Standard and Early Sweet Potatoes

Nancy Hall, This is one of the earliest Sweet Potatoes grown, and one of the best in quality. Is ready to gather in 90 days from planting of slips. Can be planted as late as August and will mature before frost in Georgia or any Southern State.

Vines deep green, very large and heavy. Potatoes large, skin golden yellow, flesh deep yellow, of fine flavor and sweet; good keeper and very productive. Supply limited. Price per pound by mail, 25c., 4lb. package 75c. By express or freight, buyer to pay charges, 1 peck 60c., half bushel \$1.00, 1 to 10 bus. \$1.25 per bushel, 10 bushels and over to one address \$1.20 per bushel.

We advise shipment by Express, as freight is slow and uncertain.

Triumph, Very large, smooth, oval, yellow skin and flesh, sweet good keeper and very productive.

Pumpkin Yam, Well known, productive, sugary. This and Triumph, same price as Nancy Hall.

Vineless, OR BUNCH YAMS, large, smooth, deep yellow flesh, peck 75c., half bushel, \$1.25, \$2.00 bushel.

Willet's Early Red Skin, Earliest, yellow, sweet meat. Bus. \$2.00 pk. 75c, \$4.25 bbl.

Forty to Hill Potato, Wonderful and good. Same price.

Sweet Potato Plants Ready May and June.
25c. 100, \$1.75 per 1000

Follow Nature's Own Plan

of increasing the fertility of the soil by growing leguminous crops. Stimulate their growth and increase their yield by using

The Mulford Nitro-Germ

THE MULFORD NITRO-GERM contains harmless, but living, active, nitrogen-fixing bacteria of the proper strain which, under favorable soil conditions, forms nodules on the roots of leguminous plants.

These nodules will convert nitrogen from the air into nitrates, suitable as food for the plants.

Available nitrates help the growth and development of legumes and other plants, and increase the yield.

Legumes enrich and renovate the soil and are rich in food value for man and beast.

The cost of seed or soil inoculation with The Mulford Nitro-Germ is small—the returns are large.

Try it on YOUR next planting of Clover, Alfalfa, Soy Beans, Field Peas, Vetches, and all legumes.

Write to-day for free booklet describing the preparation and use of
THE MULFORD NITRO-GERM

H. K. MULFORD COMPANY

Manufacturers of Pharmaceutical and Biological Products

PHILADELPHIA, U. S. of A.

The Mulford Nitro-Germ

is supplied for inoculating the following legumes (a specific strain of bacteria for each different legume):

Alfalfa (Lucerne)	Berseem Clover.	Perennial Peas

COTTON SEEDS

Of Early and Long
Staple Varieties

OFFERED BY
MARK W. JOHNSON SEED COMPANY
OLDEST SEED HOUSE SOUTH
35 SOUTH PRYOR ST., ATLANTA, GEORGIA

In order to beat the boll weevil it is necessary to plant the earliest varieties of cotton seeds to be had. Our facilities for furnishing these are such as to enable us to supply them in any quantity from 1 bushel to carload lots (1000 bushels to carload) at most reasonable prices, if early application is made.

The following are the leading early varieties:

A MARVELOUS EARLY COTTON.

Willets Ideal Big Boll, the earliest and most prolific big boll, a leader for boll weevil sections. That is to say that for every 100 pounds of Seed Cotton, it gives out 38 to 40 pounds of lint. Well proportioned stalk, large boll, easily picked, storm and drought proof, and yields as much per acre as any variety now in cultivation. This early marvel was originated near Augusta, Ga. Earliest Big Boll. Original bags put up as follows:

One peck, \$1.00; ½ bushel, \$2.00; 1 bushel at \$3.00; 5 to 10 bushels, at \$2.75 per bushel. 25 to 50 bushels at \$2.50; 100 bushels at \$2.25.

King's Early N. C. Stock—well known and very popular; being of small bush, can be planted thick. Usual length, short staple, 100 to 102 bolls make a pound. Yields 38 pounds lint to 100 pounds seed cotton. \$1.50 bushel; 5 to 10 bushels, \$1.35; 25 to 50 bushels, \$1.10; 100 bushels at \$1.00 bushel.

Toole Improved Cotton—Similar to King's, but larger growth, large boll and nearly as early, immensely prolific, 90 bolls to the pound. One of the most popular early varieties grown. Usual length staple. \$1.50 bushel; 5 to 10 bushels at \$1.30; 25 to 50 at \$1.10; 100 at \$1.00.

