

The Political Economist.

NOTICE.

The PARIS Agent for the Sale of the ECONOMIST is Mr Fotheringham, 8 Rue Neuve des Capucines, where copies of the Paper can always be obtained.

On June 29 was Published No. 6, Vol. VIII., New Series, Price 8d; by post, 9d.

THE INVESTOR'S MONTHLY MANUAL. The INVESTOR'S MONTHLY MANUAL for JUNE gives the Highest, Lowest, and Latest Prices of Stocks, Shares, and other Securities during the Month, the mode in which the Dividend in each case is payable, the last four Dividends, &c. It also contains

A FINANCIAL RECORD OF THE MONTH; New Capital Created and Called; Table of Railway Traffic Receipts; Notices and Reports of Stocks, Failures, Railway, Banking, Insurance, and Miscellaneous Companies. New Companies and New Capital. Prices made up to June 26. Advertisements for the next number, to be published on July 27, must be sent, to insure insertion, on or before July 25.

The December Number of the INVESTOR'S MONTHLY MANUAL gives, in addition to the usual information, the Highest and Lowest Prices of all Stocks and Shares for the last Three Years, the Latest Quotations for 1876 (so as to indicate the Exact Movement during the Twelve Months), a Complete Directory, the Names of the Markets where each Security is chiefly dealt in, a Financial History of the Year 1877, (in-cluding a Tabulated Chronicle of Events), besides Memo-randa relating to the Financial Position of Foreign and Colonial Governments, to Railwaws, &c., &c. In addition Colonial Governments, to Railways, &c., &c. In addition is furnished the Names of the Chairman and Secretaries, or Managers of the various Companies. A copious Index is added for purposes of reference. Price 1s 4d; by post, 1s 6d. OFFICE-340 Strand.

LORD BEACONSFIELD has disposed of the charge of not having a policy which has so often been brought against the English Cabinet. The Convention concluded between

the most startling which any English Minister has ever announced to the country, but one which more than any other, perhaps, is big with future consequences of the

with the fringe of it, and before we say anything about the Convention itself something may be said about the manner in which it has been concluded. It is objected that the Government have dealt unfairly by the country in committing it to such serious responsibilities without the consent of Parliament. It is not denied that Ministers have acted within their Constitutional rights, but it is said that they have strained these rights to the very utmost. There are two points which a Cabinet ought to consider before they do anything without con-sulting Parliament. Confidence of the most ample kind should in all cases be the rule, and in order to justify an exception the Cabinet must have, first, good reason to believe that the publication of a policy which is necessarily involved in its preliminary submission to Parliament would imperil its success; and secondly, good reason to believe that Parliament would accept the policy if it were submitted to it. If a Cabinet has an honest conviction that, given the thing is to be done at all, it must be done secretly, and that it is a thing which Parliament will approve when done, they are right in not communicating it to Parliament beforehand. Now it is plain that if a proposal to sign a convention of defensive alliance with Turkey had been laid before Parliament in May it would have been in great danger of coming to nothing. The House of Commons would rightly have insisted on time being given for a full discussion of its terms. In the course of that discussion the Government would have been rightly challenged to state their opinion upon all the contingencies wrapped up in the Convention ; they would have had to set out in detail their reasons for concluding it, and to describe to some extent the action they contemplated taking under a variety of hypothetical conditions. What kind of influence would a debate of this kind, extending probably over a fortnight, and diversified by every kind of oratorical imprudence on both sides, have exerted on the fortunes of the Convention abroad? No Government now-a-days is exempt from the action of public opinion, and public opinion is much more excited when it is a question of preventing a thing being done, than when it is only a question of approving or disapproving it after it has been done. In France and Italy, the dissatisfaction which is evidently felt would have been expressed with far greater vehemence. In Russia, it is quite possible that the Government would have been forced to make impracticable demands in Europe as a make weight to the limitations imposed upon its ambition m Asia. At Constantinople, the fanatical Turks might have taken offence at the notion of an English protecto-rate, and a virtual cession of territory, and a palace revolution might have delayed the signature of the Con-

THE ECONOMIST.

vention until opposition in other quarters had compelled its abandonment. A public notification of the intentions of the English Government would probably have necessitated the submission of the Convention to Congress; and, with the scope of the discussions at Berlin thus enlarged, the chance of a unanimous conclusion would have been immensely lessened. The necessity of secrecy being thus apparent, the Cabinet had next to consider whether Parliament would be likely to give its consent if asked. The attitude of the House of Commons and of the country for some months past left little doubt, we think, that both were prepared to support the Government in any measures which they thought necessary, with the reservation on the part of an important section of the country that these measures did not pledge us to support Turkish misgovernment. Ministers might fairly think that the terms of the Convention satisfy this reservation, and consequently that no serious opposition would be offered to the project if it were known. The charge of stealing a march upon Parliament cannot, therefore, be sustained. If Sir Stafford Northcote had said in his place in the House of Commons, There is a step which we think it incumbent on us to take in order to secure our interests in the East; if we tell you what it is it will probably be impossible to take it; will you allow us to take it without telling you ?- there is no question that the House would have said "Yes" by a very large majority.

Next comes the question whether the Convention was improperly concealed from foreign Powers. There seems no doubt that it was communicated to Russia, Austria, and Germany; indeed, that as regards the two former it was merely the consideration paid to England for her consent to what was to be done in Congress. As regards France, however, there is some uncertainty, and if it should prove that any part of the Convention has been kept back from the French Government a great and needless blunder will have been committed. It is of very great moment to this country to be on friendly terms with France. She is our natural ally in presence of the great military Monarchies, and any misunderstanding with her would be a serious drawback to any arrangement, even the most advantageous, made with any other Power. The Convention with Turkey, whatever may be its merits as regards ourselves, admits, at all events, of being presented to the French Government in a light with which they can find no serious fault. It has for them the merit of giving us an alternative route to India. So long as the Euphrates Valley remained under a Govern-ment whose relations with England were those of one independent Power to another, it was impossible to make any use of this route. Now that it is under an English protectorate, it may easily be made available for the transport of troops, and as soon as this is done, Egypt becomes only a second string to our bow, and the necessity of taking possession of it is averted. Without the Euphrates Valley, it would always have been on the cards that we might be forced to seize Egypt, and in being delivered from this contingent necessity we are delivered from the danger of being forced to offend France. Thus the only Great Power which is suspected of raising any objection to what the English Goverment have done is really a gainer by it. The Convention with Turkey incidentally removes the one possible obstacle to a firm alliance between England and France. With so good a case in our hands, we find it difficult to believe that the whole matter was not talked over with the French Government before the documents were made public.

Assuming, then, that no objection attaches to the manner in which the Convention has been concluded, what is to be said about the Convention itself? There is a disposition on the part of some of those who defend it to represent it as really committing us to very little; in fact, as committing us to nothing at all, except in the event the improbable event, it may be hoped—of Russia proposing further annexation in Asia. This is not a view which is in the least borne out by the text of the Convention, or by the despatch in which Lord Salisbury instructs Sir Austen Layard to conclude it. Nothing can be more injurious to the ultimate success of the new policy than to represent the Convention as a mere bagatelle. Whatever it is, it is not that. It is an undertaking by which we deliberately saddle ourselves with vast responsi-

bilities—responsibilities which can only be adequately and usefully discharged by looking them fully in the face from the very first.

1. We have by a stroke of the pen given billiselves that which England has not had since the loss of her French possessions, that which has commonly been regarded as the chief danger involved in the annexations of Russia in Central Asia—a land frontier conterminous with the frontier of a great military power. From a military point of view this is a very great change in our position; a position which will bring with it military necessities the nature and extent of which cannot yet be clearly foreseen.

2. The charge of this frontier will, so far as appears from the Convention, rest primarily with Turkey, so that we may conceivably find ourselves involved in a war with Russia by reason of provocation given to her by the Turkish Government or by its subordinates in the frontier provinces.

3. The inconvenience of this contingency will be so intolerable that we may regard it as certain that adequate precautions will be taken to prevent such provocation being given. England, having engaged in a certain event to join the Sultan in defending his territories in Asia by force of arms, will have to ensure herself against that event being precipitated by the Porte. In other words, we shall be forced, whether we like it or not, to assume the supreme direction of Turkish foreign affairs. The issue between peace and war in Asia must in future be determined in London, not in Constantinople.

4. It is a condition of the Convention that the Sultan shall "introduce necessary reforms, to be agreed upon ' later between the two Powers, into the Government and " for the protection, of the Christian and other subjects of " the Porte in these territories." The reason assigned for making this condition is that the English Government are "not prepared to sanction misgovernment or "oppression." Now in Turkey misgovernment is constant, and oppression frequent; consequently, before England can make any agreement to defend the Asiatic territories of the Sultan, she had to be given "a right to insist on satis-"factory arrangements" for the prevention of misgovern-ment and oppression. It is impossible, after reading these words, to suppose that the English Government will be content with a mere presentation of Consular reports, or with remonstrances addressed to the Porte through an Ambassador. The "satisfactory arrangements" which the Convention gives England "a right to insist on" will be something much more thorough than this. Even if we suppose, which there is not the least reason to do, that the Government will wish to minimise the obligations they have thus assumed, it will not be in their power to minimise them. Public feeling at home will not permit it. Too much has been heard and said about Turkey during the last two years to allow of the subject dying down and being forgotten. There will always be a section of politicians determined to keep the Government up to their work, and they will be constantly supplied with data by newspaper correspondents and travelling statesmen. Asiatic Turkey will become a political Switzerland, to which every rising member of Parliament will go for his autumn holiday. Whatever proves to be necessary to provide a decent administration for the territories we undertake to defend will undoubtedly have to be done.

5. Before even the minimum of those satisfactory arrangements which we claim the right to insist on has been secured, we shall probably find that the Government of Asiatic Turkey is virtually in our hands. As soon as it is perceived that every grievance has to be referred to England, there will be a steady tendency, on the part of the officials and the populations they rule, to look to England for authority and for redress. Throughout these territories England will be the rising sun, the ultimate source of honour and prosperity, and Orientals are never slow to discover where the true centre of power lies. The Sultan will remain a great potentate, invested with all the titular honours to which he has been accustomed, but he will have a mayor of the palace in the English Resident, and the Government which that mayor of the palace represents will be the real ruler of Asiatic Turkey.

6. It will be impossible for us to go back from this treaty, supposing that the Porte does not carry out its

THE ECONOMIST.

part in the undertaking. We shall not be able to say to the Sultan—If you do not do this or that we shall put an end to the alliance. The Convention has been entered into for our own benefit, not for the benefit of Turkey; consequently, if Turkey continues to govern her Asiatic territories ill, she will have to be made to govern them better. Similarly, if the Sultan should hereafter think that the protection he gains is not worth the liberty he surrenders, he will not be allowed to give effect to his change of feeling. England has taken the Asiatic provinces of the Ottoman Empire under her care, because, in the words of Lord Salisbury, her interests " are closely " affected by the condition of those provinces." In that single fact there lies a guarantee that we shall not divest ourselves of the charge, and, therefore, among the responsibilities we have assumed, must be included the possible coercion of Turkey in the future.

These are only some of the consequences of the Convention, but even these should be enough to sober any one who is tempted to make little of them. We do not say that the Government have been wrong in accepting these consequences; on the contrary, we are on the whole of opinion that, under the circumstances, no other course was open to them which would not have been attended by identical or equal risks. But there should be no blinking of those consequences. They make the Convention perhaps the most formidable engagement ever entered into by an English statesman; and to welcome it with a light heart would imply an entire misapprehension of the value of our acts and the meaning of our pledges.

A NEW DRIFT IN FRENCH POLITICS.

THE result of the French elections of Sunday last is of great importance, and at a time when the public mind was less preoccupied would have been the occasion of considerable discussion. No less than twenty seats were vacant, most of them supposed to be safely held by Monarchists, and of them all the Monarchists saved only four, while the Republicans won fourteen, the remaining two awaiting the decision of the second ballot. If the Republicans carry only one of these, they will number 381 in a Chamber of 532 members-that is, they will have a majority of more than two-thirds. It is calculated, moreover, that some other seats still to be vacated will fall to them, and if this proves correct they will probably have the 400 seats which M. Gambetta said would, if the elections were free, belong to them, and will be masters of nearly four-fifths of the representation. This would be an immense majority even if it were not morally certain that it would be increased by every vacancy caused by death or resignation, and its influence will greatly, perhaps decisively, affect the elections to the Senate in November. In France, of all countries, the successful succeed, and it is more than probable that by the end of the year the Republicans will be securely masters in both Chambers, and in possession of all the springs of power. They will be able to distribute all patronage, except the small amount which the Marshal President can retain; they will possess the initiative in all legislation, as well as the veto on all laws; and they will, we may be certain, gradually infuse not only their spirit, but their men into the different Ministries. The Republic but their men into the different Ministries. The Republic will be in fact firmly established beyond the reach of attack from other parties, and be as little liable to be overset as it is in America, or as the mixed Constitution is in the United Kingdom.

