THE AMERICAN MUSEUM OF NATURAL HISTORY

MEMBERSHIP

Of the utmost value to the Museum is the support that it receives from its Members.

There are more than two thousand residents of New York and vicinity who are thus identified with the educational and scientific work of this institution.

THIRTY-NINTH ANNUAL REPORT.

To the Trustees and Members of The American Museum of Natural History:

It is the sad duty of the President to open this report with the record of the death, on the morning of January 22, 1908, of Morris Ketchum Jesup, one of the original incorporators of the Museum in 1868, for forty years devoted to its promotion and welfare and for twenty-seven years its President.

The minute of the Board of Trustees, adopted at the Annual Meeting, February 10, 1908, is as follows:

As Trustees of The American Museum of Natural History, we record with profound sorrow the loss we have sustained in the death of

MORRIS KETCHUM JESUP

As President for the last twenty-seven years, Mr. Jesup has guided the development of the Museum with rare ability and devotion and has become united to us by many warm ties of personal friendship. He carried into the office all of his finest qualities of character; he was sanguine, constructive, determined, trustful, appreciative and most kindly disposed toward those closely associated with him in the administration of the Museum. We realize now, even more clearly perhaps than when he was actually with us, his keen patriotism and controlling sense of the duties of citizenship, his idealism and his faith in the future development of our city and country.

A review of our minutes shows that Mr. Jesup was one of the original incorporators of the Museum, December 30, 1868; that he was elected a Trustee, February 1, 1869; that he became a Fellow in perpetuity, February 13, 1871; that he was elected First Vice-President, May 10, 1880; that he was elected President, February 14, 1881. He was an active member of all committees from the inception of the Museum, including the committee appointed to select the present site which has proved to be most advantageous. He was always actively engaged in furthering the interests of the Museum at the State

Capital, with the various City authorities and particularly in conferences with the Mayor and with the President of the Park Board. For many years he visited the Museum several days each week, and to within the last few years attended to all the details of administration.

This brief review of his official connection with us gives little idea of the real character and magnitude of his services; to attempt to record the history of his administration would be to write the history of the institution since 1881, when his

name first appears as President.

Of all the many centers of his activities for public good the Museum was most constantly in his mind, closest to his heart and the recipient of his most generous gifts. Succeeding Mr. John David Wolfe and Mr. Robert L. Stuart, he assumed the presidency of the Museum at a time when the first impulse and enthusiasm of its establishment had slackened somewhat and it was evident that some one must assume the chief care and responsibility of leadership, financial, administrative and constructive.

His first annual report announced his determination to establish a collection showing both the natural history and the economic features of the woods and trees of North America. In 1897 he established the Jesup North Pacific Expedition, to maintain explorations in British Columbia, Alaska and Siberia and to publish the results of these explorations, the purpose of which was to determine, if possible, the migrations of the human races between the new and old worlds. He also maintained expeditions extending over a period of several years for the purpose of collecting important data regarding the vanishing tribes of North American Indians. He supported the Lumholtz expedition to northern Mexico (1890). In 1895 he subscribed to the Cope Collection of North American fossil mammals, and in 1902 he presented to the Museum the Cope Collection of fossil amphibians, reptiles and From time to time he contributed large sums for the development of the mineral collections. His lesser gifts are too numerous to mention, but we may single out among the more recent the New Zealand and Rio Negro ethnological and zoölogical collections. One of his most beautiful and characteristic gifts was a series of marble portraits of distinguished American men of science (1906). In 1904 he especially urged upon the Trustees the importance of raising the Permanent Endowment Fund and contributed \$200,000 therefor.

There were two grandly distinctive features of Mr. Jesup's plans and of his administration.

First, his desire to popularize science through the arrangement and exhibition of collections in such a simple and attractive manner as to render them intelligible to all visitors. To the same end of popular education he favored Sunday opening and the opening of the Museum evenings in order that working men and others closely occupied during the day might attend. The establishment of the public lectures under Professor Albert S. Bickmore, bringing the Museum into closer connection with the work of the State Department of Public Instruction, was one of the first features of his administration, and led to the general institution of public courses of lectures. He finally favored and put into practice the free opening of the Museum on every day of the week.

The second great feature of his administration was his recognition that at the foundation of popular science is pure science, and his determination, which increased with advancing years, that the Museum should be as famous for its scientific researches and explorations as for its popular exhibitions and educational work. His faith in the beneficent influence of science and in the work of scientific men was most remarkable in a man trained and educated solely for business. During the year 1907, the last year of his administration, with his sanction the Museum devoted nearly \$80,000 to the development of natural science through exploration, research and publication.

More than a quarter of a century ago, with prophetic vision, he saw that this Museum under proper direction would develop and finally become a center for scientific work, an effective agency for education, an instrument for the improvement of the people and an index of the culture of the community. To these ends he strove; and his simple statement announced at the conclusion of his labors, "I believe it to be to-day one of the most effective agencies which exist in the City of New York for furnishing education, innocent amusement and instruction to the people," was an expression of personal conviction in which we most heartily concur.

While we are mindful that his leadership has resulted in the establishment of this splendid institution, and that his noble bequest provides for the continuation of work already begun, we do not forget the responsibilities that his administration has imposed upon us. It is with regard for him, and with respect and cordial sympathy for the measures leading to public betterment which were clearly and wisely expressed in the terms of his bequest, that we are encouraged to assume the important obligations thus imposed.

The Museum has received testimonials of appreciation and sympathy from scientific institutions and associations both at home and abroad, including especially the following:

Scientific Staff of The American Museum of Natural History.

New York Academy of Sciences.

Audubon Society of the State of New York.

American Ethnological Society.

Linnæan Society of New York.

Peary Arctic Club.

Smithsonian Institution, Washington, D. C.

Field Museum of Natural History, Chicago, Ill.

Carnegie Museum, Department of the Carnegie Institute, Pittsburgh, Penn.

Senckenbergische Naturforschende Gesellschaft, Frankfurt a/Main, Germany.

Universidad de la Habana, Cuba.

These have been appropriately printed and distributed to learned bodies at home and abroad and to patrons and friends of the Museum. The following passages are from an appreciation of Mr. Jesup's services, which appeared in the leading American scientific journal, *Science:*

It may be said without reserve that Mr. Jesup was as full of enthusiasm for, and faith in, the cause of pure research as he was in that of popular education. During 1907, the last year of his administration, and with his sanction, the Museum spent at least \$80,000 for strictly scientific work. It is important to make this statement because the extent of the activities of the Museum in the field of pure science is not so widely known as it should be.

Two years ago the Trustees of the Museum invited Mr. Jesup to celebrate the twenty-fifth anniversary of his presidency of the institution. A loving cup beautifully designed in gold was presented to him, with inscriptions and symbols in allusion to those branches of science in which he had taken special interest. On one face of the cup reference was made to the forestry of North America; on another, his interest in vertebrate paleontology was indicated and his gift of the Cope Collection of fishes, amphibians and reptiles was mentioned; on the third face was a design symbolizing the work of the

Jesup North Pacific expeditions, the last and greatest of the enterprises toward which his efforts were directed. Two years have elapsed since this memorable meeting, at which the three surviving founders of the Museum, J. Pierpont Morgan,

Joseph H. Choate and Mr. Jesup were present.

During the past year, because of failing strength, Mr. Jesup has not been able to take an active part in the management of the Museum, but its welfare has been one of the chief subjects of his thought and its progress one of the chief sources of happiness to him during his last illness.

BEQUEST TO THE MUSEUM.

Mr. Jesup in his will left a noble bequest to the Museum which will enable the Trustees to carry on those lines of work in which he was especially interested during his lifetime. The terms of the bequest are peculiarly interesting because they set forth fully his views as to the relations of the public and private support of the Museum; they are as follows:

I give and bequeath to The American Museum of Natural History in the City of New York One million dollars (\$1,000,000), to constitute a permanent fund, the principal to be invested and kept invested, and the income to be applied and appropriated to the general purposes of the Museum, other than alterations, additions, repairs or erection of buildings, the purchase of land or the payment of salaries, or for labor or for services of any kind, ordinarily considered under the item of maintenance.

I wish to explain that I have bequeathed this sum of One million dollars (\$1,000,000) to The American Museum of Natural History, and that I have made for it the other bequests and provisions contained in my Will because of the fact that I have been identified with the Museum from its Act of Incorporation to the present time. I have been its President since 1882. Since that time I have devoted a great part of my life, my time, my thoughts and my attention to its interests. I believe it to be to-day one of the most effective agencies which exist in The City of New York for furnishing education, innocent amusement and instruction to the people. It can be immensely increased in its usefulness by increasing its powers. The City of New York, under its contract with the Museum, is to provide buildings and to maintain them, but the buildings must be filled with specimens. This means that for the purpose, the necessary amount must come from individual donors. It is in order that the means for this purpose may be helped, as the Museum must grow in additional buildings by the City, and in view of its great possibilities for the future, that I make for the Museum the bequests and provisions contained in my Will, relying upon the Trustees of the Museum to do their share, by looking after the investment of the funds, the use of its income and by carefully watching over, and wisely planning for the best interests of this great institution.

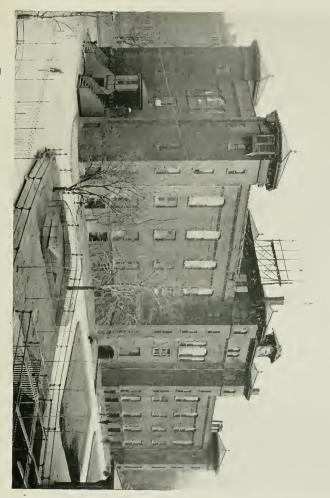

STATUS OF THE MUSEUM.

Under Mr. Jesup's administration, through his own gifts and with the generous cooperation of his fellow trustees, the Museum has gained a strong and sound foundation for its future line of development. A few comparative figures will be instructive. In 1881, the year Mr. Jesup assumed the presidency, the City Maintenance Fund was \$10,000; it is now \$160,000. The Permanent Endowment Fund was not then established; to-day it is \$2,047,750, including Mr. Jesup's bequest. The Special Fund gifts of that year were \$17,750; for 1907 they amounted to \$110,000. The Museum building has thus far cost the city \$4,838,000, a generous sum in itself but small in comparison with that often expended on public buildings. Owing to the wise expenditure of this fund, a total floor space of 438,859 square feet has been secured, and a total exhibition space of 262,236 square feet. This is to be compared with the 164,850 square feet of exhibition space in one of the best known national institutions abroad.

The total contributions to the collections and explorations of the Museum—since its foundation—amount to about \$3,000,000. These gifts added to the endowment amount to approximately \$5,000,000.

These material strides are no more important than the growth of the scientific and public educational spirit which pervades the Museum, the wide geographic extent of its exploration and the reputation it has gradually earned of being one of the foremost centers for the promotion of natural history.

He

THE ARSENAL IN CENTRAL PARK. First Home of the Museum, 1870-1877

We now turn from this retrospect of a great administration to the operations of the past year.

I. ADMINISTRATION, BUILDING, EDUCATION.

ADMINISTRATION.—Perhaps the most important change in the administration of the Museum has been the abolition of pay-days and the opening of the exhibition halls free to the public every day in the year. Since the founding of the Museum—now nearly forty years ago—certain days each week have been reserved for Members, pupils of the public schools, special students and artists. While this reservation was justifiable when the Museum was smaller, we should not forget that the Museum is a municipal institution, it is primarily for the public, and any regulation which interferes with the general enjoyment of its privileges is contrary to the spirit of its founders and opposed to the wishes of its supporters.

This action was taken in the belief that such a step would meet with the emphatic approval of our Members, for we were convinced that those who have contributed and are contributing towards the support of this institution are not actuated by selfish motives; they contribute because they believe in the work that the Museum is doing and because they derive pleasure from being associated with it. Only words of approval have been received.

It is gratifying to report on the extension of the cordial relations existing between the American Museum and sister institutions at home and abroad. In the spring the Museum participated in a celebration commemorating the 200th anniversary of the birth of Linnæus. In August it entertained the members of the Seventh International Congress of Zoölogy, among whom were representatives of many leading institutions of the old and new worlds.

During the year the Director made two trips abroad for the purpose of arranging with other institutions for exchanges and purchases. His visits have materially strengthened the cordial relations existing between the Museum and scientific societies in Europe. Building.—In spite of many delays excellent progress has been made by the contractors in the construction of the new wing on Columbus Avenue (South Section of the West Façade). About ninety-five per cent. has been completed and, if the financial conditions permit, the building will be finished early in 1908.

The ruling of the City authorities, whereby the cost of new construction and the building of new cases can be charged to the building fund, has resulted in the making of many needed improvements. Under this arrangement fourteen fire-proof storage rooms have been constructed in the attic of the North Wing, occupying space which heretofore has been practically useless; a hand elevator has been installed, making the storage rooms accessible, and the backs for ten of the habitat groups have been made.

At relatively little cost a trench has been dug connecting the Power House with the new wing and providing for the pipes and wires necessary to heat and light this part of the building.

The usual amount of repair work has been attended to, including the pointing up of the South Façade, the reconstruction of several sewer lines, the making of new connections with the water-mains, the installation of additional fire pumps, the construction of storage cases, cabinets, etc., and the repainting of 179,890 square feet of wall space.

ATTENDANCE.—There has been an increase in the attendance of visitors of more than twelve per cent. The number of visitors is well beyond the half-million mark, the total being 537,894. The children's lectures were attended by 26,312 pupils, while 2,233 were present at the special lectures given by Mrs. Roesler. The attendance at the public lecture courses was 35,068. The Members will be pleased to learn the extent to which the Museum is used by teachers and classes, not alone of the public and private schools of the City, but by many from neighboring towns and cities.

PUBLIC EDUCATION.

DEPARTMENT OF PUBLIC INSTRUCTION.—There has been an ever increasing demand for the nature-study collections which the Museum loans to the public schools. To satisfy all these requests, it has been necessary to procure new material and to prepare additional collections. There are now 450 cabinets available for this purpose. The collections have been supplied to 325 schools, and the data furnished by the teachers show that 725,000 children have profited thereby.

The methods of distribution have been greatly facilitated through the purchase of an electric delivery wagon.

This method of supplying nature-study material to the schools has attracted considerable attention in other States, and several foreign educators have critically examined our collections and methods of distribution with a view to establishing a similar system in their own cities.

The growth of the Museum during the last few years has made it possible to accommodate large bodies of school children without interfering materially with the use of the exhibition halls by adults. Special students are now given laboratory facilities well removed from visitors, and artists continue to have every encouragement for their work in private rooms or in portions of the gallery temporarily partitioned off for their use.

Early in the year Mrs. Agnes Roesler was appointed as an instructor to meet Members and their friends, also classes of school children, and to accompany them through the halls, explaining the meaning of the various exhibits. The success of this personal instruction has been marked from the first. Three thousand persons have presented Members' cards, and Mrs. Roesler also has met regularly classes from the Normal College and given them illustrated lectures and laboratory instruction. The results obtained have proved so satisfactory that additional instructors will soon be needed.

Another important step in making the Museum of more practical educational value in the community has been the placing of exhibits in some of the branches of the New York Public Library. Several collections have been arranged for this work, among which may be mentioned an Eskimo and a "Hiawatha" exhibit. Under advice from Miss Moore, the Supervisor of Children's Libraries, these collections have been placed temporarily in certain branch libraries. The results indicate that this work should be extended.

As usual the photographic work has been in charge of this department. Much routine work has been accomplished, which includes the making of many negatives and prints for publication and study, the supplying of photographs to newspapers and magazines and the cataloguing and filing of negatives, photographs and lantern slides.

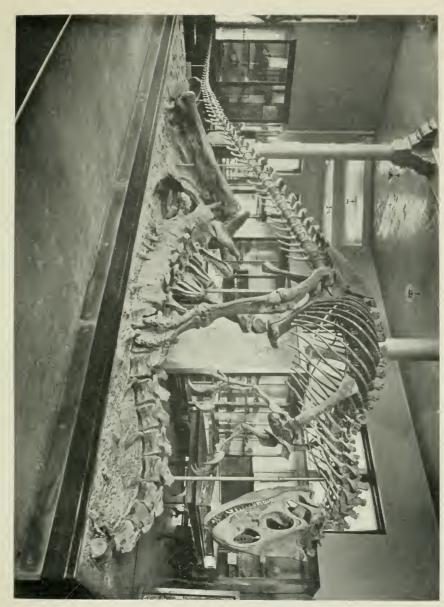

The educational work of the Museum has been further extended by means of the lecture courses, consisting of more than 100 lectures. These include (1) a spring and a fall course to Members, (2) a special lecture to Members by Commander R. E. Peary, (3) a spring and a fall course for pupils of the public schools, (4) free lectures on public holidays and (5) three courses given in conjunction with the Board of Education of the City of New York.

The following lectures to Members, relating to the field work which the Museum has done, were delivered by members of the scientific staff:

LECTURES TO MEMBERS.

SPECIAL LECTURE TO MEMBERS.

So many of the Members expressed a desire to hear Commander Peary that arrangements were made for him to

THE ALLOSAURUS GROUP. An Allosaurus, a great Carnivorous Dinosaur, is feasting upon the carcass of a Brontosaurus, an immense Herbivorous Dinosaur

speak on May 14. His subject was "The Work of the Peary Arctic Club in 1905-1906 and the Plans for 1907-1908.

- ' o.-Modern Mound Builders (Ants).
- " 16.-My Foster Children (Animals as Pets).

A Course of Four Lectures on "Commercial Geography," by Dr. J. Russell Smith.

November 23.—The Story of a Steel Rail.

" 30.—The Story of a Ton of Coal.

December 7.—The Story of a Basket of Fruit.

" 14.—The Story of a Piece of Board.

HOSPITALITY TO SCIENTIFIC SOCIETIES.

The lecture halls and conference rooms have been in constant demand by scientific societies and other organizations for various meetings. Whenever possible, and when consistent with the purposes of the Museum, these requests

have been granted. As usual the New York Academy of Sciences and Affiliated Societies have held their sessions at the Museum.

In the winter, under the auspices of the American Institute of Social Service, an exposition of devices for preventing accidents and for saving human life was held in the Siberian Hall; and later the International Kindergarten Union held an exhibition in the same hall, at which the results of kindergarten work were shown and kindergarten methods demonstrated.

The New York Library Club enjoyed the use of our Auditorium for its annual meeting. The same is true of the Society for the Protection of the Adirondacks.

The following is a list of the societies and organizations that were the guests of the Museum during the year 1907:

American Bison Society.

American Ethnological Society.

American Institute of Social Service.

American Psychological Association, New York Branch.

Anglers' Conference.

Association for the Protection of the Adirondacks.

Audubon Society of the State of New York.

Classes from Normal College.

Classes from the Young Women's Christian Association.

International Kindergarten Union.

Linnæan Society of New York.

National Association of Audubon Societies for the Protection of Wild Birds and Animals.

Natural Science Committee of the Associate Alumnæ of the Normal College, New York City.

New York Academy of Sciences.

New York Entomological Society.

New York Library Club.

New York Microscopical Society.

New York Mineralogical Club.

New York Naturalists' Club.

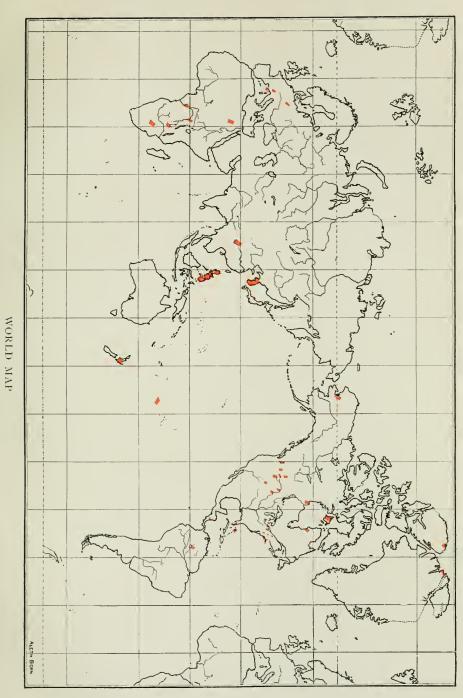

Physics Club of New York City.

Seventh International Congress of Zoölogy.

Torrey Botanical Club.

West Side Natural History Society.

In May the Museum participated with the New York Academy of Sciences, the New York Botanical Garden, the

New York Zoölogical Society and the Brooklyn Institute of Arts and Sciences in celebrating the 200th anniversary of the birth of Linnæus, the great Swedish naturalist. Exercises were held at the Museum on the morning of May 23, at which commemorative addresses were made and communications read from scientific societies both at home and abroad. A special exhibit showing the animals known to Linnæus was also prepared. Sessions were held in the afternoon at the Botanical Garden in the Bronx, and a bronze tablet was unveiled at the Linnæus bridge. The Zoölogical Park was then inspected, and evening receptions were held at the New York Aquarium and at the Brooklyn Institute.

During the visit of the members of the Seventh International Congress of Zoölogy to New York, they were entertained at the Museum. The exhibition halls and laboratories were thrown open to their inspection and luncheon was served in the Loubat Hall of Mexican Archæology. In the evening an informal reception was tendered to the visiting scientists and several of the curators spoke of the recent field explorations of the Museum, illustrating their remarks with lantern slides.

II. COLLECTIONS, EXPLORATIONS AND EXHIBITIONS.

A geographic summary of the territory reached by all the Museum expeditions or from which large collections have been received is shown in the World Map on the opposite page.

During the past year the policy of exploration has been extended. In connection with its several scientific departments, the Museum has sent representatives or expeditions to the following States and foreign countries:

In United States.

ALASKA, LONG ISLAND. NEW JERSEY, FLORIDA. NEW YORK, NEBRASKA. SOUTH DAKOTA. WYOMING.

In Foreign Countries.

CANADA. EGYPT. KOREA.

Bahama Islands, Germany, Philippine Islands, China, Italy, Switzerland.

These explorations are sustained very largely through the gifts of special funds. Altogether, during the past three years, \$134,915.37 has been subscribed for these special purposes and for the mounting of specimens brought to the Museum.

MINERALS.

Department of Mineralogy and Conchology.—Mr. J. Pierpont Morgan has again evidenced his interest in the development of the Gem Collection by his gift of a particularly fine example of crystallized gold, also of a jade boulder said to be the largest piece known.

Several important additions have been made to the general mineral collections through the aid of the Bruce Fund, as noted in the accession list.

Progress has been made in cataloguing the Bement Collection and this work is about half finished.

LIVING MAMMALS AND BIRDS.

DEPARTMENT OF MAMMALOGY AND ORNITHOLOGY. — Practically all the mammal collections have been catalogued, and similar work on the bird collections is well advanced.

The accessions for the year were 824 mammals and 2,445 birds and included a number of very important additions.

Through the generosity of Mr. George S. Bowdoin, the Museum secured the two fine examples of the North Atlantic Right Whale, which were captured on the south shore of Long Island. A complete set of whalebone was taken with one of the whales, and it is the intention to mount this specimen with the whalebone in place. The Cetacea Collection has been further enriched by a number of scale models of various species of whales, executed by Mr. James L. Clark.

Mr. Roy C. Andrews has been transferred to this department and is making excellent progress with the work. He superintended the construction of the life-size model of the Sulphurbottom Whale and also had charge of the preparation of the Amagansett whales.

The collection made by Messrs. Richard Tjäder and Herbert Lang in British East Africa, and presented in part by Mr. Samuel Thorne, comprises 178 mammals and 232 birds and includes large series of many species of antelopes and monkeys and fine specimens of such large mammals as the giraffe, rhinoceros, wart-hog, lion, etc.

Another noteworthy addition was three specimens of the very rare *Solenodon paradoxus*, secured through the personal contribution of Mr. Morris K. Jesup.

The mammals recently collected by Commander Peary in the Arctic have been presented to the Museum by the Peary Arctic Club. This collection contains a large series of musk-oxen and of the Peary White Caribou, the latter now for the first time represented by complete specimens.

As usual a number of valuable animals has been received from the New York Zoölogical Society and from the Central Park Menagerie, and we gratefully acknowledge the many courtesies thus extended.

Besides supervising the routine work of the department, the Curator has edited the *Bulletin*, which forms a volume of more than one thousand pages. He has also carried on his scientific studies and has published three papers.

Progress has been made in the preparation of habitat groups of North American birds, which have been provided by the contributors to the North American Ornithology Fund.

The following were contributors to this fund during the year.

John L. Cadwalader. H. B. Hollins. Mrs. Morris K. Jesup. Henry Clay Pierce. F. Aug. Schermerhorn. Mrs. Harriet L. Schuyler. Mrs. John B. Trevor. Mrs. Robert Winthrop.

Three new habitat groups, namely, the Wild Turkey, Condor, and Egret or White Heron, have been finished and the work on several others is well advanced. To continue his field studies and to procure material for additional groups, Mr. Chapman made two expeditions during the year. In the spring he visited Florida in search of the ivory-billed woodpecker; the Bahamas, where he collected and studied the

man-of-war bird and the booby, and South Carolina, where he secured data and material for the White Heron Group, one of the most attractive yet constructed. The cruise among the Bahama Islands was made in the "Physalia," the boat of the Carnegie Laboratory at Dry Tortugas, in command of Dr. Alfred G. Mayer, who personally accompanied Mr. Chapman and facilitated his work in every way possible. In South Carolina the breeding haunts of the egrets were found on the private preserves of the Santee Club. Mr. Chapman was greatly assisted by the officers of the Club, especially by Mr. Ludwig A. Beckman, the Chief Warden, who placed conveyances, boats, etc., at his disposal and contributed much to the success of the expedition.

In this connection we wish to acknowledge the many courtesies extended to the Museum party both by the Carnegie Institution and the Santee Club.

During the summer months Mr. Chapman, accompanied by Louis Agassiz Fuertes as artist, went to Saskatchewan to study the nesting habits of the wild goose, and later the Canadian Rockies were visited, where specimens were collected and studies made for the Ptarmigan Group.

LIVING REPTILES AND FISHES.

The Assistant Curator, Mr. Roy W. Miner, has devoted much attention to the development of the fish collections. The corridor forming the approach to the laboratories in the North Wing has been assigned to the department, and here the fishes have been installed. The exhibition collection comprises mounted specimens, casts and colored plates of the various families of fishes, which are accompanied by full descriptive labels and form a good nucleus for an adequate representation of this group of interesting and useful animals.

EXTINCT MAMMALS, BIRDS, REPTILES AND FISHES.

DEPARTMENT OF VERTEBRATE PALÆONTOLOGY.—In preparation for the visit of the International Congress of Zoölogists, in the month of August, many of the collections of

TRACHODON. The Gigantic Duck-billed Dinosaur of Cretaceous Time

mammals and reptiles were rearranged and several new specimens were placed on exhibition, also a new system of labeling was introduced, thereby making the collections more intelligible both from an educational and scientific point of view. The entire collections of extinct vertebrates in this department contain about 20,000 specimens. Among the most important additions to the exhibition series were the skeletons of the Carnivorous Dinosaur Allosaurus, and of the Duckbilled Dinosaur Trachodon, both specimens of which are from the Cope Collection presented by Mr. Morris K. Jesup. In mounting these skeletons an attempt has been made to represent characteristic features of the life-history and environment of these extinct monsters, so far as they are positively known. Thus the Allosaurus is mounted in the attitude of devouring the carcass of Brontosaurus. One Trachodon skeleton has been mounted representing the characteristic attitude of the animal when feeding; a second, nearly ready for exhibition, represents the animal looking out for danger. These two skeletons will be combined on a base made to illustrate the plants, shells, etc., among which these beasts lived.

The Warren Mastodon, presented by Mr. J. Pierpont Morgan, has been remounted and attracts much attention. Among other specimens which have been prepared and added to the collections may be mentioned the skull and jaws of Tyrannosaurus, a portion of a skeleton of Naosaurus, or the Ship-Lizard, part of a skeleton of Camarasaurus, the Shawangunk Mastodon skull and the skeleton of the Arab horse "Nimr."

Through the generosity of Mr. Morris K. Jesup, an expedition was sent into the Fayûm desert of northern Egypt under the leadership of Curator Osborn, who was accompanied by Messrs. Granger and Olsen of the department staff, to search for the fossil remains of the ancestors of the elephant. This resulted in the discovery of a number of animals previously unknown to science. In all more than 500 specimens were secured, of which the skulls, jaws, palates, etc., of Mæritherium and Palæomastodon, illustrating the early stages of the ancestry of the elephant, are most important. The collection

also contains incomplete skulls and parts of skeletons of the rare *Arsinoitherium*. Professor Osborn's work was greatly facilitated by the Egyptian Government, through Lord Cromer and Captain H. G. Lyons, Director of the Survey of Egypt, and the courtesies extended are gratefully acknowledged.

During the summer Mr. L. S. Quackenbush was sent to Alaska to search for mammoth remains. He collected considerable material and secured data of importance in carrying out future work in this region. This expedition was made possible through the generosity of Mr. Percy R. Pyne and Mr. J. Pierpont Morgan, Jr.

The third expedition was to the fossil beds of South Dakota and Wyoming, in charge of Mr. Albert Thomson, and was aided through subscriptions of Mr. Frank K. Sturgis and Mr. Arthur Curtiss James. An interesting collection was obtained.

Noteworthy acquisitions, through gift and purchase, are a remarkably fine skeleton of an *Ichthyosaurus*, with the fins and tail well preserved and showing the outlines of the body, and a skeleton of *Hesperornis*, one of the toothed birds of the Cretaceous Period. A fossil horse from the Lower Miocene has been presented by Mr. Frank K. Sturgis.

In addition to the unusual amount of work put into the exhibition hall, the Curator and his staff have devoted considerable time to research.

EXTINCT FISHES.

Under the administration of Professor Bashford Dean, assisted by Dr. Louis Hussakof, this collection is rapidly growing in scientific importance and is attracting increasing public interest.

Through the aid of a fund subscribed annually by Mr. Cleveland H. Dodge, it has been possible to make a number of additions to the collections and to carry on field work.

The exhibition collection of fossil fishes has been rearranged and new material added, including colored casts representing

typical forms and examples of extant species. The most notable specimen mounted was the *Titanichthys*, the veritable monster of the Devonian Age. Important work has been accomplished in classifying, labeling, arranging and cataloguing the study collections, in which there are no less than 200 types and 300 figured specimens. An illustrated catalogue of the collection of type specimens has been prepared.

LIVING INVERTEBRATES—SYNOPTIC COLLECTION.

DEPARTMENT OF INVERTEBRATE ZOÖLOGY.—So many collections are placed in the custody of this department that the mere routine work of cataloguing and preserving the new material has taken considerable of the time of the Curator and his assistants; nevertheless, several important installations have been made.

The collections in the Synoptic Hall are being developed. The most important addition is a series of models showing the larval, pupal and adult stages (both male and female) of the Malarial Mosquito. The models, which have been prepared by Dr. B. E. Dahlgren, represent the insect enlarged 75 diameters or more than 400,000 times its normal bulk. These are further supplemented by a series of twenty models showing the malarial organism and its development in the human blood and in the tissues of the mosquito.

Dr. Dahlgren also has completed, or has in preparation, a number of models which will greatly improve the synoptic collection

Dr. Wheeler spent the summer abroad, where he continued his studies of the Formicidæ, did collecting and effected many exchanges. He visited the Azores, Gibraltar, Italy and various parts of Switzerland and Germany. From all these localities he obtained important collections of ants. While in Switzerland he was the guest of Professor Auguste Forel, the most eminent of living myrmecologists, who presented to the Museum a large and valuable collection of ants, consisting of 3,519 specimens and representing 1,385 species, of which 788 are types.

A large number of fossil ants has been collected by Professor T. D. A. Cockerell at Boulder, Colorado.

The Curator has published six papers during the year and other experts have published eight papers based on material in our collections, making a total of fourteen contributions which have been issued by the department during the year.

LIVING MOLLUSCAN SHELLS.

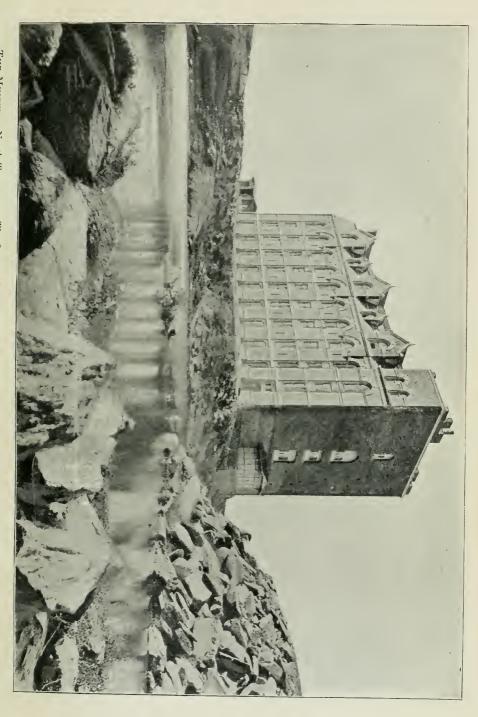

DEPARTMENT OF MINERALOGY AND CONCHOLOGY.—Attention has been given to cataloguing the shell collections. Doubleday, Page & Company, through their representatives, have made extensive use of these collections for study and illustration, the data secured to be used in their forthcoming book on shells.

INSECTS.

DEPARTMENT OF ENTOMOLOGY.—The mere mounting and labeling of the new material received in this department has consumed considerable time. In all 9,225 specimens have been treated in this way. In addition 3,500 specimens have been numbered and catalogued. The material collected by the Curator in the Black Mountains of North Carolina, during 1906, has been assorted and a large portion of it identified. Certain of the exhibition collections have been rearranged, and all have been thoroughly cleaned. An observation hive, containing a swarm of Carnolinian bees, has attracted much attention in the exhibition hall.

The most noteworthy acquisition was an extremely valuable collection of Central American beetles, comprising more than 4,000 specimens and representing 1,679 species, presented to the Museum by Dr. F. D. Godman, the well-known scientist and editor of *Biologia Centrali-Americana*. The collection is of unusual importance, as it is part of the material upon which these publications are based.

Twelve papers, relating to the insects in our collection, have been published by the Curator or other entomologists.

THE MUSEUM. North Transept. The first portion of the Museum and a part of Manhattan Square as they appeared in 1877-1889

EXTINCT INVERTEBRATES.

DEPARTMENT OF GEOLOGY AND INVERTEBRATE PALÆON-TOLOGY.—The Curator and his assistant have continued the cataloguing and labeling of the extensive collection of invertebrate fossils. Also certain of the exhibition collections have been thoroughly cleaned and improved.

Among the acquisitions should be mentioned a collection of fossils from Grant Land, presented by Messrs. C. A. Wardwell and Charles Percy, both members of the recent Peary Expedition. Mr. Walter Granger and Mr. Barnum Brown also have made valuable contributions to the department.

The Curator has prepared three articles which are appearing in the *Bulletin*.

The principal portion of the time of Dr. Hovey, the Associate Curator, has been devoted to the preparation and editing of the American Museum Journal and of the Museum series of Guide Leaflets. This journal has been issued monthly from October to May, instead of quarterly, as formerly, and the Guide Leaflets are now issued independent of it. Dr. Hovey has also assisted in the Members' lectures, the holiday lectures and the children's courses. He has prepared and published one article in the Bulletin and a Guide Leaflet to the meteorite collection in the foyer.

LIVING AND EXTINCT RACES OF MEN.

Department of Ethnology.—The collections in this department have been greatly enriched through the addition of new material of great scientific value and of much general interest. Early in the year the Director opened negotiations with the authorities of the Congo Free State, and arrangements were made whereby the Belgian Government is to present to the Museum extensive ethnological collections illustrating the customs, culture and development of the natives of the Congo. Three shipments, containing more than 2,000 specimens, have already been received.

A unique collection of tattooed heads of the Maori, the natives of New Zealand — a collection of great scientific

interest and importance — was presented by Mr. Morris K. Jesup.

By gift also of Mr. Jesup the department received a remarkably fine collection of feather-work from Rio Negro in South America.

It is through the generosity of Messrs. Percy R. Pyne, Cleveland H. Dodge and Arthur Curtiss James that the Museum has secured a large ethnological collection made by Mr. Richard Douglas in Barotseland, South Africa. This collection consists of about 5,000 specimens illustrating the basketry, weaving, pottery, musical instruments, weapons, etc., of the natives. This gift is especially acceptable, as our collections heretofore have been deficient in African material.

Under the direction of Mr. Harlan I. Smith, a number of changes were made in the archæological collections and several loan exhibits were prepared for use in the children's rooms of the public libraries.

In June Miss M. L. Kissel was appointed to take up the investigation and care of the basketry collection now in the Museum. She has examined and determined the technique of a large part of the collection and, in connection with this work, has visited museums in Chicago, Washington and Philadelphia. The results of her investigations will be published later.

During the absence of the Curator much of the administrative work has devolved upon Mr. Charles W. Mead. In this capacity he has rendered efficient service and has prepared several articles for the *Museum Journal*.

Several lines of field work were started during the summer. From June to August Mr. Smith explored the southern part of Wyoming, which, from an archæological point of view, is an entirely new field. Mr. Smith secured specimens and important data which will form the basis of a paper on the archæology of Wyoming. Dr. R. H. Lowie spent the months of July to October among the Northern Plains Indians. He visited the Blackfoot Reservation at Gleichen, Alberta, the "Stoney" Assiniboine at Morley, the Cree Reservation at Hobbema and the Crow Reservation in Montana. Dr. Lowie procured many specimens and much data on the social and

ceremonial organization, religious observances and general culture of these Indians. This information and the collections will furnish material for three scientific papers upon the Indians of the Northern Plains. Many of the gaps in the local archæological collections have been filled through the work of Mr. Alanson Skinner, who has explored a number of village sites on Staten Island, in New Jersey and in the western part of New York State.

Besides the members of the staff who have been engaged in field work, several investigators in various parts of the world have been contributing to the department. Dr. C. C. Vinton has continued to collect information and specimens in Korea for the Museum. Dr. J. R. Walker is progressing with his work among the Dakota. Captain George Comer is now in the Arctic with a commission to collect specimens and notes, as in former years, and Professor Howard Richards is making collections in China.

In the spring Professor Marshall H. Saville retired as Curator of Mexican Archæology and the custody of the Mexican collection was transferred to this department. Professor Saville accepted an appointment as Honorary Curator of Archæology and has rendered valuable assistance to the Curator in many ways.

From May to October Mr. George H. Pepper was given leave of absence to take up some work in South America under the direction of Mr. George G. Heye. Since his return he has continued his study of the Pueblo Bonito and has made considerable progress with his manuscript.

One memoir, three *Bulletin* articles and three numbers of the first volume of the Anthropological Papers, making a total, exclusive of plates, of about 750 pages, have been published under the direction of this department.

Under the special fund established by Mr. Jesup, the publication of the investigations of the Jesup North Pacific Expedition has been continued, the following parts having been completed during the year:

Vol. II, Part VI. "Archæology of the Gulf of Georgia and Puget Sound." By Harlan I. Smith.

Vol. VII, Part II. "The Chukchee: Religion." By W. Bogoras.

DEPARTMENT OF PHYSIOLOGY.

