AG 000.7

SUBJECT: Distribution of 16 mm Projection Equipment

TO : Commanding Officer
Kagawa Military Government Team
APO 1050

1. Ten (10) additional 16 mm motion picture projectors and twelve (12) 50" x 67" screens will be shipped this week to the Kagawa Prefectural Film Library from the Shikoku Regional Film and Service Center, transportation to be furnished by the Japanese agency concerned. Your organization already has six (6) projectors and six (6) screens which will also be given into the physical custody of the Kagawa Prefectural Film Library. Inclusion of these six (6) projectors and six (6) screens has been made on the inclosed hand receipt and upon return of this receipt to the Regional Film and Service Center, through this headquarters, your organization will be relieved of responsibility. This receipt is to be accomplished within four (4) days after receipt of projectors.

2. Among the six (6) projectors now in the custody of your organization are three (3) which were released several months ago. Before these are released to the Prefectural Film Library, they must be stenciled "Property of the U. S. Army" in white letters 1" high. The stenciling will be done on the top of the machine cases parallel to the carrying handle. The top of the amplifier case will be stenciled in a like manner. The equipment will also be stenciled in white with the name of the region. A stencil for this may be secured from the Civil Information Office of this headquarters.

3. To facilitate the maintenance of proper records, the equipment will also bear a region number, stenciled in white, on the tops of projector and amplifier cases. The projector and amplifier will carry duplicate numbers and will be maintained and accounted for as a complete unit. The following projectors and amplifiers in your custody therefore must be additionally marked before release with the following Region numbers:

Projector No.	Amplifier No.	Region No.
11554851	11554765	65
11554881	11554610	66
11554776	11554846	67.

4. All projectors except the three (3) originally issued, will be stored in the prefectural film library until notification is received from headquarters, Eighth Army, authorizing their release to using agencies. In the interim, military government personnel will ascertain that the equipment is being utilized to further the instruction of projectionists, and that such projectionists are properly licensed. The prefectural Visual Aid Official will assume the responsibility for training and licensing all projectionists. In the meantime, schedules of showings will be maintained with the use of the

AG 000.7 (4 Oct 48)

OCT 11 1948

three projectors originally allotted.

5. It is intended that prefectural film libraries will be located on the premises of prefectural libraries. Kencho facilities may be used as a temporary expedient in the event that the prefectural library is inadequate or non-existent. Headquarters, Eighth Army, requires through channels a request for an exception to this policy.

6. All repair work will be done by the Shikoku Region Film and Service Center, Japanese address, Ikedaya Kan, Minami-Shinmachi, Takamatsu-shi, Telephone, Takamatsu 4555. Equipment returned for repair must be sent as a complete unit, i.e., projector, speaker, cords and running spares if any. A strong, well cushioned wooden box will be constructed for each machine. This projection equipment is under no circumstances to be transported within the prefecture without such protection.

7. Report of compliance with the foregoing is requested.

TOKUSHIMA MIL GOVT TEAM, APO 1050, 9 October 1948

TO: Commanding Officer, Shikoku Mil Govt Region, APO 1050

1. In compliance with paragraph 1, basic letter, receipt for ten (10) 16mm motion picture projectors and twelve (12) 50" x 67" screens, received on 8 October 1948, plus six (6) 16mm projectors and six (6) screens previously received, is enclosed herewith.

2. Stencil markings will be placed on the three (3) projectors as directed in paragraphs 2 and 3 of basic letter, within one week of the date of this letter.

3. Projection equipment is, at present, stored in the kencho, as the building which will house the prefectural film library is still in the process of being built.

4. Prefectural Visual Aid official has given a training course for projectionists and intends to issue licenses to 600 qualified operators during this month. This headquarters plans to spot-check several of these operators as to their knowledge and handling of the equipment.

5. Sufficient wooden boxes to protect each projector and each amplifier while in transport have already been made. Sign stating "Property of U.S. Army" has been placed on these boxes.

AG 000.7

SUBJECT: Distribution of 16 mm Projection Equipment

TO : Commanding Officer
Kagawa Military Government Team
APO 1050

1. Ten (10) additional 16 mm motion picture projectors and twelve (12) 50" x 67" screens will be shipped this week to the Kagawa Prefectural Film Library from the Shikoku Regional Film and Service Center, transportation to be furnished by the Japanese agency concerned. Your organization already has six (6) projectors and six (6) screens which will also be given into the physical custody of the Kagawa Prefectural Film Library. Inclusion of these six (6) projectors and six (6) screens has been made on the inclosed hand receipt and upon return of this receipt to the Regional Film and Service Center, through this headquarters, your organization will be relieved of responsibility. This receipt is to be accomplished within four (4) days after receipt of projectors.

