#### NOTICE.

The PARIS Agent for the Sale of the ECONOMIST is MR FOTHERINGHAM, 8 Rue Neuve des . Capucines, where copies of the Paper can always be obtained.

This day is Published No. 5, Vol. XI., New Series, Price 8d; by post, 9d.

# THE INVESTOR'S MONTHLY MANUAL

The INVESTOR'S MONTHLY MANUAL for MAY gives the Highest, Lowest, and Latest Prices of Stocks, Shares, and other Securities during the Month, the YIELD to the investor at the latest price, the mode in which the Dividend in each case is payable, the last four Dividends, &c.

### A FINANCIAL RECORD OF THE MONTH;

New Capital Created and Called in 1881; Table of Railway Traffic Receipts; Notices and Reports of Stocks, Failures, Railway, Banking, Insurance, and Miscellaneous Companies, Prices made up to May 25.

Advertisements for the next DOUBLE NUMBER, to be published on June 25, must be sent, to insure insertion, on or before June 23.

before June 23.
The June Number of the INVESTOR'S MONTHLY MANUAL will give, in addition to the usual information, the Highest and Lowest Prices of all Stocks and Shares for 1879 and 1880, as well as for the first six months of 1881, the Latest Quotations for 1880 (so as to indicate the Exact Movement during the Six Months), a Tabulated Chronicle of Events, a Complete Directory, the Names of the Markets where each security is chiefly dealt in, besides Memoranda relating to the Financial Position of Foreign and Colonial Governments, to Railways, &c., &c. In addition there will be furnished the Names of the Chairmen and Secretaries, or Managers, of the various Companies. This number will be cut, stitched, and enclosed in a wrapper. Price 1s 4d; by post, 1s 6d.

by post, 1s 6d.

#### THE MONEY MARKET.

THE demand for business accommodation, as shown by the charge at which the best commercial paper is discounted, is much on the same scale now as it was a week since. If anything, it is practically higher,  $1\frac{1}{8}$  being the rate, as compared with  $1\frac{3}{4}$  at that date. The chief demand for money was, however, yesterday diverted from Lombard street to the Stock Exchange, where for the moment money was in exceptional demand; as much as 41 per cent. and even higher rates being paid for the use of money till the next account. The demand appears to have arisen as much, if not more, from the great foreign financial institutions as from more completely English speculation. To some extent what was wanted appears to have been supplied by advances made by English provincial banks, a comparatively new feature in the business, and one not to be altogether welcomed except under the strictest precautions. That such should be the case shows very thoroughly the existing stagnation of trade. Business as now conducted is working more into a system of cash payments, the funds for which, when not possessed by the trader, are provided rather by loans than in other ways. Trade conducted thus originates fewer bills than it used to do. Bills, however, are essential to many persons, and especially to the brokers, to enable them to carry on their own business on a proper footing. A security which turns itself into money at a fixed date obtains in consequence a value beyond what would otherwise be the case, through the sharp competition for an article, the supply of which is below the effective demand.

The Bank rate continues at  $2\frac{1}{2}$  per cent., the market rate for bills being  $\frac{5}{8}$  below it; and there does not appear any immediate probability of the market rate working rapidly up to the Bank rate. The reserve has mounted up to 15,300,000l. The increase in the bullion of 110,000l is partly due to an importation of 23,000l, partly to a reflux of about 80,000l from the circulation of coin. The note circulation has likewise receded about 360,000l. This movement is, however, periodic, and what has been accumulated in this manner will probably be taken away again shortly. The gold which the Scotch banks required a few weeks since is not yet returned, and nearly 950,000l is stated to be on the way to London. These circumstances, of themselves, would appear to indicate further ease in the money market. The week's movements in the principal foreign exchanges have, however, been all unfavourable, though slightly so, to this country:—

PRINCIPAL FOREIGN EXCHANGES.

Movement.

Paris,  $\frac{1}{2}$  per mille against us  $-\frac{1}{2} {}^{0}/_{00} \dots$ Berlin, 2 per mille for us  $-2 {}^{0}/_{00} \dots$ New York,  $1\frac{1}{2}$  per mille against us.

The American exchange is believed to be kept from being more unfavourable by reason of the amounts taken by emigrants with them, whether by letters of credit on New York or otherwise. These are equivalent to exports of money from this country. The support given thus to the exchange must, however, be transient. What is most important is the fact that our market is at the moment important is the fact that our market is at the moment the one in Europe where the charge for the use of money is the lowest, and we must expect in consequence some of the demand for accommodation from other markets to be transferred here as long as it remains thus. Present business arrangements give facilities for doing this which did

not exist so fully at a comparatively recent date, and the demand thus caused may be sufficient to prevent the rate here from any further downward movement.

THE PROSPECT IN IRELAND.

THERE is not much hope of the restoration of order in Ireland to be derived from Mr Forster's speech of Tuesday. It is evident from it that whatever the ultimate effect of the Land Bill may be, the agricultural classes are not waiting for it in passive expectation, but are, on the contrary, waging war on their landlords as bitterly as ever.
The Irish Secretary himself allows that the position, though not so bad as is represented, is "very bad." The number of agrarian outrages rose in April to 296, or 10 a day, and this, of course, includes only the cases officially known and reported. The people are resisting evictions by force, as is not unnatural when they hear them condemned not only by their own leaders but by the Government, are coercing men who can pay into refusing payment, are coercing men who can pay into relating payment, and are, in fact, trying to lower rents by force, or, as Mr Forster says, are "in a combination to make robbery "successful by armed resistance." It is impossible, over a large part of Ireland, to collect arrears without military aid, and in some districts the payment of rent, except as a free will offering, has virtually stopped. The police are quite powerless to control the people, and indeed are suspected at the Castle of wilful slackness. It is impossible to read the secret circular to inspectors, which was at once betrayed to the Land League, without perceiving this feeling, which again is shown to be just on all procurable evidence. The police are not disloyal, but they are not disposed to make the country side too hot for them by doing their duty in the spirit of martyrs, more especially while their instructions are to avoid armed collision with the people so far as possible. The Coercion Bill breaks down upon this point, and indeed our original fear as to the working of that Bill has proved correct. It was necessary to pass it, but its opera-tion is so inconsistent with every institution of the country that it will not work. Mr Forster originally declared that he intended to arrest under it only "disso-"lute village ruffians," but he has been compelled to extend its scope until he has seized a member of Parliament, a Catholic priest, and the Secretary of the Land League, and still no terror follows. He is blamed for this, but the result is, in truth, inevitable from his position. Coercion Act enables the Secretary for Ireland to lock up certain presumably dangerous individuals, and so far to vindicate the law, but it does not enable him to strike general terror. The Irish, though impulsive and, therefore, liable to sudden excesses of panic as well as of heroism, are a brave people, and a people singularly fond of notoriety. The Government are compelled to make the imprisonment of "suspects" light, to discuss almost every case in Parliament, to allow any amount of newspaper comment, and to promise almost once a week that when the country is quiet the prisoners shall be set free. The Irish, therefore, are not terrified by arrests which expose them to little inconvenience, which make them widely known and popular, and which are certain not to continue longer than will entitle them to be returned as martyr candidates to Parliament. The dread of the arrests is slight even with the leaders, while with the body of the tenantry, who are fighting, as they think, for serious advantages, it is nothing at all—a risk which they hardly take into consideration. They know quite well it is impossible to arrest them in any numbers, and the few of them arrested suffer almost willingly for the remainder. While, therefore, we hold that Mr Forster and his col-

While, therefore, we hold that Mr Forster and his colleagues are but doing their simple duty in their effort to check disorder, whether through the Coercion Act or other and more regular legal process, we do not profess to feel much hope that their efforts will be successful. There seems to be no reason why efforts which do not succeed in May should succeed in June. More persons will be locked up, but they will not be so many as to make a sensible difference in districts where two-thirds of the whole population are engaged in resistance to the law, while of general terror operating upon those who are not arrested there is no visible sign. The resistance crushed in one village begins again in the next. We look rather

to see the agitation increase and deepen, and outrages become more numerous and dangerous, until one of two things happen. Either the people who defy the law, growing bolder from the sense that Government has done its worst, and from the influence of popular sympathy, will break at some point into open insurrection, shooting at the police, for example, and so obliging the police to open fire, or the landlords and their employés, believing the case to be momentarily hopeless, will cease from the effort to collect arrears, and informally agree that until the Land Bill passes rent shall be a free will offering. The former result, as Mr Forster evidently apprehends, would in most years have been the probable one, but in this year desperate efforts will be made to prevent it, by men whose ascendancy has been strengthened by the turmoil and by its results in weakening the law. They are aware that when once blood is shed their supporters may either be cowed or may be drawn into armed conflicts, in which they will be defeated, and the impact of which cannot but be felt, a defeat in the field invariably in all countries producing a sense of hopelessness, which induces submission. They will counsel passive resistance, and resistance to individuals only, and insurrection, therefore, may be staved off, and if it is, we look to the second result, exhaustion, as nearly certain. The police will not grow more hearty in the cause, the process servers, bailiffs, and agents will be wearied out, and the landlords will be ready for any compromise which will release them from an intolerable situation. The Government will then be face to face with a new problem, how to restore the respect for law when those interested in enforcing it have given up the attempt, and when, as happened in the Tithe War, those who resist it appear to themselves to have won the game. They can only restore it by making it more formidable, and in Ireland this can only be done by making its action certain, that is by entrusting extensive jurisdiction to paid magistrates or judges certain to give sentence according to the evidence, without fear or favour. It is to this, we agree with Lord Lansdowne, that the Government will be driven at last, even if the necessary legislation can be obtained only by revolutionary measures. Even a popular Land Bill cannot, under the circumstances, restore of itself the weakened respect for law, although by increasing largely the number of those interested in maintaining law it will render all measures for strengthening it much easier and more This is not a sanguine view of the situation; but the Coercion Act not having produced its expected effect, and the ordinary law being rendered powerless by the refusal of juries to agree, it is to some such policy that the Government, whether Liberal or Conservative, will inevitably be driven. It is an unhappy result of a great effort to govern Ireland in accordance with its own wishes; but it is, we fear, an unavoidable one, if Irishmen are not to believe that law is powerless to enforce payment of any unpopular kind of debt.

MR. GOSCHEN'S MISSION.

THE return of Mr. Goschen to England marks the termination of an arduous and on the whole a successful mission. It is not, perhaps, altogether to be wondered at that his labours should so far have been rewarded with but a scanty measure of public recognition. The Eastern Question no longer stands in the foreground of contemporary politics. With the possible exception of Austria, all the great European countries are engaged for the moment in controversies which are to each of them individually of far greater urgency and interest than the rectification of the Greek frontier or the future of Asia Minor. The Tunisian incident, which absorbs public attention in France and Italy, although the direct outcome of the bargaining which went on at Berlin in 1878, has only a remote bearing on the position of Turkey in the East. Germany is occupied with the struggle between the Reichstag and the Chancellor, Russia with the domestic policy of the new Czar, England with the latest phase of the ever-recurring Irish problem. Under these circumstances, nothing short of a coup de théâtre would have sufficed to concentrate the eyes of Europe upon the final issue of the protracted and wearisome duel between the ambassadors and the Porte, while the conditions under which Mr Goschen's work has been

done altogether excluded the possibility of a dramatic surprise. Moreover, the results actually achieved, although, as we shall proceed to show, of solid value, are not such as to excite the enthusiasm of partisans on either side. It is only natural that the so-called friends of Turkey should view with disfavour all efforts to compel the Sultan to fulfil the promises upon the faith of which his empire was restored to him in 1878, but which a year ago seemed likely to remain a dead letter. Those, on the other hand, who hoped for a prompt and full execution of the enfranchising clauses of the Treaty of Berlin, are as naturally disappointed at the meagre satisfaction which has been given to the claims of Greece, and at the slow progress which has been made in the restoration of liberty and good government to Armenia. If we add that, at the time when Mr Goschen started for the East, somewhat over-sanguine expectations were entertained of the ease with which the concert of Europe could be applied and the rapidity with which it would work, there is the less reason for astonishment at the comparative languor with which the results of his mission have been greeted.

The ability with which Mr Goschen has performed his task cannot be justly estimated unless we realise the peculiar difficulties which he had to encounter and overcome. The action of the British embassy at Constantinople had been for the best part of a generation governed by two principles which had been accepted and followed by successive Ambassadors as the charter of their policy. Those principles were, first, that the integrity and in-dependence of the Ottoman Empire must at all hazards be maintained; and, second, that Great Britain must exercise a paramount, and, if possible, an exclusive influence in the councils of the Porte. The mission of Mr Goschen was intended to indicate the final abandonment of these time-honoured doctrines. The object which he was sent to accomplish, and the means by which it was to be accomplished, were alike at variance with the traditions of his post. Instead of upholding the integrity of the Sultan's dominion, he was to obtain the curtailment of its area in two different directions. Instead of asserting the superior rights of England, he was to organise and maintain the collective influence of the Ambassadors, and never to step beyond the line of their concerted action. He had thus, as it were, to create an entirely new part. The vis inertiæ of the Porte had almost always in the long run baffled the efforts of the most energetic of his predecessors, but they could at any rate represent their remonstrances as proceeding from the official friend and adviser of Turkey. Mr Goschen was from the first without this leverage. The Sultan and the Pachas were convinced that a man of his political eminence had not been sent out merely to secure the due performance of the Berlin treaty. It was a long time before they got rid of the idea that he was charged with the execution of some dark and far-reaching scheme for the total subversion of the Ottoman power. Hence, he had not merely to contend with the obstructiveness, but at the same time to allay the fears and disarm the suspicions of the Porte. The difficulty of rapid and and striking action was further increased by the machinery to which his instructions confined him, and which it is his great merit to have exclusively employed. The Euro-pean Concert, though an effective, is a cumbrous instrument, slow in its processes, and easily thrown out of gear. Without the impulsive power which Mr Goschen supplied, it is doubtful whether any positive progress would have been made. Even as it was, an immense amount of energy was lost in mere friction. The repudiation by France at the eleventh hour of the position towards the Greek question which she had held ever since the Berlin Congress of 1878, illustrates the kind of danger to which the collective action of the Ambassadors was perpetually exposed. It would be going too far to say that Mr Goschen alone among them had the success of their common work at heart. But those who complain that there is little to show as the fruit of a year's diplomacy should ask themselves what would have been the result if a man of less sincerity and resoluteness had been in Mr Goschen's place.

The best tribute to the skill with which Mr Goschen has surmounted these varied obstacles is to be derived from a simple comparison between the state of things which he found and that which he has left. When he

arrived at Constantinople last May the claims of Montenegro and Greece to an extension of territory had not advanced a step towards satisfaction. For the greater part of two years fitful negotiations had been going on between the Sultan and the other signatories of the Treaty of Berlin. Project after project had been put forward, discussed, amended, and finally thrown aside. All the resources of European diplomacy had apparently been tried in vain, and the Sultan remained master of the situation. tion. The deadlock which had been reached is described by an unimpeachable witness in the memorable despatch with which Sir Henry Layard closed his career as Ambassador at Constantinople. Barely a year has elapsed since the commencement of Mr Goschen's mission, and not merely has Montenegro been placed in possession of her enlarged frontier, but it rests only with the Greeks themselves to say when and how they shall occupy Thessaly. Peace meanwhile has been preserved, and though it would be hazardous to predict that its maintenance is assured, this week's news encourages the hope that no resistance will be offered to the entry of Greek troops into their new province. But these specific gains, substantial as they are, are perhaps of less lasting value than the new method of dealing with the Porte which has been throughout adopted, and of which they are the first fruits. For the game of intrigue and rivalry by which European diplomacy has hitherto sought to gain its ends at Constantinople, there has been substituted during the past year an international council in permanent session, to whose collective judgment every question has been submitted as it arose. It would, of course, be puerile to suppose that we have heard the last of the separate interests of the several Powers in the Eastern Question, and that they will not find occasions for isolated or conflicting action. But it is something to have established and maintained, even with reference to the settlement of a single group of controversies, a system of concerted supervision which will serve as a precedent for the future. To the achievement of this result Mr Goschen has contributed more than any other man. His mission will, we may hope, be remembered hereafter, as the sign of a new departure not only for English, but for European diplomacy in the East.

THE RISE IN STOCK EXCHANGE SECURITIES. For nearly two years now there has been a progressive rise in the prices of Stock Exchange securities. The improvement has not, of course, been steady and continuous. Quotations have kept constantly fluctuating, alternately advancing and receding. All the while, however, the tide has been rising, each forward wave carrying prices higher than before, and thus ground has gradually been gained. That the advance has been very great will be seen from the subjoined table, which compares in the case of a few representative Government and railway securities the latest prices reported in our Investors' Manual for this month with those quoted in May, 1879. And if space had permitted us to extend the list, it would have shown that the rise has been general as well as very marked. All classes of stocks—the least as well as the most speculative, those which pay no dividend as well as those upon which the return is fixed and secure—have participated in it; and in very many instances the enhancement of market value seems to be altogether independent of any consideration of intrinsic worth.

