TO HIS HONOUR,

The Lieutenant-Governor of the Province of Ontario.

MAY IT PLEASE YOUR HONOUR :

The undersigned has the honour to present to your Honour, Report on the Operations of the Department of Lands and Forests for the fiscal year, April 1st, 1936, to March 31st, 1937.

PETER HEENAN,

Minister.

HONOURABLE PETER HEENAN,
Minister of Lands and Forests.

We have the honour to submit herewith a Report on the Operations of the Department of Lands and Forests for the fiscal year, April 1st, 1936, to March 31st, 1937.

W. C. CAIN,
Deputy Minister. Lands and Forests.

C. H. FULLERTON,
Surveyor-General.

THE MINISTER'S ANNUAL REPORT
TO END OF FISCAL YEAR—MARCH 31, 1937

ORGANIZATION

The organization structure of the Department consists of,—the Main Office, which includes the Executive Officers, the Lands Branch, the Accounts Branch, the Records Branch, the Provincial Land Tax Branch, the Forestry Branch, the Woods and Forests Branch, each under their respective Chief Clerks, and the Surveys Branch, under the Surveyor-General, all of whom with the various field offices and staffs engaged in the work of administration are under the Chief Executive authority of the Department.

The activities of these units within the Department for the fiscal period are set forth in the appendices and other information appearing in the body of this report.

These activities, in one field or another, penetrate into every part to the remotest points in the Province which covers an area of 412,587 square miles and whose boundaries extend from South of 42° to North of 56° North Latitude.

The field and variety of Departmental activity are therefore very large and affected by a diversity of local topographic and economic features demanding intensive administrative care and involving exceptional responsibilities.

The information herein, because of its volume and variety, is but briefly supported in narrative form but it includes a specific record of the extent and scope of Departmental activity, being confined largely to facts in the briefest comprehensive form.

STAFF

Each year in the direction of the administrative organization, death, transfers, resignations, and superannuations involve the allotment of new duties, promotions and other staff changes.

During the fiscal year which closed on March 31st, 1937, a number of such changes took place.

Among these, the demise of Alexander McLean, formerly senior clerk in the Accounts Branch, is regretfully noted. In the Department and out of it Mr. McLean will be remembered for his kindly affable nature and his truly British convictions.

After long and faithful service of forty years in the Department of Lands and Forests, Edmund M. Jarvis was superannuated, as noted in Appendix 1 to this report. Though his active connection with the Department is terminated, Mr. Jarvis carried with him the felicitations of his associates throughout the Department when he left the Service.

The staff has been energetic and faithful in meeting the demands of service in these trying times.

LEGISLATION

The Burlington Beach Act 1937 gave Burlington Beach, a Crown area, formerly a Provincial Park, limited Municipal status and transferred it to the Administration of the Department of Municipal Affairs.

Repeal of Act respecting Legislative Secretary for Northern Ontario Act.

The Land Surveys Amendment Act to provide power for more rigid control of Ontario Land Surveyors.

Amendment to the Provincial Land Tax Act to provide power to adjust within a school section as well as where corporation tax paid.

Amendment to the Provincial Parks Act providing for automatic withdrawal from Municipality of any area incorporated into a Provincial Park.

The Settlers' Pulpwood Protection Act provides power to require information re prices and details of dealings in pulpwood and to make regulations:

- (a) governing the sale and supply to any company of pulpwood cut by any settler, or of pulpwood cut from the lands of any settler;
- (b) fixing the kinds and quantities of pulpwood which may be purchased by any company within any stated period, having regard to the requirements of such company for such period;
- (c) fixing the prices to be paid by any company to any settler for pulpwood cut on settlers' lands and controlling the method of measuring such pulpwood; and
- (d) generally for the better carrying out of the provisions of this Act.

LAND TRANSACTIONS

In the appendices devoted to dealings with Crown Lands for the year, may be noted area and revenue in appendices 3 and 5. Appendix 12 and Appendix 13 give details and classifications of areas disposed of.

In comparison with recent years the volume of sales and Free Grants for settlement purposes appears as follows:

<i>Year</i>	<i>Sales</i>	<i>Free Grants</i>
1932-1933.....	917	602
1933-1934.....	956	416
1935-1936.....	683	533
1936-1937.....	514	351

Classified by locality, these figures appear as follows:

SALES

	1932-33	1933-34	1935-36	1936-47
Algoma.....	11	10	10	12
Cochrane.....	595	591	443	364
Kenora.....	14	16	8	3
Nipissing.....	11	15	13	9
Sudbury.....	72	76	78	56
Temiskaming.....	113	113	85	52
Thunder Bay.....	39	39	15	16
Sundry.....	62	100	31	2
Totals.....	917	956	683	514

FREE GRANTS

(including Soldiers and Sailors)

	1932-33	1933-34	1935-36	1936-37
Algoma.....	2	2	3	2
Kenora.....	56	62	102	56
Nipissing.....	47	36	57	20
Sudbury.....	134	60	38	27
Parry Sound.....	34	24	35	16
Thunder Bay.....	136	77	74	46
Muskoka.....	46	10	20	6
Rainy River.....	110	110	106	93
Sundry.....	37	35	98	85
Totals.....	602	416	533	351

In the last annual report of the Department it was pointed out that the sale or location of settlers' lots in any way remote from existing roads, required very close attention. During the year many applications have been declined because the bush lot was too far from a road and the application suggested that the motive in making application was to obtain pulpwood and not farm land.

It must also be remembered that no new Free Grant lands have been set aside for many years and what remains has been available for so long without being located that it is an indication that such land is not desirable to the prospective settler due to non-arability or other similar cause.

For these and kindred reasons both Sales and Free Grants have consistently decreased this past year, every district showing a decrease as set forth in the foregoing table.

Included in the Free Grants are locations in Sale Townships to Returned Soldiers to the number of 46.

The names, addresses, and salaries of Crown Lands Agents and Homestead Inspectors, with dates of respective appointments, appear in Appendix 2.

RELIEF LAND SETTLEMENT

In the annual report to March 31st, 1936, more or less complete details of distribution, stock, and land holdings and numerical strength appeared.

Since that time to date there have been no new placements but forty-two additional families have abandoned their holdings, leaving still on the land four hundred and twenty-three families.

The following table shows the distribution of these remaining by locality together with figures showing the total sent to each locality and the number of returnees from each:

<i>Locality</i>	<i>Total Settlers</i>	<i>Settlers Returned</i>	<i>Settlers still on the land</i>
Monetville.....	14	4	10
North Bay.....	5	2	3
Matheson.....	124	32	92
New Liskeard.....	81	25	56
Kapusksing.....	105	62	43
Dryden.....	3	1	2
Cochrane.....	93	25	68
Port Arthur.....	146	22	124
Fort William.....			
Sudbury.....	3	2	1
South River.....	3	1	2
Holland Marsh.....	18	—	18
Elsewhere.....	5	1	4
Totals.....	600	177	423

It should be borne in mind in reading these figures that the number of returnees from any of these localities is not a direct reflection on the locality but rather on the individual involved. The causes of abandonment have been carefully dealt with in previous reports and there is no need to repeat them here.

Lands abandoned have either returned to the Crown or to the vendor under agreement for sale.

Where possible chattels have been salvaged and accounted for but after a period of use and exposure, they are generally found to be of little or no value.

This particular thought applies especially to livestock, as in numerous cases of abandonment it has been found that the cost of feeding and caring for abandoned stock until disposed of more or less obliterates their value.

Unoccupied buildings rapidly depreciate in value due to depredations and the action of the elements.

Relief Land Settlers remaining on the land have in numerous cases done exceedingly well. In other cases, no real progress is being made.

As a matter of record it should be noted here that the policy with respect to ownership of chattels from the inauguration of the Relief Land Settlement work has been that chattels supplied with Relief Land Settlement funds are

held in trust only by the settler pending the time he obtains his Crown Patent or has paid the purchase price in full in cases where title is under Agreement for Sale only.

It has consequently been necessary for the Department to exercise direct control of these chattels in the endeavour to prevent their conversion in innocence or by design.

While the cost of administration has been borne by the Province in all probability the Provincial share of the total outlay is less than would have been the case had those involved remained on direct relief in large centers and there is the certain obvious difference that those who have received assistance and remained on the land have had the benefit of an opportunity to apply themselves, a change in environment and for the most part improved health.

In many cases substantial payments have been made on the land.

Much new land has been cleared and placed under cultivation. All concerned are potential owners of homes and many have done sufficiently well as to be determined to remain where they are.

Time and changing conditions, however, will be the deciding factors as to whether the undertaking as a whole may be regarded as a success.

PROVINCIAL LAND TAX ACT

The operations under this Act accounted for tax collections to the extent of \$178,880.63, less a revenue refund of \$258.78. This was an increase of more than \$46,000.00 beyond that of last year. The total cost of administration amounted to $5\frac{1}{4}\%$ of the collections.

Under Section 18 of the Act, where provision is made for the forfeiture of land on which the taxes remain unpaid for at least two years, nearly six thousand parcels have been forfeited. Of this number about four hundred have been redeemed. Approximately three thousand five hundred of the forfeited parcels contained an area of less than five acres each, over ninety percent of them having been acquired ostensibly for summer resort purposes but evidently held for speculation. Many of the parcels taken up years ago as summer resorts were acquired when no building restrictions were imposed and the owners not having any substantial vested interests beyond the original purchase price, generally low, decided to avoid taxes rather than pay them and hence have been the willing victims of forfeiture.

A large number of forfeited areas consist of lots lying in abandoned town-sites.

It may be remarked that exceptional leniency has been practised with those in arrears and only after several years, in addition to the two-year period as provided in the Act, have elapsed, has any forfeiture been declared. Redemption privileges are accorded all delinquents who pay up within a period of twelve months after date of forfeiture.

Reasonable opportunity is afforded those who desire to repossess their holdings after the expiration of the redemption period. Owners of properties subject to this Act are beginning to better appreciate its purpose and essential nature and it is not expected that forfeitures will be so numerous in future although where unpaid arrears accumulate the forfeiture clause of the Act will be invoked.

SUMMER RESORT LANDS

With returning prosperity, interest in Ontario's Summer Resort possibilities shows a sharp increase, the total area involved in the fiscal period including an increase of about 35% over that of the previous fiscal year.

Perhaps no country is so singularly fortunate as to contain such large areas so admirably adapted to the purposes of the vacationist and the Department is keenly aware of the possibilities for direct revenue from this source as well as its influence on general development throughout these sections in the bush and lake area.

The closest co-operation is given to the Department of Game and Fisheries in granting privileges on Crown Lands to vacationists in order that no effort may be lost to maintain game and fish life which provide a large part of the attraction to the visitor.

As the operation of commercial tourist camps is now subject to certain regulations involving the payment of an annual fee for outfitters licenses, etc. issued by the Department of Game and Fisheries, it is now possible to check up on concerns to assure proper sanitary conveniences and satisfactory accommodation for the travelling public.

PROVINCIAL PARKS

The highway through Algonquin Park from headquarters to Whitney Village was completed during the year but considerable grading and gravelling is still required. This entire highway has opened to the travelling public one of the many paradises of Ontario and thousands of tourists have already enjoyed a new-found pleasure in the attractive features of nature's great playgrounds.

Old trails and portages to a distance of fifty-two miles have been cleared and eleven miles of new trails opened. The Park boundaries were improved and almost the entire boundaries are now well defined.

Five lakes were restocked with eighty-five thousand lake trout, in co-operation with the Department of Game and Fisheries, and there was an increase of five hundred in the sale of angling licenses over last season.

The winter was favourable for fur-bearing animals, and they are increasing at a normal rate. One of the ten elk recently added to the Park wandered out of the Park and has disappeared but the others are seen from time to time by rangers and tourists.

In Quetico Provincial Park there has been increased activity in the way of tourist traffic and there is now one well patronized tourist camp in the Park and one immediately adjacent to it with inquiries respecting others. The fishing has been exceptionally good and tourists are now entering the Park through Lac La Croix on the westerly boundary of the Park, which is a comparatively new port of entry. A general supervision has been maintained with the aid of the Forestry aeroplane in that district and there has, therefore, been very little trouble from poachers. The fur-bearing animals, more particularly beaver, are on the increase. Fishing in the many well-connected waters of this Park continues to be a major attraction, while the canoe routes are a source of much enjoyment by those not particularly interested in fishing.

Commercial camps in Lake Timagami report a gradually increasing business and they hold out great hopes for the coming season. The demand for privately owned summer resorts continues and during the season several cottages were erected and more islands leased. The fishing was reported fairly satisfactory.

The continued increase in the number of wild deer in Rondeau Provincial Park rendered it necessary, as in the past, to reduce the number by one hundred during the past winter.

Well directed and officially organized plans extending over a reasonable period are being laid to eliminate the roving herds, numbering probably four hundred, now closely inbred and finding it difficult to obtain sufficient sustenance. A few years ago adequate measures were taken to provide a large enclosure to care for such numbers of deer as will entirely meet Park needs and this makes it possible to free the park of the remaining unrestrained numbers that are a constant menace to the young tree growth of the Park. Until such time as this is accomplished, all projected programs respecting the reforestation of certain areas must be deferred as the deer in their foraging treks leave no vestige of the tender foliage of new plantations.

As a stop-over flight from North to South, large and numerous flocks of wild ducks and geese visit the marshes in the Park each fall, and afford the followers of Nimrod an ample opportunity of testing their skill and bagging the limit. There are now four families of large eagles which make their home in the Park, and add to the attractions provided by nature for the tourists.

The shaded drives throughout the Park continue to attract thousands of visitors, many from the United States, during the summer season.

TIMBER ADMINISTRATION

The area under timber license at the end of the fiscal year is indicated at 12,733 square miles as compared with 13,300 square miles a year ago.

Sales of timber during the fiscal year were made to the number of 86. In the previous year, 80 sales were made.

Of the total sales as shown in Appendix 11, it is observed that 49 covered areas of one square mile or less while 27 covered two to five square miles each, there being but ten sales where the area of any was in excess of five square

miles. The significance of this lies in the fact that small mixed lumber and pulpwood operators took advantage of the chance of securing moderately-sized contracts extending over short periods and involving smaller overhead expenses in the way of ground rent, fire charges, and collateral lodgements.

The areas disposed of were well distributed throughout the Province thus providing a general absorption, rather than a localized one, of labour.

The heavy and continued snow falls throughout the logging areas seriously impeded operations and resulted in a considerable number failing to fill their contract quantities. The weather is a very important factor in conducting a lumbering business and, when unfavourable weather conditions thwart progress in the bush, the reflection on subsequent stages of the work is obvious. Notwithstanding the uncertainties facing the industry, the optimism of the hardy bush man is one of its redeeming features and the total output in sawlog timber was, as hereinafter shown, considerably in excess of the previous year.

Pressing demands upon the Government from different portions of the northern part of the Province to bring into production large areas hitherto held idle and to put back workers into gainful employment were fully faced.

The Forest Resources Regulation Act enabled the Department to enter into close negotiations with large holding companies respecting undeveloped areas acquired years ago but merely held for book inventories and building up alleged assets. The unemployment situation, while rapidly improving, required attention and the slogan "get men to work" prompted the Government to lay down a program for re-allocating certain extensive pulpwood limits. This program is well under way, the desire of the Department being to provide existing concerns with ample and at the same time the most accessible timber to adequately meet their needs and at the same time to arrange for reasonable supplies to meet requirements for new industries.

Numerous conferences have been held between the Department and representatives of the interests immediately concerned and tentative arrangements have been made in a number of cases to accomplish the above stated objective. Up to the fiscal year ending March 31, 1937, only two new agreements have been entered into under the re-allocation measure, one with the General Timber Company, and the other with the Pulpwood Supply Company. Inasmuch however as both these agreements now form the subject matter of important amendments, their printing and inclusion in this report is withheld, it being considered advisable to have each agreement, when fully completed covering all necessary modifications, printed and embodied in the annual report for 1937-38.

The completed agreements will provide for the construction and operation of sulphite pulp mills within Ontario. A complete re-arrangement of certain large pulp concessions and provision for new industries will, it is confidently expected, be accomplished during the coming year.

The revenue from timber sources was \$2,809,980.47, as classified in Appendix 9 to this report. It has increased over 13% over last year and is 50% more than in 1933-34.

This may be fairly attributed to generally improved business conditions and to the opportunities provided the operators by the Department in temporary stumpage reductions.

The economic effect of the increased employment provided is of substantial proportions.

Export of pulpwood, which totalled 283,679 cords in 1935-36, is increased to 382,683 cords for 1936-37. Of this total, 114,235 cords were taken from Crown Lands, the cordage from privately owned areas not being subject in any way to Provincial control.

In last year's report verbatim copies of Order-in-Council March 23, 1935, and July 24, 1935, providing for suspension of the Manufacturing Clause, appeared. All wood exported under this authority is for use in the manufacture of a product other than newsprint. One definite accomplishment resulting from this is represented in increased employment shown in the following table portraying increased bush operations.

BUSH OPERATIONS

The number and extent of bush operations increases is reflected in the following:

<i>Year</i>	<i>Operators</i>	<i>Camps</i>	<i>Employees</i>
1932-33.....	110	214	4,852
1933-34.....	149	282	11,184
1934-35.....	174	406	14,550
1935-36.....	178	410	17,543
1936-37.....	227	557	23,140

Production of red and white pine saw timber shows an increase of nearly 40% and, while jackpine decreased, other species production increased 60%.

The production increased from 753,077 in 1935-36 to 1,194,907 in 1936-37.

Total pulpwood production showed an increase of less than 5,000 cords.

There is undoubtedly a gap to be filled in building construction which under a continued but assured return to normalcy it is anticipated will gradually take place and widen markets for sawmill products as the pendulum swings steadily towards good times.

Present demands for our pulpwood hold promise of additional consistent increases in Departmental revenue in the future through increased operations and their concomitant provision of payrolls and increased buying power.

REVENUE AND EXPENDITURES

The totals for the past two years are as follows:

<i>Year</i>	<i>Collections</i>	<i>Expenditures</i>
1935-36.....	\$3,328,351.16	\$1,593,468.90
1936-37.....	3,655,228.66	2,305,514.18

REVENUE

The total collections for the year amounted to \$3,655,228.66, as indicated on Appendix 3.

From this figure certain amounts in the way of Fire Protection Charges and Revenue refunds, along with the Lac Seul Dam Interest Account, all of which aggregate \$616,478.04, should be deducted, leaving a net Revenue of \$3,038,750.62, which may be debited to a further extent by the sum of \$2,920.43, being the amount paid by the Dominion Government under Back to the Land Movement. This therefore would make the net Revenue \$3,035,830.19, as shown in Public Accounts, page 25.

The bulk of the Revenue, as may be surmised, accrued from the forest and incidental rentals and charges in respect thereof, the total as disclosed under the Woods and Forests Branch being \$2,809,980.47. Leases of land, water powers, etc., accounted for \$434,647.89, Provincial Land Tax \$178,880.63, Land sales \$81,650.13, and Park Rentals, Licenses, etc., for the balance.

Provided operations as now contemplated are not unnecessarily interrupted through any unforeseen incident such as a war or general business recession, the cut during the next year in the bush will be enlarged and the results will be reflected in the direct revenue of the Department. An anticipated half million dollars' increase in the gross revenue for 1937-38 is not it is considered too optimistic.

EXPENDITURES

Appendix No. 7 itemizes the expenditures totalling \$2,305,514.18, the largest item covering Forest Ranging, on which there was a net outlay of approximately \$1,450,000.00. This service looks after the complete Fire Protection System covering nearly two hundred million acres, all the scalers who measure timber and pulpwood, timber cruisers, and inspectors, patrols, and all park rangers in Algonquin and Quetico Parks. An abnormal fire season, unprecedented in Ontario, involving at times the services of over four thousand of a staff, severely taxed the appropriation.

On Surveys the sum of \$57,396.72 was spent while Reforestation, less the sale of certain wood and seeds, accounted for slightly over \$200,000.00, this sum being largely applicable to the running of the forestry stations, the planting of trees on municipal forest tracts, and the free distribution of nursery stock to thousands of applicants for wind and water protection, hedges, wood lots, and general reforestation. The sum of \$20,544 under Expenditures takes care of the annual charges Ontario must pay through the Dominion Govern-

ment to the Indians in Northern Ontario under Treaty 9 and Adhesion to same. By such Treaty the Indians surrendered all interests in the Albany River and areas north and south thereof in consideration inter alia of receiving an annuity from the Federal Government, passed on for payment to the Province under whose control is vested the area of land surrendered.

As times improve and the demand for more timber and land grows, there will be an increased expenditure to meet additional hazards and to provide extended staffs to measure timber and supervise extensive logging operations.

SURVEYS
FOREST FIRE PROTECTION AND CONSERVATION
REFORESTATION
RADIO COMMUNICATIONS AND AIR SERVICE

Are treated respectively in Appendices appearing in Parts 2 and 3 of this report.

APPENDICES

PART I

Appendix No. 1

Permanent Officials, Inside Service, for the Fiscal year April 1st, 1936 to March 31st, 1937.

Branch	Name	Designation	When Appointed	Salary per Annum	Remarks	
Main Office	Heenan, Hon. Peter	Minister	1934, July 11	\$8,000.00		
	Cain, W. C.	Deputy Minister	1903, Mar. 1	6,000.00		
	Ferguson, A.	Assistant to Deputy Minister	1915, Dec. 15	3,450.00

PART II

SURVEYS BRANCH

Appendix No. 16

REPORT OF SURVEYOR-GENERAL

The following survey work was carried on under instructions from this Branch during the year ending March 31st, 1937.

Beach lands of Lake Erie in front of part of the County of Bruce, by J. W. Tyrrell, O.L.S., of Hamilton.

Beach Lands of parts of Lake Erie and Detroit River, by R. W. Code, O.L.S., of Riverside.

Beach Lands of Lake Erie in front of part of the County of Essex, by Speight, vanNostrand, Ward and Anderson, O.L.S., of Toronto.

Beach Lands of Lake Erie in front of part of the County of Kent, by S. G. McDougall, O.L.S., of Ottawa.

Beach Lands of Lake Erie in front of part of the County of Kent, by E. D. Bolton, O.L.S., of Listowel.

Beach Lands of Lake Erie in front of part of the County of Elgin, by J. H. Smith, O.L.S., of Toronto.

Beach Lands of Lake Erie in front of part of the County of Kent, by F. H. Kitto, O.L.S., of Brampton.

Part of the south boundary of Algonquin Park (resurvey) by F. W. Beatty, O.L.S., of Pembroke.

Part of the south boundary of Algonquin Park (resurvey) by J. T. Coltham, O.L.S., of Parry Sound.

Part of the south boundary of Algonquin Park (resurvey) by E. L. Burgess, O.L.S., of Bracebridge.

Part of the north boundary of Algonquin Park (resurvey) by E. L. Moore, O.L.S., of North Bay.

Summer resort locations in the Township of Dickens, District of Nipissing, by F. W. Beatty, O.L.S., of Pembroke.

Summer resort locations in the Township of French, District of Nipissing, by E. L. Moore, O.L.S., of North Bay.

Summer resort locations on St. Peters Lake in the Township of McClure, County of Hastings, by C. F. Aylesworth, O.L.S., of Madoc.

Ranger Lake and islands in Townships 3G, 4G, 3H and 4H, in the District of Algoma, by E. M. MacQuarrie, O.L.S., of Sault Ste. Marie.

Certain township outlines in the District of Thunder Bay, by Messrs. Phillips and Benner, O.L.S., Port Arthur.

Parcels of land on transportation route from Hudson to Red Lake, on the English and Chukuni Rivers, District of Kenora (Patricia Portion) by J. A. Shirley King, O.L.S., of Toronto.

Parcels of land laid out on transportation route from Hudson to Lake St. Joseph, on Root River, District of Kenora (Patricia Portion) by J. M. Kilkeny, O.L.S., of Jellicoe.

Locations at Wade Station on the C.N. Railway, District of Kenora, by Albert McMeekin, O.L.S., of Kenora.

Certain lines in the Township of Cleland, District of Sudbury, (resurvey) by J. S. Dobie, O.L.S., of Thessalon.

Certain township outlines in the District of Thunder Bay, by R. S. Kirkup, O.L.S. of Fort William.

Severn Falls Road, Township of Matchedash, by G. S. Abrey, O.L.S., of Toronto.

TOWNSITE SUBDIVISIONS

The following townsites were laid out on lands patented subsequent to March, 1910, and plans were submitted and approval given as required under the Townsites Act.

1. Empire Townsite, Mining Claim T.B. 11618, Township of Summers, District of Thunder Bay.
2. Part of Lot 4, Concession 11, Township of Mountjoy, District of Cochrane.

MAPS

During the year Map No. 24-B, Part of Northern Ontario, was revised and published.

Statement of Crown Surveys completed and closed during twelve months ending March 31st, 1937.

Appendix No. 17

No.	Date of Instructions	Name of Surveyor	Description of Survey	Amount Paid
1	June 8, 1936	R. W. Code	Beach lands in front of part of Lake Erie and Detroit River	\$4,373.99

Appendix No. 18

Extracts from the Field Notes of the Survey of Base and Meridian Lines in the Nipigon Provincial Forest.

By R. S. KIRKUP, O.L.S., 1936.

The survey was started from the iron post planted by O.L.S. MacQuarrie at the south-west corner of the Township of Walters. From there we ran south astronomically six miles between the Townships of Vincent and McComber. This line ran through very rough, broken country, impregnated with innumerable small ravines and rocky hills. It was practically all burnt country and the fallen timber made packing in the supplies rather arduous and difficult. As the Blackwater River contained about fifty (50) portages within the Township of McComber, it was impossible to use this waterway as a means of transportation, the water being very low indeed, so that it resolved itself into a straight packing job.

The line was then carried east to the boundary of the Nipigon Forest Reserve tying into the thirty mile (XXXM) post on that boundary. Returning to the south-west angle of Vincent Township, the line was then carried west six miles more or less to intersect the east boundary of Summers Township, striking between the posts planted by O.L.S. MacQuarrie and O.L.S. Phillips and Benner the previous season.

These last twelve miles were through better country, well wooded and with a good percentage of merchantable timber standing. The party then moved to the south-west corner of Summers Township, and the last six (6) miles were run out to Lake Nipigon, forming the south boundary of Eva Township. This latter line was somewhat hilly being close to Lake Nipigon and there was considerable merchantable timber—white birch and poplar predominating. The party then returned to Warneford on the C.N. Railway, and returned to Fort William on October 9th.

The lines were well cut out and well blazed—a sky line being cut at the approach to all lakes and large rivers. Iron posts of the standard pattern were planted at the 3 and 6 mile posts and pits and mounds dug at these points. The other posts were well made and planted, and with one exception were mounded with a good cairn of stones. The exceptions were in an area where it was impossible to procure stones, and we dug pits and mounds around it.

Two bearing trees were marked from each post where available. The chains were checked against the standard before proceeding to the field.

The lines were chained twice—once with a two chain tape and in the opposite direction with a 100 foot tape. Both these chainages appear on the field notes submitted. The base lines of all triangulations were double chained in a similar manner, and the result entered in the field notes submitted herewith. In some cases in these triangulations, the calculated distance did not agree within a few tenths but we took the distance always as computed in chains.

Two instruments were used, one as a spare—being a Cooke 6 in. and Watt 6 in. Astronomical observations on Polaris were taken at frequent intervals

to check the direction of the line. I found that at this time of year it was quite easy to get Polaris at noon which saved a good many trips out at night. The country in general is composed of rocks and swamps, and is not recommended for agricultural development with the exception of some small areas near some of the lakes. Game of all kinds are prevalent and many deer, moose and bear were met up with. Fishing was not very good owing to the lateness of the season. Many mining companies are very active in this area, particularly close to Beardmore and many signs of this activity were met with. Many claims have been staked, and it is to be expected with the Spring that this will be increased.

Appendix No. 19

Extracts from the Report of Survey of parcels of land laid out for navigation purposes on the Root River in the District of Kenora.

By J. M. KILKENNY, O.L.S., 1936.

The survey was commenced on December 4th, 1936, starting at the northerly end of the standard gauge railway, and the field work was completed on January 5th, 1937.

At the northerly terminal of the standard gauge railway, there are twelve buildings now constructed and in use in the operation of the transportation system. All of the buildings except the manager's residence are of log construction. The manager's residence is constructed of sawn lumber, insulated and covered with building paper. A parcel of land designated as "M.K.1" was laid out around these buildings. A second parcel "M. K. 2", a water lot, adjacent to and north of M. K. 1 was laid out around the wharf at the terminal of the railway.

The right-of-way of the standard gauge railway follows a general south-westerly direction. From Root Bay to where the railway crosses Root Creek, approximately one and one-quarter miles, the country is generally flat or gently rolling. The soil is a mixture of clay and sand. There is no commercial timber near the railway, being mostly small jackpine and poplar, up to three inches, with scattered small tamarac. There are occasional small clumps of spruce up to eight inches.

After crossing the Root River the line follows the easterly slope of the river valley, which varies in width from a few hundred feet to one-half mile.

There are numerous precipitous rock outcrops in this portion of the line, occurring on both sides of the river. The timber consists mainly of small poplar, jackpine, tamarac and alders, with scattered clumps of spruce.

As the southerly terminal of the standard gauge railway, a parcel designated as M. K. 3, was laid out around the wharf at the terminal.

FLOWER PORTAGE

The buildings here consist of two log structures with board floors and roofs, used as a bunkhouse and kitchen, also a frame structure housing the boiler used in the operation of the railway.

A rock-fill dam and spillway provides control of the water level of Root River.

There is no commercial timber in the immediate vicinity, only small poplar and jackpine.

Parcel designated as M. K. 4, was laid out around the buildings and M. K. 5 around the dam.

LYNX PORTAGE

There is only one habitable building here, used as a combination bunkhouse and kitchen. This is of frame construction with a board floor and roof. There is also the boilerhouse.

A dam and spillway have also been constructed here to control the water level between Lynx and Flower Falls.

On both sides of the river here are good spruce and jackpine, up to fourteen inches diameter.

Parcels designated as M. K. 6 and M. K. 7 were laid out around the buildings and dam respectively.

NATTAWAY PORTAGE

One log building has been constructed here, in addition to the boiler house.

A dam and spillway have also been constructed.

No commercial timber exists here, merely small poplar and jackpine.

Parcels designated as M. K. 8, M. K. 9, were laid out around the building and dam respectively.

PART III
FORESTRY BRANCH

Appendix No. 20

I—FOREST FIRE PROTECTION

(1) *Legislation*

There were no changes in the Forest Fires Prevention Act nor in the regulations thereunder during the year.

Under Orders-in-Council passed on the 10th day of June and the 6th day of August, 1936, respectively, two additional areas were placed under Travel Permit:

(a) Commencing at Deepwater Rapids on the Bow River; thence due east to the north end of Tarp Lake and continuing east to the point at intersection between Crow River and the 90th Meridian; thence south along the 90th Meridian to the narrow channel in the large unnamed lake east of Jean Lake; thence westerly to the north east corner of Osnaburgh Indian Reserve; thence west along the north boundary of the said Indian Reserve to the north west corner thereof; thence north to the first rapids from the south end of Little Ochig Lake; thence northerly to Steep Rock Rapids on the Bow River; thence north easterly along the easterly bank of the Bow River to the point of commencement.

(b) The Townships of Sackville, Aldina and Adrian and that part of the Township of Marks lying within Lots 9 to 12 inclusive, Concessions 2 and 3 and Lots 4 to 12 inclusive, Concessions 4, 5, 6 and 7, all in the District of Thunder Bay.

(2) *Organization and Personnel*

It is with deep regret that the death is reported in October, 1936, of Mr. Fred Hamilton, District Forester at Cochrane. Mr. Hamilton had been with the Department for a great many years and his loss will be keenly felt. He is succeeded by the former Assistant District Forester who is in charge of the District as Acting District Forester.

The Chief Forest Ranger at Kenora left the service during the season and the Kenora and Dryden Chief Ranger Divisions were then placed under the direction of the Chief Ranger formerly at Dryden and his headquarters were removed to Kenora.

The Chief Ranger at Chapleau was transferred in December to Sudbury as Assistant in the District Office and a Deputy Chief Ranger in the Chapleau Division was promoted to act as Chief Ranger in charge there.

The District Forester in charge of the North Bay District resigned in November and the Assistant District Forester was placed in charge of the District as Acting District Forester.

The average daily force, including Chief and Deputy Chief Rangers, was as follows: April, 66; May, 443; June, 897; July, 947; August, 932; September, 803; October, 208. The largest number of men on duty at any one time, including Chief and Deputy Chief Rangers, was 951.

(3) *Expenditures*

The total expenditure for the year was \$1,649,550.04; the amount of Fire Tax collected was \$473,859.35 which with Miscellaneous Expenditure Refunds made up a total of \$497,154.31, leaving the net expenditure at \$1,152,395.73.

(6) *Equipment*

Due to the exceptionally high fire hazard during the months of July and August, it was necessary to purchase considerable extra equipment. The total major equipment purchased during the year consisted of 66 fire fighting units, 350,400 ft. of 1½ in. linen hose, 177 portable hand pumps, 106 tents, 902 pairs of blankets, 15 canoes, 11 motor trucks, 2 railway motor cars and 17 outboard motors. Of this equipment, a considerable amount of the fire fighting hose and a number of tents, blankets and trucks were for replacement.

(7) *Improvements*

Little or no improvement work was carried out with the exception of the construction of a storehouse at Sudbury, where a very fine building has been erected, the entire work having been carried out by members of the staff.

A great improvement was also made in the telephone communication for Algonquin Park by the construction of a copper, metallic telephone line between Algonquin Park Headquarters and Huntsville.

Sudbury.....	1 Moth
Algonquin Park.....	1 Fairchild KR34

(9) *Hazard Disposal*

No major projects were undertaken in this connection.

(10) *Travel Permits*

A total of 8,447 travel permits were issued covering 26,564 people. It was necessary during the month of July to close for a short period the roads leading in to Ranger Lake and White River in the Sault Ste. Marie District and during the month of August and part of September to close Quetico Park to all traffic.

Appendix No. 21

II.—REFORESTATION

1. NURSERIES

Nursery work continued on all three nurseries during the past year with approximately the same staff and handling of stock as in the last two previous years. The season was marked by an excessive heat wave and dry spell in mid-summer and an unusually cold spell with snow in the early autumn. Both these extremes created difficulties at the nurseries and some loss in stock but not to the extent of hampering the work for succeeding years.

NURSERY OPERATIONS

(a) Fertilizers

The four methods of maintaining fertility of the soil at the nurseries, namely, green manure crops, barnyard manure, commercial fertilizer and humus were continued this year.

(b) Seed

All seed used was collected in Ontario with the exception of Scotch pine, larch and a few pounds of other exotics. (See heading Seed Collecting).

(c) Seed Beds

Owing to the excessively cold weather and early snow in the autumn of 1936, seed bed work was interfered with somewhat and beds which were planned for the fall had to be held over until spring.

(d) Transplanting

Owing to the extreme heat of the summer of 1936 considerable loss was suffered in the transplant lines, especially those set out in the current year.

TABLE I.—QUANTITIES OF FERTILIZERS USED

Nursery	Manure	Commercial
St. Williams.....	417 tons	2,925 Lbs.
Midhurst.....	150 "
Orono.....	170 "	4,750 Lbs.

IMPROVEMENTS

(a) Buildings

No new buildings were erected on the nurseries this year except a small greenhouse at Midhurst. Painting and other necessary repairs were carried on as required.

(b) Roads and Bridges

Road building consisted of one-half mile of new road at Midhurst, a new entrance roadway to the park at Orono and necessary gravelling and maintenance work on all three nurseries.

(c) Other Improvements

At Midhurst, in co-operation with the Department of Game and Fisheries, four permanent cement dams were built at the outlet of four ponds which are being used for the propagation of speckled trout. Sixty thousand fingerlings were carried over during the winter of 1936-7.

On all nurseries, fences, hedges and fire lines were repaired and maintained.

PROTECTION

(a) Fire

In spite of the extreme fire hazard during the summer of 1936 no fire occurred at Orono or Midhurst while a small one of ten acres was reported at St. Williams. Many fires were extinguished on properties located near the nurseries.

(b) Insects

The bark beetle—*Ips calligraphus*—has appeared in one or two places in the province this year but not in any of the nursery plantations. In the St. Williams area control measures were carried out on plantations infected within close proximity to the nursery. Inspection was carried out at Midhurst for the sawfly larvae, white pine weevil, Nantucket shoot moth and spruce gall aphids. At Orono no damage was reported from weevil or sawfly and the control measures applied for the control of *Evetria alba*—*copitana* on jack pine have proven successful.

(c) Birds

Little damage is reported from this source during the year. The method of control now being adopted is to provide feeding grounds instead of shooting.

(d) Other Animals

Mice and rabbits continue to do slight damage to nursery stock and plantations. At Midhurst, porcupines damaged some trees in plantations and natural woodland.

(e) Fungous Diseases

White pine blister rust has been controlled at all three nurseries and inspections are made regularly. At Midhurst the poplar canker (*Hypoxylus pruinaum*) is causing untold damage and many poplars die from it each year.

WOODLOT IMPROVEMENT

Extensive woodlot improvement was carried on at St. Williams in connection with natural stands and plantations. About 40,000 F.B.M. of chestnut were salvaged from one area besides large quantities of fuelwood. At Midhurst fifteen acres of plantation were improved.

PUBLICITY

It is very significant that in the counties where the three nurseries are located the greatest interest in and enthusiasm for reforestation is found. The parks at all nurseries are patronized by thousands of visitors each year and in this way prospective planters and others secure first hand information regarding tree planting.

In addition to their regular duties of superintending the nurseries proper,

the men in charge of these stations make many inspections, give lectures, stage exhibitions and in other ways carry on extensive work for the cause of forestry.

Totals.....	10,884,000	1,608,200	381,000	12,873,200

2. COUNTY FORESTS

Planting was continued on all county forests this year. The total area planted covered 1,371 acres and the number of trees set out amounted to 1,619,550.

Additional land was purchased by the counties as follows:

Victoria.....	336 acres
Hendrie.....	214 "
Orr Lake.....	202 "
Larose.....	100 "
Vivian.....	20 "

A new forest was started in the township of Tossorontio by Simcoe county 600 acres being purchased for this purpose.

For a detail report of trees planted, improvements, fire and insect control, etc., see Table No. 8.

3. MUNICIPAL FORESTS

This name is applied first, to any municipally owned tract of land consisting of 50 acres or more which is under the supervision of the Forestry Branch, for the purpose of improving existing woodland, protection and conservation of water supply and soil erosion and for recreational purposes; or, second, to any municipally owned tract of land consisting of from 25 to 30 acres under management, one-quarter or more of which is woodland.

4. DEMONSTRATION PLOTS

This name is applied to any publicly owned piece of land in close proximity to a travelled road. This land is owned or purchased expressly for the purpose of showing the public in any municipality what may be done for their community by tree planting. These areas may vary in size from one to twenty-five acres. A sign which can be seen from the road is placed on the property and states that the planted area is a demonstration plot and that it is supervised by the Forestry Branch.

74 Plantations were inspected and advice given when needed to the various municipal owners.

The following list shows the number of trees planted on demonstration plots during the spring of 1936:

ADDITIONS TO PLOTS PREVIOUSLY ESTABLISHED

Boy Scout Plantations.....	70,000
Eugenia.....	70,500
Queenston.....	33,500
Trenton.....	25,900
Collingwood.....	10,000
North York Township.....	10,000

Kingston.....	8,550
London.....	6,600
Thornbury.....	6,450
Woolwich Township.....	6,100
Hepworth.....	6,000
Lindsay.....	6,000
Durham.....	5,000
Scarboro Township.....	5,000
Dundas.....	4,000

Kitchener.....	12,600
Fergus.....	5,000
	48,000
Grand Total.....	380,735

5. DEMONSTRATION WOODLOTS

This name is applied to privately owned areas of woodland adjacent to a travelled road. These areas are used expressly for the purpose of showing the public what may be done by applying forestry methods to the management of the woodlot for continuous production. An officer of the Ontario Forestry Branch advises the owner on improvement cuttings, thinnings and any planting that may be required to bring the woodlot into proper condition.

The number of demonstration woodlots was increased from 142 to 197. A sign, which can be seen from the road, is placed on the property and states that the woodlot is a demonstration woodlot and that it is supervised by the Forestry Branch. It is planned to have at least one in each township. The following list gives the number and the location by counties:

DEMONSTRATION WOODLOTS ESTABLISHED TO DATE

Brant.....	2	Lincoln.....	2
Bruce.....	7	Middlesex.....	8

Total—197			

6. HIGHWAY PLANTING

During the spring of 1936 highway planting was continued by the Ontario Forestry Branch. A total of 21,695 trees were planted.

7. RANGER PLANTATIONS

The following trees were planted at various ranger headquarters:

Algonquin, District of Pembroke.....	2,550
Tweed, District of Tweed.....	1,100
	3,650

8. UNEMPLOYMENT RELIEF

Camp Borden

Last year's programme of work was continued for the month of April only, using men from one of the camps installed by the Department of National Defence for the relief of unemployed single men.

The work consisted of thinning and clearing and grading roads through the forest property.

Work ceased at the end of April as the camp was closed and the men were disbanded.

The number of men supervised each day by the Ontario Forestry Branch varied from 20 to 40.

Petawawa

This project was carried on under the relief scheme of the Department of National Defence at Chalk River.

300,000 trees were planted in all.

Kingston

This project was carried on under the relief scheme of the Department of National Defence at Barriefield Common east of Kingston.

The Forestry Branch supplied the trees and supervision, The Department of National Defence furnished the labour.

4,000 trees were planted in all and the average number of men employed was 14.

9. TREES DISTRIBUTED FOR PRIVATE PLANTING, SCHOOLS AND MISCELLANEOUS PUBLIC AND SEMI-PUBLIC PROPERTIES

In the spring of 1936, 4878 people secured trees from the Ontario Forestry Branch, totalling in all 7,318,783. 56 schools secured trees totalling in all 37,761 and miscellaneous public and semi-public properties secured trees totalling in all 241,288.

Table 7 gives the species and the number distributed.

10. SEED COLLECTING

(a) Seed conditions throughout the province were fair for all species except red pine for which they were poor. Report from the fire zones into which the province is divided gave the following results:

Massey—

Red Pine—over entire area	$\frac{1}{8}$ crop
Jack Pine—over entire area	$\frac{1}{2}$ crop
White Pine—over entire area	$\frac{3}{4}$ crop

Appendix 22

III—PROVINCIAL RADIO

OPERATIONS

Thirty radio stations and operators were maintained at the following points:—

(a) <i>Annual Stations</i>	<i>District</i>	<i>Call Sign</i>
Sioux Lookout (2 operators)	Sioux Lookout	C F B
Red Lake	Sioux Lookout	C F J
Woman Lake	Sioux Lookout	C Z 5 B
Pickle Lake	Sioux Lookout	C F G
Kenora (2 operators)	Kenora	C F D
Whitefish Bay	Kenora	C Z 5 A
 (b) <i>Summer Stations only</i>		
Sioux Lookout (air base)	Sioux Lookout	C Z 4 V
Armstrong	Sioux Lookout	C Z 4 B
Caribou	Sioux Lookout	C Z 4 C
Goose Island	Sioux Lookout	C Z 4 F
Lake St. Joseph	Sioux Lookout	C Z 5 E
Savant Lake	Sioux Lookout	C Z 4 U
Watcomb	Sioux Lookout	C Z 4 Z
Adair	Cochrane	C Z 4 A
Stimson	Cochrane	C Z 4 X
Manitou Lake	Kenora	C Z 4 M
Nestor's Falls	Kenora	C Z 4 P
Fort Frances	Fort Frances	C Z 5 F
Basswood Lake	Fort Frances	C Z 5 C
Sphene Lake	Fort Frances	C Z 4 W
Elk Lake	North Bay	C Z 4 D
Delhi	North Bay	C Z 5 D
Latchford	North Bay	C Z 4 K
Maple Mountain	North Bay	C Z 4 N
North Bay	North Bay	C Z 4 Q
Port Arthur	Port Arthur	C Z 4 J
Macdiarmid	Port Arthur	C Z 4 L
Jackfish Island	Port Arthur	C Z 4 I
Garden Lake	Port Arthur	C Z 4 E
Obonga Lake	Port Arthur	C Z 4 R

One portable transmitter and receiver was stationed at each of the Kenora, Sioux Lookout, Port Arthur and North Bay districts.

(c) The number of words handled was as follows:—

<i>Commercial</i>	<i>Forestry</i>
536,724	281,519

TOWER SERVICE

Ultra-high frequency radiotelephone was installed in the following twelve towers:—

<i>Name of Tower</i>	<i>District</i>
King Mountain.....	Sault Ste. Marie
Griffen Lake.....	Sault Ste. Marie
Murray.....	Sudbury
Delamere.....	Sudbury
Secord.....	Sudbury
Bear Island.....	North Bay
Delhi.....	North Bay
Diabase.....	North Bay
Mount Collins.....	North Bay
Armstrong.....	Sioux Lookout
Caribou.....	Sioux Lookout
Jacobs.....	Sioux Lookout

The service rendered by these comparatively inexpensive sets was very satisfactory, and it is anticipated that fourteen additional sets will be required next season.

NEW EQUIPMENT

The following new equipment was purchased:—

1. Three 1000-watt transmitters, and receivers, which will be installed during the 1937 season.
2. Parts and material for construction of 14 ultra-high frequency tower sets to be installed during the 1937 season.

REVENUE

The total revenue from the public use of the radio system was \$27,000.00, as compared to \$11,000.00 for the 1935-36 fiscal year.

Appendix 23

IV—PROVINCIAL AIR SERVICE

The past fiscal year, and particularly the fire fighting period from May 15th to November 1st, has been one of exceptional activity in this Service. This period brought with it climatic conditions which produced one of the worst fire hazards this Province has ever experienced. Exceptionally dry weather, combined with abnormally high temperatures, and more than frequent dry lightning storms, produced a series of fires with such rapidity that the entire facilities of the Service were taxed to the limit, and the assistance of outside organizations finally became necessary to accomplish ultimate suppression. As many as twenty new fires were reported in a single day in one district, and the reporting of five to eight new ones daily, in almost any district, was not uncommon during this time. Many of lightning origin occurring in locations which were often far beyond established portage lines and bush trails were most difficult to reach and service. During such periods aircraft was used to advantage and did splendid work in the transportation of men and equipment.

This Service is organized to meet a normal or slightly above normal hazard and under these conditions can function effectively and with reasonable economy. The past two seasons present a very interesting comparison:—that of 1935, when we experienced a season of rather subnormal hazard, with which we were able to deal effectively with the help of only \$6,000.00 worth of purchased flying, as against that of 1936, when we experienced an exceptionally high hazard, and during which it was found necessary to purchase almost \$90,000.00 worth of additional flying from outside sources.

A careful analysis of the past two seasons reveals that from an Air Service standpoint our problem is becoming more and more one of transportation rather than of detection. The semi-transport type of aircraft, combining detection with economical suppression, would seem to be the one best suited to our requirements and in the regular and necessary periodic replacements especial consideration should be given to the type best suited for the purposes of suppression and at the same time readily adapted to detection.

CO-OPERATION WITH OTHER DEPARTMENTS

The Service has continued to co-operate with other Departments of Government in the administration of their respective offices, the following Departments having successfully used the Provincial Aircraft on different occasions: Highways, Mines, Attorney General, Provincial Police, Education, Health, and Welfare. The Department of Indian Affairs of the Federal Government also took advantage of purchasing flying time from the Department of Lands and Forests.

MERCY FLIGHTS

Mercy flights have also been carried out as occasion and conditions warranted, outstanding among which were those connected with the Moose River Mine disaster. Two of our ships flew to Halifax with badly needed

supplies and stood by for necessary transportation to and from the scene of the disaster. Other flights were also carried out, in which injured personnel were flown to points where hospital facilities were available, and in a number of cases sick people were flown from isolated localities to towns and cities where medical attention was available.

RADIO

Nothing was accomplished in the way of Ground to Aircraft Radio Communication. Some experiments were carried out the previous year with absolute satisfaction but due to the fact that all ships were required for transportation purposes during the past year, no radio was installed. It is hoped that some provision can be made for further experiments during the coming year, as it is felt that two-way radio communication would greatly facilitate the reporting and servicing of fires.

FUEL SITUATION

With the exception of two caches, all old fuel has been used up and any supplies which are now in the field are less than two years old. Stocks of oil have been filtered and are now safe for aircraft use. The oil filter, purchased about a year ago, has operated with complete satisfaction and has been a source of substantial saving. Aircraft crankcase oil is now being reclaimed, as well as that used in Forestry Branch automobiles. The new arrangement between the Department and the source of fuel supplies has worked out satisfactorily and has resulted in a material reduction of unnecessary stocks.

AIRCRAFT BUILDING

The Service has now completed and has in operation two of the four Buhls which were originally undertaken. The third will be ready for the opening of the 1937 season, and the fourth sometime during the month of June. The entire four have been built on what might be termed a spare time or fill-in basis and the undertaking has served admirably to flatten out employment peaks and provide continuous and useful employment for the staff.

This type of ship has proven itself to be well suited to Forestry operations, and although not fast its takeoff is exceptional for a seaplane and permits its operation in and out of relatively small lakes. The results obtained to date have been highly satisfactory.

Aug. 25th.	G-CAPA	McIntyre	Searching for missing party of four—McIntosh Lake.
Feb. 4th.	G-CAPC	Phillips	Sick man—flown Jobam Lake to Sault Ste. Marie.
Mar. 16th.	CF-OAH	Buckworth	Sick man—flown Isle Royal to Port Arthur.

LETTER OF TRANSMISSION

TO THE HONOURABLE ALBERT MATTHEWS,
Lieutenant-Governor of the Province of Ontario.

MAY IT PLEASE YOUR HONOUR:—

The undersigned has the honour to transmit to you herewith, for presentation to the Legislative Assembly of the Province of Ontario, the Forty-sixth Annual Report, 1936, of the Department over which I have the honour to preside.

Respectfully submitted,

PAUL LEDUC,
Minister of Mines

DEPARTMENT OF MINES,
Toronto, 1937.

INTRODUCTORY LETTER

TO THE HONOURABLE PAUL LEDUC,
Minister of Mines.

SIR,—The undersigned has the honour to submit the Forty-sixth Annual Report of the Department of Mines, issued in seven parts, as follows:—

PART I

Statistical Review of the Mineral Industry of Ontario for 1936, by A. C. Young.
List of Mines, Quarries, and Works, 1936.
Mines of Ontario in 1936, by D. G. Sinclair, W. O. Tower, A. S. Bayne, D. F. Cooper, E. B. Weir,
A. R. Webster.
Mining Accidents in 1936, by D. G. Sinclair, W. O. Tower, A. S. Bayne, D. F. Cooper, E. B. Weir,
A. R. Webster.
Classes for Prospectors, 1936–37, by W. D. Harding.

PART II

Geology of the Horwood Lake Area, with map No. 46a, by W. D. Harding.

PART III

Geology of the Longlac Area, with map No. 46b, by H. W. Fairbairn.
Geology of the Pagwachuan Area, with map No. 46b, by R. D. Macdonald.

PART IV

Geology of the Sachigo River Area, with map No. 46c, by V. B. Meen.
Geology of the Stull Lake Area, with map No. 46c, by J. Satterly.

PART V

Natural Gas in 1936, by R. B. Harkness.
Petroleum in 1936, by R. B. Harkness.
The Gas and Oil Fields in the Guelph and Medina (Grimsby) Formations, with map No. 46g,
by R. B. Harkness.
Appendix: The Brownsville Gas Field, by C. S. Evans.
Gas and Oil in Eastern Ontario, by R. B. Harkness.

PART VI

Geology of the Superior Junction–Sturgeon Lake Area, with maps Nos. 46d and 46e, by H. C. Horwood.
The Darkwater Mine (Sturgeon Lake), by H. C. Horwood.

PART VII

Geology of the Casummit Lake Area and the Argosy Mine, with map No. 46f, by H. C. Horwood.

Only Part I is bound with the Sessional Papers of the Legislature. All parts, together with accompanying geological maps as indicated above by number and letter, are available on application to the Department.

Respectfully submitted,

T. F. SUTHERLAND,
Deputy Minister of Mines.

DEPARTMENT OF MINES,
Toronto, 1937.

Statistical Review of the Mineral Industry of Ontario for 1936

By A. C. Young

GENERAL SUMMARY

Mineral Production

A preliminary report on the mineral production of Ontario in 1936 was published in March, 1937. According to the revised statement of production now presented, the total value of minerals in 1936 was \$184,670,390, which is slightly higher than the preliminary estimate and constitutes a new high, exceeding any previous year. It is interesting to note here that the total value of the mineral production of all Canada at the peak of the war development was only \$189,646,821 in 1917 and \$211,301,897 in 1918.

The metal group again showed a marked increase, totalling \$165,231,519, or a gain of 15.6 per cent. over the previous year. This improvement may be accounted for mainly by a most active gold-mining and milling programme and an expanded nickel-copper industry.

Reference to the tables on pages 2 and 3 shows that the value of gold has increased 6.3 per cent.; nickel, 24 per cent.; and copper, 39.4 per cent. Platinum metals and cobalt showed important gains also in quantity and value.

Non-metallic minerals rose from \$7,766,657 to \$8,933,036. This group has regained its former position, exceeding the production of 1929.

Among the structural materials, cement, sand and gravel, and stone showed important increases.

Statistics of production for the various groups may be seen in the tables on the following two pages. Employment in both gold and nickel-copper mining reached a peak during 1936. The number of claims recorded was greater than in the previous year.

The large increases in the total value of mineral production during the past ten years (as shown in the table on page 4) can be explained only in part by the exchange equalization on the sale of gold. In two years of this period, 1931 and 1932, the production value was less than one hundred million dollars, and in 1925, 1926, and 1927 small discounts were applied to the values because Canadian currency was at a premium in those years as compared with United States dollars. As may be observed metal mining is by far the most important group, and this has been the case since 1905, when the famous silver-cobalt area was discovered along the right-of-way of the T. and N. O. Railway then being constructed. The discovery of gold followed quickly. In 1906 the Larder Lake area became known. The Hollinger mine in Porcupine was discovered in the autumn of 1909 and proved to be the forerunner of such important producers as McIntyre and Dome. The Kirkland Lake area was discovered in 1911, and both these fields have since become famous as gold producers, some 18 mines paying dividends. The growth of the Sudbury nickel area was gradual, but by 1910 more than a half a million tons of ore were being smelted yearly. Since that date the advance of the metal-mining industry has been rapid and has overshadowed all other groups during the past decade.

The non-metallic, structural material, and clay products groups maintained a good percentage value, however, during those years and even in the early post-war period.

SUMMARY OF MINERAL STATISTICS, 1936

Product	Quantity ¹	Value	Employees	Wages

TOTAL VALUE in Canadian funds.....		\$184,670,390	27,268	\$38,413,305

¹All tons in this table are 2,000 pounds.

²Copper in matte valued at 6½ cents per pound, and nickel at 18 cents.

³Employees and wages for nickel-copper mines, smelters, and refineries include statistics of the Ontario Refining Company.

⁴Employees and wages for silver-cobalt smelters and refineries.

⁵Employees and wages included with figures for silver-cobalt smelters and refineries (⁴).

⁶Tonnage given is sulphur content of sulphuric acid; no iron pyrites was sold in 1935.

⁷No deduction made for lime used in manufacturing.

¹Cobalt in oxide, metallic cobalt, and cobalt content of residues marketed.²Nickel in matte, oxide, and metallic nickel.³Includes value of sulphuric acid produced.⁴No deduction made for lime consumed in manufacturing. Note that the figures prior to 1934 refer to sand-lime brick only.

The table below shows the aggregate value of metals from the time production began in Ontario and of other minerals beginning with 1891. Since 1914 the statistics of annual production credit the province only with the value of the pig iron made from Ontario ore. This is but a small part of the total output, since the great bulk of the iron ore charged to the blast furnaces of the province is "lake" ore from the mines of Minnesota and Wisconsin. In the production tables, credit is taken only for the ore exported or shipped to points other than Ontario blast furnaces, since to include the value of the domestic ore converted into pig iron in Ontario would involve a duplication of this item.

TOTAL MINERAL PRODUCTION

¹Prior to 1891, when the Ontario Bureau (now Department) of Mines was established, it is estimated that metals to the value of \$9,520,269 were produced. No estimate has been made of the output of non-metallics up to 1891.

Metal Production

The total value of production by Ontario metal mines from the time of the earliest record to the end of 1936 amounted to \$1,864,375,398, which with the inclusion of 1937 figures will be well over the two thousand million mark. The figures are indicative not only of the vast strides made by this section of the mining industry in recent years, but of the increasing importance of Ontario in the economy of the nations. The table below shows that apart from lead, zinc, and molybdenum this province possesses important quantities of those metals most desired by man.

METAL PRODUCTION TO DECEMBER 31, 1936

Metal or product	To December 31, 1935	1936	To December 31, 1936
Gold.....	\$575,501,092	\$49,168,253	\$624,669,345
Exchange equalization.....	89,619,066	34,139,926	123,758,992
Nickel, including nickel oxides and salts..	426,868,143	43,876,525	470,744,668
Silver.....	264,355,922	2,325,850	266,681,772

Tellurium.....	54,149	18,049	72,198
Chromite.....	10,056	5,070	15,126
Total.....	\$1,699,143,879	\$165,231,519	\$1,864,375,398

¹Includes small quantities of copper sulphate.

²Includes metal, oxide, salts, and cobalt content of residues exported.

³Value of ore shipped out of the province.

Dividends.—During 1936 dividends were paid by 17 gold, 2 nickel-copper, and 3 silver-cobalt mining companies. Total payments by metal mines of the province are rated hereunder by groups:—

DIVIDENDS PAID BY METAL MINES TO DECEMBER 31, 1936

Industry	To end of 1935	1936	To end of 1936
Nickel-copper.....	\$173,714,837	\$21,886,753	\$195,601,590
Gold.....	205,157,401	30,188,413	235,345,814
Silver-cobalt.....	98,350,781	730,000	99,080,781
Total.....	\$477,223,019	\$52,805,166	\$530,028,185

Metal Prices and Exchange

As quotations of metal prices and exchange have been omitted from recent reports, the prices for 1935 and 1936 are included here for reference. It will be noted that while silver has fallen in price from 64.79 cents per ounce to 45.087, copper has risen from 7.538 to 9.23 cents per pound. The improved copper prices have in part accounted for the increase in total value. The following figures were supplied by the Dominion Bureau of Statistics:—

Month	Average exchange rate U.S. dollars in Canadian funds	£ Sterling in Canadian funds	Silver, cents per oz.		Copper, cents per lb.		Gold in Canadian dollars per fine oz.
			New York market, U.S. funds	in Canadian funds	New York export, U.S. funds	London in Canadian funds

Diamond-Drilling

In 1936 some 35 companies made returns respecting their drilling operations. The number of machines active was 405, in the operation of which 1,457 men were employed, who were paid \$1,563,700 in wages. The corresponding figures for 1935 were 171 drills, 608 wage-earners, and \$891,644 in wages. The figures by provinces are shown below, and it should be pointed out that the statistics for provinces other than Ontario may be more or less incomplete, as they refer to work done by Ontario firms only.

On the other hand consumption of diamonds used in drilling refers to footage drilled in all provinces in which work was reported, and is indicative of the trade

available for diamond merchants as well as the amount of wear or wastage of these abrasives in our hard pre-Cambrian rocks. The total consumption of borts, ballas, and carbons was 74,831.20 carats, as shown below:—

CONSUMPTION OF DIAMONDS BY REPORTING FIRMS, 1936

Period	Borts	Ballas	Carbons
	carats	carats	carats
Diamonds on hand December 31, 1935.....	19,507.38	71.30	4,695.78
Purchased in 1936.....	98,618.65	117.41	3,023.76
Diamonds on hand December 31, 1936..... deduct	118,126.03 45,846.24	188.71 141.28	7,719.54 4,205.56
Diamonds consumed (75,841.20) in 1936.....	72,279.79	47.43	3,513.98

Prospecting

An index of activity is afforded by the following table:—

MINING CLAIMS RECORDED, 1907-1936

Year	No.	Year	No.	Year	No.
1907.....	13,996	1917.....	1,936	1927.....	15,554
1908.....	4,634	1918.....	1,534	1928.....	15,046
1909.....	9,746	1919.....	2,918	1929.....	8,207
1910.....	5,792	1920.....	2,160	1930.....	3,886
1911.....	9,001	1921.....	2,459	1931.....	5,779
1912.....	3,104	1922.....	5,686	1932.....	4,945
1913.....	4,320	1923.....	6,092	1933.....	8,077
1914.....	1,913	1924.....	5,222	1934.....	16,888
1915.....	2,519	1925.....	4,751	1935.....	9,460
1916.....	2,470	1926.....	13,496	1936.....	17,280

It will be noted that 1934 and 1936 were the most active years for claim-staking in the history of the province. In the Port Arthur mining division alone, 6,842 claims were recorded in 1934 as a result of prospecting activity in the Little Long Lac and Sturgeon River gold areas, which lie east of Lake Nipigon close to the Canadian National railway. The most active mining divisions in 1936 were Port Arthur, Porcupine, and Red Lake, in that order.

Mineral Geography of the United States and Future Markets for Ontario Minerals

In a report prepared by Kenneth Leith and D. M. Liddell for the Resources Committee, Washington, D.C., in 1936, it was pointed out that while the mineral geography of the United States was well known, it might be open to considerable modification due to discovery and technological improvements. In the table given below the ability of the United States to supply domestic needs is outlined for some twenty-four specified mineral items. It would appear that for seven items, e.g. antimony, manganese, mercury, nickel, and tungsten among the metals, and asbestos and mica among the non-metallics, there is a shortage. Of these Ontario produces nickel and mica, is a potential producer of asbestos, and already exports large quantities of nickel to the United States. The export of mica is gradually increasing.

The following table appeared on page 25, No. 6, of Volume 2, "Mineral Trade Notes," as published by the United States Bureau of Mines:—

Item	Estimated capacity (or consumption)	Maximum output 1928-33	Imports		Known domestic reserves
			Needed?	Why?	
METALS					
Pig iron.....long tons	51,110,000	42,613,983	No	Price	?
Antimony ¹ (consumption)...short tons	19,257	587	Yes	Price	Small
Bauxite (consumption)....short tons	755,000	381,452	No	Price	?
Copper (mine, metal).....short tons	1,170,000	1,026,346	No	Price	Great
Lead (smelting, metal)....short tons	1,450,000	781,074	No	Price	Small
Manganese (Mn content)...short tons	442,323	115,422	Yes	Price, quality	Small
Mercury (consumption).....flasks	38,500	24,947	Yes	Price	Small
Nickel (consumption).....short tons	35,200	522	Yes	Price	Small
Tungsten (mine).....short tons	600	575	Yes	Price	Small
Zinc (smelting, metal)....short tons	940,000	625,447	No	Price	Great
NON-METALS					
Asbestos (mine).....short tons	5,100	4,745	Yes	Price, quality	Small
Barite (consumption).....short tons	363,000	275,945	No	Partly price, partly quality	Great
China clay (consumption)..short tons	796,000	533,800	No	Quality	Great
Fluorspar (consumption)...short tons	201,000	146,439	No	Price	Great
Gypsum (mine).....short tons	6,131,000	5,102,250	No	Price	Great
Magnesite (consumption)...short tons	188,000	187,600	No	Price, quality	Great
Mica (consumption).....short tons	11,800	8,933	Yes	Price, quality	?
Nitrates.....short tons	600,000	285,724	No	Price, quality	Great
Petroleum (refining).....bbls.	1,438,000	1,007,323	No	Price	Great
Phosphate rock (mine)....long tons	4,000,000	3,951,353	No	Price, quality	Great
Potash (consumption, K ₂ O).short tons	385,000	143,378	No	Price	Great
Pyrite (consumption).....long tons	353,090	353,090	No	Price	Great
Sulphur (mine).....short tons	2,600,000	2,558,981	No	Price	Great
Talc (consumption).....short tons	242,000	219,783	?	Price, quality	Great

¹Primary metal only, excluding hard lead. (In 1935, domestic smelting was a much more important factor.)

The writers also reported as follows regarding conditions in the United States:—

Coal is perhaps our most abundant mineral resource. Beds now known which can be mined under present conditions have reserves sufficient to last 4,000 years. Iron ore, limestone, gypsum, aluminum, and molybdenum are also materials which will last far beyond any period for which we should feel concern. On the other hand, there are several minerals whose reserve life can only be measured by the decades, and in the cases of these, very few decades will elapse before their exhaustion. Oil will last, at its present rate of consumption, for some 40 years, but changing economic needs and processes will alter the rate of use and consequently change the period of its depletion.

The reserves of lead, gold, and silver may last for a few decades only; lead and silver could, conceivably, be depleted in only 20 years. Copper, zinc, and fluorspar will probably last longer than lead and silver, but the period before their exhaustion will also be comparatively short. Many of the non-metallics, such as china clay, graphite, mica, asbestos, and magnetite, exist in very large tonnages, but because of economic reasons or trade preferences fail to capture the entire domestic market. Some of the conditions that have so far limited the production from this group of deposits will undoubtedly change in the future and present unused deposits will be exploited. For another group of minerals the supply is already deficient, for some, such as nickel, and tin, virtually non-existent. The deficient list includes manganese, supplies of which are very small; chromite, which is in about an equal position; vanadium, known domestic reserves of which would supply the demand of this country for less than five years; mercury, which is the most erratic of metals and whose reserves are known to be small; and tungsten. These minerals are all necessities, and our dependence upon foreign supplies either now or in the very near future must be recognized.

Apart from feldspar, for which there is now a small market in the Northern States, the main hope of Ontario producers of non-metallic minerals in marketing their excess over domestic requirements will lie in European markets. It is conceivable also that in time, perhaps not more than a few decades, some metals now excluded by high tariffs may be looked on with more favour by United States consumers.

METALLICS

Gold

General Summary

Gold from all sources in Ontario during 1936, which includes the metal recovered in the refining of nickel-copper mattes and blister copper, totalled 2,378,494 fine ounces, valued at \$83,308,179 in Canadian funds, as against 2,220,336 fine ounces, worth \$78,068,169, during the previous year. Of the 1936 output, 2,305,122 fine ounces were recovered by auriferous quartz mines and 73,377 fine ounces from other sources.

The record for gold mines alone, including the value of silver recovered in the crude gold bullion, was \$80,951,954, as compared with \$75,927,718 in 1935. This represents an increase of 6.6 per cent. in value for the auriferous quartz industry. Reference to the table on pages 13 to 16 will show that there were increases in six of the eight main areas, namely, Porcupine, Kirkland Lake, Algoma, Thunder Bay, Kenora and Rainy River, and Patricia. Owing to the closing down of such mines as the Ashley in Matachewan and the McMillan and Lebel Oro in Sudbury, declines were shown in those areas. Thunder Bay increased from \$2,247,053 to \$3,173,014, or 41 per cent., owing principally to the success achieved at the Little Long Lac and Northern Empire, and the Patricia production rose in value from \$3,540,611 to \$5,213,694, or 47 per cent. The important properties in this area were: Pickle Crow, the highest-grade gold mine in the province, Central Patricia, McKenzie Red Lake, Red Lake Gold Shore, and Howey, the lowest-grade gold mine in Ontario. The two principal camps, which produce 75.1 per cent. of Ontario's output, were both higher than in 1935, Porcupine increasing by 4.7 and Kirkland Lake by 1.5 per cent.

Much mining development was carried on during 1936 in every part of the province. In the old Larder Lake area, discovered first in 1906 and so long quiescent, the successful operation of the Omega caused considerable mining work on nearby properties. Outstanding in the area was the proving of a large ore shoot on the Kerr-Addison by four tunnels driven to the deposit. The find caused a great increase in the activity from Larder Lake along the belt to the Kirkland Lake area, and old claims long idle suddenly became valuable. At Kirkland Lake, activity both east and west of the main camp was marked by the opening up of old mines or the serious development of properties on the extension of the ore break. Porcupine continued to expand in the same manner, indicating a widening of the area, with prospective mines under development.

In the western part of Ontario, the new find at Uchi lake near Confederation lake in Patricia portion was important, as was the favourable expansion along the strike of the Little Long Lac mine. A staking rush to Rowan lake, southeast of the Lake of the Woods, caused a large increase in claims recorded in Kenora and Rainy River districts.

During the period, four mines joined the list of dividend-payers, making a total of 24 companies now declaring dividends. Ten new gold mills started regular operations, and three ceased permanently. The total number of regularly operating plants, as at December 31, was 41, and these mills had a total rated capacity of 24,190 tons per day. Other properties carried on part-time milling operations.

Dividends and Production

The following tables show the dividends paid by the various gold-mining companies, the yearly dividends by areas, the total gold production from 1866 to 1936, the production by areas in 1936, and the annual production by mines in each area.

DIVIDENDS AND BONUSES PAID BY GOLD-MINING COMPANIES TO DECEMBER 31, 1936

Name of company	Date of incorporation	Authorized capital, \$ or shares	Capital stock issued, \$ or shares	Par value per share	Dividends and bonuses paid to end of 1935	Dividends and bonuses paid during 1936	Rate per cent., or per share, 1936	Total dividends and bonuses paid to Dec. 31, 1936	Date when last dividend or bonus was paid
Anglo-Huronian, Ltd.	Oct. 16, 1933	2,000,000	1,317,605	No par	\$751,563.00	\$524,042.00	40c.	\$1,275,605.00	Dec. 1, 1936

¹On April 22, 1922, the capital of Dome Mines Company, Limited, was reduced from \$5,000,000 to \$4,500,000, and \$476,667 (repayment of capital not included in above table) distributed to shareholders in addition to dividends paid to September 30, 1923, when the new company, Dome Mines, Limited, issued 1,000,000 no par value shares at \$7.00 per share.

²Hollinger Consolidated Gold Mines, Limited, is an amalgamation of the Acme Gold Mines, Limited; Millerton Gold Mines, Limited; and Hollinger Gold Mines, Limited. Dividends include \$4,170,000 paid by Hollinger to May 25, 1916, the date of consolidation; there is also included \$160,000 paid by Acme in 1915 to discharge a debt for capital borrowed.

³Capital stock increased 500 shares on December 28, 1935.

⁴The Schumacher mine was sold to the Hollinger in 1922, and a total of \$1,591,000, or 86 per cent. of the assets, distributed to shareholders, the final payment being made July 30, 1923.

¹The Department has no records of any gold produced in Southeastern Ontario subsequent to 1922.

Gold Mines of Larder Lake Area.—Larder Lake area lies immediately east of the Kirkland Lake area and runs to the Quebec boundary. In 1936, the reopening of the *Omega* and its entry into the lists of producers focused the attention of mining operators on this area, which had been dormant for many years. The rather important development of ore on the *Kerr-Addison* was the beginning of a great deal of mining activity, which was also promoted by the *Martin-Bird* development and work on the *Harris-Maxwell*. To the north, *Kir-Vit* and *Canagau (Interprovincial)* did surface work or drilling. The *Barry-Hollinger* after producing for several years finally closed down, and the *Minaura* in Skead township once known as the *Telluride*, reopened and carried on development. In Bryce township, the *Britcana* diamond-drilled on the *Flanagan* group. Other large companies also completed examination of several groups under option, and a showing of gold was found on the *Brisco* claims.

Gold Mines of Kirkland Lake Area.—Kirkland Lake area embraces Teck and Lebel townships and parts of the townships on the east, north, and west. *Crescent Kirkland (Swastika)* in Otto township and *Golden Gate (Lucky Cross)* in Teck township were diamond-drilling and doing development work. In Teck township the following mines were producing: *Macassa*, where development work was proceeding at 3,350 feet, *Kirkland Lake Gold*, *Teck-Hughes*, *Lake Shore*, which finished a new shaft and improved its mill, *Wright-Hargreaves*, *Sylvanite*, and *Toburn*. East of Gull lake, in Lebel township, *Bidgood* a producer, built a new plant and steel headframe and installed new mill equipment. *Morris Kirkland* erected a new plant and mill, and put their shaft down to 1,250 feet. Other companies doing development work in this area were *Lakeside-Kirkland (Queen Lebel)*, *Kirkking (King Kirkland)*, *Lebel Oro*, *Regal Kirkland*, *Ed. Hargreaves Kirkland*,

¹The production shown for 1913 and 1914 was from La Mine D'Or Huronia, which has been known as the Argonaut since 1919. The values shown are exclusive of copper.

²Canadian Associated Goldfields' production of which is shown in the figures for 1927 and 1928) went into bankruptcy in 1928 and the property was acquired by Proprietary Mines, Limited, in 1930. In 1934, Canadian Reserve Mines, Limited, acquired the 3 Costello claims and the Raven Falls power plant from Proprietary and transferred them to Omega Gold Mines, Limited.

³Acquired on 99-year lease by Minaura Mines, Limited, in November, 1935.

⁴Reddick mine, which was bought by Associated Goldfields in 1914, and acquired from Proprietary Mines, Limited, by Kerr-Addison Gold Mines, Limited, in 1936.

⁵Associated Goldfields, which was acquired by Canadian Associated Goldfields in 1921. ⁶Patricia mine, afterwards called Barry-Hollinger.

¹Now owned by Golden Gate Mining Company, Limited.

²Now owned by Kirkland Gold Rand, Limited.

³This includes gold recovered from scrapped machinery, origin unknown, and high-grade.

Upper Canada, Oriole, Ritchie, Boyd Kirkland, Mid-Kirk, Glenora, Kirkland Gold Rand, Lac-Teck, Moffatt-Hall and Gordon Lebel. *Goodfish* in Morrisette township and *Kirana Kirkland (La Belle Kirkland)*, in Teck and Lebel townships, did some work. As may be seen in the gold tables, the mines of this camp average the highest-grade ore in Canada and come second to Porcupine in value of production and dividends paid. To the north *Melba* in Melba township and *Bourkes* in Benoit township carried on surface work. In Maisonville township near Sesekinika *Golden Summit* did development work and operated its mill, treating stockpile ore. At Goldthorpe *James Kirkland, Goldbanks, and Lois Lake* did surface work.

Gold Mines of the Porcupine Belt.—The Porcupine belt, which starts west of Mountjoy township on the Mattagami river and runs east to the T. and N. O. railway and beyond, was discovered in 1909 and has since become Ontario's largest and most important gold field. The year 1936 in prospecting and development was better than any year during the last two decades. Much new staking has been done and many old properties reopened. The townships of Deloro, Whitney, Shaw, Ogden, and Cody are completely staked, and it would appear that townships on the extension of the older field will receive attention in the future. The activity has been unprecedented, and a few of the main events are as follows:—

Pamour went into production in May, and the milling capacity per day was about 700 tons. The construction of a 200-ton mill at the *Delnite* was well under way and a new 3-compartment shaft has been started. *Preston East Dome* in May discovered an ore deposit in the porphyry; it has installed a mining plant; a new 5-compartment shaft was also started. *Hallnor (Porcupine Quartet)* was sinking a 3-compartment shaft. *De Santis* installed a new electric plant and completed the 3-compartment shaft to 480 feet. *Central Porcupine* was driving an exploratory drift on the 1,000-foot level. *Moneta* made discoveries in August adjacent to the Hollinger, and at the end of the year were installing an electric plant and a new steel headframe. *Naybob* resumed mining operations and changed the power from steam to electricity.

Deloro-Wright and *Porcupine Triumph* are new companies starting preliminary operations. *Electra Porcupine* drilling near Night Hawk lake struck ore. *Dome* purchased the Schumacher block of four claims in Tisdale township and commenced sinking a large internal shaft in August. *McIntyre-Porcupine* commenced using sand purchased from Hollinger for backfill. *Hollinger* completed the offset extension of the Schumacher shaft to 5,150 feet and deepened other shafts, opening up new ground. In January, plans for merging the *Buffalo Ankerite* and *Marbuan* were approved, and the main Ankerite shaft was completed to 1,050 feet and a connection made at that level with the Marbuan workings. *Coniaurum* continued its development work, as did *Paymaster Consolidated* and *Anglo-Huronian (Vipond)*.

To the east of the T. and N. O. railway, the *Ross* mine in Hislop township operated by Hollinger was active, having commenced milling in December, 1935; and the *Golden Arrow* did shaft-sinking. *Amca* mine in Garrison township, about 25 miles east of Matheson, was constructing a 75-ton mill to be fed with ore from an open cut.

Gold Mines of Matachewan Area.—The Matachewan area is probably the westerly extension of the Kirkland Lake break, and for convenience mines in the bordering West Shiningtree area are included. *Young-Davidson* and *Matachewan Consolidated* both produced and extended their underground development and

¹Exclusive of West Shiningtree area (Atlas and White Rock mines), which is included in Matachewan gold area above.²Acquired by Lebel Oro Mines, Limited, in 1920.³1897, \$1,896 from 300 tons; 1898, \$1,602 from 160 tons; 1908, \$1,500 from 270 tons.⁴1905, \$37,963 from 4,550 tons; 1906, \$8,641; 1907, \$4,380 from 4,040 tons.

surface plants, the latter constructing a new mill. The *Arbade* carried on development work, and the *Ashley*, after a few years as a producer closed down finally on July 12, 1936. Farther west active properties were *Tyranite*, *Matona*, *Polonis* claims, *Harry Regan* claims, *Duggan* group, and *Gordon-Melesick*.

Gold Mines of Sudbury District.—The producing gold mines in Sudbury district, with details of output, are shown in the table.

Southwest of Sudbury *Lebel Oro* resumed underground operations on their *Long Lake* mine in April, sinking a 2-compartment shaft 207 feet and connecting it to the old second level; a considerable amount of diamond-drilling was carried on. In July *Falcon* started a 2-compartment vertical shaft, which was completed to 215 feet; operations were suspended in October. *Bolinger* installed a mining plant in September and commenced sinking a 2-compartment shaft, which was completed to 178 feet by the end of the year. The *New Golden Rose*, situated in the Timagami Forest Reserve, enlarged a 2-compartment vertical winze to three compartments from the adit level to 482 feet and also raised to the surface; development work proceeded on the 216-, 341-, and 466-foot levels; the 100-ton mill, which was commenced in June and is to use Diesel power, had not been completed by the end of the year.

The Gogama-Shiningtree area, which extends across the district and into Timiskaming some 80 miles north of Sudbury city, was represented by seven active properties. *Gomak* completed a 20-ton amalgamation-flotation mill in May and kept it in operation for about five months. *Young-Shannon* installed a plant and sank a 70-degree, 2-compartment shaft to a depth of 100 feet and did some lateral work. *Smith-Thorne* was operated by Hollinger, which sank a 2-compartment, 45-degree shaft to 599 feet and established levels at 200, 325, and 570 feet; some lateral work was done. *Bilmac* was doing underground work on the 410-foot level. *Lake Caswell* carried on underground work on the 240-foot level. *Churchill* resumed operations in March, as did *Ronda* in May, the latter doing work on the 200- and 300-foot levels.

The West River area, which is some forty miles southwest of Sudbury and near the North channel of Lake Huron, had two active properties, the *McMillan* and the *Bousquet*. The former resumed mining and milling in November after a close-down in February, and the latter completed a 50-ton cyanide-amalgamation mill in May.

Gold Mines of Algoma District.—Algoma district includes three separate areas or groups, the Michipicoten, Goudreau, and Oba, and was the scene of considerable mining development in 1936. In Michipicoten, *L. B. United (Centennial)* operated a 50-ton milling plant intermittently until October, and underground work was resumed in December on gold veins; investigations of supposed occurrences of platinum carried on at the instance of the Securities Commission failed to disclose any values in this metal. *Darwin* operated its 50-ton mill throughout the year; the 3-compartment No. 3 shaft was completed to 827 feet in April, and considerable development done on the eighth level. *Parkhill* also operated its mill for the whole twelve months and deepened the 42-degree shaft from 1,500 to 1,790 feet. The production of *Minto Gold Mines* came from the *Jubilee* property. *Deep Lake*, operated by Canfield and Hocking, sank a 2-compartment, 33-degree shaft to 115 feet, and in May placed a small amalgamation unit in operation, treating high-grade ore; electric power was installed. *Stanley* completed its 50-ton mill in July and operated the plant intermittently until October, after which steady milling was maintained at the rate of 30 tons per day; mining

¹Acquired by Algold Mines, Limited, in 1934.²Acquired by Darwin Gold Mines, Limited, in 1934. Operated by the Algoma Commercial Company in 1902 and 1903, who produced 6,097 tons of ore, from which \$48,708 was recovered; and by the Le Page Gold Mining Company from 1907 to 1910, who produced 4,260 tons, valued at \$23,235.³Production shown from 1930 to 1933 was from the Minto; in 1931, 11,946 tons came from the Jubilee; and in 1935 and 1936 the whole production was from the Jubilee. Both mines are now owned by Minto Gold Mines, Limited.⁴Havilah (Ophir), Galbraith township, \$8,549 from 2,489 tons in 1893; Norwalk (Manxman), \$200 from 20 tons in 1904; Golden Reed, \$125 from 3 tons in 1908.⁵Havilah (Ophir), \$3,808 from 800 tons; Norwalk (Manxman), \$1,212 from 800 tons.⁶Havilah (Ophir), \$627.⁷Soo Mining and Prospecting Syndicate.⁸Van Sickle (S. B. Smith).⁹S. B. Smith clean-up, \$11,224 from 1,282 tons; Shenango, \$354; Stanley, \$2,936 from 1,963 tons; C. L. White, \$1,124.

was actively pushed throughout the year. *Hillside* resumed work in September, and did bulk sampling in a 20-ton amalgamation testing plant. *Murray-Algoma* constructed a 20-ton amalgamation mill in October and treated ore derived from open-cut mining.

Goudreau area had four properties in operation. *Algold* resumed underground work in July and worked on the 100- and 200-foot levels. The 50-ton amalgamation plant was renovated and put in use in July, handling about 30 tons per day of ore coming from surface workings and the 140-foot level. *Algoma Summit* built and started operating a 50-ton amalgamation mill in March; construction of a 500-ton mill was commenced in August, as well as a permanent mining plant, which was under way at the end of the year. *Edwards* deepened the 2-compartment, 80-degree shaft to 300 feet, suspending sinking operations from June to October; electric power was brought in, and a 75-ton amalgamation mill built, which milled surface dump ore intermittently. *Cline* commenced operations in August under direction of the O'Brien interests, which held an option on the property; diamond-drilling, surface work, and erection of buildings was carried on, and a 3-compartment shaft was started with steel; electric power was installed and at the end of the year machinery for sinking operations was available but not set up.

In the Oba area the *Shenango* completed and placed a 50-ton mill in operation in April; milling operations were intermittent throughout the remainder of the year.

At the old *Havilah (Ophir)* mine near Thessalon, about 125 miles west of Sudbury, surface operations were carried on by North Huron Gold Mines from May to November, when underground work was started on a small scale.

Gold Mines of Thunder Bay District.—This district covers a large area to the north of the main body of Lake Superior and includes the Port Arthur and Kowkash mining divisions. *Little Long Lac* continued its development at 1,325 feet and operated its 250-ton mill treating ore running \$17.81 per ton. *MacLeod-Cockshutt* carried on extensive development on three levels and expected to be a producer. *Hard Rock* adjoining the McLeod-Cockshutt also developed with prospects of entering the producing class. *Bankfield* developed to 525 feet and had started to build a mill for production in 1937. *Magnet Consolidated* and *Hutchison Lake* commenced shaft-sinking, and *Jellicoe Consolidated* carried on diamond-drilling. *Sturgeon River*, situated about 18 miles northwest of Jellicoe, started its 30-ton amalgamation mill, which was closed later when the construction of a small cyanide mill was commenced. *Oremond*, situated about 5 miles north of Nezhah, carried on underground operations. Much staking was done on the Jellicoe-Beardmore strike, following the iron formation fairly closely. In the Beardmore-Empire section, the *Northern Empire* mine was developing at 797 feet and operated its 175-ton mill, producing throughout the whole year. The *Leitch* also continued as a producer throughout the whole year, and the adjoining *Sand River* carried on underground development and diamond-drilling.

The *Ardeen* in Moss township, west of Port Arthur, closed down in December. *North Shores* near Schreiber ceased mining and milling in October. *Schreiber Pyramid* operated a 10-ton test mill, and *Cook Lake* started sinking operations. *St. Anthony* at Sturgeon lake ceased milling in November, but continued mining operations. *Darkwater* also carried on extensive operations, and some five other companies did mining work. Near Tashota, the *Tashota* continued in production; and a new company, *Wascanna Mines* reopened the old *Tash-Orn* property.

¹Formerly the Walsh.²Acquired in 1936 by Santa Fe Gold Mines, Limited.³Formerly the Headlight or Swede Boy.

Gold Mines of Kenora and Rainy River Districts.—Kenora and Rainy River districts were prominent in the last decade of the nineteenth century and figured in one of Ontario's first mining booms. Some fifty or more properties had development work done on them at that time. In 1936, there was practically no activity in Rainy River district, although the old *Foley* and the *Olive* were unwatered preparatory to sampling operations. Mining work was under way at the *Elizabeth*. The *Mayflower* owned by the Plymouth Gold Mining Company was idle. The *Golden Star* and *Isabella* were expected to be financed for new work.

In Kenora district the producing mines were: *Cameron Island (Duport)*, Lake of the Woods, which shipped high-grade ore to Tacoma; *Wendigo*, located on the east shore of the Lake of the Woods, which continued its development and operated a 50-ton mill throughout the year; *Cedar Island*, owned by *Kenora Prospectors and Miners*, which operated the 30-ton mill but closed down permanently in October; *Kenland*, the old *Horseshoe* property, once known as the *Regina*, which commenced milling in July; and the *Elora*, situated south of Wabigoon on Upper Manitou lake, which operated its 50-ton mill for one month during 1936. The *Kenricia*, some 8 miles west of Kenora, commenced underground exploratory work on the old *Three Ladies* mine. Surface-trenching and diamond-drilling were done on the *Robin Hood* on Upper Manitou lake and on claims K.6,640-6,648 in the Eagle Lake area.

Gold Mines of Patricia Portion of Kenora District.—There was considerable activity in Patricia portion during 1936, with an evident trend in the direction of Red Lake area, but many operations were being pushed in the Woman, Confederation, and Birch Lake areas.

During 1936 four new mines joined the list of producers: *Red Lake Gold Shore* at Red Lake, which commenced operating its 125-ton cyanide-amalgamation mill on August 19; *Argosy*, which opened its 125-ton cyanamid-amalgamation

¹In addition to the figures given and duplicating them in part, the following reduction plants carried on operations in Kenora, then called Rat Portage, and reported as follows: (1) Dominion Reduction Company (1895, 1897, 1900), 666 tons, \$5,298; (2) Ottawa Gold Milling and Mining Company (1898-1900), 5,153 tons, \$26,181; (3) Rat Portage Reduction Works (1900) milled 200 tons of Wendigo ore; no data of recovery made are available; (4) Keewatin Reduction Works (1900) milled 100 tons ore from Champion and 1,000 tons from Wendigo; no data of recovery made are available.

²Northern Lights Mines Company.

³Acquired by Duport Mining Company, Limited, in 1929.

⁴Acquired by Kenora Prospectors and Miners, Limited, in 1928. The mine was called Cornucopia prior to 1932.

⁵Reported milled in custom mill, no data.

⁶Elora Gold Mines, Limited, acquired the Laurentian mine in 1935.

⁷Operated by Imperial Gold Mines, Limited.

⁸Acquired by Kenora Prospectors and Miners, Limited, in 1928.

⁹Or Black Eagle; acquired by Kenland Gold Mines, Limited, in 1936, from Horseshoe Mines, Limited.

¹⁰Contact Bay Mines, Limited, was incorporated in 1918 and acquired the Rognon, Redeemer, and Bonanza claims; the name was changed to Wabigoon-Contact Bay Mines, Limited, in 1923; and in 1935 the property was acquired by Northern Mines, Incorporated.

¹¹Redeemer. ¹²Rognon. ¹³Redeemer (with the exception of 8 tons, valued at \$46, from Rognon). ¹⁴Bonanza. ¹⁵Some 1,200 tons milled in custom mill in 1900, but no statistics of values available.

⁴1897, 1905 to 1907.

⁵1897 to 1909, inclusive.

⁶1885 to 1909, inclusive.

*These figures do not agree with those on page 16 because "Miscellaneous prospectors" (46 tons, \$2,637) has not been included.

plant on July 6; *Hudson-Patricia* at Narrow lake, which started milling in its 50-ton amalgamation plant on June 1; and *J-M Consolidated*, which reopened its 100-ton cyanamid-amalgamation plant on August 6.

In the Red Lake area *Howey's* 1,100-ton mill, treating ore averaging \$2.36 per ton, produced during the whole period, as did the *McKenzie Red Lake* with a 150-ton plant. In the Pipestone Bay section of Red Lake *May-Spiers*, *Frontier Red Lake*, and *Red Crest* carried on exploratory operations underground. A promising discovery was made on the *Madsen Red Lake* situated on Faulkenham lake.

In the Pickle-Crow area, *Pickle Crow* and *Central Patricia* were active, operating 150- and 200-ton plants, respectively, and developing to greater depths. The grades of ore were \$19.54 for the *Central Patricia* and \$25.26 for *Pickle Crow*, the latter being the highest-grade ore milled in Canada, and possibly in the world.

Labour Statistics

The following figures summarize labour statistics for the gold-mining industry, as reported to the Ontario Department of Mines:—

AVERAGE YEARLY WAGE, GOLD-MINING INDUSTRY, 1935 AND 1936

Area	1935			1936		
	No. of wage-earners	Wages paid	Average wage per annum	No. of wage-earners	Wages paid	Average wage per annum
Porcupine	5,781	\$9,433,723	\$1,632	6,504	\$10,890,496	\$1,674

Mint Receipts from Ontario Mines

The table below shows the record over a five-year period of receipts of crude gold bullion from Ontario mines at the Royal Canadian Mint.

RECEIPTS OF CRUDE GOLD BULLION FROM ONTARIO MINES AT THE ROYAL CANADIAN MINT, OTTAWA, 1932-1936

Year	Quantity	Precious metals		Total value (standard)	Buying rate in Canada for New York funds ¹
		Gold	Silver		
	crude ounces	fine ounces	fine ounces		cents
1932.....	2,865,271	2,248,106	300,927	\$46,554,898	113.580
1933.....	2,441,467	1,879,659	270,377	38,945,178	109.472
1934.....	2,668,456	2,031,719	292,445	42,134,234	.990
1935.....	2,798,831	2,195,386	310,104	45,578,512	100.54
1936.....	2,998,696	2,346,529	379,693	48,674,046	100.072

¹The average rate of premium on New York funds is based on the day to day record of current quotations. The Federal Department of Finance pays for gold in Canadian funds and reimburses producers by an amount equivalent to the exchange premium on New York funds. Export of gold is prohibited except under license. After April 19, 1933, when the United States forsook the gold standard, Canadian output was marketed in London.

The Price of Gold in Canada

The average monthly value of gold in Canadian funds in 1936 ranged from \$35.06 per ounce in January to \$35.18 in February and remained above the thirty-five dollar mark until the end of June. The July price was \$34.91; August, \$35.00; and the year closed at \$34.98, the average for the year being \$35.03. In 1935 the average was \$35.19, as against \$34.50 in 1934. The chart below gives an idea of the wide fluctuation in the prices for gold between 1931 and 1934.

Chart of average monthly and yearly prices of gold in Canadian funds from 1931 to 1934, inclusive. No change in 1935 and 1936.

Exchange Equalization

The figure for exchange equalization published for 1933, namely \$16,486,437, refers to the actual quantity of gold marketed during that period. Owing to the fact that in former years some mines reported only the exchange received during the calendar year and not exchange actually due on the year's gold shipments, some small corrections have been made on the following table for the years 1931 and 1932, as follows: \$81,728.42 received in 1933 should be credited to 1932, and \$113,088.91 should be deducted from 1932 and credited to 1931. In 1930, the exchange did not overlap with 1931.

EXCHANGE EQUALIZATION RECEIVED ON GOLD MARKETED BY ONTARIO PRODUCERS, 1920-1936

Year	Porcupine	Kirkland Lake	Matachewan	N. W. Ontario	Other sources	Total
1920	\$1,265,644	\$110,354		\$257		\$1,376,275

Nickel-Copper and Platinum Metals

During 1936 extensions to the plants of both the International Nickel Company and the Falconbridge Nickel Mines were made. The former has greatly extended the smelting division of its plant, by which the production of copper will be increased. As molten blister copper will be sent immediately to the neighbouring plant of the Ontario Refining Company, which is now owned by the International Nickel Company, a considerable saving will be possible in the refining stage by taking advantage of the heat available in the blister copper. The 8,000-ton concentrator will, by selective flotation, produce sulphides high in copper and sulphides high in the nickel element. With no increase in size this plant will probably handle 12,000 tons of ore per day.

At the Falconbridge, extensions were made in both the milling and smelting departments. The blast furnace, which had a capacity of 750 tons per day,

using a 15-foot hearth, was enlarged to 20 feet, giving a maximum capacity of 1,200 tons per day. Another basic converter was added, making three now available. A disastrous fire at the Wahnapitae power plant, which supplies this company, caused a shutdown, and advantage was taken of this enforced cessation of operations to make the enlargements that had been previously planned.

The following notes on the nickel-copper mines were supplied by the inspector of mines for that area. At the International Nickel Company's Froid mine, shafts Nos. 4 and 6 were completed to the 3,400-foot level, and connected at that horizon. A crusher station and loading pockets were installed below this level at No. 4 shaft. Filled square-set stoping was carried on between the 2,200- and 3,100-foot levels, and production was increased to about 10,500 tons per day.

At the Creighton mine, shaft No. 5 was completed to 4,074 feet in August, and development was started on four of the six new levels below the 40th, which was the previous bottom. A new surface plant was completed at this shaft, except the rock-house, which was still under construction at the year's end. Production was steadily maintained at 1,400 tons per day, and 2,000 tons of rock in addition was obtained from caving operations and shipped to the Froid for back-fill.

A new addition was finished at the Copper Cliff smelter and was partially in operation by November. The additions comprised 2 new reverberatory furnaces and 7 new converters. A new change-house was erected, and the old section of the plant worked to capacity.

The Coniston smelter was active throughout the whole year.

The Garson mine was opened in November at about the rate of 10,000 tons per month, and exploratory work was carried on to determine the quantity of ore remaining in the mine.

At the Falconbridge, shaft No. 5 was sunk an additional 400 feet to a total of 1,800 feet, and new levels were started at the 650-, 800-, and 1,000-foot levels. Shaft No. 1 was completed from the 100- to the 1,200-foot level and a connection made with No. 5 shaft at that horizon. Production of about 1,100 tons per day was obtained by cut-and-fill stopes in the No. 1 shaft area. A crusher station and loading pockets were installed below the No. 5 shaft. The new surface plant at this shaft as well as the smelter addition was finished, and all hoisting was transferred from No. 1 to No. 5 shaft.

During the year the Alexo mine was reopened, and two cars of ore were shipped to the Cuniptau to increase the nickel content of the material being smelted. At the present time a programme of diamond-drilling is being carried on at the Cuniptau to explore the nickel-copper deposits under development. The small smelting plant was closed down in October.

