But we suppose we must not complaint so they may have but taken a man, or a tour across the Allegham sound, when not cont by the steambeate to Charleston.

The general committee of arrangements for colebrating the 4th of July will most this evening, 8 c'eleck, at Banka' searced a portion of Mr Clapp's church exclu-

gively for ladies, on Seturday at helf past fife, m. On the let inst, said sommittee had a meeting, at which hey resolved that their request to the city souncil was not for an appropriation, but for the aid of the corporation in celebrating the national independence; and rebolved also that the members of the council who roted for the appropriation are entitled to the respect of their fellow citizens. It was alto received to invite all classes of citizans to join in the celebrations and appoint a committee specially to savite and seport the venerable Col. Shamburgh. Mesors Wm Christy and J B Labatul were added to the list of presidents; and Mosers H B Conse and F B Daumey, vicepresidents.

It was also singularly received that in consequen imputations in this paper, the committee thought it proper nies; when Spain acquired it; and when retroceded to to state that the selection of Mr Clapp's church was made. Yet so it occurred when the mayor vetoed the mediation permitting Mr Caldwell to eract a portion on the public walk in front of his theatre. Stump Lifer.—Mr Norcruss has invented a new machine for lifting out stumps, and we wish many of our farmers would use this or seme other, for the purpose of ridding themselves of the multitude of those incumbrances, which are so plenty in all new countries. Did you ever make a calculation how much land you sould of course gain by nulling them out?

ever make a calculation how much land you sould of course gain by pulling them out?

Mr Norcros, machine consists of a large screw placed in a large nut and this int is affixed to leg, like those of a surveyor's compass. These being sufficiently strong, are placed above the stimp, and it is then grappled to the screw by chains or hooks. A large sweep like that used in some old fashioned cider mills, having a nut to fit the screw, is put upon the screw, and horses or ozen hitched on either end, and the stump elevated by driving round the sweep. A patent is also secured on this, and as we before observed, we kepe it will be the means of stirring our farmers who have more stumps in their way tirring our farmers who have more stumps in their way than they want, to use this or some other contrivance for rousting them.—Maine Farmer.
