LUTHER BURBANK, PROPRIETOR

SANTA ROSA

SONOMA COUNTY, CALIFORNIA

Post, Express and Telegraph Address: Santa Rosa. Branch Nursery at Sebastopol,
seven miles west.

To Friends and Customers.

It is with great pleasure that I review my efforts during the past ten years in raising and distributing trees and plants; for, since establishing myself in the nursery business ten years ago, under most trying circumstances and on the smallest possible scale, my earnest efforts to raise only the best of everything and to deal fairly, truly and liberally with all, have been crowned with the most complete success, and now trees and plants from Santa Rosa Nurseries are everywhere known to be the standard of excellence and always as represented. Realizing that this is the direct result of years of unceasing efforts to please my customers it is very gratifying, and I assure you that though my business is nearly a hundred times as large as it was six years ago, yet the facilities are better in proportion and that the same careful vigilance shall continue.

The sun always shines on trees and plants grown in Santa Rosa Nurseries, for they are blooming and bearing fruit on every continent on earth. During the past few years I have sent large quantities of nursery stock, mostly new and rare kinds, to most of the Eastern and Southern States and to Canada, England, Germany, France, Mexico, Central and South America, Sandwich Islands, China, Australia and New Zealand, and have received many unsolicited testimonials always commending my mode of packing for long distances.

All the trees and plants mentioned in this catalogue are now growing in my nurseries, and can be supplied on short notice if ordered early. The stock of some favorite variety often gets short late in the season—a better selection can always be obtained early, and nearly a year's growth is gained by Fall planting.

The regular shipping season commences with the first rains, usually about the first of November, and closes about the first of April. It is not safe to delay planting orchards in this State later than February, yet in some seasons trees will do well if planted later. By the first of April most trees and plants are too far advanced to transplant safely.

Special express rates. It is always better to have trees and plants shipped by express, unless the amount of stock ordered is large. The Wells, Fargo Express Company carry my trees and plants on all their lines at *special low rates*; by this reduction packages weighing less than one hundred pounds are generally delivered anywhere in the United States, and often to foreign countries, for less than by freight, besides always going more safely and speedily.

All goods are carefully packed by experienced men, for which a charge only sufficient to cover cost of material and labor is made, and delivered in good condition to the forwarders, after which my responsibility ceases. All claims for errors in filling orders must be reported on receipt of stock; a system of double checking is employed by which mistakes in putting up orders are almost impossible. Always give your full name and address, and state how you wish the goods shipped. In case of loss or miscarriage everything in my power will be done for protection and recovery of my customers' goods.

Full planting directions were sent to all customers of last season; those who have not received a copy can obtain one by applying for it.

TERMS CASH. No goods will be shipped unless cash or satisfactory security accompanies the order. The prices quoted in my catalogues are *cash prices*, my business and correspondence are too extensive and time too valuable to allow of any other plan.

Good customers do not ask me to hold trees for them without advancing part payment to secure them. Good customers do not ask me to prepay freight or express charges for them from my own pocket; in case a surplus of money is sent for this purpose it is always promptly returned with statement.

The question is often asked why I employ no traveling agents; it is because I do not favor misrepresentation. The traveling tree agent business is justly in bad repute, having everywhere proved to be a damage to the honorable nurseryman as well as to the planter. If you buy of a traveling agent and the trees bear crabs instead of good fruit, what can you do about it?

The "Burbank" Potato, which originated with me on the old Eastern home in my youthful days, is everywhere known for its superior qualities, having been named and first sent out by a prominent Eastern seedsman and since distributed by most of the seedsmen of America and by the United States Government. It still commands a much higher price than any other potato, as will be seen by consulting the market reports of the great cities of the United States. I do not deal in seed potatoes but can often supply this variety for planting at about the usual market rates. This in reply to numerous inquiries.

Catalogue and Price List.

✦ FRUIT TREES. ✦

Langford Seedling Apple.

APPLES.

Our collection of Apples contains only those which on thorough trial have proved to be the best and most profitable to raise. Those named in this list ripen in about the order enumerated. Price, except where noted, medium size, 15 cents, selected large, 20 cents; in quantities, see wholesale price list.

Red June.—Medium size, clear red.

Early Harvest.—Medium size, pale yellow; the earliest good apple.

Red Astrachan—Large, color rich red, striped; bears abundantly.

Gravenstein.—Large, yellow striped with red; the best of all Fall apples.

Red Beitigheimer.—A new German apple; extremely large, pale yellow, mostly covered with purplish crimson; vigorous. Price, 25 cents.

Fall Pippin.—Large, yellow with brownish cheek; a strong grower and productive.

- Maiden's Blush.**—Medium size, pale lemon yellow with a bright red cheek.
- Baldwin.**—Medium size, striped crimson on yellow ground; productive.
- Rhode Island Greening.**—Large, dark green; bears heavily every alternate year; fine for cooking.
- Johnathan.**—Medium size, striped; a good market apple.
- Yellow Belleflower.**—Large, oblong, yellow; productive and good.
- Lady Apple.**—A beautiful little dessert fruit.
- Hoover.**—Large, rich dark red; bears early and abundantly.
- Smith's Cider.**—Large, striped red and white; productive.
- Spitzenburg.**—Medium, red and yellow striped; productive and valuable.
- King of Thompkins Co.**—Large, yellowish red striped with crimson; regular and abundant bearer.
- York Imperial.**—Large, greenish red; hardy and productive. Price, 25 cents.
- Cook's Seedling.**—Originated in this county; large, yellow striped red; one of the best winter apples.
- Golden Russet.**—Very much in demand for home use; medium size; best quality; early bearer.
- White Winter Pearmain.**—Medium, pale yellow; fine flavor.
- Wagener.**—Medium, yellow striped red; the best of the winter apples for home use; bears early and abundantly.
- Virginia Greening.**—Vigorous and productive; fruit large, greenish yellow with faint blush; a late keeper and good market apple.
- Gibbs.**—New; medium to large, white, shaded brown, mild subacid; one of the longest keeping apples. Price, 25 cents.
- Hyde's King.**—Said to be the latest keeper known; fruit large, yellowish green; exceedingly vigorous. Price, 25 cents.
- Those named below can be supplied in small quantities: **Yellow Transparent, Seedless, Lawver, Red Belleflower, Russian Weeping, Chinese Double Flowering, Langford.** Price, 25 cents each.

CRAB APPLES.

- Red Siberian.**—Valuable for preserving.
- Transcendent.**—Large and handsome; valuable for cooking.
- Whitney's No. 20.**—Large, green striped crimson; a superior dessert fruit. Price, 25 cents.
- Kishwaukeee.**—Good; season, January to June. Price, 25 cents.

PEARS.

Pears will do well on strong moist clay or adobe soil where no other fruit tree will thrive except, perhaps, plums or plum roots. The Winter Nelis, however, is an exception; it does much better on rather dry, poor soil, where it needs less pruning, and the fruit is more abundant and greatly superior in size and quantity. Price, medium size, 20 cents; selected large, 30 cents. In quantities, see wholesale list.

- Madeleine.**—Small; the earliest good pear.
- Buerre Giffard.**—Medium size, melting, juicy, excellent.
- Bartlett.**—Well known as the best of all Summer pears.
- Souvenir du Congress.**—Very large; resembles the Bartlett.
- Flemish Beauty.**—Large, handsome, and sweet; bears early and abundantly.
- Sheldon.**—Large, roundish; of the very best quality.
- White Doyenne, or Virgalieu.**—A delicious, old, and well-known Fall pear.

