FOOTNOTES:

1/ Imported stocks adjusted 1,000 M/T upwards to agree with Japanese Govt figures. Difference due to rounding
2/ Adjustment a due to National Inventory taken March 31, 1950
3/ April Import figure revised.
4/ High loss figure due to change in extraction rates and conversion factors as of 1 May 1950.

NOTES:

1. Inclusive of all imported and indigenous cereals, peas and beans (excluding both indigenous and imported soybeans used in manufacture of Miso and Shoyu), sweet potatoes and white potatoes. Detailed breakdown is given in Tables 1A thru C.
2. Distribution Corporation's pipeline stocks of 250,000 M/T have been deducted from indigenous and total carryover.
3. Distribution for industrial uses includes cereals and potatoes allocated for starch, industrial alcohol, alcoholic beverages, and for other miscellaneous uses.
4. May figures are revised. June figures (except carryover) are preliminary.

July (P)	510	799	272	1,581															

FOOTNOTE:

1/ Adjusted 1,000 M/T upward to agree with Japanese Government figure. Difference due to rounding.
2/ Adjustments due to national inventory taken March 31, 1950. Adjusts error of 4,000 tons made in last year's inventory.

NOTES:

1. Substitute rice is rice which has been stored or 'frozen' in substitution for imported cereals which have been released for distribution to consumers. Government rice is all other indigenous rice collected from farmers.
2. Distribution corporation's pipeline stocks, estimated at 150,000 metric tons, have been deducted from carryover of Government stocks of indigenous rice.
3. Figures showing distribution of indigenous 'substitute rice' are based on monthly releases. Actual distribution of 'substitute rice' differs somewhat from figures shown due to distribution time lag.
4. May figures have been revised. June figures (except carryover) are preliminary.

JAPANESE FOODSTUFF POSITION

TABLE II B

Milk and Milk Products
(1000 Metric Tons of Dry Milk Equivalents)

7 July 1950

	Carryover Beginning of Month			Collections and Arrivals			Loss and Sealess			Distribution		
	Indigenous	Imported	Total	Indigenous	Imported	Total	Indigenous	Imported	Total	Indigenous	Imported	Total
March '50	2.4	1.5	3.9	2.3	-	2.3	-	-	-	2.5	-	2.5
April	1.3 1/	3.2 1/	4.5	2.3	-	2.3	-	-	-	2.2	-	2.2
May (R)	1.4	3.2	4.6	2.4	-	2.4	-	-	-	2.4	-	2.4
June (P)	1.4	3.2	4.6	2.7	-	2.7	-	-	-	2.7	-	2.7
July (P)	1.4	3.2	4.6									

FOOTNOTES:

1/ Revised in accordance with national inventory taken as of 1 April 1950. Imported stocks are damaged goods on hand which will be used as industrial raw materials.

NOTES:

1. Indigenous milk has been converted into dry milk equivalents. Milk used producing butter, cheese, and casein is excluded from indigenous supply and distribution. Indigenous milk distributed for fluid consumption or for manufacture of condensed and powdered milk is included.
2. Import carryover indicates unreleased book balance.
3. May figures are revised. June figures (except carryover) are preliminary.

May (R)	- 5.4	35.2	31.8	2.7	5.1	7.8	-	-	-	-	-	-	-	-	-	-
June 5/ (P)	- 8.7	48.3	39.6	1.1	16.4	17.5	-	-	-	-	-	-	-	-	-	-
July (P)	8.4	56.7	57.1													

FOOTNOTES:

1/ Negative stock position results from releases of third quarter requirement in January (distribution is to be made during Jan-March and it is anticipated that supply will be sufficient to meet the needs.

2/ Adjustment made in accordance with national inventory 31 March 1950. Imports adjusted to edible oil base at this time. (Purely industrial oils deleted from this report.) Indigenous includes only rapeseed oil and soybean oil.

3/ Includes 27,610 metric tons of Antarctic whale oil.

4/ Represents coconut oil, sesame oil, and peanut oil used back in January but not formally released.

5/ Stock as of 1 June 1950:

Indigenous		Imports					
Soybean oil	-864 M/T	Sesame seed oil	139 M/T	Olive Oil	62 M/T		
Rapeseed	108	Soybean	9,327	Peanut	2,716		
	-756	Rapeseed	- 298	Coconut	284		
		Cottonseed	667	Whale oil	27,299		
		Corn bran	- 284	Mustard seed	415	-	
			9,599		30,776	-	40,375

NOTES:

1. Carryover indicates unreleased stock position.
2. April & May figures are revised. June figures (except carryover) are preliminary.