5. Matte exported ¹	21,778	43,315	46,755	46,371	50,644
6. Nickel content of matte exported ²	8,068	25,811	28,771	28,949	32,787
7. Copper content of matte exported ²	8,825	12,323	6,692	6,272	6,496

¹All matte was exported prior to 1918, when refining in Canada began at Port Colborne, Ont. The British America Nickel Corporation commenced refining operations at Deschênes, Que., in 1920, and closed down finally in July, 1924. In 1934, 1935, and 1936 a few thousand tons were brought back to Canada for treatment. These have been deducted.

²In 1932, after the reorganization of the metallurgical practice, the Orford process, i.e. the separation of the matte into copper tops and nickel bottoms, was carried out at Copper Cliff.

The nickel industry in 1936 was described in *Metal and Mineral Markets*, December 31, as follows:—

Because of the increase which has been steadily maintained in the demand for nickel since the low point in 1932, important additions to productive capacity were made during the year in Canada, the United Kingdom, the United States, and elsewhere. These additions, which both effected a better balance in production processes and added to potential output, provide the industry with the reserve capacity to maintain prompt deliveries under any conditions which can reasonably be anticipated. They affect the mines, smelters, refineries, and merchant mills.

World consumption of nickel in all forms during the first ten months of 1936 attained a total of some 162,000,000 pounds, an increase of more than 20 per cent. over the corresponding figure in 1935, which had established a new record for the industry. This current consumption compares with 112,000,000 pounds in the first ten months of 1929.

Although political and economic developments in Europe affected the nickel industry, consumption of the metal continued to increase. The sanctions which obtained against Italy for the major part of the year and the German policy restricting importations of raw materials to minimum requirements naturally operated to reduce the volume. Yet these adverse conditions were more than offset by the trend, which has become pronounced especially in Great Britain, towards a wider use of nickel-bearing alloys in the broad fields of industry and engineering.

The steel industry, which is the dominant consumer of nickel, broadened its markets during the year and in consequence substantially increased the use of nickel alloy steels. Consumption of nickel in plating is being stimulated by the advent of bright plating. Experience in 1935 and 1936 has demonstrated that the nickel-silver alloys are holding their position in the non-ferrous field. The estimated world's consumption of nickel since 1929, in pounds, follows:—

1936.....	pounds	1932.....	pounds
1935.....	195,000,000	1931.....	57,000,000
1934.....	160,000,000	1930.....	73,000,000
1933.....	122,000,000	1929.....	88,000,000
	96,000,000		136,000,000

During the year the price for platinum fluctuated from \$32 per ounce to as high as \$70. The quotations for the year were as follows:—

	Per ounce		Per ounce
January 3.....	\$37	August 3.....	\$45
January 10.....	35	August 18.....	53

Charles Engelhard of Baker & Company, Newark, N.J., reported on the platinum industry in 1936 in part, as follows:—

World purchases of platinum metals, including palladium, in 1936 will probably exceed 400,000 ounces, judging from indications received just before the year's end. This establishes a new record in the use of these metals and a remarkable gain over the 1935 figure of 275,000 ounces. While some platinum metals have been purchased during the year for speculative purposes or as

¹Preliminary estimate based on ten months' record.

an investment, the volume of actual consumption in the arts and industry, and the diversity of uses to which these metals have been put, is a further evidence of the effectiveness of progressive research and the orderly development of markets for them.

World production, outside of Russia, has increased, primarily because, with nickel mines and refineries operating at an unprecedented rate, the amount of platinum recovered from Canadian nickel ores has been correspondingly larger. The situation in Russia is not definitely known, except that Russia apparently withdrew from world markets during the summer. Presumably, however, production in Russia has not fallen off. Production in South America and South Africa has been normal, as has also the world secondary production.

In general, the improvement in the demand for the platinum metals is a continuation of the trend which began about half way through the year 1935. Superimposed upon this, however, was a spectacular rise in price, which received its real impetus from an unanticipated improvement in world demand coupled with speculative and investment buying. During the 6-month period from April to September, the price of platinum went from \$33 an ounce to \$70, and subsided toward the year end to the more normal figure of \$48.

In this period purchases of platinum alone were at a rate in excess of 300,000 ounces a year, and it was not unnatural for the trade to be concerned about supplies in the face of such an abnormal demand.

The jewelry industry continued to be a most important user of the metals. The amount of platinum going into jewelry continued to reflect the accelerating rate of industrial and business recovery as well as the recovery in the marriage rate. Jewelry remains a reliable barometer of prosperity, and since platinum is the accepted material for wedding and engagement rings and finer settings, increased buying of jewelry is immediately echoed in larger demands for platinum, iridium, and palladium.

Platinum and palladium have been standard materials for dental work for many years, and their position was further strengthened this year as a result of investigations which covered the range of metals used by dentists. These studies indicate that no other materials compare favorably with the precious metal alloys of platinum-gold-palladium for dental structures, because they are strong and impervious to attack by the acids in the mouth and are readily cast and shaped to the complex forms required.

Platinum-clad material progressed from the discussion stage to one of usefulness in industry. Platinum-cladding consists of bonding a layer of platinum to a thicker bar of some other metal and working the two down to the desired thickness so that the platinum becomes an inseparable surface for the baser metal. Thus platinum's remarkable resistance to corrosion is made economically available in laboratories and industries, where use of platinum alone in sufficient thickness to provide necessary strength is considered too costly. Platinum-clad material this is practical for reaction vessels formerly considered too large to be made of this metal.

In addition, there have been increases in the use of platinum and palladium for electrical contacts and of platinum and rhodium for such applications as spinnerets for extruding glass fibres. Platinum and platinum-rhodium catalysts, used in the synthesis of sulphuric acid and of nitric acid, have also been in larger demand. This is a reflection of the increased output of such acids, the bulk of which are produced with catalysts of this kind.

An interesting sidelight on the consumption of platinum is to be found in activities which some nations are taking to assure a domestic supply. This is especially remarkable in Japan, where encouragement has been given to the purchase of inexpensive platinum jewelry, particularly rings. Another interesting reaction to platinum metals arose in Germany from the policy of restricting the use of gold for other than monetary purposes. Among other things, this has resulted in an increased usage of platinum and palladium for good dental structures.

The progress of palladium during the year has been especially remarkable. Though the valuable properties of this metal have long been known to scientists, they have been overshadowed by the fame of platinum. Recently the public has begun to appreciate the fact that palladium possesses the same handsome color as platinum and is highly resistant to corrosion and tarnish. This has resulted in its greater use in jewelry.

The use of palladium leaf also is steadily expanding. A novel application was as trim for the metal and glass chandelier and lighting fixtures in the Iridium Room of the Hotel St. Regis, one of New York's smartest dancing rendezvous. Other uses were for signs and striping and lettering of the New York Central Railroad's new train, the "Mercury" and as a surface for the ceiling in the Metal Institute Room of the Federal Warehouse in Washington, D.C. Palladium leaf is used for lettering and ornamenting fine book bindings and for architectural decoration.

Jewelers have used rather large amounts of palladium during the year for rings where its effectiveness in combination with yellow gold has been outstanding. Popularity of rhodium plating or so-called "rhodanizing" for silverware has increased markedly as a means of combating tarnish, since a thin layer of rhodium will prevent discoloration of silver.

Iridium has shared in the improvement which has marked all platinum metals, as is evidenced by the fact that the price rose from \$55 to approximately \$175 during the period of heavy demand. This was due to improvement in the jewelry industry, since jewelers consider a 10 per cent. addition of iridium practically essential to harden platinum for their purposes.

Dividends

Total dividends paid to the end of 1935 and payments in 1936 are given in the following table. For convenience of comparison Mond figures have been

converted to dollars on the basis £1 = \$4.8665. The Falconbridge Nickel Mines paid its first dividend in 1933.

DIVIDENDS PAID BY NICKEL COMPANIES TO END OF 1936

Company	Period	To end of 1935	1936
Canadian Copper Company.....	1894-1901	1,975,000.00	
International Nickel Company ¹ preferred.....	1906-1928	12,299,273.00	
International Nickel Company ¹ common.....	1909-1928	65,811,694.00	
International Nickel Company of Canada, Limited ² preferred.....	1929-1936	13,316,609.03	\$1,933,898.75
International Nickel Company of Canada, Limited ² common.....	1929-1936	51,307,824.81	18,951,619.70
Falconbridge Nickel Mines, Limited.....	1933-1936	2,713,310.53	1,001,234.50
Total.....		\$147,423,711.37	\$21,886,752.95
Mond Nickel Company ³ deferred.....	1906-1914	£264,043	
Mond Nickel Company ³ preferred.....	1904-1929	2,556,359	
Mond Nickel Company ³ ordinary.....	1905-1929	2,581,984	
Total.....		£5,402,386 or \$28,291,126	
GRAND TOTAL.....		\$173,714,837.37	\$21,886,752.95

¹Successors to the Canadian Copper Company. The International Nickel Company paid dividends on the common stock from 1909 to 1919, inclusive, and again from 1925 to 1928, inclusive. Common stock outstanding was \$41,834,600, and preferred stock \$8,912,600, or a total of \$50,747,200 at the beginning of 1928. On December 19, 1928, the authorized capital stock of \$62,000,000 of the New Jersey company was reduced by changing the par value of the shares from \$25 to \$1 each, and at the same time the name of the company was changed to Nickel Holdings Corporation. On December 31, 1928, the authorized capital was further reduced to \$993,425 fully issued or subscribed-for stock, consisting of \$843,700 preferred stock and \$149,725 common stock, par value in each case.

²Dividends paid by the International Nickel Company of Canada, Limited, on the common stock in 1929 were 90 cents per share, and \$1.00 per share in 1930. Common stock was increased to 15,000,000 shares of no par value on July 25, 1930; as a result shares issued were increased from 13,758,208 to 14,584,025. Seven per cent. preferred stock (cumulative) now stands at \$27,627,825. Dividends on common stock aggregated 45 cents a share in 1931.

³Upon completion of the exchange of stock under the amalgamation of the Mond and International companies, effective December 31, 1928, stock issued or issuable was as follows: \$27,-627,825 of 7 per cent. cumulative preferred, and 13,758,208 common shares without par value. Dividends paid on February 16, 1929, by the Mond company cover the 8 months' period ending December 31, 1928.

Silver-Cobalt

The silver mining industry at Cobalt is gradually drawing to a close. Despite the low price for the metal, however, important quantities are being recovered owing to the better market for cobalt, which is associated with the silver. In addition, the recent rapid development of the nickel-copper mines and an expanding gold industry has produced important quantities of by-product silver, so that recent total annual production, while only a fraction of its former size, is more than five million ounces.

The production of silver in 1936 from all sources was 5,218,354 fine ounces, worth \$2,325,850, as against 6,320,670 ounces, valued at \$4,068,906 in the previous year, and the average yearly price of the metal on the New York market was 45.087 cents and 64.273 cents per ounce for the corresponding years. During 1936 thirty-one properties shipped ores. Twenty-one of these are located at Cobalt, namely, Agaunico, Bailey, Beaver, Cobalt Comet, Cobalt Properties, Cobnor, Colonial, Crown Reserve, Drummond, Foster, Hudson Bay, Kerr Lake, La Rose, Nipissing, O'Brien, Peterson Lake, Red Jacket, Rochester, Silver Bar, Silver Queen, and Temiskaming; five in South Lorrain, as follows, Belorrain,

Canadian Lorrain, Frontier, Gilgreer, and Lang-Caswell; and four at Gowganda, Morrison, Mapes-Johnston, Silverado, and Miller Lake O'Brien. Many of these were worked by lessees, the operations consisting of mining old stopes or ore pillars and hand-picking dumps.

In January the Lily of the Valley or Parsons mine, located on lot 19, concession II, Paipoonge township, Thunder Bay district, and last operated about forty years ago, was leased for a term of two years. Some 5,060 pounds of ore, containing 2,200 ounces of silver, was shipped.

The following table shows the total silver production for the years 1935 and 1936:—

SILVER PRODUCTION, 1935 AND 1936

Source	1935		1936	
	Fine ounces	Value	Fine ounces	Value
Sales of bullion by the reduction companies, smelters, and mines.....	3,181,282	\$2,051,089	1,863,183	\$829,960
Contained in silver-cobalt concentrates and residues exported.....	144,229	94,177	186,362	74,588
Estimated as recovered from concentrates treated outside of Ontario.....	299,632	181,181	194,890	85,928
In crude gold bullion.....	451,781	288,738	489,351	214,176
Recovered by nickel-copper refineries..	2,243,746	1,453,721	2,484,568	1,121,198
Total.....	6,320,670	\$4,068,906	5,218,354	\$2,325,850

Shipments of silver mines by camps during 1935 and 1936 were as follows:—

SILVER AND COBALT SHIPMENTS BY CAMPS, 1935 AND 1936

Camp	1935			1936		
	Silver	Cobalt ¹		Silver	Cobalt ¹	
	fine ounces	lbs.		fine ounces	lbs.	
Cobalt.....	2,737,592	437,728	\$130,239	1,504,095	579,430	\$208,247
Gowganda.....	829,195	20,818	No pay	640,099	24,724	187
South Lorrain.....	36,585	9,326	3,867	9,672	18,942	9,921
Total.....	3,603,372	447,054	\$134,106	2,153,866	623,096	\$218,355

¹Figures represent the quantities paid for by the smelter and values received by the mines.

The production of cobalt as metal and contained in oxides and mixed oxides was higher in 1936, reflecting the improved condition of industry generally. The demand for stellite, the cobalt-chromium-tungsten alloy for cutting tools, was improved, and the operations of the Deloro Smelting and Refining Company at Deloro were carried on at a higher capacity than last year. The output of cobalt metal and its compounds with the metal content of concentrates exported totalled 644,834 pounds, valued at \$564,870, as against 485,435 pounds, worth \$326,482, in 1935.

Shipments of ore and concentrates from Cobalt during 1936, as reported by the T. & N. O. Railway were: Deloro, 736.96 tons; Montreal and West St. John, 2,058.80 tons; Trail, B.C., 165.50 tons; and United States, 494.71 tons; a total of 3,455.97 tons. In 1935 Deloro received 522.45 tons; Montreal and West St. John, 1,862.21 tons; Noranda, 730.09 tons; Trail, B.C., 251.50 tons; and United States, 239.54 tons; a total of 3,605.89 tons.

¹Copper and lead are recovered from certain silver ores and concentrates shipped to United States refineries.

²Nickel metal and metallic contents of all nickel compounds.

³Cobalt metal and metallic contents of all cobalt compounds, and cobalt contained in ores and speiss residues exported. In 1932, it includes 22,258 pounds worth \$10,024 from northwestern Ontario.

⁴Prior to 1914 an estimate based on assays was made of the nickel, cobalt, and arsenic in the ores. Since that date recoveries have been reported.

⁵Includes 460 tons of speiss residues, worth \$153,116. ⁶Recoveries of bismuth from base bullion were not reported prior to 1923.

¹200,000 preferred shares, par \$1.00, redeemed April, 1925, and capital reduced from \$2,200,000 to \$2,000,000.

²Cash assets amounting to \$50,000 paid on April 27, 1917.

³Now owned by Cobalt Properties, Limited.

⁴In 1917 the capital stock of the company was reduced from \$1,000,000 to \$750,000; in 1918, from \$750,000 to \$500,000; and on December 21, 1919, from \$500,000 to \$150,000, but returning to shareholders amounts equal to the reduction in capital, leaving 300,000 shares issued of 50 cents each. The mine was sold to the Mining Corporation of Canada and operated by it in 1920 and subsequently; it is now owned by Cobalt Properties, Limited.

⁵Formerly owned and operated by Mining Corporation of Canada, Limited; sold to Cobalt Properties, Limited, in 1935.

⁶Succeeded Right of Way Mining Co., Ltd.; now owned by Cobalt Properties, Ltd.

⁷Name of company changed from Temiskaming and Hudson Bay in 1909.

⁸In addition a return of capital amounting to \$600,000 was made on July 3, 1919, to stockholders of the Kerr Lake Mines, Limited.

⁹Includes \$16,288,297.25 paid in dividends by the Nipissing Mines Company (the holding company) to the end of 1916.

¹⁰Paid out of capital \$40,491.15 on September 10, 1917, and an equal amount on April 24, 1918.

¹¹Succeeded by Right of Way Mines, Ltd.

¹²The capital stock of the company was increased on June 1, 1911, from \$1,000,000 to \$2,000,000.

¹³Does not include dividends by private companies such as M. J. O'Brien, Limited.

Since 1904, silver shipments as reported by operators were as follows:—

SILVER SHIPMENTS BY CAMPS, 1904-1936

¹Includes 885 ounces from Silver Islet, Lake Superior.

²Silver Islet, Lake Superior.

³Nickel Hill Syndicate in the Sudbury area shipped silver-cobalt ore.

⁴Lily of the Valley mine, Thunder Bay district.

Iron Ore, Pig Iron, Steel, and Coke

As shown in the following table, foreign ore charged to the blast furnaces was slightly increased as compared with the figures for 1935. The average price in American funds (sales tax extra) was \$4.65 per long ton at lower lake ports.

IRON AND STEEL STATISTICS, 1932-1936

Year	Foreign ore smelted	Limestone for flux	Coke	Pig iron produced		Steel made	
				Quantity	Value	Quantity	Value
1932.....	long tons 198,063	short tons 56,880	short tons 119,064	long tons 113,665	\$2,558,799	long tons 244,693	\$8,319,562
1933.....	182,060	46,944	113,102	110,562	2,066,049	258,841	8,800,594

At Montreal No. 1 pig iron (2.25 to 2.75 per cent. silicon) was quoted at \$23.00 per long ton for the first three months, \$22.00 for the following eight months, and \$24.00 during December. The average for the year was \$22.42. Malleable iron was the same. Steel billets also showed a rise in price at the end of the year, being quoted at \$36.00 in December and \$34.00 during the first eleven months, the yearly average being \$34.20.

PIG IRON, STEEL, AND FERRO- AND OTHER ALLOY PRODUCERS, 1936

Company	Location
Abrasive Company of Canada, Ltd. ^{1 2}	Hamilton.

¹These firms produce ferro-silicon as a by-product in the manufacture of ferro-alumina.

²Ferro-alloys.

³Pig iron.

⁴Steel.

⁵Calcium molybdate; [this plant was sold to Chromium Mining and Smelting Corporation in 1936.

During 1935 the output of pig iron increased from 271,725 to 554,977 long tons, and although the increase amounts to 104.2 per cent. in quantity, this figure remains considerably below the 769,359 tons produced in 1929, the peak year. In 1936 the output of pig iron totalled 418,420 long tons, of which 275,820 tons were basic, 79,997 tons foundry, and 62,603 tons malleable. During the year the Algoma Steel Corporation at Sault Ste. Marie, the Steel Company of Canada at Hamilton, and the Canadian Furnace Company at Port Colborne were active.

IRON BLAST FURNACES IN OPERATION, 1936

Company	Stacks operating	Furnaces		Location
		No. of stacks	Daily capacity	
Algoma Steel Corporation, Ltd.....	1	4	long tons 1,600	Sault Ste. Marie.
Canadian Furnace Company, Ltd....	1	1	350	Port Colborne.
Steel Company of Canada, Ltd.....	2	2	825	Hamilton.

Ferro-Alloys

Of the fourteen plants listed in the 1931 report only eight reported production in 1936. These plants produced a total of 61,173 long tons of various kinds of ferro-alloys in 1936, as against 57,424 tons in the previous year. The production of these materials during the past five years in Ontario is shown in the following table:—

STATISTICS OF FERRO-ALLOYS PRODUCTION IN ONTARIO, 1932-1936

Year	No. of producing companies	Quantity produced	Kind of material
1932.....	5	long tons 15,595	Ferro-silicon, ferro-manganese, silicon spiegel, spiegeleisen, calcium manganese silicon, zirconium manganese silicon, calcium molybdate.

Chromite

The chromite deposit at Obonga lake, west of Lake Nipigon, which is owned and operated by the Chromium Mining and Smelting Corporation, Limited, commenced operations in August, 1935, and was active in 1936 from May 15 to the end of the year. A total of 57 men was employed, 35 on surface and 22 below ground. Wages paid totalled \$76,619. Some 378 short tons of ore were shipped to the smelting plant at Sault Ste. Marie for experimental purposes.

Molybdenite

The Phoenix mine situated on the west half of lot 28, concession IV, Bagot township, Renfrew county, and owned by the Phoenix Molybdenite Corporation, Limited, carried on operations throughout 1936. The 150-ton mill was turned over on August 17. Some 2,116 tons of ore were treated, but no sales of concentrates were reported. Thirty-one men were employed, of which 11 were on surface, 12 below ground, and 8 in the mill. Wages paid totalled \$24,526.

Radium

International Radium and Resources, Limited, with properties on lots 4 and 5, concession XXI, and lots 4, 5, and 6, concession XXII, in Cardiff township, Haliburton county, was idle throughout the year. Canada Radium Mines, Limited, near Cheddar in the same township did some underground exploratory work.

The refinery of the Eldorado Gold Mines, Limited, at Port Hope was operated at capacity, but no figures of production are available.

NON-METALLICS

With the exception of arsenic, diatomite, mineral waters, and salt, every item in the non-metallic group showed an improvement in value in 1936. This group though relatively small in production value is important and is closely related to the chemical and building industries and supplies much of the raw materials consumed by them. The total value of the non-metallic group in 1936 was \$8,933,036, as against \$7,766,657 in 1935, an increase of 15 per cent. in value. The details of quantities and values marketed are set out in the table "Summary of Mineral Statistics, 1936" on page 2.

Actinolite and Asbestos

Actinolite did not appear in the statistics of Ontario's mineral production in 1935 and 1936. Development work was carried on at the asbestos property of Rahn Lake Mines Corporation in Bannockburn township during 1935. About

400 tons of mill rock asbestos ore was placed on the stock pile and was expected to average about \$8 to \$10 per ton. No sales were reported however. An average of 5 men was employed throughout the greater part of that year. Throughout 1936, a small party was employed. While no shipments of ore were reported the stock pile was increased to about 2,000 tons of asbestos-bearing rock.

Arsenic

Ontario production of white arsenic (As_2O_3) comes from the smelting of the silver-cobalt arsenides of Northern Ontario by the Deloro Smelting and Refining Company. The output in 1936 was 1,365,606 pounds, valued at \$42,491, as against 2,558,789 pounds, worth \$75,326, in 1935.

Barite

A small output of barite was reported in 1933 for the first time since 1923. Several deposits of this mineral are known to exist in the province. Although considerable investigation into markets has been undertaken, and several enquiries have been received from outside sources, no steady development work was under way at any of the Ontario deposits. Canada Night Hawk Mines, which is equipped for milling, did not report any work. The deposits in Yarrow township and at Tionaga were idle, and no shipments were reported.

Diatomite

Several deposits of diatomite have been under development for a number of years in Muskoka, but the production to date has been small. In 1936 some 40 tons, valued at \$2,000, was reported as shipped from Martin's Siding by the Canadian Multi-Cell Company, as against 100 tons, worth \$4,600, in 1935.

Feldspar and Nepheline Syenite

The output of feldspar from Ontario quarries during 1936 totalled 8,409 tons, valued at \$70,804, as against 8,656 tons, worth \$75,003, in the previous year. The values shown include the amounts added by grinding, namely \$23,475 and \$29,511, respectively, in the years mentioned.

This industry, which is more or less seasonal in its operation, was represented by seven quarries in 1936 and gave employment to 65 men, who received \$20,677 in wages.

Other products are now competing with feldspar, and although there are a number of idle quarries in the province which could operate under more favourable conditions, the competition both in Canada and the United States makes this more and more difficult.

The major part of the Ontario production finds its market in the United States, where it is ground. The domestic market for ground feldspar is well taken care of by the Frontenac Floor and Wall Tile Company at Kingston, which was operated steadily throughout the year.

The feldspar industry in the United States during 1936 was described in *Mineral Trade Notes*, January 20, 1937, a publication of the Economics and Statistics Branch of the United States Bureau of Mines, as follows:—

In 1936 the domestic feldspar industry registered substantial improvement over 1935, which, in turn, was well ahead of the previous year. Preliminary figures obtained by the National Feldspar Association indicate a 20 per cent. increase over 1935 in shipments of ground feldspar. This increase was attributed largely to improvement in demand for glass-making and pottery manufacture, although manufacture of enamels showed an increase of nearly 10 per cent. Significant is the relative increase in the consumption of feldspar in glass-making. Whereas only a few years ago the manufacture of glass accounted for only about 30 per cent. of the total consumption of feldspar, it now takes more than all other industries combined.

Included in the figures for feldspar is the production of so-called "Carolina stone" by one company. This material, a synthetic product (U.S. Patent 2,024,407), is used in much the same way as Cornwall stone, a kaolinized feldspar. A typical analysis of this material follows:—

	Per cent.
SiO ₂	72.68
Al ₂ O ₃	16.06
Fe ₂ O ₃10
CaO.....	.38
CaF ₂	1.37
K ₂ O.....	3.78
Na ₂ O.....	4.16
Loss.....	1.81
Total.....	100.34

During the year a new competitor for feldspar arose in the form of nepheline syenite. Trial shipments of this material have been imported from Canada, and some of the earlier shipments, particularly those originating in Bancroft, occasionally ran rather high in iron. Production now, however, comes from Blue Mountain, Methuen township, where a large, uniform deposit is being prepared for large-scale production. The material is crushed and cleaned magnetically at Lakefield, Ontario, the shipping point. Later, a crushing and cleaning plant may be built in the United States, probably in New York state. At present a duty of 30 per cent. ad valorem, or approximately \$3 a ton, is levied on imports of the prepared material, which is ground to pass 28 mesh (13 per cent. through 200 mesh) for use in the glass industry. The material as mined carries about 1 per cent. iron oxides, but these are present mainly as magnetite and, after treatment in magnetic separators, the typical analysis is as follows:—

	Per cent.
SiO ₂	59.30
Al ₂ O ₃	24.70
Fe ₂ O ₃05
TiO ₂01
CaO.....	.27
MgO.....	.02
Na ₂ O.....	9.91
K ₂ O.....	5.10
Loss.....	.44
Total.....	99.80

Ordinary feldspar seldom contains over 18 per cent. alumina, and even South Dakota spar rarely exceeds about 20 per cent. Nepheline syenite, however, carries 24 per cent. alumina and also contains a slightly higher total amount of alkalis. It is sold in Canada at \$10 a ton and is offered at \$18.38 delivered at glass works in western Pennsylvania and Ohio. Another substitute for feldspar may be available soon in the form of a by-product of certain chemical-manufacturing operations. Preliminary samples indicate the possibility of maintaining a product with the composition of a synthetic sodium-aluminum silicate with over 33 per cent. alumina.

Some displacement of feldspar may accompany the larger use of pyrophyllite and magnesium talc in the manufacture, particularly, of wall tile. The substantial increase in total production of such tile, however, has more than offset any quantitative displacement during 1936. The feldspar industry is making rapid strides in technologic research and has greatly improved the uniformity of its product and extended the variety of grades, each of which is available in a number of different grindings. A summary of the co-operative research conducted under the auspices of the National Feldspar Association is expected shortly.

Fluorspar

Fluorspar is consumed as a flux in smelters and also in the chemical industries. The domestic consumption is not large and is confined mostly to Ontario. A total of 75 tons, worth \$900, was reported as shipped in each of the years 1935 and 1936.

Graphite

Only one producer of graphite was active in 1935, the Black Donald Graphite Company, Limited, at its property on lots 16, 17, and 18 in concession III, Brougham township, Renfrew county, near the village of Calabogie. This deposit is the largest amorphous graphite mine on the American continent. In 1936 production to the value of \$88,812 was reported, as against \$78,500 in 1935.

Gypsum

The output of gypsum in Ontario rose from 33,234 tons in 1934 to 38,247 in 1935 and again increased in the following years to 40,191 tons. The production came from two companies: Gypsum, Lime and Alabastine, Canada, Limited, with a plant at Caledonia, and the Canadian Gypsum Company at Hagersville. The increase is indicative of the general revival in the building industry in Ontario. While the improvement was important, the output figures still remain far below those of good times:—

GYPSUM SALES, 1932-1936

¹Exclusive of wage-earners employed in the manufacturing division of the Caledonia plant.

Iron Pyrites and Sulphuric Acid

The sulphur content of the acid manufactured at Copper Cliff by Canadian Industries, Limited, from sulphur fumes derived from the smelting operations, was 14,152 tons, worth \$141,520, as against 13,292 tons, valued at \$132,920, in 1935. No pyrite ore was shipped.

Mica

During 1936 there were only six active producers, who reported shipments of 1,057,343 pounds, worth \$11,433, as against 509,826 pounds in 1935 and 1,236,302 pounds in 1934. Prices have generally improved in the United States, where operations were being carried on to capacity. Scrap and by-product mica are bringing twice the price of the depression lows. Conditions in Ontario tend to reflect those in the United States.

The major portion of the provincial output is made by direct mining, in which large crystals are recovered and treated. There is little or no by-product mica such as is recovered in North Carolina from kaolin and feldspar deposits.

SHIPMENTS OF MICA, 1934, 1935, AND 1936

Grade	1934		1935		1936	
	Quantity	Value	Quantity	Value	Quantity	Value
	pounds		pounds		pounds	
Ground and rough.....	2,459	\$514	7,960	\$1,990
Thumb-trimmed.....	30,315	3,094	10,852	\$3,223	8,037	1,475
Splittings and knife-trimmed.....	303	110	2,734	1,738	9,446	3,243
Scrap.....	1,203,225	5,341	496,240	2,183	1,031,900	4,725
Total.....	1,236,302	\$9,059	509,826	\$7,144	1,057,343	\$11,433

The prices for the various sizes and grades of thumb-trimmed mica did not vary greatly from those reported by the producers in other years.

SIZE	Price per lb.	SIZE	Price per lb.
1 by 1 inch.....	\$0.05	2 by 4 inches.....	\$0.40-.60
1 by 2 inches.....	.10	2¼ by 4¼ inches.....	.67
1 by 3 inches.....	.15	3 by 5 inches.....	.90
2 by 3 inches.....	.40-.53	3 by 6½ inches.....	2.00

Scrap mica, \$9.00 per ton (net) or 45 cents per pound.
Rough-cobbed, 20 cents per pound.

Prices for the knife-trimmed material were slightly higher due to greater preparation given to the ore.

SIZE	Price per lb.	SIZE	Price per lb.

Mineral Waters

Only three producers reported production of mineral water from Ontario wells in 1935, which amounted to 19,900 Imperial gallons, worth \$1,477, as compared with 21,775 gallons, valued at \$1,622, in 1934. The production has gradually declined in Ontario to a fraction of the former output, and during the year 1936 two producers reported sales of 23,100 Imperial gallons at \$1,117.

Natural Gas and Petroleum

The Natural Gas Commissioner of Ontario has supplied the following notes:—

Natural Gas

In the year 1936 the value of natural gas produced reached an all-time record. Although the quantity produced in other years has been very much greater, the retail value in those years was less than half the present retail value, and over 50 per cent. of the total sales was to industries at very low wholesale rates. The production of gas in 1936 has exceeded any year since 1920, and the number of pay consumers is also the greatest on record, all of which is tabulated in the following table.

NATURAL GAS PRODUCTION IN ONTARIO BY FIELDS, 1936

County	Field	Quantity
		M cu. ft.
Essex.....	Kingsville.....	3,531,870
	Tilbury.....

Wells in surface drift.....	Harwich and Howard tps.....	14,000
Private wells.....		60,000
Total produced.....		10,006,743
Value.....		\$6,054,294
Imported mixed gas.....		M cu. ft. 113,721
Total distributed.....		10,120,464

All the gas fields, with the exception of Dover, Welland, and Norfolk, show increases, the greatest being in the Declute and Dawn fields. The Declute field has proved to be a major field, and the latest developments at the time of writing (July, 1937) would indicate that a considerable part of the field extends under Lake Erie. It is to be hoped that a large area under Lake Erie adjoining the Tilbury, Declute, and Leamington gas fields will be found to be productive, providing a substantial reserve for the future.

The discovery made in 1935 in Dereham township has been extended into Bayham township, and at the end of 1936 the number of producing wells had reached fourteen. A plant was being built in January, 1937, to purify the gas, and at the same time a pipe line was under construction to market the purified gas, through the facilities of the Southern Ontario Gas Company. A 6-inch transmission line was being laid from the centre of this field near Brownsville to the town of Ingersoll, a distance of about 10 miles. This pipe line is owned by the Oxford Pipe Line Company.

The extension of the Bayham township field, known as the Eden field, is gratifying, although the limits appear to have been reached on three sides, east, north, and west.

Drilling in the Haldimand field was very much curtailed in 1936, and the proportion of dry holes increased greatly, which may be taken as an indication that drilling in this field is reaching its conclusion. There are now 1,899 producing wells in Haldimand county and the adjacent townships in Welland, Lincoln, and Brant counties.

Petroleum

The oil produced and its value for the year 1936 shows an increase of about 454 barrels in quantity and \$2,611 in value over the year 1935. The 1936 production is an increase over the lowest year's production (1930) of 48,192 barrels, or 41 per cent. Increases by fields since 1930 are as follows—:

	Barrels
Enniskillen.....	3,962
Oil Springs.....	2,635
Moore.....	1,970
Bothwell.....	15,358
Dover.....	15,079
Raleigh.....	1,125
Mosa.....	1,025
Dawn.....	8,171

The remaining small fields show a slight loss. It is most gratifying to see such an increase in the first four fields, the first three being over seventy years old. The new production in Bothwell is actually coming from wells drilled in the 1860's which have been idle for many years. These wells have been cleaned out and re-equipped and are now pumping continuously. The Dover field was producing oil from two gas wells, the oil being incidental to the gas. In the extension of this field in the past two years, three oil wells have been added with an initial production of from 25 to 35 barrels per day. Dawn is a new field, the oil coming from three wells in the gas field. The Mosa field showed a greater increase in the year 1934 and has been decreasing for the past two years.

The success attained in the Bothwell field has given the oil men fresh encouragement; and two oil fields, the Fletcher and the Onondaga, are to receive attention in 1937. New wells are being drilled in the Fletcher field, which has produced over 1,000,000 barrels to date; and cleaning out and redrilling is being carried on in the Onondaga field, from which has been produced approximately 40,000 barrels of oil from a very much smaller area than the Fletcher field.

The number of oil wells operating and not operating is about the same as in 1935, but the abandoned wells show a great increase. This is explained by the fact that old wells which were abandoned and never plugged are being continually discovered. These are usually tested first, and some are put in operation but most of them are plugged. There are thousands of such wells in Petrolia and Oil Springs. The great increase in wells drilled is mostly in the Petrolia and Bothwell fields.

The number of drilling rigs operating, solely or principally in the oil fields, is 9. The capital investment in these rigs and other equipment is \$14,850.

The number of men employed in producing oil is 214, and the wages paid them total \$124,093.

¹Included in Dawn township.

Peat

During the past year or two considerable interest has been exhibited in the peat bogs of Ontario. The names of operators and locations are given on page 82. The production by 4 operators during 1935 was 1,340 tons, valued at \$5,761. In 1936 some 7 producers reported sales of 1,573 tons, valued at \$7,572.

Quartz, Quartzite, and Silica Products

The output of quartz, quartzite, and silica products, which gained slightly in 1934, showed a decline in 1935, falling from 89,838 to 83,034 tons. On the other hand, silica products, reflecting improved building activity, showed a slight gain in quantity. Production figures for the past five years follow:—

QUARTZ, QUARTZITE, AND SILICA BRICK, 1932-1936

Year	Rock sold or used		Silica brick sold or used		Total value
	Quantity	Value	Quantity	Value	
1932.....	tons 66,135	\$93,574	M 93	\$4,303	\$97,877
1933.....	66,562	86,146	183	7,351	93,497
1934.....	89,838	134,572	369	14,730	149,302
1935.....	83,034	120,005	493	22,976	142,981
1936.....	884,585	216,037	471	26,715	242,752

Statistics of quartz production by the International Nickel Company are included in 1936 for the first time. This material is used as a flux in the smelters and was valued at a nominal price; this accounts for the large increase in quantity and the relatively small gain in value.

Salt

During 1936 seven companies produced salt or brine. This industry in part supplies the raw materials for two large chemical manufacturing companies: Canadian Industries, Limited, and Brunner Mond, Canada, Limited. The quantity output rose from 320,003 to 350,044 tons in 1936, but the value was slightly lower. Production figures covering a 5-year period follow:—

SALT SOLD OR USED, 1932-1936

Schedule	1932	1933	1934	1935	1936
	tons	tons	tons	tons	tons
Table and dairy.....	59,620	61,231	69,779	73,704	76,567

Wages.....	\$253,579	\$261,214	\$296,116	\$309,354	\$326,170

¹Workers at the Sandwich salt and chemical works are included.

Talc

Statistics covering a 5-year period show that the talc industry serves a fairly stable and assured market. Two companies were active at Madoc in Hastings county, where the industry is centred, both of them mining a high-grade product, which is milled and refined at the mines. The Geo. H. Gillespie Company, Limited, operates the Henderson mine, and the Canada Talc Company, Limited, the Connolly mine.

TALC STATISTICS, 1932-1936

1936.....	14,562	143,701	34	26,370

STRUCTURAL MATERIALS

Building Permits

In 58 Canadian cities building permits in 1936 were valued at \$41,325,693, as against \$46,560,623 in 1936. Of this total 27 Ontario cities accounted for \$19,256,177, as noted in the following table abstracted from the *Annual Review of Building Permits in Canada in 1936*, issued by the Dominion Bureau of Statistics, Department of Trade and Commerce, Ottawa:—

BUILDING PERMITS, 1932-1936

Year	Ontario cities		Wholesale prices index ¹	Toronto metropolitan area, ² value	Wages index 1913 = 100 ³
	No.	Value			
1932.....	30	\$16,887,761	77.2	\$9,461,050	178.2
1933.....	30	9,116,743	78.3	5,114,351	158
1934.....	30	14,351,380	82.6	8,396,775	154.8
1935.....	27	23,847,536	81.2	11,685,586	159.8
1936.....	27	19,256,177	85.4	10,522,624	160.8

¹Applies to average index numbers for Canadian wholesale prices of building materials on the basis of 1926=100, as compiled by the Dominion Bureau of Statistics. In 1913 the index was 67, dropping to a low of 60.5 in 1915.

²Includes York and East York municipalities.

³Average index numbers of wages in Canadian building trades as compiled by the Federal Department of Labour on the basis of 1913=100.

Construction Contracts

The value of Canadian construction contracts awarded for 1936 reported by *McLean Building Review*, was \$162,588,000, as compared with \$160,305,000 in 1935. Ontario contracts in 1936 amounted to \$72,393,300, or 44.5 per cent. of the total. Prices of materials were considerably below the peak of 1920, and decided drops were recorded in 1930, 1931, and 1932, but a perceptible recovery was recorded in 1934, which fell off slightly in 1935 and rose again in 1936. Canadian construction contracts in 1933 were on a par with the war years, 1916-18, dropping below the \$10,000,000 mark. Figures by classes of construction in Ontario for a 5-year period follow:—

VALUE OF CONSTRUCTION CONTRACTS, 1932-1936

Classification	1932	1933	1934	1935	1936
Residential.....	\$14,143,200	\$12,653,800	\$17,578,600	\$20,646,500	\$23,760,000

Cement

Ontario's production of cement came from two companies: the Canada Cement Company, with plants at Lakefield, Belleville, and Port Colborne, the first mentioned being idle, and the St. Marys Cement Company, with a plant at St. Marys, which was in operation throughout the year.

PORTLAND CEMENT STATISTICS, 1932-1936

¹350 pounds.

Cement Products

In recent years the cement products industry in Ontario has assumed considerable importance. Since 1924 no data have been included in the tables of

mineral production, as the raw materials entering into the manufacture of these products have all been accounted for. Cement products being so closely allied to the building industry, statistics are included so that complete information covering all structural materials is available under one cover. Monolithic construction is not included.

PRINCIPAL STATISTICS OF THE CEMENT PRODUCTS INDUSTRY, 1932-1936¹

Year	No. of plants	Wage-earners, average No.	Salaries and wages	Cost of fuel and electricity	Capital invested	Value of products at works

¹Statistics supplied by the Dominion Bureau of Statistics, Ottawa.

Lime

Lime is used quite extensively for chemical purposes in addition to being an ingredient of mortar and sand-lime brick. During 1936, 16 companies and individuals, operating 18 plants, reported sales that totalled 246,593 tons, valued

at \$1,946,060, as against 221,852 tons, worth \$1,705,303, in 1935. Statistics for the past five years follow:—

LIME STATISTICS, 1932-1936

Year	Lime marketed or used						Fuel costs	Wage-earners	Wages
	Hydrated			Quicklime					
	Quantity	Total value	Value per ton	Quantity	Total value	Value per ton			
1932....	tons 23,518	\$255,223	\$10.85	tons 143,185	\$1,018,007	\$7.11	\$204,546	No. 203	\$154,361
1933....	19,733	220,291	11.16	126,460	1,006,905	7.96	188,317	210	111,637

Distribution of the quicklime and hydrated lime sold in 1936, as reported by the producing companies, was as follows:—

Industrial consumption	Quicklime		Hydrated lime	
	Quantity	Value	Quantity	Value
Building trades: finishing and masons.....	tons 10,299	\$70,876	tons 22,859	\$231,905
Sand-lime brick.....	6,357	41,674
Agriculture.....	199	1,141	1,216	12,044
Chemical and metallurgical industries:				
Smelters.....	544	3,418	100	1,050
Iron and steel.....	10,520	74,757	12	126
Gold-milling.....	13,166	75,225
Pulp and paper.....	20,246	158,985	939	9,532
Glass.....	6,268	43,332
Sugar.....	7,796	65,276
Tanneries.....	3,162	22,251	266	2,793
Fertilizers and insecticides.....	1,097	7,679	40	240
Dealers and others.....	2,037	16,067	444	5,272
Other chemicals ¹	138,252	1,094,170	774	8,067
Total.....	219,943	\$1,674,851	26,650	\$271,209

¹Uses for lime under this heading include the manufacture of alkali, acetate of lime, and calcium carbide, the last-mentioned being used largely for making cyanamid.

Sand and Gravel

The output of sand and gravel in 1936 was lower than in the previous year. In the statistics shown below, ballast consumed by railways is included for the first time in 1936, under other producers.

OUTPUT OF SAND AND GRAVEL, 1935 AND 1936

Source	1935		1936	
	Quantity	Value	Quantity	Value
Private pit operators.....	tons 554,032	\$238,878	tons 2,050,451	\$639,913
Dredged from Great Lakes and rivers.....	1,764,645	426,430	1,712,071	340,050

Department of Highways.....	383,096	149,366	695,925	94,650
Miscellaneous counties and townships.....	1,959,095	979,547	1,510,487	755,244
Estimate for other producers.....	100,000	50,000	1,910,469	267,813
Total.....	8,154,618	\$2,095,610	8,498,153	\$2,227,620

Sand-Lime Products

The past three or four years have been dull for marketing sand-lime brick. This is, in part, owing to a depressed construction industry, but competition of other products, such as cinder blocks and kindred materials, has cut into this trade considerably. Four companies were active in the Toronto metropolitan area, and in addition to brick produced sand-lime building blocks, ready mixed mortar, and plaster. These items have been included in the table "Summary of Mineral Statistics, 1936," on page 2, under the title "Sand-lime products." It should be pointed out that in the table on page 3 the figures prior to 1934 refer to sand-lime brick only. The selling value in 1936 was \$178,868, as against \$138,555 in the previous year.

Stone

Apart from the large number of quarries operated by the municipalities (counties and townships) and by contractors on behalf of the Ontario Highways Department, there were some 37 limestone, 5 sandstone, 4 granite, 4 trap, 7 marble, and 2 slate quarries, or a total of 59 establishments active in 1936. Wage-earners employed totalled 865, who received \$586,814 in wages, or less than \$700 each. This is accounted for by the seasonal nature of the industry. The majority of the quarries were operated for road metal, for which there is a regular demand in Ontario. As may be seen in the following table the industry is gradually improving.

OUTPUT OF STONE, 1934, 1935, AND 1936

Variety	1934		1935		1936	
	Quantity	Value	Quantity	Value	Quantity	Value
	tons		tons		tons	
Limestone.....	2,370,339	\$1,788,107	2,063,882	\$1,689,096	2,205,992	\$1,773,764

Mining Revenue and Expenditures

The revenue of the Department of Mines for the fiscal year ending March 31, 1937, was \$2,187,620.60, as compared with \$1,787,643.75 in the previous year. Expenditures were \$319,660.58. Details of revenue follow:—

REVENUE, DEPARTMENT OF MINES, APRIL 1, 1936, TO MARCH 31, 1937

ORDINARY:

Sand and gravel—								
	Royalties.....			\$43,978.59				
	Licenses.....			2,600.00				\$46,578.59
Casual fees.....				\$2,257.03				
Sale of record books, Unwrought Metal Sales Act.....				22.15				
Gas leases.....				5,382.50				
Expenses re lignite.....				80.50				
Inspection—cable-testing fees.....								7,742.18
Assessment—								6,426.08
	Acreage tax.....			\$78,231.24				
	Profit tax.....			1,563,680.99				
	Gas tax.....			34,905.59				
Chemical and assay—fees.....								1,676,817.82
Mine rentals—								3,543.36
	Mining leases.....			\$16,626.36				
	Licenses of occupation.....			11,566.68				
Miners' licenses.....								28,193.04
Fees—								95,213.00
	Recording.....			\$208,941.55				
	Miscellaneous.....			9,202.05				
	Map sales.....			4,558.35				
Natural Gas Commissioner—permits.....				\$2,890.93				222,701.95
Sulphur Fumes Arbitrator—damages.....				151.51				
Temiskaming Testing Laboratories—fees.....				20,209.86				
Salaries, expenses, etc.....				113.00				
								23,365.30
								\$2,110,581.32

CAPITAL:

Mining recorders—mining land sales.....								77,039.28
Total revenue.....								\$2,187,620.60

The figures of monies derived from sales and leases, divided according to district, do not agree with corresponding items of the preceding revenue statement, which record collections of monies actually received during the fiscal year. Details are given in the following table.

MINING LANDS SOLD AND LEASED FOR FISCAL YEAR ENDING MARCH 31, 1937

¹Joined with Timiskaming since 1911.²Joined with Montreal River in 1936.³The office at Parry Sound was closed in 1921, and records are now kept at the Department of Mines, Toronto.

The following is a comparative statement of mining licenses and renewals issued, claims recorded, profit tax, and total revenue during the past five years:—

PROSPECTING ACTIVITY, PROFIT TAX, AND TOTAL REVENUE, 1932-1936

Year	Calendar year					Fiscal year ¹
	New miner's licenses issued	Miner's licenses renewed	Total licenses and renewals	Mining claims recorded	Profit tax	Total mining revenue
1932.....	2,035	3,670	5,705	4,945	\$515,153.59	\$793,759.20
1933.....	3,365	3,911	7,276	8,077	679,731.07	942,721.62
1934.....	7,409	4,757	12,166	16,888	1,073,824.46	1,487,886.94
1935.....	3,335	5,113	8,448	9,763	1,400,656.14	² 1,917,981.93
1936.....	7,170	5,961	13,131	17,295	1,563,680.99	2,187,620.60

¹Up to and including 1934, the fiscal year was from November 1 of the previous year to October 31 of the year shown. The fiscal year now ends on March 31.

²Includes \$130,338.18 for the five months' period November 1, 1934, to March 31, 1935, and \$1,787,643.75 for the new fiscal year ending March 31, 1936.

Under *The Mining Tax Act*, a graduated tax is levied on the net profits of mining companies in excess of \$10,000 per annum. The basic rate is 3 per cent. on profits up to \$1,000,000. On profits over \$1,000,000 and up to \$5,000,000, the tax is 5 per cent.; and on profits in excess of the latter amount, the rate is 6 per cent. A part of this money is returned to organized municipalities.

The following statement, prepared by the Accounts Branch of the Department, gives details of the profit tax collected under the supervision of G. R. Mickle, Mine Assessor, for the year 1936:—

DETAILS OF PROFIT TAX

GOLD:		
Buffalo Ankerite Gold Mines, Limited.....	\$4,276.90

Temiskaming Testing Laboratories

This plant, located at Cobalt and equipped for sampling and assaying, has been operated by the Department since July, 1921, under the management of A. A. Cole, mining engineer, of the T. & N. O. Railway Commission.

COMPARATIVE FINANCIAL STATEMENT OF THE TEMISKAMING TESTING LABORATORIES, 1922-1936

Year	Cash receipts	Earnings	Expenditures	Operating profit	Operating loss
1922.....	\$18,096.19	\$17,749.51	\$19,173.19	\$1,424.68
1923.....	18,699.22	20,117.81	19,781.25	\$336.56

1934.....	9,816.20	11,359.81	12,762.68	1,402.87
1935.....	15,149.00	15,405.80	15,212.83	192.97
1936.....	19,915.55	20,066.71	17,131.36	2,935.35

Provincial Assay Office

The Provincial Assay Office was established in Belleville by the Bureau (now Department) of Mines in 1898, as an aid in the development of the mineral resources of Ontario. W. K. McNeill, Provincial Assayer and Chemist, reports as follows for 1936:—

The large number of samples submitted to the Chemical Branch of the Department reflects the activity in prospecting in the province. Of these, 4,014 were done free, as provided by R.S.O., Chap. 45, Sec. 69. A total of 6,331 samples were received for investigation, and reports issued. These determinations may be classified as follows:—

COMPLETE ASSAY RETURNS, 1936

Assay	Free assays under <i>The Mining Act</i>	General custom and Department work	Total
Gold.....	3,549	1,959	5,508
Silver.....	217	135	352
Platinum.....	13	17	30
Copper.....	86	24	110
Lead.....	4	19	23
Zinc.....	7	1	8
Nickel.....	97	17	114
Cobalt.....	16	16
Iron.....	1	9	10
Molybdenum.....	2	38	40
Miscellaneous.....	22	98	120
Total.....	4,014	2,317	6,331

In addition 166 samples were received by mail for identification and reports issued. A large number were brought directly to the laboratory; of these no record was kept. Complete analyses of 25 rocks were made for the geologists of the Department.

The work of this Branch was carried on with the assistance of T. E. Rothwell and W. F. Green, assayers and chemists, and Robert Stewart and William Ley, laboratory assistants.

The schedules of charges for the Provincial Assay Office and Chemical Laboratory may be obtained on application. Mineral and rocks not requiring chemical analysis are identified free of charge. Tests on radio-activity are free.

Draughting Office, North Bay

As mining claims are recorded in each mining division, sketches and recording notices are forwarded by the recorders to the Draughting Office, North Bay, and the same practice applies when surveys are filed. Tracings are prepared from the data furnished and blue-prints supplied to the recorders and to the general public at a nominal charge. North Bay is a convenient centre, and considerable time for Northern Ontario residents is saved through the mails compared with former practice when blue-prints were prepared at Toronto. The office was established in February, 1920. It is now in charge of A. D. Williams.

MINES OF ONTARIO IN 1936

By

Chief Inspector of Mines, D. G. Sinclair, Toronto; Inspectors, W. O. Tower, Kirkland Lake; A. S. Bayne, Port Arthur; D. F. Cooper, Sudbury; E. B. Weir, Timmins; A. R. Webster, Toronto.

ASBESTOS

Rahn Lake Mines Corporation, Limited

The Rahn Lake Mines Corporation, Limited, was incorporated in June, 1934, with a capitalization of 3,000,000 shares of no par value, of which 1,413,610 have been issued.

The officers and directors are: G. C. Rahn, president; M. J. Magenau, vice-president; H. C. J. Oehlecker, secretary-treasurer; O. R. McKerrow, assistant secretary; E. W. King, R. H. Howell, R. Densmore, M. L. Tisdale, F. L. Gayder, directors. The mine address is Matachewan, and the head office is at 8½ Main Street West, North Bay.

The property consists of 24 claims, 847.71 acres, in Bannockburn and Montrose townships, Matachewan area, district of Timiskaming, and was acquired from the Clover Leaf Mining Company, Limited, and the Empire Asbestos Mines Company.

The company reports the work done for the year 1936 as follows: one shaft, 9 by 10 feet, 100 feet deep; one shaft, 12 by 20 feet, 55 feet deep; crosscutting, 20 feet; drifting, 30 feet; 1,475½ tons of asbestos ore and 491 tons of waste hoisted. Three and a half miles of road were constructed, and a fibre-sorting house was erected.

The property was operated in 1936 from January 2 to December 19. An average of 8 men was employed. P. W. Gilchrist, 43 Brighton Avenue, Hamilton, was mine manager during the year.

CHROMIUM

Chromium Mining and Smelting Corporation, Limited

The Chromium Mining and Smelting Corporation, Limited, was incorporated in May, 1934, succeeding the Chromium Alloy Company, Limited. It has an authorized capitalization of 3,000,000 shares of no par value, of which 2,450,000 shares were issued as at November, 1936. The officers and directors are: Leo H. Timmins, president; R. O. Denman, vice-president; N. W. Byrne, secretary; F. J. Maw, J. A. McPhail, Ewart Angus, and Noah Timmins, directors. The head office is at Room 700, Bank of Commerce Building, Hamilton. The mine address is Collins.

The mine property consists of 47 claims, comprising about 1,900 acres, west of Obonga lake and about 26 miles south of Collins on the main line of the Canadian National Railways, district of Thunder Bay.

Early in 1936, the construction of plant and additional camp buildings was commenced in preparation for resuming underground work. Buildings on surface now include a shaft-house, machine shop, blacksmith shop, power-house and hoist-room, assay office, two warehouses, office, powder magazine, dry-house, three bunk-houses, cookery, and mill.

The mining plant includes a 40 h.p. locomotive-type boiler; a 100 h.p. R.T. boiler; a Flory single-drum, 10- by 12-inch steam hoist; an Ingersoll-Rand XVH, 600-cubic-foot compressor, driven by a 132 h.p. Ruston-Hornsby Diesel engine; and a lighting unit consisting of a Bullock 33-ampere, 110-volt, direct-current generator, driven by a 4 h.p. steam engine.

The mill, erected during the year, consists of a 50-ton concentrating unit and includes a hand-sorting table, a 15 $\frac{1}{4}$ - by 26 $\frac{1}{2}$ -inch Blake crusher, a screen with quarter-inch openings, a 60- by 22-inch Hardinge ball mill in closed circuit with a Dorr Simplex classifier and a 12- by 18-inch Denver jig, an Evans hydraulic classifier, and an 8 $\frac{1}{2}$ -foot Callow cone, followed by two pairs of 6- by 14-foot Wilfley tables. Motive power for the mill is supplied through line-shafting by a 95 h.p. Deutz Diesel engine.

During 1936 the concentrating mill was not used in production, activities being confined to underground development and mining and shipping of high-grade chromium ore to the refining and smelting plant at Sault Ste. Marie. Ore shipped during the year consisted of 197.7 tons from underground stoping and 223.1 tons mined from an open cut on surface, the average grade being reported as 18 per cent. Cr₂O₃.

The ore was transported to the railway at Collins over the 26-mile road during the winter by 40 and 60 h.p. International and Caterpillar tractors, the tractors travelling in pairs and each hauling two sleighs of about 9 tons capacity.

A total of 4,235 tons of ore was mined underground from three open stopes on the 100-foot level and three shrinkage stopes on the 225-foot level. Since no underground work was done on the property in 1935, the following table shows the amount of development work accomplished to the end of 1934, during 1936, and the total:—

	To Dec. 31, 1934	1936	Total
SHAFT (2-compartment, vertical).....	feet 350	feet	feet 350
100-FOOT LEVEL:			
Shaft stations.....	25	25	50
Drifts.....	120	681	801
Crosscuts.....	500	186	686
Raises.....	135	135
225-FOOT LEVEL:			
Shaft stations.....	25	20	45
Drifts.....	966	966
Crosscuts.....	201	201
Raises.....	21	21
325-FOOT LEVEL:			
Shaft stations.....	20	20

During the year there was an average of 69 men employed, of whom 16 were underground and 29 on construction, under the direction of H. H. Merritt.

GOLD

Addington Mines, Limited

Addington Mines, Limited, was incorporated in February, 1936, with a capitalization of 3,000,000 shares of \$1 par value. The officers and directors are: Noah Dymont, president; W. M. Archibald, vice-president; M. A. Wolfkill,

secretary-treasurer; Stanley Day, E. G. Montgomery, and Jas. E. Riley, directors. The head office is at 302 Bay Street, Toronto.

The company owns the property known as the Addington or Rich Rock, in Kaladar township, Lennox and Addington county. Operations are carried on under the control of the Consolidated Mining and Smelting Company of Canada, Limited. An account of the work done during 1936 appears on page 118 of this report. The mine address is Flinton.

Albany River Mines, Limited

In October, 1934, the authorized capitalization of Albany River Mines, Limited, was increased from 2,000,000 to 3,000,000 shares of \$1 par value. The officers and directors are: J. W. Morrison, president; R. D. Cumming, secretary; G. C. Lawrence, L. Cohen, and E. H. Horne, directors. The head office is at Haileybury. The mine address is Pickle Crow.

The property held by the company consists of a group of 8 claims, of approximately 286 acres, about 8 miles east of Pickle lake, in the Pickle-Crow area, Patricia portion of Kenora district. Access to the mine is by airplane from Sioux Lookout or Hudson, or by boat from Hudson to Doghole Bay on Lake St. Joseph. At the end of the year, a road was under construction from Doghole Bay to the mines in the Pickle-Crow area.

In April the collaring of a vertical shaft was begun, and at the end of the year the shaft was at a depth of 390 feet and crosscutting was commencing on the 125-, 250-, and 375-foot levels.

Surface buildings included bunk-houses, cookery, assay office, blacksmith shop, carpenter shop, dry-house, and power-house.

The sinking plant included a 125 h.p. Eclipse boiler, a 500-cubic-foot compressor, and a 10- by 12-inch hoist. In November a power line was brought in from the Rat Rapids-Pickle Crow line of the Ontario Hydro-Electric Power Commission, and the installation of two 250 k.v.a. transformers was completed the first week in December.

There was an average of 28 men employed, with 9 underground, under the direction of J. W. Morrison.

Alcona Mines, Limited

Alcona Mines, Limited, was incorporated on July 24, 1936, with an authorized capitalization of 4,000,000 shares of \$1 par value. The officers and directors are: Wm. H. Price, president; D. R. McLaughlin, vice-president; S. Taylor, secretary-treasurer; Dr. J. F. McQuay, G. E. Farlinger, D. G. H. Wright, P. C. MacLaurin, and Dr. T. A. Carpenter, directors. The head office address is 803 Sterling Tower, Toronto. The mine address is Alcona.

The property consists of claims K. 3,252-3,258, 3,263, and 3,264 and is located about 5 miles southeast of Alcona Station on the Port Arthur-Sioux Lookout branch of the Canadian National Railways, district of Kenora.

Surface work was commenced on August 28, together with the construction of camps and plant buildings. About the middle of October a 3-compartment, 7- by 14-foot vertical shaft was commenced on claim K. 3,254 and was sunk to a depth of 40 feet. The mining plant was then installed, including two 50 h.p. boilers, an Ingersoll-Rand single-drum, 8- by 10-inch reversible steam hoist, and an Ingersoll-Rand FR-1, 528-cubic-foot compressor.

Surface buildings include a bunk-house, cookery, office and warehouse, power-house and hoist-room, powder magazine, powder-thaw and blacksmith shop.

Sinking under power was commenced the first week in December, and the shaft was down 158 feet by December 31.

In December there were 46 men employed, of whom 11 were underground, under the direction of E. P. Sawyer.

Algold Mines, Limited

Algold Mines, Limited, was incorporated in February, 1934, with an authorized capitalization of 2,500,000 shares of no par value. The officers and directors are: W. R. Knox, president; J. G. Merrick, secretary; David Lieberman, treasurer; J. M. Macintosh, T. F. Daigle, and J. F. B. Loblaw, directors. The head office is at 45 Richmond Street West, Toronto.

The property is located in township 28, range 26, Goudreau area, district of Algoma. It is about 6 miles by road west of Goudreau. The mine address is Goudreau.

Surface work was carried on during January and February, 1936, then suspended until June. Underground development was resumed in July after a suspension of seven months. During the balance of the year 205 feet of drifting was done on the 100-foot level, and 281 feet of drifting and 100 feet of raising on the 200-foot level. A small stope was mined on the 140-foot level.

The old 50-ton amalgamation mill, which operated for five months in 1926, was reconditioned and put in operation on July 1. The equipment included a 24- by 12-inch jaw crusher, 36- by 16-inch rolls, a 4 $\frac{1}{2}$ -foot Hardinge ball mill, a disc classifier, two blanket tables, and amalgamation equipment. By the end of the year a total of 3,073 tons had been milled, a large part of which was obtained from a surface open cut.

The plant included a 1,100-cubic-foot Ingersoll-Rand electric compressor and an 8 $\frac{1}{2}$ - by 10-inch air hoist.

An average of 18 men was employed in 1936 under the direction of R. F. Mitchell.

Algoma Summit Gold Mines, Limited

Algoma Summit Gold Mines, Limited, was incorporated in May, 1934, with an authorized capitalization of 5,000,000 shares of \$1 par value. The officers and directors are: F. A. Brandt, president; S. A. Lister, treasurer; E. O. Slingsby, secretary; J. J. Morch, S. D. Terry, and R. A. Hutchison, directors. The head office is at 512 McKinnon Building, Toronto. The mine address is Goudreau.

The property is located in township 49, Goudreau-Lochalsh area, district of Algoma. It is about five miles east of Goudreau by road.

During January and February, 1936, work was confined to the installation of equipment for a 50-ton mill in the old mill building, which had contained a 25-ton test unit operated by Diesel power. The equipment installed in 1936 included a 16- by 10-inch jaw crusher, 5- by 4-foot ball mill, drag classifier, Denver jig, 8-cell Denver Sub-A flotation unit, three blanket tables, and amalgamation equipment. It was put in operation with electrical power in March, and by the end of the year had treated a total of 8,058 tons of ore.

A 35-degree, 8 $\frac{1}{2}$ - by 14-foot shaft was started in March and sunk to a depth of 298 feet on the incline. A level was established at 172 feet, where 171 feet of drifting and 180 feet of crosscutting had been accomplished by the end of the year. An ore-pass raise was driven from an inclined depth of 260 feet in the shaft to this level.

The construction of a new mill and surface plant was started in September. A new compressor- and hoist-house was completed, and a 300-cubic-foot Sullivan

electric compressor, a 700-cubic-foot Ingersoll-Rand electric compressor, and a single-drum Ingersoll-Rand electric hoist were installed. The mill building, designed to house a 1,000-ton mill, was completed, also a crusher building. The equipment for a 500-ton amalgamation-flotation unit was being installed at the end of the year.

An average of 48 men was employed under the direction of F. A. Brandt.

Alschbach Gold Mining Company, Limited

The Alschbach Gold Mining Company, Limited, was incorporated in 1922 with a capitalization of 2,500,000 shares of \$1 par value, of which 1,733,035 have been issued.

The property consists of 6 claims, approximately 240 acres, in Grenfell township, Kirkland Lake West area, district of Timiskaming.

The property has been inactive since November, 1935, except for an examination made in the fall of 1936 when the mine was dewatered and examined.

The officers and directors of the company are: Clarence Alschbach, president; F. W. Hendry, vice-president; F. L. Hutchinson, secretary-treasurer; A. A. McKelvie, Wesley McKnight, Fred Lawrence, directors. The head office is at New Liskeard, and the mine office at Goldthorpe.

Altura Gold Mines, Limited

Altura Gold Mines, Limited, was incorporated in November, 1936, with an authorized capitalization of 3,000,000 shares of \$1 par value, of which 1,150,005 shares were issued as at December 31, 1936. Of these outstanding shares, 1,000,000 were pooled, the financing of the company being from private sources. The officers and directors are: F. R. Marshall, president; Jos. McDonough, vice-president; W. G. Hughson, secretary-treasurer; James Ryan and E. Futterer, directors. The head office is at 67 Yonge Street, Toronto. The mine address is Red Lake.

The property comprises 15 unpatented claims, K.R.L. 11,813-11,830, in Fairlie township, on the north shore of Red lake, and lies about 7 miles northwest of the town of Red Lake, in the Patricia portion of Kenora district.

Surface exploration was commenced on this property in August, 1936, and in November diamond-drilling was commenced on claims K.R.L. 11,814, 11,817, 11,818. By the end of the year, 1,136 feet of diamond-drilling was completed, and construction of camps and plant buildings was under way.

It was planned to take in a steam plant early in 1937 to commence shaft-sinking.

In December there were 20 men employed, of whom 16 were on construction. D. M. Belec is manager.

Amca Mines, Limited

Amca Mines, Limited, was incorporated May 14, 1936. The capitalization is 3,000,000 shares of \$1 par value. The head office of the company is at 24 Jarvis Street, Fort Erie. The officers and directors of the company are: James W. Rudhard, president; Edmund D. Stevens, vice-president; Joseph A. Dunn, secretary; Joseph R. Steele, treasurer; Digby Grimston, chairman of the board; G. H. Gilberds and Henry J. Heiser, directors.

The company owns 5 patented claims and 3 unpatented claims in the southern part of Garrison township, Lightning River area, district of Cochrane, and has an option to purchase 18 adjoining claims.

During 1936 the company installed a 150 h.p. steam boiler and steam-driven electric generators for operating a 75-ton mill, construction of which was commenced early in the year. It is expected that the mill will be completed during the latter part of January, 1937. Mining operations are of the open-pit type. No underground work has been done. A Sullivan gasoline compressor is used for operation of rock drills. The average number of men employed during the year was 13. About one-third of this number were engaged in construction work. Digby Grimston is mine manager. The mine office address is Matheson.

Anglo-Huronian, Limited

Anglo-Huronian, Limited, incorporated in 1933, has an authorized capitalization of 2,000,000 shares of no par value. The number of shares issued at November, 1936, was 1,317,605. The officers and directors of the company are: André Dorfman, president; J. Ingram, secretary-treasurer; John B. Huffard, Dorsey Richardson, E. Turk, Sir Frederic H. Hamilton, Sir A. Hamilton Grant, and A. H. Bunker. The head office is at 80 King Street West, Toronto. The mine address is Timmins.

The company owns and operates the Vipond mine, which lies south of and adjacent to the Hollinger mine in the Porcupine area, township of Tisdale, district of Cochrane.

The following table shows the amount of development work done during the last fiscal year ending July 31, 1936:—

Level	Drifts	Crosscuts	Raises
	feet	feet	feet
100-foot.....			
200-foot.....	413	197	70
300-foot.....	79	60	
400-foot.....	130	56	
500-foot.....	32	83	436
600-foot.....	246	27	217
733-foot.....			
866-foot.....		14	72
1,000-foot.....			
1,200-foot.....			
1,450-foot.....	346		
Total.....	1,246	437	795

Diamond-drilling in the same period amounted to 13,378 feet.

The following is an extract from the president's report to the shareholders for the fiscal year ended July 31, 1936:—

During the fiscal year the mill treated 106,496 tons of ore with a bullion recovery (present price) of \$4.25 per ton, or a total of \$452,675.41. Costs amounted to \$3.91 per ton, the net profit realized at the mine being \$36,142.11.

The present lowest horizon at the Vipond is 1,450 feet. The ore mined to date since commencement of operations totals 1,544,068 tons, which had an average gross value of approximately \$8.00 per ton at the old price of \$20.67 per ounce. This tonnage was mined from the area east of the porphyries in the western part of the property, and it would appear that the chances of finding further important ore bodies in this area, above the 1,450-foot horizon, have been practically exhausted.

Recent geological investigations and diamond-drilling have proven that as the quartz porphyries are plunging eastwards, the area west of the porphyries, containing lava flows identical

with the ones that were productive in the neighbouring mines, is increasing in width and depth. It is our intention to explore this western area, where as yet no work has been done.

The average number of men employed throughout 1936 was 141. W. R. Adams is manager.

Arbade Gold Mines, Limited

Arbade Gold Mines, Limited, was incorporated in June, 1933, with a capitalization of 3,500,000 shares of \$1 par value, of which 2,224,075 shares were issued to October, 1936.

The officers and directors are: C. A. Floyd, president and manager; C. C. Floyd, secretary-treasurer; D. E. Sanderson, J. F. Kilawee, and H. H. Verge, directors. The executive office is at 10 Adelaide Street East, Toronto.

The property consists of 39 claims (4 held under option), in the Matachewan area, Argyle and Baden townships, district of Timiskaming.

During the year, a number of changes were made in the power plant. The shaft was sunk a distance of 37 feet.

An average of 8 men per month was employed during the year under the direction of C. A. Floyd. The mine office is at Matachewan. J. E. Sears is mine manager.

Ardeen Gold Mines, Limited

Ardeen Gold Mines, Limited, was incorporated in December, 1933, to take over the property and assets of Moss Gold Mines, Limited. The authorized capitalization of 3,000,000 shares of \$1 par value was increased during 1935 to 4,000,000 shares, of which 3,926,222 shares were outstanding as at December 31, 1936. The officers and directors are: H. G. White, president; Dr. V. Mott Pierce, vice-president; Wm. Taylor, secretary-treasurer; A. R. Miller, Jr., J. J. McIverney, C. G. Greenshields, and Ralph E. Allan, directors. The executive offices are at 132 St. James Street West, Montreal, Que. The mine address is Kashabowic.

The property is located in Moss township, district of Thunder Bay, and is 18½ miles by road from Tip Top Spur on the Fort Frances branch of the Canadian National Railways.

Operations were continued at the property throughout almost the whole of 1936; but owing to the fact that the mine was constantly operated at a loss, work was suspended during the early part of December, and on December 11, the company made an assignment in bankruptcy. K. LeM. Carter, C.A., C.P.R. Building, Toronto, was appointed trustee.

From January 1 to November 30, 1936, the 200-ton cyanide mill treated a total of 36,660 tons of ore, with a recovery of 5,883.16 ounces in gold and 30,992.13 ounces in silver, giving a return of \$219,570.41.

Production was maintained from development involved in the sinking of an inclined winze from the 1,000-foot level and from twelve stopes, of which there were four on the 250-foot level, one on the 500-foot level, two on the 625-foot level, three on the 875-foot level, and two on the 1,000-foot level. Of the twelve stopes, one was mined by the underhand method, two by cut-and-fill, and the remainder by shrinkage. The following table shows the development work accomplished as at December 31, 1935, during 1936, and the total:—

	To Dec. 31, 1935	1936	Total
	feet	feet	feet
SHAFT NO. 1.....	158	158

1,250-FOOT LEVEL:			
Shaft station.....	25	25

During the year there was an average of 163 men employed, of whom 73 were underground and 10 in the mill. N. O. Lawton was general manager during the last eight months of operation.

Argosy Gold Mines, Limited

Argosy Gold Mines, Limited, incorporated in May, 1935, to succeed Casey Summit Gold Mines, Limited, has an authorized capitalization of 3,000,000

shares of \$1 par value, of which 2,849,338 shares were outstanding on December 31, 1936. The officers and directors are: F. L. Trethewey, president; J. B. Tyrrell, vice-president; L. Appleyard, secretary-treasurer; V. H. Emery, managing director; Fraser D. Reid and J. A. Wilson, directors. The head office is at 1320 Metropolitan Building, 44 Victoria Street, Toronto. The mine address is Casummit Lake.

The property consists of 21 claims, comprising 987 acres, at Casummit lake, about 100 miles north of Sioux Lookout on the main line of the Canadian National Railways, in the Patricia portion of Kenora district.

During 1936, the mining plant was enlarged, several new buildings were constructed, and the 50-ton amalgamation mill was replaced by a 125-ton cyanide-amalgamation mill. Buildings on the property now include power-house and hoist-room, pump-house, shaft-house, dry-house, blacksmith shop, assay office, machine shop, two warehouses, saw-mill, icehouse, mill, refinery, office, radio station, powder magazine, two bunk-houses, club-rooms, cookery, general store, stable, and eight residences.

Additions to the mining plant during the year included an Ingersoll-Rand POC, 450 cubic-foot, 120 h.p. Diesel compressor; Ingersoll-Rand POV, 200-cubic-foot, 60 h.p. Diesel compressor; Ingersoll-Rand 6- by 8-inch steam hoist; Ingersoll-Rand 5- by 7-inch, single-drum hoist underground; and a Babcock-Wilcox 350 g.p.m., 350-foot-lift centrifugal pump driven by a 60 h.p. motor, on the 300-foot level. Additional power required for the mill is generated by Diesel engines totalling 630 horse-power.

Equipment in the mill and refinery includes the following: a 9- by 5-inch Blake crusher; 5- by 6-foot Allis-Chalmers ball mill in closed circuit with a 4-foot Dorr Simplex rake classifier (between the ball mill and the classifier is an 18- by 24-inch, free-settling, rising-current classifying cone, the concentrate from which goes to a 27- by 36-inch amalgam barrel); two 26- by 10-foot Dorr thickeners; three 14- by 14-foot Dorr agitators; 14- by 14-foot surge agitator; two 6-foot, 3-disc Oliver filters; 7- by 9-foot clarifying tank; 3- by 8-foot Crowe de-aeration tank; 24-inch Perrin precipitation press; Stewart crucible furnace.

The supplying of equipment and supplies to this property constitute another great achievement in the application of aerial transport to Canadian mining. During the summer, 800 tons of machinery, equipment, and supplies were moved to the property by air from the Canadian Airways base at Goldpines, the head of water navigation on Lac Seul, the distance by air being approximately 70 miles.

Milling was commenced on July 6, and from this time until the end of the year, the mill treated a total of 9,862 tons, with a recovery of \$130,027.11. Production of ore was obtained from the surface dump during the early part of mill operation, and later from shrinkage stopes on the 300- and 400-foot levels.

Development work during the year consisted of sinking the 42-degree winze at the 300-foot level an additional 161 feet to a total depth of 339 feet on the incline. Two new levels were established at 400 and 500 feet, and lateral development, shown in the table below, was concentrated on the three bottom levels, during 1936

Level	Crosscuts	Drifts	Raises
	feet	feet	feet
300-foot.....	759.4	995.18	28
400-foot.....	19.65	302.56
500-foot.....	121.23	541.02
Total.....	900.28	1,838.76	28

The following is an extract from the mine manager's report for the calendar years 1935 and 1936:—

Transportation

There is no summer road into the property, but during the winter freight is transported by tractor haulage a distance of 168 miles, direct from Hudson on the C.N.R. to the property. In summer a water route from Hudson to Goldpines allowed for the transportation of freight by plane the remaining distance of 70 miles to the property. During the past year the postal authorities sanctioned the establishment of a post-office at the mine, with a three-day-a-week service from Sioux Lookout, which assures service for passengers and express.

Geology and Ore Occurrences

The rock formations on the property consist of a series of east-west striking sediments of interbedded ferruginous slates and greywackés, bounded on the north by andesitic lavas and on the south by tuffaceous beds. These are cut by north-south quartz-filled fissures or breaks, which strike across all formations, with a localization of ore shoots in the interbedded slates and greywackés.

The work to date has indicated that there are three main favourable zones of these interbedded sediments, which have been called the Northern, Central, and Southern favourable belts.

Underground Exploration

During the period under review there has been done the following:—

	300-foot level	400-foot level	500-foot level	Total
	feet	feet	feet	feet
Sinking.....	178	160	338.5
Crosscuts.....	1,477.4	69.65	121.23	1,668.28
Drifts.....	1,623.18	932.56	541.02	3,096.76
Raises.....	28	28
Slash.....	332.64	134.04	81.99	548.67
Station slash.....	383.27	63.4	446.67
Total.....	6,126.88

DIAMOND-DRILLING:	Feet
Surface.....	3,025
Underground.....	3,915
Total.....	6,940

Ore Reserves

The ore reserves on December 31, 1936, are estimated at 83,939 tons, having a total value of \$1,501,990.96.

Milling Statistics

Tons of ore milled.....	9,872
Average tons milled per day.....	58.5
Average value per ton.....	\$18.45
Value in tailings per ton.....	\$1.01
Gross value milled.....	\$181,035.90
Recovery per ton.....	\$13.20
Loss in tailings.....	\$9,981.09
Per cent. extraction.....	94.5
Net value recovered (bullion shipments).....	\$130,027.11
Lag, due to absorption by new plant and equipment.....	\$41,027.70

Operating Costs per Ton

Mining.....	\$5.09
Development.....	4.13
Milling.....	3.28
Total.....	\$12.50

The total operating costs are out of proportion to the tonnage milled, due to the high power and transportation costs, and in an attempt to determine conditions that will warrant larger tonnages and cheaper over-all costs.

Mining and Development Costs

Because of the comparative narrowness of the veins and the methods of mining that have to be adopted, the tonnage that can be broken per machine-drill shift is small. Consequently, regardless of other conditions, the mining costs will be higher than in the majority of mines.

Pumping Costs

Under average conditions it is necessary to pump from the mine 260 gallons per minute, and suitable air and electrical pumps have been installed to give flexibility and protection, at a cost of \$0.31 per ton. The grouting of water seams encountered during development is proving satisfactory as a safeguard to pump capacity with a resultant saving in costs.

Power Costs

With the small tonnage milled, over-all power costs have been \$4.86 per ton, of which \$1.26 is the mill cost. The electrical costs per kilowatt hour are 3 cents, and the cost per horsepower year, based on a total output of 630 Diesel horse-power, is \$183.18. High transportation costs on fuel account for about two-thirds of this amount.

During the year, there was an average of 97 men employed, of whom 39 were underground and 10 in the mill. R. Massey Williams is mine manager.

Ashley Gold Mining Corporation, Limited

The Ashley Gold Mining Corporation, Limited, was incorporated in 1931, with a capitalization of 3,000,000 shares of \$1 par value, all of which have been issued.

The officers and directors are: J. H. C. Waite, president; R. W. Hart, Chas. McCrea, C. G. McCullagh, E. H. Rose, and C. E. Trafford, directors; G. C. Ames, secretary-treasurer. The head office is 350 Bay Street, Toronto.

The property, which consists of 23 claims, 952 acres, in Argyle and Bannockburn townships, Matachewan area, district of Timiskaming, was operated for nine months in 1936. Owing to lack of ore, milling was finally stopped in August. After thoroughly prospecting both underground and surface, the mine was closed down and the plant sold in September.

During the year, 10,202 feet of surface trenching and 1,655 feet of surface diamond-drilling were done. Underground, a winze was sunk 29 feet, and 385 feet of crosscutting and 964 feet of drifting were done. Ore hoisted amounted to 21,958 tons.

The total value of bullion produced since production started in September, 1932, was \$1,624,012.08.

An average of 74 men was employed for the 9 months. J. W. Robertson was resident manager until the shut-down. The mine office was at Elk Lake.

Bankfield Consolidated Mines, Limited

Bankfield Consolidated Mines, Limited, succeeded Bankfield Gold Mines, Limited, on September 1, 1936, by an exchange of stock whereby the shareholders of Bankfield Gold Mines received two shares in the new company for three in the old. The new company has an authorized capitalization of 3,000,000 shares of \$1 par value, of which 2,400,000 have been issued. The officers and directors are: C. D. H. MacAlpine, president; T. H. Stinson, vice-president; F. J. Bailes, secretary-treasurer; Jos. Errington, D. M. Morin, and J. H. C. Waite, directors. The head office is at 1006 Concourse Building, Toronto. The mine address is Geraldton.

The property is located in Errington township, the Magnet Lake section of the Little Long Lac area, district of Thunder Bay. It is reached by a 3-mile road from Kenwell on the Longlac-Port Arthur branch of the Canadian National Railways, or by a 5-mile automobile road from Geraldton, which was constructed in the summer of 1936.

Underground development was continued at this property during 1936, and toward the latter part of the year, construction was commenced on a 100-ton cyanide mill. A 3-mile power line taps the hydro-electric line from Cameron Falls. At the end of the year plans were under way to convert the entire plant to electric drive, and with mill construction well under way it was estimated that production would commence in April, 1937.

During the year an inclined raise was driven from the 525-foot level to the 275-foot level, and from this raise another level was established at the 400-foot horizon. The following table shows the development work accomplished at the end of 1935, during 1936, and the total at the end of 1936:—

	To Dec. 31, 1935	1936	Total
	feet	feet	feet
Shaft.....	551.5		551.5
Stations and sumps.....	166	62.37	228.37
150-FOOT LEVEL:			
Drifts.....	1,542.27	25.11	1,567.38
Crosscuts.....	441.08	5.67	446.75

During the year there was an average of 80 men employed, of whom 23 were underground, under the direction of J. W. MacKenzie.

Barry-Hollinger Mines, Limited

Barry-Hollinger Mines, Limited, was incorporated in 1919; it is capitalized at 4,000,000 shares of \$1 par value.

The officers and directors are: Dr. E. Herbert Greene, president; E. S. Williams, vice-president; D. McKinnon, secretary-treasurer; Dr. R. J. Neelands and M. M. Smith, directors.

Barry-Hollinger Mine

The mine, which is situated in the Boston Creek area, Pacaud township, district of Timiskaming, ceased operations in January, 1936. A crew of 9 men was employed until March cleaning up on surface and underground, preparatory to closing down.

Douglas Briden was manager.

Chalmers Claims

In December, 1935, the company took an option on the Chalmers claims in Carr township, district of Cochrane, immediately east of the town of Matheson,

and carried on surface exploration during the winter. A considerable amount of diamond-drilling was done in the spring of 1936. A shaft was sunk to a depth of 125 feet and some lateral work was done at that depth. Work was stopped in November, and the option was dropped.

During the period of operation an average of 5 men was employed under the direction of Douglas Briden.

Berens River Mines, Limited

Berens River Mines, Limited, was incorporated in July, 1936, with an authorized capitalization of 1,000,000 shares of \$1 par value, all of which have been issued. The officers and directors are: L. V. Sutton, president; F. M. Connell, vice-president; A. W. Burt, secretary; Carroll Searls, assistant secretary; H. E. Dodge, treasurer; Gus Mrkvicka, assistant treasurer; H. DeWitt Smith and Aileen Ritchie, directors. The head office is at Empire, and the secretary's office at 908 Royal Bank Building, Toronto. The mine address is Favourable Lake, care of Wings, Limited, Winnipeg, Man.

The property acquired by this company includes 33 claims in the Favourable-Sandy Lakes area, in the Patricia portion of Kenora district. It is about 150 miles north of Red Lake and may be reached by air from that place, or from Winnipeg and Lac du Bonnet, Man.

Operations were commenced in September, 1936. Camps and plant buildings were constructed, a vertical shaft was sunk to a depth of 20 feet by hand methods on claim Pa. 113, and toward the end of the year a mining plant was installed.

Surface buildings include an office, two bunk-houses, cookery, power-house, dry-house, blacksmith shop, and warehouse.

Plant equipment includes two 90 h.p. Foster-Wheeler boilers, Ingersoll-Rand class FR2 10- by 13-inch compressor, and Ingersoll-Rand S- by 6-inch hoist.

In December there were 55 men employed, of whom 16 were underground and 39 on construction. P. G. Scott is manager.

Bidgood Kirkland Gold Mines, Limited

Bidgood Kirkland Gold Mines, Limited, was incorporated in March, 1933, with a capitalization of 4,000,000 shares of \$1 par value, of which 3,506,715 have been issued.

The officers and directors are: J. H. C. Waite, president; O. I. Knutson, vice-president; R. A. Bryce, Harry Koza, H. F. Parkinson, W. J. Lawson, directors; J. M. Macintosh, secretary-treasurer. A. K. Muir is mine manager. The head office is at 350 Bay Street, Toronto. The mine office is at Kirkland Lake. The property consists of 22 claims in Lebel township, Kirkland Lake area, district of Timiskaming.

Production comes from the No. 2 or Main shaft, which is vertical, with 3 compartments, 6 feet 4 inches by 15 feet 10 inches outside the timber. It has been sunk to a depth of 525 feet, and levels have been established at 125 feet, 250 feet, 375 feet, and 500 feet. A vertical winze, a duplicate of No. 2 shaft, has been sunk 292 feet from the 500-foot level, with levels at 650 and 775 feet. During the year No. 2 shaft was sunk 34.5 feet and the 375-foot sublevel established. The winze was sunk 292 feet, with levels at 650 and 775 feet. A total of 2,830 feet of crosscutting and 4,163 feet of drifting was accomplished. Some 26,518 tons of ore and 19,064 tons of waste were hoisted. Diamond-drilling consisted of 1,577 feet of surface and 8,433 feet of underground drilling.

The surface plant has been completely overhauled and rebuilt. This work included repairing the bunk-houses and cookery, the building of a steel head-frame and shaft-house, hoist- and compressor-house, boiler-house, assay office, and extensions to the mill. New hoisting equipment, consisting of a double-drum, 72- by 54-inch electric hoist and two skip- and cage-assemblies, has been installed. Compressed air is supplied by a vertical 2,500-cubic-foot, electrically driven machine.

The milling rate was raised from 75 to 110 tons a day by the addition of a new crusher, filter, agitator, and thickener.

An average of 132 men was employed.

Big Master Consolidated Gold Mines, Limited

Big Master Consolidated Gold Mines, Limited, was incorporated in April, 1935, with an authorized capitalization of 3,000,000 shares of \$1 par value, of which 2,167,866 shares were issued as at December 15, 1936. The officers and directors are: W. R. Salter, president; J. A. Griffith, secretary-treasurer; W. D. Black, Dr. M. H. Lebel, J. C. Rogers, F. A. Gaby, and E. B. Knapp, directors. The head office is at 112 Yonge Street, Toronto. The mine address is Goldrock, via Wabigoon.

The property includes the old Big Master mine, located on Upper Manitou lake, district of Kenora. It is about 27 miles south of Wabigoon on the Canadian Pacific railway.

Previous operators sank a shaft to 270 feet and established three levels, on which a total of 1,888 feet of lateral work was done. They also obtained from stoping about 5,000 tons of ore, which was treated in a 10-stamp mill.

In October, 1935, the property was optioned by Murwood Gold Mines, Limited, which was incorporated in June, 1934, with an authorized capitalization of 3,000,000 shares of \$1 par value. This company installed the mining plant consisting of two 40 h.p. boilers, Ingersoll-Rand 370-cubic-foot, oil-engine compressor, Ingersoll-Rand 220-cubic-foot gasoline compressor, and a 7- by 10-inch steam hoist. The mine was dewatered, the old buildings and shaft were repaired, and sinking from the bottom of the 270-foot shaft was commenced on January 1.

During 1936 the shaft was completed to a depth of 350 feet and a station cut. Work was suspended in February, 1936, and was again resumed on July 15, at which time the mine was again dewatered and 445 feet of drifting was done on the 3rd level and 85 feet on the 2nd level by November 25, when underground operations were again suspended. During this period 980 feet of underground diamond-drilling and 3,564 feet of surface diamond-drilling was accomplished. Late in the year, Murwood Gold Mines, Limited, surrendered their charter, their assets being acquired by Lakman Gold Mines, Limited, who surrendered the option on the Big Master property for a consideration of 200,000 shares of Big Master Consolidated Gold Mines, Limited.

H. Van de Kamer was manager during the period of operation.

Bilmac Gold Mines, Limited

Bilmac Gold Mines, Limited, was incorporated in September, 1934, with an authorized capitalization of 2,000,000 shares of no par value. The officers and directors are: L. F. Hogarth, president; G. E. McVittie, vice-president; A. C. Laing, secretary; and W. R. Marchmont, treasurer; Jesse Bradford, director. The head office is at 357 Bay Street, Toronto. The property is located in Macmurchy township, West Shiningtree area, district of Sudbury.

Work was resumed in February, 1936, after a suspension of activities for seven months. The mine was dewatered, and underground development was started early in June.

The development work accomplished on the various levels during the year, and the total to the end of 1936, was as follows:—

Level	Drifting		Crosscutting		Raising	
	1936	Total	1936	Total	1936	Total
	feet	feet	feet	feet	feet	feet
65-foot.....		290		20		70
170-foot.....		915		125	12	12
410-foot.....	646	646	488	523	40	40
Total.....	646	1,851	488	668	52	122

The plant included a 104 h.p. boiler, a 560-cubic-foot steam compressor, and a 9- by 8-inch Ingersoll-Rand hoist.

An average of 29 men was employed. G. F. Milne was in charge until December, when he was succeeded by E. W. Asselstine. The mine address is Shiningtree.

Blue Star Mines, Limited

Blue Star Gold Mines, Limited, was incorporated in February, 1936, with an authorized capitalization of 3,000,000 shares of \$1 par value. The officers and directors are: Geo. Glendinning, president; Aubrey Glendinning, vice-president; and J. M. Philp, secretary-treasurer. The head office is at 67 Yonge St., Toronto. The mine address is Kenora.

The property consists of 7 patented claims, comprising 280 acres, about 2 miles north of Witch bay, Lake of the Woods, district of Kenora, and includes the old Stella mine, which was first operated some forty years ago.

Previous operators had sunk four shafts: No. 1, an 80-degree inclined shaft, to a depth of 40 feet; No. 2, an 80-degree inclined shaft, to a depth of 67 feet, with 52 feet of crosscutting on the 60-foot level; No. 3, a vertical shaft, to a depth of 37 feet; and No. 4, a 50-degree inclined shaft, to a depth of 147 feet with 10 feet of drifting at the 30-foot level.

The present company reconditioned the old plant and buildings and installed an Ingersoll-Rand 220-cubic-foot portable compressor. Underground operations were carried on from August to October, 1936, during which time 32 feet of drifting was done on the 60-foot level from No. 2 shaft. Operations were suspended in October.

Buildings on the property include a power-house, hoist-room, blacksmith shop, powder magazine, cap-house, office, bunk-house, and cookery.

The mining plant comprises a 40 h.p. locomotive-type boiler, 6- by 8-inch Jenckes steam hoist, and Canadian Ingersoll-Rand 220-cubic-foot portable gasoline compressor.

During the period of operation, there were 15 men employed, with 4 underground. W. J. Hacker was in charge.

Bolinver Mines and Investments, Limited

Bolinver Mines and Investments, Limited, was incorporated in October, 1936, with an authorized capitalization of 40,000 shares of \$1 par value. The officers and directors are: R. D. Parker, president; G. E. Buchanan, vice-president;

and R. L. Beattie, secretary-treasurer. The head office is at Sudbury. The property is located in MacLennan township, district of Sudbury, near Skead.

A 2-compartment, vertical shaft was started in October and sunk to a depth of 178 feet, and a level was established at 165 feet. A total of 76 feet of cross-cutting had been accomplished on this level by the end of the year.

The plant includes a 600-cubic-foot Gardner-Denver compressor driven by a 175 h.p. Caterpillar Diesel engine, an 8½- by 10-inch Ottumwa air hoist, and a 42 h.p. heating boiler. Buildings erected included a hoist-house, compressor house, boiler-house, blacksmith shop, and office-warehouse.

An average of 17 men was employed from September to the end of the year. W. H. Smith was in charge. The mine address is Skead.

Bourkes Syndicate

The Bourkes Syndicate was formed in 1936 with 200 units of \$100 value each, of which 180 have been issued.

The officers of the syndicate are: J. P. Bartleman, syndicate-manager; David Pierce, secretary; Samuel Swagler, treasurer; H. F. Knutson, mine manager. The secretary's office is at Timmins. The mine office is at Bourkes. The property consists of 4 claims, approximately 142 acres, in Benoit township, district of Timiskaming.

A vertical, 2-compartment shaft, 6 by 9 feet, has been sunk to a depth of 400 feet, with levels at 80, 180, 280, and 380 feet, and 181 feet of crosscutting, 1,621 feet of drifting, and 1,506 feet of underground diamond-drilling has been accomplished.

The mine was reopened in July, 1936. The plant was reconditioned and the shaft repaired as the water was pumped out. The mine was sampled, and some ore mined and milled. Fifteen tons of ore and 5 tons of waste were hoisted. An average of 10 men was employed from July to December.

Bousquet Gold Mines, Limited

Bousquet Gold Mines, Limited, was incorporated in November, 1920, with an authorized capitalization of 3,000,000 shares of \$1 par value. The officers and directors are: Lionel Brooke, president; C. H. Hitchcock, vice-president; Wm. B. McPherson, secretary-treasurer; G. B. Webster, general manager; and H. P. Snelgrove, director. The head office is at 171 Yonge Street, Toronto. The mine address is Willisville.

The property is located in township 11, district of Sudbury, 7 miles east of West River, on the Algoma Eastern railway.

Work was resumed in January, 1936, after a suspension of five months, and continued throughout the year. A 50-ton amalgamation-cyanide mill was constructed and put in operation on May 26. A new mining plant was installed, and underground operations were resumed on May 16. Stalled stoping was done on the 150-, 300-, and 450-foot levels during the balance of the year. The development work done consisted of 10 feet of crosscutting on the 300-foot level and 44 feet of raising on the 450-foot level.

A total of 11,164 tons of ore was mined during 1936, of which 5,758 tons was obtained from the 150-foot level, 5,066 tons from the 300-foot level, and 330 tons from the 450-foot level. The mill treated a total of 9,432 tons of sorted ore. A total of 304 feet of diamond-drilling was done from underground.

The mining plant included a 620-cubic-foot Sullivan compressor driven by a 120 h.p. Fairbanks-Morse Diesel engine, a 420-cubic-foot Ingersoll-Rand com-

pressor driven by a 75 h.p. Fairbanks-Morse Diesel engine, and a 10- by 12-inch Holman divided-drum air hoist.

The mill equipment included a 12- by 20-inch jaw crusher, 5-foot Hardinge ball mill, drag classifier, three 6- by 18-foot Dorr agitators, five 12-foot Dorr thickeners, two blanket tables, amalgamation and precipitation equipment. Power was supplied by a 65 h.p. Ruston Diesel engine.

An average of 45 men was employed under the direction of J. E. Jerome. R. Demerse was mill superintendent.

Boyd Kirkland Gold Mines, Limited

Boyd Kirkland Gold Mines, Limited, was incorporated in July, 1936, with a capitalization of 3,000,000 shares of \$1 par value.

The officers and directors are: G. F. Summers, president; Colin A. Campbell, vice-president; R. P. Thompson, Jos. Edwards, A. Beauchemin, Dr. M. H. Lebel, J. A. Griffith, directors; W. R. Salter, secretary-treasurer. The head office is at 112 Yonge Street, Toronto. The property consists of 9 patented and 3 unpatented claims in Lebel township, Kirkland Lake area, district of Timiskaming.

Work was carried on from October to December, during which time a frame bunk-house and a log blacksmith shop were erected and 900 feet of surface trenching and two test pits were dug.

During the three months of operation, an average of 13 men was employed. Donald Sirola is manager. The mine office is at Kirkland Lake.

Brengold Mines, Limited

Brengold Mines, Limited, was incorporated in March, 1929, to succeed Casey Contact Gold Mines, Limited, on the basis of one share for three shares of the old company. The new company has an authorized capitalization of 3,000,000 shares of \$1 par value. The officers and directors are: F. W. Purdy, president; H. S. Conrad, vice-president; E. M. Hand, secretary-treasurer; H. F. Cassidy and Herbert Parker, directors. The head office is at 34 King Street East, Toronto. The mine address is Sturgeon River, via Jellicoe.

The company resumed operations on the Brennan-Kenty east group of 12 claims, located about 8½ miles northwest of Nezah, Irwin township, in the Sturgeon River area, district of Thunder Bay.

The buildings on surface include a power-house, blacksmith shop, shaft-house, bunk-house, cookery, office, magazine- and cap-house. The plant includes a 165 h.p. locomotive-type boiler, a 6- by 8-inch Canadian Mead single-drum hoist, and a 275-cubic-foot Sullivan steam-driven compressor.

