

The Will and Codicil

OF PETER PETERSON, CITIZEN AND GOLDSMITH
OF NORWICH, 1603.

(*Norwich Archdeaconry*, 1603, folio 190).

COMMUNICATED BY

THE REV. C. R. MANNING, M.A., F.S.A.,

HON. SEC.

THE following Will of an eminent Norwich Goldsmith in the reign of Queen Elizabeth, contains so many interesting bequests of plate, that it is thought to be a suitable one to be printed in extenso in our volumes; and for that purpose it has been carefully transcribed from the original by Mr. Tallack. Peter Peterson, the testator, was born in the parish of St. Andrew, Norwich, about the year 1518. It has been thought likely that his family was of Dutch origin, as the name is a more common one on the Continent than in England, and one of his legacies is "to the poorest sort of the Dutch nation" in the city. Another Peter Peterson, perhaps his grandfather, a hardwareman of Norwich, died in

1497,¹ and he may have been a settler from the Low Countries, as I have not met with the name earlier. Peter Peterson was apprenticed to John Basyngham, goldsmith, and took up his freedom in 1554. In 1574 he was Chamberlain of the City; and in the same year, on being excused the office of Sheriff, he presented the Corporation with a silver-gilt tazza cup, still remaining in their fine collection of plate. This piece has been frequently exhibited, and was figured in Ewing's *Norwich Pageantries*. A small photograph of it appears as No. 20, in the group of the Corporation Plate, in the *Insignia and Plate* of the city, lately published,² where it is described from the catalogue of *Works of Art*, exhibited at South Kensington in 1862:—

“A silver-gilt tazza cup on short baluster stem; the stem and base ornamented with gadroons and other repoussé work, and with stamped and chased borders; round the edge is engraved in cusped letters—

“THE + MOST + HERE + OF + IS + DVNE +
BY + PETER + PETERSON.

“In the bottom of the bowl are engraved, within a circle, the arms of the City of Norwich. Two plate marks have existed on the edge of the bowl; one of these seems to bear the city arms, and the other a cross mound.

“The early inventory calls its weight xvi. oz., and describes it as ‘a boll all gylte of the gyfte of Peter Peterson, Chamblyne of y^e Cittie.’”

¹ He was buried at the Black Friars, beside Alice his wife (*Blomefield*, iv. 338). There was also a Cornelius Peterson, who had a daughter baptized at St. Andrew's in 1558.

² *Norfolk Chronicle* Office, Norwich, 1890.

The following entry from the *Assembly Book* of 21st September, 1574, explains its history:—

“This daye, by the hole concent of this howse, at the humble suit, request and desyer of Peter Peterson, of the same cittie, goldsmith, the same Peter Peterson is dispensyd with and discharged from beryng the office of Shrevaltie, and all other offices within the cittie, only the office of Chambylne excepted, for the which dispensation the same Peter Peterson have agreed to geve one standing cupp gylte of the weight of xv. oz., and xliⁱⁱ in money, to be payed in forme following, viz., £20 between this and the purification of o^r Lady next; £10 at Michaelmas next after that; and the other £10 that tyme twelvemonths.”

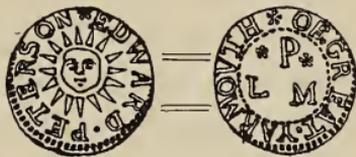

The two “Blenerhasset” cups belonged to the Corporation, numbered 21 and 22 in the photograph already mentioned, are of very similar design and ornament; and as they appear in the Elizabethan inventory, are, no doubt, of much the same date. It was in consequence of the orb and cross in a lozenge, or cross mound, appearing as the maker’s mark on the Peterson cup, that Mr. Wilfrid Cripps³ attributed that mark to him. It was natural to suppose that the piece he presented would be his own workmen’s manufacture, and the inscription round it expressly states that he made most of it himself. The very numerous pieces of church plate throughout the county bearing the same mark have, consequently, all been believed to be his work; for it was in the midst of his career that the change took place, 1565—1570, by which the bell-shaped cup and footed paten took the place, in the Diocese of Norwich, of the older form of pre-Reformation vessels. But in his Will, now printed, made twenty-nine years after his gift of the cup, there is no reference whatever