April	1,490	800	128	2,418															

FOOTNOTES:

1/ Due to change of conversion factors from 1.04 to 1.06 as of 1 December 1949.
2/ Adjusted 1,000 MT upward to agree with Japanese government figure. Difference due to rounding.

NOTES:

1. Substitute rice is rice which has been stored of 'frozen' in substitution for imported cereals which have been released for distribution to consumers. Government rice is all other idigenous rice collected from farmer.
2. Distribution corporation's pipeline stocks, estimated at 150,000 metric tons, have been deducted from carryover of Government stocks of indigenous rice.
3. Figures showing distribution of indigenous 'Substitute rice' are based on monthly releases. Actual distribution of 'substitute rice' differs somewhat from figures shown due to distribution time lag.
4. February figures are revised. March figures (except carryover) are preliminary.

February (P)	2,595	-	68	2,663															

1/ Due to change of conversion factor from 1.04 to 1.06 as of 1 December 1949.

NOTES:

1. Substitute rice is rice which has been stored or "frozen" in substitution for imported cereals which have been released for distribution to consumers. Government rice is all other indigenous rice collected from farmer.
2. Distribution corporation's pipeline stocks, estimated at 150,000 metric tons, have been deducted from carryover of Government stocks of indigenous rice.
3. Figures showing distribution of indigenous "substitute rice" are based on monthly releases. Actual distribution of "substitute rice" differs somewhat from figures shown due to distribution time lag.
4. December figures are revised. January figures (except carryover) are preliminary.

NOTES:

1. Inclusive of all imported and indigenous cereals, peas and beans (excluding both indegenous and imported soy beans used in manufacture of miso and shoyu), sweet potatoes and white potatoes.
2. Detailed break down is given in Tables IA through GIF.
3. Distribution for industrial uses includes cereals and potatoes allocated for starch, industrial alcohol, alcoholic beverages, and for other miscellaneous uses.
4. Distribution corporation's pipe line stocks of 200,000M/Ts have been deducted from indigenous and total carryover from July through December; this deduction was increased to 250,000 metric tons for CY1949.

FOOTNOTE:

Notes:

1. Substitute rice is rice which has been stored or "frozen" in substitution for imported cereals which have been released for distribution to consumers. Government rice is allother indigenous rice collected from farmers.
2. Distributism corporation's pipeline stocks, estimated at 150,000 metric tons, have been deducted from carryover of Government stocks of indigenous rice.

November (P)	1,014	-	46	1,060	750	37	787	-	-	-	358	-	-	-	8	-	366	-	366
December (P)	1,406	-	75	1,481															

NOTES:

1. Substitute rice is rice which has been stored or "frozen" in substitution for imported cereals which have been released for distribution to consumers. Government rice is all other indigenous rice collected from farmers.
2. Distribution corporation's pipeline stocks, estimated at 150,000 metric tons, have been deducted from carryover of Government stocks of indigenous rice.
3. Figures showing distribution of indigenous "substitute rice" are based on monthly releases. Actual distribution of "substitute rice" differs somewhat from figures shown due to distribution time lag.
4. October figures are revised. November figures (except carryover) are preliminary.

November(P)	1,014	-	45	1,059															

NOTES:

1. Substitute rice is rice which has been stored or "frozen" in substitution for imported cereals which have been released for distribution to consumers. Government rice is all other indigenous rice collected from farmer.
2. Distribution corporation's pipeline stocks, estimated at 150,000 metric tons, have been deducted from carryover of Government stocks of indigenous rice.
3. Figures showing distribution of indigenous "substitute rice" are based on monthly releases. Actual distribution of "substitute rice" differs somewhat from figures shown due to distribution time lag.
4. September figures are revised. October figures (except carryo-ver) are preliminary.

NOTES:

1. Substitute rice is rice which has been stored or 'frozen' in institution for imported cereals which have been released for distribution to consumers. Government rice is all other indigenous rice collected from farmer.
2. Distribution corporation's pipeline stocks, estimated at 150,000 metric tons, have been deducted from carryover of Government stocks of indigenous rice.
3. Figures showing distribution of indigenous 'substitute rice' are based on monthly releases. Actual distribution of 'substitute rice' differs somewhat from figures shown due to distribution time lag.
4. May figures are revised. June requires (except carryover) are preliminary.

FOOTNOTE:
