

its ultimate effect would be to raise the value of money, its first effect would on the contrary be of the opposite character, and tend rather to lower it. But such has not been the result. It is quite true that some foreign capital has already been sent here for safe custody, and that much more may be expected. Such was the case before on similar occasions of Continental disturbance, and especially in 1848. But on the other hand, since 1848 there has been a great development of credit and of the banking system abroad. All the banks in Northern Europe are most anxious to "keep "strong," and accordingly they are sending here for discount many of the bills on England which they hold in their portefesille, and which in ordinary times they reckon as a part of their safest and most sure reserve. On the one hand, money is coming here from timid people, who think London is more secure than other places (and this class

It might be said that the rise in the value of money so caused by Government borrowings will be counteracted by the diminution of trade effected by the war and the consequent diminution of commercial demands on the money market. And to some extent such may be the case. Probably there will be an aggregate diminution of the whole commerce of the world caused by this great struggle. The ordinary consumption of comforts and luxuries will be lessened, and this will not be counterbalanced by the increase in the production of the various articles required by war. An immense body of persons whose labour was lately productive have now abandoned production and turned to destruction, and this will lessen not only their production but also the production of those who sell to them and who produce that they may consume. But though the aggregate trade of the world may be diminished, we are disposed to think that the share of that trade which falls to England will be augmented. Of course even here so great and sudden a change will in many quarters do great harm. Persons, for example, who have been receiving orders for railway iron from the Continent, and who were expecting to receive more, will certainly be to a con-

[July 23, 1870

siderable extent disappointed. All such peaceful trades will be for the moment retarded, if not destroyed. And it is no comfort to the manufacturer of (say) railway carriages, if his trade is lessened, that other manufacturers, suppose, of cannon, may have more Continental orders and be better off than ever. The interruption of existing trade causes losses which the profits of new trade do not efface. Still we think that the gain to English trade will be considerable in several ways.

First. All the most effective and most dangerous competitors of England in the markets of the world are for the time obliged to diminish if not to suspend their operations. The German, the Belgian, and the French manufacturers are injured in a way we, from want of experience, can hardly realise. Many of their workpeople and of their skilled assistants are drawn off to the war. Some even of themselves have had to turn soldiers. We can hardly conceive that any considerable fraction of the population of Manchester or Bradford should be summoned to a field of battle, yet such is now the case with all the greatest seats of Continental manufac-ture. And this is not the worst. Many of such towns fear that they may not only send combatants to the war, but may themselves become the seat of war, and its victims. This destroys all the security essential to commerce. The use of capital on a large scale which was spreading of late so rapidly through Northern Europe, and which was daily scale which was spreading of bringing more and more competitors into profitable markets where English manufacturers had been used to certain superiority, is for the present arrested. We shall now once more have an indisputable pre-eminence in many trades, such as we have not had for years, and such as it was not likely we should again see.

Secondly. The war has broken up a vicious speculation in the raw material of our principal manufacturing industry. The price of cotton had been forced up to an extravagant price in the Liverpool market, just as foreign securities had been forced to an extravagant value on the Stock Exchange of London. And both prices have fallen together. The fall in cotton has been as follows :—

PRICES OF COTTON	AT LIVE		ek ending
1.5 CONTRACTOR & Second View	July 8.		July 22.
with he builts all her	d		Ъ
Sea Island, ordinary	16		15
Upland do	88	********	7
Mobile do	84		71
Pernam do	93		83
Bahia, middling	93		8
Maranham do	101		9
Egyptian, ordinary	7	*********	6
Dhollerah, middling	7		53

And as much cotton which would have gone to the Continent will be diverted here, it is probable that prices will continue low, and consequently that spinners will be able to buy on better terms than they have long been. They will have more raw material. The speculators who forced up the price of that material have been much crippled, if not altogether ruined.

Thirdly. There will be a great trade in instruments of war, which, in spite of declarations of neutrality, both belligerents will wish to buy here, and which we shall in fact sell to both of them.

Fourthly. All the carrying trade will be in our hands. English vessels will be able to keep the sea, while both French and German vessels will be a prey to hostile cruisers. And we shall have an augmented commission trade too. Already an unusual amount of goods, we learn, have been sent for sale to our great agency houses, and naturally because the one great seat of peace is the safest place for storing all commodities, and for transacting all intermediate dealings. Both our commission business and our freight business will probably be greater now than they have been lately—perhaps than they have ever been.

For these reasons we think that so far from the rise in the value of money in our market consequent on the sudden loan demand being retarded by a contemporaneous diminution in the trade demand, we believe that as far as our English commerce is concerned, that trade demand will maintain itself, and will not therefore tend to counteract the rise in the value of money, but will co-operate with the war demand and will make that rise more likely.

THE PECULIARITIES OF THE PRESENT WAR. THERE is no longer any necessity to comment at length on the origin of the present war, or on the responsibility of those who commenced it. On these points the world has already pronounced a decided, and unless new facts can be adduced (which is not likely), an irrevocable judgment. But there are one or two peculiarities of this contest which may much affect the future, and which therefore require careful attention.

The distinguishing characteristic of this war is that it is a war for what is called *prestige*—that is, if we put it plainly, a war to settle which of two great nations is the stronger, the more military, and the better able to overpower the other. Since the battle of Sadowa, France has felt that she had not the same influence abroad that she possessed before. She acquired that influence in former times by the divisions of Germany; she maintained it also by those divisions; and now that Germany is in comparison one and united, she has lost much of it. And accordingly France wants to show conspicuously and on the battle field that she is still stronger than Germany; that she is still entitled to the political primacy of Europe; that there is no other Continental Europe which she cannot make do as she wishes, if only she is willing to put forth all her strength.

Monsieur Ollivier, the titular premier of France, is understood to deny that the war can be correctly so described. He says that he accepted office on the understanding that there should be peace between France and Prussia, and that he has only consented to the present war because the King of Prussia would not undertake that no prince of the Hohenzollern family should ever reign in Spain, and because he refused to discuss that subject further with the French Ambassador. But most people think that there was no reason to make this demand of Prussia, except to pick a quarrel and find a pretence for a war desired upon other grounds. France has no possible claim to ask for a future covenant of this nature, and the King of Prussia is universally thought to be right in refusing even to argue it. But, what is even more to the purpose, if Monsieur Ollivier is right in what he says, why does France refuse to submit the matter to an arbitration according to the agreement come to by all the great Powers in 1856? Such a case as M. Ollivier suggests is exactly the sort of case which comes within the scope and purpose of that compact. We can understand that a question may seem to a nation too vital to be submitted to a third party. One solution may seem essential to the national existence, and all other solutions may seem to threaten it. But we are now discussing whether an Ambassador has or has not been insulted-whether a nation can with honour dispense with a future covenant as to a possible event of secondary importance; -and these are not questions of existence. These are just the matters of feeling and impression on which, in private life, a wise man most distrusts his own judgment if he be himself concerned, and in which he is most ready to submit to the decision of others whom he respects. On his own showing, Monsieur Ollivier ought to insist on the acceptance of the European arbitration; it would be childish to go to war for such minor things without first exhausting every decent means of peace. But the Emperor Napoleon is no child; he knows well what he is doing even if M. Ollivier does not; and he would not be guilty of the greatest of all follies-that of beginning a first-class undertaking cf immense danger for little objects of minute importance. Ever since the plebiscite M. Ollivier has only been a premier in name; he has been really a puppet in the hands of a far profounder politician than he is; and he will probably have his reward before long when, owing to the occupation of men's minds with war, the pretence of Parliamentary Government is not wanted, and he is discarded as a tool no longer serviceable and whose work is done.

But what is of more importance, granting that the war is a war for *prestige*, as it is unquestionably, two conclusions follow—one very painful, but the other of mitigating influence. First, the war, if it is really to settle the *prestige*, must be a long war. It is only by a terrible process of exhaustion that either France or Germany will be brought to admit that it is the weaker. A war for a province can be settled by the capture of the province,—a war for an insult can be ended by an apology; but a war to take from Germany the greatness it has gained, and to regain for France the preeminence it has lost, can only be ended by crushing Germany or reducing France so low that she feels she cannot crush it.

THE ECONOMIST.

Now Germany will not, such is her spirit, descend in the scale of nations without huge efforts, which it will take years to make, and the Emperor cannot give up the struggle, leave Germany as she was, and end worse than he began, without ruining his own prestige, and endangering his throne and dynasty. He thinks he is forced to make war to maintain himself in power, but if he leads his armies to defeat, not victory, and covers France with disgrace, not glory, he will be in worse peril than he is now. Nor, now that the national spirit of France has been excited to regain her old place, will she be satisfied until it is proved to her by long failure that she cannot regain it. In a word, this is a war in which the French Emperor and France are pledged, so to speak, to pull down Germany, and according to every appearance (painful as the conclusion is) Germany will not be pulled down, and France will not forfeit her pledge to pull her down except after long and fearful exertions.

But, on the other hand, it is comforting to think that the very same cause which makes it likely that the duration of the war will be considerable, makes it likely that its area will be confined. If a war is to settle the respective military prowess of two nations, those nations must fight that war alone. If one is helped and the other not helped the contest will not be fair, and the result will not be decisive. In a few years the trial of strength will have to begin again ; for the nation which was overborne by the auxiliaries of the other will resent the issue, and will try as soon as may be to begin again when those auxiliaries may not be at the service of its enemy, or when even they may be on its own side. If this war is to attain its object France and Germany must fight it out by themselves. And, therefore, though it will cause the greatest suffering to the two belligerents (and will do so we fear for a long time), yet it will not run through the world and enlist combatants on every side as other wars, and especially those of principle, such as the wars of the Reformation and French Revolution, have so commonly done, and with such tremendous effects.

THE RELATIVE POSITIONS OF FRANCE AND GERMANY.

WE think it may be useful to our readers to explain some of the principal matters affecting the position and resources of the combatants in the war which has now broken out. Apart from our sympathies with either country, or the complications which threaten ourselves, it will be useful to have a clear notion of the means of the combatants, the facilities for defence or attack, and the difficulties which each will encounter. The more correct we can make our opinion on these points at the beginning, the more easily we shall follow the successive stages in the contest—appreciating the advantage or disadvantage to either side.

It is impossible in the first place not to be struck with the magnitude of the war. The history of Europe, full as it is of wars, furnishes no precedent for the collision of such antagonists. In the days of the first Napoleon very few battles were fought with more than a hundred thousand men aside; and the very greatest of Napoleon's latest efforts-the invasion of Austria in 1809, the invasion of Russia, and the preparations for the 1813 campaign-were all much beneath the level of the effort which either combatant now makes. There are two reasons for the change, which are very important. First. Both France and Germany, which under different forms were the great antagonists between 1792 and 1815, have subsequently increased in population, and to a far more important degree in wealth. Manufacturing has increased in both countries; agriculture has improved; roads, railways, and steamers, and the other mechanical inventions of the age have ameliorated both countries and increased their productive power, as well as their capital accumulations. To say that each has doubled its force since 1815 would be a most moderate statement. On this account the efforts now made are more formidable than those of the old time-the two chief antagonists are absolutely bigger. The second reason for the magnitude of the present efforts is the facility of transport. This has been one of the principal causes of the increase in the the resources of every civilised nation, but it is almost more important that in time of war it facilitates the movement of armies. Practically in a country which is well supplied with railways its entire force is available at any particular point. The feats of concentration which Napoleon occasionally accomplished, as in the Austerlitz campaign, which began with the

march of the Boulogne army to the Rhine—feats which were only possible by careful pre-arrangement and forced marches of rank and file—are now practicable for every army without any perceptible effort and at much less cost and strain. The concentration is even now not instantaneous, for the armies are bigger and the capacity of railway lines is limited; but a fortnight or three weeks is amply sufficient, even where the countries are so wide as France or Germany. Hence these two countries, being both bulkier and better organised than ever before, and now putting forth their whole strength, exhibit a spectacle without precedent in the history of military contests.

The second point we wish to notice is the possibility of a lengthened contest. We have stated in another article a moral reason for fearing a protracted war; and there is nothing inconsistent with that expectation in the material circumstance of the parties, or the conditions of modern warfare. It has got to be a saying that modern wars are "brief," but this is a somewhat rash induction. The American war was not a short one, and even the Danish war, though the weaker antagonist was so much weaker than the others, took several months to finish. The Crimean war again was a tedious enough affair. Because Sadowa lasted a few days, and the Solferino campaign was a two months' affair, it is rather quick to infer that all wars in Europe will be short. This would still be the case even if these wars were unprecedentedly brief, which is hardly the case. Sixty or seventy years ago in Europe there were very short wars. Few could be briefer than those in which Jena and Waterloo were fought. Looking back to these battles, we fancy them, by a kind of historical illusion, to be incidents in a single warlike drama, and in one sense they were so; but it is still true that the particular wars were brief. They were preceded and followed by distinct intervals of peace, so far as the antagonists were concerned. The truth is that the duration of wars in modern times, as of old, depends upon many circumstances, and there is still a possibility of long wars. If the parties are equally matched, if the reserves are efficient, if there are fortresses or entrenched camps sufficient to retard hostile advances-a war is as likely as ever it was to be something more than a battle and a peace. That these are the superficial conditions in the present case are obvious to all. There may be some great latent inequality on one side or the other which war will discover, but apparently the antagonists are equally matched, equally well organised, endowed with abundant reserves, and each possessed of more than one fortress or entrenched position to cover temporary defeat and give time for rallying. will be protracted. It is at least on the cards then that war

In saying this we do not wish to dispute that the modern changes will have no effect in shortening the contest. They do so in a minor degree by shortening the period of transition from a peace to a war footing. Old wars were lengthened because this transition took time, and now it takes hardly any-at least in the case of the principal military nations of the Continent. It seems probable again that modern changes by facilitating movement may facilitate the exhaustion of resources. The force of a country appears to be more quickly used up on account of the speed of the movements. But we are doubtful if this cause is so powerful as is sometimes supposed. More actual fighting in proportion may be compressed into the same period of time, and fighting after all is the greatest single destructive influence in a campaign; but on the other hand, the wear and tear of long marches, bad food and clothing and disease to which nations were formerly more subject in sending forth their armies than they are now, were at least nearly as destructive. The new "facilities for exhaustion" by fighting can hardly, therefore, be reckoned as very conducive to the quicker termination of wars. But facility of movement will undoubtedly tend to intensify the effect of any marked superiority on one side or the other, though it is apparently of less consequence where the combatants are equal.

The third point which it appears important to notice is the peculiar difficulty which each of the hostile Powers has in attacking the other. France and Germany are conterminous for a comparatively short distance; the available roads are few, a good deal of the country on both sides being "difficult;" and such roads as exist are "blocked." This is an additional reason for the war proving lengthy; but as it is immediately interesting with regard to the progress which

[July 23, 1870

old diplomatists, in aiming to protect Germany by restricting the field of hostile attack, went straight to the end in view. Nothing could have answered the purpose better than merely to limit the number of roads, so that the people threatened might know where to guard against attack. And the restriction imposed is most thorough. Previous to the wars at the beginning of the century, France and Germany were in contact almost the entire distance between the Alps and the Sea, and the "low countries" moreover were not neutral. In a war between the various German Powers, or the majority of them, and France, the roads of attack and defence were numerous, and the most distant were widely separated. France could enter hostile territory at a dozen points between Basle and Dunkirk, with a choice of routes to the heart of Germany. But by neutralising the "low countries," especially Belgium, European diplomatists have closed more than half the gates by which the one country was entered from the other—at least in wars where some of the great Powers, which have guaranteed the neutrality, are not en-gaged as principals. What is perhaps most im-portant, they are the best routes which have been closed. There is no need to know much of military matters to see why the low countries played so important a part in the old wars. The level cultivated districts between the lower Rhine and the French frontier offered every temptation to the invader, while the points of crossing the Rhine below the Main-conducting the invader straight into Northern and Central Germany-were numerous and easy. All this easy country is barred by the neutrality of Belgium, and the next best route-immediately above the Main-is made more difficult of access. In the extreme South, again, a good road -is stopped into Southern Germany-across the Rhine at Basleby the neutrality of Switzerland. What remains to France is the front between Lauterburg to the North and Basle to the South, exactly at the spot where the country on both sides of the Rhine-the Vosges mountains in France and the Black Forest in Germany-is most difficult by nature. It is no doubt true that France may still aim at reaching the opposite bank of the Rhine by striking across Rhenish Prussia or the Palatinate. The neutralised territory does not extend from the sea to some point on the Rhine, but stops short at Luxemburg -between which and Lauterburg there is a gap of sixty miles, through which an army may move to a point below the Main. Still, this is an eccentric and dangerous way of reaching the old avenues into Germany, which were formerly directly accessible.

