THE LEGISLATIVE ASSEMBLY OF ONTARIO
SESSIONAL PAPER No. 8 — 1942

ONTARIO

TORONTO

Printed and Published by T. E. BOWMAN, Printer to the King's Most Excellent Majesty
1942

To:

THE HONOURABLE ALBERT MATTHEWS,
Lieutenant-Governor of the Province of Ontario.

MAY IT PLEASE YOUR HONOUR:

As required by law, I submit for the information of Your Honour and the Legislative Assembly, the Annual Report of the works under the control of the Public Works Department, comprising the reports of the Deputy Minister, the Architect, Engineer, Secretary and Accountant, for the twelve months ending the 31st of March, 1941.

Respectfully submitted,

F. R. OLIVER,
Minister of Public Works.

Department of Public Works, Ontario,
Toronto, April 10, 1942.

REPORT

OF THE

Deputy Minister of Public Works

THE HONOURABLE FARQUHAR R. OLIVER, M.P.P.,
Minister of Public Works,
Parliament Buildings,
Toronto, Ontario.

SIR:

I have the honour to submit to you the accompanying reports of the Architect, Engineer, Secretary and Accountant, for the financial year, April 1, 1940 to March 31, 1941.

ARCHITECT'S BRANCH

To facilitate the war effort, all construction has been curtailed to absolutely necessary items and to such projects that were contributing to the various phases of the conduct of the war.

The Province has continued to assist the Dominion by providing accommodation for war purposes, leasing Provincial properties to the Dominion without rental, and being reimbursed only for out-of-pocket expenses in arranging for temporary quarters for displaced personnel.

The Provincial properties leased to the Dominion since the outbreak of the war are as follows:

Institution	No. of Buildings	Valuation	Use of Institution
Ontario Hospital, St. Thomas.	19	\$6,199,827	Technical Training Centre for R.C.A.F.
Normal School, Ottawa.	1	237,000	Office Accommodation
Ontario Hospital, Port Arthur.	1	125,000	Military Purposes
Industrial Farm, Monteith.	14	373,000	Internment Camp
Ontario Reformatory, Mimico.	21	700,000	Internment Camp
Ontario Hospital, London.	(52 acres land only)	22,500	Military Purposes
TOTAL	56	\$7,657,327	

The new Dairy School Building at the Agricultural School, Kemptville, has been completed and fully equipped at a cost of \$66,488.90.

At the Mercer Reformatory, King Street West, Toronto, some changes were carried out to provide fireproof exit stairs and corridors in the west end of the west wing and the cell locks were changed from individual locking to a gang locking system.

Additional work was done at the Fish Hatcheries at Hill's Lake, near Charlton, Skeleton Lake, Muskoka and Deer Lake, near Peterborough, consisting chiefly of grading and road work.

This Branch examined plans for the Department of Health and reported on proposed alterations or additions to twenty-five existing public and private hospital buildings and prepared plans and specifications for a number of Scale Houses and other buildings used by the Department of Highways. Co-operation was given to the Department of Labour in connection with alterations to rented premises for employment offices, and also alteration to several Province of Ontario Savings Offices.

ENGINEER'S BRANCH

The necessary repairs and maintenance of locks, dams and docks were carried out and a new storage dam was constructed on Tilden Lake in Nipissing District. Assistance was provided for municipal road drainage in the Districts of Muskoka, Victoria and Haliburton, Peterboro, North and South Renfrew. A grant was made to the Township of Pelee of \$2,298.96, in conformance with the Provincial Aid to Drainage Act.

The work of constructing the Shand Dam under the Grand River Conservation Commission was continued, the Province contributing \$254,216.11, based on 37½% of the cost of the works, the Dominion contributing a like amount and the balance being borne by the benefitting municipalities.

SECRETARY'S AND ACCOUNTANT'S BRANCH

Owing to the curtailment of new construction, there were few contracts awarded during the year. The revenue received totalled \$57,130.00, consisting chiefly of rentals and sales of materials not required for departmental use. Property sales amounted to \$4,888.70, which covered an adjustment on land expropriated for use by the Dionne Quintuplet Guardianship in the amount of \$4,513.70 and a piece of land at Bowmanville, approximately 8 acres, to Ernest Albert Craig, for \$1,500.00; the first instalment of \$375.00 being paid at time of sale. This land was previously used as a Summer Camp for the Training School for Boys, Bowmanville, and was not required for this purpose.

The expenditures are summarized, as follows:

Main Office.....	\$92,602.16	
Statutory.....	1,490.41	\$ 94,092.57
		<hr/>
Maintenance and Repairs.....		542,404.01
		<hr/>
Total Ordinary.....		\$636,496.58
		CAPITAL
Public Buildings and Public Works.....		\$324,230.42
		<hr/>
Total Net Expenditures.....		\$960,727.00

I have the honour to be, Sir,

Your obedient servant,

R. A. McALLISTER,

Deputy Minister of Public Works.

TORONTO, March 10, 1942.

REPORT OF THE ARCHITECT

THE HONOURABLE FARQUHAR OLIVER,
Minister of Public Works.

Sir:

I have the honour to report on the work done by the Architect's Branch of the Department of Public Works, Ontario, during the fiscal year April 1st, 1940 to March 31st, 1941.

ONTARIO GOVERNMENT INSTITUTIONS LOANED
TO
DEPARTMENT OF NATIONAL DEFENCE, CANADA

During this fiscal year a total of three Province of Ontario Institutions all, or in part, as described later in the body of this report, and a portion of the lands of the Ontario Hospital, London, were turned over to the use of the Department of National Defence, for the duration of the present war. These Institutions are as follows:

Ontario Hospital, Port Arthur	(part)
Industrial Farm, Monteith	
Ontario Reformatory, Mimico	(part)
Ontario Hospital, London	(a portion of the lands only)

This group of Institutions and the land, as referred to at the Ontario Hospital, London, together with the other properties previously loaned for the same purpose, now totals six premises, all, or in part, of which have been loaned to the Department of National Defence for the duration of the present war.

The Department's work this year, as previously, in connection with the loan of these Institutions, has included the preparation of agreements, recording plans, reports on condition of buildings, surveys, records, stock-taking and preparation of inventory of furnishings and equipment loaned with the said building to the Department of National Defence.

Such work has also included the surveying, leasing and remodelling and fitment of temporary premises where such were required by the Province to carry on certain essential parts of the work of the Institutions affected.

The moving and storage of furniture in connection with the vacation of the above premises by the Province was also dealt with by this Department in co-operation with the other Departments having jurisdiction over the Institutions affected. Further reference to these Institutions is made under their subdivisions in the body of the report which follows.

LEGISLATIVE AND DEPARTMENTAL BUILDINGS

General minor repairs and replacements and minor changes were carried out in connection with all trades as required, but restricted to a reduced program of expenditure, having regard for present war conditions. A considerable amount of repairs were also made to furniture and furnishings for this group of buildings.

Apart from the said general minor items, certain work of a special nature was also carried out as enumerated in the following paragraphs:

Parliament Buildings:

A portion of the fifth floor was remodelled to provide a motion picture projection room on the basis of the modern requirements of the Province, to be used for the instruction of moving picture operators.

A stairway which was not used to any great extent, leading from the third to the fourth floors of the East Wing, was removed and a much needed women's lavatory installed in the said space on the fourth floor.

The men's lavatory on the second floor of the North Wing was remodelled to improve the sanitary conditions.

Gun racks were installed in the Provincial Police vault for their use.

East Block:

Two rooms in the Department of Health Laboratory section were remodelled to provide more working bench space. The outfit work, previously done in these rooms, was moved to No. 11, Queen's Park, which was fitted with the necessary equipment.

All the exterior vestibule doors were remodelled to swing out only, to prevent draughts and improve the heating conditions of the adjoining corridors.

Subsidiary Buildings:

General repairs of an urgent nature in all trade branches were carried out where required, in the following buildings:

- No. 11 Queen's Park.
- No. 15 Queen's Park.
- No. 39 Queen's Park.
- No. 112 College Street.
- No. 454 University Avenue, Liquor Control Board Offices.
- No. 807 Richmond Street West, Sewage Laboratory.
- No. 70 Lombard Street.
- Department of Highway's Garage, Leaside.
- Department of Highway's Police Garage, Surrey Place.

In connection with the offices of the Liquor Control Board, a considerable amount of repairs were made to a large portion of the ceilings, including the installation of a new hung ceiling and the re-wiring of all the outlets in connection therewith. Extra lighting fixtures, as required, were installed in connection with this work.

The Employment Service Office building at 70 Lombard Street was leased to The Workmen's Compensation Board and their occupancy commenced as of November 1st, 1940. The covering lease for this occupancy is on file in this Department.

Osgoode Hall:

A restricted program of general repairs was carried out in all trade branches as required for this building. Furniture repairs were made. A new dictograph system and some new lighting fixtures were installed.

EDUCATIONAL BUILDINGS

Normal and Model Schools, Toronto:

Considerable repairs were made to roofs. Two rooms in the centre building were fitted up with sinks, stoves and other equipment for the teaching of Domestic Science. Minor repairs were made to stokers.

Normal and Model Schools, Ottawa:

As previously reported in last year's report, this building was loaned to the Dominion Department of Public Works, for the general use of the Dominion

on November 1st, 1939 and the Elgin Street School was leased and fitted up for the use of the said Normal School, as also stated in the previous report. Minor repairs and adjustments were made to the electric clock system of the Elgin Street temporary premises.

London, Normal School:

Minor repairs were carried out in connection with the existing plumbing and to the roofs. Minor repairs were made to boiler stokers.

Hamilton, Normal School:

Minor repairs were carried out, including adjustment to electric clock system. The tile walls of women's lavatory on the first floor, were repaired and replaced where defective. Minor repairs were made to the heating system and boiler brickwork repaired.

North Bay, Normal School:

Minor repairs were made to lavatory doors. General repairs and renovations were made to the heating system. Minor repairs were made to boilers and stokers.

Peterborough, Normal School:

Minor repairs were made to the plumbing system and adjustments made to electric clocks. The brickwork of the boilers at this School was renovated and defective tubes replaced.

Stratford, Normal School:

Minor repairs were made to plumbing, skylight and floors. Minor repairs were made to the heating system.

Ontario School for Deaf, Belleville:

A new roof was laid on the Girls' Dormitory Building. Repairs were made to water mains. Minor repairs were made to plaster work in the Main Building. Minor repairs were made to the plumbing in the Senior Girls' and Boys' Dormitory Buildings, and to the roofs of the main building and boys' dormitory building. Repairs were made to the steam boilers. Defective tubes were replaced and dead plates and stoker retort casting were replaced. The boiler feed pump was overhauled and repaired.

Ontario School for Blind, Brantford:

General repairs were made to plumbing, roofs and eavestroughs for Main Building and Girls' and Boys' Dormitory Buildings. Minor repairs were made to steam boiler stokers.

Ontario Training College for Technical Teachers, Hamilton:

A new roof was laid over the workshop section of the building. Minor repairs were made to plumbing. Repairs were made to vacuum pump and steam mains.

CONSULTATION WORK ON SCHOOLS

At the request of the Department of Education, the following consulting services were rendered:

Illustrations and typical plans were sent to the Sprucedale Public and Continuation School Board, Ottawa.

The following buildings were examined and reported upon:

Huntsville High School.

Township of Fenlon Falls, Public School Section No. 8.

Langstaff Public School Board, Markham and Vaughan Townships.

School Section No. 14, North York.

Plans were examined and reported on for Sarnia Collegiate and Technical School.

AGRICULTURAL BUILDINGS

Ontario Agricultural College, Guelph:

Alterations were made to Massey Library to provide offices for Professor of English, including a new second entrance to the building on the south elevation.

General repairs were made to the roofs of Memorial Hall, Macdonald Institute, Macdonald Hall, Massey Library, Poultry Building, Maids' Dormitory, Administration Building and new shingle roofs were laid on five of the staff residences. Specifications were drawn for the interior painting of Macdonald Hall and the work carried out by the College Staff. The wiring in Macdonald Hall was entirely replaced in conduit.

Specifications were drawn and prices obtained and the work carried out for the entire re-roofing of the skating rink building.

The plumbing in showers and toilets of the Administration Building was renovated by the Department of Public Works staff mechanics.

The exterior face of basement walls of Chemistry Building and part of the exterior basement walls of Mills Hall were repaired and damp proofed.

Ontario Veterinary College, Guelph:

Repairs were made to the roofs of the Main Building and Veterinary Hospital barn.

Agricultural School, Kemptville:

Repairs were made to plaster work and to the marble partition work in lavatories of the Students' Residence. Minor repairs were made to roofs of the Main School Building.

The work of installing steam boilers and stokers in the Main Building, as mentioned in the previous fiscal year's report, was completed.

The work of completing and equipping the new Dairy School Building was carried out, including supply and installation of dairy machinery and laboratory benches and equipment, together with all the necessary piping. The cold storage rooms and machinery were completed and the necessary miscellaneous furniture and furnishings supplied and installed.

Sewer lines and manholes were installed for the new Dairy Building.

Heating trenches were installed with the necessary steam and other service lines from the heating plant in the Main Building to the Engineering Building, the new Dairy Building and to the Stock Judging Pavilion.

New roads were laid to connect the Main Building, Engineering Building and new Dairy Building.

Minimum repairs, including renewals of certain poles, were made to the electrical distribution system.

Western Experimental Station, Ridgetown:

New concrete foundation walls were built under the dining room portion of the Superintendent's residence.

Demonstration Farm, New Liskeard:

Minor repairs were made to buildings generally, including a new roof which was laid over the Milk House at the Farm.

Horticultural Experimental Station, Vineland Station:

Minor repairs were made to plumbing and water supply system, including installation of a chlorine strainer.

Considerable repairs were made to steam boiler stokers and to furnaces in the residences and one new hot air furnace was installed in the Stevenson cottage.

An existing 15 H.P. boiler, left over from the old canning factory, was set up by the staff for operation in connection with the establishment of a fruit juice laboratory in co-operation with the Dominion Department of Agriculture.

DISTRICT BUILDINGS

Due to present war conditions, the work done in connection with the district buildings was kept to a minimum and the only work items carried out were those of an urgent nature and as described in the following sub-divisions.

Algoma:

At the Court House, Sault Ste Marie, minor repairs were made, including new hinges and plates for the front door. Forty-two window blinds were purchased as replacements and two desk lamps were supplied.

The Registry Office at Sault Ste Marie is being used by the Red Cross, as stated in report of previous year.

At the Gaol, Sault Ste Marie, minor repairs were made generally, including the purchase of lumber and roofing paper for repairs to the storage shed. Paint was purchased for interior, the work to be done by prison labour. Sixteen prison locks were purchased as replacements and the casings were to be made at the Ontario Reformatory, Guelph. Vitreous clay pipe was purchased to provide additional surface drainage, the work of installation to be done by prison labour. Six window blinds were purchased as replacements in the Gaoler's residence.

Cochrane:

At the Court House, Cochrane, minor repairs were made, including repairs to locks.

At the Lock-up in Matheson, repairs were made to plumbing and paint was purchased to be applied by the Provincial Police.

Kenora:

At the Court House, Kenora, the basement was remodelled to provide office quarters for the Provincial Police, which consisted of three offices and a storage vault and the remodelling of the side entrance leading thereto. Minor improvements were also made to the Janitor's quarters in the basement and a kitchen was provided in connection therewith. The Crown Attorney's office was repainted. The return feed pump and motor was repaired. Three desk lamps were purchased and some minor repairs were made to hardware.

At the Gaol, Kenora, minor repairs were made to plumbing, prison locks and relief valve seat. Twelve new replacement beds were purchased for prisoners.

Plans only were prepared for a new Lock-up building for Red Lake, at the request of the Department of the Attorney General.

Manitoulin:

Minor repairs were made to the Court House and Gaol at Gore Bay, including the renewal of one basement window frame and making good the surrounding stonework. The septic tank was cleaned and repaired. Repairs were made to furnace, including grate renewals and new ash and furnace doors. Minor repairs were also made to piping and radiators.

Muskoka:

Minor repairs only were made at the Bracebridge Buildings, in view of the fact that the rebuilding of the Gaol and some remodelling work in the Court House was under serious consideration. Sketch plans were prepared for a proposed new Gaol Building addition to the present Court House, but the working drawings were not put in hand.

Working drawings were prepared for a proposed new addition to the Court House which was to provide additional lavatories and fire tower stair exit from the Court room. This project was laid out so that it would work in with the proposed plan for the new Gaol Building.

Nipissing:

General repairs were made to Court House, Registry Office and Gaol at North Bay.

The electric lighting of the Land Titles Office was improved by the installation of more efficient type of lighting fixtures. Minor repairs were made to boilers and boiler linings.

Parry Sound:

Minor progress repairs were made to the Court House, Registry Office and Gaol at Parry Sound. The locking devices in the cell blocks were improved.

Rainy River:

Minor repairs were made to the buildings in Fort Frances.

Sudbury:

General repairs and improvements were made to the Court House, Registry Office and Gaol at Sudbury.

A new glass partition and counter was installed in Provincial Police quarters and some new furniture purchased for these offices.

The lighting system was improved in the Court House by the installation of some modern type fixtures. Progress repairs were made to the plumbing system and door and hardware were replaced where required.

Temiskaming:

Minor repairs were made to the Court House, Registry Office and Gaol at Haileybury, including considerable plumbing repairs in Court House.

At the Government building at Elk Lake, the septic tank was re-conditioned and the sewer line to this tank re-laid.

Thunder Bay

Minor repairs and improvements were carried out where required at the Court House, Gaol and Registry Office at Port Arthur. Paint was supplied for the Gaol, to be applied by the inmates.

Additional kitchen utensils and ten gaol beds were purchased.

Shelving was installed in the Sheriff's vault and some more efficient lighting fixtures were installed to improve the general illumination in a number of the offices in the Court House.

ONTARIO HOSPITALS

Ontario Hospital, Brockville:

The two large solaria connecting wards in the Main Building were re-roofed.

The general electrical distribution system was remodelled and new transformers installed to overcome the unbalanced loading condition, which had been the cause of considerable trouble from time to time in the past. Part of the work was done by the local Hydro Authorities and part by the Hospital staff mechanics.

Ontario Hospital, Brampton:

These premises are in charge of a resident caretaker and the farm is being operated by the Department of Health.

Ontario Hospital, Cobourg:

A new fire escape from the second floor was erected for the Nurses' residence.

The floor of the shower room on the ground floor of the patient's west pavilion was jacked up and repaired.

Eavestroughs and conductor repairs were made to the west pavilion.

Ontario Hospital, Fort William:

Arrangements were made for cleaning the well at this Hospital.

Ontario Hospital, Hamilton:

Roof repairs were made on East House, Orchard House, Superintendent's residence and Main Building, including gutters and slate replacements.

On August 28th, 1940, in the main farm group, the main cattle barn, the horse barn, the milk house, the isolation cow stable and a storage barn, together with the roofs of two silos, were for the most part, destroyed by fire. Minor damages resulted to adjoining buildings, such as implement shed, root and tool house. These buildings were not replaced this year, but doors and frames of silos were replaced. The implement shed was remodelled to provide root storage.

New entrance steps to stores basement in Orchard House were erected.

Ontario Hospital, Kingston:

A new fire escape was erected at the Patients' North Cottage. The interior of this cottage was renovated, this Department supplying the material and the work was done by the Hospital staff mechanics.

A new roof, including framing, was placed on the Sewage Filter House at the Mowat Wing.

Considerable repairs and renovations were made to the heating system of the Main Building, including installation of additional radiation for staircases.

Plans were made by this Department and the main entrance gateway was remodelled by the Hospital staff.

The existing root house at the main group was renovated, including a new roof, which was laid over the whole building.

Ontario Hospitals, Langstaff and Concord:

The continuation of the necessary work of fitting these premises for occupancy by mental patients in connection with the vacation of the Ontario Hospital, St. Thomas, for the R.C.A.F. purposes, was carried on. Part of the main roof of the nurses' residence, Concord, was re-shingled.

Ontario Hospital, London:

The elevated water tank was painted.

Considerable repairs and replacements were carried on in connection with roofs, gutters and down pipes.

The cattle barn was, for the most part, destroyed by fire on August 20th, 1940, and was not rebuilt.

A portion of the lands of this Hospital, adjoining the Canadian National Railway, was loaned to the Department of National Defence on July 15th, 1940. The said Department started immediately thereafter to erect their own temporary buildings.

Ontario Hospital, New Toronto:

Considerable plaster repairs were made to the ceiling of the Laundry Building. Minor repairs were made in connection with the keying of the locking system.

A new Air-Way drier was shipped from the Ontario Hospital, St. Thomas, and installed at this Hospital to take care of the additional patients moved from the Ontario Hospital, St. Thomas, due to the R.C.A.F. occupancy of the latter.

A new cement floor was laid in the basement of cottage No. 2, in the shower section.

Plans were made by this Department and a new brick entrance gateway was erected by Hospital staff.

Ontario Hospital, Orillia:

The main transformer burned out and was replaced.

The ice box of the main refrigerator was repaired and re-lined.

Plans were prepared for an extension to the Piggery building, the materials were supplied by this Department and the work was carried out by the Hospital staff.

Ontario Hospital, Penetang:

A new washer was shipped from the Ontario Hospital, St. Thomas, and installed by the hospital staff.

The roof of the kitchen wing was recoated. This Department supplied the material and the Hospital staff did the work.

Ontario Hospital, Port Arthur:

The new administration building and a portion of the lands of this Hospital were loaned to the Department of National Defence for Militia purposes, as previously noted. The date of their occupancy commenced as of August 15th, 1940.

Ontario Hospital, Toronto (999 Queen West):

Plans were prepared and the work started in connection with the installation of a Virus Laboratory and Dental Laboratory in one of the existing out-buildings, at the north west corner of the premises of this Hospital.

Minor repairs were made to foundations of cottage B.

Stairway in west wing of Main Building from second to third floors was removed to increase bed space.

Psychiatric Hospital, Toronto:

Minor repairs, as required, in the various trade branches, were carried out.

Ontario Hospital, Whitby:

A portion of the main barn was re-roofed. General progress repairs were made to the tile roofs.

The pole line for electric service to the main barn and transformer stand were renovated. This included electric distribution system to residences on the farm lane.

Ontario Hospital, Woodstock:

A considerable amount of alteration and fitment work was carried to completion to make provision for about 600 T.B. mental patients in the new Children's Unit, who were brought from various other mental hospitals to provide additional accommodation for patients moved out of the Ontario Hospital, St. Thomas, to accommodate R.C.A.F. occupancy. This work generally included the installation of an Electro Encephalograph examination unit, a dental unit, an X-ray unit, and a laboratory section in the basement of the Administration Building, previously built for the purposes of a Children's Unit.

Plans were made and materials supplied for the erection of one piggery wing, which was erected as an addition to the piggery cook house completed in the previous year by the Hospital staff to the north east of the new Children's Hospital Group.

Ontario Hospital, St. Thomas:

As mentioned in the report of the previous fiscal year, this Institution was loaned to the Department of National Defence for R.C.A.F. purposes, whose occupation commenced as of October 23, 1939.

The farm portion of these premises, however, was not taken over with the main group, as above described, and is being operated under the jurisdiction of this Department.

General minimum repairs and renovations were carried out in connection with the farm division and the necessary equipment installed.

The furniture, furnishings and equipment and laundry machinery purchased for the new hospital and not required last year by the R.C.A.F. at St. Thomas, or by other mental hospitals, was kept in Public Works locked-up stores on the premises and portions of these goods were issued on requisition during this year to both the R.C.A.F. at St. Thomas and to other mental hospitals, as their needs became more fully developed.

Plans and specifications were prepared for the installation of an additional steam boiler at the main power plant and the contract was let by the Department of National Defence, who were to pay for the installation.

EXAMINATION OF PLANS FOR DEPARTMENT OF HEALTH

In addition to the work previously enumerated in connection with the Ontario Hospitals, plans were examined and recommendations forwarded to the Department of Health in connection with proposed alterations or additions

to existing public and private hospital buildings and in connection with new hospital projects. The following were the projects dealt with:

Rest Home Bartonville.
Nurses' Residence, St. Joseph's Hospital, Chatham.
Laverandrye Hospital for Grey Nuns of St. Boniface, Fort Frances.
General Hospital, Galt.
Brookside Convalescent Hospital, Gormley.
St. Pauls Hospital, Hearst.
Nicholls Hospital, Haileybury.
Royal Norwegian Government Hospital, Toronto.
Queen Victoria Memorial Hospital, North Bay.
McKenzie Red Lake Gold Mines Hospital, Mackenzie Island.
Markdale Private Hospital.
Victoria Hospital, London.
Little Long Lac Hospital.
Memorial Hospital, Listowel.
General Hospital, Woodstock.
Mayfair Nursing Home, Toronto.
Riverdale Isolation Hospital, Toronto.
Hillcrest Convalescent Hospital, Toronto.
Hospital for Incurables, Dunn Avenue, Toronto.
Hospital for Sick Children, Toronto.
Clifton Nursing Home, Toronto.
General Hospital, Port Hope.
Protestant Children's Hospital, Ottawa.
Perley Home for Incurables, Ottawa.
General Hospital, Oshawa.

ONTARIO REFORMATORIES

Industrial Farm, Burwash:

Plans and details were prepared to provide for the installation of a new kitchen and prisoners' and staff dining room in the basement of the new hospital block; the work was done by the Institution staff and inmates. This accommodation was originally provided in the Reception Building, for which plans were also made to show the necessary changes required to adapt this space for general office accommodation.

Working drawings were prepared for a new cow barn and the erection was undertaken by Institution staff mechanics and inmates.

Drawings and details were prepared for the remodelling and the circulation and ventilation scheme for cold storage building for Seagram Camp at Long Lac, which is a branch of this Reformatory.

Ontario Reformatory, Guelph:

Working drawings and details were prepared for a new cow barn and the erection was undertaken by the Institution staff mechanics and inmates.

A new terrazzo floor was laid throughout the main prisoners' dining room.

Andrew Mercer, Reformatory, Toronto:

A survey and studies were made to show the layout of fireproof stairs, fire walls and fire doors and fireproof exit corridors which were considered to be

necessary to provide adequate and safe exit facilities from all floors and all sections of this Institution. The studies included the changing of the existing hospital section on the third floor of the west wing to the ground floor of the same wing.

Working drawings were prepared for a new fireproof exit stair and fireproof approach corridors to serve all floors of the west end of the west wing. Changes were made to various rooms on all floors and a new staff bed room was added in connection with these improvements. The work, for the most part, was carried out by day labour.

Working drawings and details were prepared for the changing of all cell doors from individual locking to gang locking operation. The mechanism for this locking system was fabricated at the Ontario Reformatory, Guelph, and the installation was carried out jointly by this Department and the Department of the Provincial Secretary.

The plastering of the walls and wood trim on cell fronts was removed and all such plaster renewed, including new plaster jambs for all cell doors. All expenses in connection with this work were borne by this Department.

Working drawings were prepared for the installation of three new lavatories for the inmates and four new bath rooms for the staff. The work was carried out jointly between this Department and the Department of the Provincial Secretary; the latter Department furnishing the material.

Orders were placed for some new kitchen equipment, including steam jacketed kettles and roasters, refrigerator, kitchen cabinets, meat slicer and bread slicer in connection with the remodelling work of the main kitchen, to be carried out during the next fiscal year.

Ontario Reformatory, Mimico:

As previously listed at the commencement of this report, this Institution was loaned to the Department of National Defence and their occupancy of the premises commenced as of July 1st, 1940. The agreement regarding military occupancy of these premises was drawn, originally, to include the farm lands and buildings, but this inclusion was not finally decided upon during this fiscal year.

Industrial Farm, Monteith:

As previously listed at the commencement of this report, this Institution was loaned to the Department of National Defence and their occupancy of these premises commenced as of July 6th, 1940.

ONTARIO TRAINING SCHOOLS

Boys' Training School, Bowmanville:

Repairs were made to the roofs of the Triple Dormitory Building, Gymnasium, Jury Lodge and the School Building.

Girls' Training School, Galt:

General repairs were made to plumbing in the dormitory buildings.

FISH HATCHERIES

Hills Lake Fish Hatchery (Temiskaming District):

Additional work was done this year by day labour in connection with this Hatchery, which included the following items: The earth banks around the ponds and along the supply flume were regraded to stop erosion by heavy rains.

A system of intercepting ditches was dug around the said ponds and flume to prevent surface water from flowing into any of the Hatchery waters. The banks of the ponds were surfaced with gravel.

The finished grading was done around the Superintendent's residence and a water ram was installed in connection with the domestic water service.

Skeleton Lake Hatchery (Muskoka District)

Material was purchased for the building of a small foot bridge over the creek and the work was carried out by the staff at the Hatchery.

A quantity of brass screen cloth was purchased to replace original screens which had been damaged, the work being done by the staff.

Sandfield Hatchery (Manitoulin District):

Improvements were made to the roads to the ponds on the Hatchery premises. The work was done by the Department of Highways and was paid for by this Department.

Deer Lake Hatchery (Peterborough District):

A right-of-way was purchased and a new road was completed to this Hatchery by the Department of Highways and the cost paid by the Department of Public Works.

ONTARIO HIGHWAYS BUILDINGS

Plans and specifications were prepared and architectural supervision was given for the following work, for which the Department of Highways let the contracts:

- | | |
|--------------------|-----------------------------------|
| Scale House No. 1. | West Hill, Highway No. 2. |
| “ “ “ 2. | West Hill, Highway No. 2. |
| “ “ | Browns Line, Queen Elizabeth Way. |
| “ “ | Dixie, Queen Elizabeth Way. |
| “ “ | Long Branch, Highway No. 2. |

Garage and store house, Port Hope.

Sketches and working drawings were prepared for future work for the following:

Two storey garage and paint shop, Ottawa.

One storey garage and paint shop, Ottawa.

Preliminary sketch plans and perspective sketches were also prepared for six different types of typical scale houses, and for proposed waiting room to be erected at the junction of Queen Elizabeth Way and No. 2 Highway at the Humber River.

Heating Plans. Heating systems were laid out at the request of the Department of Highways for Highways Buildings at Parry Sound and Sudbury.

BOILER INSPECTION

Excluding the existing plants which have been loaned to the Department of National Defence for the purposes of the present war, routine reports were made in connection with the various other plants of the Ontario Government buildings inspected and recommendations were made and repairs and improvements carried out as required.

PROVINCE OF ONTARIO SAVINGS OFFICES

Hamilton Branch, King Street East:

Plans and specifications were prepared and contracts let and the work completed, enlarging the interior of the existing premises. A portion of the adjoining building was leased and used to gain the extra space required.

Savings Offices (generally):

New protective grilles were installed at the front of teller's cages at Savings Office Branches at:

University and Dundas Streets, Toronto.

Bay and Adelaide Streets, Toronto.

Ottawa.

London.

Niagara Falls.

Windsor

Co-operation was given to the head office management in the matter of general routine maintenance and repair work at the branches, where such work was requested.

Renewals of expiring leases in connection with branch offices were negotiated and arranged as required.

MISCELLANEOUS

Ontario Government Building, Kingston:

Roof repairs over boiler house were made to this building, following a small fire. General repairs were made in all trades, as required.

Employment Branch Offices (Temporary Quarters):

At the request of the Department of Labour, working plans and specifications were prepared and architectural supervision given in connection with the alterations required to prepare the following rented premises for use as employment offices:

Employment Branch Offices No. 1387 Yonge Street, Toronto.

1854 Danforth Avenue, Toronto.

364 Broadview Avenue, Toronto.

328 Adelaide Street West, Toronto.

2969 Dundas Street West, Toronto.

London, Ontario.

This work was done in co-operation with the Department of Labour, who made the necessary selection of property and rental arrangements and paid for the alterations and furnishings.

Temporary Housing for Evacuated British Children:

At the Independent Order of Oddfellows Building on Davenport Road, Toronto, considerable minor repairs were made in all trade branches to these buildings for the Department of Welfare to provide proposed accommodation for children who were to be evacuated from Great Britain.

A survey was made for the Department of Welfare of the various residential buildings of the University of Toronto to determine the temporary housing accommodation which would be available for evacuated British Children. A

block plan was made to show the scheme of temporary occupancy proposed. A residence building at 64 St. George Street was fitted up and furnished as an infirmary for these children, in co-operation with the Department of Health.

Additional furniture to that supplied by the University, was loaned by the Ontario School for Deaf, at Belleville and by the Ontario Mental Hospitals to provide for the general temporary housing of these children in the said residential buildings of the University of Toronto.

Re Staff Members of Architect's Branch:

Mr. John Sharp, the Heating Engineer for this Department was transferred to the Department of Labour on March 1st, 1941.

Mr. S. K. Sinclair, Assistant Architect, enlisted with the R.C.A.F. during the last fiscal year and was granted leave of absence from the Department in February, 1940.

I have the honour to be, Sir,

Your obedient servant,

GEORGE N. WILLIAMS,

Chief Architect.

Toronto, March 31st, 1941.

REPORT OF THE ENGINEER

Memorandum to—

THE HONOURABLE FARQUHAR R. OLIVER, M.P.P.,
Minister of Public Works and Welfare,
Parliament Buildings.

January 28th, 1942.

Sir,—

I have the honour to report on the work done by the Engineer's Branch of the Department of Public Works, Ontario, during the fiscal year, April 1, 1940, to March 31, 1941.

As usual, all the work was done by day labour under local foremen, employing local workmen and using local material wherever possible.

The maintenance of locks, dams, docks and navigable channels was carried out as usual and one new timber storage dam was built at Tilden Lake.

Maintenance work was as follows:

Port Carling Locks:

The dock on the north side of the locks was renewed in timber and a 3 inch plank deck put on. The gates of the lock were repaired and put in good working order.

Deer Lake Dam:

A new 2 inch plank deck was put on this dam and some new stop logs provided in place of the worn out ones.

Dollars Dams:

The decks of both dams were replanked with 2 inch plank and several leaks in the west channel dam were stopped by sheeting and filling with gravel. The winches were put in good working order.

Ahmic Lake Dam:

A new 2 inch plank deck was put on this dam and some new stop logs provided.

Tasso Lake Dam:

This dam was partly washed away by the spring floods. The washed out part was replaced in timber and well gravelled to prevent leakage.

Crane Lake Dam:

This is a concrete dam and some of the concrete had crumbled so that the dam was leaking in several places. All defective concrete was removed and new concrete put in to make the dam tight.

Moose Lake Dam:

This is a stone dam and the piers on each side of the sluiceway had moved in at the top so that it was difficult to get the stop logs in or out. The piers were faced with concrete so that the sluiceway is now the same width at the top as at the bottom.

Weslemkoon Lake Dam:

The piers of the old timber dam were removed and about one foot taken off the top of the wings of the new dam to give more waterway during floods and to prevent flooding of land.

Navigation:

All buoys on the Muskoka Lakes and Magnetawan waters taken out by the spring floods were replaced and the boat channels kept clear of all obstructions for navigation.

STORAGE DAMS

Tilden Lake Dam:

Tilden Lake is in Nipissing District about 25 miles north of North Bay. The dam at the outlet of the Lake raises the water level of this Lake and several other lakes above it so that navigation is made possible between the several lakes, making an excellent tourist resort.

The old dam was taken away by the spring floods and the lake levels dropped so that navigation between the lakes was rendered impossible.

A new timber dam was built just above the old one. It is 100 feet long and 8 feet high. It is provided with a 10 foot sluiceway with stop logs to control the level of the lake.

MUNICIPAL DRAINAGE

An appropriation of \$500.00 was made to each of the following districts for municipal road drainage—Muskoka, Victoria and Haliburton, Peterboro, North Renfrew and South Renfrew.

PROVINCIAL AID TO DRAINAGE

Big Marsh Drain, Pelee Island:

This drainage scheme takes in most of the land on Pelee Island and is a pumping scheme. Three pumping plants, one on the north, one on the west, and one on the east shore, pump the water from the drains which run through the low-lying land and discharge it into Lake Erie. The old steam driven plants had been in use many years and were out of date and inefficient.

In 1939, the west plant was burned and the steam boiler and engine damaged beyond repair. A new 90 horse power gasoline engine was installed here to drive the old pump. Some repairs were made to the pump and a new metal clad building on a concrete foundation was put up.

The steam boiler at the north plant had been condemned as unsafe so it was decided to replace the steam plant with diesel engines. As there are two pumps at this plant, it required two engines of 80 horse power each. They drive the pumps through belts; some repairs were made to the pumps.

The steam plant on the east shore was left in place as it is very seldom used, only in an emergency or a very heavy flood.

The cost of the engines and repairs to these two plants was \$13,594.84. From this cost was deducted \$2,100.00, received by the Township for fire insurance on the west plant, leaving \$11,494.84 on which the 20% grant was made. These plants were examined and found to be in first class working order and on report, a grant of \$2,298.96 was paid to the Treasurer of the Township of Pelee.

I have the honour to be, Sir,

Your obedient servant,

J. W. HACKNER,
Engineer of Public Works.

Department of Public Works, Ontario.

Toronto, April 9th, 1942.

THE HONOURABLE FARQUHAR R. OLIVER,
Minister of Public Works.

Sir,—

I have the honour to submit the following statement showing the several contracts entered into with His Majesty during the twelve months ending March 31st, 1941, in connection with the Public Buildings and Works, subject to the control of the Public Works Department of Ontario.

I have the honour to be, Sir,

Your obedient servant,

S. WOOD,
Secretary and Accountant.

STATEMENT No. 23

Showing the several contracts entered into with His Majesty during the twelve months ending March 31st, 1941, in connection with the Public Buildings and Works, subject to the control of the Department of Public Works, Ontario.

DATE	LOCATION OF WORK	SUBJECT OF CONTRACT	CONTRACTORS	AMOUNT
1940 Aug. 15	Port Hope.....	Construction of Garage and Stores Building for the Department of Highways.....	M. Sullivan & Son Company, Limited, Arnprior, Ont.....	\$10,967.00

Thirty-Fourth Annual Report

OF THE

**Game and Fisheries
Department**

1940 - 1941

PRINTED BY ORDER OF
THE LEGISLATIVE ASSEMBLY OF ONTARIO
SESSIONAL PAPER No. 9, 1942

ONTARIO

TORONTO

Printed and Published by T. E. Bowman, Printer to the King's Most Excellent Majesty

1942

TO THE HONORABLE ALBERT MATTHEWS,
Lieutenant-Governor of the Province of Ontario.

MAY IT PLEASE YOUR HONOUR:

I have the honour to submit herewith for the information of Your Honour and the Legislative Assembly, the Thirty-Fourth Annual Report of the Game and Fisheries Department of this Province, for the year ended March 31st, 1941.

I have the honour to be,

Your Honour's most obedient servant,

H. C. NIXON,
Minister in Charge,
Department of Game and Fisheries

Toronto, 1942.

THIRTY-FOURTH ANNUAL REPORT

OF THE

Game and Fisheries Department of Ontario

TO: THE HONOURABLE H. C. NIXON,
Minister in charge,
Department of Game and Fisheries.

SIR:--

I have the honour to submit to you herewith the Thirty-fourth Annual Report of the Department of Game and Fisheries, outlining a summary of the activities of various Departmental services, and including statistical tables for the fiscal year ended March 31st, 1941, as well as tables of comparison.

INTRODUCTORY

The Province of Ontario has been endowed with a wealth of natural charm, with which have been incorporated many opportunities for the enjoyment of outdoor recreational pleasures. Its extensive water areas, virgin forests and wild lands all combine to make this Province a tremendous reservoir for the development of wild life. Notwithstanding the many physical changes that have taken place in past years it has been possible to maintain this outstanding characteristic in large measure, particularly in the northern hinterland.

In the development of the Province its vacation and recreational possibilities have not been neglected and the protection and propagation of fish and game have been maintained and extended so as to keep pace with material development. The excellent fishing and hunting which are available within our borders are undoubtedly important factors in promoting tourist trade, and the economic value of this seasonal industry is too obvious to require any comment except that it provides a living for thousands of our citizens, and in the present emergency plays a prominent part in establishing foreign exchange for the purchase of essential war materials.

This Department co-operated with the Provincial Travel and Publicity Bureau in providing an interesting and outstanding exhibit at the Sport Shows conducted in Chicago and Detroit during the months of February and March, 1941, with the object of endeavouring to attract increased numbers of American tourists to the Province. In each case considerable interest was displayed in the exhibit and the available literature was eagerly taken up. A special attraction at this exhibit was the regular showing of coloured moving pictures, replete with action, and demonstrating that the claim that Ontario is a sportsman's paradise was no idle boast. The friendly spirit of the people was very evident and, from the standpoint of improving the agreeable relations between two good neighbours, apart altogether from the economic value, the exhibit was quite successful.

The general protective programme has recognized the various phases affecting supply and demand and made provision to maintain a proper balance. Large areas of suitable land have been set aside as sanctuaries for game, ensuring reproduction and perpetuation. Small game has been intensively propagated and released to re-stock forest and field. Hundreds of millions of fish are artificially raised in the various

Departmental hatcheries and annually deposited in provincial waters, and in the ensuing pages it is indicated to what extent this programme was carried out during the period under review.

Legislation is effective only to the extent that the provisions thereof have the complete support of those for whose benefit it is provided, and the success of the conservation programme instituted by the Department in conjunction with legislation depends upon the full and active co-operation of all who are interested in our wild life resources. The general public can and does assist the Department in many ways, but chiefly by preventing waste and by a careful compliance with the provisions of the Game and Fisheries Act and the various regulations provided under this and affiliated legislation.

FINANCIAL

Since the change in the period of the fiscal year inaugurated by the present Administration in 1935, the total annual revenue collected from various sources by the Department of Game and Fisheries has, previous to the year under review, shown an increase each succeeding year, and it is only natural to expect that such a notable showing would eventually be terminated by a decreased collection in some particular fiscal year. Such decrease it is necessary to record for the year 1940-41, as is shown in the subjoined statistical table of revenues and expenditures for the past six years:—

	Revenue	Expenditure (Ordinary & Capital)	Surplus
1935-36	\$ 683,938.72	\$451,041.91	\$232,896.81
1936-37	782,217.63	474,128.95	318,088.68
1937-38	866,558.19	563,938.33	302,619.86
1938-39	914,475.24	575,437.79	339,037.45
1939-40	1,015,350.82	568,198.55	447,152.27
1940-41	984,800.69	512,834.70	471,965.99

It will be observed that as compared with the revenue derived in 1939-40 that collected during the year covered by this report shows a reduction in the amount of \$30,550.13. This decrease is not of sufficient proportions to cause concern and may be attributed principally to reduced collections from fur royalties in the neighborhood of \$15,000.00, and a reduction in fees secured from the sale of resident hunting licenses, slightly in excess of \$12,000.00, and from the sale of non-resident angling licenses, approximately \$7,000.00.

The following table of revenue collected shows the various sources from which it was derived and the respective amounts attributable thereto:—

REVENUE FOR THE FISCAL YEAR ENDED MARCH 31st, 1941.

ORDINARY—

MAIN OFFICE—

GAME—

Licenses—

Trapping	\$ 35,795.50
Non-resident hunting	84,265.00
Deer	77,469.40
Moose	2,948.00

REVENUE FOR THE FISCAL YEAR ENDED MARCH 31st, 1941—Continued

Licenses—Continued

Gun	86,527.85
Dog	5,746.10
Fur Dealers	27,323.00
Fur Farmers	8,637.50
Tanners	160.00
Cold Storage	178.00

 \$ 329,050.35

Royalty 101,599.18

 \$ 430,649.53

FISHERIES—

Licenses—

Fishing (Commercial)	\$ 85,914.00
Angling	384,675.00

 \$ 470,589.00

Sales—Spawn taking 226.95

Royalty 12,066.22

 \$ 482,882.17

GENERAL—

Licenses—

Tourist Camps	\$ 7,345.00
Guides	7,456.00

 \$ 14,801.00

Fines 25,416.28

Costs Collected (Enforcement of Game Act)... 786.78

Sales—Confiscated articles, etc. 24,309.12

Rent 3,301.75

Commission retained by Province on sale of lic. 2,170.30

Miscellaneous 483.76

 \$ 71,268.99

Net Ordinary Revenue \$ 984,800.69

One fact that is worthy of comment is the large proportion of the total amount of \$984,800.69 which was derived from the sale of non-resident licenses, both angling and hunting. Some forty-seven and a half per cent of the entire total, or \$468,940.00 was collected in this way, and this must be considered to be a remarkable showing when studied in conjunction with the feeling of uncertainty and dismay which generally prevailed in the summer of 1940 following the disastrous collapse of the French armies then engaged as our allies in the tremendous struggle against the Axis powers. The satisfactory conditions which are prevalent in the wildlife natural resources of Ontario's forests, streams and lakes, and which are an attraction and recreational benefit not only to our own sportsmen but also to non-resident anglers and hunters, are reflected to a remarkable degree in this excellent result.

Reference has already been made to the reduced departmental revenue, as compared with that of the previous year when for the first time since the establishment of the Department of Game and Fisheries it exceeded the one million dollar total, and to the fact that the decrease was not one to cause undue concern. In explanation it will be noted that the figure for 1940-41 was exceeded only once during the past six years, viz—in the preceding fiscal year, 1939-40, and the collection of revenue in that

year showed an extremely remarkable increase of more than \$100,000.00 over that of 1938-39.

As previously indicated the principal reduction in revenue may be attributed to the lesser amount of fur royalties which were collected during the year, and the sale of fewer resident hunting licenses and non-resident angling licenses. To a large extent reduced fur royalties could be assigned to a smaller catch of beaver, on the pelts of which animals the royalty is \$1.00, collected when they are exported from the Province or tanned. In 1939-40 two limited periods of open season were provided for the taking of beaver, and in which two periods 33,530 pelts were taken. This total represented some 12,000 pelts more than were taken in the open season which prevailed in 1940-41 in which year only one period for the taking of beaver was provided. In addition to this there was also a considerable reduction in the number of red fox which were taken in the 1940-41 season as compared with the season of 1939-40. Reduced revenue from the sale of resident hunting licenses may reasonably be assigned to the intensification of industry in connection with the manufacture of materials necessary for the effective conduct of the war in which our nation is now engaged which undoubtedly resulted in many who formerly participated in the sport which our hunting provides finding themselves without sufficient leisure for the pursuit of game to warrant their purchase of hunting licenses. The general feeling of uncertainty regarding the unfavourable war situation which prevailed throughout the summer of 1940 was no doubt responsible for the sale of fewer non-resident angling licenses, but the small total of this decrease warrants the statement that this reduction was due to the reason just stated rather than to any serious diminution in the quality or quantity of the diversified fishing privileges which are available in the waters of this Province.

However, the complete financial statement of revenue and expenditure is probably one of the best ever recorded by the Department. As compared with expenditures, both ordinary and capital, the revenue showed a surplus of \$471,965.99 during the period under review. This favourable showing was achieved by the exercise of rigid control of expenditures, and the elimination of all unnecessary expense. Capital expenditures were reduced to practically an absolute minimum, only a total sum of \$3,823.70 being spent under this classification. The largest capital expenditure amounted to \$1,846.18, for the installation of a concrete whitefish and herring battery at the Provincial Fish Hatchery at Glenora, in Prince Edward County. For the erection of a cabin at the Martin River Camp, in the Temagami area, for the use of the local Game and Fisheries enforcement officer, was spent the sum of \$541.58. The balance of \$1,435.94 was used to provide necessary alterations and improvements at a few of the fish hatcheries.

As has now been the case for many years—the most important items of ordinary expenditure have resulted from the maintenance in the field of the officers whose services are retained to provide enforcement of the various provisions of the Game and Fisheries Act and Regulations, and the operation of the Fish Hatcheries and distribution of fish under the Fish Culture Branch. Enforcement cost \$210,536.88, while \$184,121.76 was expended in connection with the work of the Fish Culture Branch. Other items of expenditure include, \$13,963.71 for the purchase and distribution of pheasants, particularly in the Townships which have been designated as Regulated Game Preserve Areas, and in other areas in which suitable conditions prevail; \$16,477.43 for the payment of wolf bounties and sundry expenditures incidental thereto, and of which amount the sum of \$16,410.00 was actually paid as bounty; as well as \$6,400.00 for various grants, details of which are as follows:—\$1,000.00 for fisheries research work, particularly in the waters of Algonquin Park, under the supervision of Professor W. J. K. Harkness of the University of Toronto staff, \$2,500.00 to the Ontario Fur

Farmers' Association to assist them in their endeavours to develop the fur farming industry throughout the Province, \$1,000.00 to the Ontario Federation of Anglers to enable this organization to continue its campaign to secure better compliance with and observance of provisions of the Fisheries Regulations, and \$1,900.00 to Messrs. Jack Miner and Thomas N. Jones and Miss Edith L. Marsh to encourage their efforts along the lines of providing a measure of protection for birds on sanctuaries maintained by them on their respective properties in the Counties of Essex, Elgin and Grey.

GAME

The following table shows the comparative details of the various resident and non-resident hunting licenses which were issued for use during the open seasons which were provided during the year, together with information of a similar character for the three preceding years. Details of the reduced numbers which were sold, to which previous reference has been made will be noted, though some increase will be observed in the following instances, viz:—resident "moose", non-resident "general" and non-resident "bear (spring season)".

	1937-38	1938-39	1939-40	1940-41
Resident Deer	18,672	21,762	21,416	20,219
Resident Deer (Camp)	283	307	323	310
Resident Deer (Farmers)	6,503	7,719	7,722	6,486
Resident Moose	580	471	497	536
Resident Gun	90,756	114,580	113,992	97,218
Non-Resident Deer	1,036	1,329	1,492	1,291
Non-Resident "General"	1,043	569	593	755
Non-Resident Small Game	1,634	1,618	1,567	1,377
Non-Resident Bear (Spring Season)	30	49	108	161

The conservation of wild life is not something peculiar to that particular resource. It is common to every phase of our existence. It is the sensible practice of making the best use of every resource with which we have been so lavishly endowed by Nature, and by ensuring that these resources will not be wilfully dissipated as a result of our own shortsightedness. Wild life is a public heritage, and the laws and regulations which are now in effect to govern hunting within the Province embody the results of years of practical experience and research. They afford protection during the reproductive periods, provide for limited open seasons and restrict the seasonal take to correspond with the available resources. These laws are quite comprehensive because the resources, territory and climatic conditions are extremely varied, yet a moment of reflection will readily supply the reasons for every restriction.

The following is a summary of conditions which apply to the various species of game animals and birds which are prevalent in Ontario, and which summary is compiled from reports submitted by Game and Fisheries Overseers throughout the Province:—

DEER:—This species is quite plentiful throughout the northern portion of the Province and in the more northerly districts of Southern Ontario, and in these sections continues to provide excellent sport for interested hunters during the fall open season. The protection of an entire close season which has been provided for the past several years in certain southwestern and eastern counties has resulted in quite a noticeable

increase in the herds in many of these counties and more particularly in Grey and Bruce. The regulations which at present exist for the protection of deer and a continuation of the existing co-operation on the part of the general public will undoubtedly ensure perpetuation and possible improvement of the deer herds which now inhabit Ontario. During the year under review provision was made to have the general open season in the most southerly division extend for a period of nineteen days, as has been the case in previous years, but commencing on the first Monday in November. The hunting of deer was also permitted during the period from November 11th to November 16th, inclusive, in the Townships of Amabel, Albemarle, Eastnor, Lindsay and St. Edmund in the Bruce Peninsula, though the use of dogs for such hunting during this open season in these five Townships was not permitted. An open season for deer was provided in that portion of the County of Carleton lying west of the Rideau River conforming with the general season in Southern Ontario and extending from November 4th to 19th, inclusive. And, further, a Regulation was provided to prohibit any hunting of deer during 1940 in the Counties of Durham, Northumberland and Prince Edward.

MOOSE:—Conditions are such with reference to moose that the hunting of this species is confined to that portion of the Province lying north and west of the French and Mattawa Rivers and Lake Nipissing. Moose is not too plentiful in any section of this northern portion of the Province, though some improvement is reported from various Districts, particularly in the two areas in the northwest and east in which all hunting of moose was prohibited during the preceding two years and which improvement resulted in the provision of an open season in these two areas, extending from October 15th to November 25th, inclusive, and which action was taken in accordance with a popular demand therefor. There are but few areas in Southern Ontario in which moose are to be found, and even in these sections their numbers are extremely limited and scarce. Some increase, though very slight, is reported from North Renfrew, North Addington and North Muskoka.

CARIBOU:—Caribou are extremely scarce throughout the Province. None are to be noticed in the southern portion of the Province, and the same condition applies in the Districts of Nipissing, Temiskaming and Manitoulin. In the remaining territory their numbers are negligible, and little or no improvement was reported from any place. They are protected by a close season throughout the entire year, and the present condition of this particular species demands a continuation of this complete protection for its perpetuation even in limited proportions.

ELK:—The only elk in Ontario are those which were originally imported from Western Canada several years ago in co-operation with the National Parks Branch of the Federal Department of Mines and Resources, and the subsequent natural increase. Some few specimens are located in Bruce County, on Beausoleil Island in Georgian Bay off the shore of Simcoe County, and on the Peterborough and Petawawa Crown Game Preserves in the Counties of Peterborough and Renfrew respectively, though reports from these areas indicate but little improvement. Additional numbers were placed on Crown Game Preserves in the Districts of Nipissing, Temiskaming, Sudbury, Algoma and Thunder Bay, and in the majority of these instances some increase in their numbers has been noticed. During 1940 a shipment of eight of these animals was completed from the Petawawa Crown Game Preserve to the Nipissing Crown Game Preserve. The hunting of elk is prohibited throughout the entire year.

BUFFALO:—With the co-operation of the Department of Mines and Resources of Canada, (National Parks Branch) a car-load of buffalo, consisting of sixteen heifers and four bulls, was imported from Alberta and these animals were placed on the Burwash Crown Game Preserve, in the District of Sudbury. While reproduction has

been small there has been but little mortality among the animals which were originally introduced.

BEAR:—These animals are reported to be quite plentiful throughout the various Northern Ontario Districts, and in the Districts of Parry Sound, Muskoka and Haliburton and in the County of Renfrew. They may be hunted or trapped under the authority of the proper licenses and there is no doubt many enjoy the pleasure which the hunting of these animals provides. During the spring bear season of 1940, that is from April 1st to June 15th, the Department issued one hundred and sixty-one (161) non resident hunting licenses, and it may be of interest to say that since the inauguration of this particular season, some four years ago, there has been an increasing interest displayed by non-resident hunters in the possibilities for recreation and relaxation thus made available.

RABBITS:—Reviewing reports with reference to rabbits it would appear that with the exception of a very few counties the various species continue to be fairly plentiful in the southern areas. In general terms the prevailing species in the extreme southern and southwestern portions of the Province are cotton-tail rabbits and European hare, the latter commonly known as the jack-rabbit,—while the snowshoe rabbit, or varying hare, exists in the eastern counties and in the areas to the north. Conditions applicable to rabbits were quite favourable throughout the season, except in Northern Ontario, where these animals were reported to be not too plentiful though probably increasing in number. Rabbit hunting is a favourite sport of Ontario hunters during the late fall and winter months, and a large percentage avail themselves of the pleasure which is to be derived from this splendid type of healthy exercise. The restricted daily catch of cotton-tail rabbits which is now effective in several of the southwestern counties has probably assisted in some measure in the increase which has been reported from these areas.

PARTRIDGE:—The improvement which has been observed in more recent years continued during the period covered by this report, and considerable increase was reported from many sections principally in the case of ruffed grouse. The sharp-tailed grouse, or prairie chicken, is confined to the extreme northern and northwestern portions, though their numbers could not be described as plentiful. However, general conditions throughout were sufficiently satisfactory to warrant the declaration of a short open season. Two periods were included in this open season, viz:—October 1st to October 15th, inclusive, and November 4th to November 16th, inclusive. Limits of catch were five birds per day, and twenty-five birds in all during the two periods. This open season did not apply in the Counties of Essex and Kent nor in the Townships established as Regulated Game Preserve Areas. In these last mentioned Counties and Townships the open season for partridge coincided with the open season for pheasants.

PHEASANT:—Climatic conditions restrict the area in which pheasants can be successfully introduced with any certain hope of permanent establishment therein. While it is not native to the Province it has been possible through intensive re-stocking in areas providing favourable conditions to sufficiently develop the pheasant population in such areas to assure such a measure of successful hunting as to warrant a limited open season for the taking of this splendid game bird. In recent years the Department has proceeded with a scheme of Regulated Game Preserve Areas in which all hunting is controlled and where these birds are liberated, and which scheme in 1940 included some seventy-one Townships or parts of Townships situated in the Counties of Lambton, Middlesex, Elgin, Oxford, Norfolk, Brant, Haldimand, Welland, Lincoln, Wentworth, Wellington, Halton, Peel, York, Ontario and Prince Edward. Conditions favourable to the propagation of these birds also prevail in areas other than these Regulated Townships, particularly in the County of Essex, including Pelee

Island, and in the County of Kent, and in which Counties provision has also been made for the distribution of these birds. Details of this distribution which was made in 1940 are indicated by the following statistics:—adult pheasants and poults totalling 16,688 were distributed, 14,963 in the Regulated Townships and 1,725 for general re-stocking outside of these areas,—County of Brant (three Townships) 664 birds; County of Elgin (five Townships) 1,000 birds; County of Haldimand (ten Townships) 1,862 birds; County of Halton (four Townships) 1,315 birds; County of Lambton (one Township) 200 birds; County of Lincoln (eight Townships) 1,650 birds; County of Middlesex (two Townships) 425 birds; County of Norfolk (four Townships) 820 birds; County of Ontario (three Townships) 750 birds; County of Oxford (one Township) 200 birds; County of Peel (five Townships) 940 birds; County of Prince Edward (one Township) 120 birds; County of Welland (eight Townships) 1,685 birds; County of Wellington (one Township) 200 birds; County of Wentworth (eight Townships) 1,459 birds; and County of Yerk (seven Townships) 1,673 birds. The record of the general re-stocking additional to the foregoing shows 1,000 birds liberated in the County of Essex, 400 of which were placed on Pelee Island, 600 birds in the County of Kent, 75 birds in the County of Huron and 50 birds in the County of Brant. The regulations governing the open season fixed October 31st and November 1st on Pelee Island, with a limit of five birds per day, or ten for the season, with the provision that three of the total take could be hen birds conditional upon the payment of \$1.00 each for such hens. In the Regulated Game Preserve Areas the open season was October 25th and 26th, and an additional day, November 1st, provided the Municipal authorities in any Township issued their special hunting licenses therefor. In fifty-two Townships the two-day season prevailed, while the three-day season was in effect in nineteen Townships. Limits of catch were three cock birds per day. The same three-day open season was provided for the County of Essex (excluding Pelee Island) and the County of Kent, as well as the limit of three cock birds per day.

HUNGARIAN PARTRIDGE:—The efforts of the Department to secure the establishment of this species in the Province have up to the present not been very successful, except in a few areas. The only localities in which they are found to any extent are in a few of the southwestern and extreme eastern counties, and even in these areas their numbers are not too plentiful. Improvement is reported only from the eastern counties. The open season in 1940, viz, October 25th and 26th and November 1st applied only in Essex (excluding Pelee Island) and Kent. Two birds per day constituted the limit of catch.

QUAIL:—Only in a few of the most extreme southwesterly counties are these birds to be found where they are not very numerous, though localized increases have been reported. The only section in which an open season was provided was in the County of Essex (excluding Pelee Island) and the County of Kent, on October 25th and 26th and November 1st. The bag limit during this open season was four birds per day.

DUCKS:—Reports from many sections, particularly in Southern Ontario, would seem to indicate some considerable improvement in the number and variety of ducks available during the open season, which generally resulted in a successful season for a majority of those sportsmen who participate in the hunting thus provided. Since 1935 the hunting regulations which are provided by the Federal authorities under the Migratory Birds Convention Act, have been made more restrictive and an active programme to provide refuges and improved nesting conditions in the far north has been carried on, all of which factors have contributed to the increase previously mentioned, and provided there is no natural set-back should continue to prove effective in maintaining and possibly improving the existing conditions as they apply to this variety of wild water-fowl.

GEESE:—This species does not play an important part in the general scheme of hunting in Ontario. Conditions remained pretty much the same as has been stated in Departmental annual reports for the past several years. Successful hunting of this variety of wild water-fowl is restricted, in Ontario, to the shores of James Bay in the far north and to the extreme southwestern Counties. In other sections they are seen only in flight during the fall and spring migration periods and provide very little sport in the way of hunting.

WOODCOCK:—While these birds, generally speaking, are not too plentiful, they continue to provide a measure of satisfactory sport for interested hunters in various sections of the Province, and more particularly in some of the Counties along the shore of Lake Erie and immediately to the north thereof as well as in the southeastern counties.

SNIPE:—These birds are not very plentiful in any portion of Ontario and are therefore not hunted very extensively. While general conditions are not favourable reports state there has been some improvement and resulting increased numbers in a few widely separated areas.

PLOVER:—There are but few sections in which these birds can be described as anything but scarce, and little improvement has been observed. Plover are protected throughout the year by regulations provided under the Migratory Birds Convention Act.

FUR-BEARING ANIMALS

Conditions as they apply to fur-bearing animals throughout the Province are summarized in the following references from reports submitted to the Department by members of the Field Service Staff:—

BEAVER:—This very desirable species of fur-bearer is quite prevalent in most sections of the Province except some of the counties in the extreme southwestern peninsula and in eastern Ontario. In Northern Ontario and in some of the northern districts in Southern Ontario reports would appear to indicate that conditions were such as to warrant the provision of a limited open season and restricted catch. The regulations governing this open season specified that it would be effective from December 1st to December 21st, 1940, both days inclusive in the territory lying north and west of the French and Mattawa Rivers and Lake Nipissing, including the District of Manitoulin, as well as in the Districts of Parry Sound and Muskoka. Licensed trappers were permitted to take not more than ten pelts during this open season and it was further specified that trappers were to dispose of the pelts taken on or before December 31st. According to returns submitted to the Department some 21,605 beaver pelts were taken during this open season, and it has been estimated that the value of these pelts to the various trappers concerned was in the neighborhood of half a million dollars.

FISHER:—These animals are extremely scarce throughout the entire Province, and reports indicate that they are practically extinct in the southern portion. The catch is diminishing quite rapidly.

FOX:—Generally speaking it would appear that this species was not too plentiful during the year under review, though reports show some increase in different sections. There was quite a reduced catch in comparison with previous years.

LYNX:—This species has become non-existent in Southern Ontario, and it is extremely scarce in the north. No improvement is reported from any section, and the annual take continues to show a decrease.

MARTEN:—As in the case of fisher and lynx, marten are extremely scarce, and no improvement has been reported. The catch in the case of this species also shows a decided reduction.

MINK:—While these animals are reported to be not too plentiful there are indications that their numbers are increasing in many areas, though probably not to any material extent. The slight increase in the number taken during the open season may be attributed to improved conditions to which previous reference has been made.

MUSKRAT:—It is again possible to report an increase in the catch of this species, some fifty thousand more pelts being taken than was the case in the previous year, though conditions which applied to muskrat remained practically the same. The open season is provided by Regulation and this arrangement is perhaps the most satisfactory in that it is possible to take advantage of propitious weather conditions, and thus confine the season to a limited period in which there would be little or no interference with natural propagation. These pelts do not bring an exceptional price on the market, but by reason of the fact they can be caught in large numbers the returns to the trapper are of substantial worth. It has been estimated that the 740,000 pelts taken in 1940 were worth approximately \$1,500,000.00, or more than half the value of the total fur catch of the year.

OTTER:—Some improvement is reported from sections in the northern portion of the Province, and, while otter are not too plentiful, the catch for the year covered by this report was better than the average for the past ten years, and was exceeded in that time only by the catch in the preceding year, 1939-40.

RACCOON:—There was a decided decrease in the take of raccoon as compared with that of the previous year. It is found only in the more southerly portions of the Province, due to the extreme cold weather which prevails during the winter months in the north. Conditions with regard to this species remain unchanged.

SKUNK:—Continues to be very plentiful, but their obnoxious methods of defence, coupled with a low market value, discourage any general efforts by trappers for the taking of this species.

WEASEL:—There was a decided decrease in the number of weasel which were trapped during 1940, as compared with the number taken in the previous year. This cannot be attributed to any substantial decrease in the numbers available, and is probably due to the diminished demand for these pelts, and the resulting poor prices derived from the sale thereof.

The following comparative table shows the numbers of pelts of the various species of fur-bearing animals which were exported from and dressed within the Province during the year under review in addition to the three years immediately preceding:—

	1937-38	1938-39	1939-40	1940-41
Bear	496	363	295	274
Beaver	235	1,366	33,530	21,605
Fisher	1,463	1,467	1,382	858
Fox (Cross)	2,426	2,164	981	722
Fox (red)	24,912	22,366	19,925	15,059
Fox (silver or black)	201	131	101	67
Fox (white)	47	142	36	91
Lynx	1,284	785	514	383
Marten	1,709	2,074	1,790	1,439
Mink	22,766	25,111	36,518	38,976
Muskrat	343,972	508,893	689,706	739,224
Otter	3,737	3,764	4,101	3,931
Raccoon	13,194	9,493	14,493	11,973
Skunk	61,576	89,100	74,176	72,005
Weasel	79,853	93,488	95,832	53,719
Wolverine	5	3	2	2

From reports received from various licensed fur dealers it has been possible for the Department to estimate that trappers received a total of \$2,677,211.26 from the catch of fur during 1940-41, an increase of some fourteen per cent over the previous year, and which increase may be assigned to the general improvement in muskrats, both take and market value.

The product of licensed fur farms, comprised wholly of fox and mink, disposed of during the year by such fur farm operators had an estimated value of \$1,246,847.66, an increase of almost \$200,000 over the previous year, making the value of the total fur production of the Province in 1940-41 the sum of \$3,924,058.92.

