

## NOTICE.

The PARIS Agent for the Sale of the ECONOMIST is Mr Fotheringham, 8 Rue Neuve des Capucines, where copies of the Paper can always be obtained.

This day is Published No. 6, Vol. VIII., New Series, Price 8d; by post, 9d.

THE INVESTOR'S MONTHLY MANUAL. The INVESTOR'S MONTHLY MANUAL for JUNE, gives the Highest, Lowest, and Latest Prices of Stocks, Shares, and other Securities during the Month, the mode in which the Dividend in each case is payable, the last four Dividends, &c. It also contains

A FINANCIAL RECORD OF THE MONTH; New Capital Created and Called ; Table of Railway Traffic Receipts; Notices and Reports of Stocks, Failures, Railway, Banking, Insurance, and Miscellaneous Companies. New Companies and New Capital. Prices made up to June 26. Advertisements for the next number, to be published on July 27, must be sent, to insure insertion, on or before July 25.

The December Number of the INVESTOR'S MONTHLY MANUAL December Number of the INVESTOR'S MONTHLY MANUAL gives, in addition to the usual information, the Highest and Lowest Prices of all Stocks and Shares for the last Three Years, the Latest Quotations for 1876 (so as to indicate the Exact Movement during the Twelve Months), a Complete Directory, the Names of the Markets where each Security is chiefly dealt in, a Financial History of the Year 1877, (in-cluding a Tabulated Chronicle of Events), besides Memo-randa relating to the Financial Position of Foreign and Colonial Governments, to Railways, &c., &c. In addition is furnished the Names of the Chairman and Secretaries Colonial Governments, to Railways, &c., &c. In addition is furnished the Names of the Chairman and Secretaries, or Managers of the various Companies. A copious Index is added for purposes of reference. Price 1s 4d; by post, 1s 6d. OFFICE-340 Strand.

it would be well to leave with the Bank, but the amount of which should not appear in its accounts. The first of these two points was discussed in the ECONOMIST of last week. We now propose to make some observations on the second. In doing this we may derive considerable assistance from some letters written by Mr H. H. Gibbs, of the Bank of England, and published in an appendix to the latest work of Professor Bonamy Price.\* These letters, in the places where they appear, form part of a very animated and interesting corre-spondence between Mr Gibbs and Professor B. Price, on the Bank rate, the influx and efflux of gold, the "regu-"lation of the currency," and other kindred subjects. We do not propose to enter into the consideration of these questions at this time, but to confine our remarks mainly to two points which are discussed in these letters, namely, the manner in which the Bank of England views the bankers' balances kept with it, and the proportion of these sums which they consider they may make use of in the natural way of business. The opinions of any director of the Bank, and especially of an ex-governor of such experience and standing as Mr Gibbs, are very valuable, and we therefore make no apology for quoting from a correspondence which is open to the whole world to read. The correspondence at the point we allude to turns first on the question whether the custody of such large sums as the bankers keep on their accounts at the Bank of England

further reserve should be established, the custody of which

may not cause some difficulty or even danger to the Bank. Mr Gibbs in referring to this, and to the fact that the bankers' account is really an extremely easy one to arrange for, commences by remarking that "next to "the Government account, the account of the collective " bankers is the most certain and the most intelligible.

\* Chapters on Practical Political Economy. By Bonamy Price, Professor of Political Economy in the University of Oxford. London: C. Kegan Paul and Co.

# THE ECONOMIST.

# [June 29, 1878.

"......We know of the bankers, better than of any "account in our books, what is the minimum balance "wherewith they can live. They must have x on their "account (a quantity unknown to all but us), and x - y, "therefore, never appears. But if x + y is seen, then we "know that y must remain untouched and uninvested; "must, in fact, form an addition to our reserve; x is "ours for profit if we like to use it, but y is ours only "for safe custody. Where is the danger? On the other "hand, the possession of that account is of the greatest "importance to us, as affording the most perfect and "accurate measure of how far the public can at all act "independently of ns." The italics are in the book we quote from.

Mr Gibbs continues in a later letter to explain that up to a certain point (x) the normal balance of the bankers was perfectly intelligible to the Bank; "their abnormal "balance, (y) is an element of doubt." Now these remarks of Mr Gibbs appear to us to confirm the advisability of the step for which we contended in our previous article, namely, that the bankers should decide that everything which they keep in hand beyond their working balances should not be placed to the credit of their clearing accounts with the Bank, but should be retained weekly under a separate heading, and not appear in the statements of the Bank. Such a separation would mark out at once what was really "reserve," and what was only nominally "reserve." The bankers' balances up to the point which Mr Gibbs alludes to, and which may be approximately estimated from the cutoide which may be approximately estimated from the outside, are really not reserves to them at all, they are merely "till-money" on a scale commensurate with their operations, relatively, that is, to the demands which may be made on them at any moment in settling the clearing balances. This will be seen immediately if we imagine business in the city conducted as it was pretty much up to the date when the clearing demands were still settled by the payment of the actual notes, not by means of a cheque drawn on the Bank of England. No one could call the sums held in bank notes in the safe, or the drawer near the counter, for that purpose, a "reserve." The notes were merely "till-money," and "till-money" the amounts which represent them still remain, though for their own convenience the banks have advanced a step beyond their primitive practice, and have agreed to divest themselves of the actual custody of the notes, and that the money itself should be kept in Threadneedle street. It is impossible to call the sums thus held by the Bank on behalf of the bankers, which represent cash merely held to meet immediate claims, a reserve. Nor is anything beyond these sums, the clearing balances as we may call them, of much use to the Bank. The bankers have frequently large sums on their accounts beyond what they require for settling the daily clearing demands. These sums, and they are often very large, are a real reserve to them. But in consequence of uncertainty as to the length of time it may remain with the Bank, the directors do not feel justified in employing the proportion of the sum which exceeds the "minimum balance" in the same manner as they do the proportion which they know must remain fixed. The amount, Mr Gibbs truly says—and with a most proper feeling of the line of action the Bank should always take—"is ours "only for safe custody." Now if there is an axiom to be observed in banking, it is that things should always be regarded as they really are. To have a balance in your hands which you cannot use is a hindrance to business, and not a help. The bankers' balances in 1876 fluctuated nearly ten millions between their lowest and their highest point, and as we may take the lowest as approximating to the necessary amount which has always to be maintained, it is clear that a very serious responsibility, without any corresponding advantage, must have been imposed on the Bank. To have placed these sums under a separate head-ing would, by Mr Gibbs' own showing, have been no detriment to the Bank, while the doing so would have tended to the increase of that comparatively small amount of "unused money," the smallness of which is so constant and so real a danger to business in this country,

After all, the point perhaps of most importance in the recent decision of the Bank directors, is how far their new intention of governing their dealings in the matter

of discounting by the strict rules of supply and demand can be reconciled with their old practice of protecting the reserve when needful, irrespective of the rate of interest ruling in the market. The two things seem hardly capable of being reconciled with each other. The market rate of interest may be very low, and yet a demand for bullion for export may set in which may require that the rate should be raised. In circumstances like these-and they may occur any day-the rise in the rate referred to above may prove to be an occasion of the sort. Which influence are the directors to follow? We cannot doubt that the Bank will be faithful to its old traditions and protect the reserve. But if it is the case, as we believe it to be, that it is the outside market, and not the charge made by the Bank which regulates the rate for exchange operations, then the Bank may in all fairness call on those who regulate the outside market to co-operate with it in providing a proper reserve to meet the demands which these operations are at times certain to entail. One thing is clear, that the fixing the rate of discount, and the custody of the reserve which is influenced by that rate, should be in the same hands, and we shall be glad if the recent alteration with respect to the minimum rate of discount should, in the end, bring us a step nearer a satisfactory solution of that difficult question. Apparently, the decision of the Clearing-house Committee yesterday afternoon does not take this step; and we regret it.

#### THE CONGRESS.

THE modifications to which the Treaty of San Stefano has hitherto been subjected in the Congress amount to very little. The supporters of the Government will, of course, maintain that great sacrifices have been extorted from Russia in the interest of Europe, and the Russian Government has already, by the mouth of Prince Gortchakoff, taken credit for having submitted to great sacrifices in the interest of peace. But if the Plenipoten-tiaries were now to leave Berlin, and no further measures were taken, either separately or in concert, by any of the Great Powers, the relations between Russia and Turkey would be substantially what the Treaty of San Stefano found and left them. Even apart from the compromise about Sofia, it is hard to see why a line of defence should be rendered impregnable simply by becoming the first line instead of the second. If Russia was not prevented from invading Turkey when she had to cross the Danube as well as the Balkans, she will scarcely be prevented from invading Turkey by the mere fact that she will in future have to cross the Balkans only. If, however, nothing more is done towards the settlement of the Eastern Question than has hitherto been done at Berlin, Russia will no longer be under any temptation to invade Turkey. She will be able, and what is more to the purpose, the Turks will know that she is able, to get all that she wants without invasion. It is charitable, however, on the part of the Congress to leave the Turks in no uncertainty upon this point, and lest they should be tempted to trust too much to their strategical frontier, it has been turned by anticipation. After the inclusion of Sofia in Bulgaria, the Turks are never likely to put Russia to the necessity of sending an ultimatum to Constantinople.

These remarks apply only to the arrangements already made by the Congress, supposing them to be supplemented by no others. To what extent and with what result they will be thus supplemented are points upon which it is impossible to form an opinion. The hints that have been thrown out as to a Protectorate of Turkey, to be exercised by England, may shadow forth a substantial counterpoise to the concessions made to Russia by the Salisbury-Schouvaloff agreement, or they may merely indicate a certain minimum of conventional drapery, designed to veil the nakedness of the surrender. If we assume that the former view is the correct one, and that it is part of Lord Beaconsfield's policy to substitute England for the Porte, as the power with which Russia will in future have to deal if she attacks the Ottoman dominions, it is possible that he may prove to have reckoned without his Turk. An English Protectorate would, no doubt, be equivalent to a guarantee that Turkey shall for the future be held harmless against Russia, but this advantage would probably have to be purchased by two unpleasant concessions. The acceptance of the English policy would

# THE ECONOMIST.

mean a further amputation of territory in favour of Greece, and the adoption of English principles of administration in the territory that remained. Is it quite certain that the Turks, if driven into a corner, will not prefer the treaty of San Stefano, as modified in Congress, to any supplementary treaty which the English Government may wish to conclude with them? They would certainly enjoy a larger measure of independence under the former arrangement, and they would have the satisfaction of being beholden to a Power which has beaten them, instead of to a Power which has, as they think, betrayed them. If they do prefer Russia to England, what is to prevent them from refusing to make over any territory to Greece, or to accept any suggestions from England as to their treatment of their subjects? It can hardly be a secret article of the Anglo-Russian agreement that Russia should give armed aid to England in reducing the Turks to a proper sense of their position; yet for England to enter single-handed upon a war with Turkey would be a strange sequel to a Congress assembled to maintain the peace of Europe. These considerations make us hesitate to believe that an English Protectorate of Turkey has been irrevocably determined on.

THE GAINS OF RUSSIA FROM THE WAR. IF the Russian Government is what a majority of Englishmen believe it to be, a group of ambitious and unscrupulous persons, intent upon getting advantages for their country from any occurrence, without regard to morals, it will not be deeply gratified by the result of the war. It has expended a great deal, and it has purchased scarcely anything. A Court of that kind, to judge from the innumerable memoirs of such Courts which are in existence, desires permanently three things-additional security for its possessions, which always seem to itself or to its subjects to be menaced; an increase in its standing in the world, analogous to what, in private life, is known as a rise in position; and a direct addition to its fortune, whether in estates, income, or number of tenants. For any one of these things, and especially for the first, Kings, in all times, have been willing to run great risks, to make great sacrifices, and even to commit great crimes. None of these desires, however, have, in the case of Russia, been fulfilled during this war in a degree which can be satisfactory to her statesmen, if they are moderately sensible men, and, at the same time, entirely self-seeking.

The security of Russia has not been in the slightest degree increased, has rather, if anything, been diminished by thewar. It is the peculiarity of this great State that, while she has hitherto had on the North, East, and South of her no frontiers, that is, no State capable of attacking her, she has been excessively weak towards the West. In this respect, the war has in no way improved her position. In the North, Russia remains as before, unassailable; protected by a geographical position which renders a descent on that portion of her coasts impracticable, or too full of danger for any enemy to attempt it. In the East also she remains unassailable, being protected by the vast but comparatively powerless bulk of China, which, though stronger than she was, is still unprovided with a mobile or formidable army. In the South, on the other hand, she is weaker. Through Roumania an Austrian army could enter her richest provinces, and the result of the war has been to make Roumania an Austrian dependency, deeply irritated with Russia, and compelled to look to Austria for help in any future complication. This fact is formidable, because half the Austrian Empire detests and dreads Russia, and because in the event of a Russo-Austrian war of the internecine kind the Austrian statesmen would desire to conduct the war on Russian ground, and to avail themselves of their old device, that of promising to the peasantry their land if they will but submit, a device quite successful in Gallicia, and known to have been successful by the peoples who would be first invaded, and who are by tradition Poles. A great military defence for Russia has been removed in the alienation and independence of Roumania. On the West, again, she has acquired nothing, no position, and no fortress, and has lost this, that her strength is seen not to be immeasurable. The German Staff now understand precisely what kind of army Russia could bring together to resist invasion, what are its numbers, what

are its resources, and what is the degree of its mobility. They see that it is a cumbrous army without good generals, or a thoroughly efficient staff, and are probably more ready to encounter it than they ever yet have been, a change which, whenever a new monarch mounts the German throne, may prove of the last importance. It is true the Russian army has been improved by the war, but it has not been improved to a degree which brings its average regiments up to the German level, and the revelation of the fact that it has 50,000 first-class troops does not, as against Germany, strengthen it. The number of soldiers is too few, and of militia too many. The Russian Government cannot, therefore, feel more secure upon its weak or Western side.

2. Some position has been acquired, but it is accom-panied with great drawbacks. In Western Asia the belief in the invulnerability of Turkey is no doubt dead, while the belief in the power of Russia is greatly increased; but then Turkey never was a rival to Russia, and if Russian prestige has increased, so has that of England, which now claims openly a position as protector of Western Asia, the position of a power that is, with special rights of intervention. The rise of Russia is, therefore, just like that of a man who, having become first in his county town, finds that the circumstances of the town have induced a much greater man to settle there in a position of open rivalry to himself. This is not a rise, but a fall, in comparative status. No doubt Russia has been able to serve her poor dependants in the South, and add one, or perhaps two, to their number, but then she has so served them that Austria thinks it indispensable to press on them also, and may persuade them that she is the patron to be obeyed. Bulgaria is just as likely to be Austrian as Russia; perhaps more so, because Vienna is bright with varied life. It is extremely doubtful if Russia has been aggrandised in the Balkan Peninsula at all by the result of the war, if she has not rather been lowered by the advance of Austria into Bosnia, and the direct increase of her authority in Servia, Montenegro, and above all, Greece, which was formerly quite outside the sphere of the Viennese statesmen. The Austrian claim to influence "down to Salonica," is a great deduction from the Russian claim to influence all Christian subjects of Turkey. Prince Nicholas of Montenegro for example will, it is admitted, henceforward be a dependant of Austria rather than of Russia, the cession of Antavari making Austrian favour all important. Moreover, the general status of Russia has slightly declined, because it is seen that even when elated with victory she does not consider herself equal to a war either with England or with Austria.

3. The positive gain to Russia is very slight indeed. She has, we may calculate, not lost men, for the soldiers. gone will soon be replaced, and unscrupulous states-men—and we are assuming Russia to be governed by unscrupulous and able persons—do not care about lives unless the loss of them checks recruiting either by disheartening or exhausting the people, but she has increased the mortgage on her estate by four millions a year, that is, by one-third, and has, therefore, bound herself to find that money by new taxation; that is, in a very inconvenient and possibly even dangerous way. Statesmen, even when selfish, are by no means indifferent to loss of revenue, which is to them loss of power, or to the necessity of conflicts with their people about an increase of taxation. They know they must under such circumstances retrench, and they do not like retrenchment at all, particularly retrenchment which must fall in part upon the army. They, therefore, eagerly count their gains, and they find them, in this in-stance, very little. They obtain an Asiatic seaport very valuable for transport purposes, but of very little value for Treasury purposes, as no great amount of imports can be expected at Batoum, and all receipts will probably be expected in keeping down the turbulent. will probably be expended in keeping down the turbulent and rather predatory neighbouring population, which is naturally indisposed to exchange a very weak Govern-ment for an unusually strong one. They obtain also another fortress of great repute, which will cost them something to garrison, and a strip of Armenian territory never likely to pay its expenses, and burdened by the necessity of restraining the Kurds, who will keep on marauding long after the peace is settled. It will be necessary to keep 5,000 good cavalry in Armenia for a

long time, and as Armenia is almost as far from Russia as Algeria is from France, that obligation is decidedly expensive. Cavalry so employed need artillery in support, and though many things are cheap in Russia, artillery cannot be cheap anywhere, and least of all in a country with great distances and imperfect means of transport. Upon the whole, it is doubtful if Russia will not be out of pocket by her new province, while she obtains but a small addition to her supply of conscripts, probably not fifteen thousand men. And finally, she has obtained a right to receive 40,000,0001 sterling, if she can obtain it, and may receive perhaps 3,000,000*l* a year for ten years, a sum which, if actually forthcoming in cash, will enable Baron Reutern to retire about two-thirds of the paper money added by the war to the inconvertible currency. This is all Russia obtains, except a certain amount of respect from Slavs for her efficiency as a friend, a respect which does not prevent their resenting occupation very bitterly. Nations are never grateful to great friends any more than ordinary individuals are to Providence. Both think the allpowerful assistant might do so much more. This is a very small gain, if it is not a loss, and if the Russian statesmen have really been moved only by cupidity and ambition, we can only condole with them on the very small satisfaction they have obtained, and the very high price which they have been forced to pay for it.

