SWEET CHALYBEATE SPRINGS

ALLEGHANY COUNTY, VA.

B. F. EAKLE, MANAGER

OPEN FROM
JUNE 1 TO OCTOBER 1

TWO DAILY MAILS
EXPRESS AND TELEGRAPH OFFICE
IN HOTEL

the many and a series of the s

THESE well-known and popular springs are situated in a lovely valley, ensconced in the backbone of the Alleghany Mountains at an elevation of 2,300 feet, in the midst of the "Springs Region" of Virginia, celebrated for its beauty of scenery, salubrious climate, rich agricultural and grazing lands, and health-

giving mineral springs. We are only nine (9) miles from Alleghany Station—the highest point on the Chesapeake & Ohio Railway—connected by an excellent turnpike. Visitors are met at the Station by agents of the Springs, who take charge of all baggage and conduct the guests to the Springs in stage-coaches or light spring vehicles, without delay or inconvenience, through picturesque mountain scenery.

VIEW OF SPRINGS

Analysis THE Analysis of the Sweet Chalybeate water, both by Rowelle and Professor William B. Rogers, demonstrates it to be the strongest Chalybeate water known to the world. It is stronger than the famous Powhon Spring of the Spa, of Belgium, that has the largest reputation as an iron spring in Europe; or the Pyrmont Spring, in Westphalia; the celebrated Congress water; the Sans Souci, Parks, Columbian, High Rock, Washington, Anderson Spring of our own country, or any other iron water that can be mentioned. The analysis is as follows:

One Gallon of Water Contains:

Iron Carbonate, 32. grains. Iron Combined, 16. Calcium (Lime, Carbonate, 64. Magnesium Carbonate, 48.	
Magnesium Sulphate, 16. 16. 16. 16. 16. 16. 16. 16. 16. 16.	inch.

A grand total of 200 grains of the finest Medicinal Mineral ingredients to the gallon. The temperature of the water, Winter and Summer alike, is 79 degrees Fahrenheit. 800 gallons of water a minute, or 1,152,000 gallons each day, is the flow of these remarkable springs. There are three springs within a space of ten feet, all emptying into the same basin.

PROPRIETOR'S COTTAGE

Cherapeutic Propersties of the Water &

\$ \$ \$ \$ \$ \$ \$ \$

A PHYSICIAN will readily appreciate the wide adaptability of this water as an adjuvant in the treatment of a large class of diseases that would be incurable with medicine alone, but by taking prescribed medicine in conjunction with this water, both

internally and externally, a cure may be easily obtained. The analysis shows this water to be an alterative tonic of the finest character, while experience of many years' duration has proven this to be the case. When drunk and bathed in freely the water opens the pores of the skin, removes impurities of the blood, arouses torpid and sluggish secretions, stimulates the nervous and arterial system, thereby causing pains and aches to disappear and a feeling of renewed activity to take place. It restores lost vitality and revives the debilitated. The appetite is increased, digestion assisted, and sweet refreshing sleep is enjoyed by the nervous.

Disease Success= fully Created &

T IS impossible to enumerate all of the diseases to which this water is applicable. It may be said to act as a powerful tonic in all cases of general debility, to assist in the cure of cholera infantum, or any catarrhal condition of the stomach and bowels. Remarkable cures

of long standing and seemingly incurable dyspepsia have been made. As a diuretic, it acts quickly and freely. In any disease of the liver (not organic) or kidneys (except diabetes insipidus) it has a most salutary action. Ladies suffering from menstrual derange-

LAWN AND LAWN TENNIS

ments are greatly benefited and cured by drinking of and bathing in these waters. Cases of sterility, seemingly incurable, have been cured here quite frequently. Any one suffering from malaria in any of its forms is always benefited by a visit to us.

Drinking the Water and has no disagreeable odor whatever. The large amount of gaseous constituents make it far more palatable than ordinary drinking water—it has a decided mineral taste. The water may be drunk ad libitum by some, but invalids had better consult the resident physician, who will instruct them how much and when to drink of the water. The proprietor, at large expense, has piped water from a delightful spring to the hotel, and guests who do not wish to drink the unineral water may drink of this cool, sparkling, and pure mountain spring. Besides having hydrants at convenient distances in the hotel, there are hydrants of this water on the lawn. It is

Bathing Pool • THE two large enclosed bathing pools with cement floors are our most popular attraction. Both ladies' and gentlemen's pools have polite and efficient attendants in charge. Nothing more delightful can be imagined than a daily plunge in this health-giving, exhilarating water, so freely charged by nature with carbonic acid and other gases. As 800 gallons of water each minute flow

also served at meals.

