FILLMORE IN OHIO.—A Cincinnati correspondent of the New York *Express*, writing under date of July 8, says:

Fillmore's Albany Speech has Redeemed Ohio!—There has been the greatest change here in public sentiment since Mr. Fillmore's arrival in New York that was ever known, even by that distinguished individual, the "oldest inhabitant." The whole State is on fire, and shouting for Fillmore and Donelson! Judge Headley, of this State, in the Black Republican Convention at Philadelphia, pledged Ohio to give one hundred thousand majority for Fremont. He yesterday said in the Courthouse *that Fillmore's Albany speech had already reduced that majority fifty thousand!* Hurrah, then, for the model President! Ohio will give Fillmore and Donelson *twenty thousand majority!*

Now, to prove to our brother of the *Courier* that we never suffer our political feelings to influence our judgment, we will say in reference to the above statement that we think Ohio nearly as sure against FILLMORE as it is against BUCHANAN. No doubt both the national candidates will poll a respectable vote, but we have unfortunately good grounds for believing that FREMONT will have an immense majority over either, if not a majority over both. Ohio is one of the States that we set down as certain for FREMONT.

The *Herald*, in an article on the Presidential chances, thinks that Fremont is ahead "all over the South," "Buchanan losing ground," and "Fillmore brushing up in the South." The latter gentleman, it thinks, will be largely aided by the old Whig movement. It says:

The "cold-line Whigs" of Maryland, in a formal State Convention, have declared him their "cold-line" candidate—not on the rickety Philadelphia platform, but upon the good ideas of the old Whig party. This proceeding in Maryland has been heartily seconded by the "cold-line Whigs" of Virginia, and will doubtless be followed up in similar movements throughout the Southern States; and this restoration of Mr. Fillmore to the respectable position of the "cold-line Whig" candidate will be very apt to give him four or five, if not a full half dozen of the Southern States. This consummation will carry the election into Congress should Fremont fail of an election by the people by his vote in the Northern States. In this resurrection and reaction of the "cold-line Whigs," therefore, Mr. Fillmore ceases to be an insignificant figure in the perspective, and becomes a prominent object in the foreground of the picture.

Over twelve hundred names, some of the best in New Jersey, appear in the Newark *Eagle* meeting the people to a Fillmore meeting, in Newark, on Wednesday next.

The Republicans of New Brunswick (N. J.) held a ratification meeting last evening.

The Fillmore and Donelson Club of Jersey City held a large and enthusiastic meeting last evening. Hon. James Brooks addressed the meeting for over an hour. The ladies of the place are to present the Club with a banner.

The New York *Express* announces that at a meeting of the American Council, Monday evening last, in the twenty-first ward of this city, Mr. Law was unanimously expelled, and with him Mr. Mott, of that ward—who recently attended the Fremont Convention in this city.

Hon. John C. Breckinridge was serenaded at the Galt House, Louisville, on Thursday. He made a brief speech, in which he regarded the Republican and the Democratic as the two great contending parties, and very sharply denounced the Republican.

The Albany *Statesman* publishes the proceedings of the first meeting of the Fillmore and Donelson Club of that city. The proceedings showing considerable enthusiasm, and the names attached to the call are very numerous and highly respectable.

THE WHIGS OF MAINE.—The Whigs of Maine appear to be very generally impregnated with the Fillmore spirit, and there exists considerable enthusiasm among them.

The Bath *Tribune* contains reports of spirited meetings of Whigs at Bath and Brunswick. At the Bath meeting the following resolution, among others, was adopted:

Resolved, That among the candidates nominated for President of the United States, no one has been named who presents so many claims to the confidence and support of the whole country as Millard Fillmore, who, in a former administration of the government harmonized the political and sectional differences of the United States, and gave us the most pure and patriotic administration since the days of Washington.

STEAMBOAT SUNK.—The officers of the steamer *L. M. Kennett*, which arrived yesterday, report the steamer *David Tatum*, hence for St. Louis, struck a snag on the morning of the 15th inst., and sunk. When the *Kennett* saw her the water was over the main deck. The *Grimes* had on board 300 tons railroad iron, for St. Louis. We understand that she was insured in Cincinnati for $15,000.