Into all the causes of this great uplifting of prices, it is impossible here to enter, each of the various stocks having, of course, been affected by circumstances peculiar to itself. Attention, however, may be directed to two influences which have predominated over all others, and, operating in all departments, have been the main factors in producing the almost universal rise that is witnessed. These are the extreme cheapness of money and the prolonged depression of trade. The low rates at which advances on stocks have been obtained have greatly stimulated speculation. Large masses of securities have been taken up and are held with borrowed money, with the twofold intention of realising a present income by the excess of the dividends received, over the interest paid, and of further securing an ultimate profit by the sale of the stocks at higher prices than were originally paid for them. Then, as regards investment stocks, the buying of them has undoubtedly been greatly stimulated by the extreme lowness of the

rates allowed on bank deposits. People have not been content to receive only 1 or  $1\frac{1}{2}$  per cent. for their money, and have sought to increase its yield by taking it out of the hands of their bankers and placing it in securities. Similarly the dulness of trade has diverted to the Stock Exchange capital which in more prosperous times would have been applied to the extension of business. When trade is active, it is in the enlargement of mills and factories, the providing of new machinery and other appliances for augmenting and improving production, and in the development of the channels of distribution that the ever-growing capital of the country finds its most acceptable employment. Of late years, however, there has been little outlet for money in these directions, and the pent up supplies have overflowed into the stock and share markets. And the scarcity of trade bills—a scarcity which it may be said in passing is probably due, not so much to a contraction of business as to the fact that transactions are now being carried on to a much larger extent than formerly on a cash basis—has led banks not only to increase their own investments, but also to employ a larger proportion of their funds in advances on securities. Thus, in a variety of ways, the volume of capital directed upon the Stock Exchange has been greatly augmented, and that at a time when, owing to the distrust caused by the default of foreign Governments and the bursting of many of the bubble companies blown during the speculative mania which culminated in 1874, the creation of new securities has until recently been exceptionally small; and the natural consequence has been the rapid advance in the prices of existing stocks to which our table

From what has been said it will be gathered that the basis upon which the present high prices rest is decidedly precarious. Probably one of the first effects of a decided improve-ment in trade would be the sale of a large amount of securities by those who are now holding them merely as a temporary investment with the intention of realising as soon as employment can be found for their money in the regular channels of business. A trade revival, moreover, would, as we have shown, diminish the flow of new capital into the stock and share markets by diverting a large portion of it, either directly or through the medium of the banks, to industrial purposes. It would further tend to enhance the value of money, and a sharp rise in rates, from whatever cause it resulted, would soon force many of those who are now carrying large amounts of stock with borrowed money to sell out, and in many other ways would tend to force securities upon the market. Either improved trade or dearer money would thus tend to break down the foundation upon which the present high range of prices rests, and, as happily there are now indications of an expansion of business, while the money market is at all times liable to sudden spasms of stringency, it would not be surprising if before long quotations receded from the exceptionally high points to which they have been driven up. A fall, too, is all the more probable because the past rise is in very many cases pure inflation, which would collapse on the first serious pressure, and also because cause new securities are now being created on a great scale, the tendency of such an increase of the supply of stock being necessarily to break down prices.

#### FREE TRADE.

Mr McIver's frequent onslaughts in Parliament upon our system of Free-trade, ridiculous though they be, are not without their advantages. They, at all events, make it evident that the Protectionist reaction, of which there has lately been so much talk, is pretty much a myth. If there really were any strong feeling in the country in favour of a policy of Protection, we may rest assured that it would before this have been made manifest in the House of Commons. Members are only too prone to be swayed by the opinions of their constituents, and if, as is asserted, public opinion were veering round towards reciprocity, they would soon testify to the change by their speeches and votes. Last year, however, only six members could be got to support a motion by Mr Wheelhouse for a select committee to inquire into what he designated "our system of one-sided, so-called Free-trade," and last Monday night Mr McIver's advocacy of the imposition of Protective import duties was treated with no less significant indifference, not to say contempt. It is

reasonable to conclude, therefore, that although there is much noise there is very little substance in the agitation of which Mr McIver has constituted himself a zealous apostle. The outcry only seems great because the mass of the people, being satisfied with things as they are, remain silent, and in the general stillness the clamour of a few dissentients sounds loud and imposing.

Within the past few weeks it must be admitted the ranks of the reciprocitarians have been somewhat largely reinforced. To them have gone over for the moment a number of those who are discontented with the new French tariff, and who, irritated at what they regard as a breach of faith on the part of the French Government, profess to wish for the imposition by us of retaliatory import duties upon French products. But that this union of fiscal Adullamites will long continue is not to be expected. It would, for instance, be immediately dissolved if a satisfactory treaty were negotiated with France. And even if we should fail to obtain an acceptable sub stitute for the expiring treaty, there are probably very few indeed of those who are now talking loudly of retaliation who would be prepared to practise what they are preaching; for a very little reflection must show that for our manufacturers to institute a war of tariffs would be simply suicidal. Of the 410,000,000l worth of commodities we imported last year, little more than a tenth consisted of manufactured goods. The remaining ninetenths were almost wholly made up of articles of food, raw material for manufacture, or of goods in a semimanufactured state, imported for the purpose of undergoing here the final finishing processes. Now upon none of those three last classes of goods would our manufacturers willingly consent to have import duties placed. If either necessary food, or raw or semi-raw material were made dearer by fiscal exactions, the effect would, of course, be to add to the cost of production, and thus by necessitating an advance in our prices to choke off the demand for our products. From the manufacturers' point of view, therefore, almost the only portion of our imports upon which retaliatory duties could be advantageously levied is that tenth part which consists of manufactured goods. But of manufactured articles we export about five times as much as we import. Supposing, then, we we were to impose an import duty of say 10 per cent. upon the goods of this class we receive, and other nations retorted, as they undoubtedly would do, by enhancing to at least an equal extent the duties upon our products, the result would be that while we would make £40,000,000worth of goods pay duty to us, we would have to pay duty upon £200,000,000-worth. Every blow we struck would thus come back upon us with five-fold force and into a tariff contest which must be waged under such unequal conditions it would obviously be the height of folly for our manufacturers to enter.

It has, however, been said—and this point was very ably urged in a letter we published last week-that we have it in our power, by augmenting the wine duties, to deal a heavy retaliating blow upon French trade, not only without injury, but even with positive advantage to ourselves. And it must be conceded that the imposition of a heavier duty upon wine, if it were levied simply for revenue purposes, would be a perfectly legitimate means of increasing the national income. As we do not produce wine here, the duty would not be protective in its operations, all the extra price paid by the consumer would go into the Treasury, and falling upon a luxury it would be less burdensome and noxious than a tax imposed upon the necessary expenditure of the poorer classes. It is quite possible that if we were to cease to be bound by a treaty with France, Mr Gladstone, or whoever is Chancellor of the Exchequer, might seek, by an addition to the wine duties, to provide the means for reducing the duty, say upon tea, and to the principle of such a fiscal re-arrangement it is difficult to see what objection could be raised. The question would be simply one of expediency. Such a course, however, is very different from that which we are now urged to pursue. It is not a general increase of the wine duties we are asked to make, but a discriminating augmentation of the rates upon the French wines, and the increase is sought to be made not with a view to the permanent re-adjustment of our taxation, but simply as a temporary expedient for the purpose of compelling France

to deal more liberally towards us. Now, by such an increase of duty it is clear the consumption of French wines would be greatly reduced without that of other wines being increesed. But for the wines which we receive from France we send our manufactures in exchange. extent, therefore, to which we might restrict our purchases from France, to that extent should we curtail her demand for our goods, and that without opening up any other market for our wares, as would be the case if we applied the increased duty on wine to the reduction of some other import charges. The result of retaliation in this form would thus be that, in addition to the loss of trade which we would suffer from the enhancement of the French import duties, we would inflict upon ourselves a further loss by shutting our markets against French buyers.

Thus far we have gone on the assumption that in the event of our adopting a policy of so-called reciprocity the wish of our manufacturers to have food and raw material imported free of duty would be respected. But why should it be? If it be granted that the State is to come to the help of afflicted industries, its aid should surely be given first to the one which is suffering most. Our agri-cultural, and not our manufacturing, interests, therefore, have the first claim for protection, if there is to be protec-tion at all. Besides, if we are to seek, by the imposition of import duties, to punish foreign nations for maintaining hostile tariffs against us, then the United States are certainly as deserving of punishment as France. And as our imports from the States consist mainly of food and raw material, it is upon these commodities that any import duties must, if they are to be effective, be levied. Against the taxing of food those manufacturers who are now raising the cry for retaliation cannot plead the interests of the great mass of consumers. If the consumer is to be considered, then their demand that the nation should be made to pay a higher price than is necessary for its imports simply because other countries choose to restrict their purchases of some of our manufactures, is obviously one which cannot be maintained. We have, however, been content to argue the question on the narrow ground of the manufacturers' self-interest, and even from this low standpoint it can be clearly seen that the suggested retaliation would be foolish and injurious in the highest degree. It would be toonsh and injurious in the highest degree. It would commit us to a system the first effect of which would be to enhance the cost of production. It would initiate a tariff contest in which the odds are overwhelmingly against us, and would add a self-inflicted injury to that which other nations may seek to do us. If, then, our manufacturers are mindful of their own interests, they will be careful to refrain from giving any countenance, and far less any support, to the foolish agitation with which some of them seem at present inclined to coquet.

THE NATIONAL DEBT AND THE PROSPECT OF REDUCTION OF INTEREST.

The present market value of the National Debt—say  $102\frac{3}{8}$  for Consols,  $100\frac{3}{4}$  for Reduced 3 per Cents.,  $100\frac{5}{8}$  for New 3 per Cents.—is very likely to bring before Mr Gladstone's memory the recollection of the last conversion of the public debt in 1853, when he dealt with the South Sea Stock, about 10,000,000*l* in amount heaving interest at the rate of 21 reasont. amount, bearing interest at the rate of  $3\frac{1}{3}$  per cent. proprietors of this stock had four alternatives offered them.

1. They might obtain in lieu of every 100l a new stock, bearing  $3\frac{1}{2}$  per cent., guaranteed against reduction till 1894 (40 years), at the rate of 82l 10s for every such 100lstock-which is equal to an interest of 2l 17s 9d per cent., fixed for that period.

2. Or, they might receive a new 2½ per cent. stock, guaranteed also till 1894, at 110*l* for each 100*l* of such

stock-equal to 2l 15s per cent.

3. Or, they might receive Exchequer bonds, bearing 23 per cent., for a period not exceeding ten years, and 21 per cent. for a further period till 1894 (40 years in all), which shall be payable to bearer, and to which coupons for the half-yearly interest were to be attached, also payable to the bearer.

4. Or, lastly, they might, if they rejected any of the above three plans, receive the amount of their stock in

cash at par.

So far this operation was compulsory on holders of this stock. But as so limited an operation would do nothing

either to test the actual power of the Government in the money market, or to lay a sufficient foundation for great future operations, the Chancellor of the Exchequer proposed to extend the same offers to the holders of all Three per Cent. stocks—the first, without any limit to the amount; the second and third, to be each, in the meantime, limited to thirty millions of stock. Out of this operation the existing  $2\frac{1}{2}$  per cent. stock was originated, about 4,000,000l in amount, though the transaction as far as the South Sea Stock was concerned was not successful, the Corporation itself electing to be paid off at par. There is, practically, scarcely a market for so small a stock, though from the recent movements it is small a stock, though from the recent movements it is now quoted at  $89\frac{7}{8}$  to  $90\frac{1}{8}$ . It appears that attention has been drawn to it, and the Government has issued further amounts of the stock which will probably be readily taken up at the present price. The New 3 per Cent. Stock, now about 205,000,000l in amount, represents the most important conversion of the National Debt in recent times. This was effected in 1844—nine years before the operation on the South Sea Stock referred to above. The rate of interest was reduced to  $3\frac{1}{2}$ The rate of interest was reduced to 31 referred to above. per cent. in 1844, and to 3 per cent. in 1854. The whole stock at that time was 248,757,311*l* in amount, and, as only 103,3521 was paid to dissentients, the operation may be said to have been accepted almost without exception by the then holders of the stock. As no further reduction was to be made in the interest till after 10th October, 1874, this stock is open to alteration now. Consols were fluctuating about par in 1844, when the change in the rate of interest in the New 3 per Cents. was made, and as this stock is now reduced about one-fifth in extent, while Consols are at this date considerably over par, it would seem probable that an operation in the way of the lowering the interest might be successfully effected at the present time in this stock, as well as possibly in the interest on the whole of the National Debt. The business would, however, be a delicate one to carry through. plan of offering a larger nominal amount of a stock bearing a lower dividend, though attractive to the holder of the public funds, would be a disadvantage to the public in the long run. The possibility of redemption of the debt ought never to be lost sight of, and in years of peace the reduction of it is a plain duty. The method adopted in 1844 of a gradual reduction of the rate of interest allowed appears the best solution of the difficulty. Uncertainty as to the future is certainly depressing the market value of the 3 per Cent. Stocks at the present time. Consols, now quoted at about 1023, would probably stand at about 107 if the possibility of conversion did not weigh on the market. Mr Gladstone's reply to Mr Whitmore's question on the 24th respecting the reduction of the interest on Consols that "the legal obligation was strictly "limited either to paying 3 per cent. perpetual annuity, "or the sum of 1001," may have been based on a disinclination to have his hand forced, quite as much as on any other reason.

### BUSINESS NOTES.

THE COINAGE OF SILVER IN INDIA.—The import of silver into India and the coinage of that metal is stated in the last Mint report to have been as follows:—

	Net Imports		Coinage.
Year.	£		£
1874-5	4,640,000	*******	4,900,000
1875-6	1,550,000	*******	2,550,000
1876-7	7,200,000	********	6,270,000
1877-8	14,680,000		16,180,000
1878-9	3,970,000	******	7,250,000
1879-80	7.870,000		10,250,000

The excess of coinage over imports during the last three years of this period is in great measure accounted for by the large amount of bullion, amounting to no less than 3,320,000*l* in the form of native ornaments, &c., which was thrown on the market by sufferers from famine in Western and Southern India, and received for coinage at the Bombay Mint, but that mint also received in 1878-79 and in 1879-80 1,120,000*l* in native coins, principally Baroda rupees. It will readily be seen from this statement what an important factor in silver operations India and the Indian mints are. The weight of silver coined by France from 1851 to 1875 was, according to an estimate made by Dr

Soetbeer, about 10,000,000 lbs avoirdupois; that coined by India in the same period of time was nearly 38,000,000 lbs We may add to this the weight of silver coined in India from 1875 to 1880, which may be roughly put at 9,300,000 lbs, or nearly as much in six years as France had coined in five and twenty. This will show how important a factor the silver coinage of India is in maintaining the use of silver If we omit the value of the silver ornaments as currency. parted with through pressure of want, the coinage of the last three years amounts to about 30,000,000l sterling in value, an amount sufficient to remove any anxiety as to the power of India to absorb the precious metals in the ordinary course of affairs. We subjoin the substance of the instructions given to the Indian delegates, at the Paris Conference, Sir L. Mallet and Lord Reay, as read to the House of Commons by Lord Hartington; and we submit that the figures we have shown as to the silver coinage of India show that the East is entirely the preponderating force in the matter.

derating force in the matter.

You will explain that, in sending a delegate to the Conference, the Government of India must not be held to commit itself to the adoption of the principle of the bi-metallic system in India, and that you are not authorized, without further instructions, to vote on any question raised at the Conference. You will, however, add that, while the Secretary of State in Council is unwilling to encourage an expectation of any material change, at present, in the monetary policy of India, he would be ready to consider any measures which might be suggested for adoption in India as being calculated to promote the re-establishment of the value of silver. It is desirable that you should, as far as possible, avoid giving any pledge on the part of the Government of India which would in any manner interfere with its future liberty ef action; but, in the event of your being pressed on the subject, or your seeing reason to think it desirable that such a declaration should be made, you are authorized to agree, on the part of the Government of India, that, for some definite term of years, not exceeding ten, it will undertake not to depart, in any direction calculated to lower the value of silver, from the existing practice of coining silver freely in the Indian mints as legal tender throughout the Indian dominions of her Majesty. Such a declaration must, however, be conditional on the acceptance by a number of the principal States of an agreement binding them, in some manner or other, to open their mints for a similar term to the coinage of silver as full legal tender in the proportion of 15½ of silver to 1 of gold, and the engagement on the part of India would be obligatory only so long as that agreement remained in force.

The Work of the Mint in 1880.—From the annual report of the Master of the Mint we learn that last year 25,813,033 British coins were struck, their value being as

nows:—							
Gold.	£	8	d	£	S	d	
Sovereigns	3,650,080	0	0				
Half-sovereigns	504,524	10	0				
				4,154,604	10	0	
Silver.				,			
Half-crowns	168,273	15	0

Halfpence	5,048	17	81				
Farthings	1,919	9	91				
				19,471	16	9	

		£
1876		2,075,000
		3,748,000
	******************	2,773,000
	***************************************	1,617,000
2000		9 977 000

The amount of light coin received for coinage during the year was only 389,375*l*, but as 2,842,437*l* of light coin had been received in 1879 out of the coinage for the year,

about 3,200,000l was made with the light gold returned through the medium of the Bank of England. The silver coinage of the year also exceeded the average, amounting, it will be seen, to 744,829l, as against 567,125l in 1879 and 614,4261 in 1878. The total amount of silver coin issued to the public was 709,093l, and the amount of worn silver coin withdrawn from circulation 250,000l. This large withdrawal, as the Deputy Master points out, shows that the renewal of the coinage progresses satisfactorily. Fourpenny pieces, it may be noted, are being rapidly passed out of circulation, and nobody is likely to regret their disappearance. The half-crown piece, on the other hand, which it was unwisely sought to discard, is now again coming into more extended use, the total amount of these coins issued since 1874, when their coinage was resumed, being 992,700l. In the demand for silver, the Deputy Master reports a decided increase, and it would, no doubt, in present circumstances, be an advantage if the circulation of convenient silver coins were still further augmented. The average market price at which silver was purchased in 1880 was  $52\frac{1}{8}$ d per ounce, and as the rate at which silver coin is issued by the Mint is 66d per ounce, the seignorage accruing to the State has been at the rate of 133d per ounce, or 265d per cent.

