The copy filmed here has been reproduced thanks to the generosity of:

Douglas Library
Queen's University

The images appearing here are the best quality possible considering the condition and legibility of the original copy and in keeping with the filming contract specifications.

Original copies in printed paper covers are filmed beginning with the front cover and ending on the last page with a printed or illustrated impression, or the back cover when appropriate. All other original copies are filmed beginning on the first page with a printed or illustrated impression, and ending on the last page with a printed or illustrated impression.

The last recorded frame on each microfiche shall contain the symbol \rightarrow (meaning "CONTINUED"), or the symbol ∇ (meaning "END"), whichever applies.

Maps, plates, charts, etc., may be filmed at different reduction ratios. Those too large to be entirely included in one exposure are filmed beginning in the upper left hand corner, left to right and top to bottom, as many frames as required. The following diagrams illustrate the method:

L'exemplaire filmé fut reproduit grâce à la générosité de:

Douglas Library
Queen's University

Les images suivantes ont été reproduites avec le plus grand soin, compte tenu de la condition et de la netteté de l'exemplaire filmé, et en conformité avec les conditions du contrat de filmage.

Les exemplaires originaux dont la couverture en papier est imprimée sont filmés en commençant par le premier plat et en terminant soit par la dernière page qui comporte une empreinte d'impression ou d'illustration, soit par le second plat, selon le cas. Tous les autres exemplaires originaux sont filmés en commençant par la première page qui comporte une empreinte d'impression ou d'illustration et en terminant par la dernière page qui comporte une telle empreinte.

Un des symboles suivants apparaîtra sur la dernière image de chaque microfiche, selon le cas: le symbole \rightarrow signifie "A SUIVRE", le symbole ∇ signifie "FIN".

Les cartes, planches, tableaux, etc., peuvent être filmés à des taux de réduction différents. Lorsque le document est trop grand pour être reproduit en un seul cliché, il est filmé à partir de l'angle supérieur gauche, de gauche à droite, et de haut en bas, en prenant le nombre d'images nécessaire. Les diagrammes suivants illustrent la méthode.

chopped green pepper, $\frac{1}{2}$ cup buttered bread crumbs, $1\frac{1}{2}$ cups milk, $\frac{1}{2}$ cup white sauce. Cook rice until tender in the cold water. Drain, mix with the fish, pour milk and sauce over, sprinkle with crumbs and bake until nicely browned.—Myrtle Charlton.

How to Bone a Fish

After fish is cleaned cut head off. Commence at that point and run your thumb close to the backbone, pressing hard against it down the entire length on both sides toward the back. When both sides are thus loosened. You can easily lift the skeleton, as the smaller bones will adhere to the backbone. This method is especially successful in boning whitefish on herring.

Salmon Croquettes

One and a half cups flaked fish, 1 cup thick white sauce; season with salt and pepper, lemon juice and parsley. Shape, roll in bread crumbs, then in egg, then in crumbs again and fry in deep fat. Drain and garnish with parsley.—Myrtle B. Charlton.

Oysters and Macaroni

One pint of oysters, $\frac{3}{4}$ cup macaroni broken in inch pieces, $\frac{1}{2}$ cup buttered crumbs, $\frac{1}{4}$ cup butter, salt, pepper, flour. Cook macaroni in salted water until tender. Rinse in cold water. Put layer in bottom of baking dish, cover with oysters, sprinkle with salt and pepper, dredge with flour, add bits of butter. Repeat. Cover the top with buttered crumbs. Bake 20 minutes in a hot oven.—Mrs. Harry Cloes.

Scalloped Salmon

Flake a can of salmon and season well with salt and pepper. Crush soda biscuits and put the salmon and biscuits in alternate layers in a baking dish having crumbs on top. Cover with milk, dot with butter and bake $\frac{1}{2}$ an hour.

To remove wall paper use a heaping tablespoon of saltpetre to one gallon of hot water and apply to the wall with a brush. The water should be kept hot and applied often, this will loosen the paper so it may be pulled off easily.

Irish Stew

Cut lamb in dice, using shoulder meat. Cover with boiling water and cook slowly till tender. When about half-cooked add $\frac{1}{2}$ cup each of carrot, turnip and salsify. Cut in small pieces and 1 onion and 2 sticks of celery sliced. About 15 minutes before it is done add potatoes cut fine. Season with salt and pepper and slightly thicken the gravy.

Pot Roasts

Four to six pounds of shoulder beef. Put a little suet in a kettle and let it get very hot. Put in beef and sear all sides to a rich brown. Add a pint of boiling water and cook, using just enough water to keep it from burning. Cook till meat is tender but do not let it fall apart. Add seasoning after first half hour. Serve with brown gravy.

Swiss Steak

Take a piece of round steak and lay flat on table or board. Sprinkle with salt and pepper and dredge well with flour. Pound until flour is absorbed and then add more flour. Keep pounding till it will take no more flour. Turn and treat the other side similarly. Sear both sides in a pan in which there is hot fat. Then add 1 cup water and simmer till tender. Steak thus treated should be from $\frac{3}{4}$ to 1 inch thick.