HANGING.—At Thomson, Columbia county, Ga., on the night of the 14th instant, Jean A. Fleming, better known as John Andrew Watson, stabbed and killed William A. McDonald. Cause, rum and cards. The coroner's jury returned a verdict of "willful murder." Watson is at large.

The Thibodaux *Minerva* of Saturday says: We have had a most delightful week of thunder, lightning and rain. Extensive water previously for young ducks. The sky still looks portentious, and the promise of a "clear account" looks rather gloomy.

The submarine cable has been successfully laid down between Cape Breton and Newfoundland a distance of eighty-five miles. The line is expected to work between St. Johns and New York by the 1st of September next.

FRANKLIN ACCIDENT.—Between the hours of 10 and 11 yesterday morning, the scaffolding at the top of the Academy, in this city, fell with a tremendous crash to the earth, bearing with it a white man named Andrew Styles, and a colored man and boy, the former the property of Dr. I. P. Garvin. The three persons were found to have sustained very serious injuries, and it was feared that in one case they would prove fatal.—*Augusta Chronicle.*

GERMAN BUCHANAN PAPER GOES DOWN.—The Cincinnati *Commercial* says:—In the list of Buchanan German papers we published the other day, was the *Daily Courier*, Cleveland, Ohio. The journal was started some time ago by the Postmaster and other Government officers, to try to keep the Germans in the traces; but the Germans of Northern Ohio failing to patronize the concern, it has gone down. The Cincinnati *Volksfreund* is now the only German Daily which supports Buchanan.

SAD ACCIDENT.—On Thursday night, while the rockets were being fired at the Fillmore meeting, one of them accidentally slipped while igniting, and flying along instead of upward, struck a young man standing near it, entering the sleeve of his coat at the wrist and passing out at the elbow, and in doing so caused a most fearful wound, laying all bare to the bone on the lower arm. He was taken to the office of Dr. LeVert, where he received immediate surgical assistance.—*Mobile Register.*

TRIAL OF HON. P. T. HERBERT.—Another dense crowd assembled this morning in the Criminal Court. The argument of J. M. Brewer, Esq., was closed; and Messrs. Percy Walker, of Alabama, and Joseph H. Bradley, of this city, argued the case for the defense; when the District-Attorney, Mr. Key, closed for the prosecution, and the case was submitted to the jury at ten minutes past 3 o'clock, with the following instructions from his Honor Judge Crawford, on the application of the counsel for the defense:

1st. If a sudden affray arose between the accused and the deceased, and afterwards several other persons interfered to assist the deceased, or by these assailants the defendant was borne down and beaten, and had reason to believe that he was in imminent danger of great bodily harm, from which he could not safely escape, and while in this position fired the pistol by which the deceased was killed, it was in judgment of law a case of excusable homicide, and it is immaterial in the absence of premeditation and malice, by whom the affray was commenced.

And it is also not material that the accused might have escaped before the imminent peril came upon him, if at the time the peril came he had reason to believe himself in imminent peril of life, or of great bodily harm, and when he fired the pistol he could not safely escape.

2d. To have authorized Herbert to take the life of Keating, the necessity for doing so need not be *actual*; for if the circumstances were such as to impress him (Herbert's) mind with the reasonable belief that such necessity was impending, it is sufficient.

3d. If the jury believe, from the evidence, that at the time the pistol was discharged Herbert was being pressed by superior numbers, and was in danger of death, or of serious bodily harm, from which he could not safely escape, he was justified in taking life.

4th. If the jury entertain reasonable doubts as to any material fact necessary to make out the case for the government, they must give the benefit to the defendant.

The Court met again at half past 6 o'clock, when a message was received from the jury, saying that they had come to no agreement, and requesting the Court to adjourn to meet at half-past 9 o'clock to-morrow (Sunday) morning, which was agreed to.—*Washington Union, 12th.*

SUICIDE.—It is our melancholy duty, says the Lawrenceville *Herald*, to chronicle the fact that Mr. G. L. Dollar, a very worthy citizen of our District, committed suicide, by hanging himself from a tree near his dwelling, on Sunday morning last. Mr. D. was much respected in the district, and the reason for committing the rash act is involved in mystery. His wife first discovered him suspended from the tree, and immediately cried for help, but, alas! it came too late—dead had the body become, and head gone to judgment. He was a sober, industrious and peaceable man, and no cause can be assigned, unless temporary aberration of mind. He leaves an amiable wife and large family of children—most of them quite young, in embarrassed circumstance of life.

