which have appeared in all the daily papers, a California bull showed its superiority over the Eastern built boats.

The *Lively* is kept at North Beach near the swimming baths there.

TURF AND TRACK.

Almont.

[Western Sportsman.]

Almont was a dark bay, black points, 15 hands 2 1/2 inches high; bred by R. A. Alexander; foaled May 29th, 1864; sired by Alexander's Abdallah; dam Sally Anderson by Mambrino Chief...

As a sire Almont was without a living peer. His superiority did not consist simply in ability to heget speed at the trotting and pacing gait, but possessing an amiable disposition, remarkable intelligence, great endurance, an iron constitution, unblemished limbs and perfect health...

If more is necessary to establish Almont's right to first place, it is to be found in the evidence of his power to endow his sons and daughters with the ability to transmit his own great virtues to third and fourth generations...

Allie West 2:25; sired Jewett 2:22 1/2; Rachel B. 2:28 1/2; Allie East 2:40; and Charley West, 4 years, 2:40. Hamlin's Almont, Jr., 2:26; sired Maud T., 2:26; Wade Hampton 2:31 1/2; Aileen Almont 2:39 1/2; Huron 2:42 1/2; Gem, 3 years, 2:55.

Col. West trial over half-mile track 2:23 1/2; sired bay stallion Westmont 2:27 1/2; Lorette, 5 year old trotting record 2:30 1/2; and pacing record this year 2:24; Mable H., 4 years, 2:31 1/2.

Trouble 2:37; sired Lizzie second 2:23 1/2; Trifle 2:37; Success 2:45.

Bostick's Almont, Jr. 2:22; sired Annie W. 2:20.

Almont Chief sired Almont Gift 2:29 1/2, and other winners of races.

Sixteen other sons of Almont have sired winners of public races, prominent among which is: Almont Rattler, sire of Lorelle, 4 years, 2:43; Orphia, 3 years, 2:41; Harlequin, 3 years, 2:59 1/2; Theta, 4 years, 2:45 1/2; Zingara, 4 years, 2:48; Cricket, 3 years, 3:21; Sadie Ewing, 2 years, 3:10; Cantamon, two years, 1:35, half-mile; Almont Rattler, Jr., 1:30 half mile; and Pageant, 3 years old, winner but no time given.

The daughters of Almont have produced Catchfly 2:18 1/2; Durango, 2:23 1/2; McMahou 2:27, and Tempest 2:30.

A prominent and peculiar feature of Almont's prepotency is the uniformity with which he got trotters out of strictly thoroughbred mares. Four of his get in the '30 list, and one with a two-mile record of 4:54, were out of thoroughbred dams—the dam of Almonarch 2:24 1/2, is also the dam of the successful running horse Washburn.

On account of the fine appearance, docility, and speed of Almont's get, a large percentage of his colts have been taken by gentlemen of means and used exclusively for private driving. Many such, with no other experience are known to be fast, but have never had an opportunity to show what they could do under the watch. Others were lightly trained and obtained records when young, then retired to the stud or road. Of the latter class a number will be found in the list below.

Table with 2 columns: Name and Age/Record. Includes entries like Westmont, ch g (pacer) 2:15, Archer's Almont b h 2:37 1/2, Almont Jr. b h Bidwell's 2:37 1/2, Ringier ch h, 4 yrs 2:37 1/2, Emma G, blk m, 2 yrs 2:38 1/2, Consul b h, 2 yrs 2:39, Altanon br g 2:39, Luna b h 2:39 1/2, Nonad b h 2:40, Jua. F. Phelps, Jr. bs 2:40, Katie T. b m 2:40, Ellen Anderson, ch m 2:40, Altan gr h 2:41, Belle R. b h 2:41, Lizzie Almont 2:41 1/2, Alverno b h 2:42, Almore b h 2:42, Venetia b m 2:42 1/2, Passacas b h 2:43, Judge Samuels 2:44 1/2, Altona b h 2:44 1/2, Almont Norman b h 2:45, Pattie Macey blk m 2:45 1/2, Ohio Almont bs 2:46, Dick Westmont b h 2:46 1/2, Lement ch s 2:47 1/2, Almo b m 2:47 1/2, Almo b m 2:48, Latoka F. M. 3 yrs 2:48, Belmont blk g 2:48, Buckeye Chief rd h 2:49, Claymont b g 2:50, Dick Westmont b h 2:50, Delusion 2:51, Almo b g 2:53 1/2, Almont Arab b e 3:05, Almo b m 3:05, Lulu ch b 3:12, Comandach h, 3 yrs 3:06, Evangeline b m 3:23.

The performances of Westmont of Chicago on the 10th inst., and at Pittsburg last Thursday (pacing in 2:01 1/2 and 2:02 with running mate,) would be sufficient to keep his memory green for all time, if he had not already earned a fame second to no other trotting sire, living or dead.

Although it was feared that the big prices paid for yearlings at the Falmouth sale might injure the other sales during the July week at Newmarket such did not prove to be the case. On the 3d the yearlings bred by Mr. Chaplin were sold when the following, the get of Hermit, realized prices as follows: Chestnut filly, dam Gertrude, 510 guineas; chestnut filly, dam Stocklove, 500 guineas; chestnut filly, dam by Musket out of Adelaide's dam, 1,600 guineas; chestnut filly, sister to Queen Adelaide, 2,000 guineas, bought by Sir John Willoughby; bay filly, dam by Young Melbourne, 610 guineas; bay colt, dam Anonyma, 1,600 guineas; black colt, dam Barchestina, 1,600 guineas. At the same sale a bay filly, by Kisher, out of Stray Shot, sold for 2,050 guineas, and a chestnut colt, by Cremorne, out of Hazeldean, for 2,100 guineas.

John C. Kathan, Preston, Minn., has bought of M. T. Grantan, of the same place, the brown weanling filly Tareta, by Trample, dam Magic by King Herod, the dam of Stiles.

Mr. Higgin's stable reached Rancho del Pao from Chicago, last Monday, all in good health and spirits. Jim Brown, the erstwhile trainer, is no longer connected with the stable.

The Napoleon of the Turf.

Lord George Bentick was for many years considered the greatest authority in all things connected with racing; yet, as Lord Beaconsfield tells how some forty and odd years ago, Lord George, without any apparent cause, parted with his racing stud at almost a nominal price. When he entered his horse under the name of Mr. Bowe, who was the proprietor of the Turf Tavern at Doncaster, his successes were few indeed. Still, from 1833 to 1846, he was the dictator of the British Turf, and when it was announced that the sky-blue jacket and white cap which Crucifix, Grey Momus, Miss Eliis and Cowl had so often borne to victory, would never more be seen upon a race-course, surprise was the feeling of all men connected with the turf.

Now, when it is kept in mind that the Duke of Wellington about this time went out into Battersea Park and exchanged shots with the Earl of Winchelsea; and that the Marquis of Londonderry fought a duel with a subaltern, Mr. Battine, of the Tenth Hussars, the regiment the Marquis was then head Colonel of; and that the Duke of York had "gone out" with Colonel Lunnox, afterwards Duke of Richmond, the fact of Lord George Bentick after publicly insulting his Captain, taking advantage of the W. O. regulations which prohibited duelling, does not read well. It seems that Captain Kerr thought Lord George to be equally deficient in his duty as a subaltern, as well as failing in due respect to himself as his senior in command, and therefore said on parade publicly, "If you do not make this young gentleman behave himself, Colonel, I will." His lordship then retorted, "Captain Kerr ventures to say on parade that which he dare not repeat off it."

A challenge, therefore, ensued from the Captain to the colonel. The former, a man as brave as he was cool, suggested Calais as the place of rendezvous, but his lordship declined the meeting he by his words had invited. On this Kerr posted his lordship, for doing which he received his dismissal from the service, thus forfeiting his commission. Poor Kerr stood, as he truly said, "between the devil and the deep sea," being liable on the one hand to be ostracised by his brother officers if he passed over tamely the open insults Lord George gave him in the hearing of so many; and to being cashiered, as it happened, if he took up the challenge, the other evidently referred to, by demanding an appeal to arms. He considered himself, and justly so, an ill-used man, for had his cornet not been the son of a duke, Captain Kerr in those old duelling days would have been held blameless. As it was, according to the mistaken conventional rules of the service, he snuffed, and died—a poor fellow—not long afterwards, rom cholera, in Paris.

On another occasion Lord George did not come well to the front by insulting Sir St. Vincent Cotton, an old officer who used to tool "The Age" four-in-hand stage-coach between London and Brighton. Sir St. Vincent had served in the Peninsula, and certainly was not a man who, if he had insisted a brother officer, would have refused to apologise or to give satisfaction to the insulted. Yet Lord George in Brooke's Club one afternoon, when the baronet was dining there, called out to the waiter to bring Sir St. Vincent Cotton's bill to him, and, having looked over it, said, in the hearing of all, to the waiter: "Sir St. Vincent should pay his debts of honor before he has beefsteaks and Burgundy wine"—a remark that surely a man who had descended from a pageboy of William the Third, and who owed his elevation to the Peerage because he had slept with the King in order to reduce the effect of an attack of small-pox, ought never to have made.

One of the best stories in Lord George's connection with horse racing is that when at Goodwood, and after daily "wasting" and walking as a regular jockey to exercise, besides donning his own gay, so oft victorious racing attire, and weighing, saddle on arm, in thorough professional style, he rode and won a match against Lord Maidstone. Both of these noble jockeys were, however, fined a five shilling by the stewards for being late in "going to scale," and it is needless almost to say that they both paid the amount without the least demur. Lord George's retirement from the turf, as already referred to, was alike sudden and unexpected. "The lot, Payne," he said at Goodwood, "from old Bay Middleton to Little Kitchener (his feather weight) for £10,000. Yes or no?"

"I will give £300 till breakfast-time to-morrow to consider the matter, Beutinck," was the reply. "Give me till then, and I will say yes or no." "With pleasure, my good fellow," his lordship answered, not giving the matter seemingly a second thought, till the following morning, when Payne handed him over the £300, having declined the chance, after doubtless, due consideration. Then Mr. Mostyn, seeing the negotiation was concluded, very quietly said, from the lower end of the table, looking up for a moment from the letters he was pursuing, "I'll take the lot, Beutinck, at £10,000, and will give you a cheque for that amount before you go on the course;" and so, in the very few words just recorded, Lord George Bentick turned his attention from the turf to politics. How long it would have taken a couple of foreigners to settle a similar matter we shall not try to guess.—Licensed Victuallers' Gazette.

The race for Arabs at the Newmarket on the 2d was a very poor affair. It was won by Admiral Tryon's Asil somewhat easily at the finish from the favorite, Dictator, who had been very successful in India. Bell's Life says: "The winner is by an Abbeyan Sherak horse out of Belkis, and was trained by Hopper at Florence House. Asil has been put alongside a couple of the most moderate horses in Hopper's stable, and, although receiving weight, was about half a mile behind in a two-mile spin. Jonsifve was trained in India, but his opinion of the merits of the Arab horses are the reverse of flattering, and it is stated on authority that Havock presented over 84 pounds and a handsome beating to Dictator. Although the event from its novelty was undoubtedly a draw, no useful purpose can be served by a repetition, and we may hope to have heard the last of races exclusively for Arabs."

S. J. Jones, of Portland, who arrived here two weeks ago with Forest King and Blue Mountain Belle, has secured quarters at Santa Rosa and is working his horses there.

Monmouth Cup of 1884.

The race has a history as glorious as any similar event of the American turf. Helmbold, Longfellow, Wanderer, Tom Bowling, Tom Ochiltree, Parole, Monitor and Eole have enrolled their names on its scroll of fame. It was originally intended as a prototype of the Ascot, and other great English Cups, the distance being two miles and a half, but in 1873 it was reduced to the regulation American cup distance of two miles and a quarter. The present season it was further reduced to two miles, in deference to the demand of owners, whose growing aversion to long distances is to be deplored, in the interest of good sport. The occasion was the fifth in which old Monitor had battled for the Cup, and twice successfully, as both 1881 and 1883 saw his white face reach the pole first. The present season he had shown but once in public, and then in the Shrewsbury Handicap, for which he ran well half of the way, and then fell back, seemingly unable to stay the route.

But to-day Monitor was all the rage among the select crowd who pretend to have all the "good things" of racing in their keeping. To have, in the short space of forty-eight hours, undergone so great an improvement as would enable him to turn the tables on Barnes and Drake Carter, was rather too much to believe, but many believed it and backed him. But Barnes was a strong favorite, notwithstanding. Those who had watched his race for the Shrewsbury Handicap, saw that the bay colt had not been able to get through his field when he made his first effort, and stood by him to a man, while his conquerer, Drake Carter, was almost as well backed, as it was reasoned that, at last, the plain-looking gelding for which Mr. Lorillard had paid so large a sum, had returned to the form which would win back some of the purchase money.

There was a great crowd surrounding Monitor when he was led out with Trafalgar. The old gelding certainly looked much better than we had seen him for some time, despite the rather unsightly hock.

"Don't he look better than he did the other day?" asked Alcock.

"Rather," he answered.

"Rather! Why, he looks a good deal better; that race did him good. I only started him for work."

When Monitor appeared on the track the crowd rose en masse and gave him a reception as no other horse, unless it be Parole, has ever been able to win from an American public. Barnes looked fit; very fit, as Tony Taylor's splendid groan told as he eyed the horse canter past the stand. Drake Carter hardly looked as fit as Barnes, but the gelding showed considerable improvement on Sheepshead Bay. When the flag dropped it looked as if the tactics of last season were to be followed in the case of Monitor, for Brennan sent him to the front, but McLaughlin soon went out with Barnes, and took the lead, seeing which Hayward moved up, and the result was that Drake Carter led past the stand at the end of the first mile. The gelding continued to lead until nearly a mile and a half had been run, when, seeing an opening on the inside, quick as thought McLaughlin brought Barnes through, and, taking the lead amid wild cheers, came away and won handsily. Drake Carter was ridden until the last furlong, when Hayward eased him, Monitor tired to nothing after going a mile and a quarter.

Drake Carter was very tired when he came into the paddock, while Barnes seemed but little the worse for it, and Monitor, not having been persevered with, had quite recovered himself. The race was a very fast one, as the time below will show:

Quarter-mile..... 28 1/2 Mile and a quarter..... 2:24 1/2 Half-mile..... 56 1/2 Mile and a half..... 2:39 1/2 Three-quarters..... 1:19 1/2 Mile and three-quarters..... 3:04 1/2 One mile..... 1:47 Two miles..... 3:35

That the best horse won seemed to be the prevailing impression, as when Barnes passed the stand at the end of the first mile he was moving so easily as to remove all doubt of his winning. His stride, covering over twenty-five feet, was the wonder but scarcely the admiration of the crowd, as it was great, sprawling, and far from graceful. As like Griustead he gallops with a straight foreleg, but the amount of ground he covers is enormous, and the stride is, moreover, not accompanied with the exertion it appears when viewed from a distance.—N. Y. Spirit.

Murmurings at Monmouth.

[N. Y., World, July 18th.]

Rarely has an enjoyable day's racing been so seriously marred as that at Monmouth Park yesterday by the almost insane demands of a crowd which evidently did not quite know what it wanted. The programme had reached the fifth race, a dash at seven furlongs, with selling allowances, which at the finish was a match between Mr. Kelly's Sister and Mr. Walter's Itaska. The latter was a strong favorite, and would undoubtedly have won had his rider been content with sitting still and riding the horse with the same determination as he had been doing fifty yards from the post. But he stupidly stopped riding, shifted his hands, and the result was that the horse stopped almost as quickly, and Sister won by a short head. So close in fact were they that one element of the crowd insisted that Itaska won the race, while the other believed that the boy on Itaska had purposely pulled the horse, and in turn demanded that all bets be declared off and the boy ruled off. It was an angry, turbulent crowd, and for a few minutes it looked as if they really would storm the Judges' stand, but the quiet demeanor of Mr. Withers and his associates finally told and the crowd gradually dissolved, with all kinds of threats, which in a majority of cases was a declaration that they would never "go to Monmouth Park again." The truth is, in view of the rumors before the race, that "Itaska was not meant," and the finish did look very queer, but it can only be said that the boy did ride a good, strong race until within fifty yards of the finish, when he really seems to have lost the little sense he may possess. But in view of the Boulotte trouble over a similar race it would be better for the Monmouth Park Association to eliminate selling races for all ages from the daily programmes and substitute some other class which will prevent the putting up of jobs, although when an owner or rider intends to do wrong the conditions of a race will not prevent him doing so.

The Eastern sporting papers agree that Modesty had all she could do to beat Freda for the Woodlawn Stakes at Washington Park, the margin being only four inches. One of the correspondents says the win was entirely due to the superior riding of Murphy on Mr. Corrigan's filly. Now Isaac, despite his Irish name, is a colored boy, a native Kentucky production, and to have it published to the world that he outrode Holloway, who is a trained English professional, will give Cy an attack of the mugwumps.

Lord Falmouth's Stud.

[Pendragon in the Referee.]

Lord Falmouth's career upon the turf has closed in a way well befitting his previous reputation. So far from the sale of yearlings, foals and brood mares falling in any way short on the score of interest or prices realized of the initiatory sale of horses in training, the result was simply unparalleled—to many it was nothing short of stupendous. Sixteen yearlings produced 18,350 guineas, an amount never before realized for a similar lot in any country. Nor has there, so far as I can recollect, ever before been anything like it. Although, as will be seen, the average was well over a thousand each, some of the youngsters brought small prices, only. Two went for 50 guineas each, one brought 250 guineas, one 400 guineas, another 410 guineas, another 420 guineas, still another 350 guineas, and the remaining one that was under four figures was knocked down for 620 guineas. So it will be seen that some of the batch of sixteen that made so magnificent a total as 18,350 guineas must have fetched truly sensational prices. They really did. A best on record was not reached so far as any individual youngster was concerned, the wild price of 4,100 guineas for Maximilian some years ago—a price as false as it was wild, and as disappointing as either—locking the way. Still, as a whole, the sale of yearlings produced a best on record certain and undeniable as it was unique and enviable. Two young creatures with all their successes or all their disappointments well before them—Godolphin, a bay colt by Galopin out of Jannette, and Cerealis, a brown colt by Galopin out of Wheatear—brought 3,000 guineas each. These are very remarkable figures, the Maximilian and all other similar purchasers notwithstanding. Rattlewings, a bay filly by Galopin out of Mavis, brought 2,100 guineas, and yet another Galopin fetched a still higher figure. Oheron, whose dam is Wheel of Fortune, found a purchaser in Captain Machell at 2,500 guineas. One of the 3,000 guineas lots—Godolphin—was bought by Lord Zetland, and the other, Cerealis, by Tom Cannon, it is said, for his employer, Mr. Baird Abington. Those who know, credit this young supporter of the turf with a large number of the purchases made during the day. Some were in his own name, and the remainder were in the names of at least two other people.

It will be seen that there is a special run on the Galopin strain just now, mainly the result of St. Simon's great performances. St. Simon's owner was the purchaser of Rattlewings already referred to. If there is anything in pedigree on both sides, Galopin and Wheel of Fortune, the Machell purchase, looks very promising. There must be a good deal in pedigree, or we shouldn't find men, some of them supposed to be 'cute, and others known to be still 'cuter, bidding like this for such perishable and delicate commodity. And yet, on the score of pedigree, almost the only test of quality in yearlings—good looks have often enough ere now been found a man-trap—the prices brought will be found at times perverse and contradictory. When we find a colt by Kingcraft, no matter who is the dam, bringing in 1,000 guineas, and a filly by Kisber going like so much dirt for 50 guineas, there must be something not altogether open to argument in this system of purchase. Speaking for myself, I shall look with a great deal of interest at the future running of these colts and fillies, when once they make a start, and shall not be at all surprised to find that one or two of those who were far from heading the list under the direction of the man in the rostrum will prove far and away the best goods as arranged by that other man, that rhadamanthine assessor of equine ability, the man in the chair.

A glance down the list of brood mares renews one's acquaintance with various past public favorites. The dates to their names as given in the catalogue afford a rare reminder—as if one were wanted!—of the rapid way in which old Time wings his flight. Who would have thought, without stopping to reckon, that Silver Ring and Cantiniere were foaled fourteen years ago, that Wheatear is seventeen and Lady Coventry nineteen years old? I wonder whether Lord Falmouth had any special affection for one or other of the mares and stallions sold on Monday; and, if so, whether any parting pang, as he read of the magnificent amounts they brought, alloyed his otherwise undoubted gratification. Racing is a cold and stern and money-grubbing pursuit, and finds in its votaries small room for sentiment, but such a man as Lord Falmouth is an exception to the rule, and I should think he feels the separation keenly, notwithstanding the golden solace provided for him by the glib-tongued auctioneer. By the way, and talking of auctioneers, the percentages on the complete sale were well worth having—they amounted to between £5,000 and £6,000 sterling. That is, unless it be true that an arrangement for a lump sum was entered into between proprietor and auctioneer before the first sale, that of horses in training.

Cantiniere is still believed by many to have been the speediest animal ever seen, over her own distance and before she was knocked over by a very pronounced roaring infirmity. She was a flyer, and no mistake; but it is impossible to decide with anything like certainty the relative merits of animals which belong to different periods and have no real opportunity of being measured against one another. With a foal by Galopin at foot, and prospects of another by the same sire, Cantiniere fell to the bid of Captain Machell for 4,100 guineas. A noticeable feature of this sale of brood mares was that some were sold with their foals, others without them. Thus Jannette fetched 4,200 guineas, and her colt foal by Isonomy 1,300 guineas, Captain Machell being the purchaser in both instances. Spinaway, another famous bearer of the magpie jacket, who gives good promise of being the dam of racers as famous as herself, was sold with her Isonomy filly, an arrangement which brought her figure to 5,500 guineas; but Wheel of Fortune went by herself at 5,000 guineas, and her Springfield filly cost her purchaser, the Duke of Portland, an additional 1,100 guineas. Mr. Cartwright, who is reported as bidding for the same owner as Tom Cannon, was the purchaser of the Spinaway double lot. I have reason to believe that Lord Falmouth regarded Wheel of Fortune as the absolutely best mare he ever possessed; whether he had a personal regard for her over the remainder is not on record. It seems only the other day that I saw her beaten so unexpectedly on the Knavesmere just when she made the effort that was to cut down Ruperra, and leave her to win in a common causer. "The Wheel" never after this showed in public; while she was on the turf her ability may fairly be reckoned the equal of anything that preceded or followed her. No one could compile a list of "horses of the century" for the past couple of decades without, provided the list was to include mares, placing Wheel of Fortune's name within it. There were many other noticeable lots among the brood mares and foals, but I have no desire to emulate the catalogist pure and simple and so with Wheel of Fortune will take my leave of this portion of the sale by auction, merely remarking that it—brood mares and foals alone—produced 49,740 guineas.

Stallions were five in number, and included Kingcraft—winner of perhaps the most sensational Derby of our time—and loser of races innumerable afterwards. For this "faint" hero 500 guineas was given by Lord Rossmore. Queen's Messenger brought no more than 200 guineas. He will remain with Matthew Dawson, to whom he was so great a disappointment. The "mistake" of the sale was Galliard, who brought no more than 3,600 guineas, which, though it would be a very handsome sum if possessed by any of us who write on turf topics, looks, by the light of recent purchases, nothing short of paltry as the price of a first-class representative of the Galopin strain—Two Thousand Guineas and Prince of Wales' Stakes winner as well as a placed horse in the Derby. I fancy that in this matter of prices upon paper some of us sporting writers are in much the same position as the hank clerks in the story, who, after speaking with contempt of hundreds and thousands and tens of thousands (in the books) all day long, have to club together at night to get a drink of four-half and a smoke on the way home. I dare say Lord Falmouth is more than satisfied with the result of a sale which, if my memory serves me aright, has brought in altogether something between £30,000 and £40,000 more than it was expected to do by those most closely interested.

Racing at Saratoga.

On Saturday, July 19th, the Saratoga Association began its twenty-sixth season with the quality, showery weather, hot and good track. The multiplication of tracks tells on the old course at the Spa, and with meeting, in progress at Chicago, Mounouth Park and Brighton Beach, the fields at Saratoga were small and the attendance slim. A number of well-known turfites who have never before missed a "Travers Day" at Saratoga were absent, while death in one case made the timers' stand look strange, the absence of Mr. J. R. Whaley, of Cincinnati, from his post being conspicuous.

Mr. Baldwin's stable was on the ground and this Coast had also a representative in Jim Renwick, the big gelding winning a large share of his starts in good style. We append summaries and turf notes of the events in which California horses took part:

Table with race details: SARATOGA, N. Y., July 19th. First Race.—Purse \$400, for all ages, of which \$100 to the second; entrance free; five furlongs. G. R. Buchanan's ch g Jim Renwick, 6, by Joe Hooker, dam Big Gun, 115 lbs. (Holloway) 1. W. L. Cassidy's Saunterer, 6, 112 lbs. (Blaylock) 2. Clay & Woodford's The Admiral, 3, 109 lbs. (Taylor) 3. R. R. Owing's Mammonist, aged, 115 lbs. (Conklin) 3. J. R. Keene's Maid of Athol, 4, 113 lbs. (Lewis) 0. Morris & Co.'s Fellowship, 6, 115 lbs. (Fitzpatrick) 0. J. Forbes' Disturbance, aged, 118 lbs. (Gates) 0. Weidman & Co.'s Jocose, 4, 113 lbs. (Murphy) 0. Time, 1:02 1/2.

Betting.—9 to 5 on Jim Renwick, 5 to 2 on Saunterer, 6 to 1 against Mammonist, 7 to 1 each against The Admiral and Fellowship, 10 to 1 against Disturbance, 12 to 1 each against Maid of Athol and Jocose. Pools: Jim Renwick, \$35; Saunterer, \$30; Mammonist and Fellowship, each \$10; the field, \$10. Mutuels paid, \$15.

After several breakaways the flag dropped to a good start, the Maid of Athol taking the lead, followed by Saunterer and Fellowship. Entering the main track The Admiral showed to the front, but on the lower turn Jim Renwick shot into the lead and held it to the close, winning by half a length. Saunterer next, two lengths in front of The Admiral. The order of the balance was Mammonist, Maid of Athol, Fellowship, Disturbance and Jocose. Time, 1:02 1/2.

Same Day.—Sweepstakes for four-year-olds and upwards; at \$50 each, half forfeit, with \$200 added, the second to receive \$150 out of the stakes; horses never having won a race of the value of \$1,000, when carrying weight for age or over, at place of running allowed 5 lbs.; if maidens on March 1, 1884, allowed 10 lbs.; and if at the time of starting, 15 lbs. 1s subscribers; one mile. E. Corrigan's b m Pearl Jennings, 5, by Lelaps, dam Mary Howard, 115 lbs. (Murphy) 1. E. J. McElmeel's Navaro, 115 lbs. (J. Harvey) 2. E. J. Baldwin's Gano, 118 lbs. (Holloway) 3. Time, 1:45. (Winner trained by J. W. Rogers).

Betting.—5 to 4 on Pearl Jennings, 8 to 5 against Gano, 4 to 1 against Navaro. Pools.—Pearl Jennings, \$100; Gano, \$60; Navaro, \$30. Mutuels paid, \$9.50.

The order of the start was Navaro, Pearl Jennings and Gano. Navaro led round into the up-stretch, when Pearl Jennings came forward, then drew away and won by two lengths, Navaro second, half a length in front of Gano. Time, 1:45.

Extra Day, July 21.—A sweepstakes for all ages, at \$15 each, play or pay, with \$400 added, the second to receive one-half the entrance money; weights, 5 lbs. above scale; horses not having won since May 20, when carrying weight for age or over, a sweepstake of the value of \$800, 7 lbs. allowed; non-winners in 1884 allowed 14 lbs.; maidens allowed, if four years old, 16 lbs.; if five years or upwards, 24 lbs.; 8 entries; mile and five hundred yards. O. Bowie's b g Compensation, 6, by Catesby, dam Australia, 108 lbs. (Arnold) 1. E. J. Baldwin's Lucky B., 4, 109 lbs. (Holloway) 2. M. Young's Cardinal McCloskey, 4, 106 lbs. (Taylor) 3. R. W. Walden's Chanticleer, 3, 110 lbs. (Sheridan) 0. W. L. Scott's Referee, 4, 113 lbs. (Lewis) 0. C. W. Medinger's Emma, 3, 98 (carried 10 1/2) lbs. (Maynard) 0. J. R. Keene's Burgomaster, 3, 110 lbs. (Fitzpatrick) 0. Time, 2:16 1/2.

Pools: Burgomaster, \$120; Referee, \$80; Compensation, \$60; Lucky B. and Chanticleer, each \$50; and field, \$40. Betting.—7 to 5 against Burgomaster, 4 to 1 against Compensation, 5 to 1 against Referee, 6 to 1 against Lucky B., 8 to 1 against Chanticleer, and 10 to 1 each against Cardinal McCloskey and Emma. Mutuels paid, \$30.80.

Burgomaster led round to the half post, when Compensation went forward into the lead and held it to the finish, winning by four lengths, Lucky B. second and a length in front of Cardinal McCloskey third. The order home of the balance was Chanticleer, Referee, Emma and Burgomaster. Time, 2:16 1/2. W. R. Woodard (formerly Tempelhof) was scratched at 10:45 A. M.

Second regular day, July 22.—First race.—Flash Stakes, for two-year-olds, at \$100 each, half forfeit, only \$25 if declared by July 1st, with \$800 added, the second to save its stake; closed with 21 subscribers, of which — declared; half a mile. E. J. Baldwin's h c Volante, by Grinstead, dam Sister Anne, 110 lbs. (Holloway) 1. W. L. Scott's Florio, 107 lbs. (Lewis) 2. R. W. Walden's Harrigan, 110 lbs. (Blaylock) 3. Morris & Co.'s Ten Stone, 110 lbs. (Spellman) 0. E. Corrigan's Lizzie Dwyer, 107 lbs. (Conklin) 0. O. Bowie's Captain, 110 lbs. (Taylor) 0. M. Young's Bootblack, 110 lbs. (D. Williams) 0. Time, 49 1/2. (Winner trained by Albert Cooper).

Pools.—Florio, \$50; Volante, \$50, Lizzie Dwyer, \$20, and field, \$20. Betting.—Even money against Florio, 5 to 2 against Volante, 3 to 1 against Lizzie Dwyer, 8 to 1 against Ten Stone, 10 to 1 against Bootblack, 12 to 1 against Harrigan, and 15 to 1 against Captain. Mutuels paid, \$27.90.

The usual delay took place at the half-mile post, but the flag dropped at the tenth effort, when Volante took the lead, with Harrigan close at his heels, the others well up. In the run round the turn, Florio and Bootblack looked promising, but in coming up to the homestretch Volante regained his advantage

and won cleverly, two lengths in front of Florio, with Harrigan third, half a length away. The order of the balance was Ten Stone, Lizzie Dwyer, Captain and Bootblack. Time, 0:49 1/2. Florio, the favorite, was the winner of the Youthful and Brentwood Stakes at Washington and the Foun and Great Post Stakes at Sheepshead Bay.

Same Day.—Excelsior Stakes, for all ages, at \$50 each, half forfeit, with \$1,400 added, the second to receive \$250 and the third \$100 out of the stakes; closed with 21 subscribers; mile and a quarter. E. Corrigan's b g Freelan, 5, by Lougellw, dam Belle Knight, 117 lbs. (Murphy) 1. E. J. McElmeel's Gen. Monroe, 6, 120 lbs. (Blaylock) 2. E. J. Baldwin's Marie Stuart, 3, 109 lbs. (D. Williams) 3. Time, 2:11 1/2.

Pools.—Freelan, \$300; Gen. Monroe, \$270, and Marie Stuart, \$35. Betting.—5 to 3 on Freelan, 6 to 5 against Gen. Monroe and 2 to 1 against Marie Stuart. Mutuels paid \$8.60.

Freelan led off, but at the start (quarter mile), the other two were upon even terms. Marie Stuart cut the pace round the western turn, but on the backstretch the three were parallel. Near the half-mile post, Marie Stuart fell back beaten. The other two ran neck and neck round to the seven-furlong post; when Freelan drew away and won handsomely by a length and a half under a strong pull. Gen. Monroe second and a dozen lengths better than Marie Stuart. Time, 2:11 1/2.

Same Day.—Purse \$400, for all ages; entrance (\$15 each) to the second; winners in 1884 of any race of the value of \$1,500 to carry 3 lbs. 5 lbs.; non-winners of any race allowed 12 lbs.; maidens allowed, if three years old, 15 lbs.; if four years, 20 lbs.; if five years or upward, 25 lbs.; 5 entries; three-quarters of a mile. G. R. Buchanan's ch g Jim Renwick, 6, by Joe Hooker, dam Big Gun, 112 lbs. (Holloway) 1. W. L. Cassidy's Saunterer, 6, 112 lbs. (Blaylock) 2. R. R. Owing's Mammonist, aged, 112 lbs. (Conklin) 3. G. R. Bernegnan's Burch, 4, 109 lbs. (Maynard) 0. Time, 1:15 1/2.

Pools.—Saunterer, \$80; Jim Renwick, \$30; Burch and Mammonist each \$15. Betting.—2 to 1 each against Jim Renwick and Saunterer, 3 to 1 against Burch, and 4 to 1 against Mammonist. Mutuels paid, \$13.50.

When the flag dropped the order away was Saunterer, Jim Renwick, Burch and Mammonist. Jim Renwick led near the furlongpost, after which a dense crowd of dust enveloped them. On the turn Saunterer and Burch were even in the lead, with the other two also together. Saunterer afterwards regained the lead, but in the run home Jim Renwick moved rapidly and came home a good winner by three lengths, Saunterer second, a length in front of Mammonist, with Burch last. Time, 1:15 1/2.

July 23d.—Purse \$450, for all ages, of which \$100 to the second; entrance free; winners in 1884 of any race of the value of \$1,500, or two or more races of the value of \$1,000 each, to carry 5 lbs. extra; horses non-winners in 1884 of a race of the value of \$600 allowed 7 lbs.; if non-winners of any race in 1884 allowed 14 lbs.; maidens allowed, if three years old, 17 lbs.; if four years, 20 lbs.; if five years or upward, 23 lbs.; mile and 500 yards. O. Bowie's ch f Bessie, 4, by Dickens, dam Belle Meade, 99 lbs. (Arnold) 1. W. F. Burch's Jim Nelson, 6, 110 lbs. (Spellman) 2. E. J. Baldwin's Shenandoah, 3, 91 lbs. (Higgs) 0. Time, 2:16 1/2.

Betting.—5 to 4 on Bessie, 6 to 5 against Shenandoah, and 5 to 1 against Jim Nelson. Pools.—Bessie and Shenandoah, \$100 each; Jim Nelson, \$35.

It was so dark and thick when the horses went to the post that they could only just be seen. With the flag Bessie took the lead, which she held for nearly five hundred yards. Shenandoah then went to the front and in turn held the lead to the end, with Bessie in close attendance. Just at the finish Shenandoah fouled Bessie, and the result was that the Maryland filly got the race. Jim Nelson, although beaten fully twenty lengths, was placed second; Shenandoah disqualified. Time, 2:16 1/2.

The race was run in a pouring rain, with thunder and vivid lightning. The track got so bad that Shenandoah, who was winning easily, slipped, which was the cause of his swerving.

The Arab Race.

The race for Arab horses arranged by the English Jockey Club was run on July 24, and proved to be a very slow affair. "Pendragon" is moved with a deep feeling of disgust and fairly kicks the desert steeds:

Had anybody other than the Jockey Club, after a long course of taking everything and giving nothing, offer a large proportion of its at last reluctantly forthcoming niggard gift for a race among Arabs—a race which could by no possibility teach us anything, or do the smallest conceivable thing to better the position of the turf or improve the breed of race-horses—how angry anybody who is critically inclined would have been—how ready to denounce the dunderheads who thus arranged an event, the only fit comparison to which is a race between donkeys on the sands at Margate or Ramsgate! If anybody thinks this comparison is unfair and far-fetched, allow me to say that I have seen a donkey—and a seaside, laboring donkey, too—gallop within the past few days, and feel sure that no one of the Arabs that ran in Wednesday last's race can beat him as far as the Arab himself would be beaten in a subsequent race over the same course with a real representative British racer. And I wouldn't at all mind entering into the necessary arrangements for the trial. Also I would, in the event of the other races "coming off," guarantee to produce an ordinary carriage horse, that works in the shafts every day of his life, who would make the best of his way against the winner of the Arab race, over any fair distance, for any fair money stake. These are our new opinions of mine, as anybody may see for himself if he only cares to turn to what I have said over and over again whenever the great Arab question has come on for discussion.

The one advantage I can see in the new race is that folk who had never seen an Arab, and who believed all the stories told by travellers about the flying capacities of steeds of the desert, had an opportunity at last of being disillusioned. In the days when hacks and hunters would have compared unfavorably for shape and make with a modern Clydesdale, and when roadsters were bigger and heavier than the noble plough teams to be seen on any first-rate farm, the Arab was doubtless a wonder of style and symmetry, speed and staying power. To the Arab is due all credit for having by an infusion of his blood and his beauty made the English thoroughbred what he is; but the English thoroughbred lives to show the advantages of judgment and skill in mating—is undoubtedly the finest sample extant of the absolute necessity of breeding from different sources if you wish to obtain a perfect animal. In the thoroughbred and the Arab we find the joint stock which produced the high-mettled racer; and you might just as well talk of running the one sort as of running the other against him. I wonder what Geheimnis could be the winner of the Arab race in an offhand spin across a flat?

New 2:30 Trotters for 1884.

Table listing various horse names and their owners, such as Alexander [Emergy's], b. h. by Don J Robinson, dam Nelle Wilkins, with associated prices and details.

Trotters that have lowered their records:

Table listing horse names and their record times, such as Adelaide, b. m., with a record of 2:24.

New pacers for 1884:

Table listing horse names and their owners, such as Ben Star, b. g., with associated prices and details.

Pacers that have lowered their records:

Table listing horse names and their record times, such as American Boy, b. h., with a record of 2:29.

Trotting at Healdsburg.

Table listing race results and times, such as July 26th—Match, \$25 each; \$50 added.

"How to Tell the Age of a Horse," is a pocket manual, giving full information of the methods employed by professional horsemen and veterinarians to determine the age of horses with numerous illustrations, showing the shape of the teeth at different ages, and a chapter on horse character, or how to determine the disposition of a horse, with portraits of several famous trotters and thoroughbreds.

The American-bred horse, Foxhall, (1878) by King Alfonso, dam Jamaica, by Lexington, made the past season at Leyhounae Grange, near Maidstone, England.

Gov. Stanford has presented Mr. Frank Work, of New York, with the bay filly Stella, by Electioneer, dam Lady Rhoades by Gen. Taylor.

There is a veritable boom in pacers. Most of the fast ones that have been converted to the diagonal gait are being coaxed heck to the pace, and new candidates for side-wheel honors are appearing everywhere.

From New Orleans, on July 11th, a freight train took out, bound for New York, sixteen Texas broncho horses, stallions and mares, the destination of which is Constantinople, Turkey.

Hack owners, livery men and all who use carriages will find it to their advantage to examine the claims of the Vulcanized Fibre Axle Washers. They have received the unqualified endorsement of the United Carriage Company of this city, after a four years' trial.

The bay gelding James H. is showing up fast in a very sudden and unexpected way. One day last week while working with Arab and Vanderlyn he lapped Arab out in 2:22, having trotted three-quarters of a mile at a 2:19 gait.

Report says that Driver, by Volunteer, has been sold to Western parties, apparently for road purposes. It is suspected, however, that he may become rejuvenated and find his way back to the turf again.

John Adams has his big Comet mare training at the Sacramento track, and has made a match 600-yard race with C. T. Dean's Little Alpha, for \$500 a side to be run over that track Saturday, Sept. 6th.

Old Red Boy is on his feet again. At Helena, Montana, on July 4th, he won a mile dash with 121 pounds up in 1:48, and on the 5th he was first in a race of three-quarter mile heats with 115 pounds.

Fallen Leaf is undoubtedly seriously ailing, if not broken down. She has been let up on work and only gets walking exercise, but no news comes from the stable direct, and the extent of the trouble is not definitely known.

Another of the get of Milliman's Bellfounder entered the 2:30 list at Helena, Montana, July 4th, the chestnut gelding Tempest. He won a third heat in 2:29. He is owned by Chas. Russell of Walla Walla.

The West Side Racing Association, of Butte City, Montana, whose Summer meeting was to have begun Aug. 17th, has postponed it indefinitely and all stakes and entrance money have been returned.

A turfman suggests that it is a remarkable fact that all of the fifteen trotting races, during the late meetings at Mystic and Beacon Parks, Boston, were won in straight heats.

At Helena, Montana, on July 4th, the chestnut stallion Rancho, by Clark Chief, Jr., a Montana bred horse, trotted in 2:23, the fastest heat yet recorded in the Territory.

Freda scored her first win of the year at Monmouth Park last Tuesday. The race was a mile and one-eighth, and was run in deep mud and a pouring rain. Time, 2:02.

Mr. Hamilton Busbey, of the Turf, Field and Farm, is on a buffalo hunt in the Rockies. He seems to be enjoying himself fairly, but has reported no scalps as yet.

Matt Storms is yet unengaged and if nothing offers soon he will open a public training stable at Agricultural Park, Sacramento, which is his present address.

Zoe B. is rated by turfmen to be the fastest trotter ever sired by Blue Bull. The mare was at Phil. Thompson's wheel in 2:17 1/2 at Chicago.

Gladiator, the 2:22 son of Blue Bull, has been temporarily retired from the turf for the purpose of converting him into a pacer.

Bay Frank has been blistered and laid up. There is little prospect of his being got into racing form this season.

Answers to Correspondents.

Questions answered only through these columns. No replies by mail or telegraph.

F. L. D., Santa Rosa. Please inform me through the columns of your valuable paper, who owns the bay gelding Felix? Also the owner of the black gelding Prince, and their postoffice address.

Answer.—Felix is owned by Mr. Peter Schatz, Robella, Penn.; Prince, by Geo. W. Butcher, Marshalltown, Iowa.

S., Grass Valley, Cal. A case in point, and a bet to decide. The decision is left to myself, but I prefer better authority and therefore appeal to you to interpret rule 32, sec. 1, relative to dead heats. (National Trotting Association Rules). On July 5th, at this place, there was a trotting race between three horses; Bally won first heat, Bally and Prince made dead heat on second heat, Hardscrabble won third and fourth heats, and Bally won fifth heat—the race was mile heats, three in five. The sun went down and the race was postponed until Monday, when the three horses started, and Bally won the heat and race. The question is, did not Bally win the race on Saturday?

Answer.—The race was correctly managed. Bally had won only two heats when the race was postponed. A dead heat cannot be counted as winning anything as it is, as far as affecting the final decision of the race is concerned, no heat

Sales in Montana.

W. H. Raymond, of Belmont Stock Farm, Fuller's Springs, Montana, has recently made the following sales of trotting bred fillies.

Chestnut filly Florida, two years old, by Commodore Belmont, dam Lady Rothchild, by Mambrino Patchen; 2d dam by Edwin Forrest. To John Donegan; price, \$325.

Chestnut filly Farce, two years old, by Commodore Belmont, dam Irene, by Dictator; 2d dam by Alexander's Abdallah. To C. B. Jefferies; price, \$375.

Bay filly Formosa, two years old, by Commodore Belmont, dam Polly, by Forest Goldust. To O. B. Barber; price, \$250.

ATHLETICS.

Our Athletes Abroad.

[Extracts from the Field.]

The opening event introduced us to A. Waldron of the Manhattan A. C., who in America has been timed to run the 100 in 10 1/2, with the wind blowing "freshly in the face of the runners." Though the afternoon was favorable, Waldron did not show this form on Saturday, but an excuse was made for him that a sprained ankle had interfered with his training.

With George unable to appear, Snook was expected to win the three-quarter mile race, though so little was known of Fredericks' capabilities that many held themselves ready for a surprise. The American mile runner displayed plenty of pluck, good style, and it is evident is not wanting in stamina.

An easy victory was scored by R. P. Murray, of the Williamsburg Athletic Club, in the four-mile walking race; but the talent were divided in their opinion as to the fairness of his mode of progression. Certain it is that while Murray's style after the first half mile (during which his disqualification would by many not have been found fault with) was no worse than what is in this country frequently accepted as fair, it compared most unfavorably with that shown by W. H. Meek, who it will be remembered, won the seven-mile walking race at the recent championship meeting.

The Americans in England.

We clip the following from an English exchange: "Whatever may be the pecuniary result of the joint speculation of the South London Harriers and the Manhattan Athletic Club, in arranging for the appearing of the American amateurs in this country, there is no question but that their performances, up to the present, have been very disappointing. This remark does not apply to Myers, who is evidently as good as ever, and has once more shown himself to be as far in front of our amateur cracks as Hanlan is in front of our scoulers. Fredericks can apparently just manage to run a mile in 4 min. 32 sec., and we should, therefore, have no trouble in finding a dozen men to beat him. If we may judge by his two races, Waldron is at least a couple of yards behind Cowie in 100 yards, which does not make him out to be more than a good handicap runner, and we cannot understand how he made the records with which he is credited. Murray's time is certainly satisfactory, and we wish we could say the same of his style. He settles down fairly enough before he has completed his first mile, but by that time he has gained such a lead that he can afford to walk, and on each of the occasions that he has won in this country a competent referee would have had him off the path in the first half-mile. Our men were nearly as great sinners in this respect as he was, and both races ought to have gone to Meek, the other American, whose style is a model of fairness."

American Athletes.

The athletic meeting held at Birmingham on July 19th, was a comparative failure in point of attendance. Although it had been extensively advertised that Myers would run 1,000 yards, and the admission fee was reduced to six pence, there were less than 4,000 people present and the sport was rather poor, owing to the prevalence of a high wind, which retarded the runners. The 1,000-yard race was won by Snook, who was given 32 yards start, Myers being at scratch. The finish was most exciting and Myers evidently did his best, and looked much distressed when he came in. The winner's time was 2 minutes 13 4/5 seconds. Myers finished two-fifths of a second later, and beat the English record by two seconds. Fredericks won the half-mile race in 2 minutes 1 2/5 seconds, and Murray won the three-mile walk in 21 minutes 48 seconds.

Merion Club Programme.

The following programme has been announced for the Merion Club Meeting, on September 9th: 100 yards, 220 yards, 440 yards, half-mile and one mile handicap runs; 120 yards hurdle race; 10 hurdles 3ft. 6in. high; 100 yard school race; 100 yards maiden race; 1/2 mile and 2 mile bicycle handicaps; high jump, (handicap); 3 inch limit; pole vault; obstacle race; one mile handicap walk; 100 yards slow bicycle race; tug of war, militia company's team of six. Entrance fee, 50 cents; entries close Aug. 30th. Handicaps declared Sept. 4th. Prizes, gold and silver medals, which will be on exhibition at a Market street store on and after August 20th.

The American amateur championship games are set for September 27, and will take place on the Williamsburg grounds.

Snedeker won the one mile swimming race for the trophy offered by the Williamsburg Athletic Club, of New York. Time, 42m.

The English Press on Murray.

We clip the following paragraphs from the leading English sporting papers.

Whyatt tried hard to walk or rather run down Murray, but the latter was as good at the lifting game as the ex-champion, and though the two went clear away from Meek from the pistol fired, there is no credit in them doing so, as he was the only walker in the field for the first thousand yards.

With regard to the walking, or rather so-called walking, I am sorry to say that the style of progression adopted by Murray for the first mile was far from satisfactory; indeed, I do not scruple to say that had the duties of referee been left in my hands, even though I might have felt inclined to have allowed the visitor a little extra law, I should have disqualified him before he had gone half a lap, as a more decided run I have seldom seen.

Where were the judges when the Welking Race was on? Not watching Murray, I should think. Talk about Harvie, Whyatt and Morgan lifting. Why, compared to these men, Murray is nothing better than a flat-footed trotter, and all around the path he was greeted with the cries of "Well run, old man," whilst Meek was hailed with a perfect roar of cheers for his perfect style of progress.

Kittleman Redivivus.

A letter received this week from M. K. Kittleman reports the champion sprinter in good health and spirits. The note is written from Romeo, Mich., under date of July 23d. He says they will not go to England this Fall on account of the cholera, but expect to return to California early, probably in September.

Murray's style of progression can be gauged by the time his first quarter-mile occupied, viz: 1 minute 27 3-5 seconds, or at the rate of considerably over ten miles per hour. To assert that a man can walk at such a pace as this is simply absurd, and the cries of "well run" and hisses which greeted the performer were rather too universal to be pleasant.

Spencer's Long Tramp.—On June 7th, the English pedestrian Spencer, aged 64 years, completed his long task, having walked 5,306 miles on beer, etc., in 100 days, against Weston's walk of 5,000 miles in 99 day days on temperance drinks, etc.

In the four-mile walk, Murray and Meek gave one of the finest displays of genuine toe-and-heel progression that has been seen in any amateur contest for many years, and we may at an early date look for a mile in "six-thirty" from the former.

A Greco-Roman wrestling match, best two falls out of three, between Messrs. Davis and Luttringer, will take place at Turn Verein Hall, 310 O'Farrel St., Saturday evening, Aug. 9th, 8 p. m.

A swimming contest for a gold medal was held at the Newport Baths, Alameda, last Sunday. The distance of the race, which was open to all boys under the age of fifteen, was 150 yards.

A novel match has been made between the champion "sprinter," (Hutchens), and John Keen, "the flying wheelman," the latter to ride a bicycle three hundred yards whilst Hutchens runs the same distance.

James Fleming, the Scottish athlete, will shortly leave for Australia, where he will reside permanently. Excepting Dinnie, he is the best all-round Scotch athlete that has ever appeared.

At Toronto, July 19th, the Toronto Club, (the champion), and the Montreal Club contested for the Lacrosse championship of the world. The Montreal team won by a score of three to two.

The mile record of America will probably be lowered at the coming Springfield meeting. Hendee, Dolph and Burnham have announced their intention of competing.

The Indian team of lacrosse players—The Royal Canawagas—defeated the New York team on the Polo Grounds July 23d, after a brilliant game.

The International Lacrosse match between England and Ireland, on July 5th, resulted in a victory for Ireland by 4 goals to nil.

It is said that Matsada Sorakichi, the Japanese wrestler, gets \$25 per week for wrestling, W. E. Harding taking all the profits.

CRICKET.

The Occidents Win After an Exciting Contest.

The fourth match for the Harrison Trophy was decided at the Olympic ground last Saturday afternoon and resulted in the third victory of the senior club. The game, which was certainly the best ever played between the local clubs, was witnessed by a larger attendance than usual, including a goodly sprinkling of the fair sex.

Table with 2 columns: Player Name and Runs. Includes B. S. Benjamin, J. G. Barnett, B. Cookson, etc.

Table with 2 columns: Player Name and Occidents. Includes H. Bristowe, J. S. Purdy, J. A. Waterman, etc.

Table with 3 columns: Player Name, Balls, Runs, Wickets. Includes Banner, Webster, Miller, etc.

We clip the following from The American Cricketer. "We miss Charlie Newhall very much; he is still very lame, and I think it very doubtful if we have him with us at all."

"Wherever you chanced to look around the stand on the day of the match you would have thought you were in Philadelphia, so many familiar faces were to be seen. The result, though of course expected, was somewhat of a disappointment, especially the fizzle in the second innings.

fessed to look upon their big score as a matter of luck, especially Studd and Wehhe, who are two of the nicest Englishmen I have met, and who made a great impression on our team, both socially and as cricketers.

"Al Scott hated beautifully and John Thayer and Law gave him good assistance. Bob Newhall hated very nicely and carefully for his score in the second innings.

"Scott has done the most consistently good batting, although his average is not the highest. It would have done your heart good to have heard Captain Green applaud et Lord's. You could have shut your eyes and imagined yourself at Germantown. I must say that the English were equally generous, though perhaps in a more discriminating manner.

The first eleven of the Staten Island Cricket Club, using baseball bats, recently defeated a picked eleven, using cricket bats, by a score of 150 to 44.—The return match between the Gentlemen and Players resulted in a victory for the Gentlemen by six wickets. The chief scorers were: Ulyett, Barlow, Betes, Lord Harris, W. W. Read, W. G. Grace, and A. G. Steel.

A Cricket Umpire's Dream.—At Eccleshall, near Sheffield, England, there was formerly a parish clerk called Lingard, who was also a notable umpire. One hot Sunday he was asleep at his desk and was dreaming about a match to be played the next day.

BICYCLING.

Professional Championship.

Table with 4 columns: Miles, H. M. S., Leader, Miles, H. M. S., Leader. Lists names like Battersby, James, Lees, Wood, Battersby.

The following races were held by the Salt Lake Bicycle Club: Best two in three one mile heats for championship and gold and silver medals.

Best two in three 1/2 mile handicap races. Mr. Jennings, scratch. J. Silver, 15 feet ahead; J. Woods, 30 feet; H. Cartright, 73 feet. Won by Mr. Cartright, silver ghollet as prize.

The L. A. W. racing board has admonished Messrs. Freuzier, Heudea, Edgerly, Norton, Hogue, Mathewson, Heveu, Segur, Norcross, Millard and Rothe, contestants in the recent races of the Harvard, Mass., Bicycle Club, which had not received L. A. W. sanction, to be careful in their selection of race meetings hereafter and to be fully assured that the same are sanctioned by the League.

The Kangaroo Safety Bicycle is the very latest invention. The correct lines upon which the Kangaroo is built, its absolute safety, great rigidity and speed, entitle it to rank as a bicycle eminently adapted for road-riding and touring.

Mlle. Armeindo and Fred Sewell have been delighting audiences in Springfield, Ill., for two weeks with their fancy and trick riding; also at Quincy, Ill., one week. Armeindo is to ride another long distance race soon.

On July 3d, at the Crystal Palace grounds, England, G. Hillier made a quarter of a mile with a flying start in 35 2-5e heating the previous record by one second.

J. Wallace F. Diss, sporting editor of the Examiner, has been appointed Pacific Coast correspondent of the Springfield (Mass.) Wheelmen's Gazette.

Brooklyn young ladies are taking great interest in tri-cycling, and it is reported that a club is in process of formation there.

THE DRAMA.

Vienna Garden.

There has been a very agreeable performance at this establishment during the week, which now the entrance is again free, ought to be extensively patronized. Among the principal attractions are the dancing of Mlle Ortori, assisted by Misse Berglund and Heibech, and the ventriloquism of Mone. Nagirroc. It is many years since we heard anything equal to Mons. Nagirroc in his line.

THE RIFLE.

Shell Mound.

Outside the regular monthly matches and weekly practices which always draw a number of riflemen every Sunday to this popular range, the presence of Col. W. M. Farrow, of Springfield, Mass., as guest of Col. Ranlett and other members of the Fifth Infantry Battalion, was a feature of last Sunday, and not only drew a good many outsiders to the range out of curiosity to see him shoot his 100-shot match with Lieutenant Kellogg and Privates Pierce and Waltham of the Fifth, but in other ways gave interest to the day's events. All our readers may not know Col. Farrow was a leading member of the American team that went to England to shoot the International match at Wimbledon, and that among his trophies won at the target are an almost endless list of splendid rifles and valuable cups, some of which were won on English soil. In both countries, the best characteristics of which, individual as well as national, are those born of a devotion to field sports, our Eastern visitor stands in the very foremost position as a rifleman. It was, therefore, a brave and good act of Kellogg, Pierce and Waltham, in the absence of Kuhle and Hovey, our local leaders in the 100-shot shooting, to stand forward for the honor of the State and give battle to the doughty champion of the East. To those who feel an interest in the progress and success of rifleism in California, it will be gratifying to see Lieut. Kellogg make such a good fight, and still more so to see that Farrow, great as he is, had to succumb to the prowess of Lieut. Kuhle with a record of 460, and of Sergeant Hovey with 456 at that trying kind of shooting. In this respect the result of Sunday's match was a source of gratification to our State pride, for it shows in skill in field sports, as well as warmth in hospitality, California is the peer of the world. In addition to this it must be remembered the members of the Fifth used their ordinary military rifle while Col. Farrow used a 40 calibre, 70 grain Ballard, with peep and globe sight, which according to Creedmoor and handicap rules gives an advantage of 10 points in 100, not 38 as stated by the daily papers, and that only when the gun is cleaned after each shot. According to this calculation, Col. Farrow was beaten by Kellogg. It is this fact which makes the result of the day so highly gratifying. We always welcome such men as Col. Farrow among us with the warmest feelings, but if they choose to measure their strength with our men and get tumbled over, we have no apologies to make, no regrets to express. On the contrary, we obey the pride of our heart—jump on the first fence handy, flap our wings and have a good crow. In this connection doing so is neither vulgar bravado, nor offensive vanity, for if in all the comparative records we have lately given the fancy rifles and fancy sights of the Eastern men are only weighed against the common, plain military rifle of our men, we are always found to be a long, long way ahead of them in our records. Thus in this case we have no sorrow to waste on Col. Farrow. If we had we should be preferring the dainty effeminacy of the East to the noble manhood of the West, and thus be very unjust. The score:

Table with columns for names (W. M. Farrow, Lieut. S. J. Kellogg, Private Ed. Pierce, Private C. F. Waltham) and scores for various distances (500, 400, 300, 200, 100 yards).

By this score it will be seen Kellogg increased his record by one point, but Waltham, with 446, and Pierce, with 451, fell badly below their record.

Following up the official shooting of the day, at the same place, we come next to the regular monthly medal match of the San Francisco Fusillera, Company C, Second Artillery, N. G. C. This was well attended, and several of the members present did some excellent shooting, especially Lieut. Mangels. At both ranges, 200 and 500, his percentage was a fraction over 90. Beside contending for the company medals and cash prizes, the members present competed also for the marksman's badge, and for places on the regimental team, but by some error the latter were not properly recorded and cannot be given. It was said, however, that most of the badges for the ensuing month will fall to the members of this spirited company. Springfield rifles only were used by this company.

Table titled 'FIRST-CLASS MEDAL' listing names (Mangels, Kuhle, Robertson, Bruer, Luencke, Thieson, Hanke, Thierbach) and scores for 200 and 500 yards.

Table titled 'SECOND CLASS—500 YARDS' and 'THIRD CLASS—200 YARDS' listing names (Sergt. Markus, Cor. H. Frank, J. D. Ralph, Sergt. P. H. Will, Sergt. D. Wulbein) and scores.

In the competition for monthly medals, amongst the members of the Union Guard, Gatling Battery, Second Artillery Regiment, R. Stothers won the first-class medal, J. West the second class, and E. Powers the third class.

In outside matches at the same place, principally to practice for the Sunday match, the next on our list is that between Col. Farrow, our visitor, and Col. Ranlett, commanding officer of the Fifth. This took place on Saturday, when the wind was too strong for really good shooting. Under the circumstances both scores were respectable. The match was at 200 yards, off-hand Creedmoor rules. The score:

Table comparing scores for Farrow (Ballard rifle) and Ranlett (Sharp's rifle) at 200 yards.

There was also on Sunday a friendly contest, at the same place, between three members of Companies B. and C., First Regiment, two strings of ten shots each, which resulted as follows:

Table titled 'FIRST STRING' and 'SECOND STRING' comparing scores for Simpson, Townsend, and Ruadock.

Among the pleasures of the day to onreeve was meeting Hub Parker, of Nevada, whom we found the same genial soul of olden times. To keep up the fun of the day he followed Peckinpa's custard-pie racket and shot Linville a match for one of the largest possible size and beat him easily. Parker says he has had lots of matches with the policemen, with gun and rifle, but that Linville never did heat him, and he does not intend he ever shall. The score:

Table comparing scores for Parker and Linville.

As the matches were drawing to a close, Kellogg bantered Farrow to try him three shots at 500 yards off-hand for a smile for the crowd, and the banter was at once accepted. In these shots the Eastern champion showed his ability with the rifle in grand style, and this time squelched Kellogg thoroughly. Both are graceful shooters, but at this distance, off-hand, Farrow shot with wonderful rapidity. The score:

Table comparing scores for Farrow and Kellogg at 500 yards.

We smiled—that's all we have to say.

Before leaving the butts the BREEDER AND SPORTSMAN took a shot at the 200-yard range and scored a four. With sinister intent, we believe, Kellogg meddled with the elevation of the sight, and thus robbed us of a bull's-eye. Taking his score at 500 yards on Sunday, with Farrow as a guide, we now challenge Kellogg for a five-shot match at 500 yards, for two custard pies, the cigars and sherry. We intend to give him a repetition of Farrow's dose for his meanness.

At Schuetzen Park.

There was quite a large attendance at Schuetzen Park on Sunday, chiefly of those practicing for the great Schuetzen tournament which commences there to-morrow and closes on Monday. Among those appearing as a club were

The Eintrachts,

But the attendance from this live organization was much smaller than usual. The score of those present was:

Table listing names (Captain Kuhls, Lieut. Kaufung, Mr. Schneider, Mr. Gumbel) and scores.

At Harbor View.

The Swiss Rifle Club had its usual monthly shoot and dinner at Harbor View on Sunday. The attendance was small, but we know few clubs that have a more pleasant time at their meetings. The score:

Table titled 'BEST CENTRE' and 'BEST POOL TEN SHOTS' listing names (J. Leemann, H. Hoff, M. Stuber, And. Frei, F. Huguenin, P. E. Croce, J. Bachman) and scores.

Rifleman: In answer to your query as to the total score of the two teams of the Fifth Infantry, we thought we were sufficiently explicit last week for all understandings. On Sunday week the total score of seven men was 3,113 out of a possible 4,000 with 100 shots to the man. On the Sunday that the match was advertised to come off, the Company A team, four men, made 1,751, but on the Sunday following, owing to Macdonald's accident, the team, three men, only made 1,303. Now put 1,813, the score of the Staff team, and 1,751, the best and first score of Company A, we have a grand total of 3,564, instead of 3,113, out of a possible 4,000. We claim this to be a head of all rifle scores, and Col. Farrow thinks much the same way.

We spoke last week of the New Winchester Rifle now on exhibition at Mr. Allon's gun store on Market street. We have since gathered some more essential particulars about this splendid gun. It is 40 calibre, and uses 60 grains of powder, lead bullet, 210 grain, of sufficient length to prevent its turning over. The shell is 1 1/2 inch long and slightly tapering to the end. The price is \$29. The rifle is at it stands in a great credit to the Winchester Arms Company, and, as we said last week, we hope our riflemen and sportsmen will inspect it without delay.

The Schuetzen Tournament.

To-morrow, at Schuetzen Park, Alameda, the Schuetzen Club open their prize tournament, which will continue over Monday. This distinguished body of sharpshooters was established in 1876, to encourage rifle practice in this State, and we are chiefly what we are in that respect by their influence. More than this they have carried our flag to the East and Europe, and in all their engagements come out victors. The State owes a great debt of gratitude to the California Schuetzen Club. Their tournament for 1884 will be on the same magnitude of former ones. Altogether there will be 225 prizes in cash, jewelry and silverware, amounting to \$1,500 at least. The shooting is open to all. By this time the character of the prizes and their value are known to all, and we need only refer for particulars to the advertisements in another column and the circulars of the club. There will be an immense crowd at the park to-morrow. We beg to acknowledge the receipt of an invitation from President Jacoby, and intend by all means to be present. In this issue we have given several scores of members of the Schuetzen Club which afford us a correct idea of the contests and scores we may expect during the tournament. Let all interested in rifle shooting be present.

Linville's Challenge Off.

At seven o'clock Tuesday evening Police Officer P. D. Linville met Captain Farrow at Ladd's gun store and signified his intention of putting up a forfeit of \$100 for a match at the target for \$500, the distances to be 200, 500, 600, or 1,000 yards, the weapons to be any military rifle adopted by any Government. Farrow refused to shoot Linville unless under the Creedmoor rules, which, Farrow claims, allows him to use either the Brown, or Remington Hepburn rifles, with "peep" sights. As those rifles give a practiced hand at least ten per cent. the advantage, and as Linville never used one, he objected, but reiterated that he would shoot with any military rifle, six pounds pull, and open sights at any distance. Farrow refused again and negotiations were dropped. However, Farrow offered to enter a sweepstake match with eight or nine men, military rifles with open sights to be the weapons, and the winning man to take the entire stake. This match, it is thought, can be arranged without difficulty, and at no distant day. The Brown rifle costs \$200 and cannot be purchased here.

Another Great Score.

Six members of the Schuetzen Club, shooting at Alameda on the 13th of July, made a remarkable score, in fact the highest authorized score known. The shooting was at a 31-inch, 25-ring target, 200 yards off-hand, 20 succession shots to the man. Possible 500.

Table listing names (Philo Jacoby, Strecker, Freece, H. C. Smith, J. H. Stanton, John Utschig) and scores.

These are mostly the same names we mentioned at hazard last week as those we relied upon to sustain the honor of the State against the Eastern champion at the Schuetzen tournament, opening at Alameda to-morrow.

Strecker's Great Score.

Mr. A. Strecker, at Schuetzen Park on the 20th of July, succeeded in making the highest possible score in three shots 75 out of a possible 75. His succeeding shots were: 25, 25, 21, 25, 25, 25—146. This only lacks four of the possible 150. What do you think of your chances to-morrow, Col. Farrow?

On Sunday evening the officers of the Fifth Infantry gave a small but unique dinner party to Colonel Farrow. The commanding officer, Col. Ranlett, took the head of the table and Lieut. Kellogg the bottom. The Hon. H. G. Parker, of Nevada, Captain Sprowl and Mr. Leigh Harnett of this city were also guests. During the evening, as may be imagined, some tough old bear stories and other hunting yarns were told. Hub Parker took the cake in the evening as he took the custard pie in the afternoon. There is now a standing wager in this office of \$50 to back the old veteran against any man in the State. We ourselves have retired from the business forever. Hub Parker is the champion. The Secretary of the State Field Trial Club will please make a note of this fact.

THE GUN.

The Game Law.

Table with columns for months (January to December) and rows for various game species (Quail, Partridge, Rail, Grouse, Doves, Male Deer, Female Deer, Spotted Fawn, Antelope, Elk, Salmon, Trout).

At Birds' Point.

The Gun Club of San Francisco held its regular monthly meeting last Saturday to shoot for the two club medals. Seventeen members put in an appearance, as the occasion was to be honored by the presence of Mr. Mackintosh, formerly a prominent and popular member of the club, who had taken a run down from Portland, Oregon, for a short visit to his old friends in this city. The conditions of the match were as usual—a handicap under Hurlingham rule, with 100 yards boundary. Four out of the lot, Messrs. Cradall, Mackintosh, Emmet and Bent, accepted the handicap, but Messrs. Grant and Bacon, who also were accorded the privileges, preferred to shoot at 30 yards. Mr. Bacon chose with a twenty-bore gun, which, though too light for such birds as were turned loose on Saturday, is nevertheless as perfect a

little gun as was ever put to the shoulder, and his low score may be attributed more to his gun than himself, for he is very quick of sight. It was soon evident that the mischief was going to be played with the status of the men in the club, for while some of the cracks, from whom better things might be expected, others of lesser-standing were shooting with wonderful accuracy and quickness. Thus Orr, Gordan, Hanson, Grant, Babcock, Fuller and Emmet were soon out of the fight, while one or two others were never in it. Those with ten to their credit shot manfully and well, even sometimes better than well, especially Ramon Wilson, and fought the battle with grit to the end. The contest really lay with Messrs. Ewing, Butler, Mackintosh and Al. Havens, all of whom shot in grand form. Mr. Ewing lost his sixth bird, Havens his seventh. To lose such birds was no disgrace to any man, and the latter fulfilled the hope we expressed last week while speaking of his late misses. Nothing could be quicker or more deadly than the shooting of these gentlemen. It was only excelled by Messrs. Butler and Mackintosh, because they each made twelve straight kills without the one solitary temptation to miss the others experienced. The birds were a grand lot and the chances in character were most equally distributed all round. It was the first time we had ever the pleasure of meeting Mr. Mackintosh, and we soon saw that he understood his business. He is, indeed, an excellent shot, quick, clean and accurate. As this gentleman was only a visitor, of course he had no interest in the medals, so, though he made twelve straight kills, and tied Mr. Butler, the first medal went to the latter gentleman. Mr. H. H. Briggs acted as umpire. The score:

Table of shooting scores with names like Butler, Mackintosh, Ewing, etc., and columns of numbers representing bird counts.

At San Bruno.

Much discussion in many quarters during the week took place respecting the match, last Sunday, at San Bruno. From the large prizes offered and the character of the gentlemen entering this was only natural. When the prizes are \$250, \$150, and \$100, and such men as Robinson, Fay, Walsh, Hopper, and Bassford contest them, there is something in the shooting world worth talking about. Our account of the ground it was found there were eight entries, all of whom shot at thirty yards, except Ben Brown, who was allowed the twenty-four-yard peg. Each man had forty birds, the fence round the grounds being the boundary, a bird lighting on the fence being considered lost. Mr. Ramon Wilson acted as referee, and at 10 o'clock the fight opened. Crittenden Robinson appeared first at the trap, and missed his first bird in gallant style. It was a taller though and got away briskly enough and but little damaged after receiving both barrels. Lambert succeeded and did good shooting until his thirteenth bird, when he missed, then went all to pieces as he always does, if not head man, and lost all chances of getting a prize. Lambert is a most unreliable man at the trap when shooting with equals, and thus we dispose of him. Mr. Fay who has risen very rapidly in public estimation lately by his brilliant achievements, as well as justified the confidence we have always placed in him as a good shot, came next and also missed his first bird, but he afterwards, next to Robinson, did the best shooting of the day and captured second prize. Why Lambert should be made first favorite in a pool against Robinson and Fay is something we cannot understand. He is simply not fit to shoot with them. Neither Walsh nor Hopper shot up to their reputation, and both retired before reaching their thirtieth bird. H. Bassford, like his brothers, is a sound man at the trap though, perhaps, as some say a little slow with tailers. But in the opinion of all good judges his thirty-four kills out of forty birds show he is not so slow after all for a man with a really sly nature and eye could never make that performance at San Bruno, if there is any wind at all. Taken altogether, the match was one of the most interesting of the season. The utmost harmony and good will prevailed among the shooters, and the numerous spectators—among the latter being many ladies, who cordially cheered the successful shots—showed that an appreciative crowd witnessed some of the prettiest shooting that has as yet taken place in the grounds of San Bruno. The score:

Table of shooting scores at San Bruno with names like C. Robinson, J. Lambert, Ed. Fay, etc., and columns of numbers.

There was some very lively betting, and Killip & Co. sold nearly a hundred pools, at from \$60 to \$20 for first choice. At the start, owing to Ben Brown's bad judgment in bulling the market, Lambert sold a shade higher than Robinson, but whenever this was the case Robinson was on hand, and bought quite a lot of pools on himself. The day was a peculiar one for San Bruno, as the wind blew all day from the southwest. During the latter part of the shoot it blew so hard that the birds seemed to hesitate about launching forth on their flight. The veteran trapper, Rice, handled the ropes, and as usual pleased everybody. There was not a single dispute or wrangle of any kind. In the early part of the match when, by a fortunate chance, Lambert and Robinson were equal, Robinson offered to bet a hundred dollars he would heat

Lambert, but no one ventured to take the banter. Lambert, of all present, was the most silent and susepish. This at once shows what opinion he holds of himself, and that he dare not shoot Robinson a hundred-bird match, although he gets ten birds given him at start. The public have much the same opinion.

A New Beast.

A tale comes from the Catskill region which will perhaps puzzle the naturalists. According to a dispatch from Kingston, New York, "A few years ago a large female dog of the Newfoundland species strayed from its owner, wandering off to a forest eight miles from Poughkeepsie" There is nothing strange so far. But it is now declared that the missing animal has been "herding with the foxes and other wild animals which abound in that region," and that in consequence a new kind of beast has been produced "in which the leading characteristics of the dog and fox tribe are curiously combined," while "a strange element of ferocity unknown to either of these species is added." We may expect to find the same in animals as human beings. The Creole is said to have all the passions without any of the virtues of the white parent. Why should it not be so with dogs?

Worth Noticing.

The talking over the merits of the different brands of powder, particularly as to the merits of the Eastern and California manufactures, Col. Farrow gave preference to the production of the California Powder Works. On Sunday, in the 100-shot match, as a good test he used the Valley Mills' brand, and was astonished to find it so excellent in all that goes to make good powder. We had always supposed the Pacific Rifle brand was their best article, but this testimony of one so capable of judging as Col. Farrow speaks volumes in praise of the California Powder Works Co. for the Valley Mills brand stand at the bottom of their official list. As it is always well to use home productions when everything is equal, we beg to call the attention of traders and sportsmen to Col. Farrow's opinion, and hope they will be governed by it. The opinion was given in an accidental conversation of the moment, and therefore its honesty cannot be doubted.

The Forester's Match.

On Sunday last the monthly shoot of the Forester Gun Club was held. The scores were as follows: Watson 11, Zuver 11, Todd 5, H. Gerber 5, Schroth 5, Coffey 5, Miller 7, Tebbets, 6, Eckhardt 6, Ruhstaller 5. Watson and Zuver shot off the tie on 11 at double birds, Watson winning, as follows: Watson 5, Zuver 4. The main match was followed by a sweepstake, \$2.50 entrance, 21 yards, 5 birds: Todd 5, H. Gerber 5, Watson 5, Parrott 5, Zuver none. The ties were decided at a freezout, 31 yards: Todd 1, H. Gerber 7, Watson 6, Parrott 5. The next match was for \$5 entrance, 21 yards, at 10 birds: Todd 10, H. Gerber 9, Watson 5, Parrott 10. Todd and Parrott shot off at 31 yards, freezout, Parrott winning, Todd having lost his first bird.

The Old Tale.

According to the American Field, young prairie chickens are served at the restaurants and hotels in Chicago these days. That paper well says that "it is an outrage and a disgrace to the sportsmen of Chicago that prairie chickens should be so openly offered for sale at this season of the year; and the sooner the members of the various sportsmen's clubs in Chicago realize their responsibility in the matter, the better it will be." We may apply the rebuke to ourselves in other respects.

The Sunday Capital of Sacramento says: "In its report of a recent shooting match at the bay, the BREEDER AND SPORTSMAN said: 'We would like to form some theory of Al. Havens' shooting this year.' Well, suppose you should form a theory, what good would it be the next time Havens goes to the trap? Did you ever see him shoot around at archery? If so, you ought to understand that Havens is the most erratic shooter that ever faced a target or trap. He is a good one (at times) but you could no more establish the theory of his style of shooting than you can account for—for—well, the red sunsets, for instance." Does not this smack of personal prejudice, which, if indulged in, is fatal to correct journalism? Had the editor of the Capital seen Mr. Havens' shooting on Saturday last, he would have seen the BREEDER AND SPORTSMAN was right in this as in most other cases.

The buffalo, or more properly, the bison, is nearly exterminated in Texas. It is stated upon good authority that only one herd of any size is to be found in the Lone Star State. This herd, which is the remnant of what was known a few years ago as "the great Southern herd," is now in the Staked Plains region, along the Pecos River, and a band of hunters continually harasses these bison, killing them as fast as the meat can be cared for, and their days are nearly numbered.

Last Saturday a pigeon match was had at Santa Monica between W. B. Hellings and E. Duham. The score stood as follows:

Small table showing scores for Hellings and Duham.

Two weeks from next Saturday there will be another match between Duham and Hellings for \$150 a side.

In speaking as follows, the Sunday Capital shows the editor's old good sense. We can personally endorse the statement: "Sportsmen visiting the hay will meet with a pleasant reception at Winslow & Kelly's headquarters at 871 Market street, nearly opposite the Baldwin Hotel. They have a room neatly fitted up for the use of sportsmen, and it is a quiet, respectable place, where only gentlemen will be tolerated."

Some parties who were out lately in the fields between here and Folsom report having bagged considerable numbers of doves. They will soon be up from the south and become abundant.

Fred Erb, of St. Joseph, Mo., challenge W. B. Hanworth to a 100-bird match for from \$100 to \$250 a side, allowing his opponent two yards.

THE KENNEL.

Curing Gun Shyness.

A correspondent of an English contemporary gives the cure for gun-shy dogs. The opportunities for applying the treatment are so frequent in this part of the world that a trial will reduce the minimum of time and trouble:

I once had a very good setter bitch; hersire and dam could not be equalled in the field. She was everything I could desire, and when very young would stand fur or feather like a statue. I took her out one day and tried her with the gun. I put a small charge of powder only in the cartridge; at the first shot, away she went! I tried to get her to come back to me, but the nearer I tried to get to her she would holt again. I tried her several times, but with the same result. I was much dismayed, as I had calculated on having such a good bitch. She was both handsome and affectionate, which made me very loath to part with her, and I could not find courage enough to poison her. One day I was talking to the Rifle Corps drill sergeant about rifle shooting, and he said: "Should you like to try a rifle, sir?" "Oh, yes," I said. "Then come with me to the butts, to-morrow," said he, "and see if you can hit a target." "All right," I replied, and I went. When I got to the range, I found my setter bitch had followed me, so I made her secure with a slip and the sergeant sat down beside me while firing. Up to the fifth round we could do scarcely anything with her; the poor thing seemed frightened to death. About the eighth round she got better; at the 10th round she only jumped back, and from that she began to understand that the noise did not hurt her. When twenty rounds had been fired I took the slip off her, and she actually ran under the guns while firing, and from that I never had any trouble with her; she was perfectly cured. I attribute my success to the dog being beside the gun when fired, and the number of shots fired. If any one of your readers possesses a gun-shy dog and circumstances permit, let him try the same remedy, and I feel sure he will get over the difficulty. Let me add one more word—never, under any circumstances, whip a gun-shy dog. If you do it's all over, for he loses confidence completely.

Breakers at Field Trials.

At a meeting of the Committee of the National Field Trials, held on June 6th, 1884, at 23 Grosvenor-square, London, W., A. P. Heywood-Lonsdale, Esq., in the chair, the following resolutions, with a view of strengthening the hands of the judges in the case of disobedient and noisy breakers, and for the protection of those who suffer from the unruly actions of their opponents, were passed, viz.:

- 1. That at the National Field Trial meetings, for the future the judges be requested by the committee, and empowered, to first caution, and upon repetition of the offense, turn out of the stake, any breakers not beating the ground to their satisfaction, not keeping together, or outwalking their opponents, or unduly or unnecessarily whistling or shouting, or in any way behaving in such a manner as, in the opinion of the judges, is detrimental to the chance of success of their opponents; and that it shall be permitted for any breaker or owner, feeling himself aggrieved upon any one of these points, to request the interference of the judges.
2. That the judges be requested in giving their awards to take into their very serious consideration the manner in which the ground is quartered and beaten; and not to award a prize to any breaker or dog who does not beat his ground and work exactly as he would do were he actually out shooting.
3. That at the National Field Trial meeting, 1885, a prize of £10 be awarded to the breaker who, in the opinion of the judges, beats his ground in the most sportsmanlike manner—Sporting Times.

Nominations for the Derby of the Pacific Coast Field Trials Club will close on the 15th inst. with the Secretary, N. E. White, Sacramento. All pups whelped on or before April 1st are eligible. Of the entrance fee \$3 is due when the entry is made, but the balance, \$7, is expected from starters only. This nominal expense should induce the nomination of every eligible pup in the State. The trials will not be run until the middle of November at the earliest, and most likely later than that. Pups that appear indifferent now may blossom out into winners by the time the trials come on, and the only way to secure a place is to nominate now. These puppy trials are of the greatest importance to breeders, and we hope and expect to see every one of them in the entry list.

The fine thoroughbred Laverack puppy bitch recently purchased by Mr. Payne, of Los Angeles, has not yet reached her new home, owing to a severe attack of distemper. From her excellent pedigree and great promise Mr. Goodsell, of Delaware, from whom she was purchased, thought it best to keep her at his kennel until thoroughly recovered. According to last accounts she will soon arrive in Los Angeles.

The Iowa Homestead enthusiastically pronounces the sunflower the best egg-producing food known for poultry, keeping it in a thriving condition, and largely increasing the production of eggs. Every poultry raiser who tries it will find that this is the best food known for glossing the plumage of fowls, and is most indispensable to those who want to fit their birds for exhibition to the best advantage. The Russian sunflower is easily raised, requires very little care, and can be grown in fence corners and other places difficult to cultivate. Its production of seed is immense, yielding often at the rate of one hundred bushels to the acre. It should be planted in the hills four feet apart, any time from the 10th of May to the 1st of July. Three quarts of seed will plant an acre.

