EXAMINATION PAPERS.
1858.

BACHELOR OF ARTS.

Pass Examination.

Examiner,—W. GRAPEL, Esq., M.A.

MONDAY, April 5th

ENGLISH.

Morning, 10 A. M. to 1½ P. M.

1. Give a rapid sketch, with dates, of Shakspeare's life. What are the probabilities as to the extent of his classical education?

2. What was the immediate source from which Shakspeare took the plot of *Macbeth*? What play of a contemporary dramatist has been thought to have given him hints in certain portions of this tragedy?

3. Account for the very unsatisfactory state in which we find the text of Shakspeare's plays. When and by whom was published the first folio edition? and when and by whom the second?

4. In what year do you hold *Macbeth* to have been written? Support your opinion first by internal, and next by external evidence.

5 Shew by an accurate comparison the truth of Schlegel's remark that, in the progress of the action, Macbeth is altogether the reverse of Hamlet.

6 Explain fully the following passages :—

a. —————Bellona's bridegroom, lapp'd in proof
Confronted him with self-comparisons,
Point agamst point, rebellious arm 'gainst arm
Curbing his lavish spirit.

b. —————*That, trusted home,*
Might yet enkindle you unto the crown
Besides the thane of Cawdor.

—————Present fears
Are less than horrible imaginings,
My thought, whose murder yet is but fantastical,
Shakes so my single state of man, that function
Is smother'd in surmise, and nothing is
But what is not.

The love that follows us, sometime is our trouble,
Which still we thank as love. Herein I teach you
How you shall bid God yield us for your pains
And thank us for your trouble.

Let your remembrance apply to Banquo;
Present him eminence, both with eye and tongue.
Unsafe the while, that we
Must have our honours in these flattering streams,
And make our faces vizards to our hearts
Disguising what they are.

c. —————Whiles I threat, he lives.

Words to the heat of deeds too cold breath gives.

7 In what words of the Porter-Scene does Coleridge recognise the certain hand of Shakspeare? The same words occur in Hamlet, and the same idea in All's Well, &c., quote the lines in both these dramas.

8. Analyse the character of Lady Macbeth, quoting the passages in which her woman's tenderness appears.

9. What different readings have been proposed in the following passages; state which you prefer, with the reasons which influence your choice:—

a. ————— Fortune on his damned quarry shining
Show'd like a rebel's whore.

b. MACB. ————— Pi'y thee peace
I dare do all that may become a man
Who dares do more, is none.

LADY M. ————— What beast was 't then
That made you break this enterprise to me ?

c. ————— or be alive again,
And dare me to the desert with thy sword,
If trembling I inhabit then, protest me
The baby of a gull.

d. ————— This push
Will chair me ever, or disseat me now
I have liv'd long enough, my way of life
Is fall'n into the sere, the yellow leaf.

e. ————— And all our yesterdays have lighted fools
The way to dusty death.

10. What is the vulgar idea as to the characteristic of the English genitive case? Advance what arguments you can in disproof of it.

11. *a* Though bladed corn be lodg'd, and trees blown down,

b. Though bladed corn is lodg'd, and trees blown down,
Which of these expressions is correct? or may both be so? If the latter, distinguish between the meanings in the two cases. State the general rule as to the mood which should follow a conditional conjunction.

12. In what several ways may the plurals of English nouns be formed? Give examples.

13. Is there any and what peculiarity in the plural form 'children'? What distinction in modern use prevails between 'brothers' and 'brethren'?

14. What examples of true gender are to be found in the English Language; How far may 'that,' 'it,' 'what,' be so considered?

15. Paraphrase very accurately the following passage.—

If it were done, when 'tis done, then 't were well
 It were done quickly: if the assassination
 Could trammel up the consequence, and catch,
 With his surcease, success; that but this blow
 Might be the be-all, and the end-all here,
 But here, upon this bank and shoal of time
 We'd jump the life to come—But, in these cases,
 We still have judgment here, that we but teach
 Bloody instructions, which, being taught, return
 To plague the inventor, this even-handed justice
 Commends the ingredients of our poison'd chalice
 To our own lips.