#### THE CRIMINAL CODE. [Second Aeticle.]

A FULL discussion of the provisions of the Criminal Code, of which we have already given a brief summary, would occupy our whole space for many weeks. It is therefore needful to select some one part as a specimen; and one which is convenient in itself, as well as germane to the matters in which readers of this journal may be presumed to take a special interest, is that which deals with offences against rights of property. This is the sixth and last of the substantive parts of the Code; the seventh, perhaps the most important of all, being given to procedure. Offences against property may be divided in a general way into two classes, according as the offender's principal object is to procure gain to himself or to inflict injury on another. The first or fraudulent kind includes theft and all kindred offences, frauds, and forgery, besides the aggravated crimes of robbery and extortion, in which violence or threats are used to effect the fraudulent purpose. Housebreaking is an offence of mixed or compound character. The unlawful breaking and entrance is in itself an invasion of the occupier's rights, and entrance is in itself an invasion of the occupier singles, an "offence against the habitation," while it is generally though not necessarily committed for the purpose of stealing something in the house. Thus it finds its place in a separate chapter under this general head. Offences against the coin, which have hitherto, and even in the Indian Penal Code, been treated as a sort of high misdemeanor against public order, are also comprised in this part of Sir James Stephen's draft, as being really a peculiar case of fraudulent injury to private property. The second or mischievous class of offences includes the different varieties of what is at present called malicious injury to property, and certain kinds of breach of contract which for special reasons have been made criminally punishable by modern statutes. Of this class we do not propose to say more at present. It may be worth observing that the summary view we have just given of the department of criminal law now before us is one which the table of contents prefixed to the Code suggests almost by simple inspection. It requires, we think, no great legal training, certainly it requires no special familiarity with criminal law, to arrive at it. Without the Code, on the other hand, or the Digest on which it is founded, many hours of labour would be required for even a tolerably practised lawyer to get any general view of the subject at all. Such is the gain effected by an orderly and scientific rearrangement of the materials of the law; a gain of the most direct, palpable, and practical kind. Yet there are still persons who affect to despise the systematic science and art of legislation as beingthey are pleased to find it-unpractical.

But in this part rearrangement is only the beginning of the work. A considerable task of redefinition had like[June 29, 1878.

wise to be undertaken, the burden of which can be appreciated only by knowing something of the present state of the law. In the existing law of theft and similar offences we have to start from conceptions ludicrously inadequate to the transactions of modern society, and distinctions which are of no possible use except to defeat justice-the mischievous effect of the rules in their original form being modified, but not entirely prevented, by a great number of piecemeal exceptions created in modern times. Larceny, embezzlement, and obtaining by false pretences, are three separate crimes; the divisions between them are of a highly artificial kind, and it is often really difficult to say which of them is the proper description of an act that beyond question ought to be punished. Some provision; but an imperfect one, has been made against the con-sequences of this difficulty. A few years ago the presenter of a Post-office warrant received and took away a larger sum than he was entitled to, the clerk having looked by mistake at the letter of advice belonging to another order. The wisdom of fifteen judges was required to decide whether the misappropriation of this money was or was not theft, and the decision in the affirmative was not unanimous. Another kind of gratuitous complication arises from the narrowness of our forefathers' imagination as to what was capable of being stolen. The common law rule confines this quality to things which may be described as chattels in the narrowest sense, or "mere per-"sonal goods." Fully two centuries ago the absurd consequences of this rule were pointed out with great vigour and straightforwardness by Hobbes. Since that time the greater part of the things excluded by the common law have been made possible subjects of larceny by statute, but the rule has never been expressly or completely abrogated. Moreover, it is still no offence to obtain by false pretences anything (for instance, a valuable dog) which is not the subject of larceny at common law.

The graft Code, while it makes the least possible change in the substance and language of the law, substitutes a complete and rational system for all this intricate patchwork. It is declared, in the first place, that "everything "whatever which is the property of any person, and " which either is or may be made moveable, shall henceforth " be capable of being stolen as soon as it becomes move-" able.' Wild animals, and plants, &c., of triffing value are, however, excepted, the former no doubt for Parliamentary rather than legal reasons. Then theft, criminal breach of trust (that term being used to replace embezzlement), and obtaining property by false pretences, receive definitions which are rationalised versions of the existing ones; the main thing, however, is that by another section the actual offence is to consist not in any one of these acts but in "fraudulent misappropriation," which includes them all; so that in a case where doubt is possible it shall no longer be necessary to decide which particular form of misappropriation has been committed. The scale of punishment for different kinds of theft, &c., which is now complicated and in some ways absurd, is reformed by taking as a guide the value of the thing stolen. A chapter on fraud includes the offences of falsifying accounts and the like, cheating (which in the legal sense means defrauding by practices calculated to deceive the public, such as selling by false weight or measure), obtaining valuable securities by false pretences, and one or two other matters of the same class. Passing on to the chapter on forgery, we find the extremely clumsy and involved provisions of the existing law on that subject replaced by about a dozen sections which, though some of them are rather long, are in every case perspicuous. Here again, as in the case of theft, we are at present living under an inadequate common law pieced out in an elaborate and yet fragmentary manner by statutory additions. At common law forgery is a misdemeanor, and therefore punishable only by fine and imprisonment. Various statutes, collected and re-enacted but not really consolidated in the so-called Consolidation Act of 1861, have made the forgery of a great number of particular documents punishable with penal servitude for seven years, fourteen years, or life. But these maximum punishments, having been fixed at different times and without consideration of the subject as a whole, stand in no rational relation to one another. Thus the forgery of an India Bond, an Exchequer Bond, or any ordinary deed is punishable with penal servitude for life,

# THE ECONOMIST.

that of a debenture with fourteen years, and that of the seal of a Court of Record or any process of a Court of Justice with only seven years' penal servitude. The Bill has a single section in place of all these provi-

sions. It assigns penal servitude for life as the maximum punishment for forging any "valuable security" (of which term a comprehensive definition has been given in a foregoing section), testamentary instruments and certain other public seals and documents; fourteen years' penal servitude for the forgery of judicial documents and in a few other cases; and seven years in all other cases in which no specific punishment is provided. It appears to us that this section might be even further simplified by omitting the second division, or throwing it into the first. For the documents protected under that head would in almost every case be "valuable securities" within the meaning of the first sub-section; so that the cases where the maximum punishment was fourteen years would really be very few, and the question arises whether it is worth while to preserve the gradation for the sake of those cases rather than leave it to judicial discretion.

A chapter on "Preparations for forgery and offences "resembling forgery" makes hardly any change in the law, but reduces to order some wonderfully verbose and ill-drawn enactments, which it is almost impossible even for a trained eye to read through as they stand.

We note with satisfaction that the Bill has been read a second time, and that the Attorney-General appears to entertain serious hopes that it may become law this Session. The possibility of so happy an event must depend, as we have already pointed out, on the wisdom and self-control to be exercised by the House in keeping the discussion in Committee within the limits of really useful criticism.

### THE ROYAL MINT AND ITS WORK IN 1877.

THE eighth annual report of the Deputy-Master of the Mint, Mr Fremantle, has just been presented to Parlia-ment, and brings down to date, in a very clear and interesting manner, all the details that the public can either desire or expect from an executive department whose officers are distinguished alike for scientific attainments and business capacity.

In surveying the work that has been done in the past year, the Deputy-Master, like the heads of most other industries whose activity is more or less affected by the course of trade, refers to the moderate demand for coin caused by the continued commercial depression. Not a single sovereign was coined in the year 1877, and the total gold coinage was restricted to 1,098,741*l* in half-sovereigns. In fact during the past three years, there has been a remarkably small demand for new supplies of gold coin in the United Kingdom. Taking the figures of previous reports, the following table gives a summary of the totals and averages of the gold coin struck in London :

Year.	Sovereigns in Value.	Half- Sovereigns in Value.	Sovereigns and Half-Sovereigns in Value.
1875	nil.	 258,120	 258,120
1876	3,318,866	 1,392,593	 4,711,459
1877	nil.	 1,098,741	 1,098,741
Total, 3 Years, 1875-77	3.318.866	 2.749,454	 6,068,320
Average	1,106,288	 916,484	 2,022,740

Whilst the new coinage of gold has been very slack in England it has been brisk enough in France, as will be seen in the following figures, which we obtain from French official returns :-

		Total Coinage of Gold in Pieces of 20 France, 10
Year.	The second second relation of	France, &c., Value in Pounds Sterling.
1875		. 9,396,480
1876		. 7,059,726
1877		. 10,207,246
		The second s

### Total, 3 Years, 1875-77 ..... 26,663,452

the English gold coinage.

Inconsiderable as the new coinage of the Royal Mint has been during the three years under review, it sinks to absolute insignificance when deduction is made from the 2,022,7401 per annum newly coined of that portion of

it which simply replaces the light gold coin, namely, 1,441,9851 per annum in 1875-7, withdrawn from circulation and sent into the Mint, through the medium of the Bank of England, for recoinage. The amount of these importations, as they are termed, of gold coin below legal tender weight, amounted to no less than 71 per cent. of the total new coinage. The following table shows the belower or not addition to the simulation of balance, or net addition to the circulation, of new coinage of home, as distinguished from colonial production

	Gross Gold	coin	ight Gold Re ed or Impor into Mint			on t	
Year.	Average.		r Re-coinage	э.	Increase.		Decrease.
1875	258,120		2,129,881				1.871.761
1876	4,711,459		638,575		4,702,885		
1877	1,098,741		1,557,500				458,759
Total, 3 years,	10.010						

1875-7 ...... 6,068,320 ... 4,325,956 ... 1,742,364 ...

that the smallness of the demand for gold coin may again be traced to the importation of sovereigns from Australia, the amount of these coins struck at the Sydney and Mel-bourne Mints which were received at the Bank of England having amounted to the following sums :--

1876		£ 2,726,000 2,075,000 2,748,000
	Total, 3 years, 1875-7 Average — —	8,549,000 2,849,667

The net additions to the gold circulation of the United Kingdom from its home and colonial mints, may therefore be finally summarised as follows :-

1875	854,239	
1876	6.147.884	
1877	3,289,241	
Total, 3 years, 1875-7	10.291 364	

Average 3,430,454 The above are the maximum possible additions to our gold circulation, and of course the gold coins which are exported must be deducted, to arrive at the actual increase of the coin in circulation. It is not practicable to estimate the probable actual figures without a separation of the amounts of gold coin and of gold bullion entering and leaving the country, which is still a desideratum in all the British Custom House returns of imports and exports of the precious metals.

Having regard to the growing magnitude of the coinage at the Sydney and Melbourne branches of the Royal Mint, it becomes an interesting inquiry whether we may not now expect to find, in a short period of years, that the Australian element, so far as regards the place where the coin was minted, will come to be the greatly preponder-ating one in the gold circulation of the United Kingdom. The gold coin which has been issued in Australia since the date when the Victoria Branch Mint was opened in 1855, and the Melbourne Branch Mint in 1872. has amounted to no less than 49,706,0001, divided as follows :

Sovereigna in Value.	1		IS	Total.
£ 39.248,500		£ 1,963,500		£ 41,212,000
8,372,000		122,500		8,494,500
	in Value. £ 39,248,500	in Value. £ 39,248,500	in Value. in Value. £ 39,248,500 1,963,500	in Value. £ 39,248,500 1,963,500

47,620,500 .. . 2,086,000 49,706,500 Disregarding fractions, it may be said that from 1855 down to May, 1878, the coinage of sovereigns in Australia has been about 48 millions sterling, against 98 millions sterling issued from the London Mint; that is to say, of the whole coinage, English and Australian together, 146 millions of sovereigns, one-third is of Australian, and two-thirds are of English mintage. As regards halfsovereigns, the coinage of Australia has been about  $2\frac{1}{2}$  millions sterling in value, against about 17 millions sterling of the same denomination of coin issued from the London Mint; so that out of  $19\frac{1}{2}$  millions value of half-sovereigns, about one-eighth is of Australian and seven-eighths are of English mintage. During the last three years the relative proportions of the Australian and English coinage of sovereigns have been almost reversed. The increase of Australian coins among the money passing from hand to hand among the mass of the

THE ECONOMIST.

people may not be without important results. We have long thought the Australian sovereign the most powerful emigration agent that a group of colonies can possess in the way of attracting fresh inhabitants to their shores.

#### THE TREATY OF 1871..

LORD GRANVILLE has sent us the following correction of a statement made in the Economist of June 1 and June 22 :--

TO THE EDITOR OF THE ECONOMIST.

SIE,—In an article on the Eastern Question, which appeared in the Economist on Saturday, some sentences are quoted from a former number. The quotation begins: " It is claimed for the Government that they have com-" pelled Russia to recognise the principle that a treaty " cannot be altered except with the consent of the signa-" tory Powers. The acceptance of this principle by Russia " in 1871 was purchased by a previous understanding that " the signatories to the Treaty of Paris would consent to " abolish the particular restriction from which Russia " had already declared herself emancipated, and it remains "/to be seen whether the present recognition of the " principle by Russia has not been bought upon similar " terms."

As a matter of fact, the acceptance of this principle by Russia in 1871 was not purchased by any previous understanding.

Not only for days, but for weeks, Count Brunnow endeavoured to obtain from me some assurance as to what line I should take in the Conference, if such a declaration were made by Russia. Acting on the decision of the Cabinet, I refused to give any information of my course until the declaration was made in sufficiently explicit terms.

It is not unlikely that the Russian Government expected some modification to be sanctioned by the Conference, inasmuch as Germany, France, Austria, and Italy had, at various times, intimated their opinion that some change ought to be made in the clause in question, but the preliminary declaration of Russia was made unconditionally as far as England was concerned.—I am, Sir, your obedient servant, GEANVILLE.

18 Carlton House terrace, S.W., June 25, 1878.

## BUSINESS NOTES.

THE INQUIRY INTO THE FINANCES OF EGYPT .- According to the latest telegrams the long pending claims against the Egyptian Daira have now been settled, and sales of Government property, to satisfy the demands of creditors, are taking place daily. It would appear, therefore, either that the Khedive has at length been compelled to bow to the decisions of the International Tribunal, and to permit the officers of the Court, whom he has hitherto defied, to enforce the executions granted against his private estate; or that he is himself disposing of his property in order to pay debts which up till now he has persistently refused to settle. In either case, there can be no doubt that in his change of temper we see the first fruits of the labours of the Commission that is now inquiring into the condition of the finances of Egypt. That Commission has pushed on its investigations with much energy and completeness, and with remarkable boldness. Not content with an inquiry into the resources and general administration of the country, it has demanded from the Khedive a full account of the manner in which he became possessed of the large estates which he claims, and which have hitherto been regarded as his private property. At the beginning of his reign the Khedive owned only some 30,000 acres of land, while the Daira now embraces about a million acres. The Commission demands to know under what conditions this enormous addition to the landed property of the Khedive was made, what price was paid for it, and how the purchase money was raised. That the inquiry is not a pleasant one for the Khedive is evident from the fact that he has offered to give up a considerable portion of this property, provided that his title to the remainder is not called in question. To this compromise the Commission, so far as is yet known, has refused to consent, and it remains to be seen whether the Khedive will yet be coerced into acceding to the demand for full information, or whether he will treat the action of the Commission

in this matter as *ultra vires* and refuse to sanction or acknowledge it. Naturally, while affairs are in this unsettled state all kinds of rumours are being circulated. For the most part, these are set afloat for the sole purpose of influencing the prices of Egyptian securities, and they should be received with distrust. There are good grounds for believing that when the present inquiry is finished we shall at last know definitely what are the real resources of Egypt, and what, under a proper system of control, she is able to pay to her foreign creditors. Till then, however, it is impossible to say what return the bondholders may expect upon their capital; and even after the investigation is concluded, much will depend upon the extent to which the recommendations of the Commission can be enforced. As yet all statements as to Egypt being able and certain to pay this or that rate of interest upon her debt, are premature.