2. Among the six (6) projectors now in the custody of your organization are three (3) which were released several months ago. Before these are released to the Prefectural Film Library, they must be stenciled "Property of the U. S. Army" in white letters 1" high. The stenciling will be done on the top of the machine cases parallel to the carrying handle. The top of the amplifier case will be stenciled in a like manner. The equipment will also be stenciled in white with the name of the region. A stencil for this may be secured from the Civil Information Office of this headquarters.

3. To facilitate the maintenance of proper records, the equipment will also bear a region number, stenciled in white, on the tops of projector and amplifier cases. The projector and amplifier will carry duplicate numbers and will be maintained and accounted for as a complete unit. The following projectors and amplifiers in your custody therefore must be additionally marked before release with the following Region numbers:

Projector No.	Amplifier No.	Region No.
11554851	11554765	65
11554881	11554610	66
11554776	11554846	67.

4. All projectors except the three (3) originally issued, will be stored in the prefectural film library until notification is received from headquarters, Eighth Army, authorizing their release to using agencies. In the interim, military government personnel will ascertain that the equipment is being utilized to further the instruction of projectionists, and that such projectionists are properly licensed. The prefectural Visual Aid Official will assume the responsibility for training and licensing all projectionists. In the meantime, schedules of showings will be maintained with the use of the

three projectors originally allotted.

5. It is intended that prefectural film libraries will be located on the premises of prefectural libraries. Kencho facilities may be used as a temporary expedient in the event that the prefectural library is inadequate or non-existent. Headquarters, Eighth Army, requires through channels a request for an exception to this policy.

6. All repair work will be done by the Shikoku Region Film and Service Center, Japanese address, Ikedaya Kan, Minami-Shinmachi, Takamatsu-shi, Telephone, Takamatsu 4555. Equipment returned for repair must be sent as a complete unit, i.e., projector, speaker, cords and running spares if any. A strong, well cushioned wooden box will be constructed for each machine. This projection equipment is under no circumstances to be transported within the prefecture without such protection.

7. Report of compliance with the foregoing is requested.

8 December 1947

OPERATIONAL MEMORANDUM)
)
NUMBER 1)

MOTION PICTURE PROJECTION EQUIPMENT
FOR USE BY MILITARY GOVERNMENT UNITS

1. References:

a. Operational Directive No. 57, Headquarters Eighth Army, 16 August 1947, subject: "Civil Information Activities."

b. Operational Directive No. 67, Headquarters Eighth Army, 15 October 1947, subject: "Motion Picture Projection Equipment for Use Military Government Units."

2. Military Government team commanders will send a courier to this headquarters before 20 December 1947 to pick up subject equipment. Each team will take its full allowance of three sets of equipment (total of six machines: projectors, 3 and amplifiers, 3) Courier will not be the regular mail courier, but will be a responsible soldier who will carry no other material--mail, etc.--while transporting machines, and he and the machines will ride on an Allied coach.

3. Subject projection equipment will be issued on memorandum receipt to each team. Military Government team commanders are not accountable for property issued under this memorandum but are required to exercise reasonable care in safeguarding and maintaining it. Special attention is called to paragraph 3, Reference 1,b, above.

4. Upon receipt of projection equipment, a test check will be made by each unit to determine condition of equipment and a report will be made to this headquarters within 48 hours as to any deficiencies noted. If no report is received within 48 hours, it will be assumed that equipment is in good condition.

5. A one-day school for licensed Military Government team soldier projectionists will be run at the Kagawa Military Government Team Headquarters' theatre, Takamatsu City, on 22 December 1947. Military Government team projectionists may then train Japanese projectionists, and each Military Government team may issue licenses to Japanese projectionists who qualify. However, licenses will be granted to operate subject equipment only. Equipment will not be used before Japanese projectionists have been trained and properly oriented on the care and use of equipment except by special arrangement with this headquarters.

6. A strong, well-cushioned, wooden box will be constructed for each machine issued. Although shipments to teams will be in original cardboard casings, machines will not be transported within prefecture in these casings but in constructed wooden boxes. Attention is drawn to paragraph 9, Reference 1,b, above. When machines are not in use, they will be kept in an adequate, locked storage-room.