MONDAY, April 5th—Afternoon, 2 to 5½

ENGLISH.

Examiner,—W. GRAPEL, Esq., M.A.

1. Give the date of Dryden's appointment as Poet-Laurate. Who preceded, and who succeeded him in this office?

2. Waller was smooth; but Dryden taught to join
 The varying sense, the full resounding line,
 The long majestic march, and energy divine.

What are the peculiarities of Dryden's versification?
 Shew the peculiar fitness of the above lines of Pope.

3. What was for a long period the distinctive feature of Dryden's dramatic writing? Upon what model is he said to have constructed his tragedies?

4 In one of his dedications Dryden says :—“ I answered
 “ not the *Rehearsal* because I know the author sat to him-
 “ self when he drew the picture, and was the very Bayes of
 “ his own farce ; because also I knew that my betters were
 “ more concerned than I was in that satire, and, lastly, be-
 “ cause Mr. Smith and Mr. Johnson, the main pillars of it,
 “ were two such languishing gentlemen in their conversa-
 “ tion, that I could liken them to nothing but their own re-
 “ lations, those noble characters of men of wit and pleasure
 “ about town.”

Explain fully the several allusions.

5. Give such explanation as the following lines may seem to require :—

a Known each, they know, but each with change of cheer,
 The vanquished side exults, the victors fear,
 Not them, but theirs, made prisoners ere they fight,
 Despairing conquest, and deprived of flight

b What worse to Cymon could his fortune deal,
 Rolled to the lowest spoke of all her wheel ?
 It rested to dismiss the downward weight,
 Or raise him upwards to his former height,
 How much he durst he knew by what he dar'd
 The less he had to lose, the less he ear'd
 To manage loathsome life when love was the reward
 Who bear the bows were knights in Arthur's reign,
 Twelve they, and twelve the peers of Charlemagne
 For bows the strength of brawny arms supply,
 Emblems of valour and of victory.

Behold an order yet of newer date,
 Doubling their number, equal in their state,
 Our England's ornament, the crown's defence
 In battle brave, protectors of their prince :

6. Give the transitive verbs derived from the intransitive *wake, rise, sit, lie, fall, drink*. These transitives form the preterite in one way, and their intransitives in another.

7. Modern grammarians distinguish between the strong and the weak præterites of verbs. Explain what is intended by these terms.

8. Which of the following is correct ?

- a. $\left\{ \begin{array}{l} \text{They hanged the criminal.} \\ \text{They hung the criminal.} \end{array} \right.$
- b. $\left\{ \begin{array}{l} \text{They digged a trench.} \\ \text{They dug a trench.} \end{array} \right.$

9. Latham says: “*Shall* is predictive, and *will* is promissive in the first person only, whereas in the second and third *will* is predictive, and *shall* promissive.”

Apply this to explain the following instances, and shew how the variation of the word varies the meaning of the passages.—

a We with the fair $\left\{ \begin{array}{l} \text{shall} \\ \text{will} \end{array} \right\}$ sail before the wind,

b ————— My chosen few

With arms admister'd $\left\{ \begin{array}{l} \text{shall} \\ \text{will} \end{array} \right\}$ and thy crew

Then entering unexpected $\left\{ \begin{array}{l} \text{will} \\ \text{shall} \end{array} \right\}$ we seize

Our destin'd prey from men dissolv'd in ease

Unbalden, though I am, I $\left\{ \begin{array}{l} \text{will} \\ \text{shall} \end{array} \right\}$ be there

And join'd by thee intend to joy the fair.

10 Paraphrase very carefully the following passage—

Amid the plain a spreading laurel stood,

The grace and ornament of all the wood.

