HARDY PERENNIALS
ROCK GARDEN PLANTS
MIDWESTERN WILD FLOWERS

W. A. TOOLE

of

Garry-nee-Dule

BARABOO, WISCONSIN

To Our Flower Loving Friends

We were much pleased during 1934 to see how interested many people were in our three exhibits at A Century of Progress. If you were one of our friends who visited the Horticulture Building, we hope you enjoyed all the many interesting gardens displayed there.

New varieties are being tried out constantly at Garrynee-Dule, discarding some kinds and adding others to our list. This experimenting is intensely interesting, but expensive.

You will again find Tooles' plants offered in two types, small but vigorous potted plants and field grown stock. The potted plants are specially recommended for rock garden planting where they quickly establish themselves and readily become adjusted to the irregular rock or wall garden surfaces.

GUARANTEE

These plants are guaranteed to reach you in good growing condition. Complaints as to quality of plants received must be sent us within ten days of receipt of plants. We do not guarantee growth or hardiness of these plants other than above. Should any plants prove untrue to name, we are always ready to make replacements when notified.

VISITORS

Visitors are always welcome at Garry-nee-Dule where you will find many new and interesting plants in the Rock Garden, Perennial Gardens, and Nature Trail.

TERMS

Cash with order, which includes packing and delivery charges. Minimum order \$1.00.

PRICES

12 of one variety at the price of 10; 3 or more of a kind at dozen rates; write for quotations on large quantities.

W. A. Toole, of Garry-nee-Dule, Baraboo, Wis.

17. 11. 1001c, of daily necedule, Baraboo, 1113.

midsummer. 2 feet	.15	
MYOSOTIS (Forget-me-not)		
Palustris—Much used for waterside planting.		
Clear blue flowers, yellow eye. Prostrate		s.

BABY PHLOX

Our first trials of small potted plants were what we called "Baby Phlox" to distinguish them from field grown stock. These are vigorous young plants, grown from cuttings in the greenhouse during the winter. If given ordinary care and treatment these little plants will make a single large flower head on a short stem the first season, with several stalks of normal height the second year.

We can supply the following varieties this year at the uniform price of 15c each; \$1.50 per dozen; \$12.00 per 100, delivered, with varieties assorted as you wish.

Apollo—A new tall white.

Asa Gray-Rose pink, suffused crimson center.

Bridesmaid—24-30 inches; white with crimson eye.

Caliph—A very large flowered lavender.

Eclaireur—3 feet dark rosy lilac; strong grower.

Elizabeth Campbell—2 feet clear salmon. Enchantress—3 feet. Bright salmon pink with darker eyc.

Ethel Pritchard—A beautiful light blue on cloudy days or under morning light. Under mid-day sun a delicate mauve. Large flowers.

Europa—White with crimson eye.

Firebrand—Large bright red.

Flora Riedy—A very good white of medium height.

Jules Sandeau—Light salmon pink.

Milly Von Hoboken—24-30 inches; large soft pink flowers.

Mia Ruys—A very large flowered dwarf growing white.

Miss Lingard—24-30 inches. Shining green foliage, waxy white flowers in June.

Morgenrood—New. Deep rose red.

Mrs. Jenkins—A very good standard white with delicate creamy tint. 2 feet.

Rheinlander-A clear salmon pink with eye.

Rising Sun—A very good new salmon pink phlox of the type of Elizabeth Campbell but a stronger grower.

Riverton Jewel—Mauve pink with eye.

Rokoko—New. Large clear soft pink.

R. P. Struthers—One of the sturdiest and best varieties of Phlox. 3 feet, rose carmine with red eye.

Rynstrom—Clear rose pink.

Siebold—2 feet, deep salmon pink.

Thor-A large flowered deep salmon that is much admired.

Von Hochberg—3 feet. A fine bright crimson.

Von Lassburg—Large trusses of white flowers. Wm. Tell—A tall bright pink with cerise eye. Of the vigorous R. P. Struthers type.

