- d. Radio, Headquarters IX Corps, cite D 51618 JOS, dated 15 November 1949.

2. This headquarters has taken action to amend procurement demand JPNA 108 covering the procurement of ice to change the receiving officer as requested in 1d above. The procurement account code on this demand will be changed to read 821-75-101-06 since the CIC is a GHQ, FEC unit.

3. Your attention is invited to reference 1a. Procurement Demand JPNA 192 and 195 were cancelled per reference 1a effective 10 August 1949. The procurement Section, this headquarters, has on file final procurement receipts on these demands terminating them as of that date. No authority exists for the continued acceptance of indigenous publications under these demands after 10 August 1949. In the event that deliveries of publications have been accepted after that date, it is directed that you stop delivery at once and immediately process correspondence to this headquarters requesting approval of the preemption.

SUBJECT: Release of Procurement Demand Real Estate

HEADQUARTERS CAMP MCGILL (TAKEYAMA), Japan, APO 201 Unit 1
27 October 1949

TO: Commanding Officer, Shizuoka Civil Affairs Team

1. Real property indicated in basic letter was reported as excess to the requirement of this headquarters, as result of survey 30 Aug 49.
2. It is desired that permission granted to Prefectural Government be covered in writing to insure that it is an understood temporary arrangement. There is no authority for release until this headquarters is specifically directed to initiate release procedures. Rental receipts from date of occupancy by the Prefectural Government will be cancelled.
3. It is requested that date of occupancy by Prefectural Government of property JPNR-1553A be indicated by indorsement hereon.

SUBJECT: Release of Procurement Demand Real Estate

**TO: Commanding Officer
Camp McGill
APO 201, Unit 1
ATTN: Regional Post Engineer**

1. It is recommended that action be taken to release the office space in the Shizuoka Kencho Building covered by Procurement Demand JPNR-1553 and JPNR 1553-A as these offices will not be needed by occupation forces after about 15 December 1949.

2. In view of the time necessary to process the release, permission has been granted by the Chief Shizuoka Civil Affairs Team for the Prefectural Government to utilize the Penthouse covered by PD JPNR 1553-A effective 1 November 1949. This space is not being utilized by the occupation forces at the present time.

AGHP 400.12

SUBJECT: Yen Allocation for Entertainment Services
Procurement Demands

7 JUL 1949

6473

TO: Chief
Shizuoka Civil Affairs Team
APO 1007

1. This headquarters has received from the Supreme Commander for the Allied Powers, the yen budget effective 1 April 1949 for indigenous supplies and services to be procured during the Japanese Fiscal Year 1949. No deficiency appropriations can be expected, and the approved budgets will not be exceeded.
2. At this time it is not accurately known how much has been spent for entertainment services received during the first quarter of JFY 1949. Yen allocations as shown in the fiscal limitation clause of entertainment procurement demands for Eighth Army units total approximately 50% of the annual budget. At the present rate of expenditure the entire budget will be obligated prior to October 1949.
3. To correct this situation and to provide for entertainment services for the balance of the year, yen allocations for April, May, and June 1949 are frozen, effective 30 June 1949. Specific yen allocations for each subsequent quarter will be made by this headquarters. When accurate costs for the first quarter are known, this headquarters will adjust the yen allocations in subsequent quarters to provide for any savings. In no case will the yen allocations be exceeded. Over-obligation of allocations for any quarter will be absorbed within the following quarter.
4. Yen allocation for your command, for the second quarter JFY 1949, is as follows:

98

775013

AGHP 400.12

SUBJECT: Yen Allocation for Entertainment Services Procurement Demands

7 JUL 1948

JPNS No.

2nd Quarter Yen Allocation

29

36,374.00

Procurement demand concerned is being amended to reflect the above listed amount, and Special Procurement Board of the Japanese Government has been so advised to prevent excessive expenditure for the month of July.

subject: "Shimizu Port Military Police Detachment".

1st Ind

HQ. SHIZUOKA MILITARY GOVERNMENT TEAM, APO 1007, 24 May 1949.

TO: Post Commander, Headquarters Camp McGill
APO 201, Unit-1.

1. It is the opinion of this headquarters that subject hotel be placed on Procurement Demand as soon as practicable.

2. The following justifications are submitted.

a. At present the occupancy of subject hotel is costing the Japanese Government an average of 234,000 yen per month (\$ 650.00). Payment for the hotel service is being made under Procurement Demand JPNO 40, Subject: "Transient Hotel Service". The immediate procurement of the hotel would cancel this expenditure and lessen the procurement burden on the government. Furthermore the amount of money that would be needed to recondition and rehabilitate the present structure would be small compared to the amount already expended for the service.

b. This hotel is the only suitable building in Shimizu City that could be used for billeting Occupation Forces personnel. The procuring of a smaller unsuitable building would necessitate the expending of more funds for rehabilitation. The hotel is not important to the reconstruction of Japan's economy and the procurement of such would not cause or create hardships on the present overburdened housing and office space shortage.

c. The hotel is so constructed that it would be impracticable to partition part of the hotel for the detachment's use.