Now is the time to give lime in some shape to hens. They are rapidly exhausting the egg-shell supply in their systems, and you must stop the drain. So, give oyster and clam shells; the former are best because they are the softest. Crack them fine. By roasting them they will pulverize better. Give lime in water. Use a low pau with water and lime in it. The water will take up lime, and the hens, knowing a great deal more about themselves than perhaps others do, will take what they want. Bone meal is an excellent. It may be purchased in most large towns, and do not give the hens lime in some shape, they will not give eggs.

# THE Breeder and Sportsman.

JOSEPH CAIRN SIMPSON, - - - EDITOR

## NEW YORK AGENCY.

Mr. C. C. Pettus at the office of the "Sportsman," 46 Murray Street, is duly authorized special representative of the BREEDER AND SPORTSMAN in New York to receive subscriptions and arrange advertising contracts.

## SACRAMENTO AGENCY.

Residents of Sacramento and vicinity, desiring to subscribe or advertise in the BREEDER AND SPORTSMAN, can do so through our agent, Mr. M. J. Henley, Russ House, 1,009 J Street.

## ADVERTISING RATES.

Displayed, \$1 50 per inch each insertion or pro rata for less space. Reading Notices set in brier type and having no foot marks, 30 cents per line each insertion. Lines will average ten words. A discount of 10 per cent will be allowed on 6 months, 20 per cent on 9 months and 30 per cent on 12 months contracts. No extra rate charged for cuts or cutting of column rules. No reading notice taken for less than 60 cents each insertion.

San Francisco, - - Saturday, August 2, 1884.

## Dates Claimed.

Bay District, San Francisco (Fall Meeting), August 2d, 5th, 7th, and 9th.  
Santa Cruz Fair Association, Santa Cruz, August 12th to 16th.  
Sonoma County Agricultural Association, Santa Rosa, August 18th to 23d.  
Sonoma and Marin District Association, Petaluma, August 25th to 30th.  
Thirteenth District, Marysville, Aug. 26th to 30th.  
Golden Gate Fair, Oakland, September 1st to 6th.  
Chico Fair Association, Chico, Sept. 1st to 6th.  
State Fair, Sacramento, Sept. 11th to 20th.  
Ninth District Fair Association, Rohnerville, Sept. 23d to 26th.  
San Joaquin District Fair, Stockton, September 23d to 27th.  
Santa Clara District Fair, San Jose, September 29th to October 4th.  
Monterey Agricultural Association, Salinas, Oct. 7th to 11th.  
Fresno Fair Association, Fresno, October 7th to 11th.  
Los Angeles Fair Association, Los Angeles, October 13th to 18th.

## Closing of Entries.

We anticipate our regular publication day this week in order to remind our readers of the date of closing of entries for the Summer and Fall circuit. Notwithstanding the usual advertising and editorial mention there is a proneness to neglect till the last day and then forget to attend to the matter in time. Regrets will not correct the omission. Friday, August 1st, is the last day. Entries to be acceptable must be delivered in person to the Secretary, or plainly postmarked on or before that day. Entries made by telegraph must be repeated by mail. All the principal meetings close on the same day with the exception of Santa Rosa which is one day later, Saturday, the 2d. The programmes have heretofore been adverted to but a brief review of them here may not be out of place. Santa Cruz comes first in date, commencing Aug. 12th and continuing to and including the 16th. The purses offered in open to all races are: Trotting—\$400 for 3 minutes class; \$500 for 2:27 class; \$400 for 2:40 class; \$500 for 2:22 class. Pacing—\$400 for 2:20 class. Running—\$150, half mile and repeat. District Trotting—\$200 for 2:40 class; \$150 for 3 minute class; \$150 for 2:50 class and \$250 for free for all. Entries should be addressed to Jas. O. Wanzer, Secretary, Santa Cruz.

Santa Rosa follows. August 18th to 23d, open races are. Trotting—\$500 for three minute class; \$500 for 2:40 class; \$750 for 2:22 class; \$600 for 2:27 class; \$800 for free for all; Director to wagon. Pacing—\$500 for 2:20 class. Running—Stake for two-year-olds, three quarters of a mile; \$25 each; \$10 forfeit; \$150 added; \$50 to second horse. Stake for three-year-olds, one mile and a half; \$25 each; \$10 forfeit; \$200 added; \$75 to second horse. Mile dash for all ages, \$25 each; \$10 forfeit; \$200 added; \$75 to second horse. Half mile and repeat for all ages; \$25 each; \$10 forfeit; \$150 added; \$50 to second horse. Selling Purse, \$200, one mile and an eighth, entrance free. Two and a quarter miles dash for all ages; \$30 each; \$15 forfeit; \$250 added; \$75 to second horse. District races are: Trotting—\$500 for 2:45 class, open to Sonoma, Napa, Marin, Yolo, Solano, Lake and Mendocino counties. Stockholders Purse, \$250.

Petaluma, August 26th to 30th; open races. Trotting—\$800 for 2:40 class; \$1,000 for 2:22 class; \$1,000 for 2:27 class; \$1,000 for free for all; Director to wagon. Pacing—

\$600 for 2:20 class. Running—Mile dash for all ages; purse \$300. Three quarters of a mile for two-year-olds; \$25 each; \$10 forfeit; \$100 added; \$25 to second horse. Mile heats for all ages; purse \$500. Selling purse; one mile and a quarter; entrance free; \$50 to second horse. Two mile dash for all ages; purse \$600. Consolation purse \$150; \$50 to second horse; one mile. District races. Trotting—\$300 for three-year-olds; \$400 for 2:40 class; \$150 for yearlings; \$150 for gentlemen's roadsters. Running—Mile dash for all ages; \$25 each; \$10 forfeit; \$100 added; \$25 to second horse. Entries and nominations to W. E. Cox, Secretary, Petaluma.

Golden Gate Fair, Oakland—September 1st to 6th. Trotting—\$800 for 2:22 class; \$600 for four-year-olds; \$600 for 3-minute class; \$800 for 2:30 class; \$600 for three-year-olds and under; \$250 for yearlings; \$800 for 2:35 class; \$400 for two-year-olds; \$800 for 2:26 class; \$1,000 for free-for-all, Director to wagon. Pacing—\$500 for free-for-all, Corette to wagon. Running—\$500 for two-year-olds, three-quarters of a mile; \$500 for all ages; mile and repeat; \$500 for all ages, two miles; \$500 for all ages, three-quarters of a mile and repeat; \$1,000 for all ages, four miles.

State Fair, Sacramento, September 8th to 20th. Racing from 11th to 20th-- Trotting—\$1,200 for 2:25 class; \$1,200 for 2:27 class; \$1,200 for 3-minute class; \$1,200 for 2:22 class; \$1,200 for 2:40 class; \$1,200 for 2:30 class; \$1,500 for free-for-all, Director to wagon. Pacing—\$1,000 for 2:25 class. Running—The Introduction Stake for two-year-olds; \$25 entrance; \$10 forfeit; \$200 added; \$50 to second; third to save stake; three-quarters of a mile. The Del Paso Stake, for all ages; \$50 entrance; \$15 forfeit; \$250 added; \$75 to second; third saves stake; three-quarter mile heats. Selling purse, \$200; entrance free; second horse, \$50; one mile and an eighth. The Premium Stake, for all ages; \$25 entrance; \$10 forfeit; \$200 added; of which \$50 to second; third to save stake; three-quarters of a mile. Free Handicap Stake; \$50 entrance; \$25 forfeit; \$15 declaration; \$350 added; \$75 to second; third to save stake. Weights announced September 5th; declaration September 8th, by 8 p. m.; two and one-quarter miles. Free Purse, \$300, for all ages; \$50 to second; \$25 to third; one mile and repeat. The Orange Stake, for two-year-old fillies; \$25 entrance; \$10 forfeit; \$150 added; \$50 to second; five-eighths of a mile. Selling purse, \$250, for all ages; entrance free; \$50 to second; one and three-eighths miles. Free purse, \$400, for all ages; \$100 to second; \$50 to third; one mile and a half, and repeat. The Sunny Slope Stake, for two-year-olds; \$50 entrance; \$10 forfeit; \$200 added; \$75 to second; third to save stake. Winner of Introduction Stake penalized 5 pounds. Winner of California Annual Stake penalized 5 pounds. Winner of both penalized 10 pounds; one mile. The Shenandoah Stake, for three-year-olds; \$50 entrance; \$15 forfeit; \$250 added; \$75 to second; third to save stake. Winner of Derby Stake penalized 5 pounds. Winner of Breeders' Stake penalized 5 pounds. Winner of both penalized 10 pounds; one mile and a quarter. The Nighthawk Stake; for all ages, \$50 entrance; \$15 forfeit; \$200 added; second \$75; third \$50; \$200 additional, if best time (1:41½) in the State is beaten. Stake to be named after winner, if Nighthawk's time (1:42½) is beaten; one mile. The Pacific Coast Handicap, for all ages; \$100 entrance; \$50 forfeit; \$20 declaration; \$400 added; \$150 to second; \$100 to third. Weights announced September 16th; declaration September 17th, by 8 p. m.; three miles. Ed. F. Smith, Secretary, Sacramento.

Stockton Fair, Sept. 22d to 27th. Open to all races. Trotting—\$2,000 for stallions; \$1,000 for 2:36 class; \$1,200 for 2:22 class; \$1,000 for 2:27 class; \$1,200 for free-for-all, Director to wagon. Pacing—\$500 for 2:25 class. Running—Selling purse, \$600; mile and repeat; \$600 for hurdles, mile and repeat over four hurdles; \$300 for all ages, mile and repeat; \$500 for novelty race, one mile and a half. District races, trotting—\$400 for two-year-olds or under; \$400 for four-year-olds; \$400 for three-year-olds or under; \$400 for 2:36 class. Running—\$400 for two-year-olds or under, mile dash; \$500 for all ages, mile and repeat. District comprises counties of San Joaquin, Calaveras, Tuolumne, Stanislaus, Mariposa, Merced, Fresno, Tulare and Kern. J. M. LaRue, Secretary, Stockton.

San Jose, September 29th to October 4th --Open to all races. Trotting—\$500 for 3-minute class; \$750 for 2:22 class; \$500 for 2:30 class; \$500 for 2:40 class; \$300 for three-year-olds; \$500 for 2:26 class; \$750 for free-for-all, Director to wagon. Pacing—\$500 for 2:20 class. This race was originally announced for 2.25 class; but afterward changed to 2:20. Running—Three-quarter-mile dash, free for all; \$25 entrance, \$10 forfeit; \$150 added; \$50 to second horse. One-mile dash, for two-year-olds; \$25 entrance; \$10 forfeit, \$150 added; \$50 to second horse. Two-mile dash, handicap; \$50 entrance; \$25 forfeit; \$15 declaration. \$250 added; \$100 to second

horse; third to save entrance; weights announced Monday, September 22d; declaration Wednesday, September 25th. Half-mile and repeat, free for all; \$25 entrance; \$10 forfeit; \$200 added; \$75 to second. One and one-half mile dash; \$25 entrance; \$15 forfeit; \$200 added; \$75 to second horse. Selling race, one mile and repeat, for all ages; purse \$200; entrance free; \$50 to second horse. One-mile dash for two-year-olds; winner of No. 2 harred; purse \$200; \$50 to second horse. Free for all; one mile and repeat; purse \$250; entrance free; \$50 to second horse, \$25 to third. Novelty race; one mile; purse \$350. District races; \$200 for buggy horses. J. Hinman, Secretary, San Jose.

The date of entry for the Chico meeting has also been extended to the 1st. The open to all races are: Trotting—\$400 for 2:30 class; \$300 for 2:35 class; \$150 for roadsters; \$400 for free for all. Pacing—\$400 for 2:20 class. Running—Three-quarter dash for two-year-olds; entrance \$25, p. p.; \$125 added. Union Hotel Stake; one-and-a-half-mile dash for all three-year-olds; entrance \$25, p. p.; \$200 added. Three-fourths of a mile and repeat, for all; entrance \$25; \$175 added. Free for all, one mile dash; entrance \$25, p. p.; \$150 added. Seven-eighths of a mile dash, for two-year-olds; entrance \$25, p. p.; \$150 added. Society Stake, free for all, two-mile dash; entrance \$50; \$25 forfeit; \$300 added.

There are some other meetings which close on the 15th which we will refer to at length next week.

## Fixed Events to Close.

The most important of the fixed events for running horses close on the 1st, and while it will not be news to the parties most interested, we cannot forbear this last opportunity to urge upon owners and breeders to support the stakes freely. It hardly need be said that colts without engagements have little or no value in the market, and breeders who do not train or race are as much interested in having their youngsters named in the future stakes as any speculator on the turf may be who likes to see large fields on starting day or buys his horses for racing purposes.

The stakes of the Blood Horse Association, for which many entries have already been received in advance of closing day, are as follows:

Winters' Stake—For three-year-olds, to be run the first day of the Spring meeting; dash of one and a half miles; \$100 each, \$25 forfeit; \$300 added; second to have \$150, third to save stake. Nominations in above to be made for 1886.

Same day—California Stake; for two-year-olds; \$50 each, \$25 forfeit, \$250 added; to be run on the first day of the Spring meeting; second to save stake; dash of half a mile. Nominations in above to be made for 1885.

"Spirit of the Times" Stake—Dash of one and three-quarters mile for all three-year-olds; \$100 each, \$25 forfeit, \$300 added; \$150 to second, third to save stakes. Nominations in above to be made for 1886.

Same day—Gano Stake; dash of three-quarters of a mile for two-year-olds; \$50 each, \$25 forfeit, \$250 added; second horse to save stake. When any California two-year-old heats the time of Gano, 1:15 for three-quarters of a mile, the stake to be named after the colt which beats it. Nominations to be made for 1885.

Stallion Stake—Conditions: Only those three-year-olds are eligible which are the get of stallions owned in this State.

The stallions have to subscribe the amount charged for their services to the fund; private stallions at the price of their last season, and those which have not made a public season, to pay \$50, that sum being the minimum price. The owner of the get of a stallion is competent to name. The stake for the colts shall be \$100 each, \$25 forfeit; plate or money added at the discretion of the committee; distance, one and three-quarter miles. To close for 1884 on the 1st of August, at which time both stallions and colts (progeny) must be named.

Finigau Stake—For two year-olds; dash of a mile; \$50 each, \$25 forfeit, \$250 added; second to save stake. Nominations to be made for 1885.

Same Day—Fame Stake—For three-year-olds; dash of two miles; \$100 each, \$25 forfeit, \$300 added; second to have \$150, third to save stake. Nominations to be made for 1886.

Jos. Cairn Simpson, Secretary, 508 Montgomery street, San Francisco.

The State Agricultural Society will also close the following fixed events:

California Breeders' Stake—For foals of 1882, to be run at the State Fair of 1885; \$50 entrance p. p.; \$300 added, of which \$100 to second, and \$50 to third. One mile and a quarter.

Maturity Stake—For four-year-olds in 1885, to be run at the State Fair of 1885. \$100 entrance; \$25 forfeit,

\$300 added; second horse, \$100; third \$50. Three miles.

California Annual Stake—For foals of 1883, to be run at the State Fair or 1885. \$100 entrance, \$25 forfeit; \$250 added; second horse, \$100; third, \$50; one mile.

California Derby Stake—For foals of 1883, to be run at the State Fair of 1886. \$50 entrance, p. p.; \$300 added; second horse, \$100; third, \$50. One mile and a half.

Ed. F. Smith, Secretary, Sacramento, Cal.

The Texas Cattle Plague.

There has been great excitement among the cattle-owners in Illinois and contiguous States this week over the arrival at the Chicago stock yards of a large number of cattle infected with the plague known as Texas fever. More than three-quarters of a century ago cattle-owners of the North began losing stock from this mysterious ailment. It was not until 1853, however, that the malady was publicly noticed in the West. The losses in that region became so great, with the extension of the traffic in Texas cattle between the Northwest and Texas, that in 1861 laws were passed for the protection of the healthy herds. Similar laws were passed by North Carolina a quarter of a century earlier. The losses of stock from this malady have by no means been confined to the States north of Mason and Dixon's line. Dread of "acclimatization fever" has deterred more than one man from taking pure-blooded stock to those regions of the South in which the germs of this plague find a permanent home. Scarcely a month passes in which accounts are not seen of the death of some valuable animal from this cause. Many, if not most, of the highly-bred Jerseys taken to the Gulf States have been carried off by the disease named, while cattle native to those States have seemingly escaped the attacks of the malady. Those who have lost most heavily from this cause are the farmers of the North and West. From the ground over which cattle from Texas had passed, their stock received the deadly poison, and died by scores. Others took from the stock-yards young cattle to graze and fatten, and the fatal fever carried the Northern animals off within a few days, while it left, apparently untouched, the ones that brought the germs of the disease from the South. Hundreds of thousands of dollars would not cover the losses in the Northwestern States from this cause; scarcely a year passes without adding largely to them from this cause. The great stock-yards are now the principal, if not the only source through which Northern cattle receive the contagion. This fact has been quite generally recognized by the more intelligent farmers, and few, if any, of that class can now be induced to buy cattle in these yards during the Summer and Autumn months. A few, however, too wise in their own conceit to heed the experience and warnings of others, do occasionally buy stockers and feeders from the great markets, and pay dearly for their folly. The opposition made last Winter to the passage of the bill creating the Animal Industrial Bureau arose from the fear that that bill would confer power to prohibit the passage of Texas cattle to the North, during the warm months. Dealers in cattle fought the measure so vigorously that it was practically nullified before it became law. The bill was primarily intended to crush out contagious pleuro-pneumonia, and the Western cattle interest never favored tacking to it the Texas fever clause; but the West submitted to the inclusion of that disease, under protest. Some idea of the strength of feeling aroused among the cattle dealers, and of the means used to defeat the bill, which seemed to threaten this branch of trade, may be gained from the fact that a single buyer of cattle at the Chicago stock-yards spent \$25,000 to defeat the measure. Fortunately the opponents of the bill were not able to keep the cattle interests of the North from obtaining some recognition from Congress, and it is possible to use some of the money, appropriated for the investigation of diseases of cattle, for the purpose of studying the origin, nature, and care of Texas fever. The disease has for some years been the subject of investigation by scientific men; but while they have lessened somewhat the mystery surrounding the nature of the malady, they have been unable to provide a means for preventing the attacks, or for curing an animal when the disease has seized upon it. The almost marvelous results of the investigations of Pasteur in the cases of charbon, chicken cholera and tuberculosis, those of Koch in relation to cholera in human beings, and those of other scientists in regard to these and other diseases, warrant the hope that an inquiry into the nature of the so-called Texas fever will result in the discovery of a means of controlling that disease. Should such happy results follow an investigation, the Texas cattle trade, including the brokers and the

packers of beef in, and shippers of dressed beef from the great markets, will all have cause for rejoicing, as will also those who wish to take stock of pure breeding from North to South, for the improvement of cattle in the Gulf States. Certainly no reasonable objection can be made to using, in the cause of so great an interest of this, so much as may be necessary of the appropriation placed at the disposal of the Animal Industry Bureau. Thus far the losses from Texas fever have greatly exceeded those from contagious pleuro-pneumonia in this country, and little effort has been made to protect cattle, North or South, from the mysterious scourge.

Stockton Conditions.

Horsemen who have in seasons past been prone to find fault with the conditions attached to the purses offered at Stockton, will find their occupation gone this year. The San Joaquin Valley Association had always been in the lead of other district societies in the liberality of its offerings, and we have yet to hear of an owner or trainer, however much he might criticize the reservations of the programme, who had a word to say after he had attended the meetings, and pocketed his proportion of the money hung up. The owners of race horses owe a debt of good will and gratitude to Mr. Shippee and his conferees for their liberal support of the turf, and the example they have set to kindred association in the matter of good purses and fair treatment, and that example has surely had good fruit. There has been a visible appreciation in the amount of money apportioned to the speed ring all along the line, since the Stockton society adopted its present policy, a fact that all interested well know. The usual requirements of all the fairs and racing associations this year is five horses to enter. Stockton with its purses from 25 to 40 per cent. larger than any other district fair, and in many cases fully equal to the State Fair itself, only requires six to fill. Surely this is a reasonable insurance against loss; and one no fair minded man will find any fault with. We believe that owners are alive to their own interests, and expect to see the Stockton entry list full and more than full in every event on the long programme.

Monmouth Park Stakes.

In the advertising columns will be noted the announcement of the stakes of the Monmouth Park Association. These are the richest stakes of the Eastern Seaboard and with the liberal conditions cannot but commend themselves. Those advertised include the fixtures of 1885, 1886 and 1887 that close on the 15th inst. For the first Summer meeting, 1885, the two-year-old events are the Hopeful Stakes, five furlongs, and the July Stakes, three-quarters of a mile; and for the Midsummer Meeting, the Tyro Stakes for two-year-olds, three-quarters of a mile, and the Sapling Stakes, three-quarters. For the second Summer meeting there are two events, both for two-year-olds, and three-quarters of a mile, the August and Criterion. For the two meeting in 1886, the stakes are the Lorillard, one mile and a half, for three-year-olds, and the Monmouth Oaks, for three-year-old fillies, one mile and a quarter, the first Summer meeting and the Stockton for three-year-olds, one mile and a quarter, and the Stevens for three-year-olds, one mile and five furlongs, for the Midsummer meeting, and for the second Summer meeting, the Omnibus, for three-year-olds, one mile and a half, and the West End Hotel, for three-year-old fillies, one mile and a half. For the second Summer meeting in 1887, the Homestead Produce Stakes, for the produce of mares covered in 1884, three-quarters of a mile.

Pacing Purse Reopened.

The purse for 2:20 pacers offered by the Bay District Association failed to fill and was declared off, but at the solicitation of owners the Association has consented to reopen it, and it will close on Tuesday, August 5th. The purses for this way of going are not many in the circuit and the side-wheelers should avail themselves of every opportunity to contest for public money. We trust that Mr. Hinchman will be favored with a good list of entries for this reopened purse, for if the pacers do not come forward when invited, the invitations may cease altogether. It is quite important to owners of this class of horses that associations be duly encouraged or the horses will be relegated to the road.

The races at the Bay District track begin to-day (Saturday) with the 2:22 class, for which Arab, Allen Roy, Albert W. and Vanderlyn will start. It ought to be a warm affair and as the track is fine there is sure to be good time and good sport.

The great exposition building of the State Agricultural Society is now ready for occupancy, and it is safe to say that no finer one for the purpose can be found in the world. The industrial exhibition will be open two weeks, from Sept. 8th to the 20th inclusive, and applications for space should be made at once to secure proper accommodations. Premium lists may be had on application to the Secretary, Ed. F. Smith, Sacramento, or at this office.

Westmont and his running mate, Firebrand, attempted to beat the Chicago performance, at Pittsburg, on the 17th ult., but failed, the time of the three trials being 2:02, 2:18, 2:26. Westmont hit himself in several places after going the first mile which explains the slow time of the second and third miles. When Westmont paced in Chicago in 2:01½, with a running mate, he made a break near the distance-stand and came under the wire without having struck a pace, but after being pulled up it could not be found that he had hit himself anywhere. While the new fashion of trotters and pacers with running mates may be a popular one with the public, it is not likely to continue in favor with horsemen, if the animals engaged therein are to be crippled whenever they make a break. And while on this subject it may be well to say that there is a great diversity of opinion among drivers and other people who should be posted in such matters as to the amount of credit which is due the runner in a performance of this kind. That Westmont can pace a mile with running mate in 2:00 was demonstrated by his miles at Chicago and Pittsburg, and yet no one would undertake to say that the runner that accompanied him can pull a four-wheel vehicle with a man in it in two minutes. According to the reasoning of the people who look at the matter in this light, Westmont does not receive much assistance from his running mate, and yet they would hardly assert that he is capable of pacing a mile in two minutes in single harness. Plenty of bets have been offered that the runner cannot draw the wagon in two minutes, and so the matter is still involved in doubt, and the only way to test it satisfactorily would be to drive the runner by himself with the wagon, when it would be apparent just what assistance he gives the pacer.

The project of giving a race through the Central Circuit which should be contested by trotters with running mates seems to have fallen through, as none of the associations have offered a purse for that style of contest. It was thought early in the Spring that such a race between H. B. Winship and mate and Frank and mate would draw well, and such would doubtless have been the case had not Westmont gone such a clipping mile with a running mate as to throw the trotters entirely into the shade. As the matter now stands it is probable that Winship and Frank will not get any exhibition at that way of going this season. Frank has been sent back to New York by John Murphy, and Winship and mate are in Boston. Whether or not Mr. J. M. Hill, the new owner of Westmont, has succeeded in making engagements through the country for his horse is not known. He received \$2,500 for the exhibition given at Pittsburg last week, and expects to obtain a like sum from the associations down the line.—Breeder's Gazette.

Trotting at Portland.

PORTLAND DRIVING PARK, July 23d. Purse \$250, for named horses.  
 Pedro, blk g, by Snowstorm—L. B. Lindsey..... 1 1 3 3 2 1  
 Johnny Blue, b g, by Alexander—Geo. Misner..... 2 2 1 2 1 2  
 Florence E., ch m, by Pathfinder—O. Smiley..... 4 4 4 1 3 3  
 Billy Reed, ch h, by Autocrat—J. Sawyer..... 3 3 2 4 4 ro  
 Time, 2:40, 2:37, 2:36, 2:37, 2:37, 2:39.  
 Same day—Purse, \$150, for three-year-olds; mile heats.  
 Oneco, b c, by Altamont—Jay Beach..... 1 2 1  
 Black Bess, blk f, by Rockwood—L. B. Lindsey..... 2 1 2  
 Time, 2:56, 2:52, 2:48.

Trotting at Petaluma.

Petaluma, July 26th, trotting stake, \$10 each; \$50 added.  
 Abe Ward b g—Jno. Fritch..... (Sperry) 2 1 1 2 1  
 Mollie Mac ch m—J. H. White..... (Grandall) 1 2 4 4 2  
 Belle—m..... (Burke) 3 3 3 1 4  
 W. B. g—Wm. Bihler..... (Kennedy) 4 4 2 3 3  
 Time, 2:47, 1:48½, 2:47, 2:48½.

At Pittsburg, July 22d, fully 9,000 people were present at the Exposition Park, to witness the attempt of Jay-Eye-See to lower Rarus' record of 2:16, half-mile track. The weather was warm, the track fast, but when he came out for warming up it was evident he was not in first-class condition. After doing a mile in 2:35½ the word was given, and he got away in magnificent style. Going round sharp he turned the ¼-mile in 35 seconds, he trotted the next ¼ in 33 seconds, making the half in 1:08, but on the third quarter he broke badly, losing several seconds and finishing the mile in 2:18½. Another attempt was made, but this time Jay-Eye-See broke twice and came in in 2:33½.

A number of horsemen of Ventura met a few days since at Daly's stables and determined to have a series of races on September 29th and 30th. N. Vickers, T. H. Daly and Joe Kaiser were chosen a committee to attend to affairs generally. A subscription paper will be circulated among our business men, as good races for Santa Barbara, Los Angeles and home horses will be in order, a large crowd will be drawn and a general good time had. Ventura is developing some of the finest horse flesh in the world, and our breeders of fine stock should be encouraged.—Signal.

There is a report that Mr. S. J. Jones is willing to match Blue Mountain Belle against the Adam mare for a 600-yard race. Both animals are of the Oregon short stock and ought to make a good race. Blue Mountain Belle is generally pnt down in the records as being by Napa, but Mr. Jones avers that it is only guesswork and that nothing is really known of her breeding.

The chestnut gelding Bonanza, by Joe Hooker—Mattie Glen, by Glen Athol, sold at Mr. Winters' sale to W. C. Christy, has been sent to St Louis, Mo. Mr. Winters calls Bonanza the fastest two-year-old he ever raised, and the colt is well engaged in the East.

Oneco, the bay colt by Altamont, dam by Doble, sold last Fall by Jay Beach to McKnight Bros., of Albany, Or., has been matched for \$1,000 a side against Capt. Sorenson's Bell-founder filly Susie S., and the race was set for yesterday, August 1st, at Portland.

Maud S. trotted a full mile at Cleveland Driving Park, July 17th, in 2:11½. Bair has been sick and unable to give work for the last few days. She was a little rank on the half but finished strongly. The quarter time was 34 and 33.

## HERD AND SWINE.

## Cattle of a Continent.—The Live Stock of North and South America.

(N. Y. Times).

One of the most interesting and useful displays at the coming World's Industrial Exposition, at New Orleans, will be that of the different grades of American live stock. At many of the annual county and State fairs in the Mississippi Valley during the Fall months may be seen displays of blooded stock from the Eastern States. Instead of returning these exhibits to their respective homes it is proposed this year that they be left in the West until December to be transported to the exposition at New Orleans. In addition to those exhibits, and because of the great importance of the occasion, many other specimens of the higher grades will be sent from the Eastern and Northern States. Extensive sheds for their accommodation are already under construction and ample arrangements have been made with the various railway companies for cheap transportation. It is safe to assert that the exhibits from different sections of the United States will be one of the most comprehensive ever made. But the important and distinguishing feature of this occasion will be the joint display at the exposition of the high grades of native stock and the lower grades from Mexico and the other States of Spanish America. It will, in brief, be an international display; a mingling of different breeds, and the beginning of an extensive interchange with resulting and mutual benefits.

A few general statistics relating to live stock in the United States may be useful in contrast with some facts relative to live stock in Mexico and South America.

A recent report of the Department of Agriculture gives the total number and value of farm animals in the United States, January, 1884, as follows:

	Number.	Value
Horses.....	11,169,693	\$633,734,400
Mules.....	1,914,126	161,214,976
Milk cows.....	13,501,206	423,486,649
Oxen and other cattle.....	29,046,101	683,229,054
Sheep.....	50,626,626	119,902,706
Hogs.....	44,200,893	246,301,139
Total value.....		\$2,467,868,924

United States Consul Sutton, in a recent and elaborate report, dated Matamoros, April 13, 1883, says of Northern Mexico:

"Roughly speaking, a line drawn from Guaymas, on the Gulf of California, to Tampico, on the Gulf of Mexico, represents the chief cattle range of Northern Mexico. From this enormous territory deduct one-third for mountains, deserts, and tillable land, and the remaining two-thirds is grazing land. Over all this territory, in every extreme of climate, from the thin, cold air of the high plateau to the low, hot lands of the coast of Tamaulipas, range the hardy progenitors of the Texas cattle—long-horned, large-horned, gaunt, immense beasts; they are simply frames upon which the sweet grasses of Kansas and the West will make fine beef. Their greatest value, however, is not for themselves alone. Descendants of the fine stock brought from Spain by the Spanish conquerors, nature has adapted them, through generations of neglect, to their wild life. They are hardy; they are wild; and while their rating as to class is low, yet the good blood of the past generations is still there. As I have said, they themselves will make good beef when fattened on the Western plains; but crossed with the improved hulls from the East or from Europe, one or two crosses brings them far above what the same would do for the ordinary class of cattle in the United States. Not only do they come up to a high grade of stock much more rapidly than the ordinary American cattle, but they still retain their great frames, the dark red color of the meat, and breed with great rapidity. They are what the Western stockmen admiringly call 'good rustlers.' They still retain their wildness, and hence do not stay tamely around water holes eating the short, poor grass, as do the American stock, getting thin and weak, to die in the first great storm. They multiply rapidly, stay out in the good grass and brush, have large frames, fatten rapidly, and make the best grass-fed beef that goes East. No wonder the stockmen of our plains are anxious to get them.

"This portion of Northern Mexico would include the States of Sonora, Chihuahua, Coahuila, Nuevo Leon, and Tamaulipas and portions of other States. In this territory are, on a reasonable estimate and from latest data available, an area of 300,000 square miles and about 1,000,000 inhabitants. Of this territory probably two-thirds is suitable, and more or less used, for the raising of cattle, horses, goats, sheep, and mules. I can only roughly estimate the number of live animals in this territory. In Texas, with an area of 237,000 square miles, there were in 1880 about 7,500,000 such animals, divided as follows: Neat cattle, 4,000,000; horses, 800,000; mules and asses, 132,000; sheep, 2,500,000. In this portion of Northern Mexico, with an area of, say, 300,000 square miles, there may be now something like 6,500,000 animals, and which I estimate as being divided about as follows: Goats, 2,500,000; neat cattle, 1,500,000; horses, 1,000,000; sheep, 1,000,000, and mules, 500,000.

"The difficulty of obtaining reliable statistics in Mexico makes it impossible for me, at this time, to do more than give the above rough estimate. I hope, however, during the year to obtain some reliable data on this industry."

Soon after Cortez completed the conquest of Mexico he received from the King of Spain a grant of large estates near the Isthmus of Tehuantepec. On his return from Spain to Mexico, in 1530, says the historian, "he imported large numbers of morino sheep and other cattle, which found abundant pastures in the country around Tehuantepec." Three hundred and twenty years later, or in 1850-51, the same grazing facilities were reported by Williams in his survey of the isthmus. He says: "The immense potreros which border all the principal streams on the northern division furnish rich pastures of never-failing verdure for numerous herds. During the short season that these potreros are inundated the cattle are driven to the more elevated savannas remote from the river margins. The extensive tablelands in the central portions of the isthmus, as well as the plains bordering on the Pacific, also furnish abundance of excellent pasturage. Indeed, the whole country seems peculiarly well adapted to the raising of horned cattle. With little care on the part of their owners, they increase rapidly, grow to a large size, and have a remarkably sleek and well-favored appearance. Enjoying a range of the finest pastures in the world, they are usually in good condition and make fair beef.

Argentine Republic.—Of this country a paper in the "American Encyclopaedia" says: "An idea of the cattle raising in eight of the Provinces (there being no returns from the others) may be formed from the following statistics of the farming stock in 1866." The totals of the detailed statistics therein given are as follows:

	Numbers.
Horned cattle.....	11,725,000
Horses.....	3,127,000
Asses and mules.....	231,000
Sheep.....	67,715,000
Goats.....	611,000

These facts are accompanied by the following remark: "The sheep, although extremely numerous, are like the goats and hogs, of an inferior breed." It will be observed that the number of sheep in this single republic is considerably larger than in the whole United States.

Heretofore the commercial relations between Spanish America and Europe have been much more extensive than those with the United States. But the completion of railway lines into Mexico, the new commercial treaty with that country, the projection of an intercontinental railway to connect North, Central, and South America, the recent appointment by President Arthur, under authority of a special act of Congress of a commission to visit those countries in behalf of the extension of our commerce in that direction, and the coming exposition at New Orleans, in which Spanish America will play a conspicuous and leading part, will soon deflect to our shores the current of trade which now flows toward Europe. In addition to our railway iron and supplies, improved farming implements, etc., needed in their new material development, these countries south of us are in great need of blooded stock to mingle with and improve their lower grades. They will imitate the example of Texas and New Mexico, which drew upon Kentucky and the Eastern and Northern States for new breeds with which to improve their native stock. In return it may be found profitable to import from Northern Mexico some of the more hardy breeds to mix with and invigorate our herds in the Western States.

Breeders of blooded stock in the United States can, for many years to come, find a ready and profitable market in Mexico and the Spanish-American States beyond for whatever surplus they may desire to sell. All that is wanted is a proper introduction to those markets, and this the exposition at New Orleans proposes to supply. A recent dispatch from Boston in the *New York Herald* contains the following interesting statements:

"The steamship *Austrian*, which arrived to-day from Glasgow, brought 23 bullocks, 3 horses, 10 pigs, and 2 dogs, all prize stock, to be forwarded to Minnesota. Three of the bullocks are of the Grand Duchess breed and are valued at about \$4,000 each. All were landed in excellent condition."

This is an illustration of the business of a similar nature which the breeders of this country may build up in the Spanish-American markets. The opportunity offered by the exposition is one they will find it profitable to improve as an entering wedge toward permanent business in a new and inviting field. Doubtless the exhibits themselves will find ready purchasers at the exposition. The breeders of higher grades of stock would do well to hear this point in mind, and make at New Orleans a full exhibit with the expectation of selling them there for shipment to the ranches of Mexico and the Central and South American States.

## Booms and Buyers.

Among the greater part of the people who are especially interested in such things the success or failure of a public sale of fine stock is gauged by the prices realized. If the average is well up into the hundreds of dollars, the result is "most gratifying," and is taken as evidence that the particular kind of stock in question is "growing in public favor." If, on the other hand, the average obtained barely reaches into three figures, the outcome is "disappointing," and the stock is "losing its popularity." Now this is a most natural view of the case, and from the breeder's standpoint is measurably correct. But, regarded practically, in the light of popular favor, it is decidedly fallacious. To a circumscribed circle of breeders, who hope for a market for five-hundred-dollar calves, "boom" prices are evidence of an increasing demand, and the stronger the competition of bidders the more confidence is felt in the future of the stock. One, two and five-thousand-dollar breeding animals are bought with the expectation of selling from them similarly-priced progeny, and the purchasers of the progeny are stimulated by the same hope, and so on *ad infinitum*. No man buys an animal for piled up hundreds of dollars to top a dairy or beef herd. He knows that under no ordinary circumstances can the money he gotten out of its produce in milk, butter, cheese or beef. The entire theory of the sale of high-priced fine stock is—What will its produce bring? This is evidence of a certain measure of popularity, but not among the class of people who buy stock for what it is intrinsically worth. The greatest success of any breed of stock is obtained when the stock-raisers of the country are seeking in every direction for pure-bred specimens of it to top their farm stock. No breed can or does stand as well in popular estimation as those breeds which farmers are investing in most freely, and which are thus becoming the staple stock of the country. The fancy prices which boomers of fancy stock are constantly engaged in working up are practically prohibitory to the farmer. They simply compel him, if he wishes to breed up, to go elsewhere for improved blood; and as a result of inordinate hooing of some kinds of stock, other kinds are certainly capturing the people, and are getting a hold on the farmers of the United States which can never be shaken loose. Just think of this, you who are breeding! If your favorites ever become the favorites of the people, they must be placed within popular reach. Those who read the reports of high-priced sales must be struck with the comparatively small number of purchasers. Extravagant values often signify a cornering, instead of a dissemination, of fine stock; a narrowing, instead of a widening, of influence on popular improvement. On the other hand, those sales at which reasonable prices prevail, are conspicuous for the large number of buyers to the amount of stock sold. The fact is that these are the farmers' sales, and the purchasers go right where they are needed, in breeding up the stock of the country. These are the centers of influence from which the popular stock interests receive their inspiration—the sales which are infusing into stock raising its most potent influence toward improvement. It is the blood of one-hundred and three hundred dollar hulls which is showing directly in the dairies and in the fat stock markets of the country—places where the work of thousand-dollar sires crops out quite meagerly if at all. A breed of stock reaches the most promising point in its history when farmers become its purchasers, and it accomplishes in every-day work what, in the days of its inaugurating boom, the people only knew at best as an authenticated, and not under their own supervision, a realized, claim. We are always glad to note long prices at public sales, and it is one of the most promising signs of the times that breeders are so often justified in paying them. May the fine stock interests of the country so flourish that the boom period may be perennial. But let us accord to sales where moderate prices rule, their true significance—the dissemination of good blood where it undoubtedly is most needed.—*Pittsburg Stockman*.

## Education in the Creamery.

Mr. F. S. Griswold thus writes to a Nebraska paper on the above subject:

I have been so busy in the practical part of making butter, that I have not had time to write, scarcely even to think closely, carefully, and connectedly—so essential to give a concise expression to one's ideas. I believe the life and the occupation of the farmer offers greater advantages and privileges to him who would think as he labors, than any other occupation in this busy world. The day laborer is generally too ignorant to have many thoughts,—the mechanic or skilled artisan must keep his mind strictly on the work before him,—but the farmer, as he follows the plow or cultivator to and fro, or rides the mower or harvester round and round the waving field, has abundance of time for thought, for planning the work for the coming week. His mind can roam through the whole realm of nature, and of science, and of literature, if he will. But especially should the wide-awake farmer read and think and study to become informed of all changes of importance in his own line of work. This is an intensely progressive age, and the educated farmers are moving forward all along the line. Shall we of the West lag behind? What needs to be done? Well, for instance, a creamery is established here in your midst,—are you (the farmers) willing, are you ready to make such changes as are necessary, in your present mode of farming, to furnish the creamery an abundance of cream—pure, sweet, rich cream—cheaply, profitably to yourselves. I say, cheaply and profitably to yourselves, for if the cream costs you more than you can get for it at market value at the creamery, it won't pay, and if it don't pay, it's a loss, and the sooner it is stopped the better. So the first and chief thought the patron should consider is, how to reduce the cost of producing milk and cream to the lowest possible limit, thus increasing the patron's profits, for profit of money is what we are all working for. It is said that "money is the root of all evil." [Nay, nay, friend G., not money, but the love of it.—Ed. R. W.] Now that may be true when it is used for base purposes, or is hoarded and worshipped for its own sake. But money is merely a medium of exchange, and in its legitimate sphere is as essential to commerce as air for our lungs. The farmer is just as anxious to get his share of the "almighty dollar" as the creamery man, or any one else, and he generally "gets all there is in it."

Now the problem for the farmers to solve is how to increase the annual crop of "Almighty Dollars" without additional expense or labor. This can be done in various ways, as by improving the stock, the feed, the shelter, the care. We will discuss these in subsequent letters. I may state in one sentence that the great change for the better will come only when people cease farming for grain, and endeavor to turn their lands into dairy farms; for dairy farming is the most profitable, and dairy farmers are the richest, the world over. The reason for this is in the fact that dairying is a more complex business, requires a greater degree of intelligence, a wider range of knowledge, a more skillful training of the eye and hand, a quickened activity of thought, for dairy farming is really diversified farming. Hence, to be successful as a dairyman, he must be well and carefully educated for his business. There is not, never was, and never can be a truly successful dairy farmer, who was ignorant, careless and shiftless in his habits and his mode of work. Dairy farmers are the most wealthy, because they are the most intelligent, the best educated. So my friends, if you would reap the harvest of golden dollars, on the dairy farm, first become intelligent, for intelligence is the measure of man's success. "Education is the key to wealth." "Knowledge is power."

## Food Influence on Milk.

Dr. Væcler, in a lecture to the students at Cirencester, (Eng.), Agricultural School, spoke of some of his experiments in the dairy. Twenty years ago he determined to find out, if possible, how it was that some of the cows produced such bad milk. They were wretchedly fed, he remarked, and the result was rancid butter and very indifferent cheese. He wanted to find the reason of the poor milk, and saw the cows milked, and when the milk was analyzed regularly in the laboratory he was perfectly astounded to find how, with a change of food, the character of the milk changed immediately. In September the cows gave milk that only contained 1½ per cent. of pure butter fat—add one quarter more to represent the quantity of commercial butter—and 90.7 per cent. of water. In the evening the cows milked a little poorer—90.7 per cent. of water, and only a little over 1½ per cent. of pure butter fat. His foreman thought the scanty herbage accounted for this poverty of milk, and also for the scanty supply which the cows furnished. He therefore put the cows in the stable in the evening, and gave them hay, mangolds, and rape cake, (rape cake is very good if you can get it free from mustard), and the result was that immediately the quality of the milk improved. Then he gave them the palm-nut meal, with the same result, and so rapid was the improvement that, by giving the cows concentrated food in the evening, the milk of the following morning was immediately very much richer than that of the evening before, so that in something like six hours the food told upon the quality of the milk.

"It is surprising," he said, how rapidly oily matters introduced into the food will find their way into the milk. I mention this to throw a little light on the question whether morning or evening milk is the better. It is entirely a question of feeding. If you feed the cows well in the day the evening milk is rich, and if you leave off the feed at night, the morning milk is poor. As a rule, therefore, the evening milk is somewhat richer than the morning, but it does not follow that it is invariably the case. I find, for instance, during the twelve months to which I have referred, that out of thirty-two samples of morning and evening milk, in eight cases the morning milk was poorer than the evening; on four days the morning milk was the richer, while on the remaining four days there was no appreciable difference between the quality of the morning and evening milk.

"I have found as much as four per cent. of pure butter fat, and I have found as little as 1½ per cent. I have found similar difference in experiments which for the last four years have been carried on under my own personal supervision, seeing the cows milked and so forth, at the show of the British Dairy Farming Association at Islington. In 1879 we had in the showyard an Ayrshire cow whose milk produced 5½ per cent. of pure butter fat, while that of a Dutch cow gave as little as 3½ per cent.

"In the succeeding year we had similar variations, but I cannot help giving you the results of the last year's milk trials which have just passed through my hands, relating to the show held on the 4th of October last, and I confine my quotations to prize winners. The first prize animal, a large Dutch cow, a very profitable animal to the milk dealers, gave in the morning 31 lbs. 4 oz., or about three gallons, and in the evening 29 lbs.—total, 60 lbs. 4 oz., roughly speaking six

gallons of milk in the day. But when we examined the milk I found that the produce of the Dutch cow gave only 2.36 of pure butter fat, total solids 12.12, leaving 88 per cent. of water—evidently not a rich milk. The second prize cow, a very taking little Devon, gave in the morning 15½ lbs.; in the evening 11 lbs.—total 26½ lbs. of milk in the day, or about 2½ gallons less than half the quantity of the Dutch cow. But the milk of the Devon cow gave 5½ per cent. of pure butter fat, and would, therefore, make 1½ lbs. of saleable butter per day, while the six gallons of milk of the Dutch cow would only make 1 2-3 lbs. of butter."

### Hiring Help.

[From Judge Bennett's "Farm Law" Revised.]

After taking possession of the farm, one of the first, and often one of the most trying duties of the farmer, is to hire his help. Every employer of labor knows full well that if a man is hired without any special bargain as to the price, he is entitled to a current rate of wages for such labor, and no more; but every laborer may not be aware that if he engages to work "for a year," but leaves without good cause at the end of eleven months, he is not, in most States, legally entitled to any compensation for what he has done, but forfeits the whole; and this is so, whether he has agreed to stay for the entire year at one round sum, or for the year at the rate of twenty dollars a month; although, if the farmer had paid for each month's work as it came due, he could not probably recover it back, even if the laborer afterward wrongfully left him before his time was out. And, if he has given a note for the amount already earned, he must pay the note, notwithstanding the subsequent failure of the other party to work out his full time. But if nothing has been paid, and no note given, the laborer would not only forfeit his wages, but also would be liable to pay the employer for any damage done him by leaving him without help at a critical time in the year; therefore, if he has agreed to work a year for twenty dollars a month, and quits just before haying because he can get forty dollars at mowing from some one else, and the farmer has to pay that price to get another man to supply his place, he can recover of the laborer the extra twenty dollars a month for the balance of the unexpired engagement, as damages caused him by such breaking of the contract, and the laborer could not set off against the claim of the employer the value of the work he has really done, and not been paid for. And this is so, whatever specific thing you hire a man to do. If he engages to build you a barn for five hundred dollars, to lay up a hundred feet of stone wall for a dollar a foot, or dig a well twenty feet deep for twenty-five dollars, and voluntarily quits without good excuse when the job is half done, you are not obliged to pay a single cent for what he did do; although, if he had substantially completed it in good faith, he would not lose all his labor because, in some minute particulars, he had not finished it according to the precise terms of the contract.

If a farm laborer so conducts himself as to justify his discharge before his time has expired, it may be he would not forfeit all his wages (as when he voluntarily quits without cause), but might recover whatever his services were really worth to the farmer, not exceeding the contract price.

On the other hand, if the laborer has good cause for leaving he may do so, and compel the employer to pay for the time he actually did work. And among the well-known excuses for leaving before the original bargain contemplated, are sickness of the hired man, or his physical inability to labor, or the prevalence of some dangerous epidemic in the family or in the vicinity, which might render it hazardous for the man to remain; such as cholera, small-pox and the like. Any improper treatment by the employer, as scarcity of suitable food, is also deemed sufficient excuse for seeking other quarters.

And even though the laborer so misbehaves himself that he is arrested and imprisoned for some crime, and so is busy picking oakum for the county in the house of correction, this is considered a legal excuse for not attending to his farm duties; and he can make the farmer pay for what he did before he involuntarily went into the public service.

It has been thought that merely harsh language by the employer to his employe would not justify him in leaving before his stipulated time was out. In one instance, the farmer asked his hired man to water and feed the cattle one Sunday morning. The man said he wouldn't do it; the employer told him to "go to h—l, but to mind to work his time out first." Instead of following the directions, the laborer went to a lawyer's office, and sued for his wages up to that time, but was held not entitled to anything. Had the master required him to do any unnecessary or unlawful work on a Sunday, it would probably have been a good excuse for his leaving; but necessary farm work, such as care of live animals, may undoubtedly be required on Sunday. And any work done on Sunday ordinarily comes under the regular contract, and not as extra work.

### Spontaneous Coagulation of Milk.

Last week a case of spontaneous coagulation of milk came under notice, the first noticed in this section. The milk before reaching the factory had become rosy, not sour or even acid, but soon became curd, and settled, leaving the whey at the surface, as though rennet had been used. All investigation failed to show any cause for the change in the milk, and the "spontaneous" cause had to be adopted to explain the matter. A good many shook their heads at the suggestion, but the case being a rare one does not invalidate the supposition. The probable cause is that through some cause the chemical union of the fats and casein of the milk is broken and then a slight change in the mineral matter of the milk causes a yeast action with the sugar, and the casein would become solid and appear as curd. It is a common report that milk will thicken during a thunder storm, and is as often laughed about as an impossibility, but milk influenced by electricity will become curd, but not have any of these characteristics of milk coagulated with rennet, so that when the air is charged with electricity the agitation produced by the thunder often coagulates milk. Milk left standing in a bright can exposed to the rays of the sun might develop a yeast action which would produce thickened milk if agitated as it would be in transporting a few miles. It is a peculiarity of milk that it coagulate at different degrees of what is termed lactic sourness, the air having a greater influence than most suppose. A feverish condition of a cow will cause milk to thicken, and it is no uncommon thing to have a cow have "one corner" of her udder harden, and thick milk results, which is only another form of spontaneous coagulation, and if this milk happened to have been milked just before the thickening would have taken place the principles that would cause it would be present and the thickening go on after milking.

Should the milk of this particular cow be put in with the rest of the mess it would thicken the whole can, especially if carried upon a jolting wagon, and all the more likely to if through a bot, scalding sun. The peculiarity of this thickening milk is that the cream is always deficient in its natural proportions, which is also a reason for self coagulation. It is also probable that food, and especially drink, or water that is exposed to the contamination of decaying animal carcasses, which have a decidedly bad influence over milk. While such instances may not be common, yet it is well to understand that such things do exist, and when they do occur give the farmer the benefit of the doubt and not condemn him, on the spot, of sending bad milk to the factory, and a person in morals but little above the sneak thief,—*Cleveland Herald.*

Nothing, perhaps, more severely tries the skill of a breeder or the extent of his observation, than his estimates of young stock at very early ages, in connection with the after-results which justify or falsify those estimates. Many men who can judge fat beasts cannot rightly judge animals in their lean state; but there are far more men who can judge animals fat or lean, and yet hit immensely wide of the mark in their guesses upon the future merit of foals, calves, and other infants of the farm. Their difficulty, however, often proceeds from ignorance of family antecedents. The written or printed particulars of family history they may know, in the case of pedigree cattle, but until they acquire a sight and touch familiarity with their stock, generation after generation, they cannot always tell the signs put out in an animal's early life analogous to the appearances of the bud of a new or an unknown flower. As the practiced florist can early discern in the buds of his old favorites the best and the worst flowers of the forthcoming season, so the practiced breeder, who has taken pains to ponder over the peculiarities of each calf, and to mark and remember the course of development, knows the meaning of each characteristic felt by the hand or perceived by the eye, and of each change in the course of growth. This is something remarkable in breeders of long-established herds of cattle, who can form their opinions upon calves with the greatest precision, and pronounce those opinions with confidence, when strangers would be disposed to entertain far different expectations, more favorable, or less so, than those of the men whose forecasts are mirrored retrospects.

## STABLE AND PADDOCK.

### Treatment of Suckling Colts.

If you will allow me the space in your valuable paper I should like to say something in regard to the treatment of young colts. The interest which is being taken by the farmers generally in the matter of breeding their horse stock is beginning to tell very materially, and I believe it to be the duty of all engaged in breeding horses to study the subject more closely every year. While breeding good mares to good horses is essential it is not all that is necessary in order to raise good horses. After a colt is foaled it is like a plant, it needs care and cultivation. When it is quite young about the only way to treat it as far as food is concerned is through the dam. Every mouthful of food taken by the mare will have an effect on the colt, and I have often noticed that the effect is much greater on the colt than it is on the mother. Any food that has the least tendency to make the mare scour or loosen up her bowels will act with a great deal more power on the bowels of the colt. This being the case, it is quite necessary that any such food be cautiously avoided, and especially when the colt is quite young. When a colt is but a few days or a week old it will begin to nibble at the grass or whatever green stuff may come in its way. Colts will seldom if ever eat anything that will injure them and should be allowed to run where they can get what they want in the shape of grass, etc. But one thing that should be guarded against most carefully is over-working the mare while the colt is young. Being weak from foaling and generally a little thinner in flesh than usual, she can be exhausted before you are aware of what you are doing. To exhaust the dam the least before the foal is five months old will necessarily injure both. One thing I used to do, and I see many farmers who have not given the matter the thought they should, and that is to compel the colt to go wherever the mare does by haltering it to her side. Only a few days ago a gentleman remarked to me, as we were admiring a fine little filly only three weeks old, that it had traveled more than thirty-five miles the day before and did not look "the worse of the wear." I could not help telling him that such treatment was the worst thing he could do for his colt. True it did not look very badly, but it showed signs of fatigue, and who knows how much injury that trip of thirty-five miles had done that future horse. Such strains are not only injurious themselves, but they prepare the young animals for injuries that await them, for when a young horse once becomes stunted or hurt it seems to take but little to hurt it again. It would have been far better to have kept that filly at home in a pasture field with other young horses, or old ones either, than to have compelled it to make a trip like that. A colt will soon become accustomed to staying with other horses when the dam has to be used, and after a few times will fret but very little. It will soon learn to drink enough water to do it for such a length of time, which will do it almost as much good as the milk which it gets from the dam while being worked hard, which is always in a bad condition for the young thing to take into its stomach. I am convinced that thousands of dollars are lost to horse owners and the country each year by the carelessness with which the colts are handled during the first six or nine months of their existence. Like plants, if they are stunted in the start it is very hard to get a rapid, healthy growth out of them afterwards, as it will show on them as long as they live.—*Pittsburg Stockman.*

We are told, and with truth, that a thin, clean, good head and cheerful eye are indicative of an amiable and generous temperament and disposition. A head well put on, with a yielding and somewhat arched neck, suggests that the head may be carried well and also that such a horse has a good mouth; it has not been hardened or spoiled by useless endeavors (where such is not the case) to bring the head in the place desired for it. Long, oblique shoulders usually betoken freedom of action, so far as the fore parts are concerned, as a deep girth and long hack ribs do strength, and good, broad loins and hips freedom of action; long, full thighs, large, clean hocks, with hind legs well put on, indicate strong propelling powers. With these points, without inquiring into causes and effects, we will say a horse has got what indicates goodness of temper, cheerfulness and courage, carrying himself handsomely and pleasantly to the driver or rider, goodness of action, strength, speed and safety.

In teaching the colt words always accompany the words with an explanatory act—something which will call his attention to the connection between the word and the act; for instance in saying "whoa!" always pull upon the reins or footstrap. Never use words either in or out of the barn except for a purpose. Such words as "stand round!" "take care!" are proper to be used when occasion requires, but you should not say "whoa!" when you mean "take care!" in approaching the colt, nor "whoa back!" when you mean either one or the other. It is well known that it is difficult for a person to control himself in this particular. I therefore strongly impress its importance upon those having to deal with colts. Always use a short joint bit with long bars, on the colt, on account of teaching him the right place for the tongue, etc. Kickers in harness should always be checked high. The colt should be caught with your hands and held at two days old, and tamed before haltering; haltered and taught to lead at between two and three months old; broke to harness from two to three years of age. A mare may be worked one year younger. The whip should be feared rather than felt. Whenever used it should be accompanied with the proper words, and its meaning understood; use the whip only to insure promptness—not to teach.

## POULTRY.

### The Egg.

Of the many millions who daily use this most appetizing and delicate of foods, how few know anything of its formation or structure, and yet, small as it is, its mechanism is wonderful. As everyone knows, it is composed of yolk and white in a thin membrane, all enclosed in a shell very brittle, and of various colors. The yolk of an egg is composed of blood assimilated through the working power of the hen, and a proportion of oil drawn from the grain she eats. The white is a thick mucilage derived from the green or vegetable portion of her daily diet, while the membrane, or skin, is made from the woody, fibrous substance of the same. The yolks, or ova, grow in a cluster on the spine and pass through a tuft of soft skin between the lungs and the kidneys, one being formed every twenty-four or thirty-six hours while the hen is laying, which is enclosed in a very thin skin. On the maturing of the yolk this skin breaks, letting it drop into the mouth of a funnel-shaped duct, in length from fifteen to twenty inches, consisting of three divisions, the terminus of each being an elbow. The inner side of this canal is very soft and pliable, being composed of folds lapping partially over each other, the last division being very much finer in texture than the others. While passing through the first division, the length of which is five inches, the yolk makes three distinct revolutions, and the white is put on in the same number of layers. In the second, the same length as the first, the yolk, with the white around it, gets its shape from the rotary motion of its course, and also the membrane which encloses it; while in the third division the shell is received, which is a thin fluid, in color to suit the breed. At the turning of this division the duct is globe shaped, and here the egg turns and comes out big end or head first. The egg is fertilized by the influence of the male bird, which passes through a small duct along the spine of the cluster of small ova. The yolk is suspended in the center by two spiral cords, one end being attached to each end of the yolk, the other end passing through the white, being fastened to the membrane lining the shell. These cords are "laid right and left handed," thus holding it with the heavy side down, no matter in what position the egg may be held or placed.

The chick is formed entirely from the white, and here we see the use of the three revolutions in the first division. The first layer forms the bone and sinew, the second the flesh, the third the skin and feathers. The first part formed is the eyes, appearing as two black specks, on each side of the suspending cord at the large end, next the skull bone between, and in order the neck, spine, legs and wings. At nine days there is complete circulation and life, and at fourteen days the white is all taken up. The cords have now made a connection in the stomach and protrude from the navel in a number of blood vessels and enclose the yolk in a network of smaller ones, and through these the chick draws its nourishment from the yolk transformed to its original substance, blood. After the shell is cracked and the chick has gained strength, these two blood vessels draw into the belly what remains of the yolk, the navel is closed, the course is all clear, and having cracked the shell all around, the little creature gets its head against one end and its tiny feet against the other, the parts separate and out rolls the chick. Nothing more interesting can be imagined than closely observing the process of incubation in its various stages, and the mind is deeply impressed with the wisdom and power of the Great Being "who doeth all things well."—*T. J. H., in Farmer and Dairyman.*

The poultry fancier may succeed in making a fair profit by keeping large numbers of fowls in close quarters, where everything needful has to be supplied from outside. Such success is attainable merely by an uncommon skill—science, experience—in the management or through the sale of eggs for hatching and breeding stock at excessive figures. The farmer, however, has not at all to deal with the question, how to turn a quantity of grain and other food into eggs and poultry, but with the question of how many fowls he can profitably employ as scavengers of the farm. The object with him is principally to utilize all that material, which would otherwise be dead loss, for instance, scattered grain, weed seeds, table-scraps, bugs and worms, grass-hoppers, inferior vegetables and others. Farmers in general do not make use of the services of near as many fowls as they should, to accomplish that end.

A correspondent of the Poultry Yard follows the plan described below, which, if carefully used, may be safe and effective. He says: I make saw-benches for roosts—that is, I take 2x4 scantling and nail legs to them of the length to suit space and breed. These, as you will at once see, can be moved at pleasure when cleaning droppings or for any other reason that may present itself; but the best part of it is as regards lice. Every week I take my kerosene can and go to the hen-house, carefully pick up and carry out of doors my saw-benches, pour the kerosene on them and touch it off; the flame will quickly run over every part of it, and go out without burning the wood, but every mite or nit that would have made one, you are rid of forever. I have followed this plan for some time, and have no trouble with lice.

A Maryland chicken raiser gives for the gaps of a half peck of meal to one pint of Epsom or Rock salt in that proportion. The chickens eat freely and are cured follows.

FISH.

The Walton Fishing Club.

This jovial club had their regular monthly trip last Sunday, and turned out in goodly numbers. We have not room in this issue for a detailed account, but one or two incidents may be worth mentioning. In the early part of the day the fish took the bait fairly, but after lunch they declined any further interviewing. Sails were then let loose and the Restless started for a cruise round the bay, the breeze being enjoyable. Among other ships saluted was Her British Majesty's war vessel now in the harbor, under the sides of which the Walton Quartette and chorus sang "God Save the Queen." The mighty flag of red that has floated in dominion over half the world was dipped in return for the compliment, the officers appeared on deck, and the marines presented arms. Only one unpleasant incident occurred during the day. On landing, brother Fogg, a popular member of the club, lost his balance, and went overboard, but by catching hold of the boat he saved himself a thorough drenching. The funny part of the business was the discovery of a bottle of splendid pickles, which Com-messary Muller missed after lunch. Everybody praised the pickles, but the bottle and the contents left disappeared after lunch. In the fall overboard a crash was heard, and there snre enough the pickles were found in brother Fogg's pocket. Clem Dixon, the president, was heard from all the way to New York, and he had a pleasant trip overland. By this time he is on the coast of England, having left New York soon after his arrival.

Good streams may be found round about Mount Hamilton, Santa Clara county. The anglers there, however, have to camp out. That's the cause of the trout remaining. The fingerling sharp has constitutional and financial objections to camping out.

The Annual STATE FAIR

- A T -

Sacramento,

CALIFORNIA, COMMENCES

SEPT. 8th, 1884,

And Continues Two Weeks.

THE NEW EXPOSITION BUILDING, one of the largest and most commodious in the United States, will be occupied for the first time. It embraces 121,000 square feet of floor space, of which 45,000 feet is in the Main Hall, 12,000 feet in Horticultural Hall, 12,000 feet in Machinery Hall, 12,000 feet in Industrial Hall, 12,000 feet in the Art Gallery, 12,000 feet in Conservatories and 17,000 feet in the Promenade Galleries.

Space Should be Procured at Once,

As applications are being received daily. A 150-horse-power engine will furnish power free of charge. Articles for exhibition transported free to and from the Exhibition by the Central Pacific Railroad Company.

No Such Opportunity Has Ever Been Offered to Exhibit the Agricultural Mechanical and Industrial Products of Our State.

THE AGRICULTURAL DISPLAY

Will be made by counties, and promises to eclipse any exhibition ever made of California's principal resources. This fine exhibit will be forwarded to the World's Fair at New Orleans at the close of this exhibition. The Exhibition Building will open MONDAY EVENING, September 8th, and close September 29th, 1884.

THE LIVE STOCK DEPARTMENT

at the Park will be opened THURSDAY, September 11th and close September 29th. Any further information can be had upon application to the Secretary, from whom Premium Lists may be obtained.

P. A. FINIGAN, President. ERWIN F. SMITH, Secretary, Sacramento.

Monmouth PARK Association,

Long Branch, New Jersey.

Pacing Race; 2:25 class; purse \$300; mile beats; 3 in 5 to harness; \$180 to first horse; \$90 to second; \$30 to third. Five to enter and three to start. Same time to take place during the fair; date to be decided on hereafter.

### REMARKS AND CONDITIONS.

All trotting races are best three in five; five to enter and three to start; but the Board reserves the right to hold a less number than five to fill by the withdrawal of a proportionate amount of the purse. Entrance fee, ten per cent on purse, to accompany nominations.

National Association Rules to govern trotting; but the Board reserves the right to trot beats of any two classes, alternating if necessary, to finish any day's racing, or trot a special race between heats. A horse making a walkover shall be entitled only to the entrance money paid in. When less than the required number of starters appear, they may contest for the entrance money, to be divided as follows: 65% to first, 33% to second.

In all races, entries not declared out by 6 P. M. of the day preceding the race shall be required to start. Where there is more than one entry by one person, or in one interest, the particular horse they are to start must be named at 6 P. M. of the day preceding the race. No added money paid for a walkover.

Rules of the State Agricultural Society to govern running races, except where conditions named are otherwise.

Non-starters in running races will be held for entrance under Rule 2.

Racing colors to be named in their entries. In trotting races, drivers will be required to wear caps of distinct colors, which must be named in their entries.

Entrance fee, ten per cent. Entries to all the above races to close with Secretary on Friday, Aug. 1, 1884.

Write "Entries to Races" on the outside of the envelope. W. T. ADEL, President.

J. HENMAN, Secretary.

J. M. LAURE, Secretary.  
P. O. Box 188, Stockton, Cal.

## ASHLAND PARK TROTTERING STUD

NEAR LEXINGTON, KY.  
B. J. TREACY, PROPRIETOR.

THIS IS STRICTLY A BREEDING FARM, FOR though training is done, it is only for the stock belonging to the place, or those purchased from the proprietor. The proprietor of Ashland Park has no pet trotting family; his aim is to secure and have at all times for sale choice representatives of each of the leading families, these being the Hambletonians, Mambrino Chiefs, Clays, Pilots, Black Hawks. At Ashland Park may now be seen splendid specimens of the best of such stallions as George Wilkes, A. Mount, Mambrino Patchen, Clark Chief, Edwin Forrest, Blackwood, Sentinel, American Clay, Administrator, North Star Mambrino, Bourbon Chief, Regular, Balsa, Howard's Mambrino and Homer. The steady aim is to possess nothing that does not trace through the best class of speed-producing trotting crosses, along all the blood lines, right to the thoroughbred. For catalogues or further particulars address  
21751  
B. J. TREACY, Lexington, Ky.

No. 7.—Running, half mile and repeat, free for all; entrance \$25, \$10 forfeit, \$150 added; \$50 to second horse.  
No. 8.—Trotting, 2:22 class; purse \$750; \$450 to first horse, \$225 to second and \$75 to third horse.

Friday, Aug. 22—Fourth Day.

No. 9.—Running, selling race one-and-one-eighth mile dash; purse \$200; entrance free; \$50 to second horse; fixed valuation, \$1000; to carry entitled weight, two pounds off for each \$100 below and three pounds added for each \$100 above fixed valuation.  
No. 10.—Trotting, 2:27 class, purse, \$600; \$360 to first horse, \$180 to second, and \$60 to third horse.  
No. 11.—Trotting, purse of \$600; free for all horses owned in the counties of Sonoma, Napa, Marin, Yolo, Solano, Lake and Mendocino, on the first day of June, 1884, that have never beaten 2:45; \$300 to first horse, \$150 to second, and \$50 to third horse.

Saturday, Aug. 23—Fifth Day.

No. 12.—Running, two and one-fourth mile dash, free for all; \$30 entrance, \$15 forfeit, \$250 added; \$75 to second horse.  
No. 13.—Trotting, free for all; purse \$800; \$180 to first horse, \$240 to second, and \$60 to third horse. Director to wagon.

**STOCKHOLDERS' RACE.**

No. 14.—Trotting, stockholders' purse \$500, entrance fee \$25. This race to be trotted during the Fair with at least one day's notice before race. Free for all horses owned by stockholders of this association on the first day of June, 1884. The horse winning the first heat to take \$125 and go to the stable, the horse winning second heat to take \$100 and go to the stable, the horse winning third heat to take \$75 and close the race.

**Remarks and Conditions.**

All trotting and pacing races are the best three in five; five to enter and three to start. But the Board reserves the right to hold a less number than five to fill, by the withdrawal of a proportionate amount of the purse. Entrance fee, ten per cent. on purse to accompany nomination. Trotting and pacing purses divided at the rate of sixty per cent. to first horse, thirty per cent. to second, and ten per cent. to third.

National Association Rules to govern trotting; but the Board reserves the right to trot heats of any two classes alternately, if necessary to finish any day's racing, or to trot a special race between heats. A horse making a walk-over, shall be entitled only to the entrance money paid in. When less than the required number of starters appear, they may contest for the entrance money, to be divided as follows: 66 2/3 to the first and 33 1/3 to the second.

In all races, entries not declared out by six p. m. of the day preceding the race, shall be required to start. When there is more than one entry by one person or in one interest, the particular horse they are to start must be named at 6 p. m. of the day preceding the race. No added money paid for a walk-over.

Except as otherwise specified, running races will be conducted under the rules of the Pacific Coast Blood Horse Association.

Non-starters in running races will be held for entrance under Rule 3.

Racing colors to be named in entries.

In trotting races, drivers will be required to wear caps of distinct colors, which must be named in their entries.

Entries to all of the above races, except fixed events, to close with the Secretary on Saturday, August 18, 1884.

Entry blanks and racing rules will be furnished upon application to the Secretary.

I. DETURK, President.

C. H. BANE, Secretary.

REMARKS AND CONDITIONS.

All trotting and pacing races are the best three in five, except the two-year old trot, unless otherwise specified; five to enter and three to start. But the Board reserves the right to hold a less number than five to fill, by the withdrawal of a proportionate amount of the purse. Entrance fee, ten per cent. on purse, to accompany nomination. Trotting and pacing purses divided at the rate of fifty per cent. to first horse, twenty-five per cent. to second, fifteen per cent. to third, and ten per cent. to fourth.

National Association Rules to govern trotting, but the Board reserves the right to trot heats of any two classes alternately, if necessary to finish any day's racing, or to trot a special race between heats. A horse making a walk-over shall be entitled only to the entrance money paid in. When less than the required number of starters appear, they may contest for the entrance money, to be divided as follows: 66 2/3 to the first, and 33 1/3 to second.

In all races, entries not declared out by six p. m. of the day preceding the race, shall be required to start. When there is more than one entry by one person or in one interest, the particular horse they are to start must be named at 6 p. m. of the day preceding the race. No added money paid for a walk-over.

The Board of Directors will have absolute charge of the Track and Grounds during the week of Races, and guarantee that they will be kept in first-class condition.

Horses distanced on the field will be entitled to the first and third money only.

Horses entered for purses can only be withdrawn by consent of the judges.

The Pacific Coast Blood Horse Association Rules to govern all Running Races.

Non-starters for Running Races will be held for entrance.

Non-starters must be declared out the day previous to the race they are engaged in, before eight o'clock p. m.

In all Running Races the second horse saves entrance.

No money paid for a race without a contest.

All entries for Races to close with the Secretary or President, at Chico, Aug. 1st, 1884, at ten o'clock p. m.

The Board of Directors will have absolute charge of the Track and Grounds during the week of Races, and guarantee that they will be kept in first-class condition.

The above rules in regard to entries and conducting the Races will be strictly enforced, and all purses and stakes will be paid when the Judges have rendered their decision, and before leaving the Stand.

N. B. In all running races the second horse saves entrance. The time of closing entries extends to August 1st, at 10 o'clock p. m.

C. C. MASON, PRESIDENT.

ROLAND DILLER, SECRETARY.

IMPROVED  
**Blind Bridle & Winkers**  
FOR RACE HORSES.

Secured by Letters Patent, July 25, 1882.

Having thus described my invention, what I claim as new, and desire to secure my letters patent, is:  
1. The part D supported by the side straps of the bridle, extending back as shown, the front having an opening into which the blind is fitted, substantially, as herein described.

2. In a bridle, in combination with the extensions D, the curved blinds F, secured to such extensions, and as shaped, to give full freedom and ventilation to the eye while circumscribing the vision, substantially as herein described.

3. In a bridle, and in combination with the extensions D, blinds F, and side straps A, the screw, nut and washer E, to secure the blind and allow it to be set, substantially as herein described.

4. In a bridle, and in combination with the check pieces D and blinds F, as shown, the straps or bands G and H, connecting the branches or extensions above and below the eyes, and having the adjusting slides or buckles, substantially as and for the purpose herein described.

5. In a bridle, and in combination with the blinds F, supported and pivoted to the bridle so as to be movable about the point of support, the adjustable front straps or bands G and H, and the rear band I and the throat-latch or lash connected with the blinds, and adjustable, substantially as herein described.

The above are the claims allowed by the patent office, and though the corresponding letters do not appear on the cut, the general principle will be understood.

It meets with universal approbation, doing away with all the objections urged against blinds, and at the same time giving complete control of the line of vision. By throwing the lower portion of the blind up something of the same effect on the action follows as is induced by toe-weights. This is especially the case when young colts are the pupils, teaching them to bend the knee without the strain of weights on the feet.

For bridle of all descriptions apply to

No. 6—Trotting, district, 2:30 class. Purse \$100.

Third Day—Thursday, August 28.

No. 7—Running, for two-year-olds, \$25 entrance, \$10 forfeit, \$150 added, \$50 to second horse. Three-quarters of a mile dash.  
No. 8—Running, free for all, purse \$500. Mile and repeat.

No. 9—Pacing, 2:20 class. Purse \$600.

Fourth Day—Friday, August 29.

No. 10—Running, selling purse, \$200; entrance free \$50 to second horse; fixed valuation, \$1,000; to carry entitled weight, two pounds off for each \$100 below fixed valuation, and three pounds added for each \$100 above fixed value. One-and-one-fourth mile dash.  
No. 11—Trotting, district, for yearlings, purse \$150. Mile dash.  
No. 12—Trotting, 2:27 class. Purse \$1,000.

Fifth Day—Saturday, August 30.

No. 13—Running, free for all, purse \$90. Two mile dash.

No. 14—Running, consolation purse, \$150, \$50 to second horse. Horses beaten once allowed 5 lbs., twice 10 lbs., three times 15 lbs. from their entitled weight. One mile dash.

No. 15—Trotting, free for all, Director to wagon. Purse \$1,000.  
No. 16—Trotting, district, for gentlemen's roadsters; purse \$150; owners to drive; to road wagons or carts weighing not less than 150 pounds.

Horses in all district races must have been owned in the district June 1, 1884.  
The track has just received a dressing and is in first rate condition—both fast and safe.  
Entries to close August 1, 1884.

REMARKS AND CONDITIONS.

All trotting and pacing races are the best three in five, except the yearling trot, unless otherwise specified; five to enter and three to start. But the Board reserves the right to hold a less number than five to fill, by the withdrawal of a proportionate amount of the purse. Entrance fee, ten per cent. on purse, to accompany nomination. All purses unless otherwise specified divide at the rate of fifty per cent. to first horse, twenty-five per cent. to second, fifteen per cent. to third, and ten per cent. to fourth.

National Association Rules to govern trotting; but the Board reserves the right to trot heats of any two classes alternately, if necessary to finish any day's racing, or to trot a special race between heats. A horse making a walk-over shall be entitled only to the entrance money paid in. When less than the required number of starters appear, they may contest for the entrance money, to be divided as follows: 66½ to the first and 33½ to the second.

In all races entries not declared out by 6 P. M. of the day preceding the race shall be required to start.

Where there is more than one entry by one person or in one interest, the particular horse they are to start must be named at 6 P. M. of the day preceding the race. No added money paid for a walk-over.

Rules of the State Agricultural Society to govern running races, except when conditions named are otherwise.

Non-starters in running races will be held for entrance, under Rule 3.

Racing colors to be named in entries.  
In trotting races, drivers will be required to wear caps of distinct color, which must be named in their entries.

Entries to all of the above races to close with the Secretary on Friday, August 1, 1884.

Entry blanks and racing rules will be furnished upon application to the Secretary.

A. M. M. SHAFER, President.  
W. E. Cox, Secretary.

THIRD ANNUAL MEETING

OF THE

SANT CRUZ COUNTY

Agricultural Fair Association.

At Santa Cruz.

COMMENCING

Tuesday, Aug. 12, 1884,

AND ENDING

Saturday, August 16th, 1884.

SPEED PROGRAMME

FIRST DAY, Tuesday, August 12th.

No. 1-Trotting race; three-minute class; Purse, \$400. No. 2-Trotting race; 2:40 class; Purse, \$200. Free for all horses owned in the district.

SECOND DAY, Wednesday, August 13th.

No. 3-Trotting race; 2:27 class; Purse, \$500. No. 4-Trotting race; Purse, \$150; three-minute class. Free for all horses owned in the district.

THIRD DAY, Thursday, August 14th.

No. 5-Pacing race; 2:20 class; Purse, \$400. No. 6-Trotting race; 2:50 class; Purse, \$150; for all horses owned in the district.

FOURTH DAY, Friday, August 15th.

No. 7-Trotting race; 2:40 class; Purse, \$400. No. 8-Running race; Purse \$150. Free for all; half mile and repeat.

FIFTH DAY, Saturday, August 16th.

No. 9-Trotting race; 2:22 class; Purse, \$500. No. 10-Trotting race; Purse, \$250; for all horses owned in the district.

CONDITIONS.

All trotting races are best three in five. Entrance fee, ten percent, on all purses, to accompany nomination.

In all races five to enter and three to start. But the Board reserves the right to hold a less number than five to fill, by the withdrawal of a proportionate amount of the purse. National Trotting Association rules to govern trotting, but the Board reserves the right to trot heats with any two classes alternately, if necessary to finish a day's racing, or to trot a race between heats.

No money will be paid for a walk-over. Horses entered in purses can only be drawn by consent of the Judges.

Rules of the Pacific Coast Blood Horse Association to govern running races. All entries to be made in writing, to give sex, color and marks of horse; also name and residence of owner, and, in running races, colors to be worn by rider.

All purses divided at the rate of sixty per cent, to first horse, thirty per cent, to second, and ten per cent, to third. A horse distancing the field shall be entitled to only first and third money.

Entries to all the above races will close with the Secretary on Friday, August 1st, 1884.

R. C. KIRBY, President, JAMES O. WANZER, Secretary.

RESPECTFULLY CALLS ATTENTION TO THE SUPERIOR FACILITIES AFFORDED BY ITS LINE FOR REACHING with speed and comfort the best places in the State for Sea Bathing, Shooting and Fishing.

MONTEREY, THE MOST CHARMING Summer and Winter Resort of the Pacific Coast.

with its beautiful Groves and delightful Drives. Front in abundance can be obtained from the several streams in the vicinity of Monterey, and the best of shooting may be had in season.

THE BAY OF MONTEREY is noted for the extent and variety of fish which abound in its waters, notably Salmon, Rock Cod, Baracuda, Pompano, Spanish Mackerel, and Flounder.

THE BATHING FACILITIES AT THE "HOTEL DEL MONTE," ARE UNSURPASSED, having a MAJNIFICENT BEACH of pure white sand for surf bathing. THE BATH-HOUSE contains

SPACIOUS SWIMMING TANKS (150x50 feet) for warm salt water plunges and swimming baths, with ELEGANT ROOMS connecting for individual baths, with douche and shower facilities.

THE FAVORITE ROUTE to those well-known Watering Places, APTOS, SOQUEL AND SANTA CRUZ IS VIA THE Southern Pacific Railroad, (Broad Gauge).

The S. P. R. R. runs through the counties of San Mateo, Santa Clara, San Benito, Santa Cruz and Monterey, in each of which game abounds in great variety. Notably Quail, Pigeon, Snipe, Duck, Geese, Deer and Elk.

Lakes PILARCITOS and SAN ANDREAS are reached by this line. Stages connect with trains daily at San Mateo for those well-known Retreats, PURISIMA SAN GREGORIO and PESCADERO. We would particularly call attention to the unlimited extent of rangers at and about SAN BRUNO and McMAHON'S for RIFLE PRACTICE.

FIVE DOLLARS A YEAR

## THE KENNEL.

### The Pointing Quality of Dogs.

EDITOR BREEDER AND SPORTSMAN:—The communications of your correspondent "X" reminds me of Falstaff's "one belpenny's worth of bread to seven shillings' worth of seek." They contain so much assertion to so little proof. "X" is very hard to convince. That couplet from Hudibras would fit him:

"Convince a man against his will,  
He's of the same opinion still."

