增補上海輸入物價指數表說明書

財政部駐滬調查貨價處主任盛俊

物價指數之編製。以分類、選材、及計算方法等問題之解決為最要。各國經濟學者及統計專家之所討論。大抵集中於此數點。而據一般結論。多以為此項問題之解決。與所抱宗旨有密切之關係。初無一定不易之成法。亦無絕對的當否之可言也。蓋指數之為用。猶軍用之制勝然。人人可以隨便取用。而亦無人恰巧適用。欲求體用之悉稱。計惟有各按所需。分別裁製。此於一般的普通指數以外。所以有各別的特殊指數也。

教授甄萊云。『社會上某種特殊階級所消費之物品。各物價表排列愈詳切。則此種階級所有之幣值。其所表示之變遷。必愈準確。是故各種階級。宜按其用品之種類。與用錢之數額。為之各編一指數。』（見原著貨幣論二四二頁）又教授勞夫林亦稱『同此一種算法。以所抱宗旨之不同。在此所見為無誤者。在彼容以為不當。此無可疑者。總之。欲斷定所用方法之是否適當。全視乎所欲求者究為何物。』（見原著貨幣原理第一四八頁）凡此皆足以明作法之與宗旨。實具有因果之關係。宗旨有別。斷不能強作法以從同也。

本處自八年九月起。編有上海物價指數表一種。此為一般的躉售的性質。故現已改稱上海躉售物價指數表。所以見一般物價之趨勢。示幣值升降之準繩也。編行以來。外界間有評議。以為所分類目、所選物品、與所選標準年度。俱不甚允當。不足以為修改進口稅則之根據。因主張重行改造。以求適用。姑無論所列類目、物品、標準年度等項

是否允當。但此項指數。原不以修改進口稅則為目的。持此以相論難。要於本處歷年編製之旨趣。不無隔膜。非特此項指數。不足為修改進口稅則之根據。即本年另編之上海輸出入物價指數。亦未嘗以修改進口稅則為目的。緣所分類目。係照密哲爾教授所倡加工程度。晰為原料、生產、消費三大類。以見各類物品供求狀況之各別的原因。便與美國聯邦銀行準備局所編國際指數相比較。而所選標準年度。又為戰前之民國二年。期與上海躉售物價指數及世界各著名指數相一致也。

雖然。搜集資料。編製統計。以備修改稅則之參攷。此為本處主要職務之一。此項特殊指數。如果針對稅則。另行纂輯。自於將來進口稅則之修改。不無裨益。良以照此修改。是完全以指數為根據。一如上屆修改稅則序之於棉布棉紗部分然。此固可以省略無數手續。無煩調查全部之物價。即退一步言。指數僅供參攷之需。不足為核定各項稅率之根據。然果有若網在綱之特殊指數。則於各類物價之高下。現行稅率之虛實。及修改後關稅收入之盈縮。亦不難先得其大略。本處依此見解。用於上海輸出入物價指數表外。更編一增補上海輸入物價指數表。增補云者。蓋言題材分類。比前加詳。所以補前表之所不足也。

編製之法。完全依照上述之旨趣。一以現行進口稅則為對象。例如物品分類、物品次序、及標準年度等皆是。所略為變通者。稅則都凡十五類。而此則僅有十四類。以第十五類為未列名貨類。悉屬從價課稅品。無論照第五百八十二條抑或其他未列名、他類等條完稅。實際上無所出入也。又第一類第四目染紗織布品。已散見第三目漂白或染色棉布品及第五目棉花、棉線、棉紗及棉製品。生熟獸畜產類

本分兩目。但第二目之骨、毛羽、髮毛、角、介殼、筋、象牙等品。過涉細碎。上海進口無多。概從省略。按現行稅則之標準年度。係照各國通例。為修改以前最近之六個月。即自十年十月起至十一年三月底止。跨涉兩年。頗欠整齊。故改以十一年十二個月之平均價為本表之基本價格。至物品之選擇。視上海輸出入物價表為寬。即以十一年之貿易額為準。凡全國進口額在關銀五十萬兩以上者。悉予採入。所除外者。視(一)到貨無常。如洋麥、洋麵。(二)無甚批市面。如車輛機器、船艇。(三)上海進口無多。如日本土布、生牛皮、籐皮。(四)貨目繁統。如傢具、乾鮮菜蔬等類而已。其有進口額不及五十萬。而所隸類目。別無大宗之物品可資選列者。亦酌量採入。以免闕漏。如石棉粉、螺甸鉚扣、絲質金線之屬是也。每個物品。各系以標準品。自一種乃至二三種。大抵以進口最多、銷行最廣者為上選。總計全表所列物品凡一百二十三。物價二百十八。在本處所編各指數表中。允以本表所包物品為最富。茲表列如上。

| 名稱 | 物品 | 物價 |
|--------------|-----|-----|
| 增補上海輸入物價指數表 | 一二三 | 二一八 |
| 上海輸入物價指數表 | 七七 | 一一五 |
| 上海輸入貨物關價指數表 | 一〇六 | 二八四 |
| 上海輸出物價指數表 | 六一 | 七九 |
| 上海躉售物價指數表(註) | 九三 | 一四七 |