Bread

Brown Bread

Two cups bran, 2 cups white flour, $\frac{1}{2}$ half cup brown sugar, 1 teaspoon salt, 1 teaspoonful soda; Mix with buttermilk to about the stiffness of fruit cake. Bake one hour in a slow oven.—Mrs. Arthur Bailey.

Salt Rising Bread

Early in the morning make a batter in a tea-cup consisting of a $\frac{1}{2}$ cup hot water, a pinch of salt and soda and corn meal. Keep warm until light; it should rise to nearly top of cup; set aside until next day. Then put hot water in a larger dish (a 3 lb. lard pail will answer), and make a batter by adding flour, another pinch of salt and soda, and add contents of cup.

When pail is full have ready some scalded milk and water; add flour and contents of pail. When this is light knead down and when light again mould into loaves. Let rise. Make a small batch at a time. Keep warm and warm dishes and board. Do not let it chill, but never scald the butter.—Mrs. S. L. Parkes.

Four Hour Bread

One large handful flour, $\frac{1}{2}$ cup granulated sugar, 1 teaspoon salt, 1 cup mashed potatoes. Potato water. Mix flour, sugar and salt in a crock. Pour over the hot potato water; add potatoes; let cool and when cool put in an yeast cake which has been dissolved in a little warm water. Set in a warm place. By night it will look foamy. Next morning warm mixture; add more water if desired, a piece of lard and a little salt, and mix quite stiff with flour; keep warm and when light knead and let rise again. Put in pans. Rise till double in size and bake. 2 quarts of yeast mixture makes four large loaves.—Mrs. L. K. Laidlaw.

White Bread

Yeast Part—Scald one cup flour, one-third cup sugar, pinch of salt with potato water at noon. Beat thoroughly and add 3 tablespoons mashed potatoes. Set away to cool. Then break one yeast cake in one-third cup of lukewarm water. When the scalded part is luke-warm, add the dissolved yeast cake. Beat thoroughly. Cover and set in a fairly warm place to raise. In the evening make a sponge by adding as much lukewarm water to the yeast as you think you need. I had $2\frac{1}{2}$ quarts for 7 or 8 loaves. Cover warm; let rise over night. Mix stiff in morning, adding a big handful of salt. Cover warm and mould into loaves.—Mrs. J. A. Evert.

Nut Bread

One cup brown sugar, one egg, one cup sweet milk, 2 teaspoonsful Baking Powder, $\frac{1}{2}$ cup chopped nut meats, $\frac{1}{2}$ cup chopped dates or raisins, 3 cups flour. Let rise in a warm place for 20 minutes and bake in a moderate oven.—Mrs. J. A. Evert.

Bran Loaf

One teaspoon soda, 1 teaspoon salt, 2 cupsful flour, 2 cupsful bran, 1 cupful brown sugar, $1\frac{1}{2}$ cups sour milk, $\frac{1}{2}$ cup chopped walnuts, $\frac{1}{2}$ cup chopped dates.—Mrs. S. Caron.

What to Do in Case of Emergencies

Fainting

When a person faints stretch them flat on the floor or on a couch with the head lower than the feet. Loosen clothing and give the patient fresh air. This is sufficient treatment for an ordinary faint. The face may be wiped with a handkerchief wet with cold water but no not dash water in the face as is so often done.

Poison

If poison is swallowed, send for a doctor but do not wait for his arrival as seconds count. Stir about a teaspoon of salt and the same quantity of mustard in a half glass of water. Hold the patients nose so tightly that he must open the mouth for breath. When the mouth opens put in the solution. If the patient does not vomit make him swallow a raw egg white. Follow with a cup of strong coffee as a stimulant.

Bleeding

In case of severe bleeding determine whether it is an artery or vein which has been severed. If an artery the blood will come in spurts as the heart beats, if a vein, it will flow evenly. In either case tie a handkerchief or bandage loosely near the wound. If it is an artery put it between the wound and the heart and if it is a vein put it on the other side of the incision. Put a stick in the slack of the bandage and turn it round and round till it is pulled up very tight and causes decided pressure.

Choking

Hold up the left arm above the head, strike the patient a smart blow between the shoulders.

Nose Bleed

Hold the head back and apply ice cold cloths or snow to the top of the nose and back of the neck. Plug the nostrils with batting.

Sunstroke or Heatstroke

Place the patient in a cold bath and pack the head in ice if possible and if not use cold water packs which must be changed every few minutes. Continue this treatment till the doctor arrives unless however the temperature drops to normal.

Burns and Scalds

If a child's clothing catches fire force her to lie down so the flames will not reach the head. If cold water is at hand dash it on, otherwise roll tightly in something woollen, a mat, blanket, shawl or overcoat. Do not try to beat out flames as this only fans them. Smother them instead. Treat burns and scalds much the same. Remove clothing by cutting, cover the spot with a soft linen cloth wet with boric acid solution or cover with boric acid ointment. Cover this with oiled cotton or silk to exclude the air as much as possible. Surround the body with hot water bottles and if possible give hot strong coffee.

Frostbites

Keep away from heat. Apply snow or cold water to the frozen part and gently rub with fur or a woollen muffler. Be sure to draw out frost without heat.
