

THE ECONOMIST.

will be taken rather in commodities than in specie. And, secondly, the autumn flow of currency from the American reserve banks to the Southern and Western States is likely this year to be smaller than it has been during the past two seasons. In his report for 1880 the United Sates Comptroller of Currency states that both in 1879 and 1880 the currency withdrawn from New York and other centres for the purchase and shipment of produce, instead of returning to the banks, as it formerly did, after the crops had been moved, remained in the agricultural the crops had been moved, remained in the agricultural districts to which it had been sent. In these, therefore, the supply of money must now be much larger than formerly. Their drafts upon the reserve centres may, con-sequently, be expected to be somewhat smaller this year, and if the New York and other banks are subjected to a less heavy drain, they will have the less need to draw gold from abroad. Even, moreover, if the drain upon the banks is as severe as in the past two years it has been, it will be much more easily provided for. Both in 1879 and 1880, as will be seen from the following statement, the United States Treasury was accumulating gold. AMOUNT OF GOLD IN UNITED STATES TREASURY.

August 1, 1879 January 1, 1880	23,636,000 29,239,000	
Increase	5,603,000 £	
August 1, 1880 January 1, 1881	23,055,000 30,043,000	

6,988,000 available for the wants of the money market. Now, how-

ever, the Treasury, instead of gathering in gold, will, until the beginning of October, be paying out many millions for the redemption of its unconverted bonds; and to the extent of its disbursements, it will obviate the necessity for the importation of gold from abroad. The probability, therefore, seems to be that America will not this year make any great demands upon the European stocks of gold, and if she does not there should be little difficulty in supplying Italy with all she needs.

THE TRANSVAAL DEBATE.

THE House of Commons refused on Monday night, by a decisive majority, to censure the Government for its policy in reference to the Transvaal. None but the most devoted partisans profess to feel anything like enthusiasm for the way in which this difficult and disagreeable question has been handled by either the late or the present Ministry. But neither can any fair-minded critic, upon a full review of the facts, deny that for each step in what has proved to be a succession of misadventures, there was at the time, if not a sufficient justification, at least a reasonable excuse. The initial error of annexation was in no sense an act of wanton and motiveless aggression. The proceedings of Sir T. Shepstone were ratified by both parties in the State, under a genuine belief in the reality of the alleged acquiescence of the Boers, and with an honest desire to protect South Africa as a whole from a pressing danger. The second mistake, which consisted in not giving back their independence to the Boers a year ago, was made equally in good faith. The Liberal Cabinet were informed, on the best possible authority, that the reluctance of the large majority of the white population was dying away, that the Dutch leaders were taking office under the Imperial Government, and that to restore the old state of things would be to plunge the Transvaal into civil war, and to destroy the possibility of confederation. No body of responsible statesmen, believing all this to be true, could have ventured on doing what we now, knowing the real facts, see that the Government ought to have done. In the same way the apparent inconsistency between the declaration in the Queen's speech in January that her authority must be re-established, and the ultimate renunciation of her sovereignty in March, would hardly have been noticed but for a chapter of accidents. It was, no doubt, unfortunate that the Ministry should have put such language as they did into the Queen's mouth, when they were at the time, as their conduct during the next fortnight shows, and as they themselves now maintain, ready and willing to treat

with the Boers, and to treat with them substantially upon the same basis as that which was subsequently adopted. But they could not foresee that, after the negoadopted. But they could not foresee that, after the nego-tiations had actually been begun, the rashness of a brave but ill-judging general would spontaneously expose a British force to defeat. Still less could they have expected that after experiencing one disaster he should, without waiting to be adequately reinforced, twice court a repetition of it. Most sensible people will agree with Mr Cham-berlain that these repulses did not really alter the conditions of the problem, and that if it was expedient on

general grounds of policy to give back the Transvaal to the Boers in January, it was equally so in March. Nor can it be denied that the overwhelming force which was rapidly despatched under the command of Sir F. Roberts was a sufficient proof, if proof were needed, that the resources of the British Empire were equal to the task of coping with a few thousand Dutch farmers. But unquestionably the effect of Sir G. Colley's defeats was completely to alter the impression produced by the Ministerial policy. If they had not happened, the substantial justice of the Boers' demands would have been readily recognised, and the proposal to retire from the Transvaal would have provoked little more protest than did the retrocession of the Orange Free State in 1854. But, as events turned out. the concessions which it now appears that the Government was from the first prepared to offer had too much the air of having been wrung from them by successful defiance, to be easily acquiesced in by a proud and tenacious people.

The sum of the matter, so far as the past is concerned, is briefly this-that we went into the Transvaal under an honest mistake; that we remained there in unconscious blindness; and that our tardy retirement was clouded by a series of regrettable misadventures. That more adroit-ness might have been shown in repairing the original blunder may well be, but the House of Commons rightly felt that the persons who were responsible for that blunder were not entitled to complain. But the vote of Monday night meant something more than this. Whatever dissatisfaction there may be in the country at the proceedings of the Government in this matter has been aroused rather by the way in which a settlement has been brought about than by the settlement itself. It is, of course, impossible, until the Commission has reported, and we have a clearer idea than is at present attainable of the future status of the several elements which make up the population of the Transvaal, to pronounce any final judgment upon the Ministerial policy. But its main principle—the retrocession of the country to the Boers, subject to such conditions as our obligations to the natives and the English immigrants may require is generally felt to offer, not, indeed, an ideal arrange-ment, but the best way of escape from a perplexing situation. It is difficult to believe that Sir M. Hicks Beach was serious in his suggestion that the Transvaal should be governed from Downing street as a Crown colony. If one thing has been more clearly demonstrated than another by the history of our dealings with the Boers during the last four years, been more it is the defective knowledge and imperfect insight of the Colonial Office and its representatives. With the single exception of Sir Garnet Wolseley, every official reporter seems to have lacked either the capacity to gauge the real temper of the Boers, or the courage to tell his superiors what he saw and heard. The Office was kept equally in the dark as to the state of public feeling at the Cape with regard to confederation. The Transvaal itself appears to have been administered with a misplaced energy and a lamentable want of tact, which added fresh energy to the instinctive dislike of the Dutch for British rule. The protests of the Boer leaders came to Downing street discredited in advance, and were dismissed as part of the regular stock in trade of interested and intriguing agitators. Representative institutions were promised, but delayed from year to year, until the last chance of conciliation was irrecoverably gone, and with it all hope of governing the Transvaal from England except as a subjugated dependency under military rule.

It is, in fact, the strongest argument in favour of giving up the Transvaal that the only alternative policy which has been, or can be, suggested, is that it should be treated as a Crown colony. The objections to retrocession, even

THE ECONOMIST.

with a reserved right of suzerainty, are not inconsiderable. But they fade into insignificance when compared with the manifeld difficulties, moral, political, and financial, involved in any attempt to administer the affairs of such a country as the Transvaal against the will of such a population as the Boers. History has a curious way of repeating itself in South Africa, and this is not the first peating itself in South Africa, and this is not the first time that we have given back territory which we had im-providently occupied. Our relations with the Orange River district in 1848-54 present at many points a striking resemblance to our more recent dealings with the Transvaal. The Orange River territory was annexed in 1848, as was the Transvaal in 1877, by an enter-prising British officer who exceeded his instructions. Its population, like that of the Transvaal was Its population, like that of the Transvaal, was composed for the most part of native tribes, amongst whom some thousands of Dutch farmers, flying from British rule, had settled themselves. The annexation was justified, as in the case of the Transvaal, and with an equal disregard of the real facts, on the ground that it was desired by a large majority of the Boers. After the experiment of English administration had been tried for five years it was abandoned as unworkable. Then, as now, it was alleged that the natives would suffer from the withdrawal of our rule. Then, as now, the claims of British settlers who had invested capital in the country on the faith of the new state of things were vigorously pressed, and, indeed, it appeared upon inquiry that no less than 2.500,000 acres of land had been "acquired" by 140 English proprietors, a large proportion of whom were non-resident. The humiliation of retirement, the consequent sacrifice of prestige, the probability of future danger to the Cape Colony and Natal, were as strongly insisted upon by Mr Adderley in 1854 as by Sir M. Hicks Beach in 1881. Nevertheless, the retrocession of the Orange River territory was effected with the general consent of both parties in the State. The result has been that not one of Mr Adderley's gloomy predictions has been fulfilled. The Orange Free State will compare favourably with almost any community in South Africa. Boers and English live there side by side without friction or hostility ; the native difficulty does not seem to make itself seriously felt; and of the friendly relations between the Free State and the Cape Colony ample proof was given during the recent Basuto war. The two cases are not in all respects parallel, but the analogy between them is sufficiently great to encourage a hopeful view of the future prospects of the Transvaal under the new régime.

AUSIRIA AND THE SOUTHERN SLAVS.

THE recent pilgrimage of the Catholic Slavs of Austria to Rome has tempted many journalists on the Continent and one or two in England to indulge in far-reaching, if somewhat baseless, speculations as to the future course of Austrian ambition. In the opinion of these writers the pilgrimage was prompted rather by State craft than by piety. Its author was a political ecclesiastic, and its object was to encourage all Roman Catholic Slavs to look to Austria as their natural head. If Russia had gained influence in time past by posing as protector of the faith to the Greek Christians groaning under the yoke of the Infidel, Austria might hope in a similar way to make political capital out of religious sympathy by appearing as the champion of Roman Catholicism in Eastern Europe. This vague and visionary interpretation of a seemingly innocent underdertaking would never, perhaps, have obtained even temporary credence had not the pilgrimage been commented upon with extreme acerbity by the Panslavist press of Moscow. In the opinion of these gentlemen, at any rate, there was something in it. Panslavism, they despairingly exclaimed, would become a hopeless dream if any large number of Slavs should learn to look elsewhere than to Moscow for the realisation of their national hopes. Russia had made a mistake in basing her claim to the allegiance of the Slavs outside her borders upon similarity of religion. She ought to have taken her stand upon the broader ground of unity of race.

The particular occasion of all this flutter may seem trivial, but in their general alarm at the growth of Austrian power in South-Eastern Europe, the Panslavists are, from their point of view, undoubtedly in the right. Only a few years back their prospects, as far as the Balkan

peninsula was concerned, were of the brightest. Not only in Moscow, but throughout Europe, Russia was regarded as the one possible successor of the Porte. The chief reason that induced the Western powers to prop up as long as they did the tottering fabric of Turkish rule was the conviction that there was no alternative to the preservation of Turkey but the aggrandisement of Russia. It has now become abundantly evident that there are other alternatives, and the particular possibility which the Panslavists are naturally most afraid of is the supremacy of Austria from the Danube to the Ægean. Such a supremacy is, at present, indeed, as far from realisation as that transference of Russian headquarters from St Petersburg to Constantinople, which excitable politicians once regarded as so imminent. It may well be, and impartial people will find comfort in the thought, that with Russia and Austria neutralising one another, an independent existence is yet in store for the small states which have sprung up out of the ruins of Ottoman dominion. But whatever may be the ultimate result, there can be no doubt that Austria is at present making the most of the advantage given her by the Treaty of Berlin. That Treaty was the starting-point of a new and more vigorous policy on her part. Her statesmen had always looked with dread upon the growth of Russian influence in the South-east. When opportunity offered they had put a spoke in the wheel of their ambitious neighbour. But with the occupation of Bosnia and Herzegovina active rivalry was substituted for uncertain interference, and Austria appeared as the open competitor of Russia for the control of the newly emancipated vassals of Turkey. The exhaustion and domestic distresses of her rival, joined to the undisguised encouragement of Germany, have enabled her thus far to pursue this policy with success. It is a policy prompted by her commercial interests, and favoured by her geo-graphical position. That the mouths of the Danube should never be wholly out of their power has naturally always been a cardinal object with the statesmen of Vienna, and Germany and Austria alike are interested in having an outlet to the Black Sea and the Ægean. And now that Austria has begun to assert herself in this direction, the circumstances which make in her favour, but which for a long time were strangely ignored, have become apparent to everyone. Strategically, she is in a much better position than Russia. Her power is closer at hand, Servia is actually within her grasp, and if Bulgaria may with reason be spoken of as a Russian outpost, Roumania might, in case of a struggle, prove a yet more efficient outpost of Austria. How well Austria now realises her strength, and how determined she is to avail herself of her opportunities, the history of the last two or three years has sufficiently shown. The advantages which she has extorted from Servia by her commercial treaty, her claim for a casting vote on the Danubian sub-commission, the eagerness with which she urges the completion of railway communication between Belgrade on the one side, and Constantinople and Salonica on the other, are facts of unmistakeable significance. That Austria should wish for commercial and political supremacy in the Balkan peninsula is perfectly natural, and is nothing new. What is new in her attitude is the consistency and the zeal, not to say the aggressiveness, with which she presses forward to the attainment of her objects.

So much is plain, and it is sufficient to account for the distrust with which Austria is regarded by her dependent neighbours. But it would be rash to assume that Austrian statesmen, however desirous they may be of extended influence, have any deliberate plans of aggrandisement. And even if they harboured such designs, there is a great difficulty in the way of their accomplishment, which has been strikingly illustrated by recent events. That difficulty is the disfavour with which the two races, who are still practically dominant in the two halves of the Austrian Empire, the Germans and the Magyars, would regard any fresh increase in the number of Slavs under Austrian rule. Even if there was no resistance from without, every attempt to enlarge the dominions of the House of Hapsburg would meet with the most strenuous opposition from within. To extend the borders of Austria to the south-east would increase the number of slavs subjects, and so place the Germans and Magyars in a more decided minority. It was for this reason that the domi-

THE ECONOMIST.

[July 30, 1881.

nant races, whose supremacy is already imperilled, viewed with such unfavourable eyes the annexa-tions which were sanctioned by the Treaty of Berlin. And the fears which inspired their opposition at that time have certainly not been dispelled by anything that has happened since. The Magyars have, indeed, succeeded in preventing the return of any considerable number of Serbs or Slovaks to their recently elected Parliament. But they know well enough that a similar result could not be counted on in the future if the numbers of their Slav fellow-citizens were largely reinforced. And the Germans are in a yet more precarious position. The antagonism between Germans and Slavs in Cisleithania has lately become so intense that the Government may well be more concerned with the maintenance of internal order than with schemes of external aggrandisement. The late riotous encounters between Czechs and Germans in Bohemia are but symptoms of the disease. The policy of the present Austrian Cabinet, which has favoured the Poles and Czechs at the expense of the Germans, has aggravated rather than appeased the hostility of the rival races, and its continuance may seriously impair the loyalty of the whole German population. And yet such a policy was natural and almost necessary, if Austria was to play the part of general protector to the Southern Slavs. Here, then, we have the standing dilemma of Austrian policy, an inevitable result of the heterogeneous elements of which the Austrian Empire is composed. If Austria is permanently to control the Slav nationalities of the Balkan peninsula, she must become more of a Slavonic power. Military strength and geographical advantages will not avail her, if she is regarded as a stranger and an intruder by those whom she seeks to bring under her ægis. But that Austria should become a Slavonic power is just what the most powerful races of her Empire will never permit. This internal discord will always keep her weak for purposes of aggression. Any attempt to extend her Empire would be attended by the risk of its complete dismemberment.

MR GLADSTONE'S SCHEME FOR THE REDUC-TION OF THE NATIONAL DEBT.