SPECIAL OFFER: BABY PHLOX

14 plants for \$1.50, prepaid. 2 each of Baby Phlox Siebold, R. P. Struthers, Miss Lingard, Rising Sun, Bridesmaid, Flora Riedy, Von Hochberg, 14 plants in all, delivered.

all summer	.20	
POTENTILLA (Cinquefoil)		
Cinerea—A dainty Alpine. Pale yellow flowers		
on 4 inch tufts of foliage	.25	
PRIMULA (Primrose)		
Auricula—Fine heads of varicolored flowers on		
4 inch stems	.25	
Cashmiriana—Large ball shaped flower heads on		
stems 8 inches high. Flowers red, blue and		
lavender. May	35	
Cortusoides—8-10 inches, bright rose; June		
Mistassinica—Light green leaves from which		
spring 3-4 inch stems of delicate mauve flowers		
Polyanthus—English Primrose. Many attratcive		
colors	.25	
PULMONARIA LUNGWORT		
Officianalis—Dark green leaves spotted white.		
Light blue flowers which are pink in the bud		
stage. 8-10 inches. May	.25	
PYRETHRUM		
Corymbosum—Several medium sized white flow-	-	
ers on an 18 inch stem in early summer		.25
Roseum—Persian Daisy. Single and semi-double		
daisies varying from white through shades of		
pink and rose to deep crimson. 12-18 inch. June		.25
Roseum Buckeye—A double flowered deep rose		
or red variety of great beauty		
Roseum Miami Queen—A bright pink double long		
blooming variety		
Roseum N. R. A.—A new double red		
Roseum Trojan—Double dark pink		
*Tchihatchewii—Turfing Daisy. A mat forming		
perennial useful as a ground cover on sunny		
poor soils. Small white daisy like flowers	.15	
ROSMARINUS		
Officinalis—The old fashioned fragrant Rose-		
mary. A tender perennial		
RUTA (Rue)		
Graveolens—An old fashioned medicinal herb		
with attractive foliage and yellow flowers.		
10-12 inches		
	15	
SAGINA (Pearlwort)		
*Glabra—Bright green mossy growth for paved		25

	Pot.	F'ld
	*Kamtschaticum—10 inches; bright yellow; July .15	.20
	*Kamtschaticum Variegata—6-8 inches; varie-	
	*Lineare Variegata—Narrow flat leaves edged	
	with white. Lacks hardiness here	
	*Lydium—Bright green mossy mounds of foliage .15	.20
	*Magellense—Light green mossy foliage; not so	.20
	dense as Lydium	
	*Middendorfianum—Bright yellow; one of the	
	best of the medium upright group	.25
	*Middendorfianum Hybridum—Somewhat finer	
	growth than the above. Foliage colors crimson	
	in fall	
	*Nevi—Pale green rosettes 1-2 inches high15	
	*Oppositifolium—3-4 inches; white; July-August;	
	*Oregonum—3-4 inches; vivid green spatulate	
	leaves	
	*Pulchellum—6-8 inches; lilac rose; July. Bi- ennial in nature	25
	*Reflexum—5-6 inches; yellow; June. Sedums of	.25
	reflexum, rupestre and anopetalum group all	
	resemble varying types of little spruce branches .15	
	*Feflexum Cristatum—A striking crested form of	
	reflexum	.25
	*Reflexum Minor—Compact type with blue-green	
	foliage	
	*Rupestre—Blue green foliage, formerly sold	
	as pruniatum fosterianum	
	*Sarmentosum—Free growing; creeping; light	
	green foliage; yellow flowers. Does well in	20
	*Sexangulare—Much like acre but finer and turns	.20
		.20
	*Sibericum—Leaves are tiny pear shaped heads	.20
	of green	
	*Sieboldi—5-6 inches; rose; September. A very	
		.25
	"Silver"—Probably a form of Hispanicum with	
	especially attractive silvery foliage	20
	1	.20
	*Spectabile Brilliant—12-15 inches; deep rose;	
	Sept	
	white. Also sold as Alba-roseum variegatum15	
	*Spurium—5-6 inches; pink; July. A sturdy grow-	
	ing variety	.20
	*Spurium Coccineum—5-6 inches; crimson; July .15	.20
	*Stoloniferum—Like a delicate growing spurium,	
	yellow flowers	
	*Stribryni—A low-growing variety in dway be-	
	tween acre, and reflexum in style of growth15	25
	*Telephium—15-18 inches; rose purple; July	.25
	*Ternatum—3-4 inches; white; May	.25
	*Yosemetensis—3-4 inches; bright yellow flowers .25 One each 25 choice sediums \$3.50. One each 50	
	different sedums, \$6.75.	
5	SEMPERVIVUMS (Hen and Chickens)	
1	*Arachnoideum—Green leaves connected by cob-	
	web-like hairs. Red	.20
	*Arenarium—A tiny variety with pointed leaves .15	
	*Brauni—Green rosettes tipped brown, medium	
	size	
	Price: 12 of one kind at price of 10; 3 or more at doz. rates.	