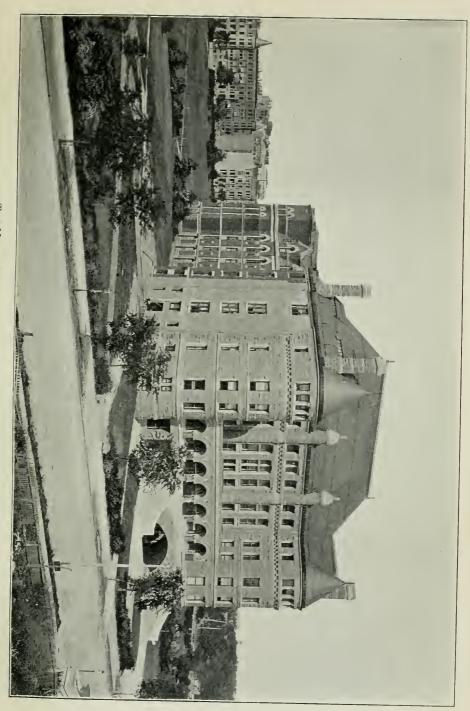

The handling of the animals received in the flesh and the preparation of skeletons have formed the chief work of this department during the year. By the digestion method, 78 skeletons, 64 skulls and 21 sternums have been cleaned and added to the study collections. Among these are included the skeletons of the two North Atlantic Right Whales caught at Amagansett, Long Island. Two hundred and forty-six specimens have been received in the flesh.

JESUP COLLECTION OF NORTH AMERICAN WOODS.

Early in the year Mr. A. C. Burrill was appointed an assistant and has given his attention to the Jesup Collection of North American Woods. The storage specimens have been overhauled, classified and made available for reference or use. The catalogue of the entire collection has been revised and all data regarding it has been assembled. In all there are 3,092 specimens, of which 505 are on exhibition. The exhibition collection has been improved by regrouping the specimens and by adding many artificial sprays of fruits and flowers. A number of colored transparencies has greatly increased the general attractiveness of the hall.

LIBRARY.

Department of Books and Publications.—As the Museum extends the scope of its scientific work and its explorations, the importance of a well-equipped library will be readily understood. It has been the aim of Professor Tower, the Curator, to build up an exhaustive library of natural history, rather than a large general library. The success of his efforts is attested by the increasing number of students and investigators who visit the Museum to consult our books and publications. While there still remain many gaps in the series of periodicals and volumes needed, excellent progress has been made in procuring such works. Several valuable and important acquisitions have been secured through

THE MUSEUM. Central Section of the South Façade, 1889-1893

correspondence and exchange. Among these may be mentioned a complete file of the publications of the Vienna Academy of Sciences, of the Deutsche Entomologische Gesellschaft and of the Berlin Entomologische Verein.

Arrangements have been made whereby the New York Microscopical Society makes its headquarters at the Museum, and the Society has permanently deposited its library with the Museum. This library contains many important publications which were wanting in our files.

All gifts and exchanges have been duly acknowledged. The department has received during the year 1,931 volumes and 723 pamphlets, making the working library at the close of 1907 number 36,597 books and 18,455 pamphlets.

The reference catalogue has been increased by the intercalation of 15,250 cards received from the *Concilium Biblio*graphicum, and a like number has been distributed to the series on deposit.

PUBLICATIONS.

During the past year the sum of \$13,627.63 was devoted to publication. The edition of the *Memoirs*, and also of the *Bulletin*, was 600. Of these publications, one hundred copies each were sent to the great scientific centers of the world, and one hundred were mailed to specialists at the request of authors. The remainder has been reserved for exchanges and sales and to complete sets of the Museum publications.

Following is a list of the scientific publications of the Museum issued in 1907, as received by the Curator for distribution:

DEPARTMENT OF GEOLOGY AND INVERTEBRATE PALÆONTOLOGY. Bulletin, Volume XXIII.

Edmund Otis Hovey. "A Geological Reconnaissance in the Western Sierra Madre of the State of Chihuahua, Mexico." (Pages 401-442, plates xviii-xxxv, with 13 text figures and 1 map.)

R. P. Whitfield. "Notice of an American Species of the Genus *Hoploparia* McCoy, from the Cretaceous of Montana." (Pages 459-462, plate xxxvi.)

R. P. Whitfield. "Remarks on and Descriptions of New Fossil Unionidæ from the Laramie Clays of Montana." (Pages 623-628, plates xxxviii-xlii.)

DEPARTMENT OF MAMMALOGY AND ORNITHOLOGY. Bulletin, Volume XXIII.

J. A. Allen. "The Types of the North American Genera of Birds." (Pages 279-384.)

J. A. Allen. "The Bæolophus bicolor-atricristatus Group. (Pages 467-481.)

DEPARTMENT OF VERTEBRATE PALÆONTOLOGY. Bulletin, Volume XXIII.

Barnum Brown. "The Hell Creek Beds of the Upper Cretaceous of Montana." (Pages 823-845, with 8 text figures.)

E. C. Case. "Description of the Skull of Bolosaurus striatus Cope." (Pages 653-658, plate xlviii, with 5 text figures.)

E. C. Case. "The Character of the Wichita and Clear Fork Divisions of the Permian Red Beds of Texas." (Pages 659-664, with 2 text figures.)

E. C. Case. "Additional Description of the Genus Zatrachys Cope." (Pages 665-668, with 6 text figures.)

Earl Douglass. "New Merycoidodonts from the Miocene of Montana." (Pages 809-822, with 9 text figures.)

James Williams Gidley. "Revision of the Miocene and Pliocene Equidæ of North America." (Pages 865-934.)

Oliver P. Hay. "Descriptions of Seven New Species of Turtles from the Tertiary of the United States." (Pages \$47-863, plate liv, with 20 text figures.)

L. Hussakof. "Zebrasoma deani, a Fossil Surgeon-fish from the West Indies." (Pages 125 and 126, plate vii.)

W. D. Matthew. "A Lower Miocene Fauna from South Dakota." (Pages 169-219, with 26 text figures.)

H. F. Osborn. "Tertiary Mammal Horizons of North America." (Pages 237-253, with 3 text figures.)

H. F. Osborn. "A Mounted Skeleton of the Columbian Mammoth (Elephas columbi)." (Pages 255-257, with I text figure.)

H. F. Osborn. "Points of the Skeleton of the Arab Horse." (Pages 250-263, with 3 text figures.)

H. F. Osborn. "A Mounted Skeleton of Naosaurus, a Pelycosaur from the Permian of Texas." (Pages 265-270, plates ix and x, with 3 text figures.)

DEPARTMENT OF INVERTEBRATE ZOÖLOGY. Bulletin, Volume XXIII.

T. D. A. Cockerell. "An Enumeration of the Localities in the Florissant Basin, from which Fossils were obtained in 1906." (Pages 127-132, with 2 text figures.)

T. D. A. Cockerell. "Fossil Dragonflies from Florissant, Colorado." (Pages 133-139, with 3 text figures.)

T. D. A. Cockerell. "On a Collection of Australian and Asiatic Bees." (Pages 221-236.)

T. D. A. Cockerell. "Some Fossil Arthropods from Florissant, Colorado." (Pages 605-616, with 6 text figures.)

T. D. A. Cockerell. "Some Coleoptera and Arachnida from Florissant,

Colorado." (Pages 617-621.)

Newton Miller. "The Fishes of the Motagua River, Guatemala." (Pages 95-123, with 6 text figures.)

James G. Needham. "Supplemental Descriptions of Two New Genera of Æschninæ." (Pages 141-144, with 3 text figures.)

Alexander G. Ruthven. "A Collection of Reptiles and Amphibians from Southern New Mexico and Arizona." (Pages 483-603, with 22 text figures.

William Morton Wheeler. "The Polymorphism of Ants, with an Account of Some Singular Abnormalities Due to Parasitism." (Pages 1-93, plates i-vi.)

William Morton Wheeler. "A Collection of Ants from British Hon-

duras." (Pages 271-277, plates xi and xii.)

William Morton Wheeler. "The Fungus-growing Ants of North America." (Pages 669-807, plates xlix-liii, with 31 text figures.)

DEPARTMENT OF ENTOMOLOGY.

Bulletin, Volume XXIII.

William Beutenmüller. "Notes on and Descriptions of New Forms of Catocala." (Pages 145-151.)

William Beutenmüller, "New Species of Gall-producing Cecidomyiidæ." (Pages 385-400, plates xiii-xvii.)

William Beutenmüller. "Notes on a few North American Cynipidæ, with Descriptions of New Species." (Pages 463-466, plate xxxvii.)

William Beutenmüller. "The North American Species of *Rhodites* and their Galls." (Pages 629-651, plates xliii-xlvii, with 4 text figures.)

William Beutenmüller. "New Forms of Catocala." (Pages 935-940.)

W. D. Kearfott. "Microlepidoptera from the Black Mountain Region of North Carolina, with Descriptions of New Species." (Pages 153–167, plate viii.)

James A. G. Rehn. "Records and Descriptions of Australian Orthoptera." (Pages 443-457, with 11 text figures.)

The American Museum Journal, Volume VII, published in eight numbers, with the following Guide Leaflets:

Edmund O. Hovey. "The Meteorites in the Foyer of The American Museum of Natural History." (Leaflet No. 26, December, pages 1-40, with 16 text figures.)

Charles W. Mead. "Peruvian Mummies." (Leaflet No. 24, pages 1-24, with 10 text figures.)

"Pioneers of American Science. An Account of the Exercises Held, and the Addresses Delivered, at The American Museum of Natural History, December 29, 1906." (Leaflet No. 25, pages 1-26, with 11 text figures.)

The summary of the acquisitions of maps and charts for the year is as follows:

By	Donation	.Atlases	0	Maps	38
	Exchange		4	6.6	142
6.6	Dumahaaa	6.6	<u>.</u>	6.6	

III. MEMBERSHIP.

The interest and support accorded to the work of the Museum by its Members have been most gratifying. Receipts from membership are used to enrich the collections and to extend the educational work of the institution, and it is hoped that this source of income may be greatly increased.

The names of 209 new members have been enrolled, but as the loss through death and resignation totals 123, the net gain is 86. On January 1, 1908, there were 2,124 Members, divided into classes as follows: Patrons, 100; Fellows, 39; Life Members, 353; Annual Members, 1,632.

NEW MEMBERS.

The following persons were elected Patrons:

Prof. Auguste Forel, James R. Keene, Com. C. A. M. Liebrechts,

GEORGE B. McClellan, HERMAN A. METZ, SAMUEL THORNE.

Mrs. Robert Winthrop was elected a Fellow.

The following persons were elected Life Members:

MISS FLORENCE AUDUBON,
MISS MARIA R. AUDUBON,
JOHN BIGELOW,
T. W. BLAKE,
CORNELIUS N. BLISS, JR.,
EDWARD C. BOHDE,
B. H. BUXTON,
JAMES A. CHURCH,
HENRI DECKERT DE LA
MEILLAIE,
MRG. HENRY DRABER

MRS. HENRY DRAPER, E. H. GARY, WILLIAM D. GUTHRIE, DR. ALEX. C. HUMPHREYS,
MARY SUTTON MACY, M.D.
E. P. MATHEWSON,
J. F. FREIRE MURTA,
JOHN TREADWELL NICHOLS,
HENRY J. ROBINSON,
F. L. ST. JOHN,
MORTIMER M. SINGER,
*SAMUEL SLOAN,
CHARLES E. SLOCUM,
M.D., LL.D.,
FRANK K. STURGIS,

COL. JOHN WEIR.

^{*} Deceased.

DECEASED TRUSTEES, BENEFACTORS AND MEMBERS.

In addition to the loss sustained by the Museum through the decease of Mr. Jesup, the institution has suffered a serious loss in the death, on December 4, 1907, of Mr. Henry O. Havemeyer, a member of the Board of Trustees since the year 1898. In appreciation of the interest of Mr. Havemeyer in the Museum, the Trustees adopted the following minute at their Annual Meeting, February 10, 1908:

Through the death of Mr. H. O. Havemeyer, The American Museum of Natural History has lost a warm friend and able supporter.

Mr. Havemeyer was elected a Trustee the ninth of May, 1898. He took an active interest in the development of the Museum, always expressed himself as desirous of taking his share in its many scientific enterprises and from the time of his election contributed generously.

In 1903 he was one of five trustees who presented to the Museum the Pampean Collection of Professor Edward D. Cope; and in 1904 he was a generous contributor to the Permanent Endowment Fund.

The Trustees of The American Museum of Natural History, at this their annual meeting, desire to make permanent record of these signs of Mr. Havemeyer's public spirit, to express their sense of loss and to extend to the members of his family their most sincere sympathy.

Through the death of Mr. D. Willis James on September 13, 1907, the Museum has lost another of its most liberal benefactors and friends. Mr. James was a generous supporter of the work of the institution, and served on the Board of Trustees from February 11, 1889, to January 16, 1903, when he felt obliged to resign.

We regret to announce the death of the following Members during the year 1907:

Fellows.

CHARLES T. BARNEY,

SAMUEL N. HOYT.

Life Members.

GEN. J. WATTS DE PEYSTER, NORMAN W. DODGE, AMBROSE K. ELY, MRS. W. A. HAINES, EDWARD LUCKEMEYER, ALEXANDER MAITLAND, JAMES MORRIS, TRENOR L. PARK,
GEORGE C. RAND,
JAMES O. SHELDON,
GARDINER SHERMAN,
SAMUEL SLOAN,
A. B. TOWNSEND,
Mrs. JOSEPH M. WHITE.

IV. FINANCIAL ADMINISTRATION.

Finances.—As has been customary for several years the financial transactions have been carried in three separate accounts, designated as the City Maintenance Account, contributed by the City, and two accounts contributed by or through the Trustees, Members and friends of the Museum, namely, the General Account and the Special Funds Account (formerly called the Endowment and Investment Account). The details of the receipts and disbursements, thus classified, will be found in the Treasurer's Report, pages 49 to 57 inclusive. All books and vouchers of these accounts have been duly examined and certified by the Audit Company of New York. A few statements may help in making the details of this report clear.

CITY MAINTENANCE ACCOUNT.—For the maintenance of the Museum the City has appropriated \$160,000, a sum \$10,000 less than the appropriation for 1906. The opening of the Museum free to the public on every day of the week; the care of new exhibition halls, and the extension of the

educational work with the public schools have so increased the cost of maintenance that the reduced contribution of the City has been insufficient to meet the running expenses. On this account there has been the large deficit of \$26,828.52, which has been met by contributions of the Trustees. This diversion of the gifts of Trustees and of endowment funds to maintenance purposes is a direct loss to the City and to the public because it retards the growth of the collections and the enrichment of the exhibition halls.

TRUSTEES GENERAL ACCOUNT.—The chief items of income of the General Account have been the interest on the Permanent Endowment, \$48,317.50; receipts from Life Membership, \$1,900, and receipts from Annual Membership, \$15,300, the total net receipts having been \$83,244,27.

Inasmuch as the money from the City cannot be used for the purchase of specimens, for publications or for exploring expeditions, the funds of the General Account have to be applied to these purposes. It will be seen, therefore, that for the normal growth of the institution a large increase of the General Fund is urgently needed.

TRUSTEES SPECIAL FUNDS ACCOUNT.—In former reports this account has been designated as the "Endowment and Investment Account," but the name has been changed to "Special Funds Account," as it consists wholly of funds contributed for *special purposes*. Not infrequently friends of the Museum become interested in some particular kind of work, for instance, the bird groups, exploring for fossils, etc., and desire their contributions to be applied to specific purposes. In such cases, the funds provided are deposited in the Special Funds Account and disbursements are made therefrom in accordance with the wishes of the contributors.

The subscriptions for special purposes have been very generous, amounting to \$66,488.63 for the year. Had it not been for this substantial support by friends of the Museum, it would have been necessary to abandon important field

explorations and to lose rare collections of much scientific and popular interest which probably never would have been secured for New York.

TRUSTEES PERMANENT ENDOWMENT.—Two important additions have been made to the Permanent Endowment during the year: from Mrs. John B. Trevor, who has long been a generous supporter of the Museum's work, was received \$10,000, making the total of the John B. Trevor Fund \$25,000; by the bequest of Benjamin P. Davis (a Member of the Museum for nine years), \$25,000 was added to the endowment, payment being made in stocks and cash. These substantial contributions increase the par value of the Permanent Endowment to \$1,047,750, the interest on which, \$48,317.50, constitutes the chief source of income of the General Account.

It is on this income that the Museum is largely dependent for its development, and the increase of the Permanent Endowment is imperative if the Museum is to retain the position that it now holds among scientific institutions both in this country and abroad.

Very respectfully yours,

HENRY FAIRFIELD OSBORN, President.

April, 1908.

DR. WILLIAM M. WHEELER, Bronxville, N. Y.

A collection of Insects from Europe.

Cotypes of Attaphila fungicola Wheeler from Austin, Texas.

A collection of Insects from Porto Rico.

By Purchase.

A valuable collection of Bark-lice (Coccidæ). 300 Specimens of Tiger Beetles (Cicindelidæ). 700 Specimens of Cuban insects. 56 Specimens of *Catocala* from Utah. 14 Nests of Wasps, Ants and Termites. Observation hive and swarm of honey-bees.

DEPARTMENT OF MINERALOGY AND CONCHOLOGY.

MINERALOGY.

By GIFT.

THE MATILDA W. BRUCE FUND.

43 Specimens of minerals, including Autunite, Baddelyite, Beryl, Cobaltite, Copper (crystallized), Dyscrasite, Eglestonite, Hellandite, Humite, Malachite, Menaccanite, Molybdite, Polybasite, Quartz (pseudomorph), Gypsum (Selenite), Tantalite, Terlinguaite, Thalenite, Thorianite, Uraninite.

W. A. BUCKNER, Hot Springs, Ark. Infusorial Clay from Arkansas.

F. A. CANFIELD, Dover, N. J.

I Specimen of Lead (native) from Sweden.

DR. JOHN H. CASWELL, New York City.

15 Specimens of minerals from Chile, South America, including Amarantite, Coquimbite, Copiapite, Fibroferrite, Hohmannite and Roemerite.

ALBERT S. COFFIN, New York City.

6 Specimens from deep building excavations on New York Island, including Manhattan Schist, Quartzite, Granite, Kaolinized Granite and Ripidolite.

FRANTZ DJORUP, Chicago, Ill.

1 Specimen of Magnesite from Austria.

RICHARD DOUGLAS, New York City.

I Specimen of Malachite from Africa.

A. RADCLIFFE DUGMORE, Newfoundland, N. J.

2 Specimens of Pyrite (concretionary) from England.

LEWIS FALLAMEL, Bedford, N. Y.

I Specimen of Cyrtolite from Westchester County, N. Y.

MICHAEL R. HAAS, New York City.

13 Specimens of Erubescite (Bornite) from New York Island.

HANCE ASBESTOS COMPANY (through S. W. Fairchild), New York City.
 Specimens of Asbestos (Chrysotile), associated with Serpentine, from the Grand Cañon, Colorado.

B. E. HOOVER, New York City.

1 Specimen of Talc (compact) from Fowler, N. Y.

FREDERICK F. HUNT, New York City.

I Specimen of Asbestos (Chrysotile) from Grand Cañon, Colorado.

2 Specimens of Serpentine from Grand Cañon, Colorado.

BARNEY KLEPPER, New York City.

2 Specimens of Chalk Flint from England.

DR. GEORGE F. KUNZ, New York City.

I Specimen of Actinolite from Vermont.

F. T. LACEY, New York City.

1 Specimen of Travertine from Caledonia, N. Y.

DR. W. G. LEVISON, Brooklyn, N. Y.

I Specimen of Gold Ore from excavations on New York Island.

J. PIERPONT MORGAN, New York City.

r Specimen (of extraordinary beauty) of Crystallized Gold in Crystallized Quartz from California,

3 Masses of Jade (Nephrite) from New Zealand.

J. F. FREIRE MURTA, Minas Geraes, Brazil.

350 Specimens from Minas Geraes, Brazil, including Tourmaline (fragments), Yellow Beryl, Aquamarine (Beryl) and cut Tourmalines, Topazes and Beryls.

NEW YORK STATE MUSEUM, Albany, N. Y. (through Miss Pauline Sterling and Prof. H. P. Whitlock).

Group of large colored Calcite crystals from Sterlingbush, St. Lawrence County, N. Y.

THE PEARY EXPEDITION (1905).

12 Parcels of stone fragments collected at various points in the North.

ALBERT H. PETEREIT, New York City.

I Specimen of crucible contents, with plates of artificial Ruby (Corundum), and I specimen of Chalcedony (pseudomorph), from Westphalia, Germany.

I Specimen (large, 250 lbs.) of Limonite from Tennessee.

L. S. QUACKENBUSH, New York City.

1 Specimen of placer Tin (Cassiterite) from Alaska.

DR. L. D. RICKETTS, Cananea, Mexico.

2 Specimens of colored Stalactite (Calcite), cut and polished, from Arizona,

R. H. SELLERS, New York City.

Specimens of Cinnabar from California.

By Exchange.

C. H. JONES, New York City.

100 Small Sphalerite groups and crystals in Limestone from Tiffin, Ohio.

PROF. D. S. MARTIN, Brooklyn, N. Y.

5 Specimens of Achroite (Tourmaline) from San Diego County, California.

OTTO F. PFORDTE, Rutherford, N. J.

46 Specimens of minerals, including Erythrite, Fluorite (Chlorophane), Limonite (altered Pyrite), Niccolite (with Silver), Pentlandite, Pyrrhotite, Smaltite (with Silver) and vein formation (cut and polished).

J. MILTON RHOADES, Edge Hill, Pa.

7 Specimens of Menaccanite (lamellar Ilmenite) from Pennsylvania.

PROF. T. WADA, Tokio, Japan.

30 Specimens of minerals from Japan, including Andalusite, Chalcopyrite, Danburite, Fluorite, Fergusonite, Garnet, Hyalite, Jamesonite, Limonite, Magnetite, Naegite, Opal, Orthoclase, Quartz, Rhodochrosite, Reinite and Witherite.

By Purchase.

I Specimen of Sphalerite and I specimen of Rutile from New York Island (property of the New York Mineralogical Club).

CONCHOLOGY.

By GIFT.

EDWARD BIERSTADT (deceased), through Mrs. M. A. Bierstadt, New York City.

505 Specimens of Shells, comprising 179 species.

F. A. CANFIELD, Dover, N. J.

11 Specimens of Shells from Cuba.

A. DA COSTA GOMEZ, Brooklyn, N. Y.

7 Specimens of Shells from Venezuela.

WALTER GRANGER, New York City.

4 Specimens of Helix desertorum Forsk from Egypt.

C. DAYTON GWYER, Brooklyn, N.Y.

5 Specimens of Shells.

JAS. W. JUDD, Brooklyn, N. Y.

20 Specimens of Campeloma decisa Say from Michigan.

GNEOMAR VON KROCKOW, Brooklyn, N. Y.

Small collection of Bivalves and Univalves from various parts of the world.

ENRIQUE LEINADO, New York City.

50 Specimens of Liguus virginius Linn. from San Domingo.

DR. T. H. McCOY, Chicago, Ill.

2 Specimens of Cypræa spadicea Sow. from California.

THE MISSIONARY SOCIETY (through the Department of Ethnology).

A small collection of Shells, comprising 48 species and 83 specimens

collected by Rev. J. C. Davison, Nagasaki, Japan.

GEORGE H. PEPPER, New York City.

43 Specimens of Shells from Ecuador.

By Exchange.

GÉNÉRAL DE LAMOTHE, Paris, France.

Collection of Land Shells from Algiers, Africa, consisting of 156 specimens.

MAXWELL SMITH, New York City.

A collection of Marine and Fresh-water Bivalves and Univalves (261 specimens) from various parts of the world.

By Purchase.

18 Specimens of Shells, comprising 7 species.

DEPARTMENT OF INVERTEBRATE ZOÖLOGY.

INVERTEBRATES.

By GIFT.

ANONYMOUS.

I Mantis-shrimp.

W. H. ARNTON, New York City,

2 Land Crabs from the Bahamas and 2 Tarantulas.

PROF. N. L. BRITTON, New York City.

I Lot of Cerion Shells from Watlings Island, Bahamas.

A. C. BURRILL, New York City.

I Lot of Ants, Termites and Scorpions from Kansas and Oklahoma.

PROF. J. H. COMSTOCK, Ithaca, N. Y.

8 Fragments of Tully Limestone containing borings of a Rock-boring Mite.

DR. B. E. DAHLGREN, New York City.

Various Invertebrates from Sweden.

E. A. FORD, Kamerun, West Africa.

Various Myriapods, Arachnids and Insects.

PROF. AUGUSTE FOREL, Yvorne, Switzerland.

I Collection of Ants, containing 3,519 specimens, representing 1,385 species, subspecies and varieties, including 788 type specimens, from all parts of the world.

HENRY R. FREELAND, New York City. Various Shells, Corals, etc.

GEORGE G. HEYE, New York City.
Various Insects from Manabi, Ecuador.

GEORGE B. KEAN, Boston, Mass.

1 Cast of Lobster Claw.

Prof. K. B. LEHMANN, Würzburg, Germany.
3 Cave Pseudoscorpionids from Hungary.

MISS MAHONEY, New York City.

1 Millepede from Liberia, West Africa.

WILLIAM H. MARDOCK, New York City.

1 Centipede from the Amazon River, Brazil.

W. DEW. MILLER and JAMES CHAPIN, New York City.
Nematodes from intestine of water-snake.

MORRIS K. JESUP, New York City.

49 Myriapods, Crustaceans and Worms, and I lot of Ants from Rio Caiary-Uaupes, State of Amazonas, Brazil.

McKESSON & ROBBINS, New York City.

3 Specimens of Euplectella speciosissima.

COM. R. E. PEARY, U. S. N.

Various Crustaceans, Spiders, Insects and Parasitic Worms from Kane Basin, Lincoln Bay and Grant Land, Arctic America.

By Purchase.

- I Collection of internal parasites, containing 41 specimens, representing 29 species.
- 5 Specimens of Ascaris lumbricoides from the stomach of a child.

Insect larvæ infesting the horn of a Grant's Antelope,

Series (30 species) of the mollusk *Paludina*, showing development of the genus according to Neumayr.

A collection of 238 species of palæarctic European Myriapods (760 specimens).

- 3 Dry specimens of Cambarus immunis Hagen.
- I Lot of Myriapods and Arachnids from Santiago de Cuba.
- I " " Moorea, Tahiti.
- I Tape-worm (Tania saginata) from human intestine.
- I Lot of Ants, Myrmecophiles, Myriapods and Arachnids, embracing 723 specimens.
- I Nest of Azteca in Cecropia log and 2 nests of Comitennis striatus from Santa Catharina, Brazil.
- 5 Specimens of Peripatus novo-zelandica,

THROUGH MUSEUM EXPEDITIONS.

Whale-lice (Isopods) attached to piece of whale's hide. Collected by Mr. James L. Clark at Amagansett, L. I.

3 Crabs and I Snail from the Athi Plains, British East Africa. Collected by Mr. Herbert Lang.

I Lot of Myriapods from Black Mountains of North Carolina. Collected by Mr. William Beutenmüller.

I Lot of Myriapods from New York Botanical Garden. Collected by Mr. D. Fiske.

I Lot of *Cerion* shells (II species) from Florida and the Bahamas. Collected by Messrs. Frank M. Chapman and J. D. Figgins.

I Lot of Invertebrates from Mt. Sinai, L. I. Collected by Mr. Robert C. Murphy.

I Lot of European Ants, consisting of many thousands of specimens and embracing nearly all the known European species. Collected by Dr. William M. Wheeler.

1,358 Fossil Insects, including 1,194 Fossil Ants from Florissant, Colo. Collected by Prof. T. D. A. Cockerell.

Various Myriapods from New York and New Jersey. Collected by Mr. R. W. Miner.

REPTILES AND BATRACHIANS.

BY GIFT.

AMERICAN MINISTER at Monrovia, Liberia.

I Boa-constrictor's skin from Monrovia, Liberia.

A. C. BURRILL, New York City.

1 Frog from Oklahoma.

SELWYN BYWATER, New York City.

INCORPORATION.

AN ACT

TO INCORPORATE THE

AMERICAN MUSEUM OF NATURAL HISTORY,

Passed April 6, 1869.

The People of the State of New York, represented in Senate and Assembly, do enact as follows:

Section I. John David Wolfe, Robert Colgate, Benjamin H. Field, Robert L. Stuart, Adrian Iselin, Benjamin B. Sherman, William A. Haines, Theodore Roosevelt, Howard Potter, William T. Blodgett, Morris K. Jesup, D. Jackson Steward, J. Pierpont Morgan, A. G. P. Dodge, Chas. A. Dana, Joseph H. Choate and Henry Parish, and such persons as may hereafter become members of the Corporation hereby created, are hereby created a body corporate, by the name of "The American Museum of Natural History," to be located in the City of New York, for the purpose of establishing and maintaining in said city a Museum and Library of Natural History; of encouraging and developing the study of Natural Science; of advancing the general knowledge of kindred subjects, and to that end of furnishing popular instruction and recreation.

SEC. 2. Said Corporation shall have power to make and adopt a Constitution and By-Laws, and to make rules and regulations for the admission, suspension and expulsion of its members, and their government, the number and election of its officers, and to define their duties, and for the safe keeping of its property, and, from time to time, to alter and modify such Constitution, By-Laws, Rules and Regulations. Until

an election shall be held pursuant to such Constitution and By-Laws, the persons named in the first section of this Act shall be, and are hereby declared to be, the Trustees and Managers of said Corporation and its property.

- SEC. 3. Said Corporation may take and hold by gift, devise, bequest, purchase or lease, either absolutely or in trust, for any purpose comprised in the objects of the Corporation, any real or personal estate, necessary or proper for the purposes of its incorporation.
- SEC. 4. Said Corporation shall possess the general powers, and be subject to the restrictions and liabilities, prescribed in the Third Title of the Eighteenth Chapter of the First Part of the Revised Statutes.
 - SEC. 5. This Act shall take effect immediately.

STATE OF NEW YORK,
OFFICE OF THE SECRETARY OF STATE.

I have compared the preceding with the original law on file in this office, and do hereby certify that the same is a correct transcript therefrom, and of the whole of said original law.

Given under my hand and seal of Office at the City of Albany, [L.s.] this fourteenth day of April, in the year one thousand eight hundred and sixty-nine.

D. WILLERS, Jr., Deputy Secretary of State.

¹ As amended by Chapter 303, Laws of 1898, of the State of New York, entitled "An Act to amend chapter one hundred and nineteen, laws of eighteen hundred and sixty-nine, entitled 'An Act to incorporate the American Museum of Natural History,' relative to its charter."

CONTRACT

WITH THE DEPARTMENT OF PUBLIC PARKS

FOR THE OCCUPATION OF THE NEW BUILDING.

This Agreement, made and concluded on the twenty-second day of December, in the year one thousand eight hundred and seventy-seven, between the Department of Public Parks of the City of New York, the party of the first part, and the American Museum of Natural History, party of the second part, witnesseth:

Whereas, by an Act of the Legislature of the State of New York, passed April 22d, 1876, entitled "An Act in relation to the powers and duties of the Board of Commissioners of the Department of Public Parks, in connection with the American Museum of Natural History, and the Metropolitan Museum of Art," the said party of the first part is authorized and directed to enter into a contract with the said party of the second part, for the occupation by it of the buildings erected or to be erected on that portion of the Central Park in the City of New York, known as Manhattan Square, and for transferring thereto and establishing and maintaining therein its museum, library and collections, and carrying out the objects and purposes of said party of the second part; and,

Whereas, a building contemplated by said act has now been erected and nearly completed and equipped in a manner suitable for the purposes of said Museum, as provided in the first section of the Act of May 15, 1875, known as Chapter 351, of the Laws of 1875, for the purpose of establishing and maintaining therein the said Museum, as provided by the said last-named act, and by the Act of April 5, 1871, known as Chapter 290, of the Laws of 1871; and,

Whereas, it is desired as well by the said party of the first part, as by the said party of the second part, that, immediately upon the completion and equipment of said building, the said party of the second part should be established therein, and should transfer thereto its museum, library and collections, and carry out the objects and purposes of the said party of the second part;

Now, therefore, it is agreed by and between the said parties as follows, namely:

First.—That the said party of the first part has granted and demised and let, and doth, by these presents, grant, demise and let, unto the said party of the second part, the said buildings and the appurtenances thereunto belonging, to have and to hold the same so long as the said party of the second part shall continue to carry out the objects and purposes defined in its charter; or such other objects and purposes as by any future amendment of said charter may be authorized; and shall faithfully keep, perform, and observe the covenants and conditions herein contained on its part to be kept, performed and observed, or until the said building shall be surrendered by the said party of the second part, as hereinafter provided.

Secondly.—That neither the party of the first part, its successor or successors, nor the Mayor, Aldermen and Commonalty of the City of New York, shall be in any manner chargeable or liable for the preservation of the said building or the property of the party of the second part which may be placed therein, against fire, or for any damage or injury that may be caused by fire to the said property; but it is agreed that, damages as aforesaid excepted, the said party of the first part will keep said building, from time to time, in repair.

Thirdly.—That as soon after the completion and equipment of said building as practicable, said party of the second part shall transfer to, and place and arrange in said building, its museum, library and collections, or such portion thereof as can be properly displayed to the public therein, and shall have

Contract. 85

and enjoy the exclusive use of the whole of said building, subject to the provisions herein contained, and the rules and regulations herein prescribed, during the continuance of the term granted, or until a surrender thereof, as herein provided.

Fourthly.—That the exhibition halls of said building shall, on Wednesday, Thursday, Friday and Saturday of each week, and on all legal or public holidays, except Sundays, be kept open and accessible to the public, free of charge, from nine o'clock A.M. until half an hour before sunset, under such rules and regulations as the party of the second part shall from time to time prescribe; but on the remaining days of the week the same shall be only open for exhibition to such persons, upon such terms as the said party of the second part shall from time to time direct. But all professors and teachers of the public schools of the City of New York, or other institutions of learning in said city, in which instruction is given free of charge, shall be admitted to all the advantages afforded by the said party of the second part, through its museum, library, apparatus, and collections, or otherwise, for study, research and investigation, free of any charge therefor, and to the same extent and on the same terms and conditions as any other persons are admitted to such advantages, as aforesaid.

Fifthly.—That the museum, library and collections, and all other property of said party of the second part, which shall or may be placed in said building, shall continue to be and remain absolutely the property of said party of the second part, and neither the said party of the first part nor the said the Mayor, Aldermen and Commonalty, shall by reason of said property being placed in said building, or continuing therein, have any right, title, property or interest therein; nor shall the said party of the second part, by reason of its occupation and use of said building under this agreement, acquire, or be deemed to have any right, title, property or interest in said building, except so far as expressly granted by this agreement.

Sixthly.—That the said party of the second part shall, on or before the first day of May, in every year, during the con-

86 Contract.

tinuance of this agreement, submit to the said party of the first part, its successor or successors, a detailed printed report of the operations and transactions of the said party of the second part, and all its receipts and payments, for the year ending with the 31st day of December next preceding.

Seventhly.—That said party of the first part shall have, at all times, access to every part of the said building for general visitation and supervision, and also for the purpose of the performance of the duties devolved upon it by the laws of the State of New York, or of the City of New York. That the police powers and supervision of said party of the first part shall extend in, through and about said building. That the said party of the second part may appoint, direct, control and remove all persons employed within said building, and in and about the care of said building, and the museum, library and collections therein contained.

Eighthly.—That said party of the second part may, at any time, after the expiration of three, and before the expiration of six, months from the date of the service of a notice in writing to said party of the first part, its successor or successors, or to the Mayor of the City of New York, of its intention so to do, quit and surrender the said premises and remove all its property therefrom; and upon and after such notice, the said party of the second part shall and will, at the expiration of the said six months, quietly and peaceably yield up and surrender unto the said party of the first part and its successors all and singular the aforesaid demised premises. And it is expressly understood and agreed by and between the parties hereto that if the said party of the second part shall omit to do, perform, fulfill or keep any or either of the covenants, articles, clauses and agreements, matters and things herein contained, which on its part are to be done, performed, fulfilled or kept, according to the true intent and meaning of these presents, then and from thenceforth this grant and demise shall be utterly null and void. And in such case it shall and may be lawful for said Department to serve or cause to be served on the said party of the second part a notice in writing declaring that the said grant hereinbefore made has become utterly null and void and thereupon the said party of the first part, its successor or successors (ninety days' time being first given to the said party of the second part to remove its property therefrom), may reënter, and shall again have, repossess and enjoy the premises aforementioned, the same as in their first and former estate, and in like manner as though these presents had never been made, without let or hindrance of the said party of the second part, anything here contained to the contrary notwith-standing.

Ninthly.—And it is further expressly understood and agreed, by and between the parties hereto, that this agreement may be wholly canceled and annulled, or, from time to time, altered, or modified, as may be agreed, in writing, between the said parties, or their successors, anything herein contained to the contrary in anywise notwithstanding.

In witness whereof, the party of the first part hath caused this agreement to be executed by their President and Secretary, pursuant to a resolution of the Board of Commissioners of said Department, adopted at a meeting held on the thirtieth day of January, in the year of our Lord one thousand eight hundred and seventy-eight; and the said party of the second part hath caused the same to be executed by their President, and their official seal affixed thereto, pursuant to a resolution of the Trustees of the American Museum of Natural History, adopted at a meeting held on the twelfth day of February, in the year of our Lord one thousand eight hundred and seventy-seven.

In presence of D. Porter Lord.

JAMES F. WENMAN,

President Department of Public Parks of the City of New York.

WILLIAM IRWIN,

Secretary Department of Public Parks of the City of New York.

SEAL
of the American
Museum of
Natural History

ROBERT L. STUART,

President American Museum

President American Museum of Natural History. STATE OF NEW YORK,
City and County of New York,

On this 12th day of February, in the year 1878, before me personally came James F. Wenman, President of the Department of Public Parks of the City of New York, and William Irwin, Secretary of the said Department of Public Parks, with both of whom I am personally acquainted, and both of whom being by me duly sworn, said that they reside in the City and County of New York; that the said James F. Wenman is the President, and the said William Irwin is the Secretary of the said Department of Public Parks, and that they signed their names to the foregoing agreement by order of the Board of Commissioners of the said Department of Public Parks, as such President and Secretary.

W. C. BESSON, (73) Notary Public N. Y. Co.

[SEAL.]

STATE OF NEW YORK, City and County of New York, Ss. :

On this 12th day of February, in the year 1878, before me personally came Robert L. Stuart, the President of the American Museum of Natural History, with whom I am personally acquainted, who being by me duly sworn, said that he resides in the City and County of New York, that he is the President of the American Museum of Natural History, and that he knows the corporate seal of said museum, that the seal affixed to the foregoing agreement is such corporate seal, that it is affixed thereto by order of the Board of Trustees of said American Museum of Natural History, and that he signed his name thereto by the like order, as President of said Museum.

W. C. BESSON, (73) Notary Public N. Y. Co.

[SEAL.]

ne City and County of New York

Recorded in the office of the Register of the City and County of New York in Liber 1426 of Cons., page 402, February 16, A. D. 1878, at 9 o'clock A.M., and examined.

Witness my hand and official seal,

FREDERICK W. LOEW,

[SEAL.]

Register.

Note.—July 25, 1892, by consent of the Trustees, section fourth was modified to enable the Trustees to open the Museum free to the public "throughout the year, excepting Mondays, but including Sunday afternoons and two evenings of each week."

June 29, 1893, by consent of the Trustees, section fourth was modified to enable the Trustees to open the Museum free of charge to the public "throughout the year for five days in each week, one of which shall be Sunday afternoon, and also two evenings of each week."

CONSTITUTION

OF THE

AMERICAN MUSEUM OF NATURAL HISTORY,

IN THE CITY OF NEW YORK.