In anticipation of the discussion in Parliament of Mr Gladstone's scheme for the reduction of the national debt, there has been issued a Treasury minute setting forth the details of the plan and the measures to be taken to carry it out. The scheme, as we have before explained, is a very simple one. In 1885 annuities to the amount of 7,107,5721 will expire, and were our financial arrangements left on their present focting the then Chancellor of the Exchequer would have this large sum at his disposal either for the remission of taxation or the reduction of debt. Mr Gladstone, however, is of opinion that this option as to the disposal of the money should be somewhat curtailed. His desire is that some portion of the free revenue that is to accrue four years hence, should be devoted now to the extinction of debt, and secured for that purpose beyond the possibility of alienation. And to this end he proposes the creation, by a twofold process, of a new series of terminable annuities.

In the first place, he asks Parliament to empower him to convert immediately 2,000,0001 of the 7,107,5721 of annuities terminating in 1885 into annuities running until 1906. By thus extending from 4 to 25 years the term of the annuity, the annual payment will be reduced from 2,000,0001 to about 460,0001, the calculation being that an annuity of 460,0001 for 25 years is of the same capital value as one of 2,000,0001 for 4 years. The effect of this operation will thus be to set free at once 1,540,0001 of revenue, and Mr Gladstone's second proposal is to apply this sum to the cancelling of 60,000,0001 of funded debt. He will say to the holders of debt to this amount "Hand me over your stock to be cancelled, and in its place "I will give you an annuity of sufficient amount to pay "off the principal and interest in 25 years." The amount of such an annuity, assuming Consols to be at par, is 3,428,6001, and towards the payment of that Mr Gladstone has the 1,540,0001 which will be saved by the conversion of the 2,000,0031 short annuities. Moreover,

by the cancelling of the 60,000,000l of stock the annual interest on the funded debt will be reduced by 1,800,000l, and this added to the 1,154,000l makes a total of 3,340,000l which will be available for the payment of the proposed annuity of 3,428,000l. Thus, only 88,000l remains to be provided, and that Mr Gladstone proposes to take out of the new sinking fund.

If Mr Gladstone had to find amongst the general public people willing to accept his new annuities in lieu of their stock, there would be little prospect of his being able to carry out his scheme. There are comparatively few private fundholders would care to make this change in the character of their investment. But the Government is not dependent upon the public. It is itself the holder of a large amount of stock on account of the savings banks, and 20,000,000l of this Mr Gladstone now proposes to convert into annuities. The remaining 40,000,0007 he asks to be allowed to take from the 62,000,000l or so of stock now standing in the name of the Chancery Paymaster. To this latter proposal the Lord Chancellor has assented on condition that there shall be a margin of unconverted securities left, sufficient to provide for the maximum amount of payments and transfers out of court, which, according to experience, can possibly be required ; and as the highest amount transferred in any one year hitherto has been 6,598,000l, the balance which Mr Gladstone proposes to leave is, to all appearance, ample. But to make assurance doubly sure, it is further proposed that the Treasury shall be empowered, should the need arise, to reconvert the annuities back into stock, and by this means the interests of all interested in the Chancery funds are thoroughly safeguarded. There are some minor regulations in connection with these conversions to which is is not necessary now to refer. The gist of the plan is, that the National Debt Commissioners and the Chancery Paymaster will have the book entry of 60,000,000l of stock now at their credit cancelled, and in place of it will receive an annual payment of 3,428,0001. Of this amount 1,800,0001 represents the annual interest on the 60,000,000l, to which those on whose account the Government securities are held will be entitled, while the remaining 1,628,0001, invested at 3 per cent., will in 25 years amount to 60,000,0001, and thus replace the stock now cancelled.

Under this scheme the actual reduction of debt will, of course, be no greater nor more rapid than it would be if 2,000,000l of the amount left free by the expiring of annuities in 1885 were applied year by year until 1906 to the purchase of stock. The result of such a continuous annual redemption, just the same as the operation of the annuities, would be to wipe off 60,000,000l of funded debt in the course of the ensuing 25 years, and to leave at the close of that period 2,000,000l of free revenue. The difference is simply in the form and not in the essence of the transaction. But the difference, nevertheless, is a very important one. All our experience has shown that it is almost impossible to induce Parliament to provide large yearly surpluses for the repayment of debt. If there is at any time an excess of revenue over expenditure, it is immediately made the basis of demands for the remission of this or that tax, which the Chancellor of the Exchequer rarely finds himself able to withstand. The consequence is that hitherto we have done far less in the way of wiping off debt than we ought to and might have done. And, although there is now no longer the same reason for preferring remissions of taxation to repayment of debt that there was before the reform of our fiscal system, we appear as little disposed as ever to make any perceptible effort to reduce the amount of our national indebtedness. When we have a surplus we spend it, and it is the recognition of this weakness that is at the root of such schemes as that which Mr Gladstone now puts forward. What he wishes to do is, so to speak, to hide from us the fact that we have a Under his scheme the 2,000,000l to be applied to surplus. the debt redemption will appear in the budget, not as so much free revenue, but as a debt due to certain annuitants, the payment of which is not optional, but absolutely necessary. The money, therefore, will always be provided, and we shall thus be steadily doing something during the next 25 years to reduce our indebtedness, whereas if it were left to Parliament each year to vote 2,000,000l for redemption purposes, the chances are very much against this amount being regularly forthcoming.

INDIA AND CEYLON.

A remark was made as to the comparative progress of India and Ceylon in the Economist of June 4th. The figures which follow supply a very rough kind of comparison between the two colonies. This comparison is made on a purely statistical basis, and it rather suggests contrasts than explains why it is that reasons for these contrasts should exist. The statement is founded on the figures for the last ten years, for which the totals can be fully given. Rough as the contrast based on such a statement must be, it is yet not devoid of interest. We must bear in mind at starting the fundamental differences between the two countries—the one an immense continent with great differences in climate and soil, as well as in the races inhabiting it—the other, by comparison, a small island, bounded on all sides, and restricted as well as bounded in many respects.

Perhaps the first point which will strike the reader, is the enormous difference between the imports and exports of the two countries. India imports goods to the value of 4s 9d a head; Ceylon, to the value of more than 2l. On the other hand, while India exports goods to the value of 6s 2d a head, Ceylon exports to the value of 1l 16s 8d a head. A great part of the difference in the imports is probably to be explained by the fact that India, possessing so large an extent of territory, produces many of the articles which Ceylon is compelled to import. Thus Ceylon imports yearly large quantities of rice, while the imports of food into India are comparatively small, almost nothing in reality, the trade in rice from Burmah to Madras, Bombay, and Scinde counting as coasting trade. With respect to exports Ceylon sends out yearly a value in coffee which corresponds fairly closely in amount with that which India sends out in tea; but, of course, these sums form very different

proportions of the total exports of each country; thus, while the exports of coffee are in some years three-fourths in value of the total exports from Ceylon, tea forms less than a twentieth of the total exports from India. Ceylon, however, in proportion to population, is by far the better customer to this country. India, on an average of ten years, takes British goods only to the value of 3s 5d a head of the population. Ceylon takes British goods to the value of 12s 2d. The value of the exports to the United Kingdom differs in a nearly corresponding manner. Those from India very nearly balance the imports, being 3s 1d a head. The exports of Ceylon to the United Kingdom, however, exceed the imports from the same quarter largely, the exports being 1*l* 6s 1d a head, while the imports are only 12s 2d a head, as mentioned above. The difference in the tonnage of the vessels employed follows the same proportion.

The revenue raised is nearly twice as large per head in Ceylon as in India. The population of India pays about 5s 5d a head; the inhabitant of Ceylon pays about 10s 6d. The manner in which the revenue raised is expended differs of course very greatly in the two countries. India, with a long land frontier, expends nearly a third—more than a quarter—of the net revenue on the army. Ceylon is, happily, bounded by the sea, and the sum paid to the Imperial Government as the cost of the European garrison is less than a tenth of the expenditure.

A summary sketch of this character can supply only. very rough and imperfect comparison between the two counties described. It may be that some explanation of the differences in material prosperity between the two which it indicates is to be found in the density of population. This, on the average, is nearly double in India what it is in Ceylor. The standard of comfort in living is believed to be higher in the latter country. It may be that the smaller sized, and hence more marageable districts, of Ceylon, account also for some part of the difference between the prosperity of the two. Supervision is more easy, and it may be possible to obtain a greater permanence of administration. Sir W. H. Gregory, in his farewell addr ss to the Legislative Council of Ceylon, delivered in 1877, speaks strongly on this point and shows how serviceable the personal knowledge of the administrator becomes to the well-being of the population. The comparison of the two counties leads to the belief that the full development of India has been by no means yet attained. This, however, can hardly be in all points the work of the Government alone. There is within the country a reserve of capability for exertion which has not yet been called into active enterprise.

THE ECONOMIST.

[July 30, 1881.

INDUSTRIAL INSURANCE.

It is not surprising that the jury in the action for libel brought by the Prudential Assurance Company against the Western Provident Association should have arrived at a somewhat lame and illogical conclusion. The libel complained of was a statement in a report of the Western Provident Association to the effect that, owing to its excessive expenditure and the smallness of its assets, the Prudential Assurance Company "cannot possibly fulfil its "obligations to its members, and that at some not far "distant time painful loss and bitter disappointment will " be all the return they will receive for ill-spared and "worse-invested savings." In support of this allegation of insolvency, however, no evidence was forthcoming at the trial. Several actuaries of eminence and unquestionable probity called by the plaintiffs, gave it as their opinion that the Prudential Company is financially in a thoroughly sound position; that it is not only able to meet all possible claims upon it, but also possesses a large surplus of assets over liabilities. And so far from attempting to disprove this evidence, the Attorney-General, on behalf of the defendants, admitted that they had taken a widely erroneous view of the accounts upon which they commented, and that the imputation of insolvency was altogether baseless. The jury, therefore, had no option but to find that the words complained of by the Prudential Company were not true in substance or in fact, and consti-tuted a libel on the plaintiff. This finding, however, they qualified, and to a large exent nullified, by further declaring that the matter which they had found to be libellous was a fair and $bon\hat{a}$ fide comment upon the accounts and statements of the Prudential Company which had been published bon fide in the interests of the public. And in the end they gave a verdict for the plaintiff company, with only one farthing of damages.

In a verdict which characterises certain statements as fair comment upon a matter of public interest, and as at the same time libellous, there is an obvious inconsistency, The finding of the jury can only be explained on the supposition that in their opinion, although the defendants had been somewhat too free in their comments, there is much in the accounts of the Prudential Assurance Company to invite criticism and to call for explanation; and in this opinion most of those who have read the evidence will be disposed to concur. It is, for instance, obvious that the work of the company is carried on at an enormous cost to the insurers. In the year 1877 the income of its industrial branch amounted to 1,058,754l, and of this no less than 557,0001 was absorbed in management expenses. Thus less than one half of the sums paid by insurers were left available to make provision for the promised benefits, and it was further given in evidence by one of the actuaries examined on behalf of the plaintiffs that the premiums charged by the Prudential are about 66 per cent. above the prime cost of the insurances it affords. Nor is it only that the premiums are thus heavily weighted. The insurer in the Prudential must also pay premiums for some time before he gets any insurance benefits whatever For the first six months nothing is payable by the company under its industrial policies, and only half the sum insured for is payable if the assured dies within the first year. Thus, for a considerable time the insurances effected by the Prudential do not insure, and it is this peculiarity of practice that enables it to bear a rate of expenditure which, to an insurance society conducted on ordinary principles, would be ruinous. And another peculiarity of the Prudential business is the very brief duration of its policies. These, although they are effected for life, last on an average only about three years, the main reason for their short currency being that each year enormous numbers of them are suffered to lapse. Thus, it was stated by the Attorney-General, that while in 1877 there were issued 1,863,000 new policies, no fewer than 1,290,000 policies lapsed, of which only 60,000 had become claims. On the part of the company, it was maintained that this wholesale lapsing is a loss to it, and in the sense that it cuts off a source of future income, this is true. But from another point of view the lapsing of the policies is a substantial gain to the company. It relieves it from future claims, and enables it to pocket, as nearly so much pare profit, the premiums (less the cost of collection) that

THE ECONOMIST.

have been paid by those who have failed to keep up their weekly contributions. There can be no doubt that it is largely owing to this rapid running off of possible claims that the company is able to work with so low a percentage of assets to liabilities as $1\frac{1}{2}$ per cent., while ordinary life assurance companies find it necessary to have a proportion of 30 per cent. and upwards.

It is clear, therefore, that judged by ordinary standards the expenditure of the Prudential Company is excessive, and its assets astonishingly small. But the well-founded contention of this company is that to the business which it transacts the ordinary tests do not apply. While the ordinary assurance companies deal with people who are comparatively well off, and who bring or remit the premiums to the respective offices in yearly or half-yearly instalments, the business of the Prudential is with the poorer classes, from whom it collects the premiums in sums of 1d or 2d each week. Such a system of collection, it is evident, must necessarily entail a considerable expense, and the poor people who buy their insurance in weekly pennyworths must be prepared to pay more for it than those who, so to speak, buy it wholesale. To a certain extent also it is true that under the system which the Prudential has created, and which it works with great energy, lapses of policies are likely to be more numerous than in the case of ordinary insurance companies. The insurer in a company conducted on the usual principles has to make payments of some magnitude, and he sees that the failure to keep them up will involve the possible loss of a considerable sum. He has, therefore, a strong incentive to pay up regularly. But when the amount involved is reckoned not in pounds but in pence, the loss through failure to continue the weekly payments is apt to look trivial, and default to be made with a light heart.

While, however, such explanations as these meet much of the criticism to which the Prudential Company has been subjected, they at the same time show how beneficial it would be if some better scheme of industrial insurance than has yet been afforded were provided for the working classes. For one thing it is clear that at present the poor insurer is at needless disadvantage in comparison with his better-to-do neighbour. In the ordinary insurance company the bulk of the profits earned are returned to in-surers in the shape of bonuses. In the Prudential, however, according to the statement of the Attorney-General, the profits are monopolised by the proprietors. "The fact "is," he is reported to have said, "that the growth of the "insurance fund between 1876 and 1880 had been from " 300,0001 to 1,400,0001, and thus, without any appreciable " increased risk, the average age of the assured having only "increased from 21 to 22. After paying all expenses, the "plaintiffs had heaped up 1,100,000*l*. Who would have that "money? It would in December be divided among the 30 " shareholders who had found the original capital of 5,0001." For the charging of comparatively high rates for industrial insurances there is, as has been said, a good reason. But the difference in the system of distributing surplus profits is evidently another and a very different matter. The greatest evil, however, of the system of industrial insurance which at present prevails, is that probably in the majority of cases it fails to effect its intended purpose. The insurer wishes to make provision, in the event of his death, for those he may leave behind him. It is obvious, however, that in an office in which the average age of the insurers is only 22, and whose policies subsist on an average for only three years; very few of the insurances are continued until death. The great bulk of them are from some cause or other allowed to lapse, and thus become altogether ineffective. And the evil of this is not only that the intended provision for families is not made, but that habits of providence and thrift are discouraged. Not only the person who has made the abortive attempt to save, but all those also who know that he has done so, are impressed with the belief that it is foolish to try to lay past money, and that the wise course is to live for the day, and let the future take care of itself. Such considerations as these should, of course, have had no weight with a jury whose business it was simply to decide whether or not an unfounded imputation of insolvency was or was not libellous, although it is evident that, rightly or wrongly, they did influence the verdiet. But for those who wish to see the condition of the working classes im-

proved, there are few more important questions than the one which this case has raised as to how the poorer classes can be enabled to make better and more secure provision against sickness, old age, or death, than they have now the means of doing. Much, we think, might be done—at least in the direction of securing benefits in old age and at death—by a judicious and energetically promoted extension of the Post Office Insurance system; and the attempt, it is to be hoped, will not be much longer delayed. The fact that the Prudential Company has issued many millions of policies show that the desire to provide for the future is much stronger amongst the working classes than is generally supposed, and if better opportunities for giving effect to that desire were afforded they would doubtless be very largely taken advantage of.