But the available roads, as we have said, are not only few and difficult—the natural difficulties are artificially increased. Enumerating them we find there are perhaps not more than four roads by which French armies could now penetrate Germany. The Rhine may be crossed in front at Strasbourg, or some point near it, or between Strasbourg and Mulhouse to the South-the immediate objective point being either Stuttgart due East across the defiles of the Black Forest, or Frankfort to the North-East by the railway line through Rastadt. Or the German provinces on the French side of the Rhine may be entered-either to the right at Weissemburg and Lauterburg, so as to obtain a passage across the Rhine into the valley of the Neckar or the Main, or to the left through Rhenish Prussia, down the valley of the Moselle, so as to bring the army to the Rhine opposite Mayence and Coblenz. But to state the facts thus is only to state the difficulties. If Stuttgart is aimed at not only must the Black Forest be threaded, with a great river behind the advancing army, but if Germany is entered this way there is no railway connecting the invading army with its base. This is most important. A railway is not necessary to the march, but it is all but essential for bringing up supplies; and the more numerous the army the more essential will it be. If Frankfort, on the other hand, is to be struck at by way of Rastadt, for the sake of the railway line than Bartadt must be armed in of the railway line, then Rastadt must be reduced,-involving a siege at the very commencement of hostilities. Blockading Rastadt will not answer, for that would not give the necessary command of the railway. Similar difficulties are presented by an attack upon the Rhine provinces. The route to the right from Weissemburg, which is so far the best as following a railway line, is blocked by the fortress of Landau, the first convenient point for crossing the

the armies may make, we may give a little more expla-nation. The shortness of the frontier line is no small matter. The old diplomatists, in aiming to protect Germany by restricting be blockaded; there will be a long and narrow line of com. munication, with the Prussians strongly posted in the neighbourhood of Landau on the flank; the army which risks these difficulties must assail in front the two difficult positions of Ehrenbreitstein and Mayence. Whichever way the problem is looked at the invasion of Germany will thus be more serious. even relatively, than it ever has been. Altogether, looking to the necessity of following the railway lines and the difficulty of any strokes of strategy, we should say that the French army, if it attacks, has little choice but to operate before Landau and Rastadt, endeavouring if possible to carry by main force the strong positions before it. There is nothing very brilliant in this, but the old diplomatists would have failed if their expedients to close the roads into Germany had not reduced the apprehended invaders to some such dire necessity.

It will readily be understood that if the French road into Germany is difficult, the German road into France is not easy. The Germans, no doubt, have this advantage, that they are already across the Rhine. They have not to pass, in face of an enemy, a great river studded with Metz, that from Landau by Weissemburg and Bitsch; while, if an army should choose to cross the Rhine, there are numerous fortresses in the Rhine valley between Lauterburg and Mulhouse. The Prussians have before them the pre-cedent of 1814, when France was invaded by the allies at the extreme points of the present frontier. The French frontier, again, makes an angle with Germany not dissimilar to the angle which Bohemia makes with the Prussian frontier, and which they entered from two different sides in 1866. In following the precedent of 1814, they would also follow the later precedent as well. But France is not so open as in 1814, nor so open as Bohemia was four years ago.

Such appear to us the most important points in the position and prospects of the combatants. As regards the position, we have confined ourselves entirely to the question of the land frontier, leaving out of account any possibility of a violation of neutral territory, or of an invasion of Germany by sea. These contingencies, we think, need not be immediately considered. Both Powers have now, at least, an extreme interest in preserving neutrality; and operations at sea are not, at first, likely to involve any vital issues. If France gets some way into Germany, an invasion by sea, if practicable, might be a merical mediate of forcing the sea are both of the second sec might be a useful mode of forcing the enemy back ; but for the present, the contest on the frontier looks too even. Every man will be needed on both sides to bar the way to Paris or Berlin.

A PROFITABLE YEAR OF UNDERWRITING.

IT is not surprising that there should be a great mystery in underwriting and exaggerated notions about its profits. The business presents great difficulties to the common mind. It gives a great deal of money in hand to the underwriter before he has to pay anything, the profits and losses fluctuate in an extreme degree, and it is a long while before it is known whether there is profit or loss at all. This last difficulty is the greatest. It is from two to three years before the account of a particular year is closed; and it is not easy for people to know where they stand. While they appear to have made a pro-fit on the closed accounts they may know that a succeeding bad year is already eating up all the gain; or in the opposite case, the loss on a closed account may be in the course of being covered. It is another complexity that profit is made by interest on the premiums in hand, and as the two profits -the profit on underwriting and the profit from interest-are mixed in practice, it is difficult to give a clear account of the sources of profit or loss. These are sufficient reasons why underwriting should be looked on as a curious business. Fortunately, as joint-stock companies have embarked in the pursuit and have published their accounts, their experience is available for the public. We have now before us the third issue of a very excellent publication—"Black's Analysis " of Marine Insurance Companies' Accounts,"" which we have more than once made use of; and the interest of the subject,

* London: S. Straker and Sons. 1870.

THE ECONOMIST.

seeing that we have now the particulars of two additional years, 1866 and 1867, for which the accounts are closed, will be our excuse for resuming the inquiry into the nature of the business.

The most striking new fact is that the accounts now embrace a profitable year, viz., 1867. Hitherto the most prominent consideration has been that the business appeared to be on the average a losing one, or at least not very profitable. But now there is a new element in the calculation—a year of profit, and of very large profit. On this point it is no doubt a good deal to be regetted that the author has omitted from the account two companies which were formerly treated of, but which have gone into liquidation since the last issue, as their experience was a part of the general average; it is misleading both for past years and the present to change the data with every issue, and make the business appear more and more profitable in consequence of the last accounts embracing only the companies which survive longest. Still from the small business done by the companies which have gone into liquidation the omission is far from fatal; they were not likely to have altered the average much. Taking all the companies as one, then, the year 1867 shows the following result:—

Total premiums received	2,558,532
Total claims paid £1,971,901	
Total expenses 165,729	9 197 690
	2127 620

We have therefore a favourable year to deal with, but most of the remarks which were formerly suggested by the experience of less favourable years are confirmed. The fluctuations, as will have been inferred from the statement of the varying profits on the capital, have been very great. The following is an exact account of each company :—

			Rate per		Rate per
	Net Profit.	Ce	nt. of Pro	ofit Co	ent. of Profit
	£	to	Premiun	as. 1	to Capital.
Ocean	58,762		18.58		29.38
Universal	69,882		22.36		27.95
Thames and Mersey	38,942		6.96		19.47
London and Provincial	38,169		26.95		38.16
Union Marine	81,064		31.69		39.89
British and Foreign	72,284		21.61		72.28
Commercial Union	74,120		30.68		29.76
The Maritime	4,326	***	1.79		4.37
at anitan and and	437.849				
Deduct Home & Colonial -net loss	16,948		(loss) 10-99		(loss) 16·94
	190.001				

420,901

Thus it is not all profit to all the companies, even in a good year—the comparison moreover being too favourable by the omission of the bankrupt companies; and the companies which make profit do so very unequally.

The experience moreover is presented along with the experience of another year—1866—in which the net profit, leaving out of account the companies which have gone into liquidation, was a bare 10,610/, and the fluctuations are even more conspicuous. The gains in that year were :—

Participation of the state	A. A. BORNER		Rate per		Rate per
	Net Profit.				ent. of Profit
0	£	to	Premiu	ns.	to Capital.
Ocean	26,790		15.23		13.44
Thames and Mersey	18,971		3.50		9.48
Union Marine	9,531		4.24		4.68
The Maritime	47,783	***	23.47		48.35
And the losses were :	103,075				
			Rate pe	r	Rate per
	Net Loss.	C	ent. of L	055 (lent. of Loss
and the Martin of the	£	to	Premiu	ms.	to Capital.
Universal	8,070		3.77		3.22
London and Provincial	9,210		6.32		9.21
Dritish and Foreign	19,420		7.19		19.42
Commercial Union	35,465		.16.72		14.18
Home and Colonial	20,300		10.55		20.30
State of the state					

92,465 These figures may be advantageously compared with those of 1867 above given. Not only is the experience of the respective years in contrast, but we find that the companies are

not relatively the same in each year. The most striking contrast is that presented by the "Maritime." In the year 1867, when all companies were gaining largely, its profit was only 4½ per cent.; but in 1866, when the majority were losing heavily, its profit was 48.35 per cent.—twelve times its profit in the year that was universally good. There could not, it is evident, be a business in which the experience of one year or series of years would be less of a guide as to the probabilities of a coming year; or the average experience of one's neighbours less useful to oneself. This is the more important because nothing is more tempting than to forecast profit—to guess after the first year what the second and third year's settlements will be. However useful such calculations may be on the average and for statistical purposes, they are of no avail in a particular business.

To complete the account we extract the following statement of the profits and losses of the selected companies since 1860 :---

Year.		Number of Offices.	Total Premiums Received.	Total Claims Paid.	Total Exp'nses.	Net Loss on Com- bined Under- writing.	Net Profit on Com- bined Under- writing.
2.7	1	1.01	£	£	£	£	£
1860	********	2	661,979	671,205	28,185	37,411	
1861	********	4	1,226,332	1,317,350	85,891	176,909	
1862	********	4	993,919	833,798	58,998		101,123

886,019 886,019

The rate per cent. of the total claims to the premiums is 88.92 per cent., and of the expenses to the premiums 6.75 per cent., in the aggregate 95.67 per cent.; leaving only the small average margin of 4.33 per cent. for profit. This narrow margin, and the fact of there having been three years of net loss out of the eight years included—the aggregate net losses moreover being more than a third of the aggregate net profits—are additional signs of the great fluctuations of the business.

The second fact which 1867 brings out, confirming previous experience, is the importance of interest on premiums in the underwriter's profit. Actually the profit on the account of 1867, though the underwriting share of it was very large, was considerably added to by the interest on premiums. On this head the various companies received in 1866 and 1867—the two years newly accounted for—the following percentages on their paid-up capital :—

hard-uh cohrear				
Company.	1866.		1868.	
Ocean	8.85		8.87	
Universal	3.76		2.91	
Thames and Mersey	14.25	********	11.27	
London and Provincial	8.93	******	6.75	
Union	6.56		5.38	
British and Foreign	9.57		7.55	
Commercial Union	5.86	********	5.51	
Maritime	8.72		5.40	
Home and Colonial	6.16		3.66	

Such profits are always earned. Whether years are good or bad, the interest received is an important item—perhaps in a long series of years the most important. It is noticeable again that it is not the companies that make most profit on underwriting which profit most by interest. The receiver of the highest rate of interest in each year is the Thames and Mersey Company-the amounts being 14.25 and 11.27 per cent., and the next highest of any other company 8.87 per cent.-but in 1866, the unfavourable year, the Thames and Mersey Company stood third on the list of the four companies which profited on underwriting, and in 1867, the year of profit, it was the lowest on the list with only a single exception. Possibly good underwriting-which implies a selection of risks-limits business in proportion to the capital, and so reduces the premium interest ; or, as we think more probable, a company which does good underwriting is under less necessity of looking after the interest. But before forming a con-clusion on this point it would be necessary to consider the question of the proportion of capital to the business done,

the analysis.

The following table, which we also extract from the analysis, exhibits very clearly from the commencement the

importance of interest to	underwit	NETO .			
	Average				rerage
	Annual		Average	A	nnnal
	Profit		Annual	1	Profit
	Earned by	7	Loss by	Ear	ned in
	Underwriti		derwritin	ng In	terest
	per Cent. o		er Cent. o	on per	Cent.
Company.	Capital.		Capital.	on C	apital.
Ocean	19.94	********		********	7.98
Universal		********	7.65	********	2.85
Thames and Mersey			***	********	12.93

British and Foreign Marine				********	10.08
Commercial Union					5.34
Maritime			0.07		7.19
Home and Colonial			10.11		5.48

The analysis not only embraces the closed accounts but likewise includes an estimate of the result of the two succeeding years. The account for 1868, in which two years' settlements have been made, so that little is left for estimate, is calculated to show a net profit of 506,080l divided among all the companies, but it is feared that 1869 will show a net profit of only 70,0001. The estimate even for 1868 however cannot be considered very reliable, for the reason already stated-the great fluctuations in the business. The calculation assumes that the average third years' settlements will be 6 per cent. of the premiums, but instances of 12, 13, 15, and even of 17 per cent. being required for such settlements have occurred, and a higher or smaller amount in the case of the larger companies would alter a great deal. It seems probable enough, however, that 1868 will be sufficiently profitable to give a favourable aspect to the business of underwriting, compared with what has been yielded by previous issues of this analysis. But what people should remember is that this will only be a result on the average-that the fluctuations may include considerable losses of particular companies, while two such good years as 1867 and 1868 are certainly great exceptions to the rule.

BUSINESS NOTES.

NEUTRALITY .- There is no occasion to say anything in praise of the policy which the English Government has adopted with respect to France and Prussia. Much as we may dislike and reprobate the conduct of both or either in precipitating the struggle, our obvious duty when it has begun is to leave the combatants alone. If either Power had been attacking a smaller one in the fashion that France has attacked Prussia, it might have been expedient for us to use even stronger measures than we have employed for the sake of peace. Every nation has an interest in prolonging the interval between the announcement of a cause of disagreement and the actual outbreak of hostilities, and we might reasonably treat it as a breach of good neighbourhood when any Power precipitates war without allowing an opportunity for friendly offices or the dispassionate consideration of the difficulties. But in the present instance both Powers are well able to take care of themselves, and their own conduct in the events which are the ultimate source of the present hostilities was so violent that we may justly let things take their course trusting to the chances of war to bring about a settled state of things in Europe, which would be preferable to the truce we have had since the settlement of the Lux mburg difficulty. We have therefore no occasion to interfere, and not interfering, our only wise course as a nation is to be absolutely impartial. On this account, we should hardly quarrel with any measures of the Executive, however extreme, so long as they are within their competence, to preserve complete impartiality. The usual proclamation of neu-trality has been issued as a matter of course, accompanied fortunately at the very outset, and not later as in the American contest, by clear instructions to the officials at the outports as to the treatment of belligerent ships; and otherwise the Government has taken care to preserve i's good

which itself would be a most fitting subject for treatment in relations with both belligerents. The proposal in the same spirit to pass an Act carrying out the recommendations of the Neutrality Laws Commission is one which must equally We are doubtful indeed whether the present be approved of. is a war in which these recommendations are specially needed. The war is one in which the assistance of individual British subjects to either belligerent will be of comparatively little use; there is comparatively little temptation as in the American contest to infringe neutrality, though even in that contest the assistance which any British subjects gave had little effect upon the main issue. Especially in the matter of ships, where our neutrality is most likely to be broken through, it is evident that naval operations will contribute so little to the issue of the campaign that neither Power will be much subject to the temptation of smuggling ships from England. Still as there is some danger of this, and the war may have unexpected turns, it is wise to take every precaution, and the present seems a most favourable opportunity for strengthening the hands of the Executive. The only point about which there has been much doubt is whether the Commissioners did not go too far in one of their most important recommendations-making the building, as well as the equipment, of ships for belligerent service an offence. At the time we objected to the Commissioners making so important a recommendation without assigning a reason. But now that some practical action is forced upon the Government, plenty of reasons we think can be stated for acting on this proposal. The only solid objection to it was that it might fetter the shipbuilding trade, which it is our interest as a maritime Power to foster; but practically it is difficult to see why it should fetter that trade. Belligerents are not likely to come to us, so long as we prohibit equipping, merely because we permit building, for the ship will be useless without equipment ;—it would be a very poor speculation, as well as a most immoral one, to encourage them to order ships to be built in the hope, which we mean to defeat, of evading our laws against equipment. The reasons for forbidding equipment are thus equally good for forbidding building; and they are all the stronger because it is impossible to draw the line between the two operations. We begin practically to "equip" an iron-clad from the moment we lay the keel, so different is it from an ordinary merchant ship. We may therefore pass the new Neu-trality Bill with every confidence that it will keep away from us the attempts to use our territory for belligerent purposes, which were so annoying during the American war ; and with equal confidence that our ship-building trade will in no wise be affected.