RAILWAY RATES .- In the course of the inquiry by the Railway Rates Committee it has been a matter of frequent complaint that access cannot be had to the rate books of the various companies. Section 14 of the Railway Act, 1873, requires every railway company to keep at all its stations a book, or books, showing every rate charged for all other than passenger traffic. These rate books are to be open to the inspection of any person, whether intending to send goods or not, and the company is liable to a penalty of 5l for each day it fails to keep rate books, or refuses a demand for their inspection. Yet, notwithstanding these seemingly stringent regulations, traders state that the companies put such obstacles in the way of an inspection of their rate books as to make them almost inaccessible. It would seem desirable, therefore, that further facilities for their examination should be afforded. And in any alteration that may be made it would be well to take the control of the books, in so far as their inspection by the public is concerned, out of the hands of the railway companies altogether. So long as railway officials have the power to stave off awkward inquiries they are certain to exercise it, and the rate books should be placed in the custody of persons who have no interest in keeping them closed. What we would suggest, therefore, is that all railway companies should be required to deposit copies of their rate books n certain specified public offices. In London they might be deposited with the Board of Trade, and in the provinces with town clerks or clerks to commissioners, or whatever other officials may be thought best to represent the public. The books, moreover, ought to be made to show, in a form somewhat similar to the return made to the House of Commons by the Manchester, Sheffield, and Lincolnshire Railway, and published this week as a Parliamentary paper, the maximum legal charges of the respective Com-panies as well as their tariff rates. If this were done panies as well as their tariff rates. If this were done overcharges would, we think, be speedily detected if they were not wholly prevented.

The French Shipping Bounties and German Opinion.—The President of the German Nautical Union, "Counseller of Commerce," Gibsone of Danzig, has addressed to the Hamburg Börsen Halle some very sensible remarks on the subject of the French Shipping Bounties. Mr Gibsone observes that their effect will be to promote the flow of capital from large centres of commerce, which require no such stimulus, into large steam ship undertakings. The build and equipment of these vessels will be arranged with a view to the obtaining as large a share of the bounties as possible, not to economy of freight. One effect will probably be to extinguish even more rapidly the "little trade" of small harbours. The class of sailing vessels which has been employed in it is rapidly becoming obsolete. No bounty system, Mr

Gibsone feels, could revive this decaying trade into vigorous life. Any stimulus that might be given to it would be at an extra cost to the country, which could get its business done more cheaply by other means. "It "would be like maintaining a line of coaches by a state "subvention to compete with a railway." Successful commerce does not need the bounty. State assistance is thus either injurious or useless.

BILLS OF SALE.—From a Parliamentary paper issued this week, showing the number of bills of sale given in each county of England and Wales, classified according to the amounts for which they were granted, we take the following:—

SUMMARY of the NUMBER of BILLS of SALE given in the whole of ENGLAND and WALES, in each of the Years from 1875 to 1880 inclusive

	1880.	1879.	1878.	1877.	1876.	1875.
Under 10t 10t and under 20t 20t and under 50t 50t and under 100t 100t and under 200t 200t and under 500t 500t and under 1,000t	No. 8,872 13,978 15,327 7,183 4,652 3,038 766	No. 5,754 10,751 13,418 7,521 5,320 3,576 1,018	No. 393 2,306 5,257 3,953 3,234 2,371 655	No. 65 945 3,792 3,572 3,259 2,302 622	No. 60 877 3,376 3,115 2,910 2,114 595	No. 36 761 2,696 2,599 2,570 1,791 482
1,0001 and above	416	591	320	319	358	281
Total number	54,232	47,949	18,491	14,876	13,405	11,216
Total amount	£ 4,333,914	£ 5,253,291	£ 2,760,094	£ 2,807,871	£ *2,719,413	£ 2,123,826
Number of which the amount is not specified	No. 1,281	No. 1,674	No. 1,105	No. 860	No. 823	No. 628
Grand total	55,513	49,623	19,596	15,736	14,228	11,844

The enormous increase in 1879 is no doubt mainly due to the more stringent regulations as to registration which then came into operation. But apart from this cause of increase there has been a great and progressive growth in the number of bills granted, and more especially in the number of those for small amounts, in regard to which the extortions of the money lenders are the greatest. The good results which were expected to flow from recent legislation with respect to these documents have thus not been realised. On the contrary, the evils it was sought to remedy have become greater and more flagrant than ever, and the question will have again to be taken up and dealt with very soon.

LOCAL TAXATION.—Mr Pell's motion in the House of Commons, recommending "that the annual consideration " of the measures imposing taxation should be accom-" panied by a ministerial statement of local taxation and "finance," so as to enable taxation and indebtedness, whether local or imperial, to be viewed as a whole, took up the line always advocated by the Economist as to the proper method of dealing with these matters. Mr Pell, and Sir M. Lopes, who seconded the motion, showed three points very clearly—1. That local indebtedness was increasing with enormous rapidity; 2. That the length of time for which loans were made should be very carefully considered; 3. That increased subventions from Government had been followed by increased expenditure. Mr Gladstone recognised the importance of this last point very strongly. "There is undoubtedly," he said, "a fatal very strongly. tendency in the system of what are called 'grants in "' aid,' both to relax the principles of economy in this " country, and to increase the country's aggregate expen-"diture." No worse arrangement, it may be safely added, from an economic point of view, can exist than divided responsibility in administration. Mr Rathbone ointed out the necessity of replacements, which should system" by "one local authority, which should system by "one local authority, which should system" by "one local authority, which should system" by "one local authority, which should system" by "one local authority, which should system by "one local authority, which should be a second by the system by "one local authority by "one local aut pointed out the necessity of replacing the existing "chaotic which should "regulate taxation and expenditure. Within the area in which he lives there were thirty-five local authorities, and he would defy any one to tell him " to whom in respect of each separate item of local rates "and taxes he would have to make application for infor-"mation or by way of complaint." A large part of the recent increase of local indebtedness has been incurred for public objects, some, like gas and waterworks, yielding an immediate cash return, and representing valuable and often improving property, others, like sanitary improvements and School Board expenditure productive of

material advantage in other ways. There need be no | Majesty's Secretaries of Legation and Consuls to prepare legitimate complaint in respect of outlay of this description, but what is wanted is that each borough or local authority should know how much it owes, why the debt is incurred, whether it is annually increasing or diminishing. Debt may have been run up in many separate loans, for sanitary work, for municipal expenses, for School Board expenditure, for the local board of guardians, instalments of these debts are being paid off on one hand, fresh loans are being raised on the other. A highly experienced accountant would often find it difficult to make out a clear statement of the working of the existing system. annual balance sheet is most desirable. It should show in the first instance the exact position of each place as to debt and rateable value, and in the next a summary of the whole, which would give the real indebtedness of the whole country. Local requirements are likely to increase rather than to diminish, and the work spoken of above cannot be undertaken too soon.

#### TRADE AND FINANCE IN PARLIAMENT.

On Monday night, on the motion to go into Committee on the Budget Bill, Mr Pell moved "that the annual con-' sideration of the measures imposing taxation should be "accompanied by a Ministerial statement of local taxation "and finance, so as to afford the House an opportunity of " reviewing, as a whole, the requisitions made on the nation "for local as well as imperial purposes." This motion having received the warm support of a number of members, This motion Mr Gladstone expressed himself as distinctly favourable to the spirit of the resolution. There would, however, he said, be an inconvenience in making the proposed statement at the same time as the Budget, and his suggestion, which, however, he gave out simply as an idea worthy of examination, was that a Standing Committee on local accounts might be instituted similar to the committee to which the public accounts are now submitted. The question of local taxation, he further stated, cannot be properly dealt with until that of local government has been disposed of.

Mr McIver then sought to raise a discussion on his proposal to replace customs duties "upon such foreign im-"portations as come into unfair competition with the in-"dustries of Great Britain and Ireland;" but only Mr Slagg and Colonel Barne—the former opposing and the latter supporting Mr McIver—thought it necessary to speak on the subject.

The way having been thus cleared, the Budget Bill was considered. In the course of the discussion, Mr. Gladstone, replying to Sir Stafford Northcote, stated that during the first seven weeks of the current financial year the receipts from the beer duty had fallen short of the estimates by about 6 per cent., but it would be premature at present to form an opinion as to the reason. Subsequently he moved the omission of the clause proposing a reduction of the duty on silver plate, but declined to give an assurance that the abolition was not merely postponed but abandoned. The Land Tax Commissioners Name Bill was subsequently passed through Committee.

In the early part of the night, in reply to questions, Sir Charles Dilke stated that communications have been made to the Governments of France, Holland, and Belgium with respect to outrages committed by foreigners upon English fishermen in the North Sea, but to these no replies have been received. Mr Fawcett intimated arrangements were being made for expediting the mails to and from the north of Scotland. They are, however, not yet completed. Mr Mundella had to express his regret that owing to the outbreak of pleuro-pneumonia in the north of Spain it had been necessary to issue an order for the compulsory slaughter at the ports of landing of all cattle from Spain and Portugal. Mr Gladstone informed the House that the Government would abandon their proposal to permit the sale of liquors in railway carriages.

On Tuesday, during question time, Mr Gladstone made the guarded statement respecting the conversion of Consols, which is dealt with in another column. Charles Dilke, replying to Mr R. Paget, stated that the Government were prepared to give instructions to Her

their reports in such a manner as that the information might be printed under the two heads of agriculture and commerce. The Foreign Office, he said, is in communication with the Board of Trade as to the best mode of effecting a change.

On the renewal of the debate on the Budget Bill on Thursday evening, Mr Gladstone intimated his willingness to agree to the principle of several amendments on Clause 20, of which the effect was that income tax under Schedule A should be payable only on houses or lands in actual or residential occupation by the owner or his tenant, and that any income tax that might have been paid on rent which was afterwards lost by the insolvency of the tenant should be returned. He also agreed to the withdrawal of a clause which proposed to make owners responsible for the inhabited house duty. The Bankruptcy (Scotland) Bill passed through Committee.

At an earlier stage of the proceedings Sir Charles Dilke, answering a question put by Mr Ritchie, said that although the Government have undertaken to bring the question of the sugar bounties before the French Commissioners in the course of the ensuing commercial negotiations, they could not undertake to tie their hands by making the conclusion of a new treaty dependent upon the acceptance by a foreign government of their views on any given point. Mr Dodson intimated that it is the desire of the Government to prosecute the Rivers Conservancy Bill with the least possible delay, and to secure legislation on the subject this session.

At a morning sitting yesterday, the amended Budget Bill was considered. Mr Gladstone stated that it was not proposed to make settled property subject to the new probate duty. He also announced an alteration it was intended to make in the process of testing imported

Mr Grant Duff, in answer to Sir W. Barttelot, stated that it had been represented to the Colonial Office that there was no real legislative control over the expenditure of Western Australia, and the matter was under the consideration of the Secretary of State.

#### PUBLIC INCOME AND EXPENDITURE.

The following are the receipts on account of revenue, between April 1, 1881, and May 21, 1881, as compared with the corresponding period of last year :-

not be published till to-morrow.

Discount on the open market is again more difficult as the monthly settlement approaches, the rate of 3½ being almost nominal from the few takers of bills. As lenders for the settlement have been able to obtain from 6 to 7 per cent. for short loans from month to month, the supply of money for discount is reduced. Most of the paper in consequence now goes to the Bank. The London exchange is heavy at 25f 21½c, and some small quantities of gold have been received. On the other hand, the Berlin exchange has turned a little against France, and the imports from that direction have ceased. Little business is, besides, doing in bullion and foreign bills.

The suspension of payment is reported to-day of the house of Van Raalte, diamond merchants. The liabilities are said to amount from six to eight millions of francs.

Fresh rumours of a refunding of the Five per Cents. have been in circulation, and caused for a moment a fall of ½ in that stock. One reason alleged by the conversionists in support of their opinion is that the voting of the screttin de lists will free Deputies from the responsibility of an unrounder. liste will free Deputies from the responsibility of an unpopular measure, which might have prejudiced their future election, and as under the new system they will be less subject to local influences they might now venture to vote a measure they had before thought necessary, but had hesitated to support in order to not incur the displeasure of the small fundholders. in order to not incur the displeasure of the small fundholders. It is, however, scarcely probable that the Government, after having so long refused to take in hand such an operation, would undertake it on the eve of the elections and its own retirement from office, and the conversion will no doubt be one of the measures that will be left for the new Chamber and the new Cabinet that will be formed after the general elections. The reasons above mentioned will then have their value. The Three per Cents. have also barely maintained last week's prices, and the general tendency has been dull, with the exception of Bank of France and French railway shares, in which there is strong speculation for the rise. Suez Canal shares have also continued their recovery. Suez Canal shares have also continued their recovery. The following were yesterday's closing rates, with the variations on the week:—Three per Cents., 86f 22½c — 5c; The following were yesterday's closing rates, with the variations on the week:—Three per Cents., 86f 22½c — 5c; Redeemable Old, 87f 45c =; New, 86f 97½c — 2½c; Fives, 119f 92½c — 15c; Italian, 92f 25c + 1f 10c; Austrian Gold 4 per Cents., 83f 10c + 90c; Turkish Fives, 17f 25c + 75c; Egyptian Unified, 390f — 1f 25c; Preference Bonds, 493f 75c — 3f 75c; Russia, 1877, 95f =; Bank of France shares, 5,740f + 165f; Banque de Paris, 1,285f + 6f 75c; Credit Foncier, 1,707f 50c + 2f 50c; Union Générale, 1,271f 25c — 1f 25c; Leender, Bank, 767f 50c — 7f 50c; Paris Gas, 1,567f 50c + 1,707f 50c + 2f 50c; Union Générale, 1,27ff 25c — If 25c; Laender Bank, 767f 50c — 7f 50c; Paris Gas, 1,567f 50c + 12f 50c; Suez Canal, 1,845f + 20f; Panama Canal, 530f =; Northern Railway, 2,017f 50c + 75f; Western, 860f + 10f; Orleans, 1,430f + 10f; Eastern, 805f =; Lyons, 1,810f + 45f; Southern, 1,300f + 15f; South of Austria, 28lf 25c + 2lf 25c. A sharp rise in Turkish securities took place this week on a correct that M. Valfaver had been charged by the Symdicate of

news that M. Valfrey had been charged by the Syndicate of Paris banks, which a short time back invited bondholders to confide their interest to it, with a mission to Constantinople to negotiate the execution of a plan of financial reorganisation proposed by the Porte in October last. This group comprises all the great Paris establishments, including the Comptoir

d'Escompte, Credit Lyonnais, Ottoman Bank, Banque de Paris et des Pays Bas, &c. Various extensions of the service rendered by the Bank of France to the public have recently been made, and some others are said to be in preparation. One is intended to facilitate the Bourse settlements by the Bank receiving on deposit public securities not taken up by the buyer and carried over by bankers. This will dispense with the necessity for carry-ing the securities about from one broker to another and then to the lender, the transfer being made at the Bank. The next is to shorten the present delay in obtaining advances on registered stocks and shares. Thirdly, the Bank is reorganis-

ing its service of collecting bills on the great pay days of the month. That business has acquired enormous proportions, although the Bank now makes a small charge for each bill instead of collecting the bills gratis for customers having an account at the Bank. Thirty years ago the largest echésness did not comprise more than 27,000 bills. for a sum of 25 millions of francs, at 13,000 domiciles. On the 30th April last the number of bills the Bank had to collect was about 170,000 for a total sum of 148 millions and at 66,000 out 170,000, for a total sum of 148 millions, and at 66,000

about 170,000, for a total sum of 148 millions, and at 66,000 addresses. The Bank is creating district offices for this service all over Paris, the first of which was recently opened. The Banque Parisienne, the chairman of which is M. Pouyer-Quertier, succeeded in forming a meeting this week, and in obtaining a vote to increase the capital from 30 millions of francs to 110 millions; but to assemble the required number of proprietors a bonus of 10 francs for each shareholder present was offered with 25 centimes per share represented. A considerable minority voted against the increase of sented. A considerable minority voted against the increase of capital. The new shares are to be issued at a premium of 150f, 275f being demanded for the share, one-fourth, or 125f paid. The Board undertakes the issue at a commission of 10f per new share, or a total sum of 1,600,000f. Some of the per new share, or a total sum of 1,600,000f. Some of the shareholders objected to the 40 per cent. of the net profits, after payment of interest, reserved for the founders, but all

after payment of interest, reserved for the founders, but all the resolutions were voted.

The effect of the shipping bounties may be already traced in the monthly navigation returns. The month of April last compared with April, 1880, shows that the French entries increased from 262,225 tons to 365,515 tons, while the foreign fell from 672,046 tons to 582,749 tons. In the clearings the French tonnage rose from 215,438 tons to 288,412 tons. The foreign also had a small increase from 324,248 tons to 355,851 tons. The bounties on ship building have not so far storred The bounties on ship building have not, so far, stopped the imports of foreign-built iron shipping, 3,043 tons having been put on the French register in April, 1881, against 352 tons only in the same month of 1880. That apparent anomaly may be explained by the eagerness of owners to earn the bounties on navigation. The French builders have more orders than they can execute, and owners are forced to buy their ships abroad, although the navigation bounties on foreign-built ships are only one-half of those allowed to French bottoms. It is, however, possible that the difference in cost between English and French ships is sufficient to compensate for the loss of the whole of the bounty on construction, and one half the bounty on navigation.

one half the bounty on navigation.

