The above cut is a reproduction of a photograph taken September 25, 1899, of a 15 acre field of Ensign Bagley Potatoes, grown exclusively for us in Aroostook County, Maine. This grand new sort is sure to take a leading place among the standard early varieties. See Novelties for description and price. **FARMERS, PREPARE FOR THE CENSUS.**—Enumerators will begin to take the Twelfth Census of the United States on June 1, 1900. The inquiries relative to agriculture will cover the crops and products of the calendar year 1899, but the enumeration of live stock, fowls, bees, etc., will embrace those "on hand June 1, 1900." Write up the results of your farming operations last year, average yield and money received for the several crops. By so doing you will save time when the census enumerator comes next June.

SEED CATALOGUE

1900.

S. D. WOODRUFF & SONS,

ORANGE, CONN.

OUR CUSTOMERS

Will always be welcome to visit us and inspect our methods, particularly in the summer season, while our seed crops are growing. We have a succession of seed crops maturing from about July 1st through August and September—first beginning with turnip seed, then following on with kale, Ruta Baga, cabbage, parsnip, onion, beet, carrot, tomato, sweet corn and other varieties of seeds in smaller quantities.

We are visited each year by a large number of our customers, and we are always glad to have prospective customers call on us. Whether they purchase seeds of us or not we will show them our crops most cheerfully.

We test our seeds as to vitality, and our customers can always feel assured that to the best of our knowledge the seeds we send out are pure, reliable and true to name.

For many years there has not been so short a crop of many kinds of seeds as the crop of 1899. This is particularly true of beans of all kinds, both pole and bush sorts, cabbage, carrot, spinach and some varieties of sweet corns. On the other hand our crops of onion, beet, tomato and vine seed were never better. Our onion seed in particular is of extra fine quality, heavy, plump and of strong vitality.

SPECIAL ATTENTION.

We wish to call especial notice to the following varieties of seeds that we strongly urge our friends to give a trial. We have made a thorough field trial of nearly all of these items and can recommend them as most desirable varieties:

Dirigo Beet.	Ford's Mammoth Lima Bean.
Crosby's Egyptian.	Siebert's Early Lima Bean.
Burpee's Stringless Green Pod Bean.	Ensign Bagley Potato.
Currie's Rust Proof Wax Beans.	Early Yellow Cracker Onion.
All Head Early Cabbage.	Rocky Ford Musk Melon.
Danish Ball Head Cabbage.	Paul Rose Musk Melon.
Early Champion Sweet Corn.	Melrose Musk Melon.
Gradus or Prosperity Pea.	Scarlet Globe Radish.
Carter's Daisy Pea.	Rosy Gem Radish.
Juno Pea.

GARDEN, FIELD AND FLOWER SEED CATALOGUE.

SPRING OF 1900.

HOW TO REACH US.

We are but six miles from New Haven. Take Berkshire Division of N. Y., N. H. & H. R. R., from New Haven to Orange, a ride of but 13 minutes. We are but 3 minutes' walk from Orange Station.

Long Distance Telephone.—“1675-6, New Haven Division.”

HOW TO SEND MONEY.

We will receive postage stamps if received in good condition, same as cash. Remit by P. O. or Express Money Order or Registered Letter. Personal check or draft received from parties of established credit. Make Postal Money Orders payable at Derby, or Orange, Conn. Orange has recently been made a Money Order office.

POSTAGE.

Seeds will be mailed postpaid in quantities of $\frac{1}{4}$ lb. and less. Quantities of $\frac{1}{4}$ lb. and over will require postage at the rate of 8 cents per lb. in addition to catalogue prices. Peas and beans require 15 cents per quart, and corn 10 cents per quart, in addition to catalogue prices.

WE PAY THE FREIGHT.

On orders to the amount of \$7.00 or over, at catalogue prices, where cash accompanies order, we will deliver goods to your nearest station charges prepaid. Excepting, we cannot pay freight on potatoes. We will deliver seeds, excepting potatoes in large quantities, on short notice, free of charge, at the old established hardware store of The John E. Bassett & Co., 754 Chapel street and 318 and 320 State street, New Haven, Conn., thus rendering our goods accessible to messengers and expressmen centering in New Haven.

DISCOUNTS.

Market gardeners who purchase ten, twenty or more dollars' worth of seeds naturally expect a lower price than those who purchase but a small amount, and we will make the following discounts from catalogue prices where cash accompanies order: On seeds in racks and by the ounce we will mail postpaid for one dollar, seeds to the amount of one dollar and twenty-five cents. On orders amounting to ten dollars and upwards, deduct 10 per cent. where cash is sent with order.