That pleasing shade they sought, a soft retreat,

From sudden April showers, a shelter from the heat

Her leafy arms with such extent were spread,

So near the clouds was her aspiring head,

That hosts of birds, that wing the liquid air,

Perch'd in the boughs, had nightly lodging there

καὶ γυνῶ τρέφειν τὴν γλῶσσαν ἡσυχω-
 τέραν,
 τὸν νοῦν τ' ἄμεινω τῶν φρενῶν, ὧν νῦν
 φέρει.

5. Explain the etymology of the following words in the above extract:—

 In which ten thousand sorts of punishment
 The cursed creatures doe eternally torment."

LATIN.

Examiner.—W. GRAPEL, Esq., M.A.

1. When was Cicero born, and when elected Consul ?
 Who was his colleague in the Consulship ?

2. State the days of the month, according to English computation, on which the four orations against Catiline were respectively delivered.

3. Translate the following passage :—

O conditionem miseram, non modo administrandæ, verum etiam, conservandæ reipublicæ! Nunc si L. Catilina, consiliis, laboribus, periculis meis circumclusus ac debilitatus, subito timuerit, sententiam, mutaverit, deseruerit suos, consilium belli faciendi abjecerit, ex hoc cursu sceleris, et belli, iter ad fugam, atque in exsilium convenerit; non ille a me spoliatus armis audaciæ, non obstupefactus ac perterritus mea diligentia, non se spe conatuque depulsus, sed indemnatus, innocens, in exsilium ejectus a consule vi et minus esse dicitur; et erant, qui illum, si hoc fecerit, non improbum, sed miserum; me non diligentissimum consulem, sed crudelissimum tyrannum existimari velint. Est mihi tanti, *Quirites*, hujus invidiæ falsæ et iniquæ tempestatem subire, dummodo a vobis hujus horribilis belli ac nefarii periculum depellatur. Dicatur sane ejectus esse a me, dummodo eat in exsilium; sed mihi credite, non est iturus. Nunquam ego a diis immortalibus optabo, *Quirites*, invidiæ meæ levandæ causa, ut L. Catilinam ducere exercitum hostium, atque in armis voltare audiat, sed triduo tamen audietis, multo magis illud timeo, ne mihi sit invidiosum aliquando, quod illum emiserim potius, quam quod ejecerim; sed cum sint homines, qui illum, cum profectus est, ejectum esse dicant, idem si interfectus esset, quid dicerent.

1. Distinguish accurately between *exsilium* and *relegatio*; between *municipia* and *coloniæ*; between *ingenuus* and *liber*, and between *rogatio*, *lex*, *plebiscitum*, and *senatus-consultum*.

5. State the means by which Cicero learned the nature of Catiline's conspiracy, and next obtained the legal evidence in proof of it.

6. State the general uses of the Latin supine, and give examples of sentences in which it is introduced.

7. Derive etymologically *locuples*; *atrox*; *diligentia*; *iniquus*; *callidus*; *nudus*; *infensus*.

8. Nihil me mutum potest delectare, nihil tacitum, nihil denique hujus modi, quod etiam nimis digni assequi possunt. Memoria vestra, Quirites, nostræ res alentur, sermonibus crescent, litterarum monumentis inveterascent, et corroborabuntur; eandemque diem intelligo, quam spero æternam fore, et ad salutem urbis, et ad memoriam consulatus mei, propagatam; unoque tempore in hac republica duos cives extitisse, quorum alter fines vestri imperii, non terræ, sed coeli regionibus terminaret; alter ejusdem imperii domicilium sedemque servaret.

a. Translate this passage.

b. To whom is allusion made in the concluding lines?

9. What Latin adjectives are joined with the genitive? What with the ablative? What with either?

10. State the difference in meaning between *opportunitas* and *ocasio*, between *accuso* and *incuso*, between *incendo*, *accendo*, and *succendo*; between *sodalis*, *comes*, *consors* and *socius*.