BUSINESS NOTES.

THE COMMERCIAL NEGOTIATIONS WITH FRANCE.-Mr Ritchie has given notice that, on going into Committee of Supply, he will move an address, praying her Majesty to withhold her consent from any commercial treaty with France which may propose to substitute specific for ad valorem duties. We trust, however, that the House of valorem duties. We trust, however, that the House of Commons will refuse to accede to such a proposal. It is, doubtless, most desirable that in the French tariff ad valorem duties should be retained. It is almost, if not quite impossible, to devise a specific scale which shall bear equally upon all the diverse classes of goods, with their minute distinctions as to quality, of which our exports to France are made up. And certainly the specific scale embodied in the new general tariff, with its enormous enhancement of duties, is one which we could never agree to accept. If, however, a scale were devised which would impose upon even the heaviest and cheapest of our textiles no higher duties than are at present levied under the ad valorem system, it is difficult to see what valid objec-tion we could raise to the change. Every nation has the right to choose its own fiscal system, and all that we can legitimately ask in connection with the new treaty is that the change from ad valorem to specific rates shall not be made in such a way as to increase the duties upon our products. To the change, simply as a change, we cannot rightly object, however much we may regret it as placing serious obstacles in the way of a satisfactory agreement between the two countries.

THE SCOTCH BANKS AND THEIR NOTE ISSUES.—The following remarks, referring to the note issues in Scotland, occur in the Treasury letter to the three senior Scotch banks in reply to their request to be allowed to re-arrange their constitutions so as to form a reserve of capital without adding the word "limited" to their designations. After proposing to these banks to allow their rights of issue to be limited to a fixed term of years, the letter proceeds as follows :—

But although my Lords are prepared to accept a Bill founded upon the principles which have been indicated, they would much prefer that the banks of issue in Scotland should join the Government in considering the terms upon which a State issue of notes, having the quality of legal tender elsewhere than at the place and office of issue in Scotland, might be substituted for the present issues by private banks. As my Lords have already stated, such a measure must be framed to meet the special requirements of Scotland; the issue of one-pound notes would of course be preserved, and it would be especially desirable that such an issue should be conducted through the agency of banks in Scotland. If agreement could be arrived at upon these principles, a Bill embodying them might be introduced in the next Session of Parliament.

The currency of Scotland would then be placed upon a sound basis, and the uncertainty which now prevails as to the future course of legislation on that important subject would terminate.

A State issue of one-pound notes—"legal tender" under some circumstances—is here contemplated. The further question arises—would these notes be strictly confined to the northern portion of the kingdom? What is to prevent their circulating in England? Evidence was given before the Committee of the House of Commons on Banks of Issue in 1875, which showed clearly that there was already a distinct circulation of Scotch small notes in the North of England. When backed by the security of Government a larger circulation might be expected. Now

the object of English legislation on the subject in recent years has been to do away with small notes, which we believe to be entirely the right policy in this country. To re-establish a small-note circulation by a sidewind is clearly undesirable. The matter does not press now, but it points out again the danger of dealing piecemeal with great questions.

JUTE CULTIVATION IN THE UNITED STATES. - In a special report, dated the 7th of April last, Mr Drummond, our Secretary of Legation at Washington, calls attention to the progress that has lately been made in jute cultivation in the State of Louisiana, and to a new invention by which it is hoped the preparation of jute fibre will be greatly facilitated. Since 1873, he states, the United States Department of Agriculture has taken much interest in the subject of ramie and jute cultivation, and experiments made in the Southern States have proved that the cultivation and preparation of these fibres is practicable and profitable. Last year 1,500 packages of seed were, he states, distributed to the farmers of Louisiana, and reports have come in that the jute plant flourishes in every parish, growing in alluvial soil to a height of 15 feet, and in the pine flats and on the hills, to 10 and 12 feet. To the cotton planters jute cultivation is expected to be of great use in the preservation of the cotton plant from insects, while the importance of jute-growing is enhanced by the expected increase in the amount of sacking used in the American trade, Mr Drummond having been "confidently " informed" that in the future flour bags are going to be used in the place of barrels. Respecting the new machine for the preparation of the fibre, Mr Drummond gives the following details :-

This machine is 34 inches wide and 42 inches high, and is very strong and not liable to damage. It can be removed to any point without taking apart, and it is ready for use on the instant, being simply a series of rollers and scrapers and beaters. At the top a copper with a dozen holes, through which the fibre is fed to the machine. The machine started, a stalk of ramie or other fibre is machine. The machine started, a stalk of rame or other fibre is set by the thick end into the hole; it is grasped between two rollers, covered with flexible rubber, and the stalk, in passing into the machine, immediately encounters a knife, which splits it in two, sending the two halves to opposite sides of the machine. The halves on their journey encounter "beaters," which break off the pith and wood, and, on the other side, encounter "scrapers" which remove the bark, and in an instant the filament comes out in long ribbons of fibre. An unbroken ribbon exactly the length of long ribbons of fibre. An unbroken ribbon, exactly the length of the stalk or switch which was fed to the machine is thus obtained, and the wood and extraneous matter are as clearly taken off as could be desired and without slivers. It is claimed that the stalks of ramie, mallow, or jute may be run through the machine the moment they are cut, without waste of time by preparatory rotting of wood or outer bark, which injures the fibre. Further, that there is absolutely no preparation at all, and the fibre is unbroken. The scrapings of bark, &c., can be used in paper stock, while the woody matters can be used for fuel for the engine driving the machine. The only remaining process is to boil the gum from the ribbons of fibre, and they are then ready to be tied in hanks for the rope-walk nbre, and they are then ready to be ted in hanks for the rope-walk or for the manufacturer. The machine is said to clean or prepare 2,000lbs of fibre per day, fed by a boy, the stalks being placed upon a platform within easy reach. The boiling is a simple matter, and can be done in the field, or factory, or shed where the machine is running, or the ribbons may be marketed as they come from the machine, the cordage manufacturer boiling out the gum at the same time that it is boiled for bleaching.

Messrs Dennis and Angell, the patentees of the invention, have, Mr Drummond states, promised him all information after their machine has been tried this summer, and the result of the experiment to be made will be watched here with much interest.

BILLS OF SALE .- The following are the main clauses of the Bill to amend the Bills of Sale Act, 1878, as it has been altered and reported by the Select Committee. It is satisfactory to find that the suggestions so freely made to re-enact a usury law decreeing a maximum legal rate of interest for bills of sale has found no favour with the committee. The only effect of such a proceeding would be to increase the exactions of unprincipled lenders, who would extort in one shape or other still higher rates of interest than are now demanded, so as to cover the increased risk. The clauses providing that a bill of sale shall be valid only as regards scheduled property, and property actually belonging to the grantor at the time of execution, strike at acknowledged evils, and would be likely to prove salutary in their operation, as would also

the clause making void bills of sale granted within twelve

months of bankruptcy. 2. This Act shall come into operation on the first day of January one thousand eight hundred and eighty two, which date is herein-after referred to as the commencement of this Act.

3. The Bills of Sale Act, 1878, is hereinafter referred to as "the principal Act," and this Act shall, so far as is consistent with the tenor thereof, be construed as one with the principal Act, and shall apply to every bill of sale made or given after the commence-ment of this Act.

4. Every bill of sale, as defined by the principal Act, shall have annexed thereto or written thereon a schedule containing an in-ventory of the personal chattels comprised in the bill of sale, and ventory of the personal chattels comprised in the bill of sale, and such bill of sale, save as hereinafter mentioned, shall be valid only in respect of the personal chattels comprised in the said schedule; and shall, so far as regards the property in or right to the possession of any personal chattels not comprised in such schedule, be void and of no effect. 5. No bill of sale shall be valid or have any effect as regards any personal chattels mentioned in the said schedule, if such chattels at the time of the execution of the bill of sale did not actually belong to the grantor.

belong to the grantor. 6. Nothing contained in sections four and five of this Act shall render a bill of sale invalid in respect of any of the following things (that is to say)-

 Any growing crops.
 Any fixtures, plant, or machinery which may be affixed to or brought upon any land, farm, factory, workshop, shop, house, warehouse, or other place in substitution for any of the like things comprised in the schedule to such bill of sale.

7. Every bill of sale made or given in consideration of any sum under fifty pounds, shall be fraudulent and void as against the same persons and to the same extent as a bill of sale not duly attested and registered in manner required by the principal Act, is declared by section eight of the principal Act to be fraudulent and void.

and void. 12. If the person making or giving a bill of sale shall within twelve months after the date thereof be adjudged a bankrupt, or make any arrangement or composition with his creditors under the provisions of the Bankruptcy Act, 1869, or otherwise, such bill of sale as against the trustees or assignees of the estate of the person whose chattels, or any of them, are comprised in such bill of sale, under the law relating to bankruptcy or liquidation, or under any assignment for the benefit of the creditors of such person, shall be deemed fraudulent and void so far as regards the property in or the right to the possession of any chattels the property in or the right to the possession of any chattels comprised in such bill of sale which, at or after the commence-ment of the bankruptcy or liquidation, or of the execution of such assignment, are in the possession or apparent possession or the order or disposition of the person making such bill of sale.

RAILWAY COMPETITION .- A case of considerable importance has this week been decided by the Railway Commissioners. By an agreement entered into in 1860 the Great Northern and the Manchester, Sheffield, and Lincolnshire Railway Companies became each bound to do nothing, directly or indirectly, to affect injuriously the traffic of the other. In consequence of this compact between the companies two efforts on the part of the inhabitants of Huddersfield to open up more direct railway communication with London and the North have been defeated, the bills to construct new lines being successfully opposed by one or other of the companies, on the ground that the agreement between them prevented either company, without the consent of the other from co-operaing in the forwarding of traffic covered by the agreement by any other route than that indicated in it. Against this closing up of all fresh outlets to traffic the Town Council and Chamber of Commerce of Huddersfield appealed to the Railway Commissioners; and judg ment has now been given in their favour. The Commissioners have held that an agreement between railway companies which prevents the opening out of advantageous routes for traffic is detrimental to the public interests, and therefore ought not to be sustained. They have accordingly refused to sanction the continuance of the compact between the companies unless they agree to the insertion of a proviso to the effect that nothing in the agreement shall be used or operate to prevent either of them from agreeing to any through rate, or entering into any arrangement with any other company or companies with reference to the conveyance of traffic by any other routes. This, we think, is a reasonable judgment, for it is obviously to the public disadvantage that railways, by agreement between themselves, should be able to prevent growing communities from obtaining enlarged facilities for traffic and opening out new routes for traffic and opening out new routes for trade.

THE ECONOMIST.

THE AUSTRALIAN CENSUS.—Though we have not received returns from some of the colonies, it may now be roughly asserted that the past decade has added some 765,000 inhabitants to our Australian possessions, representing an expansion of nearly $38\frac{3}{4}$ per cent., or an annual growth of 3.87 per cent. The figures will, it is expected, come out nearly as follows :—

come out nearly as .	1861.	1871.		1881.
New South Wales	358,278	 519,182		750.000
Victoria	541,800	 752,445		855,796
South Australia	126,830	 187,851		277,000
Western Australia	15,691	 25,353	******	30,000
Tasmania	89,977	 101,785	******	116,000
New Zealand	98,971	 266,986		489,561
Queensland	34,885	 125,146		226,000

1,266,432 1,978,748 2,744,000

In the case of the most populous colony, Victoria, the increase has been only 103,000, as contrasted with 210,000 in the previous decade, and New South Wales, which has gained 230,000 inhabitants, is exulting over the result as a clear proof that a free-trade policy is the better suited to Australasian progress. New Zealand has obtained an increase of 223,000, much owing to assisted immigration, South Australia and Queensland about 100,000 each. Altogether, the growth is rather more considerable than from 1861 to 1871, when an additional 712,000 people swelled the census returns.

LIFE INSURANCE IN THE UNITED STATES.—The census report on life insurance in the United States shows that at present there are 59 companies carrying on business there. Of these the capital stock amounts to 2,984,000*l*., of which about 1,900,000*l*. is paid up. At the beginning of the census year the ledger assets of the companies amounted to about 84,000,000*l*., of which 12,800,000*l*. was the cost value of real estate owned; nearly 37,000,000*l*. consisted of loans on the security of real estate; 2,800,000*l*. was lent on bonds, stocks, &c.; the cost value of bonds and stock owned amounted to 23,000,000*l*.; and about 2,900,000*l*. consisted of cash in hand and in bank. The number of policies in force was 725,418, and their aggregate amount about 312,000,000*l*. The total annual income of the companies for the year amounted to about 16,700,000*l*. It will be seen from the following table that the business of the companies during recent years has tended to diminish:

	To	tal Numb	Total		
		of Policies	3	Amount	
		Issued.		\$	
1870		171,390		417,855,173	
1871		157,033		377,969,234	
1872		152,657		381,484,252	
1873		165,390		397,210,863	
1874		141,647		321,940,044	
1875		127,156		287,149,802	
1876		116,751		253,255,405	
1877		106,094		209,443,632	
1878		98,405		174,544,283	
1879		122,868		187,049,113

THE discussion of the Indian Budget is this year again to be postponed until the closing days of the Sersion, Mr Gladstone on Monday night, and subsequently Lord Hartington, having intimated that it cannot be brought forward until some progress has been made with Supply. Replying to Sir H. Wolff on Monday, Mr Gladstone, while acknowledging that the duties on tobacco bear heavily on the working classes, pointed out that any attempt to diminish them by raising revenue from a tax on articles of luxury imported from France would lead to a revival of the baneful system of smuggling which has happily been brought to an end. On Tuesday Sir Charles Dilke stated that the French and Dutch Governments have agreed to a conference being held on the subject of the depredations committed on English fishermen by the use of the Belgian "Devil," but that no reply has yet been received from the Belgian Government. With respect to the French commercial negotiations, Mr Gladstone, on Thursday, declined to give a pledge that the Government would not enter into any renewal of our engagements with France without first obtaining the sanction of Parliament, but he stated that in the negotiations they would

be guided by the feeling of the country, which had been very clearly expressed, and in regard to which there could be no doubt. Sir Charles Dilke stated that no notification with respect to Mr Bourke's mission to Constantinople had been made to the Government, who have not offered any opinion on the matter, and whose policy will not be affected in any way by the action of the bondholders. Mr Mundella, replying to Sir H. Barttelot, said that no reports have been received of an unusual prevalence of cattle plague (rinderpest) in the Baltic provinces of Russia. The disease constantly exists to some extent in Russia, but as the importation of cattle from that country, as well as Germany and Belgium, is prohibited, there appears little probability of its introduction from Russia into this country.