Telegraphed to the Bee,

[By the Southern Line.]

ARRIVAL OF THE FULTON.

TREATY BETWEEN ENGLAND AND HONDURAS.

NEW YORK, July 19.—The Havre and Southampton screw steamship *Fulton* has arrived at this port.

The *Fulton* brings no later dates than already received, but her mails bring intelligence of the conclusion of a treaty between Great Britain and Honduras; by which Bay Island is restored to Honduras, (on condition the arrangement is acceptable to Mr. Dallas) as removing a great obstacle in the way of a new Central American treaty between the United States and Great Britain.

CONGRESS.

WASHINGTON, July 19.—The SENATE was not in session on Saturday. In the HOUSE OF REPRESENTATIVES the sitting was extended to 9 o'clock in the evening. The subject of discussion was the Brooks and Sumner case, and there were twenty-six occupants of the floor. Messrs. Cullen, Boyce, and Etheridge each made an hour's speech and then, on motion of Mr. Quitman, the speeches were limited to fifteen minutes each. The discussion presented no new feature; one side contending for the power and duty of the House to punish the offence, and the other side denying all authority over the subject, and somewhat palliating the assault. Several of the speeches were ingenious and temperate; others went to the full extent of the parliamentary limit. It will scarcely be deemed invidious to say that Mr. Etheridge, of Tennessee, if we may judge from the attention paid him, and the good temper diffused among members by his humorous sallies as well as logical deductions, made the best impression and came nearest the true line of action. He warned his Southern friends not to let mere party feeling place them in opposition to their former record on the point of authority in the House "to punish its members for disorderly conduct," and he gave Northern members the hint that they, too, (acting for their section) were somewhat changing front, citing the cases of Mr. Adams and Mr. Giddings to show that the power had not only been claimed, but exercised by members from all sections of the country. Mr. Etheridge, however, was not willing to vote for the resolution of expulsion. Mr. Eaglish, of Indiana, proposed a substitute simply censuring Mr. Brooks for the assault on Mr. Sumner, and also passing censure on the license of speech used by the latter. Mr. Houston, of Alabama, moved to recommit the resolution, with instructions to report that the House had no constitutional authority to act on the case. But no vote was taken on either of those propositions.—An effort will be made to-close the proceedings on this subject during this day.

The SENATE has evinced its purpose of taking a final vote to-day upon the bill to amend the naval reform act of the last session.

This is the commencement of the thirty-fourth week of the session, and no day is fixed for its termination.

WASHINGTON, July 11, 1856.

More about the Corruption in the Departments—Forney Mixed up in it—The Kansas Question not to be Settled, &c.

Mr. Ball's resolution of investigation into charges of corruption against certain parties holding office under the government, if faithfully pursued, promises to reveal a state of things which has long been known to exist, and by which the nation has been robbed of its hundreds of thousands if not millions of dollars. The highest of our public officers are now charged with having enriched themselves by fraudulently aiding contractors, first in getting them contracts, and after in permitting their violations, on some imperfect or technical plea which had been agreed upon by the parties when the contract was first under consideration. There are government clerks in this city who, on a salary of from one to two thousand dollars a year, have built themselves splendid mansions, and who keep for their family use horses and carriages, the cost of which alone would more than exceed the amount of their legitimate income. These men occupy their time chiefly in hunting up the ways and means for adventurers to get their "paws" into the public treasury, and then have the spoils which are taken there from divided, in proportion to its amount—one-half or two-thirds going to the thief, and the balance to the "honest" government clerk. Many of these men are not only known to be thus engaged by the heads of the bureaus in which they belong, but they are aided in their enterprises, and encouraged in their deceptions, for considerations agreed upon among themselves. These clerks are frequently the agents of their chiefs, or heads of office, and are to be found at times, when speculation runs high, in private bargainings with some government dry dock builder, or mail carrier, or contractor, who wants the aid of the office to which the party belongs, and who finally comes to the conclusion that it must be secured at any price. If the amount in question is important, the pay to get it must be in proportion, which frequently overreaches the $10,000 fee sworn to by Mr. Wendell, the public printer, in the case of the Mobile Custombouse. Formerly these "engravers," or government employés, perpetrated their deeds of outrage under cover of night, and exhibited traits of a certain kind of modesty when preparing for a "strike," which has now departed from them. They and their *confreres* in plunder, by their success have become bold and insolent, and want the bar-gain come to, and at once, upon their own terms. This evil has at last forced public attention to it, and Mr. Ball's investigating committee, if it is to be anything more than sound, will find for itself enough of business to attend to for months to come.