The following is the development work done to date on the property:—

	May to September, 1935	June to December, 1936	Total to Dec. 31, 1936
	feet	feet	feet
SHAFT (2-compartment).....	225	225
100-FOOT LEVEL:			
Station (double).....	33	33
Drifts.....	437	437
Crosscuts.....	138	138

200-FOOT LEVEL:			
Station (single).....	15	15
Drifts.....	215	472	687
Crosscuts.....	210	494	704
Raises.....	52	52

There was an average of 25 men employed, of whom 10 were underground, from June to December, 1936, under the direction of H. M. Parrington.

Buffalo Ankerite Gold Mines, Limited

Buffalo Ankerite Gold Mines, Limited, which was incorporated in 1932, has an authorized capitalization of 1,000,000 shares of \$1 par value, of which 701,679 were issued at December 31, 1936. The officers and directors of the company are: E. G. Kinkel, president; Gustave R. Loesch, first vice-president; Jacob Betz, second vice-president; Geo. R. Feine, secretary; Henry Kobler, treasurer; Clarence H. Leo, Alphonse J. Baldeck, Everett Bristol, Harry J. Carmichael, and Henry J. Tiedt, directors. The executive office of the company is at 1728 Rand Building, Buffalo, N. Y. The head office and mine office are at South Porcupine.

The property consists of 9 patented claims, containing 322 acres, in the township of Deloro, Porcupine area, district of Cochrane. Five of these claims were formerly owned by Marbuan Gold Mines, Limited, which company, with all its assets, was taken over by Buffalo Ankerite Gold Mines, Limited, in January, 1936, as of November 30, 1935. The company holds 5 other claims in Deloro township, an 85 per cent. interest in McKay Lake Gold Mines, Limited, and a 90 per cent. interest in Sheadore Gold Mines, Limited.

The following is taken from the report of the manager to the president for the year ending December 31, 1936:—

The original Buffalo Ankerite Gold Mines property is designated generally in this report as the North mine and the former Marbuan Gold Mines property as the South mine.

The two mills treated 271,736 dry tons of ore, yielding 53,876.8 ounces of gold, for which the mine received \$1,888,828.96, with an average recovery of \$6.951 per ton milled. The North mill was increased during the year from an average of 500 tons to 600 tons daily, and the South mill from 175 tons to 300 tons daily.

During the first three months of 1936 when 675 tons were being produced, there was an average recovery per month of \$125,382.07, while during the month of December when 900 tons daily were being produced, there was a recovery of \$204,040.83, being an increase of 62.7 per cent.

Both mills and crusher-houses had extensive alterations and installations during the year. The percentage of total running time for the North mill was 97.86 per cent., and for the South mill 94.4 per cent.

Mining, Development, and Exploration

The North mine was connected with the South mine on the 1,050-foot level between the North and South ore bodies and the main shaft of the North mine. A receiving ore pocket was established at the 1,050-foot level, of the Main shaft, and with station was satisfactorily constructed in the soft serpentine rock in this region. A 3,000-ton ore pocket was raised from the 1,050-foot level to the 700-foot level in low-grade ore at the south end of the North ore bodies.

Additional electric locomotives were purchased and heavier rails were installed. A sump for reserve storage of water in event of breakdown or power failure was constructed, and a new pump installed. A low head pump delivers all South mine water to this sump, resulting in a general lowering of pumping costs. Stations at the 400- and 1,050-foot levels of the South mine were enlarged to provide facilities for increased tonnage.

	Tons

Ore Reserves

	Tons ¹	Value per ton at \$20.67	Total value at \$20.67	Total value at \$35.00
Broken ore reserves.....	138,398	\$4.76	\$658,774.00	\$1,123,243.26
Positive ore reserves.....	701,945	5.31	3,728,204.55	6,337,947.73
Total.....	840,343	\$4,386,978.55	\$7,461,190.99

¹Allowance for dilution calculated.

The present broken ore reserves are 17,354 tons above that of January, 1936; this is considered an adequate amount for this mine. The positive ore reserves increased 307,777 tons, a present value increase of \$3,098,880.67 above that of January, 1936. Positive ore reserves consist of 661,651 tons above the 1,050-foot operating level and 40,294 tons below.

Mine Operating Costs

The total mine operating costs are as follows:—

	Total cost	Cost per ton milled
Exploration.....	\$35,512.48	\$0.131
Development.....	139,698.01	.514
Mining.....	619,384.74	2.279
Milling.....	229,216.91	.844
General expense.....	112,654.68	.415
Total.....	\$1,136,466.82	\$4.182

Construction and General

The increased production required additional equipment and general improvement of the facilities with which to operate a mine handling approximately 1,000 tons of ore and waste a day. The capital expenditures required for this have been accomplished within the year and paid for from the current earnings.

Improvements at the North Mine

The headframe was raised, and two new combination aluminum alloy cage and skips were installed. New grizzly ore bins were constructed. The oversize from the grizzly passes over a sorting belt, from which approximately 1,000 tons of waste per month are removed. A service hoist was installed to facilitate the handling of timber primarily, and the hoist building extended.

The enlargement of the capacity of the crusher plant necessitated the purchase of a larger jaw crusher and a new low head vibratory screen, the replaced equipment being used for the South mill. A 2,000-ton steel bin for crushed ore was constructed adjoining the mill. This contains a reserve supply for the mill for three days and enables the shutdown of the mine and crusher-house during Sundays, holidays, and for repairs. A ball mill and classifier were purchased and installed. Changes in the flow and additional gold press were installed.

The equipment of the two refineries was consolidated at the North mine and generally improved with enclosed hood and oil-storage tank for fumes escape and fire protection.

Special attention was paid to the reduction of power costs with the consolidation of power and installation of peak-load controls and installation of separate lines, resulting in a saving of considerable horse-power and costs per year.

A new change-house was erected with a capacity for 400 men, with special attention to sanitation, showers, heating, ventilation, sun lamps, and steel lockers. Electric cap lamps with charging equipment have been installed in this building also. The old change-house is to be used for electrical and mechanical shops and spare and special equipment storage, which is very much needed.

An addition was made to the machine shop, a used lathe, radial drill and bolt cutter installed and a new punch and shears purchased. This general mechanical improvement will do much to obtain a high standard of maintenance. The drill-steel shops of the two mines were consolidated and are operated during the day only, with an improvement in steel-sharpening and lowering of costs.

The roof of the office building was covered, the building insulated and generally improved to meet the requirements of the office and engineers. A time and employment office was erected for the entire mine. The time clocks of the North dry were used, thus centralizing the pay-roll accounting of both mines.

Improvements at the South Mine

The headframe was raised and strengthened and an enclosed waste rock bin added. The air hoist used for sinking was reconditioned with V-belt electric drive. An extension to the old hoist- and compressor-house greatly improved conditions. The crusher-house was extended and the old part of the building strengthened. The feed bin was entirely reconstructed for the new sorting belt and fed over a small grizzly. The reduced ore from the jaw crusher is fed by a series of belts to a vibratory screen, thence to a secondary gyratory crusher. This is passed through the former rolls, the location of which has been changed, and the entire conveyor system to the mill bin reconstructed. A classifier for the tube mill replaced the former smaller one, which is used for duty with the ball mill. A drum filter was installed, requiring an addition to the building. Elevator buckets were installed and general minor improvements made.

A wall for an enlarged tailings disposal area was erected across the east side on the lower area of the former Marbuan property. This wall is 2,020 feet long, varies in height to 16.5 feet at the highest point, and is 8 feet wide at the top. This new area, with the southwest wall completed in the coming spring, will decrease the tailings disposal cost for the immediate future years. A launder from the North mill conveys the tailings to this area, and the South mill has a separate launder installed.

The bunk-house sides and roof were covered. Three new houses for the staff men were built. Other houses requiring repair were greatly improved. Low-cost leases to six other employees enabled the building of their own homes on the property.

General Improvements

A sprinkler system was installed throughout the principal buildings of the mine and serviced by a 115-foot-high, 50,000-gallon tank and 100,000-gallon storage tank at the bottom, with a 1,000-gallon-per-minute pump. This safety factor provides against fire with a reduction in insurance rates and was advisable against loss of production. The timber and brush around the mine was considerably cut and burned.

A general improvement of the plant is noted in other respects. The heating, by increased insulation, unit heaters and thermostatic control, was further improved upon. Electrical wiring, lighting, and controls were improved throughout the plant, which decreased fire and accident hazard and facilitated operation. Steel and wood structures were painted to increase their life as well as to improve their appearance.

Waste rock from the mine was used to make roads about the property, employees' auto parking areas, and areas for storage of mine timber and lumber. A used dump truck was purchased for work about the mine. A saw-mill was bought and erected for the cutting of mine timber, as required.

A small dam was made across the outlet from McDonald lake to raise the level and increase water supply during the hot months. The pump station was enlarged and improved by insulation and metal covered on outside.

There was an average of 453 men employed at the mine throughout the year; of this number 296 were employed underground and 36 in the mills. R. P. Kinkel is mine manager.

Buffalo Beardmore Gold Mines, Limited

Buffalo Beardmore Gold Mines, Limited, was incorporated in January, 1935, with an authorized capitalization of 3,000,000 shares of \$1 par value. The officers and directors are: G. H. Gilberts, president; Miss A. Clark, secretary-treasurer; S. R. Smith, G. S. Stewart, and C. L. McGinnis, directors; John McGinnis, manager. The head office is at 47 Wellington Street East, Toronto. The mine address is Beardmore.

The property consists of 280 acres, claims T.B. 5,055, 5,056, 13,181-13,184, 17,163, and 17,164, located in Eva township, about a mile west of Beardmore on the Longlac-Port Arthur branch of the Canadian National Railways, district of Thunder Bay.

Surface exploration was commenced in January. At the end of July a Chicago pneumatic, single-stage, 8- by 6-inch gasoline compressor was installed for the purpose of sinking deep test-pits.

Buildings erected on the property include bunk-house and cookery, compressor house, and blacksmith shop. Toward the end of the year, it was reported that preparations were under way to sink a shaft on claim T. B. 5,056.

There was an average of 10 men employed, under the direction of L. H. Bruce.

Canagau Mines, Limited

Canagau Mines, Limited, was incorporated in September, 1936, with an authorized capitalization of 3,000,000 shares of \$1 par value, 1,500,005 of which have been issued.

The officers and directors are: Chas. La Bine, president; P. J. Roche, vice-president; Gilbert La Bine, F. D. Roche, M. L. Pochon, directors; Frank Broderick, secretary-treasurer. M. Gannon is manager. The head office is at 80 King Street West, Toronto. The mine office is at Cheminis.

The property, which consists of 1,000 acres in Ben Nevis township, district of Timiskaming, was formerly owned by the Interprovincial Exploration Company, Limited. In November the plant was reconditioned and a winter road put through from Cheminis. The company plans to dewater the mine and sample it.

An average of 9 men was employed for two months.

Canfield and Hocking

J. C. Canfield and W. H. Hocking are the owners of a group of 10 mining claims located in township 29, range 23, Michipicoten area, district of Algoma. The property is known as the Deep Lake mine.

A 2-compartment, 33-degree shaft was started on claim S.S.M. 6,971 in May, 1936, and sunk to a depth of 115 feet. A level was established at 100 feet, on which 225 feet of drifting and 35 feet of raising had been accomplished by the end of the year.

A 20-ton amalgamation mill was installed before sinking was started. The equipment included a 9- by 12-inch jaw crusher, Smith-Hocking ball mill, drag classifier, 2 Wilfley tables, and amalgamation equipment. It was operated by a gasoline engine until November, when a transmission line was completed from the Parkhill mine and electric motors were installed. Milling was started in May on high-grade ore from shaft-sinking and was carried on intermittently for the balance of the year. A total of 2,415 tons had been milled by the end of the year.

The mining plant included a 175-cubic-foot Sullivan compressor and a small air hoist. An average of 12 men was employed under the direction of the owners. The mail address is Gold Park.

Canusa Gold Mines, Limited

Canusa Gold Mines, Limited, was incorporated in July, 1932, with an authorized capitalization of 4,500,000 shares of \$1 par value. The officers and directors of the company are: E. Lang Weaver, president; Robert Schram, vice-president; P. Du Bois, H. Kendrick, D. D. Wessels, Geo. Neukom, Chas. A. Drake, directors. The Combined Secretarial Corporation, Limited, Toronto, is secretary-treasurer. The head office is at 244 Bay Street, Toronto. The mine address is South Porcupine.

The company holds the original Scottish-Ontario Syndicate property of 440 acres and a second group of 160 acres, which was taken over in 1936, in Whitney and Tisdale townships, Porcupine area, district of Cochrane.

No underground work was done at the mine during the year other than pumping the mine out and sampling a part of it. A concrete reservoir was built on surface to hold about 150,000 gallons of water. Some 2,700 feet of surface diamond-drilling was done in the fall of the year. Ray H. Binch was manager at the end of the year.

Car Lake Syndicate

In July, 1936, the shareholders of Bathurst Gold Mines, Limited, entered into an agreement with the Car Lake Syndicate, consisting of Hon. T. G. Murphy, L. T. Martin, John Gleeson, T. A. Beament, and Andrew Pelton, to take a working option on their property in Skinner township, Woman Lake area, Patricia portion of Kenora district. The head office is at the Ottawa Electric Building, Ottawa. The mine address is care of General Airways, Hudson.

Gold was discovered on this property in 1926. Surface exploration was carried on, and in 1929 Bathurst Mines, Limited, installed a plant and a 10-ton Tremaine stamp mill. The value of production amounted to \$3,107 from a rich pocket on surface and a small amount of ore from underground.

Operations were suspended at the end of 1929. The 2-compartment, vertical shaft had then reached a depth of 300 feet, with levels at 200 and 300 feet. Some 1,109 feet of crosscutting and 2,046 feet of drifting had been done. In July, 1936, the Car Lake Syndicate commenced operations on the property and continued throughout the year. On the 200-foot level, 30 feet of crosscutting, 131 feet of drifting, and 52 feet of raising was accomplished. The stamp mill was put into operation from August 12 to September 30, during which time 432 tons of ore were treated, with a gross recovery of 84 ounces in gold and 36 ounces in silver.

During the period of work, there were 17 men employed, with 4 underground and 3 in the mill, under the direction of P. J. Shanton.

Centaur Mining Company, Limited

The Centaur Mining Company, Limited, is capitalized at \$50,000 in shares of \$1 par value, all of which have been issued. The officers and directors are: R. M. Davy, president; J. D. Kearney, secretary-treasurer; D. M. Coughlin, Andrew Walz, Arthur G. Fenwick, and W. H. A. Olive, directors. The head office is at 360 St. James Street West, Montreal, Que.

The property on lot 8, concession VIII, Marmora township, Hastings county, was operated during January and from March 19 to June 19, 1936.

Development work during the year consisted of 70 feet of shaft-sinking and 86 feet of drifting and crosscutting. The total amount of underground development work is: shaft-sinking, 281 feet; drifting and crosscutting, 651 feet.

An average of 15 men was employed.

Central Patricia Gold Mines, Limited

Central Patricia Gold Mines, Limited, was incorporated in 1931 to succeed Central Patricia Mines, Limited. It has an authorized capitalization of 2,500,000 shares of \$1 par value. The officers and directors are: F. M. Connell, president; W. H. Connell, vice-president; Alan Cockeram, secretary-treasurer; C. R. Elliott, assistant secretary-treasurer; J. H. Rattray, L. Cohen, and G. B. Webster, directors. The head office is at 85 Richmond Street West, Toronto. The mine office is at Central Patricia.

The property includes 137 claims, lying in several groups in the Pickle-Crow area, in the Patricia portion of Kenora district. The mine camp lies about 6 miles west of the property of Pickle Crow Gold Mines, Limited, and is about 110 miles north of Savant Lake Station on the Canadian National railway. During the summer of 1936, the construction of a road to the property and vicinity was commenced from Doghole Bay at the east end of Lake St. Joseph.

The following is an extract from the report of the president for the year ending December 31, 1936:—

As referred to in the last annual report, your company entered into a contract with the Hydro Electric Power Commission of Ontario whereby it agreed to purchase 800 horse-power at \$65 per horse-power for a period of 7 years. During October this contract became effective with the completion of the addition to the Rat Rapids development, making additional power available to your company. The power now available is sufficient for the immediate requirements of the operations at both of your mining properties.

Your company, in conjunction with Pickle Crow Gold Mines, Limited, incorporated the Lake St. Joseph Transportation Company, Limited to operate the Root River Portages, the Root River Railway, and a new truck road from Doghole Bay to Pickle Crow mine, the entire capital stock of which company is held equally between the Pickle Crow Gold Mines, Limited, and your company. The new company entered into an agreement with Hennessy & Hennessy, Limited, Haileybury, to construct a truck road from the terminus of the water route at Doghole Bay to Pickle Crow Gold Mines, Limited, with short connecting roads to Central Patricia Gold Mines, Limited, and its No. 2 property, at a cost of \$175,000. In August the two mines entered into a joint agreement with the Dominion and Ontario Governments, whereby the Governments agreed to pay up to \$150,000 of this contract. In addition to financing the balance of the contract the two companies have paid \$12,000 to survey and cut the right-of-way. The road is expected to be completed by July 1 next, and it is anticipated that this will result in a material reduction in freight rates.

During the year your company acquired by staking 33 claims adjoining its property. All assessment work due to date on unpatented claims has been completed. The company now holds 137 mining claims, or approximately 5,480 acres, of which 64 claims, or 2,624.44 acres, are patented.

During the coming year it is proposed to sink the main shaft from the 1,000- to the 1,500-foot level and carry out further lateral exploration. The shaft at the No. 2 property will be completed to the present objective of 400 feet by March 1, 1937, after which date lateral work will be proceeded with. No lateral exploration work has been done since the last annual report, as the power was not available for this operation until December 1, 1936. The development of the main mine continues to be very satisfactory.

The following is taken from the mine manager's report for the year ending December 31, 1936:—

Production

A total of 58,466 tons of ore was milled, from which 32,627 ounces of gold and 3,552 ounces of silver, valued at \$1,144,154.14, was recovered, the average recovery being 0.558 ounces gold, or \$19.57 per ton.

The milling rate was increased from 125 to 200 tons per day. The average milling rate for the year was 164 tons per day.

Development

The shaft was deepened from 500 to 1,000 feet, and four new levels opened. Development work consisted of 2,489 feet of drifting, 1,448 feet of crosscutting, and 1,309 feet of raising.

In spite of the increased milling rate, estimated ore reserves increased from 95,413 tons at the end of 1935 to 112,198 tons at the end of 1936. The ore estimate as at December 31, 1936, was as follows:—

	Tons	Grade
Broken reserves	9,721	0.67 ounces
Developed ore	89,592	.48
Semi-permanent pillars	3,664	.51
Probable ore	9,221	.49
Total	112,198	0.5

Broken reserves show a decrease from last year, this being due to a change in mining methods from shrinkage stoping to cut-and-fill stoping, which system will permit the more complete mining of the ore bodies.

A new shoot of 0.47-ounce ore, estimated to contain 1,000 tons, was opened on the 1st level between the B and C bodies. Recent diamond-drilling has indicated the downward extension to this shoot on the 250-foot level. Driving west on the 375-foot level reached the F zone indicated by shallow surface drill-holes in 1935, and to date an 80-foot length of 0.3-ounce ore over a width of 5.5 feet has been opened. Other short sections opened in the drifting or indicated by lateral drilling from the main drive lend encouragement to the further development of this western area.

On the 625-foot level, a 145-foot length of ore with widths up to 22 feet was encountered as an extension to and on the west end of the C body. Over 10,000 tons of 0.44-ounce ore is indicated in this K or C extension, between the 625- and the 500-foot levels.

Work on the 500-foot level found the K body, resulting in an additional 75 feet of length being added to the C body. Below the 625-foot indications are that C and K are definitely separate shoots. The B and C bodies are at present being developed on the lower levels with results indicating grade, widths, and tonnages comparable to those encountered in the upper levels.

Diamond-Drilling

Some 3,634 feet were drilled from surface in general exploration and 4,465 feet from underground. It is interesting to note that underground drilling was particularly successful in locating ore extensions.

Construction

Six bungalows for employees, a carpenter shop, a warehouse, a new change-house, a second large dormitory, and a hospital equipped with X-ray were erected.

Costs

The large amount of development work, together with the shaft-sinking expenditure, increased the over-all cost per ton of ore treated, but the unit costs show a decided lowering due to cheaper transportation, increased scale of operations, and general improvements in plant and methods.

No. 2 Operation

Shaft-sinking from the 150-foot level was resumed in November, with the 400-foot horizon the present objective. The vein dipped through the shaft at the 275-foot level and showed the usual strength of quartz with some visible gold. Before commencing sinking, the plant was reconditioned, a new cook-house built, and the camps rehabilitated.

During the year there was an average of 175 men employed, of whom 81 were underground and 12 in the mill. Richard E. Barrett is mine manager, and Gordon H. Gibbs is assistant manager.

Central Porcupine Mines, Limited

Central Porcupine Mines, Limited, was incorporated in December, 1933, with an authorized capitalization of 5,000,000 shares of \$1 par value, of which 3,595,118 were issued as of January 12, 1937. The head office is at 25 King Street West, Toronto. The officers and directors of the company are: E. Ward Wright, president; C. D. H. MacAlpine, vice-president; Geo. G. Blackstock, secretary-treasurer; W. J. Aikens, W. J. Hume, and Jos. Montgomery, directors. The mine office is at Schumacher.

The property consists of 13 claims, 520 acres, in the township of Tisdale, Porcupine area, district of Cochrane. It lies south of the Coniarum mine and east of the McIntyre and Hollinger mines, and adjoins each. Development of this property to date has been carried out on the 1,000-foot level working through the Goldale shaft of the Coniarum mine and by diamond-drilling from surface.

Development work to the end of 1936 includes approximately 2,225 feet of crosscutting on the Coniarum property driven to reach their own ground, 1,945 feet of crosscutting and line drive work done in 1935, and 1,886½ feet of crosscutting done in 1936. In 1935 the company did 3,109 feet of diamond-drilling from the 1,000-foot level. In 1936, 18,534 feet of diamond-drilling was done, partly from surface and partly from underground.

The average number of men employed in 1936 was 30. This figure includes contract diamond-drillers. Dr. D. G. H. Wright is general manager of the company. Bruce Russell is mine superintendent.

Churchill Mining and Milling Company, Limited

The Churchill Mining and Milling Company, Limited, was incorporated in March, 1918. The authorized capitalization is 4,000,000 shares of \$1 par value. The officers and directors are: W. R. Knox, president; J. G. Merrick, secretary-treasurer; D. Lieberman, H. H. van Wart, and F. H. Geddes, directors. The head office is at 45 Richmond Street West, Toronto.

The property includes a group of 4 claims in Churchill township, West Shiningtree area, district of Sudbury.

Operations were resumed at this property in March, 1936, after a suspension

of three months. A small amount of lateral work was done on the 109-foot level before operations were again suspended in June, 1936. The property remained idle for the balance of the year.

An average of 17 men was employed during the period of operation.

Clark Gold Mines, Limited

Clark Gold Mines, Limited, was incorporated in October, 1934, with an authorized capitalization of 2,000,000 shares of \$1 par value. The officers and directors are: R. H. Miner, president; A. J. Reece, vice-president; G. S. Andrews, secretary-treasurer; W. S. Lighthall, A. C. Dick, and M. A. Carton, directors. The head office is at 7411 Delanaudiere Street, Montreal, Que. The mine address is Dymont.

The property includes 14 unpatented claims and 1 patented claim (K. 912), on which the shaft is sunk. It is located about 8 miles southwest of Dymont on the Canadian Pacific railway, district of Kenora.

During 1936, the 2-compartment, vertical shaft was enlarged to 3 compartments and was deepened to 148 feet, with a level established at 125 feet. At this level 129 feet of crosscutting and 78 feet of drifting were done. On the 68-foot level 12 feet of drifting was done.

Underground operations were suspended at the end of September, 1936, and diamond-drilling was commenced on surface, 540 feet having been accomplished by December 31.

The mining plant includes two 60 h.p. return tubular boilers, one 80 h.p. return tubular boiler, two Ingersoll-Sargent straight-line compressors with a combined delivery of 800 c.f.m. and a single-drum, reversible, 5- by 10-inch steam hoist.

Buildings on the property include bunk-house, cookery, office, power-house, storehouse, powder magazine, cap-house, three residences, and a blacksmith shop.

There was an average of 13 men employed, with 4 underground. G. S. Andrews was manager and was succeeded by R. S. Douglas.

Cline Lake Gold Mines, Limited

Cline Lake Gold Mines, Limited, was incorporated in August, 1936, with an authorized capitalization of 2,000,000 shares of \$1 par value. The officers and directors are: J. L. Murray, president; J. G. Dickenson, vice-president and general manager; J. N. Rougvié, secretary-treasurer; P. A. Dymont and Harold Dymont, directors. The head office is at 900 Victoria Building, Ottawa.

The property, which is located in township 48, Goudreau area, district of Algoma, is about $5\frac{1}{2}$ miles by road from Lochalsh and 11 miles from Goudreau. The underground workings were established by Cline Canadian Gold Mines, Limited, some years ago.

Work was started in August some distance south of the old underground workings. Following surface work and diamond-drilling, preparations were started to sink a 3-compartment, vertical shaft, $6\frac{1}{2}$ by 16 feet, to a depth of 500 feet.

At the end of the year the shaft was 35 feet deep, and the concrete collar and foundations for a steel headframe were in place. A mining plant had been delivered but was not installed. A 3,000-foot transmission line had been constructed from the Edwards mine, and a 7,000-foot water line was installed. Two bunk-houses and a cookery were nearly completed. A total of 18,000 feet of diamond-drilling had been accomplished.

An average of 58 men was employed. G. M. Furnival was in charge until late in the year, when A. H. Hinton succeeded him. The mine address is Lochalsh.

Cochenour Willans Gold Mines, Limited

Cochenour Willans Gold Mines, Limited, was incorporated in April, 1936, with an authorized capitalization of 3,000,000 shares of \$1 par value. The officers and directors are: W. M. Cochenour, president; A. Mackenzie, vice-president; G. M. Huycke, secretary-treasurer; S. G. Gibson and G. E. Atwood, directors. The head office is at 801 Dominion Bank Building, Toronto. The mine address is McKenzie Island.

The property consists of 13 claims, comprising 550 acres, in Dome township, Red Lake area, Patricia portion of Kenora district.

In 1934 this property was optioned from the Cochenour Willans Syndicate by Hollinger Gold Mines, Limited, who sank a 3-compartment, 7- by 16-foot shaft to a depth of 174 feet, with 750 feet of drifting and 1,150 feet of crosscutting on the 150-foot level, after which operations were suspended when Hollinger released their option in 1935.

The present company resumed operations in April, 1936, and completed 700 feet of diamond-drilling from surface and 2,500 feet underground. The drilling from the 150-foot level indicated the presence of a siliceous carbonate lens about 500 feet southwest of the shaft and continuing downward from the level.

Underground exploration was resumed in August and continued throughout the remainder of the year. The shaft was sunk an additional 150 feet to a depth of 324 feet, and a level was established at the 275-foot horizon. The following table shows the amount of development work accomplished to the end of 1935, during 1936, and the total:—

	To December 31, 1935	1936	Total
	feet	feet	feet
SHAFT	174	150	324
150-FOOT LEVEL:			
Drifts	750	750
Crosscuts	1,150	380	1,530
275-FOOT LEVEL:			
Drifts	490	490

Plant equipment includes a 60 h.p. boiler, Ingersoll-Rand single-drum, 6- by 8-inch steam hoist, and Ingersoll-Rand 310-cubic-foot oil, engine-driven, portable compressor.

Surface buildings include a power-house and hoist-room, dry-house, powder magazine, cap-house, bunk-house, cookery, office, and one residence.

At the end of the year there were 16 men employed, of whom 14 were underground. W. P. Mackle is in charge of operations.

Cole Gold Mines, Limited

Cole Gold Mines, Limited, was incorporated in November, 1933, with an authorized capitalization of 3,000,000 shares of \$1 par value. The officers and directors of the company are: John Y. Cole, president; Wm. Exton, Jr., vice-president; Cecily Cole, secretary-treasurer. The executive office and mine office are both at Cole.

The holdings of the company are located in Ball township, on the southwestern shore of Pipestone bay in Red lake, in the Patricia portion of Kenora district.

Plant equipment includes a 70 h.p. locomotive-type boiler, Canadian Ingersoll-Rand 250-cubic-foot steam compressor, and Jenckes 8- by 10-inch, single-drum steam hoist.

Work was continued at the property throughout 1936, and by the end of the year the 2-compartment, 7- by 11-foot, vertical shaft was at a depth of 500 feet, with levels established at 220, 300, 400, and 500 feet; approximately 2,000 feet of drifting and crosscutting had been done.

There was an average of 19 men employed, of whom 8 were underground. John Y. Cole is manager.

Concordia Gold Mining Company, Limited

The Concordia Gold Mining Company, Limited, was incorporated in May, 1934, with an authorized capitalization of 3,000,000 shares of no par value. Shares issued and allotted for mining claims to the end of the year are reported as being 2,277,946. The officers and directors of the company are: A. E. Ladouceur, president; Theo. Lanctot, vice-president; W. F. Costigan, secretary-treasurer; Stuart Grant and H. W. Laird, directors. The head office of the company was recently moved from Montreal to 100 Adelaide Street West, Toronto.

The holdings of the company consist of 14 claims near the south boundary of Deloro township, Porcupine area, district of Cochrane. There is a shaft on the property 158 feet in depth with a station at 125 feet, from which approximately 178 feet of crosscutting and 56 feet of drifting have been done. In 1936, there was little activity at the mine, which was allowed to fill with water in March; it was pumped out again in the summer, examined, and again allowed to fill up with water. No underground work was reported as having been done in 1936.

During the first two months of the year the average number of men employed was 24; during the latter ten months the average fell below 5. Geo. Henderson was in charge at the end of the year.

Coniaurum Mines, Limited

Coniaurum Mines, Limited, was incorporated in July, 1924, with an authorized capitalization of 6,000,000 shares of no par value, of which 2,730,447 were issued at December 31, 1936. The officers of the company are: Thayer Lindsley, president; A. L. Bishop, vice-president; H. Whittingham, secretary-treasurer. The directors are: H. S. Munroe, Alex. Longwell, and T. H. Rea. The head office is at 25 King Street West, Toronto. The mine address is Schumacher. John Redington is mine manager.

The mine property consists of 19 patented claims, containing 760 acres, adjoining the McIntyre-Porcupine mine, in the township of Tisdale, Porcupine area, district of Cochrane. The company also holds three additional claims in the same township.

The following is taken from the report of the mine manager for the year ending December 31, 1936:—

Development and Exploration

While general development work has been carried on, as in the past, in various parts of the mine, the work to which most importance has been attached and for which other work has been subordinated has been (1) the sinking of No. 2 winze, and (2) preparation work for and the sinking of the Bishop subshaft.

It was planned to take No. 2 winze down to the 5,500-foot level, but, owing to the unexpected invasion of a large part of the ground to the west of the winze by porphyry, the winze was stopped just below the 5,000-foot level to allow of determining the effect of this new porphyry on the ore condition. We now have six new levels below the 3,500-foot level tributary to the winze, on which active development is being started. It is also planned to install a new hoist to serve the winze from the 3,000- to the 5,000-foot level, and this hoist should be in service by the middle of 1937.

The Bishop subshaft is being sunk from the 3,500-foot level, with the immediate objective of the 5,000-foot level. This is a full-sized 4-compartment shaft, so arranged that its skips will dump directly into the 3,500-foot Bishop shaft-loading pockets. When this work is finished the interesting ground in the eastern part of the mine will be explored and connection made with No. 2 winze at 500-foot vertical intervals. A great amount of preparatory work was required before actual sinking was started. This was all completed on a permanent basis and actual sinking started December 1.

In addition to these major jobs, connection between the Bishop shaft and No. 2 winze on the 3,500-foot level was made, and various drifts, crosseuts, and raises driven for exploration purposes. Diamond-drilling for geological information as in other years has been carried out on a large scale. It has supplied much valuable information.

The total footage accomplished of all classes of underground work was considerably in excess of any previous year, as shown by the following tabulation:—

SUMMARY OF DEVELOPMENT

	Feet
Sinking.....	1,561
Drifting.....	2,950
Crosscutting.....	6,769
Raising.....	2,030
Diamond-drilling.....	30,903

The footage driven in ore was 1,547 feet, with an average value of 4.3 pennyweights per ton over a width of 6 feet. Raising in ore for a distance of 1,140 feet, width 4.3 feet, assay per ton 6 pennyweights.

Broken Ore Reserves

The mining policy has been critically reviewed during the past year, and it has been decided to change the stoping method from shrinkage, which has been previously practiced, to filled stopes. This change-over will be gradual and, during the transition period of several years, the broken ore reserve will diminish until, finally, no broken ore reserve will exist.

The broken ore reserve at the end of 1936 was 171,675 tons at 5.2 pennyweights, as against 200,067 tons at 4.4 pennyweights at the end of 1935.

Milling

During the year the mill treated 168,715 tons of ore with an average recovery of \$8,240 per ton, extracting 95.73 per cent. of the gold content, operating 361.14 days, or 98.67 per cent. of possible running time.

New Equipment and Improvements to Buildings

During the year a new fireproof compressor building has been erected of steel and tile construction, also a new 3,280-cubic-foot Ingersoll-Rand angle-type compound compressor direct-connected to a 600 h.p. motor. The old compressor building was salvaged and re-erected, supplying a much-needed plate and general blacksmith shop. In addition to this, five new dwellings have also been built for the purpose of accommodating some of the key men of the staff.

Tailings Dam

The large tailings dam was mentioned in last year's report. It is now completed with sufficient storage for many years of tailings in the future.

The average number of men employed during the year was 376; of this number 268 were employed underground and 29 in the mill.

Consolidated Mining and Smelting Company of Canada, Limited

The Consolidated Mining and Smelting Company of Canada, Limited, was incorporated in January, 1906, and is capitalized at \$20,000,000, divided into 800,000 shares of \$25. The officers and directors are: Jas. J. Warren, president; W. S. Rugh, vice-president in charge of sales; W. M. Archibald, vice-president in charge of mines; Jas. E. Riley, secretary-treasurer; S. G. Blaylock, general manager; Sir E. W. Beatty, Sir Chas. Gordon, J. C. Hodgson, Sir Herbert Holt, Henry Joseph, R. H. McMaster, Thayer Lindsley, F. Gordon Osler, Hon. R. R. Bruce, L. A. Campbell, R. S. McLaughlin, and W. N. Tilley. The head office is at 215 St. James Street West, Montreal, Que. An office is maintained at 302 Bay Street, Toronto.

Addington Mine

The Addington mine, also known as the Rich Rock, in Kaladar township, Lennox and Addington county, is owned by Addington Mines, Limited, and operated under the control of the Consolidated Mining and Smelting Company of Canada. The property consists of 298 acres in lots 24 and 25, concession VI.

During 1936 the 3-compartment shaft was sunk a further 180 feet, and 1,199 feet of drifting and 706 feet of crosscutting were done. Pockets, stations, and sumps, totalling 4,600 cubic feet, and 11,150 cubic feet of slashing were cut. Some 2,657 feet of diamond-drilling was done.

J. C. Kingston was manager, employing an average of 26 men on surface and 15 men underground. The mine address is Flinton.

Cordova Mine

The company owns and operates the Cordova mine on the east half of lot 20, concession I, Belmont township, Peterborough county.

During 1936 the following development work was done: sinking, 396 feet; crosscutting, 285 feet; drifting, 1,599 feet. The total tonnage hoisted amounted to 30,276 tons.

An average of 46 men was employed. C. A. Seaton is manager. The mine address is Cordova Mines.

Garrcon Property

Underground operations at the Garrcon property, in Garrison township, district of Cochrane, commenced in 1935, under the direction of the Consolidated Mining and Smelting Company of Canada. In 1935 a 62-degree inclined shaft was sunk 256 feet, and 1,033 feet of lateral work was done on levels at 120 and 240 feet. During 1936 the drifting and crosscutting done on these levels totalled 1,745 feet. Diamond-drilling accomplished to the end of 1935 totalled 4,800 feet and at the end of 1936 it was 10,550 feet. Since the middle of November, 1936, underground work has been confined entirely to diamond-drilling.

The mining plant consists of 2 Rand gasoline-driven compressors and a single-drum Rand hoist. The average number of men employed during the year was 29. A. S. Hudson is mine manager. The mine address is Matheson.

A list of the officers and directors of Garrcon Mines, Limited, appears on page 135 of this report.

Hermiston-McCauley Property

The Hermiston-McCauley property, situated in Strathy township, district of Nipissing, consists of 2 claims, 104.34 acres, held under option.

Work was started in 1936. By the end of the year 7,816 feet of trenching and 4,761 feet of surface diamond-drilling had been done. The following permanent buildings were erected: a 2-storey bunk-house and cookery of frame and asbestos-siding construction, an office building of the same construction, a change-house of frame and service roofing. Temporary buildings, consisting of a hoist-house, a compressor-house, and a blacksmith shop, were also built. A vertical, 3-compartment shaft, 6 by 16 feet, was sunk 47 feet.

An average of 15 men has been employed. A. S. Hudson is engineer in charge of operations. The mine office is at Timagami.

New Golden Rose Mine

The property owned by New Golden Rose Mines, Limited, in Afton township, Timagami Forest Reserve, district of Sudbury, is operated under the direction of Consolidated Mining and Smelting Company of Canada and includes the

property formerly known as the Afton mine. A list of the officers and directors of the company appears on page 184 of this report.

Operations were carried on throughout 1936. The 2-compartment, vertical winze from the adit level was carried through to surface and converted into a 3-compartment shaft by slashing to its full depth. This makes the shaft 482 feet deep, and the adit level is at 66 feet. The former 150-, 275-, and 400-foot levels are now the 216-, 341-, and 466-foot levels.

The development work accomplished on the various levels during the year, and the total to the end of 1936, are as follows:—

Level	Drifting		Crosscutting		Raising	
	1936	Total	1936	Total	1936	Total
	feet	feet	feet	feet	feet	feet
66-foot (adit).....			123	323		
216-foot.....	4	38		270		
341-foot.....	385	1,001	305	554	60	60
466-foot.....	183	934	212	422	200	200
Total.....	572	1,973	640	1,569	260	260

A new plant was installed, which includes 3 Polar Atlas Diesel engines of 295 horse-power each. Two of these are directly connected to 200 k.w., 440-volt generators. The third one drives a 1,325-cubic-foot Ingersoll-Rand compressor. An Ingersoll-Rand double-drum electric hoist was installed.

The construction of a 100-ton cyanide mill was started, and it was 70 per cent. completed by the end of the year. The equipment includes a 4- by 12-foot Hadsel Western mill, two 8- by 24-foot Dorr thickeners, five 14- by 14-foot Dorr agitators, two Oliver filters, and a Merrill-Crowe precipitation unit.

Buildings erected included a power-house, bunk-house, cookery, and several dwellings. A wooden headframe and a 30,000-gallon steel water-tank were also constructed. An average of 99 men was employed during the year. D. C. McKechnie was manager, and W. E. Aitchison was superintendent.

Ritchie Mine

The Ritchie property, consisting of 17 acres in Gauthier township, Kirkland Lake area, district of Timiskaming, is held under option from Ritchie Gold Mines, Limited.

The property has been inactive since August, 1929. In June, 1936, the Consolidated Mining and Smelting Company of Canada, Limited, dewatered the mine, reconditioned the shaft, and made a general examination. During the year, 3,903 feet of surface diamond-drilling, 4,225 feet of underground diamond-drilling, 435 feet of crosscutting, 328 feet of drifting, and 22 feet of raising was done. About 3,484 tons of waste were hoisted.

An average of 19 men was employed for eight months. The mine office is at Kirkland Lake. C. E. White is manager.

Cook Lake Gold Mines, Limited

Cook Lake Gold Mines, Limited, was incorporated in October, 1936, with an authorized capitalization of 2,000,000 shares of \$1 par value, of which 1,100,005 shares are outstanding. The officers and directors are: H. G. Donley, president; G. M. Donley, secretary; W. H. Stanley, G. G. Barber, and E. J. McKenna, directors. The head office is at 1103 Atlas Building, 350 Bay Street, Toronto. The mine address is Schreiber.

The property consists of 9 unpatented claims, comprising 390 acres, situated 4 miles north of Schreiber on the main line of the Canadian Pacific railway, district of Thunder Bay.

Operations were commenced at this property in October, 1936. Exploration work on claim T. B. 13,179 disclosed a vein striking approximately N. 60° W., with an average dip of about 42° N. It is reported to vary in width from 2 inches to 3 feet over a length of 91 feet, outcropping on top of a hill, and to carry profitable values in gold over an average width of 23 inches.

A summer road was built from Schreiber to the property, camp and plant buildings were erected, and a mining plant was installed. A tunnel was commenced, drifting on the vein into the side of the hill for a distance of 75 feet.

Buildings on the property include cook-house, bunk-house, office, power-house, blacksmith shop, storehouse, stable, and powder magazine. Plant equipment includes a portable gasoline compressor, a drifter, and two jack-hammers.

There were 10 men employed under the direction of A. L. Kemp.

Coulson Consolidated Gold Mines, Limited

Coulson Consolidated Gold Mines, Limited, was incorporated on March 27, 1928, with an authorized capitalization of 3,000,000 shares of \$1 par value, of which 1,866,646 were issued at December 31, 1936. The head office is at 1104 Northern Ontario Building, Toronto. The officers and directors of the company are: N. Kinsella, president; H. C. Crow, first vice-president and general manager; D. McKenna, second vice-president; A. Ritchie, secretary-treasurer; L. V. Sutton and R. Sutcliffe, directors.

The company's holdings consist of ten patented claims, approximately 400 acres, situated north of Painkiller lake in the townships of Beatty and Coulson, district of Cochrane. The property, which was formerly owned by Hattie Gold Mines, Limited, and Beatty Gold Mines, Limited, is reached from Matheson on the T. and N. O. railway by a 13-mile road.

Recent work has been confined to what is known as the South shaft area. The South shaft is 570 feet in depth, with levels at 160, 300, 425, and 550 feet. Development work done on the 1st, 2nd, and 4th levels from September to the end of the year consisted of 373 feet of crosscutting, 1,050 feet of drifting, and 1,400 feet of diamond-drilling from surface. At the end of the year preparations were being made to sink a winze from the 550-foot level to open two new levels at 650 and 750 feet. Sinking was under way early in January, 1937.

The following additions were made to the mining plant during 1936: a new Ingersoll-Rand utility hoist for use at the winze, 3 new Gardner Denver rock drills, 2 Gardner Denver Duplex pumps, a 5,000-gallon oil-storage tank, and a 60 h.p. steam boiler.

The average number of men employed during the last four months of the year, when the mine was operated, was 31. H. Reinecke is resident mine manager. The mine address is Matheson.

Craig Gold Mines, Limited

Craig Gold Mines, Limited, was incorporated in May, 1934, with a capitalization of 5,000,000 shares of \$1 par value, of which 2,000,000 have been issued. The officers and directors are: F. W. Clements, president; W. N. Agnew, vice-president; M. P. Neighbor, secretary; F. J. Slater, treasurer; Geo. Scobell and E. A. R. Newson, directors. The head office is at 200 Bay Street, Toronto, and the mine office is at Madoc.

The company owns the Craig mine, consisting of 9 claims, in Tudor township, Hastings county.

During 1936 the mine operated on two shifts for 9 months. During this period the old No. 2 shaft was cleaned out and some exploration work was done on the 100-foot level. About 800 feet of drifting was accomplished on the 225-foot level off No. 1 shaft. A new hoist and cage were installed in No. 1 shaft. About 5,200 tons of rock was hoisted.

During the period of operation the average number of men employed was 17. S. Bolitho is in charge of operations, and E. B. E. de Camps is consulting engineer.

Crescent Kirkland Gold Mines, Limited

Crescent Kirkland Gold Mines, Limited, was incorporated in August, 1936, with a capitalization of 3,000,000 shares of \$1 par value. The officers and directors are: W. B. Robb, president; G. W. Morris, vice-president and managing director; H. A. Newman, vice-president; E. E. Meadows, treasurer; C. R. Belle-Isle, secretary; A. De Spirt and E. M. Murphy, directors. The head office is at 18 Toronto Street, Toronto.

The property, which was acquired from the Swastika Mining Company, Limited, and Teckotto Gold Mines, Limited, consists of 10 claims and a fraction, 365 acres, in Teck and Otto townships, Kirkland Lake area, district of Timiskaming.

Former operators sank an inclined shaft to 200 feet and a vertical, 3-compartment shaft to 400 feet. Levels were established at 35, 100, 200, 300, and 400 feet. A considerable amount of drifting and crosscutting and some stoping were done.

The present company reopened the property in September. The bunkhouse, cookery, and shops were rebuilt. The shaft collar, headframe, and shaft-house were reconditioned; and the shaft timber was repaired while the mine was being dewatered. New construction consists of a cottage, hoist-boiler room, pump-house, powder magazine, cap-house, carbide-house, and water tank. A steam and gasoline plant was installed, consisting of a 60 h.p. locomotive boiler, a 7- by 10-inch hoist, and a 310-cubic-foot gasoline compressor. Some 300 feet of trenching and 2,800 feet of diamond-drilling were done on surface. The mine was sampled, and development is being carried on.

An average of 30 men has been employed since September. The superintendent is H. A. Gauthier. The mine office is at Swastika.

Darkwater Mines, Limited

Darkwater Mines, Limited, was incorporated and organized in October, 1935, by Robb-Montbray Mines, Limited, to acquire and operate a group of 41 claims, known as the Beidelman claims, located at the south end of Sturgeon lake, district of Kenora, approximately 43 miles southeast of Sioux Lookout and 13 miles from W. O. Junction on the Port Arthur-Sioux Lookout branch of the Canadian National Railways. The authorized capitalization is 1,500,000 shares of \$1 par value, of which 1,117,943 were issued as at August 31, 1936.

The officers and directors are: R. A. Bryce, president and consulting engineer; T. O. Lyall, vice-president; L. Soliague, secretary-treasurer; C. C. Calvin, S. B. Playfair, and J. C. Beidelman, directors. The head office is 1001 Federal Building, 85 Richmond Street West, Toronto. The mine address is W. O. Junction, via Sioux Lookout.

Surface exploration and diamond-drilling were carried on during the fall of 1935 and the early part of 1936. The main showing is known as "A" vein and was found to be continuous for some 2,000 feet, varying in width from 1 to 16 feet. A shaft was sunk by hand to a depth of 52 feet on this vein, and it was then decided to sink a 3-compartment, 8- by 18-foot, vertical shaft and to crosscut into the vein. This shaft was commenced by hand steel in August, and a plant was installed. Sinking under power commenced on November 2. By the end of the year the shaft was at a depth of 312 feet, with stations cut at the 125- and 250-foot levels.

Surface buildings include an icehouse, 2 bunk-houses, cookery, 2 barns, staff-house, residence, office, warehouse, oil storage, hoist-room and power-house, blacksmith shop, dry-house, shaft-house, machine shop, and powder magazine.

Plant equipment includes an Ingersoll-Rand double-drum hoist, Ingersoll-Rand 1,200-cubic-foot compressor driven by a 250 h.p. Crossley Diesel engine, and a 100 h.p. oil-burning boiler.

In December there were 62 men employed, of whom 38 were underground. J. C. Beidelman is manager, and W. F. Gowans is mine superintendent.

Darwin Gold Mines, Limited

Darwin Gold Mines, Limited, was incorporated in August, 1934, with an authorized capitalization of 3,000,000 shares of \$1 par value. The officers and directors are: Geo. C. Royce, president; David Gross, Robert Fennell, R. E. Hore, and R. A. Darwin, directors. Corporation Management and Executives, Limited, is secretary-treasurer. The head office is at 330 Bay Street, Toronto. The mine address is Gold Park. The property is located in township 29, range 23, Michipicoten area, district of Algoma.

Work was continued throughout 1936. The 3-compartment, vertical shaft, started in July, 1935, was completed to a depth of 827 feet early in April. A station was cut at 494 feet and connected with the 5th level from the inclined shaft. New levels were established at 597, 702, and 800 feet. Open stopes were mined on the 3rd, 4th, and 5th levels.

The development work accomplished on the various levels during the year, and the total to the end of 1936, is as follows:—

Level	Drifting		Crosscutting		Raising	
	1936	Total	1936	Total	1936	Total
	feet	feet	feet	feet	feet	feet
2nd.....		640		106		50
3rd.....		957	456	887		347
4th.....		1,632		591	268	641
5th.....	619	1,264	159	209	1,126	1,238
6th.....	1,748	1,748	62	62	514	514
7th.....	1,760	1,760	146	146	314	314
8th.....	1,026	1,026	414	414	75	75

The 50-ton mill was operated throughout the year, and treated a total of 17,598 tons.

An average of 93 men was employed during 1936, of whom 53 were underground. M. H. Froberg was in charge of operations.

Delnite Mines, Limited

Delnite Mines, Limited, was incorporated in November, 1934, with an authorized capitalization of 3,000,000 shares of \$1 par value. The officers and direc-

tors of the company are: E. L. Koons, president; W. L. Marcy, vice-president; W. V. Moot, managing director; C. L. Ingham, treasurer; Jas. E. Day, Harry Yates, Jas. Savage, directors. W. S. Walton is secretary. The head office address is 603 Royal Bank Building, Toronto. The mine address is Timmins.

The company holdings consist of a block of 5 claims, 185.9 acres, in the township of Deloro, Porcupine area, district of Cochrane. Two claims, 86.6 acres, of the five now held were purchased in 1936 from Erie Canadian Mines, Limited.

Late in the summer of 1936 the decision was made by the management of the company to sink a new production shaft and to erect a 200-ton mill on the property. This work was commenced in October. During the year the following buildings were completed: assay office, a hoist- and compressor-building, miners' change-house, staff-house, office, boiler-house, and transformer house. In addition the concrete foundations were poured for mill, crusher-house, and permanent headframe. A temporary headframe was erected, and the sinking of a 3-compartment shaft had reached a depth of 289.5 feet at the end of the year.

The following is taken from the general manager's report for the fiscal year ending March 31, 1937.

During the year the underground work was continued at No. 1 shaft. In the first half of the year this work consisted of further lateral development and of proving up the vertical extent of the ore bodies by raises. In the second half of the year, after it had been decided to erect a mill and sink a new shaft, the work at No. 1 shaft consisted of driving connecting crosscuts to No. 2 shaft on the 250- and 375-foot levels, and also of stope preparation to meet mill requirements.

The No. 2 shaft, located 800 feet north of No. 1 shaft, is a 3-compartment, vertical shaft. It was commenced in the latter part of October. By the end of the year it had reached a depth of 662 feet. It is being continued to the 1,000-foot level, at which horizon it will be adjacent to the north-dipping vein area.

A summary of the work done during the year is shown in conjunction with all previous work:—

SUMMARY OF DEVELOPMENT AND EXPLORATION WORK, MARCH 31, 1937

	Drifting	Cross-cutting	Sublevel drifting	Raising	Shaft-sinking	Shaft stations	Total	Diamond-drilling
	feet	feet	feet	feet	feet	feet	feet	feet
To Mar. 31, 1936.....	4,248.5	2,502.5	391	91.5	7,233.5	16,278
Apr. 1, 1936, to Mar. 31, 1937	1,453	1,176	90	1,509	662	152.5	5,042.5	5,984
Total to Mar. 31, 1937....	5,701.5	3,678.5	90	1,509	1,053	244	12,276	22,262

Development Results

In the 5,701.5 feet of drifting done at the property since the beginning of operations, a total of 1,642 feet of ore has been developed, having an estimated average grade of 0.226 ounces¹ over an average width of 5.1 feet.

Diamond-Drilling

Some 5,984 feet of diamond-drilling was done during the year from underground workings. This drilling was done for the purpose of more fully exploring the vein area for parallel veins and for the downward extension of ore bodies below the 375-foot or present bottom level of the mine. This drilling located the 319 ore body in the fold area in the section northeast of the shaft, where later development by drifting and raising indicated a grade better than the mine average. The drilling done below the 375-foot level to explore the downward extension of the main vein indicated an ore situation at the 500-foot level similar to that developed on the 375-foot level.

General Plant and Mill Construction

In October the construction and installation of a complete new mining plant, a mill, and crusher-house was commenced at the No. 2 shaft site. Construction work proceeded on schedule throughout the winter, and by March all buildings had been erected and part of the equipment installed. The rated capacity of the mill is 200 tons. The mill and crusher-house buildings and

¹\$7.91 at \$35 per ounce.

the arrangement of equipment have been designed to provide space to conveniently add extra units to increase mill capacity.

For general plant, an electric mine hoist, capable of an ultimate rope pull of 11,000 pounds, and a compressor of 1,500-cubic-foot capacity were installed in a fireproof building. A boiler-house was erected, and a steam-heating system was installed. A new office and staff-house were erected. A substation was built, and three 300 k.v.a. transformers and switching equipment were installed. Electric power was taken from the Hydro-Electric Power Commission, resulting in a saving in power costs. A timber headframe with a steel ore bin was erected and housed. A machine shop was equipped. A water storage tank of 100,000-gallon capacity was erected, with mine water the present source of supply for plant requirements. Definite plans are in progress to provide an adequate supply of lake water for mill and plant, including fire protection services. A tailings dam 1,100 feet long was built to close the contours of a 25-acre area in which mill tailings will be impounded.

Previous to the commencement of construction, a new road 1.8 miles long, connecting the mine with the highway to Timmins, was graded and gravelled by the Ontario Department of Highways. This improved access to the property has been of material assistance to the operations.

Summary

The programme which has been carried out in the underground and surface construction work during the year has been directed towards bringing your property into production as economically as is consistent with good practice, while at the same time making provision for readily increasing both underground and milling operations.

The sinking of No. 2 shaft to the 1,000-foot level will provide five new levels on which development work will be commenced.

During 1936, the average number of men employed monthly was 68, of whom 37 were employed underground. W. S. Maguire was general manager and J. F. R. Akehurst, resident manager. After the end of the year Mr. Maguire found it necessary to resign in order to devote all his time to Sylvanite Gold Mines, Limited. He was succeeded by Kenneth C. Gray.

Deloro-Wright Syndicate

The Deloro-Wright Syndicate was organized in May, 1936. It is capitalized at 5,000 units having a par value of \$10 each. Approximately 4,200 units were issued during the year for property and for cash. The trustees of the company are C. Howard Lambert, who is also secretary, and Owen Wright. Other officers are Harry E. Goetzmann and Tiberius J. Wright. The head office address is 806 Dun Building, Buffalo, N. Y.

The company's holdings consist of 15 unpatented mining claims, situated in the southern part of Deloro township, Porcupine area, district of Cochrane.

Operations commenced at the property in June with surface exploration work and construction of a road to the property. This was followed by construction work and by shaft-sinking in August. A 2-compartment shaft was started by hand, but a small mining plant later speeded this work. The shaft was down 135 feet at the end of the year. The mining plant then included a 310-cubic-foot gasoline compressor, a 20 h.p. vertical-type boiler, and a 5- by 8-inch steam-driven hoist.

Buildings erected include log-cabin office, 18 by 20 feet; log cookery, 20 by 22 feet; log sleeping camp, 16 by 18 feet; log blacksmith shop, 12 by 14 feet; frame compressor house, 16 by 20 feet; frame carpenter shop, 18 by 20 feet; powder magazine; and headframe, 25 feet in height.

The average number of men employed on this operation was 22. Tiberius J. Wright is mine manager. The mine address is Timmins.

De Santis Porcupine Mines, Limited

De Santis Porcupine Mines, Limited, was incorporated in June, 1935, with an authorized capitalization of 3,000,000 shares of \$1 par value, of which 1,910,206 had been issued at the end of the year. The officers and directors of the company are: W. R. Dunbar, president; Jos. V. Friel, vice-president; G. Giustini, secretary-

treasurer; Peter De Santis, T. Pomeroy, Q. A. Shaw McKean, and Frank Prest, directors. The head office and mine office are at 24½ Second Avenue, Timmins.

The holdings of the company consist of 9 claims, 370 acres, in Ogden township, and 8 claims, 258 acres, in Turnbull township, Porcupine area, district of Cochrane. The Ogden township property, on which activities are now centred, lies 4½ miles southwest of Timmins. There are two shafts on this property. No. 1 shaft, 210 feet in depth, has two levels at 90 and 200 feet. On the former 327 feet of drifting and crosscutting have been done; on the latter the same work amounts to 3,991 feet. In 1935, No. 2 shaft, 3 compartments, was started. It was raised from the 200-foot level to surface and timbered, and a substantial square-timbered headframe was erected over it. Operations were suspended at this stage of the work in December, 1935, and it was not until May, 7, 1937, that work was resumed. Shaft-house installations and the construction of a power-house building were then completed; a new Canadian Ingersoll-Rand 830-cubic-foot, electrically driven compressor and a new Canadian Ingersoll-Rand double-drum hoist and motor were installed; a new substation building was completed and equipped; and a new magazine and water supply tank were erected.

On completion of construction work, sinking below the 200-foot level was begun and was carried to depth of 480 feet, and two new levels were established at 325 and 450 feet. Crosscutting and drifting were proceeding on these levels at the end of the year. The amount of work then done amounted to 185 feet of crosscutting and 150 feet of drifting. About 700 feet of diamond-drilling was done in 1936. The average number of men employed in 1936 was 24. G. McCracken succeeded H. McQuarrie as mine superintendent in December.

Dome Mines, Limited

Dome Mines, Limited, has an authorized capitalization of 1,000,000 shares of no par value, all of which have been issued. Of the issued shares 26,666 are held in trust for the company, and the dividends on these are returned to the treasury.

The officers of the company are: Jules S. Bache, president and treasurer; G. C. Miller, first vice-president; Morton F. Stern, second vice-president; J. H. Stovel, third vice-president; Alex. Fasken, secretary; E. P. Goetz, assistant treasurer and assistant secretary; C. C. Calvin, assistant secretary; John B. Robinson, assistant secretary.

The directors of the company are: Jules S. Bache, Alex. Fasken, G. C. Miller, Dwight B. Lee, G. H. Harris, Morton F. Stern, Frank E. Maulson, Frederick Burnett, and Simon N. Stein.

The president's office is at 42 Broadway, New York. The secretary's office is at 36 Toronto Street, Toronto. The mine office, mine, and works are at South Porcupine, in the townships of Tisdale and Whitney, Porcupine area, district of Cochrane. The property consists of 52 patented claims containing 2,085 acres.

The following is taken from the president's report for the fiscal year ending December 31, 1936:—

No change has taken place in the authorized capital stock of the company. Of the 46,666 shares held in trust for the company as of December, 1935, 20,000 shares were used in part satisfaction of the purchase price of Schumacher veteran claim, reducing the number of shares so held to 26,666. These shares are held under agreement with the Trusts and Guarantee Company, Limited, in trust for the company, and dividends on these shares are returned to the treasury of the company as and when paid.

The net operating profit, before deducting depreciation and income taxes for the year, was \$4,749,521.84.

Your directors are pleased to report that the net excess of current assets (bonds at market price, shares at cost) over current liabilities (including dividends payable January 20 and April

20, 1937, \$973,334) is the sum of \$6,969,534.19, which includes the sum of \$3,026,979.36 set apart as a dividend assurance fund.

During the year the Schumacher veteran claim (approximately 160 acres) lying immediately north of the original Dome claims, was purchased, the consideration being \$1,125,000 and 20,000 shares of Dome Mines, Limited. Developments since that time are such that we have no hesitation in saying that this purchase will be amply justified.

The following is taken from the report of the general manager for the year ending December 31, 1936:—

During the year 673,800 tons were hoisted; of this 553,900 tons was ore which was sent to the mill and treated, and 119,900 tons was waste which was brought to the surface and dumped into the old open pit. In addition, 24,500 tons of waste was dumped into old stopes.

The 553,900 tons of ore milled yielded bullion containing 206,933.882 ounces of gold, the yield being 0.3736 ounces or 7.472 dwt. per ton. In addition the by-product or recovery plant produced 1,594.34 ounces.

All values of ore, etc., will be expressed in pennyweights (dwt.) throughout this report. One pennyweight equals one-twentieth of an ounce, Troy weight.

The following statement gives particulars of revenue and expenditure for the year under review:—

OPERATING STATEMENT

For the year ended December 31, 1936

EARNINGS:

Bullion production (after deducting Mint charges—\$80,778.19) \$7,234,389.70

OPERATING AND MAINTENANCE EXPENDITURE:

Development and exploration	\$821,832.93
Mining, including hoisting	793,318.65
Crushing and conveying	110,509.12
Milling	503,127.76
Bullion expense	9,702.93
Fire protection	7,705.46
Warehouse expense	13,390.38
Auditing expense	3,083.46
Administrative expense:	
Mine office	88,855.77
Executive office	68,575.11
Registrar and transfer fees and expenses	18,183.32
Municipal taxes	24,804.59
Insurance	15,682.89
Ontario corporation capital tax	6,095.49

2,484,867.86

NET OPERATING PROFIT FOR THE YEAR \$4,749,521.84

The Ankerite stopes produced 54,600 tons of an average grade of 6.16 dwt. During the year most of the work was confined to the upper level stopes. Stope No. 950 is being mined on for a length of 1,078 feet, and stope No. 1,058 has now a length of 980 feet. In neither case do we know that we are definitely at the end of the ore. While narrow, these ore bodies have shown surprising continuity, and it is to be noted that the purchase of the Schumacher veteran claim has protected the development of these veins below our 16th level.

After the purchase of the Schumacher veteran claim was made late in May, 1936, development of the Schumacher area adjacent to our old workings on the 10th, 11th, 12th, and 13th levels was pushed, and results to date have been excellent, 40,877 tons of ore of an average grade of 11.11 dwt. per ton having been produced from development work and from the silling out of stopes.

The balance of the mining was pretty well scattered all over the mine, but special attention was given to mining out the upper levels. Other stopes not drawn during the year contain 166,742 tons.

Development

Approximately 31,000 feet of shaft-sinking, shaft stations, drifting, crosscutting, winzing, raising, and box-holing was done during the year. Of this, 9,250 feet was done in connection with No. 6 shaft, details of which will be given later in this report. Diamond-drilling amounting to 42,147 feet was done during the year.

Practically all the development work, done in connection with finding ore, was above the 16th level. This work, with exception of that done on the Schumacher veteran claim, was mostly done in connection with known ore bodies, or extensions of same. Development work in connection with ore was abandoned temporarily on the 23rd level, and the levels lying below that, because it is felt that this area can be more efficiently developed from the No. 6 internal shaft when this is completed.

The following table gives details of the development accomplished during the year:—

SUMMARY OF DEVELOPMENT BY LEVELS FOR YEAR 1936

Level	Stations	Drifts	Cross-cuts	Drift and crosscut slashing	Raises	Winzes	Internal shaft	Box-holes	Raises, winzes, and box-hole slashing	Total	Diamond-drilling
	feet	feet	feet	feet	feet	feet	feet	feet	feet	feet	feet

No. 6 Internal Shaft

Work on this project was continuous throughout the year. The shaft was raised 156 feet above the 16th level and steel shaft sets and bearing beams for sheave wheels installed. Haydite slab lagging was used in place of the usual plank lagging, so that the shaft itself is entirely fireproof above the 16th level. Ore and waste pockets were excavated and connected with the shaft and lined with concrete and steel where necessary. Two large chambers, one for the cage-hoist and one for the skip-hoist, were excavated and protected by steel timbering with Haydite slabs for lagging. Two raises for ropeways between the hoists and the sheave wheels were driven. A large service station, lined with steel and concrete, was completed at the shaft and in a nearby drift a large excavation was made to serve as a storage yard for this shaft.

The installation of the cage-hoist and of the necessary electrical equipment for same was completed early in August, and since August 15 this hoist has been regularly in service as the shaft-sinking hoist. The skip-hoist was being installed at the end of the year.

Shaft-sinking was commenced on August 15, and at the end of the year the shaft was down 805 feet and stations had been cut on the 17th, 18th, 19th, 20th, and 21st levels. Where old workings existed, as on the 18th, 23rd, 24th, 25th, 26th, and 27th levels, the scheme of development has been that a drift shall be driven to connect the old workings to the shaft and a shaft station shall be excavated before the shaft reaches any of these levels. This programme is being carried out as planned.

All this work in 1936 involved the equivalent in excavation of 9,256 feet of drifting, cross-cutting, shaft-sinking, and raising. Of this, 5,159 feet was charged directly to No. 6 shaft, while the balance, 4,097 feet, was absorbed in our ordinary development charges.

Too much praise cannot be given to the mine, the mechanical, and the engineering staffs for the splendid way this operation has been carried on. The work was carried forward smoothly and efficiently, and despite the fact that it was a major operation in itself it has never interfered with the regular production of ore. It is an accomplishment of which all connected with may well be proud.

Ore Production

Of the tonnage milled the stopes yielded 465,500 tons, averaging 7.90 dwt. per ton, and development work yielded 88,400 tons, averaging 6.12 dwt. per ton, a total of 553,900 tons, averaging 7.6189 dwt. per ton.

Ore Reserves

The ore reserves are estimated at 2,250,000 tons. This includes 754,300 tons of broken ore but does not include 300,000 tons indicated as probable ore between the 23rd and 25th levels. The reserves include 316,000 tons developed in the Schumacher veteran claim. The increase in ore reserves can mainly be attributed to the ore we were able to quickly develop on this claim, as this ore lay adjacent to our old workings. While it is expected that much more ore will eventually be won from the Schumacher ground, the development of same will not be nearly as quickly done as it was in 1936.

Mill

The following are the results of the mill operations during the year, from a total of 553,900 tons treated:—

	Value per ton	Extraction per cent.
Heads	dwt. 7.6189
Recovery	7.472	98.07

The small plant treating old iron and other mill refuse produced 1,594.34 ounces.

Exploration

Considerable field work was done during the season, but no new properties were taken up.

Sigma Mines, Limited

During 1936 this property was continuously developed. A total of 13,340 feet of drifting, crosscutting, raising, winzing, and shaft-sinking was done. The total of such development on this property is now 22,043 feet. During the year 16,943 feet of diamond-drilling was done, the total of such work on the property now being 42,679 feet. No. 2 shaft was sunk to the 8th level, 975 feet in depth, and suitable ore and waste passes were established below this level. Stations for the shaft were also cut at the 5th level (600 feet), 6th level (725 feet), and 7th level (850 feet). All these levels will be connected to the loading station below the 8th level by ore and waste passes. No lateral development has been done, as yet, below the 4th level, but the diamond-drilling that has been done indicates the probable extension of the ore shoots to the 8th level.

Early in the year Dome Mines, Limited, completed its payments on the original agreement with Read-Authier Mine, Limited, and thus acquired a 60 per cent. interest in Sigma Mines, Limited. Since then, the further work and construction of the mill has been financed on a 60-40 basis by Dome Mines, Limited, and Read-Authier Mine, Limited. In all, \$800,000 was provided in 1936, and it is felt that a further \$200,000 to be raised on a similar plan will complete, or very nearly complete, the placing of this property on a sustaining basis.

Costs

The expenditure on mining was \$793,318.65, or \$1.43 per ton milled. The expenditure on development was \$821,832.93, or \$1.48 per ton milled, but of this amount approximately 57 cents was chargeable directly to the major development on the 16th level.

The operating costs for the year were \$4.486 per ton milled, as against \$4.143 for the year 1935. If we deduct the 57 cents referred to in the previous paragraph, the actual operating costs for the year were \$3.916 per ton milled.

General

The following information, while not pertinent to a report on operations, may prove interesting to the shareholders. The wage and salary pay-roll for 1936 at the mine amounted to \$1,438,142. The average number of men employed was 790. The average wage earned, excluding the higher paid executives, was \$5.32 per day. No information is available as to how this money is expended, but the purchase of fuel, food, clothes, books, furniture, cars, radios, etc., would account for the larger part of it and thus means employment to many more men all over Canada.

The money expended for supplies and equipment in 1936 was \$1,406,979. This was distributed approximately as follows:—

	Total	Per cent.
Ontario	\$926,855	65.88
Canada (excluding Ontario)	378,028	26.87
Great Britain	79,671	5.66
United States	22,425	1.59

Among the larger items, we purchase coal from Nova Scotia and Alberta; explosives and drill parts from Quebec; timber from British Columbia; cyanide, drill-steel, and drill parts from Great Britain; and drill parts and electrical safety lamps from United States. It is safe to say that there is no province of Canada which is not called upon to supply part of our needs.

Capital Expenditure

The details of changes in capital assets for 1936 are as follows:—

	Increase	Decrease
PART OF BED OF EDWARDS LAKE.....	\$500.00	
SCHUMACHER VETERAN CLAIM (160 acres):		
20,000 shares valued at	\$1,000,000.00	
Cash.....	1,159,023.67	
	2,159,023.67	
	\$2,159,523.67	
Less: Cash received from Foley O'Brien Corporation, Limited	3,421.42	
	\$2,156,102.25	
SIGMA MINES, LIMITED:		
Expenditures on operations for which shares		
have been taken down.....	\$61,160.17	
Advances and accrued interest thereon.....	487,555.05	
	548,715.22	
MINE BUILDINGS, MACHINERY, AND EQUIPMENT:		
Change-house addition.....	4,630.60	
Prospector gas drill.....	1,200.00	
Timber framing shed addition.....	1,390.62	
Steel-sharpening shop addition (in part).....	3,671.46	
No. 6 shaft machinery and equipment.....	\$201,694.48	
Less: Charged in year 1935.....	8,370.98	
	193,323.50	
REDUCTION BUILDINGS, MACHINERY, AND EQUIPMENT:		
Rubber-lined pumps.....	765.00	
Texrope drive.....	157.00	
Electric motor.....	381.79	
Acid storage tank and equipment.....	3,426.81	
Ball mill and classifier.....	809.43	
American filter written off.....		\$12,025.50
CAMPS AND GENERAL BUILDINGS AND EQUIPMENT:		
New cookery.....	13,151.90	
Electric calculating machine.....	595.00	
Additions to dwellings.....	2,751.95	
Curling-rink addition.....	2,700.00	
48 Bathrooms in Dome Extension dwellings.....	14,899.16	
48 Porches on Dome Extension dwellings.....	4,320.00	
Written off:		
Bunk-house and equipment.....		28,363.84
Old cookery and equipment.....		13,207.32
Electric calculating machine.....		266.50
Imperial 8 Chrysler sedan.....		3,080.37
OTHER MACHINERY AND EQUIPMENT:		
Cummins Diesel engine.....	2,628.00	
	\$2,955,619.69	\$56,943.53
Written off plant.....	56,943.53	
Net increase.....	\$2,898,676.16	

The average number of employees in 1936 was 790, of which 495 were employed underground and 66 in the mill.

J. H. Stovel is general manager, and Robt. E. Dye is assistant mine manager.

Duport Mining Company, Limited

The Duport Mining Company, Limited, was incorporated in January, 1929, with an authorized capitalization of 2,000,000 shares of no par value. The officers and directors are: J. G. Cross, president; Thayer Lindsley, vice-president; W. J. Matthews, secretary-treasurer; W. C. Robinson and R. V. Whiteside, directors. The head office is at 504 Public Utilities Building, Port Arthur. The mine address is Machin.

The property held by this company includes the Cameron Island mine, located at Shoal lake, district of Kenora. It is about 28 miles southwest of Kenora by air.

Underground operations were continued at this property during the first nine months of 1936, and development work consisted of deepening the winze 125 feet from the 3rd to the 4th level, with 78 feet of drifting, 33 feet of cross-cutting, and 62 feet of raising on the 3rd level, and 511 feet of drifting, 358 feet of crosscutting, and 20 feet of raising on the 4th level.

During the year, shipments of ore totalling 698 tons were made to the American Smelting and Refining Company at Tacoma, Wash., and to the Hudson Bay Mining and Smelting Company at Flin Flou, Man. The ore yielded 2,476 ounces in gold and 606 ounces in silver.

The plant included an 84 h.p. boiler, a 40 h.p. boiler, a 300-cubic-foot steam compressor, a 500-cubic-foot Diesel compressor, a 7- by 9-inch hoist on surface, and a 6- by 8-inch hoist underground.

Work was discontinued in September pending reorganization of the company. During the first eight months of 1936 there was an average of 24 men employed, of whom 16 were underground, under the direction of J. G. Cross.

Edgelake Gold Mining Company, Limited

The Edgelake Gold Mining Company, Limited, was incorporated in September, 1934. The authorized capitalization is 3,000,000 shares of \$1 par value. The officers and directors are: P. B. Cameron, president and mine manager; J. A. Picotte, vice-president; J. M. Forbes, secretary; K. G. Cameron, treasurer; Robert McKinnon and H. Turcotte, directors. The executive office address is Box 128, Schumacher. The mine address is Tashota.

The property consists of 10 claims, approximately 400 acres, surrounding the west end of Tashota lake, 1½ miles north of Tashota station on the trans-continental line of the Canadian National Railways, district of Thunder Bay.

During 1936, with an average of 4 men per month, the assay office was equipped, a second 50 h.p. boiler installed, and the installation of a 25-ton amalgamation mill commenced with the purchase of a Tremaine 2-stamp unit. Shaft timber was cut and framed, and a large supply of fuel was cut, in preparation for underground work sometime in 1937.

P. B. Cameron, the president of the company, is in charge of operations.

Ed. Hargreaves Kirkland Gold Mines, Limited

Ed. Hargreaves Kirkland Gold Mines, Limited, was incorporated in August, 1934, with a capitalization of 3,000,000 shares of \$1 par value, of which 1,552,552 have been issued.

The officers and directors are: F. J. Zuck, president; C. W. Zuck, vice-president; H. M. Willis, secretary-treasurer; S. A. Waugh, director. The late J. A. MacVichie was a director and manager at the mine. The executive office is at 67 Yonge Street, Toronto. The mine office is at Kirkland Lake. The property

consists of 5 claims, 191 acres, in Lebel township, Kirkland Lake area, district of Timiskaming.

During the year, the plant was reconditioned, the shaft dewatered and repaired, and a new office and residence built. The shaft was sunk a distance of 130 feet to an approximate depth of 300 feet.

An average of 19 men was employed from June to December. The manager, J. A. MacVichie, died early in December, and the property was closed down on December 19, 1936.

Edwards Gold Mines, Limited

The capitalization of Edwards Gold Mines, Limited, was increased from 2,000,000 to 3,000,000 shares of \$1 par value in December, 1936. The officers and directors are: H. C. Orton, president; E. A. Fitz, first vice-president; J. B. Kleckner, second vice-president; H. H. Huevelman, secretary-treasurer; Murdoch L. Martyn, assistant secretary; W. S. Johnston, F. E. Matthews, Neill Richards, H. C. Miller, O. G. Schrup, S. F. Weiser, and C. J. Schrup, directors. The Toronto office is at 372 Sterling Tower, Toronto.

The property is located in township 48, Goudreau area, district of Algoma, about 6 miles by road from Lochalsh.

Underground operations were resumed in February, 1936, after a suspension of eight months. They were suspended in June and again resumed in October, and carried on for the balance of the year.

During the suspension of underground work from June until October a 5½-mile power line and a 75-ton amalgamation mill were constructed. The mill equipment, including a 9- by 16-inch jaw crusher, Marcy ball mill, Akins classifier, Wilfley table, two blanket tables, and amalgamation equipment, was put in operation on October 20, and treated a total of 1,690 tons of ore from the surface dump during the balance of the year.

The 2-compartment, 80-degree shaft was sunk an additional 200 feet, to a total depth of 300 feet. A level was established at 200 feet, and a station was cut at 300 feet. A total of 40 feet of drifting was done on the 100-foot level, and 50 feet of drifting, and 55 feet of crosscutting were done on the 200-foot level.

An Ingersoll-Rand 624-cubic-foot electric compressor was installed to replace two gasoline compressors. The gasoline hoist was replaced by a 10- by 12-inch, single-drum steam hoist at the start of 1936 work. It was later converted to electricity.

An average of 32 men was employed under the direction of J. A. S. Roussac. The mine address is Lochalsh.

Elizabeth Gold Mining Company, Limited

The Elizabeth Gold Mining Company, Limited, was incorporated in February, 1936, to succeed the Elizabeth Gold Syndicate. The authorized capitalization is 2,000,000 shares of \$1 par value, of which 963,050 shares have been issued. The officers and directors are: Wm. L. Doyle, president; C. D. Cummings, vice-president; W. L. Anderson, secretary-treasurer; T. B. Jones, Wm. Kerber, C. A. Mills, P. A. Porter, Jr., and A. L. Eskelson, directors. The Mining Research Corporation, Limited, Toronto, are consulting engineers. The head office is at 9 Adelaide Street East, Toronto. The mine address is Atikokan.

The property includes 480 acres of unpatented claims and 373 acres of patented claims, on which is situated the old Elizabeth mine. It is located about 3 miles north of the Fort Frances branch of the Canadian National Railways, about 4 miles west of Atikokan, district of Rainy River.

The Elizabeth mine was discovered in 1900 and worked until 1903. It was again worked during parts of 1912, 1913, and 1914. A 10-stamp mill was installed in 1902. The old workings include a shaft 270 feet deep, with levels at 65, 120, and 235 feet, with a total of 1,200 feet of lateral work. In addition there is a second shaft, about 500 feet south of the main shaft, which was sunk to a depth of 110 feet, with about 115 feet of lateral work on the 85-foot level.

The plant included a 25 h.p. Marine boiler, two 40 h.p. boilers, a 60 h.p. boiler, a 26-inch drum steam hoist built by the James Cooper Manufacturing Company, and a 226-cubic-foot Rand steam compressor.

During January and February the present company employed 4 men building camps, and from this time to July 15, 10 men were employed doing assessment work and reconditioning parts of the old plant. Work was then suspended for the rest of the year. In October there was a reorganization of the officers and directors of the company, at which time the present board was elected.

Early in the year a road was built to the property from mileage 5, west of Atikokan, and a power line was constructed, tapping the main line of the Seine River Improvement Company. Equipment purchased and delivered to the property included a 9- by 12-inch Blake jaw crusher and a 4- by 7-foot Allis-Chalmers ball mill.

Future plans call for pumping out the old workings and a complete examination of the veins. W. N. McClintock is in charge.

Elora Gold Mines, Limited

Elora Gold Mines, Limited, was incorporated in August, 1935, with an authorized capitalization of 3,000,000 shares of \$1 par value, of which 1,810,005 shares were issued as at November, 1936. The officers and directors are: P. C. Finlay, president; O. M. Partridge, secretary-treasurer; W. S. Morlock, J. Ingram, P. F. Osler, E. W. T. Gill, and W. J. McDonough, directors. The head office is at 603 Royal Bank Building, Toronto. The mine address is Gold Rock, via Wabigoon.

The property includes eight patented and two unpatented claims on the northeast shore of Trafalgar bay, Upper Manitou lake, district of Kenora. It is located about 27 miles south of Wabigoon on the main line of the Canadian Pacific railway and is reached in summer by a water route from Wabigoon, or all year round by airplane from Dryden.

Claim H. P. 371 is the old Laurentian claim and has been operated since 1900 by such companies as Laurentian Gold Mines, Limited; Great Golconda Gold Mines, Limited; Imperial Gold Mines, Limited; and Anthony Blum Gold Mines, Limited. In 1908, a 20-stamp amalgamation mill was installed, and when the property was shut down in 1909 total production was valued at \$155,000. Toward the end of 1936, the present company opened up the Jubilee vein, which had been originally discovered by a 300-foot crosscut from the old 400-foot shaft sunk on the Laurentian claim. This vein strikes southwest and outcrops on the adjoining claim, H. P. 301. The old 20-stamp amalgamation mill was overhauled and equipped with tables and blankets and powered by a 332 h.p. Ruston-Hornsby Diesel engine. During the last three months of 1936, the test mill treated 1,365 tons for a recovery of \$8,594.

Following this bulk sampling from the open cut, a 3-compartment, vertical shaft was spotted 50 feet west of the open cut and sinking was commenced on December 18. By December 31, the shaft had reached a depth of 68 feet, and it was planned to establish a level at 165 feet for the purpose of exploring the vein underground.

New buildings erected on the property included the shaft-house, powerhouse, hoist-room, blacksmith shop, dry-house and office. The original buildings on the property being used are two bunk-houses, cookery, residence, and mill.

The mining plant installed includes two 68 h.p. return tubular boilers, Gardner Denver 400-cubic-foot portable compressor driven by a 127 h.p. Caterpillar Diesel engine, and an 8- by 6-inch, single-drum steam hoist.

At the end of the year there were 61 men employed, with 20 underground, under the direction of J. G. Harkness.

Empress Consolidated Gold Mines, Limited

Empress Consolidated Gold Mines, Limited, was incorporated in March, 1936, with an authorized capitalization of 3,000,000 shares of \$1 par value, of which 1,900,000 shares have been issued. The officers and directors are: Chas. Desrosiers, president and managing director; Chas. B. Owens, vice-president; G. B. Hodgson, secretary-treasurer; R. A. Whitely and Wm. W. Jackson, directors. The head office is at 1501 Royal Bank Building, Toronto. The mine address is Jackfish.

The property acquired by the company includes the two patented mining locations R.567 and R.569, formerly known as the Jackfish or Empress mine, township S2, district of Thunder Bay.

The Empress mine was discovered in 1895 and was worked until 1897 by Peter McKellar, of Fort William. At this time an adit was driven on the vein from the south side of the hill on which the showing occurs, with about 450 feet of crosscutting and drifting from the adit. From the drift driven east from the adit, closest to its mouth, a winze was sunk to a depth of 90 feet. On the east side of the hill a second adit was driven west for about 100 feet into the hill, with 40 feet of other lateral work branching from it.

The plant at that time consisted of a 6-stamp amalgamation mill, two 40 h.p. boilers, a straight-line steam engine, and a straight-line compressor. This has since been damaged by fire.

The present company commenced work in March, 1936, to explore the veins in the vicinity of the old workings. Work was continued throughout the year, during which time stripping was carried on with the aid of a 4-inch and a 6-inch hydraulic monitor, connected by leads to Kitty lake, on top of the hill, about 180 feet above the location of the work. At the end of the year, a total of from 15,000 to 20,000 cubic yards of overburden had been removed, and sampling was commenced underground and on surface.

Equipment on the property included 2 Sullivan gasoline diamond-drills, a 100-cubic-foot compressor, and a fully equipped assay office.

There were 30 men employed under the direction of Chas. Desrosiers.

Ensign Gold Mines, Limited

Ensign Gold Mines, Limited, was incorporated in April, 1934, with an authorized capitalization of 1,500,000 shares of \$1 par value. The officers and directors are: B. M. Hill, president; Colin A. Campbell, vice-president; W. R. Salter, secretary-treasurer; R. J. Mitchell, J. A. Griffith, and Alex. McDougall, directors. The head office is at 112 Yonge Street, Toronto.

The property includes the old Shakespeare mine, lot 5, concession I, Shakespeare township, district of Sudbury, where previous operators had sunk a 340-foot shaft and opened up 6 levels at 50-foot intervals.

In September, 1936, the old workings were dewatered and thoroughly sampled. Operations were suspended at the end of November, with the exception

of keeping the mine dewatered. It is planned to start a diamond-drill campaign early in 1937.

An average of 13 men was employed during the working period. A gasoline compressor was used to operate the pumps. The mine address is Webbwood.

Falcon Gold Mines, Limited

Falcon Gold Mines, Limited, was incorporated in September, 1935, with an authorized capitalization of 2,500,000 shares of \$1 par value. The officers and directors are: Lionel Brooke, president and managing director; C. H. Hitchcock, vice-president; S. E. Cassan, secretary-treasurer; W. G. Chapman and J. Elliott, directors. The head office is at 200 Bay Street, Toronto. The property is located in Falconbridge township, district of Sudbury.

Work was resumed in June, 1936, after a suspension of six months. An Ingersoll-Rand 665-cubic-foot compressor, driven by a 135 h.p. Ruston-Hornsby Diesel engine, was installed, together with an 8- by 10-inch Jenckes hoist. Shaft-sinking was started in mid-July. The old 46-foot, 2-compartment, vertical shaft was sunk to a total depth of 215 feet. Levels were established at 100 and 200 feet.

All work was stopped in October, after 175 feet of drifting and 66 feet of crosscutting had been done on the 100-foot level, and 16 feet of crosscutting on the 200-foot level.

An average of 19 men was employed during the period of operation. E. Harris was in charge.

Faulkenham Lake Gold Mines, Limited

Faulkenham Lake Gold Mines, Limited, was incorporated July, 1936, with an authorized capitalization of 3,500,000 shares. The officers and directors are: Colin A. Campbell, president; T. W. Dean, vice-president and managing director; W. M. Gordon, secretary-treasurer and director; E. K. Twombly and F. P. Davis, directors. The head office is at 702 Reford Building, Toronto. The mine address is Red Lake.

The property held by the company includes claims K.R.L. 12,858-12,866, 13,875-13,883, totalling about 800 acres in Baird township, Red Lake area, Patricia portion of Kenora district.

In November, subsequent to surface exploration and diamond-drilling, a 2-compartment, vertical shaft was sunk to a depth of 24 feet and collared. The month of December was spent in erecting camps and installing the mining plant, which includes two 180 h.p. boilers, a 600-cubic-foot compressor, and an 8- by 6-inch steam hoist.

At the end of the year, there were 17 men employed under the direction of A. H. Honsberger.

Franklin Gold Mines (1936), Limited

Franklin Gold Mines (1936), Limited, was incorporated in October, 1936. The authorized capitalization is 3,500,000 shares, 700,000 of which were paid to the Franklin Gold Mining Company, Limited, as consideration for the property and assets. The officers and directors are: G. M. Gray, president; P. H. Austin, vice-president; and E. M. Hoult, secretary. The head office is at 320 Bay Street, Toronto. The mine address is Kenora.

The property was originally owned by Ontario Champion Mines, Limited, and is situated 8 miles east of Kenora in Haycock township, district of Kenora.

Previous operators sank a 2-compartment, 55-degree shaft to a depth of 230 feet, with 225 feet of lateral work on the 130-foot level and 120 feet of lateral

work on the 230-foot level. A 120-foot adit was also driven to intersect the shaft at a depth of 70 feet. A 70-foot section was stoped out to a height of 50 feet on the 130-foot level. Underground work was resumed at this property in February, 1936, and continued until April, when it was again suspended until August and then resumed until November. During the first period of operation in 1936, 170 feet of drifting was done. During the second period 96 feet of crosscutting and 123 feet of drifting were done.

The plant on the property includes two 40 h.p. locomotive-type boilers, Allis-Chalmers 10- by 12-inch, single-drum hoist, and Gardner 400-cubic-foot compressor.

An average of 12 men was employed during the periods of operation, under the direction of H. L. McClelland.

Frontier Red Lake Gold Mines, Limited

Frontier Red Lake Gold Mines, Limited, was incorporated in May, 1934, with an authorized capitalization of 3,000,000 shares of \$1 par value. The officers and directors are: A. J. Doane, president; W. S. Hall, secretary-treasurer; A. C. Stevens, W. J. Boland, and R. C. Gamble, directors. The head office is at 347 Bay Street, Toronto. The mine address is Cole P.O.

The property consists of claims K.R.L. 10,393-10,396, 10,420-10,423, and 11,064-11,066, in the township of Todd, Patricia portion of Kenora district. It is located one mile east of the eastern shore of Pipestone bay at the west end of Red lake, and may be reached by air, flying 16 miles due west of the town of Red Lake, or by a 22-mile water route.

In February, 1936, the property was optioned jointly by Bagamac Rouyn Mines, Limited, and Bunker Hill Extension Mines, Limited. On September 15, following surface exploration and diamond-drilling, a 2-compartment, 7- by 12-foot, vertical shaft was commenced on claim No. 10,395 and sunk to a depth of 244 feet, with levels at 130 and 230 feet. Lateral work accomplished consisted of 144 feet of drifting and 61 feet of crosscutting. Operations were discontinued on December 15.

Surface buildings on the property include a bunk-house, dry-house, cookery, office, power-house, blacksmith shop, shaft-house, and powder magazine. The plant equipment includes a 40 h.p. locomotive-type boiler, 7- by 10-inch single-drum hoist, Gardner Denver 360-cubic-foot compressor driven by a model D.13,000 Caterpillar Diesel engine, and a 1½ k.w. electric power generator, steam-driven.

During the period of work there was an average of 27 men employed, of whom 8 were underground, under the direction of D. C. Kemerer.

Garrcon Mines, Limited

Garrcon Mines, Limited, was incorporated on May 11, 1936, with an authorized capitalization of 3,000,000 shares of \$1 par value, of which 850,000 were issued to vendors and 1,455,544 to the Consolidated Mining and Smelting Company of Canada (to December 28, 1936). The head office is at 302 Bay Street, Toronto. The officers and directors of the company are: W. M. Archibald, president; E. G. Montgomery, vice-president; M. A. Wolfkill, secretary; Jas. E. Riley, J. McKenzie, and L. A. Lillico, directors. C. Downey is manager.

The holdings of the company comprise a group of 9 surveyed claims in Garrison township, district of Cochrane. Access to the property is by way of a 33-mile motor road from the village of Matheson on the T. and N. O. railway. The mine address is Matheson.

Operations are carried on under the direction of the Consolidated Mining and Smelting Company of Canada. A report of the work done on the property appears on page 118 of this report.

Gillies Lake-Porcupine Gold Mines, Limited

Gillies Lake-Porcupine Gold Mines, Limited, was incorporated in January, 1933, with a capitalization of 2,000,000 shares of \$1 par value, of which 1,937,569 had been issued at January 8, 1937. The company acquired property from Porcupine United Gold Mines, Limited. The officers and directors of the company are: B. N. Hyman, president; R. M. Stanley, vice-president; Samuel B. Darlich, secretary; F. O. Tidy, treasurer; A. R. Sproule, C. D. Manuel, John Corcoran, Wm. J. Kam, and Dr. H. H. Moore, directors. The head office is at 9 Toronto Street, Toronto. The mine address is Timmins.

The property consists of 6 claims, 226 acres, in Tisdale township, Porcupine area, district of Cochrane. The group of claims are adjacent, on the north and west, to the Hollinger and McIntyre properties. The shaft and all development work done underground are on the most southerly claim of the group, the north-east quarter of the north half of lot 11, concession II, Tisdale township. The depth of the shaft is 947 feet. The mine levels are at 100, 300, 500, 800, and 925 feet.

DEVELOPMENT WORK

	To December 31, 1935	1936	Total
	feet	feet	feet
Shaft-sinking	947	947
Winzes, west	40	40
Winzes, east	29	100	129
Crosscutting	3,122	1,051	4,173
Drifting	3,208	417	3,625
Raising	143	504	647
Diamond-drilling ¹	3,612	3,612

¹Data on diamond-drilling done by former companies not available.

The 50-ton mill operated throughout 1936. Production figures follows:—

	Tons	Fine ounces gold
To end of 1935	19,304	6,735.342
1936	18,410	4,851.982
Total	37,714	11,587.322

¹Production for December, 1936, based on the company's assays of bullion and not Mint returns.

The average number of men employed at the mine in 1936 was 72. Bernard N. Hyman is general manager. The resident manager is J. P. Dick.

Glenora Gold Mines, Limited

Glenora Gold Mines, Limited, was incorporated in June, 1933, with a capitalization of 4,500,000 shares of \$1 par value, of which 3,900,000 have been issued.

The officers and directors are: T. J. Day, president; S. G. Tobin, vice-president; A. T. McCabe, secretary; J. A. McFayden, treasurer; O. B. Rigby,

Forbes Geddes, G. M. Wilton, directors. The head office is at 85 Richmond Street West, Toronto.

The property consists of 6 patented claims, 230 acres, formerly owned by the London Gull Lake Mines, Limited, in Lebel township, Kirkland Lake area, district of Timiskaming.

Work on the property was started in February. During the year, 2,000 feet of surface trenching was done and a complete mining plant installed. A 3-compartment shaft, 6 by 11 feet, was sunk from surface to 465 feet, with levels at 150, 300, and 450 feet. Some 458 feet of crosscutting, 395 feet of drifting, and 3,000 feet of diamond-drilling underground were done; 351 tons of ore and 8,472 tons of waste were hoisted.

Surface construction consisted of the following: office, storehouse, oil-house, compressor- and boiler-house, headframe and shaft-house, blacksmith shop, garage, pump-house, cabin and residence. These are of frame or timber construction. In addition there was a transformer house of galvanized iron construction and a powder magazine double-walled, sand-filled, galvanized, iron-sheeted.

The hoisting plant consists of a 930-cubic-foot, electrically driven air compressor and a 10- by 12-inch, single-drum, reversing air hoist. The drum is divided to take care of the hoisting rope and the counter-balance rope. The heating boiler is a 35 h.p. locomotive type. Steel-sharpening is done by a steel sharpener and an oil furnace. Water is supplied to the plant by a 1,500 g.p.h. gas pump at Gull lake.

An average of 25 men has been employed since February. C. A. Newton was in charge as resident engineer until the end of the year. James Crowe is now in charge as mine manager. The mine office is at Kirkland Lake.

Gold Eagle Gold Mines, Limited

Gold Eagle Gold Mines, Limited, was incorporated in February, 1934, with an authorized capitalization of 3,000,000 shares of \$1 par value. The officers and directors are: Walter F. Stafford, president and managing director; Chas. E. St. Paul, vice-president; Bruce P. Davis, secretary; Millard C. Dorntge, treasurer; John T. Oliver and Wm. S. Rogers, directors. The head office is at 85 Richmond Street West, Toronto. The mine address is McKenzie Island.

The property consists of 24 claims, adjoining McKenzie Red Lake Gold Mines on the south and west, on Mackenzie island in Red lake, Dome township, Patricia portion of Kenora district.

Work was resumed at this property late in 1935 and was continued throughout 1936. The following figures show the underground development work accomplished during 1936:—

Level	Crosscutting	Drifting	Raising
	feet	feet	feet
125-foot.....	135	539
250-foot.....	59	624	50
375-foot.....	365	225
500-foot.....	992	1,785	210
Total.....	1,186	3,313	485

The buildings on the property include power-house, boiler-house, bunk-house and cookery, office, powder magazine, cap-house and assay office.

In September electric power was brought in to the property and a new mining plant was installed, including a Bellis-Morcome 1,100-cubic-foot electric

compressor and a Fullerton, Hodgart and Barclay double 42- by 24-inch drum hoist driven by a 125 h.p. motor.

There was an average of 58 men employed, of whom 20 were underground. F. M. Passow is mine manager.

Gold Range Mines, Limited

Gold Range Mines, Limited, was incorporated in July, 1934, with an authorized capitalization of 3,000,000 shares of \$1 par value. The officers and directors are: Gordon McLaughlin, president; A. Treleaven, vice-president; E. Duguid, secretary-treasurer; Duncan Gillies, director. J. A. Cole is consulting engineer. The head office is at 203 Royal Bank Building, Toronto. The mine address is Schreiber.

The property held by this company consists of 47 claims, about 2 miles east of Schreiber, just north of the main line of the Canadian Pacific Railway, township 84, district of Thunder Bay.

At the west side of the property is an adit driven northeastward into the hill, which has an elevation of about 40 feet above the C. P. R. track level. About 500 feet east of this adit is a second driven northward into the hill for about 135 feet at the same elevation. The adits comprise the old workings of about forty years ago.

The present company carried on surface work throughout the year on this property and on the property of Otisse Long Lac Gold Mines, Limited, adjoining to the east. On the Gold Range property underground work was commenced in August and continued to the end of the year, during which time about 100 feet of crosscutting and drifting was accomplished in the adits.

