Perfect copies of her voice ...over an FM wireless network

CRYSTAL-CLEAR! Programs picked up out of the air and rebroadcast—again and again! With no appreciable loss of fidelity! With amazing freedom from static! Perfectly repeated “copies” of the original broadcast!

This is a practical reality. It is the definite promise of the modern FM chain-broadcasting technique for the sectional network of tomorrow. Already this FM technique is proving itself in time-tested daily use over New England's FM American network—with negligible distortion—with FM's amazing freedom from station interference—and with full coverage of the whole audio range of the human ear. . . . All this with no increase in the exceptionally low noise level of FM.

On regular FM wave-lengths, programs originating in New York's WGYN are relayed to Alpine, N. J., Hartford, Conn., the Paxton station near Worcester, Mass.; then picked up and again rebroadcast by stations at both Schenectady, N. Y., and Mt. Washington, N. H. (With the proper equipment, any station in such a network can originate a network program.)

General Electric furnished a substantial portion of the FM equipment for this chain. In fact, G.E. has furnished more than a third of all FM transmitters in America; and a large percentage of the half-million FM receivers.

That FM regional and national network broadcasting will grow rapidly is General Electric's confident prediction. For chain rebroadcasting seems the practical answer to regional FM broadcasts, and General Electric's exclusive S-T relay equipment points the way toward national FM networks. This efficient studio-to-transmitter link permits studio location for maximum convenience and transmitter location for maximum coverage . . . without wires!

A PLAN

that will secure your place in radio broadcasting post-war

General Electric offers you “The G-E Equipment-Reservation Plan”. . . a plan designed to enable you to complete your post-war plans now. It will enable you to establish a post-war priority on a broadcast transmitter and associated equipment. It will enable us to plan definitely for large-scale post-war production, thereby giving you the fastest possible post-war delivery and the savings of planned production. Investigate this plan and assure your place in radio broadcasting post-war. *Electronics Dept., General Electric, Schenectady, N. Y.*

Time in “THE WORLD TODAY” and hear the news direct from the men who see it happen, every evening except Sunday at 6:15 E.W.T. over CBS. On Sunday listen to the G-E “All Girl Orchestra” at 10 P.M. E.W.T. over NBC.

THE ANSWERS TO SPOT PROBLEMS

BUY THESE ELEVEN ESSENTIAL STATIONS IN THE ELEVEN ESSENTIAL MARKETS

Advertising dollars are best spent in *essential* markets—radio efforts are best spent on *essential* stations.

Once you have the facts on these prospect-rich markets . . . the facts on how they are best covered . . . your selection of these eleven stations will become automatic.

Here's why all eleven of these stations are essential to you: (1) they broadcast to 55% of the radio homes in the U.S.; (2) they are in markets whose buying power is 34.2% higher than the country's average.

Call your nearest NBC Spot Sales Office listed below for complete data on audiences, buying habits, coverage, programs, spectacular successes, time available, costs—the answers to your spot problems.

This, the Seventh Edition of
Radio Annual is Dedicated to
the Highly Dramatic part that

R A D I O

is playing in the

MARCH TO
VICTORY

. . . since the coming of war the
tremendous technical strides of this
great industry would stagger the
imagination of the most practical
dreamer of yesterday. However this
is NO TIME for COMPLACENCY nor
the talk of anything but the WINNING
of the WAR. Complete VICTORY
first and then on to the untold possi-
bilities of radio and television that
await a more peaceful world.

PA

laid an egg... A **GOLDEN EGG**.

and hatched it too!

But news innovations for radio are a habit with us.

We created more than just a stir when we produced the first regular 24-hour radio news wire . . . now complete with news summaries every hour . . . real radio features in script form . . . and a dozen other departures that have simplified the handling of news and have made AP news tops for radio.

Then we produced our golden egg.

It was an idea embodying SERVICE . . . Service to Affiliated Stations . . . service that begins where the news wire leaves off.

Well, we pampered it and coaxed it and finally it cracked open. Since then Service to Affiliated Stations has been tumbling out.

The latest is a series of 19 individual "presentations" to assist our stations in the sale of AP Telescript features . . . selling aids that help stations. Still other services will be inaugurated during 1944 because Service to Affiliated Stations now is a definite part of our year-round job.

and that's our golden egg... Hatched!

NEWS... in a New Dimension

NEW S, like music, will always be a mainstay of American broadcasting.

The spot news programs and intelligent commentators are established firmly. But news techniques are not static . . . and never have been. Today, more than ever, there is an unmistakable need for *originality* in the treatment of news . . . for creative, stimulating presentations of the inherent drama in the news.

This is Transradio's objective for 1944.

During the present year Transradio will constantly be developing news programs along lines hitherto untried. The new approach to news will dominate our thinking . . . because these original techniques are inevitable. Listeners want them. Advertisers want them.

News in a new dimension.

It will be created this year, in the form of several outstanding radio presentations, by Transradio. If you are looking for an original news program idea, let us tell you what we are doing.

TRANSRADIO PRESS SERVICE, Inc.

The **WOMAN**

RADIO'S MOST
DRAMATIC
FORWARD-STEP
OF THE YEAR!

**IS THE GREATEST SURE-FIRE RADIO SHOW EVER
OFFERED TO YOU FOR INCREASING YOUR BUSINESS
A BIG NAME TRANSCRIBED HALF HOUR RADIO SHOW
ON A NO MONEY BASIS! WHEN YOU SELL THIS
SHOW YOU MAKE TWO TIME SALES SIMULTANEOUSLY!**

HERE'S THE IDEA OF THE PROGRAM

★ ★ ★ ★ ★ ★ ★ ★ ★ ★
"THE WOMAN" is a half hour transcribed radio show somewhat similar in program format to the "Radio Readers Digest" broadcast each Sunday evening over CBS. As a matter of fact this program is also built around the magazine idea, for the material on the program, is taken from the nationally famous digest magazine of the same name, "THE WOMAN."

The program is nationally publicized in the pages of the magazine every month. Furthermore, the program is pre-sold to the nation's women considering that the material used on the radio show has been read by millions of women throughout the country.

Each program has, in addition to a "guest star" interview between famous personalities from all walks of life, and Lorna Farrell, editor in chief of "THE WOMAN," a series of dramatizations, comments, and other interesting items to the "Women of America." The "guest star" interview spot on the show also has the advantage of fading into a dramatic, or comedy routine, with the guest star playing in that part of the show.

Just think of having these authors for your radio program: Fannie Hurst, Madame Chiang Kai Shek, Kate Smith, Katherine Brush, Vice-President Wallace, Jan Struthers, (author of "Mrs. Minniver") Konrad Bercovici, Wendell Willkie, Mary Margaret McBride, and others of equal fame. Yes these ARE YOUR AUTHORS, for it is the stories and articles that they have written for "THE WOMAN" magazine, that are used on the radio show. Think of having these guest stars on YOUR radio show: Mayor LaGuardia, of New York City, John Boles, famous stage and screen star, the incomparable "Hildegard" star of the NBC "Beat The Band" show, Kate Smith's Emcee Manager, Ted Collins. These are just a few of the great guests that you can expect on the radio show "THE WOMAN." The other programs in the series features more of these great personalities that have already been sold to unprecedented public acceptance.

The program has everything, human interest, comedy, pathos, everything that goes to make a fine radio program. It is the only **BIG RADIO SHOW** built exclusively for "the women of America." Yes it's "THE WOMAN."

Put
The
WOMAN
to work for you NOW!

**NOW AVAILABLE FOR LOCAL SPONSORSHIP IN MANY
MARKETS ON A NEW NO MONEY BASIS WHEREBY YOUR
STATION MAKES TWO TIME SALES SIMULTANEOUSLY
WHEN YOU SELL IT!**

RADIO IN TOTAL WAR AND IN PEACE

JAMES LAWRENCE FLY

*Chairman, Federal Communications
Commission*

RADIO'S VALUE as our most effective medium of mass communication and as a unifying force in time of national emergency was strikingly reaffirmed during the past year. Gearing itself to the demands of total war, American radio reporting has enabled the people at home to know the tragedy, the setbacks, victories and the problems of the battlefield with a completeness and speed undreamed of in World War I. The degree to which the homefront has been mobilized could not have been achieved without the hearty co-operation of the radio industry. For millions of our soldiers here and overseas, deprived of homelife and normal pleasures for warworkers and for the rest of our people at home, the radio continues to be the most readily available source of entertainment.

In view of the nation's need for the very best wartime service that radio can render, it is imperative that the industry increase its efforts wherever possible during the coming year. The tendency already noted in some quarters to yield to the temptation of quick and easy profits at the expense of public service must not become general. In some cases public service programs, particularly educational programs, are being curtailed. Some daytime schedules are crowded with cheap, shoddy dramatics which aggravate, not alleviate, wartime hyper-tension to the exclusion of worthwhile material. This is particularly unfortunate in view of radio's record-breaking earnings during the past year.

In line with its concept of public interest, the Commission in 1943 extended the license period of standard broadcast stations and prohibited multiple ownership of stations in the same service area.

The materials and manpower shortages continued critical during 1943, but in August the Commission was able to report that construction involving the use of idle equipment would be authorized to increase the power of 100-watt local channel stations or to build new low-power channel stations. The Commission also prepared a catalog of surplus and salvageable equipment and a report on idle standard broadcast transmitters. Foreign language broadcasting which as a whole has been invaluable to the war effort was examined as an emergency measure.

With some military experts pointing to a European victory in the coming year, a new challenge confronts radio. The new year must see specific plans completed to develop FM, television and other refinements of the radio art without, at the same time, causing serious dislocations to our present systems of radio broadcasting after the war. The Commission is eager to move ahead with industry in realizing the tremendous gains of war research and I am glad to say that at our November conference held with industry scientists on the Radio Technical Planning Board and representatives of other Government agencies, an encouraging start was made toward solution of some of these difficult problems.

"IN THE SERVICE"

As one of the principal suppliers of vital radio equipment for our armed forces, Press Wireless, Inc., has been "in the service" since Pearl Harbor. Units from Press Wireless factories are now on duty at the fighting fronts throughout the world and on the home front too. Press Wireless is proud of its close relationship with the armed services and pledges continuation of its best efforts toward a final and speedy Victory.

RADIO'S VITAL WARTIME ROLE

By Frank Burke
Editor, RADIO DAILY

RADIO'S paramount interest as we enter 1944 is to aid in the nation's all out effort to win the war and facts and figures gained from government agencies indicate that the industry is doing a magnificent job.

Reports from OWI, Treasury Department, and the radio divisions of the armed forces emphasize that during 1943 radio played a vital part in making the nation war conscious and has more ambitious plans for wartime coverage in 1944.

Coupled with the industry's wartime activities are indications of postwar prosperity with the prospects of television, FM, Radar and facsimile, as commercial developments with the cessation of hostilities.

Tele interests, both in the radio and motion picture fields, are showing activity in their postwar planning and the FM devotees have already set in motion plans for development of frequency modulation. Two organizations, important in the planning, are the Radio Technical Planning Board and the FM Broadcasters, Inc. The RTPB is now preparing recommendations to the Federal Communications Commission and the FMBI is working to make their interests vital in the postwar radio field.

Linked with the industry's growing interest in tele, FM and allied developments are the problems which beset the FCC in the allocation of wave lengths. Recently FCC Chairman Lawrence Fly, speaking before the national FM group, said "FM had become of age" but did not outline any of the commission's plans or views on the subject of allocations.

Flushed with the most profitable year in the history of radio, networks and stations alike enter 1944 with optimism and ambitious planning predicated on the cessation of hostilities and the conversion of the industry to peacetime manufacturing. It is the opinion in some quarters that the postwar development of tele and FM will not come as rapidly as some expect and that it may be from one to two years after the war before the full stride of the postwar boom is reached.

Although postwar prosperity is an absorbing speculative subject, broadcasters

are not allowing their wartime role to be neglected. To the contrary, radio has made amazing contributions to the war effort and right now basks in the spotlight of public service glory as a result of the OWI estimates of the industry's contributions during 1943. These figures, released in Washington on January 31, reveal that the estimated time, talent and other grat's radio services during the past year is valued at \$103,582,000 and that the nets and stations handled a grand total of 3,514,510 wartime messages during the year.

Past year saw a new high reached in the matter of industry relations with FCC and the policies of this governmental agency as pertaining to public and congressional interest. Highlights of these activities were the Supreme Court decision of May 10 which upheld the FCC's network regulatory powers and the White-Wheeler bill hearings to revise and definitely define the Commission's powers under the Communications act. These hearings were concluded late in December and a revised White-Wheeler bill, at this writing, is in the process of being prepared.

Among the major problems which beset the industry during the past year was the AFM ban on recordings. Dating back to August 1, 1942, when the production of musical phonograph records and transcriptions came to a halt in the studios, the strike continued until last November. Then at a WLB panel hearing, Decca and World led the way in affecting a partial settlement of the AFM-recording dispute and resumed making of records. Meanwhile RCA, Victor, Columbia Recording Corp., and the Radio Recording division of NBC, continued their negotiations through the WLB with AFM for a more satisfactory recording contract.

Summing up radio's role in the wartime year of 1943 we conclude the industry may well be proud of its accomplishments. It has taken the inconveniences of wartime operation in stride; achieved unprecedented heights in public service and worked diligently with the Nation in the No. 1 assignment—*winning the war.*

Thanks

To the radio editors of the
United States and Canada.

To my brothers, and the boys
in the band.

To the Roosevelt Hotel.

And to our exclusive agents
and friends, MCA.

Guy Lombardo

U. S. RADIO STATIONS AT WAR

By M. H. Shapiro
Managing Editor, RADIO DAILY

WHEN the Nazi and Jap embroiled the United States into a World War, they took cognizance of unpreparedness, lack of full scale mobilization of production and other resources, and the on-the-fence supporters of the defense program. Entirely overlooked by the enemy was America's great Secret Weapon—Radio. Ability of the Government to quickly and consistently marshal the forces of public indignation after Pearl Harbor, bring about whole-hearted support of the war, maintain the morale of the home front and later back the men at the fighting front with every effort from War Bonds down, was due to radio broadcasting. And it was done in the American way.

Graphic picture of the radio station status, standard, educational or experimental, is revealed below in the following vital nationwide statistics, as of January 1, 1944:

Standard Stations

There were 912 standard broadcast stations—910 in operation and two under construction. Mutual had 217 U. S. affiliates including one FM outlet; Blue Network 174; NBC 143 and CBS 134. Many of the Blue and Mutual affiliates are the same.

* * *

Frequency Modulation

There were 42 high frequency (FM) broadcasting stations licensed and eight under construction, in addition to five temporary Class 11 experimental high frequency broadcast stations also furnishing FM programs. There are 64 pending applications for FM stations.

* * *

Television

Five commercial television broadcast stations were operating at the close of the year, three of which had maintained a minimum program schedule of four hours per week during the year. Five experimental television stations have also provided scheduled program service of two or three hours per week throughout the greater part of the year. Pending are 14 applications for television stations, both commercial and experimental.

* * *

International

Total of 18 international broadcast stations were operating within the United States at the close of the year and 13 point-to-point radio telegraph or telephone transmitters were under special service authorization for international broadcast service.

All international broadcast stations are, of course, programmed by the Office of War Information and the Office of the Coordinator of Inter-American Affairs. These two offices have proposed a total of 36 international transmitters to provide adequately for the needs of psychological warfare. About 20 additional frequencies have been made available for international broadcast service.

* * *

Educational

Five channels are allocated for non-commercial educational broadcast stations adjacent to the commercial FM broadcast band. As of the year-end, seven stations were authorized, compared with eight of the previous year. While these stations have not been subject to wartime restrictions on construction under the FCC's Memorandum Opinion of April 27, 1942, equipment shortages and lack of skilled personnel have served to limit present development.

* * *

Facsimile

Apparently interest in facsimile broadcasting is limited and only three such stations are authorized, a decrease of one from the previous year (1942). Although the rules provide for multiplex transmission of facsimile by high frequency (FM) broadcast stations, no regular FM stations provide this service.

TEN OUTSTANDING RADIO NEWS EVENTS OF 1943

Jan. 19 . . . Cox resolution passes House authorizing sweeping investigation of FCC.

•

May 10 . . . United States Supreme Court in 5-2 opinion upholds right of FCC to regulate radio and declared FCC network monopoly regulations as proper and within Commission's jurisdiction.

•

May 26 . . . First information on Radar released by the Navy divulging war-time value of this electronic weapon.

•

July 30 . . . Edward J. Noble, owner of WMCA, New York, purchased Blue network for \$8,000,000 and FCC approved transfer on Oct. 12.

•

Sept. 24 . . . Recording strike of musicians broken with Decca and World Broadcasting Company agreeing to AFM demands for payment of royalties to the union on each record and ET.

•

Sept. 30 . . . Resignation of Rep. E. E. Cox (Democrat-Ga.) as chairman of the House Select Committee investigating FCC accepted with Rep. Clarence F. Lea (Democrat-Cal.) named to succeed as chairman by Speaker Sam Rayburn.

•

Nov. 3 . . . Lengthy hearings on the White-Wheeler bill launched before the Senate Inter-State Commerce Commission.

•

Nov. 23 . . . FCC ruling banning multiple ownership of standard broadcast stations in the same communities announced.

•

Dec. 17 . . . Census figures released by Office of Civilian Requirements reveals that approximately 32,500,000 American families now have one or more radio sets.

•

Dec. 27 . . . RADIO DAILY'S year-end survey indicates that radio enjoyed the best business during 1943 of any year in the history of broadcasting.

•

Outstanding Broadcasts

- Net's cover of the fall of Mussolini in Italy.
- Edward R. Murrow's broadcast describing the Berlin raid in which he went along as observer.
- Broadcast from an American station in Naples.
- Three-hour soldier-sailor program on NBC, Christmas Day.

"ZIEGFELD FOLLIES"

RADIO IN WAR AND THE FUTURE

By David Sarnoff
President, Radio Corporation of America

RADIO activity in research, engineering, communication and manufacturing during 1943 may be summed up in one objective—win the war! Although wartime secrecy imposes limitations, the end of the year affords appropriate opportunity to gauge radio's vital role in the world today, and to measure the significance of wartime developments as they may fit into the pattern of the future.

Strongly fortified by the ingenuity and skill of American research and industrial enterprise, radio has entered its third year of war in the service of the United States. Years of suspense—a year of defense and a year of offense—have gone into history. As 1944 begins, the United Nations are on the road to Victory. A year of intensified offensive, such as the world has never known, is ahead. Only time can tell, however, whether 1944 is to be the year of decision—the year of unconditional surrender of the forces which have brought destruction and tragedy upon the world.

Breaking All Records

The American radio industry is breaking all records in war production and communication. Daily, 400,000 radio-electro tubes are manufactured. Every hour of the day and night, all America is informed by up-to-the-minute broadcasts on the progress of the war. At the same time, short-wave broadcasters are reaching every land throughout the world regardless of enemy restrictions. Tons and tons of apparatus are sent into combat every week. Miles and miles of transoceanic radiotelegraph circuits are vibrant with urgent dispatches, news and communiques. Messages are flashed by automatic high-speed machines at the rate of 600 words a minute.

Huge Production

Latest estimates reveal that radio production in the United States is up to \$250,000,000 a month against \$30,000,000 a month a year ago—all for the armed services. The equipment is the finest and most efficient in the world. America's radio-electronic scientists and engineers have far surpassed Germany's much vaunted super-men of science.

In fulfilling its unprecedented wartime responsibilities, radio has taken its place among the great industries of America, offering employment to hundreds of thousands of workers. Since the war began in Europe, RCA employees have increased from 23,000 to more than 40,000. Another 6,000 employees are enrolled as officers and enlisted men in the military services. Many of them are in the front line of communications—they straighten, maintain and operate the life-line of Victory.

No Service Disruption

The fact that our civilian radio service is not disrupted during these war years, when all-out effort and materials are directed to winning the war, is high commendation of the quality of American radios as designed for the home. Americans listen to enemy broadcasts without danger of death penalty or imprisonment. All this liberty in wartime is proof of radio's faithful alliance with Democracy and the Freedoms.

Scientifically, the outstanding developments of 1943, as those of 1941-42, are classified as military secrets. It violates no secret, however, to report that outstanding advances have been made in the use of radio sound and sight. Nothing in radio is ever new for long, even in peacetime. War, however, changes the old order of things even more rapidly.

New Peace-Time Services

New instruments and new services are in the offing for peace. The wartime pace that science is called upon to maintain is breath-taking. Nevertheless, American radio keeps up with it. Our laboratories are creative beehives of activity; our manufacturing plants are arsenals; our communication waves are life-lines. To reconvert them all to peaceful pursuits will present a great challenge to the radio industry. It will be a most promising field for post-war employment and opportunity.

Radio as an industry is fortunate to have television as a post-war development of great promise and popular appeal, able to open a new era in service to the public.

RADIO - NAVY MORALE BUILDER

By *J. Harrison Hartley*

Chief, Radio Section, Office of Public Relations, Navy Department

BY THE military, "morale" might be defined as that state of mind—of the nation and the individual—which produces the maximum effort to win the war as quickly as possible.

It is the view of this writer that the broadcasting industry's greatest contribution to the building and maintenance of that kind of morale is its continuance of normal schedules of unbiased news and varied entertainment despite the difficulties presented by the war.

Our bluejackets, Marines and Coast Guardsmen afloat and ashore, and their families at home, uninterruptedly have been able to hear their favorite variety, musical, and dramatic programs. That fact has been more telling, from the standpoint of morale in our country, than all the collected speeches of Dr. Goebbels have been in Naziland. American radio is a living symbol of the America we are fighting for.

Training Camps

This has been proved conclusively by the reaction of thousands of Navy men in the great training camps or temporarily home from the sea. The Fifth Naval District, which, with headquarters at Norfolk, Virginia, encompasses one of the largest areas of Naval activity of all kinds in the world, reports, "Local originations of name shows have been tops as a live audience morale factor. Many SEABEES assert that their spirit of 'Can do!' has been heightened by the many references to the Construction Battalions on important programs."

From the Ninth Naval District, home of the huge Great Lakes Naval Training Station, comes word that, "By bringing their programs to the sailors in training, the sponsors of programs have made available to the men a far higher type of entertainment than otherwise could have been offered on the stages of our auditoriums. Remember, 'boots' get no liberty for the first eight weeks in the service.

"In a different category is the radio program featuring largely Naval personnel. These broadcasts build the morale of both participants and audiences—Bluejackets—Marines and Coast

Guardsmen—and provide an excellent vehicle for the Navy's story in this greatest of all wars."

The West Coast says, "Navy welfare officers out here are unanimous in their praise of visiting radio shows as morale builders. In many cases, these programs play for men about to shove off for combat areas—ease the strain of the break from home shores. Many of the men write home, asking the folks to listen to the same show. The effect on families and men is very good."

Over There

Reaching the Navy, Marines and Coast Guard overseas with popular programs has been a special, noteworthy, joint achievement of the radio industry and the armed forces. Since early in the war, many sponsors contributed recordings which were shipped by the Navy to Dutch Harbor, Alaska, for rebroadcast over a local network of military stations. Through the cold, dreary nights of the North these records brought laughter, comfort, and good cheer—the tie to home.

Since then, and with the active cooperation of the Navy, the Armed Forces Radio Service, Morale Services Division, War Department, has undertaken to supply especially conceived, written, and produced recordings, totaling fourteen hours per week, for the information, education, and orientation of all our fighting men overseas. Some 200 stations, abroad, schedule these transcriptions.

In addition, Armed Forces Radio is providing to the same stations, recordings of popular U. S. sponsored shows, sans commercials, by agreement with the advertisers. These latter programs are aired in combat theatres on schedules closely approximating the regular domestic schedules. This service gives each station an additional twenty-eight hours of programs per week.

A further distribution of both types of recordings is made to Army and Navy hospital ships, other surface vessels, and even submarines.

Home Front

Meanwhile at home, the families of Naval personnel are hearing of their fathers', brothers', sons', and sweet-

"Fibber McGee and Molly"

NINTH YEAR FOR THE MAKERS OF JOHNSON'S WAX

hearts' exploits by means of eye-witness accounts, dramatizations and news commentaries, programmed in to the structure of both sponsored and sustaining shows. Working with the writers and producers of the agencies, networks and local stations are the staffs of the Radio Section of the Office of the Assistant Director of Public Relations, West Coast, Los Angeles, California; the Branch Radio Section, 580 Fifth Avenue, New York; the Radio Officers of District Public Relations Officer, and those on the staffs of the commanders of fleets. All of the male officers of the Radio Sections in Washington and New York have had experience at sea in combat areas in order better to fit them to service writers and producers.

Through their close collaboration with the industry in making available Navy, Marine and Coast Guard stories, Radio Officers have helped keep the public fully informed of the progress of the Naval phases of the war.

The Naval Service therefore needs all of the creative help it can obtain from network, regional and local programs. For reasons of security it is impossible to originate live programs from the Navy in action. Therefore, the newscaster, the writer, the producer, and the radio actor must interpret for the people the courage, determination and great human qualities of the men at sea, all of which greatly affects morale.

Conclusion

1944 may well be the most important in the history of this country. At this momentous time for civilization, the American system of broadcasting, as the result of experience during the last four years, is organized and ready to play its vital part on the winning team—sustaining and building the morale not only of the Army, Navy, Marine Corps and Coast Guard, but also of the home front, the fighting fronts, and of our Allies.

(Continued from Page 45)

RADIO IN WAR AND THE FUTURE -- By David Sarnoff

Television Status

There should be no expectation, however, that when the war ends the air will be transformed over night to television. It will require from three to six months to get the machinery in operation to resume the manufacture of civilian broadcast receivers. It may require a year after approval of standards and full authorization of commercialization of television broadcasting by the Federal Communications Commission before television sets are available within the price range from \$200 to \$300. Production of television receivers is not the only task. Television transmitters must be erected. Interesting programs must be planned. Automatic radio relay stations must be built to link key cities into a network. That is no one-year job.

Alongside of television, "FM," or frequency modulation on ultra-short waves, holds great promise of becoming an added feature in broadcasting. Even now "FM" carries the sound part of television. In both television and "FM," much scientific progress has been made in connection with the application of radio to the war. The home-radio instrument of the future will be a combination television and sound-broadcast receiver incorporating "FM" and phonograph.

Outside the realm of radio communication, the application of radiothermics, or radio heating, is finding widely extended use in industry. The use of high-frequency waves for heating is a wartime development of no small achievement. It is accelerating and increasing the efficiency of numerous industrial processes.

In the Offing

Because of spectacular wartime developments, radio apparatus will be adopted for collision prevention to aircraft, ships, railroads and possibly automobiles. All this will be part of the new service of radio in an era of sight control made possible by the development of electron tubes in the field of microwaves.

As new electron tubes always serve as keys to major advances, so in broadcast reception, new and tiny tubes—smaller than acorns—may introduce "personalized" radio. Small, compact receivers, and even transmitters may be built in a little case that will slip into a pocket. The uses to which such "stations" may be put gives the imagination much to play upon.

All these new developments will not be realized in 1944, but with 1944 as the year of expected decision in the European war, they will date from it, as radio broadcasting dated from 1919.

OWI RADIO PROPAGANDA

By Robert E. Sherwood
Director of the Overseas Branch of the OWI

IN the theaters of war, the nature of the work of the Overseas Branch of the Office of War Information can be stated simply: it is direct propaganda action against the enemy and to the peoples of enemy occupied territory.

In the European theater this action is taken from all available bases—in Great Britain, in the Middle East, in North Africa and now in Sicily and Southern Italy. In South East Asia, the bases are India and Assam. In the Pacific, the bases are China, Australia, Hawaii and Alaska.

Not only must we supply the personnel and the equipment necessary for all bases in which invasions may be mounted; we must be prepared to move properly trained and equipped teams from these bases to the next objectives of invasion.

This happened in Tunisia, and again in Sicily, and again in Italy.

In Italy

For instance: when the first American troops entered Palermo, in Sicily, OWI civilians went with them. One of our men accompanied the troops who seized the Palermos radio station. When they captured the manager of the station, they found in his coat pocket the orders that had been issued to him to destroy this station at the moment of Allied entry into the town. Prompt action had prevented him from carrying out these orders—and within a short time OWI men were broadcasting from this station to the people of Sicily and Southern Italy.

In Palermo—as in all other cities occupied by our troops—OWI men moved in immediately to take over and operate not only the radio stations but all newspaper plants, movie theaters and other means of communication.

We've traveled a long way to Palermo, Bari, Naples and northward.

Only a week before our troops landed in North Africa, the United States Government leased all American short-wave transmitters from NBC, CBS, GE, Crossley Corporation and the World Wide Broadcasting Foundation to unite them into a close-knit hard hitting propaganda battery. At that point, with the exception of a few programs relayed by BBC transmitters, American programs reached listeners directly from our side of the

Atlantic. They performed an important function. But we were still very remote—geographically and in spirit—from our listeners.

New York

We are closer to them today. Fully 25 per cent of the present schedule of 2,600 programs the Overseas Branch beams out of New York each week in 26 languages are picked up by powerful radio stations on and near the European continent for rebroadcast to European audiences. In addition, OWI radio teams in combat areas produce hundreds of programs for direct broadcast to the peoples of Europe. Relay points to audiences in France, Germany, Turkey, the Union of South Africa, Spain and other countries include Tunis, Palermo, Naples, Leopoldville in the Belgian Congo, Gibraltar and Rabat. All through these fourteen months the number of programs rebroadcast by London transmitters has continued to grow. Programs originating in the United States now account for almost 10 per cent of the total number aimed at Europe from the British Isles.

Pacific Coast

On the Pacific Coast, the OWI, broadcasting 694 programs weekly in 24 languages and dialects, has a varied audience—one which is scattered over more than half the world and among two-thirds of the world's population. We are heard in Japan, China, Malaya, Burma, Thailand, India, the East Indies, Australia, New Zealand, the Philippines, the Aleutians and Hawaii.

Looking at results of OWI's worldwide radio propaganda operation, we can honestly say that the men and materials of this organization have made a definite contribution to the brilliant series of victories which our armed forces have won.

On November 22, 1942, General Marshall wrote to Mr. Davis, saying: "the efficiency with which the personnel of the Office of War Information co-operated with the War Department in connection with the operation in North Africa contributed directly toward its success, and is deeply appreciated." On August 30, 1943, General Marshall again wrote to

EDUCATIONAL RADIO - 1944

By Major Harold W. Kent
President, Association for Education by Radio

A SURVEY of educational radio at this point (January, 1944) develops the conclusion that it still has some coming-of-age to do. As an enterprise in the radio field, it has received some support from a few public service-minded commercial broadcasters; some support has been given by the few college stations; some support from contribution to the literature of educational radio; from such organized conferences as the School Broadcast Conference and the Institute for Education by Radio; support from strong though isolated public school centers such as Detroit, Chicago, Cleveland, Akron, Los Angeles County, and Portland; and finally, from and through the membership of the steadily growing Association for Education by Radio (AER).

Teacher Status

To continue the tone of this introduction it might be noted that there are 640,000 teachers at the elementary (Grades 1-8) level and 330,000 teachers working at the high school (Grades 9-12) level. How many of these people have seen a demonstration of the intelligent use of an educational broadcast? Read a description of a good utilization? Seen a manual of a broadcast series? How many of the 28,000 high schools have radio workshops? How many have any kind of central sound equipment? How many teacher colleges have any substantial program of professional radio courses?

Any reply to those questions would be empirical but it can be summed up by saying 'mighty few.' This seemingly is pessimism at its worst. Yet out of this welter of unacquaintance comes the challenge to the people in high places . . . radio educationally-speaking. It means that the Institute for Education by Radio at Columbus, now in its fifteenth year, must redouble its efforts. It is now the accepted rallying point for planners and thinkers in schools, in Government, in commercial radio and in public service to thresh out through sharp accentuated exchanges the views and news of the trade. Among other things, the Evaluation of School Broadcasts was born in the discussion of the Institute. So was the School Broadcast Conference. So was the Association for Education by Radio.

But these proceedings provide but a cue for the production that awaits him who accepts the challenge.

School Broadcast Conference

The School Broadcast Conference in its eighth year at Chicago must rise to meet the challenge. Here is the outstanding "utilization" meeting in the country. Techniques of program use in all fields, at all levels, workshop and school policy are all thoroughly explored in demonstration and discussion. But this meeting must consider ways of implementing the "selling" of educational radio to administrators, supervisors and teachers. It must identify and clarify the schoolroom needs in writing and production peculiar to school use. It must more closely relate radio as an aid to curriculum. It must encourage teacher training programs to utilize the good developed in the fabric of the Conference. Above all, it should, as it has, encourage the development of similar school broadcast conferences all over the United States.

The two meetings as outlined are, however, but meetings. They are not organizations. To fill the need of a link, a continuing organization, the Association for Education by Radio, was organized in May, 1941. It is acknowledging the challenge and is steadily rising to meet it. With a present paid membership of 850 in every one of the 48 States, and Canada; with 10 city and two State chapters; with an eight-issue-a-year journal; 40 meetings at major radio conferences; an information service; a script of the month service in co-operation with the Writers War Board; a book service at 10 per cent discount; an affiliate in the form of Alpha Epsilon Rho, a national college workshop fraternity in six institutions of higher learning; with other activities of national scope joining up—with all these, it will be recognized that the AER is building a sound foundation for subsequent progress. Individual membership is "open to anyone interested in education by radio."

Federal Activity

The Federal Radio Education Committee (FREC) is a small fairly representative group equally divided between education and industry, which publishes the

Red Skelton

Metro-Goldwyn-Mayer

and

"Raleigh" Program—NBC

PREC Bulletin (free) and supplies an information, script and transcription service. This is housed under the U. S. Office of Education auspices in Washington, D. C. One recent activity that merits comment is the listing of educational programs in a monthly bulletin. This fills a definite need in education.

There are certain other educational radio activities that are part of the fabric of this picture. One is a partly private, partly foundation-financed, Rocky Mountain Radio Council. On a regional basis this organization serves commercial and college stations, colleges and universities, with a listing, logging, script and transcription service that is outstanding in the nation.

Station Enterprises

There is important educational and public service enterprise on the commercial stations and networks. Stations WLS, WLW, KOIN, stand out. Among the networks. CBS's American School of the Air and NBC's Inter-American University of the Air are important. They are basic and useful patterns of nationwide interest to educators.

The part that the college station plays in educational radio is tremendous. The National Association of Educational Broadcasters includes about all thirty-five of the college stations remaining on the air. The stalwart job of state and regional coverage that is done by WILL,

WHA, WSUI, WLB, KOAK, again to mention but a few, is a definite contribution to our culture and inheritance.

FM Angles

In Washington the U. S. Office of Education is pushing Frequency Modulation for Education. It is not out of line to predict that not only will another or wider FM spectrum have to be set aside for education but that a television band will have to be so earmarked. Promotion of FM is being pushed with literature and carefully prepared statewide maps showing coverage possibilities by state educational systems.

The AER will probably affiliate with the National Education Association as a member department. Up to now, the AER has more than met the requirements for department admission.

Summer workshops under careful supervision will be a necessary venture. Utilization and equipment with teachers in mind should be the guiding light in organization.

Conclusion

There it is. I believe radio is at the threshold educationally. Equipment trends will do much to steer its course, but intelligence and initiative among educational radio's leaders in setting up Summer workshops, teacher training courses, institutes, literature, and all kinds of helpful promotion will bring this audio aid into its full realization in education.

(Continued from Page 51)

OWI RADIO PROPAGANDA -- By Robert E. Sherwood

Mr. Davis and said: "I desire to express my appreciation to the members of your organization for their excellent work in the field of psychological warfare during the Sicilian campaign."

Psychological Warfare

After the fall of Naples, General Eisenhower sent a cable to the Combined Chiefs of Staff in which he paid very high tribute to the work of the OWI and the other agencies involved in the Psychological Warfare Branch of his headquarters during the campaign in Tunisia and later in Pantelleria and Sicily and then in the invasion of Italy.

The facts support these generous statements from General Marshall and General Eisenhower.

More than eighty per cent of the German and Italian prisoners captured in Sicily confessed they had been influenced and impelled toward surrender by our propaganda.

The Future

There are many holes in the supposedly solid wall of censorship which was built to keep the truth out of Germany, Japan and the conquered countries.

The German press has repeatedly warned its readers not to believe the floods of American "propaganda lies" which are constantly coming into Germany from Switzerland and Sweden. What the Nazis call "lies" are, of course, the truths of this war.

After the surrender of Italy, the Japanese Government radio broadcast to the Japanese people: "There is nothing for us to worry about in the surrender of Italy, but we must rather guard against the propaganda of the enemy. . . . Looking upon Italy, the victim of the exploitation propaganda of the United States of America, I would like to urge our people to solidify our effort further for the prosecution of the war."

Mgt. LOU CLAYTON

RADIO SUPER-BOND SALESMAN

By *Thomas H. Lane*

Director of Advertising, Press and Radio, War Finance Div., Treasury Dept.

THE most important reason that radio has been so successful in promoting and selling War Bonds is that the radio industry looks upon this job as its own. The voluntary efforts of the networks, local stations and radio advertisers are due a large share of the credit for sales of twenty-three billion seven hundred and seventy-two million dollars in War Bonds during the three years that these securities have been marketed to the American people. The all-out voluntary efforts of the radio industry especially are due a large share of the credit for the sale of almost nineteen billion dollars in War Bonds during the Third War Loan Drive in September, 1943.

Millions in Free Time

As an example of the "value" of the radio industry in a War Loan Drive, the monetary value of the local and network radio time given over to promoting and selling War Bonds during the Third War Loan campaign was estimated by the National Association of Broadcasters at \$12,000,000. This estimate, of course, does not include cost of such talent as that of Bing Crosby, Jack Benny, Bob Hope; only a few examples of the leading radio, stage and screen stars who performed time and time again.

Full Network Co-op

As an example, the four major networks (the National Broadcasting Company, the Mutual Broadcasting System, the Columbia Broadcasting System, and the Blue Network) deliver a tremendous proportion of their sustaining programs to the War Bond campaign; molding the scripts and commercials of these network-owned programs to the purpose of increasing War Bond sales without any direction, advice or request from the Treasury Department.

The same thing is true of network commercial programs; programs which are the property of commercial advertisers. In this respect, the commercial sponsor and his advertising agency "go it alone" in regard to reaching the public with what they think is the best War Bond-selling message, from the starting point of the Treasury Department's policy-theme.

Local Station the Keystone

Just as the voluntary effort of the radio industry is one of the keystones in the successful operation of selling War Bonds so is the local radio station the keystone of the radio industry. And the local radio station is doing an unsurpassed job in promoting and selling War Bonds. Here the effort is even more voluntary than with the networks and the commercial sponsors, if possible. The local radio station translates the job of promoting and selling War Bonds into terms of its own community—focusing its War Bond sales efforts on the welfare of local men and women in the uniform of their country and the welfare of the townsfolk in the future days when jobs may be fewer and salaries less than they are now. Once again, the Treasury Department's "direction" of this effort may be summed up in the word theme-policy.

ETs Highly Important

As an example of their usefulness, and the high regard with which radio stations receive Treasury Department transcriptions, seven hundred and ninety-two radio stations regularly broadcast the three Star Parade programs which they receive weekly. Many of these 792 stations broadcast these programs more than once a week. Six hundred and eighty-five radio stations regularly broadcast the Treasury Song Parade programs.

As an example of the entertainment features of these programs, following are a few of the stars who have appeared in these electrical transcriptions: Alfred Lunt and Lynne Fontanne, Paul Whiteman, Orson Welles, Bing Crosby, Conrad Nagle, Fibber McGee & Molly, Fanny Brice, Tommy Dorsey, Elizabeth Bergner, Frank Sinatra.

In addition to the Treasury Star Parade and the Treasury Song Parade electrically transcribed programs, the Treasury further aids the War Bond sales effort of the radio industry via the program The Saturday Night Bandwagon, a dramatic and musical program heard at 10:15 p.m. over the Mutual Broadcasting System network on Saturdays. This program is controlled and directed by the Treasury Department; But the time is given by the MBS network.

RADIO FARM AID OF TOMORROW

By Wallace J. Kadderly

Chief of Radio Service, U. S. Department of Agriculture

A FRIEND of mine recently shaved the whiskers from an old farm gag and put it back in circulation clothed in a diaper.

In the bewhiskered version, a rooster shows the hens of the flock an ostrich egg. He says, "Not complainin', girls; just want you to see what others are doing."

In the diapered version, the flock owner installs a television receiver in the laying house so the hens can "take in" video programs that originate in poultry houses on successful farms. He holds an ax in his hand and says, "Not a threat; just want to see what your competition is doing."

Far-fetched? Of course.

Yet the radio men "in the know" hint broadly that wartime developments in radio, television, and facsimile forecast post-war possibilities that practically stagger the imagination.

Problems Solved

It may be that war-prodded research men have solved the technical problems that once threatened to delay indefinitely the extension of the newer types of radio service to agricultural areas. It may be, too, that economic obstacles to that service can be surmounted readily in the post-war world.