7. Military Government team commanders will exercise special care to ensure compliance with paragraph 6,a, Reference 1,b, above, which states that subject equipment will be used only for re-orientation and education of the Japanese in furtherance of occupation objectives and in accordance with existing policy. Subject equipment will not be used for exhibition of films for the training or entertainment of Occupation personnel or by Japanese agencies for purposes other than those stated in reference 1,b, above.

8. Adequate reports will be made of use of equipment, together with reports of use and efficacy of any films which may be exhibited using this production equipment. Such reporting may be accomplished in Annex E of the Monthly Military Government Activities Report.

Report of Visual Education

April - August.

Visual Education Section

(Kagawa Prefecture.)

1. Outlook

We have done our best for the preparation of promoting visual education since the chiefs' conference of Chugoku and Shikoku districts which was held on March 4th, this year at Okayama, convened by SCAP.
However, it is not yet carried on smoothly. On August 13, we finally established the Educational Film Service Headquarters, Shikoku. The programs of visual education in this prefecture during April - August were done successfully.

1. The Visual Educational Section was established in the Prefectural Educational Dept.
2. The Kagawa-ken Film Library was established in the Takamatsu Upper Secondary Girls' School
3. The Visual Educational Section was established in each local office. (Nakatado and Ayauta are in preperation)
4. Visual Educational Studying conferences were held at 6 places
5. Visual Educational Movies were shown at many places.
6. Marionette Training School was held in Takamatsu and Marugame.
7. The Takamatsu Broadcasting Station broadcast " as to the visual education."
8. 2 talking machines were lent from the Kagawa-Team on May 20. Circulating Film Service meeting were held by application from May 25 on (by 2 groups.) It is being canied on successfully, however, not yet thoroughly finished all over the prefecture.

ATTN: Military Government Section
Civil Information

1. Inclosed herewith is a rewrite of the Instruction Manual on projector PH-132C with a translation in Japanese. This translation was made by a team of three from the Liaison Office and was checked, and revisions made, using an actual projector so that there would be no confusion of terms.

2. In view of the large number of these projectors soon to be in use, it is suggested that the Japanese translation be reproduced as quickly as possible and distribution made.

3. If this is concurred in Shikoku Region would like one hundred (100) copies. If not, it is requested that the inclosures be returned as soon as practicable for local reproduction.

INSTRUCTIONS FOR OPERATION AND MAINTENANCE OF PROJECTOR PH-132C

1. General: This equipment is for the projection of still pictures from 3¼" x 4" lantern slides, opaque copy or solid objects, and 35 mm film strips. It is designed to operate on either 115 or 230 volts, AC or DC, with lamps of corresponding voltage.

2. Lenses: The equipment has an 18" lens for the projection of opaque copy, a 10" lens for the projection of lantern slides, and a 4" lens for the projection of film strips.

3. Spare Parts: Each projector has a spare 115 volt and 230 volt lamp. Spare motor brushes are contained in a bakelite holder with screw top which is fastened to the baseboard.

4. Removing Projector: The projector is secured to the baseboard of the carrying case by two clamps with wing nuts, held down by springs. Remove the spring, loosen the wing nut, lift the clamp and turn it so that it no longer holds the projector. If the clamp does not move up and down, take a pair of pliers and gently bend the 45 degree angle end until it moves freely.

5. Replacing Projector: Reverse the foregoing procedure but be sure that clamps are firmly holding the projector. Replace all accessories and strap them in tightly so that they will not move.

6. Lamp Position and Lamps: There are two knobs on the front of the projector. The upper one controls the position of the projection lamp. For projection of opaque material, the lamp faces to the rear of the projector. For the projection of slides and film strips, the lamp faces to the front. Changing the position of the lamp is done by turning the upper knob until the lamp is in the desired position.

The projector is supplied with lamps for 115 volts and 230 volts. Be sure that the lamp used is the same as the current supplied. To remove

the lamp press down and turn it counter clockwise. Note that the lamp has two ears, one wider than the other. The lamp holder has two slots to match. To replace, press the lamp down gently and turn clockwise until it snaps into position.

7. Mirrors: Open the large door on the right side of the projector and note the mirror assembly. The top mirror which is at an angle of 45 degrees is known as a "first surface mirror." The reflecting material is on the top surface of the glass and not on the back. Therefore it is very delicate. Do not rub it or get finger prints on it. To clean the mirror, blow the dust off and if additional cleaning is necessary, wipe it gently with a soft cloth free from lint. If it is very dirty, clean it with a soft cloth, free from lint, moistened with alcohol or ether. Never use water on it. The three secondary mirrors are rear surface mirrors and may be cleaned by wiping them with a soft cloth, free from lint, or lens cleaning paper. To clean the reflector in back of the projection lamp remove the lamp and clean in the same manner as the secondary mirrors.