THE EVILS OF PROTECTION .- A strong feeling in favour of the abolition of Protective duties seems to be rapidly spreading in the United States. On the one hand there is disappointment with the results of the present tariff system, which has failed to give the promised impetus to American industries, and on the other hand the principles of Free-trade are becoming more generally understood, and the fallacies of the Protectionist teaching more clearly discerned. Of this, the new Tariff Bill is a proof, and in connection with this measure a vigorous onslaught upon the protective system has been made by the New York Free-trade Club. They have prepared for presentation to the Houses of Legislature a petition, praying for an investigation into "the condition, prospects, and needs " of all the manufacturing interests of the country, and their " relations to each other," as a preliminary to any tariff legislation. Such an inquiry, as the petition proceeds to show with admirable clearness and force of reasoning, must inevitably result in a condemnation of the present Protective duties. Even the industries they were imposed to foster have not really benefited by them. "The system was introduced " under the idea that, with a little temporary assistance, the " industries selected for this favouritism would become strong " and independent. But from duties averaging about 81 per " cent. in 1789, with the term of protection limited to seven " years, the system has advanced to duties of 40, 50, 60, and 66 even 125 per cent., with the limit of time entirely removed. " The same industries are protected now as were protected in " the beginning, and, so far from being made strong and in-" dependent, they have, through all these years, compelled the " steady increase of duties by their cries for help, and are to-day " in a most distressed condition-bankruptcies, stoppages, and " strikes being the chief incidents of their deplorable history." And the unprotected industries have of course fared still worse. "If you ask us, for example," the petition goes on to say, " why the great industry of clothing manufacture does not "flourish, we point you to the tariff table for an answer. " Clothing wool is protected, a tax of 51 per cent.; dyes are protected, a tax of about 30 per cent.; lining silks are pro-" tected, a tax of 60 per cent.; velvet is protected, a tax of " 60 per cent., and so on; silk thread, 40 per cent.; spool " thread, 75 per cent.; alpaca lining, 70 per cent.; linen, 40 " per cent.; foreign cloth 60 per cent to 80 per cent.; and "even the needles and other implements carry taxes of 25 per "cent. and upwards." The agriculturist, again, who sells everything in a free market, is taxed 20 per cent. for the timber of his barn, 40 per cent. for the paint he puts on, 35 per cent. for the iron he uses; and so on. By these heavy taxes the American producer is prevented from competing in foreign markets with nations whose industries are either free or less heavily burdened, and foreign trade is further restricted because the Protective duties prevent reciprocal trade. "We " cannot export our products of iron, wool, wood, copper, &c., " to the South American and other countries because we will " not take back in return the raw wool, hemp, jute, copper, " &c., which are what those countries must buy with if they " buy at all. In a word, we cannot trade with those countries " because we refuse to trade." Moreover, the duties are not only detrimental to business, they are also destructive of the Government revenue. "Nothing can be more absurd than " the often-repeated statement that the Protective duties on " imported articles are so much revenue ' paid absolutely by " 'the foreign producer.' The duty is added to the selling " price of the goods (as it is required to be by the very idea of

# June 29, 1878.

THE ECONOMIST.

" protection), and it is paid by the American consumer. But we ask you to remember that the mere customs duties are only a " fraction of what the American consumer must pay for the privilege of protection. The cost of all home productions " is increased, and, with the average of duties at 40 per cent., " it is moderate reckoning to calculate that the American " people have had to pay during the last 12 years 20 per cent. " more for the domestic goods they have consumed than they ' would have had to pay under the tariff of 1857. Putting the " annual home manufactures at no more than 30,000,000,000 " dollars, the tax for protection over 1857, and apart from "the customs duties, must be set down at no less than " 600,000,000 dollars a year. That is, the American people "in the last 12 years have paid the enormous sum of "7,200,000,000 dollars-three times the national debt-to " foster industries which are now in a more distressed con-"dition than ever. Not one penny of this has passed into "the United States Treasury. The Government gets nothing "but the tax on foreign goods, and the amount of this during " the 12 years has not equalled one-quarter of the other sum. " It is a most liberal estimate to credit the Protective revenue "system with 1 dol. of revenue out of 4 dols. of tax." These are of course the old familiar arguments against protection, but they are here put in a form admirably fitted to attract the attention, and to move the minds, of the people, and they will probably have considerable influence in furthering the present movement in favour of greater commercial freedom.

ITALIAN BOARD OF TRADE RETURNS .- During the first three months of this year, the exports of Italy have increased largely in quantities and slightly in values, while the imports have shown a considerable falling off. This is satisfactory. But there is another feature in these trade returns in which the Italians may well be justified in taking some pride, and that is the very serviceable form in which they are presented. In no other statements do we ever remember to have seen a comprehensive endeavour to estimate the movement in quantities as well as in values. Of course, our own Board of Trade Returns give the quantities of separate articles; but no means have been found of combining tons of iron and coal with cwts of cotton and lbs of silk, so as to give a just comparison of the quantities shipped. It is true, that Denmark, from whence the exports are entirely of bulky articles, has been in the habit of stating the imports and exports in tons; but even in that case the figures have often been misleading. The Italian statements, however, as forwarded to us by the Ministry of Finance, are now arranged so as to indicate the variations both in values and in quantities, side by side, in the form set forth in the following totals :--

Inclusion of the	1111	1.5 1 2.55		Differences		
d ton dense "disob fanti	1878. (1st Quarter)	1877. (1st Quarter)	Total.	Resulting from the Different Quantities Moved.	Resulting from the Different Values of Quantities.	
and the second second	£	£	£	£	£	
Imports	11,846,440	13,193,740	-1,347,300	- 556,348	- 790,952	
Exports	10,056,708	10,047,998	+ 8,710	+ 910,206	- 901,496	

Here we find that in 1878 the Italians imported 41 per cent. less in quantities of foreign goods than in 1877, the estimated reduction in value therefrom being 556.3481. But in addition, the remaining 95% per cent. in quantities (representing the total imports in the 1878 period) were  $6\frac{1}{2}$  per cent. cheaper than in 1877, which accounts for the further saving of 790,952*l*, making together the total of 1,347,300*l*. In the exports the figures are really very curious. The return for the 1878 quarter (10,056,7081) is 8,7101 more than in the same period of 1877, a rate of increase which is merely nominal. But it is found that the additional quantities shipped were valued at 910,2061, representing an increase in those quantities of 9 per cent., while on the other hand, the value of all the merchandise exported was practically 9 per cent. less, entailing a loss of 901,4961, and this deducted from the gain on the quantities, leaves only 8,710%, as the net improvement in money. We regret that we cannot now attempt to reproduce these accounts item by item, for they are undoubtedly interesting and instructive, as illustrating the manner in which this form is applied to the different articles. Certainly, the Italians have here shown us a method of improving our own trade statistics which we should like to see adopted. It would give us a

much clearer insight into the conditions under which our foreign trade is being carried on by showing us the comparative amount of work executed, as well as the amount of remuneration for it. Last month, for instance, this country's importations increased 1,838,856*l* in value, equal to  $5\frac{3}{4}$  per cent. From a careful inspection of the difference resulting from "the larger quantities received" would be far more considerable, while the savings resulting from the diminished values of quantities would also be extensive. It would be a boon to the nation to have these unknown quantities authoritatively set at rest, and the return would be well worth the labour expended in its compilation.

THE REGISTRATION OF TRADE MARKS .- An important question as to the registration of trade marks has been raised by the decision of the Court of Appeal in the case of Orr, Ewing, and Co. This firm applied to the com-mittee appointed under the Registration Act of 1876 to have certain devices passed by them as trade marks within the meaning of the Act. Registration of four of these was refused, and thereupon Messrs Orr, Ewing, and Co. applied to the Court for an order to compel registration. The Vice-Chancellor gave judgment in their favour. His decision, however, has been reversed by the Court of Appeal, which held that the decision of the committee as to what were or were not trade marks could only be appealed against in special circumstances, though what would constitute such special circumstances they declined to specify. In giving his judgment, Lord Justice Baggally stated that Messrs Orr, Ewing, and Co. would suffer no loss from the judgment being against them, as they could apply for and obtain as a matter of right a "certificate of refusal," which would enable them to take the same measures for the protection of their trade marks as if the Registration Act had not been passed. It has, however, been pointed out that in many countries no foreigner can register a trade mark until he produces a certificate that it has already been registered in his own country. The Solicitor to the Trade Mark Protection Society thinks this difficulty might be avoided by the applicant for registration abroad showing that the law of England gave the same protection to owners of unregistered trade marks as they possessed before; but in a question of this importance it is not desirable that so vital a point should be left in doubt.

Association for the Defence of Free-trade in France.—Our "Paris Letter" last week described the preliminary meeting of this Association. Since that date, the Society has been definitely organised. Among the names on the Committee of Administration are those of MM. Joseph Garnier, Dauphinot, Tirard, Menier, Pascal-Duprat, P. Leroy-Beaulieu, Courcelle-Seneuil, and others, whose co-operation promises well for the success of the new Association. It begins operations at a moment when the need of such a body is very obvious. The rejection of the Franco-Italian Treaty of Commerce by the Chamber, though the majority in favour of doing so was but small, shows the strength of the Protectionist feeling in France. That country is one which would benefit largely by a freer Customs' tariff. Free-trade, though it benefits all, is especially an advantage to the consumer. In France, the producers of articles which can be protected are few in number, in comparison with those whose productions are beyond the reach of Protection—wine growing for instance. Free-trade would mean to these latter classes a very considerable benefit. The new Association will doubtless set to work with energy in diffusing sound views on these points, and it is to be hoped, for the advantage of France, that it will meet with success.

THE EFFECT OF COMPETITION ON AMERICAN BAIL-ROADS.—As the example of Erie is likely to be followed by other American railways, it is important to remind the public that in order to secure a dividend it is not sufficient for the English shareholders to obtain control of the line. Of course, without efficient and honest management, it is useless to expect satisfactory results; but the Grand Trunk of Canada has had this advantage for many years, and few railways have been less remunerative. The permanent difficulty of American railroads lies in their excessive number. Vast as is the amount of produce to be moved

# THE ECONOMIST.

from Chicago, and other points in the West, the routes by which it may be carried are so numerous that it is impossible to find them sufficient employment. The roads terminating at Montreal, and Boston, and Portland compete with New York, and the latter again fights Philadelphia and Baltimore. This fierce competition has led to such a reduction of rates in the last few years that it is doubtful if the through traffic has not largely been carried at a loss. During the winter months arrange-ments are often made by which, notwithstanding the rivalry, rates are maintained at a fair level, and the traffic is distributed between the different lines in fixed proportions. But as soon as spring opens the lakes and the Erie and Welland canals to navigation, the tariff has to be cut down. At present the through rate on a bushel of wheat from Chicago to New York is 12 cents per bushel by rail, against 8 cents by canal; and even with this difference it is difficult to see how the railroad earns a profit.

THE GROWTH OF THE TAXABLE INCOME OF THE COUNTRY .- Some idea of the enormous growth which has taken place during recent years in the wealth of this country may be gathered from a Parliamentary return published the other day, showing the annual values assessed to the income tax in the year 1876-77. The return is issued in continuation of a similar paper for the year 1864-65, and a comparison of the two shows the following results :-

ANNUAL	VALUES	CHARGEAE	LE.

ANNUAL VALUES	CHARGE	AB	LE.		
-	1876-7. £		1864-5. £	1	nc. or Dec. £
Lands, tithes, manors, and fisheries	65,303,760		57,002,425	+	8,301,335
Fines	104,513		204,932	-	100,419
Houses	95,875,476		63,837,324	+	32,038,152
Farms	36,170,472		17,120,224	+	19,050,248
Public dividends	39,968,177		32,012,840	+	7,955,337
Mines and ironworks	16,878,859		6,588,161	+	10,290,698
Quarries	1,064,582		584,947	+	479,635
Gas, railways, canal, and other property	50,637,462		22,547,308	+	28,090,154
Public companies	23,655,467		11,303,415	+	12,352,052
Trades and professions	136,359,320		98,777,426	+	37,581,894
Offices, salaries, and superannuations	24,281,820		20,559,367	+	3,722,453
Hereditary pensions	44,998		42,360	+	2,638
	Bearing and Bearing and a comme		Peters - Cart and Concerning Street		-

Total 490,344,906 330,580,729 + 159,764,177 In the twelve years ended March 31, 1877, the net annual values assessed to income tax increased by nearly 50 per cent., and the gross values must have increased much more, since between 1865 and 1877 the limits both of exemption and abatement under Schedule D were much extended. The return, moreover, does not include the incomes of the working classes, who do not, save in very exceptional cases, pay income tax; and these, it is known, have till lately risen very much. It is to be noted, however, that the rate of progress has slackened con-siderably during the past year or two. Compared with those of the previous year, the net assessments for 1876-7 show a decrease of fully 13,300,000*l*.

THE CATTLE DISEASES BILL .- It is probable from the prolonged discussion on the second reading of this bill that the Government will require materially to modify its provisions if they desire to make it acceptable to Parliament and the country. As it now stands it seems designed merely to prevent the introduction of cattle disease from abroad while taking no effectual means to stamp out disease in this country. Both pleuro-pneumonia and foot and mouth disease, although they may have been first introduced into this country from abroad, have, as Dr Playfair pointed out, become like scarlet fever and diphtheria, so domesticated here, that they may be regarded as home diseases. Last year 4,000 animals imported from abroad were affected, with foot and mouth disease, while the number of animals attacked by it in the United Kingdom was 693,000. It is evident, therefore, that, if we merely shut out the 4,000, we shall do very little indeed towards extirpating the disease. Yet that is practically what the bill proposes. In order to guard against infection all foreign cattle are to be slaughtered at the port of entry; but no such stringent and inflexible rule is to be enforced for the extirpation of disease at home, where it is so very prevalent. One source only of infection is to be closed while thousands of others are to be left open, and it is hopeless to expect that we can ever succeed in stamping out disease by these half measures.

SUGAR BOUNTIES .- It is impossible not to sympathise with the operative sugar refiners who laid their case before [June 29, 1878.

the Chancellor of the Exchequer on Thursday last. The demand for their labour is being curtailed by what is unquestionably a very unfair competition. France and other continental nations levy an import duty upon raw France and sugar, but allow a drawback when it is exported after being refined. From the way in which it is calculated, this drawback very largely exceeds the amount of the import duty. It is asserted that the foreign refiner gets from 2l to 3l per ton more of a drawback than he paid in duty upon the raw material, and this bounty gives him, of course, a great advantage over the English refiner, who gets no such Government subsidy. According to the statement of the workmen, the result of this is that French and other sugars are being sold here at lower prices than the English refiner can afford to accept. The trade of the latter is therefore diminishing, and must ultimately be extinguished unless something be done to put him on a level with his foreign competitor. Probably these apprehensions are somewhat exaggerated. The Chancellor of the Exchequer pointed out that while since 1873 there had been a great diminution in the export of most of our manufactures, the export of refined sugar had considerably increased. The imports of raw sugar also are well maintained, and these movements do not point to any exceptional depression in the sugar refining trade. But there can be no doubt that the system of bounties is really prejudicial to the English refiner, and what is asked on his behalf is that our Government should impose upon foreign sugars a countervailing duty equal to the amount of the bounty which the foreign refiner receives from his own Government. What is wanted is, in short, protection for the home producer. But this, it is evident, can only be obtained by taxing the home consumer. If we impose a duty of, say, 21 per ton upon foreign sugar we shall, of course, increase its price, and however much we may sympathise with the sugar refiners, it would obviously be most unjust to tax the whole community by making them pay a  $\frac{1}{4}$ d or  $\frac{1}{2}$ d per lb more for their sugar than they need do merely to keep a certain small section of our workmen in full employment. In this, as in every other case, it is to our advantage to buy in the cheapest market. That the cheapness is artificial is really nothing to us. If the French people are foolish enough to pay for us part of the cost of the sugar we consume, it is not our business to object. That their generosity is not unselfish we know. Their hope is that they will in time obtain a practical monopoly of the sugar supply, and they expect that they will then be able to increase the price of sugar sufficiently to more than recoup themselves for their present outlay. The sources of sugar supply, however, are too extended, and business competition is nowaday too keen, for this scheme ever to succeed, and our enjoyment of the present cheapness need not be marred by any apprehensions of a future artificial death.

ADMISSION TO THE CLEARING-HOUSE.-We understand that the Clearing-house Committee held last week, had before it, besides the question of the action desirable to be taken in consequence of the recent alteration in the practice of the Bank of England with regard to the minimum rate of discount, applications from four banks for admission to the Clearing-house. These banks were Brooks and Co., 81 Lombard street; the Central Bank, Limited; the London and South-Western Bank, Limited; and the Royal Bank of Scotland. The applications of the second and third named banks have been considered favourably. With regard to the Royal Bank of Scotland, the fact that the head office was not in London was given as a reason for declining. This last reason is, we venture to think, insufficient. The question is not where the business of a bank is situated, but whether its standing and monimements justify it in desiring admission standing and requirements justify it in desiring admission. A better reason for excluding the Royal Bank of Scotland would have been the charge which the Scotch banks are in the habit of making for collecting cheques drawn on them, and remitted from England. A corresponding practice exists, we believe, still in some parts of England, with respect to cheques remitted from Scotland. An arrangement for a mutual abandonment of the present practice, which, perhaps, it might be found not out of the power of the Clearing-house Committee to make, would be

# THE ECONOMIST.

for the general advantage. With the more important questions respecting regulating the rate of interest on deposits, which the Clearing-house Committee had yesterday before it, it is obvious that the stronger the Clearing-house is in upon it.

number, and the more completely it represents banking interests throughout the kingdom, the better fitted it will be to discharge the functions which will eventually devolve upon it.

The increase in the Treasury account is in preparation for the payment of the coupon of the Three per Cents. on 1st July. The augmentation in the discounts is in the branches only, and may be accounted for by the preparations for the harvest work. The bullion received from London has apparently gone into the Bank. The imports have been large. In the absence of any authentic return, it is estimated that gold, to the amount of 500,000*l*, has been already received from London this week ; in addition a house has had 200,000l sent to its Brussels establishment direct from London. This operation belongs, however, to Paris, as there is no market for English paper in Brussels. The English exchange is firmer to-day, leaving off at 25f 12c, after having fallen as low as 25f 10½c. The purchases of stocks in London for Paris scarcely permit any further recovery in the exchange, so long as the outside rate of discount here remains, as at present, fully up to the Bank of France rate, as even with the rise in the Bank of England rate to 3 per cent., the margin is hardly sufficient to induce a more proton to a monor to London for discount. The domenda movement of money to London for discount. The demands for the settlement are besides likely to be large and to produce offers of paper on London. For those reasons a fresh fall in the exchange on London is more probable than a rise. The amount of paper on London is so large that no permanent recovery can be expected. It is impossible to ascertain|what amount of paper on London is held in Paris, and any estimate can only be a guess; but a person in a position to be well informed, estimates the sum at from eight to ten millions sterling. That sum comprises what the French bankers call "disposabilities" of all kinds, whether English Treasury bills, which are largely held here, English inland bills, or foreign bills drawn on and accepted in London, and which for some time past have been purchased for Paris for temporary investments. Thus, in a general liquidation between London and Paris, there would be a balance of that amount to receive here. The balance is generally on this side, unless during such exceptional circumstances as the payment of the war indemnity; but it is considered to be larger at present than at any former time.