11. Translate into Latin prose :

“When a government flourishes in conquests, and is secure from foreign attacks, it naturally falls into all the pleasures of luxury; and as these pleasures are very expensive, they put those who are addicted to them upon raising fresh supplies of money, by all the means of rapaciousness and corruption; so that avarice and luxury very often become one complicated principle of action, in those whose hearts are set upon ease, magnificence and pleasure. The most elegant and correct of all the Latin historians observes that, in his time, when the most formidable States in the world were subdued by the Romans, the republic sank into those two vices of a quite different nature, luxury and avarice; and accordingly describes Catiline as one

who coveted the wealth of other men, at the same time that he squandered away his own. This observation on the Commonwealth, when it was at the height of power and riches, holds good of all governments that are settled in a state of ease and prosperity."

“He that is too desirous to be loved,” says Dr. Johnson, “will soon learn to flatter; and when he has exhausted all the variations of honest praise, and can delight no longer with the civility of truth, he will invent new topics of panegyric, and break out into raptures at virtues and beauties conferred by himself. It is scarcely credible to what degree discernment may be dazzled by the mist of pride, and wisdom infatuated by the intoxication of flattery, or how low the genius may descend by successive gradations of servility, and how swiftly it may fall down the precipice of falsehood.”

“Having resided at Agra till there was no more to be
learned, I travelled into Persia, where I saw many remains

of ancient magnificence, and observed many new accommodations of life. The Persians are a nation eminently social, and their assemblies afforded me daily opportunities of remarking characters and manners, and of tracing human nature through all its variations. From Persia, I travelled through Syria, and for three years resided in Palestine, where I conversed with great numbers of the Northern and Western nations of Europe;—the nations which are now in possession of all power and all knowledge, whose armies are irresistible, and whose fleets command the remotest parts of the globe. When I compared these men with the natives of our own kingdom, and those that surround us, they appeared almost another order of beings. In their countries it is difficult to wish for any thing that may not be obtained: a thousand arts, of which we never heard, are continually labouring for their convenience and pleasure, and whatever their own climate has denied them, is supplied by their commerce.”

MOHABHARAT.

মুনি বলে মহাশয়, শুনি শ্রীজনমেজয়,
হেন মতে নিবসে পাণ্ডব ।
এক দিন আচম্বিত, শ্রীনারদ উপনীত,
সর্বত্র গমন মনোজব ॥
জ্ঞেয় জ্ঞান যোগ হৃদয়, অমর অস্বর পূজ্য,
চতুর্বেদ জিহ্বাগ্রেতে বৈসে ।
ব্রহ্মার অঙ্গেতে জন্ম, বিচ্ছ যত ব্রহ্মকর্ম,
ব্রহ্মাণ্ড স্বজেন অনায়াসে ॥

পরমার্থ অহুবন্ধি, বিজ্ঞেয় বিগ্রহ সঙ্ঘি,
 কলহ গায়নে বড় প্রীত ।
 শিরেতে পিঙ্গল জটা, ললাটে পিঙ্গল ফোঁটা,
 শ্রবণে কুণ্ডল উল্লাসিত ॥
 মুখে হরি নাম শ্রবে, হৃদয়ে বীণার রবে,
 গতি মন্দ যেমন মাতঙ্গ ।
 বারিজ নয়ন যুগে, বহে বারি যেন মেঘে,
 প্লকে কদম্ব প্প অঙ্গ ॥
 শরদিন্দু মুখাসুজ, আজাহ্নলম্বিত হৃদ,
 প্রজ্বল অনল দীপ্তকায় ।
 পরিধান কৃষ্ণাজিন, সঙ্গ মুনি কত জন,
 উপনীত পাশুবসভায় ॥
 দেখিয়া নারদ ঋষি, যে ছিল সভায় বসি,
 সম্মুখে উঠিল ততক্ষণে ।
 আস্তে আস্তে ধর্ম্মস্বত, সহোদরগণযুত,
 প্রণাম করেন সে চরণে ॥
 স্নগন্ধ উদক দিয়া, পদযুগ পাথালিয়া,
 বসিতে দিলেন সিংহাসন ।
 যথা শিষ্টশবহার, পাণ্ড অর্ঘ্য দিয়া তাঁর,
 ভক্তিভাবে করেন পূজন ॥
 তবে মুনি স্নেহবশে, জিজ্ঞাসেন মৃদুভাষে,
 কহ রাজা ভদ্র আপনার ।
 কুলের কৌলিক কর্ম্ম, ধন উপার্জন ধর্ম্ম,
 নির্বিঘ্নেতে হয় কি তোমার ॥
 সাধু বিজ্ঞ যত জন, অম্বরক্ত মন্ত্রিগণ,
 এ সবার রাখ কি বচন ।
 একক অনেক সহ, বিচার কি না করহ,
 কার্যে না কি রাখ মুখ্যগণ ॥