Duchess de Angouleme.—One of the largest and best flavored of all the Fall pears; productive.

Buerre d'Anjou.—Large and handsome and of excellent quality; vigorous and productive.

Buerre Clairgeau.—Extremely large, rich cinnamon color; productive and valuable for shipping.

B. S. Fox.—Medium size, cinnamon yellow; flesh fine, juicy, sweet, and excellent; a California seedling.

Vicar of Winkfield.—A well-known large, long, yellow, early Winter pear.

P. Barry.—Large, long, rich golden russet fruit; sweet, juicy, and excellent; early and abundant bearer; a California seedling.

Col. Wilder.—Medium or large, light yellow fruit shaded red in the sun; flesh juicy, sweet, and aromatic; another valuable California seedling.

Winter Nelis.—Small or medium; the best Winter pear, well known for its delicious qualities; regular and abundant bearer, especially as the tree gets older.

Easter Buerre.—Fruit large, yellowish green with russet spots; flesh rich, sweet, and juicy; valuable if planted on rather dry soil, away from the coast fogs.

Japan Mikado Pear.

CHINA AND JAPAN PEARS, ETC.

Some of these bear choice, fine flavored fruit, but their chief merits are freedom from nearly all diseases common to other pears, and their astonishing growth. A large share of my pear-trees of all kinds are worked on Japan Mikado seedlings, which grow as much in one year as common seedlings do in three. From over two hundred thousand seedlings of the Japan pear, I have selected for testing a few hundred of the most vigorous and sturdy ones, with enormous glossy leaves, some of which for weeks after the first frosts show colors of most wondrous brilliancy and beauty, surpassing in richness any other Autumn foliage. From some of these I hope to obtain one of the coming pears. Nurserymen and horticulturists who visited my grounds last Fall were surprised and delighted in seeing thousands of these seedlings standing four to eight feet high, thick in the seedling rows, their great, glossy leaves tinted by the Autumn frosts from black through shades of purple, crimson, scarlet, green, orange, yellow, and white.

Le Conte.—Medium size, light lemon color; extremely vigorous and a regular bearer; a good cooking and canning pear.

Seut Lea.—Ornamental China pear, almost evergreen; remarkably vigorous and healthy. Price, 50 cents.

Kieffer.—Medium to large; fair quality, excessively productive. Price, 50 cents.

Mikado.—Extremely vigorous; free from all disease; promises to make the most valuable stock for grafting. Price, 50 cents.

Hawaii.—Stout, vigorous growing pear from the Sandwich Islands. Price, 50 cents. Mikado and Hawaii bear apple-shaped fruits.

Asiatic Pear Seedlings.—These are of such rapid growth that they are being planted on a large scale for fuel and timber. Price, 10 cents each, 50 cents for 10; in larger quantities, see wholesale list.

PEACHES.

Most of the varieties which are named in the following list have been thoroughly tested in this climate and found to be free from "curled leaf," which makes many otherwise excellent kinds worthless. My trees are all grown without irrigation and given plenty of room. They are branched low and bushy. Named below in about the order of their ripening. Price, 15 to 20 cents each, according to size, except where noted; in quantities, see wholesale list.

Alexander.—The largest and best of the very early peaches.

Waterloo.—Medium to large; very handsome.

Brigg's Red May.—One of the best of the early peaches.

Brice's Early.—Large, rich dark red; the best very early peach for market.

Hale's Early.—Remarkable for productiveness, early bearing, and superior quality.

Monstrous Douay.—Medium size; rich, juicy, subacid; productive and excellent for home use.

Chinese Cling.—Very large, cream color marbled with red; juicy and melting.

Wager.—Medium to large, lemon yellow; exceedingly rich and sweet; bears abundantly every year; one of the best for canning, drying or for home use; the tree does better than other peach-trees on heavy soil.

Foster.—Large, round, yellow freestone; resembles Early Crawford, but is more uniform in size and of better quality.

Early Crawford.—Well known as the best of its season for market or canning.

Susquehannah.—Very large, handsome yellow freestone; like Early Crawford, but larger and not quite as productive.

Muir.—A California seedling; resembles Wager in texture and quality of fruit and growth of tree; the fruit is exceedingly sweet and firm, yet tender, making it the best peach for canning or drying. Price, 25 cents.

Lemon Cling.—Large, handsome, productive, and of excellent quality.

Orange Cling.—A large, handsome, yellow-fleshed, Sonoma County seedling; free from curled leaf, hardy, vigorous, productive, and superior for market or drying; planted more extensively than any other in this locality. This is an improved seedling of the Orange Cling of Downing.

Blood Cling.—Large, dark claret; deep red, juicy flesh.

Smock Free.—Orange yellow, medium size; vigorous, healthy tree, abundantly productive; good for drying.

Gibson's Late Yellow.—Resembles Smock Free; the fruit is more juicy; vigorous and productive.

Black Freestone.—New; a most remarkable fruit which originated in Santa Rosa Valley from the seed of the common peach; a vigorous, healthy tree; fruit medium or large, brownish black skin, small stone, perfectly free; the flesh is firm, rich, and juicy, and as *black as a ripe blackberry*; fine for canning and jellies. Price, 50 cents each.

Salway.—A large, late, yellow freestone; one of the best of peaches.

Picquet's Late.—A very large, handsome, late freestone.

Henrietta.—Largest size, yellow mostly covered with bright crimson; productive.

Those named below can be supplied in small quantities: **McCowan's Cling**, **Edwards' California Cling**, **George's Late Cling**, **Lyon's Mammoth Cling**, **Large Early York**, **Dwarf Japan Blood**, **Noblesse**, **Van Buren's Golden Dwarf**, and **Chinese Tong Pa**.

NECTARINES.

Price, same as peaches.

Victoria.—A medium sized, red, juicy, and delicious nectarine; hardy and productive.

New White.—Large freestone; white skin and flesh.

Lord Napier.—Large, late, white; vigorous and productive.

CHERRIES.

Price, 25 cents each, except Centennial; in quantities, see wholesale list.

Black Tartarian.—Medium size, juicy, and delicious.

Rockport.—Large and firm; one of the best canning cherries.

Napoleon Bigarreau.—Large, firm, yellowish white; the one most planted for canning.

Centennial.—A new California seedling of largest size, with unusually firm, sweet flesh and small stone; the fruit keeps in good condition longer than any other variety. Price, 50 cents each.

Belle Magnifique.—Large, late, bright red, juicy, acid.

PLUMS.

Price, 25 cents each; in quantities, see wholesale list.

Cherry.—The first to ripen; small juicy, pale red.

Peach Plum.—The largest early plum; brownish red, sweet and delicious.

Imperial Gage.—Medium size, sweet and juicy; good grower and very productive.

Pond's Seedling, or "Hungarian Prune."—Extremely large, light red changing to violet; vigorous grower and abundant bearer.

Washington.—Very large, round, greenish yellow; one of the best plums for all purposes.

Jefferson.—Medium size, yellow with a red cheek; very sweet and firm fleshed; one of the best for home use.

Glaister.—A California seedling of the form, size, and color of Yellow Egg, but of better quality, and ripening *two weeks* earlier.