The Bank of France has fixed its dividend for the first six months of 1878 at 45f net, taxes deducted. This distribution appears small after the immense profits in the few years succeeding the war, when the portfolio (discounts and loans) remained constantly over 2,000 millions of francs, and the rate of discount was above 5 per cent. The dividend of the Bank for the corresponding half-year reached 200f in 1871, 170f in 1872, and 180f in 1873. The diminution is, however, insignificant, if the comparison is made with the three years preceding the war, when it averaged below 50f for the first six months.

The more favourable news of the proceedings in the Congress, and a week's fine summer weather, which has dis-pelled all fears for the wheat harvest, have encouraged speculation for the rise, and there has been a steady improvement from day to day in Rente and most other securities, including both Turkish and Egyptian. The following are to-day's closing rates, with the variations compared with day's closing rates, with the variations compared with Thursday last: — Three per Cents.,  $76.52\frac{1}{2} + 95c$ ; Fives,  $113.67\frac{1}{2}$ ; + If  $12\frac{1}{2}c$ ; Italian, 77.25 + 60c; Austrian gold Four per Cents., 65 + 1; Russian, 1870, 85 + 1; Egyptian unified, 277.50 + 13f 75c; railway bonds, 357f 50e + 7f 50e; Turkish Fives, 16.30 + 1.30; Bank of France shares, 3,155 ex div. — 10f; Banque de Paris, new shares, 732f 50c + 47f 50c; Comptoir d'Escompte, 745 + 5; Crédit Foncier, 888.75 +11f 25c; Suez Canal shares, 776f 25c + 7f 50c. It is probably well known that no treaty of commerce exists between France and the United States, the two countries applying reciprocally to each other their general tariffs. Some months back M. Menier, the economist and manufacturer, sent, at his own expense, M. Chotteau, a writer on his journal, the Reforme Economique, on a mission to the United States to agitate the question of a treaty of commerce in the chief towns of the Union. M. Chotteau appears to have been well received, and to have succeeded in forming local com-mittees which promise to send delegates to a conference, to be held in Paris in August. He has just returned to France, and was welcomed on Tuesday at a banquet given at Havre to congratulate him on the results obtained. So far as the promoters of the crusade are concerned, the whole proceedings are praiseworthy and intelligible; but one is somewhat confounded to read that this Free-trade banquet is somewhat confounded to read that this Free-trade banquet was presided over by M. Penlevey, to whom was in a great measure due the recent rejection of the treaty of commerce with Italy by the Chamber of Deputies. That deputy made the most hostile speech against the treaty, and demanded, in the name of the Havre Chamber of Commerce, that no treaties of commerce should be concluded until the new general tariff has been voted, and that the old prohibitive tariffs, which were applied before the treaties, should be re-vived rather than that any new treaty should be now con-tracted for, however short a period. He also demanded the tracted for, however short a period. He also demanded the abolition of the favoured nation clause. The sudden conver-sion of the members of the Havre Chamber of Commerce, who were present at the meeting just held, would be surprising were the motive not apparent; the town of Havre would profit by an extension of trade with the United States, and those who represent it allow their interests to outweigh their preju-dices, while they are indifferent to the trade between France and Italy. The cause of Free-from such doubtful supporters. The cause of Free-trade will derive no strength

A decision of interest to stockholders has just been given by the Paris Court of Appeal. In June, 1872, a law was passed relative to securities to bearer, lost or stolen, and indicating the procedure to be followed to recover possession or obtain duplicate titles. MM. Mayer, of Paris, money changers, bought in September last on the London Stock Exchange, through a broker, one hundred Egyptian bonds of 1868. On presenting them at the Comptoir d'Escompte in Paris for the conversion, he found that an attachment had in Paris for the conversion, he found that an attachment had been made on 25 of the bonds on the 25th June, 1872, under the law of the 15th of that month by M. Houst. MM. Mayer, in consequence, brought the present action to obtain the raising of the attachment. The plaintiffs obtained a verdict on two grounds; first, that the law only applied to French securities; this interpretation is not specified in the law but was given by implication; next, that Art. 14 of the law declares specifically that with regard to purchases or transfers previous to the passing of the law, the law cannot destroy the effect of Art. 2,280 of the Civil Code, which gives a title to articles lost or stolen when the subsequent possessor has purchased them in a public sale or market. The President of the Court of Accounts has adopted a

easure similar to that ordered some time back by the Minister of Finance with regard to the Receivers-General of taxes. He has called on all the members of the court who are directors of public companies to choose between those functions and the judicial office.

MM. Paul Leroy, Beaulieu and Maurice Block are rival candidates for seat left vacant in the Institute (Academy of Moral and Political Sciences) by the death of the Marquis d'Audiffret.

The Government will take possession from the 1st July of the lines of railway recently purchased. It is probable that the Minister of Finance will take advantage of the present prices to commence the issue of the new redeemable Three per Cents. The price at which it will be offered is now a matter

Cents. The price at which it will be offered is now a matter of speculation. Opinions vary from  $77\frac{1}{2}$  to 80. The house of Debourg, at Marseilles, has suspended pay-ment, with liabilities amounting to 1,700,000f. It had formerly frequent dealings with the domain of the Khedive, and its credit has ranked low for some time past. It is stated that the subscription for the Swedish loan, opened in Paris by the the Société des Depots et Comptes Courants, was a complete failure, and that no demands were received.

received.

## GERMANY AND AUSTRIA. (FROM OUR OWN CORRESPONDENT.)

#### VIENNA, June 25.

The mobilisation of the Austrian army is being carried into effect with much more energy than the public in general sup-poses. The newspapers have been desired not to publish poses.

# THE ECONOMIST.

statements relative to the movements of the army. We have been privately informed that 60,000 men have already been been privately informed that 60,000 men have already been posted along the frontiers, and that the order has been given that six further army divisions are to be armed and sent to the frontier. By this means more than 100,000 men will soon be prepared for war. The turn taken by events has influenced the price of Austrian stocks, which fell slightly. Of German securities, some fell in consequence of the supposed long duration of the Congress, and the difficulties which it was likely to encounter. The fall was, however, not general. To give a clear idea of the principal changes going on, we subjoin give a clear idea of the principal changes going on, we subjoin a list of the most important securities for speculation and investment, and their variations from the beginning of the year :

The banks of Austria and Germany have neither of them shown any revival of business-the dead season is influencing both.

The Hungarian Reichstag has finally accepted its proportion of the debt of 80 millions, by a majority of 58 votes. The treaty of commerce with Germany has been prolongated until the end of the year, and it is expected that within a few days the treaty of Italy will be promulgated for the same term. Now that everything has been decided, and Potectionists have at last come to the persuasion that their outcry can be of no further use, they are devoting themselves to more useful subjects. Thus, the Industrial Club has published an essay by Dr. A. Pecz, which proves that the commerce of Austria and Hungary with the East is decreasing. It seems that along the mouths of the Danube, Austria has not been able to commerce successfully with markenets. compete successfully with English merchants. The conclu-sion drawn from these facts is that the freedom of the mouths of the Danube is an interest even dearer to England than to Austria itself. Besides, it was said that Austria must do all in its power to effect a junction with the Turkish railways, and

must obtain command over all intervening territory. The Danube Navigation Company has re-opened communi-cation with all the Roumanian ports and with the city of Bukares'.

The results of the German foreign commerce during the first term of the year 1878 are another proof of the efficacy of the abolition of the duty on iron, which was, indeed, tested last year. Not only did import of most steel and iron articles not increase in consequence of the abolition of duty thereon, but it has grown less every month, whilst the export of many articles is continually increasing. The hopes of Protectionists, which were centered on the likelihood of the Chancellor's proposing the re-enactment of the duty on iron to the Reichs-tag have dwindled considerably. The fact of the bitter com-plaints heard from the United States, where an enormous duty on iron is paid, should also have some effect. The total of new money coined in German mints up to the

Ist June, 1878, amounted to :-Gold coins, 1,599,066,805 marks; silver coins, 425,514,794 marks. Stampfli, of Berne, who, fifteen years ago, when he was Presi-dent at the Swiss Confederation, proposed the acquisition of all the Swiss railways by the Federal Government, has now renewed his proposition in a publication which has just appeared.

He and his partisans have also brought a motion to the same effect into the Assembly of the Swiss National Council. The German economists have suffered a severe loss by the death of their colleague, Dr Julius Faucher, who died a few days ago at Rome. He will be remembered even in England as one of the editors of the Marring Star and as a severe loss by the one of the editors of the Morning Star, and as a true friend and follower of Richard Cobden. In Germany he was the chief promoter of free trade, and his eloquent speeches and lectures held in Vienna, as well as St Petersburg, were amongst the causes which aided the conclusion of our treaties of commerce.

#### BILLS OF SALE.

TO THE EDITOR OF THE ECONOMIST.

SIR,—Recent experience has taught me that the registra-tion of a bill of sale is not at all essential to its validity. The single indispensable incident, and that by which the force of the instrument is mainly determined, is that possession of the effects comprised in it has been obtained by the grantee prior to the occurrence of an act of bankruptcy on the part of the grantor. Thus it happens that a trader, who is the ostensible

owner of a stock of goods, and who carries on a busines apparently prosperous, may secretly assign every shilling's worth he possesses, go on indefinitely buying goods on credit, and, failing, leave his ordinary creditors with absolutely pothing in the secret nothing in the pound.

To the credit-giving world unpleasant possibilities are here disclosed, and the inquiry is an important one. How are such to be prevented? The pressing desideratum is an unambiguous

to be prevented? The pressing desideratum is an unambiguous law, which shall make the registration of this order of secu-rity in every case compulsory. It ought to be enacted in plain terms that every bill of sale must be registered, and that until it is registered, the effects comprised therein shall be "in the order and disposition" of the person who grants it. The provisions of the Bill now before the Legislature "to Consolidate and Amend the Law relating to Bills of Sale," however salutary they may be so far as they go, do not seem to me to be sufficiently stringent and inclusive with regard to registration, and, unless the Bill be yet amended, it will fail to remedy the evil to which I have ventured briefly to call your attention.—Your most obedient servant, F. K.

# THE BELGIAN ELECTIONS.

TO THE EDITOR OF THE ECONOMIST. SIR,-One of the chief factors in the result of the Belgian elections has been the new way of voting. Some of our Antwerp Liberals brought over from Sheffield, or some other place, a whole voting room. M. Malou came to Antwerp and examined it, and afterwards the two Chambers adopted it. The elections took place in the new way, which does not indeed deprive the clergy of influence, but renders their control impossible. A man who had been, I might almost say, forced to promise to vote for the Catholics by curate and wife could now, if he was unscrupulous enough, go and vote for the Liberals. This has very likely been done by a few, and that was sufficient to alter the result in some places. At Antwerp the Catholics have, during the last years, had a majority of 100 or 200 out of ten during the last years, had a majority of 100 or 200 out of ten thousand voters; the Liberals have secured this time a majority of 71. Ghent has, however, had this time the greater part in the result. M. Malou is probably the best Finance Minister either party can show; he is what we con-sider a very rich man. The late Minister for Foreign Affairs has also done his work well—notably the controversy with Germany and Prince Bismarck some years ago. However, we have, on the whole, more able men than the Catholics. The King was said to be a Catholic during the life of his father. The Catholics have, however—at least the extremes of them—shown at public banquets and elsewhere that they

of them—shown at public banquets and elsewhere that they put the Pope first. It was expected that he would take some learned curate to supervise the education of the heir presumptive; however, he has not done so, and a Liberal lawyer was appointed by him instead. So there is ground for believing that the King has taken the part which he ought to take, namely, one outside of both parties.

One of the first acts of the new Government has been to telegraph to the Pope that the Belgian Envoy at the Vatican should be maintained. In general, it is good to remember that the Liberal Government would, in any other country, be considered as still very Catholic indeed. The majority of the Catholics are, I suppose, as good citizens as we are. But some of them would be more accurately described as Ultra-But montanes.—I am Sir, respectfully, Waterloo, 24th June. F. KONIGS.

e-trade and Protection. An Inquiry into the Causes which have Retarded the General Adoption of Free-trade since its Introduction into England. By Henry Faucett, M.A., Fellow of Trinity Hall, and Professor of Political Free-trade and Protection. Economy in the University of Cambridge. London : Macmillan and Co. 1878.

THIS volume is based on a course of lectures delivered last autumn, by Professor Fawcett, at Cambridge, on Free-trade and Protection. The motive of these lectures was a desire to explain the causes which have retarded the progress of Free-trade. The supporters of Protection form the majority of the population on the continent, in America, and in many of our own colo-nies. Nothing whatever, as Professor Fawcett most truly says, is gained by under estimating the strength of the opposition to Free-trade, or by omitting to notice the arguments of its opponents; he has, accordingly, besides giving an account of the strongest arguments in favour of Protection, explained in six short, clear, and well-arranged chapters, some of the most powerful reasons in support of the opinion that com-merce, when completely unfettered by tariffs, is of greater service than it otherwise can be to those who carry it on. At first sight this last proposition looks so self-evident that to assert the contrary appears impossible. When regarded in the abstract, it strikes the observer as clearly and distinctly as a vast mountain range when seen a long way off. But as the traveller approaches nearer, as tion on the continent, in America, and in many of our own colo-

## THE ECONOMIST.

[June 29, 1878.

slowly toiling upwards, shut out from sunlight and the distant prospect, he threads the long winding defiles, he may well sometimes wonder and doubt, unless he has implicit confidence in his guide, whether the path he is following can possibly be the true track. The summit once gained, all is clear. This comparison marks the difference between our position and that of most of our foreign competitors. We have obtained a clearer air in the matter of tariffs and Custom-house duties than almost any other community. To other nations, the labour of the effort required to raise themselves above the mists of popular prejudices seems more than man can perform. The knowledge how many will complain, how much opposition has to be surmounted, stays the hand of the statesman, conscious all the while how much more he might do for his country, if his country would only permit him to do it.

Professor Fawcett is perfectly justified in comparing the motives which have stood in the way of the introduction of Free-trade in many countries, to those which have hindered the introduction of machinery into certain trades. Men see the first result, the curtailment of employment, the curtailment of their own employment, perhaps; but they do not see that the individual will ultimately gain through the gain to the community. They do not see that if life is made easier to all, all will ultimately benefit. Each man thinks only how he can direct the greatest share of the stream to his own particular mill-wheel. They argue thus, satisfied with their own success, and regardless whether there may not be a large population out of sight which is largely influenced for the worse by the selfish arrangements established to promote the prosperity of a few. The salt duty in France affords a remarkably good instance of the working of a protective duty:--

The prosperity of a tew. The safe duty in France anotas a remarkably good instance of the working of a protective duty:— The consumption of salt in France for domestic purposes may be estimated at about 360,000,000 lbs. Salt is subjected to an excise duty in France of 4s per cwt; but the duty which is imposed on foreign salt, when imported, being 33 per cent. higher than the excise duty, French salt is by this duty so effectually protected, that scarcely any salt is imported. It is affirmed on the authority of those who have an intimate practical knowledge of the salt trade, that this restriction of foreign importation increases the price of salt in France by a halfpenny a pound; consequently the protective duty imposes a tax on the French consumers of salt of at least 750,000l a year beyond the amount which the duty on salt yields to the French revenue. When it is remembered that salt is used for many purposes in manufacturing and agricultural industry, it is a moderate estimate to assume that the protective duty on salt annually imposes a fine of 1,000,000l on the French people beyond the amount which is directly levied from them by the salt tax. Thus 1,000,000l a year is taken from them, in order to give encouragement to the home manufacture of salt, and in order to make France independent of foreign supplies. It has also to be borne in mind that the protective duty, although it imposes this heavy fine on the French people, far from adding anything to the revenue, actually diminishes it to a considerable extent. If no protective duty were imposed on foreign salt, and if the excise and import duty were imposed on foreign salt, and if the excise and import duty were imposed on foreign salt would consequently be increased, and the revenue would be proportionately augmented, if the import duty were reduced to the same rate as the present excise. Not only, therefore, does Protection injure the revenue, but by unnecessarily increasing the price of salt it imposes a tax of at least 1,000,000l a year on the

One thing is certain, that Protection is never satisfied. The moment one industry is protected, another employment calls out at once, and justly complains that its own claims are as great, and its own wants as pressing, as those of its more fortunate neighbour. The instinct of selfishness is extremely quick in detecting points at which new barriers can be erected for its own advantage. It has been argued that if "Protection embraces the entire industry of the country, each industrial class is in its turn benefited, and is amply compensated for the increased dearness of various articles." Professor Fawcett, however, with great clearness in this volume, shows that this is impossible. Wine cannot be protected by an import duty in France, or corn in America. The growers of such products, therefore—and they form no small or unimportant sections of the industry of France and the United States—do not, and cannot receive any benefit from the protective systems of France and America, but on the contrary, they are injured through the fact that every thing required in their respective occupations is enhanced in price through the imposition of the protective duties instituted to benefit their neighbours. The theory that Protection assists the working classes by raising their wages, is carefully examined into also by Professor Fawcett. An answer has recently been given to this theory in the most practical manner, by the fact that, notwithstanding the recent depression in trade in England, the tide of emigration which used to flow so strongly in favour of America, has now been turned the other way, and in the year 1877 the number of those who emigrated from England to the United States only slightly exceeded those who emigrated from the United States

to England. Professor Fawcett concludes his volume with a powerful appeal in favour of a tax which one would primâ facie have expected to find him desire to see abolished, and that is the import duty on cotton goods into India. Professor Fawcett's generous efforts in behalf of the inhabitants of India are well known, but while we join with him in every desire to see the taxation which is needed for the good government of that country raised in such a manner as will weigh as lightly as possible on the scantily provided multitudes of our fellow-subjects there, we feel that considering all the circumstances this particular duty should be remitted as soon as the exigences of the case permit. Meanwhile, Professor Fawcett is perfectly in the right in calling attention to the duties charged on English goods by our colonies, and of the injury which a protective system must inflict on their interests. No greater service can be rendered to the cause of Free-trade than a clear explanation of the principles on which Free-trade rests. Professor Fawcett has done this in the volume before us with all his habitual clearness of thought and expression.