In the House of Lords on Tuesday, the Metallic Mines (Gunpowder) Bill, the object of which is to empower the Secretary of State to allow the use of gunpowder in certain metalliferous mines, was read a second time, and on Thursday it was passed through Committee.

SAVINGS' BANKS RETURN.

THE following Return shows the amounts received from, and paid to, Savings' Banks and Post Office Savings' Banks in the United Kingdom, by the Commissioners for the Reduction of the National Debt, during the four weeks ending July 23, 1881 :--

The above return, compared with that for the preceding week, exhibits the following changes :--

INCREASE.	Francs.		DECREASE.	Francs.
Circulation	23,927,160	Private	deposits	48,317,660
Treasury account	108,690,290	1		
Cash	7,277,442			
Discounts	EG 190 091			

The differences are in great measure due to the payment of the third instalment of the loan on the 25th; and from the same cause the advances on securities have increased 25 millions. The London exchange remains weak at 25f 20c to 21c, and some small parcels of gold have been again received; but the arrivals from that direction are estimated not to exceed 150,0001. More considerable imports of gold have come from Russia, the Bank of St. Petersburg having been selling that metal, and most of the purchases have been taken for Paris. These are believed to amount to twelve or fourteen millions of france; but the gold remains on the market, with the exception of two or ree millions which have been

deposited at the Bank for advances. The payment of over 100 millions by the Treasury has added a little to the cash reserve, and the Bank is again restricting its issue of gold coins. Discount is difficult under the Bank rate. The cash in to-day's return was composed as under :--

Gold Silver	28th July. francs. 633,943,843 1,240,278,747	 21st July. francs. 630,793,820 1,236,151,328
	1,874,222,591	1,866,945,149

The Paris Bourse has assumed a more healthy tone during the last week, and although little business has been doing, prices have been firmer. There has been a general recovery during the last three days, the rise being most marked in Bank of France, Union Générale, Laender Bank, Suez Canal, and Lombard railway shares. The following were to-day's closing quotations, with the variations in the week:— Three per Cents., 85f $47_{4c} - 20c$; Redeemable Threes, Old, 86f 95c + 30c; New, 85f $77_{4c} + 25c$; Five per Cents., 119f $47_{4c} + 22_{4c}$; Italian, 90f 40c + 60c; Austrian Gold 4 per Cents., 81f 70c — 15c; Turkish Fives, 17f 10c + 60c; Egyptian Unified, 395f =; Preference Bonds, 501f 25c; Bank of France shares, 5,635f + 60f; Banque de Paris, 1,247f 50c + 2f 50c; Credit Foncier, 1,705f + 6f 25c; Union Générale, 1,457f 50c + 47f 50c; Laender Bank, 827f 50c + 18f 75c; Paris Gas, 1,510f — 5f; Suez Canal, 1,750f + 45f; Panama Canal, 520f =; Northern Railway, 1,975f + 5f; Western, 870f =; Orleans, 1,350f + 17f 50c; Eastern, 813f 75c + 3f 75c; Lyons, 1,752f 50c + 12f 50c; Southern, 1,230f =; South of Austria, 288f 75c + 15f.

A meeting of shareholders of the Banque Europeenne (M. Phillipart's creation) was called in Brussels last week to hear a proposal for the liquidation of the present establishment and its reconstruction under another name. The meeting could not deliberate on the scheme before it, a sufficient number of proprietors not being present, but the delegate of the Board gave an outline of the project. The capital of the bank is 46 millions of francs, but about half that sum may be considered as lost, and, as no dividend could be paid until the original capital was reconstituted, the board had first contemplated reducing the capital to 23 millions. There was a second motive for such a step. The seat of the bank had beed fixed in Brussels from an idea that the bank could thus avoid paying the taxes on the capital in France, although the principal operations were expected to take place in that country. The French Treasury did not, however, admit that interpretation of the law, and the composition for taxes is based on the original capital of 46 millions, although one-half has been lost. A certain discredit also attaches to the title of the Banque Europeenne, and the board in consequence proposed to form a new company with a capital of 25 millions, consisting of 23 millions of assets of the old bank, which would be wound up, and two millions of fresh capital which certain persons were prepared to contribute. The present proprietors would receive one new share for two of the old, and if the liquidation produced more than 23 millions, the surplus would be divided among the proprietors. Another meeting is called for the Sth August. The new bank would have its seat in France instead of in Belgium.

An interesting statement of the situation of the French Treasury was made by the Minister of Finance this week, in the course of the discussion on the estimates of his department. A member of the Right had objected that the credit of 30 millions for the floating debt in 1882 would be insufficient, as that debt amounted to over 1,000 millions, and a large portion, more than 400 mflions, consisted of funds of the Savings Bank, on which the Treasury paid 4 per cent. interest. The Minister of Finance, M. Magnin, said that the floating debt amounted on the 30th June to 1,100 millions the principal, items of which were the account of the Receivers-General, 120 millions; funds belonging to the communes, 179 millions; the Caisse des Depots, 242 millions; Treasury bills, 102 millions; and the savings banks, 407 millions. Since the 30th June the Treasury bills have been reduced 20 millions, and of the 82 millions still in circulation 51 millions are held by the City of Paris, a part at 2 per cent., a part at 14 per cent., and a part at 1 per cent. interest. The portion in the hands of the public will probably not be renewed as they run off, as the interest has now been reduced to 4 or 1 per cent., and money could be employed better elsewhere. The interest paid to the communes was only 25 per cent.; and as the Treasury had now a drawing account of 400 millions at the Bank of France, he intended to reduce the interest on the advances of the Receivers-General also. He could not reduce the 4 per cent. interest paid on the Savings Bank deposit for the present, but he would not say what might be done in 1882. In January last the amount of Treasury bills out was only 2 millions, and as he had not then an intention of issuing the loan, he raised the rate of interest on the bills first to 2 and then to 3 per cent. to attract money.

[July 30, 1881.

THE ECONOMIST.

As soon as the loan was subscribed he reduced the rate to } and 1 per cent., and from the present amount of the Treasury resources he did not expect there would be any necessity to increase the rate this year or in the next. Of the 400 millions forming the first two instalments of the loan of one milliard, only 2 millions were overdue, but as the arrears were charged 5 per cent. interest, he had no motive for pressing for pay-5 per cent. Interest, he had no motive for pressing for pay-ment. The whole of the loan would, no doubt, be paid up by anticipation if he would receive it, but there would be no ad-vantage in having funds for which he would have to pay interest before he required them. An instalment of 200 millions was now being paid on the loan, and two others were due in October and January next. He did not think that it mould be necessary to raise any further loan in 1990, the load would be necessary to raise any further loan in 1882; the last one might have been deferred if he had not considered the moment favourable, and had not feared that another State loan (the Italian) might be brought out before the French loan. Besides the instalments of the last loan that had still to be received, he had a surplus of 100 millions unemployed from the year 1880; and in any case if a new loan were raised in October of next year, the first quarter's interest would only fall due in the following January; so that there was no need to increase the credits for interest on the floating or redeemable debt in 1882.

The Governments of Finland and Servia have so far adopted the French decimal system of coinage as to make gold pieces of exactly the same standard weight and value as the French 10-franc and 20-franc pieces. The Austrian four and eight florin gold pieces, which are of the same size and value as the French coin are already a bench tenden et all the value as the French coin, are already a legal tender at all the public offices in France, and circulate freely as 10 or 20-franc pieces. The Minister of Finance, in reply to M. de Parieu in the Senate, said that the same privilege of legal tender in France would be accorded to the gold coin of Finland and Servia if asked for, or to any other gold coin corresponding in fineness and weight to the French pieces, as France had every interest in receiving it.

The eagerness of the Deputies and Senators to add to their legislative emoluments the profits to be derived from the functions of director of public companies, has been on more than one occasion censured by M. Leroy Beaulieu in the *Economiste Français*. In the Chamber of Deputies, a few days back M. Basmail proposed a Bill to add to the electory large back, M. Raspail proposed a Bill to add to the electoral law a clause to declare forfeited the seats of those Deputies who allowed their title of member of the Chamber to appear in allowed their title of member of the Chamber to appear in financial advertisements, or who accept the office of director. Urgency was voted on the resolution by 304 to 12, but as the Chamber will be dissolved at the end of the week, and there will be no time to carry a Bill through the Chamber, the vote could lead to no consequences, and many Deputies whom M. Raspail had in view boldly divided with the majority. A similar Bill was proposed in the Senate, but the demand for urgency was not adopted. Such a Bill has little chance of becoming law, and its adoption would be a misfortune, as becoming law, and its adoption would be a misfortune, as, including all directors of public companies, it would shut out a great number of real business men who form a small minority among the advocates, professors, and journalists of whom both Chambers are principally composed.

The detailed returns of the foreign trade of France in the first six months of the year have now been issued, completing the abstract given last week. The subjoined are the principal values in millions of frances, with the variations compared with 1880, the initial prices being the same for each year. Imports—Increase:—Wines, 200 + 11; sugar, 77 + 20; coffee, 54 + 8; fresh and salted meats, 34 + 2; olive oil, 22 + 10; silk, 169 + 24; cotton, 162 + 32; oil seeds, 60 =; ore, 19 + 3; copper, 23 + 5; cotton yarn, 18 + 3; silk manufactures 19 + 4; cotton yarn, 34 =; machinery, 27 + 7. Decrease:—Corn and flour, 264 - 112; table fruits, 41 - 12; cattle, 59 - 10; hides, 77 - 7; wool, 170 - 67; timber, 47 - 17; coal, 77 - 6; woollen stuffs, 33 - 4; cotton goods, 34 =. Exports—Increase:—Cotton goods, 43 millions + 6; jewelery, 25 + 1; tools, 32 =; slops, 49 + 13; chemicals, 18 + 1; corn The detailed returns of the foreign trade of France in the Exports—Increase:—Cotton goods, 43 millions + 6; jewelery, 25 + 1; tools, 32 =; slops, 49 + 13; chemicals, 18 + 1; corn and flour, 43 + 28; fish, 19 + 4; silk, 86 + . Decrease:— silk goods, 102 millions—8; woollen stuffs, 165 - 9; woollen yarn, 17 - 8; dressed skins, 42 - 4; mercery and trimmings, 58 - 6; refined sugar, 39 - 7; wines, 128 - 5; butter, 33 - 4; pcltries, 25 - 9; wool, 51 - 23.

GERMANY AND AUSTRIA. (FROM OUR OWN CORRESPONDENT.)

VIENNA, July 25.

955

Public attention in Germany is entirely absorbed by the coming elections for the new Reichstag, and the Bourse is as quiet as is usual at this season.

The last statistical reports show that in Germany the wages of both agricultural labourers and industrial workmen have sunk to a lower level than they have reached for some time.

The question of improving navigation on the Danube is at last being seriously discussed by the Hungarian Government. We learn that the Bills providing for the improvement of the river near the Iron Gate, and elsewhere, are now being prepared, and will be laid before the Hungarian Reichstag ere long. The opinion begins to spread everywhere that it is the hin-drance to which navigation is subjected on the Danube that prevents Austria-Hungary from competing successfully with America in the supply of corn, and that it is absolutely necessary to effect some improvements on this river. Besides the regulation of the above-mentioned parts, it seems that chain navigation, which is carried on between Vienna and Pres-burg only, must be extended up the river as far as the Bava-rian frontier, and from thence to Ulm and Würtemburg. Beyond Pesth chain navigation is not necessary, because the course Pesth chain navigation is not necessary, because the course of the Danube is not so rapid as to prevent steamers from voyaging up the river with ease. The Danube Society has long been directing all its energies towards this end, and both the Bavarian and Würtemberg governments have shown themselves disposed to grant a concession for carrying out this useful plan. The only difficulties in the way are the objections made by the Hungarian Government against con-ceding a sole privilege for chain navigation. The Government thinks that navigation ought to be open to free competition. There is already a society which would enter into competition. There is already a society which would enter into competition with the Danube Steam Navigation Company in chain navigation.

The amalgamation of the ironworks of the Austrian mountain districts has been completed, and the first general meeting of shareholders, at which 50,000 shares were represented, has taken place. The society's title is the "Austrian Alpine Mining and Ironworks Company." Count Wodzicky is presi-dent of the council of administration; this is, however, but a provisional arrangement, as he cannot at the same time be resident of the Länderbank.

The accounts of the foreign commerce of Austria and Hungary during the first five months of 1881 are very favourable when compared with those of the same period in the fore-going year. The receipts for customs were higher by 13 per cent., or 1,518,449 florins, than during the first five months of 1880. The chief articles imported in larger quantities than of 1880. The chief articles imported in larger quantities than during the preceding year were coffee, tea, rice, mineral oils, iron, pigs (157,519, against 45,308), and sheep (11,600, against 2000). The import of goods free from duty also increased siderably, especially skins, cotton, flax, jute, and artificial ing. The import of corn was almost as great in 1880, whilst the export of corn was very little indeed. The imports of corn and flour during the first five months of the years

were :-Flour. Corn. cwt. 3,694,812 ewt. 527,862 1879 1880 971,150 5.856.062 420,800 5,611,988 1881 .

The exports of the same articles during the five months were :--Flour. Corn.

ewt. 9,786,780 801,944 940,066 ...

2,645,426 5,509,588

trary, increased considerably, whilst that of while, fich, inc chines, &c., suffered a reduction. Large orders for rails have been received by the Austrian ironworks. For 1881, 1,400,000 cwt have been ordered; for 1882, 1,260,000 cwt; and for 1883, 220,000 cwt. The works which have received these orders do not include those which are the property of the Southern and States Railway, which work almost exclusively for their

THE ECONOMIST.

July 30, 1881.

proprietors. Besides the orders mentioned, 160,000 cwts were manufactured and delivered to the Servian Rail-ways. There has been a considerable increase in the pro-duction as compared with the previous year, but the prices have not yet improved. Thereceipts from the taxes on articles of consumption in Austria are apparently 91 per cent. higher than they were twenty years ago. But the restitution of the tax paid on sugar, which is afterwards exported, must be deducted, so that the excess is in reality 41 per cent. only. In 1880 the total receipts from the taxes on articles of consumption (in-cluding the sugar tax, which has to be returned when the sugar is exported) amounted to 94,584,978 florins, that is about ten million florins more than in 1879.

million florins more than in 1879. Every day new reports of the harvest reach us, and every day they are more favourable. It appears that the harvest of 1881-82 will be the richest that Austria-Hungary has had within the last ten years. Not only is the quantity of wheat, rye, barley, and oilseed obtained enormous, and the quality first-rate, but the price also is comparatively high. The high prices will probably last no longer than up to the moment when American and Russian corn appears in large quantities on the markets of Western Europe on the markets of Western Europe.

- Amsterdam (sht)	11 17 174	121 2	12 01 14	12 14 21	12 11 21
- Hamburg (3mths)	13 9 91	20 62	20 62	20 69	20 68
Clearing-house return		108,672,000	73,682,000	82,257,000	91,415,000

The amount of the "other deposits," compared with the "other securities," showed in 1871, an excess of 8,930,7471; in 1878, an excess of 3,311,7731; in 1879, an excess of 15,533,6611; in 1880, an excess of 8,871,5791. In 1881, there is an excess of 8,223,8451.

In 1878, the Bank reserve suffered a further material reduction, and the Bank rate was consequently advanced to 4 per cent. The army reserves were disbanded, and the Austrian troops entered Bosnia.

