Approved by the World Agricultural Outlook Board. Summary released October 3, 1996. The summary of the next *Fruit and Tree Nuts Situation and Outlook* is scheduled for release on March 25, 1997.

Summaries and text of situation and outlook reports may be accessed electronically. For details call (202) 219-0515.

The *Fruit and Tree Nuts Situation and Outlook* is published two times a year and supplemented by a yearbook.

See back cover for subscription information.

The U.S. Department of Agriculture (USDA) prohibits discrimination in its programs on the basis of race, color, national origin, sex, religion, age, disability, political beliefs and marital or familial status. (Not all prohibited bases apply to all programs). Persons with disabilities who require alternative means for communication of program information (braille, large print, audiotape, etc.) should contact the USDA Office of Communications at (202) 720-2791.

To file a complaint, write the Secretary of Agriculture, U.S. Department of Agriculture, Washington, D.C., 20250, or call 1-800-245-6340 (voice) or (202) 720-1127 (TDD). USDA is an equal opportunity employer.

Summary

Value of Fruit Production Up in 1995 with Record Noncitrus Value

The value of U.S. fruit production increased to \$9.063 billion in 1995, up 6 percent from the previous year. The value of the noncitrus crop, 74 percent of the value of the total fruit crop, increased 7 percent to a record \$6.701 billion. Utilized noncitrus production in 1995 was the smallest since 1991, but higher prices for many commodities outweighed the volume reduction to yield the high value. Output for several major noncitrus fruit crops declined; some exceptions were grapes, tart cherries, avocados, and mangos.

The 1994/95 citrus crop was 15.8 million short tons, the largest since 1979/80 and 23 percent greater than the average of the previous 5 seasons. Citrus bearing acreage in 1995 was the largest since 1983 as the industry continued to rebuild from damaging freezes in the 1980s. Increased production of oranges and grapefruit more than offset a smaller lemon crop. With larger production outweighing lower prices for oranges and grapefruit, the value of the citrus crop increased 4 percent. Strong citrus production pushed total fruit output to a record 32 million tons.

Per Capita Fruit Consumption Unchanged in 1995

In 1995, per capita consumption of fruit, both fresh and processed, totaled 277 pounds, fresh-weight equivalent, essentially unchanged from 1994.¹ Declines in apple, peach, pear, pineapple, strawberry, tangerine, and lemon consumption were offset by increases in grape, orange, grapefruit, and lime consumption. Total per capita fruit consumption has increased slightly since 1975. The average consumption for 1993 to 1995 was 277 pounds per capita, 7 percent higher than the average consumption of 1975 to 1977. The share of fruit consumed fresh increased from an average of 32 percent in 1975 to 1977, to an average of 36 percent in 1993 to 1995.

Per capita fresh fruit consumption fell 3 pounds in 1995 to 98 pounds. Noncitrus consumption fell about 2 pounds and citrus fell 1 pound per person. Per capita processed fruit consumption increased 2 percent to 179 pounds (fresh-weight equivalent). Noncitrus processed fruit consumption, at about 86 pounds per person, was virtually unchanged from 1994. Processed citrus consumption increased 4 percent to 90 pounds.

Total apple consumption fell from 50 pounds per person in 1994 to 46 pounds in 1995. Utilized apple production declined 7 percent in 1995 from the year before. Even with a 34-percent increase in imports and a 20-percent decrease in exports for the season, the total fresh supply available to domestic consumers declined 2 percent. Fresh apple consumption fell 1 pound to 19 pounds per person. Grower prices increased 28 percent for fresh-market apples. With smaller

supplies, less U.S. production went into processing; per capita processed apple consumption declined 9 percent to 27 pounds.

Peach consumption declined 10 percent to 9 pounds per person in 1995. Utilized peach production fell 7 percent. Fresh consumption in 1995 decreased less than 1 percent. Processed consumption, not adjusted for stock changes, declined 21 percent as the volume of the crop used in processing fell to the lowest level since 1983.

Total strawberry consumption fell 4 percent in 1995, as an 8-percent decline in fresh strawberry consumption outweighed a 10-percent rise in processed consumption. Strawberry production for the fresh market fell 9 percent but was partially offset by a 35-percent rise in imports. Since trade in fresh strawberries is relatively small, the quantity available for fresh consumption still decreased about 7 percent from the previous year. Grower prices for fresh strawberries increased to \$60.80 per cwt in 1995, up about 1 percent from 1994. Strawberry harvested acres continued to decline from the record of 51,330 acres set in 1993.