8. Cooling System: The projector is equipped with a motor driven blower designed to operate on 115 volts, AC or DC. With the voltage selector switch turned to 230 volts it will also operate when this voltage is supplied. The speed of the motor is governed by a rheostat which is the lower of the two knobs on the front of the projector. This should be in the intermediate position for normal operation. The motor bearings should be oiled once a month with light machine oil. The oil hole for the right hand bearing is located in the hub of the motor housing. The other bearing is oiled through an oiling tube which is level with the top of the motor on the side away from the door. If the motor does not operate when the voltage switch is set for 230 volts, but does operate when the switch is set for 115 volts, the fixed resistor is burned out and must be replaced. If the motor races or does not run fast enough,

check the voltage selector switch to see if it is properly set for the voltage used.

9. Vertical Adjustment: Loosen the elevating leg set screws located in the two lower front corners of the projector. Grasp the front handle and lift the projector until the image is centered on the screen. Then tighten the elevating leg set screws. The elevation should not be excessive, otherwise it will be impossible to bring all parts of the image in sharp focus.

10. Projection of Opaque Material: Be sure that the lamp and parabolic reflector faces toward the rear, that the main switch is on and that the voltage selector is set for the proper current. Loose pieces of paper, larger than 7" square, pages of magazines or of books are projected by lowering the flat plate, placing the copy on it and allowing it to move slowly upward until the copy is in contact with the bottom of the projector. The bottom edge of the copy should be placed toward the screen. To project loose papers smaller than 7" square, they should be pasted to cardboard, larger than 7" square so that when the plate is raised the paper will not be blown into the projector by the cooling fan. Physical objects, such as machine parts, bolts, stones, etc., can be projected by placing them on the plate. If the object is dark it should be placed on a piece of white paper larger than 7" square. Cards or pictures from 3" x 3" to 6" x6" in size can best be projected by removing the plate and using the card carriers.

11. Projection of Film Strips: Remove the film strip attachment by releasing the holding latch and sliding it out. This attachment may be mounted in the channels either vertically or horizontally depending upon whether the long dimension is horizontal or vertical. For pictures with long dimension horizontal, mount the attachment with the closed film loop on top. For pictures having the long dimension vertical, mount the attachment with the

closed film loop on the left side facing the screen. Be sure the lamp and reflector face forward. To thread the film, open the film gate and swing it open. Insert the roll of film in the film pocket with the free end beneath the film guide strips so that one or two perforations become engaged with the sprocket teeth. Turn the film feed knob clockwise. Swing the film gate closed. Be sure that the voltage selector switch is set for the proper current, then turn the main switch to "on". If the picture is not properly framed, hold the film feed knob which is on the right side of the projector facing the screen. At the same time, loosen the clutch knob on the left side by unscrewing it a little. Turn the film feed knob until the picture is properly framed and while holding the film feed knob firmly, tighten the clutch knob.

12. Cleaning the Projection Lenses: The three projection lenses must be kept clean at all times. Take care that finger prints, grease and dust do not get on the glass. To clean the lens, remove any coarse dust with a camel hair brush or by blowing air across the surface. Do not breathe on the lens. After this, wipe the lens clean with lens tissue. Do not attempt to take the lenses apart.

13. Cleaning the Condensers and Heat Absorbing Glass: Loosen the two fasteners at the top of the condenser box plate and swing condenser box forward. Remove the condenser retaining clip by holding the retaining bar with one hand and pushing the condenser retaining spring down with the other until the bent up ends are free of the retaining ears. The clip can then be removed. Slide the condensers up out of the condenser box and clean them in the same manner as the lenses. In cleaning the condensers, it is best to remove one, clean, and replace it, before removing the other. The thicker condenser goes toward the lamp.

14. Cleaning the Film Strip Condenser: Depress the latch and lift the cover of the attachment. Slide the condenser out of its mounting channels. Clean the condenser following the same procedure for lenses. Replace the condenser with the curved surface toward the lamp.

15. Cleaning the Rear and Forward Pressure Classes of the Film Strip Attachment: Remove the holding plates and clean in the same manner as the lenses. Do not remove the glass from the pressure plate.

16. Voltage Selector Switch: Be sure that the rating of the lamp is the same as the voltage of the current source and that the voltage selector switch is set accordingly.

