Imagine a world in which every single person on the planet is given free access to the sum of all human knowledge.
It started with a dream

Ten years after Wikipedia’s launch, the original vision captured in our mission statement continues to inspire those of us working at the Wikimedia Foundation.

Our great accomplishment of 2010 was the finalization of a strategic plan for the Wikimedia movement. It was an extraordinary effort—over a thousand volunteers worked collaboratively to develop the priorities that will help chart our course through 2015.

The plan focuses on five areas: stabilize our organizational and technical infrastructure, increase participation in our projects, improve the quality of the information in our projects, increase the global reach of our projects, and encourage innovation to better enable collaborative information sharing in the future.

Meanwhile, by practically every measure, Wikimedia’s projects are flourishing. Readership continues to increase—we are now serving more than 400 million people every month. The total number of articles, and the quality of those articles, continues to increase. In addition, more people are donating to Wikimedia than ever before. Our material continues to find new venues—it’s now visible in maps and social networks; it’s available on mobile phones, tablets and e-readers; and it’s copied by countless other sites for many different purposes.

That’s all good news.
But our challenges are also clear. Not enough new editors are joining our ranks, which puts a heavy workload on veteran editors. Our core community is men in their mid-twenties, mainly in Europe and North America, so now we are aggressively recruiting others to join our work, particularly women and people in the Global South. In the upcoming year, our particular emphasis will be on India, Brazil, the Middle East and North Africa.

We also need to adapt our technology to better serve the millions of people who access our projects on all types of devices and platforms, including smartphones, low-end feature phones, tablets, as well as in offline settings.

We could never hope to meet these and other challenges without your support. In 2010, people like you made more than 177 million edits, and donated more than $9 million dollars.

Thank you for all of the work and generosity.

We also thank those who served the movement for the past year as Trustees. Michael Snow served as Chair of the Board of Trustees from early 2008 until the summer of 2010. Michael, a long-time Wikipedian, continues to be a source of inspiration and wisdom for our community. We thank him for his leadership and support.

We welcomed new faces to our Board of Trustees. Matt Halprin, Arne Klempert, Bishakha Datta, Samuel Klein, and Phoebe Ayers joined in the past year. And we welcomed Craig Newmark, Jing Wang, Mimi Ito, and Nhlanhla Mabaso to our Advisory Board. Our thanks to you all.

Ting Chen
Chair of Wikimedia Board

Sue Gardner
Executive Director
Imagine a world...
Just ten years ago, however, this wildly improbable idea was just that—an idea that almost no one thought would ever become a reality. Well, it did, and now more than 400 million people turn to Wikipedia every month. Welcome to our world, where the wildly improbable can and does come true.

Somewhere on the planet, three times every second, a volunteer makes a new edit in one of 270 languages to the largest free encyclopedia the world has ever seen.
in which every single person on the planet...
Real people—100,000 every month—write and edit Wikipedia. It continues to evolve and expand, thanks to this deeply committed global community of volunteers.

No other living resource exists, or has ever existed, to serve everybody everywhere the way Wikipedia does. To make it truly accessible, we are helping launch versions in as many local languages as possible.
is given free
Envision a future where every person on earth, rich or poor, has access to all the knowledge that currently resides in our greatest museums, libraries, and archives.

Wikipedia lights a bright path to that future, where all children will have the opportunity to become educated and better able to improve their own lives.
to the sum of all human knowledge
Wikimedia’s vision is rooted in a deep reverence for the world’s great repositories of knowledge—libraries and museums.

Almost every week, another major institution somewhere on the planet joins the movement to make digital versions of its treasures available to all. These partnerships brighten our common future, but more work remains.
How do we get there?

Five strategic priorities

During the past two years, the Foundation developed its first-ever strategic plan. More than 1,000 volunteers from all over the world collaborated in a transparent process that resulted in priorities to guide us through 2015.