> THE UNITED STATES FISCAL YEAR.-According to the New York Times the surplus of revenue of the United States for the year ending 30th June last was 120,000,000 dols, or close upon 24,000,000l, taking into account the late fall in the premium upon gold. This is a great advance upon the previous year, and is in truth an enormous sum to apply to the reduction of debt. Still the effort is apparently too great a one to be soon repeated, and effectual measures have been taken to abolish the surplus by reducing taxation. We wish we could add that the measures were as wise for all purposes of reducing taxation as they are for diminishing the surplus for extinguishing the debt. The Americans however by dealing very gingerly with the tariff have taken care to throw away the surplus by reducing mainly the least pernicious taxation-not that which trebly enhances its effect by crippling the industry of the country and takes far more from the tax-payer than what goes into the Treasury, but that which does the least mischief for its amount. But the American Legislature last Session at least got a good lesson in finance and political economy. It is curious to note how much the jubilant language which the New York journal uses with reference to the fiscal progress of last year, has been blown to the winds by the recent panic. The credit of the United States, we are reminded, had risen 15 per cent. in the year. But since these words were published in New York, nearly the whole of that improvement is loss-so great is the effect of a single financial catastrophe. Of course, American credit is not really affected, but it must long suffer in common with other nations. If the war continues any length of time, the prospect of funding the American debt at a much lower rate of interest, with two such borrowers as France and Germany in the market, must be postponed for a gretty long period.

THE ECONOMIST.

915

THE EXPENDITURE OF THE WAR.—Applications for credits have already been made to the Legislatures of the countries at war to a very large amount. In France there have been the following votes :—

	£
1. For Military purposes	2,000,000
2. For Naval purposes	640,000
	17,600,000
4. For Naval purposes	2,400,000
5. For Ministry of Finance	216,000

Total 22,856,000

The French Government has also obtained leave to issue 14,000,000*l* of additional Treasury bonds; but as the excess of the war expenditure over that amount must be provided for somehow, it may be considered that the floating debt, which is now about 30,000,000*l*, will, according to the official calculations of the Government, speedily be raised to 50,000,000*l*. On the other side, the following credits have been asked for :---

Prussia (North Germany)	18,000,000
Bavaria	2,730,000
	20.730.000

Thus France and Germany are beginning with large credits. It is certain, however, that the sums, large as they are, will not provide for a very long period of war. The credits will barely meet the initial expenses of the campaign. If we add the cost of the loss of men to industry, the interruption of commerce in all directions, the loss and mischief caused by the tremendous depreciation of shares and stocks, as well as other property—we may have some notion of the damage which the war has already produced before it has lasted a week, or a single collision taken place. If the war lasts only but a short time the check to our reviving prosperity may well be such as not to be quickly recovered. If it is a long war—that is, a war of six months or more—the damage done will be incalculable, and may affect us even more than the American contest, because of its involving *two* large customers of ours and its many indirect effects on the general trade of the world.

THE DUTIES OF DIRECTORS .- The Lord Chancellor and Lord Justice James have concurred on appeal in deciding an interesting point as to the duties of directors in the case of the Land Credit Company of Ireland, Limited, v. Lord Fermoy and others. The suit was by the liquidator of the Company to make the late directors liable personally to repay a sum of 3,7391, part of the Company's money which had been nominally lent by the Company, but was really expended in speculative purchases of the Company's own shares. The Master of the Rolls held that this was unathorised by the articles, and ordered the directors personally to repay the money. But as regards one of the directors, Mr Munster, the Appellate Court has reversed the order of the Master of the Rolls. It appears that according to the articles of association there was an executive Committee, that this Committee had reported in favour of the loan, and that Mr Munster had assented in ignorance of the real nature of the transac-tion. This was held sufficient to relieve him of liability, although the judges expressed themselves very loth to absolve directors from their duty, or to hold that inattention could relieve them of responsibility in respect of business done while they were present. The directors not on the executive Committee could only have had before them the question of the security of the loan, and they were not bound to ask about the application of the money.

THE COMPULSORY POWERS OF RAILWAYS.—The case of Stretton v. the Great Western and Brentford Railway Com-Pany, which was decided on appeal by the Lord Chancellor and Lord Justice James, is a strange record of the hardships to which individuals are exposed by the compulsory powers of railways. The facts of the case as brought out by the judgment were that the appellant more than ten years ago had been dispossessed by the defendant company of rather more than an acre of land belonging to him—part of a 10-acre meadow called Lott's Mead, on the bank of the Thames near Old Brentfor I. But he had received no compensation, had been most scurvily treated, and having succeeded after much litigation in establishing his title was at last obliged to enforce

his rights by a bill in Chancery to restrain the defendants from using his land. In this last action the defendants referred back to an old notice to treat, which they alleged they had given, but the Court felt bound to disregard this, as the Company had not set it up in trying the action on the title, and substantially the history of the transaction is what we have stated. The hardship is very great. There was really no doubt about the plaintiff's title, any confusion that might exist having arisen from his having let his single acre to the owner of the remainder of the meadow with whom the Company treated, but the Company had ample warning of the plaintiff's ownership. Yet he has been subjected to long expense and delay in vindicating his claims, all because a powerful Company had power to enter on his property without payment. The Lord Chancellor and Lord Justice gave a judgment very emphatically for the plaintiff, and a similar course should be followed in all such cases. Compulsory powers need to be most jealously watched, and where private rights are unduly interfered with under them a failure to give ample redress would be a gross failure of equity.

THE TERMINATION OF MR WELLS'S PERIOD OF OFFICE. We notice with great regret that the Hon. David A. Wells, the well-known "Special Commissioner of Revenue" in the United States, ceased to be a Government officer on the 1st instant. It has been expected for some time that the appointment would not be renewed-the present Protectionist administration of the United States being dissatisfied with Mr Wells' unanswerable statistics ; but the omission to re-appoint him is none the less a discredit to the American Government, They must have known that all the coarse imputations levelled against him were unfounded, while the merit of the reports which he prepared in discharge of the duties of his office was borne witness to in every country where political economy is studied. So excellent a body of statistics and facts of a different description, bearing on the operation of fiscal laws, it would be difficult to match; and they were all the more useful to the world, because of the exceptional circumstances of America. Some ignorant Americans, and some, we fear, who would be rather annoyed at being called ignorant, say that Englishmen praised Mr Wells because, in effect, he promoted English free trade; but the opinions we refer to are not those of England merely, but of France, Germany, and Italy-countries which are certainly not tainted with "English free " trade " in any sense of the phrase. The Americans do not stand well with the world when they treat a zealous and able public servant-one who has made himself a world-wide reputation in the discharge of his duties-as Mr Wells has been The loss will be a small one to him, especially as treated. his contributions will live, and he may confidently look forward to the gratitude of his fellow-countrymen when their conversion to free trade, which has now begun, is completed ; but it concerns Americans not to permit any longer such playing with the functions of Government as has lately been exhibited in his case.

FAILURES AND EMBARRASSMENTS.—The event of the week is the suspension of the Norwich Crown Bank (Harvey's and Hudson's) in consequence of an attempt upon his life by the senior partner, Sir Robert Harvey, which has subsequently proved fatal. The Bank was established 78 years ago, had an authorised note issue of 49,671*l*, and had an extensive connection in the county of Norfolk. The business has been taken over by the Messrs Gurneys, of Norwich, but no definite account has yet been published of the liabilities or assets. The difficulties of the Bank are stated to have arisen through the large speculations of the deceased partner on the Stock Exchange—speculations by which he is alleged to have lost enormous sums during the last two years, and which were brought to a sudden and unfortunate close by the recent panic. The following are also announced :—

Messrs Guild, Chapman, and Co., of London, Adelaide, and Sydney. Liabilities about 100,000*l*; assets, chieffy in Australia.

Mr R. A. Watson, of Liverpool, timber merchant. Liabilities 30,000/.

Mr Magnus, of the Pimlico Slate Works, whose suspension we announced last week, has since applied for a liquidation in bankruptcy. The liabilities are now put at 35,000*l*, and assets at half that amount.

⁸ In the first half of 1568 all the preference charges were met in full; but the same period in 1870 the stocks having a priority to the 5 per cent.—No. 6 of 1 receive interest in full, while the one named receives only i per cent. There is th a debit balance of 29,6332 on these priority charges carried forward against the n half-year's revenue.

There are no lines in course of construction, and the estimated remaining expenditure is 226,000*l*, of which 100,000*l* is in a 4 There are no lines in course of construction, and the estimated remaining expenditure is 226,000*l*, of which 100,000*l* is in a 4 per cent. stock. The rejection of the Abandonment Bill of the Surrey and Sussex line has involved the company in a further amount of liability. The completion of the railway would re-quire an issue of from 1,000,000*l* to 2,000,000*l* of ordinary stock; but the board prefer paying the penalty, which is limited to 35,250*l*, and to abandon the works. The working expenses in-clude 23,774*l* for compensation, the high figure of which may be traced to the additional claims arising out of the New Cross accident. In the previous half, 45,000*l* was written off as the estimate of the loss thus incurred. The number of claims made on account of this accident has been 360; and there have been 140 actions in court. The ultimate loss is estimated at 71,000*l*. 140 actions in court. The ultimate loss is estimated at 71,000l. Capital expended, 17,800,258l; capital received, 17,785,659l. Manchester, Sheffield, and Lincolnshire.—A dividend at the rate

of 1 per cent. per annum, has been announced. Midland—North Western.—An arrangement has been pro-visionally concluded with the (Little) North-Western Railway

Company, for converting the lease of the latter from a fixed dividend on their share capital of $3\frac{3}{4}$ per cent., with a share of half excess profits, into a fixed dividend of 3l 10s per cent. for the year 1870, 3l 15s per cent. for the year 1871, 4l per cent. for the year 1872, 4l 5s per cent. for the year 1875, 4l 10s per cent. for the year 1874, and 5l per cent. for the year 1875 and there-

after in perpetuity. Skipton and Wharfdale Railway.-Vice-Chancellor Malins has fixed the 25th instant for the appointment of an official liquidator.

BANKS.

At the meeting the 4 per cent. per annum dividend Alliance .was declared.

Bank of Egypt .- The net returns for the past six months have been 18,7451, which, added to 3,3701, the previous balance, makes

been 10,740, which, added to 3,370, the previous balance, makes an aggregate of 22,115. The usual interim dividend at the rate of 10 per cent. per annum, free of income tax, absorbs 12,500. Bilston District. —A dividend at the rate of 5 per cent. per annum, with a bonus of 2½ per cent., is recommended. City.—The half-year's gross profits were 46,443. After making all provisions, and after adding 5,000! to reserve, a divi-dend at the rate of 7 per cent. per annum free of income tax. dend at the rate of 7 per cent. per annum, free of income tax, has been declared, and 1,143/ carried forward.

has been declared, and 1,143/ carried forward. Crown Bank (Norwich).—The suspension of this private insti-tution has been announced, with an estimated liability of a million and a half. It was established in 1792, and possessed a fixed note issue of 49,671/. The senior partner, Sir R. J. H. Harvey, Bart., who has committed suicide, was seriously in-volved in foreign stock speculations, and the recent fall in prices has incurred a heavy loss on these transactions. Halifar, Joint Stock Ar interim dividend at the rate of 15

Halifax Joint Stock .- An interim dividend at the rate of 15

Habiax Joint Stock.—An interim dividend at the late of per cent. per annum is payable. Imperial.—The half-year's profit, including 4,106l brought forward, amounts to 30,227l; and, after deducting the current charges, providing for all bad and doubtful debts, and allowing for rebate, there remains for appropriation the sum of 17,043l. It is proposed to apply 13,500l to the payment of a dividend at the rate of 6 per cent. per annum, free of income-tax, and carry the balance, 3,543l. The report was adopted at the meeting.

THE ECONOMIST.

London and Brazilian.—The adopted report stated that the net profits for the six months ended the 31st March were 20,281/, from which an estimated loss of 3,000/ sustained during the previous half-year was deducted. The directors stated that the business of the bank shows a progressive recovery, and that at an early date they will take into consideration the desirability of reconstructing the bank, with a reduced liability. London Jaint Stock.—The half-year's ust profit was 91,560/, out of which 87.000/ was appropriated to the payment of a dividend

of which 87,000l was appropriated to the payment of a dividend at the rate of 12¹/₂ per cent. per annum and a bonus of 3s per share, leaving 4,560l to be carried forward. Deposits, 12,812,040l; discounts, 11,830,790l.

London and South-Western .- A half-year's dividend of 6s per

London and South-Western.—A half-year's dividend of bs per share is to be proposed. London and Westminster. — After paying income-tax and setting 2,000l apart to the building account, the net profits for the half-year amounted to 175,529l, or, including 7,503l brought forward, to 183,032l. A dividend and bonus at the rate of 18 per cent. per annum upon the paid-up capital of 2,000,000l absorbs 180,000l, leaving 3,032l. The chairman said that their business was thoroughly sound, and an improvement was taking place. Deposits 19,600,905*l*, and acceptances 759,382*l*. Metropolitan.—The net profits for the past six months, includ-

ing a balance brought forward of 1,619/, amounted to 7,252/. A dividend at the rate of 5 per cent. per annum was declared, leaving a balance of 2,252/ to be carried forward.

National.—Including 4,408l, the previous surplus, the net profits for the year have amounted to 59,582l. A dividend at the rate of 7 per cent. per annum is announced, and 5,000l is appropriated to reserve, leaving 2,032l. Deposits, 5,104,114l; reserve, 64,532l. Parr's Banking.-

An interim dividend at the rate of 8 per cent. per annum, free of income tax, it is anticipated, will be declared. Staffordshire Joint Stock.—Half-year's net profits 10,922l, ex-clusive of previous balance 470l, and rebate brought forward 2,466l.

These together make a sum of 13,858*l*; out of which an interim dividend of 15s per share leaves 7,299*l*. Union of Manchester.—Year's not profits, including 1,394*l* brought forward, 46,127*l*. Two dividends at the rate of 8*l* per cent. per annum, and a bonus of 3s per share each half-year, have absorbed 44,717*l*, leaving a balance of 1,410*l* to be carried the carried. forward. The reserve fund now stands at 94,612/10s, and the property account at 10,000/.

FINANCE, CREDIT, AND DISCOUNT COMPANIES.

General Credit and Discount.—The half-yearly report states that the usual interim dividend at the rate of 5 per cent. will be paid free of income tax, out of realised profits. The creditors of the South-Eastern Railway of Portugal are now receiving the

the South-Eastern Railway of Portugal are now receiving the distribution made by the liquidator. London Financial Association.—The liabilities, 179,800l, have been reduced 47,000l during the half-year; and there is a cash balance in hand of 11,695l. Interest has accumulated to about 95,000l, and this is likely to bring in a considerable sum shortly. The position is deemed to be generally improving. New Zealand Trust and Loan.—A dividend of 5s per share, or at the rate of 10s per cent. per annum has been declared. ASSURANCE COMPANIES.

ASSURANCE COMPANIES. Crown Life Assurance.—At the meeting, it was reported that 828 policies for the sum of 426,620l had been issued during the past year, yielding 13,294l in new premiums; that the net funds were 1,126,281*l*, and the assurances in force 4,325,308*l*; and that the annual income was 178,374*l*. At the quinquennial meeting,

the profits for the five years were declared to be 82,576l. General Life and Fire Assurance.—Half-yearly dividend an-nounced at the rate of 6 per cent. Thames and Marcon Marine Lithes been resolved to

Thames and Mersey Marine Insurance .- It has been resolved to recommend a payment of 6s per share, being 2s per share divi-dend and 4s bonus, making with the dividend on account paid in January last, 8s per share, or 20 per cent. per annum on the paid up capital of the company for the year ended the 30th June last.

Whittington Life Assurance .- At the annual meeting the direc tors reported the issue of 389 new policies during the year, for 132,563l; that, notwithstanding some withdrawals, business showed satisfactory increase; that the premium income was now 27,480l; and that the amount of funds was 41,046l.

MISCELLANEOUS COMPANIES.

British Australian Telegraph .- The South Australian Government propose to construct and maintain at their own expense a land line to Port Darwin, where it will be connected with the

company's cable. East and West India Docks.—A dividend of 3 per cent. for the half-year has been declared. Business is now said to be increasing satisfactorily.