In 1879, the money market was still very slack, in spite of the weakening of the American exchange.

In 1880, the money market was easy, and there was less fear for the time being about gold going to America, money being cheap over there.

The following are the principal stems in the accounts of the undermentioned continental and American banks for the latest week published compared with the previous statement :-

Converting the reichs-mark at 1s; the Austrian florin at 2s; the Dutch florin at Is 8d; and the franc and peseta at 25 per 1l. American currency is reduced into English money at 4s per dollar.

DISCOUNT AND MONEY MARKET.-At any rate, the first million of gold taken from London for Italy will have very little effect upon this market. 406,0001 was purchased from the Bank yesterday, and it was known that a similar amount would be taken early next week in addition to sums acquired outside the Bank; yet, though yesterday was the Stock Exchange settling-day, the discount inquiry remained slack, and bills were still to be placed at $1\frac{1}{4}$ per cent, or at one-half the existing Bank rate. It is significant, however, that in spite of the Bank being thus entirely out of the market, it does not gain strength, and in the week ended Wednesday there was a reduction of 340,0001 in the coin and bullion, while the net withdrawal for export was only 132,0001. Next week, including as it will the holiday absorption and the Italian purchases, will show a much larger drop in the coin and bullion. Another feature at the present time is the relapse in the New York Sterling Exchange, which just now appears to be following the same course as in the summer months of the last two years.

NEW YORK STERLING EXCHANGE.

July 16				1680. Per mille. 2 against us			1881. Per mille 1 against u		
" 29 Aug 27		gainst us		4	29	******	41	92	
	9	33	*****	7	99	******	-	99	
Sept 30	81	33	******	81	33			39	

Elsewhere we assign reasons why we are inclined to look less seriously upon this present relapse than we did in 1879 or in 1880, but, nevertheless, the matter deserves attention. The Paris exchange is also adverse to us, and money is so wanted over there that this forms another element of uncertainty in the situation, which, we think, justifies the Bank directors in maintaining a rate which probably the open market will be found to be approaching before long. Money was yesterday obtainable in the Stock Exchangre from account to account at and below 3 per cent., and to-day there was a considerable floating supply at about $\frac{3}{4}$ per cent.

The Bank return is again almost featureless. A slight drop in the other securities is more than counterbalanced by the falling off in the total deposits, and the available balance in the banking department represented by the reserve shows a corresponding decline. In the issue depart-ment, the notes in circulation are 264,0001 less than last week, as a partial set off against the reduction in the coin and bullion.

Silver is quiet at 51gd per oz, or a shade weaker than on Friday last; though Mexican dollars, at 50%d, were today sold at a rise of 1d per oz. On Wednesday morning the Bank of England announced that no tenders would be entertained for the India Council drawings below 1s $7\frac{3}{4}$ d per rupee, which was $\frac{1}{8}$ d above last week's minimum, though silver and the exchange had been dull in the interim. The result was that no tenders were received. Indeed, on the day in question exchange was obtainable something like ¹/₃d below that figure. The India Council, however, appear to have been quite prepared for such a result, and are, it would seem, in no way inclined to humour the market just now, being well aware that if the drafts are not taken up for some weeks to come there will be the greater rush for them afterwards. Remitters may rest assured that the India Council are prepared to wait for their price, and to refrain for the time being from depreciating the exchange by any over-eagerness to secure transfers of cash to this side. For our own part, we should be glad to see the minimum announced for a month in advance. If buyers were certain that-say, for the month of August, no Council drafts would be obtainable below 1s $7\frac{3}{4}d$, it would tend further to steady the exchange.

The Indian New 4 per Cent. Rupee Loan was on Mon-

day applied for in Calcutta three-and-a-half times over the applications reaching 10 crores 80 lacs, say 9,100,0007.

Tenders at 1045 received a partial allotment. Tenders for Treasury Bills to the amount of 1,476,0001 will be received at the Bank of England on Friday next, August 5th. A similar amount in bills drawn in May falls due on the 10th.

We have received the balance sheet of Stuckey's Banking Company to the 30th June, showing deposits 3,773,4031, against 3,524,4801 at this time last year; a reserve of 222,5001, against 219,0001; and the half-year's net profits 37,5121 (after carrying 2,5001 to reserve), against 36,6771. The dividend is not stated publicly, but this net profit is equal to nearly 24 per cent. per annum on the paid-up capital.

We subjoin our usual discount quotations for paper having various periods to run :--

THE STOCK MARKETS .- Money went begging in the Stock Exchange during the settlement, the amount of stock speculatively held being very small, and continuation rates were very light, though that in part was due to the meagre supplies of stock in the dealers' hands. The whole affair was completed with unusual ease, and the business entered into for the next account is as yet small. This is natural, considering the large number of people who are out of town and the Bank Holiday so near at hand. With respect to the movements in prices, there is not much to report. The funds are quiet. Various foreign stocks are higher, though that cannot be ascribed to the influence of the London market. English railways have suffered within the past few days, and American and Canadian were much out of favour early in the week. The cheapness of money is somewhat affecting bank shares, and new insurance shares are out of favour; but a tendency to recovery is visible, after weeks of depression, in Indian gold mines.

The Ceylon and the Swansea loans are the most important new issues this week ; and are a class of security certain to be well received. The other issues are moderately numerous, and of fair magnitude; and the Campos and Carangola Railway debentures were at once subscribed.

157,636,513 • There is a further liability which, it is expected, will not be called up. BRITISH GOVERNMENT SECURITIES.—The week's varia tions in the money price of Consols have been between the following limits :- On Saturday between 101 and 101;;

957

THE ECONOMIST.

on Monday, $100\frac{7}{8}$ and $101\frac{1}{8}$; on Tuesday, $101\frac{7}{8}$ and $101\frac{1}{8}$; on Welnesday, $100\frac{7}{8}$ and $101\frac{1}{9}$; on Thursday, $100\frac{3}{4}$ and $101\frac{1}{9}$; and to-day between 101 and $101\frac{1}{8}$. During the week a triffing relapse occurred, which has to-day been recovered upon the issue of the Treasury Minute, to which reference is made in another part of this paper. Indian loans are quiet, and the rupee paper slightly lower upon the issue of the new loan. Bank stock has, however, advanced no less than 5, iu addition to 3 last week, and stands at an altogether exceptionally high point.

COLONIAL GOVERNMENT DEBENTURES .- Canadian Four per Cents. have risen 1; New Zealand 5-30 and 10-40 Loans, $\frac{1}{2}$; and Nova Scotia, 1.

FOREIGN GOVERNMENT SECURITIES .- Some instances of decided improvement are to be recorded, the revival in Turkish being the most noteworthy. There is a subsi-dence of the hostile feeling between France and Turkey, and more attention is again being directed towards the mission to Constantinople. A renewal of the inquiry for Spanish is also visible, upon the expectation that the Spanish Government may make some proposals at no distant datc. Russian stocks are generally firmer, and at the same time the Russian exchange is rising. A good demand for the new account has also been experienced for Egyptian, and out of the entire list Hungarian bonds alone show depression. Peruvian are unchanged on the week. A number of members of the Stock Exchange have asked the contractors for the guano to ignore the bondholders' committee, and it would seem that Messrs. Antony Gibbs, and Senor Blest-Gana would be willing to follow their advice. Whatever is done, however, ought to have the formal sanction of the bondholders generally.

HOME RALWAVE _The W	menall				e .

HOME RALWAYS .- The unusually light "rates of continuations" at the carrying over of speculative transac-tions on Tuesday, and the generally short supplies of stock caused a fair amount of strength early in the week. But the notification of the Chatham and Dover Preference

dividend (at the rate of 3% per cent. for the twelve months, against 31 14 per cent. in the previous year), coupled Wednesday's Manchester and Sheffield Company's meeting, produced a gloomy impression. Sir Edward Watkin certainly spoke dubiously respecting the Sheffield Company's prospects, but we are inclined to think the de-pression in the South Yorkshire iron trade is less decided than he reported it. Doubtless the port of Grimsby, however, suffers from recently-raised Continental tariffs. The North Staffordshire dividend (2 per cent., against $3\frac{1}{4}$) also caused disappointment yesterday, and in the end prices show very irregularly. The metropolitan lines are higher, but Manchester and Sheffield and some others are very flat.

The following shows the principal changes for the week in the quotations of ordinary stocks, comparing the latest unofficial prices :--

AMERICAN RAILEOAD SECURITIES .- The fall which occarred last week in United States railroad shares made further progress until yesterday, when there was a partial recovery in response to higher prices cabled from New York. On the week, Central of New Jersey and Illinois Central shares are 5 lower, Cairo and Vincennes, St Louis and San Francisco Common and Preferred, and Wabash Ordinary 3, New York, Ontario and Western, and Chicago, Milwaukee and St Paul 2, and Ohio and Mississippi 1. But New York Central, Pennsylvania, and Philadelphia and Reading are at the last ¹/₂ better. FOREIGN RAILWAYS.—Buenos Ayres Great Souther

Stock has risen 1; South Austrian, 5; and Varna, 1; but

[July 30, 1881.

THE ECONOMIST.

959

Buenos Ayres Great Southern Debenture Stock has fallen 3; Mexican Shares, 1; Ottoman, 1; and Royal Sardinian, Matanzas and Sabanılla Obligations have risen 1; San Paulo and Rio, 1; and Varna, \$; while North-Western of Montevideo are 1 down.

BANKS .- Anglo-Foreign shares have advanced 1; Imperial Ottoman, $\frac{3}{4}$; London and South Western, $\frac{1}{2}$; and New London and Brazilian, $\frac{1}{4}$. Australian and New Zealand establishments have been flat; Bank of Australasia having fallen 1; Bank of Egypt, 1; Bank of New South Wales, 1; Bank of New Zealand, $\frac{1}{2}$; Colonial, 1; London and County, $\frac{1}{2}$; London of Mexico, $\frac{1}{4}$; Union of Australia, 3; and Union of London, 1/2.

TELEGRAPHS.-Anglo-American Ordinary and Preferred have risen $\frac{1}{2}$; and the Deferred, $\frac{1}{4}$; while Direct United States are $\frac{1}{8}$ higher. Eastern, however, have fallen $\frac{1}{8}$; and Mediterranean Extension, West India, and Panama Preferred, and Western and Brazilian all 1

INSURANCE .- A rise of 1 is to be recorded in Royal; in Liverpool and London and Globe, and North British and Mercantile; $\frac{1}{4}$ in Home and Colonial, and Universal Marine; and $\frac{1}{2}$ in Thames and Mersey Marine; but a fall of $\frac{1}{2}$ in Northern; $\frac{3}{8}$ in Employers' Liability; and $\frac{1}{4}$ in Railway Passengers.

MINES .- In British mines, Devon Great Consols have risen $\frac{1}{2}$; Marke Valley, $\frac{1}{4}$; and West Seton, 1. Amongst Foreign undertakings, Indian Gold mines are mostly firmer. Indian Phœnix having improved $\frac{1}{8}$, Mysore Reef, $\frac{1}{8}$; Rhodes Reef, $\frac{1}{8}$; Richmond Consolidated, 1; Rio Tinto Shares, $\frac{1}{2}$; and South-East Wynaad, $\frac{1}{4}$. With these exceptions, Foreign mines have been weak.

CORPORATION STOCKS .- City of Quebec loans are all 1 higher; and Otago Harbour, 2nd issue, 2.

GAS.—Prices have been firm. Bahia have improved $\frac{1}{2}$; Bombay, $\frac{1}{4}$; British, 1; Commercial Ordinary, 2; and the New, 3; Continental Union, $\frac{1}{2}$; Gas Light and Coke, 1; Imperial Continental, 1; London, 3; and South Metropolitan B, 2.

IRON AND COAL .- Ebbw Vale are 1 down; while Rhymney Iron have risen 1.

LAND.—Central Argentine Land have risen about $\frac{1}{2}$; Hudson's Bay, $\frac{1}{4}$; and Scottish Australian Investment, 1. SHIPPING.—General Steam are 1 down, but London

Steamboat Preference are quoted $2\frac{1}{2}$ better. TEA.-Assam, Darjeeling, and Jorehaut have advanced

4, 2, and 2 respectively. TRAMWAYS.—City of Buenos Ayres have risen $\frac{1}{4}$; but Barcelona, Hull, Provincial, and Tramways of France are

all down $\frac{1}{4}$. WATER WORKS .- Lambeth have fallen 1; and Southwark and Vauxhall, 3.

MISCELLANEOUS. - Foreign and Colonial Trust Deferred stock is quoted 1 down; Pawson and Co., $\frac{1}{2}$; Royal Aquarium, $\frac{3}{8}$; Telegraph Construction, $\frac{3}{4}$; Tramways and General Works, $\frac{1}{4}$; and Zoedone, $\frac{1}{8}$. Land Mortgage of Egypt have advanced $\frac{1}{4}$.

BULLION.—The following is taken from the circular of Messrs Pixley and Abell, dated July 28, 1881 :— Gold.—The inquiry for the Continent has continued, and bars and coin to the value of 623,000l have been withdrawn from the Bark. and coin to the value of 623,000l have been withdrawn from the Bank; the only amounts sent in being 170,000l sovereigns from Australia. The arrivals have been, 194,340l per Khiva from Australia; 29,000l per Moselle from West Indies; 61,070l per Washington from Central America; total 284,410.l Silver.—The arrivals of the past week have been small, com-prising only 28,000l from New York, and 40,000l from the West Indies. The demand for export has been but small, and the Rosetta has taken only 6,640l to Bombay and Alexandria. The price which we quoted in our last circular as 51[§]d improved for a day or two to 51[§]d, but may now be stated as 51[§]d per oz. standard. Maxican dollars.—The West India steamer has brought about 35,000l of this coin. The supplies having lately been limited, the market has slightly improved, and we quot: 50[§]d as the nearest rate.

mend a dividend of 12 2s 6d per share, clear of income tax, and carry forward 6,7821.

Colonial Bank of New Zealand.—Telegraphic advices from Dunedin notify that the directors have declared a dividend for the

Lancain notify that the directors have declared a dividend for the last half-year at the rate of 6 per cent. per annum, placing 2,000l to reserve, and carrying forward 2,400l. Merchant Banking Company of London.—The directors have declared an interim dividend at the rate of 8 per cent. per annum. National Bank of Wales.—The directors have declared an in-terim dividend at the set of 5 per cent have declared an in-terim dividend at the set of 5 per cent.

National Bank of Wates.—The infectors have declared an in-terim dividend at the rate of 5 per cent. per annum. Preston Banking.—The net profit for the year, including 4,2371 brought forward, is 19,294l, of which 5,000l is required for payment of 10 per cent. per annum on the "A" capital. The interim divi-dend in February on the other moiety of the bank's capital was at the per of 10 per cent per annum, and the directors now propose the rate of 10 per cent. per annum, and the directors now propose to pay a further dividend upon that stock at the same rate, making 10 per cent. for the year. The sum of 3,500l is placed to reserve, 10 per cent. for the year. increasing it to 55,000l.

Queensland National Bank .- A dividend has been declared at the rate of 10 per cent. per annum for the half-year, 5,000l being carried to reserve.