17. Trouble Chart:

a. General:

Trouble	Probable Cause	Remedy
Lamp does not light.	Main switch turned off. Lamp burned out.	Turn switch to ON position. Replace lamp.
Motor does not operate with voltage switch in either position.	Motor brushes worn. Rheostat burned out. Bearings need lubrication.	Replace brushes. Replace rheostat. Oil bearings.
Motor does not operate with voltage switch set for 230V, but does operate when switch is set for 115V.	Fixed resistor burned out.	Replace fixed resistor. NOTE: Use 115V in testing this trouble.
Motor races when used on 230V.	Voltage selector switch not properly set.	Set for 230V.
Motor not fast enough, used on 115V.	Voltage selector switch not properly set.	Set for 115V.
Motor and lamp do not operate.	Switch or power connector broken.	Repair or replace.

b. Film Strip Projection:

Trouble	Probable Cause	Remedy
Lamp lit but no illumination on screen.	Lamp in incorrect position.	Turn swivel knob counter-clockwise.
Poor illumination on screen.	Optical elements are dirty.	Clean optical elements.
Scratches or lines projected on screen.	Pressure glasses cracked or scratched. Film scratched.	Replace glasses. Replace film.
Parts of two pictures projected simultaneously.	Improper framing.	Frame properly.
Pictures do not advance properly.	Perforations broken. Clutch knob loose.	Replace film. Tighten cluth knob.

c. Projection of Opaque Copy and Objects:

Trouble	Probable Cause	Remedy
No illumination on screen.	Lamp in improper position.	Turn swivel knob clockwise.
Copy flutters.	Edge of copy inside copy opening.	Mount copy on cardboard 7" x 7".
Copy scorches.	Blower speed too low.	Increase blower speed.

Commanding Officer, Tokushima Military Government Team, APO 1050
Commanding Officer, Kochi Military Government Team, APO 1050
ATTN: CI Officer

1. In order to provide maximum projection facilities for educational and informational work in connection with the new School Board Law, additional "Mateo" projectors are being shipped on 8 Sept 1948 as follows:

Kagawa	- 3
Tokushima	- 3 Via RTO
Ehime	- 3 Via RTO
Kochi	- 4* Via RTO

* 1 extra to replace unserviceable equipment.

2. Inclosed are memorandum receipts, to be signed and returned immediately. Please note that each projector and speaker bears a number other than the serial number. This is the Region number and must always be included in the serial number in the future. For example projector 1154962-9 or speaker 1157965-7.

3. Assignment of Region numbers to the original allotment of projectors will be made shortly.

17 AUG 1948

SUBJECT: Distribution of 16-mm Projection Equipment

TO: Commanding Officer, Shikoku Military Government Region, APO 1050

1. Reference is made to the 16-mm projection equipment received by the Shikoku Region Equipment and Service Center from CI&E, SCAP. The procedures outlined below will apply to the shipment of the subject equipment from the regional service centers to the prefectural film libraries. Military government personnel will authorize RTO shipment and verify receipt of all equipment. Transportation to and from RTO shipping points will be provided by the Japanese agency concerned.

a. Upon completion of uncrating and operation checks by the regional service center, 16-mm equipment received from the Supply Officer, CI&E, SCAP, will be delivered to the prefectural film library, obtaining a hand receipt, sample of which is attached as Inclosure 1. Such receipts will be reproduced locally at the regional service center. Copies of the completed receipt will be retained by the prefectural film library and the prefectural military government team verifying receipt. The original will be forwarded through military government channels to the regional service center within 4 days after receipt of shipment.

b. All equipment will be stenciled "Property of the U.S. Army" in letters 1" high prior to shipment to the prefectural film library. The stenciling will be done on the top of the machine cases, parallel to the carrying handle. The top of the amplifier will be stenciled in a like manner.

c. To facilitate the maintenance of proper records, the equipment will be stenciled with the name of the region and numbered consecutively from 1 up. The projector and amplifier will carry duplicate numbers, and will be maintained and accounted for as a complete unit.

d. A master list of the serial numbers of all equipment in the region, with accompanying regional numbers, will be kept on file at the regional service center. Copies will be forwarded to the regional military government team and to the Educational Film Unit, CI&E, SCAP.

BASIC: Ltr, Hqs. Eighth Army, AGMGCI 413.53, subject: Distribution of 16-mm Projection Equipment

2. Recommended allocations of machines and screens to the prefectures in the Shikoku Region is as follows:

	16-mm Machine Allocation	Screen 50" x 67"
Tokushima	14	12
Kagawa	14	12
Ehime	18	18
Kochi	16	16
Region Reserve	2	0
TOTAL	64	58

Limited revision of these allocations by the regional service center, with the approval of the regional military government team, is authorized. Retention of a reserve will provide a source for replacement machines during repair operations.