Under these circumstances we take it to be certain that the French Republicans, ceasing to be threatened from the outside, being relieved from the dread of a coup d'état, and becoming the national party, instead of a party within the nation, will divide into two camps, representing as usual the men who are content, and the men who are not quite satisfied ; and it is an object of much interest to discern the line of separation, the angle of cleavage, as mineralogists say, in the new formation. This angle may turn out to be an unexpected one, a personal question, for instance, such as M. Gambetta's claim to guide the Ministry, but it is more probable that it will be regular, that the fissure will become visible on some one of the three points on which Republicans differ from one another. The first of these is social legislation, and on this we think a compromise will be effected. There can be no doubt, we imagine, that Republicans in France

comprise, like Liberals in England, both Whigs and Radicals, or that the ultimate dividing line between them is willingness to do certain things in reference to property which the proletariat would approve, and the bourgeoisie would dislike. Speaking broadly, and using a terminology understood in England, the Republicans differ so widely from each other upon the Poor Law question-the legislation to be attempted for the amelioration of distress—that this may furnish a speedy line of separation. Just at present, however, the Radical Republicans are so fearful of frightening the peasantry, so weighted by the recollections of the Commune, and so uncertain as to the dispositions of the Army, that they will, if possible, postpone the struggle, which will be the more easy because both parties are disposed to facilitate all those undertakings, such as the completion of the railway network, and the commencement of large municipal works, which serve for a time as substitutes for any general Poor Law, or measure of social relief. Nothing but sharp and widespread distress would force such a question to the front, and of all countries, France is the most exempt from these visitations. In the second place, there can be no doubt that a line of separation exists in the party on the subject of "religion"—that is, of the relation of the Roman Catholic Church to the State. All Republicans in France may be accepted as hostile, on the whole, to the visible and predominant influence of the priesthood in political affairs. All Republicans may also be accepted as willing at some period, more or less remote, and with some feeling more or less pleasurable, to witness a final separation in all departments of life between Church and State. But the difference between the two sections of the party, notwithstanding this agreement, is very deep. The Radical Republicans hate the Church, while the Liberal Republicans are at the outside indifferent to its fate. The Radical Republicans desire at once to abolish the Church as an institution, to prohibit some of its ceremonials, to cease to pay its clergy, to deprive it of all social position, and so far as possible, to eradi-cate all deference to it by private individuals in the great affairs and events of life—as in marriage, burial, and the education of the young. The Liberal Republicans on the other hand would heap up the Republicans, on the other hand, would keep up the Church as a useful institution; would leave it liberty to teach, though not the control of all selfools; would pay its ministers as a means of retaining power; and would grant a State acknowledgment that its doctrines, though matters of private concern, were on the whole acceptable to those who rule the State. So bitter is religious and anti-religious feeling in France that this might be the line of separation, but that the Radicals dread what the Italians call its "regional," and Americans its "sec-"tional" effect. The Radicals in France, though they will not always acknowledge it, are, partly from tradition, and partly from Parisian modes of thought, Centralists, and are unwilling to begin a quarrel in which Northern France, Southern France, the great cities, and and the great separate provinces, such as Brittany, and in a less decree. Provence, might take opposite sides. They will try, degree, Provence, might take opposite sides. probably, as M. Gambetta advises, to keep peace with the Church while it is possible, and wait for success until the Church is further sapped by free discussion,-a pause which may not have precisely the results they anticipate. At all events they will not be disposed to provoke a struggle so fierce and widespread as this would be, just now, and will perhaps be content to keep up a decent show of activity, and allow the Senate to stifle or moderate any legislation forced on them by the indiscreet.

823

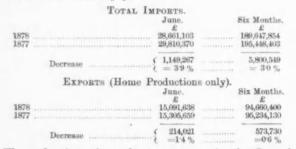

There remains foreign policy, and it is on this we anticipate the angle of cleavage will first of all appear. All Republicans in France are probably more or less desirous that France should reassume her position in the world, but they do not all agree either as to the means or the time. The Moderates, excellently represented by M. Waddington, are in favour of waiting, of maintaining the English alliance, and of deferring, in form at least, to Germany; while the more Radical section are in favour of resuming a separate and a vigorous policy, which would be to a considerable extent in favour of nationalities. It is difficult to read M. Gambetta's journal, for instance, without perceiving that he has many of the Napoleonic ideas, that he chafes under the reserved attitude of France, and that

THE ECONOMIST.

[July 13, 1878.

he would have intervened vigorously in the Eastern Question, and intervened so as to make France appear the protector either of Turkey, as he at first was inclined to do, or of Greece, as he is now inclined to do. M. Gambetta is not ready to act yet, but the irritation of his tone about the Anglo-Turkish Treaty, and the criticism of the Congress in which he indulges, plainly display the bent of his mind, which is certain to be more or less that of his Though there may not be much in the reports of party. his readiness to take up the cause of Greece, it is almost certain that he would favour a more active foreign policy, calculated to re-establish French prestige, and that this view will find a great number of adherents. The character of a nation is seldom permanently altered even by severe misfortunes, and the desire of France for a great position in the world has been displayed throughout her history. The self-effacement of the country, if it lasts too long, as it did under Louis Philippe, always alienates the people, and advanced Republicans are very anxious to show conclusively that their form of government is not incompatible with military strength. We look, therefore, to see France take very speedily a more prominent position in European politics.

THE BOARD OF TRADE RETURNS FOR JUNE. JUNE is generally, so far as the import trade of the country is concerned, a slack month, owing mainly to the fact that at this period of the year there is a decided falling off in the receipts of raw cotton and wool, for which no corresponding set off is obtained from the other items. The following figures show that the aggregate imports for June, both in 1877 and 1878, were, roughly speaking, 10 per cent. below the monthly average for the half-year. The export trade, however, is better sustained, probably for the reason that the seasons make comparatively little difference in the manufacturing capacity of the country. Contrasting the figures now presented, we find that, both for the month and for the half-year, there is a considerable falling off in the imports and a little more than nominal diminution in the exports. We are here, of course, merely dealing with values; but were we able to measure the volume of the quantities moved according to the method now adopted by Italy, it is probable that a considerable increase in the amounts of home manufactures shipped for foreign ports would be shown as the result. So that we are really doing more work for the foreigner, even if we receive a little less pay for it.

The reduction of nearly 4 per cent. in the June imports, when contrasted with those of June, 1877, cannot, however, be attributed to raw materials imported for manufacture. Although the receipts of raw cotton were considerably below the monthly average for the halfyear, they were greatly in excess of what they were in the corresponding month, for the reason that the United States in June, 1877, sent us only 253,032 cwts, against 497,323 cwts in 1878; and the speculative inquiry for this staple, which preceded the termination of the Lancashire strike, doubtless contributed to the increase, as it helped to raise the price of cotton to a decidedly higher level than was maintained at this time last year. Consequently, we find that the expansion in the value has in this instance been larger than in the quantity. On the other hand, in flax, hemp, silk, and wool, there are decreases, which are more important in values than In jute the month's imports have been pracquantities. The large expansion in the entries of tically doubled. wood cargoes is also an important item, which is entirely due to the great increase in sawn and dressed timber received from Sweden and Norway and Russia. This, it

would seem, has produced something like a panic in the wood trade, as it has been found impossible to keep the consumption upon a level with the supply. Altogether, these items exhibit an aggregate increase of about 450,000l, or $7\frac{1}{2}$ per cent.

Under the head of food products, however, a diminished import has to be reported, the most striking reductions being exhibited in wheat and flour and in sugar. The rapid fall in the price of wheat during the past month or two—a fall which averaged 4s 3d per quarter in June—has not so much checked imports, as it has reduced the value; while, at this time last year the war panic had greatly raised the price per quarter imported. According to present appearances, this will be a cheap year for foreign wheat, altogether apart fro; our home harvest. Sugar is also much cheaper this year, and the decrease in the quantities received is triffing compared with that in the value. All importations for drinking purposes continue to show a falling off in values; while the entries of living animals, butter, Indian corn, and rice are decidedly larger. The following table indicates a net decrease of 560,0001; and it may also be mentioned that there is a decrease of a quarter of a million "unenumerated articles:"—

II.-IMPORTS of ARTICLES of FOOD into the UNITED KINGDOM during June, 1878, compared with June, 1877.

Net decrease

§ 563,000

If the exports have remained stationary in their aggregate value, there are yet some features connected with the different items composing the total which call for particular comment. Once more the leading increases are shown in cotton and woollen yarns, the further manufacture of which has to be conducted abroad. The value of worsted goods exported has likewise increased to a moderate extent, owing to the shipment of an additional 1,396,000 yards of material. But $7\frac{3}{4}$ per cent. less of cotton piece goods have been taken, involving a diminution of above 9 per cent. in values. The export linen trade has been stagnant during the current year, and in June there has been a rather decided reduction in the clearances of these goods. There is an expansion in made-up materials classed as apparel and haberdashery; and the silk manufacturing industries of the country are shown to be steadily growing, as indeed has been the case for a considerable time past. Machinery is again exported in increasing quantities, so that more employment is found from abroad for our engineering It may be remarked that Germany is this year trades. a considerably larger customer of ours in this respect. There is also a small increase apparent in hardware. principal coal and iron trades have not, however, fared so well, and although coals are apparently about 7 per cent. cheaper than in June, 1877, the quantity taken for foreign ports shows a reduction of about $7\frac{1}{4}$ per cent., so that the value is upwards of 14 per cent. less. In iron and steel combined $5\frac{1}{2}$ per cent. less metal has been shipped, and

THE ECONOMIST.

825

the reduction in value is $7\frac{3}{4}$ per cent., and if we allow for the increase in steel manufactures the falling off in the foreign consumption of British iron will be found to have been much more significant. In June, 1878, only 10,934 tons of iron rails were exported from this country, against 22,081 tons in June, 1877, while the quantity of steel rails exported reached 34,674 tons, against 34,264 in June, 1877. Taking the figures for the first six months, the iron rails exported were 111,411 tons in 1876, 89,297 tons in 1877, and 76,956 tons in 1878; while the steel rails were 47,636 tons in 1876, 106,253 tons in 1877, and 126,457 tons in 1878. In the first half of 1877, the combined shipments of steel and iron rails were 195,550 tons, valued at 1,461,5987, so that in the 1878 half-year an additional 7,900 tons were sent abroad for 37,0007 less money, notwithstanding the greater proportion of steel supplied. The tables below show the quantities and values in the principal departments of our export trade :—

JOINT STOCK BANKS IN LONDON-GROUP (B)-METROPOLITAN AND ALSO PROVINCIAL. Y E A R 1877.

REPORTS FOR YEAR AND HALF-YEAR ENDED 31 DEC., 1877, COMPARED WITH REPORTS FOR PRECEDING PERIODS 1875-7.

WE present below, in the usual form, an analysis of the reports for the year 1877, of those joint stock banks in London which for some years past we have distinguished into Group B, as being not only metropolitan, but also provincial in their character and business.

(A) JOINT STOCK BANKS IN LONDON—Group B—Banks Metropolitan and also Provincial—Constitution, May, 1878.

NOTE.—The National Provincial Bank have a second class of shares (20l nominal), with 12l paid up. The National Bank was originally, and for many years, the National Bank of Ireland. Its 105 branches, as above, are all in Ireland.

The paid up capital of the National Provincial Bank has been increased during 1877 by 120,000*l*, that of the London and Provincial by 30,000*l*, that of the London and Yorkshire by 40,000*l*.

The total number of head offices and branches has risen from 498 to 527.

(B) JOINT STOCK BANKS IN LONDON—1877-6—Group B — Banks Metropolitan and also Provincial—Deposits and Dividends. (0,000's omitted; thus, 23,27 = 23,270,000/.)

THE ECONOMIST.

[July 13, 1878.

The cash deposits of the London and County, on 31 Dec., (I 1877, were a million more than at end of 1876; those of the National Provincial, 400,000*l* more; those of the National, 350,000*l* less; those of the London and Provincial, 200,000*l* more.

The dividends remained as in 1876, with the exception of the London and County, which paid 17 per cent. per annum instead of 16. Thus:—

	Pe	r Cent	. P	er Cen	t. P	er Cent.
Banks.						1875.
London and County		17		16	******	161
National Provincial	******	21	*****	21		21
National	******	-		12		111

The chairman of the National Bank (Mr Massey, M.P.) explained as follows, at the annual meeting, the causes which have led to the decline in the deposits. He said :

From the limited nature of our London business, we have not materially suffered from the continued commercial depression, but there are peculiar causes affecting our business in Ireland which have to some extent diminished our profits of the half-year. Ireland has suffered from a succession of two bad harvests. The tillage farmers have suffered considerably, and the graziers during the past two years have not made the same profits as formerly. Under these circumstances, it is not surprising that there has been some falling off in the deposits—about 350,0000. The farmers, instead of adding to their deposits have, unfortunately, in many cases, been compelled to draw upon them to cover the losses in their business.

The National Provincial again complain in their report of the general stagnation of trade, and point out that the dulness of trade, and the less profitable returns from agricultural pursuits, have led to the increase in the deposits being less than has been usual of late years.

The National Provincial took over in 1877 the business of the Bank of Leeds (Limited), and have thus obtained an entrance into the large banking field of the West Riding of York shire.

(C) JOINT STOCK BANKS IN LONDON, 1877-6 - Group B - Banks Metropolitan and also Provincial - Cash and Government Securities

			91 616		1 950		3 763				

The acceptances of the London and County on 31 Dec., 1877, were 700,000*l* less than at the end of 1876. The acceptances of the National Provincial were only 660,000*l*. The acceptances of the London and Yorkshire Bank were 268,000*l*, or more than two-thirds of the amount of their cash deposits of 383,000*l*.

The next table (D) collects into systematic form the profit and loss results of each of the six banks for the six half-years, 1875-77, so far as the published accounts will permit. The notes at the foot of the table explain the method of construction.