The Continental Hotel Company is being wound up, and the building in the Rue de Rivoli has been sold to the Credit Viager Life Insurance Company.

The Banque d'Escompte (M. de Soubeyran's) has held its appeal meeting and voted a total dividend of 31f 25c for

annual meeting, and voted a total dividend of 31f 25c for 1880, including the 12f 50c paid on account. The dividend for 1879 was 38f 75c.

A decree of bankruptcy has been issued by the Paris Tribunal of Commerce against the Anglo-French Union Bank, of the Boulevard des Italians, Paris, and with branches in sixteen provincial towns.

The following are the declared values of the imports and exports of gold and silver in the first four months of the year, and of 1880:—

OF TOOL			
1 M I	PORTS.		
	1881.		1880.
	francs.		francs.
Gold bullion	8,826,352	*****	10,711,128
Gold coin	57,229,440	*****	55,046,720
Silver bullion	14,784,736	*****	4,793,814
Silver coin	25,582,460	*****	31,975,666
	106,422,988	*****	102,527,328
	£4,256,919	*****	£4,101,093
	PORTS.		
Gold bullion	560,720		209,840
Gold coin	62,915,200	*****	76,512,000
Silver bullion	1,202,890		4,193,110
Silver coin	8,363,200	*****	11,252,200
	73,042,010		92,167,150
11 007 11 11	£2,921,680		£3,686,686

The movement of imports exceeded the exports of specie by 33 millions of francs, but it will be remarked that the balance consisted wholly of silver.

#### GERMANY AND AUSTRIA.

(FROM OUR OWN CORRESPONDENT.)

VIENNA, May 25

The subscription to the Hungarian conversion loan, which took place on Thursday, was the greatest financial success Austria and Hungary have ever achieved. One hundred and sixty million florins were offered for subscription, and no less than twenty-five times that amount—that is, 4,000 millions were subscribed. Austro-Hungarian capital was subscribed to

the amount of 530 millions, German capital to the amount of 900 millions; in London the subscriptions amounted to 1,000 millions and in Paris to 1,700 millions. The allotment of the Rente among the subscribers has been announced already, and will be carried out as follows:—Subscribers of from 100 to 900 florins gold will receive 100 florins 4 per cent. Hungarian Gold Rente; those who subscribed from 1,000 florins to 1,900 florins will receive 200 florins under the subscribed from 1,000 florins to 1,000 florins and the subscribed from 1,000 florins to 1,900 florins and the subscribed from 1,000 florins to 1,900 floring 200 floring properties and the subscribed from 1,000 florins to 1,900 floring 1,000 Gold Rente; those who subscribed from 1,000 florins to 1,900 florins will receive 200 florins; subscribers of from 2,000 to 4,900 florins will get 400; those of from 5,000 to 99,900 will receive 7 per cent., and at least 400 florins; and those who subscribed from 100,000 to 499,900 will obtain 6 per cent., but certainly not less than 7,000 florins. The subscribers for from 500,000 florins to 999,900 florins will receive 5 per cent., and certainly not less than 30,000 florins; the subscribers for 1,000,000 to 4,990,900 florins will receive 4 per cent., and certainly not less than 50,000 florins; and subscribers of 5,000,000 florins and more will receive 2 per cent., but certainly not less than 200,000 florins. Any amount less than fifty florins will not be regarded, and over fifty will be counted as a hundred. This extraordinary success shows that the emission was very well timed, and success shows that the emission was very well timed, and guarantees the success of the emissions that are to follow. When the conversion is completed the 400 millions Hun-When the conversion is completed the 400 millions Hungarian gold Rente, for which 24 millions interest were paid every year, will have been changed to 547 million florins, on which but 21,800,000 florins interest will be paid, so that the Hungarian Exchequer will be relieved by 2.2 million florins a year, a circumstance which will be all in favour of Hungary's credit, which has thus by a single successful measure been made to approach that of Austria. Although Austria made to approach that of Austria. Although Austria ought to rejoice at this event, because, having guaranteed the interest of the debt common to both countries, she would be bankrupt if Hungary ceased to pay its share, still some jealousy was felt in this country, chiefly caused by the unsatisfactory state of the home politics just now. Not long ago France's exaggerated centralisation was generally disapproved, but Austria now shows the disadvantages of departralisation capacity when it is compared with Hungary centralisation, especially when it is compared with Hungary, where there is as large a number of nationalities to regard. Whilst in Hungary the Government, by its energetic will, and sustained by a compact majority in Parliament, has achieved sustained by a compact majority in Parliament, has achieved this great success, the majority of the Austrian Reichsrath was trying to violate the constitution. The reader knows that the majority of the Reichsrath was obtained by artificial means. Three clerical candidates in Upper Austria, for instance, could not have been elected, unless the election rolls had been revised, and several votes given to the clerical property. Those who were injured by this manney was complained to the Reichscavicht (the High unless the election rolls had been revised, and several votes given to the clerical property. Those who were injured by this manœuvre complained to the Reichsgericht (the High Court of Justice of the Empire). But long before the Court could pronounce a sentence, the lower house of the Reichsrath had approved the elections. Now the Reichsgericht, whose president is the ex-minister of State, Nuger, has pronounced itself decidedly in favour of the plaintiffs, and declared that some of the proceedings during the elections were illegal. The majority the proceedings during the elections were illegal. The majority by its encroaching stroke has thus caused a conflict between the two highest authorities of the State, and on Friday last it openly declared war by allowing one of its leaders, Hohenwart—whose misbehaviour as minister, and fall, are still in memory -to bring forward a motion in the name of the majorit according to which a committee should be entrusted with examining the Reichsgericht's competency in this question. examining the Reichsgericht's competency in this question. Upon this, ex-minister Herlst, the leader of the constitutional party, declared that he and his followers would not take part in a discussion of this kind, because it involved a violation of the constitution, according to which, the Court of the Empire is the only judge of its own competency. After this declaration, the whole of the constitutional party, including Italians and Ruthenes, who form one-half of the inhabitants of Galicia, in all more than 140 members, rose and left the House. The Austrian Reichsrath's votes are and left the House. The Austrian Reichsrath's votes are valid if only 100 members take part, so that the majority did not hesitate to vote the motion, and elected a committee entrusted with the examination of the Court of the Empire's competency. If the majority come to a substantial resolution on the subject, provoked by the result of the committee's tion on the subject, provoked by the result of the committee's examination, the minority would give up their seats and withdraw from Parliament. The probable results would then be a dissolution of Parliament and a change of Cabinet. The incident caused great sensation—the Neue Freie Presse was confiscated for an article on the subject, and the Bourse, which has been very indifferent to political events of late, was impressed by this one, and the quotations fell in consequence. The Bourse had a tendency to fall the day previously, on account of the emissions of the Hungarian Gold Rente conversion, for which the great firms entrusted with the emission account of the emissions of the Hungarian Gold Rente conversion, for which the great firms entrusted with the emission had done all in their power to cause a rise, which they no longer sought to sustain when their purpose had been achieved. The prices of most securities have fallen considerably in Vienna, Pesth, and Berlin, Vienna having taken the lead this time. Paper rente at 3 per cent. fell from 78.10 francs to 76.70, and the new Austrian paper rente

at 5 per cent., from 97 to 96.40; silver rente, from 78.40 to 77.10; Austrian gold rente, 96.90 to 96.75; the Hungarian gold rente at 6 per cent., from 117.95 to 117.40; Hungarian paper rente, from 93.75 to 92; the Hungarian Credit Bank, from 360 to 350; Austrian Credit Anstalt, from 350 to 344½; Austro-Hungarian Bank, from 843 to 836; Union Bank, from 146.25 to 136; the shares of the Galician Karl Ludwig Railway, from 306.25 to 299.25. The shares of the Southern Railway, on the contrary, rose from 119 to 124, and the shares of the Anglo-Bank remained stationary.

Last Saturday the International Railway Conference, after a long interval, held a meeting. Still the time does not seem to have been sufficient for the Porte to give its delegates the necessary instructions. The delegates of Bulgaria and Sarvia on their part declared that their States recognised all the obligations which the Porte had taken upon itself in their name, and they promised to give proof that the contracts for the construction of the railways in question were concluded within six months. It seems that the Porte has some erroneous notion that by signing the agreement to build junction lines between its own railways and those of the other States it would sign its exit from Europe.

Clearing-house return	76,415,000	75,873,000	77,938,000	84,791,000	97,413,000

The amount of the "other deposits," compared with the "other securities," showed in 1871, an excess of 1,375,994l; in 1878, an excess of 2,215,490l; in 1879, an excess of 8,091,003l; in 1880, an excess of 6,113,754l. In 1881, there is an excess of 6,236,130l.

In 1880 money was the turn easier, and the Bank return recorded an addition of 583,000*l* to the reserve. A Russian loan for 24,000,000*l* made its appearance, but it was mainly subscribed abroad.

In 1878, while money was quiet, and the bank rate was lowered from 3 to  $2\frac{1}{2}$  per cent., the stock markets were extraordinarily buoyant upon the understanding that the Congress would soon meet.

In 1879, the open market continued most stagnant, and the Stock Exchange was quiet; though prices for the time were rising until checked by the wet weather. The "other securities" were reduced to the reserve increase.

The following are the principal items in the accounts of the undermentioned continental and American banks for the latest week published compared with the previous statement;—

DISCOUNT AND MONEY MARKET.—The discount quotations current in the open market were until to-day quite without variation on the week, and best bills could readily be placed 3 per cent. below Bank rate (even 16 lower is obtainable from certain quarters), though people were willing to pay quite as much for day-to-day loans. Today, however, was the settling-day in the Stock Exchange, which always disturbs quotations a little; but it was significant in connection with that occurrence, that speculators were often charged 4 or 41 per cent. for loans on stock from account to account where they paid  $3\frac{1}{2}$  per cent. at the last settlement. In fact, had the arrangement of the terms been left till to-day, a still higher rate would doubtless have been demanded, for the pressure was considerable, and there were consequently many borrowers at the Bank. Bankers who can at the present time lend out large sums at 4 per cent., for which, in the shape of deposits, they pay but 11, realise so large a profit margin on the transaction that they have less cause to disturb themselves concerning the extremely narrow margin which they are enabled to realise upon their discounts. The question, however, which they have to look to is-how long they can expect floating money to remain at  $1\frac{1}{2}$  to 2 per cent? Must not the comparatively high terms payable in the stock markets tend to limit the supply outside? We certainly think it will do so. Some recent actions of the Bank of England, coupled with the rise in the American exchange—which the public had previously learnt to regard as the chief difficulty of the London market—has made them expect a continuance of cheap money. But the position appears to be one of false security. Apart from increasing speculation, our commitments to new securities are going on at even an accelerated rate, and this week's novelties do not fall short of 8,000,000l. The effects of such applications are not instantly visible. The first effect of a subscription to a new company or loan is to collect money at the financial centre, and it is only as the distribution of those funds takes place that its effects are really experienced. But since the beginning of December—that is in six months—the new securities advertised here have exceeded 150,000,000l; and if we exclude the French loan and recent conversion loans altogether from the total, it still represents from 90,000,000*l* to 100,000,000*l*, involving a cash contribution of something like three-fourths that amount. We have also bought largely of American Securities, not originally brought out here, and the inference that in this period we have committed ourselves to a lock-up of accumulated capital at a rate considerably in excess of 150,000,000l a

year appears to be in no way excessive. A good deal of this has still to be provided; and at the same time any increase of pressure for money in New York would soon show that we are still largely indebted in that direction. Hence, there are the materials at hand for a decided tightening of this money market, though, for the time being they appear almost inoperative.

The Bank Return records the changes usual at the end of May. Indeed, it is remarkable with what regularity those changes do occur.

M	OVEMENTS II 1877.	1878.	RETURN IN 1879.	MAY. 1880.	1881.
Other securities	-265,000	323,000	830,000	336,000	-474,000
Note circulation	-110,000	-357,000	182,000	369,000	-360,000
Reserve	+264,000	+598,000	+227,000	+583,000	+476,000

There is, therefore, nothing unusual in the decrease in the notes and other securities, nor in the addition to the reserve; which features are not entirely attributable to the influences of current business, for they are almost as invariably and completely reversed in the first week in June. There is an addition of 110,000*l* to the coin and bullion of which some 23,000*l* came from abroad.

The principal feature in the foreign exchanges this week is the relapse of 20c in the Italian rate, owing to expectations that the new Italian loan will not long be delayed. The Dutch, German, and French rates are also a trifle lower, while the quotation on St Petersburg shows no fresh change.

Silver, as last week, is quiet at  $51\frac{5}{8}$ d per oz., with few transactions and a small supply. The 40 lacs of India Council drawings were allotted on Wednesday, at the previous week's minimum of 1s  $7\frac{11}{16}$  per rupee, and, as before, a considerable proportion was placed above the minimum.

Treasury bills to the amount of 1,530,000*l* will be disposed of by the Bank of England under the usual conditions on Thursday next, June 2. They will be dated June 7. A similar amount in December and March bills is falling due about the same date.

We understand that recently several of the leading bankers have applied to the Government to allow  $2\frac{1}{2}$  per cent. bonds to bearer to be issued.

A deputation from the English Country Bankers' Association, headed by their President, Mr Beckett Denison, waited on Mr Chamberlain, at the Board of Trade, on Thursday, the 26th, to state to him the amendments desired by them in the Bankruptcy Bill. These referred to Clauses 16 and 17 of the Bill which regulates the valuation of securities, especially the cause requiring the security given by a bill or promissory note to be valued. It was suggested that the law might be brought more into harmony with the existing Scotch law, which has been found to work satisfactorily on these points. The 28th clause of the new Bill, requiring trustees and receivers to pay all monies beyond 50l into the Bank of England was likewise felt to present considerable inconvenience. It frequently occurs that an advance is required for a time at the commencement of an insolvency from the local bank, in order to carry on a business in which the insolvent had been engaged. There would also be inconvenience in other respects, and in the payment of the dividends on the estate. The object which the Bill seeks might probably be better obtained by fixing a date after which the amounts paid in to the local bank should be handed over to the Bank of England. A strong opinion in favour of the Bill was expressed, and it is much to be desired that it should be pressed forward as rapidly as possible.

The directors of the Manchester and Salford Bank announce that "it is intended to register the company as one with limited liability under the Companies Act 1862 to 1870, and that the registration will take effect on the 1st day of July next, or so soon thereafter as the certificate of registration can be obtained. With the object of giving ample security to depositors, the capital of the bank will be increased by the sum of 3,000,000l, by adding 30l to each share as a reserved liability. The uncalled and reserve capital, with the assets of the bank, will under the new constitution exceed 10 millions sterling, the total liabilities to the public being about five millions."

The Stock Markets.—This has been a very heavy settling-day; indeed, it seems probable the bankers' clearing may prove it to have involved cash payments larger in amount than any previously recorded. Securities appear to be accumulating very rapidly in London, and, as in Paris, much of them are held with borrowed money. The great rise which has gone on during May shows how extensive the desire to buy has been, and how powerfully the present cheapness of money has reacted upon the market. To-day, however, there was a pause in the advance, for though quotations opened with strength, there was no little difficulty experienced in obtaining sufficient funds, and this appeared rather to shake the general belief in a continuance of cheap money. As a whole, the result of the week's fluctuations is less strongly upward than for some previous weeks, and the approach of the Paris settlement, as usual, has damped the ardour of that Bourse.

Another long list of new securities is given below, and from this we have excluded some applications of minor importance. The Cape and Argentine Loans are, of course, the leading applications, and the former takes the form of 4 per cent. debentures, at a price not below  $95\frac{1}{2}$ . This appears cheap beside Australian and Canadian 4 per cents., which range from  $98\frac{1}{2}$  on New Zealand, up to  $105\frac{1}{2}$  on New South Wales. Cape  $4\frac{1}{2}$  per cents are only quoted at 105, but they have the drawback of future redemption at par.

Messrs C. de Murrieta and Co. (acting as agents for the French contractors for the loan), offer for subscription at Argentine 6 per cent. railway loan for 2,450,000l sterling, or 61,250,000l gold, at the price of 91 per cent. This, it may be supposed, is the same loan which we referred to on April 23rd, to the effect that \$12,000,000 had been taken up by these French houses at 82 net. Taking the net price of the present public issue at 90l 11s per cent., the contractors' profit on the transaction is 8l 11s per cent., the margin seems sufficient. There is a sinking fund of 1 per cent., accumulative, and principal and interest are payable either in London or Paris.

British Government Securities.—The week's variations in the money price of Consols have been between the following limits:—On Saturday, between  $102\frac{1}{2}$  and  $102\frac{3}{4}$ ; on Monday,  $102\frac{5}{8}$  and  $102\frac{7}{4}$ ; on Tuesday,  $102\frac{5}{8}$  and  $102\frac{7}{4}$ ; on Wednesday,  $102\frac{1}{2}$  and  $102\frac{3}{4}$ ; on Thursday,  $102\frac{3}{8}$  and  $102\frac{4}{8}$ ; and to-day, between  $102\frac{1}{4}$  and  $102\frac{1}{2}$ . After a fresh rise of  $\frac{1}{8}$  on Monday, the Three per Cents. have suffered some relapse, closing 1 down on the week upon the prospect of a coming redemption. On the other hand,  $2\frac{1}{2}$  per Cents. are  $\frac{1}{2}$  higher, making a rise of 5 per cent. this month. At present the  $2\frac{1}{2}$  per Cents. stand at 90, equal to 3 per cent. Consols at 108. India Sterling Bonds are quiet, and Rupee Paper  $\frac{1}{4}$  down.

