Tobacco Stocks Report as of October 1, 1961

U. S. DEPARTMENT OF AGRICULTURE AGRICULTURAL MARKETING SERVICE TOBACCO DIVISION

The Tobacco Stocks and Standards Act provides for a quarterly report of tobacco stocks. These reports, based on information filed by manufacturers, dealers, and others, are prepared by the Tobacco Division of the Agricultural Marketing Service.

BRIEF CLASSIFICATION OF LEAF TOBACCO

(Covering classes and types)

CLASS 1, FLUE-CURED TYPES

Type 11: Old Belt flue-cured; produced in the Piedmont sections of Virginia and North Carolina.

Type 12: Eastern North Carolina flue-cured; produced in the coastal sections of North Carolina, north of the South River.

Type 13: South Carolina flue-cured; produced in the coastal sections of South Carolina and the south-eastern counties of North Carolina, south of the South River.

Type 14: Georgia and Florida flue-cured; produced in southern Georgia and northern Florida.

CLASS 2, FIRE-CURED TYPES

Type 21: Virginia fire-cured; produced in the Piedmont and mountain sections of Virginia.

Type 22: Tennessee-Kentucky fire-cured, eastern district, Clarksville, Springfield, and Hopkins-ville; produced in a section east of the Tennessee River, in southern Kentucky and northern Tennessee.

Type 23: Kentucky-Tennessee fire-cured, western district, Mayfield, and Murray; produced in a section between the Tennessee, Ohio, and Mississippi rivers in western Kentucky and northwestern Tennessee.

CLASS 3, AIR-CURED TYPES

LIGHT AIR-CURED (CLASS 3a)

Type 31: Burley; produced in Kentucky, Tennessee, Ohio, Indiana, West Virginia, Virginia, North Carolina, and Missouri.

Type 32: Southern Maryland; produced in five counties of southern Maryland--Prince Georges, Anne Arundel, Calvert, Charles, and St. Marys.

DARK AIR-CURED (CLASS 3b)

Type 35: One Sucker; produced in north-central Tennessee and south-central Kentucky.

Type 36: Green River; produced in the northern part of Kentucky in the territory adjacent to Owensboro and Henderson.

Type 37: Virginia sun-cured; produced in central Virginia, north of the James River.

CLASS 4, CIGAR-FILLER TYPES

Type 41: Pennsylvania Seedleaf; produced in Lancaster County, Pa., and the adjoining counties.

Type 42-44: Ohio filler; produced in the Miami Valley

section of Ohio and extending into Indiana.

Type 46: Puerto Rican sun-grown, including primed (Deshojado) and stalk-cut (Mata); produced on the Island of Puerto Rico.

CLASS 5, CIGAR-BINDER TYPES

Type 51: Connecticut Broadleaf; produced in the Connecticut Valley sections of Connecticut and Massachusetts.

Type 52: Connecticut Havana Seed; produced in the Connecticut and Housatonic Valley sections of Connecticut and Massachusetts.

Type 53: New York and Pennsylvania Havana Seed; produced in the Big Flats and Onondaga sections of New York, and extending into Pennsylvania.

Type 54: Southern Wisconsin; produced in Wisconsin, south and east of the Wisconsin River.

Type 55: Northern Wisconsin; produced in Wisconsin, north and west of the Wisconsin River, and in eastern Minnesota.

CLASS 6, CIGAR-WRAPPER TYPES

Type 61: Connecticut Shade; produced in the Connecticut Valley sections of Connecticut and Massachusetts.

Type 62: Georgia and Florida Shade; produced in southwestern Georgia and north-central Florida.

MISCELLANEOUS TYPES OF DOMESTIC TOBACCO

Type 72: Louisiana Perique.

Type 73: All domestic types of tobacco not otherwise classified.

Type 77: Domestic Aromatic.

FOREIGN TYPES

Type 81: Cuba (Havana).

Type 82: Sumatra and Java.

Type 83: Philippine Islands (Manila).

