REMARKS: Reference letter, Hq Eighth Army 26 November 1947, file 463.7(L.C.) (Report Control Symbol QGD 29) vehicles on JPNO 572 are used about 18 hours a day on scheduled runs and thus require more than 300 gallons of gasoline per month. Two busses now operating 15 hours a day on scheduled runs between Kyoto, Otsu, and Hydroponic Farms, to service dependents living in area now under this command. Round trip is approximately 25 miles. Busses on JPNO 571 B consume a greater amount of gasoline because of their size also because of length of scheduled runs. Eighteen busses on JPNO 2830 were used for recreation and regular bus route between Kyoto Post Command and Fushimi.

Remarks

The approximate figures contained in the Kyoto Military Government Team, Maizuru Detachment, and those of the Agriculture and Forestry Marine Products Section, Kyoto Prefecture Office, are near the same and are both compiled from the Kyoto Prefectural Fisheries Association - a public chartered shipping agency in this prefecture.

Agriculture and Forestry Marine Products Section has the following approximate figures:

| | |
|---|---|
| Sardines | 863 kg |
| Mackerel | 2,668,122 kg |
| Yel. Tail | 39,019 kg |
| Cod | 112,343 kg |
| Shark | 52,395 kg |
| Horse Mackrel | 28,275 kg |
| Cuttle Fish | 19,744 kg |
| Flat Fish | 50,374 kg |
| Total | 2,971,135 kg |

The illegal transaction per cent could not be obtained by the Marine Products Section of the Kyoto Prefectural Office.

This total and that from Maizuru Detachment shows difference of 186,347 Kg (?)

8. Remarks: (1) The amount of lubricating oil, especially machine oil, necessary for boat operation is 10% of the staple oil, however the actual amount allocated is only 6%. Fish oil is used as a substitute but results are not satisfactory. Due to instructions given out by the Ministry of Commerce and Industry oil-distributors can not convert all the allocation of machine oil shown of the ration ticket. The present situation is deteriorating to the extent that the amount of machine oil avail able will determine the amount of fishing that the fishermen can do.

(2) The supply situation for gasoline and mobile oil is similar to (1).

(3) The allocation of kerosene, gasoline and lubricating oil is obtained by the following ratio. Kerosene: 3% of diesel oil allocation. Gasoline: 3% of gas oil. Lubricating oil: (Machine oil: 6% of diesel oil. Mobile oil: 3% of gas oil) Grease has no ratio.

(4) Due to exceptionally large mackeral catches, the estimated shortage of heavy oil to meet link requirements is expected to reach 500 tons by the middle of May.

(5) Some complaints have been heard that distribution processes have slowed due to the dissolution of the Petroleum Kodan and the transfer of its functions to private dealers.

DECLASSIFIED E.O. 12065 SECTION 3-402/NNDG NO. 113013

Remarks: (1) Figures shown in column E are only approximate. Individual fishermen and many of the associations keep no exact records of the final date of receipt of allocated materials. Thus it is not possible to know how much of a given quarters allocation was received during any specific calendar period. It is possible to determine, however, the approximate status of receipt for a quarterly allocation with respect to cumulative receipts. For example, the July - Sept. allocation may be shown as 98% delivered on 1 April, although it is not known how much was delivered in the July - Sept. quarter, the Oct - Dec quarter, and the Jan - March quarter.

(2) Soruce of consolidated statistics is the Kyoto-fu Marine Products Assoc. Some ommissions may occur, however, since a few fishermen do not use this association as a procurement agency but deal directly with suppliers.

(3) Delay in receipt of allocations is said to be due to inadequate facilities on the part of manufacturers and processors. Fishermen particularly complain of delays by their principal suppliers in Aichi and Shizuoka prefectures.

(4) Although not covered in this report, shortage of items of personal equipment, particularly rubber goods, is a serious problem to efficient fishing operations.

(5) Expected price increases in production materials due to the single exchange rate is another unfavorable material supply factor, directly related to credit and production in the fishing industry.

## Suggested Measures to Expedite Economic Recovery

1. Industry

Plans and procedures should be formulated to utilize locally existing reporting facilities on industrial production. Production Movement Research Reports which are being prepared monthly by all plants designated by the Ministry of Commerce and Industry are forwarded to the regional offices of the Ministry (as prescribed by Not. No 7,30 Jan 48) through the prefectural government and prefectural C & I offices. However, the latter offices make little use of these reports and in some cases do not even retain a file copy. Consequently, there is little consolidated and evaluated information on the prefectural level which can be used either as basis for anticipating future problems or for evaluating past industrial trends. Little additional effort would be required to utilize these reports on the prefectural level since standardized forms are already in use, industrial plants have had over a year's experience in their preparation. Requiring only one additional copy where as many as 8 copies are already being submitted would not appreciably affect paper requirements.

2. Food and Agriculture

a. Local processing, milling and baking facilities should be surveyed in order to determine accurately the amount of processing of cereals which is necessary before distribution in relation to processing which can be most effectively accomplished by direct contact between consumers and processing shops.

b. Possible local legislative action should be considered as a means of minimizing unnecessary food consumption following the expiration of Cabinet Order 118.

c. The possibilities of greater production of crops suitable for edible oil extraction should be explored in view of the prohibitive dollar cost for imports of this product.