COLONIAL GOVERNMENT DEBENTURES .- Cape of Good Hope  $4\frac{1}{2}$  per Cents. have risen  $\frac{1}{2}$ ; Fijian, 1; New South Wales, New Zealand, Queensland, and Tasmanian  $4\frac{1}{2}$  per

Cent., and South Australian 4 per Cent., 1.

Foreign Government Securities.—The three leading incidents in this department are the improvement in Turkish, Peruvian, and Italian. Italian rentes are higher Turkish, Peruvian, and Italian. Italian rentes are nigher in conjunction with the drop in the exchange in expectation of an early introduction of the new "specie payments" loan; and in Turkish the speculation is more active than ever, first, because the frontier convention has been signed, and secondly, because a telegram has come to hand to the effect that "the Porte approves the financial scheme put forward by Mr Bouverie and recom-mended by Mursurus Pasha. The English delegates have been invited to come to Constantinople." Meanwhile, the Turkish budget shows a deficit of 4,000,000l, apart from any payments to holders of the debt.

enor Blest-Gana, the Chilian Minister at Paris, has addressed a letter to the Peruvian Bondholders' Committee to the effect that his Government formally acknowledges the Committee as the representatives of the bondholders, and Messrs Antony Gibbs and Son, as the sole agents for the reception and sale of the guano, the net proceeds to be deposited in the Bank of England in the joint names of that firm and of the Chilian Minister, until the decision of his Government with regard to priorities of claims and distribution of the funds is made known. He has, therefore, handed to Messrs Gibbs the bills of lading he has received for cargoes affoat, aggregating about 15,000 tons. The Bondholders' Committee, however, appear to be ignorant as yet of the exact terms of the contract with Messrs Antony Gibbs.

On the 24th the United States Treasury notified that applications for the extension of Five per Cent. Bonds at  $3\frac{1}{2}$  per cent. considerably exceeded the limit of at 3½ per \$250,000,000.

Home Railways.—The main changes are still upward, and especially is this the case with the "Deferred" stocks of the Great Northern and Brighton companies. London and North Western stock was dealt in this morning above 170, or at a rise of 5 since the beginning of the year, and of about 30 since the commencement of 1880. It should be remembered that after the great rise in railway securities last year, the first three months of this witnessed an absolute relapse in many stocks, and that as compared with December the changes are not very striking, though the existing cheapness of money has lately caused a rapid advance. The weekly traffic returns contrast with Whitsuntide last year.

The following shows the principal changes for the week in the quotations of ordinary stocks, comparing the latest

Canadian railways do not appear to be doing very well this half-year. It is not that the revenue is without a substantial growth, but that the working expenses are growing in almost equal proportion. Thus, in the return of the Great Western of Canada for the three months ended April 30, there is an aggregate expansion of 76,664l in gross revenue, but an increase of 72,124l in working cost, leaving the net revenue increase at only 4,540l. We have not the Grand Trunk statement to so late a date; but in the four months ended April 30, the traffic increase was only about 50,000l.

The first of the Indian Railway reports for the second half of 1880 has been issued. The Eastern Bengal announces a dividend at the rate of 8l 17s per cent. per annum, as compared with 71 per cent. at this time last year.

AMERICAN RAILROAD SECURITIES .- Central Pacific and California shares have risen 5; Illinois Central, 4; St Louis and San Francisco, 4; and Union Pacific as much as  $7\frac{1}{2}$ . Many other issues have advanced in a smaller degree, while Cairo and Vincennes shares are 2 down; and Ohio and Mississippi 1. Philadelphia and Reading shares are unchanged, though we read the following letter to mean that Messrs McCalmont have resumed the direction of affairs here :-

of affairs here:—
Sir,—I beg to withdraw the advertisement, signed by me, notifying the payment of the coupons, due 1st June next, of the Six per Cent. Consolidated Mortgage Bonds of the Perkiomen Railroad Company at this office, and to inform holders of the said bonds that the company notify the payment of the coupons, due June 1st next, on and after that date, at the office of Messrs McCalmont Brothers and Co., 15 Philpot lane, London, E.C.—I am, &c.,
D. G. Bruce-Gardyne, Manager London Agency, May 21.

Foreign Railways.—Central Argentine shares have risen 1/4; Central Uruguay Debenture Stock, 1; Dutch Rhenish,  $\frac{1}{4}$ ; East Argentine shares,  $\frac{1}{4}$ ; San Paulo,  $\frac{3}{4}$ ; and South Austrian  $\frac{1}{4}$ . Buenos Ayres Great Southern stock has fallen 1; do. debenture stock, 2; Imperial Brazilian,  $\frac{1}{4}$ ; and Mexican Debenture Stock 1. Of the obligations, Imperial Brazilian and Swedish Central are down 1, and San Paulo and Rio 1/2. Iquique are 1 higher; North

Western of Montevideo, 1; and Varna about 1. Banks.-Anglo-Californian have risen 1/2, and Imperial Ottoman, London and River Plate, and London of Mexico, Anglo-Egyptian have fallen 1, Chartered of India, Chartered Mercantile, and London and Westminster 1/2.

Telegraphs.—Anglo-American Ordinary are  $\frac{3}{4}$  down; the Deferred, ½; Direct United Staces, ½; Eastern Extension, ½; Indo-European, ½; and West Coast of America, ½. Cuba are ¼ higher, and Great Northern ½.

INSURANCE.—The changes are irregular. Union shares

are quoted 20 higher; Law Life, 2; London and Northern, 1; and North British and Mercantile, 1; but Railway Passengers ½ lower; Liverpool, and London and Globe, 3; Royal, 1; and City of London Fire, and Fire Insur-

ance Association,  $\frac{1}{8}$ .

Corporation Stocks.—City of Auckland have advanced 2, and Brisbane, Christchurch, Dunedin, Melbourne, Quebec and Oamaru loans all 1.

Docks.—East and West India and London and St. Katherine are both 1 higher, and Millwall Preference 2.

-Commercial Ordinary has risen 3; Ditto New, 2; Gas Light and Coke, 1; and the C 2; South Metropolitan, 5; and London about 9; the latter on the report that an amalgamation has been arranged with the Gas Light and Coke. Imperial Continental is 1 lower

IRON AND COAL.—Ebbw Vale has risen 1; and Sydney and Louisberg, \(\frac{1}{4}\); while Nantyglo has fallen

LAND.—Canada Company, Scottish Australian Invest-ment, and South Australian are all 1 higher; Hudson's Bay and Newfoundland,  $\frac{1}{4}$ . Peel River,  $2\frac{1}{2}$ ; and North British Australasian, 3.

SHIPPING.—Peninsular and Oriental are quoted 4 better, and Royal Mail, 1.

Tramways.—Bristol have risen about  $1\frac{1}{4}$ ; Sunderland,  $\frac{1}{2}$ ; and Tramways of France,  $\frac{1}{4}$ ; while Barcelona, Bordeaux, and London Street have fallen  $\frac{1}{4}$ ; and Liverpool,  $\frac{3}{8}$ .

MINES.—Devon Great Consols have risen  $\frac{1}{2}$ ; South Condurrow, 5; and South Wheal Francis,  $1\frac{1}{2}$ . In foreign undertakings New Quebrada are 1/4 higher, and Nouveau

Monde and Richmond Consolidated, 1/4; but most of the Indian gold mining companies are about 1 lower, and St. John del Rey has fallen 20.

WATERWORKS .- Southwark and Vauxhall are 5 down; and West Middlesex, 1.

MISCELLANEOUS.—Crystal Palace Ordinary have fallen 3; and International Finance, 1/8; but Foreign and Colonial Trust have risen 2; Fore Street Warehouse, 1/2; National Discount,  $\frac{1}{4}$ ; Railway Debenture Trust,  $\frac{1}{2}$ ; Royal Aquarium,  $\frac{1}{8}$ ; and Crystal Palace Preference, 5.

BULLION.-The following is taken from the circular of Messrs Pixley and Abell, dated May 26, 1881 :-

Gold—The transactions in gold have not been of importance this week, and the only arrival to report is that of 78,300l from Melbourne, by the Orient. With the exception of 15,000l sent into the Bank, the remainder has been taken for transmission to the Continent.

Silver—The supplies since our last have been so small that the market has been very inactive, and the price remains therefore without change. The arrivals are 44,000l from New York, and without change. The arrivals as the shipments 51,000l to Bombay.

Mexican Dollars.—Some amounts lately received have been sold at  $51\frac{1}{2}$ d per oz; the market has since become slightly weaker, and to-day  $51\frac{1}{2}$ d is the nearest quotation. The P. and O. steamer takes 77,850l to China and the Straits.

Exchange on India for Bank's drafts at 60 days' sight is 1s 73d per rupee. Tenders were received yesterday at the Bank of England for 40 lakhs of rupees of India Council bills, the allotments were,—To Calcutta, 21,93,000 rs, average rate 1s 7d, 687; Bombay, 17,92,000 rs, average rate 1s 7d, 698; Madras, 15,000 rs, Bombay, 17,92,000 rs, average rate 18 70, 090; Madras, 10,000 rs, average rate 18 7d, 75. Applications at 18 71±d per rupee receive 4 per cent.; above that rate, in full. 40 lakhs of rupees of these bills are advertised for 1st June. The latest quotations of exchange from the East for Bank Bills at four months' sight are from Bombay 1s 74d, and from Calcutta, 1s 74dd per rupee; from Hong Kong, 3s 84d per dollar; and from Shanghai, 5s 14d per tael. The 4 per Cent. Rupee Paper is 844, and the 4½ per Cent. is

Quotations for Bullion.—Gold—Bar gold, fine, 77s 9d per oz standard; bar gold, containing 20 dwts. silver, 77s 10½d per oz standard; Spanish doubleons, 74s to 75s per oz; South American

By REYNOLDS AND EASON—TULSE HILL—Freehold ground rents of 85! per annum, 98 years—sold for 2,080!.

By ROLLS AND LAWRENCE—BERKS, Twyford—the Horse Pit Field, 59a 3r 30p, freehold—sold for 3,200!.

By SOLLOM AND BARNET—STAFFORD, Penkridge—Kinvaston Farm, containing 188a Ir 22p—sold for 6,400!.

By F. W. WHITTINGHAM—LOUGHTON—Eighteen plots of freehold land—sold for 2,606!.

#### NOTICES AND REPORTS.

#### BANKS.

London and River Plate Bank.—The directors have declared an interim dividend of 4 per cent. for the half-year ended 31st March, free of income tax.

National Penny Bank.—A statement which accompanies the sixth annual report shows that the number of new accounts opened was 62,524, against 57,851 in 1879, the amount deposited 186,694l, against 138,305l, and the amount withdrawn 144,700l, as compared with 111,825l, the net deposit, without the addition of interest, having been 41,994l, against 26,480l.

Cheque Bank .- As a result of the year's working, the accounts, which have hitherto shown a deficit, now exhibit a profit.

Anglo-Egyptian Banking Company.—Including the sum brought forward, the available profits for the half-year ended 28th February amount to 137,920l, out of which an interim dividend is announced at the rate of 7½ per cent. per annum, or 15s per share, leaving 77,920l to be carried forward. Owing to the changes which have taken place in the financial position of Egypt, there has been a large amount of capital seeking employment, and banking business has been carried on under somewhat disadvantageous conditions; but compensation has been found in the prompt liquidation of the bank's outstanding claims and the enhanced value given to all its

#### ASSURANCE COMPANIES.

British Fire Office, Limited.—Mr A. Broad, the official liquidator, has declared a second and final dividend of 10s in the pound to the creditors.

Caledonian Insurance.—At the annual meeting, owing to the date of balance having been altered from the 14th May to the alst December, the results reported were for a period of seven and a-half months only. The new life assurances for that period amounted to 200,206l, and the life assurance fund at the end of the year amounted to 653,346l. The net fire premiums were 55,426l, and the losses, 29,598l. From the profit on the fire premiums of 31,10s ner share was declared, navable in 35,426, and the losses, 23,536. From the profit on the fire account a dividend of 3l 10s per share was declared, payable in half-yearly instalments on the 1st June and 1st December. The fire funds, including capital, amount to 244,652l, and the total funds to 897,999l.

Northern Assurance. -The directors recommend a dividend of 11, and a bonus of 10s per share, in addition to an interim dividend of 20s already paid, on account of the year 1880. 50,000l is added to the fire reserve, which now amounts to 550,000l. It is recommended that a reversionary bonus of 11 10s per cent. per annum be declared upon all participation policies current on December 31 last for the five years ending that date.

Queen Insurance.—The directors recommend the same dividend and bonus as last year, together 17½ per cent., absorbing 31,500l; an increase of the reserves by 15,000l, and the carrying forward of 33,000l. For 1880 the fire premiums were 542,383l, compared with 491,942l in 1879, and after providing for all losses and expenses the surplus was 69,560l. Of this 15,000l has been added to the fire reserves, which now amount to 365,020l; 31,506l has been any exprepriated in a dividend and hours at the rate. has been appropriated in a dividend and bonus at the rate, together, of 17½ per cent. for the year, and 23,054l is carried forward. In the life branch 585 policies were issued for 292,137l, yielding in new premiums 9,252l; and the life fund has been increased to 354,006l. The total funds are 933,627l.

Scottish Widows' Fund.—During the year, 2681 new policies were issued, assuring 1,599,1451 with a premium income of 51,8031. were issued, assuring 1,599,145l with a premium income of 51,803l. The claims were 534,957l. The manager's report for the past seven years showed that the amount of funds at 31st December, 1880, was 7,413,267l; and the annual revenue 949,942l. The valuation of liabilities shows a surplus of 1,190,339l. The directors have declared a bonus of 1l 14s per cent. per annum upon participating policies in existence at 31st December, 1880; and also a contingent prospective bonus on policies which become claims before 31st December, 1887.

NEW COMPANIES AND CAPITAL.

American British, and Colonial Insurance Company, Limited. Capital 1,000,000l in 5l shares, of which 100,000 constitute the first issue, 25,000 of these being reserved for New York and Montreal. The company has been formed to carry on a fire insurance business

in England, America, the Colonies, and elsewhere, and two firms in New York and Montreal are willing, it is stated, to introduce to the company their existing businesses, without payment other than the ordinary commission as insurance brokers.

Athinson, Topeka, and Santa Fé Railroad 4½ per Cent. Bonds.—Messrs. J. and A. Scrimgeour will receive subscriptions for \$1,000,000 at the price of 2021 per \$1,000 bond, equal at the present sterling exchange to about 97 per cent. The total issue, it is stated, is \$5,500,000, the balance having been subscribed in America. In adddition to being secured on the property of the company, the bonds are collaterally secured by a deposit with the Boston Safe Deposit and Trust Company of an equal amount of 6 per cent. bonds of the Rio Grande, Mexico, and Pacific Railroad, and of the Rio Grande and El Paso Railroad Companies, which are extensions of the Atchison, Topeka line. The principal is repayable 1st October, 1920, by means of a sinking fund.

Cape of Good Hove 4 per Cent. Debentures.—The Crown agents Athinson, Topeka, and Santa Fé Railroad 41 per Cent. Bonds.

Cape of Good Hope 4 per Cent. Debentures.—The Crown agents invite tenders for 2,000,000l, in bonds of 1,000l, 500l, 200l, and

100l each, repayable at par by annual drawings of 1 per cent. per annum. The debentures will be allotted to the highest bidders but no tender will be accepted below 95½ per cent.

English Bank of the River Plate, Limited.—Capital 1,500,000l; first issue 1,000,000l in 20l shares of which 16,500 are stated to have been already subscribed for and applications are now invited for the belong of 23,500 shares. It is intended to establish a for the balance of 33,500 shares. It is intended to establish a bank at Buenos Ayres, and elsewhere on the River Plate. The head office will be in London.

Great Hewas Tin Mines, Limited .- Capital 100,000l, in 1l share of which 33,333 shares are reserved for part payment to the vendors at the option of the Company, and the remainder are now offered. The Company is formed for the purpose of acquiring and developing some tin mines near St Austell, Cornwall. The property consists of about 300 acres, held under two mining leases of

perty consists of about 300 acres, held under two mining leases of 21 years each.

Kimberley North Block Diamond Mining, Limited.—Capital 110,900l in 11,000 ordinary shares of 10l each, and 900 founders' shares of 1l each. Applications are now invited for 6,000 of the ordinary shares. It is intended to acquire and work some diamond mining property in Griqualand West, South Africa.

London and North Western Fire Insurance, Limited.—Capital 1,000,000l in 10l shares of which, it is stated, it is only intended to issue 40,000 shares. The present issue is 16,000 shares which are offered at a premium of 10s per share, the balance of the 40,000 shares having been privately subscribed for. The company was established in March, 1879, as the North-Western Insurance Company, Limited, and has paid two five per cent. dividends. It is stated that the increasing business has rendered it advisable to raise further capital.

stated that the increasing business has rendered it advisable to raise further capital.