to the cross mound. In his numerous bequests of plate he is explicit in describing the articles as marked with "the sonne." Spoons with "knoppes of the sonne" occur frequently. It is not clear whether this was an impressed mark, or whether the handles of the spoons were fashioned at the seal end, like a sun. But, in some cases, he mentions not only the knop of the spoon, but the same article also graven and gilt on the back with the sun. There is also a garnish of pewter marked with the sun; and leaden tokens marked with the sun for his gifts of coal to the poor; and what is still more to the purpose, he gives to his very good friend and neighbour, George Birch, a silver pot, with a cover all gilt, called Hauncepott, graven upon the cover with the sun, the lion and the castle of Norwich touch, "of my own making." He seems even to have placed this mark on a piece of London manufacture, for he leaves to the Mayor and Citizens a silver cup, with a cover pownst, and all double gilt, to be used only as the city plate is, of London touch, which cover has the sun mentioned in the top thereof, with the goldsmith's arms and certain posies enamelled upon it. But the best piece of evidence that the sun was his mark in 1567, as well as in 1603, is that the cup at St. Margaret's, Norwich, is marked with the *sun*, *i.e.*, a human full face surrounded by rays; and in the churchwardens' accounts of that parish is an entry in 1567, of the payment to Peter Peterson, the goldsmith, for making the "comūnyon cuppe," at sixpence for every ounce worken."⁴ In my list of the Norwich Church Plate, I have called this mark "a head affrontée"; but it is clear, on re-examining the cup, that it is the conventional representation of a sun. It is interesting to

⁴ *Norfolk Archaeology*, x. 392.

notice that among the seventeenth century copper tokens of Yarmouth, is one issued by Edward Peterson, vintner, perhaps a great nephew, whose device on the obverse is "a blazing sun," on which Mr. E. A. Tillett notes he was admitted a freeman of Norwich, 14th August, 1634.⁵ Mr. E. Skinner, of Norwich, has a specimen in his collection which he has kindly allowed to be used for the illustration here given.

The same mark of the sun is not found on any other Norwich piece, but it occurs, or a mark very similar, on the plate at Banningham, Briston, Brampton, New Buckenham, Cawston, Fincham, Hindolveston, Houghton-on-the-Hill, Methwold, Stratton Strawless, and Tittleshall. The orb and cross may have been Cobbold's mark. Of this there are three varieties, one in a lozenge, generally found on plate of 1565—1570; another in a plain shield, as at Haddiscoe St. Mary, "made by John Stone and Robart Stone," whose names are not in the list of Norwich goldsmiths⁶; and a third, probably somewhat later, in a shaped shield, with the orb a good deal larger in proportion than in the other case. Of this there are instances on the cups lately belonging to the Dutch Church, and on a cup at Deopham. A complete list of English goldsmiths, including Norwich, has been printed by

⁵ *Eastern Counties Collectanea*, p. 291; and *Boyne's Tokens*. It was very likely a rebus, in Elizabethan fashion, for *Peter's sun*.