Yellow Egg.—Well known; large, light yellow; one of the best shipping plums.

Coe's Golden Drop.—Large, oval, light yellow; makes a first-class prune.

PRUNES.

Plums and Prunes are here divided for the sake of convenience. All prunes are plums. Price, 25 cents each; in quantities, see wholesale list.

French Prune, Petite d'Agen.—Well known as the best and most profitable prune for general culture; medium size, oblong, reddish purple; rich, sugary, and very productive; requires a deep, strong soil to bring it to its greatest perfection.

Robe de Sergent.—Very much like Petite d'Agen; a trifle larger, but shrinks more in drying.

Bulgarian.—Large, purple, rich and sweet; vigorous tree.

Saint Catharine.—One of the most celebrated prunes; skin pale yellow; flesh yellow; juicy, firm, rich, and perfumed; abundant and constant bearer. This is the prune put up in France in fancy glass jars and boxes and sold under the name of "Tours Prune." Price, 50 cents each.

Oregon Silver Prune.—Said to be a seedling of Coe's Golden Drop, and to be more vigorous and productive. My trees are from grafts cut from the original tree, and are genuine.

Shropshire Damson.—A medium sized purple variety, with firm, yet juicy, rather acid flesh; makes a fine prune.

Also small quantities of some varieties lately imported from the great prune-growing districts of France, as follows: **Lot d'Agen, Double Prune d'Agen, Prune d'Ente** (large trees). Price, 50 cents each.

JAPAN PLUMS.

During the past six years I have, at great expense, imported and am now growing every known variety of Japan and Corean plums. Many of them are bearing fruit of great excellence.

Price, 50 cents each; in quantities, see wholesale list.

Botan.—A large, dark yellowish red fruit, with a white bloom; sweet, rich, juicy, and delicious; vigorous, upright-growing tree; ripens here August 1st.

Chabot.—Vigorous grower, abundant bearer; fruit greenish purple, very large and firm; ripens here August 15th.

Kelsey.—A dwarf-growing tree, with long willowy branches; fruit very large, heart shaped, sweet and juicy, yet firm; ripens here last of September.

Long-fruit.—Has not yet produced fruit here; a strong grower.

Masu, or "Large-fruit."—A fair grower; has not borne fruit here yet.

Botankio.—Similar to Botan; larger, but not as sweet; ripens here Aug. 10th.

Botankio No. 2.—The leaves of this variety do not resemble any of the other Japan plums; has not borne fruit here yet.

Blood Plum of Satsuma.—A small tree of this was obtained last Winter after a great amount of correspondence, and an expense of forty dollars, in Japan. I have the only one growing in America. It is a vigorous growing tree, with dark red bark and oval leaves; said to be productive of large, delicious fruit with red flesh and curiously mottled skin; small trees expected. Price, \$1.00 each; dormant buds on hand, 75 cents each.

Prunus Simoni, or Apricot Plum.—This remarkable plum came from Northern China. The tree attracts attention by its vigorous, upright growth, and the form and color of its leaves. The fruit differs from any other in cultivation—large, tomato shaped, cinnamon red color; the flesh is firm, rich, sweet, aromatic, and delicious, with the flavor of pine-apple as strong as the pine-apple itself, mingled with a faint banana flavor; very small stone. It will be planted extensively when known. Ripens here September 15th.

Prunus Pissardi.—An ornamental plum for the lawn; the foliage is deep purplish blood color, and it retains its color better than any other purple leaved tree.

Besides the Asiatic plums named above, I have small quantities of other new kinds imported last season, described as follows: **No. 2.**—Large, red, very good. **No. 3.**—Green skin, conical, red flesh. **No. 4.**—Large, conical, red, very good. **No. 5.**—Corean variety. **No. 6.**—Large, white, like Washington. **No. 7.**—Preserving variety; prolific; bears early. **No. 8.**—White; prolific; early bearer. **No. 9.**—Rose flowered variety. **No. 10.**—Preserving variety. **No. 11.**—Same. **No. 12.**—Very late variety.

APRICOTS.

Apricots should be planted only on rich, well-drained soil. Price, 25 cents each, except where noted; in quantities, see wholesale list.

Royal.—A fine early variety and a regular bearer.

Large Early.—Large, juicy, rich and productive.

Peach.—One of the largest and best of apricots; vigorous and productive.

Luizet.—The most popular apricot throughout France, where it is now being planted more extensively than any other. The fruit is large, yellow with red dots; the flesh is firm, yellow, rich, and very sweet; regular bearer. Price, 50 cents each.

Hinds' Seedling.—A fine, large, sweet California seedling.

Those named below are grown in smaller quantities: **Purple or Black, Eureka, Jackson's Seedling, Shipley or Blenheim, Moorpark.**

QUINCES.

The Quince has been overlooked. It is one of the most profitable fruits to raise for shipping East. Price, 20 cents each, except where noted; in quantities, see wholesale list.

Orange.—The most popular kind; fruit large, light golden yellow.

Angers.—The most thrifty growing and productive variety; does not cook quite as tender as the Orange, but will keep much longer.

Portugal.—Superior to all others in quality; very fragrant; rather shy bearer.

Rea's Mammoth.—Fruit much like the Orange quince, but larger and finer.

Champion.—A late, greenish quince; keeps well.

Hong Kong.—An extraordinary fruit of immense size, often weighing over two pounds; growth and foliage distinct from other kinds. Price, 50 cents.

ALMONDS.

Price, 20 cents each.

I. X. L.—Originated by A. T. Hatch, of Suisun; large, soft shell; regular heavy bearer.

Ne Plus Ultra.—A large, long, soft shell; heavy bearer; another of Mr. Hatch's seedlings. These are greatly superior to any of the old varieties.

FIGS.

No fruit can be as easily raised in this climate as the fig. The varieties adapted to this section bear early, regularly, and heavily—old trees often producing a ton or more each per year.

Adriatic.—One of the most delicious of all figs; medium size, rich, sweet, fragrant, and exceedingly thin skinned; often bears the first or second year from the nursery. Price, 50 cents each.

Smyrna (true).—The best type of this variety; a brownish golden fig of the largest size and most superior qualities; the fruits often weigh one-quarter pound each; the trees are hardy, grow in good form, bear early, regularly, and abundantly. This is the genuine Smyrna fig. Price, 50 cents to \$1.00 each.

“Bulletin” Smyrna.—A rapid growing variety; has not borne fruit here yet. Price, 50 cents each.

San Pedro, or Apple Fig.—The largest and handsomest fig grown; golden yellow, shaded green; flavor sweet and excellent; early and abundant bearer. Price, 50 to 75 cents each.

Mission.—Vigorous, rapid growing tree; small, sweet, black fruit. Price, 25 to 50 cents each.

Hardy Japan Figs.—Two varieties, black and white. Price, 75 cents each.

MEDLAR.

A fruit about the size of the American persimmon; good after being frozen. Price, 25 to 50 cents.

LOQUATS.

Giant.—A delicious Japanese fruit, of the size of plums, growing in clusters and ripening early in the Spring. The tree is a large leaved, ornamental evergreen. Price, 50 cents to \$1.00 each.

POMEGRANATES.

Large Sweet.—A small tree or bush bearing beautiful and valuable fruit of the size of an orange, which can be shipped around the world in good order; it is attracting much attention in the fruit markets of the Eastern States. Price, 25 cents.