ভক্ষ্য দ্রব্য যথায়থ, ছায় স্থলে কিন কত,
 না রাখত দ্বিজের দক্ষিণা ।
 তব অন্নরক্ত যত, ভয়ে কি শরণাগত,
 দুঃখত না পায় কোন জনা ॥
 বিজ্ঞ যোগ পুরোহিত, দৈবজ্ঞ জ্যোতিষবিত,
 আছে কি বন্দক বিনোদক ।
 অনাথ অতিথি লোকে, আগুন ব্রাহ্মণ মুখে,
 সদা দেহ হৃত অন্নোদক ॥
 রাজ্যের যতেক রাজা, পায় যথোচিত পূজা,
 সবে অন্নগতত তোমার ।
 ধাত্ব ধন বহু মত, উদক আয়ুধ যত,
 পূর্ণ করিয়াছত ভাণ্ডার ॥
 প্রাতঃকালে নিদ্রাবেশ, বৈকালেতে ক্রীড়ারস,
 আলস্য ইন্দ্রিয় নিবারণ ।
 ধর্ম কন্মের ধন হয়, কর নিষ্ক উপচয়,
 পুত্রবৎ পাল প্রজাগণ ॥

রাত্রি প্রভাত হইয়া গেল, একবারও চক্ষু মুদি নাই।

MENTAL AND MORAL SCIENCE.

Examiner.—REV. A. DUFF, D.D., L.L.D.

I. MENTAL PHILOSOPHY.

1. State the specific objects of Mental as contra-distinguished from Natural Philosophy; and vindicate the importance of the former, in its relation to Physical Science and those varied arts of which the mind itself is the subject.

2. How do we gain the notion and conviction of *self*? How would you distinguish between the notion of *self* and the notion of *identity*? How would you maintain the reality and fundamental nature of intuitive or *first truths*?

3. The mind being a simple spiritual essence or uncompounded substance, shew in what sense its phenomena may be regarded as complex and susceptible of analysis. Analyse "Memory" and "Imagination," explaining the philosophical principles on which the former may be improved, and exhibiting the kind of influence, for good or evil, which the latter may exert in the formation of individual character.

4. How do we come originally to know and believe in the existence of an external world? What say you as to the nature of the connection between external objects and the percipient mind? and as to the adequacy or inadequacy of ancient and modern theories which have been framed for the purpose of explaining it?

5. Expose the radical error of the metaphysical system, which would regard all phenomena of mind either as sensations or transformed sensations; and, from your statements and reasonings on the subject, deduce a conclusive argument against the doctrine of materialism.

6. In the mind, thoughts and feelings are constantly succeeding each other:—Is this succession casual?—or, is there an order of sequence? If so, into how many may all the principles or general laws or innate tendencies of suggestion be reduced?