Mr. R. C. Hope, in the *Reliquary*.⁷ The trade must have been a flourishing one in Norwich at this time; and Peter became a man of substance, having lands to bequeath at Barnham Broom, Barford, and Bickerston, besides his mansion and other property in several parishes in Norwich, and his personal possessions. But it is probable that he was not born to much affluence, and rose by his own industry. He expresses his obligation to his "son-in-law," or stepson, Robert Witchingham, whom he makes his sole executor, the son of his first wife Millicent, "the maker and upholder of me in the tyme of my beginning; for the goodwill and gentle behaviour that he hath, doeth, and ever did shew unto me from his childhood hitherto." A perusal of his Will leaves the impression of a religious, kindly-affectioned man, desirous to provide permanent gifts to the poor of his native city, disposing his property to his nearest relatives, and his stock-in-trade to his nephew, Peter Peterson, junior⁸; and anxious to be kept in memory by all his friends, among whom he distributes more than forty spoons, and a number of rings with mottoes of "Peterson's Gift," or "Remember Peterson." It is to be regretted that his portrait, which he mentions, is not now known to be preserved.

In connection with the goldsmiths of Norwich, and the cycle of date letters employed by them, opportunity may be taken to notice here that the years hitherto adopted, according to Mr. Cripps' tables, must be shifted forward at least a year. Until the year 1565 the Goldsmiths' Company at Norwich did not officially mark

⁷ New Series, iii. 245; iv. 24.

⁸ This Peter Peterson, Jun., was stated by me (*Norfolk Archaeology*, x. 112), and in the *Goldsmiths List* by Mr. R. C. Hope, to have died in 1609. But the burial at St. Andrew's is more probably that of his child Peter, two years old; as he had other children born later.

their plate, in spite of the Act of 1423, requiring all assay offices to do so. Hitherto, the first cycle has been believed to begin in 1564, and plate with the letter A has been taken to belong to that year. But on October 2nd, 1565, an assembly of the Common Council was held at Norwich, Thomas Sotherton being mayor, when the Goldsmiths Company presented a complaint and statements to the Council; and the ordinances resulting, which have been printed by Mr. R. C. Hope, F.S.A., in the *Reliquary* for October, 1890,⁹ assert that "no comon stamppe or marke have thereto been used and occupied wthin the said cittie, whereby the said works of sylver made and wrought wthin the said cittie, might be stamped and signed as well for the demonstracon of suche trew and perfecte fynesse as ought to be in the same works of sylver, as for a declaracon wheare the same works were made and wrought, and by whom." They, therefore, pray that certain lengthy regulations, which they set out, with penalties attached, may be ordained and decreed; and among them that "from and after the feaste of St. Michaell tharchangell next coming, after the date of this assembly, every artificer. . . . shall, trewly and faithfully worke according to trewthe and honestie," and that "the standerde towching the fynes of sylver, whereby the said artificers at all tymes hereafter shall worke all ther works of sylver within the said Cittie and suburbes of the same, shalbe accepted, reputed, and taken to be of souche and the same fynes and goodnes and better as the standerde of the lyberds hedde with the crowne,¹ ys, and hathe ben alwayes hetherto adjudged, And not under the same in enywyse, and that a comon stampe or towche of the Armes or Ensigne of the said cittie, beyng the castell and the

Lyon, shall be provided to remayne in the custody and keepyng of the wardens of the said art for the time being, under two severall kyes," &c. It is, therefore, clear that the first year of Norwich hall-marking was not 1564. But was it 1565, or 1566? Mr. R. C. Hope thinks the cycle began at Michaelmas, 1566, as the ordinance distinctly says, "from and after the feast of St. Michael next coming after the date of this assembly."² But this is contradicted by the dates on some of the existing plate. The cup at St. James's is dated 1567, and has c for the date letter. If the cycle began in 1566, c would represent 1568-9, while if it began (as I think) at Michaelmas 1565, the date and letter would agree for 1567-8. As the Assembly was held three days after St. Michael's Day, October 2nd, it does not seem likely that a whole year would be allowed to pass before the ordinance came into force. I venture to hazard the explanation that the form was written out for an expected Assembly before Michaelmas, 1565, perhaps for the regular day on September 21st, and that the Meeting was postponed for some reason to October 2nd, and the wording remained unaltered. If this be correct the Norwich date-letters will stand as follows:—

A	Michaelmas	1565	to	Michaelmas	1566.
B	"	1566	"	"	1567.
C	"	1567	"	"	1568.
D	"	1568	"	"	1569.
E	"	1569	"	"	1570.