PERSIMMONS.

The Japan Persimmon is an early and abundant bearer of large, fine flavored fruit, which has always brought a high price in market. The varieties named below can be supplied:

Among, Haychega, Kurokomo, Hayakume, Yemon, Seedless, Daishion, Diediemari, Ninodyuru, Kurokomo, Minokaki, and Ozeuji. Price, 50 cents.

American Persimmon.—The fruit is small, but good after being frozen. Price, 25 to 50 cents each.

MULBERRIES.

Price, 25 to 50 cents.

White.—A fine ornamental tree.

Black Spanish.—Slow growing, but bears a delicious fruit.

Russian.—Rapid growing; ornamental; good fruit.

OLIVES.

The Olive is a native of the temperate sea-coast ridges of Asia and Africa. It flourishes and bears abundantly in the dry crevices of rocks, and on the most barren soils where no other fruit-tree or vine can live; its culture in California promises to be one of the most profitable industries. The cost of planting and cultivating an olive orchard is less than one-third of that of a vineyard.

Picholine.—The Italian olive; a rapid growing kind which bears young and, unlike the Mission olive, ripens its fruit in twelve months, so that it bears a crop of olives annually. The tree grows quickly, and is less subject to damages by insects than most other varieties; makes excellent oil and stands as the best for pickling. Price, 15 to 50 cents, according to size; in quantities, see wholesale list.

Seedling Olives from a hardy, northern-grown seedling tree. Price, 25 cents.

The olive crop can be gathered with more economy and celerity than grapes can, and the oil or pickles can be made with an outfit costing less than one-tenth the expense of one for making wine, and the crop can be disposed of within a week of gathering the berries. The trees give paying crops in five or six years, with an increase in quantity from year to year, which in its full development will pay several times as much as the best vineyard. The demand is unlimited.

HOVENIA DULCIS.

A Japanese tree similar in habit to our wild pear-tree; flowers in July; fruit resembles the Bergamotte pear. Price, 50 cents to \$1.00 each.

NANDINA DOMESTICA.

An elegant Japan plant with most beautiful foliage, variegated green, yellow, scarlet, and crimson; white flowers and bright red berries; very ornamental; hardy, out-doors. Price, 50 cents each.

MELON SHRUB.

This wholesome and delicious fruit, lately introduced from the highlands of Central America, thrives in some warm localities near the coast. The climate is too dry and frosty for it to succeed here. Bears fruit of the size of a duck egg. Cultivate same as tomatoes. Price, 25 cents each.

STRAWBERRY GUAVA.

The hardiest of all the guavas; fruit reddish purple, about the size of a Green gage plum; very fine for jellies and preserves; bears abundantly two or more crops per year. An evergreen, ornamental shrub, or small tree, very easily grown in pots or boxes; not quite hardy here during our coldest Winters. Price, 25 to 50 cents each.

ORANGES.

Seedling.—These are hardier and longer lived than grafted trees, and usually bear the highest flavored fruit; they are the best kind for planting in this section. Price, 50 cents to \$1.00 each, according to size.

Japan Hardy.—Four choice varieties, all of superior quality; imported, grafted, pot-grown trees—**Oval Fruited Mandarin, Round Fruited Mandarin, Seedless, and Edible Skinned.** Price, \$1.00 to \$3.00 each.

CITRUS JAPONICA.

Bears a small fruit similar to the Mexican lime; flowers in June and ripens its fruit in October; very refreshing eaten raw, and excellent for preserves; forms a low, bushy tree; very hardy. Price, \$1.00 to \$3.00 each.

GOOSEBERRIES.

Houghton's Seedling.—An American variety; fruit of medium size, abundantly productive and of very good quality. Price, 75 cents per dozen.

Downing.—An upright, strong grower; fruit large, oval, light green, sweet, juicy, and good. Price, \$1.00 per dozen.

Whitesmith, also called "**Berkeley.**"—The best of the large English varieties; very large, pale green. Price, \$2.00 per dozen.

CURRENTS.

In quantities, see wholesale list.

Cherry.—The most profitable currant; thrives almost everywhere. Price, 75 cents per dozen.

White Dutch.—Best white variety. Price, 75 cents per dozen.

Fay's Prolific.—New; fruit as large as the Cherry currant; more uniform; longer bunches and less acid. Price, 25 cents each.

Lee's Prolific.—Black; much used for jellies; very productive. Price, 20 cents each; \$1.50 per dozen.

Cassis' White-Black.—New; a white variety of the well-known black English currant. Price, 25 cents each.

Cuthbert Raspberry.

RASPBERRIES.

Price, 50 cents per dozen, except where noted; in larger quantities, see wholesale list.

Cuthbert.—One of the best red raspberries; thrives and bears abundantly almost everywhere.

Red Antwerp.—An old, well-known kind; very good.

Baumforth.—An improved Red Antwerp.

Brinckle's Orange.—Yellow, sweet, superior flavor.

Gregg.—A large and productive black raspberry.

Davidson's Thornless.—An old, well-known, sweet black-cap.

Shaffer's Colossal.—The largest raspberry in cultivation; a giant in cane, fruit, and productiveness; without doubt the most productive and valuable raspberry; none can compare with it in this locality; berry purplish red. Price, 10 cents each; \$1.00 per dozen.

Mendocino.—An improvement on our native California raspberry, hundreds of bushels of which are gathered every year. The plants which I offer are *seedlings* from an extraordinary plant found growing wild in Mendocino County six years ago, bearing large, sweet berries most abundantly; the berries are black, as large as most of the common cultivated kinds, and are generally considered to be much superior in flavor to any in cultivation. Price, 20 cents each; \$1.00 per dozen.

BLACKBERRIES.

Price, 50 cents per dozen, except where noted; in larger quantities, see wholesale list.

Early Harvest.—New; the earliest known blackberry, and at the same time one of the best. It is winning golden opinions wherever known, and coin to those who plant it, as *the whole crop can be marketed before the Lawton begins to ripen*. I have tried nearly all of the new early blackberries, and none of them so far are equal to this. Price, 75 cents per dozen.

Lawton.—The well-known berry grown almost exclusively for market and home use on this Coast; large, unequalled in productiveness, and very sweet and delicious when well ripened.

Kittatiny.—Good size, sweet, and productive.

Wilson, Junior.—An improved seedling of the Wilson; early and productive; berry very large. Price, \$1.00 per dozen.

Wachusett Thornless.—Valuable for the family garden, where high culture can be given; almost free from thorns.

Taylor's Prolific.—Very hardy and productive.

Aughinbaugh.—A variety of our California wild blackberry introduced about ten years ago; large, very early, and sweet. Price, \$1.00 per dozen.

Crystal White.—A white blackberry; quite prolific; berries sweet and pleasant. Price, \$1.00 per dozen.

Oregon Evergreen.—Superior to almost any other berry in sweetness and flavor; the fruit is of medium size, and ripens in the Fall after all other berries are gone; the top does not die down, and should not be shortened in; it will grow and increase year after year like a grapevine. Price, 20 cents each; \$2.00 per dozen.

Crataegifolius.—A new variety said to have been brought from the Himalaya Mountains of Asia; the plant is a strong, upright grower, and produces medium sized, sweet, red berries. Price, 25 cents each.

