LONGMEADOW, MASS.

GLADIOLUS GARDENS

Gladiolus gardens
Are like lilies set apart
From out the fields of heaven
To ease some troubled heart.

Fairy magic holding
Sunset skies distilled;
Color's gold unfolding,
Dreamer's dream fulfilled.

Faith that takes the burden,
Grace that carries through,
Gladiolus gardens
Withered hopes renew.

Little worth the having
That gardens can not give;
Peace and joy and beauty,
Strength to do and live.

BERNICE POWELL PEARBODY

INTRODUCTION

Six years ago Mrs. Spencer and myself conceived the idea that an improvement could be made in the quality and variety of *Gladiolus* blooms that were reaching the Public through the medium of Florist establishments. To carry our designs into execution necessitated severing my connection with a banking institution and devoting my entire time to the proposition.

Surely a contrasting change of occupation. From a certainty to an uncertainty. But there was a principle involved and supporting that principle was an invincible determination to supply the very best *Gladioli* that it was possible to grow; delivered to the Florists in as perfect condition as when cut, assuring them something new and fine for display and an incentive to flower lovers to buy Better Glads.

“The end has justified the means.”

Experience taught us that to grow the highest quality of blooms it was necessary to grow the highest quality of bulbs and as the demand increased for our flowers the bulb end of the business came into being as a result. We have never grown blooms especially for competitive exhibitions. Our displays have been from the run of the field and in each instance we have been awarded FIRST and Judges have commented on the exceptional quality. It takes good bulbs to raise such blooms and in this our fourth catalog we offer you bulbs that have been conscientiously grown to give best results. Every precaution has been taken to have clean, healthy, true to name bulbs. They have been sterilized with approved formulas and bulblets in addition to sterilization were planted in sterilized soil.

Growth, prize winnings and excellent reports from satisfied customers have come from our endeavors. We thank all who have helped in this success and wish old and new friends the best Glad year for 1928.

ORCHID LADY
(From No. 5 bulb)

ORCHID LADY

A beautiful delicate orchid lavender with a frosty sheen. No lines. Deep in throat a slight touch of cream neatly blending into the flower. Blooms are large. Spikes tall and strong. This is a flower that is different and admired by all visitors. One of the "Must haves". This variety won the A. G. S. Silver Medal for the Best Seedling at N. Y. National Show and also FIRST for the Largest Flower.

Growers who have tried out this variety from East to West have reported very enthusiastically on it.

PRICES

Prices have been made as low as possible commensurate with high quality bulbs, variety, and available stock. Any slight difference between these quotations and those given at Shows or Field during summer will be adjusted in favor of purchaser. Dozen bulbs 10 times single price. 100 bulbs 7 times dozen price. 6 bulbs at dozen rate. 50 at 100 rate. Half size bulbs at 50% of large. 12 bulblets price of one large bulb.

ORDERS

ALL ORDERS ARE CASH and sent PREPAID. Those received before JANUARY 15th will have 10% additional in bulbs added. Bulbs are full size, clean, healthy, husky. True to name. Should an error occur which may happen no matter how careful one may be let me know at once so it may be rectified. I make it a point to give a customer the very best, just as I would demand myself as a purchaser.

SATISFACTION GUARANTEED

No mail orders accepted less than \$1.00. Cultural directions sent with every order.

Additional bulbs given for EARLY orders: 5% discount to members of ANY Gladiolus Society; full count; every purchaser will find on opening their package they have been well taken care of.

ORDER EARLY

This is not merely a catch phrase. Last Spring many orders had to be returned and disappointment followed as varieties wanted were sold. Early orders have the advantage of Extras and getting what you want most. I WILL NOT SUBSTITUTE unless asked to do so. Late orders should give second choice.

VISITORS

Are always welcome at the FIELD where 10 acres of Glads are grown amid beautiful surroundings. Many availed themselves of my invitation last summer and stopped during the noon hour and had lunch under the beautiful trees. Going South turn right into ELY ROAD as you approach the GREEN. Going North turn left into ELY ROAD just after passing the GREEN. Three miles south of SPRINGFIELD. Twenty-four miles north of HARTFORD.