3. It has been pointed out that the amount of space proposed for procurement is in excess to the amount authorized by existing directives but taking into consideration the fact that the hotel must provide recreational, messing, motor pool and other facilities, plus the isolation of the unit, the importance of the unit's mission and the above three justifications it is highly recommended that the hotel be procured for the use of the Shimizu Military Police Detachment.

APO 1007

1. This headquarters has received disapproval of a request for confirming procurement demand for the Real Property known as the Minate Hotel, billet of the 1st Cavalry Division Military Police Surveillance Detachment for the Port of Shimizu, and instructions to survey the area, for other possible available billets.

2. Surveys conducted by officers from this headquarters indicate that the Minate Hotel is the most suitable billet for this detachment, and that there is no other building or buildings available to economically rehabilitate for this purpose.

3. It is requested that an opinion be stated, by indorsement hereon, using the attached correspondence (Incls 1 - 6) to aid in the arrival at a conclusion.

1. Inspection of records in this headquarters indicates that procurement receipts for entertainment services on procurement demand JPNO-4413 are delinquent. Performances for which there are no procurement receipts on file in this headquarters are as indicated below:

<u>Item</u>	<u>Type</u>	<u>Dates</u>
1	Variety Show	1 day in November 1948 1 day in December 1948

2. Action necessary to complete the procurement record on demand JPNO-4413 is as follows:

a. Submit three (3) certified true copies of procurement receipts for services which have been accomplished and indicated as delinquent in Par 1 above.

b. For services not received preparation, execution and distribution of negative receipts in accordance with Circular 23, this headquarters, 24 March 48, subject: "Procurement Receipts."

c. Submit letter report of non-compliance with receipt instruction for these performances delivered and for which receipts have not been presented by the Japanese supplier. Paragraph 5b5 of circular cited in b above directs this action be taken.

3. It is desired that the action outlined in Par 2 above be completed not later than 11 May 1949.

AGGI 400.12

14 April 1949

SUBJECT: Procurement of Policy in Relation to the Stabilization
of the Japanese Economy

TO: Commanding Officer
Shizuoka Military Government Team

1. Reference: Letter, General Headquarters, Far East
Command, AG 400.12 (14 Feb 49)GD, subject: "Procurement Policy
in Relation to the Stabilization of the Japanese Economy,"
Inclosure 1.

2. In keeping with the spirit of the policies laid down
in referenced letter, addressee commanders will initiate action
to critically reexamine all requirements for indigenous
materials and services to the end that the financial load upon
the Japanese economy of Occupation Force requirements may be
reduced to the minimum which will still permit this command to
carry out its various assigned missions in an efficient manner.

3. The following interpretations will be used in implementing
the provisions of subject letter.

4. Paragraph 2. Principles for Procurement:

All items of equipment and/or supplies which normally would
be procured by an Army in the Zone of Interior with funds allo-
cated to the Zone of Interior may be obtained by means of
directives issued to the Japanese Government. All items of
equipment and/or supplies which are not normally obtained by
a Zone of Interior Army by means of requisitions through normal
supply channels must be requisitioned from the Zone of Interior
and can only be procured by demands on the Japanese Government
if the items are not available from the Zone of Interior and
are authorized for indigenous procurement by Supreme Commander
for the Allied Powers.

5. Paragraph 3b and c. Release of Excess Stocks of Supplies
to Japanese Government:

The terms "coordinated authorized requirements" paragraph
3b and "coordinated known requirements," paragraph 3c are
interpreted to include the following known elements:

26

AGGI 400.12, subj: Procurement Policy in Relation to the Stabilization of the Japanese Economy

- a. Presently authorized theater stock levels.
- b. Stocks needed to meet requirements during the next twelve (12) month period ending 31 March 1950.