Pear consumption fell 12 percent with almost all of the change in processed consumption (down 18 percent). Utilized pear production declined 9 percent in 1995 from 1994's record production of 1.046 million tons. Imports and exports both increased, leaving total 1995 U.S. supply of fresh pears just 1 percent below the previous year. Grower prices for fresh pears increased 30 percent in 1995, while prices for processed pears fell 4 percent from the previous year, continuing a downward trend since highs set in 1989 and 1992.

Per capita grape consumption increased 11 percent to 46 pounds. Utilized grape production increased 1 percent in 1995 over the previous year. A 7-percent increase in fresh utilization outweighed larger exports, leaving the total domestic table grape supply up 5 percent. Per capita consumption of fresh grapes increased 4 percent. The quantity of grapes used for juice increased 18 percent in 1995. Per capita consumption of processed grapes increased 12 percent to 38 pounds.

Orange consumption (including Temples) increased 3 percent to 90 pounds per person in 1995. Orange production increased 11 percent in 1994/95 over the previous season. Fresh orange utilization declined 3 percent and processed utilization increased 14 percent. Fresh orange consumption declined 6 percent to 12.3 pounds per person in 1994/95, while processed consumption increased 4 percent to 78 pounds. Grower prices for fresh market oranges in the 1994/95 season rose slightly to \$7.79 per box, but processing market orange prices fell 8 percent to \$3.21 per box, on-tree basis.

Overall, grapefruit consumption increased 11 percent to 16.5 pounds per person. U.S. grapefruit production totaled 2.912 million tons in 1994/95, a 9-percent increase from the previous season and the largest volume since 1979/80. Exports increased 6 percent, leaving domestic consumption

¹ Consumption estimates are marketing year data which include citrus fruit harvested in 1994/95 and noncitrus fruit harvested in 1995.

during 1994/95 only slightly below that of the previous season. Fresh consumption decreased fractionally to 6 pounds in 1995. Grower prices for fresh market grapefruit in the 1994/95 season fell 15 percent to \$4.78 per box, the lowest since 1983/84. With unusually low fresh-market prices in 1994/95, more grapefruit was diverted to the processed market than at any time since 1980/81, further depressing processed prices. Processed grapefruit consumption in 1994/95 increased 19 percent to 10.5 pounds per person.

Canned fruit: Total consumption of nine canned fruits, not adjusted for stock changes, fell to 15.3 pounds per person (product-weight basis) in 1995, down from 18.3 pounds in 1994, and the lowest in the last 21 years. Reduced domestic supplies led to lower apparent consumption of canned apples, apricots, tart cherries, olives, peaches, pineapples, plums and prunes, and pears. Of the nine major fruits, only consumption of canned sweet cherries increased, from .03 pound per person to .04. Changes in canned fruit inventories have not been accounted for since 1988 when industry tabulation and publication of carryover data ceased. Without inventory data, year-to-year changes in per capita consumption can be exaggerated.

Frozen fruit: Per capita consumption of nine types of frozen fruit increased 10 percent in 1995 to 3.8 pounds (frozen-weight basis), the highest in the last 21 years. Consumption increased for blackberries, raspberries, strawberries, and other berries (including boysenberries and loganberries). Of the berries, only blueberry consumption decreased. Per capita frozen apple consumption increased, even though total apple production fell. Consumption of frozen apricots, cherries, and peaches decreased.

Dried fruit: Consumption of dried fruit totaled 2.7 pounds per person (dry basis) in 1995/96, down 7 percent from 1994/95. Raisins and dried prunes accounted for 79 percent of dried fruit consumption. Raisin consumption declined in 1995/96. Per capita consumption of dried prunes remained unchanged at .5 pound. Dried dates and peaches showed small increases in per capita consumption. Consumption of dried apples, apricots, and figs declined following smaller production of these fruits.