Clearing-house return	58,018,000	107,254,000	73,431,000	81,800,000	83,195,000

The amount of the "other" deposits, compared with the "other" securities, showed in 1868, an excess of 1,370,835l; in 1875, a deficiency of 200,597l; in 1876, an excess of 4,949,533l; in 1877, an excess of 2,447,689l. In 1878, there is an excess of 1,241,419l.

In 1868, there were in the Bank return increases of 392,000l in the bullion, and 229,000l in the reserve. Nevertheless, the demand incidental to the termination of the half-year, caused both money and bills to be quoted  $\frac{1}{4}$  per cent. above the previous week, at about  $\frac{1}{4}$  per cent. below the Bank minimum. The railway market was flat upon the rejection of the bill for the amalgamation of the Southern lines, and a new issue of capital by the Midland.

In 1875, apprehensions still existed in consequence of the Collie failures, but the accumulation of money began to be felt, and the foreign exchanges continued much in favour of this country.

N

In 1876, the close of the half-year brought applications for money. The week had been full of war rumours, and foreign stocks fell heavily.

In 1877, although the Bank return showed an increase of 210,000*l* in the bullion, the reserve was 377,000*l* less. But the open market rate for bills was easier at  $2\frac{1}{2}$ ,  $\frac{1}{4}$  per cent., and the discount houses contemplated reducing their deposit allowances independently of the Bank minimum. Prices were firm in the Stock Exchange—Russian decidedly so, in spite of a fall in the exchange to  $24\frac{1}{4}$ d.

The account of the Bank of France for the week ending June 27 shows the following changes :---

which has a state with state has	June 27.	June 20.	Increase.	Decrease

DISCOUNT AND MONEY MARKET .- In the past fortnight upwards of a million and a half has been taken from the Bank of England for Paris; and the fact that the open market has so fully acquiesced in yesterday's advance in the Bank published rate shows clearly that it had become needful to check this heavy drain. The rate was lowered from 3 to  $2\frac{1}{2}$ per cent. on May 30, and in the early part of this month disappointment was expressed that 2 per cent. was not established, as bills could be placed outside the Bank at 11 per cent. But this reduction in our quotations left the French houses no longer any margin of profit for the employment of their funds in London, and the recent withdrawals have, in a measure, indicated how large those funds have lately been. In fact, this market still owes Paris a considerable balance. But the present advance in our quotations again places us above the Paris level, and even 1 per cent. will have a powerful effect in restricting the withdrawals. Another matter which tends to cause an outflow of specie has been the increased volume of new loans recently brought out here, in addition to which sales of stock have, it is affirmed, been made in this city on behalf of continental houses. The fall which has been going on during the past few week's in the price of wheat has been a point in favour of cheap money during the coming autumn; but as there may possibly be drawbacks before the harvesting is completed at the end of August, we cannot yet count upon a good supply of home-grown wheat. On the other hand, there is no doubt that peace will stimulate-and, indeed, is already stimulating-the demand for money, and that it will require still higher quotations than those now current to draw forth

# THE ECONOMIST.

the requisite supplies of cash from the country into the custody of banking community. Even if the commercial demands should remain restricted for some time longer, there is a prospect that financial demands in the shape of new loans will increase rapidly. It is quite a usual circumstance that money should be more in demand at the end of the half-year, and during the Stock Exchange settlement, completed to-day, a large number of applicants have gone to the Bank to supply their needs. The rates for best bills have risen in the open market from  $\frac{1}{2}$  to  $\frac{3}{4}$  per cent. during the week, and are now but  $\frac{1}{4}$  to  $\frac{1}{2}$  per cent. below the 3 per cent. level. To-morrow is the last working day of the half-year, while Wednesday next is Consols settling-day, and money will probably be in fair request until the dividend payments on Consols, &c., which commence on Saturday next.

This week's Bank return, it will be observed, is made up three business days prior to the end of the half-year, and therefore does not exhibit to anything like their full extent the movements which are always developed during this period. Nevertheless there is an increase of nearly two millions in the discounts and advances, which is compensated to the extent of rather more than one-half by the expansion in the deposits, leaving the diminution in the reserve at : 67,5611. Meanwhile, the liabilities having increased, the proportion which the reserve bears thereto has been diminished by about 41 per cent., and that item is particularly low to withstand the heavy drain which must be looked for in the next return. During the week gold to the value of 925,000l net was taken for exportation, whereas the decrease in the coin and bullion held by the Bank is only 480,000l, thus indicating that another 445,000l has returned from the provinces. There is, however, an addition of 488,000l to the notes in circulation. Yesterday, a further 82,000l in bar gold was taken for Paris; but to-day, only 36,0001 went for that quarter.

Operations in gold bullion have been extensive, and the price has practically stood at the Bank level of  $3l \ 17s \ 10\frac{1}{2}d$  all the week. The amounts on their way to this country are by no means large, and the American exchange must rise another  $1\frac{1}{2}$  cents before anything can be expected from that quarter. The price of silver has again fallen, and in the middle of the week transactions occurred as low as  $52\frac{3}{4}d$  per oz. Although the minimum for the India Council drafts on Wednesday was lowered to  $188\frac{3}{16}d$ , nearly 3 lacs were unsold. It is now announced, however, that next week's drawings will be reduced to 30 lacs, but silver has not recovered, and this afternoon was quoted at  $52\frac{5}{8}, \frac{3}{4}d$ .

At a meeting of the Clearing-house Committee, held this afternoon, it was decided to make no alteration in the existing system of allowing interest on deposits; which will, as heretofore, be regulated by the Bank published rate. It was further determined to admit the Central Bank of London and the London and South-Western Bank to the privileges of the Clearing-house.

British Government Treasury bills will be tendered for at the Bank of England on Thursday next, July 4, for the amount of 3,601,000/—a sum apparently in excess of the bills then falling due. But the Government balance is very weak at the present time, and might be replenished with advantage. The bills will run for the usual periods of three to six months.

On Monday, tenders for the Indian  $4\frac{1}{2}$  per cent. rupee loan were opened in Calcutta. Telegraphic advices notify that the average price is  $98\frac{3}{4}$  per cent., but applicants at 97 receive 38 per cent., and it is considered that the price is somewhat low.

The Berlin Börsen Zeitung, referring to the recent demand for money in Berlin, observes that the statement of the Imperial Bank of Germany, of June 22nd, shows the influence of this, "for a fresh rise in the amount of bills held of about 775,000*l*, which goes hand-in-hand with an increase of the bank notes in circulation of nearly 500,000*l*, proves that an urgent necessity to obtain money through discounting at the Bank has existed in the past week. Although a conclusion was drawn from the Bank statement to-day on the Bourse that a rise in the rate of discount of the Reichsbank was impending, we believe such a conclusion to be completely unfounded. The statement itself shows this plainly enough, for the Bank has not at present more than about 2,850,000*l* 'uncovered' notes in circulation, and their note reserve (free of duty) amounts to 10,826,600*l*."

THE STOCK MARKETS .- Rather more movement has taken place in the prices of securities this week, but the result has been very irregular. There is no doubt that the enhanced rates paid for loans "from account to account" on the Stock Exchange has exercised a depressing influence, and this, combined with the more abundant supply of stock at the halfmonthly settlement completed to-day, has caused the carrying over charges to be more onerous, and has in some cases necessitated realisations. Hence, the welcome intelligence received on Saturday last, that the Russian Government had yielded on the matter of the Balkan boundary, which at the time produced such a marked effect upon prices, has since, in a measure been counteracted. Indeed, Home stocks are compartively depressed on the week, as they are principally affected by adverse traffic returns, by the gold withdrawals, and the rise in the Bank rate of discount. Altogether, besides the rise in European Government stocks-in which, as an exceptional feature, Russian bonds have taken a decided lead-it cannot be said that the week has particularly favoured the holder of public securities. On Monday morning the rise of Saturday was continued, and in many instances the top prices of the week were touched at that time. But upon a large withdrawal of gold, and an absence of response from the Paris Bourse there was a decided relapse in the afternoon. Russian loans, however, further improved, as the Turkish fortification of the Balkan passes was then considered to be a considerable con-Tuesday was a day of depression in Home railways, cession. and the foreign departments suffered in the morning, but revived somewhat in the afternoon. Wednesday was the "carrying-over day," and the rates charged hardened as the day proceeded, and closed high in such stocks as South-Eastern deferred, Midland, Great Western, and Egyptian unified. Russian loans, however, were comparatively scarce, which would tend to prove that recent statements respecting sales of those stocks here on foreign account have been exaggerated. Prices varied irregularly, as the expectation of a rise in the Bank rate neutralised the effect of the continued fine weather. Yesterday, the three per cent. rate was duly established ; but, after a temporary weakness, prices revived, and Russian bonds came into considerable favour, rising on average 11 per cent. This time it was said that the buying came from abroad, and one rumour mentioned that it was to pave the way for a loan for 40,000,0001. This, however, we have been unable to trace to any reliable anthority ; but everyone must know that Russia wants money, and cannot go on, as she is now, adding 40,000,000 roubles a month to her paper currency. The effect upon Russian trade would be simply disastrous. To-day, prices fluctuated rather considerably; and there was a reaction early in the afternoon, which was made good before the close of the day, when speculators showed a tendency to effect purchases for the new account. Finally, it must be considered a good sign that, with all the recent revival of speculation and wide "differences" to be paid, the settlement should have passed over without any difficulties being officially reported.

ENGLISH GOVERNMENT SECURITIES.—Until to-day, when the Funds rose  $\frac{1}{2}$  to  $\frac{1}{4}$ , there was not much movement in this department ; but now a fair improvement is to be recorded. Pro-

# THE ECONOMIST.

bably the advance would have been more considerable had money not become scarcer. It is peculiar that New and Reduced should have risen more than Consols, when the dividend on the latter is to be distributed in a week's time. Indian stocks are again firmer.

FOREIGN STOCKS.—The progress made by Congress in settling the affairs of Eastern Europe has certainly benefited the values of European stocks; and Russian, Turkish, Egyptian, and Austro-Hungarian have all risen largely. French and Italian Rentes have likewise improved, and considering the great bulk of those securities, the movement may be classed as extensive. The expansion has in a less degree been extended to Danubian, Portuguese, and even to Spanish Three per Cents., in spite of the sad death of Queen Mercedes. Some further correspondence and information has been published respecting Egyptian matters. Progress seems to be making towards a better state of things, and the rise in the stocks may partly be attri-buted thereto. With regard to Turkish, a protest has been addressed by the Council of Foreign Bondholders to our Plenipotentiaries, and their reply will be found in "Notices and Reports." The expense of the occupation of Bosnia by Austria will probably be considerable, but it does not check the rise in Austrian securities. South American loans form a contrast to the European issues, and have shown very little life. To-day, Greek rose 2, upon a telegram announcing a new loan and a proposed settlement of the old; and Russian and Hungarian were fractionally higher, but Egyptian were dull.

ENGLISH RAILWAYS.—Some rather violent changes have taken place in Home railway stocks, mostly attributed to the settlement which has followed a period wherein a marked revival of speculation has been recorded. On balance, the movements are upward, and in North British, London and Brighton, South-Eastern deferred, and Great Western, the week's advance is decided. On the other hand, Caledonian and Great Northern A stocks have been sold, and have again fallen. Next week's returns will complete the full period of the half-year, and, apart from the Southern companies, there will probably be very few which will have reason to be satisfied with the results obtained. This week's returns have certainly been disappointing. To-day, the markets were firmer for the new account, the chief rise being in Great Western, North British, Great Northern A, Manchester and Sheffield, and South-Eastern deferred, wherein the advance ranged from  $\frac{3}{4}$ to  $1\frac{1}{4}$  per cent.; but Caledonian fell  $\frac{1}{3}$ .

The following shows the principal changes for the week in the quotations of ordinary stocks, comparing the latest unofficial prices :---

AMERICAN SECURITIES .- Although prices have mostly been well supported under this head, the attention of dealers is still principally directed into European securities. The rise in Central of New Jersey Railroad shares is the leading feature, and respecting this, McCulloch's Circular states :-"85 per cent. of the parties in interest have now consented to the scheme of reconstruction. The plan of reorganization is now formally consummated, and the new issues of securities are in process of preparation."

are in process of preparation.

JOINT STOCK BANKS. — Anglo-Egyptian have risen ½; Imperial Ottoman, 1; London and County, 1; and London and Westminster, <sup>3</sup>. There has been a decline of 1 in Bank of Australasia, 1 in Bank of Egypt, and 1 in Union of London.

TELEGRAPHS .- The most important movements have been a rise of about <sup>2</sup>/<sub>4</sub> in Anglo-American, <sup>1</sup>/<sub>4</sub> in Direct United States, and <sup>1</sup>/<sub>4</sub> in Western and Brazilian.

MINES.—Richmond Consolidated have risen 1, and Rio Tinto 3; while South Caradon are 10 lower, West Chiverton 1, and Alamillos 1.

MISCELLANEOUS.—Little change has occurred:—India-Rubber, Gutta-Percha and Telegraph Construction have each risen  $\frac{1}{2}$ ; Hudson's Bay,  $\frac{1}{3}$ ; and London General Omnibus, 3; while on the other hand Imperial Continental Gas have declined 3, and Peninsular and Oriental Steam 1.

declined 3, and Peninsular and Oriental Steam 1. BULLION.—The following is taken from the circular of Messrs Pixley and Abell, dated June 27 :— Gold.—In the absence of supplies, withdrawals from the Bank have continued during the week, and the total amount taken is 892,000l. The arrivals, which have been very small, have also been sent away, and the demand for export continues. We have received 40,000l from the Brazils, 19,250l from Alexandria, and 21,820l from the West Indies. The Guadiana has taken 51,000l to the Brazils. the Brazils.

Silver has again declined in value, and some small parcels were yesterday sold at 52<sup>1</sup>/<sub>2</sub>d per oz; the price became somewhat firmer to-day, on the announcement of the reduction of the India Council

to-day, on the announcement of the reduction of the India Council drafts to 30 lakhs rupees, and business has been done at 52<sup>‡</sup>d; there is, however, not much offering, and the market is quiet. The Peninsular and Oriental steamer takes to-day about 100,000<sup>1</sup> to Calcutta and China. Mexican Dollars.—The Germanic has brought about 60,000<sup>1</sup> from New York. The price for this coin has again declined; a few parcels were placed in the early part of the week at 52<sup>‡</sup>d per oź; but yesterday only 52<sup>‡</sup>d could be obtained, and as the West India steamer has arrived this afternoon with about 200,000<sup>1</sup>

in dollars, this last rate can hardly be maintained. The Penin-sular and Oriental steamer takes about 100,000l to China and the Straits.

Exchange on India for banks' drafts at 60 days' sight is 1s 84d per rupee. Of the 40 lakhs of 'rupees of India Council bills advertised for yesterday, only 37,19,000 rupees were disposed of, viz.:—On Calcutta, 35,19,000 rupees, average rate 1s 8:211d; Bombay, 2,00,000 rupees, average rate, 1s 8:187d. Tenders on both Parida per provide the state of the st

Bombay, 2,00,000 rupees, average rate, 1s 8·187d. Tenders on both Pesidencies at 1s  $8\frac{1}{16}$ d per rupee, receive in full; no allotment below. The latest quotations of exchange from the East for bank bills at six months' sight are, from Bombay, 1s  $8\frac{1}{16}$ d; and from Calcutta, 1s  $8\frac{1}{2}$ d per rupee; from Hong Kong, 3s 10<sup>§</sup>d per dollar; and from Shanghai, 5s  $4\frac{1}{2}$ d per tael. Quotations for Bullion.—Gold—Bar gold, fine, 77s  $9\frac{1}{2}$ d per oz standard; ditto, refinable, 78s per oz std; Spanish doubloons, 74s 6d to 74s 9d per oz nominal; South American doubloons, 73s 9d per oz; United States gold coin, 76s  $4\frac{1}{2}$ d per oz standard nearest; ditto, containing 5 grains gold, 53 $\frac{1}{2}$ d per oz std nearest; Mexican dollars, 52 $\frac{1}{2}$ d per oz. Quicksilver, 6l 18s 9d to 7l; dis-count, 3 per cent. count, 3 per cent.

# NOTICES AND REPORTS. STOCKS.

776

Columbian 6 per Cent., 1863.-The Council of Foreign Bondholders have received advices from the agent at Bogota stating that \$30,000 is placed at his disposal for the service of the loan of 1863. This sum is more than sufficient to cover a year's interest, but it cannot at present be remitted, owing to a want of bills.