ARTICLE I.

This Corporation shall be styled The American Museum of Natural History.

ARTICLE II.

The several persons named in the charter, and such others as they may add to their number, which shall not exceed twenty-five in all at one time, shall be the Trustees to manage the affairs, property and business of the Corporation.

The members of the Board of Trustees holding office at the time of the regular quarterly meeting of November, 1905. shall then, or at the first meeting of the Board thereafter, be divided by lot into five classes of five members each, to serve for the terms of one, two, three, four and five years respectively from the date of the annual meeting of February, 1906. The Board of Trustees at each annual meeting thereafter, or an adjournment thereof, shall by ballot, by a majority vote of the Trustees present at the meeting, elect five Trustees to supply the places of the class whose term expires at that meeting; said newly elected Trustees to hold office for five years or until their successors are elected. In case of a vacancy in the Board by death, resignation, disqualification or otherwise, the vacancy shall be filled by ballot, in like manner, by the Board of Trustees at any regular meeting or special meeting. for the unexpired term. No person shall be eligible for election as Trustee who shall not be a "Patron" of the Museum. unless by a unanimous vote of a quorum of the Board, nor be

eligible unless his name shall be presented by the Nominating Committee at a regular or special meeting of the Board previous to the meeting at which his name shall be acted upon. Written notice of such election and the vacancy to be filled shall be sent to the Trustees at least one week prior to said meeting.

ARTICLE III.

The Trustees shall meet quarterly, on the second Monday of every February, May, August and November, at an hour and place to be designated, on at least one week's written notice from the Secretary, and shall annually, at the quarterly meeting in February, elect the officers and committees for the ensuing year. They shall also meet at any other time to transact special business on a call of the Secretary, who shall issue such call whenever requested so to do, in writing, by five Trustees, or by the President, and give written notice to each Trustee of such special meeting, and of the object thereof, at least three days before the meeting is held.

ARTICLE IV.

Section 1. The officers of said Corporation shall be a President, a First Vice-President, a Second Vice-President, a Treasurer and a Secretary. The President and Vice-Presidents shall be elected from among the Trustees. The Treasurer and Secretary may or may not be chosen from such Trustees. These officers shall be elected by ballot, and the persons having a majority of the votes cast shall be deemed duly elected. They shall hold their offices for one year or until their successors shall be elected.

SEC. 2. The Board of Trustees shall appoint each year, in such manner as it may direct, the following Standing Committees: an Executive Committee, an Auditing Committee, a Finance Committee, a Nominating Committee. These Committees are all to be elected from the Trustees, and the members shall hold office for one year or until their successors shall be elected.

The Board of Trustees shall also have authority to appoint such other committees or officers as they may at any time deem desirable, and to delegate to them such powers as may be necessary.

ARTICLE V.

SECTION 1. The President shall have a general supervision and direction over the affairs of the Corporation, and shall preside at all the meetings of the Museum and of the Trustees. In his absence or inability to act, the First or Second Vice-President shall act in his place.

SEC. 2. The Secretary shall be present, unless otherwise ordered by the Board, at all the meetings of the Museum and Trustees, of the Executive Committee and such other Committees as the Board may direct. He shall keep a careful record of the proceedings of such meetings, shall preserve the seal, archives and correspondence of the Museum, shall issue notices for all meetings of the Trustees and various committees, and shall perform such other duties as the Board may direct.

The Board of Trustees shall have power to appoint an Assistant Secretary, who, under its direction, shall perform the duties of the Secretary in his absence or inability to act.

SEC. 3. The Treasurer shall receive and disburse the funds of the Museum. He shall report in writing, at each quarterly meeting of the Trustees, the balance of money on hand, and the outstanding obligations of the Museum, as far as practicable; and shall make a full report at the annual meeting of the receipts and disbursements of the past year, with such suggestions as to the financial management of the Museum as he may deem proper.

SEC. 4. The accounts of the Museum shall be kept at the General Office, in books belonging to it, which shall at all times be open to the inspection of the Trustees.

These accounts shall be under the care of an Assistant Treasurer, who shall be appointed by the Board of Trustees and be under its direction. He shall give such bonds for the faithful performance of his duties as the Board may direct.

SEC. 5. The offices of Secretary and Assistant Treasurer may be held by the same person.

ARTICLE VI.

The Executive Committee shall consist of nine Trustees, of whom the President, First and Second Vice-Presidents and Treasurer, in case he be a Trustee, shall be four, and five other members to be appointed each year in the manner provided in Article IV. They shall have the control and regulation of the collections, library and other property of the Museum; and shall have power to purchase, sell and exchange specimens and books, to employ agents, to regulate the manner and terms of exhibiting the Museum to the public, and generally to carry out in detail the directions of the Trustees; but the Executive Committee shall not incur any expense or liability for the Museum exceeding two thousand dollars at one time, or exceeding in all ten thousand dollars, in the interval between the quarterly meetings of the Trustees, without the express sanction of the Trustees. Five members of the Committee shall constitute a quorum for the transaction of business.

ARTICLE VII.

The Auditing Committee shall consist of three Trustees. They shall have the books of the Museum duly audited, at least once in six months, by an authorized public accountant to be selected by them.

No bills shall be paid unless approved, in writing, by the President, the Chairman of the Executive Committee, or the Director.

ARTICLE VIII.

The Finance Committee shall consist of four Trustees, including the Treasurer in case he be a Trustee. They shall have general charge of the moneys and securities of the Endowment and other permanent funds of the Museum, and such real estate as may become the property of the Corporation, with authority to invest, sell and reinvest the same, subject to the approval of the Board of Trustees.

ARTICLE IX.

The Nominating Committee shall be composed of three Trustees, to whom shall be first submitted the names of any persons proposed as candidates for election to membership in the Board of Trustees. The Committee shall report on such candidates from time to time, as it may deem to be for the interest of the Museum. A fortnight before the annual meeting they shall prepare and mail to each member of the Board of Trustees a list of five candidates to be elected by ballot at the said meeting.

ARTICLE X.

The President shall be a member, ex-officio, of all standing committees.

ARTICLE XI.

Nine Trustees shall constitute a quorum for the transaction of business, but five Trustees meeting may adjourn and transact current business, subject to the subsequent approval of a meeting at which a quorum shall be present.

ARTICLE XII.

By-Laws may be made from time to time by the Trustees providing for the care and management of the property of the Corporation and for the government of its affairs, and may be amended at any meeting of the Trustees by a vote of a majority of those present, after a month's notice in writing of such proposed amendment.

ARTICLE XIII.

The contribution of \$1,000 or more to the funds of the Museum, at any one time, shall entitle the person giving the same to be a Patron of the Museum, who shall have the right in perpetuity to appoint the successor in such patronship.

The contribution of \$500, at one time, shall entitle the person giving the same to be a Fellow, who shall have the right to appoint one successor in such fellowship.

No appointment of a successor shall be valid unless the same shall be in writing, endorsed on the certificate, or by the last will and testament.

The contribution of \$100, at one time, shall entitle the person giving the same to be a Life Member.

Any person may be elected by the Trustees to either of the above degrees, who shall have given to the Museum books or specimens, which shall have been accepted by the Executive Committee, or by the President, to the value of twice the amount in money requisite to his admission to the same degree, and the President and Secretary shall issue diplomas accordingly under the seal of the Museum.

The Trustees may also elect Honorary Fellows of the Museum in their discretion.

ARTICLE XIV.

Any person who has held the office of President for ten or more successive years may be elected by the Trustees as Honorary President for life.

ARTICLE XV.

No alterations shall be made in this Constitution, unless at a regular quarterly meeting of the Trustees, or at a special meeting called for this purpose; nor by the votes of less than a majority of all the Trustees; nor without notice in writing of the proposed alteration, embodying the amendment proposed to be made, having been given at a regular meeting.

BY-LAWS.

I.

Patrons, giving \$1,000, are each entitled to I Subscriber's Ticket, 5 Complimentary Season Tickets and 10 Tickets for a single admission.

Fellows, giving \$500, are each entitled to I Subscriber's Ticket and Io Tickets for a single admission.

Life Members, giving \$100, are each entitled to I Subscriber's Ticket and 5 Tickets for a single admission.

Annual Members, paying \$10 yearly, are each entitled to 1 Subscriber's Ticket and 4 Tickets for a single admission.

[Note.—A Subscriber's Ticket admits to the laboratories and parts of the Museum not open to the public, also to all Receptions and Special Exhibitions, and may be used by any member of the Subscriber's family.

The Single Admission Tickets admit the bearers to the laboratories and parts of the Museum not open to the public, and are issued to Subscribers for distribution among friends and visitors.]

II.

Any Trustee who shall fail to attend three consecutive Regular Quarterly Meetings of the Board shall cease to be a Trustee, unless excused by the Board.

III.

No indebtedness (other than for current expenses) shall be incurred by any committee, officer or employee of the Museum, except as provided for in the Constitution. Any desired additional expenditure shall first receive the approval of the Board of Trustees.

IV.

If any Trustee shall accept a salary from this Corporation he shall thereby be disqualified for the time being from acting

as a Trustee thereof; provided, that the Board of Trustees shall have power to suspend the operation of this law in any special case.

V.

Any vacancies occurring in the membership of the several committees during the interval between the regular meetings of the Board of Trustees may be filled at a regular meeting of the Executive Committee, until the next meeting of the Board.

VI.

All bequests or legacies, not especially designated, shall hereafter be applied to the *Permanent Endowment Fund*, the interest only of which shall be applied to the use of the Museum as the Board shall direct.

VII.

At such times as it may be impracticable to obtain the services of the members of the Auditing Committee, the members of the Executive Committee may act in their place and stead.

FOR THE EQUIPPING AND FINISHING OF THE BUILDING AND THE CONSTRUCTION OF ADDITIONS THERETO.

LEGAL ENACTMENTS OF 1905.

BY THE BOARD OF ALDERMEN.

AN ORDINANCE providing for an issue of Corporate Stock in the sum of five hundred thousand dollars (\$500,000), to provide means for the equipping and finishing of The American Museum of Natural History in Manhattan Square, Borough of Manhattan, and the construction of additions thereto.

Be it ordained by the Board of Aldermen of the City of New York as follows:

SECTION I. The Board of Aldermen hereby approves of and concurs in the following resolution adopted by the Board of Estimate and Apportionment March 16, 1905, and authorizes the Comptroller to issue Corporate Stock of The City of New York to the amount and for the purposes therein specified:

"Resolved, That, pursuant to the provisions of section 47 of the Greater New York Charter, as amended by chapter 409 of the Laws of 1904, the Board of Estimate and Apportionment hereby approves of the issue of Corporate Stock of The City of New York, to an amount not exceeding five hundred thousand dollars (\$500,000), to provide means for the equipping and furnishing of The American Museum of Natural History in Manhattan Square, Borough of Manhattan, and the construction of additions thereto, and that when authority therefor shall have been obtained from the Board of Aldermen, the Comptroller is authorized to issue Corporate Stock of The City of New York, in the manner provided by section 169 of the Greater New York Charter, to an amount not exceeding five hundred thousand dollars (\$500,000), the proceeds whereof to be applied to the purposes aforesaid."

Adopted by the Board of Aldermen April 11, 1905, a majority of all the

members elected voting in favor thereof.

Approved by the Mayor April 18, 1905. (Signed) P. J. Scully, Clerk.

Contracts awarded to December 31, 1906.

For the erection of Fire Lines, Sprinkler System, Fire Escapes, etc.

Contract awarded R. J. F. Gerstle Company, November 26, 1905, \$19,838.

Completed January 11, 1907.

For the erection and completion of a New Wing, to be known as the South Wing of the West Façade, and a Permanent Cellar Passageway running therefrom in northerly and easterly direction.

Contract awarded Guidone & Galardi, May 22, 1906, \$325,000.

FORTIETH ANNUAL REPORT

To the Trustees and Members of The American Museum of Natural History, and to the Municipal Authorities of the City of New York:

The President submits herewith a report of the progress of the Museum during the year 1908.

Forty years ago* the Museum was incorporated and thirty-three† years ago the Trustees entered upon the development of an institution of national scope on Manhattan Square, a location ideally suited to the purpose. Under the successive administrations of John David Wolfe and Robert L. Stuart, and especially under the creative mind of Morris K. Jesup, the original conception of the Museum has constantly widened, until now the two grand objects for which it should exist are firmly established, namely:

- I. PUBLIC EDUCATION IN NATURAL SCIENCE
- 2. RESEARCH, EXPLORATION, PUBLICATION

Our system of education (pp. 18 to 26), in the Museum Exhibition and Lecture halls, and through what may be called Museum Extension to the Schools and Libraries, has reached 1,674,272 adults and young during the past year. It more than justifies the expenditure of the public funds devoted to the erection and maintenance of the building. But the life and spirit of education are all drawn from the same source, namely, the scientific work of the Museum. Without this incessant activity of its own, which is entirely supported by private funds, the Museum would be dependent on other scientific bodies, whereas, it is a living center which, without exaggeration, may be said to reach every part of the world. To support this twofold object, our present Endowment Fund of \$2,048,156.61 must be increased to \$5,000,000, and, within a few years, to a larger sum.

The future scope of exhibition is a matter which has been given very careful thought during the past year and will soon

^{*} April 6, 1869 † April 22, 1876

be presented in a special report. All museums appear to have begun, like ours, with collections of minerals and of stuffed mammals and birds. We have now grown into the broader spirit that the part of the Museum is to join with the entire educational system of the city and country by presenting for objective teaching all of Nature in all its aspects, including the native and prehistoric races of men. Only where history and art begin our part ceases and that of the Museum of Art begins. It is thus within the province of an ideal Natural History Museum to include the following subjects and divisions of science, as stated in an elementary way:

THE HEAVENS. Astronomy, The Solar System, Meteorites, etc.

THE EARTH. Geography, Physiography, Geology and Mineralogy.

THE SEA. Thalassography, Chemistry and Physics of the Sea.

Life. The Present (Zoölogy) and Past (Palæontology) History of Animal Life on the Earth.

FORESTRY AND FOREST CONSERVATION. This, with the Jesup Wood Collection, is the only invasion of the science of Botany.*

Man. Present and Past History of Man (Anthropology—Ethnology and Archæology of the Non-historic Races); also the life history of the lower animals and plants which peculiarly affect man.

Beginnings have been made in several of these newer subjects, not heretofore embraced in the plans of Museums of Natural History, such as Astronomy (see p. 18) and Geography, and the amount of service which these exhibitions have rendered to the public encourages their entry as part of the great plan of the development of the Museum during the next twenty years. Berlin has a Museum entirely devoted to Thalassography. Physical Geography is a subject which will connect both with the life exhibitions of the Museum and with the studies of the school.

The exhibition methods of the Museum are frankly and chiefly for public and higher education. The average visitor,

^{*} A science belonging properly to the New York Botanical Garden

the school, the college and the university student are constantly in the mind of the Director and of each Curator in the arrangement of the exhibition halls. The needs of the specialist are also met so far as practicable, but the investigator, who must compare and study large numbers of duplicate specimens, is referred to the reserve and study collections, which are absolutely open to all duly qualified persons.

I. ADMINISTRATION AND EDUCATION

Although since the foundation of the Museum the City has contributed generously for its support, it has been without direct official representation on the Board. The Trustees desire that the City officials should have a more intimate knowledge of the methods of administration and of the plans for the future. Accordingly the Constitution has been so amended that henceforth the Mayor of the City of New York, the Comptroller and the President of the Department of Public Parks are ex-officio members of the Board.

Every effort has been made to continue the policy and to expand the work that was wisely begun by the founders of the Museum and so ably conducted by those who have directed its growth. The fact that other cities are now establishing museums of science and education similar to the American Museum, and are frequently sending delegates to investigate its methods, plan and scope, are reasons for our belief in the real value to the community of an institution of this character.

As a fitting memorial to the late President Jesup, for his untiring devotion to the interests of the Museum, the Trustees are having prepared a marble statue of heroic size, which is to be placed in the Foyer. The statue is being executed by the sculptor, Mr. William Couper, and its cost has been met by the personal contributions of the Trustees and other friends.

BUILDING.—The new wing on Columbus Avenue (South Section of the West Façade) was finished early in June and was duly accepted by the City.

Early in the year plans and specifications were prepared for the construction of a service roadway on the Columbus Avenue side of the new wing, but owing to the unavailability of the balance of the building appropriation, the contract has not been let. The need of this roadway is imperative and it should be the first piece of new construction undertaken, as, under present conditions, the delivery of our coal and heavy freight is both difficult and expensive.

For the better protection of the buildings and collections, two fire alarm boxes, giving direct connection with Fire Head-quarters, have been installed, one at the Bureau of Information, the other in the Lecture Hall, and a system of night-watchmen's telephones has been put in operation. Telephones have been installed in remote parts of the building and at all important intermediate centers. The watchmen in their rounds are required to report by telephone to the Central Office according to a definite schedule.

PUBLIC EDUCATION

ATTENDANCE.—For the first time in the history of the Museum the attendance has exceeded the million mark, 1,043,582 visitors having been recorded for the year. While the International Tuberculosis Exhibition, held during December, was largely responsible for this increase in the attendance, the number of visitors that came to the Museum for other purposes was greater than in any preceding year and indicates a steady growth of popular interest in the institution.

Public Lectures.—The Lectures given under the auspices of the Board of Education, the New York Academy of Sciences and Affiliated Societies and other organizations were attended by 82,718; the pupils attending the special talks given by Mrs. Roesler numbered 3,576.

The attendance at the two courses of regular lectures for school children was 22,931 pupils.

The teachers of the public and private schools are utilizing more and more the general exhibition collections in order to illustrate their lessons in history, geography and science. The records show that 10,387 pupils visited the Museum in this connection.

ASTRONOMIC EXHIBITS.—In a previous report mention was made of an installation in the Foyer of the Museum representing the Solar System. This exhibit has been so modified

CENTRAL HALL OF MAIN FLOOR. Mechanical device illustrating the diurnal and annual motions of the Earth

that its general interest and instructive value have been much increased. The sun is represented by an illuminated globe three inches in diameter, while minute incandescent bulbs of proper comparative size are suspended at relative distances from the sun and correspond to the various planets. The orbit of each planet is shown by means of a thin metal strip, on which is indicated the space traversed by the earth for each day of the year.

On the second floor has been placed a model illustrating the diurnal and annual movements of our planet. The light and heat of the sun are represented by a strong beam of light focused on the earth by means of a stereopticon lantern. The earth is shown by a globe four feet in diameter, which makes a yearly revolution in its orbit, following the months indicated on a railing which lies in and marks the plane of the ecliptic. The earth, moreover, rotates on its own axis, making one revolution a day. Clockwork, regulated by a pendulum that swings once every second, controls the movements of the model and the directions of rotation and revolution. The location of the earth in its orbit on any day of the year and the inclination of the earth's axis are represented as they occur in the heavens.

These two exhibits are an attempt to illustrate a branch of science which heretofore has not been included within the scope of the Museum, but the interest taken in the models by the general visitor and the practical use made of them by teachers are sufficient evidence that in the future development of the Museum this work might be extended and a hall devoted exclusively to the science of cosmology.

Museum Extension to the Schools.—This work is carried on under our Department of Public Instruction. By many teachers the nature-study collections, regularly distributed by the Museum, are regarded as indispensable adjuncts to their equipment for teaching, and when it is taken into consideration that the collections are loaned only on application of the teacher, the following statistics may be taken as an indication of the direct utility of this branch of work.

During the year, 484 cabinets have been in circulation; practically every month 383 schools in Greater New York

have been supplied, and a total of 575,801 pupils have used the collections. Besides filling the requests of the regular schools, each of the vacation schools (27 in number) has been supplied with these collections, 54,889 children having been reached in this way.

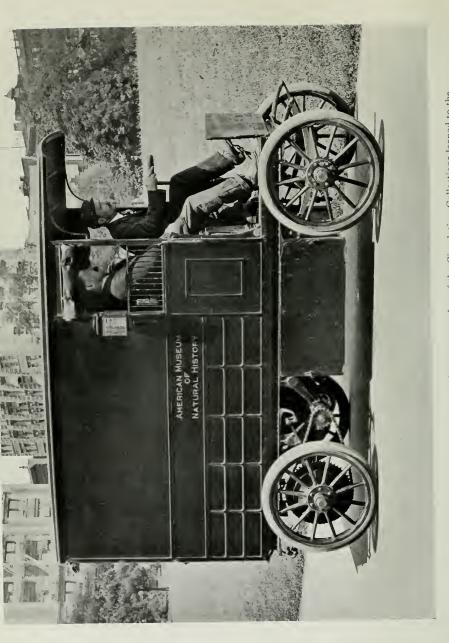

Of more than passing interest is the system of placing small but attractive collections in some of the branch libraries, made as an experiment last year through coöperation with Miss Moore, Supervisor of Children's Libraries.

The collections are designed to stimulate the reading of good books relating to the subjects which the specimens are intended to illustrate. The material is selected with due regard to the general character of the district in which the library is located. The results in some instances have been most striking. An Eskimo exhibit was placed in a branch library on the lower West Side. In less than four weeks the calls for Arctic books increased from o to 400. We desire to extend this work.

Increased demands have been made upon the time of the Instructor of the Museum. A farge number of Members and their friends has visited the laboratories and work-rooms under her guidance, and frequent appointments have been made with visiting classes to examine and study the general collections. Special lectures on zoölogy and botany have been prepared by her and delivered to pupils of the Normal College and high schools of the City. During the summer, as representative of the Museum, Mrs. Roesler attended the conference of the Museums Association of Great Britain, held at Ipswich, England, at which she presented a paper on "The Work of an Instructor in The American Museum of Natural History."

More than 205 lectures have been delivered at the Museum during the year. These include (1) a spring and a fall course to Members; (2) a series of Talks to Members; (3) a spring and a fall course for the pupils of the public schools; (4) free lectures on public holidays; (5) a course of Jesup Lectures, given under the auspices of Columbia University, and (6) three courses given in conjunction with the Board of Education of the City of New York.

AUTO ELECTRIC TRUCK. Used in the transportation of the Circulating Collections loaned to the Public Schools of Greater New York

The following lectures to Members were delivered by members of the scientific staff and others:

LECTURES TO MEMBERS

March	5.—A Year with the Eskimo at the Mouth of the Mackenzie
	RiverV. Stefánsson
4.4	12.—Addresses in connection with the Exhibition of Con-
	gestion of Population in New York City:
	Physiographic and Economic Causes for the Growth of
	CitiesJeremiah W. Jenks
	Town Planning
	The Effect of Taxation upon Distribution of Popula-
	tionLawson Purdy
6.6	19.—The Grandeur of the Canadian Alps, or Mountaineer-
	ing in a New Switzerland
6.6	26.—The Applicability of Color Photography by the
	Lumière Process to Scientific Work
April	2.—The Propagation and Domestication of American
4.6	Game Birds
	9.—Queer Methods of Transportation P. Austin 12.—Kilauea in Action—A Visit to Hawaii's Famous Vol-
November	cano
4.6	19.—Florida Bird Life
Desember	3.—Tahiti and the Society Islands
December	
	Io.—Some Native Trees, Their Flowers and Fruits Nathaniel L. Britton
"	
	17.—Whale Hunting with a CameraRoy C. Andrews

SPECIAL LECTURES TO MEMBERS

A series of informal talks to Members, in regard to the methods of collecting, preserving and preparing material and specimens, was given by members of the scientific staff, in the spring, as follows:

```
February 24.—The Habitat Groups of Birds.......Frank M. Chapman

2.—Methods in Making Artificial Flowers and Leaves....

J. D. Figgins

9.—Collections Illustrating the Indians of the Plains.....

Agnes L. Roesler

16.—The Local Mammal Collection—Wild Animals Found

About New York.......R, C. Andrews

23.—Animal Sculpture—How Animals are Mounted......

James L. Clark

30.—The Jesup Collection of North American Forestry—

Our Native Trees........R, W, Miner
```

PUBLIC LECTURES ON HOLIDAYS

New Year's Day, January 1.—An Ornithologist's Travels in the West,

Frank M. Chapman

Washington's Birthday, February 22.-Mines, Quarries and "Steel Construction".....Louis P. Gratacap

Thanksgiving Day, November 26.-Mt. Pelé, Martinique, in 1902, 1903 and 1908......Edmund Otis Hovey

Christmas Day, December 25.—Whale Hunting with a Camera,

Roy C. Andrews

LECTURES FOR CHILDREN

The lectures for pupils of the public schools and for the children of Members were continued during the spring as follows:

March	9	and	30.—	New York City in Colonial Days
4.4	11	4.4	April	I.—The Work of Water E. O. Hovey
4.4	_	"	4.4	3.—The Industries of the United StatesR. W. Miner
4.4	16	4.4	6.6	6.—Life Among Our IndiansG. H. Pepper
6.6	18	6.6	4.4	8.—Egypt and Her NeighborsWalter Granger
6.6	20	4 4	4.4	24.—Methods of Transportation, Past and Present,
				H. I. Smith
4.6	23	6.6	6.6	27.—Scenes in the British IslesR. W. Miner
4.4	25	4.6	4.4	29.—Life in Our Western StatesBarnum Brown
* *	27		May	1.—The Japanese and How They Live. R. C. Andrews*

A fall course was given as follows:

October 26 and November 16.—New York City—Past and Present,

				•
				R. W. Miner
6.6	28	6 6	4.6	18.—Commercial Centers of Europe. E. O. Hovey
6.6	30	4.4	6.6	20.—Scenes from Pole to PoleR. C. Andrews
Novemb	er 2	6.6	6.6	23.—Our South American Neighbors,
				Walter Granger
4.4	4	6.6	December	2.—Hiawatha's People
4.4	6	6 6		4.—Industries of the United States.R. W. Miner
4.4	9	4.6	4.6	7.—Among the FilipinosR. C. Andrews
4.6	II	4.4	4.4	9.—Physical Geography from Pictures,
				E. O. Hovey
6.6	13	6.6	4 4	11.—Home Life of American Birds,
				F. M. Chapman

^{*}On May I, owing to the absence of Mr. Andrews, this lecture was delivered by Mr. Harlan I. Smith.

†On December II, owing to the absence of Mr. Chapman, this lecture

was delivered by Mrs. Agnes L. Roesler.

COLUMBIA UNIVERSITY LECTURES

In coöperation with the Museum

A series of lectures on Light was arranged by Columbia University and delivered as follows (Dr. Richard C. Maclaurin, lecturer):

- November 18.— I. Object of Course. Newton's Experiments and Contributions to Optical Theory.
 - " 25.— II. Colour Vision and Colour Photography.
- December 2.—III. Dispersion and Absorption of Light. Recent Theories.
 - " 9.—IV. Spectroscopy. Applications to chemistry and astronomy.
 - 16.— V. Polarisation, with some applications to chemistry and molecular physics.

Course continued in January and February, 1909.

BOARD OF EDUCATION LECTURES

In cooperation with the Museum

Tuesday evenings

January	7.—The Picturesque RhineFrancis L. Strickland
4.6	14.—Historic Castles, Chateaux and Cathedrals of France,
	Mrs. Helen Rhodes
4.6	21.—SpainJohn C. Bowker
6.4	28.—Isles of Fantasy (the Azores, Madeira and the Canaries),
	John C. Bowker
February	4.—France. Her History Written in StoneLouis F. Berry
6.6	11.—The Highlands and Islands of ScotlandClinton G. Abbott
4.4	18.—The Homes of the PoetsSutton Fletcher
6.6	25.—Fighting the Polar Ice (the Story of the Ziegler Polar Expedi-
	tion of 1903, 1904, 1905, by its Commander),
	Anthony Fiala
March	3.—Our Own City (Modern New York,—Its growth, commercial
	interests, social and civic life, and future expansion),
	John B. Creighton
4.4	10.—Density and Distribution of Nationalities. (Addresses
	arranged in cooperation with the Conference on the
	Problems of Congestion of Population.)
	The Housing ProblemRobert W. de Forest
	Moral Standards and Family Life in Tenements. Felix Adler
	Ellis Island, the Door to the United States. Robert Watchorn
	The School as a Social Center
4.4	17.—Literary and Historic Shrines of Boston and Vicinity,
	Isaac F. Smith
4.4	24.—The Mississippi Valley and the Southern StatesS. T. Willis

31.—Through the Canadian Rockies......John Jay Lewis

April	7.—Down the St. Lawrence from Niagara to the Sea,
"	Edward Justus Parker
4.6	14.—Oklahoma, the Land of NowElias W. Thompson 21.—Wonderful Washington and Its Metropolis, Seattle,
	Alfred W. Martin
6.6	28.—Hunting Wolves on Snow ShoesJames A. Cruikshank
October	6.—The Songs and Basketry of the North American Indians,
October	Mr. and Mrs. William B. Humphrey
"	13.—The Historic HudsonKenneth Bruce
4.6	20.—Alaska of To-day
6.6	27.—The New South
November	
1.1	10.—The Texan and His State
4.6	17.—The City of Mexico
	A Course of Four Lectures on "The Twentieth Century
	South America," by Charles M. Pepper.
"	24.—Panama to Patagonia.
December	
6.6	8.—The Vastness of Brazil.
66	15.—Colombia and the Andes.
	Saturday Evenings
A	Course of Nine Lectures on "Electricity and Magnetism,"
	by Professor Ernest R. von Nardroff.
January	4.—Magnetism.
"	11.—Electricity at Rest.
4.6	18.—The Electric Current: Its Chemical Effects.
"	25.—The Electric Current: Its Heating Effects.
February	I.—The Electric Current: Its Magnetic Effects.
4.6	8.—The Electric Current: Its Inductive Effects.
4.4	15.—Cathode Rays and Roentgen Rays.
4.4	22.—Wireless Telegraphy.
**	29.—Radium.

A Course of Nine Non-Technical Lectures on "Achievements of Science and Modern Scholarship," to be delivered by Professors in the various departments of Columbia University.

March	7.—Geology	James Furman Kemp
4.6	14.—Physics	Ernest F. Nichols
4.6	21.—Biology	Edmund B. Wilson
6 6	28.—Zoölogy	
April	4.—Botany	
"		James Harvey Robinson
£ 4	18.—Sociology	Franklin Henry Giddings
4.4		Frederick J. E. Woodbridge
May	2.—Ethics	John Dewey

A Course of Six Lectures on "Chemical Elements and Compounds," by Professor Charles Baskerville.

October 3.—Hydrogen and Oxygen.

- " 10.—Carbon and Its Compounds.
- " 17.—Nitrogen and Its Compounds.
- " 24.—Sulphur and Its Compounds.
- " 31.—Phosphorous and Its Compounds.

November 7.—Sodium, Potassium, Calcium and Their Compounds.

A Course of Six Lectures on "The Metallurgy of Iron and Steel," by Professor Bradley Stoughton.

- " 14.—The Metallurgy of Iron and Steel.
- " 21.-The Making of Iron.
- " 28.-The Making of Steel.

December 5.—The Uses of Iron and Steel in Machine Shops and Bridges and Other Great Engineering Structures.

- ' 12.—The Rolling and Forging of Iron and Steel.
- " 19.—The Heat Treatment of Steel.

HOSPITALITY TO SCIENTIFIC SOCIETIES

The Museum is yearly becoming more generally recognized as a center for the gathering of the various scientific societies of the city and country, and its lecture halls and conference rooms have been in almost continuous demand.

In the spring, the halls on the ground floor of the west wing were used for an exhibition prepared under the direction of the Committee on the Congestion of Population in New York City.

The Members of the Fourth International Fishery Congress were the guests of the Museum on September 28, and the foreign delegates were most emphatic in their praise of the work which this institution is doing.

In November, the two halls on the ground floor, east, were placed at the disposal of the New York Horticultural Society for its first annual flower exhibition. Various species of roses, chrysanthemums, pinks and orchids were shown and the exhibition proved most popular and attractive.

By far the most important of these special exhibits was that of the "International Tuberculosis Congress," given under the joint auspices of the Committee on the Prevention of Tuberculosis of the Charity Organization Society and the Board of Health of the City of New York. This exhibition,

originally given in Washington, D. C., occupied five of our large halls, and was a most complete exposition of the methods of checking the great white plague. The opening exercises were held November 30, at which the Mayor, Commissioner Darlington and others spoke, and from that time till January 17, 1909, the exhibit was open to the public. The widespread interest in this exhibit was phenomenal. The total attendance for the seven weeks was 753,954, and the largest attendance in any one day was 63,256.

It speaks well for the efficiency of the staff of the Museum that these enormous crowds were handled without a single case of disorder. During the last two weeks of the exhibition, by special arrangement with the Superintendent of Schools, pupils of the high schools to the number of 40,000 were brought to the Museum and every effort was made to render their visit profitable.

The following societies and organizations were guests of the Museum in 1908:

American Bison Society

American Ethnological Society

American Institute of Mining Engineers

American Nature Study Society, New York City Section

American Psychological Association, New York Branch

Audubon Society of the State of New York

Charity Organization Society

Committee on Congestion of Population in New York City

Concilium Bibliographicum

Eastern Art Teachers Association

Fourth International Fishery Congress

Horticultural Society of New York

Linnæan Society of New York

National Association of Audubon Societies for the Protection of Wild Birds and Animals

Natural Science Committee of the Associate Alumnæ of the Normal College

New York Academy of Sciences

New York Entomological Society

New York Microscopical Society

New York Mineralogical Club

Playground Association of America

School Garden Association of New York

Torrey Botanical Club

West Side Natural History Society

THE INTERNATIONAL TUBERCULOSIS EXHIBITION. Held at the Museum November 30, 1908, to January 17, 1909 Total attendance, 753,954

II. COLLECTIONS, EXPLORATIONS AND EXHIBITIONS

EXPLORATIONS.—It is through expeditions and field agents that many of the most important additions are made to the collections. It is obvious, therefore, that it is our duty to maintain field parties although this involves a heavy draft on our resources. Fortunately there are a number of friends who have volunteered to assist the Museum in this way. During the past year the Museum has had representatives in the following localities:

In United States

ALASKA	Idaho	North Dakota
Colorado	MONTANA	TEXAS
FLORIDA	Nebraska	WYOMING

In Foreign Countries

ALBERTA, CANADA	KERGUELEN ISLAND	SASKATCHEWAN, CANADA
ARCTIC AMERICA	KOREA	SOCIETY ISLANDS
BAHAMA ISLANDS	Labrador	SOLOMON ISLANDS
CHINA	NEW ZEALAND	SOUTH SHETLAND ISLANDS
HUDSON BAY	Nicaragua	VANCOUVER, B. C.
India	PHILIPPINE ISLANDS	FRENCH WEST INDIES

MINERALS

Department of Mineralogy.—The extent of the Bement Collection of Minerals, presented by Mr. J. Pierpont Morgan a few years ago, is so great that the acquisition of other large collections has become unnecessary because of the consequent duplication of material already on hand. In order, however, to maintain the high standard of excellence established by this collection, it is necessary to purchase from time to time exceptional specimens of rare form and examples of new species. It is to this end that the income of the Bruce Fund is applied, and through its aid 95 separate species and varieties have been added to the cabinet during the past year. A larger endowment of this department is needed.

Two gifts deserve special mention: an unusual specimen of Polybasite from Arizpe, Sonora, Mexico, the locality well known for its silver ores, which was presented by the President and Directors of the Minas Pedrazzini Mining Company;

and, from the same locality, but constituting an independent donation, admirable examples of Argentite and Stephanite, presented by Mr. Edward L. Dufourcq.

The cataloguing of the Bement collection has been pushed forward as rapidly as the routine work would permit. To date, more than 13,000 cards have been written. The catalogue is frequently consulted by visiting mineralogists.

MAMMALS AND BIRDS

Department of Mammalogy and Ornithology.—The study collections of mammals and birds have been enriched and remain in safe condition readily accessible for use. The mammals are thoroughly catalogued and considerable progress has been made with the new systematic catalogue. The registration of the birds added in recent years to the study collection has advanced, and in the exhibition hall a number of new habitat groups has been installed.

Mr. Chapman visited southern Florida early in the year for further material for bird groups, and secured, in addition to material for important groups, a fine series of moving pictures of the Brown Pelican and other birds.

Mr. Roy C. Andrews spent several months at Vancouver Island and on the coast of Alaska collecting cetacean material, and had excellent opportunities for studying fresh examples of several species of whales, of which he took thousands of measurements and many photographs. He also was successful in obtaining photographs of the animals in life.

Dr. Rudolph M. Anderson left early in April for a long period of exploration in the Mackenzie basin and along the Arctic coast. The first instalment of his collection of mammals and birds has already reached the Museum.

Mr. William B. Richardson has continued his explorations in Nicaragua, and has sent to us during the year several large collections of both mammals and birds.

The acquisitions during the year include 1,034 mammals and 1,626 birds.

Mrs. Morris K. Jesup has been the principal benefactor of this department during the year. She has defrayed the entire cost of the Museum's expeditions to British Columbia, to the Arctic, to Nicaragua and to Nebraska. Among her gifts should be mentioned a fine specimen of sea otter, a condor, skeletons of the gorilla and elephant, two examples of the rare *Solenodon* and two collections of mammals.

Other donations to be noted are an antelope and a rare Bush Pig, both mounted, and a skin of a Grant Zebra, all from British East Africa, presented by Mrs. Armar D. Saunderson; a collection of 41 small mammals from California, presented by Dr. Joseph Grinnell; 50 small mammals from Nebraska, presented by Captain M. L. Crimmins, U. S. A., and 59 small mammals from Kashmir, northern India, presented by Colonel A. E. Ward. This department has also received many valuable specimens in the flesh from the New York Zoölogical Society and the Central Park Menagerie. About 200 North American mammals have been added by exchange.

In the present connection special mention should be made of the group of Paradise Birds recently placed on exhibition, numbering 46 species and 75 specimens, the gift of Mrs. Frank K. Sturgis.

The papers contributed by this department to the *Bulletin* during the past year are 11 in number, aggregating 274 pages, illustrated with 16 plates (one colored) and 72 text figures.

The Museum publications edited by the Curator consist of one part of the *Memoirs* (Part IV of Vol. IX), and Volume XXIV and Part 1 of Volume XXV of the *Bulletin*.

LIVING REPTILES AND FISHES

The reptiles and fishes of recent time have been placed temporarily in the care of the Department of Invertebrate Zoölogy and the installation of the exhibition collections in the corridor of the north wing has been continued under the direct supervision of the Assistant Curator, Mr. Roy W. Miner. Much attention has been given to the labeling of the specimens which has been developed along two lines:

- 1. A series of popular, individual labels adapted to the requirements of the general public.
 - 2. A series of group labels adapted to students.

Mr. Miner participated in the Fourth International Fishery Congress held in Washington in September, and he was awarded a prize for his paper on the Exhibition of Fishes.

The principal additions to the collections have been the casts, models and mounted skins (more than forty in number) prepared by Mr. G. Dwight Franklin. The excellence of Mr. Franklin's work is attested by the fact that he was awarded the prize offered by the Fourth International Fishery Congress for the best method of preparing fishes for exhibition.

We especially wish to acknowledge the many courtesies extended by the New York Aquarium.

EXTINCT MAMMALS, BIRDS, REPTILES AND FISHES

DEPARTMENT OF VERTEBRATE PALEONTOLOGY.—Several changes have been made in the exhibition series, the most important being the complete rearrangement of the exhibits illustrating the Evolution of the Horse. The Museum now possesses not only the earliest known example of the horse, but the most extensive and complete series of specimens illustrating its evolution; indeed, its collections are larger than the combined collections of all other institutions in the world.