Simpkins Early Prolific—Ten days earlier than King's, larger boll, larger yield and more lint per 100 pounds of cotton seed. \$1.50 bushel; 5 to 10 at \$1.25; 25 to 50 at \$1.10; 100 at \$1.00.

Triumph Big Boll—Mebane's Early. The earliest big boll variety. It is truly an immense boll variety, 40 bolls making 1 pound of seed cotton. Yields about 40 per cent lint per 100 pounds seed cotton. Very popular in the boll weevil regions of Texas, maturing only about one week later than King's.

The immense bolls—mostly 5 lock—are so much easier picked than small types that a hand can pick 50 per cent. more a day. \$1.75 bushel; 5 to 10 bushels at \$1.50; 25 to 50, at \$1.35; 100 bushels, \$1.25.

World's Wonder Cotton—A tall and beautifully shaped plant, quite early. Medium size bolls, 70 to the pound; immensely productive; very popular. Has sold at \$10.00 per bushel. We offer finest selection of seed at \$1.75 per bushel; 5 to 10 bushels at \$1.50; 26 to 50 bushels at \$1.25 per bushel.

Texas Bur Early Prolific \$1.50 Bushel, 10 Bushels and over \$1.25 Bushel.

MARK W. JOHNSON SEED CO.
Oldest Seed House South.
35 South Pryor St., Atlanta, Ga., U. S. A.

All anti-boll weevil.

Sea Island Cotton—This famous long staple cotton is now being successfully grown in some sections of the uplands of the Cotton States. Its staple being twice as long and selling for over twice the price of the best uplands makes its culture very desirable. Price per pound, postpaid, 35c; 3 pounds \$1.00, by express or freight, you to pay express or freight, \$2.25 bushel; 5 bushels at \$2.00; 10 bushels at \$1.80; 75c peck. Anti-wilt variety 1 pound mail 40c, by bushels at \$2.00; larger lots at \$1.80 bushel. All sea island Cotton weights 42 pounds per bushel.

Allen's Long Staple, ¼ inch, \$1.85 bushel; 25 to 50 bushels at \$1.35.

Sunflower Long Staple, ½ inch, \$1.75 bushel; 25 to 50 bushels at 1.40 bushel.

Columbian Long Staple, ¼ inch, \$2.00 bushel; 5 to 10 bushels at \$1.75; 25 to 50 bushels, \$1.65.

Keenan Long Staple, ¼ inch to 1¾ inch, same price as Columbian.

Webber Big Boll Long Staple, ¼ inch, \$2.00 bushel; 5 to 10 bushels at \$1.85; 25 to 50 bushels at \$1.75.

Florodora Long Staple, large, well proportioned stalk, large boll and very productive. Per bushel, \$1.75; 5 to 10 bushels at \$1.50 bushel; 25 to 100 bushels at \$1.25 bushel.

Egyptian Cotton—Staple 1½ to 1¾ inches long. One pound postpaid 40c. By express at your expense, per peck \$1.00; per bushel \$2.75; 5 bushels or over at \$2.50.

The cottons mentioned in this circular are well known and well tried early maturing varieties under their true names, and may be relied on.

In addition we furnish forty or fifty varieties of the leading short and long staple upland cottons, and will send prices on application.

Cabbage Plants

Important to Growers of EARLY CABBAGE

**A Crop of CABBAGE Produced Ten Days to Two Weeks Earlier
than you Now Produce yours, Would Make You Double the Profit**

By using our **Hardy Frost-Proof Cabbage Plants** you can mature a crop of Cabbage tendays or two weeks earlier than they can be grown from plants raised in hot-beds and cold frames, for the reason that our Hardy Frost-Proof Cabbage Plants can be set in the field before danger of frost and freezes is past. [This can not be done with cold-frame plants.] They become rooted and established while the land is still cold, and as soon as spring weather opens up the established root growth assimilates the fertilizer, the plants grow off rapidly and mature a head cabbage from ten days to two weeks earlier than your earliest cold-frame plants.

Plants grown in interior, away from the islands and salt air, will not do to risk for Early planting,

We can fill orders any time from December 1st to April 15th

**Varieties—Early Jersey Wakefield, Charleston Large Type Wakefield,
Succession and Short-stemmed Late Flat Dutch.**

PRICE: F. O. B. Express Office, lots of 1,000 to 5,000, \$1.25 per M; 5,000 to 9,000, \$1.15 per M; 10,000 and over, \$1.00 per M. Plants are packed in cases holding either 500, 1,000 or 2,000 plants to case. Order in these quantities. Five hundred plants are sold for \$1.00. Ready from December to April.