QUALITY

We take great pride in the quality of our bulbs. ONLY clean, healthy, true to name FULL SIZE bulbs are sent out. Grown in this climate, in the best type of soil for bulb raising, you are assured vigorous bulbs that are bound to give QUALITY blooms.

AWARDS

- 1925 **American Gladiolus Society National Show.**
A. G. S. Silver Medal for Best Seedling.
First, Largest Flower in Show.
(2 entries)

(12 firsts; 6 seconds; 2 thirds; 20 entries)

REPORTS

"You know, your Gladioli improve every year and frankly I don't know of any Grower that we have more satisfaction in dealing with."—N. Y.

"My order from you received today in fine condition and I want to tell you they are the best looking Bulbs I have ever seen. I have been sending my orders in the past to one Grower. This year I split them up to see if there was any better stock grown and will say yours are away ahead of any I ever bought. Inclosed is another order."—Me.

"Bulbs received and they are beautiful. Inclosed find another order. I get the finest blooms from your bulbs always."—Mass.

"A friend touring, stopped at your field and was so impressed with the wonderful growth, bloom, tidiness, as well as your courteous treatment that I was advised to send my order to you."—Penn.

"Excellent bulbs received in excellent condition. Better than I could ask for. Here is another order."—Iowa.

"I wrote you how fine your bulbs were. Well the Blooms were wonderful."—No. Car.

MIXTURES

LONGMEADOW MIXTURE. This is composed entirely of named varieties of high quality only. Mixture often means most anything to be disposed of. Here when a variety is not considered worth while it is destroyed. This mixture is guaranteed to please. Sold out every season. NO PRIMS.

"Your mixture is in bloom and it is the first time my husband ever showed any interest in Gladioli. Every one beautiful and high class." .75 per Dozen; \$5.00 per 100; \$40.00 per 1000.

SPECIAL MIXTURE. Made up named varieties, \$7.50 per 100. Many customers reorder this, finding it "an excellent lot of bulbs." \$4.00 per 50.

EXTRA SPECIAL MIXTURE. Made up of higher priced varieties, \$10.00 per 100. If you do not care for the names this is the way to buy Glads. You get more for your money. This mixture put up under name would cost \$15.00 or more. \$5.00 per 50.

VARIETIES

The following list of bulbs contains varieties of all shades colors and types of good Gladioli that have found favor from purchasers, visitors and at Shows. Some are outstanding. Some very good, but all are good. Price does not gauge the beauty of any variety. When there is a quantity of stock of a variety the price drops as with any commodity. New varieties are high because of small amount of stock available, scaling down with the natural increase. Some drop more rapid than others as they increase faster. Some will always be high as they increase slowly.

In the first group are varieties that are especially fine. Judgement is based on collective reports and reaction of visitors on close observation. No one passes by a spike of CATHERINE COLEMAN. It is gorgeous especially when grown from a full sized bulb. Tall, large, with several open; clear salmon rose pink with just a touch of purplish penciling on lower petal it is one of the very finest Glads. This variety is a consistent winner in the pink classes and won us a Silver Cup for "Best spike in the entire Show" at Hartford. PFITZERS TRIUMPH is another of those you hesitate to leave after enjoying its ravishing beauty. It is without doubt a sensation. MINUET, "My what a beautiful thing". It is all that. A lavender that is delicate in color yet a strong sturdy grower. GLORIANA, truly glorious and one everybody wants. RITA BECK, a light pink of great merit and a prize winner. JEAN DU TAILLES, a large rose pink with deep carmine blotch, from France, won us FIRST for best blotched variety this year and never failed to get an "OH" from visitors. AFLAME, stood in wonderous array and no one could miss it. "A Wonder", it is bound to prove. MARY FREY, an early lavender with darker throat very much in shape and form to Mrs. Peters if it grows as it did in our field this year gains a place in the select. ORANGE FLAME, is a ruffled variety of exceptional merit and deserves more attention than it has received. GIANT NYMPH, is another gorgeous flower that always attracts extra attention, a pink that is useable anywhere, sturdy and large. There are two whites that are causing considerable discussion, JOERGS WHITE and MRS. F. C. HORNBERGER. Both are Fine and strictly speaking should not be in the same class for judgement. Joergs White is very large and never fails "to register". It tones on the cream. Mrs. Hornberger is white and the spikes that won the Championship cup at Boston surely were gorgeous. Grow both. KIRCHOFFS VIOLET, never has been passed by to our knowledge. It is without doubt the best of that color. Only fault is that stock is scarce and somewhat hard to grow and keep up with the demand. At the Big Show it was one of the most "asked about".