The extract I gave from two such acknowledged authorities as Stonehenge and Merham would have satisfied any ordinary mortal, but it only excites in him renewed combativeness. He appears to think he is having a sparring match under the Queensbury rules, and that he must stand up for four rounds. He labors under the impression that he is defending a case in the criminal court, and that it is his proper to take every advantage. He is not fair in his quotations. He gives just as much as suits his purpose and leaves out the remainder. In his reply to Mr. Bradford, June 21st, he quotes from what he terms "a distinguished authority." I thought it was the practice of lawyers when they quoted authorities to name them, and was surprised that "X" did not. But I find that the reason he did not, was, that he was mutilating his quotation, and did not wish to be found out. His "distinguished authority" was Col. Hutchinson, author of the best work on dog-breaking ever published. The following paragraph from Hutchinson is one of the quotations I refer to. The lines in italic are all "X" gives, and suppresses the remainder. "Though you cannot improve a dog's nose, you can do what is nearly tantamount to it—you can increase his caution, and by watching for the slightest token of his feathering and then calling 'Toho,' you will gradually teach him to look out for the faintest indication of a scent, and point, the instant he winds it, instead of heedlessly hunting on until he meets a more exciting effluvia." He further says, (but "X" in his simplicity overlooked it): "Many carelessly taught dogs, will, on first recognizing a scent, make a momentary point, and then slowly crawl in until they get within a few yards of the game, and there set as steady as a rock by the water together. You must not be in a hurry; keep your dog for a long time where he should have pointed. Suppose that after two or three such errors in the way described, he make a satisfactory point, hold up your right hand, remain stationary, still keeping your hand up. Whenever you observe him inclined to advance, of which his lifting a foot, or even raising a shoulder, or the agitation of his stern, will be an indication, stop for some seconds, and when by your raised hand you have awed him into steadiness, again creep in. If you succeed in getting near him without unsettling him, actually atay by him as firm as a statue for a quarter of an hour by the clock. You are giving the dog a famous lesson, and the birds are usually aiding you by not shifting their ground." "X" mutilates another quotation from Hutchinson. "Pointing is only a natural pause," but he omits the context "prolonged by art." In fact so far from his distinguished authority, Hutchinson, sporting his theory, all his "First Lessons in Autumn," contain directions for teaching a dog to point, and when to point, and how long to remain on point. Yet in spite of an authority like this, "X," with his limited experience of dogs, will again assert, "That you can no more teach a dog to point, than you can teach a deaf man to hear." "X" also quotes Stonehenge in support of his theory, and then with singular inconsistency says that Stonehenge is no better authority than Shaw, Hutchinson, Clement, Rowe and Dorr. Shaw is merely a compiler of a handsome and well got up book on dogs, Hutchinson, a writer on dog-breaking, Clement and Rowe, editors of sporting papers, and Dorr—well, I never heard of him as an authority upon anything, and question whether any body else ever did, except, perhaps, his over credulous friend "X." I see that "X" has two allies, Dorr and Bassford, Junior. Mr. Bassford is a young man and may be excused for giving us what he calls "a firm opinion," based upon the extensive experience of having raised some fifteen dogs; and "Dorr," who has broken dogs from Maine to Florida, supports the argument by stating he has a dog that he can take by the tail and swing round like a teetotum, and he will not break his point. But their opinions I attach little weight to, as they would have supported any other view of the question with equal alacrity, if their friend "X" had sounded a different key-note. They both, no doubt, possess wonderful dogs, but I would rather see their performance in the field than hear about them on paper.

"Poeta nascitur non fit" may apply to poets, but not to dogs. There was a time when dogs had no faculties but

what are common to the species. No one can tell their origin. How far he goes back nobody knows. We are told in the "Museum of Antiquities," that the Egyptians hunted with dogs, and that they were taken to the ground by persons expressly employed for the purpose. Also that besides the bow, the hounds and the noose, they hunted with lions, which were trained expressly for the chase like the cheetah, or hunting leopard, of India, being brought up from cubs, and many Egyptian monarchs were accompanied in battle by a favorite lion.

I contend that all the faculties of dogs, except the natural ones common to all, are the result of tuition and hereditary transmission. Take the St. Bernard. Will "X" contend that the faculty of going out in a snowstorm and looking for lost travelers, with a bottle of brandy around his neck, and lying down beside them to keep them warm, is born in them? Or the bloodhound—is his instinct or skill in tracking a fugitive slave, natural or acquired? Or the fox-hound, who is kept from chasing any other kind of fur by the hunter's whip; or the pointer or setter, who is taught to hunt feathers only, but whose early instincts will crop out—witness the glee with which he will chase a rabbit; or the Dandie Dinmont breed of terriers, which Sir Walter Scott tells us were entered in all the grades of small vermin, till their education culminated in the otter, for which exclusive purpose they were kept.

But I shall trespass too much upon the columns of your valuable paper if I proceed any further. It will now be in order for "X" to hunt up more "distinguished authorities," and prove that pointing dogs are born armed and equipped for the field, like Minerva from the brain of Jupiter.

GILROY, July 29th.

E. LEAVESLEY.

### Epidemic Typhoid.

There is running through several California kennels a low form of continued fever with bowel complications, which follows typhoid fever in the human being so closely in its course as to warrant the belief that it is a typhoid. The dogs, mostly young ones, begin by moping and stretching constantly, and with loss of appetite. Soon the nose dries and snuffles commence. Then both eyes and nose exude quantities of inspissated mucus, and there is a little cough. After ten or twelve days' diarrhea supervenes and persists, the stools being watery and mucous in character with blood stains and occasional clots of blood and the mucous coat of the intestine. The pup still has fever, emaciates, refuses food, is drawn in position and the bowels are tender to the touch. After about twenty days there is either a perceptible lessening of fever, and indication of a change for the better, or else death releases the poor brute. We advise that in kennels where there are many dogs, they be separated as much as possible and the ground and bed be cleaned frequently and very carefully. Only pure water and that not too cold should be given, and the dog may drink at pleasure. The food should be as starchy as possible. Boiled milk will be good. No meat should be given, but an occasional egg whipped will be relished and lend strength. The nose and eyes should be frequently cleaned with a soft sponge and tepid water, and both nose and eyes may be anointed several times a day with vaseline, and the whole dog may be sponged if care is taken to dry it well by gentle rubbing and to keep it out of draughts.

A darkish place and a bit of mosquito bar will do much to make the brutes comfortable. As for medicines, during the early stages, a little Dover's powder, say five grains may be given at night, and nothing else.

When bowel symptoms become urgent it will be well to give subnitrate of bismuth and opium with a little carbolic acid, say in the following proportions: Take of

Carbolic acid cryst.	ten grains.
Morphine	four grains.
Subnitrate of bismuth	two drachms.
Cinnamon water	four fluid ounces.

Mix; shake well. Give a teaspoonful every four hours.

As the fever lessens in intensity, and convalescence commences, give some such tonic as quinine, iron and strychnine pills, one 3 gr., morning, noon and night, until the dog gets on his feet.

At all times, quiet, fresh air, clean water and clean bedding are essentials. We should be glad to have reports from those who have already suffered, and should be glad to offer any suggestions we can in answer to queries.

The well-known English setter bitch Carrie J. (Count Noble—Peep O'Day), was recently sold by W. B. Gatee, of Memphis, Tenn., for \$700.

### Cocker Spaniels.

E. Leavesley and Louis Loupe have imported from the kennel of C. E. Scott, Schenectady, New York, a black and white Cocker spaniel bitch, Sprite, in whelp to Pilot. Sprite is out of Mignon, by Wildair. Wildair is from Weddell's Josie, by Whitman's Doctor. Mignon is sired by Garey, imported from the kennel of the Duke of Sutherland, Scotland. Her dam, Deisy 1st, from the Earl of Wilton, Leicestershire. Pilot was bred by H. P. McKoon, out of Deisy Dean, by Sem; Daisy Dean out of Fennie, by Wildair, etc.

### Pacific Coast Field Trials, 1884.

In our advertisement of last week relative to the time of closing nominations to this year's Derby of the above Club, it was stated that Aug. 15th was the date of closure. We are informed that this was an error and that entries both to the Derby and the All-aged Stake will close about Nov. 10th.

This will enable the owners of the many dogs now sick, to start their pets if they recover.

### Topsy.

On Saturday night, August 2d, the English setter bitch, Topsy, Dan—Sybil, owned by Lieutenant J. B. Barber, whelped eight, to Carl, Leicester—Dart. There were four dogs and four bitches, all white and black, with tan flecks. This is the third pure litter within three months of English setters.

Daizette's litter is doing finely, and Sybil II's likewise. If there is anything in the theory promulgated by "Hoosier," these acclimated dogs should turn out good ones.

A correspondent, in a contemporary, advises the use of cinna, the mugwort of India, as a remedy for worms. The homeopathic system of treatment is also represented as being very effective. A gentleman of our acquaintance gives dogs afflicted with worms the same globules as he would take himself, which are the size of poppy seeds. He only lifts the corner of their lip, and administers one, two, or three globules, as may be required, and "the cure is something marvellous."

### Card from Col. Farrow.

EDITOR BREEDER AND SPORTSMAN:—I wish to thank, through your columns, Col. Ranlett, Lieut. Kellogg and others of the National Guard of California, for their uniform courtesy and kindness during my short sojourn in your city. I have enjoyed their hospitality both at the rifle range and in the town, and I hope the opportunity may come that I may repay them with interest in their own coin. I have been asked why I declined to accept the prize on the man-target tendered me at the presentation by the "California Schuetzen Club." In explanation I will say I could not conscientiously accept a prize that I believed belonged to another. In response to my last shot at the man-target two numbers were shown up, a 17 and a 20. 17 only was scored on my ticket. These are the cold facts. At Creedmoor, at Wimbledon, or any other range I ever visited, if there is any doubt the shooter gets the benefit; the scoring of the 20 on my ticket would have given the first prize to the marksman from the East. There is another point: I was given credit in their distribution for but 39 bulls-eyes, when my tickets, which I now have, count 43; this would also carry me up on the prize list above some of the local marksmen. I challenge any one to show wherein I have acted in any ungentlemanly manner. I came this way on a business trip and have tried to confine myself as much as possible in that way, and can only regard whatever notoriety or reputation has been gained by any individual in practices such as this looks like only as so much tarnish which it is well to have rubbed off.

W. MILTON FARROW.

Old Hambletonian was 23 years old when he begot Artillery, the stallion that recently trotted in 2:21, and Wells Star, his dam, was 19. She is also the dam of Modesty, bred 2:26, who was foaled when her dam was 13.

## TURF AND TRACK.

## Discovering Jobs.

Difference of opinion as to the honesty or dishonesty of drivers in races are not new to the age and generation, but it is well understood how the complexion of a bettor's pool ticket influences his judgment in this particular. The cry of job is heard on every course or almost every occasion of a public race, no matter how fair the contest might have been or how irreproachable the conduct of the drivers. Even in such stubbornly fought and unmistakably genuine races as that at the Bay District Track last Saturday, there were growls of discontent and such words as "fraud," "steal," etc., could be heard along the road on the way to town. It is a citizen's privilege to grumble if he loses his money, but he acquires no right to accuse everybody else of all the crimes in the decalogue because forsooth he made a mistake in his judgment or had allowed himself to be guided by some one who was betting the other way, and was interested in hulling the market to increase the odds in his own favor. These charges of fraud are so common that they have in a great measure lost their effect on the general public, but they are no less disagreeable and in fact outrageous. The discontented who are so noisy in the bar room after a race is over, in ninety-nine cases in a hundred have not a particle of evidence that there was anything wrong except their pool tickets. If they can substantiate any suspicion of collusion or other form of fraud, they ought to have courage and manliness enough to go direct to the judges with their charges and proof, and they will be protected. They know this well enough and the fact that the authority of the judges and the associations in this direction is so seldom invoked, is evidence almost conclusive that no real ground for complaint exists.

There has been some discussion about the five-year-old race at Chicago, won by Eva, and it is a case in point. Our occasional correspondent "Columbus," who, because he is often right, seems to have fallen into cynical ways, writes:

The *Breeders' Gazette* and several other papers seem to think that Eva won her race, at Chicago, upon merit. The writer of this begs to differ with them on this matter, and in a few words as possible shall state my reasons for so doing:

That Lynwood, (formerly Billy Clinker), possessed the speed of the party there has never been the slightest reason to doubt, while as to being a quitter, that theory won't hold water. Algate can defeat Eva, single handed, at every meeting in the grand circuit from Cleveland down. Of this, I am not the only one who believes it, for nearly every horseman, at Chicago, knew that Algate had more speed than the California filly, and by rights ought to have won the race. The whole thing is contained in the following nutshell: A number of Eva's half-brothers and sisters were at the driving park awaiting the arrival of July 11th and 12th, at which dates they were to be sold to the highest bidder. In view of this fact, it was absolutely necessary that Eva should win, for should she lose, who could have told whether the colts would have sold or not, whereas should she win, who could have told the long prices they would certainly bring. Eva could not win the third heat and Lynwood had to, but Merciful Bob! didn't kneapsack McCarthy salt his animal for all time when he gave him a record of 2:20! Rather a dear way of helping a friend out of a bad box, I am thinking, for, like a score of horses we might name, Lynwood did himself up for profit when he acquired his fast record, at Chicago, on the 7th of July, 1884. The fourth heat Lynwood was compelled to win, and then having worked the trot all out of Algate he lay back and allowed Eva to defeat her tired companion. The *Breeders' Gazette* seems to think that it was owing to bad driving on the part of McCarthy that lost Lynwood the fifth heat. The writer of that article must certainly have been blinder than the blind, if he could not see farther into that horse race than his words would lead us to believe he did. To be brief, Eva won the race as her friends intended she should, her relations brought handsome prices, (all of which last I have no objections to as they were a fine lot of colts), Lynwood had placed himself where he can hurt no one, Algate had to be content with third money, because she could not beat a regiment of horses, one at a time, and goes home to Kentucky, none the less thought of by her many friends. She is a great young mare and the superior in every respect to any animal engaged in the five-year-old race, at Chicago, three weeks ago.

It will be observed that our correspondent is quite sure of the correctness of his judgment and sees the "job" distinctly. Now comes "Telescope," the special correspondent of the *New York Spirit*, who tells this story:

The "ability" of the turf planned a very pretty little raid upon the "sucker" in the five-year-old race at Chicago. General Turner, it was claimed, controlled Lynwood in the race and fixed with Hickok and some others to win. Hickok got the combination to drop to him the fifth heat to place Eva solid for a good piece of the money and help the pool selling, they understanding that she should not win. The cunning Hickok, finding that the five heats had brought all the horses back to his rate of speed, went on and drove the race out on Turner and gave him what is vulgarly termed the "goose." Crawford maintains that Hickok did not agree to drop the race to Turner, and, further, that the latter did not control Lynwood, but Dan Woodmansee says—and I think he is pretty near right—that there was a clear understanding as to dropping the heat. "Knapsack" McCarthy, driver of Lynwood, and his friends were the sufferers, as it is rumored Hickok made good a portion of Brother Turner's loss after the race was over. "Knapsack," smarting under defeat and the loss of \$500 wagered after the fifth heat, approached Hickok with warlike demonstrations, but fortunately for the turf hostilities were suspended.

"Telescope" also sees the job in the race but queerly enough he gets over directly against "Columbus." One says the race was fixed for Eva, the other that it was fixed for Lynwood. Both these correspondents have evidently been listening to stable and quarter-stretch talk. They have both been on the track long enough to know that these stories that are floated with an *ex cathedra* tone to them, are almost invariably set in motion by hangers-on who have no regard for what they say and no character to lose if they should be

proven to be malicious falsifiers. Gentlemen of intelligence ought to frown down such cattle and it is unfortunate for the true interest of the turf that they do not oftener do so.

## The Queen.

Maud S. was bred at A. J. Alexander's "Woodhorn Farm," Lexington, Ky. In 1877 she was sold with a lot of colts to Captain Bugher, of Cincinnati, and the entire collection was turned over to William Beir who was then training a stable of horses at Chester Park. Bair at once took a particular fancy to the little chestnut mare, then three years old, and prevailed upon Captain Stone to buy her. The Captain had great faith in Bair's judgment of a horse and purchased the young mare solely upon his representation. She was unbroken and very awkward to handle, yet Bair the same season drove her a half-mile in 1:13. That ended her work for that year. In the Spring of 1878 she was taken up and after a patient preparation she showed a mile over a half mile track in 2:22. In the Fall of the same year, when only four years old, Bair made a contract to drive her in 2:20, the attempt being made at Lexington, Ky. At the very first trial she trotted in 2:17, and it was not a long while afterward before she was sold to Mr. W. H. Vanderhilt, of New York, for \$21,000. The mare was shipped to New York and placed in Carl Burr's hands. As a five-year-old she did nothing remarkable and Mr. Vanderhilt concluded to send the mare back to Bair, which he did in the Fall of 1879. Her shoes were taken off and she was allowed to roam at will until the January she was six years old. In July of the same year she won a 3-heat race at Cincinnati and during the same month beat Trinket in a match race in three heats, the last heat being trotted in 2:13, which still stands as the fastest heat ever trotted in a race with another horse. At Buffalo the same year, she put together the three fastest heats ever trotted up to that time with other horses, 2:15, 2:16 and 2:16, but this was reduced a half-second in the aggregate by Clingstone, in 1882, and two seconds by the stallion Phallas at Chicago, in 1884. This was Maud S.'s last class race, her performances thereafter being special exhibitions. At Rochester, in 1880 she trotted in 2:11. In September she was engaged at Chicago to heat St. Julien's 2:11, which was then the fastest on record. She beat it just a second. This was her last performance during 1880. Her first principal engagement in 1881 was at Columbus, O., to beat the 2:17, made by Rarus. She trotted the mile in 2:13. On July 4th, at Detroit, she trotted against St. Julien's 2:16 and made 2:13. At Pittsburg on July 13th she trotted against her own time, 2:10, and made 2:10. At Chicago ten days later she attempted to beat 2:10, but she failed by a half a second. At Belmont Park, Philadelphia, upon July 27, 1881, she trotted the grandest exhibition of her life by plying to her credit three of the fastest heats ever trotted—2:12, 2:13, 2:12. Two weeks later, at Rochester, she put all previous records in the shade by trotting in 2:10. In 1882 and 1883 she was slightly amiss and did not give any exhibitions, but this year she has apparently regained her old form, judging from the remarkable trials she has shown.

It is in harness and when in motion that Maud S. is seen at her best. She is a long bodied mare, standing 15-3 hands at the withers and 16 1/2 hand at the hips. When in condition she weighs about 960 pounds, and her stride, when going at her best on a straight track, measured eighteen feet. "Shin boots" and "scalpers" are the only appliances needed upon her when trotting. She carries a 15-oz. shoe, with a 4-oz. toe weight in front and about a 1-oz. shoe behind. She is a mare of very strong will and it is necessary to handle her with great gentleness. A man who would fight her would soon render her entirely unmanageable, and in this she is the counterpart of her sire Harold, his full brother Lakeland Abdullah, and their dam Enchantress. The latter had the courage and resolution of the bulldog, and this quality descended to all her produce. Harold and Lakeland Abdullah both possess it to a remarkable degree, and if they had fallen when young into gentle, careful hands, as Maud S. fortunately did, it is certain that they would both have been distinguished as fast trotters. Black Maria, a daughter of Enchantress, also possesses the same peculiarity of disposition. Her head is almost an exact fac simile of that of Maud S., clearly indicating that resolution, will and energy, which, if carefully handled and educated, is the most valuable quality a horse can possess, but which, if abused and perverted, makes a dangerous instead of a useful animal. It has long been a subject of remark among turfmen who are familiar with the descendants of old Abdullah that in the matter of endurance and strong will power they have no superior, even among the most distinguished thoroughbreds. It is but natural, therefore, to suppose that Harold, whose sire and dam were both by the famous old horse, should possess this trait and that he should have transmitted it to his daughter Maud S.

"I once owned the dem of Westmont," said Col. John W. Conley, "and his history is worth telling. About ten or eleven years ago a gentleman named Woodward, residing in Wheeling, W. Va., wrote me that he had a mare that had trotted a half-mile in 1:13 over the track at that place, which was a poor half mile track. I went to see the mare, and as a result of my trip she was purchased by Col. Richard West, of Kentucky, and myself, and trained on the Colonel's farm in Kentucky. She was too rattleheaded, however, for trotting purposes, and so Colonel West bred her to Almont, the produce being Westmont. He was trained as a trotter but, not showing any speed at that gait, was sold to John Steiner, of Indianapolis, Ind., and that gentleman's wife used him for a year or more as a saddle-horse. One day in the Winter, while he was being driven to a sleigh, it was found that Westmont wanted to pace, and thereafter he was allowed to go that gait. He was named by Mr. Steiner in honor of Col. West, who bred him, and Almont his sire."

Jay Beach's hay stallion Almont, by Almont, dam by Brown Chief, won a race in straight heats at Portland on the 25th ult., trotting the third heat in 2:30. He won as he liked and could have went faster. The *Rural Spirit* says that a gentleman from California asked Mr. Beach if \$10,000 or \$12,000 would buy the horse, but the answer is not reported.

A strange accident happened during the free-for-all pace at Pittsburg, week before last. During the second heat a dog ran on the back stretch and was struck and knocked out of the way by Rich Ball. The collision caused the pacer to break and fall back. On dismounting, Campbell found wedged in between Rich Ball's shoe and sole a foot and part of the dog's leg.

The *Turf, Field and Farm* says that Jim Renwick goes slightly lame forward, but warms out of it.

## Saratoga.

July 25th.—Purse, \$300, for three-year-olds and upwards, of which \$50 to the second; entrance free; horses not having won a race in 1884 allowed 7 lbs.; maidens allowed, if three years old, 12 lbs.; if four years 17 lbs.; if five years, or upward, 25 lbs.; winner of the first race first day, (Jim Renwick), to carry 5 lbs. extra; five furlongs. Morris & Patton's b f Northana, 4, by Strachino, dam Eclipse, 106 lbs. (Taylor) 1  
J. H. Keenagban's burch, 4, 108 lbs. (Maynard) 2  
J. W. & R. H. Loud's Richard L., 3, 106 lbs. (Conkling) 3  
G. R. Keene's b c Dutch Roller, 3, 102 lbs. (Fisher) 4  
Kimbel & Co.'s Baron Favorot, 4, 115 lbs. (Fitzpatrick) 5  
W. L. Scott's Greystone, s, 109 lbs. (Lewis) 6  
E. J. Baldwin's Savannah, 4, 92 lbs. (Higgs) 7  
C. Smith's Coraline, 3, 92 lbs. (Anderson) 8  
E. Burgess's Willie W., 3, 94 lbs. (Douglas) 9

Time, 1:03.

Pools—Burch, \$50; Graystone, \$30; Dutch Roller and Richard L., \$20; Baron Favorot, and Savannah, each \$15; and field, \$15. Betting—2 to 1 against Burch, 3 to 1 against Greystone, 4 to 1 against Richard L., 7 to 1 against Savannah, 8 to 1 against Dutch Roller, 10 to 1 each against Northana and Baron Favorot, 15 to 1 against Willie W., 20 to 1 against Coraline. Mutuals paid, \$106.

Following several false starts, Dutch Roller led off, Northana next, Burch third and the others straggling at the rear. Northana bounded to the lead on the lower turn by the woods and held it to the end, winning easily by two lengths, Burch second and half length better than Richard L., he followed by Dutch Roller, Baron Favorot, Greystone, Savannah, Coraline, and Willie W.

Same day—Purse \$350, of which \$50 to the second; for horses that had never won a race of the value of \$200, nor two or more races of any value at Saratoga in 1884; entrance free; horses not winners in 1884 allowed 5 lbs.; maidens allowed, if three years old, 7 lbs.; if four years, 12 lbs.; if five years or upward, 20 lbs.; three-quarters of a mile. J. W. & R. H. Loud's ch f Lady Loud, 3, by Monarchist, dam Lady Hardaway, 104 lbs. (Conkling) 1  
J. E. McDonald's Rothschild, 4, 106 lbs. (Taylor) 2  
R. McEldine's Musk, 4, 110 lbs. (Lewis) 3  
E. J. McEldine's Ida K., 4, 108 (carried 100 lbs.) (Blacklock) 4  
E. J. Baldwin's Marie Stuart, 3, 99 lbs. (Higgs) 5  
O. Whitten Bros.' Lady Lyon, 4, 101 lbs. (Sheridan) 6  
Suffolk Stable's b f by King Alfonso, dam Quickstep, 3, 97 lbs. (Worth) 7

Time, 1:17.

Pools: Lady Loud, \$40; Rothschild, \$30; Marie Stuart, \$20; Lady Lyon, \$16, and the field, \$22. Betting: 2 to 1 against Lady Loud, 4 to 1 against Rothschild, 5 to 1 against Lady Lyon, 6 to 1 each against Musk, Ida K. and Marie Stuart, and 10 to 1 against the Quickstep filly. Mutuals paid, \$14.60.

Rothschild led off, with Lady Loud next and the others well up. An excellent advantage was held by Rothschild until after passing the last furlong pole, when Lady Loud took the lead and won quite cleverly by a full length, Rothschild second, half a length in front of Musk, who was followed home by Ida K., Marie Stuart, Lady Lyon and the King Alfonso-Quickstep filly.

July 26th.—Purse \$400 for maiden two-year-olds, of which \$50 to the second; and the entrance money \$10 each, to be divided between the second and third; those never having won second money in a race of the value of \$1,000 allowed 5 lbs.; 4 entries; three-quarters of a mile. E. Corrigan's ch c Irish Pat, by Pat Malloy, dam Ebel, 105 lbs. (West) 1  
E. J. Baldwin's ch g Rapido, Grinstead, dam Experiment, 102 (carried 105 lbs.) (Lewis) 2  
W. L. Cassidy's Reed, 102 lbs. (Conkling) 3  
R. W. Walden's Lulu S., 102 lbs. (McManus) 4

Time, 1:17.

\*Dead heat and money divided.

Pools: Reed, \$100; Rapido and Irish Pat, each \$60, and Lulu S., \$30. Betting: Even against Reed, 2 to 1 against Irish Pat, 3 to 1 against Rapido, and 5 to 1 against Lulu S. Mutuals paid: Rapido, \$12.10, and Irish Pat, \$11.10.

The flag dropped to a poor start, Lulu S. leading off, followed by Irish Pat, Rapido, and Reed. At the end of a furlong the first two were parallel, and Reed was third, lapped by Lulu S. Entering the main track Rapido displayed his colors to the front, but was collared by Irish Pat near the woods on the lower turn. The contest lay between them, as they were head and head on entering the straight stretch, but Irish Pat showed a slight advantage at the last furlong post. In the rush home Rapido came up and made a dead heat with Irish Pat, and three lengths away came Reed, who was a couple of lengths in front of Lulu S. The money was divided between Rapido and Irish Pat.

## Turning Back the Pacers.

Mr. Peter Schatz, a wealthy German, several years ago conceived the idea that he would go upon the trotting turf. His initial experience was a costly one, as he purchased in Kentucky for \$15,000 the black gelding Jewett, that had the previous Summer acquired a three-year-old record of 2:23, at that time the best for a horse of his age. Mr. Schatz also gave \$7,000 for another animal that was never of much account, and started out with this pair to beat the older heads at the business. The result was painful. After leaving his native heath in Kentucky Jewett never wanted to trot a step, preferring the pace, and in consequence was anything but a success. After toiling with him for four years Mr. Schatz about a month ago concluded to let Jewett have his own way in regard to the gait he would go, and consequently he made his debut at the Pittsburg meeting in a pacing race, and was third four times to such good ones as Bessie M. and Fritz when the heats were better than 2:20. And in view of the success made by Minnie R., Jewett and some other trotters whose natural gait is a pace, it is not strange that so astute a young man as Dr. Hedges has concluded to adopt the same tactics with his mare Novelty, record 2:23. She doesn't want to trot, but is perfectly willing to pace, and when her weak leg has been strengthened by rest and hitherto she will score up for the word with the sidewheelers.

The chestnut gelding Compromise (6), by Springbok, dam Spotted Fawn, by Deneslion, etc., fell and broke his neck in a hurdle race at Monmouth Park on the 24th inst. The colored jockey, Williams, was severely injured. This makes the third horse killed at Monmouth Park the present season in jumping races.

A gentleman of Ogden purchased at Palo Alto last week a three-year-old black stallion, by Electouer, dam Janiatta, by Fred Low, and the blood of the great sire will be diffused through Mormondom.

Sam Bryant thinks that Gen. Harding is again at himself, and is waiting for a good day and track to prove that he can go a distance as well as the best of them.

Ike Woodruff has at Nashville a young chestnut gelding by the four-mile Foster, son of Lexington, dam a trotting mare that has shown a mile in 2:36.

The wagon drawn by Firebrand in Westmont's fast mile weighed but 75 lbs. exclusive of the pole.

Pendragon on Vanderbilt.

However much we may believe in the pluck and determination of Maud S., it is difficult to find the same qualities when we look for them among those who are most closely associated with her. Somehow or other they do not seem to care about accepting Mr. Case's challenge. When the Clingstone party, anxious for a match between their new-found wonder and Jay-Eye-See, began jeering and sneering at "the pony," Mr. Case at once deposited £1,000 sterling in the hands of Mr. H. Busbey, editor of *Turf, Field and Farm*, and offered to make a match at once with any horse in the world for double that amount, one mile to sulky, at Hartford, Providence, or Chicago. These are the three presumably best and fairest tracks in the States; but Mr. Case is perfectly agreeable, in the event of the Clingstone or Mand S. party not caring for any one of them, to have choice decided by lot. The magnificence of Mr. Case's offer appears to have quieted the Clingstone folks for the moment. Mr. Vanderbilt, the owner of Mand S., is not quieted, but he seeks relief in his oft-published statement that no horse of his shall run for a money stake, for a public purse, or for any similar prize. Why Mr. Vanderbilt, who is in his way the greatest gambler in the world, should thus set his face against gambling by means of horses, should thus set his face against the mere actual running for stakes and prizes, it would be futile endeavoring to discover. Perhaps he has a bit the best in the one set of transactions which he would vainly look for in the other.

To the believer in logic and consistency it must often enough seem singular that in this country, no less than in America, people who are prepared to ruin themselves—or, for preference, to ruin others—at the great game of bulls and bears, become virtually indignant whenever so common and so wicked a thing as ordinary betting is mentioned. Mr. Vanderbilt, in the accumulation of those enormous wealth thousands of families have been irretrievably ruined—whose fortune seems to have been cemented by the blood of suicides and the tears of widows and orphans—cannot allow his conscience to be soiled by means of the betting agencies. This sort of thing, contemptible always, becomes cowardly now that, after all the boasting done of late on the Vanderbilt side, Mr. Case has come forward with his defiance. No secret is made by Case and his adherents that they would rather meet Maud S. than any other trotter; there would be infinitely more knos about defeating her than in defeating a comparatively unknown horse like Clingstone. And so, as the Clingstone lot themselves are pensive to get the breath which was taken away by Mr. Case's bold defiance, the conflict, on paper, is left entirely between Maud S. and Jay-Eye-See.

Mr. Vanderbilt must have been surprised to find that the same newspaper people who but a short time ago were prepared to believe anything that was said by a railway king, and who glorified to the echo his decision never to run Mand S. or any other horse for a public wager or for money consideration of any sort, now fall away from him and espouse the cause of the daring challenger. Why this is thus I know not. Possibly they esteem Mr. Case's bravery as beyond all price; possibly Mr. Case is also a very rich man, and on this score compels his share of allegiance; possibly they have to obey the behest of the sporting public, who desiring a race between Maud S. and Jay-Eye-See so very badly, would not give much support to a paper which threw cold water on the project. However this may be—and I do not presume to say how it is,—the New York papers have discovered that Vanderbilt's dictum is not only "all shove" in principle, but that it is rotten in practice also. Before me, as I write, lies a list of the public records made and public moneys taken by Maud S. since she has been Mr. Vanderbilt's property. It may be as well to say here that, according to some accepted authorities, the fact that Mand S. has certain public records is in itself proof absolute that she has taken, or at all events competed for, public money; otherwise the records would not be permitted her. If a horse were to get up one fine morning, and beyond the shadow of a shade of doubt trot a mile in two minutes dead, it is for the credit of New York to be hoped that directly the performance was verified the record would follow. But I am not at all sure that it would; and I have only to refer readers interested in American trotting and its peculiarities to some correspondence published in this paper last Winter in proof that technically records are confined to performers in public stakes and matches. Anyhow, Vanderbilt and his excuse are burst up, and when the latest mail left the entire trotting world was waiting to know what would be the next move. There is a good deal more stuff of passing interest that might be chronicled here, but as, first, I have given the subject plenty of space already, and as, second, news may come by cable at any moment that the race has taken place, I may as well await the development of affairs before proceeding further.

Muddy Monmouth.

The telegraph has already reported Freda's appearance at Monmouth Park, on the 29th ult., and her success over Mittie B. and the mud. The day seems to have been exceptionally bad, as we gather from the *World's* report given herewith:

"Rain, rain, go away, come again another day"—but not a race day—was no doubt the wish of a majority of the crowd at Monmouth Park yesterday. Not since Bushwacker's day at Sheephead Bay in September, 1882, has there been more inclement weather on a race track in this section of the country. It rained at Monmouth Park on the 4th, but only at intervals, while yesterday it simply poured from long before the first bell rang until and after the last race. In fact, the rain continued to come down until the trains were all on their way to New York. Naturally with a track that was already deep in mud the steady rain made it, if possible, worse, and by the time the jumpers were called it was literally fetlock deep in mud and water. Under such circumstances it was not at all surprising that the several sure things left through, and of the six races run only one favorite—Eole—got home first, while he showed in such grand form that he looked good enough not only to beat Drake Carter but every aged horse in the country. A well known admirer of racing remarked after the race, "he will win the champion srs." That he is in so fine a condition is not only a triumph for his trainer, Eph. Snedeker, and his regular attendant, Charley Miller, but it is a compliment to his owner, Mr. Gebhardt, who has never allowed Eole to be hurried in his preparation. He also refused to allow any harsh or cruel veterinary remedies to strengthen up his legs, saying that he hoped to be able to retire the horse as free from blemishes as when he got him, when three years old. Judged by the style in which he won the Freehold Stakes yesterday, Mr. Gebhardt will be able to carry out his wishea. It was the second time the big horse has won the stake and

the third time Snedeker has trained the winner, he having also won it with Girofle in 1882, when Eole ran second, while Billy Donohue has ridden the three winners.

Of the other races Heel-and-Toe won the mile and a furlong handicap very cleverly. Meaton laid well back with her, letting Bockstone and Araza do the running, and when they had settled their chances he brought Heel-and-Toe to the front. The two-year-old handicap was won easily by McMahon's Eachus, a half-brother of the famous Rhadamantus and a cast-out from the Erdenheim Stable. The race was marred by several complaints of foul riding, none of which the judges sustained, although many thought it very conspicuous. The third race, the Elizabeth Stakes, at a mile and a furlong, for three-year-old fillies, had five starters, but it was simply a match between the Kentucky-bred filly, Mittie B. and the Californian Freda, which the latter won quite handsomely after a driving finish in which Mittie B. was in no way disgraced, but the daughter of Wildidle and Frolic had simply the most speed and Holloway had only to sit still and let the filly win as she liked. Of the other races Dan K. won the selling race easily, the mud just suiting him, while Bally's success in the hurdle race was no doubt due to the fact that Hurley waited with Marshall too long, he making no effort until after the last hurdle had been jumped.

The following are the details of the Elizabeth Stakes:

Elizabeth Stakes, for three-year-old fillies that did not win a two-year-old stake of the value of \$2,000 when carrying weight for age or more, at \$50 each, \$15 forfeit, with \$1,500 added, of which \$500 to second; winners of a three-year-old stake of the value of \$2,000 when carrying weight for age or more, to carry 5 lbs.; of two such stakes, 7 lbs.; and of three such stakes, 10 lbs. extra; those not having won when carrying weight for age or more in 1884 more than \$1,000, allowed subscribers, a mile and a furlong. Maidens allowed 10 lbs.: 33

E. J. Baldwin's blk f. Freda, by Wildidle, dam Frolic, 108 lbs. (Holloway) 1  
 G. H. Kernaghan's Mittie B., 108 lbs. (J. McLaughlin) 2  
 Mr. Kelso's Water Lily, 108 lbs. (W. Hayward) 3  
 G. L. Lovillard's Economy, 108 lbs. (Hngbes) 0  
 D. D. Wither's Paradox, 103 lbs. (Meaton) 0

Time, 2:02.

Betting: Even money against Mittie B., 11 to 5 against Water Lily, 4 to 1 against Freda, 8 to 1 against Economy and 12 to 1 against Paradox. Pools: Mittie B., \$200; Water Lily, \$160; Freda, \$90; Economy, \$50, and Paradox, \$30. Mutuals paid, \$34.85.

After an even start Freda and Mittie B. came away, and as they passed the judges the Californian led Mittie B. by a head, with Paradox third, Economy fourth and Water Lily last. Before they reached the turn Water Lily took third place, but she was never able to reach Mittie B. or Freda, they racing together from the turn to the backstretch, with Freda leading by a length at the quarter and half. As they ran around the railroad turn Mittie B. drew up nearly alongside of Freda, and from that point it was a driving race home in which Freda always held the advantage, notwithstanding McLaughlin's free use of both whip and spur. Freda finally won by a length, with Mittie B. eight lengths in front of Water Lily, Economy the same distance back and Paradox beaten off.

King Phallas.

Nearly eight years ago four of the best horses then on the turf met in competition at Charter Oak Park. These four horses were the very flower of their kind, as one was the peerless Goldsmith Maid, one was the great Smuggler, one was Judge Fullerton, and the last was Bodine, the stout son of Volunteer. But a few weeks before the great mare had lowered her colors to the stallion at Cleveland, after a desperate struggle. When they met at Hartford, their fame had long preceded them, and thousands thronged to witness another battle between the giants of the trotting turf. Although the Maid had been used as an exhibition horse, it was well understood that the contest at Charter Oak was to be an uncompromised fight for supremacy, and so it proved. To be brief, six bitterly fought heats were trotted, the first two going to the credit of the stallion, the third dead between the Maid and himself, and the remainder resulting in favor of the mare.

Smuggler was beaten, but in that first heat he made a glittering mark that every ambitious stallion owner has aimed at ever since.

Season after season the lords of the stud have fought against the stubborn symbol of the fastest mile by an entire horse, but without avail. A few efforts were menacing, and last season but one-quarter of a second was lacking in Phallas' attempt to equal it; 2:15½ seemed invincible.

Smuggler's day as the king of trotting stallions is over. An honorable reign of eight long years as the champion terminated at Chicago on Tuesday, July 15th, in the presence of a comparatively small number of spectators. To the great son of Dictator and Betsy Trotwood has fallen the laurels once worn by Smuggler. Like that of the former champion, the great mark was won in a race against actual competitors, and 2:13½ not only stands as the fastest mile by a stallion, but the fastest fourth heat ever trotted. What is more remarkable about the performance is the fact that the race in which the record was made was the first for Phallas this season.

It was in the order of things that the record should at some time be beaten. We do not intend to quote the popular saying, for Smuggler still lives, a king among horses, and is on his way to great distinction as a sire.—*Sportsman*.

It is whispered in turf circles that Commodore Kittson is anxious to get rid of his pacer Johnston, record 2:10, and that the horse can be bought for less than the Commodore paid for him last Fall. The price then paid was \$20,000, of which \$2,500 went in commissions to parties who effected the sale. The exact reason for the Commodore's determination to dispose of Johnston is not known, but it is probable that inasmuch as the expense is very great he does not desire to have so much money in one gelding. It is certain that he has lost a good deal of his love for the running horse business, and recently sold Panique, by far the best colt in his stable, and one that is well engaged, to the Dwyer Bros. for \$15,000. The trotting stable has never been much of a success, and now that Fanny Witherspoon has got out of shape and gone to acting badly again, there is really no horse in his stable that is capable of a first-class performance.—*Breeder's Gazette*.

Trotting at Portland.

PORTLAND DRIVING PARK, July 26, 1884. Trotting, 3 in 5, to harness. Purse, \$250; second to receive \$50

Altamont, b b, by Altmont, dam by Brown Chief—Jay Beach..... 1 1 1  
 Startle, b g, by Milliman's Bellfounder—L. E. Lindsey..... 3 2 2  
 Kelly, ro g, Misser..... 2 3 3

Time, 2:39½, 2:38½, 2:50½.

Pools: Altamont, \$20; field, \$8.

Bad Starting.

With the beginning of the racing at Saratoga, an additional community adds its complaints to the general one of bad starting. The races most to suffer for the want of competent starters are the two-year-old ones, and it begins to look an impossibility to secure an equal start for such events. Of the two-year-old stakes run in the East so far this year there have not been three really good starts. Of course those to get the advantage did not always run, but it is certain that many of the youngsters have been beaten without having had an equal chance with the winners. At Monmouth Park where two-year-old racing is a feature, there seems to be no unanimity of action between the riders and the starter. Mr. Pincus takes his position a short distance below the starting point, and shouts his orders, which while being obeyed by some, advantage is taken by others to break away. Perhaps if he would marshal the horses some fifty or sixty yards from the starting point and walk with them he would more often than not effect a start at the first effort, for among the few good starts made this season was that for the two-year-old selling purse on Thursday, which was done at the first effort, and when all but Ma Chere were in close order, and she but a trifle back, which was entirely the rider's fault, it being his first race. The subject of starting, as now managed, demands the serious attention of the committees of all the clubs and to none do the public look for action more than to the gentlemen of the Monmouth Park Association who, as breeders and owners, have so much at stake. It is possible that Mr. Pincus cannot be replaced, and such being the case he should be sustained and assisted in every possible way to secure what the race-going public ask for—promptness and on equal chance to all in every race and that bad starts shall be in the minimum and not the maximum, as has been the rule so far this season.—*World*.

The Arab Horse.

For a number of years the belief has been prevalent among the people who have given the matter of breeding racehorses but cursory attention that the Arab horse was nearly, if not quite, the equal in point of speed of the thoroughbred runner, and they have always maintained in the most dogmatic manner that when it came to the question of endurance the "feet-footed courser of the desert," as the novelists delight to call the Arab, was far and away the superior of any other member of the equine family. As a matter of fact there has been a vast amount of nonsense written about the Arab. The late A. Keene Richards, of Kentucky, tested the matter in the most thorough manner, making several trips to the Arabian deserts and paying long prices for the best specimens of the breed that money could purchase. The stallions thus secured were mated with thoroughbred mares, and the mares bred to thoroughbred stallions. The costly experiments made by Mr. Richards were total failures. In England a Mr. Blunt has long held views similar to those of Mr. Richards, and he too spent money freely in testing the theories which on their face seemed so plausible. Finally he induced the stewards of the Newmarket meeting to arrange a stake for Arab horses, and the same was run not long ago, the distance being two miles. There were eight starters, the winner being a three-year-old that carried 108 pounds, an aged horse that had won a number of races in India being second. The winner had, previous to the race, been tried at two miles with a couple of thoroughbreds that ranked but little above selling platers, and they beat him nearly half a mile. This race shows conclusively that the much-vaunted speed of the Arab exists only in the imagination of people whose enthusiasm ran away with their judgment, and that however valuable he may be for saddle and work purposes, he is not a racehorse in the sense that the word is now used.—*Breeders' Gazette*.

Racing at Portland.

PORTLAND DRIVING PARK, July 26th, 1884.—Running, 5-8 mile dash Purse \$150, second horse to get \$50.

Jim Merritt, br g, by Langford—Sweetwater—Tompkins, 117..... 1  
 George Winters, cb g, by Joe Hooker, dam by Norfolk—McCaugh, 117..... 2  
 Bogus, cb g, by Oppin, dam by Heenan—Faylor, 117..... 3

Time, 1:06.

Pools: Jim Merritt, \$20; Bogus, \$15; Geo. Winters, \$5. Won easily, but it was charged that Bogus was pulled. The following is the *Rural Spirit's* description of the run: A good start was had at the first trial. Winters and Merritt were even, and Bogus had his head on Winters' hip as they went under the wire. The start was a lively one, and Bogus had rather the most headway and was able to keep the pole to the gap or entrance to the track at the south end of the stables, a distance of about the 16th of a mile. Here he suddenly decreased his speed, and Winters and Merritt shot out from him as though they had been struck by the five men who had been placed in the gap to prevent a possible bolt. "A chuck, a chuck!" came from several voices on the ground. At the eight Merritt had a length and a half the best of Winters, and more than double that of Bogus, who seemed to be running under some disadvantages. At the quarter the race was won by Merritt, as it was evident that Winters had no speed, and Bogus was too far away to ever overhail him.

Thoroughbreds for the Dutch Indies.

M. De Gingne, a tobacco planter, of Somatra, purchased last week from Palo Alto some thoroughbreds, which were shipped to Hongkong by the steamer of last Wednesday, and will be forwarded from there to their place of destination. The three were the bay stallion, Gen. McDowell, 3 years, by Norfolk, dam Baydana, by imp. Knight of St. George from Sally Wallace, by Star Davis; bay mare, 4 years, by Hubbard, dam Texana by Foreigner (son of Glucoe), from Mary Wood by imp. Yorkshire, and bay mare, 5 years, by Longfellow, dam Miss Campbell, by Endorser from Cynthia Sue, by Joe Stoner. M. De Gingne's main purpose is to cross the thoroughbreds with the native horses of the Indies for the general improvement of the stock.

It seems that one of the Sanny Slope fillies has wandered off to Boston. The Beacon Park reporter of the *N. Y. Spirit* writes: "Among the trotters I noticed working out during the forenoon was a light made, clean cut, genteel looking filly of the Sweetheart type, and I found they were from the same sire, Sultan. Bowen sat behind the filly, and gave her a quarter as she pleased to go in forty seconds. She is owned by Mr. J. R. Graham, a wonderful judge of young stock. He selected her from the lot of two-year-olds brought from California by Mr. L. J. Rose, and I understand he cost him \$1,425. He was prepared to pay \$2,000 for her, being satisfied that she had shown a quarter in 36 seconds. This filly is by Sultan, dam Vasthi by Mambrino Patch.

Entries at the State Fair.

Trotting.

No. 1—The Occident Stake—Closed in 1882 with 30 nominations.

No. 3—2:25 class. Purse, \$1,200. E. M. Fry's h g Arab. Geo. W. Baylis' h g James H. L. J. Rose's h m Neluska. J. A. Goldsmith's h m Sister. Louis Duncen's h g Louis D. John Dexter's ch m Magdallah.

YACHTING.

The Lurline went over to Sanelito early last Sunday and waited there until the Halcyon and Chispa beat through the Straits and joined her, when the vessels started for a cruise outside. The ebb tide was running strong and the wind in the channel was blowing about fourteen knots. Lurline started some way ahead, and by the time Point Bonita was made was overhauled by Halcyon, both vessels, as was to be expected, leaving Chispa

rapidly. They went about as far as the nine-fathom buoy, and then squared away together, both the big fellows running evenly for quite a distance. Halcyon then picked up a little more wind and ran right away from Lurline, arriving at Sanelito several minutes ahead of Lurline.  
 The Spray went to Vallejo on Saturday afternoon and returned the next day. Pleasant weather was experienced on the trip down until the weathered Kershaw's Point and got into Richardson's bay, where it came on to blow a gale from the northwest. She then ran back near Tiburon Point and put a reef in all round. The flood tide had then commenced to make, and it was sometime before she got into the open again, and when she did, she was compelled to shake out the reef again, as the weather had quieted down into almost a dead calm.

The Chispa has taken out all of her inside ballast and now depends entirely on the lead she has on her keel to give her stability. We should not think this advisable in a boat like the Chispa which has so much bearing in the water, but as nothing can be proven satisfactory with practical experiments we shall watch the result with interest.  
 The wind on Sunday bowled through Hurricane Gulch for about three hours, causing great difficulty in making the shore with the small boats, and only then with the passengers drenched to the pelt. Ariel's small boat was compelled to drop half its passengers on board Virginia and make a second trip for them.

Would it not be advisable for the Pacific Yacht Club to purchase a new house flag? The one that they have been flying for the last few weeks has frayed out to such an extent, that nearly all the red has blown away, and it presents the appearance of a cock sborn for a combat in the pit.  
 The Virginia is again afloat, but she still remains with her dress off. The Lady Mine is lying in Richardson bay and has followed suit to the Virginia, all her paint being scraped off.

The Fleur de Lis cruised round inside the bay, last Sunday, finally bringing up at Sanelito in Pacific Club House Cove, where she was left.

The Ariel was out for a few hours, last Sunday, with the Nautilus Club on board, not going much farther than Angel Island, however.

Aggie, although not out of commission, has been practically laid up. Ex-Commodore Macdonough having discharged all but one man.

The Rambler anchored off San Quentin Point, on Saturday night, and remained there until late the next afternoon.

The Halcyon seems to an observer to be very tender since they had lightened her up so much.

The Lotus Club was out for an overnight trip last Saturday and Sunday.

The Frolic and loop Nellie were at Quarry Cove, on Sunday.

The Whitewing was outside last Sunday.

THE DRAMA.

Vienna Garden.

There has been an excellent performance during the week embracing every form of specialty, and the patronage has been good. Among the best things was the acrobaticism of Williams and others who are certainly wonders in their line. The musical performance of the orchestra, called the Bijou Orchestra, was excellent. It contains six instruments, but they are all effectively played. Next week Mr. Walters will present the people of San Francisco with a musical treat, they have before marked their appreciation of. This is the original Spanish Student's troupe, which formerly traveled under Abbey's management, and which is allowed to be the best that ever did travel. The troups will arrive here on Thursday next, and will appear at the Vienna without delay afterwards. In the meantime any one can enjoy a pleasant evening at the Vienna.

The best and biggest fish lie ever conceived comes from Victoria, B. C., under date of the 29th of July:

"A strange sight was witnessed off Cape Flattery on Friday last. The water, as far as could be seen, was thick with a plentiful show of herrings, in the midst of which, spouting and diving, was a school of large whales, quite fifty in number, ranging from 20 to 100 feet long. Diving down with a parting whistle the tail and coming up again with open mouths, closing their jaws with a mighty gulp, the whales would capture immense quantities of the finny tribe, the blood of the herrings pinched in the process distinctly tinting the water of the ocean." If this be true our school books must be awfully wrong. We call on our Board of School Directors to take this matter without delay.

THE RIFLE.

BIOGRAPHICAL SKETCHES.

Dr. Pardee, the Father of Rifleism in California.

It has long been the intention of the BREEDER AND SPORTSMAN ever since, in fact, the rifle and gun became a feature of the paper, to publish periodically brief sketches of our prominent marksmen at the target and trap, but the want of space so far has kept us from putting the scheme into execution. It is true, we are somewhat crippled in that respect still, but taking all things into consideration we have concluded not to delay the matter any longer, and so we begin this week.

No one, we think, can dispute the propriety of our first selection for the rifle column, for the labors of Dr. Pardee for the last twenty-five years to encourage rifle practice in this State, and his reputation as a marksman, certainly gives him precedence over all others for the honor. More than that there is, perhaps, no man in the State who has a more profound knowledge of the mechanism of the rifle, the laws of trajectory, the science of loading, or in fact, of all that relates to the philosophy of the rifle, than Dr. Pardee. To the writer the work is a labor of love, for our personal acquaintance dates back as far as 1863, since which time we have fully appreciated his enthusiasm, his abilities, and his efforts in the good cause.

Dr. Pardee was born in Rochester, New York, on the 1st of April, 1829, which makes him 55 years old. It is evident nature did not play a fool's game in bringing him into the world on that day, for he is still in the maturity of his life, as full of enthusiasm, philosophic inquiry, and vigorous experiment as he was at twenty. He was the youngest of seven brothers, who were all riflemen of note in their time, though without the knowledge of the science or laws of gunning which he has since attained by practice and study. When eight years old his father removed to Michigan, then a wilderness full of all sorts of game, and it was here, at such early life, that his surroundings shaped his future career. In pursuit of large game, oftentimes dangerous, he showed much nerve, ability and daring, and perhaps, chiefly from the dangers he met with, his inquiring mind, prompted by self-protection, began to study cause and effect, the laws and science of gunning, and commenced a series of experiments which sought to give him a better and safer weapon than the old crude gun of the period. Since this time, charmed as all such men are with philosophic investigation, he has continued his scientific experiments until he has attained a very extensive knowledge of all laws pertaining to dead science and abstruse mathematics in their connection with the rifle and its practical use. His library is perfect and contains almost every work known in the English language on his favorite study.

Such is Dr. Pardee in his mental organization; now let us look at him as a practical exponent of his art. He was one of the first to commence the scientific practice of telescopic rifle shooting, and his statistical data in this line are not excelled probably by any man living. His cabinet of fine arms, the collection of years, is said to be the largest and most complete of any private gentleman in America. He has 35 rifles averaging in weight from 3 pounds to 180 pounds, and ranging all the way from a 22-calibre to 75-100 calibre. We have heard these guns cost \$5,000 in cash. Of course he has been engaged in many private matches at the target, and some public ones, but these we can only refer to briefly. His first, which we principally notice, because it gave him a national and world-wide reputation, was with Mr. Warren Loud, at San Bruno in 1866, the conditions being three matches for \$1,000 a side, 100 shots to the match, 200 yards, telescopic sights, string measure. Mr. Loud won the first by a string 193 inches, the Doctor's rifle getting out of order; the second Dr. Pardee won by 157 inches; the third was again won by Dr. Pardee with the unprecedented string of 131 5-8 inches, an honor that made him champion of the world for the time, and for anything we know to the contrary, still so. Lithographs were taken of the last 100 shots of the match, and so highly were they thought of by the sporting papers of the world, that orders came in so fast from every country that a second edition of 1,000 copies had to be printed and were all sold within a year. We have one of them in our office, and it is a curiosity of marksmanship worthy the inspection of all. From this time his fame as a marksman stood at the head of all, but it did not deter others trying his powers, and he shot several ordinary ones, the principal of which was for \$1,200 with a string of 10 successive shots at 220 yards. In this match his accuracy was again remarkable. Then in 1870 he shot a match for \$750 a side with a distinguished English rifleman and won easily. Then Mr. Dimich, of St. Louis, came to San Francisco intent upon robbing the Doctor of his laurels, but the two soon became warm and intimate friends, and instead of a public match for \$5,000, they only shot a series of friendly matches, in which Mr. Dimich said he felt very glad he had no money at stake. It would be impossible to give all the matches the Doctor has been engaged in and won. In his method of shooting, it may be doubted if he has a superior in the whole world. In connection with his third match with Mr. Loud, Wilkes, Spirit of the Times, says: "There never was anything in the world known to equal it, as a sample of accurate shooting." The victory made him honorary member of rifle clubs in all parts of the world, and his lithographs adorned the walls of every armory in the United States.

At the same time the Doctor is quite a mechanical genius. His workshop, like his cabinet, is complete in its way. He does most of his repairs and all the fittings to his guns. He also manufactures his own gunpowder, the peculiar feature of which is that the granules are round as shot, that it generates no gas on explosion, and has greater projectile force. His newly invented breech-loader and new repeater attest his inventive faculties. Both have many advantages over existing guns. The breech-loader has been fired 23 shots, at 100 yards in 19 seconds and every shot put into an 18-inch circle. It has yet to be improved. The repeater we spoke of in another place and connection. Both will soon be in the market.

As a writer on rifles Dr. Pardee has also made his mark. His articles in the BREEDER AND SPORTSMAN have attracted much attention for their sound argument, scientific illustration, and practical good sense. The workshop, governed by intelligence seeking the mysteries of science, is the best place to study, and there, aided by sound theoretical writers, the Doctor got his knowledge and learned his wisdom. For a quarter of a century he has thus pursued his investigations, and naturally they give his writings an authority few other men can claim. Though time begins to frost his locks he is

still hearty, strong, active, and enthusiastic. For the elevation and advancement of a noble art, may our old friend long be spared to lead us on to greater trials and greater victories.

The Schuetzen Club Tournament.

This distinguished body of riflemen opened their annual tournament, on Sunday, at Schuetzen Park, Alameda. The shooting was phenomenal, especially in the number of bull's-eyes made on the first day. Such shooting was never known before. The attendance was very large, and as usual the Directors entertained members of the press and their personal friends at dinner with their usual hospitality. The waiting at the table was bed, but the fault lay only with the proprietor of the grounds.

The shooting was off-hand, all rifles not over forty-five calibre, shooting no more than seventy grains of powder, all sights with the exception of telescope and any pull of trigger allowed. Both Captain Farrow and Officer Linville were beaten almost out of sight, though the former took some subordinate prizes. Lieut. Fred. Kuhnle was not well and had an unsuitable gun, which accounts for his not being in the front ranks. The following is the record of Sunday's proceedings:

The first shooting was at bull's-eye targets, six inches in diameter, ten shots for \$1, on the outcome of which thirty prizes will be given for the best centre shots, determined by a machine measuring one one-thousandth of an inch, and twenty prizes for the most bull's-eyes during the day. In this match there were over forty entries, Linville and Farrow being among the number. The nine highest of the contestants were as follows:

Table with 2 columns: Name and Score. Includes A. Bahwyler, James Stanton, P. Jacoby, H. C. Smith, J. Utchig, W. Ehrenport, F. Kuhnle.

The first bull's-eye of the morning was made by F. Freese, the last of the morning was made by H. C. Smith. The first bull's-eye of the afternoon was made by P. Jacoby, the last by Milton Farrow. The honor of making the best centre shot fell to the lot of H. C. Smith.

The second match was at man targets, thirty inches high and twenty inches broad at the bottom, divided into twenty perpendicular lines, counting from the middle, line shots to count. The prizes in this contest amount to \$200. As far as the scores went yesterday, the three highest stood:

Table with 2 columns: Name and Score. Includes F. Freese, M. Farrow, A. Strecker.

The best contest was at honorary targets of twenty five rings. The prizes in this match are seventy-five and consist of Jeweled end silverware. The score as far as could be obtained is as follows:

Table with 2 columns: Name and Score. Includes A. Strecker, Linville, Haux.

The only twenty-five-ring shot was made by A. Strecker. Over 12,000 shots were fired during the day and about \$1,400 taken as admission money.

On Tuesday night the attendance at Eintracht Hall was large to witness the distribution of prizes. As each popular winner approached Jacoby, the president, to receive his reward, the applause was very enthusiastic. The prizes were costly, elegant and useful. The singing of German songs by the Maenner choir was deservedly applauded. It was late when dancing commenced, but it was kept up with spirit while it lasted.

At Shell Mound.

Owing to the Schuetzen Tournament, at Alameda, commencing last Sunday, very few, in fact scarcely a corporal's guard assembled at Shell Mound, and the only score made worthy of special notice was that of Sergeant Hovey in a practice shoot at 200 and 500 yards. The most agreeable feature of the shooting is that it shows a remarkable improvement at the 500-yard range, a distance at which the little Sergeant has had a decided dislike to previously. Mr. Hovey, for so young a man, is wonderfully equal in his averages, and stands at 200 yards off-hand 100 shots, second to the phenomenal Lieutenant Fred Kuhnle. Let him only continue as he is now going on, and next year it would not surprise us to see him in the foremost ranks as an all-round shooter. In fact last Sunday's score, 92 out of a possible 100 at 200 and 500 yards, places him in that position already. Mr. Hovey is one of that class of young men we want in our militia. The score:

Table with 2 columns: Distance and Score. Includes 200 yards, 500 yards, Total.

While on the subject of remarkable, if not phenomenal scores, we may mention two others we have recently heard of. The first was made by Howard Carr, at Alameda, sometime ago. On a German Ring target, in 10 shots, he made 232 rings using a Winchester rifle 45, 60, with factory ammunition and muzzle rest. Another, and, if possible, a better score was made by Nick Williams, of Oakland, some time ago, when in his best shooting form. At present, he is not in that form by any means. On the occasion referred to, with common military rifle, he made three consecutive scores of 50, off-hand at 200 yards, fifty being the possible. We never heard of these records being beaten. They were given to us by a prominent local rifleman of high social position, and whose personal veracity cannot be questioned.

At the Presidio.

We spoke last week of a friendly match at the Presidio, two weeks ago, between Col. Ranlett and Captain Farrow, in which the latter was victorious. We have since learnt of two other shoots, at a later date, between the same gentlemen which certainly ought to have been made public at the same time. In the first Captain Farrow was successful, in the latter Col. Ranlett. It is always well to be just and exact in public reports, otherwise evil comes to the front which it is desirable to avoid. The score:

Table with 2 columns: Name and Score. Includes Mr. Farrow, Col. Ranlett.

The last shoot between these gentlemen was on July 25th, in which Ranlett was the winner, Captain Farrow withdrawing before the shoot was over. The score:

Table with 2 columns: Name and Score. Includes Col. Ranlett.

Table with 2 columns: Name and Score. Includes Col. Ranlett, Mr. Farrow.

Total 71. Mr. Farrow 26 4 2 3 2 3 2 3 2 3 5-31 withdrawn.

The score was kept by Sergeant Vebbard.

At Creedmoor.

The third of the series of off-hand matches, at 200 and 300 yards was shot lately at Creedmoor. The scores were satisfactory considering the unfavorable condition of the wind. For the third time in these matches Mr. T. J. Dolan, of the Twelfth Regiment, has become the winner of the principal prize, the five marksmen having the highest scores being prize winners. The following are the principal scores:

Table with 3 columns: Name, 200 yds, 300 yds, Total. Includes T. J. Dolan, John Smith, G. W. Munson, J. S. Shephard, W. W. De Forest, J. A. Edwin, J. F. Klein, J. McNevin, H. P. O'Neill, W. B. Mathewson.

These scores were made out of a possible seventy points.

The members of the New York Rifle Club shot the Dunlop Badge match. The match was very interesting and was closely contested shot for shot by the three highest men. The following are the scores:

Table with 4 columns: Name, 100 yds, 200 yds, 300 yds, Total. Includes N. O'Donnell, A. McInnes, W. Simpson, J. Duane, Dr. J. W. Wright, J. W. Mangam, E. B. Barker, M. Herrington, F. C. Hamilton.

These scores were made out of a possible 105 points.

A Good Idea.

A writer says: "I believe there is no repeating rifle made by any of the repeating arms companies in which more than one size length of shell can be used in the magazine. When so many other improvements have been added to the now almost perfect repeater, does it not seem strange that long since this advantage should not have been given the repeater, for it certainly is an advantage. This occurred to a sportsman and mechanical acquaintance, who, after some time, succeeded in perfecting an improvement whereby he can use through the magazine of a 40.90 repeater a shell carrying, if desired, twenty-five grains of powder and a hundred and fifty grains of lead, or through the .32-caliber which was thirty grains of powder and a hundred and fifty grains of lead, a shell carrying say seventy-five grains of lead and twenty grains of powder.

"These improvements he tells me were brought about by his desire to use the .40-caliber at short range, and save expense and lessen the destructive power, and to make the .32-caliber which he used in shooting game answer for shooting glass balls, where a small shell would carry sufficient powder for the short distance necessary to shoot. He accordingly added this improvement to the only two guns he had and now has them in constant use, but it can be added to any repeater of any caliber which has the magazine under the barrel."

Yet the larger sized repeaters, in our opinion, are by no means as perfect as alleged. In one respect they are very deficient. After one shot with the present gun four different movements, with the consequent loss of time, are required before another shot can be had. Dr. Pardee has in course of construction a repeater which will discharge every shell in the magazine without a change of sight if necessary, or ever requiring to be taken from the shoulder during the firing. This gun, of a smaller size than usual, would be just the thing for smaller game.

A Move at Last.

A daily says: "Brigadier-General Dimond has appointed the following committee to take charge of the arrangements for selecting and sending the inter-State team to Nevada in September: Lieutenant-Colonel Bromwell, Captain C. L. Tilden, Lieutenant G. H. Strong, Lieutenant-Colonel David Wilder, Lieutenant Adolph Huber, Lieutenant C. F. Last, Lieutenant-Colonel P. Boland, Captain P. Delaney, Lieutenant R. H. Hummold, Jr., Major T. J. Parsons, Captain T. H. Thompson and Captain D. B. Fairbanks. Major A. F. Klose, Inspector of Rifle Practice of the Second Brigade, has been added to the committee, and will have charge of competitions for places on the team, the first of which will be held at Shell Mound on Sunday, August 10th. He will furnish targets and markers for the use of all who wish to take part. Any military rifle, open sight, with regulation pull of trigger, can be used. The inter-State match must be shot at Carson City in September, and the committee will have to work lively and energetically to get a representative team of ten men."

This will be pleasant news for both the citizens of California and Nevada. Hub Parker told us his men were eager for the fray. We have an idea that Brouze Horse will feed in the green pastures of California for the balance of time. Because, he himself, beat Linville out of a big custard pie, he must not think his men can lick all California. Linville is not the champion, even of custard pies.

Honor Earned.

Among all classes the wonderful shooting of the Schuetzen Club on Sunday, at Alameda, is the theme of praise. It certainly reflects much credit upon themselves and the State. But, in the great crowd on Sunday, we noticed a little band of men, who also covered themselves with glory. These were a few members of the Fifth Infantry, Ranlett, Kuhnle, Kellogg, Pierce, Waltham and Hanx, who with common military rifles, in some cases, made scores that vied with the highest made with the fancy weapons of the Schuetzen Brotherhood. We do not mention this so much as a compliment to the Fifth, as to the military at large, of whom we regret more did not contend. Private Hanx, of Company C, Petaluma, like his great town man, Kuhnle, promises to be a phenomenal shooter.

No Match.

Farrow and Linville are not likely to have a separate match. Some blame Capt. Farrow for being so fastidious. It is his privilege, however, to select the conditions he prefers, and if people do not like his terms they can leave him alone.

At Sacramento.

The Bee, which recently has been very meagre in its accounts of rifle and gun matches, speaking of the up-river sharpshooters, says:

A few up-river sharpshooters were practicing on the 27th. It was too hot for much or good shooting. On the Yuba bottom the glare of the sun is intense, and there is a mirage that makes the target indistinct.

THE GUN.

The Game Law.

Table with columns for months (January to December) and rows for various game species (Quail, Partridge, Rail, Grouse, Doves, etc.).

As with the rifle, we intended to have biographical sketches in this column, but the popular gentleman whom we think ought to have precedence could not be interviewed in time for this week's issue.

Owing to the want of pigeons there was only one shoot last Sunday, that of the

California Wing Club.

At San Bruno. The occasion was the regular medal shoot, but owing to attractions at other places, and perhaps a little politics, which are beginning to boil in our midst, the attendance of members was small, only seven putting in an appearance.

Score table for California Wing Club shoot, listing names like Robinson, Golcher, Jellett, Fay, Slade, Walsh and their scores.

The next match between Robinson and F. Pixley, \$5 entrance, 8 birds each, 21 yards, produced better shooting, Robinson and Fay tying on six each.

Score table for Robinson vs Pixley match, showing scores for Robinson, Fay, and Pixley.

The next, a match with all the members except Brandt, also produced some interesting shooting.

In this after a fine struggle Fay tied Robinson on a clean score, Golcher only missing the honor by his third bird passing the boundary only to return and drop dead inside.

Score table for the match with all members except Brandt, listing names and scores.

Then followed a very interesting match between Robinson and Fay, \$10 entrance, 12 birds each.

The shooting was quick and effective, although only nine birds each were killed. In the ties, the nerve and skill of both men were finely displayed.

Score table for Robinson vs Fay \$10 match, including scores for first, second, and third tie shoots.

The Sunday Capital says: When our friend, S. A. Tucker (of Parker gun fame), was out here last Spring he told us of a machine that was then being constructed in Cleveland to load perfectly 1,500 shotgun cartridges per hour.

Mr. J. K. Orr and a party of gentlemen left last week for Soda Springs for a fortnight's hunting and fishing. They will probably take a run to Tahoe and Donner lakes.

Mr. Tom Davidson and party have recently been on a trip to the Santa Cruz mountains. They report deer and does in abundance, but rabbits scarce, and quail being backward and few.

The news for the week confirms the statement of deer being generally abundant and large sized. If, as we have said, the gun clubs would only half do their duty, deer in all sections would soon be plentiful.

General E. Kirkpatrick has returned from his Summer outing in the vicinity of Highland Springs. He killed nine bucks and caught many trout and has nothing but good words to speak of Lake county and Doctor C. M. Bates, the proprietor at Highland.

The Cordelia Shooting Club, the preserve of which is on the Suisun marshes, will have a steam launch next season, for the use of members and friends to ply between their boat and ponds.

Mr. Chas. Pierce, of Oakland, has had his family out in the Santa Cruz mountains for a fortnight. We hear of quite a number of Oakland people going into the mountains.

Mr. P. K. Austin, who lives near San Rafael, gave some friends a hunt lately, and returned home in the afternoon with two of the finest bucks ever killed in Marin county.

The districts of Cloverdale and Healdsburg are yielding large quantities of deer. One was lately killed almost in the town limits of Shasta.

OUR NEW YORK LETTER.

Saratoga Springs—Opening of the Racing Season of the Saratoga Racing Association—Rataplan's Race for the Travers—Renwick's Victory—Baldwin's Two-Year-Olds to the Front—General News, Etc.

Leaving the Empire City last Friday evening by the West Shore Railroad, a rapid ride up the banks of the noble Hudson, lauded your correspondent at Saratoga Springs early on the morning of Saturday.

The clouds began to lower before the start for the first race was made, obscuring the beautiful mountain views that meet the eye on every hand, here the Green Mountains of Vermont and the peaks of the Adirondacks vieing with each other to add beauty to the surroundings.

Mr. Keene's imported filly Maid of Athol, and Wedding Day, a full brother to Fair Count. The mile dash found a fair field. To-day your Pacific elopers fairly astonished the natives. Mr. Baldwin sprung the first of his two-year-old winners in Volante, who started in the Flash Stakes, half a mile, against a strong field of youngsters, including Florio, the best two-year-old in the East, at least up to the close of the Coney Island meeting.

Mr. Keene's imported filly Maid of Athol, and Wedding Day, a full brother to Fair Count. The mile dash found a fair field. To-day your Pacific elopers fairly astonished the natives. Mr. Baldwin sprung the first of his two-year-old winners in Volante, who started in the Flash Stakes, half a mile, against a strong field of youngsters, including Florio, the best two-year-old in the East, at least up to the close of the Coney Island meeting.

SARATOGA SPRINGS, July 21st, 1884.

PACIFIC.

POULTRY.

The Care of Young Ducks.

Young ducks require much the same care as chickens, but are more tender. In a day or two feed hard boiled eggs with bread crumbs, and afterward scraps from the table, with bread made of coarse flour and johnnycake.

If you are not in the milk business, or are sending to a creamery, the skimmed milk makes the best food for young ducks, and may be fed from the third day, but do not give to them except in curd. By no means let them wade into anything that will wet and make sticky the fine down.

They should be fed three times a day, and even oftener for the first week, unless some food can be left for them to pick when hungry.

For a few days they should not be exposed to the sun, if it is at all hot, as they are easily sunstruck. Neither should they be allowed to go in the wet grass, or to be out in the slightest rain, as nothing will kill a young duck quicker than a good wetting.

If the eggs have been hatched under a hen, the heads of the young birds should be greased with lard in which is a very small portion of kerosene. The duck does not make a good mother as she is so fond of swimming; she will leave her nest too long, and allow the eggs to become cold, and she cannot see why the water in which she so delights is not good for her little ones, and will take them as soon as hatched to the coldest spring, where most of them will die from the chill.

Displayed, \$1.50 per inch each insertion or pro rata for less space. Reading Notices set in brierly type and having no foot marks, 50 cents per line each insertion. Lines will average ten words. A discount of 10 per cent will be allowed on 3 months, 20 per cent on 6 months and 30 per cent on 12 months contracts. No extra rate charged for cuts or cutting of column rules. No reading notice taken for less than 60 cents each insertion.

San Francisco, -- Saturday, August 9, 1884.

Dates Claimed.

Bay District, San Francisco (Fall Meeting), August 2d, 5th, 7th, and 9th.

Santa Cruz Fair Association, Santa Cruz, August 12th to 16th.

Sonoma County Agricultural Association, Santa Rosa, August 18th to 23d.

Sonoma and Marin District Association, Petaluma, August 25th to 30th.

Thirteenth District, Marysville, Aug. 26th to 30th.

Golden Gate Fair, Oakland, September 1st to 6th.

Chico Fair Association, Chico, Sept. 1st to 6th.

State Fair, Sacramento, Sept. 11th to 20th.

Ninth District Fair Association, Rohnerville, Sept. 23d to 26th.

San Joaquin District Fair, Stockton, September 22d to 27th.

Santa Clara District Fair, San Jose, September 29th to October 4th.

Monterey Agricultural Association, Salinas, Oct. 7th to 11th.

Fresno Fair Association, Fresno, October 7th to 11th.

Los Angeles Fair Association, Los Angeles, October 13th to 18th.

Sacramento Fair Grounds.

The improvements which the present Board of Directors of the California State Agricultural Society have made on the grounds since the last exhibition are of the very best character. While the cost has been great, not a dollar has been expended injudiciously, so far as we could see in the short time occupied by our late visit. So palpably beneficial, however, were the improvements that it did not require a long stay to be convinced that the most extended scrutiny would not result in finding a chance for unfavorable criticisms. There may be a few trifling parts of the plan which some would condemn, but in the main it is nearly perfect. The old track was a constant annoyance, a source of nearly all the complaints and though there was room to find fault the objectionable features were heightened and the good shared in the oburgations. There is no question that the "short turn" was extremely trying to the legs of horses, and that the fear of its effects militated against the interests of the Society. The soil, too, from constant use had become rotten, so that notwithstanding the greatest care it would break away under the feet of horses "cupping" so badly as to interfere with fast time. This giving away when horses are at a rapid pace was fully as dangerous as the short turn, and the only method to overcome all the evils was to build an entirely new course. This has been done, for though the old home-stretch has been utilized nearly as much work was necessary in widening and grading as would have been required on an entirely new one. As it now stands it could scarcely be improved, not at all if it is conceded that the slope from the outer to the inner side is not greater than it should be. There is a grand sweep to round the first semi-circle now in place of the sharp curve of the old. The horses which have the misfortune to draw outside positions are not at such a great disadvantage, and it may be that the firmer footing will do away with a portion of that. At a former visit we were of the opinion that it was not necessary to coat the surface with different material from the natural soil, and that would be found firm enough for trotters and decidedly better for the gallopers. In fact we were fearful that the owners of racehorses would object to running on the outside course, and races on the inside, good as that is, would not be satisfactory to the public. From the last inspection all doubts are removed regarding the wisdom of the move, as it harrows up into as soft

a surface as can be desired, and is "lively" and elastic as any course we ever saw. Moreover the grading is so well done that it appears as though a man of strong arm could roll a ten-pin ball from the seven furlong pole to the score, and a puff of wind would carry a sulky along at a right merry clip. It will assuredly be a rabid faultfinder who takes exceptions to the track as it now is, and then it will give the spectators a far better chance to watch the changing features of a race. This comes from the horses not being so far off at the furthest portion of the ground, the increased width making shorter stretches. The inner course for the racehorses to exercise upon is in keeping with the other. Perfectly graded and kept in the best order we cannot imagine what there will be to recompense for the luxury of grumbling at the condition of the track. And in this connection we must give our good friends—and we are proud to say that we have many of them among the trainers of horses—a rap over the knuckles for being so exacting, or rather finding so much fault with the condition of a track. A request will go further with most people than cross demands, and cheerful acquiescence in a state of things which cannot be avoided of far more force than a sullen demeanor.

There is now a quarter-stretch. Moving the tracks to the eastward was given more room between the stand and the track, and this improvement will return ten dollars for one of the outlay. There are a number of people who will pay liberally for the privilege of the stretch, and in order that it may not be overcrowded a price must be charged that will guard against that. We have no hesitation in complimenting the Board of Directors for what they have done in making this important feature of the fair grounds so nearly perfect that it will be a credit to the State, and, furthermore, without qualification cordially add that the President and Secretary have given such close attention to the business that the work on the trestle board has been duly performed. We admire enthusiasm, if even the ardor is in a wrong direction, and when in a short trip with the Secretary he descanted with such warmth on what had been accomplished it was evident that his whole heart was in the work. His glowing words were amply justified by the short inspection and the track and adjuncts are also eloquent support of his argument. There are other improvements which are equally as worthy of commendation, especially the concentration of the buildings, etc., so as to obviate the necessity of a long trip to see the various departments of the exhibition. There is not space this week to give even a brief description, and then again we do not like to anticipate the full account which we hope to give during the continuation of the fair.

Monmouth Park Association.

This popular institution offers its usual budget of stakes, the entries to which will close on August 15th, next Friday. There are so many of them, and with such varied conditions, that those interested will have to scan the advertisement for full particulars. It will be observed that the conditions are such as to offer particular inducements and it must be an exacting owner who does not find something to suit him, or in fact, discover any reprehensible features. These are so apparent, however, that it is not necessary to amplify, as a perusal will determine. It is of such manifest advantage for California breeders to name in these stakes that that, too, may appear needless and yet a presentation of some of the arguments in favor of will not be out of place. To sustain racing on this Coast there must be a field for our colts outside of this section. This may seem paradoxical, and that by sending a portion away benefit will arise have an illogical appearance which, however, is easily accounted for. Even at the present time there are a far greater number of thoroughbred sires and dams than is needed for home wants. There must be, at least, one hundred and fifty thoroughbred mares on four of the California breeding farms, and could it be known how many are in hauds outside of the large establishments the aggregate would fully sustain this view of the subject. Restricted to the home market breeding would dwindle into comparatively small proportions, and in place of having good fields to contend there would be retrogression, and the days of "three and five" with a few old stagers to cut-and-shuffle as they pleased the inevitable result. With the stimulus of an Eastern market there will be so many bred that there will be plenty to fill the home stakes, and in many cases owners will determine to run their colts here before sending them on the grand tour. The Summer meetings at the East give every opportunity to apply the test, and in some cases it may be advisable to omit two-year-old engagements in order to get a better line of capacity than can be obtained from the racing of one Spring. In the case of untried mares for instance, though blood of the right sort and proper

form in the dam is a better guide than formerly, when the chances for selection were not nearly so good. There is a community of interest in the home and Eastern racing, a combination which will afford additional incentives to breeders. The double inducement gives a zest which one would not afford. Even those who are not engaged in Eastern stakes anxiously await the news from those who participate, and when intelligence reaches here of a California victory there are joyous feelings all around.

To obtain the benefits of an Eastern market, it will not do to rest on the victories of one season. Engagements must be continued to show that there is still confidence in the quality of our colts, and no one place presents a better field than Monmouth Park.

The management is first-class, the meeting so important as to attract attendance from all parts of the Union, and in the many stakes are opportunities to gain distinction. It comes at a good time. The meetings at Louisville, Covington and Chicago can be participated in if desired, though it will come the handiest for the horses here to commence at Chicago and from thence eastward. Whatever course is mapped Monmouth Park should be one of the main points.

There should be a large number of nominations from California. There was not a yearling in the lot sold by Mr. Winters that is not worthy of being named, Rancho del Paso has a grand showing of yearlings, Palo Alto excels far beyond previous years in the number and merit of its youngsters of this age, and Santa Anita is gaining every year. The small farms should not let the opportunity slip, especially in making nominations in the three-year-old stakes. A good two-year-old, which shows to be such, next year will be quadrupled in value by engagements as a three-year-old, and the risk is so slight in comparison that it will not be wise to forego the chance.

Trotting Aesthetics.

In no slight degree is the popular appreciation of racing, and the preference given to that over trotting, due to the brighter accessories which belong to the turf. "Silks and satins" will always have the call over fustian and coarse woolen fabrics as an adjunct of sport, and in that respect there is so nearly an unanimity of opinion that the majority for the bright colors and delicate tissues may be termed in political parlance overwhelming. There is a harmonious conjunction between the sleek-coated, symmetrical thoroughbred and the dapper jockey clothed with scrupulous exactness in the habiliments, which are everywhere considered as the proper array. The top-boots and white huckskins, or corduroys, belong to all, but every jacket must be of a diverse color, and a majority of owners prefer to select those which are of a cheerful hue. Thus while gratifying their tastes for the beautiful, the spectators are benefitted in being enabled to "keep track" of the various animals taking part in the fray, and thus the beautiful and useful are united.

There is an utter want of harmony in the highly-bred trotter of the present day, harnessed to a vehicle which looks like a tracing of delicate lines, and a shirt-sleeved driver wearing a battered and faded cap. In many cases the shirt-sleeves are anything but white, though that may have been the original color, and should such be the case it is a decided improvement when the garment is a deep blue or bright red, if even of the coarsest woolen. Still there is a great improvement over the practice of former years, and there is a likelihood that before long there will be, at every important meeting, a radical change for the better.

We understand that the rule will be rigidly enforced at the State Fair, and probably at the others, and write this in order that the drivers may be prepared to comply.

Grass Valley.

The Eldorado Agricultural Association will hold their annual exhibition at Watt Park, Grass Valley, commencing Friday, September 2d and the entries will close on Friday next, the 15th inst.

The programme is very good, the particulars of which will be found in the advertisement, and the amounts in purses are very liberal. There are a great many horses which are well worthy of taking part, not named in the events that closed on the 1st, and these can find profitable employment at this popular place. We write popular as every one who attended the meeting which was held there in July, are enthusiastic in their praises of the place and people. Particularly the people, for though extolling the climate, the scenery and the pure air and water they speak almost rapturously of the treatment experienced, and were it not for conflicting engagements not one would miss the chance of another visit.

