

TACHIKAWA PLANT OF THE HITACHI AIRCRAFT CO. N-X-22

90.17-2009

AIRCRAFT ENGINES

SUBJECTS INVESTIGATED

A. Functional Analysis

1. Published material, complete
2. None available
3. No conclusion

B. Structural Analysis

None

C. Damage Assessment

None

N Report 22

NX-22 90.17-2009

Hitachi A/C Co.

Damage to the production facilities of this plant was at least 98%.

All production stopped the time of the bombing and no effort had been made to repair the buildings or to resume production.

The engine test cells east of the main plant were undamaged but all instruments had been removed and they had all apparently been abandoned some time before the close of the war.

No information regarding production records of this plant was available.

H Report 22

HX-22 90.17-2009

Hitachi A/C Co.

Damage to the production facilities of this plant was at least 98%.

All production stopped the time of the bombing and no effort had been made to repair the buildings or to resume production.

The engine test cells east of the main plant were undamaged but all instruments had been removed and they had all apparently been abandoned some time before the close of the war.

No information regarding production records of this plant was available.