Japan.—Obtained in Japan three years ago from the mountains near Yokohama; it resembles a miniature grapevine in foliage and growth; fruit small, red; grows in clusters and ripens in November and December; quite ornamental. Price, 50 cents each.

Lucretia Dewberry.

Lucretia Dewberry.—A new trailing blackberry, bearing large, luscious berries in great profusion, which ripen two weeks before the Lawton. Price, 20 cents each; \$2.00 per dozen.

STRAWBERRIES.

Price, 50 cents per dozen; \$2.00 per 100, except where noted.

Longworth's Prolific.—Vigorous, healthy, hardy, and productive; the one most grown for market; a large, fine berry.

Wilson's Albany.—The old, well-known productive kind.

Sharpless Strawberry.

Sharpless.—A mammoth variety which thrives almost everywhere in California.

Monarch of the West.—Fruit large, pale red; one of the leading market berries on this Coast.

Crescent Seedling.—Dwarf plant, exceedingly productive.

Yokohama.—A Japan strawberry; large vigorous plant; productive; berries medium size, pale red; very good. Price, 75 cents per dozen.

Yosemite.—While on a vacation last summer in the wonderful Yosemite Valley, which is abundantly supplied with wild strawberries, a single cluster of very large leaved, vigorous plants was found loaded with sweet, light scarlet berries, nearly, or quite, as large as the Crescent Seedling, with the true wild strawberry flavor. The cluster of plants was removed to the nursery, and is now (last of October) bearing another crop of delicious berries. I offer plants for sale this season, knowing that my customers will be pleased with them. Price, 15 cents each; \$1.00 per dozen.

NUT-BEARING TREES.

A class of trees to which California soil and climate are peculiarly adapted, and one which has been greatly neglected, but is beginning to receive the attention which it deserves.

Most of the nut-bearing trees are longer than fruit trees in coming into bearing, yet some varieties, like the "Præparturiens" and "California Soft-shell" walnuts, and the Spanish and Japan chestnuts come into bearing as soon as apple, pear, or plum trees. They are all elegant shade trees, remarkably free from the attacks of insects of every description, make fine shelter belts around a farm, are long lived, and add greatly to the value of land, whether planted as shelter belts, in groves, or along avenues. Nut-groves have proved to be much more profitable even than orange-groves.

CHESTNUTS.

Price, 25 to 50 cents each, except Japan Mammoth; in quantities, see wholesale list.

Italian Chestnut.

Italian, or Spanish, bears the large nut of commerce. The trees grow vigorously in this climate, and commence to bear very young, often when only four or five years old. Some of my yearling trees, sold two years ago, bore fruit this Fall.

China Chestnut.—The trees and nuts closely resemble the Italian or Spanish.

Japan Mammoth Chestnut.

Japan Mammoth.—The *largest* and *sweetest* of all chestnuts; even sweeter and better than the American "Sweet Chestnut," and twenty times as large. The trees commence bearing in California when only four or five years old. It is *superior to all other chestnuts* in every respect. Some of the nuts were weighed last Spring before planting; *twelve of them weighed one pound two ounces*. A few old trees of the Japan Chestnut are growing in various parts of this State; all of them bear regular, heavy crops of mammoth, bright-colored, clean-looking sweet nuts. Many of the trees bloom in the nursery the *second year from the seed*, and I have seen them loaded with nuts at four years of age. The trees which I offer are grown in my nursery. The imported trees are worthless, as they are badly grown, and the few stubs of roots left are bruised so that they need nursing a year or two to bring them to life. Good trees with good roots, 50 to 75 cents each. Fresh nuts to plant, \$1.00 per pound.

American Sweet Chestnut.

American Sweet.—The nuts are much sweeter than the Italian or Spanish, but quite small. The tree grows well in cool, partially shaded places, but is not suited to the hot valleys of this State.

WALNUTS.

American Black.—Makes a large, spreading tree which bears here quite young. The wood is the black walnut of commerce, so highly valued for cabinet work. Price, 25 to 50 cents, according to size.

California Black Walnut.—The most rapid growing of all the Walnut family. One of the best for shade. The nuts are good, and the wood is said to be very valuable for cabinet work. Price, 25 to 50 cents, according to size.

English Walnut.—The common variety, grown from large, selected nuts. Price, 25 to 50 cents.

California Paper-shell.—The trees commence bearing when only four or five years old, and bear full crops every year; they are upright growers and

may be planted closer than the old kinds. They are the best trees to plant where other walnuts are troubled with late Spring frosts, as they do not start to grow or bloom as early by ten days as other varieties, and the fruit ripens a little earlier. The nuts bring four or five cents a pound more than the common English Walnut. The shell can be easily broken by the hand. The meat is white and unusually sweet. Price 50 cents to \$1.00, according to size.

Præparturiens Walnut.

Præparturiens, or Early-bearing Walnut.—A variety of the English Walnut which bears when three or four years old. The nuts are of good size, and the flavor is excellent. Price, 50 cents to \$1.00 each, according to size.

Pecan Nut.—A vigorous grower, and it appears to be perfectly at home in California. Pecan timber is very valuable. The tree is also profitable for the nuts, which are imported in large quantities. Price, 25 to 50 cents.

Siebold, or Japan Walnut.—This species, clearly distinct from all others, is found growing wild in the mountains of Northern Japan, and is without doubt as hardy as an oak. The tree grows rapidly and attains a very large size with a magnificent spreading top. The leaves are of immense size and of a charming shade of green. The nuts, which are produced in extreme abundance, grow in clusters of fifteen to twenty in a cluster, have a shell thicker than the English walnut but not as thick as the black walnut. The meat is sweet, of the very best quality, and can be removed entire. The trees grow with great vigor, and are easily grafted on our common walnuts, yet it comes perfectly true from seed, and this is the best way to raise it. All my trees of this variety were sold last season; I can only offer nuts this year. Price, 75 cents per dozen.

Butternut.—Bears a long, hard-shelled, rich, oily nut of fine flavor. The wood is valuable for cabinet work. Like all the other nut trees it commences to bear younger than it does in its Eastern home. Price, 25 cents each.

MISCELLANEOUS.

Asparagus (Conover's Colossal).—Price, one year, per 100, \$1.00; two years, per 100, \$2.00.

Asparagus (Palmetto).—A new giant variety. Price, 1 year, large plants, \$1.00 per dozen.

Rhubarb (Victoria).—A large, fine-flavored English variety. Price, 30 cents each, \$3.00 per dozen.

Rhubarb (Mammoth).—The largest variety. Price, 30 cents each; \$3.00 per dozen.

Horse-radish.—Roots. Price, 25 cents each; \$1.00 per dozen.

Ornamental Trees and Shrubs.

DECIDUOUS.