3. No distribution of 120" x 120" screens will be made until notification is received from this headquarters.

4. All projectors will be stored in the prefectural film libraries until notification is received from this headquarters authorizing their release to using agencies. In the interim, military government teams will ascertain that the equipment is being utilized to further the instruction of projectionists, and that such projectionists are properly licensed. The prefectural Visual Aid Officer, as designated by the prefectural Social Education Section, will assume the responsibility for training and licensing all projectionists.

5. It is intended that prefectural film libraries will be located on the premises of the present prefectural libraries. Kencho facilities may be used as a temporary expedient in the event that the prefectural library is inadequate. However, relocation of the film library in the prefectural library will be accomplished at the earliest possible date. Requests for exception to this policy will be forwarded to this headquarters with full justification.

6. This headquarters will be notified through channels when the shipment of 16-mm projection equipment to the prefectural film libraries has been completed.

1. Inclosed herewith is a rewrite of the Instruction Manual on projector PH-1320 with a translation in Japanese. This translation was made by a team of three from the Liaison Office and was checked, and revisions made, using an actual projector so that there would be no confusion of terms.

2. In view of the large number of these projectors soon to be in use, it is suggested that the Japanese translation be reproduced as quickly as possible and distribution made.

3. If this is concurred in Shikoku Region would like one hundred (100) copies. If not, it is requested that the inclosures be returned as soon as practicable for local reproduction.

SUBJECT: Motion Pictures for the Reorientation of the Japanese

TO : Commanding Officer, Kagawa Mil Govt Team, APO 1050
Commanding Officer, Ehime Mil Govt Team, APO 1050
Commanding Officer, Kochi Mil Govt Team, APO 1050
Commanding Officer, Tokushima Mil Govt Team, APO 1050

1. From information received in this headquarters, it is apparent that closer surveillance must be exercised by Civil Information Officers over the showing of CI&E Educational Films by the Social Education Sections of the various ken governments.

2. There is a pronounced tendency on the part of these agencies to show a heterogeneous collection of titles to an equally heterogeneous audience. Such a practice not only defeats the purpose of the entire program but places an undue strain on the projection equipment. One specific report covered the showing of five (5) films in a show running from 1930 to 2315; nearly four hours. Three projectors have thus far been rendered unserviceable due to bent shafts and the cause has been traced to excessive heat resulting from unduly long and continuous periods of operation.

3. It is quite apparent that the idea of visual education has not yet penetrated the Japanese mind. At the risk at reducing the showing of films it must be explained to them carefully, at length, and repeatedly, that a Film Library must be operated like a book library. Even the most modern library would not operate a mobile unit and distribute books arbitrarily without reference to sex, age, education, interests, etc. Nor would a librarian in the main library stand at the door and offer a book selected at random to each patron.

4. It is felt that this program should take its first footsteps more slowly by having the Ken Social Education Section, by letter or press release advise agencies and organizations and the general public of films on hand, and periodically, of newly received films. This advice should mention the fact that both films and projection equipment are available upon request. The responsible personnel in the Social Education or Visual Education Section should preview all new films immediately upon receipt and thus be in a position to advise and assist the requesting agency or organization in its selection. It is recommended that

CI

Ltr, Shikoku Mil Govt Reg, APO 1050, dtd 28 June 48, Subj: Motion Pictures for the Reorientation of the Japanese

not more than two (2) or three (3) films at the most be shown at one time. The part motion pictures, film strips, etc., play in Visual Education is incidental. They should be used to lend emphasis to and point up the spoken word and not constitute an entire program in themselves.

TO: Commanding Officer, Shikoku Military Government Region, APO 1050

Twenty projection lamps, T12, have been shipped on 11 June via Railway Express. No exciter lamps or threading lamps are available at present, and no supply is anticipated until August. This shipment of projection lamps exhausts present replacement stocks. It is expected that replacements will be available on or about 10 July.

SUBJECT: Distribution of Projectors and Screens

TO : Commanding Officer, Ehime Mil Govt Team, APO 1050
Commanding Officer, Kochi Mil Govt Team, APO 1050
Commanding Officer, Tokushima Mil Govt Team, APO 1050
ATTN: Civil Information Officer

1. Reference is OD 37, 26 May 1948.

2. There are being shipped to your command, via RTO, three (3) Baloptican Projectors, PH-132C, which are to be used in the same manner as the 16 mm NATCO Motion Picture Projectors. Included in the shipment are six (6) Projection Screens.