## Coney Island Jockey Club.

The remarks under the caption of the Monmouth Park Association are, of course, just as applicable to Coney Island. There are the same arguments for, not one against.

There are not so many stakes which close on August 15th, as are advertised at Long Branch, but these are of so much importance that they cannot be overlooked. The two 2-year-old stakes have each an addition of \$1,000, the stake being \$25, the winner of the Foam being penalized seven pounds in the Surf Stakes. The stakes for three-year-olds are The Mermaid, The Tidal and the Coney Island Derby. To the first is added \$1,250, to the second \$1,500 and to the third, \$2,500. In each of these there is only a liability of \$20, up to July 1, 1885, and certain it is that there is not a well-bred colt in California that is not worthy of that risk. Thus the colts that are eligible are foals of 1883.

Up to July 1st of next year there can be the \$20 declaration, and this not to be paid until the Spring races here determined the quality so far as can be told at that age. The stakes are \$100 each, half forfeit, so that at a risk of \$50 there is a chance for another year nearly.

The enhancement of value from an Eastern engagement has already been shown, and no one doubts it with the proviso that the animal proves of extraordinary excellence. Should the colt engaged turn out to be a good one, not of the very highest class, these engagements will add to the value as a good showing in any of the Eastern stakes is sure to attract purchasers at good prices.

The meetings of the Coney Island Jockey Club are worth going a long distance to see. So near New York there is always a large and fashionable attendance and to win there brings lots of fame as well as money. The course and all pertaining are as good as can be, and the management beyond adverse criticism.

## James H.

Had a green horse come out on the Bay District Course last Wednesday and trotted a mile in 2:15 there would not have been as much surprise as James H. elicited. A wager proffered that he would trot as fast and steadily as he did in the last heat of the 2:40 race would have provoked more ridicule, subjected the "layer" to such a shower of "chaff" that he would be glad to retreat from a position entailing so much ignominy. There is such a remarkable circumstance in connection with this horse that we determined to await a full personal examination before commenting, though there is not the least doubt of the accuracy of the statements. Heretofore he has been a wild horse, the cause of the death of one man and serious injury to another. He was almost ungovernable in any position, and in races as unreliable as a wild zebra. A vermifuge being administered, there came away a snake sixteen inches long and as thick as the butt of a riding whip. This was only a short time ago, and the race of Wednesday was his first appearance in public since. At our first leisure time we will obtain a full history of the horse and the viper that was gnawing at his interior and present it to our readers. We understand that Colonel Dickey has the snake preserved in alcohol and that there is abundant proof.

## The Circulars.

In that portion of this issue which goes to our subscribers outside of San Francisco will be found a circular issued by the California State Sportsman's Association.

The circular has been prepared with the idea of gathering and collating as much information upon the breeding seasons, etc., of our game and trout as can be had.

It is a commendable attempt, and we especially urge those of our readers who can answer any or all of the questions presented in the circular to do so at once and mail the answers to the Secretary of the committee. The information will be invaluable for presentation to the next Legislature, and will also have some scientific value, and the Association feels that it has a right to rely upon the cooperation of those whose intelligence and public spirit prompts them to take and read a sportsman's paper such as ours.

## Guy Wilkes.

A grand horse is this scion of an illustrious sire. Grand in form, in color, in gait, and still grander from his third heat in his first race, being trotted in 2:21. We heartily congratulate Mr. Corhitt on the possession of so promising a stallion. Not only in the ownership, as he has the satisfaction of having selected him guided by his own judgment, and that is the next source of gratification to being the breeder. He is of a stamp to last, not in one race but a series of campaigns, and as nearly as can be told from form, blood and performance a progenitor of great merit.

## Races that Failed to Fill.

In some instances the purses in the circuit have failed to receive the requisite number of entries, and in some cases they have been reopened and in others new purses substituted. We have been notified by secretaries of the following, which are duly advertised:

At Santa Rosa the 2:20 pacing purse has been reopened with the same conditions as before. The free for all trotting purse has been reopened with former conditions, with the addition of Director and Nellie R. barred. The 2:40 purse has been replaced by one for the 2:35 class with James H. and Joe Artburton barred. All to close August 19th.

At Stockton the free for all failed to fill and has been reopened with the same conditions, to close Sept. 1st.

At San Jose the 3 minute class failed, and a 2:35 purse has been substituted, to close Aug. 19th.

At Oakland the free for all did not fill and has been reopened under same conditions, except Nellie R. is handicapped with a wagon. The four-mile running race also failed, and a purse of \$750 has been substituted, two mile heats. Both these races are set for Saturday, Sept. 6th, and entries close with the Secretary, Aug. 14th. The attention of horsemen is directed to the special advertisements, for more explicit information of these races.

## Monroe Chief.

From present appearances the accident to Monroe Chief is not as serious as was at first feared. Then it was claimed the femur was fractured, but as at times he bears the whole of his weight on the injured leg and moves about his stall, this could scarcely have been the case. It is not only a great loss but a bitter disappointment to his owner that he was disabled from taking part in the circuit, the latter bringing the keenest regrets. He was moving remarkably well, the indications being that he would lower his record.

## State Fair Yearling Purse.

At the meeting of the State Board of Agriculture, last Tuesday, it was decided to offer a purse of \$200 for yearling trotters, dash of a mile. This purse will be divided in the same proportion as the other purses of the meeting, viz.: 50 per cent. to first; 25 per cent. to second; 15 per cent. to third, and 10 per cent. to fourth horse. The race will be trotted Saturday, September 20th, and entries close with Edwin F. Smith, Secretary, on Monday, August 18th.

## Entries and Nominations.

As will be seen from the lists which appear in this paper the entries in the purses and nominations in the stakes are fuller than ever before in California. Having to occupy so much space with the names, and the delay attending the receipt, comments are deferred until the next issue.

## The Blood Horse Association—Nominations for the Fixed Events of 1885-6.

Winters' Stake—For three-year-olds, to be run the first day of the Spring meeting; dash of one and a half miles; \$100 each, \$25 forfeit, \$300 added; second to have \$150, third to save stake. Nominations for 1886:  
Rancho del Paso, br c Ben Ali, by Virgil—Ulrica.  
Rancho del Paso, ch f —, by Longfield—Belle Dale.  
Rancho del Paso, b c Epicure, by Enquirer.  
J. T. Courtney, ch c Porter Ashe, by Joe Hooker—Abbie.  
Hill & Gries, b f, by Wildidler—Mary Wade.  
Hill & Gries, b c, by Hardwood—Maid of the Mist.  
Palo Alto Stock Farm, b c Whittier, by Flood—Lizzie Whippis.  
Palo Alto Stock Farm, ch c Gardey, by Flood—Sallie Gardner.  
Palo Alto Stock Farm, b f Robin Lass, by Flood—Robin Girl.  
Palo Alto Stock Farm, b f Guenn, by Flood—Glendew.  
Palo Alto Stock Farm, b f Keepsake, by Flood—Katharion.

California Stake—For two-year-olds; \$50 each, \$25 forfeit, \$250 added; to be run on the first day of the Spring meeting; second to save stake; dash of half a mile. Nominations for 1885:

Rancho del Paso, ch f, by Longfield—Belle Dale.  
Rancho del Paso, b f Precioso, by Glenelg—Stamps.  
Rancho del Paso, br c Ben Ali, by Virgil—Ulrica.  
Rancho del Paso, ch f by Longfield—Medea.  
P. Robson, ch c by Norfolk—Jessie R.  
J. T. Courtney, ch c Porter Ashe, by Joe Hooker—Abbie.  
Geo. Densdale, b f Maggie D., by Jim Douglas—Laura Barnes.  
Hill & Gries, b f by Wildidler—Mary Wade.  
Hill & Gries, b c, by Hardwood—Maid of the Mist.  
Palo Alto Stock Farm, b c Plato, by Shannon—Planetia.  
Palo Alto Stock Farm, ch c Marshall, by Shannon—Marshra.  
Palo Alto Stock Farm, b c Whittier, by Flood—Lizzie Whippis.  
Palo Alto Stock Farm, b c Gardey, by Flood—Sallie Gardner.  
Palo Alto Stock Farm, b f Keepsake, by Flood—Katharion.  
Palo Alto Stock Farm, b f Amandine, by Flood—Lady Amanda.

"Spirit of the Times" Stake—Dash of one and three-quarters miles for all three-year-olds; \$100 each, \$25 forfeit, \$300 added; \$150 to second, third to save stakes. Nominations for 1886:

Rancho del Paso, br c Ben Ali, by Virgil—Ulrica.  
Rancho del Paso, b f Precioso, by Glenelg—Stamps.  
R. P. Ashe, ch f Rigillette, by Norfolk—Neopolitan.  
W. B. Todhunter, b f May Blossom, by Joe Hooker—Maggie S.  
W. B. Todhunter, ch c Amphion, by Norfolk—Illusion.  
W. B. Todhunter, ch c King of Norfolk, by Norfolk—Marion.  
W. B. Todhunter, ch c Bonanza Jim, by Norfolk—Mattie Glenn.  
W. B. Todhunter, ch c —, by Joe Hooker—Connets Zeicka.  
J. T. Courtney, ch c Porter Ashe, by Joe Hooker—Abbie.  
Hill & Gries, b f by Wildidler—Mary Wade.  
Hill & Gries, b c by Hardwood—Maid of the Mist.  
Palo Alto Stock Farm, b c Whittier, by Flood—Lizzie Whippis.  
Palo Alto Stock Farm, b c Gardey, by Flood—Sallie Gardner.

Palo Alto Stock Farm, b f Robin Lass, by Flood—Robin Girl.

Palo Alto Stock Farm, b f Guenn, by Flood—Glendew.

Palo Alto Stock Farm, b f Keepsake, by Flood—Katharion.

Gano Stakes—Dash of three-quarters of a mile for two-year-olds; \$50 each, \$25 forfeit, \$250 added; second horse to save stake. When any California two-year-old beats the time of Gano, 1:15 for three-quarters of a mile, the stake to be named after the colt which beats it. Nominations for 1885:  
Rancho del Paso, ch f Trellis, by Great Tom—Madeira.  
Rancho del Paso, ch f, by Longfield—Belle Dale.  
Rancho del Paso, b f Precioso, by Glenelg—Stamps.  
A. C. Judson, b f (sister to May D.), by Wildidler—Nellie Brown.

R. P. Ashe, ch f Rigillette, by Norfolk—Neopolitan.

W. B. Todhunter, b f May Blossom, by Joe Hooker—Maggie S.

W. B. Todhunter, ch c Amphion, by Norfolk—Illusion.

W. B. Todhunter, ch c King of Norfolk, by Norfolk—Marion.

W. B. Todhunter, ch c Bonanza Jim, by Norfolk—Mattie Glenn.

W. B. Todhunter, ch c, by Joe Hooker—Countess Zeicka.

P. Robson, ch c, by Norfolk—Jessie R.

J. T. Courtney, ch c Porter Ashe, by Joe Hooker—Abbie.

Geo. Dinsdale, b f Maggie D., by Jim Douglas—Laura Barnes.

Hill & Gries, b f, by Wildidler—Mary Wade.

Hill & Gries, b c, by Hardwood—Maid of the Mist.

Palo Alto Stock Farm, b c Plato, by Shannon—Planetia.

Palo Alto Stock Farm, ch c Marshall, by Shannon—Marshra.

Palo Alto Stock Farm, b c Whittier, by Flood—Lizzie Whippis.

Palo Alto Stock Farm, ch c Gardey, by Flood—Sallie Gardner.

Palo Alto Stock Farm, b f Amandine, by Flood—Lady Amanda.

Palo Alto Stock Farm, b f Keepsake, by Flood—Katharion.

Ladies' Stake—For two-year-old fillies; \$50 entrance; \$25 forfeit; \$200 added; three-quarters of a mile; second to save entrance. Nominations for 1885:

Rancho del Paso, ch f, by Longfield—Medea.

Rancho del Paso, b f Precioso, by Glenelg—Stamps.

H. C. Judson, b f (sister to May D.), by Wildidler—Nettie Brown.

R. P. Ashe, ch f Rigillette, by Norfolk—Neopolitan.

W. B. Todhunter, b f May Blossom, by Joe Hooker—Maggie S.

Theo. Winters, b f Miss Courtney, by Norfolk—Ballinette.

Wm. Boots, b f, by Nathan Coombs—Gypsey.

Geo. Dinsdale, b f Maggie D., by Jim Douglas—Laura Barnes.

Hill & Gries, b f, by Wildidler—Mary Wade.

Palo Alto Stock Farm, b f Robin Lass, by Flood—Robin Girl.

Palo Alto Stock Farm, b f Amandine, by Flood—Lady Amanda.

Palo Alto Stock Farm, b f Keepsake, by Flood—Katharion.

Palo Alto Stock Farm, b f Guenn, by Flood—Glendew.

The Vestal Stake—For three-year-old fillies; one and a quarter miles; \$25 p. p., \$300 added; second to receive \$100; third to save stake. Nominations for 1886:

Rancho del Paso's b f Isabel, by Leinster—Ada A.

Rancho del Paso's b f —, by Wheatley—Rebecca.

R. P. Ashe's ch f Rigillette, by Norfolk—Neopolitan.

W. B. Todhunter's b f May Blossom, by Joe Hooker—Maggie S.

Theo. Winters' b f Miss Courtney, by Norfolk—Ballinette.

Wm. Boots' b f —, by Nathan Coombs—Gypsey.

Capt. A. J. Hutchinson's ch f Eda, by Hockhocking—Eva Coombs.

Hill & Gries' b f —, by Wildidler—Mary Wade.

Palo Alto Stock Farm's b f Guenn, by Flood—Glendew.

Palo Alto Stock Farm's b f Keepsake, by Flood—Katharion.

Palo Alto Stock Farm's b f Robin Lass, by Flood—Robin Girl.

Palo Alto Stock Farm's br f Harriett, by Flood—Hattie Hawthorne.

The Baldwin Stake—Post stake for all ages; dash of four miles; \$250 each, p. p.; \$1,000 added; second \$400; third to save stake. Subscribers for 1884:

J. D. Christie, St. Louis, Mo.

M. M. Allen, Sacramento, Cal.

A. J. Stember, Sacramento, Cal.

Finigan Stake—For two-year-olds; dash of a mile; \$50 each; \$25 forfeit; \$250 added; second to save stake. Nominations for 1885:

Rancho del Paso, br c Ben Ali, by Virgil—Ulrica.

Rancho del Paso, b f Precioso, by Glenelg—Stamps.

Rancho del Paso, ch f, by Longfield—Belle Dale.

H. C. Judson, blk f (sister to John A.), by Monday—Lady Clare.

R. P. Ashe, ch f Rigillette, by Norfolk—Neopolitan.

Palo Alto Stock Farm, ch c Gardey, by Flood—Sallie Gardner.

## HERD AND SWINE.

## Why Butter is Salted.

If the question, "Why is butter salted?" were asked a considerable number of persons, the most probable reply would be, "Oh, to keep it!" or, "Because every one else does." But that every one does salt butter, and the same butter does not keep, together with another fact, that the poorest butter is always abundantly salted, seems to point to a conclusion that salting butter does not have nearly so much to do with its keeping qualities as does understanding some of the conditions that influence the keeping qualities far more than the salt. Occasionally we find a butter-maker who can make a butter so fine, and salt it so exactly that it will steadily improve in flavor as the months and years roll on; but the average maker, salt or no salt, is forced, by the rapidly changing character of his compound of butter fats and salt, to find a market and sell fresh made butter. It would seem if salt were a preservative of butter, that all lessons that are published could better be said in one word—salt. But the experience of all makers is that there are conditions of age, temperature and practices of churning to be first taken note of, before the salting stage is reached, or else a butter will result that no age will ripen, or to which time will add no more delicate and exquisite aroma.

Occasionally one hears of a case where butter was kept for a long time, and without loss of flavor; but that it gathered new flavors, or was increased in market value, excites our curiosity. But when one does find butter of considerable age of good flavor, it will always be found that it was most skillfully made of the best materials, and kept at a very low, uniform temperature, and thoroughly excluded from the air; and that salt played second part in its keeping, is evidenced by the usually well made butter, well salted, but by neglecting to keep at a low temperature, and protected from the air, it spoiled within a few days.

Butter is essentially an animal oil, its principal parts being stearin and palmitin, the same as the tallow of the kidneys; but in addition it does contain liquid fats, peculiar to it, and giving butter its distinctive characteristic. That these liquid oils, minute in amounts, are liable to quicker decomposition than the other fats composing the main part of the butter, we have no direct proof; but as in the case of the Danish exhibit of unsalted butter at the Centennial, made three years before, we may conclude that the different elements of butter are equally good keepers.

Then we must look to some other cause for butter not keeping, and for some reason why salt is not a preservative agent. In the usual store butter, we find the butter charged with abundant traces of buttermilk, and the result is, that the butter soon becomes rancid, unless it is kept at a temperature so low as to wholly arrest any chemical changes that would otherwise take place. Buttermilk contains about, or nearly, 10 per cent of solid matter, the largest part of which is casein or cheesy matter, together with milk sugar and the like. Casein will soon begin to ferment, if left in its natural state, unless the agency of heat is introduced to "cook" it, and all the sooner if the butter is made from acid cream. It is true we salt the curd in cheese, but the curd has been thoroughly cooked; the digestive principle of rennet has been introduced to change its nature, and lastly it is put under great pressure, and then bandaged and painted with grease, to exclude the air. But with the caseous matter in the butter it is different, and having had no check upon it, nor the gases which it will develop cooked out, the salt fails to correct it, and the butter is soon off-flavor, rancid, and lastly worthless.

So good an authority as Prof. John Voelcker says of casein "that when exposed it undergoes a fermentation, and causes a partial breaking up of the fats of butter, which resolves them into their constituents—the acids, and these give rancidity"—but when milk is scalded, the casein becomes in part insoluble, and the decomposition is longer in taking place." And, again, "the keeping of the butter is attributed to exclusion of the casein from the butter by washings with fresh water, several times repeated, and then working out the surplus moisture," giving first to scalding curd or casein to render its action latent, and of more slow decomposition, as in the case of scalded cream, and second to thorough washing of butter made from ripe cream, as the real reasons for butter keeping well, but does not mention salt once as the chief agent in making a long-keeping butter.

It is not my purpose to declare against salting butter, for in a secondary place salt has its uses in butter-making; but to try to show that good, long-keeping butter is dependent upon something else than salt to give it staying qualities. Salt may for a time disguise imperfections in butter, but between a salt tate and a genuine butter flavor there is a wide gulf; while he who depends upon salt to bridge over the period between manufacture and consumption, will often find himself without short connections.

That there is no standard for the uniform salting of butter, and all degrees of saltiness are called for by the consumer, proves that there is a greater demand for salt in butter from the education of habit, than from the real needs in the preservation of the table fat. Butter may need salt to some extent to absorb surplus moisture, and mayhap "pickle" (as in the case of beef and pork) the membranous matter that it is asserted exists in the milk; but if the cream is churned when "ripe," not sour, and before the acids have commenced their work upon the fatty oils, and the butter is thoroughly washed from its angrar and caseous matter, the agency of salt to keep the product will become less to be relied upon—and found wanting—and the consumer more often delighted with a clear, pure butter, in contrast to a butter kept with salt, but odorous with butyric acid.—Country Gentleman.

A lady writes to the *Michigan Farmer* as follows: I have proven by actual experience that a cellar is not a good place for milk; by using an out door milk room all running up and down stairs with milk, carrying pans, washing shelves, is dispensed with. The air can circulate freely about the pans; by setting on slat shelves and being careful about spilling milk once a week is often enough to wash them, while the milk is taken from the door for calves and pigs by the men. There is another item, too, worthy of consideration. About five o'clock in the morning I go out to the milk room to attend to skimming and straining the milk. I get the fresh air, and drink in all the beauties of a "morning in the country;" the sun is fast peeping up in the East, almost hid by a clump of trees; the dew is sparkling on every blade of grass and leaf; the birds are reveling in a perfect flood of melody; the cattle are lowing, lambs are bleating, chancier is telling shrilly that morning has come, the little chickens and turkeys are peeping for their breakfast, and as I feel the blood coursing through my veins with quickening pulsations, sending a glow to my cheek and adding strength and health, I knew it is better than if I slept the morning away, or stood in a damp cellar skimming milk.

## Standard Red Hogs.

In the *American Agriculturist*, appears the following from Col. F. D. Curtis, of Charlton, N. Y.:

The breeders of red hogs have organized an association, uniting the New Jersey family, called "Jersey Reds," and those of New York known as "Durocs." The latter have been mostly bred in Saratoga county, though quite common in Washington and Rensselaer counties. The name agreed upon is Duroc-Jersey, which unites all interests, giving a foundation broad enough for all concerned. The following standard adopted is more for the typical hog, than a representation of the red hogs as they are now generally bred. The true Duroc-Jersey should be long, quite deep bodied, not round, but broad on the back, and holding the width well out to the hips and hams; the head small compared with the body; cheek broad and full, with considerable breadth between the eyes; hone not fine, nor yet coarse, but medium. The legs should be medium in size and length, but set well under the body and well apart, and not cut up high in the flank or above the knee. The hams should be broad, full, and well down to the hock. The neck should be short and thick, the face slightly curved, with nose rather short, the ear rather large and lapped over the eye; the tail thick at the beginning and tapering to a point. A growth of hair of medium fineness, usually straight, but in some cases a little wavy, with few if any bristles at the top of the shoulders. Color red, varying from cherry red, or even brownish, to light yellowish red, with occasionally a small fleck on belly and legs. The darker shades of red, without the black flecks, is the type most desirable. Disposition gentle. When full grown, should dress from four hundred to five hundred pounds; pigs nine months old should dress two hundred and fifty to three hundred pounds.

It will not take long to bring the Duroc-Jerseys up to this standard, and when it is done they will go the front and stay there, as one of the most profitable breeds. The crossing of the two families, together with the united blood already in them, will give them stamina for years and prevent the running out which always follows in-breeding, and too long breeding in a direct line. There is room for this breed, which can now, under the care of the new association, be improved, and also be made thoroughbred. There has been a great deal of loose and mixed breeding of red hogs, which has given them a setback where specimens have been introduced, as people seeing them supposed they were true types. The Duroc-Jersey hogs are in hands of men of experience and character, who will unite their skill and experience to perfect the breed and push it well to the front.

A correspondent refers to a notion prevalent with many people that it hardly pays to work for the special development of capacity in animals for accomplishing unusual results. His point is made by quoting the remark, "Why he feeds them," made concerning cows of extra dairy yield. But is the farmer, or dairyman, or breeder, justifiable, on business grounds, in making special effort and taking special pains to bring about an extraordinary result in animal development or achievement? He certainly is. To deny this is to destroy the very foundation on which the idea of breeding and improvement rests. To say that there is no new excellence to be attained, is to remove the very stimulus which has secured for us the best and most of beef, and butter, and milk, and speed, and strength, and wool, from our domestic animals, that has ever been known. That all this is worth trying for, is the very underlying principle of the fine stock trade. And shall our stockmen not make special effort to produce still better and more perfect animals than they have yet seen? Shall not the great butter cows, the great beef steers, and the great wool sheep, be emulated? The aim of beating the record in any of these specialties, is a most laudable one, and marks a progressive class of stockmen which the country cannot well spare. It is not likely that for the value of her dairy products alone, it would pay to "cultivate" a cow as either Mary Anne, of St. Lambert's, or the late Mercedes has been cultivated. In such rare instances, the whole affair borders too strongly on pampering for the average dairyman to attempt to follow too closely. But there is without doubt a point, and an advanced one, too, to which dairy development can be brought with practical profit. Extra feed and care wisely devoted to securing special ends will pay, and pay largely; and the more generally people can be brought to appreciate this fact, the more permanent will be the improvement and the more generous the financial returns of the live stock industry. Where one man will decrease his profits by unduly pushing special development, scores will curtail them by failing to secure the best practicable good within their reach in the same line.

## Practical Stock Breeding.

A scrub heifer bred to a thoroughbred bull for her first calf, and then repeatedly bred to the same bull, will improve in her breeding so that each succeeding calf will be better than the preceding one, and this to a greater extent than if she had been bred to different bulls, though all equally good and of the same blood. This rule holds good with horses and sheep, as well as cattle. Stick a pin right here. If you are breeding cattle, get a good bull and keep him. If you conclude to breed Durhams, do so; if Holsteins, or any other breed, do so, but don't breed to a Durham bull one year and a Holstein the next. You must stick to the one thing if you expect to breed good grades of either. And more than this, a cow that has once been bred to a scrub bull, if bred promiscuously to different bulls, even of the same breed, will never produce as good calves as she would if bred several times in succession to the same individual bull. The man who has good heifers, high grades of thoroughbreds, and does not want to raise their first calves, and who uses a scrub bull because it is cheaper, is saving pennies to-day at the expense of dollars in the near future. Use nothing but thoroughbred males on all kinds of stock, and all things being equal, the longer you can use the same animal the better. I do not mean by this that it is advisable to use him on his own progeny, but on the original animals it may be continued indefinitely.

The great majority of farmers' cows drop their calves in the Spring so as to have the first flow while the cows are at grass. It is, therefore, timely to urge those who have good milking or butter strains to keep the heifer calves for cows. Butchers will usually pay more for a calf of five or six weeks old than the owner can realize by keeping to sell; but a good cow in worth twice or three times as much to keep as a poor one, and there is, and should be, increasing difficulty in securing the best cows, except by breeding them on the farm where they are to be kept.

## Tests of Improvement.

Sir J. B. Lawes, in the *London Live Stock Journal*, says:

A generation has passed away since we began to conduct experiments on feeding stock, and though our results were at the time published in the *Journal of the Royal Agricultural Society*, they are probably unknown to most of the farmers of the present day. I make no apology, therefore, for again bringing forward some of the more important of the results obtained, and the conclusions which were drawn from them.

The object I have in view is to point out how desirable it would be to have a similar set of experiments carried out at the present time; and this the more, as I may say that while our own experiments were in progress, we felt how much more interesting and valuable they would have been had similar investigations been carried out—say 30 years previously—with which we might have compared our own results.

I presume every one will agree that during the last 30 years improvements have taken place in our stock. What we want is some measure of this improvement. To point to a mountain of beef, which may have cost half a crown a pound to produce, or probably more, does not answer this question.

From the point of view of a practical farmer, I am disposed to think that the measure of improvement in any breed of stock should consist in the capacity of the animals of such breed to produce more meat, with a less consumption of food, than they did before.

The questions, then, to which an answer is desirable, are:

(1) What is the amount of food consumed to produce a given increase of live weight?

(2) What are the relative proportions of carcase to offal in the animals?

These are the crucial tests of improvements; and if a set of experiments could be carried out now, similar in character to those carried out at Rothamsted thirty years ago, a comparison of the results obtained in each case would be both interesting and instructive.

It may be asked, if such be the case, why I do not undertake the investigations myself.

My answer is that, in our investigations on soils, drainage water and field experiments, we have more work on hand than we can well attend to; and further, that if I were to take up an investigation into any subject connected with animals, I should prefer that of the production of milk.

To return to our feeding experiments. Of the various breeds of sheep, 40 of each of the following were selected: Sussex Downs, Hampshire Downs, Leicester, Cotswold, and cross-breeds of both ewes and wethers, of these the cross being the produce of a Leicester ram and of a Sussex ewe.

The proportion of carcase to 100 lbs. of fatted live weight varied but slightly in the various breeds. It was highest in the Cotswold, 61½ lbs., and lowest in the Leicester, 60 lbs. In our summary, we say well bred and moderately fattened oxen should yield 58 to 60 per cent. of carcase in fatted live weight, while excessively fat oxen may yield 65 to 70 per cent.

Moderately fat sheep should yield 55 per cent carcase in fatted live weight, and excessively fat sheep 64 per cent or more. Moderately fat pigs killed for fresh pork should yield (including the head and feet) 50 to 52 per cent carcase in fatted live weight, while large, well-fattened pigs killed for curing will yield a considerably higher proportion.

The Sussex and Hampshire sheep produced the largest amount of loose fat; the Cotswold and Leicester the least amount, the proportion being that the Down breeds showed an increase of more than 7 lbs. to each 100 lbs. of animal; and the other breeds an increase of only 5 lbs.

To produce 100 lbs. increase in live weight, the Cotswold sheep consume the least food, and the Sussex Downs the most. The following is our summary relating to increase: Sheep will consume about 15 lbs. of dry mixed food, (roots, hay, and cake or corn), per week for each 100 lbs. live weight and they should yield about 1 lb. increase in live weight for about 9 lbs. of dry substance of this food.

Oxen under similar conditions, but receiving a small quantity of straw chaff with other foods, will consume about 12 lbs. to 13 lbs. of dry food to each 100 lbs. live weight weekly, and should give 1 lb. increase to each 12 lbs. or 13 lbs. of dry food consumed. Pigs fed liberally on corn will consume from 26 lbs. to 30 lbs. of dry substance for 100 lbs. live weight weekly, and they should yield 1 lb. increase of live weight for 4 lbs. to 5 lbs. of dry substance of food consumed.

Such are briefly the conclusions derived from experiments carefully conducted upon between 300 and 400 animals. It would not now be necessary to carry out experiments upon so large a scale as this. If a sufficient number of animals were selected for the purpose from a few of the more important breeds of oxen, sheep, and pigs, we should know from them what changes thirty years had produced.

A mistake which stockmen and farmers, as well as almost all other classes of business men, are prone to make, is to attempt to gauge the possibilities and probable outcome of their business by the results of the operations of a single year. They make one trial, and upon its success or failure dependa their contentance in the line in which they are thus experimenting. One does not need a wide field of observation in order to satisfy himself that single trials of this kind on the farm are generally insufficient to establish any fixed principle in agriculture or stock-raising. In the first place new ventures are made with inexperience, and are rarely marked by unexceptionable judgment. No matter how much one may learn from others, his management of any new line of labor is usually, at first, in some degree defective. Then the experiment may not be made under fair average conditions. The season may be untoward, the market supplies overstocked or depleted, and other circumstances abnormal. All these things are to be taken into consideration. It is seldom, perhaps, that a single season will suffice to accurately test anything concerning which the farmer may be in doubt, and there are many things, especially in stock raising, which years only can settle. We believe there are few specialties in cropping or in stock-farming which, intelligently pursued and persistently studied, will not yield a good return. But one cannot settle this point in one or two spasmodic trials. He must not, in his haste for results, be constantly changing his farm policy. To do so is simply to court certain failure.

If we make our butter good enough, and ship carefully enough, the world will furnish us a market, at remunerative prices, for all we can manufacture. It is a waste of labor and time to produce a poor article, and those who sell it are of necessity at the mercy of the purchaser.

## STABLE AND PADDOCK.

## Over-Feeding and the Result.

It is an error to suppose that the horse can be fed with discretion or without, as one pleases, the result being the same. It is equally an error to dose the horse for every indication of disturbed digestion. There are peculiarities of structure, and hence variations in functional manifestation; each horse, like each person, having these differences marked by strong lines. These differences require to be heeded, as no success will attend any attempt to set up a new standard. When indigestion is assured then fermentations begin, because food cannot long remain in so warm and moist a place as the stomach and bowels of a living beast without fermentation following. Skill is required to feed a horse, exposed daily to hard driving or labor, in such a manner as always to secure immunity from some one or more of the evidences of indigestion. With some horses long continued use of one kind of grain, or of ground feed, will create disturbances within; gas being generated freely and the bowels becoming bound up. Food cannot be given to the horse as grain is shovelled into a hopper, that is not to the average horse, for only a very few have such a vigorous digestion that they assimilate all the stomach will contain. Such as may have inherited this exceptional kind of digestive force will part with it little by little if the organs involved are repeatedly abused.

The fact is not generally well understood that active exercise after feeding retards the digestive process. It is a law of the system, whether of the horse or other animals, that all the functions of the body cannot go on in full force at the same time. Even tolerably active exercise after eating will detract from the stomach's force, through the increased demand upon the circulation and nervous force of the heart and muscular system, and prompt action upon the food eaten does not take place, hence fermentation follows, the horse showing dullness, sweating easily, and the breathing is disturbed upon his being sharply driven or required to pull hard. Gas is expelled from the stomach, and, later, from the bowels. The animal has less thirst than usual, drops his head, and looks dejected upon coming in from work. He takes his food without zest. When in this condition it would be unwise to put the animal upon full feed, because the stomach is already laboring at its unfinished task and then again because an exhaustive state from recent labor is incompatible with active digestion.

The state of the parts involved is not merely a functional disturbance, with no change made in the appearance of the parts. On the other hand an irritated state is set up, more than the usual amount of blood being sent to the organs involved. This excess may be but temporary. If so, and it has not often been repeated, then no mark upon the mucous lining of the stomach has been made. If of frequent occurrence then the turgid state of the blood vessels of the part will pass into a permanently reddened state, the natural result of excessive determination of blood. Then follows habitual indigestion, more or less aggravated, and a horse in this condition is in very unsafe hands when handled in an ordinary way, that is, with an attendant having permission to feed as he likes and work the animal alongside a mate in good health. A horse when in this disordered condition will be quite likely to eat nearly his usual ration and he will at the same time do his best to keep up his end at work, though it be done in a spiritless manner. The most effective remedy in case of this kind is simply rest. This is the panacea given to the horse when he returns at night from his work. Any rule relating to tired muscles applies with a like force to a tired stomach. Nearly all horses will eat to excess if allowed to do so, while there are but few that are so spirited as to overwork from choice.

Indigestion may be confined to one part of the viscera, or it may be diffused. Nature seldom makes bold or sharp lines. The trouble is generally accompanied by a cold surface, or at least the tendency is that way, in any but the warmest weather, and the legs are also inclined to be cold. This condition of the circulation aggravates the trouble by sending the blood rudely to the stomach and bowels, and the circulation should be invited to the surface and legs by the use of a blanket and rubbing. Corn should not be fed, but oats and clean hay instead, with an occasional mash of ground feed.

The descriptive words cobs and hacks, as applied to particular types of horses, are of limited use in this country, and some of our readers seem to suppose that they are used to designate certain breeds that are known by these names. This is a mistake. The terms are not used to designate a breed, but to indicate the type of an animal, in his size and conformation, no difference what his blood or whether he has any blood. A cob is a short legged, stont, blocky and compactly built animal, varying in height for thirteen hands three inches to fourteen hands three inches. The hack is the same type of animal, varying in height from fourteen hands three inches to fifteen hands three inches. The hack is larger than the cob and the cob is larger than the pony, and the sizes we have indicated are after the best English usage. The Morgan horse, in his original type, would have been the Englishman's true ideal of the cob.

Contraction of the hoof, says the *Live Stock Journal*, is certainly not a cause but is almost invariably the effect of navicular disease. It is the result of an atrophy, or wasting of the soft, sensitive structures contained within the horny box, consequent on their diminished activity, the horn adapting itself to these structures that it incloses and protects. A foot thrown out of use, decreases in size. Nature has given certain structures for certain uses. If these uses are avoided, the parts diminish in bulk. Wear the arm in a sling for any length of time, the muscles shrink, and the hand withers. So with the horse's foot, when the weight is taken off it as much as possible in motion, and also in the stable, the muscles of the shoulder thrown much out of use waste, and in the foot, the quarters draw in, the heels narrow, the frog hardens and decreases in size, etc., and the sole thickens and heightens, in short, the foot becomes contracted.

It does not pay to dispose of good mares and by old, broken-down mares for breeding purposes. The defects of the mares will almost certainly reappear in the produce, no matter how fine a stallion is used. Blind mares, if bred, generally produce colts which sooner or later, generally in a very short time, go blind. Another fact which should be remembered is this, never breed to an angry tempered, vicious stallion, as the colts will inherit this fault to a greater or less degree.

## The Use of Clysters.

Clysters are used for all the domestic animals, and to effect many useful purposes. They empty the bowels; destroy and remove worms; exert according to their composition soothing, sedative, or stimulant effects on the rectum; by reflex action these effects are propagated to adjacent and even to remote organs; while in addition they prove convenient vehicles for introducing into the body food and medicines which in sore throat, tetanus, apoplexy, or other cases, cannot readily be swallowed. A clyster of soap introduced into the anus and held for a minute or two encourages the action of the bowels, especially in dogs and cats and in young foals and calves. Whether in health or disease no remedies are more safe and effectual for maintaining the regular action of the bowels, and when properly used they sometimes supersede the necessity for purgatives. In constipation and torpidity, after barded, impacted, obstructing fecal masses are broken down and removed by the hand, finger, or small spatula, laxative clysters may be advantageously thrown up in large amount, interrupting the operation whenever straining occurs, raising the hind parts, and by pressure increasing the retaining capacity of the anus. A gallon and a half to two gallons may thus be introduced into the rectum of a draught horse, a pint into the rectum of a dog 40 lb. weight. When the posterior gut is thus distended, not only is mechanical facility given for the outward movement of the contents of the canal, but by reflex action peristalsis is encouraged far beyond actual contact of the injected fluid. Thus, to evoke the full action of the bowels there should be slowly introduced a large volume of tepid water and soap, the laxative effects of which are increased by the addition of oil, salines, oil of turpentine, or solution of aloes. It is doubtful whether even with an extra long tube, fluids can be made to pass upwards through the ilio-cæcal valve. These copious tepid injections, with full doses of opium, and occasional tobacco smoke clysters, notably relax intestinal spasm, and prove the chief treatment of cases of invagination and intussusception, whether in horses or dogs. The introduction into the rectum of one part of sodium bicarbonate, dissolved in eight of water, immediately followed by tartaric acid solution of like strength, produces sudden evolution of carbonic anhydride, which has occasionally brought the misplaced intestine into its natural position.

Tolerably copious clysters of tepid water or other bland fluid exert local soothing effects, not only on the intestines but by reflex action allay irritability, spasm, and pain of the urino-genital organs, and frequently relieve suppression of urine. Their efficacy is sometimes increased by the addition of opium and other sedatives, which are used in about the same doses as are given by the mouth. By reflex action the kidneys, bladder, and uterus are also beneficially acted upon by stringent and stimulant enemata. For destroying and dislodging the oxyuris curvula, popularly known as ascarides, clysters of turpentine and lime water, and of solution of aloes, quassia, or chloride of iron, are very effective. In house dogs troubled with constipation and hemorrhoids, the cautious daily injection of two or three ounces of cold water proves serviceable.

When intended to be retained or absorbed, clysters should be limited in amount; one or two pints suffice for horses, three to four ounces for dogs 40-pound weight. To allay irritability and spasm in troubles of diarrhoea and dysentery, vegetable astringents, opium, and acetate of lead are given usually with well-boiled tepid starch gruel. In such case the injection may be repeated every hour. Nutrient clysters useful in tetanus, in sore throat and low fever, when patients will not or cannot eat, usually consist of linseed tea, with milk and eggs, or of strong beef tea introduced at a temperature of 100 degrees, and repeated not oftener than four or five times in the twenty-four hours. In cases of low fever in horse and distemper in dogs, a little wine or whiskey is sometimes added to the clyster. Snopositories of raw or cooked meat are readily absorbed from the rectum, especially if they are previously moistened with diluted hydrochloric acid and pepsin.—*Veterinary Journal*.

## Use of Disinfectants.

In relation to disinfection, I believe, says Prof. Periam, that in virulent diseases it is necessary to disinfect the stable or hospital at least once a week, in addition to that constantly in use for the evacuations. The value of disinfection is no longer open to discussion. Its value is reduced to scientific facts. Experiment has also shown the value of two or more disinfectants in combination. For cesspools, drains, and others of a like character, the following formula will be found good:

Sulphate of zinc, one part; oak bark, powdered, one part; sulphate of iron, one part; mix, and form into balls with tar, of suitable size for use.

Of disinfectants in solid (powdered) form, the following are cheap and effective:

Carbolic acid, one pound; coppers, two pounds; air-slacked lime, two bushels; mix, and use freely.

Another: Burnt alum, one part; dry chloride lime, two parts; mix, and place in shallow dishes about the stable.

Another: White vitriol, (sulphate of zinc), one part, coppers, powdered, twenty parts; gypsum, powdered, thirty-six parts.

Still another is: Carbolic acid, powdered, one part; gypsum, powdered, fifty parts; coppers, 150 parts; mix.

One more: Flowers of sulphur, one pound; common salt, two pounds; coppers, three pounds.

A cheap and effective liquid disinfectant to be used as a wash is made of carbolic acid, one ounce; white vitriol two ounces; water, two gallons.

A powerful disinfectant, but poisonous if swallowed, is made as follows: Chloride of zinc, four ounces; coppers, eight ounces; water, one-half gallon; dissolved, a pint of the solution in a gallon of water will be of full strength to be used. It must be properly marked and placed where children will not get it.

Chloralum, already spoken of in the last lecture, is made by the following formula: Chloride of aluminum, one and one-half pounds; water, one gallon; dissolve.

This has no smell and is not poisonous. Of fumigants, sulphur is probably one of the best. It should be used strong enough to set the animals coughing, and then immediately discontinued, to be again exhibited the second or third day. If sulphur be mixed with tar, the generated gases of combustion form one of the best atmospheric disinfectants known.

In this connection we may remark that disinfectants are not only of service when and where contagious diseases are known to exist, but will be found an admirable preservative of health in stables and in barns, where either horses or cattle are housed.

## Horses and Hot Weather.

I wish to give your many readers my method of treating my horses during the hot season, which is generally the busiest season on the farm. In the first place I aim to have them only in good working order, as any surplus of flesh is more of a nuisance at this time of the year than any other. This can be easily done by proper management. No difference what the work is that has to be done, the condition of the horses depends upon the treatment they receive, and not upon the amount of labor they are made to perform. After having them in proper condition to stand hot weather, neither too fat nor too poor, the work should be managed according to the condition and temperature of the weather. It is both hard on man and beast to do the same amount of work each day of the week regardless of consequences. A day in which the air is oppressive, and the rays of the sun sultry and scorching, no team should be compelled to push along at the steady and rapid gait which they may be able to stand without injury on cooler days. By watching this matter carefully, more work can be done by the same team during the season than by compelling it to do all it can each day, regardless of the weather. I find that working earlier and later during the severe hot weather and giving the horses a longer nooning has a good effect. The rays of the sun are severe between ten and two o'clock, and when a certain amount of work must be done each day it is well to make up at least a part of that time during the early morning and late in the evening, and give the horses the benefit of it in the middle of the day. Horses are affected during this season by their feed more than any one would suppose, and by working earlier and later gives an opportunity to improve upon the usual way of feeding by introducing four meals a day instead of three. The horse has a smaller stomach in proportion to its size than any other animal, and cannot stow away enough food at once to last it any great length of time, hence is greatly benefited by being fed oftener and not such large quantities at a time. By beginning early as possible in the morning and quitting at ten o'clock or soon after and resting until two o'clock, I find it a very good plan to feed two light meals during the time, one shortly after un hitching and the other just before going to work. When this is done the first meal should be the larger, as it is not well to work on too full a stomach. No matter how or when horses are fed they should always be allowed a drink of fresh water before eating. There is no doubt but that if this was strictly adhered to there would be fewer sick horses in the country. If a horse is thirsty and allowed to eat a meal of dry food before drinking it will have a tendency to make him still more thirsty, and when he is given water he is apt to overdo the matter by drinking too much. Another and more dangerous thing connected with such a way of doing is that when the stomach is full of dry food and a horse is allowed to drink all he pleases and as he pleases he is apt to drink in a very hasty manner, and by so doing will wash particles of the food from the stomach into the intestines, which cannot but be injurious, and often results in severe cases of sickness or death. But the manner and time of feeding is not all that is to be taken into consideration. The kind of food is of paramount importance. It is safe to say that three-fourths of our farmers feed too much corn to their horses during the heated term. So many ears of corn are dealt out three times a day, regardless of the amount of work the horses are doing or the temperature of the weather. I believe, in fact I know by actual experience, that oats are much superior to corn as food for the Summer months. No other grain save wheat contains so large a proportion of the albuminoids, which give strength for work. They are not so heating in their nature, and horses fed on oats entirely or in part are not so liable to become over-heated. Chopped feed makes a palatable and cooling feed for the noon meal, but by the new process of grinding wheat there is but little of the gluten left, and without it there is not a great deal of nutriment in it. A good feed cutter should be found in every barn in the country for the proper preparation of oats or whatever material may be used for the chop feed. There are many other matters which could be dwelt upon concerning the treatment of horses in hot weather, but time and space forbid at this time. I may speak of them again. Suffice it to say that there is no reason for horses running down in flesh or being injured during the hot weather of Summer, and yet do a great amount of work if properly managed.—*Stockman*.

A good healthy condition in horses is generally indicated by a glossy coat of hair. Although grooming has considerable to do with keeping the hair in proper order, without the animal is in fair physical status it is next to impossible to keep the hair in as fine a condition as it might be with everything in its favor. As an illustration of this take the colt while it is still living upon the milk of the mare, and its coat is as sleek and bright as it could be wished, but take it from the dam and let it exist upon other rations, and a harshness is soon noticeable in its covering. Therefore a ration of grain which would come the nearest to filling the place of a mother's milk would be best for colts after being weaned. It is claimed by those who have tested the matter that a diet composed of one part of linseed oil meal, two parts of wheat middlings and two parts of oat meal is excellent. This should be given sparingly at first and the quantity increased as the animal grows older. The oil meal will make the coat bright and glossy.

It is absolutely necessary that proper precautions should be taken to prevent the horse from galling before any effort is made to heal the abrasions. The collar should be properly fitted, and should be kept scrupulously clean by frequent washing with soap and water. As a cooling and healing application, the following will be found very efficient: Sugar of lead 1 oz., sulphate of zinc 1 oz., water 2 pints; mix and apply with a sponge two or three times a day.

Don't think your horse in best condition to endure a long trip or a hard drive because he has stood in the stable for weeks and done nothing. If there is ever a time that he is "soft," it is after a long idle spell, but many unthinking men do not realize this, and horses of standing and staying qualities are often injured by being brought too suddenly from idleness to hard labor.

It is a bad practice for breeders to use a stallion in service for trying, a horse being indifferent after many "false attempts" and frequently becomes almost unmanageable. It pays to keep a "teaser," as it secures better service from the stallion—keeps him in better condition, and makes him more easily managed.

Speed Programme
-OF-
THIRD DISTRICT
AGRICULTURAL ASSOCIATION

- AT -
CHICO, CAL.

REMARKS AND CONDITIONS.

National Trotting Association Rules to govern all Trotting and Pacing Races. But the Directors reserve the right to change the order of the programme so as to alternate if necessary to save time, and furnish more than one race the same day.

In all Trotting and Pacing Races, five to enter, three to start. Entrance ten per cent. of purse, to accompany all nominations.

Horses distancing the field will be entitled to the first and third money only.

Horses entered for purses can only be withdrawn by consent of the Judges.

The Pacific Coast Blood Horse Association Rules to govern all Running Races.

Non-starters for Running Races will be held for entrance.

Non-starters must be declared out the day previous to the race they are engaged in, before eight o'clock p. m.

In all Running Races the second horse saves entrance.

No money paid for a race without a contest.

All entries for Races to close with the Secretary or President, at Chico, Aug. 1st, 1884, at ten o'clock p. m.

The Board of Directors will have absolute charge of the Track and Grounds during the week of Races, and guarantee that they will be kept in first-class condition.

The above rules in regard to entries and conducting the Races will be strictly enforced, and all purses and stakes will be paid when the Judges have rendered their decision, and before leaving the Stand.

N. B. In all running races the second horse saves entrance. The time of closing entries extends to August 1st, at 10 o'clock p. m.

In Subdivisions of from TEN to THIRTY ACRES Each, of the Far-Famed

Fruit and Berry Land

- A T -

HAYWARDS,

Alameda County, Cal., being the well-known

Strobridge Ranch,

Only Ten Minutes' Walk from the Post Office at Haywards, at

AUCTION!

Saturday, Aug. 16, 1884,

At 12 o'clock, noon, on the property.

An opportunity never before offered for securing small tracts of productive FRUIT LAND in this celebrated location.

Surrounded by the famous orchards of Meek, Weston, Blackwood, Jessup and others, and on account of its proximity to San Francisco and the cheap transportation this land offers advantages unequalled by any other section in the State, and is rapidly enhancing in value. Secure a Homestead with an income. Only sixty minutes from San Francisco.

Long Credit and Low Rate of Interest.

Only one-third Cash, balance in 1, 2 and 3 yearly payments; interest on deferred payment only 7 per cent. per annum.

AN ELEGANT COUNTRY SEAT.

That portion of the tract comprising 100 acres, on which are the improvements, include the

Strobridge Mansion.

A magnificent modern residence of twenty rooms, completely and elegantly furnished. Broad verandas and every comfort of a luxurious home.

Fine large stables, carriage houses, summer houses and out buildings; also trout pond and never-failing stream of running water; fine orchard of five acres, assorted fruits; handsome lawn, etc., will be sold as a whole, including the furniture.

Send for Diagram Catalogue of Ranch; also, Stock Catalogue.

And don't fail to see the Property before the day of sale.

At the same time and place will be sold Strobridge's celebrated band of

Thoroughbred Spanish Merino Sheep, Fine Driving and Trotting Horses, High Grade Durham Cows, Farming Implements, Furniture, etc.

To Reach the Ranch.

The 7:30 and 10 A. M. boats from San Francisco connect at Oakland pier with Haywards train. Free Busses meet all trains, taking parties to see the ranch, allowing ample time to view the property and return to the city in the afternoon.

ON DAY OF SALE,

A SPECIAL TRAIN will leave Oakland pier on arrival of 9 A. M. boat from the city; Market street, Oakland, at 9:25; and East Oakland at 9:35 A. M. This train will return to the city after the sale.

Don't fail to examine this choice fruit land before day of sale.

An Ample Free Lunch Will be Provided

Tickets for Special Train and further particulars can be had of the undersigned.

Taggart & Dingee,

460 and 462 Eighth St., Oakland.

Easton & Eldridge,

22 Montgomery St., San Francisco, or

W. H. Rhodehamel,

Haywards.

How It Works.

A correspondent to one of the interior papers, speaking of the depletion of our trout streams, says:

"There used to be some nice trout streams about Napa. From fifteen to twenty years ago one could fill his creel in a few hours on any Spring day along Dry Creek, Little Napa Creek, Milliken Creek, the little stream (without a name) that meanders down from the hills in the rear of the Asylum, and others. In those days there was even less respect paid to the law than there is to-day, and continual poaching must have greatly depleted the streams ere this. In fact we hear that there are now no trout in one of these streams, where once upon a time the writer could whip out a dozen or two before breakfast, and that, too, within 300 yards of the business centre of the town."

To this statement, which we personally know to be true, we could add a hundred more streams that are now completely depleted. One case is as good as a hundred when it offers the opportunity to prove the truth or falsehood of the depletion claimed without much trouble. The additional case we cite is Wild Cat stream, behind San Pablo, formerly an excellent stream for trout, but which is now thoroughly depleted. How can it be otherwise when every man fishing, or at least fifteen out of every twenty, catch scores and hundreds of fingerlings every time they go out? These small fish form the stock from which our supply must come. Destroy your stock and where is your future supply? Let us go on, by all means, and kill every fingerling we can catch. After a while there will not be a brook trout in the State, and then when we have paid \$20,000 or \$30,000 to replenish our streams, and have no fishing for years, we shall know how to appreciate the value of our brook trout. In the meantime let us show our personal independence, and act like outcasts and vagabonds. Quite a number of pure Eastern trout have recently been caught at the head waters of the Yuba and other large rivers. This shows that these grand fish have not died out of our waters since first planted as alleged. However, the secret of their growth lies in the fact that the fingerling sharps cannot reach their haunts.

The Sunday Capital says: "The carp is to the fish species what the hog is to the beast creation. It isn't fit to be eaten, for it lives on filth." What does the chicken, the duck, or the turkey eat? Yet we know Brother White likes a cold chicken, or a Thanksgiving turkey as well as any man. There are ways of cooking a carp, which if eaten in ignorance will make a connoisseur's eyes snap.

Horses in all district races must have been owned in the district June 1, 1884.

The track has just received a dressing and is in first rate condition—both fast and safe.  
Entries to close August 1, 1884.

### REMARKS AND CONDITIONS.

All trotting and pacing races are the best three in five, except the yearling trot, unless otherwise specified, five to enter and three to start. But the Board reserves the right to hold a less number than five to fill, by the withdrawal of a proportionate amount of the purse. Entrance fee, ten per cent. on purse, to accompany nomination. All purses unless otherwise specified divided at the rate of fifty per cent. to first horse, twenty-five per cent. to second, fifteen per cent. to third, and ten per cent. to fourth.

National Association Rules to govern trotting; but the Board reserves the right to trot heats of any two classes alternately, if necessary to finish any day's racing; or to trot a special race between heats. A horse making a walk-over shall be entitled only to the entrance money paid in. When less than the required number of starters appear, they may contest for the entrance money, to be divided as follows: 66% to the first and 33% to the second.

In all races entries not declared out by 6 P. M. of the day preceding the race shall be required to start.

Where there is more than one entry by one person or in one interest, the particular horse they are to start must be named at 6 P. M. of the day preceding the race. No added money paid for a walk-over.

Rules of the State Agricultural Society to govern running races, except when conditions named are otherwise.

Non-starters in running races will be held for entrance, under Rule 8.

Racing colors to be named in entries.

In trotting races, drivers will be required to wear caps of distinct color, which must be named in their entries.

Entries to all of the above races to close with the Secretary on Friday, August 1, 1884.

Entry blanks and racing rules will be furnished upon application to the Secretary.

J. MCM. SHAFER, President.

W. E. Cox, Secretary.

### Remarks and Conditions.

All Trotting and Pacing Races, except when otherwise specified, best 3 in 5. Five to enter and three to start. In Running Races, to fill purses five or more subscribers are necessary. In all races, except where otherwise expressly stated, entrance fee ten per cent. on purse, to accompany nominations. Purse divided at the rate of 60 per cent. for first horse, 30 per cent. for second, and ten per cent. to third. National Association rules to govern Trotting and Pacific Coast Blood Horse Association to govern Running Races. The Board reserves the right to trot heats of any two classes alternately, or to trot or run a special race between heats. No money for a walk over. Horses entered for purses can only be drawn by consent of Judges. Entries to be made in writing, giving name, sex, color and marks of horses; also name and residence of owner. In Running Races, full colors must be worn by riders. Drivers in Trotting Races are requested to wear caps of distinct colors, to be named in their entries, as their horses will be designated upon programmes by colors worn by drivers. Entries to all the above races to close with the Secretary on Friday, August 16th, 1884. All races in which District Horses are entered, they must have been owned in the District prior to July 1st, 1884, except when specified "free for all."

Address all communications to  
GEORGE FLETCHER  
Assistant Secretary,  
Holbrook Hotel, Grass Valley, Cal.  
GEO. G. BLANCHARD, President.

The horse winning the first heat to take \$125 and go to the stable, the horse winning second heat to take \$100 and go to stable, the horse winning third heat to take \$25 and close the race.

### Remarks and Conditions.

All trotting and pacing races are the best three in five; five to enter and three to start. But the Board reserves the right to hold a less number than five to fill, by the withdrawal of a proportionate amount of the purse. Entrance fee, ten per cent. on purse to accompany nomination. Trotting and pacing purses divided at the rate of sixty per cent. to first horse thirty per cent. to second, and ten per cent. to third. National Association rules to govern trotting; but the Board reserves the right to trot heats of a 2:5 two classes alternately, if necessary to finish any day's racing, or to trot a special race between heats. A horse making a walk-over, shall be entitled only to the entrance money paid in. When less than the required number of starters appear, they may contest for the entrance money, to be divided as follows: 60% to the first and 33 1/3 to the second. In all races, entries not declared out by six p. m. of the day preceding the race, shall be require to start. When there is more than one entry by one person or in one interest, the particular horse they are to start must be named at 6 p. m. of the day preceding the race. No added money paid for a walk-over. Except as otherwise specified, running races will be conducted under the rules of the Pacific Coast Blood Horse Association. Non-starters in running races will be held for entrance under rule 3. Racing colors to be named in entries. In trotting races, drivers will be required to wear caps of distinct colors, which must be named in their entries. Entries to all of the above races, (except fixed events), to close with the Secretary on Saturday, August 23, 1884. Entry blanks and racing rules will be furnished upon application to the Secretary.

# ASHLAND PARK TROTTING STUD

NEAR LEXINGTON, KY.

B. J. TRACY, PROPRIETOR.

THIS IS STRICTLY A BREEDING FARM. FOR though training is done, it is only for the stock belonging to the place, or those purchased from the proprietor. The proprietor of Ashland Park has no pet trotting family; his aim is to secure and have at all times for sale choice representatives of each of the leading families, these being the Hambletonians, Mambrino Chiefs, Clays, Pilots, Black Hawks. At Ashland Park may now be seen splendid specimens of the get of such stallions as George Wilkes, Almont, Mambrino Patchen, Clark Chief, Edwin Forrest, Blackwood, Sentinel, American Clay, Administrator, North Star Mambrino, Bourbon Chief, Regular, Isadora, Howards Mambrino and Homer. The steady aim is to possess nothing that does not trace through the best class of speed-producing trotting crosses, along all the blood lines, right to the thoroughbred. For catalogues or further particulars address 217yl  
**B. J. TRACY,** Lexington, Ky.

# BREEDER AND SPORTSMAN

Vol. V, No. 7.  
NO. 508 MONTGOMERY STREET.

SAN FRANCISCO, SATURDAY, AUGUST 16, 1884.

SUBSCRIPTION  
FIVE DOLLARS A YEAR

## TURF AND TRACK.

### Saratoga.

July 31st.—Purse, \$500, of which \$50 to the second; and the entrance money, \$15 each, to be divided between the second and third horses. Non-winners in 1884 of a race of the value of \$1,000 allowed 7 lbs.; those not having won a race in 1884 allowed 14 lbs.; maidens allowed, if four years old, 13 lbs.; if five years or upward, 25 lbs.; 7 entries; mile and seventy yards.

G. R. Buchanan's ch g Jim Renwick, 6, by Joe Hooker, dam Big Gun, 110 lbs. (Fitzpatrick) 1  
E. J. Baldwin's Lucky B., 4, 104 lbs. (Holloway) 2  
O. Bowie's Bessie, 4, 106 lbs. (Taylor) 3  
J. R. Keene's Burgomaster, 2, 98 lbs. (Higgs) 0  
G. Cook's Ferg Kyle, 4, 111 lbs. (O'Neil) 0  
Time, 1:49.

Pools: Jim Renwick, \$400; Ferg Kyle, \$50; Burgomaster, \$65; Lucky B., \$60, and Bessie, \$25. Betting—5 to 3 on Jim Renwick, 3 to 1 each against Burgomaster and Ferg Kyle, 4 to 1 against Lucky B., and 15 to 1 against Bessie. Mutuals paid, \$9.20.

Burgomaster took the lead at the start and showed the way round the seven-furlong post, when Jim Renwick rushed to the front and home, winning by a length and a half. Lucky B. second and a length better than Bessie, third, followed by Burgomaster, Ferg Kyle being last.

Same Day—Spinaway Stakes; for two-year-old fillies, at \$100 each, half forfeit; \$25 only if declared by July 1, with \$800 added; the second to receive \$200 out of the stakes; the third to save her stake; to carry 100 lbs. each; winners of any sweepstakes of the value of \$1,000 to carry 3 lbs.; of two or more such stakes, 7 lbs. extra; maidens allowed 5 lbs. Closed with 17 subscribers, of which 2 declared; five furlongs.  
E. J. Baldwin's b f Mission Belle, by Grinstead, dam Josie C., 103 lbs. (Holloway) 1  
W. L. Scott's Radha, 95 lbs. (Higgs) 2  
W. L. Scott's Florio, 107 lbs. (Lewis) 3  
W. P. Burch's Telie Doe, 103 lbs. (Maynard) 0  
Time, 1:38.

Pools: Mission Belle, \$100; Scott's pair, \$60, and Telie Doe, \$15. Betting—5 to 2 on Mission Belle; 11 to 5 against Florio; 5 to 1 against Radha, and 8 to 1 against Telie Doe. Mutuals paid, \$7.40.

Radha led round into the lower turn, when Mission Belle went forward and captured her before she reached the straight stretch. Near the third quarter-post Mission Belle took the lead and held it cleverly to the finish, winning by a length, Radha second and two lengths in front of Florio, third, Telie Doe being last.

Same Day.—Purse, \$400, for all ages; entrance \$10 each; horses entered to be sold for \$1,500 to carry weight for age; if to be sold for \$1,000 allowed 5 lbs.; if for less, to be allowed 2 lbs. for each \$100 under \$1,000; 7 entries; three-quarters of a mile.  
J. Forbes' h m Bonnie Bird, aged, by Judge Curtis, dam Bonnie Braes, 106 lbs., \$800. (Fisher) 1  
J. Carter's ch g Beechenbrook, 4, 106 lbs., \$800. (Taylor) 2  
E. J. Baldwin's ch f Marie Stuart, 99 lbs., \$1,000. (Miller) 3  
E. J. McElmeel's h f Ida K., 4, 100 lbs., carried 101½ lbs. (Sheridan) 0  
M. Young's b m Vera, 4, 108 lbs., \$1,000. (D. Williams) 0  
Wilson & Co.'s ch g Riddle, 5, 106 lbs., \$700. (Conkling) 0  
Time, 1:34.

Pools: Bonnie Bird, \$250; Vera, \$65; Riddle, \$35; Marie Stuart, \$35; Ida K. and Beechenbrook, each \$25. Betting: 5 to 4 on Bonnie Bird, 3 to 1 each against Vera and Beechenbrook, 6 to 1 against Riddle, and 8 to 1 each against Marie Stuart and Ida K. Time, 1:18½. Winner bought in at entered price. Mutuals paid, \$8.50.

Ida K. led out of the chute in the main track, when Bonnie Bird went to the front and held it to the finish, winning by a length; Beechenbrook second and a length better than Marie Stuart third, she followed respectively by Ida K., Vera and Riddle.

August 6th. Purse, \$350, of which \$50 to the second, for three-year-old fillies, non-winners of a race of the value of \$1,500 in 1884; entrance free; those never having won a race of the value of \$1,000 allowed 5 lbs.; or if non-winners in 1884, allowed 10 lbs.; maidens allowed 15 lbs.; one mile.  
E. J. Baldwin's ch f Savanna, by Grinstead, dam Josie C., 98 lbs. (Miller) 1  
R. W. Walden's Flyaway, 103 lbs. (McManus) 2  
Suffolk Stable s b f by King Alfonso, dam Quickstep, 98 lbs. (Worth) 3

Pools: Savanna, \$50; Flyaway, \$30, and the Quickstep filly, \$15. Betting: 5 to 3 on Savanna, 2 to 1 against Flyaway and 6 to 1 against the Quickstep filly. Mutuals paid, \$7.40.

Savanna led off, Flyaway next and then the Quickstep filly. The two latter were parallel on the turn, but Flyaway gained second position at the quarter post. Savanna continued her lead and, though threatened by Flyaway at the half post and on the lower turn, won handily by eight lengths, Flyaway second and six lengths better than the Quickstep filly third and last.

Same day—Purse \$300, of which \$50 to the second; entrance free; for two year-olds which have never won a race of the value of \$1,000; those never having won a race of the value of \$500 allowed 5 lbs.; maidens allowed 10 lbs.; five furlongs.

R. W. Walden's b c Harrigan, by Lisbon, dam Ellen Goren, 105 lbs. (carried 107½ lbs.) (Blaylock) 1  
Excelsior Stable's Bahama, 102 lbs. (Higgs) 2  
V. L. Kirkman's Ernest, 92 lbs. (Arnold) 3  
E. J. McElmeel & Co.'s Alfred, 100 lbs. (Sheridan) 0  
L. Curran's Eileen, 102 (carried 106½) lbs. (Taylor) 0  
C. W. Medinger's Fairmont, 97 (carried 101) lbs. (Maynard) 0  
L. Duneman's Tallyman, 100 lbs. (Brown) 0  
O. Bowie's Joybell, 97 lbs. (Wilson) 0  
E. J. Baldwin's Rapido, 102 lbs. (Dorsey) 0  
Suffolk Stable's Little Maid, 97 lbs. (Worth) 0  
Time, 1:06½.

Pools: Rapido, \$160; Harrigan, \$60; Eileen, \$47; Bahama, \$30, and the field, \$47. Betting—8 to 5 against Rapido, 2 to 1 against Harrigan, 5 to 1 against Bahama, 6 to 1 against Eileen, 8 to 1 against Joybell, 12 to 1 against Ernest, 15 to 1 each against Alfred and Fairmont, 20 to 1 against Little Maid and 25 to 1 against Tallyman. Mutuals paid, \$19.40.

Harrigan led off, but Eileen showed the way into the main track and nearly round the eastern turn, after which Harrigan regained the lead and held it to the close, winning by three lengths; Bahama second and two lengths better than Ernest, third, followed in the order named by Alfred, Eileen, Fairmont, Tallyman, Joybell, Rapido and Little Maid.

August 7th.—Purse \$500; for all ages, of which \$100 to the second, the entrance money, \$15 each, to be divided between the second and third; winners since July 15th of any race of the value of \$1,000 to carry 3 lbs. extra; non-winners in 1884 of a race of the value of \$1,000 allowed 5 lbs.; or if such horses had been beaten and non-winners of a race at Saratoga this year allowed 10 lbs.; non-winners in 1884 allowed 15 lbs.; maidens allowed, if four years old, 18 pounds.; if five years or upward, 24 lbs.; 4 entries; one mile.

G. R. Buchanan's ch g Jim Renwick, 6, by Joe Hooker, dam Big Gun, 112 lbs. (Fitzpatrick) 1  
J. W. & R. H. Lord's Richard L., 3, 94 lbs. (Rivers) 2  
O. Bowie's Nettie, 5, 102 lbs. (Arnold) 3  
G. Cook's Ferg Kyle, 4, 108 (carried 109½) lbs. (Lewis) 0  
Time, 1:45.

Pools: Jim Renwick \$100; Ferg Kyle, \$30; Richard L. and Nettie each \$10. Betting—3 to 1 on Jim Renwick, 3 to 1 against Ferg Kyle, 8 to 1 against Nettie and 10 to 1 against Richard L. Mutuals paid, \$7.60.

Nettie, Ferg Kyle, Richard L. and Jim Renwick was the order at the start. Richard L. went forward on the western turn and maintained his lead to the seven furlong post, when Fitzpatrick brought Jim Renwick up and won handily by a length, Richard L. second, three full lengths in front of Nettie.

The Virginia Stakes, for two-year-olds, at \$25 each, play or pay, with \$700 added, the second to receive \$150 and the third \$50 out of the stakes; those not having won a sweepstakes of the value of \$1,000 allowed 3 lbs.; maidens allowed 7 lbs.; 38 subscribers; five furlongs.

E. Corrigan's ch f Lizzie Dwyer, by King Alfonso, dam Lily Duke, 107 lbs. (West) 1  
E. J. Baldwin's Volante, 110 lbs. (Holloway) 2  
M. Young's Harrigan, 107 lbs. (Conkling) 3  
C. W. Medinger's Frank, 103 lbs. (Allen) 0  
V. L. Kirkman's Earnest, 100 lbs. (Arnold) 0  
C. W. Medinger's Fairmont, 100 lbs. (carried 101) lbs. (Maynard) 0  
Time, 1:04.

Pools: Volante, \$100; Lizzie Dwyer, \$35; Harrigan and Ernest, each \$15, and the Medinger pair, \$10. Betting—5 to 2 on Volante; 5 to 1 against Harrigan; 6 to 1 against Lizzie Dwyer; 15 to 1 each against Fairmont and Ernest, and 20 to 1 against Frank. Mutuals paid, \$43.90.

At the send-off Harrigan led, followed by Ernest, Lizzie Dwyer, Frank, Fairmont and Volante last. The same lead was continued past the half and into the lower turn, but Lizzie Dwyer came forward, making the upstretch and led to the finish, winning in good style by a half length, Volante, second, and three lengths better than Harrigan.

Some of the members of the National Jockey Club are discussing the scheme of getting up a special race for the coming Autumn meeting at Washington for a big purse of \$10,000 or \$20,000. The idea is to make it a four mile race and to offer the large sum named as an attraction to the best horses and an inducement to owners to train for a four mile race.

The Directors of the St. Louis Fair Association have decided to build a new race track upon the Fair Grounds, together with a grand stand to accommodate 20,000 persons, and stabling for 1,500 horses.

The fair of the Montana Agricultural, Mineral and Mechanical Association which opens at Helena, September 8th, promises to be the greatest ever held in the Territory.

Ed. Corrigan has this season taken the place of Green Morris as the most successful Western turfman.

The Dwyer Bros. have promised to take their stable to Chicago, next June.

## A Defense of the Hawaiian Jockey Club.

EDITOR BREEDER AND SPORTSMAN:—I notice in the columns of your valued paper lately several communications from Honolulu, under the *nom de plume* of "Oahu" and "Hoopilinea Ole," and from the general tone of them it can easily be seen that they are the ebullitions of some of our constitutional race track soreheads. The chief grievance with them appears to be the Jockey Club. Now I can assure you, Mr. Editor, that we had never a properly conducted horse race in Honolulu prior to the organization of the club. That the programme on the 11th of June, under the auspices of the Jockey Club, was a grand success, every honest minded horseman will acknowledge. There was none of the fighting, bickering and general disturbance, which have been the chief characteristic of our races for several years. One young man who attempted to give orders to the judges was promptly ordered off the track, and may consider himself lucky that his horse was allowed to run. The fact of the matter is, Mr. Editor, that some of our horsemen have no knowledge whatever of law or order on a race track, and up to the organization of the Jockey Club were accustomed to have races "jug handle style"—all on one side. But that is all done away with and hence forward we will have straight and honest races or none at all. The sooner these soreheads make up their minds to it, the better for the racing interests of the Hawaiian Kingdom. Oahu criticizes the officiating judge severely, but I would ask who would he have to replace them? Certainly not the owners of horses entered for the races or some of his sorehead brethren. The judges were selected by the Jockey Club with the greatest of care and after considerable debate, and were the most impartial who ever graced a judges' stand with their presence.

In reference to the two-mile dash that it was won by Waterford there is no doubt whatever, Oahu to the contrary, for right from the start Waterford led at least eight lengths from Idle Girl, continued to lead till coming down the quarter on the last mile, when Idle Girl drew up and until a few feet from the wire the two horses were neck and neck. The rider of Waterford, seeing that it was likely to be a dead heat, made a grand effort and lifted his horse a neck ahead under the wire. Taking the running of Waterford all through and the fact that he finished on three legs (one hind leg being so sore that he could not place it on the ground at the finish), also the great disparity of age, Waterford being nearly fifteen years of age while Idle Girl is coming five years, entitles him to a double victory.

Another of Oahu's effusions, deserving of contradiction as being an unscrupulous falsehood, is where he says that Mr. Dodd withdrew his horse on account of the Judges deciding a dead heat. The facts are that the driver of Dodd's Thomas H. made each a glaring attempt to have things his own way that the Judge ordered Mr. Dodd to remove him and place another driver in his place. As no one volunteered to replace him the horse was withdrawn. The statement made by Oahu that owners of horses were allowed access to the Judges' stand during the pendency of a heat in which they were interested is another unmitigated falsehood, and is on a par with the balance of the untruths with which he has attempted to stuff the readers of the BREEDER AND SPORTSMAN.

It is much to be regretted that when men lose money on a horse race they must needs blot their grievance to the world by vilification of Judges and Jockey Club. It is the utterances of such as these that is fast bringing horse racing into disrepute. Every true horseman takes loss on a race with the same equanimity as if he had won. VERITAS.

HONOLULU, July 30th.

## Trotting at Portland.

CITY VIEW PARK, August 2d, Match for \$1,000 a side.  
Oneco, h. c. 3 years, by Altamont, dam Belle Price, by Oneco, h. c. 3 years, by Hambletonian Manbrino, dam Susie S., ch f. 3 years, by Hambletonian Manbrino, dam Bellefounder Girl—J. Sorenson. (Pender) 1 1 2 2 2  
Time, 2:47½—2:47½—2:45—2:45—2:44.

These colts were matched again to trot to-day—August 16th.

The ch s Little Wonder, trotting record 2:30, by Blue Bull, having shown a 2:10 clip on a pace, has been put to pacing.

Bay Frank is being worked again and is reported to be doing very well.

Up in Idaho they are having great sport out of race cow ponies.

### Entries at Chico—Notes from the Track.

EDITOR BREEDER AND SPORTSMAN: Chico will have the best fair this Fall that has ever been held here, at least from a racing point of view, as will be seen by the list of entries herewith, furnished by the kindness of our President, Dr. C. C. Mason. The track is in better condition than I have ever seen it during the last five years. It is not fast, but deep enough to be perfectly safe. Mr. Sherman plowed it up last Fall and sowed it with rye, and the experiment proved a success so far as keeping it soft is concerned. There was no running race filled and there will be but one for district horses.

At the track Marion Biggs, Jr., has the following under the supervision of Harry Isom: Pasha, bay colt, 2 years, by Echo, dam Fashion Filly, by Correct, son of Belmont. This colt was bought at Mr. Haggin's sale, is a perfect picture of the old horse, and is moving well.

Next is the chestnut mare Fawn. Mr. Isom had forgotten her pedigree. [By Yorktown (son of Speculation) dam by McCracken's David Hill.—Ed.] She was bought at Mr. Valensin's sale.

Grey gelding, 3 years, by Remero. Cbarley Sherman has Chevalier, by Brigadier, dam by Billy McCracken.

Bay colt, by Brigadier, dam by California Dexter. Chestnut colt Geo. Wapple, by Brigadier, dam Lulu, by Copperbottom.

Bay gelding Woodchuck, by Cal Star, dam the dam of Carrie T.

Bay gelding Sharp, by Washington, dam by Signal. Chestnut filly, 2 years, by Brigadier, dam by Billy McCracken.

Mr. Palmer Garrett has May Queen, dam by Gen. Taylor. [Our correspondent does not give description or name of sirs.]

Grey gelding Ben, by Blackbird, dam Flora, by Geo. Taylor. Brown mare Bell Kimball, by Young Hiram Woodruff. Chestnut colt Wallace G., by Plumas, dam Princess, by Ethan Allen, Jr.

Bay colt Duster, by Tilton Almont. Black colt, by Buccaneer.

#### THE ENTRIES.

The following is a list of the entries for the fair meeting:

No. 1—For two-year-olds owned in the district. Bell A., by Tilton Almont, dam unknown—W. R. Merrill. Piedmont, by Tilton Almont, dam Annie B.—W. M. Billups.

Wallace G., ch c, by Plumas, dam Princess—W. Garrett. Maud Sherman, ch m, by Brigadier, dam by Billy McCracken—Chas. Sherman.

Pasha, b c, by Echo, dam Fashion Filly, by Correct—M. Biggs, Jr. Brown colt by Singleton, dam by Gen. Reno—J. T. McIntosh.

Black filly by Singleton, dam Mattie Solomon, by Blackbird—C. L. Deuman.

No. 2—2:30 class. Fred B., by Tyler's Black Hawk, dam by Jim Browne—Chas. Schlutins.

Loud, by George M. Patchen, Jr., dam Flora—S. L. Dauels.

Belle Spencer, b m, by Black Ralph—E. V. Spencer. Ned Forrest, ch g, by Blackbird—D. M. Reavis.

Telegraph, by Tilton Almont, dam by John Nelson—J. T. McIntosh.

Berlin, by Blackbird, dam Addie Lee—Geo. Martin. Fred Arnold, by Nephew, dam Fannie Fern—W. M. Johnson.

Ralph B., by Johnny Bull, dam by Honest John—W. H. E. Smith.

Magdalena, by Peerless, dam unknown—D. C. Horton. Frank L. formerly Orphan Boy—Thos. McEvoy.

No. 6—For yearlings owned in the district. Climax, by Tilton Almont, dam by Belmont—W. R. Merrill. Maud Sherman, by Brigadier, dam by Billy McCracken—C. Sherman.

Bay colt by Singleton, dam Susie Brown by Blackbird—J. T. McIntosh.

No. 7—2:35 class. Sleepy Jim, ch h, by Brigadier, dam by Norfolk—John Schafer.

Fawn, ch m, by Yorktown, dam by McCracken's David Hill—M. Biggs, Jr.

Loud, by Geo. M. Patchen, Jr., dam Flora—S. L. Dauels. Ned Forrest, ch g, by Blackbird, dam unknown—D. M. Reavis.

Telegraph, b g, by Tilton Almont, dam by John Nelson—J. T. McIntosh.

Fred Arnold, h g, by Nephew, dam Fauny Fern—W. M. Johnson.

Ralph B., by Johnny Bull, dam by Honest John—W. H. E. Smith.

Magdalena, by Peerless, dam unknown—D. C. Horton. Frank L., formerly Orphan Boy—Thos. McEvoy.

No. 8—For all single buggies in the district. Lady Clark—W. J. Morgau.

May Queen—P. Garrett. Bell Kimball—W. A. Tetrean.

Sally McKim—J. T. McIntosh. Verona—C. L. Denman.

Victor—Henry Fink.

No. 12—For two-year-olds in the 3d and 13th districts. Bell A., by Tilton Almont—W. R. Merrill.

Piedmont by Tilton Almont—W. M. Billups. Major Merritt, b c, by Tilton Almont, dam by Belmont—Chas. Merrill.

Maud Sherman, by Brigadier—C. Sherman. Wallace G., by Plumas—W. Garrett.

St. James, b c, by Singleton, dam Susie Brown—J. T. McIntosh. Starlight b or br c, by Singleton, dam by Blackbird—C. L. Denman.

No. 13—Free for all. Huntress, ch m, by Admiral—W. B. Todhunter.

Frank L., formerly Orphan Boy—Thos. McEvoy.

No. 14—Pacing, 2:20 class. Fred Ackerman, b g, by Washington, dam by John Nelson—J. T. McIntosh.

Prince, b g, by Messenger Chief, dam by Belmont—S. C. Tryon.

Shaker, b g—M. F. Odell.

Robert E., by McCracken's Black Hawk—W. Dudley.

In place of the running races that did not fill there will be substituted a race for district three-year-olds; a purse for the three-minute class and one for classed horses, to be named by the directors during the week. OCCASIONALLY.

Chico, Aug. 7th.

### State Fair Fixed Events.

The fixed events of the State Agricultural Society for 1885 and 1886 closed with the following nominations:

No. 1—California Breeders' Stake—For foals of 1882, to be run at the State Fair of 1885. \$50 entrance p. p.; \$300 added, of which \$100 to second, and \$50 to third. One mile and a quarter. Nine subscribers.

W. B. Todhunter, br f Minnie C., by Compromise—Mollie Stockton.

Palo Alto Stock Farm, b c Robin Hood, by Shannon—Robin Girl.

Palo Alto Stock Farm, b c Garland, by Shannon—Sallie Gardner.

Palo Alto Stock Farm, b c Valiant, by Mouday—Lady Evangeline.

Palo Alto Stock Farm, b f Playmate, by Monday—Plaything. Rancho del Paso, blk c Hidalgo, by Joe Daniels—Electra.

Rancho del Paso, ch c Tyrant, by Great Tom—Moselle. James Mee, ch f Mischief, by Tbad Stevens—Katie Pease.

H. C. Judson, b c Billy Ayres, by Shannon—Lady Clare.

No. 2—Maturity Stake—For four-year olds in 1885, to be run at the State Fair of 1885; \$100 entrance; \$25 forfeit; \$300 added; second horse, \$100; third, \$50. Three miles. Three subscribers.

Palo Alto Stock Farm, ch f Glendair, by Norfolk—Glendew. M. M. Allen, ch c Prince of Norfolk, by Norfolk—Marion.

H. C. Judson, blk c John A., by Monday—Lady Clare.

No. 3—California Annual Stake—For foals of 1883, to be run at the State Fair of 1885; \$100 entrance; \$25 forfeit; \$250 added; second horse \$100; third \$50; 1 mile; 18 subscribers; Hill & Gries, b f, by Wildidler—Mary Wade.

R. P. Ashe, ch f Minnet, by Norfolk—Neapolitan. W. B. Todhunter, b f May Blossom, by Joe Hooker—Maggie S.

W. B. Todhunter, ch c Amphion, by Norfolk—Illusion. W. B. Todhunter, ch c King of Norfolk, by Norfolk—Mariou.

W. B. Todhunter, ch c Bonanza Jim, by Norfolk—Mattie Glenn.

W. B. Todhunter, ch c, by Joe Hooker—Countess Zeicka. Palo Alto Stock Farm, b c Whittier, by Flood—Lizzie Whips.

Palo Alto Stock Farm, ch c Gardey, by Flood—Sallie Gardner.