- White Ash.**—A fine shade tree; valuable timber. Price, 25 to 50 cents.
- European Ash.**—A large, spreading shade tree. Price, 25 to 50 cents.
- African Ash.**—An elegant, rapid growing shade tree, with long, drooping acacia-like foliage, which is of a rich purple color in Spring. Grafted trees, 50 to 75 cents each.
- Gold-barked Ash.**—Clear, golden-colored branches. Price, 25 to 50 cents.
- Catalpa Speciosa.**—Tall, rapid growing tree, with large leaves and clusters of pretty flowers. Price, 25 to 50 cents.
- Elm, American.**—A magnificent, large tree, with drooping branches. Price, 50 to 75 cents.
- Elm, Cork-barked.**—One of the best shade trees; rich, dark green leaves. Price, 50 to 75 cents.
- Box Elder.**—One of the best of our native shade trees; grows very fast. Price, 25 to 50 cents.
- Purple-leaved Plum.**—Wood, leaves, and fruit are purple; very ornamental. Price, 50 cents.
- Texas Umbrella Tree.**—A beautiful dark green leaved tree of medium size, which grows in the form of an umbrella; the blossoms are light blue, followed by white berry-like fruits in clusters. Price, 25 to 50 cents each.
- Double Scarlet Hawthorn.**—Elegant, small tree; covered in Spring with flowers like small roses. Price, 50 cents.
- Washington Poplar.**—Found growing wild in Washington Territory, and not before offered or described. The tree grows as fast as a blue gum and attains a great size; the leaves, which are larger than those of any other poplar, are light green on the upper surface and a silvery white underneath; it grows ten to fifteen feet from the cutting in the nursery the first year. Price, 50 cents each.
- American Wild Cherry.**—A fine, large tree, with broad, shining leaves. Price, 50 cents.
- Sicilian Sumac (true).**—Used for tanning purposes; also ornamental. Price, 25 to 50 cents.
- Golden Chain (Laburnum).**—A beautiful, small tree, with drooping yellow flowers. Price, 50 cents.
- Purple Flowering Laburnum.**—Rare, dwarf; very pretty. Price, 50 cents.
- Weigelia Alba.**—White; very distinct. Price, 50 cents.
- Weigelia Variegata.**—Leaves bordered with white; bright pink flowers. Price, 50 cents.
- Hydrangea Japonica.**—Flowers greenish yellow, changing to rose. Price, 25 to 50 cents.
- Hydrangea (Thomas Hogg).**—New; pure white flowers. Price, 25 to 50 cents.
- Hydrangea Variegata.**—Foliage deeply margined snow white. Price, 25 to 50 cents.
- Diectzia Crenata.**—An elegant, profuse blooming shrub. Price, 25 to 50 cents.
- Calycanthus Floridus (Sweet Scented Shrub).**—Large, brownish chocolate colored flowers. Price, 25 to 50 cents.
- Double Flowering Plum (*Prunus triloba*).**—Charming pink flowers. Price, 50 cents.
- Snowball.**—Well-known favorite white flowering shrub. Price, 25 to 50 cents.

EVERGREENS.

- Acacia Molissima.**—Charming, hardy Acacia, with feathery leaves and golden flowers. Price, 50 cents.
- Acacia Melanoxyton.**—Another hardy kind, with light yellow flowers. Price, 50 cents.
- American Arbor Vitæ.**—A compact growing tree. Price, 25 to 50 cents.
- Golden Arbor Vitæ.**—Dwarf compact tree; branches tipped golden yellow. Price, 50 cents to \$2.00.
- Monterey Cypress.**—Well-known evergreen of rapid growth. Price, 25 cents.
- Italian Cypress.**—Grows erect like a column. Price, 25 to 50 cents.
- Lawson Cypress.**—One of the most feathery and graceful of all evergreens. Price, 25 to 75 cents.
- Silver Cypress (*Retinospora*).**—A small, compact growing tree, with silvery blue foliage. Price, 25 to 50 cents.
- Monterey Pine.**—Well-known, rapid growing tree. Price, 25 to 50 cents.
- Swedish Juniper.**—A small, pyramidal tree, with bluish foliage; one of the finest evergreens for the lawn. Price, 25 to 50 cents.
- Camphor Tree.**—A magnificent, hardy evergreen; produces the camphor of commerce. Price, 50 to 75 cents.
- Banyan Tree.**—In its native country a single tree often covers half an acre of ground; not quite hardy here; very rare. Price, \$1.50.
- English Laurel.**—Well-known tree, with broad, shining leaves. Price, 50 cents.
- Portugal Laurel.**—A compact evergreen tree, with white, fragrant flowers. Price, 50 cents.
- Laurus Tinus.**—The handsomest Winter flowering shrub; bears abundance of clusters of pretty white flowers. Price, 25 to 50 cents.
- Round Leaved Laurus Tinus.**—New; a fine variety, having round dark green leaves. Price, 50 cents to \$1.00.
- Oleander.**—Well-known shrub; double scarlet flowers. Price, 25 cents.
- Polygala Grandiflora.**—A free blooming shrub, with purple pea-shaped flowers. Price, 25 to 50 cents each.
- Magnolia Grandiflora.**—One of the most beautiful of all the evergreen flowering trees; perfectly hardy here. Price, 50 cents to \$2.50.
- Magnolia Hypoleuca.**—A new Japanese Magnolia of great beauty; the leaves are a foot long, with a red mid-rib; flowers white, of exquisite fragrance. Price \$1 to \$2.
- Roman Myrtle.**—Small elegant shrub, with fragrant, glossy foliage and white flowers. Price, 25 to 50 cents.
- Pittosporum Tobira.**—A low, spreading shrub with fragrant white flowers. Price, 50 cents.
- Pittosporum Nigrum.**—A charming shrub with light green, wavy foliage. Price, 50 cents.
- Aralia Japonica.**—A fine large-leaved evergreen. Price, 50 cents to \$1.00.
- Aucuba Japonica.**—Compact evergreen shrubs. Price, 50 cents.
- Variegated Aucuba Japonica (Gold-dust Tree).**—Charming, large, glossy, gold-spotted foliage. Price, 50 cents to \$1.00.
- Privet, Giant Variegated.**—A new robust variety; it is greatly superior to any other privet; the leaves are broadly margined with golden yellow. Price, 50 cents to \$2.00.
- Tree Box.**—Dwarf, compact, elegant evergreen shrubs. Price, 25 cents to \$1.
- Dwarf Box.**—Like the above, but more dwarf. Price, 25 to 50 cents.
- Escallonia Montevidienseis Alba.**—A most desirable evergreen shrub for the lawn; gives an abundance of great clusters of snow-white flowers. Price, 50 cents.
- Escallonia Rubra.**—Thick, leathery leaves and red flowers. Price, 50 cents.

CLIMBING AND TRAILING SHRUBS.

- Virginia Creeper** (*Ampelopsis*).—A very rapid growing climber, with large, deeply cut leaves and purple berries. Price, 50 cents.
- Japan Creeper** (*Ampelopsis Veitchi*).—The most elegant creeper known for covering walls, trunks of trees, etc.; it will attach itself to a smooth wall and completely hide it with its pretty leaves. Price 50 cents to \$1.00.
- Trumpet Creeper** (*Bignonia Grandiflora*).—Bears scarlet flowers all summer. Price, 25 to 50 cents.
- Clematis**.—The most beautiful climbing, flowering plants in cultivation; they can be trained on lattice-work or on the ground; the flowers are large, often four to six inches across, and of various shades of color; they bloom almost the whole year around. Price, 50 cents to \$1.00.
- Ivy**.—English and Japanese Variegated. Price, 25 to 50 cents.
- Passion Flower** (*Constance Elliott*).—The new, white flowering, hardy variety; very choice. Price, 50 cents to \$1.00 each.
- Chinese Wistaria**.—Remarkable for rapidity of growth and beauty of flowers, which are light, porcelain blue, and appear in long clusters before the leaves. Price, 50 cents.
- White Wistaria**.—Like the above, except color of flowers. Price, 50 cents to \$1.00.
- Solanum Jasminoides**.—Rapid growing evergreen climber, with bluish white flowers. Price, 25 to 50 cents.
- Climbing Hydrangea** (*Schizophragma*).—The Japanese Climbing Hydrangea, white flowers. Price, 50 cents.

