Within many universities there is a
**Scientific Culture and
Innovation Unit**
(Innovation and Transfer)

UCC+I

- Active participation of the Scientific Culture and Innovation Unit (UCC+i) of the universities.
- Improvement of scientific content in Wikipedia by editing or creating entries: texts and audiovisual material.
- Meetings and training workshops for undergraduate and graduate students.
- Coordinated by Academic or Administrative staff through a wikiputor.
- Training and support for wikiputors from Wikimedia Spain.

Itinerant Wikipediaian: Quantity and breadth

- ✓ 11 collaborating professors from 6 public universities
- ✓ 11 training sessions about Wikipedia in the classroom.
- ✓ 129 students involved.
- ✓ 60 articles published/improved.
- ✓ 5,4 articles per group.
- ✓ 0,46 articles for each estudent involved.
- ✓ No Wikipediaian professors.

Wikipedia Club: Quality and depth

- ✓ 7 collaborating professors from 3 public universities.
- ✓ 4 Wikipedia clubs.
- ✓ 39 students involved.
- ✓ 20 articles published/improved.
- ✓ 5 articles per group.
- ✓ 0,51 articles for each student involved.
- ✓ 7 Wikipediaian professors.

Topic

Definition of subjects and search for collaborators to identify articles.

Articles and sources

Identify missing and improvable items. Scientific quality sources.

Students search

PhDs, master's degrees, bachelor's degrees, etc.

Outcomes

Continuous follow up and assessment of each club's work.

Credits and certificates

Credit recognition (RAC) and official recognition for students (through university), wiktutors (through Fundación Madri+d) and universities (through Wikimedia Spain).

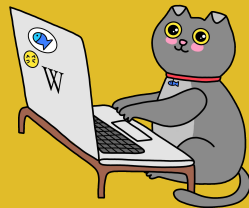

Workshop

On-site, remote or hybrid.

We invite you to identify the communication and transfer actors in universities, because they are interested in the dissemination of scientific production and are therefore more open to collaboration.

Also, these agents already know lecturers who are interested in innovation and are open to include Wikipedia in their work.

Thank you!
