An experiment on wikimedia education

WIKIMEDIA
EDUCATION

Mrb Rafi | User:Mrb Rafi Bangladesh

In Bangladesh

One of the most **underrepresented** communities

in the **WikimediaVerse**

In the form of
**Extra Curricular
Activities**

Works on professional skill development of high schoolers through contribution to the Wikimedia Movement

Is effective when you
don't get direct access
for wikimedia
coursework to the
curriculum due to lack
of “Wikimedia
Awareness” of the
educational institution
authority

Extremely efficient to increase

**Wikimedia
awareness**

among education stakeholders

**That paves the way for
future wikimedia activism in
the educational institutions**

The organizational structure is somewhat

Similar to the

affiliates

Have its own

**Executive
Committee**

That changes

Every year

With every

New Batch

of students

Two Batches of students passed

Focusing on creating a strong alumni base currently

Focuses on

- Open source advocacy
- Open source intelligence
- Safety in Wikimedia spaces
- Wikimedia research
- Onwiki content creation, donation and moderation
- Wikimedia organizing
- Wikimedia Outreach
- Open licensing and legal aspects of Open Source
- Studying the dynamics of Wikimedia communities
- Understanding and advocating onwiki values and practices

Still in the

Bud

Intended future wings

- Legal and advocacy (will handle wikimedia legal issues)
- Dev (will contribute to wikimedia technology)
- Graphics and branding (for contributing to commons, and campaign and event branding)
- Leadership and management
- Strategy and partnership (to contribute to movement strategy and external partnership building)

Has huge potential of

Creating future

**Open Source
professionals**

THANK YOU