A small test mill was used on the property for the purpose of sampling the rock extracted. The equipment included a hammer mill jaw crusher, run by a small vertical steam engine for primary crushing, followed by a 2- by 3-inch jaw crusher and a small amalgamation bowl, driven by a 1½ h.p. gasoline engine and a Denver amalgamation test unit run by a small gasoline engine.

The plant equipment includes an Ingersoll-Rand 220-cubic-foot portable gasoline compressor, a 20 h.p. boiler, and an electric-lighting unit, consisting of a 110-volt, 7½ k.w., direct-current generator driven by a 10 h.p., one-cylinder gasoline engine.

There was an average of 22 men employed, under the direction of J. A. Cole.

Golden Arrow Mining Company, Limited

The Golden Arrow Mining Company, Limited, was incorporated in August, 1934. The present authorized capitalization is 3,000,000 shares of \$1 par value. Issued shares total approximately 1,300,000. The officers and directors at the end of the year were: C. S. M. Brown, president; Baptiste David, vice-president; O. E. Christensen, secretary; Dr. O. J. Stahl, treasurer; P. A. McDermott, director. The head office of the company is at Timmins, and the executive office at 217 Bay Street, Toronto.

The holdings of the company, totalling approximately 160 acres, are located in the southwest corner of Hislop township and the northeast corner of McCann township, Ramore area, district of Cochrane. The property was diamond-drilled in 1935. In the summer of 1936 a 2-compartment shaft was started by hand-drilling. A depth of 48 feet was attained before operations were suspended on November 1. Buildings constructed at the property consist of frame cook-house, office, and sleeping camp combined, blacksmith shop, and powder maga-

zine. A small headframe was also erected. Seven men were employed at the property when shaft-sinking was in progress. P. A. McDermott was mine manager.

Golden Gate Mining Company, Limited

The Golden Gate Mining Company, Limited, was incorporated in July, 1934, with a capitalization of 3,000,000 shares of \$1 par value.

The officers and directors are: D. O. Johnston, president; A. W. Hunter, vice-president; C. H. Kemp, secretary-treasurer; W. J. Lawson, F. Rosar, and Dr. T. B. Armstrong, directors. S. A. Pain is mine manager. The head office is at 59 Yonge Street, Toronto.

The property, formerly held by the Lucky Cross Leasing Syndicate and the Kirkland Gateway Gold Mines, Limited, consists of 6 claims, approximately 240 acres, in Teck township, Kirkland Lake area, district of Timiskaming.

An inclined shaft with two compartments had been sunk to the 350-foot level and levels established at the 100-, 200-, and 350-foot levels, with some drifting and crosscutting. Some stoping had been done.

The mine was reopened in May. A steam plant was installed, consisting of two 80 h.p. horizontal return tubular boilers; 550-cubic-foot, steam-driven compressor; and 10- by 12-inch steam-driven hoist. The mine was dewatered and the shaft reconditioned. Sampling, diamond-drilling, and drifting and crosscutting have been carried on. Some 500 feet of surface trenching, 2,750 feet of underground diamond-drilling, 1,060 feet of crosscutting, and 350 feet of drifting have been done.

An average of 18 men was employed. The mine office is at Swastika.

Golden Summit Mines, Limited

Golden Summit Mines, Limited, was incorporated in March, 1924, with a capitalization of 2,500,000 shares of \$1 par value, of which 1,624,466 are issued.

The officers and directors are: W. J. Simpson, president and managing director; Ben Kerr, vice-president; Gordon Belyea, secretary-treasurer; Fred. A. Brandt, J. M. Calder, T. G. Miller, S. A. Lister, directors. The head office is 2374 Bloor Street West, Toronto. The mine office is at Sesekinika.

The property consists of 11 claims, 460 acres, in Grenfell and Maisonville townships, district of Timiskaming.

The property was operated in 1936 with an average of 20 men. W. Brunner is mine superintendent.

Development work consisted of 257 feet of crosscutting and 103 feet of drifting; 103 feet of raising was done, and 1,362 tons of ore was hoisted.

Gomak Mines, Limited

Gomak Mines, Limited, was incorporated in December, 1933, with an authorized capitalization of 1,000,000 shares of \$1 par value. The officers and directors are: C. N. Haldenby, president; Dr. W. H. Wright, vice-president; F. O. Gallagher, secretary-treasurer; Mrs. W. M. Clyde and R. M. West, directors. The head office is at 320 Bay Street, Toronto. The mine address is Gogama.

The property is situated in Chester township, Three Duck Lakes area, district of Sudbury.

The construction of a 20-ton amalgamation-flotation mill was started in January, 1936. It was completed and put in operation on May 2. The equipment includes an 8- by 12-inch jaw crusher, 4-foot Hardinge ball mill, disc

classifier, Denver jig, 2 blanket tables, and Denver 4-cell Sub-A flotation unit. It is operated by an 80 h.p. Ruston-Hornsby Diesel engine.

Underground work was resumed at the end of April, after a suspension of seven months. It was again suspended at the end of November. Diamond-drilling was then done for the balance of the year.

The development work accomplished in 1936 consisted of 35 feet of cross-cutting and 68 feet of raising on the 65-foot level. The raise was then slashed to provide ore for the mill.

The mill was operated intermittently during May and June, then shut down until September. It was then operated steadily until December, when it was again shut down. A total of 1,387 tons was milled. A total of 1,374 feet of diamond-drilling was done in 1936.

An average of 15 men was employed under the direction of R. D. Jones.

Goodfish Mining Company, Limited

The Goodfish Mining Company, Limited, was incorporated in October, 1933, with a capitalization of 3,500,000 shares of \$1 par value, of which 2,292,400 had been issued in October, 1936.

The officers and directors are: A. J. Perron, president; J. W. C. Cornell, vice-president; M. G. Hunt, secretary-treasurer; J. J. Conway, Dr. J. A. Campbell, directors. The head office is at Kirkland Lake.

The company has two properties, one in Timagami Provincial Forest and the other in the Kirkland Lake area.

Beanland Claims

The Timagami property consists of 4 claims, 200 acres, in Strathy township, district of Nipissing.

Work was started by the present operators in September and 2,000 feet of surface trenching has been done. Mine buildings, consisting of a power-house, shaft-house and headframe, office, storehouse, cookery, bunk-houses, stables, pump-house, and powder magazine, have been built. These are all of frame or log construction. The plant consists of a 150 h.p. boiler, 625-cubic-foot air compressor, 6- by 8-inch steam hoist, steel-sharpening equipment, and 3 duplex pumps. A vertical, 3-compartment shaft, 6 by 16 feet, has been sunk a distance of 70 feet.

An average of 17 men has been employed for the four months. Douglas Briden is mine manager. The mine office is Timagami, Ontario.

Goodfish Property

The company owns 15 claims, comprising 630 acres, in Morrisette township, Kirkland Lake area, district of Timiskaming.

During previous operations No. 1 shaft had been sunk to a depth of 620 feet, with levels at 150, 300, 450, and 600 feet, and No. 3 shaft had reached a depth of 360 feet, with levels at 200 and 350 feet. A total of 2,500 feet of drifting and 650 feet of crosscutting had been done. Operations were resumed late in 1935, and continued until the spring of 1936. About 572 feet of development work was done on the 100-foot level and 789 feet on the 200-foot level in No. 3 shaft area. George Clifford was in charge of operations during this period of operation.

Gordon Lebel Mines, Limited

Gordon Lebel Mines, Limited, was incorporated in December, 1937, with a capitalization of 3,000,000 shares of \$1 par value, of which 2,186,656 have been issued.

The officers and directors are: R. D. Hoffman, president; D. H. Porter, vice-president; E. E. Ott, secretary-treasurer; Milton Flynn, D. W. Lang, Arthur Pinel, M. D. Taylor, directors. H. M. Butterfield is mine manager. The head office is at 67 Yonge Street, Toronto. The mine office is at Kirkland Lake.

The property consists of 7 claims, 209.6 acres of land and 137.5 acres of water, in Lebel township, Kirkland Lake area, district of Timiskaming.

Development work consists of surface trenching and diamond-drilling. During the year buildings consisting of an office, cookery, bunk-house, manager's residence and garage, all of frame construction, were built. Some 68,160 cubic feet of trenching and 7,574 feet of diamond-drilling were done.

An average of 16 men for the ten months, beginning in March, was employed. A. C. Lee was engineer in charge during the early part of the work. H. M. Butterfield is now in charge as manager.

Hallnor Mines, Limited

Hallnor Mines, Limited, incorporated April 6, 1936, has an authorized capital of 2,000,000 shares of \$1 par value, of which 1,325,005 have been issued. The officers and directors are: J. Y. Murdoch, president; R. L. Pepall, vice-president; T. N. Hay, secretary-treasurer; C. H. Windeler, assistant secretary-treasurer; E. Hibbert, T. N. Hay, and S. H. Robinson, directors. The head office and mine office address is Pamour. The executive office is at 804 Royal Bank Building, Toronto.

The mine property consists of 160 acres, lot 7, concession V, township of Whitney, Porcupine area, district of Cochrane. This property was acquired from Porcupine Quartet Gold Syndicate.

The present operators diamond-drilled the property during the winter of 1935-36. Construction of camps at the property was commenced in April, 1936. A mining plant was purchased and installed and sinking of a 3-compartment shaft was started in June. The underground work completed at the end of the year was as follows: shaft completed to 591 feet; 3 level stations cut at 211 feet, 361 feet, and 561 feet; 100 feet of drifting on the 361-foot level; and 103 feet of drifting on the 561-foot level. Diamond-drilling done on the property in 1936 was 6,061.5 feet. Previous to 1936, 5,553.5 feet of diamond-drilling had been done.

The following buildings were erected during the year: frame office, 26 by 46 feet; miners' dry-house, 30 by 46 feet; compressor- and hoist-house, steel structure, 25 by 50 feet; steel shop, 22 by 38 feet; powder magazine, 16 by 22 feet; 3 bunk-houses, 22 by 36 feet; cookery, 25 by 40 feet; staff-house, 24 by 26 feet; 2 residences, 12 by 16 feet; fuse-house; oil-house; thaw-house; pump-house; 19,000-gallon water tank; steel headframe, height 56 feet to sheave; and heating plant.

The average number of men employed at the property in 1936 was 52. A. L. Sharp is mine manager.

Hard Rock Gold Mines, Limited

Hard Rock Gold Mines, Limited, was incorporated in January, 1934. The authorized capitalization was increased in November, 1936, from 2,500,000 to 3,000,000 shares of \$1 par value. The officers and directors are: T. H. Rea, president; G. W. Rayner, vice-president and managing director; W. S. Walton, secretary-treasurer; A. B. Gordon and H. R. Aird, directors. Victor H. Emery is consulting engineer. The head office is at 603 Royal Bank Building, Toronto. The mine address is Geraldton.

The property, totalling about 828 acres, consists of claims T.B. 9,981-9,992

and 14,484–14,486 in Ashmore township, Little Long Lac area, district of Thunder Bay. It is accessible by automobile road from the town of Geraldton, about $4\frac{1}{2}$ miles north of the property on the Longlac–Port Arthur branch of the Canadian National Railways.

During 1936, No. 1 shaft, the 3-compartment vertical shaft in the southwest corner of T.B. 9,985, on the shore of Kenogamisis lake (Little Long Lac), was sunk an additional 20 feet to a total depth of 475 feet, and a level established at 450 feet. From this level, a 2-compartment, vertical winze was sunk in the hanging wall of the main vein to a depth of 141 feet, and from this winze a level was established at 575 feet.

At the beginning of August, No. 2 shaft, a vertical, 3-compartment shaft, was commenced on T.B. 9,991, about 150 feet north of the road and 1,000 feet east of the west boundary.

Additions to plant equipment during 1936 included a locomotive-type, return tubular, 80 h.p. boiler, Ingersoll-Rand 8- by 6-inch, single-drum hoist, and Ingersoll-Rand 813-cubic-foot compressor driven by a 180 h.p. Fairbanks-Morse stationary Diesel engine.

There was an average of 69 men employed, of whom 27 were underground. J. C. Dumbrille is mine manager, and E. J. Bolger is underground superintendent.

The following is taken from the manager's report of October 31:—

No. 2 Shaft Area

Stripping of the porphyry outcrop and intensive sampling, coupled with diamond-drilling, indicated that a large tonnage of ore of commercial grade could be developed in this section. Whether these showings may be most economically mined as individual ore bodies or combined as a large tonnage operation can only be decided after thorough underground examination. Work to this end is now being carried on through No. 2 shaft. This is a 3-compartment, vertical shaft located on the "Porphyry hill" at a point 1,000 feet east of the west property boundary and 2,500 feet west of the No. 1 shaft.

While sinking this shaft it was found that the shearing in the porphyry, which dipped southward at a steep angle through the shaft, carried excellent ore values until it passed out of the shaft. Sinking was discontinued at 177 feet, and the 150-foot level established.

On this level, the shearing in the porphyry which was found in the shaft is being developed. The main crosscut from the shaft indicates a possible ore zone 60 feet wide, which is being explored with crosscuts at close intervals from a main drift. This work will not be completed for some time, and no estimate of tonnage or values can yet be made. The 360 feet of lateral work now completed on this shearing, combined with shaft results, has disclosed that the silicified porphyry is of low to medium grade with recurrent spectacular concentrations.

North of the shaft, beyond the porphyry, a strong vein is being opened up in the iron foundation, on which to October 31, 82 feet of drifting has been done, averaging \$14.10 over 7 feet of width.

General

The discovery of ore-bearing porphyry on the 450-foot level from No. 1 shaft at a distance of 1,400 feet east of No. 2 shaft is a very significant development. It should also be noted that values were found along the north porphyry band by surface diamond-drilling.

Plant

Buildings and equipment required to carry on the work at No. 2 shaft were purchased and erected. Equipment for electrification of the plant has been ordered, and construction of a power line to connect with the Ontario Hydro-Electric Power Commission's line is under way. Electric power should be in use at the mine early in 1937.

Proposed Programme of Work

A very large development programme is necessary to open up the No. 2 shaft section to the same depth as No. 1 shaft and join the workings on the 450-foot horizon. This work, which will entail several thousand feet of drifting and crosscutting, will be pushed through as rapidly as possible.

The following table shows the underground development accomplished previous to 1936, during 1936, and the total:—

	To Dec. 31, 1935	1936	Total
No. 1 SHAFT.....	feet 455	feet 20	feet 475
WINZE.....		141	141

Harkness-Hays Gold Mines, Limited

Harkness-Hays Gold Mines, Limited, was incorporated in July, 1934, with an authorized capitalization of 3,000,000 shares of \$1 par value, of which 1,932,607 shares had been issued as at December 31, 1936. The officers and directors are: Richard W. Lee, president; Dr. H. L. Van Norstrand, vice-president; H. J. Sender, secretary-treasurer; W. J. Wadsworth, director. The head office is at 310 Temple Building, Toronto. The mine address is Schreiber.

The property consists of a group of 8 claims, situated 2 miles east of Schreiber on the main line of the Canadian Pacific railway, township 84, district of Thunder Bay.

The underground work accomplished during the year was about 25 feet of raising and 50 tons of slashing near the mouth of No. 2 adit, which is near the eastern boundary of the property. A small amount of ore was also taken from an open cut on top of the hill, almost directly above No. 3 adit.

About 27 tons of ore was shipped to the Ontario Refining Company, which netted about \$75 per ton in gold. Work was suspended in August, Earl C. Allingham succeeding J. F. Anderson as superintendent and remaining at the property. There were 8 men employed during the time of operation.

Hillside Mines, Limited

Hillside Mines, Limited, was incorporated in June, 1936, with an authorized capitalization of 3,500,000 shares of \$1 par value. The officers and directors are: E. L. Weaver, president; Hon. Jas. T. Lyons, vice-president; P. T. Mulliette, F. C. Gray, and H. T. Barnes, directors. The Combined Secretarial Corporation, Limited, is secretary-treasurer. The head office is at the Ussher Building, 244 Bay Street, Toronto.

The property was acquired from Hillside Gold Mines, Limited, and is located in township 29, range 23, Michipicoten area, district of Algoma.

Work was started in September, after a suspension of thirteen months. By the end of the year a total of 100 feet of drifting had been done in the adit on claim S.S.M. 4,925, making a total of 890 feet of drifting and 49 feet of cross-cutting in this adit. In addition a total of 1,935 feet of diamond-drilling was done from the adit in 1936.

The 20-ton amalgamation mill, which had been partially completed when operations were suspended in 1935, was completed and put in operation on

October 20. For the balance of the year it was operated intermittently and treated a total of less than 200 tons.

An average of 20 men was employed under the direction of W. F. Taylor. The mine address is Wawa.

Hollinger Consolidated Gold Mines, Limited

Hollinger Consolidated Gold Mines, Limited, has an authorized capitalization of 5,000,000 shares of \$5 par value. At December 31, 1936, 4,920,000 shares were outstanding. The mine office and head office of the company are at Timmins. The general office is at 602 Royal Bank Building, Toronto.

The officers of the company are: Jules R. Timmins, president; John B. Holden, vice-president and treasurer; P. C. Finlay, secretary. The directors are: Jules R. Timmins, John B. Holden, W. L. McDougald, Leo H. Timmins, Wilson Bell, James Y. Murdoch, Allen A. McMartin, John I. Rankin, N. A. Timmins, and John B. McMartin.

The main property operated by this company is in the township of Tisdale, Porcupine area, district of Cochrane.

John Knox is general manager, and A. H. Wohlrab is assistant manager.

The following is taken from the report of the general manager for the year ending December 31, 1936:—

PROFIT AND LOSS STATEMENT

for the year ending December 31, 1936

SOURCES OF 1936 INCOME:		
Gold and silver produced.....	\$14,530,413.94	
Premium on gold in process, January 1, 1936.....	75,761.78	
		\$14,606,175.72
Interest on investments and other income.....		219,106.03
		<u>\$14,825,281.75</u>
DISPOSAL OF 1936 INCOME:		
Milling charges.....	\$1,189,672.00	
Mining charges.....	5,967,559.22	
Marketing bullion.....	159,932.20

Total charges	\$204,958.94	\$5,419,903.00	\$2,524,833.94	\$8,149,695.88	\$4.6417

Employees

The average number of men employed during the year has been 2,907, distributed as follows:—

MINERS:	MECHANICS:	GENERAL:
Exploration 33	Operation 123	Mill and refinery 233
Development 425	Maintenance 222	Technical 91
Production 1,444		Clerical 42
		Miscellaneous 162
		Outside properties 132
Total 1,902	Total 345	Total 660

The men employed at outside properties at December 31, 1936, were distributed as follows: Ross mine, 56; Smith-Thorne, 46; Lang, 24; Holly Reserve, 6.

The Mill

The milling results were as follows:—

Ore milled	tons	1,755,768
Average value per ton		\$8.61
Gross value	\$15,119,205.59	
Deduct loss in tailings	588,791.65	
Net value recovered		\$14,530,413.94

Average tons per day	4,850
Per cent, of possible time run	85.2
Tons per 100 per cent. running time	5,692
Solution precipitated per ton ore	tons 1.01
Value per ton tailings	\$0.34
Cyanide consumed per ton of ore	lbs. 0.486
Zinc consumed per ton of ore	lbs. 0.044
Zinc consumed per ton of solution	lbs. 0.044
Lime consumed per ton of ore	lbs. 2.131
Lead acetate per ton of ore	lbs. 0.010
Average value of pregnant solution	\$8.23
Average value received per ounce of gold sold	\$35.03

Ore Reserves

Our ore reserves on the 31st of December, 1936, consisted of 7,257,257 tons, of a total value of \$51,027,123.00, having an average value of 0.3401 ounces, or \$7.03 per ton. These figures compare with 7,355,318 tons of a total value of \$51,918,222.00, having an average value of 0.3415 ounces, or \$7.06 per ton, at the end of 1935.

In the calculations dealing with ore reserves, the price of gold at \$20.67 per ounce has been taken as the basis of value, and the same minimum ore grade as used in former years continued.

Hollinger Mill

During the year a series of experiments on grinding have been completed indicating that considerable saving could be effected in our costs. The dimensions of the present mill structure do not admit of efficient installation of the new equipment. This, coupled with the fact that recent exploration has indicated a considerable quantity of ore under our grinding units, has brought about a decision to erect a new primary grinding building and ore storage to be located approximately 500 feet west of our present plant. Preparation for the erection of this new plant is now under way and we expect it to be completed during the year.

Hollinger Mine

During the year 37.6 per cent. of the ore milled came from above the 800-foot level. Above this level it is probable that all of the major ore has been discovered, and we can expect a falling off in development results from these horizons in the future.

No. 25 shaft was completed to the 5,150-foot level, but no development work was undertaken below the 3,950-foot level during the year as it seemed advisable to concentrate on the upper levels in order to complete this upper development as rapidly as possible. However, sufficient diamond-drilling was done from the 5,150-foot station to satisfy ourselves that the geological conditions continued favourable, and some ore was encountered. Development will be proceeded with in this horizon during 1937.

There is a decrease of \$900,000 in the value of ore reserves for the year, which is mostly accounted for by the fact that prospecting was directed to less favourable areas in order to complete the cleaning-up of the upper levels. The grade of ore for the year was \$8.61, as compared to \$8.31 during 1935, based on \$35.00 gold.

No stoping has been done below the 2,750-foot level.

The ore remaining in the pillars around central shaft above the 800-foot level has a value of approximately \$9,000,000. Having this in mind it was decided to sink a new shaft in a location which has been selected 1,500 feet north of central shaft. This work has been commenced and will be proceeded with at such a rate as not to interfere with regular operations.

Young-Davidson Mine

The operations have been satisfactory during the year. Some 301,163 tons were milled with a recovery of \$2.97, and from operations we have applied \$208,585.05 on account of our advances. The 262-foot level has been prepared for stoping, and 27,795 tons of the ore milled came from this source.

The cost of this development, amounting to \$183,000, has been charged against operations.

Ross Mine, Hislop Township

There have been no new ore discoveries during the year, but a development drift is being driven along a fault to the south to investigate interesting drill-hole intersections.

Some 27,540 tons of ore were milled during the year, giving a recovery of \$8.20. The profit from the operation amounted to \$27,789.84.

Lang Property

This property which lies immediately east of the Pamour is under option. A shaft has been sunk to the 220-foot level and 1,000 feet of development completed.

Of the 1,000 feet, 487 feet of drifting is on the Pamour conglomerate bed, but sufficient work has not been done to make any definite prediction as to the merits of the property.

Smith-Thorne Mine

Work was continued on the Smith-Thorne property at Horwood lake, district of Sudbury, throughout 1936. It is 17 miles southwest of Tionaga on the Canadian National railway. The developments at this property have not as yet resulted in the discovery of commercial ore bodies, but diamond-drilling is being carried on to the east to investigate the possibilities of this area.

The 2-compartment, 45-degree shaft was sunk an additional 393 feet, to a total depth of 599 feet on the incline. Levels were established at 200, 325, and 570 feet on the incline.

The development work done on the various levels during 1936 was as follows:—

Level	Drifting	Crosscutting
	feet	feet
200-foot.....	224	46
325-foot.....	136	75
570-foot.....	713	360
Total.....	1,073	481

A total of 3,923 feet of diamond-drilling was done in 1936, of which 3,092 feet was from underground.

The plant included a 42 h.p. boiler, Ingersoll-Rand 8- by 6-inch steam hoist, and Ingersoll-Rand 665-cubic-foot compressor driven by a 130 h.p. Ruston-Hornsby Diesel engine.

An average of 40 men was employed, of whom 12 were underground. G. H. Gibbs was in charge until August, when he was succeeded by E. M. Ward. The mine address is Barite, via Sudbury.

The following is taken from the consulting engineer's report on outside properties for the year ending December 31, 1936:—

In all, 164 examinations of other properties were undertaken during the year, of which 147 were in Ontario, 16 in Quebec, and one in North West Territories. On some of them a limited amount of work was done, but nothing was discovered to justify further expenditures.

Prospecting, development, and exploration work on outside properties, exclusive of Young-Davidson and Ross mines, involved an expenditure of \$352,000.

Howey Gold Mines, Limited

Howey Gold Mines, Limited, was incorporated in March, 1926. The authorized capitalization of the company is 5,000,000 shares of \$1 par value, all of which are issued. The officers and directors are: R. T. Birks, president; W. S. Cherry, vice-president; H. C. McCloskey, secretary-treasurer; B. E. Martin, assistant secretary-treasurer; G. A. La Bine and John A. Northway, directors. Fraser D. Reid is general manager, Edward Futterer is resident manager, Ralph E. Sullivan is mill superintendent, and D. M. MacLean is mine superintendent. The executive office is at 717 Federal Building, Toronto. The head office and mine office are at Red Lake.

The company's holdings lie along both sides of the boundary between Dome and Heyson townships, at the southeast corner of the lower part of Red lake, in the Patricia portion of Kenora district. The greater part of the town of Red Lake is built on Howey property.

During 1936, the 1,000-foot level winze was sunk an additional 424 feet to a total depth of 1,008 feet. From this winze, lateral exploration was carried on at the 1,500-foot, 1,750-foot, 1,850-foot, and 2,000-foot levels.

There were no additions in plant equipment. The average number of men employed during 1936 was 215, of whom 126 were underground and 44 in the mill.

The following is taken from the general manager's report for the year ending December 31, 1936:—

ANALYSIS OF COSTS

	1936 (528,528 tons)		1935 (484,966 tons)		1934 (481,757 tons)	
	Total cost	Cost per ton milled and sorted	Total cost	Cost per ton milled and sorted	Total cost	Cost per ton milled and sorted

¹All values are figured on gold at \$20.67 per ounce.

²Includes premium paid by government.

Underground Exploration

The winze was sunk from the 1,500-foot level to the 2,000-foot level, and stations cut at the 1,700-, 1,850-, and 2,000-foot horizons. The dike was diamond-drilled from each station to determine the most favourable zone for drifting. On the 1,700-foot level the dike was explored by drifting and systematic diamond-drilling over a length of 413 feet. In the same manner the 2,000-foot level was explored over a length of 554 feet. No ore was found in this work. However, considerable exploration of the 2,000-foot level remains to be done.

The 375-foot level drift will be extended 700 feet farther east in order to investigate some favourable ground indicated by diamond-drilling from the surface.

Surface Exploration

The surface was systematically traversed, and all rock outcrops surveyed and examined. Several veins were discovered, only one of which, namely the so-called Kamm vein, warranted intensive investigation. This is a very narrow vein, consisting of quartz ranging in width from two inches to one foot, and accompanied in places by parallel stringers. It has been traced for a length of some 900 feet. Diamond-drill results, however, were disappointing.

Ore Reserves

The broken ore reserve in the mine as of December 31, 1936, amounted to 568,000 tons, compared to 457,000 tons the previous year. The unbroken reserve is 916,000 tons, making a total reserve of 1,484,000 tons. In addition to this, 100,000 to 150,000 tons of better than average grade ore will in all probability be recovered from permanent pillars.

General

The value of the ore hoisted for the past year was \$2.57 (gold at \$35.00) per ton, as compared to \$2.98 per ton the previous year. The drop in value per ton was somewhat offset by an improvement in milling practice and a reduction in operating costs, totalling approximately 30 cents per ton. While any further improvement is not expected in the metallurgical losses, a slight reduction in operating costs is quite possible.

Hudson-Patricia Gold Mines, Limited

Hudson-Patricia Gold Mines, Limited, was incorporated in April, 1934, with an authorized capitalization of 2,500,000 shares of \$1 par value. In December, 1935, the capitalization was increased to 3,500,000 shares, of which 3,499,719 had been issued as at December, 1936. The officers and directors are: Dr. M. H. Lebel, president; C. H. Ackerman, vice-president; M. F. Blue, secretary; P. A. Lavallee, treasurer; Dr. J. L. A. Tetreault, W. R. Salter, Colin A. Campbell, A. J. H. St. Denis, and B. R. Hepburn, directors. The secretary's office is at 200 Bay Street, Toronto. The mine address is Narrow Lake.

The property consists of 26 claims in the townships of Goodall and Dent in the Woman Lake area of the Patricia portion of Kenora district.

Work was continued at this property throughout 1936. Early in the year a 50-ton amalgamation mill was installed on the property and put into operation on June 1. Equipment in the mill included a Blake 15- by 9-inch jaw crusher, Allis-Chalmers 5- by 5-foot ball mill, Denver 12- by 18-inch jig, and Dorr 3- by 18-foot rake classifier built by corduroy blankets and amalgam plates.

Power for the mill was provided by a 90 h.p. Ruston-Hornsby Diesel engine, which was also connected to a lighting unit consisting of a 35 k.w., 230-volt, direct-current Swedish-Electric generator.

Ore for the mill was provided from a shrinkage stope on the 211-foot level. There was no development work accomplished underground during the year.

There was an average of 40 men employed, of whom 12 were underground and 5 in the mill. J. M. Thompson was manager.

Hugh-Pam Porcupine Mines, Limited

Hugh-Pam Porcupine Mines, Limited, was incorporated in December, 1935, with an authorized capital of 3,000,000 shares of \$1 par value. The officers and directors of the company are: Geo. Wood, president; J. J. Gray, vice-president; Robt. Armstrong, secretary-treasurer; W. G. Armstrong, J. H. Rattray, and Geo. H. Bourne, directors. The head office of the company is at 159 Bay Street, Toronto. The mine address is South Porcupine.

The properties held by this company consist of the old Mulholland and Hughes groups of 15 claims in Whitney township, Porcupine area, district of Cochrane. The old Mulholland shaft, with levels at 90 and 200 feet, was pumped out during the summer, and the vein showings were sampled. About 400 feet of drifting has been done from the 90-foot level; the crosscut on the 2nd level did not reach the vein. The shaft was allowed to refill after sampling was completed. Later, in the fall, the Hughes shaft was pumped out and the mine workings sampled. There are four levels off this shaft at 50-foot intervals to 200 feet with a small amount of exploration work on each level. From the 200-foot level a winze extends to 300 feet, where additional work has been done. No work other than sampling was done on these levels, and they are being allowed to fill again with water. The company did 2,647 feet of diamond-drilling during the year.

A combined office and diamond-drill core-house, 16 by 24 feet, was erected during the summer. From August to the end of the year, when most of the work was done, the average number of men employed was 12. D. C. Leggett is in charge of the property.

Hutchison Lake Gold Mines, Limited

Hutchison Lake Gold Mines, Limited, was incorporated in June, 1935, as Hutchinson Lake Gold Mines, Limited, the name having been changed to the above at a later date. The authorized capitalization is 3,000,000 shares of \$1 par value, of which 1,000,000 shares were issued to vendors and 1,400,000 shares sold or underwritten. The officers and directors are: H. P. Snelgrove, president; G. U. Papineau, vice-president; W. G. Chapman, secretary-treasurer; W. W. Beaton, W. J. Ryan, and S. C. McLaughlin, directors. The head office is at 200 Bay Street, Toronto. The mine address is at Geraldton.

The property consists of 19 claims, situated about 4 miles north of Geraldton on the Longlac-Port Arthur branch of the Canadian National Railways, Fulford township, Little Long Lac area, district of Thunder Bay.

Following the exploration work, a 3-compartment, 6- by 17-foot vertical shaft was commenced by hand in November, 1936, on claim T. B. 14,229. Plant

and camp buildings were erected, a mining plant was installed, and sinking under power was commenced by December 15. At the end of the year the shaft was at a depth of 75 feet.

The mining plant includes a Gardner Denver 400-cubic-foot portable compressor driven by a 120 h.p. Caterpillar Diesel engine, a 7- by 11-inch, single-drum Mead Morrison steam hoist, and a 100 h.p. locomotive-type boiler.

Buildings on the property include a two-storey cookery and bunk-house, office, storehouse, power-house, dry-house, stable, blacksmith shop, powder magazine, and cap-house.

At the end of the year there were 24 men employed, with 8 underground, under the direction of W. W. Beaton.

James Kirkland Mines, Limited

James Kirkland Mines, Limited, was incorporated in April, 1934, with a capitalization of 3,000,000 shares of \$1 par value, of which 1,533,950 shares have been issued. Vendors' stock is pooled.

The officers and directors are: M. Abraham, president; H. G. Steen, vice-president and secretary; E. J. Thompson, R. Storen, A. Goddard, directors. R. Abraham is assistant secretary. The head office is at 36 Toronto Street, Toronto. The property consists of 11 claims in Teck and Grenfell townships, Kirkland Lake area, district of Timiskaming. Previous operators had sunk a shaft 200 feet deep.

From May to November, one small building was erected, and 1,500 feet of surface trenching was done.

An average of 6 men was employed for the six months. The mine office address is Goldthorpe.

J-M Consolidated Gold Mines, Limited

J-M Consolidated Gold Mines, Limited, was incorporated in February, 1932, with an authorized capitalization of 3,500,000 shares of \$1 par value. The officers and directors are: J. E. Day, president; Charles Taylor, vice-president; T. J. Day, secretary-treasurer; Hon. J. D. Chaplin, F. L. Hutchinson, D. M. Thomson, W. A. Taylor, and J. McFetrick, directors. John W. Shaw is consulting engineer. The head office of the company is at 1116 Federal Building, 85 Richmond Street West, Toronto. The mine address is Jackson Manion.

The company holds 34 claims in Dent township, Woman Lake area, Patricia portion of Kenora district. Access by water is from Hudson, through Lac Seul, Pakwash lake, Trout Lake river, and Woman river, to Woman lake. The property may be reached by air in an hour flying from Hudson or Sioux Lookout.

Production during 1936 was taken from three shrinkage stopes on the 125-foot level and two shrinkage stopes on the 250-foot level.

The tonnage milled previous to 1936 totalled 4,829.60 dry tons, with a gross recovery of \$48,174.31. Production during 1936 amounted to 12,156.79 dry tons, with a gross production of \$122,471.08.

Early in the summer of 1936, a 100-ton cyanide-amalgamation mill was installed, which included the following equipment: a Blake 20- by 10-inch crusher driven by a 20 h.p. motor, Allis-Chalmers 6- by 8-foot ball mill in closed circuit with a Denver 12- by 16-inch jig and a Dorr duplex classifier, two Dorr 10- by 20-foot tray-type thickeners, three Dorr 16- by 16-foot agitators in series, and Feine 6- by 8-foot string filter.

Motive power for the mill is obtained from two General Electric 125 k.v.a., 575-volt, 60-cycle, alternating current generators, driven by two 156 h.p. Ruston-Hornsby 10-HRC Diesel engines. Additions to the mining plant included an

Ingersoll-Rand, type XVH, 537-cubic-foot compressor run by a 114 h.p. Ruston-Hornsby Diesel engine.

The following table shows the development work done up to December 31, 1935, the work accomplished during 1936, and the total:—

	To Dec. 31, 1935	1936	Total
	feet	feet	feet
SHAFT.....	404	404
WINZES (below the 375-foot level).....	145	141	286

Drifts.....	72	173	245
Crosscuts.....	18	8	26
625-FOOT LEVEL:			
Drifts.....	445	445
Crosscuts.....	43	43

During the last part of the year, there were 77 men employed, with 31 underground and 10 in the mill. W. W. Westaway is mine manager.

Kenora Prospectors and Miners, Limited

Kenora Prospectors and Miners, Limited, was incorporated February 14, 1928, with an authorized capitalization of 1,000,000 shares of \$1 par value. The officers and directors are: Thayer Lindsley, president; I. A. Lindsley, vice-president and managing director; A. G. Fulton, secretary-treasurer; I. F. Machin and Jos. Errington, directors. The secretary's address is 2810 Bank of Commerce Building, Toronto.

The property includes the Cedar Island mine, located in Shoal lake, Lake of the Woods area, district of Kenora. It is 25 miles southwest of Kenora, by air.

Work was continued throughout 1936 at the Cedar Island mine. During the year the Cornucopia, or No. 2 shaft, which is a vertical, 2-compartment shaft, was sunk an additional 45 feet to a total depth of 646 feet, and a level was established at 600 feet.

A total of 1,271 feet of drifting and crosscutting, 290 feet of raising, and 3,420 feet of underground diamond-drilling was accomplished during the year. Stopping was done on the 393-foot, 500-foot, and 600-foot levels, a total of 10,912 tons being mined by shrinkage methods. The 30-ton amalgamation-flotation mill treated a total of 13,882 tons, including development ore and ore from the surface dump. The value of concentrates produced was \$48,604.25. The value of bullion produced was \$65,659.67. Concentrates were shipped to the American Smelting and Refining Company at Tacoma, Wash., and to the American Metal Company at Carteret, N. J. In addition to the above work, 2,962 feet of surface diamond-drilling was done on claims D.200 and D.201A.

In October, operations were suspended. At the end of September there were 38 men employed, of whom 11 were underground and 9 in the mill. Hilding Johnson was in charge.

Kenricia Gold Mines, Limited

Kenricia Gold Mines, Limited, was incorporated in April, 1936, with an authorized capitalization of 2,000,000 shares of no par value. The officers and directors are: Jos. Errington, president; D. M. Hogarth, vice-president; W. S. Morlock, C. W. Greenland, and Wm. Errington, directors. The executive office is at 25 King Street West, Toronto. The mine address is Kenora.

The property consists of claims K. 5,613, 6,376, 5,531, 5,536, 5,484, 5,476-5,481 and 211P. It lies on the shore of Clearwater bay, Lake of the Woods, district of Kenora, about 10 miles west of Kenora, and is accessible by road from there. On claim 211P is located the old Three Ladies mine, which was operated some forty years ago.

Previous operators had sunk a shaft on what is now known as No. 3 vein to a depth of 50 feet, on the shore of the lake, and a second shaft, 25 feet deep, about 700 feet east of the first shaft.

In the autumn of 1935, the present operators examined the property and acquired it with the surrounding claims. Exploration was continued throughout the winter and during the summer of 1936, during which time the vein was diamond-drilled over a length of 1,000 feet. In September, 1936, a plant was installed, and the sinking of a 3-compartment, vertical shaft was commenced. At the end of the year the shaft had reached a depth of 210 feet, and a station was cut at the 200-foot level.

Buildings erected on the property included power-house and hoist-room, headframe, blacksmith shop, dry-house, pump-house, warehouse and office, bunk-house, cookery, powder magazine, and one dwelling.

Plant equipment includes an Ingersoll-Rand XVHB-2 980-cubic-foot compressor, belt-driven by a Dominion-Crossley 200 h.p. Diesel engine, No. 418 Pascal portable boiler, Ingersoll-Rand 9- by 8-inch, double-drum steam hoist, and a 10,000-U.S.-gallon fuel-oil tank.

At the end of the year there were 65 men employed, of whom 6 were underground and 40 on construction, under the direction of David A. Duff.

Kerr-Addison Gold Mines, Limited

Kerr-Addison Gold Mines, Limited, was incorporated in April, 1936, with a capitalization of 5,000,000 shares of \$1 par value, of which 2,165,006 shares have been issued.

The officers and directors are: Geo. B. Webster, president; J. H. Colville, vice-president; C. A. Gavin, secretary-treasurer; J. H. C. Waite, André Dorfman, F. M. Connell, Arthur Cockeram, J. H. Rattray, directors. M. F. Fairlie is consulting engineer. Grainger Grant was succeeded as mine manager by John McPhee, who in turn was succeeded by W. S. Row. The head office is at 11 King Street West, Toronto. The mine office is at Larder Lake.

The property consists of 19 claims in McGarry township, Larder Lake area, district of Timiskaming. The company took over the Dr. Reddick and the Kerr-Addison properties from Proprietary Mines, Limited, and acquired an additional 6 claims. An average of 15 men was employed from May to December.

The present company commenced operations in May. Four adits, at 400-foot intervals, were driven across the ore body, at an elevation just above that of the highway. This corresponds to the 60-foot level of the Kerr-Addison shaft.

The ore from these tunnels was put through a bulk-sampling mill. Drifting and diamond-drilling were also done. Figures reported for 1936 are as follows: surface diamond-drilling, 1,737 feet; underground diamond-drilling, 4,290 feet; crosscutting, 1,401 feet; drifting, 310 feet; ore hoisted, 580 tons; waste hoisted, 4,406 tons.

The total development to date is as follows:—

	Shaft-sinking	Crosscutting	Drifting
	feet	feet	feet
REDDICK SHAFT ¹	83	1,035	1,130
KERR-ADDISON SHAFT: ²			
60-foot level.....	60	³ 1,401	310
175-foot level.....	115	227	130
300-foot level.....	125	532	176
Sump.....	10		
Total.....	393	3,245	1,746

¹The Reddick shaft is 12 by 5 feet and has 2 compartments; a level has been established at 83 feet.

²The Kerr-Addison shaft is 15 feet 6 inches by 5 feet 3 inches and has 3 compartments; it is 310 feet deep with levels at 60, 175, and 300 feet.

³The crosscutting total of 1,401 feet at the 60-foot level of the Kerr-Addison shaft includes four tunnels driven S. 30°E. at intervals of 400 feet. Only No. 1 tunnel is connected with the Kerr-Addison shaft.

The following frame construction buildings were erected during the year: sampling mill, 67 by 19 feet; compressor house, 43 by 12 feet; office, 32 by 16 feet; hoist-house, 12 by 9 feet.

Plant equipment consisted of sampling-mill equipment to handle 50 tons and a Canadian Ingersoll-Rand 500-cubic-foot compressor. The plant was electrically driven.

Kirana Kirkland Gold Mines, Limited

Kirana Kirkland Gold Mines, Limited, was incorporated in August, 1936, with a capitalization of 3,000,000 shares of \$1 par value, of which 1,610,005 shares have been issued. Vendors' stock is pooled.

The officers and directors are: R. A. Scott, president; G. S. Haines, vice-president; W. J. Boyd, secretary-treasurer; D. McKenna, H. Coulston, B. Bain, directors. F. W. Trickey is general manager. The head office is at 1009 Royal Bank Building, Toronto.

The property, which was formerly known as La Belle Kirkland, consists of 7 claims, 267 acres, in Teck and Lebel townships, Kirkland Lake area, district of Timiskaming.

Former operators sank two inclined 2-compartment shafts, 8 by 7 feet. One was a prospect shaft 70 feet deep. The main shaft was sunk to 360 feet, and a total of 1,150 feet of drifting and crosscutting was done.

The present operators reopened the mine in November, 1936. The buildings and plant were reconditioned and the mine dewatered. The mine is now being examined, and development is planned.

An average of 13 men was employed for the two months. The mine office is at Kirkland Lake. A. W. Grierson is mine manager.

Kirkking Mines, Limited

Kirkking Mines, Limited, was incorporated in August, 1936, with a capitalization of 3,000,000 shares of \$1 par value, of which 1,450,000 have been issued.

The officers and directors are: G. W. Morris, president; Roy Weldon, secretary-treasurer; L. K. Fletcher, managing director; W. H. Beatty, Robert Fennell, directors. The head office is at 156 Yonge Street, Toronto.

The property, which consists of 9 claims, 384.6 acres, in Lebel township, Kirkland Lake area, district of Timiskaming, was acquired from King Kirkland Gold Mines, Limited.

Former operators sank an inclined, 2-compartment shaft, 6 by 10 feet, to 400 feet and established levels at 90, 260, and 400 feet. Approximately 1,150 feet of crosscutting and 1,200 feet of drifting were done.

The present operators reopened the mine in September of 1936. The buildings were repaired and an electrically driven compressor and hoisting plant were installed. The mine was dewatered and the shaft reconditioned. A mine examination is now being carried on.

An average of 22 men for the 4 months was employed. R. P. Teare is mine manager. The mine office is at King Kirkland.

Kirkland Gold Rand, Limited

Kirkland Gold Rand, Limited, was incorporated in June, 1931, with a capitalization of 3,000,000 shares of \$1 par value.

The officers and directors are: J. T. Tebbutt, president; P. D. Martel, vice-president; E. J. Putnam, secretary-treasurer; R. J. MacDonald, J. H. Rainville, C. Price-Green, Jas. M. Smibert, directors. Chas. Spearman is general manager and consulting engineer. The head office is at 1812 Royal Bank Building, Montreal, Que.

The property, which was acquired upon incorporation from the Kirkland Premier Mines, Limited, consists of 9 claims, 315 acres, in Teck township, Kirkland Lake area, district of Timiskaming.

The mine, which was closed down in 1929, was reopened early in 1936. The existing mine buildings have been repaired. A new dry-house and a powder magazine have been built. An electric substation and equipment for 25-cycle power has been installed. The mine was dewatered and the shaft reconditioned as the water was lowered. Development underground is being carried on. During the year 100 feet of crosscutting has been done, and 75 tons of ore and 300 tons of waste have been hoisted.

An average of 11 men for the year has been employed. H. S. Gerson is mine manager. The mine office is at Kirkland Lake.

Kirkland Lake Gold Mining Company, Limited

Kirkland Lake Gold Mining Company, Limited, was incorporated in November, 1915, with a capitalization of 5,500,000 shares of \$1 par value, of which 5,326,699 have been issued.

The officers and directors are: J. B. Tyrrell, president; R. G. O. Thomson, vice-president; R. Graham, secretary-treasurer; V. H. Emery, managing director; A. C. Matthews, W. S. Walton, R. V. Le Sueur, J. A. Dalton, and J. C. Haight, directors. The executive office is 1312 Metropolitan Building, Toronto. The head office and mine office are at Kirkland Lake. P. J. Harris is superintendent.

The property consists of 11 claims, 334.5 acres, in Teck township, Kirkland Lake area, district of Timiskaming.

The following is taken from the report of the managing director for the year ending December 31, 1936:—

ANALYSIS OF OPERATING COSTS

	Total cost	Cost per ton milled
Development and exploration.....	\$90,337.73	\$1.07
Stoping.....	165,914.74	1.96
Transporting ore, hoisting, etc.....	93,890.78	1.11
Milling.....	92,854.81	1.09
Marketing bullion.....	9,321.49	.11
Taxes.....	18,432.04	.22
General and undistributed charges (addition to mill equipment, maintenance mine buildings, administration and management, insurance, workmen's compensation, drainage tunnel, assaying, miscellaneous).....	81,914.29	.97
Total.....	\$552,665.88	\$6.53

The total operating cost per ton milled in 1935 was \$7.99, as against \$6.53 in 1936. This is a reduction of \$1.46.

SUMMARY OF WORK DONE IN MINE

	Quantity	1st lift (surface to 2,400-foot level)	2nd lift (2,400-foot level to 4,900-foot level)	3rd lift (4,900-foot level to 5,800-foot level)
		per cent.	per cent.	per cent.
Ore broken..... tons	91,687	27.9	59.5	12.6
Drifting..... feet	3,760	34.1	59	6.9
Crosscutting..... feet	1,585	6.2	86.4	7.4
Raising..... feet	129	7.8	92.2
Slashing..... cu. ft.	15,049	10.3	89.1	.6
Diamond-drilling..... feet	5,510	42.4	50.5	7.1
Distribution of all development.....	20.3	76.4	3.3

As shown, the largest percentage of work was done in the centre portion of the mine, where some entirely new levels have been opened up and are still in process of being developed. In this section, also, is the long crosscut being driven into the ground recently acquired from the Grozell Company.

There was milled 12,759 tons more than the previous year, with an increase of broken ore in the mine of 7,008 tons, bringing the total broken ore in the mine to 40,656 tons.

MILLING STATISTICS

Ore milled..... tons	\$4,679
Average value per ton.....	\$10.04
Gross value.....	\$849,892.08
Recovery per ton.....	\$8.81
Loss in tailings.....	\$104,403.13
Net value recovered.....	\$745,488.95
Average tons milled per day.....	232
Value in tailings per ton.....	\$1.23
Per cent. extraction.....	87.716

The increase in tonnage milled has been made at a sacrifice of a slight decrease in extraction. Our milling problems have been carefully studied, and experimental work indicates an appreciable increase in extraction may be made by adding to the agitating capacity. Plans and an estimated cost of this increase are now being prepared. If it is shown that the expenditure required will be justified, the addition will be made this coming summer.

To make possible the exploration of some promising ground in the adjoining Grozell property, which had been lying idle for some years and in which your company already held a 67 per cent. interest, the Grozell property was purchased in July last. A crosscut was immediately started on the 3,600-foot level from the Kirkland Lake workings for the purpose of exploring this ground. Excellent progress has been made in this work, and the objective should be reached some time in March, 1937. The cost of this work has all been charged to current operating cost.

Your company also owned a 61.6 per cent. interest in Kirkland Basin Gold Mines, Limited, which has a group of four claims lying north of the Lake Shore Gold Mines. These claims are mostly water-covered. From a study made of these claims, it appeared that a north break in favourable geology cuts through this property and fully justified some exploration.

In order to raise funds for this exploration, the Kirkland Basin Company offered to its shareholders 200,000 treasury shares at ten cents per share. Your company took up its allotment of 123,255 shares and agreed to look after a diamond-drilling programme. One shallow hole was drilled, which proved the existence of the break in favourable geology. A second long hole is now being drilled, which is expected to cut the break at a considerably greater depth.

Your company also owns outright four claims lying a short distance to the west of the Kirkland Basin claims and north of the Macassa Gold Mines. During the year a study of these claims was made, and the surface structure and geology mapped. This study indicates that some further exploration would be justified.

Toward the end of the year, along with the other mines in the district, your company made a substantial increase in wages to all classes of labour.

Your plant and equipment have been maintained in good repair.

The substantial decrease of \$1.46 in the operating cost from the previous year has made it possible to mine ore that was heretofore non-commercial. This has and will add materially to the life of the mine. The year's development has disclosed considerable new ore, placing your mine in a still stronger position.

With the new ground acquired and the larger expansion programme under way there is every reason to hope that another year will show a considerable improvement in the ore position as well as in production.

An average of 155 men was employed during the year.

Kir-Vit Gold Mines, Limited

Kir-Vit Gold Mines, Limited, is a private company. The head office address is 702 Excelsior Life Building, Toronto. The property consists of 4 patented claims and 13 claims under option in McVittie township, Larder Lake area, district of Timiskaming.

During the year a cookery and office buildings were built. Some 5,000 feet of surface trenching and 7,200 feet of diamond-drilling was done.

An average of 10 men was employed from April to December. Ralph Hurd is mine manager. The mine office address is Box 25, Larder Lake.

Lac-Teck Gold Mines, Limited

Lac-Teck Gold Mines, Limited, was incorporated in September, 1934, with a capitalization of 3,000,000 shares of no par value, of which 1,825,005 have been issued.

The officers and directors are: R. F. Hardy, president; W. G. Chapman, secretary-treasurer; S. C. McLaughlin, Eugene E. Danis, and H. E. Fenn, directors. The head office is at 200 Bay Street, Toronto.

The properties consist of approximately 1,320 acres: 5 claims in Teck township, Kirkland Lake area, district of Timiskaming; 10 claims in Fulford township, Little Long Lac area; and 18 claims in Irwin township, Sturgeon River area, Thunder Bay district.

At the property in Teck township, 2 camp buildings and 2 machinery buildings, all of frame construction, were erected. The property was explored by trenching. An average of 11 men was employed for six months. F. B. Goedike was in charge.

The company also reports that on the Little Long Lac property they built a log camp-building and a 40-foot timber headframe, and did 900 feet of diamond-drilling underground. Three shafts, 9 by 7 feet, 44, 30, and 22 feet deep, were sunk. One cross cut, at a depth of 30 feet, was driven for a distance of 20 feet.

Lake Caswell Mines, Limited

Lake Caswell Mines, Limited, was incorporated in April, 1934, with an authorized capitalization of 3,000,000 shares of \$1 par value. The officers and directors are: T. A. Burke, president; L. J. Layden, vice-president; H. J. Stuart, secretary-treasurer; F. J. Sullivan, general manager; D. McKenna and A. Ritchie,

directors. The head office is at 1465 Yonge Street, Toronto. The mine address is Shiningtree. The property is located in Macmurchy township, West Shiningtree area district of Sudbury.

Underground work was resumed June, 1936, for the first time since August, 1934. The 500-foot vertical shaft was dewatered to the 240-foot level, where 450 feet of drifting and 326 feet of crosscutting was accomplished by the end of the year.

The plant included a 95 h.p. boiler, Jenckes 10- by 12-inch steam hoist, and Ingersoll-Rand 460-cubic-foot compressor.

An average of 16 men was employed, of whom 5 were underground. C. Van Norman was in charge of operations.

Lake Shore Mines, Limited

Lake Shore Mines, Limited, was incorporated in February, 1914, with a capitalization of 2,000,000 shares of \$1 par value, all of which have been issued. The officers and directors are: Dr. W. P. St. Charles, president and treasurer; W. H. Wright, vice-president; A. L. Blomfield, managing director; Albert Wende and Ernest Martin, directors. Kirkland Securities, Limited, is secretary. E. W. Todd is superintendent. The head office and mine office are at Kirkland Lake.

The property consists of 8 claims and 4 fractions, 287.15 acres, in Teck township, Kirkland Lake area, district of Timiskaming.

During the year, there were 17,603 feet of underground diamond-drilling, 6,449 feet of crosscutting, and 10,162 feet of drifting done, and 1,742 feet of No. 5 shaft was completed. Some 888,554 tons of ore was hoisted and milled. The milling rate is now 2,500 tons per day.

An average of 1,484 men was employed during the year.

The following is taken from the report of the superintendent for the fiscal year ending June 30, 1937:—

During the year 879,559 dry tons were treated, yielding 447,492 ounces of gold and 109,996 ounces of silver. The gross value amounted to \$15,692,652.85.

Development

The aggregate footage of drifting accomplished during the year amounted to 18,410 feet. Of this total, 10,502 feet, or 57 per cent., were driven in ore, having an average grade of 0.59 ounces per ton over an average width of 53.1 inches as exposed in the drifts.

Development footage was divided approximately evenly between No. 1 and No. 2 vein zones, the principal work consisting of partially opening up new levels to a depth of 4,075 feet. Of the total amount of drifting, 9,457 feet, driven in the south or No. 1 vein zone, produced 5,054 feet of ore, averaging 0.656 ounces per ton across an average exposed width of 54.5 inches. In the north vein zone, 8,973 feet of drifting indicated 5,448 feet of ore having an average grade of 0.54 ounces over an exposed width of 52 inches.

During the next fiscal year development of the new levels between the 3,000- and 4,000-foot horizons will be continued and, on the completion of No. 5 shaft, work will be resumed on a larger scale in the upper part of the mine. At the end of the year, excavation of this shaft was completed to a depth of 2,825 feet. Crosscutting to connect with present workings and pilot-raising were mostly completed to the 3,825-foot level.

Stoping

The filled square-set steep rill method of stoping, considered to be the most suitable to the ground conditions at Lake Shore Mines, has been extended in scope with beneficial results in regard to control of ground movements.

At the end of the fiscal year, the drift length of ore on which no stoping had been done amounted to 18,162 feet, having an average exposed width of 58 inches and an average grade of 0.61 ounces. Backfill placed in stopes during the year amounted to 436,406 tons. No. 1 vein zone continued to yield a high percentage of the ore milled, there being little change from the previous year.

Milling

Minor alterations only were made in the mill treatment during the year to adjust it to variations in the character of the ore and to rising prices of some of the chemicals used.

Experiments were continued on the problem of recovering the gold included, in an extremely finely divided condition, within the pyrite in the present tailing.

Lakeside-Kirkland Gold Mines, Limited

Lakeside-Kirkland Gold Mines, Limited, was incorporated in April, 1934, with a capitalization of 3,000,000 shares of \$1 par value, of which 1,611,007 were issued at July, 1936.

The officers and directors are: E. B. Knapp, president and managing director; Dr. J. F. Fairbairn, vice-president; W. T. Sass, A. C. Wintermeyer, C. H. Musselman, directors. V. H. Hattin, the secretary-treasurer, who died late in 1936, has been succeeded by G. E. Eastman. The head office is at 19 King Street East, Kitchener.

The property, which consists of 267 acres in Lebel township, Kirkland Lake area, district of Timiskaming, was formerly operated by the Queen Lebel Gold Mining Company, Limited.

During the year, a new electrical sinking plant was installed, and a 3-compartment shaft was sunk to a depth of 78 feet. The property was closed down on September 1, 1936.

When the property was visited in August, 1936, the force consisted of 25 men under the direction of R. D. Callin, superintendent. The mine office was at King Kirkland.

L. B. United Mines, Limited

L. B. United Mines, Limited, was incorporated in May, 1934, with an authorized capitalization of 3,500,000 shares of \$1 par value. The officers and directors are: R. H. Halbert, president; Merven Lancaster, vice-president; A. C. McLean, secretary; Stuart Fleming, H. M. Pettit, Dr. E. Blanchard, and J. C. Allan, directors. The head office is at 767 Yonge Street, Toronto.

The property includes the Centennial mine, situated in township 29, range 22, in the Michipicoten area, district of Algoma.

Underground work was continued at the Centennial mine in 1936 until November 18. Surface work was done for the balance of the year.

The underground work consisted of 409 feet of lateral work on the 125-foot level and 1,683 feet of lateral work, and 38 feet of raising on the 250-foot level. Most of this work was done on lamprophyre dikes which were believed to carry commercial values of the platinum-group metals. The Ontario Securities Commission, however, had an examination made of the mine in October, which failed to disclose values in these metals. Work was then transferred to gold veins.

The 50-ton amalgamation-flotation mill was operated until October, and a total of 8,038 tons was milled during 1936.

An average of 39 men was employed, of whom 12 were underground. L. K. Lytle, J. E. Hanlon, and R. B. Adair were successively in charge of operations. The mine address is Gold Park.

Lebel Oro Mines, Limited

Lebel Oro Mines, Limited, was incorporated in April, 1920, with an authorized capitalization of 3,500,000 shares of \$1 par value. The officers and directors are: L. K. Fletcher, president; E. H. Watt, vice-president; A. B.

Mortimer, secretary-treasurer; E. J. Dwyer, W. H. Englebright, and T. H. Rea, directors. The head office is at 320 Bay Street, Toronto.

Lebel Oro Mine, Lebel Township

The property in Lebel township, Kirkland Lake area, district of Timiskaming, consists of 5 claims, 222 acres. An inclined, 2-compartment shaft had been previously sunk on the property to the 200-foot level, and 260 feet of crosscutting and 460 feet of drifting done on this level.

In May, the mine was dewatered, and 1,800 feet of diamond-drilling was done underground and 902 feet from surface. Work was stopped in October.

An average of 13 men for the four months was employed, under the direction of R. P. Teare.

Long Lake Mine

The property includes the old Long Lake mine, located in township 69, district of Sudbury, 16 miles southwest of Sudbury.

Operations were continued throughout 1936 at the old Long Lake mine, which is located 16 miles southwest of Sudbury, in township 69, district of Sudbury. In May a mining plant was installed. A 2-compartment, vertical shaft was sunk to a depth of 207 feet and connected to the old 2nd level at 187 feet by crosscutting 25 feet. The old inclined winze from the 2nd to the 4th level was reconditioned. The 2nd level drift under the old open pit was heavily timbered, and the chutes were repaired. Mining was started in the open pit late in the year, and by the end of the year about 4,500 tons of ore was broken but not drawn out. A total of 3,998 feet of diamond-drilling was done in 1936, of which 500 feet was from surface and the balance from underground.

The mining plant included an Ingersoll-Rand 500-cubic-foot compressor, driven by a 110 h.p. Fairbanks-Morse Diesel engine, and an Ingersoll-Rand 8- by 6-inch air hoist.

A 35 h.p. and a 100 h.p. Ruston-Hornsby Diesel engine were installed with 550-volt generators to supply electric power.

The equipment in the 200-ton mill, built in 1934, was reconditioned. The construction of a crushing plant and an extension to the mill was started in the fall and was three-quarters completed by the end of the year.

Buildings constructed in 1936 included a hoist-compressor house, power house, change-house, and bunk-house.

An average of 26 men was employed under the direction of D. W. M. Ross, Box 156, Sudbury.

Leitch Gold Mines, Limited

Leitch Gold Mines, Limited, was incorporated in July, 1935, with an authorized capitalization of 3,000,000 shares of \$1 par value, of which 2,695,005 have been issued. The officers and directors are: K. J. Springer, president; W. E. Segsworth, vice-president and consulting engineer; H. J. Mackay, secretary-treasurer; Dr. J. H. C. McClelland and Russell Cryderman, directors. The head office is at 320 Bay Street, Toronto. The mine address is Beardmore.

The property held by this company consists of about 400 acres, 4 miles northwest of Beardmore station on the Longlac-Port Arthur branch of the Canadian National Railways, Eva township, Thunder Bay district, and is reached by a 6-mile road from Beardmore, constructed toward the end of the year to connect this property and that of Sand River Gold Mining Company, Limited, with the town of Beardmore.

Early in November, 1935, subsequent to surface work and a total of 3,630 feet of diamond-drilling, a 3-compartment, 5- by 14-foot, vertical shaft was commenced. By the end of the year, the shaft was at a depth of 46 feet, and a mining plant was installed, including an Ingersoll-Rand 8- by 6-inch, double-drum reversible hoist and an Ingersoll-Rand 537-cubic-foot compressor, driven by a 114 h.p. Ruston-Hornsby Diesel engine.

Early in 1936, hydro-electric power was brought in from the Cameron Falls-Northern Empire line, with the installation of a substation consisting of a bank of 3 transformers, each 150 k.v.a., and a bank of 3 transformers, each 75 k.v.a. Additions to the mining plant at this time included an Ingersoll-Rand XVH, 1,050-cubic-foot compressor, driven by a 200 h.p. Westinghouse synchronous motor.

In 1936 the shaft was deepened to 525 feet, with levels at 125, 225, 325, 425, and 525 feet. The following is the development work accomplished during the year:—

Level	Crosscutting	Drifting	Raising
	feet	feet	feet
125-foot.....	257	750
225-foot.....	223	727	50
325-foot.....	153	627	40
425-foot.....	50	100
525-foot.....	50	100

During the time that the above development work was being carried on a sample shipment of ore was made, which netted 58.23 ounces in gold and 4 ounces in silver.

Toward the end of the year, the construction of a 100-ton cyanide-amalgamation mill was commenced, the equipment of which included a Blake 9- by 15-inch crusher, Allis-Chalmers 5- by 8-foot ball mill in closed circuit with an 8- by 12-inch, 2-compartment Denver jig and a 4- by 18-foot Dorr classifier, two 14- by 15-foot Dorr tray thickeners, two 3-compartment Dorr agitators, and two 5- by 6-foot Oliver filters. It is expected that the mill will commence regular production about January 15, 1937, at the rate of between 50 and 75 tons per day.

Surface buildings now on the property include 2 bunk-houses, cook-house, 7 residences, power-house, blacksmith shop, shaft-house, boiler-house equipped with a 60 h.p. locomotive-type boiler, operated at 30-pounds pressure for heating purposes, powder magazine, cap-house, dry-house, assay office, mill, and refinery.

There was an average of 65 men employed, with 22 underground. W. S. Hamilton is mine manager.

Little Long Lac Gold Mines, Limited

Little Long Lac Gold Mines, Limited, was incorporated in January, 1933, with an authorized capitalization of 2,000,000 shares of no par value, of which 1,833,000 have been issued. The officers and directors are: Jos. Errington, president; Thayer Lindsley, vice-president; L. A. Macdonald, secretary-treasurer; D. M. Morin, A. B. Gordon, and D. M. Hogarth, directors. The head office is at 25 King Street West, Toronto. The mine address is Little Long Lac.

The property is two miles south of Geraldton, on the Longlac-Port Arthur branch of the Canadian National Railways, Ashmore township, Little Long Lac area, district of Thunder Bay. There is an automobile highway from Geraldton to the mine.

Operations were continued throughout 1936. During the early part of the year, a total of 11 shrinkage stopes were mined on the 325-, 450-, and 575-foot levels. These were all pulled empty and filled with waste rock, and during the latter part of the year practically all mining was cut-and-fill, with the result that there was a considerable increase in grade, due, in large part, to the elimination of dilution by the easily sloughing greywacké in the walls and the added flexibility of cut-and-fill mining. By the end of the year there was one horizontal cut-and-fill stope on each of the 204-, 325-, 450-, and 575-foot levels, three rilled cut-and-fill stopes on the 700-foot level, and 7 backstopes prepared for cut-and-fill stoping from the 204- to the 700-foot levels, inclusive.

Construction on the property included the erection of a new warehouse, dry-house, and a considerable number of residences. Additions to the mining plant included a "standby" unit consisting of a Westinghouse 60-cycle, 2,300-volt, 312 k.v.a. alternator, driven by a 400 h.p. Ruston-Hornsby Diesel engine.

Early in 1936, an addition was built on the east end of the mill to house a 28- by 12-foot Dorr thickener and a 10- by 16-foot Feine string filter. A Babcock-Wilcox-Goldie-McCullough 745-cubic-foot low-pressure compressor was also installed. These additions balanced the mill circuit as it stood at the end of 1935, and served to raise the capacity to 250 tons daily.

The following is taken from the mine manager's report for the fiscal year ending December 31, 1936:—

PRODUCTION	
Tons hoisted.....	108,057
Tons sorted.....	24,502
<hr/>	
Tons milled.....	83,555
Bullion recovered..... ounces	42,790.348
Bullion recovered per ton milled..... ounces	0.512
Calculated mill residue assay..... ounces	0.0275
Percentage recovery.....	94.903
Bullion marketing costs.....	\$19,216.25

During 1936 the mill operated 362 days, indicating 99 per cent running time. Tonnage milled was increased from 200 to 250 tons on July 1, 1936.

Production since beginning of milling operations in November, 1934, is:—

Period	Tons milled	Gross value	Value per ton
Nov. 24 to Dec. 31, 1934.....	4,715	\$85,480.39	\$18.129
1935.....	62,073	1,108,147.61	17.852
1936.....	83,555	1,500,791.86	17.961

Development

During the year, two new levels were opened up, the 7th and 8th, at 850 feet and 1,000 feet, respectively. On the 7th level, a length of 1,074 feet of continuous ore was developed, giving an average of 0.782 ounces across an average width of 4.71 feet. The 8th level was developed for a length of 1,131 feet, giving an average grade of 0.566 ounces across a width of 4.17 feet.

New ore was also developed on the 5th level east, north of and angling into the main vein. This gave a length of 108 feet, with grade 0.65 ounces across an average width of 5.20 feet.

Development work accomplished for the year was at follows:—

Drifting.....	feet	3,786
Crosscutting.....	feet	1,240
Slashing.....	cu. ft.	44,795
Raising.....	feet	1,122.5
Ore passes.....	feet	685.5
Sumps.....	cu. ft.	13,538
Station-cutting.....	cu. ft.	25,272
Shaft-sinking.....	feet	324
Diamond-drilling, surface.....	feet	5,849
Diamond-drilling, underground.....	feet	3,940

Ore Reserves, January 1, 1937

	Tons	Ounces gold per ton
Proven ore.....	92,081	0.552
Probable ore.....	216,087	.557
Possible ore.....	88,285	.437
	396,453	0.529

Operating Costs

	Total cost	Cost per ton
Development and exploration.....	\$156,298.73	\$1.8706
Mining.....	203,518.46	2.4357
Milling.....	151,264.24	1.8104
Testing and research.....	2,189.88	.0262
Mine office and supervision.....	32,070.15	.3838
General expense at property.....	34,963.53	.4185
Administrative and general expense, Toronto office.....	25,402.11	.3040
Total.....	\$605,707.10	\$7.2492

Construction

Capital expenditure for the year under review has again proven to be a heavy one. Enlargements were made to the mill and roasting plant, and also the power plant. A new water-supply system was installed at Mosher lake, and a sewage system installed in the townsite.

The above programme entailed the following costs:—

Hoist motor, Diesel standby engine, stoker for boiler.....	\$29,524.57
Steel-sharpener.....	1,165.00
7-inch Newhouse crusher.....	8,313.03
Mill addition and equipment.....	40,835.33
Roaster addition and equipment.....	35,343.23
Substation equipment.....	988.76
Hospital addition.....	5,355.45
Dry-house.....	12,773.49
Staff-house.....	4,379.60
Assay office.....	3,928.23
Garage.....	2,053.98
Outside pipe system.....	28,368.68
Power transmission line.....	3,395.27
Sprinkler system.....	5,468.69
Employees' residences.....	10,972.77
Machine-shop equipment.....	2,000.00
Mine locomotive.....	3,903.00
Additional expenditures on plant and equipment.....	29,883.76
Total.....	\$228,652.84

Estimated costs for capital expenditure for the present year are as follows:—

Mill enlargement and installation of new equipment.....	\$30,000
Mine equipment.....	6,000
Buildings, including new warehouse, employees' houses, and repairs.....	15,000
Miscellaneous plant equipment.....	5,000
Total.....	\$56,000

General

The shaft is now being deepened from the 8th level, or 1,000-foot horizon, to the 10th level at 1,300 feet. Tonnage milled will be increased to 300 tons daily, about July 1, 1937.

There was an average of 248 men employed, of whom there were 117 underground, 20 in the mill, and 29 on construction. A. A. Barton is manager, J. H. Kilpatrick is mine superintendent, and A. Rennie is mill superintendent.

Lois Lake Gold Mines, Limited

Lois Lake Gold Mines, Limited, was incorporated in April, 1934, with a capitalization of 3,000,000 shares of \$1 par value, of which 1,601,761 have been issued.

The officers and directors are: V. Barber, president and mine manager; S. P. Myers, vice-president; M. G. Hunt, secretary-treasurer; E. H. Williams and Dr. J. R. Denis, directors. The head office is at Kirkland Lake.

The property consists of 15 claims, approximately 600 acres, in Teck township, Kirkland Lake area, district of Timiskaming. During the summer and fall, a small crew of men did some trenching under the direction of V. Barber.

Macassa Mines, Limited

Macassa Mines, Limited, was incorporated in April, 1926, with a capital of 3,000,000 shares of \$1 par value, of which 2,678,068 have been issued. The officers and directors are: Robert A. Bryce, president; Thomas Riggs, vice-president; L. Soliague, secretary-treasurer; A. G. Slaght, H. M. Porteous, J. D. Perrin, directors. G. A. Howes is mine manager. The head office is 85 Richmond Street West, Toronto. The mine office is at Kirkland Lake.

The property consists of 11 claims, containing 374.27 acres, in Teck township, Kirkland Lake area, district of Timiskaming. An average of 160 men was employed.

The following is an extract from the president's report for the 9-months' period ended December 31, 1936:—

During the period covered by the report the mill treated a total of 53,549 tons, from which was recovered bullion having a gross value of \$930,153.59. After deducting all costs of operation, including exploration and development, an operating profit of \$560,812.56 was obtained.

The development work carried out during the 9-months' period has resulted in a considerable increase in the company's ore reserves, full particulars of which will be found in the mine manager's report.

During the nine months covered by this report, two dividends of five cents each have been disbursed, entailing an expenditure of \$267,806.80. A further dividend at the same rate will be paid on March 1. It will continue to be the policy of your directors to authorize the payment of further dividends from time to time as in their opinion the company's earnings may warrant.

Previously, we have terminated our fiscal year as at March 31. We are now adopting a fiscal period to conform with the calendar year, hence this report covers a period of nine months, from April 1 to December 31, 1936.

The following is taken from the mine manager's report for the 9-months' period April 1 to December 31, 1936:—

Production

During the period under review, a gross production of \$930,153.59 was obtained from 53,549 tons of dry ore. Recovery per ton was therefore 0.496 ounces, or \$17.37. In addition, sundry revenue at the mine amounted to \$1,792.46.

Development

A summary of development work is as follows:—

	1936 ¹	1935-36	1934-35	1933-34
	feet	feet	feet	feet
Drifting.....	4,320	9,094.5	5,988	3,483.5
Crosscutting.....	1,215.5	1,697	1,033	349
Raising.....	787	1,700	1,409	744
Shaft-sinking.....	101	481
Winze-sinking.....	415
Station-cutting.....	73	43	91	30
Total.....	6,810.5	12,635.5	9,002	4,606.5
Diamond-drilling.....	5,403	10,109	3,489	2,701.5

¹ Nine months.

The major portion of the development work during the period consisted of continuing lateral work east and west on the 3,000-foot level, preparing for and sinking a winze to a depth of 415 feet below the 3,000-foot, and intersecting ore in crosscuts on the 3,100-, 3,225-, and 3,350-foot levels. Other lateral work was done on several of the upper levels of the mine.

The outstanding result of development work during the period was the extension of the ore length on the 3,000-foot level to a total of 1,410 feet, having an average grade of \$17.80 over an average width of 6.8 feet. Three minor branch veins were found which contained good ore and which indicate a wider and more extensive fractured zone than that of the upper portion of the mine. This condition adds greatly to the possibilities of the new levels on which development has commenced below the 3,000-foot level. There is still 410 feet along the break to be explored on this level.

An internal winze (shaft) was sunk from the 3,000-foot level to a depth of 415 feet, and crosscuts have intersected ore on three new levels: 3,100-, 3,225-, and 3,350-foot. As this internal winze or shaft is for the mining of ore below the 3,000-foot level, it necessitated a large amount of preparatory development work to facilitate the mining and hoisting of the ore below this level, the cost of all of which has been written off in the development cost for the year.

Time has not permitted very extensive exploration of these three levels but as at February 19, 1937, two ore intersections were found on the 3,100-foot level, one of which has been proven for a length of 120 feet, showing 0.6 ounces ore over drift width. On the 3,225-foot level a length of 125 feet of ore, averaging mine grade over an indicated width of 16 feet, and on the 3,350-foot level a length of 220 feet averaging at least mine grade over a width of 11 feet has been found.

The early development results on these new levels, as indicated, point strongly to the possibility that results on them will be as good as and possibly better than those obtained on the 3,000-foot level.

The original surface hoist was moved down and set up in a large hoist-room at the winze on the 3,000-foot level and is now used to hoist from the three new levels. A new and larger hoist with the necessary electrical equipment was purchased and installed at the surface.

In addition to the 3,000-foot level ore, new ore was developed on the 1,300-, 1,400-, 2,000-, and 2,800-foot levels and developed sufficiently to show an increase in ore reserves as at December 31, 1936.

Ore Reserves

Only positive ore is included in the following statement of ore reserves:—

	Tons	Ounces per ton	Value per ton at \$35
Unbroken ore.....	161,800	0.44	\$15.40
Broken ore.....	24,450	.47	16.45
Surface ore dump.....	2,420	.43	15.05
	188,670	0.44	\$15.40

These figures include only the ore so far developed between the 1,300- and 3,000-foot levels. This year the plan is to explore and develop the three new levels below the 3,000-foot as well as to further explore the 2,800-foot and other upper levels in the mine.

Mill

It was found from experience and from recent research work in the Kirkland Lake camp that to get maximum extraction extremely fine grinding of the ore was necessary. From experience, this mill was found to give best results at a 175-tons-per-day rate. Therefore, to take advantage of these facts, in September an additional thickener, two new agitators, and another filter were installed. This addition has made it possible to maintain a steady tonnage of over 200 tons per day with an increase in extraction from 93.81 per cent. as in 1935 to 95.1 per cent at this date, without new grinding equipment.

A new tube mill and classifier are at present being installed and when in operation, it will be possible to treat between 250 and 300 tons per day with a probable further improvement in extraction.

Operating Costs

The following are the operating costs, including head office administration but before provision for taxes, depreciation, and preliminary exploration write-off. All operating and exploration and development charges during this period have been absorbed in current operating costs.

	1936 Cost per ton milled	1935 Cost per ton milled
Development and exploration	\$2.46	\$2.80
Mining (stopping, trammig, pumping, etc.).....	2.32	2.48
Milling.....	1.51	1.49
Administration and general charges (including head office, mint charges, and bullion handling charges).....	.99	.97
Total.....	\$7.28	\$7.74

A reduction in costs of 46 cents per ton milled was obtained over those of 1935.

Capital Expenditure

The new hoist, mill equipment, office, underground equipment and their accessories formed the bulk of the capital expenditures. The itemized list is as follows:—

Mine office	\$14,122.99
Hoist and hoist building.....	41,443.29
Mill additions and equipment.....	56,118.54
Underground equipment.....	19,313.05
Transformers and substations.....	12,394.16
Company residence.....	2,140.81
Boiler-house changes.....	2,253.06
General surface improvements.....	1,011.11
Fire protection.....	1,916.05
Oil-house.....	705.24
Miscellaneous.....	5,767.52
Total.....	\$157,185.82

I. F. Machin

At the beginning of 1936, I. F. Machin and I. A. Machin, of Kenora, commenced work on the old Olympia mine, situated on the northwest shore of Helldiver bay, Shoal lake, district of Kenora, about $1\frac{1}{4}$ miles south of the Mikado mine.

The property includes patented claims D.202, D.199, S.105, and M.11. Some forty years ago, previous operators sank a shaft to a depth of 65 feet on the vein, with 9 feet of drifting at the 53-foot level. The present owners carried on underground work until September, 1936. The shaft was deepened to 125 feet and a level established at 109 feet, where 287 feet of crosscutting and 50 feet of drifting were done.

Buildings on the property include mill, power-house, boiler-room, black-smith shop, storehouse, bunk-house, cook-house, stable, and icehouse.

The mill, which, it is reported, last operated about 1918 or 1919, is a 10-stamp amalgamation unit. The mining plant includes an Ingersoll-Rand 250-cubic-foot steam compressor, a 65 h.p. Scotch marine boiler, and a 6- by 9-inch reversible hoist.

To the end of September there was an average of 9 men employed, of whom 3 were underground. Hilding Johnston was in charge.

The mine and head office address is Box 581, Kenora.

McIntyre-Porcupine Mines, Limited

McIntyre-Porcupine Mines, Limited, was incorporated in March, 1911, with an authorized capitalization of 800,000 shares of \$5 par value, of which 798,000 have been issued. The officers of the company are: J. P. Bickell, president; Bernard E. Smith, vice-president; E. D. Fox, secretary; Balmer Neilly,

treasurer. The directors are: J. P. Bickell, Bernard E. Smith, D. H. McDougall, Strachan Johnston, and R. S. McLaughlin. R. J. Ennis is general manager. The executive office of the company is at 15 King Street West, Toronto. The head office and mine office are at Schumacher.

The main property of the company at Schumacher, in the township of Tisdale, Porcupine area, district of Cochrane, is the McIntyre mine, which is made up of 15 claims, containing 680 acres. The company has numerous holdings in other parts of the Dominion. Other properties held in Ontario include 8 claims at Birch lake, 10 claims at O'Sullivan lake, 10 claims at Sturgeon river, and 6 claims held under option in Macklem township.

During 1936, McIntyre-Porcupine Mines employed an average of 1,117 men at their Schumacher property. Of this number, 837 were employed underground and 68 in the mill.

During the year a steel headframe was erected over the No. 4 shaft, replacing a timber headframe that had been in use for some years. Gravel backfilling was also introduced into the mine, and approximately 1,000 tons per day was brought to the mine over the aerial tramway since its inauguration early in the summer.

The following is taken from the report of the general manager for the fiscal year ending March 31, 1937:—

Production

Ore treated..... tons	\$64,500
Value per ton (0.286 ounces).....	\$10.00
Gross value.....	\$8,641,205.24
Bullion recovered:	
Gold (233,679.505 ounces at \$34.99).....	\$8,178,657.48
Silver (51,450.95 ounces at \$0.442).....	22,759.46
Total value.....	\$8,201,416.94
Recovered per ton (0.270 ounces).....	\$9.49
Bullion melting, refining, and handling charges.....	100,720.64
	\$8,100,696.30

General

The ore reserve estimate indicates a slight increase in tonnage and a drop in grade of 18 cents per ton. However, in the aggregate, the estimate differs but little from that of a year ago.

Costs continue to show a moderately upward trend. The 32-cent-per-ton increase is in part attributable to the backfilling, retimbering, and re-examination of old workings, but an analysis of the figures above submitted will indicate that the distribution of the additional cost affected almost every phase of the operations.

Development work on the lower level through No. 12 internal shaft continues to show fair results. Thirty-five per cent. of drifting was in ore, assaying 0.368 ounces per ton over drift width.

Outside Exploration

Belleterre Mines, Limited, was organized in June, 1936, to consolidate the several groups of claims owned wholly or in part by this company in Guillet township, Quebec. This property is being developed from two shafts. No. 1, with levels at 125, 250, and 375 feet, was sunk prior to this fiscal year. No. 2 was continued to a depth of 535 feet, with levels at 125, 250, 375, and

500 feet, and a total of 2,750 feet of lateral work was completed during the year. A mining plant, with Diesel-engine power, shops, permanent camp buildings, and a 100-ton cyanide mill, was erected and put into operation October 1, 1936. Since that date the mill has treated 17,090 tons of ore from dumps and development drives, recovering \$6.32 per ton, or a total of \$108,008.00. Estimated ore reserves are 78,231 tons at \$10.20, or \$797,076.00.

Forty-eight outside properties were examined during the year and options acquired on five. Three have been given up, and diamond-drilling is proceeding on the other two.

McKenzie Red Lake Gold Mines, Limited

McKenzie Red Lake Gold Mines, Limited, incorporated February 1, 1933, has an authorized capitalization of 3,000,000 shares of \$1 par value, of which 2,900,000 have been issued. The officers and directors are: W. G. Armstrong, president; F. D. Reid, vice-president; H. M. Anderson, secretary-treasurer; M. F. Fairlie, managing director; G. W. Quinn, director. The head office is at 347 Bay Street, Toronto. The mine address is McKenzie Island.

The property consists of 11 claims on the north end of Mackenzie island, in Red lake, Dome township, Patricia portion of Kenora district. Electric power is supplied to the mine from the Hydro line between Ear Falls and the Howey mine.

Production was continued at this property during 1936. The capacity of the cyanide mill was increased from 125 to 150 tons per day by the addition of two more agitators, more trays in the thickeners, and an increase of 50 per cent. in filter capacity. The equipment in the mill now includes a 36-inch picking belt, Hadfield 10- by 20-inch jaw crusher, Symons 3-foot cone crusher, a 5- by 16-foot tube mill in closed circuit with an Akins classifier, four 12- by 26-foot Dorr agitators, two 12- by 30-foot Dorr thickeners, and a continuous American filter.

During 1936, the mill treated 52,465 tons of ore with a recovery of \$743,-377.47, as against 36,117 tons yielding \$533,205.48 during the first 10 months of 1935.

Most of the ore milled during 1936 was obtained from 2 stopes on the 150-foot level, 10 on the 250-foot level, 7 on the 350-foot level, and 7 on the 450-foot level. The stopes are all mined by open-stope methods and, owing to the flatness of the veins, in most cases dip from 20 to 45 degrees. In some of the flatter ones, mucking is accomplished by the hoe type of scraper.

During the year, the 36-degree winze from the 450-foot level was continued to a vertical depth of 500 feet (757 feet on the slope), and two new levels were opened up from this at the 550- and 650-foot horizons. The following table shows the remainder of the development work accomplished during 1936:—

Level	Drifts	Crosscuts	Raises
	feet	feet	feet
150-foot.....	705	138	51
250-foot.....	369	463	403
350-foot.....	1,109	87	693
450-foot.....	2,083	106	987
550-foot.....	1,198	239	121
650-foot.....	1,011	22	194
Total.....	6,475	1,055	2,449

There was an average of 108 men employed, of whom 62 were underground and 11 in the mill. J. L. Ramsell is mine manager, and L. A. Butler is mill superintendent.

McLaren-Porcupine Gold Mines, Limited

McLaren-Porcupine Gold Mines, Limited, was incorporated in August, 1934, with a capitalization of 3,000,000 shares of \$1 par value. The officers and directors are: Dr. W. M. McLaren, president; J. M. McLaren, vice-president; J. J. Gallagher, secretary-treasurer; N. W. Kingsland, Gerard Ruel, and Dr. R. P. Smith, directors. The head office and mine office are at South Porcupine.

The company's property consists of 8 claims, approximately 300 acres, in the township of Deloro, Porcupine area, district of Cochrane.

Glory-hole mining operations have been carried out on a small scale at this property during the past two years. The ore is sorted, and the best of it is milled. The mill is capable of handling about 12 tons per 24 hours. Some 500 tons of sorted ore were reported to have been milled in 1936, from which recovery was stated to have value of \$5,000. The pit was deepened about 20 feet in 1936, the deepest point now being about 70 feet. Further sinking in the pit is not contemplated at present. In the fall of the year a drift was started about 6 feet above the bottom of the pit; this was advanced some 30 feet by the end of the year. When this drift was started the intention then was to drive in some distance and from the end of the drift to raise and sink a shaft. Approximately 1,500 feet of diamond-drilling was done on the property in 1936.

The average number of men employed during the year was 10. J. M. McLaren is mine manager.

MacLeod-Cockshutt Gold Mines, Limited

MacLeod-Cockshutt Gold Mines, Limited, was incorporated in September, 1933, with an authorized capitalization of 3,000,000 shares of \$1 par value, of which 2,817,565 have been issued. The officers and directors are: F. G. MacLeod, president; J. M. Macintosh, vice-president and secretary-treasurer; D. M. Hogarth, Arthur Cockshutt, Jos. Errington, H. S. Munroe, and Fred Searls, Jr., directors. The head office is at 357 Bay Street, Toronto. The mine address is Little Long Lac.

The property consists of 22 claims, totalling 1,709 acres, about 3 miles from Geraldton on the Longlac-Port Arthur branch of the Canadian National Railways, Ashmore township, Little Long Lac area, district of Thunder Bay. The active section of the property was staked in 1931 by Messrs. MacLeod and Cockshutt. In the summer of 1933, a showing was discovered on claim No. 10,040, which led to further work and an option by the Connell Mining and Exploration Company, Limited, which did considerable surface work and 8,780 feet of diamond-drilling. In May, 1934, a 120 h.p. steam plant was installed and a 3-compartment, vertical shaft was sunk to a depth of 172 feet, with 1,782 feet of drifting and crosscutting on the 150-foot level. The results obtained were disappointing, and operations were suspended at the end of 1934.

In 1935, diamond-drilling was again commenced, followed by surface exploration, but the property again became inactive at the end of the year.

Early in 1936, following further surface exploration on claim No. 10,038, a diamond-drilling programme was again commenced, from which such favourable results were obtained that the sinking of a 4-compartment, 7- by 24-foot, vertical shaft was commenced in June to develop the ore bodies indicated by drilling. Underground work has been continued throughout the year, in conjunction with diamond-drilling to the extent of 13,963 feet on surface and 2,059 feet underground. The new shaft was sunk to a depth of 532 feet, the following lateral development being accomplished at the end of the year:—

Level	Crosscuts	Drifts
	feet	feet
200-foot.....	123	960.5
350-foot.....	178.5	142.5
500-foot.....	227.5	106.5
Total.....	529	1,209.5

On July 5, the old plant at No. 1 shaft was completely destroyed by forest fires. The buildings remaining near the old site include a bunk-house, cookery, office, 6 residences, and a general store. The new buildings constructed at the site of the new shaft include a power-house and hoist-room, boiler-house, blacksmith shop, warehouse, daily supply powder magazine, and cap-house.

The plant installed for sinking the new shaft includes a 135 h.p. Pacific-type return tubular boiler, Ingersoll-Rand double-drum 11- by 8-inch steam hoist, Ingersoll-Rand 9- by 8-inch, single-drum hoist for maintenance of shaft rigging, and Bellis-Morcome 750-cubic-foot compressor driven by a Ruston-Hornsby 200 h.p. Diesel engine.

During the last six months of the year there was an average of 115 men employed, of whom 58 were underground. A. A. Barton is mine manager.

McMillan Gold Mines, Limited

McMillan Gold Mines, Limited, was incorporated in December, 1926. The authorized capitalization is 4,000,000 shares of \$1 par value. The officers and directors are: G. A. Foot, president; T. F. Wende, vice-president; Mrs. F. Lafferty, secretary-treasurer; Dr. F. C. Fraser and Dr. S. S. Polack, directors. The head office is at Sudbury. The mine address is Footbanks.

The property is located in Mongowin township, district of Sudbury, and is about 60 miles southwest of Sudbury.

During the first three months of 1936 the only work done consisted of underground diamond-drilling, and 47 feet of drifting on the 875-foot level. Work was then suspended until the middle of July, when diamond-drilling was resumed for three months. Mining was resumed on November 4, and during the balance of the year stoping was done on the 525-, 750-, and 875-foot levels, and 55 feet of raising on the 525-foot level.

The 125-ton mill was put in operation on November 21, and by the end of the year had treated 3,656 tons of ore.

An average of 18 men was employed during 1936. G. C. Dunn was in charge until May. Evan Harris took charge in November.

Madsen Red Lake Gold Mines, Limited

Madsen Red Lake Gold Mines, Limited, was incorporated in March, 1935, with an authorized capitalization of 5,000,000 shares of \$1 par value. The officers and directors are: Jos. McDonough, president; F. R. Marshall, vice-president; W. G. Hughson, secretary-treasurer; A. J. Doane, D. M. Hogarth, W. J. Ryan, C. D. Kaeding, and Marius Madsen, directors. The head office is Room 811, 67 Yonge Street, Toronto, and the mine address is Red Lake.

The property consists of a block of 29 claims, totalling 1,553 acres, in the townships of Baird and Heyson, Red Lake area, in the Patricia portion of the district of Kenora. It is located at Faulkenham lake, about 7½ miles southwest of the Howey mine.

On claim K.R.L. 11,505, following surface work and diamond-drilling in 1935, a 2-compartment, vertical shaft was sunk, which, by the end of 1935, had reached a depth of 175 feet, and by the end of 1936, 573 feet. By the end of 1936, also, the following crosscutting and drifting had been accomplished:—

Level	Crosscutting	Drifting
	feet	feet
100-foot.....	236	177
212-foot.....	150	874

On September 27, underground work was suspended in order to concentrate activities on a new discovery on the property, near the northeast shore of Beaver-dam lake. This discovery, called the Austin vein, was made toward the end of July by Austin McVeigh, who had been engaged by A. H. Honsberger, then resident manager, to prospect other parts of the property.

The Austin vein occurs in a strongly sheared volcanic at or near its contact with a large porphyry dike striking northeast and dipping at about 70° S.E.

The shear zone was explored over a length of about 3,450 feet by diamond-drilling, and a lenticular ore body was indicated, about 1,200 feet long and from 8 to 36 feet wide. Drilling to a depth of about 450 feet vertical indicated an average value, over the above dimensions, of about 0.16 ounces per ton.

On September 1, Howey Gold Mines, Limited, were appointed as managers, succeeding A. H. Honsberger. At the time work was suspended underground on No. 1 vein, the buildings on the property included a powder magazine, cap-house, power-house and hoist-room, blacksmith shop, assay office, mine office, 2 bunk-houses, and cookery. The plant equipment included two 60 h.p. locomotive-type boilers, Canadian Ingersoll-Rand 14- by 12-inch, 400-cubic-foot compressor, and Canadian Ingersoll-Rand 11- by 8-inch, single-drum, reversible steam hoist.

In December, Howey Gold Mines resigned as managers of the property, and a new appointment had not been made on December 31. There was an average of 40 men employed, of whom 24 were underground.

Magnet Consolidated Mines (1936), Limited

Magnet Consolidated Mines (1936), Limited, was incorporated on April 23, 1936, with an authorized capitalization of 3,000,000 shares of \$1 par value. The officers and directors are: A. W. Burt, president; T. M. Mungovan, vice-president; F. E. Forster, secretary-treasurer; T. J. Day and Miss Ellen D. Birchard, directors. The head office is at 347 Bay Street, Toronto. The mine address is Geraldton.

The company owns 46 claims in Errington township, Little Long Lac area, district of Thunder Bay, adjoining the property of Bankfield Consolidated Mines, Limited, to the south and east, about 2 miles southwest of Bankfield station on the Longlac-Port Arthur branch of the Canadian National Railways. The property combines the two properties formerly owned by Wells Longlac Mines, Limited, and Magnet Lake Gold Mines, Limited, who after considerable diamond-drilling found that the most favourable intersections were at or near the boundary between the properties and therefore sold their claims and other considerations to the new company for 750,000 shares each.

Subsequent to further exploration work, the sinking of a 7- by 16-foot, 3-compartment shaft was commenced in October on claim No. 10,398, which by the end of the year had reached a depth of about 80 feet.

A full set of camps have been built on the property, and the mining plant consists of a Chicago 350-cubic-foot pneumatic compressor, 8- by 6-inch steam hoist, and Leonard 60 h.p. boiler.

During the last three months of the year there were 37 men employed, with 20 underground, under the direction of H. Smeaton.

Manitoba and Eastern Mines, Limited

Manitoba and Eastern Mines, Limited, was incorporated in 1928 with a capitalization of 5,000,000 shares of no par value, of which 4,770,654 have been issued. The officers and directors are: W. E. Hurd, president; A. J. Bolton, vice-president; T. M. Mungovan, secretary; W. G. Chipp, treasurer; R. J. Jowsey, director. The head office is 36 Toronto Street, Toronto.

The property, which consists of 18 claims in Strathy township, district of Nipissing, was reopened in March, 1936, after being idle since the fall of 1935. A new dry-house and an assay office, both of frame construction, have been built. The shaft was sunk from 325 to 525 feet. Levels at 100, 400, and 500 feet were established. Diamond-drilling to the extent of 2,601 feet was done from surface. About 715 feet of crosscutting and 2,207 feet of drifting were done. Some 14,300 tons of waste were hoisted.

An average of 36 men per month for the 10 months was employed. B. M. Arnott is manager. The mine office is Timagami.

Margaret Red Lake Mines, Limited

Margaret Mines, Limited, was incorporated in June, 1933, with an authorized capital of 600,000 shares of \$1 par value. In July, 1936, the name was changed to Margaret Red Lake Mines, Limited, the authorized capitalization being 3,000,000 shares of \$1 par value, of which 1,461,163 have been issued. The officers and directors are: A. Kelso Roberts, president; G. E. Gare, secretary-treasurer; C. Price-Green, W. W. Soden-Irwin, and Nixon Berry, directors. The head office is at 320 Bay Street, Toronto. The mine address is Red Lake.

The property consists of 54 patented claims in one group, located about 4 miles north of the Howey mine, in Dome township, Red Lake area, Patricia portion of the district of Kenora.

Operations were last conducted at this property in 1933, at which time the shaft had reached a depth of 188 feet with 50 feet of drifting on the 80-foot level and 300 feet of drifting and crosscutting on the 175-foot level.

Operations were resumed in June, 1936, under the direction of the Richmond Development Company, Limited, of 25 Richmond Street, Toronto, who entered an agreement to conduct an exploration campaign. No underground work was done during the year, operations being confined to surface exploration and diamond-drilling. In August, an agreement was entered into through the Richmond Development Company with Richmac Gold Mines (1936), Limited, permitting the exploration and exploitation of claim K.R.L. 432 on the Richmac property adjoining claim K.R.L. 1,022 on the Margaret Red Lake property.

During the last 7 months of 1936 there was an average of 30 men employed. W. W. Mills is manager.

Martin-Bird Gold Mines, Limited

Martin-Bird Gold Mines, Limited, was incorporated in May, 1936, with a capitalization of 4,000,000 shares of \$1 par value, of which 2,550,005 have been issued.

The officers and directors are: S. J. Bird, president; L. O. Lumbers, vice-president and secretary-treasurer; T. W. Jull, B. M. Stevens, G. D. O'Meara, directors. D. M. McPhail replaced, as mine manager, John Campbell, who remained as geologist. C. W. Greenland is consulting engineer. The executive office is at 405 Brock Building, 200 Bay Street, Toronto. The mine office is at Larder Lake.

The property consists of 9 claims, approximately 250 acres, in Hearst township, Larder Lake area, district of Timiskaming, and was acquired from the Martin Bird Syndicate. An average of 26 men was employed for the year.