NOTE TO TABLE D.-1. The National Provincial do not give the Expenses, and hence the figures shown in col. 5, represent the Profits, after deducting Interest allowed to customers, Rebate on bills at end of year, and Expenses. The National Provincial publish their accounts only at 31 Dec. of each year. 2. This table (D) is constructed on simple and obvious principles :-

2. This table (D) is constructed on simple and obvious principles:-The profits of Banking are derived from two sources: first, from the income obtained by the investment of the Paid-up Capital and the Reserves of undivided profits; secondly, from the profits arising from the employment of funds belonging to customers - that is to say, deposits and balances of current accounts-supplemented by commissions for agency business transacted for Country and Foreign Banks, and for Acceptances given on behalf of customers and correspondents against securities of various kinds lodged by the parties as collateral guarantee. The first may be called Investment, and the second Business, profits. It is reasonable to suppose that the Banks realise quite 4 per cent. per annum on the investment of their paid-up Capital aud reserves, and if the amount representing this interest be deducted from the total sum which remains at credit of Profit and Loss after providing for bad debts, for interest allowed on deposits and credit balances, for deprecia-

THE ECONOMIST.

1 Car R

£ 1,0 1,0 1,0 1.2 1,3 1,5

tion and repair of premises and property, for rebate on current bills held under discount, the figures which remain will of necessity repre-sent the amount of profits yielded by the Business apart from the In-vestment of Capital and Reserves; and the most satisfactory mode of vestment of Capital and Reserves; and the most satisfactory mode of exhibiting the ultimate result will be by calculating the percentage of the Business Prefits on the amount of the Cash Deposits. It is clear, for example, that a Bank employing its deposits chiefly in the dis-count of Bills of the highest class, and in the purchase of securities of the most solid and most marketable character, and deriving but little profit for commissions on acceptances and credits, will exhibit a smaller per-centage of profit on deposits than Banks managed on principles le s rigid. The expenses of management in like manner are best shown when reduced to a percentage on the deposits.

3. It must be remembered that in the case of the National Bank there is, as part of its Irish business, a note circulation (at 31 Dec., 1877) of 1,400,000/, and that the National is the only Bank in the list having a circulation of notes of any kind. At 2 per cent. per annum only, the profit on the National Bank circulation would be, say, 28,900/. 4. The National Provincial had a note circulation in England and Tales of over 400,000/, but this had to be relinquished under the Wales of

clauses of the Act of 1844, when the Bank entered upon London busi-

In the next table (E) we analyse more in detail than on former occasions the profits and expenses.

(E) JOINT STOCK BANKS IN LONDON—Group B—Banks Metro-politan and also Provincial—PROFITS (Gross and Net) and EXPENSES, 1875-77, stated as Percentages on Cash Deposits.

The details of this table should be carefully considered. The figures are very suggestive of at least three things: first, the exceedingly different character, as regards gross profits on deposits, of the business carried on by the several banks, and the part of the country where it is carried onfor example, the National doing business chiefly in Ireland made, in 1877, a gross profit of 71s, and a net profit of 36s 3d on deposits, while the London and County, confining itself to London and English branches, made only 40s 2d and 16s 7d; second, the effect on the gross profits and expenses of the magnitude of the deposits and the number of branches; and third, the difficulty, on the part of the younger banks, in these days of intense competition, of raising themselves to a position in which the expenses do not absorb the whole or most of the gross profits. The figures also are instructive as showing that while, in some of the cases, 1877 was much less profitable than 1875, in other cases the facts are quite the other way.

In the next table (G) we carry this process of investiga-

tion a step further by placing in classes, as regards 1877, certain banks in London and in Scotland, as well as the six banks included in table E.

(F) JOINT STOCK BANKS—London and also Provincial—1875-77— Comparison of Yearly PROFITS and EXPENSES as measured by Percentages on Cash Deposits.

NOTE.--Col. 6, "Gross Profi s," is the figure after deducting interest rebate, and 4 per cent. per annum on capital and reserve.

The London and County Bank have increased their branches and sub-branches, between 1870 and 1877, from 145 to 155—the latter number being composed of 28 Metropolitan, and 127 Country. The National Provincial have increased their branches, between 1870 and 1877, from 132 to 143-the latter number being composed of 5 Metropolitan, and 138 Country.

This is a remarkable table, as indicating continuous and large progress in these two typical institutions; and as there is no room to suppose that the increase of business in these two cases has been obtained to any considerable extent by the transfer of customers from other banks, we are bound to read in these figures strong evidence of the growing appreciation of the ractice of keeping either current or deposit accounts with banks in almost all parts of the country. In both banks

the paid up capital has been increased by one-half or more since 1870, while the reserves have also risen in the same or a larger proportion. In the case of the London and County the expenses have increased by, say, 30 per cent., or from 211,000l to 273,000l, and the net profits by, say, 70 per cent., or from 111,000l to 187,000l. In the case of the National Provincial the increase of net profits is, say, 32 per cent., or from 186,000l to 245,000l.

It must be remembered that the London and County derive large profits from their Acceptances, of, say, three millions; while the National Provincial almost wholly forego that manner of employing their credit.

BUSINESS NOTES.

THE EAST LONDON RAILWAY .- In June, 1865, Messrs Chadwick, Adamson, M'Kenna, and Co., issued the prospectus of the East London Railway Company, with a share capital of 1,400,0001; and the cost of construction was "fixed beyond doubt by arrangements concluded with "Messrs Brassey, Lucas, and Wythes for a contract, at "prices which will make the total cost of the works con-" prices which will make the total cost of the works con-"siderably less than the amount allowed in the Parliament-"ary estimate." The revenue was to be "estimated with "equal certainty;" and the prospectus proceeded to calculate it at 330,880*l* gross and 195,220*l* net, or at "about "14 per cent. on the cost of the line." Hence, the share-holders were led to suppose that the entire cost was to be limited to the 1,400,000l share capital. It appears that Messrs Chadwick's commission at the time reached 27,8001 -say, 2 per cent. The prospectus further stated-" the " line will certainly be yielding revenue in an unusually "short space of time;" yet the first section, of about two miles, from New Cross to the Thames tunnel, was not opened until December, 1869; when it was officially notified that this section would cost 1,076,0007, that 382,000l had already been expended north of the Thames, and an additional 750,0001 was required to complete the junction with the Great Eastern, making in all 2,208,0001. In 1872, according to Sir Edward Watkin's report, the cos ch

1.807,995 172,153 That this 172,1531 was all profit to Mr Albert Grant there is no reason to suppose. It is apparent, indeed, from his energetic reply to Sir Edward Watkin, that he spent considerable sums in the circulation of prospectuses and papers, in judiciously placed allotments, and in such manipulations as alone made the issues a success. But granting that the money could only have been obtained by this expenditure upon commissions—which allowing for discounts, ex-ceeded 10 per cent.—was the outlay justifiable? To all intents and purposes these additions to capital have simply been throwing good money after bad. Take the position as it now stands. The capital raised and expended on the line has actually been about 2,300,0001; but including discounts, financial agents' charges, interest paid out of capital, and promotion, the nominal capital raised reaches 3,404,5951, and another 120,0007 in hard cash must be forthcoming to complete the undertaking. The gross revenue in 1877 was 34,0491 (the prospectus placed it as a "certainty" at 330,8801), and there was practically no net revenue, as the entire traffic receipts were swallowed up by working ex-penses, terminal charges, and certain deductions for Not even the debenture interest has been forthworks. coming for this period. It would have probably been better for the original proprietors-certainly better for the priority holders-to have sold the line in 1872 for what it would fetch to the Brighton, or the South-Eastern, or the Great Eastern, than to have gone on year after year raising capital, which could only be placed by a succession of manipulations, owing to which the line has now passed into almost hopeless bankruptcy. The accusation of the East London Board that the line is miserably worked by the Brighton Company may be quite true;

but, granting that by better management the traffic could be quadrupled, the net revenue would still be considerably below 100,000l, while it would require 125,000l to debenture and preference interest before anything pay could be earned for the shareholders. We admit the enterprise has suffered many drawbacks and delays; but these are common to all enterprises, and should have been allowed for at starting. The company started upon utterly fallacious estimates, and was from the first doomed to insolvency. Sir Edward Watkin now proposes to raise 120,0001 by a 5 per cent. redeemable rent-charge stock, repayable at a premium after 1880. This, of course, is to rank in priority to everything. If he could arrange for all the stock and debenture holders to consolidate into one security in proportion to the existing market values of the respective issues, thereby reducing the total capital by about one-half, and could further induce any, or all, of the companies above named to lease the undertaking at a fixed rental-this always induces lessees to develop a line-there might be some small hope for those who have invested their money in the East London. Otherwise, we can see none at all. But as a link between the Southern companies and the Great Eastern, the property might be rendered fairly valuable.

Import Duties on Articles of Indian Product and MANUFACTURE.---A return has recently been prepared by the Statistical Department of the Board of Trade, giving the rates of duty levied in the principal countries of Europe and in the United States on the most important articles, whether of native produce or of manufacture, imported from India. It is interesting to examine it, and to observe the manner in which the idea of self-interest has modified the rates imposed on various classes of articles. Thus, Russia levies a considerable customs duty on dressed or tanned hides, but undressed hides and skins are allowed to pass duty free. The same principle applies in general throughout. Perhaps it is expressed more strongly in the different rates charged on cotton goods and raw cotton than in any others. Russia levies on some classes of cotton tissues up to 21l, 23l, and 39l per cwt. In the case of Portugal the duties on several classes of cotton goods are also high ; but in most of the countries named the raw cotton itself is allowed to pass duty free, or only a low rate of duty is charged. A convenient table of the weights, measures, and the money used in the different countries is given, and an index to the return makes the information supplied very conveniently attainable.

RAILWAY RETURNS OF THE BOARD OF TRADE FOR 1877 .- We extract the following totals from this volume :-

	Capital	Paid Up.	Revenue.				
	Ordinary.	Total.	Receipts.	Working Expenses.	Net.		
67 76 77	£ 233,023,854 262,008,883 265,041,233	£ 502,262,887 658,214,776 674,059,048	£ 39,479,999 62,215,775 62,973,328	£ 19,848,952 33,535,509 33,857,978	£ 19,631,047 28,680,266 29,115,350		

Contrasting 1877 with 1876, there is an increase of 15,844,2721 in the paid-up capital, or 2.4 per cent., but of only 3,032,350*l*, or 1^{·1} per cent., in the ordinary capital. The excessive growth of priority capital has gone on for many years; thus in 1857, the ordinary capital was 56 per cent. of the total; in 1867 it was 46 was 56 per per cent., while in 1877 it was hardly more than 39 per cent. As regards the revenue, the increase in the gross amount in 1877 was 757,553*l*; that in the working expenses was 322,469*l*, and that in the net result was 435,0841. This increase, however, did not keep pace with the growth of capital, and hence the proportion of net revenue to capital, which was 4.36 per cent. in 1876, was 4.32 per cent. in 1877. In 1875, 1876, and 1877, the working expenses were in each case about 54 per cent. of the gross receipts.

A NEW LOAN FOR JAPAN. — According to the Japan Mail of May 18, the Japanese Financial Minister contemplates the issue of a new internal loan for $12\frac{1}{2}$ millions of yen, or 2,500,000*l*. The objects for which the loan is to be issued are numerous, and include the extension of the existing Kiyôto

THE ECONOMIST.

Railway to Tsuruga, the improvement of the ports of Nügata and Ishinomaki, road making, aiding the mining industries—which are now conducted on very crude principles—advances to farmers for draining and irrigating purposes, and the introduction of better descriptions of live stock. The Japan Mail, however, considers that the amount of the loan is too small, as the railway and harbour works are costly, and will leave a very scanty balance. Whereas fully one-half of that sum should be employed upon the extension of the road system, especially in the tea districts, where improved communications are much needed. We reproduce the following criticisms :—

criticisms :— In aiding mining industry, otherwise than by removing restrictions upon enterprise, we believe the Government to be travelling out of its proper sphere. The introduction and improvement of live stock may with propriety become objects of Government solicitude, but we are of opinion that the time has not yet arrived for stock or sheep raising on any large scale to be worth encouragement. Our own experience of Japan does not impress us favourably with regard to its grazing capacities. We have seen little natural grass, and what we have seen was of poor quality. Few or none of the more useful American or European grasses form pastures. As to sheep, we are distinctly of opinion that the country—partly through climate, partly through its lack of suitable food—is ill fitted for their sustenance in a thriving condition, and any attempt to vie with America or Australia, or even with China, in the production either of wool or mutton must, we are confident, result in disappointment. The most valuable product of Japan is silk, in which, with a little care, a virtual monopoly almost might be established. Why should not a portion of the loan be used in assisting the silk farmers to extend their mulberry plantations, and in providing them with the requisite machinery for reeling the cocoons in such a manner as to give an even thread?

The following is the official notification of the Government of Japan, dated April 30:---

Notice is hereby given that a decree has been issued for the raising of a loan of twelve millions and a-half of yen (£2,500,000) by subscriptions of the people, to pay for public works and subsidies to national industries within the Empire, thereby increasing native and foreign trade. The Minister of Finance has been ordered to execute this decree, and will publish further information shortly.

THE PUBLIC REVENUE AND EXPENDITURE.