7. Do we *perceive* the relations of objects as we perceive objects themselves? If not, how are we made acquainted with these relations? Note the distinction between relations of co-existence and relations of succession; and furnish a brief estimate of the practical value of the knowledge of these relations to man.

8. How are emotions to be discriminated from sensations on the one hand, and intellectual states on the other? How does the purely psychological treatment of them differ from the purely ethical? And, with reference to the saying, that, "We have been formed not to feel that we may think, but to think that we may feel," what relative rank would you be disposed to assign to them in the mental economy?

II MORAL PHILOSOPHY

9. State the specific objects of Moral as contra-distinguished from Mental Philosophy; shewing under what particular aspect Moral Science may be held as paramount in importance to every other.

10. Expound and vindicate from objections the thesis, which asserts that there is in man a conscience or moral faculty, a power capable of distinguishing, with more or less accuracy, between right and wrong, of approving the former and disapproving the latter; and unfold the import and significance of the saying, that "Had conscience strength as it had right, had it power as it had manifest authority—it would absolutely govern the world."

11. Define rectitude in the action and in the agent—proving that it has a real existence, independent of legislative enactments, or of utility in any of its forms, or of sympathy or any other elements connected with the arbitrary constitution of the human mind.

12. Explain the difference between the rule or standard, and the foundation or ultimate ground of moral rectitude, stating what alone can be regarded as the perfect rule and true ultimate ground of it.

13. Point out the distinction which has been drawn between desire and will, shew how the most perfect freedom of will is compatible with the most absolute certainty of its acts; and, admitting the agency and uniformity of motives or moral causes, shew how we are to account for the fact

that men's wills are influenced in such very different ways, with the same motives before them.

14 Assuming, on the ground of varied demonstrative evidence, the existence of one great Intelligent Being—the Creator of all, Himself uncreated, infinite, eternal—shew how the distinctive functions of conscience point to His moral attributes, and how the conviction of the superintendence of a Supreme Moral Governor of the Universe, in connection with the workings of conscience, tends to originate an impression of man's moral responsibility, as well as of an after-state of moral retribution.

15. Since, ethically considered, relation to other beings involves obligation, mention—

First,—As deduced from the light of reason, conscience, or any other source, the leading relations which we sustain to God, and the obligations which these necessarily involve, and,

Secondly,—the leading relations which we sustain to our fellow-men, and the obligations which these necessarily involve, with special reference to the claims of justice and benevolence, chastity and veracity—pointing out, at the same time, the way in which our relations to God materially affect and influence our relations to our fellow-men.

16. Aristotle, in his Nicomachian ethics, “draws a striking comparison between a man, who, being first misled by sophistical reasonings, has gone into a life of voluptuousness under an impression that he was doing no wrong—and one who has followed the same course in opposition to his own moral convictions. The *former*, he contends, might be reclaimed by arguments, but the *latter* he considers as incurable.” In this specific instance, the Grecian Philosopher concludes that there has been such a disruption of the moral harmony of the mind that “No power appears within itself capable of restoring it to a healthy condition”

From a similar review of the moral phenomena generally, what legitimate inference does sound philosophy constrain us to draw, with respect to the nature and extent of the present derangement of our moral being; as well as with respect to the hope or the hopelessness of an effectual remedy proceeding from the exercise of any of its own powers, or from a transforming influence emanating from a higher source.

SATURDAY, *April 10th* —*Afternoon, 2 to 5½.*

LOGIC.

Examinee,—REV. A DUFF, D.D., L.L.D.

2 Explain distinctly the difference between the analytical and synthetical methods, and point out some of their applications.

3. Give the Logical definition of simple apprehension, judgment and reasoning; indicate the sources of error to which we are exposed under each of these heads; and shew against which of these sources of error Logic may effectually guard us.

4. Explain the following Logical terms:—First and second intention, differentia, equivocal, univocal, analogous, syncategorematic.

5. Notice some of the principal ambiguities to which the following words are liable:—Reason, experience, truth, possible, impossible, necessary.