Type 84: All foreign-grown cigar-leaf not otherwise classified.

Type 90: Foreign-grown cigarette and smoking tobacco (Turkish and other).

STOCKS OF LEAF TOBACCO OWNED BY DEALERS AND MANUFACTURERS 1/2/
Total Inventory of Leaf Tobacco Slightly Higher Than A Year Ago

Leaf tobacco inventories in the United States and Puerto Rico totaled 4,537 million pounds (farm-sales-weight) as of October 1, 1961, on the basis of the quarterly stocks reports of dealers 2/ and manufacturers. This is an increase of 61 million pounds compared with a year earlier. Flue-cured stocks were higher because of a faster rate of marketing the 1961 crop compared with the previous year but stocks of burley leaf were down considerably compared with a year earlier. Tobacco growers marketed 965 million pounds during the third quarter (July-September, 1961), consisting mostly of flue-cured but including some Maryland and cigar leaf. During the corresponding period last year 853 million pounds were marketed by growers.

The marketing year for all kinds of tobacco except flue-cured and cigar wrapper is on an October-September basis (table 3). The indicated total disappearance (exports plus domestic consumption) during the 1960-61 marketing year for all U. S. grown types combined for their respective periods was 2,056 million pounds compared with 1,954 million during the previous year. Indicated domestic consumption of U. S. grown tobacco was 1,490 million pounds, the highest since 1953. In addition to the U. S. grown tobacco, approximately 172 million pounds (unstemmed equivalent) of imported tobacco was used by domestic manufacturers during the past year. In turn, the U. S. exported 567 million pounds during the 1961 marketing year (504 million during previous year).

Stocks as of October 1, 1961, included 665 million pounds (farm-sales-weight) of leaf tobacco under Government loans (707 million pounds as of October 1, 1960). These loan stocks were divided as follows: Flue-cured, 506 million pounds; burley, 88 million; Maryland, 3.5 million; fire-cured, 31.8 million; dark air-cured, 15.6 million; and cigar-leaf, 20.0 million.

^{1/} Figures quoted for type totals in this summary are the farm-sales-weight equivalent of reported stocks except foreign-grown leaf which is converted to an unstemmed equivalent basis only. (See tables in body of report for reported weight basis).

^{2/} All Government loan stocks are reported by Grower Cooperatives, which are considered dealers for stocks-reporting purposes.

CIGARETTE-LEAF STOCKS

Burley and Maryland Stocks Show Decreases

Stocks of <u>flue-cured</u> tobacco on October 1, 1961, were 2,584 million pounds compared with 2,469 million reported on hand a year ago. Marketing of the 1961 crop, currently estimated at 1,253 million pounds, began in July and sales by growers totaled 943 million pounds by the end of September. During the corresponding quarter last year 838 million pounds were sold.

Burley stocks of 1,127 million pounds represented a decrease of 64 million pounds compared with the previous October 1 (1,191 million). Bases on October 1 stocks, total disappearance of burley tobacco during the marketing year just ended (October 1960-September 1961) amounted to 549 million pounds compared with 535 million during the 1959-60 period. Indicated domestic consumption was 508 million pounds (up 9 million), and exports were 41 million (up 5 million).

Stocks of Maryland tobacco were 70.0 million pounds, a decrease of 0.9 million from holdings on the previous October 1 (70.9 million). Sales of the 1960 crop on the auction markets were completed in July, 1961. Disappearance of Maryland leaf during the 1960-61 marketing year was 33.7 million pounds, 1.5 million above the previous year. Domestic consumption amounted to 21.7 million pounds (20.4 million in 1959-60), and exports 12.0 million (11.9 million in 1959-60).

Foreign-grown cigarette and smoking tobacco stocks (Turkish and other) were 222.3 million pounds--somewhat above last October 1 (209.6 million).