Fore Street Warehouse.-The report recommends a dividend at Fore Street Warehouse.—The report recommends a dividend at the rate of 10 per cent. per annum, absorbing 19,500l; and 20,000l is applied to the extinction of Mr Morrison's claim for goodwill; surplus, 15,381l. Great Oceanic Telegraph, Limited.—Creditors are required to send particulars of elaims to Mr Frederick Maynard, the official liquidator, by the 28th inst., the 6th of August being appointed for adjudicating upon them.

Isle of Wight Estates, Limited.—Creditors are required to send particulars of their claims to Mr James Waddell, the official liquidator, by the 1st of September, the 5th of November being appointed by the Master of the Rolls for making the adjudica-tion.

Improved Industrial Dwellings.-Half-year's receipts, 6,9521; spenses, 3,5241; net, 3,4281. A dividend at the rate of 5 per expenses, 3,5241; net, 3,4281. expenses, 3,5241; net, 3,4284. A dividend at the and cent. was declared, while nearly 5⁷/₅ per cent. was earned. *Phospho-Guano*, *Limited*.—Capital 400,000*l*, in 15,000 A shares

bearing 10 per cent. preference interest until 1882, and in 25,000) bearing 10 per cent. preference interest until 1882, and in 20,000 B shares, with dividend deferred until after the annual instal-ment for the A shares redemption is provided for. The com-pany is formed for the purchase of the works, agencies, and good-will of the Phospho-Guano Company from Messrs Peter Lawson and Son, for the price of 250,000*l*, of which all will be taken in shares. The deposits in the Pacific Islands and near Charleston are stated to contain many millions of tons: and large profits are are stated to contain many millions of tons; and large profits are said to be realisable, and the trade already established.

Turkish 6 per Cent. Loan, 1854.—The numbers of 228 bonds, representing 67,850l, have been drawn and published for re-demption at par on the 10th of October next.

Zara Baths.—Creditors are requested to forward particulars of claims on or before the 22nd of August to Mr Charles Tattersall, the official liquidator, the 31st of October being appointed for adjudicating upon them.

MINING COMPANIES.

Land and Sea Telegraph.—At a meeting a resolution was come to for a voluntary winding-up under the supervision of the Court. Mr Alfred Good, Major Palliser, Major Anson, and Mr

Kates were appointed liquidators. North Wheal Exmouth Mining.—On the 3rd of August the Master of the Rolls will make a call of 4s 6d per share upon the contributories.

The return, compared with last week, presents an increase of 137,192,568f in the discounts. There is a diminution of 30,483,544f in the coin and bullion, but an augmentation of 14,966,350f in the circulation of notes, and of 102,359,272f in the private accounts. The large increase in the last-named item is nor coubt due to the considerable withdrawals from the private banks and "financial establishmente."

Transactions on the Bourse have been limited. Indeed brokers have manifested extreme repugnance to accepting any especially for a rise; but they have done their best to keep up prices, and in that they have been aided by some influential speculators and bankers. But in spite of Il efforts there has been another heavy According to good authorities prices are yet fall in everything. far from having touched their low st point; and some of them say that it would be well to precipitate them to it at once, because then they would mend, and that would create confidence; whilst if they be left to fall day by day the security-holding public will te daily plung d into grater consternation. Other authorities seem to recommend that the Boarse shall be closed for

awhile, as has been done at Berlin, Frankfort, and Constantinople;-closing, they say, would prevent the panic from in-creasing, and would-what appears to them a more important consideration-keep the Paris market from being inundated with stock, shares, and obligations, that cannot be sold in Germany or at London. Subjoined are the quotations of the week :--

Last Friday afternoon I sent you a telegram stating that the first financial demands of the Government for the war were 50,000,000f to the War department and 16,000,000f to the Maximum hat it appears that appears to the Marine; but it appears that owing to the excessive crowding the lines (the largest ever known) it did not reach you. The extreme smallness of the sum proposed excited considerable sur-prise, especially as a demand of a loan of 500,000,000f had been expected, and was even announced in many newspapers. But the French Government has the art of gilding its financial pills, or what comes to the same thing, not presenting them in the lump (witness its budgets cut up into five or six parts); and so they are more easily taken. A sudden demand for 500,000,000f would have made people shudder-a small one of 66,000,000f put them in good humour, and consequently rendered them dis-posed to receive with complacency a subsequent one of larger amount. How artful such maneavres are among an unreflecting and impressionable people like the French! On Monday serious business was proceeded to, and there were presented to the Corps Legislatif bills :- 1. For opening to the Ministry of War supple-

mentary credits of 2. To the Ministry of Marine 3. To the Ministry of Finance for the Treasury 440,000,000 60,000,000

- service of the army To the same Ministry a supplementary credit for 1,000,000 4 4,000,000

interests of the Floating deb: 5. To the Ministry of Foreign Affairs a supplemen-

tary credit of 400.000 charges and others that are inevitable, consisted in the presentation of bills :-

f

99

...

97

1. For raising the maximum of Treasury bills authorised to be issued for 1870 from 150,000,000f 500,000,000

- that deeds of sale, succession, partnership, &c., and of all bargains reduced to writing, shall pay one-twentieth more than the regular tariff)
- 3. For re-imposing from 1871 a double-decime (two-tenths in addition to the regular tariff) on certain
- toms duties on coffee, cocoa, and tea, as follows : Coffee.—From countries out of Europe, 100f the 100 kilogs (4l the 2 cwt), and from bonding warehouses in Europe, 110f (instead of 50f 40c and 55f 40c).....
 - Cocoa.—From countries out of Europe, 50f the 100 kilogs, and from bonding warehouses, 60f (instead of 25t and 35f)..... Tea.-From India, 100f, and from other countries, 1601 (instead of 40f and 1001)

All these measures have been passed. With respect to the determination to raise money by means of Treasury bills, instead of a direct loan from bankers or the public, the general opinion appears to be that it is convenient for the moment, but that the renewal or consolidation of them may have to be effected at a moment which may be inconvenient. But it is not the fashion in this country to look far into the future.

this country to look far into the future. The Bank of France on Tuesday raised its rate of discount from $2\frac{1}{2}$ to $3\frac{1}{2}$ per cent., and the interest on advances from 3 to 4. With the large stock of the precious metals it holds, this measure, notwithstanding the drain the war will occasion, might perhaps have been postponed; but the Bank will have to discount some of the Treasury bills about to be issued, and to do so at $2\frac{1}{2}$ would not have been prudent. Moreover it had to consider the wishes of the great bankers who will take part in the same operation, and who would not have been willing to employ money at a low and who would not have been willing to employ money at so low a rate when they could get a higher one for asking.

As regards the new taxes, the Government at first fixed the duty on coffee from Bombay warehouses at 105f, but after con-ierring with a Committee of the Legislature raised it to 110!. The object of the augmentation no doubt is to please the ship-owners of Bordeaux, who have long complained that the terms on which each of the augmentation are allowed to interest of the terms on which coffee from Bombay warehouses was allowed to be intro-duced were injerious to them. The calculation of the Govern-ment is that the maintenance of the demi-decime on the registration dues and the augmented duties on coffee, cocos, and tea, will produce 24,400,000f. But the deputy of Havre, M. Le Cesne, out that the augmentation of price on those articles which will neces sarily follow will diminish consumption, and that consequently the expected revenue will not be produced. He remarked, moreover, that the large quantities of coffee now in bond (at Havre slone 18,000 tons) will be taken out, and that it will not be until after they are consumed, which can only be in months, that the new tax can take effect, so that it is doubly sure not to yield the sum counted on. The Minister of Finance, in reply, made use of the famous Protectionist argument that a tax divided among millions of persons makes a scarcely perceptible sum for each. When, for example, he said the duy on office was some years back reduced of persons makes a scarcely perceptible sum for each. When, for example, he said the duty on coffee was some years back reduced one-half, the reduction made only 1 centime (less than the fifth of a farthing) per cup. But M. Le Cesne observed that even such a reduction is of benefit to the poor, and he stated that under the reduction the consumption on coffee had more than doubled, and that the Treasury had received a larger revenue by 2,000,000f. But this reasoning, though supported by M. Jules Simon, and though the latter remarked that in Brance coffee is not a luvury though the latter remarked that in France coffee is not a luxury but an article of absolute necessity (it is consumed as tea is in England), had no effect on the Chamber.

The financial changes already imposed on the country are of course only precursors of others which will be more heavy. But heavy as taxation will be, it will be less burdensome to all branches of industry than the levy in men. The contingent of the present year has been raised from 90,000 to 140,000 men; the reserves of the army (that is, the soldiers of the levies of the last 7 years who had been discharged before completing their period of service) have been sent to their regiments; the garde mobile has service) have been sent to their regiments; the garde mobile has been called out; voluntary enlistments are being called for all over France, and have, in Paris alone, it is alleged, already pro-duced between 10,000 and 12,000 men. All these resources added to the existing army will raise the military forces to, as nearly as can be calculated, not far short of, if not more than, 800,000 men. The loss which the abstraction of such a mass of labour will cause to

industry is really fearful to contemplate, and the destruction of property which the war will occasion will be even greater. The war has reduced considerably the operations in the great markets. At Havre, yesterday, the sales of cotton were under 500 bales, and they were not much more numerous on the first two days of the week. From Marseilles on Tuesday the report was :-- " Comple'e stagnation ; nothing to quote in colonial products, oleaginous seeds, silk, cotton, or wool." At Nantes products, oleaginous seeds, silk, cotton, or wool." At Nantes there has herdly been a sale, and at Bordeaux but few. There have however been some dealings in coffee, and there are likely to be more. The railways have also been much affected. The Eistern has had to give up almost entirely its ordinary traffic to carry troops and war material, and the others have had partially to suspend the carrying of goods, because they have had to lend their waggons to the Eastern, by order of the Government.

Many of the banks and other "administrations," and also many commercial houses, have been greatly inconvenienced by the war, owing to its having called away considerable numbers of clerks and other officials. The Bank of France, the Socié é Générale, and almost all other establish meets, have promised not only to keep one their situations for ments, have promised not only to keep open their situations for the young men, but to pay them entirely or in part their salaries during their absence.

The contractors for the army are in a terrible position. They The contractors for the army are in a terrible position. They took engagements for supplies without foreseeing the scarcity of the present year, and without foreseeing war; and the conse-quence is that if they be tied down to their bonds they will lose more than 100 per cent. They have made serious representations to the Government, and justice seems to require that their con-tracts shall either be annulled or modified.

It may be interesting at the present moment to see the prce at

THE ECONOMIST.

which preceding war losns were issued — those of 1854 of 250,000,000f, of 1855 of 500,000,000f, and of 1856 of 750,000,000f. stock, were respectively 65f 25c, and that of all in 3 p cent. 1859 of 500,000,000f in the same stock was 60f 50c.

The affairs of the City of Paris, though important in a financial The affairs of the City of Paris, though important in a financial point of view, have, in the midst of more exciting events, ceased to interest the public. It may, however, be stated that the Corps Legislatif has adopted a Bill fixing the extraordinary Budget of the City at 220,864,833f. This sum was 38,000,000f more than the Government and the City asked for, and was added at the request of one of the deputies of Paris, to enable certain works in his district to be undertaken. It is really curious to behold how largely the Legislature in this country deals with millions. The aforesaid extraordioary expenses are to be covered martly by said extraordioary expenses are to be covered partly by The afo sums due from the Government, partly by other sums coming from taxes, and partly (to the amount of 63,000,000[†]) by an issue of bonds; also by an augmentation of the octroi duties.

The Corps Legislatif has adopted the Bill for establishing money orders between England and France. It fives, as you have already been informed, the maximum amount of them at 10*l*, and the cost at 9d for 2l and under, at 1s 6d for from 2l to 5l, at 2s 6d from 5l to 7l, and at 3s from 7l to 10l.

Messrs Monteaux and Lunel, the money changers, continued in their last circular the recapitulation of the demands made on the money market of France for subscriptions to loans of States and to shares and obligations of companies. It appears that the total from the commencement of the year to the end of June was 1,336,000,000f, a sum in round figures of 53,500,000l sterling. On dit, that the Suez Canal Company is soliciting the French

Government to grant it a subvention or to guarantee a loan, as to enable it to meet its liabilities on obligations or otherwise, which the receipts are not sufficient to cover-the Government meenting to be indemnified by an annual levy on the receipts. But the moment is not a favourable one for asking for money. According to a return issued by the Company, the receipts down to the end of Jane amounted to 3,244,619f.

The market report is as follows:

FLOUR.-At Paris, yesterday, eight marks, 71f 50c the sack of 157 kilogs: superior, 70f.

FLOUR.—At Paris, yesterday, eight marks, 71f 50c the sack of 157
kilogs: superior, 70f.
COTTON.—The sales at Havre, in the week ending Friday, were
11,922 bales, and the stock 148,810. The closing quotations, compared
with those of the preceding week, were 4f to 7f lower for United States,
2f to 5f lower for India. New Orleans very ordinary was consequently
108f the 50 kilogs for good ordinary; Oomrawattee, 94f, ditto;
Madras, 90f, ditto; Bengal, 94f, ditto. This week sales have been extremely
limited, and prices have fallen heavily. Yesterday, New Orleans very
ordinary was 96f to 97f; low, 89f to 90f.
COFFEE.—At Havre, in the week ending Friday, 138 sacks Hayti,
56f the 50 kilogs, in bond; 5,720 ditto, 51f 75c and 58f; 175 Gonaives,
64f; 200 sacks 200 casks Jamaica, prices not stated; 2,890 Rio, 35f to
58f; 92 Capitania, 51f 50c; 64 Santos, 75c; 350 Bahia, 47f to 48f;
500 ditto mashed, 51f to 62f; 10 casks Ceylon plantation, 84f 50c;
60 ditto native, 65f; 40 Java, 71f; some Guadeloupe habitant, 135f,
daty paid. By auction some damaged. This week, Winard, 73f; Hayti,
56f to 65f; Gonaives, 65f; Port-au-Prince, 62f; Bahia, 52f and 53f.
At Bordeaux, last week, 40 casks Santiago, 90f; 140 Guatemala,
98f 50c; 164 Bahia, 76f; 190 Mysore, 98f 50c to 99f; 340 La Guayra,
78f to 92f; 140 Costa Rica, 102f to 103f 50c; some French West India,
142f 50c to 146f. This week, Mysore, 98f and 98f 50c; Rio washed,
78f; French West India, 145f; Guatemala, prices not stated. At
Nantes, last week, a small lot of Guadeloupe habitant, 137f 50c, duty
paid. No sales this week. At Marseilles, last week, 206 sacks Rio,
58f 50c. This week, St Domingo, 67f; Ceylon plantation, 90f to 95f.
SUGAR.—At Havre, in the week ending Friday.

Nantes, last week, a small lot of Guadeloups matter, 101 and 105 paid. No sales this week. At Marseilles, last week, 206 sacks Rio, 586 50c. This week, St Domingo, 671; Ceylon plantation, 90f to 95f. SUGAR.—At Havre, in the week ending Friday, 686 hogsheads French West India, 50f to 51f the 50 kilogs, bonne quatrieme, duty paid; usine, 57f to 66f 75c; 86 hogsheads Porto Rico, 50f 50c, bonne qua-trieme. This week, French West India usine, 63f; and bonne qua-trieme, 50f 25c to 51f. At Bordeaux, last week, several lots French West India were taken at 49f 75c for bonne qua-trieme, and 62f 50c to 63f 50c for usine. No sales this week. At Nantes, last week, 70 sacks Mayotte, prices not stated; 905 hogsheads French West India, 50f, bonne quatrieme; usine, prices not mentioned. This week no sales. At Marseilles, last week, 2,900 sacks Pernambuco, 29f 75c, No. 10; 2,578 sacks Havana, 33f 25c and 33f 75c, No. 12; some Guadeloupe, 30f 25c, bonne quatrieme. No sales this week. INDIGO.—The sales at *Harre*, in the week ending Friday, were 16 chests Bengal, 1 Kurpah, 3 serons Guatemala, at established prices. No sales this week. At *Bordeaux*, last week, 12 chests Bengal, 14 Kurpah, 3 serons Guatemala. This week Kurpah, Bengal, and Guate-mala

HIDES -Sales were active at Havre in the week ending Friday. Buenos Ayres dry ox and cow, 105f the 50 kilogs; 14,795 La Plata salted saladeros ox, 59f to 60f; 300 ditto cow, 66f 50c; 1,500 Rosario, 61f 50c; 1,600 Para salted, 58f. This week Monte Video saladeros ox, 61f 50c; Rosario ditto, 62f; Pernambuco ditto, 59f 50c.