VIEW OF LAWN AND COTTAGES

from these springs at the delightful temperature of 79 degrees Fahrenheit, it will readily be seen that the bather is in a constantly flowing stream, and not bathing in standing water, which is not the case with bathing pools generally. After experiencing the glorious sensation of a plunge bath in our pools, one feels a delightful sensation of languor and contentment creep over them. Both mind and body are refreshed and rejuvenated. All of our guests are enthusiastic in their praises of our splendidly appointed bathing pools. Special hours set aside for children.

Resident Physician * Physicia

Pleasure Resort THERE are four requisites that must combine to form a perfect health and pleasure resort, viz.: Climate, Water, Amusements, and Good Hotel Accommodations. At the Sweet Chalybeate Springs all of these important requisites are to be found.

Climate. O more delightful climate can be found anywhere than we enjoy from the first of April until the first of November. The mean temperature for that period is about 60 degrees Fahrenheit.

FALLS ON THE LAWN

We always enjoy a pleasant, cool breeze, day and night. The days are not too warm, while the nights during the whole summer are cool enough to require the use of a blanket on beds. Guests should come supplied with plenty of wraps.

Water • Sweet Chalybeate Springs water, as will be seen from the analysis, is unsurpassed by any in the world, and is a natural remedy prepared in nature's own laboratory for the cure of all diseases. It has a pleasant mineral taste, and has no disagreeable odor whatever. We have also piped to the Hotel spring water that is free of minerals, pure and delightfully cool.

The Best Carbonated Water e SAMUEL O. L. POTTER, A. M., M. D., M. R. C. P., London, formerly Professor of the Principles and Practice of Medicine in the Cooper Medical College

of San Francisco; author of the "Quiz-Compend of Anatomy and Materia Medica;" "An Index of Comparative Therapeutics;" several articles in Foster's "Practical Therapeutics," and "Speech and its Defects;" late major and brigade surgeon of Volunteers, U. S. Army, says in "A Handbook of Materia Medica, Pharmacy, and Therapeutics," eighth edition, 1901, page 93:

The free use of carbonated mineral waters is of service in gout. At many European spas the course of treatment is largely based on the use of carbonic acid administered in the forms of baths and inhalations, as well as by the ingestion of the waters containing it. Bathing in the natural carbonated waters is sometimes beneficial in catarrh, gout, rheumatism, anæmic amenorrheea, and leucorrheea, the gas acting as a gentle stimulant of cutaneous circulation, and promoting slight diaphoresis.

WALK TO SPRINGS

On page 91 of the same book, in giving a list of the strongest carbonated mineral waters in the world, we find:

Consequently, taking this eminent authority as a guide, The Sweet Chalybeate Springs is the strongest carbonated mineral water in America.

The anusements indulged in by our guests are varied: Tennis, Bowls, Billiards, Pool, Riding, or Driving may be enjoyed by some, while others prefer to explore the surrounding mountains, or to roam through majestic forests, or to fish in the adjacent streams that abound in trout. We have secured the services of a first-class orchestra, which will play for the dancers at night, also give day concerts on the lawn. We have churches of several denominations in the neighborhood, but, as a rule, have services every Sunday in the Ball-room.

Bar e

E HAVE a nicely conducted bar in connection, and keep in stock a fine lot

of liquors, wines, etc.

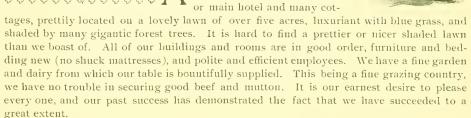

FIRST AND SECOND COTTAGES

WELL conducted livery stable will be supplied with a number of horses suitable for riding and driving.

The remarkably fine mountain roads in our vicinity offer rare opportunities for viewing beautiful scenery, unsurpassed in this country.

passed in this country.

| Note| Cottages, and Grounds & S will be seen from very imperfect cuts, we have a large or main hotel and many cot-

We would strongly advise any one contemplating a visit to us this season to write early and engage rooms, otherwise you may be disappointed, for we are always crowded during the height of the season.

HILL COTTAGE

Rates:	Per	week,												\$10.00	to	12.00
	Per	month	of	28	d	ays	S ₉ .		٠					35.00	to	45.00

Weekly rates will be charged for any time less than a month. Children under ten years of age, half price, **if their meals are taken in the ordinary**, otherwise they are charged full price. There will be no exceptions made to this rule. White and colored servants, according to accommodations. Our charges are moderate, but the cuisine will be kept up to the standard of any Summer resort in the mountains.