FUR FARMING

The propagation of fur bearing animals in captivity continues to be an industry of considerable economic importance, particularly during war time, as a large percentage of the fur production is exported thereby establishing valuable foreign exchange. Due to the prevailing uncertainty as regards future markets and the rising cost of feed some recession was recorded, though 1841 fur farms were licensed during the calendar year of 1940, the period covered by such licenses, a reduction of only four per cent.

The subjoined comparative table shows the total breeding stock retained on these licensed premises as at the first day of January in each of the four years therein enumerated, and from which it will be noted that these operations are restricted principally to silver fox and mink:—

	1938	1939	1940	1941
Beaver	25	2	4	13
Fisher	16	19	27	26
Fox (cross)	235	197	168	134
Fox (red)	140	120	96	65
Fox (silver or black)	24,848	22,923	18,327	16,034
Fox (blue)	0	98	209	397
Lynx	2	2	2	2
Mink	21,982	30,378	31,989	34,277
Muskrat	302	267	235	179
Raccoon	351	284	243	139
Skunk	9	6	10	7
Marten	11	15	19	16
Otter	0	0	2	2

This breeding stock retained on licensed fur farms as at January 1st, 1941, was estimated to have a replacement value of \$2,094,341.00.

Departmental compilation of fur records shows that licensed fur farmers during the year 1940-41 disposed of the following pelts from stock raised on their premises, viz:—

62,281 mink, 59,790 of which were exported and the remaining 2,491 dressed in the Province.

34,282 silver and black fox, of which 25,001 were exported and the remaining 9,281 dressed in the Province.

285 blue fox, of which 282 were exported, and the remaining 3 dressed in the Province.

202 cross fox, of which 111 were exported and the remaining 91 dressed in the Province.

CROWN GAME PRESERVES

Practical protection has been afforded wild life through the setting aside of extensive areas of land as sanctuary for game. At the present time the various Game Preserves scattered throughout the Province have a combined area of approximately thirteen thousand five hundred square miles. Much of this land is still in the Crown, particularly in Northern Ontario, but many of the smaller areas have been set aside with the consent of the land-owners. Much of the land is wild land, particularly suited for the development of large and small game, while in the southern section of the Province they are well adapted to the protection and propagation of upland game, including birds.

During the period under review only one new Game Preserve was established. This was the Kapisko Beaver Sanctuary, situated in the District of Patricia. The primary function of this Sanctuary is to enable the Department, with the co-operation of the Hudson's Bay Company, to restock the area with beaver, control the annual take, and provide a restricted trapping ground for the benefit of Indians resident in the Province. The trapping of fur-bearing animals other than beaver will be permitted to resident Indians.

The following changes and renewals were made in the case of existing Game Preserves:

The boundaries of the Nipissing Crown Game Preserve were altered to conform with changes in the location of Provincial Highway No. 11 which forms the western boundary of this Game Preserve.

The boundaries of the Waterloo Crown Game Preserve, situated in the County of Waterloo, were revised and some additional land included in the area.

The Wilder Lake Crown Game Preserve, located in the Township of Egremont, County of Grey, and the Woodlands Crown Game Preserve, located in the Township of Trafalgar, County of Halton, were renewed for a further period of five years, to November, 1945.

A further measure of protection and control is afforded through the scheme of Regulated Townships. The regulations provide that those who hunt in these regulated areas must have special hunting licenses issued by the respective Municipal Councils, with the approval of the Department, in addition to the regular hunting licenses required under the provisions of the Game and Fisheries Act, and which has the effect of restricting the number of hunters who may operate in any particular area and thus avoid congestion. During the year the following Townships were incorporated in the scheme, viz: Township of Whitchurch in York County, that part of the Township of Toronto lying north of the Queen Elizabeth Highway in Peel County, Townships of Flamboro West and Glanford in Wentworth County, Township of Dunwich in Elgin County, and the Township of Plympton in Lambton County. The total number of Townships included in the scheme following these additions was seventy-one.

WOLF BOUNTIES

The following is a comparative table of condensed wolf bounty payments and statistics for the current fiscal year and the preceding four years:—

Period	Timber	Brush	Pups	Total	Bounty & Expenses
For year ending Mar. 31, 1937	1,090	1,197	31	2,318	\$33,360.63
For year ending Mar. 31, 1938	1,022	837	30	1,889	27,474.24
For year ending Mar. 31, 1939	1,031	723	41	1,795	25,357.00
For year ending Mar. 31, 1940	1,107	614	22	1,743	25,058.12
For year ending Mar. 31, 1941	738	400	8	1,146	16,477.43

Since 1933 the rate of bounty has been \$15.00 on adult wolves and \$5.00 on wolves under the age of three months. An amendment to the Wolf Bounty Act, under which these payments are made, and which was enacted during the 1941 Session of the Legislature, provided that the bounty to be paid on wolves killed after March 1st, 1941, shall be \$25.00 on adults and \$5.00 on wolves under the age of three months.

Reference to the previous table indicates a progressive reduction in the number of wolves destroyed each year and on which bounty was paid, and it is quite possible that the increased bounty provided might stimulate operations which have as their object the destruction of these predators.

During the year 1940-41 nine hundred claims for bounty were submitted for consideration. These claims were in respect to a total of 1,162 pelts, though claims for bounty on some sixteen of these pelts, which were not wolves, were refused.

Bounty was paid to 752 persons who collected a total of \$17,550.00, of which the sum of \$1,140.00 was paid by County Treasurers on wolves killed within such Counties, the bounty in such cases being paid by the Counties, forty per cent thereof being rebated by the Department.

From information supplied on the applications for bounty it would appear that 500 of these animals were taken by wire snares, 293 were shot, 279 were trapped, and the balance by methods not indicated on the claims. It has been ascertained that Indians were responsible for the killing of 341 of these wolves, 319 were killed by farmers, 199 by fur trappers, and the balance by park rangers, guides, hunters, etc.

The following table sets forth in detail the sources of origin and variety of the wolf pelts for which application for bounty was made:—

ANALYSIS OF APPLICATIONS FOR WOLF BOUNTY

County or District	Number of Timber	Number of Brush	Number of Pups	Total Pelts
Algoma	70	38	4	112

Totals	745	409	8	1,162

Administration of the Wolf Bounty Act during the year under review resulted in a total expenditure of \$16,447.43, of which the sum of \$16,410.00 was actually paid as bounty. Details of this expenditure are as follows:—

Brush Wolves	51 @ \$ 6.00.....	\$ 306.00
	334 @ \$15.00.....	5,010.00
	15 @ \$25.00.....	375.00
	400	\$ 5,691.00
Timber Wolves	69 @ \$ 6.00.....	\$ 414.00
	4 @ \$10.00.....	40.00
	640 @ \$15.00.....	9,600.00
	25 @ \$25.00.....	625.00
	738	\$10,679.00
Pups	8 @ \$ 5.00.....	\$ 40.00
	8	\$ 40.00
TOTAL	1,146	\$16,410.00
Expenses	67.43
Total Cost	\$16,477.43

GENERAL

TOURIST OUTFITTERS:—

The licensing of hunting and fishing camps catering to the tourist trade in Northern Ontario (north and west of the line of the Canadian National Railway running between Parry Sound and Pembroke) was continued. Notwithstanding some uncertainty as to the tourist trade during war time, twenty-five more camps were licensed than in the previous year. Of the 667 camps operated under license, 615 were owned by residents of Ontario and 52 by non-residents. These camps were located as set forth in the following table:—

Algoma	95
Cochrane	6
Kenora	157
Manitoulin	58
Nipissing	96
Parry Sound	117
Patricia	2
Rainy River	32
Renfrew	13
Sudbury	57
Temiskaming	4
Thunder Bay	30
Total	667

THE BULLETIN:—

An enlightened public opinion is the best means of securing that co-operation without which no law can be a success. With this in mind the Department has continued to issue its bi-monthly Bulletin. This publication in addition to providing

information concerning Departmental activities, covers many phases of natural history and contains other articles of an educational nature. It circulates to the press, the Sportsmen's Organizations, and to an extensive list of private individuals, teachers, etc., which list has been built up over a period of years through personal application. Over eighteen hundred copies are mailed each issue, but because of the nature of the mailing list it is safe to assume that its sphere of usefulness and influence as an educational medium is much greater than the circulation would imply.

GAME AND FISHERIES ACT:—

There were no amendments to the Game and Fisheries Act enacted during the session of the Legislative Assembly held in 1940, though special regulations were adopted by Order-in-Council in accordance with the provisions of subsection 1 of Section 6 of the said Act, as follows:—

- (a) The period of the spring bear season was extended, and is in effect from April 1st to June 15th.
- (b) Licenses to authorize the use of fire-arms for hunting purposes in the Counties of Essex and Kent, restricted as to period, and are valid only from October 1st to January 31st, next following.
- (c) Prohibiting the use of snares for the taking of beaver at any time.
- (d) Prohibiting the use of snares for any purpose in the Counties of York and Ontario.
- (e) Providing a limit of catch on cotton-tail rabbits of six per day in the County of Lincoln.
- (f) Prohibiting the purchase or sale of cotton-tail rabbits in the County of Lincoln.

ENFORCEMENT SERVICE

Eternal vigilance is the watchword of those who are engaged in the work of law enforcement, and the Game and Fisheries Overseer whose job it is to see that the various provisions of the Game and Fisheries Act and regulations are observed belongs to that service whose ceaseless watching is a necessary part of our scheme of life. But for his persistent activity the wild life of the Province would soon suffer severely from illegal destruction. During the year under review there were between eighty and ninety officers permanently engaged in this work of patrol and supervision, and whose services were augmented by temporary officers employed for varying periods when their assistance was most desirable. In addition the Department also receives the close co-operation of Provincial Police constables in the work of enforcement. There are also hundreds of Deputy Game and Fisheries Wardens, private individuals who sufficiently interest themselves in this work of protection to secure the authority provided under such appointments to enable them to act individually or in conjunction with the regular Overseers in the matter of preventing offences against the Game and Fisheries Act.

Due to the extensive land and water areas of the Province each Overseer must of necessity cover a large territory, but despite long patrols these field officers are quite active in the discharge of their duties.

The Department would, of course, prefer to find law observance so complete that seizures and prosecutions would be unnecessary, but a minority of more or less thoughtless and frequently unscrupulous persons whose activities are a menace to conservation make constant vigilance imperative.

And in this connection Departmental records show that during 1940-41 there were 1345 instances in which offenders were apprehended by various members of the enforcement services, and on which occasions equipment being used unlawfully, and fish, game and pelts, taken contrary to the regulations, were confiscated from those apprehended. In 1176 of these cases the seizures were made by Game and Fisheries Overseers, Deputy Game and Fisheries Wardens were responsible for the action in 67 cases, seizures were made in 26 cases by Provincial Police constables, while in the remaining 76 cases co-operative action by Overseers, Deputy Game Wardens and Provincial Police resulted in the seizures.

The following is a summary of the articles confiscated:—

Live animals	in 5 cases
Birds, game animals and meat	in 166 cases
Fire-arms and ammunition	in 401 cases
Fish	in 165 cases
Nets and fishing equipment	in 224 cases
Angling equipment	in 118 cases
Pelts and hides	in 293 cases
Traps and trapping equipment	in 160 cases
Canoes, rowboats & motor boats	in 43 cases
Outboard motors	in 15 cases
Automobiles and trucks	in 19 cases
Flashlights, spot-lights & lanterns	in 26 cases
Spears	in 57 cases
Miscellaneous articles	in 45 cases

Responsible for the apparent discrepancy in these total figures when compared with the actual number of seizures carried out would be the fact that individual seizure reports would in many cases apply to more than one article, i.e. some reports would cover traps and pelts, fire-arms and game, fishing tackle and fish, lights and spears, as well as other combinations.

Included among the miscellaneous articles which were seized in the 45 cases reported are eleven haversacks and packsacks, ten suitcases and trunks, one hundred and seventeen duck decoys, six axes, one battery and three ferrets.

Seized pelts included 1152 beaver, 39 fox (various species) 77 mink, 1817 muskrat, 22 otter, 38 raccoon, 18 skunk, 98 squirrel, 80 weasel, 1 fisher and 1 lynx, in addition to 95 hides of deer, moose, etc.

Confiscated fire-arms were as follows:—184 .22 rifles, 56 heavy calibre rifles, 56 single barrel shotguns, 72 double barrel shotguns, 20 repeating shotguns, 4 automatic shotguns, 4 pistols and revolvers, and 32 air guns.

Subsequent prosecutions were provided in 1,138 cases, the action being instituted by Game and Fisheries Overseers in 1,082 of these cases, by Provincial Police constables in 31 cases, by Deputy Game Wardens in 14 cases, and by co-operative action in 10 cases, while in one case the charges were laid by a private individual in a trespass case under Section 65 of the Game and Fisheries Act. In 1,078 cases convictions were registered, 47 charges were dismissed, and in 13 cases the charges were withdrawn by the officers responsible therefor.

Upon reference to the statement of revenue which appears earlier in this report it will be observed that fines amounting to \$25,416.28 were collected during the fiscal year ending March 31st, 1941, as a result of these prosecutions, and of this amount \$11,990.00 was paid by some eleven persons apprehended with unlawful beaver

pelts in their possession. The fines in these specific cases varied from \$100.00 to \$3,630.00 according to the number of pelts involved in each violation. Not only were these fines assessed but the beaver pelts found in their possession, and totalling 487, were also confiscated and included in the sales of furs conducted by the Department, the proceeds of which sales are also public funds. Beaver pelts included in the Departmental sale conducted in the month of October, 1940, averaged approximately \$20.00 per pelt, so that in addition to their fines these offenders also forfeited to the Crown some \$9,740.00 derived from the sale of their pelts. Verily, the way of the transgressor is hard!

THE FISH CULTURE BRANCH

During the year the Department operated twenty-seven hatcheries and rearing stations. By means of these facilities the culture of fish was carried out in a satisfactory and effective manner.

Apart from maintenance, additional hatchery construction consisted of the completion of the Hill Lake Trout Rearing Station and the construction of a new battery for whitefish, herring and pickerel at the Glenora hatchery.

THE CULTURE AND DISTRIBUTION OF FISH

The total distribution of fish of various sizes and ages exceeded that of any previous year. Excellent progress was made in culturing and distributing small-mouthed black bass, large-mouthed black bass, maskinonge, pickerel, speckled trout, herring and whitefish.

Speckled Trout:

The following statistics indicate the progress being made in the culture and distribution of yearling and older stages of this valuable native game fish.

1936	563,351
1937	1,183,223
1938	2,087,990
1939	2,982,874
1940	3,285,264

The production of yearling speckled trout in 1940 was 10 per cent higher than that of the previous year. In addition, 611,000 fingerlings which could not be accommodated in the hatcheries or ponds were distributed.

Brown Trout:

In excess of one-quarter million yearlings and approximately 182,000 fingerlings were distributed. Favourable reports of successful angling in the larger, lower reaches of certain southern Ontario streams, where brown trout have been introduced, are indicative of the success being achieved with this species.

Rainbow Trout:

(a) Steelhead trout—

The small increase in the number of yearlings distributed was compensated by the fingerling distribution, which was more than double that of the previous year. Distribution was made in water areas in which this species has become established.

(b) Kamloops trout—

The Kamloops trout is the common trout of the interior of British Columbia, occurring throughout the Fraser river drainage above Hell's Gate canyon and throughout most of the basin of the Columbia river in British Columbia. Unlike its close relative, the rainbow trout, it does not descend to the sea. Considerable differences exist in the characteristics of the species from different habitats, as to colouration, size, markings, etc., and even in large lakes confusing differences occur among individuals of the same species.

Generally speaking, they mature and spawn in their fourth year, although under certain conditions they might not spawn until their fifth year. Spawning takes place in creeks from April to June. It is stated that some of them spawn on the beaches of lakes at the mouths of streams tributary to the lakes. In some cases, Kamloops trout spend their whole lives in streams.

Only a limited amount of authentic information is available on the feeding habits of Kamloops trout. It is reasonable to expect that insects form the bulk of the food of specimens under sixteen inches at all seasons, but the staple food of the larger specimens is probably fish. The kokanee, a diminutive salmon, occurs in very large numbers in most lakes where the Kamloops trout reaches any considerable size, and is preyed upon by the latter.

The Kamloops trout is an excellent game fish, and is taken on the fly and by trolling. When caught it makes a terrific fight for freedom, combining a series of mad rushes and violent leaps with violent shaking of the head. It fights like the steelhead trout and requires considerable skill to land. The best fly fishing is obtained in streams and small lakes and at the mouths of streams flowing into larger rivers and lakes. The usual weight of the fish taken is from three to four pounds, although they grow to a much larger size; there are records up to thirty-five pounds.

Small consignments of eyed Kamloops trout eggs were imported from Kamloops, B.C., each summer from 1934 to 1937, inclusive. The largest losses were experienced immediately after arrival, particularly in hatchery waters in which a rapid upward surge in temperature occurred. The original importation to the Pembroke Trout Rearing Station was experimental but it is evident from later observations that Kamloops trout eggs hatch normally and without serious loss in spring water of approximately constant temperature, for example, at the Sault Ste. Marie and Chatsworth Trout Rearing Stations.

Normandale ponds were used for rearing parent fish, since it was expected that the location and climatic conditions would be congenial for the species. In 1938 the Kamloops breeders at Normandale spawned for the first time, and limited numbers of eggs were collected at that time and during subsequent spawning seasons. Special mention is made of this fact since it was an accomplishment not previously recorded in eastern North America. It was reported on good authority that this experiment was made in a pond in the east prior to 1938 but was not successful.

Previous annual reports contain information on the distribution of Kamloops trout in Ontario. Successful angling has been reported from Echo lake, in the district of Muskoka, and Bloom lake, in the district of Nipissing.

On account of its excellent game qualities and the fact that it becomes established in an environment similar to that inhabited by our eastern or native brook trout, and since, unlike its close relative the rainbow, it is non-migratory, controlled distribution in Ontario was recommended. Twenty-six thousand five hundred yearlings

were distributed this year. The previous distribution of yearlings of this species was in 1935.

Lake Trout:

There was an increase of 4.5 per cent in the distribution of lake trout fry and a decrease of 26.6 per cent in the distribution of fingerlings.

Whitefish:

An increase of 23.5 per cent in the distribution of whitefish fry as compared with that of the previous year was achieved. This commendable increase was due to the splendid cooperative efforts of our hatchery officers, spawntaking crews and commercial fishermen.

Herring:

The distribution of herring fry was 27 per cent more than the previous year, a very creditable showing.

Yellow Pickerel (Pike-Perch):

The percentage increase in the number of pickerel fry distributed was approximately the same as that recorded during the previous year, namely, 20.3 per cent.

Following the customary procedure, 2,000,000 eyed eggs were handled by the Sparrow Lake hatchery, and the fry were distributed over suitable natural spawning grounds in Sparrow lake.

Small-Mouthed Black Bass:

Exceptionally good progress was made in the culture of small-mouthed black bass. The percentage increased distribution of fry and fingerlings was 81.3 and 98.5 per cent, respectively.

Large-Mouthed Black Bass:

Two hundred and thirty thousand fry and 5,500 fingerlings were successfully reared and distributed from two small ponds at Mount Pleasant, a very commendable distribution considering the limited pond areas under cultivation.

Yellow Perch:

The number of perch eggs available in the vicinity of Kingsville hatchery, lake Erie, is subject to wide fluctuation each year. This production was much lower in 1940 than in the two years immediately preceding, but higher than in 1937.

Considering the commercial value of the perch, the collection of spawn in the absence of a closed season is important.

Maskinonge:

The distribution of maskinonge fry was 12.3 per cent less than that of the preceding year, but this was greatly offset by an increase of 79.5 per cent in the distribution of fingerlings.

For the second time in the history of the Department, maskinonge fingerlings of sizable proportions were reared by the pond method, namely, 1,300 in 1939, and 2,333 in 1940. This work was outlined in detail in the previous annual report.

CLOSED WATERS

One of the most promising methods of conserving the breeding stock of fish is to close parts of natural water areas to fishing. In these areas the fish thrive

without interference and spread to other parts of the same river or lake. By such means a permanent breeding stock is set up, and there is taken each year only the natural increase from it.

In addition to the waters already closed for the natural protection and propagation of fish, the following were closed during the year, April 1, 1940, to March 31, 1941:

1. BLACK DUCK LAKE (Part of Deer Bay),
Township of Harvey, County of Peterborough.
2. CEDAR CREEK (Part),
Township of Dumfries North, County of Waterloo.
3. OHEMONG LAKE (Part),
Townships of Smith and Emily, Counties of Peterborough and Victoria.
4. DEEP BAY (Part of Sparrow Lake),
Township of Matchedash, County of Simcoe.
5. GOOSE LAKE (Part of Scugog River),
Township of Fenelon, County of Victoria.
6. GOOSE LAKE,
Townships of Fenelon and Somerville, County of Victoria.
7. HARVEY CREEK or NOGIE'S CREEK,
(From the dam at Bass Lake to the dam near Pigeon Lake),
Townships of Galway and Harvey, County of Peterborough.
8. LITTLE MUD LAKE,
Township of Smith, County of Peterborough.
9. MASKINONGE CREEK,
(From Maskinonge Lake to Little Vermilion Lake, and part of Maskinonge and Little Vermilion Lakes),
Townships of Pickerel, Echo and Vermilion, District of Kenora.
10. McINTYRE RIVER, from mouth to John Street Road, Port Arthur, and
NEEBING RIVER, from mouth to First bridge on Arthur Street, Fort William.
11. NEWBORO LAKE (Part),
Townships of Crosby North and Crosby South, County of Leeds.
12. OPINICON LAKE (Part locally known as "Drowned Land"),
Township of Crosby South, County of Leeds.
13. SEARIGHTS BAY (Part of North River),
Township of Belmont, County of Peterborough.
14. STREAM connecting Sand Lake and Wolfe Lake,
Township of Crosby North, County of Leeds.
15. TAYLOR'S BAY (North River Bay). and MUNNS' BAY (Belmont Lake),
Township of Belmont, County of Peterborough.
16. TWELVE MILE CREEK (Part south-east of Highway No. 5),
Townships of Nelson and Trafalgar, County of Halton.
17. WHITEFISH, BASS and CLEAR LAKES,
Township of Humphrey, District of Parry Sound.

All of the waters enumerated above are closed to protect black bass and maskinonge, with the exception of No. 2, for speckled trout, No. 10, for rainbow trout, No. 14, for pickerel, and No. 17, for lake trout.

REMOVAL OF COARSE FISH

From December 27, 1940, to February 8, 1941, hoop nets and trap nets were operated in Ahmic lake and tributary waters, for the removal of ling and suckers. One thousand five hundred and twenty-seven ling and 234 suckers were caught. The average weight of the ling and suckers was 5 lbs. and 2½ lbs., respectively:

BIOLOGICAL SURVEYS

A biological survey of Curley lake, concession VI, lot 26, township of Glenelg, county of Grey, indicated that it was suitable for large-mouthed black bass.

Lake Scugog was examined to determine the suitability of certain areas as sanctuaries for maskinonge. One of these areas is located at the south tip of Scugog island and the other at King's bay, located at the northwest side of the lake.

A site for a dam between Hart lake and Loughborough lake was investigated; the dam is desirable in order to keep Loughborough lake at a more normal level.

Pollution of a branch of the Credit river, in the township of Esquesing, county of Halton, was investigated. A small stream flowing through Georgetown enters this branch just south of the town, carrying with it wastes from a paper processing plant. The pollution of the Moira river was also investigated.

The Ontario Fisheries Research Laboratory of the Department of Biology, University of Toronto, continued field and laboratory studies of lakes and streams in Algonquin Park.

Following the procedure of the previous year the members of the laboratory cooperated with the Park staff in distributing speckled trout yearlings provided by the Ontario Department of Game and Fisheries. The lakes stocked are included in the lists in Appendix No. 1, under the district of Nipissing. Speckled trout planted in Brewer, Cache, Costello and Opeongo lakes were marked by removal of the adipose fin. This year one of the Park trucks was equipped with tanks making it possible to transport the fish earlier in the season and to plant them while the surface waters of the lakes were still quite cool, which should add greatly to their chances of survival. It is extremely important that we should measure the success of these plantings, and all persons fishing in the lakes in which speckled trout have been planted are urged to report their catches through the medium of the creel census.

The first successful planting of lake herring in lake Opeongo as food for the trout was accomplished this year by transferring 250 six inch lake herring from Mary river near Huntsville.

The transport of adult lake trout from more inaccessible to heavily fished waters was not successful. The pound nets were set in White Trout lake, but presumably owing to the extremely backward season the trout did not run and not enough were caught to warrant the expense of continued fishing.

Three of the smaller lakes, Jacks, Sproule and Sunday, accessible from the highway and which do not offer fishing at present were investigated. These seem suitable for trout and an attempt to develop fishing in them is planned.

In all, twenty-one lakes were closed to fishing in 1940. These lakes will be open in 1941. Raven, Head and Merchant lakes, which were closed in 1939 were open in 1940. No creel census reports were received from Raven lake but the fishing in both Head and Merchant showed the benefit of the year's respite. The availability of lake trout in Head lake was almost twice as great in 1940 as in 1938. The situation in Merchant lake is more complicated owing to the history of the fishery there but there is no doubt that the fishing was substantially improved by closure. Owing apparently to a slow growth rate, a single year's closure does not make a marked change in the size composition of lake trout catches, but it does in the case of speckled trout. Merchant lake which was famous for the size of its speckled trout in the past, but which had more recently been disappointing in this respect, again yielded some nice catches in 1940. The Ontario Fisheries Research Laboratory is anxious to receive full reports of fishing in these lakes through the creel census in order to assess the benefits of closure.

It was not possible to carry on as extensive a creel census in 1940 as in previous years. It is of interest to note that 1940 is the first year in which bass were reported in any numbers from Happyisle lake, although they were known to occur there. This rise of a bass population to a fishable level is a further and, it is to be hoped, a last spread of this species in the Opeongo drainage. The creel census of lake Opeongo has now been carried on for five years. The accumulated data have not only enabled the investigators to follow the trend of the lake trout fishery there but are now also sufficient to make a first approximation of the spawning escapement. It remains to be seen whether the escapement in 1936 was sufficient to maintain the stock. An answer to this should be found in the next two years when the young fish resulting from the 1936 spawning will be entering the fishery. Enough creel census returns for bass have now been received to make possible a classification of the bass fisheries similar to that established for the lake trout. Bass lakes in which the average length of the fish captured is between eleven and twelve inches produce the greatest availability of these fish. Most of the creel census work was confined to Algonquin South but records were also gathered for lake Traverse and vicinity. This is of particular importance since lake Traverse is the only lake in the Park offering lunge fishing.

The investigations of the food habits of the game and forage fish were continued. The work on the food and growth of the yellow perch is almost completed. The routine examination of the stomach contents of lake trout, speckled trout and bass was continued at lake Opeongo.

The study of the whitefish population in lake Opeongo was continued; there are dwarf individuals which mature at two years as well as the more usual individuals that grow to three pounds, or more, and mature at four years.

Studies were made on the quantitative methods of sampling the plankton population of certain lakes. Tests were made on the use of a smaller and more convenient form of the tube sampler which has proved to be more accurate than other samplers currently in use.

Stream studies carried out from early May until mid-September were concerned with the insect fauna and the speckled trout. Two locations were selected. Mud creek, a tributary of the Madawaska river near the east gate of the Park, and the rapids below Tea lake dam on the Oxtongue river. At the former location the quantitative distribution of aquatic insects on different types of bottom and in different reaches of the stream was studied. Changes in the fauna of a rapids flooded out by a beaver pond last year were followed, showing some interesting results which were reported at the meeting of the American Fisheries Society held at

Toronto in September. At Tea lake dam an opportunity was afforded of investigating the feeding of speckled trout. Quantitative collections of the insects emerging from the water which form a large percentage of the trout food were made and trout were taken and their stomach contents are being examined to find what elements of the food available to the trout are eaten by them at different times of the day and year. During this study it was noted that the trout were absent from the rapids below the dam from approximately the 20th of July to September 1st.

Work carried on in the experimental laboratory at Opeongo was concerned with various ways in which environment may affect or limit the activities of fish. An investigation of immediate practical importance to our technique of restocking was to ascertain what surface temperatures might be considered unfavourably high for the planting of speckled trout. It was found that speckled trout, straight from the holding troughs, would die within twenty-four hours if placed in water at 73° F. Further, the gradual equalizing of the temperature of the water in the fish can to that of the bath over a period of fifteen minutes gave no appreciable benefits. However, by first exposing the fish to a moderately high temperature for twelve hours (65° F.) it was possible to raise the lethal temperature from 73° F. to 79° F., even although the fish had been returned to cooler water over night. A study of the lethal temperatures of the various species of fish in the waters of the Park was begun.

Studies on the respiratory tolerance of fish were continued, and experiments on the circulatory capacity of fish were conducted by measuring the volume of blood passed by the heart at each stroke. This apparently differs widely in different species of fish and we believe it may be one of the differences between those fish which can live in warm water and those which cannot.

ACKNOWLEDGMENTS

The Department is indebted to the Ontario Federation of Anglers and Hunters and its many constituent Fish and Game Protective Associations throughout the Province and to the Northern Ontario Tourist Trade Association, as well as to interested sportsmen and conservationists for their active co-operation and splendid assistance in the protection of the provincial fish and game resources. The activities of these Associations and individuals have undoubtedly played a prominent part in developing the spirit of conservation now prevalent in the Province, and have materially helped to make our work in the Department more agreeable and pleasant.

In closing this report I desire to make reference to the work of the staff. Members of the service, both inside and outside, generally have been conscientious in the performance of their work, and courteous in their contacts with the public, in an endeavour to assure the best results.

All of which is respectfully submitted.

I am, Sir,

Your obedient servant,

D. J. TAYLOR,
Deputy Minister of Game and Fisheries.

REPORT OF THE DEPUTY MINISTER OF LABOUR

For the Fiscal Year Ending March 31, 1941

TO THE HON. PETER HEENAN,
Minister of Labour.

SIR:

I have the honour to submit a report on the work of the Department of Labour of the Province of Ontario for the fiscal year ending March 31, 1941.

Included herein are the reports on the administration of the following Acts within the jurisdiction of the Minister of Labour;—Department of Labour Act, which authorizes the establishment of Employment Offices; Employment Agencies Act; Factory, Shop and Office Building Act; Operating Engineers Act; Steam Boiler Act; Industrial Standards Act; Apprenticeship Act and Minimum Wage Act, as well as reports on the Conciliation Service of the Department of Labour and on Youth Training and War Emergency Training carried on under the Dominion-Provincial Training Programme. The report of the administration of the Workmen's Compensation Act will be submitted by the Workmen's Compensation Board.

INDUSTRIAL CONDITIONS

The reports of all Branches of the Department of Labour indicate the great increase in industrial employment which has taken place in the Province as the result of our national war effort. According to figures of the Dominion Bureau of Statistics, this unprecedented expansion brought the index number of employment for the fiscal year 1941 up to 135.0, the highest point in the twenty years of the record, and 17.8 points above the index number of 117.2 for 1940. In these calculations the 1926 average is taken as 100.

The index numbers of employment in all thirteen divisions were higher than last year, and for each month were higher than for the corresponding month of 1940. Expansion in the manufacturing industry as a whole was indicated by an advance of 23.0 points in the index number, in iron and steel by an advance of 47.2 points, in the textile industry by an advance of 17.8 points and in logging by an advance of 25.0 points. Advances in other divisions ranged from 5.0 to 14.7 points.

A decrease in unemployment among trade union members in Ontario was reported, the average percentage over the year being 5.1 as compared with 9.6 in 1940.

The increase in the value of building permits issued in the Province during the fiscal year 1941 indicates a decided expansion in the volume of employment in the building industry. The total value amounted to \$56,430,489, an increase of \$27,511,956, or 95.1 per cent as compared with the total for 1940.

LABOUR DISPUTES

During the fiscal year 1941 there were 55 strikes reported in Ontario, in which 9,188 workers were involved, the time-loss amounting to 36,318 man-working days. This was the smallest time-loss due to strikes since 1925; it was 28 per cent less than in 1940 and 58 per cent less than in 1939. The total time-loss for the three years, 1939 to 1941, was 41 per cent less than that for the year 1938. In only four of these 55 strikes were 500 or more workers involved and these four lasted only two days or less. In 32 strikes less than 100 workers were involved.

Sixteen strikes in the manufacture of metal products caused 42 per cent of the total time-loss and 10 in the textile industry caused 13 per cent of the loss.

Seventeen strikes involving 27 per cent of the total number of workers on strike were settled by compromise; 7 strikes involving 27 per cent of the workers terminated pending negotiations or application for I.D.I. Board; 13 involving 15 per cent of the workers were settled in favour of the workers; 14 employing 9 per cent of the workers were settled in favour of employers; 3 were indefinite as to outcome or were partially successful and one was not terminated till after the close of the fiscal year.

MEDIATION, CONCILIATION AND ARBITRATION

With the exception of those dealt with pursuant to the Industrial Disputes Investigation Act, the Department of Labour of Ontario was in contact with practically all industrial issues in the Province at the request of both employers and employees concerned. Through the mediation, conciliation and arbitration service of this Department many strikes were promptly and satisfactorily settled, and in many cases matters of dispute were settled without strikes being called, thus ensuring continuity of production and avoiding the establishment of costly boards.

DOMINION-PROVINCIAL TRAINING PROGRAMME

Under the Dominion-Provincial Youth Training Programme 4,097 persons received training in various trades during the year, of whom 1,899 were placed in civilian employment, 877 enlisted in the Royal Canadian Air Force, 182 did not complete their courses and 1,139 were still in training at the end of the year. In addition 75 men were given refresher courses and 59 of them were placed in employment in industry.

Early in the year at the request of the Department of National Defence the classes at the Aircraft Training School at Galt were enlarged from 200 to 300 trainees, and again almost immediately to 600. The results of the training were gratifying as approximately 96 per cent of the young men were successful in passing their standard trade tests for enlistment in the Royal Canadian Air Force.

Under the War Emergency Training Programme 18,395 trainees were enrolled in industrial classes and 1,159 in army classes during the year. Of the students in the industrial classes, 8,984 were placed in employment, 118 enlisted, 2,490 did not complete their courses, 1,986 completed their courses but did not report themselves as placed and 4,817 were still in training at the end of the year.

ONTARIO GOVERNMENT OFFICES, EMPLOYMENT SERVICE OF CANADA

There was a decided increase in the volume of employment in Ontario during the year, with the result that the Employment Service was called upon to assist employers more than ever before in filling their labour requirements. The number of placements made by the Employment Offices, 183,796, was approximately 50,000 more than the previous year, and the placements made since the opening of the offices in 1919 totalled 3,311,126. Applications during 1941 numbered 348,562 and vacancies 196,261. Greater use was made of the Employment Clearance System in obtaining sufficient workers for firms engaged in the production of munitions and other essential war equipment.

The Employment Offices assisted in directing applicants for training under the War Emergency Training Programme to the proper authorities, in arranging for transportation to and from the training centres, and later in placing trainees in jobs.

Applications from ex-soldiers numbered 6,456, and 2,311 placements were made.

FACTORY INSPECTION BRANCH

The great expansion in industry during the year gave rise to new problems for the Factory Inspection Branch. With the increase in the numbers employed, including many who were unaccustomed to operating machinery, and with the introduction of new machinery and the speeding-up process, the need for effective safeguarding and other accident prevention measures was greater than ever before. In spite of all efforts the number of accidents during the fiscal year was almost double that of the previous year, although not all were lost-time accidents. Special precautions against industrial diseases were also necessary in connection with new chemical processes in the production of the weapons of war, and in this work the Department was greatly assisted by the Industrial Hygiene Division of the Department of Health.

The special committee within the Department continued to deal with requests for night shifts for women, and concessions were granted only in connection with work that was definitely for the prosecution of the war. The three-shift system is favoured wherever possible, and in no case is approval given for shifts in excess of ten hours.

The Examiner of Reports and Designs approved of 867 plans for new buildings and additions or alterations to factories, shops and office buildings during the year. The total estimated construction cost amounted to \$29,438,300, an increase of 138 per cent as compared with the previous year.

BOARD OF EXAMINERS OF OPERATING ENGINEERS

The Board of Examiners of Operating Engineers reported increased activities in all phases of the work during the year, due to industrial expansion in the Province.

Candidates examined by the Board totalled 1,897, an increase of 167 as compared with the previous year, and the certificates issued numbered 16,954, or 35 more than in 1940. The Board made satisfactory adjustments in connection with 447 cases of breaches of the Act, and 65 cases were in process of adjustment at the end of the fiscal year. The net revenue amounted to \$28,225.91, an increase of \$2,102.79 as compared with the previous year.

BOILER INSPECTION BRANCH

The fiscal year 1941 was the busiest year in the history of the Boiler Inspection Branch, with its staff of sixteen inspectors operating from eight inspection centres throughout the Province, as well as from the headquarters in Toronto. The number of inspections of new pressure vessels during the year, 1,804, showed an increase of 103 per cent as compared with the previous year, and the number of surveys of designs and plans, 561, an increase of 42 per cent. Inspections of used pressure vessels numbered 966, and annual inspections of uninsured boilers and pressure vessels totalled 6,264 for the year, an increase of 90 per cent. Certificates issued numbered 8,140 as compared with 5,562 the previous year.

The Code of the Canadian Engineering Standards Association has proved very satisfactory for the Province of Ontario. These regulations provide adequate measures for designing and constructing pressure equipment in keeping with present-day trends, particularly in regard to welding.

The annual inspection of uninsured boilers and pressure vessels, which has been the responsibility of the Boiler Inspection Branch for the past two years, has added considerably to the duties of this Branch, as approximately 10,000 such inspections have been made. This work has been conducted by competent inspectors, and a greater degree of safety has thus been afforded the public.

As the result of increased activities the revenue of the Branch showed an increase of 62 per cent as compared with 1940, and 135 per cent as compared with 1939. The sum of \$43,447.57 was transferred to the Treasurer of Ontario.

INDUSTRY AND LABOUR BOARD

The Industry and Labour Board administers the Industrial Standards Act, the Apprenticeship Act and the Minimum Wage Act.

INDUSTRIAL STANDARDS ACT : Thirteen conferences were held during the fiscal year pursuant to the Industrial Standards Act. Twelve of the conferences resulted in six new schedules and six renewals, all of which were approved and are now in effect. One schedule, Toronto Painting, was revoked, and two, Toronto Jewellery and Timmins-Cochrane Logging, expired and were not renewed. One hundred schedules were in effect at the close of the fiscal year.

During the year the sum of \$7,997.21 arrears of wages affecting 468 employees was collected from 120 employers through the trust account. Of this amount, the sum of \$556.25 was diverted to the Crown with the approval of the Industry and Labour Board. After investigation by the Industrial Standards Branch arrears of wages to the extent of \$1,396.82 were paid direct to 78 employees by 11 employers.

One hundred and fifty-five prosecutions resulted in 107 convictions, 25 cases withdrawn, 13 dismissed and 10 were still in Court at the end of the fiscal year. Fines imposed amounted to \$1,261.

APPRENTICESHIP ACT : During the fiscal year 404 apprentices were registered pursuant to the Apprenticeship Act, as follows;—131 in the building trades, 125 in the motor vehicle repair trade and 148 in the barbering and hairdressing trades. The total was lower than in 1940 because of enlistment and the many opportunities for young persons in munitions and other lines of work for which higher wages were paid. Contracts of apprenticeship completed numbered 421, an increase of 127, and at the close of the fiscal year active apprentices totalled 1,320. The net revenue amounted to \$17,975.44, an increase of \$537.04 as compared with the previous year.

Since the outbreak of war 155 apprentices in all of the designated trades have enlisted and 441 holders of certificates of qualification in the motor vehicle repair trade and 70 in the barbering and hairdressing trades are now on active service. There is no record of enlistment among journeymen in the building trades since certificates of qualification are not issued in this industry.

Employers in trades not coming within the scope of the Apprenticeship Act have recognized the value of training under this system. Many such employers have consulted the Apprenticeship Branch and have been assisted in entering contracts of apprenticeship outside of the designated trades, in order to provide training for young employees to take care of their needs for skilled mechanics.

MINIMUM WAGE ACT : During the year 1941 wage sheets were submitted to the Minimum Wage Branch by 16,967 employers covering 535,906 employees, of whom 151,278 were females. The corresponding figures for the previous year were 14,954 employers covering 432,892 employees, of whom 129,111 were females. The decided increases in these figures for 1941 indicate the great industrial expansion, though not the extent of this expansion, as employers in certain categories are required to submit wage sheets only every second year.

As a result of the checking of these wage sheets, increases in wage rates were ordered for 1,504 employees in 869 establishments, as compared with 1,674 employees in 929 establishments in 1940.

Fewer complaints were received, the number being 312 for this year, 392 for 1940 and 462 for 1939. The fact that jobs were more plentiful probably explains the decrease, as female employees were less timid about demanding the rates due them and employers were more ready to comply because of the difficulty of replacing good workers.

Arrears of wages to the extent of \$15,332.19 were collected from 372 employers on behalf of 738 employees, as compared with \$12,946.17 from 337 employers on behalf of 463 employees the previous year. Court action was necessary in 22 cases against 17 employers affecting 37 employees. Five cases were withdrawn after the employers concerned paid arrears of wages and adjusted their records, 16 convictions were registered, none of which were appealed, and one case was dismissed by the Court. The amount of arrears collected as a result of Court action totalled \$1,403.81 and fines amounted to \$730.

CHANGES

In May 1941, following certain Cabinet changes, the Hon. N. O. Hipel, who had been Minister of Labour since September 1938, became Minister of Lands and Forests, and the Hon. Peter Heenan became Minister of Labour. Mr. Heenan had served as Minister of Labour in the Dominion Government for four years from 1926 to 1930, and as Minister of Lands and Forests in the Ontario Government for seven years from July 1934. In June 1938 Mr. Heenan undertook the portfolio of Labour temporarily for three months prior to Mr. Hipel's appointment.

Mr. H. C. Hudson, who had been General Superintendent of the Ontario Government Offices of the Employment Service of Canada from 1919 to 1940, severed his connection with the Department of Labour in July 1940 and has recently been appointed Supervisor of Placement Operations, Unemployment Insurance Commission.

In February 1941 Mr. F. B. Walker, Chairman of the Board of Examiners of Operating Engineers since July 1937, resigned to accept a position with an industrial firm. Mr. John Sharp was transferred from the Department of Public Works to the Department of Labour as Chairman of the Board.

Mrs. E. Gurnett, who had been a factory inspector since April 1924, was superannuated at the close of the fiscal year.

During the fiscal year 1941 three members of the staff of the Department of Labour enlisted, as follows;—J. H. Watson of the Industry and Labour Board, D. F. McLachlin of the Minimum Wage Branch and Herbert Kane of the Toronto Employment Office.

I have the honour to be, Sir,

Your obedient servant,

J. F. MARSH,

Deputy Minister of Labour.

ONTARIO GOVERNMENT OFFICES OF THE EMPLOYMENT SERVICE OF CANADA

GENERAL SUPERINTENDENT—M. H. MacBRIDE

The year under review, the second year of the war, finds Canada in the position of being called upon to exploit to an unprecedented degree her full resources. As one of the important producing countries of the British Empire, it is inevitable that this Dominion should be called upon to assist in supplying an ever increasing volume of food, clothing, ships, munitions and every kind of war equipment as part of her share in the gigantic struggle.

Canada is today one of the world's leading producers of aluminium and is one of the principal sources of supply to the United Kingdom of nickel, copper, lead and zinc, all of which are vital to the war effort. In the production of other precious metals and products of forests and fields, a valuable contribution is being made for the purchasing of war materials and the stabilizing of foreign exchange.

Ontario is probably the Province richest in these products and, being highly industrialized, is experiencing unparalleled manufacturing expansion. Fortunately the progress of armament production is well advanced as compared with a year ago and is now accelerating rapidly.

EMPLOYMENT OFFICES AND THE WAR

Since the commencement of the war there has been a decided increase in the volume of employment in Ontario, with the result that the Employment Service has been called upon to assist employers in almost all fields of endeavour in filling their labour requirements.

New and increased responsibilities have been undertaken by the staff of the Employment Offices. In order to cope with the various problems with which employers have been confronted, and particularly the problem of obtaining workers for industries engaged on war orders, it has been necessary to conduct periodical surveys of industry and matters pertaining to labour supply. The information collected has proved very valuable in this Province and has been passed on to the federal Department of Labour.

Under the terms of the Employment Offices Co-Ordination Act of 1918, the federal and provincial Governments continued to co-operate in maintaining the Employment Service of Canada during the fiscal year 1941. The federal Government provided approximately twenty-five per cent of the funds expended by the Employment Service in Ontario. Employment Offices in the great majority of the thirty-five centres, where they were operating at the close of the fiscal year, have rendered continuous service for more than twenty-two years. The number of placements made by these offices during this time amounted to 3,311,126.

The placements for the fiscal year totalled 183,796, or 49,930 more than the total for 1940. Applications numbered 348,562 and vacancies 196,261. Particulars on these items will be found in the table on page 25.

WAR EMERGENCY TRAINING PROGRAMME

Although there is a separate branch of the Department of Labour primarily concerned with the problems pertaining to the War Emergency Training Programme, close co-operation has been maintained between this branch and the Head Office of the Employment Service and the various Employment Offices. The Superintendents of these offices and their staffs have assisted in directing trainees to the proper authorities, in arranging for transportation to and from the training centres, and later in placing them in jobs.

The greatest shortage in the labour supply was that of highly skilled metal tradesmen. Through the efforts of the Employment Offices many such skilled and semi-skilled workers were located in various centres throughout the Dominion, and men who had not worked at their trade for some years were placed in employment where they could regain their skill. The process of upgrading of skills of presently employed persons is being more widely adopted and production workers with skill in the fundamental processes are being trained in both plants and the technical schools.

EMPLOYMENT CLEARANCE SYSTEM

The Employment Clearance System of the Service has proved increasingly effective in the filling of labour requirements of firms engaged in the manufacture of essential war equipment. The exact details of jobs which can not be filled locally are forwarded to all other Employment Offices in the Province. If these offices are not able to supply a sufficient number of suitable applicants, the orders are sent from the Head Office of the Employment Service at Ottawa to all Employment Offices in Canada. Figures relating to these transactions will be found in the Table on page 25 under the heading "Transfers."

The Employment Service co-operates with the Immigration Branch of the Department of Mines and Resources in endeavouring to locate applicants qualified to fill the special positions for which employers are seeking to bring workers in to Canada. In connection with these "importation requests" the Employment Service reports as to whether or not such help is available in this country.

GENERAL

As heretofore, every effort has been made by the Employment Offices in providing farmers with the help required and the record of placements indicates that progress was maintained on a level comparable to that of last year.

A perusal of the summaries of the reports from the Superintendents of the various Employment Offices, which are to be found on the following pages, reveals in greater detail the extent to which the Employment Service has been utilized by workers seeking jobs and employers seeking help.

**OUTLINE OF ACTIVITIES OF ONTARIO GOVERNMENT OFFICES OF THE
EMPLOYMENT SERVICE OF CANADA****BARRIE**

The zone covered by the Barrie Office of the Employment Service includes Simcoe county and the Georgian Bay-Muskoka area. During the year 4,510 placements were made by this office, the great majority of which were on building projects at Camp Borden under the Department of National Defence. The facilities of the Employment Office were used by various military officials for recruiting tradesmen for various branches of the Service, and 387 men were placed in a civilian capacity. There has been a great industrial expansion in this district during the year, due largely to war orders, especially in the iron and steel industry and shipbuilding, one plant having a staff five times as large as that of a year ago, and textile firms working 24 hours a day. Several hundred men from this zone have also been sent to the chemical plant in the North Bay zone.

Approximately 300 men were placed on railway construction and maintenance jobs, 250 on hydro development in the Muskoka district, and over 100 placements were made on farms, in spite of the openings in other lines of employment. Domestic, waitresses, cooks and all kinds of help for hotels and restaurants were in great demand, due to the greatly increased business in the town and surrounding district. Fifty youths were sent for courses under the Dominion-Provincial Youth Training or War Emergency Training Programme.

During July, the month of greatest activity, the Employment Office was open for business seven days a week, and for five days a week it remained open until midnight in order to cope with the various demands.

BELLEVILLE

There was considerable demand for experienced farm help in the Belleville district during the year, and, as was the case in all farming sections of the Province, there was a shortage of such workers, due to enlistment and the demand for factory workers at higher wages. Many farmers were dependent on dayworkers for harvesting and groups of farmers co-operated in making the best use of the limited supply of such workers available.

Practically all branches of the manufacturing industry showed an upward trend in business during the year, in which the iron and steel industry led the way. Many skilled tradesmen were supplied various firms engaged on war orders by the Belleville Employment Office, which also collected the entire office staff for a factory commencing business in this city. A great many graduates of the War Emergency Training Course were placed on war orders and a number of young men from this district were selected for training to the Aircraft School at Galt. Every assistance was given in the Employment Office in connection with applicants and in placing them on the completion of their courses.

The Employment Office was responsible for supplying skilled workmen of almost every category for work on the repair depot being established at the Trenton Airport by the Department of National Defence, and, with the splendid co-operation of outside offices of the Employment Service, we were able to do an excellent job in collecting a great variety of workers. Officials of the Royal Canadian Air Force at Trenton used the facilities of this office exclusively and their requirements were many and varied, and wherever possible ex-service men were given preference on these projects.

Work on a larger scale than last year was carried on by the Hydro-Electric Power Commission, and as practically all projects were at points distant from the

Employment Office contact men were appointed to look after the labour supply. Approximately 350 men were given from one to four months' work.

As a result of so much industrial activity, there was a decided shortage of applicants in the domestic field.

The placements made by the Belleville Office during the year numbered 4,264, an increase of 1,867 as compared with the previous year. A satisfactory feature of this work was the placing of many handicapped workers in jobs which they could handle.

BRANTFORD

The report of the Superintendent of the Brantford Office included interesting employment figures indicating the rapid industrial expansion, especially in the iron and steel industry, some firms doubling their payrolls during the year and several reaching a new high peak in their history. Most of these firms availed themselves of the opportunity of employing trainees on the completion of their course at local War Emergency Training Classes. Calls for help were received in the Employment Office from practically every industry in the city and approximately 900 placements were made.

In the construction industry the chief projects were in connection with two military centres, for both of which calls for help made considerable demands upon the Employment Office. In addition, civilian help of various kinds, including 15 stenographers, was also supplied one of the centres, and 55 girls were placed with the United Kingdom Inspection Board to receive training as shell examiners.

The total placements made by the Brantford Office showed an increase of 66 per cent, and 872 of these placements were for farm work.

CHATHAM

The Chatham Office reported a considerable step-up in production in the manufacturing firms in the city, most of which are working on war contracts for a large percentage of the time. Many firms have co-operated closely with the Vocational School in employing trainees on the completion of their courses, and have also sponsored young men taking training in Galt. Building was active during the year and 520 tradesmen were placed on construction work under the Department of National Defence. The Employment Office also undertook the placing of men on work for the city during the winter, when 859 were placed on a shift basis. For both farm and domestic work there was a shortage of help, but in spite of it 586 married or single men were placed by the month on farms and 752 by the day. In domestic work 187 permanent placements were made and 200 day work placements.

FORT WILLIAM

The placements made by the Fort William Office, 5,668 during the year, showed an increase of 1,284 as compared with 1940. The logging industry accounted for 725 of this increase. More tradesmen and labourers were placed on building construction, as there was greater activity in the building of houses, distress bins for several Lakehead elevators, structures in connection with the Air Training School, alterations to the Military Training Centre and new internment camps east of Schreiber.

More than 600 men were placed with a company carrying on considerable ballast work for the Canadian Pacific Railway west of Fort William, and the shipping of these men without delay as required involved a great deal of overtime work for our staff, but resulted in a satisfactory service for the company.

The Employment Office has also given valuable assistance to the aircraft factory, with a payroll of approximately 6,000, in obtaining the help required. Many highly skilled and semi-skilled workers, some of whom were brought in from outside centres with the assistance of other offices of the Employment Service, were placed on all types of work, as well as quite a number of ex-service men with little experience in the class of work for which they were employed. This firm has also taken on large numbers of workers who have received training under the War Emergency Training Programme.

GALT

During the first year of operation the Galt Employment Office has proved a valuable asset to the community. The placements numbered 1,602, of which 107 were in other districts to which applicants were transferred. These included 55 men to National Defence projects at Kitchener and Camp Borden and 39 to the Shand Dam project at Fergus. In addition, 58 workers were transferred to this district from outside centres to fill vacancies for which local help was not available. There was a scarcity of both farm and domestic help, with the result that only approximately two-thirds of the vacancies could be filled.

The Galt Office has been assigned considerable responsibility in connection with all the training courses which have been established in Galt under the Dominion-Provincial Youth Training Programme. This has involved the issuance of requisitions for transportation from Galt for approximately 700 trainees in the industrial courses, those for the trainees in the Aircraft Training School being arranged by the Royal Canadian Air Force. In addition the Employment Office has undertaken the billeting in boarding homes of all the students of the various classes including the necessary adjustments and interviews. This has involved considerable work as there are approximately 900 trainees in courses of varying lengths so that the arrivals and departures are almost constant. For the first six months of the fiscal year the Superintendent continued a former duty of paying to the trainees their weekly allowances, which entailed a Saturday forenoon's absence from the Employment Office.

GUELPH

The placements in the Guelph Office numbered 2,595, an increase of more than 30 per cent as compared with last year, and in addition 311 workers were transferred for work in this district from outside Employment Offices. All tradesmen required for construction work in Guelph under the Department of National Defence are now being recruited through this Employment Office, and during the year 74 men were sent for such work to Camp Borden and Kitchener.

Manufacturing firms were very busy, especially in the textile industry in which hundreds of placements were made for work on war orders. In spite of the demand for factory workers, the Employment Office made 400 placements in domestic work and nearly 200 in farm work.

HAMILTON : Men's Department

The Hamilton Office had the busiest year in its history, the placements, 11,946, showing an increase of over 70 per cent as compared with the previous year. The demand for skilled mechanics in the steel trades was heavy and at the close of the year 200 extra tool makers, machinists and moulders could have been placed. During the summer and fall the Employment Office supervised as far as possible the labour on five airports in the district, which was no mean job, and required long hours of work seven days a week on the part of the staff. There was an increase in the number of handicapped men placed and several hundred ex-service men were placed as examiners on munitions by the British Supply Board. This involved considerable work

for the staff as the men were interviewed and all arrangements made for their medical examination.

The staff also handled hundreds of boys in connection with the Dominion-Provincial Youth Training Programme, and arranged for the billeting of apprentices attending the classes in carpentry and bricklaying in Hamilton, as well as paying them each week.

Several hundred men were placed on highway work and on new power plants under the Hydro-Electric Power Commission. During the summer building trade mechanics, especially carpenters, became scarce, and when the large amount of construction work being carried on received publicity, hundreds of workmen from all over the Dominion flocked to Hamilton and at the end of the year 2,057 were still on the active files of the Employment Office.

HAMILTON : Women's Department

Factory work has been very active, many plants working overtime and three shifts, due to war orders. Considerable extra work has been entailed in the registering and placing of girls on munition work. Matriculation standing or its equivalent was required in one order for girls to be trained as instructors, while in some plants younger girls to be trained in the particular line of work are preferred. The demand for household help, both resident and day workers, was constant but few applicants were seeking this type of work, when factory work was more attractive.

KENORA

The only placements made on war orders by the Kenora Employment Office were 42 on aircraft production work in Fort William. Government expenditures in this district were reported curtailed during the year, and there was a heavy drop in tourist trade, no revival of activity in gold mining and fewer openings on railway maintenance. The logging industry, however, was more active and highway construction and maintenance work was about equal in volume to last year. Placements on highway projects comprised fifty per cent of the total made by the Employment Office.

Several young men were sent from this district to Galt for training in aircraft mechanics, welding, sheet metal work and machine shop practice, and 72 went to the Vocational School at Fort William for courses under the War Emergency Training Programme, on the completion of which they were employed on aircraft production work. From an employment standpoint the outlook for the future in this district is reported as good.

KINGSTON

Placements made by the Kingston Office increased by more than 90 per cent as compared with the previous year. All manufacturing firms in this city and in the municipalities of Gananoque, Brockville and Napanee were very busy. This was especially marked in the iron and steel industry and in other firms engaged on war orders, staffs being increased and in some instances doubled, and new buildings and additions to buildings being erected. A new factory now under construction will employ 500 when completed.

Many young men from this district were sent to the training courses at Galt and the trainees at the Kingston Vocational School were employed by local firms or sent to Hamilton and Collingwood on the completion of their courses. The Employment Office was very active during the year in supplying mechanics on various projects under the Department of National Defence, both within this district and at outside points.

KITCHENER

The Kitchener Office reports all industries in the Twin Cities working to capacity with the largest staffs most of them have ever employed. The labour requirements of the metal and rubber industries especially have made great demands on the Employment Office and many good placements were made, in spite of a decided shortage of skilled mechanics.

The construction industry also provided a great volume of employment on industrial buildings, and for the basic training centre, a project of the Department of National Defence, 300 carpenters and more than 800 labourers were supplied by this office.

Very successful courses have been held at the Vocational School under the War Emergency Training Programme, with 138 trainees completing the courses and practically all placed in industry. A second group of applicants were registered and waiting to commence their course at the end of the fiscal year. Firms are taking full advantage of these training facilities and are having young men trained for their particular type of work, so that they can go on production after completing their courses, thus relieving the situation greatly.

LINDSAY

In the ten months of its operation the Lindsay Employment Office made 1,190 placements of workers in this district and 55 workers had to be brought in from outside centres. This office rendered a valuable service in supplying 750 workers for the Dominion Arsenal, and in selecting 10 lads to be trained at the Oshawa Technical School for special work for this plant. In addition, 32 young men were sent from this zone to training classes at Peterborough and Oshawa.

LONDON

Many firms in London, especially in the iron and steel industry, were engaged on war orders or war sub-contracts and continued busy most of the year, with increased staffs and overtime in many cases. Mechanics and labourers were supplied these firms by the Employment Office, and more than 2,200 tradesmen of all kinds and labourers were placed on military projects, such as airports, training camps, armouries, barracks, Military Headquarters, and Central Mechanization Depot.

Thirty-six youths from this district received training under the Dominion-Provincial Youth Training Programme, 21 of whom went to the Aircraft Training School at Galt, and 153 young men took classes under the War Emergency Training Programme either in the Technical School in London or in Galt. The aircraft manufacturing firm is sponsoring a number of these trainees in the sheet metal course and others are being trained by the firm.

NEW TORONTO

There was a decided expansion in the volume of employment in the New Toronto zone with the result that placements made by the Employment Office were double in number those of the previous year. Practically all firms increased their staffs and many extensions were made to plants, in addition to several new factories which were nearing completion. Considerable construction was also carried on in this district by the Department of National Defence and the hydro and a large programme of road work was carried on. The Employment Office kept in close touch with all these undertakings and supplied a very large part of the labour requirements. Placements have also been made in every industry in the immediate district.

Ten youths were sent to Galt for machine shop training and 20 to the Aircraft Training School.

NIAGARA FALLS

The placements made by the Niagara Falls Employment Office during the fiscal year numbered 4,783 or more than double the number made in 1940. An outstanding feature of the work was supplying more than 2,100 workers for the new chemical plant erected on a site one mile and a quarter square. Shortly after the project was under way, an official of the Employment Service was placed at the plant office to register all applicants and confirm those placed who reported direct to the company. All orders were cleared through the Employment Office and when skilled workers were not available locally, the Employment Clearance System was used in obtaining them from outside centres, so that orders might be filled without undue delay. When this plant is in full production it is estimated that from 1,200 to 1,500 persons will be employed permanently.

All other firms engaged on war contracts in this district were offered the facilities of the Employment Office and many placements were made of both regular workers and trainees. All manufacturing firms in this zone operated at a high production level during the year and retail and wholesale trade showed continued improvement.

The building of the Rainbow Bridge and bridges over the Hydro Canal and Welland River provided considerable employment, and many placements were made on highway construction, especially on the continuation of the Queen Elizabeth Highway. Employment in the building trades also showed a considerable advancement as compared with the previous year. Two national defence projects were carried on, for which all workers were recruited through the Employment Office, preference being given to ex-service men. In addition, 160 veterans were placed as guards, and at the end of the fiscal year employment had been found for all employable veterans.

During the year 10 applicants were sent from this district for aircraft and four for industrial training. Two courses under the War Emergency Training Programme were held at the Niagara Falls Vocational Institute, for which 220 students were enrolled. Instruction was given in six different trades, and it is expected that all completing the course will be placed in industry.

There was a steady demand for casual workers throughout the year and this and the demand for general workers, which brought back to work many older men formerly considered too old for work, resulted in a decided reduction in relief rolls, and of persons classed as fully employable only 23 were in receipt of relief.

NORTH BAY

The North Bay Employment Office made full use of the Employment Clearance System in its efforts to meet the demands made upon it for labour. In the logging industry operations were greatly increased and many new camps were opened. The industry, however, was not greatly hampered by lack of help, although there were delays in filling large orders for experienced help, and the groups of jobless, who for the past decade have moved from camp to camp ready to take what jobs might offer, have disappeared. The pulp camps were understaffed and many orders for help could not be filled. On the whole the industry attained a greater volume of production and, with accumulated stock, was able to fill requirements in a satisfactory manner. The huge demand for sawn and finished products resulted in sawmills operating to capacity, and skilled workers were not easily located to fill all orders.

Tradesmen of 40 classifications were recruited for defence projects, and as such demands were of an urgent nature, considerable ingenuity was necessary in order to collect the help required. The Employment Office made use of friends, relatives, police, country storekeepers, municipal clerks, reeves and relief inspectors in notifying applicants, and with their excellent assistance, more than 1,400 tradesmen were

supplied for these projects. The transfer of men into the zone was resorted to only after the local supply had been exhausted. More placements than last year were made on railway maintenance operations, but the calls for highway work were fewer than in 1940.

As the result of a special effort made by the Employment office, 44 lads with at least two years of machine shop training at the technical school were placed in industries in the southern part of the Province. The Employment Office also referred candidates for classes under the War Emergency Training Programme, and on the completion of their courses 60 were placed as aircraft mechanics in Fort William.

OSHAWA

The volume of employment in Oshawa was greater than for many years. A contract for army trucks resulted in an addition of approximately 2,000 employees in one firm and provided extra work for several other local firms. All factories in the district were busier, with increased payrolls and extra shifts in some instances. Over 200 men were employed on the making of wooden cases for war requirements.

More firms than ever before relied on the Employment Office for assistance in obtaining the help required from time to time, and contractors engaged on the new Air Field north of the city, as well as those on highway work, were supplied with both skilled and semi-skilled workers by this office. The number of placements during the year was more than double that of 1940, and with the heavy demand for casual workers, it was possible to place a large number of older men on work of a light nature. Forty men were sent to work outside the zone, mostly at Camp Borden through the Employment Office at Barrie.

OTTAWA

Although fewer placements than last year were made by the Ottawa Employment Office, the number of permanent placements increased by forty per cent. There was a constant demand for experienced mechanics and many highly skilled workers were placed with firms engaged on war orders. In several instances these were obtained through the Employment Clearance System. All applicants for training at the Ottawa Technical School were registered at the Employment Office and trainees were placed on the completion of their courses. A considerable number of youths went from this district to Galt for aircraft or industrial training. Many skilled workers were placed with the Royal Canadian Air Force after passing severe trade tests, and a number of high class technical men were also given tests and accepted by the Inspection Board of the United Kingdom and Canada. Highly skilled workers were also obtained through the Employment Office for a large chemical plant.

This has been an exceptionally good year for building mechanics, as many temporary buildings were erected and extensive alterations made to other buildings to provide additional office space for various departments of the federal Government. The house shortage was also acute and large numbers of dwellings of various types were erected throughout the city, and a large hotel is still under construction. During the summer 150 carpenters were sent to the camp at Petawawa, and carpenters from this district were also sent to the new camp being erected near Cornwall, where a representative from the Employment Office had gone to take care of the registration and placement of workers. This office worked in close co-operation with all contractors on these various construction projects and placed a very high percentage of all workers employed.

Civilian help for the local flying fields was obtained through this office and arrangements were made for their medical examination. Great demands were also made on the Employment Office for both skilled and semi-skilled help for the Depart-

ment of National Defence and other departments of the Government. All city work was centred in the Employment Office and there was a steady demand for labourers for street and sewer work. Such jobs were usually filled by men in receipt of city relief.

Total placements of handicapped ex-service men numbered 502 for the year, and on their behalf 9,463 interviews were carried on in the office, and 6,783 outside.

OTTAWA : Women's Department

In the Women's Department there was an increasing demand for household workers, but for various reasons girls prefer institutional, factory or clerical work to household service, and it was impossible to meet this demand. Because of this shortage, there was an increase in the number of casual day workers required and no difficulty was experienced in filling such orders. The Ottawa Home Service Training School was closed at the end of the fiscal year. In the two years and three months of its operation 258 trainees were placed by this office.

OWEN SOUND

As few firms in Owen Sound were engaged on war orders, increases in the numbers employed were on a smaller scale than in many centres. Forty-nine men were transferred out of the district, mostly building tradesmen sent to Camp Borden through the Barrie Employment Office. Great interest was shown in the various training courses, to which 175 applicants were sent from this district. Eighty of these attended the classes at the Owen Sound Technical School under the War Emergency Training Programme, and more than 40 attended the summer courses. Others went to the Aircraft Training School and industrial courses at Galt, or to farms, and five girls went to the Home Service Training School at Preston.