The following are the receipts on account of revenue during the week ending July 6, as compared with the corresponding period of last year —

	Receipts of Week Ending July 6, £		Corresponding Period of 1877. £

 bara is also an increase of 2,000,000 f in the advances

There is also an increase of 2,000,000f in the advances on bullion. The changes this week are not otherwise important. The small increase in the discounts is in the branches, as there is more ease in Paris and bills are taken freely at $1\frac{3}{4}$. The exchange on London remains at 25f 12½ to 13c, the latter price was paid to-day. The imports of gold have been restricted to about 100,000*l* of Australian, purchased on the London market.

The Cyprus incident, occurring at a moment when the work of the Congress had almost arrived at its termination, and when the signing of peace had been generally discounted, produced a certain confusion on the Bourse. The first effect was a doubt as to the manner in which the news would be received by the French Government, and the journals at first may be said to have avoided taking up any position. The rise, therefore, continued on Tuesday, the Five per Cents. reaching a fraction above 116. On Wednesday morning, however, the *Republique Francaise*, M. Gambetta's organ, and which is frequently inspired by the Department of Foreign Affairs, published a very menacing article, demanding that the French representatives should quit the Congress, and refuse to sign the treaty of peace, or any document that would be a tacit recognition of the cession of Cyprus. The *Débats*, M. Léon Say's paper, still remained silent; but there was a fall of 70c in Rente, other securities being depreciated in proportion. The evening papers, taking their cue from the *Republique Francaise*, also

829

began to attack the arrangement, some in unmeasured terms. The $D\acute{e}bats$ spoke this morning, and the substance of its remarks is of a nature to remove any apprehenbegan to attack the arrangement, some in unmeasured terms. The *Débats* spoke this morning, and the substance of its remarks is of a nature to remove any apprehen-sions of a difficulty arising between England and France. Without actually approving of the Convention, which could scarcely be expected, it declares that to object to it would be time lost, or, at least, ill-employed, and that France being in a period of transition must accept what cannot be prevented. The ill-effects of this surprise may therefore be expected to wear off in a few days as the public become accustomed to the fact of this ex-tension of the English power in the Mediterranean. The occupation of Cyprus is, nevertheless, a severe blow to French national pride. The Bourse to-day was more steady, but prices still again gave way a little. The rates of the leading securities, compared with last Thursday, are as follows:— Threes, 76.60 - 22½c; Fives, 115.30 - 47½c; Italaan, ex div., 75.95 + 10c; Austrian 4 per Cent. gold, 66.50 =; Turkish Fives, 16.50 + 90c; Egyptian Unified, 271.25 - 8.75; Railway Bonds, 362.50 + 5; Russian, 1870, 88½ + ½; Bank of France, 3,170 =; Crédit Foncier, 835 - 38f 75c; Suez Canal, 755 ex div., 20f - 13f 75c; Northern Railway, 1,375 ex div, 44f + 8f; Orleans, 1,170 + 11f 25c; Southern, 825 ex div, 20f + 5; Western, 765 + 25; Lyons, 1,075 + 2f 50c; South of Austria, 170 - 1f 25c. Notwithstanding the pessimist declarations of the manu-

Notwithstanding the pessimist declarations of the manufacturers heard by the committee on the general tariff, and whose complaints and demands for protection have filled nearly a hundred columns of the *Journal Officiel* during the last few weeks, excellent accounts of a revival of trade are relast few weeks, excellent accounts of a revival of trade are re-ceived from the provinces. The Jacquart, of Elbeuf, an organ of the wool trade, summarises as follows its information from some of the principal manufacturing centres: "Unusual activity prevails in the department of the North; considerable orders are being received from the large Paris houses; most of them are for immediate delivery, indicating pressing requirements of the retail houses. The wool-combers are working day and night and the home production of varus is insufficient for the night, and the home production of yarns is insufficient for the weavers, who are forced to purchase even as far as in Russia. Carded is especially demanded at notably higher rates. Combed yarn has also improved, as well as most woollen stuffs or mixed goods. At Rheims the season will count among the busiest remembered. The recovery we noted a month back at Sedan may now be judged by returns; during the first three weeks of June, 1877, the deliveries of cloths amounted to 157,977 kilos; this year, in the same period, to 201,216 kilos. Louviers is selling freely, and the manufacturers have work assured for several months. There is a sensible improvement in the Vienea, but at Lieux malers find a diff. improvement in the Vienne; but at Liseux makers find a difficulty in keeping their mills going, and many hands are leav-ing, some for harvest work, others for Louviers or Elbeuf. Nothing particular to mention in this town, excepting a little slackness with some finishers, in consequence of the winter orders being nearly terminated. Some foreign orders are still in hand.

The ordinary budget of the city of Paris for 1879 amounts to 222.714.179f of receipts and expenditure—nearly nine mil-lions sterling. The receipts from the octroi are estimated at 126.708.100f, or 4.500,000f more than for 1878.

The International Monetary Conference, to be held at the request of the United States, will open in Paris on the 10th August. Nine Governments have so far promised to send delegates, namely, England, France, Russia, Belgium, Italy, Austria-Hungary, Switzerland, Holland, and Greece.

GERMANY AND AUSTRIA. (FROM OUR OWN CORRESPONDENT.)

VIENNA, July 8.

The German and Austrian Bourses have been so favourably influenced by the apparent success of the Congress and the probability of peace, that the quotations both for speculation and investment securities have been continually rising. Specu-lators for the fall, who have their chief field of action in Berlin, are therefore seeking means whereby to cover their and therefore seeking means whereby to cover their sales, and they have even bought up securities on the Bourse of Vienna. The shares of the Creditanstalt, which but a year of Vienna. of Vienna. The shares of the Creditanstalt, which but a year ago stood below par, are at present bought at 100 prem. Austrian paper and silver rente have risen $\frac{1}{2}$ per cent., and Austrian gold rente 1 per cent. Investors have again favoured the shares of new Austrian railways, and the prices of almost all these have risen; even the old shares have somewhat im-proved. The premium on silver stands at 0.9 per cent.

Now that the problem of the Austro-Hungarian State treaty has been satisfactorily solved, the attention of the public is drawn towards the occupation of Bosnia and the Herzegovina. Count Andrassy obtained more than anyone here had dared to hope, viz., the consent of the Congress to these military measures. The Austrian troops are to march at the end of the week, and mobilisation is carried on upon a large scale. Thus, at Graz the schools have been closed and the school houses turned into barracks for soldiers.

From the 1st October new rules are to be introduced with egard to the German railways, which will make them all dependent upon the same principles for the construction of way, rolling stock, &c. Up to the present all German railways published the changes in their tariffs quite irregularly, and published the changes in their tariffs quite irregularly, and each railway separately, so that persons at a distance seldom knew when such a change took place. Now 30 private rail-ways and 15 State railways, and railways managed by the Government, have agreed to publish any change in their tariffs in the Reichsanzeiger (equivalent to the London Gazette). Some years since the Hungarian railways instituted a contral office of accounts in Vienne, which is of great Gazette). Some years since the Hungarian ranways how a central office of accounts in Vienna, which is of great service to them. The office is instrusted with the revision of bary and but very few lines the accounts of forty-nine railways, and but very few lines have refused to take a part in this kind of association. Within three years 9,094,523 items have been revised, the total of which amounted to 195,577,301 florins.

The tobacco inquiry, for which, as we have already reported, the Reichstag voted the sum of 200,000 marks, whilst it refused to vote the bill in which it was demanded that manufacturers should be forced to declare the quantity of refused to vote the bill in which it was demanded that manufacturers should be forced to declare the quantity of tobacco produced by them, is the subject of a proposal addressed by the Chancellor to the Federal Council. The arrangement of the inquiry is to be entrusted to a committee, consisting of the following members : Several Imperial Government employés, officials of the particular States, viz., 2 Prussians, I Bavarian, I Badenser, 1 from Alsace and La^{man}ine, and 1 from the Hanse towns : besides this, three experts from the districts growing, manufacturing, and trading in tobacco. These members will be granted the same privileges, rights, and authority, that English com-mittees are endowed with. The delegates of the Ger-man Chambers of Commerce have met to discuss the question of the tax on tobacco. They resolved to institute an independent inquiry into the growth, the manufacture, and trade in tobacco on their own account, because they fear that the Government inquiry will tend somewhat strongly towards monopoly. The German Empire, the accounts of which are at present concluded yearly at the end of March, has made the following return on the net receipts of its customs : receipts, 100,020,103 marks—that is, 7.7 millions less than in the previous year. Among the indirect taxes, that on beetroot sugar amounted to something more than 45 million marks, that on salt to almost 35 million marks, that on tobacco but to 865,437 marks, that on brandy to 36 millions. million marks, that on sait to almost 35 million marks, that on tobacco but to 865,437 marks, that on brandy to 36 millions. The Imperial railway receipts amounted to 354 million marks, and postal and telegraph services yielded 1234 millions. The total receipts of custom duties and indirect taxes amounted to 232,855,732 marks.

Notices of Books.

 Principles of Contract. Second Edition. By Frederick Pollock. Stevens and Sons.
 WE are not surprised to find that Mr Pollock's work has reached a second edition. In its original form it was a vast improvement on the ordinary style of English law book, and in its altered shape it is still more useful. It is not a bare catalogue of cases - nor is it on union and promotion attempts. in its altered shape it is still more useful. It is not a bare catalogue of cases; nor is it an unripe and premature attempt to codify the law of contract by casting it into propositions too abstract to be really useful to the practitioner or intel-ligible to the student. Of course, Mr Pollock's work cannot enter into competition with large, elaborate treatises full of details, such as Mr Cave's edition of "Addison on Contracts." But for the purposes of the student and, above all, of the man of business, who wishes to obtain a clear general view of that portion of the English law which most affects him, there is no book equal to Mr. Pollock's. The first edition did not, how ever, touch several branches of the subject; and we are glad to observe some important additions. The chief cases decided since the issue of the first edition have been added, and from a tolerably close examination of the list, we can say that few of any consequence have been omitted. A valuable feature of the second edition are the copious references to the Year Books which, though sealed volumes, we fear, to most of the unlearned lawyers of modern times, contain the roots of our Common lawyers of modern times, contain the roots of our Common Law, and ought to be partially known to students. It is no real disparagement of a work, on the whole so satisfactory, to say that it has occasional defects; or, to be more accurate, perhaps, to say that we do not know on what principle Mr Pollock proceeds in including some matters and excluding others. Take the subject of custom as affecting contracts. No logal question has been treated in English contracts. No legal question has been treated in English text books more meagrely and in a more empirical fashion than this. No subject, on the other hand, has been discussed more fully by the great continental jurists, from whom Mr Pollock freely draws. We looked to Mr Pollock for a luminous discussion of a matter which is treated satis-fortaging in many of the adjust English treatment but here. factorily in none of the ordinary English treatises; but he fails to do more than advert to the subject. A more important practical defect has struck us. There is no

THE ECONOMIST

more interesting and peculiar species of contracts than those to which transactions on the Stock Exchange give rise. They have caused much differences among judges, and it is only recently that the law on the subject of brokers' and it have the subject of brokers' and it is only recently that the law on the subject of brokers' and jobbers' obligations, has been authoritatively and clearly laid down by the House of Lords and the Court of Appeal. Some of the decisions of these Courts have not been in accordance with the pre-conceived opinions of men of business, and it is, therefore, of importance that they should be known. They turned, too, on delicate questions as to novation; thus would have occupied properly a place in a book like this intended to discuss the law of contract in a philosophic spirit. Yet, we fail to find a single reference in Mr Pollock's work to Grissell v. Bristowe, Nickalls v. Merry, or any of the other well-known cases on the subject. The subject of novation is treated without reference to some of the most important judgments on the subject. Sometimes, too, Mr Pollock is more cautious and circumspect than becomes even a legal author. He discusses, for example, the subject of negotiable instru-ments with great clearness and ability; but he does not give his opinion on certain points on which it seems natural that he should state his views. Thus, he quotes the decision of the Queen's Bench in Crouch v. Crédit Foncier, to the effect that on instrument count he redecementation between the transthe Queen's Bench in Crouch v. Crédit Foncier, to the effect that an instrument cannot be made negotiable by any contract of the parties to it, but he does not state whether, in his view, this decision is practically overruled by the decision in Goodwin v. Roberts. We should have been glad to see in a book which is likely to pass into the hands of men of busi-ness and solicitors, with no large law libraries accessible, more information about such highly practical matters as bills of lading, which receive only a few lines. But Mr Pollock may plead the vastness of his theme as an excuse for omissions; and we should be soury to convey the impression that they and we should be sorry to convey the impression that they are at all numerous.

(2.) A Handy Dictionary of Commercial Information. By Edward T. Blakeley, F.S.S. (of the Board of Trade). London: Simpkin, Marshall, and Co. 1878.
THIS book is, as the preface informs us, "meant as a com-pendium of commercial information for all those who are preparing for a business life, as well as a useful remembrancer to those who are engaged in it." This intention it entirely fulfils. It is portable, in a clear type, and conveniently arranged. The descriptions of the various articles mentioned go into as much detail as is consistent with a capital print, and a comparatively small size of volume. Technical dictionand a comparatively small size of volume. Technical diction-aries of this kind are very useful assistants in the office and the counting-house. The book concludes with a list of the moneys, weights, and measures of the principal countries of the world; information on these points is naturally often needed by those whose business leads them to concern themselves with the class of articles and subjects described in the work itself.

hier.	Clearing-house return	66,934,000	101,579,000	88,856,000	81,800,000	101,805,000

The amount of the "other" deposits, compared with the "other" securities, showed in 1868, an excess of 4,745,6491; in 1875, an excess of 6,880,3401; in 1876, an excess of 10,141,7891; in 1877, an excess of 8,081,6521. In 1878, there is an excess of 4,057,5491.

