Subject : Application of Temporary Using for Registered Machinery.

Sir,

Our Factory is now being engaged in manufacturing the Cotton Spinning Machineries as exports goods and as the delivery terms of thirteen thousand (13,000) spindles are fixed at March, 1949. We are doing our best to fulfil our contracts, however, as we afraid that we might fail to deliver the commodities within the designated term so far as we used only the machines on which your authorization had been already given.

However, the end of derivery term is so close that we hereby entreat you that you will kindly grant us the permission of using those 2 sets of machineries for temporary as attached sheet.

Yours very truth,

SUBJECT : Application for Permission on Removal and Custody of Additionally Inventoried Equipment

THRU : Kyoto Liaison Office

TO : Commanding officer of Kyoto Military government Team

The Main factory of the Kotobuki Industry C, Ltd has submitted to us the following petition for permission on the semoval and custody of the additionally inventoried equipment . We think it is quite reasonable in view of the condition of operation at this factory.
We hereby ask you for a permission on it.

FOR THE GOVERNOR

S. Hasegawa

S.HASEGAWA
Chief of Reparations Section
of Kyoto Pref. Govt. Office

17-2

DECLASSIFIED E.O. 13526, Sec. 3.3

Petition

Summary of Equipment :

1. Inventory NO (additionel Inventory) 22-36-1480

2. Name of Article : Heating Furnace

3. Capacity of Furnace : 2.500 1.500 900 mm

4. Construction : Fire Brick 90 % Iron & Steel 10%

5. Accessaries : Coal Feeder . Blower (Without Motor)

Reason for Removal :

As the acetylene gas welding is indispensable for our work to produce the authorized civil commodities, it is being performed in the Building NO.13 in our factory. But there is a denger that the gas may explode, since we have no storge for the gas generator. we have been given a instruction from the Labor Standards Superintendent Office that the gas storage must be erected in accordance with Article 387 of Labor Safety and sanitation Rule, and examined a suitable site for the storage.Then for the storage. Then, we found that if the storage is constructed between the Building NO12, NO.13 and NO35 or between NO 11 NO, 13 and NO 35, it will be a bindrance to not only traffic of trucks and wagons for transportation of articles but our activities in case of emergency. We once intended to build the storage on the broad road between the Building NO.13 and NO,18, but the bending machine inventoried as NO.733 has been set o n the north side of this road and our intention has proved unavailable. In conclusion, the only spot is on the south side of this road.

The welding work is performed in the Building NO.13, but when we stretch a hose in a long distance, it will be an obstruction to various otherworks.Consequently, we decided to e exchange the location of furnace for that of the welding shop.

Thus it has become necessary to remove the above-said furnace.

Disposition of Furnace after Remobal. If we are granted a permission, we will take a sketch of the structure of the furnace, dismount carefully the iron frames, beicks and other accessories, and the carry them into the factory which is not in operation.

We will put them in the eustody in good condition so that can seconstruct it at any time just as it is now.

Rongh sketch of location nearby the equipment:

TEXTILE MACHINERY MAKERS

No. 51 Matsuda-cho,
Shimokyo-ku, Kyoto
Japan

Offices at:
Tokyo
Kyoto

Jan. 29, 1949

To : Commanding Officer of Kyoto Military Government Team.

Thru : Reparation Section of Kyoto Prefecture.

Subject : Application for Exclusion of the additionally registered equipments.

Sir,

In compliance with your instruction that all machineries and equipments in our factory must be registered when the additional registration was ordered, we have registered the following equipment. Although we were operating it, we afterward have suspended its use because it became unnecessary for our work. Then the Kansai Electric Power Supply and Distribution Co., Ltd. made a proposal to return it to them. Our factory does not need it and feel inconvenient.
But as it had been once registered, we want you to exclude this equipment from registration.

We hereby ask you to instruct us how to deal with this equipment.

Registered No. (Additional) 22-36-1576-U
name of article Watt-hour Meter
(AC 3 phase 3 lines cycle 60
accessories: Potential
transformer)

Reason for application for exclusion:

This watt-hour meter was installed at the time when the Kansai Electric Power Supply & Distribution Co., has started to supply our Jujo Factory with electric power (The date of installation is unknown but probably in about 1934).
It is customary that the electric power supply company installs the meters at their customer's house, and there is not any

document which certifies the company has carried these equipments into our factory. But the meter has been sealed by the Kansai E. S, & D. Co., Ltd. and it is evident that this meter is duly owned by this company, and as it has been used since before the war in our factory we did not registered it as EX when the ordinary registration was ordered.

We hereby make an application for exclusion of it from registration as it became unnecessary for our work and we were asked by the Kansai E. P. & D. Co., Ltd to return it to them.