PEMBROKE

Because of the huge building programme undertaken at the military camp at Petawawa, the Pembroke Employment Office had a busy year supplying about 95 per cent of all building tradesmen and labourers required on this work. The assistance of four outside Employment Offices was necessary to meet the demand for carpenters, painters and plumbers, but practically all labourers were from the surrounding district, returned soldiers being given the preference.

A power development project at Barrett Falls required approximately 500 men for road work, the building of camps, bush clearance and the actual construction of the dam. The lumber industry was also active and logging operations were undertaken on a much larger scale than for many years.

The textile firms in this zone reported a substantial increase in business during the year, and practically all other manufacturing firms were decidedly busier. In mercantile trade the increase was reported at from 20 to 25 per cent or more. In Pembroke no employable person was in receipt of direct relief during the year and in other centres relief to such persons was practically nil.

The number of placements made by the Pembroke Employment Office totalled 5,711, which is more than double the number made in 1940.

PETERBOROUGH

The Peterborough Employment Office supplied on short notice 150 carpenters and 250 labourers for the building of huts at Military Camp No. 32, and later sent all the tradesmen of various kinds required, as well as the office staff. This construction work and the industrial and other building work being carried on kept building tradesmen steadily occupied during the year.

Practically every line of manufacturing showed a marked expansion, many firms working two or three shifts, erecting new buildings or otherwise increasing floor space, and several reported the busiest year in their history. The Employment Office placed approximately 400 with one firm, many being old mechanics who had given up their trade, and many other skilled workers were supplied with the assistance of outside Employment Offices.

All registrations for the War Emergency Training Classes were made through the Employment Office and 17 classes were held and 85 per cent of the trainees placed in industry on the completion of their courses. The total placements of the Employment Office showed an increase of 55 per cent for the year.

PORT ARTHUR

The report of the Port Arthur Office shows a larger number of men transferred into the zone than any other office, due largely to the demand of the shipbuilding firm for skilled workers which could not be met by the local labour supply. The Employment Office also placed with the firm many young men from the training classes at the Technical School. Many placements of both men and women were made with the aeroplane manufacturing firm at Fort William and towards the end of the year an arrangement was made to have a certain number of trainees from the Technical School sent each week to this firm. Approximately 600 workers were placed on construction projects undertaken by the Department of National Defence.

The Employment Office supplied several thousand men for woods operations in the Thunder Bay District. These various operations now give employment practically the year round. The number of placements in the mining industry was comparatively small, due to the distance of the firms from Port Arthur, and distance has also proved an obstacle in connection with requests for help in other lines of work.

ST. CATHARINES

The report of the St. Catharines Employment Office shows an increase of approximately 2,500 in the number of placements made. As in other centres, the iron and steel firms were especially busy, due to war orders, and many firms have made extensions to their plants, have greatly increased their staffs or are working double shift.

The building programme in this city surpassed all previous records and 1,400 placements were made in the construction industry by the Employment Office. The expansion in business in this area has resulted in a great deal of industrial building, as well as the building of houses, and a large number of permanent buildings were erected at a military camp and at the elementary flying school.

The extension of training facilities under the Training Programme has been of great assistance to industry by providing a supply of semi-skilled workers, and thus relieving to some extent the shortage of skilled mechanics. The summer courses at the collegiate were very satisfactory, with more than 70 of the trainees being placed and at the end of the year the classes had the full number of students.

ST. THOMAS

More than one half of the 2,832 placements made by the St. Thomas Employment Office were in jobs at the three air training centres in this district. Considerable assistance was also given farmers in obtaining their help and workers were placed on hydro projects and in various industries.

SARNIA

The Sarnia Employment Office reported a general increase in practically all industries, especially in firms engaged directly or indirectly on war orders. In a brass firm 366 men and women were placed for factory work and special inspection work

under the British War Supply Board, and many students with high standing in the courses for aircraft mechanics were placed with the local aircraft manufacturing firm. Building tradesmen and labourers were supplied for work at the armouries. Approximately 400 placements on other building projects were made and a list of building mechanics has been prepared in connection with the building of a new elevator to be undertaken shortly.

SAULT STE. MARIE

The Employment Office at Sault Ste. Marie was requested by one of the largest companies in the lumber industry to take charge of the entire hiring and shipping of men to the various camps, and 850 men were sent out during the winter, in addition to 200 recruited through other Employment Offices both in Ontario and Quebec, when experienced pulpwood cutters could not be obtained locally. Considerable work was involved in having the men medically examined, issuing them instructions, taking care of transportation order forms, and reporting to the company the name and destination of each man shipped. All these transactions required overtime work on Saturday and Sunday on the part of the Employment Office staff, but were carried out without error and to the satisfaction of the company. Year round pulpwood operations in four of these camps will provide steady employment for cutters.

Most building mechanics had steady employment throughout the year, but the decision to postpone until after the war all highway work not immediately necessary resulted in fewer placements in the construction industry as a whole. All orders received from the boats were promptly filled, and orders for casual work were much higher than last year. Six lads from the district were sent to classes at Galt and Hamilton under the Dominion-Provincial Youth Training Programme.

Employment has been at a high level at the steel plant, with extensions under construction, and both skilled and unskilled workers were supplied this firm, the Employment Clearance System being used to good advantage in obtaining the highly skilled mechanics which were not available locally.

SIMCOE

The Simcoe Employment Office rendered a unique service to the tobacco farmers in Norfolk county in supplying them with complete harvesting gangs. Many small growers were unable to give continuous employment to the number of men required on harvest days, as they could prime tobacco only two or three days a week. The Employment Office was able to supply them with complete harvesting units, but in order to have the men ready when the farmers called for them, it was necessary for the office to open for business at 6 a.m. during the harvesting season. The total acreage for flue cured tobacco in Ontario for the year was 38,500, approximately 65 per cent of which is in Norfolk county.

The few manufacturing firms in this district had a busy year and a considerable number of workers were supplied them by this office. Building tradesmen were also sent for airport construction work. About 40 young men went for training to the Aircraft School at Galt, and under the War Emergency Training Programme many went to take courses at Brantford and Hamilton.

The number of placements made by the Simcoe Employment Office increased about 15 per cent as compared with the previous year.

STRATFORD

The Stratford Employment Office supplied building tradesmen for building and alterations being carried on at various airports and military camps, as well as for the barracks at Stratford. When such workers were called for on short notice, we

telephoned the clerks of the surrounding municipalities, who got in touch with the workers in the district, giving them our instructions, thus saving considerable time. This arrangement has proved very satisfactory and the assistance of the clerks has been appreciated.

The Employment Office has co-operated to the full in connection with the War Emergency Training Programme and more than 100 students were trained in the technical schools.

SUDBURY

The report from the Sudbury Employment Office showed an increase of 53 per cent in the number of placements made during the year. More than one-half the men employed in the lumber industry in the district were supplied through this office, and close contact was maintained with the various companies. Many building tradesmen were also sent for work at the munition factory at Nobel and on the erection of an internment camp. The whole Sudbury district has been covered in an effort to obtain first class machinists and other tradesmen to meet the demand. Considerable employment was also given men on hydro projects, highway and building construction, but the volume of such construction work being carried on was less than in 1940. Only skilled help was required for the mining industry and there was a shortage in the supply, although some good placements were made.

TIMMINS

The Timmins Employment Office made 1,000 more placements during the year than in 1940. Placements in the logging and lumbering industry were approximately four times the number in the previous year, and many orders remained unfilled. Less work was available for building tradesmen and many of them left the district for work elsewhere in the Province. Many good placements were made in the mining industry in which efforts for maximum production are now being maintained, since it is classed as an essential war industry, and great care was taken in checking the employment records of the applicants sent to the various mines in this district.

TORONTO

Early in November 1940 the one central Employment Office in Toronto was replaced by five zone offices so located throughout the city as to best suit the convenience of both employers and employees. About 27,000 placements were made in the offices during the year, or an increase of 45 per cent as compared with 1940. In addition, large numbers of skilled mechanics were selected and referred to various firms engaged on war contracts and too busy to confirm the employment of such workers, with the result that numerous placements could not be recorded.

The iron and steel industry reported considerably increased production and there was a marked shortage of skilled mechanics. In addition to the local demand, the Employment Offices were called upon to supply skilled workers for various municipalities from Ottawa to Port Arthur. The registration of industrial war workers proved valuable as a means of recruiting many experienced mechanics employed in other lines of work because of lack of opportunity in their own line before the war. The transfer to and from Toronto of skilled workers through the Employment Clearance System was heavier than for many years.

Food, textile and printing industries had a busy year and construction was brisker than since 1932, due to the building of various military camps and the volume of industrial building being carried on.

The various offices have been in close touch with the training classes at the technical schools under the War Emergency Training Programme and hundreds of

the trainees have been placed with firms engaged on war contracts. While not fully skilled, they have been sufficiently trained in various trades to fit into factory organization and to relieve the shortage of skilled mechanics.

As in all other Employment Offices in the Province, the demand for household workers was greater than the supply, because of the preference for war work of some sort, and especially munitions work. There was a great increase in the registration of women and girls from all parts of Ontario and from the western provinces for this type of work, and many good placements were made. Experienced power machine operators, weavers, winders and workers for the metal trades have been in demand, and among inexperienced workers the demand has been for girls of 16 and 17 years of age. During the year more than 12,000 placements were made by the Women's Departments of the Employment Offices.

WELLAND

The zone of the Welland Employment Offices includes, in addition to Welland with its widely diversified industries, Port Colborne, where the nickel plant provides the greatest volume of employment, and Thorold, the centre of the paper industry in this district. Practically all manufacturers were exceptionally busy, working full time with greatly increased staffs and many firms made extensive additions and alterations to their plants. The greatest increases were in the iron and steel and textile industries, due to the requirements of war, and the construction industry reported a decided improvement in general business because of plant extensions, house building and other construction work.

This expansion in industry resulted in a busy year for the Employment Office, and the placements were more than double the number made in 1940, in spite of the difficulty of looking after the employment needs of three municipalities several miles apart.

WINDSOR

The Windsor Employment Office reports that many contracts were awarded the various manufacturing firms in the city for war supplies, especially for mechanical transports and accessories, and by the early summer plants were operating to full capacity. A survey of 172 firms made by the Chamber of Commerce showed an increase of 40 per cent in the numbers employed by these firms during the year. While hundreds of unskilled workers were utilized in many plants, the orders for help placed with the Employment Office were mostly for skilled mechanics and it was difficult at times to supply the numbers required. However, the various training courses at the Vocational School have been filled to capacity, and the large numbers of trainees already placed in industry are proving very satisfactory.

Large numbers of building tradesmen were supplied for work at the airport and for alterations to the military barracks. The building permits issued in Windsor during the year amounted to double the value of the previous year and provided steady employment for building mechanics.

The placements made by the Employment Office during the year showed an increase of 47 per cent.

WOODSTOCK

The greatest gains in the number of placements made by the Woodstock Employment Office were in the construction industry, due largely to war requirements. The largest project was the construction of a militia training centre, all the men on which were hired through the Employment Office. No efforts were spared by this

office in supplying the labour with as little delay as possible and this entailed hours from 6.30 a.m. till 11 p.m. for the staff for several weeks. However, the service rendered was very satisfactory and 805 men were placed on this job. A considerable number of placements were made on new construction and repairs for the Hydro, and building tradesmen were placed on all jobs of residence and factory buildings in this city, and 77 carpenters were sent to a job on a plant being erected in London.

Cordial relations have been established between the Employment Office and the various manufacturing firms of the city, many of which hire all help through this office. In filling these requirements efforts were made to have workmen return to the trade in which they were skilled and which they had left for other lines of work, and to persuade employers to advance semi-skilled workers to more skilled operations. Many young men who had completed the machine shop courses at the Technical School were also placed in industry, thus supplying the demand for semi-skilled workers. Under the War Emergency Training Programme 17 trainees were sent to the Training School at Galt and 45 to the Technical School at London.

Fifty six female examiners were placed in two munitions factories for which jobs approximately 200 applied.

Totals	3,239	627	3,866

FACTORY INSPECTION BRANCH

CHIEF INSPECTOR, DEPARTMENT OF LABOUR—J. R. PRAIN

This is the fifty-fifth annual report of the Factory Inspection Branch and covers the fiscal year 1941.

The work of the Composite Inspection Service during the second year of the war increased in volume very considerably on account of the new munitions plants opening, and others already in production speeding up their output. This increased activity in industry took place not only in the actual manufacture of guns, shells and other implements of war, but also in the production of foodstuffs, cloth, building materials and many other lines. New problems confronted the inspection staff in the change over to wartime industrial operations and the need for effective safeguarding was greater than ever.

The number of industrial accidents during the year was almost double that of the previous year. Reasons for this are the increase in the numbers of persons employed, quite a percentage of whom operated hazardous machinery for the first time, the introduction of new machinery and the speeding-up process. Moreover, many of those reported were not lost-time accidents. In the new munitions factories employers are co-operating by erecting first aid buildings with trained officials and nurses available, so that there should be fewer lost-time accidents through infection. Industrial statistics during the last war indicate that both fatal and non-fatal accidents during the period of munitions production in Ontario were higher in proportion to the numbers employed than at present.

Adequate provision for sanitation proved a problem in older factory buildings where the number of employees has doubled or trebled. Additional facilities are being installed, but many plants will have to make greater efforts in order to meet the requirements of the Factory, Shop and Office Building Act.

New chemical processes are being introduced in the production of modern weapons of war, and unless controlled would lead to increased industrial diseases. The Industrial Hygiene Division of the Department of Health continued to give valuable aid in an effort to curb the hazard and our appreciation is again expressed to the officials for their assistance.

The need for night shifts for female help increased in factories engaged in the production of war materials. In ordinary domestic manufacturing the employment of women all night is prohibited. As explained in the annual report for 1940, a special committee within the Department of Labour was appointed by the Minister with authority to grant concessions for night shifts for female workers where it could be shown that the work was definitely for the prosecution of the war. The committee favours a three short-shift system wherever possible instead of two long shifts, but this can not always be arranged owing to shortage of labour for the purpose. Approval is not given for shifts in excess of ten hours. Many employers have made provision for two short rest periods during each shift, in addition to the one hour lunch period, and this system is to be commended.

The statistical record shows a large increase in the number of employed persons, both male and female, and the numbers will be further increased when the munitions plants at present under construction are put into service.

No cases of child labour were reported by the inspectors but numerous inquiries were received as to whether the employment of children would be conceded, and the answer was always in the negative.

The number of homeworkers in receipt of permits decreased slightly, no doubt due to the increased demand for factory help which has been the means of absorbing

married women who otherwise would have been doing homework to augment the family income. Overtime permits were also fewer in number, the necessity for these having diminished owing to continuous factory operations twenty-four hours per day on war work. During the fiscal year it was found necessary to institute proceedings against forty employers in different parts of the Province for violations of section 29 of the Factory, Shop and Office Building Act, which controls the hours of labour for women, of section 11, which requires employers to keep a register of all youths and females employed, and of section 69 covering the hours during which men may be employed in bakeshops. In thirty-nine cases convictions were recorded and one case was dismissed.

The Composite Inspection Staff, in addition to enforcing the Factory, Shop and Office Building Act, assists in the enforcement of other Acts within the jurisdiction of the Department of Labour, and the results of efforts in this respect are shown in the general report. Assistance is also given in the enforcement of the Adolescent School Attendance Act, and an inspection is made every year in each of the institutions controlled by the Provincial Secretary's Department for the purpose of having all machinery properly guarded for the safety of the inmates.

CAISSON WORK

Co-operation has been extended our inspector of caisson work by the construction industry, particularly by contractors on large projects. On the largest jobs under way, namely, the Niagara Gorge Bridge, the Grand River Conservation Dam and the Hydro-Electric Development at Madawaska, no serious accident occurred during the year under review. Difficulty still exists in obtaining full co-operation from smaller contractors and on small bridge work and sewer jobs, and continual visits are necessary to educate contractors to a recognition of the hazards from cave-ins and the necessity for proper precaution at all times.

Disregard of a known hazard by a small contractor was responsible for the death of two workmen by carbon dioxide gas while excavating in an old garbage dump and two firemen were overcome in the rescue attempt. Three men lost their lives on sewer construction projects in Toronto, London and St. Catharines respectively, when consistency of banks was underestimated and men were caught in the cave-ins. No accidents occurred on three tunnel contracts visited during the year. Unsafe practices in the storage of dynamite on a sewer job in a suburb of Toronto resulted in an explosion which killed one man and seriously injured several others.

The construction of numerous air fields and munition plants throughout Ontario necessitated extensive sewer and drainage work under rush orders. Frequent visits by our caisson inspector, together with continual education as to safe practices in order that no accident would deter our war effort were undoubtedly factors in the very few accidents on this work.

PLANS FOR BUILDINGS

The Examiner of Reports and Designs reports that 867 plans for new buildings and for additions and alterations to factories, shops and office buildings were approved during the fiscal year. The total estimated construction cost amounted to \$29,438,300, representing an increase of 138 per cent over the cost of \$12,330,270 for 484 buildings approved during the previous fiscal period.

The accompanying table shows the distribution of building projects among the varied industries or trades of this Province. The metals group accounted for 54.08 per cent of the total expansions and included the numerous factories for the production of weapons, armoured vehicles, shells, steel plate, etc., in addition to the many foundries and machine shops which supplement the foregoing to produce the necessary metal products for military as well as civilian needs.

CLASSIFICATION OF APPROVED BUILDING PLANS

Trade or Industry	Number of Plans	Value of Buildings	Percentage of Total Value
Bakeshops	4	34,000	.11
Chemicals	245	3,798,855	12.87
Clay, glass and stone	24	288,225	.98
Clothing	18	91,235	.31
Conveyances	27	2,372,200	8.06
Food	79	1,744,920	5.93
Garages	20	134,560	.45
Laundries and cleaners	13	67,600	.23
Leather	5	17,200	.06
Lumbering	6	53,500	.18
Metals	223	15,903,810	54.08
Offices	15	1,675,925	5.72
Paper trades	18	482,900	1.63
Printing and publishing	12	527,800	1.78
Rubber	14	369,650	1.25
Shops	1	25,000	.08
Textiles	35	672,275	2.28
Tobacco	38	509,840	1.72
Warehouses	30	304,550	1.03
Wholesale	8	130,500	.45
Woodworking	21	154,455	.53
Unclassified	11	79,300	.27
Totals	867	\$29,438,300	100.00

The chemical industry showed the second largest expansion, due mainly to new explosive manufacturing factories. With a single exception, the explosive plants are of a temporary type. However, good engineering design to obtain structural stability has been adhered to throughout. Many chemicals never before manufactured here have required particular study, and the Examiner of Plans visited a number of United States factories to obtain detailed information on health and safety hazards.

Our acceptance of welded structural steel, when designed and fabricated under clearly defined supervision, was acclaimed by the Canadian Institute of Steel Construction as being one of the most significant developments in 1940 for the steel industry. Two factories were erected using this type of construction.

We have adhered to our policy of approving windowless factories only when the processes require very high humidity or a complete absence of light. Approval was given to two factories of this type but was not given to any shops or offices.

In addition to 567 office interviews, the Examiner of Reports and Designs made 104 field inspections to facilitate approval of building plans and to make advisory reports on structural stability, exit facilities and other requirements of the Act.

Very complete first aid and physical examination facilities have been provided in all the new plants with the necessary equipment and floor space being based on the number of employees. If both sexes are employed, privacy has been made a consideration.

Engineering requirements of new buildings not erected in municipalities with a building by-law have been based on the recommendations of the National Building Code and Canadian Engineering Standards Association.

The total annual values of new approved projects for each of the past fifteen years are shown in the accompanying diagram.

ESTIMATED VALUE OF BUILDINGS FOR WHICH PLANS HAVE BEEN APPROVED DURING THE YEARS INDICATED.

The following is the distribution of the services rendered by the inspectors of the Composite Inspection Branch:

Factory Inspection Branch :

	1940	1941
First inspections	15,320	15,750
Second inspections	3,323	4,785
Visits re homeworkers	1,975	1,901
Visits re Exhibition	266	113
	20,884	22,549
Minimum Wage	2,134	2,470
Industrial Standards	1,554	1,106
Apprenticeship	4,684	2,881
Main Office	378	325
Steam Boiler	1,734	2,236
Operating Engineers	390	400
	10,874	9,416
Totals	31,758	31,965

In addition there were investigations of accidents and the usual visits, office calls and conferences incidental to inspection.

Employees in the above industries, mercantile establishments and office buildings numbered 424,356, classified as follows;—

Fiscal years	Males over 16	Males 14-16	Females 14-18	Females over 18	Totals	Children under 14 dismissed
1940	241,500	6	104,203	335	346,044	0
1941	300,735	15	123,462	144	424,356	0

HOURS OF LABOUR

Male Workers					Female Workers				
45	50	54	58	60	45	50	54	58	60
105,222	83,058	23,873	14,654	33,864	47,067	40,121	11,044	6,096	9,666

Also 49,691 employees, male and female, were working approximately 50 hours per week.

The number of orders issued relating to various requirements of the Factory, Shop and Office Building Act totalled 6,229 as compared with 7,054 in 1940.

PERMITS

Applications for permits numbered 4,398 and were issued as follows :—

	Sections of Act	1940	1941
Double Shift	31	236	189
Overtime	30	2,406	2,005
Bakeshop	69	70	69
Fruit Camps	36	27	27
Homework : Workers	49	1,975	1,901
Employers	49	168	207
Totals		4,882	4,398

COMPLAINTS

One hundred and ninety-nine complaints were received during the fiscal year. Upon investigation 118 were upheld, 78 were not upheld and 3 were not under the jurisdiction of this Branch. Some investigations covered more than one complaint. Subjects of complaints were as follows :—

	1940	1941
Long hours	46	67
Working without permit	8	20
Working without double shift permit	—	1
Working without homework permit	—	1
Ventilation	1	3
Fire exits	7	5
Fumes	1	7
Long hours for bakers	—	9
Elevators	3	7
Toilet accommodation	5	13
Child labour	—	5
Dust	3	7
Half hour lunch period	—	1
Sanitation	5	2
Heat	6	17
Vibration from machinery	—	1
Wages	—	5
Guarding of machinery	3	—
Noise of machinery	5	5
Miscellaneous	20	19
Sunday work	3	—
Use of benzol	—	1
Light	—	1
Gasoline hazards	1	—
Spray booth	1	2
Totals	118	199

VIOLATIONS

Violations of the Acts in the enforcement of which the inspectors have a responsibility were reported as follows :—

	1940	1941
Minimum Wage Act	1,334	858
Operating Engineers Act	6	37
Adolescent School Attendance Act	3	62
Steam Boiler Act	1	3
Totals	1,344	960

PROSECUTIONS

Under the Factory, Shop and Office Building Act proceedings were taken against 40 firms. Convictions were recorded in 39 cases and one case was dismissed, as follows:—

Re employment of females after 12 o'clock midnight	Section 29—37 convictions 1 case dismissed
Re keeping of register	Section 11—1 conviction
Re hours of bakers	Section 69—1 conviction

ACCIDENTS

During the year 6,365 accidents were reported to the Factory Inspection Branch as compared with 3,481 reported in 1940, and 55 were fatal as compared with 22 the previous year. Fatalities were due to:—

Belts, pulleys and shafting	1
Burns and scalds	12
Cranes and derricks	2
Dies	1
Electricity	2
Elevators	5
Explosions	5
Falls	5
Falling substances	5
Fumes	2
Heat prostration	1
Industrial diseases	2
Jammed between two articles	3
Miscellaneous causes	4
Planer	1
Press	1
Trucking	3
Total	55

BOARD OF EXAMINERS OF OPERATING ENGINEERS

CHAIRMAN : JOHN SHARP

MEMBERS OF THE BOARD : W. J. SCOTT, S. G. ROSE

In accordance with section 2, paragraph 3, of the Operating Engineers Act, the Board presents the thirty-second annual report for the fiscal year ending March 31, 1941.

The Board reports a very satisfactory year, as shown in the revenue statement attached hereto. The net revenue of \$28,225.91 was an increase of ten per cent above the previous year. The number of examinations conducted by the Board was 1,897, an increase of ten per cent and indicates a steady and natural development in the engineering profession due to expanding industrial activities. Eighty-four applications for examinations were refused, because of insufficient operating experience as required by the regulations.

The percentage of candidates who wrote examinations and failed to obtain the required marks to pass shows an increase of seven per cent over the previous year. This increase is attributable to insufficient study and preparation on the part of the candidates, as no changes were made in the standard of examinations.

The revenue derived from the sale of engineering text books issued by the Department shows a steady increase, indicating that the books have a definite educational value both for the beginner and the advanced operating engineer.

While no contemplated changes in the Act or regulations have been approved, several resolutions have been presented to the Board by engineering groups for discussion. The resolutions propose changes which would increase the scope of the Act by including equipment now exempted.

The Board has reviewed and adjusted satisfactorily 447 cases of infractions of the Act during the year, and carried over 65 cases in the process of adjustment.

In conclusion, the Board wishes to express appreciation of, and to acknowledge with thanks the assistance and support given this Branch by engineering groups, individual engineers and plant owners, and by the Composite Inspection Branch of the Department of Labour in the successful administration of the Operating Engineers Act.

REPORT OF REVENUE FOR FISCAL YEAR 1941

BOILER INSPECTION BRANCH

CHIEF INSPECTOR, DEPARTMENT OF LABOUR—J. R. PRAIN

EXAMINER OF REPORTS AND DESIGNS—J. N. BRIGGS

A survey of the work performed by the Boiler Inspection Branch for the fiscal year 1941 indicates the most interesting and progressive development in the history of the Branch. The broader scope of operations necessitated the appointment of additional inspectors and the establishment of new outside inspection centres. At present sixteen inspectors reporting direct to the Boiler Inspection Branch are operating from eight centres throughout the Province in addition to headquarters at Toronto. These inspectors are authorized for the purpose of enforcing the Steam Boiler Act and section 56 of the Factory, Shop and Office Building Act.

The Order-in-Council approved in December 1938, which assigned to this Branch the responsibility of inspecting uninsured boilers and pressure vessels, has had the desired effect of bringing such inspections under competent authority, and thus providing a greater measure of safety. Inspections are now being made by qualified inspectors and their reports are scrutinized by responsible officials assigned for this purpose. Decisions relative to pressure, installation, operation and repairs are arrived at in accordance with regulations provided for pursuant to the Steam Boiler Act.

Twenty-seven months of operation under this new system of annual inspections, from January 1939 to March 1941 inclusive, resulted in 9,842 such inspections, from which a total revenue of \$26,358.70 was derived. The above total of inspections does not include the 292 vessels condemned or the vast number of boilers and pressure vessels classified under extensive repairs or change of ownership and location. Conditions such as these, found during the process of annual inspections, automatically bring the vessels within the jurisdiction of the Steam Boiler Act, and they are entered in the records of work performed under this Act.

One effect of wartime conditions has been an incessant demand upon the inspectors to cope with the increasing volume of new construction in manufacturers' shops and in the field. The number of inspections of new pressure vessels during the year showed an increase of 103 per cent as compared with 1940, and the number of surveys of designs and plans of power plant installations an increase of 42 per cent. Compared with previous years there was a noticeable increase in installations of boilers of the water tube type operating at moderate pressures, and of unfired pressure vessels, due to their comparative high operating pressures, which range from 4,000 to 5,000 pounds per square inch. Practically all these installations were in plants engaged on munitions.

The Code of the Canadian Engineering Standards Association, which was approved for Ontario by Order-in-Council dated January 1940, has been officially adopted in all provinces with the exception of British Columbia, which has not yet signified its intention, and the Maritime Provinces, which have no boiler laws. These regulations have been received favourably by manufacturers generally, as they provide adequate measures for designing and constructing pressure equipment in keeping with present day trends, particularly in regard to welding.

A prominent place of importance is given in the Code to the subject of welding in the fabrication of boilers, pressure vessels and high pressure pipe installations. The Code outlines the fundamentals of good welding technique and procedures for qualification tests of welding processes and welding operators every six months. Any changes in the process, such as welding rods, machines, base metals and procedures, call for requalification. Once the process has been established, the same procedure is followed in qualifying the welding operator.

According to the Code requirements, the manufacturer is held responsible for the quality of the welds turned out by his organization and for any financial loss that might be incurred through the failure of defective welds. It is considered undesirable to place the responsibility upon the operator as he, through no fault of his own, might be compelled to disregard certain factors so essential in the production of good welds. For this reason certificates have not been issued to welders, although the question has been under consideration of the various Boiler Code Committees for the past several years. The fact of a welder being qualified for one manufacturer does not mean that he is qualified for another, in view of a possible change in the process in the new place of employment, which would warrant a requalification test. Examinations of welding processes and operators are usually conducted in the manufacturers' shops or in the field where the vessels are being erected. The full time of the inspectors assigned to such work is necessary in order to carry out these qualifying tests successfully.

It is pleasing to report that most manufacturers adhere strictly to the rules of the Code. Unfortunately, however, there are a few who attempt to evade the principles necessary for the production of sound and ductile welds, and inspectors have found it necessary to condemn newly constructed boilers and pressure vessels in which defects have been discovered in welded joints, as well as in vessels undergoing repairs by welding, and in high pressure steam pipe installations. The fact cannot be stressed too strongly that defects existing in welded joints of pressure vessels are definitely explosion hazards. This condition emphasizes the importance of strict surveillance by competent inspectors. Recent cases brought under review, in which defective welds were involved, verify the fact that competent inspection service is absolutely essential to safety.

The decided increase in the activities of the Boiler Inspection Branch during the fiscal year 1941 resulted in an increase of 62 per cent in the revenue of the Branch as compared with 1940, and an increase of 135 per cent as compared with 1939. The sum of \$43,447.57 was transferred to the Treasurer of Ontario, which amount is an all-time high. A comparison between the two fiscal years, 1940 and 1941, is shown by the following figures, as well as a summary of the work of the Branch during the fiscal year 1941.

COMPARISON BETWEEN THE FISCAL YEARS 1940 AND 1941

	Fiscal Year 1940		Fiscal Year 1941	
	Number	Revenue derived	Number	Revenue derived
Designs surveyed	395	\$3,120.50	561	\$ 3,468.00
New pressure vessels inspected	888	4,440.00	1,804	10,966.00

OA—Annual inspections (Factory, Shop and Office Building Act)		4,367
Total		8,140

Total amount of monies transmitted to the Treasurer of Ontario \$43,447.57.

MEDIATION, CONCILIATION AND ARBITRATION**CHIEF CONCILIATION OFFICER : LOUIS FINE**

It has become increasingly important that prompt service should be rendered in avoiding and settling industrial disputes in order to ensure continuity of production of war materials.

With the exception of those dealt with pursuant to the Industrial Disputes Investigation Act, the Department of Labour of Ontario was in contact with practically all industrial issues in the Province at the request of both employers and employees. This growing tendency on the part of both parties to make use of the mediation and arbitration services rendered by this Department before difficulties develop has been an important factor in the prompt settlement of disputes by conciliation or by reference of specific issues for arbitration. In many cases the maintenance of production was thus ensured.

Several strikes in the dairy industry in some of the larger cities of the Province were averted when matters of dispute were referred to the conciliation officer, thus avoiding a tie-up in the distribution of this essential commodity in most instances. A general strike in the fruit and produce industry was averted when the parties were assisted in arriving at an understanding and completing a working agreement. A large chain grocerteria and several bakeries were other industries in the service and trade division in which assistance was rendered in bringing about agreements between employers and employees. A similar service was rendered in several hat plants and in various shoe centres in which the possibility of strikes was removed when agreements were drawn up.

A number of plants in Toronto faced the possibility of a general shut-down when they were unable to reach an understanding with their engineers. While there were only a few employed in each plant, there was a likelihood that some essential war industries would be tied-up by their walkout. Our officers were able to avoid a strike by bringing the parties together and completing an agreement.

The conciliation officers have acted as arbitrators in many industries, and by disposing of matters of dispute in this manner have prevented stoppages of work and assured employers and the thousands of employees concerned of continuity of operations. In connection with one arbitration case the conciliation officers were required to visit several American plants for the purpose of comparing methods of production. As a result a decision was rendered which proved highly satisfactory to the company and the employees involved.

In several instances employees were given the opportunity of voting freely on many complicated questions. These votes were supervised by our officers and in all cases strikes were prevented by this procedure.

The mediation and arbitration service has prevented numerous strikes in the automobile and associated industries, in the textile and clothing industry and in wooden box factories which are engaged in essential war work, as well as in a large transport company engaged in conveying war supplies. In bringing about quick settlements the Department assisted in avoiding the establishment of costly boards and the unrest which occurs when disputes are not disposed of promptly.

DOMINION-PROVINCIAL TRAINING PROGRAMME**YOUTH TRAINING PROGRAMME**

Under the Dominion-Provincial Youth Training Programme 4,097 persons received training in various trades during the fiscal year, of whom 1,899 were placed in civilian employment, 877 enlisted in the Royal Canadian Air Force and 1,139 were still in training at the end of the year. In addition 75 men were given refresher courses, and 59 of them were placed in employment in industry.

The chief courses provided were aircraft mechanics with 1,543 trainees, welding 330, machine shop practice 308 and home service training 462. At the end of the year three of the four Home Service Training Schools at Preston, Windsor and Ottawa were closed and the Toronto School was closed a month later. The numbers of trainees in all these courses were higher than the previous year, especially in aircraft mechanics, where the increase was 1,337.

Early in the fiscal year a request was received from the Department of National Defence that the classes at the Aircraft Training School, Galt, be enlarged from 200 to 300 trainees. The city of Galt had already offered the use of an eight-roomed school for training purposes, so that it was possible to accommodate the hundred extra students and have them in training within one week.

As soon as the class of 300 commenced training, a second request was received, this time for an increase to 600 students. Since this training is of such great value to our national war effort, approval of this expansion was granted immediately and within twenty-four hours arrangements had been completed for the leasing of additional space and the purchase of the necessary equipment, and the 300 additional applicants for training had been notified to report at the school.

The results of this training have been most gratifying, as approximately 96 per cent of the boys were successful in passing their standard trade tests for enlistment in the Royal Canadian Air Force.

FARM SERVICE

Under the farm service project 999 trainees were placed on farms during the fiscal year, which number is two and one-half times the number placed the previous year, and 269 of those placed the previous year were still in training at the beginning of this year. The trainees were placed on year-round bases after one month's probation period with farmers who had undertaken to teach them farming, and they are considered to be in training for the first year on the farm. In addition, approximately 1,300 young men were placed on farms for the summer months indirectly through our summer campaign. A short course in agriculture was attended by 56 trainees, and three or four young men placed on farms a year ago are now enrolled in the regular courses at the Ontario Agricultural College.

WAR EMERGENCY TRAINING PROGRAMME

During the first year of the war it became apparent that a shortage of skilled and semi-skilled help was imminent and that measures would have to be undertaken to alleviate the situation. Classes conducted under the Dominion-Provincial Youth Training Act had demonstrated effectively the value of the short intensive course in the training of young men for work in industry, and, therefore, in the summer of 1940 it was decided to widen the scope of the original Act to allow such classes to be conducted in the vocational schools. Order-in-council P. C. 4506 was passed, invoking the War Measures Act to overcome certain restrictions in the Youth Training Act and agreements thereunder. Funds were made available and special schedules were appended to all Youth Training Agreements to change the age limit from 18 to 30 to 16 to 60 and to revise the percentage of the Dominion contribution. It was stipulated that when training was given to a man over 30, it should be in the nature of a refresher course. Training was to be given 44 hours per week for a period of from 400 to 500 hours.

During July and August of 1940 these classes were carried on in most of the vocational schools in Ontario and at the Aircraft Training School at Galt. Mention should be made of the fact that the local authorities made available the facilities of the schools without charge. Instruction was given in the following subjects;—machine shop practice, bench fitting, aircraft manufacturing, sheet metal work, welding (arc and acetylene), woodworking, motor mechanics, electricity and power sewing machine operating (to women). A small percentage of time was devoted to related work, such as blue-print reading and shop mechanics. For the most part trainees were selected from the locality immediately surrounding the school, and comparatively little was spent on subsistence allowances at that time.

In September arrangements were made to carry on this type of training in centres where there was a demand for skilled or semi-skilled workers. The hours of instruction were from 3.30 or 4 p.m. until midnight and frequently a second shift was added from midnight until 8 in the morning. Conditions were changing and to compensate the trainees for their loss of time while taking a course of instruction, living allowances were paid at the rate of \$7.00 per week for students boarding away from home and up to \$3.00 per week for students living at home.

Towards the end of the year many classes of army tradesmen were placed in the schools for instruction in the various trades pertaining to the army.

As a result of the report of a special Dominion Inter-Departmental Committee on Labour Co-Ordination which was issued on December 28, 1940, it was decided to expand the War Emergency Training Programme. Additional funds were made available and certain changes made in the schedule of the Youth Training Agreements. Thereafter, all things being equal, preference in the selection of trainees was to be as follows;—

- (a) Veterans of the 1914-18 war and those discharged from active service of His Majesty's Armed Forces engaged in the present war;
- (b) Men over 40 years of age;
- (c) Women and other men over 16 years of age.

Weekly allowances were increased, as follows;—

- (a) To heads of families \$12.00;
- (b) To unmarried trainees living away from home \$7.00, except in those cases where board and lodging could not be obtained at that rate, when up to a maximum of \$9.00 might be paid;

- (c) Single trainees living at home not to receive any allowances, except;
1. Where they had given up employment to attend a class, or
 2. Where there was financial need, in such cases the maximum weekly allowance to be \$3.00.

The standard length of courses was set at twelve weeks but certain variations were allowed for special courses. Travelling expenses of trainees to the school and return to their homes or to employment were chargeable to the Programme. A certificate was to be issued to each trainee who completed his course satisfactorily. New courses were authorized in industrial chemistry, radio mechanics, tool room improvers and fine instrument repair.

For Ontario an Inter-Departmental Committee was set up to direct the Programme in this Province. The Committee consisted of the Hon. N. O. Hipel, Minister of Labour, Chairman; Hon. Duncan McArthur, Minister of Education; Dr. G. F. Rogers, Deputy Minister of Education; Mr. J. F. Marsh, Deputy Minister of Labour; Mr. F. S. Rutherford, Director of Vocational Education. A Regional Director to administer the Programme and the necessary office staff and field representatives were appointed.

During the fiscal year 18,395 students received training in the following cities;—Belleville, Brantford, Chatham, Cornwall, Fort William, Galt, Hamilton, Kingston, Kirkand Lake, Kitchener, London, Niagara Falls, North Bay, Oshawa, Ottawa, Owen Sound, Peterborough, Port Arthur, Sarnia, St. Catharines, St. Thomas, Toronto, Welling, Windsor, Weston and Woodstock. While a number of unsponsored classes were maintained to take care of the requirements of the small industries, every effort was made to enlist the co-operation of the large firms in designing courses of study for groups of trainees on the understanding that, when such students had completed their course satisfactorily, they would be absorbed directly into the plant concerned. At all times close contact was maintained between the training centre and industry. Through the joint co-operative efforts of the officials of the school, the field representatives and the Employment Service of Canada, the labour requirements of industry were ascertained and the need supplied wherever possible.

WAR EMERGENCY TRAINING PROGRAMME : FISCAL YEAR 1941

INDUSTRIAL CLASSES

Number of students who completed their training and were placed in employment	8,984
Number of students who completed their training and enlisted	118
Number of students who did not complete their training	2,490
Number of students who completed their training but did not report themselves placed	1,986
Number of students in training at end of fiscal year	4,817
Total number of students enrolled during year	18,395

ARMY CLASSES

Number in training at end of fiscal year	1,159

INDUSTRY AND LABOUR BOARD

E. J. YOUNG—CHAIRMAN

MARY F. MANGAN—VICE-CHAIRMAN J. C. ADAMS—SECRETARY

The Industry and Labour Board administers the Industrial Standards Act, the Apprenticeship Act, the Minimum Wage Act and any other Act that may be assigned to it by the Lieutenant-Governor in Council.

INDUSTRIAL STANDARDS BRANCH

Under the Industrial Standards Act thirteen conferences were held during the fiscal year. Twelve of these conferences resulted in schedules, all of which were approved and are now in effect. Six of these were new schedules and the other six were renewals.

During the year one schedule, Toronto Painting, was revoked, and two schedules, Toronto Jewellery and Timmins-Cochrane Logging, expired and were not renewed.

The following schedules were in effect at the end of the fiscal year, March 31, 1941 : total 100:—

(a) Schedules covering local zones

Barbering	59
Bricklaying and stonemasonry	1
Bricklaying, stonemasonry and plastering	1
Building industry	1
Carpentry	11
Common labourers	2
Electrical repair and construction	4
Painting and decorating	3
Plastering	2
Plumbing and heating	5
Logging	1
Baking	1
Coal	1
Coal hoisting	1
Taxicab	1
Soft furniture	1
Gasoline service	1

(b) Schedules covering entire Province

Brewing	1
Ladies' cloak and suit	1
Hard furniture	1
Men's and boys' clothing	1
Total	100

ARREARS OF WAGES—FISCAL YEAR 1941

	Number of employers affected	Number of employees affected	Amount of arrears
Arrears of wages collected through Trust Account	120	468	\$7,997.21
Arrears of wages paid direct to employees after investigation by the Industrial Standards Branch	11	78	\$1,396.82
Totals	131	546	\$9,394.03

NOTE—Included in the total of \$7,997.21 collected through Trust Account is the sum of \$556.25 which, with the approval of the Industry and Labour Board, was diverted to the Crown.

COURT PROCEEDINGS—FISCAL YEAR 1941

APPRENTICESHIP BRANCH

DIRECTOR OF APPRENTICESHIP—FRED J. HAWES

DISTRICT INSPECTORS

J. R. JOHNSON, OTTAWA; WALTER THORNE, TORONTO

Canada's war effort has had a marked effect upon the apprenticeship system of Ontario during the past two years. The enlistment of youths between the ages of 19 and 21 years has doubtless been a factor in the decrease in the numbers undertaking contracts of apprenticeship, since the same types of young men are required for apprenticeship training as for military training. Moreover, 155 apprentices from all of the designated trades have enlisted and are serving in all three branches of the Service. Their contracts are being held in abeyance until their return to civilian life. In addition, 441 holders of certificates of qualification in the motor vehicle repair trade and 70 in the barbering and hairdressing trades are now on active service, and their certificates are being kept in good standing without charge. As certificates of qualification are not issued in the building industry, we have no record of the enlistment of journeymen in these trades.

The apprenticeship system has made a valuable contribution to Canada's war effort, as those who have completed their training under the system are able on enlistment to render greater service to the country. Certificates of the Apprenticeship Branch are being recognized by the military authorities and holders of these certificates frequently qualify more rapidly for promotion in certain branches of the Service, or they receive higher rates of pay because of their skill.

There was a decrease in the number of apprentices registering during the year. Intense activity in the production of armaments and all war supplies has opened up so many opportunities for youths leaving school that comparatively few are anxious to become apprentices in the motor vehicle repair trade, and there is difficulty in finding acceptable candidates for all the openings. Then too, because of the high standard of work of apprentices in this trade, they have been in demand for munitions and other factory work, for which higher wages are paid, with the result that there have been more cancellations of contracts of apprenticeship during the past two years than under ordinary circumstances. In the barbering and hairdressing trades also there has been a decrease in the numbers of apprentices, because of greater inducements in other lines of work.

The value of the apprenticeship system has been recognized by employers in trades that do not come within the scope of the Apprenticeship Act. There is a great demand for mechanics and employers are finding it necessary to train their young employees in order to keep up the supply of skilled workers for their own needs. Many such employers have made enquiries during the year concerning apprenticeship, and this Branch has assisted them to enter contracts of apprenticeship outside the indented trades.

The regular work of the Apprenticeship Branch was carried on as usual. Wherever possible arrangements were made for evening classes for apprentices during the fall and winter months in technical and vocational schools. Some technical schools charge tuition fees to non-resident students attending these classes. In the case of the building trades these fees are taken care of by the Department of Education and the assessment fund of the Apprenticeship Branch. First and second year apprentices in carpentry and bricklaying, who wished to do so, were permitted to attend the full-time classes in these trades conducted under the Dominion-Provincial Youth Training Programme.

Due to the efforts of this Branch, hairdressing schools have been brought to a greater degree of efficiency and larger numbers of students coming from these schools are acceptable as competent operators without being required to take further instruction in the capacity of apprentices.

During the year special duties were assigned to members of this Branch, who were called upon to assist in promoting the War Emergency Training Programme. This extra work was undertaken gladly, as the opportunity for making this contribution to our great war effort was appreciated. Considerable outside work of a special nature was undertaken by the Director in addition to the work carried on by the two inspectors attached to the Branch. Inspections made for the Apprenticeship Branch by members of the Composite Inspection Service numbered 2,881 during the year.

The assessment account of the Apprenticeship Branch showed a balance of \$12,340.81 at the close of the fiscal year, or an increase of \$487.86 as compared with 1940. The disbursements from the fund amounted to \$95.00. This money was paid to cover the tuition fees of apprentices in the building trades who have attended night classes in their respective trades. Half of the amount is recoverable from the Department of Education, which shares equally with the assessment fund the cost of these student fees.

MINIMUM WAGE BRANCH

A. W. CRAWFORD.—CHIEF ENFORCEMENT OFFICER

The work of the Minimum Wage Branch during the fiscal year ending March 31, 1941, covered practically the same ground as that of the previous year. The effect of the war on employment and industrial activity has been much in evidence in certain cases. As noted in last year's report, increasing numbers of beginners, usually girls under eighteen years of age, are being employed, and more girls and women are entering the metal trades as factory operators.

WAGE RETURNS

Analysis of the wage returns received during the fiscal year indicates that, where any change appears, it is towards the firming of wage rates. In some of the classifications there appears to be little, if any, change and in others there is a trend towards a higher average hourly rate.

Wage returns covering periods of one to four weeks were received from 16,967 employers, as compared with 14,954 for the previous year. This increase is due to several causes and does not necessarily mean that a large number of new employer have entered the field. In collecting wage returns we do not always request returns from all employers every year but alternate in certain sub-categories and make checks or surveys in alternate years. Moreover, certain employers are dropped from our mailing returns when it is found that they employ no female employees, and during periods of increased activity they are added to the list and, if found to be employing females, they will then be added to and included in our current records.

The increased commercial and industrial activity has increased markedly the total number of employees reported, namely, 535,906, as compared with 432,892 for the previous year. The number of female employees reported was 151,278, as compared with the total of 129,111 reported for 1940.

Approximately 36 per cent of the firms reporting are located in the city of Toronto, and employ about 44 per cent of the total of female employees reported; approximately 21 per cent are located in the four cities of Hamilton, Ottawa, London and Windsor, and employ approximately 18 per cent of the total of female employees reported; about 31 per cent are located in towns and cities in the population group of 4,000 and 5,000 to 50,000, and employ approximately 26 per cent of the total of female employees reported. In the remaining parts of the Province, namely, the small communities and rural districts, places under 4,000 or 5,000 population, are located about 12 per cent of the employers. These employ approximately 12 per cent of the female employees reported.

For the purpose of analysis and checking, employers are divided into some 35 groups, and for further consolidation these are placed in the 21 classifications, as given in the tables appended to this report.

WAGE ADJUSTMENTS

As returns submitted by employers are received, they are checked and any minor cases of underpayments and non-compliance with the law revealed in these returns are handled by correspondence. In this manner increases in wage rates were ordered for 1,504 employees in 869 establishments during the year, as compared with 1,674 employees in 929 establishments during the previous year.

COMPLAINTS

The number of complaints received during the year totalled 312, as compared with 392 in 1940, and 462 in 1939.

Employees are often reluctant to lodge complaints because of fear of dismissal. Some employers discriminate against girls who complain, but generally do so in a manner which makes it very difficult, if not impossible, to prove.

With improved employment conditions employees seem less fearful of losing their jobs and in many cases no doubt they are demanding the minimum wage to which they are entitled under the law, and are securing it without laying a complaint. This explains to some extent the reduction in the number of complaints.

ARREARS OF WAGES

As a result of complaints and repeated violations revealed in the wage sheet returns, arrears of wages were collected from 372 employers on behalf of 738 employees in the total amount of \$15,332.19. This is somewhat higher than during the previous year, when \$12,946.17 was collected from 337 employers for 463 employees.

PROSECUTIONS

Court action was taken against 17 employers in connection with 22 separate violations of the Act, as compared with 35 charges against 18 employers in the previous year. Informations were laid against six employers in Toronto, three in Windsor, two in Ottawa and one each in Barrie, Hamilton, Kitchener, Merrickville, Oshawa and Timmins. Five charges were withdrawn after the cases came to Court but in each instance arrears were paid or action taken by the employers to meet the requirements of the law. Only one charge was dismissed by the Court.

SUMMARY OF COURT CASES

April 1, 1940, to March 31, 1941

Nature of Charges Laid	Disposition of Charges
1—Violation of Order No. 6; Retail Stores.	16—Convictions.
1—Violation of Order No. 17; Needle Trades.	5—Withdrawals (Arrears paid and records adjusted).
4—Violations of Order No. 25; Office Workers.	1—Dismissal.
4—Violations of Order No. 27; Hotels and Restaurants.	
2—Violations of Order No. 35; Factory Workers.	
6—Violations of Section 12; Minimum Wage Act.	
3—Failure to keep records.	
1—Failure to submit information.	
22	22
Totals	
Number of charges laid	22
Number of employers	17
Number of employees affected	37
Amount of arrears paid	\$1,403.81
Amount of fines collected	\$ 730.00

During the fiscal year no employer entered an appeal against any conviction under the Act.

PERMITS

Under certain circumstances permits are issued to employers authorizing the employment of learners or beginners at less than the rate prescribed in the Minimum Wage Orders. At the end of the fiscal year there were 207 such permits outstanding, affecting 37 male and 170 female employees, as compared with a total of 97 at the end of the previous year.

This increase in the number of permits issued is due almost entirely to concessions granted in a certain town where the only industry had folded up and left the people with no prospect of employment. In an effort to induce other employers to locate in the town, the town council requested that permits be issued for the employment of learners at rates lower than those required by the Minimum Wage Orders. Such permits are for short periods only and, as conditions improve in the town, will be discontinued.

Permits authorizing a rate lower than the prescribed minimum were issued for handicapped workers to a total number of 178 outstanding at the end of the fiscal year, as compared with 181 in effect at the end of the previous year. Permits for handicapped workers are issued largely to those who are more or less permanently handicapped. A total of 52 such permits were issued to new applicants and 55 permits were cancelled or expired and were not renewed, as application for renewals was not made.

PERMITS

	Number of Employers	Number of Employees	Learners		Handicapped	
			Male	Female	Male	Female
Permits in force at beginning of fiscal year.....	121	278	26	71	52	129
Permits issued during fiscal year	40	439	39	348	6	46
Permits expired or cancelled during fiscal year	42	332	28	249	14	41
Permits in force at end of fiscal year	119	385	37	170	44	134

HOMEWORK

There is little change in the rates approved for payment to homeworkers under permit. In practically all cases, with the exception of two general classifications, no rates were approved during the year below the minima prescribed in the Minimum Wage Orders, and it is expected that these two classifications will be brought up to the level of the rates in the Orders before the end of the year. Rates were approved in the case of 60 new employers and 54 employers discontinued giving out homework during the year. Firms employing homeworkers at the close of the year numbered 173, as compared with 167 at the close of 1940.

HOMEWORK PERMITS FOR EMPLOYERS APRIL 1, 1940, TO MARCH 31, 1941

Permits in force at beginning of fiscal year	167
Permits issued during fiscal year	60
Permits expired or cancelled during fiscal year	54
Permits in force at end of fiscal year	173

REPORT

OF THE

Minister of Education

FOR THE YEAR 1941

TO THE HONOURABLE ALBERT MATTHEWS, LL.D.,
Lieutenant-Governor of the Province of Ontario.

YOUR HONOUR,—

I beg leave to present to your Honour the Report of the Department of Education for the year 1941.

In presenting a report of the activities of the Department of Education during the year 1941, it may not be inappropriate to direct special attention to the results of the impact on the educational system of the Province of conditions growing out of the prosecution of the war. These influences are many and may be expected to operate with intensified force as the war progresses.

Reference may be made incidentally to the transfer to the Department of National Defence of two groups of buildings long associated with the history of education in this Province. Since July, 1941, the Toronto Normal-Model School has been used as an R.C.A.F. training station and the buildings and grounds of the Ontario School for the Deaf, immediately to the west of the City of Belleville, have been employed by the R.C.A.F. for the purposes of No. 5 Initial Training School. The closing of the Model School involved a break with a long and honourable tradition and naturally brought keen regrets to the hearts of many hundreds of its former students. Through the co-operation of the Board of Education of the City of Toronto, satisfactory accommodation was found for the Normal School in the Earl Kitchener Public School on Pape Avenue, in the eastern section of the City of Toronto. More serious difficulties were encountered in providing a new home for the School for the Deaf. Ultimately, buildings were obtained in the City of Belleville, including the Parish Hall of St. Thomas' Anglican Church, which have provided classrooms, dormitories and dining-rooms. Changes of this nature cannot be made, however, without a serious disturbance in the work of the School. To adjust the work of the School to its limited accommodation, it has been found necessary to limit admission to the classes at Belleville to pupils under sixteen years of age and to open day classes in the Cities of Toronto, Hamilton, London and Windsor. Pupils between five and sixteen are admitted to these classes and, in Toronto, Hamilton and London, pupils also between sixteen and twenty-one.

As might be expected, one of the immediate effects of the war was a decline in attendance at our schools. While both Elementary and Secondary Schools reflect this trend, it was more pronounced in the Secondary Schools, where the influence of war conditions was more effective. The decline in attendance in Public and Separate Schools was 9,409; while that in all types of Secondary

Schools, including Night Classes in Vocational Schools, was 14,510. This can be attributed in part to enlistments in the armed forces, but, in the main, to the new opportunities for profitable employment offered to senior boys and girls by various industries associated with the Nation's war effort.

The age up to which attendance at school is compulsory in this Province has been fixed by law at sixteen years. This requirement is subject to the condition that, in times of urgent need, a local Attendance Officer may issue a certificate permitting a pupil to leave school before attaining the age of sixteen. From time to time, representations have been made requesting the reduction of the age of compulsory attendance from sixteen to fifteen, or even fourteen years. That such a reduction is not necessary, if the present law is administered with a sympathetic understanding of local conditions, was demonstrated this year. The number of Employment Certificates issued by Attendance Officers increased from 1,907 in the year 1938 to 4,871 in 1940, thus demonstrating the adaptability of the present law to changing conditions.

A somewhat kindred movement in the attendance at the Provincial Normal Schools has been manifest. The total attendance declined from 1,247 in the session 1939-40 to 1,131 in 1940-41 and to 1,112 in 1941-42. It will thus be seen that this movement began before the outbreak of the war and cannot be attributed entirely to conditions produced by the war. That it will be aggravated by the war, is a certainty, both because of enlistments in the armed forces and because of the attraction of the higher salaries which will be paid both to men and women in the various enterprises associated with war production. There are limits beyond which the Department will not be justified in going in lowering the standards required for admission to the teaching profession. There must be such an increase in teachers' salaries throughout the Province as will enable the teacher to maintain that measure of freedom and independence essential to the performance of the duties expected of the teaching profession.

It is encouraging to observe that there is a very definite trend in the direction of the payment of higher salaries to teachers. In the year 1940-41, there was an increase in the average salary paid to all male Public School teachers of \$48, to male assistants of \$70 and to women teachers of \$32, as compared with the year 1938-39. The average salary of male teachers in rural Public Schools increased \$93 and that of women teachers \$63 over the average paid in 1940-41. The predominating rural salary rose from \$700 in 1940-41 to \$800 in 1941-42.

The amount paid by the Province in the form of general legislative grants to public and Separate Schools in 1941, namely, \$4,706,554.84, was the largest sum apportioned to these schools in any one year in the history of the Province. The regulations, approved by Order-in-Council, which contain the conditions determining the amount of the grant payable to each school, take into account the need of the local community for assistance, as determined by the assessment per pupil of average attendance, and by the ratio of teachers' salaries to the equalized assessment. In rural schools and in villages and towns under 2,000 population, the legislative grant is \$4.25 per pupil, where the assessment is between \$2,500 and \$3,000 per pupil, \$4.75 where it is between \$2,000 and \$2,500, and the maximum of \$5 per pupil where it is under \$2,000. The reports for the year 1941 show that 978 schools throughout the Province were entitled to the maximum grant of \$5 per pupil. Of these, 54 were in urban centres.

The grant based on teachers' salaries indicates, likewise, the extent of the aid being given to poor school sections. In 602 rural school sections, the teacher's

salary represented 40 mills or more of the equalized assessment. In these sections, the legislative grant included an amount which was the equivalent of from 60 per cent to 77 per cent of the salary paid to the school teacher.

The movement in the direction of forming larger school areas has continued throughout the period of the war. In 1941, the number was increased by 31, with the result that at the end of that year there were in all 130 township school areas replacing 666 small school sections.

It is possible that the scarcity of teachers may have encouraged certain school boards, in cases where the attendance was small, to close their schools temporarily and arrange for the instruction of their pupils in neighbouring schools. Where the attendance has been very small, this has been found to be not only economical but sound educational procedure. Should a change in conditions in a school section warrant the re-opening of the school, no objection can be taken to such re-opening. During the year 1941, 78 schools were closed temporarily, while one was re-opened.

The records of the medical examination of young men applying for admission to the armed forces suggest that advantage is not being taken of the powers enjoyed by local school and health authorities to provide a medical inspection service in the schools. Authority has now been granted to county councils to engage public health nurses, who may maintain a school health service at the expense of the county. There would seem to be a need for the further education of the public in the advantages of such services and, possibly, a larger measure of financial support from the State in the initial stages of their development.

Two phases of the influence of the war on the work of the High Schools and Collegiate Institutes deserve mention. The length of the teaching year was reduced for many pupils, both at the end of the term in May and June and at the beginning of the autumn term in September. Arrangements were made by which pupils were permitted to leave school to work on the farm, or in essential war industries. This shortening of the teaching year placed an additional burden of responsibility on our teachers in that it required them to cover the prescribed work in a shorter period of time. It is to their abiding credit that the teachers willingly assumed this further responsibility, thereby contributing most effectively to the production of essential food materials in this Province.

The pupils of our Secondary Schools were given the opportunity of participating more directly in the Nation's war effort. Most schools took an active part in the various salvage campaigns. Many of them provided large quantities of books and magazines which were distributed through one or other of the War Service organizations. Especially, however, did our Secondary Schools distinguish themselves in the collection of money by the sale of War Certificates and in the provision both of money and of clothing and other materials for the Red Cross. It has been estimated that through the efforts of our Secondary School pupils a contribution of not less than a million dollars was made to the Nation's war effort. Of even greater importance has been the realization by our youth that they, too, are partners in the prosecution of the war and that they have their responsibilities in maintaining a wholesome life in the community.

In no branch of our educational system has the impact of war conditions been felt more extensively than in our Technical and Vocational Schools. Special War Emergency Classes were introduced during the summer of 1940 for the purpose of training skilled and semi-skilled workers for war industries and for the

armed forces. By an agreement between the Federal and Provincial Governments, the Province assumed the cost of administration and 50 per cent of the cost of essential special equipment. The Dominion Government undertook to pay the remaining 50 per cent of the cost of equipment, as well as teachers' salaries, supplies and a subsistence allowance to trainees. Supervision of the training is vested in an Inter-departmental Committee representing the Departments of Education and of Labour.

Training has been provided in virtually every craft represented in the production of war materials and in the special techniques required by the various services. Special reference may be warranted to the training of radio technicians, tool makers and instrument makers. Classes have been provided for the training of women for industry; in cooking, for both men and women in army services; and in commercial courses to provide both men and women for clerical positions in the Federal Civil Service and in the Army and Air Force.

The extent of the contributions made by our Technical Schools may be judged by the fact that from the introduction of the programme in July, 1940, to the end of June, 1941, of a total of 41,758 men and women trained in the entire Dominion, 25,616 were trained in the Vocational Schools of this Province, and that of a total of 18,920 members of the armed forces who received special instruction as artificers and technicians, 6,450 were, likewise, trained in our Vocational Schools.

This most creditable achievement has been made possible by reason of two conditions,—the whole-hearted co-operation of local school boards, and the devotion and self-sacrifice of the members of the teaching staffs of our schools. The accommodation and equipment of our local school boards were placed at the disposal of the Government without reservation. The entire organization of the school was made subordinate to the successful conduct of the War Emergency Classes. In not a few instances, the work of the school was adjusted to the needs of a 24 hour day. Too much praise, however, cannot be given to the shop directors and their assistants, whose wisdom and experience provided sound guidance and whose tireless energy enabled them to solve new and difficult problems as they arose. Their achievement will come to be regarded as one of the most valuable contributions made by the Canadian people to the prosecution of the war.

Respectfully submitted,

D. McARTHUR,

Minister of Education.

Toronto, November 16th, 1942.

APPENDIX A

REPORT OF THE CHIEF INSPECTOR OF PUBLIC
AND SEPARATE SCHOOLS

The Provincial Inspectoral Staff, 1941

I. IN MEMORIAM:

Mr. James Froats, M.A., B.Paed. (Queens), Public School Inspector for Stormont County, died suddenly at his home in Finch on Friday, April 4th, 1941. Mr. Froats was born at Hoasic, in Williamsburg Township, Dundas County, in 1872, the son of United Empire Loyalist parents. He received his elementary education in S.S. No. 22 Williamsburg and his secondary education in the Morrisburg Collegiate Institute. His professional training as a teacher was obtained at the Morrisburg Model School, the Ottawa Normal School and the School of Pedagogy in Toronto.

The son of a very successful Ontario teacher, Mr. Froats was by natural aptitude, as well as by professional training, a teacher. In schools at Goldfield, Maple Ridge, Lunenburg, Morewood, Cornwall and Finch Mr. Froats gave excellent service. His appointment as a teacher and principal was in the Finch Public and Continuation School, in Storemont County. His success here made him the natural appointee by the Counties' Council to the public school inspectorate of Stormont County, in 1909 in which position he remained until the time of his death. Many teachers whose work was supervised by Mr. Froats regarded him as a true friend, and as one who was an expert in assisting teachers to improve their classroom practice. He received at all times the esteem and co-operation of parents, trustees and ratepayers. During this thirty-two years' service as a public school inspector he saw many improvements made in the schools of the county.

II. RETIREMENTS:

Mr. George A. Carefoot, B.A., B.Paed. (Queens), Public School Inspector for Lincoln County, retired on August 31st, 1941, after twenty-five years of very successful service in this capacity. Mr. Carefoot was born in 1870 at Red Wing, Collingwood Township, Grey County. He received his elementary school instruction in S.S. No. 12 Collingwood, from which he received High School Entrance standing and the academic requirements for admission to the Meaford Model School. After attendance at the Model School he taught in rural schools of his home township for a period of five and one-half years. In 1890, he entered the Collingwood Collegiate Institute where in 1894 he completed the course for the Senior Leaving examination. He then attended the University of Toronto and the Toronto School of Pedagogy and in 1897 obtained specialist standing in Science. From 1897 to 1917 Mr. Carefoot taught very successfully in secondary schools in Smithville, Thorold, Collingwood, Newmarket, Lindsay, in Bradford as principal for six years, and finally for a period of six years as science master in the St. Catharines Collegiate Institute. In his work as a public school in-

spector from August 17th, 1917, to August 31st, 1941, Mr. Carefoot had outstanding success. During his period of office seven new school buildings were erected and substantial and modern additions made to nine other schools. In addition to the raising of school standards in general to a high point of efficiency, Mr. Carefoot gave particular attention to better school libraries, to better provision for the health and health training of the pupils, to the extension of the teaching of music in rural as well as urban schools, and to rural school fairs and the annual exhibition of school work in each school. Mr. Carefoot was an educational leader as well as a school supervisor. By acquainting the school boards and ratepayers of his inspectorate with the newer movements in education he was able to secure their co-operation in the introduction of changes; the result being that the schools of Lincoln County are efficient and progressive beyond the average.

Mr. W. H. T. Mooney, B.A., B.Paed. (Toronto), was born in Rondeau, in Kent County. He received his elementary school education in a public school in the Township of Harwich and his secondary school education in the Ridgetown Collegiate Institute. After attending the Chatham Model School he taught for a few years in the Townships of Orford and Howard. He then attended Toronto University and in 1901 received a B.A. degree with honour standing in classics. He then obtained a high school specialist certificate in classics from the Ontario Normal College, Hamilton, and became classical master in Arthur High School and later in London Collegiate Institute. He was also principal of the London Central Collegiate Institute for a number of years. In January, 1923, he became classical master of the Toronto Normal School. In 1938 he was appointed public school inspector in the inspectorate of York No. 1. Mr. Mooney was an excellent teacher and principal, a splendid administrator and a very competent inspector.

Dr. Peter F. Munro, M.A., is a native of Lancaster Township in the County of Glengarry, where he received his elementary education. He attended Williamstown High School and entered Queen's University, from which he graduated in 1898 with honours in Classics. For his professional training as a teacher he attended Kingston Model School and the Ontario Normal College in Hamilton, obtaining a Specialist certificate in Classics. His public school teaching covers experience in rural schools as well as in urban city schools. He was principal of Ryerson Public School, Toronto, from 1919 to 1925 when he became a public school inspector for the City of Toronto. He retired from this position at August 31st, 1941. Dr. Munro taught as classical master in the Iroquois High School, and the Aylmer Collegiate Institute, in the Aurora High School, of which he was also principal, and in Jarvis and Riverdale Collegiate Institutes in the City of Toronto. He obtained his B.Paed. degree in 1904 and the D.Paed. degree in 1926. Dr. Munro had a brilliant career as a classical master and as a public school inspector.