Union Bank of Birmingham.—The net profit for the year, after making all deductions and inclusive of 5171 brought forward, was 5,8771. Of this the interim dividend paid for the half-year ended 31st December, absorbed 2,6051, and a further dividend is now recommended at the rate of 5 per cent. per annum, free of incometax, leaving 400' to be carried forward.

MISCELLANEOUS COMPANIES.

Anglo-American Telegraph. - The total receipts for the six months, including a small balance brought forward, amount to months, including a small balance brought forward, amount to 300,432*l*, and the net receipts, after placing 75,000*l* to renewal fund, to 163,546*l*. One quarterly dividend of 2 per cent. on the preferred stock and of 1 per cent. on the ordinary stock was paid on the 1st May, absorbing 70,000*l*, and a second quarterly interim dividend at the lame rates will be paid on the 2nd August, leaving 23,546*l* to be carried forward. The receipts showed an increase of 31,455l compared with the corresponding period.

Avonside Engine, Limited.—At a meeting of creditors, Mr Spain, the official liquidator, in the chair, it was resolved that the works should be carried on to enable the contracts to be completed, and Mr Spain undertook to provide the funds necessary for the purpose

Calais Tramways.—At the half-yearly meeting a dividend for the half year at the rate of 5 per cent per annum, free of income tax, was declared.

Chudleigh Road Devonshire Clay, Limited.—Creditors must send in their claims by the 2nd September to Mr J. Worley, of 27 Leadenhall street, the liquidator.

Distillers' Company.—At the meeting a dividend at the rate of 10 per cent. per annum was declared.

Eastern Telegraph.—The company are advised that both ends of one of their Aden-Bombay cables have been lifted and the fault cut out, and it is expected that the communication will now be

restored in a few hours as soon as the weather moderates. Gas Light and Coke.—The accounts show a profit sufficient to justify the directors in recommending a dividend at the rate of 11 per cent. per annum. Home and Foreign Investment and Agency.—The company has

declared a dividend for the half-year ended May 31 at the rate of 74 per cent. per annum, carrying forward 6941. Hornsea Steam Brick and Tile, Limited.—Creditors must send in

their claims by 31st August to Mr J. Hardy, of Sheffield, the official liquidator.

London Financial Association .- The directors have been compelled to forfeit 760 shares, upon which 22,840l had been paid, and there are now no arrears of calls outstanding. Notice has been given to pay off on the 17th of Jannary next, or earlier, 60,000l of the 210,000l debentures. As regards the Alexandra Palace and estate, the balance of mortgage has been further reduced by e 4500 6,4507.

Nicholson's Discount.—The sum available allows of, after pro-viding for bad debts, a dividend at the rate of 10 per cent. per

viding for bad debts, a dividend at the rate of 10 per cent. per annum, free of income tax, for the half-year. *Pawson and Co.*—The net profit for the half-year, after making all deductins and allowances, was 3,196*l*, which, with 11,063*l* brought forward, leaves 14,260*l* for disposal. A dividend for the half-year 1 the rate of 5 per cent. per annum, free of income tax, requires (,0.0*l*, leaving 8,260*l* to be carried forward. *Perpetual Investment Building.*—The directors have from the surplus profits of the year declared a bonus equal to 1¹/₂ per cent., making with the interest 5¹/₂ and 6 per cent, for the year on sub-

making with the interest 51 and 6 per cent. for the year on subscription shares.

Railway Rolling Stock.—Owing to the depression in trade, the past year s profits have been 3,2491, or 544 less than in the previous

year. A dividend of 3 per cent. is recommended. T. C. Harper and Co.—The directors will pay an interim divi-dend at the rate of 5 per cent. per annum from the profits of the six months ended 30th June.

Tranways and General Works.—The chairman at the meeting said that the position was satisfactory. They had still to complete the Bordeaux contract and to finish the lines sold to the Lombardy Road Railways Company. At the same time they had plenty of new business offering. A dividend of 6s 6d per share, making, with the 3s 6d per share already paid, 10s per share, or 10 per cent for the year ended June 30th last, was declared, free of income-tax.

NEW COMPANIES AND CAPITAL.

Buenos Ayres (New) Gas 6 per Cent. Debentures.-The directors are prepared to receive applications at parsfor an issue of 70,0001

being the balance of a total authorised issue of 200,0007, secured

by mortgage on the company's property. Ceilon Government 4 per Cent. Loan.—The Crown agents have received tenders for 575,000l, being the unissued balance of a loan for 1,000,000*l*, in debentures of 1,000*l*, 500*l*, and 100*l* each. The minimum price was 102, and the principal is repayable by means

cf a sinking fund of 1 per cent. Campos and Carangola Railway (Brazil) 51 per Cent. Debentures. —Messrs Louis Cohen and Sons are authorised to receive subscriptions for 393,700l in debentures of 100l each, at the issue price of 99 per cent, redeemable at par in twenty-four years by annual drawings. 7	6	 i l	10/5	õ		2

3. The person to whom a postal order is issued must, before parting with it, fill in the name of the person to whom the amount is to be paid, and may fill in the name of the money order office at which the amount is to be paid. The person so named must before payment can be made sign the receipt at the foot of the order, and must also fill in the name of the money office at the the order, and payment can be made sign the receipt at the foot of the order, and must also fill in the name of the money order office, if that has not been already done.—4. If a postal order be crossed " and Co." payment will be made only through a banker, and if the name of a banker is added, payment will be made only through that banker.—5. A postal order presented by, or through, a banker for payment will not (in the absence of an express arrangement between such banker and the Postmaster-General to the contrary).

THE ECONOMIST.

be paid until after such order has been examined at the chief be paid until after such order has been examined at the chief office.—6. After a postal order has once been paid, to whomsoever it is paid, the Postmaster-General will not be liable for any further claim.—7. If any erasure or alteration be made, or if the it is paid, the 'ostimate' denoted will not be made, or any further claim.—7. If any erasure or alteration be made, or if the order is cut, defaced, or mutilated, payment may be refused.—8. The regulations under which postal orders are issued allow the postmaster to delay or refuse the payment of an order, but he must at once report his reasons for so doing to the Postmaster-General. —9. After the expiration of three months from the last day of the month of issue, a postal order will be payable only on payment of a commission equal to the amount of the original poundage, with the addition (if more than three months have elapsed since the said expiration) of the amount of the original poundage for every further period of three months over and above every completed period. The commission thus paid must be affixed in postage stamps to the face of the order. Further information on the sub-ject of the issue and payment of postal orders can be obtained at any post-office at which money order business is transacted. On the 1st of August next the Republic of Guatemala will enter the Postal Union, and prepaid correspondence for that country will

On the 1st of August next the Republic of Guatemala will enter the Postal Union, and prepaid correspondence for that country will then be subject to the following reduced rates of postage :-Letters, 4d per $\frac{1}{2}$ oz; post cards, $1\frac{1}{2}d$ each; newspapers, 1d per 4 oz; printed papers and patterns, 1d per 2 oz; commercial papers, the same as for printed papers, except that the minimum charge will be $2\frac{1}{2}d$. Unpaid letters will be charged on delivery with double postage. Letters, post cards, newspapers, commercial papers, printed papers, and patterns, addressed to Guatemala may be registered; the registration fee being in all cases two-pence, which, in addition to the postage, must be prepaid. The sender of a registered letter, or any other registered article, may obtain an acknowledgment of its the postage, must be prepaid. The sender of a registered letter, or any other registered article, may obtain an acknowledgment of its delivery by paying in advance an additional fee of $2\frac{1}{2}d$. Corre-spondence for Guatemala will be subject in every respect to the conditions of transmission applicable to correspondence addressed to countries of the Postal Union generally.

The Commercial Times.

There is little change in the character of the trade reports this week. In the coal and iron trades a further slight improvement has taken place, and decidedly hopeful views as to the future prevail. But nothing has yet occurred to relieve the depression which weighs heavily upon our textile industries, although possibly some of the dullness now being shown is attributable to the customary holiday langour, and will wear off when business again engages more undivided attention. In the South of England the harvest work is now general, but as to the outturn of the crops there is, as yet, little reliable information. Fairly favourable expectations are entertaied as to the results of the thrashing, and these, together with a drop in the New York quotations, have weakened the wheat market, without, however, causing much of a decline in prices. There is now a larger absorption of pig iron, both by home and foreign buyers. The production, however, is still in excess of current requirements, and there is little prospect of much curtailment of the supply, as the attempt of the Cleveland ironmasters to get those of Scotland to come to an agreement as to the blowing out of a number of furnaces has been unsuccessful. In nearly all branches of the manufactured iron trade greater activity is being shown, and in coal also there is more doing. A large business in cotton has been done in Liverpool at advancing prices, but the upward movement has met with no response in Manchester, where the only effect of spinners and manufacturers endeavouring to obtain more remunerative prices has been to choke off the demand. The demand for English wool has slackened, but sellers are not inclined to make any abatement in prices, and business is accordingly curtailed. At Bradford spinners are more anxious for orders, and rather less firm as to prices, but their advances do not meet with much response from buyers. In pieces a larger business might be done if manufacturers would accept lower rates, but that they show no willingness to do. The produce markets con-tinue quiet, and the tendency is still to lower prices.

THE CORN TRADE.

MARK LANE, FRIDAY EVENING.

0

potato

MARK LANE, FRIDAY EVENING. The weather throughout the country this week has been favour-able for vegetation and pasturage, of which reports read very favourably; but for the want of more forcing sunshine the ripen-ing of the wheat crops has progressed much more tardily than it did recently. Further, fields of wheat were cut in the early part of the week, but reports do not show that cutting has been materially extended since, and unless a decided change takes place in the weather, it is considered that harvesting can hardly become general, in districts south of the Humber, in less than a week or

ten days. The prospects as to ultimate results have not apparently altered, but the unsettled weather, and the consequent delay of the harvest, have tended to give firmness to the trade, as supplies are light and are reducing. Last week the farmers' deliveries were estimated as only about 54,700 qrs for the Kingdom, and the aggregate of English and foreign wheat fresh to hand for con-sumption only about 354,000 qrs. The quantity due to arrive in the next week or ten days promises still less. American shipments from the Eastern seaboard, though increased a little, yet remain light, and prices at shipping ports on the shipments from the Eastern scaboard, though increased a little, yet remain light, and prices at shipping ports on the Continent are generally too high to import with profit. Holders of wheat have, under these circumstances, been firm; and whilst in nearly all directions purchases are still restricted to the bare provisions for immediate requirements, quite previous rates have had to be paid at the outports, as well as in the country markets. At Mark lane to-day the holiday influence further thinned the attendance of buyers, and the business con-cluded was inconsiderable, quotations remaining unaltered in all the country markets. At Mark lane to-day the holiday influence further thinned the attendance of buyers, and the business con-cluded was inconsiderable, quotations remaining unaltered in all positions. The fluctuations in the New York quotations have had little or no effect here. The French markets on the week are rather dearer; but some of the former barely so firm. There has been a fair demand for the good medium grades of flour, and with diminished supplies on offer, prices are well sustained, but hardly to be quoted dearer. There have been good arrivals of maize, and the quantity on passage has further increased to 712,000 qrs. against 650,000 qrs last year. In all positions the demand is slow. Spot and off coast prices are a shade easier, but for September-October shipments firm, and at 26s 3d are fully 9d above those in the former positions. There has not been much passing in barley; the market is, however, fairly steady for both malting and grinding sorts. Beans and peas with a steady demand and reducing supplies have advanced Is per qr at Mark lane. Oats have arrived largely in the port of London this week. Sales have not, however, been pressed, and the market remains without depression through some very common quantities being included in present supplies. Quotations range down to lower figures than they did a week ago.

The following table estimates the home consumption of wheat since the 1st September, contrasted with 1878-9, and with 1870.80.

IRON AND COAL TRADES.

The demand for pig iron continues to improve, but it still falls The demand for pig from continues to improve, but it still falls short of the heavy production, and stocks go on increasing. This excess of supply weighs upon the markets, which remain quiet, but have become slightly better in tone. At Glasgow the price of warrant has moved downwards, the quotations yesterday being 46s 10d, as compared with 47s 4d on the previous Friday. The shipments for the week exceed those of the corresponding period of last year by about 2,700 tons. The manufactured iron trade maintains its improvement, and engineers and shipbuilders con-tinue fairly busy.

maintains its improvement, and engineers and shipbuilders con-tinue fairly busy. Begarding the trade of the Cleveland district our Middlesbrough correspondent writes:—Business in pig iron has been better this week, and some large lots of No. 3 were sold at 37s per ton for prompt, and 37s 44d for delivery up to the end of the year. The volume of trade is very large, and shows a steady increase over previous normal years, but unfortunately there is still the heavy make of iron which depresses the market. The present make of pig iron in this district amount, to the unprecedented yearly out pig iron in this district amount: to the unprecedented yearly out-put of 2,720,000 tons; still the demand is so good that the over-production here amounts now to only 5 per cent, whilst in Scotland this over-production is over 20 per cent. Steel continues in good demand.

At Birmingham business continues fairly active in the finished iron branch, which is supported to a great extent by the require-ments of engineers and galvanisers at home, and railway and dock companies abroad. Large orders for galvanised sheets for Aus-tralia, India, and the South American West Coast have been received by recent mails, and hoop iron continues in strong request for India, Egypt, and the United States. Sheet iron suitable to galvanisers' purposes is in strong demand and scarce at 77 15s, and the order books of most of the makers of this class of iron are reported full till the quarter's end. Marked iron is not in such urgent request, but there is a fairly good demand for certain brands, which are in special favour among engineers. Prices are steady on the basis of 71 for ordinary brands, and 71 10s and 77 12s 6d respectively for those of the three leading firms. At Sheffield, now that the quarterly settlements are over, busi-necs is improving. Ironmasters are getting their stocks reduced, and higher prices are looked for; and in all departments a brisker trade in the autumn is expected. In South Wales rather more activity is now being shown.

activity is now being shown.

Reports as to the condition of the coal trade also are more favour-able. In South Wales the activity is greater than ever, while the demand for manufacturing and steam coals is generally increasing.

THE COTTON TRADE.

LIVERPOOL .- JULY 28.

LIVERPOOL.—JULY 28. Cotton market quiet in the early part of the week, but has latterly been strong, with a considerable business at advanced rates for some descriptions. In Sea Island the sales have been moderate, without change in prices. American in good general demand, and quotations advanced 1sd to 3d per lb. In Brazilian the business has been more general, but the demand freely met at the quotations. Egyptian in fair request, and quotations without change. For West Indian, &c., the quotations are raised 3d to 4d per lb. Peruvian in fair request, and quotations advanced fully

the quotations. Egyptian in fair request, and quotations without change. For West Indian, &c., the quotations are raised $\frac{1}{2}d$ to $\frac{1}{2}d$ per lb. Peruvian in fair request, and quotations advanced fully $\frac{1}{2}$ per lb. East Indian in fair demand, and the better qualities still commanding most attention are generally $\frac{1}{16}d$ per lb higher. "Futures."—The market opened dull, but quietly rallied, and has since hardened throughout the week, closing firm at an ad-vance of $\frac{1}{2}d$ per lb in the near positions, and $\frac{1}{16}d$ to $\frac{1}{8}d$ per lb in the more distant. The latest quotations are—Delivery : American, any port, I.m.c., July, $6\frac{3}{4}\frac{2}{3}$; July-Aug., $6\frac{3}{4}\frac{2}{3}$; Aug.-Sept., $6\frac{3}{3}\frac{2}{6}$; Sept. $6\frac{1}{3}d$ is per lb. The sales of the week amount to 50,500 bales, of which 5,740 are on speculation, and 1.730 declared for Egypt : the forwarded is

on speculation, and 1,730 declared for Egypt; the forwarded is 3,540 bales, of which 2,730 are American, 20 Pernam, 440 Egyptian, and 350 bales Surat, which make the takings of the trade 56,570 bales.