Pot.	F'ld
*Globiferum—Round green globes tinting red in	
fall	
*Calcareum—Evidently not true but a fine	
variety; velvety green flat rosettes 5 or 6 inches across; light greenish-yellow flowers	
*Fimbriatum—A medium sized variety with sharp	
pointed leaves and many fine hairs	
*Glaucum—Leaves glaucous with brownish spot	
at tip. Red flowers	
*Doellianum—A less hairy form of Arachnoi-	
deum	
*Heuffel:—Green with leaf tips tinted brown.	
Increases by splitting of crown instead of "Chickens"	
"Chickens"	
variety with reddish marking	
*Pittoni—Rosettes 1½ inches across. Leaves	
blotched and tipped light red. Flowers yellow-	
ish white	
*Rubicundum—-Large velvety rosettes lightly	
tinted purple	2.0
*Tectorum—A large form of this old favorite15	.20
*Toole's Seedlings—A variety of sizes, forms and	
colors, tinting beautifully in fall and spring with shades of violet-purple, brown, etc. Very	
fine effect in the rock garden	25
*Wulfeni—Rosettes 2 inches across slightly glau-	.20
cous, ciliate. Flowers pale yellow	
SCHIVERECKIA	
Bornmulleri—An early flowering crucifer resem-	
bling Alyssum. White flowers in earliest spring.	
2-3 inches	
SILENE (Catchfly)  *Alpestris—3-4 inches; white; May-June	
*Saxifraga—4-5 inches; white tinted pink; June .15	
*Schafta—3-4 inches; bright carmine; September .15	
STACHYS (Betony)	
*Lanata—Woundwort. 12-15 inches; pink; June;	
leaves silvery and very wooly	.20
*Officinalis—10-12 inches; lilac pink; August15	
STATICE (Sea lavender)	
*Dumosa—8-12 inches; tinted white; July. new, good to dry for winter bouquets	.25
*Latifolia—10-12 inches; lavender; August	
TANACETUM	.30
Balsamita Costmary—An aromatic herb of the	
old fashioned garden	.25
Vulgare Tansy—One of the standard old fashion-	
ed medicinal herbs. The yellow flowers and	
finely divided leaves are ornamental in the	
hardy border	)
*Chamaedrys—5-6 inches; rose red; July. For	
the rock garden or perennial border	5
THYMUS (Thyme)	
*Aureus—Golden leaved Thyme. 5-6 inches;	
lilac; July	5 .25
*Argento Marginatus—5-7 inches; lilac; green	
leaves edged with creamy white	0
*Azoricus—A low growing mossy plant that is very attractive. Not very hardy here	5 25
*Citriodorus—6-8 inches; upright plant with	.23
pleasing lemon-scented leaves. Used to flavor	
salads1	5 .25
Price: 12' of one kind at price of 10; 3 or more at doz. ra	tes.