Palo Alto Stock Farm, b c Plato, by Shannon—Planetia. Palo Alto Stock Farm, b f Robin Lass, by Flood—Robin Girl.

Palo Alto Stock Farm, b f Keepsake, by Flood—Katharion. Palo Alto Stock Farm, b f Guenn, by Flood—Glendew.

Rancho del Paso, br c Ben Ali, by Virgil—Ulrica. Rancho del Paso, ch f, by Longfield—Belle Dale.

Thomas G. Jones, br c imp Gold Barb, by Goldsbrough—Icittilla, by The Barb.

H. C. Judson, b f Patti, by Wildidle—Nettie Brown. Hill & Gries, b c by Hardwood—Maid of the Mist.

No. 4—California Derby Stake; for foals of 1883; to be run at the State Fair of 1886: \$50 entrance, p. p.; \$300 added; second horse, \$100; third, \$50. One mile and a half. Eighteen subscribers.

Hill & Gries, b f, by Wildidle—Mary Wade. Hill & Gries, b c, by Hardwood—Maid of the Mist.

R. P. Ashe, ch f, by Norfolk—Neapolitan. W. B. Todhunter, b f May Blossom, by Joe Hooker—Maggie S.

W. B. Todhunter, ch c Amphion, by Norfolk—Illusion. W. B. Todhunter, ch c King of Norfolk, by Norfolk—Mariou.

W. B. Todhunter, ch c Bonanza Jim, by Norfolk—Mattie Glenn.

W. B. Todhunter, ch c Joe Hooker—Countess Zeicka. Palo Alto Stock Farm, b c Whittier, by Flood—Lizzie Whips.

Palo Alto Stock Farm, ch c Gardey, by Flood—Sallie Gardner.

Palo Alto Stock Farm, b f Guenn, by Flood—Glendew. Palo Alto Stock Farm, b f Robin Lass, by Flood—Robin Girl.

Palo Alto Stock Farm, b f Keepsake, by Flood—Katharion. Rancho del Paso, br c Ben Ali, by Virgil—Ulrica.

Rancho del Paso, b f Precioso, by Gleneig—Stamps. Rancho del Paso, ch f, by Longfield—Medea.

Thomas G. Jones, br c imp Gold Barb, by Goldsbrough—Icittilla, by The Barb.

Captain A. J. Hutchinson, ch f Eda, by Hockhocking—Eva Coombs.

### The Classic Races of England.

Under the heading of "Are our classic races in danger?" the Country Correspondent in *Bell's Life* thus holds forth:

The races I have learnt to consider classic are the Derby, the Oaks, the St. Leger, the Two Thousand and the One Thousand, the Ascot Cup, the Goodwood Cup, and the Doncaster Cup. As a well wisher of racing I should like to see all these events materially increased in value. They are mostly established by sportsmen who could have had no thought of gain. The St. Leger was the outcome of an after-dinner chat, when five or six gentlemen present agreed to put down a sweep-stakes each for a race to be called after one of their number. The Derby was agreed upon in something the same way by a few sportsmen who used to run matches on Epsom Downs, and out of compliment to the Earl of Derby, who at that time hunted staghounds over the Surrey Hills; the race was called after him, and the sister race after his lordship's seat, the Oaks. The Doncaster Cup is the oldest race in existence, as under the title of the Gold Cup (value 80 sovs.) it was established in 1766. The first race was won by Lord A. Hamilton's Charlotte, the conditions being four mile heats, and they so continued for several years until four miles in one run was considered sufficient, and the stake increased to 100 guineas. Nearly all the great celebrities known on the turf, both in horses and jockeys, have contended for Doncaster Cups. Alonzo and Orville fought it out with John Jackson and the senior Edwards as their pilots, more than eighty years ago, and since that date what finishes have been seen for the old-established cup between such horses as Fulford and Silenus, The Juggler and Otho, Mercutio and Lottery, Lottery and Longwaist, Retriever and Medoro, Volteiger and the Flying Dutchman; and what classic animals have made up the fields when notable ones like Beeswing, Touchstone, and Venison were stripped on the same afternoon. The Ascot and Goodwood Cups were later institutions, but the last-named was run as early as 1812, and was doubtless modelled on the conditions of the Doncaster Cup; whilst the Ascot Cup may probably be the offspring of the King's Plate, run as early as 1809, for horses that had regularly hunted with His Majesty's Staghounds, and that had never won a plate or match, distance two mile heats, 168 pounds each. Anyway the Goodwood and Ascot Cups for the last sixty years have been the events chosen for our best and stoutest horses, and their records bring back to memory

the names of Priam, Fleur de Lis, Camerine, Rowton (the last two the dead-headers of 1832), Glancus Touchstone, Harkaway, Charles XII, Alice Hawthorn, The Emperor, etc. Our Cup horses form a glorious scroll down to date, and it will be a very bad day for the turf when a Gosforth Park Gold Cup or Kempton Park Grand Prize make the events upon which the best deeds of the horses just named have rested look small and insignificant by comparison. Our great three-year-old races have hitherto, as it were, maintained themselves as when first established; a heavy sweepstake was sufficient to meet the requirements of their supporters. For the Derby it could, of course, have been nothing but a sweepstake, as there was nothing at Epsom to support a race; and at the first anniversary it is reported that a few people assembled on the Downs to see a new race got up by several sportsmen. As it became popular for Londoners, there was a difficulty to be met in finding funds for a sufficient police force to keep order, and at one time £100 was deducted from the stake for that purpose. Then it took the character of a great national event and holiday, and, of necessity those in whose hands the property and control were vested became rich and thriving. It is now a prosperous company, and Grand Stand shares have a big market quotation. No complaint whatever can be made against the executive, as it is extremely liberal in the bestowal of funds on the Epsom programme; but still it has been thought expedient to allow the Derby to live on its own prestige, whilst another stake for three-year-olds has been established on which a handsome amount of given money is bestowed. Here, I think, is the mistake, as it would have been better to give the 2,000 sovereigns now bestowed upon the Epsom Grand Prize to the Derby. Taking the last ten years the Derby has averaged over 5,000 sovereigns as value to the winner. With an increase of stake there should be no loss in entries, and so the great race might be well maintained to a standard of £7,000, though so far as that goes the Epsom executive could more easily than any other race committee in England make it of equal value to any other stake that has been proposed. There is now a difficulty between the Jockey Club and owners of horses about the time of entry for the Derby. Northern breeders want the date postponed until after the Doncaster races, so as to free breeders for sale from the obligations of entering their yearlings. It is urged that in postponing the date of entry the number of entries would be much decreased, as a lot of yearlings are tried before September. I fancy, however, that this fear is much exaggerated, as very few would be satisfied with a yearling spin to decide the future merit of a high-bred one, and Derby nominators as a rule like to enter everything they have for fear of missing a chance, as the best horses of the year have on several occasions been left out of the entry. Vedette was one, Fisherman another, and a very late instance has been Scot-Free. A good sum of given money would a great deal more than meet the loss, and the time has come when some of the large amounts brought into the coffers of the Epsom Grand Stand Company by the Derby should be devoted to maintain the world-wide prestige of the race.

If the Two Thousand had the appellation bestowed upon it, because the Jockey Club gave that amount of added money, that would meet the case exactly, and the same remark would apply to the One Thousand by that amount being awarded in a similar manner. Our greatest racing authorities have it in their hands to hold their own against all rivalry, as a 10,000-sovereign stake will not draw like a Derby, a St. Leger, or a Two Thousand, so long as the prestige of these events remain intact; but their glories may fade if they become of small worth to racehorse owners in comparison with other stakes under cheaper conditions of entering, and time and continued prosperity might give them classic associations as years roll on.

### Punishing the Innocent.

If evidence were wanted of the utter ignorance on the part of the general public in matters relating to the rules and principles of racing law and of the turf, one need only mix in the throng which gathers in the grand stand each day at Monmouth, Brighton or elsewhere. It proves that our people have not as yet learned their A B C of racing, and the fear is they never will, if they depend upon the daily papers to teach them. With few exceptions, the representatives of these journals are not only destitute of the knowledge of racing but have not enough tact to conceal the fact. Their whole aim seems to be to seek satisfaction for the few miserable dollars they have lost in betting by painting owners, trainers, jockeys and officials no better than an organized handitti, and in language suggesting "the early pioneer habits of Southern Illinois," rather than the model English expected from such as are supposed to cater to "the best people."

The result of this is that the people are misled. They presume to differ with the judges on points of racing law, of which they are in the utmost ignorance, and to enact scenes of boisterousness ill-suited to the occasion. Take, for example, the Itaska race. In the judgment of most people Armstrong pulled the horse. We were among those who so believe, and consider it the most unskillfully executed piece of work we ever beheld. Had the judges shared our opinion we do not doubt they would have punished him, but they did not. But the worst feature of the affair was that the crowd surrounded the Judges and demanded that the bets be declared off. A greater absurdity was never heard. Even had Armstrong been punished, the judges could not, in equity, declare bets off. Such a proceeding might answer in a frontier settlement where Lynch law prevailed, but not in a community where law and order has sway. The only case on a first-class race course where such a precedent can be found was in the Bayonet-Vauxhall race, for the Saratoga Cup, of 1869, in which the judges, gentlemen selected more for their respectability than their knowledge of racing law, declared the bets off, and offeuded against the whole theory of racing. By declaring bets off more innocent than guilty parties are made to suffer for what they had no hand in.—*N. Y. Spirit.*

Superba is the favorite for the Doncaster St. Leger, to be run September 10th. The weights have been altered this year, and the mares now only receive three pounds in place of five pounds from the colts. The colts carry the same weight, 126 lbs., as they did in the Derby, but the fillies put up 123 lbs. instead of 121 lbs. as formerly.

The owners of Johnston and Richball state that they are willing to make a four-ounered race with any pacers or trotters in the country, at \$5,000 each.

The Goodwood Stakes, run in England, July 29th, was won by Stockholm, Florence second, Loch Ranza third. Betting was 16 to 1 against the winner.

In the 2:25 class, at Cleveland, John Turner was thrown out from behind the mare Lady Alert, but fortunately the General turned right side up with care.

## Maud S. and Jay-Eye-See.

(S. F. H. in Live Stock Journal.)

The performances of these two leading trotters have made them rivals for the championship, in public opinion. There is only one half-second difference in their records, and both have accomplished the hitherto-unequaled feat of trotting to harness a full mile in less than two minutes and eleven seconds, without a skip or break. Maud S. has the faster record, but she was two years the senior of the gelding when he trotted his wonderful mile in 2:10 $\frac{3}{4}$ , in his five-year-old form. She has eclipsed all former records. She has trotted the fastest first quarter, the fastest second quarter, the fastest third quarter, and the fastest fourth quarter. She has scored the fastest first mile, and the fastest second mile, and the fastest third mile. Like Ten Broeck among racehorses, at all distances and heats that are now popular upon the turf, she is without a peer among trotting horses. But the little black gelding, Jay-Eye-See, although four years her junior, in his five-year-old form, trotted so dangerously near to her very best record—and this season he is coming to his speed so rapidly and so early in the season, that the honors of the reigning queen are in great jeopardy of being wrested from her diadem. This Spring—early in June—both have shown that they are in almost perfect form. Upon the proverbially fast course of Cleveland, especially prepared for the trial, Jay-Eye-See has shown a full mile in 2:12, while Maud S., with equally careful preparation, has trotted over the slower course of Fleetwood in 2:13 $\frac{3}{4}$ . Taking into consideration the disparity of courses, the performances are about even in point of speed. Fleetwood has a descent from the judges' stand to the half-mile pole of twenty-seven feet, and then the enormous disadvantage of the same upward grade of twenty-seven feet from that point to the finish. It is speed that wears out machinery, whether it be the locomotive or animated mechanism. Many a horse can go down to the half-mile pole at Fleetwood with almost the speed of the wind, but when he is called upon to maintain his brush of speed while climbing the up grade, and dragging the weight of both vehicle and jockey, which, on the first half of the course added to his momentum to increase his speed, then he is apt to show his distress, and his limbs and feet to flag with perceptible weariness. Never has Fleetwood been trotted in better time than Trinket's 2:14 till Maud S. beat it one quarter of a second, in June last.

Jay-Eye-See measured his capacity on the same course, last year, and was so hurried by the descending ground of the first half mile, that he broke from his trotting action, and for the first and last time in his history, he was steadied by the application of toe weights. Maud S. made her performance without a break throughout the entire mile. This proves the reliable steadiness of the queen, and argues that she is sound in physical capacity as well as determined in level-headed ambition to do her best, if she is given a fair opportunity by her singularly whimsical owner.

In methods of training and general treatment, Jay-Eye-See has enjoyed superior advantages to Maud S. He has been driven only on first-class mile courses, first at Louisville and then at Cleveland, while Maud S. was subjected to training on the half-mile course of Chester Park, and to trials on the exceedingly unfavorable course of Fleetwood. Moreover, Jay-Eye-See has not been annoyed or disturbed by a change of drivers. He has only been forced to become familiar with the temperament and methods and commands of a single driver, who has proved himself to be a master of his greatest capacities. No road work, no pulling of heavier vehicles than a sulky, no dragging of slower horses than himself to the pole, no imperious demands of an owner who has not the consideration and skill of a professional trainer, but hurries him along over uneven roads till he shows the evident wear and tear that renders decrepit all road-horses that can move in the twenties, has ever proved to be his hard fortune. He is strictly a turf horse, enjoying all the advantages and care of a first-class turf horse. Notwithstanding this extra nursing, he has a peculiar nod in front, in his exercise, that may be more a habit than a limping step, for he warms out of it as his speed increases; and when he is rushing along with that marvelous momentum for which he has become famous, he strikes the ground with a firmness that would indicate either absolute soundness or the possession of an ambition and courage to forge ahead that brooks no delay from physical infirmities. Some horsemen regard this well-known nod as merely a turf habit. It is the practice of many turf celebrities, but, sooner or later, the habit becomes more confirmed, and the horse is retired with a decided lameness in the halting foot. Certain it is that this nodding would be looked upon with alarming suspicion if Jay-Eye-See had been subjected to the severe road treatment of Maud S. She has been a turf horse, a single roadster, and a pole horse, at varying intervals. From the careful almost paternal solicitude of Bair, whose professional pride is wrapped up in her success, she has been subjected to the Herculean, imperious strength of Carl Burr, to the strangely unsuccessful manipulation of Dan Mace, and to the impatient, unskillful handling of her wealthy owner. She has pulled Early Rose and Aldine, and other trotting horses of his stable; she has played road back at Saratoga, and display coach in Central Park; she has trotted in condition and out of condition at Fleetwood, till she has several times become so evidently the worse for wear that she actually walked on her toes behind, and did not let her heels touch the ground. By personal observation, the writer knows that such was her condition last Fall, when she came to Chester Park for the Winter. It has been the work of six months' nursing and careful handling to enable her flexor tendons to relax sufficiently to thoroughly articulate her hind feet; so that when she was thoroughly cooled out after her recent great trials she was as sound as when, in colthood, she roamed over the pastures of "Woodburn."

This unsoundness is not a matter of surprise to any considerate horseman. Any horse that can trot with the wonderful speed of Maud S. cannot be subjected to the stones and unevenness, to the draft hurdens and the pulling and handling, both single and double, of rough road work, and still retain, *much less improve*, in physical soundness and capacity for speed. Ever since Maud S. has been four years old, she has been subjected to these varying misfortunes. For six years she has suffered from this demoralizing treatment. That she came out this Spring in faultless form, that she steadily improved in speed as the season advanced, dropping from 2:18 to 2:16, and then to 2:13 $\frac{3}{4}$ , in three successive weeks, proved her marvelous recuperative capacity, and the possession of speed that would have been attested by such a record as would not have been reached for many years if she had enjoyed the undisturbed turf advantages of St. Julien, Jay-Eye-See, and Trinket, and all other first-class track horses.

The turf community read this Spring, with great interest, concerning the rapid trials of these two great turf celebrities—Maud S., a mile in 2:13 $\frac{3}{4}$ , and Jay-Eye-See the same distance in 2:12, and that, too, in June, when 2:20 for either one would have been a splendid performance. The sensation of

the year, it seemed, would be the meeting, on various courses, of these two renowned horses, to dispute for the ascendancy, in which all previous records would be eclipsed, before which the one excellent performance—of Johnson, the pacer—would pale, and the records of trotters with running mates would grow dim, and even the enormous strides of the running horse would be more nearly approximated than in the past. Writers in turf papers universally praised the great trials these remarkable trotters had recently made, and looked forward with impatient eagerness to the prospective contest of these turf giants. But alas! the morning following the evening of Maud S.'s great trial brought the imperious summons from her owners to her appalled trainer to deliver her immediately from the confines of Fleetwood to her own stable, with all her traps, and this unlooked-for demand was followed by the equally strange announcement that Maud S. was purchased exclusively for the use of her owner, as a road horse. Then came the challenge of the owner of Jay-Eye-See to trot Maud S., either for money or exhibition. It was clothed in respectful, considerate language. It was just such a challenge as Col. Johnson, of Virginia, would have been proud to accept, with the clear, ringing defiance that marked the correspondence which led to the famous four-mile race between Old Boston and Henry. It was just such a gauntlet as would arouse all the pride of ownership a brave man has in a splendid race-horse that he believes to be invincible.

But the challenge awoke no such defiance in the breast of the owner of Maud S. With pitiable timidity, he declares Maud S. is exclusively his road mare, and that the challenge of Mr. Case is an exhibition of impudence! Imagine his brave father, the unflinching old commodore, returning such a childish answer. He boldly trotted his favorite gelding, Mountain Boy, against the mighty mare Lady Thorne, and all other formidable rivals, without the least hesitation. But his less courageous son has placed himself in a position of singular inconsistency with reference to Maud S. If he was a humble disciple of the lowly Teacher of Galilee and was conscientiously opposed to horseracing, either for money or for glory, then we could admire his unflinching Christian principle, as we do the life-long persistence of Mr. Robert Bonner in refraining from turf contests; but the restraints of Biblical injunctions, I fear, have no such control over the owner of Maud S. When he purchased Maud S., she was unstained by turf racing. He has given her all the track records she has ever won. While his property, she trotted a match race against Trinket, and races for money against fields of horses, and exhibition trots against time, all for money, which was taken as eagerly as Judas ever received the thirty pieces of silver. Thus she has gone through, while his property, the whole routine of races known to the turf, match races, and contests with fields of entries, and hippodrome exhibitions for special purposes, in which she has made the most brilliant record in turf history. She has attained to an unequalled rank. Like the champion in all sports, she is the high mark of all emulation, and, according to all precedent, from the days of tournaments to those of baseball, as long as she wears the diadem that she has won by her prowess, it is legitimate for any worthy rival to challenge her right of continued possession by actual trial on the race course. The challenge of Mr. Case was not an impertinence. In the sense of true chivalry, she has no right to decline to take up the gauntlet. When Jay-Eye-See had indicated his right to challenge her, by reason of his record being only one-half a second slower than hers, and his public trial, this Spring, being better than hers by nearly two seconds, she had no right to decline the contest, especially as she, like him, was once again in superb condition to trot for the supremacy.

But her owner has preemptorily declined for her, with the graceless addenda of a public insult to the owner of her rival who has dared to challenge her, and, by inuendo, an ill-advised sneer at the less commanding size and beauty of conformation of her rival. He declines not from conscientious scruples, nor from any infirmities or want of condition of his mare. The average reader will not go astray in assigning a reasonable explanation of such conduct, and yet there is not the least cause for timidity. Maud S. was never more overflowing with trotting ambition and trotting capacity than she is to-day. She has been skillfully wintered and so gradually brought to her speed, that she is able to show greater progress thus early in the season than ever before in her career. Before she left Chester Park she had shown three miles in 2:32, the second in 2:28, and the third in 2:24. Then she was taken to Fleetwood and trotted a trial mile once a week, with such results as 2:18, 2:16, 2:13 $\frac{3}{4}$  to her credit. In all of these performances she finished full of courage, with a reserve of speed that was perceptible to astute horsemen. The selection of the track for these trials was unfortunate. The policy of forcing her down to the half-mile in 1:04 $\frac{1}{2}$  was equally unwise. She had not been given fast miles enough to justify the expectation that she could keep up a proportionate rate of speed on the upward grade of the concluding half-mile. There was a palpable necessity of making haste more slowly. She could have rated better a fortnight later. Maud S. is now ten years old, and is in full enjoyment of her splendid powers. There is nothing to indicate failure if she should start either against time or her brave little junior, Jay-Eye-See. She has trotted to the half-mile pole in 1:02, and if properly prepared by a sufficiency of trials there is nothing in her lineage and performances to cast a doubt upon her capacity, under the most favorable conditions of weather and track, to finish the last half-mile within two seconds as fast as the first. This would make the full mile in 2:06. When Jay-Eye-See would stare at that sign manual he would have no easy task to wrest from her the diadem of turf supremacy. It has recently been mooted that Maud S. would have the advantage over Jay-Eye-See on the homestretch. But this boast of superior endurance is unfounded unless her greater maturity would give her the advantage. In lineage and performances he has shown equal game with that of Maud S. The sire of Jay-Eye-See is full of the sticking quality. Not only does he inherit the everlasting endurance of the Hambletonians, but the dogged persistence of the American Stars, that goaded the Widow Machree on to win her race when she was so crippled that she had to be raised to her feet and supported while she was being harnessed. This cross has produced the redoubtable Dexter, game in mile heats or two-mile heats, and who would never have lowered his colors, if, like grand old Toppallant, he had been driven in four-mile heat contest. Then his dam was Midnight, by Pilot, Jr., while her dam was full of the stout blood of Lexington, and her granddam full of the stoutest blood of the invincible racehorse, old Wagoner. The thoroughbred blood lines of his maternal ancestry are richer, if possible, than those of Maud S. Certainly beyond the second dam they are more noted for great contests than are the Thornton's Rattler, and the Toppallant crosses in the pedigree of Maud S. It has been suggested, too, that her greater size, and relatively greater power, will cut him down as they

swing into the homestretch, as the mighty stroke of the grand Rarus cut down the hazy drum-beat revolution of the diminutive Molly Morris whenever they neared the distance stand in their races. But greater size and greater apparent wealth of muscles did not cut down Flora Temple in her day—and she measured only fourteen and a half hands high, at least two inches less than Jay-Eye-See—nor Goldsmith Maid in her day, although Fullerton, Bodine, Lucille Goldust, and Smuggler, and nearly all of her formidable rivals, over-topped her in size.

The dogma of incapacity to repeat from want of size, like many other dogmas that for years were accepted by turf habitués as infallible as canon law, has been discarded as utterly untenable. Maud S. has no advantage over Jay-Eye-See, simply because she measures three inches higher on the withers. Then, again, it has been suggested that the toe-weights would tell in a close race of broken heats against the mare. By actual test her toe-weights, straps and all, weigh only four ounces, while her front shoes each weigh only fourteen ounces. Her repeat miles have shown that she can keep up her balance stride and carry these weights without any evidence of leg weariness. If Jay-Eye-See has less height of portions, he carries less weight on his front feet, for each front shoe only weighs ten ounces, and no toe weight disfigures his outfit.

## Suspicious Business.

Complaints of unfairness are heard often this year, even from such carefully managed tracks as Monmouth Park. The New York Spirit says, that on the 17th ult. there was unusual interest, not to say excitement, over the result of the Barneget Stakes, for three-year-olds. A very select field of nine came to the post, and, while it cannot be said that the three-year-olds of the year are extra in quality, the contestants to-day were among its best. During the over-night betting Duchess and St. Sauveur had alternated as choice, but when the betting opened in "The Ring" Duchess was backed so stoutly as to leave no room for doubt that the many "friends of the stable" had got "the tip" very straight. Duchess and St. Sauveur were stable companions, although the property of different owners, and this fact, singularly enough, had operated to keep many from betting on the race. But at last it was generally bruited about the grounds that the Duchess was the choice of the stable, having beaten St. Sauveur in a trial. Hardly had this become known when it was further announced that Billy Donohue, instead of riding Duchess, was to have the mount on St. Sauveur. This puzzled many, but the fact is Mr. Gehhard has first call on Donohue, a fact that parted him from the famous little brown mare that he has ridden in all her races. In reply to all questions the stable favored Duchess, and accordingly the mare was made a big favorite. She looked bright and brisk when she came out with St. Sauveur, but neither went beyond a canter.

The appearance of Bob Miles lent a new interest to the race, and many of the Western contingent backed him on the strength of his improved appearance, while Turk's party backed him for some money. Himalaya looked amazingly sleek, and his party made no secret of their belief that he would win. When the flag dropped Mike Donohue was very slow to get off with Duchess, and lost much ground. Himalaya cut out the work and led all the way until reaching the head of the stretch, where he suddenly stopped and St. Sauveur came out, with Duchess on the inside. There was some show of a finish, but St. Sauveur won, with Duchess second, Turk third.

St. Sauveur's reception when he returned to the scale was very cold, and only those who happened to have gotten on him applauded, while the others remained sullen, and not a few were disposed to say harsh things of Snedeker and Donohue, who, they alleged, had been only too anxious to circulate stories of the superiority of Duchess. We have no comments to make in this place further than to say that it was the most unsatisfactory result of the year. Duchess was badly and erratically ridden. Bob Miles and Himalaya were both cut down by St. Sauveur, as was Endymou, whose jockey, Olney, went into the stand and made complaint.

Aranza won the mile and a furlong handicap, taking the lead at the start and was never headed; but the fifth race threw the entire track into the wildest commotion. Itaska had been a great favorite in the race, but before the start we were warned that crooked work was intended. That Armstrong, the rider of Itaska, pulled the horse, almost every one who saw the race honestly believed. But the crowd, as usual, made itself foolish by surrounding the judges' stand and calling for the bets to be declared off, etc. The judges, however, were firm. They rightly refused to declare the bets off, but we think they erred in not punishing Armstrong.

The Washington Park Club of Chicago have decided not to have a Fall meeting this year. By next Summer the street-car line will run their cars to the gate, and another railroad besides the Illinois Central will have a branch extending to the enclosure. In addition, some improvements which have suggested themselves at the Park will be attended to. Among these is the changing of the three-quarter track so as to obviate the present rather abrupt turn. The club expects to have plenty of Eastern entries for next Summer's meeting, which will be the biggest thing of the kind in the country.

Rody Patterson, the starting Judge at Exposition Park Pittsburg, declared all pools and bets off on the 2:24 pace, and further, the Association declined to pay the amount of purse, claiming that a great fraud had been committed.

The famous pacers Johnston and Richball were matched July 31st for a race for \$5,000 within three weeks, date and track to be chosen by James Campbell, owner of Richball.

Majolica is in John Murphy's stables at Fleetwood. The only mile that he has had this season was a working one recently in 2:25.

In the absence of Peter Johnson, Budd Doble drove Westmont in the free for all pacing race at the Exposition Park, Pittsburg.

Lida Stauphoe, the great three miler, has received such an injury that she will probably be retired permanently from the turf.

Clingstone's leg still troubles him and it is feared that he will never be able to get to his record again.

Manager Crawford says very seriously that he believes Phallus to be as fast as Jay-Eye-See.

The Goodwood Cup, run in England, July 31, was won by St. Simon, Ossian second.

Sadie McNairy pulled up lame in a race at Saratoga, 28th.

Bay District Trotting Meeting.

The August meeting of the Bay District Association began on the 2d with the 2:22 class; Arab, Allan Roy, Albert W. and Vanderlynn marked for starters. The weather was delightful and the track as a rule fine, drivers complaining of two soft spots. Albert W. had the inside place, Allan Roy next, Vanderlynn third, and Arab outside. Mr. Goldsmith was to have driven Albert W., but being detained at Oakland by the accident to Monroe Chief, his place in the sulky was occupied by John McConnell (Buster Johnny) and it is due to McConnell to say that he handled his horse well. Albert W. has not shown such speed and general good behavior since his appearance on the turf. Not even in the campaign of 1882, when he made his record of 2:22 as a four-year-old under the tutelage of Jimmy Dewan. But the stallion was the "short of work" and lack of condition sent him back in the summary finally. Arab was the choice of the bettors before the start, but made awkward work of the first two heats. In the third he came to his speed, and won the race from that point very safely.

SUMMARY.

BAY DISTRICT COURSE, Aug. 2d.—Purse \$500; 2:22 class. Arab, b g, by Arthurton, dam Lady Hamilton—E. M. Fry 4 3 1 1 1 Albert W., b s, by Electioneer, dam by John Nelson—A. W. Waldstein 1 1 2 3 4 Allan Roy, g g, by Patchen Vernon, dam unknown—Jas. McCord 2 2 3 2 3 Vanderlynn b g, by Geo. M. Patchen, Jr., dam by Joseph W. Stow (Farrell) 3 4 4 4 2 Time 2:23, 2:23, 2:24, 2:24, 2:25.

Pools: first heat, Arab, \$75; Allan Roy, \$50; Adair, \$15. Second heat—Field, \$110; Arab, \$50, Allan Roy, \$55. Third heat—Field, \$60; Allan Roy, \$15; Arab, \$5. Fourth heat—Field, \$110; Arab, \$52.50; Allan Roy, \$10. Fifth heat—Arab \$100; field \$50.

On Wednesday the 2:40 class came on, and a great race resulted. It was an occasion of interest, for the reason that four green horses were to appear and the regular habitues of the track were filled with pleasurable expectation. The general public did not seem to care much about it and staid away, a mistake that the general public made more than once during the meeting. Guy Wilkes, James H., Blanche, Menlo and Col. Hawkins were starters for the purse, the first four new to the business of contending for money in a race. Col. Hawkins is the property of Captain Young, of Sacramento, and has been seen before on the track in slow races. Wilkes had the call in the betting.

First heat—Pools: Wilkes, \$100; James H., \$40; field, \$35. Blanche had the pole and a great deal of speed, that sent her around the turn with a lead that no other horse cared to dispute, and she won the heat by a sort of unanimous consent, James H. finishing second, Wilkes third, Col. Hawkins fourth, Menlo fifth. Time, quarter, 36; half, 1:12; mile, 2:25. Although the heat proved nothing as to the merits of the horses, it was one point scored in favor of the field, and that division took a step upward in the betting.

Second heat—Pools: Wilkes, \$100; James H., \$30; field, \$50. The field was well in a line when the signal sounded, but Wilkes and Blanche each intent upon the other soon shook off the other three. The mare had a head and neck the best of it at first but at the quarter pole the bay stallion was even with her; time, 36. Down the back quarter they went with scarcely a hair's breadth variation in position and at the half the watches showed 1:09. This second quarter of 33 gave the on-lookers an inkling of how hot the fight was over there. Blanche held her own bravely to the half mile but the pace told on her and within three lengths past the mark she broke up and made no further attempt to win the race. Wilkes jogged home with Hawkins second, Blanche third, James H. fourth, and Menlo fifth. Time: quarter, 36; half, 1:11; three quarters, 1:46; mile, 2:24.

Third heat—Pools: Wilkes, \$80; James H., \$11; Field, \$9. They got away well, Wilkes leading off with Hawkins close up, Blanche in a pocket, the other two well back. The favorite had an easy time beating Hawkins, and until three quarters had been gone made the pace as he liked, but in the stretch James H. came at him and carried him to the draw gate at a clipping gait, the gelding breaking there and dropping back. Wilkes, on the whole, had an easy heat of it, James H. finishing second, Hawkins third, Blanche fourth and Menlo as usual. Time: quarter, 36; half, 1:11; three-quarters, 1:46; mile, 2:24.

Fourth heat—Pools: Wilkes \$40; Field, \$6; Wilkes was first away, Hawkins closing in before the first turn was reached and securely pocketing James H. for the time. Hawkins couldn't stay there, however, and falling back in a break, left the coast clear for James H. to move up. This he did at once and at the quarter was at Wilkes' wheel. He settled in that place and Wilkes went to a break in his efforts to shake his adversary off. The stallion is what the stable calls a "dandy in a break," never losing an inch of ground and taking up his trot again with no appreciable loss of motion. On the turn Wilkes made a second break, but positions were unchanged until the straight road home was fairly entered, and then James H. began to move up. Every nerve was strained by both and twenty-five yards from the wire the favorite looked a beaten horse, but James H. loosed his hold when victory was in sight and Wilkes finished the race. Time: quarter, 36; half, 1:11, mile, 2:21. It was a great performance for both horses. James H. taking into consideration this had start trotted quite as good a mile as Wilkes and showed himself game to the last.

SUMMARY.

August 6th: purse \$500; 2:40 class. Guy Wilkes, b s, by Geo. Wilkes, dam Lady Bunker, by Mambrino Patchen—Win. Corbett (Goldsmith) 3 1 1 1 1 Blanche, b m, by Gray McClellan, dam by John Nelson—Win. Biber (Goldsmith) 1 3 4 4 4 James H., b g, pedigree not traced (Bayliss) 2 4 2 2 2 Col. Hawkins, b g, pedigree unknown—Capt. J. D. Young (P. Williams) 4 2 3 3 3 Menlo, b s, by Nutwood, dam by Hercules—R. T. Carroll (Farrell) 5 5 5 5 5 Time, 2:25, 2:24, 2:24, 2:21.

Friday was set apart for the 2:27 class, and if the 2:40 race was a good one it was only the prologue to the play. Of the eight entries six took part, viz.: Adair, Sister, Rarus, Jr., Tump Winston, Adrian and B. B.; position in that order. Sister was the favorite in the betting, notwithstanding Mr. Goldsmith's advice, publicly given, that he did not think his mare could win.

First heat—Pools: Sister, \$60; Adair, \$32.50; Winston, \$10; field, \$10. After many recalls they were finally sent away with Winston in a run. Sister and Adair went together to the quarter, when Adrian joined them, and the three kept close company to the half. Here Adrian broke up, and Adair assumed first place, which he held to the finish, Sister second by a length, Adrian four lengths further off and B. B. well inside the flag. Winston ran most of the mile and was distanced by the judges. Rarus, Jr., badly outclassed, failed to reach the distance pole. Time, 2:24.

Second heat—There was no material change in the betting. Adrian went away with a rush and took a good lead at once, B. B. second, Sister following, and Adair fourth, all strung out. On the turn Adair made a queer break, coming almost to a stop and at the quarter Adrian broke and fell back. B. B. sailed along at a swinging trot and led to the finish, with Sister second, Adair third and Adrian last. Time, 2:23. This was a showing of speed that sent the cautious ones to the pool stand, and hedging began.

Third heat—Pools: Field, \$75; Sister, \$47.50; Adair, \$27. B. B. was first away, but broke at the turn, Adair spinning ahead. He was soon joined by Adrian, and the two bays went down the back quarter like a double team, B. B. close behind and Sister last. At the half Adrian broke, Adair and B. B. following suit soon after. Around the turn Sister was the only one that was trotting. She came through next to the pole, and won the heat handsly, with B. B. second by two lengths, Adair third, Adrian fourth. Time, 2:25. Sister money began to recover from its fright.

Fourth heat—Pools: Sister, \$60; field, \$40; Adair, \$12. The start was exactly even, the black horse moving to the front before a hundred yards had been covered. Sister was pocketed on the turn, and at the quarter was two lengths behind the leader, but from there she gained steadily and beat him home after a lively wrestle, Adrian third, Adair fourth. Time, 2:28.

Fifth heat—Pools: Sister, \$40; field, \$12. Sister had the worst of the start and B. B. had it all his own way to the half, with Adair close up. On the further turn the black left his feet and Adair took first place, Sister pushing him up the stretch and finishing a good second, B. B. third, Adrian fourth. Time, 2:28. Adrian went to the stable under the rule. The race was getting very much mixed, and the pool buyers "scattered" a good deal. Backers of Sister put in some on the field and the fielders took a few pools on the favorite. It was an effort to play even if possible. The immediate B. B. party stood by their horse as they had got their money on with long odds against it and ganged by the rule of chances had much the best of it.

Sixth heat—Pools: Sister, \$40; field, \$12. The fog which had interfered somewhat with the previous heat had settled thick on the second and third quarters, and patrol judges were sent out on horseback to take notes. B. B. led off and forced Sister into a pocket at the outset. When the horses disappeared in the fog near the quarter pole, B. B. and Adair were even, but when they emerged from the cloud on the homestretch B. B. was leading by a safe distance, and he won in style, Adair second, Sister third. Time, 2:23. The patrol reported the heat trotted without a skip. The driver of Adair lodged a complaint of foul against B. B., the sulksies having collided slightly on the first turn. The judges, after hearing the testimony, decided that it was a bare touch, unintentional as to the driver of B. B. and disallowed the claim. The fog now came thicker and thicker and the judges declared the race postponed, although the drivers all wanted to go on, each confident that they could win the deciding heat. The horses went to the stable, leaving the outcome of the race in a haze more impenetrable than the mist that enveloped the track. At the pool room in the evening Sister held her place as favorite, and considerable business was done with Adair for second choice. When two o'clock came, on Saturday afternoon, the horses all seemed to have cooled out well, B. B. being particularly supple and in fine spirits. Sister and Adair were both declared by the drivers to be as good as they were the day before, and bettors didn't see their way any clearer than they had the night previous. The betting went on, Sister, \$40; Adair, \$20; field, \$20.

Seventh heat—Sister was behind when the word was given and B. B. went away full of trot and leading handsomely. On the turn Adair broke up badly and fell to the rear, B. B. having it all his own way to the finish; Sister, second; Adair, third. Time, 2:24.

The few who had had courage to stand by the black horse to the end made handsome winnings. The Sister party, although they coppered the mare at first changed their minds afterwards and got on in time to lose a large amount. The final decision roused that enthusiasm among the spectators that always marks the success of the short end.

SUMMARY.

Aug. 1st and 2d.—Purse, \$750; 2:27 class. B. B., blk g, by Millman's Bellfounder, dam by Vermont—Leiby & Aker (Donathan) 4 1 2 2 3 1 1 Sister, cb m, by Admiral, dam Flora—M. Salisbury (Goldsmith) 2 2 1 2 2 2 Adair, h g, by Electioneer, dam Addie Lee—E. H. Miller, Jr. (W. F. Smith) 1 3 3 4 1 3 3 Adrian, bs, by Reliance, dam Adrianna—J. M. Learned (Owner) 3 4 4 3 4 4 4 Tump Winston, cb g, by Primus, dam Lady Don—E. Dowser (Owner) dis Rarus, Jr., blk g, pedigree unknown—Armstrong & Carrington (Owner) dis Time, 2:24, 2:23, 2:25, 2:27, 2:28, 2:28, 2:24.

The meeting closed with a pacing race that was to all intents and purposes a walk over, leaving nothing like a contest to be described.

SUMMARY.

Same day—Pacing; 2:20 class; purse, \$500. Belmont Boy, cb g, by Nutwood, dam by Belmont—Jas. McCord (Donathan) 2 1 1 1 1 Johnny Wiegler, dn g (Brandow) 1 2 2 3 3 Sam Lewis, b g (Goldsmith) 3 3 3 2 2 Fairmont, br g (Kane) dis Time, 2:28, 2:27, 2:31, 2:30.

Entries at Marysville.

- No. 1. Trotting; 3:00 class. P. W. Dndley's Baby Mine, C. Schlentius' Lucy H., J. B. McDonald's Yuba Maid, James Littlejohn's Chris. No. 3. Trotting; for three-year-olds. Chas. Sherman's Chevalier, G. W. James' Peyton, W. F. Smith's Pansy, P. W. Dndley's Elite, Chas. Schlentius' Griselda. No. 5. Trotting; for four-year-olds. W. F. Smith's Thapsin, J. F. Schaeffer's Happy Jim, J. B. McDonald's Yuba Maid. No. 6. Trotting; 2:40 class. James Littlejohn's Chris, J. B. McDonald's Brigade. No. 8. Trotting; district yearlings. C. F. Taylor's Trevari, M. Toomey's Transit. No. 9. Trotting; 2:24 class. W. B. Todhunter's Huntress, W. F. Smith's Adair. No. 10. Trotting; for two-year-olds. S. K. Trefry's Apex, Charles Sherman's George W., W. P. Harkey's Sutter Boy, E. C. Jenken's Mill Boy. No. 11. Trotting; 2:30 class. E. V. Spencer's Belle Spencer, W. M. Johnson's Fred Arnold, W. H. L. Smith's Ralph B., J. T. McIntosh's Telegraph, J. B. McDonald's Hazel Kirke. No. 12. Pacing; free for all. M. F. Odell's Shaker, S. C. Tryon's Prince, W. B. Todhunter's Nevada, J. T. McIntosh's Fred Ackerman, P. W. Dudley's Robert E.

Freda Beaten at Monmouth.

At Long Branch on the 2d Freda started in the Palisade Stakes and got third place. The track was heavy, but the day fine. It seems a little strange from this distance that Holloway, knowing as much as he does about the filly, persists in making the running with her. From an even field she will rarely run with such tactics. She will do better when allowed to wait, and never failed at home to perform well when handled in that way. The following are the details of the race:

The Palisade Stakes, for three-year-olds, of \$50 each, \$15 forfeit, with \$1,500 added, of which \$500 to the second; winners in 1884, when carrying weight for age or more, of \$2,000 to carry 3 lbs.; twice, 5 lbs.; thrice, 7 lbs extra; of less than \$1,500 allowed 3 lbs.; of less than \$1,000, 5 lbs.; of less than \$500, 7 lbs.; maidens allowed 12 lbs.; one mile and an eighth.

D. D. Withers' b c, by King Ernest, dam Mimi, 113 lbs. (W. Hayward) 1 Mr. Kelo's b f Water Lily, by King Alfonso, dam Lily Duke, 106 lbs. (Meaton) 2 E. J. Baldwin's blk f Freda, by Wildside, dam Frolic, 113 lbs. (Holloway) 3 W. Stoop's ch c Tornado, by imp. Glenlyon, dam Estella, 107 lbs. (Spellman) 4 Dwyer Brothers' b c Burton, by imp. Billet, dam distraction, 111 lbs. (J. McLaughlin) 5 P. Lorillard's b c Leo, by Duke of Magenta, dam The Squaw, 111 lbs. (Olney) 6 Time, 2:00.

Betting in pools—Freda, \$100; the Mimi colt, \$60; Burton, \$25; Tornado, \$20; and Leo and Water Lily, \$15 each. In the books—7 to 5 against Freda, 5 to 2 against the Mimi colt, 5 to 1 against Burton, 8 to 1 against Tornado, and 12 to 1 each against Leo and Water Lily. The mutual pools paid, \$19.50.

To a good start Freda made the running, attended by the Mimi colt second, with Burton third, Tornado, Leo and Water Lily bringing up the rear. Freda led a length at the stand, with Burton second, a neck in front of Tornado third, followed by the Mimi colt, with Water Lily last. There was little or no change to the quarter pole. When in the backstretch the changes began. Freda led to the half-mile pole, Burton second, the Mimi colt at his side, Water Lily fourth, the other two out of the race. The Mimi colt now moved up, and at the three-quarter pole was even with Freda, while Water Lily was third. When well in the straight, the Mimi colt came away, and won handsly by three lengths, Water Lily coming strong, was second, a length in front of Freda third.

Stake Fair Colt Stakes.

Occident Stake for 1884; three-year-olds. Third payments have been made by the following:

- J. C. Simpson's Autevole. Rancho del Paso's Robert Lee. W. B. Todhunter's (formerly Valensin's) Griselda. The value of the stake is \$1,175. Divided into 60, 30 and 10 per cent. The Society adds a gold ep value at \$400. The Annual two-year-old Stake last payments have been made as follows: Rancho del Paso's El Monte. Rancho del Paso's Lohengrin. Ira L. Ramsdel's Lnela. L. J. Rose's Stamboul. J. N. Ayer's Addie E. G. W. Trahern's Paul Shirley.

The stake amounts to \$675, divided 50, 25, 15 and 10 per cent. The society adds \$500, \$100 to each winner of money, and \$100 to the stallion whose get wins first money.

Names Claimed.

By V. L. Forton, Oakland. LITTLE DIME for bay colt, strip in face, foaled April 20, 1884, by Eugene Casserly, dam by California Abdallah, grandam by Geo. M. Patchen, Jr.

The Australian bred colt Gold Barb, by Goldsborough, dam Icittilla by The Barb, entered by T. G. Jones in the fixed events of the State Agricultural Society, was expected to arrive by the last steamer, but instead of the colt came the news that he was dead.

THE KENNEL.

The Pointing Quality—Some Decided Opinions.

EDITOR BREEDER AND SPORTSMAN.—If you will allow me, I should like to write just once in regard to the pointing qualities in dogs. To explain my ideas fully will require really more space than you can well spare, but as I understand it, your paper is for the purpose of instruction, and this matter under discussion by several of your correspondents is certainly very instructing to all, more especially the younger sportsmen who wish to select field dogs for their own use. By reading every article they will gain some points from one letter and some from another and finally make their selections which I dare say will give them better results than they would have obtained had they not read your articles.

From a personal standpoint I certainly have no choice of sides, feeling that all the writers are gentlemen of the first character. I have a very slight acquaintance with "X" "Dorr" and Mr. Bassford and found them fine gentlemen, and have heard them all speak of Mr. Leavesly and others as the very first sportsmen in their State. So I conclude they are all great friends, no matter what may be their decision or ideas regarding the question at issue; therefore, with this explanation, I will proceed.

My experience with dogs has fully convinced me that with some breeds the pointing instinct is natural in fully 70 per cent of their issue, while others do not show over 10 per cent and some none at all. I have therefore come to the conclusion that any breed or strain of dogs not showing in fully 70 per cent. these natural qualities is not a suitable breed for the average sportsman, and should by all means be shunned by persons not having quite a considerable knowledge of breaking, unless they have means sufficient to employ professional breakers who, by steady, persistent work, will eventually make passable dogs of the inferior breed. But I have found, after securing this degree of perfection in them, they are always unreliable and unsteady at the opening of the season, requiring cuss words and ill temper to get them down to business, while those of the old steady pointing strains seem to take naturally to it each year. Another thing

I have also noticed and that is the dogs which point by natural instinct when mere puppies have the best noses and nearly always the best carriage and style, as well as the best natures and intellect, going to work almost without effort or instruction so far as actual work is concerned. The dropping to shot, wing and fur, and retrieving of course are not expected to be born in them, though there are many setters that drop to point. Summing up the case with these views, I have long since decided never to undertake to break or handle a pup again without these natural qualities and no amount of coaxing would make me accept one as a gift (no matter how long the pedigree) out of stock that did not show in its puppies fully 70 per cent. of natural pointers. There is such stock and plenty of it and I prefer to wait a little longer for one rather than take others on some one else's say-so, feeling that what time I lose in hunting up such a pup will be saved in the breaking, besides the greater pleasure in its work in the field. Now, of late years, the breeding of dogs in the East has been directed to the speed and staying qualities, because of the growing scarcity of game requiring the covering of larger range of country, and consequently more staying power to make a decent dog. The result is that they have extra fast, stylish, nervous dogs. Their pedigrees, of course, are long, tracing away back for fifty years and more and look well on paper, and when these dogs are placed in the hands of such famous breakers, as Whitford, Sanborn, Arnold Barges, Fred Taft, and dozens of others, they are made fine dogs, more from the efforts of their breakers than the dogs themselves. I have seen scores of puppies, for which good prices had been paid, coming from the different high bred kennels, fall into the hands of ordinary sportsmen, who knew but little of dog breaking and never did make their fancy dogs worth a cent, while I believe the same dogs would have been good in proper hands. So from this experience I say that for the ordinary sportsman take the home-bred dogs with more nose and climatical breeding, in preference to the fancy imported, for immediate use. At the same time I am greatly in favor of pedigree, but I want it well naturalized so that the organs of scent are well used to the cover and atmospheric changes in the climate in which we wish to use our dogs. About the only really great trial of these qualities was between Joe, Jr., and Gladstone. The former was called a native though both parents had pedigrees tracing back to England, while Gladstone was the bluest of the blue and a grand dog with a grand handler, and I believe far better than the handler of Joe, Jr., but old New Foundland Joe, Jr., beat him too easy in every kind of race. Gladstone was a remarkable dog but had the disadvantage of not being acclimated, a fact you will certainly all notice in a few years, and my word for it you will laugh at some of your dogs of to-day. They may not show as well on the bench, but will please you before the gun just as you are pleased with the horse that runs the fastest you lose sight of his build. Now there are dogs on this Coast I am satisfied, if their pedigrees are correctly given, which have the faculty of pointing by instinct, and there are probably many, but I will only mention those that have come under my observation. These are the Bassford Pointers; Dorr, of Truckee, Blakeslee's Gordons, of Humboldt House, Nevada, and Crockett's Gordons, and Crockett's Pointers, of Austin, Nevada. The Bassford Pointers, if bred from Bow and Dilley's Ranger stock, can't be otherwise than natural pointers, for these strains—at least the puppies coming from them I have seen, would all point naturally, and I have had two litters from Bow, bred to McFarland's Nelly, which was taken to St. Louis by myself and McFarland to breed—and the Dilley stock, while considered slow as compared with Bow and Faust, was essentially a natural pointing strain, and we had one sample at the Pacific Coast Field Trials, last year, in General Cosby's pup. If it wasn't natural qualities, what was it? The General, while going out in the wagon with some sixteen others, let his dog run all the way, twenty-six miles, and I mentioned casually to the crowd that they would have to look out for that pup as his style and action was nice. The General spoke up saying "Judge, that pup don't know a thing, never saw a quail and I shall be surprised if he don't run home." Adding, "I would give fifty dollars to see him make one point." I asked the breeder and was told Bow and Dilley's Ranger. I said, "General, I will bet you fifty dollars he makes a point before the meeting is over," but the General would not take it, but as all who were there know the General saw his pup do some as fine and staunch pointing as any dog ever did do, and had he run the second day instead of the first would have undoubtedly taken first. As it was he took third and earned it fairly. Again as to Dorr. Now Dorr never saw a California quail until the trials, and had not been hunted on any game for two years prior to the trials, still I fancy no Eastern crack would have beaten his last day's work and would have been bothered considerable with his first day's. All who were present agreed he won his honors. Now for Blakeslee's Gordons, at Humboldt House: I am informed none of the pups ever fail to point on their first sight of game. There is one here owned by Mr. Blossom, that will run hares and do all kinds of mischief and knows nothing but to retrieve ducks, still the other day he ran on a flock of sage hens by accident and the pup drew on them as nice as could be, showing the natural qualities to perfection and this being the first game bird he ever saw, and I'm sure his owner never saw a broken dog work on game in his life, therefore, there could be no training. Again, R. V. Kelly, of Winslow & Kelly, Market St., San Francisco, has an ill-bred Gordon, of the Crockett strain, Austin, Nev. This dog never had any breaking, only to retrieve ducks, still I have seen him as a pup as small you could put him in your pocket, point birds for hours and only move when they did, still I don't know that he ever saw a game bird in his life. He is an ugly looking brute, but has the nose, speed, and qualities for a worker if he had been trained. Again old Crockett at Austin, has some pointers which he has bred for years and I am credibly informed that every one of the pupa point grouse and sage hens by instinct. The old man, now nearly 70, tells me he would kill any pup of his failing to point at four months old. I could cite many instances in the East of men owning natural pointing strains and have had many myself, and especially one Gordon bitch that pointed a covey of quail when nine weeks old, I having taken her out in my coat pocket just for a ramble and this while standing in snow.

I see some claim pointing to be an acquired quality. Then why not train the fox hound for the purposes. Certainly he has better powers of scent than either setters or pointers. The same can be said of the blood hound and many other strains of dogs. The reason is they were not bred for this purpose, hence have not the pointing faculty bred in them or even the remote knowledge sufficient to make it possible to train them, though they will all hunt, the same as all horses will trot, but not to such a degree as those bred for the purpose. Now I had some proposition to make, and was going to lay some wagers, but that seemed vulgar, so I will do this, and if any man on the coast thinks he can teach

any dog to point properly, I will pay \$25 to any man who will show a dog of either of the following strains at the next Pacific Coast Field Trials that he has taught to hunt and point a covey or single quail in its wild state, on the same field run over at the field trials, and will allow him five opportunities to point—grey hounds, blood hounds, fox hounds Scotch terriers, English terriers, bull dogs or New Foundlands, and to show that all of the strains have intellect—the grey hound, perhaps, the least.—I will bet \$500 I will teach any of the same dogs in ten days the following ten tricks, or that F. A. Taft of Truckee can teach them ten tricks in ten days—jump over bar, lie down, roll over, stand on hind legs, sit up, stand on forelegs, retrieve ball, go lame, tip over chair and speak. Still I offer \$25 for two tricks and give two months to train in. I will also wager \$250 no man in California can train a thoroughbred greyhound to hunt and point a bevy or single quail in cover in its wild state, allowing five opportunities of twenty feet, to be performed at the Pacific Coast Field Trials one year from the present trials or as a proof of my theory I will agree to take a litter of Crockett's pointers at four months old, or a litter from Gen'l. Cosby's dog and Crockett's bitch, or a litter from Dorr and the Humboldt bitch or from Crockett's dog and Bassford's Queen, or Dorr and Briggs' Belle, and not allow them to see a California quail until they are four months old, and will agree to show 70 per cent. of the litter on a dead point the first day of my trial in five opportunities, if any of the gentlemen will pay the expenses of my self, dogs and etc., if I do, I paying my own expenses if I don't do it. The expense for self and dogs, will be about two hundred and fifty dollars for such a test, and as there are no quail within two hundred miles of Humboldt or Crockett's there would be no danger of any cheating if I wished to do so, besides I will go to California with the pups to do it, but it of course must be in open season. These are all fair propositions, meant simply to demonstrate that there are dogs with this faculty born in them, which I claim are the best for ordinary sportsmen at least, if not for all purposes. There are, as I said, many that will not do it, but they are in my opinion deficient in breeding, just that much, notwithstanding their pedigree.

I will conclude by saying my favorites for my use are pointers and Gordon setters, they coming nearer to every day dogs for persons like myself who have no time to spend except for pleasure and then only occasionally, and I want the dog the easiest broken, that will always remain so, and ready at all times.

I have found the Irish, Laverack, Llewellyn and other English strains almost too nervy for such as myself, and decidedly hard to manage and to break, though with professional breakers they have distinguished themselves, besides being handsome, and I do not say they are not even better in all respects than pointers and Gordons, I only say the latter suit me best for my use.

I do not claim the dogs owned by the gentlemen mentioned are the best on the Coast by any means, I having seen but few of the Pacific Coast dogs; I only mention them as strains which I consider are natural pointers and those I would consider easily broken and the only ones I have seen so far. There may be scores of them on the Coast and possibly many better dogs, except perhaps Dorr, and those I would like better and would select from had I seen them. I only mention them as natural workers and not to advertise them at all, for had I use for a dog in this country on game birds it is possible I would choose from other kennels, but any choice I might make would certainly be from stock known to point naturally and I would certainly kill all of a litter I might raise that failed to point the very first game bird they ever saw under favorable circumstances, such as within twenty feet on damp days, or with wind blowing from the birds to the dogs. I, of course, would not expect a point with birds up above my dogs on a mountain, or down a stiff wind, or under many other circumstances unfavorable to scent, but would try them fairly and take the one that stands his game the first time.

BATTLE MOUNTAIN, NEV., August 11.

### Dog Poisoning.

Parties have written to the American Field suggesting the raising of a fund to be used for the prosecution of dog poisoners. The recent killing of Gath and Nabob gave rise to this suggestion.—*Exchange.*

This devilish propensity, and it is as low down in diabolism as the work of the dynamite fiend, has reached this Coast. In Oakland and the surrounding suburbs some thirty valuable dogs have lately been poisoned, among which we may mention the dogs of Dr. Pinkerton and the Pierce Brothers. Poisoned pieces of fat meat are thrown into private yards and scattered along the public thoroughfares. Mr. Bennett's splendid bitch Sybil, now raising pups, had a very narrow escape last week. There is no excuse for this devilish enormity. A subscription is being raised to employ a man to hunt up the fiends. If traced up they will be taken out into the woods and flogged within an inch of their lives. We hope to take a hand in the whipping. If we do, we propose to strip to the elbow and attend strictly to business for the time.

## THE DRAMA.

### Vienna Garden.

It is with pleasure we announce the prospect of another musical treat at this popular theatre, and one which we are assured will be appreciated and patronized. It is nothing less than the advent amongst us of another troupe of Spanish students, who open to-night. This troupe first became known in America, in 1882, when it visited the chief cities of the Union under the management of Mr. Abbey. The troupe opening to-night are called the Original Spanish Students, and are considered abler performers than those who lately so much delighted our public. Their distinguishing badge is an ivory instead of metal spoon. In addition to the Students the interludes will be attractive. Among these will be little Lillian Smith, our little girl rifleist, whom we shall be glad to have in a position where her phenomenal performances may be seen by the respectable portion of our citizens. In every respect this little girl is a wonder altogether inexplicable. To see her shoot is alone worth the admission fee. Her power is a natural gift that cannot be understood by natural laws, for she shot as well on commencing almost as she does now after years of practice. Molly Bawn tells us the stars twinkle all night because they have nothing else to do. So we suppose little Lilly shoots because she cannot help it.

## YACHTING.

On the 30th inst., Saturday, the San Francisco Club will hold their annual regatta over the new triangular course in mid-channel. Yachts will make a flying start at about one o'clock, crossing an imaginary line between Alcatraz and Meigs' wharf, before the wind, running down to a stake boat, to the northward of Goat Island, then beat to a stakeboat off Fort Point, back to the leeward stakeboat, then to Fort Point again, finishing at the starting line, before the wind.

This course has never had a fair trial, but it seems to us as if it will hardly become popular. To be sure it is all in the channel, where the wind will presumably be steadier, but it is open to many objections. In the first place the leeward stake boat can not be placed too far to the eastward on account of South Hampton shoal, as the big keel boats dare not go too near that place, and even the center-board yachts have to get their boards down to make wind-way immediately after rounding. The race is practically dead to leeward and dead to windward, thus preventing any quartering sailing which, as every one knows, is a vessel's best point of sailing, more especially schooners.

Again, with a big fleet such as is liable to start the vessels will be cramped for room, as of course the big fellows will pass the smaller ones frequently, thus increasing the chances of collisions and giving the beaten boats an opportunity of telling "how they would have won the race if they had not had to give way to so and so." In this respect it will not be out of place to again state that on the wind vessels on the starboard tack have the right of way and that vessels going free must give way to others on the wind; and, moreover, if one vessel catches up to another going free, the faster vessel must look out for the one she is overhauling. We trust that the day will be clear and the wind steady on that day so every vessel entered can have a fair chance. The yachts of the Club will be divided into two classes, over forty-five feet and under forty-five feet, whether on the water line over all or a mean length we are not informed.

Under the first heading, Class A., will come Aggie, Lurline, Halcyon, Chispa, Nellie, Whitewing, Casco and Ariel, although it is probable the two latter will not start.

Class B. will contain the yawls Frolic, Emerald and Lolita, and the schooner Rambler.

The vessels of class A give the vessels of Class B one minute to the foot, and yachts will give vessels of their own class three-quarters of a minute to the foot time allowance. That is to say that the big fellows give Class B. the minute in sailing for the Club Flag, while outside of that the yachts compete only for prizes with vessels of their own class. Classes C. and D. are composed of outsiders, the former taking in such yachts as Virginia, Fleur de Lis, Annie and Eva, and the latter sloops Nellie, Magie, Spray, Fleetwing, schooner Dawn and yawl Ripple and others of that ilk. Every yacht can not expect to be first, and we trust that no bickerings or thought that he is handicapped will prevent any yacht owner from entering his vessel and allowing her to go over the course. We should pick out the winner as Aggie in the first class, and Rambler in the second.

The Nellie and Chispa came out of Raccoon Straits together about 11 o'clock; the Chispa being ahead and to windward, until the steady winds were reached, when the conditions were quickly reversed, Nellie pointing up higher than Chispa and seemingly going through the water faster. Captain Murphy was sailing the Nellie, and Captain Coolidge the Chispa. To illustrate the differences in speed in a short distance: The Rambler got through the straits but a few minutes before the two larger boats, yet when they passed her, Nellie was well to windward, while Chispa was a good way to leeward of her. Nellie increased her lead crossing the channel and when the yachts went about on the south shore and made a leg on the port tack, they were pretty well in company with Fleur de Lis and Annie, the latter with ladies on board. Halcyon, which had been cruising round with Lurline under jib and mainsail, put up her foresail and joined the fleet. White soon slacked off and ran away with wind abeam, and Annie after reaching Fort Point, followed suit, and Halcyon soon after got down her foresail, so that practically the only two vessels racing were the original ones. Halcyon and Chispa both have been lightened up and seemed very tender, the latter particularly so when compared to Nellie.

Nellie kept dropping Chispa all the time on the wind, and when squared away, demonstrated that she could beat her off the wind no matter if she did carry more ballast than Chispa.

The Pacific Yacht Club takes a cruise to Vallejo to-day, returning to-morrow. This was arranged at a meeting held last week, and is a welcome break to the monotony which has of late been prevailing in yachting circles. There are several yacht owners, more shame to them, that allow their vessels to remain at their moorings week in and week out, without ever going on board unless there is a cruise or race of some sort. The sailing orders for this cruise are published herewith. They are not very explicit regarding the position of the home stakeboat, but it means by "the entrance of Raccoon Straits," somewhere between the Club House and Angel Island.

The Pacific Yacht Club squadron will assemble off Front St. wharf on Saturday, August 16th, 1884, at 12 o'clock, M.  
At 1 o'clock the preparatory gun will be fired from the flagship; at 1:15 a second gun will be fired, at which signal the yachts will get under way and proceed direct to Vallejo, anchoring at Georgia St. wharf.  
The yachts will start on their return on Sunday, August 17th, 1884, at 11:30 A. M.  
At 11:15 A. M. a preparatory gun will be fired.  
At 11:30 A. M. a second gun will be fired, when the yachts will get under way and stand to the northward, making all sail, then tacking to the southward and passing Georgia St. wharf, when the time of each yacht will be taken. The fleet will then try rate of sailing to Sausalito, passing home stake boat off the entrance of Raccoon Straits, on port hand.  
The time for hauling down and hoisting colors on the yachts at sundown and at 8 A. M. will be taken from a signal gun from flag ship.  
Yachts will carry Club Flag.  
Other vessels accompanying the fleet are respectfully requested to comply with these orders.

The annual regatta of the Pacific Yacht Club will take place, according to the By-Laws, on the 9th prox., Admission Day. Nothing definite has been arranged, except that the race will be over the old course, which includes a stake boat at Hunter's Point, Oakland Point, and Fort Point. When the matters of time allowance and classes are decided on we will publish same.

On Sunday afternoon there were anchored in Richardson's Bay, Aggie, Halcyon, Nellie, Chispa, Rambler, Spray, Fleur de Lis, Whitewing, and Pilot Boat Lady Mine, while Lurline was anchored off the San Francisco Club and the Ariel off the Pacific Club; quite a goodly showing.

Last Sunday, harrig the fog in the channel, was an enjoyable day for yachting. The fog belt only extended a space of about three-quarters of a mile in width, and ample cruising room outside of this.

THE RIFLE.

We are pleased to find our biography of Dr. Pardee, the first of the series, met with a hearty endorsement from all classes, more especially from those who from their devotion to the rifle are most familiar with his services to the State in this connection.

At Shell Mound.

The event on Sunday at this favorite range was the first competition shoot for places in the team of the Inter-State match between California and Nevada under the direction of Major A. F. Klose, Inspector of Rifle Practice of the Second Brigade, who confined the shooters to strictly military guns.

Table with columns: Name, 200 Yds., 500 Yds., Totals. Lists names like Kuhls, Mangels, Robertson, Hovey, Klein, Barrer, Henry, Carson, Sprowl, Johnson, Last, Simpson, Walham, Pierce, Diers, Townsend.

Col. Ed. Boyle of Virginia, Captain of the Nevada team last year, was on the ground and participated in the shooting. He stands high as a rifle-man, and his scores were good, especially his off-hand score at 500 yards.

In one of the medal challenge shoots, confined to members of the Fifth Infantry, Lieutenant Kellogg, No. 7, and Lieutenant Brown No. 6 ought to have met at the target, on Sunday but the latter, from some cause, was not present.

This record, reaching 94 per cent., makes Kellogg's probable exclusion from the Inter-State team all the more distasteful to those who desire to see California victorious.

At the same time and place members of Company C, of First Regiment (Nationals), held their regular monthly medal shoot, in which T. E. Carson made a good score.

Table with columns: Name, 200 yards, 500 yards. Lists names like T. E. Carson, F. E. Wharf, A. J. Ruddock, George Simpson.

The Inter-State Match.

We regret to find there is much controversy and bad feeling in several quarters at the action of the California State Rifle Association in reference to the guns to be used at the coming match. We do not intend to take a prominent part in the controversy, because we do not see any good will result.

serious blow to the efficiency of the California team and create a void very difficult to fill. We hope wiser counsel will prevail and that for his own sake, if not for the State's, he will be the brave, true man and thorough Californian we have ever found him.

Comparative Records.

We have recently given comparative shooting among American riflemen. This time we cross the water and go to Dublin, Ireland, for the records in the annual competition for the Challenge Cup, which on the average for the distances are most excellent.

Table with columns: Name, Prize. Lists names like Mr. A. Ganly, Surgeon Hamilton, Mr. J. Murphy, Sir R. G. Hamilton, Mr. W. Rigby, Mr. Coughlin, Mr. Courtney Boyle, Captain Bowhill.

At Schuetzen Park.

On Sunday the Eintracht Rifle Club had a medal shoot in which Lieut. Fred Kuhls was again the champion of the day. As we have said before, the two Freds are hard to beat, and certainly in the whole brotherhood of riflemen we meet no two more genial souls.

Table with columns: Name, Score. Lists names like Kuhls, Kaufung, Stane, Klotz, Ropke, Klare, Gumbel, Streuber, Hartmannsen, Champion Medal-Lieut. Fred Kuhls, First Class Medal-L. Klotz, Second Class Medal-Sirubel, Third Class Medal-Schubert, Last Best Shot Medal-Lieut. Kaufung.

At Stockton.

Table with columns: Name, Score. Lists names like Charles Merrill, J. Magee, L. Seibach, W. Hill, Fred Baker, J. H. Baker, W. Baker.

On September 6th, 7th, 8th and 10th the San Francisco Schutzen Verein will hold its annual festival, during which a long programme of prize target and bird shooting will be carried out. It is expected that some of the German shooters will make records to trouble the championship fancies of Eastern visitors.

THE GUN.

The Game Law.

Table with columns: Game, Season (January to December). Lists games like Quail, Partridge, Rail, Grouse, Doves, Male Deer, Female Deer, Spotted Fawn, Antelope, Elk, Salmon, Trout.

Biographical Sketches.

The sketch of Mr. Crittenden Robinson, champion shot of the State, was prepared for this issue, but owing to the pressure of other matter which could not be omitted it had to be laid over until next week.

At Bird's Point.

On Saturday last the Alameda Sportsmen's Club held their final monthly meeting at Bird's Point, at which the personal ownership of the medals was decided. Only eight members appeared on the ground, but the spirited character of the contest made amends for the small attendance.

Next to these gentlemen came Messrs. Goodall and Haskell, with 11 kills each, both shooting with admirable precision all through. Goodall missing his second bird, a regular clipper, and Haskell his eleventh, which perhaps he ought to have killed. Messrs. Mayhew and Norton, with 10 kills each, did themselves great credit by their style of shooting. The shooting-off by those tying was, perhaps, the most brilliant effort of the day.

Table with columns: Name, Score. Lists names like A. F. Adams, T. Bennett, W. W. Haskell, Edw. Goodall, H. A. Mayhew, F. B. Norton, A. F. Havens, John Pollak.

NOTE.—It may not appear plain to every person why Norton and Haskell contended for second medal, while Mr. Goodall's score on Saturday was better than Norton's. The final contest for medals was governed by the best average for the season, and while Adams and Bennett contended for first medal, Haskell and Norton fell together for second medal.

At South San Francisco

Mr. Z. Prentice has given to the members of the Potrero and South San Francisco Gun Clubs a handsome medal, to be shot for, and the first match came off at the Six Mile House on Sunday. Eleven gentlemen entered the list, some of whom, such as Walsh and Schwerine, stand high at the trap.

Table with columns: Name, Score. Lists names like P. Walsh, J. M. Rojas, A. Schwerine, W. Fulton, H. Blanken, W. Garmen, F. Williams, E. Funcke, J. J. Ford, E. Dunshee, F. Perata.

In the shoot-off by the ties it was decided to have three pair of doubles at 18 yards. At this kind of shooting it has been repeatedly said, Walsh has no superior but Mr. Robinson, and naturally he beat his opponents and won the medal.

We hope to have a more intimate acquaintance with the members of these clubs in future. In the meantime, we beg to assure them we shall be glad to publish anything they choose to favor us with.

Notice to Marksmen.

We invite the attention of the marksmen of the State to the premiums hung up by the officers of the Thirteenth District Association to be shot for at the coming Marysville Fair. There are ten premiums, as follows: First, \$50; second, \$30; third, \$25; fourth, \$20; fifth, \$15; sixth, \$10; seventh, \$9; eighth, \$8; ninth, \$6; tenth, \$5.

The Arizona quails sent by G. W. Ellery, of Sacramento, to Warden McComb, of the Folsom Prison, are doing well. Several of the females laid a large number of eggs in the poultry shed, but were prevented from hatching by the carelessness of those having charge of the henery during the Warden's absence.

So it always is when we have a chance of getting game birds. Some man's negligence or ignorance always destroys another man's enterprise. The ten Japanese pheasants recently hatched out at Mr. Platt's place, Alameda, have all been destroyed by the stupidity of his man servant. They had got to feeding and growing nicely, but they are all gone.

The Neophyte Club, formed from members of the Alameda Club, will hold their medal shoot at Bird's Point to-day.

At Suisun.

On Sunday last Messrs. C. Donaldson and George Kinloch arranged a day's pigeon shooting, which proved quite successful. The day was beautiful, with just wind enough to make the birds lively. On this occasion the new trap invented by J. W. Donaldson was tried for the first time, and admitted by all parties to be the best they had shot from. The first match was at 12 birds each, 80 yards boundary, entrance \$10. There were nine entries, making a purse of \$90, divided into three purses—\$45, \$30 and \$15. The Messrs. Bassford and Jeff Dohbins, with clean scores, divided the pools. G. D. Perkins acted as referee. The score:

Table with names and scores for the Suisun pigeon shooting match.

The shooting of the Bassford brothers and Dohbins was very fine.

The second match was at six birds each, 21 yards rise, for a purse of \$45, divided into \$20, \$15 and \$10. This was divided by H. Bassford, B. Bassford and J. W. Kinloch on clean scores. The score:

Table with names and scores for the second Suisun pigeon match.

The third match was at five birds each, \$5 entrance, with purses at \$25, \$10 and \$5. F. Bassford and Jeff Dohbins divided first and second money on clean scores. The score:

Table with names and scores for the third Suisun pigeon match.

The fourth match was at three birds each, 30 yards rise, \$5 entrance. In this there were five ties, and in the shoot off, at doubles, F. and B. Bassford divided first and second money, and Dohbins and H. Bassford third money. The score:

Table with names and scores for the fourth Suisun pigeon match.

The fifth match was at 10 glass balls each, 18 yards rise, entrance \$5. The pools fell to H. and B. Bassford and G. Roney on clean scores:

Table with names and scores for the fifth Suisun pigeon match.

The last match was at three glass balls each, entrance \$2.50, with prize, \$10, \$5. In this B. Bassford and G. Roney divided both monies on clean scores:

Table with names and scores for the last Suisun pigeon match.

At Colma.

The Parker Gun Club met at Colma last Sunday for their monthly medal shoot. The conditions are Clay Pigeons, 20 single birds, 18 yards rise, 1 barrel, screened trap, which makes it impossible for any man to know at the trap which way the bird will be sent. It adds considerably to the difficulty and interest of clay pigeon shooting. On Sunday the McEnroe brothers won first and second medals. The score:

Table with names and scores for the Parker Gun Club medal shoot.

So far, for the season's best average, P. McEnroe leads, so closely followed, however, by Bekaert and his brother that it is quite an open question who will finally win the medals next month. The contest will be close, whoever wins.

At Gilroy.

Fifteen members participated in the Rod and Gun Club shoot last Wednesday afternoon. Harry Frutig won the rifle for the second time with a score of 13 out of 15. Following is the score:

Table with names and scores for the Rod and Gun Club rifle shoot.

Vacaville can boast of as fine a club as any interior town in the State. It numbers twenty-eight members, the larger proportion of whom have a high reputation at the trap. It is said the club is anxious to select a team to shoot against Napa, Vallejo, or Benicia. We think it might go farther and challenge one of our city teams. We should much like to see such a match. There is a chance for the Alameda Club, which has now got through its medal shooting for the season. We are somewhat surprised the Vacaville Club should descend to shooting at glass balls for it is only haly work. When short of live pigeons in future, let them get clay pigeons with a screened trap, and then they will have good shooting. The Messrs. Pierce, of Oakland, sell them at very low rates.

At Colusa.

Messrs. Campbell and Drinkhouse, members of the Lincoln Club, had a pleasant private match at Colusa, last Sunday, for \$25 a side, but the particulars were not furnished. Our up-country friends are getting very negligent. The score: Drinkhouse.....19 Campbell.....16 We presume the shooting was at twenty-five birds each.

A club, organized on July 21st, to be known as the Mission Gun Club, held an election of officers on Thursday evening, when the following gentlemen were elected: Edgar Forster, President; Rudolph Schluter, Vice-President; Roger Kershaw, Secretary; William Ross, Treasurer. The club held their first shoot on Sunday, July 27th, at twenty glass balls, at Ocean View. Eugene Forster won first with seventeen.

Slaughter of Game.

It is stated by Engineer Phillips (late of the Northern Pacific road) that no fewer than 20,000 elk, antelope and mule deer are slaughtered every Winter in Minnesota, Montana and Wyoming alone. There is every prospect that three of the noblest game animals on the American continent will soon be extinct. Elk, which formerly ranged from the Middle States to the Pacific ocean, are now never found east of the Missouri river. Twenty-five years ago they were plentiful in Nebraska and Kansas, but civilization has driven them into the dense and uninhabited regions of Minnesota and the northern Territories. The hide hunters effect the most sweeping destruction. The average price of an elk skin is three dollars. The hide hunters use repeating rifles, and frequently kill from six to twelve animals in a herd before they get out of range. Mr. Phillips states that, besides the slaughter of the animals named, in the year 1882 more than 25,000 buffaloes were killed for the traders between the Yellowstone and the headwaters of the Little Missouri.—Exchange.

So the antelope and elk were once in California, but though here in such large quantities, they were the first of the large game animals to disappear. They were mercilessly slaughtered on all sides. Every day on the San Joaquin and Sacramento Valleys people used to go out in buggies with port holes cut in the covers, creep up within short range, and kill them by the score. Well, we have not an antelope now from one end of California to the other. The elk soon followed. By and by, before long, we shall have to say the same of the deer. Is not there a fearful lot of the dirty, improvident Indian in all this?

Elk in California Still.

The Sunday Capital on this subject says: "Some weeks ago we received a letter from Louis Gerber, of this city, then in San Luis Obispo county, in which he stated that he had, a few days before, come upon a band of fifteen large elks while hunting for cattle in the mountains. He was surprised at seeing the lordly-looking fellows, having got the impression that there were no more elk in this State, unless a few existed in the northern counties. We are told that there are mountain fastnesses in San Luis Obispo which white men have never been able to penetrate; and it is possible that in these safe retreats there may be many head of this species of game."

Since we wrote a previous paragraph on this subject, we were told by Mr. Benton, of the California market, that last week, the first time for many years, he had received a couple for sale. They were large, weighing, he thinks, when alive about three hundred pounds or more each. Elk are better eating than deer, and it is our own fault they are no longer to be obtained.

Some time ago young Mr. B., of this place, while coming through Grizzly canyon, killed three deer with one shot, as he stood in his wagon, the deer being one hundred and fifty yards distant, standing slightly quattering from the hunter and close together. The bullet penetrated the side of the first, the heart of the second and broke the back of the third. All three fell dead within a few yards of each other. He aimed only to get the first and did not perceive the third deer until after he fired.—Lower Lake Bulletin.

Does not this smack of the English Major, who always drew upon a ripe imagination when giving his hunting exploits in India, the greatest of which was that of shooting a deer through the ear and having the ball come out at the hind foot. Position, of course, is every thing in life, and when we essay to tell a hunting yarn, we are always careful to have the accessories all nicely arranged. Inproprieties in position ruin a great many good yarns.

Useful to Hunters.

For a lubricating oil that will not hurt the fine finish of gun barrels the following recipe is recommended:

Take about half a pound or pint of the best sperm oil, put in a bottle and add about two ounces of common shot, and on top of the shot ten or twelve shingle nails, and let it stand for about three or four weeks, at the end of which time there will be found at the bottom of the bottle a black sediment, which is the rust-forming material. This process refines the oil, which will be purified to a nicety. This pure oil can be poured off into another bottle, and it is ready for use.

This is a new idea, and we give it as we get it. Anyhow, the experiment won't cost much.

The hunters with their pack of hounds met with poor success in their deer hunt at Sargents. Only one deer was killed. The scarcity of deer follows the use of dogs in the field hunt. The doe and the fawn are too often worried and killed by hounds in the chase and it only becomes a question of time when the deer cease to be.—Gilroy Paper.

Nothing is more sportsman-like than this hunting deer with hounds for the purpose of shooting them with the rifle, and we doubt if it is done in any other civilized country except America. It is an Indian practice all through and should be put down by law if public opinion is not potent enough. We are surprised the practice is allowed on the Sargent estate. Go on, gentlemen, if you will be Indians in your sport, and hound the deer out of existence. It will not be long before you will have to kill your hounds.

Lizzie Stevens, a girl of 16, shot a panther measuring eight feet in length, which was raiding her father's sheep ranch on the Klamath last week. The bullet brought the panther to the ground, but he was too much for the dogs which attacked him, when Miss Lizzie finished his career by plunging a butcher knife into his heart.

All young girls in the far interior should be taught the use of the rifle and gun, as all young girls everywhere should be taught to swim. Both accomplishments are always useful and health-giving. This was a brave act of Miss Stevens, and should be duly recognized by the press.

Another case of young ladies shooting game comes to us as follows: Recently two young ladies residing in Howell county, Mo., during the absence of the rest of the family at church, noticed that a couple of wild turkeys entered a field some distance from the house. Seizing a shot-gun known to be loaded, one of the girls succeeded in bringing down one of the turkeys, but the other escaped her. The distance shot by her proved on measurement to be sixty yards.

Deer, antelope and mountain sheep are said to be very plentiful in the mountains north of here.—Reno Journal. Glad to find there are still some left on the continent.

There was recently a prize Clay Pigeon Tournament, at Canton, Lewis county, in which the following fine shooting was done, Each man had 20 birds.

Table with names and scores for the Clay Pigeon Tournament.

Pedagog, a writer in Forest and Stream, speaking of guns makes use of the following trite remarks:

"I don't care for 'style' so much in a gun, provided it is safe, handles well, and is a close, hard shooter. No matter how strong the material, I want some weight of metal in the barrel of my shotgun and especially at the muzzle of a choke-bore. I believe that where a gun is choked at the muzzle, if it is light at that point it springs so that we do not get the full benefit of the choke. I came to this conclusion by putting a light band of lead, fitting closely, around the muzzle, and after firing the gun I found it would drop off easily, having expanded quite perceptibly.

"I have been using for the past two years one of the American Arms Co.'s semi-hammerless single guns, a 12-gauge gun, 28 inches, 9 1/2 pounds, made to order, (a 12-gauge on a 10-gauge stock), cut off and rechoked to leave it heavy at the muzzle."

Another New Powder.

The new kind of gunpowder lately introduced by M. Himley is claimed to be superior to all others now in use in the ease and rapidity of its production and the entire absence of danger in the process of manufacture. Its freedom from any hygroscopic qualities is also evident from the fact that 100 grains of the article, exposed to damp weather for some four days in an open window, showed no gain of weight with a delicate balance. It is two and one-half times more powerful than common powder, and there is but a very slight residue. Another advantage is the slight amount of smoke given off, and this, as contrasted with that from nitro-explosives, is totally innocuous.

A gun club has been started at Susanville, and W. D. Minckler is Captain. Forty thousand glass balls and several traps have been ordered.—Exchange.

