G2, GENERAL HEADQUARTERS, FAR EAST COMMAND, APO 500, 26 April 1952

TO: Chief, Counter Intelligence Corps, Fort Holabird, Baltimore 19, Maryland

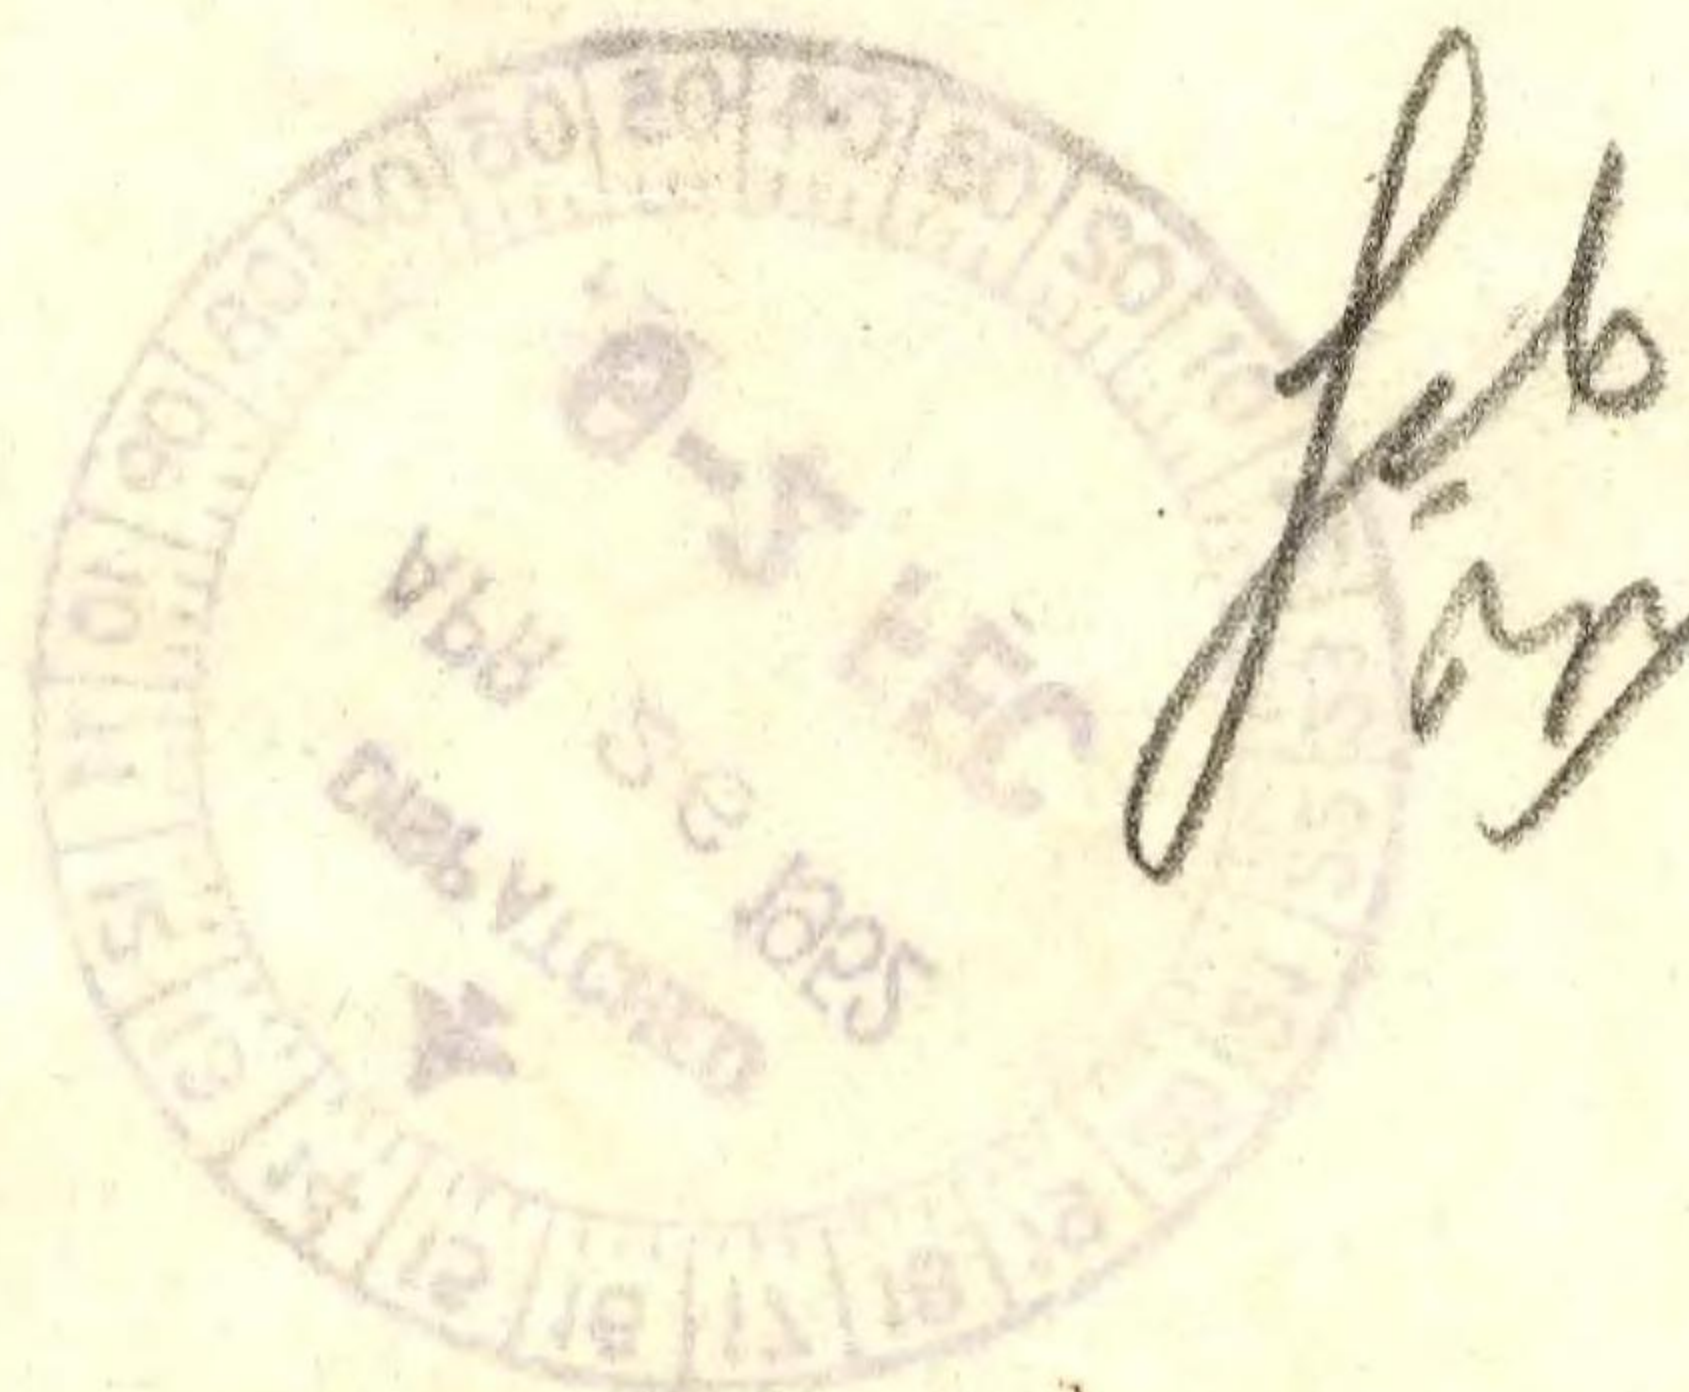

1. At the present time there are only 13 enlisted men (MOS 1301) of the first three grades projected for assignment to the Far East Command, thereby creating a severe problem, as indicated in the basic letter. The need for experienced personnel necessary for continuity of operations in this theater is acute.

2. Personnel are assigned directly to Korean CIC Detachments via Camp Drake Replacement Depot, and the rapid turnover of personnel in Korea (approximately 100% in 9 months) does not permit an orientation program for inexperienced personnel. Experienced personnel cannot be sent from Japan to Korea, other than volunteers, because of rotation requirements and assignment restrictions related thereto, as established within the Far East Command.

3. It is recommended that no less than 30% of the enlisted replacements shipped this command against monthly requisitions in the future be experienced investigators. In this way CIC's needs in Korea can be filled almost entirely by experienced personnel, thus gradually correcting the present condition as described in basic letter.

1. Recent CIC replacements received in Korea have practically all been in the grade of private and have lacked any kind of field experience. As a result, the quality of CIC operations and capabilities has been considerably reduced.
2. This drop in quality has occurred at a time when Eighth Army has been faced with unusual and serious problems in connection with handling and screening prisoners of war. In several cases non-commissioned officers must be assigned to isolated posts where it would be much more desirable to have an officer.
3. At present, CIC can barely meet present responsibilities. Further deterioration in quality will force the abandonment of some operations now being performed.
