# WYATT'S SPRING CATALOG for 1937

#### Our. Fifty-sixth Year of Service

It has been our custom during the past few years to place on this page a letter of greetings to our customers and friends, calling attention to price trends, new services, improved strains and such matters of general interest.

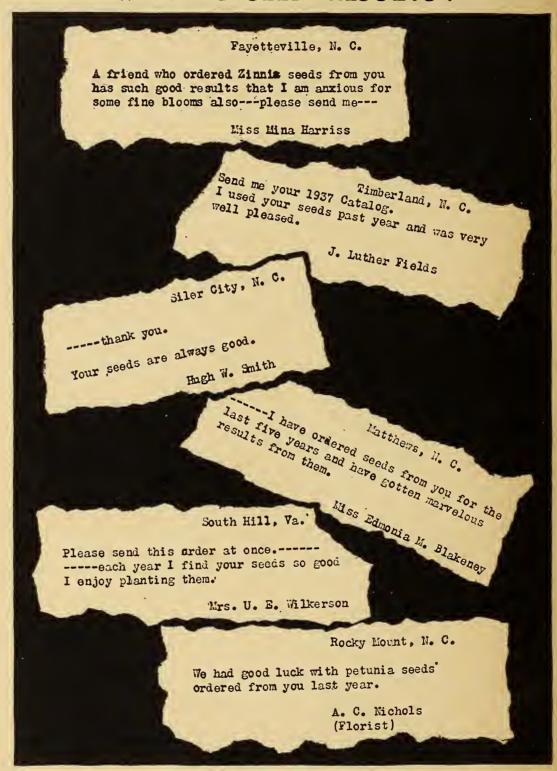

This year we point with pride, pardonable we hope, to many improved strains in vegetable, flower and field seeds offered at substantially REDUCED prices in many cases, in spite of generally advancing markets.

Instead of our usual letter, however, we felt that this year we would like to devote this page to the remarks of CUSTOMERS instead of our own. A few are printed here. We wish that we had space for more.

We are indeed grateful to our friends for their patronage during 1936, and are especially thankful to the many who found time to send along with their orders expressions of encouragement or commendation.

We wish you all a happy and prosperous 1937.

SEEDSMEN

RALEIGH

••

NORTH CAROLINA

The spirit of SERVICE predominates at WYATT'S and by service we mean more than the act of filling, packing and shipping your order—much more. WYATT'S SERVICE on your seed order begins 12 to 24 months before your order is received!

order is received!

In order that WYATT'S customers get the very best strains obtainable we contract with specialists to PLANT AND PRODUCE ESPECIALLY FOR SEEDS, each and every variety you get. This means that our service on your order had to be begun 2 years beforehand and that every WYATT customer has his order filled with seeds from every part of the world! The Turnip seeds on your order were grown especially for WYATT'S in England, the Carrot and

Beet seeds were produced for us in France, the Spinach grown under contract for us in Holland—and so on. Many of our best strains of vegetables and flowers are grown in this country—Muskmelons and Cucumbers in Colorado, Beans in Idaho, Flowers from California, Florida, Denmark, Germany and the best Cotton, Tobacco and Lespedeza seeds in the world are produced right here in North Carolina—and so we offer you not only best strains but seeds produced especially for your order under the most nearly perfect conditions. Before any seeds go out to you they're TESTED. We know that our customers get the very best seeds obtainable and that WYATT'S TESTED SEED SERVICE on every order is complete.

## HOW TO ORDER AND SAVE TIME and MONEY

We Pay Postage—On all vegetable seeds offered in this catalog by the packet, ounce, quarter pound, pound, two-pound, and five-pound quantities, we pay the postage to every state and guarantee safe-delivery to your home. Order your seeds by number.

YOU PAY POSTAGE—On Field Seeds, Poultry Supplies, Implements, Insecticides and Fertllizers, you pay postage, express or freight, except otherwise specified in this catalog.

CASH WITH ORDER—Customers will please remit when ordering. If goods are wanted C.O.D., 25 per cent, or one fourth of the amount, must accompany the order. No plants shipped C.O.D. No plants shipped to Florida.

HOW TO SEND MONEY—Remittances should be made by postoffice money order, express money order, drafts or checks. Whore it is not possible to obtain these, the letter should be registered.

STAMPS—We will accept stamps in good condition (one or three-cents stamps preferred) the same as cash, but we ask those remitting stamps to wrap them in oiled paper, if possible, to prevent their sticking together or to the order.

PRICES SUBJECT TO CHANGE—This catalog is printed in November and the market on many items of garden and field seeds has not yet been established. Consequently prices on those items indicate value at the time these pages are printed. Ordors will be filled, if at all possible—at prices printed in this book, but ALL PRICES ARE SUBJECT TO CHANGE WITHOUT NOTICE.

# BETTER SEEDS ...for...

#### RELIEF GARDENS

We will supply you carefully tested seeds on your relief orders. Just send the order given you by relief officer to Wyatt's.

We will accept relief orders for seeds, when issued by any State, County or City Relief Agency or Office, in exchange for vegetable sceds at prices named in this catalog. The Relief Orders you send in payment for seeds should state that it is for seeds only: must be on printed form of the Relief Office; must have written or printed on it the amount it is good for in dollars and cents and be signed by the authorized Relief Agent. The printed form should show that it is issued by state, county or city relief office and signed by the authorized relief officer and should also be signed by the person ordering the seed in the place for signing for receipt of the seeds. Seeds selected must be vegetable secds only and no quantity larger than one pound of any one variety will be supplied on these orders.

Non-Warranty — Owing to the many control which might affect the germination and crop, and in accordance with the universal custom of the seed trade, Job P. Wyatt & Sons Co., gives no warranty, express or implied, as to description, quality, productiveness or any other matter, of seeds, bulbs or plants it sends out, and will not be in any way responsible for the crop. If the purchaser does not accept the goods on these terms they are at once to be returned. This does not mean that we lack confidence in the seeds we sell, but we have no control over the seeds after they leave our possession, especially as to methods of planting, cultivating and fertilizing, all of which are important factors in the success of any crop. Crops are dependent for success or failure on so many things besides seed that it is impossible for us to give any warranty or guarantee.

#### PLANT ORDERS

All orders for plants, such as Cabbage, Beets, Lettuce, Onions, Strawberry, Asparagus and Rhubarb Roots, also Baby Chicks, are shipped from our Grower's station and entirely separate from seeds and bulb orders. If you order seeds and also plants you will receive the seeds by return mail and the plants will be forwarded to you separately within a few days, weather permitting.

#### 56 YEARS EXPERIENCE

For over a half a century the Job P. Wyatt & Sons Company has served thousands of friends and customers throughout the entire Sonth. Fifty-six years of service means more than mere proof of our ability to serve—it means that we have had 56 years of experience in solecting strains and varietles best adapted to the conditions of the South. This year we offer again seeds that are the Standard of Quality and varieties that represent the very latest improvements.

#### MARKET GARDENERS Write for Quantity Prices

Write for Quantity Prices

Market Gardeners and Farmers Coöperative Associations should write us for our prices on quality lots of Beans or other seeds. We can usually save money for those who buy in quantity lots so be sure to write ns.

Bean Culture—Beans are sensitive to both cold and wet, so do not plant till the ground is warm. To have a continnous supply plant every two weeks till the middle of Angnst; farther South they may be planted even later. Make the rows 2 to 3 feet apart, drop the beans 8 inches apart and cover 1½ to 2 inches deep. Give frequent but shallow cultivation up to blossoming time, not afterward and never when the plants are wet. Plant in a light loamy soil that warms up quickly. One pound plants 60 feet; 75 lbs. will plant an acre. Wyatt's Garden Beans are produced from the finest stock seed and are grown in the mountain states of the West. They are disease-free. Protect your crop with Red Arrow. Prices: 1 oz. 35c; 4 ozs. \$1.00; 1 pt. \$2.50, postpaid.

Culture—The ground should be well manured and prepared before either the roots or seeds are planted. Plant the seed in early spring; soak overnight in water; plant in rows, or rather hills, 1 foot apart and 2 feet between or 3 feet between or 3 feet between or 3 feet between in tween, or 3 feet between it to be cultivated with a plow; put from 4 to 5 seeds in each hill; when well up, thin out to 2 plants.

HAND PICKED—IDAHO GROWN—Plant successively every two weeks from April until August

BUSH

No. 17—Bountiful—This variety is the Florida truckers for shipment to northern markets. It has steadily gained in popularity on account of its prolific bearing qualities. Bountiful is practically rust and mildew proof, very hardy, extremely early and bears continuously for many weeks. The pods are large, rich green in color, and almost flat and straight, as you will notice by the illustration on this page. They are uniform in shape, solid, meaty, tender and delicious. Wyatt's stock of this splendid variety is preferred by the leading truckers. 45 days. Prices: Pkt. 10c; ½ 1b. 20c; 1b. 30c; 2 lbs. 45c; 5 lbs. 95c, postpaid. Not prepaid, 15 lbs. (peck) \$2.10; 60 lbs. (bu.) \$7.75; 100 lbs. or more at 12c lb.

No. 18 — Burpee's Stringless

Green Pod—Our stock of this bean is gardeners, truckers and the canning factories. It is unquestionably one of the finest round-podded stringless green beans in existence. The large green pods are very fleshy, five to six inches long and remain crisp and tender longer than other varieties. Burpee's Stringless is very early and productive. The beans are handsome in appearance and sell readily at local markets, besides bring top prices when shipped. The pods are absolutely stringless, tender, brittle, round and delicately flavored. We sell thousands of bushels of this wonderful bean every year. 48 days. Prices: Pkt. 10c; ½ lb. 20c; lb. 30c; 2 lbs. 45c; 5 lbs. 90c, postpaid. Not prepaid, 15 lbs. (peck) \$1.95; 60 lbs. (bu.) \$7.25; 100 lbs. or more at 11c lb.

#### No. 19—Full-Measure Beans—

The Full-Measure is rather a new variety as compared to many others, but the demand for it is growing each season. It has light green, straight, round pods—so round they have creased backs, are about six inches long, very fleshy and of very fine quality. Perfectly stringless and so tender they snap off easily when bent. They come into bearing early, are productive and last a long time. We can highly recommend this new stringless bean, as wherever grown it has proved a real success. Wyatt's stock of this variety is the finest obtainable and will please the most critical growers. 52 days. Prices: Pkt. 10c; ½ lb. 20c; lb. 30c; 2 lbs. 45c; 5 lbs. 90c, postpaid. Not prepaid, 15 lbs. (peck) \$1.95; 60 lbs. (bu.) \$7.25; 100 lbs or more at 11c lb.

16 — Black Valentine -

An old favorite which will now be replaced in most sections by the New Stringless Black Valentine listed below. The pods are dark green and about 6 inches long and not stringless. 45 days. Prices: Pkt. 10c; ½ lb. 20c; lb. 30c; 2 lbs. 45c; 5 lbs. 95c, postpaid. Not prepaid, 15 lbs. (peck) \$2.10; 60 lbs. (bu.) \$7.75; 100 lbs. or more at 12½c lb.

No. 59—Prolific White Navy Beans—The finest for shelling purposes.
The plants grow 16 to 20 inches high and are well set with medium sized pods that stay on the plants without shattering or rotting until the whole crop is ready to gather. 90 days. Prices: Pkt. 10c; ½ lb. 15c; lb. 25c; 2 lbs. 40c; 5 lbs. \$1.00, postpaid.