6. Paragraph 4b and c. Employment of Japanese Labor:

It is not expected that implementation of paragraph 4c will eliminate all indigenous labor employed by tactical troops. The principle that "indigenous labor reported as employed by tactical troops if employed for interior guard or other functions of authorized and assigned personnel of combat units should be replaced by unit personnel" will be applied in any instance where a Japanese is performing a function for which a space is specifically provided in the authorized Table of Organization and to which United States personnel has been assigned and is present for duty. It will also be applied in any instance in which a Japanese is performing a function which would have to be performed by unit personnel under field conditions and in which assigned personnel should be trained. Conversely, administration, operation and maintenance and security of fixed facilities (not interior guard duty) for which no provision has been made in Tables of Organization or for which no troops are available may be accomplished as necessary by Japanese labor.

7. Paragraph 6. Occupation Forces requests for construction:

- a. This headquarters will continue to submit to General Headquarters, Far East Command, those projects which are believed to be essential to the proper accomplishment of missions assigned this command.

- b. In connection with base maintenance and rebuild projects (paragraph 6d (2) (b)) the cost charged other commands on rebuilt assemblies exported will include only their proportionate share of amortized costs

8. Transportation:

Japanese procured trucks will be replaced by U. S. General purpose vehicles when required. Indigenous procurement of buses and sedans will continue until such time as U. S. vehicles can be made available from rebuild operations or other sources.

AGGI 400.12 subj: Procurement Policy in Relation to the
Stabilization of the Japanese Economy

Procurement of buses and sedans must be specifically approved
by General Headquarters, Supreme Commander for the Allied
Powers.

Asst Adj General

GENERAL HEADQUARTERS
SUPREME COMMANDER FOR THE ALLIED POWERS
APO 500

AG 400.12 (14 Feb 49)GD

14 February 1949

SUBJECT: Procurement Policy in Relation to the Stabilization of
the Japanese Economy

TO: Commanding General, Eighth Army, APO 343
Commander, United States Naval Forces, Far East,
Navy No. 1165
Commanding General, Far East Air Forces, APO 925
Commanding General, Headquarters and Service Group,
General Headquarters, Far East Command, APO 500

1. General. The current policy of this Headquarters to keep at a minimum the financial impact of the Occupation Forces on the Japanese economy requires constant examination of the procedures of procurement of labor and materials on a non-reimbursable basis with a view to elimination of wasteful or unjustifiable methods. A recent review of the situation indicated certain revisions toward reduction of items of procurement and the institution of stricter controls. Addressee commanders will take the necessary steps to enforce compliance with the instructions contained herein.

2. Principles for Procurement. The procurement of construction supplies, labor, and/or services from the Japanese economy for use of the Occupation Forces will be governed by the following general principles:

a. The directives to the Japanese Government will include only those requirements for the Occupation Forces which would normally be furnished Zone of Interior forces through proper expenditure of United States appropriated funds. Except as specifically authorized by the Supreme Commander for the Allied Powers, requirements furnished by the Japanese Government in excess of the foregoing will be on a reimbursable basis.

b. No procurement will be initiated solely for the purpose of raising above existing standards Occupation Force services or facilities.

c. Procurement will be initiated for essential requirements only, and then only when such requirements cannot be fulfilled from assets or means already available.

3. Supplies, Equipment and Materials.

a. Supplies, materials and equipment will be procured from the Japanese economy only when they cannot be obtained by requisition from the Zone of Interior and when substitutes are not available within the commands through which the requisition is processed.

AG 400.12 (14 Feb 49)GD, 14 Feb 49

Subj: Procurement Policy in Relation to the Stabilization of the Japanese Economy

b. The accumulation of stocks of supplies, equipment and materials by the Occupation Forces in excess of requirements is not permissible. The extent of current excesses will be determined by examination of all echelons of supply. Unconditional release to the Japanese Government of all supplies, equipment and materials found excess to the coordinated authorized requirements of the Occupation Forces will be accomplished with the least practicable delay.

c. The use of letter directives to permit accumulation of supplies, equipment and materials by the Japanese Government was authorized to permit the Japanese Government sufficient time to procure materials required to meet approved occupation construction programs and maintenance schedules. It has become increasingly evident that the Japanese Government has been required by letter directives to stockpile materials far in excess of imminent Occupation Force requirements. Any materials acquired by the Japanese Government in compliance with letter directives and not required for accomplishment of approved programs, and which are in excess of the coordinated known requirements of the Occupation Forces, will be released for utilization in the Japanese economy. Specific directives covering these releases will issue from General Headquarters.

