27. Remarks: It is believed that this operations will close the cleared channel at Shimonoseki Straits for a period of from one to two weeks as well as to inflict ship losses for a period of several weeks to come. The mines spread over the many square miles of Japanese shipping lanes in Suo Nada although far from affecting blockade will present a tremendous clearing problem to the Japanese and thus interfere with shipping in the western end of the inland sea for weeks to come. The portions of the minefield necessary to effectively blockade Kobe and Osaka that was most hazardous to lay, has been put down. The portion of the field already established was so designed that it will form a blockade of Kobe and Osaka for a few days and also harrass shipping in Izumi Nada for weeks to come.

It is significant to note that this is the first time that our forces have used a mine against the enemy that our own forces are unable to sweep.

This report is subject to correction.