### BROCCOLI AND BRUSSELS SPROUTS

CULTURE—Sprouting or heading varieties are cultivated the same as cabbage or cauliflower and ½ lb. of seeds are required per acre. The Salad Broccoli is cultivated like turnips and 1 ounce of seeds will drill 100 ft.; 2 lbs. of seed per acre.

Brussels Sprouts No. 148

No. 141—Italian Green Sprouting—It is quite diswhite heading hroccoli. The plants are rapid growing and produce a large head at center of plant in about 90 days from date of planting. The head is a compact cluster of tightly closed flower huds and resembles cauliflower only in shape. When the central head is cut, numerous sprouts develop from the leaf axes, each sprout terminating in small green separate heads. These are cut in lengths of 10 to 12 inches and tied in hunches of 2 or 3 for a second crop. Served in the same way as asparagus, they form a very tasty and nourishing dish. 90 days. Prices: Pkt. 10c; 1 oz. 25c; 1/4 lb. 75c; lb. \$2.75; 5 lbs. \$12.50, postpaid.

No. 143—Broccoli Salad—This variety has become very popular in the eastern part of North Carolina. It is planted in the fall, and in growth somewhat resembles the Seven Top Turnip. In the spring it sends up sprouts, which are cut and hunched for market. Try some without fail; it is a good yielder and of excellent quality. Prices: Pkt. 5c; oz. 10c; 1/4 lb. 25c; lb. 75c; 5 lbs. \$3.00, postpaid.

No. 142—Early White Cape—The heads are white, compact and easily grown sort. 140 days. Prices: Pkt, 10c; oz. 35c; 1/4 lb. \$1.25; lb. \$4.00,

#### BRUSSELS SPROUTS

One ounce will produce 3.000 plants

CULTURE—A delicious vegetable that affords fresh green sprouts in the Fall and Winter when nothing else is available. Cultivate like cabbage. Pick the sprouts from the stem when large enough and prepare like cabbage or cauliflower. The sprouts are of better quality when frozen and may be left out until December 1 or later.

No. 148—Half-Dwarf Perfection—Plants grow 18 inches to 3 feet high, sprouts of large size and good quality. 100 days. Prices: Pkt. 10c; oz. 20c; 1/4 lb. 60c; lb. \$2.00, postpaid.

#### WYATT'S CABBAGE SEEDS

Days indicated represent time from setting plants to heading

CULTURE—If the plants are started in a seed-bed, they should not be crowded or they will run up weak and slender and will not endure transplanting well. When 4 to 6 inches high, transplant to open field, setting the plants as deep as the first leaf stems; give frequent and deep cultivation, drawing the earth to the plants at each working. Set the early varieties 18 inches apart in rows 2½ feet; the larger and later sorts, 2 feet apart in 3-foot rows. They need a light and well watered soil, rich in nitrogen. One ounce will produce about 1,500 plants; ½ lb. will produce sufficient plants to set an acre. Thousands of successful growers depend on Wyatt's Tested Cabbage Seed. Be sure to plant the best seed from Wyatt's.

No. 151—Early Jersey Wakefield—A very popular variety market gardeners. It is the earliest of all varieties and is plauted by the large growers for shipment to northern markets. The heads are pointed, of medium size, uniform and with few outer leaves. The quality is excellent. The universal popularity demands that more than ordinary attention be given to the selection of plants for breeding purposes, having in mind earliness, sureness to head, solidity and uniformity of growth and maturity. In Wyatt's Early Jersey Wakefield this careful selection has been critical and continued through many years and we are confident no finer stock can be obtained at any price. Every year we sell thousands of pounds of this variety. Plant Wyatt's strain and avoid disappointment. 63 days. Prices: Pkt. 5c; oz. 20c; ½ lb. 60c; lb. \$2.00; 2 lbs. \$3.75; 5 lbs. \$9.00; 10 lbs. \$17.50, postpaid.

No. 152 — Charleston Large Wakefield—Our stock is the improved Long Island strain. It matures about ten days later than Early Jersey Wakefield. The heads are blunt pointed but broad at the base and fully one-half larger than the Jersey Wakefield. It is a favorite with shippers on account of its hardiness, earliness and size of head. 73 days. Prices: Pkt. 5c; oz. 25c; ½ 1b. 75c; 1b. \$2.50; 5 lbs. \$11.50; 10 lbs. \$22.50, postpaid.

No. 166—Wyatt's New Southern Success—This new cabbage is the product of over ten years selection and breeding work and we feel confident it will prove a leading variety for home and market gardeners. It matures a little before All Head Early, so we class it as an early variety and in appearance it resembles Copenhagan Market but tests show it yields a much larger tonnage per acre than either All Head or Copenhagen Market. The stem is short and the plant compact which make an excellent market appearance. The heads are round, uniform in shape and very solid and they stand much longer time without cracking than any other variety. Be sure to give Wyatt's new 'Southern Success' Cabbage a trial this year. 80 days. Prices: Pkt. 10c; ½ 0z. 25c; oz. 40c; ½ lb. \$1.50; lb. \$5.00, postpaid.

in most sectious of the South, as it resists heat
well. 75 dsys. Prices: Pkt. 5c; oz. 15c; 1/4
lb. 50c; lb. \$1.75; 5 lbs. \$7.00, postpaid.

No. 159 — Henderson's Succession—deners and a general favorite. One of the surest headers among the midseason varieties producing solid heads of the very finest quality. Recommended for medium early, midsummer or for late planting, as it also keeps well for winter use. Wyatt's strain is the genuine pedigreed stock. 88 days. Prices: Pkt. 5c; oz 15c; ½ 1b. 50c; lb. \$1.75; 5 lbs. \$6.75; 10 lbs. \$12.00, postpaid.

No. 170—Drumhead Savoy—This variety is gaining in popularity of recent years and should be planted in every garden. It has an exceptionally fine flavor and is sweet and tender. It is a winter variety and should not be planted until July. The leaves are savoyed or somewhat crumpled. 85 days. Prices: Pkt. 5c; oz. 20c; ½ 1b. 60c; 1b. \$2.00, postpaid.

No. 157 — Early Summer—A second early variety forms large flat round, solid heads weighing 8 to 10 lbs. Matures sbout 10 days after Early Jersey Wakefield and we consider it an excellent second early cabbage. 80 days. Prices: Pkt. 5c; oz. 15c; 1/4 lb. 40c; lb. \$1.25; 5 lbs. \$5.00, postpaid.

No. 156—Danish Ballhead—Also called Hollander Short Stem. Planted for a late or winter variety, as it is very hardy. The heads are round, solid and of good quality. 110 days. Prices: Pkt. 10c; oz. 25c; 1/4 lb. 70c; lb. \$2.25; 5 lbs. \$8.00, postpaid.

#### No. 154 — Copenhagen Market —

The large round heads average 8 lbs. in weight. They are very solid and have a small core. The plants are short stemmed, the heads being produced almost on the surface of the ground. A most productive variety, attractive and always tightly folded. 75 days. Prices: Pkt. 10c; oz. 20c; ½ lb. 60c; lb. \$2.00; 5 lbs. \$8.50, postpaid.

No. 161—All Seasons—A valuable second or medium early variety and a reliable header. It resists heat and drought well. A round headed variety. 85 days. Prices: Pkt. 5c; oz. 15c; ½ 1b. 45c; lb. \$1.50; 5 lbs. \$6.75, postpaid.

No. 162—Large Late Drumhead—A popular Winter cabbage producing large, deep and solid heads. It is a sure header and a good keeper. 110 days. Prices: Pkt. 5c; oz. 15c; ½ 1b. 50c; lb. \$1.75; 5 lbs. \$7.00, postpaid.

#### WYATT'S CARROTS

#### ONE OF THE MOST WHOLESOME VEGETABLES CULTIVATED - AND A SURE CROP

CULTURE—One ounce of seed for 100 feet drill, 3 to 4 pounds per acre. For several generations the carrot has been one of the common garden vegetables but only in recent years has it come to be recognized as one of our most nutritious and wholesome foods. Health authorities assert that carrots contain in high degree those elements which constitute a nourishing article of diet. The plant has no serious insect enemies and is rarely subject to disease. The culture of carrots is easy, being practically the same as that of beets. When practicable it is best to plant them in soil that has been richly fertilized the previous season. Freshly manured soil will often produce divided roots. Plant the seed ½ inch deep in loose, well prepared soil, making rows 16 to 24 inches apart. Cultivate as soon as the plants are well established and thin to 2 to 4 inches in the row, according to the size of the variety. Plantings may be made from early spring until mid-June and again in the early fall.

No. 183—Chantenay—A half-long variety most extensively used medium early variety and matners in about 65 days, besides it is very productive. The roots are smooth, uniform and blunt. The roots grow 5½ inches long and are a deep golden orange color, making an attractive appearance. Wyntt's stock is extra select and is planted by many of the leading growers. 65 days. Prices: Pkt. 5c; oz. 10c; ½ 1b. 25c; 1b. 75c; 5 lbs. \$3.00; 10 lbs. \$5.40, postpaid.

No. 184—New Red Cored Chantenay—This new variety is a over the old type as it is quite free from the ordinary yellow core found in most carrots. It is a medium early variety, half-long, smooth, blunt-rooted sort. The color is deep orange and the flavor is delicious. 68 days. Prices: Pkt. 5c; oz. 10c; 1/4 lb. 25c; lb. 75c; 5 lbs. \$3.00, postpaid.

No. 185—Danvers Half-Long—This fine half-long variety commands approval wherever planted. It has a handsome orange red color and the smooth roots taper to a blunt point. It is principally grown for a late main crop and produces a very high yield per acre. The roots average 6 inches long. 68 days. Prices: Pkt. 5c; oz. 10c; 1/4 lb. 25c; lb. 75c; 5 lbs. \$2.90, postpaid.

No. 188—Scarlet Nantes Coreless—A very superior early of the delicate texture of the roots has been named "Coreless." They are very uniform in shape and size, 6 to 7 inches long, by 1 4 inches through; clean skinned, smooth and the color is a rich red orange, so attractive when served. 65 days. Prices: Pkt. 5c; oz. 10c; ½ 1b. 25c; 1b. 90c; 5 lbs. \$3.75, postpaid.

No. 186—Long Orange—A fine variety for light soils as the roots straight line to the tip. The flesh is deep orange and this variety is considered the heaviest cropper of all carrots. It can be used for home use and is also a splendid variety for stock freding. 80 days. Prices: Pkt. 5c; oz. 10c; 1/4 1b. 25c; 1b. 75c; 5 lbs. \$3.00; 10 lbs. \$5.40, postpaid.

No. 181—Oxheort—Desirable for stiff soils as the roots are short, usually measuring 4 to 5 inches long. The flesh is tender and sweet. 62 days. Prices: Pkt. 5c; oz. 10c; ½ lb. 25c; lb. 75c; 5 lbs. \$3.00, postpaid.

CULTURE—Cauliflower will do well in any land that is suitable for cabbage, and in general the same cultural directions apply as for cabbage. Plenty of moisture is necessary for their development, especially at heading time. Sow seed in hotbed in November, transplant into cold frame for protection during the winter, and set out in the fields early in April, in rows 2 to 2½ feet apart, and 18 to 24 inches spart in the row. For late crop, sow seed about the 15th of April, transplanting when placts are large enough. Cultivate like cabbage. When the head commences to form, draw the outside leaves over the to form, draw the outside leaves over the head to protect from the sunlight, thus keeping It white.