The collections are arranged in two sections, viz.: Evolution of the Horse in Nature, and the Evolution of the Horse under Domestication.

Three mounted skeletons have been added to the first section during the year, the four-toed *Orohippus*, the three-toed *Mesohippus bairdi* and *Mesohippus intermedius*.

The second section contains skeletons of the horse and man, Arab Stallion, Draught Horse, and the Shetland Pony, to which has been added the skeleton of the famous race-horse "Sysonby" presented to the Museum by Mr. James R. Keene and prepared at his expense.

A notable event was the departmental reception and tea given on the afternoon of November 12, to which Mr. Keene and other prominent horse lovers were invited to see the first exhibition of "Sysonby."

Several additions have been made to the exhibition series in the Dinosaur Hall. The Duck-billed Dinosaur or

SKELETON OF THE RACE-HORSE "Sysonby," Presented by James R. Keene. Prepared and mounted by S. H. Chubb

Trachodon mount, with two skeletons and with base designed to illustrate the environment, has been finished. This splendid group and the Allosaurus mount mark a step forward in methods of exhibiting fossil vertebrates and add greatly to the realistic effect and teaching quality of the fossil skeletons.

Progress has been made in the installation of the Permian fossils, which will represent a third great division in the history of the earth, the age of Amphibians, no less distinct and remarkable in the character of its life and environment than the age of Reptiles or the age of Mammals.

Two unusually rare and valuable acquisitions have been received as the gift of Mrs. Morris K. Jesup. One is a specimen of the "fish lizard," *Ichthyosaurus*, from the quarries of Holzmaden, Germany, which shows the character of the entire integument, and a specimen of the toothed bird, *Hesperornis*, found in the Cretaceous of western Kansas.

Other important additions have been received through field parties.

Four expeditions were sent out during the year, all of which, with the exception of the Alaskan expedition, were maintained by the contributions of Mrs. Morris K. Jesup.

Mr. Barnum Brown conducted an expedition to central Montana to search for dinosaur remains. Several important beds of fossils were located and a number of valuable specimens secured, among which a fine skull and skeleton of the *Tyrannosaurus* and a skull of *Triceratops* are of special mention.

Dr. W. D. Matthew and Mr. Albert Thomson visited the Lower Miocene beds in Sioux County, Nebraska, with satisfactory results. The material obtained included six articulated skeletons of *Stenomylus*, several skeletons of *Merycochærus*, various skulls and parts of skeletons of horses, camels, rhinoceroses, oreodonts and deer.

The discovery in 1907 of mammoth remains in Alaska by Mr. L. S. Quackenbush made it desirable to send him again to this locality and the work was continued through the generosity of Mr. J. P. Morgan, Jr., and Mr. Percy R. Pyne, who defrayed the cost of this expedition. Mr. Quackenbush brought back additional parts of the mammoth specimen discovered in 1907, including the lower jaw, tusks and various bones of

the skeleton, much hair, skin and dried flesh; also parts of skeletons of bison, moose, caribou and horse.

The fourth expedition was to the Permian beds of Texas, in charge of Dr. E. C. Case of the University of Michigan. A fine skull of *Diadectes* and several skulls and parts of skeletons of primitive reptiles and amphibians were secured.

Research work has been carried on by the members of the staff, as circumstances permitted, and the papers published will be found listed under the report on publications.

EXTINCT FISHES

The efforts of the Curator, Dr. Bashford Dean, have been devoted chiefly to improvements in the exhibition hall. The material has been relabeled and several restorations have been prepared and placed on view. Among these are pictures of the fishes of Ohio during the Devonian Age, prepared by a Japanese artist after reconstructions by Dr. Dean.

The arrangement and classification of the study collections have been continued and considerable work has been done on a bibliography of fishes. Various fishes have been purchased with funds provided by Mr. Cleveland H. Dodge, and about forty specimens from the Old Red Sandstone of Scotland were secured through exchange with the Royal Scottish Museum of Edinburgh.

LIVING INVERTEBRATES—SYNOPTIC COLLECTION

DEPARTMENT OF INVERTEBRATE ZOÖLOGY.—It was with keen regret that we announced the resignation of Dr. William Morton Wheeler, who, as Curator of this department for the past six years, rendered most efficient service in its organization and development. Because of the character of his researches and his standing as an investigator, his departure will remain a distinct loss to the Museum and to those associated in scientific work in this neighborhood. While Dr. Wheeler has been appointed to the professorship of Economic Entomology in Harvard University, we are glad to announce that he will continue to be identified with the work of the Museum, having honorary curatorship over one of the divisions of insects.

The Museum is fortunate in having secured Dr. Henry E. Crampton to take charge of the department. Dr. Crampton is a graduate of Columbia University and for several years has held the Chair of Zoölogy at Barnard College. He has had wide experience as a teacher; he is familiar with museum methods, and is well known as an investigator and writer. He assumed his duties January 1, 1909.

The scientific staff of the department has been further strengthened by the following appointments: Dr. Frank E. Lutz, a research assistant in the Carnegie Institution at Cold Spring Harbor, Long Island, as an Assistant Curator; Dr. Alexander Petrunkevitch as Honorary Curator of Arachnida, and Dr. Aaron L. Treadwell as Honorary Curator of Annulata.

During the interim the affairs of the department were in charge of Mr. Roy W. Miner, the Assistant Curator, who discharged his manifold duties most efficiently.

The attention of the staff has been largely devoted to the exhibition collections. The installation has been designed to present a bird's-eye view of the animal kingdom and to emphasize the relationship existing between the groups. Many of the animals are so small that it is practically impossible to demonstrate their structure by preserved specimens, but by making carefully prepared enlarged models it is possible to give the visitor an accurate idea of their structure and of their relations to one another and to man.

The principal additions to the exhibition series have been the models prepared by Dr. B. E. Dahlgren and his assistants. These include models of the anatomy of certain parasites; the anatomy of the common lobster, and a series of models showing the development of the egg in the Ascidians.

The offices of the department and many of the study collections have been transferred to the rooms on the fifth floor of the new west wing.

In the spring, Dr. Dahlgren and Mr. H. Mueller visited the Bahama Islands in search of material intended for use in the reproduction of a coral reef. They made extensive studies of several reefs and secured a large number of choice specimens, including an exceptionally fine example of a madrepore coral which measures ten feet in length and weighs nearly two tons.

The Curator, Dr. Wheeler, spent the month of July in the Casco Bay region of Maine, where he continued his studies of the Formicidæ. His results are published in the *Bulletin*.

A third expedition was sent to Colorado under Mr. Gneomar von Krockow to collect fossil insects and leaves. While circumstances prevented him from carrying out the original plans, his industry resulted in the addition to the Museum's collections of fifty reptiles, amphibia and fishes, 250 vials of insects, and other invertebrates.

Professor Filippo Silvestri, of Portici, Italy, spent several weeks of study at the Museum and later collected in New York and in certain of the western states. The Museum is to receive a duplicate set of the specimens he secured.

In spite of the demands of routine work, the Curator and his staff have continued their researches, and during the year 18 papers have been published.

MOLLUSCAN SHELLS

DEPARTMENT OF CONCHOLOGY.—The only notable accession to the conchological collection was an interesting series of shells from the Philippine Islands, obtained through exchange with the Frankfort Museum of Germany. The collection numbers 4,330 specimens, representing 477 species and varieties carefully identified and comprising many cotypes.

INSECTS

DEPARTMENT OF ENTOMOLOGY.—The larger portion of the Curator's time has been devoted to selecting the unarranged material of North American Coleoptera, cleaning and remounting the same and providing the specimens with proper labels. About 9,000 specimens have been treated in this manner. The collections have been poisoned and freed from museum pests.

Among the important accessions should be mentioned a collection of ants presented by Dr. William Morton Wheeler, one of the three largest collections of Formicidæ in existence. It contains many types and cotypes and nearly every species is represented by long series of specimens—in fact, the collection represents such a large portion of the family Formicidæ that all future additions can be readily intercalated.

Five articles written by the Curator have been published or are in press, and several are in process of preparation.

EXTINCT INVERTEBRATES

DEPARTMENT OF GEOLOGY AND INVERTEBRATE PALÆONTOLOGY.—The laborious task of cataloguing and labeling the many specimens in this department has been constantly pushed forward by the Curator. More than 400 new labels have been typewritten, about 100 of which bear citations.

Visiting scientists have made frequent use of the collections during the year, among whom may be mentioned Mr. J. E. Hyde of the Ohio Geological Survey, Dr. R. Ruedemann and Mr. Kirk of the New York State Museum, Miss Elvira Wood of Columbia University, Dr. William S. Prouty of the Maryland Geological Survey and Professor W. A. Parks of Toronto University.

Under the direction of the Associate Curator, Dr. Edmund Otis Hovey, the whole catalogue of the geological collections has been standardized, and all the specimens received during the year have been accessioned. Among the acquisitions particular mention may be made of a series of graphite in its crude and manufactured form, the gift of the Dixon Crucible Company. By exchange we have received a beautifully polished and etched section of the Gibeon iron meteorite and samples illustrating the mill work done on the copper ores at Butte, Montana.

In April, Dr. Hovey, accompanied by his wife as volunteer assistant, again visited the Lesser Antilles to continue his comparative studies of the volcanoes of this region. Besides the scientific data bearing on the geological formation of the country, Dr. Hovey secured a large number of important photographs and many specimens of volcanic material.

Much of the Associate Curator's time has been occupied with the editorship of the *Museum Journal*, of which eight numbers have been issued, including 130 pages, 42 half-tones and 1 colored plate.

LIVING AND EXTINCT RACES OF MEN

DEPARTMENT OF ANTHROPOLOGY.—Progress has been made in the revision of the collections for public exhibition. The

general plan of development contemplates a brief type exhibit for each of the ten main culture areas in North America. As these exhibits are designed primarily for the general visitor, the subject is not treated exhaustively. A beginning in this method of installation was made last year in the Eskimo exhibit and in that of the Indians of the Plains. To the latter has been added this year a section on food and hunting.

In the Eskimo Hall, three of the mural paintings, provided through the generosity of Mr. Arthur Curtiss James and executed by Mr. Frederick W. Stokes, have been completed and put in place. The introduction of these paintings marks a new departure in the treatment of the Museum's exhibition halls and is in the nature of an experiment.

The installation of the North American culture type exhibit for the Indians of California has been completed and the arrangement of the California basketry is nearly finished.

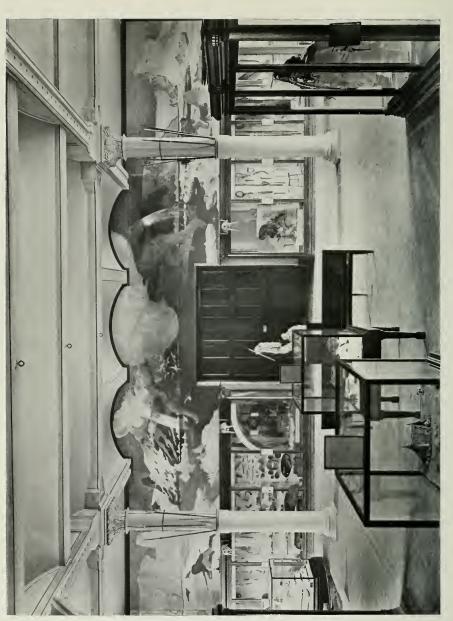

Several collections from the Northwest Coast have been transferred to the Hall of North American Archæology, where they more properly belong. The final plan of this hall is to present in as concise a form as possible the general archæology of North America with the exception of Mexico and the Southwest.

The cataloguing and classifying of the four large ethnological collections from the Congo, which have been presented to the Museum by His Majesty King Leopold of Belgium, have been completed and a general plan for the installation of this rich material has been formulated.

In connection with the coming Hudson-Fulton Celebration, a special exhibit illustrating local archæology and the culture of the Indians formerly living in Manhattan and vicinity is being prepared. This work is being done by Mr. Alanson Skinner under the supervision of Dr. Wissler.

The proper accessioning and cataloguing of the quantity of material in this department is no small task, but this important work has been pushed forward as rapidly as circumstances permitted. The card catalogue is now practically complete for the Philippine Islands, the Islands of the Pacific Ocean, and for North American ethnology. In this part of the catalogue there are about forty thousand cards.

MURAL DECORATIONS IN THE HALL OF NORTH AMERICAN ETHNOLOGY. Executed by Frederick W. Stokes Gift of Arthur Curtiss James

The handling and arrangement of the study and storage collections have been greatly facilitated by the completion of the storage rooms in the attic of the new west wing. These rooms, especially designed for this purpose, are insect, dust and fire-proof, can be fumigated whenever desirable, and render the material very accessible for inspection and study.

There have been several large and important collections received as gifts during the year. Of special mention are a collection from the Fiji Islands, containing over two thousand specimens, and a collection from the Andaman Islands, which includes a fine example of the "Ghost House" and various specimens of basketry, pottery and weapons. Both of these accessions are the gift of Mrs. Morris K. Jesup.

Mr. Henry Booth presented about five thousand specimens, representing the archæology of Dutchess County, New York. Another important gift was a collection of the casts of hard palates, presented by Dr. Walter Channing, which has provided the data for a paper on the subject written by Doctors Channing and Wissler.

Six expeditions have been sent into the field in the interest of this department, all of which have been maintained through the generous contributions of Mrs. Morris K. Jesup.

In April, Mr. V. Stefánsson, accompanied by Dr. R. M. Anderson, left for the Arctic, via the Mackenzie River, for ethnological work along the shores of the Beaufort Sea and among the islands east of the mouth of the Mackenzie. They plan to be in the field for two or three years.

Mr. Harlan I. Smith again visited eastern and northern Wyoming to continue his archæological survey in this region. He discovered a large prehistoric quarry and secured important data relative to the prehistoric races.

The third expedition was to James Bay and western Labrador, under Mr. Alanson Skinner. It is our first expedition into this field, and Mr. Skinner found a type of culture most interesting to the American student.

Another region not heretofore investigated, and not previously represented in our collections, is the great Athapascan area in the far northwest of Canada. Dr. R. H. Lowie entered this field and obtained very satisfactory results. He secured data regarding the mythology and prehistoric culture of the Chippewyan Indians. He also continued his studies of the Assiniboine Indians at Fort Belknap, Montana.

H. J. Spinden spent the summer among the Nez Percé Indians (Idaho) where he made a very complete collection of myths and tales, together with notes upon their general culture. His excavations also yielded excellent collections.

Rev. Gilbert L. Wilson worked among the Hidatsa Indians in North Dakota. He secured a small but interesting collection showing primitive agricultural implements and household utensils.

In addition to the above, several volunteer workers have been looking after the interests of the Museum.

Honorable Mason Mitchell, U. S. Consul to Chung-king, China, has sent in a number of valuable ethnological specimens.

Dr. C. C. Vinton is operating in Korea; Captain George Comer in Hudson Bay; Mr. G. A. McTavish in Tahiti; Mr. T. E. Donne in New Zealand, and Dr. Hugh M. Smith secured a number of valuable specimens during his sojourn in the Philippines.

In spite of the heavy drafts for routine work made on the time of the departmental staff, the research work and publications have progressed satisfactorily. Five articles have been contributed to the *Anthropological Papers*, and several minor papers by members of the staff have appeared in other publications.

DEPARTMENT OF PHYSIOLOGY

We regret that continued ill health obliged Dr. C. W. F. Muenchehofe to retire from the department in June, and we gladly record our appreciation of the excellent work which he accomplished and of the faithful service that he rendered while a member of the staff.

Mr. Adolph Elwyn has been assigned to work in this department, and later in the year Mrs. Louise Stevens Bryant was engaged to assist in the osteological work.

During the year, 84 skeletons and 1,361 skulls have been cleaned and added to the study collection. Among these are skeletons of an elephant and a rhinoceros.

SOUTH SECTION OF WEST FACADE. Gallery showing fire-proof rooms for study and storage collections

A total of two hundred and five animals has been received, summarized as follows:

Central Park Menagerie	133
New York Zoölogical Society	31
New York Aquarium	10
Other sources	31
	205

In this connection we wish to acknowledge the many courtesies extended to the Museum by the Director and staff of the New York Zoölogical Park, of the New York Aquarium and of the Central Park Menagerie.

JESUP COLLECTION OF NORTH AMERICAN WOODS

The preparation of artificial sprays, showing flowers and fruits of the native trees in their natural size and colors, has been continued as material could be secured. Thirty-five specimens have been added to the exhibition series during the year. Recently Miss Mary C. Dickerson has been engaged as an assistant in this department and has done considerable work towards preparing guide leaflets for the hall. It is intended to still further improve the collection by the addition of photographs and transparencies.

LIBRARY

The charter given to the founders of the Museum provided for the establishing and maintaining of a Library of Natural History. Partly through a mutually advantageous arrangement with the New York Academy of Sciences, but chiefly through the assiduous efforts of the Curator in arranging exchanges and in making judicious purchases, the Museum now possesses a library of science which is second to none in this city and is among the leading scientific libraries of America. While the library has had this most encouraging growth, there are, of course, many rare and important works on natural science which the Museum has not yet been able to secure, and there is, perhaps, no branch of the Museum's

work in which additional appropriations are more urgently needed and where the expenditure of additional funds would yield larger returns for science than here.

The department has received during the year 1,870 volumes and 1,025 pamphlets, and has classified and catalogued 2,632 separata and 1,348 volumes. The subscription to the *Concilium Bibliographicum* has been continued, and 11,868 cards have been intercalated in the reference catalogue. A like number has been distributed to the series on deposit.

PUBLICATIONS

The sum expended by the Museum in 1908 for its publications, in addition to regular salaries, was \$20,103.23, an amount indicative of the extent of the researches of the Museum staff.

A full list of the scientific publications of the Museum issued in 1908, as received by the Curator for distribution, follows:

DEPARTMENT OF GEOLOGY AND INVERTEBRATE PALÆONTOLOGY Bulletin, Volume XXIV

R. P. Whitfield. "Notes and Observations on Carboniferous Fossils and Semifossil Shells, brought Home by Members of the Peary Expedition of 1905–1906." (Pages 51–59, plates i-iv.)

A KLAMATH LAKE BIRD COLONY. Background by Carlos Hittell. Birds by Herbert Lang

III. MEMBERSHIP

It is a most significant fact that the general financial stringency of the past year has not reduced the support that we have always received from our Members. New subscriptions have overcome any loss that was sustained and we are glad to record a gain in the income from membership fees.

In all, 166 new members were enrolled, giving a net gain of 24.

On December 31, 1908, the total membership was 2,148, divided into classes as follows: Patrons, 101; Fellows, 40; Honorary Fellow, 1; Life Members, 364; Annual Members, 1,642.

NEW MEMBERS

The following persons were elected Patrons:

HENRY BOOTH MASON MITCHELL

Dr. Walter Channing Dr. William M. Wheeler

The following persons were elected Fellows:

CHARLES H. SENFF MISS CAROLA WOERISHOFFER

Dr. Bashford Dean was elected an Honorary Fellow.

The following persons were elected Life Members:

MRS. EMMA B. AUCHINCLOSS
EDWIN SWIFT BALCH
GORDON KNOX BELL
MRS. TEMPLE BOWDOIN
COURTNEY BRANDRETH
WILLIAMSON BUCKMAN
ALFRED G. DALE
T. E. DONNE
EDWARD L. DUFOURCQ
DR. THEODORE DUNHAM
JAMES W. ELLSWORTH

HUGH HILL
JACOB LANGELOTH
MISS EMMA H. LOCKWOOD
MRS. V. EVERIT MACY
MRS. EMILY H. MOIR
HENRY A. MURRAY
MRS. WILLIAM CHURCH OSBORN
MRS. ARMAR D. SAUNDERSON
GEORGE SHIRAS, 3d
MISS CLARA B. SPENCE
CHARLES H. TOWNSEND

AMBROSE ELY VANDERPOEL

DECEASED TRUSTEES, BENEFACTORS AND MEMBERS

We regret to announce the death of the following Members during 1908:

Trustee
George G. Haven

Patron
Miss Matilda W. Bruce

 $\label{eq:Fellow} \textit{Mrs. George W. Collord}$

Life Members

RICHARD H. ALLEN
MISS MATILDA W. BRUCE
E. DWIGHT CHURCH
EDMUND W. DAVIS
BENJAMIN HART

CLARENCE M. HYDE JOSEPH LAROCQUE JAMES W. PINCHOT AUGUSTE RICHARD WILLIAM R. SANDS

IV. FINANCIAL ADMINISTRATION

As usual the financial transactions have been carried in three separate accounts. All receipts and expenditures pertaining to the maintenance of the Museum have been recorded in the City Maintenance Account; those relating to the development of the collections, in the General Account, and those for certain specified purposes, in the Special Funds Account. The details of the receipts and disbursements thus classified will be found in the Treasurer's Report, pages 49 to 57 inclusive. All books and vouchers of these accounts have been duly examined and certified by the Audit Company of New York. The following summary will show the general receipts and disbursements for the past eight years:

SUMMARY OF THE YEARLY EXPENDITURES FROM 1901 TO 1908

	Maintenance o	f Museum	by Explorati	of Collections ion, Purchase blication	
Year	Appropriations by City	Appropriations by Trustees	From Endow- ment, Mem- bership Dues	From Gifts of Special Funds	Totals
1901	\$130,000.00	\$17,733.75	\$56,077.52	\$43,811.50	\$247,622.77
1902	160,000.00		59,787.14	70,436.73	290,223.87
1903	160,000.00	7,368.54	61,140.24	28,089.54	256,598.32
1904	160,000.00	8,158.69	66,882.64	11,261.05	246,302.38
1905	160,000.00	19,506.41	54,378.82	16,709.56	250,594.79
1906	170,000.00	2,924.04	66,673.35	56,467.96	296,065.35
1907	160,000.00	26,828.52	63,951.44	58,035.62	308,815.58
1908	159,930.62	33,475.97	82,012.48	20,296.81	295,715.88

CITY MAINTENANCE ACCOUNT.—All bills chargeable to this account are first paid by the Museum out of its own funds, about once a month or as often as is practicable, then receipted bills are assembled and with proper vouchers are submitted, through the Department of Parks, to the City for reimbursement. In the course of three to six weeks the City reimburses the Museum for these expenditures. In order that the Museum might not be obliged to draw on its general funds to make these advances for the City, Mr. J. Pierpont Morgan gave to the Museum \$15,000 to serve as a capital in the City Maintenance Account. A statement of this account, therefore, must always show a balance of at least \$15,000.

The City appropriated \$160,000 for the maintenance of the Museum during 1908, but this sum was so apportioned by the City that only \$159,930.62 was available. This amount is smaller than the appropriation of six years ago and is quite insufficient to meet the present running expenses. During this period the growth of the Museum has continued without interruption, new exhibition and storage rooms have been added and the scope of the educational work has been constantly expanding.

Rather than curtail the work of the Museum, the Trustees authorized a deficit of \$33,000 in this account, which has been met by their contributions.

TRUSTEES GENERAL ACCOUNT.—The net receipts in this account were \$119,513.29, of which \$49,905 was received as interest on invested funds; \$1,800 from Life Members; \$16,025 from Annual Members; \$17,500 as personal subscriptions of Trustees, and \$29,405.40 being a part of the \$50,000 contributed by Mrs. Morris K. Jesup for the general purposes of the Museum. It was through this splendid gift of Mrs. Jesup, applied to the purchase of collections and the maintenance of field parties, that the Trustees were able to meet the deficiencies in the City Maintenance Account and close the books for the year without a deficit. It must not be forgotten that the purchase of new collections and the carrying on of the scientific work of the Museum must be met largely from this General Fund, as the money appropriated by the City cannot be used for such purposes.

TRUSTEES SPECIAL FUNDS ACCOUNT.—All of the moneys carried in this account have been contributed for specific purposes and each fund is carried on the books virtually as a special account.

It is through the generous contributions of friends to these funds that it is possible for the Museum to take up important lines of research and to procure valuable collections which cannot be obtained through the regular resources of the Museum. The importance of these special funds in the development of the institution is readily understood. The subscriptions to this account during the past year for the development of specific departments was \$28,050.64.

TRUSTEES PERMANENT ENDOWMENT.—All bequests and funds not otherwise designated are invested as a permanent endowment and the income alone is applied to the purposes of the Museum.

The payment of the \$1,000,000 bequest of Mr. Morris K. Jesup marks the largest contribution that has ever been made to the endowment; indeed, it practically doubles it. This money has been invested by the Finance Committee since December 31, 1908, so that at the present time the par value of the Permanent Endowment is \$2,162,750. It is the interest from these investments which constitutes the chief source

of income of the General Account. In the ultimate analysis, the growth of the collections and the extent of the Museum's researches and explorations are dependent largely on the amount of the permanent endowment. Even with the addition of Mr. Jesup's bequest the endowment is insufficient for the present needs, and a fund of at least \$5,000,000 is urgently needed if we are to maintain our present position among the museums of the world.

Very respectfully yours

HENRY FAIRFIELD OSBORN

President

May 1, 1909

LIST OF ACCESSIONS, 1908

DEPARTMENT OF PUBLIC INSTRUCTION

BY GIFT

AMERICAN BLACKSMITH COMPANY, Buffalo, N. Y.

14 Mounted Photographs of Congo material.

W. L. BEASLEY, New York City.

4 Negatives. Views in Museum.

F. C. T. BECK, New York City.

I Photograph. View of Virgo Bay, Spitzbergen.

GEORGE W. COLLORD, New York City.

2 Photographs. Bronze statues.

T. E. DONNE, Wellington, New Zealand.

29 Photographs of Maori Carvings and Types from New Zealand.

H. G. HERRING, London, England.

1 Photograph. Elephant in London Museum.

By Purchase

W. L. MUNRO, Providence, R. I.

I Photograph of Moose.

DEPARTMENT OF GEOLOGY AND INVERTEBRATE PALÆONTOLOGY

GEOLOGY

By GIFT

DR. B. E. DAHLGREN, New York City.

Limestone showing wind erosion, from the Bahama Islands.

JOSEPH DIXON CRUCIBLE COMPANY, Jersey City, N. J.

Graphite Ore in its crude and manufactured form.

CALIFORNIA STATE MIN'ING BUREAU (through Mr. Lewis E. Aubury), San Francisco, Calif.

40 Oils and oil sands from California.

R. H. EMTAGE, Barbados, W. I.

Manjak, country rock and crude oil, from St. Andrews Parish, Barbados.

MRS. GEORGE MAX ESTERLY, Nazina, Alaska.

32 Copper Nuggets from Chititu Creek, Copper River District, Alaska.

MRS. MORRIS K. JESUP, New York City.

Hornblende Schist intersected with Pyrite veins, Charlemont, Franklin County, Mass.

3 Ness County Meteorites.

DR. JOSEPH SIMMONS, New York City.

I Rock specimen from Victoria Falls, Zambesi River.

UNNAMED DONOR.

Specimens of Native Copper from Lake Superior and Azurite and Majachite from Arizona.

By EXCHANGE

DR. C. GOTTSCHE, Hamburg Museum, Hamburg, Germany.

r Polished and etched complete section of the Gibeon (Africa) Iron Meteorite and a model of the entire mass.

PROF. F. C. LINCOLN, Butte, Montana.

68 Samples of ores, concentrates and tailings, illustrating the mill work done upon copper ores at Butte; 15 specimens showing smelter work; 19 specimens illustrating the geology and mineralogy of the Butte district.

OTTO PFORDTE, Rutherford, N. J.

Collection of ores from Peru, comprising 47 specimens.

PROF. G. STEINMANN, Bonn, Germany.

Bombs and specimens of lava from Eifel, Germany, the largest bomb being an elliptical mass 2 feet long.

THROUGH MUSEUM EXPEDITION

Volcanic bombs, rock specimens and minerals from Martinique, St. Vincent, Grenada and Barbados, also about 645 photographs. Collected by Dr. E. O. Hovey. Provided for by Mrs. Morris K. Jesup.

By LOAN

LOUIS HEILPRIN, New York City.

Eight paintings of Mont Pelé, Martinique, made by the late Angelo Heilprin.

INVERTEBRATE PALÆONTOLOGY

BY GIFT

BARNUM BROWN, New York City.

18 Plants, Ft. Union Group; 7 Plants, Hell Creek beds, and 35 Plants, Laramie beds, Weston County, Wyoming.

PROF. BASHFORD DEAN, New York City.

I Micraster leski, from Dover, England.

DAVID HUNTER, Saugerties, N. Y.

2 Pygidia of Homalonotus vanuxemi, from Saugerties, N. Y.

W. PUGGS, Staten Island, N. Y.

Ammonite (internal cast). Dredged in the North Sea, Europe.

C. H. STERNBERG, Lawrence, Kan.

40 Lamellibranchs, 5 Ammonites, 4 Baculites, 21 Gastropods, from Laramie beds at Converse County, Wyoming.

MRS. ANNA W. STUBBLEFIELD, Cumberland, Md.

27 Bases of Edriocrinus sacculus, 4 Platyceras sp., Oriskany Sandstone; I Astylospongia inornata, 2 pygidia of Homalonotus vanuxemi, Lower Helderberg, Pendleton County, West Virginia; 2 Pseudocrinites perdeweyi, I Pseudocrinites gordoni, 2 Jackelocystites hartleyi, 2 Camarocrinus marylandica, Lower Helderberg at Keyser, Mineral County, West Virginia.

50 Small mammals.

DEPARTMENT OF PARKS, New York City.

I Hippopotamus, 2 Nihlgai, I Monkey, I Tapir, 2 Leopards, 2 Elks, I Grison, I Camel.—Total, II specimens received in the flesh from the Central Park Menagerie.

Dr. J. GRINNELL, Berkeley, Calif.

41 Small mammals.

A. HEINRICH, Baldwin, N. Y.

2 Brown Bats, I Red Bat.

J. HESDORFER, New York City.

I Virginia Deer.

SAMUEL HURWITZ, New York City.

2 Brown Bats.

MRS. MORRIS K. JESUP, New York City.

349 Specimens of mammals from Nicaragua.

196 Specimens of mammals from North West Territories.

9 Specimens of mammals from Saskatchewan, Canada.

GNEOMAR VON KROCKOW, New York City.

1 Brown Bat.

D. O. MILLS, New York City.

8 Seal skins for group.

MR. MORGANTHUER.

I Bison Head.

NEW YORK ZOÖLOGICAL SOCIETY, New York City.

I Binturong, I Squirrel, I Coatimondi, I Mountain Sheep, 2 Chimpanzees, I Eskimo Dog, I Chuddan Antelope, I Manatee, 2 Baboons, I Opossum, I Kinkajou, I Kangaroo, I Beaver, I Llama, I Antelope, I Deer, I Timber Wolf, I Humboldt Monkey, I Tasmanian Wolf, I Chamois, I Carpon Rat, 2 Porpoise skeletons, I Harbor Seal, I Mountain Goat, I Aoudad, I Anteater, I Buffalo.—Total, 30 specimens received in the flesh from the New York Zoölogical Park and the New York Aquarium.

COMMANDER R. E. PEARY, U. S. N.

1 Peary's Caribou (young).

R. D. PERRY, Victoria, B. C.

I Skin of Ornithorhynchus.

L. S. QUACKENBUSH, New York City.

I White Whale skull and small mammals from Alaska.

H. C. RAVEN, New York City.

I Common Dolphin skull.

JOHN ROWLEY, Palo Alto, Calif.

I Reithrodontomys skin.

MRS. ARMAR D. SAUNDERSON, Belturbet, County Cavan, Ireland.

I Bongo Antelope (mounted), I Bush Pig (mounted), I Grant's

ERNEST THOMPSON SETON, Cos Cob, Conn.

2 Richardson's Spermophiles, I Cross Fox.

Col. A. E. WARD, Kashmir, N. India.

Zebra skin.

59 Small mammals.

THOMAS H. WHEELER, Petallan, Mex.

1 Mexican Hairless Dog.

FRANK WOOD, New Bedford, Mass.

3 Arctic Spermophiles.

By Exchange

4 Small mammals from East Africa, 5 small mammals from Long Island, N. Y., 17 small mammals from Utah, 169 small mammals from Colorado, 4 Old World Bats.—Total, 199 specimens.

THROUGH MUSEUM EXPEDITIONS

38 Small mammals from North West Territories. Collected by Dr. R. M. Anderson. Provided for by Mrs. Morris K. Jesup.

18 Small mammals from Vancouver Island. Collected by Mr. R. C. Andrews. Provided for by Mrs. Morris K. Jesup.

BIRDS

By GIFT

CAPTAIN R. M. ANDERSON, New York City.

I Cardinal.

L. C. BULKLEY, M.D., Bangkok, Siam.

22 Siamese birds.

JAMES CHAPIN and W. DEW. MILLER, New York City. 13 Small birds.

G. E. B. COWAN, New York City.

1 Parrot.

DEPARTMENT OF PARKS, New York City.

18 Swans, I Duck, 3 Geese, 2 Storks, 2 Cranes, 8 Pheasants, I Turkey, I Partridge, I Turkey-Vulture, 5 Eagles, I Hawk, 3 Owls, 18 Parrots and Cockatoos, 4 Toucans, 3 Passerine birds.—Total, 71 specimens received in the flesh from the Central Park Menagerie.

J. D. FIGGINS, New York City.

5 Small birds.

G. C. FISHER, DeFuniak Springs, Fla.

1 Crow, 1 Yellow Palm Warbler.

G. D. FRANKLIN, New York City.

I Junco.

WINTHROP GARDINER, Gardiner's Island, N. Y. Pair of Hooded Mergansers (mounted).

A. O. HEINRICH, Baldwin, N. Y.

I Screech Owl, I Rose-breasted Grosbeak.

BRUCE HORSFALL, Redbank, N. J.

1 Sora Rail.

C. B. ISHAM, New York City.

1 Pine Warbler.

MRS. MORRIS K. JESUP, New York City.

140 Bird skins from Canada, and 835 from Nicaragua.

R. B. LAWRENCE, New York City.

I Wilson's Phalarope.

MISS A. C. MAXWELL, New York City.

1 Wilson's Phalarope.

NEW YORK ZOÖLOGICAL SOCIETY, New York City.

I Ostrich, I Screamer.

NORTH AMERICAN ORNITHOLOGICAL FUND.

24 Specimens, collected in Florida, by Mr. Frank M. Chapman, for Museum Bird Groups. H. V. RADFORD, North Creek, N. Y.

1 Blue Jay.

H. RAVEN, New York City.

1 Hermit Thrush, 1 Fox Sparrow.

Hon. THEODORE ROOSEVELT, Oyster Bay, N. Y.

I Pair of Canada Grouse, I Wood Duck, I Passenger Pigeon.

MRS. FRANK K. STURGIS, New York City.

75 Birds of Paradise, representing 46 species.

C. H. TOWNSEND, New York City.

63 Birds, mostly from western North America.

Col. A. E. WARD, Kashmir, N. India.

24 Birds from India.

BY EXCHANGE

223 Skins from Costa Rica; 62 skins from Japan; 2 Wrens from Venezuela; 3 skins from eastern United States.

BY MUSEUM EXPEDITIONS

50 Skins and several nests with eggs from Canada. Collected by Dr. R. M. Anderson. Provided for by Mrs. Morris K. Jesup.

24 Skins from British Columbia. Collected by Mr. R. C. Andrews. Provided for by Mrs. Morris K. Jesup.

THROUGH LOCAL COLLECTING

34 Skins from Long Island, N. Y.

DEPARTMENT OF VERTEBRATE PALÆONTOLOGY

By GIFT

C. FORSTER COOPER, Cambridge University, England.

Fossil Tortoise skull and remains of Dodo from the Island of Mauritius.

J. D. FIGGINS, New York City.

Parts of Mastodon teeth and other fossils from Tiger Bay, Florida.

MRS. MORRIS K. JESUP, New York City.

Collection of teeth and other fossils from the phosphate deposits of South Carolina; models of skull and jaws of Maritherium and Palaomastodon, skeleton of the Mountain Zebra; tooth of Mastodon americanus; skeleton of primitive amphibian from the Permian of Bohemia, and one fossil specimen purchased from W. S. Nehms.

BY EXCHANGE

MUSEO NACIONAL, Buenos Aires, Argentina.

Collection of specimens and casts of South American fossil mammals. ROYAL MUSEUM, Brussels, Belgium.

Cast of lower jaw of Hyracotherium maldani.

THROUGH MUSEUM EXPEDITIONS

MIOCENE OF NEBRASKA.

Skeletons of Stenomylus, Merycochærus and Merychippus; skulls of rhinoceroses, camels, horses, oreodonts and various other specimens of the Lower and Middle Miocene and the Lower Pliocene epochs. Collected by Messrs. Matthew, Thomson, Cook, Moodie and Stein. Provided for by Mrs. Morris K. Jesup.

PERMIAN OF TEXAS.

Skulls and parts of skeletons of *Diadectes, Pariotichus, Dimetrodon* and other primitive reptiles and amphibians of the Permian period. Collected by Dr. E. C. Case. Provided for by Mrs. Morris K. Jesup.

PLEISTOCENE OF ALASKA.

Collection of mammoth and other fossil remains from Eschscholtz Bay, Alaska, obtained by Mr. L. S. Quackenbush. Provided for by Messrs. Percy R. Pyne and J. P. Morgan, Jr.

UPPER CRETACEOUS OF MONTANA.

Skeleton of *Tyrannosaurus*, skull of *Triceratops* and other remains of dinosaurs of the Upper Cretaceous period. Collected by Messrs. Barnum Brown and P. C. Kaison. Provided for by Mrs. Morris K. Jesup.

DIVISION OF FOSSIL FISHES

By GIFT

CLEVELAND H. DODGE FUND.

- 12 Fossil fishes from the Devonian of Scotland, chiefly Asterolepis and Coccosteus, and I Psammosteus, from the collection of Mr. William Taylor of Lhanbryde, Scotland.
- 5 Fossil fishes from the Jurassic, Solnhofen, Germany.
- 12 Fossil fishes from the Devonian of Scotland and the Cretaceous of Mt. Lebanon, Syria.
- 18 Fossil fishes from the Devonian of Scotland, especially Dipterus, Osteolepis and Cephalaspis, from the collection of Mr. W. T. Kinnear of Forfar, Scotland.
- 200 Teeth of the extinct shark Carcharodon megalodon from the phosphate beds of South Carolina.
 - Small collection of Devonian fishes of Scotland, made by Mr. T. McAdam.
 - 2 Paintings representing extinct fishes of the Devonian period in America, executed by Mr. Kako Morita, under the direction of Professor Bashford Dean.

By Exchange

THE ROYAL SCOTTISH MUSEUM, Edinburgh, Scotland (through the courtesy of Dr. R. H. Traquair).

A collection of 48 specimens of fishes from the Old Red Sandstone of Scotland.

DEPARTMENT OF ANTHROPOLOGY

By GIFT

GEORGE ALBRO, South Kingston, R. I.

14 Stone arrow points from near Kingston, R. I.

Dr. S. T. ARMSTRONG, New York City.

5 Stone axes from Cuba.

BELGIAN GOVERNMENT.

Large ethnological collection from the Congo, Africa.

W. M. BLAKE, Brooklyn, N. Y.

23 Ethnological specimens from Africa.

HENRY BOOTH, Poughkeepsie, N. Y.

5,000 Archæological specimens from New York State.

GEORGE S. BOWDOIN, New York City.

Hawaiian feather cape.

BULL CHILD, Montana.

Blackfoot drum and Prairie Chicken from medicine bundle, Montana.

DR. WALTER CHANNING, Brookline, Mass.

1,834 Casts of palates.

JAMES CHAPIN, Seaford, Del.