3. Finance and Credit

a. Methods and measures for collecting outstanding loans should be studied with the objective of reinvesting existing private credit in essential enterprise.

b. Local fund requirements should be surveyed, with consideration given the expected adjustments of 1948 - 1949 government deficits which are to be covered in the 1949 - 1950 budget.

DECLASSIFIED E.O. 12065 SECTION 3-402/NNDG NO. 715013

c. All possible industrial, financial and commercial data of local significence should be collected in order to prepare recommendations for the Japanese Government's quarterly plan of utilizing the U.S. Aid Counterpart Fund Special Account.

d. The effects as well as the future possibilities of the "designated deposit" system of the Gov. should be investigated.

4. Coordination and Planning

a. With the expected transfer of many national government branch offices to the prefectural government, consideration should be given the effect upon administration and operations in private companies. In particular many functions carried out by head offices may have to be decentralized to the local branches of the larger industrial concerns. Under the present complicated allocation and control procedures of the Japanese economy, plans should be made by private enterprise to alter their administration in accordance with the projected government reorganization.

b. Greater effort should be made by the Recovery Commissions to utilize data and recommendations obtainable from private agencies already in existence. Local Chambers of Commerce, Manufacturers Associations, etc. maintain study groups and research organizations which are in many cases studying exactly the same problems as the sub-committees of the Recovery Commissions. A thorough study of sources followed by closer coordination should eliminate duplication and unnecessary work on the past of the Recovery Commissions.

DECLASSIFIED E.O. 12065 SECTION 3-402/NNDG NO. 715 013

The Agricultural Cooperative Unions Law, as shown in the annexed paper, was published on Nov 19, 1947 and put in force on Dec 15 of the same year. The main points of the law are as follows.

1. This being a democratic body, the farmers are free to establish unions or to be members of them and they can freely fix the business they want to do. They do no control activity and the government offices only superinted them not to break the law.

2. This being a body composed of industrious farmers, no idle ones can compose it. It is left to the democratic decision of the union to all on those that are not farmers to join the union as secondary members when actual circumstances necessitabe it.

It is in accordance with the articles of the union which the members have made to decide the amount of one share and the maximum number of shares one member holds.

3. This being a body composed of farmers, the operation of the union is decided and done with the decision of the members that are farmers each with equal right. At least three-fourths of the officers in charge of the union operation should be members of farmers. When more than one-fifth of regular members request, they can re-elect the officers. Thus they try not to be influenced by the interests of those that are not farmers.

4. The union doing cooperative work, aims at giving the greatest service to the members and not at getting interests of the union.

5. The aim of the union is to produce much and to do economic enterprises and does no political activities, having no connection with them.

---------- o ----------

As shown in the fundamental rules of the Agricultural Cooperative Unions Law, the unions established on the basis of this law are not the objects of the "policy to abolish control bodies". Besides it is expressed in (R) of Item 1 of Article 6 of "Enterprisers' Body Law" that they are to be exempted from the law.

Agricultural Mutual Aid Association.

These associations were established on Dec 15, 1947 in accordance with the No.185 Law, "Agricultural Damage Compensation Law.

This law aims at compensating the loss or damage done on Agricultural produce which the farmers may sustain by unexpected accidents and making them follow their work at ease and promoting their production power. So if farmers join these assocs. their damages are compensated and get their motive power for making another production.

These assocs. do no control business and we think they are to be exempted from the objects of the "Policy to abolish control bodies".

TOBACCO COMMERCE COOPERATIVE ASSOCIATION:

This being an assoc. established in accordance with the Commerce and Industry Cooperative Unions Law, it is free to join or leave the assoc.

This assoc. aims at the improvement of tobacco sellers' business and making the sellers perform their mission perfectly of distributing tobacco as tobacco sellers, and does no control. It is free to join the assoc. and the assoc. does not compel the members to pay dues or fees. Neither does it mandatory inspection, nor allocation or distribution schedules.

The Government monopolizes tobacco sale business and as for the sale the members, namely tobacco sellers do their work only in accordance with government instructions.

The main aim of the associations is to keep close connection with each other, and some of them have desks and chairs for their business, but in such an assoc. as has only a few members, the chief of the assoc. does the assoc. business in his home out of his good will and the assoc. has no property of its own.

Pasture Land Association.

This assoc. was established in accordance with No.37 Law, "Pasture Land Law". By pasture land we mean the land where cattle and horses are grazed freely or where fodder is moved.

Those who are permitted by the law are allowed to graze their cattle and horses or to mow the fodder, and they have established Pasture Land Associations to keep their meadows in good condition and improve them.

They are free to join or to leave the associations. The business done by the association is as follows.

1. Joint instalment of equipments necessary for the keeping and improvement of pasture land.
2. Improvement of grass grown.
3. Removal of thorns, stones and other obstacles.
4. Extermination and prevention of injurious insects.
5. Utilization and control of pasture land.

This association has no connection with the articles mentioned above.