ABOUT WARRANTING SEEDS.

While we exercise the greatest care to have all seeds pure and reliable, we do not give any warranty, express or implied. If the purchaser does not accept the seeds on these terms and conditions, they must be returned at once, and the *money that has been paid for same will be refunded.*

SPECIAL PREMIUMS.

We desire to increase our catalogue mailing list, and

TO ANY CUSTOMER

Who will send us 60 cents and the name and Post Office address of fifteen or more seed planters, on or before March 20, 1900, we will mail postpaid garden or flower seeds in packets or ounces to the amount of \$1.00.

ENSIGN BAGLEY POTATO.

When we offered this brand new potato to our customers for the first time last season we predicted that it would become a winner, and from the many glowing reports we have received from it we are sure that our prediction has been fully sustained.

How We Found This Grand Sort.

While inspecting our seed potato crops in Aroostook County, Maine, in September, 1898, we found one of our growers, named Bagley, who had bred this sort up for several seasons from a single sport from New Queen, and this year had a crop of about a car-load. We bought the entire crop on the spot. Unlike New Queen, it is a pure white tuber, earlier and much more productive than the popular mother sort.

Mr. Bagley's crop averaged over 250 bushels per acre of pure white, smooth and uniformly large-sized tubers of perfect quality and extreme earliness.

We have again contracted for the entire product of this sort, and we therefore are the sole owners for the coming spring.

Our seed is most handsome, all having been grown by the originator, and as long as supply lasts we will sell at following prices: Price per lb., postpaid, 20c.; per pk., 60c.; bushel, \$1.90; sack of 165 lbs. net, \$5.00; five sacks or over at \$4.90 per sack.

We print the following from a large number of testimonials from representative market gardeners in the East:

S. D. WOODRUFF & SONS, Orange, Conn.

JAMAICA, L. I., Aug. 30, 1899.

GENTLEMEN—The Ensign Bagley potatoes you furnished us this spring did very well. We planted New Queen, Early Norther, Early Rose, etc., but we dug the Ensign Bagley first. We began marketing them July 4, when the yield was 200 bushels of marketable potatoes per acre in spite of the fact that the season was the driest on record. We want 50 barrels Ensign Bagleys next year. Respectfully yours,

W. & J. R. VAN SICKLEN.
CLINTON, CONN., July 4, 1899.

GENTLEMEN—The Ensign Bagley potatoes are doing finely. As you say, are sure to become a winner. Too much cannot be said in their favor.

Respectfully yours,

W. A. DOOLITTLE.

S. D. WOODRUFF & SONS, Orange, Conn.

HYDE PARK, L. I., Oct. 27, 1899.

GENTLEMEN—The Ensign Bagley potatoes purchased of you this spring yielded 80 barrels per acre of marketable potatoes, and we dug about the middle of July. They were so early that I got a first-class second crop of sweet corn from the same ground. I shall plant many more of them next season and desire that you save the seed for me.

Very truly yours,

JOHN A. HUGHES.

What Mr. A. V. Suydam of Flatbush, L. I., says of this potato:

In these days it is hard to get an early potato that is pure, but the Ensign Bagley potatoes that I purchased of you last spring were not only pure, but yielded more than any early sort this season. Book me 30 barrels for next spring's planting.

HIGHWOOD, CONN., Nov. 20, 1899.

GENTLEMEN—I was more than pleased with the Ensign Bagley potato which you persuaded me to buy last spring. You need not be afraid of recommending these too highly, as they are surely worthy of all praise you can give them.

Respectfully yours,

ANDREW URE.

JAMAICA, L. I., Oct. 15, 1899.

GENTS—The Ensign Bagley potato proved to be all right. If we had only had 15 acres of them instead of 2 acres it would have made a great difference in our income for the year, for the Ensign Bagley brought us twice as much money per acre as any other potato we planted this year, and we had 35 acres. Don't forget us for seed next year.

Respectfully yours,

NICHOLS & GULICH.

The cut on inside front cover of our catalogue is taken from a photograph of a field of 15 acres of Ensign Bagley, grown in Aroostook County, Maine, exclusively for us. We are confident that this potato will take a leading place among early sorts, and our customers will do well to plant liberally if they desire an early variety. Its pure white color makes it peculiarly attractive.

"Early Green Mountain" Potato.

A NEW POTATO.

The phenomenal popularity of the Green Mountain potato during the past few years has induced us to work up a potato of this type which matures early. We are pleased to say that we have succeeded in doing this with the result that we now offer for the first time the Early Green Mountain potato. This potato retains the handsome white color, shape and appearance of its parent, the Green Mountain, but matures about three weeks earlier. Grown side by side with Early Rose, it is ready for market as soon as this sort, and greatly out-yields this standard variety.