61f 50c; Rosario ditto, 62f; Pernambuco ditto, 59f 50c. WOOL.-At Havre, in the week ending Friday, 340 bales La Plata un-washed, at the conditions of the auction. No sales this week. TALLOW.-The market was calm at Havre in the week ending Fri-day. La Plata saladeros ox, 53f 50c to 54f the 50 kilogs, and/for delivery, 54f; ditto sheep, 52f to 52f 75c, and for delivery, 53f to 53f 50c. This week Monte Video saladeros ox, 53f; Buenos Ayres ditto, 52f 75c; La Plata sheep, 50f 50c. At Paris, yesterday, French, 104f the 100 kilogs, without octroi duty. Srmrs.-At Bordsaux, the day bafore yesterday, 3-6 Languedoc, 80 deg., 85f; 3-6 beetroot, 90 deg., 70f.

COMMERCIAL AND MISCELLANEOUS NEWS.

Information has been received at the Board of Trade from the Foreign Office that a notice has beed issued by the North German Government stating that on the Northern coast of Germany orders have been given to take up the sea-marks, to withdraw the lightships, and to extinguish thefixed lights.

It is now announced that six weeks will be allowed to vessels in Prussian, and thirty days to vessels in French, ports to discharge or load cargo; and that safe conducts to ports of destination will be granted in both cases.

Advices from Vienna state that the Austrian Chamber of Commerce has petitioned the Austrian Government (as they subsidise the steamors belonging to the Austrian Lloyd) to allow their vessels to ply direct between Trieste and the ports of London, Liverpool, and Southampton, so that the trade of the Austrian Dominions with England and America may be as little disturbed as possible by the war between France and the North German States.

During the week ending July 20 the imports of the precious metals were :--gold, 589,321/; silver, 347,479/. The exports were -- gold 346,2777; silver, 196,448/.

The following is a return of the number of paupers (exclusive of lunatics in asylums and vagrants) on the last day of the second week of July, 1870, and of the corresponding week in 1869 :---

Bankers' Clearing-house, July 21, 1870.

The total since the 1st of January is 2,282,618,000l, compared with 2,051,744,000l for the corresponding period last year, showing an increase of 230,874,000l.

The nature of the Bank of England return made up to Wednesday, the 20th inst., fully explains the advance of $\frac{1}{2}$ in the rate on Thursday. The other securities are 1,739,860l larger in amount; the coin and bullion, 564,278l less; and the total reserve close upon a million less than last week, while the liabilities show an increase of nearly a million.

Subjoined is our usual table, affording a comparative view of the Bank returns, the Bank rate of discount, the price of Consols, the price of wheat, and the leading exchanges, during a period of four years, corresponding with the present date, as well as ten years back, viz., in 1860 :-

In 1860, the Chancellor of the Exchequer had presented his Supplementary Budget to the House of Commons. The outbreak of disturbance in Syria, and the probable armed intervention of France and other Western Powers, were giving rise to uneasiness. A loan for 6,000,000l to the City of Paris had been sanctioned.

In 1867, trade was in a very sluggish state, and a general decline had taken place in the value of most articles of prodecline had taken place in the value of most articles of pro-duce. The Bank rate was 2 per cent. There was little de-mand for money, and both home and foreign stocks were neglected. Corn was dull and drooping. In 1868, a stormy meeting of the Credit Foncier share-holders had been held in Exeter Hall. The report of the

directors of the Brighton Railway Company had been issued and had been favourably received. The Bank Holidays Bill had been withdrawn by its promoters. The Canadian Inter-Colonial Bailway loan, 2,000,000*l*, had been introduced by Messrs Barings.

In 1869, the compromise of the Irish Church Bill had been effected. The prospectus of the Falmouth, Gibraltar, &c. Telegraph Company had been issued. Money was very easy.

The amount of the "other" deposits, as compared with the "other" securities, showed, in 1860, a deficiency of 4,153,8351; in 1867, an excess of 3,527,3241; in 1868, an excess of 5,676,9591; and in 1869, an excess of 4,518,4881.

In 1870, there is a deficiency of 364,3197. DISCOUNT AND MONEY MARKET.—After a period of eight months, during which the Bank of England rate of discount has remained at 3 per cent., the directors on Thursday raised it to 31. The difference in the price of gold at Paris and London, which has followed the decline of the rate of exchange on London to 25f 5c, a fall of 12 cents this week, has led to the withdrawal of bullion for the Continent, and doubtless much more will follow beyond the 290,000l taken out to-day. It is questionable whether the money that may

[July 23, 1870.

be transmitted to this country will be sufficient to counteract to any material extent the inevitable efflux of money to the Continent as the direct and indirect results of the war come into play. In Germany, for example, enor-mous amounts of stock of various descriptions will probably be sold in the future, especially American, and will in the first place come upon this market to remain here or to be shipped to the United States. The resources of the Bank of France will no doubt be taxed farther on, and London is obviously the first place at which assistance would be sought. In many other ways it seems only reasonable to anticipate the commencement of a demand from those quarters which is not yet apparent. In this country precautionary supplies will be laid in by provincial bankers, and private persons will increase their balances at call, which at the same time that it in-creases the resources of the banker it also increases the most dangerous portion of his liabilities. Considerable sums of money are always required in the provinces purely for harvest purposes, and a drain will be experienced on this account.

Since the advance of 31 in Threadneedle street the terms have been stiffening more to-day than yesterday in the open market, and there is a reluctance to do discounting busine at all unless with a margin for eventualities. We believe the bulk of the lending business to have been done to-day upon the basis of a 4 per cent. Bank rate, although for short periods that has been the extreme figure for fine paper. We hear in many quarters that bankers have been calling in the funds they had lent on stocks ; this may arise from two causes, but in any case is no doubt advisable. In certain instances to-day 5 per cent. has been obtained by discounters for six months' Bank bills, but as this is quite exceptional for the present we quote 41 to 5. As regards trade, and especially six months' bills, it is only natural that such paper is taken with great caution under existing circumstances, and the quotation we give is little better than nominal.

The current quotations for mercantile paper having various e as follow inde to run a

ness was almost entirely suspended in the stock markets, and prices were purely nominal. After such an eventful weekwhich proved the ruin of some dozen persons and disastrous to a large number-it is only natural that a general desire should be felt that a period of rest should precede another week which might be expected to reveal new difficulties. So far, however, matters have not been so bad as they might have been, but the end of the month is looked for with renewed apprehensions. The English funds, after touching 88% for Consols as the lowest point, have steadily recovered with occasional relapses as rumours of other Powers becoming implicated in the Franco-Prussian quarrel have been spread about. Yestarday and to-day the funds have been decidedly stronger in tone, Consols moving to 90 to 904 early this day. The purchases on account of the Government have very much tended to strengthen this department. The Government buying has been for the most part in New Threes, in consequence of which it is expected this description will command a backwardation at the next settlement. To-day the Government have bought 78,000*l* New Threes at 90 $\frac{3}{2}$. Consols, after being as good as 90 $\frac{1}{2}$ te 90 $\frac{3}{2}$, close a fraction lower on the withdrawal of gold from the Bank at 89 $\frac{3}{2}$ to 90 $\frac{1}{8}$.

EXCHEQUER BILLS .- 2s to 6s prem.

FOREIGN STOCKS.—As day after day has passed by since the war panic of 1870 struck terror into the operators upon all European bourses alike, predictions of a speedy re-action have been rife. It is curious to remark how little the temper of the investing public seems to be understood by those whose living depends upon their operations. At the close of busi-ness for many days past the opinion has been authoritatively pronounced in many quarters that prices had reached their lowest point. The general decline however has continued, and no one can possess a sufficient knowledge of all the existing and prospective influences to enable him to define such a limit. Our experiences of the panic which commenced in 1866, and the subsequent stagnation in all departments where credit was a ruling power, is surely some guide to the probable course of affairs at the present moment. The con-fidence which has been gradually rebuilt over a period of five years has been destroyed at a blow. So heavy and sudden a depreciation will, as a matter of course, bring some buyers into the market. The recovery in a few railway stocks yesterday and to-day, notably North-Eastern and London and North-Western, indicate that some cash purchases have been made. At the present time, comparatively small operations either way will produce a more than ordinary effect; but there can be little doubt that many months -for what anybody knows many years-may elapse before anything like the highest level lately reached will be reco-The real loss by the fall in values has been much vered. over-estimated, and the depreciation which has been much calculated, and which is much greater now than last week, has been made upon a fictitious basis. In estimating the actual depreciation of property it is neces-sary to establish as a fact that the point from which the fall took place was a real tangible value. If the circumstances in which the high point lately reached by numbers of foreign stocks be investigated, it will be found and shown conclusively that 54, for example, as the price of Turkish 5 per Cent. of 1865, was a value resting on a false foundation. The last rise of 5 or 6 per cent. from about 48 would probably have been broken down with the first rise in the Bank rate, whether a war had broken out or not. Consequently this 5 or 6 per cent. increase in the value of the 36 millions Turkish 5 per Cent. of 1865 contained no tangible value as property at all, and, therefore, the loss that has been sustained has been only by those who were unwise enough to buy at the highest point. The same argument applies to most of the stocks which have lately suffered a considerable and violent fall, and, therefore, to estimate the loss of property by such depreciation is to start with a basis for calculation, which certainly at the time of the fall had no real existence, as compared with last week, even allowing for some recovery from the worst point. Egypt, 1868's, are 4 lower; Italian of 1861 are the same; Peruvian 5 per Cent. of 1865 are 2 lower; Spanish are unaltered; Turkish 5 per Cent. of 1865 are 1 lower; and the 1869's 2 lower. To-day there has been rather a better feeling throughout the day, except just at the opening, when two failures were announced, but it is useless to disguise the fact that the next settlement is expected to bring with it no little trouble.

The transactians recorded in the official list are as follow: —Argentine 6 per Cent., 1868, $85\frac{1}{4}$ 7; Brazilian $4\frac{1}{2}$ per Cent., 1860, 78; ditto 5 per Cent., 1865, 85 7; Chilian 6 per Cent., 1867, 95 $\frac{1}{4}$; Danubian 8 per Cent., 1867, 79; Egyptian 7 per Cent., 1862, 2nd issue, 80; ditto 7 per Cent., 1864, $82\frac{1}{2}$; ditto 7 per Cent., 1868, 67 6 $7\frac{3}{4}$ 5 $6\frac{1}{2}$ ex div.; ditto 7 per Cent., 1868, 100*l*, 67 $6\frac{1}{2}$; Guatemala 6 per Cent., 1869, 65; Honduras Government 10 per Cent. Bailway Loan, 75 70; ditto ditto, 1870, Scrip, 15*l* paid, $\frac{1}{4}$ $\frac{3}{4}$ 1 prem.; Mexican, 12 $\frac{1}{2}$; New Granada, 20 $\frac{1}{2}$; Peruvian 5 per Cent. of 1865, 84 3; ditto 1870, Scrip, all paid, $82\frac{1}{2}$; ditto,

ENGLISH RAILWAY STOCKS .- Perhaps of all the markets in which there were very large accounts open for the rise when the heavy fall of a fortnight since came upon us, in no case were operators more justified, if specalation be justifiable at all, than operating for the rise in English railway stocks. The increase in the traffic receipts alone of the heavy lines, especially those running through the iron districts, is sufficient proof of the weekly improvement which has been going on, and prominently, for a year past. In nearly all cases the dividends which are now being prepared for distribution would have been larger than for the corresponding period of last year, and in some cases the improvement in the dividend would undoubtedly have seen certain stocks considerably above the level from which they have recently fallen had there been no disturbance of peace. It is not therefore matter for any surprise that persons who have ready cash at their disposal should have come into the market this week, after the heat of the alarm has been cooled down, and have purclased North-Eastern Consols at 130, when 10 days ago they were about 145. Other instances may be cited, and there are several stocks almost equally cheap at existing rates. It must be borne in mind, however, that the rate of dividend expected is but a small element in the actual market price as matters stand at present, and as it is probable they will be in the future before Europe is fairly at peace again. If the money markets are to be disturbed very seriously, and considerable losses should be suffered by many branches of trade, stocks of all descriptions must be sold quite irrespective of dividends, and it may be also of price, as we have seen already in consequence of failures. The next settlement will not be passed over without further unpleasant

revelations it may be taken for granted, and the inference therefore naturally is that there may be large supplies of stock of which there are no signs at present. Under these circumstances it would seem to be advisable to wait. To-day this department has recovered in some cases to a small extent. One failure in this market has been announced-rather an important one it is understood.

Subjoined is the usual list of the closing prices of the principal railway shares last Friday and this day :-

AMERICAN SECURITIES.—An impression very naturally prevails that United States bonds will gradually decline to much lower figures if no unexpected circumstance suddenly arrests the progress of the war. These securities are well known to have found their way in very large numbers to Germany for a couple of years past. The large numbers of Germans who have emigrated to the United States since the Civil War came to an end has afforded their relatives at home peculiar facilities for judging of the material resources of the Republic, and of the industrial qualities of the people. These circumstances have made United States bonds a favourite security all over Germany, and hence the large extent to which they are now held there. A very high point had been reached before the panic had set in, although perhaps not higher than was justifiable, and it is argued that if necessity compels realisations to a large extent on the Continent, which is not improbable, the price must recede considerably, as apart from the undoubted security the disposition of the public is not such as to cause a large absorption of any security under existing circumstances. The 1862, 1865, and 1867 Bonds close to-day at a rise of 11, and the 10-40's of 1. Eries are 1 higher, and Illinois Centrals 1.

BANK SHARES .- These securities have continued to suffer in common with all others. At such a period any liability is an especially unattractive feature. The following are the principal changes for the week :- Bank of Australasia, at 50 to 52 ; Bank of Egypt, at 40 to 42 ; London Joint Stock, at 30 to 32; and Union of Australia, at 38 to 40, ex div., have declined 3; Anglo-Egyptian Bank, at 21 to 23; Colonial, at 40 to 42; London and County, at 48 to 50; London and Westminster, at 59 to 61; Oriental, at 39 to 41 and Union of London, are 2 lower; Alliance, at 121 to 131; Anglo-Austrian, at 5 to 7 prem.; Bank of South Australia, at 29 to 31; and London Chartered of Australia, at 22 to 23, 1 lower; also Agra A, at 10 to $10\frac{1}{2}$; Chartered of India, Australia, and China, at $15\frac{1}{2}$ to $16\frac{1}{2}$; City, at 11 to 12; and Imperial, at 18 to 19, $\frac{1}{2}$ lower.

TELEGRAPH SHARES.-The following are the principal changes for the week :-Submarine Stock, at 235 to 45, is 5 lower ; British Indian Extension, at 41 to 5, have receded 11 ; Nower; British Indian Extension, at 1_{2} to 0, have receded 1_{2} ; Anglo-Mediterranean, at $13\frac{1}{2}$ to 14, and British Indian Sub-marine, at $6\frac{2}{5}$ to $7\frac{1}{8}$, $\frac{3}{4}$; also British Australian, at $4\frac{1}{4}$ to $3\frac{3}{4}$ dis.; Great Northern, at $10\frac{1}{4}$ to $\frac{3}{4}$; Marseilles, Algiers, and Malta, at $5\frac{1}{4}$ to $6\frac{1}{2}$; and West India and Panama, at $6\frac{1}{4}$ to $\frac{3}{4}$. have declined 1.

MISCELLANEOUS.-The following are the changes for the week :-North British Australian Stock at 38 to 43 has declined 10; India Rubber and Gutta Percha shares at 401 to 411 41; and Telegraph Construction at 224 to 234 24; North British and Mercantile Assurance at 25 to 28; and Ocean Marine at 11 to 13 prem. have receded 2; also London Financial at $19\frac{1}{2}$ to $18\frac{1}{2}$ dis.; Hudson Bay at $8\frac{1}{2}$ to 9; and Berlin Water Works at 12 to 13 $1\frac{1}{4}$.

FOREIGN EXCHANGES .- The rate of exchange in Paris on London is about 12 centimes lower for the week, which makes gold, instead of being dearer in London than at Paris, as it was before the war was declared, about 2-10th's dearer now at Paris than here; hence the withdrawals. Bills on Hamburg, Amsterdam, and Berlin have been more saleable this week than last. Bills on Paris at short dates have been in demand at 25.05 to 25.10.