T. C.	Pot.	F'ld
*Lanuginosus—Creeping, gray, hairy foliage; rarely blooms	15	25
*Nitidus—4-6 inches; upright sage green leaves	.15	.43
with pleasing scent	15	
*Serpyllum—Creeping, green foliage; lilac; July		
*Serpyllum Album-Creeping; white; July		.25
*Serpyllum Coccineum—Creeping; deep crimson;		
July	.15	.25
Serpyllum Odoratus—Sub-shrubby, useful for	4 -	
covering large rocks, very fragrant		25
*Vulgaris—Kitchen Thyme, also ornamental  One each of the above ten varieties of Thyme		.23
potted plants, \$1.40.	-,	
TROLLIUS (Globe Flower)		
Europeus—2 feet. yellow; May. Needs a moist and		
fertile soil	.25	
Ledebouri—Taller and later flowering than Euro-		
peus. Flower less globular in shape	.25	
TRIFOLIUM  Peners Purnumes A most interesting and area		
Repens Purpurea—A most interesting and ornamental clover with bronze foliage. Grow it for		
luck because you can always find several four		
leaved clovers on an established plant	.15	
TUNICA (Coat Flower)		
*Saxifraga—3-5 inches; pink; July-August	.15	.20
*Saxifraga Fl. Pl.—Double flowered Tunica.	~ -	
3-5 inches; pink; June-August	.25	
VALERIANA Officinalis—(Garden Heliotrope) 5-6 feet; white;		
summer. Heavily sweet scented		.20
VERONICA (Speedwell)		.20
*Austriaca—8-10 inches; blue; June	.15	.25
*Corymbosa Stricta—Upright; 6-8 inches; blue;		
June	.15	
*Filiformis—Close creeper; light blue; May.	1 5	25
Good for planting between stepping stones		.25
*Gentianoides—10-12 inches; blue; June-July *Incana—8-10 inches; intense blue; June; leaves	.23	
·	.15	.25
gray Longifolia Subsessilis—12-18 inches; deep blue;		
Sept.		.35
*Pectinata—Trailing; wooly foliage; blue	.15	
*Pectinata Rosea—Trailing; wooly foliage; rose;	1 5	25
May **Prostrata—3-4 inches; carpeting; May	.15	.25 .25
Spicata—15-20 inches; medium; blue; June-July	.13	.20
*Spicata Nana—5-6 inches; blue; July. For rock		,_,
garden or border	.15	.25
*Spicata Nana Erica—5-6 inches; pink; July. Has		
much the appearance of Heather		.25
*Teucrium—8-10 inches; intense blue; June	.15	.25
Virginica—3-5 feet; white; August. Our native		.25
veronica VIOLA		
*Arkwright Ruby—A bright ruby red variety of		
great beauty	.15	
*Apricot—5-6 inches; yellow shaded apricot; all	4	
season	.15	
*Applequist Seedling—An improved Jersey Gem.		
Flowers very large. A new variety from the West Coast	.25	
*Bowle's Black—5-6 inches; tiny black flowers	,20	
with violet center	.15	
		9.
Price: 12 of one kind at price of 10: 3 or more at doz.	- 4 64	

	Pot.	F'ld
*Jersey Gem—6 inches; flowers violet; all sum- mer	15	25
* Jersey Jewel—6 inches; flowers larger and dark-	.10	.40
er than Jersey Gem. Very free flowering		
*Lutea—6 inches; clear yellow; all season *Odorata—English Violet. The old fashioned	.15	
sweet scented single blue violet	.15	.25
*Odorata Rosina—3-4 inches; rose, very sweet		
scented; flowers spring and fall	.25	
VINCA (Periwinkle)  *Minor—Dark green leaves and blue flowers. A		
good ground cover under trees	.15	.25
*Minor Bowle's Variety—A compact form of the	25	
YUCCA	.25	
Angustifolia—Narrow, long leaves, 18 inches	.15	
ZAUSCHNERIA		
*Californica—California Fuchsia. Scarlet Fuchsia like flowers	35	
	.55	
OLD FASHIONED HERBS		
For several years Mrs. Toole has been much in in our old fashioned herbs and of course I have be expedient to trail along. As a result we offer this so of some of the best of the varieties that you will want in your Herb Garden. The Herbs are divid general way into Aromatic Herbs, grown for the grance. Sweet or Pot Herbs used as a flavoring found Medicinal Herbs used in preparing old faremedies. Some are hardy perennials and are indicated abbreviation Per. Tender perennials are so in and biennials as well. Annuals are indicated Ann. Plants are out of 2½ inch pots and are ready to along nicely in your garden. Seeds are also off some kinds.	foundelection in the surface of the	d it tion rely n a fra-ods, ned by ted
Mrs. Toole has prepared directions for the use of the Sweet Herbs. A copy of these directions will cluded with orders amounting to \$2.00 or over.		

