SUBJECT: Inspection of Commodity Prices

TO : See Distribution

1. It has recently been brought to the attention of this headquarters that volunteer commodity price control inspectors are being organized in prefectures to check on posted prices on meats, vegetables, and other commodities as compared with official prices for such commodities. Where discrepancies exist the matter is to be reported to police officials.

2. In discussing the matter with inspectors in Kyoto Prefecture, it has been found, that in instances police officials fail to take punitive action against reported violators.

3. In order that the system will be effective, inspectors have been instructed to obtain specific facts to include names, addresses, dates and prices concerning violations as well as names of police officials to whom the reports were made and who failed to take corrective action against reported violators. This information when obtained should be presented to the military government unit concerned which would in turn call on appropriate prefectural officials to determine (a) why no corrective action was taken, and (b) to instruct them to initiate punitive action against both the merchant and the delinquent police officials. Court officials should also be instructed that sentences, to include confinement, should be levied in such cases in place of inconsequential fines that have been administered in the past.

4. After convictions have been obtained extensive publicity should be arranged outlining the facts of the case. The name of the inspector should be anonymous in order that they will not incur the ill will of the police officials nor be recognized by the merchants.

5. It is desired that action be instituted in all prefectures. The results of this program should be included in the Monthly Activities Report.