3. This equipment has been inspected and repacked at this headquarters, with the exception of cleaning lenses, condensers and mirrors, which should be done immediately upon receipt. Do not clean these before reading instruction manual, particularly paragraph 36.

4. This is an extremely versatile piece of equipment and can be used for the projection of film strips, opaque material and lantern slides. Due to the almost prohibitive cost of the latter it is not anticipated that this attachment will receive very much use.

5. The fiber cases in which these projectors are contained will not stand much rough handling and it is extremely necessary to impress this upon the minds of all who will handle them.

6. Instruction manuals covering every aspect of operation and maintenance are included with each projector, but until the substance of this instruction book can be translated into Japanese, it is suggested that a Japanese speaking member of the Civil Information Section familiarize himself with the manual and go over it with the staff projectionists who can in turn impart the instructions to others.

7. The inclosed Property Issue Slip will be executed and returned to this headquarters.

a. Use stronger angle iron for retaining base.
b. Devise better method of securing lenses, carrier trays and lamps.
c. Use washer of greater diameter with rivets on holding straps.
d. Devise better clamps on side for holding projector to saddle or baseboard.
e. Place handles on top in addition to sides so that projector may be placed in carrying box or carton without turning it upside down.
f. Pack condenser lenses separately.
g. Devise stronger latch for securing film strip attachment.

5. According to CI&E Bulletin No. 24, dated 9 June 1948, this command will receive in the immediate future thirty-nine (39) additional projectors, PH-1320. It is to be hoped that these projectors will have been thoroughly inspected and placed in proper condition before shipment is made. If they are shipped in cardboard cartons, it is suggested that they be plainly marked in both English and Japanese "Handle with Care," and "This Side Up."

SUBJECT: Report of Unsatisfactory Equipment

TO : Commanding General
Eighth Army
APO 343
ATTN: Military Government Section (CI)

1. On 12 June 1948 this command received thirteen (13) projectors, PH-132C Signal Corps stock number 8A3122-132C.1. Each projector was in a cardboard carton with no indication as to which was the top, nor was there any marking indicating fragility and the necessity for careful handling.

2. Thirty-six (36) man hours were expended in unpacking these projectors and placing them in condition for further shipping and service but only nine of them are operable. An officer now assigned to this command saw these projectors early in April at Eighth Army headquarters and commented on the condition of them at the time. It is apparent that no attempt was made to correct their condition judging from the condition they were in on arrival at this headquarters. Photographs are inclosed. A summary of damage follows:

Strap rivets broken	F/S condensers broken	F/S cone bent	Baseboard Holding brackets bent	Lamps broken
10	4	1	13	3
18" lens not secured by strap	4" and 10" lens not secured by strap	F/S attachment adrift	Side holding clamps loose	Projector loose from base
12	13	6	6	6

3. The four projectors with broken film strip condensers are inoperable and are being returned for replacement accompanied by a property turn-in slip. The remainder have been cleaned up, damage repaired, and placed in operable condition. The carboard cartons will not be used for further shipping due to the fact that in order to place the projector in the carton it is necessary to turn it upside down which is not considered safe in general practice.

4. It is suggested that an Unsatisfactory Equipment Report, Form WD AGO 468, be made out on this equipment and forwarded to the Office of the Chief Signal Officer, reporting the deficiencies contained in paragraph 2. Recommendations for improvement in packing are:

HEADQUARTERS

SUBJECT: Equipment for Use by Military Government Units in Connection with Civil Information Activities

TO : Commanding Officer, Kagawa MG Team, APO 1050
Commanding Officer, Ehime MG Team, APO 1050
Commanding Officer, Kochi MG Team, APO 1050
Commanding Officer, Tokushima MG Team, APO 1050

1. Inclosed herewith is a copy of Operational Directive #37, dated 26 May 1948 which rescinds CD #67, dated 15 October 1947. This should be the subject of close study by the Team Civil Information Officer who should in turn inform other staff sections of the additional facilities which will shortly be available.

2. Exception is taken to the nomenclature used in par 2 for Projection Equipment, FH-132C (Combination Film Strip-Stereoptican Projector). This does not have stereoptic qualities but is designed for the showing of 35mm film strips, 3¼" x 4" glass slides, and opaque material. This is an extremely versatile piece of equipment as the use of the opaque accessory makes it possible to project almost any material with the size limitation of the holder. It will be referred to in the future as a "BALOPTICAN".