6. When are propositions said to be opposed to each other? What are the contraries, sub-contraries, subalterns, and contradictories?

7. Define syllogism, stating and defending Aristotle's dictum. In the constitution of a simple categorical syllogism, what is meant by the *matter*, and what by the *form*? What are the conditions or the rules which every valid syllogism must fulfil?

8. What are the figures and modes of syllogism? What the number of the former, and possible number of the latter. Of the latter how many alone satisfy the conditions of legitimate syllogism? And why? Give the scholastic names, and specify the figure and mode of the following:—

Some good men are not rich,
All good men are happy,
Therefore some happy men are not rich.

No deceitful man merits confidence,
All honest men merit confidence,
Therefore no honest man is deceitful.

Every thing base should be avoided,
Some pleasures are base,
Therefore some pleasures should be avoided.

9. Why is I A I an allowable mode in the *third* figure, but not in the first? Why A A A allowable in the first figure, and not in the third? Why A E E allowable in the second, and not in the first?

10. What is meant by the reduction of a syllogism? How may a constructive syllogism be reduced to a destructive? and a disjunctive to a conditional? Name the mode and figure of the following, and reduce it to *Darii*:—

Prudence has for its object the benefit of individuals,
But prudence is a virtue,
Therefore some virtue has for its object the benefit of individuals.

11. What is meant by a term being distributed or non-distributed? With regard to the distribution or non-

distribution of the predicate in affirmative or negative propositions, state the rule and the reason of it. Has the notion represented in the predicate a determinate quantity in the mental apprehension of the speaker or writer? If so, why is it not ordinarily expressed?

12. What are technically called convertible terms? What is illative conversion? What conversion by limitation?

13. What in Logic is a fallacy? Distinguish between, and give the general designation of the fallacies which depend on the *form*, and those which affect the *matter* of a syllogism? Point out and name the fallacy in the following syllogisms, stating the rule violated in each, and the reason of the rule—

Some men are sternly honest,
Some men are dacoits,
Therefore some dacoits are sternly honest.

All cold is to be expelled by heat,
This man's disorder is a cold,
Therefore this man's cold is to be expelled by heat.

Individuals of the same caste have a claim on my kindness,
Babu Nilmoni is not a member of my caste,
Therefore he has no claim on my kindness.

14. Exemplify fallacies of the different kinds now indicated, by actual arguments occurring in common conversation, or that you may have met with in the course of your own reading.

15. How do you distinguish between the fair argument of a syllogism in Barbara, and the fallacy of "petitio principii."

16. Explain the enthymeme, and the kind of connection between it and an inductive argument. Supply what is syllogistically deficient in the following:—

Polygamy checks the increase of the human race, and therefore ought to be abolished.

The prohibition of the re-marriage of widows is the source of much evil, and ought therefore to be removed.

A sound female education promotes the improvement of the whole circle of domestic and social economy, and ought therefore to be universally introduced.

An ignorant superstitious people must be unhappy, therefore the Hindus must be so.

Mercury, Venus and the Earth move round the sun, therefore all planets do so.

17. Give the definition of the dilemma ; with examples, of the simple constructive, the complex constructive, and the destructive dilemmas. Into what may every dilemma be resolved ?

18. Explain the sorites—plain and hypothetical. Expand the following propositions into a regular series of separate syllogisms :—

The mind is a thinking substance ; a thinking substance is a spirit ; a spirit has no extension , what has no extension has no parts ; what has no parts is indissoluble ; what is indissoluble is immortal ?—therefore, the mind is immortal.

19. Take the idea of space and the idea of matter. State which of these ideas is the logical condition of the other ; and which of them is the chronological condition of the other.

20. State the difference between proof and inference—between a verbal and a real question—between a Logical and a Physical discovery—together with the difference and agreement between the Organon of Aristotle and the Organon of Bacon.

LAW AS ADMINISTERED IN THE COURTS OF THE EAST INDIA COMPANY.