This being the home of ORCHID LADY she is left until last. Could the expressions of those who have seen her in her beauty be chronicled here you would know she had more than registered. At the Big Show, at the Connecticut Show, at the Field, and anywhere this Glad has been on exhibit we receive more questions and expressions than any. "When will the price be lower so I can get it" has been asked over and over again. To quote one Grower who had it this year "IT IS JUST GLORIOUS."

Closely following these comes some very fine varieties with many ardent admirers, and will stand the test of time. Emile

Aubrun, Sweet Rose, Florence, Fontaine, Fortuna, Saraband, Annie Laurie, Pride of Wanakah, Dr. Bennett. Longfellow is in great demand even though it has a fault of throwing many stub spikes. Its color is wonderful and won us prizes whenever exhibited. Mrs. Leon Douglas seems to have started a riot and is an enormous Glad in every sense and makes a whole Show. Princely has its admirers and is a very nice white that is different. There are many that might be mentioned here in detail of the newer things but intimate discussion would consume much space. Some yet are to be proven. Others must have a second chance as first year trial are not always final. Oftentimes has a variety that proved very poor the first year in our field, after becoming adjusted to conditions proved to be exceptionally fine. However, Vivian Mae Wilson, California, Marnia, Persia, Arabia, Mrs. Van Konyberg and Veilchenblau, Pearl of California can be highly recommended. It has been said that the latter is "one of the Best". It is a very large la france pink with a very long stem of many buds with ten to twelve blooms open at once. Such varieties are in demand as they make a big show.

In whites, Carmen Sylva is asked for more than any other of the standards. Albania is good but shorter. Marie Kunderd is the best early white. Thoth with a cream throat and Tiffany are very good.

In reds, many good ones but a chance for a hybridizer to bring a real outstanding one. LUSTRE was liked by the majority last season. Scarlet Wonder is very large and makes a fine show in the Garden but is a shorter grower. Red Fire and Crimson Glow are always reliable.

Of deeper shades Madison Cooper is always admired and Purple Glory stands as a good one without question. Splendorra though medium in size is very attractive. Uhlan Chief is a fine early red, very bright.

Yellow. The best yellow has not been produced yet. They are either moderate in price or very high. Golden Measure has the call in view of statistics with Gold looking in. Gold Eagle and Golden Dream of the newer things are good indeed but not much stock yet. Other yellows that are liked very much are Claremont and California Canary of Salbachs and his new Primrose Princess introduced in 1927. Mrs. W. E. Olmstead of Kirchoff looked very fine from one acquaintance. In the Prim class no one would want a sweeter thing than Ethlyn in the darker yellow and a bunch of Butterboy a light delicate yellow is very beautiful.

Lavender. There are many shades. The first that comes is Lavender America followed by Sweet Lavender. Later B. L. Smith always good, Ruth Huntington, and late season Mrs. F. C. Peters and Youells Favorite.

Pink. That color covers a big ground but no better all around pink Glad can be mentioned than Mrs. Doctor Norton. E. G. Hill and Paramount are others along the type of Norton that are very good. Los Angeles is gaining in favor. Marietta and Mildred Adeline "took".

We grew 700 varieties this last season and many are not listed as stock is still small and others not available until next year. Will be glad to receive inquiries relative to any variety in which you are interested.

PRICE LIST

	Each
ADELINE KENT (D) Ruffled light pink.....	\$.10
ADORATION (K) Large ruffled saffron. Fine.....	.10
ADRIATIC (K) Wine Blue, red throat.....	.10