During the year, a complete new plant was installed, and the shaft was deepened from 136 feet to 401 feet. Two new levels were established at 250 and 375 feet, and crosscutting and drifting were started.

The following frame buildings were erected: boiler-house, 20 by 30 feet; dry-house, 12 by 20 feet; assay office, 12 by 18 feet; 2-storey office and store-houses, 24 by 32 feet; bunk-house, 16 by 25 feet; power-house, 40 by 60 feet; powder magazine, 12 by 15 feet; 35-foot timber headframe.

New plant equipment was installed, consisting of: Canadian Ingersoll-Rand 47.8 h.p., 24-inch, double-drum air hoist; Sullivan 500-cubic-foot, Diesel-driven compressor; Canadian Ingersoll-Rand 340-cubic-foot, Diesel-driven compressor.

The development reported to date consists of a vertical, 2-compartment shaft, 7 by 9 feet, sunk to a depth of 401 feet, with levels established at 125, 250, and 375 feet; 628 feet of crosscutting and 892 feet of drifting; 4,917 feet of surface diamond-drilling and 2,843 feet of underground diamond-drilling; 2,166 feet of surface trenching; 2,140 tons of ore and 4,530 tons of waste have been hoisted.

Matachewan Consolidated Mines, Limited

Matachewan Consolidated Mines, Limited, was incorporated in July, 1933, with a capitalization of 4,000,000 shares of no par value, of which 3,400,000 have been issued.

The officers and directors are: Thayer Lindsley, president; H. H. Sutherland, vice-president; H. Whittingham, secretary-treasurer; W. J. Boland, Jos. Errington, H. S. Munroe, directors. The head office is at 25 King Street West, Toronto.

The property consists of 21 claims, 840 acres, in Powell and Cairo townships, Matachewan area, district of Timiskaming, and was acquired from Matachewan Canadian Gold, Limited.

During the year the mill capacity was increased from 150 to 300 tons a day. About 55,819 tons of ore and 19,691 tons of waste were hoisted. The main shaft, vertical, 3 compartments, 8 by 18 feet, was sunk a distance of 352 feet, and two new levels at 367 and 500 feet were established. About 622 feet of crosscutting and 1,926 feet of drifting were done, and 3,532 feet of surface diamond-drilling and 17,300 feet of underground diamond-drilling.

An average of 113 men was employed. T. L. Wells was manager. The mine office is at Matachewan. In February, 1937, T. L. Wells was transferred to the Toronto office, and G. W. Mitchell was appointed manager.

Matona Gold Mines, Limited

The Matona Mining Syndicate acquired the charter of the Kukuku Mines, Limited, in April, 1933, and changed the name to the Matona Gold Mines,

Limited. The authorized capital is 3,000,000 shares of \$1 par value, of which 1,383,281 have been issued. The property consists of 19 claims, 789 acres, in Tyrrell township, Matachewan area, district of Timiskaming.

The officers and directors of the company are: A. H. Waite, president; W. B. McPherson, secretary-treasurer; Geo. Tough, Hugh Jardine, Garnet Chaplin, directors. The executive office is at 171 Yonge Street, Toronto.

An average of 18 men was employed from April to December. The manager is A. H. Smith. The mine office is at Shiningtree.

During the year, the following construction was done: a 33-foot timber head-frame; power-house, 20 by 30 feet; dry-house, 12 by 15 feet; blacksmith shop, 12 by 14 feet; powder magazine, 12 by 14 feet; cap-house, 8 by 10 feet; auxiliary powder magazine, 8 by 10 feet; 2-storey bunk-house, 22 by 35 feet; bunk-house, 22 by 30 feet; office extension, 15 by 18 feet. All buildings are of log construction. The plant equipment consists of: a Canadian Ingersoll-Rand 310-cubic-foot gas compressor; Canadian Ingersoll-Rand 6-by 8-foot steam hoist; a 35 h.p. and a 20 h.p. boiler; pumps, and drilling and tramping equipment.

A 2-compartment shaft, 5 feet 6 inches by 11 feet, was sunk a distance of 140 feet, and a level established at 125 feet; 104 feet of crosscutting and 634 feet of drifting were done.

May-Spiers Gold Mines, Limited

May-Spiers Gold Mines, Limited, was incorporated in June, 1934, with an authorized capitalization of 3,000,000 shares of \$1 par value. The officers and directors are: H. A. Newman, president; C. E. St. Paul, vice-president and managing director; S. Taylor, secretary-treasurer; E. N. Spiers, director. The head office has been moved to 350 Bay Street, Toronto. The mine address is Cole.

The property consists of 8 patented claims, totalling 250 acres, in Middle bay, at the west end of Red lake, in Ball township, Patricia portion of Kenora district. A large part of the property lies under water; the mine workings are situated on an island about 1,000 feet in length.

Operations were resumed early in 1936, having been suspended since the late part of the summer of 1935, and the sinking of a 3-compartment, 7- by 18-foot, vertical shaft by hand was completed to a depth of 38 feet on July 29. On August 4, sinking under power was commenced, and lateral development was continued throughout the rest of the year. The following is the development work accomplished at the end of 1936:—

	225-foot level	350-foot level	Total
	feet	feet	feet
Shaft.....			375.2
Station-cutting.....	27	27.3	54.3
Drifting.....	296.3	288	584.3
Crosscutting.....	425.1	527.8	952.9
Total.....	748.4	843.1	1,966.7

During the latter part of the year, an assay office was built and a new hoist installed. Buildings on the property now include a bunk-house, cookery, ice-house, pump-house, warehouse, blacksmith shop, power-house and hoist-room, boiler-house, dry-house, assay office, powder magazine and cap-house, and 5 residences.

Plant equipment comprises a Jenckes 10- by 12-inch hoist, Sullivan 840-cubic-foot, straight-line compressor, two 80 h.p. return tubular boilers, and assay office equipment.

During the last seven months of the year there was an average of 47 men employed, of whom 26 were underground, under the direction of E. N. Spiers.

Melba Gold Mines, Limited

Melba Gold Mines, Limited, was incorporated in July, 1936, with a capitalization of 3,000,000 shares of \$1 par value, of which 1,600,000 shares have been issued.

The officers and directors are: A. P. Earle, president; G. F. Racine, secretary-treasurer; W. S. Edwards, A. A. Lessard, W. H. Laidley, F. W. Foster, T. J. Day, C. Y. Jerrom, directors. The executive office is at 388 St. James Street West, Montreal, Que. The head office and mine office are at Bourkes.

The property consists of 27 claims, approximately 1,080 acres, in Melba township, district of Timiskaming.

Previous operators did considerable trenching. During the year, the present company built about 4 miles of road and did 180 feet of trenching and 1,234 feet of diamond-drilling. Tents were used as temporary camps. A small steam sinking plant is on the ground but not installed.

Work was carried on with an average crew of 21 men for 7 months, starting in June. Howard Brassaw is superintendent.

Mid-Kirk Gold Mines, Limited

Mid-Kirk Gold Mines, Limited, was incorporated in August, 1936, with a capitalization of 2,500,000 shares of \$1 par value. The officers and directors are: J. F. Mahon, president; M. F. Millward, secretary; J. A. Griffith, Frederic Ullman and Philip McEnaney, directors. The head office is at 25 King Street West, Toronto.

The property, which consists of 4 claims, 125 acres, in Lebel township, Kirkland Lake area, district of Timiskaming, lies south of the Toburn and Glenora properties. It was operated from October to the end of the year. During this time, an office building, bunk-house, and cookery, all of frame construction, were erected, and 700 feet of surface trenching and 4 test pits were dug.

An average of 14 men was employed. Donald Sirola is manager. The mine office is at Kirkland Lake.

Minaura Mines, Limited

Minaura Mines, Limited, was incorporated in November, 1935, with an authorized capitalization of 3,000,000 shares of no par value. The officers and directors are: D. M. Gilpin, Sr., president; H. McBrien, secretary-treasurer; W. H. Wilson, D. M. Gilpin, Jr., directors. The head office is at 305 Continental Life Building, Toronto. The mine office is at Englehart.

The property, formerly known as the Telluride, contains about 1,080 acres and is situated in Skead township, Larder Lake area, district of Timiskaming. There are four shafts on the property and a large amount of lateral work.

During the summer of 1936 No. 1 shaft was pumped out to the 150-foot level and repaired. The 150-foot level was cleaned out and inspected, after which the shaft was allowed to refill.

Six men were employed under the direction of D. M. Gilpin, Jr.

Minto Gold Mines, Limited

Minto Gold Mines, Limited, was incorporated in July, 1930, with an authorized capitalization of 8,000 shares of no par value. The officers and directors are: John Knox, Jr., president and manager; M. E. Knox, secretary-treasurer; A. Dorfman and J. Ingram, directors. The executive and mine offices are at Wawa.

The property consists of the Minto, Jubilee, and Cooper mines, all located in township 29, range 23, in the Michipicoten area, district of Algoma.

Underground operations were continued at the Jubilee mine throughout 1936. Open stoping was done on the 3rd, 4th, and 5th levels, and the ore was transported by truck to the 100-ton mill at the Minto mine, where it was milled.

The mill operated 353 days during 1936 and treated a total of 39,385 tons of ore, of which 7,487 tons was obtained from the 3rd level, 28,597 tons from the 4th level, and 3,301 tons from the 5th level.

No development work was done at the Jubilee mine during 1936, and nothing was done at the Minto or Cooper mines.

An average of 40 men was employed, of whom 18 men were underground. Frank McLennan was mine superintendent, and Wm. Hosking was mill superintendent.

Moneta Porcupine Mines, Limited

Moneta Porcupine Mines, Limited, was incorporated in 1910, with an authorized capitalization of 3,000,000 shares of \$1 par value. The officers and directors of the company are: W. E. Segsworth, president and secretary; L. L. Steindler, vice-president and treasurer; R. J. Jowsey, J. D. Conover, and R. S. Robertson, directors. The head office of the company is at 67 Yonge Street, Toronto.

The holdings of this company include 8 claims, 320 acres, adjacent to the Hollinger mine on the west, in the township of Tisdale, Porcupine area, district of Cochrane, and controlling interest in its subsidiary company, Straw Lake Beach Gold Mines, Limited. Five of the 8 claims in Tisdale township were purchased in 1936.

The three original Moneta claims had been idle for many years. There were two shafts on the property, 125 and 85 feet in depth. About 600 feet of drifting and crosscutting and some 10,000 feet of diamond-drilling had been done.

A diamond-drilling campaign was begun in August, 1936, and by the end of the year some 10,590 feet of drilling had been completed. Results of this drilling were considered sufficiently encouraging to warrant the erection of a mining plant and the sinking of a new 3-compartment shaft to a depth of 500 feet. This shaft was sunk 52 feet in November and a concrete shaft collar was poured. A steel headframe was about half erected at the end of the year. At the same time the installation of an electrically operated hoist and compressor and substation equipment was in progress. Buildings completed include hoist-house, blacksmith shop, office and storehouse, warehouse, magazine, and temporary dry-house.

The average number of men employed per month since operations commenced in August was 20. At the end of the year about 50 men were employed. Grainger Grant is manager. The mine address is Timmins.

Morris Kirkland Gold Mines, Limited

Morris Kirkland Gold Mines, Limited, was incorporated in January, 1935, with a capitalization of 2,500,000 shares of \$1 par value, of which 2,400,000 shares have been issued.

The officers and directors are: W. B. Robb, president; G. W. Morris, vice-president; L. H. Watts, secretary-treasurer; Jas. E. Day, L. B. Black, M. C. Smith, Dr. W. H. Bennett, and H. P. Armstrong, directors. T. C. Fawcett is mine manager. The head office is 901 Kent Building, 156 Yonge Street, Toronto. The mine office is at King Kirkland.

The property consists of 5 claims, 292.2 acres, in Lebel township, Kirkland Lake area, district of Timiskaming.

During the year, the main shaft was deepened a distance of 515 feet, and 4 new levels were established at 875, 1,000, 1,125, and 1,250 feet. Some 2,753 feet of diamond-drilling was done underground, and 910 feet of crosscutting and 1,785 feet of drifting were done. About 6,596 tons of ore and 11,375 tons of waste were hoisted.

A complete new mining and milling plant was installed. Construction consisted of a frame mill building, 66 by 120 feet, with conveyor galleries; crusher building, 25 by 50 feet; steel refinery building, 20 by 20 feet; frame dry-house, 20 by 45 feet; frame machine and electric shop, 20 by 42 feet; boiler-house, 20 by 20 feet; pump-house, 10 by 12 feet; and a 70-foot timber shaft headframe.

The plant equipment consists of: 1,000-cubic-foot Sullivan angle-compound compressor; 500-cubic-foot Alley-McLellan compressor; 30- by 42-inch Ingersoll-Rand double-drum electric hoist; 100-gallon Worthington power pump; 60-gallon Smart Turner triplex pump; 150-gallon, 2-stage Worthington centrifugal pump; 1,000-gallon Worthington fire pump; 10- by 20-inch Hadfield jaw crusher; 2-foot Simons cone crusher; 7- by 7-foot Dominion ball mill; Akins classifier; 14-foot Geco bowl classifier; two 30-foot Dorr thickeners; three 18- by 22-foot Dorr agitators; precipitation equipment; 8- by 14-foot Feine filter. The mill, which has a rated capacity of 100 tons, was started in November.

An average of 88 men was employed for the year.

Murray-Algoma Mining Company, Limited

The Murray-Algoma Mining Company, Limited, was incorporated in January, 1934, with an authorized capitalization of 40,000 shares of no par value. The officers and directors are: J. V. Trowell, president; E. G. Archer, vice-president; G. J. Lamb, managing director; E. L. Lamb, secretary-treasurer; T. E. Carmichael and T. H. Barnard, directors. The head office is at 18 Lansdowne Avenue, Sault Ste. Marie. The mine address is Hawk Junction.

The property, which is located in township 28, range 24, Michipicoten area, district of Algoma, is 2 miles west of Hawk Junction.

Work was continued on a small scale throughout 1936. A 20-ton amalgamation mill was constructed. The equipment included a 9- by 16-inch jaw crusher, a 5½- by 8-inch jaw crusher, a 6- by 8-foot pebble mill, disc classifier, Wilfley table, and amalgamation equipment. It was operated intermittently during November and December for a total of 112 hours, and milled about 120 tons.

A small amount of surface mining was done with a 220-cubic-foot Sullivan compressor. Electricity is supplied by the Great Lakes Power Company.

An average of 9 men was employed under the direction of G. J. Lamb.

N. A. Timmins Corporation

In June, 1936, The N. A. Timmins Corporation optioned a group of 36 claims held by A. Caouette, near Longlac, district of Thunder Bay. The property is situated on the Making Ground, or Suicide river, about 7½ miles south and slightly east of Longlac, and is contiguous to the south boundary line of the

Martin Falls Indian Reserve. It is accessible by water, via the river, in the summer, and in winter may be reached by road through the Reserve from the siding at mileage 96.7 on the Caramat subdivision of the Canadian National Railways.

Work was commenced on June 1, 1936, and up to the end of November considerable surface exploration was accomplished, including the preparation of two bulk samples of carload size. In addition, approximately 4,100 feet of diamond-drilling was completed at the end of the year. Buildings were constructed including a bunk-house, cookery, supply house, office, core-house, powder magazine, dry-house, blacksmith shop, oil storage, pump-house, and 2 residences. The winter road from mileage 96.7 was constructed, including a bridge over the Suicide river.

On November 27, the sinking of a 2-compartment shaft was commenced, by hand methods, and plans were under way at the end of the year to construct a headframe and power-house and commence sinking under power early in 1937. Plant equipment on order included an Ingersoll-Rand type 40, 315-cubic-foot, portable, oil engine compressor; Ingersoll-Rand 6- by 5-inch, single-drum, reversible steam hoist, 30 h.p. vertical boiler, and Cameron 36- by 3- by 7-inch sinking pump.

From June 1 to December 31, 1936, there was an average of 25 men employed, under the direction of F. C. Tomlinson. The mine address is Longlac.

Naybob Gold Mines, Limited

Naybob Gold Mines, Limited, was incorporated in January, 1934, with an authorized capital of 3,500,000 shares of \$1 par value, of which 1,812,541 had been issued as of November 30, 1936. In December an additional 1,000,000 shares were underwritten to be taken up at monthly intervals. The officers and directors of the company are: Robt. J. Naylor, president; Richard N. Clarke, vice-president; Jos. Sheedy, secretary; Harvey J. Haddleton, treasurer; Sherman J. Le Pard, John G. Jones, Geo. E. Beggs, and Jos. Montgomery, directors. The head office of the company is at 85 Richmond Street West, Toronto. The mine address is Timmins.

The property, formerly the Hayden mine, is situated $3\frac{1}{2}$ miles due south of Timmins and consists of 16 claims, 606 acres, which lie on each side of the Deloro-Ogden township line, Porcupine area, district of Cochrane.

Underground development work has been carried out on this property from a 2-compartment shaft, 719 feet in depth, on levels established at 100, 200, 300, 400, 550, and 700 feet. After resuming operations on August 24, 1936, underground work consisted of mine exploration and development. No stoping or milling was attempted. The following footage advance was made:—

Level	Crosscutting	Drifting	Raising
	feet	feet	feet
300-foot.....	133	708	12
400-foot.....	242		
700-foot.....	75	370	302
Total.....	450	1,078	314

The formerly air-operated Ingersoll-Rand hoist was converted to electric motor drive before underground work was started in 1936. The average number of men employed during the period of work in 1936 was 45. R. V. Neily was mine manager.

New Golden Rose Mines, Limited

New Golden Rose Mines, Limited, was incorporated in April, 1935, with an authorized capitalization of 3,000,000 shares of \$1 par value. The officers and directors are: J. Bradley Streit, president; W. M. Archibald, vice-president; J. E. Robinson, secretary; Jas. E. Riley, treasurer; J. J. Warren, E. G. Montgomery, and W. B. McHenry, directors. The head office is at 302 Bay Street, Toronto.

The company owns a property in Afton township, Timagami Provincial Forest, district of Sudbury, which includes the Afton mine. The mine is being worked under the direction of Consolidated Mining and Smelting Company of Canada, Limited. An account of the work done on the property appears on page 119 of this report. The mine address is care of the superintendent, W. E. Aitchison, North Bay; or care of the manager, D. C. McKechnie, Sudbury.

North Huron Gold Mines, Limited

North Huron Gold Mines, Limited, was incorporated in June, 1936, with an authorized capitalization of 3,000,000 shares of \$1 par value. The officers and directors are: Dr. A. Moir, president; H. H. Bowman, vice-president; J. J. Glass, secretary-treasurer; J. S. Knechtel and E. O. Rawson, directors. The head office is at 372 Bay Street, Toronto. The mine address is Havilah P.O.

The property includes the old Havilah or Ophir mine, situated in lot 12, concession III, Galbraith township, district of Algoma. It is about 15 miles north of Bruce station on the Canadian Pacific railway.

Previous operators sank a vertical, 2-compartment shaft to a depth of 106 feet and established a level at 85 feet, on which they did 290 feet of drifting and 135 feet of crosscutting. Two raises were driven from this level to a 250-foot adit on the same horizon as the shaft collar. A small open stope was mined from a subdrift off one of these raises. A large open stope, 160 feet long and 11 feet wide, was mined above the collar adit to a height of 60 feet, where it broke into a second adit, 220 feet in length. The ore was treated in a 20-stamp mill.

Work was started in June, 1936, and continued for the balance of the year. The old buildings were repaired, and a temporary headframe was erected. The old workings were dewatered and sampled, and preparations made to start underground development early in 1937. A gasoline compressor was used to operate the pumps.

An average of 15 men was employed under the direction of Mining Research Corporation, Limited. W. R. Sutton was in charge.

North Shores Mines (1936), Limited

North Shores Mines (1936), Limited, was incorporated in May, 1936, to succeed North Shores Gold Mines, Limited, with an authorized capitalization of 2,000,000 shares of \$1 par value, of which 1,000,000 shares are held in escrow for the shareholders of the original company, giving one share in the new company for three in the old. Shortly after the incorporation of the company, the P.A.L. Explorations, Limited, of Port Arthur, optioned a block of shares in the company as consideration for providing additional capital to carry on operations. W. L. Pearce, of the latter company, was appointed managing director of the new company, and a diamond-drilling campaign was commenced late in July. Operations were suspended at the end of October, and the company was again reorganized with officers and directors as follows: E. E. Watts, president; J. S. Stauffer, vice-president; H. A. Coon, secretary-treasurer; J. A. Ross and Clement King, directors.

The property is located about 3½ miles south of Schreiber on the main line of the Canadian Pacific railway, township 84, district of Thunder Bay.

The following table shows the development work accomplished underground during 1936, and the total at the end of October, when operations were suspended:—

Level (adits)	Relative elevation	Lateral work		
		To Dec. 31, 1935	1936	Total
	feet	feet	feet	feet
1st level.....	zero	930	93	1,023
Sublevel.....	—50	260	95	355
Crosscut level.....	—95	370	110	480
2nd level.....	—175	440	129	569
No. 11 vein.....	—175	75	75

In addition, a 75-degree winze was sunk from the 2nd level to a depth of 97 feet.

Four small stopes were mined on the sublevel and two on the 2nd level. The 25-ton amalgamation mill was operated periodically, and during the period of operation, treated a total of 2,193.5 tons of ore, with a total recovery of 702.63 ounces, bringing the total production of this property to approximately \$100,000.

There was an average of 27 men employed, of whom 14 were underground, under the direction of D. E. Graham.

In November the directors authorized an offering of 100,000 shares to the shareholders of the company at 12 cents per share. This offer expired on December 10, and at the end of the year plans were under way to resume operations early in 1937.

The head office is at 1022 Federal Building, Toronto. The mine address is Schreiber.

Northern Empire Mines Company, Limited

Northern Empire Mines Company, Limited, was incorporated in July, 1932, with an authorized capitalization of 500,000 shares of \$1 par value, of which 341,500 have been issued. The officers and directors are: Fred Searls, Jr., president; H. E. Dodge, secretary-treasurer; Carroll Searls, Geo. B. Agnew, and A. Douglas, directors. The executive office is 14 Wall Street, New York. The mine address is Empire.

The property is located at Empire, on the Longlac-Port Arthur branch of the Canadian National Railways, in Summers township, Beardmore area, district of Thunder Bay.

Work was continued at this property throughout 1936. The 2-compartment, vertical shaft was sunk a further 129 feet to a total depth of 797 feet. The development work accomplished during the year on the various levels was as follows:—

Level	Drifts	Crosscuts	Raises
	feet	feet	feet
150-foot.....	22
300-foot.....	1,304	83	48
450-foot.....	1,598	342
600-foot.....	1,961	708	257
Total.....	4,863	1,155	305

Some 2,631.5 feet of diamond-drilling was accomplished. Production was maintained during 1936 from 7 stopes on the 150-foot level, 3 on the 300-foot level, 2 on the 450-foot level and 6 on the 600-foot level, by resuming cut-and-fill methods.

While deepening the shaft from the 600-foot level in August, a flat-lying diabase sill was encountered, which was subsequently found to be about 550 feet in thickness, and which completely cut off the vein, at a distance below surface from 650 to 750 feet. As a result of this, plans for 1937 called for the deepening of the shaft to about 1,400 feet, from which level the vein will be developed below the sill.

During 1936, the amalgamation-flotation-cyanide mill treated a total of 64,645 tons, with a total recovery of \$976,222.10.

The plant equipment included 2 Ingersoll-Rand 1,080-cubic-foot electric compressors and a double-drum electric hoist, electric power being obtained from Cameron Falls, 55 miles distant. The only additions to the plant during 1936 were a Lea recorder for the weighing of pregnant solution in the mill and a standby power unit, consisting of a 575-volt, 156 k.v.a., A.C. Westinghouse generator, driven by a 300 h.p. Sterling gasoline engine.

There was an average of 169 men employed, of whom 120 were underground and 12 in the mill.

R. J. Hendricks was mine manager, with George Dunn as mine captain and W. Hargraft as mill superintendent.

Old Diamond Gold Mines, Limited

Old Diamond Gold Mines, Limited, was incorporated in July, 1936, with a capitalization of 3,000,000 shares of \$1 par value. The officers and directors are: J. E. Ayrhart, president and manager; J. M. Haig, vice-president; C. L. Wallbridge, secretary-treasurer. The head office is at 74 King Street East, Toronto, and the mine office is at Madoc.

The company acquired the Old Diamond property in Madoc township, Hastings-county, and operated from May to the end of the year.

Previous operators had sunk a shaft to a depth of 100 feet on No. 1 vein and put down two test shafts to a depth of 100 feet each on No. 2 vein. These were connected by a 140-foot crosscut on the 100-foot level. In 1936, 2,950 feet of diamond-drilling was done, and lateral work was started, at a depth of 100 feet, from the shaft on No. 1 vein. At the end of the year 105 feet of drifting and 135 feet of crosscutting had been accomplished.

An average of 15 men was employed during the operating period.

Olive Gold Mines, Limited

Olive Gold Mines, Limited, was incorporated in January, 1935, with an authorized capitalization of 3,000,000 shares of \$1 par value. The officers and directors are: Dr. W. C. Ryckman, president; J. J. Hoefle, vice-president; C. V. Jacobs, secretary-treasurer; E. J. Wolff and A. H. Smith, directors. The head office is at 372 Bay Street, Toronto. The mine address is Mine Centre.

The property consists of the old Olive mine, located $4\frac{1}{2}$ miles west of Mine Centre, district of Rainy River. The Fort Frances branch of the Canadian National Railways runs within a very short distance of the property.

Previous operators sank a 2-compartment, 70-degree shaft to a depth of 251 feet, and established levels at 60, 135, and 245 feet. They did 867 feet of drifting on the 60-foot level, 290 feet on the 135-foot level, and 177 feet of drifting

and 65 feet of crosscutting on the 245-foot level. A second shaft was connected with the 1st level 300 feet east of the first shaft, and there was a third shaft, 50 feet deep, put down 290 feet east of the second shaft. There were three stopes on the 1st level, two on the 2nd level, and a small backstope on the 3rd level. The ore was milled in a 25-stamp mill.

Work was commenced in May, 1935, and the underground workings were sampled in June and July. In September, the installation of a plant and the construction of buildings were started.

In February, 1936, work was suspended until November, when overhauling of the plant was again resumed. Dewatering of the mine was commenced at the end of the year, and it was planned to begin underground development.

The surface buildings include a power-house and hoist-room, boiler-house, blacksmith shop, powder magazine, cap-house, oil storage, bunk-house, cookery, icehouse, and one dwelling.

The plant includes a 6- by 8-inch Mack hoist, a 9- by 12-inch, single-drum, reversible Jenckes hoist, which is to be used for hoisting in the shaft; 4- by 6-inch, single-drum, reversible steam hoist; Ingersoll-Rand ER2, 372-cubic-foot compressor, run by a 100 h.p. Allan Diesel engine; C.P., MS2, 225-cubic-foot, Diesel-driven compressor; 6 h.p. gasoline-engine-driven, single-stage compressor for starting the Diesels; horizontal, 30 h.p. Scotch dryback boiler; and a vertical, 8 h.p. boiler. A small lighting unit consists of a Westinghouse 1½ k.w., 125-volt, direct-current generator, driven by a 4- by 6-inch, 5 h.p. steam engine.

At the end of the year there were 9 men employed under the direction of F. G. Huycke.

Omega Gold Mines, Limited

Omega Gold Mines, Limited, was incorporated in May, 1935, with a capitalization of 5,000,000 shares of \$1 par value, all of which have been issued.

The officers and directors are: J. P. Bickell, president; E. D. Fox, secretary-treasurer; A. Dorfman, Balmer Neilly, E. M. Thomson, Dr. A. F. Demary, directors. A. D. Campbell is mine manager. The executive office is at 15 King Street West, Toronto. The head office and mine office are at Larder Lake.

The property consists of 26 claims, 841 acres, formerly held by Canadian Associated Goldfields, in McVittie township, Larder Lake area, district of Timiskaming.

During 1936, 3,613 feet of diamond-drilling, 102 feet of crosscutting, and 2,188 feet of drifting were done. Some 99,877 tons of ore and 8,617 tons of waste were hoisted.

The mill, which has a rated capacity of 400 tons daily, treated 113,897 tons of ore.

An average of 135 men was employed.

Oremond Gold Mines, Limited

Oremond Gold Mines, Limited, was incorporated on March 9, 1936, with an authorized capitalization of 2,500,000 shares, of which 1,525,000 have been issued. The officers and directors are: A. E. Dumond, president; T. J. Day, vice-president; F. E. Forster, secretary-treasurer; J. W. Shaw, J. T. Oliver, and J. B. Streit, directors. The head office is at 347 Bay Street, Toronto. The mine address is Jellicoe.

The property consists of 25 claims in one block, about 5 miles northwest of Jellicoe on the Longlac-Port Arthur branch of the Canadian National Railways, in Leduc township, district of Thunder Bay.

The claims comprising the property are T.B. 12,095, 15,388, 11,799-11,807, 17,284-17,287, 15,197-15,201, 15,478-15,483.

Work was commenced at this property in March, 1936. In May, a 3-compartment, 18- by 8-foot, vertical shaft was sunk on claim T.B. 11,800, about 50 feet south of the vein. The vein consists of quartz and calcite gangue in banded iron formation, striking about N. 70° E. and dipping slightly to the north. Before sinking, the vein was explored on surface for a length of 154 feet and is reported to average 0.34 ounces, over an average width of 7 feet. The shaft was sunk 300 feet, with levels at 150 and 275 feet. On the 150-foot level, 489 feet of drifting and 274 feet of crosscutting, and on the 275-foot level, 95 feet of drifting and 118 feet of crosscutting were done.

Buildings include hoist-room, boiler-house, blacksmith shop, dry-house, ware-house, powder magazine, cap-house, stable, office, 2 bunk-houses, and cookery.

The plant includes a vertical, locomotive-type 45 h.p. boiler, Sullivan, 310-cubic-foot portable gasoline compressor, and 7- by 10-inch, reversible, single-drum hoist, fitted with counterbalance drum.

In December there were 34 men employed of whom 12 were underground. D. H. MacKay is mine manager.

Oriole Mines, Limited

Oriole Mines, Limited, was incorporated in 1927 with a capitalization of 5,000,000 shares of \$1 par value, of which \$3,889,133 have been issued.

The officers and directors are: W. R. Biton, president; Thos. Swan, vice-president and secretary-treasurer; Wm. Reid, A. Heron, J. Geddes, and H. D. Amos, directors. The head office is at 45 Richmond Street West, Toronto.

The property consists of 8 claims, approximately 320 acres, in Gauthier township, Kirkland Lake area, district of Timiskaming.

Work was carried on from May to December. During this time, a 2-storey staff- and bunk-house of frame construction was built and 300 feet of surface trenching done.

An average of 4 men for the 8 months was employed. The mine office is at Crown City P.O., Larder Lake.

Pamour Porcupine Mines, Limited

Pamour Porcupine Mines, Limited, incorporated in March, 1934, has an authorized capitalization of 5,000,000 shares of no par value. All shares were issued as at December 31, 1936. The officers and directors are: James Y. Murdoch, president; G. H. Rainville, vice-president; T. N. Hay, secretary-treasurer; Jules R. Timmins, M. Kendall, E. Hibbert, and W. Meen, directors. R. M. Macaulay is general manager. The executive office of the company is at 804 Royal Bank Building, Toronto. The head office and mine office are at Pamour.

The property of Pamour Porcupine Mines is located in concessions V and VI of Whitney township, Porcupine area, district of Cochrane, and consists of 1,160 acres, 360 acres of which is held under option. The company holds surface rights on two other claims.

The following development work was done at the property in 1936: shaft-sinking, 356.6 feet; winze-sinking, 23 feet; crosscutting, 3,066 feet; drifting, 6,151 feet; raising, 4,338 feet; and diamond-drilling, 15,475 feet.

During the early part of the year the first mill unit was completed. This mill went into operation on May 15, 1936. Other construction and installation

work included the erection of a 200,000-gallon water reservoir, the construction of large slime-settling pond, the installation of a second 2,500-cubic-foot-capacity Bellis and Morcome compressor, the installation of a 1,500 k.v.a. transformer and panels, the completion of an ore-pass system and loading pockets underground, and the installation of a 36- by 48-inch jaw crusher on the 500-foot level.

Tonnage treated in the mill from May 15 to the end of the year amounted to 138,187 tons, from which the value of production was \$808,471.25, gold being valued at \$34.97 per ounce.

The average number of men employed at the mine in 1936 was 323.

Parkhill Gold Mines, Limited

Parkhill Gold Mines, Limited, was incorporated in April, 1929, with an authorized capitalization of 3,000,000 shares of \$1 par value. The officers and directors were: Sir Thomas Tait, president; A. P. Earle, vice-president; G. F. Racine, secretary-treasurer; F. J. McKinlay, assistant secretary-treasurer; G. M. McKee, Charles Adams, and F. C. Dobell, directors. The executive office is at 1835 Beaver Hall Building, Montreal, Que. The mine address is Gold Park.

At the end of December plans were approved by the shareholders to organize a new 3,000,000-share company to be known as Parkhill Gold Mines (1937), Limited. The stock is to be exchanged on a basis of two shares of the new stock for three shares of the old.

The property is located in township 29, range 23, Michipicoten area, district of Algoma.

During 1936, the 42-degree shaft was sunk an additional 290 feet to a total depth of 1,790 feet on the incline; and levels, the 12th and 13th, were established at 1,605 and 1,752 feet. It has been carried as a 3-compartment shaft below the 9th level, and the extra compartment used for stage hoisting below the 11th level. A 7- by 6-inch Ingersoll-Rand air hoist was installed underground for this purpose.

Development footages accomplished on the various levels during 1936 were as follows:—

Level	Drifting	Crosscutting	Raising
	feet	feet	feet
8th.....	24	31
9th.....	483	76	154
10th.....	299	72	171
11th.....	1,015	39	395
12th.....	1,303	76	56
13th.....	477	201
Total.....	3,577	488	807

A total of 22,943 tons of ore was obtained from the mine during 1936, of which 21,080 tons was from stoping and the balance from development. It was treated in the 100-ton amalgamation-cyanide mill. Stopping was done by open-stopping methods on the 7th to the 12th levels, inclusive, although over half of the stope production was obtained from the 10th and 11th levels. A total of 1,695 feet of diamond-drilling was done from underground.

An average of 93 men was employed, of whom 66 were underground. R. E. Barrett was succeeded by R. D. Caylor as manager.

Paymaster Consolidated Mines, Limited

Paymaster Consolidated Mines, Limited, incorporated in 1930, has an authorized capitalization of 9,000,000 shares of \$1 par value, of which 8,604,000 have been issued, as of December 31, 1936.

The officers and directors of the company are: E. H. Walker, president; A. S. Fuller, vice-president; E. L. O'Reilly, secretary-treasurer; Chas. E. Cook, C. J. O'Brien, Jos. Errington, and D. M. Hogarth, directors. The head office and mine office are at South Porcupine. The executive office is at 204 McKinnon Building, Toronto.

The company owns and operates a property consisting of 24 patented claims, approximately 680 acres, in the townships of Tisdale and Deloro, Porcupine area, district of Cochrane. The company also holds 4 other claims in Tisdale township, 2 in Whitney township, and 19 in Cody township, and holds a lease on 13 claims in Leonard and Tyrrell townships.

In 1936, the main property, which was formerly held by various smaller companies, was worked through four of six shafts on the property. Two of these shafts were pumped out during the year, and sampling and diamond-drilling was carried out on various levels. Almost all the mill feed was hoisted at the Nos. 5 and 6 shafts (i.e. the old Dome Lake and West Dome shafts, respectively). At the end of the year the mill feed was practically all coming up the No. 5 shaft, the ore from the West Dome mine being dropped down to the 1,050-foot level and trammed from there to the No. 5 shaft through the connection made between the two mines late in the summer.

The development work reported for the year is as follows: shaft-sinking, 22 feet (deepening of No. 5 shaft sump); winze-sinking, 1,152 feet; crosscutting, 1,276 feet; drifting, 10,772 feet; raising, 1,376 feet; diamond-drilling, 58,825 feet.

Milling operations were continuous throughout the year. Value of production was \$976,605.07 (gold valued at \$35.02 per ounce) from 140,962.3 tons treated.

Numerous additions to plant and equipment were made during the year, chief of which were: (1) surface railroad from No. 5 shaft to crusher-house, approximately three-quarters of a mile; (2) the following additions to the mill: 5- by 18-foot tube mill, 3- by 15-foot Dorr classifier, 8- by 10-foot General Engineering Company agitator, 6- by 11-foot Denver thickener, 18B Alley-McLennan compressor, 11½- by 16-foot Oliver filter, 30- by 12-foot Dorr thickener, Denver jig, 8- by 7-inch vacuum pump, two additions to mill building; (3) the following additions to the mine equipment: two 5- by 6-inch Smart-Turner mine pumps, 24- by 14½- by 12-inch Ingersoll-Rand compressor at No. 5 shaft, large settling pond at No. 5 shaft, 9- by 12-inch hoist at No. 3 winze, 1,080-cubic-foot compressor and motor at No. 2 shaft, Livingstone stoker on boiler at No. 2 shaft, new powder magazine, three 250 k.v.a. transformers at No. 2 shaft, partially completed laying of 12-inch wood stave pipe line from McDonald lake to mine.

The average number of employees during the year was 328, of whom 31 were employed in the mill, 215 underground, and 17 on contract construction work, and the remainder on surface. Chas. E. Cook is mine manager.

Pickle Crow Gold Mines, Limited

Pickle Crow Gold Mines, Limited, was incorporated in January, 1934, and is capitalized at 3,000,000 shares of \$1 par value. The officers and directors are: J. E. Hammell, president; A. L. Smith, vice-president; Robert Fennell, secretary-treasurer; John Bland, assistant secretary-treasurer; Mrs. Eola Hammell and

B. H. Budgeon, directors. The executive office is at 25 King Street West, Toronto. The head office and mine office are at Pickle Crow.

The property consists of 59 claims in the Pickle-Crow area, in the Patricia portion of Kenora district, and may be reached by airplane from Hudson, Sioux Lookout, or Collins, on the Canadian National railway. During the summer the construction of a permanent road was commenced from Doghole Bay, at the east end of Lake St. Joseph, for the transportation of supplies.

Operations were continued at this property throughout 1936. Ore for production was mined in 4 stopes on the 125-foot level, 5 on the 250-foot level, 6 on the 375-foot level, 3 on each of the 500- and 625-foot levels, and 4 on the 750-foot level. Of the total number of 25 stopes, 4 were preparatory backstopes only, 8 were shrinkage stopes, one was mined by rilled cut-and-fill methods, and 12 were horizontal cut-and-fill, modified in part to square-set-and-fill.

The following table shows the development work accomplished at the end of 1935, during 1936, and the total:—

	To Dec. 31, 1935	1936	Total
	feet	feet	feet
SHAFT.....	789	476	1,265
125-FOOT LEVEL:			
Drifts.....	1,427		1,427

1,200-FOOT LEVEL:			
Crosscuts.....		70	70

Major additions to the mining plant consisted of the installation of Lilly controllers on the hoist and the replacement of the 60 h.p. motor driving the hoist by a 200 h.p. General Electric motor. Toward the end of the year, construc-

tion was commenced on an addition to the mill, with the object of doubling the present capacity of 150 tons daily.

During 1936, the mill treated a total of 58,184 tons of ore, with a recovery of \$1,612,450.80, as against 36,200 tons having a gross value of \$874,088.72 during the last eight months of 1935, showing an increase of about 324 tons per month for 1936.

During the year there was an average of 148 men employed, of whom 81 were underground and 15 in the mill. Alex. G. Hattie is mine manager.

Polaris Gold Mines (Canada), Limited

Polaris Gold Mines (Canada), Limited, was incorporated on April 12, 1935, with an authorized capitalization of 3,000,000 shares of \$1 par value, of which 1,506,468 were issued as of January 7, 1937. The company took over the assets of Polaris Gold Mines of Canada, Limited, exchanging one new for five old shares. The officers and directors are: W. R. Elliott, president; P. W. Seiler, vice-president; Gordon McLaughlin, secretary-treasurer; Geo. E. Bass, assistant secretary-treasurer; Harry Thompson, Frank Kuhn, R. F. Stibbard, and H. F. Hansell, directors. The head office of the company is at 372 Bay Street, Toronto. The mine address is Timmins.

The property of Polaris consists of 19 claims, 760 acres, in the townships of Tisdale and Mountjoy, Porcupine area, district of Cochrane. Part of the property lies under the town of Timmins, and extends north, south, and west of the town.

There is a 2-compartment shaft on the property and a mining plant consisting of a 100 h.p. boiler, Ingersoll-Sergeant 300-cubic-foot, straight-line compressor, and a double-drum Jenckes hoist, 9 by 12 inches. Mine buildings include power-house, office, magazine, warehouse, and residence.

The only underground work done from the shaft consists of a station at 250 feet and a couple of rounds taken from it in a southerly direction. The shaft was pumped out and sampled in 1936, and then allowed to refill with water. The company has made a geophysical survey of the property, and at the end of the year had two diamond-drills in operation. Two complete holes were drilled in 1936, totalling about 1,500 feet.

Mining Research Corporation, Limited, is acting as consulting engineers, and G. McIntosh of that company was directing the operations of Polaris at the end of the year.

Porcupine Lake Gold Mining Company, Limited

The Porcupine Lake Gold Mining Company, Limited, was incorporated in 1927, succeeding Porcupine Lake Gold Mines, Limited. It has an authorized capitalization of 3,000,000 shares of no par value. The officers and directors are: C. E. Calvert, president; H. H. Sutherland, vice-president; M. H. Breuls, secretary; Geo. McKeown, treasurer and assistant secretary; J. R. L. Starr, Lindsey Hooper, and R. O. Swezey, directors. The head office is at 112 Yonge Street, Toronto. The holdings of the company consist of 6 claims in the township of Whitney, Porcupine area, district of Cochrane.

Operations were resumed at the property, after eight months of inactivity, on August 12, 1936, at which time the mine was full of water. First work consisted of overhauling and electrifying the mining plant and repairing buildings and headframe. The inclined-shaft timber was repaired and a skip with safety appliances was installed. A powder magazine, blacksmith shop, and manager's

residence were also erected. The level at 275 feet was then pumped dry, and further development work started there. To the end of the year the development work accomplished was as follows: station enlargement, 1,956 cubic feet; sump enlargement, 1,800 cubic feet; drifting, 234 feet; drift slash, 19 feet; cross-cutting, 165 feet; crosscut slashing, 36½ feet; diamond-drilling, 979 feet.

The average number of men employed for the 5-month period after commencing operations was 28. Wm. Sixt is general manager. J. G. Sipprell is resident manager. The mine address is Porcupine.

Porcupine Triumph Gold Mines, Limited

Porcupine Triumph Gold Mines, Limited, was incorporated in July, 1936, with an authorized capitalization of 3,000,000 shares of \$1 par value. The officers of the company are: J. A. Thomas, president; Thos. Crookston, secretary-treasurer; W. A. Houghton and A. L. Heintzman, directors. The head office of the company is at 811 Kent Building, Toronto. The mine office address is South Porcupine.

The property held by the company consists of 8 claims in the township of Deloro, Porcupine area, district of Cochrane. Five of the claims adjoin the property of the Concordia Gold Mining Company, Limited; the other 3 lie approximately 2 miles to the northwest. This group lies one claim distant from the property of McLaren Gold Mines, Limited. It is on this latter group that activity is now centred. During the summer of 1936 surface exploration and 3,000 feet of diamond-drilling were done on these claims.

Late in the year equipment was taken to the property for shaft-sinking. This consisted of a Holman gasoline compressor, small air hoist, 2 Ingersoll-Rand drills, and pumps. A compressor- and hoist-house, tool-house, diamond-drill core-house, powder magazine, and a cookery and bunk-house combined, 20 by 50 feet. Sinking was commenced the latter part of December. The shaft will be divided into two compartments and is to be sunk on the vein. J. A. Thomas is mine superintendent. Since commencing work as a company in July, 1936, the average number of men employed was 7.

Preston East Dome Mines, Limited

Preston East Dome Mines, Limited, was incorporated in 1911, with a capitalization of 3,000,000 shares of \$1 par value. After the property had lain dormant for a number of years, interest was renewed when the company reorganized early in 1936. New shares were issued for old shares held, on basis of one for five, reducing outstanding shares to 561,000. Options exercised later in the year brought the number of issued shares to 2,385,500 (January 6, 1937). The officers and directors of the company are: D. M. Robertson, president; W. H. Bouck, vice-president; L. I. Hall, secretary; H. Preston Coursen, E. W. Wright, and Stuart Playfair, directors. The head office of the company is at 706 Concourse Building, Toronto. The mine address is South Porcupine.

The holdings of the company consist of 200 acres in Tisdale township, Porcupine area, district of Cochrane. The property is adjacent to, and lies south and east of the Dome mine. Two of the five lots now held were purchased in 1936.

Operations were resumed at the property in May, 1936, when a 4-month diamond-drilling campaign was commenced. In June a 65-degree inclined shaft, sunk some twenty years ago and the one level off it at 100 feet were pumped out, and in the following months 443 feet of crosscuts were driven and 787 feet of

drifting done. Work at this shaft was discontinued in the fall, when a new 5-compartment shaft was started. At the end of the year this shaft was down 271 feet. Stations and loading pockets are being cut while sinking goes on. Tonnage removed from these amounted to 1,144 tons. About 8,100 feet of diamond-drilling was done on the property in 1936.

The following buildings were erected: power-house, 25 feet 6 inches by 84 feet, steel frame; headframe, 5 compartments, B.C. fir timber, 90 feet to centre line of sheaves; shops building, 40 by 65 feet, steel frame; dry-house, 20 by 25 feet, frame construction; assay office, 21 feet 6 inches by 41 feet 6 inches, tile construction; office and storehouse, 32 by 40 feet, frame building on concrete basement; magazine, 14 by 25 feet; heating plant, 18 by 39 feet, frame construction; 100,000-gallon, dual-service water tank, steel structure; pump-house; cap- and fuse-houses; thaw-house; two bungalows, one double house, and three portable bunk-houses. The old cook-house and camps were repaired. The following equipment was installed during the year: two 300 k.v.a. 26,400-volt Ferranti transformers complete with switching equipment; Reavell 1,050-cubic-foot, vertical, 2-stage compressor and receiver; double-drum, 48- by 36-inch, second motion E. Long hoist, complete; Ingersoll-Rand No. 40 steel sharpener, complete; double Hollinger-type oil furnace; C.F.M. pump for water supply; auxiliary hoist, boilers, etc.

From the commencement of operations in May to the end of the year the average number of men employed was 75. D. J. Ludgate is mine superintendent. D. G. H. Wright is general manager and consulting engineer.

Rahill Red Lake Mining Company, Limited

The Rahill Red Lake Mining Company, Limited, was incorporated in April, 1934, with an authorized capitalization of 3,000,000 shares of \$1 par value, of which 1,992,454 were issued as at November, 1936. The officers and directors are: Aubrey Glendinning, president; Geo. Glendinning, vice-president; and J. M. Philp, secretary-treasurer. The head office is at 1004 Bank of Hamilton Building, Toronto. The mine address is Red Lake.

The property consists of 19 claims located on Mackenzie island in Red lake, Dome township, district of Kenora, Patricia portion. There are 17 claims in one block, adjoining the Martin-McNeely property to the east. There are also 2 claims adjoining the Gold Eagle property to the west.

Subsequent to surface exploration and 5,113 feet of diamond-drilling, the sinking of a 2-compartment, 7- by 12-foot, vertical shaft was commenced on claim K.R.L. 6,687.

The mining plant installed included a 20 h.p. locomotive-type boiler, 60 h.p. locomotive-type boiler, 360-cubic-foot oil-engine-driven compressor, and 6- by 8-inch, single-drum steam hoist.

Buildings on the property include a bunk-house, cookery, office, powder magazine, and power-house.

The shaft was completed to a depth of 22 feet by hand methods in September. On October 12, the work of installing the mining plant was commenced and was completed on November 24, at which date operations were suspended.

In September there were 5 men employed under the direction of Aubrey Glendinning.

Red Crest Gold Mines, Limited

Red Crest Gold Mines, Limited, was incorporated in May, 1934. The authorized capitalization is 3,000,000 shares of no par value, of which 2,528,893

have been issued. The officers and directors are: L. E. Schlemm, president; H. M. Porteous, vice-president and managing-director; C. G. Macartney, secretary-treasurer; A. A. McKelvie, L. G. W. Schlemm, R. H. Webster, F. L. Hutchinson, and Horace G. Young, directors. The head office is at 1178 Phillips Place, Montreal, Que. The mine address is Golden Arm, a recently established post-office.

The property consists of 7 patented claims, comprising 183 acres, in Todd township, Pipestone Bay section of the Red Lake area in the Patricia portion of Kenora district, and was formerly known as the Rowan discovery.

In 1935 an open-cut was worked, the ore being treated in a 10-ton amalgamation mill. In that year 173.5 tons were treated, with a gross recovery of 177.8 ounces in bullion, valued at \$3,935.53. The mill continued to operate during the first four months of 1936, during which time an additional 417.25 tons was treated with a gross recovery of 237.43 ounces, valued at \$9,843.32.

At the beginning of May, 1936, a mining plant was installed, and on May 25 the sinking of a 3-compartment, 7- by 15-foot, vertical shaft was commenced. At the end of the year the shaft was at a depth of 300 feet, with levels established at 150 and 275 feet, and 505 feet of crosscutting and 825 feet of drifting had been done.

The mining plant equipment includes a 3 h.p. vertical boiler, a 70 h.p. Leonard locomotive-type boiler, Canadian Ingersoll-Rand 375-cubic-foot, oil-engine-driven compressor, and Ingersoll-Rand 8- by 6-inch, double-drum hoist.

Buildings on the property include power-house, hoist-room, mill, powder magazine, office, bunk-house, cookery, and one residence.

There was an average of 22 men employed, of whom 9 were underground, under the direction of S. F. Porteous.

Red Lake Gold Shore Mines, Limited

Red Lake Gold Shore Mines, Limited, was incorporated in December, 1927, with an authorized capital of 5,000,000 shares of no par value, of which 4,500,000 are outstanding. The officers and directors are: Dr. Robt. W. Breuls, president; Henry A. Newman, vice-president; Ira E. Hough, secretary-treasurer; Chas. V. Gallagher and John A. Baker, directors. The head office is at 350 Bay Street, Toronto. The mine address is Red Lake.

The property consists of 23 claims in the townships of Dome and Heyson, Red Lake area, in the Patricia portion of Kenora district. The mine workings are situated on claim K.R.L. 820, about a mile west of the town of Red Lake.

During 1936 an extensive construction campaign was carried on, in which the entire plant was refitted to run from electrical power brought in from the Ear Falls-Howey transmission line. The buildings on the property now include shaft-house with steel headframe, hoist-room and power-house, blacksmith shop, machine shop, carpenter shop, assay office, mine office, electrical shop, dry-house, warehouse, powder magazine, and cap-house. The mill buildings and the 55,000-gallon water tank are of steel construction.

The entire plant commenced running on electrical power on July 2, following the installation of a 750 k.v.a. substation. Plant equipment now includes an Ingersoll-Rand double-drum hoist driven by a 60 h.p. Westinghouse motor, Ingersoll-Rand 1,165-cubic-foot compressor driven by a 250 h.p. synchronous motor, and a Laidlaw-Dunn-Gordon 550-cubic-foot compressor converted from steam drive and run by a 100 h.p. Belco motor.

The 125-ton cyanidation-amalgamation mill commenced treating ore on August 19, with initial precipitation on August 26. The mill building is of steel

and concrete construction throughout and is fitted so that capacity may be doubled simply by the installation of a few additional units. Milling equipment includes Allis-Chalmers 20- by 10-inch jaw crusher, No. 5 Newhouse crusher, Allis-Chalmers 6- by 8-foot ball mill in closed circuit with an 18- by 12-inch Denver jig and a 6- by 22-foot Dorr duplex rake classifier, two 30- by 12-foot Dorr tray thickeners, three 14- by 16-foot Dorr agitators, Oliver 8- by 8-foot filter, 64-bag Merrill-Crowe precipitation unit, and a 3- by 4-foot amalgam barrel for treating the hutch product from the jig. All ore and solution tanks are of steel construction.

During the year, the mill treated a total of 15,012 tons of ore with a recovery of \$138,076.87. The ore was taken from shrinkage stopes, of which there were two on the 182-foot level and one on each of the 300-, 425-, and 550-foot levels.

The following table shows the development work accomplished at the end of 1935, during 1936, and the total:—

	To Dec. 31, 1935	1936	Total
SHAFT.....	feet 435	feet 129	feet 564
182-FOOT LEVEL:			
Drifts.....	332	332
Crosscuts.....	50	50
Raises.....	160	160
300-FOOT LEVEL:			
Drifts.....	557	483	1,040
Crosscuts.....	118	93	211
Raises.....	132	132
425-FOOT LEVEL:			
Drifts.....	542	542
Crosscuts.....	102	250	352
Raises.....	25	105	130
550-FOOT LEVEL:			
Drifts.....	511	511
Crosscuts.....	472	472

From the beginning of production to the end of the year there was an average of 104 men employed, of whom 59 were underground and 15 in the mill. W. P. Mackle is mine manager, and K. Burwash is mill superintendent.

Regal Kirkland Gold Mines, Limited

Regal Kirkland Gold Mines, Limited, was incorporated in 1934 with a capitalization of 3,000,000 shares of \$1 par value, of which 1,920,000 have been issued.

The officers and directors are: A. B. Stodart, president; F. G. Stevens, vice-president; S. Taylor, secretary-treasurer; T. M. Mungovan, D. A. Macintosh, R. E. Nicol, directors. The head office is at 330 Bay Street, Toronto.

The property consists of 4 claims, 165 acres, in Lebel township, Kirkland Lake area, district of Timiskaming, acquired from Pawnee Kirkland Gold Mines. In 1927, the latter company sank a vertical, 2-compartment shaft, 7 by 12 feet, to a depth of 780 feet and established levels at 125-foot intervals to the 750-foot level. Work was suspended in 1928.

The present operators reopened the mine in June, 1936. The mine buildings and plant were reconditioned, the mine was dewatered, and the shaft repaired.

A programme of sampling, diamond-drilling, and drifting was carried out. Some 1,025 feet of diamond-drilling, underground, 250 feet of crosscutting, and 300 feet of drifting were done. Work was suspended in November.

An average of 29 men was employed. J. J. Hollinger was mine manager.

Rickard-Ramore Gold Mines, Limited

Rickard-Ramore Gold Mines, Limited, was incorporated in October, 1934, with an authorized capitalization of 3,000,000 shares of \$1 par value. At December 1, 1936, 2,000,005 shares were issued; of this number 1,500,000 were then held in escrow. The officers and directors of the company are: W. H. C. McEachern, president; E. Wise, secretary-treasurer; J. W. Morrison, J. Travis, and H. Hollands-Hurst, directors. The last-named director is also mine superintendent. The head office of the company is at 601 Concourse Building, Toronto.

The holdings of the company comprise 400 acres in Rickard township, district of Cochrane. Half of the acreage held is owned outright, and half is held under option. The property is reached in summer by a 6-mile water route up the Abitibi river from the Abitibi Pulp and Paper Company's power plant and dam at Twin Falls, and in winter by road from Matheson.

The property has been developed to date by surface work, 10,000 feet of diamond-drilling, an inclined shaft 200 feet deep, and crosscutting and drifting on the 100- and 200-foot levels. The latter work at the end of 1936 on the 1st level amounted to 996 feet and on the 2nd level to 425 feet. The sinking and other work below the 100-foot level was done during 1936. Drifting and crosscutting operations were suspended at the end of November, at which time an underground diamond-drilling campaign was in progress and continued in December.

In August, 1936, the company installed a new Sullivan WJ-3, angle compound compressor, capacity 665 cubic feet, driven by a Diesel Caterpillar engine, D-13,000. New buildings erected during the year included a compressor house, assay office, cookery, and additional bunk-houses for 40 men. The average number of men employed during the year was 20.

Ronda Gold Mines, Limited

Ronda Gold Mines, Limited, was incorporated in March, 1936, with an authorized capitalization of 3,500,000 shares of \$1 par value. The officers and directors are: E. H. Dickenson, president; James E. Day, vice-president; T. J. Day, secretary-treasurer; P. A. Fisher and E. C. Wainwright, directors. The head office is at 85 Richmond Street West, Toronto. The mine address is Shiningtree.

The property consists of a group of 9 claims in Churchill and Macmurchy townships, in the West Shiningtree area, district of Sudbury, taken over from Neville Canadian Gold Mines, Limited. Former operators sank a vertical, 2-compartment shaft to a depth of 325 feet and established levels at 100, 200, and 300 feet.

Work was started in May, 1936, and underground development was resumed in August. During the balance of the year a total of 326 feet of drifting was done on the 200-foot level, and 337 feet of drifting and 155 feet of crosscutting on the 300-foot level.

The plant included two boilers totalling 81 horse-power, an 8- by 10-inch Jenckes steam hoist, and a 350-cubic-foot Rand steam compressor.

An average of 25 men was employed. Andrew Sweet and J. R. Hughes were successively in charge of operations.

Sand River Gold Mining Company, Limited

The Sand River Gold Mining Company, Limited, was incorporated in February, 1935, with an authorized capitalization of 3,000,000 shares of \$1 par value, of which 1,800,000 have been issued. The officers and directors are: J. R. Cryderman, president; Jas. E. Day, vice-president; A. Jackson, secretary-treasurer; R. J. Jowsey, J. Culbert, and A. V. Trimble, directors. The head office address is 1403 Trusts and Guarantee Building, 302 Bay Street, Toronto. The mine address is Beardmore.

The property held by the company consists of a group of 22 claims, T.B. 12,941-12,948, 13,040, 13,041, 13,060, 13,061, 13,757-13,764, 14,416, and 18,545, which adjoins the property of Leitch Gold Mines, Limited, on the west, north-west of Beardmore on the Longlac-Port Arthur branch of the Canadian National Railways, in Eva township, district of Thunder Bay.

Surface work and diamond-drilling were carried on during 1935. At the beginning of March, 1936, a 3-compartment, 7- by 17-foot, vertical shaft was started by hand steel on claim T.B. 12,944, which adjoins H.F. 1, on which the Leitch shaft is located. At the end of April, electric power was brought in from the Cameron Falls-Northern Empire line with the installation of a substation, consisting of three 150 k.v.a. transformers.

Plant equipment included an Ingersoll-Rand 1,020-cubic-foot compressor, driven by a 200 h.p. synchronous motor and an Ingersoll-Rand double-drum, reversible, 8- by 6-inch hoist.

Surface buildings include hoist-room and power-house, office and warehouse, dry-house, blacksmith shop, magazine, cap-house, 3 bunk-houses, cookery, and 3 residences.

Underground work was performed on what is known as the "Discovery" vein, along which it is reported surface showings were opened up for about 4,000 feet, striking east and west with 2,200 feet on the Sand River property.

The shaft was sunk to a depth of 419 feet, with levels at 150, 275, and 400 feet. On the 150-foot level, only 20 feet of crosscutting was accomplished, the main development work being concentrated on the other two levels. On the 275-foot level, 28 feet of crosscutting and 1,100 feet of drifting was accomplished, and on the 400-foot level, 32 feet of crosscutting and 1,100 feet of drifting.

There was an average of 32 men employed, of whom 20 were underground, under the direction of G. B. Tribble.

Santa Fe Gold Mines, Limited

Santa Fe Gold Mines, Limited, has an authorized capitalization of 4,000,000 shares of \$1 par value. The officers and directors are: S. R. Snook, president; N. M. Davis, vice-president; F. M. Little, secretary-treasurer; Geo. Bagwell and H. R. Mountain, directors. The head office is at 38 King Street West, Toronto. The mine address is Mine Centre.

The company was incorporated in November, 1936, with a view to examining and resuming exploration work on the property known as the Foley mine, near Mine Centre, district of Rainy River.

Operations were commenced in November. The old south shaft was opened up and pumped out, and sampling of the underground workings was commenced toward the end of the year.

There were 7 men employed under the direction of George Stagee.

Sarmac Gold Mining Corporation

The Sarmac Gold Mining Corporation was incorporated on October 24, 1936, with an authorized capitalization of 3,000,000 shares of \$1 par value. The officers and directors are: J. E. Savard, president; Charles Fontaine, vice-president; Ayme La Fontaine, secretary-treasurer; R. M. Rainville, A. A. Collet, and J. Bruce McMartin, directors. The head office address is 513 Aldred Building, Montreal, Que. The mine address is Jellicoe. This company has been formed to resume operations at the J. Bruce McMartin property, consisting of 297.1 acres, claims T.B. 11,070-11,078, on Atigogama lake in Rickaby township, Sturgeon River area, district of Thunder Bay. The property lies 9 miles, by winter road, north of Kinghorn on the Longlac-Port Arthur branch of the Canadian National Railways.

Mining was commenced on this property in December, 1933, by the Dikdik Exploration Company, Limited, who continued operations until July 20, 1934. Work was then stopped until October 15, 1934, when mining was resumed under the name of J. Bruce McMartin.

Mr. McMartin carried on work until November 1, 1935. When work was suspended at this time, the underground development work consisted of a 2-compartment, vertical shaft to a depth of 262 feet, 218 feet of drifting and 40 feet of crosscutting on the 150-foot level, and 360 feet of drifting and 45 feet of crosscutting on the 250-foot level. Two small stopes had been mined on the 1st level and one on the 2nd level.

Total production at this property consists of 1,081.6 ounces of gold and 600 ounces of silver, recovered from 292.58 tons of ore shipped to the Flin Flon smelter by the Dikdik Exploration Company in 1934, and 1,378.29 ounces of gold and 890.18 ounces of silver milled from 3,295 tons of ore by J. Bruce McMartin from April 17 to October 9, 1935.

There is a 20-ton cyanide mill at the property, equipped with a Diesel engine to supply power, and a mining plant including a 22 h.p. boiler operating an 8- by 10-inch hoist and a 370-cubic-foot Ingersoll-Rand Diesel compressor.

Sarmac Gold Mining Corporation commenced preparations at the end of 1936 to resume operations in 1937. W. J. Hacker is in charge.

Savant Sturgeon Gold Mines, Limited

Savant Sturgeon Gold Mines, Limited, was incorporated in June, 1936, with an authorized capitalization of 3,000,000 shares of \$1 par value. The officers and directors are: H. M. Richardson, president; B. H. Meyers, vice-president; H. J. Beck, secretary-treasurer. The head office is at 314 Metropolitan Building, Toronto. The mine address is Savant Lake Station.

The property held by the company was purchased from Metropolitan Gold Mines, Limited, who received, as consideration for the property, 775,000 shares in Savant Sturgeon Gold Mines, Limited. It is located at the northeast end of Sturgeon lake, district of Thunder Bay, adjoining the property of Supreme Gold Mines, Limited, and consists of claims Nos. 8,845-8,855, 8,899-8,907, 9,801-9,806, 11,323-11,326.

Operations were commenced on this property on June 12, 1936. Camps and plant buildings were constructed, including a bunk-house, cookery, office, power-house, blacksmith shop, and powder magazine. Following surface exploration, the sinking of a 2-compartment, 8- by 15-foot, vertical shaft was

commenced in November. Plant equipment consisted of a Sullivan portable compressor and two jack-hammers.

During the period of work there was an average of 7 men employed, under the direction of W. F. Stewart.

Schreiber Pyramid Gold Mines, Limited

Schreiber Pyramid Gold Mines, Limited, was incorporated in October, 1934, with an authorized capital of 3,000,000 shares of \$1 par value. The officers and directors are: J. L. Kestle, president; M. L. Donevan, secretary-treasurer; F. E. Horne and W. E. Mayor, directors.

Up to November 25, work at the property was under the direction of R. S. Dening, who resigned his position as managing director on November 25. J. G. White was appointed superintendent at the property. The head office is at 372 Bay Street, Toronto. The mine address is Schreiber.

The property consists of 21 claims, all in one block, about 4 miles northeast of Schreiber on the main line of the Canadian Pacific railway, in township S4, district of Thunder Bay, and includes claims T.B. 10,089-10,094 and T.B. 10,101. During the early part of the year a road was cut in to the property; and camps, consisting of a bunk-house, cookery, office, powder magazine, and blacksmith shop, were built.

Surface work was done on the six claims, with 800 feet of diamond-drilling on claims T B. 10,093 and 10,094. It is reported that the main showing consists of two quartz veins carrying native gold adjacent to porphyries intruding greenstone.

At the end of the year, equipment was installed and work was commenced drifting an adit into the side of the hill at the showing, and an open-cut was worked with the idea of testing the ore in a small amalgamation test unit.

The plant equipment consists of a Gardner Denver 230-cubic-foot compressor, driven by a Buda 65 h.p. gasoline engine, and an electric-lighting plant consisting of a 1½ k.w., Led-O-Lite direct-current generator, connected to a 32-volt battery and driven by a 2½ h.p., 2-cycle gasoline engine.

The test-mill machinery consists of a Nutt gyratory amalgamation mill with a capacity of 5 tons per 24 hours, Straub 12-ton ball mill and classifier, and Denver 24- by 36-inch amalgam barrel. The motive power consists of a 17 h.p. Dominion Crossley Diesel and a 6½ h.p. gasoline engine.

At the end of the year, there were 25 men employed, with 15 underground.

Shenango Gold Mines, Limited

Shenango Gold Mines, Limited, was incorporated in March, 1935, with an authorized capitalization of 3,000,000 shares of \$1 par value. The officers and directors are: Louis Normandin, president; Bruce Cameron, vice-president; James Hutchison, secretary-treasurer; J. A. Owens and William Cromar, directors. The head office is at 67 Yonge Street, Toronto. The mine address is Oba.

The property consists of a group of 4 claims in Hawkins township, and one of 12 claims in Walls township, district of Algoma.

Work was continued throughout 1936 on claim S.S.M. 4,332 in Hawkins township, where open-cut mining was done on a small scale. The 50-ton amalgamation mill was completed and put in operation in April, 1936. The equipment included a 12- by 14-inch jaw crusher, 7- by 9-inch jaw crusher, Straub ball mill, Dorr classifier, two concentrating tables, 4 blanket tables, and amalgamation equipment. Power was supplied at first by 3 gasoline engines,

which were later replaced by a 120 h.p. S.K.F. Diesel engine. The mill treated a total of 1,572 tons of ore during 1936. A 220-cubic-foot Sullivan gasoline compressor was used for mining.

The workings are located about three-quarters of a mile east of Langdon, on the Algoma Central and Hudson Bay railroad, and about 5 miles south of Oba. An average of 40 men was employed under the direction of J. A. Owens.

Skookum Gold Mines, Limited

Skookum Gold Mines, Limited, was incorporated in December, 1935, with an authorized capitalization of 4,000,000 shares of \$1 par value, of which 2,892,000 have been issued. The officers and directors are: G. B. S. Cousens, president; G. S. Johnson, vice-president; E. P. Raymond, secretary-treasurer; W. P. Umphrey and Alfred Perks, directors. The head office address is 244 Bay Street, Toronto. The mine address is Red Lake.

The property of the company consists of 8 claims, K.R.L. 12,788-12,793, 6,121, 6,122, and 12,946, totalling about 320 acres, west of and adjoining that of Red Lake Gold Shores Mines, in Dome and Heyson townships, Red Lake area in the Patricia portion of Kenora district.

During 1936 work was confined to surface work and diamond-drilling. A total of 13,500 square feet of stripping and 6,800 cubic feet of rock-trenching and test-pitting was done. On October 5, diamond-drilling was commenced on claim K.R.L. 6,121, and by the end of the year 4,300 feet of drilling had been done.

It is planned to commence the sinking of a 3-compartment, vertical shaft early in 1937, a mining plant having been purchased including a Canadian Ingersoll-Rand 250-cubic-foot gasoline compressor, single-drum, 8- by 14-inch hoist, and 2 Canadian Longyear Jr. straight-line diamond-drills.

There was an average of 14 men employed on surface and construction under the direction of J. D. Turner.

S. B. Smith

Dr. S. B. Smith, Cleveland, Ohio, stopped work at his property in township 29, range 23, Michipicoten area, district of Algoma, in January, 1936.

The property was later acquired by Michipicoten Gold Mines, Limited, but no work was done during 1936.

Sol D'Or Gold Mines, Limited

Sol D'Or Gold Mines, Limited, incorporated in September, 1934, has an authorized capitalization of 3,000,000 shares of \$1 par value, of which 1,273,195 shares were outstanding on December 31, 1936. The officers and directors are: C. M. Edwards, president; E. R. Bremner, vice-president; A. W. Reynolds, secretary-treasurer; A. B. Wright, F. W. Runge, and G. W. Mitchell, directors. The head office is at 140 Wellington Street, Ottawa. The mine address is Narrow Lake.

The property consists of 38 claims, 8 of which are held under option by the company, comprising 1,520 acres, in the northeast corner of Honeywell township, the northwest corner of McNaughton township, and in the block immediately north of these two townships. The claims take in part of the western end of Grace or Rainbow lake, a small lake south of Birch lake in the Patricia portion of Kenora district.

Operations were continued at this property throughout 1936. The 5-ton amalgamation mill operated until the end of January, treating during the month 62.69 tons of ore with a gross recovery of \$1,072.15. This brings the total amount of ore mined from No. 3 vein open-cut to 560.07 tons, with a total production to date of \$13,506.19.

On February 1, the sinking of a vertical, 3-compartment shaft was commenced, by hand methods, on claim No. 10,790, to explore the veins underground. Additional camp and plant buildings were erected, a mining plant was purchased and installed, and sinking under power was commenced on May 23. By the end of the year, the shaft was at a depth of 164 feet, with approximately 1,000 feet of drifting and crosscutting completed on the 150-foot level.

Buildings on the property now include power-house, hoist-room, dry-house, 2 warehouses, blacksmith shop, mill, office, 3 bunk-houses, cookery, staff-house, icehouse, laundry, and one residence. Plant equipment includes a Gardner Denver 360-cubic-foot compressor driven by a 130 h.p. Diesel Caterpillar engine, a 30 h.p. boiler, and an 8- by 10-inch Mead-Morrison single-drum, reversible hoist.

During the year there was an average of 26 men employed, of whom 8 were underground, under the direction of J. Arthur Warburton.

South Vermillion Gold Mines, Limited

South Vermillion Gold Mines, Limited, was incorporated in April, 1934, with an authorized capitalization of 1,500,000 shares of \$1 par value. The officers and directors were: A. Pacitto, president and manager; A. E. Broadley, vice-president; M. F. Burrows, secretary-treasurer; C. McLaughlin and F. J. McFarlane, directors. The head office was at 21 King Street East, Toronto. The mine address is Mine Centre.

The property owned by this company consists of a group of 3 claims, located on Bad Vermillion lake, about 3 miles southwest of Mine Centre, Rainy River district.

Work was resumed on this property during the months of April, May, and June, 1936, during which time the 2-compartment, 7- by 12-foot vertical shaft was sunk an additional 70 feet, to a total depth of 115 feet, where a station was cut.

Surface buildings included a hoist-room and power-house, 5,000-gallon water tank with a 20-foot stand pipe, blacksmith shop, bunk-house, cookery, powder magazine, cap-house, and one residence.

The plant consisted of a 50 h.p. boiler, 175 h.p. boiler, 8- by 12-inch, single-drum, reversible steam hoist, Ingersoll-Rand 300-cubic-foot steam compressor, and electric-lighting unit, consisting of a Chapman and Walker 3 k.w., 110-volt, direct-current generator, driven by a Ransome 14 h.p. steam engine.

Work was suspended in June owing to financial difficulties, the plant being maintained for the rest of the year by a watchman on the property.

Split Lake Gold Mines, Limited

Koch-Danef Gold Mines, Limited, was incorporated on November 16, 1934, the name being changed to Split Lake Gold Mines, Limited, in July, 1935, with an authorized capitalization of 4,000,000 shares of no par value, of which 2,660,000 were held by Smelter Gold Mines, Limited, early in 1936, subject to authorization by the shareholders to make any portion thereof available for financing of Split Lake Gold Mines. The officers and directors are: Hugh C. McRae, president;

Glen A. Rea, secretary-treasurer; W. S. Kickley, Daniel I. Jarvis, and H. L. Donaldson, directors. The head office address is 67 Yonge Street, Toronto. The mine address is Alcona.

During 1936, the company operated on a group of claims, consisting of about 2,200 acres, located on Split lake, about 14 miles southeast of Sioux Lookout and 6 miles from Alcona Station on the Port Arthur-Sioux Lookout branch of the Canadian National Railways, in the district of Kenora.

On April 3, 1936, subsequent to surface work and diamond-drilling, a 7- by 11-foot, 2-compartment, vertical shaft was commenced. At the end of November, the shaft was completed to a depth of about 375 feet, with lateral work on the 100-, 225-, and 350-foot levels. At this point drifting and crosscutting were discontinued, the programme calling for underground diamond-drilling.

The following is the development work accomplished during 1936:—

Level	Drifting	Crosscutting
	feet	feet
100-foot.....		69
225-foot.....	159.9	269.6
350-foot.....	115	131
Total.....	274.9	469.6

Surface buildings include power-house, 2 storehouses, blacksmith shop, assay office, 2 bunk-houses, cookery, powder magazine, and cap-house.

Plant equipment consisted of a Laidlaw-Dunn cross-compound, 550-cubic-foot steam compressor, Ingersoll-Rand single-drum, reversible, 8- by 10-inch steam hoist, and a 100 h.p. locomotive-type boiler.

There was an average of 29 men employed, of whom 15 were underground, under the direction of H. L. Donaldson.

Spoooner Gold Mines, Limited

Spoooner Gold Mines, Limited, was incorporated in January, 1935, with an authorized capitalization of 3,000,000 shares of \$1 par value. The officers and directors are: H. T. Leslie, president; J. H. Colville, vice-president; E. M. Thomson, C. D. McGregor, and Fred Spoooner, directors. The head office is at 67 Yonge Street, Toronto. The mine address is Empire.

The property consists of a group of 15 claims, totalling 650 acres, adjoining that of the Northern Empire Mines Company on the east, and includes claims T.B. 4,812-4,817, 5,059-5,061, in Summers township, Beardmore area, Thunder Bay district. On March 23, 1936, a 2-compartment shaft was started on T.B. 4,815, about 400 feet east of the Northern Empire boundary and 200 feet south of the track on the Longlac-Port Arthur branch of the Canadian National Railways.

The shaft was sunk on the vein at about an 80-degree incline to the south. After it had reached a depth of 40 feet by hand steel and windlass, a plant was installed, running from compressed air obtained from the Northern Empire. The plant consisted of a 6- by 8-inch, reversible, single-drum air hoist.

The shaft was completed to a depth of 303 feet at the end of the year, with 10 feet of crosscutting into the vein at the 150-foot level, drifting being carried 192 feet east of the crosscutting and 183 feet west. The vein is reported to run about \$15 over a width of about 20 inches.

There is an old 3-compartment shaft, 40 feet deep, a quarter of a mile farther east, which does not show any vein.

Surface plant buildings include blacksmith shop, hoist-room, powder magazine, and cap-house. Camp buildings consist of 2 bunk-houses, cookery, office, and one residence.

During the last six months of 1936, there was an average of 24 men employed, with 10 underground, under the direction of C. H. Rutherford.

Stanley Gold Mines, Limited

The authorized capitalization of Stanley Gold Mines, Limited, was increased in February, 1936, from 2,000,000 to 3,000,000 shares of \$1 par value. The officers and directors are: Howard E. Perry, president; J. C. MacKay, vice-president and general manager; W. S. Lighthall, secretary-treasurer; J. C. M. German, director. The head office is at 1455 Peel Street, Montreal, Que. The mine address is Wawa. The property is located in township 29, range 23, Michipicoten area, district of Algoma.

Work was continued throughout 1936. The 2-compartment inclined shaft was completed to a depth of 360 feet in March. Sinking was resumed in December, and at the end of the year the shaft was at a depth of 392 feet, with sinking still in progress. A third level was established at 360 feet. Open stoping was started on the 123-foot level in July.

The development work accomplished on the various levels during 1936, and the total to the end of 1936, was as follows:—

Level	Drifting		Crosscutting		Raising	
	1936	Total	1936	Total	1936	Total
	feet	feet	feet	feet	feet	feet
123-foot.....	648	42	139	125	125
256-foot.....	778	81
360-foot.....	273	273

A 50-ton amalgamation mill was constructed and put in operation in July. The equipment included a 7- by 11-inch jaw crusher, 4- by 4-foot Marcy ball mill, 2 Wilfley tables, and 6 blanket tables. A total of 1,963 tons was milled during 1936.

The plant included a 48 h.p. boiler, Sullivan 300-cubic-foot compressor, Ingersoll-Rand 600-cubic-foot compressor, and Jenckes 10- by 12-inch air hoist.

An average of 48 men was employed, of whom 11 were underground. S. L. MacDougall was in charge of operations.

Sturgeon River Gold Mines, Limited

Sturgeon River Gold Mines, Limited, was incorporated in August, 1934, with an authorized capitalization of 3,000,000 shares of \$1 par value. The officers and directors are: A. L. Bishop, president; J. M. Wood, vice-president; C. S. Kennedy, secretary-treasurer; A. Longwell, W. T. Brown, and Fraser Raney, directors. The head office is at 320 Bay Street, Toronto. The mine address is Nezah.

The property consists of a group of 7 claims in Irwin township, Sturgeon River area, district of Thunder Bay, about 8 miles northwest of Nezah station, on the Longlac-Port Arthur branch of the Canadian National Railways.

Operations were continued at this property throughout 1936. In March a 30-ton amalgamation mill was installed, consisting of a 60 h.p. locomotive-type boiler, Blake 9- by 15-inch crusher, 2 Tremaine steam units, amalgam plates,

18- by 36-inch amalgam barrel, and tilting furnace. This mill was operated from June to August, inclusive, during which time 1,290 tons of ore were treated, with a gross recovery of \$20,711.23. Ore for the mill was obtained from two stopes on the 250-foot level and two stopes on the 375-foot level, all mined by shrinkage methods.

In September, plans were commenced for the installation of a 50-ton cyanide mill, and at the end of the year the mill was under construction and an electric power line was being put in to the property.

The following table shows the development work at the end of 1935, during 1936, and the total:—

	To Dec. 31, 1935	1936	Total
	feet	feet	feet
SHAFT (3 compartments, vertical).....	523	251.3	774.3
125-FOOT LEVEL:			
Drifts.....	609.5	609.5
Crosscuts.....	96.5	96.5
Raises.....	33.6	140.4	174
250-FOOT LEVEL:			
Drifts.....	772.8	549.2	1,322
Crosscuts.....	108.9	36.4	145.3
Raises.....	61	118.2	179.2

Drifts.....	825.8	393.7	1,219.5
Crosscuts.....	159.2	13.9	173.1
Raises.....	89	333.1	422.1
500-FOOT LEVEL:			
Drifts.....	629.1	125.8	754.9
Crosscuts.....	348.6	13.5	362.1
625-FOOT LEVEL:			
Drifts.....	436.5	436.5
Crosscuts.....	69.3	69.3
750-FOOT LEVEL:			
Drifts.....	745.8	745.8
Crosscuts.....	118.4	118.4

There was an average of 53 men employed, with 11 underground and 24 in the mill. C. M. Bowyer was mine manager, during the greater part of the year, and was succeeded by J. M. Wood, who in turn was followed by T. D. Anderson.

Supreme Gold Mines, Limited

Supreme Gold Mines, Limited, was incorporated in February, 1934, with an authorized capitalization of 2,000,000 shares of \$1 par value, of which 1,275,000 have been issued. The officers and directors are: W. F. Stewart, president; H. M. Richardson, vice-president; Harry J. Beck, secretary-treasurer. There is also an advisory board of three: Frank Grew, John Rennie, and W. G. Lumbers. The head office is at 44 Victoria Street, Toronto. The mine address is Savant Lake Station.

The company holds 33 claims, east of Couture lake, between the North and Northeast arms of Sturgeon lake, in the district of Thunder Bay.

The property was inactive from October, 1935, to July, 1936. At the end of July, surface exploration was commenced and continued throughout the remainder of the year, during which time a Sullivan portable compressor was added to the plant, and several test pits were sunk to a depth of about 12 feet. Operations were concentrated on claim T.B. 9,850, where a vein is reported to have been discovered in a sheared zone, which lies between two swamps and is

elevated only about 12 feet above them, causing considerable difficulty in keeping the workings free from water. When this difficulty is overcome, it is planned to sink a 2-compartment, vertical shaft, some time during 1937.

During the last six months of the year, there was an average of 6 men employed, under the direction of W. F. Stewart.

Sylvanite Gold Mines, Limited

Sylvanite Gold Mines, Limited, was incorporated in June, 1913, with a capitalization of 3,300,000 shares of \$1 par value, of which 3,299,500 have been issued.

The officers and directors are: Edward L. Koons, president; William L. Marcy, vice-president; Clark L. Ingham, treasurer; William S. Walton, secretary; Welles V. Moot, managing director; Alfred H. Sharpe and Harry Yates, directors. C. E. Rodgers is general manager. The executive office is at 300 Erie County Bank Building, Buffalo, N. Y. The secretary's office is at 603 Royal Bank Building, Toronto. The head office and mine office are at Kirkland Lake.

The property consists of 5 claims and a fraction, approximately 230 acres, in Teck township, Kirkland Lake area, district of Timiskaming. An average of 299 men was employed.

The following is an extract from the report of the general manager for the fiscal year ending March 31, 1937:—

Production

To permit a substantial increase in tonnage treated, mill extraction for the year was intentionally reduced to 95.67 per cent. from 95.95 per cent. for the previous period. The total average increase in milling rate was over 1,000 tons per month. This was jointly accomplished through the decreased extraction shown and by small additions to equipment.

Fiscal year ending March 31	Tons milled	Production	Average recovery, troy ounces per ton
1932	94,276	\$948,926.13	0.49
1933	96,140	912,377.15	.40
1934	98,311	1,558,912.87	.52
1935	124,956	2,158,817.39	.41
1936	153,942	3,193,891.87	.36
1937	166,131	2,147,237.26	.37

¹Including exchange on bullion.

²Including exchange on bullion, after bullion tax is deducted.

³Including exchange on bullion, after deducting bullion tax effective for period April 1, 1935, to May 31, 1935, but before deducting Mint handling charge of 35 cents per fine ounce gold effective for period June 1, 1935, to March 31, 1936.

Mining

Year	Ore broken			Waste			Total ore and waste broken
	In stopes	From development	Total	Hoisted to surface	Used for backfill	Total	
	tons	tons	tons	tons	tons	tons	tons
1934	54,423	31,971	86,394	25,457	5,838	31,295	117,689
1935	93,883	37,161	131,044	11,812	10,623	22,435	153,479
1936	111,091	42,183	153,274	12,576	7,607	20,183	173,457
1937	121,778	47,017	168,795	19,499	15,247	34,746	203,541

During last year drifting and subdrifting through ore amounted to 6,263 feet.

Ore Reserves

Broken ore reserves as at March 31, 1937, were estimated at 84,866 tons. This represented a small increase over the previous year.

Operating Costs

	Total cost	Cost per ton ore milled
1933:		
Development and exploration	\$227,278.95	\$2.364
Mining	249,907.58	2.599
Milling	105,168.81	1.094
General charges	44,083.76	.459
Administrative charges	23,437.97	.244
Bullion selling expense (insurance, shipping, and Mint refining charges)	4,823.89	.050
Total	\$654,700.96	\$6.810
1934:		
Development and exploration	\$235,067.63	\$2.391
Mining	217,517.25	2.213
Milling	111,849.51	1.138
General charges	42,160.87	.429
Administrative charges	34,774.84	.353
Bullion selling expense (insurance, shipping, and Mint refining charges)	5,912.90	.060
Total	\$647,283.00	\$6.584
1935:		
Development	\$242,173.47	\$1.938
Mining	263,644.48	2.109
Milling	151,620.64	1.213
General charges	39,314.93	.315
Administrative charges	39,000.00	.312
Bullion selling expense ¹ (insurance, shipping, and Mint refining charges)	5,525.11	.044
Total	\$741,278.63	\$5.931
1936:		
Development and exploration	\$211,169.44	\$1.372
Mining	348,251.50	2.262
Milling	167,324.47	1.087
General charges	47,641.25	.310
Administrative charges (partly mine)	59,116.83	.384
Township drainage-tunnel expense	5,914.12	.038
Kirkland District Hospital expense	3,868.15	.025
Bullion selling expense:		
Insurance, shipping, and Mint refining charges	5,834.38	.038
Mint handling charge	16,750.88	.109
Total	\$865,871.02	\$5.625
1937:		
Development and exploration	\$300,751.11	\$1.810
Mining	338,917.71	2.040
Milling	169,774.56	1.022
General charges	54,812.88	.330
Administrative charges	60,112.18	.361
Tailings disposal expense (new dam)	3,640.69	.022
Bullion selling expense:		
Insurance, shipping, and Mint refining charges	5,782.15	.035
Mint handling charge	21,349.53	.129
Total	\$955,140.81	\$5.749

¹Mint bullion handling charge effective for month of April, 1934, at 35 cents per ounce, amounted to \$1,007.70, which together with bullion tax was deducted from production.

Development and Exploration

No. 2 Shaft.—Volume and scope of exploration were largely increased here and consisted in much additional crosscutting and drifting over the 1936 period. Work was general throughout this section of the mine except for a concentration of effort over several levels along the North vein system, chiefly east of the major fault. Here, intensive development disclosed further important ore, both as extensions and in new ore bodies.

Work is in progress to prove the upward and downward extensions of ore reported last year on the South vein system on the 1,750-foot level, west of the major fault. Indications there are promising, and ore has already been developed on the 2,000-foot level.

No. 4 Shaft.—For reasons of economy, operations there were confined to the summer months, and 13,713 tons of mill feed were produced. A fair amount of known ore remains to be mined from this part of the property. Further, areas favourable for prospecting still exist and will be explored.

Additional Buildings and Equipment.—These included, at the mill, a 3-foot extension to a tube mill, an additional filter, an agitator in a building extension; certain laboratory equipment. Slight alterations were made and a small amount of new equipment was placed in the crusher-house. The miners' change-house was extended. Another electric furnace was added to the assay office to replace one using oil fuel. A new tailing line was installed and a dam constructed to provide for auxiliary tailing disposal as and when required. One underground loading pocket with connecting ore passes was provided.

Summary

General development for the year was satisfactory and ore indications remain promising. Comparing 1937 with 1936 figures, shows continued increase in production. Earnings were also substantially increased, even during a period of rising prices of almost every item relating to production.

Total operating costs were slightly higher. This was due almost wholly to an enlarged programme of development and exploration. Drifting and crosscutting footages were increased 68.1 per cent. and 151.1 per cent., respectively. It is particularly gratifying to note the footage of drifting and subdrifting through ore represented 41.1 per cent. of that total, last year's percentage being 36.4 per cent. Tons milled increased by 12,189; milling costs dropped \$0.065 per ton treated.

Tashota Goldfields, Limited

Tashota Goldfields, Limited, was incorporated in November, 1932, with an authorized capitalization of 3,000,000 shares of \$1 par value. In December, 1936, the company was reorganized and the authorized capital increased to 5,000,000 shares of \$1 par value, of which there were 3,268,632 outstanding and 994,776 subscribed for at December 31, 1936. The officers and directors are: H. H. Vaughan, president and managing director; W. A. Eden, vice-president;

P. W. Ogden, secretary-treasurer; H. Preston Coursen, R. J. R. Stokes, Thomas Arnold, and Raymond Caron, directors. The head office and mine office are at Tashota.

The property consists of 10 patented claims and 7 unpatented claims, comprising about 642 acres, lying 15 miles south of Tashota station on the main line of the Canadian National Railways, district of Thunder Bay. Access to the property is by airplane from Tashota or Jellicoe to Onaman lake, about 3 miles from the property; in winter by a 17-mile road from Tashota; and in summer by an 18-mile canoe route, starting from Paska Siding, and a 6-mile wagon road.

Operations were continued throughout 1936. Ore was mined from three shrinkage stopes and one underhand stope on the 200-foot level, an open stope on the 325-foot level, and a shrinkage stope on each of the 325- and 475-foot levels. A total of 25,326 tons of ore was hoisted, of which 23,590 tons were treated in the amalgamation mill, with a gross recovery of \$199,836.21. In addition, 1,055.43 tons of concentrate, estimated to contain 215,124 pounds of copper, was shipped to the American Metals smelter.

Of the 5,071 tons of waste hoisted during the year, 2,797 tons was placed as backfill in old shrinkage stopes.

The following table shows the development work accomplished underground, at the end of 1935, during 1936, and the total:—

	To Dec. 31, 1935	1936	Total
	feet	feet	feet

Additions to the power plant during 1936 included an Ingersoll-Rand POC-2, 490-cubic-foot, oil-engine compressor and a Lancashire-Crypto 170 k.v.a., 550-volt, 60-cycle, 3-phase alternator, driven by a Dominion-Crossley 250 h.p. Diesel engine.

There was an average of 79 men employed, of whom 40 were underground and 12 in the mill, under the direction of Andrew Robertson.

Teck-Hughes Gold Mines, Limited

The Teck-Hughes Gold Mines, Limited, was incorporated in 1923 with a capitalization of 5,000,000 shares of \$1 par value, of which 4,807,144 have been issued.

The officers and directors are: Albert W. Johnston, chairman of the board of directors; Dr. D. L. H. Forbes, president and general manager; George C. Miller, vice-president; H. C. McCloskey, secretary; K. P. Emmons, treasurer; John F. Lash and John F. Thompson, directors. P. N. Tapley is assistant treasurer; and J. W. Stephenson, assistant-secretary. The executive office is at 25 King Street West, Toronto. The head office is at Kirkland Lake.

The property consists of 28 claims, 837 acres, in Teck township, Kirkland Lake area, district of Timiskaming.

During the year 692 feet of surface trenching and 1,060.3 feet of surface diamond-drilling was done. Underground, 14,562.2 feet of diamond-drilling, 1,534 feet of crosscutting, and 3,251 feet of drifting were done. Some 367,814 tons of ore was hoisted.

An average of 682 men was employed during the year. The operating officials are: R. J. Henry, general superintendent; G. Gill, mine superintendent; E. H. Whitman, mill superintendent; J. G. McMillan, exploration superintendent. The mine office is at Kirkland Lake.

The following is an extract from the report of the general superintendent for the twelve months ending August 31, 1936:—

During this period 364,299 tons of ore from the mine and 40,992 tons of tailing were milled. The total recovery of bullion and precipitate was the equivalent of 136,123.77 Troy ounces of fine gold, 4,407.95 ounces of this coming from tailing retreatment. The realized value of bullion production was \$4,777,665.94; and after addition of \$127,721.24, the interest earned on investments, the gross revenue was \$4,905,387.18, or \$12.10 per ton.

The total operating cost amounted to \$2,050,288.08, or \$5.06 per ton milled. After making provision of \$431,738.89 for taxes, surplus for the year was \$2,423,360.21. In addition to dividends, a retroactive tax assessment for the year 1934-35 to the amount \$17,736.81 was paid from surplus. Following is an analysis of operating costs:—

	Total cost	Cost per ton of ore treated	Cost per ounce of gold produced
Development and exploration.....	\$181,084.73	\$0.45	\$1.33
Mining.....	1,114,326.08	2.75	8.19
Milling.....	431,004.56	1.06	3.16
General expense.....	277,381.41	.69	2.04
Examination and exploration of new properties.....	46,491.30	.11	.34
Total.....	\$2,050,288.08	\$5.06	\$15.06

The mine was not deepened during the year, and the 50th level is still the deepest working. Development footage for the year was as follows:—

Drifting.....	4,793.5
Crosscutting.....	1,681.5
Subdrifts and subcrosscuts.....	5,388.5
Raising.....	4,354
Total development.....	16,217.5

Diamond drill exploration amounted to 13,507.7 feet. Ore produced from drifting and crosscutting totalled 4,630 tons. The work done on levels 48, 49, and 50 is included in the totals above and was as follows:—

Drifting and crosscutting.....	4,053
Horizontal diamond-drill holes.....	3,424.3
Inclined diamond-drill holes below 50th level.....	3,481.5

Throughout the year further development on the block of levels, 41 to 45, inclusive, increased the total ore found in this block to 2,234 lineal feet, having an average grade of 9.52 dwt. over an average width of 9.1 feet. Development of the block, 46th to 50th levels, inclusive, was practically completed by September 1, 1936. On levels 46 and 47, 614 lineal feet of ore with average grade and width of 9.80 dwt. and 8.4 feet, respectively, was found. On the 48th, 49th, and 50th levels 30 lineal feet at 8.60 dwt. over 7.3 feet wide was developed.

Below the 50th level the ore zone was explored by 9 inclined diamond-drill holes, the ninth hole not being completed until September 18, 1936. Three holes were drilled at different angles from the end of each of three crosscuts driven 360 feet apart and to a distance of 200 feet south of the 50th level drift. These holes intersected the footwall at vertical depths below the 50th level, averaging 150, 300, and 550 feet, respectively. From one hole a sample assaying 3.00 dwt. was obtained, and from all others the highest assay was 1.60 dwt. or less.

On the 48th, 49th, and 50th levels, as far as can be determined by the lateral development and diamond-drilling accomplished, and below the 50th level as indicated by diamond-drilling, the following geological conditions prevail: (1) The main fault plane or "break" persists without interruption below any depth explored. (2) Quartz veins and quartz-filled masses of porphyry breccia were not found in important quantities. (3) All rocks observed were acid types of syenites, syenite porphyries, and possibly some volcanic tuffs. The basic syenites, which had been present in somewhat diminished amounts below the 40th level, were not encountered on the 48th level or below.

Small tonnages of good-grade ore were developed in various workings, the more important being on the 6th, 7th, 8th, 30th, and 41st levels. Sublevel development above the 39th level and in the block from the 43rd to 46th levels resulted in important additions to the ore reserve.

The technical estimate of "positive ore" reserve at September 1, is as follows:—

	Tons	Gold content in troy ounces	Average grade in pennyweights per ton
Broken ore.....	221,404	76,336.7	6.90
Blocked ore.....	428,375	191,113.5	8.92
Total.....	649,779	267,450.2	8.23

. Tecumseh Gold Mines, Limited

Tecumseh Gold Mines, Limited, was incorporated in April, 1935, with an authorized capitalization of 2,000,000 shares of \$1 par value. The officers and directors are: G. S. Wright, president; W. F. Walter, vice-president; J. W. Hamilton, secretary-treasurer; H. T. Ross and R. L. Fiedler, directors. The head office is at Fort Erie. The mine address is Gold Rock, via Wabigoon.

The property held by this company includes four unpatented claims, Nos. 7,157-7,160, and one patented claim, H.P. 411, in the Upper Manitou Lake area, district of Kenora. It is situated about 18 miles south of Wabigoon on the main line of the Canadian Pacific railway.

Claim H.P. 411 is the site of the old Detola mine and was last operated by the Detola Development Company, Limited. In July, 1911, this company installed a 10-stamp mill and mining plant, and sunk a 2-compartment, vertical shaft to a depth of 255 feet, with a total of 1,088 feet of drifting and crosscutting on the 155- and 235-foot levels. Toward the end of 1911, operations were suspended, and in 1914, the property was acquired by the Germerica Mining Company, Limited. After an examination of the property, this company was forced to discontinue operations shortly after the outbreak of the Great War, since the capital at that time was supplied from Berlin, Germany.