Mr. Samuel Shannon, B.A., was born in the Township of Elma, Perth County, and received his elementary education in S.S. No. 4 Elma. Subsequently he attended Listowel High School, in which he obtained certificates for entrance to Model School and to Normal School. He secured his First Class Certificate, with the science option, through private study. Mr. Shannon attended the Mitchell Model School in 1888, and began his teaching experience

in S.S. No. 4 Elma, his home school. Later he attended Albert College, Bellevill, from which he matriculated with honours in 1892. He then entered the University of Toronto, and graduated in the Natural Science Honour course in 1895. After attending the School of Pedagogy he became the first principal of Drayton Continuation School. Mr. Shannon was one of the prospectors who followed the famous trail of '98 into the Yukon. He was for some years an assayer in British Columbia, and taught for three years in the schools of British Columbia. On his return to Ontario he was principal of Bracebridge Public and Continuation School, then of Kenora High School, resigning the latter position to become Inspector of Public Schools for the District of Kenora. Mr. Shannon was a very successful teacher and principal and an inspector who endeared himself to his teachers and pupils through his kind, sympathetic and helpful service.

Mr. W. W. A. Trench, B.A., was born at Richmond Hill, and received both his elementary and secondary education in his home town. He then attended the Newmarket Model School and had a six-year period of successful public school teaching experience at Cartier, Unionville, Richmond Hill and Eganville. In 1899 Mr. Trench completed the Honour Classics course at the University of Toronto and then took his professional training at the Ontario Normal College in Hamilton, receiving his certificate as a specialist in classics. His secondary school teaching experience was obtained in Arthur, North Bay, Port Hope, Arnprior, Prescott and Perth. At Prescott he was principal of the High School for a period of seven years. He was principal of Perth Collegiate Institute when in September, 1921 he was appointed Public School Inspector in York County. Mr. Trench took a keen interest in the primary work and the supplementary reading of his schools, and during his period of office the schools of his inspectorate showed splendid advancement in these respects as well as in the other phases of elementary school work. He also trained his teachers to secure good discipline without resorting to drastic punishment but by enlisting the co-operation and arousing the interest of their pupils.

III. APPOINTMENTS:

The following were appointed to the provincial staff of inspectors to begin their duties on September 1st, 1941:

1. Hastings North: Mr. H. H. Loucks, B.A., Principal of Morewood High School.
2. Lanark: Mr. J. W. Barber, B.A., Supervising Principal, Renfrew Public Schools.
3. Stormont: Mr. F. L. Barrett, B.A., B.Paed., Helping Teacher in Kent County.
4. District Division I: Mr. R. S. McBurney, B.A., B.Paed., Principal of Cornwall Public School, Port Arthur.

HELPING TEACHERS:

5. Kent: Mr. William Rogers, B.A., Principal of Major Ballachey Public School, Brantford, to assist Inspector G. A. Pearson.
6. York (3) and (4): Miss Jessie I. Cross, B.A., of the Toronto Normal Model School staff, to assist Inspector W. A. Fydell.

V. EXCHANGE BETWEEN INSPECTOR AND NORMAL SCHOOL MASTER, FOR ONE YEAR FROM SEPTEMBER 1ST, 1940.

Mr. J. V. Scanlan, B.A., R.C.S.S. Division XIII, with Mr. J. V. McIntyre, B.A., B.Paed., Hamilton Normal School.

Legislative Grants

The Province apportioned, in 1941, the sum of \$4,706,554.84 in the form of general legislative grants to the public and separate schools. This was the largest amount apportioned in any one year in the history of the Province. In the preceding year the amount of \$4,038,377.06 had been apportioned. The additional amount distributed in 1941 enabled many rural schools in the poorer parts of the Province to make payment on indebtedness and to give better service in their schools. The people have expressed, through the inspectors and directly to the Department, their appreciation of these increased grants.

Township School Areas

Under Sections 15 to 18, inclusive, of The Public Schools Act, the conditions for the organization and administration of township school areas are set forth. The council of a township may pass a by-law on or before the first day of July in any year, setting apart the whole or any portion of the township as a township school area. The by-law which takes effect on December 25th following requires the approval of the Minister of Education before it is finally passed. The board of trustees of a township school area is composed of five members, three trustees being elected each alternate year for a period of two years, and two being elected each alternate year (other than the years of election for the three) for a two-year period.

The Act makes provision for the adjustment of claims between the respective parts of the township when amalgamation takes place, and when the by-law goes into effect all school properties and other assets become vested in the one new board and the new board assumes also all liabilities. As an aid in the adjustment of the finances of the different portions comprising the new area, the Department of Education gives in addition to the regular legislative grant an annual grant of \$100.00 per school section.

There were 15 township school areas or township school boards formed in the Province before the year 1938, involving the dissolution of 83 school sections.

In the years 1938, 1939, 1940 and 1941 additional school areas formed were, respectively, 15, 43, 26 and 31, involving the dissolution of 582 more school sections. At the end of the year 1941 there were 130 township school areas and 666 school sections dissolved. These areas are found in nearly all parts of the Province, and it can be said that in all parts of the Province opinion has grown more favourable to the larger rural unit for school administration. The inspectors, through patient and tactful effort, have brought this matter to the attention of ratepayers, trustees and members of municipal councils, and have followed up the organization of the areas with their co-operation and guidance.

Some of the advantages claimed for the larger area of school administration are as follows:—

1. Better provision for completing courses for those leaving school at 15 and 16 years of age.
2. A more equal school privilege for each rural pupil and a more equal distribution of educational costs.
3. The raising of the standards of the poorer schools in the community.
4. The possibility for the better placement of teachers, a more healthy competition among rural teachers of the same area, the closer association of rural teachers in helpful groups, a greater contentment and happiness among rural teachers, and the elimination of teachers who become failures through lack of a natural aptitude for teaching or for other reasons.
5. The greater opportunity afforded of engaging special teachers of music, manual training, household science and agriculture, as well as of engaging school nurses and the carrying out of an adequate health programme for rural pupils.
6. The saving in expenditures for text books, library books, school supplies, etc., by purchasing in larger quantities at wholesale costs.
7. Increased local control of the schools, more interest in the needs of the schools, and more competent school boards as a result of trustee meeting regularly to discuss ways and means of improving the schools from all points of view.
8. More frequent joint conferences of teachers and trustees.
9. The possibility of the inspector meeting each larger unit board in his inspectorate once or twice a year.
10. Greater possibilities for co-operation in a broader manner than can be possible in the school section.
11. The improvement and beautification of school grounds and school buildings.
12. Better provision for practical courses for young people through night classes.
13. Greater opportunity for providing arrangement transportation of senior pupils to secondary schools or to Grade IX and X classes at suitable centres.
14. The readiness of dealing with a situation where a school of low enrolment has been closed until the increased number of pupils will warrant its reopening.

UNIONDALE PUBLIC SCHOOL
S.S. 4, East Nissouri, Oxford County

The Old School

This building, erected in 1875, superseded a log school built in 1860.

Courtesy St. Mary's Journal Argu.

The New School Opened November 27th, 1941

This modern rural school building, costing \$6,300, is rug-brick with a cottage roof. It is designed to serve not only as a school but also as a community centre. Modern features include a teacher's room, built-in wardrobe, built-in bookcases, recreation room in basement, venetian blinds, indirect lighting, and flood-lighted stage.

New Township School Areas were formed in 1941, as follows:—

Transportation of Rural Pupils to Secondary Schools

The new courses of study for Grades IX and X (Fifth Classes), including the more practical subjects of business practice, shop work, home economics and agriculture, have made it almost impossible for the one-teacher school to do satisfactory work beyond High School Entrance standing. In two-roomed schools it is possible to offer satisfactory courses in Grades IX and X; but for the pupils of the many rural areas within easy reach of a continuation school, a high school or a collegiate institute it is much better to have the rural secondary pupils taken by transportation to the nearest secondary school. Some three years ago the Department of Education began offering rural boards of trustees a special grant if the boards, in groups of two or more, undertook to arrange for the transportation of the pupils to a secondary school. The arrangement proved to be most satisfactory to the rural people, with the result that approximately 350 boards of rural school sections now transport pupils to secondary schools. In this fiscal year the Department of Education will pay in grants for this service, on the basis of 50% of the cost, the sum of approximately \$55,000.00.

The cost of equipping small high schools for the practical subjects makes it necessary that the schools which are provided with the necessary equipment should be as widely distributed as possible, in order that the high school needs of both rural and urban areas may be served economically.

The Scarcity of Qualified Teachers

Some six years ago it was estimated that the Province had a surplus of 3,000 qualified elementary school teachers who were without positions. This fact, and the lowered salaries paid in rural schools led to a rapidly decreasing annual attendance at the Normal Schools. When war broke out the young male teachers enlisted in large numbers. The number of marriages also increased rapidly, again taking a large number of young women teachers. Increased Federal Government office staffs has also taken a large number of teachers, particularly in the Eastern portion of the province. The net result is that at the end of the calendar year 1941 the province finds it necessary to give provisional or temporary standing to slightly more than 200 teachers in order that all the schools may be continued in operation. This situation will undoubtedly grow more serious in September, 1942, and it may become necessary to give temporary certificates to some 400 or more teachers at that time. The inspectors throughout the Province have surveyed the situation and many qualified women teachers have been brought back to the profession of teaching for the war period.

In September, 1941, the Department found it necessary to admit to the Normal Schools young people with standing in eight Upper School subjects rather than nine as formerly. It was also found necessary to lower the age of admission to the Normal Schools of applicants who had the necessary academic standing.

The schools may suffer somewhat in the efficiency of the work done, due to the number of unqualified teachers; but every effort will be made to keep the schools open and to stimulate all teachers to give their best service in the training of the pupils.

The Temporary Closing of Small Schools

Section 87 of The Public Schools Act gives the Minister of Education power to direct that a rural school be closed where for two consecutive years there have been fewer than eight pupils between the ages of five and fourteen years resident in the school section. It has not been the practice to make use of this power arbitrarily. The inspectors have discussed the advantages of closing a small school temporarily with the local trustees, and in most cases the boards have closed the school by their own resolution and, with the help of the inspectors, have arranged for the admission of the pupils to a neighbouring school or schools. In some cases the establishing of a transportation service by the board concerned has been necessary; but in all cases the closing has meant a considerable saving to the local ratepayers and a distinct educational advantage to the pupils, who find the work more stimulating in a school where the class-groups are of normal size. Over the period 1937 to 1941, inclusive, 272 rural schools have been closed, and in some cases reopened, as indicated in the table below:—

Schools closed before 1937.....	55

Correspondence Courses

The success of the correspondence courses conducted by the Department of Education is evidenced by the increased enrolment of pupils. The total enrolment for the school year was 2,516. These lessons found their way into isolated homes from Moosonee, on James Bay, to Windsor, in Southern Ontario. Wherever His Majesty's mails could go by rail or airways the opportunity has been made available to children to pursue their studies in close conformity to the new courses of study, in their own homes. In addition these courses were made available to bed-fast patients in practically all the Sanatoria and Preventoria of the Province. During the last school year 61,968 lessons were submitted to this Department for supervision and correction. Ontario missionaries in Trinidad, Venezuela, Paraguay and the Belgian Congo were also provided with courses so that their children might follow the Ontario course of study.

The effectiveness of these courses was shown by the fact that at the Entrance examination, out of 25 pupils who were recommended to the High School Entrance Boards in the various localities 20 were granted their standing without writing the examination and the five who wrote not only succeeded in passing but stood well in the upper brackets among those who wrote at their respective centres. It is also quite apparent that by the use of correspondence courses the child of average intelligence may under favourable home conditions, reach Entrance standing at as early an age as one who attends a regular school.

The results in Grades IX and X have been equally satisfactory. In these grades one pupil completed seven subjects during the year, 5 completed six subjects, 5 completed five subjects, 25 completed four subjects, 7 completed three subjects, 13 completed two subjects, and 8 completed one subject. Those pupils completing fewer than four subjects in many cases enrolled later in the school term and thus could not complete the courses by June; but in those cases the pupils on enrolling in September may carry on from the last lesson completed in June. The courses in Grades IX and X serve a real purpose to pupils between the ages of 16 and 21 who have been out of school for some time and who have the desire to continue their studies but are prevented from doing so for various reasons.

The staff of the correspondence courses consists of 20 full-time teachers. The Department also supervises the recently introduced courses of the Canadian Legion for enlisted men, in Introductory English and Social Studies.

Railway School Cars

There has been little change in the School Car situation since the annual report of a year ago. The seven cars are pursuing their helpful way under the good work and careful management of the following teachers:—

- C.P.R. School Car No. 1 — W. H. McNally
- C.P.R. School Car No. 2 — William Wright
- C.N.R. School Car No. 1 — Fred Sloman
- C.N.R. School Car No. 2 — William Fleming
- C.N.R. School Car No. 3 — A. D. Clements, B.A.
- C.N.R. School Car No. 4 — H. F. Antoniak
- T. & N.O.R. School Car — Angus McKay

The enrolment remains practically the same, ranging from 22 to 55 pupils per car. Several former school car pupils of Grades IX and X are now attending high and technical schools in nearby centres. One of these, Miss Eleanor White of Sowden, who took her Grade X work at that point on C.N.R. School Car No. 2, under Mr. Fleming, and now attending technical school in Port Arthur, was awarded the Canadian Daughters' League scholarship of \$25.00 as the student who made the most progress during the year.

A new spur has been installed to accommodate C.N.R. School Car No. 4 at Amesdale, Quibell subdivision, near Sioux Lookout. Eleven children of school age are now being cared for at this point.

Possibly no other school services in Northern Ontario have received more appreciative comment than the correspondence courses and the school car service. The children served by the school cars live at lonely points along or near the railway lines of the northern part of the Province, where there are an insufficient number of children at any one point to warrant the organization of a public or separate school.

Music

A few years ago Music was regarded as one of the "frills" of the elementary schools. There was a demand, however, particularly on the part of mothers in the rural areas, for the further teaching of Music in the elementary schools. In 1934 the Department of Education appointed a Provincial Supervisor of Music, and since that time many special itinerant teachers of Music have been appointed in rural areas. The advancement of the subject in the public and separate schools over the last seven years is shown in the following table:—

Classrooms Giving Instruction in Music

	1935	1941
Cities.....	95%	98%
Counties.....	33%	78%
Districts.....	15%	53%
Separate Schools.....	18%	28%
Total.....	43%	72%

Music Festivals in the Spring of the year, toward the close of the school year, have done much to stimulate interest in the subject and to demonstrate to parents and ratepayers the quality of the work being done by the special and the regular teachers.

The Department of Education has supported the work in Music through special grants amounting to approximately 50% of the cost in the rural areas.

Health Teaching and School Medical Inspection

In the new courses of study for both elementary and secondary schools much greater emphasis has been placed on health teaching and the formation by the pupils of good health habits. No rapid extension of health services in the elementary schools has been made during the past year, but in those areas where the school trustees or the local Board of Health is offering a school medical inspection service the work has been well done, and a marked improvement in the general health of the pupils has been shown.

Authority has now been granted to county councils to provide for the employment of public health nurses for school health services at the expense of the county. Oxford County has taken advantage of this new legislation granted in 1940, and a splendid health service in all the schools of the county is now under process of organization. Some acceptable type of school health supervision exists in 197 municipalities. In 82 of these the service is locally operated by the school board. In 96 of these the service is locally operated by the Board of Health. There are 13 school medical inspection units which are combinations of rural and urban boards for this purpose. They are chiefly situated in the Niagara Peninsula. In 36 centres a dentist is associated with the service. Three hundred and thirty-eight nurses are engaged in this work, part time or full time. With the exception of three full-time and two part-time nurses, the special qualifications required by the regulations are met by the nurses.

In 24 centres school health supervision of some type has been extended to secondary schools.

The total amount expended in grants for medical and dental inspection for the year 1939 was \$12,471.00.

The report of the extent to which male adults between 21 and 24, inclusive, are seriously handicapped by physical defects, recently presented by the Minister of National War Services for Canada, should again focus the attention of the local school authorities on the extension of school medical inspection to secondary school pupils. The statement that only 61.69% of all such young males are eligible for admission to Category A is of too great significance to pass over lightly. In many instances undoubtedly the presence of these defects had been drawn to the attention of disinterested or procrastinating parents when the individual was in attendance at the elementary school. In others no health service was in effect in the community in which the person affected attended school. Again, in others, the condition found was a development of adolescence and could not therefore have been recognized during the elementary school period. Irrespective of the relative significance of the various factors contributing to this most unfortunate state of affairs, the situation would appear to be of sufficient importance to warrant early action by all of the official agencies concerned.

Interchange of Teachers

Interchange of teachers between Ontario and other parts of the Dominion and of the Empire has suffered further curtailment because of the war. For the school year 1941-42 no attempt was made to arrange new overseas exchanges. The number of exchanges with teachers in other provinces was affected by the evident desire of teachers to remain with their families during this trying period.

Ord Marshall House, familiar to overseas exchange teachers as the headquarters of the League of Empire, has been damaged by enemy action. However, from temporary quarters nearby the Secretary, Miss E. A. Doggett, O.B.E., has sent letters appreciative of the contribution made by those exchange teachers

whose return to their homes was delayed during the summer of 1940 and by those who were unable to leave the British Isles during the years 1940-41 and 1941-42. Not only have these teachers adapted themselves admirably to changed conditions in educational work, but in addition they have assumed their full share of the many wartime duties of civilians.

Through the co-operation of Education Authorities overseas and in Ontario, it was possible to arrange extensions of the exchange period for those teachers who were unable to secure passage in time to resume their duties at home in September, 1941. Exchanges were arranged for the school year 1941-42 as follows:—

- 1 Ontario Public School teacher on exchange in Scotland
 - 1 Ontario Separate School teacher on exchange in Scotland
 - 3 Ontario Public School teachers on exchange in British Columbia
 - 1 Ontario Public School teacher on exchange in Alberta
 - 1 Ontario Public School teacher on exchange in Nova Scotia
 - 3 Ontario Secondary School teachers on exchange in British Columbia
-
- 10 Ontario teachers on exchange during 1941-42.

Conclusion

The year 1941 was a very busy one for the elementary schools of the Province. In each inspectorate there were campaigns for funds in support of such organizations as the Junior Red Cross and the Navy League, and there was a constant and increasing effort toward the sale of War Savings Stamps and War Savings Certificates. Funds were raised by teachers and pupils for the purchase of ambulances and toward the different war charities and war relief funds. It is unfortunate that at the present time there is no summary available of the vast war effort of the pupils and teachers.

The regular work of the schools was well done in all parts of the Province, in spite of the many changes of teachers due to enlistments and to the entry of many teachers into office work, munitions factories and other activities pertaining to the successful conduct of Canada's war effort. No professional body has been called upon during the year to undertake more additional duties than the elementary school inspectors. They have responded willingly to every call and have given splendid leadership in both their regular school duties and in the more special duties of this critical period.

Except for very minor interruptions in a few areas, the elementary schools have been open for the full year. The attendance of the pupils has been maintained at a high level of regularity, and the proficiency of the pupils has never been higher. The teachers and inspectors are worthy of highest commendation for their untiring zeal and efforts in the best interests of the pupils.

Acknowledgment is made and thanks offered to all the officials who have made contribution to this report.

V. K. GREER,

Chief Inspector of Public and Separate Schools.

Toronto, March 31st, 1942.

Courtesy of the School Board

The Ridge Public School, Mersea Township, Essex County

This modern, four-room school has recently been erected at a cost of approximately \$46,000 for building, and \$6,000 for equipment, and is fireproof throughout. This structure has library, teachers' room, and complete kitchen. The basement contains a separate playground for boys and girls, locker rooms and emergency nurse's room. Other special features include flush ceiling reflector blackboard lights, a thousand gallon per hour water pump, fire hose, asphalt tile floors, and moveable chair type desks.

The Board has already laid plans for levelling, seeding and planting the grounds.

APPENDIX B

REPORT OF THE CHIEF INSPECTOR OF SECONDARY SCHOOLS

I have the honour to submit herewith the reports of the High and Continuation School Inspectors and the Director of Vocational Education, for the school year 1940-41.

G. F. ROGERS,

Chief Inspector of Secondary Schools.

Toronto, August 22nd, 1942.

1. Report of the Inspectors of High and Continuation Schools

The school year 1940-41, the second during the progress of World War II, might well be expected to show a much greater effect of the war on the life and work of the schools than did the preceding year, 1939-40, which was already under way when war was declared.

In certain respects, however, the statistical record does not indicate any marked effect. Three new schools were established, a High School at Geraldton and Continuation Schools at Dublin and Port McNicoll. In addition Kirkland Lake High School was raised to the status of a Collegiate Institute and Preston Continuation School became a High School. The total number of teachers employed in the High Schools and Collegiate Institutes shows an increase of 93 over the previous year. In the Continuation Schools there was an increase of 18. In average salaries paid, small increases are shown, in the case of Collegiate Institutes and High Schools an increase of \$2.00, and in the Continuation Schools one of \$7.00. On the other hand, the total enrolment in the secondary schools shows a decrease. There were 5,711 fewer pupils in the High Schools and Collegiate Institutes and 846 fewer in the Continuation Schools. These decreases, however, show not so much an effect of the war as they do the continued effect of the general decrease in attendance in the Public Schools which has been noted for several years.

While, as pointed out above, the total number of teachers in the secondary schools shows a slight increase in spite of a considerable decrease in attendance, this is accounted for probably by two facts: first, in the great majority of the Continuation Schools, and in the smaller High Schools, the staffs have been so small that they could not be reduced further if they were to continue to carry on the full course of four or five years' work as heretofore; second, in the larger schools there was considerable overcrowding in previous years, and a corresponding high ratio of pupils per teacher in many schools. In these larger schools the effect of the decreased attendance has been to relieve the congestion in the classes and to reduce the ratio of pupils per teacher more nearly to the ratio of 30 to 1, which is set forth as a maximum in the High School Regulations. As the year progressed the number of teachers employed showed some decrease through enlistment for military service. Such enlistments were mainly from among the teachers of Physical Education, Mathematics and Science, and a shortage of teachers in these departments began to be noticeable. No record of these enlistments will be attempted here, as a complete record of enlistments of members of the teaching profession is being tabulated at the Department and will, it is expected, be published at the conclusion of the war.

In the matter of the new courses of study, which were being introduced in one grade at a time, those for Grade XII were offered this year, although the war had the effect of limiting and modifying them to some extent. The new course in Geography for Grade XII was printed and, like the new Grade XI course, was offered as an option; the projected courses in Biological Sciences for the Middle School were not established as had been planned; the new Grade XI course in Ancient and Mediaeval History was introduced, and this was taught, in a few cases, to pupils of Grade XII as well. These limitations were made to avoid, where possible, the necessity of introducing new textbooks.

In the operation of the schools themselves the effects of the war were noticeable in several ways. The length of the teaching year was considerably shortened, both at the beginning of the year in September and at the close of the year in May or June, by special arrangements which allowed pupils to assist with the work on the farms, and, in some cases, in essential war industries. This shortening of the year placed heavy responsibilities upon the teachers, as it required them to organize the work in each subject so as to cover as well as possible the whole course in a shorter time. The teachers as a body responded loyally to this emergency. Special classes were organized for pupils who had lost time, or private assistance given, in order to assist them in covering the work which they had missed. To quite an extent the situation was met also by a greater application on the part of the pupils themselves.

The effects of the war on the pupils were shown also in their general extra-curricular programme, which now began to include more activities directly connected with the war. The pupils were organized under their teachers to assist in the various war efforts of the community in which the school was located. The extent of these activities and something of the work accomplished is shown in the tabulated statement which follows:

	Collegiate Institutes	High Schools	Continua- tion Schools	Private Schools	Grand Total of Secondary Schools
Number of Schools.....	72	159	200	91	522
Number Reporting.....	65	130	130	56	381
War Certificates sold.....	\$259,763.35	\$129,537.85	\$25,793.85	\$16,362.25	\$431,457.30
War Funds:					
1. Navy.....	1,030.39	488.64	253.84	153.74	1,926.61
2. War Victims.....	2,733.96	1,930.33	1,010.73	165.01	5,840.03
3. Others.....	11,301.23	7,791.80	1,744.95	3,946.80	24,784.78
Red Cross:					
1. In cash.....	6,541.55	6,823.20	2,556.38	2,053.08	17,974.21
2. In value of garments made.....	15,672.40	11,078.27	1,640.60	1,349.50	29,740.77
Other Gifts.....	5,769.21	572.03	35.00	143.70	6,519.94
Value of Salvage collected..	2,276.88	1,786.40	1,036.53	299.40	5,399.21
Total funds raised for War purposes.....	\$305,088.97	\$160,008.52	\$34,071.88	\$24,473.48	\$523,642.85
Special Training Courses Taken:					
1. St. John's Ambulance	2,544	815	18	128	3,505
2. Nursing.....	1,875	478	79	93	2,525
3. Other Courses.....	2,648	711	97	324	3,780
All Courses.....	7,067	2,004	194	545	9,810

This tabulated statement scarcely tells the whole story. Among the schools from which reports have not been received are a number of large schools. These schools would probably have reported considerable amounts raised. Many of the schools reporting did not keep complete records for the school year 1940-41, and were careful not to overstate their totals. This was particularly true of the amount and value of the garments made for the Red Cross and for associated bodies, and of the tonnage and value of waste material salvaged. Where values were not reported by the school they have been arbitrarily set, for the purpose of this report, at 50c. per garment, and at \$8.00 per ton of salvage, respectively. Again, many of the schools reported that in the Red Cross work and in the collection of salvage the pupils worked through the community organization, and thus the school's share in such work could not be reported separately. In addition to the types of work tabulated above other war activities were reported from many schools. Great quantities of books and magazines were collected, sometimes for direct contribution to training centres, more often for distribution through one or more of the War Service organizations. Most schools, also, have established lists of ex-pupils now serving with the armed forces, and have organized to keep in regular touch with them by sending boxes of comforts and special treats. Occasionally the school camera club has made up folders of school and town views as reminders of home. Other schools have made and packed "ditty bags" for the sailors.

The raising of more than half a million dollars for the prosecution of the war, by 381 of the secondary schools of the province, is no small accomplishment. Judging from many reports received, however, there is little doubt but that the total for the year 1941-42 will be close to the million mark.

The record of the war service of the high school boys and girls would be incomplete without some report on the assistance given by many of them in farm work or in other essential war industries. The records of the Middle and Upper School examinations show that 8,268 pupils were granted their certificates on the submission of evidence of at least eight weeks at such work during the season of 1941. From the Department of Labour, also, comes the statement that 14,000 secondary school pupils worked on farms during the same season.

When visiting the schools the Inspectors have found increasing evidence of the effect of these war activities on the pupils engaged in them. The very considerable help that they have been able to give in the prosecution of the war has had its natural reflex influences. Pupils generally have applied themselves more zealously to their school work, and have come to realize the direct bearing of much of their studies on the practical affairs of life. The events of the war from day to day have been used quite frequently by both teachers and pupils to give an added interest to various subjects, and undoubtedly too these young people have now acquired a clearer understanding of the issues involved in the war. All these effects must, in turn, help determine every pupil's ideal in life and his choice of a vocation.

During the year 89 private schools applied for and were granted inspection of their Middle School classes in order that they might be permitted to recommend for certificates those of their pupils who should complete their courses successfully. This was the second year of such inspection for the majority of these schools, and it was very gratifying to note evidences of improvements in the facilities for teaching the courses, in the qualifications of the teachers in some cases and in the character of the work done in the classroom. Since the

previous inspection a number of these schools had provided excellent facilities for individual practical work by pupils in Science. In a few cases the laboratories provided were of such excellence that they might well serve as models for other small schools that are not now as well equipped. Several other schools of the tutorial type, where previously Physics and Chemistry had been taught almost wholly from the textbook, this year had devised special furnishings and equipment in order that their pupils, either individually or in groups, might perform the prescribed experiments in Science. In several of the private schools other improvements in accommodations were effected, such as better classrooms, improved lighting and more blackboards.

We would offer a tribute of esteem to the memory of the following teachers who, during the last seven years, have been removed by death after more than twenty-five years of faithful service in the profession: Claire A. H. Hitchon of Belleville; Arthur M. Overholt of Brantford; John A. Anderson of Brockville; David Knight of Central Collegiate Institute, Hamilton; Norval J. Ireland of South Collegiate Institute, London; Col. C. H. Vandersluys of Niagara Falls; Norman A. Irwin of Glebe Collegiate Institute, Ottawa; Jessie Muir of Lisgar Collegiate Institute, Ottawa; Alexander W. Baird of Renfrew; W. Oliver Asselstine of St. Catharines; Albert Williams of Forest; and Alfred C. Bernath of Huntsville.

During the year the Inspectoral staff was increased by the appointment of Mr. Henri Lemieux, from the staff of the Ottawa University Normal School. His education, training and experience qualify him to render a distinct service.

2. Report of the Director of Vocational Education

Due to the introduction of War Emergency Classes in the vocational schools during the holiday months of July and August 1940, the commencement of the term in September was marked by a number of perplexing organization problems. At the request of both the Federal and Provincial Departments of Labour, the Minister decided to continue the special war classes after the opening of school and arrangements were made accordingly to provide for these concurrently with the regular day and evening classes. As teachers of trade subjects were required for this practical work, the regular day staffs were called upon to fill the need. Classes were operated in some schools for the entire twenty-four hours of each day, involving a serious physical strain on the shop instructors and necessitating a drastic rearrangement of time tables. Co-operation on the part of principals, directors, and instructors succeeded in overcoming the difficulties, and a dual programme was conducted throughout the year with little interruption of the regular work of the schools. In order to ensure the greatest possible use of the available shop accommodation and equipment for the war effort, the hours of

the day-school students were staggered in several schools while in others, certain non-essential night classes were discontinued entirely. The vocational schools became the training ground for a vast industrial army.

From the introduction of the scheme in July 1940 to the end of June 1941, 25,616 men and women, out of a total for the whole Dominion of 41,758, were given special training in Ontario vocational schools to fit them for industrial war work, and 6,450 members of the armed forces, out of a Dominion total of 18,920, received instruction as artificers and technicians. Ontario thus provided, from 28 vocational schools, out of a total of approximately 100 schools of all types spread across the Dominion, over 61% of the industrial trainees and 34% of those preparing for entry into the army, navy and air force under the War Emergency Training Programme. Training was given in aircraft manufacturing, machine shop practice, sheet metal work, welding (acetylene and electric), industrial chemistry, cooking (for men and women in Army services), electricity and radio mechanics, pattern making and woodworking, automobile mechanics, blacksmithing, drafting, plumbing and related blue-print reading and mathematics. Instruction was also offered in preparation for clerical and accounting positions in the army and air force. The training of women for industry was restricted to sponsored classes, mostly in power sewing-machine work and light welding. Special courses for radio technicians were provided in the Central Technical School, Toronto, the Westdale Technical School, Hamilton, and the Ottawa Technical School. The results of the external examinations set by the R.C.A.F. for candidates trained in these 3 schools were so commendable that special mention was made in the report of the examiners of the outstanding success achieved by these particular trainees. A number of fine-instrument workers were trained in the Central Technical School, Toronto, and the Ottawa Technical School; and courses for tool improvers were inaugurated in the Western Technical School, Toronto, and the Westdale School in Hamilton. The usual length of each of the courses was three months, or 13 weeks of 44 hours, which, compared to an ordinary school week of 27 hours, will illustrate the strain under which the shop teachers have been working. In the case of tool makers, radio mechanics, and instrument makers, the courses were extended to 6 months, approximating 1,144 hours of training. The majority of trainees took the general metal working course outlined in my report of last year.

These emergency courses, designed to train skilled and semi-skilled workers for war industry and the armed forces, were inaugurated under an agreement between the Federal and Provincial Governments, whereby the Provinces assumed the cost of administration and 50% of the cost of the special equipment required. The Dominion accepted the responsibility for the remaining 50% of the equipment cost, and for teachers' salaries, supplies, and subsistence allowances to trainees. The vocational school shops and equipment were made available by the local school authorities unhesitatingly and without charge. This spontaneous co-operation on their part is fully appreciated and gratefully acknowledged.

Until March 31, 1941, the War Emergency Programme in Ontario was administered by the Vocational Branch of the Department of Education. Subsequently an inter-departmental committee was formed, consisting of representatives of the Departments of Education and Labour, with a Regional Director appointed by the Dominion Government as secretary. Administration offices were opened in the East Block of the Parliament Buildings at Toronto, and Inspector A. M. Moon of the Vocational Branch of the Department of Education

was loaned to the committee as Director of Training. Inspector Moon was active in organizing the initial training programme, and its subsequent success is largely attributable to the energy and organizing ability he displayed in the early stages of the movement.

The vocational school has proved to be an organization capable of swift transition from a peace-time programme to one which meets the necessities of war. It is fortunate for this country that at the outbreak of war, the extensive accommodation, equipment and qualified technical staffs of these institutions were available to train the thousands of mechanics required by industry and the armed forces. In Ontario, especially, where a successful system of vocational education has been in operation for over twenty years; where skilled tradesmen receive intensive training to qualify them as teachers; and where the school boards, from the outset, have enjoyed a close contact with industry through advisory vocational committees representative of both employers and employed, the vocational schools have shown an amazing adaptability to war-time requirements. The expansion of the facilities of the workshops to accommodate an unprecedented influx of metal workers, aircraft mechanics, radio technicians, tool makers and artificers for the army, navy and air force, as well as the civilian personnel required for the production of war materials, was brought about with a smoothness that has won the admiration of military and civilian authorities alike. This transformation has taken place with practically no interference with the daily instruction of thousands of adolescent boys and girls, who by training and aptitude, will later be capable of taking an important part in the conflict should the present urgent need for mechanics persist. It is scarcely an exaggeration to state that without the vocational schools the war effort of the Dominion would have been tremendously handicapped and its effective participation in the defence of the Empire seriously retarded.

This outstanding contribution of the vocational schools to the common cause has been made possible by the tireless energy of the shop directors, the unremitting labour of their assistants, the cordial co-operation of school principals, and the unfailing support of local school boards and advisory committees in all matters incidental to the successful prosecution of the war. The vocational shop directors, by virtue of their positions as heads of departments and their engineering training, have a wider knowledge, experience and appreciation of the requirements of industry, and greater opportunities for collecting and distributing information regarding available occupations and employments than any other known agency. Results bear testimony to the determination of all concerned to support the Minister in his endeavour to furnish the semi-skilled manpower without which our labour supply would have been both inadequate and ineffective. A debt of gratitude is owed to these men and women, individually and collectively, for their unselfish devotion to duty.

Regular Day Classes

Notwithstanding the pressure caused by the introduction of war training, the work of the vocational day schools during the year was maintained at a high standard of efficiency. Considerable skill was displayed in the organization of time tables, which in most cases were ready well in advance of the opening of school. The advantage of lesson-aid material, prepared by the teachers for the use of the pupils has been generally accepted. In some instances, a tendency developed in this connection to utilise too freely the services of the commercial students in preparing the lesson sheets. Additional office help was suggested

as a remedy. The necessity for the periodical replacement of obsolete and out-worn equipment, constantly emphasized over the years, is now generally recognised. It is apparent that catalogue costs seldom represent the true value of equipment on hand, and that natural depreciation should always be provided for. In accordance with the instructions of the Minister, encouragement has been given to pupils to participate in Red Cross work or other war services, the time allotment for the practical subjects being increased wherever possible with this purpose in view.

From the comparative statistical table appearing below, it will be seen that a considerable change in enrolment has taken place. Although the number of day schools remains the same as last year, the number of pupils dropped from 36,502 to 30,967, while the number of teachers increased from 1,631 to 1,684, and municipal expenditures (net) increased by \$687,687. This state of affairs is directly attributable to war conditions. On the one hand, many pupils from the senior classes were absorbed by war industry or the armed forces; on the other hand, salaries have mounted, bonuses have been paid, and it has been necessary to employ additional semi-trained or untrained teachers to replace those on active service or loaned for war employment.

Evening Classes

The evening class registration showed a reduction from 34,983 to 32,135, and in this instance, the number of teachers fell from 1,081 to 1,045. Here, too, the war situation has been the main reason for the depleted enrolment. Many adult workers are now employed at night and consequently are debarred from attending evening classes, and a number of non-essential classes have been discontinued to make way for war emergency night shifts and soldiers' training. The character of the general work in the night schools has been satisfactory.

Comparative statistics for vocational schools and departments are as follows:

	1922-23	1939-40	1940-41
Number of Schools—Day	16	62	62
Number of Schools—Evening	51	48	49
Number of Pupils—Day	9,402	36,502	30,967
Number of Pupils—Evening	35,511	34,983	32,135
Number of Teachers—Day	337	1,632	1,684
Number of Teachers—Evening	1,097	1,081	1,045
Government Grants	\$638,217	\$1,289,444	\$1,079,818
Municipal Expenditure (Net)	\$1,233,397	\$4,595,902	\$5,283,589

Peace-time Activities

The versatility of vocationally-trained students is illustrated by the success of pupils from one of our commercial schools in a new diamond industry which was brought to the City of Toronto through the efforts of the Toronto Industrial Commission. The essential pre-requisite for starting the industry was the assurance of suitable personnel. One of the directors of the Eastern High School of Commerce, who has shown particular interest in the placement of students in industry and commerce, and who is in continuous touch with the Commission, suggested that boys and girls from this school could meet the fundamental requirements for workers in the diamond industry. It appears that the delicate operations of the trade call for a combination of manual dexterity and the mental alertness associated with the study of mathematics. The proprietors of the firm made an investigation, and it was found that commercial students, trained in the manipulative skills of shorthand and typewriting, and possessing a back-

ground of practical Mathematics and Science, were exceptionally well-fitted for the requirements of the trade, which consists in sawing, cutting and polishing diamonds.

The outcome of preliminary tests convinced the proprietors that suitable workers were available, and the industry was established in Toronto. Out of 55 apprentices employed by the firm, 32 (of both sexes) were supplied by the Eastern High School of Commerce, and it is stated that, but for the shortage of advanced students, more would have been taken. The proprietors, who escaped from Holland and Belgium at the outbreak of war, freely admitted, after several months of trial, that Canadian boys and girls compare favourably as diamond workers with the young people of Europe, where the business is more or less a family affair, handed down from father to son.

The value of the co-operation of the Toronto Industrial Commission in connection with the placement of Toronto vocational students, cannot be over-emphasized. The Commission keeps the schools informed of the latest industrial and commercial developments, and is the means, not only of introducing into Canada the best of European trade skills and craftsmanship, but of paving the way for the acquirement of these skills and crafts by the young people of this country. The part played by the vocational schools in supplying personnel for the war industries is widely recognized: their contributions to the arts of peace are no less important.

General Shop and Home Economics in High Schools and Continuation Schools

The teacher-training programme, to which reference was made in my last report, received a noticeable set-back by reason of the discontinuance of summer courses. As a consequence, teachers without the regular qualifications are being granted permission to teach for one year only, renewable annually, upon application of the board, until qualified teachers are available. Apart from this difficulty, the work has gone forward with increasing success. The reports of the inspectors indicate a considerable improvement in the standard of work, and this is reflected in the annual grading grants which show a substantial upward tendency. The instruction in shop work is widely diversified and the skills attained in a variety of trades, particularly in farm mechanics, should materially assist local war industries and agricultural production. During the school year 1940-41, 124 secondary schools and fifth classes received grading grants under the Regulations. An important provision of the Regulations is that both General Shop and Home Economics courses must be taught to obtain recognition, except where the school is composed of pupils of one sex only. This provision is to ensure that both boys and girls will have an opportunity to participate in studies of a practical nature.

Manual Training and Home Economics in Public and Separate Schools

As previously explained, two schemes are in operation at the present time, one for urban centres and another for rural areas. Instruction is optional, and either one or both courses may be given. According to the latest available figures, the following is a comparison of the centres holding classes under the two schemes as between the years 1939-40 and 1940-41.

	Number of Centres		
	Manual Training	Home Economics	Total
1939-40 Urban Scheme.....	163	169	332
1940-41 " ".....	148	168	316
1939-40 Rural Scheme.....	407	361	768
1940-41 " ".....	331	285	616

The work of the urban centres has been well sustained. The drop in the number of rural schools is mainly attributable to the discontinuance of grants to teachers. All grants are now paid direct to the boards. The regulations no longer recognise partial certification, and disinterested teachers have withdrawn. Local inspectors are promoting the work in every desirable location.

General Remarks

In this report the war effort of the vocational schools has been mainly under review. All indications point to a consistent endeavour on the part of those responsible for the education of our young people to maintain at the same time the high standard of academic instruction essential to a realization of the meaning of those free institutions for which the allied nations are fighting.

F. S. RUTHERFORD,

Director of Vocational Education.

Toronto, February 17th, 1942.

APPENDIX C
REPORT OF THE DIRECTOR OF PROFESSIONAL TRAINING

Normal School Attendance

In September, 1940, 104 applicants who held but eight of the required nine Upper School papers were permitted by special regulation to enter Normal School. In September, 1941, 76 applicants were thus admitted. Twenty-three teachers from Britain and from the other provinces of Canada who had equivalent Upper School standing and who had attended a teacher-training institution for at least one annual session have applied this year to write the Normal School examinations to qualify for Ontario teaching certificates.

Medical Inspection of Training Schools

All applicants to Training Schools are required to submit to a medical examination before they are finally accepted. In 1937-38 seventeen applicants were rejected; in 1938-39 twenty-seven; in 1939-40 twenty-six; in 1940-41 thirteen; in 1941-42 seventeen. Applicants suffering from physical handicaps of a less aggravated nature are permitted to enter on signing a consent, waiving claim to a disability pension under The Teachers' and Inspectors' Superannuation Act. In 1939-40 two signed waivers; in 1940-41 seven; in 1941-42 thirty-eight.

Cost of Medical Inspection, 1940-41

Amount paid physicians for medical examinations: 1,348 at \$4	\$5,392.00
Amount paid hospitals and radiologists for X-ray films.....	473.60

Fees paid by students.....	\$2,771.00
Amount paid by Teachers' & Inspector's Superannuation Commission...	1,705.30
Amount paid by Ontario Government.....	1,705.30
	\$6,181.60
	\$6,181.60

Exchange

For the school year 1941-42 Mr. W. K. F. Kendrick, Master on the staff of the Toronto Normal School, is on exchange with Inspector C. A. Lapp, Simcoe South and York, and Mr. J. V. McIntyre, Master on the staff of the Hamilton

Normal School, with Inspector J. V. Scanlan, R. C. Separate Division XI. Owing to the taking over of the Toronto Normal School by the Department of National Defence, however, Mr. Lapp was assigned to the Inspectorate of York (1), and Miss M. G. Irving, Master on the staff of the Hamilton Normal School, temporarily transferred to the staff of the Toronto Normal School in place of Mr. Kendrick. Seventeen of the thirty-seven Principals and Masters on the staffs of the eight Normal Schools will have now obtained experience in the inspection field. Several Inspectors who have been on exchange with Normal School Masters are being asked this year to assist in the marking of the Normal School examination papers and to take part in the attending conferences. It is felt that these exchanges are doing much to develop a better understanding between the Normal Schools and the Inspectoral group and to continue an interest in professional training among the teachers-in-service.

Toronto Normal-Model School

In response to an emergency request the property of the Toronto Normal-Model School was in July placed at the disposal of the Department of National Defence, Ottawa, for the duration of the war, to be used as an R.C.A.F. training station. The Toronto Board of Education extended wholehearted co-operation in effecting necessary changes. The Model School was discontinued, its four hundred and fifty pupils being largely absorbed the following September by the Toronto Public School system. The Earl Kitchener Public School property, 870 Pape Avenue, was rented from the Toronto Board of Education to be used as a Normal School during the period of the war. The equipment was transferred from the old building and the school opened happily the following September. Mr. Adam McLeod, Headmaster of the Model School, was appointed Acting-Inspector, Frontenac North and Addington; the services of Mr. C. Sharpe were loaned to the University of Toronto Schools; Miss Jessie I. Cross, B.A., was appointed as a Supervising Teacher in York (3) and (4); Miss Doris R. Soden, Miss Jessie McKay, Mrs. K. Crawford and Miss Marion Evans were attached to the Toronto Public School staff; Mrs. Vera S. Fuller, Secretary, was transferred to the Correspondence Courses Branch of the Department of Education.

Changes in Staffs

In addition to those recorded above the following changes occurred on the staffs of the several Normal Schools of the province:—

In August, 1940, Mr. Francis McCordic, Headmaster of the Toronto Model School, retired after forty-three years of teaching service. Mr. McCordic was born and received his early education in the County of Lambton. After serving as Principal of the Brigden, Point Edward and two of the Sarnia Public Schools he was appointed Assistant Master in 1912, Acting Headmaster in 1923 and Headmaster in 1926, of the Toronto Model School. The high ideals of efficient Christian citizenship which characterized his life and his teaching are carried to-day in the hearts of hundreds of graduates from the old Toronto Model School as the result of his untiring devotion.

In September, 1941, Mr. Adam McLeod, Assistant Master on the staff of the Toronto Model School, was appointed to succeed Mr. McCordic as Headmaster.

In May, 1941, Mr. F. Stanley Rivers, Master on the staff of the North Bay Normal School, was loaned to the Canadian Council of Education for Citizenship to serve as Executive Secretary of that organization.

In June, 1941, Mr. Gordon Apperley, Manual Training Instructor on the staff of the Toronto Normal-Model School, and in the following month Mr. Robert G. Kendall, Assistant Master on the staff of the Toronto Model School, were granted leave of absence for the duration of the war for the purpose of enlisting in His Majesty's Forces.

In September, 1941, Mr. J. D. Deyell was transferred from the staff of the Ottawa Normal School to the staff of the North Bay Normal School; Mr. R. H. Roberts from the staff of the Peterborough Normal School to duty as Inspector, Leeds (1); Mr. W. L. Stricker, Manual Training Instructor on the staffs of the Hamilton and the Peterborough Normal Schools, was appointed temporarily to take over the work of Mr. Gordon Apperley in the Toronto Normal School during the absence of the latter.

Mr. W. J. Neale was granted leave of absence, because of ill health, from September, 1941, to January, 1942, and was superannuated as of February 1st, 1942.

In October, 1941, Mr. Stanley Watson, Master on the staff of the Toronto Normal School, enlisted, and was granted leave of absence for the duration of the war. Mr. F. B. Smitheram, Principal of the Callander Public School, was appointed temporarily to the staff of the Toronto Normal School in place of Mr. Watson.

In March, 1942, Dr. O. E. Ault, Master on the staff of the Ottawa Normal School, who was on leave of absence for the purpose of serving as Adviser to the Director of Technical Instruction, enlisted, and his leave of absence was modified accordingly.

H. E. AMOSS,

Director of Professional Training.

Toronto, March 31st, 1942.

APPENDIX D

REPORT OF THE DIRECTOR OF FRENCH INSTRUCTION ON THE SCHOOLS ATTENDED BY FRENCH- SPEAKING PUPILS, 1941

Appointments

Mr. Henri Lemieux, B.A., B.Paed., formerly on the teaching staff of the University of Ottawa Normal School, was appointed High School Inspector in January, 1941. Previous to his Normal School appointment in 1936, Mr. Lemieux had taught for several years in the secondary schools of Plantagenet and Cornwall and had served as assistant principal and as principal of the Model Training Schools at Embrun and Sturgeon Falls.

Mr. Arthur Godbout, B.A., who was on the Kirkland Lake Collegiate Institute and Vocational School staff, was appointed to the University of Ottawa Normal School to succeed Mr. Lemieux.

Teachers' Training and Qualifications

In 1940-41, there were 187 teachers-in-training at the University of Ottawa Normal School, 23 of whom were enrolled in the First Class course, and 164 in the Second Class course. As a result of the term and final examinations, 21 students were awarded First Class teachers' certificates, and 140 obtained Second Class certificates.

The following table shows the number and percentage of Ontario French-speaking elementary school teachers holding First or Second Class certificates in November, 1941, and the progress made in this regard since 1929:—

	1929	1937	1938	1939	1940	1941
Total number of French-speaking teachers in Elementary Schools.....	1,087	1,281	1,316	1,390	1,416	1,438
Number of above teachers holding I or II Class certificates.....	273	1,018	1,135	1,271	1,311	1,307
Percentage of French-speaking teachers holding I or II Class certificates.....	25.11	79.46	86.24	91.43	92.58	90.89

Age-Grade Distribution of Pupils in Elementary Schools

The following tables present a compilation of the French-speaking School Inspectors' Annual Age-Grade Summary Reports for May, 1941:—

NOTE:—Heavy lines denote ideal age spread for each grade.

The following comparative table, for the years 1938, 1939, 1940, and 1941, shows the marked progress which has been achieved, during the period under review, in the grade-enrolment distribution of French-speaking classes in all elementary schools:—

Separate and Public Schools

Grade	1938		1939		1940		1941	
	Number	Per cent	Number	Per cent	Number	Per cent	Number	Per cent
I.....	11,216	23.66	8,955	18.16	8,539	17.12	8,676	17.25
II.....	6,992	14.75	7,148	14.49	7,057	14.15	7,021	13.96
III.....	4,974	10.49	6,631	13.45	6,803	13.64	6,938	13.80
IV.....	5,548	11.71	6,364	12.90	6,541	13.11	6,454	12.84
V.....	5,828	12.30	5,883	11.93	6,043	12.12	6,166	12.26
VI.....	4,775	10.07	5,136	10.41	5,036	10.09	5,226	10.39
VII.....	3,764	7.95	4,018	8.15	4,284	8.58	4,141	8.23
VIII.....	2,913	6.15	3,436	6.97	3,741	7.50	3,902	7.75
IX.....	727	1.52	893	1.81	948	1.90	915	1.82
X.....	443	.93	587	1.19	646	1.29	605	1.20
Auxiliary Classes.....	217	.46	268	.54	251	.50	252	.50
Totals.....	47,397	100.00	49,319	100.00	49,889	100.00	50,296	100.00

A study of the above statistics reveals that: (1) The many repeaters who, before 1939, swelled considerably the enrolment of the Grade I classes, have gradually disappeared; (2) The enrolment in each of the first six Grades of the elementary schools is now almost normal; (3) The percentage of enrolment in the Grade VIII classes has increased from 6.15, in 1938, to 7.75, in 1941.

It is confidently expected, therefore, that, through a continued effort on the part of teachers and inspectors, the enrolment in the Grade VIII classes will attain approximately 10 per cent of the total school enrolment within the next two or three years.

Mattawa High.....	10	4	6	4	24
Ottawa Technical.....	68	39	107
Paincourt Continuation.....	10	9	6	9	34
Penetanguishene High.....	21	21	4	2	48
Plantagenet High.....	25	16	19	12	8	80
Rockland High.....	34	22	16	7	1	80
Smooth Rock Falls Continuation.....	17	5	1	23
Sturgeon Falls High.....	38	32	25	25	1	121
Sudbury High and Technical.....	40	23	10	14	4	91
Tilbury High.....	5	4	9
Timmins High and Vocational.....	76	35	17	9	137
Vankleek Hill Collegiate.....	10	8	8	1	2	29
Totals.....	584	336	168	119	32	1,249

NOTE:—The absence of students in the higher grades of some of the above schools is due to the fact that the advanced French courses were just recently established.

This total enrolment of 1,249 French-speaking students in the secondary schools compares favourably with the totals reported for 1938 (839), for 1939 (1,027) and for 1940 (1,102). Indeed, the 1941 total enrolment represents an increase of almost 50 per cent over the 1938 total enrolment. There are besides, some 2,500 French-speaking students who are pursuing their studies in the Grade IX and Grade X classes of the elementary schools, [Table No. 1, (A), (i), of this report], and in private schools. Some of the latter are inspected by the Department of Education for the purpose of accepting, or not accepting, the teachers' recommendations in respect to pupils who are candidates for middle school certificates.

Although much satisfaction is derived from the progress made so far, it is yet evident that much remains to be done throughout the province in order to raise the percentage of the French-speaking secondary school enrolment from the present 6 or 7 per cent to at least 18 or 20 per cent of the total French-speaking school enrolment. Of course, as was stated in previous reports, the main cause of this low and rapidly decreasing enrolment from grade to grade in the secondary schools is to be found and eradicated in the elementary school classes. Once the problem is solved in the elementary department of the school—and according to present indications this task will be completed within the next two or three years—there should be an automatic improvement in the secondary school enrolment and age-grade distribution of pupils.

The appointment, in 1941, of a French-speaking high school inspector has already proved beneficial in improving the general proficiency of the secondary school classes attended by French-speaking students and in promoting a greater desire for higher education among the French-speaking population of Ontario.

Provincial Contest

The finals of the fourth annual provincial contest among the Grade VIII French-speaking pupils were held in Ottawa on April 17th, 1941. Twenty-four contestants—the winning boy and the winning girl from each of the twelve French-speaking inspectorates—took part in this final competition. The four provincial winners, the first two of whom were awarded secondary school scholarships, were as follows:

- 1st boy: Roger Blanchette, 13, St. Joseph School, Sturgeon Falls;
- 1st girl: Rita Mainville, 12, St. Charles School, Timmins;
- 2nd boy: Gilles Petitclerc, 13, St. Jean-Baptiste School, Ottawa;
- 2nd girl: Denise Ralph, 12, St. Conrad School, Ottawa.

The interest aroused by this annual competition is ever increasing. Besides drawing parents and teachers into closer co-operation, the provincial contest encourages the talented pupils to undertake and complete their secondary school education.

Inspectoral District Enterprises

As was stated in a previous report, the French-speaking inspectors were asked, in 1939, to undertake during 1940 and every year thereafter, in their respective inspectorates, one special enterprise bearing on some particular phase of education. It was suggested also that these enterprises, which should aim at correcting a general weakness throughout the inspectorate or at fostering a new and valuable idea in education, be carried on in a scientific manner by taking note of essential data, such as existing conditions at the outset, means employed, difficulties encountered, and results obtained.

Interesting reports were received from the inspectors at the close of the year. Some of the topics for special research in French-speaking inspectorates, during 1941, were as follows: how to improve the pupils' handwriting; group meetings of school trustees and secretaries; the development by pupils and teachers of a Grade I supplementary reader in social studies; how to secure better results in French and English spelling; arousing general interest in the activities of the Ontario Junior Red Cross Society; how to improve the teaching of written composition; the beautification of school properties.

The following excerpts are taken from the report submitted by Inspector J. S. Gratton, of Plantagenet, on: "*The Beautification of School Properties*":—

"Following the receipt, early in March 1941, of "Suggestions for Improvement of Rural School Grounds", issued by the Ontario Department of Education, and "Trees for Schools", issued by the Ontario Forestry Branch, all rural school teachers, members of municipal councils and local Agricultural representatives were invited to co-operate in a school grounds improvement enterprise.

In view of the generous offer of the Forestry Branch to supply young forest trees to schools free of charge, except for transportation, and the offer also of the local Horticultural Societies of the free delivery of shrubs at reduced prices, it was decided that the planting of trees and flowering shrubs should be first undertaken in this campaign.

The accompanying plans, order forms, circulars and correspondence give, better than would a detailed account, an insight into the means adopted to carry out the enterprise successfully.

It is to be noted, however, that of the 16,000 trees distributed, approximately 60% were planted on the school grounds by the pupils in co-operation with the teacher and the school trustees; the others were brought home by the pupils and planted on the farm.

A survey, made during the month of September last, revealed that, despite the very dry spell that followed the planting last May, at least 90% of the trees placed on the school grounds had survived the excessive drought and were doing well. The willingness and enthusiasm with which both teachers and pupils cared for the young trees after they were planted largely account for this success."

The successful enterprise described above by Inspector Gratton will doubtless serve as a powerful incentive in some of the other inspectorates.

"L'Association de l'Enseignement français de l'Ontario"

After one year of successful operation, this provincial association of French-speaking teachers and inspectors held its second annual convention in Ottawa on April 17th, 18th and 19th, 1941. Mr. Omer Brûlé, B.A., of the Ottawa Technical School teaching staff, was elected president for the year 1941-42.

This association, as was stated in last year's report, comprises three sections and is composed of French-speaking elementary and secondary school teachers, inspectors and normal school masters of Ontario. It resembles closely, on a smaller scale, the Ontario Educational Association, and, in co-operation with the latter, will no doubt promote the best interests of French education in this province.

Correspondence Courses in French

In view of the fact that approximately 10 per cent of the pupils enrolled in the Departmental correspondence courses are French-speaking, and in response to several requests which were received from interested families, the Minister decided, in the autumn of 1941, to include in this service the same courses and examinations which are provided for French-speaking pupils in the public and separate schools of the province. An experienced and successful French-speaking teacher, Miss Hélène Lacasse, was appointed to the correspondence school staff in the Department and the preparation of these new courses was undertaken.

In September 1942, the Grade I courses for French-speaking pupils will be ready for distribution, and it is expected that from year to year the programme

of the next Grade will be added until the full elementary school course will have been developed.

This is by no means an easy task. However, it is confidently expected that by following the splendid system already established for English-speaking pupils, and with the co-operation of the French-speaking normal school masters, inspectors and teachers, the results will constitute an achievement worthy of note in the field of French and English education.

ROBERT GAUTHIER,
Director of French Instruction.

Toronto, June 30th, 1942.

APPENDIX E

REPORT OF THE INSPECTOR OF AGRICULTURAL CLASSES

Present Status of Instruction in Agriculture

Agricultural instruction is now well established in the elementary schools of Ontario. The optional courses in Agriculture for Grades VII and VIII are taught in approximately half the schools while agricultural topics of the courses in Science for these grades and of Natural Science for lower grades are taken in many others. The value and importance of instruction in agricultural topics is now recognized and approved by the majority of trustees and parents. Inspectors of Public and Separate Schools are giving every encouragement and in many inspectorates the subject is being taught in all schools. The depth and effectiveness of the instruction is limited only by the qualifications and zeal of the teachers. Unfortunately the number of qualified teachers is being reduced because of the entry of many teachers into various branches of the war effort and the discontinuance of Summer Courses. Effective courses of instruction are being given at the Normal Schools and many teachers without special agricultural certificates are doing excellent work. The programme for "Improvement of Rural School Grounds" has, in many instances, provided an interest and activity which has enlisted the co-operation of trustees, parents, teachers and pupils. It has indeed made the school property a centre of interest in the community.

During the past ten years there has been a marked increase in interest in agricultural instruction in secondary schools. In present courses agricultural topics are combined with essential science topics giving a course which meets the requirements in Science for normal school entrance and pass matriculation. Cordial support of these courses is now voiced by trustees and parents. The number of schools in which the work is taken is limited only by the number of teachers available. Boards are anxious to continue the instruction and when qualified teachers leave, they make strong efforts to secure qualified teachers or those who, because of experience and aptitude, may be granted temporary certificates. The entry of many of these qualified teachers into various war services has had its effect. It is necessary to recognize that the courses in Agricultural Science for Grades IX, X, XI and XII give only a limited time for agricultural topics. Special or extended study of individual topics is seldom feasible for any pupil or group of pupils. Practical work in gardening, fruit growing, poultry and beekeeping is possible and one or all are taken in many schools. The knowledge gained from these general courses is of value to all pupils and of particular value to those who may later engage in farming. In only twelve of the 168 schools in which Agriculture is taught have special courses been provided for pupils who expect to farm. In these schools a reasonable proportion of students are enrolled in these courses which are being successfully conducted.

Unfortunately, in Ontario only a limited number of pupils who are completing Grade VIII or entering secondary school expect to become farmers. This is true

of children of farmers as well as children of others. Commercial and industrial occupations have so great an attraction that it has been difficult to introduce courses in Agriculture, apart from the Regular normal entrance and pass matriculation courses. While the objective of pupils on entering the secondary school is generally away from the farm, records show that many who drop out during the first two or three years eventually find employment on the farm. A change of viewpoint on the part of parents and others is needed so that farming may be rated on a par with commerce and industry in the national economy. It must also be recognized that with the present equipment and teachers much that is of value in practical Agriculture may be taught during the school life of the pupil. The scarcity of farm labour has drawn thousands of pupils from secondary schools to help on farms during the summer. Many of these pupils are from urban schools. They will doubtless find farm activities interesting and gain an understanding of various farm operations. The importance of production of food materials as a part of the war effort is being stressed in every quarter. Thus present day pupils should understand fully the importance of agriculture to individual and national welfare. The recognition of this should arouse, in a larger number of pupils, a keen interest in farming as a future vocation. In the very near future there should be a greater demand for definite vocational agricultural courses linked with summer employment on the farm to provide a suitable training for those who will eventually become farmers.

Elementary Schools

Information received for the school year ending June 30th, 1941, indicates that interest in agricultural instruction and related activities is being well maintained under present conditions. Agricultural courses for Grades VII and VIII were taught in 4,291 schools of which 359 were urban. Reports claiming grants as refunds of expenditure were received from 2,784 schools. The courses for Grades IX and X were taught in 327 schools.

The courses as outlined for Grades VII and VIII cover various agricultural topics and the Regulations require that four of nine suggested activities must be conducted. One of these, "Improvements of School Grounds" has received special attention during the year. Under the direction of the inspectors and with the co-operation of officials of the Departments of Agriculture and Forestry, and the assistance of members of Horticultural Associations, trustees, teachers and pupils have made a marked improvement in the appearance of school grounds in many inspectorates. Particular attention has been given to schools located on main highways. Improvements made include new fences or old ones repaired, better care of the school grounds during the summer, planting shrubs, trees and flowers. In some cases the grounds have been levelled and re-seeded. Good progress has been made in the second year of this effort in spite of war conditions. School gardens number 1,129, a reduction as compared with last year. In many schools the attention formerly given to the school garden is being given now to improvement of the grounds.

The scope and effectiveness of the instruction varies greatly and is dependent on the interest and knowledge of the teacher and on the attitude and co-operation of the trustees and members of the community. The number of certificated teachers for 1940-41 was 2,303 as compared with 2,943 in the previous year. This reduction is largely accounted for by the fact that there have been no summer courses during the past two years.

BEAUTY FOR RURAL SCHOOLS

Courtesy Ontario Department of Agriculture

S.S. 11, Amabel, Sauble Falls, Bruce County

Winner of the 1941-42 School Ground Competition of the Ontario Horticultural Association in which some 250 rural schools took part.

This award is given, not for total beauty, but for the improvement made during the year. The score card lists clean-up, repairs, paint, lawns and playgrounds, new planting, weeding, and general care.

School Fairs were conducted in a number of inspectorates either as separate fairs under local committees of teachers and other interested parties or in conjunction with fall fairs. In several of the northern inspectorates the school fair programme has been carried on very effectively with only a small reduction in the number of fairs as compared with two years ago.

Secondary Schools

In the autumn of 1941 Agricultural Science was taught in 27 Collegiate Institutes, 82 High Schools and 59 Continuation Schools, a total of 168. The subject was introduced in two Continuation Schools and discontinued in two High Schools and one Continuation School because of change of teachers and in one Continuation School which was closed. Both Lower and Middle School courses are taught in 126 schools, an increase of one over last year. The Middle School courses in Agricultural Science are valid for Middle School Science requirements for entrance to Normal Schools, University Courses and Training Schools for Nursing.

The number of teachers employed was 213 of whom 122 held the Specialist Certificate in Agriculture and 91 were graduates of the Ontario Agricultural College. Because of enlistments, smaller classes in the Specialist Courses at the College of Education, and discontinuance of summer courses in Agriculture, there was a scarcity of qualified teachers and temporary certificates were issued for teachers in two Collegiate Institutes, one High School and seven Continuation Schools.

The courses followed are those of Grades IX, X, XI and XII in which agricultural topics are taken with essential topics in Science. All schools are now well equipped for practical work in the various agricultural topics which are taught in the classroom or laboratory. School gardens are maintained in 152 schools and students have practice in planting and care of vegetables and flowers. Fruit trees and small fruits have been planted in many gardens and on larger areas a three-year crop rotation is followed. Small poultry houses have been provided at 14 schools. Chicks are raised in the spring, fowl fattened in the fall and laying stock kept through the winter months in most of these buildings. One or more colonies of bees are kept at 18 schools and instruction in this subject is practical. Frequently students start beekeeping at home as a result of instruction at school. Greater attention is being given to productive home projects and in many schools students are rearing chickens, keeping records of egg and milk production and growing farm crops at home. Many students are members of various clubs conducted by the Agricultural Representatives. Growing of vegetables for home use is being stressed as a desirable home project for the coming year.

Agricultural Departments under the High Schools Act are maintained at Drayton, Elmira, Listowel, Port Perry, Whitby and Wheatley and under the Vocational Education Act at Beamsville, Kemptonville, Simcoe, Stamford, Renfrew and Ridgeway. The courses in Agricultural Science are taught in these schools, and additional time is provided for Agriculture and greater stress given to practical applications than in other schools. Good work is being done in all these departments.

The subsequent paragraphs of this report give statistics and comments relative to the progress of agricultural instruction in elementary schools, secondary schools, summer schools and the normal schools.

Year	Number of Schools	With School Gardens	With Home Gardens
1903.....	4
1914.....	264	208	56
1928.....	3,395	1,059	2,336
1937.....	5,065	1,580	3,485
1940.....	3,879	1,446	2,433
1941.....	4,291	1,129	(indefinite)

Figures prior to 1941 are based on the number of schools qualifying for grants. For 1941 the figure covers the schools where the courses were taught. Grants were claimed for 2,784 of these schools.

The following table shows the certificates held by teachers engaged in the work for the years given:

Year	Elementary	Elementary Part I	Intermediate	Intermediate Part I	Totals
1934.....	1,552	86	144	10	1,792
1936.....	2,092	208	188	22	2,510
1938.....	2,864	444	259	52	3,619
1939.....	3,132	238	312	33	3,715
1940.....	2,508	112	307	16	2,943
1941.....	1,956	94	236	17	2,303

In addition to the courses for Form III and Form IV, Agriculture of the Lower School course was taken in fifth classes of 327 schools under the Regulations for Public and Separate Schools. The Lower School courses taught by a teacher holding an Intermediate Certificate are taken under the High School Regulations in the following schools: Elizabeth Ziegler Public School, Waterloo; Mono Mills Public School; St. Andrew's West Separate School; St. Raphael's West Separate School; Victoria Public School, Kitchener; Toronto Public Schools: Brown, General Mercer, McMurrich, Perth Avenue.