At any rate, the people on the land will need radio in the world of peace as they do in the world of war. The same rural needs that justified the existence of power stations before the war and during the war deserve consideration in the plans for post-war radio service.

And it's not unlikely that those who plan now to meet those rural needs will profit from the service.

New things are happening in agriculture. Farm income during the war has reached a new all-time high.

A lot of this income is necessarily being saved. The savings, plus accumulated wants and needs, guarantee the start of a great post-war market. On some of the very important products—products which have been produced in greater volume at the formal request of the Government—Congress has provided a policy of supporting prices if necessary during the transition from war to peace. But more important still is the fact that farmers are starting now to

do everything possible to produce abundantly and profitably after the war.

Banishing Hunger

Agriculture is proud to have taken the lead in planning for peace. The United Nations Conference on Food and Agriculture in the Spring of 1943 kindled the hope for a world of plenty in the days of peace. Statesmen and scientists from 45 nations pointed out the principles through which it will be possible—for the first time in all the centuries of man—to banish hunger from the earth.

It was natural and logical that agriculture should take the lead in planning for a better world order, for agriculture is fundamental. Of the world's two billion people, nearly two-thirds are farmers. They feed the rest. Farming is the last of all human activities that could be abandoned if the human race is to exist on the earth.

Farmers today are discussing the world of the future as they meet the exacting needs of today. The people's "hired men" in the Government are studying to find the best ways to meet the problems of the future—the problems of markets for farm products, trade arrangements, technology.

Agriculture has a vision—a vision of peace with the plentitude that makes for lasting peace.

And this vision, far from distracting farm front fighters from the immediate job of winning the war, is a powerful incentive to finish the job quickly.

Hand in Hand With Radio

The vision may never be realized. Nobody is naive enough to regard it as a certainty. But few of us are defeatists who believe the world must always be a chaos of boom-and-bust, war-and-armed truce. Those who believe we have a chance to realize the vision—know that food is one of the fundamentals on which peace must be built.

Agriculture has done a magnificent war production job—a job that could not have been done so well without the help of radio.

Agriculture cannot contribute its full share to the building of sound and lasting peace without the service of radio.

Agriculture says to the free radio of America: "Let us go forward together."

U. S. RADIO TO LATIN AMERICA

By John W. G. Ogilvie

Director of Radio, Coordinator of Inter-American Affairs

SHORTWAVE in the United States, during the past eighteen months, has sprung into the dominant position it rightfully deserves and, according to a recent check, leads in popularity in the Latin Countries. Rather than use it as a tool for disseminating propaganda, United States radio, now as in peacetime, is a vehicle for cultural development, entertainment, and information. Latin American audiences have long since learned to discount German and other Axis programs because of the propaganda they carry. In news, for instance, the Latin American has confidence in the radio and press services of the United States and turns to these sources for the true picture of world affairs. In Lima, Peru, 44.1 per cent of the listeners prefer United States shortwave programs, as compared with 4.3 per cent for Germany and the remaining 51.6 per cent being divided between Great Britain and the shortwave stations of the other American Republics.

Reasons for Popularity

The popularity of U. S. radio is due primarily to two reasons first, the strengthening of the shortwave signal through improved facilities and second, the program content and pattern for handling production. Prior to the war, the shortwave transmitters in the United States were used with little regard as to power, clearness of signal or concentration of the signal to a given area. There was no coordination of activities—each broadcaster was independent in his sphere of shortwave operation. Soon after the declaration of war the Government leased the shortwave stations from the owners, added new transmitters, cleared up the signal, integrated the service areas of the stations and set about to do a shortwave signal job—and did it.

Scripts Carefully Chosen

With the beams directed to our neighbors to the south, with the signal cleared and usable, the next step was to produce the type of programs that the Latin audience would want and appreciate. The Coordinator's Office called upon the domestic standard stations for scripts depicting the every phase of American culture, business and everyday life, and received help from stations in all parts of the country. The networks offered

their services and today seven and one-half hours of Spanish language programs are produced on alternative hours by NBC and CBS and broadcast simultaneously over ten transmitters, seven and one-half hours of Portuguese are broadcast over three transmitters, beamed at Brazil and sixteen hours of English are broadcast over three stations from San Francisco. In addition to the regularly scheduled shows particular advantage is taken to have visiting Latin Americans broadcast their own impressions of the United States and during the past years prominent journalists, statesmen, and scientists have been on the shortwave programs.

Special Writers and Producers

Producers and writers from the radio industry in the other Americas have been brought to New York to improve our technique in producing shows and their assistance has played an important note in the success of programs. United States shortwave radio, more perfectly than any other medium, can communicate to our neighbor republics the flavor of our manner and life. It permits them to eavesdrop on our intimate diversions. They have heard us at work in our thunderous industry rolling out fantastic quantities of ships, guns, tanks, bombers, and explosives. They have heard us on manoeuvres and in battle and it is possible that this titanic thunder and crash of production has been so deafening as to obscure the fact that in normal times, in the times that will follow the last roar of the bombers overhead, that we will continue to be their friends in the pursuit of happiness.

Other Activities

Shortwave is only one of the undertakings of the Radio Division of the Coordinator's Office. With eleven specially trained radio field representatives with the radio industry in Latin America, local production has been undertaken which now ranks the highest in audience popularity in their respective countries.

Our obligation in 1944 is to hold the vast audience that has turned to us for radio service and develop new listeners and friends. We can do this by giving the best that we can produce in the field of radio entertainment and information in local productions and transcriptions.

RADIO AND THE 1944 MARKET

By William P. Noble

Vice-President, Walter P. Burn & Associates, Inc.

THE war—with millions of men and women entering the armed services and other millions of civilian workers shifting from their home communities to war centers—has caused, numerically the greatest dislocation of population in our national history. All this has occurred within the space of the past three years.

To Radio, this factor of population shifts presents new problems. Markets must now be evaluated on new interim data, rather than by the yardstick of the last available Census. Many of these markets are still expanding at a rapid rate, some remain static, while others continue to decline in population. The mostly widely used base for all such calculations is the War Ration Book registrations which provide a working basis which estimates the present civilian population for cities, Metropolitan Districts, counties and states. However, these figures must still be translated into families and radio homes in order to complete this picture of radio's potential audience in any given area.

Census Report

Illustrative of just what shifts of population has occurred within the past three years is a recent report of the Bureau of the Census which shows that 449 areas; counties, groups of Metropolitan Counties, independent cities and the District of Columbia, have gained civilian population in the past three years while 120 areas showed a decrease in civilian population. Further that nearly one-third of the 3,071 U. S. counties suffered a loss in civilian population of 15 per cent or more in the past three years.

This in-migration within the United States has had the effect of swelling civilian population where war industry, shipbuilding and mining operations are in operation, and where large military installations and naval posts are located. Roughly speaking, these areas of increased population are mainly located in the Atlantic and Pacific coastal areas, the gulf states, the Great Lakes region and in the mining states of the West. Heaviest losses of population have occurred principally in agricultural areas, most particularly on the Great Plains and in the Mississippi Valley.

More Radio Homes

While our civilian population has declined 2.4 per cent during the last three years, the number of our families, radios basic yardstick, is estimated by the Bureau of the Census to have increased. This seeming paradox is explained by several factors, a principal one being the increased number of marriages during the first wartime years. More families naturally mean more radio homes, so that while we have suffered a civilian population loss, we still have increased the number of radio homes and the number of potential listeners.

Together with the estimated increase in total families is the unquestioned rise in the number of radio homes, for the past few years. Estimates on this increase have been presented year by year by various research methods, but such estimates have been for the United States as a whole, and as such, could not be used for a broadcaster's individual coverage.

RADIO DAILY in this present volume, presents a county by county figure for radio homes, based on the latest War Ration registrations available. These figures have been carefully related to the shift in population for each county and at the same time consideration has been given to the increase in families and radio homes.

A New High

As of 1944, the total number of radio homes in the United States reached the new high total of 31,289,920, reckoned by the method used. This compares to the official U. S. Census figure 1940 of 28,048,219 or an increase 3,241,701 radio homes.

During 1944 shifts in population will undoubtedly continue. These again will be revealed by War Ration Book registrations. However, it is not expected that such severe dislocations of population will occur as in the past three years.

Looking a little further ahead, it is safe to predict that some of the markets, already swollen by the influx of war workers will hold their gains, others will lose thousands when the war ends, and still others which have lost population will gain back some part of their losses.

RADIO CENSORSHIP IN WARTIME

By

J. HAROLD RYAN

President National Association of Broadcasters*

VOLUNTARY censorship is now operating in its third year. It is no longer an experiment. That it has passed the trial stage with so few failures and with so many successes is in no small part due to the spirit of American broadcasters, which is the spirit of the American people.

Since the Office of Censorship was organized, there have been issued to American broadcasters one original and three revised Codes of Wartime Practices. Each new edition has reflected the advantages gained through experience. Each new edition has provided for more liberal treatment of the news than its predecessor, which in brief means that it has been the endeavor of this office to loosen the girth of censorship wherever and whenever the war's progress has made it possible.

Time has found us, then, going by progressive steps from a relatively severe security provision against the release of production information to a liberal one. This progression has been keyed directly to the step-up in our production. As goals were met, there was less and less purpose in keeping the enemy from knowing that a certain plant was manufacturing a certain type of airplane.

The weather clause has been so altered that one can say on the air almost as much as he can say over the back fence. Almost, but not quite. But those early restrictions were necessary, because the enemy was at that time operating more closely to our shores and interception of signals from small stations was not impossible. Furthermore, there was the original necessity, and it remains unaltered, to administer voluntary censorship uniformly, with the requests of this office falling with equal weight on all. It was considered, and we believe wisely, that any policy short of this would be inconsistent and would foster a situation which could not be controlled voluntarily by the broadcasters. No broadcaster to whom this explanation has been made ever denied or opposed its logic.

The conception that voluntary censorship can only be successful if the broadcaster retains control over his microphone has not changed and it would not appear that such a conception should change, so long as we are at war.

One of the gratifying experiences of voluntary censorship in 1943 was written by the foreign language broadcasters. The Government found good purpose in permitting the continuance of foreign language programs on American radio stations. The listeners of such programs have as great reason, if not greater, for desiring the early defeat of our enemies. To them, as to those of us who listen only to English programs, the news of the war's progress is vital. To give them this news, special safeguards had to be established.

Of course the war is not over. It approaches a crisis. And, as the tempo of attack increases, the alertness of our voluntary censors must be even keener. You who perform the function of censorship on American stations fight silently, but surely. A blue pencil can save a battalion. With that certain knowledge, you cannot but live up to the principles of security to which you have been commendably faithful for over two years.

* This article was written for *RADIO ANNUAL* while Mr. Ryan was Assistant Director of Censorship. For complete NAB Section Please Turn to Page 898.

CANADIAN BROADCASTING AT WAR

By *Glen Bannerman*

President, Canadian Association of Broadcasters

1943 ended with Canadian Radio Broadcasting well into its fifth year at war. Looking back over the twelve months of 1943 Canadian Radio was conscious of a just pride in the service it has rendered to a people at war.

Time on the privately-owned stations paid for by the Government of Canada to promote the country's war activities represented approximately 7 per cent of the total revenue from time sales. These same broadcasting stations provided free time which if sold would represent slightly over 16 per cent of their total commercial time sales. To this must be added the free time given by the Canadian Broadcasting Corporation's ten publicly-owned stations and over its network. All of this support was more than doubled by the many programmes which commercial sponsors devoted to government projects.

The Future

While the war is by no means won and the effort must be kept up at top speed there is developing, within the trade, a definite desire to look at the future pattern of radio broadcasting in Canada. Will that pattern become one of state monopoly with its attendant bureaucracy and red tapes or will Canada have a dual system of public and private enterprise competing on equal ground for the favor of the public through service, programs and commercial sponsorships? It is for the Canadian People to say.

Naturally those who today are involved in the operation and development of the privately-owned Broadcasting Stations believe that the pattern of private operation in the United States holds the greatest promise for a free system of broadcasting and the most rapid progress in the art unhampered by government control. True, even our good neighbors have government supervision. Indeed because of its international character Broadcasting in any country must have a limited amount of supervision.

In Canada there is a limited amount of Government ownership, but complete Government control, under the Broadcasting Act of 1938 Broadcasting Stations have no legal rights in relation to the Gov-

ernment. It can take them over at will, paying only the value of the physical equipment at the time of being taken over. The Canadian Broadcasting Corporation, under the act, controls all networks and all use of telephone or telegraph lines for Broadcasting purposes. It may order any private station to take any program it desires. It may tell the private station what advertising it may or may not take and when the private station may and may not play transcription programs. In law the Corporation is ALL POWERFUL and can cancel any contract on a private station to make way for its programs without it or the station having any liability for compensation or damages. In actual practice the Corporation has not, to date, exercised all of its powers.

Conclusion

The present pattern of Broadcasting in Canada appears to restrict rapid new developments, especially in that the Corporation has reserved to itself the rights of Broadcasting by frequency modulation, facsimile and television. Despite this, the private broadcasters are looking to future developments and are devoting some time to the study and development of F.M.

It is generally recognized that Canada, with a population of 11,000,000 people cannot hope to have the same pattern as the United States with its 130,000,000 population. The market does not appear to be of sufficient volume to enable commercial advertising to cover the entire cost of a Broadcasting service to all the people from coast to coast.

It is therefore hoped that sane and wise counsel will result in a dual system of public and privately operated stations and networks being established for the future. Where neither is subservient to the other. If this objective is accomplished there is every reason to expect for Canada a pattern of Broadcasting that offers the greatest possible measure of freedom, of individual station responsibility and enough flexibility to keep pace with the development of the art.

TELEVISION IN WAR AND PEACE

By Gilbert Seldes

CBS Director of Television Programs

TECHNOLOGY in war time goes underground, and the last things to develop are the civilian arts. Everyone knows that great advances have been made in electronics, and that certain devices have proved themselves most effective in spotting Nazi planes or helping to knock off invisible Jap ships. There is a widespread belief that many of these new developments can be adapted to the uses of television, among other things.

Television as we once knew it is beginning to be obsolete. There may be some difference of opinion as to whether it was good enough in 1941 to become a grown-up entertainment medium; but there can be no doubt that technically it needed improvement; and every statement by manufacturers of equipment indicates that vast improvement is available.

Confined, by a shortage of manpower and materials, to a minimum broadcasting schedule during all of 1943, CBS has intensively studied the conditions of a satisfactory television system. The result, oddly enough, is to shift the question from, "When will television come?" to "Where will television come?" or to put it another way, "Where in the spectrum can a reasonably large number of stations find ample room for a clear, large television picture in color?"

High Frequency the Answer

The answer is, in the higher frequency bands where there is room for many stations, instead of a few, where television in color causes no new difficulties, and where television in color causes no new difficulties, and where a normal, healthy and free expansion could reasonably take place.

The promises to the public in the past year have sometimes been rather high-pitched—often in complete disregard of the interlocking difficulties of program techniques and engineering techniques. With the new developments in electronics, the television of the future can transmit far better pictures than was possible in 1941, and by the curtailed program operations made necessary by the war, program techniques have not kept pace with technical developments.

I hope I am not belittling what has been done in the past when I say the future is going to be enormously better. Let us look at the past for a moment. Both abroad and here, the most elaborate programs were remote pickups, participation shows, and big theatrical productions. The first were limited only by the accuracy and capacity of the equipment. If the camera could take a football game late in October, when half of the field was in shadow, and give you a good picture as the ball was kicked from the shadow into the sun and vice versa—then you still have the problem of getting a good picture of this event on your home receiver. But it seems to me that the people who actually handled remote equipment did an extremely good job technically. No doubt in the future we will become as agile as newsreel cameramen—but I hope we never become quite so tricky. Still, the television cameramen knew how to use their instruments to get a whale of a successful picture. (I would put in here also, sport events in the studio, because they "felt" like remotes). In certain ways a prizefight in a studio could be more successfully picked up because you could keep the audience away from two sides of the ring, and so get better shots.

Program Types

With participation shows you can rank all kinds of non-dramatic programs. They range from an engineer or a painter demonstrating a machine or a technique, through the pickup of a small jazz band, and right on to a straight unrehearsed quiz show. In these matters there were various approaches, and while I am partial to our own, the important thing is that everybody made good headway in this department. Television lends itself beautifully to the unexpected, the impromptu, the candid camera, working on the unaffected, the unrehearsed human being. (I hope there will be more boxing cats in the future television also.)

The only real dispute as to programs in television, is in the dramatic field. Here you have British and some American experience insisting that if the problem has not been solved, at least the

ACTIVITIES OF OWI OVERSEAS

A Radio Round-Up of International Operations

THE Overseas Branch of the Office of War Information, beaming out the news of the United Nations at war, completed its 1943 operations on December 31st last with 31 shortwave transmitters encircling the globe from the East and West coasts of the United States.

On the East Coast, in New York City, the Atlantic Operations central studio operation, now nearly completed, is handling more originating programs simultaneously than all four of the major U. S. networks combined. Broadcasting in 26 languages out of New York in a never-changing pattern, one of the most complicated radio network programs in existence is being carried out daily.

From a two studio operation inaugurated in March 1942 the Atlantic operation has grown to sixteen studios, plus nine remote studio feeds from NBC, CBS and others. The total capacity is now 20 input or originating channels, to be fed to 40 output or feed channels.

The recording room in New York is equipped with 14 lathes for cutting air shows as well as special recorded programs for making pressings of programs to be shipped to foreign outposts of the OWI for use on local stations in such places as Australia, Italy, North Africa, etc. In addition there are twenty Memovox recorders for transcription of every broadcast sent to shortwave stations; these are filed for the Government's record.

Atlantic Operations

The Atlantic Operations of OWI Overseas Branch, headquartered in New York City, utilize 21 transmitters operating on European, North European, North African, South African, Central African, Brazilian, East South American, West South American, Mexican, Central American, and Caribbean beams, using 44 frequencies.

The stations are: WGEA, Schenectady; WGEO, Schenectady; WRUL, Boston; WRUS, Boston; WRUW, Boston; WRUA, Boston; WBOS, Boston; WCBX, New York City; WCRC, New York City; WCDA, New York City; WOOW, New York City; WOOC, New York City; WRCA, New York City; WNBI, New

York City; WLWK, Cincinnati; WLWO, Cincinnati; WKRD, New York City; WKRX, New York City; WKLJ, New York City; WKTM, New York City; WKTS, New York City.

Altogether 132 engineers are required to operate the New York studios, recording room, and master control room; in addition, there is a staff of eight for engineering traffic; twelve for studio operations, to schedule facilities and studios; twelve for technical planning. Women are used in all sections—twenty-two of them as radio engineers.

Language schedules from the East Coast include: Albanian, Afrikaans, Arabic, Bulgarian, Czech, Danish, Dutch, Egyptian-Arabic, English, Finnish, Flemish, French, German, Greek, Hungarian, Italian, Norwegian, Persian, Polish, Portuguese, Rumanian, Serbo-Croatian, Spanish, Swedish, Turkish, and Yugoslav.

The volume of shortwave radio traffic which originates with the Atlantic operations in New York City may be seen in December 1943 monthly report. The total number of transmitter quarter-hours usage for the month amounted to 41,003, an average of over 1,300 transmitter quarter-hours per day, involving coordination and use of OWI network facilities. Of this monthly figure, 29,999 transmitter quarter-hours were devoted to the transmission of OWI voice programs, the bulk of which originated with OWI (24,519), the remainder originating at NBC and CBS. Comprising the monthly total also were 712 transmitter quarter-hours devoted to radio-photo transmissions originating in their entirety at OWI, and 10,292 transmitter quarter hours of CIAA programs originating at CBS and NBC. OWI handles all technical traffic and operations for CIAA and Army Forces Radio Services in New York and San Francisco.

Pacific Activities

From San Francisco, the OWI Pacific Operations with ten transmitters on Orient, Australian, Netherlands East Indies and South American beams uses 15 frequencies.

The transmitters are: KGEI, San Francisco; KWID, San Francisco; KWIX, San Francisco; KWV, San Francisco; KWY,

Ralph Edwards'
"T or C"

San Francisco; KWU, San Francisco; KRCA, San Francisco; KES-3, San Francisco; KES-2, San Francisco; KROJ, Los Angeles.

Shortwave programs are broadcast from the West Coast in the following languages and dialects: Amoy, Annamite, Burmese, Cantonese, Dutch, English, French, Japanese, Javanese, Korean, Malayan, Mandarin, Shanghai, Standard Chinese, Thai, Philippine language (10 dialects), a Spanish and Portuguese.

The San Francisco installation will rival that in New York upon completion. There will be 14 studios and a recording installation of 10 lathes. It is obvious that this propaganda effort will grow in importance as the military emphasis increases in the Pacific war theatre. The facilities to handle this activity are being provided in the same manner as a New York, including Master Control Room and all necessary installations of the newest and best design and manufacture.

Truly Cooperative

Transmitters used by the Atlantic and Pacific Operations of the OWI Overseas Branch are owned by the Columbia Broadcasting System, the National Broadcasting Company, World Wide Broadcasting Corporations, General Electric, Associated Broadcasters, Inc., Crosley Corporation, Westinghouse Radio Stations, Inc., American Telephone and Telegraph Co., Press-Wireless, and RCA Communications.

James O. Weldon, Chief of the Bureau of Communications Facilities, is responsible for the design, installations and operation of all radio and communications facilities. In charge of the New York operation, as Mr. Weldon's Assistant, is John R. Sheehan, formerly manager of shortwave stations WGEA and WGEO in Schenectady. The San Francisco operations are headed by F. P. Nelson, Assistant Chief, who was formerly manager of shortwave station WBOS, Boston.

TELEVISION IN WAR AND PEACE -- *By Gilbert Seldes*

Continued From Page 69

rights of direction of movement have been found; and you have another school of thought which believes that up to now the basic problems of dramatic or imaginative or fictional television production are not only far from the solution—the questions themselves have hardly been properly phrased.

Chances are that next year each television studio will more or less proceed as before. This means that we will all try to enlarge our operations, and eventually starting something a little more elaborate than we have done. Those of us who are not in war production are hardly in a position to say that when "cutbacks" occur, vital television material will become available. But if they are, we are all eager to start using our studios, our lights, and our cameras again. There are a lot of things that we can do—we can remind ourselves of all the short cuts and tricks that have been developed in the past, and we can go on to ask ourselves the right questions, and try to find the right answers.

Re Program Departments

It will take about a year to get a good program department functioning. The engineers will need time to absorb into their practice the fundamental changes in electronics. There is a school of thought which is perfectly willing to try to sell the public 1941 television; and

there is another school which apparently will be satisfied with nothing but the television of 1957 or thereabouts. The public should be equally protected against both, because the first is technically incapable of becoming a great medium of entertainment, and the second will unnecessarily delay basically satisfactory television.

New Standards

We believe that a set of new standards, basically simpler than any we have ever had, can now be devised. They will allow television to begin operations shortly after the war, give room for unlimited improvement thereafter, and free us from the constant threat of complete obsolescence which has hung over television from the beginning.

It probably will take some time to move television to its proper position in the spectrum; but it's better to use the time now instead of starting off on the wrong foot again, and making an elaborate apology five years later when we will have a disagreeable alternative; either we ask the public to junk its sets because we are moving to the broadcast band we should have occupied in the first place; or we find that area already allocated to others, and television relegated to a permanently unsatisfactory position in the spectrum, and a permanently second-rate position in the favor of the public.

Radio research has lately set up a lot of new signposts, and lot of people have been thoughtfully thumbing the fresh paint on them. Some were erected by advertisers, some by agencies, some by networks — but they all stem from findings like these . . .

1. Just about the surest way to deliver a message in any market is to use a radio station located within that market . . .

2. Network programs enjoy much higher ratings in markets where there are fewer competing stations.

Since all these varied signposts converge unmistakably on our house, and since they've already led many advertisers to leave inquisitive thumbprints around here, we've bundled the works into a tidy little volume called "Fresh Paint", on which the ink is now drying.

When you get your copy, please apply your own thumbprint to such signboards as this . . .

**MUTUAL IS THE NETWORK WITH THE MOST STATIONS
... LOCATED WHERE PROGRAM RATINGS ARE HIGHEST**

Markets where Mutual has a station but Blue has none . . **138**

Markets where Mutual has a station but NBC has none . . **150**

Markets where Mutual has a station but CBS has none . . **153**

With the war reaching its critical stage, radio broadcasters have a solemn responsibility to report and analyze accurately and fairly the events of the world today.

MUSICAL OPPORTUNITIES IN 1944

By Paul Whiteman

Director of Music, Blue Network

"SOMETHING between a Song and a Symphony!"

Sounds euphonious, doesn't it? Sort of gives you an inkling of our musical quest for 1944—a search for new composers, compositions and ideas which will bring to radio much needed *in-between music—something between a song and a symphony.*

For years I've thought that radio needed some special music, compositions, neither in the popular or

classical categories, but acceptable to devotees of both schools. For example, numbers like "Manhattan Serenade," "Deep Purple" or "Park Avenue Fantasy." "A Holiday for Strings" and "Warsaw Concerto," theme song of our new Hall of Fame show, are written in the same vein.

Original Compositions

So much for the type of new music we are seeking. Next is the problem of getting the composers. In this assignment I sought the counsel of my associates at the Blue network. They enthusiastically endorsed the idea and offered a budget to cover the cost of commissioning writers.

The plan is simple. We will invite the best of the new school of professional composers to submit their original compositions and will commission others to compose works especially for the Blue network. The successful composers will receive contracts. We will pay them for their original compositions and they will control the royalty and publishing rights.

Through the encouraging of profes-

sional composers we hope to find a new library of excellent numbers. These numbers, running from three to five minutes, will represent an entirely new sphere of radio music and we plan to introduce them both over the Blue network and in public concerts.

Tribute to Hollywood Writers

For a long time I have had the feeling that a lot of talented writers are in Hollywood contributing their artistry to the motion picture industry. For the most part this creative writing becomes lost in the dramatic action of present-day pictures and the full beauty of their rhythmic creations are never really appreciated. To this group I intend to make a special appeal for new numbers. I am confident that radio will give full expression to their musical talents.

There's another thought in our musical planning that is worthy of noting at this time. That is the relationship between the composer, publisher, and conductor. I for one feel that the trio is inseparable, entirely dependent on each other for artistic achievement in the musical field. Many lose sight of the artistic and business relationship that should exist. Working in harmony, the composer, publisher and conductor can do much to solidify and enrich the musical sphere.

Conclusion

Getting back to the original theme of this article it is heartening to creative artists to see world-wide acceptance of such a modern composer as Dimitri Shostakovich. His "Second Piano Sonata" and his setting of a sonnet by Shakespeare have been among his most accepted works. Shostakovich's success as a composer is a fine incentive for the new school of composers to whom we direct our message.

SCHENLEY'S GREATER CRESTA BLANCA CARNIVAL

presents

MORTON GOULD *and* ALEC TEMPLETON

These two contemporary geniuses combine their rare talents in a radio program of musical contrasts—color, sparkle, wit and beautiful music . . . as exciting as gorgeous fireworks against a soft midnight sky . . . as satisfying and delightful as a bottle of

CRESTA BLANCA *California* WINES

Morton Gould: Brilliant composer and conductor, American born and American trained, has conducted the New York Philharmonic and Cleveland Orchestras, and has had his compositions performed under the leadership of Toscanini, Stokowski, Reiner, Goossens, Iturbi, Golschmann, Kindler, Rodzinski, Barbirolli and Wallenstein. Among his compositions are The Lincoln Legend, American Symphonette and a Symphony.

Alec Templeton: Eminent concert pianist, graduate of the Royal Academy of Music in London, has toured both Europe and America extensively. He has appeared with the major Symphony orchestras in England and America. A composer in his own right, he has published a large number of works for solo piano, as well as Symphony orchestras, including Rhapsody Harmonic, Concertina Lyric, Insect Suite, Idyll and Sonatine Ballads.

THE CRESTA BLANCA CARNIVAL

You'll make Wednesday your "Evening In" . . . you won't want to miss a single one of these great programs . . . with two stars of first magnitude united in a weekly performance that eclipses all their previous "solo" efforts.

RADIO editors, writers and critics on newspapers and periodicals throughout the United States and Canada took part in the seventh annual poll conducted by RADIO DAILY.

Tabulations were made on the basis of 10 points for each first choice, 9 points for each second choice and proportionately down the line. All figures represent points out of a possible 1200.

Original signed questionnaires as returned by the radio editors and the worksheets used in the tabulation of the votes are carefully preserved by RADIO DAILY. It is regarded as the one authoritative pool of its kind conducted by a radio industry business paper and is presented as a service to the trade which finds it helpful to have a true cross-section of opinion from the nation's radio editors.

(Continued on Following Page)

DATA ON PROGRAM WINNERS

In Radio Daily's Seventh

ANNUAL POLL of RADIO CRITICS

Pepsodent (Bob Hope) Program

Sponsored by Pepsodent Co.; Tuesdays, 10-10:30 p.m., EWT, on NBC network. Agency: Foote, Cone & Belding, Inc. Cast: Bob Hope, Frances Langford, Jerry Colonna, Barbara Jo Allen "Vera Vague," and guests. Orchestra: Stan Kenton.

Grape-Nuts Flakes (Jack Benny) Program

Sponsored by General Foods Corp.; Sundays, 7-7:30 p.m., EWT, on NBC network. Agency: Young & Rubicam, Inc. Cast: Jack Benny, Mary Livingstone, Rochester, Dennis Day and Don Wilson. Orchestra: Phil Harris.

Kraft Music Hall

Sponsored by Kraft Cheese Corp.; Thursdays, 9-9:30 p.m., EWT, on NBC network. Agency: J. Walter Thompson Co. Cast: Bing Crosby, Music Maids and Hal, The Charioteers, Trudy Erwin, Leo "Uke" Sherin and guest stars. Orchestra: John Scott Trotter.

"Information Please"

Sponsored by H. J. Heinz Co.; Mondays, 10:30-11 p.m., EWT, on NBC network. Agency: Maxon, Inc. Cast: Clifton Fadiman, master of ceremonies; Franklin P. Adams, John Kieran, Oscar Levant, Ben Grauer and guests.

Fibber McGee & Molly

Sponsored by S. C. Johnson & Sons, Inc.; Tuesdays, 9:30-10 p.m., EWT, on NBC network. Agency: Needham, Louis & Brorby, Inc. Cast: Marion and Jim Jordan and Ransom Sherman. Orchestra: Billy Mills.

Chase & Sanborn Hour

Sponsored by Standard Brands, Inc.; Sundays, 8-8:30 p.m., EWT, on NBC Network. Agency: J. Walter Thompson Co. Cast: Edgar Bergen (Charlie McCarthy) and guest stars. Orchestra: Ray Noble.

"Duffy's" (Ed Gardner)

Sponsored by Bristol-Myers Co.; Tuesdays, 8:30-9 p.m., EWT, on the Blue network. Agency: Young & Rubicam, Inc. Cast: Ed Gardner, Florence Halop as "Miss Duffy," Charlie Cantor as "Finnegan," Eddie Green and Johnny Johnston and guest stars. Orchestra: Paul Weston.

Lux Radio Theater

Sponsored by Lever Bros. Co.; Mondays, 9-10 p.m., EWT, on CBS network. Agency: J. Walter Thompson Co. Cast: Cecil B. DeMille, producer, and guest stars. Orchestra: Louis Silvers.

"Lower Basin Street"

Sponsored by the Andrew Jergens Co.; Sundays, 9:15-9:45 p.m., EWT, on the Blue network. Agency: Lennen & Mitchell, Inc. Cast: Paul Lavalle orchestra; Milton Cross, Jack McCarthy, Dick Todd and guest stars.

N. Y. Philharmonic-Symphony

Sponsored by United States Rubber Co.; Sundays 3-4:30 p.m., EWT, on CBS network. Agency: Campbell-Ewald Co., Inc. (Eastern Division). New York Philharmonic-Symphony orchestra, Arthur Rodzinski, musical director; guest conductors and guest soloists; Intermission feature, "The American Scriptures," Carl Van Doren and guest stars. Bernard Dudley, announcer.

ride the tide of this national habit....

...the national habit of sta

millions and millions listen
regularly to NBC

Millions and millions of Americans tune every night and day to NBC because they like what they hear. They've made listening *regularly* a regular habit. And no wonder.

the greatest shows in radio
are on NBC

The listener knows where the winners are playing and that's where he keeps his dial. CAB and Hooper surveys consistently find that NBC shows are the nation's choice—have found NBC programs are nine out of the first ten audience rated shows; 15 out of the first 20; 33 out of the first 50 of *all* programs on the air.

it's NBC for "The Parade of Stars"

Year after year, popularity polls conducted by newspapers and trade magazines show that there are far more popular stars on NBC than all the other networks combined.

When an advertiser has a valuable entertainer, he looks for the most valuable audience his money can buy—and that's why more of the nation's favorites are on NBC.

NBC service to the nation
and the public

In fast-changing times, it's frequently important that information reach great masses of people in a hurry. NBC is proud to have contributed hundreds of educational programs and tens of thousands of announcements in the public interest. NBC listeners are among the world's best-informed people.

ng tuned to

NBC

the one best bet—the head
that wears the coronet

Most of the big advertisers learned long ago that NBC is a sound investment. Two-thirds of the advertisers who spent more than half a million dollars last year were on NBC. Since 1926, America's Number One Network has been a best bet for the advertising dollar.

advertisers stick with NBC

When an advertiser goes on NBC, he nearly always stays. Three-fourths of NBC's clients have been on the net-

work from five to fifteen years. More than half have been consistent users of NBC time for more than ten years. Year after year, they renew their lease on this responsive audience, enjoy the good-will and patronage of millions of American consumers.

the world's best-known chimes
identify NBC

Everybody knows NBC's three-toned trade mark. When an advertiser sets his radio program between these familiar harmonies, he can be sure of the advantage of meeting an attentive, receptive and NBC-minded audience from the very start. Millions of listeners in millions of homes, day after day, night after night, supply the proof. A smart editor once said it: "The best-known sequence of sounds on this planet is the NBC chimes."

They all tune to the **National Broadcasting Company**

SHORTWAVE—POST WAR ERA

By *Bernard Estes*

TELEVISION and frequency modulation may be the bright spots in radio's magical future, but there is a more immediate potential in post war radio that offers great possibilities. It is commercial shortwave and international standard broadcast radio.

When the war is over, American capital by the millions of dollars will be invested in the rebuilding of a devastated world. Quickly following this investment of American money will be the rebirth of what will amount to practically virgin markets for American made machinery, clothing and food products.

How can American businessmen quickly build and sell these reborn markets of the world? Shortwave has proven itself as a propaganda media, and only the wording of the script changes the propaganda technique of war to the product selling message of peace.

Selling by Radio

Nowhere in all the world has the art of producing shows that sell been perfected to such a high degree as has been done here in America. With the world's best production facilities at its fingertips and with sufficient personnel available for translating and "pointing" purposes all that remains for immediate contact with a foreign market is the purchase of time for rebroadcast on foreign transmitters which cover the desired market. The show is produced in studios located in, let's say, New York. The facilities of a shortwave transmitter are leased. The show is beamed towards the foreign transmitter and rebroadcast on a standard cycle to the desired market.

This is a simple and practical operation. It is being executed by the OWI several hundreds of times a week presently and under such obstacles as wartime jamming by enemy stations, the quick and sometimes inadequate facilities available on the ever advancing front lines.

Right now there are shortwave transmitters and standard cycle stations that are either located or cover every existing country in Europe and Asia. The peoples within the listening area of these stations will have, during the years of war, heard nothing but news, edicts, propaganda, practically no music other

than military airs and have never received the joys of entertainment through radio. They will be hungry for music, laughter and fun via the airwaves and within the power of American business lies the ability to give these people the kind of radio fare they will want. If they succeed in thus pleasing the people who will and should buy their products then they are entitled to their "commercial" which goes along with the blessing. The history of American radio has proven this point.

Transcriptions

In addition to shortwave for rebroadcast and to ensure perfect reception at all times and reduce the costs of rebroadcasting American produced radio shows for foreign markets without sacrificing the value of our excellence in talent, scripting, direction and production—there is the use of transcriptions. A glance at one of the air map schedules published by some of the U. S. transoceanic airline companies and it is easy to figure the few hours of time that must elapse between the production of a radio show in America and its broadcast on a standard cycle station in Moscow, Berlin, Calcutta or Dakar. It's a sure thing that after this war the commercial airlines will cut existing schedules by several hours.

If there is any doubt as to the effectiveness of this type of broadcasting look at the records of the shortwave division of the Office of War Information, the Coordinator of Inter-American Affairs, the information offices of the Free French, the exiled Polish, Norwegians, the Belgians, the Dutch, etc., and bear in mind that our own Government is shortwaving programs twenty-four hours a day in some seventy-odd languages and dialects seven days a week every week. In addition to this the Army, Navy and Marines are shortwaving top network shows devoid of commercials to our armed forces throughout the world.

Surely, in the face of all the facts set forth herein, no one can deny that American Commercial Shortwave Radio is assured an important place in global economics.

BMI LICENSEES

represent

**98% of the dollar
VOLUME OF THE INDUSTRY**

They are served by

**A Rich and Varied Music
Catalog**

**Basic Indexes and Regular
Supplements**

Copyright Research Service

**Continuities—Over 50 program
units each week for use with

ARMED FORCES RADIO SERVICE

By Lt. Col. Thomas A. H. Lewis
Commanding AFRS

STRETCHING across the world is an American radio network which out-irradiates the dreams of those who foresaw great broadcasting networks crossing and recrossing America. It belongs to the United States, and is operated by the Armed Forces Radio Service for the benefit of men and women in every branch of the armed forces and for their Allies. The AFRS is a Section of the Morale Services Division of the Army.

It was in May, 1942, that I was asked to set up the AFRS. Army officials recognized the need for radio, they knew that through its use it would be possible to educate, inform and orient men overseas by means of special events, news and entertainment. They knew, too, that radio would link men in Alaska, or Australia—on the high seas, beachheads or in jungles—with the homes for which they were fighting.

The initial production of the Armed Forces Radio Service was "Mail Call," a morale-building half hour which brought famed performers to the microphone to sing and gag in the best American manner, and in quick succession other shows were added until, today,—the AFRS is sending out 42 hours a week,—exclusive of news, and such special events as a Rose Bowl game, or a Christmas greeting from the President of the United States.

Highly Skilled Aides

But it was not just a matter of gathering together a group of skilled highly successful officers and enlisted men capable of producing big time radio. As the commanding officer of the AFRS I was able, through Army channels, to obtain the services of such men as Major True Boardman, Major Mann Holliner, Captain Tom McKnight,—also Sergeants Jerry Lawrence, Bill Danch, and Richard Hall, Corporal Bob Welch and Private First Class Bill Morrow,—men who had helped write or produce shows for Bob Hope, Jack Benny, Fibber McGee and

Molly, Silver Theatre—and the other "top" broadcasts.

The services of Major Meredith Willson were obtained to head the Music Section, while Major Irving Fogel, and Captains Carter Hermann and Martin Work undertook the more technical problems or transcription and distribution.

Too, through the Hollywood Victory Committee it was possible to ask for the gratis services of the greatest stars in the radio, motion pictures and theatre world. Bob Hope said—"Sure, any time," Crosby echoed that sentiment, Judy Garland and Dinah Shore, Fibber McGee and Molly, Kay Kyser, Ginny Simms, Lena Horne, Carmen Miranda, Rochester and Charlie McCarthy—the list of talent includes everybody—or so close to everybody that the few who haven't been anxious to do their share aren't missed. The name bands, all of them, have been willing to throw their stuff into the groove any time, and men and women from the concert and opera field, Iturbi, Menuhin, John Charles Thomas and the rest, have spent hours recording material that could be retranscribed for such shows as "Great Music," or perhaps "Music for Sunday."

"Denatured" Commercials

In addition to the 14 hours of specially produced Army shows the Armed Forces Radio Service releases 28 hours of "denatured" commercial shows chosen from the country's top-ranking broadcasts. The best radio entertainment in the world is produced by American commercial radio, and listening to the same type of show they heard when they lived on Main Street supplies men overseas with a tie that keeps them always conscious of the home and home land for which they are fighting. These de-commercialized programs are a gracious contribution from sponsors who allowed the advertising to be cut and the show retranscribed, also from the writer, musicians and players.

So much for the 106 programs that go

☆ ☆ ☆ Radio On To Victory ☆ ☆ ☆

overseas each week. The specially written AFRS shows subtly educate, inform and orient; the de-commercialized help build morale,—but all of them entertain. Those who command the Armed Forces Radio Service are well aware that radio has to be entertaining—or men either swing the dial to something else or snap it off.

Music Libraries Shipped

Another service which has been developed by the Program Section of the AFRS is the basic music library which is shipped to each station, and to which new recordings are added each month. There is also a script service, and this, with the music library as a background, allows men overseas to build their own local shows.

The building of suitable AFRS programs was not “easy,” but it was simple when compared with the problem of distribution.