#### WYATT'S ROASTING EAR AND SUGAR

One pound will plant about 200 hills;
12 pounds will plant an acre
CULTURE—Plant 5 or 6 grains, 1½ inches deep, 3 feet apart in rows 3 feet apart. When plants are 4 inches high pull out all but two plants to the hill. For very early Corn, the hardiest and earliest varieties can be planted the latter part of March if the weather is mild, but Sweet Corn should not be planted until April, or until the Spring weather opens and the ground gets warm, as it has a tendency to rot in the ground if planted too early or during a continued cold or rainy spell of weather. It should be planted at intervals of every two weeks until August, so as to have Corn for use during the entire season.

Black Beauty Egg Plant No. 314

#### EGGPLANT

CULTURE—One of the most delicious vegetables grown, yet it is not cultivated to the extent it would be if its superior qualities were hetter known. Seed germinates slowly and should be started in hot-heds. When plants have two rough leaves transplant 3 to 4 inches apart. When the weather is sufficiently warm, set plants in open ground, allowing 3 feet space between rows, and 2½ feet space between the plants in the row. Hoe frequently, keeping the soil loose and fine. Earlier plantings may be made in open ground if protected by Hotkaps. One ounce will produce 1,000 plants; 1, 1b, will sow an acro.

No. 314—Black Beauty—The earliest and best of all large-fruited Egg plants. It is valuable alike to the private planter and the extensive grower for market. Black Beauty produces fruits fully as large and ready for use ten days to two weeks earlier than the New York Purple. The plants branch very freely neur the ground and grow in well rounded bushes. The grand, large fruits are thick, of most attractive form. The skin is a rich, lustrous, purplish, black—the satin gloss and rich coloring adding greatly to its beauty. The intensely brilliant coloring is uniform over the whole fruit and does not fade or change to a lighter color. 120 days. Prices; Pkt. 10c; ½ oz. 15c; oz. 25c; ½ lb. 85c; lb. \$3.00; 5 lbs. \$12.50, postpaid.

White Vienna Kohl Rabl No. 353

#### KOHL RABI—A DELICIOUS VEGETABLE

CULTURE—1 ounce is sufficient for 100 feet of drill. For an acre 1½ pounds. Sow ½ an inch deep from April to July, at intervals of 4 weeks, as the bulbs are best when gathered young and tender, which is usually when they are 2 or 3 inches in diameter. The rows are usually made 18 inches apart, and the plants are thinned from 6 to 10 inches, the thinnings being transplanted if wanted. Work well to keep down weeds, but avoid throwing any earth in the crown.

No. 353—Earliest White Vienna—Extremely early with distinctly small tops, but of sufficient size for easy bunching. The bulbs are of medium size, very light green or nearly white; of hest quality for table if used when 2 to 2½ inches in diameter. 60 days. Prices: Pkt. 10c; oz. 15c; ¼ lb. 45c; lb. \$1.50, postpaid.

#### WYATT'S COLORADO GROWN CANTALOUPES

CULTURE—The Melon delights in warm rich soil with perfect drainage, and can never be grown to perfection under unfavorable conditions. Very good Melons, however, can be grown on almost any land if the trouble is taken to dig holes 2 feet square, filling them with a rich compost of woods-mould and cow-pen manure. Plant three-fourths to one inch deep from April to June in rows 6 feet apart, leaving not less than 4 feet between the hills, putting about

10 seeds to the hill. As insects are often very destructive, it is best not to thin at all until the plants are well started. When they are large enough to be safe, thin to two in a hill, and keep the ground mellow and free from weeds. Those who make a specialty of Muskmelons will find it advantageous to start the seed under protection of glass, so as to have the plants ready by the time seeds could be usually planted in the open ground.

#### No. 425—Wyatt's New "Gold Dollar" Cantaloupe—

Without a doubt this is the finest Orange-flesh cantaloupe ever introduced and an early market type. A wonderful sweet and juicy variety with a delicious spicy flavor. #### WYATT'S OKRA

CULTURE—A highly esteemed vegetable in the South and no garden, small or large, is complete without it. It is used in making "Gumbo." It is also hoiled in salt and water and served with vinegar as a salad. Should not be planted before the ground is warm in spring, as the seeds are apt to rot. Sow in drills, which ought to be 2 to 3 feet apart, and when up, thin out and leave one or two plants every 12 or 15 inches.

No. 495—Kleckley's Favorite—Rapidly becoming the most popular of all Okras. Plants of dwarf habit producing short, thick pods of unusual tenderness in great profusion. This variety commands a premium price on all markets where it is offered. 60 days. Prices: Pkt. 5c; oz. 10c; 1/4 lb. 20c; lb. 50c; 5 lbs. \$2.25, postpaid.

No. 493 — Perkins Mammoth Long Pod — The best for market or shipping purposes and the finest of the green podded sorts. It is ready for use in about 50 days after planting and is very productive. #### WYATT'S PEPPERS

One Ounce of Seed Produces About 1,000 Plants

CULTURE—Sow the seed in hotbed or a window box at a temperature of about 70 degrees on or about February 15. Transplant to the open ground when all danger of frost is over, in rows 3 to 5 feet apart and plants set 15 to 20 inches apart in the row—about 9,000 plants are required to set an acre. Cultivate frequently and keep free from weeds. A mixture of sheep manure and chicken manure is most desirable for distributing in the rows a week or ten days before the plant is set out. When the plants are well set and started at about 7 inches high, guano or any well-rooted manure hoed into the surface soil will also increase plant growth and fruiting qualities. We are large growers of Pepper seed. Can supply large orders. The seed is grown from well selected and transplanted plants which show purity and excellent quality. All our Pepper seed are true American grown—we have no cheap pulp mill or imported stocks to offer.

#### No. 601—Wyatt's Worldbeater

The name of this Pepper gives you an idea of how good it really is. It is a new introduction, combining the long form and earliness of the Ruby King and the large size of the Chinese Giant. It is exceedingly productive, a good shipper, and one of the most attractive Peppers on the market. The peppers are 4-lohed, 5 inches long and 3½ inches in diameter. Its color is first a dark green, changing to a very brilliant scarlet when ripe. It is not unusual to pick 15 to 25 fine Peppers from a single plant. Because of its thick flesh it makes an excellent shipper and we want all of our customers to try at least a small quantity of it this season. 110 days. Prices: Pkt. 5c; ½ oz. 15c; 1 oz. 25c; ¼ lb. 75c; lb. \$2.25; 5 lbs. \$10.00, postpaid.

No. 592—Wyatt's California Wonder— Here's a new Pepper of real wonder— Merit. It's nearly as large as, and earlier than Chinese Giant, hut is blocky or square-ended, just the shape you've been looking for. It will sit npright and is ideal to stuff and bake, or to serve whole with salad. Its walls are exceptionally thick, heavier and firmer than any other sort, and the flesh is deliciously sweet and spicy, with no bite to it. Some specimens in our trials measured 4½ inches across and 5 Inches long, and weighed 1½ pounds. The bright, attractive green changes to a hrilliant light crimson. 112 days. Prices: Pkt. 10c; ½ oz. 20c; oz. 35c; ¼ lb. \$1.25; lb. \$4.25; 5 lbs. \$18.75, postpaid.

#### No. 593-Bell or Bull Nose-

The plants are very vigorous and sturdy. The fruits are about 3 inches long, 2 inches in diameter and blunt-ended. Very productive. 100 days. Prices: Pkt. 5c; oz. 25c; 1/4 lb. 75c; lb. \$2.25; 5 lbs. \$10.00, postpaid.

#### No. 591 — Chinese Giant -

One of the best large, mild, red varieties. The plant has a short, stocky growth, and the fruits are thick, blocky, 4 to 5 inches in diameter, and of equal length. The color is a brilliant shiny scarlet. Makes an excellent mango for stuffing. 110 days. Prices: Pkt. 10c; ½ oz. 25c; oz. 40c; ¼ lb. \$1.25; lb. \$4.50, postpaid.

No. 595—Pimento—A small heart shaped variety. The fruits are medium size,  $3\frac{1}{2}$  inches long and  $2\frac{1}{2}$  inches in diameter. 105 days. Prices: Pkt, 5c; oz. 25c;  $\frac{1}{4}$  lb. 75c; lb. \$2.50, post-

No. 598—Ruby Giant— An old popular variety but we recommend the Wyatt's World Beater as superior, 110 days. Prices: Pkt. 5c; oz. 25c; 1/4 lb. 75c; lb. \$2.25; 5 lbs. \$10.00, postpaid.

No. 599—Ruby King—fruits are to 6 inches long and 3 to 4 inches thick, tapering, and of a bright ruby-red color. 105 days. Prices: Pkt. 5c; oz. 25c; 1/4 lb. 75c; lb. \$2.25; 5 lbs. \$10.00, postpaid.

No. 502, Wyatt's California Wonder

#### HOT PEPPERS

No. 605—Anaheim Chili—Fruit five to six inchos long by one luch thick at the stem, tapering to a point; color brilliant scarlet and flesh red hot. 112 days. Prices: Pkt. 10c; ½ oz. 20c; oz. 35c; ¼ lb. \$1.25; lb. \$4.25, postpaid.

No. 604—Red Chili—The frults measure 2 and are one-fourth inch thick. Early and enormously

productive, 112 days. Prices: Pkt. 10c;  $\frac{1}{2}$  oz. 20c; oz. 35c;  $\frac{1}{4}$  lb. 95c; lb. \$3.25, postpaid.

No. 594 — Long Red Cayenne — This is the true Cayenne Pepper. The fruits are narrow, about one-fourth inch thick and 3 inches long. 115 days. Prices: Pkt. 5c; oz. 30c; 1/4 lb. 80c; lb. 88.00, postpaid.

PEPPER PLANTS-See page 25.

#### PARSLEY

One Ounce for 150 Feet of Drill

CULTURE—Can he sown during the fall from August to October, and during spring from the end of January to the end of April. It is generally sown broadcast. Soak the seed for twenty four hours and mix with sand; it is very slow to germinate and sometimes remains in the ground from four to five weeks before making its appearance.

are short, thick and in appearance like a parsnip, although smuller. Flesh is white, a little dry and flavored somewhat like parsnips. Prices: Pkt. 10c; oz. 15c; 1/4 lb. 35c; lb. \$1.25, postpaid.

No. 543 — Hamburg or Parsnip-

Rooted—This variety is grown for the mature early,

#### No. 541—Wyatt's Double-Curled—

Plants of dwarf compact growth, and the young leaves have the edges heavily crimped, giving a general appearance of coarse moss. Used by market gardeners. Prices: Pkt. 5c; oz. 10c; 1/4 lb. 25c; lb. 75c; 5 lbs. \$3.00, postpaid.

No. 540—Plain or Single—Prices: Pkt. 5c; oz. 10c; 1/4 lb. 25c; lb. 750; lbs. \$3.00, postpaid.

No. 542—Champion Moss-Curled—Sixty-five days to cutting. Espe-gardeners, as it stands the winter well; is of strong growth, beautifully curled Prices: Pkt. 5c; oz. 10c; 1/4 lb. 25c; lb. 75c; 5 lbs. \$3.00, postpaid.

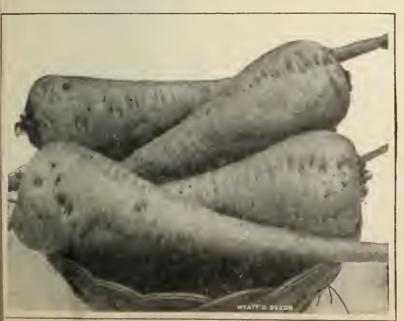

#### WYATT'S PARSNIPS

CULTURE—1 ounce is enough for 100 feet of drill; 4 to 6 pounds will now an acre. Sow very thickly from March to August 14 of an inch deep in drilla 18 inches apart in deep, rich, sandy loam, which has been well manured for a previous crop. When the plants are 2 to 3 inches high, thin out from 4 to 6 inches apart and cultivate frequently to keep down weeds. The roots, which are excellent for stock as well as for the table, are much improved in flavor by being left in the ground during the winter. As the seeds do not germinate well in het weather, sowing should he done as early as possible.