8 Archæological specimens from Seaford, Del.

ALEXANDER C. CHENOWETH, New York City.

Human skull from Indian grave, Inwood, Manhattan Island.

J. R. CUSHIER, New York City.

11 Photographs, Peru and Bolivia.

T. E. DONNE, Wellington, N. Z.

I Skeleton and 2 skulls from Auckland, New Zealand.

Dr. J. J. EDWARDS, Wayne, Ind.

4 Pieces of pottery and 183 stone implements, Wayne, Ind.

ROBERT F. GILDER, Omaha, Neb.

Human bones from ancient mound near Omaha, Neb.

HARPER BROTHERS, New York City.

Lapland sled. Collected by Paul B. Du Chaillu.

ARCHER M. HUNTINGTON, New York City.

2 Carved ivory tusks from Benin, Africa.

DEPARTMENT OF MINERALOGY AND CONCHOLOGY

MINERALOGY

By GIFT

THE MATILDA W. BRUCE FUND.

95 Specimens of minerals, including Aerugite, Allagite, Ancylite, Anglesite, Apatite, Apophyllite, Azurite, Badenite, Barite, Batavite, Belonesite, Benitoite, Beryl, Bliabergite, Bobierite, Britholite, Brostenite, Caledonite, Carminite, Cassiterite, Cerussite, Chondrarsenite, Chrome-Ochre, Covellite, Cuprogoslarite, Cyprusite, Davreuxite, Daubréeite, Degeröspath, Derbylite, Embolite, Epsomite, Fluorite, Foresite, Friedlerite, Garnet, Hainite, Hydrocalcite, Hydrogiobertite, Hydromagnesite, Hydrorhodonite, Iodyrite, Jogynaite, Josephinite, Kamarezite, Karelinite, Kieserite, Kornerupine, Leucosphenite, Lodestone (pseudomorph?), Matricite, Misenite, Pelhamine, Persbergite, Phaestine, Picrotephroite, Pollucite, Quartz (enclosing sulphur), Ouartzine, Reichardite, Rhodochrosite, Schröckeringite, Semseyite, Silver, Sodalite, Sommairite, Spodiophyllite, Stibnite, Titan-Olivine, Topaz, Villarsite, Vivianite, Westanite, Willyamite, Yttriumapatite, Xanthiosite, Zinckenite.

N. CAROLIN, New York City.

Three sheets of colorless Mica (Muscovite) from Canada.

EDWARD L. DUFOURCO, New York City.

8 Specimens of Argentite (all crystallized and one very unusual); 2 specimens of Polybasite with wire Silver; 8 specimens of Stephanite (crystallized), from Las Chispas Mine, Arizpe, Sonora, Mexico.

I. A. GRERY, New York City.

A miscellaneous collection of mineral specimens containing Actinolite, Agate, Asphalt, Chalcopyrite, Copper, Galena, Gypsum, Limonite, Lodestone, Quartz, Serpentine. H. H. HINDSHAW, New York City.

Artificial furnace product from a "Salamander."

MRS. MORRIS K. JESUP, New York City.

II Specimens of minerals, including Algodonite, Askanite, Augelite, Awaruite, Gold, Molybdite, Platinum, Smithsonite, Tapiolite, Vanadinite.

5 Photographs of mineral localities.

MAX J. KUELMEL, New York City.

Gypsum concretion around metallic iron, from Louderville, N. Y.

H. LANG, New York City.

Split pebble of Agate from British East Africa.

WILLIAM POOLE LOSS, Greenwater, Colo.

I Specimen of Colemanite.

2 Specimens of Pandermite (Colemanite) from Death Valley, Inyo Co., Calif.

HENRY SWANN MANNING, New York City.

I Specimen of Calamine (large and crystallized) from Ogdensburg, N. J.

J. S. MERRIAM, New York City.

Specimens of Agatized Wood from Chalcedony Park, Apache Co., Ariz., (one large handsome section).

REV. G. S. NICHOLAS, New York City.

Actinolite Schist from West 60th Street, New York City.

ALEXANDER OUTIAKOFF, Ekaterinburg, Russia.

Plate of Iridosmium from near Miass, Ural Mts., Russia.

PRESIDENT AND DIRECTORS OF THE MINAS PEDRAZZINI COMPANY (through Edward L. Dufourcq, E. M.).

A unique specimen of crystallized Polybasite from Las Chispas Mine, Arizpe, Sonora, Mexico.

OUINCY MINING COMPANY, New York City.

I Flat crystallized plate of Native Copper and I chip (pneumatic), from Upper Peninsula, Mich.

GEORGE D. SNYDER, New York City.

Corundum fragments and crystals from Waynesville, N. C.

UNITED STATES GRAPHITE COMPANY, Saginaw, Mich. (through Mr. Joseph S. Peters, New York City).

Large block of foliated Graphite from Santa Maria Mine, State of Sonora, Mexico.

PROF. T. L. WALKER, University of Toronto, Canada.

I Specimen of Tungstite, Salmo, B. C.

I Specimen of Wolframite, Salmo, B. C.

JULIUS WODISKA, New York City (through Mr. A. S. Williams).

I Bloodstone (intaglio).

3 Gray Tiger-eye Cameos.

5 Initial and Emblem Onyxes.

7 Sard Intaglios and Cameos.

2 Cut Topazes.

By Exchange

ROBERT B. GAGE, New Jersey State Survey.

2 Specimens of Breithauptite, Silver, and Smaltite; specimens of Cobaltite crystals, and I specimen of Freibergite, from Cobalt, Ontario, Canada.

H. C. JENKINS, New York City.

I Specimen each of Chabazite, Laumontite (superior), and Natrolite, from Great Notch and Weehawken, N. J.

CHARLES H. JONES, New York City.

r Specimen of the very rare pyramidal Calcite from Kelly's Island, Erie Co., Ohio.

G. O. SIMMONS, Brooklyn, N. Y.

I Specimen of Benitoite, Benito Co., Calif.

I Specimen of Corundum ("crystallized ruby") from Franklin Furnace, N. J.

By Purchase

Small entire mass of Aerolite (broken from larger mass in fall) from the Ness County, Kansas, aerolite. Weight, 8 oz.

CONCHOLOGY

By GIFT

FRANCISCO E. BLANES, Cardenas, Cuba.

540 Specimens, comprising 47 species and 5 varieties, from Cuba, and representing marine bivalves and univalves and land shells.

DEPARTMENT OF INVERTEBRATE ZOÖLOGY, American Museum of Natural History.

A small collection of Bivalves and Univalves (alcoholic) from the Island of Formosa,

A. DA COSTA GOMEZ, Brooklyn, N. Y.

Large mass of *Vermetus varians* d'Orb, from Clear Water Bay, Dunedin, Fla.

CHARLES DAYTON GWYER, Brooklyn, N. Y.

I Specimen of Fossarina petterdi Brug., from Tasmania.

A. E. HEIGHWAY, New York City (through the United States National Museum, Washington, D. C.).

64 Specimens of Shells from Pinar del Rio, Cuba, comprising 4 species Helicina, I Chondropoma, I Megalomastoma, 2 Liguus, 2 Cepolis, I Pleurodonte.

FELIX H. HUNICKE, New York City.

A varied assortment of Shells from the West Indies; Bivalves (arca, asaphis, cardium, donax, lucina, macoma, pecten, pectunculus, tellina) and Univalves (cassis, conus, cypræa, fissurella, natica, patella, strombus).

Col. C. A. H. McCAULEY, U. S. A.

A large number of Philippine Island Shells of the more common species of Cassis, Cerithium, Conus, Cypraa, Fasciolaria, Murex, Nassa, Nerita, Natica, Oliva, Ovula, Strombus, Triton, Trochus, Voluta and Helix, with Bivalves, Crista, Pecten and Tellina; in all about 500 specimens.

NEW YORK BOTANICAL GARDEN, New York City (through Mr. M. A. Home).

9 Specimens of Avicula from Watling's Island, Bahamas.

DR. HUGH M. SMITH, Washington, D. C.

200 Specimens of Philippine Island Shells, comprising Cassis, Conus, Cypræa (9 species), Distorsio, Fusus, Harpa (H. minor), Murex, Natica, Nautilus, Ovula, Ranella, Strombus, Terebra, Trochus, Turritella.

BY EXCHANGE

FRANKFORT MUSEUM, Frankfort, Germany (through Dr. Römer).

4,330 Specimens of Philippine Island Shells, comprising 477 species and varieties.

J. W. JUDD, Brooklyn, N. Y.

Specimens of *Helix aperta* Born, from Sicily, and of *H. alauda* Ferg., from Cuba.

W. E. METCALF, Orange, N. J.

1 Specimen of Cypraa clandestina, L. var.

DEPARTMENT OF INVERTEBRATE ZOÖLOGY

INVERTEBRATES

By GIFT

C. W. BEEBE, New York City.

Various Invertebrates from Venezuela.

MISS JOSEPHINE BROCKER, New York City.

2 Spiders from Kingsbridge, N. Y.

A. C. BURRILL, Milwaukee, Wis.

Various Myriapods from southern Wisconsin.

Mrs. EDWARD CHAMBERLIN, New York City.

I Maandra cerebriformis.

MISS EMILY W. DINWIDDIE, New York City.

I Epeira trifolium from vicinity of Jersey City, N. J.

CHARLES GABRIEL, New York City.

I Thalysias hyano and 6 Sea-fans (Gorgonia flabellum) from Soufrière Bay, St. Lucia, B. W. I.

MISS E. M. GREENFIELD, New York City.

1 Euplectella speciossissima.

JOHN HISCOX, New York City.

I Encrusted Oyster Shell and 2 Pecten magellanicus.

MRS. MORRIS K. JESUP, New York City.

Various Ants, Myriapods, Spiders, Crustacea, Molluscs and Worms from Formosa, Japan; 189 specimens of Formicidæ and 7 specimens of Paussus from Erythræa, New Pomerania, Peru, Bolivia, etc.; 1 collection of Myriapods and Isopods from Europe and northern Africa.

Prof. R. KLEBS, Königsberg, Prussia, Germany.

32 Amber Ants from Baltic Sea.

GNEOMAR VON KROCKOW, L. F. BARNUM and OGDEN GILES, Brooklyn, N. Y.

Various Myriapods, Isopods, Spiders and Termites from vicinity of New York City and Catskill Mts.

MISS BERTHA S. MILLER, Port Antonio, B. W. I.

I Land Planarian (Geoplana sp.) from Port Antonio, Jamaica, B. W. I.

ROY W. MINER, New York City.

I Collection of Myriapods from Lake George.

ROBERT MURPHY, Providence, R. I.

Isopods from gills of Bluefish, Mt. Sinai Harbor, N. Y.

MISS NELLIE NEWTON, New York City.

I Gorgonia flabellum from Somerset, Bermuda.

NEW YORK AQUARIUM, New York City.

I Lobster and I Octopus.

M. F. SAVAGE, New York City.

I Larva of Regal Walnut Moth (Citheronia regalis) from Bartonsville, Pa.

LOUIS SCHADE, New York City.

I Large mounted Lobster caught from Iberia wreck, Long Beach.

H. J. SHANNON, Jamaica, L. I.

6 Ctenophores from Far Rockaway, L. I.

UNITED STATES BUREAU OF FISHERIES, Washington, D. C.

I Lot of Myzostomata from eastern coast of Japan.

PROF. W. M. WHEELER, Harvard University, Cambridge, Mass.

I Collection of Formicidæ (one of the three largest collections of Formicidæ in existence) from various localities.

THROUGH MUSEUM EXPEDITIONS

Parasites from Humpback Whale from Kyugust, Vancouver Island, British Columbia, and Whale Lice (Cyamus sp.) on "bonnet" of Balæna glacialis from Amagansett, L. I. Collected by Mr. R. C. Andrews. Provided for by Mrs. Morris K. Jesup.

I Lot of Scolopendridæ from Andros Island, Bahamas. Collected by Dr. B. E. Dahlgren. Provided for by Mrs. Morris K. Jesup.

I Lot of Corals and other Marine Invertebrates from Andros Island, Bahamas. Collected by Dr. B. E. Dahlgren and Mr. H. Mueller. Provided for by Mrs. Morris K. Jesup.

- r Lot of Myriapods from Big Tink Pond, Pike Co., Pa. Collected by Mr. G. Dwight Franklin.
- I Spider Crab from St. Lucia, B. W. I. Collected by Dr. E. O. Hovey. Provided for by Mrs. Morris K. Jesup.
- I Collection of Invertebrates from Colorado and I Lot of Nereis from South Shore of Long Island. Collected by Mr. Gneomar von Krockow. Provided for by Mrs. Morris K. Jesup.
- I Collection of Myriapods from New York State and I Collection of Myriapods from Pacific Slope, U. S., Mexico and Hawaiian Islands. Collected by Professor Filippo Silvestri.

By Exchange

HARVARD UNIVERSITY (MUSEUM OF COMPARATIVE ZOÖLOGY), Cambridge, Mass.

I Collection of 80 Echinoderms from various localities.

REPTILES AND AMPHIBIANS

By GIFT

ANONYMOUS.

I Rana palustris.

ROBERT VAN BENSCHOTEN, New York City.

I Green Snake with eggs from Halifax County, Nova Scotia.

CENTRAL PARK MENAGERIE, New York City.

I Python molurus.

S. H. CHUBB, New York City.

I Amphiuma means from Louisiana.

A. M. FOWLER, New York City.

I Newly hatched Terrapin.

G. DWIGHT FRANKLIN, New York City.

I Bufo fowleri and I Kana clamata from Baldwin, L. I.; I Bufo americanus, 2 Spelerpes bilineatus and 2 Desmognathus fusca from Washington, Conn., and I Bufo americanus from Big Tink Pond, Pike Co., Pa.

ADAM HERMANN, New York City.

I Lizard with eggs from Westphalia, northern Germany.

MRS. MORRIS K. JESUP, New York City.

I Lot of Snakes and Lizards from Oklahoma and Georgia; I Leatherback Turtle from Bay Head, N. J.; I skin and rattle of *Crotalus horridus* from Louisiana; I collection of Amphibia from Fort Smith and Great Slave Lake; 9 specimens of Amphibia from China; I Lizard and I Frog from Formosa, Japan, and I Alligator sinensis from China.

I Plethodon glutinosus from Englewood, N. J., and I Plethodon cinereus erythronotus from Ft. Lee, N. J.

- NEW YORK AQUARIUM, New York City.
 - I Cryptobranchus japonicus from Japan and I Diemyetylus viridescens.
- NEW YORK ZOÖLOGICAL PARK, New York City.
 - 12 Snakes, 6 Lizards, 1 Alligator and 7 Batrachians from vicinity of New York City.

THROUGH MUSEUM EXPEDITIONS

- I Lot of Batrachians from Big Tink Pond, Pike Co., Pa. Collected by Mr. G. Dwight Franklin.
- I Thamnophis sirtalis var. from Vancouver, B. C. Collected by Mr. R. C. Andrews. Provided for by Mrs. Morris K. Jesup.
- I Lot of Reptiles from Big Tink Pond, Pike Co., Pa. Collected by Mr. G. Dwight Franklin.
- 30 Reptiles and 21 Amphibia from Colorado. Collected by Mr. Gneomar von Krockow. Provided for by Mrs. Morris K. Jesup.

FISHES

By GIFT

W. M. BLAKE, Brooklyn, N. Y.

5 Saws of Saw-fish.

G. DWIGHT FRANKLIN, New York City.

I Perca flavescens from Big Tink Pond, Pike Co., Pa.

A. O. HEINRICH, Baldwin, L. I.

I Eel and I Ammodytes americanus from Hempstead Bay, L. I.

JOHN HISCOX, New York City.

I Codfish.

MRS. MORRIS K. JESUP, New York City.

Various Fishes from Formosa, Japan; I collection of Fishes from the Mackenzie River, Fort Smith and Great Slave Lake, and I Tarpon atlanticus from Florida.

FREDERICK McVICKAR, Mt. Vernon, N. Y.

I Lot of Fishes and Fish Eggs from Hunter's Island and the Bronx.

ROBERT C. MURPHY, Providence, R. I.

I Stickleback from Mt. Sinai Harbor, N. Y.

S. L. NAGELE, New York City.

I Selene vomer, I skin of Gar-pike and a specimen of Alosa sapidissima with hermaphroditic reproductive organs.

NEW YORK AQUARIUM, New York City.

- I Nassau Grouper (Epinephelus striatus) from Bahamas.
- I Bullhead Catfish (Ameiurus nebulosus) from upper part of New York State.
- I Trunk Fish (Lactophrys).
- I Channel Bass Scianops ocellatus (L.).

- I Diplodus holbrookii.
- I Teuthis caruleus.
- I Sparisoma viridis,
- I Aplodinotus grunniens.
- 1 Epinephelus guttatus.
- G. ROSS, Pike Co., Pa.
 - I Small-mouthed Black Bass from Big Tink Pond, Pike Co., Pa.

By Purchase

- I Lump Fish.
- ı Pike.
- I Sturgeon.
- I Gar-pike.
- I Trachinotus carolinus from Florida coast.
- I Esox lucius from upper part of New York State.

By Museum Expedition

I Lot of Fishes from Boulder Creek, Boulder, Colo. Collected by Mr. Gneomar von Krockow. Provided for by Mrs. Morris K. Jesup.

TREES

By GIFT

DR. GEORGE F. KUNZ, New York City.

Section of Hawthorn tree from old Parish Mansion, New York City. J. S. MERRIAM, New York City.

- 2 Pieces of Sequoia from "Giant Sequoia Forest," near King's River Cañon, Calif.
- Dr. JOSEPH SIMMONS, New York City.
 - I Mahogany Bean from vicinity of Zambesi River, Africa.

THROUGH MUSEUM EXPEDITION

97 Fossil Leaves from Florissant, Colo. Collected by Mr. Gneomar von Krockow. Provided for by Mrs. Morris K. Jesup.

INCORPORATION

AN ACT

TO INCORPORATE THE

AMERICAN MUSEUM OF NATURAL HISTORY

Passed April 6, 1869

The People of the State of New York, represented in Senate and Assembly, do enact as follows:

Section 1. John David Wolfe, Robert Colgate, Benjamin H. Field, Robert L. Stuart, Adrian Iselin, Benjamin B. Sherman, William A. Haines, Theodore Roosevelt, Howard Potter, William T. Blodgett, Morris K. Jesup, D. Jackson Steward, J. Pierpont Morgan, A. G. P. Dodge, Chas. A. Dana, Joseph H. Choate and Henry Parish, and such persons as may hereafter become members of the Corporation hereby created, are hereby created a body corporate, by the name of "The American Museum of Natural History," to be located in the City of New York, for the purpose of establishing and maintaining in said city a Museum and Library of Natural History; of encouraging and developing the study of Natural Science; of advancing the general knowledge of kindred subjects, and to that end of furnishing popular instruction and recreation.

SEC. 2. Said Corporation shall have power to make and adopt a Constitution and By-Laws, and to make rules and regulations for the admission, suspension and expulsion of its members, and their government, the number and election of its officers, and to define their duties, and for the safe keeping of its property, and, from time to time, to alter and modify such Constitution, By-Laws, Rules and Regulations. Until

an election shall be held pursuant to such Constitution and By-Laws, the persons named in the first section of this Act shall be, and are hereby declared to be, the Trustees and Managers of said Corporation and its property.

SEC. 3. Said Corporation may take and hold by gift, devise, bequest, purchase or lease, either absolutely or in trust, for any purpose comprised in the objects of the Corporation, any real or personal estate, necessary or proper for the purposes of its incorporation.

SEC. 4. Said Corporation shall possess the general powers, and be subject to the restrictions and liabilities, prescribed in the Third Title of the Eighteenth Chapter of the First Part of the Revised Statutes.

SEC. 5. This Act shall take effect immediately.

STATE OF NEW YORK, OFFICE OF THE SECRETARY OF STATE.

I have compared the preceding with the original law on file in this office, and do hereby certify that the same is a correct transcript therefrom, and of the whole of said original law.

[L.s.] Given under my hand and seal of Office at the City of Albany, this fourteenth day of April, in the year one thousand eight hundred and sixty-nine.

D. WILLERS, Jr., Deputy Secretary of State.

¹ As amended by Chapter 303, Laws of 1898, of the State of New York, entitled "An Act to amend chapter one hundred and nineteen, laws of eighteen hundred and sixty-nine, entitled 'An Act to incorporate the American Museum of Natural History,' relative to its charter."

CONTRACT

WITH THE DEPARTMENT OF PUBLIC PARKS

FOR THE OCCUPATION OF THE NEW BUILDING

This Agreement, made and concluded on the twenty-second day of December, in the year one thousand eight hundred and seventy-seven, between the Department of Public Parks of the City of New York, the party of the first part, and the American Museum of Natural History, party of the second part, witnesseth:

Whereas, by an Act of the Legislature of the State of New York, passed April 22d, 1876, entitled "An Act in relation to the powers and duties of the Board of Commissioners of the Department of Public Parks, in connection with the American Museum of Natural History, and the Metropolitan Museum of Art," the said party of the first part is authorized and directed to enter into a contract with the said party of the second part, for the occupation by it of the buildings erected or to be erected on that portion of the Central Park in the City of New York, known as Manhattan Square, and for transferring thereto and establishing and maintaining therein its museum, library and collections, and carrying out the objects and purposes of said party of the second part; and,

Whereas, a building contemplated by said act has now been erected and nearly completed and equipped in a manner suitable for the purposes of said Museum, as provided in the first section of the Act of May 15, 1875, known as Chapter 351, of the Laws of 1875, for the purpose of establishing and maintaining therein the said Museum, as provided by the said last-named act, and by the Act of April 5, 1871, known as Chapter 290, of the Laws of 1871; and,

Contract 81

Whereas, it is desired as well by the said party of the first part, as by the said party of the second part, that, immediately upon the completion and equipment of said building, the said party of the second part should be established therein, and should transfer thereto its museum, library and collections, and carry out the objects and purposes of the said party of the second part;

Now, therefore, it is agreed by and between the said parties as follows, namely:

First.—That the said party of the first part has granted and demised and let, and doth, by these presents, grant, demise and let, unto the said party of the second part, the said buildings and the appurtenances thereunto belonging, to have and to hold the same so long as the said party of the second part shall continue to carry out the objects and purposes defined in its charter; or such other objects and purposes as by any future amendment of said charter may be authorized; and shall faithfully keep, perform, and observe the covenants and conditions herein contained on its part to be kept, performed and observed, or until the said building shall be surrendered by the said party of the second part, as hereinafter provided.

Secondly.—That neither the party of the first part, its successor or successors, nor the Mayor, Aldermen and Commonalty of the City of New York, shall be in any manner chargeable or liable for the preservation of the said building or the property of the party of the second part which may be placed therein, against fire, or for any damage or injury that may be caused by fire to the said property; but it is agreed that, damages as aforesaid excepted, the said party of the first part will keep said building, from time to time, in repair.

Thirdly.—That as soon after the completion and equipment of said building as practicable, said party of the second part shall transfer to, and place and arrange in said building, its museum, library and collections, or such portion thereof as can be properly displayed to the public therein, and shall have and enjoy the exclusive use of the whole of said building,

subject to the provisions herein contained, and the rules and regulations herein prescribed, during the continuance of the term granted, or until a surrender thereof, as herein provided.

Fourthly.—That the exhibition halls of said building shall, on Wednesday, Thursday, Friday and Saturday of each week, and on all legal or public holidays, except Sundays, be kept open and accessible to the public, free of charge, from nine o'clock A.M. until half an hour before sunset, under such rules and regulations as the party of the second part shall from time to time prescribe; but on the remaining days of the week the same shall be only open for exhibition to such persons, upon such terms as the said party of the second part shall from time to time direct. But all professors and teachers of the public schools of the City of New York, or other institutions of learning in said city, in which instruction is given free of charge, shall be admitted to all the advantages afforded by the said party of the second part, through its museum, library, apparatus, and collections, or otherwise, for study, research and investigation, free of any charge therefor, and to the same extent and on the same terms and conditions as any other persons are admitted to such advantages, as aforesaid.

Fifthly.—That the museum, library and collections, and all other property of said party of the second part, which shall or may be placed in said building, shall continue to be and remain absolutely the property of said party of the second part, and neither the said party of the first part nor the said the Mayor, Aldermen and Commonalty, shall by reason of said property being placed in said building, or continuing therein, have any right, title, property or interest therein; nor shall the said party of the second part, by reason of its occupation and use of said building under this agreement, acquire, or be deemed to have any right, title, property or interest in said building, except so far as expressly granted by this agreement.

Sixthly.—That the said party of the second part shall, on or before the first day of May, in every year, during the continuance of this agreement, submit to the said party of the first part, its successor or successors, a detailed printed report of the

Contract 83

operations and transactions of the said party of the second part, and all its receipts and payments, for the year ending with the 31st day of December next preceding.

Seventhly.—That said party of the first part shall have, at all times, access to every part of the said building for general visitation and supervision, and also for the purpose of the performance of the duties devolved upon it by the laws of the State of New York, or of the City of New York. That the police powers and supervision of said party of the first part shall extend in, through and about said building. That the said party of the second part may appoint, direct, control and remove all persons employed within said building, and in and about the care of said building, and the museum, library and collections therein contained.

Eighthly.—That said party of the second part may, at any time, after the expiration of three, and before the expiration of six, months from the date of the service of a notice in writing to said party of the first part, its successor or successors, or to the Mayor of the City of New York, of its intention so to do, quit and surrender the said premises and remove all its property therefrom; and upon and after such notice, the said party of the second part shall and will, at the expiration of the said six months, guietly and peaceably yield up and surrender unto the said party of the first part and its successors all and singular the aforesaid demised premises. And it is expressly understood and agreed by and between the parties hereto that if the said party of the second part shall omit to do, perform, fulfill or keep any or either of the covenants, articles, clauses and agreements, matters and things herein contained, which on its part are to be done, performed, fulfilled or kept, according to the true intent and meaning of these presents, then and from thenceforth this grant and demise shall be utterly null and void. And in such case it shall and may be lawful for said Department to serve or cause to be served on the said party of the second part a notice in writing declaring that the said grant hereinbefore made has become utterly null and void and thereupon the said party of the first part, its successor or successors (ninety days' time being first given to the said party

of the second part to remove its property therefrom), may reënter, and shall again have, repossess and enjoy the premises aforementioned, the same as in their first and former estate, and in like manner as though these presents had never been made, without let or hindrance of the said party of the second part, anything here contained to the contrary notwithstanding.

Ninthly.—And it is further expressly understood and agreed, by and between the parties hereto, that this agreement may be wholly canceled and annulled, or, from time to time, altered, or modified, as may be agreed, in writing, between the said parties, or their successors, anything herein contained to the contrary in anywise notwithstanding.

In witness whereof, the party of the first part hath caused this agreement to be executed by their President and Secretary, pursuant to a resolution of the Board of Commissioners of said Department, adopted at a meeting held on the thirtieth day of January, in the year of our Lord one thousand eight hundred and seventy-eight; and the said party of the second part hath caused the same to be executed by their President, and their official seal affixed thereto, pursuant to a resolution of the Trustees of the American Museum of Natural History, adopted at a meeting held on the twelfth day of February, in the year of our Lord one thousand eight hundred and seventy-seven.

In presence of D. Porter Lord.

JAMES F. WENMAN,

President Department of Public Parks

of the City of New York.

WILLIAM IRWIN,

Secretary Department of Public Parks of the City of New York.

SEAL of the American Museum of Natural History ROBERT L. STUART,

President American Museum of Natural History.

Contract 85

STATE OF NEW YORK,
City and County of New York,

Ss.:

On this 12th day of February, in the year 1878, before me personally came James F. Wenman, President of the Department of Public Parks of the City of New York, and William Irwin, Secretary of the said Department of Public Parks, with both of whom I am personally acquainted, and both of whom being by me duly sworn, said that they reside in the City and County of New York; that the said James F. Wenman is the President, and the said William Irwin is the Secretary of the said Department of Public Parks, and that they signed their names to the foregoing agreement by order of the Board of Commissioners of the said Department of Public Parks, as such President and Secretary.

W. C. BESSON,

[SEAL.]

SEAL.

(73) Notary Public N. Y. Co.

STATE OF NEW YORK, City and County of New York, ss.:

On this 12th day of February, in the year 1878, before me personally came Robert L. Stuart, the President of the American Museum of Natural History, with whom I am personally acquainted, who being by me duly sworn, said that he resides in the City and County of New York, that he is the President of the American Museum of Natural History, and that he knows the corporate seal of said museum, that the seal affixed to the foregoing agreement is such corporate seal, that it is affixed thereto by order of the Board of Trustees of said American Museum of Natural History, and that he signed his name thereto by the like order, as President of said Museum.

W. C. BESSON,

(73) Notary Public N. Y. Co.

Recorded in the office of the Register of the City and County of New York in Liber 1426 of Cons., page 402, February 16, A. D. 1878, at 9 o'clock A.M., and examined.

Witness my hand and official seal,

FREDERICK W. LOEW.

[SEAL.] Register.

Note.—July 25, 1892, by consent of the Trustees, section fourth was modified to enable the Trustees to open the Museum free to the public "throughout the year, excepting Mondays, but including Sunday afternoons and two evenings of each week."

June 29, 1893, by consent of the Trustees, section fourth was modified to enable the Trustees to open the Museum free of charge to the public "throughout the year for five days in each week, one of which shall be Sunday afternoon,

and also two evenings of each week."

CONSTITUTION

OF THE

AMERICAN MUSEUM OF NATURAL HISTORY

IN THE CITY OF NEW YORK

Amended November 9, 1908

ARTICLE I

This Corporation shall be styled The American Museum of Natural History.

ARTICLE II

The several persons named in the charter, and such others as they may add to their number, which shall not exceed twenty-five in all at one time, and in addition, the Mayor, the Comptroller, and the President of the Department of Public Parks, of the City of New York, for the time being, ex-officio, shall be the Trustees to manage the affairs, property and business of the Corporation.

The members of the Board of Trustees holding office at the time of the regular quarterly meeting of November, 1905, shall then, or at the first meeting of the Board thereafter, be divided by lot into five classes of five members each, to serve for the terms of one, two, three, four and five years respectively from the date of the annual meeting of February, 1906. The Board of Trustees at each annual meeting thereafter, or an adjournment thereof, shall by ballot, by a majority vote of the Trustees present at the meeting, elect five Trustees to supply the places of the class whose term expires at that meeting; said newly elected Trustees to hold office for five years or until their successors are elected. In case of a vacancy in the Board by death, resignation, disqualification or otherwise, the vacancy shall be filled by ballot, in like manner, by the Board of Trustees at any regular meeting or special meeting, for the unexpired term. No person shall be eligible for election as Trustee who shall not be a "Patron" of the Museum, unless by a unanimous vote of a quorum of the Board, nor be eligible unless his name shall be presented by the Nominating Committee at a regular or special meeting of the Board previous to the meeting at which his name shall be acted upon. Written notice of such election and the vacancy to be filled shall be sent to the Trustees at least one week prior to said meeting.

ARTICLE III

The Trustees shall meet quarterly, on the second Monday of every February, May, August and November, at an hour and place to be designated, on at least one week's written notice from the Secretary, and shall annually, at the quarterly meeting in February, elect the officers and committees for the ensuing year. They shall also meet at any other time to transact special business on a call of the Secretary, who shall issue such call whenever requested so to do, in writing, by five Trustees, or by the President, and give written notice to each Trustee of such special meeting, and of the object thereof, at least three days before the meeting is held.

ARTICLE IV

Section 1. The officers of said Corporation shall be a President, a First Vice-President, a Second Vice-President, a Treasurer and a Secretary. The President and Vice-Presidents shall be elected from among the Trustees. The Treasurer and Secretary may or may not be chosen from such Trustees. These officers shall be elected by ballot, and the persons having a majority of the votes cast shall be deemed duly elected. They shall hold their offices for one year or until their successors shall be elected.

SEC. 2. The Board of Trustees shall appoint each year, in such manner as it may direct, the following Standing Committees: an Executive Committee, an Auditing Committee, a Finance Committee, a Nominating Committee. These Committees are all to be elected from the Trustees, and the members shall hold office for one year or until their successors shall be elected.

The Board of Trustees shall also have authority to appoint such other committees or officers as they may at any time deem desirable, and to delegate to them such powers as may be necessary.

ARTICLE V

Section 1. The President shall have a general supervision and direction over the affairs of the Corporation, and shall preside at all the meetings of the Museum and of the Trustees. In his absence or inability to act, the First or Second Vice-President shall act in his place.

SEC. 2. The Secretary shall be present, unless otherwise ordered by the Board, at all the meetings of the Museum and Trustees, of the Executive Committee and such other Committees as the Board may direct. He shall keep a careful record of the proceedings of such meetings, shall preserve the seal, archives and correspondence of the Museum, shall issue notices for all meetings of the Trustees and various committees, and shall perform such other duties as the Board may direct.

The Board of Trustees shall have power to appoint an Assistant Secretary, who, under its direction, shall perform the duties of the Secretary in his absence or inability to act.

SEC. 3. The Treasurer shall receive and disburse the funds of the Museum. He shall report in writing, at each quarterly meeting of the Trustees, the balance of money on hand, and the outstanding obligations of the Museum, as far as practicable; and shall make a full report at the annual meeting of the receipts and disbursements of the past year, with such suggestions as to the financial management of the Museum as he may deem proper.

SEC. 4. The accounts of the Museum shall be kept at the General Office, in books belonging to it, which shall at all times be open to the inspection of the Trustees.

These accounts shall be under the care of an Assistant Treasurer, who shall be appointed by the Board of Trustees and be under its direction. He shall give such bonds for the faithful performance of his duties as the Board may direct.

SEC. 5. The offices of Secretary and Assistant Treasurer may be held by the same person.

ARTICLE VI

The Executive Committee shall consist of nine Trustees, of whom the President, First and Second Vice-Presidents and Treasurer, in case he be a Trustee, shall be four, and five other members to be appointed each year in the manner provided in Article IV. They shall have the control and regulation of the collections, library and other property of the Museum; and shall have power to purchase, sell and exchange specimens and books, to employ agents, to regulate the manner and terms of exhibiting the Museum to the public, and generally to carry out in detail the directions of the Trustees; but the Executive Committee shall not incur any expense or liability for the Museum exceeding two thousand dollars at one time, or exceeding in all ten thousand dollars, in the interval between the quarterly meetings of the Trustees, without the express sanction of the Trustees. Five members of the Committee shall constitute a quorum for the transaction of business.

ARTICLE VII

The Auditing Committee shall consist of three Trustees. They shall have the books of the Museum duly audited, at least once in six months, by an authorized public accountant to be selected by them.

No bills shall be paid unless approved, in writing, by the President, the Chairman of the Executive Committee, or the Director.

ARTICLE VIII

The Finance Committee shall consist of four Trustees, including the Treasurer in case he be a Trustee. They shall have general charge of the moneys and securities of the Endowment and other permanent funds of the Museum, and such real estate as may become the property of the Corporation, with authority to invest, sell and reinvest the same, subject to the approval of the Board of Trustees.

ARTICLE IX

The Nominating Committee shall be composed of three Trustees, to whom shall be first submitted the names of any persons proposed as candidates for election to membership in the Board of Trustees. The Committee shall report on such candidates from time to time, as it may deem to be for the interest of the Museum. A fortnight before the annual meeting they shall prepare and mail to each member of the Board of Trustees a list of five candidates to be elected by ballot at the said meeting.

ARTICLE X

The President shall be a member, ex-officio, of all standing committees.

ARTICLE XI

Nine Trustees shall constitute a quorum for the transaction of business, but five Trustees meeting may adjourn and transact current business, subject to the subsequent approval of a meeting at which a quorum shall be present.

ARTICLE XII

By-Laws may be made from time to time by the Trustees providing for the care and management of the property of the Corporation and for the government of its affairs, and may be amended at any meeting of the Trustees by a vote of a majority of those present, after a month's notice in writing of such proposed amendment.

ARTICLE XIII

The contribution of \$1,000 or more to the funds of the Museum, at any one time, shall entitle the person giving the same to be a Patron of the Museum, who shall have the right in perpetuity to appoint the successor in such patronship.

The contribution of \$500, at one time, shall entitle the person giving the same to be a Fellow, who shall have the right to appoint one successor in such fellowship.

No appointment of a successor shall be valid unless the same shall be in writing, endorsed on the certificate, or by the last will and testament.

The contribution of \$100, at one time, shall entitle the person giving the same to be a Life Member.

Any person may be elected by the Trustees to either of the above degrees, who shall have given to the Museum books or specimens, which shall have been accepted by the Executive Committee, or by the President, to the value of twice the amount in money requisite to his admission to the same degree, and the President and Secretary shall issue diplomas accordingly under the seal of the Museum.

The Trustees may also elect Honorary Fellows of the Museum in their discretion.

ARTICLE XIV

Any person who has held the office of President for ten or more successive years may be elected by the Trustees as Honorary President for life.

ARTICLE XV

No alterations shall be made in this Constitution, unless at a regular quarterly meeting of the Trustees, or at a special meeting called for this purpose; nor by the votes of less than a majority of all the Trustees; nor without notice in writing of the proposed alteration, embodying the amendment proposed to be made, having been given at a regular meeting.

BY-LAWS

Ι

Patrons, giving \$1,000, are each entitled to 1 Subscriber's Ticket, 5 Complimentary Season Tickets and 10 Tickets for a single admission.

Fellows, giving \$500, are each entitled to I Subscriber's Ticket and 10 Tickets for a single admission.

Life Members, giving \$100, are each entitled to 1 Subscriber's Ticket and 5 Tickets for a single admission.

Annual Members, paying \$10 yearly, are each entitled to 1 Subscriber's Ticket and 4 Tickets for a single admission.

[Note.—A Subscriber's Ticket admits to the laboratories and parts of the Museum not open to the public, also to all Receptions and Special Exhibitions, and may be used by any member of the Subscriber's family.

The Single Admission Tickets admit the bearers to the laboratories and parts of the Museum not open to the public, and are issued to Subscribers for distribution among friends and visitors.]

II

Any Trustee who shall fail to attend three consecutive Regular Quarterly Meetings of the Board shall cease to be a Trustee, unless excused by the Board.

III

No indebtedness (other than for current expenses) shall be incurred by any committee, officer or employee of the Museum, except as provided for in the Constitution. Any desired additional expenditure shall first receive the approval of the Board of Trustees.

IV

If any Trustee shall accept a salary from this Corporation he shall thereby be disqualified for the time being from acting

as a Trustee thereof; provided, that the Board of Trustees shall have power to suspend the operation of this law in any special case.

V

Any vacancies occurring in the membership of the several committees during the interval between the regular meetings of the Board of Trustees may be filled at a regular meeting of the Executive Committee, until the next meeting of the Board.

VI

All bequests or legacies, not especially designated, shall hereafter be applied to the *Permanent Endowment Fund*, the interest only of which shall be applied to the use of the Museum as the Board shall direct.

VII

At such times as it may be impracticable to obtain the services of the members of the Auditing Committee, the members of the Executive Committee may act in their place and stead.

FOR THE EQUIPPING AND FINISHING OF THE BUILDING AND THE CONSTRUCTION OF ADDITIONS THERETO

LEGAL ENACTMENTS OF 1905

BY THE BOARD OF ALDERMEN

An Ordinance providing for an issue of Corporate Stock in the sum of five hundred thousand dollars (\$500,000), to provide means for the equipping and finishing of The American Museum of Natural History in Manhattan Square, Borough of Manhattan, and the construction of additions thereto.