**Stabilize infrastructure**

We operate the fifth most popular web property world-wide, and we need to ensure our operating infrastructure matches our global impact. We will continue to expand our community of hundreds of thousands of donors, work to safeguard our business operations globally, and build a permanent data center to reduce downtime and mitigate risks of catastrophic failure.

**Increase participation**

Wikipedia’s “boom years” of participation are behind us. Now we face the challenge presented by a slowly decreasing number of editors. To gain new editors, we must adapt our editing technology to the changing web, improve the social experience for new users, and grow participation in the Global South by catalyzing on-the-ground work by the community.
**Increase reach**

Today, Wikimedia’s sites reach roughly a third of all Internet users around the world. The majority of humanity is now coming online using mobile phones. We need to improve our platform to serve audiences on all devices well. We will also optimize site performance globally, and explore solutions to disseminate content to people with no or intermittent connectivity.

**Improve quality**

Wikipedia has succeeded largely because of the breadth and depth of its content. But many gaps remain, and the quality of entries is inconsistent. Our first priority is to ensure that we give readers better information about article quality, by developing better assessment and labeling tools. We will also help increase the movement’s capacity to develop new and lasting partnerships with cultural and educational institutions.

**Encourage innovation**

The wiki was invented in 1995. At that time, using it collaboratively to create an encyclopedia was a social innovation. Through our history, our community has been the source of most of our technical and social innovation, and this is where the next “big idea” will come from. We will create an environment that offers volunteers social space and technical resources to innovate, experiment and learn.
Over the past year, the British Museum® and the Wikipedia community have been working cooperatively to develop high-quality articles about many fascinating artifacts in the museum’s collections. One example is the Hoxne Hoard.

The story goes that one day outside the English village of Hoxne, in Suffolk, a farmer named Peter Whatling lost a hammer in his field, so he asked Eric Lawes, an amateur metal detectorist, to help him look for it. Lawes brought over his metal detector and proceeded to find not only the hammer but a large number of ancient silver spoons, gold jewelry, and gold and silver coins.

The following day, a team of archeologists arrived at the field, and dated the cache to the late Roman Empire period, in the fourth and fifth century A.D. They surmised that the items had originally been buried in a oak box or chest, perhaps by a wealthy family during the chaos of the empire’s collapse.

Many of the 14,865 coins and some 200 items of silver tableware and gold jewelry are now on display at the British Museum, where they have come to be known as the Hoxne Hoard.

Some of the most experienced and talented Wikipedians, plus experts from the British Museum, collaborated to produce an incredibly detailed Hoxne Hoard entry, which includes over 120 citations, and dozens of high quality maps, diagrams, and photographs.

The ongoing collaboration between the museum, which has for over 250 years provided free entry to all, and the world’s largest encyclopedia, which is also free to all, illustrates how fascinating but obscure information of this sort can be given new life and brought to a global audience.
**Inside the Hoxne Hoard article**

**Photography:** Not just any image will do. Wikipedians appreciate the need for well-lit, high-resolution, photography that's up to the standards of how the British Museum displays the works.

**Maps:** User-created maps bring important geographic context to the breadth of the Hoard’s story.

**References:** Over 30 references from media outlets, government and academic publications, and British Museum publications.

**Inscriptions:** If details are of interest to the British Museum, they are also important to Wikipedians. Reference numbers, translations, and notes about inscriptions on silver tableware are included.

The Hoxne Hoard article has been designated a “featured article,” which means it is of the highest quality. Currently, only one tenth of one percent of Wikipedia’s content has achieved this status.

Despite being a broken-off handle from an unknown object, the silver “Hoxne Tigress” has become the best-known single piece out of over 15,000 objects in the hoard.