❖ ROSES. ❖

Santa Rosa is the "home of roses." The soil and climate combine to bring them to their utmost perfection. Some of the great European rose-growers who have visited this valley have said that in perfection of form and colors and abundance of bloom, they have never seen them equaled anywhere else. All my roses are grown in the open air. Price, 30 cents each; \$3.00 per dozen.

HYBRID PERPETUAL.

- Alfred Colomb**.—Fiery red, very perfect, extremely fragrant.
- Adrienne Duvivier**.—Dark, velvety crimson.
- Baron Rothschild**.—Velvety scarlet; large and perfect.
- Baroness Rothschild**.—Large, light pink, shaded rose; very distinct and beautiful.
- Coquette des Alpes**.—Pure white, sometimes shaded with blush; one of the very best.
- Emperor de Maroc**.—Deep velvety maroon.
- Eugene Appert**.—Large, scarlet, crimson shaded.
- Geant des Battailles**.—Medium size, brilliant crimson, very fragrant.
- General Jacquimenot**.—Dazzling scarlet, shaded velvet crimson; very large; free grower and bloomer.
- John Hopper**.—Brilliant rose, changing to crimson, very fragrant.
- La France**.—Large, gobular flowers of clear, shining, satin pink; one of the finest roses in existence.

Mabel Morrison.—Pure white, large.

Madame Charles Wood.—A magnificent, brilliant, red rose, large, full, and beautiful form.

Paul Neyron.—Extremely large, deep carmine, very fragrant.

Marshall P. Wilder.—A new American rose; brilliant crimson, large, free bloomer.

Prince Camille de Rohan.—Deep velvety crimson, free grower.

BOURBON AND CHINA.

Agrippina.—Fiery red, very double, profuse bloomer.

Green Rose.—Double, deep green, abundant bloomer.

Hermosa.—Bright, rosy pink, very full, always in bloom.

Louis Philippe.—Rich, dark velvety crimson, profuse bloomer.

NOISETTE.

All of those named in this list are climbers.

Celine Forestier.—Rich, canary yellow.

Claire Carnot.—Beautiful, coppery, rose flowers.

Cloth of Gold.—Clear, lemon yellow, large and full, very sweet.

James Sprunt.—Dark crimson, free bloomer and strong grower.

La Marque.—Large, sweet-scented white flowers in clusters; well known as one of the best.

Marechal Neil.—Large, beautiful, golden yellow buds and flowers, deliciously perfumed.

Southern Belle.—Large buds, beautiful, creamy rose color.

W. A. Richardson.—Orange shaded white, abundant bloomer; should be planted in a shady place to bring out its best color.

TEA.

Bon Silene.—Buds of great size and beauty, deep rose color, very sweet.

Bougere.—Large, full, double, very sweet tea scent.

Catherine Mermet.—Very double; flesh color, shaded rose, delightful perfume.

Cheshunt Hybrid.—Deep red, very large and distinct.

Coquette de Lyon.—Rich, canary yellow; very pretty buds and flowers, almost always in bloom.

Devoniensis.—Magnolia rose, creamy white with rosy center; delightful, sweet tea scent.

Eliza Sauvage.—Pure white.

Etoile de Lyon.—Large, rich, yellow flowers, charming buds; a vigorous grower of good habit; one of the best of roses.

Gloire de Dijon.—An old, well-known, climbing rose, large, tea-scented, rich, creamy yellow, shaded amber.

Homer.—Salmon rose, beautiful buds, free bloomer.

La Jonquil.—Daffodil yellow, very distinct.

Madame Lambard.—Bright, rosy crimson; a most beautiful rose.

Miss Edith Gifford.—White, tinged pink; beautiful both in bud and bloom,

Niphetos.—Noted for its large, long, snow-white buds; blooms nearly all the year.

Perle des Jardins.—Straw color, large, full and perfect; one of the finest of all roses.

Safrano.—Apricot yellow, beautiful buds.

Sombreuil.—Immense flowers; white, tinged rose; blooms in clusters.

Souvenir d'un Amie.—Salmon, shaded rose, large, globular buds.

Triumph de Luxembourg.—Rosy blush on copper ground, flowers large and fragrant.

Grace Darling.—Cream white shaded pink, vigorous.

Countess of Pembroke.—Soft, satiny rose color.

MOSS ROSES.

Glory of Mosses.—Robust grower, blush.

James Veitch.—Very double, sweet, very mossy, bright, rosy crimson.

Cristata.—Buds very heavily mossed.

Perpetual White.—Blooms in clusters, very mossy.

VARIOUS ROSES.

Banksia.—*White* and *Yellow*. Small white and light yellow flowers in clusters; perfectly thornless; climbers.

Scotch Briar.—Small white flowers, very distinct.

Rosa Rugosa Rubra (Japanese Rose).—Splendid border shrubs; flowers semi-double, large, deep rose, tinged violet.

Rosa Rugosa Alba.—Single white; dark, rich, glossy, peculiar looking leaves.

Mademoiselle Cecille Bruner.—One of the most charming little roses ever seen, always in bloom, flesh color, tinted salmon.

Cherokee.—A beautiful, snow-white climbing rose with elegant dark green, glossy leaves.

Baltimore Belle.—Pale blush, blooms in clusters, rapid climber.

Bridal Rose (*Rubus Rosæfolius*).—Pretty leaves and large white flowers.

The "Giant Rose Bush of Santa Rosa" (*Lamarque*), which used to grow on our main street and about which so much has been written, has been removed to make room for buildings. Plants grown from the original "Giant," 30 cents each.

HEDGE PLANTS.

Monterey Cypress.—Makes a fine hedge in a short time. Price, \$2.00 to \$5.00 per 100.

Golden Arbor Vitæ.—Forms an elegant low hedge. Price, \$5.00 to \$10.00 per 100.

Laurestinus.—The very best ornamental flowering hedge plant. Price, \$8.00 to \$12.00 per 100.

Roman Myrtle.—Produces a compact, rich, glossy green hedge. Price, \$5.00 per 100.

Common Privet.—Well-known hedge plant, very pretty. Cuttings, 75 cents per 100.

- Golden Privet.**—A new, very robust, growing privet with golden foliage, nothing can surpass it in elegance. Cuttings, \$3.00 per 100.
- Dwarf Box.**—The best permanent low edging for borders of walks and beds. Price, \$5.00 to \$10.00 per 100.
- Tree Box.**—Makes a taller edging or low hedge of the brightest green, really elegant. Price, \$5.00 to \$10.00 per 100.

BULES, TUBERS, ETC.