Be it ordained by the Board of Aldermen of the City of New York as follows:

Section I. The Board of Aldermen hereby approves of and concurs in the following resolution adopted by the Board of Estimate and Apportionment March 16, 1905, and authorizes the Comptroller to issue Corporate Stock of The City of New York to the amount and for the purposes therein specified:

"Resolved, That, pursuant to the provisions of section 47 of the Greater New York Charter, as amended by chapter 409 of the Laws of 1904, the Board of Estimate and Apportionment hereby approves of the issue of Corporate Stock of The City of New York, to an amount not exceeding five hundred thousand dollars (\$500,000), to provide means for the equipping and furnishing of The American Museum of Natural History in Manhattan Square, Borough of Manhattan, and the construction of additions thereto, and that when authority therefor shall have been obtained from the Board of Aldermen, the Comptroller is authorized to issue Corporate Stock of The City of New York, in the manner provided by section 169 of the Greater New York Charter, to an amount not exceeding five hundred thousand dollars (\$500,000), the proceeds whereof to be applied to the purposes aforesaid."

Adopted by the Board of Aldermen April 11, 1905, a majority of all the

members elected voting in favor thereof.

Approved by the Mayor April 18, 1905. (Signed) P. J. Scully, Clerk.

Contracts awarded to December 31, 1906.

For the erection of Fire Lines, Sprinkler System, Fire Escapes, etc. Contract awarded R. J. F. Gerstle Company, November 26, 1905, \$19,838. Completed January 11, 1907.

For the erection and completion of a New Wing, to be known as the South Wing of the West Façade, and a Permanent Cellar Passageway running therefrom in northerly and easterly direction.

Contract awarded Guidone & Galardi, May 22, 1906, \$325,000. Completed June 6, 1908.

THE AMERICAN MUSEUM OF NATURAL HISTORY

INCORPORATED IN 1869

MEMBERSHIP AND ENDOWMENT

There are more than two thousand residents of New York and vicinity who support the educational and scientific work of the Museum and enjoy its lectures, publications and other privileges.

Annual N	M en	nbei	rs					\$ 10
Sustainin	g N	Iem	ber	s (a	nnu	ally)	25
Life Mer	nbe	rs						100
Fellows								500
Patrons								1,000
Benefacto	rs							50,000

The Endowment Fund was established in 1884. The Trustees desire to insure the permanent growth and welfare of the Museum through an increase of this fund.

MEMORIAL STATUE OF MORRIS K. JESUP By William Couper, Sculptor

FORTY-FIRST ANNUAL REPORT

To the Trustees and Members of The American Museum of Natural History, and to the Municipal Authorities of the City of New York:

The President submits herewith a report of the activities of the Museum during the year 1909.

Both the scientific and the administrative branches of the Museum, under the guidance of Director Hermon C. Bumpus, have made greater progress than in any previous year.

The past history and the future scope and plan of the Museum have continued to be subjects of very careful investigation and reflection. As intimated in the Fortieth Annual Report, it is of the utmost importance that the Trustees and the City should have before them an ideal plan of a complete and perfectly arranged Natural History Museum covering all the branches of natural science, so that all of the work of the Museum shall be so arranged as ultimately to become a part of the final plan. Opportunity often dictates what collections shall be secured, what halls shall be first arranged, what explorations shall be sent out. But a policy of opportunity is not a wise one for the future, which must prepare for the needs of a very much greater city than New York is at the present time in such a manner as to be a source of pride and a most efficient agent of public enlightenment in pure and applied science. This, together with the establishment of a great library, was among the original plans of the Founders of the Museum in 1869. Such a report on the future scope and plan has been prepared and submitted* by the President, but it will not be published until it has received both the careful consideration and the approval of the Trustees.

ENDOWMENT AND MAINTENANCE

An increase of the endowment is the greatest need of the Museum at this time. The present fund of \$2,195,645.92 should be increased to at least \$5,000,000. The munificent

^{*} At the Annual Meeting, February 14, 1910.

bequest of Mr. Jesup has indirectly enabled the Trustees to extend the scientific staff (pages 13 and 14) for the first time to cover all the branches of natural history, some of which were, of necessity, slighted or set aside in the early development of the Museum. The gifts and special funds for the past year (pages 58 to 63) have been more liberal than ever before. and promise to increase year by year. Through these gifts a number of very important expeditions has been fitted out. including among others two to Africa, one to the East Indies, one to the Arctic Ocean and one to the pueblos of the Southwestern States. All of these special gifts increase our collections, but none of them provides for their installation and exhibition, which are the legitimate uses of the Endowment Fund, on the theory that the Trustees present the collections, while the City houses and cares for them. The uses of an increased Endowment Fund are to widen our already wide sphere of exploration, to further enrich our collections and to hasten the installation of material now in hand.

Similarly, to meet our present needs, the City Maintenance Fund should be increased to the legal limit of \$200,000. During the present year it has amounted to \$180,048.69. For purposes of bookkeeping the Maintenance Account has been kept separately, so that it does not show the deficit which actually exists this year of \$36,670.01 over and above the amount provided by the City. The Maintenance deficits between the years 1901 and 1909 have reached a total of \$152,665.93. Every dollar thus expended by the Trustees from the Endowment Fund and from special gifts is a direct loss to the City, because it means so much less expenditure on collections.

APPOINTIVE COMMITTEES

The various Appointive Committees have become important agents of the Museum's growth during the past year. Through special interest and through service of time and advice most generously volunteered, as well as through special subscriptions, these Committees are greatly increasing the efficiency of the administration. As at present established (see page 12) the Committees are as follows:

Subject
Habitat Bird Groups,
African Exploration,
Ethnology of the Southwest,
Antarctic Exploration,
Woods and Forestry,
Fishes and Marine Life,
Minerals and Mines,
Indians of the Plains,

Chairman
JOHN L. CADWALADER
JOHN B. TREVOR
ARCHER M. HUNTINGTON
ARCHER M. HUNTINGTON
GIFFORD PINCHOT
CLEVELAND H. DODGE
JAMES DOUGLAS
ARCHIBALD ROGERS

The Committees are composed partly of Trustees, partly of other friends and patrons of the Museum, and partly of distinguished men of science attached to other institutions. It will be observed that each Committee is devoting itself, in consultation with the Director, to one or more of the exhibition halls of the future, so that the chairman and other members may have the pleasure and satisfaction of seeing some definite results of their labors.

MUSEUM EXTENSION

The Museum has already entered upon a method of Museum Extension on a scale which reaches almost the entire school system of the City through the circulation of small traveling museums. Within its walls there has been established a Children's Room, which promises to become a more important feature as time goes on and which deserves a special endowment fund of \$25,000. We have also made a beginning in reaching the blind through our Museum for the Blind, the first of its kind to our knowledge.*

The Trustees should now consider the advisability of establishing Branch Museums in Manhattan and the Bronx, which would hold the same relation to the parent Museum as the Branch Libraries do to the New York Public Library. For example, a Branch Museum might be placed on the east side of the City, in the center of a population eager for education and keenly appreciative both of the Branch Library and of the free Lecture System. Such an institution should be the gift of some special benefactor and philanthropist; it should be amply endowed so as not to be a tax on the parent

^{*} This Museum has received a munificent endowment since December 31, 1909.

institution; it should enjoy a maintenance fund from the City which would provide merely for its up-keep and administration, but not for its collections. The parent Museum could contribute, without sacrifice, many admirable educational exhibits from its duplicate series. Such a Branch, which might well be established in coöperation with our sister institution, the Metropolitan Museum of Art, would be a great force in the Americanization of the newcomers of all lands who are crowding to the east side of our City.

I. ADMINISTRATION AND BUILDING

Scientific Staff.—Several changes have been made in the personnel of the scientific staff. Owing to advancing years and failing health, Professor R. P. Whitfield has been obliged to give up active work as Curator of Geology and Invertebrate Palæontology and has been retired as *Curator Emeritus*. Dr. Edmund Otis Hovey, Associate Curator of the department since 1901, has been promoted to the curatorship.

In the Department of Anthropology, Professor Marshall H. Saville has resigned his position as Honorary Curator of Mexican Archæology and the staff has been strengthened by the appointment of Dr. Pliny E. Goddard, formerly of the University of California, as an Associate Curator, and of Dr. Herbert J. Spinden, of Harvard University, as an Assistant Curator. Mr. Harlan I. Smith, who has held an assistant curatorship in the department for the past nine years, has been made an Associate Curator.

A Department of Ichthyology and Herpetology has been established during the year, with Dr. Bashford Dean as its head. The appointment of Dr. Dean is a nominal change, as he has been a member of the scientific staff since 1903.

Mr. Barnum Brown has been made Assistant Curator of Fossil Reptiles and Mr. Walter Granger Assistant Curator of Fossil Mammals.

Recently the Trustees have created a Department of Public Health, and through a coöperative arrangement with President Finley of the College of the City of New York, the services of Professor Charles-Edward Amory Winslow have been secured as Curator. This department will have for its aim the demonstration of the relation between man and the lower organisms. Professor Winslow will not begin active work, however, until July, 1910.

Building.—While the new wing on Columbus Avenue (the south section of the West Façade) was formally accepted last year by the City from the contractors, much work remained to be done in decorating and casing before the halls could be occupied. Application for funds for furnishing and equipping this section of the building was made to the Board of Estimate and Apportionment, and, in July, \$100,000 was appropriated for this work.

At the request of the Trustees, Commissioner Henry Smith directed that the Department of Parks pave the entrance roadway on Seventy-seventh Street with asphalt block. This work was done at the expense of the Park Department and was not a draft on the Museum funds.

The contract for the construction of the service roadway, to enter the Museum grounds from Columbus Avenue, was let on July 1, 1909, to the Atlanta Contracting Company, and operations were begun at once on this much needed improvement. At the close of the year good progress had been made and the work was nearing completion.

The mechanical workshops have been moved from the east wing to the more commodious quarters in the basement of the new west wing. These shops have been equipped with electric motors for running the machinery, new benches, steam box and lockers. While these quarters are considerably larger than the old shop, they are quite insufficient for all our mechanical work, and temporary shops have been provided in various parts of the building.

The repairs are no small item in a building of this size, and as time passes these will necessarily increase. This work alone has kept a large force of carpenters, painters and other mechanics continuously employed throughout the year.

The adoption of a graded system of wages for the employees has produced satisfactory results. The efficiency of the force of attendants has been further improved by the establishing of a grade known as floor sergeants who are under the direction of a captain. Each sergeant is in charge of a floor and is held responsible for the condition of the exhibition halls, as well as for the conduct of the attendants under his supervision. Under this arrangement the men take a greater interest in their halls and the results are practical.

At our request the United States Post Office Department has placed a mail box in the vestibule of the building and collections are made hourly from nine till four.

II. PUBLIC EDUCATION

Museum Extension to the Schools and Libraries.— The Museum extension to the schools and libraries is in charge of the Department of Public Instruction, which in future will be known as the Department of Public Education.

This department cooperates with the City Board of Education and expends a large sum annually without receiving any special appropriation therefor.

The usual requests for the Nature Study Collections have been received and filled promptly. The routine work of distributing and transferring the collections occupies the time of two messengers. During the year 435 cabinets have been in circulation and the schools supplied number 419. Data supplied by the teachers show that the number of pupils studying these collections during the year was 922,512, which is a greater number than has been recorded in any previous year, and is an indication of their value as a teaching adjunct.

Some of the suburban schools also have been supplied with these collections at a nominal rental.

The method of sending special loan collections to the public libraries, which was begun last year, has been continued during the present year. The collections have been prepared at the request, and with the assistance, of Misses Moore and Tyler of the Public Library staff, and include material illustrating life in the Arctic, and the habits and costumes of the Indians, the Chinese, the Filipinos, etc.

LECTURES TO SCHOOL CHILDREN.—Two courses of lectures, supplementing class-room work in geography and history,

were arranged and delivered at the Museum during the fall and spring. The attendance at these lectures was 17,172.

CHILDREN'S ROOM.—Early in the year the room located near the main entrance on the second floor was opened for children. This room has been equipped with low tables and kindergarten chairs, and near by are children's books, modeling clay and tools. It is open regularly on Wednesdays and Saturdays, and children are encouraged to study, draw and model from the mounted and living specimens. As many as two hundred children have attended in one day. On Wednesday afternoons the class is held for the children of Members.

ROOM FOR THE BLIND.—The Branch Library at 83d Street and Amsterdam Avenue makes a specialty of books for the blind, and this fact suggested to the Museum authorities the idea of setting aside a room for the blind. Here are assembled objects of natural history, which can be handled without damage. These specimens are accompanied by special labels printed in raised letters. We are indebted to Miss Goldthwaite, who is in charge of the library for the blind, for many helpful suggestions and for the printing of the labels. Recent statistics show that there are 6,165 blind people in the State of New York, and this innovation of the Museum has met with the most emphatic approval.

In addition to the extension work, this department has charge of the photographic work of the Museum, which during the past year has reached large proportions.

ASTRONOMY.—In the future Museum it is evident that a hall devoted to the science of cosmology should be provided. The astronomical clock and representation of the solar system in the foyer have proved to be exhibits of exceptional interest.

In view of the public interest in Halley's Comet, a representation of its orbit has been placed in the foyer, showing its relation to the sun and the earth.

ATTENDANCE.—The total number of visitors for the year was 839,141, a figure which is greater than that of any previous year with the exception of 1908, when there was a phenomenal attendance at the Tuberculosis Exhibition. This increase is

especially gratifying when it is considered that the abolishing of the transfer system on the surface cars has unquestionably deprived many, who could not afford the extra carfare, from visiting the Museum.

The free lectures given in coöperation with the Board of Education, the New York Academy of Sciences and Affiliated Societies were attended by 48,988; Mrs. Roesler's lectures by 1,136 and those for school children by 20,165.

LECTURE COURSES

The lectures delivered at the Museum during the year number 139. These include (1) a spring and fall course to Members; (2) a spring and fall course for the pupils of the public schools; (3) free lectures on public holidays; (4) a course of Jesup Lectures, given under the auspices of Columbia University; (5) four lectures on biology for the Normal College and High Schools of Manhattan; (6) special lectures in conjunction with the New York Academy of Sciences, Lincoln Centenary Committee, etc., and (7) three courses given in coöperation with the Board of Education of the City of New York.

The following lectures to Members were delivered by members of the scientific staff and others:

LECTURES TO MEMBERS

March	4.—Birds in Their Relation to Man Frank M. Chapman				
	II.—The Conservation of Our Rivers and Lakes Charles H. Townsend				
6.6	18.—The Conservation of Natural Scenery in America J. Horace McFarland				
4 6	25.—Conservation from Palisades to Adirondacks Edward Hagaman Hall				
April	I.—Hunting with Canoe and Camera in New Brunswick William Lyman Underwood				
November	18.—Alaska and the Exploration of Mt. McKinley Herschel C. Parker				
December	2.—Camera Adventure in the Wilds of Africa				
4.6	9.—With Peary in the ArcticDonald B. McMillan				
**	16.—The Coast of Brittany and the Industries of the People				

PUBLIC LECTURES ON HOLIDAYS

^{*} On March 12, owing to the absence of Dr. Hovey, this lecture was delivered by Mr. R. C. Andrews.

 $[\]dagger$ On March 26 and April 30, owing to the absence of Mr. Brown, this lecture was delivered by Mr. R. C. Andrews.

COLUMBIA UNIVERSITY LECTURES In coöperation with the Museum

A series of lectures	on Light,	arranged by Columbia	Uni-
versity and begun in	1908, was	continued as follows	(Dr.
Richard C. Maclaurin,	lecturer):		

January	6.—	VI.	The Exact Laws of Reflection and Refraction and Their
			Bearing on the Construction of Optical Instruments
4.4	13.—	VII.	Optical Properties of Crystals

- " 20.—VIII. The Principle of Interference and Its Explanation of Various Colour Phenomena
 - " 27.— IX. The Measurement of Light Waves and the Theory of Diffraction

February 3.— X. Some Relations Between Light and Electricity

Four Lectures on Biology, arranged by the Biology Departments of the Normal College and the High Schools of Manhattan, given on Thursday afternoons:

January 14 and May 20.—American Forests and Their	Uses
	George H. Sherwood
February 18.—Our Atlantic Fisheries	Hermon C. Bumpus
March 18.—Public Health	Josephine Baker
April 15.—Natural History of Animals	Henry E. Crampton

11.—The Atmosphere

" 18.—Combustion and the Flame

HOSPITALITY TO SCIENTIFIC SOCIETIES

Many are the requests that are received by the Museum from various scientific societies and organizations for the use of the lecture and conference rooms, and so far as it is consistent with the aims of the institution, these requests have been granted.

On February twelfth was held the celebration of the one hundredth anniversary of the birth of Charles Robert Darwin and the fiftieth anniversary of the publication of "The Origin of Species." At this time there was unveiled a bronze bust of Darwin, the work of Mr. William Couper and the gift of the New York Academy of Sciences. The presentation address was made by Mr. Charles Finney Cox, the Academy's president, and the bust was accepted on behalf of the Trustees of the Museum by President Henry Fairfield Osborn. The exercises were held in the Synoptic Hall, which, in view of the permanent installation of the bust and of the exhibit of the zoölogical material so closely associated with his name, was rededicated by the Trustees as the "Darwin Hall of Invertebrate Zoölogy."

Another gathering of note was the Twenty-seventh Stated Meeting of the American Ornithologists' Union, one of the oldest scientific organizations in America. The members were the guests of the Museum from December sixth to the tenth, and reported a successful series of meetings.

Two special exhibits, which attracted many visitors and which were enjoyed by all, were the Annual Exhibition of the National Sweet Pea Association (held July 7 and 8) and the Annual Exhibition of the Horticultural Society of New York (held November 3 to 7). The latter occupied the foyer and the three adjoining halls, and the display was one of exceptional beauty. The attendance at this exhibition was more than 30,000.

The following is a complete list of the societies and organizations which were the guests of the Museum in 1909:

American Bison Society

American Ethnological Society

American Ornithologists' Union

American Psychological Association, New York Branch

Audubon Society of the State of New York

Brooklyn Entomological Society

Century Association

Charity Organization Society

Geological Society of America

Horticultural Society of New York

Linnæan Society of New York

Naples Table Association

National Association of Audubon Societies for the Protection of Wild Birds and Animals

National Sweet Pea Association

New York Academy of Sciences

New York Entomological Society

New York Microscopical Society

New York Mineralogical Club

Palæontological Society

Playground Association of America

Torrey Botanical Club

West Side Natural History Society

III. EXPLORATIONS, COLLECTIONS AND EXHIBITIONS

EXPLORATIONS.—The field operations of the Museum, through its expeditions and field agents, have been quite as extensive as in former years. The funds appropriated by the

City cannot be used for the maintenance of these parties, and it is largely through the income from the bequest of Mr. Jesup that this work has been carried on. During the past year the Museum has had representatives in the following localities:

EXPLORATIONS BY MUSEUM PARTIES OR REPRESENTATIVES

In United States

Alaska	Massachusetts	Оніо
ARIZONA	Michigan	VIRGINIA
FLORIDA	MONTANA	Wisconsin
MAINE	New Mexico	Wyoming
	NORTH DAKOTA	

In Foreign Countries

Arctic America	Canada
Ellesmere Land	JAMES BAY
GREENLAND	Quebec
SOUTHAMPTON ISLAND	ONTARIO
BRITISH COLUMBIA INDIA	Рипле

BRITISH COLUMBIA	India	PHILIPPINE ISLANDS
BRITISH EAST AFRICA	JAPAN	Samoa
CELEBES	Korea	Таніті
EGYPT	Mexico	TRINIDAD
HAWAII	NEW ZEALAND	VENEZUELA
	Nicaragua	

MINERALS

DEPARTMENT OF MINERALOGY.—The Bement Collection of Minerals, presented to the Museum several years ago by Mr. J. Pierpont Morgan, is so extensive that cataloguing it in an adequate manner is no small task. The special card catalogue of this collection is nearing completion. More than 16,000 cards have been written, and less than 1,000 specimens remain to be identified.

The income from the Bruce Fund has again been usefully applied toward enriching the collections, and fifty-five specimens, either quite new to the collections, or important for their possession of new features or great beauty, have been added in this way.

Owing to limited space, an appropriate installation of the minerals cannot now be made, but it is expected that this will be remedied when the collections are rearranged in the new hall in the west wing.

A FLORIDA ROOKERY. Reproduced from studies made by Mr. Frank M. Chapman in March, 1908, at Cuthbert Rookery in the great Mangrove Swamp south of the Everglades. (North American Ornithology Fund)

MAMMALS AND BIRDS

DEPARTMENT OF MAMMALOGY AND ORNITHOLOGY.—Important additions have been made to the collections of both mammals and birds. These include mammals from Nicaragua, the Philippine Islands and Arctic America, and birds from Japan, Formosa and Nicaragua.

The most important collection received during the year includes a large series of musk-oxen, a still larger series of the Peary caribou, a number of walrus skulls and scalps, a series of narwhal tusks, and a large number of lemmings and fœtal specimens of seals, walrus, narwhal, arctic fox and lemming in alcohol. All of the above was obtained by Commander Robert E. Peary in northern Ellesmere Land and Greenland and turned over to the Museum by the Peary Arctic Club. Other desirable additions were several antelope and specimens of big game from British East Africa, the gift of Messrs. E. Hubert Litchfield, Bayard Dominick, Jr., and Henry Sampson, Jr.

Several mammals and birds in the flesh have been received from the New York Zoölogical Society and the Central Park Menagerie, and we wish to acknowledge these.

The mammals acquired during the year number 625; the birds, 1,616 specimens.

The department has been fairly well represented in the field. Mr. Roy C. Andrews of the Museum staff made a trip early in the year to Tadousac, Quebec, to obtain specimens of the smaller cetaceans, securing three skeletons and a series of skulls of the white whale. Later he was sent to the Philippine Islands to join the staff of the steamer "Albatross" of the United States Fisheries Bureau, to make collections of natural history material in the interest of the Museum.

Mr. R. M. Anderson has continued his explorations in Arctic America in connection with Mr. V. Stefánsson, but as yet no definite report of his work has been received. Mr. Anderson is expected to come out in the summer of 1910.

Mr. M. A. Carriker, Jr., who has planned a long collecting trip to South America, and is now at work in Venezuela, has been commissioned to procure mammal materials for us.

A small instalment from the island of Trinidad has already been received.

Mr. W. B. Richardson has finished his work for the Museum in Nicaragua, having sent us during the year 177 mammals and 753 birds.

By far the most important and the best equipped expedition was sent into the Belgian Colony of the Congo under the direction of Messrs. Herbert Lang and James Chapin. It is the purpose of this expedition to make a biological survey of the Congo, paying particular attention to the smaller and less conspicuous animals. Owing to the very cordial relations existing between the Museum and the Belgian officials, our representatives have been able to secure unusual concessions, and everything points to very successful results. Messrs. Lang and Chapin entered the Congo in June, and on August 14 were at Stanleyville, whence they were about to journey into the Upper Ituri district for an absence of six months.

The entire expense of this expedition has been borne by several friends of the Museum, as noted in the financial statement, and the Belgian government contributed \$1,329.13 toward the work.

An event of the year was the opening of the west side of the gallery of Habitat Bird Groups. This was signalized by a reception to the patrons and bird lovers, which was followed by a special reception to Members. Both of these were well attended.

These groups show in a striking manner the home life of typical North American birds in their natural surroundings, and their preparation has been made possible through the generous contributions of the subscribers to the North American Ornithology Fund. The groups furnished during the year include the Bahama Island, the Cuthbert Rookery, the Golden Eagle, the Ptarmigan, the Klamath Lake, the Sage Hen, the Wild Goose, the Grebe, and, finally, the Loon and the Turkey Buzzard, which complete this important series.

The wide-spread interest in this method of presenting bird life to the public induced a number of friends of the Museum to subscribe to a second bird group fund, and under this grant a series of seasonal bird groups is being prepared. Mr. Chapman has already undertaken some of the necessary field work.

The routine work of the department has progressed. Fire-proof storage cases of superior design have been devised and constructed for the skins of large mammals, and the study collection has been in part rearranged.

In addition to his department duties, the Curator has continued the editorship of the *Bulletin*, a task which absorbs more and more of his time.

EXTINCT MAMMALS AND BIRDS

Department of Vertebrate Palæontology.—The activities of this department in the field were limited to two expeditions, both of which were very successful: one to the Laramie Cretaceous of Montana, under the direction of Mr. Barnum Brown; the other to Wyoming for exploration of the Tertiary formations of the Wind River Basin, under Mr. Walter Granger.

Among Mr. Brown's finds, especially noteworthy are a nearly complete skeleton and a complete skull and jaws of the gigantic horned dinosaurs or ceratopsians, and portions of three skeletons of a new orthopodous dinosaur.

After concluding the work in Montana, Mr. Brown proceeded to Didsbury, Alberta, Canada, and made a reconnaissance in this region, where he found abundant fossil remains and a fertile field for future work.

In Wyoming, Mr. Granger and his party explored the fossil beds of the Beaver Divide, a region which apparently had not previously been worked by collectors, the Lost Cabin region, Muddy Creek on the Shoshone Reservation and the Crowheart Butte. The material he obtained consists chiefly of small mammals, and, while not of a character to make showy exhibition specimens, it is especially valuable from a scientific standpoint. The geologic results of this expedition are especially noteworthy.

Considerable attention has been given by Dr. Matthew to perfecting the catalogue of the department material. Especially has he devoted his time to the preparation of a catalogue of the published specimens.

Pending the assignment of a new exhibition hall, few changes have been made in the exhibition series, the present congested condition of the halls making new additions imprac-Several specimens have been or are being mounted for exhibition. Among these mention may be made of skeletons of three of the ancient and peculiar reptiles and amphibians of the Permian Period, Diopeus, Diadectes, Ervops, which are among the oldest of large land animals; a skeleton of Camptosaurus, a small herbivorous dinosaur; a skeleton of Tyrannosaurus, the gigantic carnivorous dinosaur: a skeleton of Hesperornis, the extinct toothed diving bird of the Cretaceous seas, and a Trachodon skeleton with skin. This last. perhaps, is the most important acquisition of the year. absolutely unique, showing the character of the body covering of this giant dinosaur. It was found in Wyoming in 1908 by Mr. Charles H. Sternberg, and is the gift of Mrs. Morris K. Jesup.

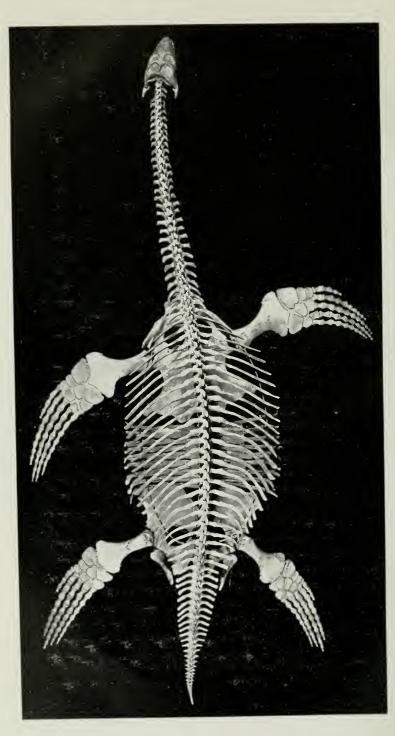

Several desirable additions have been made through exchange with other institutions and negotiations are pending which will greatly increase our collections.

The staff has displayed its usual activity in research, as evidenced by the papers published, which are enumerated under the section "Publications."

LIVING AND EXTINCT REPTILES, BATRACHIANS AND FISHES

Department of Ichthyology and Herpetology.—Until lately the reptiles, fishes and batrachians have been cared for by the Department of Invertebrate Zoölogy, but realizing the need of developing this branch of the Museum's collections, the Trustees created a Department of Ichthyology and Herpetology, which was organized in July and Dr. Bashford Dean of Columbia University, who had been Curator of the Division of Fossil Fishes of the Museum's Department of Vertebrate Palæontology since 1903, was appointed Curator. Dr. Louis Hussakof, Assistant Curator of Fossil Fishes, Miss Mary C. Dickerson, Assistant on living reptiles and batrachians, and Mr. John Treadwell Nichols, Assistant on living fishes, constitute the staff of the new department.

A Plesiosaur of Extinct Marine Reptile of the Jurassic Period (Cryptochidus exoniensis), from the Oxford Clays, Peterborough, England. Exchange from British Museum, 1902. Restored and mounted, 1909

The study collections have been examined, recatalogued and inventoried. This inventory shows in round numbers the following specimens and species:

Number	of specimens	Number of species
Fishes (living)	2,100	600
Fishes (fossil)	8,900	80 0
Amphibians	1,775	150
Reptiles	4,500	550

The department is fortunate in having a generous fund at its disposal through the endowment of Mr. Cleveland H. Dodge. All important accessions are due to this fund.

In the Hall of Fossil Fishes the acquisition of new material has made desirable certain readjustments in the exhibition series. Above the main entrance a restoration of the jaws of a gigantic shark, *Carcharodon megalodon*, has been displayed. An innovation in the installation is the introduction of an "aquarium" containing a dozen or more models of fishes illustrating the fossils in the adjoining cases. The types represented occur in a single horizon and in a single locality in the Old Red Sandstone of Scotland.

In the Gallery of Recent Fishes few changes have been made. These consist mainly in the introduction of characteristic forms which hitherto have not been represented.

Progress has been made in the preparation of a large bullfrog habitat group by Mr. Dwight Franklin, designed to epitomize the activities and economics of this, our most typical, amphibian.

Collecting has been carried on in Puget Sound by Dr. Edwin C. Starks, under a grant from the Dodge Fund; in North Carolina, by Dr. Hussakof and Mr. Russell J. Coles; on Long Island, by Mr. Nichols, and a well-equipped expedition, under the direction of the Messrs. Ernesto and Alessandro Fabbri, has begun its collecting work among the Florida reefs, on the yacht "Tekla." Almost the entire equipment has been provided by the Messrs. Fabbri, who have also generously offered their vessel and their services for the furtherance of the scientific work of this department.

MODERN INVERTEBRATES—DARWIN HALL

In the past the invertebrates have been in the custody of several departments which were not intimately related. The appointment of Dr. Henry E. Crampton as Curator of the Department, and the addition of Doctors Lutz, Petrunkevitch and Treadwell to the scientific staff made a reorganization desirable which would bring all of the invertebrate material in one department. The previously independent Department of Entomology was fused with this department and Mr. William Beutenmüller was made Associate Curator of Lepidoptera. Later Mr. L. P. Gratacap was made Curator of Mollusca. these changes the insects and molluscs have been brought in closer correlation with those of the other invertebrate groups. For some years the lower vertebrates, including reptiles, batrachians and fishes, have been in the charge of this department; now, however, they have been transferred to the newly established Department of Ichthyology and Herpetology.

The exhibition material in the Darwin Hall has received careful attention, and many new installations have been added to the exhibition. These include a Bahama Echinoderm Group showing an association of echinoderms and other invertebrates in the neighborhood of a coral reef; a Bahama Sponge Crab Group centering about an association of the sponge crab with a large reef sponge; a Bahama Oyster and Mangrove Crab Group, and the Cold Spring Harbor Group showing an association of mussels, fiddler crabs, oysters and other invertebrates commonly found together on the Long Island shores.

The preparators have also completed about twenty models in glass and wax, including specimens of protozoa, polyps, worms and snails. The models illustrate the form and anatomical structure of these organisms which cannot well be illustrated by natural specimens. Other models are in process of preparation.

HALL OF LOCAL INSECTS AND INSECT BIOLOGY

Several changes have been made in the Insect Hall. The taxonomic collection of local insects has been moved from

COLLECTION OF LOCAL INSECTS. Under the joint custody of the New York Entomological Society and the Museum

open cases into cabinets where it is available to the public on request, and the Hoffman Collection of Butterflies has been withdrawn from exhibition because many of the beautiful specimens were deteriorating in the strong light. It has been decided to make this the Hall of Local Insects and Insect Biology.

One side of the hall has been converted into a room where visitors are given every facility for serious study of the local insects. The remaining space is devoted to exhibits which aim to give a fairly thorough course in theoretical and applied entomology. The displays are being arranged according to problems rather than according to taxonomic divisions. For example, one case is being devoted to household insects, another to aquatic insects, one to the geographical distribution of insects, and so on. In the section concerned with social insects, a group of "fungus growing ants" has been installed, and a large group of "mound building ants" is under construction. This is merely applying to insects the method long used with mammals and birds, namely, that of putting the animals on exhibition in natural positions instead of mounting them on pins.

The New York Entomological Society, with the coöperation of Dr. Lutz, has taken an especial interest in the development of the collection of local insects. This collection has been placed in the custody of the Society and has been installed in a section of the Hall of Local Insects, which is also used by the Society for its meetings,—an arrangement that is mutually advantageous.

The general insect collections have been temporarily continued in charge of Mr. Beutenmüller. During the year 2,800 specimens of Lepidoptera and over 1,200 insects of other orders have been mounted. There are still on hand about 20,000 unmounted specimens of Lepidoptera. The entire collection of colored-winged moths has been arranged and labeled. This collection is an exceedingly valuable one, and is the best extant so far as North American species are concerned.

On account of the extensive reorganization of this department, the scientific work has been more or less interrupted,

but considerable progress has been made by the members of the staff in their respective investigations.

The department has been well represented in the field. Dr. Crampton visited several groups of islands of the South Pacific in order to extend his studies upon the evolution of terrestrial snails. Among the localities visited were the Society Islands, the Cook Islands, New Zealand, Tonga Islands, Samoa, Fiji, and Hawaii. In addition to zoölogical collections, Dr. Crampton secured considerable anthropological material.

A trip to Mexico and Texas was undertaken by Dr. Alexander Petrunkevitch during the months of July and August, in order to collect spiders and to investigate their habits. Dr. Petrunkevitch brought back with him a valuable collection comprising many fine specimens not only of spiders but of other invertebrates and also of reptiles and amphibians. His collections were made in spite of extremely adverse conditions caused by unexpected floods.

An expedition to Dry Tortugas was undertaken by Prof. Aaron S. Treadwell during the summer months. Professor Treadwell secured a valuable series of the annulates of these islands.

Mr. Miner spent the months of July and August in the Woods Hole region collecting invertebrates for the Museum's study collections and gathering data for models and groups for the exhibition series. With the aid of several members of the preparation staff many sketches of living invertebrates were secured, and a large collection of preserved material was brought back to the Museum.

The fifth expedition was to the vicinity of the Ashokan Watershed, under the direction of Professor Treadwell, who undertook the work of making a biological survey of that region. The funds for financing the expedition were contributed by Mr. S. D. Coykendall.

EXTINCT INVERTEBRATES

DEPARTMENT OF GEOLOGY AND INVERTEBRATE PALÆON-TOLOGY.—It is with regret that we announce the retirement at the end of the year of Professor R. P. Whitfield from active service in the department. Advancing age and continued ill-health have made it necessary for him to give up his work, and the Trustees have taken pleasure in appointing him *Curator Emeritus* of the Department. Professor Whitfield came to the Museum in 1877, and during this period of more than thirty-two years he has labored efficiently in developing the Museum's collection of fossil invertebrates.

Dr. Edmund Otis Hovey, who has been in the department for sixteen years, first as Assistant Curator and later as Associate Curator, has been promoted to the curatorship, the appointment dating from January 1, 1910.

During the past year the collections have been enriched through the purchase of a slab about five feet square showing sixty-eight bodies (with arms) of the crinoid *Uintacrinus socialis* and a giant lamellibranch shell, *Inoceramus platinus* (?), more than four feet across. Both of these specimens are from the Niobrara Cretaceous beds of Kansas. Another important purchase was that of a series of Cretaceous fossils from the Mt. Lebanon district of Syria.

The geological material of the department has been under the immediate care of the Associate Curator, Dr. Edmund Otis Hovey. Under his direction the routine work of accessioning and cataloguing the material received has been accomplished. In addition to his regular department work, Dr. Hovey has continued his editorship of the *Museum Journal* and the Guide Leaflets, in which he has been ably assisted by Miss Mary C. Dickerson.

Among the material acquired during the year, first place must be given to the meteorites. Although the three Cape York meteorites (one of which is the largest known), or the "Peary" meteorites, as they are sometimes called, have been on deposit in the Museum for several years, it was not until 1909 that their purchase was finally concluded and that these unique specimens actually became the property of the Museum. This was accomplished largely through the instrumentality and generosity of Mrs. Morris K. Jesup.

The acquisition of three such specimens is noteworthy, but in addition the Museum has acquired by purchase a twentypound fragment (the largest known) of the Modoc stone meteorite, and the Guffey iron meteorite weighing 682 pounds. The last is new to science, and we have all that is known to be in existence of the specimen. The addition of these five specimens gives the Museum one of the largest collections of meteorites in the world, and one which can never be duplicated.

Other gifts of note are a series of ores illustrating the copper and silver deposits of the Calumet and Hecla Mines, donated by the Calumet and Hecla Mines Company, and an unusually well preserved large fossilized tree stump from an abandoned anthracite coal mine under Scranton, Pennsylvania, received from the Delaware, Lackawanna and Western Coal Company. Through the financial aid of Dr. C. E. Slocum, of Defiance, Ohio, and with the coöperation of the Kelley's Island Lime and Transport Company, the Museum has secured two blocks of limestone 8' x 10' and 4' x 4' respectively, from Kelley's Island, Ohio, the surface of each showing deep and perfect glacial grooves as well as glacial polishing.

LIVING AND EXTINCT RACES OF MEN

DEPARTMENT OF ANTHROPOLOGY.—Special attention has been given to the material in the exhibition halls. In the Northwest Coast Hall the collections have been rearranged in a geographical sequence, so that the visitor in passing from south to north through the hall encounters the tribes as if he were actually traveling from south to north in the country. Four new paintings of Arctic scenes by Mr. F. W. Stokes have been added to the Arctic section of this hall, thereby completing the series of mural paintings provided through the courtesy of Mr. Arthur Curtiss James.

In connection with the Hudson-Fulton Celebration, a special exhibition of the archæology and ethnology of Greater New York and the Hudson Valley was installed in the west hall on the first floor, which it is intended shall remain as a permanent part of the North American type series.

The large ethnological collection from the Fiji Islands, the gift of Mrs. Morris K. Jesup, has been catalogued.

Under the direction of Dr. R. H. Lowie, progress has been made in the preparation of the African Hall, for which

KNOWLES, ОКLAHOMA, METEORITE. A nickel-iron meteorite weighing 355 pounds. Length 18 inches, height 14 inches. Found in 1905 near Knowles, Oklahoma

decorative panels, representing African scenes, have been painted by Mr. Albert Operti. In this hall the arrangement will be geographical.

The scientific staff of the department has been augmented by the appointment of Dr. Pliny E. Goddard as an Associate Curator and of Dr. Herbert J. Spinden as an Assistant Curator. Dr. Goddard comes from the University of California and is unusually well equipped to take up ethnological work.

The department has been well represented in the field, nine parties having been actively at work for longer or shorter periods.

Under the special patronage of Mr. Archer M. Huntington and with the advice of the Committee on Primitive Peoples of the Southwest, of which Mr. Huntington is Chairman, the Museum is carrying on extensive exploration and investigation among the Indians of the Southwestern States. This work is being done by Doctors Goddard and Spinden. Dr. Goddard is devoting himself to the nomadic tribes of the area, a work for which he is especially well equipped, and Dr. Spinden is at work among the Pueblo Indians. The culture of these people is extremely complex and in consequence offers an inviting field. Both Dr. Goddard and Dr. Spinden have secured collections which make valuable additions to our exhibition series.