註 此表係指製指數之原表而言。其全表現包括上海輸出入兩表在內。總計物品一百三十五。物價二百五十三。

勞夫林云。『物價表載有鉅額之物品。實比各個物品之適

當的比重與確切的計算尤為重要。」（見原著貨幣原理第一六六頁）洵如斯言。則本表之所以取精用宏。或亦自有其獨到之處。惟比重之際。不得不將同一物品下所系各物價。用算術法先行平均。蓋各個物價別無數量可據也。

比重數量。同以十一年之全國進口淨數為標準。單位關銀十萬兩。全表統計。凡六億三千零八十萬兩。佔是年全額百分之六十七。以棉花及棉貨類之額數為最鉅。食品、飲料、草藥類及燭、膠、油、皂、漆等類次之。而以石料、及泥土製成物類為最小。詳見附表三。

各種物價。採自本處所編之上海貨價季刊。與其他各物價表不同。蓋一則利用固有材料。以每月之平均價計算指數。而一則特別調查。限於每月十五日之物價。為計算指數之根據也。貨幣單位。為關平銀一兩。期與稅則相融合。此亦與其他各物價表之用上海規元者不同。

計算採比重算術平均法。與上海輸出入物價指數表及關價指數表同。其公式如下。

$$\text{指數} = \frac{\sum P_o Q_o \frac{P_t}{P_o}}{\sum P_o Q_o}$$

P_o 為標準年度即十一年之市價。P_t 為擬算指數各月之物價。Q_o 為標準年度即十一年之全國進口淨數量。P_o Q_o 為標準年度即十一年之全國進口淨價值。即本表之比重量也。其與上海輸出入指數微異者。本表之標準年度係屬固定的。而彼則為連鎖的。所以採用固定制者。以本表宗旨。重在估算稅率。明示此後物價究比修改稅則時相差幾何。而不在後此各年月間之相互的比較也。但現行稅則於施行四年後。按約重行修正。則此項標準年度自應拋棄。而代以將來改稅時之標準年度。茲將增補上海輸入物價表。增補上海輸入物價指數表及增補上海輸入物價指數比重物品表分別附載於後。用便檢查。 十四年九月

The Supplementary Index Number of
Import Prices in Shanghai

*By T. Sheng, Chief Director, Bureau
of Markets, Ministry of Finance.*

Regarding the compilation of price index numbers, the discussion and controversy have centred on the standard of classification, the choice of representative commodities and the method of calculation. Economists and statisticians are generally agreed that these could be answered in accordance with the purpose of the author. There is hardly a fixed method which governs all existing index numbers. It is just like a uniform which might fit anybody, and yet not fit exactly anybody. Thus the compilation of various special index numbers are considered necessary.

Prof. David Kinley said, "That the more exactly the articles in the table are those consumed by a special social class, the more accurately, as has been said, does the result represent changes in the value of money for the members of that class. We might, therefore, construct a table of index numbers for each social class, according to the different kinds and amounts of wealth that its members

consume." (Page 242, Money, by David Kinley) Prof. J. Laurence Laughlin also states: "It is doubtless that one method of computing an average may be correct for one and unsatisfactory for another purpose. In short, much depends upon what it is sought to accomplish before we can say that this or that method is the only right one." (Page 14^o, Principles of Money, by J. Laurence Laughlin) In a word, the purpose of inquiry decides the use of "Mean".

Since September, 1919, this Bureau has been compiling a wholesale price index number in Shanghai for demonstrating the general price level and the value of money. Some criticize it as being unsuitable for the purpose of import tariff revision with regard to the method of classification, the choice of representative commodities and the basic year used in the index number and propose to revise these points accordingly. No matter what these points are, we have had no intention whatever to use it as our base in future import tariff revision. The same is true with the index numbers of import and export prices in Shanghai, which made their first appearance last spring and are divided into three main groups; namely, raw materials, producers' goods and consumers' goods, according to the stage of

manufacture, based on the difference among the factors affecting the supply of and the demand for commodities that belong to the several groups. This method is proposed by Dr. Wesley C. Mitchell adopted by the U. S. Federal Reserve Board in its International Indexes. This index takes the pre-war price in 1913 as the base in order to coincide with our wholesale price index number and other famous index numbers on the world.