Secondary Schools

Instruction in Agriculture in secondary schools is provided under three schemes as stated below and may be taken in those schools which meet the requirements of the Department of Education.

1. Optional classes in Lower and Middle School as a part of the course for Normal Entrance or Matriculation.
2. Department of Agriculture under the High Schools Act.
3. Department of Agriculture under the Vocational Education Act.

Under scheme (1) above, Agriculture was taught during the year in the schools listed below. Under (a) are the schools in which Lower School courses only are taken, and under (b) both Lower and Middle School courses.

Collegiate Institutes

(a) Clinton, Cornwall, Goderich, Ingersoll, Kitchener, Oshawa, Perth, Seaforth, York Memorial, Vaughan Road. Total 10.

(b) Barrie, Belleville, Brockville, Cobourg, East York, Fort William, Lindsay, Napanee, Orillia, Picton, Port Arthur, Renfrew, Runnymede, Scarborough, Smith's Falls, Stamford, Strathroy. Total 17.

High Schools

(a) Bracebridge, Cobalt, Durham, Englehart, Essex, Markham, Marmora, Mattawa, Maxville, Meaford, Merritton, Mount Forest, Newcastle, Niagara, Orangeville, Port Credit, Tilbury. Total 17.

(b) Alexandria, Alliston, Amherstburg, Arthur, Athens, Beamsville, Blenheim, Bowmanville, Brighton, Burford, Burlington, Caledonia, Cayuga, Chesterville, Dundas, Dunnville, Elmira, Fergus, Forest, Grimsby, Hagersville, Haileybury, Harrow, Havelock, Iroquois, Kemptville, Kincardine, Kingsville, Lakefield, Leamington, Listowel, Lucan, Madoc, Markdale, Midland, Milton, Mitchell, Morewood, Nepean, Newburgh, New Liskeard, Norwich, Norwood, Oakville, Omemee, Petrolia, Port Elgin, Port Perry, Ridgetown, Saltfleet, Shelburne, Simcoe, Smithville, Stirling, Streetsville, Sydenham, Trenton, Tweed, Uxbridge, Waterdown, Waterford, Watford, Whitby, Williamstown, Winchester. Total 65.

Continuation Schools

(a) Ailsa Craig, Arkona, Bothwell, Burk's Falls, Chatsworth, Coldwater, Eganville, Elgin, Forester's Falls, Forest Hill Village, Grand Valley, *Hepworth, Minesing, Richard's Landing, *Seeley's Bay. Total 15.

(b) Agincourt, Ayr, Beaverton, Brooklin, Brownsville, Comber, Drayton, Drumbo, Embro, Florence, Fordwich, Ilderton, Inglewood, Little Britain, Lobo, Lynden, Lyndhurst, Melbourne, Merlin, Merrickville, Milverton, Mindemoya, Mount Albert, Mount Brydges, Mount Elgin, Mount Pleasant, New Dundee, New Hamburg, Orono, Pelham, Port McNicoll, Princeton, Russell, St. George, Sparta, Stevensville, Sundridge, Tamworth, Teeswater, Thamesford, Thamesville, Tiverton, Wheatley, Woodville. Total 44.

A summary of the above shows that Agriculture is now taken in twenty-seven Collegiate Institutes, eighty-two High Schools and fifty-nine Continuation Schools, a total of 168. During the year the work was introduced in two Continuation Schools and was discontinued in two High Schools, and two Continuation Schools. Both Lower and Middle School courses are taken in one hundred and twenty-six schools.

The following abbreviated table shows the development in this phase of instruction since its beginning in 1913 and the number of schools now taking the work.

Year	Collegiate Institutes	High Schools	Continuation Schools	Total
1913.....		1	1	2
1918.....	8	13	4	25
1928.....	14	44	23	81
1933.....	24	54	33	111
1940.....	27	84	59	170
1941.....	27	82	59	168

*Introduced Agriculture in September, 1941.

Two hundred and thirteen teachers are engaged in giving instruction in Agriculture. Of this number, one hundred and twenty-two hold the Specialist Certificate, ninety-one being graduates of the Ontario Agricultural College. Ten teachers have been granted temporary certificates.

The following schools are taking work under the scheme indicated in (2) above: Drayton, Elmira, Listowel, Port Perry, Wheatley and Whitby. Additional time is given to Agriculture and practical phases of the subject are stressed. At Elmira, Port Perry and Whitby provision is made for Shop Work for boys and Home Economics for girls.

Under (3) above, the following schools are qualifying for grants under the Vocational Education Act: Beamsville, Kemptville, Renfrew, Ridgetown, Stamford and Simcoe. In all, provision is made for instruction in Shop Work and in all except Stamford for Home Economics. The regular courses in these subjects, with special emphasis on agricultural applications, are being followed. In all centres practical applications of agricultural topics are stressed, a regular programme of home project activities is conducted and the teachers visit the homes of pupils to inspect the projects undertaken.

Normal Schools

There have been no material changes in the Normal School course in Agriculture. Except in the University of Ottawa Normal School, instruction in Agriculture is a part of the regular course and the subject is taken by all students. Students who have taken four years of Agriculture in an approved school during their Secondary School course are granted an Interim Elementary Certificate on successfully completing the Normal School course. Others must attend summer school to secure a certificate in Agriculture.

Facilities for instruction in practical phases of gardening and other topics are provided, the instructors are all qualified in Agriculture and a good course is given as far as the time allotment on the Normal School programme will allow.

NORMAN DAVIES,

Inspector of Agricultural Classes.

Toronto, August 14th, 1942.

APPENDIX F

REPORT OF THE INSPECTOR OF AUXILIARY CLASSES

Teachers' War Service

Miss Jean Hampson of the Wellesley Orthopaedic School, and demonstrator in Occupational Therapy for the University of Toronto, has been appointed Director of Occupational Therapy and Supervisor of Instruction in Occupational Therapy at the Astley Ainslie Institute, Edinburgh, Scotland. This appointment was made by the Board of Health for Scotland.

Mr. C. Elliot and Mr. W. D. Royle of the Church Street School for Boys and Mr. Elgin Fretz of the Kitchener Boys' Handicraft Class are serving in the Royal Canadian Air Force. Mr. George Charlton of Kitchener Boys' Handicraft Class, Mr. Kenneth Marsh, Drew School, Fort William, Mr. Charles Eldert of Wellington School, St. Thomas, Mr. R. Carter of Chatham Boys' Handicraft Class, Mr. D. C. Warren of the Smith's Falls Handicraft Class are serving with the Canadian Army. Mr. F. W. Palmer and Mr. A. M. Patterson of Church Street School are giving instruction to the War Training Classes.

Pupils' War Work and Service

The war has affected the instruction in handwork. The knitting of afghans, mufflers, sweaters, socks and mittens is a standard feature in all mixed classes. The mufflers, sweaters, socks and mittens have met the specifications and standards of the Red Cross Society. Layettes are made by senior girls. Ditty bags for soldiers and sailors and shelter bags for those bombed out have been made, filled and forwarded to the regular depots. Sewing of quilts and dresses has a greater appeal when it is known that the product goes to people in the war areas.

The boys at the Church Street School, Toronto, have made several hundred wood and metal leg-splints with materials donated by the Red Cross Society. At Warren Park Handicraft School the pupils made scale-models of aeroplanes which were accepted by an R.C.A.F. Wireless School for Training airmen in spotting.

Collections for the Junior Red Cross and the methodical purchase of War Savings Certificates have a regular place in the programme.

Graduates of the Handicraft Classes have enlisted in the armed forces in considerable numbers. Mr. H. O. Lydford's Handicraft Class in North Bay is a sample. This class has been in operation ten years. As of December 1941, the record of this class is that forty-seven graduates have enlisted in the infantry, ordnance and the engineers. One graduate is a sergeant of engineers while another is a corporal of signals.

Teacher Supply

Military and war service has affected the supply of teachers. In replacing the nine teachers on active and war service, it was necessary to appoint four teachers without training in auxiliary work.

In the city of Toronto the retirement or marriage of fourteen teachers resulted in temporary closing of eight Opportunity Classes. One of the Toronto classes is in charge of a teacher without the usual special training.

In other schools the promotion of the teacher of the Opportunity or Handicraft Class has resulted in the employment of certificated teachers without special training.

In all, twenty-seven teachers were granted temporary certificates valid for one year and limited to a particular class.

Urban Organization

A survey was conducted in Brockville as a preliminary to the establishment of the Boys' Handicraft Class. New Opportunity Classes were opened in MacDonald School, Kingston; Ryerson School, Brantford; Prince of Wales School, Hamilton; Holy Name School, Toronto. Handicraft Classes were established in Victoria School, Windsor; Central School, Brockville, and in Kitchener School, Niagara Falls.

Due to retirements, marriage and war service, and the reduction in the number of candidates for the classes, twenty-three classes were closed as follows:—

Opportunity Classes—St. Michael's School, Belleville; Grimsby Public School; Hespeler Public School; Preston Separate School; Kitchener School, Niagara Falls; Balaclava School, St. Thomas; Myrtle St. School, St. Thomas; S.S. No. 6 Stamford; Bruce School, Toronto; Earl Grey School, Toronto; Gledhill School, Toronto; Leslie School, Toronto; Orde School, Toronto; Roden School, Toronto; Sackville School, Toronto; Wellesley School, Toronto.

Handicraft Classes—St. Francis School, Ottawa; Shakespeare School, Stratford; Ealing School, London; Victoria School, Kitchener (2 classes).

Sanatorium Classes—Freeport Sanatorium, Kitchener; Brant Sanatorium, Brantford.

The closing of classes in London, Kitchener and St. Thomas is directly attributable to military or war service. The Belleville and Preston Separate School classes are being continued on the same plan as is provided for Auxiliary Units in rural schools. In S.S. No. 6 Stamford, more space was required due to the influx of the families of war workers. In Niagara Falls, the Opportunity Class was closed and a Handicraft Class established.

Rural Organization

Surveys of the following rural inspectorates were carried out by Miss DeLaporte and myself in conjunction with the inspectors concerned.

Inspectorate	Inspector	Number of cases
*Bruce East, Grey (part), Huron (part).....	J. M. Game.....	108
†Grey North and Bruce North.....	J. J. Wilkinson.....	13
Halton.....	L. L. Skuce.....	70
†Hastings South.....	J. R. Pickering.....	13
Huron North.....	J. H. Kinkead.....	41
Leeds and Grenville No. 2.....	E. Oakes.....	93
†Ontario South.....	R. A. Hutchison.....	14
Peterborough East.....	L. W. Copp.....	105
†Renfrew North.....	N. Campbell.....	17
†Welland (part), Lincoln (part).....	W. A. Marshall.....	13
†Welland South.....	N. R. Wightman.....	22
*District Division VI.....	W. MacMillan.....	112
District Division VII (1).....	O. M. MacKillop.....	65
District Division VIII (1).....	J. W. Trusler.....	96
District Division XIV.....	E. R. Underhill.....	49
R.C. District Division XVII.....	C. P. Matthews.....	100

*Second survey.

†Partial survey.

In all, 931 pupils were examined and advisements made concerning their educational welfare. Through the co-operation of the local Inspector and the several school boards, special educational facilities have been provided for the large majority of those who were found to stand in need of assistance. Up to the present time fifty-one rural inspectorates have been completely and eighteen others partially surveyed and organized. Of the fifty-one rural inspectorates which have had complete surveys in the past, six have had the survey repeated after a period of four, five or six years. The areas which have had a second survey have shown at the end of a five-year period as great a number of pupils as the original survey.

There are 118 Home Instruction Units, 51 Sight Saving Units, 8 Transportation Units and 842 Opportunity Units reported for grants. A larger number of Opportunity Units exist but have not reported expenditures for the current year. The number of Sight Saving Units is unusually small this year. This may be due to the fact that it is more difficult to import books printed in 24 point type, especially for this purpose.

Reports from inspectors and teachers show that upwards of 50 per cent. of the pupils in Opportunity Units are re-adjusted to grade work; that the establishment of Sight Saving Units enables pupils suffering from defective vision to maintain normal grade progress; and that the provision of a Visiting Teacher for home-bound sick and crippled children has equally beneficial results.

Sight Saving Books

Since the war, the purchase of large-type books for pupils in Sight Saving Classes and Units has declined considerably. Foreign exchange costs have increased the prices of imported books to the point where their cost exceeds the maximum amount of the reimbursement grant.

To offset the greatly reduced supply of imported books, and to provide the texts based on the Ontario Course of Study, the Treasury Reader Grade V (Part I) has been duplicated on the magnatype typewriter under permission from the publishers, the Macmillan Company of Canada, and the Ryerson Press. Four Sight Saving teachers of Toronto have prepared a Workbook, Social Studies Grade VI, which has been duplicated on the typewriter with the permission of the authors.

At the present time magnetyped reading material is available for Grades I, III, IV and VIII without charge to pupils who require Sight Saving instruction. There is an adequate supply of Ontario Spellers for all grades and sufficient Social Studies workbooks for Grades V and VI.

To provide magnetyped reading materials, a graded list of books in 18 point, 24 point, 36 point and 72 point type was made in December, giving the name of the publisher, the type size and the title. This list shows where Supplementary reading materials may be found for Grades II, VI and VII, for which free books are not yet available. These lists have been provided to all inspectors and to all teachers of Sight Saving Classes.

Miss Louise E. Rush, Senior Sight Saving teacher of the Toronto Public Schools, resigned after having given sixteen years' service to this important branch of Auxiliary work. Miss Rush was appointed to the Orde Street School class in 1925. In 1932 the class was transferred to Hester How School where Miss Rush taught pupils of Grades VII, VIII, IX and X, until her retirement in June 1941. Miss Rush was a pioneer in Sight Saving instruction and was frequently employed as an instructor at teachers' summer courses at Columbia University.

Multiple Handicaps

Experience in teaching pupils who fail at school shows that failure is not often due to one single cause, deficiency, handicap or disability, but that it is a result of a combination of factors. To provide data on the handicaps of their pupils, all special class teachers were asked to make out a class summary in September 1941, to show the actual rating of their pupils in Reading, Arithmetic and Crafts in comparison with the estimate of the progress which would be expected at the individual pupil's mental age. Under "Remarks" the teachers listed physical handicaps from the A. D. P. cards on the medical reports.

A report on a part of the data is possible because in December 1941, nine hundred and nine pupils had been reported by 46 teachers of various types of Auxiliary classes. Their handicaps were classified as Reading, Speech, Visual, Hearing, Lowered Vitality, Orthopaedic, Cardiac, Anti-Social Behaviour, Emotional Instability and Economic Deficiency. The terms used in this survey describing academic ability are as follows:

- (1) Superior refers to pupils who could pass the High School Entrance Examination at age 12 to 13;
- (2) Average indicates pupils who could pass the Entrance at 13 years 6 months to 14 years 6 months;
- (3) Slow Learner is the term used for pupils who could pass the Entrance at 15 or 16 years;
- (4) Retarded means those pupils who could not be expected to go beyond Grade VI in the elementary school.

Three tables have been prepared from these data,—

1. Summary of All Reported Handicaps.
2. Summary of Reported Physical Handicaps.
3. Classification of Pupils according to Academic Capacities.

Summary of Reported Handicaps of 909 Auxiliary Class Pupils

Number of Handicaps	Number of Pupils	Per cent.
1.....	205	22.6
2.....	476	52.4
3.....	202	22.2
4.....	22	2.4
5.....	4	.4
Total.....	909	100.

Summary of Reported Physical Handicaps of 909 Auxiliary Class Pupils

Handicap	Number of Pupils	Per cent.
Speech.....	73	8.0
Visual.....	36	4.0
Hearing.....	29	3.2
Orthopaedic.....	16	1.8
Lowered Vitality.....	233	25.6
Cardiac.....	2	.2
Total.....	389	42.8

Classification of 909 Auxiliary Class Pupils According to Academic Capacities

	Number	Per cent.
Superior.....	6	0.6
Average.....	228	25.1
Slow Learners.....	316	34.8
Retarded.....	359	39.5
Total.....	909	100.

The facts stated in the summary bear out the general experience that most pupils in need of special methods, materials and instruction have more than one handicap, and that 42.8% of the pupils are physically handicapped. Over 90% of these pupils are retarded in Reading. The data indicate that 60% of this limited group might pass the High School Entrance examination before they reach the school leaving age if their handicaps could be overcome. They also support the statement on page 47 of the 1937 Report of the Minister of Education, that there will be an increased placement in Auxiliary classes of ". . . children who . . . have failed to acquire the art of reading, but may, after a certain period of special training, be returned to the classes for slow but profitable grade progress". More pupils are being admitted for readjustment and ultimate return to the grade. This group is a partial sampling of nearly all types of Auxiliary classes and the exact percentages may vary widely when all Auxiliary pupils are included. The survey is being continued.

The Use of Class Hearing Aids

In Rosedale School, Toronto, a Class Hearing Aid has been in use for some years. Experience with this machine has demonstrated that speech can be taught better to hard of hearing pupils with the machine than without it.

The Ottawa Public School Board installed a completely Canadian-built Class Hearing Aid in the Oral and Hard-of-Hearing Class under Miss Stirk at Cambridge Street School.

At Ogden School, Toronto, Miss Ruth Miller, teacher of the Hard-of-Hearing Class, in association with Mr. Clair Maedel, principal and Mr. H. B. Henshaw, caretaker of the same school, built a class Hearing Aid, using an existing school radio receiver and microphone and additional materials on which about ten dollars (\$10.00) was spent.

In all three of these classes the tone and quality of the speech is definitely superior to that of classes where the hearing aid is not used. In the Ogden School, phonograph records of the voices of all hard-of-hearing pupils were made in March 1941, in order that their progress may be studied. In December a comparison of the pupils' voices with the phonograph record showed that high-pitched voices had been lowered noticeably and that certain letter substitutions had been corrected in the intervening six months. It is planned to record the voices of the pupils of the Ogden hard-of-hearing class in March 1942. Such records will be extremely valuable in judging the progress of the pupils and in the training of teachers of Speech Correction.

Auxiliary Organizations

(a) Brief courses were given in each of the Normal Schools to acquaint teachers-in-training with methods of dealing with handicapped slow-learning and retarded pupils, especially with those in the rural schools. The many com-

munications received by the Department from recently graduated teachers concerning exceptional children in their charge is ample proof of the interest created in the welfare of handicapped children by these Normal School lectures.

(b) The Auxiliary Class Section of the 1941 O.E.A. was well attended, and a number of Ontario representatives took part in the 1941 Convention of the International Council of Exceptional Children held in New York City. Both meetings were productive of renewed enthusiasm for this work.

(c) "The Special Class Teacher", a magazine devoted to the interests of special education and published by the Auxiliary Class Section of the O.E.A., continues successfully to publish and distribute interesting articles and valuable suggestions contributed by auxiliary class teachers throughout the Province.

(d) The Summer Course in Auxiliary Education was not given this year. Eleven teachers pursued studies in various universities to improve their professional knowledge. Four attended summer courses at Columbia University and the University of Michigan. Five attended summer courses in Ontario Universities and two completed their trade training by taking positions in industry. Two teachers were employed as lecturers in the summer courses at Columbia University.

C. E. STOTHERS,

Inspector of Auxiliary Classes.

Toronto, April 15th, 1942.

APPENDIX G

REPORT OF THE DIRECTOR OF SCHOOL ATTENDANCE

The effects of war are many and varied. As men enter the various branches of the service there are opened up for others the positions left vacant by them. The result is that thousands of women and adolescents are now engaged in industrial occupations who previously were unemployed. Then, too, we have not yet completely recovered from the ill effects of the years of depression. These two conditions account to a great extent for the decrease in school enrolment as shown in the comparative table below.

Table No. 1—Enrolment

	1938-39	1939-40	1940-41	Increase or Decrease
Public Schools	453,182	441,143	433,597	7,546 decr.
Separate Schools	104,466	102,180	100,317	1,863 decr.
High Schools and Collegiate Institutes	72,247	73,102	67,391	5,711 decr.
Continuation Schools	9,866	10,048	9,202	846 decr.
Vocational and Special Industrial Schools—				
Day Classes	35,779	37,900	33,082	4,818 decr.
Night Classes	36,481	34,983	31,848	3,135 decr.
	712,021	699,356	675,437	23,919 decr.

The number of teachers employed in the Elementary schools decreased from 18,046 to 17,954, a difference of 94. The number of schools, however, increased, despite the fact that because of small attendance a number of schools were closed; the Public Schools from 6,485 to 6,528, a difference of 43 and the Separate Schools from 859 to 872, a difference of 13. When schools are closed the pupils are transported to neighbouring schools where they have the advantage of better equipment and a larger social environment.

Table No. 2—Percentage Attendance

Class of School	1936-37	1937-38	1938-39	1939-40	1940-41
City Schools	92.49	92.96	91.5	92.8	92.5
Town Schools	92.67	93.08	92.2	93.3	92.5
Village Schools	91.83	91.95	91.0	92.7	
County Rural Schools	87.65	88.77	89.6	90.3	89.3
District Rural Schools	87.22	86.85	87.4	89.9	
All Urban Schools	92.49	92.92	91.6	93.0	92.5
All Rural Schools	89.34	89.13	88.0	90.2	89.3
All Elementary Schools	90.91	91.51	90.3	91.9	91.3

The 1940-41 term, although lower than the 1939-40 term, the best yet, compares favourably with the others.

School Leaders in Attendance

Of the cities, Galt with 95.3% and Kitchener with 93% were the leaders in percentage attendance. The towns and villages of Brant County had a percentage of 96. Thunder Bay was the District leader, also with 96%. Among the county rural schools, Russell County with 92.3% and Waterloo County with 92.2% stood first in percentage attendance. When the urban and the rural attendances were combined, Waterloo County, with 94.5%, and Wentworth, with 92.7%, were the leaders among the counties, and Sudbury, with 92.5%, and Cochrane, with 92%, among the Provisional Districts.

Table No. 3—Public School Attendance

	1939-40		Days Lost per Pupil	1940-41		Days Lost per Pupil
	Average Attendance	Percentage Attendance		Average Attendance	Percentage Attendance	
Rural.....	160,911	90.0	18.9	154,654	89.1	20.5
Urban.....	236,285	92.7	14.1	231,064	92.3	14.6

Table No. 4—Separate School Attendance

	1939-40		Days Lost per Pupil	1940-41		Days Lost per Pupil
	Average Attendance	Percentage Attendance		Average Attendance	Percentage Attendance	
Rural.....	21,753	91.6	16.0	21,510	91.0	16.7
Urban.....	72,906	93.7	12.4	71,398	93.2	13.1

Table No. 5—Totals

(Tables 3 and 4 combined)

	1939-40		Days Lost per Pupil	1940-41		Days Lost per Pupil
	Average Attendance	Percentage Attendance		Average Attendance	Percentage Attendance	
Rural.....	182,664	90.2	18.5	176,164	89.3	20.1
Urban.....	309,191	93.0	13.7	302,462	92.5	14.3

Table No. 6—All Elementary Schools

	1939-40		Days Lost per Pupil	1940-41		Days Lost per Pupil
	Average Attendance	Percentage Attendance		Average Attendance	Percentage Attendance	
Rural.....	397,196	91.6	16.1	385,718	91.0	17.0
Urban.....	94,659	93.1	13.2	92,908	92.7	13.9

The percentage attendance for all elementary schools was 91.3 and the average loss per pupil was 16.4 days.

Table No. 7—Absence in Elementary Schools

Days lost through	1940-41	Percentage Loss			
		1937-38	1938-39	1939-40	1940-41
Illness	5,708,490	62.39	66.99	65.85	65.20
Home Help	941,804	9.91	7.79	9.86	10.76
Parental Neglect	624,902	6.95	6.06	6.98	7.14
Physical Obstacles	344,038	3.81	4.56	3.75	3.93
Truancy	30,760	.32	.24	.32	.35
Privation	67,116	1.04	1.04	1.06	.77
Irregular Closing	545,615	5.85	6.67	6.06	6.23
Other Reasons	492,133	9.73	6.65	6.12	5.62
Total days lost		8,734,593	9,983,079	8,403,488	8,754,858
The above losses are classified—					
Lawful		6,329,014	7,680,348	6,327,689	6,529,268
Unlawful		2,405,579	2,302,731	2,075,799	2,225,590
Percentage attendance		91.5	90.3	91.9	91.3

An analysis of the above table brings out some interesting facts. The effects of the war are shown in the shortage of help, principally in the rural communities where the percentage loss through home help has risen almost one per cent. Where the heads of the families are both engaged in war or army work there is not the same supervision of the family, with the inevitable result of increased losses due to parental neglect and truancy. On the other hand the increased earnings are reflected in the improvement of conditions, as indicated in the column marked "Privation". In the previous year 88,834 days were lost, this year 67,116, a decrease of 21,718 days. Severe storms lasting several days, in different parts of the Province, increased the loss due to physical obstacles. This is reflected also in the loss under irregular closing, as many schools were closed for a day or two because of weather and road conditions. In such cases the loss is unavoidable. There are times, however, when schools are closed for minor reasons that might have been avoided. Some Boards apparently do not realize that they have no authority to close a school and if they do, they lose the attendance grant that they might, otherwise, have earned.

Table No. 8—Summary of Attendance Officers' Reports

	1938	1939	1940
School Children's Employment Certificates Issued	350	710	1,343
Home Permits Issued	1,730	1,389	1,885
Employment Certificates Issued	1,907	2,146	4,871
Cases brought before Magistrates	527	528	614

Under the School Attendance Act and the Adolescent School Attendance Act ample provision has been made to enable pupils in urgent cases to leave school before the legal retiring age. Each case is carefully examined and if, in the opinion of the Attendance Officer, it merits special consideration, then the necessary permit or certificate is issued.

Table No. 9—Secondary Schools

Schools	No. of schools	No. of teachers	Enrolment		Percentage Attendance	
			1939-40	1940-41	1939- 40	1940- 41
High Schools and Collegiates	230	2,855	73,102	67,391	94.6	93.5
Continuation Schools	203	587	10,048	9,202	91.4	92.3
Vocational and Special Industrial Schools	64	1,751			*94.0	*92.1
Day			37,900	33,082		
Night			34,983	31,848		
			72,883	64,930		
	497	5,193	156,033	141,523		

*Day Classes only.

The general trend of decreased enrolment is shown also in the secondary schools, where there were 14,510 fewer pupils, all types of schools sharing the loss. Senior pupils in large numbers have volunteered for war services, either in the armed forces or in industries directly related to the war effort.

R. D. KEEFE,

Director of School Attendance.

Toronto, August 10th, 1942.

APPENDIX H

REPORT OF THE SUPERINTENDENT OF THE ONTARIO SCHOOL FOR THE DEAF

I have the honour to submit the Annual Report of the Ontario School for the Deaf for the year ending March 31st, 1942.

Attendance

Enrolment by months:—

	Boys	Girls	Total
April, 1941.....	149	158	307
May.....	149	156	305
June.....	149	156	305

Day Classes — Toronto, Hamilton, London, Windsor

Toronto —3 Teachers—Junior School, 12 pupils; Intermediate School, 13 pupils; Senior School, 12 pupils.

Hamilton—2 Teachers—Junior School, 6 pupils; Intermediate School, 5 pupils; Senior School, 7 pupils.

London —1 Teacher —Junior School, 3 pupils; Intermediate School, 4 pupils; Senior School, 5 pupils.

Windsor —1 Teacher —Junior School, 6 pupils; Intermediate School, 5 pupils; Senior School, 1 pupil.

Moving to Belleville

From 1870 to 1941, the Ontario School for the Deaf had been situated in buildings and grounds located two miles west of the City of Belleville. During that time 3,353 deaf children had been educated and trained for life.

In July 1941, the Department of National Defence for the Dominion of Canada, requested the Province of Ontario to grant to the Royal Canadian Air Force the use of these buildings and grounds for the duration of the war, and in August 1941, the R.C.A.F. opened No. 5 Initial Training School on our former site.

Before the end of August, plans were completed for the transfer of the School for the Deaf to buildings in Belleville, rented for the duration of the war. As it was not possible to get possession of all buildings at once, it was necessary to move school furniture, beds and other equipment to temporary storage, making a second moving necessary when buildings became available. Considering these difficulties, and the necessary renovation of buildings, we were fortunate in being able to open school on October 15th, one month later than the usual date.

By renting six houses, and obtaining the use of the Parish Hall of St. Thomas Anglican Church, and a building owned by the Dominion of Canada, it has been possible to obtain sufficient accommodation for classrooms, dormitories, and dining-rooms.

As it was not possible to accommodate all pupils in Belleville, it was necessary to limit admission to classes in Belleville to those under sixteen years of age, and also to open day classes in four of the large cities, viz. Toronto, Hamilton, London and Windsor. To the day classes, not only pupils between 5 and 16 years of age are admitted, but in Toronto, Hamilton and London, pupils between sixteen years and twenty-one years of age are also admitted. If these older pupils live outside the boundaries of the cities, the Province assists in the payment of expenses for board and lodging. As the enrolment for 1941-42 is 276 compared with 305 for 1940-41, comparatively few pupils were unable to attend one or other of the schools.

The teachers of the day-classes are members of the staff of the Ontario School for the Deaf. As the classrooms, heat and light are provided by the four cities respectively, and as the pupils study in the vocational classes of these cities, the teachers have a responsibility not only to the Superintendent of the Ontario School for the Deaf, but also to the Principals of the schools, where their classes are located.

Recreation

Possibly the greatest loss the children have suffered in moving to Belleville has been in giving up the large playgrounds and assembly room. This has been partly overcome by having the senior girls go to the Y.M.C.A. after school one day a week where one of our teachers acts as instructor. A skating rink was

provided for the boys on the grounds of the senior boys' residence on Bleecker Avenue. In addition, the use of the city skating rink was granted on certain days by the owners.

Much of the play equipment, such as slides and swings, has been moved from the former site and placed near the residences now occupied by the children.

The Farm

As the Royal Canadian Air Force did not require the use of the school farm, it has been maintained as formerly to supply milk and eggs for the children.

The Hospital

Hospital beds from the School Hospital were removed to two rooms in one of the rented houses and accommodation was thus provided for ten children. In case of an epidemic, it is possible to use other beds in the same building by transferring healthy children to other residences. Emergency operations are performed at the Belleville City Hospital.

The Teaching Staff

Four teachers resigned at the close of school in June, 1941. Miss Lena Carroll retired on superannuation, having completed forty-one years of teaching, of which twenty-three were devoted to instructing children in the Ontario School for the Deaf. Miss Grace Harris was appointed to the staff of the School for the Deaf in Vancouver, British Columbia, and Miss Mary Hill to the Public School staff, City of Ottawa. Miss Mary Wilkins was married soon after the close of school. As the latter three teachers had just completed their training course, it was a great loss to the school when they left the staff.

The discontinuance of vocational work made necessary the resignations of Miss M. Waite, and Messrs. L. Morrison and T. Truman.

The opening of day-classes in the cities of Toronto, Hamilton, London and Windsor, required the sending of seven of our trained teachers to those centres.

Misses H. Shannon and B. O'Connor were appointed to the staff in September, and began their training as soon as school was opened.

As it was necessary to discontinue part of the work in rhythm, Miss H. Keeler was transferred to classroom work in the junior school.

The death of Mr. Thomas O'Hara in August, came as a great shock to staff and students. Mr. O'Hara had been school carpenter, and instructor in carpentry for many years. He was very successful as a teacher, and very sympathetic in all his contacts with the pupils. By his death, the School lost an efficient teacher, and the Province a faithful public servant.

Report of Dentist

The following work has been completed during the school term:—

Boys: Fillings—(a) Amalgam, 64; (b) Porcelain, 14.

Prophylaxis, 37.

Extractions—(a) Permanent, 7; (b) Deciduous, 36.

Girls: Fillings—(a) Amalgam, 72; (b) Porcelain, 13.

Prophylaxis, 28.

Extractions—(a) Permanent, 7; (b) Deciduous, 34.

Respectfully submitted,

G. C. CALDWELL D.D.S.,

Dentist.

Bursar's Report

In estimating the cost per pupil for 1941-42, it has been difficult to make a satisfactory comparison with the similar cost for 1940-41. The average number of pupils for 1941-42 resident in Belleville, was 236, but the average number of pupils, including the pupils in the day classes in Toronto, Hamilton, London and Windsor, was 283.

Although classrooms for the day-classes are provided by the respective cities, the costs for such items as teachers' salaries, supervision and supplies are paid by the Ontario School for the Deaf. Consequently, in estimating the cost per pupil, all children attending classes in Belleville, Toronto, Hamilton, London and Windsor have been included.

Report of School Physician

The following is a report on the admissions to the Hospital of the Ontario School for the Deaf, Belleville, from April 1st 1941 to March 31st, 1942. There were 109 admissions. One fracture radius and ulna; one operation for mastoiditis; one pneumonia; the remainder were attacks of influenza with minor complications.

All new pupils were vaccinated, immunized against scarlet fever, and received diphtheria toxoid.

R. W. TENNENT,
Physician.

Respectfully submitted,

W. J. MORRISON,
Superintendent.

Belleville, June 9th, 1942.

APPENDIX I

REPORT OF THE SUPERINTENDENT OF THE ONTARIO SCHOOL FOR THE BLIND

Graduates and Withdrawals

Age	No. of Pupils	Detail
13-18	15	Exclusion 1, died 1, school 1, home 1, married 1, work 10.
19-20	17	School 1, home 4, work 12.
21-23	6	Work 6.

The gratifying fact that 28 of this group are at present employed is largely due to the wholehearted co-operation extended by the Canadian National Institute for the Blind whose field workers regularly visit the School, become acquainted with the senior students and are thus enabled to place them when graduated in industry.

War Work

In January Mr. Joseph Hyde, teacher in Grade IV, enlisted in His Majesty's forces. Mrs. Elsie Whittle very capably taught Mr. Hyde's classes during the remainder of the year.

Proceeds from the School Play \$817.00 were donated to the Queen's Fund. The several clubs of the School contributed \$72.71 to war work. Some 200 knitted and sewn articles made by the girls of the School were sent overseas. The School Dance Orchestra supplied music twice a week at the Maple Leaf Active Soldiers' Club, Brantford.

School and Student Honours

At the Stratford Musical Festival held in April the School won the following honours:

Madrigal Choir—First Place—Stratford Beacon Herald Trophy.

Male Chorus—First Place—Pounder Brothers' Trophy.

The Ethel Charlton Memorial Scholarships for general proficiency in the graduating year were awarded Enna Buchkowsky and William Johnson.

Michael Bocian won a first prize in a public speaking contest conducted by CKPC, Brantford.

Louise Cowan, at McMaster University, on an Ontario-School-for-the-Blind scholarship, has successfully completed her third year.

John Green, B.A., won scholarships in two post graduate departments at the Saskatchewan University.

Oliver Bell and George Ennismore graduated from the University of Alberta.

Library Report

The Braille Library consists of about 1,000 volumes, half of these being fiction suitable for senior students. The remainder consists of 150 volumes of juvenile fiction, some scripture, and quite a number of volumes of various reference works. Most of the books have been obtained from Great Britain, but owing to difficulties of transportation, none have been ordered this year. The library has been well patronized, the juveniles especially, being very enthusiastic in regard to their reading.

Medical Report

The usual health services have been given to all students,—annual physical examination, diphtheria toxoid and whooping cough serum to all new students, all necessary dental work, and eye examinations,—these latter two by the school dentist and ophthalmologist.

Number of hospital days..... 445

Report of Oculist

During the month of October an examination was made of every pupil attending the school.

Condition of Sight of New Entrants	Male	Female	Total
1. Limited vision in both eyes.....	9	7	16
2. Limited vision in one eye.....	1	3	4
3. Quantitative light perception in both eyes.....	1	1	2
4. Quantitative light perception in one eye none in other...	3	2	5
5. Without light perception in both eyes.....	2	1	3
Totals.....	16	14	30

Diseases Causing Blindness among New Entrants	Male	Female	Total
1. Ophthalmia Neonatorum and Keratitis.....	1	1	2
2. Congenital Cataract.....	4	2	6
3. Myopia.....	2	2
4. Optic Atrophy.....	3	4	7
5. Congenital Lesions, Aniridia, Buphthalmus, Nystagmus..	4	3	7
6. Fundus Lesions, Diseases of Retina and Choroid.....	3	2	5
7. Sympathetic Ophthalmia, Plastic Uveitis.....	1	1
Totals.....	16	14	30

In many ways the type of eye lesion noted above compares with that found in former examinations except that congenital cataract has been displaced by two other groups, viz., optic atrophy and congenital conditions such as aniridia, nystagmus and buphthalmus. It is difficult to offer any explanation for this apparent change, especially in the case of optic atrophy which seems to have increased quite beyond the normal limits.

In the class of 1940, there were five cases of myopia, whereas this year there are only two. It would appear perhaps the advent and wide use of vitamins, particularly vitamin A, and calcium have helped to cut down the number of cases of myopia or to prevent the disease from becoming progressive. In like manner one might conclude that the falling off in the number of congenital cataract cases may be attributed to a wider public education, as to pre-natal care and especially as to pre-natal diet.

Throughout the year many pupils were seen for purposes of changing glasses or of treating minor eye troubles. Fortunately there were no eye accidents and generally the year was an excellent one from the point of the "eye health" of the School.

NORMAN W. BRAGG, M.D., F.A.C.S.

Dental Report

All pupils presented themselves for dental examination. The following work was done:

	Boys	Girls
Fillings.....	142	94
Extraction of permanent teeth.....	14	9
Extraction of deciduous teeth.....	20	11
Twenty-three boys and 29 girls required no fillings.		
Thirty-one boys and 15 girls required only one filling.		

J. R. WILL.

I should like to add my appreciation of the good work done by our staff in school, and also in war activities and services, out of school.

All of which is respectfully submitted,

(Signed) H. J. VALLENTYNE,
Superintendent.

Brantford, Ontario, June 30th, 1942.

APPENDIX J
REPORT OF THE ACTING INSPECTOR OF
PUBLIC LIBRARIES

To the Honourable Duncan McArthur, M.A., I.L.D.

I have the honour to submit the following report of the Public Libraries Branch for the year 1941, including statistics for public libraries in 1940, together with a statement of the Legislative grants paid in 1941. In the absence of the Inspector of Public Libraries, who is on active service, the work of the branch has been carried on under the supervision of the Acting Inspector.

County Libraries

County library associations are increasing in number and influence, and are demonstrating their usefulness to the libraries and schools in ever widening circles. As an instance of this, in the County of Middlesex, 111 school sections out of 182 are receiving school loans, and a quotation from a recently published report covering these schoolroom loans is as follows:

“While we can give figures to show the enormous increase in the circulation of Juvenile books, what we consider most important is that these children are having access to the best literature, and we hope to create a desire for the reading of good books, so that in later years they may become members of their local library.”

During 1941 the County of Huron was organized as a county library association, and the smaller libraries in that county are already receiving the benefit of a liberal supply of new books which are sent every three or four months.

Other counties and districts are making enquiry regarding organization methods, and it is hoped that during 1942 there will be a substantial increase in the number of county and district library associations, more especially in the northern and eastern parts of the Province.

Public Libraries of the Province

At present we have 232 free libraries and 269 association libraries in the Province. The sum of \$41,405.10 was paid in Legislative grants; these grants varied from \$2,511.25 to \$5.00. Some of the association libraries did not receive grants through lack of members or other failures to meet the Regulations. Some of the figures, taken from the tables of statistics, are as follows: Amount of Legislative grant paid to the free libraries of the Province, \$29,812.88; amount paid to the association libraries, \$11,592.22.

The Legislative grants paid in 1941 amounted to approximately 3.02 per cent. of the total expenditure on libraries for 1940.

Municipal appropriation to the free public libraries of the Province in 1940 was \$1,170,423.91, and the amount expended on books by the free and association libraries in 1940 was \$269,451.81. The total expenses of the free libraries in 1940 was \$1,289,043.56, and of the association libraries \$54,579.90.

Population served by the free libraries in 1940 was 2,074,848, and by the association libraries 214,013. The total number of borrowers registered in the free and association libraries of the Province was 697,573.

The number of volumes in the free libraries was 2,825,031, and the circulation of them 12,514,929. The association libraries had 663,442 books and the circulation was 893,489, making a total circulation of books in the Province of 13,408,418. The per capita circulation of books in the Province is 3.8.

The Travelling Libraries

The figures regarding the travelling libraries are as follows: Total number of books in the collection 36,854. The number of libraries sent out during 1941 was 1,237, divided as follows: To small public libraries, 265; to schools, 823; to women's institutes, 61, and to study groups, 88. The number of books added to the collection in 1941 was 3,129. A comparison of books circulated during the last three years shows that, in 1939, 112,488 books were sent out, in 1940, 133,465 books, and, in 1941, 142,777.

An increased number of libraries have been visited, meetings with library boards have been held, and under the editorship of the Acting Inspector, the Ontario Library Review and Periodical Index has been issued quarterly as usual.

Change in Status of Libraries

Three association libraries were removed from the list of active libraries. They are East Linton, Delta, and Maxwell.

One county library association was added, that of Huron, and a branch of the Fort William public library, situated at 102 Training Centre, Fort William, has been recognized. In addition to these, representation was made by the President of the Ontario Library Association, on behalf of the small library institutes which gathered at certain intervals, for instruction and assistance in library work. A grant of \$50.00 was given for this object.

The appended statistical tables are for the year 1940, and show the Legislative grants paid in 1941.

I have the honour to be, Sir,

Your obedient servant,

S. B. HERBERT,

Acting Inspector of Public Libraries.

Toronto,
February 18th, 1942.

APPENDIX K

REPORT OF THE PROVINCIAL SUPERVISOR OF MUSIC

During 1941, Music has continued to spread throughout the schools of the Province. Statistics attached to this Report show that on June 30th, 12,327 or 71.8% of the Public and Separate School classrooms were receiving regular Music instruction under the supervision of qualified teachers. This represents a slight increase over last year. In the remainder of the schools, although not under the direction of qualified Music teachers, some singing is carried on. Three hundred and twenty-one Collegiate Institutes, High Schools and Continuation Schools provided a course in Music, an increase of 29 over last year. In addition, 13 Vocational Schools, not included in the above summary, are teaching Music.

Eight Music Films from the Departmental Library of 16 mm. sound films were presented to 47,538 children and 6,172 adults. Approximately 120 Music Festivals and Combined Concerts were held in 1941. During the year the following literature was prepared and distributed to Music teachers—

- Training the Voices of Children and Adolescents.
- Introducing Part Singing with Adolescent Boys.

The Department gave active support to the Ontario Educational Association in presenting a Concert at Varsity Arena on the Wednesday of Easter week. More than 1,500 children from over 100 schools in Ontario performed for an audience of 6,000 and the net proceeds, \$850.00, were used for War Charities.

Statistics.—The following statistical information concerns the school year ending June 30th, 1941, and includes all schools providing a course in Music under properly certificated Music teachers.

Respectfully submitted,

G. R. FENWICK,
Provincial Supervisor of Music.

Toronto, March 2nd, 1942.

APPENDIX L

REPORT OF THE REGISTRAR OF TRADE SCHOOLS

TO THE HONOURABLE DR. DUNCAN McARTHUR,
Minister of Education, Province of Ontario.

DEAR SIR:

I beg leave to present to you the report of the operations of the Trade-Schools Regulation Act for the year 1941.

The continuance of the war, with its consequent increasing demands on the labour market, its ever increasing absorption of young men and women into various branches of military service, and its restrictions on the purchase of materials which are being conserved for war purposes, is, in many cases, curtailing the operation of trade schools. The consequent reduction in registration does not apply so markedly to schools conducting work by correspondence. In many cases these schools find the applications increasing, as such work may proceed whether the person is employed in industry or is serving in some military capacity. Many of the young men in the services are looking forward to the time when hostilities cease and they return to civil life. By taking advantage, as time affords, to improve their standing by means of various correspondence engineering courses, they hope to be in a better position to re-enter civilian life. Military organizations are encouraging such procedure and some of the trade schools are offering special reduced rates to such applicants and report increased registrations. Schools giving courses which are not deemed essential to the promotion of the war effort are experiencing difficulties in maintaining an adequate registration to ensure the continuance of operations. Some such schools have had to withdraw from the field during the year.

The advice of this Department continues to be extensively sought for vocational guidance, both by direct conference and by correspondence, regarding suitable courses in which to register and opportunities available upon the completion of such courses. Information is also sought as to the reliability of schools with which they are contemplating registration. Appreciation has been expressed regarding the value of these services.

The promotion, by specialized schools, of new courses based on changed conditions resulting from war restrictions, similar to that which has had to be curbed in the past, is now in evidence. Such types of promotion work are not allowed to reach the proportions which existed previous to the passing of the Trade Schools Regulation Act. From time to time such courses will have to be added, by Order in Council, to those now coming under the Act. Some of these new courses have no operations involved which differ from courses now in existence. The difference is simply one of name, and material used, rather than one of new instruction matter.

Some of the Trade Schools are rendering an important service in assisting the war effort. Thousands have been trained to enter war industries and war services without any cost to the government whatsoever. The presence of women taking such courses is a new experience and is working out very satisfactorily. Women have proved their ability to fit into occupations which previously were confined to men. Large numbers of women are being trained in sponsored classes such as those for wireless radio operators to be placed in air transport position.

This Department was recently successful in arranging for the continuation of the courses of instruction being given to students by one Radio School, which desired to suspend operations. Arrangements were made with another Radio School which was willing to enroll the students affected, in its existing classes without any interference with the obligations assumed by these students through their original contracts.

A close check is made of all advertising material of the schools before it is permitted to be published. In this way it is possible to avoid misrepresentation to those interested in taking the courses advertised. In this factor of control we have had the fullest co-operation of the press and the publishers.

Where the enlistment of young men and women in the armed forces interferes with the continuity or continuance of courses of instruction for which they have registered, the schools concerned are ready and willing to make suitable adjustment.

Valuable assistance has been given to the Foreign Exchange Control Board in settling problems arising out of applications to permit courses to be taken in schools situated in the United States and elsewhere. Where similar courses can be obtained in Canada such requests are refused.

Assistance is also given to other government departments which may be concerned with Trade Schools, to other Provinces and States to assist them in organizing similar control to that operating in Ontario and to Better Business Bureaus from various centres in Canada and the United States which seek information regarding cases requiring investigation or adjustment. The Toronto Better Business Bureau refers all such cases of complaint to this Department for settlement.

We are pleased to report the fullest co-operation of the management of practically all registered trade schools in maintaining the high ethical standard which the Trade Schools Regulation Act was intended to develop. It is also noted that the public are freely seeking information and guidance and showing appreciation of the services rendered.

W. S. KIRKLAND,
Registrar for Trade Schools.

Toronto, October 5th, 1942.

PART II

STATISTICS

of

The Provincially-Controlled
Schools of Ontario

TERMINOLOGY

Assessment—The valuation placed upon property for tax levy purposes. The County Council generally makes an equalization annually of local assessment figures, and this equalized figure is used in the computation of Legislative grants to schools.

Attendance Efficiency—The percentage relation of the actual days attended to the perfect aggregate.

Auxiliary Classes—These are provided for gifted, socially or educationally maladjusted, retarded, or physically-handicapped pupils.

Capital Charges—Debenture instalments, or sinking fund deposits, made on debt incurred for school buildings and equipment.

Compulsory School Age—Children 8 to 14 must attend full time; children from 5 to 8, if enrolled, must attend full time to the end of the school term for which they are enrolled. Adolescents, 14 to 16, who have not attained University matriculation standing must attend full time; those exempted on the plea of circumstances compelling them to go to work must attend part time (400 hours a year) in municipalities where part-time courses are provided. Urban municipalities with a population of 5,000 and over, are required to provide part-time courses.

Consolidated School—An amalgamation of two or more rural schools, or of rural schools with a village or town school, either for the purpose of strengthening the means of school support where the original schools were small or poor, or for the purpose of providing a graded school and other advantages, such as conveyance, instead of the original one-room school.

Correspondence Courses—Reach those more isolated than the school car pupils. They supplement the work of the regular school when remoteness, winter weather, ill-health, or physical disability prevent regular attendance. Twenty-five hundred is an approximate year's enrolment for these courses, which reach from Grade I to X, and are sets of carefully prepared lessons based on the new Course of Studies. A Departmental staff handles this correspondence with extreme promptness, and a pupil's progress depends entirely upon his own efforts. About 80% of these pupils live in Northern Ontario, and half of them are of foreign parentage. These courses are entirely free.

Cost per Pupil-Day—The cost of educating one pupil of actual attendance, for one day. It is found by dividing the total cost of education of the group of pupils concerned by the actual aggregate attendance of this group for the period under consideration.

County Pupil—A secondary school pupil living within the County but outside any secondary school district.

District—The eleven defined areas of Northern Ontario which do not constitute municipal units for any purpose. With the exception of Parry Sound and Muskoka, these areas lie north of the French River and Lake Nipissing. This region is newer and more sparsely populated than Southern Ontario, and produces most of Ontario's extensive mineral and forest wealth.

Enrolment—The number recorded on the school register as in active attendance. The school census for the Province is now taken annually on the last school day in May.

Fifth Classes—Grades IX and X in Elementary Schools, doing work similar to the first two grades of Secondary Schools. The majority of these classes are in rural areas.

Free School Age—The Public Elementary Schools are free to all resident pupils between the ages of 5 and 21 whose parents are public school supporters. The Separate Schools are free to the children of the separate school supporters. The Secondary Schools are free to all except non-resident pupils.

General Maintenance—Ordinary, current expense, as opposed to capital outlays and debenture charges.

Inspectorate—The area under the supervision of a local Departmental representative.

Kindergarten Primary—A class combining the work of the kindergarten and Grade I.

Non-Resident Pupil—A secondary school pupil who is neither a resident nor a County pupil.

Public School Section—Is a subdivision of a township for elementary school purposes, containing a minimum of 50 children between the ages of 5 and 21, and having a maximum area of four square miles.

Resident Pupil—A secondary school pupil living within the secondary school district.

School—Provincially controlled schools may be classified as:

I. **Elementary**—Those doing the work of the first eight grades. A few have Fifth Classes (see above).

- (a) **Public**—The first school established in any school section or urban municipality, and supported by the ratepayers.
- (b) **R.C. Separate**—For the children of Roman Catholics.
- (c) **Protestant Separate**—For the children of Protestants in centres preponderantly Roman Catholic.

II. **Secondary**—Those doing the work of Grades IX to University Matriculation.

(a) **Academic:**

- 1. **Collegiate Institutes.**
- 2. **High Schools.**
- 3. **Continuation Schools.**

These schools are differentiated by minimum staff requirements. Continuation Schools are located mostly in villages or rural areas. Academic Courses are designed to lead to Universities and Teacher-Training Schools.

(b) **Vocational:**

- 1. **Technical High School.**
- 2. **Commercial High School.**

In the smaller centres academic and vocational departments are frequently found in the one building, which is then called a composite school. Vocational courses are designed to lead to industry, trade and commerce.

School Car—A school on wheels, carrying education and social betterment to small communities scattered along the railway lines of Northern Ontario. There are 7 of these cars at present, each with a definite route of about 175 miles, which is covered in a month or six weeks. Each stop is from 4 to 6 days. Problems are solved, work is outlined and assigned. Parents come to night classes, where English, spelling, writing and arithmetic are taught them, and where daily problems of life are discussed. Ninety per cent of the pupils are non-English speaking. The Department supplies all school needs free. The enrolment is about 275.

School Year—The school year consists of two terms, September 1 to December 22, and January 3 to June 30. In addition to the intervals between these terms there is a vacation of one week following Easter. In this Report statistics cover the school year where possible. Financial data remains on the calendar year basis.

Secondary School District—Is the area over which the secondary school board exercises supervision. Each city and separated town is a secondary school district. The County Council may establish a secondary school district composed of an urban municipality only, a group of school sections only, or a combination of both. In the territorial districts of Northern Ontario any municipal council or councils may establish the whole or any part of the municipality or municipalities as a secondary school district, with the approval of the Minister of Education.

A In all Provincially-Controlled Schools.
 B Commencing with 1929-30 the enrollment is that of the last school day in May. The former figures, covering the entire calendar year, contain a percentage of duplication.
 C Covers the school year.
 D This includes the following: Manual Training, Household Science, Auxiliary, Kindergarten, Art, Music, Physical Culture.
 E This includes Third Class, District, Permanent Ungraded, and Temporary.
 F Included with Public Schools.

A Includes extra-mural Students.

B 52 of these previously held District Certificates.

C Located at Hamilton, London, North Bay, Ottawa, Peterborough, Stratford and Toronto.

D Discontinued.

VII. DEPARTMENTAL SUMMER COURSES
ENROLMENT BY SUBJECTS IN RECENT YEARS

(The Summer Courses are conducted by the Department of Education for the benefit of Teachers, who desire to spend a part of their summer vacation in an effort to improve their academic and professional standing, and thus to become more efficient in carrying on with a modernized curriculum.)

In the interests of economy summer courses have been discontinued for the duration of the war. See 1940 Report for enrolment in recent years.

VIII. TREND IN GRADE OF CERTIFICATES OF FRENCH-SPEAKING TEACHERS IN ENGLISH-FRENCH SCHOOLS

Year	Number of Teachers	First Class		Second Class		Third Class		District		Temporary		Permanent Ungraded	
		Number	Per cent.	Number	Per cent.	Number	Per cent.	Number	Per cent.	Number	Per cent.	Number	Per cent.

SOURCES OF ELEMENTARY TEACHER SUPPLY, 1908-1942

NUMBERS

LEGEND

- Certificates issued by Autumn, Summer, and French-English Models and O.C.E. exclusively elementary teachers.
- - - Elementary school teachers leaving the profession.
- · - · Attendance at Normal Schools excluding 2nd year course.
- · · Temporary certificates issued.

Graph 2.

SOURCES OF ELEMENTARY TEACHER SUPPLY, 1908-1942

In 1908 the system of teacher-training in Ontario underwent radical modification. County Model Schools were closed and the issuance of Third Class certificates (save in Provincial Model Schools) was discontinued. Prospective teachers were required to obtain at least Middle School standing and to secure at least a Second Class certificate through attending Normal School for one year.

The following seven years was a period of readjustment. Attendance at the newly instituted Interim Second Class course at Normal Schools did not increase according to expectations. More than one-third of those enrolled were teachers who had temporarily left the profession to proceed to permanent certificates. To meet the resulting shortage in the supply of teachers many temporary certificates were issued (largely to teachers holding expired Third Class certificates) and summer training schools leading to provisional certificates were opened.

In the year 1915-16 in response to a demand for teachers there was a marked increase in attendance at Normal Schools. The trend toward increased enrolments which this movement might in normal times be taken to portend was, however, cut short the following years because of enlistment, conscription and opportunities for war employment. In 1939-40 a similar movement in the direction of increased attendance was likewise rendered abortive because of war emergencies.

Between the years 1916-24, 1927-32, 1937-42 there was a scarcity of teachers as evidenced by the larger issuance of temporary certificates and district certificates from summer Model Schools, by increases in salaries paid to rural school teachers and likewise as a matter of historic record. During the two intervening periods 1924-27, 1932-37 there was a surplus of teachers.

Consideration of the peaks and valleys of the graph on the opposite page would seem to imply that an average annual attendance of 1,500 at the Normal Schools is needed to balance withdrawals from the profession. Making allowance for candidates who fail and for graduates who never enter teaching, an attendance of 1,500 would provide in the neighbourhood of 1,400 active qualified teachers.

It is noted that the valleys 1916-21 and 1927-30 were relatively sharp but that the present valley is broad and threatens to become broader. During the period 1935-42 there has been a total decrease in attendance at Normal School of 2,614 from the 1,500 level. To this must be added a decrease of 500 in the Normal School attendance of 1942-43. During the year 1939-40, 1,662 teachers in elementary schools withdrew from the profession, in the year 1940-41, 1,747, in the year 1941-42, 1,855. Over 2,000 married teachers and teachers from other occupations have re-entered the profession for the time-being while the number of temporary certificates being granted to unqualified teachers is on the increase. On the other hand since 1934 there has been a decline of some 30,000 in the elementary school population and 347 small rural schools have been closed.

The above data invite consideration to two problems:

- (1) At the conclusion of the war will the number of teachers returning from war services or war industry be sufficient to replace the number of married and otherwise temporarily employed teachers who retire, or in view of the present cumulative deficiency of 3,100 Normal School attendants (2,300 active teachers) will there occur an acute shortage of teachers followed by emergency measures to supply teachers and an abnormal peak in Normal School attendance?
- (2) Would it be feasible to consider a sliding scale of requirements for entry to Normal School in order that abnormal peaks and valleys in attendance, and consequent violent fluctuations in the demand and supply of teachers might be levelled off?

Port Perry High School

For 26 years this school has specialized in Agricultural training and Home Economics. Twenty-five percent of the instruction in the first two years is devoted to these sources. Both boys and girls are trained to meet the problems of rural life, with the result that the majority make agriculture their vocation.

SUMMARY

(This includes results of candidates from private sources)

Enrolment Grade VIII on the last school day in May, 1941.....	57,801
Number of High School Entrance Candidates:—	
Recommended by Principal on Group II.....	33,780
Number taking written test on Group II.....	21,475
	55,255
High School Entrance candidate percentage of 1941 Grade VIII Enrolment.....	95.60%

INATION RESULTS BY INSPECTORATES, 1941

Successful Candidates

Courtesy Ontario Department of Health

The Ontario Government Dental Car

This car was provided by the joint efforts of the C.P.R., the Rosedale chapter of the I.O.D.E. (Toronto), and the Ontario Department of Health. It operates between Sudbury and the Manitoba border, a district where dental services are otherwise unavailable.

The service rendered covers forty-four school districts, and approximately 1,200 school children have received free dental treatment. The car is maintained by the Ontario Department of Health.

The upward trend in teachers' salaries between the school years 1940-41 and 1941-42 is most evident within the lowest paid group of rural teachers. In 1940-41 the predominating rural salary was \$700. In 1941-42 it had risen to \$800. 1,736 teachers drew this figure, which is equivalent to \$13.38 per week for a 52-week year.

TABLE 19—RELATION OF TOWNSHIP AREAS AND CONSOLIDATIONS
TO RURAL SCHOOL SECTIONS

Gross number of sections includes those with no schools or closed schools and those now in consolidations or township areas. Union sections are counted as one section. Those in union with an urban centre are omitted except in the case of consolidations. Sections not operating schools includes those with no school and those with closed schools.

County	Gross Number of Sections *	Sections not Operating Schools *	Sections Operating Schools *	Consolidations		Township Areas

*As at November, 1941.

†In each case, one consolidation of 3 sections is now in a township area.

‡When an area is formed the individual sections are dissolved, hence 666 sections have been dissolved and are now combined into 130 administrative units.

TABLE 38—NIGHT SCHOOLS—Classification of Students by Subjects of Study, 1941-42

I. ACADEMIC

A—CULTURAL

1. English for New Canadians.....	260	7. French.....	230
2. Reading.....	362	8. Spanish.....	15
3. Literature.....	265	9. Music Appreciation.....	24
4. Composition and Spelling.....	490	10. Music.....	23
5. Grammar.....	429	11. Voice Production.....	26
6. Public Speaking.....	128		

B—PRACTICAL

1. General Mathematics.....	155	5. Trigonometry.....	197
2. Arithmetic.....	637	6. Mensuration.....	87
3. Algebra.....	367	7. Shop Mathematics.....	1,091
4. Geometry.....	364		

II. VOCATIONAL AND INDUSTRIAL

A—DOMESTIC ARTS

1. Cooking.....	1,436	7. Sewing and Dressmaking.....	3,636
2. Hygiene and Dietetics.....	189	8. Millinery.....	129
3. Home Nursing.....	299	9. Textiles.....	26
4. Home Economics.....	156	10. Embroidery and Lace Making.....	23
5. Household Accessories.....	17	11. Knitting.....	9
6. Children's Clothing.....	17	12. Period Furniture.....	24

B—COMMERCE

1. Stenography.....	4,377	9. Filing.....	55
2. Typewriting.....	5,754	10. Office Routine.....	82
3. Business English.....	62	11. Book-keeping.....	1,569
4. Journalism.....	55	12. Advertising.....	43
5. Rapid Calculation.....	42	13. Salesmanship.....	56
6. Commercial Arithmetic.....	7	14. Commercial Law.....	19
7. Business Machines.....	683	15. Dictaphone Transcription.....	173
8. Business Forms.....	174		

C—ART, DRAFTING AND DESIGN

(a) Pure Art:		5. Anatomy.....	60
1. History of Art.....	12	6. Life Drawing.....	290
2. Elementary Art.....	44	7. Modelling.....	26
3. Colour Study.....	246	8. Perspective.....	63
4. Still Life Drawing.....	88	9. Antique Drawing.....	23
(b) Applied Art:		3. Interior Decorating.....	122
1. Illustrating.....	145	4. Costume Drawing and Design.....	166
2. Commercial Art and Design.....	177	5. Photography.....	21
(c) Industrial Drafting and Design:		5. Electrical Drawing.....	10
1. Mechanical Drawing.....	1,913	6. Machine Drawing and Design.....	516
2. Industrial Design.....	239	7. Tool Design.....	24
3. Blue Print Reading.....	174	8. Sheet Metal Drawing.....	121
4. Architectural Drawing.....	300	9. Horological Drafting.....	29

D—CRAFTS

1. Leather Working.....	78	6. Art Metal Work.....	17
2. Wood Carving.....	16	7. Printing.....	66
3. Cabinet Making.....	189	8. Pattern Making.....	41
4. Pottery.....	47	9. Watchmaking.....	31
5. Rugs.....	24		

E—SCIENCE AND ENGINEERING

(a) Science:		5. Metallurgy and Assaying.....	25
1. Chemistry.....	261	6. Applied Mechanics.....	14
2. Industrial Chemistry.....	210	7. Electricity.....	639
3. Chemistry for Nurses.....	117	8. Photography.....	50
4. Physics.....	31		
(b) Engineering:		5. Telephony.....	63
1. Stationary.....	307	6. Telegraphy.....	21
2. Refrigeration and Air Conditioning.....	39	7. Wireless.....	63
3. Aviation.....	23		
4. Milling (Minerals).....	8		

F—TRADES AND INDUSTRY

1. General Woodworking.....	645	10. Armature Winding.....	15
2. Carpentry and Building.....	300	11. Radio Construction and Repair.....	295
3. Machine Shop Work.....	2,534	12. Glove Making.....	48
4. Power Operating.....	59	13. Hair Dressing.....	82
5. Acetylene Welding.....	1,028	14. Sheet Metal Work.....	248
6. Electric Welding.....	125	15. Plumbing.....	30
7. Arc and Acetylene Welding.....	456	16. Forge Work.....	19
8. Electric Wiring.....	419	17. Bench Fitting.....	55
9. Auto Mechanics.....	1,153	18. Ship Fitting.....	19

G—WAR WORK STUDIES

1. Aircraft Construction.....	527	3. Munition Part Inspection.....	97
2. R.C.A.F. Course.....	215		

III. MISCELLANEOUS

1. First Aid.....	174	4. Gymnasium.....	372
2. Lip Reading.....	62	5. Swimming.....	372
3. Vocational Guidance.....	38

UNIVERSITY OF TORONTO
REPORT
OF THE
BOARD OF GOVERNORS
FOR THE
YEAR ENDED 30th JUNE
1941

PRINTED BY ORDER OF
THE LEGISLATIVE ASSEMBLY OF ONTARIO
SESSIONAL PAPER No. 12, 1942

ONTARIO

TORONTO
Printed and Published by T. E. BOWMAN, Printer to the King's Most Excellent Majesty
1942

UNIVERSITY OF TORONTO

REPORT
OF THE
BOARD OF GOVERNORS

FOR THE YEAR ENDING 30TH JUNE, 1941

To His Honour the Lieutenant-Governor-in-Council:

The Governors of the University of Toronto have the honour to present their thirty-fifth annual report, together with a comprehensive review by the President of the academic work of the University and its Colleges for the Session 1940-41, and the reports of various officers and departments. A complete synopsis of the numerous developments which have taken place within the University during the past year and its contribution to public service are contained in these reports.

Statements covering the funds and assets, including investments, etc., are also presented as they stood at the close of business on 30th June, 1941, together with detailed statements of receipts and expenditures of the Board for the fiscal year which ended on that date, and the certificate of audit of the same by Mr. G. T. Clarkson of the firm of Clarkson, Gordon, Dilworth and Nash.

The auditor's report states that all the transactions of the year upon the Revenue and Capital accounts have been duly audited and found correct; that the securities representing the investments, which are held for safekeeping by the Canadian Bank of Commerce, were produced for the Auditor's examination twice during the year and found to be in agreement with the Bursar's records; and that this officer's records are well kept and all endowment and trust funds properly accounted for.

The general revenue for the year amounted to \$1,825,211. There was also credited to revenue the Special Legislative Grant of \$1,000,000, making a gross total of \$2,825,211. From this sum, however, there was deducted \$67,226, representing interest written to certain scholarship and trust funds and including interest on bank accommodation, leaving available for expenditure for salaries and maintenance \$2,757,985.

The expenditures under the appropriations made by the Board for these purposes, (exclusive of the Ontario College of Education which is maintained by a separate vote) the estimates for which were approved by the Minister of Education, totalled \$2,898,205. As a result there was an excess of expenditures over receipts of \$140,220, which, together with the accumulated debit balance of \$476,720 brought forward from previous years, makes a total due the University to 30th June, 1941, of \$616,940.

Every effort was made during the year to reduce all controllable expenditure, which resulted in a considerable saving in the Estimates as originally prepared.

All of which is respectfully submitted.