3. Particular attention is invited to par 9 of inclosure. It has been necessary recently to return one 16mm NATCO projector for fourth echelon repair due to a bent shaft which could only have occurred through lack of bracing and/or blocking during transportation. Even more care will have to be exercised in providing packing for the transportation of the BALOPTICANS. The original packing in which these were received at Eighth Army Headquarters is considered insufficient. Items needing particular attention are the condensers, lenses and spare lamps.

BY ORDER OF COLONEL COUGHLIN:

1 Incl:
CD 37, 26 May 48

JOHN E. MIKKELSEN
1st Lt Infantry
Adjutant

Subj: Motion Picture Proj Equip for use by MG Units, 10 May 48 (cont'd)

The virtue of such a form lies in the fact that each showing and attendance figure is added to the previous total and the last figures form the grand total with no further addition required.

7. Par 6 (2) and (3) covers the subject of operators. Whether the two operators for each team will be absorbed in the present Manning Table or will be allowed above it is an academic question which has been propounded to Headquarters, 8th Army. Team commanders are authorized to hire the operators when needed and advice on the Manning Table situation will be relayed when received.

8. Too much emphasis cannot be placed on par 9 of OD 67.

9. It is suggested that isolated communities be not overlooked in the implementation of this program and that the Civil Information Officer, with the aid of other staff officers, assist the Japanese in their choice of films with a view to securing a catholic selection of titles.

10. It is desired that the program be gotten underway without delay.

RLO/eh

Takamatsu, Shikoku
10 May 1948

AG 000.7

SUBJECT: Motion Picture Projection Equipment
for use by Military Government Units

TO : See Distribution

1. References: a. CD 57, Hq 8th Army, 16 Aug 47
b. CD 67, Hq 8th Army, 15 Oct 47.

2. Pending establishment and operation of prefectural film libraries and the regional film and equipment service center, it is desired that maximum use of the three projectors allotted to each team be made.

3. Following a conference at Kotohira of representatives from all Shikoku prefectures on 30 April - 1 May, and a further conference at Takamatsu on 5 May, it is believed that a Visual Education sub-section has been established in the Social Education Section of each ken. Upon this sub-section should fall the responsibility for the use of 16 mm motion pictures in the field of visual education. The names of those attending the Kotohira conference have been furnished to each team and attached hereto is a list of those attending the Takamatsu conference.

4. Under date of 26 March 1947 each team was furnished with a list of films available from a Japanese source which may be rented or purchased. This list was titled "Film Distributed or For Sale by Japan Visual Education Association" and the address is "c/o Nishi Sakura Primary School, 18 Sakuragawa, Nishiiabo, Minato-ku, Tokyo." It is also understood that films of an educational nature can be secured through the Ministry of Education.

5. The prefectural education sections should be actively encouraged to procure immediately as many titles of a timely nature as their budgets will permit. It is understood that Ehime-ken already has a library of 28 titles and Kochi-ken one of 30. Close liaison should be maintained particularly to insure that plans are made in advance for the maximum utilization of both films and equipment on a prefecture-wide basis.

6. The Visual Education sub-section should be required to furnish the team Civil Information Officer in time for his monthly report with a report of showings and attendance during the month. It is suggested that for the sake of uniformity a form similar to the one illustrated here, using one sheet or card for each print be used, with cumulative figures:

Title: THE NEW DIET 16 mm sound - 2 reels - 18 min.

KAGAWA MILITARY GOVERNMENT TEAM
APO 1050

Takamatsu, Shikoku
13 May, 1948

TO : Capt Oertle, Inf Section,
Shikoku Mil Gov't Region APO 1050

1. I reviewed 4 films on Wed. 12 May and found the films all very educational and appropriate.

2. A brief synopsis of each film follows.

a. "Tuesday in November"-- This film explains to the people how our American Constitution was made up, and how our government operates.

b. "North West U.S.A."-- This showed our resources and how we used them. This film also explained agriculture and farming.

c. "Steel Town"-- This film showed our steel industry and the methods of production.

d. "Trees to prevent Wind"-- This explained to the people that strong winds destroy large amounts of crops. It also showed how the farmer of Western U.S.A. used trees to prevent wind from destroying crops.

e. "Power and Land"-- This film shows how U.S.A. produced electricity and used this power to farm land which otherwise would have taken many years to cultivate.

f. "Freedom to Learn"-- This showed how our schools etc: operated, giving the people freedom to learn.