Nevertheless, the collection of materials and the compilation of statistics for future tariff revision are the main function of this Bureau. It would facilitate the future revisions of the tariff considerably if a reliable index number should be compiled in accordance with the present tariff, as in the case of cotton yarn and cotton goods during the last revision. Such a special index number will throw light on the price level of the various groups of commodities, the actual percentage of duty according to the present tariff and the amount of duty increased after revision, even it can not be wholly relied upon for the purpose of revisions. Thus this Bureau undertakes, after the compilation of the index numbers of import and export prices in Shanghai to construct a supplementary index number of import prices which gives more details in classification and in the choice of materials.

In this index number the method of classification, the order of commodities, and the basic year, etc., are in perfect agreement with the present tariff.

A slight difference exists and this is that while the present tariff contains altogether fifteen groups, this index number omits the last group, being composed entirely of *ad valorem* goods. As a matter of fact, if they are charged according to the tariff number 582 or unenumerated or unclassed goods in other groups a practical something will result. As the cotton piece goods, yarn-dyed, contained in the fourth section of the first group already appear in the third section "Cotton Piece Goods, Printed" and the fifth section "Cotton, Raw; Cotton Thread, Cotton Yarn and Manufactures of cotton" it is left out. In the tariff, animal substances, raw and prepared, are divided into two sections. The second containing bones, feathers, hair, horns, shells, sinews, tusks, etc. is omitted because of their trifling value in imports. In the present tariff the basic year is taken from October, 1921 to March, 1922. As it overlaps in years and is somewhat irregular in form, the average price of the twelve months in the year 1922 is used for this index.

Regarding the selection of commodities those whose import value exceeded HK\$ 500,000 in the

year 1922 have been nearly all included, except the following groups (1) Occasional imports such as foreign wheat and foreign flour, (2) Articles having no wholesale transactions like vehicles, machinery, ships and boats, (3) Goods sold in small quantity in Shanghai, e. g. undressed hides and skins, Japanese imitation native cotton cloth and rattan skin, (4) Unenumerated goods, say, furniture and dried and fresh fruits. Certain commodities being less than HK\$50,000 in their import value are chosen also owing to the lack of staple commodities in the respective groups such as asbestos boiler composition, button, shell and thread, gold, imitation, on silk. Each commodity is represented by from one to two or three varieties which are chosen according to the value of import and the amount of consumption.

The whole table contains 123 commodities and 218 quotations and is larger than any other index number compiled by this Bureau. The commodities and quotations contained in our various index numbers are given as follows:—

| Name | Commodities | Quotations |
|---|-------------|------------|
| 1. The Supplementary Index Number of Import Price in Shanghai | 123 | 218 |
| 2. The Index Number of Import prices in Shanghai | 77 | 115 |
| 3. The Index Number of Customs Import Prices in Shanghai | 106 | 284 |
| 4. The Index Number of Export Prices in Shanghai | 61 | 78 |
| 5. The Index Number of Wholesale Prices in Shanghai | 93 | 147 |

Prof. J. Laurence Laughlin says: "It is more important to have a large number of goods quoted in the price tables than to attempt accurate calculations of the proper weights to be attached to each article" (Page 166, "Principles of Money") The large number of commodities and quotations included in this table gives it precedence to others, while under single commodities an arithmetical average is obtained first, when there are several items.

Weighting is based upon the total net value of imports of the whole country in 1922, taking HK\$ 100,000 as the unit. The total value of commodities in this table amounted to HK\$ 630,800 00 occupying 67% of the total import value in that year, among which "Cotton and Cotton Goods" had the largest portion, "Food, Drink and Vegetable Medicines" with "Candles, Gum, Oils, Soap, Varnishes, Wax, etc." next, while "Stone and Manufactures of Earth" had the least part. [See Table 3]

Quotations are obtained from the "Shanghai Market prices Report", being the average for each month, while the other index numbers are based on quotations on the fifteenth in each month. Unlike the other index numbers which are quoted all in Shanghai taels, it bases on HK taels as the unit in order to agree with the tariff.

Similar to the index numbers of import and export prices it adopts the weighted arithmetical method as shown in the following formula.

$$\text{Index Number} = \frac{\sum P_1 Q_o}{\sum P_o Q_o} \cdot \frac{P_1}{P_o}$$

P_o = price in the basic period.

P_1 = price in the given period.

Q_o = quantity in the basic year.

In this case, P_o is the price in 1922; P is the price in any given period; Q_o is the total quantity of imports in 1922 and $P_o Q_o$ is the total net value of imports in 1922 being the weight in this table. This index number employs the fixed system, because of the fact that it emphasizes the valuation of the tariff aiming to show the difference between the actual market price and the existing tariff from time to time, regardless the comparison between each succeeding month. If the present tariff is revised after four years as per the Treaty, the basic year in this index number has to be changed to that year, when the next revision will take place. The following gives the supplementary table of import prices in Shanghai, the supplementary index number of import prices in Shanghai and the table showing the number of commodities, weights and their percentages in this index number.

September, 1925