D. BRUCE MACDONALD,
Chairman.

Toronto, 27th November, 1941.

AUDITOR'S CERTIFICATE

Toronto, November 3, 1941.

To the Governors of the University of Toronto:

GENTLEMEN:

I have verified the attached Balance Sheet of the University dated 30th June, 1941, and Schedules 1 to 10, and report that all the transactions of the year upon the Revenue and Capital Accounts have been duly audited and in my opinion are correctly stated in the accounts.

The securities representing your investments are held in safekeeping by your bankers, The Canadian Bank of Commerce, and were produced for my examination on 2nd July, 1941, and also at another time during the year and found to be in agreement with the records kept by the Bursar. Your securities consist largely of bonds issued or guaranteed by the Dominion of Canada and by the Province of Ontario and bonds of Ontario municipalities. There are also certain corporation and other securities received as bequests. Their approximate market value as at 30th June, 1941, was greater than their book value by \$594,119.48.

No income was received from certain non-trustee securities which have come to you in bequests.

The Bursar's records are well kept and all Endowment and Trust Funds properly accounted for.

Yours faithfully,

G. T. CLARKSON, F.C.A.,
Auditor.

VI. FACULTY OF ARTS

22. Salaries

(1) Departments in University of Toronto (\$622,575.97)

Dean's Office

S. Beatty, Dean (paid also \$5,500 as Professor and \$46 for Extension Work)..... \$ 1,000.00
 \$ 1,000.00

Mathematics

Professors:

S. Beatty (paid also \$1,000 as Dean)..... \$ 5,500.00
 I. R. Pounder (paid also \$18 for Extension Work and from Special Funds)..... 4,500.00

Associate Professors:

W. J. Webber (paid also \$420 for Extension Work)..... 4,100.00
 N. E. Sheppard..... 3,900.00
 D. A. F. Robinson..... 3,400.00

Assistant Professors:	
J. D. Burk	\$ 2,750.00
G. deB. Robinson (paid also \$300 for Extension Work)	2,750.00
Richard Brauer at \$2,750 (on leave of absence from 1 February to 30 June—paid also \$150 for Extension Work)	1,604.17
H. S. M. Coxeter (paid also \$150 for Extension Work)	2,750.00
Lecturers (Sessional):	
Miss C. Krieger (paid also \$420 for Extension Work)	2,150.00
Miss M. E. G. Waddell	2,000.00
D. B. DeLury (paid also from Special Funds)	1,950.00
D. C. Baillie	1,550.00
Fellows (Sessional):	
N. S. Mendelsohn	900.00
W. C. G. Fraser (paid also \$200 in Engineering Drawing and \$19.20 from Department of Mathematics)	700.00
C. D. Solin	700.00
J. S. Vigder (paid also \$200 in Engineering Drawing)	300.00
	\$ 41,504.17

Applied Mathematics

J. L. Synge, Professor	\$ 6,000.00
A. F. C. Stevenson, Associate Professor	3,800.00
Leopold Infeld, Assistant Professor	2,700.00
B. A. Griffith, Lecturer (Sessional)	2,200.00
Fellows (Sessional):	
A. W. Walker	550.00
I. L. Wilson	500.00
	\$ 15,750.00

Physics

Professors:	
E. F. Burton, also Director of Physical Laboratory (paid also from Special Funds)	\$ 5,500.00
J. Satterly (paid also from Special Funds)	5,000.00
L. Gilchrist	4,500.00
H. A. McTaggart	4,400.00
J. Patterson, Honorary Professor of Meteorology (without salary—paid \$300 for Extension Work)
Associate Professors:	
H. Grayson Smith (paid also from Special Funds)	3,600.00
D. S. Ainslie (at \$3,300 including \$100 paid by University Extension Department—paid also \$200 for Extension Work) ..	3,300.00
H. J. C. Ireton (paid also from Special Funds)	3,300.00
C. Barnes (paid also from Special Funds)	2,800.00
M. F. Crawford (paid also from Special Funds)	2,800.00
Assistant Professors:	
J. O. Wilhelm at \$3,000 (on leave of absence for half time from 1 November)	2,000.00
Arnold Pitt (at \$2,700 including \$250 paid from Special Fund; honorarium for extra services, \$200—paid also from Special Funds and \$250 for Extension Work)	2,900.00
A. A. Brant (at \$2,400 paid from Special Funds)
Lecturers (Sessional—paid also from Special Funds):	
Miss E. J. Allin	2,100.00
Miss K. M. Crossley (at \$1,700 including \$100 paid by University Extension Department)	1,700.00
Miss F. M. Quinlan (at \$1,700 including \$100 paid by University Extension Department)	1,700.00
Honorary Special Lecturers (Sessional—without salary):	
B. Haurwitz
E. W. Hewson
W. E. K. Middleton
A. Thomson
Demonstrators and Lecturers (Sessional—paid also from Special Funds):	
J. M. Anderson, \$1,500; honorarium for extra services, \$200 (paid also \$300 for Extension Work)	1,700.00
A. D. Misener	1,500.00
R. Richmond (paid also \$300 for Extension Work)	1,200.00
H. L. Welsh, Demonstrator (Sessional—paid also from Special Funds)	1,500.00

Honorary Special Demonstrators (Sessional—without salary):

C. C. Boughner.....	
D. B. Kennedy.....	
S. G. Ellis, Demonstrator, 6 mos., \$750; Fellow, 2 mos., \$250—(paid also from Special Funds).....	\$ 1,000.00

Assistant Demonstrators (Sessional—paid also from Special Funds):

Miss M. McKinley.....	1,000.00
J. W. M. Britton.....	525.00
E. H. Dexter.....	525.00

Temporary Class Assistants at \$1.25 per hour:

Mrs. Agnes Misener, 269 hours.....	336.25
Mrs. Dorothy Elson, 189 hours.....	236.25
Mrs. Beatrice M. Deacon, 84 hours (paid also from Special Funds).....	105.00
A. W. Love, 66 hours.....	82.50
K. Buckthought, 9 hours.....	11.25
Miss B. Girdwood, 6 hours.....	7.50
Miss A. T. Reed, Secretary and Class Assistant (paid also from Special Funds).....	2,000.00
Miss N. K. Reed, Clerical Assistant and Librarian (paid also from Special Funds).....	1,200.00
B. Clark, Mechanician.....	2,300.00

Assistant Mechanicians:

J. Ward.....	2,100.00
G. T. Woodward.....	2,000.00
F. M. Shepherd.....	1,700.00
A. Owen.....	1,400.00
R. H. Chappell, Glass-blower (paid also from Special Funds).....	2,900.00
P. Blackman, Laboratory and Lecture Assistant (paid also from Special Funds).....	1,700.00

Assistant Laboratory and Lecture Assistant:

J. A. Reid at \$800 less 30 days' compulsory military training.....	735.83
E. P. Hincks, substitute for J. A. Reid (paid also from Special Funds).....	63.17
J. Farnworth, Temporary Machinist, 750 hours at 80c per hour.....	600.00

\$74,027.75

Less paid by University Extension Department and from Special Funds.....

550.00

\$ 73,477.75

Astronomy

R. K. Young, Professor, also Director of David Dunlap Observatory... ..	\$ 4,500.00
F. S. Hogg, Assistant Professor (paid also \$300 for Extension Work)...	3,200.00

Lecturers (Sessional):

P. M. Millman at \$2,400 (on war service from 20 January).....	1,640.00
J. F. Heard at \$2,150 (on war service from 4 November—paid also \$420 for Extension Work).....	1,128.76
Mrs. Helen S. Hogg, Research Associate (Sessional—on leave of absence without salary).....	
W. F. M. Buscombe, Assistant at \$800 (resigned 28 February).....	612.50
A. F. Bunker, Observer (Sessional).....	900.00
Miss R. J. Northcott, Computer and Demonstrator.....	1,300.00
G. F. Longworth, Night Assistant and Machinist.....	1,500.00
Miss E. M. Fuller, Secretary-Librarian.....	1,300.00

\$ 16,081.26

Geology

Professors:

E. S. Moore (paid also \$100 for Summer Field Work).....	\$ 5,500.00
G. B. Langford, Mining Geology.....	4,900.00
A. MacLean.....	4,300.00

Assistant Professors:

L. S. Russell.....	2,700.00
Dr. Madeleine A. Fritz (part time—paid also in Royal Ontario Museum).....	900.00

Lecturers (Sessional):

V. J. Okulitch (paid also \$50 for Summer Field Work and \$200 for Extension Work)	\$ 2,000.00
W. W. Moorhouse	1,800.00

Class Assistants (Sessional):

C. J. H. Coveney	250.00
G. P. Crombie	250.00
D. A. Firth	250.00
W. N. Ingham	250.00
W. R. McQuarrie	250.00
W. H. White	250.00
D. Monteith, Laboratory Attendant	700.00
	<hr/>
	\$ 24,300.00

Mineralogy

Professors:

A. L. Parsons	\$ 5,000.00
J. Ellis Thomson (paid also \$100 for Extension Work)	4,400.00
M. A. Peacock, Associate Professor	4,100.00
V. B. Meen, Lecturer (Sessional—paid also in Royal Ontario Museum)	1,700.00

Assistants (part time—Sessional):

S. V. Burr (paid also \$75 for Extension Work)	400.00
J. J. Ivan	400.00
W. Wightman, Laboratory Attendant, 9 mos. (paid also in Royal Ontario Museum and \$40 for Extension Work)	900.00
	<hr/>
	\$ 16,900.00

Chemistry

Professors:

F. B. Kenrick, also Head of Department	\$ 5,700.00
J. T. Burt-Gerrans, Electro-Chemistry	4,500.00
A. R. Gordon	4,500.00
L. J. Rogers	4,500.00
W. H. Martin	4,300.00

Associate Professors:

J. B. Ferguson	4,400.00
W. S. Funnell	4,200.00
F. R. Lorrinan	3,600.00
F. E. Beamish	3,500.00
G. F. Wright	3,500.00
F. E. W. Wetmore, Assistant Professor (paid also \$200 for Extension Work)	2,600.00
J. J. Rae, Lecturer (Sessional)	2,400.00
Mrs. P. M. Marrian, Lecturer in Micro-Analysis, 9 mos.	900.00

Assistants (Sessional):

Miss E. V. Eastcott	1,800.00
D. M. Burpee (paid also \$37 from Chemistry Department)	1,400.00
W. A. E. McBryde (paid also \$29 from Chemistry Department)	874.00
W. G. Hines, Electro-Chemistry	799.00
P. Olynyk	799.00
H. H. Richmond	799.00
R. S. Stuart	725.00
A. W. Birnie	724.00
R. Y. Cook	724.00
Miss J. C. Romeyn	724.00
H. Sheffer	724.00
W. A. Tidridge (resigned 5 April)	558.10
M. H. Thomas (resigned 31 March)	543.00
R. W. Allgood (resigned 25 March)	522.60
W. J. Hornibrook (resigned 25 March)	522.60
R. F. Donahoe (resigned 28 February)	452.50
H. A. Bewick	650.00
H. E. Gunning	650.00
G. J. Janz	650.00
E. D. Maher	650.00
D. D. Stewart	650.00
W. G. Wallace (resigned 31 March)	487.50
D. C. West (resigned 28 February)	406.25
D. S. Russell	523.00
J. H. Robertson	325.00

Temporary Assistants:

R. C. Langille.....	\$ 263.00
Mrs. D. N. Oswald.....	100.00
J. C. Sowden.....	100.00
S. Barnartt.....	18.00
F. M. Kennedy.....	18.00
A. R. Miller.....	18.00
J. G. Todds.....	18.00
J. E. Currah.....	12.00
A. J. Harris.....	12.00
L. A. Hassah.....	12.00
C. Kinnunen.....	12.00
E. W. Warren.....	12.00
R. S. Wayman.....	9.00
D. J. Wormith.....	9.00

Laboratory Assistants:

R. Fortescue (with rooms, heat and light valued at \$420 as caretaker of building).....	1,250.00
W. Banton, \$1,500 (and overtime \$121.20); Lecture Assistant, \$200.....	1,700.00

Laboratory Attendants at \$10 to \$14 per week:

D. H. Renwick.....	686.00
E. Chadwick.....	529.88
A. Van Winckel.....	363.00
H. M. Davis.....	243.00
F. H. Twigg.....	67.98
G. Edmund.....	48.03

\$71,783.44

Organic Chemistry Research:

H. O. L. Fischer, Professor (paid \$5,000 from Special Fund).....	
Erich Baer, Assistant Professor.....	\$ 3,000.00
J. M. Grosheintz, Research Associate.....	2,040.00

Technicians at \$780:

R. MacDougall (resigned 16 November).....	294.67
D. Edson, from 18 November.....	483.17
Mrs. C. McCallum, Laboratory Attendant.....	236.14

\$ 77,837.42

Biology

Professors:

E. M. Walker, Invertebrate Zoology; also Head of Department.....	\$ 5,500.00
W. H. Piersol, Histology and Embryology at \$5,100 of which half charged to Anatomy.....	2,550.00
J. R. Dymond.....	4,300.00
A. F. Coventry.....	4,000.00
A. G. Huntsman, Marine Biology (without salary).....	

Associate Professors:

W. H. T. Baillie.....	4,000.00
J. W. MacArthur.....	4,000.00
E. H. Craigie.....	3,750.00
W. J. K. Harkness (on leave of absence).....	3,550.00

Assistant Professors:

Dr. Norma H. C. Ford (paid also \$300 by School of Nursing).....	3,050.00
K. C. Fisher.....	2,850.00
F. P. Ide.....	2,300.00

Lecturers (Sessional):

F. E. J. Fry (paid also \$1,250 in Special Research).....	900.00
R. R. Langford (paid also \$1,250 in Special Research).....	900.00

Demonstrators (Sessional):

C. W. J. Armstrong.....	900.00
G. M. Neal.....	900.00
Miss R. D. C. Martin.....	500.00

Assistants (Sessional):

D. G. Wilder.....	552.50
W. A. Kennedy.....	450.00
Miss M. Anderson.....	400.00

W. M. Sprules	\$ 410.00
E. D. Winchester	275.00
Miss D. W. Kirk (paid also \$340 in Botany and \$300 in Special Research)	120.00
H. Nesbitt	100.00
Miss E. V. Engelbert (paid also \$400 in Special Research)	85.00
Miss A. M. Ironside (paid also \$600 in Special Research)	85.00
C. J. Kerswill	75.00
W. B. Scott	75.00
S. P. Drummond	70.00
J. R. Brett	60.00
G. H. Clawson	60.00
C. L. Petersen	60.00
J. H. Follwell (paid also \$300 in Special Research)	53.00
A. W. F. Banfield	50.00
R. M. Belyea	50.00
D. M. Davies	50.00
D. N. Omand	50.00
V. E. F. Solman (paid also \$300 in Special Research)	50.00
Mrs. Isobel Radforth	35.00
A. Quantrill, Mechanical Technician	1,500.00
T. Stovell, Microscopic Technician	1,000.00
S. Clare, Assistant, Experimental Biology	950.00
Mrs. Audrey H. Shortt, Photographer, 10 mos. (paid also in Royal Ontario Museum)	800.00
W. J. LeRay, Curator of Vivarium	1,750.00
D. G. LeRay, Assistant in Vivarium (paid also \$52.50 in Psychology Department)	800.00
A. Wilson, Chief Laboratory Assistant (at \$1,125, including bonus for extra services, \$75—resigned 8 May)	1,031.25
W. Smith, Laboratory Attendant and Stores Assistant, \$900; bonus for extra services, \$75	975.00
A. Prince, Laboratory Attendant	450.00
E. C. Cross, Secretary, at \$1,800 (on war service from 1 August)	493.98
Mrs. Helen Johnson, Acting Secretary for duration of war, \$1,200; bonus for extra services, \$300	1,500.00
Miss P. Foreman, Stenographer and Librarian, \$1,050; bonus for extra services, \$75	1,125.00
Miss E. Caesar, Secretarial Assistant, \$720; bonus for extra services, \$75	795.00
Temporary Clerical Assistants at \$9.25 per week:	
Mrs. J. Jolliffe, 14 weeks	129.50
Mrs. Margaret Stevenson, 9 weeks	83.25
Miss B. Bott, 4 weeks	37.00
Miss E. Reed, 2 weeks	18.50
	\$ 60,603.98

Botany

Professors:	
R. B. Thomson, Plant Morphology (retired 30 June)	\$ 5,500.00
H. S. Jackson, Mycology	5,200.00
Associate Professors:	
D. L. Bailey (part time)	3,500.00
G. H. Duff	4,300.00
H. B. Sifton	4,300.00
Assistant Professors:	
Dr. J. Gertrude Wright	3,000.00
T. M. C. Taylor (paid also \$420 for Extension Work)	3,000.00
L. C. Coleman, Associate (Sessional)	2,000.00
A. J. V. Lehmann, Lecturer (Sessional)	1,900.00
D. H. Hamly, Special Demonstrator in Microscopy and Micro-photography (Sessional—paid also \$550 in Applied Physics; \$500 in Mining Engineering, and \$695 in Special Research)	800.00
M. W. Bannan, Senior Demonstrator (Sessional—paid also \$610 in Special Research)	800.00
Miss D. F. Forward, Assistant and Demonstrator in Physiology (Sessional)	1,500.00
Class Assistants (Sessional):	
A. R. Gopal-Ayengar (paid also \$240 in Special Research)	680.00
N. W. Radforth (paid also \$570 in Special Research)	680.00

C. N. Haldenby (paid also \$160 in Special Research).....	\$ 680.00	
B. B. Hillary (paid also \$80 in Special Research).....	680.00	
W. R. Watson (paid also \$240 in Special Research).....	680.00	
C. D. McKeen (paid also \$210 in Special Research).....	600.00	
L. T. Richardson (paid also \$210 in Special Research).....	600.00	
Miss J. W. McLellan.....	500.00	
Miss R. H. Moore (paid also \$140 in Special Research).....	500.00	
Miss D. W. Kirk (paid also \$300 in Special Research and \$120 in Biology).....	340.00	
Miss G. S. Taylor (paid also \$800 in Botanic Gardens).....	300.00	
Assistants (Sessional):		
R. F. Cain, Mycological Herbarium.....	1,800.00	
Miss M. B. Givens, Morphology and Anatomy.....	1,800.00	
Miss C. B. Ross, Ecology.....	1,700.00	
A. Simpson, Horticulturist (with living quarters valued at \$360).....	2,200.00	
D. S. Hull, Herbarium Assistant.....	800.00	
L. Van Cleemput, Gardener.....	1,700.00	
Clerical Assistants:		
Miss L. Alward.....	1,400.00	
Miss R. Hobberlin.....	1,200.00	
Dr. Kathleen L. Hull, Librarian.....	1,250.00	
Laboratory Attendants:		
R. Lynn.....	1,300.00	
S. G. Smith.....	1,000.00	
		\$ 58,190.00

History

Professors:		
Chester Martin, also Head of Department.....	\$ 5,500.00	
R. Flenley.....	4,700.00	
F. H. Underhill.....	4,700.00	
G. W. Brown (paid also \$450 from University Press and \$280 for Extension Work).....	4,500.00	
B. Wilkinson, Mediaeval History.....	4,500.00	
Associate Professors:		
G. deT. Glazebrook (paid also \$150 from University Press and \$150 for Extension Work).....	3,850.00	
D. G. Creighton (on leave of absence on two-thirds salary—paid also \$140 for Extension Work).....	2,000.00	
Assistant Professors:		
D. J. McDougall (paid also \$450 for Extension Work).....	2,800.00	
Edgar McInnis (paid also \$5 from University Press and \$108 for Extension Work).....	2,800.00	
R. M. Saunders (paid also \$715 for Extension Work).....	2,500.00	
G. G. Coulton, Special Lecturer (Sessional—paid also \$125 for extra lectures).....	1,000.00	
R. G. Riddell, Lecturer and Tutor (Sessional—without salary); Reader (Sessional—paid also \$490 for Extension Work).....	250.00	
		\$ 39,100.00

Anthropology

T. F. McIlwraith, Professor.....	\$ 4,500.00	
Philleo Nash, Lecturer (Sessional).....	2,400.00	
C. W. M. Hart, Special Lecturer (Sessional—without salary; paid as Assistant Professor of Sociology).....		
J. N. Emerson, Class Assistant (Sessional).....	300.00	
		\$ 7,200.00

Archaeology

C. T. Currelly, Professor (paid also in Royal Ontario Museum).....	\$ 2,000.00	
Rt. Rev. W. C. White, Associate Professor (paid also in Royal Ontario Museum).....	2,000.00	
Homer A. Thompson, Assistant Professor, Classical Archaeology.....	4,000.00	
Research Assistants (Sessional—without salary):		
F. Y. S. Tseng, Chinese Archacology.....		
J. M. Menzies.....		
		\$ 8,000.00

Fine Art

John Alford, Professor at \$5,000, of which \$4,000 paid from Special Fund	\$ 1,000.00
Assistant Professors:	
Peter Brieger (paid also \$300 in School of Architecture).....	2,700.00
C. F. Comfort (Sessional—without salary).....
Miss R. M. Home, Special Instructor (Sessional—without salary; paid in Royal Ontario Museum).....
P. Haworth, Instructor (Sessional—part time).....	700.00
Mrs. I. H. Whitley, Secretary-Librarian (Sessional).....	600.00
	<hr/>
	\$ 5,000.00

Geography

Griffith Taylor, Professor, also Head of Department (paid also \$2,500 in Ontario College of Education and \$535 for Extension Work)...	\$ 4,000.00
G. Tatham, Assistant Professor (paid also \$395 for Extension Work)...	2,400.00
D. F. Putnam, Lecturer (Sessional—paid also \$459 for Extension Work)	2,000.00
Miss M. Brookstone, Demonstrator (Sessional—paid also \$380 for Extension Work).....	1,200.00
Assistants (Sessional—part time):	
L. G. Reeds.....	350.00
Miss N. Hooper.....	75.00
Mrs. Elizabeth A. Hume-Rothery.....	75.00
	<hr/>
	\$ 10,100.00

Political Economy

Professors:	
H. A. Innis, also Head of Department (paid also \$220 for Extension Work).....	\$ 5,100.00
W. T. Jackman, Transportation, at \$4,900 (on leave of absence on half salary; retired 30 June).....	2,450.00
H. R. Kemp, Commerce, at \$4,100 (on war service) Teachers' Insurance & Annuity Association contribution.....	200.04
V. W. Bladen (paid also \$275 from University Press and \$760 for Extension Work).....	4,100.00
A. Brady (paid also \$100 from University Press).....	4,000.00
R. M. Dawson (paid also \$25 from University Press and \$20 for Extension Work).....	4,000.00
Associate Professors:	
H. A. Logan (paid also \$420 for Extension Work).....	3,800.00
Lorne T. Morgan (paid also \$36 from University Press and \$130 for Extension Work).....	3,700.00
Assistant Professors:	
A. F. W. Plumptre (paid also \$10 for Extension Work).....	2,900.00
D. C. MacGregor (paid also \$15 from University Press).....	2,800.00
J. F. Parkinson (paid also \$12 from University Press and \$150 for Extension Work).....	2,800.00
V. F. Coe, at \$2,700 (on war service) T.I. & A.A. contribution...	135.00
Lecturers (Sessional):	
S. B. Stocking, Temporary (vice H. R. Kemp—paid also \$50 for Extension Work).....	3,300.00
C. B. Macpherson.....	2,100.00
J. E. L. Graham, Special Lecturer (Sessional—vice V. F. Coe).....	1,800.00
J. G. Perold, Instructor (Sessional—paid also \$10 for Extension Work)	1,500.00
Assistants (Sessional):	
V. C. Fowke (paid also \$10 from University Press and \$162 for Extension Work).....	1,500.00
W. K. Bryden.....	250.00
H. C. McFadden.....	250.00
R. G. Robertson (paid also \$100 from University Press).....	250.00
D. G. Tyndall.....	250.00
Transfer to Department to pay temporary Lecturers.....	324.85
Accounting:	
W. S. Ferguson, Professor (part time).....	2,550.00
C. A. Ashley, Associate Professor, \$3,400; Supervisor of Studies in Political Economy, \$600 (paid also \$40 from University Press and \$400 honorarium for Cost-per-Student survey).....	4,000.00
F. R. Crocombe, Assistant Professor (paid also \$420 for Extension Work).....	3,450.00

Sociology:

C. W. M. Hart, Assistant Professor and Supervisor of Studies; also Special Lecturer in Anthropology without salary (paid also \$130 for Extension Work).....	\$ 3,100.00	
S. D. Clark, Lecturer (Sessional).....	2,000.00	
E. C. Devereux, Instructor (Sessional).....	1,000.00	
		\$ 63,609.89

Law

Professors:

W. P. M. Kennedy, Constitutional Law, 3 mos. at \$5,800; 9 mos. at \$6,000 (paid also \$250 from University Press).....	\$ 5,950.00	
N. A. M. MacKenzie, Public and Private International Law at \$4,500 (resigned 30 September).....	1,125.00	
F. C. Auld, Jurisprudence, 3 mos. at \$4,200; 9 mos. at \$4,500 (paid also \$220 for Extension Work).....	4,425.00	
Jacob Finkelman, Associate Professor, 3 mos. at \$2,900; 9 mos. at \$3,100	3,050.00	

Lecturers (Sessional):

J. E. M. Hancock, 3 mos. at \$1,800; 9 mos. at \$1,850.....	1,837.50	
Bora Laskin (paid also \$154 for Extension Work).....	1,800.00	

Special Lecturers (Sessional—without salary):

H. G. Fox, Industrial Property.....		
H. Rubin, Comparative Law.....		
		\$ 18,187.50

Philosophy

Professors:

G. S. Brett at \$6,000, of which \$1,000 paid in Ethics (paid also \$1,000 as Dean of Graduate Studies and \$30 in Ontario College of Education).....	\$ 5,000.00	
F. H. Anderson.....	4,600.00	

Associate Professors:

H. R. MacCallum (paid also \$10 for Extension Work).....	4,200.00	
E. W. Macdonald (paid also \$30 for Extension Work).....	3,300.00	
W. Jarvis McCurdy (paid also \$420 for Extension Work).....	3,000.00	
T. A. Gudge, Assistant Professor (paid also \$320 for Extension Work)	1,900.00	
		\$ 22,000.00

Psychology

Professors:

E. A. Bott, also Director of Laboratory (paid also \$200 for Extension Work).....	\$ 5,000.00	
W. E. Blatz (part time—paid also \$2,500 in Institute of Child Study).....	2,500.00	
S. N. F. Chant (paid also \$582 for Extension Work).....	4,300.00	
W. Line, Associate Professor.....	3,900.00	

Assistant Professors:

J. D. Ketchum (paid also \$620 for Extension Work).....	3,000.00	
G. P. Cosgrave at \$3,000, of which \$916 paid by National Research Council for part-time services (paid also \$10 for Extension Work).....	2,084.00	
K. S. Bernhardt (part time—paid also \$700 in Institute of Child Study; \$732 for Extension Work, and \$10 in School of Nursing)	2,600.00	
C. R. Myers (part time—paid also \$250 from Psychiatric Research Funds; \$300 for Extension Work, and \$60 in School of Nursing)	2,300.00	

Special Lecturers (Sessional):

K. H. Rogers (paid also \$20 in Social Science).....	200.00	
G. W. Anderson (paid also \$150 in Psychiatry).....	100.00	
J. D. M. Griffin, also in Paediatrics and Psychiatry without salary (paid also \$20 in School of Nursing).....	100.00	
C. G. Stogdill (paid also \$100 in School of Nursing).....	100.00	

Instructors (Sessional):

Miss M. D. Salter.....	800.00	
Miss M. L. Northway (paid also \$300 in Institute of Child Study)	500.00	

Class Assistants (Sessional):

E. S. W. Belyea (paid also \$375 for Extension Work).....	500.00	
Miss K. Harvie.....	400.00	

Miss M. Wright (paid also \$50 in Institute of Child Study)	\$ 400.00	
Mrs. Magda B. Arnold (paid also \$30 from Psychiatric Research Funds)	300.00	
Miss R. W. Dingee	300.00	
Miss D. A. Millichamp (paid also \$1,500 in Institute of Child Study)	300.00	
E. Signori	300.00	
Readers (Sessional):		
G. W. FitzGerald	200.00	
J. Kaplan	200.00	
Miss E. G. McClelland	200.00	
C. Marshman	200.00	
T. R. Maxwell	150.00	
G. C. Cooper, Technician	2,300.00	
	\$33,234.00	
Less paid by School of Nursing	300.00	
		\$ 32,934.00

Italian and Spanish

Professors:		
M. A. Buchanan	\$ 6,000.00	
J. E. Shaw	6,000.00	
Emilio Goggio	4,500.00	
Associate Professors:		
G. C. Patterson	3,800.00	
Juan Cano (paid also \$200 for Extension Work)	3,800.00	
Instructors (Sessional):		
T. B. Barclay	1,500.00	
J. H. Parker	1,500.00	
C. H. Andrusyshen, 2 mos.	300.00	
		\$ 27,400.00

Military Studies

Major M. Barry Watson, Director and Assistant Professor at \$2,600 (part time from 1 October)	\$ 1,850.00	
Brig.-General G. S. Cartwright, Special Lecturer (vice Major Watson)	500.00	
W. A. Baughhurst, Assistant, 10 mos.	1,050.00	
		\$ 3,400.00

(2) Departments in University College (\$158,777.00)

Classics

Gilbert Norwood, Professor, also Director of Classical Studies (paid also \$19.85 from University Press)	\$ 6,250.00	
(a) Greek:		
E. T. Owen, Professor	4,700.00	
Associate Professors:		
D. E. Hamilton	4,200.00	
M. D. C. Tait	3,600.00	
(b) Latin:		
Professors:		
G. Oswald Smith (on leave of absence—retired 30 June)	5,000.00	
E. A. Dale at \$4,500, of which half paid by Trinity College	2,250.00	
(c) Greek and Roman History:		
C. N. Cochrane, Professor (also Dean of Residence with free house, heat and light valued at \$300)	4,500.00	
Assistant Professors:		
L. A. MacKay (paid also \$420 for Extension Work—resigned 30 June)	3,250.00	
Miss M. C. Needler (paid also \$30 for Extension Work)	2,700.00	
		\$ 36,450.00

English

Professors:

M. W. Wallace (paid also \$1,500 as Principal of University College)	\$ 6,000.00
R. S. Knox	4,900.00
J. F. Macdonald	4,500.00
E. K. Brown (paid also \$200 from University Press—resigned 30 June)	4,200.00
A. S. P. Woodhouse (paid also \$200 from University Press)	4,200.00
W. H. Clawson, Associate Professor (paid also \$300 for Extension Work)	3,900.00

Assistant Professors:

N. J. Endicott	2,900.00
J. R. MacGillivray (paid also \$40 from University Press and \$554 for Extension Work)	2,900.00
A. E. Birney, Lecturer (Sessional—paid also \$300 for Extension Work)	2,300.00

 \$ 35,800.00

French

Professors:

F. C. A. Jeanneret	\$ 5,500.00
J. S. Will (paid also \$10 from University Press)	5,000.00
St. E. de Champ (paid also \$200 for Extension Work)	4,500.00

Associate Professors:

W. J. McAndrew (paid also \$800 as Registrar of University College)	3,700.00
H. L. Humphreys	3,600.00

Assistant Professors:

J. G. Andison (paid also \$452 for Extension Work)	3,300.00
R. D. C. Finch	3,250.00
C. D. Rouillard (paid also \$300 for Extension Work)	3,000.00

Lecturers (Sessional):

Miss A. C. Cole (paid also \$88 for Extension Work)	2,350.00
G. L. Assié (paid also \$720 for Extension Work)	2,000.00
J. A. Houpert (paid also \$100 for Extension Work)	2,000.00
Miss I. G. Balthazard	1,800.00
Miss M. D. MacDonald (paid also \$200 for Extension Work)	1,800.00

 \$ 41,800.00

German

Barker Fairley, Professor, also Head of Department	\$ 6,000.00
Thure Hedman, Associate Professor	4,000.00

Assistant Professors:

G. E. Holt	3,450.00
H. Boeschenstein (paid also \$250 for Extension Work)	2,800.00
Martin Joos, Lecturer (Sessional)	2,000.00

 \$ 18,250.00

Semitics

Professors:

W. R. Taylor (paid also \$25 from University Press)	\$ 5,500.00
T. J. Meek	5,500.00

Assistant Professors:

F. V. Winnett	3,000.00
W. S. McCullough	2,800.00
R. F. Schnell, Reader (temporary)	77.00

 \$ 16,877.00

Ethics

G. S. Brett, Professor (paid also as Professor of Philosophy and Dean of School of Graduate Studies)	\$ 1,000.00
---	-------------

 \$ 1,000.00

University College General

M. W. Wallace, Principal (paid also as Professor of English)	\$ 1,500.00
Miss Marion B. Ferguson, Dean of Women (with living valued at \$400)	2,500.00
W. J. McAndrew, Registrar (paid also as Associate Professor of French)	800.00
Miss E. H. McAndrew, Assistant to the Registrar	1,050.00
Miss M. Blackburn, Secretary in Registrar's Office	1,350.00
Miss C. Tocque, Stenographer in University College	1,400.00

 \$ 8,600.00

R. K. George (paid also \$125 for Extension Work).....	3,100.00
C. G. Smith at \$2,500 (including \$200 paid by School of Nursing).....	2,500.00

Gracent Eidt, Fellow in Histology, 10 mos. (paid also \$4.00 in Department of Anatomy).....

1,100.00

Assistants in Histology (Sessional):

H. C. Elliott.....	600.00
H. D. Ball (paid also \$150 for Extension Work).....	500.00

Demonstrators (Sessional):

Miss K. I. McMurrich (paid also in Athletics and Physical Education—Women).....	800.00
M. J. Wilson, Radiological Anatomy (paid also \$200 from Medical Research—Best Fund and \$500 in Men's Residences).....	400.00
N. C. Delarue (paid also \$200 in Physiology).....	325.00
Charles Sheard, Jr., (paid also \$200 in Physiology).....	325.00
W. D. Flatt (paid also \$200 from Medical Research—Best Fund).....	325.00
W. J. Winthrope at \$325 (resigned 28 February—paid also \$125 in Physiology).....	203.12

A. E. Montgomery, Dental Anatomy.....

300.00

F. P. McInnis.....

250.00

R. G. McKenzie, 4 mos. (paid also \$500 in Surgery).....

162.50

Miss V. Ryder, Histology.....

100.00

G. A. Graham, (Neurology).....

60.00

B. Wintrob, (Neurology).....

60.00

W. E. L. Sparks at \$55 (on war service).....

H. E. LeMasurier, Senior Technical Assistant, at \$1,900 (on war service) contribution to Pension Fund.....

52.25

Technical Assistants:

H. F. Whittaker (paid also \$150 in Dentistry).....

1,050.00

G. A. L. Ross.....

1,000.00

Miss G. Dowsley, Clerical Assistant.....

1,300.00

B. L. Guyatt, Museum Curator (part time).....

1,000.00

Laboratory Assistants:

H. McCormick.....

1,750.00

C. E. Storton.....

1,100.00

H. Lloyd at \$520 per annum from 20 September.....

405.90

A. Coopman, 3 mos. at \$850 (ob. 9 September).....

212.50

\$41,581.27

Less paid by School of Nursing.....

200.00

\$ 41,381.27

Pathology and Bacteriology

Professors:

William Boyd (paid also \$20 in School of Nursing).....

\$ 8,000.00

W. L. Holman, Bacteriology, also Associate Director of Applied Bacteriology.....

5,000.00

W. L. Robinson, Pathology, also Associate Director of Applied Pathology.....

2,200.00

Assistant Professors:

W. Magner.....

300.00

I. H. Erb.....

300.00

G. Shanks.....

300.00

Lecturers (Sessional):

P. H. Greey, Bacteriology (paid also \$30 for Post Graduate Course)	\$ 1,800.00
Dr. R. Margarite Price, Bacteriology and Serology	3,000.00
D. E. O. Magner at \$1,700 (on war service)	1,800.00
A. J. Kerwin, substitute for D. E. O. Magner	1,800.00
D. N. Henderson, Associate, Gynaecological Pathology (without salary—paid \$500 in Obstetrics and Gynaecology)	1,200.00
J. D. Duffin, Senior Fellow	1,200.00

Fellows (Sessional):

J. W. Stevenson, in Museum	850.00
W. G. Rice at \$1,000 (resigned 30 September)	250.00
A. L. Gordon at \$850 (resigned 31 March)	637.50
C. E. Lindenfield, 3 mos. at \$850	212.50

Demonstrators (Sessional):

Pathology:

S. Hanson	850.00
W. L. Donohue	100.00
Dr. Mary I. Tom (paid also \$2,000 in Neuropathology)	75.00
M. A. Ogryzlo (paid also \$1,000 in Neuropathology)	75.00
E. J. Clifford, Bacteriology (without salary)	

Assistants in Laboratory:

Miss N. W. Simpson, Pathology	1,500.00
Miss H. M. Boyd, Bacteriology	1,100.00
Miss A. Alvey, Special Technician	1,200.00
Miss C. M. Westlake, Technician	1,020.00

Attendants for preparing Media:

Miss E. A. Gordon, Senior Technician, Bacteriology	1,200.00
Miss M. Jackson, Attendant, Bacteriology	840.00

Laboratory Attendant, Bacteriology:

K. Hayden	590.00
A. Gibson, 22 days at \$50 per month	35.50
Miss G. K. R. Boyd, Secretary	1,260.00
Miss V. L. McKinnon, Museum Stenographer	1,260.00
Miss H. J. Williamson, Librarian and Assistant Secretary	1,020.00
J. F. Payne, Preparator	1,800.00
Mrs. Erna MacNeill, Junior Attendant in Museum	600.00
Miss M. Wightman, Autopsy Recorder	960.00
Mrs. G. F. Schreiber, Autopsy Technician	960.00

\$42,295.50

Division of Neuropathology:

E. A. Linell, Professor	\$ 4,500.00
Dr. Mary I. Tom, Lecturer (Sessional—paid also as Demonstrator in Pathology)	2,000.00
M. A. Ogryzlo, Fellow (Sessional—paid also as Demonstrator in Pathology)	1,000.00
Technicians:	
Miss M. G. Hein	1,140.00
Miss H. Rogers, Medicine and Surgery	1,020.00
Miss C. A. Bell, Stenographer	1,200.00

\$ 53,155.50

Pathological Chemistry

Andrew Hunter, Professor	\$ 7,000.00
T. F. Nicholson, Associate Professor	3,600.00

Lecturer (Sessional):

R. W. I. Urquhart at \$1,000 (on war service)	1,000.00
D. L. Selby, substitute	1,000.00

Fellows (Sessional):

H. E. Woodward at \$1,500 (resigned 30 April)	1,312.50
A. G. Gornall	1,000.00

Demonstrators (Sessional):

D. H. Boddington	500.00
J. S. Wilson	250.00
G. P. Hamblin, Assistant (Sessional)	250.00
C. E. Downs, Technician (paid also \$42.75 for overtime)	1,500.00
C. H. Downs, Laboratory Assistant	1,200.00

Laboratory Attendants:

Mrs. J. Faulds	\$ 750.00	
Mrs. C. McCallum (paid also in Organic Chemistry)	350.00	
Miss C. A. Shannon, Secretary	1,200.00	
		\$ 19,912.50

Pharmacy and Pharmacology

V. E. Henderson, Professor	\$ 6,000.00	
G. H. W. Lucas, Associate Professor	4,000.00	
J. K. W. Ferguson, Assistant Professor, at \$3,600 (on war service from February)	2,745.00	
D. D. Bonnycastle, Fellow (Sessional)	1,500.00	
Allan Brock, Technical Assistant	2,100.00	
A. C. Morrison, Technician	1,000.00	
C. Codner, Laboratory Attendant	1,160.00	
Miss D. Caldecott, Clerical Assistant	550.00	
		\$ 19,055.00

Bio-Chemistry

Professors:

H. Wasteneys (paid also \$200 as Special Lecturer)	\$ 6,000.00
A. M. Wynne	4,200.00
Leslie Young, Associate Professor	3,500.00
B. F. Crocker, Lecturer (Sessional)	2,400.00
Dr. Jeanne Manery Fisher, Demonstrator (Sessional—paid also \$442.50 from Medical Research—Best Fund)	1,000.00

Fellows (Sessional):

Miss E. A. Macpherson	1,000.00
Jules Tuba	950.00
A. D. Barton	800.00
F. L. Root at \$800 (resigned 31 December)	300.00
D. H. Laughland, 5 mos.	500.00

Technicians:

L. Sloan, Senior	1,700.00
J. W. Fletcher	1,650.00
J. H. McClary	1,150.00
M. Edson	1,000.00

Laboratory Assistants at \$1,050:

G. Lombard, 2 mos. (resigned)	175.00
Mrs. Lucy Lombard, 11 mos.	962.50
W. Clough	1,100.00
Mrs. Ethel Wilkie, Laboratory Attendant	850.00
Miss M. Delamere, Secretarial Assistant	1,350.00

\$ 30,587.50

Physiology

Professors:

C. H. Best (paid also in Connaught Laboratories; \$2,500 from Medical Research—Best Fund, and \$20 from University Press)	\$ 6,000.00
N. B. Taylor	4,800.00

Associate Professors:

D. Y. Solandt (paid also \$400 in School of Hygiene and \$300 from Medical Research—Best Fund)	3,700.00
E. T. Waters (paid also \$97.50 for Extension Work)	3,200.00
E. H. Botterell, Lecturer (Sessional at \$1,500; also in Surgery—on war service) T.I. & A.A. contribution	75.00
E. Fidler, Lecturer and Research Associate (Sessional—paid also \$100 from Medical Research—Best Fund and \$450 for Extension Work)	2,000.00

Research Associates (Sessional):

J. Campbell (paid also \$600 from Medical Research—Best Fund)	1,400.00
A. L. Chute at \$1,500 (on war service from August)	375.00
J. Markowitz (on war service from January)	100.00

Research Assistants (Sessional):

L. B. Jaques	1,200.00
M. J. Wilson (paid also in Anatomy and Men's Residences)	100.00

Fellows (Sessional):

J. W. Dales	\$ 700.00
N. C. Delarue (paid also in Anatomy)	200.00
Charles Sheard, Jr. (paid also in Anatomy)	200.00
W. J. Winthrope at \$200 (paid also in Anatomy—resigned 28 February)	125.00
Dr. Margaret T. C. Mitford, Demonstrator, 10 mos.	1,000.00
Miss M. Cory, Departmental Librarian	1,250.00
Miss D. Secord, Secretarial Assistant (paid also \$100 from Medical Research—Best Fund)	1,250.00
F. L. Robinson, Technical Assistant and Glass-blower (paid also \$500 from Medical Research—Best Fund)	2,000.00
A. Elliott, Mechanician	1,850.00

Technical Assistants:

J. D. Brown, Geo-physics	1,500.00
J. C. Howard (paid also \$457.84 from Medical Research—Best Fund)	322.16
G. Scattergood, Laboratory Attendant for Teaching Laboratories, at \$1,350 (on war service) contribution to Pension Fund	34.40

Animal Caretakers:

G. L. Robinson at \$1,350 (on war service from June, 1940)	143.44
S. McCracken at \$1,040 (on war service from August)	260.00
J. D. Illingworth (temporary) 42 weeks, 1 day at \$16 per week	674.67

Assistant Animal Caretaker:

A. D. Crouch at \$1,100 (on war service from June, 1940)	119.40
T. W. Kober (temporary)	825.00

 \$ 35,404.07

Hygiene and Preventive Medicine

D. T. Fraser, Professor (paid also in Connaught Laboratories)	\$ 4,500.00
---	-------------

Associate Professors:

M. H. Brown at \$1,100 (on war service) T.I. & A.A. contribution	55.08
Dr. Frieda H. Fraser (paid also in Connaught Laboratories)	1,100.00
P. J. Moloney (without salary—paid in Connaught Laboratories and \$2,800 in School of Hygiene)
F. O. Wishart, Assistant Professor (paid also \$250 from Special Fund)	3,000.00

Lecturers (Sessional):

Miss H. C. Plummer (paid also in Connaught Laboratories)	500.00
E. L. Davey at \$1,044 (on leave of absence without salary from 1 October to 30 June—paid also \$375 in School of Hygiene)	261.00
W. B. McClure, Special Lecturer in Parasitology (Easter Term)	100.00
R. J. Wilson, Fellow (Sessional)	1,000.00

Demonstrators (Sessional):

A. M. Fallis	400.00
A. M. Goulding (paid also \$100 from Special Fund)	400.00
R. Hare (paid also in Connaught Laboratories)	400.00
Mrs. Ella Kuitunen (Easter Term)	500.00

Class Assistants (Sessional):

Dr. Laurella McClelland at \$744 for 10 mos. (resigned 31 December)	297.60
Miss G. Mickle, 6 mos.	500.00
A. J. Bishop, Technician	800.00
Miss F. E. Neill, Laboratory Assistant, 6 mos.	300.00
Miss E. Barr, Secretarial Assistant	1,200.00

 \$ 15,313.68

Medicine and Clinical Medicine

Duncan Graham, Professor	\$10,000.00
--------------------------	-------------

Assistant Professors:

R. F. Farquharson at \$2,000, of which half charged to Therapeutics	1,000.00
W. F. McPhedran (half time)	500.00

Part time:

H. K. Detweiler	300.00
G. W. Howland (paid also \$60 for Extension Work)	300.00
J. D. Loudon	300.00
J. A. Oille (paid-also \$20 in Health Service)	300.00
E. J. Trow, in charge of Dermatology	300.00

Associates:

W. R. Campbell.....	\$ 2,000.00
Half time:	
Trevor Owen (paid also \$115 in School of Nursing).....	500.00
W. P. Warner at \$500 (on war service).....
Part time:	
R. G. Armour (paid also \$50 for Extension Work).....	250.00
J. H. Elliott (paid also \$700 as Professor of History of Medicine; \$40 in School of Nursing, and \$30 for Extension Work).....	250.00
A. A. Fletcher (paid also \$30 for Extension Work).....	250.00
Beverley Hannah (paid also \$90 in School of Nursing).....	250.00
J. Hepburn.....	250.00
F. W. Rolph.....	250.00
J. A. Dauphinee, Senior Demonstrator, Clinical Microscopy (Sessional—without salary; paid as Junior Demonstrator).....

Senior Demonstrators (Sessional):

Half time:	
G. W. Loughheed.....	500.00
H. H. Hyland at \$500 (on war service).....
Part time:	
Gordon Bates (paid also \$20 in School of Nursing).....	200.00
G. F. Boyer.....	200.00
E. A. Broughton.....	200.00
E. E. Cleaver.....	200.00
H. A. Dixon (paid also \$15 in School of Nursing).....	200.00
J. G. Falconer (paid also \$200 in School of Nursing and \$50 for Extension Work).....	200.00

VIII. SCHOOL OF HYGIENE	
83. Salaries	
(1) Administration:	
R. D. Defries, Director, 8 mos. at \$5,000; Associate Director, 4 mos. at \$3,500; also Professor, Hygiene and Epidemiology and Head of Department of Epidemiology and Biometrics (paid also as Director of Connaught Laboratories).....	\$ 4,500.00
Mrs. Edna L. Fitzgerald, 9 mos. salary at \$5,000 of late Director, Dr. J. G. Fitzgerald; ob. 20 June, 1940.....	3,750.00
J. Craigie, Secretary (paid also \$500 as Associate Professor of Epidemiology and in Connaught Laboratories).....	500.00

K. M. Kerns, Office Assistant (paid also \$462 as Secretary of Department of Epidemiology and Biometrics).....	\$ 462.00
(2) Epidemiology and Biometrics:	
R. D. Defries, Professor, Hygiene and Epidemiology and Head of Department (paid as Director and in Connaught Laboratories).....
Associate Professors:	
J. Craigie, Epidemiology (paid also as Secretary and in Connaught Laboratories).....	500.00
N. E. McKinnon, Hygiene and Epidemiology at \$1,000 (also in Connaught Laboratories) on war service; T.I. & A.A. Contribution.....	50.04
Miss Mary A. Ross, Assistant Professor, Biometrics (paid also \$75 from Special Fund).....	2,700.00
W. Mosley, Director, Field Training.....	4,200.00
D. B. Avison, Assistant Director at \$250 per month; 20 January to 30 April.....	846.77
A. E. Berry, Lecturer in Public Health Engineering (Sessional; paid also in Faculty of Applied Science).....	500.00
Lecturers in Epidemiology:	
J. M. Mather, at \$2,400; 5 mos.....	1,000.00
J. H. Baillie, at \$250 per month, 19 May to 30 June (paid also \$900 as Fellow).....	354.85
Associates (Sessional):	
Miss E. R. Wheler, Public Health Nursing.....	2,100.00
A. L. McNabb, Public Health Engineering.....	150.00
Clinical Associates in Epidemiology (Sessional):	
J. T. Phair (paid also \$40 in School of Nursing).....	200.00
A. L. McKay, at \$200; resigned 31 December.....	100.00
Instructors for Public Health Officers (Sessional):	
F. O. Wishart (paid also in Department of Hygiene).....	250.00
Dr. Mary A. Ross (paid also as Assistant Professor).....	75.00
A. J. Bishop (paid also in Department of Hygiene).....	200.00
Demonstrators (Sessional):	
A. H. Sellers, at \$350; on war service from 11 November....	175.00
A. M. Goulding, Temporary (paid also \$400 in Department of Hygiene).....	100.00
Dr. A. E. C. Riggs.....	125.00
Fellow in Biometrics (Sessional):	
E. L. Davey, 3 mos. at \$1,500; on leave of absence for balance of Session (paid also \$261 in Department of Hygiene)....	375.00
J. H. Baillie (paid also \$354.85 as Lecturer).....	900.00
Public Health Nurse Interns:	
Miss M. C. Woodside, 2 mos.....	120.00
Miss J. Hoffman, 1 month.....	60.00
K. M. Kerns, Secretary (paid also \$462 as Office Assistant—see above).....	462.00
Laboratory Assistants:	
Miss S. R. McCausland.....	924.00
W. Moore.....	900.00
W. Deyman, at \$735; resigned 15 December.....	339.13
Miss L. Beattie, at \$50 per mo. from 23 January.....	264.55
Miss J. E. MacDonald, at \$42 per mo. from 11 November....	322.00
(3) Physiological Hygiene:	
C. H. Best, Head of Department (without salary; paid in Physiology, Special Research and Connaught Laboratories).....
Associate Professors:	
D. L. McLean, at \$2,900 (also in Connaught Laboratories) on war service; T.I. & A.A. Contribution.....	145.08
E. W. McHenry (paid also in Connaught Laboratories)....	1,200.00
R. E. Haist, Assistant Professor.....	2,600.00
J. G. Cunningham, Lecturer in Industrial Hygiene (Sessional)....	500.00
Research Associates:	
H. M. Barrett.....	2,800.00
Mrs. Ruth C. Partridge (paid also \$150 from Medical Research—Best Fund).....	800.00
D. Y. Solandt (paid also in Physiology and from Medical Research—Best Fund).....	400.00

Miss J. H. Ridout (paid from Special Funds in Connaught Laboratories) (also from Medical Research—Best Fund) 6 mos. contribution to T.I. & A.A.	\$ 18.72	
Research Assistants:		
Miss H. J. Bell.....	1,400.00	
Miss J. Patterson.....	1,440.00	
I. G. Goddard, at \$500; resigned 15 March (paid also in Connaught Laboratories).....	354.16	
Miss A. Britton, 2 mos.....	140.00	
Miss E. L. Mahon, Secretary.....	1,250.00	
C. R. Cowan, Senior Technical Assistant (paid also \$700 from Medical Research—Best Fund).....	1,600.00	
Technical Assistants:		
W. Staples, at \$900; on war service; contribution to Pension Fund.....	23.75	
Miss L. C. Barber.....	900.00	
Miss N. Thompson.....	876.00	
Miss J. M. Smith.....	660.00	
Miss E. James, 1 mo.....	50.00	
Temporary Technical Assistants:		
R. Hann, at \$780; resigned 10 May.....	682.50	
E. Pike, from 21 May to 30 June at \$65 per mo.....	86.67	
Transfer to Special Rockefeller Fund, 26 May, to increase salaries of Miss J. Patterson and Miss J. Smith.....	170.00	
(4) Chemistry in Relation to Hygiene:		
P. J. Moloney, Associate Professor (paid also in Connaught Laboratories).....	2,800.00	
Miss E. M. Taylor, Demonstrator (Sessional—paid also in Connaught Laboratories).....	500.00	
G. Kimm, Technical Assistant.....	1,000.00	
	\$49,902.22	
Less charged to Special Grants.....	16,331.62	
		\$ 33,570.60

J. E. Reid.....		2,000.00	
L. S. Lauchland at \$1,800 (on war service).....			
F. Noakes (temporary).....		1,800.00	

Demonstrators (Sessional):

E. A. Ricker.....		1,200.00	
R. G. Anthes (paid also \$625 in Special Research).....		1,100.00	
H. A. Courtice.....		1,000.00	
W. C. Moull at \$1,000 (resigned 15 April).....		928.57	
W. L. Phoenix at \$1,000 (resigned 7 April).....		892.86	
W. E. White, 6 mos. part time at \$500; 1 month full time at \$1,000		571.42	
W. F. Haehnel, part time.....		500.00	
V. W. Bethel, part time at \$500 (resigned 31 March).....		428.58	

Temporary Student Demonstrators:

A. C. Hudson.....		66.67	
B. K. Smith.....		66.67	
H. P. Smith.....		66.66	
J. W. Lawson, Mechanician.....		2,000.00	
W. R. McKee, Electrician.....		2,000.00	
W. L. Bakewell, Assistant Electrician.....		1,150.00	
Miss H. L. Redmond, Office Assistant and Librarian, at \$1,075, of which \$550 charged to Civil Engineering: Municipal and Structural		525.00	
			\$ 38,196.43

Mechanical Engineering

Professors:

R. W. Angus (paid also \$10 for Extension Work).....	\$	6,000.00	
E. A. Allcut (paid also \$400 for Extension Work).....		4,800.00	

Associate Professors:	
Ross Taylor at \$3,600; part time for 9 mos. at \$200 per month.	\$ 2,700.00
W. G. McIntosh	3,500.00
Assistant Professors:	
G. R. Lord	2,500.00
R. C. Wiren	2,500.00
Lecturers (Sessional):	
D. D. Pannabaker	2,600.00
G. H. Hally at \$1,900 (resigned 30 September)	475.00
C. M. Barrett, Special Lecturer (Sessional)	1,800.00
R. G. Hillier, Special Instructor (Sessional)	1,800.00
Instructors (Sessional):	
I. W. Smith (paid also \$660 in Special Research)	1,500.00
W. A. Wallace at \$1,300 (resigned 31 October—paid also \$330 in Special Research)	185.71
Demonstrators (Sessional):	
W. T. Thompson	1,100.00
J. J. Brown at \$1,100 (resigned 31 March)	942.85
A. E. King at \$1,100 (resigned 31 March)	942.85
C. W. McEwen at \$1,100 (resigned 31 March)	942.85
J. A. N. Carmichael at \$940 (resigned 31 March)	783.34
F. Hickey, Engineer and Machinist	2,000.00
Office Assistant and Librarian:	
Miss M. Burt (on leave of absence from 15 September to 31 Dec.)	1,150.00
Mrs. G. E. Hammersley, substitute	315.00
Earl Burt, Assistant Machinist and Foreman, 1,108 hours at 55c	609.60
John Price, Laboratory Attendant	1,200.00
	\$ 40,347.20

Civil Engineering: Municipal and Structural

Professors:	
C. R. Young, Civil Engineering	\$ 5,500.00
T. R. Loudon, Applied Mechanics, at \$5,000 (on war service from July)	1,000.00
Assistant Professors:	
C. F. Morrison	2,700.00
W. L. Sagar at \$2,700 (on war service from December)	1,631.25
R. F. Legget (paid also \$150 for Extension Work)	2,700.00
M. J. C. Lazier (paid also \$150 for Extension Work)	2,500.00
Lecturers (Sessional):	
R. B. McIntyre, Applied Mechanics (paid from Special Funds)	
C. E. Helwig, Lecturer, 5 mos. at \$2,000; Instructor, 2 mos. at \$1,350	1,814.26
A. E. Berry, Special Lecturer in Municipal Engineering (paid also in School of Hygiene)	1,000.00
S. H. deJong, Demonstrator, 4 mos.	580.00
W. Kubbinga, Mechanician, 3 mos. at \$1,400; 9 mos. at \$1,900	1,775.00
J. Brown, Laboratory Assistant, 10 mos.	1,100.00
Miss H. L. Redmond, Office Assistant and Librarian (paid also in Electrical Engineering)	550.00
	\$ 22,850.51

Civil Engineering: Surveying and Geodesy

W. M. Treadgold, Professor, also Head of Department (paid also \$562.50 for Summer Camp)	\$ 4,500.00
Associate Professors:	
S. R. Crerar (paid also \$500 for Summer Camp)	4,000.00
E. W. Banting (paid also \$475 for Summer Camp)	3,800.00
J. W. Melson (paid also \$450 for Summer Camp and \$300 for Extension Work)	3,600.00
T. L. Rowe, Instructor (Sessional—paid also \$187.50 for Summer Camp and \$300 in Special Research)	1,500.00
H. S. Wainberg, Demonstrator, 5 mos.	650.00
H. V. Steer, Mechanician (Sessional—paid also \$500 in Applied Physics and \$550 in Special Research)	425.00
Miss R. Cave, Office Assistant and Librarian (paid also \$525 in Applied Physics and \$100 in Photographic Service)	625.00
	\$ 19,100.00

Mining Engineering

Professors:	
C. G. Williams, also Head of Department.....	\$ 6,000.00
J. T. King.....	4,500.00
Lecturers (Sessional):	
S. E. Wolfe.....	2,500.00
W. T. Turrall.....	1,800.00
Instructors (Sessional):	
W. A. M. Hewer.....	1,600.00
D. B. Campbell.....	1,200.00
J. K. MacFarlane.....	1,200.00
W. J. Nichols.....	1,200.00
D. H. Hamly, Demonstrator, 6 mos. (paid also in Botany, Applied Physics, and Special Research).....	500.00
E. Tozer, Laboratory Assistant and Mechanician.....	1,500.00
C. Waybrant, Laboratory Attendant, Assaying.....	1,300.00
H. J. Reilly, Assistant Mechanician, 32 weeks.....	960.00
Laboratory Helpers, each 30 weeks:	
C. Rickard.....	450.00
D. Trimble.....	450.00
Miss J. Bradshaw, Office Assistant and Librarian.....	1,100.00
	\$ 26,260.00

Metallurgical Engineering

G. A. Guess, Professor.....	\$ 5,700.00
Associate Professors:	
J. A. Newcombe (paid also \$350 for Extension Work).....	3,800.00
R. J. Montgomery.....	3,700.00
J. E. Toomer, Assistant Professor.....	3,450.00
A. Frumkin, Lecturer (Sessional).....	1,800.00
Hector Ross, Laboratory Attendant, 10 mos. (paid also \$15 for Ex- tension Work).....	900.00
Miss E. Singleton, Office Assistant and Librarian (paid also \$400 in Secretary's Office).....	300.00
	\$ 19,650.00

Chemical Engineering and Applied Chemistry

Professors:	
J. Watson Bain (paid also \$10 for Extension Work).....	\$ 5,500.00
M. C. Boswell, Organic Chemistry.....	4,900.00
E. G. R. Ardagh, Applied Chemistry.....	4,500.00
Associate Professors:	
E. A. Smith.....	3,400.00
R. R. McLaughlin.....	3,400.00
Lecturers (Sessional):	
W. C. Macdonald at \$1,900 (on war service from July).....	395.86
J. G. Breckenridge (paid also \$450 in Special Research and \$200 for Extension Work).....	1,800.00
T. Linsey Crossley, Special Lecturer, Pulp and Paper (Sessional).....	150.00
Instructors (Sessional):	
A. M. FitzGerald.....	1,600.00
W. H. Rapson at \$1,400 (resigned 31 October).....	200.00
Demonstrators (Sessional):	
M. Adelman (paid also \$600 in Special Research).....	1,050.00
B. Marks (paid also \$350 in Special Research).....	1,050.00
L. J. Rubin (paid also \$350 in Special Research).....	1,050.00
J. O. Thompson (paid also \$350 in Special Research).....	1,050.00
R. G. Billingham (paid also \$250 in Special Research).....	1,000.00
W. G. MacElhinney (paid also \$300 in Special Research).....	975.00
E. T. Williams (paid also \$250 in Special Research).....	950.00
F. C. D. Wilkes, Jr.....	875.00
E. B. Trickey (part time).....	500.00
W. E. Patte, 23 hours at \$1.25.....	28.75
A. S. Hunt, Lecture Assistant and Glass-blower.....	1,800.00
M. L. Hammond, Lecture Assistant, at \$1,000 (resigned 14 June).....	958.33
W. T. Storton, Laboratory Attendant.....	1,050.00

Laboratory Attendants at \$10 to \$15 per week:

J. Seymour, 51 weeks	\$ 755.00
W. Connor, 32 weeks, 1 day	367.00
W. Elliott, 30 weeks	315.00
E. Mann, 24 weeks, 2 days	243.33
J. Martin, 21 weeks, 1 day	234.00
J. Wilson, 21 weeks	210.00
D. Hodge, 4 weeks, 2 days	33.33
Miss D. Birkett, Office Assistant and Librarian, at \$1,250, of which \$200 charged to Secretary's Office	1,050.00
	\$ 41,390.60

School of Architecture

Professors:

H. H. Madill, also Head of Department, at \$4,700 (part time from 1 April on account of Military Duties)	\$ 4,275.00
E. R. Arthur, Architectural Design	4,500.00
H. J. Burden, Assistant Professor, at \$3,200 (on war service) T.I. & A.A. contribution	160.08

Lecturers (Sessional):

W. E. Carswell	2,650.00
H. S. M. Carver (temporary—paid also \$350 as Special Lecturer and \$20 from University Press)	1,450.00

Special Lecturers (Sessional):

D. MacKenzie Waters, Architectural Design, at \$1,000 (on war service)	
H. S. M. Carver, Town Planning (paid also as Temporary Lecturer)	350.00
Peter Brieger (paid also in Fine Art)	300.00
W. S. Wilson, Architectural Economics (paid also as Secretary of Faculty)	250.00
A. S. Mathers	200.00
H. B. Dunington-Grubb, Landscape Architecture	100.00
J. A. Layng, Special Instructor, 6 mos. (temporary for duration of war)	700.00
F. Coates, Instructor in Modelling (Sessional)	950.00
Miss J. C. Laing, Librarian and Instructor, Architectural History and French	1,900.00
G. A. Arksey, Attendant in Drafting Rooms (Sessional)	800.00
Miss E. W. Dyer, Office Assistant, at \$865, of which \$340 charged to Engineering Drawing	525.00
	\$ 19,110.08

Engineering Drawing

Professors:

J. R. Cockburn, Descriptive Geometry	\$ 5,000.00
W. J. Smither, Structural Engineering	4,200.00
W. J. T. Wright (paid also \$300 as Special Lecturer in Technical English)	4,000.00

Assistant Professors:

W. B. Dunbar	2,800.00
A. Wardell	2,800.00

Lecturers (Sessional):

P. V. Jermyn	2,400.00
J. J. Spence	2,100.00

Instructors (Sessional):

G. R. Edwards	1,600.00
R. M. Clark	1,600.00
J. M. Carswell at \$1,500 (resigned 31 December)	642.87

Demonstrators (Sessional):

D. P. Scott	1,200.00
F. W. Philpot	1,000.00
G. W. Wurts	1,000.00
C. E. Lingren at \$600 (part time—resigned 28 February)	428.57
W. C. G. Fraser, 4 mos., (paid also in Mathematics)	200.00
J. S. Vigder, 4 mos., (paid also in Mathematics)	200.00
G. Brown, Attendant in Drafting Rooms, 9 mos.	1,100.00
Miss E. W. Dyer, Office Assistant (paid also in Architecture)	340.00
	\$ 32,611.44

Applied Physics

K. B. Jackson, Associate Professor.....	\$ 3,600.00	
V. L. Henderson, Lecturer (Sessional).....	2,150.00	
L. E. Jones, Instructor (Sessional—paid also \$300 in Special Research)	1,600.00	
Demonstrators (Sessional):		
W. A. Mohun (paid also \$350 in Special Research).....	1,200.00	
E. L. Dodington (paid also \$690 in Special Research).....	1,100.00	
D. H. Hamly (paid also in Botany, Mining Engineering and Special Research).....	550.00	
H. V. Steer, Mechanician (paid also in Civil Engineering: Surveying and Geodesy, and in Special Research).....		
Miss R. Cave, Office Assistant and Librarian (paid also in Civil Engineering: Surveying and Geodesy, and in Photographic Service)	525.00	
		\$ 11,225.00

Special Lectures

Special Lecturers (Sessional):		
R. E. Laidlaw, Engineering Law.....	\$ 300.00	
R. R. Grant, Accountancy and Business (paid also \$320 for Extension Work).....	300.00	
W. J. T. Wright, Technical English (paid also in Engineering Drawing).....	300.00	
Rev. G. A. McMullen, Public Speaking (paid also \$100 in Dentistry and \$280 for Extension Work).....	250.00	
		\$ 1,150.00

Secretary's Office

W. S. Wilson, Secretary (paid also in Architecture).....	\$ 3,500.00	
Miss E. Birkett, Assistant Secretary.....	1,800.00	
Mrs. Marion Salt, Assistant (resigned 30 June).....	1,150.00	
Stenographers:		
Miss D. Birkett (paid also in Chemical Engineering).....	200.00	
Miss E. Singleton (paid also in Metallurgical Engineering).....	400.00	
Miss L. Gray, 3 weeks, 4 days, at \$15 per week (paid also from Clerical Assistance).....	50.00	
A. Dykeman, Office Attendant, at \$800 (on war service from April)...	735.66	
G. Prince, Messenger, 5 weeks.....	64.34	
		\$ 7,900.00