We would remind our customers that in all the eastern markets the demand for white round potatoes is greatly on the increase, as is evidenced by the fact that Green Mountain and Rural New Yorker, and similar types have been quoted above the ruling market price for the past 2 or 3 years.

We are therefore much pleased to be able to introduce the pioneer of this type in early potatoes.

Price per lb., postpaid, 20c.; pk., 60c.; bushel, \$1.90; sack of 165 lbs. net, \$5.00.

Supply very limited; not over five sacks sold to any one customer.

The Dirigo Beet.

We cannot too highly recommend this new beet. It is an extra early flattish beet, very small top, with single tap root, and one of the smoothest sorts we have ever grown. Very quick in bottoming and superior in our opinion to many other early sorts offered. In comparison with Crosby's Egyptian raised side by side we liked the Dirigo rather better than the Crosby. It is very uniform and true to type. Supply of seed very limited. Price per pkt., 5c.; oz., 10c.; $\frac{1}{2}$ lb., 25c.; lb., 65c.; 5 lbs. at 60c. per lb.

Crosby's Egyptian Beet.

The standard early bunch beet for the up-to-date market gardener. It is a thicker beet than the Extra Early Flat Egyptian and fully as early, and bottoms very uniformly. Price per pkt., 5c.; oz., 10c.; $\frac{1}{2}$ lb., 20c.; lb., 60c.; 5 lb. lots at 55c. per lb.

The Dirigo Beet.

We see no reason why the new stringless Green Pod Bean should not almost entirely take the place of Early Red

Valentine, as it is fully as early, perfectly round pod and stringless and great cropper.

Crosby's Egyptian Beet.

Seibert's Early Lima Bean.

Introduced by D. M. Ferry & Co., whose description of it follows: "The earliest true Lima. This variety was developed by a market gardener who selected the largest green beans from the thinnest and most easily opened pods. Practical value to the market gardener has been the object aimed at in the development of this grand bean, and we believe it to be the very best sort for their use. Price pkt. 10c.; qt., 30c.; pk., \$2.00; bu., \$7.00.

Burpee's Stringless Green Pod Bush Bean.

This is the earliest of all green podded bush beans and the finest quality snap bean in cultivation. It is even earlier than Early Yellow Six Weeks, and of far superior quality to any other green podded bean, and is the only absolutely stringless bean. Price per pkt., 10c.; qt., 30c.; pk., \$1.75; bu., \$6.00.

New Stringless Green-Pod Bean.

Valentine Wax Bean.

A new round podded wax sort and the *earliest wax bean* in cultivation. Price per pkt., 10c.; qt., 30c.; pk., \$1.60; bu., \$5.50.

Currie's Rust Proof Wax Bean.

The earliest large podded variety and the most profitable variety for New England markets. This is the taker, tried and true above all other early sorts. Price per pkt., 10c.; qt., 30c.; pk., \$1.60; bu., \$5.75. Crop very short.

Early Spring Cabbage.

New Ex. Early Flat Head Variety.

As early as Jersey Wakefield. Yields one-third more than any other early cabbage on the same space of ground. Plant them 21 inches apart and you have 13,500 per acre. It has the peculiarity of heading firmly at an early stage in its growth, making it a valuable variety for extra early market. Price per pkt., 10c.; oz., 50c.; $\frac{1}{2}$ lb., \$1.50; lb., \$4.50.

All Head Early Cabbage.

This, although not a strictly new variety, is worthy of a prominent place. The very best early flat sort in cultivation. Reliable header, and for a sure crop, uniform heading sort, it is a winner and cannot fail to please. Price per pkt., 5c.; oz. 30c; $\frac{1}{2}$ lb., \$1.00; lb., \$3.50.

Danish Ball Head Cabbage.

This is the great winter shipping sort, becoming more popular every year. Our seed is of our own importation from Denmark and is a most excellent, sure heading strain. Price per pkt. 5c.; oz., 25c.; $\frac{1}{2}$ lb., 90c.; lb., \$3.00.

Currie's Rust Proof Wax Bean.

Fordhook Pickling Cucumber.

This new variety is early, and it is also distinct and valuable in that it continues to produce its fruit long after other sorts have ripened and ceased bearing. Said by the grower to be the finest cucumber for a pickling sort in existence; also valuable as a table cucumber. Price per pkt., 5c.; oz., 15c.; $\frac{1}{4}$ lb., 25c.; lb., 70c.; 5 lbs. at 60c. per lb.