- Calla Lilly.**—Well known, pure white. Price, 25 cents.
- Dahlias.**—Finest double, various colors. Price, 25 cents.
- Day Lilly.**—Large glossy leaves, bluish white flowers. Price, 25 cents.
- African Lilly** (*Agapanthus*).—A fine hardy plant. Price, 25 cents.
- Amyrillis** ("Bella Donna Lilly").—Large, charming, rosy red flowers. Price, \$1.50.
- Amyrillis Johnsoni** (King Lilly).—Very large, wine red with white stripes. Price, \$1.50.
- Amyrillis**—Various colors. Price, 75 cents.
- Lillium Auratum.**—Golden-banded Lilly. Price, 50 cents.
- Lillium, Speciosum Album.**—White Japan Lilly. Price, 50 cents.
- Lillium, Speciosum Rubrum.**—Red Japan Lilly. Price, 50 cents.
- Lilly of the Valley.**—White. Price, 25 cents.
- Iris** (Variegated).—Very showy. Price, 50 cents.
- Lemon Lilly**—(*Hemerocallis Thunbergi*).—A new dwarf species from Japan, with most elegant large, clear, lemon yellow flowers in abundance. Price, 25 cents.
- Variegated Lemon Lilly** (H. Kwanso, Variegata).—Deep green leaves broadly margined white; double copper-colored flowers. Price, 75 cents.
- Double Tuberos Sunflower.**—As double and perfect as the finest dahlia; golden yellow color, easily grown. Tubers, 15 cents each; 50 cents per dozen.
- Rheum Giganteum, Rheum Emodi, and Rheum Palmatum Tanguiticum.**—Three rare and curious ornamental species of rhubarb for the lawn. Price, 50 cents each.
- Gladiolus.**—Magnificent collection of four hundred of the finest kinds, mixed, including every shade of color known in this class of plants; a large bed of them in bloom on a lawn is a grand sight. Price, 10 cents each; 75 cents per dozen; \$5.00 per 100.
- Begonias, Tuberos.**—Rooted. Price, 25 to 50 cents.
- Begonias, Giant Tuberos.**—New; immense scarlet, crimson, yellow, and white flowers, *often three to five inches across*. Price, \$1.50 each.
- Begonias Rex.**—New varieties; brilliant colored leaves. Price, 50 cents; \$3.50 per dozen.

PALMS, YUCCAS, ETC.

- Chamærops Excelsa.**—The best of the hardy fan palms. Price 50 cents to \$25.00 each, according to size.
- Chamærops Humilis.**—A fine, hardy dwarf fan palm. Price, 50 cents to \$5.00.
- Chamærops Tomentosa.**—Woolly leaf stalks. Price, 50 cents to \$5.00.

- Chamærops Argentea.**—Silvery foliage. Price, 50 cents to \$5.00.
- Corypha Australis.**—A fan palm of great beauty, not quite hardy here. Price, 50 cents to \$3.00.
- Phoenix Reclinata.**—A very graceful date palm, not hardy here. Large plants, \$5.00 each.
- Seaforthia Elegans.**—Elegant palm for green-house or garden decoration. Large plants, 5.00 each.
- Agave Americana** (Century Plant).—The variegated leaved variety. Price, 25 cents to \$2.00.
- Cordyline Indivisa.**—Australian dragon palm, rapid growing variety, hardy. Price, 50 cents to \$5.00.
- Yucca Filamentosa.**—Adam's needle and thread. Price, 25 to 50 cents.
- Yucca Aloefolia Variegata.**—An elegant Yucca; the short, stiff, spiny leaves are broadly margined yellow, grows six to ten feet high, bearing clusters of yellowish white, lilly-like flowers; the finest of all the Yuccas. Price \$1.00 to \$5.00 each.

BEDDING PLANTS.

Pinks, Pansies, Violets, Petunias, Verbenas, and other bedding and border plants are grown in large quantities, and can be supplied during the Winter and Spring. Price, 25 to 75 cents per dozen.

A new Perennial Pink.—A *white* variety of the old, well-known, deliciously fragrant border pink; nothing can be finer for a border than this new pink, as soon as it can be had in quantity. Price, 25 cents each; \$1.50 per dozen.

BUDS AND GRAFTS.

These can be supplied of most varieties of fruit trees in any quantity at reasonable rates; they can be safely sent 5,000 miles or more, if properly packed.

The following testimonials, most of which have been received during the past few months, are from well-known nurserymen and others, who ought to know what good stock and good packing is:

DIXIE NURSERY, THOMASVILLE, GA., March 3, 1886.

The cinnamon trees came safe to hand in seven days; they are in splendid condition. Many thanks; when I can serve you let met know.

H. H. SANFORD.

DENNISON NURSERIES, DENNISON, TEX., February 22, 1886.

Plants received O. K.

T. V. MUNSON.

MARKSVILLE, LA., September 8, 1886.

Buds received in good condition. Many thanks for your liberality.

J. L. NORMAND.

FRUITLAND NURSERIES, AUGUSTA, GA., December 2, 1885.

The bale of trees reached me in good order.

P. J. BERCKMANS.

LONE STAR NURSERIES, MAHOMET, TEXAS, September 27, 1886.

The buds came in the best order we ever received any; the same time, accept our thanks for extra buds.

MAHOMET, TEXAS, March 16, 1886.

The plants came to hand in splendid good condition. Please accept our thanks for your generous liberality. The Japan Pear Seed is starting so finely we have concluded to try some more.

A. M. RAMSEY & SON.

FANCHER CREEK NURSERY, FRESNO CITY, CAL., October 6, 1886.

Buds received in good order. Please send the following additional buds:

GUSTAV EISEN.

WAYNESBORO, PENN., March 20, 1886.

The Japan Chestnuts received, for which please accept my sincere thanks; they are indeed a wonder and a curiosity.

E. B. ENGLE, cor. Sec. Penn. State Horticultural Society.

ALTAMONTE NURSERIES, ALTAMONTE, ORANGE CO., FLORIDA.

Bale of trees came O. K. and opened out satisfactorily.

H. L. WHEATLEY.

SEDALIA NURSERIES, SEDALIA, MO., September 16, 1886.

The buds came all right.

PHIL. PFEIFFER.

FRUITLAND NURSERIES, COLUSA, CAL., February 22, 1886.

The trees arrived in splendid condition; they are better trees and have better roots than I have got anywhere else. You know how to pack trees.

J. M. AGNEW.

CINCINNATI, OHIO, March 10, 1886.

The Japan Mammoth Chestnuts came duly to hand, and were really a surprise to me. If they prove hardy and meet all that is claimed for them in this climate, quite a boom will be started for them.

F. J. AHLERS.

FAIRBURY, NEB., August 17, 1886.

The buds received in fine condition, accept our thanks.

CARPENTER & GAGE,

Nurserymen and Publishers of the *Nebraska Horticulturist*.

SARCOXIE NURSERIES, SARCOXIE, JASPER CO., MO.

Buds received O. K.

JAMES B. WILD & BRO.

FACTORYVILLE, PA., October 8, 1879.

Your Seedling Potato continues to give the most unbounded satisfaction, and if you have anything that you can recommend as equal to or better than that in any way, we think it will sell.

ISAAC F. TILLINGHAST.

SWATOW, CHINA.

All the trees arrived safely.

HENRY SAGE.

“A good tree takes no more room than a poor one. Have the good one.”

A very attractive place to visit on the suburbs of Santa Rosa, is the Nursery and Floral Grounds of Luther Burbank, the skilled horticulturist and accomplished florist, who has done so much to adorn and beautify conservatories in town, and to propagate choice and healthful plants and trees all about the country. Careful and conscientious, and devoted to his calling, in which he is a master, he works and deals in a thorough manner, and merits the good name and increasing business which this community award to him. An hour in his grounds is an hour delightfully passed.

—*Santa Rosa Republican.*