## BARI-CIDE

Will Not Injure the Foliage of Crops on which we recommend its use.

#### For That Reason

We are able to recommend the application of high concentrations of our material. For dry dusting it is not necessary to dilute with any inert ingredient.

#### Fewer Applications Are Necessary

Other insecticides which are liable to burn the foliage, must be applied at such low strengths as to require more frequent applications.

#### **BARI-CIDE** is Economical

The cost per pound is surprisingly low. The marked saving in labor (application) costs must not be overlooked, and the fact that it WILL NOT BURN THE FOLIAGE merits the most favorable consideration.

	Retail Price
	per pkg.

ou los. (Single Dags)	0.29

BARI-CIDE is recommended for use against such leaf eating insects as the MEXICAN BEAN BEETLE, the CUCUMBER BEETLE (melon bug) and the POTATO BUG. It is absolutely harmless to bean foliage or that of other plants on which its use is indicated. It contains neither lead, arsenic nor fluorine, depending for its success upon the toxicity of barium carbonate, with which is compounded certain other ingredients.

BARI-CIDE is a stomach poison. Unlike "contact" poisons it need not be applied directly on the insect. In the early stages of a plant's growth the foliage should be given a "coating" of BARI-CIDE. The effectiveness of such a coating will continue for several days under usual weather conditions, during which time an insect will get a lethal dose should it attack the plant.

MOST LEAF EATING INSECTS FEED FROM THE UNDERSIDE OF THE FOLIAGE. THE NECESSITY OF APPLYING BARI-CIDE TO BOTH SIDES OF THE LEAF IS THEREFORE APPARENT.

WET SPRAY APPLICATION: This is the most effective method. Add BARI-CIDE to water in the proportion of one half pound per gallon. Stir it thoroughly to bring the fine particles into complete suspension. Apply to both sides of the foliage, using a pressure type sprayer (or for small crops a continuous type of hand sprayer) equipped with an under-leaf nozzle. Satisfactory results can be obtained on small gardens by the use of a whisk broom dipped into the mixture of BARI-CIDE and water and from which the BARI-CIDE is "flipped" onto the plant.

DRY DUST APPLICATION: Where water is not conveniently available, or where it is preferred

to use the material as a dust, it should be applied while the foliage is damp (either early in the morning or after a rain) and when there is a minimum of wind. Most of the hand type and rotary dust guns are suited to the application of BARI-CIDE, but it must be remembered to get the material under the leaves. It is not necessary to dilute BARI-CIDE with any inert ingredient. Its cost per pound is low enough to apply full strength and even when so applied it will not harm the crops on which we recommend its use.

BARI-CIDE on a plant has the appearance of "whitewash". Any residue on vegetables when harvested is easily detected. Thorough washing will remove it. BARI-CIDE IS LESS POISONOUS TO HUMAN LIFE THAN MANY OTHER INSECTICIDES, but as a measure of safety, washing is recommended.

#### THE ADVANTAGES OF BARI-CIDE

It contains neither lead, arsenic nor fluorine.

It is harmless to the foliage of beans and other crops on which its use is recommended.

It is not detrimental to the soil, but under certain conditions is actually beneficial.

It can be applied liberally enough to afford protection over a period of time, thus reducing the number of applications, as compared to many other products.

It does not deteriorate with agc or lose its efficiency through decomposition.

#### BARI-CIDE AS A RAT POISON

Being tastcless and odorless, BARI-CIDE may be mixed with various baits, such as ground meat scraps, overripe fruits, peanut meal, etc. The poisoned bait is then placed where the rats run. Keep such baits away from domestic animals.

#### Read What They Say About BARI-CIDE

We were more than pleased with the result of handling BARI-CIDE as it seems to give perfect satisfaction. Wherever customers use it in a neighborhood it is sure to spread to other customers.

W. H. SMITH HARDWARE CO., Parkersburg, W. Va.

We have had a nice increase each year we have handled BARI-CIDE. This of course was possible only because it proved to be a very satisfactory product and we have had no complaints whatsoever.

FARM BUREAU CO-OP. ASS'N., Columbus, Ohio.

We have been very well pleased with the BARI-CIDE business we have had this year. You may rest assured that we are going to be with you for 1936.

SEHON, STEVENSON & CO., Huntington, W. Va.

Our sales department is quite sold on BARI-CIDE and report repeat orders as being general. Evidently it has given very satisfactory results.

T. W. WOOD & SONS, Richmond, Va.

Our customers have voluntarily come into our office and advised that BARI-CIDE is the best preparation they have ever used for destroying bean beetles and other insects.

BLUEFIELD GROCERY CO., Bluefield, W. Va.

We have gone through another very successful season with BARI-CIDE and are happy to report that all our customers are satisfied and report great success with your product in combating the Mexican bean beetle.

KANAWHA DRUG CO., Charleston, W. Va.

We are perfectly delighted with the progress we have made in selling BARI-CIDE. We have found that when this item is introduced it is a steady repeater. Dealers who have used it insist on having it again.

KING HARDWARE COMPANY, Atlanta, Ga.

We have had most favorable reports from the territories in which we were able to introduce BARI-CIDE last year and we are looking forward to a very substantial increase in business this coming season.

GLASGOW-ALLISON COMPANY, Charlotte, N. C.

Satisfactory results are being gotten from the use of BARI-CIDE in the territory we cover. In fact, we can say we have not received a single complaint in reference to its not giving results.

S. B. WALLACE & CO., Marlinton, W. Va.

BARI-CIDE has been completely satisfactory and we helieve we can double our volume in 1936.

NELSON HARDWARE CO., Roanoke, Va.

We have never had a complaint from a user and believe BARI-CIDE is the most effective and economical product for which it is intended, on the market today.

NEW RIVER GROCERY CO., Hinton, W. Va.

Our experience with the sale of BARI-CIDE has been exceptionally pleasant. We have never had a package returned or a complaint regarding the effectiveness of this product.

KRUSE HARDWARE CO., Cincinnati, Ohio.

Our sales of BARI-CIDE during 1935 exceeded our sales of 1934 hy fifty percent and with conditions being the same we will do considerably better in 1936 because it is becoming better known and there is complete consumer satisfaction.

CLARKSBURG DRUG CO., Clarksburg, W. Va.

We have had very favorable reports from our dealers and customers as to the results obtained from BARI-CIDE and feel confident that there will be a hig demand for it as it becomes better known

SCHINDEL, ROHRER & CO., INC., Hagerstown, Md.

We do not hesitate to recommend BARI-CIDE to our trade as we have never heard of a dissatisfied customer. We hope to increase our 1936 volume one hundred percent.

LOEWENSTEIN & SONS, Charleston, W. Va.

Every year makes us a stronger believer in BARI-CIDE. It does the work and repeats. We have found it to be the most satisfactory product we have ever handled. It is a real pleasure to recommend BARI-CIDE.

WRIGHT CRUZE HARDWARE CO., Knoxville, Tenn.

Our experience with you has convinced us of two things—first, that you have an article of merit that did all that was claimed for it, and secondly that when BARI-CIDE was intelligently presented to the merchant and consuming trade that there was a market.

OTT-HEISKELL COMPANY, Wheeling, W. Va.

We have been handling BARI-CIDE for the past three years and have found it more satisfactory than anything we have ever soid for killing the bean beetie or other chewing insects. Our volume has increased every year.

RALEIGH HARDWARE COMPANY, Beckiey, W. Va.

#### PUMPKINS

CULTURE—Put 8 to 10 seeds in each hill, 1 inch deep, and cultivate until the vines get strong, when they should be thinned out, leaving two or three of the strongest in each hill. When planted in corn, plant at the same time as the corn in every fourth row, 10 to 12 feet apart in the rows, letting hill of pumpkins take the place of a hill of corn. Do not grow near squashes or meions.

#### WYATT'S SQUASH

One ounce of the bush varieties to 40 hills; 2 to 3 lbs. to the acre.

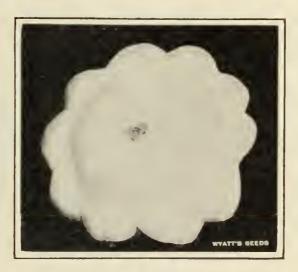

One ounce of the large-seeded varieties to 15 hills; 3 to 4 lbs. per acre.

CULTURE—Squashes should not be planted until danger of frost is past and the ground has become warm, but plant the Winter kinds as soon as safe in order that they mature. Plant in hills 5 feet apart for bush varieties, and 6 to 8 feet apart for running varieties, putting 6 to 8 seeds to the hill, finally leaving but 3 plants. A rich, warm, mellow soil is conducive to high yields and early maturity, but Squashes grow quite well in almost any well drained soil. It pays to enrich each hill with rotted manure or commercial fortilizer. During the early stages of growth keep the plants well sprinkled with 'Slug Shot' or Tobacco Dust, to save them from insects. The Winter Squashes may be grown in cornlicids in the same manuer as pumpkins. In the small garden, Squash may follow early beets, early cabbage, corn salad and spinach.

Wyatt's Japanese Turnlp No. 782

## WYATT'S SELECT TURNIPS

## Finest American and English Stocks

CULTURE—Sow in drills 18 to 24 inches apart; cover ½ inch deep, or sow broadcast. Thin early, for any overcrowding will result in rough and poorly flavored roots. 1 ounce of seed will sow 200 feet of row; 1 lb. will sow an acre in drills; 2 lbs. broadcast.

No. 782—Wyatt's Wonderful Japanese Turnip—Anyone who plants this splendid new variety will be highly pleased with it. It is especially valuable for turnip greens, which are always in good demand during the summer months. This variety is louse resistant and we recommend it for summer planting, as it will grow and yield a better crop during the hot summer months than other sorts. The leaves grow upright about 2 feet high when fully developed, which makes it practically free from insect attacks. The roots are pure white, nearly globe shape and very sweet, of excellent turnip flavor. It can also be planted in the spring months and again in the fall. Get the genuine stock of Wyatt's Wonderful Japanese Turnip direct from Wyatt's. 48 days. Prices: Pkt. 5c; oz. 10c; ½ 1b. 20c; lb. 50c; 5 lbs. \$2.00; 10 lbs. \$3.50.

## HERBS FOR BEAUTY-FLAVOR-FRAGRANCE

In Cultivation Before the Christian Era, Herbs Form the Most Fascinating Group of Subjects in Modern Gardening\*

For all-round interest most gardeners will admit that the versatility of the aromatic herbs make this group of plants among the most fascinating. A small assortment of herbs will furnish food, flavoring, medicine, fragrance in the garden and in the home, besides their beauty as garden subjects and cut flowers. Herbs thrive in most soils and should be sown early in the spring. Thin out to about one foot apart. Those grown for foliage should be cut before they come into full bloom and hung in bunches or spread thinly where they can dry quickly.

This fascinating study, one that was practised so diligently thousands of years ago—Herb gardening—is once more coming into popularity. Be the first to have a complete herb garden in your neighborhood. Our stock of herb seeds is one of the most complete in America.