National Telephone Company, Limited.—Capital, 600,000l, one-fourth of which is in 15,000 6 per cent. cumulative preference shares, of which 2,780 fully-paid are to be issued as part payment to the Provincial Telephone Company, the Scottish Telephonic Exchange and Messrs D. and G. Graham, of Glasgow, and the remaining 12,220 shares of this class are now offered for subscription. The ordinary capital is 450,000l in 5 shares, which are to be issued fully paid and allested to the United Telephone Company. issued fully paid and allotted to the United Telephone Company, and the Provincial Telephone Company. The undertaking is formed to work existing telephonic exchanges, and to establish others under the license of the United Telephone Company. The company has been promised on behalf of the Postmaster-General agreements under which telephonic exchanges will be worked in west of the principal Scottish toward and less these in the Northern most of the principal Scottish towns and also those in the Northern and Midland districts.

Par Great Consols, Limited.—Capital 100,000l, in 1l shares. It is intended to acquire some mining properties near St Austell,

Cornwall.

Simons' Reef Consolidated Gold Mining Corporation, Limited—
10 per Cent. First Mortgage Debentures.—Messrs Martin and Co. will receive subscriptions for 7,500 debentures of 10l each at the price of 12l 10s. The company's share capital is 170,000l in 1l shares, and the undertaking is formed to purchase six estates in the South Wynaad district.

Victorine Gold Mining, Limited, 10 per Ccnt. First Mortgage onds.—The issue is announced of 100,000 bonds of 1l each, redeemable at 2l per bond. It is stated that 40,145 bonds are already subscribed for, and the balance of 59,855 are now offered. It is proposed to purchase some gold mines in Nevada.

#### THE COTTON TRADE.

LIVERPOOL.-MAY 26.

LIVERPOOL.—MAY 26.

Cotton has been in good demand throughout the week, and quotations show a further slight advance. In Sea Island the business is still moderate, and quotations are partially reduced be per lb. American has been in fair demand, and prices have gradually handened, quotations showing an advance of hid per lb. In Brazilian a fair amount of business has been done at hid per lb. Egyptian continues in good request, and quotations of brown are advanced hid per lb. West Indian and African are steady. Peruvian has been in fair request, and prices are firm at the quotations. For East Indian there has been rather more inquiry, and prices have had a hardening tendency. Quotations are generally advanced hid per lb.

and prices have had a hardening tendency. Quotations are generally advanced \( \frac{1}{16} \) d per lb.

"Futures."—The market during the week has been inactive, but firm, and quotations show an advance of \( \frac{1}{16} \) d per lb for the near, and \( \frac{1}{16} \) d per lb for the distant months. The latest quotations are—Delivery: American, any port, l.m.c., May, 6d; May-June, 6d; June-July, 6d; July-August, 6\( \frac{1}{16} \) d; August-September, 6\( \frac{1}{2} \) d; October-November, 5\( \frac{1}{16} \) d; November-December, 5\( \frac{2}{3} \) d; December-January, 5\( \frac{2}{3} \) d per lb.

The sales of the week amount to 63,350 bales, of which 3,890 are on speculation, and 4,940 declared for export; the forwarded is 17,270 bales, of which 11,370 are American, 1,200 Brazil, 1,100 Egyptian, and 3,600 bales Surat, which make the takings of the trade 71,790 bales.

the trade 71,790 bales.
2,300 bales American have been deducted from the stock, the

cotton having been burnt.
27th May.—The sales to-day will probably amount to about

10,000 bales, with a steady market.

Saturday, the 4th, Monday, the 6th (the Bank Holiday, and Tuesday, the 7th June, will be close holidays in the Cotton PRICES CURRENT.

#### MANCHESTER, MAY 26.

MANCHESTER, MAY 26.

There has been a fair steady business done during the week for home and smaller foreign markets. In export yarns the demand has mainly been confined to Italy and the Levant; for the East little has been done. Manufacturers have also shown little disposition to operate; offers have not been wanting, but sales disposition to operate; offers have not been wanting, but sales have been limited, owing to the advanced views of spinners. In cloth a fair inquiry has been met with, but in no department have sales been extensive. Quotations have advanced, and buyers find it impossible to operate on such advantageous terms as were possible a week ago. To-day the market is strong, and full prices are held for; less than an average business, however, has transpired.

BOMBAY, May 5th.

In piece goods rather more business has been done since our last mail left, the recent decline in values having induced the Futteypore buyers to place some orders on the market, the clearances from the bazaar during the past week have therefore shown some increase, and may be estimated at about two thousand packsome increase, and may be estimated at about two thousand packages; at the same time prices have been less irregular, though as yet no better. The principal demand has been for the medium and better makes of shirtings; but there are as yet no signs of any improvement in the position of jacconets, mulls, and printers, which continue very depressed, and difficult of sale. There has again been a fair inquiry for shirtings for forward shipment, but the rates offered are with the recent fall in exchange, below the level of manufacturers' ideas, who being at present well under contract, seem disinclined to go on at lower rates, notwithstanding contract, seem disinclined to go on at lower rates, notwithstanding the fall in the value of the raw material.—Bombay Exchange Market Report.

#### THE WOOL TRADE.

During the last few days there has been more inquiry in London for English wool, and a considerable amount of business has been done where low prices would be taken. Rather more money is, however, asked now, and in some instances given.

As the colonial wool sales progress, there is certainly a tendency towards greater firmness visible in various directions. It must be remembered that after the continuous fall of the past twelve months prices are really low, and the belief that the lowest has been touched caused buyers to operate more freely. Foreign buyers continue to compete with spirit for the wool offering.

Our Liverpool correspondents report that the principal feature of interest in their market has been the third series of East India wool auctions for the present year, held from the 24th to the 27th inst., and comprising a total of 13,611 bales. There was a good attendance of home and continental buyers throughout, and their competition, if not brisk, has been very steady. Prices have ruled, generally speaking, on a par with those of the March series, with the exception of Kandahar classes, which have realised here and there a slight advance. The total quantity sold is about 11,000

The Bradford wool market is still strong, although the tone of business is a little more subdued than on Monday. After the buoyancy in values then, it is natural that rather higher quotations are asked to-day, but there are not quite so many or such anxious buyers. Irish and Kent and strong wether skin are the most saleable descriptions. An advance of about three-farthings a pound from the bottom has been established, and fashionable wethers are now worth about a shilling a pound. No new wool is coming to hand yet, not even from Ireland, where the clip is unusually late. Mohair maintains full rates. In yarns the shipping houses are a little dissappointed that their orders are not more numerous. There has certainly been more business doing since last week, but the advanced quotations which spinners have succeeded in establishing are not freely responded to. Spinners' prices have followed the upward movement in wool, but buyers are unwilling to pay more than they paid on Monday. At that figure business may be had, but spinners who have sold are not willing to take it, and up to dinner time a good many transactions were still hanging fire. The Botany spinners are getting rather better engaged, especially in coating yarns, and the course of the London sales enables them to put up their quotations. The piece trade is altogether a little more cheerful, and orders for the home trade especially have become more numerous. For the East also business continues fairly good. The Continental markets are still very unsatisfactory in the amount of our goods which they take.

Melbourne, April 9th.—Messrs Goldsbrough and Co., in their monthly circular, report that, "The quantity coming forward during the month has been limited, and confined chiefly to oddments of clips and small lots of country secured in ordinary to average condition. The demand throughout has been active, notably from the local manufacturers, and about 550 bales of all descriptions have been quitted by auction and private contract, at fully late quotations. Reports from different pastoral districts continue favourable, he business is a little more subdued than on Monday. After the buoyancy in values then, it is natural that rather higher quotations

tanks in the back country, and causing a fresh spring in the grass. The prospects, therefore, of the coming seen at present, on the whole, gratifying. of the coming clip are

#### IRON AND COAL TRADES.

In the Glasgow pig iron market the fluctuations in warrants have this week, as last, been within narrow limits, but on the whole the tone has been a shade firmer. On Friday, last week, the quotation was 45s 2d; yesterday it was 45s 9d. There has been no increase in shipments, and stocks continue to grow. In the New York quotations for Scotch iron, as telegraphed, there is no

From the Cleveland district trade is reported to be pretty much the same as last week. If there is any change at all it is for the better, with the one exception that orders for finished iron are said better, with the one exception that orders for finished iron are said to be somewhat scarcer. In the Tyne district business in crude iron has improved a little. The shipbuilding yards are still actively employed, but as the wants of the builders have been pretty well supplied plates have fallen slightly, and the rolling mills are not working so actively. At Birmingham, although orders cannot be said to be more plentiful, the market is steadier, and if anything stronger. Makers of finished iron have been able to obtain a slight advance in prices. The inquiry for sheets also is improving, and as in some branches merchants' stocks are low, it is thought that an increased demand would quickly tell upon prices. Sheffield advices also speak of a slight improvement. At Wolverhampton, too, more business has been done. In South Wales, on the other hand, the dulness has become more pronounced, steel works, however, still having plenty of work. Next week Messrs Crawshay's works at Cyfarthfa will be stopped, in order that they may be adapted to the make of Bessemer steel.

The trade in house coals is everywhere affected by the warmer weather, but for steam and gas coal the demand is well sustained, and prices show very little alteration. In the London market the supply of house coal is small, and foreigh prices are maintained.

#### THE CORN TRADE.

MARK LANE, FRIDAY EVENING.

The weather on the whole has been favourable for agriculture. Rather more rain would have been desirable, but there has been Rather more rain would have been desirable, but there has been sufficient to be productive of much good, and the crops are making steady progress. On the Continent the weather has been, if anything, more favourable than here, and the reports with regard to the prospects of production read for the most part very promisingly. The statistical position has not varied much. Imports of wheat and flour into the United Kingdom last week amounted to 335,800 quarters, and farmers' deliveries to 113,600 quarters. The aggregate fresh supply was, therefore, nearly 450,000 quarters, differing but little from the preceding week, and keeping fairly up to average requirements. From America the shipments, whilst still small, have slightly increased, and the quantity of wheat and flour on passage, which now amounts to 2,385,000 quarters, is also slightly increased. These changes are, however, altogether too trifling to influence the market, in which there appears to be a firmer feeling gaining ground. The small stocks, considered to be in the hands of farmers, as well as in granary, the probability of a late harvest, and the hardening of prices on the Continent, as well as in America, are cited mainly as conducing to the firmer tendency. No appreciable advance is, however, obtainable either on the spot or forward. Off coast to-day a cargo of No. 2 Californian sold at 45s 10½d, United Kingdom price for Havre. May shipments of No. 2 American red winter all quoted 47s 6d; June, 46s 3d; July-August, 44s 6d, usual c. f. and i. terms to the United Kingdom. Flour remains very dull of sale, and America still ships freely. Prices are not, however, any worse. sufficient to be productive of much good, and the crops are making 47s 6d; June, 46s 3d; July-August, 44s 6d, usual c. f. and i. terms to the United Kingdom. Flour remains very dull of sale, and America still ships freely. Prices are not, however, any worse, and during the last day or two there has been a little more inquiry, though so far without much result. Barley is steadily held, and supply moderate. On the spot firm rates are required, and for Danubian prompt shipment 24s is quoted. American maize in all positions has ruled firm. On the spot, prices at Mark Lane are the turn higher at 24s 6d to 24s 9d. Off coast, there is only one cargo, for which 25s 6d is required. May shipments are worth 25s 3d; June 24s 6d to 24s 7½d. Round Maize is very dull, and lower than flat corn, which is very unusual. Sulina, cost, freight, and insurance, is quoted at 24s. Oats have arrived largely in London this week, and prices have receded 3d to 6d per quarter. In agricultural seeds there is not much passing, but prices are generally steady. Canary seed is firm and meets attention.

#### NEW YORK, May 13.

New York, May 13.

The changes in the flour market have been quite unimportant during the week. The demand has continued moderate, the supplies not excessive, some of the low grades are still scarce, and prices vary but little; the tendency, however, being slightly upward for the grades most in request. Rye flour, in better supply, shows further depression. Corn meal is still scarce and held higher. The wheat market has been quite variable in tone and prices. Extremely low rates of ocean freights—1½d per bushel to Liverpool, and 2d to London and Glasgow—have continued to stimulate the current export demand, but the speculation in futures has felt the effect of a probable accumulation of supplies in June, and of improving crop reports. Indian corn on the spot ruled firm until yesterday, when there was a decline, and the whole market was depressed. Exporters held off, and the prospect of the early arrival of large quantities from the Canal had a tendency to unsettle the market. Rye has brought full prices, but has not sold in large quantities. Barley is entirely nominal. Oats have been without important changes.

The following are closing quotations:—Flour, No. 2, \$3.25 to

### COLONIAL AND FOREIGN PRODUCE MARKETS. FOR REPORT OF THIS DAY'S MARKET SEE "POSTSCRIPT," MINCING LANE, FRIDAY.

SUGAR.—The trade have taken large supplies, and there has been a renewal of speculative operation in low brown sorts, the latter showing 6d advance. Since Friday the same improvement paid in many other cases, and refined pieces have risen 9d to 1s per cwt, with a very active demand. French loaves are dearer. per cwt, with a very active demand. French howes are dearer. The business in West India to yesterday amounted to 1,592 casks, with about 2,000 barrels and bags, part by auction. Barbadoes 24s 6d to 26s 6d; fine crystallised, 29s to 30s 6d; Jamaica, 20s to 25s per cwt. The landings in the four ports of the United King-25s per cwt. The landings in the four ports of the United Kingdom last week were about 25,100 tons; against 15,300 delivered; consequently, the stock increased by about 10,000 tons. Deliveries to date exceed those of 1880 by 13,000 tons. The beet sowings are late, owing to the dry weather, but a larger area of land is under cultivation.

to 15s 6d in baskets.

Jaggery.—Sales of Palmyra on the spot at 15s to 16s.

latterly at 16s 6d; low at 15s to 15s 6d; 300 tons superior to an Institute Special Constant Constant Special Constant Constant

arrive at 19s.

China.—23,000 bags brown Formosa at 16s, and 1,400 tons to arrive at about 16s 9d.

Other Foreign.—200 tons Maroim have sold at 22s. 334 casks 76 barrels grocery Porto Rico by auction went at 25s to 27s. 2,647

bags Bahia sold at 19s 6d to 21s for brown.

Floating Cargoes.—Three of British West India at 22s to 22s 9d; one of 2,200 bags Maroim at 21s 6d for the United Kingdom; two of Bahia, distant shipment, at 21s 6d and 22s 3d, and others not reported.

-There is now little offering, and the quotation partly nominal.

Refined.—The trade have taken large supplies of pieces, and the market yesterday was almost cleared. Quotations show 9d to 1s advance on last week's. Dry goods rather dearer. A large business in French loaves. Le Baudy, July, 30s; June, 29s 9d; Say's, July, 30s 6d, f.o.b. An active demand in the Clyde at some advance.

Rum.—Reported sales include about 450 puncheons Jamaica;

Rum.—Reported sales include about 450 puncheons Jamaica; prices not given. The market is steady.

Cocoa.—A quiet feeling prevails in this market, and part of the limited supply at auction on Tuesday had to be taken in. Prices occasionally favoured the buyers. 1,101 bags Trinidad about three-fourths sold; middling to fine at 74s 6d to 87s; ordinary greyish and mixed, 65s 6d to 69s 6d. 320 bags Grenada, 60s 6d to 66s. 109 bags Carupane withdrawn at 90s. 674 bags Guayaquil at 67s to 76s, a few selling at 70s per cwt. 106 bags African withdrawn.

drawn.

drawn.

COFFEE.—More general inquiry has prevailed, colory and fine Coffee obtaining about 2s per cwt advance. The Brazil advices are not of a nature to inspire confidence, although prices of Rio and Santos have reached a very low point. 759 casks 159 barrels 190 bags Plantation Ceylon, by auction, all sold, the latest quotation being as follows: low middling to middling palish, 74s to 80s; middling dull to colory, 81s to 87s; good mid-

dling to fine colory, 87s 6d to 95s; bold, 96s to 108s; a few lots very fine up to 114s. 138 cases 827 bags East India sold steadily; low to middling grey, 71s to 78s 6d; colory middling dull to good middling, 80s to 88s; good to fine Coorg, 90s to 96s 6d. Naidoobatum: medium, 88s 6d; bold, 101s 6d. 76 half-bales Mocha sold at 102s for greenish mixed small berry. 400 bags very low Singapore withdrawn at 45s. 7 casks 41 barrels 9 bags Jamaica part sold; middling, 77s; mixed, 57s to 60s 6d. 13,053 bags foreign partly found buyers; Costa Rica, ordinary to fine ordinary greenish, 55s to 62s; low middling to good colory, 63s to 80s; fine. 81s to 91s 6d. Washed Rio: pale grey, 67s. Colory Central American, 54s; fine ordinary greenish, 60s to 60s 6d. Guatimala, 53s 6d to 63s 6d; middling to good, 67s to 74s 6d. Several parcels of Plantation Ceylon have sold by private contract; also of Jamaica at 46s to 50s per cwt, and a moderate business reported in foreign descriptions. A good business has been done in Rio by private contract.

packages.

packages.

RICE.—Cargoes of Burmah have sold at 1½d to 3d decline, but a good business done, including four of Rangoon about 4,600 tons at 8s 9d to 9s, open charter; one of 1,200 tons Necrancie Arracan, April, at 8s 6d; one of 1,900 tons, June, at 8s 8¼d, open charter; one of 940 tons Bassein at 8s 9d, April, open charter. On the spot, 13,000 bags Necrancie Arracan at 8s 3d, and 13,000 bags old Rangoon at 7s 9d, ex ship. 700 to 800 tons Raree Bengal at 7s 6d; and 13,000 bags Port Canning at 7s 9d. 800 tons Madras old, 7s 1½d. 13,000 bags Port Canning at 7s 9d. 800 tons Madras to arrive at 8s 1d to 8s 2½d per cwt new crop, ex quay terms.

to arrive at os in the sequence of the control of t o 516d per lb for Singapore.