Dutch New 4 per Cent. Loan.—It is stated that the subscriptions to the loan for 43,000,000 florins amount to 128,000,000 florins.

Italian Tobacco Monoply.—Messrs Stern Brothers announce that coupon No. 19, due 1st July, will be paid by them on that date at the rate of 10.50 lire for each share upon which 350 lire have been paid, being at the rate of 6 per cent. per annum.

Porto Rico 6 per Cent. Treasury Bonds.—Suscriptions have been invited for 50,000 bonds of 100 pesos, or 20l each. The loan was issued to cover the cost of the redemption of slaves in the island. Repayment is to take place within twelve years by annual drawings. Turkish Loans of 1858 and 1862.—The Council of Foreign

Bondholders, having forwarded an energetic protest to her Majesty's Plenipotentiaries at Berlin, have received the following reply :

#### BERLIN, June 25.

BERLIN, June 25. SIE,—I am directed by the Marquis of Salisbury to acknowledge the receipt of your letter of the 18th inst. in which you enclose a protest on the part of the English Commissioners representing the bondholders of the Turkish loans of 1858 and 1862, against any alteration of the securities pledged to them by the Turkish Govern-ment, and I am to assure you that the matter shall receive the serious attention of her Majesty's Plenipotentiaries.—I am, Sir, your most obedient and humble servant, (Signed) PHILIP CURPER

#### PHILIP CURRIE.

(Signed) PHILIF The Right Hon. E. P. Bouverie, Council of Foreign Bondholders, 17 Moorgate street.

Uruguay Loan, 1871.—Messrs Thomson, Bonar, and Co. have received the following telegram :—" Telegram received. Amendment admitted. I am about to sign convention with Government next week.—Marice."

#### RAILWAY COMPANIES.

Alabama Great Southern.-Notice is given that the subscrip-tion list for the issue of first mortgage bonds will be closed for London on Tuesday next, and for the country applications on the day following.

Alabama Great Southern Railway 6 per Cent. First Mortgage Bonds.—Subscriptions will be received by Messrs Glyn, Mills, Donas.—Subscriptions will be received by Messrs Glyn, Mills, and Co. for \$815,000 (163,000l sterling), in bonds of \$1,000, or 200l each. The line (formerly known as the Alabama and Chatanooga), was subjected to foreclosure, and bought by the present directors. It is mentioned that the receipts for the 11½ months ended March last were \$296,947, and the expenses \$183,026. The issue price is 180l per 200l bond. Brampton and Longtown. — Vice-Chancellor Bacon has ordered a return of 33s new share to the contributories of the

ordered a return of 33s per share to the contributories of the company.

-A circular has been issued to the first Canada Southern. mortgage bondholders by Mr E. J. Halsey, stating that it has not been found possible to secure the exchange of the debenture certificates for the new bonds in London. The exchange can only be effected at the offices of the Union Trust Company, New York, and to those possessing no facilities for effecting this exchange, Mr Halsey offers his services. Furness Railway—New Preference Shares.—The directors have

decided to issue 350,000l in 41 per cent. shares, of 10l each, and to allot them rateably to the proprietors of the ordinary stock and shares. The calls will be payable as follows:—2l 10s per share on the 1st July; 2l 10s, 1st October; 2l 10s, 1st March, 1879; 2l 10s on 1st July, 1879. Great Northern Bailman New A per Cent Preference \_\_Under

Great Northern Railway, New 4 per Cent. Preference.-Under the Company's Acts of 1877, the directors are allotting at par 4 per cent. preference stock to the amount of 1,400.000/, with a per cent, preference stock to the amount of 1,400.000%, with option to convert into ordinary, not later than March 1, 1883. The stock is to be paid for in five instalments of 20 per cent. each on the following dates:—The first on 31st July next; the second on 30th November; the third on 31st March, 1879; the fourth on 31st July, 1879; and the final instalment on 29th November, 1879. Interest accrues from the date of payment payment.

Mexican.—The report for 1878 shows that the net earnings were about 234,000*l*; from this the "A" and "B" bond-holders were paid in full, and as the traffic is improving the arrears due to the "C" bondholders are hoped to be liquidated shortly.

Royal Swedish .- The net revenue for 1877 was 12,702l, and the interest on the obligations and redemption of drawn bonds absorbed 8,843l, the balance, after deduction of a small loss by exchange, being carried to reserve. The coupon due 1st May, it is still hoped, will be paid in October, and the directors anticipate that at the end of the year everything

overdue will be paid. The line, works, and material, have been kept in good order. Royal Sardinian.—It is notified that coupon No. 11 of the

obligations ("B" series) will be paid from the 1st to the 15th July at the offices of the Société Générale de Paris, 38 Lombard street, together with the bonds of the same series which were drawn on the 22nd inst. for redemption. Scinde, Punjaub, and Delhi.—The report for 1877 shows

that the earnings were 902,585l, against an expenditure of 528,640l, leaving 373,945l as net revenue—not sufficient to pay the guaranteed interest.

pay the guaranteed interest. South Indian.—The gross receipts for 1877 were 309,853l, against an expenditure of 157,648l, leaving 152,204l as net revenue, which does not cover the guaranteed interest. Toronto, Grey, and Bruce.—Mr Gordon, the president, states that the net results of the last six months will not allow of the interest due 1st July on the company's bonds to be duly met. This is owing, it is mentioned, to the continued com-mercial depression, especially in the lumber trade. This default, it is believed, will be but temporary, as trade is beginning to show signs of improvement; but a meeting of bondholders will be held shortly to determine upon the course of action to be adopted.

of action to be adopted. Waterford and Central Ireland Railway - Central of Ireland Stock.—The directors invite applications for new Central Ire-land railway stock, upon which will be paid a dividend of 5 per cent. per annum from annual receipts, of which 13,067l 17s is now on hand, secured under agreement between the Great estern and the Waterford Central of Ireland.

West Lancashire Railway-5 per Cent. Preference.-An issue of 15,000 5 per cent. terminable preference shares of 10l each is offered by this company, terminable in seven years from date of allotment.

#### BANKS.

Franco-Egyptian.-It is announced that the balance of the dividend for 1877, amounting to 7f 50c, will be paid on 1st of July.

Imperial Ottoman.—The net profits for the year ended 31st December were 302,631*l*, which, with the sum of 635,936*l* brought forward, leaves 938,567*l* at the credit of profit and loss. It is, however, deemed inexpedient to make any distribution while so much of the capital is locked up.

#### INSURANCE.

INSURANCE. Scottish Equitable Life Assurance.—For the year ended 1st March the new premiums amounted to 21,483*l*, and the total premium income to 204,345*l*, the annual income being 309,164*l*. The claims were 182,392*l*, and the invested funds 2,352,846*l*, producing an average return of 4*l* 3s 4d per cent. The result of the quinquennial investigation showed that 219,472*l* was available for distribution which has been applied as a honus available for distribution, which has been applied as a bonus addition at the rate of 1l 2s 6d for each 100l "participating policy.

British and Foreign Marine Insurance.-The company will pay an interim dividend for the half-year ended 30th June at the rate of 15 per cent. per annum.

#### MISCELLANEOUS COMPANIES.

Assam Company .- At the meeting, the report was adopted. On the 10th of January 10 per cent. was paid as an instal-ment of dividend, and a further 15 per cent. will be payable on 10th July, making 25 per cent. for the year. *Australian Agricultural.*—The net revenue earned in 1877

was 64,7091, and the amount available for dividend 57,7621. Out of this the dividend paid in February absorbed 27,500*l*, therefore the balance now available is 30,262*l*. Of this, 30,000*l* will be appropriated as a second dividend of 30s per share. Compared with 1876 the revenue account shows a falling off of 21,0231.

Canada Company .- The company will make a distribution

Canada Company.—The company will make a distribution of 3l 10s per share for the half-year. Cassel Tramways.—The directors invite subscriptions for a further issue of 1,000 shares of 2l 10s each at par. Direct Spanish Telegraph.—This company announce a reduc-tion of rates to Portugal and Gibraltar vià Bilbao. Eley Brothers.—An interim dividend is announced of 10s per share on the fully paid-up shares, and 5s a share on the shares with 5l paid up with 5l paid up.

Indian Co-operative Agency.—Capital, 20,0001, in 11 shares. It is proposed to supply people in India with goods on the co-operative principle, and direct from the manufacturer or wholesale dealer.

International Financial Society.-The directors have decided to make a payment of 2s per share on account of the profits of the year.

John Bagnall and Sons.—The scheme submitted by the joint multitee for the reconstruction of the undertaking has been committee for the reconstruction of the undertaking has been adopted. The nominal capital is reduced from 300,000*l* to 192,000*l* by the cancelling of 14,000 unissued shares, by the reduction of 16,000 existing 10*l* shares to 3*l*, and by the creation of 48,000 new preference shares of the nominal value of 3*l* per share of 3l per share.

Lower Assam Company .- A dividend of 2s 6d per share has

# THE ECONOMIST.

been declared. The prospects for the present year are stated

been declared. The prospects for the present year are stated to be promising. Medium for Sales and Exchanges, Limited.—Capital 15,000l, of which 10,000l is in ordinary shares of 10l each, and the remainder in deferred 5l shares, the last mentioned to receive no dividend until 10 per cent. has been paid in one year to the former. The principle of the association is stated to be simi-lar to that of the "Bazaar and Mart." Northern and Eastern Suburban and Industrial Dwellings.— For the year ended 31st March the directors recommend a dividend at the rate of 7 per cent., placing 250l to the credit of building depreciation fund, and 1,000l to reserve, and leaving a small balance. Queensland Investment and Land Mortgage, Limited. —

Queensland Investment and Land Mortgage, Limited. — Capital, 1,000,000l in 10l shares, of which 50,000 are to be first issued. The company is formed to conduct a business, of which, making advances on lands, buildings, and produce, and acting as agents between this country and the colony will be the principal features.

Rhymney Iron.—The annual report shows a total loss on the twelve months of 9,620*l*, but this sum includes interest of debentures 4,150*l*. The course of trade "has been continuously unfavourable.'

Russian 51 per Cent. Land Mortgage Bonds.—Messrs Thomson, Bonar, and Co. announce the numbers of 22 bonds drawn at the ninth drawing of the second series, for 480,000*l*, which are payable at par on 13th August at their offices. The ninth coupon of bonds of the above series falls due on the same date.

William Slack and Son, Limited.-Capital, 60,0001, in 101 shares. It is intended to purchase and carry on the business of the above-mentioned firm, at Chesterfield. MINING COMPANIES.

Lunkoj Gold Mining, Limited.—Capital, 12,000l, in 1l shares. It is proposed to work a gold mine in Transylvania, Hungary.

AVERAGES OF GRAIN. The following is a statement showing the quantities sold and the average price of British Corn (Imperial measure), as received from the Inspectors and Officers of Excise, conformably to the Act of the 27th and 28th Victoria, cap. 87, in the week ended June 22, 1878 :-

#### COMMERCIAL REVIEW. FRIDAY NIGHT.

The general report from the manufacturing districts just now is that buyers would operate with greater freedom if sellers were willing to put up with the quotations ruling a few weeks ago, and in the Cotton trade there does appear to be weeks ago, and in the Cotton trade there does appear to be some tendency to give way. While the strike was in progress in Lancashire the sales of raw cotton in Liverpool averaged from 10,000 to 12,000 bales a day, but now that the mills are again at work, the transactions are reduced to 6,000 or 7,000 bales daily, and prices are falling. Had manufacturers pur-chased only when they required cotton the heavy business and the advance in prices ought to have some news, but all chased only when they required cotton the heavy business and the advance in prices ought to have come now; but all through the strike the belief was entertained that its termina-tion would come very shortly, and speculation was set on foot in anticipation of that event. Consequently, the consumma-tion of those expectations has produced realisations. At Manchester, the absence of Indian and Chinese purchases is causing anxiety and prices are likewise the turn easier for Manchester, the absence of Indian and Chinese purchases is causing anxiety, and prices are likewise the turn easier for manufactured goods. Sellers, however, may more readily concede something now that the cost of production is re-duced. The Wool trade is steadier in tone, and prices for raw materials keep firm. The competition of foreign buyers of wool is considerable, and this helps to sustain the price of the raw material. Yarns are also in request, while in the Yorkshire cloth-halls most descriptions sell quietly, with an occasional appearance of activity. At Nottingham, the lace trade is quiet, although the finer weather may possibly increase the demand; while in the Belfast linen trade prices are firmer, and business exhibits some tendency to revive. In the Corn markets, both in London and the provinces, the

effect of the warm forcing weather, coming upon the recent ample supply of wet, has been still further to depress quotations. Last Monday the drop registered on the week was from 1s to 2s in wheat, 1s in barley, with somewhat similar reductions both in oats and maize. On Wednesday and to-day, the tendency was still adverse to holders, who must have lost large sums of money within the past few weeks. The Produce markets are fairly busy, and sugar is advancing. Coffee, jute, turpentine, and petroleum are quoted lower. In Metals, both copper and tin are higher than last week, and pig iron is steady. The Coal market is dull, but without actual change.

### THE COTTON TRADE.

#### LIVERPOOL .- JUNE 27.

The cotton market has been very quite throughout the week, with a limited business and a slight decline in prices. The Bank rate has been raised to-day from  $2\frac{1}{2}$  to 3 per cent. In Sea Island a large business has been done. Holders show firmness, and have obtained full prices. For American the demand has been limited throughout the week, and quotations are reduced  $\frac{1}{16}$ d to  $\frac{1}{3}$ d per lb. In Brazilian the sales have been small, but quotations are unchanged. Egyptian has been in moderate demand, and previous quota-tions are resumed. West Indian and Peruvian are dull of sale, at previous rates. African remains without change. East sale, at previous rates. African remains without change. East Indian has been in limited request, and, being more freely offered, prices have slightly favoured buyers, but quotations are unchanged.

are unchanged. "Futures" have ruled quiet all week, closing steady at about  $\frac{1}{3}$  per lb below last Thursday's prices. The latest transactions are—Deliveries: American, any port, I.m.c., June,  $6\frac{3}{16}$ d; June-July,  $6\frac{1}{16}$ d; July-Aug.,  $6\frac{3}{16}$ d; Aug.-Sept.,  $6\frac{1}{4}$ d; Sept.-Oct.,  $6\frac{3}{3}$ d; Oct.-Nov.,  $6\frac{1}{4}$ d. Shipments: American, any port, I.m.c., May-June,  $6\frac{1}{4}$ d; new crop, Oct.-Nov.,  $6\frac{5}{3}\frac{1}{3}$ d— Oomrawuttee, G.F., F.F.C., June-July, Suez.,  $5\frac{1}{4}$ d per lb. The sales of the week amount to 36,060 bales, of which 3,090 are on speculation, and 1,670 declared for export; the forwarded is 3,580 bales, of which 2,660 are American, 790 Egyptian, 80 Smyrna, and 50 bales Surat, which makes the takings of the trade 34,880 bales. JUNE 28.—The sales to-day will probably amount to about

JUNE 28.—The sales	to-day will	probably	amount	to	about
6,000 bales, the market	without ch	ange.

MANCHESTER, June 27.—We have to report a very dull and disappointing market. In all departments of cloth, merchants seem to have satisfied their requirements, and are now quite indifferent about further transactions. There is no doubt that a considerable relief has been experienced during the late strike by the clearing out of extensive stocks, but now that the mills are open again there seems no other prospect but that of again accumulating the cloth as fast as it is made, a state of things that does not say much for the prosperity of the trade in the immediate future. In yarns, both for export and home trade, values remain nominally unchanged, but the amount of business doing is very small. Con

### THE WOOL TRADE.

English wool still comes to hand very slowly, farmers awaiting the fairs now close at hand. There has been rather more inquiry from the manufacturing districts, but prices are too low there to lead to any amount of business.

The colonial wool sales continue to progress very firmly, all kinds being disposed of at hardening prices, scoured Cape espe-cially showing a great improvement, also the better sorts of washed fleece and grease.

At Liverpool the wool market has been somewhat quieter this week, still a moderate amount of business for immediate con-sumption has been done at firm rates. In River Plate sheepskins extensive transactions have taken place at advanced price which augur well for the public sales to be held on the 10th July.

July. There was not much wool changing hands at Bradford yester-day, and the general tone of the market was quieter. Buying wool in the country, and selling in Bradford at current rates, would result in loss. Staplers, therefore, were little disposed to make any concession, and spinners are equally indisposed to buy. The result was a state of business which makes it impossible to quote prices. During the last few days there has, as usual, been a good deal of speculation as to what effect Leicester fair would have ; but yesterday's market shows that it has had no influence one way or the other. Mohair has again changed hands at prices which indicate a hardening tendency. In yarns there is still some inclination on the part of merchants to operate at rates a

# THE ECONOMIST.

little in advance of the lowest price paid. The response from abroad to the higher prices has been very languid. Offers are not wanting on export account for most of the different varieties of yarn which have latterly been in request, but the prices do not come up to the standard of sellers, and consequently the contracts placed have neither been many nor large. Less busi-ness has been transacted in supers 30s, colours, mottles, and lustres, while in the leading numbers of twofold yarns the trade done has been slow. On home account a fair trade continues to be done. In the piece trade business continues sluggish, and new contracts are given out in a sparing manner. Some pur-chases are being made for the French market at low prices, while no improvement can be noted in what is doing for the German, American, or home branches.