DARK TOBACCO STOCKS

Fire-cured and Dark Air-cured Stocks Lower than on last October 1

Fire-cured tobacco stocks, reported as 113.7 million pounds, were considerably lower than a year ago (123.4 million). The decrease was largely in holdings of type 22, but stocks of type 21 also were lower. Fire-cured stocks on October 1, 1961, were divided by types as follows: Virginia fire-cured 20.9 million, Eastern District Kentucky and Tennessee fire-cured 74.0 million, and Western District 18.8 million. Disappearance of fire-cured tobacco during the 1960-61 marketing year totaled 55.1 million pounds compared with 51.5 million during the previous year. Exports of 27.2 million pounds were 3.2 million pounds higher than during the previous marketing year. Domestic consumption was 27.9 million compared with 27.5 million for 1960-61.

Dark air-cured tobacco stocks on this October 1 were 62.2 million pounds, a decrease of 4 million pounds compared with holdings a year earlier (66.2 million). Stocks of each type were lower than on the previous October 1. Inventories on this October 1 of One Sucker were 37.9 million pounds, Green River 19.3 million, and Virginia sun-cured 5.0 million. Disappearance of dark air-cured tobacco during the 1960-61 marketing year was 24.0 million pounds, about the same as the figure for the previous year. Exports were 5.0 million pounds--0.8 million less than for the year before, and domestic consumption was 19.0 million--up 0.9 million.

CIGAR LEAF STOCKS

Holdings of Domestic Cigar Leaf up slightly from a year ago Stocks of Foreign-grown Cigar Leaf larger

Cigar-leaf stocks of all domestic types including Puerto Rican totaled 285.4 million pounds (farm-sales-weight) on October 1, 1961--slightly above a year earlier (280.0 million). Stocks of foreign-grown cigar-leaf totaled 69.0 million pounds (unstemmed equivalent) compared with 62.9 million reported the previous October 1.

Overall stocks of the cigar-filler types of 175.7 million pounds were about 5 million above those on the previous October 1. The increase was accounted for by larger stocks of type 41. Pennsylvania Seedleaf stocks this October 1 were 114.9 million pounds, Ohio filler 17.6 million, and Puerto Rican filler 43.3 million. Disappearance of the filler types for the 1960-61 marketing year totaled 81.6 million pounds--considerably higher than for the previous year (80.8 million). Domestic consumption was 81.4 million and exports 0.2 million pounds.

Cigar-binder stocks were 80.0 million pounds on October 1, 1961--also unchanged from a year earlier. Holdings of types 54 and 55 increased, but stocks of the Connecticut binder types were down from October 1 a year ago. Connecticut Valley Broadleaf stocks this October 1 were 18.6 million pounds, Connecticut Valley Havana Seed 12.7 million, Southern Wisconsin 23.3 million, and Northern Wisconsin 25.4 million. Disappearance of the cigar-binder types totaled 29.1 million pounds during the 1960-61 marketing year (29.4 million in 1959-60). Exports were 2.1 million pounds, and domestic consumption 27.0 million--each about the same as during 1959-60.

Shade-grown cigar leaf stocks were 29.6 million pounds compared with 29.2 million a year ago. Holdings of type 61 were 18.1 million, and of type 62, 11.5 million.

Stocks of Cuban leaf (Havana) were reported at 39.0 million pounds—a decrease of 4.7 million from a year ago. Holdings of Philippine Islands (Manila) stocks at 14.0 million pounds were about 1.9 million higher than on last October 1. Stocks of Sumatra and Java leaf were 1.1 million pounds (0.5 million a year ago) and other foreign grown 14.0 million (6.7 million a year ago).

Stocks represented in Tobacco Sheet Show Increase

Stocks of leaf represented in inventories of "tobacco sheet" totaled 7.3 million pounds (reporting weight) compared with 6.0 million on the previous October 1. Of the total in "tobacco sheet" this October 1, 5.5 million pounds was for use in cigarettes and smoking tobacco, and 1.8 million for cigar binder including a small quantity for wrappers.