The first channel considered was short-wave, and it was realized at once, that all programs would have to be transcribed.

The very first casual survey showed that facilities for producing AFRS transcriptions were inadequate. The industry was concentrated in three cities, and pretty much limited to spot recordings, and an occasional recorded commercial series, generally supplementing a “live” program produced by a major advertiser on a network. An order of one or two thousand transcriptions was “very big,” yet it was visioned, at once, that the AFRS might be sending twenty or thirty thousand transcriptions a month.

Production Up 500 Per Cent

But in spite of the fact that there were not enough materials, and that manpower for the job was lacking, the industry set to work, and between January and December, 1943, the number of radio transcriptions produced by the AFRS increased 500 per cent. Last year, 218,557 transcriptions were manufactured, and distributed to over 300 outlets in 47 countries.

In the beginning these transcriptions were sent to men overseas by means of short-wave, but it soon became apparent that this would not reach all service men and women. Too, when the AFRS was first started, there were no regular “time blocks” available. Since then, starting in December, 1943, the Armed Forces Radio Service has been granted regular short-wave time blocks, and is broadcasting on regular schedule, so that men in specific areas can look forward to hearing programs at specific times. This service not only beams the 42 hours of AFRS transcribed programs, but voices

Army news at regular times, also sport-casts and special events.

Int'l ET “Network”

Side by side with short-wave the AFRS has developed an international transcription “network” made up of local radio stations. Negotiations were concluded for the use of time on 59 foreign government and commercial stations located, among other places, in Australia, New Zealand, Alaska, the Middle East, China, India and South Africa. Too, because the need for them was so apparent, the AFRS secured the approval and the funds necessary to erect American Expeditionary Stations overseas. In March, 1943, a thousand watt transmitter went into operation in Casablanca, and shortly after stations were installed in Northern Africa, then Sicily, and, six days after its capture, in Naples. From this start the American Expeditionary Stations have spread across the world. Some are small, of the 50 watt variety, and there is one of 5,000 watts. The 50 watt transmitters are portable, can be packed into five suit cases, and moved up with the troops.

Still another type of AFRS installation is the “sound systems” which have been placed at isolated posts where men are on duty. These “sound installations” are wired units with turntables and sound outlets.

In order to facilitate the shipping of the weekly 42 hours of recordings, overseas stations have been arranged in circuits, of from three to five stations. A week is allowed for the playing of the records, a week for them to travel via air to the next. When the circuit is completed the records are either kept as a backlog, or given to the Navy for use on submarines or surface ships.

Steady Progress

The progress of the Armed Forces Radio Service has been steady. At this time, 37,400 transcriptions are being broadcast each month over 67 American Expeditionary Stations; 140 foreign government and commercial stations; 121 sound systems, and on troop transports and hospital ships. Exclusive of the 515 hours of shortwave broadcasting, the AFRS overseas radio schedule totals nearly 2,500 broadcast hours each week.

What the broadcasts sent out by the AFRS mean to men and women overseas can be imagined. To a fellow who has spent months guarding an outpost in the South Seas, Iceland or Africa a cheery greeting from a favorite comedian, a song hit direct from Broadway, or the beating rhythm of a hot band, mean a tie with the home to which he hopes soon to return.

'Horseshoe nails'

Benjamin Franklin drew lightning from heaven down a kite-string. He also wrote common sense.

He once wrote (in Poor Richard's Almanac) a jingle, which ran, somewhat prophetically, as follows:

*For want of a nail the shoe was lost,
For want of a shoe the horse was lost,
For want of a horse the rider was lost,
For want of a rider the battle was lost,
For want of a battle the kingdom was lost —
And all for the want of a horseshoe nail.*

1944

Victories are made only by battles.

Battles are made only by soldiers and sailors with food and equipment.

Food and equipment are produced only by men and women civilians with a common understanding of the fact that neither victories nor battles can be won without food and equipment for the soldiers and sailors, and a fixed and uniform loyalty to those men.

That common loyalty is made up wholly of individuals who accept and pursue ideas.

Ideas are most swiftly, widely and penetratingly dispensed by radio (or lightning from heaven)

and.....

Since December 7, 1941, when it became apparent that we might not even survive, let alone win a victory, radio has broadcast those ideas, in the following tempo:

In the first two years of war (December 7, 1941 to December 7, 1943) a single American radio network (CBS) broadcast the following "horseshoe nails:"

OF WAR PROGRAMS 14,759:

of these 8,404 were volunteered by the American business enterprises who advertise their goods and services on the CBS air, and 6,355 were volunteered by the network itself.

OF WAR ANNOUNCEMENTS 6,410:

of these 1,699 were volunteered by the network, and 4,711 were broadcast on the time and at the whole expense of CBS advertisers.

OF WAR NEWS BROADCASTS 11,053:

of these, 6,212 were the objective public-information service of the network, and 4,841 were equally objective CBS News originations sponsored by advertisers.

THE TOTAL of this CBS War Broadcasting is pretty formidable. It adds up to 5,699 hours. It adds up to 41% of the total of network operating hours. The whole dollar-and-manpower cost of this effort was a voluntary contribution by American industry through CBS to the single major objective that lies still before us all.

Through 1944 this tempo will not be relaxed.

And whenever peace comes, there will be plenty of new horseshoe nails for the plowhorse, as there have been for the charger.

THE BUSINESS SIDE OF RADIO

By *M. H. Shapiro*
Managing Editor, *RADIO DAILY*

AS an industry among industries, broadcasting during 1943, continued in the rare category of contributing every possible effort to winning the war, yet managing to carry on its own business pretty much as usual. In fact, the "usual" is somewhat of an understatement, since gross billings of both network and spot business showed an over-all increase of approximately 21 per cent. It is to be expected that actual net profit will not be higher in many cases, due to increased Federal taxes.

Of the major networks, it was inevitable that the Blue and Mutual show particularly strong upturn in the gross revenue; both had an influx of new blood and capital and they had more choice time situations available. Thus the Blue ended the year with a gross billing of \$24,869,948, comparing with \$15,782,943 for 1942. Food and Food Beverages led the industry groups in point of expenditures. Mutual gross billings were set down as \$13,841,608, a 43.6 per cent increase over 1942. Religion accounts exceeded that of any other group of clients.

CBS gross revenue for 1943 was \$57,951,744, comparing with \$45,593,125 in 1942. Drug and Toilet Goods headed the industry classification in point of expenditures. This all-time high for a single network's 12-month billings, exceeds the combined total of three major networks in operation a decade ago. NBC, while adhering to its policy of not making public its billings, does admit to a 15 per cent increase in business, which would indicate a gross during 1943 of approximately \$54,000,000. This gives the four national networks gross billings of \$150,663,300. All of which was achieved by diligent application to acquiring clients new to radio and promoting institutional advertising from others now engaged wholly or in part in war work.

Regional and Spot

Regional networks showed strong gains in every part of the country, averaging a 15 per cent gain in most cases. Spot business was unusually healthy; only a few local places failed to show financial betterment. Choice spots were at a premium in desirable markets and an important spurt in motion picture advertis-

ing was noticeably felt throughout the country. We now hear full 15-minute newspots sponsored by leading movie firms at 11 p.m., and some have been forced to take the midnight five-minute new periods. This is just one illustration.

Luxury commodity buying and the drive into secondary markets by many accounts further bolstered spot business all along the line. Non-national network and local business is estimated to have grossed several millions of dollars more than the national network gross, which is usually expected. This still gives the entire industry a net time sale well over the \$230,000,000 mark.

Wartime Problems

Radio has its wartime problems, plenty of them, but whether contingent on advertising or market situation, labor unions or the general manpower shortage, the trend was always forward. Spot was seriously threatened for some time by the demands of the AFM and while not settled in some quarters, the dispute failed to deter the spot business upward curve. Syndicated sales of material made prior to the recording ban continued at a strong pace. With or without transcribed music, this field flourished. Radio continued to adjust itself to every problem.

FCC's new chain rules and regulations went into effect, causing some dislocation in many quarters and possibly relief in some, yet it appears that the dislocations offset that of the "relief." Broadcasting industry, unlike other great wheels in the life of the everyday American, was fortunate in not having to "convert" to the war effort. It was already backing the national defense move to the hilt. It will have no postwar conversion period to look forward to, at least not of its own, but possibly being a party to those that may come from without.

However, the forward march of the gross during wartime is healthy and there is no reason to believe that a sudden cessation of hostilities will cause any upheaval in the industry. As, for instance, brand names being kept alive now will obviously need advertising when the brands in question have returned to the shelves.

This agency brings to the sale of talent and production of radio programs an expertness resulting from twelve years of specialization in the radio industry.

To American broadcasters, station managers and station personnel:

For your outstanding success in building America's greatest radio audience in 1943—the year when Americans most needed the good-fellowship and unifying influence of radio

For your resourcefulness and co-operation in promoting listenership through live and recorded courtesy announcements, billboards, car and taxi cards, newspaper spotlight advertisements, movie trailers, point-of-sale merchandising, dealer letters, direct mail, window displays, posters, spectaculars

For your faithfulness to the finest traditions of radio in showmanship and in public service

Mexico's BIG FOUR

Four leading activities of Mexican life busy as never before do their part in creating an optimistic spirit towards a forthcoming Victory. Twenty million people below the Rio Grande work hard at these active

sources of production. A population standing for one of the most important markets in Latin America. Radio advertising through our network of more than 75 stations assures a perfect coverage of this market.

WE HANDLE

85% of the money spent in Mexico in radio advertising.

90% of the recorded programs produced in Mexico.

90% of the telephone hook-ups.

70% of the spot announcements.

*When a problem arises in your business
and you need competent advice you consult*

A SPECIALIST

How is one designated a specialist?

Through years of experience and practice
with other people's problems and headaches.

That is what we have been doing for the
past twenty-five years—working out other
people's problems and relieving their headaches

IN PRINTING

Why not let us diagnose your printing problem
and maybe we can relieve you of a headache?

We are specialists in handling trade publications,
house organs, year books and catalogs.

Our prescription might be the cure
for your printing ills.

PUSH BACK THE

LOOK at New England as a whole — not just a part of it. The real potentialities of the New England market can be largely wasted if you try to cover too much area with two or three stations.

By taking the broad view, by bringing into focus all the cities of New England and their trading zones, it becomes apparent that you need a network to sell New England as a unit.

There is but one network that will do this job — do it thoroughly by giving you the right stations in the twenty-one places where you need the impact of primary coverage.

Add these twenty-one Yankee stations together, with their local acceptance based on long standing success and the friendship and support of their communities — the result is all-over primary coverage of New England.

Yankee's twenty-one stations bring all markets within your reach in the only way they can be reached by radio.

F. C. C. REGULATIONS REGARDING BROADCASTING APPLICATIONS

As of January 1, 1944

PLACE of filing; number of copies. Each application for construction permit or station license, and all papers incorporated therein and made a part thereof, with respect to the number of copies and place of filing, shall be submitted as follows:

Three copies direct to Washington, D. C.

Contents. Each application shall be specific with regard to frequency or frequencies, power, hours of operation, equipment, location of the station, and other information required by the application forms. An application for broadcast facilities in the band 550 kilocycles to 1600 kilocycles shall be limited to one specific frequency. An application for radio station construction permit or license requesting alternate facilities will not be accepted.

Full disclosures. Each application shall contain full and complete disclosures with regard to the real party or parties in interest, and their legal, technical, financial and other qualifications, and as to all matters and things required to be disclosed by the application forms.

Additional statements. In addition the Commission may require an applicant to submit such documents and written statements of fact, under oath, as in its judgment may be necessary.

Installation or removal of apparatus. Applications for construction permit or modification thereof, involving removal of existing transmitting apparatus and/or installation of new transmitting apparatus, shall be filed at least sixty days prior to the contemplated removal and/or installation.

Forfeiture of construction permits: extensions of time.—(a) A construction permit shall be automatically forfeited if the station is not ready for operation within the time specified therein or within such further time as the Commission may have allowed for completion, and a notation of the forfeiture of any construction permit under this provision will be placed in the records of the Commission as of the expiration date.

(b) Any application (FCC Form No. 701) for extension of time within which to construct a station shall be filed at least thirty days prior to the expiration date of such permit if the facts supporting such application for extension are known to the applicant in time to permit such filing. In other cases such applications will be accepted upon a showing satisfactory to the Commission of sufficient reasons for filing within less than thirty days prior to the expiration date. Such applications will be granted upon a specific and detailed showing that the failure to complete was due to causes not under the control of the grantee, or upon a specific and detailed showing of other matters sufficient to justify the extension.

License following construction permit. In all cases where a construction permit is required by Section 319 of the Act for the construction of a station, the application for station license (or for station license or modification thereof, if for station other than broadcast) shall be filed by permittee prior to service or program tests.

Where construction permit not required. Each application for new license, except amateur, where a construction permit is not a prerequisite thereto, shall be filed at least sixty days prior to the contemplated operation of the station: *Provided, however,* That in emergency and for good cause shown, the Commission may waive the requirements of this rule.

Modification of license. An application for modification of license, except amateur, and except as otherwise provided by these rules, may be filed for change in frequency, change in operating power where no construction is necessary, change in hours of operation, and for change in name of licensee where no change in ownership or control is involved. In case of a broadcast station, an application for modification of license may be filed for change in location of main studio. In case of all stations other than broadcast, an application for modification of license may be filed for change in points of communication, change in nature of authorized service,

and to cover an outstanding construction permit where the station is already licensed. Except when filed to cover construction permit, each application for modification of license shall be filed at least sixty days prior to the contemplated modification of license; *Provided, however*, that in emergencies and for good cause shown, the requirements hereof may be waived in so far as time for filing is concerned.

Renewal of license. Unless otherwise directed by the Commission, each application for renewal of license shall be filed at least sixty days prior to the expiration date of the license sought to be renewed. No application for renewal of license of a standard broadcast station will be considered unless there is on file with the Commission, the balance sheet and income statement currently required by the rules of practice and procedure of the Commission, reference to which by date and file number shall be included in the application.

Financial statements. Each licensee of a standard broadcast station shall file with the Commission on or before March 1 of each year on such forms as may be prescribed by the Commission, a balance sheet showing the financial condition of a licensee as of December 31 of the preceding year and an income statement for the preceding calendar year. Each such form shall be subscribed and verified by: (1) the parties or party filing the statement; (2) in the case of a corporation, an officer of the corporation. (An attorney for either is allowed with sufficient reason.)

Filing directed by Commission. Whenever the Commission regards an application for a renewal of license as essential to the proper conduct of a hearing or investigation, and specifically directs that it be filed by a certain date, such application shall be filed within the time thus specified. If the licensee fails to file such application within the prescribed time, the hearing or investigation shall proceed as if such renewal application had been received.

Temporary extension of station licenses. Where there is pending before the Commission any application, investigation, or proceeding which, after hearing might lead to or make necessary the modification of, revocation of, or the refusal to renew an existing license, the Commis-

sion may, in its discretion, grant a temporary extension of such license; *Provided, however*, That no such temporary extension shall be construed as a finding by the Commission that the operation of any radio station thereunder will serve public interest, convenience, and necessity beyond the express terms of such temporary extension of license; *And providea further*, That such temporary extension of license will in no wise affect or limit the action of the Commission with respect to any pending application or proceeding.

Assignment or transfer of control. (a) General. An application for consent to assignment of a construction permit or license, or for consent to transfer of control of a corporation holding a construction permit or license, shall be filed with the Commission at least sixty days prior to the contemplated effective date of assignment or transfer of control. If the assignment or transfer is voluntary, the appropriate application shall be fully executed by all parties and, if involuntary, by assignee or transferee only.

(b) *Broadcast.* With each such application, involving any standard broadcast station construction permit or license, there shall be submitted under oath or affirmation all information required to be disclosed by the application forms prescribed by the Commission, together with such other information under oath or affirmation as the Commission may require.

(c) *Other than broadcast.* In all classes of applications for consent to assignment of construction permit or license or for consent to transfer of control of a corporation holding a construction permit or license, other than those prescribed in paragraph (b), the Commission may require the furnishing of such information as in its discretion is deemed necessary.

Special temporary authorizations. (a) Special temporary authority may be granted for the operation of a station for a limited time, or in a manner and to an extent or for service other or beyond that authorized in an existing license upon proper application therefor; *Provided, however*, That no such request will be considered unless:

1. It is received by the Commission at least ten days previous to the date of proposed operation: *Provided, however*, That any such request received within less than

ten days may be accepted upon due showing of sufficient reasons for the delay in submitting such request.

2. Full particulars as to the purpose for which the request is made are stated.

(b) If the request is for operation of a standard broadcast station, the following additional requirements shall apply:

1. No such authority may be granted to a person other than the licensee of an existing standard broadcast station.

2. The request shall be limited to a definite or temporary period or periods for the transmission of programs or events which are not recurrent, and approval thereof will not be granted for a period in excess of thirty days.

3. The request shall show that it has been seasonably submitted to other stations whose operations may be affected (to be determined as indicated below), and the date on which such request was so submitted, which such stations shall submit direct to the Commission waiver of objection to the granting thereof or a statement of the nature of any objections that such stations may desire to interpose:

4. If the request is for operation upon a clear channel, showing required above shall be made with respect to the Class I station or stations on the channel.

5. If the request is made by time sharing station, the showing required above shall be made with respect to the station or stations with which time is shared.

6. In any case, the showing required above must be made with respect to any station on the same or adjacent channels when any such station is located within the interference range of the station making the request to be determined by the "Standards of Good Engineering Practice Concerning Standard Broadcast Stations."

7. Waiver of objections, or statement of objections, when furnished under this rule, shall be forwarded direct to the Commission by the responding station, and in the case of waiver shall show whether the waiver covers simultaneous operation or whether the station is giving up the time sought by the applicant. Where it appears that the proposed operation has been seasonably submitted to the station or stations referred to in sub-paragraphs (4), (5), and (6), above, and no reply has been received, it will be considered that such stations have waived any objections to the granting of the request.

Special Service Authorizations. Special Service Authority may be issued to the licensee of a radio station for a service other or beyond that authorized in its

existing license for a period not exceeding that of its existing license upon proper application therefor*; and satisfactory showing in regard to the following, among others:

(a) That the requested operation may not be granted on a regular basis under the existing rules governing the operation of standard broadcast stations;

(b) That in the event the application is on behalf of a standard broadcast station that experimental operation is not involved as provided for by Part 3, Section 3.22, of the Rules and Regulations;

(c) That public interest, convenience, and necessity will be served by the authorization requested.

Inconsistent or conflicting applications. When an applicant has an application pending and undecided, no other inconsistent or conflicting application filed by the same applicant, his successor or assignee, or on behalf or for the benefit of said applicant, will be accepted for consideration.

Multiple applications; broadcast service. In the broadcast service, while there is one application for new or additional facilities pending for a standard, international, television, facsimile, high frequency or experimental broadcast station, the Commission will not consider another application for new or additional facilities for a station of the same class (as given above) to serve in whole or in part the same area, by the same applicant or by his successor or assignee, or on behalf or for the benefit of the original parties in interest. Two such applications may not be filed simultaneously.

Repetitious applications. (a) *Broadcast services.* In the broadcast service, where an applicant has been afforded an opportunity to be heard with respect to a particular application for a new standard, international, television, facsimile, high frequency, or developmental broadcast station, or for an extension or enlargement of existing service or facilities, and the Commission has, after hearing or default, denied the application or dismissed it with prejudice, the Commission will not consider another application for a station of the same class (as given above) to serve in whole or in part the same area, by the same applicant or his successor or assignee, or on behalf of or for the benefit of the original parties in interest, until after the lapse of twelve months from the effective date of the Commission's order.

* Applications for authorizations to use frequencies assigned to the international broadcast service may be made on an informal basis; formal application must be made for other authorizations.

(b) *Other radio services.* In any other radio service, where an applicant has been afforded an opportunity to be heard with respect to a particular application for a new station, or for an extension or enlargement of service or facilities, and the Commission has, after hearing or default, denied the application or dismissed it with prejudice, the Commission will not consider a like application involving service of the same kind to the same area by the same applicant, or by his successor or assignee, or on behalf of or for the benefit of the original parties in interest, until after the lapse of twelve months from the effective date of the Commission's order: Provided, however, That the Commission may waive the requirements of this rule in situations affecting safety of life or property.

Pending appeals. Where an appeal has been taken from the action of the Commission in denying a particular applicant another application for the same class of broadcast station and for the same area, in whole or in part, filed by the same applicant or by his successor or assignee, or on behalf or for the benefit of the original parties in interest, will not be considered until the final disposition of such appeal.

Action on Applications

Partial grants. Where any application is granted in part, or with any privileges, terms, or conditions other than those requested, without a hearing thereon, the action of the Commission shall be considered as granting such application unless the applicant shall, within twenty days from the date on which public announcement of such grant is made, or from its effective date if a later date is specified, file with the Commission a written request for a hearing with respect to the part, or with respect to the privileges, terms, or conditions, not granted. Upon receipt of such request, the Commission will vacate its original action upon the application and set the application for hearing in the same manner as other applications are set for hearing, and the applicant and other parties in interest will be notified thereof.

Designation for hearing. In cases where an application for radio facilities is proper upon its face but the Commission is unable to determine upon examination of the same that the granting of such application either in whole or in part, would serve public interest, con-

venience or necessity, the Commission will designate the same for hearing and the following procedure will govern it:

(a) The Secretary shall forthwith mail a written notice to the applicant setting forth the action of the Commission designating the application for hearing, together with such statement of the Commission's reasons therefor as shall be appropriate to the nature of the application.

(b) In order to avail himself of the opportunity to be heard the applicant in person or by his attorney shall, within fifteen days of the mailing of the notice of designation for hearing by the Secretary, file with the Commission a written appearance stating that he will appear and present evidence on the issues specified in the statement of reasons furnished by the Commission on such date as may be fixed for the hearing. In cases other than standard broadcast, high frequency broadcast, international broadcast and television, the applicant^o will accompany his appearance with an additional copy of his application and supporting documents.

Answers to Notices of Violation

Under Title III of the Act. Any licensee receiving official notice of a violation of the terms of the Communications Act of 1934, any legislative act, Executive Order, treaty to which the United States is a party, or the Rules and Regulations of the Federal Communications Commission, shall, within three days from such receipt, send a written answer direct to the Federal Communications Commission at Washington, D. C., and a copy thereof to the office of the Commission originating the official notice when the originating office is other than the office of the Commission in Washington, D. C.; *Provided, however,* That if an answer cannot be sent nor an acknowledgment made within such three-day period by reason of illness or other unavoidable circumstances, acknowledgment and answer shall be made at the earliest practicable date with a satisfactory explanation of the delay. The answer to each notice shall be complete in itself and shall not be abbreviated by reference to other communications or answers to other notices. If the notice relates to some violation that may be due to the physical or electrical characteristics of transmitting apparatus, the answer shall state fully what steps, if any, are taken to prevent future violations,

and if any new apparatus is to be installed, the date such apparatus was ordered, the name of the manufacturer, and promised date of delivery. If the installation of such apparatus requires a construction permit, the file number of the application shall be given, or if a file number has not been assigned by the Commission, such identification as will permit of ready reference. If the notice of violation relates to some lack of attention or improper operation of the transmitter, the name and license number of the operator in charge shall be given.

Revocation and Modification of Station Licenses

Revocation. Whenever the Commission shall institute a revocation proceeding against the holder of any radio station construction permit or license under Section 312 (a), it shall initiate said proceeding by serving upon said licensee an order of revocation effective not less than fifteen days after written notice thereof is given the licensee. The order of revocation shall contain a statement of the grounds and reasons for such proposed revocation and a notice of the licensee's right to be heard by filing with the Commission a written request for hearing within fifteen days after receipt of said order. Upon the filing of such written request for hearing by said licensee the order of revocation shall stand suspended and the Commission will set a time and place for hearing and shall give the licensee and other interested parties notice thereof. If no request for hearing on any order of revocation is made by the licensee against whom such an order is directed within the time hereinabove set forth, the order of revocation shall become final and effective, without further action of the Commission. When any order of revocation has become final, the person whose license has been revoked shall forthwith deliver the station license in question to the inspector in charge of the district in which the licensee resides.

Modification. (a) *Order to show cause.* Whenever the Commission shall determine that public interest, convenience, and necessity would be served, or any treaty ratified by the United States will be more fully complied with, by the modification of any radio station construction permit or license either for a limited time, or for the duration of the term thereof, it shall issue an order for such licensee to show cause why such construction permit or license should not be modified.

(b) *Contents of order to show cause.* Such order to show cause shall contain a

statement of the grounds and reasons for such proposed modification, and shall specify wherein the said construction permit or license is required to be modified. It shall require the licensee against whom it is directed, to be and appear at a place and time therein named, in no event to be less than thirty days from the date of receipt of the order to show cause why the proposed modification should not be made and the order of modification issued.

(c) *Failure to appear.* If the licensee against whom the order to show cause is directed does not appear at the time and place provided in said order, a final order of modification shall issue forthwith.

Suspension of Operator Licenses

Order of suspension. No order of suspension of any operator's license shall take effect until fifteen days' notice in writing thereof, stating the cause for the proposed suspension, has been given to the operator licensee who may make written application to the Commission at any time within said fifteen days for a hearing upon such order. The notice to the operator licensee shall not be effective until actually received by him, and from that time he shall have fifteen days in which to mail the said application. In the event that physical conditions prevent mailing of the application at the expiration of the fifteen-day period, the application shall then be mailed as soon as possible thereafter, accompanied by a satisfactory explanation of the delay. Upon receipt by the Commission of such application for hearing, said order of suspension shall be held in abeyance until the conclusion of the hearing which shall be conducted under such rules as the Commission, shall deem appropriate. Upon the conclusion of said hearing the Commission may affirm, modify, or revoke said order of suspension.

Proceedings. Proceedings for the suspension of an operator's license shall in all cases be initiated by the entry of an order of suspension. Respondent will be given notice thereof together with notice of his right to be heard and to contest the proceeding. The effective date of the suspension will not be specified in the original order but will be fixed by subsequent motion of the Commission in accordance with the conditions specified above. Notice of the effective date of suspension will be given respondent, who shall send his operator license to the office of the Commission in Washington, D. C., on or before the said effective date, or, if the effective date has passed at the time notice is received, the license shall be sent to the Commission forthwith.

RULES APPLICABLE TO STATIONS ENGAGED IN CHAIN BROADCASTING

Effective June 15, 1943

Licensing Requirements

No license shall be granted to a standard broadcast station having any contract, arrangement, or understanding, express or implied, with a network organization¹ under which the station is prevented or hindered from, or penalized for, broadcasting the programs of any other network organization.

No license shall be granted to a standard broadcast station having any contract, arrangement, or understanding, express or implied, with a network organization which prevents or hinders another station serving substantially the same area from broadcasting the network's programs not taken by the former station, or which prevents or hinders another station serving a substantially different area from broadcasting any program of the network organization. This regulation shall not be construed to prohibit any contract, arrangement, or understanding between a station and a network organization pursuant to which the station is granted the first call in its primary service area upon the programs of the network organization.

No license shall be granted to a standard broadcast station having any contract, arrangement, or understanding express or implied, with a network organization which provides, by original term, provisions for renewal, or otherwise for the affiliation of the station with the network organization for a period longer than two years: *Provided*, That a contract, arrangement, or understanding for a period up to two years, may be entered into within 6 months prior to the commencement of such period.

No license shall be granted to a standard broadcast station which options² for network programs any time subject to call on less than 56 days' notice, or more time than a total of three hours³ within each of four segments of the broadcast day, as herein described. The broadcast day is divided into four segments, as follows: 8:00 a.m. to 1:00 p.m.; 1:00 p.m. to 6:00 p.m.; 6:00 p.m. to 11:00 p.m.; 11:00 p.m. to 8:00 a.m.⁴ Such options

may not be exclusive as against other network organizations and may not prevent or hinder the station from optioning or selling any or all of the time covered by the option, or other time, to other network organizations.

No license shall be granted to a standard broadcast station having any contract, arrangement, or understanding, express or implied, with a network organization which (a), with respect to programs offered pursuant to an affiliation contract, prevents or hinders the station from rejecting or refusing network programs which the station reasonably believes to be unsatisfactory or unsuitable; or which (b), with respect to network programs so offered or already contracted for, prevents the station from rejecting or refusing any program which, in its opinion, is contrary to the public interest, or from substituting a program of outstanding local or national importance.

No license shall be granted to a network organization, or to any person directly or indirectly controlled by or under common control⁵ with a network organization, for more than one standard broadcast station where one of the stations covers substantially the service area

¹ The term "network organization" as used herein includes national and regional network organizations. See Chapter VII, J, of Report on Chain Broadcasting.

² As used in this section, an option is any contract, arrangement, or understanding, express or implied, between a station and a network organization which prevents or hinders the station from scheduling programs before the network agrees to utilize the time during which such programs are scheduled, or which requires the station to clear time already scheduled when the network organization seeks to utilize the time.

³ All time options permitted under this section must be for specified clock hours, expressed in terms of any time system set forth in the contract agreed upon by the station and network organization. Shifts from daylight saving to standard time or vice versa may or may not shift the specified hours correspondingly as agreed by the station and network organization.

⁴ These segments are to be determined for each station in terms of local time at the location of the station but may remain constant throughout the year regardless of shifts from standard to daylight saving time or vice versa.

⁵ The word "control" as used herein, is not limited to full control but includes such a measure of control as would substantially affect the availability of the station to other networks.

of the other station, or for any standard broadcast station in any locality where the existing standard broadcast stations are so few or of such unequal desirability (in terms of coverage, power, frequency, or other related matters) that competition would be substantially restrained by such licensing. (Effective date of this section may be extended from time to time with respect to any station in order to permit the orderly disposition of properties.)

No license shall be issued to a standard broadcast station affiliated with a network organization which maintains more than one network: *Provided*, That this regula-

tion shall not be applicable if such networks are not operated simultaneously, or if there is no substantial overlap in the territory served by the group of stations comprising each such network. (Effective date of this section shall be April 12th, 1944.

No license shall be granted to a standard broadcast station having any contract, arrangement, or understanding, express or implied, with a network organization under which the station is prevented or hindered from, or penalized for, fixing or altering its rates for the sale of broadcast time for other than the network's programs.

FCC REGULATIONS REGARDING NATIONAL DEFENSE

Any common carrier or the licensee of any radio station subject to the Communications Act may utilize its facilities to render free service to the government for military or naval communications in preparation for national defense. The government agency concerned will keep the Commission generally informed of the services of this kind accepted. Nothing herein or in any other regulation of the Commission shall be construed to require any such carrier or station to participate in any such communication.

The Federal Communications Commission may authorize the licensee of any radio station during a period of national emergency to

operate its facilities upon such frequencies with such power and points of communication, and in such a manner beyond that specified in the station license as may be requested by the Army or Navy.

No provision of the Commission's Rules and Regulations shall, in time of war, prevent the master of any vessel of the United States from taking any action whatsoever in regard to the radio installation, the operators, the transmission and receipt of messages, and the radio service of the ship whenever in his discretion such action is necessary to carry out the instructions of the United States naval control officers and other instructions issued by the Navy Department.

Covering the Field of Radio

TRADE — FAN — TECHNICAL — GENERAL

The Advertiser

MONTHLY 11 W. 42nd St., New York, N. Y. Phone, PENnsylvania 6-3265. Editor and Publisher, Manuel Rosenberg; Associate Editor, Barbara Kaye. BRANCH OFFICE: 3557 Bogart Ave., Cincinnati, O. Phone, AVon 6825. Lena Aron, Sec'y. The Advertiser carries articles on radio concerning the advertising field. There is also an annual, **MARKETS OF AMERICA**, presenting a compilation of market articles, each written by an advertising or agency executive in the market he discusses.

Advertising Age

WEEKLY. 100 East Ohio St., Chicago 11, Ill. Phone, Delaware 1337. Publisher, G. D. Crain, Jr.; Editor, S. R. Bernstein. BRANCH OFFICES: 330 W. 42nd St., New York, N. Y. Phone, BRyant 9-6431; 1226 National Press Bldg., Washington, D. C. Phone, REpublic 7659. Treats radio strictly from the merchandising viewpoint; prints details of networks and talent used, but does not use material dealing with show-business phases of radio; also regularly prints statistical material on broadcasting, such as volume of time sales for major networks, and money spent on air by leading national advertisers, as well as news and discussions of broadcast trends and developments of interest to advertisers and advertising agencies.

Advertising & Selling

MONTHLY. 9 E. 38th St., New York 16, N. Y. Phone, CAledonia 5-9770. Published by Robbins Publishing Co. President, J. H. Moore; Editor and Publisher, F. C. Kendall; Advertising Manager, Lloyd Cain. BRANCH OFFICES: 1328 Peoples Gas Bldg., Chicago, Ill., John G. Tinsley, Western Adv. Mgr.; 714 West 10th St., Los Angeles, Calif., Ned Brydone-Jack, Representative; 3703 Dorothy Ave., Dallas, Texas, Kenneth Ford, Representative. Limited largely to interpretation of major trends in the operation of radio advertising from point of view of network, agency, and sponsor. Major personnel changes and industry news

are reported each month. Emphasis in all coverage of radio activity is on pictorial elements involved.

The Billboard

WEEKLY. 25 Opera Place, Cincinnati, Ohio. Phone, Main 5306. Publisher, The Billboard Publishing Co.; Managing Editor, R. S. Littleford, Jr. (Cincinnati); Leonard Traube, Editor, on leave with Armed Forces; Jos. Koehler Acting Editor; Radio Editor, Lou Frankel (New York); President-Treasurer, E. W. Evans; Secretary, W. D. Littleford; Advertising Manager, C. J. Latscha. BRANCH OFFICES: Ashland Bldg., Chicago, Ill., Maynard Reuter, Manager; 1564 Broadway, New York, N. Y., Joseph Csida, General Manager; 1509 Vine St., Hollywood, Calif., Sam Abbott, Manager. The editorial policy of this publication's radio department is concerned with the showmanship, talent and business phases of broadcasting.

Boxoffice

WEEKLY. 9 Rockefeller Plaza, New York, N. Y. Phone, COLUMbus 5-6370. Editor-in-Chief and Publisher, Ben Shlyen; Editor, William G. Formby; News Editor, James M. Jerauld; Chicago Correspondent, Rene Clayton; Hollywood Manager, Ivan Spear; General Manager, Raymond Levy. Covering briefly all radio developments of interest to the motion picture industry.

**If you want to harvest
today's frequent new crops
of advertising urges**

**to advertise regularly in
STANDARD RATE
& DATA SERVICE**

With shifting markets and sales-manpower shortages, large numbers of advertisers are maintaining liquid budget reserves . . . are prepared to *pour it on* wherever promotion possibilities loom the largest.

This widespread policy involves an unprecedented volume of day-to-day decisions . . . offers stations many more opportunities than ever before to sell their services . . . makes "constant buyer contact" the golden rule of advertising today. To pull more business, sell *every day* through Standard Rate & Data Service, used constantly by your prime advertising prospects—account executives, time buyers, advertising and sales managers, and all other important advertising officials—for planning, budgeting, scheduling and scores of other necessary operations.

Put this subtle power of hour after hour usership into your advertising appeals. Knock over sale after sale by punching hard from every use angle—from market data to station facilities. Jolt orders out of big buyers with timely, telling blows—when their use of the Service leaves them wide open for your sales-winning story.

Rule out any chance of being overlooked in today's augmented advertising market by making regular monthly use of Standard Rate & Data Service your advertising rule. STANDARD RATE & DATA SERVICE, 333 N. Michigan Ave., Chicago 1, Ill. • 420 Lexington Ave., New York 17, N. Y. • 816 W. Fifth St., Los Angeles 13, Calif.

What You Should Know About Advertising Age

FIELD COVERED •

The entire field of advertising, merchandising and related industries. Readers are advertising and merchandising executives and advertising agencies — men who are the final buying authority in the purchase of radio time, transcriptions, talent, and in the selection of markets to be cultivated by local, regional and national accounts.

EDITORIAL CHARACTER •

The editorial appeal of ADVERTISING AGE is based upon the modern necessity for business news accurately and quickly presented. No textbook or preacher, ADVERTISING AGE sticks to its primary purpose of honest, intelligent, wide-awake news gathering. It prints more information about advertising, merchandising and marketing than any other publication.

Ten editors and more than 70 correspondents located at strategic points all over the United States, present the latest news affecting this field every Monday morning. Representation is particularly strong in Washington because of the importance and extent of regulation and legislation affecting business which originates there.

CIRCULATION •

Advertising and merchandising executives and advertising agency executives constitute the bulk of our readers—over 12,000 of the most important men and women in this business. Our penetration into agencies is especially strong, and from the standpoint of reader-preference among agencies, ADVERTISING AGE is way out in front.

ADVERTISING •

ADVERTISING AGE carries more lineage, more insertions, more accounts and more exclusive accounts than any other general advertising publication. It has done so for many years, and has extended its lead during 1943.

During the first half of 1943 ADVERTISING AGE carried 38.2% of all the radio lineage placed in the general advertising magazines. It had nearly twice the number of insertions of its nearest competitor.

FORMAT AND MAKEUP •

Newspaper style, with newspaper printing and mailing speed. Full pages are large enough to permit smash displays, yet makeup of five columns is so flexible that copy can be as small as 1/72 of a page. Radio stations throughout the country find that whatever size unit is employed produces real results for them.

**A MESSAGE TO RADIO AND
ELECTRONIC MANUFACTURERS**

SUPPLIES!

Post-war competitive battles will be won by getting the right supplies to the right spot at the right time!

YOUR FIELD COMMANDERS

— the radio and electronic technicians, servicemen, and dealers, have been waiting and waiting these long war years for replacement parts and sets. They are always hungry for news of what is available, or at least, of what the manufacturers are doing. Eagerly they search the pages of RADIO-CRAFT — their main source of information.

The radio or electronic manufacturer who has no merchandise to offer at this time might well keep in the good graces of his outlets, by maintaining contact through RADIO-CRAFT — the leader in this highly concentrated field.

PARTS!

LEADERSHIP IN READERSHIP

We wish you could be with us while we open the incoming mail. You would see how these technical middlemen — the very ones you will be seeking again for your "sales representatives" — appealing to our editors for help on this or that problem. Some ask for the latest "dope" on technical developments — some request information on parts, others send in notes and suggestions which we print for them.

The picture you would get is that your future sales outlets regard RADIO-CRAFT as virtually their own publication. As a matter of fact, they are inclined to feel slighted if a manufacturing supplier does not keep them informed through their favorite medium.

CURRENT PRESS RUN 60,000

Certainly, with the war taking a favorable turn, this is the proper time to start re-establishing friendship with our readers—another name for your sales outlets. Notwithstanding high quality readership, we can also offer quantity circulation.

RADIO-CRAFT, 25 West Broadway, New York 7, N. Y.

FICES: 6 N. Michigan Ave., Chicago, Ill., P. H. Erbes, Jr., Associate Editor, and Gove Compton, Manager; 1722 Rhodes Haverty Bldg., Atlanta, Ga., H. F. Cogill, Manager; 1672 Walsworth Ave., Pasadena, Calif., Joseph W. Conrow, Manager. Printers' Ink uses articles about radio as an advertising medium and as related to merchandising and distribution; also news of personnel changes and spot news that will interest radio advertisers from a business point of view.

Proceedings of the I. R. E.

(Institute of Radio Engineers)

MONTHLY. 330 West 42nd St., New York 18, N. Y. Phone, MEdallion 3-5661. Publisher, Inst. of Radio Engineers; Editor, Dr. Alfred N. Goldsmith; Secretary Haraden Pratt; Advertising Manager, William C. Copp; Wm. B. Cowlich, Asst. Secty. The Proceedings is an engineering journal publishing technical papers on radio and allied subjects. Papers are published after review by three committees and the editor. Releases and other news cannot be used, but new commercial literature of engineering interest is listed.

Proceedings of the Radio Club of America

SIX ISSUES PER YEAR (Approximately). 11 West 42nd St., New York, N. Y. Phone, LOngacre 5-6622. Publisher, Radio Club of America, Inc.; Editor, Charles E. Dean. This publication contains texts of engineering papers on radio subjects and brief accounts of club activities. Subscriptions are available to non-members.

Q S T

MONTHLY. West Hartford, Conn. Publisher, American Radio Relay League; Editor, Kenneth B. Warner; Executive Editor, Clinton B. DeSoto; Advertising Manager, F. Cheyney Beekley; Circulation Manager, David H. Houghton, Technical Editor, George Grammer. This publication is the official organ of the American Radio Relay League and is devoted to publication of technical data and the activities and developments in amateur radio.

Radio Advertising Rates and Data

Discontinued under above title—now issued as a section of Standard Rate & Data Service.

It endeavors to cover all merchandising trends, new product developments and manufacturing merchandising policies.

NILES TRAMMELL, President of NBC . . . Long a user of *The Advertiser* and *MARKETS of AMERICA*. Our publications have proven their effective promotion value for NBC.

MARK WOODS, President of the Blue Network . . . Throughout its history *BLUE* has employed *The Advertiser* to do a selling job for this oldest and yet newest of the networks.

EDWARD J. NOBLE, newest of the network owners . . . *The Advertiser* and *MARKETS of AMERICA*, are on his 1944 advertising promotion list for his aggressive *BLUE* network.

WILLIAM S. PALEY, President of Columbia Broadcasting System . . . His network, during the past decade has regularly employed *The Advertiser* and *MARKETS of AMERICA* to carry their dynamic advertising efforts.

NETWORK PRESIDENTS KNOW the Value of Advertising . . .

and each is back of his network's advertising efforts. They sell it for its great merchandising power . . . They buy advertising as a sales tool . . .

Every station can profit by this correct viewpoint. The trade press is your most effective promotion means. **THE ADVERTISER** ranks high in this respect—tops. HIGH with your prospective Advertisers, Time Buyers, Account Executives.

MILLER McCLINTOCK, President of Mutual Network . . . *Inform*s *The Advertiser* he is contemplating an extensive promotion schedule in *The Advertiser* and *MARKETS of AMERICA* in 1944.

COVERING every advertiser and prospective buyer of Time, and Network Spot—*The Advertiser's* circulation guarantees 100% coverage of every broadcaster's promotional needs. We regularly check our circulation with the sales promotion lists of each of the networks and several major stations. Additionally we issue thousands of copies of *The Advertiser* to readers in excess of the largest of the network promotion lists. Verily, *The Advertiser* not alone does a 100% job for radio, as the evidence amply indicates, it also does a super promotion job for all other media, seeking to reach the national

advertiser and the agency executives who buy time and space.

With a long list of broadcasting stations, networks, publications and other advertisers who have been in the pages of *The Advertiser*, and *MARKETS of AMERICA* over a period of as long as 13 years, our publications have proven their powerful sales effectiveness. We enter 1944 with the largest volume of contracts in the history of *The Advertiser* and *MARKETS of AMERICA* . . . Space Reservations for the latter should be made immediately for Volume 8 (1944) . . . Positions are still available.

Space rate is just \$185. per page. ★ Only \$160. per page on 12 time contract.

World Authority on Music
Since 1880

Musical Courier

For 64 history-making years, the Musical Courier has reflected in text and picture the color, art, and glory of the world's opera houses and concert halls.

Today the Musical Courier, ever apace with the times, extends its editorial coverage to the broadcasting studios, in recognition of the cultural contribution of radio music.

As always, the Musical Courier remains a lively, vital exponent in all fields of music; opera, concert, symphony, ballet, recordings, radio, motion pictures.

Published on the 5th and 20th of the month; 20c a copy; \$3.00 a year (20 issues). Canada \$4.00, Foreign \$4.50. Subscription includes all special issues.

RADIO DAILY

PRESENTS

A NATION WIDE

UP-TO-THE-MINUTE

ANALYSIS OF THE

1944 RADIO MARKET

THE 1944 MARKET FOR RADIO

By FRANK BURKE
Editor THE RADIO DAILY

RADIO'S most comprehensive analysis of the 1944 market, revealing the shifts in population, where it has increased or decreased and complete statistical data on a Metropolitan county and other county basis is incorporated in the following statistical tables.

New figures as of March 1, 1943 are presented for civilian population, together with the actual increase or decrease in percentage from the 1940 Census. These figures are based upon the registrations for War Ration Book Two and in order to minimize the influence of disturbing factors the registration figures have been adjusted to add to an independent estimate of the civilian population. This adjustment has occasioned a slight reduction in the registration figure for each county.

Most significant is the fact that while the county's civilian population declined 2.4 per cent from the last Census, the 237 Metropolitan Counties showed an actual increase of 2.4 per cent while the remaining 2,800 odd counties lost 7.3 per cent. This is the population flow which has caused the boom cities and areas wherever industry is concentrated.

— Radio Homes —

In column three of the tables, RADIO DAILY presents a county by county estimate of Radio Homes developed from the factors of population shifts, the estimated increase in radio homes—1940-1943, and a special report on the estimated number of families in the United States 1940-1960. RADIO DAILY wishes to acknowledge the helpfulness of Dr. Leon E. Truesdell, Chief, Population Division, Bureau of the Census for his assistance in looking over the method of projection used to develop these figures which bring the number of Radio Homes to a new all time high of 31,289,920.

The need for a new estimate of Radio Homes by counties is most obvious. The great population shifts which the Ration Book registrations reveal run as high as 797.9 per cent in the case of one Nevada county; several other counties run over 100 per cent. Conversely losses in population run 30-40 per cent through many counties. The big gains in population in Metropolitan Counties add substantially to the potential number of Radio Homes which lie right at the door step of the regional or big city distributor.

— Retail Service —

The Retail-Service columns have been retained in the 1944 Annual for the purpose of showing the number of retail outlets and actual sales volume from a Census year. Number of Farms, by counties, has been added, to give figures on the rural element of the population.

One other noticeable feature of the population percentage is the fact that while non-metropolitan counties as a whole declined 7.3 per cent in civilian population, those counties which contain a city of some size show either a smaller rate of decrease or an actual increase in population. In other words those cities not in the Metropolitan District class of 50,000 population or more, have attracted population on a scale only less in scale than the big areas.

Regionally, only the West has gained in population 1940-1943. Losses were suffered by the Northeast, North Central and the South. States which have gained in population include, Connecticut, Michigan, Delaware, Maryland, Virginia, Florida, Arizona, Utah, Nevada, Washington, Oregon, California and the District of Columbia. The greatest percentage gain in state population was registered by Nevada with 25.7 per cent. The greatest percentage loss in North Dakota with a decline of 15.6 per cent. California shows the greatest actual increase in civilian population with a gain of 603,163 while New York with a loss of 759,644 suffered the greatest loss in population.

— Conclusion —

In previous annuals, RADIO DAILY has presented factors on Population-Urban and Rural and also county breakdowns of the most important classifications of Retail Trade, together with similar data for Metropolitan Districts. It must be remembered, however, that the new figures presented this year deal with civilian population only, and do not include the millions now serving in the armed services.

In presenting the new 1944 survey, RADIO DAILY credits Walter P. Burns and Associates, Inc., with doing an excellent and accurate job of research. A corps of statisticians under the direction of William Noble, vice-president of the Burns organization, spent several weeks in Washington acquiring the information for the following RADIO DAILY tables:

ALABAMA

RADIO MARKET
READ
RADIO DAILY
REGULARLY

Announcing
 The largest, most comprehensive
 radio survey ever made on the
 Pacific Coast

276,019
 TELEPHONE CALLS IN 33 CITIES...

A survey just completed
 by C. E. Hooper, Inc., shows that

Only *one* network completely covers the Pacific Coast ➤

Only *one* network commands the attention of 60% to 100%
 of the listening audience in many Pacific Coast markets ➤

Your radio show may be terrific, but hundreds of thousands of
 people on the Pacific Coast can't hear it unless its released on ➤

More than half of the retail sales on the Pacific Coast
 are made outside of the counties in which the regularly
 Hooper rated cities are located.* Don Lee is the only net-
 work that completely covers all of the outside markets.

MANAGING DIRECTOR

National Representatives, THE BRANHAM COMPANY

THE BLUE NETWORK CO., INC.

WHEN a business organization reaches two years of age, with the cash register indicating a fair amount of profit, it almost inevitably gets down off its toes and assumes a complacent attitude. Standards have been established and policies set and since these have proved successful, the company is usually content to ride along on the wave created by its initial success.

MARK WOODS

We at the Blue Network, however, have no intention of losing the reputation as a pioneering network which we have acquired in the two years since the Blue was separated from NBC and set out on its own. We have standards—scores of them—but those in which we take the most pride are our standards of dissatisfaction, reputed to be the highest in the broadcasting industry.

No "Perfect Program"

With regard to programs, for example, we believe there is no perfect program, nor is there any type of show that is a "must" on our program schedule because a large segment of the industry regards it as indispensable. The daytime serial had been regarded in this light for many years until the Blue in 1943 decided that the question deserved investigation and conducted a survey of daytime radio which proved that while a large number of women like this type of program, there is a still larger number who do not listen to the radio to any extent during the daytime.

These figures indicated a dissatisfaction with the current daytime program structure and strengthened the Blue in its view that the radio listener would welcome a new kind of daytime fare, such as "Breakfast at Sardi's" and "Breakfast Club."

And once we have determined on a sales policy, we do not stow it away in

the file marked "permanent." Although we were the first to announce the two per cent cash discount and devised a daytime package rate—all innovations at the time—we would be the first to amend or discard entirely these policies if a change in the industry rendered them impractical.

I present these facts and opinions merely because I wish to prove that the Blue does not intend to rest on its successful performance in the past, that it will be the first in the broadcasting industry to realize the necessity of change and the last to cling to a policy because "it's always been done that way."

This pioneering spirit was given immeasurable impetus last year when Edward J. Noble became the owner of the Blue Network. Not only did the transaction make the Blue completely independent of any other business organization but it put at our head one of the leading figures in American industry. Expansion into the new fields of frequency modulation broadcasting and television will be facilitated under Mr. Noble's leadership.

Crucial Period for All

This year will be a crucial period in the lives of the American people and, since radio has become so inextricable a part of their lives, it will also put the broadcasting industry on its merits. Radio has achieved new records in the immediate dissemination of news, the clarification of problems of world-wide and national interest through a free discussion, the awakening of the American people to the importance of conservation and similar campaigns and the presentation of entertainment.

In all these fields radio will be required to do a better job than ever before. Just as the invasion of Hitler's European stronghold will bring out the finest qualities of the American people, so this major military operation will demand the most skillful handling of radio's news-gathering facilities. And once the war is over, radio will find an important role in the ironing out of the tremendous problems of the post-war era. Throughout these periods, the Blue Network will stand ready to do its part as a servant of the American people.

Opening New Horizons

The story of KMBC of Kansas City has always been one of utilizing to the fullest extent radio's inherent potentialities, thus opening New Horizons for listeners in the "Heart of America." The past year has seen another such New Horizon come into existence—improving even to a greater extent KMBC's extensive farm service to this region's 49% rural population.

Thus was born this year *KMBC Service Farms*—fully equipped, pure-blooded livestock farms, putting into practical demonstration the teachings of Phil Evans, nationally known farm authority who directs KMBC's farm department. Again KMBC broadens its service to this community, in behalf of itself as a radio station and of broadcasting as an industry.

ARTHUR B. CHURCH
President and founder of KMBC whose faith in the limitless potentialities of radio's service to the community has been shown again in the development of **KMBC Service Farms**—dedicated to the betterment of rural thousands in the "Heart of America."

K M B C

OF KANSAS CITY

FREE & PETERS, INC.

SINCE 1928—THE BASIC CBS STATION FOR MISSOURI AND KANSAS

COLUMBIA BROADCASTING SYSTEM

AMERICAN radio in 1943 achieved an importance in the everyday life of the people of this country and of the peoples of the world which far surpasses its accomplishments in any other year of its brief history.

PAUL W. KESTEN

Radio brought the fighting front to the home front. It brought the Solomons and North Africa and Sicily and Attu to the farms and villages and towns and cities from which the heroes went to war.

And to these heroes in Guadalcanal and London and Iceland radio brought America.

Radio sold bonds—millions of dollars worth of bonds—and it recruited men and women for the different branches of the Armed Forces. Radio salvaged fats, explained the why and hows of rationing, encouraged farmers to produce—and told them how they could produce more and why they should.

Radio, more than ever in its history, brought messages from the people's chosen officials into the homes and hearts of the people—messages perhaps more important than any ever heard by the American people.

The Columbia Broadcasting System was privileged to take an important part in these mighty efforts.

The record of these 12 months shows that CBS devoted 17,718 broadcasts to some phase of the war, which filled 3,504 hours of air time. (Of this total, 1,715 hours were sustaining programs. Commercially-sponsored programs contributed 1,789 hours—approximately 45 per cent of total sponsored operating time on the network.)

Paley Overseas

In October, William S. Paley, CBS President, took leave from his network duties and went to the Mediterranean theater of war to fulfill a special assign-

ment with the U. S. Army's Psychological Warfare Branch at General Eisenhower's headquarters.

Columbia's audiences heard during the past year a great variety of programs devised to cover practically every field of human interest.

Discount Plan

Effectiveness of the CBS Full Network Discount Plan, instituted a half year before, was conclusively demonstrated in 1943. For the listener, it meant that many topnotch programs were available to every radio set within broadcast range of a CBS station anywhere in the United States.

Of the 53 commercially sponsored programs heard his year on the full CBS continental network, 35 were the result of the discount plan. At least three other programs were slated to take advantage of the same offer at the start of '44.

Early in 1943 the Columbia Affiliates Advisory Board was formed. Under the plan, the country was divided into a number of districts corresponding roughly to the operational pattern of the network.

War Bond Sales

During the year 1943, our records indicate that CBS has been instrumental in selling over 136 millions in war bonds—through CBS stations to the listening audiences, to CBS personnel via payroll deductions and similar arrangements and through purchase by the Columbia broadcasting System itself.

CBS is utilizing at present the largest staff of foreign correspondents in its history to bring the people accurate, swift and first-hand reporting of the mighty struggle that is convulsing the world.

The CBS short wave listening post recorded about 50 million words of foreign short wave broadcasts in 1943 which were translated from as many as 15 languages.

To CBS during 1943 went an imposing number of awards and citations won by CBS programs, personnel and stations.

American radio has just passed through the most important year in its brief history. But when the accomplishments of 1944 are spread on the record, the achievements of 1943 may well seem pale in comparison.

MUTUAL BROADCASTING SYSTEM

THE year 1943 has closed with a compelling and valuable contribution by the entire radio industry in the furtherance of the war effort. America's increasing importance in the world conflagration placed in the hands of the radio networks the task of keeping the public alert, aware, informed.

MILLER McCLINTOCK

The Mutual Broadcasting System, together with the other networks, accepted the challenge, and is proud to report its activities and progress during the past year, in behalf of the war effort.

1,468 programs, totalling 641 hours and 49 minutes of broadcast time, all in the interests of the war effort, were brought by Mutual to its audiences. These compilations are exclusive of regular sports news summaries and news commentaries, and regularly scheduled program features.

In co-operation with the War and Navy Departments, Mutual broadcast 305 Army programs and 298 Navy programs, including regularly weekly features, in which members of the armed forces participated. Other special Mutual features were produced with the co-operation and participation of the Treasury Department and various other Governmental and public agencies.

News Coverage

An important phase of radio's program to keep the public informed is a capable staff of reporters and commentators, both on the home front and abroad. Each week Mutual airs 76 individual news commentaries originating from the continental United States. This is supplemented by news features and analyses.

The Mutual network's expansion in sales and facilities in 1943 has made it possible to reach audiences of greater size, and has in turn resulted in an expansion of its personnel and administrative facilities.

1943 saw the affiliation of 15 more stations to the Mutual network, making a total of 211 affiliates in the U. S. and in addition outlets in Canada, Hawaii, and in Mexico through the 36 station Radio Mil chain.

The tie-up between Mutual and Radio Mil, in which the two networks have agreed to exchange programs, is indicative of the part radio will play in the development of relations with our Latin American neighbors.

Expansion

Another indication of Mutual's ever-growing importance in the field of business and radio advertising is the increase in sales; which are expected to exceed \$14,000,000 for 1943—a gain over 1942 of more than 40 per cent.

In order to provide Mutual listeners with a high degree of program service, the co-operative Mutual network organized a Program Operating Board, composed of program heads of five key Mutual stations, who meet monthly to analyze and work out ideas for maintenance of a diversified schedule of broadcasts.

This attention to the development of an efficient programming service has resulted in a well rounded series of regular features, devoted to education and information, music, religion, varied entertainment, sports, and juvenile programs.

Recognizing that international radio will play an important part in the post-war world, Mutual in 1943 strengthened relationships with the United Nations by exchanging program features with the Canadian Broadcasting Corp., the British Broadcasting Corporation, the Republics of Brazil and Mexico, and the Territory of Hawaii.

The radio industry is daily becoming an integral part of American life and habits. Business has recognized it as one of the great motivating forces of existence, an important medium of advertising.

Just as it has been significant in the progress of the war, radio will be an important instrument in the post-war world of rehabilitation and reconstruction. Mutual Broadcasting System is now preparing and planning for the day.

NATIONAL BROADCASTING COMPANY

NILES TRAMMELL

IT IS more than two years ago since the treacherous attack on Pearl Harbor stunned all peace-loving peoples and then, almost overnight, spurred them forward into the greatest concerted drive against oppressor nations the world has ever known. Today, with positive indications that the tide of war has turned in our favor, the radio industry cannot help but take pride in the knowledge that its broadcasters have kept pace with the nation in the intense energy with which its people have applied themselves to the war effort. Not only has radio itself initiated many productive moves to aid the drive against the common enemy but the industry as a whole has responded repeatedly when the Government has sought its support in special undertakings.

These contributions have taken varied forms. In the year 1943, for example, the National Broadcasting Company allotted more than 1,122 hours to programs promoting the war effort, a gain of more than 50 per cent over 1942. During the same period, the network carried 4,666 special announcements including 1,383 directed to the purchasers of War Bonds.

Since late in 1942, NBC's short wave outlets have been leased to the OWI, but in addition to this, NBC has continued to beam many special programs to the conquered countries of Europe to our service men abroad and to our neighbors in Latin America. During a trip to the Italian fronts last Fall, I saw at first hand how much these programs from home mean to our soldiers and how important it is that we not only continue to provide them but to send more and still more of them.

Home Front Activity

On the home front, the National Broadcasting Company has maintained its pre-eminent position as "the network most people listen to most." Invariably the results of responsible polls and surveys have placed NBC programs and artists in

top positions. For example, in the RADIO DAILY poll of 1943, NBC took the first six places among the Best Commercial shows on the air and seven out of the first ten in the Best Entertainers classification; the Cleveland Plain Dealer's survey of newspaper readers in its area gave NBC seven out of the first ten places in the "Favorite Program" category, and the Fame-Motion Picture Daily poll revealed that the first two choices in eight classifications were NBC personalities or programs.

In allotting approximately 15 per cent of its broadcasting time to news reports and special events, which was being done at the year's end, it is obvious that the National Broadcasting Company is meeting the desires of American listeners for full coverage of the battle fronts.

As the year closed, NBC's staff of news reporters numbered 37, the largest staff in the network's history. Many of these reporters have insisted upon sharing front line dangers with our troops. NBC newsmen were in the first wave of allied fighting men at Oran, Sicily and at the bloody beach-head of Salerno.

Tele-FM Developments

And, while carrying on these activities, NBC has not neglected the future. Both television and frequency modulation (FM) have been receiving the expert attention of our engineers and program staff. These new services, I am convinced, will play an important part in extending the post-war influence of radio on the life of the nation.

In November, NBC installed the first television receivers in hospitals near New York where wounded servicemen are convalescing. And then, to provide acceptable entertainment for these veterans, NBC commenced the telecasting of special sports events from Madison Square Garden. To date, Station WNBT has transmitted scenes from the Rodeo, the Ice Follies, basketball games and boxing.

If American radio is permitted to continue under the proved principles of free competitive enterprise, programs will improve, facilities will be extended and the nation as a whole will gain through the continuation of the finest broadcasting that talented writers, producers, artists and engineers can provide.

Keystone Broadcasting System is a transcription network principally covering secondary markets from coast to coast. Its affiliated stations are joined together in a national system by means of transcriptions, eliminating wire charges. At time of going to press, the network included 200 affiliated stations. The Network supplies its stations with 84 fully scripted sustaining shows per week filling 4 hours per day, seven days each week, to a total of twenty-eight hours per week.

This is the only national, full-sized network in the United States offering national radio advertisers the opportunity to cover the secondary markets intensively by means of electrical transcription in a single transaction.

The System offers its facilities in blocks of time from one hour down to fifteen minute periods, and also makes available spot periods of five minutes duration down to twenty-five word "chain breaks."

KEYSTONE

brings you

AMERICA'S VAST

Beyond Metropolitan

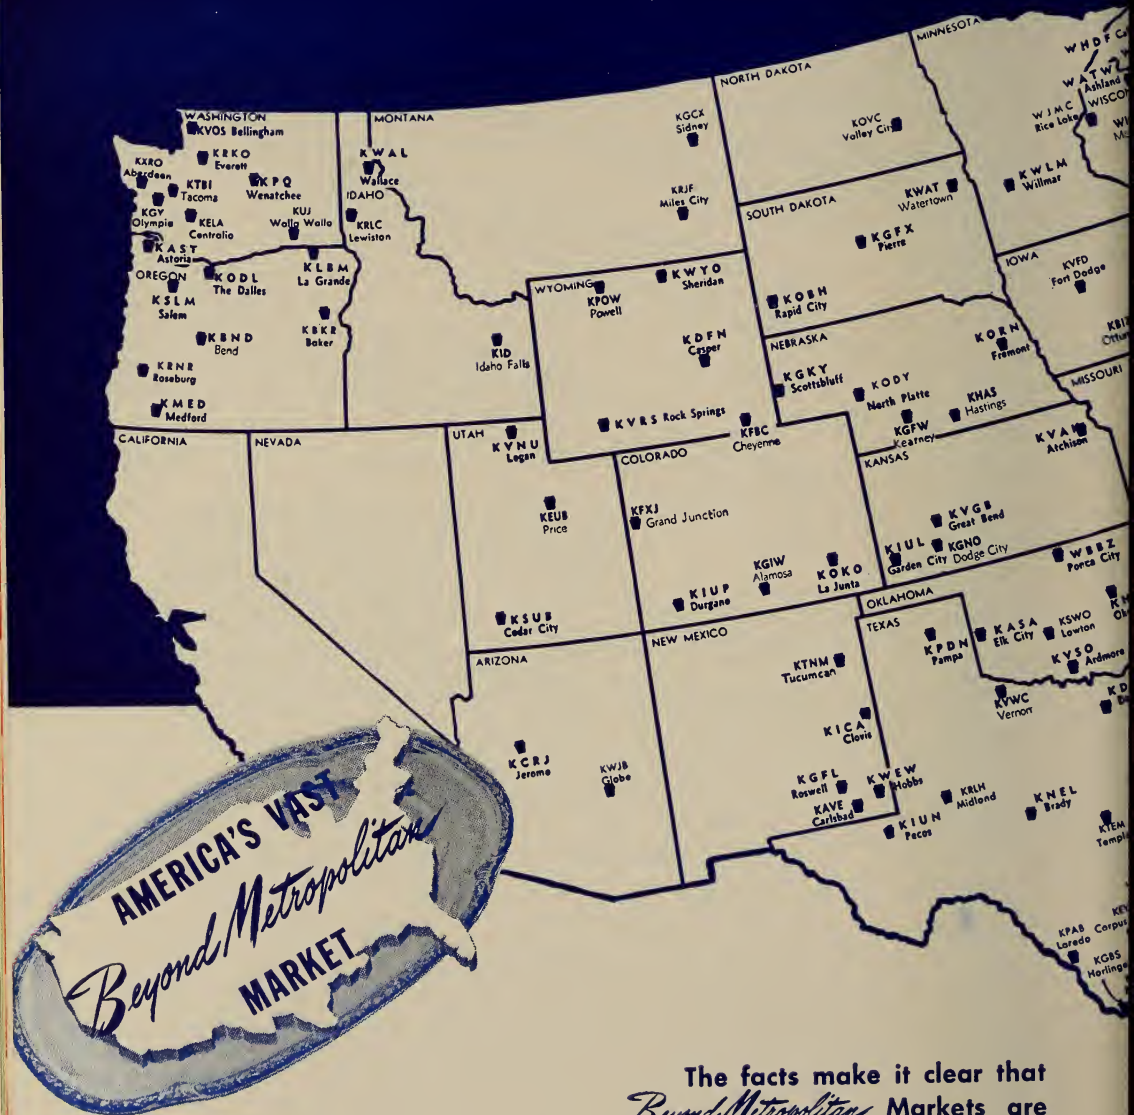

MARKET

SILVER PLATTER BY CARTIER

on a Silver Platter

THIS IS

Beyond Metropolitan*

The facts make it clear that
Beyond Metropolitan Markets are
essential for thorough national
coverage.

THIS IS THE KEYSTONE

AMERICA

* The vital small-town and rich rural areas which receive either no coverage at all, or no dependable coverage, from major wired networks or metropolitan stations.

These choice markets encompass one third of the nation. They are composed of cities and towns having 50,000 population and under. Cities and towns of this size account for

- 49% of total U. S. Retail Sales
- 53% of total U. S. Food Sales
- 47% of total U. S. Drug Sales

(Source: U. S. Dep't. of Commerce)

The prosperity of *Beyond Metropolitan* America is at an all-time high. It stems from permanent developments—construction; airports; increases in housing, population, stores; agrarian plants; hospitals—which will continue in post-war years.

The 200 affiliated KBS stations—linked by transcription—penetrate and dominate these lucrative *Beyond Metropolitan* Markets. They supplement major wired broadcast chains, supplying missing links, strengthening weak links. KEYSTONE is the ONLY network covering *Beyond Metropolitan* America EXCLUSIVELY!

PA **THE PACEMAKER**
 with **AP** news for radio

WHITHER IN 1944?

1943 was an incredibly successful year for all Pacific Coast networks. Especially for Pacific Blue. What 1944 holds we refuse to prophesy but what happened in 1943 is a reliable key to the future.

More Stations—Two aggressively managed stations—KFMB, San Diego, and KPRO, Riverside—joined the fold, giving us 14 stations and as near perfect coverage as any advertiser can request. No other network can offer more coverage.

More Business—24 regional advertisers used Pacific Blue in 1943. In January, 1944, alone five new regional advertisers—S & W, Rainier Brewing, Lyon Van & Storage, Resinol, and Union Ice—signed for an additional 14 quarter-hours a week.

More Audience—Pacific Blue's share of the audience surged upward with every Hooper during 1943. For instance, in the morning Pacific Blue stations in the four key Coast markets showed gains of 28% to 70%, in the afternoon gains of 21% to 74%.

Same Rates—Improved coverage and more listeners have *not* meant increased rates. The same economical rate structure, the same liberal discounts still enable Pacific Blue to deliver the Coast for 20% less than any other network.

"CALIFORNIA EST OMNIS DIVISA IN PARTES TRES"

In case your Latin lessons, like ours, are some years behind you (we had to check the spelling ourselves!) Caesar's *Gallia* was also divided into three parts. ★ Tri-partite California shapes up like this:

CALIFORNIA CONSISTS OF...

1 The San Francisco-Oakland (Bay area) market;

2 The Los Angeles - San Diego (southern California) market;

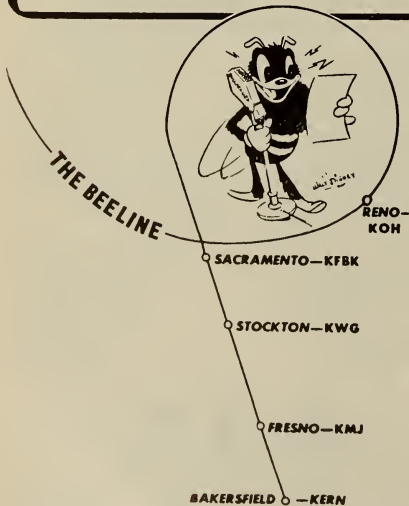

...and BIGGEST OF ALL...

3 The billion-dollar "interior" market: California's great central valleys, *plus* wealthy western Nevada...completely radio-covered *only* by

The Beeline

Your nearest Raymer office has "sweet news" about the BEELINE: *new* Hooper ratings, contour maps and mail-response facts. ★ This unique group of stations is radio's surprise package, at attractive new rates.

K.F.W.B.

The only independent station with the 3 complete world-wide news services: ASSOCIATED PRESS, UNITED PRESS, INTERNATIONAL NEWS SERVICE!

* * *

980 is the hot-spot on Los Angeles area radio dials — and why not? Warner Bros.' KFWB delivers the giant audience you'd expect from the station that has (1) more local business than any other station in the greater LA area, (2) the biggest and finest studio facilities on the Coast, and (3) 5000 watts day and night — signal strength that blankets the LA marketing area and *one-third of the buying power* of the eleven Western states!

Get on the KFWB bandwagon — it's really taking sponsors places, and fast!

HARRY MAIZLISH
General Manager
KFWB, Los Angeles

WILLIAM RAMBEAU, National Representative, N.Y. & Chicago

Keep Fighting With Bonds!

PRETTY—ISN'T IT?

Yes Indeed
SAN DIEGO
is Really a
PRETTY!
PICTURE!

IN THIS picture you can see the hub of a rich . . . highly concentrated market . . . America's first and leading market in per capita buying power . . . where the 550,000 busy . . . working . . . buying civilian population spends the amazing sum of \$416,000,000 a year!! That's buying at the rate of \$8,000,000.00 every six days!!

KFMB is the spark plug for this market and is all that is needed to do the job because 90% of the population makes up metropolitan San Diego and they all reside within 15 miles of our antenna!!

WITH a full schedule of Blue network shows . . . plus local programs and features . . . KFMB is San Diego's busy . . . aggressive station!!

BUY

PROGRAM DEPARTMENT ON A NEWS WIRE

With the manpower shortage

PA TELESCRIPTS *are*

*proving to be almost the equivalent of a
 programming department. Cued for music
 or sound effects, they are transmitted over
 the special AP radio wire ready for imme-
 diate airing.*

It's a "ROYAL FLUSH"...

on KOA!

• A Hand most Radio Stations dream about! The kind Time Buyers won't hesitate to stake odds on, once they get a peek at it

It's really no wonder...with such "selling cards"...that it's a "Full House" where Time on KOA is concerned. Smart Time Buyers are quick to realize that there is no gamble involved.

Better get your share of the "Pot" now, before some other lucky Advertiser beats you to the draw....Join that group of long-time KOA advertisers who have been betting on this station for years....and have never lost out!

Few Stations
In the Nation
Can Equal KOA's
Dominance

50,000 WATTS-850 KC.

**LUCKY
GIRL!**
*She Married
in Hartford*

Hartford wives have many more dollars to spend for the product you sell. The Hartford Trading Area is *second highest in the U. S. A.* in Effective Buying Income per family. That's a fact worth remembering when you select markets for your advertising.

Here's another valuable point of information:- The Hartford Trading Area comprises 26 towns, and has more than double the retail sales of the city of Hartford. By using radio on WDRC and covering the entire market, you realize your full sales potential here.

Write Wm. Malo, Commercial Manager, WDRC, for complete market study.

Practically every action involved in driving your car is a habit. You don't really think about it. You do it automatically.

The people of Southern New England have developed a habit, too. It's the habit of listening regularly to WTIC, the station that has always satisfied their desire for the best in radio fare. The wise national advertiser can immediately recognize the importance of this habit. It means that his sales message over WTIC will reach a con-

stant and attentive audience . . . an audience possessing a buying income that is 50% greater than the average for the entire United States.

Get into the habit of using WTIC. It's a sure way to create a swift and healthy sales response to your advertising message in the wealthy Southern New England market.

**IN SOUTHERN NEW ENGLAND
PEOPLE ARE IN THE *Habit* OF LISTENING TO WTIC**

TABLE 2.—NETTED ESTIMATES OF POPULATION IN METROPOLITAN COUNTIES, 1940 AND 1943

U. S. BUREAU OF CENSUS

Report on SHIFT IN POPULATIONS Metropolitan Counties

Albany +6.7%

Atlanta +9.6%

Columbus +25.6%

Metropolitan County	1940	1943	% Change
Albany	10,200	10,850	+6.7%
Atlanta	1,000,000	1,096,000	+9.6%
Columbus	100,000	125,600	+25.6%
...

Marching ^{To} Through Georgia!

Eighty years after Sherman's famous "March to the Sea", another army is marching on Georgia. This time, however, they've marched TO Georgia rather than THROUGH Georgia.

This is an army of men and women who have come to Georgia's Cities to take jobs in Georgia's industries. They like Georgia,—its climate, its people, its working conditions—and when the war is over, they're going to stay in Georgia!

The phenomenal increase in population of Georgia Cities is shown by the U. S. Bureau of Census report on changes in civilian population of metropolitan Counties, between April 1st, 1940, and March 1st, 1943, based on actual registrations for Ration Book Two.

While many American cities were showing a net loss in population, due to loss of men and women to the Armed Services—Atlanta, Albany and Columbus all showed large net gains. Bear in mind that this covers civilian population alone, and does not take into consideration the hundreds of thousands of soldiers sta-

tioned in Georgia, whose purchases go swell Georgia's ever-mounting total of retail sales.

Now's the time to sell your product Georgia's prosperous urban markets. making up your list, pick stations that give you concentrated coverage in Georgia Cities, where the pay-roll dollars are.

WBBM'S BEST PROGRAM..

ONE program has kept WBBM the most sponsored station in Chicago for 19 straight years.

It is the program followed by our SHOWMANSHIP department*; the program of building radios show to do specific selling jobs.

When you buy radio time—local, national spot or network—see what our SHOWMANSHIP department* can do to program that time so it will produce the maximum sales per advertising message.

* The twenty key creative men on WBBM's "Showmanship" staff have invested an average of nine years in radio.

TWO RICH MARKETS IN ONE

NOWHERE else in America is there such a broad area of double prosperity as in the WLS Major Coverage Area, where almost 15,000,000 people live, two-thirds urban, one-third rural. With war production their incentive, men on some 650,000 fertile farms are reaping cash harvests larger than they have in years. There are 357 cities and towns, where men on war jobs in factories are bringing home pay envelopes the like of which they have not had before.

Whether you wish to reach the workers in industry or in agriculture, radio station WLS provides you the way to *sell* them.

...of all programs on the air!

Latest independent surveys place WMAQ programs far out in front. They show that the great majority of all listeners favor the top-flight NBC shows which distinguish this station—shows made possible by America's leading advertisers and agencies and the outstanding talent they have assembled.

This fact should be of vital significance to you if you are interested in reaching the Nation's Second Market—a market which has a potential listening audience of 2,855,700 families who spend over *three and a half billion* dollars a year. When you buy WMAQ time you are placing your radio advertising where it will do the *most good*. A "natural" for local or spot campaigns.

NO. 48 MONUMENT CIRCLE
HOME ADDRESS OF INDIANA'S
MOST POPULAR RADIO PROGRAMS

THERE WILL COME A DAY . . . maybe in 1944 . . .
Victory . . . Peace . . . Conversion . . . Conversion
to peacetime, civilian production . . . Following
the battle of nations will come the battle of
brands . . . Selling will return to a competitive
basis again . . . Sales campaigns will take the
place of military campaigns . . . There will be
new developments to exploit . . . "two-fisted"
selling campaigns will replace the wartime, in
stitutional copy we've become so accustomed to
these past months . . . Potential possibilities in
the postwar era will be enormous.

WFBM — Indiana's first radio station — stands
ready to serve you in the Indianapolis — and
surrounding market.

The FAVORITE In Indianapolis

In a market which is serviced by more than one radio station, there's certain to be some Division of Listeners. Of course, this complicates the time-buying job, so let's get some facts straight.

How about Indianapolis? Well, there are four good local stations, all network outlets. This doesn't mean, however, that you can get one fourth of all the listeners on *any* station. It isn't *that* simple. One station of the four gets MOST of the listeners primarily because it has MOST of the really top-ranking programs, local and network.

We believe firmly that good programming, network AND local, have made WIRE the *favorite* station for Indianapolis listeners. Certainly NBC Programs are rated tops—in *any* survey. Some of the many local studio programs which originate at WIRE rate even higher. Yes, WIRE leads in Indianapolis.

Iowa is Listnin!

"Folks out here look upon K X E L as a friend and neighbor. Knowing these families, we are bringing them the news, information and entertainment they care the most about. In the advertising man's language, I think it's called . . . 'listener interest' . . . in our way of talkin' it's just being neighborly. Yes, Iowa is listnin' to K X E L!"

HOOPER SHOWS

What Kansas City Knows

KCKN is fast being "discovered" by value-wise time buyers. Better check into current availabilities... today.

The May-thru-September, 1943 Hooper survey is the fourth consecutive 5-month report to verify the fact that KCKN, a 250-watt local station, holds more daytime listeners in Greater Kansas City than each of 3 network outlets.

Unusual low rates offer the chance of a lifetime to reach and sell for a song, a major portion of the 861,000 persons within KCKN's primary service area.

HOOPER STATION LISTENING INDEX

Monday thru Friday — May thru September, 1943

(Per cent of Listeners)

PERIOD	STATION A	STATION B	KCKN	STATION D	STATION E	STATION F
8:00 to 8:30 a.m.	29.0%	19.4%	17.7%	6.5%	12.9%	9.7%

How To Do A
Better Sales Job
 ON WIBW
 One of a Service Series

Begin by getting better acquainted with the 4,811,511 farm and small town listeners in WIBW's service area.

Here's a typical listener. He's not only a farmer, but a mechanic, electrician, plumber and carpenter. He knows the biology of line breeding . . . the chemistry of his soil . . . keeps cost-accounting records. His wife buys the latest books . . . knows the nutritional value of the entire vitamin alphabet . . . is most active in all

rural women's projects.

The day of the "nick" farmer has gone. In presenting your sales message to WIBW listeners, remember that they resent extravagant claims, high-pressure selling. They want FACTS; want to make their own decisions. So, in speech and entertainment, be truthful, sincere, friendly. Then they'll welcome you and your product into their homes . . . just as they have been welcoming WIBW for almost two decades.

Detroit's Postwar Future Is Being Made Today...

As center of the vast automobile industry, Detroit ranked fourth before the war among the markets of America. During the last two years, as heart of the country's gigantic armament effort, it has grown enormously. Today, with plant and production facilities unequalled anywhere in the world, Detroit is assuring its peacetime future and creating market potentialities impossible to overrate.

- **POPULATION GAIN** — 552,000 between April, 1940, and August, 1943 . . . enough "new Detroiters" to populate a city larger than Cincinnati, Ohio! Total population of Metropolitan Area now estimated at 2,295,000.
- **FAMILY INCOME** — The average Detroit factory worker's family income is now estimated at \$109.85 weekly—more than twice as much as in 1940! The number of workers per family has increased 22%.
- **BANK SAVINGS** — June, 1943, \$439,843,756, representing an increase of \$108,179,905, or 33% over June, 1942.
- **PER CAPITA INCOME** in Wayne County (which is largely Detroit) in 1943 is estimated at \$1,570, or \$520 above the national average!

In this great and prosperous market, WWJ has led all radio stations in listener preference for more than 23 years, a leadership attained through fine programming and by consistent broadcasting in the public interest.

A New Sum in the Northwest Sky...

THE TEN audience-dominating NBC and Blue stations of the Northwest Network add up to the only sales-wise coverage of the important three-billion-dollar market represented by Minnesota, North and South Dakota and portions of Wisconsin, Montana and Wyoming. You can sell any part or all of this urban-and-rural market via the Northwest Network. Any combination of stations or the entire group may be used without line charges or the usual extra costs for network service.

SOUND RESULTS —That Cost You Less!

In a rich area where retail purchases last year exceeded two billion dollars . . . and where there are over a million and a half radio homes . . . NCBS is a wired network that gives maximum coverage at less cost per thousand radio homes.

Sales results have been proven by mail count. For instance, one program pulled more than 75,000 pieces of mail (each containing a boxtop) at a cost of less than one cent per letter. Results like that prove NCBS is the best buy in the North-west.

JUDGED...and FOUND *Wanted!*

Since our first Planolyzed Promotion reports found their way to agencies' and advertisers' desks more than three years ago, these red folders have become familiar evidence of KSTP's outstanding merchandising cooperation.

For us, familiar evidence that Planolyzed Promotion has been "judged . . . and found wanted" is contained in hundreds of commendatory letters we have received from KSTP's clientele of leading agencies and advertisers.

Planolyzed Promotion is KSTP's own, thorough-going method of merchandising and promoting your KSTP radio campaign. First

comes the analysis of your particular sales problem in the KSTP Market. Then—and only then—comes the promotion plan. Thus, KSTP's exclusive Planolyzed Promotion—a distinctive, no-cost "plus" which presents one more reason for the effective and economical selling job KSTP does in the rich Twin Cities Market.

Meet **WOW's** Little Brother

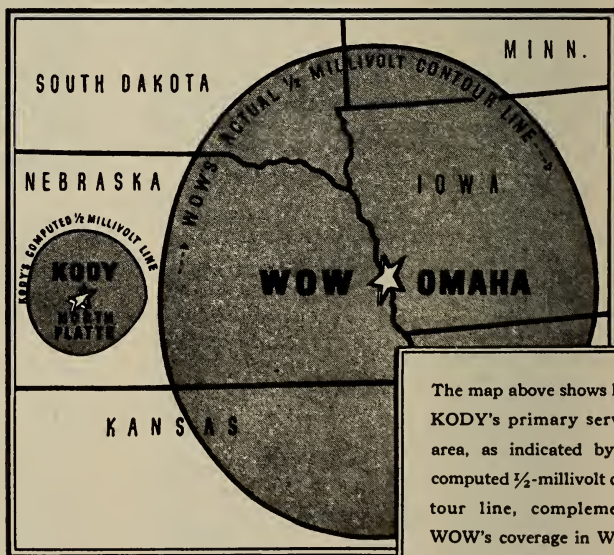

Radio Station WOW, which has served Western Iowa and Eastern Nebraska with primary radio coverage for more than 20 years, now has a little brother—KODY, so named to perpetuate the memory of the great plainsman and superb showman, "Buffalo Bill" Cody.