**Display case reconstructing the arrangement of the hoard treasure when excavated.**

**Material**
- Gold, silver, bronze, iron, and organic material

**Created**
- Roman Empire

**Period/culture**
- 4th or 5th century

**Discovered**
- Hoxne, Suffolk by Eric Lawes in 1992

**Present location**
- Room 49, British Museum, London

**Front and back views of a light miliarense coin from the Hoxne Hoard. The reverse side shows the SISCP mint mark (Siscia).**

**A 13 cm (5.1 in) long “ladle” from the hoard, with decoration including a Chi-Rho and sea-creatures.**

**English Wikipedia’s Featured Article: Nov 16, 2010**
- Total number of edits: 1,257 (at time of printing)
- Peak number of edits: 860 in June, 2010
- Top article editor user: Fæ (164 edits)
- Number of edits by anonymous users: 32
- Article creation April 15, 2006 by User: Tascio
- Article also available in: Farsi, French, and Italian
Usability initiative: editing made easier

Among our top priorities this past year was making Wikipedia easier for newcomers to edit. Thanks to grants from the Stanton and Ford Foundations, we launched our usability initiative, a large-scale collaborative effort based on studies with everyday readers who had no prior editing experience.

By listening to them, we have been able to implement a number of changes that improve Wikipedia’s look and feel, including improvements to the navigation and search functionality, and a significantly simplified editing screen with built-in help and assistants for common tasks. We used the opportunity of a design refresh to implement an upgrade to the ubiquitous Wikipedia puzzle globe, which is now rendered as a fully three dimensional icon.

Late in 2010, with the support of the Ford Foundation, we launched a new upload wizard in beta to facilitate the contribution of multimedia entries to Wikimedia Commons, which now contains almost ten million images, videos, and audio works that enhance all of our free knowledge projects (data from March 2011).

By visualizing their research findings as a large affinity map, the usability team was able to bring specific issues into focus.

Observational research was conducted with users as they made their first-ever edits to Wikipedia.

All images CC-BY-SA; usability participants by Parul Vora; sticky notes by Raghesoo.
One camera: documenting Czech culture

A small grant of $1,500 from the Foundation to the regional Wikimedia Czech Republic chapter last year triggered an amazing effort by people using a single DSLR camera to take thousands of photos of municipalities, castles, nature reserves, rivers, and other landmarks. With additional help from the Foundation to support travel, Czech volunteers have undertaken a remarkable collaborative effort to document the country’s social, political, and cultural history. This is one of many small grants we awarded to support program work globally.

These four images are among the thousands taken by volunteers that portray daily life in the Czech Republic.

Tropenmuseum: reclaiming history

The Tropenmuseum in Amsterdam has numerous exhibits, objects and images from the former Dutch colonies of Indonesia and Surinam.

As part of an unprecedented collaboration with the Dutch Wikimedia chapter, the museum is donating a portion of this historical material to Wikimedia Commons.

Wikimedians are organizing and cataloging the images, and also improving their quality. Longtime Wikimedian Durova has been undertaking the meticulous job of retouching photos, removing scratches, and restoring the images to the highest quality possible.

The Indonesian Wikimedia chapter plans to translate the annotations on cultural artifacts and images into local languages. This will allow the Indonesian public to participate in reclaiming a part of its past that until now has only been accessible half a world away in Amsterdam.

Over 2,100 rare images from the Tropenmuseum’s collection have already been added to Wikimedia’s projects.
In progress

Actions we are taking for the future

New data center in Virginia

From a single data center in Tampa, Florida, USA, a few racks of servers offer up all of the Foundation’s content to an audience that has grown to more than 45 million people a day. If this data center should be affected by a major disaster,

Wikipedia and our other projects could go dark for many weeks. Given the importance of these projects to people all over the world, this is an unacceptable risk for us to continue to take.

In 2010–11, therefore, we are building up additional hosting infrastructure in a new primary data center, based in the state of Virginia. This facility will provide top-tier connectivity, and enhanced stability should disaster strike in the future. For now, we are maintaining our Tampa facility as a backup data center.

The additional capacity in Virginia will also provide the foundation for a scalable platform as we strive to meet new traffic and storage demands. With our global audience projected to more than double in the coming five years, this infrastructural upgrade is a critical element of our strategy going forward.