WHITE PEPPER is firm and rather dearer. Of 295 bags Singapore by auction 55 bags good fair sold at 7d per lb. Several sales reported by private contract at 613d to 65d per lb. The deliveries

Sago Flour is dull. 2,041 bags Borneo withdrawn at 15s 6d to

15s 9d per cwt. 2,263 bags Singapore flake part sold at ea

from 13d to 23d. Of 1,397 bags pearl about 800 bags sold: bullet, 18s; medium, 16s 6d; ditto, inferior colour, 15s to 15s 6d; seed, 17s to 17s 6d per cwt.

TAPIOCA FLOUR .- 587 bags Singapore withdrawn at 13d to 21d per lb.

TAPIOCA FLOUR.—587 bags Singapore withdrawn at 1½d to 2½d per lb.

OTHER SPICES.—53 cases Penang Nutmegs about one-fourth part sold at easier rates, viz., 84's, 2s 8d; 86's, 2s 7d; 164's, 1s 10d. 35 cases and boxes Java part sold at 2s 8d to 2s 9d for 78's. 10 cases Penang Mace yesterday were bought in above the value. 458 packages Zanzibar cloves partly found buyers at a fall of ¼d to ½d; common to fair, 10¾d to 11¼d; one lot good bright, 11¾d per lb. 157 bales Clove Stems part sold at the reduced price of 3d. The quarterly sales of Cinnamon are on 30th inst., and will contain about 3,700 bales Ceylon and 370 packages Tellicherry. 200 cases China sold "without reserve" at 2½d per lb for low quality. Some business has been done in Cassia Lignea at 35s to 35s 6d. 389 cases 210 bags Cochin Ginger chiefly sold at irregular prices: scraped, at 40s 6d to 46s 6d; small and ends, 35s to 38s; scraped, medium, 51s to 53s 6d; bold, 77s; fine bold, 100s to 101s; one case extrafine selected, 116s; washed, rather small, 31s to 31s 6d; rough, 28s 6d to 34s 6d; low and slight wormy, 26s. 109 barrels Jamaica partly sold at 66s to 90s per cwt. 613 bags Pimento partly sold at 4½d to 4¾d per lb, being again easier.

Stocks Price, Zanzibar per lb 10½d 11½d... 10½ 11½ ... 13 14 ... 11 12½ SALTPETRE.—The market has continued quiet, with prices nominal. Bengal, fine, 20s 6d to 20s 9d per cwt.

Imports and Deliveries of Saltpetre to May 21, with Stocks on hand. 1881. 1880. 1879. 1878.

nominal. Bengal, fine, 20s 6d to 20s 9d per cwt.

NITEATE OF SODA is inactive.

SHELLAC has been firm, and some kinds have advanced. The latest business includes good to fine second orange at 6l 10s to 7l, and similar quality to arrive at same prices. At the public sales on Tuesday, 1,027 chests about one-third part buyers; fine orange, 7l 15s to 8l 2s 6d; fine second orange at 6l 17s 6d per cwt, and other kinds at the quotations.

other kinds at the quotations.

Sticklac.—250 cases part sold at 79s per cwt, being lower.

Cochineal.—The market remains dull. At the public sales on
Wednesday, 650 bags Teneriffe were chiefly bought in, as the importers refused lower quotations. 43 bags sold at the previous value. Silver, 1s 8d to 1s 10d; black, 1s 8d to 2s 1d per lb.

MPORTS	and	DELIVERIES	of	Cochin	EAL	to Ma	v 21,	with 8	TOCKS	on hand	
				1881.		1880.		1879	. 1	1878.	
Impor	rted	be	ags	7,800		7,050		8,67	0	8,220	
Delive	ered.			4,670		5,020		6.300	3	6,580	
Stock				8.010		6 920		7 636	1	8.700	

Drugs.—Aloes steady; Cape very scarce. Star Aniseed quiet. Balsam Peru, only a few cases available. Bark: South American and East Indian Cinchona very little doing. Camphor also neglected. Cardamoms firmly held. Castor Oil quiet, but steady. Ipecacuanha, Rhubarb, and Musk also quiet, and quotations unchanged. Oil of Cassia and Oil of Aniseed steady. Opium still tending downwards.

METALS.—The state of business has experienced little change, but the tone is now more steady, with prices in favour of the sellers. Imported copper firm, and Chili dearer by 20s owing to diminished imports this year. There has not been any material alteration to report in tin, and the market is firmer; foreign, after selling at 851 5s cash, closing yesterday at 861 7s 6d to 871 7s 6d. The large production of Scotch pig iron the stock in Glasgrow for in excess of last year's 88 600 tone. keeps the stock in Glasgow far in excess of last year's, 88,600 tons less being shipped. There are reports of a reduction in the make. Sales at 45s 6d to 45s 9d per ton, cash. Manufactured iron steady. Silesian spelter quiet. Quicksilver firm. There has been more doing in lead.

HEMP .- Manilla has continued firm, but with diminished transactions at current high rates, including a few parcels to arrive at 47l 10s to 47l 15s, and in one instance 48l 5s. Zeba 48l. On the spot fair 47l to 47l 10s per cwt. 40 tons Russian by auction withdrawn. The latter descriptions are not influenced by the great rise upon Manilla.

JUTE.—Sales are reported in new fordelivery, of which no particu-ars given. Jute for distant arrival firm, but the market generally has become quiet, and the week's business does not exceed about 15,000 bales including D Davids at 18t for Dundee. Trade in the latter port keeps quiet, and goods are in many cases selling at rates hardly in proportion to those of the raw material.

LINSEED.—During the week a steady demand has been experienced for Calcutta seed at current moderate quotations, viz., 47s 3d to 47s 6d ex ship, 48s 3d to 48s 6d ex ware ouse, and 49s 3d May to July shipments via the Cape. Azov cargoes per steamer to the United Kingdom quoted 48s per quarter.

Olls.—There is not any movement to report in fish oils. Sperm nominal. Very low prices have been accepted for olive, including Mogadore at 33l; Levant, 35l per tun. The depressed quotations of cocoa-nut do not lead to any expansion of demand. Sales of Cochin at 30l 10s to 31l. There is a limited business reported in palm. The market for linseed is firmer, with more inquiry. On the spot, 25l 10s; barrels, 25l 15s to 25l 17s 6d; May to August, 25l 15s to 26l; last four months, 25l 10s per tun. English brown rape steady at about last week's quotations, viz., 27l 15s; last four months, 28l per tun. months, 28l per tun.

SPIRITS TURPENTINE.—The stock here and supply afloat is considerably less than at same time last year. Market higher, with speculative buying. To-day business at 32s to 32s 3d; last six months quoted 27s to 27s 3d per cwt.

Petroleum Oil. — Shipments are large and considerable supplies landing, but the increased deliveries keep the stock low. To-day it is 57,787 barrels, against 115,454 barrels in 1880 at same date. This morning's quotations are: on the spot, 6§d to 6§d;

forward, 6\frac{3}{2}d to 6\frac{3}{2}d; last four months, 7\frac{1}{2}d per gallon.

Tallow—There will be a supply of about 3,000 casks Australian in to-day's sales. New Petersburg, owing to scarcity, has advanced to 41s per cwt, at which relatively high price sales are of

very limited extent.

Tobacco.—Retail sales are only taking place, the principal enquiry is for Color. In substitutes the demand is very limited, and business leaves little to report.

#### POSTSCRIPT. FRIDAY EVENING.

POSTSCRIPT. FRIDAY EVENING.

SUGAR.—At the public sales crystallised West India sold at a further advance of 3d to 6d: Trinidad, 30s; Demerara, 28s 6d to 31s. Sales, 682 casks and about 2,500 smaller packages, making 2,609 casks for the week. 7,194 bags Manila withdrawn, at 15s 6d for Taal. 650 tons Jaggery to arrive; cane, 16s 6d; Palmyra, 15s 3d. 150 tons Penang in baskets at 15s 6d.

COFFEE.—387 casks 88 barrels 168 bags plantation Ceylon sold at full to rather higher rates for colory kinds. 205 cases 514 bags

Coffee.—367 cases 35 barrets 105 bags plantation Ceyson solid at full to rather higher rates for colory kinds. 205 cases 514 bags East India the same, ranging from 72s 6d to 100s 6d for low grey to fine bold, 2,825 bags foreign included: fine and superior Costa Rica at 91s 6d to 103s; fine Porto Rico at 90s; Guatimala and Central American, 56s 6d to 71s. 208 bags Manila withdrawn, also 204 bags African

RICE.—A cargo of Rangoon sold at 8s 9d open charter.

WHITE PEPPEE firm.

SHELLAC.—Further business at the advance.

METALS.—Scotch pig iron advanced to 46s 2d per ton cash.

Copper firm. Chili g.o.b., 58l 15s to 59l 2s 6d. Tin steady. Shipits of copper last 14 days included 800 tons bars and ingots.

Tallow.—3005 casks Australian by auction sold at firm prices to 6d advance. Fine beef, 34s 6d; mutton, 37s per cwt. No alteration in town tallow.

#### ADDITIONAL NOTICES.

ADDITIONAL NOTICES.

Tea.—The market for China teas is very quiet, and at the auctions on Thursday prices were in many instances in buyers favour. Common Congou is now quoted 6fd per lb, and good common 6fd to 7d. The Glencoe with the first new season's Monings passed Woosung on the morning of the 24th inst., and may be expected on the 1st or 2nd of July.—J. C. SILLAR AND CO. SILK.—The recent telegrams from Shanghai announcing a probable serious deficiency in the supplies for the new season have caused some excitement here. Blue elephants have advanced to 15s, and holders are indisposed to go on at that price. The European crop is still in progress; as yet no damage is reported.

European crop is still in progress; as yet no damage is reported, but the season is unusually late, and in such case there is always danger from any great heat in June.

LEATHER.—The transactions in most kinds of leather have b

more numerous during the past week than for some time; still, no improvement in value can be quoted. Light English butts, English bellies, shoulders, light dressing hides, and calf skins of light and middle substances continue in request and are scarce.

#### METROPOLITAN CATTLE MARKET.

Monday, May 23.—The total imports of foreign stock into London last week amounted to 15,760 head. In the corresponding

London last week amounted to 15,760 head. In the corresponding week of last year we received 22,700; in 1879, 15,018; in 1878, 14,376; in 1877, 10,046; and in 1876, 23,711 head.

Supplies of cattle were not large. The prices realised for the best breeds were 2d and occasionally 4d per 8lb higher, the top price for the best Scots being 5s to 5s 2d per 8lb. The foreign side of the market was sparingly supplied, and a few Spanish sold steadily at full prices. The sheep pens were fairly well filled, and prices were quite as high as last week. The best Downs and half-breds realised 5s 10d to 6s per 8lb. Lambs were steady at 8s to 8s 6d per 8lb. Calves and pigs sold at previous currencies.

# INVESTOR'S MONTHLY MANUAL.

(NEW SERIES-ENLARGED.)

#### TO OUR READERS.

It has been found desirable to extend very considerably the information contained in the

#### INVESTOR'S MONTHLY MANUAL.

Numerous additions have still to be made to the Stock and Share Lists, Notices and Reports, Lists of New Companies, &c.; and it is thought expedient to meet the wishes of subscribers by largely extending the Traffic Tables, so as to include American and other Foreign Railways, and Telegraph and Tramway Companies' Returns.

It is intended, moreover, to give each Month the Opening as well as the Final Quotations of all Securities, and to comment in considerably greater detail upon the prominent Investments and Speculations of the day.

The Proprietors hope by these additions (commencing with the July Number) to make the Manual, which is already by far the most complete periodical record in existence of the matters with which it deals, still more useful to Investors.

As these extensions will add much to the bulk of the paper, it is considered desirable that it should be issued Cut, Stitched, and Enclosed in a Wrapper, as the Double Numbers now are.

The change of form and increase of size will make it necessary to alter the price, which, from and after JULY NEXT, will be is (exclusive of postage).

The YEARLY SUBSCRIPTION-Double Numbers included-will be 14s 9d, post free.

Current Subscriptions will be credited with the balance remaining at the end of June, and an account for the excess charge will be forwarded.

#### HUBBUCK'S PATENT WHITE ZINC PAINT

Is the most durable and beautiful paint known, does not stain or discolour with the atmosphere of large towns, and is cheaper in use than White Lead.

Each Cask of Pure White Zine is Stamped—"HUBBUCK'S, LONDON, PATENT."

HUBBUCK'S PREPARED LIQUID PAINTS.

These Paints are packed in 1 lb, 2 lb, 3 lb, 7 lb, and 14 lb tins, and will be found of great advantage. Being mixed ready for immediate use, no further preparation is needed. This prevents the waste of carrying stiff Paint,

Oil, Turpentine, &c.

HUBBUCK'S PALE BOILED LINSEED OIL

Being much purer than raw Linseed Oil, is the only boiled Oil that can be used for White and delicate coloured Paints. It dries quick and hard.

#### HUBBUCK'S ANTI-OXIDATION COMPOSITION

For coating Iron and Wood Ships' Bottoms; a preservative against fouling and corrosion. This composition is ready for immediate use, and is applicable to all the purposes of other paints.

HUBBUCK'S WHITE LEAD, COLOURS, OILS, AND VARNISHES

Are the Best and therefore the Cheapest, and are properly packed for Exportation to all Climates.

THOMAS KUBBUCK AND SON, 24 LIME STREET, LONDON.

# THE ATCHISON TOPEKA, AND

ISSUE OF \$1.000,000

(Part of a total Issue of \$5,500,000, the backnee having been already issued in America) Four and a Half per Cent. Bonds of this Company, secured by a deposit with the B. ston Safe Deposit and Trust Company of an equal amount of Six per Cent. First Mortgage Bonds of the after mentioned Companies constituting extensions of this Company's system.

Interest payable half-yearly on the 1st April and 1st

The principal repayable 1st October, 1920.

Subscription price, £202 per Bond of \$1,000, equal at the present stering exchange on New York to about 97

per cent.

The current interest from 1st April is included in the

price.
The subscription price is payable as follows:—£:0 an application, £192 on the 8th June, 1881, when the Bonds will be delivered—total. £202.

Bonds will be delivered—total, £202.

Mesers J. a d.A. Serimg-our are prepared to receive subscriptions for \$1,000,000 Boods of the Atchison, Topek, and Santa Fé Railroad Company, colla erally, secured by deposit with the Boston Sa e Deposit and Trust Company of 6 per cent. First Mortgage Bonds of the Rio Grande, Mexico, and Pacific Railroad Company, upon its Western and Southern Division, and of the Ro Grande and El Paso Railroad Company upon its deposition, and the second company is second to the Atchison, appears and Santa Fé Railroad Company's system.

ystem.

The Bonds, therefore, have the double security of the arent company and the extensions, on which latter is deposited Bonds have a First Mortgage.

the deposited bound have a risk adverges.

The Atchison, Topeka, and Santa Fé Rairoad Company is well known as one of the great rairoad systems of the United States, and by means of the extensi as alors referred to is brought into connection with the Merican Central System of Railroads.

The following is the result of the operations of the tehison, Topeka, and Santa Fé kailroad Company for

Gross earnings		8,556,976
Net Sundry eredits	\$1,182 687 120,148	4.302,837
Which was apriled thus;— Interest, rentals, &c Dividends at 7½ per cent Sundry credits		3,361,120
Surplus after payment of d		051 717

The total length of this Company's system is 1,770 miles.
Its bonded d-bt is \$28,500,000 (height)

out \$16,100 per mile.)
ts stock is \$27,800,000 (being at the rate of \$15,700

per mile)
The \$100 Shares are quoted at 144 on the Boston

xchange. The Head Office of the Company is in floston.

The object of the loan of \$5,500,000, of which the 1,000,000 new offered forms part (the talance having een already subscribed), is the construction of the extension Lines before referred to.

Extension Lines before referred to.

The Bonds secured by the 1st Mortgage on these Extension Lines, which constitute the collateral security for the present issue, are deposited with the Boston Safe Deposit and Trust Company.

The interest (6 per cent.) on the Collateral Ronds so held in trust by this Company is to be applied:

(1.) In payment of interest on the Bonds of the present issue as it becomes due.

(2.) To provide a Sinking Fund for the redemption of those Bonds.

Any helayee not needed for these purposes is to be

of those Bonds.

Any balance not needed for these purposes is to be paid to the Atchison, Topeka, and Santa Fé Rai.road Compans for its own use.

The Sinking Fund to be sufficient to purchase from year to year, at not above par and interest, the following amounts of Bonds:—

In each of the first 10 years, 11 per cent. making 100 In each of the first 10 years, 11 per cent.

" second n 2 n

" third n 3 n

" fourth n 3 n

" years.

By the terms of the Trust Deed under which the Bonds are deposited the Sinking Fund is to be applied (1), in the purchase of Bonds at not above par, or (2), in their redemption by drawings.

As the bonds have—

() The direct and unconditional security of the Atchison, Topeka, and Santa Fé Railroad Company.

(2) The collateral security of the First Mortgage Bonds on the Extension Lines, it is difficult to conceive a safer security as an Investment.

The Bonds wil he to hearer of \$1.000 each with Coupons attached for interest from 1st April, 1881, the first Coupon, therefore, maturing on the 1st October, 1881.

But Coupon, therefore, maturing on the 1st October, 1881.