KODY gives primary coverage in a small but rich market that is adequately served by no other radio station. The combination of WOW and KODY will give radio advertisers primary coverage of most important markets in Western Iowa and Nebraska, plus portions of South Dakota, South-Western Minnesota and Northern Kansas.

WOW's 1/2-millivolt contour line extends approximately 190 miles East and West of Omaha, and approximately 200 miles North and South of Omaha.

There are now good availabilities on WOW. On KODY there are excellent quarter-hour, news sponsorship and spot availabilities.

The map above shows how KODY's primary service area, as indicated by its computed 1/2-millivolt contour line, complements WOW's coverage in Western Nebraska.

B
C

NORTH PLATTE, NEBR.

*In the Heart of the
"Buffalo Bill Country"*

This new, full-time NBC outlet is owned and operated by Radio Station WOW, Inc., and all the facilities of Omaha's big NBC station will be available to KODY.

KODY will give PRIMARY coverage in the small but very substantial North Platte market. North Platte is essentially a railroad city, the most populous in the Western half of Nebraska. Its trade territory, however, embraces thousands of acres of the finest grasslands and irrigated farms, the income from which, added to the railroad and other industrial payrolls, gives the North Platte area a balanced economy, making it a worth while year-around market.

IT'S JOHNNY GILLIN'S STATION

KODY will be operated by the same efficient management which has made WOW one of the outstanding radio stations in the country, and will have the personal attention of Johnny Gillin, who is determined to make KODY the "biggest little station in the world."

KODY will be a PROFITABLE buy for any advertiser desiring to penetrate the Western Nebraska market.

WHOM DELIVERS "BETTER THAN AVERAGE RESULTS"

There is a large segment of the New York and North Jersey radio audience who look to WHOM for their daily radio fare. These millions of foreign and native born Americans buy huge quantities of goods and services. Year after year, they listen to WHOM for *just what they want to hear*, and loyally support the sponsors. For *Better Than Average Results* for your radio dollars, call or write.

When You Think Of AMERICA'S 4TH LARGEST MARKET

1943 BOX SCORE
Comparative ¼ Hour Ratings
12 Noon to 6 P.M.

You **MUST** Think
of **WAAT!**

WAAT LEADS 435 ¼ Hrs.

VS.
THREE

50,000
WATTERS
COMBINED

TRAILS 360 ¼ Hrs.

TIED 69 ¼ Hrs.

WAAT
VS.
FOUR

LEADING
INDEPENDENTS
COMBINED

LEADS 893 ¼ Hrs.

TRAILS 207 ¼ Hrs.

TIED 52 ¼ Hrs.

And Here's
The **PROOF!**

This recapitulation is from the continuous survey conducted in North Jersey by "The Pulse of New York" (cooperatively paid for by ALL major stations in this area), covering an impartial study of ¼ hour ratings from 12 Noon to 6 P.M. for THE ENTIRE YEAR OF 1943!

Yes—these figures speak for themselves! They're the hard cold facts conclusively proving that dollar-for-dollar WAAT is New Jersey's best radio buy—that it must be considered for any schedule that aims at REAL coverage of this vast market.* If you'd like to see the COMPLETE survey—with all the convincing facts and figures—write or phone today!

National Representatives (Outside New York Area) Spot Sales, Inc.

WAAT

970 KC
NEWARK,
N. J.

**"DOLLAR FOR DOLLAR
NEW JERSEY'S
BEST RADIO BUY"**

*Do you realize this market contains over 3½ million people; more than these 14 cities combined: Kansas City, Indianapolis, Rochester, Denver, Atlanta, Dallas, Toledo, Omaha, Syracuse, Richmond, Hartford, Des Moines, Spokane, Fort Wayne

Blue Network

THIS IS JOE RIZUNSKI

Joe is a die setter. He makes \$115 a week, lives in Brooklyn. His boy Steve is in the Army. He has another son, age 12, and Anna, 18, who goes to Hunter College.

Joe works hard all day. In the evening when he relaxes, his favorite radio program is not a network musical or dramatic show, but the *Polish Variety Hour*, which he listens to on WBNX.

Joe's language is Polish. He combines the culture and tradition of his native land with loyalty for America. He puts 20% of his salary into war bonds. "I'm glad to be an American. My children have the advantages of the land of opportunity."

There are 661,170 Joe Rizunskis in the WBNX area. Members of the WBNX family of listeners. To them WBNX is more than a station, it is an institution. It carries to the millions of foreign born sales messages in the intimacy of their native language. It sells merchandise to the thousands of Joe Rizunskis who have money to spend. Let us give you the facts. WBNX, New York 51, N. Y.

In the WBNX Service Area there are:

- 2,450,000 Jewish Speaking Persons
- 1,522,946 Italian Speaking Persons
- 1,236,758 German Speaking Persons
- 661,170 Polish Speaking Persons
- 200,000 Spanish Speaking Persons

50,000 WATTS in the NATION'S No. 1 MARKET!

HEAR YE!

HEAR YE!

IN OLD DAYS, the "Towne Crier" was a busy person. He was the Time Signal—the Newscaster and the Gossip Reporter — the most "listened to" in his area. But those days of old have grown young. Individualism has given way to science and industry — to newspapers and radio with greater coverage, more circulation, and more listeners.

GREATER COVERAGE — MORE LISTENERS

That, briefly, is the **NEW** story at the **NEW WINS**. **WINS** is now operating on 10,000 WATTS at 1010 on the dial.

That means greater coverage and more listeners for your story. Add new and improved programs* now being carried on **WINS** and you have a new means of getting "time and a half" for your advertising dollar.

1010 on N. Y. Dial

We know something you don't know about the New York Market... *but...we'll be glad to tell you!*

WQXR is a unique radio station. Its audience is a unique and loyal audience—so loyal that 25,000 of our listeners pay \$1.00 a year to get our printed monthly program! Every year WQXR surveys a cross-section of its audience by means of a questionnaire sent to people who have written to the station. The latest questionnaire, sent to 14,000 homes, asked 19 very personal questions—brought 27.58% returns, with no inducement offered. These replies told us many interesting things that can mean *more business* for you.

This information on WQXR's audience is available to advertisers and agents. It clearly indicates that you cannot reach the *FULL* New York market through radio—UNLESS YOU ALSO USE WQXR! We shall be glad to suggest plans for *your* advertising over this station. Why not write or phone us now?

One of the many innovations that
have helped make . . .

ONE · TWO · THREE · FOUR · FIVE · SIX · SEVEN

THE

ighth

DOLLAR

...is it working effectively for you?

Perhaps you haven't thought about the *eight* dollar of your radio budget. Or about the sixteenth and the eightieth and eight-hundredth.

These are the dollars (and *every* eighth dollar of your appropriation) that should be at work for you in America's greatest market... where $\frac{1}{8}$ (12.3%) of the nation's retail purchases are made... Metropolitan New York. They *should* be bringing your sales-message to people who pour six-billion dollars a year into the tills of retail merchants.

If one-eighth of your radio money is *not*

working for you in New York... if you are *under-spending* in this vital market... chances are you're *under-selling* here as well. And that means you *need WOV*.

WOV, with its array of hit programs, with its complete coverage of this entire market, with its *lowest-cost-per-listener of any New York independent*, can turn your *extra* dollars into *extra* sales and bring you your full share of this greatest market of them all. *No other Metropolitan station can make those eighth dollars do so much!*

WHAM

means
selling
power

*measured in mail response or millivolts
per meter*

Physical coverage of WHAM (.5 and .1 millivolt lines) by counties. Note close correlation between physical coverage as shown on this map and mail coverage as shown on large map.

THE WHAM mail coverage map (large map above) is based on 50,000 pieces of program mail received by WHAM, separated and classified by counties. Monroe County, the home of WHAM, was used as the base with the number of letters per 1,000 radio homes received rated as 100% mail response. On this same basis, counties showing a

mail response per 1,000 radio homes of 50% or better were classified as WHAM primary mail coverage areas. Those showing returns of 25% or better were classified as secondary coverage while the counties with returns of 5% to 25% were rated as supplementary areas.

	Total	Primary	Secondary	Supplementary
Population	2,952,327	1,214,255	294,703	1,443,369
Total Radio Homes	741,410	309,757	71,918	359,735

WFBL

SYRACUSE, N. Y.

Since its inception in 1922, WFBL has regularly held many "firsts" in the world of radio.

WFBL was instrumental in forming the early New York State Network, a pioneer step in improving radio's service. The station is one of the 16 charter members of the great Columbia Broadcasting System, and is the only station in Syracuse that has been affiliated with the same network throughout its history . . . resulting in local CBS ratings being consistently above national

ratings. It was the first station in Syracuse to use 5,000 watts and is the only 5,000 watt station with a non-directional radiation daytime.

It is the only station in this area employing the facilities of a mobile unit, broadcasting Central New York events "on the spot." WFBL is the only radio station to own and occupy its own building . . . a smart, modern structure in the heart of Syracuse. These are but a few of the "firsts" that make WFBL the progressive, preferred station.

SYRACUSE—EST. 1923
 NATIONAL BROADCASTING CO.

Frequency: 570 Kc.....Power: 5000 Watts

YOU'VE got to get price, coverage and audience when you buy spot radio. In Central New York, you get more of all three when you buy WAGE. For WAGE costs less than other Syracuse network stations. It gives equal or greater coverage. And audience—well, ask to see the last special Hooper report on Syracuse radio listening. Your Edward Petry & Co. representative will show it to you— or write or wire WAGE.

Confidentially— IT'S DONE WITH GREMLINS

Yep! It's "Them" again—but a special kind. Not the perverse and destructive R.A.F. breed. Ours are the kind who glamorize microphones . . . so that radio commercials simply *charm* cash-money out of the public.

Cleveland's retail merchants—who swear by the sales miracles achieved through broadcasting over WHK—have never seen our gremlins. (Neither have we; although one night our Program Director *thought* he saw one.) But RESULTS—yeah, man, we've seen them *a-plenty!*

And that's what counts . . . money laid on the line, cheerfully and often . . . in exchange for merchandise advertised over WHK. Cleveland retailers have put this to the test. And that's why they buy *more time* on WHK than on any other leading station!

Because it sells . . . and sells . . .
AND SELLS

WHK

is

"Retailers' Choice in Cleveland!"

ANOTHER FIRST

FOR PA

AP

**HOURLY NEWS
 SUMMARY**

PA originated hourly
 news summaries on
 the special AP radio
 news wire.

... standard equipment!

When thousands congregate . . . at ring-side prices . . . a million will listen . . . free.

WJW listens to that million listeners! Wherever crowds gather and things happen of special interest to the people, the WJW microphones are standard equipment on the job—bringing "Cleveland" closer to Clevelanders.

They serve also in bringing Clevelanders closer to WJW . . .

And should serve finally in bringing the advertiser closer to both of us.

THE CLEVELAND PRESS.
The town's cheering Earl Harper's broadcast of the Charity Fights over WJW the other night. Although we didn't hear him, as we were at the Arena, we understand it was the best sports job turned in over the local kilocycles in a long while. Con-
cast, Earl.

PLAIN DEALER.

BIVINS-MURRAY BOUT—Both Earl Harper of WJW and Lew Henry of WHK were doing nicely with the blow-by-blow description of this fight from the Arena which Bivins won. Harper, I thought, was sharper with his description.

CLEVELAND NEWS

Earl Harper, sportscaster for WJW, newcomer to town, did a swell job in broadcasting the Bivins-Murray bout at the News Christmas boxing show last night. His non-hysterical description was easy to follow and gave the listener a good picture of what was happening in the ring.

Ask ANY Daytonian

The Dayton market is filled with a great variety of people, but you'll find they have one thing in common—They like WHIO because of the fine CBS programs and interesting local features—plus complete and reliable news coverage through U.P., I.N.S. and Reuters.

**We have no
listeners
in Calcutta**

Many radio stations proudly display letters from listeners who live hundreds of miles from their transmitters. Many radio stations give you the double-talk about "coverage patterns" . . . "extended contours" . . . "protected areas" . . . "secondary night time coverage". But, they neglect the one most important thing. You are buying a market because you want to make sales in that market—and not in Calcutta.

If you want to make sales increases throughout 1944 — habit, sentiment, politics, theory have no justified place in your advertising program. Use the station which is the most progressive in its market . . . use the station whose results are the least expensive . . . use the station which has the best position on the dial, 560 KC . . . use WFIL, the station which covers Philadelphia, Pennsylvania — not Calcutta!

*Philadelphia's Most Progressive
Radio Station*

We've almost put the doctors out of business...

Apples tell the WCSC story.

Three years ago the Gulf Fruit Company, Charleston distributors for Moore & Dorsey Virginia Brand Apples, bought a daily fifteen-minute musical show on WCSC to try something new: sell apples by brand name... make people ask specifically for Moore & Dorsey Apples.

A letter from the Gulf Fruit Company's president, S. A. Trakas, says: "The results in three years are *far beyond anything that I could have hoped for*. During the first apple season our sales increased approximately 160%. The next year sales increased 51%. And in this third apple season now ending, sales are, *believe it or not*, 100% greater than last season.

"One of the best tributes to WCSC is our experience with Colonial Stores, A.&P., and other retailers who would not stock Moore & Dorsey Apples. After two years of radio promotion, consumer demand was so great that these firms asked that

we keep them stocked with Moore & Dorseys. Incidentally, our only promotion other than radio was occasional point-of-purchase display.

"Our brand of apples now *outsells all other brands together* in the Charleston area. I thought you would be interested in hearing about our success."*

In the booming Charleston market where retail sales are up 31% over last year's all time record; where bus traffic has increased 622% since 1938, it's our ability to produce results like these—that has upped our *own* business 125% in the last four years. Ask the Free & Peters Colonel

The CBS Station for the Coastal Carolinas

*P. S. After this advertisement was electrotyped, we at WCSC received a renewal for the *fourth* year.

**WSM — THE PUBLIC SERVICE
STATION IN TENNESSEE**

IN these days when much conjecture is advanced upon the subject of radio's prime function, WSM points with pride to its public service programs. A true knowledge of the community's needs and desires enables us to serve our listeners well.

Needless to say that when listeners are loyal to the station, they are equally as loyal to its advertisers. Confidence is the basis of good listening . . . and good buying.

Looking for an *effective, low cost* way to reach that **BIG**, rich Texas and Southwest market? Well, here are the key stations you positively don't want to overlook — **WFAA-WBAP**, with the largest 50,000 watt primary coverage in the United States, and **KGKO**, second only to its sister station. These stations are a vital part of the home, down this way, and have a powerful influence on the thinking and buying habits of Texas and Southwest folks. They will *respond* —if you use these stations!

WIDE WOR

DOUBLE EXPOSURE in TEXAS...

At a glance these two pictures look identical. But they're not. One represents your audience in Dallas, the other your audience in Fort Worth. True, these two large cities (respectively, the 2nd and 4th largest in Texas) are a mere 28 miles apart. But it might as well be 2,800 miles, so different are their listening and buying habits.

To cover both these rich markets in spot broadcasting you need a double exposure, a combination of two powerful 5000 watt stations, WRR, Dallas and KFJZ, Fort Worth. Expensive? To the contrary! You can use *both* these stations for the *price of one* and receive the added dividend of paying but one talent cost. A real two-for-one bargain for smart buyers.

WRR

Bonanza Country

In the West, where they do big things, it's the "Know-How" that counts. KSL reaches all of the Intermountain Empire—and what's more—knows how to keep its Westerners listening. For years, KSL has been serving more than half a million radio families to earn the title "The West Wise Station." In this bonanza market, these Westerners listen and respond. They have the will and the cash to buy. That's why advertisers find that one station—the "West Wise" station—is the efficient way to sell the Intermountain Empire . . . Ask Petry.

PA

SET THE PACE
THREE YEARS AGO
WITH THE FIRST
REGULAR 24-HOUR
RADIO NEWS WIRE

IN MILWAUKEE IT'S

Basically Sound
TO USE

WISN

**THE SHOW IS GOOD
WHERE THE WAITING
LINE IS LONG**

When you see a long queue in front of a theater, you know the show is good. All over Milwaukee you'll find long queues . . . going into war plants (Industrial employment is up 69.3% since 1940) . . . going into stores to spend their earnings (Industrial pay rolls are up 172.8% since 1940) . . . riding buses and streetcars (population is up 63,000 since 1940 even with more than 50,000 men in service) . . . tuning in WISN (the figures show the tremendously increased business on this result-producing radio station.)

Basically Sound . . . Because WISN has achieved the ideal 1-1-1 distribution of commercial programs:

Local Programs	33.9%
National Programs	32.9%
Columbia Network Programs	33.2%

Basically Sound . . . Because each year WISN has shown an increase in business and each year this increase has been greater:

1941 Increase Over 1940	5%
1942 Increase Over 1941	20%
1943 Increase Over 1942	39%
1943 Increase Over 1940	73%

Basically Sound . . . Because in 1943 each quarter's business on WISN has shown an increase. Even the "dog day months" of July, August and September, proved that there is no summer slump on WISN!

1943	% of Year's Total
First Quarter	19.2%
Second Quarter	24.7%
Third Quarter	25.8%
Fourth Quarter	30.3%

All of which means . . . If you want results in Milwaukee, you can get them where more and more advertisers are getting them every year . . . on WISN, the station with the listener preference.

Got Pioneering Blood in Your Veins?

Get into America's newest, undeveloped market through

KFQD

ANCHORAGE, ALASKA

790 KC

1000 W

*First in
Alaska!*

Here's the opportunity you've dreamed about — a booming territory with large buying power and a need for every kind of product. Reach it through Station KFQD.

KFQD blankets Alaska's most important metropolitan - industrial area. Anchorage, the "News Center of Alaska," is the hub of a heavily populated railbelt . . . headquarters of the Alaska Railroad, Alaska Airlines,* Civil Aeronautic Authority, Alaska Defense Command and many other major industries of Alaska which include: Fishing, canning, fur trapping, mining, lumbering, shipping and transportation.

The oldest station in Alaska (May, 1924), KFQD has proved to be the Territory's most outstanding adver-

tising medium. It's a "must" on the list of every forward-looking advertiser

*Government figures show that the Anchorage Municipal Airport handled in one month recently 7,695 airplane landings and departures. This exceeded the air travel handled by LaGuardia Field (N. Y.), Los Angeles, San Francisco and many other leading airports for the same period.

ESTABLISHED AS A SYMBOL OF NATIONAL SERVICE

Like the coat of arms of ancient families, the Insignia of the CBC has a special significance. Two golden electric flashes converge below a map of Canada symbolizing the fact that, through the medium of national radio, each part of the Dominion is brought into contact with all other sections of the country.

Just as the fathers and grandfathers of Canadians talked familiarly of the CPR, the GTP and the CNR so today modern Canadians think instinctively of the Canadian Broadcasting Corporation in terms of the initials CBC.

That is because CBC is an established institution whose influence is felt in every province, county and township in the Dominion. Day after day the CBC makes a definite contribution to the pattern of national life. Day after day it covers all Canada in a broad, national service . . . enabling Canadians everywhere to share fully in the panorama of music, drama, entertainment and news services provided by the converging of many of the finest programmes from five other great broadcasting systems with the programmes of the two networks of the CBC.

STATIONS OF CANADA

The following list of stations is arranged in call letter alphabetical order giving page number for complete station data.

Every effort has been made to present accurate and complete information in a self-explanatory method. Data was obtained from questionnaires sent to the stations early in the year and corrections were made up to the time of going to press to insure the inclusion of late developments.

One of the many

innovations that have

helped make . . .

The SUPER-MARKET of Recorded Radio Shows

IF you are looking for sure-fire, ready-made programs to solve the help problem, have a look at the shelves at radio's super-market, the NBC Radio-Recording Division.

You'll find a show for every taste, well-seasoned and neatly packaged, unrationed and far below the ceiling prices.

NBC's list of syndicated features contains many programs of varied lengths and varied subjects . . . all within a price range which enables you to keep the budget balanced . . . all of *proven* worth.

Here are a few of the outstanding buys:

The Weird Circle—spine-tingling mysteries by master storytellers of the past;

Modern Romances—real-life love stories, vibrant enough for the young, mellow enough for the old, from the pages of Modern Romances Magazine;

Stand by for Adventure—tales of exciting happenings in far places, among strange people;

Through the Sport Glass—a close-up of America's sports personalities and events with Sam Hayes.

The big-time list goes on and on—The Name You Will Remember, Let's Take a Look in Your Mirror, Betty and Bob, Time Out for Fun and Music, Getting the Most Out of Life Today—and many others.

And don't forget radio's super-market has a catering department too—to build programs to your specifications.

Is this your Program Director . . .

The radio manpower shortage is tough these days; especially tough on local programming.

That's where ASSOCIATED can help most!

Which is why more stations have bought ASSOCIATED in the past few months than in any comparable period in years.

You get a full measure of the most useful radio music from ASSOCIATED... large units... timely music and timeless . . . WITH PERFORMANCES UNMATCHED IN QUALITY AND RECORDING, and with variety for every program need.

Why not get the most out of a Library when you need it most? Get ASSOCIATED!

ALL ASSOCIATED TRANSCRIPTIONS are made on highest fidelity vertical-cut Vinylite, for AM and FM radio stations.

ASSOCIATED gives you a CONTINUITY SERVICE that makes complete SELLING programs for you from your Library.

AIR FEATURES, Inc.

247 PARK AVENUE

NEW YORK CITY

Dear Trade:

Once upon a time there was a radio copywriter who was called upon by his friend. This occurred at the residence of the radio copywriter which was, and had been for some time an insane asylum. The friend found the copywriter beating a typewriter and inquired what the copywriter was doing. The reply to that was that he, the copywriter, was writing himself a memo. He was questioned as to what he was writing himself. The reply was that how the hell would he know, he wouldn't get it until tomorrow!

It happens all the time—but there's always Kent-Johnson, Inc. and believe us this corporate body is at all times ready, willing and able to fly to your aid in time of need. What do we do? Almost anything. Get tickets to "Oklahoma," fib to a client's wife and call on copywriters in insane asylums—who are very kind and who leaves us the loan of their straitjackets.

But mostly we do commercial songs. We're handled by the Morris office.

RADIO'S RATION K... NBC *Thesaurus*

As cleverly packaged as the Army's field food kit—as useful to radio as that scientifically designed Ration K—that's the NBC Thesaurus, the extensive musical library assembled by the NBC Radio-Recording Division for your field work in the battles of brands and sales.

It can save man-hours and production headaches . . . coin money . . . become a hard-hitting sales weapon.

Sales resistance crumbles and enthusiasm sprouts the moment these big names and fine music go to work.

There's Sammy Kaye, Xavier Cugat, Lawrence Welk, Vincent Lopez and other popular orchestras.

There's fine music ready and waiting in Norman Cloutier's "Memorable Music," Rosario Bourdon's Symphony, Allen Roth's "Symphony of Melody"—and many more.

And such great programs as: America Marches with the Goldman Band, Church in the Wildwood with John Seagle, Golden Gate Quartet—a long list of other tested favorites.

Thesaurus is complete, includes sales portfolio, exploitation suggestions, tie-up ideas and publicity material.

For details of what the NBC Thesaurus has done for others—can do for *you*—write today!

... for the fastest
transcription ser-
vice in the world!

TREASURY

**CO-ORDINATOR
OF INTER-
AMERICAN
AFFAIRS**

MUZAK, today is producing *three times* as many transcriptions as before the war...with specially heavy government orders for the Armed Forces and war agencies.

But **YOU** are a good customer, too...working hard in advertising agencies and radio stations.

And we are serving both!

Through this trying period of war-orders and war-shortages, there has been no deviation in the quality of our *Vertical Cut* and *Lateral Cut* transcriptions.

And in 1944, we hope to be able to continue our original standards of service: *the fastest transcription service in the world.*

To our loyal clients, new and old, a sincere "thank you" for your continued patience and continued business.

SERVICES OFFERED: Keystone
Broadcasting System is a transcription
network principally covering secondary
markets from coast to coast. Its af-
filiated stations are joined together in
a national system by means of tran-
scriptions, eliminating wire charges. At
time of going to press, the network in-
cludes 200 affiliated stations. The Net
work supplies its stations with 84 fully
scripted sustaining shows per week fill-
ing 4 hours per day, seven days each
week, to a total of twenty-eight hours
per week.

This is the only national, full-sized
network in the United States offering
national radio advertisers the opportu-
nity to cover the secondary markets in-
tensively by means of electrical tran-
scription in a single transaction.

The System offers its facilities in
blocks of time from one hour down to
fifteen minute periods, and also makes
available spot periods of five minutes
duration down to twenty-five word
"chain breaks."

By **DEEMS TAYLOR**

President

THE American Society of Composers, Authors and Publishers enters its thirtieth year as the leading performing rights society in the United States with the resolve, like that of all American institutions, to do whatever is possible within its field of endeavor to aid and promote the war effort. As an unincorporated, non-profit, voluntary association, the Society's principal war activities lie within the field of morale.

Last June Ascap sponsored a memorial concert at Carnegie Hall in behalf of the late Sergei Rachmaninoff, for twenty-five years a distinguished member of the Society. The concert featured the music of the great Rachmaninoff, and was played by the Philharmonic-Symphony Orchestra under the baton of Howard Barlow and Frank Black, two of our foremost American conductors. Fritz Kreisler played violin obligati to three Rachmaninoff arias, which were sung by James Melton, the radio, concert and opera star. At the conclusion of these arias Mr. Kreisler, in a touching gesture of affection and respect for his old friend, took the first violinist's chair in the orchestra for the playing of the "Vocalise." The program ended with a performance of Rachmaninoff's Second Piano Concerto, played by the orchestra and the talented young pianist, Sergeant Eugene List. The proceeds from this concert, which amounted to nearly \$5,000, were turned over to the Armed Forces Master Records, Inc., an organization which has been faithfully supplying our service men throughout the entire world with good recordings of classical and semi-classical music. The many letters of appreciation which the Society has received from New Zealand, Guadalcanal, North Africa, England, Italy, from isolated posts in Alaska and from men on submarines, testify to the value of this morale work.

At present, the Society, in conjunction with the Los Angeles "Times," is preparing to sponsor a similar series of concerts with the Los Angeles Philharmonic on the West Coast sometime in January. Proceeds from these concerts will also be used to further the work of the Armed Forces Master Records, Inc.

On the Society's Honor Roll are the names of 108 members, as well as 31 men and 4 women employees, who are now serving in the armed forces. We have been fortunate in that so far ASCAP has not lost a single member or employee in the service.

On November 12th the Society presented two phonographs, together with albums of Victor Herbert recordings, to the Liberty Ship Victor Herbert. Capt. Arnt Magnusdal, master of the ship, accepted these gifts on behalf of his crew. The ship was launched last August 22nd as the sixtieth birthday present from the workers of the Wainwright Shipping Yard to Major General Jonathan M. Wainwright, who was taken prisoner by the Japs at Corregidor. A picture of the late Victor Herbert, one of the founders of the Society, has been built into the panel of the captain's quarters of the ship.

During the Third War Bond Drive, which ended October 5th, Ascap was chosen by the Bond Committee as the organization to head the drive in the music business in New York State. Our members purchased \$365,950 worth of bonds. Some of the publishing houses had made their reports to the film industry with which they are affiliated and, therefore, did not report to Ascap. Within the organization itself, the Society's employees bought \$6,819.80 worth of bonds. The grand total reported to the Treasury was \$372,769.80.

In the field of radio scripts, which are sent without charge to our licensed stations, Ascap has developed a program called "Marching to Music." This program is based on stories of the unsung men and women who have contributed their small part to the progress of American democracy. In these scripts the four freedoms of democracy are shown to be a living philosophy and to have had a long history in the development of our country. The OWI and other Government bureaus have commended the Society for the excellent job we are doing with those scripts. Many broadcasters report that they have sold these programs to sponsors.

From March 1, 1942 to October 1, 1943 the Society elected 243 new writer members and 37 publisher members, which now gives us a total membership of 1,763. In other words, although we are ending our second year of war, the Society as in the past, continues to be a growing organization. With confidence in the ultimate victory of our armed forces, Ascap looks forward to the continued growth and significance of the role which American music will play in the world of tomorrow.

ASSOCIATED MUSIC PUBLISHERS, INC. (AMP)

By **CLINTON M. FINNEY**

President

FOUNDING of AMP: Associated Music Publishers, Inc., was founded as a private corporation in the State of New York on December 22, 1926. Radio licenses have been issued since August, 1928. The corporation conducts a music publishing business and is exclusive agent for numerous foreign music publishers.

Scope: Represented in the AMP repertoire are 45 U. S. and European catalogs containing over 500,000 entries of which approximately 18,000 are copyrights. Copyright registration in Washington is in the name of AMP as owner. Ranging from symphonic works to popular dance music, including concert works for ensemble, solo instruments and voice, its repertoire constitutes a flexible and rich source of distinctive music for radio program builders.

AMP licenses: Licenses cover performing rights, "small" (i. e., strictly musical) and "grand" (i. e., musical-dramatic). AMP's radio license is unique in that it covers "small" and "grand" rights under a single fee. The radio license stipulates that: (1) the monthly fee shall be equal to a station's highest quarter-hour card rate; (2) that AMP will sell the licensee any music (covered by the license) which is for sale, and rent such music as is not for sale; (3) that AMP will indemnify the licensee against claims arising from the use of music covered by the license.

AMP licensees: The national networks, the principal regional networks and most of the important independent radio stations are holders of AMP licenses.

AMP headquarters: 25 West 45th Street, New York City. Telephone BRyant 9-0847. Cable address: MUSICPUB—NEWYORK.

AMP officers: C. M. Finney, President; John R. Andrus, Vice-Pres. and Treasurer; Ben Selvin, Vice-Pres.; Anna M. Kerner, Secretary; Gretl Urban, Manager, Music Department.

HELP THE
RED CROSS

BROADCAST MUSIC, INC.

By **M. E. TOMPKINS**

General Manager

IN MARCH of 1940, just four short years ago, BMI opened its doors for business. That today it has firmly established itself is not surprising because the radio industry itself brought BMI into existence—and the Industry has the well-earned reputation of making things “go” when it takes a hand.

Every broadcaster is proud of the fact that when any organization, from a small local group up to the national government, needs a resoundingly successful job done, its first reaction is: “let’s get help from the radio station!”

And so when radio needed to do a job for itself, a job of establishing a firm defense against a monopoly in music; when it determined that music costs to the stations be lowered and at the same time provide more equitable distribution of earnings to the composers; when it foresaw a greater opportunity to bring vital new composers to the listening public, it set about the task in the usual, efficient and successful manner in which the Industry operates.

Broadcast Music, Inc., is the result.

But now that four years have passed, let us, to turn a favorite phrase, “look at the record.”

The first year, to put it mildly, was hectic. One entire floor of a large New York building was filled with arrangers and music copyists. They were engaged in making brilliant new orchestrations of public domain music that was headed for limbo because nothing had been heretofore done to keep it vitally alive. They were arranging music for one hit after another that the public whistled, sang and danced to.

Then the peak was reached. BMI passed the acute stage of “growing pains” and settled into the routine of a well-oiled, efficient machine.

What might have taken a score of years—or a generation—to accomplish in some other business, BMI did in one short year!

But broadcasters are accustomed to getting results; BMI is the property of the broadcasters; ergo: results were obtained.

And what are these “results”?

Today in North America, there are 932 stations licensed by BMI—93 per cent of them. Coast-to-coast and regional networks have been signed. This, unquestionably, represents solid Industry support.

Equally important is the BMI list of affiliated publishers, for this is the group that provides the music.

At present BMI represents 750 publishers. From them, and through BMI come both the Standard works and the prevailing hit tunes. To cite a particular instance of the latter case, let us point to the record-breaking tune of 1943-44: PAPER DOLL. In this same bracket we find PISTOL PACKIN’ MAMA, BRAZIL, DEEP IN THE HEART OF TEXAS, BESAME MUCHO and others. As 1944 makes its way along, other hit tunes will come from BMI as a matter of course. And with stepped-up frequency!

Less spectacular than the division of popular music is the Script Department. From it has come an amazing wealth of material that has proved a treasure trove to the commercial or program manager who has assayed it.

At present, approximately 50 scripts per week, ranging from 5-minute shows to 30-minute productions, are available to BMI-licensed stations without cost. Countless enthusiastic letters are returned to the Script Department by commercial managers. "We sold your latest script five minutes after it arrived. Keep them coming!"

Too, the Standard Music Department has done a consistent job day after day. For example, it was this department that was responsible for the premier band performance of the new Russian National Hymn in the United States. And there's a little story behind this.

A copy of this hymn was received in New York by radio photo from Moscow. The Standard Department called in one of the top band arrangers; four days later the number was premiered before a huge audience at the University of Illinois where a band clinic was being conducted.

Louis Untermeyer was commissioned to write an English text for this new anthem, and his lyric has received national attention.

Why mention this particular instance?

Because it again establishes a "first" for BMI. It reflects the aggressive spirit of an institution brought into being by the Industry it serves—an aggressive determination that ample music, plus real SERVICE, shall be provided simultaneously with lowering (rather than increasing) cost to the Industry.

By PAUL HEINECKE

President

SESAC will continue in 1944 to make available to radio stations, without restriction, the music catalogs of over 100 leading American music publishers. SESAC music will continue, in 1944, to be used on more radio stations than any other music because—

SESAC has long term blanket licenses with nearly 900 commercial radio stations in the U. S., and—

SESAC music is American music, with over 100 publishers located in 20 states from coast to coast.

SESAC is the bread and butter music of radio, the standard music, the Western and cowboy songs, the religious hymns, the college tunes, the compositions of Edward MacDowell, Victor Herbert, Charles Wakefield Cadman, Mrs. H. H. A. Beach, etc. The diversified music which year after year provides the bulk of program material for your 18-hour broadcast day.

An ever increasing use of SESAC music by advertising agencies on virtually all commercial transcriptions indicates that agency production heads recognize the universal appeal of "bread and butter" music to the listening audience and that time buyers welcome the freedom which SESAC music affords from copyright clearance, bookkeeping deductions, extra fees, music restrictions, etc.

Service to stations is the 1944 watchword at SESAC. Our station relations staff will continue to visit every radio station in the country at least once every six months and assist station executives with their operational problems and music requirements. With 100 years of combined broadcasting experience, our station relations staff is well qualified to provide counsel on virtually every phase on station operation.

The seven proven sales plans have been of material benefit to commercial managers and the details of these commercial programs as well as three new sales plans will be made available to stations without charge through our station relations staff and Program Service Department.

Our liaison work for the Treasury Department on war bonds will continue in 1944 and we shall endeavor to provide the War Finance Division with a daily report of constructive suggestions obtained from stations and data on outstanding war bond programs observed throughout the country.

Our Program Service Department is geared for even more effective operation in 1944, with the preparation and publication of the SESAC Music Program Builder its first major accomplishment of the year. This 200 page volume contains the outstanding music in every program classification by title, composer, publisher, available arrangements, etc. It was created in response to requests from station executives for a practical handbook of specific music, or the cream of the music in every category, classified topically as well as alphabetically.

SESAC, its publishers, Program Service Department and station relations staff will continue to be at your service throughout 1944.

*"Heard 'round the World by
Transcription"*

MERLE PITT

MUSICAL DIRECTOR WNEW

- ★ **WALTER WINCHELL—MIRROR:**
"New Orchids to Merle Pitt's 'Five Shades of Blue'."
- ★ **BEN GROSS—NEWS:**
"Pitt rates a salute—a listening gem. If we had crown jewels, we'd bestow them on Pitt's Orchestra."
- ★ **BILLBOARD:**
"Merle Pitt's 'Five Shades of Blue' dish out a subtle, extremely listenable brand of rhythm, able to handle pops, standards, swing or sweet with equal finesse . . ."
Heard on transcriptions from coast to coast.

MUSICAL DIRECTORS Of Stations In The UNITED STATES and CANADA

When the story of radio's contribution to the winning of the war becomes recorded history the chapter concerning station musical directors will be an impressive one. For it is on the home front that this department is doing an all-out job providing morale-building musical entertainment for war plant workers. That war plant labor-management committees are cognizant of the important job musical directors are doing is indicated by the fact that many plants "pipe in" musical programs throughout the day and night shifts.

MOTION PICTURE COMMENTATORS OF STATIONS IN THE UNITED STATES

(Courtesy of the 1944 FILM DAILY YEAR BOOK)

Alabama

Anniston:
WHMA—Raymond Watson.
Birmingham:
WAPI—Lionel F. Baxter.
WBRC—Margaret Cotten.
Montgomery:
WSFA—John B. Demotte.
Muscle Shoals:
WLA Y—Becky Burns.
Selma:
WHBB—Marshall Parsons, Jr.
Opelika:
WJHO—Hugh Webb.

Arizona

Phoenix:
KOY—Dale M. Riley.
KTAR—Virginia Ricks.
Prescott:
KYCA—Roberta M. Pfister.
Safford:
KGLU—Lester McBride.
KGLU—Norman B Harrington
KGLU—Willard Shoecraft.
Tucson:
KTUC—Eileen Floreen.

Arkansas

El Dorado:
KELD—J. R. Duerson.
Helena:
KFPA—Rosalind Mundt.
Fort Smith:
KFPW—Louise Sewell.
Hot Springs:
KTHS—Frank A. Browne.

California

Berkeley:
KRE—Dick Brill.
Beverly Hills:
KMPC—Joe Tonner.
KMPC—Frank Robinson
Brown.
KMPC—Sam McKay.
Chico:
KHSL—"Woody" Woodling.
Fresno:
KFRE—Francis Quinn.
Hollywood:
KMTR—Irwin Allen.
KMTR—Eugenia Claire Smith.
KMTR—Kenneth O. Tikham.
KNX—George Fisher.
KNX—Hedda Hopper.
Los Angeles:
KECA—Erskine Johnson.
KMTR—Irwin Allen.
KRKD—Glad Hall.
Merced:
KYOS—Jo Ann Evans.
Oakland:
KLX—Harry Koplan.
Riverside:
KPPO—Grant Holcomb, Jr.
San Diego:
KFMB—Marion Whitney.
KGB—Molly Morss.
San Francisco:
KQW—Eddie Tabor.
KQW—Ira Blue.

KSFO—"Monica"
KYA—Jack Temple.
Santa Barbara:
KTMS—Stell Hollowell.

Colorado

Denver:
KFEL—Bob Cornwell.
KMYR—Jim Hawthorne.
KMYR—Bill Butterfield.
Durango:
KIUP—Raymond M. Beckner.

Connecticut

Bridgeport:
WICC—Denise Keller.
Stamford:
WSRR—Aime Gauvin.

District of Columbia

Washington:
WOL—Charlie Zurhorst.
WOL—Walter Compton.
WOL—Russ Hodges.
WOL—Eleanor Howard.
WTOP—Martha Baker.
WWDC—Vera Ash.

Florida

Fort Myers:
WFTM—June Warner.
Jacksonville:
WMBR—Ann Evans.
WPDQ—Anne Daily.
Miami:
WQAM—Leslie T. Harris.
WQAM—Alaine Powell.
Ocala:
WTMC—Flavius J. Yandle.
Orlando:
WDBO—W. G. McBride.
WDBO—Sally Martin.
WDBO—Myrtle Carry.
WOLF—Barbara Brown.
Panama City:
WDLP—Edward J. Couture.
WDLP—Eddie Pierce.

Pensacola:
WCOA—Vera K. Lawbaugh.
St. Augustine:
WFOY—Anne Bernice Nacht-
mann.

Sarasota:
WSPB—Jayne Taylor.

Tallahassee:
WTAL—Mary Charles
Fendley.

Tampa:
WFLA—Paul M. Jones.
WFLA—Barbara San.
WFLA—Patsy Kent.

West Palm Beach:
WJNO—Josephine McQuillin.

Georgia

Albany:
WALB—Mrs. Mildred Cann.
Augusta:
WRDW—Ben Lucas.
WRDW—Sara Twiggs.
Cedartown:
WGAA—Jean Brooks.

WGAA—Bob Wesley.
WGAA—Rowena Whitfield.
Columbus:
WRBL—Miss Billie Wismer.
WRBL—Jack Gibney.
Cordele:
WMJM—Elwela Powers.
Gainesville:
WRUF—Marion Morris.
Macon:
WMAZ—Mrs. Piercy Chestney.
WBML—Rosemary Lyons
Jones.
Rome:
WRGA—Kitty Alford.

