

I have...

Editing Checklist

- [Created an account](#) & logged in.
- Searched to see if the page already exists (& checked my topic is [notable](#) if not).
- Located at least 3 secondary sources to give me information on the topic.
- Opened my Sandbox to edit (new pages) or clicked “Edit” (existing pages).
- Written/improved a [lead section](#), making it clear:
 - who/what the page’s subject is/was and
 - why they are notable.
- Added more information (putting everything in my own words)
e.g. history/context, work/major events, relations/affiliations, legacy, etc.
- Referenced where I learned that information using the Cite button.
- Made [wikilinks](#) (chain link button) to connect my article up to other articles, and gone to other articles and added links to my page where relevant.
- Created an [infobox](#) (where needed) by clicking Insert and then Template.
- Considered adding a picture by clicking on Insert and then choosing Media.
- Added [categories](#) (by looking at similar pages for ideas on which ones to use!).
- Added external links and/or [templates to wiki sister sites](#) (where needed).
- Written an edit summary & pressed save (if the page existed already), or (for new pages in your Sandbox) clicked the big blue submit button!