We have heard of several new clubs being formed in the interior of late, but we have ceased to expect the good work from them we once expected. If every member of every club regarded himself as a game warden bound to enforce the law, poaching would soon come to an end. Every member of such clubs can from their position do endless good if they only choose. In the matter of glass balls a mistake is also made. The club should have ordered clay pigeons; any duffer can break glass balls.

The wholesale slaughter of deer on Rogue river, Oregon, is strongly denounced and complained of. Well, but what is the good of complaining? Let every section of the Coast go to their legislature and insist upon laws that shall stop this Indian vandalism. We have lots of fat, lazy police, but it is altogether beyond their dignity to look after the hides of these animals sent to market to see if they hear the marks required by law. The fact is the Chief of Police, like the Chief Executive, is of no earthly use to the people, when it comes to enforcing the laws vigorously. They have got politics to attend to.

It is said that the young ducks are being slaughtered in this vicinity, and that one gunner killed over twenty little mallards last Sunday. Sacramento sportsmen, however, will not molest the birds until the proper season comes.—Bee.

It is a pity their example is not more followed. Young ducks scarcely feathered have been netted and sent to this market for months. If the commission merchant and private citizen would resolve not to buy them, the abomination complained of would soon be choked out. The love of money and the love of the belly, however, are too much for the average American of modern days.

Deer are reported plentiful in Humboldt county. A party recently killed 19 in a couple of weeks. The Sunday Capital, of Sacramento, asks with force whether that was not about ten too many? We concur. How long is this criminal slaughter of public game animals and birds, in which every tax-paying citizen has an interest, to continue among the American people? Is it, after all, even with the aid of education and freedom, in the largest sense, so difficult to rise above the aboriginal nature?

A large bull snake, as it is commonly termed, was lately seen by a gentleman in the interior dipping its head into the grass as if picking something up. On being killed, the reptile was found to have swallowed several young quail. The cries of the mother bird first attracted attention to the snake. There is no doubt several varieties of snakes eat young quail, but for all that the snake in question does more good than harm.

Henry Gardemeyer, of the Livermore Soda Works, has a hager so tame that it plays with the dog and cat. It is always ready for a little fun.—Livermore Valley Review.

No doubt, and some day somebody will find his hand badly hitton, and cuss the animal. Pet bears, mountain cats, badgers, etc., are mighty uncertain things. We never knew them when some time or another they didn't go for blood.

Mr. Allen, of the Market-street Gun Store, has returned from a pleasant vacation in the neighborhood of Gilroy, fishing and shooting. He reports doves moderately plenty. He gave Judge Leavesly a call, and was pleased with the kennel. Mr. Allen was accompanied by Mr. W. P. Robinson, of Gilroy, and begs to acknowledge that gentleman's politeness.

There is a one-armed man in Eureka, Humboldt county, who seldom misses a deer and kills more, perhaps, than any other man in the district. There is also a one-armed man in Alameda, that it is very difficult to beat either in the mountains or at the trap.

# THE Breeder and Sportsman.

PUBLISHED WEEKLY BY THE  
BREEDER AND SPORTSMAN PUBLISHING CO.

THE TURF AND SPORTING AUTHORITY OF THE  
PACIFIC COAST.

OFFICE, 508 MONTGOMERY STREET  
P. O. Box 2603

Five dollars a year; three dollars for six months; one dollar and a half for three months. Strictly in advance.

MAKE ALL CHECKS, MONEY ORDERS, ETC., PAYABLE TO ORDER OF BREEDER AND SPORTSMAN PUBLISHING CO.

Money should be sent by postal order, draft or by registered letter, addressed to the "Breeder and Sportsman Publishing Company, San Francisco, Cal."

Communications must be accompanied by the writer's name and address, not necessarily for publication, but as a private guarantee of good faith.

JOSEPH CAIRN SIMPSON, - - - EDITOR

## NEW YORK AGENCY.

Mr. C. C. Pettus at the office of the "Sportsman," 46 Murray Street, is duly authorized special representative of the BREEDER AND SPORTSMAN in New York to receive subscriptions and arrange advertising contracts.

## SACRAMENTO AGENCY.

Residents of Sacramento and vicinity, desiring to subscribe or advertise in the BREEDER AND SPORTSMAN, can do so through our agent, Mr. M. J. Henley, Russ House, 1,009 J street.

## ADVERTISING RATES.

Displayed, \$1.50 per inch each insertion or pro rata for less space. Reading Notices set in briefer type and having no foot marks, 30 cents per line each insertion. Lines will average ten words. A discount of 10 per cent will be allowed on 3 months, 20 per cent on 6 months and 30 per cent on 12 months contracts. No extra rate charged for cuts or cutting of column rules. No reading notice taken for less than 60 cents each insertion.

San Francisco, - - Saturday, August 16, 1884.

## Dates Claimed.

Sonoma County Agricultural Association, Santa Rosa, August 18th to 23d.

Sonoma and Marin District Association, Petaluma, August 25th to 30th.

Thirteenth District, Marysville, Aug. 26th to 30th.

Golden Gate Fair, Oakland, September 1st to 6th.

Chico Fair Association, Chico, Sept. 1st to 6th.

State Fair, Sacramento, Sept. 11th to 20th.

Ninth District Fair Association, Rohnerville, Sept. 23d to 26th.

San Joaquin District Fair, Stockton, September 22d to 27th.

Santa Clara District Fair, San Jose, September 29th to October 4th.

Monterey Agricultural Association, Salinas, Oct. 7th to 11th.

Fresno Fair Association, Fresno, October 7th to 11th.

Los Angeles Fair Association, Los Angeles, October 13th to 18th.

## Santa Rosa.

Tuesday next the sixth annual exhibition of the Sonoma County Agricultural Park Association will open at Santa Rosa. That it will be by far the most successful ever held is already assured. The exhibition proper gives promise of being well worthy of the rich country surrounding Santa Rosa, and the speed department is on a basis that will ensure fine sport and satisfactory results. There is not a better course in the State, and when we were there, some two months ago, it was then in admirable condition. A fine pavilion has been erected on the grounds so that every moment can be occupied with pleasure and profitably as the whole of the exhibition will be compact, and with only a short distance from stalls and pens to halls and stands.

The opening day is marked by two races which should prove very interesting. The first a dash of three-quarters of a mile for two-year-olds in which seven are named the get of Shannon, Hock-Hocking, Wheatley, Joe Hooker and Norfolk.

The second race is for the three-minute class, and among the four entries are Blanche and Joe Arthurton. The meeting of these two will be worth making the trip from San Francisco to Santa Rosa to see, and it may be that the others are worthy of the company. The second day, Wednesday, has three races on the bill. The first is dash of a mile with ten entries, every one of which is known to be speedy, and without doubt it will be one of the most exciting races of the meeting. The 2:40 race did not fill, but another was opened which will doubtless secure the requisite number, and the same can be said of the 2:20 pacing class. The third day, Thursday, there is a dash of 1½ miles for three-year-olds, heats of half a mile for all ages. In the first are Jon-Jou, Hirondelle, Cootie, Philip S. and Bachelor; in the second Quebec, Dottie Dimple, Premium, Blue Mountain Belle, Aunt Betsey Estello Clarke, Del Paso and Amanda. There will be lively work among that lot sure, and before one of them wins two heats there will be sharp arguments. On the same day is the 2:22 trotting class, and hot enough will be the outcome. A "selling" purse, 1½ miles, the 2:27 trotting and a district race is the bill for the Friday. There are seven in the selling race, seven in the 2:27, and eight in the district. This will be one of the days of the fair to mark with a white stone, as in the large fields are animals that will press each other to their utmost to gain the victory. The closing day is marked by a "Cup race," or rather the distance to

be run is the usual length for that, viz.: two-and-a-quarter miles, and in it are Patrol, Trade Dollar, Garfield, Birdcatcher and Bachelor. That the distance will be compassed in good time is nearly certain, and where the favoritism will rest is beyond our power to foretell.

The free-for-all did not fill, and that has again been opened, conditional that Nettie R. and Director barred. From the well known spirit of the managers should there be gaps they will be satisfactorily filled, and the allotted five days present a round of attraction. The trip is a very pleasant one now from San Francisco to Santa Rosa. The boat, which leaves Market-street wharf at 7:45 A. M., reaches Santa Rosa in plenty of time to "look around" before lunch and see what the horses are doing before the races are called. By taking the 3:30 or 6:15 P. M. a good night's rest and an early visit to the course the following morning will disclose what may be of benefit to those who desire to invest. The early spins of the racehorses, the brushes of the trotters, on the mornings of days when they will race in the afternoon oftentimes affords a key to the observing, and it must be a cold-blooded mortal who does not enjoy the morning exercises nearly as heartily as the actual contests in the afternoon.

That there will be many visitors from the bay we are well satisfied, and also confident that those who attend will be well paid for their time and trouble.

## The Entry Lists.

To those who have any acquaintance with the horses of California anything further than to refer to the list of names published last week will be unnecessary. Never before in the trotting history of California has there been a better showing, and we cannot recall any season when the prospect was so good for the best kind of sport at the harness gait. The same may be said of the racing without the least hazard of overdrawing the picture. That which appeared inimical has had a contrary effect, and the absence of the Santa Anita stable in the East and the determination of Palo Alto not to participate in racing or trotting this year, have been an inducement for others to make engagements who otherwise might have held aloof. The most pleasing feature is the support that has been given to all the places, as so far as we have heard there is not a single fair that has been missed. And there is another feature which is a token that there will be many surprises before the circuit is ended. The horses which have trotted since the close of the entries are of a remarkably high class, and so closely together that a very little change in condition will turn the scale. Then, too, there is a shifting in the classes, meeting one "gang" at one place, another at the next, and so there will be variety and new combinations all through. We have not the least desire to speculate regarding the relative chances of the horses engaged. It will be cute fellows, and more lucky than cute, who succeed in selecting the winners in a few races, and the only prophecy that it is at all safe to venture upon is that favorites will be beaten in many instances, and not infrequently "outsiders" prove their title to championship honors. Should this "glorious uncertainty" prevail, as is not unlikely, the interest will not slacken from the opening until the close.

## Chicago Stakes for 1885.

The Washington Park Club have sent out their preliminary announcements of stakes for the second meeting beginning the last week in June, 1885. They include the American Derby, to which \$5,000 will be added, the Sheridan Stakes for three-year-old colts and fillies, the Drexel Stakes for three-year-old colts, the Englewood Stakes for three-year-old fillies, the Lakeside Stakes for two-year-old fillies, the Kenwood Stakes for two-year-old colts, the Hyde Park Stakes for two-year-old colts and fillies. In addition to the above stakes, eight or more stakes, including the Washington Park Cup, the Great Western and Oakwood Handicaps will close January 15th, 1885. A programme will be arranged for ten or more days' racing, and five or more races will be given each day. A programme will also be arranged for a Fall meeting, to be held early in September, for which stakes will close in March, 1885.

## The Occident Stake.

Of the thirty nominations in the Occident Stake three have made the final payment, so that without further casualties there is a likelihood of a good race. The three which remain in are Robert Lee, Griselda and Antovolo. Robert Lee is by Nutwood from a Blackbird mare, Griselda was entered as by A. W. Richmond, but we believe this was an error, and that she is by Leu Rose, a son of Richmond, and Antevolo is by Electioneer, from Columbo by A. W. Richmond. It is rather a singular circumstance that each of the trio of acceptors has the blood of "old" Blackbird, and exceedingly gratifying to us that it should be so.

## Sirs of Mollie McCarty.

In writing a notice of the death of Monday our assistant followed the error of the American Stud Book in ascribing a double sireship to Mollie McCarty. Being away at the time, attending the Rancho del Paso sale, we did not see the proof, in fact, missed reading the article until copied by the *Turf, Field and Farm*. When the entry of Mollie McCarty first appeared in the Eastern papers as "by Monday or Eclipse, Jr.," we took especial pains to correct the error, and obtained positive proof from Mr. Maillard that Monday alone was entitled to the credit. In addition to writing several articles there was no end of verbal discussions, as some were determined to adhere to the statement, governed as we thought, by sinister motives. Therefore, we were very unlikely to make such a mistake. Would it not be well for the *Turf, Field and Farm* to notify its readers that the same error prevails in the Stud Book so as to rectify that as well as the mistake in the *Breeder and Sportsman*?

The *Spirit of the Times* in copying the article accompanies it with an editorial notice, and while giving full praise alludes to the briefness. This we intend to remedy by a full account of Monday and his progeny as soon as leisure will permit. The blood figures so prominently in the thoroughbred stock of California that several articles will be necessary to do the subject justice. The second generation is likely to add to the lustre of the first, and in the get of Joe Hooker, Shannon, etc., on the male side, and the descendants of Mollie McCarty and others of the mares, fully sustain if not increase the reputation of the great son of Colton and Mollie Jackson.

## National Association of Trotting Horse Breeders.

The eighth annual meeting of the above society will be held on the grounds of the New York Driving Club, on September 9th, 10th and 11th. This will be the most important meeting ever held by the Association, as there are \$27,000 in stakes to be decided. There are stakes for three, four and five-years-olds, for 2:35, 2:30 and 2:40 stallions, and for 2:30 and 2:40 mares. The most important amongst them is the "Wilson Stakes" for four-year-olds, the present value of which is \$9,100, and this will be increased by some \$2,000 more. We were greatly in hopes that California-bred colts would have figured in this and the other stakes, and this wish would have been gratified had it not been for the sad cause which led to the withdrawal of the Palo Alto colts. Participation would have resulted in victory, as we feel confident that there never was, or is, a four-year-old that Hinda Rose cannot conquer. In subsequent years there will be some of our colts ready to try conclusions with those of the East, and there is little question that the struggle for supremacy will be stubborn. Not an effort will be spared by the breeders of that section to regain the laurels which are now worn by California colts, and should there be a "letting up" on our part, just so surely the crown will be lost. The coming meeting of the N. A. T. H. B. will be well worth a journey across the continent to witness.

## Miss Peyton's Sons.

In the list of entries published last week the name of Miss Peyton appears in both racing and trotting. She is the dam of Peyton, a three-year-old son of Electioneer, who is entered in every purse for colts of his age that closed on the 1st, and report tells that he trotted half a mile in 1:13 not long ago. Her two-year-old son, Harry Peyton, by Shannon, is named in the two-year-old stake at Santa Rosa, to be run on the first day of the meeting. Miss Peyton is by imp. Glengary from Romping Girl by Jack Malone; second dam Fanny McAllister by O'Meara; third dam by imp. Leviathan, etc.

## Jim Renwick at Saratoga.

So far as we have seen, Jim Renwick has won every race he has started in at Saratoga, and, rather a remarkable circumstance in that country, in one of them he was "barred in the pools." When a "California cocktail" can play such havoc with the crack sprinters of the East, carrying his victories to more than a mile, it is reasonable to expect that there will be still greater performances when Santa Anita is reinforced by additions from California breeding farms. The big gelding has made a wonderful showing, and with a good prospect of a continuation of successes.

The 2:35 purse offered by the Santa Rosa Fair Association, to close to-day, the 16th, has been withdrawn, the Directors having decided to substitute a special for named horses.

Complete Trotting and Pacing Record.

There has come to hand a book with the above title and to say that we are pleased with it faintly expresses the satisfaction it has afforded. "Complete" is none too emphatic. It is so full of information, and that so admirably arranged as to give the least trouble in learning what is desired, that a neophyte will have no difficulty in obtaining instruction. At the same time we have a feeling of commiseration for the compiler when the immense labor is taken into consideration, and which can scarcely be recompensed by pecuniary reward. That a large edition will find ready sale we have not the least doubt, as when its merits are known, every breeder of trotters, every man who has a fancy that way will have a copy if he has to cut other expenses very close to compass it. More than a mere record of trotting and pacing performances from the time they were first embodied in print, whenever known the pedigree accompanies the name. Without taking the place of a studbook it is virtually the foundation for a genealogy of trotters showing just what animals have trotted, and that not measured by an arbitrary standard, but leaving the student to draw his own inferences from the records as given. It is well worth the price merely to gratify curiosity, and trace the progress of the sport from the earliest time until the close of the year. Ten times the amount would not justify the breeder in being without as it gives him a history of all the breeds and the opportunities for comparisons. We shall have a good deal to say about this work hereafter, and in the mean time copy from the *Turf, Field, and Farm* the following notice:

We are glad to learn that the demand for this great work is very active. It is just dawning upon the minds of the trotting community what a tremendous labor Mr. Chester has performed in their behalf, and he is constantly in receipt of the most flattering letters from pleased subscribers, all expressing their astonishment and delight, and many inclosing an order for another copy to be sent to a friend. The work cost so much to produce that the compiler has left himself no margin to give commissions, and it is a real duty for those who find the book an aid to them to assist in its sale. Mr. Chester has put in three years' hard work and \$10,000 in money to furnish those interested in such matters with a complete, convenient and accurate compendium, which leaves positively nothing to be desired. The original subscribers have now all been served, and the compiler will at once begin canvassing for the sale of the remainder of the edition, in which work we wish him every success. Clubs of five will be supplied for \$40, so that any person can get a copy gratis by procuring four subscribers. The book can be bought in New York city at the office of the *Turf, Field and Farm*, or at E. Walker's Sons' bindery, 14 Day street. Orders by mail should be addressed to the compiler, Walter T. Chester, P. O. Box 1, 021.

The Strobridge Sale.

At Haywards to-day, commencing at 12 o'clock noon, the Strobridge ranch with all its fixtures and appurtenances will be offered at auction. The farm contains 500 acres of the finest fruit land, and it will be sold in subdivisions to suit. The stock includes the celebrated Strobridge flock of prize winning Spanish Merino sheep, six hundred head, pedigreed and registered. These sheep are of the finest strains, imported regardless of expense, and their superior quality is well known to all interested in wool growing on this Coast. Thirteen head of horses will also be sold, mares and gelding, the get of Venture, John Nelson, St. Lawrence, Rifeman, Robin's Hambletonian, Gen. Taylor and Thad Stevens, out of well-bred dams. In addition a lot of superior family cows, purebred and cross-bred, Durham, Devon and Ayrshire, etc., will be disposed of. The stock is all of the finest and best, and need only to be seen to be appreciated. A special train will leave the city at 9 A. M.

Auction Sale of Fine Horses.

On Wednesday next, at the Horse Market of H. Fromberg, S. C. Bowley will offer for sale the entire stock of horses belonging to R. P. Clement, Esq. The sale catalogue contains both thoroughbreds and trotters, and it is sufficient to say that Thad Stevens is represented in the first and Electioneer, through his son Stanford, in the second class. There are some remarkably fine youngsters offered, and, in fact, the whole of the stock is very desirable. As Mr. Clement has sold his farm the stock must be disposed of, and hence there is an absolute certainty of obtaining some good bargains. Catalogues can be had and the stock seen at Horse Market and Carriage Depository, Nos. 33, 35 and 37 New Montgomery street, San Francisco.

In the purse for 2:35 class offered by the San Jose Fair Association, to close next Tuesday, the 19th, we are advised by Secretary Hinman that records made since August 1st will not be a bar in that race.

The pacing race, at San Jose, which was added to the programme without date, has been set for Friday, October 3d.

A pigeon shooting match, open to the State, will occur at Bird's Point, Alameda, to-morrow (Sunday), commencing at eleven o'clock sharp. Cash prizes, \$50 to first, \$30 to second, \$20 to third. Entrance, \$10. Conditions, 15 birds, Hurlingham rules, Fay, Lambert and Robinson to shoot at 30 yards, all others at 28 yards. A liberal supply of birds for pool shooting will be provided.

Col. Farron's Complaint.

EDITOR BREEDER AND SPORTSMAN:—A card having been published in your last issue by Milton Farrow, the Eastern professional rifle shot, giving to understand that wrong has been done to him by the California Schuetzen Club in not crediting to him at their late shooting festival a twenty point shot at the men target, get, which would have given to him the first prize, I, as President of the club, deem it my duty to correct his statement. Together with Mr. Kellogg, Mr. Kline, Mr. Heeth, Mr. Stanton, Mr. Wertheimer, Mr. Browning jr. and others, I was present when Mr. Farrow fired this shot, which was immediately marked a 17, in the right side of the neck in the man target. Farrow having fired his preceding three shots in nearly the same place and he having also called his last shot there, was satisfied; the Secretary marked the points on his ticket and Mr. Farrow left the stand and went inside the main shooting hall. A short time after he came to me and said that he had shot a 20 and only got credit for 17 on his ticket. I answered that he must be mistaken, as I personally had seen him make the 17. Mr. Farrow then explained that, after he had left the stand, some one called him back and told him that the marker had subsequently shown a shot, a 20, in the lower end of the target. I replied that he had the right to have the shooting at the man target stopped, and by depositing \$1 caution money, as the shooting rules direct, the committee would go down with him to the targets and examine the shot. Mr. Farrow did not accept my proposal, but shortly afterward he called on me again to have the shooting stopped at the honorary target, where he claimed a 24 ring, while only a 16 ring had been shown. His request was immediately granted, and by the examination of the target in his presence the 16-ring shot was shown to be correct. Mr. Farrow's statement that, where two shots are shown at the same time, the shooter receives the benefit and scores the highest number, is incorrect, as it would do injustice to other competitors by leaving the high scores to chance instead of to skill. The correct rule in such instances is to allow the shooter another shot, but as Mr. Farrow was only shown the shot at the time he fired he was not entitled to another shot, which even he did not claim, as 17 points is surely a good score, even for a marksman like Mr. Farrow. It may happen that two shots can be shown at the same time, one of which may be meant for a target from another stand, or that the patch can fall off or be blown off from an old bullet-hole and thence the mistake.

As to the statement of Mr. Farrow that he had forty-two bull's-eyes on his tickets and only got credit for thirty-nine, I wish to remind him that here, as elsewhere, the official score is decisive and only thirty-nine could be found credited to him on the books. Of our local marksmen three beat him over 100 bull's eyes and over 10 were all the way from 5 to 85 bull's-eyes ahead of even the score he claims; namely, 42. It did not make one dollar difference in the amount of the prize of the score he claims, or that actually credited to him on the books. Mr. Farrow should have shown his tickets to the committee at the division of prizes and not have waited with his complaint till he had left our city.

In conclusion allow me to state that the Schuetzen Club, which was organized in 1876 to uphold the honor of our State at the Centennial Exhibition and succeeded in carrying off the World's Champion Cup against all comers, has a reputation to uphold for fair and just dealing to all marksmen, and especially to strangers, and that this good repute is too well established to be injured, even by Milton Farrow.

PILO JACOBY,  
President California Schuetzen Club.

CRICKET.

The Merions Gain a Decisive Victory.

The fifth game for the Harrison Trophy came off at the usual place last Saturday afternoon. Waterman won the toss and sent the Merions in the field. Carr and Waterman, the first two batsmen, were rapidly dismissed, with the score at 2 only. B. Clark and A. Knox got together and made a pretty stand, although Knox was caught at the wickets by G. Theobald immediately upon his appearance at the creases, but the umpire gave it not out, much to the surprise of the batsman, fielders and spectators. He was, however, eventually caught at slip by Miller. Sanderson, Bristowe, Cookson and De Golia failed to break their eggs. Purdy (who was suffering from a sprained foot) joined Clark, and a short stand was again made till Clark succumbed to a "Yorker" from Miller. Clark played in his usual careful style for 15. Armitage and Kip were bowled, leaving Purdy to carry out his bat for 5, the innings closing for the meagre total of 37. A glance at the analysis will show how effectively Miller and Banner bowled. George Theobald kept wickets in excellent style. Jacobs and Bursett opened for the Merions to the bowling of Cookson and Waterman. After making 8, Jacobs was bowled by Waterman. Banner made 2 before he was cleaned bowled. G. Theobald and Ben Benjamin failed to score. Barnett hit a ball, which touched the ground right near the crease and bounded up into Cookson's hands and was given out by the erratic umpire. Barney Benjamin and J. Theobald were just beginning to add runs to the total, when one of Waterman's hit Theobald on the pad and flew up to Clark at cover point. It was clear to the spectators that the umpire gave the batsman out for the catch, as the veteran umpire is well known for his speediness in hoisting his bat as a signal for out, and it was particularly noticeable that the umpire did not hoist his bat till after the catch was made. The scorer asked the umpire "how out," and to the amazement of many the umpire replied, "L. B. W." Waterman scattered Benjamin's wicket, and three wickets to fall the batting side needed seven runs to win. Spiro and Miller proved equal to the occasion, and the latter batsman made the winning hit, amid great rejoicing of the crimson and white. Spiro and Miller continued batting, distributing their favors to all parts of the field with great impartiality. It was worth a bonanza an hour to watch the batsmen hit the bowling. Clark was tried, but could not separate the now thoroughly set batsmen. Sanderson was called into requisition,

and Spiro appreciated the change by sending the third ball over the fence for 5, and Miller also hit the bowler so lively that the captain took him off, after sending down 2 overs. Carr, who is a promising young bowler, but who, strange to say, is not tried very often, was the next bowler. Carr, who uses a great amount of head work, on his third ball tried Spiro with a slow, long hop, which the batsman appreciated by sending it into a neighboring field for 5. Constant changes were made, but it was not till 101 appeared on the scoring sheets that Miller was caught out. Spiro was immediately after run out. When Spiro and Miller became associated, the score was only 30, and between them they compiled 71 runs before a vacancy occurred. Fittock was bowled by Cookson, and the innings closed for 103, or 66 runs ahead of their opponents. Kip longstopped in splendid style, while at times some smart fielding was observable. Miller is to be congratulated for his fine performance with bat and ball, and Spiro's innings will atone for his bad miss in the fourth Trophy match. The score:

Cricket Booming in Chicago.

Rev. T. D. Phillpps, of the Chicago Cricket Club, in a letter of recent date to the *Toronto Mail*, gives a few gratifying facts in relation to the growth of the game in that city and vicinity. We quote as follows:

Cricketing here is literally booming. Two years ago there was one club in Chicago, now there are seven. They are— 1. The old Chicago Club, hitherto sustained mainly through the liberal energy of Dr. E. J. Ogden and his connections. In spite of many difficulties, external and internal, the club, by virtue of its position, still holds its old supremacy. 2. The Wanderers put a strong eleven into the field, and though badly beaten on Decoration Day by the old club, this match was hardly a criticism of what may be expected from a club containing several Canadians. 3. The club whose star seems just now to be rising is the St. George Cricket Club, composed almost exclusively of young Englishmen. It won two matches on May 20th, severely defeated Milwaukee, at Milwaukee, (107 to 18 and 19) on June 21st, and will play at home two matches on the 4th and one next day. 4. There is a junior club in connection with the St. G. C. C., which promises to do much for cricket in Chicago. It is no uncommon thing to see two of the elevens of this organization playing on an afternoon in Lincoln Park. 5. The Albion C. C. was organized this Spring, and is also composed of young Englishmen, but living on the west side, while the members of St. G. C. C. reside chiefly on the north; those of the C. C. C. and Wanderers are on the south. 6. The Rovers is the name of a new club that came into existence recently. 7. There is another west side club.

But besides these, clubs have been springing up as if by magic in the suburbs. Those at Milwaukee, Racine, Elgin, and Pullman are well-known. I venture the prediction that in Chicago and its suburbs there will be at least twenty clubs within two years, and although the game is too long and to the onlooker too slow for the average American, it is no longer a "curiosity" in the West, and must extend steadily by reason of the large infusion of the English and Canadian element.

A cricket match took place at the Oake, East Portland, last Saturday week, between the Railroad and Mercantile teams. The Railroad team made 41, of which J. E. Greene and J. Readman are credited with 12 apiece. A. A. Rowe was very successful with the ball. The Mercantile contingent compiled 65, A. A. Rowe scoring 37 not out. The howling honors were divided between J. E. Greame, Young and G. H. Andrewe.

ATHLETICS.

The much talked of wrestling match between Delmas, the Frenchman, and Cannon was held at Woodward's Garden's last Monday evening. A great crowd was present. Cannon won the first fall in — minutes, and after three hours and 18 minutes of wrestling, which for the most part was tame and uninteresting, Delmas gained a fall. The Frenchman is very strong, but has a great deal to learn before he can hope to successfully cope with the prominent wrestlers of America. At half past four neither man had gained the necessary fall for victory and the match was declared a draw. We understand that the backers of the Frenchman are anxious to arrange a match with Whistler for a large amount. This should prove a soft enap for the American. The sporting editor of the *News Letter* put his foot into the wire last Saturday. A little knowledge is a dangerous thing.

The Davis-Luttringer wrestling match, which took place last Saturday night, resulted in a victory for Davis, much to the surprise and chagrin of the talent. Davis won the first fall in 4 m. 30 s., and Luttringer the second in 4 m. 15 s. The final was won by Davis in 9 m. 35s. Luttringer is a great deal stronger than Davis, but judging by the display on Saturday night, knows infinitely nothing of the mysteries of Greco-Roman wrestling, and for that matter Davis can't be said to know very much more, if his only and favorite hold won him the match. At different times the contest was suggestive of a slugging match.

Donald Dinnie, since his advent in Australia, has quarreled with all his numerous managers, as well as a great many of the athletes. This was to be expected, judging by his previous record.

Intending competitors are reminded that the entries for the Merion games, to be held at this Bay District Race Track on September the 9th, close at this office on Saturday, August 30th.

Bell's Life will shortly be enlarged.

## HERD AND SWINE.

## Beef for Food.

In this age the useful is become the beautiful. The lank, bony, muscular trotter, with thin neck and tucked up belly, excites the admiration of those of the fair sex who, before they felt the thrilling delight of seeing their favorite win a heat on the course, would have gone into raptures over a sleek and fat pony as the perfection of equine beauty. The skinny, starved-looking Jersey has become the most beautiful of cows, because she makes more butter than any other cow can, from a like quantity of food. The sleek porker, even, round, and full, and graceful as an animated sausage, is beautiful, in the estimation of some and so too, impossible as it may seem, is the wrinkled merino, hiding as he does the golden fleece under a hideous armor of dirt. The "fancy points" are in many cases those that are most useful to mankind. A few are still straggling in the byways, but they will soon be compelled to fall into the line of progress, or be lost to sight.

Generations ago, when everybody lived as much as possible out of doors, to escape the smoke, and draughts, and gloom of the leaky, badly constructed, dungeon-like houses they dared to call homes, fat was needed to keep up the heat which blazing fires on huge hearths could give but imperfectly, and badly made and insufficient clothing would not retain. Then, hearty in a bullock lay in a full, sleek form, padded with fat. The heast that had a billiard-table top, cushioned with tallow, with pocket-like dimples between the lumps of unctuousness, won from admiring judges the highest prizes. People in those ages could actually eat such stuff and think it good food. 'Tis said the Esquimaux think train-oil good. But times have changed. In Christendom people spend much of their time in houses through which the free winds of heaven do not blow, and are clothed and warmed so well that the furnace which nature has set up in every man burns less fuel to keep the system warm. A light wood fire will do where an intense heat from concentrated fuel was once required. So people eat vegetables, fruits and grains, fish, fowl and lean meat, where once fat beef and mutton, and pork were wanted.

But our lessons in breeding and in feeding have been learned in England, or at least from English teachers; and English breeders, like Englishmen generally, are conservative. We are progressive, but we are conservative too, so while we have readily seized the best heaves to be found in England, judged by English standards, time tried and approved ages ago, we have also adopted those standards, and bred for tallow. Everybody knows, of course, that tallow is waste, almost as much so as is bone; but everybody tries to pile upon his choicest beef the last possible ounce of this waste material. He knows it will not be used as food for humanity, that it is fit only for mechanical purposes or for that hazy use, the making of oleomargarine; but he piles it up, converting good corn and hay into matter worthless for the legitimate purposes of beef. His bullock will not be "ripe" unless it is so mellow with fat that no human being could eat all but that which has by common consent been called waste. No man would feed the beef, as it comes from the butcher, to a valuable dog—unless he wanted to kill the dog.

As offered in the market, beef is a wastefully extravagant food. If it is lean, it is also, as a rule, tough and sinewy, better fitted for lacing together a belt, than for filling a yearning void under a belt. If it is "ripe" it is covered with a mass of fat which might be excellent for soap and candles, but as food is disgusting. Yet science and practice have shown us how beef may be grown and matured, to yield a large quantity of juicy, tender, and nutritious flesh, with a minimum of waste product, including tallow. For the sake of the health and the pocket of the consumer, it is to be hoped that knowledge of the science and practice of producing such beefs will spread quickly and widely.—*Prairie Farmer*.

## How to Keep June Butter for Winter Use.

It is a fact well conceded by all good judges of butter that butter made in June is better flavored than that made in any of the eleven other months. It is, therefore, very important that everyone should know how to keep the June product for winter use. Here is one way:—Pack the butter solidly in stone crocks to within an inch of the top, level it, and cut a piece of muslin and spread it over the top; then fill to the top with common salt. Dig a hole in the ground on the north of some building, or in the shade of some tree, or, if this is inconvenient, the garden will do; let it be deep enough, so that when the crock is covered, the earth on top of it will be not less than eighteen inches thick. In this hole place the crock; over it put something that will turn off the water if any leaches down to it. An old tin pan turned over makes a good cover. Pack on the earth, leaving it rounding, like an ant-hill, to carry off the surface water. If this work is done in the garden, plant over the top a tomato vine, or a few beans, or anything to shade and keep away the torrid rays of the sun. The work is then finished, until one wishes to take out the butter any time before severe frost. This method I will warrant to keep butter perfectly sweet until winter, if proper care is taken. An old acquaintance of mine tells me he has practiced this plan for years, and when he lived on the farm he used to take up his butter in November, and sell it for forty cents per pound, whereas if it had been disposed of when made, he could not have realized more than fifteen cents. This is also a good way to keep canned fruit during the summer, if one has not a proper place for the purpose. Put the cans in a box and bury it as the above, if canned in glass.

Another method is to pack the butter as before; then take a good sweet barrel (a pork barrel will be as good as anything, if sweet) in it place the crocks as closely as possible (small crocks will pack better than large ones), placing one on the top of the other until the barrel is nearly full. Then make as strong a brine as salt will make; scald it so as to skim off all impurities; when cold, fill up the barrel. If the head can be put in and the brine turned through a hole in the head, all the better. Let it stand in the cellar or in any cool place until wanted, and take out one crock at a time as it is needed. This is a little more expensive way, but it answers every purpose. The brine will not salt the butter.—*Rural New Yorker*.

## Cause of Poor Cheese.

John Gould, of Aurora Station, Ohio, writes to the *Country Gentleman* the cause of so much poor cheese: It is too much acid in making; nothing else. Good cheese is composed of water, fat, and casein. When cheese is

scalded or cooked in the whey, an acid is developed that destroys fats, and results in making the cheese dry when cured, sharp in flavor, salty, and when cut soon losing its flavor. This is not the whole damage from the sour whey. The acid liberates the phosphates, which elements are valuable in promoting digestion, and also in preventing this excessive sharpness.

One other thing is also of great damage in cheese making, and that is too rapid cooking of the curds at the start. If the steam is turned on, and the requisite heat quickly attained, the outer surface of the curd is cooked at once and before the center is warmed up, and thorough cooking is thus prevented. This partially cooked curd does not cure even in the subsequent curing of the cheese, which all tends towards making a poor cutting cheese. It is not wholly the wholesale use of the skimmers in the factories that is the cause of poor cheese, but the very cause I have pointed out. If the milk is coagulated with a minimum quantity of rennet, the curd finally cut, and gradually warmed up to the scalding point (or before) of the appearance of acidity, and after salting this curd it is exposed to the air until it gets an "acid" from this source rather than from the whey, the elements wanting in the other cheese will not be found wanting in this one.

This "dry" acidity (it might be so called) does not afford any chance for the acid to "eat" out the fats, or cut out the phosphates, but leaves them both intact. This results in a cheese of nutty flavor, luttary quality, easily digested, and when cut, does not quickly dry out and lose its flavor. This is often denominated sweet curd cheese, which it is in one sense, but in another it is not, for the sweet curd cheese is put to press as soon as salted, but in this case the curd is "broken down" by the action of the air, which gives it no after chance to develop gases while curing, as it would if put immediately to press.

There never was any good reason why there should have been such an employment of excessive acidity in the manufacture of cheese in our factories. This rule of extreme acidity is being rapidly abandoned or modified in Ohio, which is proof that it was radically wrong.

## Hints on Butter Making.

Mr. A. Baxter, a Minnesota dairyman, talks about churns, cream and butter-making in the *Wisdom Reporter*, thusly:

Any churn, of whatever shape or style, with no inside fixtures, if it but evenly agitates the cream is all right, and a churn of any other kind is all wrong.

As to the temperature of cream at time of churning—each dairyman must experiment with his own cream and thermometer. We have found that the cheap ones vary from two to six degrees, hence can advise only in a general way, as the weather, time of year, length of the time cows have been milked, all create necessary changes in the temperature. We would say churn the cream at sixty degrees in Summer, and sixty-four degrees in Winter. We always aim to so temper the cream that it will require no more than thirty minutes nor less than twenty minutes to produce butter by a steady, even motion of the churn, and when the separation takes place, stop; not another revolution. Draw off the butter-milk, pour in the churn clear, cold water, sufficient to float the butter, (which should be in small granules one-half size of wheat-grains), give the churn a gentle rocking motion by the handle a moment, draw off water, replace by clear, cold water, continue the process until the water runs clear. Allow it to stand in churn and drain until dry, remove to butter bowl or lever butter worker, weigh, and add for each pound of butter one ounce of first grade dairy salt. Carefully work the salt in with a wooden spatula, (no ladle, mind you), remove to bowl and let it stand twelve hours; return it to the "worker," and with the lever, by a rolling, crushing motion, press out all signs of buttermilk, and pack. If the package be not filled, keep the butter covered with brine until next churning he ready.

## STABLE AND PADDOCK.

## An English Authority on Action.

We have alluded to the legs of the horse in the walk following each other in succession, but in the trot two move synchronously, but on opposite sides; in very fast trotting there is an undoubted interval, when all the legs are off the ground, carrying the horse to the full extension of his stride, and affording an immense impetus as well (while all his legs are raised mid air) by the cover. A horse is said to "forge" when the toes of the fore and hind feet click. Shoe the horse short behind and catch him well in hand; if it arises from weakness, corn him up; more often it is occasioned by a bad forehand, in which case the sooner you sell him the better. Rnuers show the chief traits requisite for method of progression in the walk, *i. e.*, the legs are moved separately, at shorter intervals of time in the pace referred to than in the walk.

Harmony in action is the desideratum; disjointed action is ungainly, valueless. High action in the walk and trot is saleable, and in London it is the *sine qua non* of a good seller; but in a technical view it cannot be appreciated, for a horse must lose in speed and tire by excess in action. Dishing, darting, winding of the toe, cat action and daisy cutting are positive defects in action, and are the result of malposition or malformation of the limb. A horse should get his legs well forward and up in the forehand without deviation, and in the hind legs he should go with force, getting them well under and up; a horse that drags in his hind action is a most disappointing sale. Now, horses with straight hocks cannot get their feet well under them; a horse with reeading dog hocks is weak actioned; a horse "cut up behind," thin in the muscles of his thighs, narrow over his hips, cannot move.

Action in the hind-quarters is (1) general flexion, (2) flexion of the femoral bone on the pelvis, elevating the stifle against the body, (3) flexion of the tibia and hock, (4) the raising of the foot from the ground, (5) the straightening and forward throw of the limb. Toes are turned in or out in the forehand from the shoulder, in the hind extremity from the hip; the former a movable bone, the latter a figure. Man would cut an odd figure without his knee-pan, and so would a horse without his stifle. It is the stifle and the hock that are so important for us to be satisfied about. Now, if we observe a horse standing wide at his hocks, but wider still at the ground, we know in action he must straddle and will be slow. Again, we meet with a horse tied, as it were, from the hock down to his ankles, too close. This is a weak, cramped make. A hideous deformity is the "duck-footed horse" behind; also the subject that is bowed from his hocks down and pin-toed. The cow hock is an excessively weak, unsightly formation; and the horse with "too-open action" is the subject of a catalogue of misfortune.—*Agricultural Gazette*.

## The Secret of Breeding Race Horses.

While the purchasers of Lord Falmouth's mares must be thinking of what they must do in the future, it may not be amiss to say a few words respecting the great success that has attended the Cornish nobleman as a breeder of blood stock. It is admitted on all sides that his success in this department has been unrivalled, and that even the achievements of Sir Joseph Hawley and Mr. Merry cannot be compared with the efforts of the noble lord during the period he has devoted to the rearing of race horses. It is my purpose to say something on the theory practiced by Lord Falmouth, which perhaps explains more than anything his unexampled success.

The late Dr. Shorthouse always demanded as a *sine qua non* in the production of a really first-class racer, that the stout and really excellent blood should predominate on the side of the dam, and for a stud horse *vice versa*—that is, that the stouter blood should be on the sire's side. On this principle has Lord Falmouth acted, and by means of this principle all his greatest successes may be explained. The tap-roots of the now scattered Mereworth Stud are Silverhair, Hurricane and Queen Bertha, and all three were racers of some merit. These mares, it should be noticed, were very stoutly bred, and their stout blood largely predominated on the dam's side, and this is a desideratum in a brood mare, although a great drawback and preventive of success in a sire. I have no space in the present article, but will sometime endeavor to show that where male members of a certain family have been great failures at the stud, as in the cases of King Tom, Stockwell, Rataplan, Melbourne, Orlando, etc., whose sons are mostly conspicuous failures, their daughters were on, the contrary, great successes. On the other hand, the sons of Newminster, as a rule, did very well at the stud but very few of his daughters produced animals of any merit. Excellence of blood is maintained in the female line for a considerable length of time, and to this is due the success of Lord Falmouth as a breeder.

## Feeding Farm Horses.

This is a very trying season of the year for farmers' teams. The work is driving, is all heavy, with no off days, except Sunday, and all of them do not enjoy that season of rest. The wise farmer knows that during Spring's work and plowing time his teams will run down rapidly unless they have extra feed and care, and the latter is quite as important as the former. It costs more to restore run down animals than to keep them in good condition, while a team well fed and cared for will do more and better work.

The wear of work now comes most heavily on the muscles and the food should not only be sufficient but rich in nitrogenous or muscle-producing elements. Corn is very generally used as the concentrated feed for horses in the West. This is a mistake, since corn is largely a fat and heat-producing food. Oats, peas and barley mixed with some corn should constitute the grain feed for farm or carriage horses, especially in warm weather. Every one familiar with the tough, spirited "French horses" of Canada knows their grain feed is chiefly oats and peas. Hence they are strong and enduring, and are generally preferred above all others by city street railway companies. Mr. Stuart says a good Summer ration for work horses is sixteen pounds of oats and corn in equal quantities, ground together, with twelve pounds of cut hay. Some English and European authorities make a ration of ten to twelve quarts of oats, six to eight pounds of hay, with straw and steamed chaff. The chaff can be fed in cities or on farms having steam appliances, while good clean straw, finely cut, can be fed on any farm, though not to work horses. The writer's feed for farm horses would be plenty of dry oats, unground, if the animal's teeth are in good condition and he did not bolt his food, with a moderate feeding of good timothy or moistened cut clover. We have seen farm teams fed for years wholly on early gathered and carefully cured clover, fed dry, though they ran in the pasture during the Summer.

Had the glanders, and that's what was the matter with a man who died a few days ago near Litztown, Indiana. He became inoculated while trying to cure a horse suffering from the disease. Dr. J. Elliott, V. S., who by request accompanied Dr. Elder, of the Indianapolis Board of Health, on a visit to the sick horse and man, says there is no possibility of a doubt the disease was glanders, and yet the symptoms were not as clearly defined as those of the mule that was killed in this vicinity a few weeks ago and published in the daily papers as *not glanders*.

W. M. Robb, of Jessamine county, Ky., had a mare to foal last week that had gone 13 months and 28 days.

## POULTRY.

A correspondent of an agricultural paper writes thus: "A neighbor of ours whose hens, to our exasperation, kept laying on when eggs were 45 cents a dozen, while ours persistently laid off during the same season, on being questioned revealed the fact that his had a pail of skimmed, perhaps clabbered, milk each day, and no other drink. On comparing notes we each found that the management of our fowls was almost exactly alike, with this single difference—a difference that put many a dollar to the credit side of his ledger, while our own was left blank during the same period, and this thing had been going on for years, with the result always in favor of a milk diet."

Fowls are as profitable as any other stock the farmer can keep, and more so, provided he pays to them the same attention, and is as much interested in them, as in his other stock. In a majority of cases fowls are merely kept on the farm because they cannot well be dispensed with, and not because the farmer wishes to reap any profit therefrom. As a general thing you will find that poultry on farms belong to no special breed, but that they are a mixed up mess. Unless the farmer keeps birds that come of a good stock, and feeds them regularly, he can not expect any profits.

Mr. E. A. Rohy, of Kent Co., Mich., writes the *Prairie Farmer* that there is no necessity for so much disease among poultry. Give the fowls plenty of room, clean, well-ventilated quarters, where they will be exempt from extremes of heat or cold. If the owner has a grove of white cedar sufficient for shade in summer, and good protection from hawks, minks, etc., fowls will never be troubled with the ailment so much complained about. White cedar, or arbor vitae keeps the fowls healthy and drives off vermin.

## OUR NEW YORK LETTER.

## California Horses in the East—Baldwin's Stables at Saratoga and Monmouth Park—Jim Renwick to the Front Again—Eole Again on the Turf—General News and Gossip.

Racing at Monmouth Park and Saratoga has been very sensational during the last week. So many great races have been run that it would take up too much of your space to chronicle them all. At the Springs your horses have been doing themselves credit. Jim Renwick to-day won at a mile and seventy yards, beating a strong field in good time. He has been set down by the talent as a horse that is more at home at short distances in spite of his races at Jerome and Brighton Beach, at a mile and nine furlongs. The truth is, as his trainer, Buchanan, told me, at Saratoga, week before last, Jim Renwick has not been quite at himself at times since his races East. He has been off his feed quite frequently, starting the sensational story that they had to send to Oregon for grass. The horse is apt to go further than many people think, and is likely to do himself credit at a mile and a half, even in crack company. The Baldwin stable on Monday last ran a dead heat for a two-year-old purse, with Rapido, by Grinstead. His competitor was Corrigan's Irish Pat, by Pat. Malloy, and the finish was a desperate one. Volante, however, beat the crack Florio, in the Flash Stakes last week, and to-day Mission Belle showed her heels to a strong field of youngsters in the Spinaway Stakes. At Monmouth Park, on Tuesday last, the same stable created a great sensation with the filly Freda. She and Shenandoah were only sent down there, from Saratoga, on Saturday, and it was feared by Cooper and Holloway that the abrupt change from the bracing northern air to the musty atmosphere of the seacoast would set her back for a time at least. As the telegraph has doubtless informed you, however, their fears were groundless. Starting in the Elizabeth Stakes, nine furlongs, against a strong field of three-year-old fillies, Freda was at a comparatively low price in the betting, five to one being obtainable in spite of her good looks. Starting away in the lead she kept the track, although plunging away through the mud like a four-legged steam engine, though first one and then the other of her competitors would take a run at her. The South Carolina filly, Mittie B., was driven hard in the stretch to head Freda, but it was of no use for Holloway brought her home a clever winner in good time for the heavy track. Day after to-morrow she meets Duchess, the best filly of the year, and expectation is on tip-toe to see how the struggle will result. The Baldwin stables, therefore, are not entirely deficient in three-year-olds, in spite of the uncertainty as to Fallen Leaf's future training, and as to their two-year-olds they are a grand lot. They will be down here from Saratoga in a week or ten days, and then there will be some great contests when they meet those of their age from Rancocas, Brookdale, Chester Valley, and the other great stables. Brookwood, by Billet, Mr. Ketso's black colt, is one of the fastest two-year-olds in this vicinity. He beat all the cracks last week at Monmouth Park, six furlongs, in 1:15, and won cleverly at the finish. TuCholula and Wanda Rancocas has two rattling good youngsters by the imported stallion Mortemer, and they have shown themselves fast and stout. The Dwyers have been having hard luck of late. Their two-year-olds are either lame or sick; Geo. Kinney, Miss Woodford and Barnes are lame, Checkmate ditto, and Panique has been ailing for some time. Thus far they have not done as well as they could have expected. But all this helps this vast army of smaller owners, who benefit to a corresponding extent by their great rival's misfortunes. The champion three-year-olds of the year appear to be St. Sauveur, by Eolus, the full brother to Eole, and Rataplan, by Reform, the unbeaten victor in the Emporium Stakes, at Sheephead Bay, and the Travers and Iroquois at Saratoga. He has certainly the best credentials thus far of any of his age, though St. Sauveur has improved so much of late that he will be heavily backed against any company he meets. He is a better colt now than his great brother was at his age, and shows much more speed and dash. The Omnibus Stakes, at Monmouth Park, on the 14th, is likely to bring together half a dozen other good colts and fillies. Himalaya, the unlucky, Knight of Ellerslie, who is again doing good work, Thackeray, the big son of Great Tom, with the ice of continued defeat at last broken, and others, will face Rataplan and St. Sauveur in the rich Omnibus Stakes, and speculation is now and will be then rife as to the probable victor. Eole made his reappearance on the turf, last Tuesday, at Monmouth Park, in the Freehold Stakes, a mile and a half. He had not started before this season having been put to a course of treatment by salt bathing, at Coney Island, for bad feet, that have interfered with his training all the Spring. The great horse received an ovation by the crowd as he galloped off to the post to battle with the Rancocas champion, Drake Carter, and the latter did not have much chance with him in the end. During his enforced retirement Eole seems to have improved in vim and dash, and is not now as sluggish a goer as is his wont. He stuck to Drake Carter like a pitch plaster, took the lead when Donohue willed it, and won in a gallop amid great applause from the people. Eole, Gen. Monroe and Monitor are great favorites with the public, now that Parole has bid adieu to the turf, and with the great son of Tom Bowling in form at Saratoga, and Eole at Long Branch, the people want to see Monitor again to the front. Old "Baldy" has been high in flesh the last month. His clucky ankles interfere with his work, and Alcock is trying to race him into condition, fearing a total break down if he is persevered with. But he has shown a trifle better each race, and his admirers hope for the best.

On the 15th of August many rich stakes for 1885 and 1886 close with the Secretaries of the Monmouth and Coney Island Jockey Clubs. In the advertising columns of the BREEDER AND SPORTSMAN the conditions of all are set forth, and hearing in mind the magnitude of present turf operations East and the successes of the Baldwin, Haggin, and other California horses, it behooves turfmen on the Pacific Coast not to let their opportunities slip. Nothing is so well done as what is done at once, therefore, consult the conditions of those great stakes, and send in your entries at once without waiting until the last day. Mail or telegraph to Secretary J. H. Coster, of the Monmouth Park Association, corner of 27th street and Madison Avenue, New York City, and to Secretary J. G. K. Lawrence, of Coney Island Jockey Club, corner of 22d street and Broadway, New York City.

Yours,

PACIFIC.

NEW YORK, July 31st, 1884.

Four sons of Hambletonian now have fast pacers to their credit: Westmont, representing Almont; Jim Jewell, Aberdeen; Eddie C., Happy Medium; Mike Wilkes, George Wilkes.

## The Invisible Factor.

Great horses, like great men don't come from those heralded abroad, but from such as work their way into public favor by actual achievement, rather than the too willing fancy of a beneficiary. However in the selection of colts one must admit the element of luck, and bow to the shrive of blind chance. Of course, good judgment and ample means go far towards making luck, yet their are times when the best judgment of the wisest men is of no more avail than is a Hoodoo sign to arrest the march of a dreaded plague. All men who have looked over the records and studied the past must silently stand in awe of this potent but unknown factor, which to-day smiles upon one with victory, while to-morrow she destroys him with a breath more withering than the torch of Omar. There is always some one who for a while basks in the smile of the blind goddess, but if he be wise he will recollect that his time must come like all the others, and that he too, must give place to another favorite. Take, for instance, the records of the last twenty-five years, and what is to be gleaned? First, Alexander, with an irresistible march, carried by storm all competitors. Then came Keene Richards almost as successful, who, though he inherited a vast estate, died without means, his broad acres and his noble stud swallowed up by Jas. A. Grinstead Richards was followed by poor Buford of Bosque Bonita, with his Nellie Grev, his Equirer, his McWhirter, *et id omne genus*, proud of his race and of his own ability, but not wise in heeding the teachings of fickle fortune, for he too surrendered his estate to Mr. Grinstead, and when no longer able to bear the adverse hand of cruel fate, at his own command faced death. Even Grinstead himself, who basked in wealth, has had to pass under the rod, and his name will appear on the records no more forever. Next came Price McGrath, with victories recorded all over the land, but his light faded some years before his eyes were closed in the doom of an eternal night. George Lorillard, Milton Young, and the Dwyers followed each knowing the delights of prosperity, though of late they too have had a chance of learn how

"Sweet are the uses of adversity;  
Which, like the toad ugly and venomous,  
Wears yet a precious jewel in its head."

I don't mean that these gentlemen must necessarily follow in the steps of Mr. Richards, Mr. Grinstead, or Capt. Moore, but they must give place to a Pierra Lorillard, a Corrigan, or to some one who now possesses the magic spell, but who in turn will follow in the steps of all the rest. The uses which adversity teaches are: Not to rely entirely on oneself; not to think that success comes alone from one's own judgment and the positive precept. When in luck lay by a sufficient store for that rainy day which is sure at one time or another to overtake every patron of the turf, let his position be what it may. Some years ago a gentleman said to me that there was a saying among sporting men, that "no man could tell who would have money in the Spring." I have often recalled this of late thinking the question could certainly be answered so far as the racing fraternity is concerned if they continue to back horses in programmes with penalties and allowances, selling races and handicaps with the very large percentage in each class of horses entered that are not intended to win. The answer will be very simple. The poolseller and the bookmaker, for it is utterly impossible for one who has not a percentage to play against such odds—it is only a question of time, for closely followed, it will eat up the fortune of a Vanderbilt—I mean a small Vanderbilt, of course. There are too many "horses that are not meant." If a few of them were gracefully retired to other walks or runs it would be much better for those that are left, as racing has grown to be so vast an institution that it should be protected as sacredly as any industry in the land.—*Dempsey, in N. Y. Sportsman.*

## Greek Meets Greek.

"Whack" is the colored cook in Mr. P. Lorillard's stable, and while a sober, industrious fellow, who is above gambling as a habit, he is not averse to betting on a "suah ting." The other day "Whack," having put the final polish on his pots and kettles, came upon the track with his month's wages in his pocket, and a knowing look in his eye that meant terrible things to the ring. He said little, but insinuated that he had "sumthin' good," and that he would "paralyze the hook-makers." And he did; for "Whack" hit them right and left, and as the shades of night were falling, he hid him to his kitchen, where, unobserved, he began counting his spoils.

"Spect I'll be wearin' diamond's yet," soliloquized "Whack," as he finished and sat regarding the huge roll of dollar bills before him.

Hardly had he uttered the words when he was aroused by footsteps, and, looking up, he beheld a big, black fellow, a sort of lounge, or hanger-on the stable.

"Lord, sakes! 'Whack,' whar did ye catch-on?" exclaimed the latter, "you must clean done gone an' smash the pool-box."

"Taint my money," replied "Whack," at a loss what else to say, and he hurried it into his pocket, as he had good reason to distrust the other party. Well he might, for the fellow's cupidity was aroused, and, "when the moon on the tower was as white as snow," in the witching hour, when grave yards yawn and the festive tom cat woos his purring mate, he scaled the walls and climbed into the window of "Whack's" room. The latter was sleeping peacefully, but had taken the precaution to put his breeches, containing the money, under his pillow. Here was a dilemma. But "Whack's" visitor was not to be baffled; descending from the window he returned with a rope. One leg of the pantaloons was exposed, and to this he tied the rope and descended to the ground. A moment later there was a commotion in the room. "Polo Jim" was rushing about in his shift amid cries of "Thief!" "Murder!" "Robbers!" and "Whack" was awakened by something very like land-slide under his head, and just in time to see his breeches disappearing through the window, and to clutch upon the last leg. "There was a noise, a scuffle, a loud cry, then all was still," as they say in the novels. The thief had been captured and taken to Tatontown, but "Whack," in the goodness of his heart, rejoicing in the recovery of his treasure, declined to press the charge, and the fellow was allowed to depart in peace.—*Vigilant.*

The names of American sportsmen are absent from the Derby entry this year, and the foreign contingent has fewer representatives than usual. Lord Falmouth's name appears to a solitary entrant in Belimparia, who was re-purchased by his lordship after the recent sale. Mr. J. C. Macdonald, the well-known breeder of St. Bernard dogs, has nominated Bendora, by Bend Or, out of an Arab mare called Zuleika, and this is, *Bell's Life* thinks, undoubtedly the most curious entry in the list.

Dan Mace is said to be tired of the trotting business, and to be getting together a stable of runners.

## FISH.

## Fishing on the Yuba and American Rivers.

We publish below a letter describing the experience of a well-known and enthusiastic lover of field sports, on a recent fishing trip in the northern part of the State. It is due the writer to say that the letter was not written for publication, but it is so graphic and has in it so much of the vigor of the spirit of the veritable sportsman that we venture, in behalf of the many readers who will heartily enjoy it, to tread the line between propriety and impropriety.

If we overstep the bounds in doing so, we insist on being forgiven, and shall willingly sacrifice the life of our fishing editor as a peace offering.

CHERRY GLEN, July 29th.

FRIEND B—: Oh, what a time I have had. Well, I will tell you just a little about it. I boarded the train at Susan, at 5:20 P. M., supper at Sacramento, arrived at Cisco at 3 A. M. Went to bed, got up at 9 A. M., fine breakfast. Mr. Campbell drove me up the Yuba river three miles. I fished back, caught a nice string of McCloud trout and one Eastern brook. It was tame, as I do not call the McCloud a game fish. Very nice to eat. Eastern are game but scarce. Sunday I thought I would go up and see that good old Taft. Well I arrived at his house with a grand appetite. We were received with a warm welcome, a sportsman's shake, and had a fine lunch. Took a ride up to Donner Lake. Went down to a glass ball shoot. Taft cleaned us all out, and it made him—well, he felt good over it. Next morning he drove us out to the mill. It was a grand affair. We then took his train up, up, up, five miles to a logging camp. Had lunch, got a load of logs on cars, brought them down to the shute and it was a grand sight to see them go down like double-greased lightning into the beautiful clear water of the Truckee River. And such a beautiful spray would raise fifty feet. The shute is eighteen hundred feet long and it takes a log about sixteen seconds to come down. We drove from here to Lake Independence. Caught some nice fish in the lake but it is very tame sport. Nothing game about these fish at all. It is no sportsman's fishing, it is tame. I became disgusted and we left. While there I met Mr. McShane, of San Francisco. He was very well acquainted with you but his report of you is not good. He believed you would snuck eggs and your statements about fishing he doubts. As a snipe shooter he thinks you are a failure. We left the old gentleman and arrived at Truckee at 4 P. M. Got a darling dinner and didn't we enjoy the company of old Fred Taft? Mrs. Taft is a perfect lady. Mrs. Burckhalter made us perfectly at home and the Misses Burckhalter are simply immense. Long will I remember their kind hospitalities shown us. If we had been the Prince of Wales we could have fared no better. Well, we had to say good-bye at 8:30. Arrived at Cisco 10:30 at Mr. Campbell's. Mr. Campbell is a perfect gentleman, is doing a fine business at Cisco. Well, we went to bed and Wednesday found us with old Aleck, the boss packer and guide of Cisco. Each of us on a mule and three mules packed with goods, loads larger than themselves, for some miners. We started for the north fork of the American river, twelve miles from Cisco, over the highest part of the Sierra Nevada. When we got in sight of the river the scenery was just immense. Grand. Oh ye gods, what scenery! How made ye it! A little narrow trail, down, down we went, one misstep made by a mule and we will go fully a mile before we strike. Just while my hair was standing on end, my mule started running and kicking. I halloed to look out ahead as I thought I was a goner and would knock them all off the trail the first round. But old Jule stopped, and after we got over our scare I found that 1,350 yellow jackets had stung my mule. Golly but it was a narrow escape as the trail was only eight inches wide. We all had a hearty laugh, and arrived in camp at 1:30 P. M. Frank says: "I never was so hungry so I will go to cooking." I says: "Frank, by the time you can get a fire made, I will catch a trout in that beautiful place there within twenty yards of us." I tossed in, and no sooner did that fly strike the water, than "siz" went the reel. I landed nine of the most beautiful, gamest of game fish, in less than fifteen minutes. They are the genuine California mountain trout. Out of that cold water into the frying pan.

Oh B—! how I felt for your rotund stomach, as mine was not large enough. They were grand. After lunch we snatched up the river, catching fish, these beautiful game fish, out of nearly every nice place and nice places were all along, everywhere. What a beautiful stream! What grand scenery along! How easy the walking! no brush at all. Oh it was too fine, and such fish. Nothing less than nine inches and up to eighteen and a quarter. Plenty of them—yes, lots of them—weigh one pound each. And this stream is full of them. Talk about McCloud trout, Truckee trout, and all the rest of the lake trout, they are no comparison whatever. These nice, gamey fellows fight to the last and come out wiggling. Well, we simply caught just all we needed and I sent home to the folks a cracker box full, beauties. We got back to Cisco all O. K. I tried the Yuba again but could not enjoy it after being on the American. Oh, B—! when you want trout go there and let me go with you. I arrived at Sacramento Saturday, at 3 A. M. Saw Post and Chipman, saw the flyers at the track and got home Sunday for lunch. I never will forget this pleasant trip as it was immense. Taft has a pup for field trials—look out. Post will have three I believe, Watson, one, Chipman, one, Cosby, one,—and a good one, look out for him—Baker, two good ones, Ellery, one, G. W. B., two, H. A. B., two, J. M. B., Jr., two, and if stakes don't fill good, will put in three. When do we have a meeting? Mr. Taft has a great deal to look after, is kept busy, but he has got that pup broke all the same and it is broken. I met a friend of mine yesterday, his name is Reams. He told me he had a grand time in San Francisco. He informed me that he had a set-to with an acquaintance of mine named B—. That B— knocked him out first round but he got in on second and knocked him clean out, so much so, that B— could not come to time and he came off victorious. But he says you are tough. Now don't fool with these poor country boys when you meet them in your own town as you may get hurt and I want you to visit the American with me some time. I know you never saw such sport and I have the boss racket for blankets, spring bed, grub and et ceteras up there. So don't take any chances and get hurt this way, I am tired so I will close.

Yours truly,

J. M. B., Jr.

The New York Sun says that the Eastern trout fishing season is declared to have been miserable, and, curiously enough, the Fulton-street fishermen say that, poor as the season was, they always had more trout on hand than they could possibly sell. The general depression of business to have affected even the demand for this little luxury table.

National Association  
—OF—  
**TROTTING**  
Horse Breeders,  
Eighth Annual Meeting.  
NEW YORK DRIVING  
Club Grounds,  
Morrisiana, New York.

SEPT. 9th, 10th, and 11th next.  
\$28,000 IN TROTTING STAKES.

Stakes for three, four and five-year-olds, for 2:25, 2:30 and 2:40 stallions, and for 2:30 and 2:40 mares, will be trotted for by selected representatives of the great breeding establishments and prominent owners of trotting stock throughout the United States and Canada. The events will include the celebrated

**WILSON STAKES,**  
For Four-Year-Olds. Present Value  
**\$9,100,**

To be Increased by the Payment of \$50 each due from those of the present

**49 Nominations**  
Which Start Sensational Performances  
May Reasonably be Expected.

H. W. T. MALL, President.  
L. D. Parker, Secretary.

**AUCTION SALE**  
—OF—  
**Brood Mares,**  
**Trotting Horses,**  
Colts, Jersey Cattle, Etc.,  
BY ORDER OF  
**P. A. Finnigan, Esq.,**  
(In consequence of sale of Ranch.)  
....ON....  
**WEDNESDAY, Sept. 3d,**  
At 10 A. M., at the

HAVING CONDUCTED SOME OF THE MOST successful sales, notably those of Messrs. Whipple, Colgrove, Dietz, Couits, Dougherty, Newland & Hammond, Daniel Cook and others, we feel assured of our ability to give satisfaction in all business entrusted to our care. Sales will be made in all cities and counties in the State. We have in contemplation a series of combination or breeders' sales, similar to those so successfully held at the East. We will be pleased to enter into correspondence with parties desiring to participate in such sales. Private purchases and sales of improved live stock of all descriptions will be made on commission and stock shipped with utmost care. Several fine ranches at private sale. Purchases and sales made of land of every description.

KILLIP & CO., 116 Montgomery street.

Horses to be owned in District June 1, 1884. REMARKS AND CONDITIONS. All trotting races are held three in five; five to enter and three to start; but the Board reserves the right to hold a less number than five to fill by the withdrawal of a proportionate amount of the purse. Entrance fee, ten per cent on purse, to accompany nominations. National Association Rules to govern trotting; but the Board reserves the right to trot heats of any two classes, alternating if necessary, to finish any day's racing, or to start special race between heats. A horse making a walkover shall be entitled only to the entrance money paid in. When less than the required number of starters appear, they may contest for the entrance money, to be divided as follows: 66 2/3 to first, 33 1/3 to second. In all races, entries not declared out by 6 P. M. of the day preceding the race shall be required to start. When there is more than one entry by one person, or one interest, the particular horse they are to start must be named at 6 P. M. of the day preceding the race. No added money paid for a walkover. Rules of the State Agricultural Society to govern running races, except where conditions named are otherwise. Non-starters in running races will be held for entrance under Rule 3. Racing colors to be named in their entries. In trotting races, drivers will be required to wear caps of distinct colors, which must be named in their entries. Entrance fee, ten per cent. Entries to all the above races to close with the Secretary on Friday, Aug. 1, 1884. Write "Entries to Races" on outside of the envelope. W. T. ADEL, President. J. HINMAN, Secretary.

STOCKHOLDERS' RACE.

Remarks and Conditions.

All trotting and pacing races are the best three in five; five to enter and three to start. But the Board reserves the right to hold a less number than five to fill, by the withdrawal of a proportionate amount of the purse. Entrance fee, ten per cent. on purse to accompany nomination. Trotting and pacing purses divided at the rate of sixty per cent. to first horse, thirty per cent. to second, and ten per cent. to third.  
National Association rules to govern trotting; but the Board reserves the right to trot heats of a 2½ two classes alternately, if necessary to finish any day's racing, or to trot a special race between heats. A horse making a walk-over, shall be entitled only to the entrance money paid in. When less than the required number of starters appear, they may contest for the entrance money, to be divided as follows: 65% to the first and 35% to the second.  
In all races, entries not declared out by 6 P. M. of the day preceding the race, shall be required to start.  
When there is more than one entry by one person or in one interest, the particular horse they are to start must be named at 6 P. M. of the day preceding the race. No added money paid for a walk-over.  
Except as otherwise specified, running races will be conducted under the rules of the Pacific Coast Blood Horse Association.  
Non-starters in running races will be held for entrance under rule 3.  
Racing colors to be named in entries.  
In trotting races, drivers will be required to wear each of distinct colors, which must be named in their entries.  
Entries to all of the above races, (except fixed events), to close with the Secretary on Saturday, Aug 23, 1884.  
Entry blanks and racing rules will be furnished upon application to the Secretary.

C. H. BANE, Secretary.  
WILLACRON, Asst. Sec'y

I. DE TURK, President.

## TURF AND TRACK.

### The Lorillard Stakes at Monmouth.

The failure of the Santa Anita colts to carry off this rich stake was a disappointment, but as the California colts were at a disadvantage in point of condition, the result was not conclusive. The following account of the event is from the *Sporting Hour*:

The second number was the event of the day, the Champion Stallion Stakes, for two-year-olds. As soon as the numbers were hung up after the first race the talent wended its way to the auction pool stand, where for the first time this season there was betting with the old-time fervor. A large party of racing men had come on from Saratoga, headed by Mr. Corrigan. They carried big wads of greenbacks, and they plunged on the California trio. Moreover, they carried large sums of money from bettors who stayed at Saratoga, but who thought that the Baldwin youngsters had a moral certainty of the champion. To the auctioneer's "How much am I bid for the choice?" the first bid was \$100. It was raised by hundreds until the choice was knocked down to a man for \$800, and he took P. Lorillard. The Western men and the Californians, not to be outdone, raised Baldwin to the same figure, and thus it went, Mr. Lorillard's pair and Mr. Baldwin's trio fetching the same price in every pool, with the Kelso pair a fair third choice, the others going cheap.

Among the book-makers the money came thick and fast. The odds against the Lorillard pair started with 5 to 2. In a few minutes they were backed down to 2 to 1, then 9 to 5, then 8 to 5, 7 to 5, 6 to 5, and still the money was forthcoming. The Californians maintained themselves at 5 to 2, and it was easy to see that none of the visitors' money went outside of the auction pools.

While the money was shoveled in in the betting ring, Capt. Blake, the superintendent, had got two double-teamed harrows and a roller at work on the track, which was still heavy from the rain of the week. In fifteen minutes it was like a billiard table. Now three horses were seen being led out on the backstretch, and in an instant they were mounted and cautered over the track. "Here are the Californians!" went the cry, and every eye was directed toward them as they moved into the homestretch. A volley of applause greeted them as they swept by the stand, with Murphy on Verano, Blaylock on Volante, and Holloway on Mission Belle. And certainly if ever three horses are deserving of admiration it was the Californians.

The Lorillard pair, Wanda and Chimera, are fine lookers, but their lustre paled alongside of the bloodlike beauty of the daughter and the two sons of Grinstead. The filly, Mission Belle, is certainly a race mare all over. She is a bay with black points, with a splendid back, fine quarters, well placed shoulders and legs, which seem capable of standing any amount of wear and tear. She has the beautiful neck which characterizes the Alarms, and the bloodlike head of the Newminster family. Grinstead is getting to be a famous sire in California. He was by Gilroy, a son of Lexington, out of Magnolia, by Glucoec. Grinstead's dam was a sister of Ruric, by Sovereign out of Levity by Trustee. Verano is almost as good-looking as Mission Belle. He is a chestnut with two white stockings, but he is larger and a trifle coarser. His legs, however, seem to be made of iron. "What a steeple-chaser this youngster will make," was the exclamation of two or three ardent admirers of 'cross country racing, after looking him over. Volante is also a chestnut, and is the least good-looking of the lot, though he is handsomer and more bloodlike than seven out of ten of the two-year-olds one sees usually.

The race is easily enough described. Wanda took the lead at the half-mile pole. First Mission Belle went out to tackle her and deprive her of the lead, but she retired after a fight of a quarter of a mile. Then Verano, piloted by the redoubtable Isaac Murphy, the colored Archer, was sent up in the masterly style for which this jockey is famous. Hands and knees of the rider were working, but the chestnut failed to reach Wanda. The daughter of Minnie Minor led into the stretch. Now Goano tackled her, but she was unapproachable. When well straightened out Blaylock on Volante made a final effort and brought him out, but little Olney looked back and saw that Wanda was safe. Goano and Volante had it hammer and tongs for half a furlong at the head of the stretch, when Goano drew clear, but as Blaylock kept on riding, Garrison was driven to whip again, and under it the purple Maltese cross stayed in front and beat the red Maltese cross two lengths for second place, Wanda winning as she liked by four lengths.

The shout that went up was deafening, and certainly no man was more deserving of winning the race than Mr. Lorillard, the projector of the Stake, and as enthusiastic a breeder and racing man as there is on the turf. If there is one thing that Mr. Lorillard likes it is to win with a youngster of his own breeding, and he came near shouting with delight when Wanda came in first. The value of the stake that Wanda won was \$17,500, and as it is understood that Mr. Lorillard won more than that in bets over his filly, he certainly had reason to be pleased. It is safe to say, however, that the satisfaction of winning the race from such formidable opponents was more pleasing to his sporting spirit than the pecuniary profit.

Mr. Baldwin took his defeat in good part and like a sportsman, and to his friends intimated that although he was defeated, he was not conquered. There is no doubt that want of condition had his three youngsters; the many changes of climate and water to which they have been subjected since leaving their home at Los Angeles, must have taken the keen edge of their speed away. Speed of the highest order they undoubtedly possess, and if they do well during the remaining weeks, Mr. Baldwin will have a day of reckoning at Sheepshead Bay.

Mr. H. O. Bernard was "tickled to death" over Goano's running second. The odds against him were 40 to 1 and 10 to 1 for a place. Against his stable companion, East Lynne, 75 to 1 was laid and 15 to 1 for a place. Had Goano won, Mr. Bernard would have seriously crippled many of the bookmakers. As it was, he landed between \$1,200 and \$1,500 for a place. With such performers as Goano, East Lynne, Plunger and others, Springbok is bound to assume a commanding position among the fashionable stallions ere long.

Second Race—The Champion Stallion Stakes, for 1884, for colts and fillies two years old, to be entered at the course by four p. m. on the day before the day appointed for the race; of \$250 each, with \$5,000 added by the Monmouth Park Association and a subscription of \$500 each by owners of stallions, whose get alone shall be qualified to start; the second horse and the subscribing owner of its sire each to receive \$1,000; the third horse and the subscribing owner of its sire each to receive \$500; the winner to receive the stakes of horses entered for the race, and one-half the money remaining after the foregoing deductions; the other half to go to the subscribing owner of the sire of the winner; the death of a subscriber not to disqualify his stallion if the subscription he paid; three-quarters of a mile.

P. Lorillard's Wanda, by Imp. Mortemer, dam Minnie Minor, 107 lbs. (Olney) 1  
Clipsiana Stable's ch c Goano, by Springbok, dam Genera, 110 lbs. (Garrison) 2  
E. J. Baldwin's h c Volante, by Grinstead, dam Sister to Clara D., 110 lbs. (Blaylock) 3  
E. J. Baldwin's ch c Verano, by Grinstead, dam Jennie D., 110 lbs. (Murphy) 0  
E. J. Baldwin's h f Mission Belle, by Grinstead, dam Josie C., 107 lbs. (Holloway) 0  
N. W. Kittson's ch c Pardee, by Alarm, dam Sister of Mercy, 110 lbs. (Fitzpatrick) 0  
Mr. Kelso's br c Brookwood, by Imp. Billet, dam Broeck, 110 lbs. (Peakes) 0  
Mr. Kelso's br c Saltpetre, by Imp. Geniel, dam Salina, 110 lbs. (W. Hayward) 0  
P. Lorillard's ch f Chimera, by Imp. Mortemer, dam Lizzie Lucas, 107 lbs. (W. Donohue) 0  
Clipsiana Stable's ch f East Lynne, by Springbok, dam Easter Planet, 107 lbs. (O'Leary) 0  
P. H. McMahon's br c Eachus by Reform, dam Nemesis, 110 lbs. (M. Donohue) 0  
Dwyer Bros.' b c Richmond, by Virgil, dam Alert, 110 lbs. (McLaughlin) 0  
Time, 1:18 1/2.

Betting in pools: P. Lorillard's pair, \$200; Baldwin's trio, \$190; Pardee, \$35; Richmond, \$30; Kelso's pair, together, \$30; Eachus, \$15, and the Clipsiana pair, coupled, \$10. In the hook: 3 to 1 against Wanda, 7 to 2 against Mission Belle, 9 to 2 against Chimera, 5 to 1 against Verano, 8 to 1 against Brookwood, 10 to 1 against Richmond, 12 to 1 each against Volante and Pardee, 20 to 1 each against Saltpetre and Eachus, 40 to 1 against Goano and 70 to 1 against East Lynne. The mutuel pools paid, \$11.65.

### A Standard Stallion.

Jim Mulvenna, gray stallion, bred and owned by Sargent Bros., of Sargent's Station, Santa Clara county, crossed the line at Santa Cruz on the 15th inst., trotting the second heat of the race for the 2:40 class in 2:30. He is now standard in his own right and is one of the most promising four-year-olds in the southern country. He made a season in the stud this year, and is likely to do better later in the circuit. Jim is bred in true trotting lines, being a son of Nutwood, his dam Jane McLaue, by Budd Doble, from Lady Chilton, formerly Lady Champliu.

Budd Doble was by Geo. M. Patchen, Jr., from Lady Woodard, a fine mare and a daughter of Lady Utley.

### Rigging the Pools.

A correspondent of the Chicago *Horseman*, speaking of the race where Phallas made his record, 2:13 1/2, makes the following observations:

Appropos of this race wouldn't the true inwardness of it be interesting reading matter to horsemen? That a large number of people, including not a few friends of the field, over-rated Catchfly's speed is quite evident, but who can account for the apparent lack of confidence in Phallas by his own party? When scoring for the first heat it seemed as impossible for Bither to drive Phallas, (who had the pole), faster than a 2:25 gait, as it was for the other drivers to pull their horses back even with him, and after two or three attempts Bithers told the judge that they must keep these horses back as he could not get there any faster. When the send-off is finally effected Phallas trails far in the rear, barely saving his distance in 2:19 1/2. Witness the transformation scene. After numberless pools have been sold at one hundred to fifty on Catchfly, the horses came out for the second heat, and Phallas on the outside, outscored the party, at the word "go" takes the pole from Catchfly, (who has a great reputation for getting away and trotting to the first turn), and leads her three lengths at the quarter pole. What an eye opener for the backers of Catchfly! How vast the improvement in Bither's driving under the tuition of Counsellor Crawford!

Allow me to suggest an innovation in the judgment of trotting races where associations desire to have everything conducted on the square: Place a judge at the pool box, and he may get a cue as to which drivers are trying, (not), to win. Take the 2:19 class for example, with Catchfly barred, Overman sold favorite over the field, Tony Newell and George V. at slight odds for second place. After the first heat, where George V. was second, Overman sold for \$105 to \$10 for the field. Was there any legitimate reason for this kind of betting? Again, the black horse, Prince, in the 2:24 and 2:27 classes was second in heats varying in time from 2:18 1/2 to 2:24, and those who witnessed his finish with Frank Lauder in the first heat, have their own ideas as to what he could have done had he been permitted.

I made a great many other observations during the meeting, the most satisfactory one, on the owner and driver's account, being the victory of Will Colleder. That Thos. Foley will own a dozen trotters and Budd Doble in the snky piloting them to the first money-paying teller is the earnest wish of a "FRANK OUTSIDER."

### The Meeting at Santa Cruz.

The Santa Cruz races, the third annual meeting of the association, began on the 12th, and were as usual successful and satisfactory. The weather throughout was fine and the track good. The summaries are as follows:

Aug. 12.—Trotting; purse, \$200; three-minute class.  
Bloomfield Harry, b g—E. J. Swift.....2 1 1 1  
Hannah Lee, ch m—Thos. Kennedy.....3 2 2 2  
Charley, b s—D. W. Grover.....1 3 3 3  
Time, 2:43 1/2, 2:41 1/2, 2:40, 2:40.  
Aug. 13.—Trotting; Purse, \$500; 2:27 class.  
B. B., blk g, by Milliman's Belfounder—J. W. Donathan .1 2 2 1 1  
Tump Winston, ch g, by Primus—E. Downer.....2 1 1 2 2  
Bismarck, ch s, by Index—J. W. Gordon.....4 3 3 3 3  
Iarus, Jr., blk s, pedigree unknown—Armstrong & Car-  
rington.....3 4 5 dis.  
Capt. Smith, br g, by Locomotive—W. H. Volget.....5 5 4 dis.  
Time, 2:24 1/2, 2:29, 2:27, 2:24, 2:27.  
Same Day—Trotting; purse, \$150; three-minute class; district horses.  
Gerster, blk m, by Altoona—J. W. Donathan.....2 1 1 1  
Jim Mulvenna, g s, by Nutwood—J. P. Sargent.....1 2 2 2  
Charley, b s—D. W. Grover.....dis  
Time, 2:35, 2:37, 2:35, 2:36 1/2.  
Aug. 14.—Pacing; purse, \$400; 2:20 class.  
Belmont Boy, ch g, by Nutwood—C. S. Roberts.....1 1 1  
Sam Lewis, b s, by Echo—R. F. Simpson.....2 3 2  
Robert E., b g—P. W. Dudley.....3 2 3  
Time, 2:34, 2:40, 2:35.  
Aug. 15.—Trotting; purse, \$400; 2:40 class.  
Ed, b g—W. H. Jackson.....3 2 1 1 1  
Bloomfield Harry, b g—E. J. Swift.....2 3 2 2 2  
Jim Mulvenna, g s—J. P. Sargent.....1 1 dis.  
Time, 2:34 1/2, 2:30, 2:31 1/2, 2:37 1/2, 2:39 1/2.  
Aug. 16.—Trotting; purse, \$150; 2:50 class; district horses.  
Hannah Lee, ch m—Thos. Kennedy.....1 2 1 1  
Billy, ch g.....2 1 3 3  
M. Sanborn, b g.....3 3 2 2  
Time, 2:45 1/2, 2:47 1/2, 2:49, 2:49.  
Same day—Trotting; purse, \$500; 3:00 class.  
Allan Roy, g g, by Patchen Vernon—Jas. McCord.....2 1 1  
Tump Winston, ch g, by Primus—E. Downer.....1 2  
Time, 2:24 1/2, 2:33, 2:26, 2:30.