Illinois

Aurora:
WMRO—Miss Lee Isom.
Bloomington:
WJBC—Frank Strand.
Chicago:
WBBM—Nate Gross.
WEDC—Marian Whitney.
WEDC—Elinor Ainsworth.
WJJD—Ruth Shaheen.
WLS—Wilma Gwilliam.
Decatur:
WSOY—Dorothy Masterson.
Galesburg:
WGIL—Bob Gibson.
Herrin:
WJPF—June Janess.
East St. Louis:
WTMV—Donna Lee.
Harrisburg:
WEBQ—Harold Cook.
WEBQ—Virginia Crane.

Herrin:
WJPF—June Janess.
Jacksonville:
WLDS—Becky Vaughan.
WLDS—Edgar Parsons.
Joliet:
WCLS—Marcia Mitchell.
Tuscola:
WDZ—Fran Booton.

Indiana

Gary:
WIND—Bob Diller.
Indianapolis:
WIBC—Jane Day.
WIRE—Martha Meadows.
Lafayette:
WBAA—Gilbert D. Williams.
Vincennes:
WAOV—Aline Arnold.

Iowa

Burlington:
KBUR—Mary Weaver.
KBUR—Ray Bennett.
Cedar Rapids:
WMT—Wanda Montz.
Davenport:
WOC—Margaret Sebastian
Des Moines:
KSO—Betty Wells.
Dubuque:
KDTH—Jane Thomas.
WKBB—Gleason E. Kistler.

Mason City:
KGLO—Bob Lewis.
Ottumwa:
KBZ—Harry Colman.
KBZ—Winn Colman.
Sioux City:
KTRI—Maxine Dierking.
Spencer:
KICD—Leo G. Rasmussen.

Kansas

Hutchinson:
KWBW—Vern Minor.
Kansas City:
KCKN—Dorothy Quinan.
KCKN—Ruth Royal.
KCKN—Marie Louise Schroder.
Pittsburg:
KOAM—Don M. Taylor.
Wichita:
KANS—Josephine Wright.
KFBI—Bette Clarke.

Kentucky

Bowling Green:
WLBT—Ann Hamilton.
WLBT—Helen Given.
Harlan:
WHLN—Vernan Nunn.
Paducah:
WPAD—Gene Peak.

Louisiana

Baton Rouge:
WJBO—Mary deVane.
WJBO—Ralph Sims.
WJBO—Eleanor Tatum.
Lafayette:
KVOI—Allison J. Theriot.
New Orleans:
WJBW—C. Carlson.
WWL—Jill Jackson.

Maine

Bangor:
WLBZ—Lorraine DesIsles.
Lewiston:
WCOU—Roselle Coury.

Maryland

Baltimore:
WCAO—Frank Fan.
WTH—George Browning.
Cumberland:
WTBO—Phillis Bord Brown.
Frederick:
WFMD—Bill McDonald.
WFMD—James F. Crist.
Salisbury:
WBOC—Lonny Starr.

Massachusetts

Boston:
WEZ—George W. Slade.
WCOP—Russell E. Offhaus.
WEEI—Priscilla Fortescue.
WORL—Mary Ruth.
Fitchburg:
WEIM—Joan Shirlee.
Greenfield:
WHAI—Arthur Jones.
Lowell:
WLLH—Betty Chalmers.
Springfield:
WMAS—Ethel B. Henin.
West Yarmouth:
WOCB—Frances B. Blaks.
Worcester:
WTAG—Jimmy Lee.

Michigan

Port Huron:
WHLS—Harmon L. Stevens.
WHLS—Mrs. George Owen.
Saginaw:
WSAM—Janice Widmoyer.
Sault Ste Marie:
WSOO—Frank F. Firmschild.

Minnesota

Mankato:
KYSM—Audrey Holmes.
KYSM—Patricia O'Brien.
Minneapolis:
WDGY—Barbara Flanagan.
St. Cloud:
KFAM—Hubert Hugo Warner.
St. Paul:
WMTN—Bruce G. Hayward.
Willmor:
KWLM—Herb Hengstler.

Mississippi

Columbus:
WCBI—Yvonne Brisbane.
Greenville:
WJPR—Sallie Kellner.
McComb:
WSKB—John Cunningham.
WSKB—Paul Simpkins.
Natchez:
WMIS—Myra Boudreau.

Missouri

Hannibal:
KHMO—Betty Huston.
Kansas City:

NOTE: Data in this release, with the exception of columns (2), (3), (4), (14), (15) and (16) are not exactly comparable with similar releases for prior years, because the network reports include employees of eight 50 kw stations and one 5 kw station. In prior years, an apportionment of these employees and their compensation had been made by the Commission between the networks and stations.

- 9: Fraternal Day (Alabama). Canadian Thanksgiving Day.
- 12: Columbus Day.
- 18: Alaska Day.
- 19: Surrender of Cornwallis (1781).
- 27: Navy Day. Theodore Roosevelt Born (1858).
- 31: Hallowe'en. Admission Day, Nevada (1864).

November

- 1: All Saints' Day (Louisiana).
- 2: General Election Day. North and South Dakota Admitted (1889).
- 4: John Philip Sousa Born (1854).
- 8: Montana Admitted (1889).
- 11: Armistice Day. Washington Admitted (1889).
- 16: Oklahoma Admitted (1907).
- 17: Suez Canal Opened (1869).
- 21: North Carolina Admitted (1789).
- 25: Thanksgiving Day.

December

- 3: Illinois Admitted (1818).
- 7: Delaware Day. Pearl Harbor Attacked (1941).
- 8: Eli Whitney Born (1765). U. S. Declared War on Japan (1941).
- 9: Germany-Italy Declare War on U. S. (1941).
- 10: U. S. Declares War on Germany-Italy (1941). Mississippi Admitted (1817).
- 11: Alfred Nobel Born (1833). Indiana Admitted (1816).
- 12: First Marconi Wireless Across Atlantic (1901). Pennsylvania Admitted (1787).
- 14: Alabama Admitted (1819).
- 15: Bill of Rights Day.
- 16: Boston Tea Party (1773).
- 18: New Jersey Admitted (1787).
- 21: Shortest Day of Year. Pilgrims Landed at Plymouth Rock (1620). Woodrow Wilson's Birthday (South Carolina).
- 25: Christmas Day.
- 28: Iowa Admitted (1848).
- 29: Texas Admitted (1845).
- 31: New Year's Eve.

ARBOR DAY is observed in states on different days, usually in the Spring. The dates in the same states often vary from year to year by proclamation.

CODE OF WARTIME PRACTICES FOR AMERICAN BROADCASTERS OFFICE OF CENSORSHIP

EDITION OF DECEMBER 1, 1943

THIS is the third revision of the Code of Wartime Practices for American Broadcasters.

The principle of censorship remains the same. It is voluntary and broadcast management is responsible for fulfilling the function in its own medium. The broadcasting industry, to this end, should be constantly aware of the dangers inherent in (1) news broadcasts; (2) routine programming; and (3) commercial copy.

To combat these dangers effectively, broadcast management must be in complete control of all programming every minute of every day of operation. This responsibility should not be delegated to anyone over whom the management does not exercise control.

The facilities of the Office of Censorship are at the disposal of broadcasters 24 hours a day, to assist them with consultation and advice when any doubt arises as to the application of this Code. The following are the principal advisory guideposts (as revised) which are intended to aid in discharging censorship responsibilities:

I. NEWS BROADCASTS AND COMMENTARIES

Broadcasters should edit all news in the light of this Code's suggestions and of their own specialized knowledge, regardless of the medium or means through which such news is obtained.

Special attention is directed to the fact that all of the requests in this Code are modified by a proviso that the information listed may properly be broadcast when authorized by appropriate authority. News on all of these subjects will become available usually from Government sources; but in war, timeliness is an important factor and the Government unquestionably is in the best position to decide when disclosure is timely.

Caution is advised against reporting,

under the guise of opinion, speculation, or prediction, any fact which has not been released by appropriate authority.

It is requested that news in any of the following classifications be kept off the air unless made available for broadcast by appropriate authority or specifically cleared by the Office of Censorship.

(a) WEATHER. — Weather forecasts other than those officially released by the Weather Bureau. Mention of wind direction or barometric pressure in current or past weather (including summaries and recapitulations) except when contained in EMERGENCY warnings released specifically for broadcast by the Weather Bureau authorities.

NOTE: Special events reporters, covering sports or any outdoor assignments (fires, flood, storms, etc.), are cautioned especially against mention of wind directions.

(b) **ARMED FORCES.**—Type and movement of United States Army, Navy and Marine Corps units, within or without continental United States including information concerning—

Location.
Identity.
Exact Composition.
Equipment.
Strength.
Destination.
Routes.
Schedules.
Assembly for Embarkation.
Prospective Embarkation.
Actual Embarkation.

Such information regarding troops of friendly nations on American soil.

Revelation of possible future military operations by identifying an individual known for a specialized activity.

Exceptions: (1) **ARMED FORCES IN THE UNITED STATES:** Those in training camps and units assigned to domestic police duty, as regards names, addresses, location and general character.

(2) **ARMED FORCES OUTSIDE THE UNITED STATES:**

Names and locations (without unit identification) if presence of United States forces in area has been announced officially.

Names of Naval personnel without mention of their ships, unless said ships have been announced by the Navy as lost or damaged.

(c) **SHIPS (CONVOYS, ETC.).**—Type and movements of United States Navy, or merchant vessels, or transports, of convoys, of neutral vessels, or vessels of nations opposing the Axis powers in any waters, including information concerning—

Identity.
Location.
Port of Arrival.
Time of Arrival.
Prospect of Arrival.
Port of Departure.
Ports of Call.
Nature of Cargoes.
Assembly.
Personnel.

Enemy naval or merchant vessels in any waters, their

Type.
Identity.

Location.
Movements.

Secret information or instructions about sea defenses, such as—

Buoys, lights and other guides to navigators.

Mine fields and other harbor defenses.

Ship in construction—

Type.
Number.
Size.
Location.

Advance information on dates of launchings, commissionings.

Physical description, technical details of shipyards.

Movement of diplomatic exchange ships under the direction of the State Department.

Exceptions: Movements of merchant vessels on Great Lakes or other sheltered inland waterways unless specific instances require special ruling.

(d) **DAMAGE BY ENEMY LAND OR SEA ATTACKS.**—Information on damage to military objectives in continental United States or possessions, including—

Docks.
Railroads.
Airfields.
Public utilities.
Industrial plants engaged in war work.

Counter-measures or plans of defense.

Appropriate authority: for information about damage from enemy attacks to military objectives on land within continental United States or possessions is the commanding officer in the zone of combat, or the Army Bureau of Public Relations, Washington. (For the Hawaiian Islands, the Navy).

(e) **ACTION AT SEA.**—Information about the sinking or damaging from war causes of war or merchant vessels in any waters.

Appropriate authority: Appropriate authority for the release of news about the sinking or damaging of naval or merchant vessels in or near American waters is the commanding officer of the district in which the action occurs, or Naval Office of Public Relations, Washington.

(f) **ENEMY AIR ATTACK.**—Estimates of number of planes involved; number of bombs dropped; damage to—

Fortifications.

Docks.

Railroads.

Ships.

Airfields.

Public utilities.

Industrial plants engaged in war work.

All other military objectives.

Warnings or reports of impending air raids; remote ad lib broadcasts dealing with raids, during or after action.

Mention of any raid in the continental United States during its course, except on appropriate authority of the designated representatives of the Defense Commander in whose area the raid occurs or the War Department in Washington.

News which plays up horror or sensationalism; deals with or refers to unconfirmed reports or versions; refers to exact routes taken by enemy planes, or describes countermeasures of defense, such as troop mobilization or movements, or the number and location of anti-aircraft guns or searchlights in action.

Exceptions: After an air raid, general descriptions of action after all-clear has been given. Nothing in this request is intended to prevent or curtail constructive reporting or programming of such matters as feats of heroism, incidents of personal courage, or response to duty by the military or by civilian defense workers.

(g) ACCREDITED MILITARY AND NAVAL CORRESPONDENTS.—No provisions in this Code of Wartime Practices for American Broadcasters modify obligations assumed by accredited correspondents who accompany Army or Navy forces or are given special accrediting by the War or Navy departments to visit restricted areas in the United States.

These commitments, under War and Navy department practice, pledge such correspondents to submit to censorship anything they write in zones of combat or restriction, or what they may write at a later date as result of their observation in these zones. The military department concerned is the censorship agency for all such material.

In case of a protracted enemy attack on the continental United States, necessitating military declaration of a combat zone, censorship within such an area would, of necessity, be by military authority. Accrediting of news gatherers

for such a zone will be as in any other combat area. In the case of such an attack and declaration of a military zone of combat, the requests in this Code remain applicable to broadcast operations outside the declared area.

(h) PLANES—

Air Units.—Military air units of the United States and the United Nations as to—

Disposition.

Missions.

Movements.

New characteristics.

Strength.

Information concerning new military aircraft and related items of equipment or detailed information on performance, construction and armament of current military aircraft or related items; military activities of commercial air lines or the Civil Air Patrol.

(i) FORTIFICATIONS AND AIR INSTALLATIONS.—Location and description of fortifications, including—

Coast Defense Emplacements.

Anti-aircraft guns and other air defense installations.

Defense Installation details of public airports used for military purposes.

Camouflaged objects.

Location of specially constructed bomb shelters.

Information concerning installations for military purposes outside the U. S.

(j) SABOTAGE.—Specifications (including information on bottlenecks) which saboteurs could use to damage military objectives. No mention of sabotage should be made except on appropriate authority of the military agency concerned or the Department of Justice.

(k) PRODUCTION. (see also SABOTAGE)

—New or secret Allied military weapons, identity and location of plants making them, designs or rate of production or consumption of any specific type of war materiel, formulas or experiments connected with war production.

Information on imports, exports or Government stock piles of critical or strategic materials such as tin, natural rubber, uranium, chromium, tantalum, manganese, quinine, tungsten and high-octane gasoline.

Transportation—Movement or transportation of war materiel.

NOTE: Progress of production for general categories of war materiel such as planes, tanks, guns, vehicles and munitions may be reported, but statistical information on specific weapons such as bombers, fighter planes, 155 mm. guns, medium tanks, etc., should be avoided without appropriate authority.

(l) **COMBAT ZONE INTERVIEWS AND LETTERS.**—Interviews with service men or civilians from combat zones (including accounts of escapes from foreign territory) should be submitted for review before broadcast, either to the Office of Censorship or to the appropriate Army or Navy Public Relations Officer. Letters from combat zones are censored at the source, for home and family consumption only. When used on the air, broadcasters should measure the contents of such letters in the light of the provisions of this Code. In case of any doubt, consult the Office of Censorship. (See clause on Armed Forces, regarding unit identifications).

(m) **WAR PRISONERS, INTERNEES, CIVILIAN PRISONERS.**—Information as to arrival, movements, confinement, escape or identity of military prisoners from war zones; identity of persons arrested or interned as enemy aliens; locations or operations of alien internment camps; place of confinement of civilians convicted of treason, espionage or sabotage.

NOTE: The appropriate authority for information as to war prisoners or their camps is the War Department; for information as to resettled persons, the project official in charge; for information as to enemy aliens or their camps, or civilian prisoners described above, the Department of Justice. In any inquiry, please make certain whether the individuals involved are military prisoners of war, enemy aliens or resettled citizens or aliens.

(n) **MILITARY INTELLIGENCE.**—Information concerning war intelligence, or the operations, methods, or equipment of counter-intelligence of the United States or its allies or the enemy.

Information concerning secret detection devices.

Information concerning secret United States or Allied means or systems of military communication, including the establishment of new International points of communication.

(o) **WAR NEWS COMING INTO THE UNITED STATES.**—War information originating outside United States territory may be broadcast if its origin is made plain.

Any recordings or information for broadcast gathered in any form that is sent across the United States-Canadian border should contain nothing that will conflict with the censorship of the country in which the information originates.

(p) **GENERAL.**—*Casualties.* Identification of combat casualties until made available for publication by the War or Navy Departments or the next of kin.

Strategy.—Secret war plans or diplomatic negotiations or conversations which concern military operations.

Art Objects, Historical Data.—Information disclosing the new location of national archives, or of public or private art treasures.

Diplomatic Information.—Information about the movements of the President of the United States (including advance notice of the place from which he will broadcast); information of official military, or diplomatic missions of the United States or of any other nation opposing the Axis powers—routes, schedules, destinations within or without continental United States; movements of ranking Army or Naval officers and staffs on official missions; movements of other individuals or units on military or diplomatic missions.

II. PROGRAMS

These suggestions are made in order that broadcasters will have a pattern to follow in accomplishing the most important censorship function of program operation: keeping the microphone under

the complete control of the station management, or its representatives.

(a) REQUEST PROGRAMS.—*Music*.—No telephoned or telegraphed requests for musical selections should be accepted. No requests for musical selections made by word-of-mouth at the origin of broadcast, whether studio or remote, should be honored.

Talk.—No telephoned or telegraphed requests for service announcements should be honored, except as hereinafter qualified. Such service announcements would include information relating to—

- Lost pets.
- “Swap” ads.
- Mass meetings.
- Personal messages.
- Club meetings.
- Club programs, etc.
- Vital statistics.

The same precaution should be observed in accepting “classified advertisements” for broadcasting.

No telephoned, telegraphed or word-of-mouth dedications of program features or segments thereof should be broadcast.

No telephoned, telegraphed or word-of-mouth auction bids, contributions or similar acknowledgments from listeners, should be broadcast.

Exceptions: Emergency announcements (such as those seeking blood donors, doctors, lost persons, lost property, etc.) may be handled in conventional manner if the broadcaster confirms their origin. They should emanate from the police, the Red Cross, or similar recognized governmental or civilian agency.

Service announcements may be honored when source is checked and material is submitted in writing, subject to rewriting by station continuity staff. Requests for the broadcast of greetings or other programs to commemorate personal anniversaries may be honored if the actual broadcast is not made on the anniversary date or at the time or on the date designated in the request.

ALL requests, subject to the above qualifications, may be honored when submitted via mail, or otherwise in writing if they are held for an unspecified length of time and if the broadcaster staggers the order in which such requests are honored, rewriting any text which may be broadcast.

(b) QUIZ PROGRAMS.—It is requested that all audience-participation type quiz programs originating from remote points, either by wire, transcription or short wave, should not be broadcast, except as qualified hereinafter. Any program which permits the public accessibility to an open microphone is dangerous and should be carefully supervised. Because of the nature of quiz programs, in which the public is not only permitted access to the microphone but encouraged to speak into it, the danger of usurpation by the enemy is enhanced. The greatest danger here lies in the informal interview conducted in a small group—10 to 25 people. In larger groups, where participants are selected from a theater audience, for example, the danger is not so great.

Generally speaking, any quiz program originating remotely, wherein the group is small, wherein no arrangement exists for investigating the background of participants, and wherein extraneous background noises cannot be eliminated at the discretion of the broadcaster, should not be broadcast. Included in this classification are all such productions as man-in-the-street interviews, airport interviews, train terminal interviews, and so forth.

In all studio-audience type quiz shows, where the audience from which interviewees are to be selected numbers less than 50 people, program conductors are asked to exercise special care. They should devise a method whereby no individual seeking participation can be *guaranteed* participation.

(c) FORUMS AND INTERVIEWS.—During forums in which the general public is permitted extemporaneous comment, panel discussions in which more than two persons participate, and interviews conducted by authorized employees of the broadcasting company, broadcasters should devise methods guaranteeing against the release of any information which might aid the enemy as described in Section I of the Code. If there is doubt concerning the acceptability of material to be used in interviews, complete scripts should be submitted to the Office of Censorship for review. (See paragraph (L) of Section 1.)

(d) SPECIAL EVENT REPORTING (ad lib).—Special events reporters should study carefully the restrictions suggested in Section I of the Code, especially those referring to interviews and descriptions following enemy offensive action. Reporters and commentators should guard against use of descriptive material which might be employed by the enemy in plotting an area for attack.

If special programs which might be considered doubtful enterprises in view of our effort to keep information of value from the enemy are planned, outlines should be submitted to the Office of Censorship for review.

(See also Paragraph (a), Section I.)

(e) **SIMULATED AIR RAIDS, BLACKOUTS.**—In view of the provisions contained in Paragraph (f) Section I of this Code, which prescribe radio silence at the scene of an air raid until the “all clear” is sounded, it is the belief of this office, in which the Office of Civilian Defense concurs, that broadcasting stations should not employ their facilities during a simulated air raid in any way which would encourage listeners to rely upon the medium for advice and assistance should an actual raid occur. This is intended to place no proscription on the legitimate broadcast of descriptions and commentaries dealing with simulated air raids and blackouts after the events have been conducted.

(f) **COMMERCIAL CONTINUITY.**—Broadcasters should be alert to prevent the transmission of subversive or restricted information through the use of commercial continuity in program or announcement broadcasts. In this connection, the continuity editor should regard his responsibility as equal to that of the news editor.

III. FOREIGN LANGUAGE BROADCASTS

(a) **PERSONNEL.**—The Office of Censorship, by direction of the President, is charged with the responsibility of removing from the air all those engaged in foreign language broadcasting who, in the judgment of appointed authorities in the Office of Censorship, endanger the war effort of the United Nations by their connection, direct or indirect, with the medium. Bases of judgment in exercising this function will be twofold: (1) current material written for broadcast or broadcast over American facilities; (2) past and/or present conduct of the individual, including evidence substantiating his sympathy with the regimes of our enemies. This function of the Office of Censorship is not intended to relieve in any measure the full responsibility resting with the management of the foreign language broadcasting station to employ only those whose loyalty he does not question. There extends to such broadcast management the additional responsibility to report to the Office of Censorship the names of any personnel in this field who might be suspected for any reason.

(b) **SCRIPTS.**—Station managements

are requested to require all persons who broadcast in a foreign language to submit to the management in advance of broadcast complete scripts or transcriptions of such material. (This procedure does not apply to programs originated and produced by the Office of War Information and distributed to foreign language stations). It is further requested that this material be checked “on the air” against the approved script and that no deviations therefrom be permitted. These scripts or transcriptions should be kept on file at the station.

(c) **CENSORS AND MONITORS.**—In order that these functions can be performed in a manner consistent with the demands of security, station managements are reminded that their staffs should include capable linguists as censors and monitors whose duty it will be to review all scripts in advance of broadcast and check them during broadcast against deviation.

(d) **SUBMISSION OF SCRIPTS.**—From time to time, the Office of Censorship will ask foreign language broadcasters to submit specified scripts to this office for review. If a station obtains its foreign language program from another originating point via network, these requirements do not apply; in such event the originating station will be held responsible for fulfilling the requests contained herein.

(e) Station managements are reminded that all provisions of this code, as outlined in Section I and II, apply equally to foreign language broadcasting.

Broadcasters should ask themselves, “Is this information of value to the enemy?” If the answer is “Yes,” they should not use it. If doubtful they should measure the material against the Code.

From time to time the Office of Censorship may find it necessary to issue further communications either to interpret certain existing requests, amend or delete them, or otherwise to cover special emergency conditions. Such communications will be addressed to managers of radio stations and networks and should receive preferential attention.

If information concerning any phase of the war effort should be made available anywhere, which seems to come from doubtful authority, or to be in conflict with the general aims of these requests; or if special restrictions requested locally or otherwise by various authorities seem unreasonable or out of harmony with this summary, it is recommended that the question be submitted at once to the Office of Censorship, Washington. Telephone Executive 3800; Teletype WA-434.

THE OFFICE OF CENSORSHIP,
BYRON PRICE, *Director.*

THE N A B CODE

ADOPTED BY THE 17th ANNUAL CONVENTION OF THE NAB

JULY 11, 1939

(Amended April 28, 1943)

RECOGNIZING the importance of radio broadcasting in the national life and believing that broadcasters have sufficient experience with the social side of the industry to formulate basic standards for the guidance of all, the National Association of Broadcasters hereby formulates the following revised Code:

Children's Programs

Programs designed specifically for children reach impressionable minds and influence social attitudes, aptitudes and approaches and, therefore, they require the closest supervision of broadcasters in the selection and control of material, characterization and plot.

This does not mean that the vigor and vitality common to a child's imagination and love of adventure should be removed. It does mean that programs should be based upon sound social concepts and presented with a superior degree of craftsmanship; that these programs should reflect respect for parents, adult authority, law and order, clean living, high morals, fair play and honorable behavior. Such programs must not contain sequences involving horror or torture or use of the supernatural or superstitious or any other material which might reasonably be regarded as likely to overstimulate the child listener, or be prejudicial to sound character development. No advertising appeal which would encourage activities of a dangerous social nature will be permitted.

To establish acceptable and improving standards for children's programs, the National Association of Broadcasters will continuously engage in studies and consultations with parent and child study groups. The results of these studies will be made available for application to all children's programs.

Controversial Public Issues

As part of their public service, networks and stations shall provide time for the presentation of public questions including those of controversial nature. Such time shall be allotted with due regard to all the other elements of balanced program schedules and to the degree of public interest in the questions to be presented. Broadcasters shall use their best efforts to allot such time with fairness to all elements in a given controversy.

Time for the presentation of controversial issues shall not be sold, except for political broadcasts. There are three fundamental reasons for this refusal to sell time for public discussion and, in its stead, providing time for it without charge. First, it is a public duty of broadcasters to bring such discussion to the radio audience regardless of the willingness of others to

pay for it. Second, should time be sold for the discussion of controversial issues, it would have to be sold, in fairness, to all with the ability and desire to buy at any given time. Consequently, all possibility of regulating the amount of discussion on the air in proportion to other elements of properly balanced programming or of allotting the available periods with due regard to listener interest in the topics to be discussed would be surrendered. Third, and by far the most important, should time be sold for the discussion of controversial public issues and for the propagation of the views of individuals or groups, a powerful public forum would inevitably gravitate almost wholly into the hands of those with the greater means to buy it.

The political broadcasts excepted above are any broadcasts in connection with a political campaign in behalf of or against the candidacy of a legally qualified candidate for nomination or election to public office, or in behalf of or against a public proposal which is subject to ballot. This exception is made because at certain times the contending parties want to use and are entitled to use more time than broadcasters could possibly afford to give away.

Nothing in the prohibition against selling time for the presentation of controversial public issues shall be interpreted as barring sponsorship of the public forum type of program when such a program is regularly presented as a series of fair-sided discussions of public issues and when control of the fairness of the program rests wholly with the broadcasting station or network.

Educational Broadcasting

While all radio programs possess some educative values, broadcasters nevertheless desire to be of assistance in helping toward more specific educational efforts, and will continue to use their time and facilities to that end and, in cooperation with appropriate groups, will continue their search for improving applications of radio as an educational adjunct.

News

News shall be presented with fairness and accuracy and the broadcasting station or network shall satisfy itself that the arrangements made for obtaining news insure this result. Since the number of broadcasting channels is limited, news broadcasts shall not be editorial. This means that news shall not be selected for the purpose of furthering or hindering either side of any controversial public issue nor shall it be colored by the opinions or desires of the station or network management, the editor or others engaged in its preparation or the person actually delivering it over the air, or, in the case of sponsored news broadcasts, the advertiser.

The fundamental purpose of news dissemination in a democracy is to enable people to know what is happening and to understand the meaning of events so that they may form their own conclusions and, therefore, nothing in the foregoing shall be understood as preventing news broadcasters from analyzing and elucidating news so long as such analysis and elucidation are free of bias.

News commentators as well as all other newscasters shall be governed by these provisions.

Religious Broadcasts

Radio, which reaches men of all creeds and races simultaneously, may not be used to convey attacks upon another's race or religion. Rather it

should be the purpose of the religious broadcast to promote the spiritual harmony and understanding of mankind and to administer broadly to the varied religious needs of the community.

Solicitation of Memberships

Solicitations of memberships in organizations, except where such memberships are incidental to the rendering of commercial services such as an insurance plan either in respect to casualty to life or property, or for membership in the American Red Cross or like organizations engaged in charitable work, are deemed to be unacceptable under the basic theory of the Code and therefore time should be neither given nor sold for this purpose.

Commercial Programs and Length of Commercial Copy

Acceptance of programs and announcements shall be limited to products and services offered by individuals and firms engaged in legitimate commerce; whose products, services, radio advertising, testimonials and other statements, comply with pertinent legal requirements, fair trade practices and acceptable standards of good taste.

Brief handling of commercial copy is recommended procedure.

Member stations shall hold the length of commercial copy, including that devoted to contests and offers, to the following number of minutes and seconds:

Daytime

Five-minute programs	2:00
*Five-minute news programs	1:45
Ten-minute programs	2:30
Fifteen-minute programs	3:15
Twenty-five-minute programs	4:15
Thirty-minute programs	4:30
Sixty-minute programs	9:00

Night-time

Five-minute programs	1:45
*Five-minute news programs	1:30
Ten-minute programs	2:00
Fifteen-minute programs	2:30
Twenty-five-minute programs	2:45
Thirty-minute programs	3:00
Sixty-minute programs	6:00

Exceptions:

The above limitations do not apply to participation programs, announcement programs, "musical clocks," shoppers' guides and local programs falling within these general classifications.

Because of the varying economic and social conditions throughout the United States, members of the NAB shall have the right to present to the NAB for special ruling local situations which in the opinion of the member may justify exceptions to the above prescribed limitations.

* Further restriction by individual stations is recommended.

Resolution

Adopted by the 17th Annual Convention
National Association of Broadcasters

To clarify the phrase "Accepted Standards of Good Taste," and the canons of good practice set forth in the NAB Code, therefore be it RESOLVED:

That member stations shall not accept for advertising:

1. Any spirituous or "hard" liquor.
2. Any remedy or other product the sale of which or the method of sale of which constitutes a violation of law.
3. Any fortune-telling, mind-reading, or character-reading, by hand-writing, numerology, palm-reading, or astrology, or advertising related thereto.
4. Schools that offer questionable or untrue promises of employment as inducements for enrollment.
5. Matrimonial agencies.
6. Offers of "homework" except by firms of unquestioned responsibility.
7. Any "dopester," tip-sheet or race track publications.
8. All forms of speculative finance. Before member stations may accept any financial advertising, it shall be fully ascertained that such advertising and such advertised services comply with all pertinent federal, state and local laws.
9. Cures and products claiming to cure.
10. Advertising statements or claims member stations know to be false, deceptive or grossly exaggerated.
11. Continuity which describes, repellently, any functions or symptomatic results of disturbances, or relief granted such disturbances through use of any product.
12. Unfair attacks upon competitors, competing products, or upon other industries, professions or institutions.
13. Misleading statements of price or value, or misleading comparisons of price or value.

FUNCTIONS

The American Association of Advertising Agencies was formed in 1917 by the amalgamation of the New England, New York, Philadelphia, Southern and Western Advertising Agency Associations—to promote the interests and raise the standards of advertising and of the advertising agency business.

It welcomes to membership any advertising agency qualified to aid in this purpose by reason of its ability to serve the cause of advertising, its financial soundness and its demonstrated desire to adhere to sound and ethical business practices.

The aims of the Association are partly ethical and partly economic. It is a professional body and also a trade association. It aims to raise standards, to improve technique, to ascertain values, to safeguard relations, and to cooperate with other organized effort in related fields.

One of the major aims of the Association is to keep advertising agency practice on a high level, in order that it may be most useful to the advertiser, most helpful to the publisher and respected by business men.

Early in its career the Association adopted for the guidance of its members two official statements. One is entitled "Agency Service Standards," in which agency service is defined, so that advertisers and publishers may know what to expect and agencies may know what should be required of them, thus discouraging the incompetent and encouraging those equipped to render effective service.

The other statement, entitled "Standards of Practice," deals with agency relations with media, clients and the public, with fair and ethical agency competition, and other professional ethics.

DIRECTORS

Term Expiring 1944

E. Alschuler, Electrical Research Laboratories, Inc.; W. R. G. Baker, General Electric Company; Floyd C. Best, Chicago Telephone Supply Co.; George R. Blackburn, Chicago Transformer Corporation; A. Blumenkrantz, General Instrument Corporation; Roy Burlew, Ken-Rad Tube & Lamp Corporation; Walter Evans, Westinghouse Electric & Manufacturing Co.; A. H. Gardner, Colonial Radio Corporation; W. P. Hilliard, Bendix Radio; J. J. Kahn, Standard Transformer Corporation; Ray H. Manson, Stromberg-Carlson Co.; Ray F. Sparrow, P. R. Mallory & Co., Inc.; R. C. Sprague, Sprague Specialties Company; A. S. Wells, Wells-Gardner & Co; T. A. White, Jensen Radio Manufacturing Co.

Term Expiring 1945

Ben Abrams, Emerson Radio & Phonograph Corp; M. F. Balcom, Sylvania Electric Products, Inc.; R. C. Cosgrove, The Crosley Corporation; L. L. Kelsey, Stewart-Warner Corporation; J. J. Nance, Zenith Radio Corporation; Glenn W. Thompson, Noblitt-Sparks Industries, Inc.

Term Expiring 1946

John Ballantyne, Philco Corp.; P. S. Billings, Belmont

Radio Corp.; C. B. Jolliffe, RCA; Paul V. Galvin, Galvin Mfg. Corp.; E. A. Nicholas, Farnworth Television & Radio Corp.; David T. Schultz, Raytheon Prod. Corp.

Radio Manufacturers Assn. of Canada

159 Bay St., Toronto, Ont., Canada
 Adelaide 1531

OFFICERS

President L. A. Young
 Vice-President R. M. Brophy
 Executive Secretary W. W. Richardson
 Chairman of Parts Division R. Randall
 Chairman of Engineering Committee C. J. Irwin

FUNCTIONS

This association is a non-profit and co-operative organization founded in 1926 to promote the interests of the radio manufacturing industry in Canada.

Radio Script & Transcription Exchange, Federal Radio Education Committee

U. S. Office of Education, Washington, D. C.
 Republic 1820, Extension 2225

OFFICERS

Director R. R. Lowdermilk

FUNCTIONS

The exchange is designed to promote more effective local broadcasting by educational and civic organizations and radio stations by serving as a clearing house for selected educational radio scripts, transcriptions and production aids, and as a source of all kinds of information pertaining to the field of educational radio.

Radio Technical Planning Board

OFFICERS

Chairman Dr. Walter R. C. Baker
 Vice-chairman Dr. Alfred N. Goldsmith
 Treasurer Bond Geddes
 Coordinator L. C. F. Horle
 Secretary W. B. Cowlich
 Asst. Secretary Mrs. Martha Kinzie
 Spectrum Utilization: A. N. Goldsmith, chairman; R. H. Manson, vice-chairman.
 Frequency Allocation: C. B. Jolliffe, chairman; F. M. Ryan, vice-chairman.
 H. F. Generation: R. M. Wise, chairman; H. F. Argento, vice-chairman.
 Standard Broadcasting: Howard Frazier, chairman; Burgess Dempster, vice-chairman.
 V. H. F. Broadcasting: G. E. Gustafson, chairman; C. M. Jansky, vice-chairman.
 Television: D. B. Smith, chairman; I. J. Kaar, vice-chairman.
 Facsimile: J. V. L. Hogan, chairman; C. J. Young, vice-chairman.
 Radio Communication: Haraden Pratt, chairman; H. H. Beverage, vice-chairman.
 Relay Systems: E. W. Engstrom, chairman; Ralph Bown, vice-chairman.
 Radio Range, Direction & Recognition: W. P. Hilliard, chairman; C. G. Fick, vice chairman.
 Aeronautical Radio: D. W. Rentzel, chairman; D. K. Martin, vice-chairman.
 Ind., Scientific & Medical Equipment: C. V. Aggers, chairman; H. B. Marvin, vice-chairman.
 Police, Emergency Services: D. E. Noble, chairman; Frank Walker, vice-chairman.

FUNCTIONS

The RTPB formulates plans for the technical future of the radio industry and services, including frequency allocations and systems standardization, in accordance with the public interest and the technical facts. The Planning Board advises government, industry and the public of its recommendations. Such planning is restricted to engineering considerations.

The Radio Writers' Guild of the Authors' League of America, Inc.

6 E. 39th Street, New York, N. Y.
Murray Hill 5-6930

OFFICERS

National President Louis Scofield
Vice Presidents: Eastern Region Peter Lyon
Middle Western Region Kenneth Pettus
Western Region Sam Moore

Offices:

New York City: 6 East 39th Street.
Hollywood: 1655 North Cherokee.
Chicago: Room 1116, 360 N. Michigan.

NATIONAL COUNCIL

Georgia Backus, Erik Barnouw, Sylvia Berger, John Boylan, Norman Corwin, David De Koven, John Dunkel, Leslie Edgley, Julian Funt, Sidney Gerson, Neal Hopkins, Pauline Hopkins, Chester Huntley, Nikki Kaye, Jerome Lawrence, Robert H. Lochner, John T. Madigan, Carlton E. Morse, Arch Oboler, David Feltz, Don Quinn, George Roosen, Ashmead Scott, William L. Shirer, Lynn Stone, Louis Terkel, John Thompson, Everett Tomlinson, Ruth Walliser, Kenneth Webb.

Rocky Mountain Radio Council, Inc.

21 East 18th Ave., Denver 2, Colo.
KEystone 5306

OFFICERS

President C. B. Hershey
Secretary William M. Spackman
Treasurer E. A. Conway, S. J.
Director Robert B. Hudson

EXECUTIVE COMMITTEE

Glenn Kinghorn, Ben M. Cherrington, W. D. Armstrong, Malcolm G. Wyer.

FUNCTIONS

The Rocky Mountain Radio Council is a non-profit corporation of 29 organizations formed to give professional aid to educational organizations in planning, preparing and producing their radio broadcasts. In 1943 it produced 351 programs for 22 organizations, which were re-broadcast 1,936 times from 21 commercial radio stations in the Rocky Mountain region. Recording studio facilities available for commercial work.

SESAC, Inc.

475 Fifth Ave., New York 17, N. Y.
Murray Hill 5-5365.

OFFICERS

President Paul Heinecke
Treasurer R. C. Heinecke

FUNCTIONS

Licensing use of copyrighted music.

Society of Jewish Composers, Publishers and Song Writers

152 W. 42nd St., New York, N. Y.
LOngacre 5-9124

OFFICERS

President Sholom Secunda
Vice-President Rev. Pinchus Jassinowsky
Treasurer Alexander Olshanetsky
Secretary Henry Lefkowitz
General Manager Salom J. Perlmutter
Counsel A. Edward Masters

FUNCTIONS

This association licenses public performance rights of music copyrighted by its members and on which they collect royalties. Association owns approximately 95 percent of the Jewish compositions.

Society of Motion Picture Engineers

Hotel Pennsylvania, New York, N. Y.
PEnnsylvania 6-0620

OFFICERS

President Herbert Griffin
Past President Emery Huse
Executive Vice-President Loren L. Ryder
Engineering Vice-President D. E. Hyndman
Editorial Vice-President A. C. Downes
Financial Vice-President A. S. Dickinson
Convention Vice-President W. C. Kunzmann
Secretary E. Allan Williford
Treasurer M. R. Boyer

GOVERNORS

C. R. Keith, C. W. Handley, W. A. Mueller, H. W. Remersheid, W. V. Wolfe, E. J. Sponable, R. O. Strock, J. H. Shair, H. W. Moyle, F. E. Carlson, E. M. Honan, J. A. Maurer.

FUNCTIONS

In addition to its motion picture activities, this association is actively interested in television. It publishes a monthly organ in which various subjects are discussed by men in the industry.

Song Writers' Protective Association (SPA)

1250 Sixth Ave., New York 20, N. Y.
Columbus 5-3758

OFFICERS

President Sigmund Romberg
Vice-President Stanley Adams
Second Vice-President Ira Gershwin
Secretary Charles Tobias
Treasurer Abel Baer
Counsel John Schulman
Executive Secretary Sayre Marder
West Coast Representative L. Wolfe Gilbert

FUNCTIONS

Song Writers' Protective Association aims to foster the interests of all persons engaged in writing musical compositions. By cooperative effort it seeks to eliminate inequitable conditions and harmful practices and to assist members when disputes arise over enforcement of contracts or the collection of royalties.

Southern California Broadcasters' Association, Inc.

542 S. Broadway, Los Angeles 13, Calif.
Michigan 8654

OFFICERS

President Lawrence W. McDowell
(KFOX, Long Beach)
Secretary-Treasurer Harry Maizlish
(KFWB, Los Angeles)
Chairman, Exec. Comm. Van C. Newkirk
(KHI, Hollywood)
Dir. Radio Coordination Ethel M. Bell

FUNCTIONS

Membership of the Southern California Broadcasters' Association is composed of 30 southern California stations and 4 networks, represented in each case by its manager or senior executive. Meetings are devoted to discussion of industry problems, such as ASCAP, BMI, labor, engineering, code of ethics, agency recognition, coordination with governmental agencies, civic activities, etc.

Sports Broadcasters Association (New York Chapter)

c/o Tom Slater, 1440 Broadway, New York, N. Y.
PEnnsylvania 6-8600

OFFICERS

President Stan Lomax
Vice-President Ted Husing
Vice-President Bert Lee
Treasurer Marty Clickman
Secretary Tom Slater

FUNCTIONS

It is the object of the Sports Broadcasters Association to promote the standard of the profession of sports broadcasting among its members and to disseminate sports information to its members through a regular weekly luncheon. Membership is restricted to any male person who is actively engaged in the profession of sports broadcasting whether as an announcer, commentator or writer.