86. Electrical Engineering

Light.....	\$ 230.91	\$285,791.26
Supplies (\$2,225.55):		
Aikenhead Hardware, hardware.....	31.00	
Canada Wire & Cable Co., wire.....	108.37

X. FACULTY OF DENTISTRY

102. Salaries

(a) Regular Staff

A. D. A. Mason, Dean (paid also as Professor).....	\$ 1,000.00
Professors:	
A. D. A. Mason, Operative Dentistry (paid also \$40 in School of Nursing).....	5,000.00
F. M. Lott, Prosthetic Dentistry at \$5,000 (on war service) T.I. & A.A. contribution.....	200.04
T. Cowling, Dental Technology and Metallurgy.....	2,000.00
G. C. Cameron, Dental Pathology and Bacteriology.....	3,000.00
C. A. Corrigan, Orthodontia.....	2,500.00
S. S. Crouch, Dental Anatomy; also Lecturer in Orthodontia....	850.00
E. W. Paul, Dental Surgery; also Librarian.....	840.00
I. H. Ante, Professor, Crown and Bridge Prosthesis (without salary, but paid for duration of war—paid also \$85 for Extra Mural Lectures and \$63 for Dental Technicians' Course)...	630.00
F. J. Conboy, Dental Praxis.....	400.00
Associate Professors:	
R. S. Woollatt (paid also \$25 for Extra Mural Lecture).....	4,000.00
H. A. Hoskin.....	4,000.00
R. G. Ellis, at \$3,900 (plus \$200 additional for duration of war; paid also \$215 for Extra Mural Lectures and \$67.50 for Dental Technicians' Course).....	4,100.00

R. J. Godfrey, at \$3,800 (plus \$200 additional for duration of war; paid also \$50 for Extra Mural Lectures and \$300 for Dental Technicians' Course).....	\$ 4,000.00
J. H. Johnson at \$3,600 (plus \$200 additional for duration of war; paid also \$40 for Extra Mural Lectures).....	3,800.00
S. M. Richardson, Radiography.....	3,300.00
L. F. Krueger (paid also \$35 for Extra Mural Lecture).....	1,500.00
C. H. M. Williams (half-time).....	1,208.00
F. A. Clarkson, Medicine (paid also \$25 for Extra Mural Lecture)	360.00
F. E. Risdon, Oral Surgery.....	180.00
L. A. Kilburn, Dental Praxis.....	150.00
E. S. Ryerson, Assistant Professor (also in Faculty of Medicine).....	360.00
Associates:	
Dentistry:	
G. H. Coram.....	1,400.00
W. T. Holmes.....	1,000.00
J. H. Duff, at \$630 (plus \$630 additional for duration of war; paid also \$35 for Extra Mural Lecture).....	1,260.00
J. M. Sheldon (paid also \$35 for Extra Mural Lecture).....	836.00
G. D. Beierl.....	750.00
G. V. Morton.....	670.00
R. R. Walker.....	670.00
R. L. Twible.....	648.00
F. L. Cole.....	640.00
F. Martin (paid also \$50 for Extra Mural Lectures).....	630.00
W. D. Hugill.....	560.00
W. D. Cavanagh.....	540.00
H. A. Ross.....	500.00
P. G. Anderson (paid also \$25 for Extra Mural Lecture).....	495.00
J. H. G. Harwood.....	315.00
D. M. Tanner, at \$50 (on war service).....
J. W. Graham, for duration of war (paid also in Faculty of Medicine).....	50.00
E. A. Grant (without salary).....
Miss W. C. Riddle, Histology, Bacteriology and Pathology.....	2,160.00
G. W. Spinks, Dental Anatomy (paid also \$27 for Dental Technicians' Course).....	700.00
G. Vernon Fisk, Orthodontia (paid also \$150 in Institute of Child Study).....	200.00
Preventive Dentistry:	
Miss D. F. J. Berry.....	1,500.00
J. Kruetzer (paid also \$25 for Extra Mural Lecture).....	980.00
M. A. Cox.....	600.00
C. C. Rous, Lecturer, Applied Chemistry and Metallurgy, at \$300 (on war service; also in office staff).....
E. J. Pratt, Special Lecturer in English (Sessional—paid also \$30 in O.C.E.).....	360.00
Instructors:	
E. M. Rigsby, Dental Technology.....	240.00
Rev. G. A. McMullen (paid also in Applied Science and University Extension).....	100.00
Principles of Accounting:	
W. E. Secord.....	150.00
Miss A. Lougheed (paid also \$180 as Instructor in Typewriting for Dental Nurses).....	100.00
Demonstrators (Sessional):	
C. G. Pearson, Dentistry.....	500.00
W. G. McIntosh, Periodontology.....	292.00
W. Butt, First Aid.....	40.00
Demonstrators in Dentistry for duration of war:	
A. M. Hord.....	675.00
J. G. Perkin (paid also \$36 for Dental Technicians' Course).....	578.00
T. N. Scott (paid also \$36 for Dental Technicians' Course).....	563.00
Technicians:	
W. V. Byrne, Dentistry.....	1,900.00
Miss I. A. Bumby, Bacteriology and Pathology.....	1,100.00
H. F. Whittaker, Histology (also in Faculty of Medicine).....	150.00

Laboratory Assistants:

H. Aylward, Infirmary (paid also \$48.34 from Dental Research Fund).....	\$ 1,250.00	
Mrs. Mary Gratton, 34 weeks.....	306.00	
		\$ 68,786.04

(b) Infirmary Staff (including Nurses)

Nurses:

Miss E. O. Courtney, Supervisor (10 mos.).....	\$ 1,300.00	
Miss L. E. Tutt (10 mos.).....	1,000.00	
Miss J. Miller (10 mos.).....	900.00	
Miss M. M. Brown (10 mos.).....	800.00	
Miss A. E. Phipps (10 mos.).....	800.00	
Mrs. E. G. Mason (10 mos.).....	800.00	
Miss A. H. Rose (9 mos.).....	840.00	
Miss F. G. Whitehead (8 mos.).....	800.00	
Miss V. H. Broadrib (8 mos.).....	560.00	
Miss A. Loughheed, Instructor in Typewriting for Dental Nurses (also in Regular Staff).....	180.00	
Mrs. L. Barraclough, Laundress, 40 weeks, 5 days.....	688.15	
		\$ 8,668.15

(c) Office Staff

C. C. Rous, Secretary, at \$3,100 (on war service; also in Regular Staff) Pension Contribution.....	\$ 170.00	
Miss F. A. Cook, Secretary to the Dean.....	1,800.00	
Miss F. Ward, Assistant to the Secretary, at \$1,200 (plus \$200 additional for duration of war).....	1,400.00	
Miss H. Reid, Assistant Librarian.....	1,100.00	
Miss C. Cochrane, Secretarial Assistant for duration of war.....	1,000.00	
Clerk in Secretary's Office at \$1,000:		
Miss M. D. Hill, resigned 31 August.....	166.66	
Miss F. I. Fulton (10 mos.).....	833.34	
Miss L. Park, Cashier.....	1,200.00	
A. D. Atkins, Assistant in Library, 20 weeks.....	140.00	
		\$ 7,810.00
		\$ 85,264.19

Superintendent's Stores and Sundry Labour Account

Ledger Balance, 30 June, 1940	\$ 11,077.55
Purchases made during 1940-41:	
Advance Glass & Mirror Co., glass	\$ 171.65
Aikenhead Hardware Ltd., hardware	2,765.23
Aluminum Co. of Canada, sheets, etc.	92.07
Alwyn Lighting Products, electricians supplies	1,933.37
Anaconda American Brass, rods, etc.	47.82
Armstrong Cork & Insulation Co., cork board, etc.	193.14
Armstrong Door Co., sashes	42.05
Asbestos Building Supply Co., roofing	57.15
Associated Chemical Co., brushes, chemicals	376.27
Baines & David, steel plates	277.71
Beardmore & Co., leather belting, etc.	41.41
Beatty Bros. Ltd., duplex pressure system	73.00
Beldam's Asbestos Packing Ltd., graphite, paint, etc.	73.74
Bennett & Wright, plumbers supplies	240.55
Berry Bros., paints, varnishes	362.55
Black & Decker Mfg. Co., electric tools	309.22
Boake Manufacturing Co., lumber	347.25
Boeckh & Co., brushes, paint	130.21
Boiler Furnace & Stove Parts, incinerator, etc.	44.75
Brooks Marble & Tile Co., tile repairs	1,119.49
Builders Supplies, Ltd., stone, gravel, lime	171.40
Building Partners, cylinders	25.81
Robt. Bury & Co., lumber	1,393.41
Bernard Cairns, stamps, etc.	42.38
Canada Building Materials, cement, plaster, etc.	187.02
Canada Hardware Ltd., locks, keys	52.52
Canada Metal Co., solder, lead, etc.	426.08
Canada Wire & Cable Co., cables, wire	372.89
Canadian Asbestos Ltd., asbestos, packing, etc.	222.40
Canadian Blower & Forge Co., fans	272.85
Canadian Charts & Supplies, charts	26.47
Canadian Chromalox Co., heaters	29.59
Canadian Durex Abrasives Ltd., sand paper, etc.	43.70
Canadian Fairbanks-Morse Co., tires, scales	160.54
Canadian General Electric Co., electricians supplies	3,149.65
Canadian Germicide Co., soap dispensers, towels	289.58
Canadian Ice Machine Co., cooler, repairs, etc.	760.84
Canadian Industrial Alcohol, alcohol	77.59
Canadian Industries Ltd., chemicals, paints, etc.	1,534.37
Canadian Ingersoll Rand Co., valves	107.50
Canadian Johns-Manville Co., asbestos, cement, etc.	285.32
Canadian John Wood Co., tank	40.68
Canadian Mill Supply Co., sheets	27.60
Canadian National Carbon Co., brushes, carbon	117.31
Canadian National Exhibition, rental of lights, etc.	31.67
Canadian National Institute for the Blind, brushes, brooms, etc.	236.55
Canadian Powers Regulator Co., repairs	38.28
Canadian SKF Co., bearings	96.23
Canadian Sirocco Co., electrical supplies	934.57

Canadian Tire Corporation, batteries, tubes, etc.	\$ 29.32
Canadian Westinghouse Co., refrigerators, irons, radios, etc.	1,446.58
Casselman Co., cheesecloth, cotton, etc.	57.22
Central Scientific Co., glassware, etc.	143.94
Chadwick Electric Co., electricians supplies.	43.79
Colgate-Palmolive-Peet Co., soap.	546.48
Colling Tire Shop, casings.	278.66
Commercial Lithograph Co., lithographing.	36.50
Community Electrical Supply, electricians supplies.	633.86
Compressed Air Equipment, rental of compressor.	25.00
Consolidated Plate Glass Co., glass.	605.76
Continental Can Co., cans, pails.	119.24
Cooksville Co., tiles.	121.35
Cooper Bros. & Wilson, instrument panel.	30.24
Corbett-Cowley Ltd., uniforms.	380.20
Corning Glass Works, illuminating shades.	504.85
Crain Printers Ltd., stationery.	210.62
Crane Limited, plumbers supplies.	2,239.76
Crown Diamond Paint Co., paint, white lead.	279.55
W. H. Cunningham & Hill, plumbers supplies.	406.91
Currie Products Limited, roofing.	266.73
Darnell Corporation of Canada, casters.	70.14
Dean Bros., castings, etc.	31.05
Diamond Cleanser & Soaps Limited, cleansers, soaps.	906.60
W. E. Dillon & Co., steel grilles.	59.52
Henry Disston & Sons, tools.	147.35
Dominion Bridge Co., angles, plates.	270.07
Dominion Carbon Brush Co., brushes.	133.22
Dominion Caulking Co., caulking.	30.00
Dominion Linseed Oil Co., oil.	1,010.47
Dominion Oxygen Co.	309.77
Dominion Steeplejack Co., rental of boiler.	37.00
Downing & Co., fuses.	766.26
Drummond, McColl & Co., steel.	105.58
C. A. Dunham & Co., plumbers supplies.	410.09
T. Eaton Co., blankets, towels, etc.	405.86
Ellis and Howard, batteries, bulbs.	181.84
Empire Brass Mfg. Co., plumbers supplies.	444.18
Engineering Equipment Co., enamel.	198.00
Ennis Wonder Polish Co., polish.	41.80
Evans & Co., chamois.	94.40
Exide Batteries of Canada, batteries.	48.69
Fairbank Lumber & Coal Co., lumber.	27.93
E. B. Fielding & Co., turpentine.	707.10
Thos. Firth & John Brown Ltd., stainless steel.	968.38
Fitzgerald-Mcavoy Wire Goods, baskets, screens.	139.73
E. T. Flanagan, cellophane.	38.00
Garage Supply Co., batteries.	84.96
General Dry Batteries of Canada, batteries.	227.78
General Motors Sales Corporation, service.	75.57
General Steel Wares Limited, baskets, cans, pails.	307.91
Good Specialties Limited, hardware.	165.52
Gooderham and Worts Limited, alcohol.	11,902.29
Gordon Sponge & Chamois Co., sponges.	168.14
B. Greening Wire Co., screens, etc.	139.02
Grinnell Co., plumbers supplies.	2,353.72
A. Guinness & Co., paper napkins, tray covers.	54.33
Gutta Percha and Rubber Co., couplings, hose, treads, etc.	551.47
Hamilton Carhartt Mfg., overalls.	62.18
Hamilton Gear & Machine Co., worm reducer.	49.68
Joe Hampson, concrete, sand.	63.75
Harpham Bros., casings.	159.74
W. Harris & Co., glue.	58.32
Geo. H. Hees & Son, cord.	65.81
James W. Hewitt & Sons, building pit.	150.00
The Hoover Co., cleaner.	83.72

THE LEGISLATIVE ASSEMBLY OF ONTARIO
SESSIONAL PAPER No. 13, 1942

ONTARIO

TORONTO
Printed and Published by T. E. Bowman, Printer to the King's Most Excellent Majesty
1943

SIR:

I have the honour to submit for your approval the Seventy-second Annual Report made in conformity with and under the provisions of the Act respecting the Registration of Births, Marriages and Deaths in the Province of Ontario, for the year ending December 31st, 1941.

I have the honour to be, Sir,

Your obedient servant,

F. V. JOHNS,
Deputy Registrar-General.

TO THE HON. H. C. NIXON,
Registrar-General of Ontario.

TO HIS HONOUR THE LIEUTENANT-GOVERNOR OF THE PROVINCE OF ONTARIO.

MAY IT PLEASE YOUR HONOUR:

I herewith beg to present for your consideration the Seventy-second Annual Report of the Registrar-General, relating to the Registration of Births, Marriages and Deaths in the Province of Ontario during the year 1941.

Respectfully submitted,

H. C. NIXON,
Registrar-General of Ontario.

CONTENTS

CANCER

The following table shows the difference in rates for the years 1921, 1931 and 1941:

	1921		1931	
	No. of Deaths	Rate	No. of Deaths	Rate
Total	2,585	88.0	3,726	108.5
Buccal cavity	98	3.3	183	5.3
Stomach and liver	860	29.3	1,889	55.0
Peritoneum and intestines	391	13.0		
Female genital organs	236	8.0	367	10.7
Breast	235	8.0	389	11.3
Skin	66	2.2	104	3.0
Other organs	699	24.1	794	23.1

1941

	No. of Deaths	Rate
Total	4,931	130.2
Buccal cavity and pharynx	166	4.3
Digestive organs and peritoneum	2,430	64.1
Respiratory organs	276	7.2
Uterus	362	9.5
Other female organs	174	4.5
Breast	542	14.3
Male genital organs	276	7.2
Urinary organs	247	6.5
Skin	93	2.4
Brain	81	2.1
Other and unspecified organs	284	7.4

DEATH RATES BY AGE GROUPS PER 100,000 POPULATION
FROM CANCER

	1936-1940		1941	
	No. of Deaths	Rate	No. of Deaths	Rate
Under 30.....	420	4.2	86	4.5
30-39.....	773	28.5	160	28.8
40-49.....	2,211	93.6	478	98.9
50-59.....	4,478	261.8	945	338.7
60-69.....	6,034	535.3	1,312	493.2
70-79.....	6,323	1,042.6	1,319	934.7
80 and over.....	2,635	1,581.5	631	1,338.5

INFANT MORTALITY

DEATHS OF CHILDREN UNDER ONE YEAR—STATED CAUSES OF DEATH

(A) TOTAL DEATHS

	1932	1933	1934	1935	1936	1937	1938	1939	1940	1941	Mean
Total.....	4,133	3,804	3,523	3,515	3,416	3,382	3,245	2,979	2,959	3,294	3,425.0

7. Diseases of early infancy.....	30.6	28.5	26.9	28.6	26.2	26.2	24.7	23.4	22.3	21.4	25.8
8. All others.....	5.6	5.5	5.3	5.5	5.6	4.8	4.0	4.3	4.2	4.2	4.9

Of these infant deaths:

- 845 or 25.65 per cent. lived less than one day.
- 731 or 22.19 per cent. lived less than one week.
- 392 or 11.89 per cent. lived less than one month.
- 491 or 14.90 per cent. lived less than three months.
- 440 or 13.35 per cent. lived less than six months.
- 241 or 7.31 per cent. lived less than nine months.
- 154 or 4.67 per cent. lived less than one year.

SUICIDES

In 1941 there were 319 suicides. The rate per 100,000 of population was 8.4, just 0.6 less than for 1940.

Of these, 217 or 68.02 were males and 102 or 31.97 females.

	Total		Under 20		20-39		40-59		60 and over	
	No.	%	No.	%	No.	%	No.	%	No.	%
Males	217	100	5	23.04	58	26.72	98	45.16	56	25.80
Females . . .	102	100	1	0.98	39	38.32	41	40.19	21	20.58
Total	319	100	6	18.80	97	30.40	139	43.57	77	24.13

Method of suicide over a ten-year period is shown in the following table:

	Total	Rate	Poison	Gas	Hanging	Drowning	Shooting	Cutting	Jumping	Crushing	Others
1932	423	12.2	92	53	74	66	92	29	13	4

TABLE 38—CAUSES OF DEATH FOR TOWNS AND VILLAGES

CAUSES OF DEATH	Total	Barrie	Brampton	Cobourg	Collingwood	Dundas	Eastview	Fort Erie	Fort Francis	Hawkesbury	Ingersoll	Kenora
81A. Simple meningitis.....	2				1							
81B. Acute cerebrospinal meningitis.....	2							1				
82. Diseases of the medulla and spinal cord.....	5	1										
83. Intracranial lesions of vascular origin.....	301	14	9	14	16	12	2	11	6	6	17	8
83A. Cerebral haemorrhage or effusion.....	91	2	2	3	9	9	1	1	2	1	4	2
83B. Cerebral embolism and thrombosis.....	22	2		1	1	2			2			
83D. Hemiplegia and other paralysis of unspecified origin.....	16	2								1		
83E. With mention of arteriosclerosis.....	172	8	7	10	6	1	1	10	2	4	13	6
84. Mental disorders and deficiency (general paralysis of the insane excepted).....	14											
84A. Schizophrenia (dementia praecox).....	5											
84B. Others under this title.....	9											
85. Epilepsy.....	5			1	1	1						
87. Other diseases of the nervous system.....	10	1		1					1			
87C. Paralysis agitans.....	4	1										
87D. Disseminated sclerosis.....	6			1					1			
88. Diseases of organs of vision.....	1				1							
89. Diseases of the ear and of the mastoid process.....	4											2
89A. Otitis and other diseases of the ear.....	1											
89B. Diseases of the mastoid process.....	3											2
CLASS VII.—DISEASES OF THE CIRCULATORY SYSTEM												
Total.....	825	45	31	44	38	21	13	21	6	8	26	24
90-95. Diseases of the heart.....	734	38	30	41	34	18	12	16	5	7	25	24
91. Acute endocarditis (non-rheumatic).....	6	1										
91A. Bacterial endocarditis (acute, subacute or unspecified).....	5	1										
91C. Endocarditis (not specified under 45 years).....	1											
92. Chronic affections of the valves and endocardium.....	78	2	7	3	2	2	6	3		3	2	3
92A. Specified valvular diseases (rheumatic).....	28	1	1	2				2				1
92B. Other specified valvular diseases (non-rheumatic).....	39		6		2	2	6	1		3	1	2
92C. Unspecified valvular lesions and endocarditis.....	11	1		1							1	
93. Diseases of the myocardium.....	419	21	14	29	24	8	5	10		3	18	13
93A. Acute myocarditis.....	7											
93B. Myocarditis (not specified under 45 years).....	2	1										
93C. Chronic myocarditis and myocardial degeneration (rheumatic).....	13	2						1			1	
93D. Chronic myocarditis (non-rheumatic).....	337	16	12	28	23	6	1	7		2	14	6
93E. Other myocarditis (not specified).....	60	2	2	1	1	2	4	2		1	3	7
94. Diseases of the coronary arteries and angina pectoris.....	215	13	9	9	7	8	1	2	5	1	5	8
94A. Diseases of the coronary arteries.....	209	13	9	9	7	8	1	1	5		5	8
94B. Angina pectoris.....	6							1		1		
95. Other diseases of the heart.....	16	1			1			1				
95A. Functional diseases of the heart (no organic lesion).....	2				1							
95B. Other diseases of the heart (rheumatic).....	3							1				
95C. Other diseases of the heart (non-rheumatic).....	11	1										
96. Aneurysm (heart and aorta excepted).....	1											
97. Arteriosclerosis (coronary or renal sclerosis or cerebral haemorrhage excepted).....	77	6	1	3	2	2	1	3	1	1	1	
98. Gangrene.....	5					1		1				
99. Other diseases of the arteries.....	4				1			1				
100. Diseases of the veins.....	1				1							
102. High blood pressure (idiopathic).....	3	1										
CLASS VIII.—DISEASES OF THE RESPIRATORY SYSTEM												
Total.....	152	11	1	8	4	3	1	3	1	7	2	2
104. Diseases of the nasal fossae and accessory sinuses.....	1											
105. Diseases of the larynx.....	1										1	
106. Bronchitis.....	6	1										
106A. Acute.....	3	1										
106B. Chronic.....	2											
106C. Unspecified.....	1											
107. Broncho pneumonia.....	78	6	1					1	1	7		
108. Lobar pneumonia.....	38	2		6	3	2		1			1

CAUSES OF DEATH	Total	Barrie	Brampton	Cobourg	Collingwood	Dundas	Eastview	Fort Erie	Fort Francis	Hawkesbury	Ingersoll	Kenora
109. Pneumonia (unspecified).....	14	1					1	1				
110. Pleurisy.....	2											1
110A. Empyema.....	1											1
110B. Others under this title.....	1											
111. Haemorrhagic infarction, congestion, oedema and thrombosis of the lungs.....	9			2	1							1
111A. Haemorrhagic infarction and thrombosis of the lungs.....	2											1
111B. Others under this title.....	7			2	1							
112. Asthma.....	3	1				1						
CLASS IX.—DISEASES OF THE DIGESTIVE SYSTEM												
Total.....	136	8	1	5	6	2	5	4	12	2	6	
115. Diseases of the buccal cavity and annexa, and of the pharynx and tonsils.....	5				1							2
115B. Septic sore throat.....	2											1
115C. Diseases of the pharynx and tonsils.....	3				1							1
117. Ulcer of the stomach or duodenum.....	20	2		2		1			1	1		1
117A. Stomach.....	16	1		2	1	1				1		1
117B. Duodenum.....	4	1							1			
118. Other diseases of the stomach.....	2			1								
119. Diarrhoea and enteritis (under 2 years of age).....	23	1						2		4		
119A. Diarrhoea and enteritis.....	23	1						2		4		
120. Diarrhoea and enteritis (2 years of age and over).....	13	2			1							
120A. Diarrhoea and enteritis.....	10	2			1					1		
120B. Ulceration of the intestines.....	3											
121. Appendicitis.....	20			1			2			2		
122. Hernia, intestinal obstruction.....	27	2		1	1			1	1	2	1	1
122A. Hernia.....	10							1	1	2	1	1
122B. Intestinal obstruction.....	17			1								
124. Cirrhosis of the liver.....	9							1		1		1
124B. Without mention of alcoholism.....	9							1		1		1
125. Other diseases of the liver.....	4				2							
125A. Acute yellow atrophy.....	2				2							
125B. Others under this title.....	2											1
126. Biliary calculi.....	6											
127. Other diseases of the gall-bladder and bile ducts.....	5	1				1					1	
129. Peritonitis without stated cause.....	2		1									
CLASS X.—DISEASES OF THE URINARY AND GENITAL SYSTEMS												
Total.....	164	10	4	2	10	2	2	4	2	11	3	2
130. Acute nephritis.....	3							1				
131. Chronic nephritis.....	117	8	2	1	10	2	2	3	2	8	3	1
132. Nephritis unspecified (over 10 years of age).....	12									1		
133. Other diseases of the kidneys and ureters.....	7		1									1
134. Calculi of the urinary passages.....	3											
135. Diseases of the urinary bladder.....	3	1										
137. Diseases of the prostate.....	13	1										
139. Diseases of the female genital organs (non-veneral).....	6		1	1						2		
139A. Ovaries, Fallopian tubes and parametria.....	4			1						2		
139B. Uterus.....	2		1									
CLASS XI.—DISEASES OF PREGNANCY, CHILD-BIRTH AND THE PUERPERAL STATE												
Total.....	20				2		1	1		2	2	1
140. Abortion with mention of infection.....	2						1					
140A. Spontaneous, therapeutic or unspecified.....	1						1					
140C. Non-therapeutic.....	1											
141. Abortion without mention of infection.....	1											
141A. Spontaneous, therapeutic or unspecified.....	1											1
142. Ectopic gestation.....	1											1
142B. Without mention of infection.....	1											1
144. Toxaemias of pregnancy—death prior to delivery.....	2				1						1	

TABLE 38—CAUSES OF DEATH FOR TOWNS AND VILLAGES

CAUSES OF DEATH	Total	Barrie	Brampton	Cobourg	Collingwood	Dundas	Eastview	Fort Erie	Fort Francis	Hawkesbury	Ingersoll	Kenora
145. Other diseases and accidents of pregnancy—death prior to delivery	2											
146. Haemorrhage of childbirth and the puerperium	2				1							
146A. Placenta praevia	1				1							
146C. Others under this title	1											
147. Infection during childbirth and the puerperium	4									1		
148. Puerperal toxæmias—following delivery	3									1	1	
148A. Puerperal eclampsia	3									1	1	
149. Other accidents of childbirth	2							1				
149B. Other conditions of childbirth	2							1				
150. Other and unspecified conditions of childbirth and the puerperal state	1											
150C. Others under this title	1											
CLASS XII.—DISEASES OF THE SKIN AND CELLULAR TISSUE												
Total	4	1										
152. Phlegmon and acute abscesses	2	1										
153. Other diseases of the skin and cellular tissue	2											
CLASS XIII.—DISEASES OF THE BONES AND ORGANS OF MOVEMENT												
Total	3											1
154. Osteomyelitis and periostitis	1											1
155. Other diseases of the bones (tuberculosis excepted)	2											
CLASS XIV.—CONGENITAL MALFORMATIONS												
Total	54	2	1	1	1		1	3	1	6		4
157. Congenital malformations	54	2	1	1	1		1	3	1	6		4
157A. Congenital hydrocephalus	10	1							1	2		
157B. Spina bifida and meningocele	10	1								1		2
157C. Anencephalus	1											
157D. Congenital malformations of the heart	21		1	1	1			3		1		2
157E. Others under this title	12						1			2		
CLASS XV.—DISEASES PECULIAR TO THE FIRST YEAR OF LIFE												
Total	127	12	4	6	6		1	5	3	15	2	5
158. Congenital debility	12						1			2		1
159. Premature birth	77	9	4	5	2			3	1	9	1	2
160. Injury at birth	29	2		1	4				1	3	1	2
160A. Intracranial or spinal haemorrhage	14	1			3				1		1	
160B. Other intracranial or spinal injuries	1											1
160C. Others under this title	14	1		1	1					3		1
161. Other diseases peculiar to the first year of life	9	1						2	1	1		
161A. Asphyxia (unspecified), atelectasis	3	1						1	1			
161B. Infection of the umbilicus, pemphigus and other infections	1									1		
161C. Other specified diseases peculiar to the first year of life	5							1				
CLASS XVI.—SENILITY												
Total	30	3			2	5	1	1	1			1
162. Senility	30	3			2	5	1	1	1			1
162A. With dementia	2											
162B. Without dementia	28	3			2	5	1	1	1			1

TABLE 39—CAUSES OF DEATH FOR CITIES, TOWNS AND VILLAGES

CAUSES OF DEATH	Total	Belleville	Brantford	Brockville	Chatham	Cornwall	Forest Hill	Fort William	Galt	Guelph	Hamilton	Kingston
126. Biliary calculi.....	75	1	4	2	4	1	1	8	4
127. Other diseases of the gall-bladder and bile ducts.....	54	5	1	1	5	4
128. Diseases of the pancreas.....	17	1
129. Peritonitis without stated cause.....	23	1	1	2
CLASS X.—DISEASES OF THE URINARY AND GENITAL SYSTEMS												
Total	1,444	36	35	15	22	36	2	18	10	22	117	51
130. Acute nephritis.....	25	1	1	3	1
131. Chronic nephritis.....	946	23	27	12	17	28	2	13	6	18	58	38
132. Nephritis unspecified (over 10 years of age).....	59	3	2	2	2	4	2
133. Other diseases of the kidneys and ureters.....	69	2	2	11	1
134. Calculi of the urinary passages.....	40	1	1	4
135. Diseases of the urinary bladder.....	15	1	1
136. Diseases of the urethra, urinary abscess, etc.....	12	1	1
136A. Stricture of the urethra.....	9	1	1	1
136B. Others under this title.....	3
137. Diseases of the prostate.....	239	6	5	1	1	7	2	2	2	30	6
138. Diseases of the male genital organs (non-venereal).....	1
139. Diseases of the female genital organs (non-venereal).....	38	1	1	1	1	6	2
139A. Ovaries, Fallopian tubes and parametria.....	15	1	1	2	2
139B. Uterus.....	21	1	1	4
139C. Others under this title.....	2
CLASS XI.—DISEASES OF PREGNANCY, CHILDBIRTH AND THE PUERPERAL STATE												
Total	141	4	1	1	3	4	2	1	2	12	4
140. Abortion with mention of infection.....	26	1	1	2
140A. Spontaneous, therapeutic or unspecified.....	8	1
140B. Self-induced.....	15	1	1
140C. Non-therapeutic.....	3
141. Abortion without mention of infection.....	4
141A. Spontaneous, therapeutic or unspecified.....	2
141B. Self-induced.....	1
141C. Non-therapeutic.....	1
142. Ectopic gestation.....	5	2	1
142B. Without mention of infection.....	5	2
143. Haemorrhage of pregnancy—death prior to delivery.....	2
143C. Others under this title.....	2
144. Toxaemias of pregnancy—death prior to delivery.....	11	1	1	2	2	1
145. Other diseases and accidents of pregnancy—death prior to delivery.....	2	1
146. Haemorrhage of childbirth and the puerperium.....	16	1	1	1
146A. Placenta praevia.....	4
146B. Premature separation of placenta.....	1
146C. Others under this title.....	11	1	1	1
147. Infection during childbirth and the puerperium.....	34	1	2	1	1
148. Puerperal toxaemias—following delivery.....	23	2	1	1	1
148A. Puerperal eclampsia.....	15	1	1	1	1
148B. Puerperal albuminuria and nephritis.....	4
148C. Acute yellow atrophy of liver.....	3	1
148D. Others under this title.....	1
149. Other accidents of childbirth.....	14	1	1	3
149A. Laceration, rupture or other trauma of pelvic organs and tissues.....	6
149B. Other conditions of childbirth.....	8	1	1	3
150. Other unspecified conditions of childbirth and the puerperal state.....	4	1
150C. Others under this title.....	4
CLASS XII.—DISEASES OF THE SKIN AND CELLULAR TISSUES												
Total	20	1	1
151. Carbuncle and furuncle.....	6	1
152. Phlegmon and acute abscesses.....	5
153. Other diseases of the skin and cellular tissue.....	9	1

In Memoriam

JOHN WILLIAM SCOTT McCULLOUGH, M.D., C.M., D.P.H.

1868 - 1941

THE CONTRIBUTION of John William Scott McCullough to the development of Public Health in Ontario was one of great importance and magnitude. He brought to his office as administrator vision and sound judgment; he utilized to the full the opportunity for extension of health work in accordance with enlightened public opinion during the first quarter of the present century. His influence was felt in the other Provinces of Canada and was a factor in the organization of the Federal Department of Health at Ottawa following the Great War. Dr. McCullough was honoured by election

to executive positions in the American Public Health Association, the Conference of State and Provincial Health Officers and numerous other associations and public health groups in both Canada and the United States.

Dr. McCullough was born January 25th, 1868, in Peterborough County. He was educated at Owen Sound Collegiate, Trinity Medical School, and the University of Toronto. Following graduation he spent some time in post-graduate study in New York and London.

Dr. McCullough's connection with public health endeavour dates from his appointment as Medical Health Officer for the Town of Alliston, where he began practice in 1890. He was appointed member of the Provincial Board of Health in 1906. He became secretary in 1910; this position gave him executive powers as Chief Health Officer and Deputy Registrar General. Dr. McCullough retained his connection with Provincial Health Administration until his retirement in 1935.

During his tenure of office Provincial Health activities developed from a small generalized service to a department of government functioning through a series of Divisions of specialized services. His work in the consolidation of the Public Health Act in 1912, was the first step in a definite development. A second achievement was attained in 1920, when health administration was raised to cabinet rank under the Minister of Labour and Health. The Public Health Act of 1925 created the portfolio of Health, whereby the Provincial Board was superseded by the present organization of health as an integral Department of Government in Ontario.

The system of District Officers of Health was instituted by Dr. McCullough in 1912. He succeeded in securing appropriations for the free distribution of biological products in 1916, thus placing Ontario first on the list of Canadian Provinces to adopt this policy. In the same year he instituted special educational efforts in an attempt to reduce maternal and infant mortality. He organized the Department's library in 1920.

Dr. McCullough was one of the Ontario representatives on the International Joint Commission for investigation of the boundary waters between Canada and the United States, and continued his interest in the work of Sanitary Engineering throughout his career. He was always deeply concerned with the problems of tuberculosis, to combat which he initiated Provincial Traveling Chest Clinics. He was foremost among those leaders who strove to control venereal disease. Under him the laboratory work was extended in the range of examinations and also by the establishment of branch laboratories. These various services, together with those of Industrial Hygiene and Public Health Education, were given definite status as Divisions, under his plan of development.

His insistence on strict adherence to standard procedures and techniques resulted in recognition of the Departmental services by international authorities. Adequate training of personnel was, in Dr. McCullough's mind, an essential for good work. Under him, arrangements were made for a short course in Public Health Nursing during the summer of 1920; this was the forerunner of the Course established later as a permanent training project by the University of Toronto. The decision to establish the School of Hygiene, in the University of Toronto, was influenced by Dr. McCullough's interest in the training of professional health workers and by the fact that the Ontario Department was approved by expert opinion, having been selected as one of the agencies to be visited and studied by holders of their scholarships from foreign countries by the International Health Board of the Rockefeller Foundation.

Dr. McCullough served as secretary to the Royal Commission on Cancer, following the recommendations of which Commission, diagnostic and treatment centres were established throughout Ontario, radium was purchased and the operation of an emanation plant undertaken by the Department.

Dr. McCullough was a member of the Committee responsible for the organization of the Canadian Public Health Association. He was the founder of the Ontario Health Officers' Association.

Dr. McCullough acted as Lieutenant Colonel in the R.C.A.M.C., 1914-1918, and retained his interest in army medical service until his death.

To Dr. McCullough the criterion of success was the reduction of rates of death and sickness due to preventable causes, together with improved environmental sanitation and increased personal health status and practices among the total population of the Province. For these three ends he worked from day to day throughout the years of his administration. His work is a monument to his sincere effort to meet the challenge contained in the motto to the Department, so significant to him — "*Ne pereat populus, scientia absente.*"

TO THE HONOURABLE ALBERT MATTHEWS, LL.D.,
Lieutenant-Governor of the Province of Ontario.

MAY IT PLEASE YOUR HONOUR:

I herewith beg to present for your consideration the Seventeenth Annual Report of the Department of Health, for the year 1941.

Respectfully submitted,

HAROLD J. KIRBY,
Minister of Health.

TO THE HONOURABLE HAROLD J. KIRBY, K.C.,

Minister of Health.

SIR,—I have the honour to submit for your approval the Seventeenth Annual Report of the Department of Health, made in conformity with and under the provisions of The Public Health Act, for the year 1941.

I have the honour to be, Sir,

Your obedient servant,

B. T. MCGHIE,

Deputy Minister of Health

ANNUAL REPORT

of the

Department of Health

For the Calendar Year Ending December 31st, 1941

PUBLIC HEALTH ADMINISTRATION

J. T. PHAIR, M.B., D.P.H., *Chief Medical Officer of Health.*

The reason for increased popular concern in matters of health during times of national stress is probably less inexplicable than might appear on the surface. While on occasion causing embarrassment to the Health Department, which is already labouring under the difficulties resulting from depletion of staff, such interest when prompted by a sincere desire on the part of the concerned individual to make amends for his previous inaptitude or apathy, is in the main welcomed by the health worker. The successful administrator appreciates fully the frailties of the average individual who in times of normalcy refused either to be coerced or cajoled into the more general acceptance of sound preventive procedures.

However, in these troubled times, there is no place for the still too common individual who construes the professional health worker whose programme has been starved for lack of funds and stultified by lack of interest, to be some fortuous combination of alchemist and medicine man, who confronted by an emergency can in some mysterious manner stop overnight the spread of an outbreak of communicable disease, or change the attitude or behaviour of masses of the public. If people view the preventive urgings of the health staff with complacency when the cyclic incidence of communicable disease is low, they gain nothing by berating their own stupidity when the wheel of incidence throws it to the top. If people will insist on radically changing their environment and their established mode of living and crowd together in inadequate, ill-ventilated and unsanitary premises, they must expect to pay the price of their indiscretions. Not only do these errors of omission apply to the control of communicable forms of illness but we find evidence of the same unwillingness to accept advice in matters of physical fitness.

Today we find that there are evident shortcomings in our preventive programme. 16% of all male adults in Ontario, between 21-24, inclusive, called up for military service, were placed by examining physicians in Category E. 98% of these had been exposed since birth to the health services on behalf of which much that is laudatory has been said. What is the explanation of this anomaly? Either these services are not province-wide in their existence, or they are not as good as we have implied. Casual observation would lead one to the inference that both these possibilities are probably in part true. There is no health programme, as such, in the majority of rural or small urban communities; the local health set-up is formed to function only in the face of disaster; the Health Officer is paid on this basis. If he presumes to do anything preventive in character, he does it without remuneration and apparently on his own authority. The local Board of Health not only offers nothing in the way of leadership, but is all too often a deterring factor. If the smaller community is to continue to exercise the privilege of local public health autonomy, it is necessary that the local Board take full advantage of its authority as a corporation to implement a constructive community programme or it will undoubtedly have to give way to a larger unit of administration.

There is a growing realization that some such modification of the present set-up is inevitable. Anticipating this demand the Department has attempted to provide facilities for training both medical and other personnel. Substantial

aid in this project has been again received from the School of Hygiene, University of Toronto, and the International Health Board of the Rockefeller Foundation. Fellowships were for the first time made available to the part-time engineers for special training in the field of sanitation. As a war time compromise the Department has been compelled to interpret broadly its regulatory requirements in the matter of qualifications of Health Officers. The course of instruction for newly appointed Medical Officers of Health in municipalities of 4,000 population or over is now largely carried on by correspondence, while the shorter course for Health Officers in municipalities of less than 4,000 population has been temporarily discontinued and suitable texts on appropriate aspects of community health have been made gratuitously available. It is hoped that this compromise will be appreciated by those affected.

While it has not been possible to extend the plans for County Health Units beyond the original unit in Eastern Ontario, it is of interest to note the general acceptance of this rather radical departure in local public health administration by the people and the local authorities.

Medical Officers continue to offer their services to the Army, the Navy and the Air Force. During the twelve months just ended the following names have been added to the long list of those serving in the Active Service Forces:—

Dr. W. T. McFadzean, Brantford,	Brantford Tp.
D. H. Milne, Cargill,	Brant Tp., Greenock, Tp.
D. R. Finlayson, Ripley,	Huron Tp., Ripley V.
W. H. Carson, Southampton,	Southampton T.
E. J. Cloutier, Ansonville,	Calvert Tp.
J. H. F. Adams, Straffordville,	Bayham Tp., Vienna V.
L. C. Hillis, Kingsville,	S. Gosfield Tp., Kingsville T.
P. M. MacDonnell, Kingston,	Pittsburgh Tp., Portsmouth V.
L. Sturgeon, Meaford,	Meaford T.
T. P. Kearns, Bothwell,	Bothwell T., Zone Tp.
J. A. McLean, Merlin,	Raleigh Tp.
A. M. Bell, Alvinston,	Alvinston V.
H. J. Irvine, Brigden,	Moore Tp.
J. A. McDonald, Hastings,	Hastings V.
A. E. MacKenzie, Stamford Centre,	Stamford Tp.
H. H. Argue, Mount Forest,	Arthur Tp., Mount Forest T.
C. R. Boulding, Aurora,	Aurora T.
H. B. Kenner, Stratford,	Stratford C.
E. Larocque, Plantagenet,	N. Plantagenet Tp.
J. M. Nettleton, Penetanguishene,	Penetanguishene T.
G. H. Emery, Everett,	Tossorontio Tp.
W. A. Milligan, Cornwall,	Stormont, Dundas & Glengarry Unit.
W. M. Wallace, Massey,	Hallam, Salter, etc., Tps.
	Massey and Webbwood Towns.

The following have retired from office:—

Dr. C. D. Shortt, Hornepayne,	Wicksteed Tp.
J. Ferguson, Kincardine,	Kincardine T., Kincardine Tp.
H. E. Peart, Elmwood,	Brant Tp., Bentinck Tp.
E. J. Nelson, Acton,	Acton V.
J. R. Z. Morden, Florence,	Euphemia Tp.
A. L. Rice, Appin,	Ekfrid Tp.
R. W. Tisdale, Delhi,	Middleton Tp.
D. J. Sinclair, Woodstock,	E. Oxford Tp.

W. W. Wallingford, Earlington,	Armstrong Tp.
Wm. Geiger, Waterloo,	Waterloo T.
W. Glaister, Wellesley,	Wellesley Tp.
Q. R. Schindler, Ignace,	Ignace Tp.
H. A. Turner, Millbrook,	Millbrook V.
A. J. Sparling, Pembroke,	Pembroke Tp.

In conclusion, it is with extreme regret and in many instances a sense of personal loss that I am compelled to report the passing of the medical officers listed below:—

Dr. J. N. Langlois, Blind River,	Blind River T., Thompson Tp.
A. S. McCaig, Sault Ste. Marie,	S. S. Marie C., Korah and Tarentorus Tp.
A. B. Rutherford, Owen Sound,	Derby and Sarawak Tps.
A. A. J. Simpson, Kintail,	Ashfield Tp.
M. H. Moore, Athens,	Athens V., Yonge & Escott Rear Tp.
J. D. MacDonald, Huntsville,	Brunel Tp., Chaffey Tp., Huntsville T., Port Sydney V., Stephenson Tp., Stisted Tp.
J. Johnston, Burgessville,	N. Norwich Tp.
T. W. Allison, Caledon East	Albion Tp.
R. E. Hartry, Fort Frances,	McIrvine Tp.
J. B. Buell, Stevensville,	Willoughby Tp.

REPORT OF THE SOLICITOR

K. G. GRAY, K.C., M.D., *Solicitor to the Department.*

The following legislation was passed by the Legislative Assembly of the 1941 Session:

The following Acts were amended:—

The Public Health Act—Chapter 45, 5 George VI, 1941.

The Venereal Diseases Prevention Act—Chapter 62.

The Sanatoria for Consumptives Act—Chapter 51.

The Cemetery Act—Chapter 10.

Upon the recommendation of the Minister of Health, regulations and amendments to regulations under the following Acts were approved by the Lieutenant-Governor in Council:—

The Venereal Diseases Prevention Act—May 6th, 1941.

The Venereal Diseases Prevention Act—February 8th, 1941.

The Cemetery Act—October 9th, 1941.

The Public Health Act—March 25th, 1941, re Camps.

The Public Health Act—December 16th, 1941, re Camps.

The Public Health Act—March 29th, 1941, re Psittacosis, revoked and substituted, January, 1942.

AN ACT TO AMEND THE PUBLIC HEALTH ACT.

His Majesty, by and with the advice and consent of the Legislative Assembly of the Province of Ontario, enacts as follows:

1. Section 1 of *The Public Health Act* is amended by adding thereto the following clause:

Rev. Stat.,
c. 299, s. 1,
amended.

(cc) "Food and dairy inspector" shall mean food and dairy inspector appointed under this Act.

"Food and
dairy
inspector."

2. (1) Clause *zc* of section 5 of *The Public Health Act*, as enacted by section 3 of *The Public Health Amendment Act, 1938*, is amended by inserting after the word "inspectors" in the third line the words "food and dairy inspectors," so that the said clause shall now read as follows:

Rev. Stat.,
C. 299, s. 5,
cl. *zc*, (1938,
c. 30, s. 3)
amended.

(zc) Providing for courses of instruction and prescribing qualifications for Medical Officers of Health, sanitary inspectors, food and dairy inspectors and public health nurses.

Courses for
medical officers,
inspectors
and nurses.

(2) The said section 5 is amended by adding thereto the following clauses:

Rev. Stat.,
c. 299, s. 5,
amended.

(zg) prescribing qualifications for persons operating or engaged in diagnostic or public health laboratories;

Qualifications
of laboratory
personnel.

Medical officers,—
general.

(zh) prescribing the duties of medical officers of health, sanitary inspectors, food and dairy inspectors and public health nurses, in relation to public health matters not specifically provided for by this Act.

Rev. Stat.,
c. 299, s. 34,
subs. 5,
amended.

3. Subsection 5 of section 34 of *The Public Health Act* is amended by inserting after the word "appoint" in the second line the words "one or more food and dairy inspectors," so that the said subsection shall now read as follows:

Appointment of inspectors, nurses and physicians by council or local board.

(5) The council of city, town, township or village or a local board may appoint one or more food and dairy inspectors, one or more public health nurses, and one or more duly qualified physicians and engage such other services as may, in the opinion of the council or local board, be required for carrying out the provisions of this or any other Act administered by the Department or the regulations made thereunder for the prevention or treatment of disease.

Rev. Stat.,
c. 299, s. 37,
subs. 1,
amended.

4. (1) Subsection 1 of section 37 of *The Public Health Act* is amended by striking out the words "or in an adjoining municipality" in the third line, so that the said subsection shall now read as follows:

Dismissal.

(1) Every medical officer of health appointed by the council shall hold office during good behaviour and his residence in the municipality, and, if appointed by the Lieutenant-Governor in Council, shall hold office until the 1st day of February in the year following that of his appointment, and no medical officer of health shall be removed from office except on a two-thirds vote of the whole council and with the consent and approval of the Minister, who may require cause to be shown for the dismissal.

Rev. Stat.,
c. 299, s. 37,
subs. 1b, (1938,
c. 30, s. 5),
amended.

(2) Subsection 1b of the said section 37, as enacted by section 5 of *The Public Health Amendment Act, 1938*, is amended by striking out the words "or in an adjoining municipality" in the second and third lines, and the words "or adjoining municipality" in the sixth and seventh lines, so that the said subsection shall now read as follows:

Appointment out of municipality.

(1b) Upon evidence satisfactory to the Minister that there is no person residing in a municipality qualified to be medical officer, the Minister may permit the council to appoint as medical officer of the municipality some person residing out of such municipality.

Rev. Stat.,
c. 299, s. 94,
subs. 1,
amended.

5. Subsection 1 of section 94 of *The Public Health Act*, as amended by section 4 of *The Public Health Amendment Act, 1939*, is further amended by inserting after the figures "100,000" in the second line the words and figures "or of a township in unorganized territory having a population of 15,000" so that the said subsection shall now read as follows:

Regulation of barber shops, etc.

(1) The council of any city or town or of any township bordering on a city having a population of not less than 100,000, or of a township in unorganized territory having a population of 15,000, may pass by-laws for regulating the operation of barber shops and hairdressing establishments, and for licensing the owners or such shops and hairdressing establishments, and for revoking the license upon breach of any regulation imposed by the by-law.

Rev. Stat.,
c. 299, s. 95,
subs. 1,
amended.

6. (1) Subsection 1 of section 95 of *The Public Health Act* is amended by striking out the words "veterinary surgeon or other competent person" in the second line and inserting in lieu thereof the words "food and dairy inspector or other competent person approved by the Department," so that the said subsection shall now read as follows:

Inspection of dairies, etc.

(1) The medical officer of health may make or cause to be made by a food and dairy inspector or other competent person approved by the Department, an inspection, periodical or otherwise, of all dairies, cheese factories, creameries, dairy farms, slaughter-houses and other lands or premises wherein or from which any milk, cream, cheese, butter, meat or other product intended for human consumption is produced, handled, stored, made, processed, packed, bottled, distributed or delivered, and if upon or as a result of any such inspection he finds that any such building, land or premises, or the equip-

ment, machinery, works or other part of the plant therein, or any other matter or thing therein is in a filthy or unclean state or that the operations carried on therein are not, or cannot be carried on in a sanitary manner or that persons are employed therein who from incompetency, uncleanness or otherwise are not proper to be employed therein so that from or by reason of any such matters or things the public health may be endangered, he may order the owner or occupant of such building, land or premises to remedy such matters or things to his satisfaction, and until such time as he is satisfied that such matters or things are remedied he may prohibit or regulate the distribution, delivery, sale or offering for sale of any products from such building, land or premises.

- (2) Subsection 3 of the said section 95 is repealed.

Rev. Stat., c. 299, s. 95, subs. 3, repealed.

7. Subsection 3 of section 95a of *The Public Health Act*, as enacted by section 8 of *The Public Health Amendment Act, 1938*, is amended by inserting after the word "inspector" in the first line the words "food and dairy inspector," so that the said subsection shall now read as follows:

Rev. Stat., c. 299, s. 95a, subs. 3, (1938, c. 30, s. 8), amended.

- (3) Any medical officer of health, sanitary inspector, food and dairy inspector and any person authorized by a medical officer of health may, without laying any information or obtaining any warrant, seize and remove any milk sold, offered for sale or delivered, including any container in which such milk is found, for the purpose of causing an analysis of such milk to be made.

Seizure of milk.

8. Subsection 1 of section 109 of *The Public Health Act* is amended by inserting after the word "health" in the first line the words "food and dairy inspector," so that the said subsection shall now read as follows:

Rev. Stat., c. 299, s. 109, subs. 1, amended.

- (1) A medical officer of health, food and dairy inspector or sanitary inspector may at all reasonable times inspect or examine any animal, carcass, meat, poultry, game, flesh, fish, fruit, vegetables, grain, bread, flour, milk or other article exposed for sale or deposited in any place for the purpose of sale, or for preparation for sale, and intended for food for man, and if such article appears to him to be diseased, or unsound or unwholesome, or unfit for food for man, he may seize and carry away the same, or cause it to be seized and carried away, in order that it may be destroyed or so disposed of as to prevent it from being exposed for sale or used as food for man.

Inspection of food supplies.

9. Subsection 1 of section 110 of *The Public Health Act* is amended by inserting after the word "health" in the first line the words "food and dairy inspector," so that the said subsection shall now read as follows:

Rev. Stat., c. 299, s. 110, subs. 1, amended.

- (1) Whenever any medical officer of health, food and dairy inspector or sanitary inspector knows or has reason to believe that blood, offal or the meat of any dead animal which has not been previously boiled or steamed when fresh or before becoming putrid or decomposed, or which, although boiled or steamed, is putrid or decomposed, has been or is being fed to hogs, he may seize and carry away the hogs, whether dead or alive, or otherwise detain them so as to prevent their removal.

Feeding certain things to hogs.

10. Subsection 1 of section 111 of *The Public Health Act* is amended by inserting after the word "health" in the sixth line the words "food and dairy inspector," so that the said subsection shall now read as follows:

Rev. Stat., c. 299, s. 111, subs. 1, amended.

- (1) Every butcher and other person selling meat shall on the request of the medical officer of health make affidavit as to the place at which the slaughter of his meat is carried on, and where it is without the limits of the municipality, such place shall be open to inspection by the medical officer of health, food and dairy inspector or by an inspector appointed by the council of the municipality in which the meat is offered for sale.

Inspection of slaughter houses.

AN ACT TO AMEND THE VENEREAL DISEASES PREVENTION ACT.

His Majesty, by and with the advice and consent of the Legislative Assembly of the Province of Ontario, enacts as follows:

Rev. Stat.,
c. 301, s. 1,
amended.

1. Section 1 of *The Venereal Diseases Prevention Act* is amended by adding thereto the following clause:

"Physician."

(bb) "Physician" shall mean a legally qualified medical practitioner.

Rev. Stat.,
c. 301, s. 2,
subs. 1,
amended.

2. (1) Subsection 1 of section 2 of *The Venereal Diseases Prevention Act* is amended by adding at the end thereof the words "or to ascertain the extent of venereal disease infection," so that the said subsection shall now read as follows:

Examination
of person in
custody or
committed to
prison.

(1) Whenever any person is under arrest or in custody charged with an offence against the *Criminal Code* or against any statute of Ontario or any by-law, regulation or order made under the authority thereof, or has been committed to a gaol, reformatory or other place of detention upon conviction of such offence, and the medical officer of health for the municipality or district believes that such person is, or may be, infected with, or has been exposed to infection from venereal disease, the medical officer of health may cause such person to undergo such physical examination as may be necessary, or as may be prescribed by the regulations in order to ascertain whether or not such person is infected with venereal disease or to ascertain the extent of venereal disease infection.

R. S. C., c. 36.

(2) Subsection 3 of the said section 2 is repealed.

Rev. Stat., c.
301, s. 2, subs.
3, repealed.

3. *The Venereal Diseases Prevention Act* is amended by adding thereto the following section:

Rev. Stat., c.
301, amended.

Examination
by gaol
physician.

2a. (1) Every physician in medical charge of any gaol or place of detention or the inmates thereof may cause any person under his charge to undergo such physical examination as may be necessary or as may be prescribed to ascertain whether or not such person is infected with venereal disease or to ascertain the extent of venereal disease infection, and if from such examination the physician believes that the person examined is infected with venereal disease he shall report the facts to the medical officer of health who may thereupon exercise the powers vested in him by subsection 2 of section 2.

Duty of gaol
physician.

(2) Where an examination has not been made under subsection 1 it shall be the duty of every physician in medical charge of any gaol or place of detention or of the inmates thereof to report to the medical officer of health the name and place of detention, whether before or after conviction, or any person under his medical charge whom he suspects or believes to be suffering from venereal disease, and such report shall be made within twenty-four hours after the time of arrival of such person in the gaol or place of detention.

Duplicate
report.

(3) A duplicate of every report made under subsection 1 or 2 shall be forwarded to the Department.

Rev. Stat., c.
301, s. 3, subs.
1, amended.

4. (1) Subsection 1 of section 3 of *The Venereal Diseases Prevention Act* is amended by striking out the words "resident in" in the second line and inserting in lieu thereof the word "within," so that the said subsection shall now read as follows:

Action by
medical officer
of health on
information.

(1) Subject to the regulations, where the medical officer of health is credibly informed that a person within the municipality or district for which the medical officer of health is appointed is infected with venereal disease and has infected or is liable to infect other persons, the medical officer of health may give notice in writing to such person requiring him to consult a legally qualified medical practitioner and to procure and produce to the medical officer of health within a time to be specified in the notice a report or certificate of such medical practitioner that the person so notified is or is not suffering from venereal disease.

Rev. Stat., c.
301, s. 3, subs.
7, repealed.

(2) Subsection 7 of the said section 3 is repealed.

5. *The Venereal Diseases Prevention Act* is amended by adding thereto the following sections:
- | | |
|---|--|
| 3a. (1) Where a person who has been under treatment for venereal disease refuses or neglects to continue treatment in a manner and to a degree satisfactory to the attending physician and the Department, the physician shall report to the Department the name and address of such person together with such other information as may be required by the regulations. | Physician to report patient discontinuing treatment. |
| (2) A person who fails to attend upon his attending physician within seven days of an appointment for treatment shall be deemed to have neglected to continue treatment, and shall be reported by the physician within fourteen days of the date of the appointment. | What deemed discontinuance |
| (3) A physician who fails to report as required by this section shall incur a penalty of not less than \$25 and not more than \$100. | Penalty. |
| 3b. The Deputy Minister of Health and any officer of the Department of Health designated by the Minister shall be medical officers of health within the meaning of this Act. | Powers of Deputy Minister. |

AN ACT TO AMEND THE SANATORIA FOR CONSUMPTIVES ACT

His Majesty, by and with the advice and consent of the Legislative Assembly of the Province of Ontario, enacts as follows:

1. *The Sanatoria for Consumptives Act* is amended by adding thereto the following sections:
- | | |
|--|------------------------------|
| 54a. (1) Any medical officer of health or duly qualified medical practitioner may, with the approval in writing of the Minister, make a complaint or lay an information in writing, and under oath before a justice of the peace, charging that the circumstances set out in clauses <i>a</i> , <i>b</i> and <i>c</i> of subsection 5 exist with regard to any person named in such complaint or information. | Rev. Stat., c. 395, amended. |
| (2) Upon receiving any such complaint or information the justice of the peace shall hear and consider the allegations of the complainant, and if he considers it desirable or necessary the evidence of any witness or witnesses, and if he is of the opinion that a case for so doing is made out, he shall issue a summons directed to the person complained of, requiring him to appear before a magistrate at a time or place named therein. | Information or complaint. |
| (3) Where a person to whom a summons is directed does not appear at the time and place named therein, or where it appears that a summons cannot be served, a magistrate may issue a warrant directing that the person named in the summons be brought before him. | Issue of summons. |
| (4) Where a person appears or is brought before a magistrate under this section, the magistrate shall inquire into the truth of the matters charged in the complaint or information, and for such purpose shall proceed in the manner prescribed by <i>The Summary Convictions Act</i> and shall have all the powers of a magistrate holding a hearing under that Act. | Issue of warrant. |
| (5) Where a magistrate finds that any such person,— | Magistrate's inquiry. |
| (a) is suffering from pulmonary tuberculosis in an infectious state; | Rev. Stat., c. 136. |
| (b) is unwilling or unable to conduct himself in such a manner as not to expose members of his family or other persons to danger of infection; and | Order for detention. |
| (c) refuses to be admitted or to remain in a sanatorium or has left a sanatorium against the advice of the superintendent thereof, he shall order that such person be admitted to and detained in a sanatorium or in such other place as may be set aside with the approval of the Minister for the care of tuberculous persons, for such period not exceeding one year, as the magistrate may deem necessary | |

- Laboratory certificate. (6) In any inquiry under this section, upon production of a certificate signed or purporting to be signed by the director of a laboratory approved by the Minister as to the presence of tubercle bacilli in the sputum of any person, such certificate shall be *prima facie* evidence of the facts stated therein, and of the authority of the person giving such certificate without any proof of appointment or signature.
- Detention pending inquiry or removal. (7) Any person detained pending a hearing under this section or pending his removal to a sanatorium or other place set aside with the approval of the Minister for the care of tuberculous persons, shall be detained in a sanatorium or such other safe and comfortable place as a justice of the peace or magistrate may direct.
- Transfer of patients. (8) The Minister may direct the transfer of any person detained under this section to any sanatorium, hospital or any other place when he deems such transfer is necessary for the welfare of the patient.
- Extension of detention. (9) Any person detained under this section may, with the approval in writing of the Minister, be brought before a magistrate at any time during the last thirty days of the period for which he is so detained, and if the magistrate finds that he is still suffering from pulmonary tuberculosis in an infectious state he may order that such person be further detained in a sanatorium or such other place as may be set aside with the approval of the Minister for the care of tuberculous persons for such period, not exceeding one year, as the magistrate may deem necessary.
- Order for segregation. 54b. Any patient in a sanatorium or in any other place set aside with the approval of the Minister for the care of tuberculous persons who is unwilling or unable to conduct himself in such a manner as not to expose other patients or other persons to danger of infection, or whose behaviour is detrimental to the recovery of other patients, may, with the approval in writing of the Minister, be brought before a magistrate who may, if he finds any such condition to exist, order that such patient be segregated from the other patients in a separate part of the sanatorium or other place and there detained for such period not exceeding one year as the magistrate may deem necessary.
- Authority to apprehend, etc. 54c. (1) The superintendent, every member of the medical staff and every nurse and attendant employed in a sanatorium or other place set aside with the approval of the Minister for the care of tuberculous persons and every medical officer of health and peace officer shall have authority to,—
- (a) execute any warrant and enforce any order of a magistrate issued or made under section 54a or 54b;
- (b) bring any person before a magistrate under subsection 9 of section 54a or section 54b; and
- (c) apprehend any person who has left a sanatorium or other place set aside with the approval of the Minister for the care of tuberculous patients in contravention of any order made under section 54a or 54b.
- Discharge by Minister. (2) Where the Minister is of opinion that any person detained under section 54a or 54b in a sanatorium or other place set aside with the approval of the Minister for the care of tuberculous persons is no longer suffering from pulmonary tuberculosis in an infectious state, he may direct the discharge of such person.
- Expenses of proceedings. (3) The expenses of all proceedings taken under section 54a or 54b shall be paid out of such moneys as may be appropriated for the purposes of this Act by the Legislature.

AN ACT TO AMEND THE CEMETERY ACT

His Majesty, by and with the advice and consent of the Legislative Assembly of the Province of Ontario, enacts as follows:

1. Clause *f* of section 1 of *The Cemetery Act* is amended by striking out the words "Department of Health" in the second line and inserting in lieu thereof the words "Lieutenant-Governor in Council," so that the said clause shall now read as follows:
- Rev. Stat., c.
351, s. 1, cl *f*,
amended.
- (*f*) "Regulations" shall mean regulations made by the Lieutenant-Governor in Council under the authority of this Act. "Regulations."
2. Section 8 of *The Cemetery Act* is repealed and the following substituted therefor:
- Rev. Stat., c.
351, s. 8, re-
enacted.
8. (1) The Lieutenant-Governor in Council may upon the recommendation of the Minister of Health make regulations—
- Power to make
regulations.
- (*a*) respecting the burial, disinterment, removal, and disposal of the bodies or other remains of deceased persons;
- (*b*) respecting the plans, surveys, arrangement, condition, care, sale and conveyancing of lots, plots and other cemetery grounds and property;
- (*c*) respecting the erection, arrangement and removal of tombs, vaults, monuments, gravestones, markers, copings, fences, hedges, shrubs, plants and trees in cemeteries;
- (*d*) respecting charges for the sale and care of lots and plots;
- (*e*) respecting the collection, amounts to be collected and investment of funds for perpetual care and maintenance of cemeteries;
- (*f*) requiring the filing or registration of plans of cemeteries and prescribing the contents and details of such plans and requiring that burials be made in accordance with such plan;
- (*g*) requiring that the by-laws, rules or regulations made by the owners of cemeteries be approved by the Minister of Health; and
- (*h*) requiring information with regard to cemeteries and the care and management thereof to be furnished to the Minister of Health,
- and such regulations may be general in their application or may be made applicable specially to any particular locality or cemetery.
- (2) Every person who violates any of the provisions of the regulations shall be liable to a penalty of not more than \$100 for a first offence and not more than \$500 for a second or subsequent offence which shall be recoverable under *The Summary Convictions Act*.
- Penalty for
violation of
regulations
Rev. Stat.,
c. 136.
3. Subsection 1 of section 30 of *The Cemetery Act* is amended by striking out the word "personal" in the fourth line, so that the said subsection shall now read as follows:
- Rev. Stat., c.
351, s. 30, subs.
1, amended.
- (1) No dead body shall at any time be disinterred or removed from the grave, place of burial or vault, other than a receiving vault, except under and subject to the regulations and under the supervision and direction of the medical officer of health.
- Disinterment
of dead body.

Rev. Stat.,
c. 351, s. 33,
amended.

4. Section 33 of *The Cemetery Act* is amended by inserting after the word "locality" in the fifth line the words "or that for any other reason it is expedient that a cemetery should be closed," so that the said section shall now read as follows:

Closing
cemetery for
defective
drainage, etc.

33. Where the Department of Health reports in writing that a cemetery is so situated that, owing to the want of proper facilities for drainage or from any other cause, the same has become or is likely to become dangerous to the health of the inhabitants of the locality or that for any other reason it is expedient that a cemetery should be closed, the Lieutenant-Governor in Council may by proclamation declare that the cemetery shall be closed and that no further interments shall take place therein.

Rev. Stat., c.
351, amended.

5. *The Cemetery Act* is amended by adding thereto the following sections:

Removal by
person other
than owner.

34a. Where a cemetery has been closed by proclamation of the Lieutenant-Governor in Council as provided by section 33, and the owner does not proceed as provided by section 34, the Lieutenant-Governor in Council may authorize any person to exercise the powers of the owner in respect of a removal directed by the Lieutenant-Governor in Council and every expense incurred by such person in so doing shall be a debt due and owing from the owner to the Crown in the right of the Province of Ontario.

Power of
municipality
to expropriate.