In June Mr. Harlan I. Smith left for the North Pacific coast of America, returning in September. He resumed his archæological reconnaissance, carrying it northward from the northern end of Vancouver Island as far as Skagway, Alaska. He located ancient village sites, shell-heaps and petroglyphs, and secured many photographs. Mr. Smith was accompanied by Mr. Will S. Taylor, a mural artist, who made color studies in oil of the Indians and their environment, which will be the basis of the mural decorations that Mr. Taylor has been commissioned to paint for the Northwest Coast Hall.

During the summer months Mr. Alanson Skinner visited the Northern Ojibway and Eastern Cree of the region south of Hudson Bay where he obtained many notes and specimens. Mr. Skinner also visited the Stockbridge, Oneida, Menominee and Winnebago of Wisconsin, obtaining from the latter an extensive collection, especially rich in household utensils and costumes.

Mr. Gilbert L. Wilson made a second visit to the surviving Hidatsa and Mandan Indians in North Dakota to continue his ethnological research. He reports this work especially successful.

Captain George Comer has returned from the Arctic with a good collection from ancient village sites on Southampton Island and the northwestern shores of Hudson Bay.

The Curator himself has visited Doctors Goddard and Spinden in the field and made a general survey of the southwestern region of the United States.

Messrs. Stefánsson and Anderson have continued their work along the shores of the Beaufort Sea, but the report of their work has not been received.

The scientific publications have kept pace with the explorations and investigations. An extra volume of the Anthropological Papers has been issued, besides several other papers in Vol. II. The contributors have been Doctors Wissler and Lowie, and Messrs. Skinner, Finch, Bolton, Harrington, Schrabisch and Speck.

Among the accessions, mention should be made of a Hawaiian feather cape, the gift of Mr. George S. Bowdoin, and the Starr Philippine Collection, acquired by purchase, consisting of specimens of weapons, household utensils, fishing and hunting implements, clothing and ceremonial objects.

Under an agreement with the War Department, the Museum prepared the Government's Philippine Exhibit at the Alaska-Yukon-Pacific Exposition. The material used for this purpose was part of the collection acquired at St. Louis. The installation was first made in the Philippine Hall of the Museum and later was reassembled at Seattle.

PHYSIOLOGY

DEPARTMENT OF PHYSIOLOGY.—The preparation of the osteological specimens for the Museum falls largely on this department.

For cleaning small skulls and skeletons, the digestion method has proved so effective that it has been possible to preserve material which it would have been necessary to discard if the grosser methods of maceration had been used.

During the year, 2,262 skulls, 75 skeletons, 16 sterna, 93 sets of leg bones and the appendages of four birds have been prepared for exhibition or study purposes. The most important among these are the skeletons of one giraffe, two whales, one blackfish, one rhinoceros and one goose-fish.

In addition to the regular work of the department, a considerable portion of the assistant's time has been occupied in the numbering, cataloguing and assorting of specimens in the Department of Mammalogy.

WOODS AND FORESTRY

With the approval of the Committee on Woods and Forestry, of which the Honorable Gifford Pinchot is Chairman, the Jesup Collection of North American Woods is being rearranged and installed in a way to bring out more clearly the classification of trees, their relationship and their economic uses.

THE LIBRARY

DEPARTMENT OF BOOKS AND PUBLICATIONS.—It is gratifying to note the progress made in the growth and development of the library. As stated in an earlier report, the purpose of the Curator is to build up a special library of natural science, and therefore no effort is made to secure books not germane to the work and research of a museum of natural history. More and more is our library being recognized by workers in science as the centre where such publications may be consulted. During the year the following new accessions have been received: bound volumes, 1,359; unbound volumes, 632; numbers, 6,369, and pamphlets, 1,495. The working library at the close of 1909 numbered volumes 40,000 and pamphlets 20,000.

Noteworthy gifts have been received from Miss Grace H. Dodge, Prince Ludwig Salvator, Messrs. Anson W. Hard, William G. DeWitt and J. Pierpont Morgan and Professor Ernst Haeckel. The bibliographic catalogue has been increased by the intercalation of 12,706 cards received from

the Concilium Bibliographicum, and a like number has been distributed in the series on deposit.

PUBLICATIONS

Scientific research has been carried on extensively during the past year, the sum of \$16,777.01 having been expended on the publication of the results.

A full list of the scientific publications of the Museum issued in 1909, as received by the Curator for distribution, follows:

DEPARTMENT OF GEOLOGY AND INVERTEBRATE PALÆONTOLOGY

Bulletin, Volume XXVI

W. J. Sinclair. "The Washakie, a Volcanic Ash Formation." (Pages 25-27.)

DEPARTMENT OF MAMMALOGY AND ORNITHOLOGY

Bulletin, Volume XXVI

- J. A. Allen. "Mammals from British East Africa. Collected by the Tjäder Expedition of 1906." (Pages 147-175, with 10 text figures.)
- J. A. Allen. "The White Bear of Southwestern British Columbia." (Pages 233-238, with 4 text figures.)
- J. A. Allen. "Further Notes on Mammals from the Island of Hainan, China." (Pages 239-242.)
- J. A. Allen. "Mammals from Shen-si Province, China." (Pages 425-430.)
- Roy C. Andrews. "Observations on the Habits of the Finback and Humpback Whales of the Eastern North Pacific." (Pages 213-226, plates xxx-xl.)
- Roy C. Andrews. "Further Notes on Eubalana glacialis (Bonn.). (Pages 273-275, plates xlvi-l.)
- D. G. Elliot. "Descriptions of Apparently a New Species and Subspecies of *Cebus*, with Remarks on the Nomenclature of Linnæus's *Simia apella* and *Simia capucina*." (Pages 227-231.)
- John Treadwell Nichols. "A Note on the Dolphins (Coryphana equisetis and Coryphana hippurus." (Pages 131-133, with 2 text figures.)
- L. S. Quackenbush. "Notes on Alaskan Mammoth Expeditions of 1907 and 1908." (Pages 87-130, plates xvii-xxv.)

DEPARTMENT OF VERTEBRATE PALÆONTOLOGY

Bulletin, Volume XXVI

- Walter Granger. "Faunal Horizons of the Washakie Formation of Southern Wyoming." (Pages 13-24, plates ii-vi, with 3 text figures.)
- A. Hermann. "Modern Laboratory Methods in Vertebrate Palæontology." (Pages 283-332, plates lii-lvii, with 18 text figures.)
- W. D. Matthew. "Observations upon the Genus Ancodon." (Pages 1-8.)
- W. D. Matthew and Harold J. Cook. "A Pliocene Fauna from Western Nebraska." (Pages 361-414, with 27 text figures.)
- H. F. Osborn. "New Carnivorous Mammals from the Fayûm Oligocene, Egypt." (Pages 415-424, with 9 text figures.)

Memoirs, Volume IX, Part VI

W. D. Matthew. "The Carnivora and Insectivora of the Bridger Basin, Middle Eocene." (Pages 289-567, plates xlii-lii, with 118 text figures.)

DEPARTMENT OF ANTHROPOLOGY

Anthropological Papers, Volume II

- Robert H. Lowie. "The Northern Shoshone." (Fages 165-306, plate i, with 20 text figures.)

- L. Hussakof. "The Systematic Relationships of Certain American Arthrodires." (Pages 263-272, plate xlv, with 8 text figures.)

Memoirs, Volume IX, Part V

Bashford Dean. "Studies on Fossil Fishes (Sharks, Chimæroids and Arthrodires)." (Pages 209-287, plates xxvi-xli, with 65 text figures.)

III. MEMBERSHIP

The receipts from membership are an important item in the Museum's income and continuous efforts are made to secure new members. During the past year the results have been especially gratifying.

The new Members number 348, and as the loss through death and resignation is 114, the net gain is 234. It is a pleasure to record that this is the largest number added during a single year in the Museum's history, an indication of the increased interest in the work of the institution.

On December 31, 1909, the total membership was 2,382, divided into classes as follows: Patrons, 103; Fellows, 41; Honorary Fellows, 2; Life Members, 427; Sustaining Members, 17; Annual Members, 1,792.

NEW MEMBERS

The following persons were elected Patrons:

Mrs. Andrew Carnegie James Douglas
Thomas De Witt Cuyler George J. Gould
W. K. Vanderbilt

The following persons were elected Fellows:

Mrs. Henry O. Havemeyer *Miss Caroline Phelps Stokes
Miss Olivia E. Phelps Stokes

Baron Ludovic Moncheur was elected an Honorary Fellow.

^{*} Deceased

The following persons were elected Life Members:

DR. JOHN HENDLEY BARNHART JAMES MCLEAN MRS. EMMONS BLAINE W. B. BOURN GEORGE W. BRACKENRIDGE CHARLES LYMAN BRINSMADE S. B. CHAPIN SAMUEL POMEROY COLT R. R. CORNELL MRS. DAVIES COXE WILLIAM R. DECEASED TRUSTEES AND MEMBERS

It is with a profound sense of our loss that we announce the death of the following Trustees and Members during the year 1909:

Trustees

CORNELIUS C. CUYLER

D. O. MILLS

Patrons

MRS. WILLIAM E. DODGE

MISS PHEBE ANNA THORNE

Fellows

MISS CAROLINE PHELPS STOKES RUTHERFURD STUYVESANT

Life Members

THEODORE K. GIBBS

W. B. ISHAM

John N. A. Griswold

JOHN S. KENNEDY

E. H. HARRIMAN

FORDHAM MORRIS

In appreciation of Mr. Cuyler's interest in the Museum, the Trustees adopted the following Minute at the regular Quarterly Meeting of the Board, November 8, 1909:

It is our very sad duty to record the untimely death of

CORNELIUS C. CUYLER

at Biarritz, France, on July 31, 1909.

Mr. Cuyler was elected a Trustee on February 8, 1904, to succeed the Honorable Abram S. Hewitt. On the decease of Mr. Jesup, he became the especial representative of that family. During the year 1909 he served on the Committee on Buildings and Plans and on Finance.

He began his service for the Museum with his usual optimism, whole heartedness and sound judgment, and was full of pride and hope as to his future connection with its development.

In common with many other institutions which he served with rare fidelity and devotion, we deeply mourn his loss and shall miss him at our councils. While the death of Mr. Mills did not occur until January 3, 1910, we desire to record in this, the Report of 1909, the resolution which was adopted at the Annual Meeting of the Trustees, February 14, 1910:

This Board records with sorrow its tribute to the late

DARIUS OGDEN MILLS

for twenty-eight years one of its number.

Mr. Mills was elected a Trustee February 13, 1882, and a year later was made a member of the Finance Committee, on which he continued to serve until his death. He was one of the four members of the Committee appointed in 1892 to consider arrangements for educational coöperation, and he also served on the Nominating Committee and was its Chairman for over fifteen years.

The Museum is indebted to Mr. Mills for many

generous gifts.

Since the foundation of the Museum forty-odd years ago many prominent and distinguished men have served on the Board of Trustees, but none whose presence was more welcome than that of Mr. Mills. Quiet and gentle in manner, sound in judgment and wise in counsel, modest and simple but full of good sense, just and true in every dealing, he was loved and appreciated by all who knew him. His death on January third leaves his fellow Trustees of this Board with a feeling of profound sense of loss and with the greatest admiration for his fine and lovable qualities of character.

IV. FINANCES, MAINTENANCE, ENDOWMENT

The financial transactions of the Museum have been carried in three separate accounts, namely, the City Maintenance Account, the General Account and the Special Funds Account, all of which are described later. The details of the receipts and disbursements thus classified will be found in the Treasurer's Report, pages 53 to 63 inclusive. All books and vouchers of these accounts have been duly examined and certified by the Audit Company of New York.

CITY MAINTENANCE ACCOUNT.—According to the terms of the contract between the City and the Trustees it is the duty of the City to provide for the maintenance of the Museum and the up-keep of the building. During the past year, the City appropriated \$180,000 for this purpose and as usual the receipts and expenditures have been carried in an account separate from the other moneys of the Museum. Generous as this sum may seem, it is quite insufficient to meet all the expenses of maintenance, and items to the amount of \$36,652.01 legitimately chargeable to the City have been paid from the funds of the Trustees. The need of a larger maintenance fund is apparent and it is expected that in the coming year it will be increased to \$200,000, the maximum amount which the law allows.

GENERAL ACCOUNT.—The moneys of this account are derived from the interest on invested funds, membership and sales. The total net receipts were \$154,018.51, the principal items of which were as follows:

Interest on bequest of Morris K. Jesup\$49,600.00
Interest on General Endowment 50,251.25
Life Members 7,100.00
Sustaining and Annual Members
Balance of contribution of 1908 by Mrs. Morris K. Jesup, which
was applied to the purchase of the Cape York or "Peary"
meteorites

It was Mr. Jesup's wish, as stated in his will, that the income of his bequest should not be used for maintenance purposes, but for the enlargement of the collections and the prosecution of the scientific work of the institution. In carrying out the terms of the bequest, the Trustees have devoted this money to the support of field parties in Arctic America,

Hudson Bay, British Columbia, Alaska, the Southwest and the Philippines, and to the purchase of important collections and specimens, including the Starr Collection of African Ethnology, the Benedict Collection of Philippine Ethnology, the Palawan Collection of Mammals and Birds, a collection of mammals and birds from Nicaragua, a rare skeleton, with skin, of the dinosaur *Trachodon*, the Modoc and Guffey meteorites, the Mexican Codex, and several objects from the Maori of New Zealand.

TRUSTEES SPECIAL FUNDS ACCOUNT.—Money given to the Museum for specified purposes is carried in this account. Often some patron, or group of patrons, will undertake the support of a particular piece of work or will assist in acquiring an important collection. Such contributions supplement the General Account very materially.

Usually the financial transaction relating to such a matter will be found in the Special Funds Account.

The following shows the total expenditures by the City during the year 1909, as compared with the expenditures by the Trustees from funds derived from all sources, together with the increase of collections by direct gift the cost of which does not pass through the Treasurer's books:

Expenditures by the City........\$180,048.69 Expenditures by the Trustees....... 208,031.51

TRUSTEES PERMANENT ENDOWMENT.—The Permanent Endowment is the backbone of the steady development of the Museum and it is for this reason that a larger endowment is imperative. The only additions that have been made to this fund during the year are the bequest of \$10,000 of Mr. William R. Sands, a Life Member of the Museum, and the two patronships of \$1,000 each of Mrs. Andrew Carnegie and Mr. Thomas DeWitt Cuyler. The fund will be further increased by the bequest of \$10,000 of Miss Phebe Anna Thorne, to which her executors intend to add \$15,000, and the bequest of \$100,000 of Mr. D. O. Mills.

Very respectfully yours,

HENRY FAIRFIELD OSBORN

May 1, 1910

President

I Specimen of converter slag.

I Specimen of converter matte.

I Specimen of blast furnace matte.

I Specimen of Pyrrhotite carrying Nickel.

4 Pounds of blast furnace slag (granulated).

NORTH STAR MINES CO., Grass Valley, Calif.

40-pound section of vein of the North Star Mine and a 2-ounce specimen of vein carrying free gold.

L. D. RICKETTS, Cananea, Sonora, Mex.

1 Specimen Sphalerite.

STANDARD PLUNGER ELEVATOR CO., New York City.

9 Drill-core specimens.

By Exchange

OTTO F. PFORDTE, Rutherford, N. J.

8 Specimens of Zincite, Franklinite, etc., from Ogdensburg, N. J.

7 Specimens of Willemite, Franklinite, Garnet and Chalcophanite from Franklin and Ogdensburg, N. J.

By Purchase

- I Slab of Limestone containing Orthoceratites.
- I Haploscapha shell, four feet high.
- "Modoc" Stone Meteorite, 20 lbs., 3 oz., Scott Co., Kan.
- "Guffey" Iron Meteorite, 682 pounds, Fremont Co., near Guffey, Col.
- I Uintacrinus slab containing 68 bodies.
- "Brenham" Meteorite, second largest fragment in existence of siderolite form, Kiowa Co., Kan.

THROUGH MUSEUM EXPEDITIONS

- 100 Specimens of iron ore, copper and associated rocks from Marquette, Ishpeming and Houghton, Mich. Collected by Dr. E. O. Hovey.
 - 12 Specimens of Hematite, Country Rock and Jaspilite from Oliver Mine, Ishpeming, Mich. Collected by Dr. E. O. Hovey.
 - 2 Blocks of Limestone 8' x 10' and 4' x 4' respectively, showing glacial grooves and fossils, from Kelley's Island, Ohio. Collected by Dr. E. O. Hovey. Fund supplied by Dr. C. E. Slocum, Defiance, Ohio.

INVERTEBRATE PALÆONTOLOGY

By GIFT

BARNUM BROWN, New York City.

30 Laramie Cretaceous fossils from 40 miles east of Glasgow, Mont.

ESTATE OF DR. JAMES W. HALL. 10 Sections of corals.

EDWARD H. HOPPENSTEDT, New York City.

I Slab of worm burrows from Wurtsboro, Sullivan Co., N. Y.

E. H. PASCOE, Geological Survey of India. Large series of fossil Cyrena shells.

GEORGE A. WARDWELL, of the Peary Arctic Expedition.

50 Carboniferous fossils from Lat. 82° 27' north of Greenland.

CHRISTIAN WEBER, Jersey City, N. J.

- 51 Fossil Plants from the Dakota Group, Fort Harker, Kan.
- 21 Coal Measure Plants from Scranton, Pa.
 - I Geode, Warsaw limestone, Illinois.
 - 8 Sand concretions, Stillwater, N. Y.

By Purchase

62 Lamellibranchs, 8 Ammonites, 150 Gastropods, 10 Echinoderms, from Mount Lebanon, Syria.

DEPARTMENT OF MAMMALOGY AND ORNITHOLOGY

MAMMALS

BY GIFT

DANIEL BEARD, Flushing, N. Y.

4 Small mammal skins.

DR. LUCIUS C. BUCKLEY, Bangkok, Siam.

4 Small mammals from Siam.

R. R. CARROLL, New York City.

I Young Greenland Seal, I mounted head of Newfoundland Caribou.

CAPT. B. D. CLEVELAND, New Bedford, Mass.

Jaw of Sperm Whale.

R. COLLINS, through Hon. J. H. Rogers, U. S. Consular Agent, Townsville, Queensland.

Deformed leg of Cow.

MRS. CORNELL, New York City.

Caribou head and mounted Seal.

DEPARTMENT OF PARKS, New York City.

36 Monkeys, I Ocelot, 2 young Leopards, I Lion Cub, I Gray Fox, I Coatimondi, I Grizzly Bear, I Brown Bear, I Cinnamon Bear, 2 Fallow Deer, 2 Axis Deer, I Brazilian Sheep, I Llama, I Camel, 2 Aoudads, 4 Nilghaus, I Porcupine, 5 Opossums. Total, 64 specimens received in the flesh from the Central Park Menagerie.

J. DIXON, Stanford University, Calif.

Topotypes of Reithrodontomys raviventris and R. halicoetis.

G. DWIGHT FRANKLIN, New York City.

I Coney, 2 Rabbits.

L. GIBSON, Schenectady, N. Y.

I Eskimo Dog.

WALTER GRANGER, New York City.

3 Skulls of Pronghorn.

ARTHUR HEINRICH, Baldwin, N. Y.

2 Rabbits.

MRS. R. HURD, Gloucester, Mass.

I Iceland Fox, mounted.

GNEOMAR von KROCKOW, New York City.

I Pair of Chamois horns, 4 pairs of Roebuck horns, I pair of Ariel Antelope horns, I skull of European Hare with malformed incisors.

E. HUBERT LITCHFIELD, B. DOMINICK, Jr., and H. SAMPSON, Jr., New York City.

3 Grant Gazelles, I Thompson Gazelle, I Coke Hartebeest, I Neumann Hartebeest, I fœtal Rhinoceros, skull and cervical vertebræ of Giraffe, I Mongoose, I Hyæna, from British East Africa.

CHARLES S. MEAD, Suffolk, Conn.

3 Shrews.

NEW YORK ZOÖLOGICAL SOCIETY, New York City.

I Pair shed antlers.

Photographs of Wapiti.

G. FREDERICK NORTON, New York City.

Whale transparencies.

PEARY ARCTIC CLUB, New York City.

I Polar Bear skull, 10 Walrus skulls, 10 Narwhal tusks, 50 Muskoxen (skins with skulls and leg bones), 65 Caribou (skins with skulls and leg bones), about 100 Lemmings (in spirits), I Ermine, 5 Walrus fœtuses, I Seal fœtus, I Narwhal fœtus, 2 Caribou fœtuses,—in all, about 250 specimens.

JOHN B. TREVOR, New York City.

Mounted head of Lapland Reindeer.

W. T. VAN RENSSELAER, Salt Point, N. Y.

2 Wild European Hares, I black Woodchuck, from Dutchess County, N. Y.

Col. A. E. WARD, Kashmir, N. India.

20 Small mammals from Kashmir.

FRANK WOOD, New Bedford, Mass.

Complete Whaling Outfit.

By Purchase

2 Specimens of Ursus kermodei; 19 specimens of Wolves, Lynxes and Bears from Minnesota; skeletons of Blackfish and Dolphin from New Zealand; 33 small mammals from Palawan Island P. I.; 38 small mammals from the Island of Trinidad, B. W. I.; 177 specimens from Nicaragua; 28 specimens from Hudson Bay.

THROUGH MUSEUM EXPEDITION

I Harbor Seal, 3 skeletons and 6 skulls of the White Whale, I Racoon.

BIRDS

By GIFT

MRS. H. M. BILLINGS, New York City. Birds' nests.

MRS. J. B. BLOOMINGDALE, New York City.

1 Bittern (mounted).

EDGAR BURKE, Morristown, N. J.

I Least Sandpiper.

ROBERT E. CLARKE, Yonkers, N. Y.

I Reeve's Pheasant.

R. B. CONSTANTINE, South Orange, N. J.

4 Red Jungle Fowls.

HOMER DAVENPORT, Morris Plains, N. J.

I Crowned Crane.

DEPARTMENT OF PARKS, New York City.

24 Swans, I Duck, I Peacock, 5 Pheasants, I Crane, 5 Eagles, 4 Hawks, 2 Owls, 10 Parrots, I Crow.—Total, 54 specimens received in the flesh from the Central Park Menagerie.

DR. JONATHAN DWIGHT, Jr., New York City.

12 Bird skins.

Dr. P. JAMES FAGAN, New York City.

I Canadian Warbler.

Dr. A. K. FISHER, Washington, D. C. 2 Evening Grosbeaks (skins).

G. CLYDE FISHER, DeFuniak Springs, Fla. 8 Skins from Florida.

G. DWIGHT FRANKLIN, New York City.

I Barn Swallow.

O. S. GRINNELL, New York City.

I Canada Goose.

HENRY HALE, Ridgewood, N. J.

Cast of Great Auk's egg.

FRANCIS HARPER, College Point, N. Y.

I Laughing Gull, I Yellow-billed Cuckoo.

ARTHUR HEINRICH, Baldwin, N. Y.

I Red-breasted Merganser.

ADAM HERMANN, New York City.

8 Skins from Patagonia.

DR. JOHN HORNUNG, Ventura, Calif.

25 Beautifully prepared skulls.

DR. JOHN HOWLAND, New York City.

40 Mounted birds, mostly of large size.

D. M. HYMAN, New York City.

3 Mounted Ring-necked Pheasants.

Dr. D. T. KENNEDY, Southampton, N. Y.

1 Hooded Merganser.

EDWIN C. KENT, New York City.

I Blue Goose.

EDWARD LANE, New York City.

I Long-eared Owl.

ROBERT B. LAWRENCE, New York City.

1 Northern Phalarope.

G. E. LODGE, London, England.

8 Skins of Red Grouse and Partridge.

MISS NINA MARSHALL, New York City.

1 Weaver Bird.

W. DEW. MILLER. Plainfield, N. J.

2 Bufflehead Ducks, I Short-eared Owl.

2 Small birds.

HON. MASON MITCHELL, Apia, Samoa.

2 Tooth-billed Pigeons, 3 Fruit Pigeons and I Gallinule.

NEW YORK FOREST, FISH AND GAME COMMISSION, Albany, N. Y.

2 Ptarmigans, 1 Black Grouse, 2 Golden Plovers, 2 Sandpipers, 2 Woodcocks.—Total, 9 specimens received in the flesh.

NEW YORK ZOÖLOGICAL SOCIETY, New York City.

I Ostrich, I Rhea, I Ocellated Turkey.

O'NEILL-ADAMS COMPANY, New York City.

1 Mounted Snowy Owl.

ADAM A. PELHAM, Palenville, N. Y.

Nest and two eggs of Ovenbird.

HARRY C. RAVEN, Bay Shore, N. Y.

2 Ducks and 1 Bittern.

MRS. AGNES ROESLER, New York City.

I Red-shouldered Hawk.

DR. L. C. SANFORD, New Haven, Conn.

4 Ducks, I Red-throated Loon, II skins including a Yellow Rail.

 $\ensuremath{\mathsf{MISS}}$ MARY J. SMITH, New York City.

6 Parrot eggs.

J. O. SNYDER, Palo Alto, Calif.

7 Skins of small birds.

FREDERIC W. STACK, New Rochelle, N. Y.

57 Skins of North American birds.

ARTHUR SUSSMAN, Long Branch, N. J.

I Swan, shot at Manahawkin Bay, N. J.

Hon. JOHN E. THAYER, Lancaster, Mass.

A series of eggs of Heermann's Gull.

Dr. E. LEROY THOMPSON, Nantucket, Mass. Wings, feet and head of a Blue Goose.

E. WALDSTEIN, New York City.

r Parrot.

REV. M. P. WELCHER, Norwalk, Conn.

10 Nests and several eggs.

By Exchange

167 Specimens from Japan; 16 small birds from Lower California; 10 small birds from Costa Rica; 4 large birds from Nebraska; 1 Great Horned Owl from New York.

By Purchase

595 Specimens from Nicaragua; 103 (mostly large) specimens from Palawan, P. I.; 31 Penguins; 2 Jabirus; 7 specimens from Siam; 2 Golden Eagles; 13 eggs of Albatross and Fulmar.

THROUGH LOCAL COLLECTING

358 Specimens, mostly from Long Island, N. Y.

DEPARTMENT OF VERTEBRATE PALÆONTOLOGY

By GIFT

N. H. BROWN, Lander, Wyo.

Skull of Amynodon and skull of a Titanothere found by the donor in Tertiary formations near Lander.

AMORY COFFIN, S. Orange, N. J.

2 Teeth of Mastodon from Eddystone Island, S. C.

KARL HAGENBECK, Stellingen-bei-Hamburg, Germany.

Statuette models of Bos primigenius, Iguanodon, Diplodocus, Glypto-don, Pareiasaurus and Triceratops.

CHARLES LANIER, New York City.

Skull of the Horned Dinosaur *Triceratops*, with the horns exceptionally perfect and of record size, found by George Sternberg in the Cretaceous of Wyoming.

By Exchange

BRITISH MUSEUM, London, England.

Cast of type skull of Hyracotherium.

PALÆONTOLOGICAL MUSEUM, Munich, Germany.

Complete skeleton of *Pterodactylus* from the lithographic limestones of Bavaria,

DARMSTADT MUSEUM, Germany.

Cast of skeleton of Halitherium from the Oligocene of Germany.

UNIVERSITY OF CALIFORNIA, Berkeley, Calif.

Skull and jaws of the Sabre-Tooth Tiger from the asphalt deposits near Los Angeles, Calif.

By Purchase

INCOME FROM MORRIS K. JESUP BEQUEST.

Mummied skeleton of the Duck-Billed Dinosaur Trachodon from the Upper Cretaceous of Wyoming.

Skull, with complete horns, of the Long-Horned Bison, and lower jaws of the Imperial Mammoth, from the Pleistocene of Kansas.

Skull of the Marine Reptiles Clidastes and Toxochelys from the Marine Cretaceous of Kansas.

Skull of the extinct Beaver *Steneofiber* from the Miocene of Nebraska. Skull and associated bones of *Moropus* from the Miocene of Nebraska. Skull of *Mastodon* from the Pleistocene of Indiana.

- 2 Partial skeletons of Pteranodon from the Cretaceous of Kansas.
- 2 Carapaces of gigantic extinct Tortoises from the Miocene of Kansas.

Model of skull and jaws of Prozeuglodon of the Fayûm, Egypt.

Model of skull and jaws of Megaladapis, the giant extinct Lemur of Madagascar.

THROUGH MUSEUM EXPEDITIONS

CRETACEOUS OF MONTANA.

Skeleton of a Horned Dinosaur, probably new; skeleton of a small undescribed Dinosaur and of another specimen probably of the same genus, also skeleton of *Champsosaurus*, all from the Hell Creek Beds of central Montana. Collected by Messrs. Brown and Kaison.

TERTIARY OF WYOMING.

Collection of fossil mammals from the Wind River formation, containing several new species and genera and better specimens of most of the known Wind River mammals; also a number of specimens of fossil mammals from Upper Eocene and Lower Oligocene formations near Lander, Wyo. Collected by Messrs. Granger, Olsen and Stein.

TERTIARY OF EGYPT.

Collection of fossil mammals from the Fluvio-marine formation of the Fayûm district, obtained by Mr. R. Markgraf.

DEPARTMENT OF ICHTHYOLOGY AND HERPETOLOGY

By GIFT

CLEVELAND H. DODGE FUND.

- 7 Fossil fishes from various localities selected from the collection of Dr. F. Krantz, Bonn, Germany.
- I Semionotus capensis, South Africa.
- 10 Teeth of Ptychodus mortoni, Kansas.
- 3 Fossil fishes from the Green River shales, Wyoming, as follows:

 1 Lepidosteus simplex (the best specimen recorded of this rare form), I Dasyatis radians, I Priscacara pealei.
- 70 Species of fishes collected at Naples by Dr. Louis Hussakof.
- 15 Species of fishes collected in Denmark by Mr. John T. Nichols.
- 18 Species of fishes collected on Long Island by Mr. John T. Nichols.
- 4 Mounted fishes.
- 4 Fishes for the study collection.

DEPARTMENT OF ANTHROPOLOGY.

12 Species of fishes, collected near Fort Wrangle, Alaska, by Mr. Harlan I. Smith.

OTTO FALKENBACH, New York City.

I Fistularia and I Chilomycterus.

DR. LOUIS HUSSAKOF, New York City.

5 Coccosteus minor, I Palæospondylus gunni.

Collection of approximately 200 individuals representing about 20 species, collected at Beaufort, N. C.

MRS. AMY KNIPE, Charleston, S. C.

I Tooth of Carcharodon megalodon.

Dr. A. KRAUSSE, Asuni, Sardinia, Italy.

2 Fishes collected in Sardinia.

DR. THEODORE LENS, Military Hospital, Curação.

6 Fishes from Curação.

PROF. C. F. W. McCLURE, Princeton, N. J.

4 Great Sea Lampreys.

NEW YORK AQUARIUM, New York City.

I Sand Shark (local).

Collection of fishes (about 100 specimens) mainly from Bermuda.

PEARY EXPEDITION OF 1908.

6 Trout.

FRANK SEELEY, S.S. "Yumuri."

18 Species of fishes from the Gulf of Mexico.

F. S. SWEET, New York City.

I Mallotus villosus.

BY EXCHANGE

AMHERST COLLEGE, Department of Biology.

I Ichthyodectes hammatus.

HANCOCK MUSEUM, Newcastle-on-Tyne, England.

25 Specimens from the coal measures of Northumberland, as follows: 2 Acanthodopsis wardi, 7 Megalichthys hibberti, 2 Strepsodus sauroides, 10 Ctenodus and 4 Gyracanthus tuberculatus. (These are from the well-known collection of Messrs. Hancock and Atthey.)

NATAL GOVERNMENT MUSEUM, Pietermaritzburg, Natal.

I South African Sawfish (having six gills), Pliotrema warreni.

NEW SOUTH WALES FISHERIES DEPARTMENT, Sydney, Australia. Several Hyperlophus spratellides.

ON DEPOSIT

COLUMBIA UNIVERSITY, New York City, through Department of Zoölogy.

250 Fishes, representing 60 species, from various localities.

REPTILES AND BATRACHIANS

By GIFT

CLEVELAND H. DODGE FUND.

Collection of Amphibians (50 specimens) for use in preparing habitat groups.

1 Galapagos Turtle.

LEE F. BARNUM, Brooklyn, N. Y.

Various Reptiles and Batrachians.

CENTRAL PARK MENAGERIE, New York City.

I Rock Python.

C. F. CLARKE, Havana, Cuba.

I Lizard.

COLUMBIA UNIVERSITY, New York City.

10 Amphibians, mainly African.

HARRY A. DAVIS, S.S. "Kilpatrick."

I Banded Sea-snake (Platurus laticaudatus) from Manila, P.I.

WILLIAM T. DAVIS, Staten Island, N. Y.

2 Gray Tree-frogs (Hyla versicolor).

DEPARTMENT OF MAMMALOGY AND ORNITHOLOGY.

I Skin and skull of Crocodile.

6 Snakes from Formosa.

Several Lizard skins from the Philippine Islands.

Dr. T. B. ENDERS, New York City.

2 Snakes and several reptile eggs.

H. C. FULMER, Stevenson, Ala.

I Lot of Batrachians.

A. HERMANN, New York City.

30 Lizards from various localities.

DR. A. KRAUSSE, Asuni, Sardinia, Italy.

10 Reptiles from Sardinia.

5 Amphibians from Sardinia.

GNEOMAR VON KROCKOW, Brooklyn, N. Y.

I Lot of Batrachians and Reptiles.

DR. THEODORE LENS, Military Hospital, Curação.

I Lot of Lizards.

NEW YORK AQUARIUM, New York City.

3 Turtles and 3 Crocodiles.

LORING OLMSTED, City of Mexico.

About 20 Snakes from Mexico.

DR. ALEXANDER PETRUNKEVITCH, Montclair, N. J.

I Specimen Cacilian from Mexico.

LOUIS RUHE, New York City.

4 European Tree-frogs (Hyla arborea).

MRS. N. A. SHAW, New York City.

I Snake.

ALANSON SKINNER, Staten Island, N. Y.

I Turtle.

DR. ANTHONY WOODWARD, New York City.

I Snake (Heterodon platyrhinos).

CHARLES WUNDER, Dundee Lake, N. J.

I Snake (Heterodon platyrhinos).

By Purchase

I Bullfrog (Rana catesbiana) from Canada.

THROUGH MUSEUM EXPEDITIONS

- I Lot of Reptiles and Batrachians from Ashokan Watershed, N. Y. Collected by Prof. Aaron L. Treadwell and Mr. Gneomar von Krockow.
- I Lot of Reptiles and Amphibians from Mexico. Collected by Dr. Alexander Petrunkevitch.

DEPARTMENT OF ANTHROPOLOGY

BY GIFT

H. E. BARD, New York City.

Ethnological collection from the Philippine Islands.

MRS. J. B. BLOOMINGDALE, New York City.

Pottery vessel from prehistoric grave at Chepu, Peru; Lapp needlecase from Norway.

GEORGE S. BOWDOIN, New York City.

Basket from South Pacific Islands; feather cape from the Hawaiian Islands.

SAMUEL MORRIS CONANT, Pawtucket, R. I.

Stone arrow point from Thonotosassa, Fla.

KENNETH LEE COONTZ, New York City.

Large grooved stone maul found at Yankton, S. D.

J. L. DAVIDSON, Lockport, N. Y.

Skull and human bones from Indian burial place near Lockport, N. Y.

LIEUTENANT G. T. EMMONS, Princeton, N. J.

Rattle from the Chilcotin of British Columbia.

FLINT & COMPANY, New York City.

Saddle and bridle from Morocco.

MRS. EDNA HILLYER FORD, Wautun, Wis.

11 Photographs of Indians of different tribes.

ROBERT F. GILDER, Omaha, Neb.

Parts of three skulls and two pieces of long bones (human) from the George West Farm Mound near Omaha, Nebraska; 4 pieces of skull and 2 scrapers.

GEORGE BIRD GRINNELL, New York City.

12 Indian saddles; 3 back rests; a stone anvil.

BENOIT GUERRY, North Conway, N. H.

Stone ax, North Conway, N. H.

WILLIAM HAGUE, New York City.

Contents of an ancient Indian cache in Laurium, Mich.

EDWARD HAGAMAN HALL, New York City.

Skeleton of dog (nearly complete) and 6 potsherds from Manhattan Island.

FRITZ V. HOLM, New York City.

Set of rubbings of inscription on the Nestorian Tablet in Sian-fu, Shen-si, China.

Dr. U. S. KAHN, New York City.

Head-dress from Abyssinia.

CARLOS LARRABURC, Lima, Peru.

Head-dress of Indians on Rio Ucayali, Peru.

Dr. CARL LUMHOLTZ, New York City.

Girdle woven by the Mayo Indians, State of Sinaloa, Mexico.

HON. MASON MITCHELL, Apia, Samoa.

2 Tibetan scrolls; collection of ancient and modern objects from Tibet and China.

WILLIAM C. MUSCHENHEIM, New York City.

Contents of an ancient Indian shell pit, Spuyten Duyvil, New York City.

Dr. FRANCIS C. NICHOLAS, New York City.

3 Gold nose ornaments (prehistoric) from Yaruman, Colombia.

GEORGE OLSEN, New York City.

Fragments of a steatite pot, Wyoming.

MRS. DAVID PEACOCK, New York City.

Bow and arrow from South America; carved stick (totem) from Sitka, Alaska.

PEARY ARCTIC CLUB, New York City.

Dog sled, snow shoes, cooking apparatus, etc.

CHARLES PERCY, S.S. "Roosevelt."

Whalebone dish, Eskimo.

CHARLES W. PINCKNEY, New York City.

Catlinite pipe from Yankton, S. D.

M. F. SAVAGE, New York City.

6 Steel engravings showing old time customs in Fiji Islands.

ALANSON SKINNER, Staten Island, N. Y.

Ojibway cup-and-ball game made of moose bones, from Missanabie, Ontario, Canada; Seneca-Iroquois costume from Cattaraugus Reservation, New York; collections of archæological specimens from Runyon, Middlesex Co., N. J.; 2 silver bracelets of Ojibway Indians; stone celt from South River, N. J.; archæological collection from Staten Island.

MRS. F. W. SKINNER, Staten Island, N. Y.

Basket of birch bark, Ojibway; flower cut from birch bark, Ojibway.

MRS. E. SUTTON SMITH.

2 Stone axes from Maine; grape shot dug from Bunker Hill; circular stone dug from Copp's Hill.

HARLAN I. SMITH, New York City.

Pair Chinese slippers.

JOHN I. SOLOMON, New York City.

Ornament carved in ivory. Supposed to be an old piece of Singalese carving.

THE LATE HARRIE HAYDON STARKEY, Brooklyn, N. Y. Ethnological collection from Alaska.

NORTON B. TILLOTSON, New York City.

Buffalo-horn spoon and wooden bowl from grave near the Black Hills.

Dr. W. W. TOMPKINS, Charleston, W. Va.

Grooved stone ax from vicinity of Charleston, W. Va.

CHRISTIAN WEBER, Jersey City, N. J.

7 Pottery vessels from Arkansas.
W. A. WELCH, San Antonio, Amazonas, Brazil.

Jointed arrow for fish from Indians of Rio Beni; paddle from Indians of Rio Beni; paddle from Indians of Madre de Dios; pair rubber shoes and rubber ball from Indians of Upper Madeira, Brazil; 2 gourd baskets from Sarterem on Amazon, Province of Para.