4. Employment of Japanese Labor.

a. A substantial portion of the cost of occupation accrues through employment of Japanese labor. Accordingly, the elimination of existing abuses in the employment of such labor is essential to the overall economy program. The employment of excessive numbers of Japanese by the Occupation Forces, and excessive overtime payments to these employees are the two major abuses which must be eliminated. Manning tables and manning levels for all types and categories of labor will be critically re-examined with a view to effecting substantial reductions. Review of the Japanese labor situation will be undertaken to effect a maximum reduction in numbers and the limiting or elimination entirely of overtime payments except for domestic servants.

b. The employment of indigenous labor to perform military tasks for which troops should be trained is not favorably considered in principle. The procurement of indigenous labor to perform such tasks will be held to that irreducible minimum beyond which essential operational functions of the occupation forces would cease.

c. Indigenous labor reported as employed by tactical troops in October 1948 totalled 26,748. Reports included 4,528 guards, 1,555 drivers, 988 clerks and 54 telephone switchboard operators, which, if employed for interior guard or other functions of authorized and assigned personnel of combat units, should be

AG 400.12 (14 Feb 49)GD, 14 Feb 49
Subj: Procurement Policy in Relation to the Stabilization of the
Japanese Economy

replaced by unit personnel. Reports also included 145 building managers, 132 office managers and 432 foremen, which, if employed by combat or service units below depot level for supervision of tactical unit functions, should likewise be replaced by unit personnel. Addressee commanders will submit requests for exception to the foregoing with full justification, if the situation warrants.

d. Indigenous labor will not be employed to perform functions of personnel of combat organizations, except to the extent that the employment of civilian personnel by such organizations is authorized by regulations.

e. When indigenous labor is procured to perform organizational tasks of service units below depot level, it will not be procured by means of service contracts but will be directly procured and employed under military supervision so as to assure that military supervisory personnel receive functional training and that direct control is exercised over military functions.

5. Services furnished Occupation Forces by the Japanese Government by Service Contracts.

a. Service contracts now under review by General Headquarters indicate the following:

- (1) Service contracts are being utilized for the procurement of labor for the operation of facilities. Contracts of this type serve to circumvent and defeat the purpose of labor ceilings, and in many instances violate Japanese Public Law 141 which prohibits the exploitation of labor by labor bosses.
- (2) Excessive numbers of employees are utilized by service contractors considering the type and amount of services rendered.
- (3) Operational equipment which is appropriately a part of or an adjunct to Occupation Forces installations is being furnished by service contractors at excessive rental rates.
- (4) Many service contracts are in effect for the provision of services no longer required by the Occupation Forces, for example, a large number of architect engineer firms.
- (5) In the past, construction and other operations which could not be considered as either an end item or a part of the end service to be delivered.

AG 400.12 (14 Feb 49)GD, 14 Feb 49

Subj: Procurement Policy in Relation to the Stabilization of the Japanese Economy

under the service contract, have been accomplished by contractors at the expense of the Japanese Government thus circumventing prescribed controls.

b. Based upon the above review, it is deemed essential that immediate action be taken to correct wasteful or improper service procurement practices. Service contracts which, as a result of review, are considered essential to meet Occupation Force requirements as well as all future service contracts must, wherever possible, provide only for the furnishing by the Japanese Government require approval by General Headquarters.

6. Occupation Forces requests for Construction.

a. General.

- (1) New construction will be limited to only the most essential operational requirements of the occupation forces which cannot be met by any expedient other than new construction.
- (2) Maintenance will be provided for those facilities occupied by the Occupation Forces and standby maintenance for those facilities not occupied but required for a definite future occupancy.
- (3) Minor construction will consist of alterations, extensions and additions to existing facilities, and will be limited to \$500 per work order per facility. Only one work order may be executed for any one alteration, extension or addition. Funds to accomplish this minor construction will be included in Repairs and Utilities allocations.

b. Dependent Housing. The number of dependent housing units in Japan is now firm and no additional construction will be authorized at the expense of the Japanese Government.

c. Troop Housing. It is expected that troop strengths will approach and may reach authorized TO&E strength. There is no objection to troops being relocated for tactical purposes, where housing is available at the new location, but there will be no new construction authorized for that purpose. Troop housing spaces are available at present to house the maximum expected troop strength.

d. General Construction.

- (1) Operational and administrative facilities will

AG 400.12 (14 Feb 49)GD, 14 Feb 49

Subj: Procurement Policy in Relation to the Stabilization of the Japanese Economy

be limited as indicated in paragraphs 6 a (1) and (2) above.

(2) Logistic facilities, except as indicated below, will be limited as indicated in paragraphs 6 a (1) and (2) above.

(a) Ammunition storage. It is assumed that existing ammunition storage in general is adequate. Additional ammunition storage will be constructed only to provide for readjustment of stocks to conform to modified safety standards declared essential by the Ordnance Officer. Any construction for this purpose will be of most economical type possible within safety standards.