## How Maud S. Regained the Crown.

The commissioner of the New York *Spirit* sends from Cleveland his notes of the mile in 2:09½ on the 2d.

And it is my pleasing duty to report the greatest victory ever achieved over time by a trotting or pacing horse. Maud S. to-day covered herself with glory, and abundantly verified the statement of her owner, that she is the fastest and most perfect piece of horse flesh in the world.

A brief review of her preparation this season may interest many. The first mile given her was April 5th. Time, 3:08. The fastest mile in April was 2:27½, on the 28th. She continued to receive regular work at Chester Park, and on May 25th was given a mile and repeat, in 2:27, 2:24½. Her fastest mile in June was at the New York Driving Park, 2:13½. The fastest in July, 2:11½, on the 17th; but, on the 23d, she was given a repeat in 2:12½, 2:12½. Owing to bad weather, and Mr. Bair being sick, she did not get a fast mile from the 23d nt. until this morning, when she trotted in 2:19. About 4 p. m. she was given an opening mile in 2:23, last half in 1:08, and various horsemen noticed she moved with clock-like regularity and her old-time freedom of stride.

At 4:30 o'clock she was ready for the word, and the story of the matchless performance is best told in Bair's own language, as he kindly gave me his thoughts.

"Did you expect to beat the record?"

"Hardly. Of course, I did not know her exact condition, and it was a sort of experimental effort. If she showed me she was at herself I intended to send her as I did; if not, I would give her a good, stiff mile, hoping for a better track Monday, when we would let her do her best."

"Then you do not consider the track in its best condition to-day?"

"How could it be after the heavy rains during the week? It was fairly good; but as you leave the judges' stand it cupped out, and beyond the lower turn I found it in the same way."

Noticing a smile on the champion driver's face, my query, "Why do you laugh?" drew forth the following little preliminary incidents:

Said he, "What do you think W. H. Wilson wanted? Why only to spoil the best time on record because of a \$5 bet. Hickok bet him \$10 to \$5 that Maud could not beat her record to-day, and further said, 'I'll bet \$500 to \$300, and give you all her life to do it in.' Wilson came and told me of the bet. I said it is a small amount but a foolish bet, and he had better draw his money, but Hickok refused to let him off; then Wilson begged me not to carry full weight. I declined, saying I always carry my weight, and so he was forced to win \$10.

"Another amusing thing occurred before I got in the sulky. I slipped my watch off the chain, intending to carry it in my hand. I said to C. B. Harvey, 'I wish I had a string, in case it slips from me.' He handed me a piece, and after the mile I took it off and threw it away. A boy picked it up and said: 'You bet I'll keep that.' Mr. Harvey came too late for it, and offers a reward to find the boy.

"Now as to our movements after I got on the sulky. You saw I jogged her the reverse way of the track and opened her up from the quarter pole. As she moved past the grand stand I saw she was a great mare, and said to myself, 'You are yourself to-day.' Then I jogged her to the head of the stretch and turned herself around as her custom is when about to do a great mile. She stood a moment or two, and walked, say, 50 yards, and then she started up of her own accord, and seemed to say, 'Now let me go, I see all the people, and will show them something they never saw before.' It does appear as if a public day and big crowd stirred her up to do or die, for she did just break loose herself. I did not mean to give her such a long score, but then she was so willing I hated to bother her, so away we went on the first score. As we passed the wire she was going just about right. I coaxed her back a little, and at the quarter noted we were going at the rate of 2:11; fast enough. I chirped to her once just after we left the quarter, as I desired to get to the half in 1:04. I got there in 1:04½. Along the backstretch I met Hayes with Catchfly, and hailed him with a 'How do you like that movement?' for we were sailing. He seemed astonished, and afterwards told the boys I was going easy. I aimed to reach the three-quarter pole in 1:36, and then we would have 33½ seconds to come home in. She entered the homestretch very resolute, and at the band stand spurted, but did not carry it quite to the wire; then I tapped her lightly with the whip, and asked her for one more effort. She finished without lifting, shaking or swerving, and I stopped my watch under the wire in 2:09 3/5. Here it is; I've not started it since. That's all."

"But let us discuss it a little," I said. "Did she appear distressed after the heat?"

"Not a bit. Billy Weeks walked down with me after Grant led her to the stall, and in a few minutes she had blown out. Weeks lifted her blanket, and said he never saw anything like it. He then offered me \$100 to let him ride her just one mile, and said he would bet she could do it in 2:05. She is capital under saddle. I rode her all one winter. In fact, she is good anywhere. The horse does not live that can outlope her. She is just as good there as singly."

"Then she must be a smooth going, easy driver."

"That's what she is. She does not jar the sulky a particle, and if she was my own mare I'd bet my wife could drive her in 2:12. That mare would help her, for she knows her, and when well used she will almost drive herself."

"Then she must have remarkable intelligence."

"Indeed she has, and is not the timid, nervous animal some people think she is. When she was six years old, and I was getting her educated to noises, I hired an organ-grinder to play in her stall, and when he ground out 'Home, Sweet Home,' she put her head over the organ and almost went to sleep."

"Speaking of sulkies, whose did you use?"

"Her own Caffrey sulky weighing 50 lbs., I thought best to have a lighter one, and borrowed Inver's from Mr. Saunders. I believe it is a Pray, and weighs 45 lbs. It fits her very well."

"What is the weight of Jay-Eye-See's sulky?"

"I understand it is a 40½-lb. Caffrey."

"What is Maud's weight, and tell me about her shoeing?"

"She weighed 960 lbs. the day we repeated her in 2:12½; that was also her weight when she trotted in 2:10½ at Chicago. She wears bar shoes all around. There is nothing like a bar shoe to save the feet and legs. Her's weigh nine ounces behind and fourteen ounces forward, and a two and a half ounce weight. Her shoes were set on Thursday last, and were made by J. D. Braden, shoer at Cleveland track. I consider him a master in his business."

"What kind of bit did you use to-day?"

"A plain bar, with over-draw check and bit."

"Is she a good feeder?"

"You bet she is. We give her about twelve quarts a day, and let hay and water set by her all the time, except on the

day of a fast mile. This evening we cooked her supper and, on finding it under Grant's bed, she asked us for it."

"I saw a dispatch from Crawford last night, confirming Jay-Eye-See's great mile, and saying: 'Tell Stone and Bair we are not too proud to trot them a race.'"

"Well, they ought not to be too proud to-night. If I had my way, I would accommodate them for any amount. Why, he has no such record of performances to his credit that she has. You ought to make a comparative statement. And she has done it on all kinds of footing. Every mile track that she has ever trotted on she put a new mark on the black-board, and no horse has ever reduced it. They tell me Narragansett is a second or more faster than any other track. If so, I think she can trot in 2:05. She has fulfilled all predictions. She is not keyed up yet. I think I could sharpen her to go in at least 2:08½ at Providence. It is admitted they have got the fastest track and best man to keep it so."

"What are Mr. Vanderbilt's plans concerning her?"

"I don't know. She goes to him on Monday next in her special car to Saratoga, and I feel sorry that she will be put to road work before further lowering the mark. She is now in the best of condition, and in three weeks would blossom into her best form. I hope after Mr. Vanderbilt uses her a few days he will order me to come and get her again. If so, I'll place the record beyond the reach of any trotter we know of."

"Oh, by the way, why didn't you have a runner alongside to stimulate her at the last end?"

"No doubt a runner accompanying any horse does a little good if judiciously driven, but there was such a hub-bub around we thought best to try it alone, and if we won it would be the more creditable."

Taking up the thread of my own narration, I may mention that I sat beside Mr. R. Compton, owner of Mand Messenger, while Maud S. was asserting her supremacy. We were in the private stand, nearly opposite the wire. His watch recorded the quarters as officially given, but it stopped at 2:09 3/5. I at once proceeded to the quarter-stretch and interviewed many who stood in direct line with the wire. The majority caught it 2:09½.

Before Bair returned to weigh, the thousands present knew by the actions of hundreds of timers that Maud S. had wrested from the great little King his short-lived honor, and manifestations of delight ran all along the line.

A brief consultation was held by the timers—Mr. David Bonner, whose watch indicated 2:09½, Secretary Wm. B. Fausig's 2:09 3/5, and Hon. John Cummings' 2:09½. The public became impatient—some shouting "Time," "Time;" others, "2:09½." After a little further parley, the Board was turned out with "2:09½" marked thereon. Neither Mr. Vanderbilt nor his wife were here to kiss and hug each other, but the demonstrations of joy on every hand, from the humble member to the proud millionaire, were none the less real. I slipped my neighbor on the back. He was a stranger and a gony old cove at that, but he coughed out an enthusiastic chorus to my hurrah. The reporter for the *Cleveland Herald* states: "Three watches in the newspaper stand (immediately above the judges' stand) said 2:09½. One hundred watches held by competent but non-official timers registered 2:09½, which was nearer the true mark than that announced."

## A Great Day at Narragansett Park.

On the 1st inst., Narragansett Park at Providence, Rhode Island, saw a series of sensationel turf performances that will, as a whole, stand unheated for decades in all probability. On that afternoon Jay-Eye-See scored a mile in 2:10 and for twenty-four hours flew the champion flag. H. B. Winship and running mate turned the track in 2:06, lowering the record of Frank and mate two and one-half seconds. Phallas repeated his Cleveland record of 2:13½, and Maxey Cobb trotted a mile in 2:15½, placing him the third in the list of fast stallions. The appended description is from the *Turf, Field and Farm*.

Shortly after three o'clock Jay-Eye-See was brought out on the track and greeted with applause. Bithers sent him a good exercising mile in 2:22½. When he appeared the second time he was accompanied by the thoroughbred chestnut gelding, Gen. J. O. Nay, driven to sulky by John Murphy. After scoring once or twice the little black came flying down to the stand and Bithers nodded for the word, though his running companion was fifty yards in the rear. Steadily and methodically the little black went to and around the turn, and as he glided past the quarter the timers registered 33½ seconds. Along the backstretch the pace seemed to increase somewhat, the runner closing up a little of the daylight that intervened between him and the black shadow ahead. The half was reached in just 1:05, the second quarter being made in :31½. This was pretty fast and seemed too good to last, but on he went, Murphy urging on the runner and drawing closer, so that on the far turn he for the first time was in close proximity to Jay-Eye-See. As the three-quarter post was passed in 1:39, the quarter being made in 34 seconds, it began to look as if "Little Ebony" would fall in the task allotted him; but the mechanic behind him knew what reserve of power he had, and as the straight work of the homestretch began let him have his head. Murphy likewise gave rein to the runner and got alongside, and down the two rattled. It was a sight never to be forgotten to see the movements of Jay-Eye-See's legs, the rapid beats in front and the wide action behind. It was like well-regulated machinery, and the more you looked at it the wonder grew that it could be kept up by flesh, bone and muscle; but it was, and as he approached the goal, the momentum was even increased. Fifty yards from home Murphy got the runner to Jay-Eye-See's head and Bithers brought his whip down. The little black responded and fairly flew, but the strain was too much, and as his head reached the line of the judges' stand, six feet from the wire, it went up and he plunged into the air; but the deed was accomplished, a mile in 2:10 was, for the first time, written in the annals of the turf, and the son of Dictator, wrestling the scepter from Mand S., proclaimed himself The King. How great the performance was can be understood from the fact that the last quarter was made in thirty-one seconds—a 2:04 gait. We cannot say that the quarter was taken correctly, for it is difficult from the stand to get it exactly, but this we do say, that we have seen Goldsmith Maid, Rarns and St. Julien and Jay-Eye-See himself in previous bursts of speed, but never have we seen just the flight that he showed in this last quarter, and notwithstanding the 2:09½ since recorded by Maud S., by which she has justly regained her title Queen, we think no hazard nothing in saying that Jay-Eye-See will not be long in eclipsing even that brilliant performance.

Of course the little hero and his owner were the recipients of a grand ovation. A handsome floral horseshoe was hung around the neck of the horse, and Mr. Case and Mr. Bithers were congratulated on all sides. Accompanied by Mr. Winship, Mr. Case made his way across the track and up into the grand stand, the crowd making willing way. Arrived

where Mrs. Case and party were seated, Mrs. Case greeted him with two hearty kisses, and her two lady companions followed suit.

There was some diversity of opinion as to the correct time, but there always is in such cases. As Jay-Eye-See passed under the wire Dan Mace, who was in the reporters' quarters above the judges, remarked "10½," as he replaced his timer in his pocket. Two other timers that we saw had stopped at precisely 2:10. Mr. Case had taken a seat just opposite the wire when the trial commenced, and as he arose at its completion, a smile wreathing his face, we asked, "What did you make it, Mr. Case?"

"Pretty fast," he replied.

"But how fast?"

"Oh, pretty fast. The judges will let us know in a minute."

"But I want to get what you made it, independent of what the judges announce."

"Two-nine and three-quarters," he almost whispered.

J. B. Barnaby's H. B. Winship was brought out on the track, hitched to a sulky and driven by James Golden. At the same time Ed. Bithers had Phallas on the track, and the two were sent around together an easy mile in 2:37, the stallion heaving the best of it throughout. Then, after a rubbing down, the black son of Aristos was brought out hitched to a wagon, with his running companion, Gabe Case, a bay, and not much to look at after one has seen the thoroughbreds at Coney Island and Long Branch, but a good one, nevertheless. When the word was given Winship was going steady as a clock and at a merry clip. The quarter was reached in 30½ seconds, and the trotter had his head in front. Along the backstretch his head was even with the runner's, and it did not seem that the letter was pulling the weight. The half was reached in 1:01½, and the three-quarter in 1:34½. Half-way down the home-stretch the team was joined by Tommy Foster with a runner, and the three fairly flew home, the team passing under the wire, with Winship on a square trot, in 2:06, lowering the record of Frank and mate two and a half seconds.

Phallas, driven by Bithers, first went a slow mile, as mentioned above, with Winship, the time being 2:37½. When business was meant he was accompanied by Gen. J. O. Nay, hitched to sulky. In the first trial he went to the quarter pole in 33½ seconds, but half-way between that point and the half-mile post he left his feet, and a murmur of disappointment rolled through the crowd, but Bithers caught him beautifully and the half was reached in 1:07½. Keeping up his magnificent stride the third pole was passed in 1:42, and, without skip or hreek, he passed under the wire in 2:15, time never equaled by any other stallion. This was done with a break, and the last quarter was trotted in 32½ seconds, or at the rate of a mile in 2:10. In the second trial the full mile was trotted in 2:13½, just equaling his Cleveland record. The quarters were made in :32½, :34, :34½ and :33½. From the way in which the feat was performed we do not hesitate in expressing the opinion that Phallas can trot a mile in 2:11.

Mr. Isador Cohnfeld's hey stallion Maxey Cobb performed nobly. He is a horse of commanding size and big action. His record of 2:20½ was made in the Grand Circuit last year, but a couple of weeks ago he was driven a trial over Narragansett Park in 2:17½. A mile in 2:32 was his first essay, and then he was sent to beat Phallas' record of 2:13½. Unfortunately he made a miserably bad break just at the quarter, and was pulled up. The second trial he never made a hitch, and the mile was covered in 2:15½, time excelled by only two stallions—Phallas and Smuggler. The fractional time was :33, 1:06, 1:42, 2:15½. This was the first time that a son or daughter of Happy Medium had ever beaten 2:20 in a public trial, with judges in the stand, and it stamped Maxey Cobb a very great horse, and one of which his owner, who was present to witness the exhibition, may justly feel proud.

The day was brought to a brilliant conclusion with a double-team exhibition by Wm. Rockefeller's Enchantress and Dey Dream, which, driven by J. P. Gilbert, made their mile in 2:21½. Day Dream, a handsomely formed chestnut with a blaze face, made a break on the first turn, but settled nicely and thereafter behaved like a lady.

## Races at Vallejo.

The Solano County Jockey Club have arranged the following programme for their first meeting, to be held at Vallejo, October 9th, 10th and 11th:

Trotting; for all three-year-olds in Solano county, Nona Y. barred; purse, \$150.

Same day—Trotting; for buggy horses named as follows: J. E. Brownlie's Nig; E. McLee's Pinky; V. Harrier's Daisy; C. Radke's Fannie; W. Trahey's Lady Mac; P. Vallejo's Billy; purse, \$100.

Trotting; free for all horses owned in Napa and Solano counties, that have never beaten 2:50; purse, \$200.

Trotting; free for all horses in Napa, Sonoma and Solano counties that have never beaten 2:40; purse, \$250.

Saturday—Trotting; named race for the following horses: A. J. McPike's Nellie; T. F. McGill's Dan; D. Tierney's Sorrel Charley; Dr. Anderson's Fannie Clark; J. Brownlie's Robin; M. Quarney's Mambino; J. William's Ben; Dio Hastings' Janno; P. C. Lynch's Wicklow Ranger; purse, \$200.

Entries to the above races are to close with the Secretary, George Roe, October 1st, at 9 p. m. Five to enter, three to start; entrance ten per cent.

"Col." Boh Harlan, the colored turfman, and Henry Ormiston, of Cincinnati, and Nick Becker, of Louisville, who together with the brown gelding McBowling, owned by Becker, were ruled off for alleged fraud at Louisville last Fall, were reinstated at a meeting of the judges held in Chicago, July 27th. The judges were Col. M. Lewis Clark, of Louisville, Mr. Gavitt, of Tennessee, and Col. Charles L. Hunt, of St. Louis. The race which caused the scandal was a mile heat race, with Belle of the Highlands, Silvia and McBowling as starters. Belle of the Highlands was conceded the race before the start, and the betting was between Silvia and McBowling for second place. After the decision was announced Harlan pleaded hard for a rehearing, and finally obtained one, at which the case was fully investigated. The testimony taken, so far as it was given to the public, appeared to sustain the original decision, and show no grounds why it should be reversed. While the judges at that time failed to reinstate Harlan, ever since there have been quiet but positive statements made that he would be restored to all privileges, and that the reinstatement of others would necessarily follow. Nothing official, however, was heard until the action of the judges at their recent meeting was given out. The reinstatements went into effect on August 1st.

The Sacramento *Bee* says that Joe Howell and Fred Collier have been taken in hand again and will be prepared for the Blood Horse meeting in November.

Columbus on "Exhibition" Races.

EDITOR BREEDER AND SPORTSMAN.—Surely the American people will have enough of exhibitions of speed by the time snow flies, if all the sensational animals now before the public keep up their present clip. Westmont and running mate, Jay-Eye-See, to beat the world, Phallas, the monarch of stallions, Maud S., the handsome, peerless queen—who unfortunately belongs to a man with less sand than dollars—Ricbball, the king of the sidewheelers, Billy S., Flora Belle, Frank, Wiuship, with running mate against time or each other. If here isn't a showing sufficient for the depraved tastes of any whilom patron of the turf, then we are greatly mistaken. For the past two years my tastes have been drifting towards the thoroughbreds and every new phase of the hippodroming element drives me still nearer. The runners don't have to go about the country showing themselves as individuals before select or cosmopolitan audiences. Then why, in the name of all that is honest and of good report, do the trotters keep going around and around the circuit of sensational meetings, exhibiting themselves and the greed of their owners by combating with an imaginary foe, time? From the days of Dexter the system has grown, and Goldsmith Maid earned more dollars at this very business than a dozen of the best horses since her time have earned while pursuing a successful, though legitimate series of campaigns. In my opinion the race at Narragansett Park, October 8th, 1869, when Thorn defeated Geo. Palmer, Goldsmith Maid, Lucy and American Girl, was by far the best exhibition ever trotted by the Maid. One such race is worth more than a score of hippodromes. And the race at Chicago, in 1882, when Jay-Eye-See was finally defeated by waiting, afforded greater pleasure to the writer than any exhibition of speed I have seen him make since that time. A good 2:50 race, well contested, will afford more lasting satisfaction than a single beat in 2:09½. When Phallas, Jay-Eye-See and Prince Jerome were brought to Racine from Kentucky, Mr. Stephen Bull remarked that Phallas was the best of the three and has ever since maintained the same opinion. "Counselor" Crawford seems to be of the same opinion as he has upon several occasions of late, forgot himself so far as to state that Phallas is the better horse of the two. Phallas, in his stall, is a quiet, rather sleepy looking animal, and is evidently a horse of even temperament. His large, broad head with its heavy foretop, looks out good naturedly at his visitors and speaks well for his breeding.

The Turf, Field and Farm, which usually is as correct as any, has the following in its issue of July 25th: "Four sons of Hambletonian have fast pacers to their credit: Westmont, representing Almont; Jim Jewell, Aberdeen; Eddie C., Happy Medium, and Mike Wilkes, Geo. Wilkes."

Though Almont is dead that does not make him a son of Hambletonian and herein the T., F., and F., forgot themselves.

In its issue of Aug. 2d, the Spirit of the Times seems to be lost regarding the punishment of certain drivers who refuse or do not drive out horses after being placed behind them for the express purpose of defeating a fraud. When the judges are positive that an animal is being held back, with an intent at committing fraud, these officials have a very certain remedy at hand and one that, if used at the right time, will work wonders.

Upon four different occasions your correspondent has been a witness that the following form of procuring justice is a success.

Call the old driver or new driver, if one has been substituted, to the stand and privately though forcibly inform him that he "must win this race," or he will be suspended and perhaps expelled.

That fetches them to time about as quick as anything we know we. Of course said driver needs the protection of the judges and should have all the time needed in obtaining a fair start, etc.

The Spirit recommends the employment of home talent and in connection with this idea allow me to relate a little incident which happened under my own observation: At Council Bluffs, Iowa, during the Fall meeting of 1882, it became necessary to change drivers behind a local horse. The judges were satisfied that the horse could win and accordingly satisfied the clamor of a large number of spectators, by substituting Charley Wilson for the regular trainer and driver. When called into the stand and being acquainted with the facts, Wilson remarked that he could not drive the horse out as the former driver did not want him to win. "Why can't you drive him out?" we asked.

"Because Hartney has charge of the grounds and I am expecting to remain here the coming Winter and work my horses on the track another Spring. Should I win he will do all he can to make it unpleasant for me and may work me harm."

"We'll risk that," replied the Secretary, while Mr. Blake and myself told him to drive the horse according to our instructions or else run the risk of being suspended. Seeing the judges were determined, Charley went on and won as he pleased, which pleased the crowd, won him a new laurel for his wreath of honor and never resulted in bad blood between himself and Hartney.

We are indeed sorry where an item, such as the following, meets our eye in so prominent a journal as Wilkes' Spirit: Says that excellent paper in its issue of July 26th: "Wednesday next \* \* \* the Narragansett Park Association have secured attractions which far transcend any one day's sport that has ever been placed before race-goers. First, Jay-Eye-See will be urged to make the greatest effort of his life. His attempt will be divested of the hippodroming element \* \* \* Another attraction \* \* \* is the honest effort that H. B. Winship and running mate will make to beat Frank and his mate's time of 2:08½."

"Why we quote as above is this: As before stated, we are sorry that any paper devoted to the turf is compelled to humble itself sufficiently to make the statement that such a horse's performances "will be divested of the hippodroming element," while that a second animal will make an honest effort to defeat a rival's time. Well might a croaker hold his hands and look aghast at such a confession from so able a source and he could tritely say, "It's a pretty pass that things have come to, when even the newspapers admit fraud in every issue, but say nothing against its daily preparation."

I wonder what other animal will make an honest endeavor, or when a second sensational horse will throw aside the hippodroming burlesque!

MAY VIEW, KANSAS, Aug. 11. COLUMBUS.

Trotting at Petaluma. July 26—Purse, \$— Albe Ward, b g, by Edwin Booth—John Frisch..... 2 1 1 2 1 Belle, gr m, by Bell Alla—Wm. Burke..... 3 9 3 1 2 Molly Mack, cb m, by Alexander—J. H. White..... 1 2 4 3 3 W. B., g g, by Grey McClellan—Wm. Bibler..... 4 2 4 4 4 Time, 2:47, 2:48, 2:48½, 2:47.

Fortune's Discarded Woovers.

At Washington Park, and again at the Driving Park, a familiar name rang in my ears, but the eyes rested on only the shadow of the man who once bore it proudly. When Jerome Park was in its glory, with no rival down by the sea, when Mrs. Charles O'Connor gathered pleasant groups around her on the club-house balcony and when the name of M. H. Sanford was hailed as a tower of strength, as the synonym of honesty, of courage, the blue and red of McDaniel was carrying everything before it. In the stable were stars like Harry Bassett, Joe Dauelis, Katy Pease and Blackbird, and he who managed the almost invincible confederacy was regarded as a magician. With a wave of the wand doubt was dispelled and victory was assured. The prizes which other men eagerly coveted were gathered in by him apparently without an effort. Great was the name of McDaniel, and the populace shouted long and loud for the blue and red. The harvests of a dozen Summers have been reaped, but to me it seems only yesterday that I saw the Virginian lift his hat to the thousands who applauded when he stood on the quarter-stretch, the picture of health and confidence, by the side of Harry Bassett. Change carved with a radical hand during the night which separates the yesterday of memory from the to-day of reality. A frail, sad-looking man, with straggling locks of gray brushed back from his thin face, clad in a faded linen suit, and with an old cotton umbrella tucked under his arm, walks feebly, hesitatingly, with downcast eyes, the very personification of misfortune and decay, troubled as to bow he shall meet his forfeits, and hoping, hoping that victory, by some vagrant streak, will strike the blue-and-red in a free purse race, and thus help him to make two ragged ends meet. It is sad to think of the veteran turfman as he was and to see him as he is. If good wishes could accomplish anything, the lost magician's wand would again be placed in the hands of the aged Virginian.

The passing of the McDaniel's shadow prompted a popular trainer to remark: "It is really astonishing how many of those who make a profession of training racehorses die poor. The business is lucrative; the percentages outside of the salary amount to considerable when the stable is successful, but the roving, gypsy sort of life seems to incapacitate a man for taking care of his earnings. He spends freely to-day in the hope that to-morrow will take care of itself. Tom Patterson made thousands, but when he stopped breathing he did not have money enough to bury him. Bill Bird, possibly the best of our colored trainers, and who sent so many winners to the post, was an object of charity when he died. Jerome Edgar was penniless when he started across the silent river, and Dr. Weldon left nothing behind him. It is the exception to find a trainer in this country who lays up anything for a rainy day."

Success on the turf moves in cycles. M. H. Sanford spent thousands of dollars and tried all sorts of experiments before he made the bookmakers respect the dark blue. And when victory did begin to ride with him he bore himself as calmly as when misfortune blocked his road. He may have felt deeply, but he had the faculty of concealing his emotions. When Tom Bowling, Aristides and Calvin were carrying the green and orange of McGrath to the front, the Liard of McGrathiana was as beaming as a sunflower. His face was as radiant as the scarlet tie at his throat. Defeated and disappointed owners marvelled at his good luck, and in exultant tones he exclaimed: "Luck you call it! Luck be d—d! I tell you that you've got to have the horses to win; you've got to breed 'em!" When the end of the cycle had been reached, and the green and orange struggled along in the dust kicked up by the leading horses, McGrath grew morose and petulant and roundly swore at his trainer and jockey. He changed trainers and riders, but the evil star rested upon his stable and disappointment hurried him to his grave. It is some consolation to the under dog in the fight of to-day to know that there is a possibility of his being on top to-morrow.—Turf, Field and Farm.

Belle Echo's Campaign.

Mr. Titus and his game little mare seem to have fallen in with a hard party to beat. The time is a little too fast for Belle, although she is always there till the curtain falls. At Cleveland the record reads:

August 2d.—Purse \$2,000, for 2:19 class. Carl Davis' b m Maud Messenger, by Messenger Chief..... 1 1 1 R. P. Pepper's b m Calchby..... 5 2 2 J. Knauer's b g Beck Wright..... 2 3 3 L. H. Titus' b m Belle Echo..... 3 6 5 W. J. Gordon's cb g George V..... 4 4 4 J. E. Turner's cb g Overman..... 6 8 6 T. B. Williams' gr h Lynwood..... 7 5 7 M. M. Hedges' b g Tony Newell..... 8 7 8 Time, 2:18½, 2:16½, 2:17½. Al Buffalo a week later, August 9th.—Purse, \$2,000, 2:19 class. Harry Wilkes b g, by Geo. Wilkes, dam by Captain Walker..... 1 1 1 Calchby b m, by Administrator, dam by Almont..... 2 2 2 Captain Emmons cb g, by Continental, dam by Tiger Morgan..... 3 3 3 Belle Echo b m, by Echo, dam by Belmont (thoroughbred)..... 4 4 4 Time, 2:18, 2:16½, 2:17.

The recent victory of his 3-year-old, St. Saver, has drawn fresh attention to the young millionaire. "It is not often," says the Brooklyn Eagle's Sunday "Lounge," "that three such magnificent horses as Eole, Eolist and St. Saver are to be found at a single stable so small as that of Mr. Gebhard. If a big stable had four such capital victories as Mr. Gebhard's three horses did for him during the month of July, it would catch a heavy following of betters. All three of Gebhard's horses are brothers, and that is where his luck come in, because it is seldom that a trio of such a speedy relatives can be found. It can't be wondered at that so many men talk about the luck of Mr. Gebhard when the various hits of good fortune which have fallen into his hand are considered. With a town house, country place, three magnificent horses, the champion hurdle jumper of the world, a kennel of dogs that have taken prizes everywhere, \$90,000 a year, a robust physique, a cheerful temperament and an undying affection for Mrs. Langtry, it is reasonable that Mr. Gebhard should be contented."

A Failure.

The "new conditions" devised by the stewards of the Central New York Circuit was tried, at Buffalo on the 9th, in the race for the 2:27 class. It resulted as follows:

F. V. Johnson's Thornberg (2d beat)..... 2:24 C. J. Hamlin's Belle Hamlin (1st beat)..... 2:24 E. Doble's Charley Hogan (3d beat)..... 2:24 Belle Hamlin and Charley Hogan divided second and third money. Mr. L. Smith's Montgomery declined to start for fourth money. J. E. Schultz's Kitty Wood was distanced in the second heat. The dissatisfaction was general and in the other meetings of the circuit the new style has been abandoned.

Blood That Trote Early.

Don Carloe proved himself a wonderful colt at Chicago, July 11th, when he won the Chicago stakes, for four-year-olds in straight heats; time, 2:23½, 2:25, and 2:23½. This record has never been beaten but once by any stallion of his age this side of the Pacific Coast, and then by only one fourth of a second. It only lacks three-quarters of a second of the best four-year-old stallion record, that of the California stallion, Albert W., 2:22. It is a fact worthy of note that the three stallions with the best four-year-old records are by sires of Hambletonian and Clay blood, the latter strain coming through their dams. Albert W., (2:22), is by Electioneer, whose sire was Rysdyk's Hambletonian, his dam being Green Mountain Maid, by Sayer's Harry Clay, Alcantara, (2:23), is by Geo. Wilkes, whose sire was also by Rysdyk's Hambletonian, dam Dolly Spanker, by Henry Clay. Don Carlos is by Cnyler Clay, whose sire is a son of Rysdyk's Hambletonian, his dam, Bridget, being a daughter of old Geo. M. Patben, (2:23½), by Cassius M. Clay. Don Carlos' dam Lady Abdallah, was by Alexander's Abdallah, Jerome Eddy, (2:16½), was also bred from almost the same trotting lines that produced Don Carlos; his sire, Louis Napoleon, being by a son of Rysdyk's Hambletonian, from a daughter of Harry Clay, son of Neaves' Cassius M. Clay, Jr., The dam of Jerome Eddy, like that of Don Carlos, was a daughter of Alexander's Abdallah.—American Cultivator.

The above statement is going the rounds, but it is not absolutely correct. The arithmetic that makes 2:23½ only three-quarters of a second slower than 2:22 is peculiar, but that was probably an inadvertence.

The main fact is that the three stallions with the best four-year-old record are not all Hambletonians. Albert W. 2:22 stands at the head, but the next in rank is Romero 2:22½, who has not an Hambletonian cross in his pedigree. He is by A. W. Richmond, son of Simpson's Blackbird, dam Gretchen by Mambrino Pilot; second dam Kitty Kirkham by Canada Chief; third dam by Fanning's Tobe; fourth dam by Leviathan.

A Lost Quarter of a Second.

Captain George M. Stone, of Cincinnati, who sold Maud S. to W. H. Vanderbilt, and who had charge of her when she trotted the Cleveland race course last Saturday in the unparalleled time of 2:09½, was buttonholed by a reporter yesterday. "I am sorry," said the Captain, "that the mare was not given a record of 2:09. She was entitled to it. Mr. Cummings' watch marked that figure, and Mr. Fasig's said 2:09 3-5, which means 2:09 for a record. Nearly all the other watches showed 2:09½. You remember when the mare went under the wire the horsemen on the quarter-stretch who had been timing her set up a shout of 2:09½ before the judges announced the time. Only Mr. Bonner's watch marked 2:09½. Mr. Vanderbilt is hot about it. I received from him to-day this telegram: "Here Captain Stone drew from his pockets a handful of telegrams and picking out one passed it to the reporter. It was dated Saratoga, and was addressed to Captain Stone, and read:

"Ship Monday. Advise. According to New York papers she should have had 2:09½. Two watches showed 2:09 3-5, and one 2-3. W. H. VANDEBILT."

"To you," commented Captain Stone, "that probably does not mean much, but to me, knowing how he feels about the mare, and knowing other circumstances, it signifies that he feels peppery."—Cleveland Plaindealer.

Pedigree of Belmont Boy.

In the accounts of the races won by the fast green pacer, Belmont Boy, his breeding was given as by Nutwood, dam by Belmont. This is an error which has been corrected by the gentleman who bred the colt, Mr. W. A. Parkhurst, of San Jose. Mr. Parkhurst has furnished us the following correct genealogy:

Belmont Boy, ch g, by Nutwood. First dam, Lily Vernon, by Tom Vernon; second dam, Fanny Belmont, by Williamson's Belmont.

Tom Vernon (Tarpey Horse) by Hambleton Chief, son of Royal George; dam Lady Vernon, claimed to be by Engineer 11. Mr. Parkhurst thought Lily Vernon on purpose to breed her to Nutwood, and thinks very highly of the colt. Just what speed the Boy is capable of has never yet been shown, as he has so far beaten his fields at a jog in slow time. His predilection for the lateral gait is exceptional, as he is what is generally considered strictly trotting bred. His pedigree shows strains of Hambletonian, Pilot, Jr., Boston, Royal George, Engineer and Belmont, the Pilot blood being the only one in the list that has a pacier cross. Later in the circuit he will meet antagonists that will put him on his mettle, but as he is not only fast but bred to stay, it is hardly probable that he will be defeated if kept in form and driven to win.

A Montana Stable.

George Leiby is at present at Helena, Montana, training trotters for Hundley & Clarke. His string is as follows: Ben Lomond, Jr., s s, by Ben Lomond, dam by Morgau Sumpter and son of Erickson; record, 2:32. Kentucky Volunteer, b e, by Volunteer, dam Kentucky Girl, by Blue Bull; record, 2:32. Bishop, b e, foaled in 1879, by Princeps, dam Centrif, full brother to Volunteer; will go in three-minute class. Lewis H., h s, by Advance, son of Volunteer, dam Lady Frazier, by (Cook & Hussey's) Graphic. Drum Lummon, 2-year-old, blk s, by Ben Lomond, dam Cardinal Maid, by Cardinal.

Trotting in Australia.

ELSTERNWICK PARK, Melbourne, July 5th. Maiden trot. Purse of 25 sovs. For colonial-bred horses which have never won an advertised prize. Mile heats. Seven of £1 each to go to the second horse. P. G. Dixon's b m Maid of Mona..... 1 2 1 P. Roddy's b m Lubra..... 2 1 2 P. Kelly's b g Sparrowhawk, lt. Bradfield's b m Shyl, R. Bradfield's b g Spark, G. Milson's b m Nellie, R. Batty's b m Venus, and T. Flishe's g m Filrt, also trotted. Time, 3:00½, 3:00½, 3:05.

At Chicago, on the 9th, there was a fast race at half mile heats, won by the grey mare, Blue Bell, with 113 pounds on her. The winner was first in the first heat in 49; sixth in the second heat, won by Veruer, 115 pounds, in 49; and in the third heat in 49. It was the fastest three heats ever run. Blue Bird is a Missouri bred mare whose pedigree

The Santa Rosa Fair.

[From our special correspondent.]

The Fourth District Fair opened last Tuesday at Santa Rosa with the most favorable outlook, the many improvements that have been made on the grounds exciting much complimentary comment, while the speed programme was arranged in such a judicious and liberal manner as to draw a larger attendance, not only from the adjacent counties but also from other parts of the State.

As is usually the case at the fair, there was some delay in getting the exhibition building in working order on the opening day, but the display of fruits was both fine and complete. The first stock parade on Wednesday created a great deal of interest and the merits of the horses entered into competition were much canvassed, and it must be said that some of the trotting stock was of a very high order, and that the parade of heavy draft horses imported from France and England and some of their progeny could be equalled by any country in the State.

The first race on the opening day was a three-quarter mile dash for two year olds, for which the betting was pretty lively, Estill being made the favorite and although he was reported as being somewhat amiss, he went ahead, and being driven out to the last, won by four lengths, a close finish for second position resulting in favor of Peyton and Cito third. Considering the track and the weights, the showing was a fair one for these youngsters.

Santa Rosa, August 19th.—Three-quarters of a mile dash for two-year olds; \$25 entrance, \$10 forfeit, with \$150 added, of which \$50 to the second.

W. W. Murray's ch h Estill, by Norfolk—Lady Jane, 110 pounds (Thorpe) 1
Chas. Underhill's b h Harry Peyton, by Shannon—Miss Peyton, 110 pounds (Carillo) 2
Jos. Cairn Simpson's ch g Cito, by Joe Hooker—Too Soon, 107 pounds (Lone) 3
Hill & Gries' bc Arthur H., by Hockhocking—Maid of the Mist, 110 pounds (Remi) 0
Time, 1:46 1/2.

The second race was a purse for the three-minute class which was virtually almost a walk over for Arthron as Blanche, his only antagonist, was out of trim and temper and the result scarcely ever in doubt.

Same day—Trotting; 3-minute class; purse \$500.
Joe Arthron b by Arthron—Win Corbett.....1 1 1
Blanche b m by Grey McClellan—Wm. Bibler.....2 2 2
Time, 2:28 1/2, 2:31 1/2, 2:32 1/2.

The programme on the second day was long and varied, and the sporting men were kept busy for hours in making bets and then hedging, as the odds changed after each heat of the two final races. The race was a mile dash for all ages in which Patrol brought \$60 against \$33 for Jon Jon, \$15 for Stanislaus and \$30 for the field, in which were Forest King and Billy Johnson. There were a great many false starts and when the flag fell the two favorites were at once to the fore while Forest King was some five lengths in the rear. The pace between the leaders was fast, the quarter in 0:26 1/2 and the half in 0:51 and there the leaders, having cooked their respective goose; they began to come back to the rear horses. They were pretty hunched at the homeward turn but when Fortune called in the King, he responded by passing all the horses in succession, winning by five lengths, with Stanislaus second in the fair time of 1:44 1/2. The Oregon party made a big haul and it is the more to their credit as they stated that they had a good horse who might handily win the day.

August 20th.—Five dash, free for all; \$25 each; \$10 forfeit, with \$200 added, of which \$75 to second horse.
S. J. Jones' b h Forest King, 5 years, by Monday—Abbie W., 120 pounds (Fortune) 1
Caleb Dorsey's b h Stanislaus, 4 years, by Imp. Partisan—the dam of Motoc, 118 pounds (Duffy) 2
W. L. Appleby's b h Patrol, by Widville—Nettie Brown, aged, 129 pounds (Appleby) 3
W. L. Remi's ch g Billy Johnson, by Gleneig, 117 pounds; 0
Lee Shaner's ch g Jon Jon, by Monday—Plaything, 3 years, 104 pounds (Lone) 0
Time, 1:44 1/2.

The two other races merit but short remark save that they were contested in the most stubborn manner in every heat, the odds varying every half hour in the trot, Buck Foster, Ward and the field being equal favorites previous to the commencement, and that in the pacing race Belmont Boy at first sold at \$50 to \$30 against the field, and afterwards at one time the odds were reduced to \$55, to \$50.

Same day—District divided purse of \$400 for named horses.
John Fritch's b g Abe Ward.....3 2 1 3 2 1 1
W. Bibler's b g Buck Foster.....1 4 3 1 5 2 2
G. Jones' b g Jackson Temple.....4 1 2 4 1 3 3
T. Egge's ch g Sorrel Ben.....2 3 5 2 3 0
Mr. Rawline's m Little B.....6 5 4 6 4 0
Owner's b g Stranger.....5 6 5 5 0 0
Time, 2:41, 2:38 1/2, 2:41 1/2, 2:42, 2:40 1/2, 2:43, 2:46.

Same day—Pacing purse of the 2:22 class; \$500 divided in \$300, \$150 and \$50.
John Goldemith's ch g Belmont Boy.....2 1 2 1 1 1
John Blue's b g Kiltarney.....1 2 1 2 1 2
H. McCann's ch m Maude.....3 3 3 3 3
Time, 2:22, 2:24 1/2, 2:23 1/2, 2:23 1/2, 2:25.

Thursday the pacing race was finished Belmont Boy taking the deciding heat. The summary above is complete. The following outline of Tuesday's racing is by telegraph to the Call: The first race was a mile and a half dash, in which Bachelor, Phillip S. and Jon-Jon ran. Phillip S. was the winner by a short head, Bachelor second. Time, 2:41. Then came a half mile and repeat, in which were Blue Mountain Belle (the favorite), Quebec (selling close up), and Estelle Clark. The race was won handily in straight heats by Belle, with Quebec a good second in each instance, and when Estelle left at the post, through not joining the other horses after two or three warnings by the starter. Time, 49—48. The next race was the special purse, with Albert W. at \$60 in the pools, \$45 for Manou, and \$50 for Allen Roy. As is usual the case, Albert W. was very wild and broke several times, but trotting very fast on the homestretch he passed Allen Roy in the lead and then averged right across the gray, forcing him to the outside position, Albert W. came in first, but was placed last for foul driving, the heat being given to Allen Roy in 2:23. Manou now was a great favorite and took the second and third heats, after a close finish each time with Albert W., in 2:25 and 2:26. In the fourth heat Albert trotted squarely, and bringing Manou to a break won in 2:25 1/2, but the mare won the fifth heat and race in 2:23, Albert taking second money and Allen Roy third.

The Oregon papers say that Mr. B. B. Acker, owner of B. B., will take the black gelding North before long and trot him in Oregon and the Territories.

Westmount signally failed in his trial against time at Rochester, but it is said that he paced a quarter in that city, hitched single to sulky, in 30 1/2 seconds.

OUR NEW YORK LETTER.

California Youngsters at Monmouth Park.—Earthquake in the East.—Closing of Stakes.—General Gossip, Etc.

Yesterday was the greatest race day of the season. Though in New York it rained heavily at Monmouth Park not a drop fell, and the partially overcast skies made it a perfect day atmospherically. Fully 10,000 persons were at the course to see the great sectional race between the champion two-year-olds, including youngsters from no less than six States and the progeny of seven different stallions. The Champion Stakes for all ages was also to be run and both of the races excited heavy speculation. No less than twelve youngsters faced the starter for the Stallion Stakes. Meeting Mr. E. J. Baldwin, of your city, in the paddock, that gentleman expressed himself modestly, without the least show of braggadocio, concerning the impending struggle: "My youngsters, sir, you will find in the field behind the stand there, and while an inspection will convince you that they compare favorably with any of their age in the world, due allowance must be made for their hasty trip down from Saratoga. That one there," indicating the smallest one of the three, Volante, a bay filly, with black points, "ran at Saratoga on Thursday, and did not reach here until yesterday noon. The big chestnut," pointing to Verano, a magnificent-looking two-year-old, nearly if not quite sixteen hands high, "and Mission Belle, the filly, a big bay with a white heel, have two days the advantage of him, but the short time is all against us. Freda's Luck last week was an inducement to take the chances in to-day's race, and if we win, greater will be the honor. If we lose, there is no discredit to be attached to youngsters who have journeyed nearly four thousand miles, and campaigned ever since the first week in June. But come and see them move." Simultaneously with the word the famous mulatto boy, Murphy, mounted Verano, Blaylock vaulted into Volante's saddle, and after Holloway's slight delay with Mission Belle had brought out a guttural, "Come up by ar wid dat mare," from Albert Cooper, the colored trainer, the trio filed through the paddock, followed by a crowd of several hundred persons. As they debouched on the track the grand appearance of the Californians, united to the brilliant colors of their well-known riders, at once created a great sensation, and there was a rush to the track fences and gates to see them take their gallop. A canter around to the head of the stretch with Verano in the lead was followed by a rapid brush to the wire, in which Mission Belle apparently had all the best of it, appearing to be able to outpace the others at will. This caused a renewed rush on the Californians in the betting quarters, where the thousands were being waged thick and fast. During all this furore over the Pacific slopers the backers of Ranococas had not lost a bit of their overwearing confidence. The fine condition of Wanda and Chimera, apparent as soon as they were stripped, with Olney and W. Donohue in the pignkin, united to the very heavy commission, said to be \$10,000, executed by Mr. Pierre Lorillard in the ring, kept the Mortemers still at the head of the quotations, they leading the Western colts by a point or two at the close of business. The Plunger, too, was backing P. L. heavily, and for every bet of \$500 against \$900 he had jotted down in his little red leather betting-book, it was an open secret that he had a similar wager on Goano at odds of 10 and 40 to 1. Unfortunately, however, for the shrewd Theodore, rumor did not credit him with backing the outsider for a place, a la Dipper, who landed beyond a reasonable doubt a snug little fortune at the comfortable odds of 10 and 12 to 1 for a place. He consequently wore a broad grin all the rest of the day, and indulged in all sorts of extravagant match-making propositions. But we are anticipating. Outside of the favorites the best lookers of the lot were Brookwood and Pardee. This latter youngster showed so well in his preliminary that many took the long odds against him.

Promptly on time the twelve were at the point, and with Mr. Edgar Johnson holding the flag, vice Mr. Pinens, a fair start was soon effected for all but Pardee and Eachus, the latter being hopelessly out of it when the flag fell. Amid great excitement the first half of the race was run with Wanda and the two California colts alternately in front, the big chestnut Verano leading nearly clear midway between the half and three-quarter poles. Volante being second at this point, Wanda third, the next being Mission Belle and Goano. The impending triumph of the Pacific Slopers was however short-lived, for in the next furlong Wanda's blaze face again showed in front, and she led clear at the three-quarter pole, the excitement among the onlookers finding vent in cheers of "Wanda wins!" Coming into the straight the fleet filly not only kept her advantage, but was going so easily that her victory was assured, for the others were all driving ineffectually. The last half furlong of the race there was only one in it, and Wanda's triumphal progress home was made amid the greatest excitement seen on a racecourse this season, the whole stand rising and cheering filly, rider, and owner to the echo, making a scene long to be remembered. Goano and the California trio had a race to themselves up the stretch for the place which Goano won in the same style as his sire Springbok heat Grinstead, their sire, in the ever memorable "dead heat" for the Saratoga Cup of 1875. The colt Volante, generally esteemed the weakest in merit of the trio, proved the best on the present occasion by running into third place. Pardee made a gallant run considering his bad start, and is a colt that will make his mark. As the winner and the other contestants came back to weigh the applause broke out afresh, startling Wanda so that the handsome filly stopped, and, pricking up her ears, refused to face the excited crowd that seemed to har her progress into the paddock. Order was finally restored, and winners and losers soon settled down into the proverbial equanimity and sang froid of turfmen. Mr. Pierre Lorillard was more pleased at the victory than even that of Iroquois for the English Derby, for this one was won by a home-bred youngster, and the stake and bets had netted him a small fortune, considerably larger than his Derby winnings, which were a mere trifle outside of the stake. Mr. E. J. Baldwin, however, though defeated was not dismayed, and no one who heard his cheery reply to condolence after the race, "Wait a hit, until my youngsters have had more time," or detected the lurking twinkle in his eye, could fail to be impressed with the Californian's confidence and still abiding faith in the merit of his splendid-looking youngsters. That they made a favorable impression in spite of defeat was voiced in the audible comments on every hand, and the slow track perhaps militated against their chances, as it certainly did against those of Brookwood and some of the other youngsters. Indeed, Verano is such a big, imposing-looking youngster that it would seem better policy to save him for the fuller maturity of another year. It was predicted by more than one that his size was against his negotiating the turns as successfully as the others, and after leading in the race to the lower turn he there met his Waterloo at the hoofs of Wanda. On a

dry, fast track, however, these youngsters are liable to reverse to-day's running. The Champion Stakes won by Miss Woodford was also a great race, but the brown mare had a comparatively easy task. Yesterday the earthquake shook us up pretty lively, as the wires have no doubt informed you. No serious damage was done, but it served as a possible premonition of possible visitation. In California parlance it was "no great shakes," however, but very small ones. This week the various associations throughout the country close their stakes for this year in 1885, '86 and '87. Your columns have contained full particulars. The new St. Louis Fair Jockey Club have also opened some valuable fixtures, to close Oct. 15th. NEW YORK, Aug. 10, 1884. PACIFIC.

"Exhibitions" Worn Out.

The frequency of exhibition trots and trials against time has stirred up the bile of many a lover of genuine turf contests. In another column our occasional correspondent, "Columbus," vents his pent-up feelings in this matter, and in the same strain Mr. M. T. Grattan puts himself in print in the Breeders' Gazette. He says:

The decreased attendance at the trotting meetings of the year has been generally noted. The Gazette has attributed it to a lack of variety, and suggested a return to old-time features of saddle, team, wagon and long-distance racing. This, to the public, would be a refreshing change. But there is another evil that I would like to see every true sportsman in the land use his influence against, and that is, trotting or pacing against time. It encourages a shirking of real flesh-and-blood contests on the part of owners of very fast horses—such horses as multitudes would turn out to see in a genuine horse-race. These contests against time are snobbish; they smack of the parvenu; they are gilded with newly-acquired wealth. When it is so much the fashion to ape England, why not copy the game quality of her people? They do not race a horse against a watch—they hold the watch in supreme contempt. Who would care to see Sullivan maul a sand bag? Yet there is just as much game in such an exhibition as in watching Maud S., Johnston, Jay-Eye-See, or any other horse, start out on a dreary, spiritless struggle with a cold, inanimate piece of mechanism which they can not see, understand or contend with—that excites no emulation, srouses no ardor, creates no generous enthusiasm. Bah! I would sooner see a couple of hens fight.

Mr. J. I. Case has had his share of criticism, but he is a game man, and when he offers to risk that which he loves best upon the chance of his horse to win in an actual horse-race with the best in the land he as done a manly and sportsmanlike thing, which will go far, with me at least, in his favor. Let those defend his opponents who will, but they are the very men who drive the people away from the trotting track—men who have no sympathy for true sport, no thought for the multitude, no game qualities—only a selfish ambition born of a short pedigree to outrank somebody else, combined with a fear to put the issue of greatest speed to the true test of a horse race. I would like to see the next Trotting Congress enact a law against time exhibitions. Public sentiment demands it.

The Docile American Horse.

It has long been accepted as a theory by our trans-Atlantic kinsmen that vice in animals is almost always the result of unkindness and maltreatment received by them from their human companions, and that the paucity of vicious horses in the United States is to be explained by the gentleness, and, so to speak, the familiarity with which the noble animal is treated in every part of the Union. There can be little doubt that in no country is the intelligence of quadrupeds more developed and cultivated than in the United States, where it is well understood that by kindness alone can their characteristics, traits, dispositions and qualities be fully drawn forth. Nothing is more common, for instance, than to see an American horse harnessed to a buggy and standing alone in New York—his master having entered a shop—by the curbstone's edge, in the midst of the crush and turmoil of Broadway, one of the most crowded and noisy thoroughfares upon the face of the earth. Before descending from his huggy the master says a word or two to his horse, and leaves him standing in the street without restraint. The egacious animal, whose eyes are not shielded by blinkers, and who is not tormented by a Procrustean bearing-rein, understands perfectly that he is expected to wait until his master has transacted his business; and wait, accordingly, he does, sometimes for hours at a time, and without regard to the winter's cold or summer's heat.

Again, in the wildest parts of the Western and Southern States, there is not a farmer who thinks anything of driving his horses by night over a wooden bridge full of holes, caused by many planks having been dropped into the stream beneath. The careful beast, who may or may not have crossed the bridge on many previous occasions, feels his way in the darkness, and his head having been surrendered to him by the driver, steps as carefully and with as much precision as a dancing master. Whenever, indeed, a horse is found to be possessed of a violent, or, to use an old Yorkshire word, a "mischancy" temper, in the United States, the odds are in favor of his having been imported from abroad.—London Telegraph.

Dexter and Altamont.

A race between these stallions was trotted at City View Park, Portland, on the 16th inst., and the victory was for Dexter. The following is the summary:

CITY VIEW PARK, Aug. 16th.—Purse \$—
Dexter b s by Millman's Bellfounder—V de Lashmut.....1 1 1
Altamont, br s, by Almont—Jay Beach.....2 2 2
Time, 2:33 1/2, 2:31 1/2, 2:27.

The big California gelding, Jim Reuwick, gets away with nearly everything he starts for. He missed one victory, and only one, and then the track was very bad, where he is not at all at home. For three-quarters of a mile, or even a mile, on a good track, I think he is the peer of any horse in America, not even excepting Freeland. He is a short-distance animal, though, and when it comes to a mile and a quarter, or over, in good company, he might as well be in the stable.—N. Y. Spirit.

## ATHLETICS.

## One of Many.

Hippodroming wrestling matches have been plentiful during past three years, and the *Turf, Field and Farm* has frequently warned its readers of the fact, so that they should know beforehand the character of the shows they were asked to patronize. Recently the following interesting document fell into the hands of the editor of the *Cleveland Herald*:

"CLEVELAND, May 4th, 1882.  
These articles of agreement are made and entered into between O. E. Pooler and Lester L. Burton, ara strictly private, and the coming wrastra, which is to take place at the Academy of Music, May 8th, is to be a fixed match, and the falls to be as follows: First fall Burton wins, and the next two falls Mr. Burton goes down, and Mr. Pooler wins the two falls and the match. Second agreement: Mr. Burton is to have all the money put up by the Eston Rapids party, that is the atkaa, \$250, and half of the house; also half of all bats made outside. This agreement wa both agree to, and wa both further agree that Mr. M. J. Halay shall referee the match.

O. E. POOLER.  
LESTER L. BURTON.

"All the above agreements were carried out. Burton won the first bout and afterward laid down twice. The Eston Rapids party was skinned and instead of Mr. J. M. Halay, who refused to sarve, Mr. M. J. Ryan was referee. It calls up pleasant recollections to read these documents and may amuse the public."

For cool chask the above takas the cake, icing and ornaments included; but, aftar all, it is only one of the many wrestling franda concoctad avery day.—*Turf, Field and Farm*.

The following is a condansad resuma of the principal evants in the athletic world which were nnavoidably crowdad out of last issue:

At the second maeting of the London Athletic Club, W. H. Meek, of the Westside Athletic Club of New York, won the four-mile walking handicap from scratch in 29m. 10s., thus beating the best previous record by 19s.—At the fifth international maeting the 1000-yard race was secured by Snook. The Mosely Harrier man was concedad 32 yards start from the Manhattan flyer, and won after a desperate race. Myers' time for the distanca was 2m. 14 1-5s., which is two seconds quicker than the English record held by George. Myers made the first 880 yards in the magnificent time of 1m. 56 1-5s.—At the Bradford sports, England: 100 yards handi ap, final heat, Ritchiea (scratch) first; James (6 yards) sa cond; Barlow (6 yards) third; Livesley (3 yards) 0. Ritchie, who got very quickly into his running, came through at a tremendous pace, wa in front ten yards from home, and won by 2 yards from James, who beat Barlow by a foot, Livesley was almost, if not quite, on terms with Barlow. Tima, a yard outside of ten seconds.—The last appearance in England of the American team was at Tooting Common, Balham, London, August 4. The cablegrams are conflicting, their substance being as follows: "Myere entered in the 440-yard run with a view of beating his own time of 48 3-5s., and although he failed in that undertaking, he won the race in 48 4-5s. He also won, from scratch, the first heat of the 100-yard handicap run in 10 1-5s. Murray won, from scratch, the 4-mile walking handicap in 29m. 21 2-5s. Fredericks failed to win either of the races for which he entered, coming in fourth in the 1,320-yard handicap and second in the half-mile run. Waldron is still lame, and did not compete. The weather was pleasant though warm, and, it being the bank holiday or St. Lubbock's Day in London, there was a large attendance.

## George's One-Hour Record.

We take the following account of W. G. George's attempt to lower Deerfoot's record from *Pastime*:

George started at a rare pace, and was soon leaping the times made in his memorable ten-mile race by several seconds. At two and a quarter miles he commenced cutting records, and at four miles he was over 14 s. ahead of his time for that distance in his previous long-distance record. Still, keeping steadily at work, he improved record after record, but in his seventh, eighth, and ninth miles he allowed considerably, and it was here that he lost his opportunity. He, however, brightened up again, but on completing his tenth mile he was found to be 21 e. behind his record. There was still a chance that he would accomplish his task, but unfortunately he was not aware of the exact time he was doing, or he thinks he could have gone sufficiently faster to have covered another fifty yards in the hour. His time at eleven miles was 17 3 5 a., and at eleven and a half miles 7 4-5 s. behind Deerfoot's doubtful record at those distances. The pistol was fired, by our watch, 3-5 s. before the hour had expired, but that difference would, of course, not have allowed George to cover the extra thirty-eight yards. He stopped directly he heard the report, although had he continued he would have been sure of second prize, but as his only object was to make the record he generously retired.

Appended are George's times for each mile, those marked with an asterick being the best amateur records: One mile, 4 minutes 45 3-5 seconds; 2 miles, 9 minutes 45 seconds; 3 miles, 14 minutes 52 3-5 seconds; 4 miles, 19 minutes 59 4-5 seconds; 5 miles, \*25 minutes 7 4-5 seconds; 6 miles, 30 min. 21 1-2 seconds; 7 miles, \*35 minntea 37 seconds; 8 miles, \*40 minntea 57 2-5 seconds; 9 miles, 46 minutes 19 seconds; 10 miles, 51 minntea 40 4-5 seconds; 11 miles, \*57 minntea 9 3-5 seconds; 11 miles, 932 1-2 yards in one hour.

Deerfoot was accredited with the feat of covering 11 miles 970 yards in the hour, but as we have elsewhere stated, there can be no doubt that it was not fairly accomplished. When presenting the prizes the honorable Secretary G. P. Rogers, etated that the committee had determined to present W. G. George with a gold medal, whereupon will be inscribed the whole of the records he has made at Stanford Bridge.

The Nemeans are preparing for an athletic exhibition, which will probably take place in September. This club can now boast of a membership exceeding 100.

Entries for the Merion games on September the 9th, can he made at this office up till next Saturday, Aug. 30th.

John Haggerty, of Stalybridge, England, accepts the challenge of James Finney for a 500-yard swim.

The exhibition of the Pythian Athletic Club, held at Saratoga Hall, was well attended.

The following antries are announced as having baan made for the professional sprint meeting to ba hald at Exposition Park, Pittsburg, Pa., August 16th; H. M. Johnson and F. W. Stone of New York, M. K. Kittlaman of Kansas, Fred Rogers of Philadelphia, G. H. Smith of Pittsburg, W. Boyd of Canada, E. S. Ferguson and John Ryan of Nova Scotia, James Quirk of Brantford, Ont., and William H. Hough of Niles, O. Johnson has been training on the grounds of the Williamsburg A. C., and is reported to have done some very fast work in practice. August 11th he gave J. G. Mason of said club thirteen yards start and a four-yard beating in one hundred yards, two clockars making the time 9 1/2 s., and another, Jack McMaster, 9 3-5 s. The latter will accompany Johnson to Pittsburg.—*Clipper*.

Fred Cook won the swimming match at the Newport Baths last Sunday. He will no doubt win the match tomorrow, and thus become the possessor of the handsome madal.

The alection of officers of the Olympic Club will take place the first Tuesday in September. This election will be the most important one in the history of the club.

Whistler is matched to wrestle the Frenchman, Pietro Delmas.

Weston, the pedestrian, has returned to America.

## CRICKET.

Al Theobald, a former captain of the Merions of this city, recently scored 31, not out in a match between Cains and Pembroke colleges, England.—The Australian team will not visit America.—On July 15th the Australians defeated Leicestershire by ten wickets.—There is not much prospect of a San Francisco team visiting Portland this year.—Middlesex suffered defeat at the hands of the Australians by an inning and 31 runs. Middlesex 53 and 106; Australia 188. (Murdock 64 not out). Spofforth secured 12 wickets for 43 runs.—On July 24th, Sussex scored 396 in their first inning against the Anstraliens, while the latter had lost six wickets for 223 when atumps were drawn for the day. H. Phillips and G. N. Whyatt each scored over a century for Sussex.—The Australians defeated the Players on Aug. 1st at Kensington Oval by nine wickets. The Players were all out for 55 runs in their second attempt, when the spectators made a violent demonstration against the Players, broka the wickets, pulled up the ropes, and caused a general maela. The moh were incensed by the belief that the Players were careless after the gata monay had been taken.—The Merions will play against the Unions at Grass Valley on September 1st.—Admiral Hornby entertained the Philadelphia Cricket Team aboard the Nelson's flagship Victory, on Friday, July 31st, at Portsmouth. In the evening there was a ball at the Admiralty House at which the King of Sweden was present. On Saturday they were entertained by the Albart Yacht Club of Portsmouth, and on Sunday they took a cruise to Spithead Fort.—The last match of the tour of the Philadelphians against the Civil Service ended in a draw. The Americans scored 311 in their first, and the Service 237. The American lost 1 wicket for 160 in their second attempt. Scott and Thayer were not out with 71 and 64 respectively.

The following paragraph which refers to the conclusion of the Liverpool match is taken from Howard Mac Nutt's letter in the *Sporting Life*:

"Another batsman and another great catch by 'Johnie' out in the 'country,' 7 for 111. The next willow-swinger made a hit for three, and Liverpool almost fore out its individual and collective throat. Lowry took a wicket, 8 to 114. Four more runs would put us under. Time was close at hand. Ten minutes to seven. The batsman came running in to make that four runs. A swipa and Thayer closes his grand fielding record of the day by catching the leather almost over the ropes, 9 for 114. The last man came in with hot haste. He hit Lowry to leg and Clark dropped an easy fly. This seemed the last straw, but the muffer in the next over carried away a middle stump which stood behind Liverpool's last hope, 10 for 114. We won by 4 runs as the clock in the club-house tower rung seven.

"I need not speak further of this match, of the excitement at its finish, of our delight and Liverpool's disgrace. All lovers of a good game, whether of cricket or base ball, know what a tight match is. However, here upon foreign soil, with a foreign crowd of spectators, and friends at home waiting for the news made things more intense I assure you. Singularly, in the late match with the Australians Liverpool lost the game by one wicket, and no doubt our successful 'crawling out of the hole' will impress that club with the belief that fortune has frowned upon them. We left Liverpool next day, after a most enjoyable dance at Mrs. Taylor's Birkhead Mansion. There was a delightful tone to the music that night. The waltzes sang of victory, while the jolly lancers fairly sparkled with meriment. The boys danced till long after midnight, and were unanimous in the opinion that Tuesday, July 8th, was a great day all through for Philadelphia cricket."

## All England vs. Australia.

The first of the aeries of three games between All England and Australia resulted in a draw, but greatly in favor of the Antipodeans. The record match resulted in a crushing defeat of the Australians, owing to the grand hatting of A. G. Steele and the wonderful bowling of Peate and Ulyett. By cablegram we learn that the third contest came off at Kennington Oval, on Aug. 11th, 12th and 13th. The Australians were all disposed on the second day at 4 o'clock, aftar having compiled the extraordinary total of 551 runs. England made 346 and were obliged to follow on, and at the expiration of the time had lost two wickets for 85 runs. The match thus resulting in a draw—a most unsatisfactory result for the Australians.

We learn by telegraph that the cricket tournament at Portland and Victoria, best two games in three, resulted in victory for the home team who won the first and third games.

The sixth game for the Harrison Trophy will take place this afternoon at the usual place. Wickets pitched at 2 o'clock sharp.

The University will hold their Field Day about the middle of September. The track is now being put in condition.

I did not sea the England and Anstralia match, but I am told that Ulyetta' catch, which dismissed Bonner was one of the most extraordinary bits of cricket ever seen. Ulyett was bowling and sant down a ball which Bonnor drova with all his force. People's eyes instinctively turned to the boundary to see where it would hraak through the line of onlookers, but to the amazement of averybody, the line remained unbroken. Then they glanced at Ulyett and saw that he had put his right hand out and caught the ball. At what pace could the ball have been traveling? Who can estimate the speed of a ball which such a bat as Bonnor hits his hardest when it has gone two and twenty yards! It is marvellous to ma that Ulyett could have seen the ball.—*Rapier, in the Illustrated Sporting and Dramatic News*.

## THE DRAMA.

## Vienna Garden.

As we announced last week the new troupe of Spanish Students have arrived and appeared before our public. While neither so numerous or so powerful as their predecessors—the absence of the violin and cello, in the hands of masters, being sensibly felt—they are equal to them as artists, and in the delicate and exquisite finish of their execution, perhaps superior. This is the general verdict, and the large, intaligent and enthusiastic audiences avery night since Saturday, proves the verdict to be correct. There can be no doubt of the present troupe being highly appreciated by our musical people. One feature they possess is very agreeable—that of playing popular airs known to all, such as "When the Robius Nest Again," "Beautiful Violets," and so forth. Such music in their hands gains additional charms. Yet operatic music from all the standard authora is given by them with charming grace and spirit. There can be no doubt of the success of the engagement. Next week, we believe, Lillian Smith, now engaged at Santa Cruz, will form one of the interludes. Miss Brascomb, as she deserves, has been well received as the vocalist of the time being. We are sorry to see the wrong apirit of encora which prevails. Legitimate encora, showing appreciation, is all right, and should be respodad to; vulgar, noisy, and eternal encora is all wrong, and should not be respodad to. It is capable of two interpretations—it may ba enthusiasm, or it may ba meanness. It is one thing to have what is dua for the entrance money; it is another thing to gat a dollar's worth of music for twenty-five cents of money. This ia a San Francisco vulgarity, and we are sorry to see it so perseveringly maintained.

Next Monday evening Miss Emma Dubois and George Gosella, doubla flying trapeze performers, appear, who ara allowed by all authorities to be the greatest artists in their line known in the world. On Friday night, next week, Miss O. T. Kimball, direct from Boston, will appear. We have looked over her record in the Atlantic press, and aha ia unaniously allowed to ba a most accomplished and charming soloist. These additions, with the Students, will make a grand performance.

## BICYCLING.

Bert Hatch, the long-legged amateur bicyclist, ia very anxious to ride a race with Fred F. Merrill, mile heats, beet two in three, asking a handicap of fifty feet. Some time since, Merrill offered him 100 feet, but that was before Hatch got his new 58 inch wheel. It is thought that Warren, the Astoria champion, will be up in a few days and that a "three handed match" can be arranged. The party of eight, who went down to north beach, report fine exercise. With the winds at their back they fairly flew, but on the return trip headwinds retarded speed.—*Oregonian*.

The bicycle fever has taken hold in this place and we may expect to see several before long. Mark Day handles his very well for the practice he has had. We also have a champion English bicycle rider here.—*Ventura Free Press*.

The five-mile bicycle championship of Victoria, Australia, was won by F. Stokes in 18 minutes 34 seconds on July 1st. The track was against good time.

Races are shortly to be held at Sydney, emblematic of the championship of Anstralia. Riders from all the principal cities will participate.

A New York Exchange, speaking of the target frauds committed recently at the Bremen rifle competitions, for the principal prize speaks as below. As this rascality occurred in Germany, it would be well to find out, if possible, who originated the scheme—the German or the American? We refer to the matter again because we had something of the sort amongst ourselves at the late meeting of the California Rifle Association, creating difficulties and separation which, we fear, can never be reconciled. Let these two cases be a warning to us, to take care nothing of the sort ever occurs again at our targets. No punishment is too great, for gentlemen will not frequent the target if subject to such wrongs and insults.

Our exchange says: Bremen and Hanover are agitated by the greatest scandal which has ever disgraced their sporting annals. In the recent Bremen rifle competitions the principal prizes were won by M. Wangarsheim, a resident of Hamburg, and Mr. Winter, an American. The wonderful regularity and accnray with which these gentlemen made bull's-eye scores astonished the native marksmen, who had never witnessed such marvelous shooting. The strangers were envied and feted like heroes, and coaxed to make the grand tour of the different prize-meetings. They attended the rifle competitions at Hanover Saturday, and there maintained their reputation as phenomenal marksmen by taking most of the principal prize. The scores made were all so extraordinary as to raise snspicion among some of the defeated contestants, and an investigation was made. This has just resulted in the discovery that the big records of both Wangarsheim and Winter were obtained by collusion with the targetmen, who had been bribed to assure certain of the prizes to the adventurers. Wangarsheim and his target-man have been arrasted, and will be placed on trial for fraudulent practices.

Wm. McGuigan, Jr., of Small Hopes fame, who was reinstated at the May meeting of the Board of Review of the National Trotting Association, with the exception of the drive, has now, by permission of President G., that restriction withdrawn.

THE GUN.

The Game Law.

Table with columns for months (January to December) and rows for various game animals (Quail, Partridge, Rail, Grouse, Dove, etc.).

BIOGRAPHICAL SKETCHES.

Mr. Crittenden Robinson.

In commencing our biographical sketches for the gun column, we think the selection made for the place of honor is quite as appropriate as the selection made for the rifle column...

Mr. Robinson, who by his performances with the gun, through a series of years, has earned the title of champion shot of California, is a son of the late Hon. Todd Robinson, at one time a District Court Judge, a position equivalent to a Judge of the Superior Court at the present time...

Although Mr. Robinson had long before shown a passion for the gun and had distinguished himself in snipe, quail, and duck shooting, for coolness, quickness, accuracy and nerve, it was not until 1876 he appeared at the trap in public pigeon matches. It would be needless and tedious to give the details of all his public engagements...

There are many reasons why this record will be useful and acceptable to our general readers fond of the gun, as well as to the members of the club. We hope to give the record of all the clubs for the season in the same way. By this analysis the precise strength of every man shooting at the trap can be seen in a moment, when his strength is required to be known. As a reference it will be very convenient.

which for the last six years he has been honored with the presidency, and to-day he is again far ahead for first medal in the season's general average. Some two years ago he paid a visit to his parents' old home in the South and received a general welcome as the representative shot of the West. During this visit he measured his strength against the best men in the Union at the State shoot at Louisville, and brought home a number of valuable trophies.

In the field his style of beating a piece of ground is perfect, and his shooting usually as deadly as at the trap, a quality, somehow, not always found in the same man, though we see no reason why it should be so. In both positions he is cool as ice, calm as a judge on the bench, and quick as lightning.

Where, however, we have the most admiration of Mr. Robinson is in his connection with the State Sportsman's Association which to him, more than to any other man, owes its origin and present importance. We need not, at this moment, give our individual opinion of the necessity and utility of this organization, for it is long since on record; but we may repeat that to it, more than to anything else, we owe the present increase to our ranks of shooters, the better sentiment prevailing as to the preservation of public game, and a stricter enforcement of the law.

Alameda Gun Club.—Analysis for the Season.

There are many reasons why this record will be useful and acceptable to our general readers fond of the gun, as well as to the members of the club. We hope to give the record of all the clubs for the season in the same way.

Table with columns for months (March to June) and rows for various shooters (Adams, Bennett, Pollak, Knowles, etc.) showing scores and kills.

At Bird's Point.

On Saturday last the Neophyte Club, formed during this year by members of the Alameda Sportsman's Club for the sake of having extra practice, held their last medal shoot for the season at Bird's Point. In accordance with the object of the club's formation, the Neophytes have been very punctual in attendance, and it was only to be expected, therefore, that on Saturday, when the final ownership of the medals must be determined, there would be a goodly number on the ground.

reports give the birds as a poor lot. This is not so. A few refused to rise on leaving the trap, but the probability is they were hurt by the trap. Generally they flew well, quattering at good flight, many, in fact more than we ever saw on any one occasion before, quattering to the left would turn sharply to the right if not dropped, and that is one of the most trying shots possible in using second barrel, either in trap or field shooting.

Table showing scores for various shooters (Bennett, Upham, Pollak, Goodall, etc.) in a pigeon shooting match.

Pigeon Shooting—At Bird's Point.

The match, open to the State, gotten up by George Bird, on Saturday last, at Bird's Point, for some reason did not bring out either shooters or spectators, there only being three of the former, and very few of the latter. This naturally made the sport poor all day, the men at the trap seeming to feel the influence more than others.

Table showing scores for various shooters (Robinson, Slade) in a pigeon shooting match.

Another freeze-out was then arranged under the same conditions, Robinson winning with eleven birds. The following is the score:

Table showing scores for various shooters (Robinson, Slade) in a pigeon shooting match.

At the Six-Mile House.

The Occidental Wing Shot Club met on Sunday, at the Six-Mile House, for their sixth and last shoot of the season, which, as in other cases, decided the final ownership of the club medals. This club uses clay pigeons, 10 birds each, 18 yards rise. The weather was cloudy and not altogether favorable, but the shooting by the ten members present was certainly very good, notwithstanding.

Table showing scores for various shooters (P. J. Walsh, H. Blanken, W. Dunshee, etc.) in a pigeon shooting match.

The season's average of those competing for the medals is as follows:

Table showing average scores for various shooters (P. J. Walsh, H. Blanken, P. Funcke, etc.).

The Messrs. Hedley, the Dunshees, E. Funcke and B. Roman have only recently joined the club, and did not contend for the medals on Sunday, though some of them made excellent scores for beginners.

It will be recollected that when Mr. Graff shot so well in a late match at Bird's Point, his gun burst but fortunately without doing any serious injury. He afterwards sent his score and old barrels to the Remington Company, and they returned him a beautiful pair of new barrels free of charge.

The San Francisco Gun Club will hold its fifth and last shoot for the season at Bird's Point to-day. We imagine it will be worth seeing.

## NEW YORK AGENCY.

Mr. C. C. Pettus at the office of the "Sportsman," 46 Murray Street, is duly authorized special representative of the BREEDER AND SPORTSMAN in New York to receive subscriptions and arrange advertising contracts.

## SACRAMENTO AGENCY.

Residents of Sacramento and vicinity, desiring to subscribe or advertise in the BREEDER AND SPORTSMAN, can do so through our agent, Mr. M. J. Henley, Russ House, 1009 J street.

## ADVERTISING RATES.

Displayed, \$1.50 per inch each insertion or pro rata for less space. Reading Notices set in brevity type and having no foot marks, 30 cents per line each insertion. Lines will average ten words. A discount of 10 per cent will be allowed on 3 months, 20 per cent on 6 months and 30 per cent on 12 months contracts. No extra rate charged for cuts or cutting of column rules. No reading notice taken for less than 50 cents each insertion.

San Francisco, - - Saturday, August 23, 1884.

## Dates Claimed.

Sonoma and Marin District Association, Petaluma, August 25th to 30th.

Thirteenth District, Marysville, Aug. 26th to 30th.

Golden Gate Fair, Oakland, September 1st to 6th.

Chico Fair Association, Chico, Sept. 1st to 6th.

State Fair, Sacramento, Sept. 11th to 20th.

Ninth District Fair Association, Rohnerville, Sept. 23d to 26th.

San Joaquin District Fair, Stockton, September 23d to 27th.

Santa Clara District Fair, San Jose, September 23th to October 4th.

Monterey Agricultural Association, Salinas, Oct. 7th to 11th.

Fresno Fair Association, Fresno, October 7th to 11th.

Los Angeles Fair Association, Los Angeles, October 13th to 18th.

## Maud S.

And now the telegraph brings the intelligence that the "Queen of the Turf" has been sold by Vanderhilt to Robert Bonner, and the first act of the farce, in which she has played such a prominent part, has come to an end. Mr. Bonner has been consistent in the course he has followed; the "railway magnate" has made a pitiful exhibit of silliness, peevishly attempting to bring into disrepute that which he has formerly sanctioned, and in sully his own name has not spared that of his father. Before the "old commodore" was shattered by disease and the hurden of four score years, he would have talked more forcibly than polite to a son who had made such a pusillanimous display, and as hypocritical as it was cowardly. Not satisfied with insulting the owner of Jay-Eye-See, he indirectly assails every man who trots or races horses and pharasaically proclaims himself the superior of those who measured by the standard of the highest morality, are far above him.

We will be well pleased when trotting associations put an end to all that kind of foolishness; when they will not be a party to encouraging a system which operates adversely to the general welfare of trotting interests by striving for sensational effects in place of legitimate contests for mastery. "Beating the record" is now the supreme aim. The watch is the only test and a fraction of a second subtracted heralded as an achievement of far greater merit than defeating a field of competitors. There is a lot of humbug in all of it. We read that when the starting judge gave the signal a hundred slender pointers commenced the journey around the dial. A difference of two heats in the delicate machinery was enough to evoke cheers from thousands of throats, or the sullenness arising from a fruitless effort. Without the time-measurers not a man in the vast assembly could tell whether the sceptre belonged to king or queen; with it there are unanswered questions as to which is entitled to supremacy.

When driven on the same track and within a few minutes of each other, the time taken by the same men and with the same watches the test would be as fair as could be obtained. Even then it would fail to decide which was the better animal, and the only method to determine that satisfactorily is an actual contest in accordance with trotting law. But the worst feature is the shadow these trials cast on trotting which has not a sensational element. The rest of the programme awakens little interest, and no matter how good a race may be, com-

parisons are instituted, and the data accepted is the record of the watch. This will lead to the abrogation of all classes excepting those which are arranged for the benefit of the stars, and as was seen at a late prominent meeting trotting will degenerate into "trials" to lower records, racehorses pulling trotters and pacers along, and female jockeys riding sorry steeds around the course.

The attempt of Mr. Vanderhilt to cast aspersions on all who trot horses for money is so supremely ridiculous that it fails in the intended object. The position he has lately taken is so ludicrously absurd that only the most silly have been imposed upon by his assumption of superior virtue. Claiming to have refused offers of more money than he received for Maud S., because the parties who made the proposal intended to use her for the same purpose that Mr. Vanderhilt has ever since he became her owner, is too frivolous to impose on anyone that has a particle of ordinary sense. If he has rejected such offers, the motive for doing so must have been entirely different. The most plausible reason is that he was afraid that there would be a meeting, perhaps a series of them, between Maud S. and Jay-Eye-See, and that the little gelding who is only one quarter of a second behind her, with an experience of four years less time, would defeat the animal he has claimed to be so far beyond him in merit. By placing her in Mr. Bonner's possession there was no such hazard. As we have written Mr. Bonner has never deviated from the course he has followed since he became the owner of Peerless, Flatthush Maid and Lantern. We must admire him for consistency if even we do not agree in the propriety of the position, and in many respects he has been of vast service to the breeders of trotters all over the country. He has done more than all the Vanderhilt to enhance the value of fast trotters, and he has put to a better use horses which otherwise would have "hippodromed," as long as they retained the necessary speed. As it now stands 2:09½ in the limit of Maud S. Her record is established never to be lowered and all the arguments, based on what she may hereafter accomplish on the "three-quarter-track," will not avail when confronted with the rule which governs. The rule, however, we have always regarded as a very foolish one, and that it was necessary to wager a five dollar, or even a smaller note, to legalize a performance about as absurd as the position of Mr. V.

The only guard necessary is to place above suspicion the correctness of the time and manner in which it was made. When these conditions are filled the verdict is just as forcible as though a million dollars were at stake. That Robert Bonner is now the owner of Maud S. is a source of satisfaction to us. He is entitled to the Queen from his liberality in paying more for kings than anyone else would give, and apart from the resolve not to allow them to perform in public, his ownership has been the means of gratifying a great many people.