Let the committee make a call for particulars of the distribution of the Mexican three million, including the parties who, by their disinterested influence, obtained as a bonus the small sum of one hundred thousand dollars, or thereabout, out of the three millions, for services rendered.

Congress will adjourn, leaving the Kansas question, from all appearances, for the next session to settle. No bill of importance, beyond the Appropriation bill, will be considered, that is yet to be reported. The tariff is not thought of, and the Patent bill of the Senate will never again be heard of. Every interest has to yield to that of the Presidency.

Keeping Flies Out of Houses.

In 1836 Mr. Spence communicated to the Transactions of the Entomological Society the means of excluding flies from a room with unclosed windows, by covering the openings of such windows with a net made of white or light colored thread, with meshes an inch or more in diameter. Now, there was no physical obstacle whatever to the entrance of the flies, every separate mesh being not merely large enough to admit one fly, but several even with expanded wings to pass through at the same moment; consequently, both as to the free admission of air and of the flies, there was practically no greater impediment than if the windows were entirely open, the flies being excluded simply from some dread of venturing across the thread-work. The only condition is that the light enters the room on one side only; for, if there be a thorough light from an opposite window, the flies will pass through the net. Mr. Spence first saw this mode practiced near Florence by a gentleman who had seen it adopted in the monastery either of Camaldoli or La Verna. A passage in Herodotus, book ii, chapter 35, records that the fishermen in his time were similarly protected from gnats when asleep by covering themselves with their casting-nets, through the meshes of which the gnats would not pass. This Herodotus at first sight would imply as Geoffrey St. Hilaire showed him to be in the history of a bird (*Charadrius Ægyptius* of Hasselquist) taking Le Grande à HOUSE, and the balance to the "honest" government clerk. Many of these men are not only known to be thus engaged by the heads of the bureaus in which they belong, but they are aided in their enterprises, and encouraged in their deceptions, for considerations agreed upon among themselves. These clerks are frequently the agents of their chiefs, or heads of office, and are to be found at times, when speculation runs high, in private bargainings with some government dry dock builder, or mail carrier, or contractor, who wants the aid of the office to which the party belongs, and who finally comes to the conclusion that it must be secured at any price. For sale in New Orleans by

J. WRIGHT & CO.,

THE WOMAN'S FAIR OF ALL NATIONS.—Among the noticeable things on exhibition at the Crystal Palace we note the contributions of *New York*, from the laboratory of Dr. C. Mott, the inventor of the Improved and valued Gummic Fabrenda. As it is spoken the superior toughness of the Fabrenda to almost any stock application is the reason why the Gummic are not placed in their category by the manufacturers. Indeed, we learn that the Fabrenda is now highly appreciated by scientific men, and have been lately used by Pilots are held in great estimation by the Fabrenda for the heeling art.—*From the Crystal Bee.*

CITY INTELLIGENCE.

THEATRE.—The police books presented very little of interest Yesterday in the way of visitors. There were only a number of strangers, and a few bloody-faced pugilists, the result of some pugilistic encounter, who are so inured to dangerous as to "make wheat" of their condition. A note of their numerous grievances and depredations would only serve to fatigue our readers.

Finding other places closed of interest, we strolled up into the "Garden District." Here, too, for the nonce, we found everything unusually quiet, except numerous complaints of the heat. Such we heard as we passed along Apollo and Jackson streets. It would seem that all who frequent those thoroughfares are in a state of chronic complaint, and that here and there a dishonest fellow "gets a fool" of his neighbor's garden, or enters his premises and lays a pilfering hand on his pears.

From all accounts, a number of the finest gardens have been pillaged, and consternation spread by many a successful sally of the invaders upon long and jealously besieged box-rows. Indeed, the vegetable have been a surprising if not in the way of chicken-stealing, that we cannot but suggest to the proper authorities the propriety of increasing the police of the district, till these marauders have either thus thrive on the honest labor of others shall have been thoroughly arrested.