We are also pleased to offer and recommend to our customers the two first ranking books on herbs. "The Herb Garden" by Frances A. Bardswell (\$3.00 postpaid) noted English authority and "Gardening with Herbs" by Helen Morgenthau Fox (\$2.50 postpaid) eminent American author of garden subjects.

## THESE MODERN VARIETIES ARE EASY TO GROW

This insignia displayed opposite "All America" selections ONLY, carries with it the endorsement of ten of America's outstanding Floriculturists. In following the recommendations of this group you buy varieties of known merit.

(iii) No. 1555 — Dianthus, Splendens Single—A most worthy subject. Large single red flowers with a wide white eye, this thrifty member of the famous old family of garden ''Pinks'' combines beauty, fragrance and ruggedness. Making a ready home in almost any soil, Diauthus Splendens raises a profusion of blooms throughout the entire summer. Pkt. 10c; 3 pkts. 25c.

No. 1763 — Marigold, Sunset Giants—The largest flowers ever known in the Marigold group often averaging 5 to 7 inches across and produced in great profusion. Of a definitely sweet fragrance instead of the usual marigold odor. Sunset Giants bloom in a remarkable range of rich colors from deep orange through golden orange, deep golden yellow, light yellow, lemon yellow and a delightful new shade of primrose. The strain comes from 60 to 65 per cent double. Plants grow 3 to 4 feet tall and bloom by late June. Pkt. 25c; 3

(a) No. 1761—Guinea Gold— A striking new typo of marigold. The giant glittering, golden flowers 2½ inches across are borne abundantly with long, strong stems on compact plants 2 to 2½ feet high. The characteristic marigold odor is absent. Prices; Pkt. 10c; ½ oz. 25c.

(ii) No. 2150 — Venidium Fostuosum—A strikingly handsome recent introduction bearing the Award of Merit of All America Selections for 1933 Venidium is a daisy like flower 4 to 5 inches across. Instead of the regular single row, Venidium has a double row of deep orange petals, the upper row marked at the center with a reddish brown zone. Plants grow 2.3 feet thrive in poor soil and bloom continuously over a long period of time. Pkt. 10c; 3 pkts, 25c; 1-16 oz. 75c.

of Oxford Hybrid—A real triumph bridization and selection gives the world a great new variety from a grand old family. Beauty of Oxford Hybrids Verbena is of the gigabtea type, producing immenso flowers in beautiful new shades of clear pink, rose pink, salmon pink to deep rose red on strong vigorous plants, adaptable to most any situation. Thriving, as do all other verbenas in poor soil, Beauty of Oxford Hybrids adapt themselves wherever put, but with best results in a hot, sunny situation where the soil is neither too rich nor too damp. Pkt. 10c; 3 pkts. 25c; ½ oz. 50c. (it) No. 2161—Verbena, Beauty

No. 1604—Hunnemania (Bush Poppy) Sunlight—The flowers are semi-double, tubip shaped and a startling, bright, canary yellow. If planted in a well drained, sunny situation the 2 ft, plants will bloom quickly, profusely and over a long period. Packet 10c; ½ oz. 25c; oz. \$1.75, postpaid.

No. 1036—Anchusa—Blue Bird—This is the attractive new annual Anchusa. The compact plants grow 20-24 inches tall producing a wealth of flowers in a heautiful shade of indigo blue so rarely found even in the most complete gardens. Anchusas thrive in any soil and are of the easiest culture. Pkt. 10c; 1-16 oz. 25c.

No. 1218—Browallia Speciosa This Browallia is a vast improvement over the more common Browallia, elata. Speciosa produces clear blue flowers several times the size of the old fashioned variety. This large flowering, compact growing, new Browallia is invulnable for porch or window boxes or for bedding out of doors. Pkt. 25c; 3 pkts, 65c. See also pago 27.

No. 1474—Coreopsis Double Flowering Sunburst—This is a now delight ful form of the fine old fashioned perennial Coreopsis. Retaining the sparkling clear yellow coloring of the single varieties, Sunburst distinguishes itself by a doubling of the petals of its flowers which grow 3 to 3½ inches across. The flowers are excellent keepers and the plants are very easy to grow. Pkt. 10c; 3 pkts. 25c; ½ 0z. 75c.

🔊 No. 1482—Cosmos, Sensation—The surprisingly large pink rose and white flowers of this real Sensation sometimes reach 4 to 5 inches across! The plants, with rather heavy foliage, grow about 4 feet, bloom extremely early (10 weeks from seeds) and are very free flowering. Cosmos, Sensation, is one of the easiest flowers to grow. Disbud for bargest blooms. Pkt. 10c; 3 pkts. 25c, (ii) No. 1762 — Marigold,

## WYATT'S PERENNIAL FLOWER SEEDS

Grow Your Own Perennials From Seeds

Everybody wants Perennials—and wants them in generous measure to secure the desired effects in color and charm. If you delay and finally buy plants, the cost mounts high, an attractive perennial border may require several hundred dollars worth of plants. Exactly the same results can be secured with \$3.00 or \$4.00 worth of seeds! Aside from the money saved it is very fascinating to grow your own plants from seed.

## WYATT'S LARKSPUR

The 2 Finest Strains in Cultivation

#### IMPERIAL STRAIN (Tall Growing)

This magnificent new strain of Larkspur brings enthusiastic expressions of warm praise from everyone. It is indeed hard to imagine any fluer Larkspurs than were snpplied by ns last year, some gardeners reporting spikes 7 feet higb. However, our new Imperial Giants supersede all other types of Larkspur. Wyatt's Giant Imperial Larkspur is equally as hardy as the older strains and can be sown out of doors during the fall or spring with success. Prepare beds with light application of lime. Fertilize with theorems, we will be seen the flowers. Applications of Vigoro or Bloomaid when the growing season begins will improve the flowers.

## WYATT'S PETUNIAS

Sow the small seeds in a warm, sunuy, open place outdoors, thinning to 15 inches apart, or in frames for transplanting. Scatter seeds thinly, barely cover and firm soil over them; water seedlings with a fine spray to prevent drying out. The weakest looking seedlings usually produce the finest flowers, so save the weak plants for transplanting. Seed of the double and fringed sorts should be pressed into a shallow pot of sifted soil and covered with only a sprinkling of sand. The pot should be watered from below by placing it in water. Never allow to become too dry nor too moist.

#### WYATT'S GIANT ORCHID FLOWERING

## SPENCER SWEET PEAS

WYATT'S SPENCER SWEET PEAS are produced for us under almost perfect growing conditions in the fertile Lompoc Valley in California. As is true of all other Wyatt's seeds, our special strain of Sweet Peas is the very best. Four tremendous ruffled flowers on long stems often 14 inches, clear refined colors and vigorous, long blooming plants are characteristics of all varieties of Wyatt's Sweet Peas.

CULTURE—One ounce will sow from 15 to 20 feet. Sow from November to March. For spring plantings we recommend the sowing of Sweet Pea seeds slightly below the ground level in a bed thoroughly pulverized 2 feet wide by 12 to 18 inches deep. Well rotted (but no other) compost or a liberal sprinkling of Bone Meal might be added when the bed is prepared and when the peas are growing slight applications of Bloomaid or Vigoro at 4- to 6-week intervals should be made.

## WYATT'S ZINNIAS

We are happy to offer this year, seeds from the very finest Zinnias cultivated. Flowers from the fields where Wyatt's seeds are selected have been awarded gold medals for distinction in size and color since 1926. Wyatt's pure strain of Dahlia-Flowered Zinnias come direct from the originator who has exhibited all over the world. Each year Wyatt's Zinnias produce prize winning flowers for flower growers all over the South. Get your seeds from this pure strain and raise the prize winning Zinnias in your community.

community.

CULTURE—Sow seeds indoors in March or April or out of doors after ground is warm. Thin out or transplant to 1 to 2 feet apart when plants are 3 to 4 inches high. Fertilize heavily and pinch out first bud when it first forms in the top of the plants. Wyatt's Zinnias grow 3 to 5 feet

## No. 2246 — Zinnia,

Wyatt's Fantasy—
(See Illustration)—Everyone who saw Fantasy in the trial grounds at N. C. State College here in Raleigh last summer was delighted. The colors are rich and full; bright yellows, reds and pink shades predominating the well blended mixture. The medium sized well rounded, quilled, shaggy flowers lend themselves admirably to flower arrangement and are yet large enough to satisfy the desire for a mass of color. Packet 10c; ½ oz. 35c; oz. \$2.25, postpaid.

## WYATT'S DAHLIAS

WE LIST ONLY THE VERY FINEST DAHLIAS FOR SOUTHERN CULTURE

CULTURE—Dahlias thrive best in a sunny location. Work the soil to a depth of 8 inches and pulverize thoroughly, mixing with it dry sheep manure. Plant the bulbs, about 6 inches deep, laid flat with the eye up and cover with 2 inches of soil, filling in as the plants develop. For the largest flower, leave only the terminal bud to a single stem plant, pinching off all other buds as they appear, clear to the ground. For 4 to 6 fine, large flowers per plant, pinch out the top of plant, leaving 2 or 3 pairs of leaves. Water copiously. All Dahlia Roots are postpaid.

## Good Seed and Good Plant Food go hand in hand!

We ship you only high-quality seed of strong vitality and high germination. After the seed germinates and the plants develop feeding roots, much of future growth and blooming depends on the nourishment they can get from the soil. To be certain that young plants will have all the 11 elements needed for finest growth and bloom, we recommend the use of Vigoro, the Complete Plant Food.

# GORO

Complete plant food

#### HOW TO BUILD LAWN

The first requisite for a lawn of any kind, be it permanent or merely temporary, is good soil. Good soil from a point of plant growth must have these three vital parts: Plant food, moisture, humus. Most of us are familiar with the first two of these but some of us are not so familiar with the third-humus. Humus is that part of an ideal soil that renders it

the third—humus. Humus is that part of an ideal soil that renders it porous and loamy. It prevents beavy soils from packing or baking and adds "body" to light or sandy soils, thereby increasing their moisture bolding capacity. Therefore, since plant foods must be in a liquid form before they are available to plants, humus is the most important of the three vital parts of an ideal soil. Heavy soils without humus are so tightly packed that they have no room for moisture. Loose sandy or light soils, while having great capacity for moisture, drain so rapidly that they become very dry too often for healthy plant growth. And so we see then that bumus added to heavy soil increases its capacity for moisture while preventing its packing or baking and when added to sandy or light soil increases its ability to retain moisture.

Wyatt's Peat Moss, listed on this page, is the finest type of humus available since it is perfectly pure, containing no weed seeds nor harmful bacteria and bas a moisture capacity of 15 times its own weight. Where the area is too great to permit the use of commercial peat for bumus we recommend successive plantings of cover crops for turning under, legumes mucb preferred. Humus derived in this manner has the advantage of being mucb bigher in plant food content than commercial peat. A third source for humus is through the use of animal manures. We do not recommend manures unless they are known to be thoroughly rotted and free of weed seeds and harmful bacteria. As the humus is used by the growing plants it must be replaced from a compost beap made of leaves from trees or grass clippings or from some equally generous source, and scratched into the lawn from time to time. However, once the soil is well built up with humus and a constant supply for the future is provided the problem of growing a permanent lawn or anything else is solved.