Hill's Forcing White Spine Cucumber.

A new strain of remarkable uniformity and perfection. This variety is largely used for forcing under glass. Price per pkt., 5c.; oz., 10c.; $\frac{1}{4}$ lb., 25c.; lb., 85c.; 5 lb. lots, 75c per lb.

IMPROVED Pride of the Market Pea.

We have now to offer our customers an entirely new strain of this most popular sort. Our new stock is a great improvement on the old strain, is entirely pure and free from sports,

All Head Early.
with handsome, large, very dark green pods, so much sought for in the New York market. Price per pkt., 10c.; qt., 25c.; pk., \$1.50; bu., \$5.50.

Gradus or Prosperity Pea.

We do not hesitate to say that this is one of the greatest novelties that has been introduced for the past decade. Imagine a wrinkled pea with a pod very nearly as large as Stratagem or Telephone, and maturing within three or four days as early as Alaska or any of the other round extra early sorts, and you will get an idea of exactly what this pea is. Price per pkt., 10c.; qt., 30c.; pk., \$2.00; bu., \$7.50.

Juno Pea.

The Juno Pea is largely used to replace the Pride of the Market by those gardeners who have tried it. Pod very dark green. Vine short, very profuse cropper. Pods remain green usually long after becoming fit for market. Price per pkt., 10c.; qt., 25c.; pk., \$1.25; bu., \$4.25.

New Pea, Nott's Excelsior.

As early as American Wonder, much more prolific, with larger pods. Destined to take the place of American Wonder, as it is in every way better. Price per pkt., 10c.; qt., 25c.; pk., \$1.25; bu., \$4.50.

Garter's Daisy or Dwarf Telephone Pea.

As the name implies, this is a Dwarf Telephone, having the characteristics of the Telephone, with dwarf vine. Height, under high cultivation, 18 inches. Very productive. Medium; in season about one week earlier than Stratagem. Destined to become a popular and standard sort. Price per pkt., 10c.; qt., 30c.; pk., \$1.50; bu., \$5.00.

Duke of Albany or Amer. Champion Pea.

This is one of the largest podded varieties in existence and an immense yielder. Superior in some respects to Telephone; not as tall, but having a branching habit and should be sown thinly. Price per pkt., 10c.; qt., 30c.; pk., \$1.50; bu., \$5.00.

ALLAN'S
DWARF TELEPHONE

Early Yellow Cracker Onion.

Earliest of all onions. A flat, very hard and good keeping onion. Specially valuable for the early market; frequently yields of 300 to 400 bushels per acre are reported to us from those who have had the seed from us for past two or three years. Our stock of this sort is extra_fine, though limited.

Price per pkt., 5c.; oz., 20c.; $\frac{1}{4}$ lb., 50c.; lb., \$1.60; 5 lb. lots at 1.50 per lb.

New Champion Sweet Corn.

This variety is said to be the largest eared early corn yet produced. It is pure white kernel and cob and but a few days later than First of All, Cory, Marblehead, Tom Thumb, etc. It has been grown fit for table use in 61 days from planting, which is evidence of its earliness. It is very popular with the Long Island gardeners. It has been difficult for us to grow enough seed of this variety to keep pace with the increasing demand for it. It matures with us exactly with Crosby's Early and easily drives that popular sort out of the market on account of its large size and fine appearance.

Price per pkt., 10c.; qt., 20c.; pk., 90c.; bu., \$3.00; per 100 ears, \$3.00.

Early Champion—Reproduction from photograph, natural size of ripe ear.

The Early Cracker Onion.

Kendal's Early Giant Sweet Corn

This is a second early, very large-eared sort, said, by the originator to be the largest eared of the early varieties, pure white kernel and cob. Our seed is grown from the original stock.

Price per pkt., 10c.; qt., 20c.; pk., 90c.; bu., \$3.00; per 100 ears, \$3.00.

See our complete list of sweet and field corns. We are headquarters on corns of all kinds and sell hundreds of barrels of choice seed to market gardeners.

THE CABBAGE.

We advise our customers to pay a fair price for **SELECTED AMERICAN GROWN CABBAGE SEEDS.** The importance of this is best realized by those who have bought cheap cabbage seed. We claim that our strains are unexcelled in America, and the many testimonials that we have received from critical market gardeners, who annually purchase their cabbage seeds from us, clearly prove this statement. (*Add 8 cents per lb. if sent by mail.*)

SWEET CORN.

W. D. W., Windsor, Mass.

We are headquarters for Sweet Corns; our location has long been famous for producing the best Sweet Corn Seed in America, and it is grown more largely in our own and the adjoining towns of Milford and Woodbridge than anywhere else in the East.

