(6) Repairment condition of Enventoried Machines:

At present on 6th Jan. 1948, theqquantity of machines, suitable to work after the disassembling and cleaning and going to work after the repairment, are 1967.
Items are as follows.

Classification.	Quantity.
Machine Tool & Industrial Machine	1197 (including perfect 322 ones)
Motor	106 (including perfect 57 ones)

DECLASSIFIED E.O. 12065 SECTION 3-402/NNDG NO. 775013

Classification.	Quantity.	
Machines repaired by Hikari Branch, Hatahu Work-Shop, Hiroshima Div. Gov. R.W.	208	(including perfect 208 ones)
Machines repaired by Takeda Pharmaceutical Industries Co. Ltd.	58	(including perfect 58 Ones)
Machines repaired by Asahi Salt Manufacturing Co. Ltd.	34	(including perfect 34 Ones)
Crane	36	(including perfect 13 ones)
Transformer	87	(including perfect 19 ones)
Repaired by out-side shop and under working there.	241	(including perfect 241 ones)
Total	1967	(including perfect 952 ones)

1st and 2nd class of the Machine Tool have finished the disassembling and the repairment. Among them, 420 have to be so repaired as fitting up the newy small parts newly made, and now going on to repair expecting to finish at the end of Feb. 1948.

Motors and transformers have almost finished to investigate the insulation, and bad ones are being repaired successively.

Cranes are hasten to be repaired not to make worser than present condition as the long time and much expence are required to repair the electric bad parts.

Repairment of boilers are not in practice now, but it is expected to carry out immediately the simple repairing.

We think that surface-plates, coaches, etc. which listed on additionally by the instruction July 1947, are not haste to repair and didn't to do, but if the estimatted expence will be distributed, we expect to begin repair.

(7) Preparation of the technical date:

Owing to bombing on ex-arsenal, instructions, furdamental drawings assembling drawings, etc were burn out. We required the makers to collect them and we can get more or less, but some of the makers answered that they lost the date by the war disaster.

So we have a plan to draw for the operation and assemble, and to prepare to fill up the exsact measure in them. The operating and assembling drawings for 2,000 tons Forging Press, manufactured by Kobe Seiko-sho, and its motive engine have been prepared.

We keep one copy of blue print for Press, Pump, Accumurator, etc, by Komatsu Seisakusho as the company their negative drawings.

DECLASSIFIED E.O. 12065 SECTION 3-402/NNDG NO. 775013

(8) Main material

(a) Ex-gun shop (Preservating shop of the reparation machineries) was temporally repaired last summer, but it is needed to re-repa re-repair at present as the heavy leaking of rain.

On the same time, the east side of gun shop, not used now, must be greatly repaired for utilizing as the work shop of packing the reparation machineries

For the work as above, we find it difficult to get materials as follows.

Timber	1,000 koku
Iron-plate	7,000 sheet
glass-plate	35 box
nails	2,500 kg

(b) For the purpose of operating the repaired machines in custody at any time, 46,000 litres machine oil of good quality are required, or to preserve the machines that are repaired and in a state of operatable 4,600 litres are required.

We are now endevouring to get more or less the above oil to operate the repaired machines.

As the materials for custody, it is required the under mentioned one which are very difficult to get, but it is barely able to work at present.

Petroleum oil	300 litres
Grease	200 kg
Sand paper	3,000 sheet
Cotton cloth	1,000 kg

(c) The gasoline for transporting the reparation machineries are required 600 litres per month, but we could not get a drop of them during June, July, August last year.

(9) Guarding condition:

At 33 watch-box in the Arsenal 235 guards are directed by the Head of Hikari Police Station, and in the Reparation Machines Preserving Shop. (Before 15th March 1947 the Converted Factories, had taken charge of here) 40 guads belong to Financial Bureau are watchfull.

Both of them are, as 24 hours duty, watchfull and patrolling through day and night. Especially at the entrance of Arsenal, the most excellent guards are ceaselessly watching for. The number of police is 6 at present.

By the war disaster, fire extinguish equipment were almostly damaged but it is expected that they will be quikly completed, as the Converted Factories are gradually repairing them.