After the soil has been thoroughly broken and a fine seed bed prepared and allowed to settle the seeds may be sown, on the scarified surface, using 1 pound to each 20

## RECLEANED CLOVER SEED

No. F97—Alfalfa, Kansas Grown—We offer nothing hat of genuine Kansas Grown Alfalfa and our seed is usually 99 per cent or better pure Alfalfa. The hay is remarkably palatable and the feeding value worth nearly twice that of the very hest Timothy. Droughts have value worth nearly twice that of the very hest Timothy. Droughts have no effect upon Alfalfa, as its roots penetrate to astonishing depths. Alfalfa can he sown in either fall or spring. The cleaner the ground, the hetter the stand will be. Sow on deep, well drained, good loamy land. Alfalfa will not grow on acid soils, and to correct this condition spread 1 to 1½ tons of finely ground lime to the acre after plowing and a few weeks before sowing. Cutting should be done always as blooming hegins. Sow 30 to 40 lbs. to the acre. Prices: Lb. 45c; 5 lbs. \$2.00, postpaid. Not prepaid. 10 lbs. \$3.25; 25 lbs. \$8.00; 100 lbs. or more at 30c lb.

No. F87—White Blossom Sweet Clover or Bokhara

This is known as Melilotus Alha. It is adapted to a wide variety of soils: is used for pasture, for forage, for ensilage, for bees, for turning under to improve the land. The deep roots break up, aerate and drain stiff subsoils and add humus. Spring sowings will yield a crop the following fall and two crops the following year. The first season it grows 1½ to 2½ feet high, but if cut when 6 inches high it stools out and makes a more tender growth for grazing. Sow 20 lbs. per acre. Prices: Lb. 35c; 5 lbs. \$1.50, postpaid. Not prepald, 10 lbs. \$1.75; 25 lbs. \$3.50; 100 lbs. or more at 12c lb.

No. F82—Red Clover—A valuable farm crop in northern part of the Cotton Belt. Equally good for pasture, hay or soil improvement. Even the first crop makes rich feed and is most valuable for hay. Sow in fall or spring. September and March being the best months. 15 lbs. per acre. Prices: Lb. 45c; 5 lbs. \$2.00, postpaid. Not prepaid. 10 lbs. \$3.75; 25 lbs. \$9.00; 100 lbs. or more at 35c lb.

No. F81—Mammoth or Peavine Clover—Also known Clover. Grows much taller than Red Medium, with larger, leafler stalks; 10 to 15 lbs. of seed per acre. Prices: Lb. 45c; 5 lbs. \$2.00, postpaid Not prepaid, 10 lbs. \$3.75; 25 lbs. \$9.00; 100 lbs. or more at 35c lb.

No. F86—Alsike or Swedish Clover—One of the best timothy; it is perfectly hardy in every climate. It is sown early in the spring or late summer. Sow 10 to 15 lhs. per acre alone, or 8 lhs. per acre with timothy. Prices: Lb. 45c; 5 lbs. \$1.85, postpaid. Not prepaid, 10 lbs. \$3.00; 25 lbs. \$7.50; 100 ibs. or more at 28c lb.

No. F83—Crimson Clover—Should be sown from August to self, 25 to 30 pounds are required to the acre; sown with grain or vetches, 15 pounds would be sufficient. Prices: Lb. 35c; 5 lbs. \$1.25, postpald. Not prepaid, 10 lbs. \$1.50; 25 lbs. \$2.75; 100 lbs. or more at 10c lb.

No. F85—Burr Clover—Is an annual winter legume, coming grazing during the winter. If allowed to go to soed, it will reseed the ground for another winter's grazing. Burr clover at the rate of 20 to 25 lbs. per acre of hulled, recleaned seed to the acre broadcast, or if sown in the hurr 60 to 80 lbs. per acre. Prices: Lb. 40c; 5 lbs. \$1.50, postpald. Not prepaid, 10 lbs. \$1.75; 25 lbs. \$4.00; 100 lbs. or more at 15c lb.

No. F80—White Dutch Clover—A dwarf clover, and winter. Best for pastures and lawns. Prices: Lb. 50c 5 lbs. \$2.00; 10 lbs. \$3.75, postpaid. Not prepaid, 10 lbs. \$3.50; 25 lbs.

#### No. F91—Common Lespedeza or Japan Clover

It grows on galled hillsides and on all soils, even on the poorest, and being a legume will extract nitrogen from the atmosphere and store it in the roots for later crops. Its abundant long taproots and laterals, when decayed, open up the subsoil and leave in it great quantities of nitrogenous matter that will increase the vield of succeeding crops. Once started it soon spreads and takes yield of succeeding crops. Once started it soon spreads and takes possession. Sown on old pastures, it will add very materially to the value of the pasture. Sow 25 lhs. per acre. Prices: Lb. 35c; 5 lbs. \$1.25, postvaid. Not prepald, 10 lbs. \$2.25; 25 lbs. \$5.50; 100 lbs. or more at 20c lb.

#### No. F94—Tennessee 76 Lespedeza—

This variety is best for eastern North Carolina, Virginia and South Carolina. The leaves and stems are fine and it produces a great quantity of hay even on poor land. Tennessee 76 grows 12 to 24 inches high and is three weeks later than Common. The close resemblance in the seeds of these two varieties prompts us to urge all of our customers to use every care when huying Tennessee 76. Why not huy pure stock direct from Wyatt's? Then you'll know you've got the genuine Tennessce 76. Sow 25 to 30 lba.

PRICES: TENNESSEE 76—(recleaned): Lb. 30c; 5 lbs. \$1.25, postpa'd. Not prepald, 10 lbs. \$2.25; 25 lbs. \$5.50; 100 lbs. or more at 20c lb.

No. F93-Kobe Lespedeza-A variety particularly adapted to lowlands. Kobe is only about 10 days later than Common and grows fully as tall as Tennessee 76. The leaves and atems are slightly coarser making a hoavler hay crop. This variety with the Tennessee 76 is being highly recommended by the N. C. Experiment Stations for all hut the mountainous regions of North Carolina, South Carolina and Virginia. Sow 25 to 30 lbs per acrc.

PRICES: KOBE—(recleaned): Lb. 30c; 5 lbs. \$1.25, postpaid. Not prepaid, 10 lbs. \$2.25; 25 lbs. \$5.50; 100 lbs. or more at

No. F92—Korean Lespedeza—This popular new is coming into large demand. Korean Lespedeza will grow on any soil, wet or dry, rich or poor, sour or aweet, and has never heen killed by a drought. When a good crop of Korean Lespedezu is turned under it will double the corn yield in ono year. Unexcelled for hay crop since it will produce from 2 to 4 tons of good hay per acre on a good thick even stand. It is equal to alfalfa in feeding value, and compares favorably in fineness, palatahility and protein content. A good stand will make one ton hay per acre for each 4 to 5 inches above cutter bar. Tho hay is easier to cure and handle than soy beans, red clover, or alfalfa. When cutting for bay cut in August or early September. If hay crop is to reseed the land, hay must be either early and high enough for stubble to make sufficient growth to produce seed: or wait until seed have formed on bottom branches, which soed shatters to the ground for reseeding. Korean Lespedeza is earlier than other lespedezas, this insures harvest before fall rains and early frost and gives timo for aced bed preparation for amall grain that fall. If a good stand is expected the first year sow from 20 to 25 pounds of seed per acre. Prices: Lb. 30c; 5 lbs. \$1.25, postpaid. These grasses mature and ripen

# WYATT'S GRASS SEEDS FOR HAY AND PASTURE

No. F73—Sudan Grass—A wonderful quick growing summer hay crop. As big a objectionable features, for Sudan grass can never become a pest, as it is an annual. Its greatest value is for hay, which is well liked by stock. The hay is equal to timothy in feeding value. It is also strongly drought resistant. Sow it after the ground becomes thoroughly warm, either broadcast or in rows two feet apart, and cultivate like corn. When sown in rows it grows six to seven feet high; when sown broadcast it grows four to five feet high. Sudan grass may be profitably grown with cowpeas and soybeans, as being of erect growth it supports the pea vines and makes the cutting easier and allows them to cure more quickly; the mixture will give a better-balanced ration than either fed alone. When grown with cowpeas or soy beans make the sowing of Sudan grass after the peas or beans are planted and covered. Almost any soil, from heavy clay to light sand, will grow Sudan grass. Sow 5 to 6 lbs. to the acre in 2-foot rows; 20 to 25 lbs. broadcast. Prices: Lb. 25c; 5 lbs. 75c, postpaid. Not prepaid, 10 lbs. \$1.00; 25 lbs. \$2.25; 100 lbs. or more at 8c lb.

## WYATT'S FIELD AND FARM SEEDS

Pedigree Fulghum Oats No. F175

#### SELECTED AND CERTIFIED SEED OATS

PRICES SUBJECT TO CHANGE—WRITE FOR QUANTITY PRICES

Sow 21/2 Bushels Per Acre

No. F175—Wyatt's Pedigree Fulghum Oats— We consider this variety most
satisfactory for spring planting.
It is a heavy yielder and rust-proof, has plump full
heads that mature early. Its productiveness, probably more than any of its other good qualities, has
contributed to its wide popularity. They stool out
splendidly, have large, full heads, fine, plump grains
and strong straw that stands about three feet high.
The average yield from Fulghum 12 bushels to the
acre more than all other varieties. It has plump
grains and exceptional heavy weight. Prices:
8 lbs. (peck) 60c, postpaid. Not prepaid, 32 lbs.
(bu.) \$1.10; 5 bu. or more at \$1.00 per bu.

No. F174—Burt or 90 Day Oats— Favorite for growing on the light sandy soils of the coast sections of the South Atlantic States. It makes a good growth of straw, is an abundant yielder of bright, clean heavy grain, is free from rust, and what is of equal importance, when plantings are late it is of early maturity. Early plantings can be cut in time to put the same land in corn, peanuts, cowpeas, millet or other summer crops. Prices: 8 lbs. (peck) 60c, postpaid. Not prepaid, 32 lbs. (bu.) \$1.10; 5 bu. or more at \$1.00 per bu.

No. F176—Gray Winter or Turf Oats Extremely hardy to cold. Another good claim for their popularity is their stooling propensity, which accounts in part for the heavy yield. Their strong turfing and stooling characteristics give them advantages for grazing purposes. Prices: 8 lbs. (peck) 65c, postpaid. Not prepaid, 32 lbs. (bu.) \$1.25; 5 bu. or more at \$1.20 per bu.

#### NO. F295—BEARDLESS BARLEY

We sell only approved or genuine certified seed of this, grown under the supervision of the North Carolina Crop Improvement Association. Sow 2 bushels per acre broadcast. Prices: 5 lbs. 50c, post-paid. Not prepaid, 12 lbs. (peck) 60c; 48 lbs. (bu.) \$2.00; 2 bu. or more at \$1.90 per bu.

## NO. F299—JAPANESE BUCK-

The earliest, most prolific and largest grained of all buckwheats, and makes fine flour. Prices: Lb. 20c; 5 lbs. 75c, postpaid. Not prepaid, peck 60c; bushel \$2.00.

#### CHUFAS OR EARTH ALMONDS

NO. F290—No crop will produce as heavy in proportion to the quality of land as Chufas. Any land suitable for cotton, corn, potatoes or peanuts will make profitable crops of Chufas. Chickens and turkeys, as well as hogs, are very fond of them. Make rows 2½ to 3 feet apart, dropping seed about one foot apart in the row, and covering about 2 inches. Chufas require from 1 to 1½ pecks per acre. Can be planted from April to June; cultivation the same as for bunch peanuts. Prices: Lb. 30c; 5 lbs. 85c, postpaid. Not prepaid, 10 lbs. (peck) \$1.25; 40 lbs. (bu.) \$3.75; 2 bu. or more \$3.60 bu.