One of the testator's bequests is to the Corporation, of a "silver cupp with a cover pownst, all double gilt,

² The fourth edition of Mr. Cripps' work has appeared while these pages are passing through the press, and in it he has adopted Mr. Hope's view, and moved the Norwich cycle on two years.

of London tuch, waieng thirty ownces or therabouts, w^{ch} cover hath the sonne mentioned in the topp therof, wth the gouldsmythes arms graven upon it, and with certain verses or posies graven and enamyled upon it." Nothing further is known of this piece, and it is not now among the civic plate. Mr. Tallack informs me that he has examined the Assembly Book, 1603-4, and the Court of Mayoralty Book for the same years, and there is no mention of any plate being received by the city. There is no record of the brass he orders having been put down to him at St. Andrew's, nor of the chest being provided at St. Peter Mancroft. Mr. Tallack thinks that something must have happened to prevent the will being carried out in its entirety. As regards the bequest of houses in the parish of St. Peter. Permounergate, for providing doles of coals to the poor, there is a direction in the Assembly Book of 1603-4 to certain aldermen to view the grounds. Blomefield says³ that in 1667 the premises were let at £11 per annum by the city, and the chamberlain paid £9. 15s. of it for coals, and the parson twenty shillings. The rent is still received by the churchwardens. Robert Witchingham, the sole executor, died within nine days of proving the will, and Margaret, his relict, took out letters of attorney, 12th August, 1603, constituting Robert Smyth, notary public, her proctor.

Peter Peterson was twice married: first, to Millicent, widow of Witchingham, Gent., and mother of Robert Witchingham, the executor; and secondly, to Dorotheie, widow of Stephen Empson of North Walsham, and sister of John Guggle, Gent., of Gimingham,⁴ who survived him. He appears to have had no children, or none were living at his death. The relationships disclosed

by the will may be more clearly set out by a tabular form; to which may be added:—Thomas Peterson, brother-in-law, who probably married a sister of Peter's second wife, Dorothy (Guggle); John Guggle, Gent., of Gimingham, brother-in-law; Margaret Lynsey, niece. For several of the names in the pedigree I am indebted to the kindness of the Rev. Canon Copeman, Vicar of St. Andrew's, who has extracted them from the Register; as also:—

Baptised.—1558. Maria, daughter of Cornelius Peterson, 26th August.

Buried.—1558. Cornelius Petersonne, 9th August.

Married.—1559. R. Richardson and A. Peterson.

There are also in *North Walsham Register*:—

Married.—1557-8. Stephen Empson and Dorothe Gogul, ye xii of februer.

Buried.—1574-5. Stephen Empson, 20 January.

Married.—1601. John Peterson and Audry Adams, widow, 1st Aug.

The worthy goldsmith, having attained the age of "fowerskore and five years or therabouts," made his will, May 15th, 1603. He desired to be buried in St. Andrew's church, in the chapel "whear I doe usually sitt"; and that a gravestone should be placed "right against the seate where I doe usually sitt," on which he would have engraved in brass the following verses, which no doubt he felt to be a proper lesson to the reader, although to us something less hackneyed and more grammatical would have been welcome:—

"I, Peter Peterson, Gentleman, Gouldsmyth, dead and gone,
Here lieth, buryed under this stone.
As you be nowe soe sometymes was he,
And as he is nowe soe shall you be.
Inclosed in earth his bones doe rest,
His soule wth Christ in Heaven is blest."

I have already mentioned that nothing is known of this brass now. The above directions confirm the view that appropriated seats in churches were allowed in Elizabethan times. He died two months after making his will, and was buried as he directed, 11th July, 1603.

The following list classifies the various articles of plate and jewellery to be found in the will; omitting the furniture, clothes, &c.:—