Focus on India

To reach one billion people by 2015, we will need to increase both participation in, and readership of, Wikimedia’s projects in the Global South. Not surprisingly, many countries in this part of the world also have the fastest growing population of Internet users. But Wikipedia exhibits significant knowledge gaps about the culture, history, and geography of these regions. Over the coming year, we are concentrating on establishing the first significant Wikimedia Foundation presence outside the United States in India, where there is tremendous enthusiasm to help us set an example that can be copied elsewhere. Our goal is to catalyze community and outreach programs and to support the burgeoning Wikimedia India chapter, to plant the seeds for years of sustainable growth.
Our targets for 2015

Wikimedia’s strategic planning process identified five key targets to measure our success and progress through 2015.

- **Increase the number of Wikipedia articles we offer to 50 million**
- **Ensure information is high quality by increasing the percentage of material reviewed to be of high or very high quality by 25%**
- **Encourage readers to become contributors by increasing the number of total editors who make at least 5 edits per month to 200,000**
- **Support healthy diversity in the editing community by doubling the percentage of female editors to 25%**
- **Increase the percentage of Global South editors to 37%**
Wikimedia chapters

During 2009–10, Wikimedia’s network of volunteer-driven international chapters grew from 26 to 30. Wikimedia’s chapters, which are independent from the Wikimedia Foundation, are made up of local members and directors, and they focus on region-specific work. Typically, that work includes building awareness of Wikimedia projects, handling media inquiries, staging public outreach events, and forming partnerships with local educational and cultural organizations.

Our fifth annual Wikimania gathering was a bilingual conference held in both English and Spanish, with a simultaneous translation service for the main track.

Over 550 Wikimedia volunteers and supporters from around the world gathered at the Centro Cultural General San Martín in Buenos Aires to celebrate the free knowledge movement, with a special emphasis on how to improve the representation and involvement of the global community of Spanish speakers in our projects.

These annual gatherings are part of the Foundation's effort to strengthen the community and broaden the base of participation all over the planet. With the 2010 venue in Gdansk, Poland, and the 2011 gathering in Haifa, Israel, our tradition of visiting new countries and regions is continuing.
The Wikimedia Foundation continues to enjoy a stable base of revenue, stemming largely from its annual community giving campaign. In 2009–10, we dramatically increased the number of small donors, which now exceeds 250,000 individuals all over the world. This makes the Foundation one of the fastest-growing non-profits in the world, based on revenue growth. The Foundation’s strategic plan envisions continued growth over the next five years.

“I contribute to Wikipedia as often as I can, editing articles in English and Swahili. It still amazes me that, here in Kenya, I can be part of a global community that comes together to gather all of human knowledge in one place.”

—Abbas from Kenya, user: AbbasJnr
“Whatever your personal connection, you are part of a magical community. More than 400 million people use Wikipedia and its sister sites every month—almost a third of the Internet-connected world.”

— from Spain, user: Lilaroja

“I started writing articles on Wikipedia because I realized there was a lot of knowledge people might be searching for that had not yet been added in my language. I didn't do it for attention or for praise. I did it because I care about my culture...”

—from Indonesia, user: Kartika
Projects
Our core activities

The Wikimedia Foundation operates 11 free knowledge projects managed and built by a community of over 100,000 active volunteers.

Wikipedia®
Free encyclopedia

The free encyclopedia containing more than 18 million articles in 270 languages, visited by over 414 million users globally every month. The most comprehensive and widely used reference work humans have ever compiled. 100,000 active volunteers contribute new content every month.

Meta-Wiki®
Project coordination

Wikimedia Commons™
A repository of nearly 10 million freely usable images, sound and video files, serving Wikimedia’s projects and countless other educational needs.

Wikispecies™
Directory of species

MediaWiki®,
Open-source wiki software

The leading open-source wiki software serves as the backbone for all of the Foundation’s projects, as well as thousands of other wiki communities around the world.

Wikisource®,
Free source documents

Wikibooks®,
Free textbooks and manuals

Wikinews®,
Free content news source

Wikiquote®,
Collection of quotations

Wikiversity®,
Free learning tools

Wiktionary®,
Dictionary and thesaurus