In 1868, there was much ease in the money market, although attention was directed to what were then considered extensive Government borrowings from the Bank, a temporary loan of 1,400,000*l* having been obtained for the dividend payments.

In 1875, the Bank rate was reduced from $3\frac{1}{2}$ to 3 per cent., and money appeared likely to remain easy unless the change which was going on in the German currency should bring out a sudden demand on us for gold. The issue of notes under 50 marks had already been stopped in Germany, and those under 100 marks (5*l*) were to cease to be issued during the year. The place of this small note circulation, which was about 22,000,000*l* in amount, would have to be filled to a great extent by gold.

In 1876, gold came from abroad and remained in this **mar**ket in the absence of foreign demand for money. The stock markets had improved in tone on accounts of a friendly meeting of the Austrian Emperor and the Czar.

In 1877, the Bank of England lowered its rate of discount from $2\frac{1}{2}$ to 2 per cent., it having been reduced from 3 per cent. in the previous week. In the open market best paper was to be negotiated as low as $1\frac{1}{4}$ per cent., the war apparently exercising no influence upon our money market. The United States 4 per Cent. Funded Loan was brought out, but did not attract large subscriptions. The increase in the Government securities in the Bank returns was about 1,100,000*l*.

The account of the Bank of France for the week ending July 11 shows the following changes :—

	July 11.	July 4.	Increase.	Decrease.
Assets.	£	£	£	£
Cash	86,222,000	86,673,000		451,000

DISCOUNT AND MONEY MARKET.—As was anticipated of the Bank of last week the demand for money has greatly subsided, and the banks now paying 1 per cent. below the $3\frac{1}{2}$ per cent. standard for their deposits can no longer employ yet been appointed.

their funds profitably. The discount houses apparently do not hold themselves bound by any such antiquated rule, for on Tuesday they decided to put down their deposit rates to 2 and $2\frac{1}{4}$ per cent.; and for the time short loans are obtainable upon even lower terms. It would. therefore, be directly to the interest of the banks to follow the move of the discount houses; but after their recent decision toabide, for the time being, by their old custom, it can hardly be expected that they will so soon break away from it. The evil, however, still exists; and, indeed, was quite apparent before the Bank decided upon accommodating a few of its customers by discounting for them below the published rate. By that decision, however, they practically admitted that their published rate was no longer a guide to the London money market; and it certainly is not so now, when, the usual quarterly disturbance being over, best bills can be discounted at more than 1 per cent. below the Bank rate. If matters remain long in their present state there can be little doubt that the joint stock banks will again propose to take action. The change which has been witnessed in the course of the week can only be realised by contrasting to-day's quotations with those of last Friday. In this way, it is found that, although the Bank rate is unchanged, bills are taken in the open narket at quite $\frac{1}{2}$ per cent. reduction, and money is from 1 to $1\frac{1}{2}$ per cent. cheaper. With the completion of the Paris settlement, the drain of bullion from the Bank for that quarter has ceased ; but there are unmistakeable signs that the supply of new foreign and colonial loans is likely to be on the increase, two having appeared this week, while additional important issues are mentioned, including Russian, Turkish, Victorian, and many others. Thus, there is likely to be employment for the investment of our surplus funds, apart altogether from any possibly increased absorption in the discount market. Of this, it must be admitted, there are as yet but few signs. To-day, money was rather less abundant, but bills could be negotiated upon low terms.

In spite of the unusually large increase in the Government securities—pointing, perhaps, to the fact that the Bank has secured a portion of the Treasury bills the Bank return is a favourable one, even for the second week in the half-year. While the deposit liabilities for the are considerably reduced, the reserve shows an actual expansion of nearly a quarter of a million. Still, although comparatively favourable, we must not lose sight of the fact that the reserve is yet but little over 9,300,000l, and is therefore far too low to meet harvest and holiday requirements, and a possible autumn drain of bullion for The reduction in the public deposits exportation. is due to the payment of the dividends on Saturday last, barely one-half of which has returned to the private balances; but the falling off in the discounts and advances (other securities) is considerably the largest item in the account, and it is to this circumstance that the improvement in the position is mainly attributable. The increase in the coin and bullion is 90,6741, whereas the influx from abroad has been 349,0001; so that 259,0001 has been added to the internal circulation. Notes, however, have been returned to the extent of 155,7601, which, added to the increase in the coin and bullion, gives 246,434l as the precise addition to the reserve. Yesterday, 50,000 sovereigns were withdrawn for Lisbon. and to-day 10,000 were taken for Oporto.

The demand for gold for export is still a noticeable feature in the bullion market, but the pressure is no longer sufficiently great to necessitate applications to the Bank. In contrast to a further reduction of $\frac{1}{16}$ d in the minimum price of allotment of the India Council drafts to 1s 8d per rupee—the price of silver has somewhat recovered, and, at $52\frac{9}{16}$ d per oz, shows a rise on the week of about $\frac{1}{4}$ d. There is a small inquiry for silver for the continent; but none whatever for India

The Russian exchange has this week risen another $\frac{1}{2}d$ per rouble, or upwards of 2 per cent.

We learn with regret that Mr John G. Elsey, who for a lengthened period has held the position of principal of the Bank of England Discount Department, has arranged to resign his post. Mr Elsey entered the service of the Bank as far back as 1830. His successor has not yet been appointed.

THE ECONOMIST.

833

It is stated that this week's issue of 2,500,000l Portuguese 3 per Cent. Stock at 50 per cent. has been a success; and there is little doubt that when the tenders for the new Cape of Good Hope $4\frac{1}{2}$ per Cent. Loan for 1,000,000l are opened by the Crown Agents on Wednesday next, they will be found sufficient. These two items will absorb about 2,200,000l actual, the great bulk of which will have to be provided in this market.

The return of the Imperial Bank of Germany for the week ended the 6th inst. exhibits a reduction in the discount and advance business, and the deposits likewise show a falling off. The cash and the notes represent smaller amounts, and altogether, after the turn of the half-year, the statement is upon a diminished scale.

There has this week been a sharp reduction in the value of money in German markets. The discount quotations current in the chief continental cities are as follows :—

	Bank Ra	te. Op	en Market.
	%		%
Paris	2	*******	13
Berlin	4		3 1
Frankfort			3 1
Hamburg	*** ***	*******	3
Amsterdam	31		31
Brussels			
Vienna	41		41 1
St Petersburg			

The allowances at the private and joint stock banks are unaltered on the week; but at the discount houses they have been reduced one-half per cent., and are as follows:—

We subjoin our usual quotations for mercantile paper having various periods to run :---

-60	days		2		per cent.

THE STOCK MARKETS. - In spite of a tendency to relapse on various occasions, and notwithstanding the gloomy views entertained in respect to the dividend prospects of many of the most important home railways, the week has generally yielded favourable results. Government securities, both home and foreign, have advanced in many instances; and a few of the Turkish issues have been specially benefited by the publica-tion of the terms of the Anglo-Turkish alliance. On Saturday and Monday the steady progress recorded from Berlin in respect to the labours of the Congress, coupled with a stoppage of the bullion withdrawals from the Bank of England, caused a fair improvement in prices, and the first effect of the publication of the Convention on Tuesday morning was decidedly favourable. But the market had become feverish, and there was a decided relapse on Tuesday afternoon and during Wednesday. Large realisations were effected in Paris, espe-cially in Egyptian Unified stock. The one great excep-The one great exception was Turkish bonds, which rapidly advanced in favour both there and here. On Thursday, the changes were of an irregular character, but the Paris market still took a gloomy view of the situation, and prices of "inter-national" securities were again adversely affected. Today, the markets opened dull; but afterwards revived as it was understood that the Congress was practically con cluded.

BRITISH GOVERNMENT SECURITIES.—Since Tuesday morning there has been no further expansion in the quotations for the home funds, partly because it is expected that the occupation of Cyprus will entail an additional vote of public money, and perhaps additional borrowings. On Wednesday there was a relapse of $\frac{1}{8}$, which has not since been recovered. Metropolitan $3\frac{1}{2}$ per Cents. are firmer; and India Sterling Loans are steady.

COLONIAL GOVERNMENT DEBENTURES.—New Zealand Consolidated have fallen $\frac{1}{2}$, and the 5 per Cents. 10-40, $\frac{1}{4}$; while the $4\frac{1}{2}$ per Cents. 5-30 loan has risen 1. With these exceptions practically no change has occurred.

FOREIGN STOCKS .- In foreign State securities the chief excitement has taken place in Turkish stocks. The reasons for this are to be found in the terms of the Anglo-Turkish Convention, as well as in a statement that the British, French, and Italian Governments-representing the countries which are alone interested in Turkish bonds-have decided to hold some sort of inquiry in Constantinople respecting the capabilities of Turkish finance. If these Governments could only obtain the proper appropriation of the revenues specially hypothecated to the service of the bondholders, they would, indeed, be doing great ervice. But we must not forget that quite two-thirds of the Turkish revenues are thus hypothecated, and that were the bondholders and Russia to obtain all their demands, there would be absolutely nothing left for the Sultan's Government. The question is, therefore, a difficult one, although if an honest administration can be secured to Turkey as well as to Egypt a comparatively fair return may be the result. The realisations of stocks which have been pressed from Paris have caused a relapse in Egyptian Unified bonds; and other securities dealt in between the two markets are much less buoyant than they were early in the week. Still, French, Austrian, and Hungarian stocks are firmer than on last Friday, and Russian have improved to a moderate extent. Portuguese 3 per Cents. are lower upon the new issue, and Spanish have been flat on Paris selling. To-day, Egyptian, Russian, and Turkish were firmer.

The following are the changes for the week, taking the

THE ECONOMIST.

ENGLISH RAILWAYS .- Four railway dividends have been announced this week, and they contrast favourably with the returns of July last year. They are the following :

		1877		1	-	1878	1
	Dividen	id.	Balance.	D	ividen	d.	Balance.
	0		£		%		£
Metropolitan	. 4	+	728		5	+	1,556
South-Eastern	. 35	+	10,625		4	+	2,500
Manchester and Sheffield		4	1,570		11	+	1,500
London and Duighton	-12		14 500		4.5	-	11,500

In the instance of the London and Brighton Company the expansion is as much as $1\frac{1}{4}$ per cent. Unhappily, are some of the few companies which have these been doing well during the past half-year, three of them being essentially passenger lines. There is every reason, however, to fear that the lines serving the midland counties will show a far different state of affairs, and the counties will show a far different state of anars, and the Scotch companies bid fair to put forth particularly gloomy statements. A rise will be noticed in Great Northern, London and Brighton, Chatham and Dover, North-Eastern, and North British stocks; while, on the other hand, Caledonian, Great Western, North-Western, Metro-politan District, and Midland have fallen. To-day, Man-chester and Shiftid rese 1: but Great Northern A fell 1. chester and Sheffield rose 1; but Great Northern A fell $1\frac{1}{4}$

The following shows the principal changes for the week in the quotations of ordinary stocks, comparing the latest unofficial prices :-

NOTICES AND REPORTS. STOCKS.

STOCKS. Cape of Good Hope Government 4½ per Cent Debentures.— The Crown agents invite tenders on the 17th inst. for 1,000,000l, at a minimum price of 96½ per cent. The issue forms the final settlement of a loan of four millions autho-rised in 1874 for railway purposes, and the bonds will be identical with the existing 4½ per cent. bonds. Egyptian Finance.—The Council of Foreign Bondholders have communicated the published accounts of the Public Debt Commissioners for June, which show that for the coupon of the unified debt due 1st November, 10,362,156

piastres were received, which, with that encashed in May, leaves 165,190*l* to the credit of this account. For the coupon on the "preferred" debt due 15th October, 1,950,000 piastres were received in June; and in all since the 15th April 54,865*l* has been encashed. For the short loans (1864-65-67) 6,008,864 picture are preserved in the short loans (1864-65-67) 6,008,864 piastres were received, which, with previous sums in hand up to the end of May, make a total of 515,412l encashed, and of this 437,296l has been applied to meet the coupons due in April and May. Egyptian—Viceroy's Mortgage Loan.—The Anglo-Egyptian

Egyptian—Viceroy's Mortgage Loan.—The Anglo-Egyptian Banking Company announce that they are prepared to pay the coupons and bonds drawn for redemption. Guatemala 6 per Cent. Loan, 1869.—Messrs Thomson, Bonar, and Co. are prepared to receive the coupons of the 1869 loan, due 1st October, 1875, on which the balance of 1t per coupon will be paid on the 16th inst.

Portuguese 3 per Cent Loan.—Messrs Stern Brothers have offered for subscription the unissued balance of the loan for 6,500,000l, brought out last year, viz., 2,500,000l, at the price of 50 per cent.

Uruguay 6 per Cent, Loan, 1871.—Messrs Thomson, Bonar, and Co. have received the following telegram, dated Monte Video, July 5 :—" Contract signed—Morice."

RAILWAY COMPANIES.

