Following publication of our article [1], it has come to our attention that there is an error in the second to last sentence of the abstract.

The sentence in the published article reads:

‘Assuming that this species feeds on the top millimetre of the sediment, we estimate that, during periods of high phytodetrital flux, the *Pr. murrayi* population reworks one square metre of sediment surface in approximately 287 days’.

The sentence should read as follows:

‘Assuming that this species feeds on the top millimetre of the sediment, we estimate that, during periods of high phytodetrital flux, the *Pr. murrayi* population reworks the entire sediment surface in approximately 287 days’.

This error was introduced by the authors during the proofing stage. We apologize for any inconvenience caused.