The present company commenced work in September, 1936, and spent the remainder of the year repairing the original camp buildings and overhauling the machinery. The mine was dewatered and examined, and it is planned to resume underground development early in 1937.

The buildings on the property include a bunk-house, cookery, power-house, shaft-house, blacksmith shop, assay office, and mill. Plant equipment includes an 80 h.p. Leonard boiler, Jenckes 8- by 10-inch, single-drum hoist, and Ingersoll-Rand straight-line, 410-cubic-foot compressor.

At the end of the year there were 7 men employed, under the direction of G. S. Wright.

Toburn Gold Mines, Limited

Toburn Gold Mines, Limited, was incorporated in January, 1931, with a capitalization of 2,000,000 shares of no par value, of which 1,850,000 have been issued.

The officers and directors are: H. A. Guess, president; R. F. Goodwin, vice-president; J. C. Emison, treasurer; W. J. Boland and S. C. Guess, directors. G. A. Brockington is secretary, and M. W. Hotchkin is mine manager. The head office is at 217 Bay Street, Toronto. The mine office is at Kirkland Lake.

The property, formerly called the Tough-Oakes Burnside, consists of 10 claims, 343 acres, in Teck and Lebel townships, Kirkland Lake area, district of Timiskaming. An average of 148 men was employed during the year.

The following is an extract from the president's report for the year ending December 31, 1936:—

Your manager's summary of the exploration development work done upon your property for the calendar year 1936 is as follows:—

A small amount of surface trenching was done during the year in an effort to locate the upward extension of No. 419-drift vein, but results were as yet unsuccessful.

During the year diamond-drilling totalled 2,709.7 feet, consisting chiefly of short horizontal holes underground put out to locate possible parallel veins north and south of main development drifts.

Total development work done during the year 1936 amounted to 8,379 feet, all of which was above the 1,090-foot level. This development consisted of 4,940 feet of drifting, 890 feet of sublevel drifting, 1,196 feet of crosscutting, 1,106 feet of raising, 45 feet of winzing, and 202 feet of slashing. Of this total, approximately 3,043 feet was done on ore, breaking 9,510 tons, which was sent to the mill. Approximately 86 per cent. of the year's development was confined to the A-200-, A-400-, 542-, 667-, 792-, and 893-foot levels. The most important development results for the year 1936 were:—

1. Discovery of the high-grade No. 419-drift vein located on the A-400-foot level, which was developed for a length of 500 feet, having an average assay of 0.89 ounces gold across 4.5 feet. This vein structure is believed to be the eastward extension of the north break at Kirkland Lake beyond a disturbed zone east of the dike fault. Its vertical extension has been proven upward by a 150-foot raise, which averaged 1.31 ounces gold across 4.4 feet, and the downward continuation of the hanging-wall vein was located at the 542-foot level. Here the hanging-wall vein was drifted on for 215 feet, having an average assay of 0.39 ounces gold across 4.5 feet. Excellent possibilities for both eastward and downward continuity of this vein structure are indicated.

2. The location of the No. 933-drift vein at the 893-foot level, east of the dike fault in the vicinity of the south break. Its upward continuation is known as the No. 847-drift vein. To date this vein has been somewhat difficult to follow on account of minor faulting, but its eastward continuation should be more consistent.

3. The intersection of the eastward extension of No. 7 vein on the A-400-foot level below No. 211 drift and 160 feet east of its face by a flat diamond-drill hole drilled northward from the face of No. 419 drift. The core starting at 133.3 feet assayed 1.52 ounces gold across 3.3 feet, and an additional 2.5 feet assayed 0.27 ounces gold.

Production figures for 1936 compared with those of the year 1935 are:—

Year	Tons milled	Average ounces gold per ton	Ounces fine gold produced	Percentage mill recovery
1935.....	35,360	0.592	20,200	96.5
1936.....	34,400	.619	20,577	96.5

Toward the end of the year the installation of a new filter and two additional thickening tanks was authorized; and when this work is completed early this year, the mill will have a capacity of approximately 125 tons per day.

The estimated ore reserves broken and unbroken at December 31, 1935, were 82,650 tons, averaging 0.57 ounces gold per ton, and at December 31, 1936, were 113,800 tons, averaging 0.67 ounces gold per ton. In actual mining, due to some dilution, this tonnage will be somewhat increased, with corresponding decrease in grade.

This increase in the ore reserves after milling 34,400 tons, means that under the continued skilled direction of your manager, M. W. Hotchkin, 65,550 tons of new ore, averaging 0.77 ounces gold per ton, were found and opened up by the exploration and development of 1936.

Earnings for the year 1936, after deducting administration and taxes, but before deduction of \$61,396.84 depreciation and depletion, were \$262,497.80.

Continental Kirkland Mines, Limited

Toward the close of 1936 an opportunity was presented to acquire, partly by cash purchase and partly by option, a majority interest in Continental Kirkland Mines, Limited, whose property immediately adjoins your company's property on the east and has a length in an east-west direction of approximately 3 miles and an average width of around half a mile.

In times past the above-mentioned company and its predecessors have, it is understood, spent around \$800,000 in exploration and development work upon the property without finding any commercial ore bodies, and the property has, therefore, of late lain rather dormant. But the discovery and opening up during 1936 of the substantial high-grade ore body in your company's No. 419 drift, which vein structure seems to be the eastward extension of the north break at Kirkland Lake, made this eastern territory look more interesting, and although the eastern face of this No. 419 drift is still about 2,000 feet from the eastern boundary of your company's property, there are surface outcrops about midway between this eastern face and the eastern boundary showing sporadically good gold values, which lends colour to the hope that another ore shoot or two may be opened up by the extension eastward of this No. 419 drift, and should that happen it would indicate a reasonable possibility that this same north break might be traced into the Continental Kirkland Mines, Limited, ground, and by careful and intelligent exploration therein might open up some ore bodies of commercial grade and extent.

It was therefore decided to acquire, on a purchase and option basis, control of the Continental Kirkland Mines, Limited, but as the venture is quite speculative, it was deemed more prudent by your directors, especially in view of the limited cash resources of your company, to divide the risk between your company, Premier Gold Mining Company, Limited, and American Smelting and Refining Company, each taking a third thereof.

Details of the arrangement made in December, 1936, are as follows: Purchase by the above-mentioned group of 500,000 shares of the above company from the president and various directors at 20 cents per share; purchase of 125,000 treasury shares at 20 cents per share; two years' option upon all the remaining 2,009,844 treasury shares at 20 cents per share.

After these transactions were completed and ratified by shareholders' meeting the then directors and officers of the above company resigned and nominees of the above-mentioned group were elected in place thereof.

If and when the purchases of the total of these treasury shares are completed, the total purchases will then represent 2,634,844 shares out of a total authorized and then issued capital of 5,000,000 shares, or approximately 53 per cent.

The driving eastward in your company's ground of the No. 419 drift is being continued, feeling out from side to side with short, flat diamond-drill holes from time to time to insure keeping upon the main break and overlooking nothing en route, and when this drift has reached or approached your company's eastern boundary, if results therein have been favourable, it will serve for entry into the Continental Kirkland Mines, Limited, ground and a guide for intelligent explorations therein. Also it is contemplated along about March to get power and equipment assembled and connected and to unwater the Continental Kirkland Mines, Limited, shaft and workings and to scrutinize these workings carefully from the viewpoint of geology and mineralization and in the light of such scrutiny lay out and pursue an exploration programme therein.

Tombill Gold Mines, Limited

Tombill Gold Mines, Limited, was incorporated in October, 1935, with an authorized capitalization of 1,000,000 shares of \$1 par value. The officers and directors are: Percy E. Hopkins, president; Fred Searls, Jr., first vice-president; D. E. Thomas, second vice-president; A. W. Burt, secretary; Carroll Searls, assistant secretary; Henry E. Dodge, treasurer; G. Mrkvicka, assistant treasurer; T. A. Johnson, H. D. Smith, W. R. G. Johnson, and C. R. Ellis, directors. The head office and mine office are at Empire. The Toronto office is at 171 Yonge Street.

During 1936, work was continued on the property of 6 claims, located immediately west of the property of Bankfield Gold Mines, Limited, in Lindsley township, Little Long Lac area, district of Thunder Bay.

The surface buildings included a bunk-house, cook-house, warehouse, office, blacksmith shop, power-house, powder magazine, and shaft-house. The mining plant consisted of a 60 h.p. locomotive-type boiler, Ingersoll-Rand 310-cubic-foot portable oil-engine compressor, and Ingersoll-Rand double-drum, 8- by 6-inch, reversible steam hoist.

Sinking under power was commenced on January 29, 1936. The 3-compartment, vertical shaft was deepened from 22 feet to 417 feet, with levels at 215 and

400 feet. On the 1st level 1,422.5 feet of drifting and crosscutting was completed, and 601.5 feet on the 2nd level.

There was an average of 24 men employed, with 12 underground. R. J. Hendricks was manager during the year, with N. R. White as resident superintendent.

Tyranite Mines, Limited

Tyranite Mines, Limited, was incorporated in April, 1935, with a capitalization of 3,000,000 shares of \$1 par value, of which 1,199,993 have been issued.

The property consists of 9 claims, 363 acres, in Tyrrell and Knight townships, Matachewan area, district of Timiskaming.

The officers and directors are: E. L. Koons, president; Wm. L. Marcy, vice-president; W. S. Walton, secretary; C. L. Ingham, treasurer; W. V. Moot, managing-director; Harry Yates and A. H. Sharpe, directors. W. J. Trestrail is superintendent. The executive office is at 603 Royal Bank Building, Toronto. The mine office is at Gowganda.

During the year, the following construction was done: a 40-foot timber headframe; engine house, log, 42 by 20 feet; boiler-house, log, 24 by 36 feet; dry-house, log, 15 by 36 feet; blacksmith and machine shop, log, 16 by 40 feet; powder-house, log, 14 by 16 feet; fuse-house, log, 12 by 14 feet; 3 warehouses, log, 14 by 18 feet; pump-house, frame, 7 by 8 feet; and wooden water tank.

The following plant equipment was installed: Ingersoll-Rand 8- by 12-inch double-drum steam hoist; Ingersoll-Rand 16- by 10- by 12-inch compound compressor, 900-cubic-foot capacity; two 80 h.p. Waterous Manufacturing Company locomotive-type boilers, with Dutch ovens; two 10-foot air receivers; Ingersoll-Rand 10 k.v.a. generator; two 3 h.p., 550-volt motors; Fairbanks-Morse fire pump, 7 by 4½ by 10 inches; Waugh No. 8 sharpener; machine-shop equipment.

A vertical, 3-compartment shaft, 6 feet 4 inches by 16 feet 2 inches outside the timber, was sunk from surface to a depth of 550 feet, and levels were established at 225, 375, and 525 feet; 25 feet of crosscutting was done, and 9,050 tons of waste was hoisted. One diamond-drill hole, 505 feet deep, was drilled from surface.

An average of 28 men was employed for the year.

Upper Canada Mines, Limited

Upper Canada Mines, Limited, was incorporated in 1936 with a capitalization of 2,500,000 shares of \$1 par value, of which 1,750,000 have been issued.

The officers and directors are: R. R. Brown, president; Wm. Magladery, secretary-treasurer; T. J. Day, vice-president; G. Goodelle and Grover Murdoch, directors. The head office is at 710 Concourse Building, Toronto.

The property is a consolidation of the property of East Main Gold Mines, Limited, and the McIntyre claims. It consists of approximately 800 acres in Gauthier township, Kirkland Lake area, district of Timiskaming.

Former operators sank a vertical, 2-compartment, 7- by 10-foot shaft on the East Main property to a depth of 134 feet, with a level at 125 feet. Approximately 600 feet of crosscutting and drifting was done on this level.

The mine was reopened in August of this year. The buildings were repaired, and a steam and Diesel power plant was installed. A new timber headframe was built. The mine was dewatered and the shaft reconditioned as the water was lowered. The shaft was sunk to a depth of 276 feet and a level established at 250 feet, and 65 feet of crosscutting was done on this level.

An average of 16 men was employed. The mine office is at Kirkland Lake. C. W. Tully is manager.

Upper Seine Gold Syndicate

The Upper Seine Gold Syndicate was formed on March 16, 1936, with an authorized capital of 5,000 units at a par value of \$10 per unit. Each unit is to be exchanged for 200 shares of stock in the event of the incorporation of a limited liability company. The syndicate manager is Wm. L. Doyle, and the head office is at 9 Adelaide Street East, Toronto.

The property consists of 600 acres, located on Sawbill lake in the Upper Seine area, district of Rainy River. It is about 12 miles north of Hematite station on the Fort Frances line of the Canadian National Railways.

The property includes the old Sawbill mine, which previously produced gold in the nineties. The underground work accomplished by the operators at that time includes a vertical shaft to a depth of 240 feet, with a total of 935 feet of lateral work. About 200 feet south of No. 1 shaft is a second vertical shaft, which is connected to the lateral workings from No. 1 shaft on the 50-foot level. On the 240-foot level, north of No. 1 shaft, a winze was sunk to a further depth of 50 feet. Stopping was carried on north and south of No. 1 shaft, on the 50- and 100-foot levels.

The present operators employed an average of 8 men from June 9 to November 30, during which time the veins on surface over the old workings were sampled. Plans now call for the raising of sufficient capital to pump out the underground workings and conduct a thorough examination.

W. N. McClintock was in charge.

Wascanna Mines, Limited

Wascanna Mines, Limited, was incorporated in March, 1936, with an authorized capitalization of 3,000,000 shares of \$1 par value. The officers and directors are: J. H. Colville, president; E. M. Thomson, vice-president; J. A. Doupe, secretary-treasurer; H. T. Leslie, C. D. McGregor, and L. W. Nachman, directors. The head office is at 67 Yonge Street, Toronto. The mine address is Tashota.

The property consists of 13 claims, totalling about 600 acres, immediately east of Tashota station on the main line of the Canadian National Railways, Thunder Bay district. The property includes claim T.B. 20,892, on which is situated the old Tash-Orn mine, which was originally worked in 1916, following the discovery of a vein on surface about 5 feet in width containing considerable native gold.

A 2-compartment, vertical shaft was sunk to a depth of 152 feet, and about 400 feet of lateral work was completed at the 100-foot level. During the sinking of the shaft, a test shipment was made of 1,000 pounds of ore, reported to have run about 1.12 ounces per ton in gold.

After expenditures of about \$140,000 by the former operators, funds ran out, and the mine was closed down and remained idle until the Fort Rouille Mining Corporation, Limited, secured the property early in 1936 and incorporated the present company.

In June, 1936, pumping out the shaft was commenced, and at the beginning of October, construction was begun together with the installation of a mining plant. A spur line was also constructed to the railroad.

Surface buildings now include shaft-house, power-house, dry-house, bunk-house, cookery, office, and one residence.

The mining plant includes a Bellis and Morcome 750-cubic-foot compressor, driven by a 175 h.p. Ruston-Hornsby Diesel engine, and a 7- by 10-inch, single-drum, reversible hoist.

In December there were 24 men employed, 16 of whom were on construction work, under the direction of P. W. Meahan.

Wendigo Gold Mines, Limited

Wendigo Gold Mines, Limited, was incorporated in October, 1933, with an authorized capitalization of 2,000,000 shares of \$1 par value. The capitalization was increased to 3,000,000 shares in July, 1935, and was again increased in June, 1936, to 4,000,000 shares. The officers and directors are: H. D. Tudor, president; H. G. Young, vice-president and managing director; H. R. Tudhope, secretary-treasurer; E. M. Huycke, assistant secretary; W. G. Cameron and J. B. Taylor, directors. The head office is at 80 King Street West, Toronto. The mine address is Kenora.

The property of the company is located at Witch bay, on the Lake of the Woods, district of Kenora, and is 22 miles southeast of Kenora. During 1936, the government completed a winter road to the property from the Kenora-Fort Frances highway.

The mining plant includes a 100 h.p. boiler, Ingersoll-Rand 375-cubic-foot steam compressor, two Ingersoll-Rand 525-cubic-foot steam compressors, and Ingersoll-Rand $8\frac{1}{4}$ - by 10-inch hoist.

At the beginning of February, the 50-ton amalgamation-cyanidation mill was put into operation, treating ore from the surface dump and from underground. Later in the year, the mill was changed to a straight amalgamation unit, with direct and indirect amalgamation. During the year, the mill treated a total of 15,940 tons of ore, included in which was 6,591 tons from the surface dump. Total recovery during the year was valued at \$115,562.67.

Production underground was taken from 3 stopes on the 100-foot level, 4 stopes on the 200-foot level, and 1 stope on the 350-foot level. All stopes were mined by open-stull methods.

The 2-compartment, 80-degree shaft was straightened out by slashing for 440 feet. Other than this, the only development work accomplished during the year was the preparation of the stopes from which production was taken. At the end of the year No. 1 shaft was down 512 feet and No. 2 shaft, 100 feet. In addition, the following development footage had been accomplished by December 31, 1936:—

Level	Drifting	Crosscutting
	feet	feet
50-foot.....	183
100-foot.....	295	11
200-foot.....	745	161
350-foot.....	219	56
500-foot.....	931	138
Total	2,373	366

At the end of the year there were 71 men employed, of whom 31 were underground and 14 in the mill. A. M. Potter is mine manager.

West Red Lake Gold Mines, Limited

West Red Lake Gold Mines, Limited, was incorporated in March, 1934, with a capitalization of 3,000,000 shares of \$1 par value, of which 1,999,205 shares were issued as at October, 1936. The officers and directors were: H. G. Young, president; A. J. Doane, vice-president; G. B. Webster, secretary-treasurer;

Alan Cockeram and T. W. McEachern, directors. The head office of the company is at 11 King Street West, Toronto. The mine address is Red Lake.

The property consists of 27 claims in four groups located in the townships of Todd and Ball in the Pipestone Bay section of Red Lake area, Kenora district, Patricia portion. Operations were resumed at the mine in June, 1936, after a 7-month period of idleness. No underground work was done, the operation consisting of surface exploration. The following figures show the amount of development work done at the property in the past three years:—

	1934	1935	Total to date
	feet	feet	feet
Shaft (vertical, 2-compartment).....	200	17	217
Crosscutting.....	95	49.7	144.7
Drifting (level at 200-feet).....	289	347	627
	cu. ft.	cu. ft.	cu. ft.
Station-cutting.....	1,260	724	1,984

During the last seven months of the year, there was an average of 4 men employed at the property.

Wright-Hargreaves Mines, Limited

Wright-Hargreaves Mines, Limited, was incorporated in June, 1916, with a capitalization of 5,500,000 shares of no par value, all of which have been issued.

The officers and directors are: E. L. Miller, president and managing director; W. H. Wright, vice-president; M. W. Summerhayes, general manager; Gerard F. Miller, treasurer; P. H. Gerhard, secretary; J. Y. Murdoch and Oliver G. Donaldson, directors. The head office is at Fort Erie. The executive office is at the Liberty Bank Building, Buffalo, N. Y. The mine office is at Kirkland Lake.

The property consists of 4 claims of approximately 155 acres in Teck township, Kirkland Lake area, district of Timiskaming. An average of 951 men was employed during 1936.

The following is taken from the general manager's report for the fiscal year ending August 31, 1936:—

ANALYSIS OF OPERATING COSTS

	Total	Cost per ton milled
Development, exploration, and pumping.....	\$586,826.52	\$1.514
Stoping.....	848,398.71	2.190
Transporting ore (hoisting, etc.).....	278,500.02	.719
Milling charges.....	477,974.40	1.233
General surface and miscellaneous mine buildings charges.....	97,202.10	.251
Stock transfer, dividend, and annual report expense.....	17,395.11	.045
Employees' group insurance, silicosis, workmen's compensation, property taxes, and insurance.....	75,576.09	.195
General and miscellaneous undistributed charges.....	126,728.77	.327
Marketing bullion.....	18,398.64	.047
	\$2,527,000.36	\$6.521
Provision for taxes.....	700,000.00	} 3.080
Royal Mint special bullion-handling tax.....	75,378.89	
Depreciation buildings and equipment.....	306,736.76	
Township sewer-tunnel expense.....	16,804.18	
Kirkland Lake Hospital expense.....	9,346.59	
Balance written off, shaft No. 4.....	85,000.00	
Total.....	\$3,720,266.78	\$9.601

During the period 387,464 tons of dry ore were treated in the mill, from which we recovered 215,427 ounces fine gold and 41,932 ounces fine silver. There was realized from marketing this bullion, \$7,595,231.16. The average grade of the ore going to the mill, at \$20.67 per ounce, was 0.579 ounces or \$11.962 per ton, with a recovery of 0.559 ounces or \$11.550 per ton, an extraction of 96.55 per cent.

PRODUCTION RECORD, 1921-1936

Year	Tons milled	Value per ton	Gross value	Recovery per ton	Bullion produced	Dividends
1921 (8 mos.)	36,081	\$13.96	\$503,302	\$13.00	\$468,665
1922 ¹	66,181	12.49	827,447	11.52	762,752	\$412,500
1923	79,242	10.48	830,992	9.52	754,978	206,250
1924	84,487	14.16	1,194,217	12.89	1,088,725	206,250
1925	147,939	14.49	2,148,554	12.93	1,913,401	550,000
1926	153,392	15.66	2,400,795	14.02	2,150,844	893,750

MILLING STATISTICS

September 1, 1935, to August 31, 1936

Ore milled tons	387,464
Average value per ton	\$11.962
Gross value	\$4,635,063.11
Loss in tailings	159,776.76
Net value recovered	\$4,475,286.35
Average tons milled per day	1,058.64
Per cent. of possible running time	96.24
Tons 100 per cent. running time	1,100
Solution precipitated tons	1,469,890
Solution precipitated per ton of ore tons	3.79
Value per ton in tailings	\$0.412
Per cent. extraction	96.55
Cyanide consumed per ton of ore (K.C.N.) lbs.	0.515
Zinc consumed per ton of ore ounces	1.990
Zinc consumed per ton of solution ounces	0.525
Lime consumed per ton of ore lbs.	3.618
Steel consumed per ton of ore, ball mills lbs.	2.865
Steel consumed per ton of ore, tube mills lbs.	2.392
Grinding, average per cent.,—325 mesh	82
Cost of flotation reagents consumed per ton of ore	\$0.042
Average value of pregnant solution per ton	\$3.008
Average h.p. consumed per day	2,472
Average h.p. consumed per ton milled	2.34
Power cost per h.p. consumed	\$54.32

N.B.—All values at \$20.67 per ounce.

Total..... \$159,302.49

Development

We have continued the policy of the last several years, concentrating on completing the development and mining out the upper levels. This work continues to open up new ore sections and has had the effect of considerably prolonging the life of these upper levels.

There were 495,586 tons of new ore developed, and after deducting 387,464 tons milled, 108,122 tons were added to ore reserves.

The interior No. 5 shaft, starting at the 3,600-foot level, was sunk a further 1,255 feet during this year, making the bottom 5,400 feet below surface. This shaft will now allow of nine new levels to be actively developed, the lowest of which will be at the 5,250-foot horizon. The stations at all levels have been completed; a pumping chamber and sump completed and equipped at the 5,100-foot level; ore and waste pockets cut and equipped between the 5,100- and 5,250-foot levels. Ore and waste passes still have to be completed before development of the new set of levels can be actively pushed. However, both the North and South veins have been cut on the 4,500-foot level, where only a small amount of work has been done up to the present time. The vein structure remains the same as in the upper horizons, and we fully expect future developments to be normal to those horizons as we open up the various levels. It is expected considerable development will be done on these lower levels during the new fiscal year.

Milling

The mill continued to give a good account of itself in view of the increased tonnage. The slightly lower extraction, 96.55 per cent. as against 96.78 per cent., was the effect of the coarser grinding due to this increase of the daily tonnage.

General

The new sports field on the old tailings area was used this season for the first time. The Wright-Hargreaves Athletic Association, made up entirely of employees, made full use of this; baseball, softball, and football were all played. Several trophies were obtained by the clubs

playing under the auspices of this Athletic Association. Appreciation of the interest of the directors in sports and the building of the sports field has been expressed by many of the men who belong to the various clubs.

Young-Davidson Mines, Limited

Young-Davidson Mines, Limited, was incorporated in April, 1926, with an authorized capitalization of 3,000,000 shares of \$1 par value. The officers and directors of Young-Davidson Mines, Limited, are: Gideon Grant, president; C. G. Knott, vice-president; F. M. McKay, secretary-treasurer; Jacob A. Davidson, W. C. Young, Roy Driscoll, directors.

The company owns a property in Powell township, Matachewan area, district of Timiskaming, which is being operated under agreement by the Hollinger Consolidated Gold Mines, Limited. A reference to the property appears on page 146 of this report.

During the year, the main shaft was sunk an additional 153 feet to a depth of 525 feet. Two levels, at 262 feet and 462 feet, were established. About 497 feet of crosscutting and 2,846 feet of drifting were done. Some 273,368 tons of ore and 27,581 tons of waste were hauled from the open pit; 27,795 tons of ore and 9,946 tons of waste were hoisted from underground development. The mine is being developed for shrinkage stoping.

An average of 183 men was employed. H. North is mine manager. The mine office is at Matachewan.

Young-Shannon Gold Mines, Limited

Young-Shannon Gold Mines, Limited, was incorporated in 1932, with an authorized capitalization of 3,000,000 shares of no par value. The officers and directors are: C. T. Young, president; A. J. Bolton, vice-president; W. C. Huff, secretary-treasurer; Gerard Ruel, Duncan McLaren, Oscar R. Smith, directors. The head office is at 1 Toronto Street, Toronto. The mine address is Gogama.

No work was done during 1936 at the Clam lake property, located in Chester township, Three Duck Lakes area, district of Sudbury. In May, 1936, the mining plant was transferred to the property of the Martin Syndicate, located in the same township, on which surface work and diamond-drilling had been done in 1935. A 2-compartment, 70-degree shaft was started on claim S. 19,971 and sunk to a depth of 100 feet, at which depth a level was established on which 150 feet of drifting and 22 feet of crosscutting was done. Shaft-sinking was then resumed, and the shaft had reached a depth of 200 feet by the end of the year. A total of 2,196 feet of diamond-drilling was done in 1936.

The plant included a 220-cubic-foot Gardner Denver gasoline compressor and an 8- by 12-inch air hoist.

An average of 22 men was employed under the direction of A. E. Taylor.

GRAPHITE

Black Donald Graphite Company, Limited

The officers of the Black Donald Graphite Company, Limited, are: R. F. Bunting, president and manager; W. B. Bunting, vice-president; R. A. Telfer, secretary-treasurer.

The mine and refinery in Brougham township, Renfrew county, operated almost continuously during 1936. Graphite to the value of \$88,812 was produced.

An average of 12 men was employed in the mine, and 28 in the refinery. The mine address is Calabogie.

GYPSUM

Canadian Gypsum Company, Limited

The Canadian Gypsum Company, Limited, has a capitalization of 3,000 shares of \$100 par value. The officers and directors of the company are: O. M. Knode, president; W. L. Keady, vice-president; C. H. Shaver, secretary-treasurer; F. B. Gibbs, director of sales; S. L. Avery, J. E. MacLeish, and Otis Wack, directors. W. F. Anderson is production manager and B. S. Barns, agent and comptroller. The head office is at Windsor, N.S., and the business office is at 1221 Bay Street, Toronto. Otis Wack, Windsor, N.S., is director of operations.

The company operates a gypsum mine and plant near Hagersville, in Oneida township, Haldimand county. All commercial gypsum products are produced at the plant, which includes a mill, wall board, and block manufacturing buildings. During 1936 some 22,611 tons of rock were hoisted. An average of 55 men was employed. W. E. Allen, Hagersville, is superintendent.

The company also operates a quarry and lime plant at Guelph; a large gypsum quarry at Windsor, N.S.; a gypsum mill at Hillsborough, N.B.; a gypsum calcining mill at Iona, Cape Breton; and a winter gypsum storage depot at Deep Brook, N.S.

Through a wholly owned subsidiary, Toronto Asphalt Roofing Manufacturing Company, Limited, the company owns and operates an asphalt roofing plant at Mount Dennis, Ont., which employed an average of 56 men during 1936.

Associated with the company is the Gypsum Packet Company, Limited, operating four 7,000-ton freight and passenger steamers between Nova Scotia and United States ports.

Gypsum, Lime and Alabastine, Canada, Limited

Gypsum, Lime and Alabastine, Canada, Limited, has a capitalization of 2,000,000 shares of no par value. The officers are R. E. Haire, president and manager; S. H. J. Reid, secretary-treasurer; W. E. Armstrong, Henry Cockshutt, H. J. Haire, Jas. R. Inksater, G. H. Kranenberg, J. E. McConnell, R. S. McCurdy, N. L. Nathanson, W. C. Pitfield, and John F. Cameron, directors. The head office is at Paris, Ont.

The mine and mill at Caledonia, Seneca township, Haldimand county, was operated throughout the year. L. V. Robinson was superintendent, employing an average of 115 men.

There were hoisted 27,965 tons of rock. Of this, some 998 tons were sold, and the rest was manufactured into land-plaster, stucco, Paristone, Gyproc, dry Insulex, Gyproc wool, gypsum lath, and other building products.

In addition to the Caledonia mine, the company operates gypsum plants at Montreal, Winnipeg, Vancouver, and Calgary.

Lime plants are situated at Beachville, Elora, Hespeler, Milton, Limehouse, and Puslinch, Ont., and at St. Mark and Joliette, Que.

Quarries are operated at Mabou, N.S.; Gypsumville, Man.; and Salmon River, B.C. The alabastine plant is at Paris, Ont.

MOLYBDENITE

Phoenix Molybdenite Corporation, Limited

The Phoenix Molybdenite Corporation, Limited, was incorporated in October, 1923, with a capitalization of 1,000,000 shares of \$1 par value, 625,000

of which have been issued. The officers and directors are: F. L. Stinson, president; W. G. Chipp, secretary-treasurer; John Thomson, director and solicitor; Dr. Geo. Joynt and Dr. M. L. Laidlaw, directors. The head office is at 710 Excelsior Life Building, Toronto. The mine address is Ashdad.

The property in Bagot township, Renfrew county, was operated throughout 1936. The mill was operated from August 17 to December 31. An average of 28 men was employed under the direction of S. S. W. Cole.

In January, 2,100 feet of diamond-drilling was done on the 95-foot level. The shaft was sunk to a depth of 200 feet, and a station was cut at the 175-foot level. About 650 feet of drifting and crosscutting was done on this level. A raise to connect the two levels was started and was driven about 38 feet above the 175-foot level, and stoping was started on the 95-foot level. About 2,400 tons of ore were hoisted.

During the year a new bunk- and cook-house building and a new crusher-house were erected. The headframe was enlarged and the mill put into running shape.

NICKEL AND COPPER

Cuniptau Mines, Limited

Cuniptau Mines, Limited, was incorporated in December, 1933, with a capitalization of 3,000,000 shares of \$1 par value, 2,768,205 of which have been issued. On January 10, 1937, the shareholders ratified a proposal to merge the company with the Ontario Nickel Corporation, Limited, which has been incorporated with a capitalization of 6,000,000 shares of \$1 par value. Cuniptau Mines, Limited, is to receive \$15,000 in cash and 1,200,000 shares of the new company.

The officers and directors of Cuniptau Mines, Limited, for 1936 were: B. W. Watkins, president; A. L. Herbert, vice-president; W. G. Watkins, secretary-treasurer; Gordon McLaughlin and Ian M. MacLaren, directors. The operations were managed by the Mining Research Corporation, Limited. Geo. M. Lee is manager. The head office is at 465 Bay Street, Toronto. The mine office is at Goward.

The properties consist of 64 claims, 2,560 acres, in Strathy township, district of Nipissing, known as the Cuniptau mine; and 520 acres in Clergue and Dundonald townships, district of Cochrane, known as the Alexo mine. The latter property is held under option.

Cuniptau Mine

At the Cuniptau property, the smelter was rebuilt to test out the possibilities of making a suitable matte from the ore. This was accomplished, using ore from the dump and from underground development and mining. Exploration and development consisted of 602 feet of surface diamond-drilling, 3,956 feet of diamond-drilling underground, 276 feet of raising, 30 feet of crosscutting, and 369 feet of drifting. About 3,878 tons of ore and 1,243 tons of waste were hoisted.

Construction started in March, mining in May, and milling in July. Smelting was carried on from July to October. An average of 47 men was employed over the year.

Alexo Mine

The Alexo mine lies half a mile south of the branch line of the T. and N. O. railway and the highway from Porquis Junction to Timmins.

Mining operations were carried on from 1912 to 1918, during which time estimated production was 56,000 tons of ore, assaying about 4½ per cent

nickel and 0.6 per cent. copper. Ore produced was shipped to the Mond Nickel Company at Sudbury. An open stope, approximately 15 feet wide and 75 feet long, now extends from surface to the 120-foot level. There is another level at 75 feet, and a third at 240 feet. Drifting done on the various levels in the past has been reported by Cuniptau Mines as follows: 300 feet on the 75-foot level, 300 feet on the 120-foot level, and 50 feet on the 240-foot level.

Cuniptau's operations at the property in 1936 consisted of pumping out part of the mine and sampling. An average of 7 men was engaged at this operation during the last four months of the year under the supervision of Frank Leslie. The 1937 programme provides for further development and removal of ore.

Falconbridge Nickel Mines, Limited

Falconbridge Nickel Mines, Limited, was incorporated in August, 1928, with an authorized capitalization of 5,000,000 shares of no par value. The officers and directors are: J. Gordon Hardy, president; Thayer Lindsley and Halstead Lindsley, vice-presidents; N. F. Parkinson, secretary-treasurer; W. S. Morlock and H. Whittingham, directors. The head office is at 25 King Street West, Toronto.

The company operates a nickel-copper mine, concentrator, and smelter in Sudbury district, and a refinery at Kristiansand, Norway. Ernest Craig is mine manager; J. R. Gill, assistant mine manager; E. J. Martin, mine superintendent; R. C. Mott, concentrator superintendent; and M. J. Tamplin, smelter superintendent. During 1936 an average of 818 men was employed, of whom 265 were underground. The mine address is Falconbridge.

The following is an extract from the annual report of the company for the year ending December 31, 1936:—

Actual running time suffered a serious set-back in September when one of the Hydro plants supplying us with power was destroyed by fire, but otherwise the year was without special incident in so far as production was concerned, other than the unavoidable disturbances inflicted by the heavy construction programme under way.

Mine Development

Combined development footages completed on all levels during the year were as follows:—

	Feet
Drifting and crosscutting (including slashing).....	14,157
Raising (including slashing).....	1,408
Ore passes (including slashing).....	1,613
Fill passes (including slashing).....	976
Diamond-drilling.....	3,046
Shaft-sinking.....	400
Shaft-raising.....	170
	cu. ft.
Station-cutting.....	103,632

Of the total of 14,157 feet of drifting and crosscutting, 5,078 feet were along the ore zone on the different levels, the remainder being haulage drives. The 500- and 1,200-foot levels accounted for the major portion of the footage in ore, and on the former the east drift was advanced to a point 2,816 feet east of the No. 5 shaft. From the extreme west face of this level, west of No. 1 shaft, to the above east face, the distance opened on the ore zone totals 6,960 feet, much the greater portion of which presents commercial ore. The year's advance measured 1,216 feet and was in payable, though low-grade ore. Generally speaking, the 500-foot level has been driven in a horizon of lower-than-average ore, but was selected as our spearhead for eastern advance from reasons of convenience.

On the 1,200-foot level, the other locale of special attention, the east drift from the No. 5 shaft was advanced 1,179 feet and the west drift 1,467 feet. The latter connected with the No. 1 shaft. This 1,200-foot level has now been opened a total distance along the ore zone of 3,990 feet, of which 95 per cent. is in ore of good width and grade. Other development footage in ore included 306 feet east on the 200-foot level and 367 feet west on the 1,000-foot level, both from No. 5 shaft and in ore of average grade and width.

No. 5 shaft was deepened 400 feet to a total of 1,813 feet. A large part of the year's work was applied to establishing stations and connections to the ore zone from this shaft, the 650-, 825-, and 1,000-foot levels particularly, together with provisional stations on the 1,575- and 1,750-foot levels. Ore passes were also completed in this area from the 325- to the 1,200-foot levels, together with a loading-pocket for the skips on the 1,350-foot level. A crusher station was excavated and equipped on the 1,200-foot level and was put into operation. Ample pumping capacity and sump storage was installed on this level, although the total water so far being handled only amounts to some 100 gallons per minute.

In the old No. 1 shaft area, the new fill-pass system was completed from the 750-foot level to surface and the filling of the old stopes commenced. This shaft itself was deepened to the 1,200-foot level and a connection provided with the No. 5 shaft at that horizon.

A gradual increase in the amount of ore from cut-and-fill stopes took place during the year, until at present over 60 per cent. of the production is obtained by this method of stopping. This has resulted in a lessening of drawings from the old shrinkage stopes, with consequent little change in the broken ore reserves now reported.

Ore Reserves

Much the greater amount of the new ore developed in 1936 is in the east ore body in the No. 5 shaft area and, as a whole, averages lower in grade than the old No. 1 shaft workings. Departure from this condition is shown on 1,200-foot or bottom level, where widths and ore grades compare satisfactorily with the No. 1 shaft exposures. No allowance has been made in the reserves below the 1,200-foot level for ore exposed on that level. The figures we would present are as follows:—

	Tons
Ore reserves as at December 31, 1935.....	4,059,475
New ore added in 1936.....	1,633,342
Total.....	5,692,817
Less: drawn during 1936.....	361,741
Total ore reserves (averaging 1.81 per cent. nickel and 0.88 per cent. copper), December 31, 1936.....	5,331,076

Ore Production

Mining activities for production during the year can be summarized as follows:—

	Tons
Broken ore reserves December 31, 1935.....	387,337
Ore broken in stopes during 1936.....	256,051
Total.....	643,388
Less: trammed from stopes, 1936.....	307,203
Broken ore reserves December 31, 1936.....	336,185

Additionally, ore production came from development work, so that the tonnage delivered to the rock-house tabulates as follows:—

	Tons
Ore trammed from stopes, 1936.....	307,203
Ore from development, 1936.....	54,538
Total.....	361,741
Less: waste reject underground.....	4,270
Total delivered to rock-house, 1936.....	357,471

Crushing, Sorting, and Transportation

From 357,471 tons of ore delivered to the rock-house, 26,983 tons, or 7.5 per cent., of waste was eliminated by sorting. The balance of 330,488 tons was transported to the reduction plant bins for treatment.

Reduction Plant

The reduction plant was in operation 332.64 days in 1936. Suspension of operations was forced through the failure of power supply when the Stinson generating station of Hydro was destroyed by fire in September. The opportunity was then taken to rush to completion the smelter extensions that were part of our 1936 expansion programme, and the consequent increased smelting capacity was thus made available when power service was resumed in October. The definite trend in our metallurgical practice of eliminating waste rock by mechanical concentration rather than by hand-sorting is evidenced by the increased proportion of ore milled, and this in turn permits the profitable treatment of lower-grade ore.

The year's results show as follows:—

	Short tons
Total ore treated (made up of 126,782 tons of milling ore and 201,001 tons of smelting ore).....	327,783
Matte produced.....	10,244.2
Nickel in matte produced.....	5,682.5
Copper in matte produced.....	2,644.4
NICKEL:	Pounds
Recovered per ton treated.....	34.67
Metallurgical losses per ton treated.....	3.35
Indicated grade of ore treated (1.9 per cent.).....	38.02
COPPER:	
Recovered per ton treated.....	16.13
Metallurgical losses per ton treated.....	2.36
Indicated grade of ore treated (0.92 per cent.).....	18.49

Construction

The centralization of all ore hoisting at No. 5 shaft entailed a heavy construction programme to provide crushing, ore dressing, transportation, and storage facilities to replace those necessarily abandoned through the change. This programme was augmented by provision for a substantial increase in smelter capacity so designed as to fit in with any future step-up.

By the installation of additional motors, speeds and capacities of the No. 5 shaft hoists were increased. The surface plant consists, first, of a secondary crushing plant fed from the receiving bin at No. 5 shaft; this is connected to the main ore-dressing plant, which is equipped for screening, magnetic separation, and fine-crushing, by a conveying system 1,300 feet in length. A series of distributing conveyers deliver the various products to storage bins, which have a total capacity of 8,000 tons. Further conveyers transport ore from the bins to the concentrator. There is also provided ample storage capacity for coke and fluxes. All of this construction was completed and the various units operating early in December.

Adjustments and increases at the smelter embraced the erection of an 18- by 300-foot reinforced concrete chimney, a new dust chamber and flue system. Sintering capacity was increased, the building altered, a gas-exhausting and dust-collecting system installed, and a new flue constructed. The smelter building was extended, a new converter installed, and one existing converter moved and enlarged. The blast furnace was extended, and an additional furnace blower installed. Haulage equipment was provided for waste slag and some 2½ miles of standard-gauge railway constructed.

The new equipment embraced in this expansion programme has an indicated capacity for treating 36,000 tons monthly, an increase of 25 per cent. over previous capacity.

In the townsite, five new dwellings were erected and some extensions made to the sewer and water systems. The completion of a club-house with accommodation for around 125 men, including kitchen and dining rooms furnished with the most modern equipment, served to extend and improve living facilities for single employees.

Refinery

The refinery, which is located in Norway, operated steadily without any interruptions of consequence. It was extended during the year for ample capacity to handle the 25 per cent. increase in smelter capacity. While most of the construction work was finished before the end of the year, and the production somewhat increased as far as available matte supply permitted, it will be some time in the new year before the increased matte production at the smelter will have shown up fully in increased nickel production. Custom matte was received regularly at the rate of 1,000 long tons of nickel annually.

For the year 1936, the amount of metals in matte received from the smelter, the refinery production, the metals in process, and metals in matte on hand at the end of the year, is set out in the following table:—

	Nickel	Copper
	lbs.	lbs.
Metals in Falconbridge matte received, less refining losses.....	10,812,300	4,987,446
Produced in marketable form in 1936.....	11,226,108	5,005,902
Metals in process of refining at end of 1936.....	2,032,352	491,287
Metals in matte on hand at end of 1936.....	530,320	233,349

Marketing

In spite of an expensive shut-down of your smelting plant in September, the semi-processed stocks at the refinery permitted the upkeep of production, and sales again recorded a high point,

with 11,252,893 pounds of nickel, 5,149,215 pounds of copper, and precious metals to the value of \$160,658.49, being disposed of. Stocks were maintained in sufficiency, and the new year was entered into with the largest backlog of orders in our history.

Labour and supply costs have gone up, and from January 1, 1937, the price of nickel has had a 10 per cent. drop in markets outside of North America. To some extent this is offset by increased copper prices. Happily our expansion programme was effected in the lower range of costs, so that your company is equipped to confidently face the new conditions.

International Nickel Company of Canada, Limited

The authorized capital of the International Nickel Company of Canada, Limited, consists of \$27,679,900 of preferred shares of \$100 and \$5 par value, and 15,000,000 shares of common stock of no par value.

The officers are: Robert C. Stanley, chairman of the board and president; John F. Thompson, executive vice-president; Paul D. Merica, Donald MacAskill, and D. Owen Evans, vice-presidents; John C. Nicholls, assistant to the president; James L. Ashley, secretary-treasurer.

The directors whose term expires in 1937 are: James L. Ashley, John F. Dulles, Reg. Halladay, Donald MacAskill, J. W. McConnell, R. S. McLaughlin, Britton Osler, J. A. Richardson, Robt. C. Stanley, Andrew V. Stout, John F. Thompson, and Rt. Hon. Lord Weir of Eastwood.

The directors whose term expires in 1938 are: J. P. Bickell, Hon. H. Cockshutt, Wm. N. Cromwell, D. Owen Evans, Sir Harry McGowan, R. H. McMaster, Wm. W. Mein, Rt. Hon. Lord Melchett, Paul D. Merica, Sir Robert Mond, Thomas Morrison, Seward Prosser, and Grant B. Shipley.

The executive office is at 67 Wall Street, New York, N.Y., and the general offices are at Copper Cliff, Ont.

This company and subsidiary companies operate hydro-electric power plants at High Falls, Big Eddy, Wabageshik, and Nairn Falls, Ont.; nickel-copper mines in Sudbury district, Ont.; smelters at Copper Cliff and Coniston, Ont.; refineries at Copper Cliff and Port Colborne, Ont., Acton, England, and Clydach, Wales; rolling mills at Birmingham, England, Huntington, W. Va., and Glasgow, Scotland; a colliery at Pontardawe, Wales; and a foundry at Bayonne, N.J.

The following information is extracted from the annual report of the company covering the year ending December 31, 1936:—

General

Throughout 1936 your company's business continued to improve. Sales of nickel exceeded those of any prior year and were 30 per cent. greater than the volume reported for 1935. Sales of copper and the platinum metals were also substantially greater than in any previous year, and better prices for these metals were obtained.

Your company's plants were operated at capacity, and an all-time peak production of metals was established. From an efficiency standpoint the results were gratifying, and many economies were brought about. On the other hand, wages were increased, working hours were adjusted downward, and higher prices were paid for materials. Furthermore, increases in income-tax rates and levies of new taxes took a larger proportion of your company's profits than in preceding years.

Extensions to the smelting works at Copper Cliff and the nickel refinery at Port Colborne, together with additions and betterments to plants in Great Britain and the United States, were largely completed towards the close of the year. This expansion programme entailed an expenditure of \$11,202,265.71 and will increase productive capacity to more than 220,000,000 pounds of nickel in all forms per annum.

Your company's diversified interests were further integrated by the acquisition of all of the outstanding stock in Whitehead Metal Products Company of New York, Incorporated, and Horseshoe Lake Mining Company, Limited, Saskatchewan. The former is an important distributor of non-ferrous metals, and the latter mines and treats sodium sulphate, which is required as a flux by the Copper Cliff smelter. These companies, formerly partly owned, are now wholly owned subsidiaries.

A net profit of \$36,865,526.11 was realized after all charges, including provision for taxes, depreciation, mine depletion, and other purposes. After payment of preferred dividends of \$1,933,898.75, there remained \$34,931,627.36, equivalent to \$2.39 per share of common stock.

Sales

Your company's sales of nickel in all forms increased from 129,850,207 pounds in 1935 to 168,927,980 pounds in 1936, or 30 per cent. Sales of nickel in products of the Port Colborne and Clydach refineries increased from 105,620,318 pounds to 133,829,864 pounds, or 27 per cent. Sales of nickel in products of the Copper Cliff smelter increased from 4,085,570 pounds to 5,694,585 pounds, or 39 per cent. Sales of nickel in products of the rolling mills at Birmingham, Glasgow, and Huntington, and of the foundry at Bayonne, increased from 20,144,319 pounds to 29,403,531 pounds, or 46 per cent.

Sales of Monel metal, a nickel alloy made directly from Creighton ore, increased from 13,411,624 pounds to 16,730,789 pounds, or 24 per cent.; sales of pure rolled nickel increased from 9,339,595 pounds to 15,856,614 pounds, or 70 per cent.; and sales of Inconel increased from 609,632 pounds to 731,952 pounds, or 20 per cent. Sales of copper increased from 233,009,392 pounds to 265,954,589 pounds, or 14 per cent.

Sales of gold increased from 69,944 ounces to 73,142 ounces, sales of silver decreased from 3,160,222 ounces to 2,425,332 ounces, and sales of the platinum metals increased from 128,874 ounces to 220,980 ounces. Sales of selenium increased from 72,616 pounds to 107,791 pounds, and sales of tellurium decreased from 9,987 pounds to 2,567 pounds.

Mines

Ore requirements of 4,299,329 tons were extracted from the Frood and Creighton mines, which were operated continuously throughout the year. The former furnished 3,408,956 tons and the latter 890,373 tons.

Development work at the Frood mine was carried on in step with production requirements. The footage advance was 30,628 feet, thus bringing the total underground workings to approximately 50 miles. There are now sufficient stopes in operation, or in readiness, to yield a daily output of 13,000 tons.

In the Creighton mine, development was also adjusted to ore requirements. An advance of 8,656 feet was made, and the total footage of development is now about 45 miles. The new shaft and surface plant have been completed. This shaft is 4,075 feet deep and will be used in extracting a substantial tonnage of ore from recently developed reserves.

Notwithstanding the large increase in the number of men working in the mines, the accident rate was the lowest since 1932. Time lost due to injuries amounted to 6.05 working shifts per thousand shifts of eight hours each. This figure is comparable with 9.67 working shifts per thousand last year. The good showing reflects close co-operation between the employees and the safety department. Another important consideration in mining, particularly in deep mines, is proper ventilation, which plays an important part in the efficiency of mining operations. The supply and distribution of fresh air from the surface to the working faces requires careful supervision and a sizeable surface plant and special airways. In the case of the Frood mine, \$1,280,000 has already been expended in installing the ventilation system.

Smelters

There were milled and concentrated 3,317,988 tons of ore. The concentrator was enlarged by the addition and replacement of equipment. This programme has been completed, and the plant can now treat 11,000 tons of ore per day, an increase of one-third over its former capacity. Metallurgical research is being actively continued with a view to effecting further economies in the practice of ore flotation.

The Copper Cliff smelter produced 149,000 tons of bessemer matte and 139,796 tons of blister copper. This plant was extended during the year, and two reverberatory furnaces and seven converters installed, thus bringing the total smelter equipment to seven reverberatory furnaces and nineteen converters. These additional facilities increase productive capacity by one-third.

At the Coniston smelter the four blast furnaces and five converters were operated throughout the year. Ore to the amount of 834,314 tons was processed and 56,827 tons of bessemer matte produced.

Refineries

Port Colborne Nickel Refinery.—This refinery operated at capacity throughout the year and produced 103,860,757 pounds of nickel. An addition to this plant, which increased capacity by 50 per cent., was completed during 1936. There was also constructed a 500-foot stack in connection with the roasting furnaces, which furnish semi-roasted raw material for the Clydach nickel refinery. A small plant was built for the fabrication of Monel metal hot-water tanks and range boilers and is operating satisfactorily.

Ontario Refining Company, Limited.—Blister copper treated averaged slightly over 12,000 tons per month, and operations were above the rated capacity for the first time. Production of refined copper was 137,012 tons. There were several new developments during the year, the most important being the installation of a 30-ton arc-type electric melting furnace, and a scheme for transporting molten blister copper from the Copper Cliff smelter to the refinery, a distance of about one mile. The transfer of molten metal eliminates many costly steps from the smelter converters to the refinery anode furnaces. Additional units have been ordered, and shortly the entire tonnage of blister copper will be handled in this way. New methods in the smelting and refining of copper are constantly being investigated to perfect operations further

and to meet the requirements of the consumer. Research was continued, and this department worked out various problems and effected many economies and improvements.

Ore Reserves

Proven ore reserves at December 31, 1936, were 205,482,000 tons. Additional ore proven during the year amounted to 4,381,000 tons.

Outlook

The nickel industry, somewhat in advance of other basic industries, has been progressively recovering during the past four and one-half years from the most severe trade reversal in generations. That the world has entered a more prosperous period, following the recent years of depression, is now quite evident.

Following a period of expanding business the year 1936 may be characterized as one of preparedness by your company. Production facilities were again extended to provide standby capacity necessary as a foundation for expansion in consequence of continued research and commercial activities. Furthermore, a strong financial position has been attained, which is so essential as a prudent safeguard against future fluctuations in business and provides for plant additions as required. At the same time the established policy of integrating plants, metallurgical processes, and personnel was further pursued with resultant economies.

It is the belief of your management that considering mines, plants, organization, and financial resources your company is prepared to meet an increasing demand for nickel. Your other important products, copper and platinum, are currently commanding better prices, and sales of these metals in world markets have improved. Thus, barring any major upset in world affairs, it would seem that the immediate future holds promise for the nickel industry and for your company.

Employees

The total number of employees at the year-end was 15,433, distributed as follows: Canada, 9,837; Great Britain, 3,124; United States, 2,417; other countries, 55. Employees on December 31, 1935, numbered 12,452. The increase, amounting to 24 per cent., was due to the increased scale of operations and to the construction work in progress. Moreover, the employees of Whitehead Metal Products Company of New York, Incorporated, and the Horseshoe Lake Mining Company, Limited, are, for the first time, included in these figures.

During 1936 an average of 2,291 men was employed at Copper Cliff, 489 at Coniston, 2,611 at Frood, and 925 at Creighton. Of these, an average of 2,141 was employed underground at Frood, and 632 at Creighton.

Donald MacAskill is general manager; R. D. Parker, general superintendent; H. J. Mutz, superintendent of mines; P. F. MacDonald, superintendent of smelters; F. J. Eager, superintendent of the Frood mine; B. F. Crandall, superintendent of the Creighton mine; D. Finlayson, assistant superintendent of the Copper Cliff smelter; W. A. MacDonell, plant manager of the Coniston smelter; E. Herbert Rose, superintendent of the Copper Cliff concentrator.

PEAT

Gordon Countryman

The operation conducted by Gordon Countryman is near Chesterville, Winchester township, Dundas county. During the summer of 1936, some 67 tons of peat fuel were produced and 60 tons were sold. Twenty men were employed for a short period.

Hillsgreen Peat Works

The operation conducted by Hillsgreen Peat Works in lot 15, concession X, Hay township, Huron county, is known as the Zurich peat bog. The operator, C. A. Robinson, R.R. No. 1, Zurich, produced and sold approximately 60 tons of peat fuel in 1936. Three men were employed.

H. L. Hodgkins and Son

At a peat operation near the Forks Road, 5 miles from the village of Wainfleet, Wainfleet township, Welland county, 65 tons of peat fuel was produced.

The operators are H. L. Hodgkins and Son, R.R. 2, St. Ann's. About 5 men were employed for the greater part of the summer months.

Wm. Leasa

The largest peat operation in the province for the past year is located in lot 11, concession X, Ellice township, county of Perth, some seven miles north of Stratford. The operator is Wm. Leasa, Milverton.

During the summer of 1936 some 960 tons of peat fuel was produced and sold. About 10 men were employed.

Northern Peat Company

The Northern Peat Company, incorporated in March, 1936, has a capitalization of 40,000 shares of \$1 par value, of which 11,000 shares were issued at the end of November, 1936. The officers and directors of the company are: W. B. Brewer, president; E. L. Giblin, secretary-treasurer; B. M. Brewer, E. C. Brewer, and U. S. Annett, directors. The head office of the company is at Timmins.

The company was organized to process and sell peat and its by-products; to engage in farming; and to contract for hauling and lumbering. During the months of June, July, August, and part of September the company operated at a peat bog $5\frac{1}{2}$ miles west of Timmins, in lot 8, concession III, Mountjoy township, district of Cochrane. In this period approximately 1,000 tons of green peat were treated to produce approximately 150 tons of dried peat. The peat is sold locally for \$8.50 per ton. Four or five men were employed during the summer months under W. B. Brewer, who supervised operations.

Geo. Runke and Sons

Geo. Runke and Sons, 115 Cameron Street, Kitchener, produced and sold about 115 tons of peat fuel from a small bog, 20 acres in extent, situated in the upper part of the German tract, lot 55, Waterloo township, Waterloo county.

An average of 7 men was employed for the greater part of the summer.

RADIUM

Canada Radium Mines, Limited

Canada Radium Mines, Limited, which was incorporated in May, 1926, has a capitalization of 2,500,000 shares of no par value, of which 1,621,585 shares have been issued. The property consists of 750 acres in Cardiff township, Haliburton county. The officers and directors are: J. G. Cole, president; Geo. F. McCandless, vice-president; I. L. Fletcher, secretary-treasurer; Frank Austin, managing director; Geo. A. Arthur and E. W. Austin, directors. The head office is at 288 Bay Street, Toronto. The mine address is Cheddar.

The shaft has been sunk to a depth of 395 feet, with levels at 125, 250, and 365 feet. Approximately 1,800 feet of lateral work has been done.

About 15 men are employed at the mine.

SILVER AND COBALT

Cobalt Properties, Limited

Cobalt Properties, Limited, was incorporated in August, 1931, with a capitalization of 25,000 shares of \$1 par value, all of which have been issued.

The officers and directors are: T. H. Wainwright, president; Arthur Brocklebank, vice-president and manager; H. E. Tomney, secretary-treasurer. The head office and mine office are at Cobalt.

The company owns the following properties in Coleman township, district of Timiskaming: Coniagas, Mining Corporation, Right of Way, McKinley-Darragh-Savage, and Cobalt Townsite.

Ore was obtained from surface open-cuts and from ore left in pillars and backs and branch veins. The work was done by subleasing and by day's pay. A vertical shaft, 2 compartments, 7 by 10 feet, was sunk on the north side of Cobalt lake, a depth of 60 feet, and a level established to explore this ground. During the year, 30 feet of crosscutting and 165 feet of drifting were done. Some 2,385 tons of cobalt-silver ore was produced and 1,000 tons of waste hoisted.

An average of 43 men for the year was employed. Arthur Brocklebank was manager.

Cobnor Silver Mines, Limited

Cobnor Silver Mines, Limited, was incorporated in October, 1933, with a capitalization of 750,000 shares of no par value, of which 746,830 have been issued.

The officers and directors are: T. M. King, president; N. D. Johnston, vice-president; Percy Luscombe, managing director; C. B. Munday, secretary-treasurer; E. Eaves and E. Smith, directors. H. F. Fancy was mine manager. The head office is at 276 St. James Street, Montreal, Que. The mine office is at Cobalt. The property consists of one claim, 40 acres, in Bucke township, district of Timiskaming.

The property was reopened in September, 1935. Work was continued until August, 1936. During 1936 the headframe was raised an additional 22 feet, and a mill building of frame construction, 30 by 24 feet was built. Equipment for a 25-ton concentration plant was installed. This consisted of a 6- by 8-inch jaw crusher; Hardinge conical, 4-foot, 30-ton ball mill, 2 sand tables, slime table, and 3 blanket tables. The plant is electrically driven.

Underground, 480 feet of drift and 544 feet of crosscut were driven. About 55 tons of silver-cobalt ore were shipped.

An average of 23 men was employed from January to August. Bert Sopha was mine captain.

Comet Leasing Company

James H. Price, Cobalt, Bruce Williams, Kirkland Lake, and J. A. Price, Cobalt, under the name of the Comet Leasing Company, leased the Kerr Lake and the Cobalt Comet mines in Coleman township, district of Timiskaming, and consist of approximately 480 acres. Both mines are owned by the Kerr Lake Mines, Limited, whose executive office is at 61 Broadway, New York, N.Y.

During the year 250 feet of surface trenching was done, and remnants of pillars and floors were mined.

An average of 8 men was employed for the year. James H. Price was in charge of the work. The address of the company is Cobalt.

J. C. Dean

The Silver Bar mine, owned by J. C. Dean, Cobalt, consists of 25 acres in Coleman township, district of Timiskaming. During the year, 200 tons of silver-cobalt ore were recovered from the dumps and from ore left from previous operations, in pillars and backs. The work was done chiefly by subleasing.

An average of 9 men was employed for the four months, August to November. J. C. Dean was in charge of the work.

Ferro-Belorrain (Trust)

Belorrain Mines, Limited, was incorporated in December, 1934, with a capitalization of 1,000,000 shares of no par value, of which 825,005 shares are issued.

The officers and directors are: M. Lebovitz, president; M. C. Van Der Voort, secretary-treasurer; E. A. McDonald, assistant secretary; C. Martin, director. The head office is at Cobalt. The mine office is at Silver Centre. The property consists of one claim in South Lorrain township, district of Timiskaming.

The property was operated from May 1 to October 31 by Ferro-Belorrain (Trust). During this period, the shaft was deepened 100 feet and the 5th level established at 475 feet, and 150 feet of drift were driven. Some 2,800 tons of ore and 4,000 tons of waste were hoisted.

An average of 18 men for the six months was employed. S. S. W. Cole was manager.

McGarry, Craig, and McGarry

J. McGarry, G. W. Craig, and A. McGarry formed a partnership in 1936 to develop claim No. 1,205, approximately 23 acres, in Gillies Limit, district of Timiskaming, at the foot of Giroux lake.

A vertical, 2-compartment shaft, 6 by 9 feet, was sunk from surface to a depth of 114 feet. Compressed air for the hoist and drills was obtained from the hydraulic air main from Ragged chutes.

Four men were engaged in the work from May to September. A. McGarry, Cobalt, was in charge of the work.

M. J. O'Brien, Limited

O'Brien Mine

The O'Brien (Cross Lake) mine in Coleman township, district of Timiskaming, is owned and operated by M. J. O'Brien, Limited. The officers of the company are: M. J. O'Brien, president; J. A. O'Brien, vice-president and managing director; J. N. Rougvie, secretary-treasurer. J. G. Dickenson is general manager and H. G. Kennedy, mine manager.

During the year, No. 1 winze, 2 compartments, vertical, 7 by 9 feet, was sunk 56 feet below the 590-foot level, and a level was established at 640 feet. Some 4,498.5 feet of underground diamond-drilling, 969 feet of crosscutting, and 3,268 feet of drifting were done. About 27,562 tons of ore and 3,268 tons of waste were hoisted.

An average of 107 men was employed. The mine office is at Cobalt.

Miller Lake O'Brien Mine

The Miller Lake O'Brien mine, Nicol township, district of Timiskaming, is owned and operated by M. J. O'Brien, Limited. J. G. Dickenson is general manager, and H. G. Kennedy is mine manager.

During the year, 6,327 feet of surface diamond-drilling was done. Underground, 375 feet of crosscut and 1,655 feet of drift were driven. Some 22,337 tons of ore and 5,922 tons of waste were hoisted.

The average number of men employed was 90. The mine address is O'Brien.

A. G. Morgenthaler

A. G. Morgenthaler, Philadelphia, Pa., operated the Beaver mine, in the township of Coleman, district of Timiskaming, during 1936.

During the year a winze, 9 by 12 feet, was sunk below the 530-foot level and a sublevel was established. Some 24 feet of crosscutting and 75 feet of drifting was done. About 17 tons of ore were hoisted. The ore is sorted underground and the waste dumped into the old stopes.

An average of 8 men was employed for the year. R. Stewart is manager. The mine address is Cobalt.

Morrison Mines, Limited

Morrison Mines, Limited, has a capitalization of 3,000,000 shares of \$1 par value. The officers are: Horace F. Strong, Haileybury, president and manager; Jas. F. Cunningham, secretary-treasurer. The head office is at 165 Sparks Street, Ottawa.

The property in Nicol township, district of Timiskaming, was operated during January, 1936, with an average force of 13 men. About 124 feet of drifting and 45 feet of raising was done. One hundred tons of ore were hoisted.

Ambrose Murphy and Partners

Ambrose Murphy, J. Robitaille, W. E. Seed, J. Ough, Mary Sullivan, and W. R. Thompson formed a mining partnership in 1936. The mine address is care of Ambrose Murphy, Cobalt.

The property, consisting of 6 claims, 108 acres, in Coleman township and Gillies Limit, district of Timiskaming, was acquired from the Keweenaw Mining Company. There are two shafts, approximately 100 feet deep, on the property, one sunk by Hamilton, the original owner, and one by the Keweenaw Mining Company.

In October, 1936, the present owners reopened the property. A timber headframe was built at the original Hamilton shaft. The water was pumped out and a level established at the bottom, 100 feet. About 275 feet of crosscutting and 25 feet of drifting was done.

Ten men were employed in October and November. Operations were suspended in November. The work was under the direction of Ambrose Murphy.

Nerlip Mines, Limited

Nerlip Mines, Limited, is capitalized at 500,000 shares, of no par value, of which 455,000 are issued. There is a provision in the charter that the shares shall be issued and allotted for a consideration not exceeding in the aggregate \$500,000.

The officers and directors are: C. H. Mathews, president; A. B. Pilliner, vice-president; M. A. Gough, secretary-treasurer; William Ambler and Otto Muth, directors. The secretary's office is 111 Dawes Road, Toronto. The mine office is Cobalt.

The property consists of 40 acres in Coleman township, district of Timiskaming. It was formerly known as the John C. O'Donald and A. B. Pilliner property.

During the year the shaft was deepened 160 feet, making a total depth of 277 feet. A level was established at the 275-foot horizon. Approximately 30 feet of crosscutting and 70 feet of drifting were done.

An average of 7 men was employed from April to December under the direction of T. Rava, mine foreman.

Nipissing Mining Company, Limited

Nipissing Mines Company, Limited, which was incorporated in September, 1917, has a capital of 1,200,000 shares of \$5 par value. The directors of the

company are: E. P. Earle, president and treasurer; Alexander Fasken, vice-president and secretary; Richard T. Greene, C. W. Nichols, Dr. F. R. Bennetto, Halstead Lindsley, and Hugh Park, directors. The head office is at the Excelsior Life Building, Toronto. The New York office is at 165 Broadway.

The operating company is the Nipissing Mining Company, Limited, which was incorporated in 1904, with a capital of 2,500 shares of \$100 par value. The officers and directors of the company are: Alexander Fasken, president and secretary; E. P. Earle, vice-president and treasurer; Hugh Park, general manager; Richard T. Greene, C. W. Nichols, Dr. F. R. Bennetto, Halstead Lindsley, directors. The executive offices are the same as those of the parent company.

Mining operations at the Cobalt property consisted of the sinking of shaft No. 105 in Gillies Limit, district of Timiskaming, and mining cobalt ore from this. The shaft was sunk 68 feet and a level established; 12 feet of crosscut, 72 feet of drift, and 65 feet of raise were driven. About 500 tons of ore and 400 tons of waste were hoisted.

The mine address is Cobalt. An average of 24 men was employed in mining and general work and in the mill.

The following is an extract from the general manager's report for the year ending December 31, 1936:—

Operations at the Cobalt property consisted mainly in the milling of cobalt and silver ores, which were too low in value to be shipped without concentrating. Also, some mining was done on a promising vein of cobalt, and it is probable that operations of a similar nature will continue in 1937. The remaining high-grade cobalt-nickel-arsenide residue was shipped during the year.

The following shipments were made during the year:—

	Tons	Silver ounces	Cobalt pounds	Gross value
Residue.....	1,638.59	113,874.55	264,881	\$124,189.37
Cobalt ore.....	262.96	63,495	33,866.73
Leasers' ore.....	.80	794.71	333.70
Total.....	1,902.35	114,669.26	328,376	\$158,389.80

The price of silver averaged 45.087 cents in 1936, opening at 49 $\frac{3}{4}$ cents and closing at 45 cents.

The price of cobalt has materially increased during the past two years, and there is a ready market for ores containing this metal.

J. C. O'Donald

J. C. O'Donald worked the Silver Queen mine, in Coleman township, district of Timiskaming, under lease during 1936. The work done was mainly taking out a surface floor pillar on a vein about 200 feet north of No. 1 vein. This ore was taken out from a depth of 30 feet. Shipments totalling 476 ounces of silver and 603 pounds of cobalt were made.

Four men were employed from May to November, under the direction of J. C. O'Donald.

Oliver and Cameron

This property was formerly known as the Mapes-Johnston Silver Mines Company. It was acquired by Brant Mines, Limited, and finally by D. G. Oliver and J. Cameron. It consists of one claim, of approximately 48 acres, in Mickle township, district of Timiskaming.

During the summer, a road was cut into the property and a small steam pumping plant installed. An examination of the property was made by J. W. Hill, for New York interests.

The owners report that there is a vertical shaft, 6 by 9 feet, to 200 feet, with levels at 100 and 200 feet; 14 feet of crosscutting and 160 feet of drifting on the 100-foot level; 14 feet of crosscutting and 90 feet of drifting on the 200-foot level; a winze, following the vein, 200 feet deep, from the 200-foot level, with about 400 feet of drifting from this winze on various levels.

An average of 10 men was employed for the months of July and August. The mine address is care of D. G. Oliver, Elk Lake.

C. W. Price

The Foster mine in Coleman township, district of Timiskaming, was operated under lease by C. W. Price, Cobalt, who employed 2 men. Shipments of ore yielded cobalt to the value of \$1,634.

Rowe and Stuckey

Alfred Rowe and Charles Stuckey, Box 79, Cobalt, leased the surface and dumps of the Frontier mine, in South Lorrain township, district of Timiskaming, during 1936. Work was confined to picking rock from the dumps. Shipments of ore yielded 7,306 ounces of silver and 10,253 pounds of cobalt.

Russell, Presse, and McCready Syndicate

The Russell, Presse, and McCready Syndicate was formed in 1936 with 15 units of \$5,000 each, all of which are issued.

The officers are: Albert Presse, manager; and W. E. McCready, secretary-treasurer. The other member of the Syndicate is D. J. Russell. The mine office is at the Moore-Gibson Building, Cobalt.

The property of the Agannico Cobalt Mines, Limited, consisting of 30 acres in Bucke township, district of Timiskaming, was leased. Some 5,197 tons of cobalt-silver ore and 15,789 tons of waste were hoisted.

An average of 19 men was employed for 9 months, starting in April.

Sandoe and Moyle

Richard Sandoe and H. Moyle, both of Cobalt, leased the Temiskaming mine in Coleman township, district of Timiskaming, from the Temiskaming Mining Company, Limited. The property consists of 2 claims, 40 acres.

The work was done by subleasing and consisted of going over the broken ore left in the stopes and taking out any patches, such as remnants of pillars, floors, etc. Approximately 25 tons of silver and cobalt ore were produced.

An average of 5 men was employed for the year. Richard Sandoe was in charge.

Donald E. Sirola

Donald E. Sirola leased and operated the Colonial mine, a property of 40 acres in Coleman township, district of Timiskaming. During the year 100 feet of surface trenching and 49 feet of drifting underground was done. Some 30 tons of ore and 200 tons of waste were taken out, and the mill cleaned up.

An average of 4 men was employed. The mine address is Cobalt.

Stewardson and Moran

In January, 1936, Frank Stewardson and F. Moran, of Fort William, took a two-year lease on the property known as the Parsons or Lily of the Valley mine, located on lot 19, concession II, township of Paipouge, district of Thunder Bay.

The last production of silver ore on this property was in 1892, when it is reported that Henry Parsons mined several tons of ore, averaging 1,000 ounces of silver to the ton.

There are two parallel composite veins on the property, striking approximately S. 65° W. and dipping vertically. The early workings consisted of a vertical shaft 15 feet deep at the west end of the north vein and another vertical shaft 50 feet deep about 165 feet southeast of the first.

Mr. Stewardson commenced work in February, 1936, with a crew of 4 men and, after extensive stripping and trenching, commenced work on the south vein. This vein ranges in width from 1 to 4½ feet and consists of coarsely crystallized calcite with rose quartz and fluorite. Near the centre of the vein is a band of massive mineralization of pyrite, sphalerite, and galena, ranging in width from a fraction of an inch to 6 feet and carrying argentite and in places considerable amounts of native silver.

Commencing in June, a 2-compartment, vertical shaft was sunk on the vein to a depth of 45 feet, with drifting eastward from the shaft, at the 40-foot level, for a distance of 50 feet.

The ore was brought to surface, hand-picked, and shipped to the Temiskaming Testing Laboratories at Cobalt. A total of 5,060 pounds of ore was shipped, yielding 2,200 ounces in silver.

Plant equipment consisted of a Schramm 6- by 6-inch, 2-cylinder, single-stage compressor, with a delivery of 100 cubic feet, driven by a Fordson tractor engine, and an 8- by 12-inch, single-drum hoist.

There was an average of 4 men employed under the direction of Frank Stewardson. The post office address is Fort William.

W. D. Taylor

The Rochester mine is privately owned by W. D. Taylor. Annie Taylor is secretary. The mine office is at Cobalt. The property consists of one claim of 40 acres, in Coleman township, district of Timiskaming.

Former operators sank two 2-compartment, vertical shafts, 7 by 9 feet, to the 45-foot level, connected the two shafts, and did some drifting. A vertical, 2-compartment winze, 7 by 9 feet, was also sunk from the 45-foot level to the 150-foot level. Some driving on the 300-foot level was done from the Lumsden property.

The mine was reopened in July, 1936. The buildings were repaired, a frame hoist-house was built, the mine was dewatered, and the headframes and shafts reconditioned as the water was lowered.

The plant equipment consists of a 7- by 5-inch air hoist, a 5- by 5-inch air hoist, 3 small air-driven pumps, and a steel sharpener. The power is hydraulic air.

The mine was examined and explored. Three tons of ore and 50 tons of waste were hoisted.

An average of 4 men was employed for the six months.

Wainwright, Brocklebank, and McAllister

T. H. Wainwright, R. Brocklebank, and R. McAllister leased the Victory mine in Coleman township, district of Timiskaming. The mine address is Cobalt.

Two men were employed from September to the end of the year dewatering the mine.

Windsor-Cobalt Silvers, Limited

Windsor-Cobalt Silvers, Limited, was incorporated in September, 1927, with a capitalization of 2,000,000 shares of \$1 par value, of which 1,441,179 have been issued.

The officers and directors are: A. D. McArthur, president and general manager; J. A. McArthur, vice-president; D. C. Walmsley, secretary-treasurer and engineer; F. Harrington and B. L. Wrench, directors. The executive office is at 1 Toronto Street, Toronto. The mine address is Cobalt.

The property consists of one claim, 40 acres, in Coleman township, district of Timiskaming, leased from the T. and N. O. Railway.

The company reports the following work done from January to October: No. 1 shaft, 7 by 11 feet, was sunk 95 feet; No. 2 shaft, 7 by 11 feet, was sunk 135 feet, and two levels at 65 and 123 feet were established; 25 feet of crosscutting and 245 feet of drifting were done; and No. 3 shaft, 7 by 11 feet, was sunk 50 feet.

An average of 5 men was employed. H. L. Wilson was in charge of the work.

Yorkshire Cobalt Mining Company

Yorkshire Cobalt Mining Company consists of three partners: W. E. Seed, manager; E. H. Todd and W. E. McCreedy; all of Cobalt. The mine address is Box 508, Cobalt.

The property consists of 2 claims, 80 acres, in Bucke township, district of Timiskaming.

During the year, 300 feet of surface trenching was done. The plant was reconditioned. A concrete dam, 65 feet long, was built to form a catch basin to supply water for a mill.

An average of 4 men was employed from June to December

TALC

Canada Talc Company, Limited

The mine and mill of the Canada Talc Company, Limited, at Madoc, Huntingdon township, Hastings county, were operated throughout the year with an average force of 25 men. The officers and directors of the company are: W. S. Morden, president; E. S. James, vice-president; Roy Taylor, Madoc, secretary and manager. The company owns 50 acres. The capitalization is \$50,000.

During 1936 the ore was taken from the north vein in the vicinity of the new No. 3 shaft at the 250-foot level. Ore hoisted amounted to 6,702 tons, of which 6,502 tons was milled. Development work consisted of 289 feet of drifting and the opening-up of a new stope.

Geo. H. Gillespie Company, Limited

The officers and directors of the Geo. H. Gillespie Company, Limited, are: Geo. H. Gillespie, president; M. H. Ludwig, secretary-treasurer; Alexander Longwell, director. The head office and mine office are at Madoc.

The property, which is called the Henderson mine, consists of 400 acres in Huntingdon township, Hastings county.

The production for 1935 was 8,200 tons mined and milled. L. Ashley is manager. About 9 men were employed at the mine and 10 at the mill.

METALLURGICAL WORKS

Algoma Steel Corporation, Limited

During 1936 only one blast furnace was operated by the Algoma Steel Corporation, Limited, located at Sault Ste. Marie. No. 4 furnace was in blast from January 1 to May 28, and from October 8 to December 31. A total of 81,776 gross tons of iron was produced.

Jas. H. Bell was blast furnace superintendent.

Canadian Furnace Company, Limited

The Canadian Furnace Company, Limited, at Port Colborne, operated the furnace for 270 days in 1936. The production for the year was as follows:—

	Gross tons
Pig iron.....	74,048
Spiegeleisen.....	10,115
Total.....	84,163

The officers of the company were: Frank B. Baird, Buffalo, N. Y., president; Richard C. Yates, Port Colborne, vice-president and manager; Frederick C. Slee, Buffalo, N. Y., secretary. W. J. Higgins, Port Colborne, is superintendent. The average number of men employed during 1936 was 112.

At the end of the year the Canadian Furnace Company, Limited, sold its property to the Port Colborne Furnace Company, Limited, and wound up its affairs. The Port Colborne Furnace Company, Limited, then changed its name to Canadian Furnace, Limited, under which name the business is being carried on.

Canadian Industries, Limited

During 1936 the plant of Canadian Industries, Limited, located at Copper Cliff, was in continuous operation.

The three 50-ton-per-day sulphuric acid units were operated to capacity. These units manufacture the acid from converter gases produced at the smelter of the International Nickel Company. The oleum unit was also operated to capacity. The nitre-cake unit, in which sodium sulphate is treated with sulphuric acid to produce nitre cake, was operated at about 30 per cent. of capacity.

An average of 39 men was employed. E. H. Jordan was works manager.

Deloro Smelting and Refining Company, Limited

The blast furnace at the plant of the Deloro Smelting and Refining Company, Limited, operated throughout 1936. Silver production amounted to 1,882,250 ounces. Arsenic and cobalt products, including stellite, were also produced. An average of 45 men was employed.

The officers of the company are: M. J. O'Brien, chairman of the board; J. A. O'Brien, president; S. F. Kirkpatrick, vice-president and managing director; S. B. Wright, general manager; F. A. Bapty, secretary-treasurer; R. A. Elliott, works superintendent. The address of the company is Deloro.

International Nickel Company of Canada, Limited

The refinery of the International Nickel Company of Canada, Limited, at Port Colborne was operated continuously throughout the year. An account of the operations appears on page 227 of this report.

Ontario Refining Company, Limited

The copper refinery of the Ontario Refining Company, Limited, situated at Copper Cliff, was operated at capacity throughout 1936.

By-product departments were expanded by the addition of a plant for the production of nickel salts. A 30-ton Arc-type electric melting furnace was installed during the latter part of the year, and will be in production early in 1937. A specially designed movable holding furnace, mounted on railroad trucks, was put into service transporting molten blister copper from the International Nickel smelter to the anode furnaces at the refinery.

Operations were chiefly on blister copper from the International Nickel smelter, augmented by several lots of gold-bearing ores, slags, and mattes from various Canadian gold mines.

An average of 740 men was employed, in comparison with 547 in 1935, and 462 in 1934. F. Benard was plant manager.

Steel Company of Canada, Limited

The Steel Company of Canada, Limited, operated "A" furnace from July 31 to December 31, and "B" furnace throughout the year. The average number of men employed was 121. H. S. Hilton is works manager, J. T. Slee is blast furnace superintendent, and N. B. Clark is assistant blast furnace superintendent.

The officers of the company are: Charles S. Wilcox, chairman of the board; R. H. McMaster, president; H. M. Jaquays and H. T. Diplock, vice-presidents; H. H. Champ, vice-president and treasurer; H. S. Alexander, secretary; S. E. Le Brocq, comptroller. The address is Hamilton.

MINING ACCIDENTS IN 1936

Chief Inspector of Mines, D. G. Sinclair, Toronto; Inspectors, W. O. Tower,
Kirkland Lake; A. S. Bayne, Port Arthur; D. F. Cooper, Sudbury;
E. B. Weir, Timmins; A. R. Webster, Toronto

Accidents during 1936

During the year 1936 at the mines, metallurgical works, quarries, and clay, sand, and gravel pits regulated by *The Mining Act* there were 2,413 accidents to employees reported to the Department of Mines up to January 16, 1937. Sixty-three fatalities arising out of 54 separate accidents were reported.

These returns represent an increase of 334 in the total number of accidents and an increase of 27 in the number of fatalities recorded over the preceding year. The report shows a fatality rate of 2.23 men killed per thousand men employed, which is an increase of 0.66 from the rate for the preceding year and 0.33 per thousand lower than the average for the past twenty-five years.

There were 83 non-fatal accidents per thousand men employed, which is a decrease of 7 per thousand from the rate for 1935. The percentage of non-fatal accidents followed by infection increased from 7.4 in 1935 to 8.9 in 1936.

The expansion which took place in the industry during the year is well shown in the employment figures for the year. Returns in this respect show an increase of approximately 23 per cent. over 1935.

Fatal Accidents

A comparison of fatal accidents for the past five years is given below:—

Distribution	1932	1933	1934	1935	1936
Mines, underground.	17	20	23	25	45
Mines, surface.	0	1	2	2	3
Metallurgical works.	1	1	5	3	4
Quarries.	1	0	1	0	2
Clay, sand, and gravel pits.	4	2	2	1	0
Total.	23	24	33	31	54

By months the fatal accidents occurred as follows:—

Month	No. accidents	No. men killed
January.	3	3
February.	9	10
March.	1	3
April.	4	4
May.	3	3
June.	5	5
July.	4	4
August.	4	6
September.	5	6
October.	10	10
November.	3	5
December.	3	4
Total.	54	63

Classifying the fatalities according to industries gives the following:—

Gold mines.....	46
Nickel mines.....	11
Silver mines.....	0
Talc mines.....	0
Metallurgical works.....	4
Quarries.....	2
Sand, gravel, and clay pits.....	0
Total.....	63

ANALYSIS OF FATALITIES AT MINES, 1932-1936

Cause	1932	1933	1934	1935	1936
	per cent.	per cent.	per cent.	per cent.	per cent.
Fall of ground.....	21	23	31	47	21
Run of ore or rock.....	5.3	9	8	6	7
Shaft accidents.....	15.8	9	8	9	30
Explosives.....	31.6	9	18	16	18
Miscellaneous, underground.....	26.3	45	27	16	19
Surface.....		5	8	6	5

TABLE OF FATAL ACCIDENTS IN MINES, METALLURGICAL WORKS, QUARRIES AND GRAVEL, SAND, AND CLAY PITS, 1912-1936

Year	Persons killed at metallurgical works and mines	Persons employed at metallurgical works and producing mines	Persons employed at non-producing mines (estimated)	Total persons employed	Fatal accidents per 1,000 employed
1912.....	43	13,108	2,000	15,108	2.84
1913.....	64	14,293	2,000	16,293	3.93
1914.....	58	14,361	1,500	15,861	3.6
1915.....	22	13,114	1,500	14,614	1.51
1916.....	51	14,624	2,000	16,624	3.07
1917.....	36	16,791	1,000	17,791	2.02
1918.....	32	14,726	500	15,226	2.1
1919.....	39	11,926	1,000	12,926	3
1920.....	29	10,486	1,000	11,486	2.61
1921.....	24	8,436	1,000	9,436	2.54
1922.....	30	9,500	1,500	11,000	2.72
1923.....	30	10,500	1,500	12,000	2.5
1924.....	40	11,000	1,500	12,500	3.2
1925.....	42	11,500	1,500	13,000	3.23
1926.....	32	11,500	1,500	13,000	2.46
1927.....	33	13,311	2,000	15,311	2.1
1928.....	85	15,787	2,000	17,787	4.76
1929.....	55	17,145	1,849	18,994	2.89
1930.....	56	18,217	317	18,534	3.02
1931.....	37	17,820	447	18,267	2.03
1932.....	25	14,378	431	14,809	1.69
1933.....	25	15,080	804	15,884	1.57
1934.....	34	19,302	1,254	20,556	1.65
1935.....	136	21,444	1,528	22,972	1.57
1936.....	63	25,725	2,547	28,272	2.23

¹Corrected to include fatality resulting in the death, on March 28, 1936, of a man injured on December 11, 1935.

The comparative fatality rate per thousand men employed at mines, metallurgical works, quarries, and clay, sand, and gravel pits is as follows:—

	Men employed	No. killed	Rate per thousand
Mines.....	21,374	57	2.66
Metallurgical works.....	5,498	4	.70
Quarries.....	700	2	2.86
Clay, sand, and gravel pits.....	700	0	0
Total.....	28,272	63	2.23

The ages of the men killed are as follows:—

17-20	21-25	26-30	31-35	36-40	41-45	46-50	Over 50	Total
3	5	11	19	15	3	5	2	63

The occupation and nationality of the men killed at mines, metallurgical works, and clay, sand, and gravel pits are set out in the following table:—

Occupation	American	Austrian	British	Czecho-Slovakian	Finn	Hungarian	Italian	Jugo-Slav	Norwegian	Pole	Russian	Swede	Total
Block-holer.....				1									1
Cage tender.....			1										1
Carpenter.....						1							1
Compressor man.....			1										1

Total.....	1	1	32	2	6	1	2	8	2	3	2	3	63

Non-fatal Accidents

The causes of non-fatal accidents at mines are shown in the following table:—

Cause	Surface	Under-ground	Total
Fall of persons.....	107	176	283
Falling objects.....	82	161	243
Hand tools.....	119	59	178
Tramming.....	14	145	159
Flying objects, sledging, etc.....	36	97	133
Falling rock or ore, drilling, etc.....		131	131
Rock or ore at chute.....		110	110
Strain while lifting.....	45	63	108
Handling rock or ore.....		106	106
Nails or splinters.....	31	73	104
Crushed between two objects.....	43	59	102
Fall of rock or ore at face.....		102	102
Machinery.....	66	10	76
Drilling machines.....		66	66
Running into or striking objects.....	15	49	64
Explosives.....		39	39
Cage, skip, or bucket.....		37	37
Burns.....	25	2	27
Fall down shaft, winze, or stope.....		19	19
Rock or air blast.....		6	6
Poisoning from cyanide.....	3		3
Electricity.....	3		3
Explosions from carbide.....	3		3
Gas.....	1		1
Unclassified.....	12		12
Total.....	605	1,510	2,115

The causes of non-fatal accidents at metallurgical works were:—

Falling objects.....	40	Transportation.....	5
Fall of persons.....	22	Hand tools.....	5
Burned by slag, matte, or scrap.....	13	Running into or striking objects.....	3
Crushed between two objects.....	11	Nails or splinters.....	2
Strain while lifting.....	9	Burns by acid.....	1
Flying objects, sledging, etc.....	7	Electricity.....	1
Cranes, ladles, or hooks.....	6		
Burns.....	5	Total.....	130

The causes of non-fatal accidents at clay, sand, and gravel pits were:—

Fall of persons.....	4	Transportation.....	1
Machinery.....	4	Hand tools.....	1
Falling objects.....	4	Striking objects.....	1
Strain while lifting.....	3		
Fall of material.....	2	Total.....	20

The causes of non-fatal accidents at quarries were:—

Handling material.....	25	Fall of rock.....	5
Fall of persons.....	11	Strain while lifting.....	4
Falling objects.....	11	Machinery.....	2
Flying objects, sledging, etc.....	10	Derricks, cranes, etc.....	2
Crushed between two objects.....	9	Nails or splinters.....	2
Transportation.....	7		
Hand tools.....	6	Total.....	94

Classification of Non-fatal Accident Rates at Producing Mines

In the following table the producing mines are arranged in order, according to their rate of non-fatal accidents in 1936 per thousand men employed:—

0—50	{	Canadian Gypsum McLaren-Porcupine O'Brien (Cobalt) Omega Cobalt Properties McIntyre-Porcupine International Nickel (mines only) Hollinger mine McKenzie Red Lake
51—100	{	Golden Summit Howey Gomak Miller Lake O'Brien Vipond (Anglo-Huronian) Wright-Hargreaves Coniaurum Ross (Hollinger) Sylvanite Toburn Lake Shore Schreiber Pyramid Falconbridge (mine only) Average producing mines—90.6 per M Kenland Bidgood Gillies Lake-Porcupine Shenango
101—150	{	Stanley Young-Davidson (Hollinger) Bousquet Cameron Island (Duport) Teck-Hughes Dome Chromium Mining and Smelting (mine only) Northern Empire Centennial (L. B. United) Jubilee (Minto) Kirkland Lake Gold Macassa Argosy St. Anthony Pickle Crow Hillside Paymaster Consolidated Hudson-Patricia
151—200	{	Sturgeon River Nipissing Central Patricia J-M Consolidated Parkhill Cuniptau Ashley Phoenix Sol D'Or Gypsum, Lime and Alabastine
201—250	{	Morris Kirkland McMillan Buffalo Ankerite North Shores Red Lake Gold Shore Henderson (Geo. H. Gillespie) Little Long Lac Tashota Darwin
251—300	{	Connolly (Canada Tale) Wendigo Ardeen Matachewan Consolidated
Over 300	{	Pamour Edwards Cedar Island (Kenora Prospectors) Black Donald Graphite

Non-fatal Accident Frequency

The following table gives the non-fatal accident frequency at mines, metallurgical works, quarries, and clay, sand, and gravel pits, based on the number of accidents per thousand men employed, for the years 1926 to 1936, inclusive.

1926	1927	1928	1929	1930	1931	1932	1933	1934	1935	1936
171	160	141	126	117	100	98	95	93	90	83

Infection

Records show that infection followed in 209 cases out of a total of 2,359 accidents.

Location	No. of accidents	Accidents followed by infection	Per cent. infection
Mines, underground.....	1,510	139	9.2
Mines, surface.....	605	57	9.4
Metallurgical works.....	130	5	3.8
Quarries.....	94	5	5.3
Clay, sand, and gravel pits.....	20	3	15
Total.....	2,359	209	8.9

Accidents from Explosives

Cause	Non-fatal		Fatal		Total	
	No. of accidents	Men injured	No. of accidents	Men killed	No. of accidents	Men killed or injured
Delayed too long blasting.....	8	13	4	5	12	18
Drilled into explosives.....	6	8	1	2	7	10
Returned too soon.....	2	3	2	3
Walked into blast.....	5	7	5	7
Premature blast.....	1	2	1	2
Insufficient cover.....	1	1	1	1
Too short fuse.....	1	2	1	2
Struck explosive.....	1	1	1	1

Fell when gassed.....	1	1	1	1
Unexplained explosives.....	1	3	1	3
Total.....	26	39	7	11	33	50

Electric Accidents

The following table shows the fatal accidents due to the use of electricity at mines, metallurgical works, and quarries during the last ten years:—

1927	1928	1929	1930	1931	1932	1933	1934	1935	1936	Total
2	1	6	9

The following table shows the total number of non-fatal electric accidents during the last ten years:—

1927	1928	1929	1930	1931	1932	1933	1934	1935	1936	Total
10	4	14	10	7	3	4	4	6	4	65

Prosecution

A charge was laid against Robert Kennedy, a miner, as follows:—

Robert Kennedy, at the township of Teck, on the 6th day of December, 1936, did, in the course of mining operations while driving a sub-drift from the east end of 3,202 west section, No. 14 stope, in the Lake Shore Mines, Limited, in the said township of Teck, unlawfully neglect to comply with the provisions of Section 163, Rule 61, of the Mining Act of Ontario, being Revised Statutes of Ontario, Chapter 45 and the amendments thereto to date, by failing or neglecting before blasting to cause all entrances to the place or places where such blasting is to be done or where the safety of persons may be endangered by such blasting, to wit: 3,202 west section No. 14 stope, to be effectively guarded so as to prevent inadvertent access to such place or places while such charges are being blasted.

A plea of "not guilty" was entered before Magistrate S. Atkinson, at Kirkland Lake, on January 7, 1937.

Kennedy was found guilty and the minimum fine of \$10 and costs or 30 days was imposed by the magistrate.

Summary of Rope Tests, 1936

The following is a summary of the tests made in the Wire Rope Testing Laboratories of the Department of Mines during 1936:—

Tests for Ontario mines under Act.....	448
Special informative tests.....	15
Tests for wire-rope manufacturers.....	19
Tests for mines outside Ontario.....	21
Other tests.....	3
Total.....	<u>506</u>

Classes for Prospectors, 1936-37

By W. D. Harding

Introduction

The number of prospectors' classes held in Ontario during the past season exceeded that of any previous year. During the period from September, 1936, to March, 1937, instruction was given in 21 different towns and cities scattered throughout the province. The majority of these classes were held in northern Ontario towns adjacent to mining areas. Classes were also held in a few cities in southern Ontario. At most of the places visited classes had been held on a former occasion, but at Northbrook, Arden, Niagara Falls, and Hawk Junction, instruction was given for the first time.

The custom of devoting the afternoon periods of instruction to the identification of minerals and rocks and of holding illustrated evening lectures dealing with geology and mining was continued throughout the past year.

Analysis of Class Attendance

The following table shows the details of the attendance at the various places where classes were held during the season 1936-37:—

TABLE OF ATTENDANCE, 1936-37

Place	Dates	Total registration at mineralogy classes	Average daily attendance at mineralogy classes	Average attendance at evening lectures	Total student hours afternoons and evenings	Practical experience in prospecting or mining	Repeat course
GEO. D. FURSE:							
1936							
Northbrook ¹ ...	Sep. 28-Oct. 3	40	200	6	0
Arden.....	Oct. 5-10	18	13	27	291	3	0
JAS. E. THOMSON:							
1936							
Hamilton.....	Nov. 9-18	44	21.7	68	686

Sault Ste. Marie	Jan. 14-22	51	35.4	22	677
Sudbury.....	Jan. 25-Feb. 2	27	11.1	32	339
Haileybury....	Feb. 4-12	53	32.4	16	598
Kirkland Lake.	Feb. 15-23	75	43	20	790
Matheson.....	Feb. 25-Mar. 5	45	25.1	25	522
W. D. HARDING:							
1936							
Pembroke.....	Oct. 20-28	17	9	19	240	4	4
Ottawa.....	Oct. 30-Nov. 7	55	32.7	48	765	8	5
Niagara Falls..	Nov. 30-Dec. 5	55	40.5	70	838	5	2
1937							
Fort Frances...	Jan. 5-12	19	14.3	13	267	4	9
Kenora.....	Jan. 14-22	98	68.2	60	1,393	36	20
Dryden.....	Jan. 25-30	57	34.7	49	661	28	3
Fort William...	Feb. 2-10	58	38.3	26	745	26	14
Port Arthur....	Feb. 11-19	61	47	44	972	24	19
Sioux Lookout.	Feb. 23-Mar. 3	54	30.5	49	731	34	14
Hiurst.....	Mar. 8-16	73	48.3	45	994	34	10
Hawk Junction	Mar. 20-22	8	5	0	40	4	0
Total.....	1,185	17,305

¹Evening classes only.

²Approximately.

Daytime instruction was given to 1,185 persons scattered throughout 20 towns. This represents an average registration of 59.2 persons at each town where a class was held. The attendance at the Toronto class, which has always been high, is partly responsible for this good showing. If Toronto were eliminated from the calculation the remaining towns would show an average attendance of 47.3. These results are low compared with those of 1935-36, which show that a total of 604 persons received daytime instruction at 10 places, or an average class of 60.4 persons. With Toronto eliminated the average class at these 10 towns would be 41.9 persons. Attendance was taken at the daytime classes only, and the figures above therefore have been computed on that basis.

At the 11 classes conducted by the writer the total registration was 555. Of this number 37.37 per cent. were men who had had practical experience in prospecting or mining, and 187 had attended a prospector's course on a previous occasion.

At only 8 towns and cities in Ontario have prospectors' classes been held consecutively during the past two seasons. The comparative attendance details of these places are given as follows:—

Place	1935-36		1936-37	
	Registration	Total student hours	Registration	Total student hours
Hamilton.....	62	708	44	686
Ottawa.....	38	419	55	765
Sudbury.....	22	225	27	339
Sault Ste. Marie.....	51	615	51	677
Toronto.....	227	3,135	286	4,904
Fort Frances.....	13	151	19	267
Fort William.....	62	696	58	745
Kirkland Lake.....	81	1,114	75	790
Total.....	556	7,063	615	9,173

From the above figures it is shown that a somewhat keener interest was taken in prospectors' classes by this group of towns during the past year than was evinced during the preceding season.