JULY 29TH.—The sales to-day will probably amount to about 12,000 bales, with a firm market. Saturday, the 30th inst., and Monday, the 1st August (the Bank holiday), will be close holidays in the cotton market.

MANCHESTER, JULY 28.

The larger business done in the Liverpool cotton market has met with small response here. Offers have been scarce in all departwith small response here. Offers have been scarce in all depart-ments, and altogether considerably less than an average trade has resulted. Eastern staples do not show much change, but as engagements are drawing to a close producers show more anxiety for business. Domestics, T-cloths and tangits, have met with inquiry for the Levant. Home houses also have operated to a moderate amount. The firmness of prices has materially inter-fered with yarns. Shippers have done little, and in manufac-turing qualities the paucity of the cloth demand prevents makers from operating more freely than they would otherwise have done. from operating more freely than they would otherwise have done. The market to-day is strong in tone with only limited inquiry. C

CALCUTTA, July 1. Imports.—Since the date of last issue the home markets have gradually hardened, and prices are now much above the currencies here, but so far little appreciable effect has been created. The long-continued quietness of the up-country demand and the cessa-tion of local inquiry have offered little inducement for speculative buying, and goods on the spot are still very difficult to move. For forward delivery a moderate amount has been done, but generally firm offers have not led to much business, and prices remain much as they were. The rains have not been very plentiful in the north-west so far, and the markets there have remained almost closed. In Upper and Lower Bengal and in the eastern districts seasonable rains have again been general, and the prospects of a bountiful harvest are good. Dealers still hold to the belief in a better in-quiry and larger business later on, but at the moment the un-certainties about the Silver Conference, to some extent, paralyse certainties about the Silver Conference, to some extent, paralyse trade. Importers have been tolerably firm and have shown no disbosition to realise at the rates now current; most of them having instructions from home to hold for figures which are not yet obtainable. Locally a very small business is doing, and no free buying can be expected until the up-country dealers resume their purchases, and the off-take from the bazaar assumes larger pro-portions.—Calcutta Exchange Report.

BOMBAY, July 1. Piece-Goods.—The demand out of stock is in no way altered for the better, in fact the actual clearances from the bazaar during the the better, in fact the actual clearances from the bazar during the past week are estimated to barely exceed a thousand packages of all descriptions; prices, however, are well maintained, although supplies on hand are very big and are daily augmented by fresh importations. The prospects of an improved off-take are, since the rains fairly set in, much more hopeful, and dealers are well aware that they cannot buy for future delivery except at some advance on the values now current here for spot parcels. The sudden rise in sterling exchange will put the arrival business on a more satis-factory footing, but the rise was certainly needed to leave any commission to the importers on the basis of recent Manchester quotations, and our supplies both here and in course of shipment are just heavy enough to prevent any rise in the rupee value even were the much-needed revival in the up-country orders to become an established fact. Yarns of imported spinning have continued, and we quote 30's water 8½ annas to 9 annas, 30's mule, 8 3-16 annas to 8 7-16 annas, and 40's mule, 8½ annas to 9 annas per lb. —Bombay Exchange Report. -Bombay Ezchange Report.

THE WOOL TRADE.

There has been rather less inquiry for English wool here during the week, and buyers can only be induced to operate by a reduction in price. Holders of wool in the country do not, however, show

in price. Holders of wool in the country do not, nowever, addw any disposition to make an abatement. The supplies available for the next series of colonial wool sales, which will commence on Tuesday, the 23rd of August, are : held over, 41,000 bales; new arrivals, 350,000 bales, making together 391,000 bales. Messrs. Helmuth Schwartze and Co. state that

THE ECONOMIST.

Pr

[July 30, 1881.

Since the close of last series our market has remained quiet, and the inquiry has been of a rather restricted character. The general position of the fine wool industry may, however, be considered fairly satisfactory, as the consumption, according to all reports, is progressing at a good rate. The harvest prospects here as well as on the Continent are favourable, and it is generally expected that, notwithstanding the large quantity of 400,000 bales to be offered, the present range of prices will be maintained during the coming series.

Our Liverpool correspondent writes: "At the auctions of miscel-laneous descriptions, held here on Tuesday, Wednesday, and Thursday, there was a moderate attendance of buyers, and of 16,400 bales offered, about 4,300 bales were disposed of. The most current classes suffered a decline of 4d to 4d per lb on greasy wools, and from $\frac{1}{2}$ d to 1d per 1b on washed, whilst much had to be passed for want of competition. Some further sales have been effected this week in Mohair up to 20 $\frac{1}{2}$ d per 1b, and in Alpaca at from 11 $\frac{1}{2}$ d to 141d per lb."

At Bradford, on Thursday, the wool market was in the same unsatisfactory condition as lately reported, with no disposition to improve, and prices are a shade less firm, with very little business doing. There is still a small business going on in yarns, which tends to give a tone of steadiness to the market; but any attempt to do more business meets with a very cool reception. At the same time the extremely low prices which are sometimes heard of when there is a small business doing, are now conspicuous by their absence. Merchants no longer risk the are sometimes heard of when there is a small business doing, are now conspicuous by their absence. Merchants no longer risk the offering of yarns at prices below spinners' quotations. In pieces there are some orders stirring for fair quantities, but the prices offered are such as cannot be taken by manufacturers and business is checked by the inability of the two parties to come to terms.

At York, on Thursday, the attendance of buyers was small. Rather lower prices were offered. Hog realised 13s to 14s 3d, and ewe 12s to 12s 9d per stone.

JUTE, FLAX, AND HEMP TRADES.

Jute.-There has been a steady market, the unfavourable report of the crop causing holders to ask some advance, which tends to check business. The sales to arrive this week include David's M. D. 1881-2 crop for Dundee at 141 15s; David's S. B., 131 15s, October to November, via Cape; A. B. (two triangles) 17l Septem-ber-October, via Cape, 16l 5s to 17l, September-October; 3,000 bales T. M. M. at 18l 15s c. f. and i. for London. 1,500 bales cuttings to Liverpool at 9l 15s to 9l 17s 6d per ton. Yesterday, 3,000 bales for arrival, including cuttings, via Cape to Liverpool, at 91 15s to 91 17s 6d per ton.

Manila Hemp.—About 2,000 bales have been sold since Friday. Fair, on the spot, at 44l : 200 tons to arrive in Liverpool at 43l 10s to January 1st to 25th July, 226,000 bales; shipments to America, 120,000, against 104,000 last year and 82,200 in 1879. To this Kingdom 71,000 bales, against 116,000. In their weekly report 3 441 los per ton, being 10s above the lowest rates quoted last week. The American markets are better. Receipts at Manila from

In their weekly report, Messrs Armistead and Co. state that there is nothing new in the state of business in Dundee; the linen trade continues to manifest a little more activity in all its branches; the jute manufacturing trade, on the other hand, is still in a somewhat more unsatisfactory state, prices being low and un-remunerative. There is little or no change to notice in the state of the flax market; goods on the spot continue to meet with a slow demand at about recent prices: common and medium sorts are comparatively scarce, and are consequently held for full prices. One steamer has arrived from Archangel with flax since last report. Accounts of the new flax crop continue to come favourable from almost all quarters, and should the weather prove satisfactory for maturing and ripening the flax, a good result may be looked for looked for.

LEATHER TRADE.

The demand for leather in London has continued moderate in extent throughout the week, but no transactions of any magnitude have occurred, as buyers are unwilling to increase their stocks, although prices are firm, with a tendency to advance in scores, articles. Light clean English butts, bellies, shoulders, light dressing hides, and English horse hides, are still in short supply, and are wanted.

COLONIAL AND FOREIGN PRODUCE MARKETS. FOR REPORT OF THIS DATS' MARKET SHE " POSTSCRIPT.

MINCING LANE, FRIDAY.

SUGAR .- The stocks by the latest return showed some further increase, and the prospects of this year's beet supply are, so far, con-sidered favourable. Buyers have taken small supplies during the week; prices being without alteration. Two floating cargoes Java off the coast are reported on previous terms. The business in West India amounts to 365 casks, and about 1,200 barrels and have a barbadoes at auction withdrawn Control line and west finding amounts to 300 cases, and about 1,200 carrens and bags. Barbadoes at auction chiefly withdrawn. Crystallised Demerara realised 288 6d to 32s, and very dark brown grainy St. Vincent's at 21s 6d to 23s 6d per cwt. The few parcels low brown East India sold have been at former rates, in the absence of speculative demand. Contracts have been made in new beet for late delivery at some decline. The returns of sugar in the four

parts of the United Kingdom last week do not present any feature of interest, Home deliveries continue very steady. IMPORTS and DELIVERIES of SUGAR in LONDON to July 23, with STOCKS on hand,

SAGO.—Of 1,752 bags by auction, 400 bags fair small sold at 15s per cwt, being again easier. SAGO FLOUR.—1,323 bags bought in at 14s to 15s per cwt. TAPIOCA.—1,322 bags Singapore flake were chiefly taken in a few lots selling at 1³/₄ d to 1³/₄ d per lb. 732 bags pearl withdrawn. BLACK PEPFER.—The market is quiet; the sales, including Penang, at 5d: Singapore 5³/₄ d to 5⁶/₅ d; to arrive, 5³/₄ d. 641 bags common Batavia by auction sold at 4⁸/₅ d, two or three lots 4³/₄ d; a decline of about ¹/₈ d per lb. WHITE PEPFER.—Prices are easier, and 701 bags Singapore by auction part sold at 7³/₄ d per lb for rather common quality.

THE ECONOMIST.

OTHEE SPICES.—Nutmegs have been in demand, and some busi-ness privately at firmer prices. 29 cases Penang part sold as follows: 113 and 110's, 28 3d to 28 4d; 70's, 38 2d. Other kinds follows: 113 and 110's, 25 50 to 25 41; 70's, 55 20. Other kinds held at advanced rates. 55 boxes Penang realised 2s 4d; one lot, 2s 5d for 110's. 15 cases brown Java withdrawn at 2s 9d. 18 cases 2s 5d for 110's. 15 cases brown Java withdrawn at 2s 9d. 18 cases Penang Mace found buyers: middling to fair, including slight mouldy, 1s 5d to 1s 7d; low, 1s 4d. Two cases very good Penang Cloves sold at 1s 11½d to 2s. 263 bales Zanibar Cloves partly found buyers at 11½d to 1s for common to good. 68 bales stems part sold at 3½d per lb. Business has been done in Cassia Lignea at 3½d per lb. 521 cases 150 bags 120 pockets Cochin Ginger partly sold : rough, rather small, 27s 6d to 28s; good bold, 33s to 34s 6d; fine scraped, 90s; small washed, 34s. 243 barrels Jamaica part sold at 58s to 70s; and 88s to 120s per cwt for good to fine. Pimento dull, and 1,227 bags in the weekly sales about half found buyers at ½d to ½d decline, from 4½d to 4¼d per lb for common to good. good.

SALTPETEE.—Firm, at the late advance, and further sales re-ported, of which particularls are not given. The price of refined is raised 6d per cwt.

COCHINEAL .- A considerable quantity has changed hands by private contract at the quotations.

OTHER DRYSALTERY GOODS.—At the weekly public sales 1,744 bags Bengal turmeric were taken in. Privately business reported at 12s 3d per cwt. In other articles no change to report. 700 bags cubes Gambier were taken in at 25s 6d. Myrobolanes part sold at

7s 6d to 11s per cwt. DRUGS.—Aloes—Cape in short supply, and prices well main-tained. Balsam—Peru also very scarce and dear. Balsam Capivi quiet. Bark—South American and East Indian Cinchona little quiet. Bark—South American and East Indian Cinchona little doing; prices unaltered. Crown Bark for druggists' purposes sold rather cheaper. Camphor flat. Cardamoms firmly held. Castor Oil very little offering. Ipecacuanha, good root wanted. Musk steady. Rhubarb quiet. Oil of Cassia and Oil of Aniseed neglected. Opium, value still tending downwards. SHELLAC.—The market is quiet. 102 chests button, by auction, on Tuesday were taken in at 61 2s 6d to 71 5s. Privately a few

sales on former terms.

sales on former terms. METALS.—The markets are steady, but without animation. Lead meets with rather more inquiry at current low quota-tions, and Spanish is now a shade better. Scotch pig iron has ex-perienced very slight change during the week, the stock being still 120,000 tons above that of last year at same date. Shipments make artisfactory process and the present large stock of 572 000 still 120,000 tons above that of last year at same date. Shipments make satisfactory progress, and the present large stock of 572,000 tons will soon show some decrease. A quiet market, by this morning telegram, at 46s 9d to 46s 10d per ton cash in Glasgow. Finished iron is generally in good demand at the quotations. The public sale of 23,600 slabs Banca tin held in Holland on Wednesday established an average price of 544 guilders, equal to 90l 10s to 90l 15s there. In the London market a firm tone prevails. Yes-terday business at 90l cash. Silesian spelter slow at 15l 10s to 15l 12s 6d. 140 tons sheet zinc, rolled at the London Mills, sold by auction. at 18l 12s 6d; one lot, 18l 15s. Imported copper quiet, and Chili barely supports its previous value. quiet, and Chili barely supports its previous value.

I.INSEED.—Several cargoes of Azov have sold: new crop, Sep-tember to October shipment, at 48s c. f. and i. A steamer cargo, August, 47s 9d, c. f. and i. to the Contine it; one on passage at 49s for the United Kingdom. Calcutta firm at 50s 6d to 50s 9d. For shipment, via Cape, 50s 6d to 50s 9d; to Hull, 51s 6d to 51s 9d. Bombar Answer Serie has to the contine real of the form Bombay, August-September, to the same port, sold at 43s per quarter. Imports since 1st January, 331,600 quarters, against 221,400 quarters last year.

221,400 quarters last year. OILS.—A few sales have been made in olive on the spot at the quotations, and the market is less firm. No transactions reported in sperm, the value of which, with other fish oils, continues nominal. Pale seal in demand. Cocca-nut is very flat, even at present extremely low rates. Ceylon in pipes has sold at 261 los to 261 15s; to arrive, 261 15s to 271. Holders of palm have not accepted any decline. The market for rape is firmer, with a steady demand. English brown, 291 5s to 291 10s; last four months, 291 15s to 301. Linseed quiet at 261 7s 6d to 261 10s; last four months, 261 5s per ton. SPIRITS TURPENTINE.—With fresh arrivals prices have declined, but the stock is still much smaller than usual, viz., 9,978 barrels; American, 31s 3d to 31s 6d; last four months, 31s per cwt. PETROLEUM OIL is steady: on the spot, 6gd to 6gd; last four

PETROLEUM OIL is steady: on the spot, 6gd to 6fd; last four months, 6fd to 7d; January to February, 7d per gallon. Stock, exclusive of barrels landing, 81,800 barrels, against 112,600 barrels last year at same date. Deliveries since the 1st of January, 229,900, against 207,900 barrels.