MESSRS. G. L. and F. N. WILSON, Minneapolis, Minn. Potsherds from Mandan village site, North Dakota.

MRS. CLARK WISSLER, New York City.

Stone celt from Wayne Co., Indiana; gold pendant—human figure with nose ornament and 23 green stone ornaments and beads, from Llanos of Casanari, Colombia.

S. H. WOLF, New York City.

3 Pieces of pottery from Ruins of Jalapa, Mexico.

FRANK WOOD, New Bedford, Mass.

Shell breast plate from New Mecklenburg.

By Exchange

BERLIN MUSEUM, Berlin, Germany.

21 Casts from stone vokes and palmas, Mexico.

CHICAGO ACADEMY OF SCIENCE, Chicago, III.

19 Ethnological specimens from Africa, Abyssinia, Alaska and the United States,

DR. PAUL EHRENREICH, Berlin, Germany.

12 Photographs of Indians of the Rio Purus, Amazonas, Brazil.

L. A. FUERTES, Ithaca, N. Y.

Seal float from the vicinity of Fort Simpson.

FRANK S. GORDON, Blairstown, N. J.

32 Copper bells (prehistoric) from Jalisco, Mexico.

BYRON E. HOOVER, New York City.

Basket from the Yahgan Indians, Tierra del Fuego.

W. K. MOOREHEAD, Andover, Mass.

Archæological material from Jacobs Cavern and village site, McDonald Co., Mo.

NEW YORK STATE MUSEUM, Albany, N. Y.

Archæological material from an Erie Indian village site at Ripley, N. Y.

Collection of Iroquois archæology from New York and New Jersey. MRS. A. L. ROESLER, New York City.

> Baby carrier with quill and bead work from the Dakota, Pine Ridge, S. D.

ROYAL ETHNOGRAPHICAL MUSEUM, Stockholm, Sweden. Collection of baskets from Africa.

E. THOMPSON SETON, Cos Cob, Conn.

War shirt from the Ogallala Sioux and moose-hide shirt made by Cree Indians.

STÄDTISCHES VÖLKERMUSEUM, Frankfurt a/M., Germany. Ethnographical material from German Colonies in Africa.

GEORGE C. STONE, New York City.

Chinese gun.

THROUGH MUSEUM EXPEDITIONS

Ethnological collection from the Jicarilla Apache of northern New Mexico. Collected by Dr. P. E. Goddard. Provided for by Mr. Archer M. Huntington.

Ethnological and archæological collection from the Penobscot Indians, Old Town, Me. Collected by Mr. William C. Orchard.

Ethnological collection from the Cree and Ojibway of the region of Hudson and James Bays and from the Winnebago of Black River Falls, Wis. Collected by Mr. Alanson Skinner. Provided for by the Morris K. Jesup Fund.

Archæological and ethnological specimens from British Columbia and Alaska. Collected by Mr. Harlan I. Smith. Provided for by the Morris K. Jesup Fund.

Ethnological collection from the Philippine Islands. Collected by Dr. Hugh M. Smith.

Ethnological collection from the Mackenzie River region. Collected by Mr. V. Stefánsson.

Ethnological collection from the Teton Sioux of the Pine Ridge Reservation, South Dakota, and phonograph records from the same. Collected by Dr. J. R. Walker. Provided for by the Morris K. Jesup Fund.

Ethnological collection from the Hidatsa and Mandan of North Dakota. Collected by Rev. Gilbert L. Wilson.

DEPARTMENT OF MINERALOGY

By GIFT

THE MATILDA W. BRUCE FUND.

55 Specimens of minerals, including Antimony, Apatite, Argyrodite, Arsenolite, Benitoite, Beryl, Bakerite, Bismuth, Bismutite, Brochantite, Cassiterite, Cerargyrite, Childrenite, Corundum, Cuprite, Diopside, Dioptase, Graftonite, Hematite, Hexagonite, Iodyrite, Kröhnkite, Malachite, Mullerine, Neptunite, Opal, Orthoclase, Patronite, Phenacite, Phlogopite, Pyrite, Siderite, Silver, Semseyite, Spodumene, Stibiotantalite, Talc, Titanolivine, Topaz, Tremolite, Valleriite, Wollastonite, Wurtzite.

W. BOLES BALDWIN, New York City.

11 Specimens of Opal from Mexico.

CLARENCE S. BEMENT, Philadelphia, Pa.

A beautiful group of radiating Tourmaline from Haddam Neck, Conn.

II. BOOTH, Poughkeepsie, N. Y.

I Crystal of Chondrodite, Tilly Foster, Putnam County, N. Y.

W. H. BRADLEY, C. E, New York City.

One round section (core) taken at 268-foot level below curb, of gneissoid granite, Astoria, L. I.

One round section (core) taken at 2,000-foot level below curb, of gneissoid granite, Astoria, L. I.

W. A. BUCKNER, Arkansas.

- 3 Specimens of Peridotite from the Ozark Diamond Mining Company's land, on the edge of the diamond-bearing Arkansas Diamond Mining Company's land.
- I Specimen of Obsidian, Magnet Cove, Ark.
- I Specimen of Lodestone from Magnet Cove, Ark.

H. CLEARY, C. E., New York City.

Peat specimen from "peat-bog," Centre Street, New York City.

ALBERT S. COFFIN, C. E., New York City.

Section of drill-core in garnetiferous gneiss, 150 feet below curb, at Eighty-seventh Street and Broadway.

JOSEPH DIXON CRUCIBLE COMPANY, Jersey City, N. J.

- I Specimen pure lump Graphite from Ceylon.
- I Specimen flake Graphite with quartz, Ticonderoga, N. Y.
- I Specimen scale gneissoid Graphite, Ticonderoga, N. Y.
- I Bottle of lump Graphite, Ceylon, India.

WALTER GRANGER, New York City.

I Specimen of Gypsum from Wind River Formation, Lost Cabin, Wyo.

ALFRED C. HAWKINS, Sewaren, N. J.

I Specimen of cubical Pyrite in Triassic shales, Piscataway, N. J.

J. F. HEMENWAY, New York City.

Octahedral Sphalerite, "Lucky Inn" Mine, Slocan District, near Raslo, B.C.

CHARLES HOFFSTETTER, Jersey City, N. J.

1 Specimen of Septaria; limonite sheathing on crust, Elk Prairie Jefferson Co., Ill.

ROBERT A. A. JOHNSTON, for Canadian Geological Survey.

1 Specimen of Baddeckite from Baddeck, N. S.

A. L. LACK, New York City.

Tourmaline from 181st Street and Lafayette Avenue, New York City.

A. H. PETEREIT, New York City.

1 Specimen of Calcio-Volborthite from Telluride, Col.

DAVID PROSKEY, Nevada.

600 Minute crystals of Gold from ore at Rawhide, Nev.

T. SAUNDERS, New York City.

1 Specimen of Coccolite (pyroxene), Weaverstown, Warren Co. N. Y.

R. B. SPENCE, Elmira, N. Y.

3 Specimens of crystallized Silver in reticulated octahedrons from Nipissing, Ontario, Canada.

MRS. JAMES SULLIVAN, New York City.

Specimens of various minerals, including Aragonite, Calcite, Natrolite.

OLIVER TIMS, New York City.

1 Specimen of Tourmaline-bearing Rock, Maine.

1 Specimen of Slate, Greenwood Lake, N. J.

BERNARD ZIGRELIUS, New York City.

30 Fragments of Agate, 7 specimens of Copper, 2 specimens of Chlorastrolite, 2 specimens of Thomsonite, from Lake Superior Michigan.

Limestone holding Galena from Isle Royale, Lake Superior.

By Exchange

ROBERT B. GAGE, New Jersey State Survey.

I Specimen of Emplectite from Cobalt, Ontario, Canada.

3 Specimens of Hydrocuprite from Somerville, N. J.

ALFRED C. HAWKINS, Sewaren, N. J.

I Specimen of Chrysoberyl from 122d Street and Morningside Park New York City.

H. S. PECK, Albany, N. Y.

1 Specimen of Barite (with Psilomelane) from McCormick, S. C.

I Specimen of Psilomelane from McCormick, S. C.

1 Specimen of Psilomelane (replacing Asbestos) from McCormick, S.C.

I Specimen of Siderite (with Barite) from Frostburg, Md.

OTTO F. PFORDTE, Rutherford, N. J.

- I Specimen of Breithauptite from Cobalt, Ontario, Canada.
- I Specimen of Chalcocite from Franklin Furnace, N. J.
- I Specimen of Datolite from W. Paterson, N. J.
- I Specimen of Fluorite from Franklin Furnace, N. J.
- I Specimen of Heulandite from W. Paterson, N. J.
- I Specimen of Galena from Franklin Furnace, N. J.
- I Specimen of Galena from Stirling Hill, N. J.
- I Specimen of Erythrite from Cobalt, Ontario, Canada.
- I Specimen of Franklinite from Franklin Furnace, N. J.
- I Specimen of Niccolite from Cobalt, Ontario, Canada.
- I Specimen of Pectolite from W. Paterson, N. J.
- I Specimen of Phlogopite from Franklin Furnace, N. J.
- I Specimen of Smaltite from Cobalt, Ontario, Canada.
- I Specimen of Stilbite from W. Paterson, N. J.
- 2 Specimens of Black Willemite from Franklin Furnace, N. J.

MILTON G. SMITH, New York City.

- 4 Specimens of Orthoclase (Sanidine) from Tonapah, Nev.
- I Specimen of Trona (crystallized) from Owens Lake, Myo Co., Calif.

By Purchase

I Specimen of Natrolite on Datolite from Bergen Hill, N. J.

DEPARTMENT OF INVERTEBRATE ZOÖLOGY

INVERTEBRATES

By GIFT

- MRS. B. ANDERSON-STIGEN, New York City.
 - 3 Pieces of Amber (containing insects).
- G. W. J. ANGELL, New York City.

Various insects from the vicinity of New York and Key West, Fla.

H. G. BARBER, Roselle Park, N. J.

Various Hemiptera.

WILLIAM C. BARBOUR, Succasunna, N. J.

I Slide of Statoblasts of Pectinatella magnifica.

WILLIAM C. BEEBE, New York City.

I Spider (Admetus pumilio) and I Scorpion (Centrurus margaritatus).

REV. T. S. BENDRAT, Boonville, Oneida Co., N. Y.

.2 Spiders (Heteropoda vinatoria L.).

WILLIAM BEUTENMÜLLER, New York City.

I Specimen of Cicindela patruela.

E. A. BISCHOFF, Newark, N. J.

Various Carabidæ.

MRS. J. B. BLOOMINGDALE, New York City.

I Lot of Sponges, Corals, Sea-fans, Echinoderms, Insects and Molluscs.

MRS. M. H. BRISTOL, New York City.

I Wasps' Nest from South America.

MRS. PETER J. BRADY, Brooklyn, N. Y.

I Trap-door Spider Nest.

MRS. N. L. BRITTON, New York City.

I Vial of Annelids from Jamaica and I Sponge from the Bahamas.

EDGAR B. BRONSON, New York City.

2 Goliath Beetles and 4 Cetonid Beetles from Africa.

HENRY BROWN, Paris, France.

A small collection of Butterflies and Moths from Europe.

DR. B. H. BUXTON, Cornell University Medical College, New York City.

4 Myriapods and 6 Arachnids.

C. CHRISTMAN, New York City.

101 Cray-fish (Cambarus bartonii Fab.).

C. F. CLARKE, Havana, Cuba.

I Lot of Scorpions, Millipedes and Spiders.

WILLIAM T. DAVIS, Staten Island, N. Y.

Various Insects, 2 Colonies of *Pectinatella magnifica*, and 1 lot of Annelids and Arachnids.

R. P. DOW, Brooklyn, N. Y.

I Clivina impressifrons.

G. P. ENGELHARDT, Brooklyn, N. Y.

Various Coleoptera.

H. D. EIGHME, Cristobal, Canal Zone, Panama.

I Goliath Beetle.

EDWARD FORSHAY, New York City.

2 Callinectes sapidus.

DWIGHT FRANKLIN, New York City.

2 Horseshoe Crabs (Limulus polyphemus).

COL. EDWARD GEBHARD, Bensonhurst, L. I.

4 Lunar Moths and Cocoons.

D. P. GLOVER, Sparta, N. J.

I Dobson Fly (Corydalis cornuta).

EMIL GRAMM, Germantown, Pa.

I Mantis (Tenodera sinensis).

R. M. HARPER, Tallahassee, Fla.

I Sponge from Everglades, Fla.

EDWARD D. HARRIS, New York City.

30 Cicindelidæ.

A. O. HEINRICH, Baldwin, L. I.

Various Insects and Crustaceans and I Fossil Mollusc.

JOHN HISCOX, New York City.

I Specimen of Libinia emarginata with oyster shell on carapace.

DR. ROBERT T. JACKSON, Cambridge, Mass.

- 1 Specimen Chamostrea albida, Lam., Victoria, Australia.
- 2 Conus anemone, Lam. (var.), Victoria, Australia.
- 5 Natica conica, Lam., Victoria, Australia.

By Purchase

- Lymnæa stagnalis, Planorbis trivolvis (var. macrostoma), from Mackenzie River.
- A collection of Jamaican shells, comprising Helix (Thelidomus and Pleurodonte), Hemitrochus, Helicina, Proserpina, Cyclotus, Alcadia, Cyclostoma, Stenogyra, Varicella, Trochatella, Microceramus, Urocoptis, Brachypodella, Physa.

INCORPORATION

AN ACT

TO INCORPORATE THE

AMERICAN MUSEUM OF NATURAL HISTORY

Passed April 6, 1869

The People of the State of New York, represented in Senate and Assembly, do enact as follows:

Section 1. John David Wolfe, Robert Colgate, Benjamin H. Field, Robert L. Stuart, Adrian Iselin, Benjamin B. Sherman, William A. Haines, Theodore Roosevelt, Howard Potter, William T. Blodgett, Morris K. Jesup, D. Jackson Steward, J. Pierpont Morgan, A. G. P. Dodge, Chas. A. Dana, Joseph H. Choate and Henry Parish, and such persons as may hereafter become members of the Corporation hereby created, are hereby created a body corporate, by the name of "The American Museum of Natural History," to be located in the City of New York, for the purpose of establishing and maintaining in said city a Museum and Library of Natural History; of encouraging and developing the study of Natural Science; of advancing the general knowledge of kindred subjects, and to that end of furnishing popular instruction.*

SEC. 2. Said Corporation shall have power to make and adopt a Constitution and By-Laws, and to make rules and regulations for the admission, suspension and expulsion of its members, and their government, the number and election of its officers, and to define their duties, and for the safe keeping of its property, and, from time to time, to alter and modify such Constitution, By-Laws, Rules and Regulations. Until

an election shall be held pursuant to such Constitution and By-Laws, the persons named in the first section of this Act shall be, and are hereby declared to be, the Trustees and Managers of said Corporation and its property.

- SEC. 3. Said Corporation may take and hold by gift, devise, bequest, purchase or lease, either absolutely or in trust, for any purpose comprised in the objects of the Corporation, any real or personal estate, necessary or proper for the purposes of its incorporation.†
- SEC. 4. Said Corporation shall possess the general powers, and be subject to the restrictions and liabilities, prescribed in the Third Title of the Eighteenth Chapter of the First Part of the Revised Statutes, and shall be and be classed as an educational corporation.*
 - SEC. 5. This Act shall take effect immediately.

STATE OF NEW YORK,
OFFICE OF THE SECRETARY OF STATE.

I have compared the preceding with the original law on file in this office, and do hereby certify that the same is a correct transcript therefrom, and of the whole of said original law.

[L.s.] Given under my hand and seal of Office at the City of Albany, this fourteenth day of April, in the year one thousand eight hundred and sixty-nine.

D. WILLERS, Jr., Deputy Secretary of State.

[†] Section 3. As amended by Chapter 303, Laws of 1898, of the State of New York, entitled "An Act to amend chapter one hundred and nineteen, laws of eighteen hundred and sixty-nine, entitled 'An Act to incorporate the American Museum of Natural History,' relative to its charter."

^{*} Sections 1 and 4. As amended by Chapter 162 of the Laws of 1909, entitled "An Act to amend chapter one hundred and nineteen of the laws of eighteen hundred and sixty-nine, entitled 'An act to incorporate the American Museum of Natural History,' in relation to classifying said corporation and modifying its corporate purposes."

CONTRACT

WITH THE DEPARTMENT OF PUBLIC PARKS

FOR THE OCCUPATION OF THE NEW BUILDING

This Agreement, made and concluded on the twenty-second day of December, in the year one thousand eight hundred and seventy-seven, between the Department of Public Parks of the City of New York, the party of the first part, and the American Museum of Natural History, party of the second part, witnesseth:

Whereas, by an Act of the Legislature of the State of New York, passed April 22d, 1876, entitled "An Act in relation to the powers and duties of the Board of Commissioners of the Department of Public Parks, in connection with the American Museum of Natural History, and the Metropolitan Museum of Art," the said party of the first part is authorized and directed to enter into a contract with the said party of the second part, for the occupation by it of the buildings erected or to be erected on that portion of the Central Park in the City of New York, known as Manhattan Square, and for transferring thereto and establishing and maintaining therein its museum, library and collections, and carrying out the objects and purposes of said party of the second part; and,

Whereas, a building contemplated by said act has now been erected and nearly completed and equipped in a manner suitable for the purposes of said Museum, as provided in the first section of the Act of May 15, 1875, known as Chapter 351, of the Laws of 1875, for the purpose of establishing and maintaining therein the said Museum, as provided by the said last-named act, and by the Act of April 5, 1871, known as Chapter 290, of the Laws of 1871; and,

Contract

Whereas, it is desired as well by the said party of the first part, as by the said party of the second part, that, immediately upon the completion and equipment of said building, the said party of the second part should be established therein, and should transfer thereto its museum, library and collections, and carry out the objects and purposes of the said party of the second part;

Now, therefore, it is agreed by and between the said parties as follows, namely:

First.—That the said party of the first part has granted and demised and let, and doth, by these presents, grant, demise and let, unto the said party of the second part, the said buildings and the appurtenances thereunto belonging, to have and to hold the same so long as the said party of the second part shall continue to carry out the objects and purposes defined in its charter; or such other objects and purposes as by any future amendment of said charter may be authorized; and shall faithfully keep, perform, and observe the covenants and conditions herein contained on its part to be kept, performed and observed, or until the said building shall be surrendered by the said party of the second part, as hereinafter provided.

Secondly.—That neither the party of the first part, its successor or successors, nor the Mayor, Aldermen and Commonalty of the City of New York, shall be in any manner chargeable or liable for the preservation of the said building or the property of the party of the second part which may be placed therein, against fire, or for any damage or injury that may be caused by fire to the said property; but it is agreed that, damages as aforesaid excepted, the said party of the first part will keep said building, from time to time, in repair.

Thirdly.—That as soon after the completion and equipment of said building as practicable, said party of the second part shall transfer to, and place and arrange in said building, its museum, library and collections, or such portion thereof as can be properly displayed to the public therein, and shall have and enjoy the exclusive use of the whole of said building,

subject to the provisions herein contained, and the rules and regulations herein prescribed, during the continuance of the term granted, or until a surrender thereof, as herein provided.

Fourthly.—That the exhibition halls of said building shall, on Wednesday, Thursday, Friday and Saturday of each week, and on all legal or public holidays, except Sundays, be kept open and accessible to the public, free of charge, from nine o'clock A.M. until half an hour before sunset, under such rules and regulations as the party of the second part shall from time to time prescribe; but on the remaining days of the week the same shall be only open for exhibition to such persons, upon such terms as the said party of the second part shall from time to time direct. But all professors and teachers of the public schools of the City of New York, or other institutions of learning in said city, in which instruction is given free of charge, shall be admitted to all the advantages afforded by the said party of the second part, through its museum, library, apparatus, and collections, or otherwise, for study, research and investigation, free of any charge therefor, and to the same extent and on the same terms and conditions as any other persons are admitted to such advantages, as aforesaid.

Fifthly.—That the museum, library and collections, and all other property of said party of the second part, which shall or may be placed in said building, shall continue to be and remain absolutely the property of said party of the second part, and neither the said party of the first part nor the said the Mayor, Aldermen and Commonalty, shall by reason of said property being placed in said building, or continuing therein, have any right, title, property or interest therein; nor shall the said party of the second part, by reason of its occupation and use of said building under this agreement, acquire, or be deemed to have any right, title, property or interest in said building, except so far as expressly granted by this agreement.

Sixthly.—That the said party of the second part shall, on or before the first day of May, in every year, during the continuance of this agreement, submit to the said party of the first part, its successor or successors, a detailed printed report of the

Contract 93

operations and transactions of the said party of the second part, and all its receipts and payments, for the year ending with the 31st day of December next preceding.

Seventhly.—That said party of the first part shall have, at all times, access to every part of the said building for general visitation and supervision, and also for the purpose of the performance of the duties devolved upon it by the laws of the State of New York, or of the City of New York. That the police powers and supervision of said party of the first part shall extend in, through and about said building. That the said party of the second part may appoint, direct, control and remove all persons employed within said building, and in and about the care of said building, and the museum, library and collections therein contained.

Eighthly.—That said party of the second part may, at any time, after the expiration of three, and before the expiration of six, months from the date of the service of a notice in writing to said party of the first part, its successor or successors, or to the Mayor of the City of New York, of its intention so to do, quit and surrender the said premises and remove all its property therefrom; and upon and after such notice, the said party of the second part shall and will, at the expiration of the said six months, quietly and peaceably yield up and surrender unto the said party of the first part and its successors all and singular the aforesaid demised premises. And it is expressly understood and agreed by and between the parties hereto that if the said party of the second part shall omit to do, perform, fulfill or keep any or either of the covenants, articles, clauses and agreements, matters and things herein contained, which on its part are to be done, performed, fulfilled or kept, according to the true intent and meaning of these presents, then and from thenceforth this grant and demise shall be utterly null and void. And in such case it shall and may be lawful for said Department to serve or cause to be served on the said party of the second part a notice in writing declaring that the said grant hereinbefore made has become utterly null and void and thereupon the said party of the first part, its successor or successors (ninety days' time being first given to the said party

of the second part to remove its property therefrom), may reënter, and shall again have, repossess and enjoy the premises aforementioned, the same as in their first and former estate, and in like manner as though these presents had never been made, without let or hindrance of the said party of the second part, anything here contained to the contrary notwithstanding.

Ninthly.—And it is further expressly understood and agreed, by and between the parties hereto, that this agreement may be wholly canceled and annulled, or, from time to time, altered, or modified, as may be agreed, in writing, between the said parties, or their successors, anything herein contained to the contrary in anywise notwithstanding.

In witness whereof, the party of the first part hath caused this agreement to be executed by their President and Secretary, pursuant to a resolution of the Board of Commissioners of said Department, adopted at a meeting held on the thirtieth day of January, in the year of our Lord one thousand eight hundred and seventy-eight; and the said party of the second part hath caused the same to be executed by their President, and their official seal affixed thereto, pursuant to a resolution of the Trustees of the American Museum of Natural History, adopted at a meeting held on the twelfth day of February, in the year of our Lord one thousand eight hundred and seventy-seven.

In presence of D. Porter Lord.

JAMES F. WENMAN,

President Department of Public Parks of the City of New York.

WILLIAM IRWIN.

Secretary Department of Public Parks of the City of New York.

SEAL of the American Museum of Natural History ROBERT L. STUART,

President American Museum of Natural History. Contract

STATE OF NEW YORK,
City and County of New York,

Ss. :

On this 12th day of February, in the year 1878, before me personally came James F. Wenman, President of the Department of Public Parks of the City of New York, and William Irwin, Secretary of the said Department of Public Parks, with both of whom I am personally acquainted, and both of whom being by me duly sworn, said that they reside in the City and County of New York; that the said James F. Wenman is the President, and the said William Irwin is the Secretary of the said Department of Public Parks, and that they signed their names to the foregoing agreement by order of the Board of Commissioners of the said Department of Public Parks, as such President and Secretary.

[SEAL.]

W. C. BESSON, (73) Notary Public N. Y. Co.

95

STATE OF NEW YORK, Ss.:

On this 12th day of February, in the year 1878, before me personally came Robert L. Stuart, the President of the American Museum of Natural History, with whom I am personally acquainted, who being by me duly sworn, said that he resides in the City and County of New York, that he is the President of the American Museum of Natural History, and that he knows the corporate seal of said museum, that the seal affixed to the foregoing agreement is such corporate seal, that it is affixed thereto by order of the Board of Trustees of said American Museum of Natural History, and that he signed his name thereto by the like order, as President of said Museum.

W. C. BESSON,
[SEAL.] (73) Notary Public N. Y. Co.

Recorded in the office of the Register of the City and County of New York in Liber 1426 of Cons., page 402, February 16, A. D. 1878, at 9 o'clock A.M., and examined.

Witness my hand and official seal,

FREDERICK W. LOEW,

[SEAL.] Register.

Note.—July 25, 1892, by consent of the Trustees, section fourth was modified to enable the Trustees to open the Museum free to the public "throughout the year, excepting Mondays, but including Sunday afternoons and two evenings of each week."

June 29, 1893, by consent of the Trustees, section fourth was modified to enable the Trustees to open the Museum free of charge to the public "throughout the year for five days in each week, one of which shall be Sunday afternoon, and also two evenings of each week."

CONSTITUTION

OF THE

AMERICAN MUSEUM OF NATURAL HISTORY

IN THE CITY OF NEW YORK
Amended May 10, 1909

ARTICLE I

This Corporation shall be styled The American Museum of Natural History.

ARTICLE II

The several persons named in the charter, and such others as they may add to their number, which shall not exceed twenty-five in all at one time, and in addition, the Mayor, the Comptroller, and the President of the Department of Public Parks, of the City of New York, for the time being, ex-officio, shall be the Trustees to manage the affairs, property and business of the Corporation.

The members of the Board of Trustees holding office at the time of the regular quarterly meeting of November, 1905, shall then, or at the first meeting of the Board thereafter, be divided by lot into five classes of five members each, to serve for the terms of one, two, three, four and five years respectively from the date of the annual meeting of February, 1906. The Board of Trustees at each annual meeting thereafter, or an adjournment thereof, shall by ballot, by a majority vote of the Trustees present at the meeting, elect five Trustees to supply the places of the class whose term expires at that meeting; said newly elected Trustees to hold office for five years or until their successors are elected. In case of a vacancy in the Board by death, resignation, disqualification or otherwise, the vacancy shall be filled by ballot, in like manner, by the Board of Trustees at any regular meeting or special meeting, for the unexpired term. No person shall be eligible for election as Trustee who shall not be a "Patron" of the Museum, unless by a unanimous vote of a quorum of the Board, nor be

eligible unless his name shall be presented by the Nominating Committee at a regular or special meeting of the Board previous to the meeting at which his name shall be acted upon. Written notice of such election and the vacancy to be filled shall be sent to the Trustees at least one week prior to said meeting.

ARTICLE III

The Trustees shall meet quarterly, on the second Monday of every February, May, August and November, at an hour and place to be designated, on at least one week's written notice from the Secretary, and shall annually, at the quarterly meeting in February, elect the officers and committees for the ensuing year. They shall also meet at any other time to transact special business on a call of the Secretary, who shall issue such call whenever requested so to do, in writing, by five Trustees, or by the President, and give written notice to each Trustee of such special meeting, and of the object thereof, at least three days before the meeting is held.

ARTICLE IV

Section 1. The officers of said Corporation shall be a President, a First Vice-President, a Second Vice-President, a Treasurer and a Secretary. The President and Vice-Presidents shall be elected from among the Trustees. The Treasurer and Secretary may or may not be chosen from such Trustees. These officers shall be elected by ballot, and the persons having a majority of the votes cast shall be deemed duly elected. They shall hold their offices for one year or until their successors shall be elected.

SEC. 2. The Board of Trustees shall appoint each year, in such manner as it may direct, the following Standing Committees: an Executive Committee, an Auditing Committee, a Finance Committee, a Nominating Committee. These Committees are all to be elected from the Trustees, and the members shall hold office for one year or until their successors shall be elected.

The Board of Trustees shall also have authority to appoint such other committees or officers as they may at any time deem desirable, and to delegate to them such powers as may be necessary.

ARTICLE V

SECTION 1. The President shall have a general supervision and direction over the affairs of the Corporation, and shall preside at all the meetings of the Museum and of the Trustees. In his absence or inability to act, the First or Second Vice-President shall act in his place.

SEC. 2. The Secretary shall be present, unless otherwise ordered by the Board, at all the meetings of the Museum and Trustees, of the Executive Committee and such other Committees as the Board may direct. He shall keep a careful record of the proceedings of such meetings, shall preserve the seal, archives and correspondence of the Museum, shall issue notices for all meetings of the Trustees and various committees, and shall perform such other duties as the Board may direct.

The Board of Trustees shall have power to appoint an Assistant Secretary, who, under its direction, shall perform the duties of the Secretary in his absence or inability to act.

- SEC. 3. The Treasurer shall receive and disburse the funds of the Museum. He shall report in writing, at each quarterly meeting of the Trustees, the balance of money on hand, and the outstanding obligations of the Museum, as far as practicable; and shall make a full report at the annual meeting of the receipts and disbursements of the past year, with such suggestions as to the financial management of the Museum as he may deem proper.
- SEC. 4. The accounts of the Museum shall be kept at the General Office, in books belonging to it, which shall at all times be open to the inspection of the Trustees.

These accounts shall be under the care of an Assistant Treasurer, who shall be appointed by the Board of Trustees and be under its direction. He shall give such bonds for the faithful performance of his duties as the Board may direct.

SEC. 5. The offices of Secretary and Assistant Treasurer may be held by the same person.

ARTICLE VI

The Executive Committee shall consist of nine Trustees, of whom the President, First and Second Vice-Presidents and Treasurer, in case he be a Trustee, shall be four, and five other members to be appointed each year in the manner provided in Article IV. They shall have the control and regulation of the collections, library and other property of the Museum; and shall have power to purchase, sell and exchange specimens and books, to employ agents, to regulate the manner and terms of exhibiting the Museum to the public, and generally to carry out in detail the directions of the Trustees; but the Executive Committee shall not incur any expense or liability for the Museum exceeding two thousand dollars at one time, or exceeding in all ten thousand dollars, in the interval between the quarterly meetings of the Trustees, without the express sanction of the Trustees. Five members of the Committee shall constitute a quorum for the transaction of business.

ARTICLE VII

The Auditing Committee shall consist of three Trustees. They shall have the books of the Museum duly audited, at least once in six months, by an authorized public accountant to be selected by them.

No bills shall be paid unless approved, in writing, by the President, the Chairman of the Executive Committee, or the Director.

ARTICLE VIII

The Finance Committee shall consist of four Trustees, including the Treasurer in case he be a Trustee. They shall have general charge of the moneys and securities of the Endowment and other permanent funds of the Museum, and such real estate as may become the property of the Corporation, with authority to invest, sell and reinvest the same, subject to the approval of the Board of Trustees.

ARTICLE IX

The Nominating Committee shall be composed of three Trustees, to whom shall be first submitted the names of any persons proposed as candidates for election to membership in the Board of Trustees. The Committee shall report on such candidates from time to time, as it may deem to be for the interest of the Museum. A fortnight before the annual meeting they shall prepare and mail to each member of the Board of Trustees a list of five candidates to be elected by ballot at the said meeting.

ARTICLE X

The President shall be a member, ex-officio, of all standing committees.

ARTICLE XI

Nine Trustees shall constitute a quorum for the transaction of business, but five Trustees meeting may adjourn and transact current business, subject to the subsequent approval of a meeting at which a quorum shall be present.

ARTICLE XII

By-Laws may be made from time to time by the Trustees providing for the care and management of the property of the Corporation and for the government of its affairs, and may be amended at any meeting of the Trustees by a vote of a majority of those present, after a month's notice in writing of such proposed amendment.

ARTICLE XIII

Any person contributing or devising \$50,000 in cash, securities or property to the funds of the Museum may be elected a Benefactor of the Museum.

Any person contributing \$1,000 to the funds of the Museum, at one time, may be elected a Patron of the Museum, who shall have the right in perpetuity to appoint the successor in such patronship.

Any person contributing \$500, at one time, may be elected a Fellow, who shall have the right to appoint one successor in such fellowship.

No appointment of a successor shall be valid unless the same shall be in writing, endorsed on the certificate, or by the last will and testament.

Any person contributing \$100, at one time, may be elected a Life Member.

Any person may be elected to the above degrees, who shall have given to the Museum books or specimens, which shall have been accepted by the Executive Committee, or by the President, to the value of twice the amount in money requisite to his admission to the same degree.

Benefactors, Patrons, Fellows and Life Members shall be elected by the Board of Trustees or by the Executive Committee, and the President and Secretary shall issue diplomas accordingly under the seal of the Museum.

The Trustees may also elect Honorary Fellows of the Museum in their discretion.

ARTICLE XIV

Any person who has held the office of President for ten or more successive years may be elected by the Trustees as Honorary President for life.

ARTICLE XV

No alterations shall be made in this Constitution, unless at a regular quarterly meeting of the Trustees, or at a special meeting called for this purpose; nor by the votes of less than a majority of all the Trustees; nor without notice in writing of the proposed alteration, embodying the amendment proposed to be made, having been given at a regular meeting.

BY-LAWS

Amended May 10, 1909

Ι

Benefactors, giving \$50,000, are each entitled to r Subscriber's Ticket, 10 Complimentary Season Tickets and 10 Tickets for a single admission.

Patrons, giving \$1,000, are each entitled to 1 Subscriber's Ticket, 5 Complimentary Season Tickets and 10 Tickets for a single admission.

Fellows, giving \$500, are each entitled to I Subscriber's Ticket and IO Tickets for a single admission.

Life Members, giving \$100, are each entitled to 1 Subscriber's Ticket and 7 Tickets for a single admission.

Sustaining Members, paying \$25 yearly, are each entitled to r Subscriber's Ticket and 5 Tickets for a single admission.

Annual Members, paying \$10 yearly, are each entitled to 1 Subscriber's Ticket and 4 Tickets for a single admission.

[Note.—A Subscriber's Ticket admits to the laboratories and parts of the Museum not open to the public, also to all Receptions and Special Exhibitions, and may be used by any member of the Subscriber's family.

The Single Admission Tickets admit the bearers to the laboratories and parts of the Museum not open to the public, and are issued to Subscribers for distribution among friends and visitors.]

H

Any Trustee who shall fail to attend three consecutive Regular Quarterly Meetings of the Board shall cease to be a Trustee, unless excused by the Board.

III

No indebtedness (other than for current expenses) shall be incurred by any committee, officer or employee of the Museum, except as provided for in the Constitution. Any desired additional expenditure shall first receive the approval of the Board of Trustees.

IV

If any Trustee shall accept a salary from this Corporation he shall thereby be disqualified for the time being from acting as a Trustee thereof; provided, that the Board of Trustees shall have power to suspend the operation of this law in any special case.

V

Any vacancies occurring in the membership of the several committees during the interval between the regular meetings of the Board of Trustees may be filled at a regular meeting of the Executive Committee, until the next meeting of the Board.

VΙ

All bequests or legacies, not especially designated, shall hereafter be applied to the *Permanent Endowment Fund*, the interest only of which shall be applied to the use of the Museum as the Board shall direct.

VII

At such times as it may be impracticable to obtain the services of the members of the Auditing Committee, the members of the Executive Committee may act in their place and stead.

FOR THE EQUIPPING AND FINISHING OF THE BUILDING AND THE CONSTRUCTION OF ADDITIONS THERETO

LEGAL ENACTMENTS OF 1905

BY THE BOARD OF ALDERMEN

AN ORDINANCE providing for an issue of Corporate Stock in the sum of five hundred thousand dollars (\$500,000), to provide means for the equipping and finishing of The American Museum of Natural History in Manhattan Square, Borough of Manhattan, and the construction of additions thereto.

Be it ordained by the Board of Aldermen of the City of New York as follows:

Section 1. The Board of Aldermen hereby approves of and concurs in the following resolution adopted by the Board of Estimate and Apportionment March 16, 1905, and authorizes the Comptroller to issue Corporate Stock of The City of New York to the amount and for the purposes therein specified:

"Resolved, That, pursuant to the provisions of section 47 of the Greater New York Charter, as amended by chapter 409 of the Laws of 1904, the Board of Estimate and Apportionment hereby approves of the issue of Corporate Stock of the City of New York, to an amount not exceeding five hundred thousand dollars (\$500,000), to provide means for the equipping and furnishing of The American Museum of Natural History in Manhattan Square, Borough of Manhattan, and the construction of additions thereto, and that when authority therefor shall have been obtained from the Board of Aldermen, the Comptroller is authorized to issue Corporate Stock of the City of New York, in the manner provided by section 169 of the Greater New York Charter, to an amount not exceeding five hundred thousand dollars (\$500,000), the proceeds whereof to be applied to the purposes aforesaid."

Adopted by the Board of Aldermen April II, 1905, a majority of all the members elected voting in favor thereof.

Approved by the Mayor April 18, 1905. (Signed) P. J. Scully, Clerk.

Contracts awarded to December 31, 1906. For the erection of Fire Lines, Sprinkler System, Fire Escapes, etc. Contract awarded R. J. F. Gerstle Company, November 26, 1905, \$19,838. Completed January 11, 1907.

For the erection and completion of a New Wing, to be known as the South Wing of the West Façade, and a Permanent Cellar Passageway running therefrom in northerly and easterly direction.

Contract awarded Guidone & Galardi, May 22, 1906, \$325,000. Completed June 6, 1908.

For the construction of a Service Roadway from Ninth Avenue to and under the New South Wing of the West Façade.

Contract awarded Atlanta Contracting Company, July 1, 1909, \$26,000.

APPROPRIATIONS AND EXPENDITURES MADE THEREON TO DECEMBER 31, 1909

FOR FURNISHING AND EQUIPPING THE AMERICAN MUSEUM OF NATURAL HISTORY

LEGAL ENACTMENTS OF 1909

BY THE BOARD OF ALDERMEN

AN ORDINANCE providing for an issue of Corporate Stock in the sum of one hundred thousand dollars (\$100,000), to provide means for furnishing and equipping The American Museum of Natural History, Seventy-seventh Street and Columbus Avenue, Borough of Manhattan.

Be it ordained by the Board of Aldermen of The City of New York as follows:

SECTION I. The Board of Aldermen hereby approves of and concurs in the following resolution adopted by the Board of Estimate and Apportionment July 2, 1909, and authorizes the Comptroller to issue Corporate Stock of The City of New York to the amount and for the purposes therein specified:

"Resolved, That, pursuant to the provisions of section 47 of the Greater New York Charter, as amended, the Board of Estimate and Apportionment hereby approves of the issue of Corporate Stock of The City of New York, to an amount not exceeding one hundred thousand dollars (\$100,000), to provide means for furnishing and equipping The American Museum of Natural History, Seventy-seventh Street and Columbus Avenue, Borough of Manhattan, and when authority therefor shall have been obtained from the Board of Aldermen, the Comptroller is authorized to issue Corporate Stock of The City of New York, in the manner provided by section 169 of the Greater New York Charter, to an amount not exceeding one hundred thousand dollars (\$100,000), the proceeds whereof to be applied to the purposes aforesaid."

Adopted by the Board of Aldermen July 13, 1909, a majority of all the members elected voting in favor thereof.

Approved by the Mayor July 26, 1909.

(Signed) P. J. Scully, Clerk.