COMPARISON OF REGISTRATION BY YEARS

Year	No. of places	Total registration
1927-28.....	16	492
1928-29.....	14	353
1929-30.....	15	281
1930-31.....	15	345
1931-32.....	13	614
1932-33.....	13	1,667
1933-34.....	15	1,257
1934-35.....	10	1,084
1935-36.....	10	604
1936-37.....	21	1,185

REPORT
OF THE
INSPECTOR OF LEGAL OFFICES
ONTARIO
1937

PRINTED BY ORDER OF
THE LEGISLATIVE ASSEMBLY OF ONTARIO
SESSIONAL PAPER NO. 5, 1938

ONTARIO

TORONTO

Printed and Published by T. E. Bowman, Printer to the King's Most Excellent Majesty
1938

TO THE HONOURABLE ALBERT MATTHEWS,

Lieutenant-Governor of the Province of Ontario.

MAY IT PLEASE YOUR HONOUR:

The undersigned begs respectfully to present to Your Honour the Annual Report of the Inspector of Legal Offices for the year ending 31st December, 1937.

G. D. CONANT,
Attorney General.

Toronto, April 2nd, 1938.

REPORT
OF THE
Inspector of Legal Offices
Ontario, 1937

Parliament Buildings,
Toronto, Ontario.

THE HONOURABLE ALBERT MATTHEWS,

Lieutenant-Governor of the Province of Ontario.

Sir:—

I have the honour to present my report as Inspector of Legal Offices for the year ending December 31st, 1937.

I inspected the greater majority of the legal offices in the Province. Those not inspected by me were taken care of by the Assistant Inspectors or the Auditors.

The policy of amalgamation in one more County was carried out this year. There are now sixteen Counties and Districts where amalgamations have not been effected.

We have now a completed experience of nearly two years with the Magisterial system which became effective June 1st, 1936.

From the point of view of court efficiency, the system is entirely satisfactory, as Magistrates have been given itineraries which they can handle without excessive physical strain. Where the travelling is extensive the courts are correspondingly light.

Municipalities are now paid their share of the court revenue by the Magistrates, and are not required to pay out any monies from their municipal treasury, which feature proves very satisfactory to the municipal officers.

It is a pleasure to report that the personnel of the Magistrates has remained practically intact for the past year, no deaths having occurred. It has been considered advisable, owing to the heavy summer tourist traffic in the Muskoka District, and in view of the difficult transportation facilities during the winter months, to place a Deputy Magistrate at Bracebridge who will hold court throughout the Muskoka District. Mr. Redmond Thomas has been appointed to that position.

Owing to a reorganization of territory, it is unnecessary to have a Magistrate at Brampton, and Mr. L. J. C. Bull has been retired from that position, and no new appointment is necessary.

Re Juvenile Courts. It is again my duty to express regret that no additional Juvenile Courts have been established during the past year. It should be again explained that the request for Juvenile Courts must emanate from the various

municipalities, and no doubt it would greatly increase the efficiency of the law courts of the Province if municipalities would request the establishment of Juvenile Courts. Might I again repeat that my office will gladly furnish full information in regard to the operation of the Juvenile Delinquents Act.

Re Division Courts. The business transacted in the Division Courts throughout the Province reflects the general trend of improvement in industry. There were 66,509 original claims entered, being an increase of 10,242 over the preceding year. The amount of claims sued for aggregated \$3,248,193.90, being an increase of \$393,105.95. The surplus fees and unclaimed monies also both showed a substantial increase, the total amounting to \$26,308.89.

Continuous routine inspection is made of the 307 Division Court Offices by Mr. H. A. Locke, in addition to the special investigations that are necessary from time to time. During the year there were 74 changes in the personnel of the Clerks and Bailiffs.

A short time ago the Treasury suggested that this Department should take over the auditing of the Land Transfer Tax in Registry Offices and Land Titles Offices, and during the year 1937 practically all these offices were audited as to this tax.

The revenue collected by this office for the year 1937 from the public offices under my supervision amounted to \$663,931.64, made up as follows:

Magistrates' Fines	\$264,734.37
Magistrates' Fees	40,260.72
(The above amounts represent monies for fines and fees actually received by me and do not include fines and fees paid direct to the Inspectors under the L.C.A.)	
Local Registrars, S.C.O., County Court and District Court Clerks, and Surrogate Registrars	203,775.52
Crown Attorneys' and Clerks of the Peace Fees	30,402.92
Crown Attorneys' Estreats and Fines	2,191.62
Sheriffs' Fees	28,822.97
Registrars of Deeds and Local Masters of Titles	67,309.83
Division Court Clerks and Bailiffs	26,308.89
Miscellaneous Revenue	124.80
TOTAL.....	\$663,931.64

The increase over 1936 is \$116,027.35.

Mr. H. R. Polson, the Assistant Inspector, has continued to devote the greater portion of his time to the inspection and auditing of Magistrates and Justices of the Peace. During the year he assisted the Auditors in the Land Transfer Tax Audit.

Mr. Roy C. Buckley was added to the staff, and Mr. Zimmerman and Mr. Buckley now audit all the legal offices in the Province.

I again wish to thank the officials throughout the Province for their continued assistance to me. I find that the work in the offices is carried on in a very efficient manner. I also wish to thank the Assistant Inspectors, Auditors, and staff for the manner in which they have performed their duties during the year.

I attach hereto the schedules and statements with reference to the office, which should be of interest:

1. Statements—Osgoode Hall Offices (Surrogate Clerk, Administrative Branch, Appellate Division and Master's Office).

2. Financial Statement of judicial offices, namely, Sheriffs, Surrogate Judges, Local Masters, S.C.O., Crown Attorneys, Clerks of the Peace, Local Registrars, County and District Court Clerks, and Surrogate Registrars.
3. Statement respecting Commuted Crown Attorneys.
4. Financial Statement respecting Land Titles Offices.
5. Financial Statement respecting Registrars of Deeds.
6. Financial Statement respecting Magistrates.
7. List of Justices of the Peace.
8. Statistical Report of Juvenile Courts.
9. Appointments.
10. Observations by Inspector.

All of which is respectfully submitted.

I have the honour to be, Sir,

Your obedient servant,

W. W. DENISON,

Inspector of Legal Offices.

Observations, Directions and Decisions

OBSERVATIONS, DIRECTIONS AND DECISIONS

LOCAL REGISTRARS OF THE SUPREME COURT OF ONTARIO
 LOCAL MASTERS OF THE SUPREME COURT OF ONTARIO
 COUNTY AND DISTRICT COURT CLERKS, AND
 SURROGATE REGISTRARS

RE COMPUTATION OF FEES

When it becomes necessary to secure Probate through the Court, the applicant must disclose the whole of the estate situate within Ontario. By Section 90 of The Surrogate Courts Act, being R.S.O. 1927, Chapter 94, Registrars are directed to charge fees on the whole of the estate. There is no particular hardship in such cases.

RE ANCILLARY PROBATE

A Surrogate Registrar wrote me as follows:

"A local solicitor has tendered me an application for Probate of a will of an American citizen whose estate has been probated in the United States. There is some property in Ontario to be administered, and the solicitor in question is the applicant under a duly executed Power of Attorney. I have not accepted this application, as I am not quite clear on the matter.

"As I understand it, an Administrator with will annexed appointed by a foreign court can appoint an attorney to apply for a like Grant, but cannot find anything to guide me in this particular case. Please let me know the ruling in such matters."

I replied as follows:

"If the will made in the United States appoints an executor, and the executor took out a Grant of Probate in the said States, then the said executor may apply to the Surrogate Court in Ontario for an Ancillary Probate. If the said executor does not wish to apply, he may then nominate by Power of Attorney as set out in the forms, someone to apply in his stead, the said person applying to be a resident of Ontario, and to apply for Administration with the will annexed.

"If the Will in the United States did not name an executor, or an executor having been named who did not for any reason act, and Administration with the will annexed was granted in the United States, then that Administrator must nominate someone in Ontario to take the Grant of Administration with the will annexed here.

"Under Section 19 of The Surrogate Courts Act, page 979, the Court has not the power to grant Administration to anyone not resident in Ontario, with the one exception as to resealing Grants from a British Court.

"In any event, an advertisement of the applicant's intention to apply must be made in the Ontario Gazette, and a bond given."

RE GIFTS INTER VIVOS

I have been asked as to how a Registrar should fill in the schedules in the Succession Duties, and I replied as follows:

"I presume you have reference to Schedule B., showing the gifts *inter vivos*, if any. It is quite true that it was the custom in the past, when there were no

gifts *inter vivos*, to do one of two things, either to put in Schedule B. showing 'Nil', or else to strike out in the affidavit proper the reference to this schedule. The proper thing to do in all cases is to include Schedule B., and if there were no gifts or dispositions made by a deceased person in his lifetime, the person making the affidavit should simply state 'Nil' in said schedule."

RE FEES — HOW COMPUTED

The Controller of Revenue issued a ruling regarding fees in Surrogate Court matters. The ruling is as follows:

"The fees collected by the Surrogate Court are on valuations submitted for the purpose of Probate. These valuations may or may not be used for Succession Duty, and in case the valuation is increased for Succession Duty purposes, provision is made by the above recited amendment for additional fees; but no provision has been made for a refund or rebate in the tax in case the Succession Duty valuation is lower than the Probate value."

RE PAUPER ESTATES

A Surrogate Registrar wrote to me advising that practically the whole of a certain estate was outside of Ontario, and the property in Ontario was worth only two or three hundred dollars. The solicitor contended that this estate should be treated as a pauper estate, but I ruled that a pauper estate, to be a pauper estate, must be actually one where the property, no matter where situate, comes below that amount, that is, that if a man is wealthy and at the same time has only a little property in Ontario, he is not a pauper, and therefore cannot come within the rule for the cheaper fee.

RE FEES

A Surrogate Registrar wrote me as follows:

"On a Grant of Letters Probate issued since April 1st, in which the total value of the estate was \$800.00, all real estate, I charged the full fees as set out in the revised Tariffs. Since receipt of your letter of April 23rd, it appears to me that I should have charged only half fees to Judge and Registrar under R.S.O. 1927, Chapter 94, Section 67 (2)."

I replied as follows:

"I am in receipt of your favour of the 26th ultimo, and would advise you that there has been no change as regards the total value of fees in estates under \$1,000.00. You should have made the half charge."

RE TAXATION — BILL OF COSTS

A solicitor wrote in asking for a ruling as to the allowance for counsel's fees. The trial took two days, and the solicitors drafted a bill of costs providing for counsel's fee of \$75.00 per day. The solicitors sent the bill to the solicitor for the defendant, who approved of it before taxation. The Local Registrar cut \$100.00 off the bill, claiming he could only tax \$50.00, and I wrote the Local Registrar as follows:

"I am in receipt of your favour of the 22nd ultimo, and note your remarks.

"I think that no possible objection can be taken to your submitting your account to the opposite solicitor before taxation thereof, and secondly, I see no reason why the fact that the defendant failed to defend should in any way affect the consent given by the solicitor or his co-defendant. I must point out, however, that although the solicitors do get together and agree upon what items in a bill will be consented to, still they cannot confer upon the Taxing Officer a jurisdiction in excess of that given by the Tariff."

RE NOTES — MUST BE IN ENGLISH

I was asked as to whether or not a note in French could be accepted by a County Court Clerk, and I took the matter up with the Deputy Attorney General. His reply was:

"I cannot find anything which would authorize the acceptance of the note in French by an Ontario Court of Record for filing and record.

"The language we use is the English language in Ontario, insofar as our Courts of Record are concerned, and in the absence of statutory authority to the contrary my view is that these documents should be in English.

"The provisions of The Conditional Sales Act under which these documents are registered contemplate, in my view, that they should be in English, and not in any other language."

RE FEES

I was asked by a County Court Clerk as to the proper fee for a Search under The Bills of Sale and Chattel Mortgage Act, and I replied that the proper fee was fifty cents for a general search, and ten cents for a particular search.

RE POWERS OF DEPUTY — COUNTY COURT CLERK

I was asked as to what powers a Deputy had, and I replied as follows:

"As you know, Section 3 of The Commissioners for taking Affidavits Act states that the Judge and the Clerks of the County and District Courts may take all affidavits required to be taken in their respective courts. If you will then turn to The Judicature Act, you will find Section 81, which reads as follows:

"With the approval of the Lieutenant-Governor in Council every local officer of the Supreme Court, County Court Clerk and Surrogate Registrar, may by writing under his hand and seal appoint a deputy who may perform *all the duties required to be performed* by the officer making the appointment."

"It would, therefore, seem that once an officer has had his appointment approved by Order-in-Council, he would have all the powers previously held by the officer appointing him, and I would accordingly rule that he would be able to take any affidavits that the Clerk himself could take."

RE CONDITIONAL SALE CONTRACTS

I was asked by a Clerk as to what fee he should charge in filling in notes, giving the numbers, etc., and I ruled as follows:

"I would advise you that if you give a number of a Conditional Sale Contract in the form of a letter, it counts as a Certificate, and may be charged for as such. On the other hand, if a person comes into the office and simply files the Contract and asks for the number, then you should not charge him for a Certificate."

RE FEES — SURROGATE REGISTRAR

A solicitor wrote in to me asking if he was correct in setting out in the Affidavit of Value and Relationship as an encumbrance the taxes in arrears, and I wrote him as follows:

"I am in receipt of your favour of the 26th ultimo, and would advise you that you are quite correct in showing as an encumbrance the amount of taxes in arrears on the property. This is quite a proper deduction, but might I point out that all debts against personalty may not be deducted from the estate."

RE ORIGINAL JUDGMENTS

It was brought to my attention that in some offices the Local Registrars of the Supreme Court were in the habit of retaining the original judgment and order, filing them, and letting out copies to the litigants. I ruled that the original order was the property of the party in the action, and should be retained by them or by the solicitor.

RE FEES OF SOLICITORS

In an estate of a farmer the deceased died intestate. He left a number of brothers and sisters, nieces and nephews, some residing in Finland, and some in Northern Ontario. The solicitor passed the accounts before the local Judge. The official guardian was represented. The Vice-Consul for the foreign country was also represented. The matter took over a year. The local Judge was in some doubt as to the fees, and I advised as follows:

"I would advise you that the Judge's usual practice is to keep the fees of the solicitors, other than the solicitor for the estate, down to, in the total, one half the fees paid to the estate's solicitor.

"There is, however, a discretion given to the Judge, and if it is shown to him that these solicitors have been of material assistance in winding up the estate, there is no reason why the Judge should not, in his discretion, allow an increased fee. The Judge has the power and should use it if he thinks the solicitors have done the work."

RE CARBON COPIES

I found that in some offices the Surrogate Registrars were in the habit of retaining the original copy of Letters Probate and Letters of Administration, and sending out the carbon copy of the document. I advised that this practice was wrong, that the original copy should always be sent out and the carbon copy retained.

RE JUDGE'S FEES

A Surrogate Registrar advised me that the Surrogate Judge in his County inserted a fee for each attendance before the Judge leading to Probate under Item 11. I wrote to the Surrogate Registrar as follows:

"I have been considering this a good deal, and it seems to me that the one attendance only should be charged. The way I look at it is this: the attendance is that of the Registrar after he has checked over the papers to see if they are in correct form for the Judge to sign. If they are not correct and he goes before the Judge, then he has made a mistake, and I do not think the estate should be asked to pay a second fee because the Registrar has made some slight error. I would, therefore, think that only one fee should be charged, and I would ask you to be good enough to show this letter to His Honour, at the same time expressing my appreciation of his care in the matter."

RE DESCRIPTION OF PERSONS

I was asked by a Surrogate Registrar if it was necessary to state whether a woman was a married woman, widow, or spinster, and I ruled that the Surrogate Clerk of Toronto has been instructed in the past that the word 'addition' means in the case particularly of ladies the description of whether or not they are married women, spinsters, or widows, as the case may be. He has to have this information. If at the same time it is desired to insert the words 'civil servant', 'stenographer', or whatever the deceased may have been, so much the better, but it is imperative that he have the first information.

RE FEE UNDER CHATTEL MORTGAGES ACT

I was asked as to the proper fee for registering a chattel mortgage and a renewal, and replied as follows:

"I am in receipt of your favour of the 17th instant, and would advise that, by Section 36 of The Bills of Sale and Chattel Mortgages Act, a fee of 50 cents is provided for registering a chattel mortgage or a renewal of the same, and a fee of 25 cents is provided for a certificate of registration. If, therefore, the person depositing the renewal of a chattel mortgage asks for a certificate of the renewal, the County Court Clerk is entitled to charge 50 cents for the renewal, 25 cents for the certificate, and postage. Subsection 8 (*h*) of Section 36 is quite definite that the fee for the certificate is 25 cents. I do not understand why any officials are charging more, although some of them may be attempting to charge for a letter as well as a certificate. This is wrong. The letter is in itself a certificate. One fee of 25 cents is all that is proper."

RE CERTIFICATES REGARDING NOTARIES PUBLIC

It came to my attention that some County Court Clerks were issuing certificates that certain people were Notaries Public, and I made a ruling to the effect that no Clerk of the County Court should issue any certificate to the effect that any person is a Notary Public. All these certificates should come from the Parliament Buildings.

RE NOTIFICATION OF PAYMENT OF MONEY INTO COURT

I was asked by a Clerk of the County Court as to whether he was correct in understanding that directions for payment into court must be notified to the accountant, and I drew attention to the circular letter of the Deputy Attorney General bearing date the 1st of April, 1937, which ran as follows:

"I am directed by the Honourable the Attorney General to request that in all cases in which an order is made for the payment of money into court, you send a copy of the order so made, to the Accountant's Office at Osgoode Hall, and that upon payment out of court of any money under such order, a notice be forwarded to the Accountant's Office of the fact and the date when it was so paid out.

"These instructions are supplemental to Rule No. 735 of the Rules of Practice."

And I added:

"The direction of Mr. Humphries is quite clear that when an order is made for the payment of money into court, a copy of the order is to be sent to the Accountant's Office at Osgoode Hall, and that upon the payment of money out of court a notice be forwarded to the Accountant's Office of the fact, etc. This should answer your question."

REGISTRARS OF DEEDS AND LOCAL MASTERS OF TITLES

RE DEVOLUTION OF ESTATES ACT

I was asked to make an Order regarding the above Act, and I ruled as follows:

"This is, that an Order under The Devolution of Estates Act, which is made by a Judge of the Supreme Court, allowing a Caution to be registered, to be filed to tie up the land after the three years have expired, must be issued properly through the Office of the Court of Record. In other words, no Judge should sign such an Order, and then have the solicitor simply take this Order down and register it. It must go through the office and be filed in the usual way, and issued properly."

RE METHOD OF SWEARING AFFIDAVIT

I have been asked as to whether a Registrar should accept documents sworn in the American custom, and I have ruled that they should not be accepted. The Registrar must insist that the documents be sworn according to our laws.

RE POWER OF ATTORNEY — REGISTRATION OF

I have ruled that a Registrar should not accept for registration a Power of Attorney which has no affidavit of execution where the grantor of the Power of Attorney appears before a Notary Public and acknowledges it to be his hand and seal. This practice cannot be accepted in Ontario.

RE DOWER IN MINING LANDS

I was asked as to this, and replied as follows:

“Confirming my conversation *re* your letter of the 23rd instant, regarding dower in mining lands, *vide* R.S.O. 1927, Chapter 100, Section 6: There is no dower unless the husband dies entitled to the land, where it has been patented as a mining claim.

“The Local Master should be warned that if a document concerning a mining claim comes in executed by a power of attorney, I think that he would be quite within his rights in asking for an affidavit that the husband, the owner, is still living, where they do not furnish a bar of dower, because the moment the man dies entitled, his wife’s rights arise, and where a document is executed by a power of attorney, the husband might have died in the interval before such execution.”

RE RIGHTS OF PUBLIC IN REGISTRY OFFICE

I found that in some offices the Registrars were permitting the public to go all over the office, get out documents, etc., and I wrote the Registrar as follows:

“It has come to my attention that in many offices the public are going behind the counter, getting out documents, making their own searches in the books, etc. This is entirely contrary to the provisions of The Registry Act and the Regulations. No one but the officials in the office should be allowed to touch any of the documents in the office, and as regards the books, the officials should always hand the books out to the public. Will you be good enough to see that this is followed out in your office.”

RE TREASURER’S CONSENT

A Registrar sent in to me a deed of a property executed in 1930, and I was asked as to the necessity for the Treasurer’s consent. I ruled as follows:

“I think Mr. Ryan is correct in his contention. At the time of the conveyance to Mr. Bruce Gibson no consent was required, and it seems to me that the Amendment of 1932 makes it quite unnecessary to now obtain a Treasurer’s consent. I think the executors conveyed the estate properly before the Act came into effect, and because the Act was afterwards passed, it would not take away the right to reconvey, as they have done in this case.”

RE POWER OF ATTORNEY

A Registrar sent me a document executed under a Power of Attorney, and asked whether or not it could be accepted. The Power of Attorney was contained in a clause of an agreement, and the clause ran as follows:

“The purchaser hereby irrevocably appoints the chairman of the Commission holding office at the time when this agreement shall have

been cancelled and declared void, his attorney, in the name of the purchaser, and on his behalf to make, execute, deliver and do all such releases, deeds, documents and things as the said chairman shall deem necessary to effectually transfer, assign and release to the Commission all the right, interest, claim and demand of the purchaser under this agreement or otherwise, to the intent and so that all such right, interest, claim and demand may be surrendered, cancelled and determined.

“The ‘purchaser’ shall, where the context admits, include and be binding upon his (or her) heirs, executors, administrators, and permitted assigns.”

I ruled that this clause did not constitute a Power of Attorney within the meaning of The Registry Act, and that a proper Power would have to be filed pursuant to the provisions of Section 48 of The Registry Act before the Registrar could accept the Deed.

RE DOUBLE REGISTRATION — FEE FOR

I was asked to rule regarding the fee in the following case:

“In a Deed of land recently tendered for registration property, which lies firstly, in the municipality of the Township of X, and secondly, in the unincorporated village of Y, which said village lies in the said Township, is transferred. The question is whether to charge for a double or single registration, since Y is unincorporated and cannot be termed a municipality under the provisions of The Municipal Act, R.S.O. 1927, Chapter 233, Section 1, subsection 1. But separate alphabetical and abstract indices are kept for both the Township and the village, and the fact remains that the instrument has to be recorded and entered in the books for both X and Y.”

I ruled as follows:

“I would advise you that the Section of the Act is quite explicit, and states that where the parcels of land are situate in different municipalities in the same office, separate registration must be made. I do not think that where two books are maintained for one municipality this Section comes into effect. Therefore, I think that the one fee only should be charged.”

RE DESCRIPTION

A Registrar sent in a description for a ruling. The description used various stones and pine trees as guiding marks, and I ruled as follows:

“I regret that I am quite unable to authorize you to accept this Deed and description. It does not comply with the provisions of The Registry Act. The Act is quite clear that the description in a Deed must be one that would enable a surveyor to go on the land and accurately set out the proper boundaries. If you will turn to the Deed you will note that the description runs from ‘a stone located between two pine trees, which pine trees are located at the high water mark’. This is certainly not a proper description, nor a proper starting place.”

RE ABSTRACT

I was asked for a ruling as follows:

“When land is described as being S.W. $\frac{1}{4}$ of Lot 22 in 6 Concession of any township property, adjacent to a village, excepting certain of the village lots . . . Are we supposed to search plan and abstract the

documents which are shown on the plan of which the S.W. $\frac{1}{4}$ covers and which are not excepted?"

I replied as follows:

"You state that you are asked to search on a property comprising a portion of an ordinary farm lot, but there is excepted from this piece certain village lots. If there are village lots, there must be a plan filed, giving these lots, their dimensions and numbers, etc. This being so, surely the Abstract would only cover that portion of the farm lot not subdivided, inasmuch as any new description must, of course, always be according to the latest plan.

"Perhaps I might make myself clearer by stating that the farm lot description would only apply to any lands not subdivided. Once they are subdivided, the parcels naturally are taken care of by the new description."

RE REMOVING PAPERS FROM OFFICE — ONCE REGISTERED

A Registrar wrote in to me and told me that he had cancelled a registration of a Probate, as it was not intended for his office. I wrote and told him that this was a dangerous procedure, and that once a document is registered in the Registry Office it should not be taken out. The registration is final. My letter stated: "You say that they want to register it in another Registry Office. You do not know that definitely. You have only the word of the solicitor. I would therefore suggest that in future once a document goes into your office, it must stay there."

RE LAND TRANSFER TAX

A., deceased, died on or about the 24th of June, 1936, intestate, leaving as his only heirs two sons, B. and C. Among the assets of the estate was property in a township subject to a mortgage of \$4,000. In order to divide the estate, the younger brother, C., agreed to accept the property as his share, subject to the mortgage. Solicitors for C. contended that he should not have to pay Land Transfer Tax. I obtained a ruling from the Treasury, which is as follows:

"Our regulations do not include an exemption in this type of transfer. Regulation No. 5 states— "The Tax is payable upon all encumbrances and charges upon the lands conveyed, whether there is further consideration, or not, excepting as is provided for in Section 6, which reads as follows: The Tax is not payable on encumbrances, legacies, annuities, maintenance charges or other charges of a similar nature which are made a charge against lands passing by a Will of a deceased from executors to devisees; nor upon encumbrances affecting lands conveyed from husband to wife, or *vice versa*, where the consideration is natural love and affection only."

RE DOWER

A solicitor tendered a mortgage made by two joint tenants, one of which joint tenants was a married man, and it was found to be impossible to obtain his wife's bar of dower. The Registrar refused to accept the mortgage unless the wife joined in to bar her dower. The solicitor contended that as there was no dower in a joint tenancy the wife did not have to join in. I ruled that the solicitor was wrong. If you will turn to The Registry Act, 1929, Section 5, you will find that no mention is made of dower at all. The Act simply states that the mortgage is not to be accepted unless the wife joins as a party or there is a declaration that the man was unmarried at the date. Subsection 2 provides that the Judge may dispense with the affidavit or declaration, if sufficient grounds are given for him to make the Order.

As I said before, the Act does not say anything about dower, but might I draw your attention to the fact that in cases of joint tenancy the widow of the survivor of the tenants is entitled to her dower. Having regard to these facts, I cannot order the Registrar to accept the document.

RE DUPLICATE COPY OF INSTRUMENT

A Registrar wrote in as follows:

"There seems to be some doubt as to whether the duplicate copy of an instrument sent back to the solicitor should have had the signature attested to the affidavit of execution and affidavit (if any) of celibacy.

I am informed that..... Registry Office accepts and registers instruments and certified to the duplicate if the original bears those attested affidavits, even if the duplicate sent back does not."

My reply was as follows:

"I am in receipt of your favour of the 10th instant, and would advise you that you should not give a full certificate on the copy to be sent back unless the document is quite complete with the signatures, although the affidavit of execution may not necessarily be attached. In other words, the affidavit of execution is not part of the document for registration. It is only a document attached to the deed for the purpose of complying with the provisions of The Registry Act. To sum up: if a person brings in a deed to you, complete in every detail, and there is at the same time tendered to you a second copy without an affidavit of execution, but otherwise complete, you may stamp the duplicate copy and send it back, but if the duplicate copy has not got the signature, etc., then you should not stamp it, but just put the number on for a matter of convenience, to the person tendering the same."

RE COMPANY — RIGHT TO HOLD LANDS

A Local Master advised me that "X", Limited, operates under a Dominion charter holding a License from Ontario under The Extra-Provincial Corporations Act. Its Ontario License limits its right to the holding of lands to petroleum or oil lands. The Act, Section 11, provides that a company receiving such a License may, subject to the limitations and conditions of the license, hold and deal in real estate as therein set forth. The Local Master asked me if the company could hold and deal in other classes of real estate, and I wrote as follows:

"There is no limitation on a Dominion Company holding a License in Mortmain as to the nature in which it holds its land, except as to the amount thereon. If "X", Limited, has either a License under The Extra Provincial Corporations Act or a License under The Mortmain and Charitable Uses Act, it may hold lands to the amount set out in that License for any premise whatsoever."

RE CERTIFICATE OF FORFEITURE

PROVINCIAL LAND TAX ACT

I was asked by a Local Master as to the proper procedure for the entering of a Certificate under the Provincial Land Tax Act, and I replied as follows:

"When the Certificates of Forfeiture are received, you should not close out the parcel affected, but you should make the following entry in red ink on each parcel:

"By No..... dated, registered....., under and by virtue of Sec. 18, Chap. 30, R.S.O. 1927, the Minister of Lands and Forests thereby declared the above parcel forfeited to the Crown for no payment of the Provincial Land Tax."

If under subsection 2 of Section 18 the Certificate of the Minister is received declaring the forfeiture cancelled, you should number it in the usual manner, and enter a cancellation in the margin of the entry of forfeiture as follows:

“ ‘Discharged under....., dated....., 19..... Registered.....
19... , being the Certificate of the Minister of Lands and Forests.’

“If you should have an enquiry in connection with any lands affected by a Certificate of Forfeiture, you should advise the enquirer accordingly.”

RE TAX CERTIFICATES

I have been asked as to the advisability, when a Tax Deed is presented for registration, of a request that it be accompanied by evidence in the way of affidavits showing that the Assessment Act in all its requirements has been fully complied with, and I ruled that this evidence should in future always be given.

RE FEES

I was asked to rule regarding the proper fee chargeable on Searches in the Land Titles Office, and I ruled as follows:

“I have ruled that people should not ask for information that might be covered by a Certificate of Search. At the same time I consider that it might be well to exercise a little leniency with members of the legal profession. In other words, this business of expecting to obtain full information regarding a title should be discouraged.”

RE CUSTODY OF DOCUMENTS ACT

I was asked by a Registrar if a document that had been deposited under the above Act could be removed and afterwards registered. I replied as follows:

“I see no way by which a document can be taken out of The Custody of Documents Act, unless by reason of the powers contained in Section 13. If, therefore, the document has been there over five years, this Section cannot be used. I regret, but I do not see that anything can be done in the matter.”

RE SECURITY BOND

Some time ago it was decided that all Registrars should protect themselves with a bond to cover accidents in the office, as it was considered that the old bond only covered financial errors, and was no protection to the public. Some Counties have objected to paying the premium, and I wrote to a Registrar as follows:

“I am in receipt of your favour of the 14th instant, and beg to advise you that The Registry Act, Section 9, enacts that certain security shall be maintained for each Registrar. Section 9 goes on to state that any County or City may ask for additional security if they so desire. Section 10 provides that this security is liable to any aggrieved person to indemnify him against damage or loss sustained by him through the neglect or misconduct of the Registrar or his Deputy.

“It would, therefore, appear to me that the Legislature intended that this security was primarily liable to the County or City to protect the County or City from any defalcation by the Registrar in regard to the surplus fees of the office, and that the liability to an aggrieved person was his secondary liability. It would, therefore, seem that the County should pay for the insurance that is primarily intended to protect the County, and I would therefore, rule that the County should pay the premium in this case.”

RE CAUTIONS

I was asked by a Local Master to make a ruling regarding the practice of filing Cautions in certain cases in the local Land Titles Office, and I replied as follows:

"I am of the opinion that it would be a dangerous practice for Land Titles to go out of its way to build up a title by way of Cautions that would enable a Trustee under a Bond Mortgage, on default, to sell without notice.

"From the angle of tax, if the document is to be considered a transfer, the Government is entitled to a transfer fee with each transfer. If it is held to be a mortgage, the idea of tax would only arise in Toronto and the County of York, and, as you say the tax has been paid, you have evidently treated it as a deed or transfer and not a mortgage.

"In either case, if you wish to proceed now, I think you would be obliged to first discharge or withdraw all Cautions, and then register in order the original trust deed or charge, next the transfer, Royal Trust to the new trustees, and the steps in this latter case should be very carefully checked to see that every provision was complied with before enabling the Royal Trust to step out of the deal or picture, and specific and ample affidavits might well be insisted upon in connection therewith.

"Not having the documents before me, I am not able to pass upon the step that eliminated one, Krause, the principal bondholder and placed A. F. White in the position at one time occupied by the Royal Trust. You are on perfectly sound ground when you insist on an affidavit not only of good faith, but also of fair value in all cases where sale is being made without notice.

"I further do not think that you should allow such registrations as above outlined to be completed by any new numbering of Cautions or other documents, nor by reference only to documents attached thereto. Insist on tender of separate and complete documents wholly independent of any on file or now in the office. If you are not able to comply with this stipulation and have not duplicate properly executed documents to now register, you may have to resort to obtaining a Court Order setting out just who is entitled and who should be entered, but in all probability Mr. White likely has authentic duplicates."

RE DESCRIPTION

I was asked by a solicitor as to the duty of the Registrar to search registered instrument to which a description in a Lien referred, and I replied as follows:

"I would consider that the Registrar is not bound to search the registered instrument, to which the description in the Lien refers. I consider that the person tendering the Lien must take the responsibility as to the proper description, and it is not incumbent on the Registrar to make any search. I would, therefore, suggest that the proper fee is 25 cents, and not 35, as has been charged in your office."

RE SEARCHES

It has come to my attention that certain institutions have started a practice of sending in printed forms to Registrars. These forms amount practically to an Abstract, but are intended as a Search. No Registrar should use such a form. If he gives a Search, then he should embody it in a letter in the usual way and charge for it, but he should not let any Search grow into an Abstract.

RE AFFIDAVIT OF EXECUTION

I have been asked to rule what the Affidavit of Execution must contain, and I answered as follows:

"I would point out to you that Section 33 of The Registry Act sets out what the affidavit of execution must contain.

"You will find that the witness must depose to the execution by the party to whose execution he is a witness, and that he knows the party, etc.

"There is nothing in the Section demanding that the name of the party be inserted, so I would rule that if an affidavit stated that the witness saw the execution by all the parties and knew all the parties, this was sufficient to comply with the Act."

RE DUTIES OF REGISTRAR

I have procured from Mr. J. W. Mallon, the President of the Registrars' Association, a memorandum dealing with the duties of a Registrar, and I am inserting this as a guide. I wish to tender my thanks to Mr. Mallon for allowing me to insert it in my Report.

"Statutory requirements to be observed prior to and subsequent to the registration of a deed of lands.

"While the onus is upon the party who tenders an instrument for registration, nevertheless, a careful Registrar will endeavour to ascertain whether or not the following conditions have been complied with:

"He should first of all ascertain if the lands mentioned are situate within the limits of his Registry Division, and, if so, that they are described by a local description, that is, one from which a surveyor going upon the ground can trace the lands without reference to the Registry Office or elsewhere. Sec. 32, subsec. 6, Registry Act, R.S.O. 1937, Cap. 170.

"If the deed does not contain a local description, it must have attached to it the statutory declaration referred to in Sec. 32, subsec. 1, of The Registry Act made by one of the parties to the deed, his attorney, or his heirs, executors, or administrators.

"The deed must conform and refer to the last registered plan, Sec. 83, subsec. 11, Registry Act.

"He will then see that the deed has been properly executed, that is, duly signed and sealed, and that the witness has also subscribed his name thereto.

"An affidavit of execution, Sec. 33, Registry Act, by the witness or witnesses to the execution, by each of the parties who have signed it, must be attached to the deed, which affidavit must be signed by the witness, and the Jurat signed by the proper authorized person before whom the same was sworn. Sec. 35, Registry Act. For those before whom oaths, affidavits, etc., may be sworn outside of Ontario, see Sec. 38 of The Evidence Act, R.S.O. 1937, cap. 119. If the affidavit is sworn outside Ontario before a Notary Public, he must affix his notarial seal. See Sec. 7 of The Notaries Act, R.S.O. 1937, cap. 224, but if he has not an official seal, it shall be sufficient for the Notary to so certify. Sec. 35, subsec. 2, Registry Act, R.S.O. 1937, cap. 170.

"A marksman cannot be a subscribing witness. Sec. 37, Registry Act, R.S.O. 1937, cap. 170.

"No person authorized to take affidavits shall take an affidavit of execution of an instrument to which he is a party. Sec. 37, Registry Act, R.S.O. 1937, cap. 170.

"If executed by a Corporation, then instead of an affidavit of execution the deed may be signed by the 'secretary, manager, or attorney, or presiding officer thereof', and the corporate seal affixed. Sec. 40, Registry Act, R.S.O. 1937, cap. 170.

"In certain cases a Judge's Order, endorsed on the deed may be taken in lieu of an affidavit of execution. Sec. 39, Registry Act, R.S.O. 1937, cap. 170.

"The full name and place of residence of the Grantee must be endorsed on the deed. Sec. 44, Registry Act, R.S.O. 1937, cap. 170.

"There must be attached to the deed the affidavit required by Sec. 6 of The Land Transfer Tax Act, R.S.O., cap. 31, unless the deed has been endorsed by the Controller of Revenue that no tax is payable, or that the value of the consideration has been endorsed by him on the deed. See Ruling under that Act, number 3. The said affidavit may be made by the purchaser or vendor or by anyone acting for him under a Power of Attorney, or by an agent accredited in writing by the purchaser or vendor, or by the solicitor for either of them, or by some other person approved of by the Treasurer of Ontario. Sec. 6, subsec. 2, R.S.O. 1937, cap. 31.

"Where the deed is executed by attorney it must not be registered until the Power of Attorney has been registered, or unless a Judge's Order has been endorsed thereon. Sec. 48, Registry Act, R.S.O. 1937, cap. 170.

"Where the deed is made by a man, and no one joins therein as his wife, it shall not be registered without an affidavit or statutory declaration by such man that he is unmarried, married or a widower, and of the full age of twenty-one years. Sec. 51, subsec. 1, Registry Act, R.S.O. 1937, cap. 170. Where the affidavit or declaration cannot conveniently be obtained, a Judge's Order is required. Subsec. 2.

"Except as mentioned in Sec. 87, every deed executed after a plan has been registered must conform and refer thereto. Sec. 83, subsec. 11, Registry Act.

"The description must not contravene the provisions of Sec. 9 of The Planning and Development Act, R.S.O. 1937, cap. 270.

"If the deed embraces lands in two or more municipalities, (township, city, town or village) it must be treated as a separate registration for each, and be entered in the Index books and copied into the Registry book for each municipality. Sec. 50, Registry Act, R.S.O. 1937, cap. 170.

"If the deed is made pursuant to a Power of Sale in a mortgage, the mortgage and any assignments thereof must be copied in full in the Registry book. Sec. 57, subsec. 7, Registry Act, R.S.O. 1937, cap. 170.

"If executed by an executor or administrator, a devisee or a legatee, the Probate or Letters of Administration must first be registered, and the date of registration and the registered number thereof, must be inserted in the deed or in its margin. Sec. 58, Registry Act, R.S.O. 1937, cap. 170.

"If the deed comes within the provisions of subsection 6 of Sec. 56, Registry Act, the Consent of the Provincial Treasurer must be attached to or endorsed on it, unless a General Certificate under subsection 7, containing the description mentioned in subsection 8 of said Section 56 has been previously registered.

"If a Notice (Form 1) under Section 12 of The Old Age Pensions Act has been registered upon the lands described in the deed, the consent of the chairman or a member of the Commission must be endorsed on it before registration. R.S.O. 1937, cap. 314, sec. 12, subsec. 3.

"If the deed as presented is not in duplicate, the Registrar should write or stamp on it the words 'No Duplicate'.

"When satisfied that the deed is in order for registration, the Registrar will endorse thereon the fees, the tax, the date, hour, and minute of registration,

give it a number, and enter it in the Fee and Cash Book. He will then place upon each duplicate his certificate of registration. Form 8 of The Registry Act; and perforate each with the word 'Registered' as required by Section 46, subsection 3, Registry Act, R.S.O. 1937, cap. 170. After this the deed will be entered in the Alphabetical Index and the Abstract Index books, and copied into the Register. One of the duplicates will then be put on file, and the other given out. It is well to reserve a column in the Fee and Cash book for the signature of the person to whom it is delivered, or for the name of the person to whom it is mailed."

OBSERVATIONS AS TO ABSTRACT INDEXING

"Entries in the Abstract Index book should be made on the day of registration, or not later than the day following.

"Care must be exercised to enter the instrument on the proper lot, plan or concession, inserting the particulars mentioned in subsection 2 of Section 29 of The Registry Act, with short descriptions sufficient to identify the location of the land, rights of way, etc., so that recourse to the original on file may not be necessary by a party searching.

"The instruments should not be entered in this book too close, nor in a crowded manner.

"The names of all parties should be shown and their capacity, such as executor, administrator, trustee, etc., with the names of the deceased or beneficiary.

"If the parties are husband and wife and joint tenants, her surname will be used; if she joins only to bar her dower, the words '*et ux.*' or 'Mary J., his wife' are sufficient.

"In the 'Remarks Column' should be mentioned the previous consents given, e.g., Provincial Treasurer, Old Age Pension, Official Guardian, Public Trustee, Inspector in Bankruptcy, and the like. If executed under Power of Attorney, the fact should be noted.

"The consideration to be entered in this book is that in the body of the deed, and not that in the Land Transfer Tax affidavit.

"Many entries may be made in the Remarks Column of an Abstract Index, such as, for example:

1. Machinery and Fixtures.
2. Subject to Mortgage.
3. Subject to vendor's lien.
4. Subject to charge.
5. Subject to life estate.
6. Subject to conditions.
7. Subject to restrictions.
8. Subject to trusts.
9. Subject to easement (eaves, walls, etc.).
10. See recitals.
11. See clause *re* uses.
12. See special clauses.
13. Sketch attached.
14. Absence of seals, where instrument purports to be under seal.
15. Certified copies from other Registry Offices.
16. All names not in affidavit.

"From the above, which deals with one instrument only, *viz.*, a conveyance of lands, commonly called a deed, it will readily be seen that the office of Registrar of Deeds, is by no means a sinecure."

SUBDIVISION PLANS

“Observations respecting some of the more important matters to be considered when subdivision plans are tendered for registration.

“See that the provisions of subsections 2 to 5 of Section 83 of The Registry Act, R.S.O. 1937, cap. 170 have been complied with.

“Not more than one lot to be designated by the same number, letter, or word, and numbers must run consecutively. Sec. 83, subsec. 6, Registry Act, R.S.O. 1937, cap. 170.

“In triplicate, two for the office, one for the municipality, drawn on linen, one mounted. Sec. 83, subsec. 7, and Sec. 92, subsec. 1, Registry Act, R.S.O. 1937, cap. 170.

“Certificate of Ontario Land Surveyor, Form 13, signatures of apparent owners, signatures of mortgagees, if a corporation, signature of chief officer with seal, affidavits of execution. Sec. 83, subsecs. 8, 13, 18, Registry Act, R.S.O. 1937, cap. 170.

“Where signed by several separate owners, not joint tenants, plan should show what lands each owner claims to own. Guthrie, 1910, p. 34.

“To be accompanied by Field notes, if any, certified by the surveyor. Sec. 83, subsec. 9, Registry Act.

“If the lands abut upon the King's Highway, or upon a road forming a part of a County road system, the plan must have the approval of the Minister of Highways. Sec. 83, subsec. 14, Registry Act. And see The Highway Improvement Act, R.S.O. 1937, cap. 56, sec. 72, subsec. 2, where consent of the Lieutenant-Governor in Council is required when a municipality closes or diverts a road or road allowance entering or touching upon or giving access to the King's Highway.

“Plans of lands in cities, towns, villages, or their urban zones, must have the approval of the Councils of such cities, towns, villages, or the Ontario Municipal Board. Sec. 5, subsec. 1, Planning and Development Act, R.S.O. 1937, cap. 270.

“Section 5 of The Planning and Development Act supplies to all plans of surveys and subdivisions not registered, whether made before or after the passing of the Act. Subsec. 5 of said Section 5, R.S.O. 1937, cap. 270.

“If plan shows streets, roads, or highways, it must be approved by the proper Municipal Council or Councils, or by the Ontario Municipal Board. Sec. 83, subsec. 15, Registry Act, R.S.O. 1937, cap. 170, and Sec. 502, Municipal Act, R.S.O. 1937, cap. 266.

“If plan shows streets less than sixty-six feet in width, or if it is a plan of lands abutting on a highway less than sixty-six feet wide, consent of Council or Councils and the Ontario Municipal Board is necessary. Sec. 83, subsec. 15, Registry Act, and Sec. 5, subsec. 3, Planning and Development Act, R.S.O. 1937, cap. 270. No sale of lots may be made pending approval. Planning and Development Act, Sec. 5, subsec. 5, R.S.O. 1937, cap. 270.

“No highway shall be established, laid out, widened, altered, diverted, stopped up, or closed in any urban zone, or joint urban zone, except with the approval of the Council of each municipality in which said highway or any part of it is situate, and of the Council of any city, town, or village which such zone or joint zone adjoins or of the Ontario Municipal Board. Sec. 12, Planning and Development Act, R.S.O. 1937, cap. 270. But where the highway is situate in the urban zone or joint urban zone of a city of not less than 200,000, it shall only be necessary to obtain approval of the Council of such city and Council

of the municipality in which such highway is situated or of the Board. Planning and Development Act, Sec. 12, subsec. 2, R.S.O. 1937, cap. 270.

“Any public or private street, way, lane or alley, or block, tract, or lot, being the only access to a lot or lots on a plan shall be deemed to be a highway. Sec. 83, subsec. 16, Registry Act. Hence private ways, etc., may not now be designated on a plan as blocks or lots in order to get around the Statutes requiring consents, and see Sec. 496, Municipal Act, R.S.O. 1937, cap. 266, and Sec. 5, subsec. 4, Planning and Development Act, R.S.O. 1937, cap. 270.

“Plan of a subdivision of unpatented lands must have the consent of the Minister of Lands and Forests. Sec. 83, subsec. 17, Registry Act, R.S.O. 1937, cap. 170.

“Registered plan not binding unless a sale has been made. Sec. 88, Registry Act, R.S.O. 1937, cap. 170.

“Amendments and alterations of registered plans are made by order of a Judge. Sec. 88. And see Mallon 1923, p. 27, and Humphries 1925, p. 84.

“No part of a road, street, lane or alley upon which any lot sold abuts, or which connects with or affords access from a highway shall be closed or altered without the consent of the *owner* of the lot. Sec. 88, subsec. 4, Registry Act, R.S.O. 1937, cap. 170.

“Section 89 permits Council to apply to a Judge to cancel or suspend plans, close streets, etc., etc.

“All allowances for roads, streets, lanes or commons are public highways. Surveys Act, R.S.O. 1937, cap. 232, sec. 12, subsec. 2.

“Road allowances laid down upon a plan and not assumed by municipality for public use, when closed by alteration of plan under The Registry Act, the part closed shall belong to the owners of the lands abutting thereon. Surveys Act, R.S.O. 1937, cap. 232, Sec. 12, subsec. 4.

“When streets, roads, lanes are closed under the provisions of this Section, the corporation must give deeds and register them. Surveys Act, R.S.O. 1937, cap. 232, sec. 12, subsec. 9.

“A by-law closing a highway under Sec. 495, subsec. 1, clause (c) of the Municipal Act, R.S.O. 1937, cap. 266, must be confirmed by a by-law of the County. Sec. 495, subsec. 6, Municipal Act, R.S.O. 1937, cap. 266.

“No part of a tract of land situate within a city, town, or village, or in an urban zone or joint urban zone, which abuts upon a highway less than sixty-six feet in width, and which has not been subdivided by a plan approved under The Planning and Development Act, shall be severed from said tract and sold without the consent of Councils or Municipal Board, and no agreement for sale, or deed, or mortgage, shall be registered without such consent. This does not apply to sales or mortgages where plan registered prior to the coming into force of The Planning and Development Act, R.S.O. 1937, cap. 270, sec. 9.”

SHERIFFS

RE WRIT OF POSSESSION

I have been asked as to the life of a Writ of Possession, and I advised the Sheriff that it was the same as that of a Writ of *Fi. Fa.*, namely, three years.

RE WRIT OF *FI. FA.* — WHEN BINDING

A Sheriff wrote me as follows:

“I would appreciate your authority on a matter of great importance to this office. The question arises out of a discussion by two local solicitors, that a Writ of *Fi. Fa.* or Execution filed in the Sheriff's office does not

bind the lands of the defendant until an actual seizure of the lands in question has been effected, or until such time as a Notice has been placed in the *Ontario Gazette* advertising the sale of the lands.”

I replied as follows:

“I am in receipt of your favour of the 7th instant, and beg to advise you that a Writ of *Fi. Fa.* binds the lands of the defendant immediately upon the delivery to the Sheriff. It has always been my contention, and in fact that of the whole profession, that once a Writ is in the Sheriff’s hands it binds the lands.”

RE SHERIFF’S COSTS

I was asked for a ruling in the following case:

“A judgment was filed and payment of money was made on a claim of \$130.00, and then the solicitor for the plaintiff asked that a seizure be made, but it was found that some of the chattels were already under seizure by the Bailiff of the Division Court. On taking over the seizure under the County Court execution payment was demanded for the Bailiff’s costs in Division Court actions of \$36.44, and a cheque was given for that amount. A statement of the Sheriff’s charges has been sent to the trustees, but they claim that the costs of the County Court should not be paid, as the Division Court claim was the first filed against the debtor. They also said that our fees should be paid by the plaintiff, but the chief costs were incurred after the seizure was made, chiefly by putting a man in charge of the store until the date of the sale, bills having been put up.

“It has been the rule to have the costs of Division Court Bailiff, Sheriff’s fees and expenses, and costs of the solicitors in the County Court action to be classed as preferential, and I should like to know if this is the correct procedure in a matter of this kind.

“The plaintiff in the County Court claim will pay my charges, but it would be a great convenience to know if it is right to pay the Division Court costs when taking over the seizure, and if the costs of the Division Court or the County Court are to be paid according to their priority.”

I replied as follows:

“I am in receipt of your favour of the 8th instant, and would advise you that the costs and disbursements of the Bailiff are a first charge on the property or its proceeds, and are to be paid by the Sheriff on demand to the Bailiff. R.S.O., Chap. 113, Section 25 (3) Creditors Relief Act. See also Section 179, The Division Courts Act.

“These Bailiff’s costs thus form part of the Sheriff’s expenses of seizure, etc., and the practice is to so include them when issuing a statement for a trustee or under The Creditors Relief Act.

“The Division Court creditor is entitled to preference for costs as it was under his execution the seizure was first made. The Creditors Relief Act, Section 1 E *re* Bailiff. Section 26 as to preference for costs. Therefore, the Sheriff’s costs and the costs of the execution creditor, who is entitled to preference under The Creditors Relief Act, would take their rank under the provisions of The Bankruptcy Act with the trustee.

“It would appear that the Sheriff’s fees and expenses, which include those of the Bailiff, should be paid together with the Division Court execution creditor’s costs by the trustee.

“In your letter you do not state what was done with the \$30.00, apparently received before the goods were seized. This looks like a separate transaction from the goods seized.”

RE NOTICE TO JURY

The sittings of the Supreme Court in a city were postponed, and the Sheriff sent out to the jury the postponement notice, and advised them that the sittings had been postponed to a later date. He asked me if he should send out another notice, or rely on the fact that he had notified them of the postponement and of the future date. I advised as follows:

"I would consider that you should send out fresh notices to the jurors at least twenty days before the 6th of December, 1937, the date of the postponed sittings.

"I fear that if you did not send out this fresh notice, a number of the jurymen would probably fail to attend, and although strictly speaking you could point out the first notice, still you would be in a stronger position if you sent out the second one giving the prescribed notice."

RE FEE FOR CONDUCTING PRISONERS TO THE PENITENTIARY

I was asked by a Sheriff as to the proper fee chargeable for conducting prisoners to the Penitentiary, and I replied as follows:

"I am in receipt of your favour of the 11th instant, and beg to advise you that the fee payable to Sheriffs for Bailiffs and Constables for conducting prisoners to the Penitentiary is \$6.00 per day to the Sheriff, \$2.50 per day to the Constable, and the mileage is 6 cents a mile and the usual expenses, meals, hotel, etc."

RE SERVICE OUT OF BAILLIWICK

A Sheriff wrote in to the Solicitor for the Department asking if he could make a service out of his own District or County, and the Solicitor for the Association replied. I have the permission of Mr. Maclellan to include his letter in my observations.

"I have your letter of the 3rd March, asking: 'Can a Sheriff make a service out of his own District?'

"Under the Sheriffs Act provision is made for the appointment of a Sheriff for each County and District, R.S.O., Cap. 18, Sec. 1. This implies that each Sheriff must be confined in his work to his own bailiwick.

"When the shrievalty of York was divided into two, York and Toronto, and both Sheriffs had their offices in the one Court House, which was wholly in the City of Toronto, special provisions were put in the Act, as there might be some conflict. Thus no act done by either Sheriff was to be held invalid on the ground that it should have been done by the other. It was declared that the Sheriff of York should have no jurisdiction within the City of Toronto, save as provided in the Act.

"Mather in his text book on the law of Sheriffs in England writes: 'Despite the encroachments made upon the Sheriff's power, he still retains his old position of authority as the chief executive officer of the Crown within his County (1935 Edition, p. 28)'. The Sheriffs Act in England provides for the appointment of a Sheriff for every County. Mather on another page (79): 'It is the duty of the Sheriff to levy on the goods of the debtor *wherever found within his bailiwick*'.

"The point is explicitly covered by Churchill on Sheriffs, edition of 1882 at page 24. The Sheriff's authority is co-extensive with his bailiwick or County, and no further. He has no power or authority in any other County than his own.

“There are several reasons why a Sheriff should not serve any process in the territory of another Sheriff:

- (1) Because his appointment is for his own particular County or District, and must be considered so limited.
- (2) Because the fee collected would be diverted from the other office to its disadvantage.
- (3) It has always been a matter of ethics between Sheriffs not to interfere with the territory of a neighbouring Sheriff.
- (4) It may prevent the party for whom the service is made from taxing this disbursement for service, if he succeeds in his action.

“Section 18 of The Sheriffs Act covers the situation where a Sheriff has not been able to find the person to be served in his own County or District; and the right of the litigant to have the papers delivered back to him by the Sheriff, so that someone else may serve them. In a case of that sort it may be that a neighbouring Sheriff or his officer might lawfully serve out of his own territory.

“If a Sheriff should make a service out of his own territory, notwithstanding what is stated above, I think the service would be considered good.

“There are some cases in which a Sheriff exercises his authority out of his own bailiwick, as where he is conveying prisoners either to or from his own County gaol, or where a shrievalty borders on navigable waters, and the Sheriff has to go out from the shore to seize a boat, for the limit of the County on the water side does not extend beyond the low water mark. The territory beyond that for three miles is considered the general realm of the Dominion.

“The fact that in your case a defendant has moved from your District Temiskaming into the District of Sudbury, does not give you authority to follow him and serve him, even if the trial is to be at Haileybury in your own Court House.”

CROWN ATTORNEYS

RE SUMMARY CONVICTION APPEALS

I was asked by a Crown Attorney as to the proper procedure regarding Appeals from Summary Convictions, and I advised that although the matter was an Appeal, still it was a criminal matter, and all the proceedings are criminal proceedings. I advised that the Appeal should be treated throughout as a criminal matter.

Fifty-ninth
ANNUAL REPORT
OF THE
Superintendent of Insurance

FOR THE PROVINCE OF

ONTARIO

1938

(Business of 1937)

PRINTED BY ORDER OF
THE LEGISLATIVE ASSEMBLY OF ONTARIO

ONTARIO

TORONTO

Printed and Published by T. E. Bowman, Printer to the King's Most Excellent Majesty
1938

DEPARTMENT OF INSURANCE

TO THE HONOURABLE GORDON D. CONANT, K.C., M.P.P.
Minister in Charge of the Department of Insurance.

I have the honour to submit herewith the Fifty-ninth Annual Report of the Superintendent of Insurance for the year 1938 (business for the year ended December 31st, 1937). This Report includes the Preliminary Tables respecting 1937 business as printed under date April 20th, 1938.

The Report is arranged in five divisions, in addition to an index of all insurers licensed to carry on business in Ontario and classes of insurance for which authorized, as follows:

- I. Annual Statements.
- II. Annual Statement Abstracts.
- III. Movement of Securities.
- IV. Statistical Tables.
- V. Appendices.

The first division, entitled "Annual Statements," contains extracts from the Annual Statements filed with the Department by all licensed insurers, arranged alphabetically by class of insurer. Insurers registered under *The Canadian and British Insurance Companies Act, 1932*, or *The Foreign Insurance Companies Act, 1932* (Dominion Acts), have been required to file only Modified Statements, summarizing their assets and liabilities and showing their underwriting experience within the Province only, with the Department, and this skeleton information only has been included in this Report.

Division II, entitled "Annual Statement Abstracts," contains tabulated summaries showing the financial condition of all joint stock and cash-mutual fire insurance companies and fraternal societies not registered under the above mentioned Dominion Insurance Acts. Some discrepancies will be observed between the figures shown in these tables and those shown in the statements of individual insurers in Division I, the latter containing changes made as a result of inspection reports. In such cases the figures included in Division I should be understood to prevail.

Division III, entitled "Movement of Securities," shows for Ontario companies (except purely mutual fire insurance corporations) the details of stocks, bonds and debentures purchased, sold or matured during 1937.

Division IV, entitled "Statistical Tables," shows in tabular form the premiums and losses of and other information pertaining to all licensed insurers, except mutual benefit societies.

Division V includes, as "Appendices," certain miscellaneous information and a review of insurance legislation enacted at the 1938 session of the Legislative Assembly of this Province.

LIFE INSURANCE

The number of companies licensed to write life insurance in Ontario during 1937 dropped to forty-four as compared to forty-seven in 1936. The three companies which ceased writing business were the Mutual Relief Life Insurance Company of Kingston, Ontario, which was reinsured by the Empire Life Insurance Company of Toronto, as of May 20th, 1936; the Continental Assurance Company of Chicago, Illinois, which did not renew its license as of June 30th, 1937; and the North British and Mercantile Insurance Company of London, England, which ceased writing new business in Ontario some years ago, but which has erroneously been included in the statistical compilations for the past two or three years.

In addition to the above companies omitted from the 1937 statistical compilation, three other companies are noted which will not appear in future years. These are the London and Scottish Assurance Corporation, Limited, of London, England, which ceased writing business in Canada as of September 30th, 1937; the Union Labour Life Insurance Company of New York, the Canadian business of which was reinsured by the Metropolitan Life Insurance Company as of March 31st, 1937; and the United States Life Insurance Company of New York, the Canadian business of which was reinsured with the Confederation Life Association by agreement dated June 24th, 1937.

Premium income received by these companies from Ontario policyholders during 1937 showed a substantial increase over 1936. The total was \$92,400,000 as compared to \$88,400,000 in the previous year, representing an increase of approximately 4½ per cent in comparison to an increase of 1½ per cent for 1936.

This extraordinary increase of \$4,000,000 premium income in Ontario was made up of increases of \$2,200,000, \$2,000,000 and \$200,000 in Ordinary, Industrial and Group Assurances respectively, partially offset by a decrease of \$400,000 in annuity premium income.

A comparative summary of premium income for the past four years is as follows:

	1937	1936	1935	1934
Net Premium Income:				
Assurances { Ordinary	\$63,903,154 57	\$61,753,727 00	\$61,011,046 68	\$62,071,018 16
{ Industrial	19,110,714 98	17,075,284 57	16,903,615 01	16,765,851 64
{ Group	3,276,635 02	3,007,055 69	2,665,359 32	2,423,034 95
Annuities	6,108,684 29	6,561,166 42	6,578,552 72	7,929,309 93
Totals	\$92,399,188 86	\$88,397,233 68	\$87,158,573 73	\$89,189,214 68

Disbursements to policyholders in Ontario and their beneficiaries during 1937 totalled \$62,700,000 as compared to \$61,900,000 in 1936.

This increase in disbursements to policyholders is the first to be recorded since 1933. An analysis of the increase shows that Matured Endowment payments increased substantially and death claims and dividends to a smaller degree. Such increases were offset by a considerable decrease in cash surrender values paid and a small decrease in sundry other payments.

The following is an analysis of the disbursements to Ontario policyholders and their beneficiaries during 1937:

	Ordinary	Industrial	Group	Total
ASSURANCE CONTRACTS				
Death claims.....	\$14,090,856 65	\$2,237,234 91	\$1,796,095 67	\$18,124,187 23
Matured endowment.....	5,283,332 66	1,422,912 20	6,706,244 86
Surrender values.....	15,504,778 32	7,328,856 80	17,602 82	22,851,237 94
Disability claims.....	762,142 00	272,136 10	354,645 93	1,388,924 03
Dividends.....	9,040,912 21	2,564,805 07	190,377 00	11,796,094 28
Totals.....	\$44,682,021 84	\$13,825,945 08	\$2,358,721 42	\$60,866,688 34
ANNUITY CONTRACTS				
Payments to annuitants.....	\$931,456 58	\$82,201 75	\$1,013,658 33
Death benefits.....	86,503 55	320 93	86,824 48
Surrender values.....	324,419 50	325,313 47	649,732 97
Disability claims.....	617 86	617 86
Dividends.....	72,927 39	2,294 00	75,221 39
Totals.....	\$1,415,924 88	\$410,130 15	\$1,826,055 03
GRAND TOTALS.....	\$46,097,946 72	\$13,825,945 08	\$2,768,851 57	\$62,692,743 37

New business written in 1937 amounted to \$311,000,000, representing an increase of \$11,000,000 over that written in 1936 and \$20,000,000 in excess of that written in 1935.

Business in force continued the gradual increase which has been in evidence since 1933. Gross in force as at December 31st, 1937, was \$2,982,000,000 as compared to \$2,895,000,000 as of December 31st, 1936.

Comparative summary of new business issued, amount ceased by death, and business in force as of December 31st, for the years 1934 to 1937, is given below.

Policies in Ontario		1937	1936	1935	1934
New issued:	Number.....	357,718	359,419	351,007	364,095
	Amount.....	\$311,067,235	\$300,981,447	\$291,952,463	\$311,025,759
Ceased by death:	Number.....	18,467	17,492	16,754	16,701

FRATERNAL INSURANCE

Thirty-nine fraternal societies were licensed to operate in Ontario during 1937, this being the same number as in 1936. Included are eight municipal pension fund societies.

Total premium income collected from members in Ontario was \$2,510,000, as compared to \$2,580,000 in 1936. The net decrease of \$70,000 was made up of a decrease in the mortuary fund premiums of \$21,000, in the general fund assessments of \$44,000, and in miscellaneous funds of \$15,000, partially offset by an increase of \$10,000 in the sickness fund premiums.

Total disbursements of these societies in Ontario showed a very small decrease of approximately \$14,000, the total being \$3,386,000 for 1937.

The amount of mortuary certificates in force in Ontario again declined from \$77,355,000 at the end of 1936 to \$76,588,000 at the end of 1937. The rate of decline, however, has decreased, being only 1 per centum in 1937 as compared to 2.1 and 9.5 per centum in 1936 and 1935, respectively.

FIRE INSURANCE

Three hundred and twenty-seven companies had licenses to transact fire insurance in Ontario during 1937. Premiums earned and losses incurred for the various classes of insurers defined by the Act are tabulated below, together with comparable figures for 1936. The experience of each insurer is shown in Table X.

	1936			1937		
	Net premiums earned	Net losses incurred (including adjustment expenses)	Ratio net losses incurred to net premiums earned	Net premiums earned	Net losses incurred (including adjustment expenses)	Ratio net losses incurred to net premiums earned
	\$ c.	\$ c.	%	\$ c.	\$ c.	%

*"Net premiums earned" was not calculated. The net losses incurred per \$100,000 of net amount at risk was \$32.29

AUTOMOBILE INSURANCE

The number of companies which transacted automobile insurance in Ontario during 1937 was 158. The premiums and losses of each insurer are shown in Table XI of this Report. Net premiums written during 1937 amounted to \$9,550,354.60, an increase of 20.6 per cent over 1936. Losses incurred amounted to \$5,860,657.40, an increase of 24.2 per cent over the previous year. A comparison of premiums written and losses incurred and loss ratios with the figures of the ten preceding years is as follows:

	Net premiums written	Net premiums earned	Net losses incurred	Ratio of net losses incurred to net premiums earned
	\$	\$	\$	%
1926.....	3,743,532	3,657,994	2,037,903	55.7
1927.....	4,643,948	4,295,003	2,835,352	66.0
1928.....	6,280,675	5,670,656	3,603,260	63.5
1929.....	8,324,146	7,520,896	4,314,383	57.4
1930.....	9,361,901	8,934,508	4,378,698	49.0
1931.....	8,830,502	8,968,620	4,601,104	51.30
1932.....	7,769,765	8,017,672	3,805,268	47.46
1933.....	6,462,809	6,904,414	3,551,142	51.43
1934.....	6,931,896	6,748,426	4,007,387	59.38
1935.....	7,017,027	6,963,890	4,123,233	59.21
1936.....	7,920,609	7,553,033	4,717,954	62.46
1937.....	9,550,354	8,862,667	5,860,657	66.16

The figures shown in the foregoing table afford a rough indication of the underwriting experience of the companies in the aggregate from the standpoint of the shareholders or members of the several companies; they do not indicate

the reasonableness of the premium rates shown in any particular manual of rates or charged by any particular company, because a substantial majority of the business is written by "unassociated companies" at "non-tariff rates" and otherwise at special rates for special risks.

Loss-Cost Experience

The automobile insurance loss-cost experience in the Province continues to be filed by insurers with the statistical agency designated pursuant to Section 72 of *The Insurance Act* (The Canadian Underwriters' Association).

On March 17th, 1938, the statistical agency was instructed to tabulate the automobile insurance data in Ontario of all insurers transacting such business for the calendar year 1937, transactions in respect of 1933, 1934, 1935, 1936 and 1937 policy years, and for the first six months of calendar year 1938 transactions in respect of policy year 1937. The tabulated results so directed to be compiled were subsequently filed with the Department. Development factors to reduce the 1937 incomplete policy year experience (valued as at June 30th, 1938) to a complete policy year basis were approved by the Department on September 2nd, 1938. During November, 1938, experience exhibits were received containing automobile insurance loss-cost indications directed to be developed from the tabulated results of the complete policy years 1933, 1934, 1935 and 1936, and the incomplete policy year 1937 (valued as of June 30th, 1938). Extracts from these exhibits are published in Appendix VI to this Report.

Automobile Insurance Premium Rates

Sections 302, 303 and 304 of the Act, providing for government regulation of automobile insurance premium rates, are not in force. Insurers and rating bureaux are not required to file their schedules of premium rates with the Department. Nevertheless, by analysis of the loss-cost experience data filed pursuant to Section 72 of the Act, the Department is in a position at all times to report to you upon the reasonableness of automobile insurance premium rates fixed or charged in the Province. Complete loss-cost experience data for the automobile insurance business of all insurers in the Province, stock and mutual, tariff, non-tariff and Lloyd's, is presently on file, commencing with the policy year 1927. Automobile insurance loss-cost experience data is now required to be filed in seven provinces (excluding Quebec and Nova Scotia). A tabular digest of automobile insurance premium rates charged in the Province by the associated insurers since April 1st, 1928, is contained in Appendix VII to this Report.

Standard Forms

The work of the Committee of Underwriters, which Committee makes recommendations from time to time respecting the forms of application, policy and endorsement to be used for the writing of automobile insurance in the several provinces under the "Uniform Automobile Insurance Act," has been covered in previous Reports since 1932. (For last reference see page vii of the 1937 Report.) A list of the "Standard" forms, revised to June 1st, 1938, is given in Appendix V to this Report.

In accordance with previous practice, the Committee was reorganized for the 1938-1939 season on December 12th, 1938. The following members now comprise the Committee for the current season:

Hon. Chairman: H. L. Kearns (Shaw & Begg, Limited).

Chairman: H. D. McNairn, Superintendent of Insurance.

Vice-Chairman: John Wilson (Western Assurance Company).

Secretary: John Edwards, Casualty Actuary, Department of Insurance.

R. A. Hudson (United States Fidelity & Guarantee Co.).
 R. C. Stevenson, C.A. (Attorney for Non-Marine Underwriters at Lloyd's).
 E. M. Hill (Dominion of Canada General Insurance Company).
 R. J. Bastedo (Phoenix of London).
 Walter Hawke (Massie & Renwick, Limited).
 D. M. Dewar (Sun Insurance Office, Limited).
 William Spry (Toronto General Insurance Company).
 Bruce Paterson (London & Lancashire Guarantee & Accident Company).
 Vance C. Smith (Lumbermen's Mutual Casualty Company).
 Rae Blight (Ontario Fire & Casualty Insurance Agents Association).

CASUALTY AND MISCELLANEOUS INSURANCE

(OTHER THAN AUTOMOBILE)

The following table shows premiums and losses in Ontario for 1937 for the various casualty lines of insurance:

Class of Insurance	Net premiums written		Net premiums earned		Net losses incurred		Ratio of net losses incurred to net premiums earned
	\$	c.	\$	c.	\$	c.	%

Weather.....	144,557	50	145,607	98	117,291	72	80.55
Workmen's Compensation.....	57,497	68	51,062	18	34,728	86	68.01
Totals.....	9,219,924	91	8,797,099	11	3,939,261	56	44.78

As compared with 1936, net premiums written show an increase of \$1,290,658.84, or 16.3 per cent. The loss ratio on the basis of losses incurred to premiums earned was 44.78 per cent, as compared with 44.07 per cent for the previous year.

FARMERS' MUTUAL FIRE INSURANCE

(See Abstract Tables of assets, liabilities, receipts and expenditures on pages 88 to 95; loss ratios on pages 272 and 273; and other data on pages 258 to 260.)

For the fourth consecutive year, experience of the sixty-seven companies of this type was favourable in 1937. In the last Report it was stated that "1936, with the sole exception of 1926, proved to be in many respects the best year for these companies since 1920." The excellent experience of 1936 was not only duplicated, but considerably exceeded in 1937.

Net losses paid amounting to \$903,917 was a decrease of \$13,917 from the 1936 figure, and net losses incurred of \$904,542 represented a decrease of \$23,018, or 2.48%. Cost of management was up \$10,312 at \$306,928. In terms of cents per \$100 of the average net amount of insurance in force during the year, the cost of insurance in 1937 was 22.51c. (losses 16.81c., management 5.70c.), as compared to 23.04c. in 1936, 23.96c. in 1935, 24.73c. in 1934, 31.87c. in 1933, 34.42c. in 1932, and 45.51c. in 1931. These figures refer to cost of insurance to the companies. Cost of the average \$100 of insurance to the members in 1937, as obtained from the relation between net premiums earned and the average net amount at risk during the year, showed a drop from 30.70c. to 30.47c., or about $\frac{1}{4}$ of a cent.

Net 1937 cash receipts from cash payments or instalments thereof, interest on investments, and other sources was \$1,716,506—a decrease of \$7,137 from 1936. Interest receipts increased \$16,248 to \$101,721, which was a relatively small increase in view of the fact that investments made (\$537,583) exceeded investments realized (\$140,126) by \$397,457. New revenue from an increase of \$7,113,200 to \$541,811,000 in net insurance in force was offset by downward rate adjustments in a number of companies. Increased expenditure for fire prevention work was reflected in an increase of \$7,823 in sundry expenditures. Net earned income was up \$8,840 to \$1,732,536 in 1937, which exceeded net incurred losses and expenses of the year by \$521,065. There were no assessments levied in 1937.

The ratio of losses incurred to premiums earned was 55.16% in 1937, and the ratio of management expense to premiums earned was 18.72%. Loss ratios of previous years had been—56.85% in 1936, 60.87% in 1935, 60.86% in 1934, and 81.43% in 1933.

Aggregate surplus increased \$489,000 to \$2,415,000 as a result of 1937 operation of the companies, to bring surplus in terms of cents per \$100 of net insurance in force at the year-end up to 44.87c.—an increase of 8.62c. It had been \$1,926,000 (36.25c.) in 1936, \$1,466,000 (27.76c.) in 1935, \$1,128,000 (21.38c.) in 1934, \$717,000 (13.14c.) in 1933, so that the increase during the past four years was \$1,698,000 (31.73c.). These surplus figures are net amounts after providing for net losses on sales of securities, setting up investment reserves on securities in default, and writing off uncollectible arrears.

Aggregate liquidity of the companies, as represented by excess of bonds and cash over unpaid losses and borrowed money, has likewise shown substantial improvement in recent years—from \$1,309,000 in 1933 to \$1,753,000 in 1934, \$2,127,000 in 1935, \$2,604,000 in 1936, and now \$3,079,000 in 1937—an increase last year of \$475,000, or 18.2%. With \$2,267,000 of bonds and \$856,000 of cash, and only \$36,200 of unpaid losses and \$11,500 of borrowed money, the companies as a whole were in a better position to meet adverse loss experience at the end of 1937 than at any previous time in their history.

All but eight of the sixty-seven companies showed some surplus increase in 1937, but most of the increase was made by twenty-nine of them, which had gains of from 10c. to 66c. per \$100 at risk. Thirty companies were up from 1c. to 10c. per \$100 at risk; seven were down from 1c. to 7c., and one small company dropped back 27c. per \$100 at risk. This last case illustrates the disturbing effect of comparatively few losses of average amount on the surplus position of a small company, and indicates the relatively high surplus in cents per \$100 at risk which should be maintained by such small companies.

At the end of 1933 there had been twenty-seven deficits among the companies, aggregating \$322,500; at the end of 1936 there were ten, aggregating \$59,000; and at the end of 1937 the list of deficits had been reduced to five,

totalling \$33,000. Seventeen of the deficits at the end of 1933 were classed as "large"; two are still in that category, although considerably reduced. On the other hand, the 1933 list of twenty-six companies with surplus of 25c. or more per \$100 at risk has grown to forty-six at the end of 1937, of which twenty-eight exceed 50c. per \$100 at risk.

The list of fifteen companies which had received approval of rates less than the minimum prescribed by Section 114 of *The Insurance Act* (chap. 256, R.S.O. 1937) was unchanged in 1937. Rather than make a general rate reduction, the trend among the companies appears to be to adjust rates in accordance with revised classifications of risks. The Department has consistently taken the view that the prescribed minimum rates are basic rates, so that in most cases the adjustments of rates in accordance with revised classifications of risks have not required formal approval.

The provisions of subsection (5) of Section 114 of *The Insurance Act* (chap. 256, R.S.O. 1937) with respect to refunds from surplus were put into effect for the first time by the directors of the South Easthope Farmers' Mutual Fire Insurance Company, who, at the end of 1937, declared a refund from surplus amounting to \$7,371.31, to be credited on the 1938 premiums of members who had been insured continuously in the company during the preceding five years.

LICENSING OF INSURANCE AGENTS

During the license term ending September 30th, 1938, approximately 7,900 life insurance and 6,300 other than life insurance agents were licensed under the agents' qualification law. These figures represent an increase of 100 life insurance agents licensed over the period ending September 30th, 1937, the figures for which were published in the Report for that year.

The Advisory Board which functions under Section 281 of the Act held sixty meetings for the purpose of considering other than life applications. At these meetings a total of 581 applications for license and renewal of license were heard, which is an increase of 53 over the preceding term. Of these applications, 483 were granted by the Superintendent subject to review at the close of the license term; 88 were declined; 25 were withdrawn by the recommending company and 30 withdrawn by the applicant.

In addition, there were seventy agencies terminated by the recommending companies in the course of the year and, as this results in the automatic suspension of an agent's license, it means that 213 persons were declined the right to enter or continue in the other than life insurance agency business during the period under discussion.

The Advisory Board held nine meetings during the same period to consider cases relating to life insurance, at which meetings 46 cases were heard. A number of cases were dealt with without reference to the Advisory Board by discussion with the Joint Committee of the Canadian Life Insurance Officers' Association, the Life Agency Officers' Association and the Life Underwriters' Association of Canada. This Committee has assisted the Department in reviewing applications for license and complaints respecting licensed agents, and in a great many cases the matter has been satisfactorily disposed of without reference to the Advisory Board.

During the period under discussion several prosecutions were successfully handled by the Department with the assistance of the Crown Attorney in the district in which offences under the Act were committed. In one case an agent licensed by the Department was convicted of paying commission to an unlicensed person, the said unlicensed person having previously been refused a license by the Department. Prosecution against the unlicensed agent also

was entered for acting as an agent without authority. Convictions were registered in both cases and the minimum fine imposed by the presiding magistrate. In Western Ontario two unlicensed agents were convicted of acting as agents and placing business with a general agent in Winnipeg, Man.

The Department continued throughout the year ending September 30th, 1938, to call for quarterly returns of agents' balances more than ninety days overdue, and my report on the returns for the period ending September 30th, 1938, will be found in Appendix IX.

There is still some room for improvement in the matter of recommending applicants for license. A number of insurance company officials regard seriously their obligation to recommend to the Department only such persons as they consider suitable to receive licenses, but my observation has led me to believe that other company officials do not seriously consider the statement which is made in the "Notice of Appointment of Agent" on the application to the effect that the prior record of the applicant has been investigated and that the applicant is regarded as a suitable person to receive a license. A review of some of the cases heard by the Advisory Board from time to time has convinced me that a great deal more care could be taken in this respect by some company officials. A little more care in the selection of agents would greatly facilitate the work of the Department in the licensing of insurance agents.

CONDITIONS IN THE FIRE AND CASUALTY INSURANCE BUSINESS

In my 1937 Report your attention was drawn to the existence of undesirable conditions in the fire and casualty insurance business in this Province. Appendix X to that Report contains a statement of the Superintendent to representative company executives on this matter and indicates that some action should be taken by them. Some consideration has been given to the question by the companies, but no actual progress has yet been reported to me. The statute contemplates a formal report to the Minister upon any matter connected with insurance, but it is my intention to take this step only if suitable and effective action by the companies to solve the problems of the business is not forthcoming.

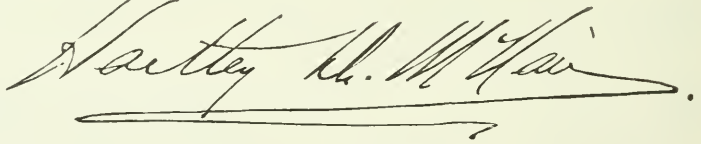

COMPANY CHANGES

By a reinsurance agreement between the Toronto General Insurance Company, an Ontario company incorporated by Letters Patent dated the 21st day of July, 1921, under the provisions of *The Ontario Insurance Act*, R.S.O. 1914, c. 183, and the Toronto General Insurance Company, incorporated by Special Act of the Parliament of Canada, I Geo. VI (1937), c. 51, the Dominion company assumed the liabilities and obligations, assets and undertakings of the Ontario company upon the terms and conditions set out in the agreement. The agreement was approved by Order-in-Council dated the 6th day of January, 1938, and became effective as of the 31st day of December, 1937.

By an agreement for reinsurance between the Sons of Scotland Benevolent Association, an Ontario fraternal society incorporated the 8th day of April, 1880, pursuant to the Revised Statutes of Ontario, 1877, an Act respecting Benevolent, Provident and other Societies, and the Sons of Scotland Benevolent Association, incorporated by Special Act of the Parliament of Canada, I Geo. VI, c. 54, the Dominion association assumed the liabilities and obligations, assets and undertakings of the Provincial association upon the terms and conditions set out in the agreement. The agreement was approved by Order-in-Council dated the 10th day of May, 1938.

VALUATION OF SECURITIES

This Report includes as Appendix II the report of the Standing Committee of the Association of Superintendents of Insurance of the Provinces of Canada on valuation of securities, dated August, 1938.

A handwritten signature in cursive script, reading "Hartley H. McLean". The signature is written in dark ink and is positioned above a horizontal line that ends in a small arrowhead pointing to the right.

Superintendent of Insurance.

Parliament Buildings, Toronto,
December 15th, 1938.

Miscellaneous Statement

I. The calculation of the "Reserve" in the "Statement of Actuarial Liabilities."

(1) Method of valuation of policies of life insurance and annuities:

For the regular line business, the policies in force were grouped for valuation purposes according to the year of issue, plan and age nearest birthday in the year of issue. Prepared tables of mean reserves were used on the net level annual premium basis, and advantage was taken of the deductions permitted by *The Ontario Insurance Act*. Except in respect of the business of the former Mutual Relief Life Insurance Company reinsured by this Company during 1936, the basis of valuation was as follows: Policies issued prior to 1931 were valued on the OM (5) Table of Mortality with interest at 3½% per annum, and those issued in 1931 and subsequent years were valued on the AM (5) Table of Mortality with interest at 3½% per annum. A limited number of special contracts were valued throughout on the OM (5) Table of Mortality with interest at 3½% per annum. The business of the former Mutual Relief Life Insurance Company, reinsured during 1936 and issued in 1929 and years subsequent, was valued according to the AM (5) Table of Mortality with interest at the rate of 3½% per annum. Contracts issued as annual premium deferred annuities not involving life contingencies during the deferred period were valued by accumulating the net premiums with interest at the rate of 3½% per annum.

Through reinsurance of the Canadian Order of Oddfellows and the Mutual Relief Life Insurance Company, the Company has on its books some fraternal insurance for part of which the premiums are payable annually and for part of which the premiums are payable monthly. In respect of policies in this section on the Whole Life plan, the business was grouped according to the attained age in 1937, and the sums assured and the net premiums were valued separately. For business on other plans in this section, the policies were grouped for valuation purposes according to the year of issue, plan and age at issue, and prepared tables of mean reserves were employed. All policies in force in this section were valued according to the AM (5) Table of Mortality with interest at the rate of 4% per annum.

For annuity contracts involving life contingencies the valuation basis provides a reserve in excess of the British Offices Select Life Annuity Tables, 1893, with interest at 3½%. Contracts for immediate annuities for periods certain were valued on an interest basis of 3½% per annum.

Miscellaneous Statement (Continued)

Special Classes:

- (a) For policies issued on lives resident in tropical or sub-tropical countries an extra premium is charged. See T.A.S.A., Volume XXIX, page 4.
- (b) Where policies have been issued at rated-up ages, the reserves are taken as of the rated-up age used for computing the premium.
- (c) Policies issued subject to a lien were valued for the full amount of insurance.
- (d) Policies issued subject to an extra premium (1) payable in one sum, not issued; (2) payable annually; a reserve equal to 50 % of the gross extra premium is provided.
- (e) The substandard business issued all comes under the above 4 classes and practically all is on the rated-up age plan.
- (f) For policies issued to include disability benefits (waiver of premiums only and waiver of premiums with monthly income without deduction from the sum assured) the additional liability was determined as follows: (1) before the occurrence of disability by the accumulation of 50 % of the gross extra premium for disability on the policies in force from the date of issue; (2) after the occurrence of disability the reserve provided was the present value of the future income payments and premiums waived on the basis of Hunter's Disability Table with interest at the rate of 3 % per annum adjusted as follows, according to the year preceding the date of valuation that the claim was incurred: 50 % first year, 75 % second year, 85 % third year, 95 % fourth year, and 100 % in the fifth year of disability and thereafter.
- (g) There is one annuity in force issued on a substandard basis. This contract was valued at the rated-up age on the basis of which it was issued.
- (h) For policies issued to include the additional accidental death benefit a special reserve was computed as follows: For policies where the premium-paying period and the period of the benefit were coincident the reserve was computed at the rate of 62 ½c. per M; for policies where the premium-paying period was less than the period of double indemnity coverage the reserve was computed at the rate of 62 ½c. per M plus the excess amount of the premiums paid on the policy over \$1.25 per M, such excess being accumulated at 3 ½ % per annum.

(2) Items of Special Reserve:

- (a) No reserve is maintained on account of loadings on single premium policies, limited payment policies or annuities.
- (b) Where the guaranteed values in certain policies exceeded the reserve according to the basis of valuation a pure endowment reserve was provided for the excess of the guaranteed value over the reserve.
- (c) For lapsed policies eligible for reinstatement and not continued in force under the automatic non-forfeiture provisions, no reserve is provided for the excess of the statutory reserve over the guaranteed value.
- (d) No reserve was held to cover the option of renewal under term policies.
- (e) No reserve was held to cover the option of conversions under term policies.
- (f) There are no items of special reserve to which reference has not already been made.

II. *Modifications or limitations under special class policies referred to in I. (1) (a) to (f) above.*
Where a policy was issued on a rated-up age the guarantees contained in the contract are for the same age as was used in calculating the premium. For other special class policies the values as for the age and year of issue were used.

III. The average rate of interest earned during the year on the basis of the net ledger assets was 5.03 % according to the formula $\frac{2I}{A+B-I}$. In computing the denominator for this purpose, the assets were taken at authorized values allowed by the Ontario Department of Insurance rather than the book values.

IV. *The distribution of surplus.*

- (a) A separation of the funds of the Company as between the policyholders and shareholders has been made.
- (b) A nominal scale of dividends has been provided in accordance with the attached schedule of dividends. The cash dividends shown in the schedule have been converted into bonus additions (paid-up insurance) on the basis of the AM (5) 3 ½ % table, and have been converted into premium reductions on the basis of annuities certain with 3 ½ % interest. An amount of \$40,000 has been provided in the Balance Sheet towards the payment of dividends which become due during 1938 and on account of the accrued amounts for policies on the quinquennial and deferred dividend plans where dividends will become due in later years.
- (c) There is only one participating annuity in force and dividends are not yet due on this contract.

Miscellaneous

Class of members entitled in event of discontinuance of premium payment to benefit thereafter.—Those joining on and after January 1, 1915.

Conditions as to membership, etc., under which such benefits are available.—Good standing for a period of at least three years.

Nature of benefits so granted.—Paid-up insurance payable at death to beneficiary or beneficiaries; also cash surrender values; amounts fixed by table of rates prepared by Actuary.

Valuation Balance Sheet

MORTUARY DEPARTMENT

Assets

Net ledger assets.....	\$2,391,287 11
Non-ledger assets: Interest due and accrued.....	27,170 97
Premiums due.....	25,000 00
Total Assets.....	<u>\$2,443,458 08</u>

Liabilities

Reserves.....	\$2,190,433 00
Accrued liabilities.....	19,013 88
Interest reserve.....	75,000 00
Surplus.....	159,011 20
	<u>\$2,443,458 08</u>

The basis of the above valuation was the American Men Ultimate Table of Mortality with interest at 4%.

Average rate of interest earned on ledger assets was 5.11%.

Ratio of assets to liabilities was 106.96%.

Total amount of insurance valued was \$6,379,589.00.

SICK BENEFIT DEPARTMENT

Assets

Net ledger assets.....	\$181,647 29
Non-ledger assets.....	3,344 98
Total Assets.....	<u>\$184,992 27</u>

Liabilities

Reserves.....	\$124,850 00
Accrued liabilities.....	1,019 60
Surplus.....	59,122 67
	<u>\$184,992 27</u>

Basis of valuation was as follows:

1. Sickness benefits were valued as level term annuities with interest at 3 1/4%.

(a) Males: \$7.50 per annum.

(b) Females: \$6.00 per annum.

2. Funeral benefits at the rate of \$50.00 per member payable at death were valued on the basis of the Am (5) Table with interest at 3 1/2%.

Ratio of solvency was 147%.

CHILD INSURANCE DEPARTMENT

Assets

Net ledger assets.....	\$23,730 80
Non-ledger assets.....	536 90
Total Assets.....	<u>\$24,267 70</u>

Liabilities

Reserves.....	\$10,166 00
Accrued liabilities.....	6 53
Surplus.....	14,095 17
Total.....	<u>\$24,267 70</u>

The basis of valuation was a Mortality Table constructed by Mr. Bowerman, of the United States, by extending the AM (5) Table of Mortality, which starts at age 15, backward to age 0. The rate of interest used was 3 ½ %.

Ratio of solvency was 238.6 %.

All above valuations were made by Sydney H. Pipe, Fellow of the Actuarial Society of America, and American Institute of Actuaries, and an Associate of the British Institute of Actuaries.

Valuation Balance Sheet

MORTUARY FUND

		Liabilities	
Whole life certificates:			
Value of sums assured.....		\$17,378,000	00
Value of future premiums.....		6,609,500	00
			<u>\$10,768,500</u>
Value of paid-up certificates.....			2,373,100 00
Twenty pay life certificates.....			248,000 00
Pay to age 65 life certificates.....			50,300 00
Endowment certificates maturing age 65.....			536,400 00
Family protection certificates.....			10,700 00
Twenty-year endowment certificates.....			100,000 00
Death claims under adjustment.....			141,500 00
Investment reserve.....			1,460,000 00
Surplus.....			903,600 00
			<u>\$16,592,100</u>
			<u>00</u>
		Assets	
Book value of bonds not in default.....		\$13,724,600	00
Authorized value of bonds in default.....			2,371,000 00
Accrued interest.....			203,100 00
Liens on certificates with interest.....			200,400 00
Cash.....			93,000 00
			<u>\$16,592,100</u>
			<u>00</u>

The basis of the above valuation is the AM (5) Table of Mortality with interest at 3%.
 The mortality experienced during the year 1937 was 82.4% of the mortality expected by the above table.
 The funds earned 4.89% interest during 1937.
 Ratio of assets to liabilities is 105.76%.
 Amount of insurance valued was \$35,802,038.00.

SICKNESS FUND NO. 1

		Assets	
Total assets.....			<u>\$659,761</u>
			<u>06</u>
		Liabilities

Statement of Operations of Each Fund for Year Ending 31st December, 1937

BENEFIT FUND

Balance of fund (ledger assets), December 31, 1936.....		\$323,689 67
Income for the year:		
Assessments.....	\$7,481	03
Interest.....	15,007	16
Donations.....	151	00
Total Income.....		22,639 19
		\$346,328 86
Disbursements for the year—pensions.....		3,373 20
		\$342,955 66
Deduct transfers to General Fund.....		101 25
Balance of Fund (Ledger Assets), December 31, 1937.....		\$342,854 41

*See note on page 1.

†For last actuarial valuation as at December 31, 1937, see page 151 of this Report. See also Insurance Act, R.S.O. 1937, c. 256, secs. 243 (4) and 257, re societies with membership limited to government and municipal employees.

GENERAL FUND

Balance of fund (ledger assets), December 31, 1936.....		Nil
Disbursements for the year:		
Taxes and licenses.....	\$55 00	
Rental—safety deposit box.....	20 00	
Auditors' fees.....	15 00	
Miscellaneous.....	11 25	
Total Disbursements.....		\$101 25
		<u>\$101 25</u>
Add transfers from Benefit Fund.....		101 25
Balance of Fund (Ledger Assets), December 31, 1937.....		<u><u>Nil</u></u>

Actuarial Valuation Balance Sheet for Year Ending 31st December, 1937

Assets

Ledger assets.....	\$342,854 41
Present value of future contributions by members.....	88,138 00
Present value of future contributions by city.....	88,138 00
Total Assets.....	<u><u>\$519,130 41</u></u>

Liabilities

Present value of benefits on retirement at age 50 or over.....	\$378,285 00
Present value of death, disability and withdrawal benefits.....	49,146 00
Excess of assets over liabilities.....	91,699 41
Total Liabilities.....	<u><u>\$519,130 41</u></u>

Basis of mortality in the above valuation was the AM (5) Mortality Table and Rutherford's Tables, interest being assumed at 4%.

Rates of withdrawal assumed were those indicated by the experience of the Fund.

Rates of disability under age 50 were approximately one-half of those shown by the experience of the New York Police Department for the years 1908 to 1914, graded down steeply after age 45.

Rates of retirement on half pay over age 50 were based on the experience of the New York Police Department, adjusted to the experience of the London Police Fund.

The valuation was made by J. A. Campbell, Fellow of the Actuarial Society.

Miscellaneous

Classes of members entitled in event of discontinuance of premium payment to benefit thereafter.—“Active” and “Juvenile” members.

Conditions as to membership, etc., under which such benefits are available.—Five years' membership in the case of Paid-up Insurance and 10 years' membership in the case of Cash Surrender Values.

Nature of benefits so granted.—Paid-up Insurance and Cash Surrender Values.

Particulars of distribution of surplus during last three years.—Bonus of 2% of insurance given to all “Active” and “Juvenile” members carrying Endowment Policies in 1933, 1935 and 1937 who were in good standing for 2 years, 2 years and 13 months respectively prior thereto

Actuarial Valuation Balance Sheet for Year Ending 31st December, 1937

MORTUARY FUND

Liabilities	
Net reserve on outstanding insurance.....	\$1,210,350 00
Net reserve on bonus additions.....	180,240 00
Reserve for bonus in 1939.....	20,000 00
Death claims in course of settlement.....	16,590 00
Investment reserve.....	50,000 00
Surplus of assets over liabilities.....	176,240 00
	<u>\$1,653,420 00</u>

Assets

Total ledger assets.....	\$1,623,120 00
Non-ledger assets.....	30,300 00
	<u>\$1,653,420 00</u>

Basis of valuation is the British Offices Male Experience (OM) with interest at 3 1/4%.

Amount of insurance valued was \$4,010,509.00.

Ratio of actual to expected claims on the basis of the Table of Mortality used in the valuation was 82.3%.

The rate of interest earned on the mean admitted assets of this fund was 4.62%.

SICKNESS FUND

Liabilities

Present value of benefits.....	\$53,440 00
Investment reserve.....	3,000 00
Surplus.....	11,650 00
	<hr/>
	\$68,090 00

Assets

Ledger assets.....	\$40,480 00
Non-ledger assets.....	720 00
Present value of future premiums.....	26,890 00
	<hr/>
	\$68,090 00

Valuation basis is the experience of the Manchester Unity of Oddfellows with suitable modifications, combined with mortality table deduced from the same experience, with interest at 3½%.

Number of certificates valued was 286.

JUVENILE FUND

Liabilities

Net reserve on outstanding certificates.....	\$2,320 00
Surplus.....	1,730 00
	<hr/>
	\$4,050 00

Assets

Ledger assets at market value.....	\$3,980 00
Non-ledger assets.....	70 00
	<hr/>
	\$4,050 00

Net reserve was arrived at by accumulating the net premiums to the end of 1937 without interest. This produces a considerably higher reserve than would be produced on the regular net premium basis.

Number of certificates valued was 266.

Amount of insurance in force was \$66,965.00.

All above valuations were made by M. A. Mackenzie, M.A., Fellow of the Institute of Actuaries of Great Britain.

Miscellaneous

Classes of members entitled in event of discontinuance of premium payment to benefit thereafter.—All classes of members admitted since January, 1924, and previous entries with 20 years of membership.

Conditions as to membership, etc., under which such benefits are available.—After three years of membership.

Nature of benefits so granted.—Paid-up values, loan values, cash surrender values.

Particulars of distribution of surplus during last three years.—None.

Actuarial Valuation Balance Sheet for Year Ending 31st December, 1937

MORTUARY FUND

Assets

Funds applicable to benefits.....	\$3,175,456 03
Present value of contributions.....	3,483,852 00
Sickness benefits already paid on certificates in force.....	96,227 61
Deficit.....	539,549 99
	<u>\$7,295,085 63</u>

Liabilities

Present value of benefits.....	\$7,244,419 00
Claims payable by instalments.....	10,226 63
Commuted value of disability claims.....	7,298 00
Other liabilities.....	33,142 00
	<u>\$7,295,085 63</u>

The basis of the valuation is the N.F.C. Table of Mortality with interest at 4% per annum.

Death claims were \$218,734.00 as compared to expected claims of \$238,275.00, giving a ratio of 91.8%.

Degree of solvency, 92.6%.

SICKNESS FUND

Assets

Funds applicable to benefits.....	\$346,550 91
Present value of contributions.....	764,266 00
Negative values included.....	21,646 50
	<u>\$1,132,463 41</u>

Liabilities

Present value of benefits.....	\$1,037,652 00
Surplus.....	94,811 41
	<u>\$1,132,463 41</u>

The basis of the above valuation is the N.F.C. Mortality Table with interest at 4% and the rates of sickness established in 1934. Fifty per cent of the negative values are shown as assets.