(d) Ordnance "BIG 5" and Engineer "BIG 9" Programs. Construction requirements for the Ordnance "BIG 5" and Engineer "BIG 9" programs, if and when authorized, will be obtained by procurement demand, and the cost will be amortized by increasing the unit dollar cost of rebuilt assemblies to be exported.

(c) Provision of covered storage will be limited to procurement of serviceable warehouses that may be obtained through procurement of warehouses not in use by the Japanese, or procurement of Special Procurement Board warehouses which become available through the release of excess supplies now stored in such warehouses.

e. Airborne Training Facilities. No additional training facilities for an airborne division will be provided during Japanese Fiscal Year 1949 at the Eighth Army airborne training center.

f. Destruction of Airfields. The destruction of airfields is not an appropriate charge against that part of the Japanese budget appropriated for the direct support of the Occupation Force. Their destruction is analogous to the disposal of war combat items (ammunition, demilitarized combat equipment, and scrap) surrendered by the Japanese. Specific instructions on this subject will issue from General Headquarters.

g. Athletic and Recreational Facilities. Construction of athletic and recreational facilities will be limited to only that construction which can be accomplished by troop and/or currently

AG 400.12 (14 Feb 49)GD, 14 Feb 49

Subj: Procurement Policy in Relation to the Stabilization of the Japanese Economy.

employed indigenous labor. This policy does not provide for the construction of buildings, playing fields or courts requiring concrete surfaces, swimming pools or for other sizeable projects. It is intended that it shall provide principally for the improvement of ground areas to make them suitable for athletic purposes and minor improvements to other existing recreational and athletic facilities.

7. Transportation.

a. **Rail transportation.** More effective controls must be exercised over use of indigenous transportation by the Occupation Forces. Instances have been reported involving shipments of privately owned property other than checkable baggage and shipments of privately owned or officially assigned automobiles for use by individuals on leave status. The use of indigenous rail transportation facilities at the expense of the Japanese Government will be limited to the official travel of Occupation Force personnel and movement of Occupation Force cargo for official purposes. The cost of all non-official travel by Occupation Force personnel will be paid by the individual except for travel on those inter-urban lines where collection of fares has not yet been instituted. All non-official cargo shipped on Japanese facilities will be at established rates and payment therefor will be made in yen by the shipper.

b. **Motor Vehicle Transportation.** Motor trucks and cargo carrying motor vehicles will not be obtained from the Japanese economy either by direct procurement or by means of service contract. Occupation Forces cargo transportation requirements will be provided through the use of equipment assigned to tactical and service units and to established motor vehicle pools.

c. **Water Transportation.** Operation of excessive water transportation in the form of small boats and craft, largely employed for pleasure purposes, must be discontinued. Where such craft are authorized and maintained for pleasure purposes, the full cost of their maintenance and operation must be met by reimbursement.

8. Operation and Maintenance of Athletic and Recreational Facilities Including Service Clubs of All Types.

a. The normal operation and maintenance of physical facilities, i.e., plant, grounds and buildings, for athletic and recreational purposes, may be procured at the expense of the Japanese Government for the use of Occupation Forces personnel in general, as opposed to private or personal use by individuals or small groups. Such facilities include golf courses, swimming pools, tennis courts, stadiums, field houses, theaters and clubs. Only the minimum number of indigenous personnel necessary for such operation and maintenance will be employed.

AG 400.12 (14 Feb 49)GD, 14 Feb 49

Subj: Procurement Policy in Relation to the Stabilization of the Japanese Economy

b. Any additional operation and maintenance costs including the cost of indigenous personnel desired or required for conducting special instructions, life guarding, officiating, entertainment, personal services such as caddy masters, caddies, play equipment maintenance men, personnel not fully engaged in the care of grounds and buildings and/or personnel employed in connection with special events, will be procured only on a reimbursable basis.

c. Special equipment such as riding horses, bicycles, boats, fishing tackle or playing equipment required in connection with athletic and recreational facilities may be procured only on a reimbursable basis.

d. To effect the maximum economy in operation and maintenance of athletic and recreational facilities commanders addressed will survey all such facilities under their control with a view to a consolidation of activities and the elimination of those in which the percentage of utilization does not justify the cost of operation and maintenance.

9. Real Estate. Assuming that the Occupation Forces now have adequate facilities to meet essential requirements, procurement of real estate of any description, additional to that now held, will be effected only upon prior approval of this headquarters.