While many will want to grow these herbs in a special herb garden, possibly in a formal design, most of them may be used as ornamental features in the rock garden or perennial border.

Chives, Germander, Lavender, Winter Savory, Rue and Thyme may well find a place in the rock garden, while practically all the balance have enough ornamentl features in flowers or foliage to merit a place in a mixed border.

NATIVE PLANTS OF THE MIDDLE V	WE:	ST
Each year shows an increasing interest in the native to this section. Among them will be found with the section of the section	e pla varie	ints ties
suited to the rock garden and the perennial border as the natural wild garden.		
As fast as facilities and our knowledge of met		
propagation permit, we are growing these varieties nursery. Those plants that are collected are take	n fi	our
waste places or spots unvisited by lovers of na where pasturing or cultivation will soon destroy		
stocks.  It may be necessary to delay shipment of some		
until late summer or fall if spring shipment seems		
able.  Consulting service at moderate expense for the	ose	de-
siring to naturalize considerable area is available.	1	Each
ACORUS (Sweet Flag) Calamus—Aromatic roots, grassy foliage, for edge	of	
pools and open damp places		.20
ACTATEA (Baneberry) Alba—18-24 inches; white flowers and ivory colo		20
fruit with red pedicels		.20
cemes followed by red fruit. Both banebarries le	ove	.20
ACTINEA		
*Herbacea—Lakeside Daisy. A mat forming pl with yellow daisies in early spring. Open grou	ınd	05
well drained		.25

	Each
ANEMONE (Windflower) Canadensis—The white flowers on stems 15-20 inches	
high appear in June. Open damp places	.20
*Patens Var. Wolfgangiana—(Wild Crocus) Our	
earliest spring wild flower. Lavender flowers fol-	
lowed by silky feathery seed vessels. Open gravelly	
soil. Not easy to establish	.25
ARENARIA	
*Stricta—Needle like leaves, white flowers in late	٥٢
spring. Open sun or light shade, sandy soil	.25
AQUILEGIA (Columbine)	
*Canadensis—Scarlet and yellow flowers on plants	
1-2 feet high. Often found in crevices of cliffs with	
but little soil. May-June. At home in sunor shade, in good soil or almost none at all	25
ARISAEMA (Jack-in-the-Pulpit)	.23
*Triphyllum—6-12 inches; brownish purple flowers in	
May followed by brilliant red berries. Slightly	
acid leaf mold. Shade	.20
ASARUM (Wild Ginger)	
*Canadense—Gets its name from the thickened roots	
strongly ginger flavored. A good ground cover for	
rich shade. 6-8 inches; Curious chocolate colored	
flowers in May	.20
ASCLEPIAS	
*Tuberosa—(Butterfly Weed) 12-15 inches; brilliant	
orange flowers in midsummer; Well drained soil	
in sun	.25
ASTER	
*Linariifolius—(Savory Leaved Aster) 8-12 inches;	
purple flowers in Sept. on stiff leaved compact	
bushy plants. Open sandy soil	
Novae Angliae—(New England Aster) Flowers pur-	
ple to rose colored on 3-4 feet stems in Sept. Rich fairly moist soil	.25
Sericeus—(Silky Leaved Aster) Mauve flowers on	
stems sparsely clothed with silky leaves in Sep-	
tember. Rather poor sandy soil	
CALTHA (Marsh Marigold)	
Palustris—8-12 inches; Open bogs are often a mass	
of yellow with this plant in early spring. May be	
grown in good garden soil, not too dry	.25
CAMPANULA (Harebell)	
*Rotundifolia—6-12 inches; The purple bells may be	
found growing from crevices in rocky cliffs, on	
sandy hillsides, or hummocks in open swamps,	
but it's always attractive, all summer	.25
*Thalictroides—10-15 inches. The bunches of blue	
berries in mid-summer are the conspicuously orna-	
mental feature. Shade and leaf mold	
CLAYTONIA (Spring Beauty)	.20
*Virginica—2-4 inches. The rose colored flowers rise	
from grassy tufts in early spring. Shade, leaf mold	
CHRYSOGONIUM	
*Virginianum—From the Smoky Mountains of Ten-	
nessee. One inch golden flowers on short stems	
all summer	.25
CYPRIPEDIUM (Lady Slippers)	
Acaule—Moccassin Flower. 6-10 inches; rose; June.	
Must have acid soil	.35
Pubescens—Yellow Lady Slipper. 8-15 inches; yel-	
low; May; Not difficult to grow in shade in leaf	
mold	05