We took occasion, while passing his house last evening, to call in and see Mr. Haberstock, an honest and hard working German, who, as we have before noticed, was dangerously stabbed in a desperate encounter with some unknown thief who had entered his premises at night. We found the gentleman in bed, while in the act of stealing his chickens. We are happy to learn that he is now much improved in his condition that there is now every chance of his recovery.

STABBING AFFAIR.—A man named John H. Butler was arrested last night on the charge of being the desperate chicken-thief who stabbed Mr. Haberstock so severely on Friday morning last, at his residence in the Fourth District. The circumstances of the case were reported by us at the time. The basket and most of the stolen chickens were found concealed in a wood pile, not far off from Mr. Haberstock's house.

A bone pistol came in put down on the police books as William Robert, a free man of color, was arraigned before Recorder Pitkee last week for stabbing, without provocation, John Tremaint, f. m. c., at the corner of Conti and Robertson streets. Robert is exceedingly sorry for the affair, and the circumstances of the case were reported by us at the time. The basket and most of the stolen chickens were found concealed in a wood pile, not far off from Mr. Haberstock's house.

A bone pistol came in put down on the police books as William Robert, a free man of color, was arraigned before Recorder Pitkee last week for stabbing, without provocation, John Tremaint, f. m. c., at the corner of Conti and Robertson streets. Robert is exceedingly sorry for the affair, and the circumstances of the case were reported by us at the time. The basket and most of the stolen chickens were found concealed in a wood pile, not far off from Mr. Haberstock's house.

DROWNED.—An inquest was held last week on the body of a free man of color, named Abbott, a native of Ohio, aged 36 years, found in the river, near the Lower Market ferry. Accidentally drowned." [illegible] had been a fireman on board of the steamboat Illinois, and rolled over board about four days ago, while standing on the guard.

A little boy named Honore Laroche, about five years old, died on Friday evening by falling into the river, between two ships that are lying at the wharf, between St. Andrew and Adele streets, Fourth District. The body was recovered and an inquest held yesterday. Verdict "Accidentally drowned." The name of the unfortunate man was incorrectly reported in the papers yesterday as Henry Lourier

SENT BEFORE THE CRIMINAL COURT.—John Lyons was examined before Recorder Stith on Saturday last, and sent before the First District Court for trial, on a charge of having stolen $180 in gold and silver coin from between the mattresses of a bed at No. 41 Fourcher street. The evidence was of a circumstantial but very conclusive character. Bail $400.

FIRST DISTRICT COURT.—*Hon. J. B. Robertson*—Thomas H. Selby, who had plead guilty to the charge of forgery, was sentenced in this Court, on Saturday, to two years' imprisonment at hard labor in the Penitentiary.

Louis Boutelier, for an assault and battery, was sentenced to one month's confinement in the parish prison, and to pay a fine of twenty dollars.

Abraham Ehrert, wife and two daughters, accused of a like offense, were discharged.

PENMANSHIP AND BOOK-KEEPING.—All who wish to be ready to fill good situations early in the fall should begin immediately. New classes begin today at Dolbear's Commercial College, 106 Canal street. There are also an apartments and professors for English, French, Spanish, German, mathematics, &c.

Wanted Immediately,

OFFICE OF THE COMMISSIONER OF PILOTS,

Wednesday, April 16, 1856.

The undersigned, Commissioner of Pilots of the State of Maryland, being in receipt daily of dockets from various portions of the country, making inquiry as to Licensed Pilots for the Port of Baltimore, I am directed, and submit herewith for publication, to say that any vessel may be supplied with a Pilot by application to the Agents of the MARYLAND COMMISSIONER OF PILOTS, at the following places, viz: Cape Henlopen, Delaware Breakwater, Cape Charles, Cape Henry, Hampton Roads, Old Point Comfort, Norfolk, Portsmouth, Smith's Island, Point Lookout, Annapolis, and before the pilots leave all Licensees produced to the masters of the MARYLAND COMMISSIONER OF PILOTS, and the Pilots are required to show their Licenses to the Agents of the Commissioner, and to the masters of vessels. Licenses granted to Masters, Mates, and Engineers.

JOHN G. HARRIS,

Commissioner of Pilots.