We strongly advise our customers to purchase their Sweet Corns by the 100 selected ears, as the corn retains its vitality better when on the cob. We make no extra charge for packing. In case we cannot fill orders for corn on the cob we will in all cases substitute an equal value of shelled corn, unless otherwise specially instructed not to do so. We can, however, nearly always supply the selected ears, as we handle a great many hundred barrels of the selected ears.

We grew last season more than thirty varieties of Sweet Corn, and as space will not permit a description of each variety, we will simply list them, and can guarantee our stock to be the best obtainable. (*Add 5 cents per pt., 10 cents per qt., if sent by mail.*)

CORN—Field and Sowing Varieties.

Prices on Field Corns are not subject to discount.

Early Eight-Rowed Yellow Canada. Very early; cob small; produces two or three ears to the stalk, and grows from four to five feet high. Price per 100 ears, \$1.25; qt., 10c.; pk., 50c.; bu., \$1.40.

Longfellow. This is the standard variety in this section; long ear, small cob, bright color and medium early. Price per 100 ears, \$1.50; qt., 10c.; pk., 50c.; bu., \$1.40.

White Southern Ensilage. A common white variety, grown here considerably for siloing purposes; sown either broadcast or in drills. Price per qt., 10c.; pk., 30c.; bu., \$1.00; 5 bu. lots at 80c.

Improved Leaming. A very early dent variety, deep kernels, small cob; a great favorite in this locality. Price per qt., 10c.; pk., 50c.; bu., \$1.40; 5 bu. lots at \$1.25; per 100 ears, \$1.25.

Sanford Improved. The standard white flint variety; used largely for ensilage, and a superior sort for this use. Price per 100 ears, \$1.50; qt., 10c.; pk., 40c.; bu., \$1.35; 5 bu. lots at \$1.15 per bu.

Pride of the North, or Queen of the Prairie. A small grained yellow dent, very early and prolific. It has matured fully Oct. 1st, when planted as late as July 4th. Price per qt., 10c.; pk., 50c.; bu., \$1.40.

Early Mastodon Dent. A very early strong growing corn, with exceedingly large ears and grain. In the *American Agriculturist* corn contest in 1889 it outyielded all others, making the wonderful record of 213 bushels of shelled corn to the acre. Price, 100 ears, \$1.50; qt., 10c.; pk., 50c.; bu., \$1.50; 5 bu. lots at \$1.35 per bu.

Rural Thoroughbred White Flint. Price per qt., 10c.; pk., 50c.; bu., \$1.50; 5 bu. lots at \$1.35 per bu.

SWEET FODDER CORN.

We can offer a choice lot of Sweet Corn, all large growing varieties, and those who buy a quantity for ensilage generally prefer the Sweet Corn to a field variety. Price per bu., \$1.50; 5 bu. or more at \$1.40 per bu.

You will find this a nice sample and the price is very low.

Bear in mind that we are extensive dealers in Corn of all kinds and will be glad to quote special prices on large lots.

WHITE RICE POP CORN.

The best sort for popping. Pt., 10c.; qt., 15c.; pk., 70c.; per lb. on ear, 5c.

CUCUMBERS.

By far the best all around variety of cucumbers for the home and market garden are the White Spine types. Our stock of Improved White Spine is almost perfection in itself, and the hundreds of pounds we annually supply the critical market garden trade of America does more in advertising the superiority of our strain than printer's ink can possibly do.

HOME GROWN ONION SEED.

We are Headquarters on Connecticut Grown Onion Seed Grown from Selected Bulbs and Grow Annually on our Farms many Thousand Pounds.

We feel that we are justified in "blowing" our onion seed. No better seed can possibly be produced than we offer. Our bulbs are all carefully selected by hand, and we think that we have a right to claim that the seeds grown from such bulbs is far superior to much of the seed offered at cheap prices.

IMPORTANT.

It is not enough for the experienced onion grower to know that the seed he sows will germinate and come up and even make a crop. The man of experience knows that to be a profitable crop it must grow uniformly and bottom quickly and ripen down early. Seed that will produce such a crop can only be had after careful selection of the best shaped bulbs.

The very best evidence of the superiority of our onion seed is shown by the fact that from the few pounds of seed which we sold at retail in 1892 (that being the first year which we published a catalogue and the beginning of our retail business), our sales the past season to the planters who used our seeds reached into the thousands of pounds.

YELLOW GLOBE DANVERS ONION.

We place this variety at the head of the list, as it is the most popular in New England, and our stock is one of the finest obtainable.