BULLION .- Gold to the value of 290,000l has been withdrawn for transmission to France and Germany to-day. The following is taken from the circular of Messrs Pixley, Abell, Langley, and Blake, on the transactions in bullion during the week :

week :---Gold.-The market has been in an unsettled state during the week, and as the imports have not sufficed to supply the orders for abroad, about 530,000/, in sovereigns and bars, have been withdrawn from the Bank for the Continent; on the other hand, 114,000/ have been sent in. The imports comprise-16,000/, per Russia, from New York; 3,500/, per New York, from New York; 7,500/, per Main, from New York; 5,380/, per City of Limerick, from Brazils; 19,290/, per Oneida, from Brazils; 3,000/, per Magellan, from Brazils; 1,250/, per Bonny, from Africa - total, 55,920/. The Australian mail is bringing 530,000/, most of which is on English account. This will be due here about the 20th August; the Great Britain has also sailed from Mel-bourne with 80,740/ for this country.

Silver.—There have been large orders for silver for the continent, and the price suddenly advanced to 61³/₂d per oz standard; in the present unsettled state of affairs however no price can be relied upon as indicat-ing the tendency of the market. The City of Brooklyn has brought 69,000/ from New York, and the Scandinavian 52,400/ in silver coin from Quebec.

Mexican Dollars -The Allemania has brought 10,500l from New

Mexican Dollars.—The Allemania has brought 10,500l from New York. Although this coin improved in price to 60d per oz, in sympathy with the sudden rise in bar silver, it was only for a short time, and we cannot now quote any nearer price than 592d per oz. Exchange on India for Banks' drafts at 60 days' sight is 1s 105d to 1s 11d per rupee. Applications for the India Council Bills were received yesterday. The amounts allotted were—to Calcutta, 297,500l; to Bonbay 100,000l; and to Madras, 2,500l. The minimum price was fixed as before at 1s 105d. Tenders on Calcutta and Madras at 1s 105d received 18 per cent.; on Bombay at 1s 205d in full. On the 6th inst. 50 per cont. was allotted on all three presidencies at 1s 105d. India Government Loan Notes are lower. We quote the 4 per Cents., 92 to 93; the 5 per Cents., 1015 to 1025; and the 55 per Cents., 109 to 110.

COMMERCIAL EPITOME.

FRIDAY NIGHT.

The attendance of millers at Mark lane to-day was fairly numerous, but there was a general indisposition to enter into busi-ness. The heavy advance which has taken place in values, and ness. The heavy advance which has taken place in values, and the ravourable harvest prospects, have had the effect of restricting sales; nevertheless, Monday's currencies were fully supported to-day for both English and foreign wheat. Off the coast and on passage parcels of wheat are difficult to realise. All spring corn was in request, oats being again 1s per quarter dearer. Maize, beans, and peas command very full rates. The top price of town-made flour has been advanced 7s; while foreign and country sacks have risen 4s per sack. This week's imports of foreign and colonial produce into London have amounted to 34,640 quarters of wheat; 8,410 barley; 31,980 oats; 7,600 maize; 6,770 peas; 1,540 sacks and 13,770 barrels of flour. At Liverpool this moreing there was a slight reaction from ness.

At Liverpool this morning there was a slight reaction from the heavy rise which took place in prices on Tuesday last; but at Wakefield wheat was about 7s per quarter dearer. The Liverpool cotton market opened on Friday last very de-

pressed, and on Monday and Tuesday there was quite a panic, and sales could only be effected at considerably lower rates. Since Wednesday there has been a slightly steadier feeling, but very little business has been done. The total sales amount to

only 43,050 bales, of which the trade have taken 39,050 bales, speculators and exporters 4,000 bales. The imports for the week are 57,305 bales, the actual exports 4,101 bales, and to-day's stock is estimated at 606,760 bales. Quotations for American descriptions have declined 1gd to 11d per lb, East India 1d per lb, and Bengals 3d to 1d per ib since this day se'nnight. To-day To-day there is a more healthy market; sales 10,000 bales, at less irregular rates

The following return shows the quantities of cotton imported and exported at the various ports of the United Kingdom during the week ended July 21, 1870 :-

At New York on July 21 middling Upland cotton was quoted a: 197d per lb.

We extract the following from Messre W. Nicol and Co.' ercular, dated Bombay, June 21:-In the early part of the week the weather was fine with occasional light showers, but during the weather was noe with occasional light showers, but during the past three days a complete change has taken place, and we have experienced very boisterous weather, with an almost in-cessant downpour of rain, which has placed an effectual check upon shipping operations. The continued receipt of dull accounts from Liverpool has had a very depressing effect upon our cotton market, and being unsupported by any demand prices have given way daily. At the close a decline of 15 rs per candy is apparent in most descriptions of the article as compared with the quotations of last week, but it will require a still further falling off before of last week, but it will require a still further falling off before exports will be induced to enter the market with home prospects so indifferent as they appear at present. The total of the week's transactions does not aggregate 1,600 candies, of which Dhollerah comprises fully three-fourths. Arrivals of cotton continue on a scale, and the already large stock here is being daily increased. fre The Bombay and Baroda railway is bringing down considerable quantities of Dhollerah cotton, many of the boats from that quarter having been obliged to run for shelter into the small ports contiguous to the line, where they discharged their cargoes. We yesterday received several telegrams from the growing districts means the monscore which may prove interesting as hearing regarding the monsoon, which may prove interesting as bearing apon nextseason's prospects :-Hingunghaut-Monsoon good, rain fallen 1½ inch. Oomrawuttee-Raining well since Friday. Total fall 5½ inches. Ryots busy sowing. Khamgaum-Monsoon yegularly set in. 5 inches rain. Dharwar-Rains very light. Only 2 inches and 28 cents since first instant. Tinnevelly--Our lates: telegram is dated 17th, and quotes 166 rs per candy.

Actual exports since last mail left, 14,131 bales. Messrs E. B. Liddell and (lo., of Alexandria, have furnished Messrs E. B. Liddell and Co., of Alexandria, have furnished the following report, dated July 8:—The calm in our cotton market has been increased during the present week to such an ex-tent that transactions were insufficient to establish quo ations, which continue entirely nominal. Although arrivals have consi-derably diminished, they nevertheless continue to increase our stock daily, giving it a certain importance. Fair to fully fair, 11§d to 11% d, f.o.b.; good fair to fully good fair, 12§d to 12§d, ditto; good to fine Galline, 13% d to 14% ditto. Freight for Liverpool for steam-pressed cotton about $\frac{1}{16}$ d per lb. Some transactions have taken place in October-November and December shipment at prices a triffe less than those quoted in our last. shipment at prices a trifle less than those quoted in our last. October shipment, 12¹/₂d per lb, f.o.b.; November, 11¹/₂d, ditto; December, 11¹/₂d to 11¹/₂d, ditto, for steam-pressed cotton; but hydraulically-pressed is about ¹/₃d per lb less.

dull, but rates have been maintained. Rice has continued dull of sale. The coffee market has been in a most unsatisfactory

state, and values are 8s to 14s below the highest rates lately current. Rum has been in demand at advancing rates. On the other hand, owing to the withdrawal of French and German buyers

other hand, owing to the withdrawal of French and German buyers from the market, wool has continued very duli of sale. The annexed is da'ed Bahia, June 25:—The dull advices re-ceived per Gironde on the 10th instant did certainly tend to s'acken our sugar market, and during the early part of the past fortnight no sales whatever were concluded; subsequently, owing to our low rate of Exchange, there has been more inquiry, princi to our low rate of Exchange, there has been more inquiry, princi-pally for the better qualities of muscovadoes, of which about 1,300 cases met buyers at 2,450 rs to 2,600 rs, equal to 20s 1d to 21s 2d per cwt, cost and freight, exchange $21\frac{1}{2}d$. Inferior browns are in moderate demand, and worth about 2,300 rs to 2,200 rs, equal to 19s to 18s 4d per cwt. Of Nazareths we have to report the sale of about 3,000 bags at 1,450 rs per arrobe, equal to 132. White sugars have been sold in small lots at 3,200 rs to 4,200 rs, equal to 25 + 8d to 33 + 5d per owt, free on board and inclusive of freight. Stocks to day: 5,514 cases 416 boxes 2,204 barrels 32,695 b or 6,590 tons, against 7,943 cases 337 boxes 762 barrels 25,940 bage, or 7,348 tons, same period last year. Annexed is Mes-rs William Moran and Co.'s market report,

dated Calcutts, June 17 :- The rains appear to be setting in here, and our last accounts from the factories report every appearance of their d ing so in the indigo districts. There have recently been good showers in Lower Bengal, and we hope we shall hear no more of the plant suffering from want of rain. The rivers have risen in Furreedpore, and manufacturing is being got on with with all speed. In Bhaugulpore and Purneah some factories threatened by the rising of the Coosey have also opened vats. In Kishnaghur and Jessore there have been heavy showers, as much as six inches in one day being reported from one factory in the latter district. Moorshedabad and Malda have also had rain, but are sadly behind hand for this date, and have been unable to sow all they would have done with earlier rain, and their chance of a fair season is very doubtful. Tirboot and Chuprah-We have had further complaints of late sowings having generally failed. Rain has fallen over many concerns, and there was every appearance of more at the date of our latest letters (three days ago), and we sincerely trust we have heard the last of the plant burning. There has been good rain in Shahabad, and from that district upwards accounts so far are satisfactory. We are pressed to be, on all sides to give some idea as to what the crop is likely but it is quite impossible at this early date to form any estimate. Exports of indigo from 1st November, 1869, to 16th June, 1870: -To Great Britain, 12,730 chests; Havre and Bordeaux, 3,114; Marseilles, 1,774; Foreign Europe, 1,509; America, 1,633; Gulphs, 1,647-total, 22,407 chests.

annexed is dated New York, July 8 :- The general tone The of the dry goods market is one of quietness, although there is a good degree of steadiness in the price of all kinds of goods, with the exception of such of the remnants of the spring and summer styles as it is not desirable to carry over to the next season. The recent decline in cotton had been anticipated, and fully disco by all manufacturers of cotton goods, and there is no probability of a further decline in prices at present. In woollen goods there is a more general animation to report. In the money market there has been no change of moment. The banks still hold large idle balances, the demand from merchants being quite limited, and the wants of Wall screet being easily satisfied, so that the rate on call loans remains heavy at 3 to 5 per cent. The last bank statecall loans remains heavy at 3 to 5 per cent. The last bank state-ment indicated a falling off in the demand for currency from the West, and the shipments have now almost entirely ceased. Discounts are extremely dull, and although lenders are unwilling to take long dates at current rates, yet with the small amount of paper offering quotations remain as last week. Just now, there is a considerable amount of mercantile paper maturing, which is generally honored regularly. The following are the current rates for the several grades of paper :--

THE COTTON TRADE.

LIVERPOOL JULY 21.

The cotton market has this week been agitated to an almost unprecedented extent, the declaration of war between France and precedented extent, the declaration of war between France and Prussia having had a very depressing influence. On Friday after-noon prices gave way and became very irregular, continuing to fall on Saturday, while on Monday and Tuesday the utmost distrust and uncasiness prevailed, with a further decline of 1d per lb; but yesterday and to-day there has been a more set:led appearance, with an increasid discussion to have on the part of the trade with an increased disposition to buy on the part of the trade. Quotations show a fall of from 10 to 15 per cent. The Bank rate has this der hos of the sector of the sector sector.

The Bank rate has this day been advanced to 35 per cent. Sea Island continues in limited reques, and prices of the medium grades [are] 1d to 2d per lb lower during the past fortnight.

THE ECON MIST.

737937

h

American has been extremely irregular throughout the week, and closes at a decline ranging from 1d to 1¹/₂d per lb. New York advices to the 20th instant quote middling Upland 20 cents, costing to sell in Liverpool 9¹/₂d per lb by steamer.

Brazil has been in limited request, and a decline has been sub-mitted to of ²/₄ d to 1d per lb. In Egyptian the business has been very small, and prices are about 1d per lb lower. In East Indian the demand continues on an extremely reduced scale, and with much pressure to sell, prices have fallen fully 1d per lb.

In cotton "to arrive" great depreciation has taken place, fully equal to that in business upon the spot. The latest quotations are —American, basis of middling, bales, July shipment, 8¹/₃d; Orleans, June shipment, 8³/₃d; Texas, ship named, 8¹/₄d; low middling Orleans, shipping or shipped, not below good ordinary, 8d; Dhollerab, fair new merchants, Cape, June-July shipment, 6⁵/₁₆d per lb.

The sales of the week, including forwarded, amount to 43,050 bales, of which 2,970 are on speculation and 1,030 declared for export, leaving 39,050 bales to the trade.

JULY 22 .- The sales to-day will probably amount to about 10,000 bales, with a steady market.

NEW YORK .- JULY 8.

27943 ... \$49009 ... 10655 ... 45063 ... 433600 ... 63537 ... 548983 ... 3763 ... 121654 ...

By special telegrams received by us to-night from the Southern ports, we are in possession of the returns showing the receipts, exports, &c., of cotton for the week ending this evening, July 8. From the figures thus obtained it appears that the total receipts for the seven days have reached 8,565 bales, against 11,709 bales last week, 12,847 bales the previous week, and 15,526 bales three weeks since, making the aggregate since and 15,320 bates three weeks since, making the spyregate since Sept. 1, 1869, up to this date, 2,835,607 bales, against 2,106,610 bales for the same period in 1868-9, being an increase this season over last season of 728,997 bales. The exports for the week ending this evening reach a total of 25,125 bales, of which 14,822 bales were to Great Britain and 10,303 bales to the continent, while the stocks at all the ports, as made up this evening, are now 154,062 bales. Below we give the exports and stocks for the week, and also for the corresponding week of last season, as telegraphed to us from the various ports to-mght :-

From the foregoing statement it will be seen that, compared with the corresponding week of last season, there is an increase in the exports this week of 19,742 bales, while the stocks to-night are 106,802 bales more than they were at this time a year ago. The following is our usual table showing the movement of cotton at all the ports from September 1 to July 1, the latest mail dates. We do not include our telegrams to-night, as we cannot ensure the accuracy or obtain the detail necessary by telegraph.

MARKETS IN THE MANUFACTURING DISTRICTS.

MANCHESTER, Jaly 21.—At the date of our last there was a prospect of peace being unbroken, but this was quickly dispelled by a declaration of war between France and Prussis. Immediately this became known all business in our market (except for very pressing wants) was postponed and has not yet been resumed, though prices now are on a much safer basis to operate on, as cotton has fallen on the average 14d per lb since the declaration of war, and yarns and goods have also declined in value largely, though not yet to the same extent as cotton. Though producers are now willing to make large concessions on prices ruling a week ago buyers are not yet to be tempted to renew operations, but are busy cancelling all high-priced orders behind in delivery, of which there are many. Producers here as a rule are in a good position to meet this heavy fall in prices, being still under contract and free from stock, though there are some notable exceptions to this. The business of the week has been almost a blank, and the few sales effected have been at very low rates ; and our market closes without any increase of demand, and with prices still tending in favour of buyers.

Annexed is Messrs Alex. Collie and Co.'s Manchester telegram, dated Friday, July 22:--We have no new feature to report to-day. Our market continues dull and depressed, but quotations are more regular than on Tuesday last.

Our market continues dull and depressed, but quotations are more regular than on Tuesday last. BRADFORD.—The market is extremely quiet in every branch. The business done in wool is very small. Staplers make some efforts, but in vain, to induce spinners to do business. Prices are hardly tested. The same apathy and inertness are manitested in both yarns and pieces. There is a growing feeling in favour of the curtailment of production, and the desirability of a public meeting of those connected with the trade being held to consider a proposition for reducing the time of working to four days a week is strongly urged. NOTTINGHAM.—The warlike state of affairs on the Continent

NOTTINGHAM.—The warlike state of affairs on the Continent has materially affected the lace trade, a considerable number of orders having been cancelled. The home trade, however, is in a tolerably healthy state, and there is still a fair demand for co'ton fancy laces. In the hosiery trade there is little or no alteration.

CORN.

AMERICAN GRAIN AND FLOUR MARKETS.