Mr. Bonner's stable has been for many years one of the sights of New York, and had a hook of signatures been kept the names of thousands of visitors would appear on its pages. Names great in history, renowned in every department of life, and, it is safe to assert, everyone of them gratified with what they saw.

All of New York could scarcely equal the display of this one man, and the whole country fail to outshine the stars in his stable. There might be a feeling of jealousy among those who vainly endeavored to cope with him, though the mass of the people were proud of a congregation of the greatest harness horses of the country, and the aim of breeders was to rear an animal that would come up to a standard which was necessary for admission among them.

The only reprehensible feature was an ill-advised attempt on part of a few to drag down rising horses, and sycophantly attempt to belittle wonderful performances in order to give those belonging to Mr. Bonner a position they were not entitled to. Thus when St. Julien lowered the time of Rarus half a second, it was claimed the track was short, the time was not properly measured, and when all these charges were proved false, then private trials were paraded as an offset to 2:12¾.

St. Julien silenced this clamor by going East and trotting in 2:11¼, so there was no force in a further outcry of California short tracks and California watches and the nonsense came to an end.

Unthought advice is generally repugnant to the party advised, and it may be that in proffering anything regarding the future management of Maud S., we will incur the penalty which Mr. Vanderhilt inflicted on Mr. Case. If it was impudent to propose a wager against such a paragon as Maud S., it will certainly come under the same category to presume to advise Mr. Bonner when the question of shoeing and proper treatment of the feet of horses are discussed. In all probability there is not a man in the world who has given so much study to this essential part of stable management as Robert Bonner. It is doubtful if there is a work on that subject he has

not thoroughly mastered, and in addition to reading he has brought a vigorous mental capacity to bear. For all this the ground on which the foundation was laid may not have been stable, and, in such a case, no matter how skilfully the superstructure was erected the primary error weakened the whole building. There have been many notable instances where an error in the first proposition of a syllogism led to false conclusions, and hence it is not impossible that accepted premises in relation to the feet of horses may be false. Were we the fortunate owner of Maud S. the har-shoes all around would come off, the toe-weights be discarded, and at the outside there should not be more than sixteen ounces on all of her feet. When the feet are moving at a rate of speed, sufficiently rapid to mark a mile in 2:09½, and a portion of it a 2:06 gait, then the ounce on the heel is worse than a pound on the hack and several pounds in the seat of the sulky.

## Sonoma and Marin Fair.

On Tuesday next the annual fair of Sonoma and Marin, District No. 4, will open at Petaluma, and from present indications it will be one of the most successful ever held. When that association constructed the mile course and obtained such beautiful grounds, the future welfare of the society was assured, and there is little risk in prophesying that it will continue to be one of the most popular exhibitions in the State. The organization of the Santa Rosa Association was a material aid by doubling the inducements to attend, and although there may be some jealousy on the part of a few, that feeling is sure to wear away to the advantage of both. At the time of writing the contests at Santa Rosa, with the exception of the Joe Arthurton race, have been so close that there will be an increased desire to see the horses fight the battle over again. This closeness between the contestants is the great charm in racing and trotting, and no previous year in the ten we have lived in California has there been so well balanced a lot which are named in the purses all through. Tuesday, the 26th, there are two races. No. 1 is a dash of a mile for all horses and in it are Aunt Betsey, Forest King, Fanny Parnell, Dairy Maid, Stanislaus, Birdcatcher, Trade Dollar, Philip S. and Hiron-delle. No. 2 is 2:40 trotting, and James H., Guy Wilkes, Blanche, Kitty Almont, Col. Hawkins and Maud W. are the entries. The three-year-old district races did not fill, but with two such "fields" as are in the above no one can grumble at the hill of fare for that day. Wednesday the sport commences with a mile dash for district runners, and Lightfoot, Oriole, Fauny Parnell, Dairy Maid, Garfield and Estella Clark show that there is good blood within the district lines. No. 5 is the 2:22 class, Allan Roy, Alhert W., Arah and Manon being the entries. No. 6 is a district 2:40 with ten entries, and as a corresponding race to this required seven heats to bring to a close, this is like to prove equally as arduous a struggle. Thursday the two-year-olds have a controversy, and though Estill won handily in Santa Rosa it sometimes happens that the work in one race is of so much service as to bring up the laggards so that they make a better showing thereafter.

The 2:20 class, pacing, is sure to be a lively scrimmage. Belmont Boy and Killarney will have the old score to settle, as the Santa Rosa affair did not fix the status, or determine which was in reality the best of the two.

Friday will be a big day. In the selling purse, 1¼ miles, are Patrol, Garfield, Billy Foote, Philip S. and Susan; there is a yearling trot with three in it, and the 2:27, class, trotting. The latter displays a very strong entry list, viz.: Johnnie, B. B., Tump Winston, Adrian, Olivette, Rarus, Jr., Sister, Blanche and Anteeo. Saturday will close the fair and a consolation purse; dash of a mile, and free for all; dash of two miles, will be the racing attractions of the day. In the latter are Garfield, Birdcatcher, Trade Dollar and Bachelor. There are eight entries for district roadsters, one of the conditions being that the vehicle hauled shall not weigh less than 150 pounds, and another that the owners drive.

Now that the transit is so easy from the railway being completed to Point Tihuron and the splendid ferryboat running in connection therewith, the trip to Petaluma is an exceedingly pleasant one, and to visitors from this section is not much more than a journey to Berkeley. The course is in capital order and nothing lacking for the comfort and convenience of those who attend.

President Finigan, of the State Agricultural Society, having sold his Alameda County ranch will sell the stock formerly domiciled there at auction on Wednesday, Sept. 3d, at the ball grounds adjoining the Oakland Trotting Park. The lot includes brood mares, trotting horses, colts, Jersey cattle, etc., all of high breeding and acknowledged excellence. Catalogues may be had of Killip & Co., auctioneers, 116 Montgomery St.

## Santa Rosa.

We are so thoroughly hampered with work which compels attention, that one day was all that could be spared in attendance at the Santa Rosa Fair. This was heartily regretted as from former visits there was an assurance that a week spent in Santa Rosa would be a pleasant sojourn in every respect, but there was no way out of the difficulty and inexorable fate demanded the sacrifice of enjoyment and in lieu thereof, attention to duties that must not be shirked. Tuesday was the day which could be best spared, and on Monday afternoon we boarded the Tihron and steamed from the wharf at 3:30 p. m. As it is only a short time ago since a journey over the same route was described, there is no necessity to recapitulate further than to say that it is a pleasant trip, albeit the cars were so crowded with the advance guard on its way to the Fair, that seats were at a premium. San Rafael absorbed enough of the passengers to make matters easier and the Petaluma contingent completed the job so that the rest of the journey was without discomfort to anyone. The afternoon train is by far the pleasantest, as Santa Rosa is reached in good time for dinner, and a stroll around town sets the digestive organs so husily at work that sound sleep is guaranteed.

It was quite early when we arose Tuesday morning and soon after six o'clock were on the way to the track. The thorough soaking given the night before, left the course still wet in the early morning which was cloudy. It harrowed up nicely though and there was a strip of mellow ground for the horses to gallop upon. Those who are constitutionally averse to early rising would be well repaid for an extra effort on the morning of a race day to witness the rushes. The general practice among trainers is to "move a furlong" and there are eager eyes watching the gallops.

At the best it is an illusory test, and the animal which makes the most taking display may be behind in the afternoon. There was lively work and colts and horses moved glibly over the allotted course. There had been complaints among the drivers that the track "cupped," and in order to remedy that it was first lightly harrowed, and when the half inch or so of loose soil was dry the scraper smoothed the surface, leaving a coating which did not break away under the horses' feet. A harrow with wheels, so as to gauge the depth, is the implement above all others to put a track in order even for trotting. That and a leveller, also on wheels, is all that is required in most cases, and a judicious use will result in removing objections which are so annoying to those who have charge.

The Santa Rosa Association have shown a great deal of spirit in what has been done. The track, stables, stands, etc., are of the best, and nothing is lacking for the comfort of the horses and those who have them in charge. The "boarding" in the restaurant under the grand stand is very good, and at a price which is moderate. A fine pavilion has been built, which gives ample room for the display in this department, and there are buildings for machinery, everything, in fact, necessary for a high show. To engage in such an undertaking when there was another fair ground in the same county indicated a spirit which was sure to carry it through, and though there were the usual number of critics who predicted failure, these have been silenced, and the most inveterate growler forced to admit that it has taken a prominent place among the great fairs of California. It is almost needless to state that the first stall visited was that in which Anteo is domiciled. We found him looking remarkably well. We have stated so often that, in our estimation, he is as nearly the model of a fast trotter as any horse we ever saw that the repetition may be tiresome. Nevertheless we are constrained to reiterate, and now that months have intervened since we saw him, he impresses us still more with his perfection of form. He was doing very well. A month or so ago he showed 2:19 on two occasions, trotting on the middle of the track, the inside being very soft, and doing that so easily as to leave the impression that 2:15 was within his capacity. Latterly he has not done so well, and as we write on the morning (Friday) of the day on which we will trot it will be hazardous to predict either success or failure. The only race we expected to see was the three-quarter of a mile dash for two-year-olds. There were four starters, Estill, Harry Peyton, Cito and Arthur H. Estill won the California Stakes at the Spring meeting of the Blood-Horse Association, and is a fine looking big colt, by Norfolk, from imported Lady Jane. His performances entitled him to the position of favorite, which he amply justify by winning quite handily. Harry Peyton is a son of Shannon, from Emily Peyton, by imported Glengary, and possesses a turn of speed that will undoubtedly save him "brackets" before the close of the season. Cito is by Joe Hooker from a Nortolk mare, and is also a colt of some promise, but an attack of epizooty reduced him so much in flesh

that he has not had time to reclothe his bones with the necessary amount of tissue. Arthur H. is by our old favorite, Hock-Hocking, and more time is necessary to bring him into proper condition. The start was admirable. For a time it seemed that the favorite would be left, but the man who held the flag dropped it at the right moment, and the quartet moved off as evenly as a file of dragoons. After a furlong was run the favorite and Cito had a trifle the lead; rounding the turn the white nose of Cito showed in front for a few strides, and Harry Peyton also moved up. At this point it was "anybody's race," but when fairly straightened into the stretch the favorite showed his superiority and won by, at least, three lengths, in the very good time of 1:16½. There was a sharp contest for second place between Harry Peyton and Cito, the former winning by half a neck.

The return trip was very pleasant. We had the good fortune to meet Martin Bulger at the station, and the trip seemed of short duration when relieved by his reminiscences of early days, his interesting descriptions of the countries he has visited, dissertations on mechanical engineering, interspersed with the usual amount of horse talk.

## A State Fair Sale.

Messrs. Killip & Co. will conduct a combination sale of stock at Sacramento during the State Fair. Among the stock already listed there are fine trotting colts from Arno Farm, thoroughbred colts, work horses and mules for account of W. L. Pritchard, and pure bred Jersey cattle from the herd of Major Robert Beck. The catalogue is still open for all parties who desire to dispose of fine stock, the only condition imposed by the auctioneers being that the offering shall be genuine, and the stock sold to the highest bidder without reserve or limit.

Blue Mountain Belle fairly topped the record in the race of half-mile heats at Santa Rosa last Thursday. She ran the first heat in .49 and came back in .48. The best previous performance was that of Red Oak, who is credited with .48½—.49. Belle beat that a little we take it, as she ran the first heat a half second slower and the second heat a full second faster. She is of Oregon "short horse" stock, and, according to Mr. Jones' statement, nothing is known of her pedigree. She is quite such a mare as the dam of Jim Renwick. While pedigree is at all times desirable, there is no discounting a proved winner.

Sam Jones has begun his California campaign well. He has started twice at Santa Rosa this week and won both handily. Forest King beat a good field over a mile of ground in 1:44½, although he sold in the ruck in the pools. Blue Mountain Belle also won her race, half-mile heats, in the great time of 0:49—0:48. As Mr. Jones is that kind of turfman that hack his horses to the last, if he thinks they are fit, he will leave Santa Rosa with a good-sized "wad."

The purse for pacers, free for all, reopened by the Golden Gate Fair Association will close September 3d. It is a \$500 purse divided into four moneys, and we hope to see the side-wheelers come forward in this matter and fill the list. There are enough of them in training this year to fill all the purses. Belmont Boy, Killarney and Shaker would make a great race, and the money offered is worth their attention.

The purse for the 2:35 class, offered by the San Jose Fair Association as a substitute for other purses that failed to fill, did not receive the requisite number of entries and has been declared off.

## Answers to Correspondents.

Questions answered only through these columns. No replies by mail or telegraph.

G. W. T., Williams, Cal.

I purchased some colts last year that were sired by a horse called Bob Ridley, said to be of St. Lawrence stock out of a Messenger mare. What is the history of the St. Lawrence stock, and what is the record of Bob Ridley?

Answer.—St. Lawrence was a brown horse of unknown breeding brought into New York State from Canada. He was a trotter and a sire of trotters but never bogot any notable performers or established a distinct family. Crosses of his blood are frequently met with in trotting pedigrees but mostly remota. 2.—Bob Ridley was, if we mistake not, by Rodahouse's St. Lawrence, a son of the Canada horse. Ridley's record is 2:49.

A. J. H., Los Angeles:

Can you tell me from what date the age of cattle are counted at the various agricultural shows throughout the State? I mean, for example, do all 1884 calves become one year old on the 1st of January, '85?

Answer.—We can find no rule regulating the matter in the Code of the State Agricultural Society, and although we have conversed with several officers and directors of the society they knew of no such regulation. We conclude there is none.

Upper Country, Chico:

What is the record of Frank L., formerly Orphan Boy, and is he eligible to the 2:35 class?

Answer.—He has a record of 2:31, made at Council Bluffs, Iowa, Aug. 31, 1881.

A. L. O., Stockton:

What is the record, if any, of the pacing mare, Little Em?

Answer.—2:44.

A. J. E., Napa.

Has Lady Livingston, the dam of Lady Blanchard, any record and if she has what is it?

Answer.—She has no record.

Stakeholder, Napa.

A bets B that in the five-year-old race, at Chicago, won by Eva, there were three heats better than 2:23. Which wins?

Answer.—The three fastest heats were 2:23, 2:20½, 2:22½. B. wins.

H. W. P., Healdsburg:

1.—What is the breeding of Niagara? 2.—Has he sired any 40 horses? 3.—Does Belnor stand as a public stallion throughout the year? 4.—If so, what is his fee? 5.—What record has Speculation? 6.—Has he sired any 30 horses besides Crown Point and Oakland Maid? 7.—What is the breeding of Don Juan on the dam's side and what speed has he shown in public? 8. What is the breeding of Engene Casserly? When foaled and what record has he ever attained?

Answer. 1.—We cannot give the pedigree of Niagara definitely, but may be able to do so later on. 2.—The only one of his get that has a record better than 40 is the brown gelding Gen. Cobb, 2:31½, Lady Hoag (Stark mare) and Fauny Malone both showed better trials but made no records. 3.—He has never been so advertised. 4.—Write to Geo. Wiley Danville, Cal. 5.—Speculation was never trained. 6.—No. 7.—Don Juan's dam was Kate Leslie by Great West, son of Logan's Ingomar. Don Juan has no record and we do not think he was ever trained. 8.—Engene Casserly is by Gen. Taylor, son of the Morse horse. The breeding of his dam is not clear. It is sometimes given as Jennie, by Lexington, but we do not vouch for the correctness of it. We do not know what year he was foaled. He has a record of 2:45.

F. S. H., Stockton:

A purse is given not under the auspices of any agricultural society, but by private parties, to the person who will drive his horse the nearest to three minutes. A. drives his on time; also B. I drive mine and tie the other two. In trotting off, A. drives his in 3:11, B., 3:14; I drive mine in 3:2½, and take the money. Now the question: Is my horse barred from trotting in a buggy race for a special prize at our district fair for all horses owned in the district that has no record? No official record has ever been taken.

Answer.—As there was a valuable consideration, time made according to the above statement is a record.

J. M., Sacramento:

A. bets B. that Sam Gamble could not start or trot any of the colts that were entered in the Embryo, Occident or Stanford Stakes, on account of the death of the owner, Daniel Cook. As I am stakeholder, the bet was made for you to decide.

Answer.—If Mr. Gamble has control of the colts named in the Embryo, he can start in that stake. The nominations stand in his name, without reference to other ownership, in the Embryo and Stanford. In the latter stake the right to start was lost by not "staying in" the first of last January. We are not aware of the situation of the Occident Stake.

In this connection we may state that it is reported that the managers of the Embryo intend relieving Mr. Gamble from liability in that stake, as it seems to be equitable that he should not be held under the circumstances.

## The Dam of B. B.

Tom Merry in the *Oregonian*, clears up the breeding of B. B. on his dam's side by the following authoritative statement:

The dam of B. B. A., is still living, and owned by old Mr. Caviuess, of Island City, Union county, who bred B. B. A., and the sister to him, which Mr. Acker bought for breeding purposes after he found out he had a real clunker in the black 'un; but she died on the way to this city. The old mare is still living, and in good health though nearly twenty-four years old. She is by Waite's Marshall, and beyond that Mr. Caviuess has no reliable information. Marshall was the sire of Kangaroo, a winner of mile heats, 3 in 5, in Oregon and Southern California. In 1859 he was owned by E. M. Waite, who was Secretary of the Oregon State Agricultural Society for nearly twenty years. At that time I was racing editor of the *Spirit of the Times*, in San Francisco, and got Mr. Waite to send to that paper reports of all the Oregon races. One day he sent me a bill containing the pedigree of Marshall, and on perusing it I was astonished to note the close relationship on the sire's side between Marshall, and Williamson's Belmont, then the Herod of the California stud. Marshall was by Laplander, he by Flagellator, own brother to Van Meter's Seagull, who was by the imported horse Expedition, bred by the Earl of Egremont. Williamson's Belmont was by American Boy, he by Van Meter's Seagull. So that both Marshall and Belmont traced directly back to Expedition in three crosses paternally. Again Belmont was the sire of Venture, record 2:23, and several others of less note, while Expedition was the sire of Awful, one of the earliest trotters on the American turf. It is to this infusion of thoroughbred blood, to my notion, that B. B. A. owes his victories in hard contested races where the heats are broken and the battle long drawn out. In his San Francisco race it took seven heats to decide the race and B. B. A. won by simply wearing out all the other contestants, being amperly driven by J. W. Donathan.

## Yearlings at the State Fair.

The purse for yearling trotters, dash of a mile, offered by the State Agricultural Society, closed with the following entries:

Bonauza, ch c, by Arthurton, dam by John Nelson—A. Waldsteiu.

Transit, b c, by Prompter, dam Venus.—M. Toomey.

Sir Whipple, br c, by Whippleton, dam You Gness—R. F. Harris.

Trovato, ch f, by Sterling, dam by Flaxtail—C. F. Taylor.

Bay Colt, by Echo—John Mackey.

Rajah, b c, by Sultan, dam by Geo. Wilkes—L. J. D.

The Coming Fair at Marysville.—Notes and Suggestions.

The Northern District Agricultural, Horticultural and Mechanical Society was organized about twenty-four years ago, and consisted of the counties of Butte, Colusa, Nevada, Napa, Plumas, Placer, Sutter, Sierra, Tehama, Yolo and Yuba. Up to about 1874 or 1875, the date of the great flood in Marysville and vicinity, this society prospered and had some very fine meetings. From that time until 1878, the date of their last meeting, the meetings were not very successful. In the Winter of 1882-3 the Legislature formed new districts for agricultural societies and provided for appropriations from the State treasury of sums ranging from \$1,000 to \$1,500 per annum, provided a fair should be held each year. The 13th district was made to embrace the counties of Sacramento, Sutter, Yolo and Yuba, with an appropriation of \$1,500. In May, 1883, the society was duly organized, and the Governor appointed the following directors: Sacramento Co., W. S. Manlove; Sutter, R. H. Watson and James Littlejohn; Yolo, Chas. F. Reed; Yuba, D. E. Knight, M. Marcuse, A. D. Cuts and N. D. Coombs. The first meeting of the society was held at Marysville, commencing Sept. 2d, and continuing five days.

At that meeting only pavilion exhibits were offered premiums, and fair purses for trotting, pacing and walking contests. The pavilion was well filled with exhibits, being some eight hundred in all, but principally by the ladies and merchants of Marysville. The farmers took little interest in having their produce exhibited, although quite liberal premiums were offered for all articles grown. The fruit growers made a very creditable exhibit, as did also many manufacturers. The pavilion was well patronized and the result generally satisfactory. At the fair grounds the entries to races were as good as was expected and the contests for the purses gave general satisfaction and were well patronized. The amount paid out for premiums was \$1,582 all in cash, and for purses \$2,700. The total receipts of the fair were \$6,225.00, and the expenses, premiums and purses, \$5,984.00, leaving a balance on hand of \$240.45. The fair gave general satisfaction to the public and the directors, and they resolved to make a greater effort for the coming year. At the meeting in April, 1884, J. W. Wilson, of Sacramento, was chosen a director to succeed W. S. Manlove, resigned, and he was duly commissioned by the Governor. The Board then fixed a list of premiums for the meeting of 1884, and fixed the time for August 26th to 30th inclusive. They increased the amount offered as premiums for farm products, and added liberal premiums for horses of all grades; also, for mules, jacks, poultry, etc. The premiums for horses amount to \$1,000, and range from \$30 for best thoroughbred stallion, three years old or over, to \$5 for best saddle horse. From present indications the exhibits will be much larger than usual at this meeting, and particularly so with farm products, as the farmers have confidence in the present management and will assist to make the fair successful. The entries for races are of a better class than usual, and number considerable more than last year, and no doubt this branch of the fair will be far superior to that of last year. The track is one of the best in the State, is in fine condition, and being worked every day.

The President of the Society, D. E. Knight, owns the track and fair grounds, and takes much interest in keeping it up for the benefit of the society. He is a very liberal and public-spirited man and does not charge the society more than enough to pay the taxes on the property, and does more for the success of the society than any other person in the district.

The people of Marysville take much pride in their city and are making many improvements this Summer, among them the laying of patent stone sidewalks, cleaning and beautifying the place generally. In all branches of industry there is a better and healthier feeling, and no doubt, if the overflow from the Yuba, caused by hydraulic mining, can be kept out, Marysville in a few years will be one of the prettiest and most prosperous cities in California.

It is the intention of the Directors, if properly sustained in their efforts this year, to increase the amounts of premiums offered and to add all kinds of live stock to the list, and thus make it more of a farmers' fair.

There is a splendid farming country adjacent to Marysville, and the crops are invariably good. This year wheat and barley has turned out a large yield per acre and of the finest grain that can be found anywhere.

There is not as much interest taken in stock-raising as usual, nor as much as should be. Every farmer seems to depend almost entirely on wheat and barley, and the result will be, they will over-do the business of grain raising as they have this year, and have nothing to fall back on when prices are very low for grain. Horses and cattle will pay largely at present prices, and the farmer should have a part of his land devoted to that industry, as it will pay a larger per cent on the investment than grain raising and with much less work.

A Richmond Left.

At Monmouth Park on the 13th, a handicap sweepstakes for three-year olds, one mile and a furlong, the favorite was beaten off to last place. It was no other than the English Richmond, the property of Mr. F. T. Walton, and the same colt whose prominent running for the City and Suburban Handicap at Epsom last April came near making him a favorite for the Derby. In the latter race, however, he did not show any special qualities to warrant the belief that he was of the same mettle as the usual run of Derby winners. It was his last race in England, and soon after, in company with Mr. Walton's other horses, he was shipped to New York. It is now nearly two months since they arrived, and in this handicap Richmond was seen for the first time. He is a big, fine-looking colt, and in his preliminary gallop won lots of friends. The race in which he showed was a handicap at a mile and a furlong, and for which he carried the top weight of 110 pounds. With the start the disappointment began. He got away well, but was outrun by all in the first furlong, and although he showed some little speed at the end of a mile, he quickly dropped back and finished last. It is scarcely possible that his running is true form and he is sure eventually to show a great deal better, but considering how well he looked it must be said that his first appearance was a disappointment; so much so that good money was offered that he would not be one, two or three for the Twin City handicap, without regard to the weight that the handicapper puts on him. The race was won by Tattler, by Tom Ochiltree, 105 pounds.

Johnnie Blne, the son of Alexander, that has figured in many races lately at Portland, Oregon, has been sold to Mr. McNaught, of Seattle. He has a record of 2:35.

Saratoga.

August 9th.—Purse, \$500, of which \$100 to the second; the entrance money, \$15 each, to be divided between the owners of the second and third; winners after July 15th of any race of the value of \$1,500 to carry 3 lbs.; of two or more such races, 5 lbs. extra; horses not having won in 1884 a race of the value of \$750 allowed 7 lbs.; non-winners of any race in 1884 allowed 12 lbs.; maidens allowed, if three years old, 15 lbs.; if four years, 20 lbs.; if five years or upward, 26 lbs.; four entries; one mile.

G. R. Buchanan's cb g Jim Renwick, 6, by Joe Hooker—Big Gun, 110 lbs. (Riley) 1  
W. L. Scott's Simoon, 3, 89 lbs. (Higgs) 2  
Hayden & Barry's Galaxy, 3, 95 lbs. (Arnold) 3  
J. W. & R. H. Lond's Albert Sidney, 6, 61 lbs. (Rivers) 0  
Time, 1:46.

Pools: (Jim Renwick barred) Simoon, \$35, and Albert Sidney, \$5. Betting—20 to 1 on Jim Renwick, 9 to 1 against Galaxy, 15 to 1 against Simoon, and 25 to 1 against Albert Sidney. Mutuels paid, \$5.60.

The dropping of the flag saw Galaxy move off, followed by Simoon, Albert Sidney and then Jim Renwick. The quarter was reached by Galaxy on a half-length lead, with Albert Sidney now second, and Jim Renwick moving forward to third. Simoon caught Galaxy at the half, and on the lower turn Jim Renwick headed the leaders. The favorite took the lead before reaching the upstretch, and near the third quarter displayed an advantage of fully a length. Jim Renwick continued and coming home in good form won by a length, Simoon second and a length better than Galaxy third, the rear being covered by Albert Sidney.

Aug. 12th.—Grand Prize of Saratoga; a handicap sweepstakes, for all ages, at \$50 each, half forfeit, \$10 only if declared by July 1, 1884, with \$1,200 added, the second to receive \$250 and the third \$100 out of the stakes; closed with 31 subscribers, of which—declared out; mile and three-quarters.

E. J. McIneely's b h Gen. Monroe, 6, by Tom Bowling, dam Minnie (Blaylock) 1  
E. J. Baldwin's Lucky B, 4, 104 lbs. (Holloway) 2  
W. L. Scott's Referee, 4, 107 lbs. (Lewis) 3  
J. Forbes' George L., 4, 98 (carried 99) lbs. (Fisher) 0  
O. Bowie's Compensation, 6, 114 lbs. (McLaughlin) 0  
C. W. Medinger's Emma, 3, 85 lbs., carried 86 lbs. (Higgs) 0  
Time, 3:09.

Pools: Gen. Monroe, \$100; Referee, \$65; Compensation, \$35; George L., \$25, and the field, \$25. Betting: 5 to 4 on Gen. Monroe, 5 to 2 against Referee, 4 to 1 against Compensation, 6 to 1 against George L., and 8 to 1 against Emma and Lucky B. Mutuels paid, \$9.90.

The order at the start was George L., Compensation, Referee, Gen. Monroe, Emma and Lucky B. George L., led to the seven-furlong post, when he was caught by Referee and the latter went forward at the stand (three-quarters of a mile), and showed the way to the back stretch, when Emma ran up on even terms. Emma increased her pace and cut the way almost to the three-quarters, when Blaylock brought Gen. Monroe forward, took the lead easily and held it to the close, winning by three parts of a length, Lucky B. second and six lengths better than Referee, third.

Same day.—Purse \$400, for all ages, of which \$50 to the second, the entrance money (\$15 each), to be divided between the second and third winners; horses beaten at Saratoga in 1884 and not having won a race since July 15, allowed 7 lbs.; or if non-winners in 1884, allowed 12 lbs.; maidens allowed, if three years old, 15 lbs.; if four years, 20 lbs.; if five years or upward, 26 lbs.; 6 entries; three-quarters of a mile.

G. R. Buchanan's cb g Jim Renwick, 6, by Joe Hooker, dam Big Gun, 115 lbs. (McLaughlin) 1  
W. L. Cassidy's Saunterer, 6, 108 lbs. (Blaylock) 2  
Louisiana Vinton's Glenhar, 3, 108 lbs. (Arnold) 3  
Davis & Hall's Vinton, 3, 93 lbs. (Higgs) 0  
Time, 1:57.

Pools: Jim Renwick, \$85; Saunterer, \$25, and the field, \$10. Betting: 5 to 1 on Jim Renwick, 2 to 1 against Saunterer, 12 to 1 against Glenhar and 20 to 1 against Vinton. Mutuels paid, \$6.50.

Saunterer took the lead at the start and held it down into the lower turn, when Jim Renwick came forward, and taking the lead held it easily to the close, winning by three lengths, Saunterer second and six lengths better than Glenhar.

Aug. 13.—Purse, \$350, of which \$50 to the second; entrance free; for three-year-olds; non-winners at Saratoga in 1884 to carry 100 lbs., with sex allowances: winners of 1884 of any sweepstakes of the value of \$1,500 to carry 7 lbs. extra; non-winners since June 1st allowed 5 lbs.; maidens allowed 10 lbs.; one mile and seventy yards.

E. J. Baldwin's b c Shenandoah, by Shannon, dam Demaree, 105 lbs. (Holloway) 1  
Davis & Hall's Vinton, 97, (carried 98), lbs. (Maynard) 2  
Clay & Woodford's The Admiral, 110 lbs. (Stoval) 3  
R. W. Walden's Chanticleer, 114 lbs. (Blaylock) 0  
Time, 1:50.

Pools: The Admiral, \$130; Shenandoah, \$65; Chanticleer, \$55, and Vinton, \$16. Betting: 5 to 3 on the Admiral, 9 to 5 against Shenandoah, 5 to 2 against Chanticleer, and 12 to 1 against Vinton. Mutuels paid, \$15.10.

Chanticleer led off, and held the front for almost a mile, when the others came up about even terms. The finish was exciting, Shenandoah winning by a head, Vinton second, a head in front of The Admiral, and he only a neck better than Chanticleer, last.

Freda Fails Again.

MONMOUTH PARK, Aug. 8th.—The Champion Stakes, for all ages, at \$250 each, half forfeit, only \$25 if declared by July 1, or \$50 if declared by Aug. 1, with \$2,000 added; the second to receive \$500 out of the stakes, the third to save its stake; closed with 28 subscribers, of which 7 paid \$25 and 12 paid \$50; mile and a half.

Dwyer Bros.' br f Miss Woodford, 4, by Billet, dam Fancy Jane, 113 lbs. (McLaughlin) 1  
P. Lorillard's Drake Carter, 115 lbs. (W. Hayward) 2  
G. L. Lorillard's Monitor, 118 lbs. (Peakes) 3  
E. J. Baldwin's Freda, 3, 100 lbs. (Pepper) 0  
F. Gebhard's Eole, 6, 121 lbs. (W. Donohue) 0  
Time, 2:40.

Betting: 100 to 45 on Miss Woodford, 12 to 5 against Eole, 12 to 1 against Drake Carter, 25 to 1 against Monitor and 35 to 1 against Freda. Pools: Miss Woodford, \$800; Eole, \$350; Monitor, Drake Carter and Freda, \$100 each. Mutuels paid, \$7.45.

After a breakaway the flag was dropped, with the five in close order, from which Miss Woodford at once took the lead, and running out clear, led by a length at the three-quarters and by a length and a half at the end of the half mile, followed by Freda, the same distance in front of Eole, he two in front of Drake Carter and he a length in front of Monitor. As they rounded the turn Miss Woodford increased her lead to two lengths, but there was no change in the order of running, either at the end of the three-quarters or at the mile, other than that Drake Carter had taken third place and was laying alongside of Freda, with Eole close up and a length in front of Monitor. Almost immediately after both Drake Carter and Eole made a bold bid to overtake the flying Miss Woodford, but Eole's chances were instantly settled, for being unable to respond to Donahue's call, he again dropped back fourth and soon after was passed by Monitor. As they reached the turn for the homestretch Drake Carter made some semblance of closing up the gap by which Miss Woodford led, but like Eole, he proved unequal to the occasion, and the finish became simply a procession, with Miss Woodford first, the others, with the exception of Drake Carter, no-

where, she winning by two lengths, with Carter ten in front of Monitor, followed by Freda and Eole. Time, 2:40, of which the first quarter was run in 27 1/2 seconds, the half in 53 1/2, the three-quarters in 1:21 1/2, the mile in 1:48 and the mile and a quarter in 2:15 1/2. Value to the winner, \$3,525.

Who Bair Is.

"Veritas" in the New York Spirit gives this sketch of the driver of Maud S.: I have known Mr. Bair for years, and esteem him highly as a driver and an honest, genial man. He was born in Sadsburyville, Chester county, Pa., about forty miles from Philadelphia, July 6th, 1839. His height is 5 ft. 8 1/2 in., and his average weight 140 lbs. In 1868-9 and '70 he handled trotters at Harrisburg, Pa. In 1871-2 and '3 he was a public trainer at Snfok Park, Philadelphia. From there he went to Evansville, Ind., and spent the seasons of 1874 and '75, but horse business was dull, and if the farmers furnished hay and oats for their young trotters they expected a man to spend his time for nothing and trust to racing luck for pay. Capt. Stone found an opening for Bair at Chester Park, Cincinnati, in 1876, and he has been actively engaged there ever since, and the Captain remains his fast friend. Bair is of spare build, dark complexion, thin, regular features, sparkling black eyes and jet black mustache. He is of quiet, retiring disposition, but his manners are easy, and he is slow to anger, but has plenty of vim when aroused. He thinks the world of Maud S., and she, evidently, reciprocates the feeling. He has many friends, and instead of hiding his light under a bushel or making a great secret of training details, as some drivers do, he is always ready to impart information. For example, one day I asked him what kind of liniment he had on Maud to assist in keeping her free from soreness. He replied, "I use arnica freely—reduced; say a quart to a gallon of rain water."

THE KENNEL.

Points on Setters.

The writer of Anecdotes on Sports in the Licensed Victuallers' Gazette says:

One of the best trainers of setters, who was known as Old Potts, gave out his experience of the art usually in the following way. "Come and take a walk with me this morning, and see me take the first steps to break in this young dog; but stop a moment. Come in here, Cato! or Cessa! or whatever the name might be. See this wanton young fellow has got a hundred yards ahead already. Come in, I say. Remember this is one of the first secrets," he would add, "in the science of dog-breaking, and it has an influence far beyond your power to conceive. Never suffer your dog, on his road to the ground, to have his nose an inch ahead of you. Even an old dog should be at heel; but with a young one it is indispensable. Keep him literally close to your knee, checking his anxiety to ramble with the voice, or a crack of the whip, and, should those fail, let him feel the lash. The words, 'Come in here,' should be obeyed. Then with a whip in one hand, a powder trier in the other, the dog close to your heel, proceed to throw him off. Choose a piece of ground of good extent, where you are likely to find game. Perhaps you would soon tire, but depend upon it that game killing and the breaking in of dogs are very much mixed up together."

All young dogs, we may add, run wild at first. Their natural exuberance of spirits causes them to dash about in all directions; but they must be made sensible of their faults. When they do right, caress them. We perhaps, however, had better speak in the singular, so when a young dog is told to "Ware chase?" he should be made to understand speedily; it is a warning that he should not soon forget. The following on the subject of punishing dogs is worth repeating: "Whenever a dog, not being in sight of his master at the time has flushed birds, broken fence, or in any other way broken one of those laws, which well-trained dogs do not break, he will be seen to follow his master at a respectable distance and at a sneaking pace, with his delinquency marked palpably upon his countenance; but in such cases the cry of 'Ware!' should be enough. When in fact the dog's eye, as a rule, cannot meet his master's frown. A look tells the animal he has been in the wrong, and that his owner is aware of the whole thing thoroughly, although in reality he may not do so. It is sometimes amusing to see a young dog who has been scampering after a hare like a mad thing, or a herd of deer, or a flock of sheep, conscience-stricken, come to you with a look that his sin rests upon himself, and that he is thoroughly repentant."

Often people inflict punishment upon dogs without rhyme or reason. While allowing that dogs are intelligent, and that their power of scent is marvellous, and that their ability to go from one part of the country to another without the aid of a compass is equally so, they make no allowances for mistakes the animals may make, and punish them severely for the most trivial errors. At the same time, a sporting dog should be taught to obey the eye and hand more than voice, as he can be taught to "back," or "back-set," by the simple holding up of the hand, and the word "To ho." To back-set is the distinctive characteristic of a promising young dog, and all setters should be broken in to the command "down-charge;" that is not to stir from their point after the discharge of a gun until told so. Many years ago there was a French Count in England named Peltier, who was one of the most amusing of companions, and naturally was well received everywhere among sportsmen. The French break-in their dogs very well to "fetch and carry," but in other respects, such as "breaking fence," they are negligent, so it will not be surprising to hear that when the late Lord Seagrave met the Count in the High-street, Cheltenham, just by the Plough Hotel, with a splendid setter at his heels, his lordship, with a view, perhaps to purchase, inquired if he "was well broken to game." "Ah!" was the Count's reply, "superb, when he do hear the rappid of de gun, he fairly runs quite mad."

A setter, we may add, should never be allowed to break ground, or in other words, he should never be in front of his master. Neither should he ever blink his game, which means that he should never move from his "point" until the game rise, whatever may be his inducement to do so. Nimrod speaks of a favorite setter he had over whom six shots were fired in a field of potatoes, and he never stirred from his point, which proved to be a single bird. Mr. Apperly was offered there and the twenty-five guineas for the dog by Mr. Britten, of Oldbury Hall, Atherstone, which was, of course, refused, as dogs like him were not easy to be met with, and Nimrod shot over him for seven more years. This setter, however, had, like the rest of us, his failing, which was a partiality for butter, and in traveling along a road, through a town or a village, about breakfast time, he would enter a house, snatch the butter from off the table, and disappear with it, at a pace which baffled all pursuit.

## STABLE AND PADDOCK.

## Abnormal Condition of the Teeth.

Disorders of the teeth occur frequently in colts between the ages of two and a half and four and a half years—the period for the temporary teeth to be changed for the permanent—when they are very much out of condition, being, as it is termed, very lean on the ribs, and having long, harsh, and abaggy coats. Owners say they feed pretty well, but their food does them little good. Now, if the month be examined, the cause will, very probably, at once present itself. It is found very hot, and contains a large quantity of saliva, the result of irritation produced by dentition; which process, it is likely, has been perfected on one side, although the reverse is the case on the opposite; by which we mean that the temporary teeth on one side have been shed, and their places supplied with permanent ones; while on the other the temporary remain fixed, or are only partially displaced, adhering to the gum, perhaps by one fang, leaving a portion unattached, and producing considerable irritation; also materially impeding the masticatory process.

It will be requisite in this case to remove the shell by means of a pair of shell-tongs or forceps; also, if the shell or grinder be firmly attached, we must have recourse to the same expedient, supposing the process to have gone on properly on one side, and it is the period for the permanent to supplant the temporary tooth. We shall thus facilitate and expediate the development of the permanent tooth, and the animal will be enabled to masticate his food with more ease, and more effectually. It may also be necessary to rasp the edges of the other grinders, which may have become morbidly sharp and pointed, the result of inefficient mastication.

As it is generally early in the spring, when there is a deficiency of nutritious grass, that our attention is more generally directed to these cases, it is advisable to feed with bran and cut hay, which the animals will eat with less difficulty and less waste than uncut food. In those becoming greatly emaciated, the administration of tonic medicine will prove very essential in restoring the lost tone and energy of the digestive organs. The important process of dentition is accompanied with much more marked effects upon the system in some colts than in others; and it is not an infrequent circumstance to observe that out of several running together, one or two will do badly during this period, whilst the others will maintain a tolerable condition, yet all are receiving the like treatment.

Morbid or exuberant growth exists in two forms. First, it is general, and confined to the borders or edges of the teeth—the outer edges of the upper molars, and the inner of the lower. The upper teeth normally somewhat overlap the lower externally; consequently when the mouth is shut the outer edges of the upper, and the inner of the lower, are opposed. Secondly, one or more of the dental organs may be increased in size, to such an extent as to project considerably above the level of the rest; say, an inch, more or less. Our attention is called to the first mentioned class of cases, when we notice a considerable quantity of un-masticated grain voided with the dung, and saliva secreted in an undue degree, evidenced by its dribbling from the animal's mouth. On examination we shall find that there are numerous sharp projecting points extending from the non-opposed edges of the molars which have caused laceration of the lining membrane of the cheeks, and probably, also of that of the tongue.

The treatment here is simple. We must at once remove the offending agents by means of the tooth-rasp, in the exercise of which we must be careful to effect our intentions with as little injury to the mouth as possible; for it is comparatively rare that we do not bruise the mouth in a greater or less degree, this being dependent on the expertness of the operator, and the tractability of the horse. For facilitating the act of rasping a so-called balling iron is generally used.

With regard to the cases in which we find one or more of the teeth projecting considerably above the level of the rest, bare inspection tells us that this state offers a far greater impediment to the proper and effectual trituration of the food than the preceding one, but we may readily obtain additional demonstration of the fact by giving the horse a small quantity of hay, when we shall perceive that he has the greatest difficulty in masticating it. He will, however, employ every possible means to do so. He turns his head from side to side, with a peculiar twisting action of the lower jaw, frequently forcing the mass by the action of the tongue to the bottom of the mouth, and as frequently passing it up again; until, at last, he lets it fall out a roughly chewed mass which is called a "quid," and the horse a "quidder."

It is in consequence of these quids being found in his manger that the horse's mouth is suspected to be amiss. In this instance, the rasp is unavailable; but, having ascertained which is the offending tooth, we must have recourse to the tooth shears or to the various kinds of chisels made for such cases.

## Kindness to Domestic Animals.

There is nothing worse for domestic animals than to scare them half to death. Fright uses up the vital forces more than work, more than the growth of flesh and fat, more than anything else, unless it is persistent starvation.

We have had two men working for us, with teams, on the same farm, at the same time. One would take his horses from the stable when they had been refreshed with a few days' rest, and were feeling well, and because they were pretty frisky while they were being harnessed, and the off horse did not keep the furrow well at the first send-off, would get out of patience and yell at his team until finally they would break into a trot, when he would throw the plow to the full depth into the first hummock he could find, bring the team to a full stop, and by this time they would be well in a "lather," and quivering with excitement. After he had yelled for a few minutes, and the horses had become fully frightened, they had used up enough strength to move the plow for an hour.

The other man knew better. When he observed, while "hitching up," that the horses' heads were carried high, and that they were feeling first-rate, he would say to himself: "There is a good head of steam on to-day, and I shall be able to get a good day's work out of these fellows if I save it all to be used to the best advantage." Therefore he would speak in as quiet a tone as possible, and move gently about, and aim to get his team afield without the risk of any rumpus or excitement, and would bear with a few irregularities, such as getting out of the furrow and pulling by fits and starts a few times. The consequence would be that when they were warmed up to their work they would move on smoothly, and, at the same time, quickly, and at the end of an hour there would be a row of nice, fresh furrows to show as an equivalent for the "steam" the other man had had up in mere fret and fume, and worry and passion.

## Rational Feeding.

It is a fact that will be readily admitted, by farmers especially, that they know too little of the construction and organism of the horse. Colvin gives a very clear and simple description of the stomach and digestive organs of this animal which should be read by every one that has anything to do with a horse. He says: The horse's stomach has a capacity of only about sixteen quarts, while that of the ox has two hundred and fifty. In the intestines this proportion is reversed, the horse having a capacity of one hundred and ninety quarts against one hundred of the ox. The ox and most other animals have a gall-bladder for the retention of a part of the bile secreted during digestion; the horse has none, and the bile flows directly into the intestines as fast as secreted. This construction of the digestive apparatus indicates that the horse was formed to eat slowly and digest continually bulky and innutritious food. When fed on hay it passes very rapidly through the stomach into the intestines. The horse can eat but five pounds of hay in an hour, which is charged during mastication with four times its weight of saliva. Now the stomach, to digest it well, will contain but about ten quarts, and when the animal eats one-third of its daily rations, or seven pounds, in one and one-half hours, he has swallowed at least two stomachfuls of hay and saliva, one of these having passed to the intestines. Observation has shown that the food is passed to the intestines by the stomach in the order in which it is received. If we feed a horse six quarts of oats it will just fill his stomach, and if, as soon as he finishes this, we feed him the above ration of seven pounds of hay, he will eat sufficient in three-quarters of an hour to have forced the oats entirely out of his stomach into the intestines. As it is the office of the stomach to digest the nitrogenous parts of the feed, and as a stomach full of oats contains four or five times as much of these as the same amount of hay, it is certain that either the stomach must secrete the gastric juice five times as fast, which is hardly possible, or it must retain this food five times as long. By feeding the oats first, it can only be retained long enough for the proper digestion of hay, consequently it seems logical, when feeding concentrated food like oats, with a bulky one like hay, to feed the latter first, giving the grain the whole time between the repasts to be digested.

The awkward, blundering manner in which many of the driving horses are allowed to travel is more often the fault of the driver than the horse. With a little effort the most lumbering gait can be improved, and by constant attention a horse with any action about him whatever can be transformed into at least a fair roadster. To get over the ground seems to be the main idea of the majority of men who are using driving horses, without stopping to think about the manner in which their horses do it. A good square gaited horse is more pleasant to drive, will sell for more money, and will be more ready sale, even if he is not so fine in form and finish, than one which is his superior in appearance and travels in an awkward manner. The best time to teach a horse the proper way to move in a huggy is when it is first given such work to do.

## HERD AND SWINE.

## Gerome Cheese.

The following, from the London *Grocer*, is a description of the manufacture of a very popular cheese, known in France under the name of Gerome. It is largely consumed in Paris just as it is ripe, and it would be difficult to mention any cheese which is more delicious at this particular period. It is a soft, round cheese, varying in weight from 4 lbs. to 8 lbs., and is sometimes made with the addition of anise-seed. It is made with milk at the temperature at which it comes from the cow, this being placed in a deep vat holding some forty-five quarts, when it is covered with a wooden lid, in the centre of which is inserted a wooden funnel resembling in form a cup. To the bottom of this is attached a cloth for straining. When this is not used a small disc is drawn over the hole. The rennet is immediately added, in quantity according to the weather and its strength. In half an hour the whey is divided from the curd with a ladle, and the vat recovered. In another half hour the separation is continued, with the aid of a copper strainer 12 in. by 4 in. When the curd is divided into pieces about the size of a small nut it is taken out and placed in wooden cylindrical molds, from 5 in. to 9 in. in diameter. Two molds are used for each cheese, the one being fixed into the other, which is somewhat larger in diameter, and has a number of holes pierced in the bottom. The total height of the two when fixed is from 14 in. to 16 in. The curd entirely drains in this mold and in about twelve hours will have sunk to about the height of the bottom and the larger part of it, so the top part can be taken off. The cheese is then placed in another mold of the same diameter as the bottom one, and put upon the shelf upside down. After six hours it is again turned, and this turning is continued twice daily for the two following days. In draining the whey the molds are placed upon sloping shelves which are furnished with a rim at the edge, as in the Camembert cheese rooms in Normandy. The whey runs off and is collected in a receptacle placed at the side of the table for the purpose. The temperature of the room in which this operation takes place should be from 59 degs. to 64 degs. Fahr. The next thing to be done is to salt the cheeses, which for this purpose are placed upon small boards made of heech, and upon which layers of fine salt are sprinkled. The surface of the cheese must be well salted, and the operation repeated every three or four days, care being taken that it is turned each time. This turning is continued twice daily for three days after salting, and the surfaces of the cheeses each time are gently moistened with tepid water. When sufficiently dry on the crust they are removed to the drying room, thirty grammes of salt having been used in the salting process. In this *sechoir*, or drying room, the cheese shelves are built one above the other, so that large numbers of cheeses can be kept in a small space and well cared, providing the temperature and aeration complete. In Summer the process of ripening is frequently conducted in the open air, the cheeses being protected with cloths to keep off flies and the sun; but during the other parts of the year a specially prepared room is invariably used. When thoroughly dry they are removed to the cave or cellar for the completion of the process, and they are very carefully managed. This cave must be in good condition, with a draught of air passing through it; but if the temperature is too low the cheeses crack and lose quality. The time they remain here is determined by the season and size of the cheese, the maker judging this for himself. The largest, however, are generally kept from three to four months. While in this

compartment they are often turned, and washed with tepid water slightly salted, and daily examined to see whether they are ripening too rapidly. When they are brick-red in appearance and the surface sufficiently firm to yield to the pressure of the finger they are ready for market. A good Gerome is firm on the exterior, rich and oily, and has a few small holes in the interior; while inferior makes, like inferior Gruyere, have numbers of large holes, are fragile, easily crumbled, and sometimes become soft and pulpy when the whey has not been properly extracted from them.

## Floors and Walls of a Milk House.

The editor of the *Canadian Dairyman* says, in reply to a correspondent, that a dry cellar floor may be made as follows: Four parts coarse gravel or broken stone and sand, and one part each of lime and cement, are mixed together dry. The lime is slacked separately, and mixed with just water enough to cement the whole well together. Six or eight inches of the mixture is then put on the bottom, and when well set, another coating is put on, consisting of one part cement and two of sand.

The following is given as successful in preventing damp walls: Cement mixed, say in a wash basin, with water until about the consistency of cream, and then applied thickly with a large paint brush. Mixture must be constantly stirred to prevent the cement from settling to the bottom. On account of this rapid setting it must be mixed only in small quantities, say half a gallon at a time. It will be easily brushed off when first put on, but will harden in 24 hours.

The *American Cultivator* very sensibly advises that at this season the drinking-places where stock are watered should be well cleaned, at least once a week. Leaves and sediment rapidly decay in warm weather, and there will be consequent damage to the health of stock and the purity of milk given by cows. So large a portion of pure milk is water that the quality of water which cows have to drink becomes very important.

Calves fed by hand, and also suckling calves at weaning time, often scour. The *North British Agriculturist* suggests the following treatment: "Give one to two glasses of brandy, which I use sometimes with a very little water and sometimes neat. Given from a small bottle the calves don't choke. If again attacked, repeat the dose." We have found that feeding whole corn was a great help in such cases.

## POULTRY.

## Mating Fowls for Breeding.

In speaking of mating fowls for breeding the *Poultry Keeper* says:

It is a fact recognized and admitted by all poultry breeders that in selecting fowls for breeding it is desirable the ages of the cock and hen should vary. It is generally admitted that the strongest and best chickens are produced from a young cockerel and two-year-old hens; but unfortunately, however, the chickens of such parentage have too frequently a large proportion of males, and therefore it is that some breeders prefer a two-year-old cock to put with pullets. This rule must not, however, be looked upon as imperative as to either case; there are exceptions to both, and good chickens may also be produced from cock and hens all of the same age. One thing ought always to be borne in mind, that in mating your fowls less than a year old their chickens will always be backward in fledging; neither is it desirable to breed from fowls after they have passed their third year. The male bird has the most influence upon the color of the progeny and upon what are usually known as the fancy points, while the form, size and useful qualities are principally derived from the hen. As to the crossing of a breed, the cockerels in the progeny will more or less resemble the father, while the pullets follow the mother, and a knowledge of this fact is of much importance to those who wish to breed back to the original strain. In the larger breeds it is frequently desirable to increase the size or to render more prominent some portion of the body. In such cases a cross with a hen of a foreign breed should be employed. If, on the contrary, it is the plumage which is sought to be modified, then it is the male bird that should be thrown in. The same rule should also be adopted in breeding the cross out again or in retaining any new characteristics.

## Experiments with Incubators.

Experiments with incubators of ten different makers have been tried by the editor of the new and bright little *Poultry Keeper* of Chicago. These conclusions were arrived at:

That the proper heat is 102 the first week and 103 till the nineteenth day, when it should be 104.

That when the heat is kept too high the chicks dry in the shell at the time of hatching.

That chicks will come out under a low temperature, but do not absorb the yolk properly, and are consequently weak.

That the higher the temperature the more moisture is required.

That turning the eggs twice a day is sufficient.

That they will hatch when turned only once a day.

That fresh eggs hatch sooner than those partially stale.

That the eggs from Asiatics do not stand, or rather require, as much heat for incubation as some others.

That a good warm bath to an unfledged chick just from the shell is highly beneficial.

That no sprinkling of eggs is necessary during incubation.

That eggs from confined fowls are not always reliable for hatching.

That eggs are injured for hatching purposes to a certain extent by shipping long distances.

That badly shaped eggs, though sometimes hatching, are not reliable.

The cost of keeping fowls varies according to the climate, cost of food in different localities, etc., but the cost of keeping the different breeds in laying time does not vary so much as the breeders of the smaller varieties would have us believe. It costs more to grow the large breeds to the laying age than it does the smaller ones, but after they reach that age there is but little difference in the amount of food necessary to keep fowls of the different breeds in laying time, the "poultry authorities" who tell us that the Leghorns and other small breed "eat only one-quarter as much" as the larger breeds, to the contrary, notwithstanding.

YACHTING.

The Pacific Y. C. Cruise.

The principal event in yachting circles last week was the cruise of the Pacific Yacht Club to Vallejo last Saturday. Pursuant to orders, the following yachts assembled off Front street wharf: Aggie, Lurline, Haleyon, Nellie, Fleur de Lis, Whitewing, Annie and Ariel. Nellie and Rambler, however, failed to start with the fleet, but went up afterwards, while Casco had gone up sooner. No official time was taken on the up trip, and the yachts did not start by any means evenly. The usual Summer wind was blowing, and the tide was on the last of the ebb. The flood tide was not felt until after passing Raccoon straits. Nothing of consequence occurred on the way up; the wind holding steady and the sea smooth. The vessels arrived in the following order: Aggie, Lurline, Fleur de Lis, Haleyon, Annie, Whitewing and Ariel. The actual time consumed by each yacht was roughly as follows: Aggie, 2 hours 58 minutes, Lurline 3 hours 1 minute, Fleur de Lis, 3 hours 3 minutes, Haleyon, 3 hours 18 minutes, Annie, 3 hours 19 minutes, Whitewing, 3 hours 27 minutes Ariel 3 hours 28 minutes, pretty close together in a run of 28 miles. The yachts took up positions to the northward of Georgia street wharf, and near the Mare Island shore. The fleet was later on augmented by the arrival of Nellie, Rambler and Spray.

The afternoon end evening was spent as is usual on these occasions, and at 11:15 the next morning the preparatory gun was fired and sail made. At 11:30, on the firing of the starting gun, ground was broken, forward sail set and the yachts all made a hitch to the northward, catted their anchors and made what light sail they thought correct.

The Commodore was the first one to go about and was soon followed by the fleet crossing the starting line, as follows: Annie, Fleur de Lis, Rambler, Aggie, Whitewing, Ariel, Spray, Lurline, Nellie and Haleyon. As there was a pleasant sailing breeze and as the yachts were pretty well hunched they all made a most beautiful feature. The position of the fleet did not change much as far as the light-house on Mare Island, with the exception that Lurline went to the fifth place going to windward of Ariel at such a little distance that one could jump off her main boom into the latter's deck without any exertion. The start was made at just high water, and when the yachts got out into San Pablo they found a nice whole sail breeze, and had a strong ebb tide under their sterns which showed them rapidly to windward. As soon as Whitewing, Nellie, Haleyon and Spray could weather Mare Island they went about and made a long leg on the port tack, Murphy on the Nellie occasionally giving his vessel what is termed a "pilot boat luff," shooting to windward as long as the vessel held her way and then letting her fall back on the same tack. The wind held steady and well to the southward, but these vessels did not have the same force of tide as the helance of the fleet which kept close along the Contra Costa shore. Lurline carried her staysail which sets remarkably well on the wind, while most of the others had only working canvas set. After weathering Ptucote the wind hauled more to the southward and eastward, enabling all the vessels to weather Point Pedro on the port tack and fetch between Point San Quentin and the Marine Islands before going about. The race for first place had now narrowed down to Aggie, Lurline and Fleur de Lis. The two former here went about too soon as Whitewing by keeping further in shore got that slant out of San Rafael Valley, and was enabled to lay her course right along the Marin shore, while the others were still close hauled and pointed a point and a half to leeward of her. Aggie seemed to be sailed very wildly, making what "old salts" call an alphabet with her wake. Fleur de Lis maintained her advantage thus gained and rounded the winning stakeboat first, followed by Aggie, Lurline, Nellie, Haleyon, Annie, Whitewing, Ariel, Rambler, Casco, (which had come out from Carquinez straits soon after the start), and Spray, the latter picking up the stakeboats and towing them to Saucelito. Too much credit cannot be given to White for his efficient sailing of his vessel, and for the good judgment displayed in the course taken by him, by which he heat the fleet on even terms. Herewith is the official time of the race;

Table with 4 columns: Name, Actual time, Corrected time, and another Actual time. Rows include Fleur de Lis, Nellie, Lurline, Aggie, Haleyon, and Annie.

Spray time not taken at Vallejo. Rambler and Whitewing went on wrong side of home stake boat—time not taken.

This result gives the Aggie, the acknowledged flyer of the fleet, only fourth place, a ridiculous position for a vessel with her reputation in such a comparatively small fleet. If Mr. McDonough—if he does not desire to sail his own yacht—would get some professional boat sailer, or some capable amateur, to take the tiller on such affairs as this, instead of allowing inexperienced hands and novices to have the handling of her, his yacht would make a much better showing.

We fail to see, however, why time allowance should be allowed on a cruise such as this, in which it is all dead to windward

work, at the same rate as over the club course, which embraces all points of sailing, more especially as there is no prize or flag offered to the winner. If a gentleman can afford to equip and run a yacht of any size, he should have the credit—if he makes the fastest time—of having the fleetest yacht, boat against boat.

The plans for Ex-Commodore Floyd's new steam yacht are all finished, and work will be commenced on her as soon as he can sail the Ariel, which letter he never uses.

There is seemingly not much interest taken in the San Francisco Yacht Club Annual Regatta, which is to be regretted, as a full entry in club races gives a healthy stimulus to the sport.

FISH.

Fourth Annual Fish and Cruise of the Robin Hood Club.

MR. EDITOR.—It was the general regret of the members of our club that prior engagements connected with your paper, prevented your accepting an invitation to join our last party, but we hope before the season closes to have the pleasure of your company. Thinking our cruise would interest some of your readers, I have, at the request of our club, briefly given you the particulars, for we hold our fishing parties and chowder lunches are always worth joining. As usual, we took the sloop yacht, Annie, and were off from Clay street at 7:30 sharp, under the command of the genial and fun-loving John Leary. Our first point of destination was Angel Island, to catch the tide on the turn so that we might also catch the fish, where we arrived after a tedious passage, in which we did not catch the wind, whatever the early bird may do catching the worm. We never had much faith in early rising, and in no case that we know of is this much-vaunted virtue so completely lost as when put in practice in early yacht sails on our bay. Arriving at the Island, business was attended to without delay. Somehow the fishing, like the sailing, proved slow work, probably because the boys paid more attention to stealing a drink than to catching a hite. Suddenly all was excitement and noise, for our worthy chief cook, Mr. Thornhill, in getting away slyly with a hotle of the very best Martel brandy, lost his balance and went head first overboard. All hands were piped to the rescue, and though the unlucky man was fished out none the worse for the mishap except a soaking, that made him wish it was time to light the fire for lunch. The brandy unfortunately was lost. His excuse was that he did not mean to take the brandy for his own use, but to keep it for culinary purposes, and on account of his punishment the boys accepted his excuse. Still many of the club never refer to the matter without a sly laugh and the elevation of the tip of the dexter finger to the extreme point of the nose, though what is meant by the last movement we do not know. After things were straightened out and Mr. Thornhill made as comfortable as possible, it was concluded to get fishing and more of it could he had off California City than where we were, and so to that place our smart little sloop was at once headed. The idea proved correct. The fishing off California City was really good, supplying not only plenty of choice fish for the chowder at lunch, but leaving plenty for our friends at home. Altogether we must have caught about 80 pounds. At the proper time we went ashore for lunch, in the preparation of which, aided by brother Shuppert, no mean cook himself, Mr. Thornhill put all his former achievements in the shade and made everybody happy. It is astonishing how everybody loves everybody after a good dinner, and in the happy feeling, thus created even the loss of the Martel brandy was forgotten and forgiven. Nothing occurred during or after the lunch to mar our pleasure, except that the worthy president Mr. Hansley, was suddenly overcome by the heat and evinced a desire to sleep that was unpleasant. To prevent any similar attacks, he was put to bed and the Annie, made quite comfortable, and then as the breeze had freshened into a juvenile gale, the sails let loose for the usual afternoon cruise round the bay. During this the president did not sleep so much as we expected. His ailment took another form, urging him into a vociferous mood, and causing him with much comicality, and in a G Major tone to sing: "S'life son the ocean swave," in the original Chinese tongue. The affair was a grand success, though some of us did land dripping from the spray. The only disappointment was the absence of our accomplished and genial friend, the Field Editor of the BREEDER AND SPORTSMAN, which we sincerely trust will not happen on our next trip. Truly yours, R. H. C.

IN THE STUD. Llewelin Setter Dog CARL, BY LIECESTER OUT OF DART. Color, Black, White and Tan; aged five years. Bred by L. H. Smith, of Strathroy, Ontario, Canada; broken by E. B. Morgan, now of Akron, Ohio, also handled one season by N. B. Nesbitt, of the Harvard Kennel Club, at Storm Lake, Iowa. Will be bred to a few first-class bitches. Fee \$40.00. Address W. W. MOORE, Oakland, Cal. or J. Y. ROSS, 123 California Street, San Francisco.

Golden Gate FAIR, Oakland Trotting Park,

September 1st to 6th Inclusive.

Over \$20,000 in Premiums.

SPEED PROGRAMME.

First Day, Monday Sept. 1st.

- No. 1.—Running; Golden Gate Purse, \$500; two-year-olds; three-quarter mile dash; four moneys. J. C. Simpson's ch c Cito, by Joe Hooker; dam Too Soon, by Norfolk. Wm. Boot's blk g, by Thad Stevens; dam Gypsy, by Hercules. Wm. M. Murray's ch s Estill, by Norfolk; dam, Lady Jane. James Mee's ch f Mischief, by Thad Stevens; dam Katie Pease. H. G. Carrillo's ch m Mamie D., by Wheatley; dam by Lodi.

Second Day, Tuesday Sept. 2d.

- No. 4.—Trotting; 4-year-olds and under; purse \$600; 4 moneys. H. M. McGregor's gr g Centaur, by Sultan; dam Bellevue Maid. L. J. Rose's br m Neluska, by Sultan; dam Gretchen. John A. Goldsmith's br m Regina, by Electioneer. Wilbur F. Smith's blk g Thapsin, by Berlin; dam Lady Hubbard. Closed under published conditions. No. 5.—Trotting; 3-minute class; purse \$600; 4 moneys. E. M. Fry's h g Rob Roy, by Gen. Benton; dam Nettie, by Norfolk. L. J. Rose's blk g Le Grange, by Sultan; dam Georgiana, by Overland. John A. Goldsmith's h g Joe Arthurton, by Arthurton. Wm. Bihler's h m Blanche, by Gen. McClellan; dam by John Nelson. Closed under published conditions.

Third Day—Wednesday, Sept. 3d.

- No. 6.—Running; free for all; three-quarter mile and under; purse, \$500; \$300, \$150, \$50. James Adams' b m Aunt Betsey, by Hardwood, dam Peggy Ringold. S. J. Jones' b s Forest King, by Monday, dam Abbie W. Wm. M. Murray's b s Stanislaus, by imp. Partisan, dam Mother of Modoc. Closed under published conditions. No. 8.—Trotting; 2:30 class; purse, \$800; four moneys. I. De Turk's b s Anteco, by Electioneer, dam Columbine. A. C. Dietz's br m Olivette, by Whipple's Hambletonian, dam Belle. Armstrong & Carrington's blk s Rarus, Jr., pedigree unknown. Pat Farrell's Marin, by Quinn's Patchen, dam unknown. Wm. Bourke's b g Johnny, by Auctioneer Johnny, dam unknown. James M. Learned's b s Adrian, by Reliance, dam Adriana, by Shenandoah, 926. Wilbur F. Smith's h g Adair, by Electioneer, dam Addie Lee.

Fourth Day—Thursday, Sept. 4th.

- No. 9.—Trotting; three-year-olds and under; purse, \$600; four moneys. Rancho del Paso's ch h Robert Lee, by Nutwood. G. W. James' b g Peyton, by Electioneer, dam Miss Peyton. J. C. Simpson's hr c Anlevolo, by Electioneer, dam Columbine, by Bonnie Scotland. A. A. Yeager's h m Nona Y., by Admiral, dam Flora. L. J. Rose's d s Kismet, 2 years, by Sultan, dam Saucchox, by Saucapan. G. W. Tramer's b c Foucher, by Nephew, dam by Vernon Patchen. Charles H. Thomas' grs Pope Leo, by Romeri, dam by Crichton. No. 10.—Trotting; yearlings; purse \$250; three moneys; mile dash. Rancho del Paso's b c Senator, by Echo, dam by Young Morsl. C. E. Taylor's ch c Trevati, by Sterling, dam by Flaxtail. M. Toomey's b c Transit, by Propriator, dam Venus, by Cal. Dexter. A. Waldstein's ch s Bonanza, by Arthurton, dam John Nelson. A. C. Dietz's b f Daphne, by Buccaneer, dam Alma. L. J. Rose's Bay Colt, by Sultan, dam by Geo. Wilkes.

Fifth Day—Friday, Sept. 5th.

- No. 12.—Trotting; 2:35 class; purse, \$800. This race not filling has been re-opened. Entries to close with Secretary, September 21, 1884. No. 11.—Pacing; free for all; purse, \$500; four moneys. (Corette to wagon). This race not filling has been re-opened. Entries to close with Secretary, September 21, 1884. No. 13.—Pacing; free for all; purse, \$1,000; \$500 to first horse; \$250 to second horse; \$150 to third horse; and \$100 to fourth horse. This race did not fill, and has been re-opened, with Director barred, and Nellie R. to wagon. Entries to close with Secretary August 23d, 1884. No. 18.—Running; free for all; two miles and repeat; purse, \$5,000; four moneys. Entries to close with the Secretary Sept. 2d, 1884.

Armstrong & Carrington's blk Rarus, Jr., pedigree unknown. John A. Goldsmith's h s Gny Wilkes, by Geo. Wilkes, dam by Mambrino Patchen. No. 13.—Trotting; two-year-olds; purse, \$400; four moneys. J. D. Young's br s Colonel Hawkins. Rancho del Paso's b h Lohreggin, by Echo, dam by Geo. M. Patchen, Jr. L. J. Rose's h s Stamboul, by Sultan, dam by Hamiltonian. Closed under published conditions. No. 14.—Trotting; 2:26 class; purse, \$800; four moneys. E. Downer's ch g Tump Winston, by Primms, dam Lady Don. J. W. Donalhan's blk g B. B., by Bellfounder, dam unknown. John A. Goldsmith's b m Sister, by Admiral. Peter Johnson's blk g Scandinavian, by Blackhawk Morgan. Closed under published conditions.

Sixth Day—Saturday, Sept. 6th.

No. 15.—Ladies' Tournament; purse, \$100; \$25 for the most graceful rider; second, \$15; third, \$10; for the most skillful rider, \$25; second, \$15; third, \$10. No. 16.—Bicycle race; free for all; one mile dash; purse, \$100; first, \$50; second, \$30; and the third, \$20. No. 17.—Trotting; free for all; purse, \$1,000; \$500 to first horse; \$250 to second horse; \$150 to third horse; and \$100 to fourth horse. This race did not fill, and has been re-opened, with Director barred, and Nellie R. to wagon. Entries to close with Secretary August 23d, 1884. No. 18.—Running; free for all; two miles and repeat; purse, \$5,000; four moneys. Entries to close with the Secretary Sept. 2d, 1884.

Remarks and Conditions.

All trotting and pacing races are the best three in five, except the two-year-old trot, unless otherwise specified. Five to enter and three to start in all the above races, but the Board reserves the right, in all the races in the above programme, to hold a less number than five to fill, by the withdrawal of a proportionate amount of the purse. Entrance fee, ten per cent. on purse to accompany nomination. Purposes of four moneys divided at the rate of fifty per cent. to first horse, twenty-five per cent. to second, and fifteen per cent. to third. National Association rules to govern trotting; but the Board reserves the right to trot heats of any two classes alternately, if necessary to finish any day's racing or to trot a special race between heats. A horse making a walk-over, shall be entitled only to the entrance money paid in. When less than the required number of starters appear, they may contest for the entrance money, to be divided as follows: 66 2/3 to the first and 33 1/3 to the second. In all races, entries not declared out by six p. m. of the day preceding the race, shall be required to start. When there is more than one entry by one person or in one interest, the particular horse they are to start must be named at 6 p. m. of the day preceding the race. No added money paid for a walk-over. Non-starters in running races will be held for entrance under rule 3. Racing colors to be named in entries. In trotting races, drivers will be required to wear caps of distinct colors, which must be named in their entries. Entries to all of the above races, to close with the Secretary on Friday, August 1st 1884. L. WALKER, Secretary. A. C. DIETZ, President. Office, 26 Montgomery St., San Francisco. P. O. Box, 2360.

STATE FAIR AUCTION SALE

Thoroughbred and Road Horses, Cattle, etc.

During the coming State Fair stock will be disposed of at public auction for account of the following gentlemen:

- FINE TROTTER COLTS. Account of G. VALENSIN, Arno Station; THOROUGH-BRED COLTS, WORK HORSES AND MULES. Account W. L. PRITCHARD, Sacramento; PURE-BRED JERSEY CATTLE. Account Major ROBERT BECK. Parties desirous of absolutely disposing of FINE STOCK, WITHOUT RESERVE OR LIMIT, will address the undersigned. KILLIP & CO., Live Stock Auctioneers, 116 Montgomery St., S. F.

PACIFIC COAST Field Trial Club DERBY FOR 1884.

Nominations close Nov. 10th. Entrance \$10; \$3 to accompany nomination; \$7 additional when starters are named. Purse \$175; \$100 to first; \$50 to second, \$25 to third. All pups whelped on or after April 1st, 1883 are eligible. It is hoped that those desiring to compete will be prompt in making nominations. Club dues are now payable to the Secretary. THOS. BENNETT, President. N. E. WHITE, Secretary, Sacramento, Cal.

Horses in all district races must have been owned in the district June 1, 1884.

The track has just received a dressing and is in first rate condition—both fast and safe.

Entries to close August 1, 1884.

### REMARKS AND CONDITIONS.

All trotting and pacing races are the best three in five, except the yearling trot, unless otherwise specified; five to enter and three to start. But the Board reserves the right to hold a less number than five to fill, by the withdrawal of a proportionate amount of the purse. Entrance fee, ten per cent. on purse, to accompany nomination. All purses unless otherwise specified divided at the rate of fifty per cent. to first horse, twenty five per cent. to second, fifteen per cent. to third, and ten per cent. to fourth.

National Association Rules to govern trotting; but the Board reserves the right to trot heats of any two classes alternately, if necessary to finish any day's racing, or to trot a special race between heats. A horse making a walk-over shall be entitled only to the entrance money paid in. When less than the required number of starters appear, they may contest for the entrance money, to be divided as follows: 66% to the first and 33% to the second.

In all races entries not declared out by 6 p. m. of the day preceding the race shall be required to start.

Where there is more than one entry by one person or in one interest, the particular horse they are to start must be named at 11 a. m. of the day preceding the race. No added money paid for a walk-over.

Rules of the State Agricultural Society to govern running races, except when conditions named are otherwise.

Non-starters in running races will be held for entrance, under Rule 3.

Racing colors to be named in entries.

In trotting races, drivers will be required to wear caps of distinct color, which must be named in their entries.

Entries to all of the above races to close with the Secretary on Friday, August 1, 1884.

Entry blanks and racing rules will be furnished upon application to the Secretary.

J. McM. SHAFER, President.

W. E. Cox, Secretary.

ASHLAND PARK TROTTING STUD

NEAR LEXINGTON, KY.

B. J. TREACY, PROPRIETOR.

THIS IS STRICTLY A BREEDING FARM, FOR though training is done, it is only for the stock belonging to the place, or those purchased from the proprietor. The proprietor of Ashland Park has no pet trotting family; his aim is to secure and have at all times for sale choice representatives of each of the leading families, these being the Hambletonians, Mambrino Chiefs, Chas. Phlots, Black Hawks, & Ashland Park may now be seen splendid specimens of the get of such stallions as George Wilkes, Almont, Mambrino Patcher, Clark Chief, Edwin Forrest, Blackwood, Sentinel, American Clay, Administrator, North Star Mambrino, Bourbon Chief, Regular, Balsa, Howard's Mambrino and Homer. The steady aim is to possess nothing that does not trace through the best class of speed-producing trotting crosses, along all the blood lines, right to the thoroughbred. For catalogues or further particulars address 2 1791 B. J. TREACY, Lexington, Ky.

REMARKS AND CONDITIONS. All trotting races are best three in five; five to enter and three to start; but the Board reserves the right to hold a less number than five to all by the withdrawal of a proportionate amount of the purse. Entrance fee, ten per cent. on purse, to accompany nominations. National Association Rules to govern trotting; but the Board reserves the right to trot heats of any two classes, alternating if necessary, to finish any two races, or to a special race between heats. A horse making a walkover shall be entitled only to the entrance money paid in. When less than the required number of starters appear, they may contest for the entrance money, to be divided as follows: 60% to first, 35% to second. All races, entries not declared out by 6 p. m. of the day preceding the race shall be required to start. Where there is more than one entry by one person, or one entry by two persons, the particular horse they are to start must be named at 6 p. m. of the day preceding the race. No added money paid for a walkover. Rules of the State Agricultural Society to govern running races, except where conditions named are otherwise. Non-starters in running races will be held for entrance under Rule 3. Racing colors to be named in their entries. In trotting races, drivers will be required to wear caps of distinct colors, which must be named in their entries. Entrance fee, ten per cent. Entries to all the above races to close with the Secretary on Friday, Aug. 1, 1884. Write "Entries to Races" on outside of the envelope. J. HINMAN, Secretary.

RUPTURE Absolutely cured in 30 to 40 days, by Dr. Pierce's Patent Magnetic Elastic Truss. Warranted Entirely Different from all others. Perfect Retainer, and is worn with ease and comfort night and day. Cured and recommended by J. J. Simms of New York, and hundreds of others. New Illustrated pamphlet free, containing full particulars. Write to J. H. CORNWALL, President, 704 Sacramento St., San Francisco, Cal.

VULCANIZED FIBRE AXLE WASHERS. Far Superior to Leather. Warranted Not Affected by Oil or Grease. One Set Will Outwear Three or Four Sets of the Best Pressed Leather Washers. Ask Dealers for the "Vulcanized Fibre Washers." GREATLY REDUCED PRICE LIST, Which is far below any Leather Washer List. DIFFENBACHER & WIHL, GENERAL AGENTS, 318 Front Street, San Francisco, Cal.

The Annual STATE FAIR — A T — Sacramento, CALIFORNIA, COMMENCES SEPT. 8th, 1884, And Continues Two Weeks.

Purse, \$500. No. 16. RUNNING—Mile race; go as you please; free for all. Entrance fee, \$2.50; \$25 added. Last mile out wins the money.

Remarks and Conditions. All Trotting and Pacing Races, except when otherwise specified, best 3 in 5. Five to enter and three to start. In Running Races, to fill purses five or more subscribers are necessary. In all races, except where otherwise expressly stated, entrance fee ten per cent. on purse, to accompany nominations. Purse divided at the rate of 60 per cent. for first horse, 30 per cent. for second, and ten per cent. to third. National Association rules to govern Trotting and Pacific Coast Blood Horse Association to govern Running Races. The Board reserves the right to trot heats of any two classes alternately, or to trot or run a special race between heats. No money for a walkover. Horses entered for purses can only be drawn by consent of judges. All entries to be made in writing, giving name, sex, color and marks of horses; also name and residence of owner. In Running Races, full colors must be worn by riders. Drivers in Trotting Races are requested to wear caps of distinct colors, to be named in their entries, as their horses will be designated in program by colors worn by drivers. Entries to all the above races to close with the Secretary on Friday, August 15th, 1884. All races in which District Horses are entered, they must have been owned in the District prior to July 1st, 1884, except when specified "free for all." Address all communications to GEORGE FLETCHER, Assistant Secretary, Holbrook Hotel, Grass Valley. GEO. G. BLANCHARD, President. J. H. CULVER, Secretary.

REMARKS AND CONDITIONS.

National Trotting Association Rules to govern all Trotting and Pacing Races. But the Directors reserve the right to change the order of the programme so as to alternate if necessary to save time, and furnish more than one race the same day.

In all Trotting and Pacing Races, five to enter, three to start. Entrance ten per cent. of purse, to accompany all nominations.

Horses distancing the field will be entitled to the first and third money only.

Horses entered for purses can only be withdrawn by consent of the Judges.

The Pacific Coast Blood Horse Association Rules to govern all Running Races.

Non-starters for Running Races will be held for entrance.

Non-starters must be declared out the day previous to the race they are engaged in, before eight o'clock p. m.

In all Running Races the second horse saves entrance.

No money paid for a race without a contest.

All entries for Races to close with the Secretary or President, at Chico, Aug. 1st, 1884, at ten o'clock p. m.

The Board of Directors will have absolute charge of the Track and Grounds during the week of Races, and guarantee that they will be kept in first-class condition.

The above rules in regard to entries and conducting the Races will be strictly enforced, and all purses and stakes will be paid when the Judges have rendered their decision, and before leaving the Stand.

N. B. In all running races the second horse saves entrance. The time of closing entries extends to August 1st, at 10 o'clock p. m.

C. C. MASON, PRESIDENT.

ROLAND DILLER, SECRETARY.

STICK FAST TOE WEIGHTS.

DIETZ'S PATENT

CHECK HOOK.

Simple in its Structure and Practical in its Use.

The horse never loosens the check-rein when this Check-Hook is used.

Horsemen can appreciate the value of a Check-Hook of this kind.

There being no springs or hinges to break connected with it, makes it serviceable and easily appended, as the check-rein passes through a solid ring attached to the front of the book.

Orders sent to

A. C. DIETZ,

No. 9 Front St. San Francisco, Cal.

Will receive prompt attention.

When ordering state whether gold or silver plate required.

W. H. Woodruff,

VETERINARY DENTIST.

TO

Sportsmen & Pleasure-Seekers.

THE

SOUTHERN PACIFIC R. R. CO.

RESPECTFULLY CALLS ATTENTION TO THE

SUPERIOR FACILITIES

AFORDED BY ITS LINE FOR REACHING

with speed and comfort the best places in the State for

Sea Bathing, Shooting and Fishing.

TRAINS LEAVE SAN FRANCISCO DAILY FOR

MONTEREY,

THE MOST CHARMING

Summer and Winter Resort of the

Pacific Coast,

with its beautiful Groves and delightful Drive, Tront in abundance can be obtained from the several estates in the vicinity of Monterey, and the best of shooting may be had in season.

THE BAY OF MONTEREY

Is noted for the extent and variety of fish which abound in its waters, notably Salmon, Rock Cod, Sardina, Pompano, Spanish Mackerel, and Flounder. The above-mentioned attractions, in connection with the low rates of fare, rapid transit, and the superior accommodations furnished at the "HOTEL DEL MONTE," have made Monterey a paradise for sportsmen.

THE BATHING FACILITIES

AT THE

"HOTEL DEL MONTE,"

ARE UNSURPASSED,

having a MAJESTIC BEACH of pure white sand for surf bathing. The BATH-HOUSE contains

SPACIOUS SWIMMING TANKS

(150x30 feet) for warm salt water plunge and swimming baths, with ELEGANT ROOMS connecting for individual baths, with douche and shower facilities.

THE FAVORITE ROUTE to those well-known Watering Places,

APTOS, SOQUEL AND SANTA CRUZ.

IS VIA THE

Southern Pacific Railroad,

(Broad Gauge).

The S. P. R. R. runs through the counties of San Mateo, Santa Clara, San Benito, Santa Cruz and Monterey, in each of which game abounds in great variety. Notably

Quail, Pigeon, Snipe, Duck, Geese, Deer and Bear.