TALLOW.—Australian continues in good demand, and the supply is large. Petersburg unchanged, viz., 41s per cwt. Town was reduced to 33s 6d per cwt net last Friday. Stocks of imported

tallow keep moderate. ToBACCO.—There has been but little done in American tobaccos during the past week : there has been within the last few days more inquiry. Prices of fine grades are firm; but holders of inferior grades are willing sellers. In substitutes a fair business has been done.

FRIDAY EVENING. POSTSCRIPT.

SUGAR.—The West India at public sale to-day was chieffy bought in. By auction 243 casks grocery Porto Rico part sold at 25s to 27s 6d for grocery. 732 bags Bengal withdrawn. 585 bags Egyptian taken in at 26s. Privately 900 bags Bengal sold at 16s. One of Cuba at 24s for Dublin.

COFFEE.-There have not been any public sales.

RICE.-Two cargoes of Rangoon sold at 8s 3d to 8s 41d, open marter, March to April shipment.

METALS .- No alteration in copper. Tin, 901 to 901 2s 6d cash.

Scotch pig iron, 46s 9d to 46s 10d per ton cash. TALLOW.—Of 2,583 casks Australian by auction about two-thirds sold at previous rates to 3d under for mutton. The latter quoted 36s to 36s 6d for fine, and beef 33s 6d to 34s per cwt. No alteration in home-made.

ADDITIONAL NOTICES.

-Messrs J. C. Sillar and Co. report :- The market remains TEA.very dull, and prices generally are unchanged. Sound common congou is still quoted at 54d to 64d per lb. Fine China congous remain firm. Indian teas still meet with favour, and command extreme rates. Fine gunpowders have met with more enquiry, but Hysons are rather lower. The statistical position of the market presents no new feature.

presents no new feature. GREEN FRUIT.—Messrs Keeling and Hunt report that oranges and lemons maintain their value; nuts of all kinds dull in de-mand; first arrival muscatel grapes from Malaga realised good prices; Oporto onions rather dearer; pine apples selling freely. DEN FEUIT.—Messrs Richard Witherby and Co. report that the sole matter of interest is centred on the approaching crop of Va-lencias which is reported as large and of superior quality. There is hardly any business passing in London, and prices of all fruits are rather in buyers' favour compared with last week. METALS.—Business for the most part rather limited. Copper

are rather in buyers' favour compared with last week. METALS.—Business for the most part rather limited. Copper having been slow of sale, is from 5s to 10s a ton lower for Chili bars, which to-day are at 581 12s 6d cash for g.o.b.'s. Iron is steady for manufactured kinds, and makers are fairly busy, but Scotch pig has fallen about 6d per ton to-day, 46s 9d being the quotation for g.m.b. Tin is an exception, being 5s to 10s a ton dearer and in moderate demand. Spelter firm in price, with but little doing. Lead and tinplates quiet.

METROPOLITAN CATTLE MARKET.

MONDAY, July 25.—The total imports of foreign stock into London last week amounted to 14,481 head. In the corresponding week of last year we received 18,036; in 1879, 15,680; in 1878, 16,465; and in 1877, 17,431 head.

Supplies of cattle were not large, but were ample for all require-Supplies of cattle were not large, but were ample for all require-ments. Business was slow, and in prices there was no particular change, the best Scots and crosses selling at 5s 2d to 5s 4d per 8 lb. There was a moderate show of foreign beasts, which met a quiet sale at about late rates. The sheep trade was quiet on previous terms, the best Downs and half-breds realising 6s 2d to 6s 4d per 8 lb. Lambs were quiet at 6s to 7s 6d per 8 lb. Calves and pigs sold at about late rates.

THURSDAY, July 28.—Supplies of cattle to-day were light, and business was dull, and a decline in price of 2d to 4d per 8lb. Of sheep and lambs there was a good supply; the demand, however, was quiet at about late values. Prime calves sold readily; second qualities were dull of sale. The following are the quotations :— Best Herefords and Norfolks, 5s to 5s 2d; heavy shorthorns, 4s 10d; second quality beasts, 4s 6d to 4s 8d; best downs and half breds, 6s to 6s 4d; hore wools 5s 10d to 6s; second quality and breds, 6s to 6s 4d; long wools, 5s 10d to 6s; second quality and ewes, 5s to 5s 8d; prime calves, 5s 8d to 5s 10d; rough, 4s 8d to 5s 4d; lambs, 6s 8d to 7s 6d per stone.

METROPOLITAN MEAT MARKET.

MONDAY, July 25 .- There was a short supply of meat on offer and trade was slow as follows :--

rera	5 105	Dy	the	carcase.

THE ECONOMIST.

List of Applications for Shares will CLOSE on FRIDAY, August 5, for London, and SATURDAY, August 6, for the Country.

A FREEHOLD INVESTMENT-NO ROYALTIES.

A FREHOLD INVESTMENT-NO ROYALTIES. Several tons of ore taken indiscriminately from the mines are now on view at the Offices. A divided at the minimum rate of 20 per cent. per annum is guaranteed by the Vendor during the first year of the Company's working, secured to the satisfaction of the Directors by deposit and investment of £30,000. 55,000 Shares of the present issue have been taken by the Vendor in part discharge of purchase-money (this being the extreme limit to which the rules of the 50,000 Shares have been already privately applied for, leaving a residue of 70,000 Shares, which are now offered to the public at par. The remaining Capital cannot be issued under the Company's Articles, except at a premium on to the state the Mines and Works are taken over. Onarterly dividends will be declared, the first payable within Four Months after the Mines and Works are taken over. Interest at the rate of 5 per cent. per annum will be allowed to all Shareholders on amounts paid in advance of Calls.

NORTH WALES FREEHOLD COPPER MINES THE AND SMELTING COMPANY, LIMITED.

Incorporated under the Companies Acts, 1862 to 1830, which strictly limit the Liability of each Shareholder to the fixed Amount of his Share. CAPITAL £250,000, in 250,000 Shares of £1 Each. PRESENT ISSUE, 165,000 Shares at Par. No further issue except at a premium

2s 6d on Application, 2s 6d on Allotment, 5s One Month after Allotment, and the Balance as required, but with an interval of not less than Three Months between each Call.

PROSPECTUS.

A B R I D G E D OBJECTS OF THE COMPANY. This Company has been established for the purpose of acquiring and working the freehold mineral estates, including valuable copper and lead mines, known as Derwen Deg, Machernig and Pannol Gwyn, in Car-narvonshire, North Wales. They are in active working order, and situate on the main road, about a mile and a half from the town of Conway, and close to the Isle of Anglesey, in which are the celebrated Mona Mine and the Pary's Mountain. UPWARDS OF £40,000 ALREADY EXPENDED PRESENT DURADY EXPENDED

<text><text><text><text><text><text>

Morris, Waiter Eddy, John Lean, John Howans, John Roberts, and T. J. Evans. SITUATION OF MINES.—NATURAL ADVANTAGES.—LABOUR CHEAP AND ABUNDANT. The mines themselves are well placed for convenience and economy in working. From Conway the ore is conveyed direct to the smelting works, either at Amllwch, at Swansea, or at St Helen's (where there are a large number of such works), and it has a ready and immediate sale at high prices. It should be mentioned that there is not only a good railway station at Conway, but also a shipping port to any part of the kingdom. The mines also enjoy the advantage of being in a neighbourhood where labour is exceptionally cheap and abundant. FEATURES OF THIS UNDERTAKING. The two important features of this undertaking, which make it almost unique in the history of British mining, are— Firstly.—The property is absolutely freehold, and as the Company pays no royalty, and they are their own landlords, the shareholders do not run the risk of some day finding their property forfeited for non-performance of covenants.

of covenants.

Secondly.—All the work of prospecting, boring, and the other expensive labour of searching for the lodes, has been already performed; the whole estate has been tested in every part, and found to be absolutely impreg-nated with minerals and mineral substances, while the position of each lode has been clearly ascertained, as will be seen from the accompanying

estate has been tested in every part, and found to be absolutely impre-nated with minerals and mineral substances, while the position of each lode has been clearly ascertained, as will be seen from the accompanying map or plan. The purchase includes the cottages and the workshops on the estate, together with the valuable and expensive machinery already mentioned engines, boilers, boring machines, and apparatus for dreasing and reducing the ores, with ample plant and stores. TERMS OF PURCHASE. By the terms of the purchase the vendor, who is the Promoter, and by formation of the purchase the vendor, who is the Promoter, and by formation of the purchase the vendor, who is the Promoter, and by formation and registration of the 263,000; the sum of £30,000 being retained by the Directors, and invested under the provisions in the Com-pany's Articles of Association as a security for the fulfilment of the gam rantee. There will be no preliminary, promotion, or other expenses, except brokerage and the ordinary and proper legal expenses attending the formation and registration of the Company; which have been fixed at 19 er cent, on the registered capital of the Company. Many SATICLES MAPS, PLANS, AND SAMPLES OF ORE TO BE SEEN AT COMPANY'S OFFICES. The Reports, of which extracts are given, with the maps of the estate, and plans of the mining setts, can be seen at the Offices of the Company. Several tons of ore, taken indiscriminately from the mines, will also be on use during the time the subscription list is open. The event of the capital being over-subscribed. The Directors pledge themselves to allot, pro rati, so as to ensure an equitable division among applicants, due regard being given to priority of application. The Bankers of the Company, or with the Secretary, at the Company's office. Application may also be made, accompanied by a Cheque or Post for Shares may be made on the form annexed to the prospecturs, accompanied by a deposit of 26 dip er share, and may be left either with the Bankers of the Company, or wit

Buenos Ayres). Buenos Ayres). London and County Banking Company, Limited, 21 Lombard Street, E.C., and Branches. Solicitozs-Messrs Ashurat, Morris, Crisp and Co. AUDITORS. Messrs Quilter, Ball, Crosbie, Clegg, and Welton. SECRETARY-T. E. Preston, Esq., (pro tom.) TEMPORARY OFFICES-5 Moorgate street, E.C.

TENFORARY OFFICES-5 Moorgate street, E.C. This Company has been formed for carrying on in the River Plate Republics (comprising Buenos Ayres and the provinces of the Argentin Republic and the Republic of Urugray) a Trust, Loan, and Agency busi-ness on the principle of the well-established companies new carrying on a sinilar business in connection with the British Colonies, the Unit of States of America, &c., which in many instan es pay dividends of from 10 to 16 per cent., besides the accumulation of large re erve funds, and whose shares command premiums up to 240 per cent., as appearing by the list printed at foot. The principal business of the Company will be the raising of money here on debentures and lending it again in the Kiver Plate at the much higher rates of interest prevailing there, thus occupying the position of middle-man between lender and borrower. A com-paratively small percentage of profit on the barres, when the business is developed. There is little or n-rick in this class of business, as it is the custom in the River Plate to lend on morgage only one-half the value of the morgaged property. The Directors, several of whom are connected with

risk in this class of business, as it is the custom in the River Plate to lend on mortgage only one-half the value of the mortgaged property. The Directors, several of whom are connected with the River Plate, are satisfied that there is a good open-ing for this company's operations in that country, where the rates for loan on first m rigages are exceptionally high the Buenos Ayres State Mortgage Bank charging at present 8 per cent. interest and 1 per cent, commis-sion for their auvances, and the usual discount rates being from 7 to 9 per cent. The area of the Argentine Republic alone is 1,200,000 square miles, being larger than any other Fouth American R public. This vast territory is traversed by an immense river system, and it is al-eady intersected by 1,676 miles of ralways, and 5,495 miles of telegraph, both of which are being rapidly extended. Until quite recently the chief attention of fa mers has been devoted to stock raising, and the exports of woo', hides, tallow, and preserved meat are very large. A wonderful increase bas, however, taken place within the last year or two in the production of cereals, showing that a very much larger tract of land is every year being brought under cultivation, in the same way as in the virgin districts of the United States. The following figures w.ll illustrate these remarks :-1870. 1870. 1870. 1870.

			1870.	 1879.	1880.

reported. The figures for barley, flour, potatoes, tobacco and other products of the soil show similarly striking in-

The Products of the coll show similarly striking in-creases. The Republic of Uruguay, with its capital, Monte Video, though not so important as the Arge time Republic, also offers a large field for the development of the resources of national wealth. It is in this Republic that the immense establishment of Liebig's Extract of Meat Company and other establishments of a similar character are situated, and the growth of the export of Preserved Beef and Extract of Meat shows how largely this trade is being developed, there having been shiped in 1873. In both the Argentine and Marce Parkling the

been shi, ped in 1870 1,249,775 kilos, against 101,663 ki os in 1873. In both the Argentine and Uruguay Republics the system has been largely adopted of forming colonies of different nationalities, and hence there now exist im-portant Welsh, Italian, Swiss, German, Basque, and other communities, which are a growing source of prosperity and strength. The Directors have already secure 1 a valuable busi-mess for the Company, viz, the purchase of the principal assets of the Mercantile Bank of the River Plate (now in liquidation), standing in the bank's books at £70,700, and comprising all the debentures and the principal methods in the shares of the Montevideo Waterworks, and interests in real property, railways, &c., in the Argen-time Hepublic and Uruguay; the terms being the pay-ment of a part of the purcha-e money (£340,000) in each, and the balance (£250,000) in ceferred shares. The present income from these assets is £18 500 per annum, which will no doubt be considerably incremsed. The Directors consider the realisable value of these that the surplus will constitue e an imports t asset of the Company, thereby strengthening the position of

the A shareholders. The intended agreement for giving effect to this purchase is scheduled to the Articles of Associatio

effect to this purchase is scheduled to the Articles of Association. The Directors propose to make a first issue of Deben-sures towards providing the amount payable in cash as above; and as lenders will have, in addition to the security of the Company's assets, the guarantee of the uncalled liability on its shares, the Debentures will com-stitute an exceptionally good security. If no allotment be made the amount paid on deposit will be returned in full. The above Agreement, and the Memorandum and Articles of Association of this Company, can be seen at the offices of the Solicitors. Prospectuses and Forms of Application for Shares can be obtained at the Temporary Offices of the Company, or from the Bankers or Solicitors. Application for Shares must be made on the Form accompanying the prospectus to the London and County Banking Company, Limited, or any of its Branches.

London, 29th July, 1881.

KINAHAN'S LL WHISKY. Pure, Mild and Mellow, Delicious and most Wholesome. Universally recommended by the Pro-fession. The Cream of Old Irish Whiskies.

KINAHAN'S LL WHISKY. Dr Hassall says :-- "Soft and Mellow, Fure, well Matured, and of very excellent quality."

KINAHAN'S LL **n** Gold Medal, Paris Exhibition, 1878; Dublin Exhibition, 1865, the Gold Medal. 20 Great Titchfield street, London, W. WHISKY.

HOLLOWAY'S PILLS.— Invalids distracted by indigestion and dis-couraged in their search for its remedy should make trial of this never-failing medicine. A lady, long a martyr to dyspeptic tortarces, writes that Holloway's Pills made her feel as if a burden had been taken off her. Her spirits, formerly low, have grently im-proved; her capricious appetite has given place to healthy hunger; her dull, sick headache has departed, and gradually so marvellous a change has been effected, that she is altogether a new creature, and again fit for her duties. These Pills may be ad-ministered with safety to the most delicate. They never act harshly, nor do they ever induce weakness; they rightly direct deranged, and control excessive action.