Examiner,—W. A. MONTRIOU, Esq.

1. State and describe the documents of a zemindary *crishka*, which are recognized by the Courts.

2. One Kissenchund, being much indebted, bought an estate in the name of his brother Maniechund, and suffered the latter to obtain a Collectory mutation in his own name. One Koonjee Singh having wrongfully got possession, Kissenchund sues him, alleging, in his plaint, that he had bought in the name of his brother, in order to protect the estate from his creditors, none of whom, however, are before the Court. The seller to Kissenchund, and Maniechund himself, both support, by their testimony, Kissenchund's title. How would the Sudder Court deal with the suit "Kissenchund *vs.* Koonjee Singh" on the above facts?

3 A ryot, by a cabooleut recently entered into (counterpart of a *meyadee* pottah), undertakes to pay to the

Zemindars a yearly sum of Rs. 65 under the following heads, *viz.*, Rs 56 rent, Rs 2 salamee, Rs 4 *punchuk* or *punch-gana*, Rs. 3 chowkeedaree. Is there any legal objection or obstacle to this yearly payment, or to any and which part of it, being enforced? Give the grounds of your opinion.

No butwarra had been made of the family Zuneendary, which was recorded *ijmalee* in the Collectorate. After the grant to Smith, a chur forms in the river, adjoining to Smith's putnee land:—To whom does the chur belong?—and would the proprietorship be differently awarded (and why) in the Civil and in the Revenue Courts, *i. e.*, in the Sudder Dewance Court, and by the Board of Revenue?

7. A mortgage of land in Bengal, executed as an English deed, contains a power or permission to the creditor (mortgagee), after default made in payment of the debt on a specified day, and on a month's notice to be given to the owner of the land (mortgagor), to sell the land out and out, repaying himself his loan, with interest and costs, from the price, and rendering the surplus to the mortgagor. Default occurs, and the sale takes place, as stipulated. The mortgagor interferes, and prevents the purchaser (who has paid his purchase money) taking possession. Can the

latter, and how, enforce his title to the land in a Zillah Court? Give the grounds of your opinion.

8 A Revenue Commissioner employs one Gomes, a Deputy-Collector, to report upon a disputed boundary between two Government grantees, Sheikh Esmael and Jones. 1. State what you know of the life and character of Cowper. He has been called “the great regenerator of modern poetry” in what sense is this true?

2

Mighty wind,

That sweep the skirt of some far-spreading wood
 Of ancient growth, make music not unlike
 The dash of ocean on his winding shore,
 And lull the spirit while they fill the mind,
 Unnumbered branches waving in the blast,
 And all their leaves fast fluttering, all at once
 Nor less composure waits upon the roar
 Of distant floods, or on the softer voice
 Of neighbouring fountain, or of rills that slip
 Through the cleft rock, and chiming as they fall
 Upon loose pebbles, lose themselves at length
 In matted grass, that with a livelier green
 Betrays the secret of their silent course
 Nature inanimate employs sweet sounds
 But animated nature sweeter still,
 To soothe and satisfy the human ear.

Paraphrase these lines very literally.

ORAL EXAMINATION,—ENGLISH.

Examiner,—W. GRAPEL, Esq., M.A.

Soon after Nelson asked him if he did not think there was a signal wanting. Captain Blackwood made answer that he thought the whole fleet seemed very clearly to understand what they were about. These words were scarcely spoken before that signal was made which will be remembered as long as the language, or even the memory of England shall endure—Nelson's last signal—

“ENGLAND EXPECTS EVERY MAN TO DO HIS DUTY!”

It was received throughout the fleet with a shout of answering acclamation, made sublime by the spirit which it

breathed, and the feeling which it expressed. "Now," said Lord Nelson, "I can do no more. We must trust to the Great Disposer of all events and the justice of our cause. I thank God for this great opportunity of doing my duty."