The past season has been a record breaker in the yield of onions in New England. We have had reports from our seed sold last spring of many crops yielding 900 to 1,000 bu. per acre.

Mr. A. M. Darling, Sunderland, Mass., writes under date of December 26, 1899: "I had a yield of 1,000 bu. per acre from your Yellow Globe Danvers onion seed. Your seed beat any I had. Save me 35 lbs. for Spring of 1900."

BANNER CROP OF ONION SEED.

Our crop of onion seed the past season was one of the best we ever grew and we cannot too highly recommend our 1899 crop seed. *We advise you* that whether you purchase your seed of us or not, to purchase Connecticut grown seed, as it is the best in the world. No seedsman will dispute this fact, but many will say that they have some *just as good*. You can depend on this, that the Connecticut grown seed is fully as good as ever before and of better vitality than usual.

PRICES FOR YELLOW GLOBE DANVERS, 1900.

Price per pkt., 5c.; oz., 15c.; $\frac{1}{4}$ lb., 50c.; lb., \$1.35; 20 lbs. and over at \$1.25 per lb.; 50 lbs. and over at \$1.20 per lb.

Do not be tempted to buy onion seed of uncertain quality because it is a few cents less per lb. in price. This seed we grow ourselves and we think we know whereof we speak.

What some growers say of our Yellow Globe Danvers Onion.

MESSRS. S. D. WOODRUFF & SONS:

HATFIELD, MASS., Nov. 6.

SIRS: It gives me great pleasure to give to you the result of your onion seed the past season. From one measured acre of ground sown with Yellow Globe Danvers onion seed procured of you, I have harvested nine hundred and eighty-three (983) bushels of weighed onions, 52 lbs. to the bushel.

Yours truly,

JAMES PORTER.

S. D. WOODRUFF & SONS:

CHITTENANGO, N. Y., Jan. 5.

GENTLEMEN: The onion seed we bought of you was very satisfactory.

Yours truly,

PENNOCK & SON.

A Bumper Crop of Onions.

Over 734 bushels per acre on each acre of an $11\frac{1}{2}$ acre piece.

S. D. WOODRUFF & SONS:

SUNDERLAND, MASS., Dec. 15, 1899.

DEAR SIRS: I have grown $11\frac{1}{2}$ acres of onions this year, all in one piece, from which I harvested 8,444 bushels number one onions. I used Yellow Globe Danvers onion seed, purchased of you. Please save 50 pounds of the same for me for the coming year.

Truly yours,

M. H. CLARK.

Mr. Clark has used our seed for the past seven years and has had a fine crop every year. Consider the fact that Mr. Clark had $11\frac{1}{2}$ acres, the average yield being over 734 bushels. We think this a banner crop. Single acres could have been picked out that would probably yield over 1,000 bushels.

We advise our New England customers to plant more largely of the Early Yellow Cracker Onion. Almost without exception our customers the past season realized more profit from this sort than from any other sort they grew. It is two weeks earlier than any other sort grown from the seed.

SOUTHPORT WHITE GLOBE.

True seed of this onion can only be produced from carefully selected bulbs. Seed from such bulbs is not plentiful this year, but our customers will, if they order early, while our stock lasts, obtain seed from pure white globe-shaped onions. We challenge comparison with any one on our seed of this variety. Price per pkt., 5c.; oz., 20c.; $\frac{1}{4}$ lb., 75c.; lb., \$2.50; 5 lbs. and over at \$2.25 per lb.

Our prices on our own grown onion seed are net, not subject to discounts. Selling direct to the planter we are enabled to sell our very fine strains at reasonable prices.

Onions—continued.

Southport Yellow Globe. This variety does not differ in shape from either the Southport White or Red Globes. It is a true globe and fixed in its habits, that is, it does not deteriorate and run back to a flat onion, as will the Yellow Globe Danvers unless constantly selected. It is an enormous yielder of fine quality. Price per pkt., 5c.; oz., 20c.; $\frac{1}{4}$ lb., 50c.; lb., \$1.65; 5 lbs. and over at \$1.50 per lb.

N. B. You can telephone us from any point in Conn., for 25c. and may deduct that amount from any order of \$5.00 or over.

I have been much pleased with the seeds I have purchased of you, especially onion seed. I shall buy of you as long as you sell seed same as you have in the past, for I would not sow poor onion seed for ten times the cost.—A. G. S., West Redding, Conn.

Southport Red Globe. Differs from preceding only in color; the best Red Globe onion grown. Heavy yielder and the very best keeper. Our stock of this sort is particularly fine. Price per pkt., 5c.; oz., 20c.; $\frac{1}{4}$ lb., 60c.; lb., \$1.75; 5 lbs. and over, \$1.60 per lb.