In the Leeds cloth-halls the principal articles in request are medium meltons, white goods of superior quality, and a few fancy tweeds. Owing to the enhanced rates obtained for clothfancy tweeds. Owing to the enhanced rates obtained for cloth-ing wools, all fabrics into which the higher classes of wool enter in the manufacture, are sought after, as it is evident that the new productions of a similar class cannot be offered for sale at the present rates. Fancy tweeds and meltons are also looking up a little in the market, though the home trade is still in a depressed state throughout the country. There is an inquiry for worsted coatings, though the holders of this class of goods complain that prices are so low as to be practically unremune-rative. The shipping merchants are confining their operations within very narrow compass, this being partly owing to the ap-proach of the half-yearly stock-taking.

### IRON AND COAL TRADES.

Taken as a whole, the Iron trade is a little better employed than for some time past, and prices appear steadier. Pig metal is more wanted, and although this can mostly be obtained at last week's quotations, some makers demand more. At Middlesbrough, "No. 1" is quoted at 42s 6d to 43s, "No. 3" at 39s, "No. 4" at 38s, less commission, and more considerable amounts are being taken for home consumption. Both in the North and in South Wales business is doing in railway metal, India having purchased considerable quantities. European and South American ports are also mentioned to which clearances have been made. The Durham plate makers are fairly busy, 6l 2s 6d being quoted; and boiler-plates are 7l 2s 6d to 7l 5s, less commission. Steel is still in some request. There cannot be said to be much revival in the demand for iron bars cannot be said to be much revival in the demand for iron bars and tin plates. Reports from Sheffield are still comparatively gloomy, June being generally one of the slackest months of the year in that district. The demand for heavy goods of Sheffield make is particularly small; and in plates, railway iron and steel, the competition of other districts nearer ship-ping ports has been severely felt. The Sheffield edge-tool makers have, however, received some good orders from Russia and Australia. Birmingham, Wolverhampton, and surround-ing districts, do not obtain orders as fast as was hoped for when Congress became a certainty business being partial in when Congress became a certainty, business being partial in

those quarters. The Coal trade is slack; and gloomy accounts come from Northumberland and Durham. The only display of activity is shown in the South Wales steam-coal pits, for the out-put of which the demand increases rather than not. In London, house coals have remained without variation this week.

#### LABOUR.

COTTON .- The termination of the strike in North and North-East Lancashire appears to have given great satisfac-tion to all concerned, and work has been resumed in all districts with considerable energy. At Chorley a general reduc-tion of 10 per cent. in weaver's wages has been decided upon in accordance with the arrangement of 1875, when it was in accordance with the arrangement of 1875, when it was agreed to vary rates when any alteration was made in the Blackburn list. At Bury, advices state that the weavers have all gone back to work at the 5 per cent. drop; but the spinners are prolonging the struggle, they having funds in hand which will last them more than a month. In the Rosendale district, the hands employed at the Globe and Britannia mills, after a strike of a month, have returned to work at a 10 per cent reduction

work at a 10 per cent. reduction. COAL.—At the Wharncliffe Silkstone Colliery, where notice of a proposed reduction of fourpence per ton, or twenty per

cent. in wages has been issued, the men have agreed to make some concession, but have asked to have the amount of that concession reduced. The coal miners in North Devon, it is stated, are to receive notice of a reduction of 10 per cent. is mentioned that Lord Durham has lost over 20,0001 by keeping his collieries working.

### THE CORN TRADE.

#### MARK LANE, FRIDAY EVENING.

779

The importations from abroad have not been so heavy as in the preceding week, but the principal markets have still been adversely affected by the weight of recent arrivals, a large proportion of which remains undisposed of. The quantity of grain on the water has further diminished, as also have the supplies of wheat and maize in view at the principal points of collection in America. But from these considerations atten-tion is now diverted by the continuance of fine forcing weather, both here and in France. Already the crops have perceptibly improved, especially in the North, where a fair average yield of wheat appears now to be expected, should no adverse change in the weather occur; there are, however, still adverse change in the weather occur; there are, however, still complaints from many parts of the appearance of the crops, and doubts are expressed whether under the most favourable circumstances the effects of the late bad weather can be entirely eradicated. On the whole, however, hopes are very considerably revived in this country, whilst the official estimates published in France put the yield of wheat in round numbers at 100,000,000 hectolitres, or about 34,500,000 qrs. Under these influences, the trade shows increasing heaviness, and at a further decline of 1s to 2s per qr fully, sales are extremely difficult to close. On Is to 2s per qr fully, sales are extremely difficult to close. On the spot 50s is now quite an extreme quotation for prime English white wheats, as also is 44s to 45s for red. Saxonka ranges from 38s to 42s, St Petersburg from 31s to 35s, Kubanka at 38s to 39s, American spring 43s to 45s, good Adelaide 50s. Off coast Odessa Ghirka has been sold at 36s 6d, Ghenighesk at 35s, Marianople at 37s 3d, Rostoff at 29s 3d per 492 has American spring from 45s for for dome 32s 3d per 492 lbs. American spring from 45s for fine, down to 41s 6d for No. 2 per 480 lbs. On passage and for shipment business has been done in Saxonka wheat at 40s 6d and 40s 3d, in St Petersburg at 36s to 35s 6d per 492 lbs, and red winter at 42s to 41s per 480 lbs. Flour meets no better demand than wheat and mater are called a domain and that the second state of the second stat wheat, and rates are equally depressed, American declining 6d per barrel, and other descriptions 1s to 2s per sack. In malting barley there has not been sufficient passing to establish any change in quotations, but grinding descriptions have arrived largely, and from the south-east of Europe prices are 6d to 1s lower in most positions. Off coast, Orfored has sold at 19s 3d, and Taganrog for shipment at 19s 9d per 400 lbs, usual floating terms to the United Kingdom. Beans come forward sparingly, and the quantity on the way keeps small; holders, consequently, do not press sales, and rates are unchanged. On the other hand buyers hold off, and quotations are in a great measure nominal. Some arrivals of Canadian peas have taken place, and to effect sales is per quarter less has been taken. Floating parcels meet very little attention. Maize has ruled very dull in meet very little attention. Maize has ruled very dull in all positions. Sales have only been practicable to a small extent, and at reduced rates. Spot parcels of American mixed 22s 9d to 23s 6d; coast cargoes from 23s 9d down to 22s 6d; and on passage at 23s 6d and 23s per 480 lbs. Danubian to arrive has sold at 24s per 480 lbs. Oats have arrived in London pretty freely, and have met a very slow sale. Prices very irregular, and showing a reduction of 6d to 1s on the week. Some undried Konigsburg are reported to have sold as low as 15s 9d, but 16s to 16s 6d have been the more general rates for common light Russian. The agricultural seed trade is almost at a standstill, and quotations must be considered as nominal. meet very little attention. Maize has ruled very standstill, and quotations must be considered as nominal.

#### NEW YORK, June 14.

There was a moderately active flour market early in the week, and the business in shipping extras was mainly at \$4.25 to \$4.30 for common English brands, and \$5.40 to \$5.50 for good West India brands. There was also a good business to the trade. But latterly the market has shown weakness. The demand from all quarters has diminished, but holders, encouraged by reduced production, have refrained from pressing sales. Rye flour and corn meal were in good demand and firmer. To-day, there was a further decline of 5c to 10c for common extras, and business dull; Southern flours firm. The wheat market has been dull, and prices have slowly but steadily declined. Yesterday, prices gave way pretty sharply, leading to more business. To-day, prices were again 1c to 2c lower. Indian corn has also materially declined, under a pressure to sell. Yesterday, No. 2 mixed sold at 47c for prime old, 43½c to 44c for prime new. To-day, there was a further decline of ½c to 1c. Rye has been more active at 63½c to 65½c for prime to choice Western, and 67c to 68c for prime State and Canada. Barley is without feature event a decline in and Canada. Barley is without feature, except a decline in Western feeding. Oats were active and firm early in the week. To-day the market was depressed.

The visible supply of grain, comprising the stocks in granary at the principal points of accumulation at lake and seaboard ports, and in transit by lake, canal, and rail, June 8, 1878, was as follows :-

## COLONIAL AND FOREIGN PRODUCE MARKETS. FOR REPORT OF THIS DAY'S MARKET SEE " POSTSCRIPT.

MINCING LANE, FRIDAY MORNING.

SUGAR.-An advance of 3d to 6d per cwt has been in many case paid. There is some speculative demand for low brown sorts, and a good business has again been done in floating cargoes for this kingdom. The reduced supply of refining West India now has the effect of checking business. On Tuesday the sales reached 2,300 kingdom. The reduced supply of refining West India now has the effect of checking business. On Tuesday the sales reached 2,300 casks. During the two following days, 839 casks. Crystalised Demerara, 26s to 29s 6d, including 1,650 bags. Barbadoes, 20s to 24s 6d. Refining sorts of West India, 19s to 22s. A landed cargo of St Vincent's at 20s. Two floating cargoes for the United Kingdom at 20s for Trinidad and St Lucia. One of 380 tons Trinidad concrete at 19s. Refined sugars have advanced more than raw, but no further change can be reported in foreign goods or Beet crystals. The landings of West India here were large during last week, but the stock of these continues moderate by contrast with last year. There has been some further increase in the stock of the United Kingdom, but it is not much above average, and the deliveries keep steady. much above average, and the deliveries keep steady.

IMPORTS and DELIVERIN	ES of Su	GAR	to June	22,	with STO	CES	on hand	
	1878.		1877.		1876.		1875.	-
Importedtons	123,600		144,200		119,600		132,000	
Delivered	145,700		115,900		117,950		126,200

Do (U. K.)	188,000		172,000		180,000		179,800	

Mauritius.-1,766 bags syrups by auction part sold at 18s to 19s for brown.

Penang .- Of 7,691 bags native 1,464 bags sold at 16s 3d for low brown.

Manila.—On the spot 1,000 tons unclayed (Taal and Zebu) at 16s 6d to 17s. 1,000 tons Taal to arrive at 17s.

Jaggery.—Several parcels have sold on the spot : Cane, at 16s to 16s  $7\frac{1}{4}d$  for low to good.

China.-10,633 bags sold, at and after the sale, at 17s to 20s 6d for low brown to middling soft greyish yellow.

Other Foreign.-2,205 bags grainy St Croix by auction realised 268 6d to 288 6d. Privately, 200 casks Guadeloupe crystals sold at 27s 6d. 2,000 bags low brown Bahia at 16s.

Floating Cargoes.-Two of West India quoted above. One of 350 casks 2,700 bags centrifugal Cuba at 25s; one of 5,500 bags brown Bahia at 15s 9d for the United Kingdom. Other cargoes, articulars of which do not transpire, including one of grainy Cuba for the continent.

Refined .- The market has been active here and in the Clyde, the trade buying freely, and prices are now 1s above last Friday's. 1,746 Dutch loaves sold by auction at 28s 6d. Some sales are reported in French loaves. Fine at 28s 3d to 28s 6d; Say's, 29s per cwt.

Beet Sugar.—Transactions are limited. The only price reported for Austrian of the new crop for late delivery has been 20s 6d per cwt for 88 per cent. MoLASSES.-30 puncheons Barbadoes sold at the high price of

13s 6d per cwt.

-The business this week consists of about 300 puncheons Rum West India, chiefly Jamaica. Prices not given. Some Demerara proof at 1s 6d per proof gallon, being lower. The stock of Jamaica rum is large, viz., 14,600 puncheons, and consumption has not shown any increase. Demerara and other West India the same the same.

CocoA.—The stock of colonial by latest return had further decreased to 16,500 bags, and the deliveries are large. Stock of decreased to 10,000 bags, and the deliveries are large. Stock of foreign, 2,600 bags, against an average of 13,050 bags in the three previous years at same time. The public sales on Tuesday were chiefly Grenada, of which 1,336 bags sold at 2s to 4s advance, from 82s to 89s for low to good. 94 bags Trinidad about one-third part sold at 90s. 82 bags Carupano were taken in at 105s to 110s per cwt. The high prices of Gagraguit prevent further heringes The high prices of Guayaquil prevent further business.

The high prices of Guayaquil prevent further business. COFFEE.—Further large supplies of foreign brought forward have been chiefly taken in. The market is dull, with stocks above average, and an absence of that speculative feeling which pre-vailed in previous years. Plantation Ceylon and East India are about 2s per cwt lower than last Friday. 347 casks 52 barrels 193 bags of the former by auction sold as follows: low middling to middling colory, 103s to 108s; good middling to fine bold, 109s to 118s; pale grey, medium, 103s to 105s 6d; bold, 106s to 110s; small berry in proportion. 1,425 cases 3,098 bags 24 bales East India part sold as follows: Naidoobatum, medium pale and greyish, 100s 6d to 102s; other kinds: medium, 100s to 104s; very pale, 96s to 99s; bold, 105s to 110s, as in quality; small berry in proportion. Pale and rather small greenish, from Bombay, 94s 6d to 98s; Mysore, medium, 117s to 117s 6d; bold, 120s to 122s. 112 packages Mocha out. 23 casks 151 barrels 673 bags Jamaica were

# June 29, 1878.

# THE ECONOMIST.

chiefly withdrawn. A few lots sold af 75s for good ordinary. 5,065 bags foreign descriptions were chiefly bought in. A few parcels sold, including ordinary Guatimala, at 76s 6d to 77s. Costa Rica low middling, 93s; good colory, 101s. 13 bags Liberian brought 105s to 105s 6d. The next Dutch sales of coffee will be held on the 10th proximo.

TEA.—The first import of the new season's congou is expected to be on the market early next week. There is not any new feature to report since last Friday. The public sales have again been numerous, and in the aggregate large, viz., 23,825 packages. Prices irregular, but without material alteration. Common to fair red leaf congou, 8d to 94d; black leaf, common to fair, 84d to 94d per lb. Green teas depressed. There is still an export demand for good common congon. The market generally remains quiet by private contract, owing to the public sales and the arrivals of new tea. 4,848 packages Indian by auction went off rether clorely a portion being taken in including some new error rather slowly, a portion being taken in, including some new crop of poor quality.

of poor quality. RICE.—The stock of Bengal is small, and prices continue high-A quiet feeling pervades the market generally. On the spo,t 9,000 bags old Necrancie Arracan have sold at 9s. Since last Friday the demand for cargoes has been slow, and quotations show a downward tendency. Two of Bassein, together 5,300 tons sold at 1<sup>1</sup>/<sub>4</sub>d to 3d reduction. One at 9s 9d London ex ship terms, June sailing; one at 9s 10<sup>1</sup>/<sub>4</sub>d, open charter. Cleaned rice has met with a moderate demand at 3d per cwt decline. Export of Burmah rice to Europe to 22nd June, 480,200 tons, against 461,000, and 428,500 tons in the two previous years at same date. 428,500 tons in the two previous years at same date.

SAGO.-1,871 bags partly sold at rather lower rates for small grain, viz., 178 6d to 198 middling to fine. Some large at 188 to 198 was steady. Medium brought 198; fine, 238 per cwt.

TAPIOCA.-220 bags pearl sold at easier rates: medium and seed, 22s to 22s 6d per cwt. 532 bags Singapore flake part found buyers at 2<sup>1</sup>/<sub>2</sub>d to 3d for fine, and 2<sup>3</sup>/<sub>3</sub>d per 1b for small, being the previous value.

BLACK PEPPER.--The market continues firm, and the demand BLACK PEPPER.—The market continues firm, and the demand steady. At the public sales, on Wednesday, 2,212 bags Penang were chiefly withdrawn. A few lots sold: good West Coast,  $3\frac{1}{3}d$ ; sea-damaged,  $2\frac{1}{3}d$  to 3d. 1,687 bags Singapore sold at  $3\frac{1}{3}d$  to  $3\frac{3}{3}d$ for greyish to fine. By private contract several sales reported on the spot at above rates, and 3d to  $3\frac{1}{16}d$  per lb for Penang. The stock continues large. WHITE PEPPER is again quiet, but holders remain firm. Of 477 bags by auction a few lots only sold at last week's rates : good, at  $5\frac{3}{6}d$ : fair, at  $5\frac{3}{6}d$  per lb.

at 54d; fair, at 55d per lb. OTHER SPICES.—The chief feature this week has been the OTHER SPICES.—The chief feature this week has been the demand for Zanzibar cloves, partly speculative at advanced rates, viz., 1s 34d to 1s 4d. At the public sales, 27 cases Java nutmegs part sold: brown, 110's at 2s 1d; 95's, 2s 7d; 84's, 3s 6d; 82's, 3s 8d per lb. Further business has been done in Cassia Lignea at 42s 6d to 43s. 200 boxes cassia buds, just landed, sold at 57s. 42s 6d to 43s. 200 boxes cassia buds, just landed, sold at 57s. 313 cases Cochin ginger chiefly sold at 2s to 3s decline ; scraped, fair to good, 72s to 76s; small to medium, 63s to 71s; very small and broken, 56s. 2 cases fine bold at 100s and 120s. Part scraped, fair, 65s to 66s. 739 bags part sold: low and ordinary rough, 45s to 50s. 460 bags Bengal withdrawn at 21s per cwt. Pimento

is without change. SALTPETRE.—The market is very dull. Bengal last sold to arrive at 20s. No transactions reported on the spot this week.

SHELLAC.—Less inquiry has prevailed this week, but the few sales made do not show any alteration in prices, and include A C garnet at 67s 6d; good button, 90s. INDIGO.—The public sales, which commence on Monday, the Sth proximo, will consist of about 7,300 chests, a smaller quantity than usually brought forward in July. OTHER DEVSALTERY GOODS.—Transactions have been small.