Bolivar .- Since the line was opened on October 11th the Bolivar.—Since the line was opened on October 11th the service has been regularly maintained, and the amount earned to the end of 1877 was 19,490*l*, which has been applied in reduction of the capital expenditure. Owing to the necessity of making a selection of the better class orces from the Que-brada Company's ground the mineral traffic has not proved so satisfactory as was expected, but better results are looked for, and a large extension of business is anticipated. Bay of Havana and Matanzas.— The second annual dis-tribution of 40,000*l* amongst the bondholders has been announced, and will be made at the offices of Messrs Robert A. McLean and Co. on the 23rd inst. It will pay 11*l* 14s 1d per cent. on account of the first mortgage loan of 250.000*l*.

A. McLean and Co. on the 23rd inst. It will pay 11*l* 14s 1d per cent. on account of the first mortgage loan of 250,000*l*, 1861; 4*l* per cent. on account of the second mortgage loan of 100,000*l*, 1863*l*; 3*l* 8s 5d per cent. on account of the third mortgage loan, 400,000*l*, 1865. *Copiapo.*—During 1877, the earnings were \$539,058, the expenses, \$244,276, and the net income, \$294,782, showing a decrease. But the greater part of this diminution is due to the reduced operations of the smelting establishments caused by the low price of conper

the reduced operations of the smelting establishments caused by the low price of copper. Dutch Indian $4\frac{1}{2}$ per Cent. Bonds, 1869.—Messrs Samuel Montagu and Co. notify that the coupons due July 15th, will be payable at their office on that date. Detroit and Milwaukee Bonds.—The secretary of the Lon-don Committee of Bondholders notifies that a telegram has

been received from Detroit stating that the decree in the foreclosure suit was duly signed on June 29. Great Northern.—The branch between Newark and Bottes-

Great Northern.—The branch between Newark and Bottes-ford has been officially examined, and it was anticipated would be opened for traffic on July 1. International Bridge.—The numbers are published of bonds which were drawn on the 1st inst. Holders of drawn bonds are requested to send them to the offices, when after three days they will be paid off.

Metropolitan.-The directors announce that they will recommend a dividend on the ordinary stock at the rate of 5 per cent. per annum, leaving a balance of about 3,000/, half of which they

per annum, leaving a balance of about 3,000/, half of which they recommend to be placed to reserve, and the other half carried forward to next half-year. *Roumanian*.—From the accounts for 1877, it appears that the gross receipts were 1,467,747l, against 511,630l for 1876; net receipts, 911,251l, against 111,695l. The gross receipts for the first twenty-six weeks of 1878, amounting to 657,449l, show equally favourable results. The temporary debt raised for the completion of the railway system was reduced at the end of 1877 to 810,000l, of which 315,000l have since been paid off leaving 495 000l for extinction during the current year. off, leaving 495,000l for extinction during the current year. When this is paid off, the annual guarantee of the Government, amounting to 744,390l, will, after the close of 1879, have merely to bear prior charges for the 6 per cent. obligations, amounting to about 116,000*l* per annum, and the 8 per cent. preference shares of about 155,000*l* per annum, leaving 473,390*l* applicable to the dividend on the ordinary shares. This would suffice to pay a dividend of 4.85 per cent. per annum. The dividend on the ordinary shares for 1877 was fixed at 2 per cent. The negotiations of the Roumanian Government for the acquisition of the railway are not yet concluded.

South-Eastern .- The directors announce that they will South-Eastern.—The directors announce that they will recommend the payment of a dividend at the rate of 4 per cent. per annum on the ordinary stock for the half-year ended June 30 last, carrying forward about 2,500l. This compares with 3½ per cent. at this time last year. Wellington, Grey, and Bruce.—The numbers are published of thirty-nine bonds, amounting to 3,900l, which are now payable at par at the offices of the Great Western Railway Company of Conndo. It is also patient that the earnings for the half.

Canada. It is also notified that the earnings for the half-

year ended 30th June, will admit of the payment of 1*l* 17s 6d on each 100*l* bond, which will be applied as follows, viz., 12s 6d in discharge of the coupon due 1st January, 1877, and 1*l* 5s in respect of the interest coupon due 1st July, 1877. These amounts are now payable at 126 Gresham House.

BANKS.

City Bank.—The gross profits for the half-year, including 3,758l brought forward, were 81,391l, and it is proposed to declare a dividend at the rate of 10 per cent. per annum, free of income tax, to add 15,000l to reserve, and carry forward 4,7617.

4,761. Central Bank of London.—The gross profit for the half-year, including the sum brought forward, is 25,609l, and deducting expenses, and writing off an amount from the cost of bank premises, there remains 11,136l. A dividend is of bank premises, there remains 11,1367. A dividend is recommended at the rate of 8 per cent. per annum, free of income tax, the sum of 2,000l is added to reserve, and the balance of 5,136l, including rebate, is carried forward. *City of Glasgow Bank*. — At the annual meeting, it was agreed to pay a dividend at the rate of 12 per cent. per annum, to write off the whole of the recent defalcations at the

Bank of Mona, Isle of Man; and to carry forward the balance of 13,222l, leaving a reserve of 450,000l. Colonial Bank. — The net profit for the half-year was

46,245*l*, and deducting a bonus of 3,347*l* to the staff, and adding 2,216*l* brought forward, there remained 45,114*l*, out of which an ordinary dividend of 6 per cent., and an extra-ordinary dividend of 1 per cent. have been declared. The sum of 2,000l has been added to reserve, increasing it to 90,000l, while 1,114l has been carried forward.

Exchange and Discount Bank.—There is a net profit for the six months ended 30th June of 6,257l, from which a dividend at the rate of 12½ per cent. per annum has been declared. The reserve remains at 52,500*l*. *Imperial Bank.*—The directors propose a dividend at the

Imperial Bank.—The directors propose a dividend at the rate of 6 per cent. per annum, and the transfer of 5,000l to reserve, carrying forward 2,768l. The net profits were 28,018l. London and South-Western Bank.—The half-yearly report shows a gross profit of 34,499l, and after deducting current expenses there remains 12,831l for appropriation. The direc-tors recommend a dividend at the rate of 8 per cent. per annum, and carry forward a balance of 4,831l. The directors congratulate the shareholders on the admission of their bank to the Clearing-house. The amount due to customers has increased from 1,466,679l to 1,576,429l in the past year. North-Western Bank.—The directors have declared an interim dividend at the rate of 8 per cent. per annum, free of

interim dividend at the rate of 8 per cent. per annum, free of income tax

Staffordshire Joint Stock Bank .- The board have decided to

Staffordshire Joint Stock Bank.—The board have decided to pay an interim dividend of 10 per cent. per annum for the last half year, carrying forward 5,8281. Union Bank of Australia.—The directors have resolved upon a dividend of 11 15s per share and a bonus of 5s, being together at the rate of 16 per cent. per annum. The new shares created in January last are entitled to a moiety of this dividend and bonus. At this time last year the dividend was at the came rate

at the same rate. Union Bank of London.—The net profits for the six months were 110,809l, which, with 5,064l brought forward, left avail-able 115,873l. Out of this, a dividend has been declared at the rate of 15 per cent. per annum, free of income tax, 10,000*l* is added to reserve, and 1,247*l* carried forward. Subjoined is the balance sheet on June 30:--

THE ECONOMIST.

839

[CONTINUED FROM PAGE 836.] Jorehaut Tea.—The annual report states that the total receipts were 80,7781, and the expenses 66,8021, leaving a net profit, added to the previous year's surplus, of 14,1181. In addition to the interim dividend of 5 per cent. already paid, the directors now propose a distribution of 10 per cent., leaving 6541 to be carried forward. Lebong Tea.—The estimated helps

Lebong Tea.—The estimated balance of net profit for the year was 8,051*l*, and an interim dividend of 3 per cent. was paid in December last. A distribution of 5 per cent., free of income tax, is now proposed, making 5 per cent. for the year, carrying forward 1,485*l*. It is mentioned that a further 1 per cent. might have been paid, but, as the prospects of the present season are not encouraging this was not considered present season are not encouraging, this was not considered advisable.

Lion Brewery.—The directors have declared an interim dividend for the half-year ended June 30th, at the rate of 10

per cent. per anum. National Discount. — The half-year's gross profits were 106,567l, and the available net balance was 62,660l. Out of 100,9077, and the available net balance was 62,660l. Out of this, 9,000l was carried to reserve; and after paying a dividend at the rate of 12 per cent. per annum, 2,860l will remain. The reserve is further increased to 472,500l by the realisation of 3,500l from the failed estates of 1875. The deposit liabilities on June 30 stood at 9,871,480l, and the discounts, &c., at 9,149,025l.

9,149,0257. New Westminster Brewery. — At the meeting, an interim dividend was declared for the half-year ended April 6 at the rate of 8 per cent. per annum, free of income tax. *Peel River Land Mineral.*—The directors recommend an interim dividend of 2 per cent., free of income tax. *Peninsular and Oriental Steam Navigation.*—Mr J. S. Godfrey and the Right Hon E. P. Bouverie have joined the board, and Mr W. Fane de Salis, the senior director, has been elected chairman.

elected chairman.

elected chairman. Pawson and Co.—The net profits for the past six months amount to 11,006l, which, with 7,731l brought forward, leaves 18,737l available. Out of this it is proposed to apply 6,000l to the payment of a dividend at the rate of 5 per cent. for the half-year, and carry forward 9,646l. Scottish American Investment.—The directors have declared the usual interim dividend for the past half-year, at the rate of 10 per cent. per annum, payable on 1st August next. Tranways and General Works.—It has been decided to recommend a dividend of 6s 6d per share, making, with the 3s 6d already paid, 10 per cent. for the year ended June 30; 2,000l being added to reserve, and about 900l carried forward. Victoria Coal and Iron (Swansea Vale) Limited.—Mr F. J. Tingle, of Cannon street, has been appointed official liqui-

Tingle, of Cannon street, has been appointed official liquidator

Western of Canada Loan and Savings Sterling Debentures.— Messrs Morton, Rose and Co. announce the payment, on the 15th inst., of the coupons then due. MINING COMPANIES.

Great Laxey.—The directors have declared a dividend for the quarter of 8s per share, tax free.

The following is a statement showing the quantities sold and the average price of British Corn (Imperial measure), as received from the Inspectors and Officers of Excise, conformably to the Act of the 27th and 28th Victoria, cap. 87, in the week ended July 6, 1878:-The following is a stat of British Corn (Imperia Excise, conformably to t

COMMERCIAL REVIEW FRIDAY NIGHT.

FRIDAY NIGHT. No very striking features have been disclosed by the com-mercial advices of the week. Until Wednesday, the volume of business reported in the Liverpool Cotton market was small, but prices were well sustained. Then, however, although but little encouragement could have been derived from the Manchester market of the previous day, prices showed a slight advance, and transactions increased to 12,000 bales. On Thursday, there was an advance of $\frac{1}{3}$ d per lb, and 15,000 bales were disposed of; while to-day another 12,000 changed hands. In Manchester goods the tone is quict but quotations are neces. In Manchester goods the tone is quiet, but quotations are neces-sarily supported in view of the firmness of the raw material. Indian buyers still hold aloof, and the recent depression in the exchanges from the East has operated still further to restrict purchases from that quarter. Last month's shipments of piece goods to Bengal were 55,800,000 yards, against 74,600,000 piece goods to Bengal were 55,800,000 yards, against 74,600,000 in June, 1877, and to China they were 22,500,000 yards, against 29,700,000. Early in the year we sent to India far larger quantities than they were able to consume, and recent reports from that country and from China have referred to those markets being overstocked. The shipments to Turkey and to Australia have, however, considerably expanded. Advices from the woollen trade centres are conflicting as to the volume of business going forward, but generally speaking prices are moderately sustained, and reports from Leeds are more cheerful. The Nottingham lace trade is still irregu-larly employed.

are more cheerful. The Nottingham lace trade is still irregu-larly employed. In Wheat, prices have not shown any further tendency to decline this week, for the recent fall has been so considerable that until the harvest is fairly secured a further drop would appear to be very risky. The weather is moderately favour-able, but the reports from different districts are always con-flicting at this season. Altogether, however, they are much brighter than during the past two years. To-day, quotations rose 1s per quarter. In Produce, tea, coffee, sugar, and rice are quiet and without improvement, except a small advance on Wednesdav in Ceylon coffee. Spices are reported rather on Wednesday in Ceylon coffee. Spices are reported rather firmer; and seed oils are higher than last week. Metals are quoted lower in the London market, the fall extending to tin, copper, and pig iron. House coals, however, are steadier.

THE COTTON TRADE.

At the time of going to press our Liverpool letter had not arrived.-[ED. ECON.]

LONDON.-JULY 11.

Annexed is a portion of the circular issued this week by the London Cotton Brokers' Association :—

The market has been very steady throughout the week, and with a fair amount of business, prices are about the same on the spot, but arrivals and American futures close $\frac{1}{3^{1}d}$ to $\frac{1}{16}d$ above last week's quotations.

MANCHESTER, July 11.—Since our last report this market has undergone no appreciable change. Cloth generally is quiet, better grades of shirtings meet with inquiry; but in order to sell in quantity producers have to submit to lower rates than they are yet prepared to accept. In printers T-cloths and domestics the transactions continue small. Yarns have moved slowly; in home trade qualities manufacturers decline purchasing freely until there is a more decided im-provement in the demand for goods. Export descriptions also keep in poor request, though prices on the whole remain perfectly steady. perfectly steady.

THE WOOL TRADE.