## PLANT PLENTY OF PEANUTS

Any soil that will grow corn or cotton will grow peanuts; on light sandy or loamy soils there are few crops more profitable. In addition to the yield of nuts, the hay is superior to alfalfa in fat and almost equal in protein. After the oil is extracted the meal ranks with cottonseed meal and linseed meal in feeding value. Plant 1½ to 2 bushels per acre.

#### No. F223—Tennessee Red Peanuts

A variety that satisfies anyone who desires a peanut well adapted to the South and yet larger in size, with a greater number of nuts or kernels than in most sorts planted in the South. A most productive and desirable variety. Pods are large, close and well filled, containing 3 to 4 nuts or kernels with red skins in each pod. Of very mild, sweet, enjoyable flavor. Prices: Lb. 30c; 5 lbs. 90c, postpaid. Not prepaid, 10 lbs. \$1.25; 25 lbs. \$2.75; 100 lbs. or more at

No. F222—North Carolina Running Peanuts—There is a good demand for this running type of peanut. It's a sure cropper. Nuts a little larger than the Spanish. Prices: Lb. 30c; 5 lbs. 90c, postpaid. Not prepaid, 10 lbs. \$1.25; 25 lbs. \$2.75; 100 lbs. or more at 10c lb.

No. F224 — Spanish Peanuts — Although not as large as the other kinds, there is no peanut grown that so entirely fills the pod nor can compare with it in sweetness and flavor. There is also a marked freedom from pops, so frequently found in the large varieties when grown under unfavorable conditions. Prices: Lb. 30c; 5 lbs. 90c, postpaid. Not prepaid, 10 lbs. \$1.25; 25 lbs. \$2.75; 100 lbs. or more at 10c lb.

Prices: 4 ozs. 60c; ½ pt. \$1.00; pt. \$1.75; qt. \$2.75; ½ gal. \$4.50, postpaid.

KALO SPRAY—Replaces such sprays as arsenate of lead and Paris Green for most usual purposes. Controls many additional insects. Used extensively for apples, peaches and other fruits, commercial vegetables, such as cabbage, tomatoes, spinach, potatoes, etc., wherever a wet spray is desired. Never harms foliage or fruit. Contains no arsenic. Prices: ½ lb. 35c; lb. 50c; 4 lbs. \$1.45, postpaid.

KAYSO (The Casein Spreader and Adhesive)—Makes the spray spread, makes it stick and makes it cover a greater surface. Most sprays collect in drops that frequently drop off and only the surface that is actually covered is protected. Use two heaping tablespoonfuls to each 10 gallons of spray, or 1 lh. for each 100 gallons. Prices: 2 lb. pkg. 50c, postpaid; 100 lb. bag, \$18.00, not prepaid.

ROTONONE — Non poisonous dust for many forms of aphis leaf hoppers, cabbage worms, bean beetles and many other insects. Contains no lead, arsenic or flourine. Prices: lb. 40c; 5 lbs. \$1.40, postpaid.

TIS S

SULFOCIDE

SCALECIDE—For fruits and ornamentals—Scalecide as a dormant spray, 1 part to 15 parts water, not only makes scale control more certain, but also increases the vigor and production of the trees. Growers who have recently been using cheap oil sprays are awakening to the fact that their trees have lost the vigor and production which Scalecide formerly gave them.

awakening to the fact that their trees have lost the vigor and production which Scalecide formerly gave them.

You cannot grow profitable crops with run down trees. This year, use Scalecide and be sure. At the new low prices it is easier than ever to afford Scalecide. Prices: Qt. 65c; 1 gal. \$1.55; 5 gals. \$5.50; 10 gals. \$9.50; 15 gals. \$13.25; 30 gals. \$21.00; 50 gals. \$29.00, at Raleigh.

SLUG SHOT (For Leaf-eating Insects)—Destroys insects, worms and caterpillars on vegetables and house plants, shrubbery, vines, trees, fruits and flowers. Destructive to insects, but harmless to man. Prices: 1 lb. sifter top pkg. 30c; 5 lb. pkg. \$1.15, postpaid. Not prepaid, 1 lb. 25c; 5 lb. pkg. \$1.00; 25 lb. bag \$3.50.

SNAROL—Effective for controlling cut-worms, slugs, snails, grasshoppers, etc. Prices: Lb. 35c; 3 lbs. 75c, postpaid.

SULFOCIDE — Sulfocide in combination with poison tends to increase coddling moth kill. Note the light dosage recommended in this program, yet records show equal kill with heavier dosage combined with lime sulphur and bordeaux.

Do not forget the blossom spray. It is a most effective weapon against scab.

The most noticeable feature of Sulfocide is the beautiful finish and sbeen it gives to the fruit. Use Sulfocide for higher finish. Prices: Pint 50c; qt. 85c; gal. \$2.25; 5 gals. \$7.50; 10 gals. \$13.50. Not prepaid.

"MIKE" SULPHUR (Microscopic) —95 per cent active, instantly wettable. The perfect sulphur, the perfect wettable sulphur. Controls scabs, scales, mildews. Prices: 10 lb. package \$1.25; case (60 lbs.) \$6.00.

## WYATT'S BLOOD TESTED BABY CHICKS 100% LIVE DELIVERY GUARANTEED—POSTPAID

You are guaranteed 100 per cent live delivery of chicks from us, so with a good brooder and house 500 or more may be purchased and cared for, fed and reared with much less expenditure of time and mouey than was required with one half that number under the old method. You can get your chicks early and raise early pullets that will begin laying in the early fall and continue through the winter, when eggs are high. Your broilers may be sold on an early market when the price is always high.

#### HOW TO ORDER

To avoid any delay, use the order blank. Orders are filled in turn, so book your's in advance, if possible. State second and third choice if you can use other breeds.

Straight orders of one kind are best. Do not order too many different kinds at one time. We do not always have chicks of every breed hatching and this may delay your order. Do not wait until a week before you are ready for the chicks and expect to receive them by return mail, for the wise poultryman has placed his order weeks in advance and is likely to be getting them the same day you want them. TERMS

Our terms are cash with order. We will book orders with a 25 per cent cash deposit, balance on remittance to be made when we notify you. No chicks are shipped C. O. D. Refusal to accept chicks or remit balance forfeits first payment. Remittance may be made as customer prefers, but all payments must be honored before shipment is made.

## PLANET JR. TOOLS

You cannot afford to till the ground without Planet Jr. tools. They not only save hard labor, but enable you to cultivate double the acreage in the same time, and thus add over 100 per cent to your crop yield. Invented by a practical farmer and manufacturer—the result of fifty years' experience. Strong lasting construction. Fully guaranteed.

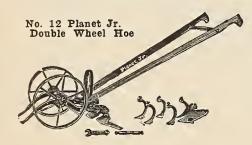

#### NO. 4—COMBINED HILL AND DRILL SEEDER AND SINGLE WHEEL HOE

The small grower should select one of the combined machines. The drill attachment will not be used as often as the hoeing and cultivating tools, but will be a source of much saving. This machine is a special favorite. There are probably more of them in use in the world than any other seeder made. As a Hill and Drill Seeder it opens the furrow, deposits the seed, covers it and rolls it, either in drills or bills. Holds 2½ quarts. Price, \$17.50. \$17.50.

#### NO. 12—DOUBLE AND SINGLE WHEEL HOE COMBINED

The arch is high enough to straddle a row until plants are 20 inches high; this insures close work. It can be altered into an admirable single wheel hoe for working between rows. Price, \$10.50.

Send for Complete Planet Jr. Catalog

#### NO. 16—SINGLE WHEEL HOE

Designed to do all work required in the small garden; plowing, cultivating, hoeing and raking. It is very light, and can therefore be easily carried about. Price, \$8.50.

#### NO. 220-PLANET JR. FERTILIZER DRILL

The No. 220 will distribute fertilizer in the middles of three rows 12 to 14 inches apart; it will side-dress one side each of two rows up to 36 inches apart (one complete row; and corn in wider rows). You can use it in very narrow rows—as close as 9 inches. You can use it in 42 to 48-inch rows by closing off the flow in three spouts and distributing through the other three—either on the right or left hand side.

The No. 220 spreads fertilizer from 4 to 30 inches on the hopper capacity is one bushel and the weight of the load is pl

the No. 220 spreads tertifizer from 4 to 30 incress on the ground. The hopper capacity is one bushel and the weight of the load is placed over the wheel, making it easy to push. The No. 220 will distribute 100 to 2,000 pounds of commercial fertilizer to the acre. Quantity per acre is regulated by a notched index on the right hand handle. The shut-off rod is operated from the same point.

These Planet Jr. Horse Hoes and Cultivators are stronger, better made and finished than any other one-horse cultivators, and enable you to increase your yield, because they do a greater variety of work in corn, potatoes, cotton, beans, tobacco and other crops requiring similar cultivation, and do it more thoroughly. Cultivate deep or shallow, in different width rows, and the extra long frames make them steady running. All Planet Jr. cultivator steels are made of beveled steel thickest down the center, making them self-sharpening, and the points retain their shape and strength. No. 9 has lever expander, allowing quick adjustment for different width rows. Used with or without a wheel. No. 9-D. without wheel. Price, \$11.50.

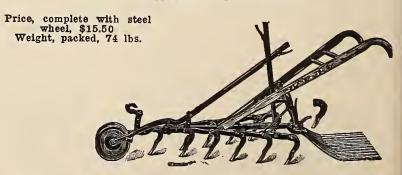

#### NO. 4-D-PLANET JR. PLAIN CULTIVATOR

This tool is strong and simple. It has patent handle braces; very firm, simple and convenient. With them the frame and handles seem almost like one solid piece. Changes in width are quickly made by loosening one nut on each side, and one side may be opened wide, while the other is closed. An every-day all-day tool.

## NO. 100-D—PLANET JR. PLAIN CULTIVATOR We offer this Cultivator with the object of filling a definite need where lands are light or where farming is done on a modest scale. It weighs but 42 pounds. It will stand hard usage and do excellent work. A steady running tool and easy to handle and adjust. Price, \$7.00 Weight 42 lbs

#### NO. 90—PLANET JR. TWELVE-TOOTH HARROW, CULTIVATOR AND PULVERIZER

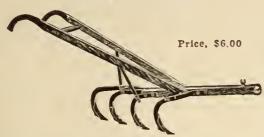

This tool is a special favorite with strawberry, tobacco and sugar beet growers, market gardeners and farmers, because of its twelve chisel shaped teeth. The teeth and pulverizer leave the ground in fine condition. Cultivates any width from 12 to 32 inches.

NO. 90-B. Without pulverizer. \$12.75.
NO. 90-D. Without pulverizer and wheel. \$10.50.

## WYATT'S FARM IMPLEMENTS EMPIRE TOOLS

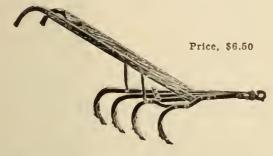

#### FOUR SHOVEL WOOD BEAM PLOW

WITH STEEL SHANKS

The best four shovel plows on the market. Steel shanks on the Wood Beam plow are ½-inch x 1½-inch. 3-inch x 9-inch double pointed blades placed diagonally so that they leave the ground level next to the plants and throw the furrow to the center of row. Especially useful in sections where the soil is light and loose. Weight 42 lbs.

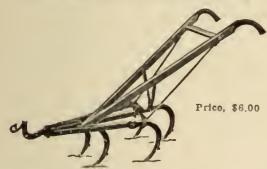

#### FOUR SHOVEL STEEL BEAM PLOW

Adjustable expanding and contracting beams of  $1\frac{1}{2}$ -inch x  $\frac{1}{2}$ -inch steel and 3-inch x 9-inch reversible blades. Weight 55 lbs.