Fruit juice: Total per capita fruit juice consumption in 1995/96 remained about the same as in the previous season. Noncitrus juice consumption increased to 2.5 single-strength equivalent gallons per person in 1995/96, up slightly from 1994/95. Apple juice consumption declined 8 percent from the high in 1994/95, as both production of apple juice and cider, and imports declined. Both grape and pineapple per capita juice consumption increased. Grape juice production increased due to ample total grape production. Although pineapple juice production declined slightly, imports more than compensated to increase total available supply. Citrus juice consumption declined slightly to 6.2 single-strength equivalent gallons in 1995/96. Orange juice

consumption decreased to 5.4 single-strength equivalent gallons. Per capita grapefruit juice consumption declined to 0.6 gallon. Lime juice consumption decreased, but lemon juice consumption increased.

USDA's juice consumption estimates are based on the quantities of fruit used to make juice and are not likely to match estimates based on retail sales data. After initial processing, juices can be blended, used in other products, and repackaged before reaching the market. USDA methodology does not distinguish final product forms. In addition, year-to-year changes in noncitrus juice consumption are likely overstated because carryover stock data are not available.

Tree Nut Production and Per Capita Consumption Decline in 1995

The value of production for all tree nuts rose to \$1.66 billion in 1995, the second highest on record. Crop value for each tree nut was higher except for almonds, which was slightly lower in spite of record grower prices. U.S. tree nut production fell sharply in 1995 to 781 million pounds (shelled basis), the lowest since 1986. Almond production in 1995 was down 50 percent, contributing most of the decrease in total tree nut output. The smaller crop of almonds was partially due to a drop in bearing acreage, bad weather conditions, and poor pollination. The macadamia and walnut crops were slightly lower in 1995, but production of hazelnuts, pecans, and pistachios was higher.

Due to the smaller supply of tree nuts and higher prices, total domestic use fell to 492 million pounds (shelled basis) or 1.86 pounds per capita, the lowest consumption level since 1980/81. Per capita consumption of hazelnuts increased. Consumption of almonds, pecans, walnuts, macadamias, and pistachios all declined. The largest change in per capita consumption was in the other nuts category which includes Brazil nuts, pignolias, chestnuts, cashews, and mixed nuts. Consumption of other nuts fell from .50 to .34 pound per person.

A small crop of almonds, at 370 million pounds in 1995, caused supplies to fall sharply and the season average grower price to jump to a record high of \$2.39 per pound. The much smaller almond supply caused the volume of exports and domestic use to decrease substantially and left ending stocks at a very low level. Per capita consumption fell from .56 pound to .50 pound. Utilized walnut production in 1995 decreased 3 percent. The average grower price rose substantially due to excellent quality. Domestic use fell during the 1995/96 marketing season. Per capita walnut consumption declined from .44 pound to .36 pound. Pecan production in 1995 increased to 268 million pounds in-shell, 35 percent above the small 1994 crop. The average grower price remained almost unchanged at \$1.01 per pound, allowing grower cash receipts to climb to nearly \$272 million.

List of Tables

	Page	
GENERAL		
A-1.	Bearing acreage for fruit and tree nuts, United States, 1975 to date	9
A-2.	Utilized production and value of production of citrus and noncitrus fruit, United States, 1975 to date	9
A-3.	Bearing acreage for selected citrus and noncitrus fruit, United States, 1975 to date	10
A-4.	Total commercial production for selected citrus and noncitrus fruit, United States 1975 to date	11
A-5.	Average price indexes for fruit, United States, 1975 to date	12
A-6.	Annual average retail prices for selected fresh fruit, United States, 1980 to date	12

NONCITRUS FRUIT

General:

B-1.	Utilization of noncitrus fruit production and value, United States, 1975 to date	13
B-2.	Fruit, frozen: Commercial pack, United States, 1975 to date	14
B-3.	Fruit, dried: Production (dry basis), California, 1975 to date	15

Apples:

B-4.	Apples: Production, utilization, and season average grower price, United States, 1975 to date	15
B-5.	Apples, fresh: Monthly prices received by growers, United States, 1975 to date	16
B-6.	Apples, Red Delicious, fresh: Monthly retail prices, United States, 1980 to date	16
B-7.	Apples: Processed utilization and season-average grower price, United States, 1975 to date	17

Apricots:

B-8.	Apricots: Production, utilization, and season average grower price, United States, 1975 to date	17
------	---	----

Avocados:

B-9.	Avocados: Production, season-average grower price, and value, by State, 1975/76 to date	18
------	---	----

Bananas:

B-10.	Bananas: Number of farms, acreage, production, price, and value, Hawaii, 1975 to date	18
-------	---	----

Cherries:

B-11.	Cherries, sweet: Production, utilization, and season-average grower price, United States, 1975 to date	19
B-12.	Cherries, tart: Production, utilization, and season-average grower price, United States, 1975 to date . .	19

Figs:

B-13.	Figs: Production, utilization, and season-average grower price, California, 1975 to date	20
-------	--	----

Grapes:

B-14.	Grapes: Production, utilization, and season-average grower price, United States, 1975 to date	20
B-15.	Grapes: Production and season-average grower price, California, 1975 to date	21
B-16.	Grapes: Processed utilization and season-average grower price, United States, 1975 to date	21

Guavas:

B-17.	Guavas: Total processed, farm production, price and value, Hawaii, 1975 to date	22
-------	---	----

Kiwifruit:

B-18.	Kiwifruit: Acreage, production, season-average grower price, and value, California, 1980 to date . . .	22

Mangos:

B-19.	Mangos: Acreage, bearing trees, production, season-average grower price, and value, Florida, 1975 to date	23
-------	--	----

Nectarines:	
B-20. Nectarines: Production, utilization, and season-average grower price, California, 1975 to date	23
Olives:	
B-21. Olives: Bearing acreage, production, utilization, season-average grower price, and value, California, 1975 to date	24
Papayas:	
B-22. Papayas: Acreage, yield per acre, production, utilization, and season-average grower price, Hawaii, 1975 to date	24
Peaches:	
B-23. Peaches: Production, utilization, and season-average grower price, United States, 1975 to date	25
B-24. Peaches, fresh: Monthly prices received by growers, United States, 1975 to date	25
B-25. Peaches: Processed utilization, and season-average grower price, United States, 1975 to date	26
Pears:	
B-26. All pears: Production, utilization, and season-average grower price, United States, 1975 to date	26
B-27. Bartlett pears: Production, utilization, and season-average grower price, United States, 1975 to date	27
B-28. Pears, fresh: Monthly prices received by growers, United States, 1975 to date	27
Pineapples:	
B-29. Pineapples: Number of farms, acreage, production, disposition, price, and value, Hawaii, 1975 to date	28
Plums and prunes:	
B-30. Plums: Acreage, production, season-average grower price, and value, California, 1975 to date	28
B-31. Prunes (dried basis): Acreage, production, season-average grower price, and value, California, 1975 to date	29
B-32. Prunes and plums: Production, utilization, and season-average grower price, four States, 1975 to date	29

CITRUS FRUIT

Grapefruit:	
C-1. Grapefruit: Bearing acreage and yield per acre, by State, 1975/76 to date	30
C-2. Grapefruit: Production, by State, 1975/76 to date	30
C-3. Grapefruit: Utilization of production, by State, 1975/76 to date	31
C-4. Grapefruit: Equivalent-on-tree returns, by State, 1975/76 to date	31
C-5. All grapefruit: Monthly equivalent-on-tree returns received by growers, Arizona, 1975/76 to date	32
C-6. All grapefruit: Monthly equivalent-on-tree returns received by growers, California, 1975/76 to date	32
C-7. All grapefruit: Monthly equivalent-on-tree returns received by growers, Florida, 1975/76 to date	33
C-8. All grapefruit: Monthly equivalent-on-tree returns received by growers, Texas, 1975/76 to date	33
C-9. All grapefruit: Monthly equivalent-on-tree returns received by growers, United States, 1975/76 to date	34
C-10. Grapefruit processed, Florida, 1975/76 to date	34
C-11. Canned grapefruit juice: Canners' stocks, pack, supplies, and movement, Florida, 1975/76 to date	35
C-12. Frozen concentrated grapefruit juice: Canners pack, supplies, and movement, Florida, 1975/76 to date	35

Lemons:	
C-13. Lemons: Acreage, yield per acre, and production, by State, 1975/76 to date	36
C-14. Lemons: Utilization of production, by State, 1975/76 to date	36
C-15. All lemons: Equivalent-on-tree returns, by State, 1975/76 to date	37
C-16. All lemons: Monthly equivalent-on-tree returns received by growers, Arizona, 1975/76 to date	37
C-17. All lemons: Monthly equivalent-on-tree returns received by growers, California, 1975/76 to date	37
C-18. All lemons: Monthly equivalent-on-tree returns received by growers, United States, 1975/76 to date	38