The prices of home-grown wools are fairly maintained in the country, but the trade in Yorkshire is very disappoint-ing, both demand and prices being unsatisfactory. In colonial wool, now that the sales are over, there continues

to be a fair inquiry, and prices keep firm. Our Liverpool advices indicate a quiet tone in that market, very little business having been transacted in foreign wools, very little business having been transacted in foreign wools, while there has not been any alteration in prices. The auctions for sheepskins were held on Wednesday, and the selection comprised a fair quantity of really well-woolled skins, but in rather heavy condition. There was a good attendance of buyers, and although recent private purchases had satisfied most consumers, competition was brisk. Of 1.425 bales offered, 1,176 were sold at prices nearly on a par with highest late private sales.

At Bradford, the quietness which has come over the wool market since June, has not in any degree disappeared. Buyers are very inactive, and their wants are sufficiently supplied to allow of their holding aloof for a time. Country rates do to anow of their norming about for a time. Country rates do not show nearly so much disposition to give way, but even they are rather softening in some quarters, and especially in Ireland. Irish wool here has now fully established a decline of a halfpenny from the top price, and in other descriptions, including even Southdowns, quotations which on Monday were reluctantly submitted to are now more freely accepted. were reluctantly submitted to are now more freely accepted. In yarns, the general dulness in tone has a marked influence on the foreign users of Bradford yarns. There is a great falling off in the orders received by export merchants, and even low offers are not forthcoming as they lately were. The twofold trade is particularly quiet, but single yarns are not much better. There are a few inquiries for lustre, demi-lustre, and other tube descriptions. Spinners' quotations are nominally unchanged, but the tendency of prices is neverthe-less in favour of the buyer. Home-trade spinners are not quite so badly off. As regards pieces, there is rather an im-provement in the amount of business, but no improvement in prices. Manufacturers of soft stuffs are fairly engaged for autumn, chiefly on account of the home trade, and we hear of a few speculative offers for goods of a bright description in anticipation of next spring.

in anticipation of next spring. Reports from Leeds are more cheerful in tone. Even the felt trade is reported to be looking brighter.

.

THE ECONOMIST.

IRON AND COAL TRADES.

In the North, the iron trade has shown few signs of returning animation, although at Middlesbrough there have been indications that there is business in reserve which is likely soon to be brought forward. Quotations for pig iron are as follows :- No. 1, 43s; No. 3, 39s; No. 4 forge, 38s, less 1 per cent. At Wolverhampton, prices for the ensuing quarter have been practically settled, Lord Dudley's agent and the representative of the Lilleshall Company having declared their intention not to reduce either marked bars or pigs. In South Wales the steel rail trade has not improved, rails selling at prices which used to be considered low for iron goods. The coal trade in South Wales is also in a very unsatisfactory state, steam coals being in worse demand, while the output in the Rhymney district is being increased. In London, however, house coals were in better request on Monday, at an advance of 6d per ton. The Middlesbrough Chamber of Commerce have issued the

following report for the month of June:

following report for the month of June :--PIG IRON.--At the end of the month out of ninety-one furnaces erected sixty-seven were in operation, and during the month the production of Cleveland pig iron amounted to 107,879 tons, or 2,106 tons less than in May. The producers in the Middlesbrough district are in a better position than those in other parts of the North of England, for while only one-fourth of their furnaces are inactive, about five-eighths of those in the rest of the North are standing. In addition to the Cleveland pig iron a certain portion of hematite and spiegeleisen were turned out by the Middles-brough furnaces. At the end of June last year, only fourteen furnaces were standing out of eighty-nine built. The stock at the end of June was altogether 269,797 tons (165,259 tons, the stocks of Middlesbrough makers, 64,814 tons in Connal's and other stores, and 39,724 tons in makers' stores), against 276,782 stocks of Middlesbrough makers, 64,814 tons in Connal's and other stores, and 39,724 tons in makers' stores), against 276,782 tons in May, thus showing a decrease of 7,085 tons. The ship-ments amounted to 68,808 tons, or 1,715 tons less than in June, 1877, and 5,235 tons less than in May, 1878. Of the 30,236 tons sent to colonial and foreign parts 6.893 tons went to Germany, 6,600 tons to Holland, 6,395 tons to France, 4,820 tons to Belgium, 2000 tens to Russick 124 tons to Strade and the sensities to 6,600 tons to Holland, 6,395 tons to France, 4,820 tons to Belgium, 2,390 tons to Russia, 1,512 tons to Sweden, and the remainder to Norway, Denmark, Spain, Portugal, Italy, and Newfoundland. The business during the month has been tolerably active, and a better tone has on the whole pervaded the market, in consequence of which makers have raised their quotations to the figures men-tioned in the quarterly report of the Chamber. It is stated that the stock of forge pig iron is low, and prices of this quality are therefore firmer than those for other descriptions. Inquiries for forward delivary are more numerous and the presente of trade

The stock of longe pig from is low, and preces of this quality are therefore firmer than those for other descriptions. Inquiries for forward delivery are more numerous, and the prospects of trade are said to be encouraging, as the Congress at Berlin is smoothing over all difficulties and will avert further hostilities. MANUFACTURED IRON AND STEEL. — The shipments from Middlesbrough during the month were altogether 15,005 tons, or 6,856 tons less than in May, but 4,314 tons more than in June last year. The principal colonial and foreign exports were: 3,624 tons, principally rails, to Italy; 1,405 tons, rails, locomotives, &c., to Australia; 719 tons bars, hoops, and plates to Japan; 328 tons of plates to Denmark; 300 tons of rails to Russia, &c. Trade has been exceedingly poor in all departments, except that of plate making, but just at the close of the month a better tone appeared, and an increased number of inquiries were received, which, it is hoped will result in orders. The plate makers in this district have had plenty of work to do, but they have been unable to advance their prices in face of the low rates asked by competitors. Higher quotations have been made by some firms. About 54 per cent. of quotations have been made by some firms. About 54 per cent. of the finished iron turned out in the North of England and in this immediate district, is in the form of plates, chiefly for shipbuilding and boilers. Angles have been in fair request, but prices of these, and boilers. Angles have been in fair request, but prices of these, as well as of all kinds of finished iron, have been kept about stationary. Ordinary bars have been selling very slowly, and there have been scarcely any inquiries for iron rails. The orders for these go principally to South Wales, where a lower price can be accepted. The Britannia Ironworks have been put in operation after a stoppage of over two and a-quarter years. Messrs Bolckow, Vaughan, and Co's steel works at Eston have been kept in full operation, and they have proceeded rapidly with the demolition of their Middlesbrough establishment in order to erect another steel manufactory on the site. The Eston works now produce from four 8-ton Bessemer converters about 1,350 tons of steel per week. The prices of steel rails are nearly as low as those of iron. IEONFOUNDING, ENGINEEEING, CUT NAILS, &c.— The iron-founders generally have been doing better during the last few weeks, as more work has been offering. LONDON COAL MARKET.

THE CORN TRADE.

MARK LANE, FRIDAY EVENING.

The agricultural prospects continue very favourable in this country and on the continent, but their effect upon the trade appears to have been pretty well discounted, and in most directions a firmer feeling is gaining ground. This is more especially the case with regard to wheat. For some time the shipments from America have diminished, and from other points they are also much smaller, while the quantity on the way is still reducing, being now 770,000 quarters, against 780,000 quarters last year. From America quotations come steadily higher, and for arrival purchases could not be effected except at enhanced rates, and relatively dear compared with those at present current for spot parcels. The deliveries of English wheat from farmers, hitherto small, have further fallen off. The inland markets, from the scant sup-plies that have thus been available, have shown increasing firmness, and in many cases prices have risen 1s per qr. At the sea ports, where arrivals from abroad, though not so considerable as of late, have still been good, the improvement is not so general, and in some of the Scotch ports the weakness in quotations has not been wholly removed. Mark lane has in quotations has not been wholly removed. Mark lane has also been slow to follow the improvement so far as ex ship parcels are concerned, in consequence of the weight of fresh supplies. Still, the general tendency, even in this position, has been towards hardening values; whilst on some particular descriptions of wheat, and especially American, that were recently the most pressed, there is a tangible recovery. Spring wheats that were sold some ten days or a fortnight area at 40s would now be difficult to find much under 43s. ago at 40s, would now be difficult to find much under 43s. On the other hand, Russian wheats do not show much, on the other hand, Russian wheats do hot show much, if any, improvement, and although very firm rates have been obtained for the small portion of English that has come to hand, quotations can hardly be altered. In coast cargoes, as well as those for future arrival, the firmness has been more decided, the continental demand assisting the market. Arrived Berdianski has realised 39s 1½d, Nicolaeff 39s 3d per 492 lbs, American arrived 42s 6d to 46s 6d per 480 has for the United American spring 42s 6d to 46s 6d per 480 lbs for the United Kingdom, and red winter 46s 6d for the continent. On passage and for shipment No. 1 white Michigan has sold at passage and for shipment No. 1 white michigan and Alexandres of the continent direct, No. 2 45s 6d American terms for the continent direct, No. 2 Milwaukee at 40s 3d, and red winter wheats at 40s 6d up to forms. Calcutta club at 44s 6d, and Milwaukee at 40s 3d, and red winter wheats at 40s 6d up to 42s 9d American terms; Calcutta club at 44s 6d, and Californian at 46s 9d for the United Kingdom. There is no improvement in the flour trade, which is everywhere reported dull, with prices still drooping. In some of the pro-vincial markets barley prices have rather given way, but in London they have been well sustained in all positions. On the spot, though arrivals have been good, prices have ruled arrivals have been well sustained in all positions. against buyers, and off coast stiffer rates have been obtained, Ibrail selling at 22s. For shipment, Danubian has changed hands at 19s 4½d per 400 lbs for the United Kingdom. The quantity on the way is now 206,000 qrs, against 64,000 qrs at quantity on the way is now 206,000 qrs, against 64,000 qrs at this time last year. Maize has maintained an upward ten-dency, both on the spot and forward. American mixed ex ship is now worth 23s 6d to 24s; for sound parcels, though arrivals during the week have been rather large, off coast sales of mixed have been made at 23s to 23s 6d; Odessa at 25s. On parcent for the philometry of 25s to 25s of 1 arr 402 ho or inxed have been made at 25s to 25s off; Odessa at 25s. Of passage and for shipment Galatz at 25s to 25s 9d per 492 lbs, and American mixed at 22s 9d to 24s 6d per 480 lbs; usual terms to the United Kingdom. The quantity on the way has decreased to 752,000 qrs, but is considerably in excess of the quantity on the way at this time last year. Beaus have rised have neg of and have met more attention. has decreased to 752,000 qrs, but is considerably in excess of the quantity on the way at this time last year. Beans have risen 1s per qr, and have met more attention; supplies on the way are very light, and in consequence of drought, the export from Egypt is prohibited after the close of this month. Peas, with very moderate receipts, support full value, but move off with a quiet demand. Oats have arrived largely during the week; but the market has been rather firmer, and in some cases slightly better prices have been obtained. On the spot, Lebau and Riga sell at 16s 6d to 17s 6d; Petersburg and Archangel, 17s 6d to 18s 6d; Swedish, 21s to 21s 6d, all 38 lbs average; and 40 lbs Swedish at 24s to 24s per qr. The seed trade continues very quiet, most of the forthcoming crops are well spoken of. A large supply of trefoil being expected, low prices are talked of; but nothing in this respect is as yet decided. Samples of new rapeseed have been shown, but values are not suffi-ciently settled to afford quotations. Canary seed is very dull of sale and rates easier; while mustard seed is in moderate demand for agricultural purposes.

pa

WH

NEW YORK, June 28.

There has been an important decline in prices of flour in the past week, leading at times to considerable activity. There were sales early in the week of large lines of common extras at \$4.05 to \$4.10, and yesterday at \$3.95 to \$4, the latter figures being as low, we believe, as have ever been quoted in a genera-There were also liberal sales of the better grades for the tion. West Indies, &c., at \$5 to \$5.10. Good to choice brands have been selling fairly. Production is curtailed at all points, but there is a strong inclination to close out stocks of grades which are in danger of being sourced by the heat of summer. To-day, the market was dull. The meat market has also metacould defined under a recourse to varies in the face of mater ially declined, under a pressure to realise in the face of dull foreign advices. The anxiety to sell has been increased by the greatly improved accounts received of the progress of the growing crops of spring wheat in the North-west. Receipts are moderate and stocks nowhere excessive. Indian corn was in good demand all the week, and supplies being but moderate, prices were higher. By was active early in the week at steady prices, but the whole market has latterly been dull and drooping. Oats were fairly active and firm, but yesterday and to-day the market was dull.

COLONIAL AND FOREIGN PRODUCE MARKETS. FOR REPORT OF THIS DAY'S MARKET SEE " POSTSCRIP MINCING LANE, FRIDAY MORNING.

SUGAR.—The market does not show any further change, but the me has been rather more quiet than last week. Refining sorts of Vest India remain firm. Crystalised has not sold readily. At West India remain firm. West India remain firm. Crystalised has not sold readily. At auction, a few parcels Demerara realised 26s to 29s, and some fine white in barrels 31s. Barbadoes sold steadily at 19s 6d to 23s. Total business in West India, 1,542 casks. Two cargoes sold for the United Kingdom, including one Trinidad, at 20s. A few of foreign reported at former prices. Common brown East India sugars are dull. Austrian Beet of the new crop can be bought at low prices. The refined markets have not quite maintained their previous firmness. Landings of sugar in the chief ports of the United Kingdom last week were about on a par with the deliveries, leaving the stock the same as by previous return, and rather above the average stock of 1877 and 1875.