Extra Early Red Flat. About ten days earlier than the Wethersfield, and somewhat smaller; close grained and heavy, of mild flavor and an excellent keeper. A great favorite among the Orange Co., N. Y., growers. Price pkt., 5c.; oz., 15c.; $\frac{1}{4}$ lb., 40c.; lb., \$1.25; 5 lb. lots at \$1.15 per lb.

The Rev. Andrew Schriver, Newburgh, N. Y., who had thirty pounds of our Southport Red Globe onion seed last Spring, writes:

NEWBURGH, N. Y.,
Sept. 6, 1899.

DEAR SIR: My onions are very fine, round and solid. They are full size, high color and will stand shipping to the ends of the earth.

Early Yellow Cracker. Undoubtedly the earliest yellow onion that can be grown from the seed. It

is quite flat, sure to bottom and getting more and more popular for a first early sort. It is also a remarkably good keeper. Price pkt., 5c.; oz., 20c.; $\frac{1}{4}$ lb., 50c.; lb., \$1.60; 5 lb. lots at \$1.50 per lb.

Southport Yellow Globe.

Southport Red Globe.

Large Red Wethersfield. A leading variety in the Eastern States; it grows to full size the first season from seed, almost round, large size, deep red color and keeps well. Price per pkt., 5c.; oz., 15c.; $\frac{1}{4}$ lb., 40c.; lb., \$1.25, 5 lb. lots at \$1.15 per lb.

The Early Yellow Cracker onion is the earliest of all yellow onions.

Onions—continued.

Yellow Danvers. A heavy cropping, early flat sort, used in some sections almost exclusively. Price per pkt., 5c.; oz., 15c.; $\frac{1}{4}$ lb., 40c.; lb., \$1.25; 5 lb. lots at \$1.15 per lb.

White Portugal, or Silverskin. A very mild, early sort, used extensively for pickling. This is the variety also used so extensively for raising sets. We have a very fine but limited stock and advise early orders. Price per pkt., 5c.; oz., 20c.; $\frac{1}{4}$ lb., 70c.; lb., \$2.25; 5 lb. lots at \$2.00 per lb.

Yellow Dutch, or Strasburg. A very hardy, bright straw-colored onion, good keeper, somewhat flattened, very solid and firm. This variety is used more than any other yellow sort for raising sets and is peculiarly adapted for that purpose. Price per pkt., 5c.; oz., 15c.; $\frac{1}{4}$ lb., 40c.; lb., \$1.25; 5 lbs. at \$1.15 per lb.

Mammoth Prize Taker, or Large Yellow Spanish. This is the large, beautiful onion that is seen every Fall offered for sale at fruit stores in the large cities. They are a rich straw-color, and of enormous size, averaging twelve to fourteen inches in circumference. The flavor is mild and delicate, making the Prize Taker a favorite variety for slicing for salads. Price per pkt., 5c.; oz., 25c.; $\frac{1}{4}$ lb., 50c.; lb., \$1.65; 5 lbs. at \$1.50 per lb.

White Queen. An extra early small white onion, pure paper white and mild; favorite pickling sort. Price per pkt., 5c.; oz., 25c.; $\frac{1}{4}$ lb., 65c.; lb., \$2.00.

One of the Banner Crops of Yellow Globe Danvers Onions Grown from Our Seed.

Mr. Clayton S. Parsons, Northampton, Mass., grew four acres of onions in one piece. He entered one acre for a premium in the Hampshire, Franklin and Hampden Agricultural Society. He received first premium, the yield for the acre, according to the official measurement of the judges, being 835 bu. of 52 lbs. per bushel.

We presume that Mr. Parsons selected the best acre of the four, but he assures us that the average yield for the entire four acres was nearly as large as the one acre on which he received the premium. On Dec. 15th we received the following from Mr. Parsons:

S. D. WOODRUFF & SONS:

NORTHAMPTON, MASS., Dec. 15.

DEAR SIR: It may please you to know that my onion crop has taken first premium in our three counties society, they having awarded it to me on one acre of onions, yield being 835 bushels. I used your seed and found it, as always before, to be depended upon. Book my order for 30 to 40 lbs. same kind of seed for next year.

Yours respectfully,

CLAYTON S. PARSONS.

ONION SETS.

Choice Phila. Grown Sets.

We are Headquarters for Connecticut.

We again advise our customers to set out onion sets freely. They are a sure crop and where a ready market is available they will pay as well as any crop you can raise. Set them out in rows 12 inches apart, and 3 inches apart in the row.