JUVENILE FUND

Assets

Funds applicable to benefits.....	\$32,398 90
-----------------------------------	-------------

Liabilities

Reserve.....	\$31,401 00
Other liabilities.....	195 00
Surplus.....	802 90
	\$32,398 90

All above valuations were compiled by J. B. Mabon, F.I.A., F.A.S.

V

APPENDICES

APPENDIX I

REVIEW OF 1938 LEGISLATION

At the 1938 session of the Legislature no important amendments to *The Insurance Act* were enacted. By section 10 of *The Statute Law Amendment Act, 1938* (Statutes of Ontario, 1938, chap. 37), the following amendment to *The Insurance Act* was effected:

10. Subsection 2 of section 276 of *The Insurance Act* is amended by striking out the word "other" in the second line and inserting in lieu thereof the word "licensed" and by adding at the end thereof the words "unless such exchange operates on the same underwriting standards," so that the said subsection shall now read as follows:

- (2) No attorney or exchange shall effect reinsurance of any risks undertaken by the exchange in any licensed reciprocal or inter-insurance exchange unless such exchange operates on the same underwriting standards.

This subsection previously prohibited reinsurance by a reciprocal exchange in any other exchange.

In addition to the above amendment effected to *The Insurance Act*, miscellaneous amendments of importance to insurers were enacted as follows:

The Highway Traffic Act

Subsection 1 of section 79 of *The Highway Traffic Act* (R.S.O. 1937, c. 17) is amended by striking out the symbol and figures "\$100" in the eighth line and inserting in lieu thereof "\$25." The effect of this amendment is to require the driver's license and owner's permit of every person who fails to satisfy a judgment rendered against him by any court in Ontario, or in any other province of Canada, for damages on account of injury to, or death of any person, or on account of damage to property in excess of \$25., to be suspended and to remain so suspended until such person gives proof of his financial responsibility. Prior to this amendment, such licenses were required to be suspended for failure to pay a judgment in excess of \$100.

The Trustee Act

By section 3 of *The Trustee Amendment Act, 1938* (Statutes of Ontario, 1938, c. 44), subsection 1 of section 37 of *The Trustee Act* was amended by adding at the end thereof the words "provided that if death results from such injuries no damages shall be allowed for the death or for the loss of the expectation of life, but this proviso shall not be in derogation of any rights conferred by *The Fatal Accidents Act*"; so that the said subsection shall now read as follows:

- (1) Except in cases of libel and slander, the executor or administrator of any deceased person may maintain an action for all torts or injuries to the person or to the property of the deceased in the same manner and with the same rights and remedies as the deceased would, if living, have been entitled to do, and the damages when recovered shall form part of the personal estate of the deceased; provided that if death results from such injuries no damages shall be allowed for the death or for the loss of the expectation of life, but this proviso shall not be in derogation of any rights conferred by *The Fatal Accidents Act*.

The effect of this amendment is to provide that no damages may be allowed the estate of a deceased person in actions by executors and administrators for injuries resulting in the death of such deceased person for the death or loss of expectation of life of the deceased. This legislation was introduced as a result of the judgment of the House of Lords in the case of *Rose vs. Ford*, reported in the 1937 Appeal Cases, 826.

The Mortgages and Purchasers Relief Act, 1938

By section 2 of this Act, *The Mortgages and Purchasers Relief Act, 1933*, is continued in force until the 30th day of June, 1939.

APPENDIX II

REPORT OF THE STANDING COMMITTEE ON VALUATION OF SECURITIES

ASSOCIATION OF SUPERINTENDENTS OF INSURANCE
OF THE PROVINCES OF CANADA

By a resolution adopted at the Fourteenth Annual Conference of the Association held in Winnipeg, Manitoba, 9th to 11th September, 1931, the Provinces of Quebec and Ontario were constituted the Association "Standing Committee on Valuation of Securities," with full power to determine the basis of valuation of securities and to publish through the Secretary, not later than 15th January in each year, the list of securities held by insurers as at the 31st December next preceding, with valuations thereof, to be used in completing annual statements.

In accordance with this resolution, your Committee has submitted each year since 1931 reports determining the basis of valuation of bonds, debentures and stocks in respect of annual statements, and subsequently issued lists of securities held by insurers, showing the values to be used by insurers in completing the said annual statements for all provinces.

With respect to valuations as of 31st December, 1937, your Committee under date of 30th December, 1937, reported as follows:

"The question of valuation of securities in respect of annual statements for the current year has been under consideration by your Committee for the past several months. Three weeks ago, your Committee attended the annual meeting of the National Association of Insurance Commissioners, when the Commissioners of Insurance of the United States agreed upon the manner in which securities should be required to be valued for the purpose of completing annual statements to the several State Departments in the United States. Your Committee is pleased to report again this year that, in its opinion, the basis of valuation approved by the National Association of Insurance Commissioners is a sound one and again recommends that, having regard to the peculiarly international character of the insurance business, with United States companies carrying on business in every province of Canada and numerous Canadian companies doing a large and increasing business in the United States, the several provinces of Canada approve the same basis of valuation as that adopted by the several states of the United States.

"Your Committee has unanimously concluded to determine that the values of bonds, debentures and stocks shall be fixed for the purpose of the provinces of Canada upon the same basis as the value of such securities has been determined by the said resolution for the states of the United States, subject only to such minor adjustments as are necessary to adapt the said basis to Canadian statutes, practice and forms.

"On or about 15th January, 1938, a List of Securities held by insurers incorporated and licensed by provincial governments, other than (a) securities permitted to be valued on an amortized basis, and (b) stocks authorized to be valued at market values as of 31st December, 1937, will be published, showing the value of each security listed to be used in completing annual statements as of 31st December, 1937, and distributed by the Secretary of the Association to all insurers, incorporated and licensed by provincial governments."

The above-referred-to resolution of the National Association of Insurance Commissioners reads as follows:—

**"RESOLUTION ADOPTED BY THE NATIONAL ASSOCIATION OF INSURANCE COMMISSIONERS
AT THE ANNUAL MEETING HELD IN NEW YORK, N.Y.,
DECEMBER 7TH AND 8TH, 1937**

"Resolved that the book on valuations of securities to be published under the auspices of the National Association of Insurance Commissioners in January, 1938, shall be prepared upon the following basis:

1. Stocks and bonds (other than those described in paragraph 2 below) shall be valued at market quotations as of December 31st, 1937, except that in the case of securities not quoted on that date the latest available information shall be used. Stock valuations shall include dividends declared or accrued.
2. Bonds of states of the United States and of provinces of the Dominion of Canada and political sub-divisions thereof shall be valued at market quotations as of December 1st, 1937; if issued subsequent to December 1st, 1937, the original offering price (cost) shall be used.

"Resolved that for the inventory of stocks and bonds in the annual statements of insurance companies and societies as of December 31st, 1937, the following basis is recommended as fair market value:

1. All bonds amply secured and not in default shall be valued on an amortized basis wherever and in the manner permitted by law.
2. All other bonds—and where amortization is not permitted by law, all bonds—should be valued as shown in the Book on Valuations of Securities published under the auspices of the National Association of Insurance Commissioners.
3. Stocks should be valued as shown in the Book on Valuations of Securities except as hereinafter provided.
4. Stocks held by life insurance companies may be valued in the aggregate at the cost or book value, whichever is lower, provided the income received by such companies on such stocks in the aggregate, during each of the five years preceding the date of valuation, shall have been at a rate sufficient to meet the interest required to maintain policy reserves and other policy obligations, and provided further that the net investment income received by such companies on their ledger assets shall not have been less than required to maintain the reserve. This shall not apply to stocks of corporations in receivership or similar status. Cost as used shall be held to include stocks received as exchanges or rights received as dividends or otherwise at not to exceed market value quoted on the date acquired.

"Further resolved that in cases where the condition of insurance companies may require the immediate disposition of securities, it is recommended that the discretion of the state supervisory officials of insurance should be exercised to vary the general formula herein set forth, so as to adopt prices reflected by the exchange."

With respect to the basis of valuation to be adopted for use by insurers as of 31st December, 1938, your Committee attended the Annual Meeting of the National Association of Insurance Commissioners held at Quebec City in June of this year. The Report of the Valuation Committee of the National Association* to that meeting was, in the opinion of your Committee, of such importance as to warrant its reprinting as an appendix to this Report.

It will be noted from a perusal thereof that the Committee was of the opinion that a study should be made with a view to the compilation of a permanent basis of average values to be adopted for use by insurers in compiling their annual statements.

Your Committee would welcome any opinion in the matter, and in this regard would draw your attention to a brief prepared on behalf of the member companies of the All Canada Insurance Federation*, in which it is recommended that the securities of all other than life insurance companies be valued at current market values irrespective of book value.

Comment thereon would also be welcome.

Your Committee has been asked if it would be possible to produce the Association's list of security values earlier than is presently the case. At the present time, the list of securities is available on or about 15th of January each year.

Your Committee would point out that the basis of valuation, following closely as it does that adopted by the National Association of Insurance Commissioners, requires that certain market values be ascertained as at 31st December of each year. Having ascertained such values as at that date, it requires at least two weeks to prepare the actual list of securities.

Therefore, without deviating from the adopted basis of values, your Committee is unable to promise an earlier production of the list.

Towards the latter part of December of this year, your Committee will recommend for adoption a basis of valuation which it is anticipated will conform closely to that which will be adopted by the National Association of Insurance Commissioners.

GEORGES LAFRANCE, *Chairman*,
On behalf of the Committee (Ontario and Quebec).

August, 1938.

*Not printed herein, but contained in the 1938 Proceedings of the Association of Superintendents of Insurance.

INDEX TO CLASSIFICATION OF FIRE INSURANCE RISKS

CLASS NO.	NON-HAZARDOUS	CLASS NO.	
2.	Barns and Stables, Private, other than farm.	140.	Mercantile Stocks—Hardware, Iron and Steel Bars and Piping, Cutlery, Surgical Instruments, Machinery, Belting, Mill Equipment, Supplies, Stoves, Tinware, House Furnishings, Wooden, Willow and Basketware, retail.
4.	Churches and Chapels.	142.	Mercantile Stocks—Hardware, Iron and Steel Bars and Piping, Cutlery, Surgical Instruments, Machinery, Belting, Mill Equipment, Supplies, Stoves, Tinware, House Furnishings, Wooden, Willow and Basketware, wholesale.
6.	City and Town Halls, Courthouses, State Capitols, Armories, Fire Department Houses, Libraries (Public), Museums of Art, and Natural History.	146.	Household Furniture in Mercantile Buildings.
8.	Colleges, Universities, Boarding Schools, Convents, Schools and Academies, with or without dormitories.	154.	Mercantile Stocks—Liquors and Wines, wholesale.
10.	Dwellings without Barns or with Barns Attached (excluding seasonal and farm risks), Apartment and Flat Houses, Palatial Dwellings. (Apartment Houses having one general Dining-room, classify with Hotels; see 620.)	156.	Lodge and Society Rooms (Masonic, Oddfellows, etc.), Contents only.
14.	Dwellings and Outbuildings—Summer or Winter only.	160.	Mercantile Stocks — Miscellaneous, wholesale and retail.
16.	Farm Risks (buildings and contents), including Live Stock.	164.	Mercantile Stocks—Millinery, Feathers, Artificial Flowers, wholesale.
22.	Garages (private).	168.	Offices and Banks, Telephone Exchanges, Buildings and Contents.
24.	Hospitals, Sanatoriums, Asylums (Deaf, Dumb, Blind, Orphan), Homes for the Aged.	176.	Restaurants, Contents only.
	MERCANTILE	180.	Saloons (Liquor), Contents only.
101.	Mercantile Buildings (including those with public hall or lodge rooms above), except 103 (see 168, 200, 184 and 186).	184.	Stores, Country (Remote or Crossroad), usually of moderate or small values, Buildings and Contents.
103.	Mercantile Buildings with Wholesale Occupancy exclusively.	186.	Stores, General (Village or City), including Department Stores, Contents only.
102.	Mercantile Stocks—Agricultural Implements, Automobile and Carriage Sales-rooms.	196.	Mercantile Stocks—Tobacco, Cigars, Smokers' Articles, wholesale.
110.	Mercantile Stocks—Boots and Shoes, retail.	197.	Wharf Risks, Ferry Houses, Contents.
112.	Mercantile Stocks—Boots and Shoes, Leather Goods (Hides, Harness and Trunks), Rubber Goods, wholesale.	200.	Mercantile Buildings, Retail Occupancy, with Dwellings only above Grade Floor.
114.	Mercantile Stocks—Clothing, Hats, Caps, Furs and Men's Furnishings, retail, Merchant Tailor, Regalia, Costumer and Dressmaking.		WAREHOUSES
116.	Mercantile Stocks—Clothing, Hats, Caps, Furs and Men's Furnishings, wholesale.	254.	Cold Storage, Contents only.
124.	Mercantile Stocks—Drugs, Chemicals and Medicines, retail.	256.	Cotton (no compressing), Building and Contents.
126.	Mercantile Stocks—Drugs, Chemicals and Medicines, wholesale.	260.	General Storage, not specifically classed, Contents only.
128.	Mercantile Stocks—Dry Goods, Woollens, Carpets and Notions, Chinese and Japanese Goods, retail.	266.	Fibres (other than Cotton and Wool and Tobacco), Contents only.
130.	Mercantile Stocks—Dry Goods, Woollens, Carpets and Notions, Chinese and Japanese Goods, wholesale.	268.	Household Furniture, Contents only.
132.	Mercantile Stocks—Furniture, Musical Instruments, Music, Undertakers' Establishments, Photographers' Supplies, Optical and Scientific Goods, retail.	276.	Tobacco, Building and Contents.
136.	Mercantile Stocks—Groceries, Meat, Fish, Butter, Cheese, Eggs, Fruit and Produce, retail.	278.	Whiskey, Building and Contents.
138.	Mercantile Stocks—Groceries, Meat, Fish, Butter, Cheese, Eggs, Fruit and Produce, wholesale.	280.	Wool, Contents only.
			MANUFACTURING SPECIALS
			WOODWORKERS
			(Building and Contents)
		300.	Agricultural Implement Factories, and other Factories having woodworking (principally hard) in conjunction with ironwork, painting, etc., such as Carriage, Bed Spring, Incubator, Refrigerator, Sewing Machine and Wringer Factories, and Car Works.

APPENDIX IV—Continued

INDEX TO CLASSIFICATION OF FIRE INSURANCE RISKS—Continued

CLASS NO.	CLASS NO.
302. General Woodworking, without power, including Carpenter and Cabinet Shops, Looking Glass and Picture Frame Factories, Cooper Shops.	370. Cereal Mills—Grist and Feed Mills and Rice Mills.
304. General Woodworking, with power and without finishing, Chair, Pail, Tub, Tank, Bobbin, Ladder, Wooden Toy Factories, Match Factories, Moulding, Turning, Wheel, Hub, Spoke and Spool Factories—Carpenter Shops with power.	372. Chemical Works of the milder hazards.
306. Furniture, Organ, Piano, Graphophone, Rattan, Wooden Trunk, Casket and Billiard Table Factories—Clock Factories if with woodworking.	374. Chemical Works of hazardous nature or with explosive hazard.
308. Marine Railways, Shipyards, Boat Building, Dry Docks.	386. Clothing, Cap and Overall Factories—Tent, Awning, Sail and Rigging Lofts.
316. Planing Mills, Sash, Door, Blind and Wooden Box Factories—Dry Houses for Lumber.	388. Coal Breakers and Mining Buildings—Anthracite.
318. Saw Mills.	390. Coal Tipples and Top Works—Bituminous.
320. Shingle, Stave, Lath, Veneer and Kindling Wood Mills—Excelsior Factories.	394. Collar, Cuff, Shirt, Corset, Waist and other White Goods Factories.
METAL WORKERS	
(Building and Contents)	
322. Automobile Factories.	396. Confectionery, Chocolate and Chewing Gum Factories.
324. Heavy Metal Workers Generally—Foundries for Iron, Brass, Type Work and Stoves—Furnaces, Rolling Mills, Machine Shops (with Foundries connected)—Boiler Shops, Nut and Bolt Works, Bicycle and Firearms Factories, Locomotive Works, Wireworking and Drawing, Machine Shops without Foundries.	402. Cotton Gins.
326. Light Metal Workers generally—Hardware Factories for manufacturing Cutlery, Copper or Brassware, Axes, Tools, Nails, Tacks, Pins and Needles—also Clock Factories if no woodworking, Jewellery, Watch, Dental, Scientific and Surgical Instrument Factories, Miscellaneous Metal Workers, not otherwise specified, Silver, Aluminum and Tableware Factories—Electro-plating.	404. Cotton Mills (Full Process).
338. Stamping Works—Tin, Hollowware, Iron Bedstead, Gas Fixtures, Lamp and Iron Toy Factories—Japanneries.	406. Creameries, Powdered and Condensed Milk, Caseine and Cheese Factories.
OTHER OCCUPATIONS	
(Building and Contents)	
346. Bakeries and Macaroni Factories.	412. Distilleries and Rectifying Works (Steam).
350. Bleacheries, Dye and Print Works.	416. Electric Light and Power Plants (when separately insured), Water Works and Pumping Stations—Filtration Plants.
352. Boot, Shoe, Slipper, Heel and Counter Factories.	418. Fertilizer and Phosphate Factories.
354. Breweries.	420. Flour Mills.
356. Brush and Broom Factories.	424. Fur Hat, Fur Cutting, Forming and Dressing Mills.
358. Canneries—Canning and Preserving Works for Fruit, Vegetables and Fish.	426. Glass Works.
366. Celluloid Works—Celluloid and Celluloid Goods Factories.	430. Grain Elevators and Warehouses—Terminal.
368. Cement Mills.	432. Grain Elevators and Warehouses—Country.
	438. Hemp and Jute Mills—Cordage and Baggging Factories—Waste and Shoddy Mills, Carpet Lining and Batting Factories.
	442. Ice Factories.
	446. Laundries (Hand or Power)—Cleaning Establishments.
	450. Leather Goods Factories (except Boot and Shoe), such as Harness, Saddlery, Pocketbook, Glove, Bag, Leather Trunk, Whip and Sporting Goods.
	452. Malt Houses.
	458. Mining Risks (other than Coal, including Mining Dredges).
	460. Miscellaneous Manufacturing Establishments, not otherwise classified.
	464. Oil Works—Vegetable.
	466. Oil—Vegetable—in tanks.
	468. Oil Works—Fish.
	470. Oil Works—Minerals—Refineries, Oil Derricks, Pipe Lines.
	472. Oil—Mineral—in Tanks or Sumps.
	474. Packing Houses, Slaughtering, Rendering, Oleomargarine, Lard, Candle, Crude Glycerine and Glue Works.
	476. Paint, Varnish, White Lead and Oil Colour Works—Turpentine Refineries, Printing Ink Works.
	480. Paper, Pulp, Leather Board and Straw Board Mills.
	484. Potteries, Brick, Tile, Plaster and Crucible Works—China Decorating.
	486. Printing Establishments, Lithographers, Book Binderies.

APPENDIX IV—*Concluded*INDEX TO CLASSIFICATION OF FIRE INSURANCE RISKS—*Concluded*

CLASS NO.	CLASS NO.
490. Rubber Mills—Including Manufacture of Rubber Goods and Clothing.	636. Garages (public).
492. Salt Works.	642. Hay Presses and Barns. <i>Hotels, see 620 and 622.</i>
494. Silk Mills.	648. Ice Storage Houses.
498. Soap Factories (when insured separately from Packing Houses or other plants).	650. Lumber Yards, Wholesale and Mill.
502. Sugar Houses.	652. Lumber Yards, Retail.
504. Sugar (Cane and Beet) Refineries.	654. Marble and Stone Yards with Power and Mills (not stone crushers).
506. Tanneries—(Heavy Leather).	656. Miscellaneous Non-manufacturing Specials not otherwise classified.
508. Tanneries — (Light Leather, Currying Shops, Morocco Works and Leather-making generally without japanning).	670. Steam Railway Risks—(excluding Merchandise for other parties in Freight Houses), Street Railway and Traction Properties, including Storage and Operating Houses.
510. Tanneries—(Light), with Japanning or Enamelling.	672. Steamers, Vessels, Tugs, Ferry Boats, Marine Dredges, Yachts—Shipping in Port or Laid Up.
514. Tobacco, Cigar, Cigarette and Snuff Factories.	674. Stock Yards.
516. Tobacco Stemmeries, Prizeries and Re-handling Houses.	680. Theatres and Opera Houses, Moving Picture Houses.
522. Weaving and Knitting Mills (no Preparatory Process), Embroidery and Lace Curtain Factories.	682. Tobacco Barns.
526. Wineries.	686. Tobacco-curing Barns Using Artificial Heat.
528. Woollen Mills (full process)—all Wool or Mixed Stocks, Worsted, Carpet, Knitting, Felting, Wool Hat Factories.	
533. Pulpwood in connection with mills.	
534. Pulpwood, Cordwood, Ties, Bark or Logs, when in bush or beside railway tracks.	
MISCELLANEOUS	
	702. Floaters, except Automobile and Cotton.
	703. Grain Growing in Fields.

	862. Cereal, Flour and Rice Mills and Elevators.
	866. Textile and Cloth Workers.
	886. Miscellaneous Manufacturing Specials not otherwise classified.
	952. Miscellaneous Non-manufacturing Specials.
	956. Street Railway and Traction Properties
NON-MANUFACTURING SPECIALS	
	(Building and Contents)
604. Asylums—Insane and Inebriate, Poor Farms and Alms Houses, Jails, Prisons, Penitentiaries and Reform Schools.	
606. Barns and Stables (public)—Livery, Sales, Bus, Express, Hotel and Boarding.	
617. Builders' Risks—Buildings in Process of Construction.	
620. Club Houses (city), Y.M.C.A., Y.W.C.A.—Gymnasiums and Hotels and Boarding Houses (all the year round).	
622. Club Houses (country), Boat and Bath Houses, Yacht and Rowing Clubs, Hotels and Boarding Houses (Summer or Winter only).	
624. Coal and Wood Yards, Coal Trestles.	
626. Cotton Compresses, with Warehouses with Platforms if communicating therewith.	
628. Cotton Yards and Platforms, when not communicating with Compress.	
630. Exhibition Buildings, Carousels, Rinks, Fair Grounds, Race Tracks, Ball Grounds and Similar Amusement Properties.	

APPENDIX V

RE "THE AUTOMOBILE INSURANCE ACT" AND STANDARD FORMS

(Note.—The following is an extract from the "Foreword" and "Table of Contents" of the pamphlet containing the Automobile Insurance "Standard Forms" recommended to the Association of Superintendents of Insurance of the Provinces of Canada by the Committee of Underwriters and approved for use under the uniform automobile insurance Acts in all provinces [except Quebec]. This foreword replaces the "Letter of Transmittal and Approval" dated August 1st, 1936.)

ASSOCIATION OF SUPERINTENDENTS OF INSURANCE
OF THE PROVINCES OF CANADASTANDING COMMITTEE ON
AUTOMOBILE INSURANCE STANDARD FORMS

This pamphlet (as amended to date) contains the automobile insurance "Standard Forms" (not printed in this Report) which have been recommended to the Standing Committee on Automobile Insurance Standard Forms of this Association by the Committee of Underwriters for use under *The Uniform Automobile Insurance Act*. The Standing Committee has concurred in the recommendations of the Committee of Underwriters, and the "Standard Forms" and "General Instructions" which follow herein (not printed in this Report) have been placed on file with the Superintendent of Insurance or other supervising official in every province of Canada (except Quebec). In accordance with the agreement entered into between all provinces such approval and filing automatically carries approval under the uniform Act in all provinces.

All application, endorsement and policy forms not included herein must be filed with the Superintendent in each province for special approval in strict conformity with the Act.

Complete information as to the work of the Standing Committee of this Association and as to the proceedings, personnel, etc., of the Committee of Underwriters will be found in the "Minutes of Proceedings" of the Annual Conferences of the Association.

Additional copies of this loose-leaf booklet of "Standard Forms" and of new or reprinted pages may be obtained at cost direct from the printers, Thompson and Sons, Limited, 384 Adelaide Street West, Toronto.

All communications respecting automobile insurance Standard Forms should be addressed to Mr. John Edwards, F.C.A.S., Actuary, Ontario Insurance Department, Parliament Buildings, Toronto, who is Secretary of the Committee of Underwriters and of the Standing Committee on Automobile Insurance Standard Forms.

HARTLEY D. McNAIRN,
Chairman.

August 2nd, 1937.

STANDARD FORMS

Revised to August 2nd, 1937

I. ENDORSEMENT FORMS:

- (1) Passenger Hazard Included Endorsement.
- (1a) Restricted Passenger Hazard Endorsement.
- (2) Drive Other Automobiles Endorsement (Restricted Form).
- (2a) Drive Other Automobiles Endorsement (Broad Form).
- (3) Employer's Liability Endorsement (Named Employees).
- (3a) Employer's Liability Endorsement (Employees not Named).
- (4) Permission to Carry Explosives Endorsement.
- (5) Permission to Rent or Lease Endorsement.
- (6) Permission to Carry Passengers for Compensation or Hire Endorsement.
- (7) Inclusive Coverage Endorsement.
- (8) Automobile Plate Glass Endorsement.
- (9) Trailer Endorsement.
- (10) Farmer's Truck Endorsement.
- (11) Automobile Salesmen and Garage Employees Policy Written at Private Passenger Car Rates Endorsement.
- (12) Additional Coverage Endorsement.
- (13) Deleted Coverage Endorsement (Insured's Form).
- (13a) Deleted Coverage Endorsement (Insurer's Form).
- (14) Funeral Director's Endorsement.
- (15) Substitution or Addition of Automobile Endorsement.
- (16) Winter Cancellation Endorsement.
- (17) Reinstatement of Winter Cancellation Endorsement.
- (18) Radio Endorsement.
- (19) \$50 Deductible Property Damage Endorsement.
(Commercial and Public Automobiles.)

- (20) More Automobiles than Operators Endorsement.
- (21) Automatic Coverage Endorsement. (Fleets.)
- (22) Motorcycle Endorsement. (Theft.)
- (23) Mortgage Endorsement.
- (24) Fire Apparatus Endorsement.
- (25) Alteration Endorsement.
- (26) Additional Insured Endorsement (Garage Payroll Form).
- (27) Automobile Service Station Endorsement (Garage Payroll Form).
- (28) Excluding Named Person Endorsement.
- (29) Named Chauffeur Endorsement.
- (30) Storage Garage Endorsement.
- (31) Open Air Parking Station Endorsement.
- (*32) Miscellaneous Automobile Coverages Endorsement (effective June 1st, 1938).

II. APPLICATION FORMS:

- (1) Owner's Form.
- (2) Driver's Form.
- (3) Application and Agreement for Winter Cancellation.
- (4) Garage Payroll Form.

III. POLICY FORMS:

- (1) Owner's Form (revised July 1st, 1935).
- (2) Driver's Form.
- (3) Standard Automobile Renewal Certificate.
- (4) Garage Payroll Form.

*NOTE: Inasmuch as the book of "Standard" forms was not revised in 1938 because one new form only was added, the date shown for the last revision is given on the preceding page as August 2nd, 1937.

APPENDIX VI

AUTOMOBILE INSURANCE LOSS-COST EXPERIENCE IN ONTARIO
FOR POLICY YEARS 1933, 1934, 1935, 1936 AND 1937.

The following statistical tables, numbered 1 to 13, inclusive, have been filed by the Canadian Underwriters' Association, the statistical agency designated to compile the Ontario Automobile Insurance Loss-Cost Experience pursuant to Section 72 of *The Insurance Act*.

Tables 1 (a) (b) (c). Private Passenger Public Liability Experience in Ontario for the complete policy years 1933, 1934, 1935 and 1936, and the incomplete policy year 1937, developed as of June 30th, 1938.

Table 1 (a) furnishes experience covering "passenger hazard" only, and Table 1 (b) public liability, excluding passenger hazard. Table 1 (c) includes both classes of coverage shown in Tables 1 (a) and (b). Table 1 (a) for 1935, 1936 and 1937 shows passenger hazard experience on cars insured in Ontario where such accidents occur outside the Province (extra territorial), since the 1935 amendment to Section 47 (2) of *The Highway Traffic Act* practically removed all of the liability on owners and drivers in Ontario respecting liability for injuries to "guest" or "gratuitous" passengers. These public liability tables, particularly as to Table 1 (c), clearly indicate that public liability insurance in Ontario on the whole has been written at a loss to insurers during the past five years. (Reference: Table 1 (c), column 9.)

Table 2. Private Passenger Property Damage Liability Experience in Ontario for the complete policy years 1933, 1934, 1935 and 1936, and the incomplete policy year 1937, developed as of June 30th, 1938.

A definite upward trend is indicated in the private passenger property damage loss-cost experience. Column 9 of the table indicates also that 1936 and 1937 were unprofitable years for insurers for this coverage.

Tables 3 and 4. Private Passenger Collision Experience in Ontario for the complete policy years 1933, 1934, 1935 and 1936, and the incomplete policy year 1937, developed as of June 30th, 1938.

It will be seen by reference to Table 3, column 2, that collision coverage has become much more popular the last three years; in fact the number of motorists carrying some form of collision insurance coverage has tripled during the last four years. The most popular form of collision coverage appears to be \$50 deductible (see Table 4), and it is noted that collision insurance on private passenger cars is presently unprofitable to insurers. (See column 9, Table 3.)

Table 5. Private Passenger Automobile Fire Damage Experience in Ontario for the complete policy years 1933, 1934, 1935 and 1936, and the incomplete policy year 1937, developed as of June 30th, 1938.

By reference to Table 5, it will be seen that the experience on private passenger cars insured against fire continues to be favourable, which is reflected in column 9 of the Table. The average private passenger fire premium collected for 1937 was only \$2.64 a year for each insured vehicle, compared with \$4.14 in 1933. At the reduced average premium in 1937 the loss-ratio (column 9) still continues very favourable to insurers.

Table 6. Private Passenger Theft Experience in Ontario for the complete policy years 1933, 1934, 1935 and 1936, and the incomplete policy year 1937, developed as of June 30th, 1938.

By reference to Table 6 it will be seen that the experience on private passenger cars insured against theft also continues to be favourable, as well as the automobile fire (shown in Table 5). The average premium in 1937 collected by insurers for this coverage works out at approximately \$1.86 per insured vehicle, compared with approximately \$2.64 per car in 1933.

Tables 7-11, inclusive. Commercial Automobile Insurance Experience in Ontario for the complete policy years 1933, 1934, 1935 and 1936, and the incomplete policy year 1937, developed as of June 30th, 1938.

On account of lack of sufficient volume the experience reported for commercial vehicles is merely a guide and is not very reliable for the purpose of rate-making. These Tables show separately the coverages for Commercial Public Liability, Property Damage, Collision, Fire and Theft.

Tables 12 and 13. Public Vehicles (All Classes), Fleets, Garages, Automobile Dealers and Manufacturers. Experience in Ontario for the complete policy years 1933, 1934, 1935 and 1936, and the incomplete policy year 1937, developed as of June 30th, 1938.

These Tables show the premiums earned, losses incurred, with the resultant percentage of losses incurred to such premiums earned for the five-year period, 1933 to 1937, inclusive.

*During 1928, 1929 and 1930 insurers permitted a discount from the above rates of 10 per cent when all five forms of coverage were insured under one policy, viz.: Public Liability, Property Damage, Collision, Fire and Theft. If three coverages were insured under the one policy, viz.: Public Liability, Property Damage and Collision, a discount of 5 per cent was allowed.

†Deduct from the combined 1933 Public Liability and Property Damage Rates 10 per cent for "no claims bonus" allowed for 12 months accident-free record. After April 15th, 1933, the "no claims bonus" was changed to 10 per cent discount for 12 months accident-free record, 15 per cent discount for 24 months accident-free record, and 20 per cent for 36 months accident-free record.

In 1937 the "no claims bonus" applicable to Public Liability and Property Damage was discontinued.

APPENDIX VIII

CERTAIN MEMORANDA, RULINGS, ETC., ISSUED BY THE
SUPERINTENDENT OF INSURANCE

MEMORANDUM

C.24.—1937.

Toronto, Ont.,
October 1st, 1937.To: All Insurers licensed to transact Other than
Life Insurance in the Province.From: Hartley D. McNairn, Esq.,
Superintendent of Insurance, Ontario.*Re Extra-territorial Agents.*

During the recent Conference in Toronto of the Association of Superintendents of Insurance of the Provinces of Canada, a Private Executive Session was held, at which the question of licensing requirements for extra-territorial agents was discussed.

The particular case under discussion was that of an Ontario agent who was handling the automobile business of a finance company whose interests extend to most of the Provinces of Canada. The agent in question, however, was licensed in Ontario only.

As a result of the discussion it was held that an extra-territorial agent should be licensed in all provinces where the business he writes is located. The agent in question held that, as the head office of the finance company was located in the Province of Ontario, the risks he was covering for the finance company should be described as being in Ontario. Such is not the case, however, as the insurance risks to be covered by the agent are the automobiles located in several provinces which are sold on the instalment plan and financed by the finance company.

Kindly take notice, therefore, that an agent resident in any other province of Canada or state of the United States who writes business on property or risks situate in the Province of Ontario, whether such business is obtained directly or through a finance company, must be licensed as an insurance agent in this Province, and that no insurance company and no agent thereof and no broker may pay commission to any non-resident agent or broker for placing business on property or risks in Ontario who, at the date thereof, is not licensed to transact business within Ontario.

I should be obliged if you would communicate the contents of this memorandum to your branch offices and agents in the Province.

HARTLEY D. MCNAIRN,
Superintendent of Insurance.

Circular No. 14, 1938.

Toronto, June 2nd, 1938.

To: All Insurers transacting other than
Life Insurance in Ontario.

From: The Superintendent of Insurance.

*Re Customers' Insurance Contracts
(Other than fur dealers and fur storers)*

The following recommendation of the Joint Committee on Definitions and Interpretation of Underwriting Powers of Fire, Marine and Casualty Insurers has been forwarded to this Department in connection with insurance written which is referred to above:

"It has become the practice of certain insurers to issue to wholesalers and/or retailers of merchandise Master Open Policies under which wholesalers and/or retailers have issued Certificates of insurance to purchasers of their merchandise, such Certificates insuring the purchasers for a definite period after cash payment for the merchandise has been made to the wholesaler and/or retailer, the merchandise having become entirely the property of the purchaser and the wholesaler and/or retailer having no insurable interest whatsoever in same.

"It is recommended by the Committee, after full consideration, that instructions be issued by the Superintendents of Insurance to all insurers that the issuance of such Policies be discontinued, that existing Policies be cancelled, that no further Certificates be issued after the date of cancellation of such policies, and that those Certificates which have been issued be permitted to run to expiry, but be not renewed."

I have concurred in the above recommendation, and you are requested to adjust your business accordingly.

The type of sales referred to above includes the sale of Wearing Apparel (other than furs), Jewellery and Sporting Goods. Purchasers of such goods referred to may individually apply for insurance through their own Insurance Broker or Agent, or by making application direct to any licensed insurer.

Concerning insurance on furs, it is expected that further instructions will be issued shortly.

HARTLEY D. MCNAIRN.

8/W

Circular No. 24, 1938.

To: All Insurers licensed to transact other than
Life Insurance in the Province of Ontario.

From: The Superintendent of Insurance.

*Re Personal Fur Insurance Policy
(Furriers' and/or Fur Storers' Customers' Policies)*

For some time the Department has received complaints regarding insurance on furs, particularly with respect to insurance on furs stored by customers. In view of the fact that this type of insurance is usually written by insurers on certificates issued under master contracts, it has been deemed advisable to consider a "standard" form of policy which may be delivered to individual customers.

Accordingly, a special committee was invited to draft a specimen form of contract which may be used for this type of coverage. A recommended form has now been received. The recommended form has been approved and is enclosed herewith for use by insurers which write this type of property insurance.

Insurers are reminded that with respect to the issuance of fur policies to customers, etc., the provisions of Section 90 of *The Insurance Act (Ontario)* reading as follows should be complied with:—

"90.—(1) Every policy shall contain the name and address of the insurer, the name, address, occupation or business of the insured, the name of the person to whom the insurance money is payable, the premium for the insurance, the subject matter of the insurance, the indemnity for which the insurer may become liable, the event on the happening of which such liability is to accrue, and the term of the insurance."

Copies of the form may be obtained direct upon application to the printers, Thompson & Sons, Ltd., 384 Adelaide St. West, Toronto, who are in a position to supply you immediately at the prices shown in their letter, which is also attached hereto.

Toronto,
August 9th, 1938.

HARTLEY D. MCNAIRN.

APPENDIX IX

REPORT OF QUARTERLY RETURN OF AGENTS' BALANCES
(OTHER THAN LIFE INSURANCE)
AS OF SEPTEMBER 30TH, 1938

To the Members of the Special Committee of the Association of Superintendents of Insurance of the Provinces of Canada:

In accordance with the request of your Committee, we beg to submit a further Comparative Report of the results obtained by Ontario in calling for the Quarterly Return of Agents' Balances more than ninety days overdue for the five quarterly periods, September 30th and December 31st, 1937, March 31st, June 30th and September 30th, 1938.

This Report is prepared as of November 4th, 1938, when thirteen companies and nineteen general agents had filed no return.

1. *Completeness of Data:* The following table shows the number of companies filing returns and the number which made "NIL" returns at each period.

Period Ending	No. of Companies Asked to File Returns	No. not Complying	No. of "NIL" Returns
Sept. 30th, 1937.....	258	8	87
Dec. 31st, 1937.....	259	11	92
Mar. 31st, 1938.....	257	9	78
June 30th, 1938.....	255	6	85
Sept. 30th, 1938.....	256	13	56

The following table shows the number of general agents filing returns and the number which made "NIL" returns at each period.

Period Ending	No. of General Agents Asked to File Returns	No. not Complying	No. of "NIL" Returns
Sept. 30th, 1937.....	83	18	42
Dec. 31st, 1937.....	81	22	33
Mar. 31st, 1938.....	74	12	32
June 30th, 1938.....	73	12	34
Sept. 30th, 1938.....	73	19	18

2. *Number of Agents Reported in Returns:* The following table shows the number of agents reported and by how many offices for the five periods. The figures for September 30th and December 31st, 1937, March 31st, June 30th and September 30th, 1938, include the agents reported on the returns of general agents. A comparison of the figures outstanding will be found in paragraph 5.

TABLE "A"

Number Reported by	PERIODS ENDING				
	1937		1938		
	Sept. 30th	Dec. 31st	Mar. 31st	June 30th	Sept. 30th
One company.....	761	550	614	531	686
Two companies.....	187	98	138	150	222
Three ".....	84	32	54	62	77
Four ".....	45	19	23	15	38
Five ".....	18	14	20	12	25
More than 5 companies.....	28	13	21	23	35
More than 10 ".....	7	2	3	2	6
More than 20 ".....	1
Totals.....	1,131	728	873	795	1,089

TABLE "B"

Number Reported by	PERIODS ENDING			
	1937	1938		
		Dec. 31st	Mar. 31st	June 30th
One company.....	212	242	204	234
Two companies.....	28	30	32	47
Three.....	11	8	12	9
Four ".....	2	...	3	7
Five ".....	1	2	1	4
More than 5 companies.....	4	6	4	6
More than 10 ".....	1	2	1	2
More than 20 ".....	1	...	1	...
Totals.....	260	290	258	309

NOTE:—The majority of those agents included in Table "B" also appear in Table "A".

3. *Aggregate Amount of Balances Overdue:* The following table shows the aggregate amount of balances reported by the *companies only*, as ninety days or more overdue for the five periods.

Period Ending	Amount Outstanding			Increase or Decrease Over Preceding Period
	New	Old	Total	
Sept. 30th, 1937.....			\$362,970 62	\$94,823 37
Dec. 31st, 1937.....	\$202,599 33	\$112,554 78	315,154 11	\$47,816 51
Mar. 31st, 1938.....	186,174 30	126,112 95	312,287 25	2,866 86
June 30th, 1938.....	141,379 17	111,057 06	252,436 23	59,851 02
Sept. 30th, 1938.....	260,564 57	119,673 73	380,238 30	127,802 07

4. *Amount Reported by General Agents:* The amount of balances reported by general agents as being ninety days or more overdue from sub-agents or brokers or other persons from whom they accept business and to whom they pay commission was as follows (for the five periods).

Period Ending	Amount Outstanding			Increase or Decrease Over Preceding Period
	New	Old	Total	
Sept. 30th, 1937.....			\$50,140 17	\$29,042 41
Dec. 31st, 1937.....	\$59,932 61	\$10,672 82	70,605 43	20,465 26
Mar. 31st, 1938.....	26,301 40	21,112 95	47,414 35	\$23,191 08
June 30th, 1938.....	33,104 85	16,954 86	50,059 71	2,645 36
Sept. 30th, 1938.....	44,688 89	14,700 99	59,389 88	9,330 17

5. *Comparison of Number of Agents Reported in the Five Periods:* i.e., September 30th and December 31st, 1937, March 31st, June 30th and September 30th, 1938.

Period Ending	Under \$1,000	Over \$1,000	Over \$2,000	Over \$3,000	Over \$4,000	Over \$5,000	Over \$10,000	Over \$20,000	Total
Sept. 30th, 1937....	1,051	37	22	9	5	7	1,131
Dec. 31st, 1937....	688	23	7	3	2	3	1	1	728
Mar. 31st, 1938....	835	22	9	2	1	3	1	...	873
June 30th, 1938....	759	20	10	5	1	795
Sept. 30th, 1938....	1,022	48	9	4	1	5	1,089

NOTE:—These figures represent all agents reported in the returns prior to December 31st, 1937, but only those reported for "current" balances for the periods ending December 31st, 1937, March 31st, June 30th and September 30th, 1938. For agents reported as having balances more than six months overdue, see the following table:

Period Ending	Under \$1,000	Over \$1,000	Over \$2,000	Over \$3,000	Over \$4,000	Over \$5,000	Over \$10,000	Over \$20,000	Total
Mar. 31st, 1936....	253	19	6	3	2	5	2	...	290
June 30th, 1936....	224	18	5	3	2	4	2	...	258
Sept. 30th, 1936....	275	18	5	5	2	3	1	...	309

It must be understood that a number of agents have been reported for both "current" and "old" balances and necessarily will appear in both tables. The actual number of agents reported, therefore, will be less than the total of the two tables.

6. *Analysis of Agencies by Territories and by Amounts of Balances Owning:* The following table shows an analysis of the quarterly returns, wherein the Province is divided into *five districts* and the premiums reported as "under \$1,000," "over \$1,000," "over \$2,000," etc.

TABLE "A"

Statement of the number of agents with balances ninety days but *not more than six months* in arrear, as of September 30th, 1938.

Location	Under \$1,000	Over \$1,000	Over \$2,000	Over \$3,000	Over \$4,000	Over \$5,000	Over \$10,000	Over \$20,000	Total
Toronto.....	331	16	6	3	1	4	361
Hamilton.....	42	3	45
London.....	24	3	1	28
Windsor.....	24	24
Ottawa.....	49	6	1	1	57
Elsewhere.....	552	20	1	1	574
Totals.....	1,022	48	9	4	1	5	1,089

TABLE "B"

Location	Under \$1,000	Over \$1,000	Over \$2,000	Over \$3,000	Over \$4,000	Over \$5,000	Over \$10,000	Over \$20,000	Total
Toronto.....	101	8	3	2	2	2	1	...	119
Hamilton.....	13	...	1	14
London.....	11	11
Windsor.....	6	1	7
Ottawa.....	22	2	24
Elsewhere.....	122	8	1	3	134
Totals.....	275	18	5	5	2	3	1	...	309

7. On the street, one hears it said that agents' accounts are more difficult to collect today than six months ago, and a study of the figures in this Report will make it appear that there is some truth in the rumour. The total of "new" and "old" balances reported for the period under discussion compared with the amounts reported as outstanding six months ago, shows an increase of almost \$70,000, and compared with the figures of June 30th there is an increase of \$127,000. These figures take into consideration only the amounts reported outstanding by the insurance companies. The general agents show an increase for the preceding period of \$9,000, which does not take into account \$16,000 reported as outstanding by one general agent whose return reached the Department too late for inclusion in this Report; in other words, since June 30th, collections have fallen off by \$152,000, and the total amount outstanding more than ninety days on the books of the companies and general agents in Ontario has reached the astounding figure of \$455,000, which is not a good record. This is regrettable, as latterly we have been led to suppose that conditions were improving, but it is quite apparent that the reverse is the case.

8. In the matter of filing returns, there has been considerable improvement on the part of the majority of the companies and general agents, and our thanks are due to those who have strictly complied with these periodic requests for information. We realize that it is a difficult matter always to file returns asked for by the several Departments of Insurance, but at the same time we consider that the companies are receiving some return for their labour in that, although there has been a recession during the past quarterly period, conditions have improved greatly since the returns were first filed in 1934. A number of companies and general agents failed to make returns for the current period, but looking over the list of companies we find that they are, almost without exception, companies which do not appoint agents in the Province. The general agents, on the other hand, are appointing sub-agents for the most part and should have filed returns. Disciplinary action with reference to these general agents is being considered.

9. In conclusion, we would point out that two of the inspectors of the Department are working with the Agency Branch, and part of their time will be devoted to inspecting the books of agents who have been reported by a number of companies and for large amounts. From time to time a number of agents have been brought before the Advisory Board as a result of investigation which has followed the filing of these returns. It is our intention to continue this work, and our hope is that the returns for the period ending December 31st, 1938, will show a considerable improvement in the amounts reported in arrear more than ninety days.

HARTLEY D. McNAIRN,
Superintendent of Insurance.

Toronto, Ont.,
November 10th, 1938.

APPENDIX X

UNDERWRITERS' AGENCIES

The following insurers have been licensed to issue policies through the underwriters' agencies noted after their respective names for the term ending June 30th, 1938:

Company	Agency
Norwich Union Fire Insurance Society, Limited.....	British and Canadian Underwriters' Agency.
Lumbermen's Mutual Casualty Company.....	} Canadian Motor Underwriters' Agency.
Central Manufacturers' Mutual Fire Insurance Company.....	
Westchester Fire Insurance Company.....	Delaware Underwriters' Agency.
Scottish Union and National Insurance Company.....	Edinburgh Underwriters' Agency.
Home Insurance Company.....	Home Underwriters' Agency.
London Assurance.....	London Underwriters' Agency.
Insurance Company of North America.....	Montreal Underwriters' Agency.
Home Insurance Company.....	Nova Scotia Underwriters' Agency.
Pearl Assurance Company, Limited.....	Pearl Underwriters' Agency.
Great American Insurance Company.....	Rochester Underwriters' Agency.
Western Assurance Company.....	St. Lawrence Underwriters' Agency.
Home Insurance Company.....	Winnipeg Fire Underwriters' Agency.

APPENDIX XI

GUARANTEE COMPANIES

List of licensed insurers whose bonds have, by Order-in-Council of the Lieutenant-Governor of Ontario, been authorized for acceptance in lieu of personal or private suretyship prescribed or required by *The Guarantee Companies Securities Act, R.S.O. 1927, Chap. 230*, or *The Judicature Act, R.S.O. 1927, Chap. 88*, or of *The Public Officers' Act, R.S.O. 1927, Chap. 17*, or any other Act of the Province of Ontario, wherein or whereby His Honour-in-Council is empowered to authorize the giving or acceptance of securities or of the personal bonds of sureties:

Alliance Assurance Company.	London and Lancashire Guarantee and Accident Company of Canada.
American Surety Company of New York.	London and Provincial Marine and General Insurance Company, Limited.
British America Assurance Company.	Maryland Casualty Company.
British Canadian Insurance Company.	Metropolitan Casualty Insurance Company of New York.
British Empire Assurance Company.	National Surety Corporation.
Canada Accident and Fire Assurance Company.	North British and Mercantile Insurance Company.

NOTE

Section 123 of The Loan and Trust Corporations Act (R.S.O. 1937, Chapter 257) provides as follows:—

123.—(1) No corporation shall, under the penalty of becoming disentitled to registry or of having its registry suspended or cancelled, make, print, publish, circulate, authorize, or be a party or privy to the making, printing, publishing, or circulating of any statement or representation that its solvency or financial standing is vouched for by the Registrar or that the publication of its statement in his report is a warranty or representation of the solvency of the corporation, or of the truth or accuracy of such statement in any particular.

DEPARTMENT OF INSURANCE

TO THE HONOURABLE GORDON D. CONANT, K.C., M.P.P.,

Minister in charge of the Department of Insurance.

Sir:—

I have the honour to submit herewith, as required by The Loan and Trust Corporations Act, the Forty-first Annual Report of the Registrar of Loan Corporations. It shows the particulars of the business of each registered loan corporation, loaning land corporation, and trust company doing business in Ontario during 1937, as ascertained from its annual and other returns and from the inspection and enquiries made by the Chief Inspector and his staff. Detailed statements of the individual corporations are grouped herein in accordance with these three classifications recognized by the Act and are further arranged in alphabetical order. In addition, statistical tables, tabulated summaries and comparative statements are included as shown in the Table of Contents.

The annual returns of the corporations covering their 1937 business were filed with the Department at the end of February, 1938. Upon filing, each return was carefully checked and a preliminary Abstract of this Report showing assets, liabilities, revenue accounts, profit and loss accounts and mortgage summaries was prepared and issued under date of April 15th, 1938. The remaining months of the year were required to complete the annual inspection of the corporations, more particularly described later in this Report, and to determine exactly what changes and what miscellaneous notes, if any, should be made in the individual statements of the corporations as a result of such inspections. The publication of the Report at an earlier date is not feasible without a substantially augmented inspection staff.

Discrepancies may be observed between the figures shown in the statistical tables, etc., included on pages 256 to 299 and the figures shown in the statements of the individual corporations on page 3 to 251. The latter figures include the changes the Registrar deems necessary to be made upon a review of the Inspector's inspection reports — changes which have not been carried, by reason of the time and expense involved, into the former figures which are reprinted without change as they appeared in the preliminary Abstract of this Report published last April.

I have the following registry changes to report:

The Canada Trust Company—Community Trusts Corporation. An agreement between these corporations dated 7th February, 1938, ratified by shareholders of both corporations on the 8th days of February and March, 1938, whereby the assets and liabilities of the Community Trusts Corporation were taken over and assumed by The Canada Trust Company as of January 1st, 1938, was approved by Order-in-Council dated 9th April, 1938.

By Order-in-Council dated 13th July, 1938, the Lieutenant-Governor in Council formally approved the *Lambton Trust Company* as a trust company to act as trustee, administrator, guardians, etc., without security.

By Order-in-Council dated 3rd November, 1938, the Lieutenant-Governor-in-Council formally approved the *Eastern Trust Company* as a trust company with which a trustee may entrust funds for guaranteed investment.

REVIEW OF 1937 BUSINESS

Introduction:

Included herein are Statistical Tables which have been used for comparative purposes in preparing review of 1937 business.

Loan Corporations:

Total assets reported for Loan Corporations amount to \$208,500,000. While an apparent increase is shown over the previous year through readjustment of deductible investment reserves, there occurred an actual decrease of \$3,400,000 as compared with the decrease of \$6,597,000 in 1936 and \$6,400,000 in 1935. Assets of Loan Corporations have decreased steadily from a high of \$239,900,000 at December 31st, 1931.

Total debentures outstanding amount to \$103,972,000 of which \$76,155,000 is payable in Canada, and \$27,817,000 elsewhere. They show a decrease of approximately \$3,390,000. Trust deposits amounting to \$32,606,000 show an increase of \$790,000 as compared with the year 1936.

Trust Companies:

The total assets of trust companies (exclusive of those held for estates, trusts and agencies) show an increase of \$6,400,000 over the previous year as compared with an increase of \$13,000,000 in 1936 over 1935. Total company funds assets amounting to \$60,700,000 showed an increase of \$2,800,000 while total guaranteed funds assets amounting to \$144,556,000 increased by \$3,600,000. Of the increase \$3,000,000 is attributed to the Crown Trust Company, Montreal, being registered in Ontario on the 6th January, 1937. Collateral Loans held for company and guaranteed funds have increased by approximately \$480,000 which no doubt is due to the higher rates of interest obtainable on call loans as compared with other classes of investment. Trust Deposits increased by \$1,150,000 while guaranteed investment receipts increased by \$2,400,000. Higher rate of interest paid by Trust Companies as compared with those paid by Banks no doubt accounts for the increase in Guaranteed Investment Receipts. Crown Trust Company, which was registered in Ontario in 1937, had Trust deposits of \$1,328,000 and Guaranteed Investment Receipts of \$392,400.

Estates Trusts and Agencies:

As in previous years, total assets under administration in this section have continued their upward trend, having increased \$22,000,000 in 1937 to a total of \$2,363,500,000, reflecting the public's continued confidence in trust companies.

Mortgage Loans:

Mortgages held by loan corporations in Ontario and elsewhere amount to \$147,600,000, while those of trust companies amount to \$82,459,000. Interest due and unpaid on such mortgages amounts to \$3,200,000 and \$3,900,000 respectively. These figures for loan corporations represent a decrease of \$4,000,000 in principal and a decrease of \$400,000 in interest due and unpaid. Trust Companies' holdings show an increase in principal of \$5,000 in Company Funds and a decrease of \$2,740,000 in guaranteed funds, and a decrease of \$201,000 interest due and unpaid in company funds and \$545,000 in guaranteed funds.

The popularity of mortgages as an investment for loan and trust company funds has declined in recent years. This is directly due to the abnormal economic conditions prevailing, moratorium legislation, higher taxes and uncertain real estate values. All these factors have combined to create a general feeling of uncertainty in respect of mortgages and have hampered the carrying out of contracts between mortgagors and mortgagees. In preference to mortgages, therefore, funds for investment have been diverted to other channels representing investment of a more liquid character. The latter class of investment has enabled the companies to meet demands for liquidation of debentures and guaranteed investment receipts and have ample funds available for any increase in withdrawals from savings accounts.

Under normal circumstances, repayments of principal operating to reduce the total mortgage investments, are more than offset by new loans and renewals. Under the present conditions, accumulation of charges such as taxes, insurance, etc., paid by companies in protection of their investments, together with the small number of new loans made are more than offset by voluntary writing down of book values and transfers of foreclosed properties to real estate, and result in a net decrease in the mortgage assets of companies as a whole.

As stated above, the steady decrease in mortgage investments of loan and trust corporations continued during 1937. The decrease is equally noticeable in both Eastern and Western Canada, although as noted before, the curtailment of loans on real estate did not occur in Eastern Canada until 1932, while in Western Canada, the downward trend commenced as early as 1930. However, when economic conditions did begin to influence the Eastern mortgage situation, the effect was more rapid and severe than was experienced by Western loans earlier in the period of stress. During the past two years (1936 and 1937) the downward trend in Eastern Canada and Western Canada appear to be on a more comparable basis. The results in agriculture for 1937 were not entirely satisfactory. Another drought in the West caused almost a total crop failure in the greater part of Saskatchewan and a portion of Alberta. There were, however, compen-

sating factors in the general situation, such as a remarkable recovery in Manitoba, but the net result was a decline in the value of field crops for the year of approximately 65 million dollars, or about 10%. The most favourable development in the agricultural situation was a narrowing in the margin between the price of farm products and commodity prices as a whole. Authoritative sources credit the purchasing power of the Western Canada farmer as having reached for the first time in the past seven years the level prevailing in 1926.

Saskatchewan suffered one of the worst crop failures in its history as a result of the hot, dry weather in June and July, the crops in almost 90% of the province were practically destroyed. With a 5% reduction in the acreage under cultivation, grain production dropped from 201,800,000 bushels in 1936 to 62,775,000 bushels in 1937, and the value from about \$140,000,000 to less than \$50,000,000. The farmers of Saskatchewan might well be pardoned if they gave way to a feeling of despair, but the fact is that those who know the country best are the most confirmed in their optimism regarding it.

Office Premises:

The total investment in permanent housings for the operation of loan and trust corporations amounts to \$13,312,000 which shows an increase of \$670,000 due partially to The Crown Trust Company having been registered in Ontario in 1937.

Real Estate held for Sale:

Real Estate holdings of loan corporations amounting to \$12,930,000 increased by \$2,785,000 in 1937, while trust companies' holdings amounting to \$10,100,000 showed an increase of \$1,500,000, making a total increase of \$4,285,000 in respect to both loan and trust corporations. This increase is \$1,080,000 greater than that reported for 1936. Excepting loaning land corporations, real estate is not permitted as a direct investment of loan corporations or trust companies and the amounts held under that heading largely represent foreclosed properties and sale agreements, including accumulated charges and interest. Companies have endeavoured to avoid foreclosure proceedings wherever possible and it is apparent that properties have been taken over only after interest has fallen greatly in arrears and other methods of maintaining the investment have failed. Loan corporations' (including loaning land corporations) holdings now represent 6.24 per cent. of total assets as against 4.91 per cent. a year ago, while trust companies' holdings represent 14.07 per cent. of total Company Fund assets compared with 14.36 per cent. at the end of 1936.

Collateral Loans:

The total amount of collateral loans reached a peak of \$47,700,000 in 1928 but declined rapidly subsequent to that time, reaching a low point of \$22,300,000 in 1933. In 1934 an upswing was noticeable until at the end of 1937 the total of these loans held by loan and trust corporations reached \$30,592,000. The latter figure is made up of loan corporations, \$398,500; company funds of trust companies, \$4,040,300; and guaranteed funds of trust companies, \$26,153,000. Collateral loans of loan corporations increased

by \$25,000, while those of trust companies' company funds decreased by \$1,346,500, and those held for guaranteed funds increased by \$1,826,000. The increase in trust companies' collateral loans is principally due to inclusion of those held by the Crown Trust Company. Reference to the statistical tables in the Report shows that the Montreal Trust Company and The Royal Trust Company carry substantially more than 73 per cent. of all collateral loans reported to the Department.

Bonds and Debentures:

Canadian government and municipal securities, including school districts and rural telephone companies held by loan corporations, decreased by \$650,000 to \$19,601,000 and those of trust companies increased \$2,014,000 from \$34,600,000 to \$36,614,000.

"Other bonds" held by loan corporations decreased \$94,300 to \$1,931,400 while such securities held in company funds of trust companies increased \$378,500 from \$6,724,400 to \$7,102,900. Such securities held in guaranteed funds of Trust Companies decreased \$1,073,000 from \$8,923,000 to \$7,850,000.

Stocks:

Stocks held by loan corporations decreased by \$31,000 from \$10,245,000 to \$10,214,000. Those held by trust companies increased \$2,137,000 from \$4,900,000 to \$7,037,000. To a considerable extent this increase may be said to be due to improved rates of dividends.

Cash:

Cash of loan corporations on hand and on deposit in banks decreased by \$123,000 from \$6,212,000 to \$6,089,000. Trust companies' cash on hand and in banks in company funds decreased \$150,000 to \$1,620,000, while in guaranteed funds there was an increase of \$1,600,000 from \$7,600,000 to \$9,200,000.

Other Assets:

All other assets of loan corporations amount to \$993,700, a decrease of \$105,100 from \$1,098,800. Those of trust companies in company funds decreased \$146,000 from \$3,690,000 to \$3,544,000, while those held in guaranteed funds increased \$349,000 from \$1,343,000 to \$1,692,000.

Earnings:

Net profit of loan corporations, excluding transfers to and from investment reserves, amounted to \$3,136,000 as compared to \$3,700,000 in 1936 and \$3,100,000 in 1935. Trust companies' net profit (also exclusive of transfer to and from investment reserves) increased from \$2,725,000 to \$3,061,000. In 1935 the net profits of trust companies were \$2,550,000, in 1936 they were \$2,725,000 and in 1937 \$3,061,000. Examination of the detailed figures will show that management fees in respect to Estates, trusts and agencies have been a major factor in maintaining earnings of trust companies.

The net amount transferred to investment reserves (amount transferred to investment reserves less the amount transferred from investment reserves, eliminated from the above figures for the purposes of comparison of net profits) totalled \$1,764,000 for the year 1937. Of this amount \$1,011,000 was in respect of loan corporations and \$753,000 in respect of trust companies. This is a decrease of \$246,000 as compared with the year 1936. Loan and Trust Corporations' policy of providing for decreases in asset values by setting up investment reserves, commenced in the period of depression, and has continued. Many of these corporations, in order to provide additional investment reserves against decreases in the value of assets, have transferred substantial amounts from their contingency reserves and reserve funds. Reserve Funds and Contingency Reserves of Loan Corporations as at December 31st, 1937, amounted to 56.5 per cent. of the paid in capital of such corporations, while such reserves of trust companies amounted to 53.48 per cent. of paid in capital.

Dividends:

Loan corporations declared dividends amounting to \$2,024,000 in 1937 as compared with \$2,451,000 in 1936, while those declared by trust companies in 1937 amounted to \$1,855,900 as against \$1,701,000 in the previous year. Dividends of loan corporations represent 3.76 per cent. of the shareholders' equity and those of trust companies 4.06 per cent. These percentages compare with 4.35 per cent. and 3.81 per cent. respectively for 1936.

Liquid Position:

The liquid position of loan and trust corporations which accept deposits has been well maintained. Following is a comparative summary:

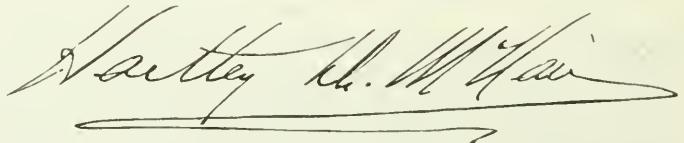

December 31, 1934	December 31, 1935	December 31, 1936	December 31, 1937
<u>71.99%</u>	<u>67.15%</u>	<u>66.70%</u>	<u>63.15%</u>

Appointments:

In July, 1938, the Lieutenant-Governor-in-Council appointed Mr. C. Richards, C.A., of the accounting firm of Wilton C. Eddis & Sons, Toronto, as Chief Inspector in the Department of Insurance. Mr. Richards has had a wide experience in public accounting practice and brings to the Department high professional qualifications which notably equip him for his important duties. Mr. W. K. Colin Campbell, the former Chief Inspector, transferred to the Inspector of Legal Offices Department in June, 1938.

In July, 1938, the Lieutenant-Governor-in-Council appointed Mr. A. W. Rogers, C.A., as inspector in the Department of Insurance to succeed Inspector H. C. Ness. Mr. Rogers is a Chartered Accountant of unusual ability with several years accounting experience. He was formerly secretary of Gairdner & Co., Limited, Investment Dealers.

All of which is respectfully submitted.

Registrar of Loan Corporations.

Toronto November 30th, 1938.

- Average rate of interest per annum paid by the Corporation during the year on: (a) Debentures payable in Canada, 4.098; (b) Debentures payable elsewhere, 4.228; (c) Debenture stock, 4.123; (d) Deposits, 1.851.
- Average rate of interest per annum earned by the Corporation during the year on: (a) Mortgages and agreements for sale of realty, 4.559; (b) Collateral Loans, 5.342; (c) Bonds and debentures, 3.874; (d) Stocks owned, 4.866
- Written off Mortgage Loans, \$144,137.29.
- Fidelity Bond on officers of the Corporation, covering up to \$50,000. on each officer.
- Dividends and bonuses declared during the year giving (a) dates declared; (b) dates payable; (c) rates:
 - February 17, 1937; (b) April 1, 1937; (c) 2%.
 - May, 19 1937; (b) July 2, 1937; (c) 2%.
 - August 18, 1937; (b) October 1, 1937; (c) 2%.
 - November 17, 1937; (b) January 3, 1938; (c) 2%.
- Date appointed for the Annual Meeting—January 28th, 1938.
Date of last Annual Meeting—January 28th, 1937.
- Amount of contingent liability not shown as direct debts in the foregoing statement.....\$ 25,000 00
- Amount of mortgage interest permanently capitalized during the year..... 145,994 56
- Any loans or advances, direct or by way of overdraft, secured or otherwise, made at any time during the year to any director or auditor or to the wife or any child of any director or auditor or their nominees, or any such loans or advances outstanding at the beginning of the year or increased during the year.

Name of Borrower	Additional or new advances made during this year
Mrs. B. Parker.....	\$3,500 00

10. Are all the directors of the company as listed fully qualified as such in accordance with the requirements of the statute? Answer, Yes.

11. Amount of Company's own Debentures and interest, due and unpaid:		
Principal.....	\$	127,006 84
Interest.....		28,816 63

CONSTATING INSTRUMENTS

This corporation was incorporated under Special Act of the Dominion of Canada, 62-63 Victoria (1899), c. 101, under the name of "The Canada Permanent and Western Canada Mortgage Corporation," for the purpose of acquiring the assets and business of the Canada Permanent Loan and Savings Company, the Western Canada Loan and Savings Company, the Freehold Loan and Savings Company, and The London and Ontario Investment Company, Limited, which several purchases were confirmed by Special Act of Ontario 63 Victoria, 1900, c. 129. The name

CANADA PERMANENT MORTGAGE CORPORATION—Continued

was changed to the "Canada Permanent Mortgage Corporation" by 3 Edward VII (1903), c. 94 (D), which Act also amended its lending powers. By 3-4 George V (1913), c. 86 (D), further amendments were made to the Incorporating Act.

Of the constituent companies, the Canada Permanent Loan and Savings Company was incorporated by declaration filed under The Building Societies Act (Cons. Stat. U.C., c. 53) in 1855, under the name of the Canada Permanent Building and Savings Society, which name was changed to the Canada Permanent Loan and Savings Company by 37 Victoria (Ontario), 1874, c. 100.

The Western Canada Loan and Savings Company was also incorporated by declaration filed under The Building Societies Act in 1863, under the name of the Western Canada Permanent Building and Savings Society, and its name was changed to the Western Canada Loan and Savings Company by 37 Victoria (Ontario), 1874, c. 79.

The Freehold Loan and Savings Company was also incorporated by declaration filed under The Building Societies Act in 1859 under the name of The Freehold Permanent Building and Savings Society; the name being changed to The Freehold Loan and Savings Company by 36 Victoria (Ontario), (1873), c. 104.

The London and Ontario Investment Company was incorporated by the Act of Ontario 39 Victoria, 1876, c. 62.

In 1918 the corporation purchased the assets and business of The Oxford Permanent Loan and Savings Society, which purchase was ratified by Order-in-Council of Ontario, dated July 31st, 1918, pursuant to The Loan and Trust Corporations Act.

In 1921, the corporation also purchased the assets and business of The London and Canadian Loan and Agency Company, Limited, which purchase was ratified by Order-in-Council of Ontario, dated September 23rd, 1921, pursuant to The Loan and Trust Corporations Act.

In 1927, the corporation purchased the assets and business of The Royal Loan and Savings Company, which purchase was ratified by Order-in-Council of Ontario, dated March 4th, 1927, pursuant to The Loan and Trust Corporations Act.

In 1927 the corporation purchased the assets and business of The British Columbia Permanent Loan Company, Vancouver, B.C.

In 1927 the corporation also purchased the assets and business of The Canada Landed and National Investment Company, Limited, which purchase was ratified by Order-in-Council of Ontario, dated December 30th, 1927, pursuant to The Loan and Trust Corporations Act.

 - (a) March, 1937; (b) April 1, 1937; (c) 2%.
 - (a) June, 1937; (b) July 2, 1937; (c) 2%.
 - (a) September, 1937; (b) October 1, 1937; (c) 2%.
5. Date appointed for the Annual Meeting—19th January, 1938.
Date of last Annual Meeting—20th January, 1937.
6. Are all of the directors of the company as listed, fully qualified as such in accordance with the requirements of the statute? Answer, Yes.

CONSTATING INSTRUMENTS

1884—Letters Patent (under the Ontario Government Joint Stock Companies' Letters Patent Act) incorporating The Central Canada Loan and Savings Company of Ontario, with a capital of \$2,000,000, in 20,000 shares of \$100 each, dated 7th March, 1884.

1890—Act (of the Legislature of the Province of Ontario), 53 Vic., c. 129; declares capital to be \$5,000,000, in 50,000 shares of \$100 each; confirms the purchase of the assets of the Peterborough Real Estate Investment Company, Limited; authorizes the issue of debenture stock; authorizes agencies in the United Kingdom; defines the limit of borrowing powers.

1893—Supplementary Letters Patent (of the Province of Ontario), dated 8th June, 1893, extending the Company's purchasing and lending powers with regard to bonds, stocks and debentures to the Province of Manitoba.

1896—Act (of the Legislature of the Province of Manitoba), 59 Vic., c. 33, authorizes Company to exercise in the Province of Manitoba, with respect to real and personal property, all the rights, powers and privileges that it possesses in Ontario.

1897—Supplementary Letters Patent (of Ontario), dated 6th May, 1897, amending the original Letters Patent by expunging therefrom powers of Company to buy and sell land.

1898—Act (of the Parliament of the Dominion of Canada), 61 Vic., c. 97.

1899—Act (of the Legislature of the Province of Manitoba) authorizing Dominion Company to exercise in Manitoba all its rights, powers and privileges; defining the powers of the Company and vesting all the assets of the old company in the new company.

1900—Act (of the Legislature of the Province of Ontario), confirming and validating the conveyance and assignment of 1st December, 1898 (see form of the conveyance and assignment in schedule to 61 Vic., c. 97), and transferring and vesting the assets of the Provincial Company in the Dominion Company.

CONSTATING INSTRUMENTS

March 15th, 1864, Declaration made and filed (March 18th, 1864) in pursuance of Chapter 53, Consolidated Statutes of Upper Canada, 1859, incorporating The Huron & Erie Savings & Loan Society under the said Act.

1865, 28 Victoria, Chapter 41, An Act of the Legislative Council and Assembly of Canada whereby the London Permanent Building & Savings Society was amalgamated with and merged in The Huron & Erie Savings & Loan Society.

1866, 29-30 Victoria, Chapter 132, An Act of the Legislative Council and Assembly of Canada whereby the Western Counties Permanent Building & Savings Society was amalgamated with and merged in The Huron & Erie Savings & Loan Society.

1875, 39 Victoria, Chapter 95, An Act changing the name of The Huron & Erie Savings & Loan Society to The Huron & Erie Loan & Savings Company.

1875, September 2nd, Declaration filed in pursuance of Chapter 53, Consolidated Statutes of Canada, 1859, whereby the Canadian Savings & Loan Company of London, Canada, was incorporated under the said Act.

1896, 59 Victoria, Chapter 49, Canada, An Act for defining the borrowing powers of the Company and for consolidating legislation in relation thereto.

1899, 62-63 Victoria, Chapter 115, Canada, An Act regulating the amount of the Company's liabilities to the public and as to the types of security in which it may invest.

1905, 4-5 Edward VII, Chapter 105, Canada, An Act dealing with the Company's liabilities to the public, limiting the amount from time to time to be held on deposit, and as to extent of borrowing power.

THE HURON AND ERIE MORTGAGE CORPORATION—Continued

1905, December 29th, An Order of the Lieutenant-Governor in Council, assenting to an agreement whereby the assets of The Canadian Savings & Loan Company were vested in The Huron & Erie Loan & Savings Company.

1906, 6 Edward VII, Chapter 110, Canada, An Act whereby The Canadian Savings & Loan Company of London, Canada, was amalgamated with and merged in The Huron & Erie Loan & Savings Company.

1906, 6 Edward VII, Chapter 130, Ontario, An Act of the Province of Ontario similar to the one above described and for the same purpose.

1913, 3-4 Geo. V, Chapter 134, Canada, An Act permitting the Company to increase the amount of its liabilities to the public.

1915, 5 Geo. V, Chapter 74, Canada, An Act changing the name of The Huron & Erie Loan & Savings Company to The Huron & Erie Mortgage Corporation, authorizing the increase of the Company's capital stock, the establishment of a pension fund, etc.

1915, 5 Geo. V, Chapter 86, Ontario, An Act for the same purpose as the Dominion Act last above recited.

1922, August 29th, An Order of the Lieutenant-Governor of the Province of Ontario in Council, assenting to an agreement whereby the assets of the Dominion Savings & Investment Society were vested in The Huron & Erie Mortgage Corporation.

1926, October 13th, An Order of the Lieutenant-Governor of the Province of Ontario in Council, assenting to an agreement whereby the assets of The Hamilton Provident & Loan Corporation were vested in The Huron & Erie Mortgage Corporation.

1927, May 31st, An Order of the Lieutenant-Governor of the Province of Ontario in Council assenting to an agreement whereby the assets of The Southern Loan & Savings Company were vested in The Huron & Erie Mortgage Corporation.

1929, August 29th, An Order of the Lieutenant-Governor of the Province of Ontario in Council, assenting to an agreement respecting the sale of the assets of The London Loan & Savings Company to The Huron & Erie Mortgage Corporation.

1931, January 17th, An Order of the Lieutenant-Governor of the Province of Ontario in Council, assenting to an agreement, dated November 18th, 1930, whereby the assets of The Peoples Loan & Savings Corporation were vested in The Huron & Erie Mortgage Corporation.

CONSTATING INSTRUMENTS

Incorporated under The Building Societies Act, 9 Vict., c. 90 (Province of Canada), by declaration filed on 27th March, 1847, with the Clerk of the Peace for the Western District. The original corporate name was "The Port Sarnia Building Society." The society was reorganized as "The Lambton Permanent Building and Investment Society" under the said Act and other Acts, all of which became consolidated as Chapter 53 of the Consolidated Statutes of Upper Canada, by declaration filed 19th June, 1855, with the Clerk of the Peace for the County of Lambton. This latter corporate name was changed by Order-in-Council, 4th June, 1880, to The Lambton Loan and Investment Company.

The lending and the borrowing powers are governed by The Loan and Trust Corporations Act, R.S.O. 1937, c. 257.

CONSTATING INSTRUMENTS

Incorporated under The Building Societies Act, Consol. Stat. U.C., Chap 53, by declaration filed with the Clerk of the Peace for the United Counties of Northumberland and Durham, 5th July, 1872. (Decl. Book II, 127).

The corporate name was, by Order-in-Council of Ontario, 21st June, 1876 (Ibid.), changed to the Midland Loan and Savings Company.

A by-law altering the amount of the capital stock and par value of the share was, pursuant to The Loan Corporations Act, approved by Order-in-Council of Ontario, 3rd October, 1900.

The borrowing and lending powers are governed by The Loan and Trust Corporations Act, R.S.O. 1937, Chap. 257.

CONSTATING INSTRUMENTS

Incorporated under The Building Societies Act, Consolidated Statutes of Upper Canada, c. 53, by declaration filed in the office of the Clerk of the Peace for the County of Middlesex, 26th September, 1870. The original corporate name was The Ontario Savings and Investment Society.

By Order-in-Council of Ontario, dated 4th October, 1879, and also by Order-in-Council of Canada, dated 29th October, 1879, the corporate name was changed to The Ontario Loan and Debenture Company.

The Company as now constituted was formed under the provisions of The Loan Corporations Act of Ontario by The Ontario Loan and Debenture Company, taking in by amalgamation the Agricultural Savings and Loan Company under Order-in-Council dated 10th November, 1911, and operates under The Loan and Trust Corporations Act, R.S.O. 1937, chapter 257.

By Order-in-Council of Ontario, dated 12th March, 1930, 20,000 shares twenty per cent. called and paid were converted into 4,000 shares fully paid, the authorized capital thereby being reduced from 100,000 to 84,000 shares.

CONSTATING INSTRUMENTS

Incorporated under The Building Societies Act (R.S.O. 1877, c. 164), by declaration filed with the Clerk of the Peace for the County of York, 17th September, 1879, with the corporate name of the Real Estate Loan and Debenture Company. Decl. Book II, p. 57.

Letters patent of Canada (6th April, 1883) incorporating the Company under The Canada Joint Stock Companies Act, 1877, with the corporate name of The Real Estate Loan Company of Canada, Limited,—Lib. 85, folio 282, Office of the Registrar-General of Canada. The capital authorized by this instrument was \$2,000,000, being the capital of the said The Real Estate Loan and Debenture Company, with the same powers throughout Canada as now possessed by the said The Real Estate Loan and Debenture Company, and for the same purposes and objects, subject always to the provisions of the said last mentioned Act (Canada J. S. Co's. Act, 1877) and with all such further powers, purposes and objects as are conferred upon Loan Companies incorporated under the provisions of the said last mentioned Act.

1884. Act of the Dominion of Canada, 47 V. c. 101 (D), respecting sales of assets.

Supplementary Letters Patent of Canada, 20th June, 1892, reciting By-law No. 62 of the Company, and (as therein provided), reducing the capital stock from \$2,000,000 to \$1,600,000.

1913. Act of the Dominion of Canada, 3-4 George V, c. 184, increasing capital stock to \$2,000,000 in shares of \$100 each par value.

8. Amount of Company's own Debentures and interest thereon, due and unpaid..\$ 567 50

CONSTATING INSTRUMENTS

Incorporated as "The Toronto Real Estate Investment Company" by Letters Patent of Ontario (June 15th, 1885), issued under The Ontario Joint Stock Companies' Letters Patent Act, R.S.O. 1877, c. 150. Supplementary Letters Patent of Ontario (December 29th, 1887), were issued under R.S.O. 1887, c. 157, defining the borrowing powers, etc. Further Supplementary Letters Patent of Ontario (September 25th, 1889) were issued under the last mentioned Act, increasing the capital stock from \$400,000 to \$2,000,000. Further Supplementary Letters Patent of Ontario (March 30th, 1891) were issued under the same Act, conferring agency powers on the Company. The corporate name was by Order-in-Council (April 2nd, 1891) changed to "The Toronto Savings and Loan Company."

For the lending and borrowing powers, see the Letters Patent and the Acts, R.S.O. 1877, chap. 150; R.S.O. 1887, c. 157; R.S.O. 1914, chap. 184; R.S.O. 1927, chap. 223, R.S.O. 1937, chap. 257.

CONSTATING INSTRUMENTS

Incorporated 20th May, 1905, by special Act of the Legislature of Quebec, 5 Edward VII, chap. 78.

Amendments to charter, 9 Edward VII, chap. 114, 7th May, 1909; 5th George V, chap. 125, 5th March, 1915; 7th George V, chap. 102, 22nd December, 1916; 9th George V, chap. 125, 4th March, 1919.

Authorized by special Act of the Legislature of Ontario, 10-11 Geo. V, chap. 156, 4th June, 1920, to transact business therein as specified in Section 5 of the said Act, which enacts as follows:

“(5) The company shall be limited in respect of all business relating to property and civil rights or provincial objects in the Province of Ontario, to the powers mentioned in the schedule to The Loan and Trust Corporations Act, and shall be subject to the general provisions of the said Act and of the general public law of the said Province relating to trust companies and trusts.”

The company has a deposit in the Province of Ontario amounting to \$50,000.00.

CONSTATING INSTRUMENTS

The British Mortgage Loan Company of Ontario was incorporated by Letters Patent of Ontario, dated October 5th, 1877 (Lib. 5, No. 52), issued under R.S.O. 1877, c. 150, which Act was continued by R.S.O. 1887, c. 157, and was as to Loan Corporations superseded by 60 Vic., c. 38 (O), now R.S.O. 1937, c. 257.

By 16 George V, c. 121, the Company was given trust company powers and its name changed to The British Mortgage and Trust Corporation of Ontario.

The lending and the borrowing powers of the Company are derived from its Letters Patent and the above public general statute.

CONSTATING INSTRUMENTS

Incorporated by declaration filed May 11th, 1885, with the Clerk of the Peace for the United Counties of Leeds and Grenville. The declaration was made by virtue of "The Building Societies Act," R.S.O. 1877, c. 164, continued by R.S.O. 1887, c. 169, and superseded by 60 Vic., c. 38 (O), now R.S.O. 1897, c. 205. See R.S.O. 1937, c. 257.

The lending and borrowing powers are derived from the above public General Acts.

By a Special Act of the Legislature of Ontario, 18 Geo. V, c. 130, the Company was granted the powers of a trust company and its authorized capital stock was increased from \$500,000 to \$1,000,000. Its name was changed to The Brockville Trust and Savings Company.

CONSTATING INSTRUMENTS

The Canada Permanent Trust Company was incorporated in 1913 by a Special Act of the Parliament of the Dominion of Canada, 3-4 Geo. V, c. 87.

Authorized by Order-in-Council (May 7th, 1913), to carry on business in the Province of Ontario as a Trust Company, pursuant to the provisions of The Loan and Trust Corporations Act, R.S.O. 1927, c. 223.

In 1927 the Company purchased the assets and business of The Brantford Trust Company, which purchase was ratified by Order-in-Council of Ontario, dated 31st day of August, 1927, pursuant to The Loan and Trust Corporations Act.

CHARTERED TRUST AND EXECUTOR COMPANY—Continued

CONSTATING INSTRUMENTS

The Title and Trust Company was incorporated in 1905 by Special Act of the Parliament of Canada, 4-5 Edward VII, chap. 162 (Royal Assent, July 20th, 1905). By Section 19 of this Act the Company was required to make an initial deposit with the Receiver-General of Canada to carry on the business of Title Insurance, the said deposit to be increased to \$75,000.00 within two years from the date of the issue of such license, and to be further increased as the Treasury Board may from time to time require.

In 1907, by Special Act of the Province of Ontario, 7 Edward VII, chap. 118, the Company was, upon the conditions therein specified, made admissible to registry under The Loan Corporations Act, and initial registry was granted on the 30th August, 1907.

April 18th, 1914—Amendment to charter changing name to Chartered Trust and Executor Company.

May 16th, 1919—Absorbed Guardian Trust Company.

CONSTATING INSTRUMENTS

The Grey and Bruce Trust and Savings Company, cited 16 Geo. V (1926), c. 123. This Act confirms the amalgamation of The Grey and Bruce Loan Company and The Owen Sound Loan and Savings Company, and constitutes the amalgamated corporation a new corporation under the name of The Grey and Bruce Trust and Savings Company, with Head Office in the City of Owen Sound, and empowers the new corporation to carry on the business of a trust company under The Loan and Trust Corporations Act.

The Grey and Bruce Loan Company was incorporated under The Buildings Societies Act, R.S.O. 1887, c. 169, as a permanent building society under the name of The Owen Sound, Grey, and Bruce Loan and Savings Company, by declaration filed with the Clerk of the Peace for the County of Grey, May 10th, 1889. The corporate name was by Order-in-Council of Ontario September 15th, 1897, changed to The Grey and Bruce Loan Company.

The Owen Sound Loan and Savings Company was incorporated under The Building Societies Act, R.S.O. 1887, c. 169, by declaration filed with the Clerk of the Peace for the County of Grey on the 1st April, 1889.

The date of incorporation of The Grey and Bruce Trust and Savings Company being April 8th, 1926.

CONSTATING INSTRUMENTS

Incorporated under The Building Societies Act, R.S.O. 1887, c. 169, by declaration filed with the Clerk of the Peace for the County of Lambton, 20th August, 1889.

By Order-in-Council approved March 6th, 1907, pursuant to the provisions of Section 4 (6), cap. 27, 63 Victoria, the authorized capital stock of the Company was increased from \$500,000.00 to \$1,000,000.00.

By 18 George V, Chapter 112, the Company was given Trust Company powers and its name changed to The Industrial Mortgage and Trust Company.

By 24 George V, Chapter 79, the Company assumed the liabilities and purchased under agreement the business, assets, etc., of The East Lambton Farmers' Loan and Savings Company.

The lending and borrowing powers are governed by The Loan and Trust Corporations Act R.S.O. 1937, c. 257.

By Order-in-Council approved 22nd April, 1936, the Lieutenant Governor assented to The Industrial Mortgage and Trust Company assuming the liabilities and purchase under agreement dated 24th December, 1935, of the business, assets, etc., of The Crown Savings and Loan Company.

THE LONDON AND WESTERN TRUSTS COMPANY, LIMITED—Continued**CONSTATING INSTRUMENTS**

Incorporated on the 17th September, 1896, by Letters Patent of Ontario, issued under The Ontario Joint Stock Companies' Letters Patent Act, R.S.O. 1887, Chap. 157. See also The Loan and Trust Corporations Act, R.S.O. 1937, Chap. 257.

February 18th, 1929—Order-in-Council confirming By-law No. 14 of the Corporation to increase the capital stock from \$500,000.00 to \$1,000,000.00.

August 21st, 1929—Order-in-Council confirming By-law No. 18 of the Corporation to increase the capital stock from \$1,000,000.00 to \$5,000,000.00.

On the 10th day of September, 1929, His Honour the Lieutenant-Governor approved by Order-in-Council the removal of the Head Office of The London and Western Trusts Company, Limited, from the City of London to the City of Toronto.

By an agreement, dated the 15th day of October, 1929, The London and Western Trusts Company, Limited, of London, Ontario, purchased the assets and liabilities, business, rights, property and goodwill, etc., of The Standard Trusts Company with Head Office in Toronto, Ontario. The agreement was ratified and confirmed by the shareholders of both companies and was subsequently approved by the Lieutenant-Governor in Council. The transfer became effective on the 18th day of December, 1929. The Standard Trusts Company had, by authority of By-law No. 35, moved its Head Office from Winnipeg to Toronto, and was granted registry in Ontario under date of October 26th, 1929.

June 28th, 1932—Order-in-Council assenting to the conversion of partly-paid shares into fully paid shares equivalent to the amount paid in on account of subscriptions not including premiums.

MONTREAL TRUST COMPANY—Continued

CONSTATING INSTRUMENTS

The Montreal Trust Company was incorporated on the 21st day of March, 1889, by Special Act of the Province of Quebec, 52 Vic., c. 72 (Q) and the following subsequent special amending Acts, 54 Vic., c. 75, 55-56 Vic., c. 78, 63 Vic., c. 77, 20 Geo. v. c. 139 and 24 Geo. V. c. 121.

By Special Acts the name was changed in 1895 to Montreal Trust and Deposit Company, 59 Vic., c. 70 (Q), and again in 1909 to the Montreal Trust Company, 9 Edw. VII, c. 115 (Q).

Authorized by Order-in-Council to carry on business in the Province of Ontario as from the 11th day of March, 1909, subject to certain conditions and limitations.

Registered in the Trust Companies Register, January 21st, 1913.

By Order-in-Council, dated February 25th, 1928, the Capital Stock was increased from \$1,000,000.00 to \$2,000,000.00.

The Company has a deposit with the Province of Ontario amounting to \$200,000.00.

Date of last Annual Meeting—March 10th, 1937.
- Are all of the directors of the company as listed, fully qualified as such in accordance with the requirements of the statute? Answer, Yes.

CONSTATING INSTRUMENTS

The Prudential Trust Company, Limited, was incorporated in 1909 by a Special Act of the Parliament of the Dominion of Canada, 8-9 Edward VII, Chapter 124.

Authorized in 1911 by Special Act of the Legislature, 1 Geo. V, Chapter 139, to transact business in the Province of Ontario as specified in Section 1 (5) of the said Act, which enacts as follows:

“(5) The Company shall be limited in respect of all business relating to property, rights or interests in the Province of Ontario, to the powers mentioned in this Act or granted from time to time to trust companies by any Public Act or Order of the Lieutenant-Governor in Council of the said Province and shall be subject to the general public law of the said Province relating to trust companies and trusts.”

The Company has a deposit in the Province of Ontario amounting to *\$50,000.00.

In 1922, by Chap. 71, George V, 12-13, the authorized capital was increased from \$1,500,000 to \$2,000,000 representing 20,000 shares of par value \$100.

In 1930, by Chap. 70, George V, 20-21, the capital structure was altered to represent 100,000 shares of stock with a par value of \$20 a share.

In 1934 by Bill No. 11, 5th Session, 17th Parliament 24, George V, the par value of the shares was reduced from \$20 to \$10.

*Under the provisions of 1 Geo. V, c. 139, as amended by 10 Geo. V, c. 158, the deposit as security to do business in Ontario may be fixed from time to time by the Lieutenant-Governor in Council. By Order-in-Council, dated June 15th, 1920, the Company's deposit of \$200,000 was exchanged for one of \$50,000.00, the public liability in Ontario being at that time \$1,123.43 on Trust Account and \$26,167.14 of assets under administration.

PRUDENTIAL TRUST COMPANY, LIMITED—Continued

**By Order-in-Council dated 4th July, 1933, The Honourable the Lieutenant-Governor of the Province of Ontario formally approved the reduction of the amount required to be held on deposit by the Department of Insurance in respect of The Prudential Trust Company, Limited, from Fifty Thousand Dollars (\$50,000.00) to Thirty Thousand Dollars (\$30,000.00).*

THE ROYAL TRUST COMPANY—Continued

CONSTATING INSTRUMENTS

The Royal Trust Company was incorporated in 1892, by Special Act of the Province of Quebec, 55-56 Vict., chap. 79, which was amended by 55-56 Vict. (1892), chap. 80 (Q), and by 59 Vict. (1896), chap. 67 (Q), and by 63 Vict. (1900), chap. 76 (Q), 6 Edw. VII, chap. 73, 17 Geo. V, chap. 147 (Q), 19 Geo. V, chap. 104 (Q).

Authorized by Special Act of the Legislature of Ontario, 2 Edw. VII, chap. 103, to transact business therein as specified in Section 1 (5) of the said Act, which enacts as follows:

“(5) The Company shall be limited in respect to all business relating to property, rights or interests in the Province of Ontario, to the powers mentioned in the schedule to The Ontario Trust Companies’ Act, and shall be subject to the general provisions of the said Act and of the general law of the said Province relating to trust companies and trusts.”

The Company has a deposit in the Province of Ontario amounting to \$200,000.00.

- The Department inspectors report that substantial additional investment reserves should be included in this statement to show their opinion of the true and correct financial condition of the company; the management does not concur in their opinion.

THE TRUSTS AND GUARANTEE COMPANY, LIMITED—Continued

CONSTATING INSTRUMENTS

Incorporated on the 24th February, 1897, by Letters Patent of Ontario, issued under R.S.O. 1897, c. 191. See Ontario Trust Company Act (R.S.O. 1897, c. 206), and The Loan and Trust Corporations Act (R.S.O. 1937, c. 257).

Amendments to Charter: December 23rd, 1897, "The Ontario Companies Act"; February 25th, 1898; "The Ontario Joint Stock Companies Letters Patent Act" and "The Trust Companies Act, 1895"; August 14th, 1900, "The Ontario Companies Act"; March 28th, 1907, "The Ontario Companies Act."

By Order-in-Council, dated January 25th, 1934, the Lieutenant-Governor in Council formally approved an agreement dated December 7th, 1933, whereby Trusts and Guarantee Company, Limited, acquired the assets and assumed the liabilities of Union Trust Company, Limited.

CONSTATING INSTRUMENTS

Incorporated under The Building Societies Act, 1887, c. 169, as amended by 56 Vic., c. 31 (O), by declaration filed with the Clerk of the Peace for the County of Victoria, on the 4th September, 1897.

The operations of the Company were for a time by law restricted to the County of Victoria (56 Vic., c. 31), continued by R.S.O. 1897, c. 205, s. 8 (4); but the Company, having fulfilled the statutory requirements, was by Letters Patent of Ontario, bearing date 11th November, 1898, relieved from the above restriction of its operations.

By a special Act of the Legislature of Ontario, 13 Geo. V, c. 107, the Company was granted the powers of a trust company and the name was changed to The Victoria Trust and Savings Company. (See also The Loan and Trust Corporations Act, R.S.O., 1937, chap. 257).

7. Amount of Company's own Guaranteed Investment Receipts and interest thereon, due and unpaid—Principal, \$61,682.07; Interest, \$191.29..... 61,873 36

CONSTATING INSTRUMENTS

Originally incorporated as a Loan Corporation by Letters Patent, 7th April, 1913, under The Loan and Trust Corporations Act, 2 Geo. V, 1912, chap. 34, now R.S.O. 1937, chap. 257. The original corporate name was The Waterloo County Loan and Savings Company.

By a special Act of the Legislature of Ontario, 12-13 Geo. V, c. 148, the Company was granted the powers of a trust company and the name was changed to the Waterloo Trust and Savings Company.

Quarterly Statements

OF

DEPOSITS

AND

Securities on Hand and Available for Depositors

FILED BY

Loan and Trust Corporations

SEPTEMBER 30th, 1937, TO JUNE 30th, 1938, INCLUSIVE

Pursuant to Sections 49 or 19 (3) of the Loan and Trust
Corporations Act.

Sec. 49. Every loan company receiving deposits shall make a sworn return to the Registrar quarterly on the 15th days of January, April, July and October in each year, drawn in accordance with the form prescribed from time to time by the Registrar, showing the amount of such deposits and showing the amount of cash on hand and on deposit and the amount of debentures, bonds, stock or other securities of or guaranteed by the Dominion of Canada, and of or guaranteed by any province of Canada less any incumbrances thereon and the amount of bonds, debentures and other securities of any municipal corporation in Ontario or of any city in Canada, less any incumbrances thereon and the bonds or debentures issued by any incorporated company in respect of which bonds or debentures annual or semi-annual subsidy payments sufficient to pay both principal and interest thereof are, by virtue of any general Act of the Dominion of Canada, payable by the Government of the Dominion of Canada to a trust company as trustee for the holders of such bonds or debentures, and the principal amount of any moneys payable to the company on demand the payment of which is secured by the mortgage or pledge of any of the securities hereinbefore in this section mentioned as the said amounts stood at the end of the last preceding month, and stating that the same were at the date mentioned in such return on hand and available for depositors.

Sec. 19.—(3) Every trust company receiving deposits in the manner authorized by subsection 3 of section 19 shall make a sworn return to the Registrar quarterly on the 15th days of January, April, July and October in each year, drawn in accordance with the form prescribed from time to time by the Registrar, showing the amount of such deposits and showing the amount of cash on hand and on deposit, and the amount of debentures, bonds, stock or other securities of or guaranteed by the Dominion of Canada, and of or guaranteed by any province of Canada, less any incumbrances thereon, and the amount of bonds, debentures and other securities of any municipal corporation in Ontario or of any city in Canada, less any incumbrances thereon, and the bonds or debentures issued by any incorporated company in respect of which bonds or debentures annual or semi-annual subsidy payments sufficient to pay both principal and interest thereof are, by virtue of any general Act of the Dominion of Canada, payable by the Government of the Dominion of Canada to a trust company as trustee for the holders of such bonds or debentures, and the principal amount of moneys payable to the company on demand, the payment of which is secured by the mortgage or pledge of any of the securities hereinbefore in this subsection mentioned, as the said amounts stood at the end of the last preceding month, and including in such statement all such cash and securities and loans as defined in this subsection, whether owned by the company or held by it as guaranteed investments under the provision of subsection 2 of section 17, or subsection 4 of section 18, and stating that the same were at the date mentioned in such return on hand and available for depositors.

FILED BY
TRUST COMPANIES

SEPTEMBER 30th, 1937, to JUNE 30th, 1938, INCLUSIVE

Pursuant to Section 19 (2) of the Loan and Trust Corporation Act.

Sec. 19. (2) Every trust company receiving funds for guaranteed investment as mentioned in subsection 1 of section 16 shall make a sworn return to the Registrar quarterly on the 15th day of January, April, July and October in each year, drawn in accordance with the form prescribed from time to time by the Registrar, showing the amount of such funds, and showing all securities, including loans on securities, and cash, including money on deposit, ear-marked and definitely set aside as provided in subsection 2 of section 17, as the said amounts stood at the end of the last preceding month, and stating that the same were at the date mentioned in such return, so ear-marked and definitely set aside.