TEA .- Seven steamers have now arrived from China, and a further LEX.—Seven steamers have now arrived from China, and a further large quantity of new season's congou placed on the market. Of these supplies the trade have bought freely and public sales held daily. Common to fair red leaf tea is 1d lower. Medium to fine from 1s 3d to 2s, steady. Grades at 10¼d to 1s 1d show the above decline. Black leaf teas have ranged from 1s 0¼d to 1s 8d; fine, 1s 9d to 2s. Finest up to 2s 6d are rather under opening rates. Common to fair congou of last year's import meet some demand for export at about 8d to 10d. 20,641 packages have been offered by auction without reserve. Green teas do not improve. Scented for export at about so to 10d. 20,041 packages have been observed by auction without reserve. Green teas do not improve. Scented caper and Pekoe remain dull. There is not any new feature to notice in Indian tea. The public sales this week have been about 3,100 packages, chiefly new teas, the qualities not in favour with the trade.

The trade. RICE.—About 11,000 bags have sold on the spot at easier rates, including table white Bengal at 15s to 15s 6d; Askolee, 9s $7\frac{1}{2}d$; Rangoon, 9s $8\frac{1}{2}d$; heated Larong, at 8s 3d to 8s 6d. Numerous arrivals and several cargoes have sold at 3d reduction: one of arrivals and several cargoes have sold at 3d reduction: one of Bassein, March, 9s $4\frac{1}{2}d$; three Necrancie Arracan, about 1,300 tons each at 9s 3d to 9s $4\frac{1}{2}d$; open charter; 9s, ex ship London. One Rangoon about 1,420 tons at 9s 6d, open charter; one of 660 tons at 9s 9d, open charter; one of 1,050 tons (Ngakoak) off the coast at 9s 3d, open charter; one of 730 tons Japan for the continent, price not reported. Cleaned rice steady. Exports of Burmah rice to Europe to 6th July, 493,200 tons, against 469,500 tons last year, and 439,000 tons in 1876. 439,000 tons in 1876. Privately, good A C garnet sold at 64s to 65s per cwt, for cash. L Nume.—The quarterly sale on Monday energed quietly and it

INDIGO .- The quarterly sale on Monday opened quietly, and it INDIGO.—The quarterly sale on Monday opened quietly, and it was only after very extensive withdrawals by importers that biddings became at all animated, and shipping sorts recovered the decline established on the first day. The home trade has taken about the usual supply, but exporters have bought compara-tively little, the markets abroad being supplied by direct imports from Calcutta. Crop accounts are unsatisfactory from some con-cerns, yet on the whole they are not looked upon as unfavourable, and as a considerable surglus from the large crop of last year will

THE ECONOMIST.

still be in stock, either here or elsewhere, at the end of this season, a moderate average one this year will be amply sufficient for all requirements. The experience of the last two seasons shows how a moderate average one time year with be autopy same for for an requirements. The experience of the last two seasons shows how fallacious are the estimates of crop based on unfavourable weather early in the season. Bengal good and fine shipping sold at about April rates; ordinary and middling shipping at par to a shade dearer; consuming, par to 2d advance; Oudes and plant Oudes, par to 2d advance. The small supply of Kurpah was indifferent in quality, and the few parcels sold realised from par to 2d advance. The dry leaf Madras offered consisted of low quality, of which very little was sold; prices are nominally about 3d higher. Bimlipitam sold at April rates. Of the total quantity (7,100 Chests) 3.593 have been withdrawn, and 810 bought in, leaving 2,697 sold, to which must be added about 550 of the withdrawn lots in, making a total of 3,250 chests sold. OTHER DEYSALTERY GOODS.—The public sales have been small. 1,446 bags Bengal turmeric "without reserve" part sold at 16s. Business has been done in Gambier on the spot at 17s and 16s 9d per cwt, ex ship " without reserve."

Business has been done in Gambier on the spot at 17s and 16s 9d per cwt, ex ship "without reserve." METALS.—The quotations have inseveral cases given way, and the markets are still unsettled. Chili copper shows a reduction of fully 10s, being dull this morning. G.o.b., 62l 15s to 63l cash; named brands in proportion. Wallaroo, 73l 10s to 73l 15s; Burra, 71l. No change in British. Tin has sold as low as 6ll 5s. Yesterday

No change in British. Thin has sold as low as 611 58; Burn, 11. No change in British. Thin has sold as low as 611 55. Yesterday more inquiry. Business in Australian and Straits at 611 108 to 611 158. English ingots, 654. Spelter steady at the quotation for common Silesian. 200 tons London-rolled sheet zince by auction chiefly sold at 201 158; one lot, 201 178 6d. The improve-ment in the markets for iron is only of a very partial character. South pig has sold to a moderate extent at rather lower rates, viz., 498 6d to 498 7d, cash. The shipments last week were 7,400 tons, being still less than in former years. Lead quiet. JUTE.—A large business has been done for arrival, the reported sales reaching about 25,000 bales at low rates. Over 20,000 bales of above quantity for Dundee. Common marks and second Greek marks, 121 108 to 144 108. For London and Dundee other marks, 151 58 to 151 128 6d down to 131 108. Transactions on the spot have been rather limited. 3,908 bales by auction on Wednesday barely half sold, some of the marks being 5s lower. Range of prices, 121 58 to 171 108. Part sold without reserve. In Dundee, jute goods are steady, and the manufacturers fairly well employed.

prices, 12: 53 to 177 105. 1 art sont windout reserve. In Damieel, jute goods are steady, and the manufacturers fairly well employed. HIDES.—The sales yesterday included 27,844 China, of which about two-thirds sold: heavy, 3½ d to 7½ d; light, 6½ d to 6½ d. 100,413 East Indian part found buyers, the prices obtained being very irregular. Of 22,000 buffalo hides about 9,000 sold at last sale rates to ½ d per lb decline on Singapore and Penang. LINSEED.—The market is firmer. A steady business has been done. Calcutta, to arrive, 498 6d to 508, according to conditions. On the spot, 598 3d ex ship, 498 9d ex warehouse. A steamer cargo of Azov sold for the continent, equal to 498 6d per quarter for the United Kingdom. Afloat from the East Indies to the United Kingdom at latest date 139,320 quarters, against 292,000 last year, and about 395,000 quarters in 1876 at same date. OtLS.—There has been some recovery in the quotations of seed oils. Linseed is firm, and 5s to 7s 6d dearer than last week. This morning's quotations as follows: on the spot, 287 7s 6d to 287 108 ; next two months, 281 108 ; last four, 271 108. English brown rape dearer, with a more steady market. On the spot,

281 108 ; next two months, 281 108 ; last four, 271 108. English brown rape dearer, with a more steady market. On the spot, 321 128 6d to 331 158 ; last four months, 331 108. In most positions the advance is 108 to 158. English refined on the spot, 341 58. Cocoa-nut firm. Ceylon at 401 to 411 ; Cochin, 511 108 to 521 58. No alteration in palm, market quiet. Fine Lagos, 371 108 per ton. Other oil in proportion. Transactions in olive are limited. Levant and Mogadore quoted 481 to 491 ; Spanish, 491. There is not any revival of demand for fish oils. Crude sperm, 681. Pale seal, 321 to 331 per tun. PETEOLEUM OIL.—The market shows rather more steadiness. Price on the spot, 91d. Last four months delivery, after selling at 91d, is now worth 91d per gallon. Stock increased to 76,320 barrels owing to arrivals. SPIRITS TURPENTINE dull. American, 238; last four months,

SPIRITS TURPENTINE dull. American, 23s; last four months, 23s 6d per cwt.

TALLOW.—Prices have fluctuated but slightly, and the tone of the market is now steady. The supply of "sorts" continues quite equal to the demand. No material change can be reported in Australian. This morning's quotations for Petersburg are as follows: on the spot. 38s to 38s 3d; last three months delivery, 39s to 39s 3d; December, 39s 6d; January to March, 40s; March, 40s 6d per ewt.

POSTSCRIPT. FRIDAY EVENING

SUGAR.—The public sales have gone off without animation. Test India steady. Barbadoes, by auction, 19s to 24s; other West India steady. West India steady. Barbadoes, by auction, 19s to 24s; other sorts, 18s to 22s. Crystalised Demerara as previously quoted, with a few very fine at 30s to 31s. 3,796 bags Egyptian part sold at 17s 6d to 20s 3d for low brown and yellow syrups. 267 baskets low brown native Penang withdrawn at 16s to 17s. Business in West India 1,981 casks, making 3,523 casks for the week. COFFEE.-367 half-bales mocha were chiefly taken in. A few lots sold at 100s 6d to 101s for mixed small berry. 1,335 bags Rio withdrawn. 357 bags Guatimala part sold at 87s to 93s 6d for fine ordinary to middling and 72s 6d to 79s for ordinary to fine ordinary

ordinary to middling, and 72s 6d to 79s for ordinary to fine ordinary palish.

Two cargoes of Rangoon at 9s 6d and 9s 71d; one Bassein RICE

at 98 41d for the continent. SALTPETER. 2,000 bags Bengal on the spot at 18s to 19s. 1,231 bags Bengal by auction were taken in; refraction, $7\frac{3}{2}$ to $4\frac{1}{2}$, at 186 6d to 19s per cwt.

JUTE.--7,000 bales sold for London at 121 7s 6d to 131, and several parcels for Dundee at previous quotations. METALS.--No change in these markets. 19,000 slabs Banca tin declared for sale by the Dutch Company on the 31st instant. OLLS.--254 casks low quality palm by auction all sold at 32l to 33l 15s. 250 casks 75 barrels Mauritius cocca-nut realised 40l to

417 58 TALLOW.--At the public sales 803 casks Australian went 6d to

1s dearer for mutton: fine, 39s 3d to 39s 6d. No alteration in other kinds. Fine beef quoted 37s 6d. 225 pipes 25 casks South American withdrawn at 38s 6d to 40s per cwt. No alteration in town tallow to-day.

ADDITIONAL NOTICES.

ADDITIONAL NOTICES. TEA.—The black leaf teas from Hankow have turned out very fine, and would have commanded 5d per lb more money if the pressure to sell had not been so great. Fine moning's have been sold at 1s 9d worth 2s 2d. The red leaf teas have been shipped so recklessly, and are so pressed by the money-lenders, that 10Å per lb has been the highest price obtained at the so-called "public auctions" for congous costing 5d to 6d per lb more money. The market is quite demoralised. GREEN Faurt.—Messrs Keeling and Hunt report, oranges are selling at moderate prices. Lemons of good quality rather higher in value. Less inquiry for nuts of all descriptions. The last cargoes West India pine-apples which have arrived being of better quality and size, have realised higher rates. FLAX.—The market remains in a quiet state. HEMP.—Not any change in the value of Russian. Manila is a little steadier, and holders are asking a little more money. SILK.—Little is doing, except in Shanghai silk, which is in better demand. Prices remain unchanged. TOBACCO.—There has been but little business done in American

SILK.—Little is doing, except in Suma better demand. Prices remain unchanged. TOBACCO.—There has been but little business done in American tobacco during the past week, there has even been an absence of small buyers in the market, and the result is that the total sales are extremely triffing. For export there has been no inquiry. LEATHER.—The trade in leather during the week has been dull, and at Leadenhall on Tuesday, a limited business was done. There was a small attendance of buyers, with very little disposition to make purchases for stocks. The supplies of fresh goods are

METALS.—Business has been very dull all the week, copper ruling steady but without life in any description. Iron continues un-changed. Tin has not varied materially, and the daily transac-tions have been very small. Lead is again a shade easier to buy. Spelter is somewhat firmer. Tin plates without change.

METROPOLITAN CATTLE MARKET. MONDAY, July S.—The total imports of foreign stock into the port of London last week amounted to 15,394 head. In the corresponding week of last year 15,042 were received; in 1876, 15,347; in 1875, 29,949; in 1874, 11,298; and in 1873, 16,414. The imports of American and Canadian cattle into Liverpool have again been upon a very large scale, the arrivals last week amounting to 3,045 head. 1,207 sheep were also landed, principally from the United States. States

The cattle trade on the whole has ruled quiet. Supplies were not excessive, but sufficient for requirements. As regards beasts the receipts of home fed stock were moderate. Norfolk is still sending freely, and further large receipts are expected from them, the yards being not yet anything like empty. The heavy importations of American cattle into Liverpool during the season have checked the demand for English stock from the North. From the Midland counties supplies were not large, and there is nothing from Scotland. Business throughout has ruled flat, and quotations have favoured Business throughout has ruled flat, and quotations have favoured purchasers. The best Scots and crosses have not made more than 5s 8d to 5s 10d per 81bs. From Norfolk, Suffolk, Essex, and Cambridgeshire we received about 1,000, and from the Midland and home counties about 850 head. On the foreign side of the market was a good show of beasts. There were about 700 American besides Spanish and Danish. The trade was quiet and quotations were weak. The sheep pens were moderately well filled. The trade was much in the same position, not active, but prices showing no particular movement. The best Downs and half-breds sold at 6s 4d to 6s 6d per 8 lbs. Lambs were quiet at 7s 6d to 8s 6d per 8 lbs. At Deptford were about 160 beasts and about 6,000 sheep and lambs. SUPPLIES ON SALE.