We have a fine stock of choice *Eastern* grown sets, and are prepared to supply in any quantity wanted. Many of our market garden customers buy from 25 to 50 bushels each.

Bottom Onion Sets.

You will find our Onion Sets of very Choice Quality.

Prices are net and subject to advance, and in all probability will be much higher. Order early.

Two of the Tools Every Onion Grower Should Own.

Universal Onion Drill.

This is the drill used almost exclusively by onion growers in the Southport, Conn., section, and it is needless to say that it is considered the very best drill in use. It sows with great accuracy two rows at a time, 12 inches apart. Net price, \$7.00.

Meeker Smoothing Harrow.

No one who raises one acre or more of onions can afford to be without this tool. It does away entirely with hand-raking the soil. Upon our own farms we would not be without one for three times its cost. Price, \$22.00, or 7½ per cent. discount for spot cash.

PARSLEY.

One of the finest plants for garnishing; used for flavoring soups, stews and salads. Sow as early as possible in Spring, in shallow drills fifteen inches apart, raking the soil fine and level on top. Cover the seed one-third of an inch. The plants appear in from two to six weeks. Succeeds in common garden soil.

Champion Moss Curled. The standard market sort. Our stock of this is extra double curled and one of the finest stocks to be had. Used very extensively on Long Island. Price per pkt., 5c.; oz., 10c.; ¼ lb., 25c.; lb., 65c.; 5 lbs. at 60c. per lb.

Fern Leaf. Very fine crimped leaves. Price per pkt., 5c.; oz., 10c.; ¼ lb., 25c.; lb., 75c.

Plain Leaf. A very hardy variety. Price per pkt., 5c.; oz., 10c.; ¼ lb., 25c.; lb., 75c.

PEAS.

(Add 15 cents per qt. if sent by mail.)

Like many other seed crops the pea crop suffered from the severe drought, and the yield was only about two-thirds of an ordinary crop.

The samples of our seed, however, are extra nice and bright, and those who have used our pea seed know of its purity and genuineness. All are Northern grown and the growing crops were thoroughly "rogued" by hand during the growing season.

Remember we deliver to your R. R. station, all charges paid, orders amounting to \$7.00 and over.

Potatoes—continued.

A member of our firm personally inspected our growing crops of seed potatoes in the towns of Caribon, Presque Isle and Mapleton, Maine, in September last. We were able to detect any mixture of late sorts with early sorts by the vines, as the late sorts were still green, while the early varieties were dead.

We have never been in a position to offer our customers better stock than this year. The seed is pure and true to name.

RADISH. (*Rettig.*)

These require a light loamy soil, moderately fertile; it should be dug a full spade deep, and well pulverized. Manures should not be applied at the time of sowing. The situation should be warm and sheltered. For an early supply, sow in January or February in hotbeds, plenty of ventilation being necessary. In May they may be sown out of doors. Successive sowings should be made every two weeks.

SQUASH.*Crookneck Squash.*

The Squash is a very tender vine, and so sensitive to the cold that it cannot with safety be planted out until the weather becomes warm and settled. Plant in hills ten feet apart for running varieties, five feet for bush sorts, working some fine rich manure into each hill. Sprinkle liberally with plaster, wood ashes or air-slacked lime, in the early stages of growth. Cultivate until runners are well started. (Add 8 cents per lb. if sent by mail.)

*Hubbard Squash.*

Remember we deliver to your R. R. station, all charges paid, orders amounting to \$7.00 and over.

We can save you money on many farm implements. Write us for
prices on anything you may need.

SUNFLOWER.

A little time and seed; the seed sown in most any out-of-the way place will insure quite a profit to the farmer in poultry food. Yankee ingenuity has led some to utilize the tall sunflower stalks for bean poles. First sewing the sunflower seeds and then after the stalk is well started, plant the beans. Excellent also for parrot food.

Mammoth Russian, or Large Gray Seeded. Price per pkt., 5c.; qt., 15c.; pk., 60c.; bu., \$2.00.

TOMATOES.

Our tomato seeds are all saved from crops raised especially for seed, and we claim are unexcelled in quality. Can guarantee all stocks pure and true to name.

SWEET, POT AND MEDICINAL HERBS.

Every garden should have its complement of Sweet Herbs. We can all appreciate their utility, both for Summer flavoring and their opportune use medicinally. Their culture is so easy that none ought to be without them. Sow the seed

in pan or seed bed in early Spring, transplant as soon as weather will permit. Cut them when not quite in full bloom and hang in shady place to dry. Pack away in box entirely excluded from the air.