New YORK, July 8.—The market for breadstuffs throughout the week has been very unsettled and so closes. The receipts of flour have been liberal, lower accounts have been received from Liverpool, but detailed advices of the drought in France, with the reports of probable hostilities between France and Prussia, have contributed to some speculation, and checked the decl ne of prices. So ne concessions have been made, however, and yesterday and to-day large lines of good shipping extras have been sold at \$5.35 to \$5.45, and interior ditto at \$5.10 to \$5.15, mainly for export, the close being comparatively steady though not active at these prices. The medium grades show a decline of 25c per bbl for the week and are dull. Rye flour has slightly improved, but corn meal continues dull. Wheat has not arrived freely, but much of the receipts have been in an improved condition; these, with dall accounts from Liverpool, and an absence of demand from the continent, have sold at daily declining prices. Sound wheats have shown more firmness, with some speculative business, but in fact the whole market for red wheat averages 7c to 10c decline from last Friday. At to-day's market receivers made an effort to check the decline and sent largely to store but only produced dulness-No. 2 spring closes n a ly nominal at \$1.16 to \$1.23, the lower figure for "steamer" Ci icrg. Winter wheat, which sold last Saturday at \$1.50, was dill at \$1.42. Corn has been active and

so that there was no business doing on either Saturday or Alonday, although many of the brok is were at their offices on Saturday, and we give below the nominal quotations for that day. Tuesday the market for cotton on the spot opened very dull and about to lower; but on Wednesday there was a better feeling, and this was continued into Thursday, based on a slight improvement in the tone of the Liverpool advices; in the afternoon of the latter day, however, the improvement was lost, the close being dull without however any change in prices. To-day there has been a fair business doing, the demand being almost entirely for consumption, and the close was steady at unchanged rates. The efferings during the week have been fully up to the demand, and holders would have been willing to supply larger orders at a slight concession from the ruling rates, but the retail business of the past few weeks prevents the throwing of any large lines upon the market, as it could not be done without a considerable depression in prices. For future delivery, the business has continued rather more liberal than for spot cotton, though not by any means equalling the transactions of the few weeks past. There has been market caution shown in putting out contracts for the next crop

prices have improved. The demand appears quite brisk from the East. There is, however, some accumulation of stocks in store. The business to-day was mainly restricted to inferior and fair boat-loads of Western mixed at 94c to 98 2. Oats have also been quite active and close at 1c to 2c higher, but at this advance there is more disposition to close out lots in store, as the new crop will soon be in market. Western cargoes have brought 64c to 64tc

LONDON MARKETS.

STATE OF THE CORN TRADE DURING THE WEEK MARK LANE, FRIDAY EVENING.

Great excitement has prevailed in the corn trade throughout the week. At Mark lane on Monday last, owing to the declaration of war and the prospect of interruption to our foreign supplies, there was much activity in the trade, and factors held firmly for an advance of 6s per quarter on all English wheats. Transactions were concluded at this improvement, and a like rise was noted in the value of Baltic qualities, while as much as 8s per quarter more money was paid on American descriptions. At the same time the favourable harvest prospects have had the effect of limiting sales, and to-day the demand for all kinds of wheat ruled inactive. Prices accordingly showed a tendency to lower rates. The im-ports this week have been sufficiently liberal, and as harvest may be expected to be general in about a week-samples of new wheat are expected in Mark lane on Monday next—it is not surprising that millers should deal cautiously in the face of the heavy advance that has now taken place. An important feature in the market is the fact that French agents are buying large q uantities of feeding stuffs throughout the country, which has had a most important influence upon the value of spring corn. Oats have advanced 3s to 4+ on the week; while beans and peas are 2s to 3s per quarter dearer. Maize has commanded very full prices. Li eed has sold at an advance of 2s, and rapeseed has been held at extreme rates. Flour has been active in sympathy with wheat. Town marks have risen 7s per 280 lbs. Country and foreign sacks have sold at an improvement of 4s.

The wheat trade in the provinces has moved in sympathy with the London market, and the average rise in prices is from 6, to 8s per quarter on the week. At Liverpool much excitement has prevailed, but to-day prices had a downward tendency. At Wakefield, however, wheat was quoted at an advance of 7s per quarter on the week. All spring has ruled active, and barley, oats, and beans are 2s to 3s per quarter dearer on the average.

Mr George Dornbusch thus reports the state of the floating grain and seed trade :-During the last se'nnight 66 grain and seed laden vessels have been reported arrived at ports of call, viz., 15 wheat, 36 maize, 5 barley, 2 rye, 1 oats, 2 beans, 1 linseed, 2 Valonea, 1 oileake, I palm kernels. The floating grain trade has been greatly influenced by the war news, and prices of all articles have risen. Wheat, on the war, declaration of last Fr day, prices of arrived cargoes at once rose 5s to 7s, and a large business in arrived grain and for shipment has been done at the advance. Maize, good cargoes 2s to 3s higher. Barley, 1s to 2s more money has been asked. Rye, 1s to 2s dearer. Oats have been in active de-mand for exportation to France. The reported sales are as follows: Wheat—37 arrived cargoes: Berdianski, 47s to 54+; Marianopoli, 50s to 54s; Don Ghirka Taganrog, 44s; Ghirka Taganrog, 52s; winter Yeisk, 48s to 54s; Line winter, 51s 10¹/₂d; Ghirka Odessa, 48s to 55s 3d per 496 lbs; No. 1 Milwaukee, 53s; No. 2 ditto, 52s; No. 2 spring, New York, 50s; American spring, 46s 6d; No. 1 spring, 55s; amber winter, 51s per 480 lbs. Arrived in London, 3 cargoes: Red winter, 45s; No. 2 spring, 48s 3d to 52s. On passage, 19 cargoes: Chilian, 55s per 500 lbs; Saxonska, 50s 9d to 52s 6d per 496 lbs; Ghirka, 51s to 53s; No. 2 spring, 48s 6d; red winter, 55s to 57s 64; No. 2 spring, has bee a asked. Rye, 1s to 2s dearer. Oats have been in active de-No. 2 spring, 49s to 54s 9d per 452 lbs; Ghirkh, 51s to 555, No. 2 spring, 48s 6d; red winter, 55s to 57s 6d; No. 2 spring, 50s per 480 lbs. Shipped or to be shipped, about 23 cargoes: Marianopoli, 46s to 53s per 492 lbs; red winter, 52s 3d to 57s; Nc. 1 spring, 53s to 56; No. 2 Milwaukee, 51s; No. 2 spring,

47s to 55s; Saxonska, 52+ to 52s 6d per 496 lbs. Maine -19 47s to 55s; Saxonska, 524 to 52s 6d per 496 lbs. Maize-19 arrived cargoes: Galatz, 33s to 36s 10d per 492 lbs; Wallachian, 36s 3d to 36s 6d; Dasubian, 324 to 36s 4¹/₂d; Balgarian, 32s to 36s; Foxanian, 30s to 35s 3d; Moldavian, 29s 6d; Ibrail, 29s per 480 lbs. On passage, 17 cargoes: Odessa, 33s to 35s; Galatz, 33s to 34s per 492 lbs; Bosnian, 32s; Bulgarian, 33s; Walla-chian, 35s per 480 lbs; Danubian, 31s 6d to 35s 9d per 480 lbs. Shipped or to be shipped, 7 cargoes: Odessa, 33s to 35s 6d; Galatz, 34s; Danubian, 33s 6d per 480 lbs. Barley-arrived, 4 cargoes: Azow, 26s 6d to 28s; Danubian, 27s 9d per 400 lbs. On passage, 4 cargoes: Azow, 27s to 28s 6d per 400 lbs. On passage, 4 cargoes: Azow, 27s to 28s 6d per 400 lbs. S lipped, &c., 28s per 400 lbs. Oats-Russiau, 21s 3d to 25s; S lipped, &c., 283 per 400 lbs. Oats -Russiau, 21s 3d to 255; on passage, 26s 6d to 27s; shipped or to be shipped, 23s 4d to 28s per 304 lbs. Linseed, 6d to 1s dearer. Arrived 200 tons East India, at 63s 6d and 64s per 410 lbs. On passage, 4 car-goes Azow, at 61s 6d to 62s. Shipped or to be shipped, 1,300 tons East India, at 61s to 63s per 410 lbs; Azow, 2 cargoes, 61s 9d to 62s. Rapeseed quiet, and 1s to 2s cheaper. Arrived, 150 tons ordinary brown Calcutta, 64s 6d; on passage, 300 tons ditto, 61s; shipped or to be shipped, 62s 6d per 416 lbs, A.T. Cotton-seed-1,060 tons Alexandria, at 9l 5s to 9l 7s 6d per ton.

COLONIAL AND FOREIGN PRODUCE MARKETS. TRANSACTIONS OF THE WEEK.

FOR REPORT OF THIS DAT'S MARKETS SER " POST MINCING LANE, FRIDAY MORNING.

SUGAR.—The market is without improvement, and prices have occa-sionally ruled slightly in favour of the buyers during the week. At the Netherland Trading Company's sale, held yesterday, 52,500 baskets Java went 1 to 14 below valuations, and of the moderate quality brought forward part only sold. The impending war has not had much influence upon business. Of West India, 1,475 casks sold to yesterday. Barbadoes by another 25 to 200 cmains on the 216 fd. Lamaia, how and by auction 25s to 30s, grainy up to 21s 6d; Jamaica, brown and yellow, 24s to 27s 6d per cwt. Grainy sorts of Mauritius have gone at easier rates in some cases, low brown kinds, including Manila, remain quiet. Several floating cargoes of foreign are reported for the United Kingdom upon barely former terms. The landings at this port last week were 5,800 tons; the deliveries, 4,000 tons; leaving the stock 20,300 tons more than in 1869. Home clearances in London show a rease, but for other ports a material increase. de

decrease, but for other ports a material increase. Mauritius.—Business has been done by private contract, and a portion of 5,595 bags by auction found buyers, the current quotations being as follows :—Grainy yellow, 29s 6d to 34s 3d for soft to good; fine, 35s to 36s; and white, 37s 6d; soft brown, 22s to 24s 6d per cwt. Bengal. — 350 bags Gurpatta have been sold at 29s 6d for values

yellow. Penang.-A small parcel of low to middling yellow reported at 27s

to 28s 6d. Natal.-By auction, 100 bags Natal sold : low brown, 21s; dry rong grey, 28s.

Egyptian.-314 bags ary grainy white were taken in at 24s to 24s 6d or owt.

Foreign .--A limited business has been done in Porto Rico on former

Floating Cargos. — There have been five sold for the United Kingdom. One Porto Rico at 23s 6d, one yellow Pernambuco at 20s 6d, one brown Bahia at 18s 71d, one of low quality in bago at 15s er quay, and one of grainy Cuba at 25s.

Refined .- The market has not shown any alteration, and may be

quoted steady, at last week's prices. MoLASSES.—About 350 puncheons West India have changed hands, chiefly at 10s 6d for St Vincent.

Colleny at 10s 6d for St Vincent. RUM.—The market has been rather excited, with a speculative de-mand, and the latest sales show 2d to 3d per gallon advance upon com-mon kinds, including Demerara at 2s 2d to 2s 4d; Berbice, &c., 2s to 2s 2d; Cuba, 1s 10ā to 2s. 550 puncheons Mauritius at 1s 6d to 1s 7d. 150 puncheons Penang at 1s 7¹/₂d per proof gallon. The two latter sorts would now obtain more. Sales of Jamaica have been made, chiefly at 3s 9d to 4s per callon.

would now obtain more. Sales of Jamaica have been made, cherry at 38 9d to 4s per gallon. Cooka.—There is very little business passing, and the importers have not attempted any public sales. Prices remain nominally unaltered. Tra.—Business has been almost suspended. There is however still partial inquiry for the common grades of congou. A further dispute be-tween the trade and the importers with reference to an alteration in the conditions of sale, also tends to increase the existing depression in the market. There have not been any public sales. COFFEE.—Since the declaration of war the market has suffered a fur-ther heavy decline but the holders now see the impolicy of forcing

ther heavy decline, but the holders now see the impolicy of forcing sales in the present state of affairs, and have withdrawn supplies. Plantation Ceylon, by comparison with the prices current in July before the panic set in, show a fall of from 10s to 14s for the few parcels sold. the panic set is, show a fall of from 10s to 14s for the few parcels sold. Si casks 42 barrels and bags by auction this week, chieffy in small lets, sold at 62s to 67s for good middling to bold colory, and 50s to 56s for grey and pale. Native has not fallen in the same proportion, and the price is quite nominal. 917 cases 220 bags Naidoobatum by anction were withdrawn, and since sold at reduced rates which are not reported. Privately, the only business of importance has been 900 bags Manila at 48s 6d per cwt. Further arrivals have taken place, and the deliveries have not fallen off. This week, the clearances for export will be small, owing to the contraction of business. REE.—Some advance has been obtained for floating cargoes, and also

will be small, owing to the contraction of business. RICE.—Some advance has been obtained for floating cargoes, and also for Siam on the spot. Of the latter about 3,800 tons are reported sold. Field rice at 8s 1¹/₂d to 8s 4¹/₂d, and recently at 8s 7¹/₂d; and garden at 8s 7¹/₂d to 9s 3d. The other business on the spot has been chiefly restricted to 5,000 bags low white Bengal at 10s to 10s 3d. A floating cargo of Necrancie Arracan has sold at 10s ex ship, or 10s 6d landed; and one of Bessein at 10s 3d per ext londed one of Bassein at 10s 3d per cwt, landed.

NIMATE SODA is quiet.

DEVSALTERY GOODS.-Cutch remains quiet: fine quoted 21s 6d to 2s. There has been a large arrival. Gambier is steady at 16s per No sales reported in turmeric or safflower. ewt.

METALS .- There has been rather a heavy fall in the prices of some escriptions since it became known that war is inevitable. Foreign tin descriptions since it became known that war is inevitable. Foreign tin has fallen several pounds, and the value is still partly nominal: Banca, 120/ to 121/; Straits, the same; English, 130/ to 131/. Copper has also declined. Burra and Walaroo may be quoted 71/ to 72. Chili has sold at 65/ to 65/ 10s. English iron has at present not felt the effects of the panic, but it caused a fall in Scotch pig to 51s at one time. A slight recovery was since apparent, and this morning's price is 51s 3d cash. Lead has advanced 1/ 10s per ton: English, 19/ 10s to 20/ per ton. Foreign spelter is about 1/ dearer. HEMP.--Transactions in Manila have been small, including low quality at 51/; but the importers do not offer much, and the market may be quoted firm. Russian has further advanced. Clean Peters-burg, 34/ to 35/ per ton.

may be quoted firm. I burg, 34/ to 35/ per ton.

burg, 34/ to 35/ per ton.
JUTE.—The market has become quiet in the absence of speculation with a moderate business by private contract. At the public sales yesterday 9,549 bales partly met with buyers, at rather lower rates in some instances. Low to good, 16/ 15s to 23/ 10s; fine, 24/ to 24/ 15s.
The sales afloat include some of the new crop at 22/ 10s per ton.
LINSEED.—Higher rates have been paid. Calcutta, 63s 6d; afloat, 62s 6d to 63s; Petersburg for shipment next two months, 60s 6d; Black Sea to arrive 61s 9d to 6 s per constra

market remains very dull. Sperm quiet and nominal, at 90/ per tun. Common fish oils dull. Ceylon cocca-nut remains dull at 38/. Cochin nominal, at 44/ 10s for fine. Palm, 39/ to 40/, firm. Linseed oil has been steady, at 31/ 10s on the spot. Business has been done in English brown rape oil at 42/ 15s to 43/ on the spot, and 40/ to 40/ 10s for de-livery in the last four months. No change in the quotations of refined. Foreign, 46/ to 47/ per ton, according to quality. PETROLEUM.—American refined has declined to 1s 6¹/₂d to 1s 6¹/₂d, and was offered yesterday for delivery in the last four months at 1s 6d per cellon.

gall

gallon. TALLOW.—An advance of about 1s has been paid for Russian, but the operations chiefly for the last three months, in which position the price at one time reached 49s, subsequently ranged from 48s 3d to 48s 9d. On the spot, Petersburg sells at 46s per cwt. The supply of Australian continues liberal, and about 2,000 casks are declared for public sale today.

POSTSCRIPT.