Television Press Club

Temporary Address:
Office of the Organizational Chairman: Richard W. Hubbell, 30 Rockefeller Plaza, 11th floor, New York 20, N. Y.
Circle 6-0200

ORGANIZATIONAL COMMITTEE

A. W. Bernsohn, "Click"; Joseph Guilfoyle, "Wall Street Journal"; Richard W. Hubbell, television author

ORGANIZATIONS

and consultant; Hermine Isaacs, "Theatre Arts"; Ben Kaufman, RADIO DAILY; Stanley Kempner, "Retailing Home Furnishings"; T. R. Kennedy, Jr., "The New York Times"; Wanda Marvin, "The Billboard"; Mike Wear, "Variety," R. Bruce Lee, "The Christian Science Monitor," and Lewis Winner, "Communications."

FUNCTIONS

A non-profit, unsponsored organization, this informal group was formed in 1944. Membership is limited to the professional television press—writers covering tele for newspapers, magazines, the trade press, books, films and radio. Purpose is to foster the sound development of television by serving as a focal point for members of the tele press to meet regularly and discuss current trends. Prominent figures in television are invited as guest speakers for the monthly luncheon meetings.

Twenty Year Club

167 East 64th St., New York, N. Y.

REgent 4-3344

Founder H. V. Kaltenborn

FUNCTIONS

The Twenty Year Club is an Honor Roll of men and women who have been associated with radio for twenty years. There are no dues, fees, officers, regular meetings or other obligations. A year-book is published annually.

United States Department of Interior— Radio & Television Section

Interior Department Radio Studios, Washington, D. C.
Republic 1820

PERSONNEL

Director Shannon Allen
Chief Script Writer Louis J. Hazam
Chief Engineer Henry P. Meisinger

FUNCTIONS

The Radio & Television Section of the Interior Department reports the functions and services of the offices and bureaus of the Department using all forms of radio and transcription production; serves all agencies of the Federal government through its studios and transcription production facilities.

Radio Sub-Committee, War Activities Committee, Motion Picture Industry— Hollywood Branch

5504 Hollywood Blvd., Hollywood, Calif.
Phone, GL 6111.

MEMBERS

Daniel Danker, J. Walter Thompson Co.; William Forbes, Columbia Broadcasting System; Don Gilman, National Broadcasting Co.; Donald W. Thornburgh, Columbia Broadcasting System.

FUNCTIONS

This sub-committee assists the War Activities Committee-Motion Picture Industry-Hollywood Branch in radio matters in coordinating production. The main committee is the official production body to whom all requests for governmental and private agencies should go.

Washington State Association of Broadcasters

207 East Market St., Aberdeen, Wash.
Aberdeen 4098

OFFICERS

President Harry R. Spence
(KXRO, Aberdeen)
Vice-President Rogan Jones
(KVOS, Bellingham)
Secretary-Treasurer Robert Priebe
(KRSC, Seattle)

FUNCTIONS

The Washington State Association of Broadcasters is an organization formed for the mutual protection, the exchange of commercial ideas and the education of its members in matters pertaining to radio.

Western Association of Broadcasters

C/o Radio Station CFRN, 109 C.P.R. Bldg.,
Edmonton, Alberta, Canada
Telephone 22101

OFFICERS

President G. R. A. Rice
(CFRN, Edmonton, Alberta)

DIRECTORS

Alberta: Bert Cairns, CFAC, Calgary; Manitoba: Roy Wright, CFAR, Flin Flon; Saskatchewan: Lloyd Moffatt, CKBI, Prince Albert.

CANADIAN ASSOCIATION OF BROADCASTERS

DELEGATES

G. R. A. Rice, CFRN, Edmonton, Alberta; A. A. Murphy, CFQC, Saskatoon, Saskatchewan; G. Gaetz, CJRC, Winnipeg, Manitoba; R. White, CFJC, Kamloops, British Columbia.

FUNCTIONS

Western Association of Broadcasters is a regional trade association of broadcasting stations west of the Great Lakes, closely affiliated with the Canadian Association of Broadcasters. It is virtually a western division of the latter organization, as majority of members are in both associations.

Woman's National Radio Committee

113 West 57th St., New York 19, N. Y.
Circle 7-4110

OFFICERS

Chairman Mme. Yolanda Mero-Irion
Vice-Chairman Mrs. D. Leigh Colvin
Second Vice-Chairman Mrs. Marion M. Miller
Secretary Miss Helen Havener
Treasurer Mrs. M. D. Jackson
Executive Secretary Mrs. Rosalie Wolf
Members-At-Large Mrs. Sidonie M. Gruenberg,
Mrs. Samuel Kubie, Mrs. Mary F. Larkin, Mrs.
Marion M. Miller, Mrs. Emory Ross, Mrs. Stanley
Woodward, Mrs. Jesse M. Bader.

FUNCTIONS

This committee has for its purpose to raise the standard of radio programs for adults, young people and children by: (1) retaining on the air the finer type of program; (2) removing objectionable features; (3) improving advertising content of broadcasts; (4) encouraging the production and presentation of more fine programs, worthwhile from the educational, cultural and entertainment viewpoint.

Writers' War Board

122 E. 42nd St., New York 17, N. Y.
Murray Hill 3-6800

OFFICERS

Chairman Rex Stout

EXECUTIVE BOARD

Franklin P. Adams, Carl Carmer, Robt. T. Galwell, Russel Crouse, Clifton Fadiman, Paul Gallico, Jack Goodman, Samuel Grafton, Oscar Hammerstein II, Rita Halle Kleeman, Robert J. Landry, Margaret Leech, John P. Marquand, Katherine Seymour, William L. Shirer, Luise Sillcox.

FUNCTIONS

The Writers' War Board serves as liaison between the writers of America and government agencies wishing to obtain written work that will directly, or indirectly, help to win the war; and to place with the proper government department ideas or pieces of writing which have been submitted by writers to the Board and approved by them.

FCC REGULATIONS

The term "non-commercial educational broadcast station" means a station licensed to an organized non-profit educational agency for the advancement of its educational work and for the transmission of educational and entertainment programs to the general public.

Operation and Service

The operation of, and the service furnished by, non-commercial educational broadcast stations shall be governed by the following regulations:

(a) A non-commercial educational broadcast station will be licensed only to an organized non-profit educational agency and upon a showing that the station will be used for the advancement of the agency's educational program particularly with regard to use in an educational system consisting of several units.

(b) Each station may transmit programs directed to specific schools in the system for use in connection with the regular courses as well as routine and administrative material pertaining to the school system and may transmit educational and entertainment programs to the general public.

(c) Each station shall furnish a non-profit and non-commercial broadcast service. No sponsored or commercial program shall be transmitted nor shall commercial announcements of any character be made. A station shall not transmit the programs of other classes of broadcast stations unless all commercial announcements and commercial references in the continuity are eliminated.

Power Requirements

The operating power of non-commercial education broadcast stations shall be not less than 100 watts or greater than 1000 watts unless a definite need for greater power is shown.

The transmitter of each non-commercial educational broadcast station shall be equipped with automatic frequency control apparatus so designed and constructed that it is capable of maintaining the operating frequency within plus or minus 0.01 percent of the assigned frequency.

Non-commercial educational broadcast stations are not required to operate on any definite schedule or minimum hours.

The transmitting equipment, installation, and operation as well as the location of the transmitter shall be in conformity with the requirements of good engineering practice as released from time to time by the Commission.

Frequencies Allotted

The following frequencies are allotted for assignment to non-commercial educational broadcast stations:

42,100 kc.	42,300 kc.
42,500	42,700
42,900	

Stations serving the same area will not be assigned adjacent frequencies.

Frequency modulation shall be employed exclusively unless it is shown that there is a special need for the use of amplitude modulation.

Only one frequency will be assigned to a station.

TELEVISION TODAY AND TOMORROW

By *Ben Kaufman*

Staff Writer, RADIO DAILY

TOTAL war has failed to blot television from the horizon. In fact, technological improvements by the armed forces have opened up shining post-war vistas for the 15-year-old electronic prodigy. Coupled with growing demand, the new medium awaits only the peace to swell the quota of employment and entertainment in our time.

Progress of post-war television was generally interpreted in March, 1944, as dependent on the precocious fledgling's eventual place in the spectrum. Allocation problems were then being mulled by the Radio Technical Planning Board, whose recommendations were expected to be signposts for future action by the Federal Communications Commission.

Frequency Problems

Opinion was divided as to whether television would benefit from being moved to the higher frequencies. Many telecasters indicated that such a change would delay the development of the new art. Another problem for the tele broadcaster was posed by the demands of commercial frequency-modulation interests for a greater number of channels. Granting of the FM requests by the FCC, the tele group largely believed, would drive television farther up in the spectrum to frequencies, which tele engineers were unable to use for sight-and-sound broadcasting.

Forerunner of the RTPB was the National Television Systems Committee. This independent organization was formed in 1940 under the sponsorship of the Radio Manufacturers Association with the blessing of the FCC. Purpose of the Committee was to settle the chaotic condition of independent television systems and resolve them into a universal set of standards. Adoption of the NTSC's recommendations for commercial

standards by the FCC gave television the green light. The Committee's work, which was overcast by U. S. entry into the war, planted the thought that resulted in the formation of the RTPB.

Intensive preparations for almost a year preceded the launching of the Planning Board in September, 1943. Originally sponsored by the Institute of Radio Engineers and the Radio Manufacturers Association, the RTPB in March, 1944, consisted of representatives from 16 sponsoring non-profit organizations. Acting in the same manner as a board of directors, the Planning Board supervised the work of 13 panels to which engineers were nominated by top companies in the radio industry. At that time the work of the RTPB involved more than 125 companies and a personnel of about 450. Of the Board's panels, the television panel then had six subcommittees. Recommendations of the tele unit were scheduled to be submitted to the RTPB, which was to report its findings, on request, to the FCC, other governmental agencies and industrial and professional organizations.

Television Organizes

Significant, too, was the formation in January, 1944, of the Television Broadcasters Association, Inc. After several months of organizational preliminaries, telecasters, advertising agencies and equipment companies banded together at a meeting in Chicago's Palmer House to promote the development of television broadcasting.

Establishment of TBAI was envisioned as a prelude to the post-war growth of large-scale television. Eligibility for voting memberships was restricted to tele broadcasters, construction-permit holders and active applicants for licenses. Non-voting members were to consist of all others interested in television.

TELEVISION HIGHLIGHTS—1943

(From the Files of RADIO DAILY)

A review of the past year's television events indicates the tremendous post-war possibilities of the sight-and-sound medium. Increasing momentum is evident from the upward surge of activity reported in the columns of RADIO DAILY, especially during the last six months. The following pages contain the recorded highlights of the year in television.

JANUARY

- Jan. 10—Philco's Philadelphia tele outlet, WPTZ, resumed broadcasts after a seven-week absence from the spectrum since the closing of the football remotes from Franklin Field.
- Jan. 14—Dr. Walter R. G. Baker, vice-president of General Electric in charge of electronics, told a luncheon session of the American Marketing Association in New York that it would take about ten years after the war for television to digest current developments.
- Jan. 19—Robert B. Stone was reported new program manager of WRGB, GE tele unit in Schenectady, N. Y., succeeding John G. T. Gilmour, who resigned to accept a commission in the Army.

FEBRUARY

- Feb. 9—Western Defense Area was reported to have instituted semi-weekly tele broadcasts over W6XYZ, Paramount-owned studio on the film-company lot, for the training of civilian-defense personnel. . . Listing of stockholders of Scophony Corp. of America revealed that two major film companies had bought into the new equipment firm—Paramount, through its subsidiary, Television Productions, Inc., and Twentieth Century-Fox, through General Precision Equipment Corp. . . Irvin Ray Baker, tele pioneer and head of RCA's broadcast transmitter sales, died at work in Camden, N. J.
- Feb. 24—Arthur Levey, founder, director and major stockholder in Scophony, Ltd., was signed to a five-year contract as president of Scophony Corp. of America. . . FCC ruled that holders of construction permits for tele outlets might obtain licenses during the war to operate existing facilities on either an experimental or commercial basis, provided construction had reached a point where the station was capable of rendering a substantial service.

MARCH

- Mar. 8—FCC Chairman James L. Fly forecast chain operation for tele by radio relay.

APRIL

- Apr. 19—Government control over some of the more valuable tele patents, which had resulted from wartime experimentation, was predicted by FCC chief James L. Fly.
- Apr. 20—Tele images in color and three dimensions were reported to have been produced in England since the war, according to John L. Baird, inventor.

MAY

- May 5—Major part of televising will be spot-news broadcasting from scenes of action, even if broadcasters have to promote a sports event or two, stated Noran E. Kersta, manager of NBC's tele department. . . Experimental tele series for production staffs of ad agencies at W2XWV, Du Mont's New York studio, teed off before a large agency attendance.
- May 13—Television must adequately develop a unique capacity in presenting something better than what exists today before it can establish the selling point of television, stated Worthington C. Miner, CBS tele official, in a published interview. . . Post-war tele expansion and the establishment of hundreds of television theaters were forecast by Will Baltin, program director of W2XWV, in an address before the American Television Society.

JUNE

- June 2—Automatic radio-relay outlets were described as the key to network tele by Ralph R. Beal, research director of RCA Laboratories, in a speech before the Institute of Finance at the New York Stock Exchange.

June 4—Stockholders of Allen B. Du Mont Laboratories, Inc., voted to split up each share of Class-A common stock into ten shares of Class-A common, and each share of Class-B common stock into ten shares of Class-B common.

June 22—WOR, Mutual's New York outlet, arranged a production tie-up with Du Mont for a weekly one-hour telecast.

June 24—American Television Society notified General Electric that it will be presented with the Society's plaque for "the greatest contribution to television of the year," and similarly informed NBC that it will receive the award for "the greatest contribution to the use of television as a public service."

JULY

July 8—Local 802 of the American Federation of Musicians began an investigation of rates and working arrangements at W2XWV, New York, with a union exec. stating that the regular Class-A standard broadcast rates for single engagements applied to tele.

July 13—WOR, New York, inaugurated a regular one-hour weekly tele program over W2XWV, the Du Mont outlet, in lieu of its own facilities, application for which has been pending before the FCC since August, 1939.

July 21—New York afternoon papers played up the statement by Ralph R. Beal, RCA Lab.'s research director, that tele for family use would be ready immediately after the war.

July 29—Royal Crown Cola sponsored its first tele flyer, running about three minutes, on WRGB, Schenectady, General Electric's news bureau announced. . . Advertisers and ad agencies were seen as setting the rules for commercial presentation of tele after the war, Sam Cuff, of W2XWV, New York, told a meeting of the American Television Society.

AUGUST

Aug. 2—BBD&O scheduled three accounts to take part in a one-hour weekly telecast over WRGB, Schenectady. Clients were B. F. Goodrich Rubber Co., Lever Bros. (for Vimms) and Hamilton Watch Co.

Aug. 10—Seven new tele outlets would be built on the Coast in the post-war period, it was reported in a speech by William M. Boland, manager of General Electric's western-region electronics department, before the San Francisco Advertising Club. Plans, he said, called for three transmitters in San Francisco and four in the Los Angeles area.

Aug. 17—Lower-priced tele receivers after the war were predicted by Paul L. Chamberlain, of General Electric, due to manufacturing experience gained in wartime production of electronic equipment.

TOM
BREMANAN
•
BREAKFAST
AT
SARDI'S
over
THE BLUE NETWORK

Aug. 19—Arthur Levey, president of Scophony Corp. of America, said that the skiatron method of tele would be developed in this country by his company in addition to the supersonic method controlled by Scophony.

Aug. 23—Post-war expansion of NBC tele was announced by Niles Trammell, the network's president, with the appointment of a special committee to keep abreast of such activities. Committee consisted of: John Royal, vice-president in charge of the international, shortwave and tele divisions, chairman; William S. Hedges, vice-president in charge of stations; O. B. Hanson, vice-president and chief engineer, and Clarence L. Menser, vice-president and manager of the program department. John T. Williams, assistant to Noran Kersta, now in the Marines, was named secretary.

Aug. 30—Cheaper tele receivers covering greater distances, and including color, were forecast for the post-war period by Gilbert Seldes, CBS tele program chief, in a recent interview at Montreal before he sailed on a vacation cruise.

SEPTEMBER

Sept. 7—New musicians' scale for tele was reported in effect by the AFM on orders of James C. Petrillo, international president. Rates were announced as \$18 per man for broadcasts of one hour or fraction thereof, and \$6 for similar rehearsal periods, with the leader's fee double these amounts—all services figured on a single-engagement scale.

Sept. 13—Nat Wolff, West Coast chief of the OWI Radio Bureau, was reported to have resigned to join M-G-M as head of the film company's new tele department.

Sept. 14—Post-war planning committee was established by the American Television Society to work with the Radio Technical Planning Board and to make recommendations to the FCC, tele manufacturers and operators.

Sept. 16—Columbia Concerts, Inc., announced the appointment of Walter Preston as director of the agency's radio-television department.

Sept. 21—Farnsworth Television and Radio Corp. was reported to have received WPB authorization for expanding its engineering, laboratory and manufacturing facilities at a cost of about \$250,000.

Sept. 21—Two basic patents involving large-scale tele, both in black-and-white and natural color, were granted to Scophony Corp. of America, according to Arthur Levey, president of SCA.

Sept. 24—Botany Worsted Mills, one of NBC's pioneer tele commercials, was reported to have resumed on WNBT, New York, after having been off the outlet for a year and a half due to the station's cut in time schedule from 15 to four hours weekly.

OCTOBER

Oct. 3—Practical use of tele as an aid to police detection was demonstrated for the first time when the Missing Persons Bureau of the New York City Police Department flashed pictures of missing people over W2XWV, the Du Mont tele outlet in Gotham.

Oct. 12—Arrangements were completed by NBC to pick up major sports events and other spectacles from Madison Square Garden for the enjoyment of hospitalized servicemen in the metropolitan area. Receivers were installed by the web in service hospitals.

Oct. 14—Tele set survey was reported under way by NBC within the range of WNBT, New York.

Oct. 18—RKO Corp. appointed Ralph B. Austrian, a former assistant vice-president of RCA Manufacturing Co., Inc., to make a survey of the tele and radio fields.

Oct. 22—Klaus Landsberg, tele director of W6XYZ, subsidiary of Paramount Pictures in Hollywood, Calif., was reported urging post-war tele planning at the convention of the Society of Motion Picture Engineers in the film capital. Television would encounter difficulties in moving to higher frequencies, he emphasized.

Oct. 25—NBC televised the eighteenth annual world-championship rodeo from Madison Square Garden, New York.

NOVEMBER

Nov. 4—Theater tele was forecast as a post-war certainty by Ewell K. Jett, chief engineer of the FCC. Its main function, he added, would be to report special events, such as football games or other spectacles, rather than replace the motion picture. . . . Telecast of a special ten-page edition of the Albany (N. Y.) "Times-Union" was presented by General Electric over WRGB, Schenectady, before a jury of 50 press representatives. Show alternately reproduced printed page and tele enactment.

Nov. 9—Three-color tele process was patented by Dr. E. F. W. Alexanderson, veteran consulting engineer for General Electric and inventor of the Alexanderson alternator, which put the voice in radio.

Nov. 10—Tele was given trade impetus at the joint meeting of the American Television Society and the New York Advertising Club in the latter's headquarters. Advertisers, agency executives, tele broadcasters, equipment and film company representatives heard speeches by key figures and witnessed a demonstration of the art.

Nov. 15—American Television Society declined an invitation of membership in the Radio Technical Planning Board. Major reason given by ATPS in a letter to Dr. Walter R. G. Baker, RTPB chairman, was that the primary obstacles which tele must surmount

were not of a technical nature at this time, inasmuch as technical development was far ahead of programming knowledge and experience.

Nov. 16—Blue Network affiliates in major cities were advised to file for tele licenses at the web's Chicago meeting of station owners and managers. The network, it was announced, would shortly apply for tele and FM licenses in New York, Chicago, Los Angeles and San Francisco. . . . Publication of a survey by RADIO DAILY indicated a high commercial potential in the post-war period for both tele and FM. Consensus chose tele as the important factor for long-range development, gave sponsored FM airings the edge for the period directly following the war.

Nov. 17—Operating condition of more than 80 per cent of 1,434 tele receivers, which were tabulated by NBC out of a total of about 5,000 in the New York area, was revealed as fair or better in the net's set survey made public by John T. Williams, manager of the tele department.

Nov. 19—Application for an experimental tele outlet in Salt Lake City was announced as filed with the FCC by KDYL, which was said to have been experimenting with RCA demonstration equipment for several years.

Nov. 29—Tele film was produced and televised in eight hours for the premiere of "The Voice of Firestone Televues," a half-hour commercial series over NBC's WNBT, New York. . . . Dr. Palmer H. Craig, head of the University of Florida's electrical engineering department, announced his invention of a new system of tele broadcasting via standard radio channels.

DECEMBER

Dec. 1—Replacement of "B" film theater fare by tele was forecast by Gilbert Seldes, director of CBS tele programs, in a speech before the Dayton Kiwanis Club. The Columbia executive also stated that it might take between five and 15 years following the war until tele could be put into every home. . . . Television, like radio, would find its great fulfillment in the home, Clarence L. Menser, NBC vice-president in charge of programs, told the Public Relations Clinics of the United States Savings and Loan League in Chicago.

Dec. 7—Present FCC regulations imposed a strait jacket on the creation of tele networks by prohibiting ownership of more than three tele stations by any one company, Niles Trammell, NBC president, told the Senate Interstate Commerce Committee. NBC plans for post-war tele development, he disclosed, were to begin network operations in the East, with stations in Boston, New York, Philadelphia, Baltimore and Washington, then open a similar web on the Pacific Coast and others centering

around Denver, Cleveland and other large cities. In order to carry out this plan, however, it would be necessary for NBC to own more than three tele outlets, since Trammell felt it essential that the network own the key station in each of these projected networks. . . . Film transcription of one-reel serial installments for future tele use was revealed as a feasible project in an interview with Ralph B. Austrian, RKO tele and radio consultant.

Dec. 9—Classroom tele for Chicago schools was announced to have been planned on a weekly schedule over W9XBK, the Balaban & Katz outlet, by the Radio Council of Public Schools in the Windy City.

Dec. 10—Operation of 1,000 tele outlets and 25,000,000 receiving sets within the next ten years was predicted by O. B. Hanson, NBC v.-p. and chief engineer, in testimony before the Senate Interstate Commerce Committee. Theater tele was forecast by Hanson for early projection in black and white as a new medium for picking up events of great national interest at the source, and transmitting them through tele networks to theaters throughout the country. . . . Modification of the FCC's three-station limitation on network tele ownership was urged by the American Television Society in a wire reported sent to Burton K. Wheeler, chairman of the Senate Interstate Commerce Committee.

Dec. 13—Official Marine Corps newsreel of the battle of Tarawa was televised over NBC. On the same program was the Army Signal Corps film of the historic Cairo Conference.

Dec. 15—Nationwide advertising campaign in behalf of NBC's telecast of the Tehran Conference film got under way in the New York press, with full-page layouts by RCA, the parent company. Prediction was made, in the copy, that great events of future years would be televised while they were happening.

Dec. 27—Tele receivers in the post-war period would sell from \$200 to \$300, according to the reported review of the year by David Sarnoff, RCA president. It might require a year after approval of standards, he said, and full authorization of commercialization of tele broadcasting by the FCC before tele sets were available within the \$200-to-\$300 range. However, he indicated, that the erection of transmitters, planning of interesting programs and construction of relay links were more than a one-year job.

Dec. 28—Plans were reported for the erection of powerful tele and FM stations on Cucamonga Peak, 9,000 feet above San Bernardino, Calif. Construction permits for the twin project to service more than five million people in California, Southern Nevada and Western Arizona were sought by the Broadcasting Corp. of America, operator of KPRO, Blue net outlet in Riverside.

THE PROBLEMS OF TELEVISION

By *Paul Raibourn*

Chairman, Postwar Planning Committee of Television Broadcasters Association, Inc.

THERE seems to be almost universal agreement on the prediction that 20 years from now use of television will have materially modified the way of life of all of us, particularly as to our amusements; perhaps as to our methods of education and probably as to those sources, such as newspapers, magazines, and radio broadcasting from which we form our impressions of what is going on in those portions of the world with which we are not in immediate contact. Even those who see little present possibility in television, speak glowingly on the fact that it will ultimately add another rich and useful medium to our existing forms of entertainment and education.

When one starts to put dates and places on the plan by which this television millennium is to be reached, one finds considerable difference of opinion among the experts as to when, how, and what with. These differences of opinion cover almost every phase of television. They do, however, fall into two classifications which are: 1, What standards and wave lengths should be used for broadcast television transmission? and 2, What commercial interests should be the ones to carry them out. Even these two are more or less inter-related.

Basic Problem

The real basic problem of broadcast television is, of course, the old one of which will come first, the chicken or the egg. This is the one about the public being unwilling to purchase large numbers of television sets at present prices until there is an ample and continuous supply of good programs, while on the other hand commercial interests will not sponsor and pay for good and expensive

television programs until they are sure they will be listened to by an audience which will buy enough products to have made the effort worth while. It is the real problem of broadcast television and planning will not overcome it. Only action can hope to do so.

The argument about standards and wave lengths can best be exemplified by paraphrasing the arguments which have lately appeared in the public press.

FM or Television

The first important debate appears to be one as to whether frequency modulation or television shall have the wave lengths, roughly between 40 to 60 megacycles in frequency. The present ability to produce large amounts of power at these frequencies and the long distance transmitting ability which these waves encompass make them particularly valuable to those who have the right to use them for their own commercial purposes.

It also appears that as one goes up in frequency to about 100 megacycles that reflections from objects do play an important part in radio transmission at frequencies above this level of broadcast. Visual images have ghosts in them and broadcast sound transmissions often are either fuzzy or subject to echoes and resonance. These are caused by reflections from buildings and many other objects.

Distribution of Channels

The distribution of channels to various interested parties in the past has been largely determined by the apparatus and knowledge available at the time the allocation was made. Having made a con-

siderable investment in apparatus for a certain channel, commercial interests naturally oppose any changes.

The present state of our knowledge seems to indicate that from the technical standpoint there are a great many reasons why frequencies below one hundred megacycles should first be made available for broadcast use and that point to point communication should be above one hundred megacycles, because of present holders of various channels hopes that this engineers' Nirvana can be realized seem small.

On the other hand, there are interests claiming to represent the interests of the show business, and to be interested primarily in show values, that state the time has come when, television being fairly successful technically at present standards, we should put considerable improvement into the picture. They suggest that finally such improvement in quality, including color, will be made so why have the public buy sets on any basis but the most perfect? The public will know it, so goes the argument, and television will be chopping off its own head by premature selling of an inferior type of result. After the public has bought because of the novelty, interest will lag and television will be back in the doldrums. They say wide bands for television should be provided above the 300 megacycles range.

Public Interest

This public interest theory is simple in that it says that John Q. Public deserves the best and that until it is available, nothing should be sold to him. Such an attitude has considerable altruistic merit but it takes only a moment of careful thought to realize that we would still be talking about having automobiles and electric refrigerators and even radios under such a theory. Another and paramount objection is that no one has been

as yet able to produce sufficient power for satisfactory broadcast at these frequencies.

It would seem, out of all this discussion, a fair prediction that engineering groups, the majority of whose members are associated with interests connected with the radio industry, will recommend standards closely approximating those now in use for commercial broadcast television. What the requirements of public and international interest will do to these recommendations are very difficult to determine until discussion has taken place with those representing such interests.

Commercial Interest

The second question, i.e., that of what commercial interests should work with broadcast television, seems even more complicated.

There is probably one basis on which some intelligent guesses can be made. Present knowledge and actual active interest in television beyond the conversational stage is limited to the radio industry and one motion picture company. The additional logical candidates for activity are other motion picture companies, newspapers, magazines, legitimate stage groups, and educational institutions. The part that these groups will play depends on how rapidly the present radio industry makes broadcast television a commercial success and develops a satisfactory pattern of operation. The longer such developments are delayed the more likely is it that these sources of programs will have absorbed possible physical facilities and radio spectrum.

No matter how broadcast television starts it is going to have plenty of ups and downs, but unless it is started on the road, and the first use is attained, it is doubtful if enough of the way will be clear to warrant the economic venture of trying to attain the next farther objective.

Functions

Founded Jan. 1944, as a non-profit organization of television broadcasters and others engaged in any business directly connected with television broadcasting. Objects, as stated in the by-laws, are "to foster and promote the development of the art of television broadcasting; to protect its members in every lawful and proper manner; to foster, encourage and promote laws, rules, regulations, customs and practices which will be in the best interest of the public; to protect the interests of the members of the Association by opposing the enactment or adoption of any laws, rules, regulations, customs or practices which would discriminate against or in any way injure the members of this Association."

TELEVISION

BROADCASTING STATIONS

As of January 1, 1944

The term "television broadcast station" means a station licensed for the transmission of transient visual images of moving or fixed objects for simultaneous reception and reproduction by the general public.

SYSTEM IN USE: 525 line 30-60 frame F.C.C., Standard, all electronic cathode-ray. Horizontal Polarization. Three Studio Cameras and film equipment. Two cameras of Orthicon type. Complete 100 ft. square two story television building housing one 100 ft. x 60 ft. x 30 ft. television stage, one 46 ft. x 26 ft. x 16 ft., stage, monitor, film, transmitter, makeup, and lounge rooms, offices, shop, transformer vaults, etc. Three hundred foot tower, antenna elevation 2000 ft.

K6XDU (experimental television relay station operating with KTSL) operates on 324 megacycles and is a beam relay type television transmitter used for outside pickups.

DEVELOPMENTS of 1943: W6XAO (experimental call letters of KTSL).

An uninterrupted schedule of television programs has been maintained during 1943, largely directed to bolster public morale in the War Effort. Specially written and produced dramas have been televised with living actors in the interests of the Red Cross Blood Donor appeals, War Bonds, USO entertainment and many others. Vaudeville shows have also been televised in which well-known Hollywood talent has appeared.

The Pasadena Community Playhouse and other organizations have presented plays such as Ibsen's "Master Builder," "Alice in Wonderland" and others.

Film subjects have included cartoons from Walt Disney and others, OWI war films, shorts, musicals, and occasionally a feature.

RECEIVERS: There are some 400 television receivers in the service area of W6XAO, some as far as Pomona at 35 miles away, a number in Long Beach at 25 miles away and many in cities at lesser distances. The predominant commercially manufactured television receiver is the TRK12 or 120 of RCA. There are some RCA TRK9, and approximately 50 TT5 RCA television receivers. A number of the latter are operating satisfactorily in Long Beach at 25 miles from W6XAO. Other commercially manufactured television receivers are the local Gilfillan G12 which is an equivalent to the RCA TRK12 and utilizes a 12-inch cathode ray tube, some Dumont 12 and 20-inch tube television receivers, the General Electric 12's and 9-inch receivers, and the Stromberg-Carlson and Stewart-Warner 12 and 9-inch receivers.

ACTIVITIES

With production of equipment halted during the National Emergency, the development of Television was suspended, pending the freeing of production facilities. Station WCBW reduced its broadcasting periods to a total of four hours a week. The studio and equipment which were previously used for full scale broadcasts of 15 hours a week were maintained and further improvements made. Technical experiments continued, though a major part of the CBS Television engineering staff devoted its time to Government work.

Now that more channels can be made available to Television in the higher frequencies, Columbia Broadcasting states that it looks forward with optimism to the time when reallocation of band widths and frequencies will offer Television the sound and healthy surroundings necessary for its full development.

ACTIVITIES

Limited in its activities by the shortage of engineering talent and the necessity to conserve existing equipment, NBC operated its television station throughout most of 1943 at the minimum of 4 hours weekly permitted by the FCC. This time was filled entirely by films. During the year, several advertisers continued to use television cartoons to promote their products.

Beginning in November, NBC expanded its program service by adding occasional pickups from Madison Square Garden. About fifty television sets, contributed by RCA, NBC, and General Electric were installed in hospital recreation rooms to permit the veterans to witness events that otherwise would have been denied them because of their hospitalization. Many of the programs have been re-telecast by WRGB, Schenectady, by direct overland pickup from the Empire State Building transmitter.

Early in 1944, NBC's television service was scheduled for further expansion by reopening studio 3-H for live productions. In a statement to affiliates outlining the Company's postwar television plans, President Niles Trammell revealed that network television will be a reality. Actual operation of the network, he said, will depend on the ability of the American Telephone & Telegraph Company to obtain necessary materials and labor for the installation of coaxial cables connecting major cities or on the erection of radio relay stations.

Assistant to the Manager.....B. J. Rowan

Program Manager.....Robert B. Stone

Chief Engineer.....W. J. Purcell

FACILITIES

Technical facilities of Station WRGB include a direct pickup studio for live talent productions, located at 60 Washington Ave., Schenectady. It is fitted with five camera channels. A film scanning room has two cameras and three motion picture projectors—two for 35 mm. and one for 16 mm. films. Film slide, lantern slide and projectors of small opaque pictures and objects are also available.

Signals from the WRGB transmitter, located in the Helderberg mountains, New Scotland, N. Y., near Schenectady, are received over a service area with a radius of approximately 50 miles, which includes the Troy-Albany-Schenectady area.

WRGB claims the first television relay station, picking up programs from NBC in New York City, 129 miles away, and relaying them to the Capitol district area. A minimum weekly program service of nine hours is offered viewers in the area.

ACTIVITIES

During 1943 WRGB's program activities have been varied. Among the programs various types have been tried, including a bridge game by champions, dog shows, boxing and wrest-

ing matches, barn dances, Shakespearean plays, Gilbert and Sullivan operettas, modern comedies, news reporters and analysts. Several commercials have also been presented by the station during the past year. On November 5, WRGB presented a demonstration of how television might cover the news by televising a ten-page special edition of the Albany Times-Union.

Station Director.....Klaus Landsberg

FACILITIES

Equipment includes complete apparatus for studio as well as field operation. Cameras and transmitters were built by Allen B. DuMont Laboratories, Inc. and many additional units, including electronic special-effect equipment, were designed and built by Television Productions, Inc. A relay transmitter, W6XLA, to operate in conjunction with W6XYZ, was also developed and constructed by the company. A special antenna system combining a double-cone type of antenna for video and a special four di-pole antenna for audio of its own design and construction are used. Studio facilities also include a flexible lighting arrangement, slide and background projection apparatus and screens.

ACTIVITIES

W6XYZ has operated regularly since February 1 each Wednesday and Friday night and has been producing a weekly total of four to six hours of live-talent programs. These

programs were entirely dedicated to the training of Civilian Defense volunteers until the summer of 1943, since which time entertainment as well as educational programs have been aired. These programs include gymnastic courses, museum visits, variety shows, dramatic skits and one-act plays. Technical development has been directed toward improvement and simplification in the operation of present equipment as well as to the design and construction of special effects and relay equipment.

Studio Managers...Ed Woodruff, Bob Jameson

FACILITIES

The 160-foot tower of W2XWV atop a 42-story building raises the antenna to 650 feet above sea level. Covering a service range of 35 to 50 miles, the station has regular viewers as distant as 75 miles. It is completely equipped by Du Mont Laboratories. W2XWV has a studio for live-talent shows as well as film-projection facilities. It operates on an experimental license pending the granting of application for a commercial license.

ACTIVITIES

This outlet serves not only as a telecast service soon to go commercial, but also as a laboratory for practical experience. Engineering, programming and advertising sponsorship aspects of television broadcasting are being worked out in actual practice. Broadcasters, engineers, producers, performers, advertisers, advertising men and others interested in television are granted the facilities of the station.

FCC REGULATIONS REGARDING ★ BROADCAST STATIONS FOR ★ TELEVISION AND FACSIMILE

As of January 1, 1944

The term "visual broadcast service" means a service rendered by stations broadcasting images for general public reception. There are two classes of stations recognized in the visual broadcast service, namely: Television broadcast stations and Facsimile broadcast stations.

COMMERCIAL TELEVISION BROADCAST STATIONS

Definitions

"*Television broadcast station*" means a station licensed for the transmission of transient visual images of moving or fixed objects for simultaneous reception and reproduction by the general public¹.

"*Television broadcast band*" means the bands of frequencies allocated for television broadcast stations.

"*Television channel*" means a band of frequencies 6,000 kilocycles wide and which may be designated by channel numbers as in section on channel assignments in these rules or by the extreme lower and upper frequencies.

"*Television transmission standards*" means the standards which determine the characteristics of the television signal as radiated by a television broadcast station.

"*Standard television signal*" means a television signal conforming with the television transmission standards set forth in the Standards of Good Engineering Practice for television stations.

"*Television transmitter*" means the radio transmitter or transmitters for the transmission of both visual and aural signals.

"*Visual transmitter*" means the radio equipment for the transmission of the visual signal only.

"*Aural transmitter*" means the radio equipment for the transmission of the aural signal only.

"*Visual transmitter power*" means the peak power output when transmitting a standard television signal.

"*Service area*" means the area in which the signal is not subject to objectionable interference or objectionable fading. (Television broadcast stations are considered to have only one service

area; for determination of such area see *Standards of Good Engineering Practice for Television Broadcast Stations.*)

"*Main studio*" as to any television broadcast station means the studio from which the majority of the local programs originate, or from which a majority of the station identification announcements are made.

Allocation of Facilities

Basis for license.—Television broadcast stations will be licensed on the basis of the effective signal radiated (ESR) from the visual transmitter in accordance with the following:

ESR is equal to the square root of the power times the antenna field gain times the height of the antenna above the surrounding area. The power is measured in kilowatts, the gain in voltage ratio, the antenna height in feet above surrounding area.

Time of operation.—Television broadcast stations will be licensed only for unlimited time operation.

Showing required.—Authorization for a new television broadcast station or increase in facilities of an existing station will be issued only after a satisfactory showing has been made in regard to the following matters:

(a) That the service area and population which the applicant proposes to serve are computed in accordance with the Standards of Good Engineering Practice for Television Broadcast Stations. (The service area shall be consistent with and serve adequately the city or community proposed to serve in keeping with technical feasibility of coverage. The application shall be accomplished by an analysis of the computation of the service area as set forth in the application. No application for construction permit for a new station or change in service area of an existing station will be

¹ The transmission of synchronized sound (aural broadcast) is considered to be an essential phase of television broadcast and one license will authorize both visual and aural broadcasts.

accepted unless a definite site, details of proposed antenna and other data required by the application form are supplied.)

(b) That objectionable interference will not be caused to existing stations or that if interference will be caused the need for the proposed service outweighs the need for the service which will be lost by reason of such interference.

(c) That the proposed station will not suffer interference to such an extent that its service would be reduced to an unsatisfactory degree. (For determining objectionable interference, see *Standards of Good Engineering Practice for Television Broadcast Stations*.)

(d) That the technical equipment proposed, the location of the transmitter, and other technical phases of operation comply with the regulations governing the same, and the requirements of good engineering practice. (See technical regulations herein and *Standards of Good Engineering Practice for Television Broadcast Stations*.)

(e) That the applicant is financially qualified to construct and operate the proposed station.

(f) That the applicant has available adequate sources of program material for the rendition of satisfactory television broadcast service.

(g) That the proposed assignment will tend to effect a fair, efficient, and equitable distribution of radio service among the several states and communities.

(h) That the applicant is legally qualified, is of good character, and possesses other qualifications sufficient to provide a satisfactory public service.

(i) That the facilities sought are subject to assignment as requested under existing international agreements and the Rules and Regulations of the Commission.

(j) That the public interest, convenience, and necessity will be served through the operation under the proposed assignment.

Channel assignments.—The channels or frequency bands set forth below are available for assignment to television broadcast stations.

(a) Channel

No.	
1	50,000- 56,000 kc
2	60,000- 66,000 kc
3	66,000- 72,000 kc
4	78,000- 84,000 kc
5	84,000- 90,000 kc
6	96,000-102,000 kc
7	102,000-108,000 kc
8	162,000-168,000 kc
9	180,000-186,000 kc
10	186,000-192,000 kc
11	204,000-210,000 kc

12	210,000-216,000 kc
13	230,000-236,000 kc
14	236,000-242,000 kc
15	258,000-264,000 kc
16	264,000-270,000 kc
17	282,000-288,000 kc
18	288,000-294,000 kc

(b) Stations serving the same area will not be assigned channels adjacent in frequency.

(c) One channel only will be assigned to a television broadcast station.

Experimental operation.—Television broadcast stations may conduct technical experimentation directed to the improvement of technical phases of operation and for such purposes may utilize a signal other than the standard television signal subject to the following conditions:

(a) That the licensee complies with the provisions of these rules with regard to the minimum number of hours of transmission with a standard television signal.

(b) That no transmissions are radiated outside of the authorized channel and subject to the condition that no interference is caused to the transmissions of a standard television signal by other television broadcast stations.