For the convenience of those desiring to have Registered Certificates, instead of Bearer Bonds with Coupons, the latter (called by way of dissiluction Coupon Bonds) are convertibe, at the option of the holders, in amounts of 5 Bonds or multiples thereof, into Registered Certificates of \$5,000 each of the same period an rate of interest, which Certificates are not to be drawn on account of the Sinking Fund until the Coupon Bonds shall all have been paid or drawn; but such Certificates, if offered by the holders, are purchaseable on account of the sinking Fund on like terms with the Coupon Bonds. Such Certificates cannot again be converted into Coupo. Bonds.

Subscriptions will be received at the National Provincias Bank of England, Limited, 1 2 Bishepsgate Street, E.C., ar branches, accompanied with the deposit of £10 per Bond on the Bonds applied tor.

When no allotment is made the deposit will be returned in full. In case a less number of Bonds be allotted than is applied for, the surplus of the deposit

will be applied in whole or in part, as the case may be, to the payment of the amount due on allotment.

to the payment of the smount due on allotment.

Copies of the Bond and Coupon of the Atchison, Topeka, and Santa Fé Railroad Company, and also of the Mortgage Deed under which the Bonds on the Extension Lines are secured, and the Abstract of the Trust Deed, under which the latter are deported with the Trust Company as collateral security for the Bonds of the present issue, can te inspected at the Office of Messus Ashurst, Morris, Crisp and Company, No. 6 Old Jewry, London.

Prospectuses and Forms of Application, and the Company of Application of the Company of Application, and the Company of Application of the Company of the Company

ewry, London.

Prospectuses and Forms of Application can be obtained of Messre J, and A. Scringgour, at their fiftees. No. 18 Old Blood street, London, E.C., and at he National Provincial Bank of England.

The Subscription List will be opened on the 28th, and will close on or before the 31st May, 1881.

In the event of the subscriptions exceeding the full mount offered a provata allotment will be made.

No. 18 Old Hr ad street,
London, 25th May, 1881.

ubscriptions will be received by Messrs Martin and Co., 68 Lombard street, London, for the following ISSUE of 7.500 FIRST MORTGAGE DEBENTURES of £10 each, redeemable at the expiration of five years, at £12 10s each, being a premium of 25 per cent. Bearing interest at 10 per cent. per annum, payable half-yearly, the principal and interest being primarily secured by an absolute first-charge upon the whole of the property of the Corporation, the interest being guaranteed for the first two years by a deposit of the amount by the vendor in the names of the Trustees.

vendor in the names of the Trustees.

THE SIMONS' REEF CONSOLIDATED GOLD MINING CORPORATION, Limited.

Share Capital £170,000, in 170,000 shares of £1 each, of which \$5,000 are already applied for; \$5,000 (fully paid up) are accepted in part payment for the properties; \$7,500 are sat aside for subscription prior to July 25th, 1881, by the debenture holders at their option (at par) in the proportion of five shares for each debenture; the remaining 42,500 shares being held in reserva for issue at such times and at a premium or otherwise as the Directors may deem advisable.

advisable.

With each Debenture will be issued, by way of bonus, a certificate to bearer, entitling him to a participation in the receipts of the Corporation derivable from its half-share of profits from a the working of the Carta Para Gold Mining Company, Limited. The certificate will be in such form as not to create or constitute a partnership.

The Debentures are payable as follows:
£1 per Debenture on application, £4 um allotment, £5 on July 25, 1881.

Registered Offices—No. 103 Cannon street, E.C.

This Corporation has been formed for the purchase, working, and (as regards four properties) resale or six Estates situate in Vythery South Wynaad.

To secure the debenture-holders, the whole of the properties will be vested in the names of the trustes, and held by them under a deed of trust, subject to powers reserved to the corporation to dispose of the several estates or sections thereof to independent companies or purchasers, but upon condition that all moneys received by them from the sale of any one or of any sections of the estates, shall be paid forthwith to the trustees and retained until a sufficient amount be provided for the redemption of the debentures at \$12 los each.

The security to the debenture-holders is unexcen-

The security to the debenture-holders is unexceptionable, inasmuch as the value of the estates is calculated to be upwards of six times the amount of the total debenture capital.

It is not imperative that debenture-holders should apply for shares in the corporation.

apply for snares in the corporation.

Should any applicants not receive allotments, their deposits will be returned without deduction.

Application will be duly made to the Committee of the Stock Exchange for aquotation of the debutures in the official list.

Prospectuses, maps, and forms of application for the debentures may be obtained from the bankers; and at the offices of the Corporation, No. 103 Cannon street, London, E.C.

#### SIMONS' REEF CONSOLIDATED GOLD MINING CORPORATION (Li

SPECIAL NOTICE.

In consequence of the saccessful formation of the Carta Para Gold Mining Company (Limited) the Certificates to be attached to the Debentures now being issued may be regarded as extremely valuables. Should the lowest anticipated profit from the working of the Carta Para Estate be realised, the debenture-holders will receive, in addition to the interest and premium on their bonds, about £15,000 per annum, equivalent to a dividend of 20 per cent. upon each debenture, and it should also be observed that the income thus derivable by the holders of the certificates will not cease upon the redemption of the Debenture Bonds, but will continue during the existence of the Carta Para Gold Mining Company (Limited), which holds its estates for a period of 70 years.

SIMONS' REEF CONSOLIDATED GOLD MINING CORPORATION (Limited).
DEBENTURES may also be APPLIED FOR by letter, addressed to the Secretary, enclosing a remit-Letter, addressed to the Secretary, Lance of £1 per Debenture.

### CLOSE OF FORTY-SECOND YEAR OF THE LIFE ASSOCIATION OF

ALLOCATION OF FIVE YEARS' PROFITS.

\* Applications to be lodged before 31st May.

The Profits of the preceding five years will then be ascertained, and further Bonuses declared. The Bonus systems are materially different from those of other Offices, and are highly favourable to the Policy-

holders. In Class A3 (current series) a Policy effected at the Ordinary Premium payable during the whole of life is, by the application of Profits, transformed, after comparatively few years, into a Paid-up Policy, requiring no payments and no care to keep it in force, and retaining the right to future profits.

In Class B the Bonuses are applied so as to give the largest possible benefits to those assured who attain at least the average time of life—about half of the whole number of Policy-holders. This system has resulted in Bonuses of an amount absolutely unattainable under any other system.

Annual Revenue

Claims and Bonuses paid ..... 3,

SHIRTS.—FORD'S EUREKA.—
"The most perfect fitting made."—Observer.
Gentlemen desirous of purchasing shirts of
the best quality should try Ford's Eureka,
36s, 40s, 45s half-dozen.

# AGIDIUS.—THE ONLY NON-SHRINKING FLANNEL SHIRTS. Warm as wool, soft as silk, and very elastic. Patterns and self-measurement free.

R. FORD, 41 Poultry, London.

CAPE OF GOOD HOPE
Authorised by the Act of the Colonial Parliament,
No. 1 of 1881, to provide for the expenses of carrying
out Military Operations.
On behalf of the Government of the Cape of Good
Hope, the Crown Agents for the Colonies hereby
invite Tenders for Debentures representing £2,000,000
sterling, the amount of the Loan authorised by the
above-cited Act.
This Loan is secured on the general P.

above-cited Act.

This Loan is secured on the general Revenue of the Colony, and will be represented by Coupon-bearing Bonds of £1,000, £500, £200, and £100 cach, bearing interest at the rate of 5 per cent. per annum, payable half-yearly at the Offices of the Crown Agents for the Colonies in London, on the 1st June and 1st December.

L

B

Ca

half-yearly at the Offices of the Crown Agents for the Colonies in London, on the 1st June and 1st December.

The interest on this issue will commence from the 1st June, 1881, and the Principal will be repaid at par by Annual Drawings, to which I per centum per annum on the cumulative principal will be devoted.

The first drawing will take place in May 1883, for the period ending 1st June following, and will be conducted by a Notary Public in the presence of the Crown Agents for the Colonies, and of such of the Debenture-holders, as may be pleased to attend. The numbers and values of the Bonds drawn will be published in the Times and London Gaszette.

Tenders will be received by the Crown Agents, at their Offices, not later than One o'clock on Thursday, the 2nd June, when they will be opened in the presence of such of the applicants as may attend.

The Debentures will be allotted to the highest bidders, provided the price offered is not below \$95\$ los in money for every £100 in Debentures, payable as follows:—

bidders, provided the price offered is not below £95
10s in money for every £100 in Debentures, payable
as follows:—
£5 per cent. on application, and so much on
Allotment as will leave £75 payable as follows:—
£50 per cent. on the 22nd June, 1881, and
£25 per cent. on the 22nd June, 1881, and
£25 per cent. on the 22nd July, 1881.
Payments may be made in full on Allotment, or on
any of the foregoing dates, at a discount at the rate
of two per cent. per annum.
Tenders at a fraction of a shilling other than
sixpence will not be preferentially accepted, and
should the equivalent Tenders exceed the amount of
the Debentures to be allotted a pro rata distribution
will be made.
After payment by the Allottees into the Standard
Bank of British South Africa, Limited, Bankers by
appointment to the Cape Grvernment, Clement's
Lane, Lombard Street, of the instalment due on
allotment, they will receive at the Offices of the
Crown Agents for the Colonies, in exchange for the
Banker's Receipts, Scrip Certificates to bearer, which
will be exchanged for Debenture Bonds at the same
place, before the first Coupon folls due, of which due
notice will be given.

Forms of Tender, and Prospectus showing the
financial condition of the Colony, may be had on
application to the Crown Agents, or to their Brokers,
Messrs Mullens, Marshall, and Co., 4 Lombard street,
and Messrs J. and A. Scrimgeour, 18 Old Broad street,
and to the Standard Bank of British South
Africa, Limited.

The Act authorising the Loan is open to inspection
at the Offices of the Crown Agents for the Colonies.

In the last Session of the Cape Parliament, an Act
(No. 22 of 1890) was passed authorising a loan of
£531,400 for railway purposes, but owing to an informality in the wording of one of its clauses it was
deemed advisable to postpone offering the Debentures
to the public until the Act had been amended. A
Bill to effect this has been introduced in the Cape
Parliament, and will probably shortly become law.

H OLLOWAY'S PILLS.—
belious complaints and irregularities of the system, produced by redundancy of vitiated bile, can always be corrected by a few doses of these inestimable Pills, which are everywhere admired for their rare combination of mildness and power; for though they conquer with ease and rapidity the most obstinate disease, they never weaken the stomach or necessitate any interruption of ordinary duties or amusement. On the contrary, they increase the appetite, strengthen the organs of digestion, give increased energy and life to all the animal functions, and fit both hand and brain for fresh exertions. The sick and enfeebled may by a single trial speedily discover what a happy revolution these Pills have the power to effect in the human system.

#### BANK OF ROUMANIA.

Notice is hereby given, that the ORDINARY
ANUAL GENERAL MEETING of the Shareholders will be held on MONDAY, the 20th June
mext, at TWELYE o'clock (noon) at the Offices of the
Bank, No. 15 Moorgate street, E.C., to receive a
Report from the Central Committee, with the
accounts for the year ending 31st of December, 1880,
and to declare a dividend. Shareholders desirous of
being present or represented at the Meeting must
deposit their share certificates either at the Bank of
Romania at Bucharest, at the London Agency of the
said Bank, or with the Agents of the Bank at Paris or
Vienna, on or before the 6th June, in exchange for
which a voncher will be given entitling the holder to
admission to the Meeting.

The recent settlement of political disputes in the Argentine Republic, and the promising future of trade, appear to the directors to offer a favourable opportantly for establishing this bank, with the view of affording extended banking facilities for the large transactions now carried un between Buenos Ayres, and other places on the River Plate, and England, the principal European markets, and the United States of America.
The great staples of export from the River Plate, up to the present time, consist of wool, hides, and tallow, to which have lately been added wheat and linseed. Sugar also has now been successfully grown and manufactured, the transport to and from the rich provinces of the interior having been opened up by railway communication.
One of the principal elements in establishing successfully an undertaking of this nature is that the

rich provinces of the interior having been opened up by railway communication.

One of the principal elements in establishing suc-cessfully an undertaking of this mature is that the Direction should include members who have a practical knowledge of the business to be undertaken, and the Board are fortunate in this respect in having secured, as Managing Director a gentleman well known in banking circles in London and the River Plate, who until recently was for 13 years manager of one of the leading and most successful banks in the trade.

one of the leading and most successful trade.

The business of the Bank will embrace—opening deposit and current accounts, discounting trade bills, negotiating bills of exchange and other convertible securities, affording commercial facilities, and transacting all other tanking operations.

The Head Office and direction will be in London; branches will be opened at Buenos Ayres and elsewhere on the River Plate; Continental and Local Agencies will also be established when and where special and favourable opportunities offer.

OFFICES-5, Copthall buildings, E.C.

#### PROSPECTUS.

This Company has been formed for the purpose of acquiring and working a block, comprising an area of about five and two-thirds claims, situate on the northern side of the Kimberley Diamond Mine, in Griqualand West, South Africa. These claims are known to form one of the richest blocks in the mine. They adjoin on one side the claims of the Central Diamond Mining Company, Limited, and on the other the claims of the British Diamond Mining Company, Limited, and on the other the claims of the British Diamond Mining Company, Limited, The Central Diamond Mining Company has, for the past six months, paid two quarterly dividends respectively of 18 and 23 per cent., being at the rate of 82 per cent. per annum. The British Diamond Mining Company, Limited, has, for the rate of 48 per cent. per annum. The £100 Shares of the Central Company are now quoted at Kimberley at from £370 to £375 per Share, and the £100 Shares of the British Diamond Mining Company, Limited are quoted at Kimberley at from £270 to £280 per Share. These quotations are equivalent to a value of from £275 to £280 per Share. These quotations are equivalent to a value of from £25,000 to £39,000 per Claim.

The price to be paid by the Kimberley North Block Diamond Mining Company, Limited, for the claims it has contracted to purchase is, irrespective of the Founders' Shares, at the rate of about £16,000 per Claim, and thus contrasts favourably with the quoted value of the Shares of the adjoining Company represented an average value of 59 sper load of 16 cubic feet, and the report of the British Diamond Mining Company, The cost of extracting and washing is about 15 per load of soil raised.

The late Tompany. The cost of extracting and washing is about 15 per load of soil raised.

The Directors of this Company are confident that its out-put will be equally valuable. There is at present an accumulation of fallen reef which, it is estimated, can be removed in about two months from the commencement of the mining operations of the Company. Thus the Directors antici

mated, can be removed in account mining operations of the Company. Thus the Directors and preserved mining operations of the Company. Thus the Directors and preserved mining portant works now being executed by the Kimberley Mining Board, and moreover it is found that at a short distance below the surface of the claims the wall of the mine changes from a friable shale to hard igneous rock.

The claims contracted to be sold to this Company are held under transferable perpetual licences, granted by the Government of Griqualand West, at a royalty of £6 per annum, payable monthly, in respect of each claim.

The vendors who have formed this Company recently purchased these claims for the sam of £90,000, and they have contracted to resell them to the Company for £90,900, payable, as to £30,000 in 3,000 fully paid-up rodinary shares of £10 each, £30,000 in cash, and £300 in 900 fully paid-up Founders' Shares of £10 each, £50,000 in cash, and £300 in 900 fully paid-up Founders' Shares of £10 each, such Founders' Shares having the benefits explained below in the division of profits. The vendors are also to be repaid all their expenses and outlay in respect of the chaims so purchased. Three of the vendors, viz., Messrs Litkie, Newberry, and Cohen, have agreed to act as Directors of the Company. The balance of the capital, viz., £20,000, is intended to provide the requisite machinery and to meet the other requirements of the Company, and it is believed that it will be ample for these purposes.

The net profits of the Company for each year will be applicable as follows, viz.:

—First, in providing a reserve fund by the appropriation of 5 per cent, of the profits, until such reserve fund shall amount to one-half of the amount of the capital of the Company. Secondly, in paying dividends equal to 10 per cent. per annum upon the Ordinary Shares.

additional remuneration 10 per cent. of the balance of the net profits, as shown by the accounts of each year. Fourthly, one moiety of the surplus of the net profits of the Company for each year, after deducting the contribution to the reserve fund, the 10 per cent, payable upon the Ordinary Shares, and the 10 per cent, of the surplus payable to the Directors for the additional remuneration, will be applied in payment of additional dividends on the Ordinary Shares, and the other moiety of such surplus will be applied by way of dividend on the Founders' Shares.

At Kimberley the Directors have secured the services of Mr William Newberry, ne of the most experienced managers on the Diamond Fields.

The Articles of Association provide for the issue of share warrants to bearer.

The following contract has been entered into on behalf of the Company, viz.;

An agreement dated May 24, 1881, between Messrs Julius Cohen and Co. and others, thereinafter called the vendors, of the one part, and Thomas Joice Seel, as trustee for an intended Company, proposed to be called the Kimberley North Block Diamond Mining Company, Limited, of the other part.

Copies of the above Contract and of the Memorandum and Articles of Association of the Company, can be seen at the Office of the Solicitors.

Applications for Shares must be made in the anuexed form, accompanied by a eposit of £1 per share, which deposit must be paid to the Bankers of the Comany, the Bank of Africa, Limited.

Prospectuses and Forms of Application can be had from Messrs Holland, Balfour, and Hamilton, the Brokers of the Company; or of the Bankers; or at the Offices of the Company, No. 5, Copthall buildings, E.C.

Should no allotment be made the deposit will be returned in full. London, May, 1881.

THE KIMBERLEY NORTH BLOCK DIAMOND MINING COMPANY, LIMITED.