Limes:

C-19. Limes: Acreage, yield per acre, production, utilization, season-average grower price, and value, Florida, 1975/76 to date	38
---	----

Oranges:

C-20. Oranges: Bearing acreage and yield per acre, by State, 1975/76 to date	39
C-21. Oranges: Production, by State, 1975/76 to date	39
C-22. Oranges: Utilization of production, by State, 1975/76 to date	40
C-23. All oranges: Equivalent-on-tree returns, by State, 1975/76 to date	40
C-24. All oranges: Monthly equivalent-on-tree returns received by growers, Arizona, 1975/76 to date	41
C-25. All oranges: Monthly equivalent-on-tree returns received by growers, California, 1975/76 to date	41
C-26. All oranges: Monthly equivalent-on-tree returns received by growers, Florida, 1975/76 to date	42
C-27. All oranges: Monthly equivalent-on-tree returns received by growers, Texas, 1975/76 to date	42
C-28. All oranges: Monthly equivalent-on-tree returns received by growers, United States, 1975/76 to date	43
C-29. Oranges processed: Florida, 1975/76 to date	43
C-30. Canned orange juice: Canners' stocks, pack, supplies, and movement, Florida, 1975/76 to date	44
C-31. Frozen concentrated orange juice: Canners' stocks, pack, supplies, and movement, Florida, 1975/76 to date	44

BERRIES

Blackberries:

D-1. Blackberries: Commercial acreage, yield per acre, production, and season-average grower price, Oregon and Washington, 1975 to date	45
---	----

Blueberries:

D-2. Blueberries: Commercial acreage, yield per acre, production, and season-average grower price, by State, 1975 to date	46
---	----

Boysenberries and loganberries:

D-3. Boysenberries and loganberries: Commercial acreage, yield per acre, production, and season-average grower price, California and Oregon, 1975 to date	49
---	----

Black raspberries:

D-4. Black raspberries: Commercial acreage, yield per acre, production, and season-average grower price, Oregon and Washington, 1975 to date	50
--	----

Red raspberries:

D-5. Red raspberries: Commercial acreage, yield per acre, production, and season-average grower price, Oregon and Washington, 1975 to date	51
--	----

Cranberries:

D-6. Cranberries: Acreage harvested, yield per acre, production, utilization, and season-average grower price and value, United States, 1975 to date	52
--	----

Strawberries:

D-7. Strawberries: Acreage, production, season-average grower price, and value, United States, 1975 to date	52
D-8. Strawberries, fresh market and processing: Production, season-average grower price, and value, United States, 1975 to date	53
D-9. Strawberries, fresh: Monthly prices received by growers, United States, 1975 to date	53

TREE NUTS

General:

E-1.	All tree nuts: Bearing acreage, United States, 1975/76 to date	54
E-2.	All tree nuts: Gross return per bearing acre, United States, 1975/76 to date	54
E-3.	All tree nuts: Utilized production (shelled basis), United States, 1975/76 to date	55
E-4.	All tree nuts: Season-average grower prices received, United States, 1977/78 to date	55
E-5.	All tree nuts: Value of production, United States, 1975/76 to date	56
E-6.	All tree nuts: Supply and utilization, United States, 1975/76 to date	56

Almonds:

E-7.	Almonds: Acreage, yield per acre, production (shelled basis), season-average grower price, and value, California, 1975 to date	57
E-8.	Almonds: Supply and utilization (shelled basis), 1975/76 to date	57

Hazelnuts:

E-9.	Hazelnuts (filberts): Bearing acreage and yield per acre (in-shell), by State, 1975 to date	58
E-10.	Hazelnuts (filberts): Production (in-shell), season-average grower price, and value, by State, 1975 to date	58
E-11.	Hazelnuts (filberts): Supply and utilization (shelled basis), 1975/76 to date	59

Macadamia nuts:

E-12.	Macadamia nuts: Acreage, yield per acre, production (in-shell), season-average grower price, and value, Hawaii, 1975 to date	59
-------	--	----

Pecans:

E-13.	Pecans: Production (in-shell), season-average grower price, and value, United States, 1975 to date	60
E-14.	Pecans: Supply and utilization (shelled basis), 1975/76 to date	60

Pistachios:

E-15.	Pistachios: Production (in-shell), season-average grower price, and value, California, 1975 to date	61
E-16.	Pistachios: Supply and utilization (shelled basis), 1975/76 to date	61

Walnuts:

E-17.	Walnuts (English): Production (in-shell), season-average grower price, and value, California, 1975 to date	62
E-18.	Walnuts: Supply and utilization (shelled basis), 1975/76 to date	62

PER CAPITA CONSUMPTION

F-1.	Fresh apples: Supply and utilization, 1975/76 to date	63
F-2.	Fresh bananas: Supply and utilization, 1975 to date	63
F-3.	Fresh grapes: Supply and utilization, 1975/76 to date	64
F-4.	Fresh kiwifruit: Supply and utilization, 1985 to date	64
F-5.	Fresh mangos: Supply and utilization, 1975 to date	65
F-6.	Fresh papayas: Supply and utilization, 1975 to date	65
F-7.	Fresh peaches and nectarines: Supply and utilization, 1975 to date	66
F-8.	Fresh pears: Supply and utilization, 1975/76 to date	66
F-9.	Fresh strawberries: Supply and utilization, 1975 to date	67
F-10.	Fresh grapefruit: Supply and utilization, 1975/76 to date	67
F-11.	Fresh lemons: Supply and utilization, 1975/76 to date	68
F-12.	Fresh limes: Supply and utilization, 1975/76 to date	68
F-13.	Fresh oranges: Supply and utilization, 1975/76 to date	69
F-14.	Canned apples: Supply and utilization, 1975/76 to date	69
F-15.	Canned apricots: Supply and utilization, 1975/76 to date	70
F-16.	Canned cherries, sweet: Supply and utilization, 1975/76 to date	70

F-17. Canned cherries, tart: Supply and utilization, 1975/76 to date	71
F-18. Canned olives: Supply and utilization, 1975/76 to date	71
F-19. Canned peaches: Supply and utilization, 1975/76 to date	72
F-20. Canned pears: Supply and utilization, 1975/76 to date	72
F-21. Canned pineapples: Supply and utilization, processed-weight basis, 1975 to date	73
F-22. Canned plums: Supply and utilization, 1975/76 to date	73
F-23. Apple juice and cider: Supply and utilization, 1975/76 to date	74
F-24. Grapefruit juice: supply and utilization, 1975/76 to date	74
F-25. Orange juice: Supply and utilization, 1985/86 to date	75
F-26. Pineapple juice: Supply and utilization, 1975 to date	75
F-27. Dried prunes: Supply and utilization, 1975/76 to date	76
F-28. Dried raisins: Supply and utilization, 1975/76 to date	76
F-29. Fresh fruit: Per capita consumption, 1975 to date	77
F-30. Canned fruit: Per capita consumption, product-weight basis, 1975/76 to date	78
F-31. Frozen fruit: Per capita consumption, product-weight basis, 1975 to date	78
F-32. Dried fruit: Per capita consumption, product-weight basis, 1975/76 to date	79
F-33. Selected fruit juices: Per capita consumption, 1975/76 to date	79
F-34. Apples: Per capita utilization adjusted for imports and exports, fresh-weight equivalent, by product, 1975/76 to date	80
F-35. Grapes: Per capita utilization adjusted for imports and exports, fresh-weight equivalent, by product, 1975/76 to date	80
F-36. Total U.S. population	81
F-37. Fresh and processed fruit: Per capita utilization adjusted for imports and exports, fresh-weight equivalent, 1975 to date	81
F-38. Per capita consumption of selected noncitrus fruit, fresh-weight equivalent, 1975/76 to date	82
F-39. Per capita consumption of citrus fruit, fresh-weight equivalent, 1975/76 to date	83
F-40. Selected fruit: Per capita consumption, fresh-weight equivalent, 1975 to date	84
F-41. Tree nuts (shelled basis): Per capita consumption, 1975/76 to date	84

TRADE

Fruit:

G-1. U.S. Fresh-market fruit imports, monthly, 1995	85
G-2. U.S. Fresh-market fruit imports, monthly, 1994	86
G-3. U.S. Fresh-market fruit imports, monthly, 1993	87
G-4. U.S. Fresh-market fruit exports, monthly, 1995	88
G-5. U.S. Fresh-market fruit exports, monthly, 1994	89
G-6. U.S. Fresh-market fruit exports, monthly, 1993	90

Fruit juice:

G-7. U.S. fruit juice trade, monthly, 1995	91
G-8. U.S. fruit juice trade, monthly, 1994	92
G-9. U.S. fruit juice trade, monthly, 1993	93

PRODUCTION AND VALUE BY STATE

Fruit and edible tree nuts:

H-1. Fruit and edible tree nuts: Utilized production, by States, 1995	94
H-2. Fruit and edible tree nuts: Value of production, by States, 1995	96
H-3. Fruit and edible tree nuts: Utilized production, by States, 1994	98
H-4. Fruit and edible tree nuts: Value of production, by States, 1994	100
H-5. Fruit and edible tree nuts: Utilized production, by States, 1993	102
H-6. Fruit and edible tree nuts: Value of production, by States, 1993	104

Table A-1--Bearing acreage for fruit and tree nuts, United States, 1975 to date

Year	Citrus 1/	Major deciduous fruits 2/	Miscellaneous noncitrus 3/	Tree nuts 4/	Total 5/
--1,000 acres--					
1975	1,215.7	1,596.9	230.9	443.0	3,486.5
1976	1,198.0	1,664.8	229.0	456.4	3,548.2
1977	1,180.2	1,674.2	234.1	482.9	3,571.4
1978	1,161.2	1,657.3	264.8	519.4	3,602.7

1991	849.9	1,701.8	247.3	687.4	3,486.4
1992	886.1	1,721.2	299.3	680.0	3,586.6
1993	947.4	1,734.8	294.9	680.4	3,657.6
1994	978.1	1,736.5	295.1	683.4	3,693.0
1995	1,055.1	1,730.2	296.3	676.4	3,758.1

1/ Grapefruit, lemons, limes, oranges, tangelos, tangerines, temples, and K-early beginning 1992/93 season. Acreage is for the year harvest was completed.

2/ Commercial apples, apricots, cherries, grapes, nectarines, peaches, pears, plums, and prunes. 3/ Avocados, bananas, berries (until 1979 and after 1992), cranberries, dates, figs, guavas, kiwi/fruit, olives, papayas, pineapples, pomegranates (until 1989), and strawberries.

4/ Almonds, hazelnuts, Macadamia nuts, walnuts, and pistachios (beginning 1977). 5/ Some figures may not add due to rounding.

1/ National Agricultural Statistics Service (NASS) began reporting "limited" and "undersized" as separate categories in 1990 and made estimates for 1988 and 1989. All data since 1988 are as reported by NASS. 2/ Mostly canned, except for 1980 when use of limited-size fruit in canned ripe olives was not permitted. Reported by California Olive Committee for 1975 to 1987. 3/ "Limited and undersized" reported by NASS minus "unlimited size" reported by California Olive Committee for 1975 to 1987. Includes undersized and culs.

Sources: National Agricultural Statistics Service, USDA, and California Olive Committee.

ERS AutoFAX

Another Service for Users of

ERS Information and Data

Timely information and data from ERS are as handy as your fax machine! A call from your fax to the ERS AutoFAX gives you immediate access to documents covering crops and livestock, rural affairs, farm sector economics and many other topics. Enter your selections using the instructions below and AutoFAX will fax these documents to you, free, in the same call!

How to use AutoFAX—

1. Use the handset and Touch Tone keypad attached to your fax machine.
2. Call 202-219-1107 and listen for the voice prompts.
3. Enter document ID number 0411 and confirm when prompted.
4. Enter # to complete your selections.
5. When prompted, press the "start" button on your fax machine and hang up the handset.
6. In moments, the 0411 "help" document will be on its way to you with information on the contents and use of AutoFAX.

Available now, ERS AutoFAX is online 24 hours a day, 7 days a week for your convenience.

ERS AutoFAX

202-219-1107

AutoFAX works with most common fax machines. For assistance or to report system problems, please call the system manager at 202-219-0232 (8:00 a.m. - 4:30 p.m. ET).

The meeting will come to order