	Each
Candidum—Small White Lady Slipper. 6-8 inches;	
white; May. Not difficult in open or lightly shaded	
damp places	.50
Spectabile—Showy Lady Slipper. 2 feet. White shaded	•••
with rose; June. Needs a neutral soil, moisture and	
light shade	0 =
light shade	.35
DICENTRA	
*Cucullaria—Dutchmans Breeches. 5 inches; white	
early spring. Plant tiny bulbs shallow in rich leaf	
mold Shade	.15
DODECATHEON (Shooting Star)	.15
*Modic 10.12 : 1	
*Meadia—10-12 inches; white or pink; May. Open	
well drained but not poor soil. One of our more	
beautiful wild flowers	.25
ERYTHRONIUM (Dog-Tooth Violet)	
Americanum—Yellow flowers and mottled leaves.	
Early spring. Rich shade. Fall delivery	.15
Albidum—White or tinted flowers, leaves somewhat	• • • •
mottled. Rich soil	1 ~
	.15
EUPATORIUM (White Snakeroot)	
Urticaefolium—1-3 feet. white; Sept. One of the few	
fall flowering plants that thrives in deep shade	25
FIIDLODDIA (Communication of the control of the con	.25
EUPHORBIA (Spurge)	
Corollata—Grows plentifully in open sandy fields.	
Used in quantities by florists in summertime in	
place of Baby's Breath. 18-24 inches; small white	
flowers in Tules and A	20
flowers in July and August	.20
EPIPACTIS (Rattlesnake Plantain)	
*Pubescens—Low rosettes of greyish green leaves	
that are the ornamental feature. Rich medium acid	
loof model in the differential reaction. Nich integriting action	4 11
leaf mold in shade. Single rosettes. Clumps 50c	.15

	Each
2-3 feet. Blue flowers with yellow spot at base of	
blade	.25
LIATRIS (Blazing Star)	
Pychnostachya—4-5 feet; long spikes of dark mauve	
flowers. AugSept. Good garden soil, sun	.25
	.20
Spicata—Shorter spikes. Well drained sandy soil.	25
Late summer	.25
LITHOSPERMUM (Puccoon)	
Angustifol'um—8-10 inches. Vivid yellow flowers in	
spring. Sandy soil, sun	.25
LOBELIA	
Cardinalis—(Cardinal Flower) Brilliant and showy	
cardinal flowers on stalks 2-4 feet high in August.	
Grows wild along the sides and even on the beds	
of creeks where it is covered with two or three	
inches of water part of the year. Will grow in fer-	
tile garden soil	.25
MERTENSIA	
Virginica—(Virginia Cowslip) 10-20 inches; glaucous	
green foliage, pink buds followed by delicate blue	
flowers in early spring. Sun or shade; fertile moist	
soil	.20
MITCHELLA (Partridge Berry)	
Repens—Trailing; pink flowers followed by red	
fruit in fall. One of the finest of ground covers for	
moderately acid soil	.15
MITELLA (Bishopscap)	
Diphylla—8-12 inches. Spikes of tiny white snow-	
flake-1'ke flowers in spring. Somewhat hairy maple	
shaped leaves. Rich leaf mold, shade	25
	.20
OPUNTIA (Cactus)	
*Frag'lis—(Small Prickly Pear) A hardy Cactus	
found on our rocky bluffs. Flat stems and long	
yellow spines. 2-6 inches. Good for dry rock gar-	
dens or cactus bowl in the house	.25
*Rafenesquii—(Prickly Pear) The '.at stems are	
much larger than fragilis and may reach a height	
of 12 inches and will spread out over an area of 2	
feet across. Yellow flowers in July, red edible fruit	
in fall	.25
PENTSTEMON	
Grandiflorum—One of the best of the Pentstemons.	
Lavender foxglove-like flowers in late spring. 18-24	
inches. Requires well drained soil, sun	.25
·	.43
PHLOX	
*Divaricata—(Woods Phlox) Makes a lovely carpet	
of blue in spring. Light shade, fertile soil and fair	
amount of moisture	.20
*Pilosa—Prairie Phlox. Well drained soil in open,	
sunny spots. Bright rose, sometimes plain magenta,	
It needs to be used with some care in the garden.	0.5
8-12 inches	.25
POLEMONIUM	
*Reptans—Grows in somewhat damp, shady places,	
ordinary soil. 10-12 inches. May-June. Bell-shaped	
violet-blue flowers	.20
POLYGONATUM	.20
*Biflorum—(Solomon's Seal) The blue-black berries	
hang from the under side of arching leafy stalk	
growing 18-30 inches tall	.20
RANUNCULUS	
*Fasicularis—(Early Spring Buttercup) A very

