(O) RESULTS: (For all hits claimed on ship targets and for land targets of special interest, draw diagram, top or side view or both, as appropriate, showing type and location of hits. For all targets give location and effect of hits, and identify by numbers above. Use additional sheets if necessary).

The Australian Army had requested that bombs be concentrated in the north west end of the target. This was done successfully with seven beabs in the designated part of the target and two slightly should in the attached photograph.

LIONGAR

Lieutenant Colonel ANDERSON, Commanding Officer, led nine PBJs in a medium altitude daylight attack on Ruri Tank Park, Bougainville. The formation was composed of nine PBJs in three, three plane sections.

1409

1450

The strike was airborne by 1409 and after joining up as described above proceeded on a course of 1400 magnetic to the north end of Buka Island at which the flight made a 360° climbing turn to gain bombing altitude. The formation then crossed Buka Island on 1300 magnetic while bombardiers stabalized bombaights and figured drift. When five miles off the east coast a turn was made to 181° magnetic to the north coast of Bougainville where the flight turned into the bombing run.

Bombs were released from 9,500 feet at 1650 on a course of 1300 magnetic at 160 knots indicated air speed.

No anti-aircraft fire was encountered.

The Australian Army had requested that bombs be concentrated in the north west end of the target. was done successfully, with seven bombs in the designated part of the target and two slightly short. of bomb hits with relation to the target is shown in the The pattern attached photograph.

(All times in this narrative are love).

WARD D. MARTIN Capt., USMCR Intelligence Officer

NORMAN J. ANDERSON LtCol., USMC Commanding Officer