## EMPIRE ALL STEEL LIGHT, SHORT FRAME CULTIVATORS

CHANNEL-FLAT SIDE AND CENTER BARS

Furnished with Handwheel Clamp and 21/2-in. Teeth. Length of frame 431/4 in. Weight 36 lbs.

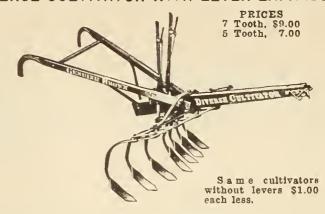

Can also furnish with Bent Side Bars Instead of Straight as shown in cut.

#### 14-TOOTH STEEL HARROW

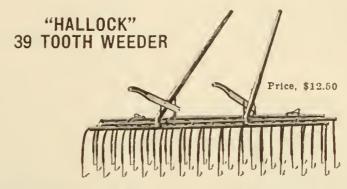

This tool is used for working very closely to small plants of tobacco, corn, cotton, potatoes, etc. It thoroughly pulverizes, but throws no dirt on plants. It is also used as a Straight Diamond Tooth Harrow, also as a Smoother with sharp points down in order to cut and level the surface; the tooth, with sheared end down, being less liable to injure young plants when smoothing over corn, potatoes, etc. Weight 55 lhs.

#### DIVERSE CULTIVATOR WITH LEVER EXPANDERS

A universal cultivator or harrow, almost indispensable in the cultivation of corn, cotton, potatoes, etc. This implement may readily be converted into an A-shape cultivator with center tooth in front, a V-shape cultivator with center tooth in the rear, a straight harrow or rake, or a right-hand or left-hand side harrow.

Frame is made of 1 ¼-in, x 1 ¼-in, angles, well braced to insure proper alignment. Teeth are made of carefully tested spring steel, oil tempered, and have the requisite amount of flexibility and side motion to insure proper cultivation. They will not injure the roots of the plants, but scratch just deep enough to retain the moisture, 7 ½ ft. wide. Weight 86 lhs.

Light, strong and simple. A most complete and desirable garden cultivator. An easy running, labor saving implement, well made and nicely finished. 18-inch wheel with  $1\,\%$ -inch tire.

Outfit consists of Moldboard, Sweep, Reversible Bull Tongue, Rako and Wrench. Weight 22 lbs.

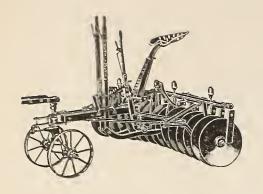

#### "GENERAL" GARDEN BARROW

A new extremely attractive garden barrow, strongly and durably made. Has large wheel 19 inches in diameter with tire 2½ inches wide. Front ends of frame are clamped together, making frame perfectly solid. Wheel runs free on replaceable axle tubing or bushing.

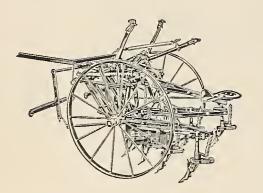

#### MASSEY-HARRIS

#### PROFIT-PRODUCING FARM EQUIPMENT

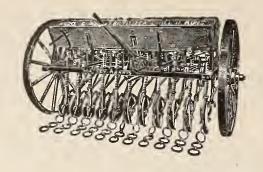

#### RACINE DISC HARROW

Curved draft bars and adjustable hold-down stirrups at inner ends of the gangs hold both inner and onter ends down to their work. The Racine Disc Harrow insures thorough pulverization and uniform, deep penetration at all times. 8 and 10 disc sizes with pole or trnck carried in stock.

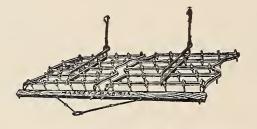

#### WHEEL GUIDE CULTIVATOR

A pivot axle cultivator with parallel gang movement. Quick dodging. Axle standards rest on a ball in the sleeves, making the machine easy to guide. One lifting lever raises and lowers both gangs. Clean and thorough cultivation.

#### NO. 20 COMBINED GRAIN AND FERTILIZER DRILL

Two drills in one. A combination grain and fertilizer drill. A double-run positive force feed insures an even accurate stand and maximum yield under all conditions, with any kind of seed. Strong main frame. Large, built-in, combination hopper.

#### CLOSED END LEVER HARROW

There are no bar ends to catch on trees or posts when working near fences. Of ample strength, this harrow is flexible enough to render the most satisfactory field service. Each tooth bar hinges perfectly for angling or following the lay of the land.

- 50 Tooth Harrow
- 60 Tooth Harrow

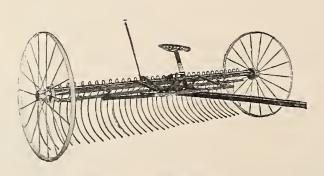

Carried in Stock

#### NO. 30 TRACTOR DISC HARROW

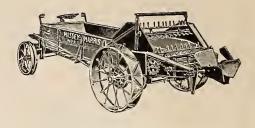

A strongly bnilt harrow that is easily controlled from the tractor. Hard maple bearings insure long life and reduce friction. Provision is made to take up end thrust in gangs. This harrow draws lighter and there is less wear on the standards.

#### NO. 10 DUMP RAKE

The teeth are designed to pick np all the hay without a tendency to dig in and collect dust and trash. A touch of the foot on the trip will dump the basket.

Prices of machines on this page quoted on request.

#### NO. 8 MANURE SPREADER

Spreads 6, 8, 12, 16, or 20 loads to the acre. Built low down for easy loading. Light draft, wide spread, fine shredding, simple adjustments, narrow tread, short turning, large capacity, rigid

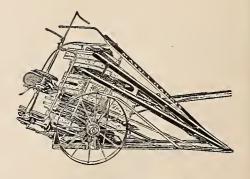

#### NO. 33 OIL BATH MOWER

A new mower-quieter, smoother-running, easier - pulling, cleaner - cntting, longer - lasting. Only two sets of gears-enclosed in gear case and running in oil. The bulk of gear weight is back of the axle, eliminating neck weight. Quality ball bearings, heavy-duty roller bearings.

A new precision-lined cutting bar, developed by many exacting tests, gives free knife action with no binding or clogging.

The sturdy frame is well braced. Extra large wheels, well-lugged-prevent side slip. Latchless levers are convenient to operate. Many other advanced features.

#### NO. 5 GRAIN BINDER

Built with maximum strength and minimum weight, this binder is the best on the market. It is convenient to operate. Floating elevators handle varying crops. Ample band adjustment. All canvases have tighteners. Reel has a wide range of adjustment. Positive knotter is an actual twine saver.

Is your garden going to the dogs? Your neighbors' dogs?

USE DOGZOFF. Do you know that dogs mean death to evergreen? So we suggest you use this spray, around the base of your trees. Also protects your shrubs and young trees. It's not poisonous (even to dogs) and not offensive to humans. One spraying will last from 3 to 4 weeks. Also keeps away rabbits, cats, mice and moles from any place where they're not wanted. DOGZOFF is applied with any small insect sprayer and one application usually does the work. PRICE FOR SEASON'S SUPPLY 69c, postpaid.

New Columbus Cane Mill

## NEW COLUMBUS CANE MILLS

New Columbus Cane Mills, Rocker Furnaces and Pans are carried in stock in the sizes priced on this page. These mills have been on the market for years and being made of the best of materials, give perfect satisfaction. The rolls are perfectly balanced, shafts made of extra quality steel, turned true, gears accurately bored and boxes fitted with removable brass bushings.

Bottom Plate is flat on bottom—having four elevated lugs at corners so as to make them easy to handle.

The Sockets in which the lower Bearings fit are cast onto inside of Bottom Plate. They are heavy and strongly ribbed. By reason of this unique construction, it is impossible for any oil or grease to get into the juice. This makes it easy to get at bottom Set Screws for adjustment.

Bottom and Top Plates, also the Staves, are heavy and plain, having smooth, beveled, paneled edges, the metal being carefully distributed so as to afford greatest strength where most needed.

## OLIVER FARM EQUIPMENT

#### OLIVER TRACTOR DISC HARROW

OLIVER TRACTOR DISC HARROW in 20-disc size is made for use with the small size tractor. It is controlled by the operator of the tractor and in this way requires only one man to operate both tractor and harrow. Built especially durable at each wearing point, easily operated and doing the best possible job of discing—that, in short, is the story of the construction, the operation and the work of the Oliver NTDH

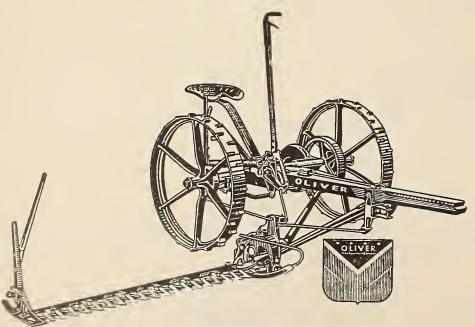

#### OLIVER SELF DUMP RAKE

THE OLIVER SELF DUMP RAKE is built with a strong rigid

THE OLIVER SELF DUMP RAKE is built with a strong rigid frame of hot riveted angle steel. A heavy truss rod runs the entire length of the frame and supports the center of the rake. It is a bridge trussed frame that is built to prevent sagging or twisting. The rake teeth are lifted, and the hay dumped, by a pair of strong lift rods operating from each wheel. The ends of the lift rods are shaped into pawls to fit into the ratchets in the wheel hubs. The large number of ratchet teeth in the wheel hubs cause the rake to dump, the instant pressure is applied to the foot dump pedal. The rake teeth drop to the ground immediately, without leaving an unraked strip next to the windrow.

The teeth are made of heat treated high carbon spring steel. They are strong, but have sufficient springiness to prevent breakage when they encounter an obstruction.

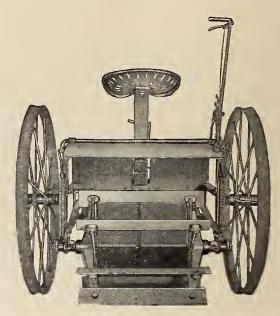

The wheels are unusually strong. The concave tires are 1% inches wide and 54 inches in diameter.

Oliver Mower

#### OLIVER STALK CUTTER

OLIVER STALK CUTTER is steel built throughout with heavy angle steel frame and equipped with latest type steel wheel with dust-proof boxing, which makes it one of the strongest and most durable machines on the market, one that has had a thorough test under the most exacting conditions, thereby proving its worth.

Oliver 9 Blade Stalk Cutter

#### **OLIVER MOWER**

THE OLIVER MOWER is a fast-cutting, long-lasting machine, in which every part does its share.

The Oliver Mower Frame is strongly built and braced with a solid cross member to the pitman drive end, and braced back again to the tongue. This Big Frame holds the driving parts in rigid alignment and provides the solid base that allows the cutter bar the flexibility it needs, while holding it to its straight cutting line. The Oliver Frame is big, sturdy and solid. It will last and do its work, for many years to come.

In the big frame the full length solid axle runs in long roller bearings, spaced far apart, to give the lightest bearing load, which aids in securing the easiest draft.

All gear teeth of the spur gears, and also the bevel gears are correctly designed to mesh and secure the greatest power with the least loss to play and friction.

The clutch is of the four-jaw dog type, wide on its faces to keep down wear, positive and sure in action. It is controlled by a two pad, double acting foot lever that throws it quickly, either in or out.

No mower has any higher cutter bar speed than the Oliver—many are slower. This higher speed is very essential in cutting wild hay and especially so when mowing roadsides.