Totals include stocks of leaf reported in tobacco sheet. See separate reporting in tables 4 and 5.

Totals include stocks of leaf reported in tobacco sheet. See separate reporting in tables 4 and 5.

The instructions for reporting unstemmed cigarleaf of the domestic types require dealers and manufacturers to indicate the weight basis on which the tobacco is reported, namely farm-sales weight, marked weight, or sweated weight. The stocks are converted to the farm-sales-weight equivalent on the basis of the amount reported in these three categories. The conversion factors by types of tobacco for October 1, 1961 are as follows: Type 41, 104; Types 42-44, 111; Type 51, 104; Type 52, 104; Type 54, 105; Type 55, 104; Type 61, 109; Type 62, 111. October 1, 1961 figures subject to revision.

J For explanation of stocks included in this classification see footnote 5 on page 15.

Here of the instructions for reporting in tables 4 and 5.

^{1/} Annual disappearance for a type is calculated for the marketing year established for that type, the year beginning on the quarterly reporting date on which stocks of the type are at their lowest point and before the new crop enters stocks.

^{2/} The carry-over stocks have been tabulated separately according to broad groupings of ownership, namely manufacturers, under loan, and all other. "Other" reflects stocks reported by tobacco dealers and stocks held in the United States by representatives of foreign manufacturers. The quantities shown as owned by dealers may include some tobacco held by dealers which is earmarked for sale to domestic manufacturers or for export.

^{3/} Subject to revision.

^{4/} November 1 estimate, U. S. Crop Reporting Board.

Table 4.--Stocks of leaf tobacco, including leaf in tobacco sheet 1/, by types and, where applicable, by groups of grades, owned by dealers and manufacturers, October 1, 1961 compared with October 1, 1960, and July 1, 1961

Total

Type 31-V, Low Nicotine

^{1/} Represents leaf tobacco in stocks of reconstituted or processed wooded 2.

2/ Subject to revision.

3/ Summary according to groups of grades reflecting a broad quality breakdown of total cigar leaf stocks.

4/ Includes Puerto Rican on the Island, Type 46.

5/ Although Type 73 is defined as all domestic types of tobacco not otherwise classified, the bulk of the stocks reported in this type consists of cuttings, clippings, and trimmings. This is the reselt, in most instances, of the inability of reporters to designate cuttings, clippings, and trimmings in the "S" group of the types to which they properly belong.

6/ Does not include Sumatra and Java leaf held for sale in the Free Trade Zone.

Table 5.--Summary of tobacco leaf represented in inventories of tobacco sheet, for cigar binder and for cigarettes (including smoking tobacco), separately $\underline{1}$ /

 $[\]frac{1}{2}$ Total includes stocks of leaf reported in tobacco sheet. See separate reporting in tables 4 and 5. $\frac{2}{2}$ These statistics represent the quantity of leaf tobacco reported as owned by all leaf tobacco dealers, manufacturers,

quasi-manufacturers, growers' cooperative associations, warehousemen, brokers, holders, and owners subject to provisions of the Tobacco Stocks and Standards Act approved January 14, 1929, and the amendments thereto passed in the 72nd and 74th Congress. The quantities owned by dealers and manufacturers have been tabulated separately on a type total basis.

^{3/} This table should be considered as representing only the approximate quantities owned respectively by dealers and manufacturers. The quantities shown as owned by manufacturers include tobacco which is held under dealer registries of manufacturers and also tobacco held by dealers and known to be purchased on order for foreign or domestic manufacturers. The quantities shown as owned by dealers may include some tobacco held by dealers which is earmarked for sale to domestic manufacturers or for export. All Government loan stocks are included as dealer holdings.

4/ Includes stocks on the Island of Puerto Rico.

5/ For explanation of stocks included in this classification see footnote 5 on page 15.

Table 7.--Stocks of leaf tobacco owned by dealers and manufacturers, summary by types, October 1, 1961 compared with other quarters $\frac{1}{2}$ /