There is some inquiry for lac dye. Business reported in gambier at 17s on the spot. 86 cases China galls sold at 51s to 54s per cwt for low to middling,

INDIA-RUBBER.-A few sales reported this week, including fine Para at 1s 10<sup>4</sup>d per lb.

Fara at 18 1070 per 10. METALS.—Business continues in the same unsettled state as before, with prices irregular, and transactions of very moderate extent. Tin, at one period rather firmer in price, is now ersier: Straits, 62l to 62l 5s; English ingots, 66l. The market is dull this morning. Rather more inquiry has prevailed for British lead. Chili copper has recovered from the lowest prices of last week. Sales of some extent reported : rob on the sout at 63l 15s to 64l. Cann copper has recovered from the lowest prices of last week. Sales of some extent reported : g.o.b. on the spot at 631 15s to 641; three months prompt, 641 10s to 641 12s 6d; and named brands about the same. Wallaroo quoted 731 15s to 741; Burrs, 711; spelter, 171 17s 6d to 181 for common Silesian. The quotations of iron have varied but slightly, and trade remains quiet. Ship-ments of Scotch pig last week fell to 6,200 tons. Market steady at 50s 14d per ton cash. Other metals have been without change.

Quicksilver, 71 per bottle. 150 tons London rolled zinc by auction sold at 201 15s to 211 per ton.

sold at 201 15s to 211 per ton. JUTE.—A quiet tone still pervades the market. Sales on the spot are small, About 5,000 bales new crop sold to arrive for Dundee at 151 5s to 151 17s 6d per ton. The low prices do not create confidence. 6,551 bales were offered by auction here on Wednesday, and a few parcels only sold at 131 15s to 151 15s, being a decline of 5s to 10s per ton. The Dundee trade has not expe-rienced any change. Manufactured fabrics are steady. HEMP.—No public sales of Manila declared. The market re-mains dull. Some Polish Rhine by auction vesterday sold "with

HEMP.—No public sales of Manila declared. The market remains dull. Some Polish Rhine by auction yesterday sold "with all faults," realised 30l 10s to 30l 15s per ton.
LINSEED.—In the early part of the week higher rates paid. The market since steady. Calcutta ex ship 49s 6d; to arrive via Cape, July and August shipment, 50s 3d to 50s 6d. Steamer cargoes Azov sold at 50s 6d per qr for the United Kingdom.
OILS.—Rather higher rates have been paid for coccoa-nut, and the supplies are moderate. Cochin scarce, and fine advanced to 51l 10s. Business done for arrival at 50l 10s; and in Ceylon at 40l. The latter rather dearer on the spot, viz., 39l 10s to 40l 10s, according to package. Linseed firm. On the spot, 27l 10s to 27l 12s 6d; next two months, 27l 12s 6d to 27l 15s; and last four 27l. Oil, for early delivery, has been rather scarce. English 271 128 od; next two months, 271 128 od to 271 108; and last four 271. Oil, for early delivery, has been rather scarce. English brown rape quiet, and fully 5s lower. On the spot, 311 15s; next two months, 311 15s to 32l; last four, 32l to 32l 5s. English refined on the spot, 32l 15s. Palm remains dull. Fine Lagos, 391; Accra, 371 per ton. Sperm and common fish nominal, in the absence of transactions. Olive dull, with prices tending down-

absence of transactions. Olive dull, with prices tending down-ward; Gallipoli, 481; Spanish, 491 per tun, sellers. SPIRITS TURPENTINE.—A limited business on the spot. Quota-tion of American, 23s 3d; to end of August, 23s; last four months, 23s 9d per cwt. A good business done for delivery. PETROLEUM OIL.—Transactions have been limited, but prices are steady. On the spot, 94d; for delivery, 10d per gallon, Sep-tember to December. Stock, 64,176 barrels, against 39,834 barrels last year. last year.

TALLOW.—A dull market, and prices 3d to 6d lower, viz., Peters-burg, last three months, 39s ; December, 39s 6d. In other positions also easier. This morning's quotation for the spot and month is 38s to 38s 3d per cwt. The supply of Australian keeps moderate, demand slow. Fine mutton, 38s 6d per cwt.

#### POSTSCRIPT. FRIDAY EVENING.

SUGAR.—The market continues steady, but is hardly so active as esterday. Part of the crystalised Demerara by auction was taken yesterday. Part of the crystalised Demerara by auction was taken in. Total sales, 606 casks, or 3,927 casks for the week. 5,120 bags China sold at 16s 6d for low brown. 1,808 bags Mauritius were chiefy taken in. 537 bags native Penang withdrawn at 17s. 210 bags Egyptian out. 341 casks 95 barrels Porto Rico were only partly sold at 20s to 22s 6d for brown and grey. Privately, 8,000 bags clayed Manila at 18s 3d. 100 tons brown Penang to arrive at 16s 3d. 700 bags German refined by auction sold at 27s 6d to 28s 6d for pulverised.

COFFEE.—89 casks 9 barrels 331 bags plantation Ceylon part sold at easier rates. 103 cases 1,274 bags East India went flatly, a portion being taken in. 40 half-bales Mocha withdrawn at 84s 6d for ungarbled. 732 bags foreign sorts out.

RICE.—Another cargo of Bassein sold at 98 9d per cwt, June sailing, for the United Kingdom.

SHELLAC .- 412 chests by auction three-fourths sold : fine garnet, 68s to 69s; fine button, 94s. Second orange taken in at 74s to 76s per cwt.

STICKLAC .- 266 cases good Siam were taken in at 55s per cwt.

GAMBIER.—1,048 bales block sold at 17s ex quay. CUTCH.—1,200 boxes out at 24s 6d to 25s 6d per cwt

METALS .- Copper firm : g.o.b. of Chili sold at 64/. Scotch pig iron, 50s 11d cash.

-165 casks 47 barrels Mauritius cocoa-nut by auction out OILS.at 391 10s.

TALLOW.-No alteration in town. Of 693 casks Australian by auction 600 sold at about last Friday's rates. Fine mutton quoted 38s 6d; beef, 37s 6d per cwt.

#### ADDITIONAL NOTICES.

TEA.—With the exception of what has changed hands at the auctions, little has been sold. The Glenfinlas, with the new Kaisows, is expected on Monday, having passed Gibraltar, 26th inst.; and on Tuesday, the Gleneagles is expected with the first of the black leaf teas from Hankow. SILK.—Public sales still progressing, the prices realised so far

SILK.—Public sales still progressing, the prices realised at his far are still rather below previous ruling rates. FLAX.—New Zealand remains in a very quiet state. HEMP.—Not any sales of Russian clean to report, and but very few transactions in Manila this week. TOBACCO.—There has been little doing in American tobacco

during the past week; some small purchases have been made by the home trade of the finest descriptions, for which current prices were paid. For the lower qualities there is little demand. In other growths, termed substitutes, there has been a fair business done.

An improved general trade has been done in most LEATHER.—An improved general trade has been done in most descriptions of leather during the week, but without change in prices. At Leadenhall, on Tuesday, there was a limited attend-ance of buyers, and the transactions were of an unimportant character. There was a moderate supply of fresh goods, but about equal to the requirements. LEATHER.

#### METROPOLITAN CATTLE MARKET.

MONDAY, June 24.—The total imports of foreign stock into the port of London last week amounted to 21,424 head. In the corresponding week of last year we received 12,822; in 1876, 17,571; in 1875, 18,685; in 1874, 10,512; and in 1873, 14,136. The receipts of cattle at Liverpool and Southampton from the United States and Canada continue upon a very large scale, no less than 2,374 having been landed in the course of last week; 227 pigs were eived from Boston. also re

also received from Boston. A dull tone has pervaded the cattle trade to-day. Supplies were in excess of requirements, and quotations were weak in conse-quence. The receipts of beasts from our own grazing districts were about an average, and the quality and condition were on the whole good. The demand was throughout extremely heavy, and sales were only concluded at a serious decline from last Monday's prices. The best Scots and crosses did not make more than 5s 6d to 5s 8d non 8th. The forsion side of the merket was more freque prices. The best Scots and crosses did not make more than 5s od to 5s 8d per 81b. The foreign side of the market was more freely supplied with beasts. There were 1,000 American, besides a good sprinkling of Danish and Spanish. Sales progressed very slowly, and quotations were altogether irregular. The sheep pens were moderately filled. The trade was dull, and prices had a drooping tendenay. The best Downs and half-breds sold at 6s to 6s 2d per 8 lb. Lambs were inactive at 7s 6d to 8s 6d per 8 lb. At Deptford were 90 beasts and 1.300 sheep and lambs. were 90 beasts and 1,300 sheep and lambs.

# THE ECONOMIST.

# ALABAMA GREAT SOUTHERN BAILBOAD COMPANY.

ISSUE OF \$815,000 (£163,000) SIX PER CENT. FIRST MORTGAGE BONDS OF \$1,000 (£200) FIRST EACH.

Interest payable in gold January 1st and July 1st., at the Farmers' Loan and Trust Company in New York.

York. Principal repayable in gold 1st January, 1908. Issue Price £180 per Bond, including First Coupon payable 1st January, 1879, payable as follows:--£10 per Bond on Application. 30 - Allotnent. 70 - Ist September, 1878. 70 - Ist September, 1878. 70 - Ist Mottober, 1878. Payments in anticipation of instalments may be made on any of the above dates under discount of 4 per cent. per annum.

The ALABAMA GREAT SOUTHERN RAIL-ROAD, formerly known as the ALABAMA AND CHATTANOOGA RAILROAD, has recently been reorganised under a foreclosure and sale.

reorganised under a foreclosure and sale. In order to secure the permanent control and ma-nagement of the Railway in English hands, a Com-pany has been registered, under the Companies' Acts of 1862 and 1867, called the "Alabama Great Southern Railway Company, Limited," which has taken over the whole interest of the American Company, in which the Railway is vested by the local law. The following are the Directors of both Companies :--Augustus B.Abraham, Esq. R. Jacomb Hood, Esq. George W. Medley, Esq. Sir Philip Rose, Bart. And the road is being worked under their exclusive control, through the medium of highly competent and responsible Agents. The Share Capital consists of £1,722,600, of which

and responsible Agents. The Share Capital consists of £1,722,600, of which £156,000 has been issued in "A" Shares bearing a pre-ferential dividend of 6 per cent., the whole of which has been subscribted, and was offered in the first in-stance for subscription to the Bondholders of the Alabama and Chattanooga Railroad, who were shut out on the sale of the Road by the decree of the Court, and £1,566,000, which has been issued as de-ferred "B" Shares fully paid up, to the subscribers of the "A" Shares, it being the intention of the Company to give to the old Bondholders an oppor-tunity of retrieving their position under the new organisation.

The total anthorised amount of First Mortgage Bonds is \$1,750,000 (£350,000), and is secured by a First Mortgage to the Farmers' Loan and Trust Com-pany of New York of the entire Railroad, including its equipment and property of every description.

pany of New York of the entry Rainead, including its equipment and property of every description. The length of the Alabama Great Southern Rail-road, the whole of which is open and at work, is 295 miles, exclusive of sidings. The Mortgage Debt of the Company, therefore, will not exceed \$6,000 (£1,200) per mile, the annual charge for interest on which will be only \$105,000 (£21,000), or at the rate of \$356, (£71) per mile per annum. Of the total \$1,750,000 Bonds, \$335,000 (£67,000) have been already applied in America on account of purchase-money, liens, and reconstruction; \$600,000 (£120,000) are held by the Farmers' Loan and Trust Company, as a deposit until the outstand-ing liens and claims connected with the purchase are discharged, and will be issued hereafter as and when required. The remaining \$815,000 (£63,000) con-stitute the present issue now offered for subscrip-tion, the proceeds of which will be applied in com-pleting the payments for purchase-money, liens, and reconstruction, and in improving the track, and sapplying additional equipment, so as to develop the business of the road. It is estimated that after all these payments have been mede in compaction with the purchase are

It is estimated that after all these payments have een made in connection with the purchase and econstruction, and the outlay on the road and equip-nent, there will be a large ultimate surplus available of the continential b for future contingenci

for future contingencies. Sincé the purchase of the road was made, the net earnings have been steadily increasing, and are con-siderably in excess of the amount required to pay the interest on the whole of the Bonds. Taking the earnings for the first three months of the present year as an average for the whole year, there would be a surplus of net earnings of 25 per cent. beyond that amount. The gross earnings for March, 1878, as compared

year as an average for the whole year, there would be a surplus of net earnings of 25 per cent. beyond that amount. The gross earnings for March, 1878, as compared with these of March, 1877, show an increase of up-wards of 40 per cent. There is every reason to anticipate that, as the further outlay is made upon the road and its equip-ment, and proper connections are secured, the deve-lopment will show a still more marked increase, the gross earnings of twelve railways more or leas in connection with this road, having in the year 1876, as appears by their published returns, averaged nearly \$4,000 (£800) per mile per annun, with work-ing expenses at 66 per cent, an average which it is confidently expected that this road will speedily attain, and which would then give three times what is required for Interest on the Mortgage Debt. Applications must be made on the form annexed to the prospectas, and lodged with Messrs Glyn, Mills, Currie and Co., 67 Lombard street, with the deposit of 210 per Bond upon the amount applied for. When no allotment is made the deposit will be returned in full. In case a less number of Bonds is allotted than is applied for, the surplus of the deposit will be applied to the progeneties, and previous payments will be liable to forfeiture. Strip Certificates to bearer will be issued against allotment letters, and will afterwards be exchanged for the definitive Bonds as soon as possible after the issue price is paid up.

sale can be inspected at the offices of Messrs Ashurst, Morris, Crisp, and Co., No. 6 Old Jewry. Prospectuses and forms of application may be obtained at the Offices of the Company, 43 Lothbury, or at Messrs Glyn, Mills, Currie, and Co., 67 Lombard street. June 22, 1878.

ALABAMA GREAT SOUTHERN RAILBOAD COMPANY.

ISSUE OF \$815,000 (£163,000) SIX PER CENT FIRST MORTGAGE BONDS.

The SUBSCRIPTION LIST for the above issue will be CLOSED for London on TUESDAY NEXT, the 2nd July, and for Country applications on the day follow-ing (Wednesday).—By order, 43 Lothbury, E.C., 27th June, 1878.

NATAL GOVERNMENT 4<sup>1</sup>/<sub>2</sub> PER EL200,000. Authorised by Law No. 5 of 1875, for the Construction and Equipment of a Main Line of Railway from the Port to the Capital of the Colony, with certain branches therefrom, altogether comprising about 105 miles, for which £850,000 have already been raised, and £50,000 Authorised by Law No. 19 of 1876, for Coolie Immigration purposes.

Her Majesty's Principal Secretary of State for the Colonies having authorised the Crown Agents for the Colonies to negotiate the above Loans in the London market, they hereby give notice of their readiness to receive tenders for the final instalment of the former amounting to £350,000, and the whole of the latter making altogether £400,000.

The Loans are secured on the general revenue and assets of the Colony, and will be represented by coupon bearing Bonds, of £1,000, £500, £200, and £100 each, transferable by delivery, and redeemable in London on the 15th day of March, 1919.

in London on the 15th day of March, 1919. Interest at the rate of 4<sup>5</sup> per cent. per annum, commencing on the 1st July, 1878, will be paid at the Offices of the Crown Agents for the Colonies in London. In order to make the periods for the pay-ment of interest correspond with those of prior issues of the same Loan, there will be attached to the Scrip Certificates of this issue a Coupon payable on 15th September next, for a broken period of 2<sup>3</sup> months. Thenceforward the interest will be paid half-yearly, on the 15th March and 15th September.

on the 15th March and 15th September.
Tenders in accordance with the annexed form will be received by the Crown Agents at their Offices not later than 1 p.m. on Friday, the 5th July proximo, when they will be there opened in the presence of such of the applicants as may be pleased to attend. The debentures will be allotted to the highest bidders, provided the rates offered are not below £92 10s in money for every £100 in debentures, payable as follows:—
£5 per cent. on application. So much on allotment as will leave £70 unpaid.
£35 per cent. on 16th July, 1878.

paid. 435 per cent. on 16th July, 1878. 435 per cent. on 16th August, 1878. Tenders at a fraction of a shilling other than six-ence will not be preferentially accepted, and should be equivalent tenders exceed the amount of the ebentures to be adloted, a pro rata distribution will

the equiviewed to be alloted, a province and by the debentures to be allotted, a province and by the made. After payment into the Bank of England by the allottees of the instalments due on allotment, they will receive, at the Oflices of the Crown Agents for the Colonies, in exchange for the Bankers' receipts, scrip certificates to bearer. In exchange for this Scrip, debenture bonds will be issued at the same place, as soon as payment shall have been made in full.

For the final repayment of the capital, a sinking fund will be formed in this country under the man-agement of trustees to be appointed by the Governor, with the approval of the Secretary of State for the Colonies.

with the approval of the Secretary of State for the Colonies. Commencing in 1890, a sum equal to one per cent. on the nominal amount of debt incarred will be paid annually into this fund, and will either be invested and allowed to accumulate at compound interest until the Bonds fall due, or at the option of the trustees, will be devoted to the gradual extinction of the debt by purchasing the debentures in the market. Form of tender and prospectus showing the re-sources of the colony and the financial condition of the Government, may be had on application to the Crown Agents, or to their Brokers, Messrs Mullens, Marshall, and Co., 4 Lombard street, and Messrs J. and A. Scrimgeour, 18 Old Broad street, E.C. The laws authorising the loans are open to inspec-tion at the Offices of the Crown Agents for the Colonies. Downing street, 29th Jane, 1878.