AG 400.12 (14 Feb 49)GD

14 February 1949

SUBJECT: Procurement Policy in Relation to the Stabilization of
the Japanese Economy

TO : Commanding General, Eighth Army, APO 343
Commander, United States Naval Forces, Far East,
Navy No. 1165
Commanding General, Far East Air Forces, APO 925
Commanding General, Headquarters and Service Group,
General Headquarters, Far East Command, APO 500

1. General. The current policy of this Headquarters to keep at a minimum the financial impact of the Occupation Forces on the Japanese economy requires constant examination of the procedures of procurement of labor and materials on a non-reimbursable basis with a view to elimination of wasteful or unjustifiable methods. A recent review of the situation indicated certain revisions toward reduction of items of procurement and the institution of stricter controls. Addressee commanders will take the necessary steps to enforce compliance with the instructions contained herein.

2. Principles for Procurement. The procurement of construction, supplies, labor, and/or services from the Japanese economy for use of the Occupation Forces will be governed by the following general principles:

a. The directives to the Japanese Government will include only those requirements for the Occupation Forces which would normally be furnished Zone of Interior forces through proper expenditure of United States appropriated funds. Except as specifically authorized by the Supreme Commander for the Allied Powers, requirements furnished by the Japanese Government in excess of the foregoing will be on a reimbursable basis.

b. No procurement will be initiated solely for the purpose of raising above existing standards Occupation Force services or facilities.

c. Procurement will be initiated for essential requirements only, and then only when such requirements cannot be fulfilled from assets or means already available.

3. Supplies, Equipment and Materials.

a. Supplies, materials and equipment will be procured from the Japanese economy only when they cannot be obtained by requisition from the Zone of Interior and when substitutes are not available within the commands through which the requisition is processed.

Incl 12

AG 400.12 (14 Feb 49)GD, 14 Feb 49

Subj: Procurement Policy in Relation to the Stabilization of the Japanese Economy

b. The accumulation of stocks of supplies, equipment and materials by the Occupation Forces in excess of requirements is not permissible. The extent of current excesses will be determined by examination of all echelons of supply. Unconditional release to the Japanese Government of all supplies, equipment and materials found excess to the coordinated authorized requirements of the Occupation Forces will be accomplished with the least practicable delay.

c. The use of letter directives to permit accumulation of supplies, equipment and materials by the Japanese Government was authorized to permit the Japanese Government sufficient time to procure materials required to meet approved occupation construction programs and maintenance schedules. It has become increasingly evident that the Japanese Government has been required by letter directives to stockpile materials far in excess of imminent Occupation Force requirements. Any materials acquired by the Japanese Government in compliance with letter directives and not required for accomplishment of approved programs, and which are in excess of the coordinated known requirements of the Occupation Forces, will be released for utilization in the Japanese economy. Specific directives covering these releases will issue from General Headquarters.

4. Employment of Japanese Labor.

a. A substantial portion of the cost of occupation accrues through employment of Japanese labor. Accordingly, the elimination of existing abuses in the employment of such labor is essential to the overall economy program. The employment of excessive numbers of Japanese by the Occupation Forces, and excessive overtime payments to these employees are the two major abuses which must be eliminated. Manning tables and manning levels for all types and categories of labor will be critically re-examined with a view to effecting substantial reductions. Review of the Japanese labor situation will be undertaken to effect a maximum reduction in numbers and the limiting or elimination entirely of overtime payments except for domestic servants.

b. The employment of indigenous labor to perform military tasks for which troops should be trained is not favorably considered in principle. The procurement of indigenous labor to perform such tasks will be held to that irreducible minimum beyond which essential operational functions of the occupation forces would cease.

c. Indigenous labor reported as employed by tactical troops in October 1948 totalled 26,748. Reports included 4,528 guards, 1,555 drivers, 988 clerks and 54 telephone switchboard operators, which, if employed for interior guard or other functions of authorized and assigned personnel of combat units, should be

AG 400.12 (14 Feb 49)GD, 14 Feb 49
Subj: Procurement Policy in Relation to the Stabilization of the
Japanese Economy

replaced by unit personnel. Reports also included 145 building managers, 132 office managers and 432 foremen, which, if employed by combat or service units below depot level for supervision of tactical unit functions, should likewise be replaced by unit personnel. Addressee commanders will submit requests for exception to the foregoing with full justification, if the situation warrants.

d. Indigenous labor will not be employed to perform functions of personnel of combat organizations, except to the extent that the employment of civilian personnel by such organizations is authorized by regulations.

e. When indigenous labor is procured to perform organizational tasks of service units below depot level, it will not be procured by means of service contracts but will be directly procured and employed under military supervision so as to assure that military supervisory personnel receive functional training and that direct control is exercised over military functions.

5. Services furnished Occupation Forces by the Japanese Government by Service Contracts.

a. Service contracts now under review by General Headquarters indicate the following:

- (1) Service contracts are being utilized for the procurement of labor for the operation of facilities. Contracts of this type serve to circumvent and defeat the purpose of labor ceilings, and in many instances violate Japanese Public Law 141 which prohibits the exploitation of labor by labor bosses.
- (2) Excessive numbers of employees are utilized by service contractors considering the type and amount of services rendered.
- (3) Operational equipment which is appropriately a part of or an adjunct to Occupation Forces installations is being furnished by service contractors at excessive rental rates.
- (4) Many service contracts are in effect for the provision of services no longer required by the Occupation Forces, for example, a large number of architect engineer firms.
- (5) In the past, construction and other operations which could not be considered as either an end item or a part of the end service to be delivered

AG 400.12 (14 Feb 49)GD, 14 Feb 49

Subj: Procurement Policy in Relation to the Stabilization of the Japanese Economy

under the service contract, have been accomplished by contractors at the expense of the Japanese Government thus circumventing prescribed controls.

b. Based upon the above review, it is deemed essential that immediate action be taken to correct wasteful or improper service procurement practices. Service contracts which, as a result of review, are considered essential to meet Occupation Force requirements as well as all future service contracts must, wherever possible, provide only for the furnishing by the Japanese Government of an "end item" or an "end service." All service contracts will require approval by General Headquarters.

6. Occupation Forces requests for Construction.

a. General.

- (1) New construction will be limited to only the most essential operational requirements of the occupation forces which cannot be met by any expedient other than new construction.
- (2) Maintenance will be provided for those facilities occupied by the Occupation Forces and standby maintenance for those facilities not occupied but required for a definite future occupancy.
- (3) Minor construction will consist of alterations, extensions and additions to existing facilities, and will be limited to \$500 per work order per facility. Only one work order may be executed for any one alteration, extension or addition. Funds to accomplish this minor construction will be included in Repairs and Utilities allocations.

b. Dependent Housing. The number of dependent housing units in Japan is now firm and no additional construction will be authorized at the expense of the Japanese Government.

c. Troop Housing. It is expected that troop strengths will approach and may reach authorized TO&E strength. There is no objection to troops being relocated for tactical purposes, where housing is available at the new location, but there will be no new construction authorized for that purpose. Troop housing spaces are available at present to house the maximum expected troop strength.

d. General Construction.

- (1) Operational and administrative facilities will

AG 400.12 (14 Feb 49)GD, 14 Feb 49

Subj: Procurement Policy in Relation to the Stabilization of the Japanese Economy

be limited as indicated in paragraphs 6 a (1) and (2) above.

(2) Logistic facilities, except as indicated below, will be limited as indicated in paragraphs 6 a (1) and (2) above.

(a) Ammunition storage. It is assumed that existing ammunition storage in general is adequate. Additional ammunition storage will be constructed only to provide for readjustment of stocks to conform to modified safety standards declared essential by the Ordnance Officer. Any construction for this purpose will be of most economical type possible within safety standards.

(b) Ordnance "BIG 5" and Engineer "BIG 9" Programs. Construction requirements for the Ordnance "BIG 5" and Engineer "BIG 9" programs, if and when authorized, will be obtained by procurement demand, and the cost will be amortized by increasing the unit dollar cost of rebuilt assemblies to be exported.

(c) Provision of covered storage will be limited to procurement of serviceable warehouses that may be obtained through procurement of warehouses not in use by the Japanese, or procurement of Special Procurement Board warehouses which become available through the release of excess supplies now stored in such warehouses.

e. Airborne Training Facilities. No additional training facilities for an airborne division will be provided during Japanese Fiscal Year 1949 at the Eighth Army airborne training center.

f. Destruction of Airfields. The destruction of airfields is not an appropriate charge against that part of the Japanese budget appropriated for the direct support of the Occupation Force. Their destruction is analogous to the disposal of war combat items (ammunition, demilitarized combat equipment, and scrap) surrendered by the Japanese. Specific instructions on this subject will issue from General Headquarters.

g. Athletic and Recreational Facilities. Construction of athletic and recreational facilities will be limited to only that construction which can be accomplished by troop and/or currently

AG 400.12 (14 Feb 49)GD, 14 Feb 49

Subj: Procurement Policy in Relation to the Stabilization of the Japanese Economy

be limited as indicated in paragraphs 6 a (1) and (2) above.

(2) Logistic facilities, except as indicated below, will be limited as indicated in paragraphs 6 a (1) and (2) above.

(a) Ammunition storage. It is assumed that existing ammunition storage in general is adequate. Additional ammunition storage will be constructed only to provide for readjustment of stocks to conform to modified safety standards declared essential by the Ordnance Officer. Any construction for this purpose will be of most economical type possible within safety standards.

(b) Ordnance "BIG 5" and Engineer "BIG 9" Programs. Construction requirements for the Ordnance "BIG 5" and Engineer "BIG 9" programs, if and when authorized, will be obtained by procurement demand, and the cost will be amortized by increasing the unit dollar cost of rebuilt assemblies to be exported.

(c) Provision of covered storage will be limited to procurement of serviceable warehouses that may be obtained through procurement of warehouses not in use by the Japanese, or procurement of Special Procurement Board warehouses which become available through the release of excess supplies now stored in such warehouses.

e. Airborne Training Facilities. No additional training facilities for an airborne division will be provided during Japanese Fiscal Year 1949 at the Eighth Army airborne training center.

f. Destruction of Airfields. The destruction of airfields is not an appropriate charge against that part of the Japanese budget appropriated for the direct support of the Occupation Force. Their destruction is analogous to the disposal of war combat items (ammunition, demilitarized combat equipment, and scrap) surrendered by the Japanese. Specific instructions on this subject will issue from General Headquarters.

g. Athletic and Recreational Facilities. Construction of athletic and recreational facilities will be limited to only that construction which can be accomplished by troop and/or currently

AG 400.12 (14 Feb 49)GD, 14 Feb 49

Subj: Procurement Policy in Relation to the Stabilization of the Japanese Economy.

employed indigenous labor. This policy does not provide for the construction of buildings, playing fields or courts requiring concrete surfaces, swimming pools or for other sizeable projects. It is intended that it shall provide principally for the improvement of ground areas to make them suitable for athletic purposes and minor improvements to other existing recreational and athletic facilities.

7. Transportation.

a. Rail transportation. More effective controls must be exercised over use of indigenous transportation by the Occupation Forces. Instances have been reported involving shipments of privately owned property other than checkable baggage and shipments of privately owned or officially assigned automobiles for use by individuals on leave status. The use of indigenous rail transportation facilities at the expense of the Japanese Government will be limited to the official travel of Occupation Force personnel and movement of Occupation Force cargo for official purposes. The cost of all non-official travel by Occupation Force personnel will be paid by the individual except for travel on those inter-urban lines where collection of fares has not yet been instituted. All non-official cargo shipped on Japanese facilities will be at established rates and payment therefor will be made in yen by the shipper.

b. Motor Vehicle Transportation. Motor trucks and cargo carrying motor vehicles will not be obtained from the Japanese economy either by direct procurement or by means of service contract. Occupation Forces cargo transportation requirements will be provided through the use of equipment assigned to tactical and service units and to established motor vehicle pools.

c. Water Transportation. Operation of excessive water transportation in the form of small boats and craft, largely employed for pleasure purposes, must be discontinued. Where such craft are authorized and maintained for pleasure purposes, the full cost of their maintenance and operation must be met by reimbursement.

8. Operation and Maintenance of Athletic and Recreational Facilities including Service Clubs of All Types.

a. The normal operation and maintenance of physical facilities, i.e., plant, grounds and buildings, for athletic and recreational purposes, may be procured at the expense of the Japanese Government for the use of Occupation Forces personnel in general, as opposed to private or personal use by individuals or small groups. Such facilities include golf courses, swimming pools, tennis courts, stadiums, field houses, theaters and clubs. Only the minimum number of indigenous personnel necessary for such operation and maintenance will be employed.

AG 400.12 (14 Feb 49)GD, 14 Feb 49

Subj: Procurement Policy in Relation to the Stabilization of the Japanese Economy

b. Any additional operation and maintenance costs including the cost of indigenous personnel desired or required for conducting special instructions, life guarding, officiating, entertainment, personal services such as caddy masters, caddies, play equipment maintenance men, personnel not fully engaged in the care of grounds and buildings and/or personnel employed in connection with special events, will be procured only on a reimbursable basis.

c. Special equipment such as riding horses, bicycles, boats, fishing tackle or playing equipment required in connection with athletic and recreational facilities may be procured only on a reimbursable basis.

d. To effect the maximum economy in operation and maintenance of athletic and recreational facilities commanders addressed will survey all such facilities under their control with a view to a consolidation of activities and the elimination of those in which the percentage of utilization does not justify the cost of operation and maintenance.

9. Real Estate. Assuming that the Occupation Forces now have adequate facilities to meet essential requirements, procurement of real estate of any description, additional to that now held, will be effected only upon prior approval of this headquarters.