### NATIVE FERNS

Woodland and Swamp Ferns, indifferent to soil reaction or preferring circumneutral soil.

#### ADIANTUM

Pedatum—(Maidenhair Fern) Highly desirable. 1-2 feet.

#### ATHYRIUM

Felix-Foemina—(Upland Lady Fern) Attractive but spreads rapidly; 1-3 feet.

#### CYSTOPTERIS

Fragilis—(Woodland Brittle Fern) A low delicate ground covering plant; attractive but fronds short-lived; 6-8 inches.

#### DRYOPTERIS

Marginalis—(Margined Wood Fern) Evergreen; fine for holding soil on slopes; one of the best ferns for home gardens; 1-2 feet.

Spinulosa—Attractive, foliage more delicate than preceding; 1-2 feet.

#### **OSMUNDA**

Claytonianna—(Interrupted Fern) Large but highly desirable. 2-4 feet.

#### **PTERETIS**

Nodulosa—(Ostrich Fern) Fronds brittle, so plant where sheltered from wind; 2-4 feet.

Rock Ferns indifferent to reaction or preferring circumneutral soils.

#### **ASPLENIUM**

Trichomanes—(Rock-Maidenhair) Fine on shaded, rather moist rock,

#### **CAMPTOSORUS**

Rhizophyllus—(Walking Fern) Worth growing in any cool, shady place.

#### CHEILANTHES

Feei—(Lip-Fern) Tiny, wooly leaved fern growing on sunny lime rock.

#### CYSTOPTERIS

Bulbifera—(Bulblet Fern) Attractive on shaded rocks. PELLAEA

Atropurpurea—(Cliff-brake) Desirable for sunny situations but must have moisture.

#### POLYPODIUM

Vulgare—(Rockcap Fern) Desirable as a capping for any rock.

#### WOODSIA

Obtusa—(Cliff-fern) Adaptable to almost any rock situation.

Rock Ferns preferring or requiring acid soils.

#### WOODSIA

Ilvensis—(Rusty Cliff-fern) Attractive on dry rocks of moderate acidity.

## PRICES ON FERNS 25c each; \$2.50 ped dozen

With each order for Ferns amounting to \$2.00 or more we will send a very interesting booklet on Native Ferns edited by Mrs. Kathryn E. Boydston, which was for sale at the Century of Progress. It contains articles by Mrs. Boydston, Dr. E. T. Wherry and other authorities on Ferns.

#### A Fern Bed of 36 Clumps for \$5.00. Delivered.

These 36 plants are just what you want to start your wild garden. The Fern Bed includes: 10 Ostrich Ferns; 10 Lady Ferns; 10 Clayton Ferns; 6 Maidenhair Ferns. Half of the Fern Bed; 18 plants for \$3.00. Delivered.