(c) If objectionable interference would result from the simultaneous operation of a television broadcast station operating experimentally and an experimental broadcast station, the licensees shall make arrangements for operation to avoid interference.

(d) No charges either direct or indirect shall be made by the licensee of a television broadcast station for the production or transmission of programs when conducting technical experimentation.

Multiple ownership.—No person (including all persons under common control)² shall, directly or indirectly, own, operate, or control more than one television broadcast station, except upon a showing (1) that such ownership, operation, or control would foster competition among television broadcast stations or provide a television broadcast service distinct and separate from existing services, and (2) that such ownership, operation or control would not result in the concentration of control of television broadcasting facilities in a manner inconsistent with public interest, convenience, or necessity; *Provided, however*, That no person (including all persons under common control), shall directly or indirectly, own, operate, or control more than one television broadcast station that would serve substantially the same service area; and *provided, further*, That the Commission will regard the owner-

² The word "control," as used herein, is not limited to majority stock ownership, but includes actual working control in whatever manner exercised.

ship, operation, or control of more than three television broadcast stations as constituting a concentration of control of television broadcasting facilities in a manner inconsistent with public interest, convenience, or necessity.

Normal license period.—All television broadcast station licenses shall be issued so as to expire at the hour of 3 a.m., Eastern Standard Time, and will be issued for a normal license period of one year, expiring February 1.

Equipment

Maximum rated power; how determined.—(a) The maximum rated carrier power of standard television transmitters shall be the same as the manufacturer's rating of the equipment.

(b) The maximum rated carrier power of composite television transmitters shall be the sum of the applicable commercial ratings of the vacuum tubes employed in the last radio stage.

Maximum power rating and operating power.—The Commission will authorize the installation of a television transmitter having maximum power rating equal to the operating output power in accordance with the table set out in the section of these rules titled "Basis for License."

Monitors.—The licensee of each television broadcast station shall operate at the transmitter:

(a) A frequency monitor independent of the frequency control of the transmitter. The monitor shall meet the requirements set forth in the Standards of Good Engineering Practice for Television Broadcast Stations;

(b) A modulation monitor to determine that the radiated television signal complies with the television transmission standards set forth in the Standards of Good Engineering Practice for Television Broadcast Stations.

Required transmitter performance.—The external performance of television broadcast transmitters shall be capable of radiating a standard television signal meeting the minimum requirements prescribed by the Commission contained in the Standards of Good Engineering Practice. The transmitters shall be wired and shielded in accordance with the good engineering practice and shall be provided with safety features in accordance with the specifications of Article 810 of the current National Electrical Code as approved by the American Standards Association.

Indicating instruments.—The operating output power of television broadcast stations shall be measured by instruments having an acceptable accuracy.

Auxiliary and duplicate transmitters.—The provisions of the rules governing standard and high frequency broadcast stations shall also govern the use of aux-

iliary and duplicate transmitters for television broadcast stations

Changes in equipment and antenna system.—(a) No changes in equipment shall be made.

(1) That would result in emission of signals outside of the authorized television channel.

(2) That would result in the external performance of the transmitter being in disagreement with that prescribed by the Commission in the Standards of Good Engineering Practice provided that for experimental transmissions equipment changes may be made which would not render the transmitters incapable of radiating a standard television signal for the required minimum number of hours. (See section titled "Minimum Operating Schedule.")

(b) Specific authority³ is required for a change in any of the following:

(1) Increase in the maximum power rating of the transmitter.

(2) Replacement of the transmitter as a whole.

(3) Location of the transmitter antenna.

(4) Antenna system, including transmission line, which would result in a measurable change in service area or which would affect the determination of the operating power by the direct method. If any change is made in the antenna system or any change made which may affect the antenna system, the method of determining operating power shall be changed immediately to the indirect method.

(5) Relocation of main studio if new location is outside of the borders of the city, state, District of Columbia, territory, or possession.

(6) Operating output power delivered to the antenna.

(c) Specific authority,⁴ upon filing informal request therefor, is required for the following change in equipment and antenna:

(1) Indicating instruments installed to measure the antenna current or transmission line, except by an instrument of the same type, maximum scale reading and accuracy.

(2) Minor changes in the antenna system or transmission line which would not result in an increase of service area.

(3) Changes in the location of the main studio except as provided for in subsection (b) (5).

(d) Other changes, except as above provided for in this section or in Standards of Good Engineering Practice for Television Broadcast Stations prescribed

³ Formal application required. See Standards of Good Engineering practice for Television Broadcast Stations for specific application form.

⁴ Informal application by letter may be made.

by the Commission may be made at any time without the authority of the Commission, provided that the Commission shall be promptly notified thereof, and such changes shall be shown in the next application for renewal of license.

Operating output power; how determined.—The operating output power, and the requirements for maintenance thereof, of each television broadcast station shall be determined by the Standards of Good Engineering Practice for Television Broadcast Stations.

Operation

Minimum operating schedule.—(a) The licensee of each television broadcast station shall maintain a regular program operating schedule transmitting a standard television signal for a total of 4 hours per week.

(b) The aural transmitter of a television broadcast station shall not be operated separately from the visual transmitter except for experimental or test purposes, and for purposes incidental to or connected with the operation of the visual transmitter.

Station identification.—(a) A licensee of a television broadcast station shall make station identification announcement, aurally and visually, (call letters and location), at the beginning and ending of each time of operation and during operation on the hour.

(b) Identification announcements during operation need not be made when to make such announcement would interrupt a single consecutive speech, play, or any type of production. In such cases the identification announcement shall be made at the first interruption of the entertainment continuity and at the conclusion thereof.

Motion picture film.—All motion picture film employed in the broadcasts of a television broadcast station must be briefly described as such either at the beginning of the program in which such film is used, or immediately prior to the broadcast of the film. Where the film broadcast is of more than 15 minutes duration, it shall also be briefly described as such either at the end of the program or immediately following the broadcast of the film.

Logs.—The licensee of each television broadcast station shall maintain program and operating logs and shall require entries to be made as follows:

(a) Program log.

(1) Entry of the time each station identification is made.

(2) Entry briefly describing each program broadcast under the heading 'outside pickup,' 'studio production,' and motion picture film,' or combination thereof.

(3) Entry showing that each sponsored program has been announced as sponsored, paid for or furnished by the sponsor.

(4) Entry showing name of each sponsor and commodity advertised.

(b) Operating log (when transmitting a standard television signal).

(1) Entry of the time the station begins to supply power to the antenna and the time it stops.

(2) Entry of the time the program begins and ends.

(3) Entry of each interruption to the carrier waves, cause and duration.

(4) Entry of the following each thirty minutes:

i) Operating constants of the last radio stages.

ii) Frequency monitor readings.

(c) Log of experimental operation when transmitting other than a standard television signal.

(1) Entry of the time the station begins to supply power to the antenna and the time it stops.

(2) Short description of the broadcast made and its technical purpose.

(d) Where an antenna or antenna supporting structure(s) is required to be illuminated the licensee shall make entries in the radio station log appropriate to the requirements of Section 2.82(a), (b), and (c) as follows:

(1) The time the tower lights are turned on and off if manually controlled.

(2) The time the daily visual observation of the tower lights was made.

(3) In the event of any observed failure of a tower light.

i) Nature of such failure.

ii) Time the failure was observed.

iii) Time and nature of the adjustments, repairs or replacements made.

iv) Airways Communication Station (C.A.A.) notified of the failure of any tower light not corrected within thirty minutes and the time such notice was given.

v) Time notice was given to the Airways Communication Station (C.A.A.) that the required illumination was resumed.

(4) Upon completion of the periodic inspection required at least once each three months.

i) The date of the inspection and the condition of all tower lights and associated tower lighting control devices.

ii) Any adjustments, replacements or repairs made to insure compliance with the lighting requirements.

Logs; retention of.—Logs of a television broadcast station shall be retained

by the licensee for a period of 2 years, except when required to be retained for a longer period in accordance with the provisions of section 2.54 (FCC General Rules and Regulations; in this volume see Rules and Regulations regarding production by Radio Broadcast stations).

Broadcasts by Candidates for Public Office

The provisions of sections on political broadcasts of the Rules and Regulations Governing Standard and High Frequency Broadcast Stations shall also govern television broadcast stations.

EXPERIMENTAL TELEVISION BROADCAST STATIONS

The term "experimental television broadcast station" means a station licensed for experimental transmission of transient visual images of moving or fixed objects for simultaneous reception and reproduction by the general public. The transmission of the synchronized sound (aural broadcast) is considered an essential phase of television broadcasting and one license will authorize both visual and aural broadcast as herein set forth.

Under these rules for experimental television broadcast stations, the Commission will authorize experimental television relay broadcast stations for transmitting from points where suitable wire facilities are not available, programs for broadcast by one or more television broadcast stations. Such authorization will be granted only to the licensee of a television broadcast station.

A license for an experimental television broadcast station will be issued for the purpose of carrying on research and experimentation for the advancement of television broadcasting which may include tests of equipment, training of personnel, and experimental programs as are necessary for the experimentation.

Licensing Requirements

A license for a television broadcast station will be issued only after a satisfactory showing has been made in regard to the following:

1. That the applicant has a definite program of research and experimentation in the technical phases of television broadcasting, which indicates reasonable promise of substantial contributions to the developments of the television art.

2. That upon the authorization of the proposed station the applicant can and will proceed immediately with its program of research and experimentation.

3. That the transmission of signals by radio is essential to the proposed program of research and experimentation.

4. That the program of research and experimentation will be conducted by qualified personnel.

5. That the applicant is legally, financially, technically, and otherwise qualified to carry forward the program.

6. That the public interest, convenience or necessity will be served through the operation of the proposed station.

Charges

No charges either direct or indirect shall be made by the licensee of an experimental television station for the production or transmission of either aural or visual programs transmitted by such station except that this section shall not apply to the transmission of commercial programs by an experimental television relay broadcast station for retransmission by a television broadcast station.

Announcements

A licensee of a television broadcast station shall make station identification announcement aurally and visually (call letters and location) at the beginning and ending of each time of operation and during operation on the hour.

At the time station identification announcements are made, there shall be added the following:

'This is a special television broadcast made by authority of the Federal Communications Commission for experimental purposes.'

Operating Requirements

Each licensee of a television broadcast station shall diligently prosecute its program of research from the time its station is authorized.

Each licensee of a television station will from time to time make such changes in its operation as may be directed by the Commission for the purpose of promoting worthwhile experimentation and improvement in the art of television broadcasting.

Frequency Assignment

(a) The following groups of channels are available for assignment to television broadcast stations licensed experimentally:

Group A		Group B	
Channel No.	Channel	Channel No.	Channel
1	50,000-56,000 kc	8	162,000-168,000 kc
2	60,000-66,000	9	180,000-186,000
3	66,000-72,000	10	186,000-192,000
4	78,000-84,000	11	204,000-210,000
5	84,000-90,000	12	210,000-216,000
6	96,000-102,000	13	230,000-236,000
7	102,000-108,000	14	236,000-242,000
Group C		15	258,000-264,000
Any 6000 kc band		16	264,000-270,000
above 300,000 kc		17	282,000-288,000
excluding band		18	288,000-294,000
400,000-401,000 kc.			

No experimental television broadcast station will be authorized to use more than one channel in Group A except for good cause shown. Both aural and visual carriers with side bands for modulation are authorized but no emission shall result outside the authorized channel.

No persons (including all persons under common control) shall control directly or indirectly, two or more experimental television broadcast stations (other than television relay broadcast stations) unless a showing is made that the character of the programs of research require a licensing of two or more separate stations.

A license for an experimental television broadcast station will be issued only on the condition that no objectionable interference will result from the transmissions of the station to the regular program transmissions of television broadcast stations. It shall at all times be the duty of the licensee of an experimental television broadcast station to ascertain that no interference will result from the transmissions of its station. With regard to interference with the transmissions of an experimental television broadcast station or the experimental or test transmissions of a television broadcast station, the licensees shall make arrangements for operations to avoid interference.

Channels in Groups B and C may be assigned to experimental television stations to serve auxiliary purposes such as television relay stations. No mobile or portable station will be licensed for the purpose of transmitting television programs to the public directly.

Power

The operating power of a television station shall be adequate for but not in excess of that necessary to carry forward the program of research and in no case in excess of the power specified in its license.

Reports

A report shall be filed with each application for renewal of station license which shall include a statement of each of the following:

1. Number of hours operated.
 2. Full data on research and experimentation conducted including the type of transmitting and studio equipment used and their mode of operation.
 3. Data on expense of research and operation during the period covered.
 4. Power employed, field intensity measurements and visual and aural observations and the types of instruments and receivers utilized to determine the service area of the station and the efficiency of respective types of transmissions.
 5. Estimated degree of public participation in reception, and the results of public observation as to the effectiveness of types of transmission.
 6. Conclusions, tentative and final.
 7. Program for further developments in television broadcasting.
 8. All developments and major changes in equipment.
 9. Any other pertinent developments.
- Special or progress reports shall be submitted from time to time as the Commission shall direct.

— FACSIMILE BROADCAST STATIONS —

The term "facsimile broadcast station" means a station licensed to transmit images of still objects for record reception by the general public.

License Qualifications

1. That the applicant has a program of research and experimentation which indicates reasonable promise of substantial contribution to the development of the facsimile broadcast service.
2. That sufficient facsimile recorders will be distributed to accomplish the experimental program proposed.
3. That the program of research and experimentation will be conducted by qualified engineers.
4. That the applicant is legally and financially qualified and possesses adequate technical facilities to carry forward the program.

5. That the public interest, convenience and/or necessity will be served through the operation of the proposed station.

Conditions of Licensing

- (a) A licensee of a facsimile broadcast station shall not make any charge, directly or indirectly, for the transmission of programs.
- (b) No licensee of any standard broadcast station or network shall make any additional charge, directly or indirectly, for the transmission of some phase of the programs by a facsimile broadcast station, nor shall commercial accounts be solicited by any licensee of a standard broadcast station or network, or others acting in their behalf, upon representation that images concerning that commercial program will be transmitted by a facsimile station.

Functions

FMBI is a non-profit association of FM boosters founded to see that frequency modulation advances in a coordinated logical manner; to guarantee that its interests are furthered and protected and to represent the FM industry in Washington; to provide an advisory service for its membership stations; to offer liaison between broadcasters and manufacturers interpreting the problems of each; to conduct a program of promotion and publicity aimed at stimulating public interest, and to provide a competent and accurate service for the truthful dissemination of information concerning FM. Membership includes individuals and companies who have an FM station, a construction permit or an application on file with the FCC for one.

STATUS OF FM—1943-1944

By *M. H. Shapiro*

Managing Editor, RADIO DAILY

THAT broadcasters throughout the country are thoroughly FM conscious was plainly indicated by the remarkable attendance at the FMBI convention in New York early this year. This annual meeting was the climax to a consistent promotional campaign, characterized in some quarters as the greatest in radio history, and drew more than 800 attendees from radio and allied industries, all desirous of furthering their knowledge of FM and intent upon keeping up with new developments.

During 1943, despite inability to build new outlets due to wartime restrictions, FM proceeded to make itself felt as a coming force in radio. Many applications for FM licenses desired by newspapers and newspaper-owned stations, were held in abeyance because of the FCC Order No. 79 designed to delve into the matter of publisher ownership of radio stations. When the FCC on Jan. 13, 1944, unanimously decided against any general rule regarding newspaper ownership of broadcast facilities, there naturally followed numerous applications for FM licenses by newspapers and others in and out of the industry.

When the FCC took FM out of the experimental license category and permitted it to go commercial, networks which fed their regular programs to FM outlets, decided to withdraw this carte blanche pickup. However, early this year and almost coincidental with the FM Broadcasters, Inc., annual meeting, NBC and CBS again made available its programs for such affiliates as had FM facilities. Thus many fine symphony programs and the best of commercials may be heard via this medium. Some provisos in the network permission to use their programs, have been made and the AFM is also now looking over the field for possible revenue.

While Chairman James L. Fly of the FCC has pledged that the Commission would give the broadcasters encouragement in their FM activities, he warned against the dangers of hurried postwar production on a large scale, unless on a very firm foundation. At the same

time, spokesmen for the leading manufacturing organizations revealed plans for extensive production after the war and they believed that a possible 5,000,000 FM receiving sets would be built during the first full year of postwar production. At this rate, approximately 15,000,000 such sets would be in the hands of the public during the first five years of full-scale production, all based on the invention of Major Edwin H. Armstrong.

Apart from the manufacturing and merchandising of FM sets, the leading companies equipped to put them out, announced plans to build FM transmitters on a scale to fulfill new orders and those on the backlog.

Another important development on the FM front was the appointment of William B. Lewis as executive vice-president of the American Network, Inc. This FM web has been in existence for some time, has been experimental, and active of late. Appointment of Lewis, formerly vice-president in charge of programs for CBS and more recently an official of the OWI Domestic Bureau, indicates that the FM network means business and is going ahead in the future.

Broadcasters are fully aware of both the advantages and some disadvantages of FM broadcasting, as compared to AM or standard broadcasting. Many of the problems were discussed at the annual meeting in January of this year when a panel made up of competent people from engineering, manufacturer and practical FM broadcaster fields sought to answer the questions as fairly as possible. Some of the difficulties for instance may lie with the FCC's method of issuing licenses by certain market areas, in the opinion of some FM broadcasters. Again there remains the dispute between FM and television proponents as to which shall have the higher frequencies in the spectrum.

The Radio Technical Planning Board has panels devoted to television and FM in its agenda and it is possible some conclusion may be reached through this board. Five channels in the FM have been earmarked by the FCC for non-commercial educational broadcasting.

HIGH FREQUENCY—FREQUENCY MODULATION BROADCAST STATIONS

The term "high frequency broadcast station" means a station licensed primarily for the transmission of radiotelephone emissions, intended to be received by the general public and operated on a channel in the high frequency broadcast band. Commercial high frequency broadcast stations must use frequency modulation.

Radio Equipment Manufacturers

**Cutting Another
RECORD
is the biggest job
of our lifetime**

Not in all Presto history have we ever produced so much of such importance . . .

As leading manufacturers of sound recording equipment, Presto has been an ever-increasing source of highly important electronic equipment for military uses.

Our facilities have been expanded—our knowledge and experience greatly broadened—our manufacturing and technical know-how daily widened.

The result will be evident in Presto post-war production and products. In the interim we are all set to cut another record in 1944—to make it an even greater year in Presto production for victory!

★ ★ ★

P.S. Invest in invasion in 1944! Not all can fight, but we all can work, sweat and save for our future. Use every dollar and dime you can spare to back the attack with War Bonds.

EQUIPMENT IN WAR AND PEACE

By J. P. Taylor

RCA Victor Division of Radio Corporation of America

WHAT will broadcast equipment be like in the period immediately following the war? There is a widespread impression that "electronics" has taken tremendous steps forward as a result of wartime developments. If this is true, the enthusiastic reason, then radio communications and broadcasting—the oldest and still by far the most important applications of electronic power—should benefit tremendously, and equipment should be new and wondrous indeed. But this viewpoint is not universally shared. It is not, in fact, unusual to hear expressed the opinion that post-war broadcast equipment will differ not one iota from immediate pre-war models. At the present time no one can say with any certainty which viewpoint is right. Not only the duration of the war but also the manner of termination—in particular, whether reconversion comes abruptly or is gradual—will have a decided bearing. It is obvious, for instance, that should civilian production be resumed suddenly in the very near future, then pre-war models would be the only ones that could be manufactured immediately. On the other hand, if the war continues for some time and reconversion is a gradual process, then there will be more time for planning and possibly for the design and drafting of new models.

Postwar Ideas

In spite of these big question marks it is, nevertheless, possible to formulate certain ideas on post-war equipment which may be of value in a general way to station planners. In doing this we have some fairly definite things to go on. We know, for instance, that some types of pre-war equipment had reached an advanced state of development, at least as regards quality of performance. Certain audio units, line amplifiers, for instance, which were produced before the war, were capable of performance equal to any likely standards of the future. Post-war units of the same type may be different as to circuit details or mechanical construction, but they certainly will not represent revolutionary improvements. Another thing that we know is that there have been many war developments in the high frequency ranges. Thus, we can

add to the fact that standard broadcast transmitting equipment pre-war was already highly developed the additional fact that wartime work has been concentrated in other fields, and come out with the obvious answer that standard-band equipment will not be greatly different after the war. On the other hand, we are probably safe in assuming that the general advance in high frequency technique will result in further development of television and related equipment. Finally, we have still a third basis to go on in predicting post-war equipment; namely, the knowledge to be gained by a study of design trends during the decade preceding the war. Such trends can be projected forward to provide some fairly good ideas on future developments.

Since our store of knowledge of the four types of broadcasting—viz., AM, FM, Television and Facsimile—is not equivalent and the degree of development to be expected in each of the four fields also varies considerably, it seems best to analyze each separately.

AM Broadcasting Equipment

"Standard Band" or "AM" broadcasting is, for the time being at least, the biggest and most important of the four types of broadcasting. It is also the oldest and most highly developed, not only as to technique but also as to equipment. Thanks to the efforts of the FCC, transmitting equipment for AM broadcasting has been of consistently high quality for the past ten years or more. Because of this control and a strongly competitive situation—among stations as well as manufacturers—AM equipment has reached a high state of development. Moreover, there have been no inklings of any wartime developments which would greatly influence AM transmitter design.

Judging from the trend in pre-war designs we can expect changes in some transmitter models. One of these trends was toward the use of circuits of higher efficiency. Actually this trend had already approached the ultimate. All of the RCA broadcast transmitters built just before the war employed high-level-modulated circuits which are inherently of

A "3rd Front" Victory... in Johnny's front room!

"Berlin aflame!" "Huge convoy safe!"
"Japs driven into the sea!"
... such battle-front news by radio
brings heart-lift a-plenty for
the mother and dad of Johnny
who is fighting somewhere overseas.

The high morale of the folks at home
... sustained by good tidings
via the family radio ... within
minutes of happening ... is testimony
of another "3rd Front" victory
for America's radio broadcasters.

Radio serves on the vital "3rd Front"
where the minds of an entire people
—not their bodies—is the target;
where "sparking" 130,000,000 minds
to work together ... and win together
as one—is the mission.

PLANTS IN 25 CITIES... OFFICES EVERYWHERE

high efficiency. In terms of "plate efficiency of the final stage," the usual criterion of transmitter efficiency, these transmitters had efficiencies of 85 per cent or better. This figure is not likely to be exceeded by any post-war designs.

Another trend was to the use of air-cooling (instead of water-cooling) for all tubes. In 1936 RCA introduced the first air-cooled 5 KW transmitter and in 1941 an air-cooled 50 KW. After the war the transmitters of all manufacturers will probably use air-cooled tubes.

Use of fewer and fewer tubes, with corresponding circuit simplification, has been another long time trend in broadcast transmitters. A 250 watt transmitter of 1932 vintage used a total of 20 tubes (plus a motor generator). In 1941 RCA produced a 250 watt transmitter using only 10 tubes total. These simplifications were due in most part to improvement in available tubes or to design of new tubes. Although few new low frequency tubes have been developed during the war, the further eventual improvement of tubes is a certainty.

Early broadcast transmitters had component parts mounted on horizontal shelves so that checking or replacing a defective component was difficult because of the poor accessibility. In 1936 RCA introduced "vertical-chassis" construction which by eliminating shelves and spreading out components greatly improved accessibility. The same transmitter introduced a new concept of "streamlined" styling based purely on functional design. These innovations started a trend which continued up to the beginning of the war. The most recent advance in this respect is marked by the RCA 5-E transmitter in which "front-access" to all parts is provided along with the ultimate in component accessibility.

In audio equipment for AM broadcasting—and the same equipment will be used for FM—there will undoubtedly be model changes. Here again, however, radical changes are unlikely. Microphones were pretty good before the war. The high-quality ribbon mikes, the "velocity" and the "uni-directional," which were developed and pioneered by RCA have been extensively used in the field of high-quality broadcasting. Turntables, following the trend of recent years, will continue to improve in quality. Just before the war RCA added a universal pick-up head (plays vertical or lateral cut records) to its de luxe turntable, thereby simplifying operating problems. Recording equipments, too, will improve in quality as broadcasters become educated to desirability of having the best that money could buy. In studio audio equipments

packaged units such as the RCA Consolette will undoubtedly become more and more popular. Custom-built RCA installations were also increasing rapidly in number just before the war. Made up from standard units, they provide a means of meeting individual station requirements at a minimum cost.

FM Broadcasting Equipment

The place of FM broadcasting is one of the biggest questions facing the industry today. Any early doubts as to the value and future of FM seem to have been well dispelled. FM has a future—and a big one! The question is: Where does it fit in with AM broadcasting? Many a present broadcaster would like to know whether to expand his AM facilities or save his money for FM—or for Television! Despite these questions it is obvious that FM will expand rapidly—and that a lot of FM equipment will be installed.

While FM transmitters operate in a different frequency band and employ circuits at variance with AM equipment, the design of FM transmitters resembles that of the more conventional models and will undoubtedly follow even more closely as time goes on.

Taking a quick look at the pre-war trends in FM transmitters, we note that the most outstanding was that toward simplification of circuits and reduction in number of tubes used. Early models used as many as 20 tubes in the modulator unit alone—a 1 KW transmitter employed more than 40 tubes. The RCA 1 KW FM transmitter introduced in 1940 used only five tubes in the modulator, 20 in the whole transmitter. Prior to the war RCA had developed and was ready to put into application some novel FM circuits. These will be incorporated in apparatus produced in the post-war period.

Another trend which developed as the older and larger transmitter manufacturers entered the field was a movement toward building "FM transmitters like de luxe AM transmitters." The high-quality of construction standards (as well as performance), the streamlined styling and the features of accessibility developed in many years of AM experience were thus made available in FM transmitters. The very last FM transmitters produced before the war—such as the RCA 10 KW—were outstanding in this respect. They foretold an era in which FM transmitters would take on the appearance of professionalism typical of present-day AM installations.

That post-war FM equipment will comprise a complete line is fairly certain.

Voice communications on every front. . .

Whether by radio or land wire telephone, a voice command gets the job done with clarity and speed.

Available from stock. 1700U series microphone. Single button carbon type, push-to-talk switch, etc. For trainers, intercommunication and general transmitter service.

UNIVERSAL microphones are playing a vital part in voice communications of all the Armed Forces . . . being the first instrument through which a command is given. Care must be taken that the electronic patterns of the voice are held true for the many electrical circuits through which they must later pass. UNIVERSAL microphones with their precise workmanship are carrying the message through in all forms of voice communication whether from a tank, ship or aeroplane. UNIVERSAL products meet all U. S. Army Signal Corps Laboratory tests. Standardization of parts, inspection, and workmanship of high order combined with the best of material, make UNIVERSAL'S microphones and accessories outstanding in every application.

U. S. Army Signal Corps and U. S. Navy plugs and jacks are offered as voice communication components to manufacturers of transmitters and sound equipment for the Armed Forces. Catalog No. 830 contains complete details.

ELECTRONICS OF THE FUTURE

By *Dr. Walter R. G. Baker*

Vice-President in Charge of Electronics, General Electric Co.

ELECTRONICS is a serious science. Already it is an important business. It is going to affect the lives and fortunes of every one of us in the years ahead and I believe the fundamentals of that science and that business deserve consideration.

Man has always been curious about the composition of his environment and for this reason people are interested in electronics. Until the 17th century the reasoning of Aristotle, that everything was made of earth, air, fire and water, was generally accepted. The alchemists—opportunists of their time—thought this a fine idea, since by changing the proportions of these four “substances” it should be possible to obtain gold and silver, cheap. They were closer to the truth as we know it today than they had any right to be.

Role of Electrons

Scientists began to talk about electrons 40 years ago and since then we have learned that all the manifestations of what we call electricity are due to electrons. We know that electric current is the harnessing, the channeling, the coordinated flow of electrons.

We know that to light a 40-watt, 110-volt lamp there must pass through the filament, each second, 2,300,000 electrons. But this is not electronics. In the sense we use the term today we mean this raw material, these electrons freed from the bondage of wires, freed from the attractive force operating within the atom. Electrons are electricity in the raw.

Electronics is not a product such as an airplane, or a turbine, or a locomotive. It is a branch of science like chemistry and, as chemistry, is not limited to the manufacture of synthetic rubber or plastics; neither is electronics limited to radio, or television, or communication, or locator systems.

In order to free electrons from the atom, there are three things that can be done: electrons may be knocked out of atoms by violent impact from high-speed

particles; they may be liberated by some form of wave energy such as light rays; they may be freed by heat. The heat method is presently the most important. It is used in millions of electronic tubes such as those in your radio. Actually the hot filament wire boils out electrons in much the way steam comes out of a kettle.

The electronic tube is the most important tool for developing the business end of electronics. The reason why seemingly magical things can be accomplished with electronic tubes is this: during the split second when the electric current is a flow of free electrons in the tube, it can be controlled with a degree of ease, speed and precision that is impossible when the electrons are imprisoned in the wire. With an electronic tube, the current can be stopped, started again, increased or decreased—instantaneously, smoothly and accurately; and without mechanical movement, noise or vibration.

Shortly after World War I, the electronic tube gave birth to its first major business—radio broadcasting.

Frequency Modulation

Shortly before World War II, a new method of radio broadcasting—Frequency Modulation—was started. FM is a new kind of radio wave. It reduces static to the vanishing point and provides a high-fidelity “natural-color” reproduction of sound impossible with present day radio. FM also makes it possible to have not 90 but several thousand radio stations in the United States—all broadcasting without interfering with one another—contrasted with the limited number possible with the present system.

There is little question but that the advantages offered to the consumer by frequency modulation will obsolete the 60,000,000 radio receivers now in American homes.

Radio broadcasting, a \$300,000,000 a year industry, giving employment to thousands and enjoyment to millions, would not exist had we not learned how

☆ ☆ *Electronics* | *On To Victory* ☆ ☆ ☆

to control the electron with a device called the electronic tube.

Television Progress

Certainly television will come after the war, but how soon cannot be definitely stated. It will not be at once, since a large investment must be made in television transmitters and some system of connecting transmitters into a network. Whether the inter-connection will be by means of radio, coaxial cable, or wave guides depends upon many factors. The problem certainly can be resolved, but it will take time to work out—not only the technical solution, but what is perhaps of more importance, the economics.

The technical progress due to the war will have a more direct effect on television than on radio broadcasting. This is equally true as applied to some portion of the economics of television equipment. For example, the productive capacity available for cathode ray or picture tubes will be greater than before the war.

Things to Come

The influence of television on our lives from both a national and international viewpoint is a most interesting and fascinating question. What little we know about the electron has, among other things, brought forth the electronic tube. This tube has made possible worldwide wire and wireless communication and sound broadcasting which has brought not merely a more compact world, but a social awakening, an integration of the masses, and a new intellectual activity, the full effect of which we do not as yet realize. To this statement, if we add the old Chinese proverb that "A picture is worth 10,000 words," we begin to see the enormous potentialities of television.

Electronics is reaching into every branch of industry. There are many industrial applications where electronics can do the work better than other types of equipment; in others, electronics is the only possible way of accomplishing the result.

EQUIPMENT IN WAR AND PEACE . . . *By J. P. Taylor*

(Continued from Page 961)

Before the war RCA had offered (and, in fact, installed) station equipments complete "from microphone to antenna." The audio equipments for these installations were obtained by slight modifications of some of the AM units which sufficed to bring these up to FM standards. After the war all RCA audio units will be capable of FM quality transmission and thereby suitable for use interchangeably in either AM or FM systems. RCA also had a complete line of FM monitoring equipment—including the only standard field intensity meter suitable for use in this range. After the war RCA will have improved models of these.

So-called S-T-L (studio-transmitter-link) transmitters have played considerable part in FM discussions. They insure "FM quality" lines where otherwise unobtainable and provide probably the only satisfactory means of feeding programs to remote stations such as those on mountain tops.

Television Broadcasting Equipment

Television is an art which, while backed up by many years of research and development work, is still subject to important advances. In the past television transmitters have been limited to operation on the lower frequency channels assigned by the FCC. It is obvious that when television service is established it will be necessary to have equipment capable of operation on any of the assigned channels. It may be expected, therefore, that

television transmitters will become available for operation on higher frequencies than at present.

In connection with television studio and remote pickup equipment, changes appear to be less radical. Satisfactory equipments of high quality have been developed and were in use prior to the war. New camera pickup tubes of improved sensitivity were made available by RCA shortly before the war. Since improvement in camera sensitivity will go far to solve the lighting problem and may make large and complicated lighting setups unnecessary, it may be expected that development of more sensitive cameras will continue. Remote equipments will be very important because of the part such pickups will play in producing a source of local programs.

Facsimile Broadcasting Equipment

A discussion of broadcasting equipment is not complete without some mention of facsimile. The pre-war experiments with facsimile broadcasting were inconclusive. Some of this may be attributed to the need for a more definite knowledge of the public's requirement for facsimile service. Speed of reproduction, paper size, etc., are factors which manufacturers can control by proper design of equipment. Certainly with additional experience and recent technical progress, facsimile equipment can be supplied to meet the needs of broadcast service.

Marine Receivers: C. Gunther, Chairman, RCA Manufacturing Co.

Electronics Applications Section (Non-Communications): H. H. Willis, Chairman, Sperry Gyroscope Co.; D. G. Little, Vice-Chairman, Westinghouse Electric & Mfg. Co.

RADIO TECHNICAL PLANNING BOARD

Dr. W. R. G. Baker, Chairman, General Electric Co.

Virgil M. Graham, Secretary, Sylvania Electric Products, Inc.

Dr. Ralph Bown, Bell Telephone Laboratories, Inc.

Leonard H. Hole, Columbia Broadcasting System, Inc.; Dr. P. C. Goldmark, Alternate.

Allen B. DuMont, Allen B. DuMont Laboratories, Inc.; Dr. T. T. Goldsmith, Alternate.

B. Ray Cummings, Farnsworth Television & Radio Corp.; Madison Cawein, Alternate.

Dr. E. F. W. Alexanderson, General Electric Co.; I. J. Kaar, Alternate.

Daniel E. Harnett, Hazeltine Service Corp.; W. A. MacDonald, Alternate.

Albert I. Lodwick, Hughes Tool Co.; A. F. Murray, Alternate.

Dr. Alfred N. Goldsmith, Institute of Radio Engineers; H. A. Wheeler, Alternate.

E. W. Engstrom, RCA Mfg. Co.; Dr. C. B. Jolliffe, Alternate.

D. G. Little, Westinghouse Electric & Mfg. Co.

J. V. L. Hogan, National Association of Broadcasters; L. C. Smeby, Alternate.

David B. Smith, Philco Corp.; F. J. Bingley, Alternate.

Dr. R. H. Manson, Stromberg-Carlson Telephone Mfg. Co.; Dr. G. R. Town, Alternate.

Paul Raibourn, Television Productions, Inc.

John R. Howland, Zenith Radio Corp.; J. E. Brown, Alternate.

CHIEF ENGINEERS

OF STATIONS IN UNITED STATES AND CANADA

AS OF JANUARY 1st, 1944

Through a radio manpower survey conducted by RADIO DAILY, it was proved that networks and independent stations alike are doing a most commendable job in keeping the forces on the home front in contact with the ever-occurring incidents on the fighting fronts via the indispensable efforts of the engineering departments. Despite the heavy drainage on manpower in this particular department, no more than six very small stations were forced to discontinue operations for the duration.

AN UP-TO-THE-MINUTE LIST OF IMPORTANT

EQUIPMENT FIRMS

SUPPLYING RADIO IN ALL OF ITS BRANCHES

H. W. Acton Co., Inc.

370 Seventh Ave., New York, N. Y.
Phone LOngacre 5-4884

President.....Harry W. Acton
Treasurer.....Harold A. Bengeyfield

BRANCH OFFICE: Lowell, Mass.

PRODUCTS: Transcription, phonograph cutting and semi-permanent needles.

The Acme Elec. & Mfg. Co.

50 Water St., Cuba, N. Y.
Phone Cuba 4

President.....C. H. Bunch
Vice-President, Chief Engineer

J. A. Comstock

Treasurer.....L. E. Williams

Secretary.....W. F. Radon

BRANCH OFFICE: Clyde, N. Y.

PRODUCTS: Transmitting transformers, broadcast equipment, audio reactors, output and microphone input transformers, and other types of transformers.

Admiral Corporation

Formerly

Continental Radio and Television Corp.

3800 Cortland St., Chicago 47, Ill.

Phone: SPAlding 1400

President.....Ross D. Siragusa

Vice-President Production....John Huarisa

Sales Manager.....J. H. Clippinger

Treasurer.....L. C. Park

PRODUCTS: Receiving sets, radio-phonograph combinations, FM receiving sets, record-players, parts.

Aerovox Corp.

740 Belleville Ave., New Bedford, Mass.

President.....S. I. Cole

Sales Manager.....Charles Golenpaul

PRODUCTS: Capacitors, paper, electrolytic and mica, for transmitting, receiving and electronic applications, including paper, oil and wax impregnated, moulded-mica, bakelite-cased and ceramic-cased-mica capacitors; carbon and wire-wound resistors; electrolytics for filter circuits, motor-starting and industrial applications.

Aircraft Accessories Corp.

Fairfax & Funston Roads, Kansas City, Kans.

Phone: FAirfax 3200

President.....Randolph C. Walker

Vice-President.....Clifford C. Andrews

Sales Manager.....Emery Johnson

PRODUCTS: Transmitters, piezo-electric crystals aviation antenna.

Airdesign & Fabrication

241 Fairfield Avenue, Upper Darby, Pa.

President & Chief Engineer...L. E. Pamphilon

Plant Superintendent.....W. R. Keenly

Vice-President & Treasurer....W. C. Faust

PRODUCTS: Power transformers, reactors, audio input and output transformers, iron core filters, and relay coils.

Air King Products Co., Inc.

1523-29 Sixty-third St., Brooklyn, N. Y.

Phone: BEachview 2-6700

President.....J. P. Lieberman

Vice-President.....H. D. Halperin

Sales Manager.....Jules Frank

PRODUCTS: Receiving sets, radio-phonograph combinations, television receiving sets.

Allen-Bradley Co.

136 W. Greenfield Ave., Milwaukee, Wisc.

Phone: MITchell 5151

President.....Harry L. Bradley

Vice-President & General Manager

F. F. Loock

PRODUCTS: Fixed and variable composition resistors.

The Alliance Manufacturing Co.

Lake Park Blvd., Alliance, Ohio

President.....W. H. Purcell

General Manager.....Owen L. Lewis

PRODUCTS: Phonograph motors, record changer motors, recording motors, tuning motors.

American Condenser Corp.

2508 S. Michigan Ave., Chicago, Ill.

Phone: CALumet 5903

President & General Manager

Irving Menschik

PRODUCTS: Transmitting condensers, electrolytic condensers, ignition condensers, by-pass condensers, telephone condensers.

American Microphone Co., Ltd.

1915 S. Western Ave., Los Angeles, Calif.

Phone PA 1161

President.....P. S. Gramer

Vice-President.....F. A. Yarbrough

Secretary.....Z. R. Yarbrough

PRODUCTS: Microphones.

American Microphone & Telephone Co.

1220 Glendon Ave., Los Angeles, Calif.
President.....C. W. Evans
Supt., Intercommunicating Equipment
M. E. Harris
Foreman, Microphone Dept. O. B. Carrier
PRODUCTS: Microphones, intercommunicating telephones, talk-back equipment, amplifiers.

The American Steel Package Co.

Squire Ave., Defiance, Ohio
President.....G. E. Behringer
Sales Manager.....W. F. Reiter
PRODUCTS: Variable gang tuning condensers, air trimmer condensers.

Amertype Recordgraph Corporation

333 West 52nd Street, New York 19, N. Y.
PRODUCTS: Sound Recording Instruments for Radio Stations, 2-Way Telephone Conversations Where Authorized, Radio Interception and Monitoring.

Ampere Electronic Products

79 Washington St., Brooklyn, N. Y.
Phone Cumberland 6-4430
Sales Manager.....S. Norris
BRANCH OFFICES: 1623 S. Hill St., Los Angeles, Cal.; 3218 Western Ave., Seattle, Wash.; 9 S. Clinton St., Chicago, Ill. PRODUCTS: Transmitting Tubes.

Amplifier Co. of America

398 Broadway, New York 13, N. Y.
CANal 6-7612
General Manager.....N. M. Haynes
Chief Engineer.....A. C. Shaney
Sales Manager.....H. S. Manney
PRODUCTS: Electronic equipment, Regulated Power Supplies, Amplifiers, Transformers, Filter Networks.

Amy, Aceves & King, Inc.

11 West 42nd St., New York 18, N. Y.
Phone LONgacre 5-6622
President.....Ernest V. Amy
General Manager.....Frank King
PRODUCTS: Antenna Systems, Radio Transmitters and Receivers.

Andrea Radio Corp.

43-20 Thirty-fourth St., Long Island City, N. Y.
Phone: STillwell 4-4754
President.....F. A. D. Andrea
PRODUCTS: Receiving sets, television sets.

Ansley Radio Corp.