FUSISCENTIAL SUGAR.—The market closes flatly. Sales of West India, 577 casks; for the week, 2,129 casks. A few lots of the Barbadoes by auction sold at about previous quotations. Grainy Demerara and Berbice, 328 6d to 36s. 20,000 bags unclayed Manita sold privately at 208 6d per cwt. COFFEE.—535 bags native Ceylon (in second hands) sold by auction at 41s 6d to 43s 6d per cwt for mixed to good ordinary quality. RICE.—The market is firm but quiet.

SALTPETRE is quiet.

TALLOW.—The sales went at full rates to 1s advance. 1,800 casks 34 tanks Australian by auction part sold at 43s 6d to 45s 6d. 384 casks East India were chiefly taken in. Town advanced to 45s 9d per cwt.

ADDITIONAL NOTICES.

REFINED SUGAR.—There is a moderate business doing at steady prices. Dutch crushed is neglected : small sales at 31s 6d f.o.b. Holland, prompt

ENGLISH WOOL. -Hardly any trade where sales are made fully one

ENGLISH WOOL—Hardly any trade where sales are made fully one halfpenny a pound lower. COLONIAL WOOL.—At the public sales the fall of from 5 to 10 per cent., which took place last week consequent upon the news of war, and the foreigners ceasing to operate, has this week caused a great many fresh home buyers to come up; the competition is more brisk, and prices for many kinds have recovered. The sales finish next Wednes-day.—50 000 bales will be held over day-50,000 bales will be held over.

Gay = 50,000 bates will be held over. FLAX. -- Market steady. HEMP. -- Market very firm, and a large business done to-day. SILK. -- No sales; prices all nominal; business entirely suspended; owners wishful to sell.

ToBacco.—There has been nothing doing during the past week in North American tobacco, sales being of a trilling character; prices con-tinue steady. In continental and other growths there has been more activity, and some large sales have been effected in anticipation of short

supplies during the present unsettled state of the continent. LEATHER AND HIDES.—There has been a considerably improved demand for most descriptions of leather during the past week. At Leadenhall on Tuesday there was only a short supply of fresh goods, but a fair average amount of business was transacted at fully late prices. There was more inquiry for heavy foreign butts; light dressing hid English bellies, prime calfskins, and English horse hides were also hides request.

METALS .- Business is quite disorganised by the war. Copper has METALS.—Business is quite disorganised by the war. Copper has not been saleable at anything near last week's quotations, and although lower rates would generally be entertained there has been but one transaction in Chilian (at 651) reported. Iron—Two failures in the Scotch pig trade—the speculative branch of the trade—have caused a heavy fall in that kind, but other iron is well maintained. Tin is about 5l a ton lower in price all round and no one buying. Lead is dearer by about 20s a ton. Spelter is also quoted higher, but it is not in demand. Tin plates keen steady Tin plates keep steady. Tallow.—Official market letter issued this evening :-

HOP MARKET.

HOP MARKET. BOROUGH, Friday, July 22.—In the hop market there has been an absence of any important feature. The business doing has been limited, and the tendency of prices has been in favour of buyers. From the plantations the accounts continue favourable. The quetations are :— Mid and East Kents, 7*l* to 12*l* 12s; Weald of Kents, 6*l* to 8*l*; Sussex, 5*l* 12s to 6*l* 12s; Bavarians, 6*l* 6s to 9*l*; French, 5*l* to 6*l* 10s; Americans, 4*l* 5s to 6*l*; and Yearlings, 1*l* 10s to 3*l* 10s per cwt.

POTATO MARKETS.

BOROUGH AND SPITALFIELDS, Friday, July 22.—The supplies of potatoes have been moderate. The trade has been quiet, at our quota-tions. English shaws, 7s to 7s 6d; Jersey Kidneys, 8s 6d to 10s; Rounds, 6s 6d to 7s; French, 5s to 6s per cwt.

LIVERPOOL MARKETS.

WOOL.

WOOL. (FROM OUR OWN CORRESPONDENT.) FRIDAY, July 22.—The declaration of war between France and Prussia has paralysed the demand in our market for the present, the sales of the week having been of very small extent, though in prices no material change has yet taken place. The East India sales to be held here from the 26th to the 28th inst. will comprise probably not more than 8,000 bales, as the expected fresh arrivals have not come in yet.

CORN.

(FROM OUR OWN CORRESPONDENT.) FRIDAY, July 22.—The market opened steady, but there was only a limited attendance, but later on miliers only made offers under Tues-day's rates, but there were few holders inclined to make concessions. Corn could be bought at a reduction of 1s. Beans 6d lower. Indian corn gave way 6d to 9d per qr. Other articles unchanged. WAREFIELD, Friday, July 22.—Wheat was quoted 7s per qr dearer than last Friday, but the tone of the trade was somewhat calmer than in the early part of the week. Large arrivals into Liverpool and brilliant weather make buyers cautious. Barley, oats, and beans 2s per qr dearer. (FROM OUR OWN CORRESPONDENT.)

dearer.

Obe Casette.

The Railway Monitor.

EPITOME OF BAILWAY NEWS.

TRAFFIC RECHIPTS.—The traffic receipts of railways in the United Kingdom for the week ending July 10 amounted, on 13,774 miles, to 865,1814, and for the corresponding week in 1869, on 13,598 miles, to 819,4694, showing an increase of 176 miles and of 45,7122. The gross receipts on 14 of the principal railways amounted, for the week, on 10,012 miles, to 715,8874, and for the corresponding week last year, on 9,873 miles, to 678,8704, showing an increase of 139 miles and of 37,0174. The total receipts for the week show an increase of 7,9324, as compared with those of the preceding week, ending the 3rd of July. 3rd of July.

of 7,932/, as compared with those of the preceding week, ending the Srd of July. A return has been published showing the amount of capital, in sharse and by loans respectively, proposed to be raised by the railway and other Bills brought before Parliament in the present Session, and the aggra-gate amount of such capital and loans, together with the gross aggregate returns for the five previous years. The amount of share capital is 14,202,2711; of loans, 9,474,2281; the total, 23,676,4991. This total is, however, nothing compared with that of 1866, when the appalling sum of 175,490,6461 was reached. The gross receipts of the railways in Scotland in the year ending the Sist of January, 1870, amounted to 4,612,7411; the working expenses were 2,215,9511; leaving a net revenue of 2,396,7901. The capital re-ceived consisted of 17,999,7341 ordinary stock, 23,438,8021 preference stock, and 15,890,0171 debenture loans and stock ; making a total of 57,328,5532. The net revenue of the year amounted, therefore, to 4:18 per cent on the capital. 1,168,7511 was absorbed by rents and interest on preference stocks, 766,8391 was applied in payment of interest on detenture loans and stocks, leaving 461,2001 for the holders of ordinary stock—equal to a dividend of only 2:56 per cent. on the whole of the ordinary stock. But several of the railways had no surplus of net revenue to pay any dividend at all upon the ordinary stock.

RAILWAY AND MINING SHARE MARKETS. LONDON.

MONDAY, July 18 .- In the share markets the alterations recorded in the official list were :- In colonial and foreign railways, a decline of a each in Bombay, Baroda, and Central India, Eastern Bengal, Grand Trunk of Canada (2nd preference bonds), Great Indian Peninsula, Scinde, Punjaub, and Delhi, Dunaburg and Witepsk, Eastern of France,

Trunk of Canada (2nd preference bonds), Great Indian Peninsula, Scinde, Punjaub, and Delhi, Dunaburg and Witepsk, Eastern of France, Lemberg-Czernowitz, Northern of France, Paris, Lyons, and Mediter-ranean, Paris and Orleans, Southern of France, Western and North-Western of France, West Flanders (54 per cent. preference), Illinois and St Louis Bridge; further 14 in East Indian, 4 in Madras (5 per cent.), 14 in Antwerp and Rotterdam, 13 in Great Luxembourg, 4 in Sambre and Meuse, 5 in Lombardo-Venetian, 2 each in Atlantic and Great Western (1st mortgage) and Pennsylvania (1st mortgage), 4 in Atlantic and Great Western (consolidated mortgage bonds), 1 in Dutch-Rheniah, 4 each in Bahia and San Francisco, Belgian Eastern Junction, and Northern Railway of Buenos Ayres (deferred). TUESDAT, July 19.—The alterations in the share markets recorded in the official list were :—In colonial and foreign railways, a further fail of 1 each in Bombay, Baroda, and Central India, Eastern Bengal, Madras, Scinde, Punjaub, and Delhi ; further 2 each in Carnatic (5 per cent.), Great Indian Peninsula (4 per cent. debenture stock), Great Western of Canada (6 per cent. bonds), ditto (54 per cent.), Madras (44 per cent.), Melbourne and Hobson's Bay United, Namur and Liege (guaranteed 6 per cent. preference), and Illinois Central (\$100 shares); j each in Great Western of Canada, Bahia and San Francisco, Eastern of France, Namur and Liege (guaranteed), Northern of France, and West Flanders ; 14 each in Grand Trunk of Canada (1st preference bonds), Dutch-Rhenish (new), and Atlantic and St Lawrence ; 4 each in Bombay, Baroda, and Central India (Extension, issued at 12s prem.), and Grand Trunk of Canada (4th preference stock), 4 in San Paulo, 4 further in Erie ; a recovery of 4 in Lombardo-Venetian. WEBNESDAY, July 20.—The alterations recorded in the official list were :—In colonial and foreign railwaya, a fall of 4 in Cape, 1 each in Madras, Dutch-Rheniah, Lemberg-Czernowitz, West Flanders, Atlantic and Great Western (consolidated mortga

were :--In colonial and foreign railways, a fail of 4 in Cape, I each in Madras, Dutch-Rhenish, Lemberg-Czernowitz, West Flanders, Atlantic and Great Western (consolidated mortgage bonds), and Panama (general mortgage), is each in Antwerp and Rotterdam, Dunaburg and Witspek, Ottoman (Smyrna to Aidin, and Sambre and Mense (5) per cent. preference), is further in Bahia and San Francisco, and Namur and Liege (guaranteed 6 per cent. preference), if further in Great Western of Canada, and 2 further in Illinois Central (§100 shares); a recovery of in Erie.

Canada, and 2½ further in linnois Central (§100 shares); a recovery of i n Erie. THURSDAY, July 21.—The changes recorded officially were :—In colonial and foreign railways, a fall of 2½ in Great Indian Peninsula (scrip), 1 each in Eastern Bengal, Eastern of France, Paris and Orleans, and Suthern of France, 1½ in Northern of France, Paris and Orleans, and Suthern of France, 1½ in Northern of France, 2 in Recife and San Francisco, ½ in San Paulo, and ½ in Lombardo-Venetian; a recovery of 1 in Atlantic and Great Western (Consolidated Mortgage Bonds.) In mines, a decline of ½ each in Assheton, Caegynon, Cape Copper, 1 in East Lovell, ½ each in Marke Valley and Australian United Gold; 1½ further in Providence "Uny Lelant," 2 in St John del Rey, ½ in Pacific. FRIDAY, July 22.—Railway shares were stronger. London and North-Western, 1¼; Midland, 14; Great Eastern, ½; Great Western, ½; Calo-donian, ½; South-Eastern, 1½. Foreign securities were freely purchased at an advance, and the business concluded is of a much better character. Italian 1 higher; Spanish of 1867, ½; Turkish of 1865, 1; Egyptian of 1868, 2. American securities were in a much healthier condition. United States Five-Twenty bonds of 1862, 1¼ higher; ditto of 1865 and 1867, 1½; Illinois, 1; Erie, 15¼ to 16½; Illinois, 98 to 100; United States Five-Twenties, 82 to 82½; ditto 1865, 82 to 82½; ditto 1887, 82 to 82½; ditto Ten-Forties, 78 to 79; Atlantic and Great Western Eight per Cents., 25 to 80; ditto Seven per Cents., 18 to 22.

OZOKERIT (PATENTED.)

HUBBUCK'S PATENT WHITE ZINC PAINT

Is the most durable and beautiful paint known, does not stain or discolour with the atmos-phere of large towns, and by their process, which is patented, is cheaper than White Lead. It is especially adapted for painting ircn, as, by virtue of a semi-galvanic action, it enters the pores and forms an amalgam of the two metals, which protects the Iron from decay or incrustation. It should be used instead of Red Lead, which is proved to be destructive to Iron exposed to Salt Water. ADULTERATIONS.—Some Paint Grinders have been selling Zine Paint adulterated with Salphate of Barytes, in proportions varying from ten to thirty per cent. No workman can produce good work with such material. Those who have obtained the Patent White Zinc Paint from Grinders who have not adulterated it, will never willingly use any other Paint for their best work. their best work.

their best work. Each Cask of Pure White Zinc is stamped— "HUBBUCK, LONDON, PATENT." THOMAS HUBBUCK and SON, WHITE LEAD, OIL, PAINT, and VARNISH WORKS, 24 LIME STREET. "For public schools, and all rooms occupied by children there will now be no excuse for using poisonous paints. Parents have remarked that their children on returning from the country to newly-painted houses have suffered in health. The reason is evident—the breath extracts the insidious poison from paint, and the lungs draw in the deadly vapour."—JOHN BULL, September 14, 1850.

HOLLOWAY'S PILLS.

HOLLOWAY'S PILLS.— Flatulency, nausea, indigestion, headache, and nervnas affections are removed by these pills with the greatest facility. They act so speedily, yet s. mildly, that the patient need not discontinue for a single day his ordinary pursuits, nor is there any occasion for him to trouble himself with a severe regimen. He need only take regular exercise, and be moderate doses, according to the printed instructions, which are affixed to mich box of them, he may make quite certain of a rapid and complete cure. These pills contain not a particle of any mercurial or mineral preparation. They are com-posed entirely of rare balaams, and are as safe as they are efficacious.

I N D I G E S T I O N. —"Berkeley, Soptember 3, 1869.—Gentlemen,—I feel it a duty I owe to you to express my gratitude for the great benefit I have derived from taking Norton's Canoomile Pills. For a length of time I suffered ex-tructaing pain from indigestion and wind in the totomach, having tried neary every remedy without deriving any benefit at all, but after taking two bottles of your valuable Pills I was quite restored to my usual state of health. Please give this publicity, for the benefit of those who may thus be afficied-1 am gentiemen, yours truly, Henry Allpass.—To the pro-prietors of NORTON'S CAMUNILE PILLS."

THE ECONOMIST.

SIXTEBNTH REPORT OF THE SIXTEENTH REPORT OF THE A L L I A N C E B A N K (Limited). Capital £4,000,000. Paid-up capital, £970,650. DIRECTORS. Matthew Hutton Chaytor, Esq., Chairman. Altred Castellian, Esq., Deputy-Chairman. Christopher Atkinson, Esq. Josenh Fildea, Esq. Henry Gruning, Esq. William Keates, Esq. Daniel Mackenzie, Esq. Mathew Hutton Chaytor, Esq., Chairman. Lames MoMaster, Esq., John Grant Merris, Esq., Kobert Rummey, Esq., Charles John Venables, Esq.

At a General Meeting of the Shareholders, held at the City Terminus Hotel, Canson street, in the City of London, on Thursday, July 21, 1870, the following report was presented :--The Directors have to report that the net profits of the Bank for the last half-year (after making the meensary deductions for interest on current and deposit accounts, current expenses, had debts, and rebate on bills not yet due) a nount to £20,819 55 1d, which, with £3,379 28 81 balance from the previous half-year, makes a total of £23,698 78 9d now to be disposed of. The Directors, therefore, recommend that a dividend

The Directors, therefore, recommend that a divided for the last aix months of 10s per share, being at it rate of £4 per cent per annum, free of income tax, now declared, which will absorb £19,413; and the £728 0s 2d be written off building and furniture a counts, leaving £3,557 7s 7d to be carried forward profit and leas new account.

With a view to concentrating the business of the Bank, the Directors have made arrangements for the Bank, the Directors have made arrangements for the Southwark Branch to the London Joint Stock Bar on the 18th inst.
 The Directors who retire by rotation, in accordant with the provisions of the Articles of Association, are John Elin, Esq., James McMaster, Esq., John Gra Morris, Esq., and Charles John Venables, Esq., all whom, being eligible, offer themselves for re-election The Anditors, Messre Quilter, Ball, and Co., and M. Banner, likewise retire at this meeting, and off themselves for re-election.—By order of the Board, W. H. RANSFORD, Secretary. Bartholomew lane, E.C., July 14, 1870.
 N.B.—It is proposed to forward the dividend warrant to the sharehol lers on the 30th instant.