36a. The council of a local municipality may, with the approval of the Minister of Health, pass a by-law for expropriating any cemetery situate therein or within an adjacent township or in unorganized territory and the provisions of Part XV of *The Municipal Act* as to the taking of land compulsorily and making compensation therefor and as to the manner of determining and paying the compensation shall apply *mutatis mutandis* to the council and to the exercise by it of the powers conferred by this section.

Rev. Stat.,
c. 266.

6. Subsection 1 of section 43 of *The Cemetery Act* is amended by striking out the words and figures "the Great War, 1914-1918" in the seventh line and inserting in lieu thereof the words "any war," so that the said subsection shall now read as follows:

Rev. Stat. c.
351, s. 43, subs.
1, amended.

War memorial
committee—
appointment
of.

(1) The council of every county shall appoint a committee to be known as "The (*insert name of county*) War Memorial Committee" to take charge of monuments, tablets and other memorials established or erected within the county in commemoration of the nursing sisters, officers and men of His Majesty's forces who served, were wounded, killed or died during any war, except only such monuments, tablets and other memorials as are being cared for by municipalities, churches or other organizations.

Short title.

7. This Act may be cited as *The Cemetery Amendment Act, 1941*.

Copy of an Order-in-Council approved by the Honourable the Lieutenant-Governor, dated the 6th day of May, A.D., 1941

Upon the recommendation of the Honourable the Minister of Health, the Committee of Council advise that the regulations respecting venereal diseases, made pursuant to *The Venereal Diseases Prevention Act*, and approved by the Lieutenant-Governor in Council on June the 20th, 1918, April 16th, 1920, December 28th, 1922, and November the 9th, 1939, be further amended as follows:—

Form (a) VI, V.D., as approved by Order-in-Council, dated November the 9th, 1939, be repealed and the Form attached substituted therefor.

Certified,

C. F. BULMER,
Clerk, Executive Council.

Copy of an Order-in-Council approved by the Honourable the Lieutenant-Governor, dated the 8th day of February, A.D., 1941.

Upon the recommendation of the Honourable the Minister of Health, the Committee of Council advise that the regulations respecting venereal diseases made pursuant to the *Venereal Diseases Prevention Act, R.S.O., 1937*, Chap. 301, be amended as follows:—

1. Clause (2) of regulation (r) is amended by striking out the words "to the medical officer of health" and inserting in lieu thereof the words "by the attending physician to the Department of Health," so that the said clause shall now read as follows:—

(2) He shall abstain from marriage, sexual intercourse or any conduct likely to infect another, and shall obey all instructions given in writing by the medical officer of health for the prevention of infection from him. He shall continue treatment until the degree of treatment secured is considered adequate by the attending physician and the department and in default of which he shall be reported by the attending physician to the Department of Health. Penalty for non-compliance with this regulation, a fine of not less than \$100.00 nor more than \$500.00 or twelve months' imprisonment.

2. Regulation (g) is amended by striking out the words "but without giving the name of the patient" where it occurred at the end thereof, so that the said regulations shall now read as follows:—

Every medical practitioner, every hospital superintendent, superintendent of every institution under the *Mental Hospitals Act*, the head of every gaol, reformatory or other place of detention and of every institution, private, public or otherwise, shall report within 24 hours to the Department of Health of Ontario in accordance with Form VI every case of venereal disease coming under his treatment or care for the first time. If the patient has been under treatment by another physician or institution, notice thereof shall be sent forthwith to the Department.

3. Regulation (g) is amended by adding thereto the following clause:—

(2) Every medical practitioner, hospital superintendent, head of a place of detention, and every public institution and public and private laboratory shall report within 24 hours to the Department of Health of Ontario, in accordance with Form VI every case of venereal disease coming under his diagnosis whether or not the patient is under his treatment or care.

Certified,

C. F. BULMER,
Clerk, Executive Council.

Copy of an Order-in-Council approved by the Honourable the Lieutenant-Governor, dated the 9th day of October, A.D., 1941.

Upon the recommendation of the Honourable the Minister of Health, the Committee of Council advise that pursuant to section 8 of the *Cemetery Act*, being chapter 351 of the Revised Statutes of Ontario, 1937, and amendments thereto, the regulations hereto attached be approved by Your Honour.

Certified,

C. F. BULMER,
Clerk, Executive Council.

REGULATIONS

Made pursuant to section 8 of *The Cemetery Act, R.S.O., 1937*, Chapter 10, and amendments thereto.

DEFINITIONS

1. In these regulations:—

- (a) "Department" shall mean the Department of Health for the Province of Ontario;
- (b) "Lot" shall include plot, grave and burial site, but shall not include vault; and
- (c) "Minister" shall mean the Minister of Health for the Province of Ontario.

PLANS

2. Before the 1st day of January, 1942, every owner of a cemetery shall submit to the Minister for approval a general plan of the cemetery, drawn to scale and showing:—

- (a) Every lot, walk, fence, road, watercourse and building in the cemetery, and
- (b) The dimensions of every such lot, walk, fence, road, watercourse and building.

3. Every such plan for a cemetery that contains 10 or more acres of land or for any part of which a perpetual care contract or condition is in force, shall be prepared and the land shall be surveyed by an Ontario Land Surveyor or a Professional Engineer.

4. Every plan approved by the Minister shall forthwith be deposited by the owner pursuant to *The Custody of Documents Act* in the registry office for the registry division in which the cemetery is situate.

5. No alteration of the location, layout or dimensions of any lot in a cemetery shall be made until a detailed plan of such proposed alteration has been approved by the Minister and deposited in accordance with regulation 4.

6. Where a plan is approved by the Minister pursuant to regulation 2 or 5, such approval shall be endorsed upon the plan.

7. No body of a deceased person who had attained the age of 16 years shall be buried in a grave space that is less than 8 feet in length and 3 feet in width, exclusive of space for monuments.

8. Every interment in a cemetery shall be made in a lot that is shown on a plan approved by the Minister.

9. No interment shall be made without the written consent of the owner of the lot or of a person who satisfies the owner of the cemetery that such person represents the owner of the lot.

10. Public walks in every cemetery shall be so arranged as to give access to every plot therein. Roads shall be provided to give access to all parts of the Cemetery.

11. Every owner shall keep available for public inspection during reasonable hours a copy of every plan of the cemetery that has been approved and deposited in accordance with these regulations.

SALE OF LOTS.

12. Every owner shall at the time of every sale by him of a lot deliver to the purchaser thereof a deed or certificate showing:—

- (a) The name of the purchaser;
- (b) The location and area or dimensions of the lot purchased;
- (c) The date of the purchase, and
- (d) The amount of the sale price.

REGISTERS

13. Every owner shall keep a register for public inspection in which shall be entered:—

- (a) The name and address of every owner of a lot in the cemetery; and
- (b) Every transfer of the ownership of a lot in the cemetery.

14. Every owner shall keep a separate register for public inspection in which shall be entered:—

- (a) The name of every deceased person whose body is interred in the cemetery;
- (b) The location of every dead body interred in the cemetery;
- (c) The date of the burial of every such body, and
- (d) The particulars of every disinterment or removal of any such body.

15. (1) Every transfer of the ownership of a cemetery lot subsequent to the original sale thereof shall be made by the registered owner thereof or his legal representative, giving to the owner of the cemetery a written notice, containing a description of the lot, the date of the sale and the name and address of the transferee.

(2) Upon receipt of such notice and payment of a fee not exceeding \$2, the owner shall forthwith enter in the register kept in accordance with regulation 13 the date of the transfer and the name and address of the transferee.

DISINTERMENT

16. (1) No dead body shall be disinterred or removed from a place of burial in a cemetery without the written consent of the local medical officer of health and the owner of the lot or place of burial; provided that,—

- (a) Where the owner of the lot or place of burial cannot conveniently be reached or the place of his residence is unknown to the owner of the cemetery, and the written consent of the Minister has been obtained, or
- (b) Where the cemetery has been closed by proclamation of the Lieutenant-Governor in Council, the consent of the owner of the lot or place of burial shall not be requisite.

CREMATION

17. Where a dead body has been cremated the ashes remaining therefrom shall not be kept longer than 60 days thereafter in a crematorium or upon the premises of an embalmer or funeral director or in any place that is not designated as a proper place for the final disposition of such ashes.

SALE AND CARE CHARGES

18. Every owner of a cemetery shall file with the Department a list of the prices or rates charged for the sale and care of lots in the cemetery, the opening of graves and other services, and as penalties.

19. No charge other than those specified in the rules or by-laws for a cemetery shall be made for the erection, placing, arrangement or removal of tombs, vaults, monuments, grave-stones, markers, corner posts and copings therein, the opening of graves and other services and as penalties.

20. No new prices or rates and no alteration in existing prices or rates for a cemetery shall be put into effect until a list thereof has been filed with the Department; provided that, where the Minister disallows any such new price or rate or alteration, such new price or rate or alteration shall not be put into effect.

CHANGE OF OWNERSHIP OF CEMETERY

21. No change in the ownership of a cemetery shall become effective until written notice thereof has been given to the Department and such change has been approved by the Minister.

{CEMETERY} BY-LAWS

22. No cemetery by-law, rule or regulation that is in force on the 1st day of January, 1942, or is thereafter made, or any amendment thereof, shall have any force or effect after such day unless approved by the Minister.

23. The Minister may revoke his approval or disallowance under these regulations.

24. No marker, corner post, monument, coping, gravestone or fence other than those specified in the by-laws for a cemetery shall be required for any lot therein:

FUNDS FOR PERPETUAL CARE

- 25. (1) Every owner who holds or receives any money for the purpose of perpetual preservation and maintenance of a lot, tomb, monument or enclosure pursuant to section 15 of *The Cemetery Act*, shall forthwith invest such money either with the Public Trustee or in securities in which a trustee may invest under *The Trustee Act*.
- (2) Any surplus income from the investment of such money shall be invested in accordance with sub-regulation (1) of this regulation.
- (3) No income from the investment of such money shall be expended for the enlargement of the cemetery.
- 26. (1) Every owner of a cemetery operated for gain or profit shall provide perpetual care and maintenance for the entire cemetery.

- (2) Every such owner shall appropriate for the purpose of providing money for such perpetual care and maintenance an amount equal to at least 15 per centum of the sale price or 10 cents for every square foot of surface area whichever is the greater, of every cemetery lot sold by such owner, and shall invest such money in accordance with subsection 5 of section 15 of *The Cemetery Act* and regulation 25; provided that an owner directed by the Minister so to do shall increase the amount of such appropriation.

FINANCIAL STATEMENT

27. Every owner of a cemetery operated for gain or profit shall file annually with the Department an audited financial statement in respect of the operation of the cemetery during the preceding financial year.

28. Every owner shall, at the request of the Minister, forthwith furnish the Minister with such information as the Minister may require in respect of the cemetery and the care and management thereof.

STATUTES

29. Where any Act conflicts with these regulations, the former shall prevail.

30. These regulations may be cited as *The Cemetery Regulations, 1941*.

Copy of an Order-in-Council, approved by the Honourable the Lieutenant-Governor, dated the 25th day of March, A.D., 1941.

Upon the recommendation of The Honourable the Minister of Health, the Committee of Council advise that the regulations made pursuant to section 127 of *The Public Health Act, R.S.O., 1937*, Chapter 299, respecting camps, works and premises, and the employers and workmen thereof in territorial districts without municipal organization, be amended by repealing regulations numbered 20 to 26 inclusive, and by substituting therefor the regulations numbered 20 to 26 inclusive hereunto attached.

Certified,

C. F. BULMER,
Clerk, Executive Council.

Copy of an Order-in-Council, approved by the Honourable the Lieutenant-Governor, dated the 16th day of December, A.D., 1941.

Upon the recommendation of the Honourable the Minister of Health, the Committee of Council advise that the regulation made pursuant to section 127 of *The Public Health Act, R.S.O., 1937*, Chapter 299, respecting camps, works and premises, and the employers and Workmen thereof in territorial districts without municipal organization, approved by Your Honour on August 18th, 1938, and amended by Order-in-Council dated March 25th, 1941, be further amended by adding at the end of subsection (b) of section 26 of the said regulations, the following words: "and where the workman is not indigent and is not receiving hospital care, the employer shall be responsible and liable for providing only medical and surgical care for the said period;" so that the said subsection shall now read as follows:—

"In cases where any workman has been in his employ for three months or more out of the six months immediately preceding the need for medical, surgical or hospital care arising, the employer shall be responsible and liable for providing such care and for the maintenance of the workman for a period not exceeding thirty days, and where the workman is not indigent and is not receiving hospital care, the employer shall be responsible and liable for providing only medical and surgical care for the said period."

Certified,

C. F. BULMER,
Clerk, Executive Council.

REGULATIONS RESPECTING CAMPS, WORKS AND PREMISES AND THE EMPLOYERS AND WORKMEN THEREOF IN TERRITORIAL DISTRICTS WITHOUT MUNICIPAL ORGANIZATION

Pursuant to Section 127 of *The Public Health Act*.

MEDICAL, SURGICAL AND HOSPITAL CARE OF WORKMEN

20. (1) Every employer of workmen in a standard camp may enter into a medical contract with a contract physician for medical, surgical and hospital care of workmen in his employ, but whether or not any such contract is entered into, the duty of providing medical, surgical and hospital care and treatment and maintenance while under such care or treatment for every workman in the employ of such an employer shall primarily be and remain the responsibility of the employer subject to the limitations hereinafter set out whether or not such workmen are housed in the camp and whether or not such workmen reside in an unorganized district.

(2) In the case of an employer or a number of employers with camps located in a group who usually employ more than five hundred workmen, the Minister may authorize an arrangement whereby the employer or employers may use the sums deducted from the wages of workmen in their employ for the establishment and maintenance of an industrial medical service, including such particulars as the Minister may direct and authorize.

(3) Where a standard mining camp is located in close proximity to or with ready means of access to established medical, surgical and hospital services and upon submission to the Department of arrangements by an employer for medical, surgical and hospital care of his employees the Minister may authorize that section 21 shall not apply except that all sums deducted from wages for medical, surgical and hospital care shall be applied to that purpose, but the Minister may at any time by notice in writing to such employer revoke such authorization.

(4) When an employer has entered into a medical contract he shall notify every workman in his employ of the name and address of the contract physician.

21. (1) During the currency of a medical contract or an arrangement authorized by the Minister under section 20, subsection 2, an employer may deduct and retain from the pay or wages due to any workman entitled to the benefits of such contract a sum not exceeding \$1 per month commencing from his first pay and once a month thereafter during the period of employment, and all sums so deducted and retained shall, without rebate or reduction, be paid monthly by the employer to the contract physician, or as the Minister may authorize in an arrangement under Section 20, subsection 2.

(2) The employer shall keep records showing a separate accounting of all sums deducted from the wages of workmen in his employ for medical and surgical care, and showing the disbursement of such sums, and such records shall be open to inspection at any reasonable time by the contract physician or an inspector.

(3) The Department may require statements signed by the employer showing, for such period of time as the Department may deem necessary, the number of workmen employed by the employer, the number of such workmen from whose wages any deduction for medical and surgical care has been made by the employer, the sums deducted by the employer from the wages of workmen in his employ for medical and surgical care, the sums paid pursuant to a medical contract to a contract physician, the sums paid pursuant to a sanitation contract to a contract physician, and the sums paid pursuant to an arrangement under section 20, subsections 2 and 3.

(4) The Department may authorize any inspector or any officer of the Department to inspect and audit the payrolls and books of any employer insofar as they are affected by these regulations.

22. (1) Every contract physician entering into a medical contract with an employer shall supply medical and surgical care, treatment and medicine to every workman of the employer entitled thereto under the terms of the contract and in accordance with these regulations unless the contract as approved by the Department specifies otherwise.

(2) Every contract physician shall report at the end of each month to the Department on the physician's report form all cases of sickness and non-industrial accidents among employees under his care.

(3) Every contract physician who employs or engages any other physician to perform any services other than consultant services in connection with the medical contract shall notify the Department and the Department may require the employer, contract physician and other physician, or any of them, to furnish such information as may be necessary and may require further or other contracts to be entered into.

23. The contract physician shall cause a notice to be posted in a camp a reasonable time in advance of his visits to such camp so that the workmen in the camp may have an opportunity to consult him.

24. (1) Every employer shall provide facilities for the isolation of workmen suffering from a communicable disease, to the satisfaction and approval of an inspector, and the employer or contract physician shall arrange for general hospital accommodation and facilities where necessary for the treatment of workmen suffering from sickness or injury.

(2) The employer shall provide and pay for transportation of any workman when necessary for medical and surgical treatment to which he is entitled under these regulations except as provided in Section 26 (g).

25. Within a reasonable time after the admission of any workman as a patient in a public hospital, the superintendent of the hospital shall notify the employer of the workman of such admission, giving such particulars as may be ascertainable to enable the employer to identify the employee, and in the event that the superintendent neglects to notify the employer, the Department may exempt the employer from any liability imposed upon him by these regulations for the maintenance charges for maintaining the workman in the hospital.

26. The responsibility and liability of an employer under the provisions of regulations 20 to 24 shall be subject to the following limitations:

- (a) In cases where the workman has been in his employ for less than three months out of the six months immediately preceding the need for medical, surgical or hospital care, arising, and the illness and consequent inability to work as the result of a chronic or degenerative disease or of an infection or defect arising prior to the commencement of employment, the employer shall be responsible only to return and pay the cost of return of the workman to the municipality in which he was last resident in Ontario within the meaning of *The Public Hospitals Act*, or, in the event of no such residence existing and the workman, being without means, the employer shall be responsible for returning and paying the cost of return of the workman to the place from which he was engaged, and for providing such medical care and treatment and maintenance as the workman may need until he is returned to such municipality or other place.
- (b) In cases where any workman has been in his employ for three months or more out of the six months immediately preceding the need for medical, surgical or hospital care arising, the employer shall be responsible and liable for providing such care and for the maintenance of the workman for a period not exceeding thirty days, and where the workman is not indigent and is not receiving hospital care, the employer shall be responsible and liable for providing only medical and surgical care for the said period.
- (c) In cases where the workman becomes ill and by reason thereof need for medical, surgical or hospital care and treatment arises within thirty days after the workman has ceased employment with the employer and such illness is proved to have originated or been occasioned during the course of such employment and such workman is an indigent person the employer shall be responsible and liable for such medical, surgical and hospital care and for the maintenance of the workman within the period of thirty days after such workman has ceased employment and not afterwards, provided that if the workman had not completed one month's employment in the camp of the operator the employer will have no responsibility after employment ceases.
- (d) In cases of communicable disease coming under Section 26, subsections (b), (c) and (g), the employer shall be responsible for a period not exceeding ninety days.
- (e) The employer shall not be liable for the payment of the charges for treatment of any workman in a sanatorium under *The Sanatoria for Consumptives Act*.
- (f) In cases where the workman is suffering from an accident for which the employer is not responsible under *The Workman's Compensation Act*, the employer shall be responsible and liable for medical and surgical care and treatment, but not for maintenance in any hospital.
- (g) Should the workman while away from the area served by the contract physician suffer an accident for which the employer is not responsible under *The Workmen's Compensation Act* or become sick with other than a communicable disease, he shall not be entitled to treatment under the regulations unless he returns to the camp or other place of residence from which he carries on his work or unless he returns to a hospital serving the area.

Copy of an Order-in-Council, approved by the Honourable the Lieutenant-Governor, dated the 29th day of March, A.D., 1941.

Upon the recommendation of the Honourable H. C. Nixon, Acting Minister of Health, the Committee of Council advise that Your Honour, pursuant to section 5 of *The Public Health Act*, approve the attached regulations entitled "Regulations for the Prevention and Mitigation of Psittacosis."

Certified,

C. F. BULMER,
Clerk, Executive Council.

Copy of an Order-in-Council, approved by the Honourable the Lieutenant-Governor, dated the 29th day of January, A.D., 1942.

Upon the recommendation of the Honourable the Minister of Health, the Committee of Council advise that the Regulations for the Prevention and Mitigation of Psittacosis made under authority of *The Public Health Act, R.S.O., 1937*, Chapter 299, and approved by Your Honour on the 29th day of March, 1941, be revoked and the Regulations attached hereto be approved and substituted therefor.

Certified,

C. F. BULMER,
Clerk, Executive Council.

REGULATIONS FOR THE PREVENTION AND MITIGATION OF PSITTACOSIS

1. In these regulations:

- (a) "Owner" shall include every person for the time being in control of any psittacine bird.
- (b) "Psittacine bird" shall mean parrot, parrakeet, love bird or budgerigar, and every other bird declared a psittacine bird by the Minister of Health.

2. Every owner, including dealers and breeders, shall report to the medical officer of health of the municipality in which he resides the number of psittacine birds under his control and the address of the premises where such birds are kept, together with such other information as the medical officer of health shall require.

3. Every dealer and every breeder of psittacine birds shall register with the Department of Health his name and address and the address of the premises where he keeps psittacine birds and shall disclose to the Department of Health upon request any information available to him as to the sources from which he secures or has secured any psittacine bird, and shall upon request give a record of the disposal by him of any psittacine bird.

4. Every dealer and every breeder of psittacine birds shall keep a record of the source from which he secured any psittacine bird and a record of the disposal of any psittacine bird and shall report immediately such sale or transfer to the medical officer of health. Further, every such dealer and breeder shall provide for the identification of psittacine birds by banding with a closed band every young psittacine bird coming into his possession.

5. After October 1st, 1941, no owner shall sell or otherwise dispose to any other person a psittacine bird which is not banded with a closed band.

6. Birds born on and after January 1st, 1942, must bear the band distributed by the Ontario Department of Health.

7. Every owner of a psittacine or other bird which is infected with psittacosis, or is a carrier thereof or which has at any time been kept on the same premises as a psittacine bird which was infected with psittacosis or which was a carrier thereof shall deliver such bird to the medical officer of health to be disposed of by the medical officer of health in such manner as the medical officer of health shall determine.

8. No breeder of psittacine birds shall permit colony breeding.

9. The medical officer of health or other person appointed by him in writing for that purpose, may enter in and upon any house, out-house or premises, at any time, for the purpose of making enquiry and examination with respect to the health of any psittacine or other bird known or suspected to be therein and may cause the destruction of every psittacine or other bird found to be infected or believed to be infected with psittacosis and may cause the destruction of any or every psittacine or other bird that has been in the same premises and may cause the cages and utensils which have been used by such bird to be disinfected.

10. Every breeder or dealer of psittacine birds shall deliver at any time upon request of the medical officer of health or any other person appointed by him in writing, for the purpose of laboratory investigation, ten per cent of the birds in his control.

DIVISION OF MEDICAL STATISTICS

A. H. SELLERS, M.D., D.P.H., Director.

Extended leave of absence for service with His Majesty's Forces (R.C.A.F.) was granted to Dr. A. Hardisty Sellers, Director of the Division of Medical Statistics on November 12, 1940. C. Roger Myers, M.A., Ph.D., became Acting Director, following Dr. Sellers' absence, and on November 15th, 1941, was also granted leave of absence for service Overseas. The remaining staff are endeavouring to carry on the regular work of the Division in much the same way as in previous years, comprising the collection, analysis and reporting of statistical information relating to public health in Ontario. The work of this Division may be divided into four classes—Statistical Analysis relating to Mental Hospitals, Public Hospitals, Cancer Control, and Special Problems. A more detailed explanation of this work follows.

1. MENTAL HOSPITAL STATISTICS.

(a) Monthly Surveys and Reports.

Monthly statements relating to the movement of patient population, accidents, etc., are submitted to the Division by each Ontario Hospital. From these statements are compiled monthly reports indicating the trend of the patient population—whether the patient population has increased or decreased as compared with the same period during the previous years. In addition a report showing the type of accidental injuries and the manner in which they occurred is prepared each month together with periodic analysis of admission, discharges, etc., and surveys concerning bed occupancy.

(b) Annual Report.

Each Ontario Hospital also submits an annual report comprising some 30 statistical tables concerning the movement of the hospital population during the year. This report together with other information dealing with dental, laboratory, nursing and X-ray services comprises the annual report for mental hospitals.

(c) Mental Health Clinics.

In previous years the coding and tabulation of the individual Mental Health Clinic records was carried on by the Division. Beginning this year each clinic has submitted a uniform statistical report in much the same manner as do the Ontario Hospitals. The results of this analyses will be found in the Annual Report of the Hospitals Division for the year ending March 31, 1941.

(d) Mental Hospital Index.

The alphabetical index covering all males between the ages of 16-44 years who have been patients in Ontario Mental Hospitals, or who have been examined by Ontario Mental Health Clinics which was commenced in November, 1939, has been continued. This index now provides a complete record of all persons and is readily available in the event of enquiry by National Defence authorities.

2. SURVEY OF PUBLIC GENERAL HOSPITALS.

The Survey of Public General Hospitals in Ontario which was commenced in 1936 involved a review of general and financial statistics on hospitalization in the Province and an analytical study of the records of 70,000 hospital patients.

This survey was presented in four parts—*Part II*, “*General Statistics*,” and *Part III*, “*Financial Statistics*,” were issued in 1939. *Part IV*, “*Special Morbidity Studies*,” and *Part V*, “*Hospital Morbidity and Its Causes*” were issued in 1940. Part I which is to be a summary is nearing completion and will be available early in 1942.

3. CANCER STATISTICS.

(a) *Cancer Clinics.*

The collection and tabulation of statistical information concerning Cancer Control has been one of the foremost responsibilities. Arrangements were made with the seven Ontario Cancer Centres whereby the follow-up cards for all patients examined at the clinics during the year are forwarded to the Division for analysis. An Annual Report of the findings will be found on page 120 of the Annual Report of the Department of Health.

All deaths occurring among patients treated for cancer in the clinics were checked against the official death certificates by the Division. An effort has been made in this and other ways to assist the clinics to complete their follow-up of patients.

(b) *Cancer Morbidity.*

In view of the need for further information concerning the number of persons alive with cancer in a certain district during a given period, a survey of all diagnosed cancer cases in the County of Middlesex was made in 1940. Suitable forms were sent to all physicians and hospitals in the county with a request for further information concerning all cases of cancer (or probable cancer) which had been seen during the calendar year. All reports have now been received and the analysis is now in progress. Of the total of 698 cases of cancer seen, observed or treated during the year, 407 or 58 per cent. were seen for the first time in 1939. The rate per 10,000 population for the 698 cases amounts to 53.9. Cancer of the skin is the leading site with 23.6 per cent. of the cases, followed by cancer of the digestive tract 22.9 per cent., cancer of the breast 17.2 per cent., and cancer of the genital organs 15.3 per cent.

(c) *Cancer in Ontario Public Hospitals.*

An analysis of cancer cases treated in Ontario Public Hospitals during 1939, is now in process of completion. A total of 9,597 cases (including 4,891 cases of cancer and 4,402 cases of benign tumours) have been reported through the monthly hospital returns. When complete this survey will show the relation between site of cancer and age, sex, residence, first and re-admission, days stay in hospital, type of patient and mortality. It is expected that the results of this survey will be available in 1942.

4. SPECIAL PROBLEMS.

(a) *Insulin and Mentrazol Treatment in Ontario Hospitals 1937-1941.*

During the year the Hospitals Division undertook an analysis of the results of “Shock Therapy” in the treatment of the mentally ill. For a period of more than four years, over fifteen hundred patients in Ontario Hospitals were given one or more courses of this treatment. The tabulation and processing of this information was undertaken by the Division of Medical Statistics. A preliminary report has already been prepared. At the present time a follow-up of these same patients is in progress and it should be possible in the near future to arrive at a clearer and more definite appraisal of the value of these “Shock Therapies” in the treatment of the mentally ill.

(b) *Chief Causes of Death.*

Following the procedure of previous years, the Division has prepared a bulletin concerning the chief causes of death in Ontario for the year 1940. This bulletin was sent to the Medical Officers of Health in the larger communities throughout the Province. The data are appended to the present report: (See below.)

(c) *Miscellaneous.*

The Division also endeavours to assist other Divisions of the Department in respect to various requests for statistical information. It is significant that a large proportion of the work done by the Division takes the form of prompt and accurate replies to such requests. In addition to this the preparation of charts, diagrams, and maps for special purposes, constitute another type of useful statistical service. Such work is of recognized value to the other Divisions in dealing with their administrative, research and educational problems.

THE CHIEF CAUSES OF DEATH IN ONTARIO DURING 1940

The following tables are based on the official records of the Dominion Bureau of Statistics and show in summarized form the chief causes of death in Ontario for the year 1940.

A crude death rate of 10.23 per 1,000 estimated population is given for the year 1940, as compared with a rate of 10.00 per 1,000 population in 1939. Any interpretation of this slight increase should take into account the significant fact that the population of the province is slowly but steadily becoming older. That is to say, the proportion of the population in the older age groups: (60 and over) is increasing each year and the frequency and duration of illness is more pronounced in these age groups. This change in population structure is evident when a comparison of the proportion of deaths at various ages is viewed. The significant decrease among the earlier ages of deaths from tuberculosis, pneumonia and bronchitis, and also in infant mortality during the last few years, of course, tend to, but do not quite, balance the total rate.

Table I shows the twenty chief causes of death for the year. For each cause is shown the number of deaths recorded, the specific death rate per 100,000 population and the per cent. of all deaths due to the specified cause. When taken together, these twenty principal causes contributed 32,933 deaths or 85.5 per cent. of all deaths recorded for the year.

TABLE I.
CHIEF CAUSES OF DEATH—ALL AGES

ONTARIO—1940

Rank	CAUSE OF DEATH	Int'l List Numbers	Number of Deaths	Specific Death Rate*	Per Cent. of Total Deaths
1.	Diseases of the heart.....	90-95	8,546	227.1	22.2
2.	Diseases of the arteries.....	96-99	4,864	129.3	12.6
3.	Cancer (all forms).....	45-53	4,847	128.8	12.6
4.	Accidental causes.....	176-195	2,530	67.2	6.6
5.	Pneumonia and bronchitis..	106-109	2,080	55.3	5.4
6.	Nephritis.....	130-132	1,958	52.0	5.1
7.	Tuberculosis (all forms).....	23-32	1,011	26.9	2.6
8.	Idiopathic abnormalities of blood pressure.....	102	1,011	26.9	2.6
9.	Prematurity.....	159	952	25.3	2.5
10.	Cerebral haemorrhage, embolism and thrombosis....	82	901	23.9	2.3
11.	Diabetes mellitus.....	59	691	18.4	1.8
12.	Influenza.....	11	611	16.2	1.6
13.	Congenital malformations..	157	538	14.3	1.4
14.	Diseases of the prostate ...	137	486	12.9	1.3
15.	Suicide.....	163-171	340	9.0	0.9
16.	Hernia, intestinal obstruction.....	122	339	9.0	0.9
17.	Senility.....	162	339	9.0	0.9
18.	Ulcer of stomach and duodenum.....	117	325	8.6	0.8
19.	Anaemia (all forms).....	71	286	7.6	0.7
20.	Diarrhoea, enteritis and dysentery.....	13, 119 & 120	278	7.4	0.7
	Total.....		32,933	8.75†	85.5
	All other causes.....		5,570	1.48†	14.5
	GRAND TOTAL.....		38,503	10.23†	100.0

*Rates per 100,000 estimated population (3,763,000)

†Rates per 1,000 estimated population.

Diseases of the heart, arteries and kidneys together contributed 15,368 deaths or 39.9 per cent. of all deaths recorded for the province in 1940. The increase over the past number of years of these causes of death should be viewed with caution as a large percentage of the rise is due partly to improvement in the accuracy of diagnosis and partly to changes in the age structure of the population (See above).

Cancer in 1940 ranks third, one place below its position in 1939, although the number of deaths has increased from 4,567 deaths, a rate of 121.7 in 1939 to 4,847 deaths or a rate of 128.8 in 1940. One-third of all Cancer deaths occurred at ages under 60 years, and over 60 per cent. under 70 years. In this connection it is noteworthy that over 2,000 cancer cases are being treated each year in the seven Ontario Cancer Centres. Much can be accomplished, especially in cancer of certain sites, if diagnosis and established methods of treatment are effected promptly.

Accidents continue to contribute substantially to the annual death rate. In 1940, 2,530 deaths, a rate of 67.2 per 100,000 population, were classed to accidents. From age one to 19 years accidents rank *first* as a cause of death, and are exceeded only by diseases of the heart at ages 20-49 years. The fact that there is no disease which constitutes as common a *preventable* cause of death as do accidents makes it one of the most important problems in the health field to-day.

Respiratory Disease mortality showed a substantial decrease in 1940, due mainly to a marked drop in deaths from influenza. During 1939, 1,190 deaths were recorded to this disease with a specific death rate of 31.7 per 100,000 population, whereas in 1940 the figures dropped to 611 deaths, a rate of only 16.2 per 100,000 population. Deaths from pneumonia and bronchitis continue to show a decrease, there being 2,080 deaths, a rate of 55.3 per 100,000 population in 1940 as compared with 2,259 deaths or 60.2 per 100,000 population in 1939. Over 20 per cent. of all deaths from pneumonia and bronchitis were at ages under 5 years and 60 per cent. at age over 60 years.

Tuberculosis mortality continues to decrease. A new low for Ontario was reached in 1939 with 1,085 deaths from tuberculosis or a rate of 28.9 per 100,000 population. In 1940 a further decrease was recorded with only 1,011 deaths or a rate of 26.9 per 100,000 population. Of paramount importance is the fact that over one-half of all tuberculosis deaths were at ages 20-49 years and that 82 per cent. of such deaths occurred at ages under 60 years. At the beginning of the last war the recorded death rate from tuberculosis was 87 per 100,000 population while in 1940 the rate amounted to only 27 per 100,000 population. Simultaneous with the above reduction in mortality from this disease is the concentration of case finding and the hospitalization of patients for early treatment. The available bed accommodation in sanatoria has increased over 60 per cent. even in the last ten years. The Government's present provision for the maintenance of all patients in sanatoria, the recent pasteurization legislation and the operation of travelling clinics throughout the province, together promise a still further reduction of tuberculosis among the population. It should always be kept in mind, however, that tuberculosis still ranks high among those of earlier ages.

Prematurity. Of a total of 2,959 deaths of infants under one year of age, 952 or 32 percent. were attributed to this cause, illustrating the importance of further efforts to reduce the underlying factors responsible for premature birth. This is an increase of only 13 deaths over those of 1939.

Diabetes ranks eleventh in the list of chief causes of death with 91 per cent. of these deaths among persons 50 years of age and over.

Diarrhoea, enteritis and dysentery was recorded as the cause of 278 deaths during 1940. Nearly one-half of these deaths were of infants under one year of age. The rate of 7.4 per 100,000 population in 1940 shows a marked decrease when compared with the rate of 11.1 per 100,000 population in 1939.

In table II are presented the eight chief causes of death for various groups. In this table is given the number of deaths from each specified cause, the percentage of the deaths which were due to that cause, the number of deaths from a specified cause at all ages and the per cent. of all deaths from the specified cause which occurred in the specified age group.

TABLE II.
CHIEF CAUSES OF DEATH—CERTAIN AGE GROUPS
ONTARIO—1940

CAUSE OF DEATH	Deaths in in Age Group	Percent. of Deaths in Age Group Due to a Specified Cause	Deaths Due to a Specified Cause at All Ages	Percent. of Deaths Due to a Specified Cause in Age Group

Total for 1-8.....	13,663	81.6	26,737	51.1

Infancy. The decrease in infant mortality from year to year is striking. As recently as 1915 the loss of life among infants under one year of age stood at 74 per 1,000 live births. In 1940 this rate had decreased to only 43 per 1,000 live births. Perhaps one of the foremost improvements in public health is this reduction of infant mortality. Ontario has now one of the lowest infant mortality rates in the world. Leading causes of infant death remain the same—prematurity, congenital malformations, injury at birth and other diseases peculiar to early infancy contributed 65 per cent. of all deaths during the first year of life.

Pre-School Age. Accidental causes remain the leading cause of death in this age group there being 147 deaths or 24 per cent. of the total deaths for this group. Pneumonia and bronchitis increased over last year in this age group. In 1939 pneumonia and bronchitis deaths comprised only 14 per cent. of the deaths, whereas in 1940 the percentage amounted to 20 per cent.

School Age. Accidental causes again is the leading cause of death for this age group (5-14 years). Acute rheumatic fever which last year was fifth on the list and contributed 4.7 per cent. of the deaths, advanced to second on the list for 1940 with 7.0 per cent. of the total. Appendicitis dropped from second place in 1939 to fifth place in 1940, the percentage being for each year respectively 8.1 per cent. and 5.4 per cent. Of striking importance is the fact that accidental causes equalled the sum of the deaths from acute rheumatic fever, tuberculosis and pneumonia and bronchitis.

Adolescence. The three leading causes of death for this age group are accidental causes, tuberculosis (all forms) and diseases of the heart. In the case of accidental causes, an increase of 6.4 per cent. over last year is noteworthy. Tuberculosis comprised only a fraction of a percentage less (0.2 per cent.) of the total deaths for this group, than last year. The increase of diseases of the heart for 1940 (6.1 per cent.) over 1939 (3.7 per cent.) is striking. Other causes in order of importance were appendicitis, pneumonia and bronchitis and diseases of the puerperal state.

Ages 20-49 years. Diseases of the heart is the leading cause of death for the age group 20-49 years with 775 deaths and 15.1 per cent. of the total deaths for this particular age group. Accidental causes followed a close second with 13.8 per cent. of the deaths. Cancer, too often regarded as a disease of later life, was responsible for 13.0 per cent. of the deaths in this age group. Tuberculosis ranks fourth as a cause of death for this group, contributing 515 deaths or 10.0 per cent. of all deaths at these ages.

Ages 50 and over. In the age group 50 and over, diseases of the heart, arteries and cancer assume the greatest prominence. Over one-quarter of all deaths at ages 50-59 years were due to diseases of the heart. Cancer contributed over one-fifth of all deaths at ages 50-59 years. At ages 60-69 years and 70 years and over, diseases of the heart were responsible for 30 per cent. and 26 per cent. respectively of all deaths at these ages. Cancer deaths at ages 60-69 years amounted to 17.6 per cent. of all deaths at those ages. At ages 70 years and over, diseases of the arteries contributed 22.6 per cent. of the deaths, and were second only to disease of the heart (25.9 per cent.).

This review on the mortality picture in Ontario during 1940 is intended to bring out certain of the more important highlights in the public health field. Especially noteworthy during 1940 were:—

- (A) A new low in the tuberculosis death rate—26.9 per 100,000 population.
- (B) A new low in the infant mortality rate—43.2 per 1,000 live births.
- (C) A new low in the pneumonia and bronchitis death rate—55.3 per 100,000 population.

THE LIBRARY OF THE DEPARTMENT OF HEALTH

FREDRITA HENLEY WRIGHT, *Librarian.*

The second year of war has brought increased opportunities for service to the Library. Administrative problems, changing techniques in the prevention and control of disease, development of industrial health services and all branches of civilian defence, including nutrition, have been chief among the subjects for which information has been requested. In our attempt to keep our files up to the minute we have endeavoured to secure copies of pertinent and authoritative reports immediately upon publication.

In reviewing the year, we feel gratified that the Library has been able to make such a valuable contribution to the war effort.

The regular work of servicing the various departmental divisions and personnel has been continued.

ACCESSIONS

During 1941 the following accessions were made:

CENTRAL LIBRARY

Books purchased.....	68
Journals.....	144 vols.
Reports.....	106
Pamphlets.....	1,337
	1,655

Subscriptions to journals for the year numbered 100; while the library received 23 complimentary subscriptions; a total of 123.

ONTARIO HOSPITALS

Books purchased	
Medical and Air Raid.....	145
Fiction	
New.....	56
Library discards.....	410
Journal subscriptions.....	101
Year Books.....	9
Periodicals	
New (subscriptions).....	128
Unsold copies.....	8,175 approx.
Newspapers (subscriptions).....	90
	9,124

LOAN SERVICE

There were 5,509 loans made by the Central Library during 1941, an increase of 112 over the previous year when the loans reached a total of 5,397. Within the immediate Department requests for loans reached a total of 4,428. To the outside service the Central Library forwarded 1,081 references. The loan service from the Central Library is extended to: Physicians, Nurses, Occupational Therapists and Dietitians connected with the hospital administration; the Directors and staffs of the Mental Hygiene Clinics; and the Directors and staffs of the Branch Laboratories.

CIRCULATION OF JOURNALS

The regular circulation of journals was maintained during the year. Journals were circulated to the Clinicians in charge of the Provincial Travelling Chest Clinics at Belleville, Ottawa, Fort William and Timmins and to the Tuberculosis Unit at the Ontario Hospital, Woodstock.

Journals containing articles dealing with metrazol in the treatment of schizophrenia were circulated, immediately upon receipt, to those Ontario Hospitals doing special work on this disease.

The Branch Laboratories also received a regular circulation service. Scientific and medical journals on cancer research were forwarded regularly to the Ensol Laboratory at Kingston.

PATIENTS' LIBRARIES

The interest of the Central Library in procuring reading material for patients in the Ontario Hospitals was continued during 1941. In this endeavour the following literature was placed at the disposal of the patients.

Books: The Central Library purchased 410 library discards and 56 new books which were shipped to the Ontario Hospitals.

Periodicals: The Central Library placed 101 annual subscriptions to periodicals for the exclusive use of the patients. Arrangements were also made with a Toronto news agency for the purchase of unsold periodicals, upon special terms. Under this plan approximately 8,175 copies were delivered to the patients' libraries.

Newspapers: The Central Library placed 90 subscriptions to various Provincials newspapers for the sole use of the patients. In addition 3,300 unsold copies of papers were donated to the patients through the kindness of Toronto publishers who delivered them to the Central Library where they were apportioned and re-shipped to the hospitals.

ONTARIO HEALTH OFFICERS' ASSOCIATION

The Central Library again presented an exhibit at the Annual Convention of the Ontario Health Officers' Association. Books on all phases of public health work were selected from the shelves of the Central Library. Public Health pamphlets and other literature, issued by the Department, were also exhibited, thus enabling the members to make a note of the publications they may need at a future date.

The library exhibit is planned particularly to give assistance to Medical Officers, Public Health Nurses, Public Health Engineers and Sanitary Inspectors in making a selection of reading material pertaining to their particular spheres of interest, and to give them an opportunity to examine the latest references.

The exhibit drew considerable interest and appreciation was expressed as to its value as a source of information.

DIVISION OF EPIDEMIOLOGY

H. A. ANSLEY, M.B., D.P.H., *Epidemiologist*

SECTION 1. ANNUAL SURVEY, 1941.

During 1941, thirty-one communicable diseases have been reported by the municipalities throughout the Province. Through the co-operation of the Armed Forces stationed in Ontario, all cases of communicable diseases are included in the weekly reports.

Of the major communicable diseases, Cerebro-Spinal Meningitis has shown a marked increase. Epidemics of this disease have long been associated with crowded living conditions, more particularly true under war conditions. Its association with war has been synonymous. The past year's experience in Ontario, however, has not presented the usual picture of epidemics amongst troops. The increased incidence has been amongst the civil population.

A higher trend in Diphtheria incidence noted in 1941 has been due in great measure to an epidemic in the Air Force at St. Thomas, where forty cases were reported before the outbreak was under control. The Scarlet Fever increase, likewise, was associated with outbreaks amongst the armed forces.

Twenty-one cases and two deaths from psittacosis were reported during the year. Seven of the cases had occurred during the latter part of 1940, and were only confirmed in 1941, following the positive report of a laboratory examination of blood from a patient. This Virus Disease is spread through contact with Psittacine birds; and due to the increased popularity of the birds in the Province, an outbreak appeared imminent amongst those exposed. With this in view, remedial steps were immediately taken to control the traffic in birds, with increased powers of regulation over the breeding and sale.

There was an increase in the number of cases of Poliomyelitis in 1941 over the corresponding period of last year. One-third of the cases reported in 1941 occurred in the counties of Huron and Bruce. The virus of Poliomyelitis has now been isolated from the stools of patients and from sewage. In one municipality in Ontario, specimens of stools were collected from abortive cases, contacts and controls (persons living in the area and having no contact with the cases or their contacts). Flies were also trapped in this area, and submitted for examination. The stool samples from the controls were submitted to Dr. Craigie, at the Connaught Laboratory, and the Poliomyelitis virus was recovered in the pooled sample. The importance of this work should materially aid further efforts to be made in the protection of food, especially during the summer months.

Enteric Disease again presented a lowered trend for 1941. For the past three years, the mortality rate for Typhoid Fever in Ontario has been less than 1 per 100,000, and the morbidity rate likewise has been exceptionally low. Two small outbreaks, of seven cases each, occurred during the year in rural areas; and epidemiological investigations point to contamination of well water as the cause. One outbreak of Paratyphoid Fever occurred during the year. There were no deaths. Both water and dairy products were eliminated. The cause was undetermined. Twelve Typhoid and Paratyphoid Fever carriers were discovered during the year, following epidemiological investigation of single cases of Typhoid Fever.

Requests from the Air Force for assistance in the control of communicable diseases were received and complied with. Two outbreaks of Scarlet Fever and one of Diphtheria occurred. However, these were controlled without any disruption of the air training plan, and before the disease spread to local municipalities.

TABLE I
CEREBRO-SPINAL MENINGITIS

Year	Cases	Deaths	Morbidity Rate	Mortality Rate	Case Fatality Rate
1937	67	27	1.8	.5	28.
1938	88	22	2.3	.3	15.
1939	64	18	1.6	.2	17.
1940	145	29	3.	.7	18.6
1941	501	71	13.3	1.9	14.

The morbidity rate for Cerebro-Spinal Meningitis has shown an increased incidence, world-wide in scope. The rising trend was commenced at the beginning of the war and was more evident in the European countries. Cerebro-Spinal Meningitis has not been epidemic in the army in Ontario, as compared with the 1916-18 period. The disease has been reported from all areas in the Province. When it became evident early in 1941 that the disease might reach epidemic proportions, a conference of health officers was held. It was decided to enforce quarantine of all breadwinners in households where cases had been reported. In a follow-up study of the cases, we have found not more than one case of the disease to a household. Case to case contact was unknown. There were no epidemics in schools, factories, or amongst the armed forces. The cases appeared sporadically in many municipalities. No one area appeared to be free.

TABLE II
DIPHThERIA

Year	Cases	Deaths	Morbidity Rate	Mortality Rate	Case Fatality Rate
1937	506	39	13.	1.5	7.7
1938	234	12	6.	.3	5.1
1939	131	10	3.5	.2	7.6
1940	78	12	2.	.3	15.3
1941	200	13	5.3	.3	6.5

Over thirty per cent. of the cases of Diphtheria reported during 1940 were due to the outbreak of the disease at the Technical Training School at St. Thomas. The outbreak commenced early in April, when a request was made for aid in the control of an outbreak of sore throat. About eighteen of the cases were diagnosed as Diphtheria, and the school was immediately quarantined. The local medical officers in the district were notified. All men in the school, over 5,000, received a Schick and a reaction test, and nose and throat swabs were taken. All men susceptible to Diphtheria received one thousand units of Antitoxin, and also Diphtheria Toxoid. Fifty-five per cent. of the men were found to be susceptible to Diphtheria. Following this outbreak, a circular letter was sent to all Medical Officers in the Province, stressing the importance of Toxoid. The response was very satisfactory, and the demand for Toxoid during 1941 has exceeded previous years.

TABLE III
SCARLET FEVER

Year	Cases	Deaths	Morbidity Rate	Mortality Rate	Case Fatality Rate
1937	5581	50	154	1.3	.8
1938	5359	50	144	.3	.8
1939	6767	51	180	1.3	.7
1940	5696	26	151	.5	.4
1941	8155	20	216	.5	.25

The case fatality rate in Scarlet Fever has reached a new low. During the past five years, the death rate from Scarlet Fever is comparable to that of Measles. Early in 1941, outbreaks of the disease appeared amongst two units of the Air Force. In both units, the outbreak was accentuated by overcrowding, and the outbreak threatened to disrupt their training. Immunization against Scarlet Fever was suggested as a means of control.

POLIOMYELITIS

In 1941, 140 cases of Poliomyelitis were reported in the Province, a slight increase over the low incidence of 1940. The weekly incidence followed the median trend, with the exception of two weeks, the thirty-fifth and thirty-sixth.

An outbreak occurred in the Province of Manitoba during 1941, and seven cases reported from Northern Ontario in August and September had been visiting in this Western Province prior to their illness.

Forty-eight of the cases reported during the year developed in the counties of Huron and Bruce. Special epidemiological investigation was carried out in one municipality with the co-operation of the Medical Officer of Health. The final result of the investigation has not been completed. However, it was established that the poliomyelitis virus may be carried in the feces of persons who have had no contact with the cases; and the possibility of spread in this manner should not be overlooked. Adoption of sanitary methods applied to food handling, protection of food against flies, elimination of their breeding places. Sanitary disposal of garbage and night soil. Warning against bathing in questionable waters.

The generous policy of the Government of providing three weeks of free orthopedic care for paralyzed cases of Poliomyelitis, was taken advantage of by fourteen per cent. of the patients. Fifty-one patients, or 36.4% received the free splints and frames.

TABLE IV
TYPHOID FEVER

Year	Cases	Deaths	Morbidity Rate	Mortality Rate	Case Fatality Rate
1937	241	27	6.4	.7	11.2
1938	235	34	6.2	.9	14.2
1939	119	17	3.1	.4	14.3
1940	159	26	4.	.6	16.2
1941	133	8	3.5	.2	6.

Typhoid Fever, during the past five years, has maintained a very low incidence. In this five-year period, the mortality rate has constantly remained at a low level. During this period, there has been less than one death per hundred thousand of the population.

Two small outbreaks occurred during the year, which accounted for less than ten cases each and were in rural municipalities. Epidemiological investigation pointed to contaminated wells as the direct cause, as there was lack of evidence in both instances as to carrier infection.

Twelve carriers were discovered during the year, as a result of the investigations carried out on each case. Each of the carriers found had been responsible for only one case of Typhoid Fever and Paratyphoid Fever.

WHOOPING COUGH

No. of Cases—7,229.

No. of Deaths—25.

The incidence of Whooping Cough in 1941 has shown a definite increase over the corresponding period of 1940. However, it did not reach the peak of either 1936 or 1938, the two previous outbreak years. The distribution of cases was general throughout the province, and during the year enough Pertussis Vaccine was distributed to immunize over thirty-six thousand children. Many municipalities are now including this vaccine in their pre-school immunization plans.

PSITTACOSIS

Early in 1941, Psittacosis was reported in Ontario, following the confirmation of a specimen of blood from a suspected case. Epidemiological investigation followed other suspect cases, with the result that over 80 of these cases were studied. Twenty-one cases and two deaths were confirmed. Many of the cases developed amongst dealers in Psittacine birds and among recent purchasers of a bird known as the Budgerigar. Important changes were made in the regulations governing the breeding, sale and registration of Psittacine birds in the province.

SECTION 2: LOCAL HEALTH ADMINISTRATION

The staff of the Division of Epidemiology continued to contribute to the work carried on through the office of the Chief Medical Officer of Health. During the year, the addressograph service was maintained by this Division for the purpose of circularizing the Medical Officers of Health (approximately 700) and Secretaries of the local Boards of Health (approximately 900) with information relative to public health administration and procedure. Technical aid was given to the preparation for printing of the Annual Personnel Book, which presents information regarding the changing of Personnel of local Boards of Health and of the Provincial Department of Health.

The forms for the Annual Report of the local Medical Officers of Health were prepared and distributed by the Division to all organized municipalities (901) during December of this year.

SECTION 3. DISTRIBUTION OF LITERATURE

The following table shows the distribution of literature by this Division during the past year:

INFECTIOUS DISEASE LITERATURE	No. of Forms Distributed	Recording Forms	No. of Forms Distributed
Regulations and Amendments.....	420	Diphtheria—	
Diphtheria.....	10,104	Recording Forms.....	535
		Consent Cards.....	39,060
		Certificates.....	39,115
Scarlet Fever.....	17,504	Scarlet Fever—	
		Recording Forms.....	273
Immunization Folder..	15	Consent Cards.....	8,335
		Certificates.....	6,470
		Smallpox—	
		Consent Forms.....	26,741
		Certificates.....	21,044
		Typhoid Certificates...	200
		Immunizations Cards (Combined form).....	4,755
Total.....	28,043	Total.....	146,528
	Total.....		174,571

As shown by the above table, there was an increase over last year in the distribution of literature of approximately 74,000 pieces.

During the year, the pamphlet, "Prevention of Diphtheria" was revised and this literature was distributed in large numbers to the municipalities requesting it, for assistance in their immunization programmes.

SECTION 4. DISTRIBUTION OF BIOLOGICAL PRODUCTS AND INSULIN

The statistical data relative to the amount and cost of distribution for the fiscal year, April 1st, 1940, to March 31st, 1941, as well as comparative costs for distribution for the past 14 years are presented in tabular form at the end of this Report (Tables VIII to XIX).

BIOLOGICAL PRODUCTS

The supply of Biological Products and Insulin is a joint responsibility of the Division of Laboratories and this Division—the former providing for storage and mailing, and the latter for all the purchasing, record-keeping and accounting. In the case of Insulin, this also includes the preparation and mailing of quarterly accounts to an average of seven hundred municipalities.

During the year the Department continued to supply free biological products through the thirteen distributing centres, i.e.; central laboratory and eight branches (including the subsidized branch laboratory at Belleville, opened October 1st); the offices of the local Departments of Health at Brantford, Hamilton, Owen Sound and Windsor.

The biological products so distributed through the physicians as a service to the public are for:

(a) The PREVENTION of disease by ACTIVE immunization: Diphtheria Toxoid; Scarlet Fever Toxin; Smallpox, Rabies, and Pertussis Vaccines.

(b) TREATMENT of cases: Diphtheria, Scarlet Fever and Tetanus Antitoxins; Anti-meningococcus and Anti-Anthrax Serums.

(c) The TESTING of susceptibility or immunity; Schick and Dick Test material and Tuberculin.

The distribution of Pertussis Vaccine on a Province-wide scale was continued with an expenditure of \$25,532.50 for this product for the calendar year, an increase of \$7,332.50 over the year 1940.

TUBERCULIN—for diagnostic purposes in the control of Tuberculosis was distributed as in former years. (See Tables XVIII and XIX).

The purchase of Typhoid-Paratyphoid Vaccine was undertaken by the Division in May of this year. 3,500 vials were distributed at a cost of \$1,260.00.

INSULIN

The Department of Health provides free insulin to those persons in whose treatment this product is required and who would otherwise be deprived of it. Diabetic patients able to pay for Insulin are not supplied by the Department.

While the provision of insulin is free to those unable to pay for it, 25% of the cost is charged to the Local Municipality, the Department paying the remaining 75%. Municipalities are liable for this payment as soon as patients take up residence and make application for free insulin. While this re-allocation of total costs in part to the local authorities which was first begun in 1935-36 has resulted in a marked increase in cost-accounting by this Division, because of the necessity for sending out quarterly accounts to an average of seven hundred municipalities, still the fact that this re-allocation has resulted in a 45% reduction in the cost of distribution of Insulin seems sufficient justification for the work required.

Insulin was distributed throughout the Province to 4,047 indigent patients in the fiscal year 1940-41 and was again supplied to Ontario Mental Institutions for Shock Therapy.

DIVISION OF VENEREAL DISEASE CONTROL

W. H. AVERY, M.D., *Consultant.*

During the years previous to the outbreak of war, there developed a wide-spread realization, by the public and the medical profession, of the importance of adequately treating and controlling the venereal diseases. There is no question that syphilis and gonorrhoea constitute one of the major public health problems of the day. In time of war, the problem is greatly magnified. With a view to co-ordinating the efforts and providing leadership throughout the Province, the Division of Venereal Disease Control was re-organized and enlarged.

At the beginning of 1940, a system of central reporting of venereal diseases was adopted. The increased secrecy resulting from this system of reporting was reflected in an increase of 70.6% in the number of cases reported within a year. This improvement in reporting cases of syphilis has continued during the year 1941, as shown below:

No. of Cases of Venereal Disease Reported	(Aver.) 1937-1939	1940	1941
Syphilis.....	2,909	4,953	7,484
Gonorrhoea.....	3,931	4,218	5,293

In the two years since the institution of central reporting, 12,437 cases of syphilis, and 9,511 cases of gonorrhoea, have been reported to the Division.

While there is a general impression among those interested that there has been a considerable increase in the incidence of venereal disease during the past year, the lack of any adequate statistics in the past makes it impossible to arrive at a definite conclusion at this time. It is undoubtedly true that the greater interest on the part of physicians and the general public, and a more effective administration of control measures, are bringing to light many cases that would have previously escaped notice.

The reporting of cases of gonorrhoea still leaves a great deal of room for improvement. During the past year the use of the sulphamide group of drugs has become universal by physicians in the treatment of this condition. Newer preparations of this class of drugs have resulted in increased efficiency and fewer unfavourable reactions, so that numerous reports from medical literature have indicated that a high percentage of the cases of gonorrhoea are apparently cured within a very few days. The rapid disappearance of clinical signs makes it extremely difficult for physicians to keep their patients under observation, with the result that many cases are never reported. In the case of female patients, the difficulties of diagnosis of gonorrhoea are greatly increased by the use of the above class of drugs. It quite frequently happens that in women patients, who clinically present signs and symptoms of gonorrhoeal infection, no definite laboratory diagnosis can be made.

The use of cultural examinations for the gonococcus, in addition to ordinary smear examination, has been found to be of considerable value, and has been urged by this Division wherever possible. Unfortunately, facilities for such cultural examination are available in only the larger centres throughout the Province. A study of the laboratory reports and of the specimens submitted by doctors would indicate that there is need, not only of better diagnostic facilities than are at present available, but also a greater care, on the part of the physicians, in taking the specimens for examination.

During the past year, an attempt was made to determine the percentage of cases of syphilis reported to the Department by various agencies. For this purpose, 2,080 cases reported during the four months from Aug. 26th, to December 26th, 1941, were analyzed as follows:

Reported by private physicians.....	1194 cases or 57.4%
Reported by Venereal Disease Clinics.....	622 cases or 29.9%
Reported by Dept. of National Defence.....	133 cases or 6.4%
Reported by Hospitals, Gaols, Reformatories.....	131 cases or 6.3%

A further analysis of the above 2080 cases of syphilis showed:

Early Syphilis (under 2 years' duration).....	801 cases or 38.5%
Neurosyphilis.....	139 cases or 6.7%
Late, Latent, Tertiary, Congenital Syphilis.....	1140 cases or 54.8%

The following table shows, by counties, the number of cases of venereal disease reported throughout the Province. The figures given cannot be taken as an indication of the incidence of venereal disease in each of these sections; such factors as concentration of population, local health organizations, and the interest and co-operation on the part of the physicians enter into the pictures.

County	Syphilis	Gonorrhoea

The policy adopted by the Department of attempting to ensure adequacy of treatment in the early cases of syphilis, which are a danger in the community, and in late cases, for the prevention of disabling end-results of the infection, is justified by the statistics given on the above tables. The measures taken to put this policy into effect, during the past year, may be summarized as follows:

1. Changes in *The Venereal Diseases Prevention Act* and Regulations provided that the patient suffering from venereal disease must remain under treatment until he has received a satisfactory amount.

Provision was also made that, in certain classes of patients, examination might be carried out, not only to determine the presence of venereal disease but also the extent.

2. The venereal disease clinics, in various centres throughout the Province, were informed of the Departmental policy and their co-operation enlisted in putting it into effect. Emphasis was placed upon the advisability of examining the spinal fluid in every case of syphilis at some stage of the course of treatment. This is now being done in all of the venereal disease clinics and a considerable number of cases of neurosyphilis have thus been discovered and placed under adequate treatment in their pre-clinical stage.

Arrangements were made with the Council and Board of Health, of Timmins and a new venereal disease treatment clinic opened there about May 1st, 1941. This is apparently meeting a real need in the community and has gained the support and co-operation of the medical profession, the municipal authorities and the patients.

3. In line with the thought that the greatest degree of success in discovering and continuing under treatment would come only from the helpful interest and co-operation of the medical profession, the Department has made available to physicians free drugs for the treatment of their cases of syphilis, whenever they request the same. This has resulted not only in better reporting of cases of syphilis but has enabled the Department to prevent a considerable wastage of drugs brought about by the physicians ordering more than they were in a position to use within a reasonable time.

A pamphlet was prepared and distributed to all physicians in the Province, outlining general suggestions, according to modern thought, for the treatment of their cases of syphilis. This was very well received by the profession and requests for additional copies have been frequently received.

An attempt has also been made to give advice or provide consultation service to those physicians who seek assistance with their venereal disease problems.

From time to time during the year, physicians have been asked to complete progress reports on the cases of syphilis under their care. In general, it may be said that this request has met with splendid co-operation on the part of the profession. It has also enabled us to gain some idea as to the type of treatment the patients are receiving and has been of invaluable help in the follow-up of delinquent patients. An analysis was made of 4,136 of such progress reports received from private physicians, and may be summarized follows:

- 2,274—are receiving apparently adequate treatment.
- 103—indicate patient was considered cured.
- 23—Indicate patient was considered too ill or too old to require further treatment.
- 695—discontinued treatment against the advice of their physician.
- 569—transferred to another doctor.
- 34—enlisted in the armed forces.
- 69—moved out of the Province.
- 56—died.
- 14—were re-reported as not having syphilis.
- 220—were reported as lost.

4. The institution of artificial fever therapy for patients suffering from neurosyphilis in the Ontario Hospital in 1939 was extended to certain general hospitals during 1940. This policy has been fully vindicated during the past year and new fever clinics, or additional fever cabinets, supplied to

various centres at their request. At the present time, there are 13 fever clinics operating 22 fever cabinets, exclusive of the original clinic at the Ontario Hospital, Toronto, where 5 cabinets are operated daily. The fever clinics in the general hospitals treated 272 cases of asymptomatic and early clinical neurosyphilis, giving a total of 12,663 hours of fever over 105 degrees F. In the Ontario Hospital, Toronto, 111 patients received 5,447 hours of fever over 105 degrees F.

5. This Division has maintained the closest possible co-operation with the medical officers of the armed forces in their attempt to control venereal disease. Whenever sources of infection or contacts are reported, the Division follows them up through the local health officials and makes every effort to see that they are examined and, if necessary, placed under treatment. Some difficulty has been encountered because of the frequent reports from military sources which give insufficient data for the identification of the individual. In some cases, too, the difficulties encountered in making a diagnosis of gonorrhoea in female patients have prevented action which might have been felt to be advisable.
6. The Division has also put into effect an educational programme, which is designed to arouse the public to a sense of the importance of these venereal disease problems, and to make them conscious of the fact that they may touch the life of any member of the community. Posters and pamphlets have been prepared for distribution to suitable groups throughout the Province, emphasizing the dangers of venereal disease and the necessity for prompt and adequate treatment.
7. The following is a statistical analysis of the work in the special treatment clinics throughout the Province:

Total number of patients attending clinics at December 31st, 1940.....	5,634
Total number of patients attending clinics at December 31st, 1941.....	5,332
Total number of treatments given for syphilis.....	117,031
Total number of treatments given for gonorrhoea.....	19,823
New cases (never previously treated in clinic)	2,025
Syphilis.....	1,053
Gonorrhoea.....	876
Double Infection.....	96
Number of cases re-admitted for treatment.....	669
Syphilis.....	446
Gonorrhoea.....	212
Double Infection.....	41
Number of cases previously treated.....	910
Syphilis.....	730
Gonorrhoea.....	166
Double Infection.....	14
Classification of new and previously treated cases of syphilis.....	1,608
Primary.....	312
Secondary.....	459
Tertiary.....	837
Classification of new and previously treated cases of gonorrhoea.....	1,062
Under 1 month.....	813
Under 2 months.....	114
Over 2 months.....	135
Total number of patients discharged from clinics.....	3,819

Number discharged apparently cured.....	2,007
Syphilis.....	726
Gonorrhoea.....	1,150
Double Infection.....	131
Number discharged without permission.....	883
Syphilis.....	648
Gonorrhoea.....	207
Double Infection.....	28
Number transferred elsewhere for treatment.....	929
Syphilis.....	710
Gonorrhoea.....	180
Double Infection.....	39
Number of cases referred to Medical Officer of Health.....	1,541
Sources of infection.....	237
Contacts.....	1,133
Non-attendance.....	171
Number of cases placed under Venereal Diseases Prevention Act.....	341
Number of cases prosecuted under Venereal Diseases Prevention Act.....	104
Total number of out-patient treatments.....	124,762
Syphilis.....	107,311
Gonorrhoea.....	17,451
Total number of in-patient days.....	10,749
Syphilis, 976 patients.....	8,114 days
Gonorrhoea, 252 patients.....	2,635 days

The work of the artificial fever therapy clinics for 1941, has been analyzed and is outlined on the attached chart, together with the comments of the Directors of fever therapy regarding their findings with this type of treatment:

Interpretation of abbreviations on table:—N/S, neurosyphilis; S, syphilis; GC, gonorrhoea.

CLINIC	No. Hours over 105°	Total number of cases treated				Remarks by Directors of Fever Therapy
		N/S	S.	GC.	Others	
St. Michael's Hospital	2692	52	16	3	Results have been most justifying. Complete relief of symptoms common. Marked improvement, especially in those cases showing slight mental aberrations. One case luetic optic neuritis with almost complete loss of vision, regained his vision.
Toronto Western Hospital..	1662	32	6	3	These people all feel better, eat better, walk better, sleep better, and some have been able to return to work. One case of interstitial keratitis responded to fever much better than any other form of treatment.
Women's College Hospital.. (Toronto).	1113¼	19	5	4	1	Have reason to feel very encouraged regarding future of fever treatment for neurosyphilis. Results have included improvement in vision, increase in mental stability, improvement in physical condition with disappearance of headaches, ataxia, and disturbance of vision.
Hamilton General Hospital.	902	21	3	Results were very good in 18 of the 21 cases of neurosyphilis treated. In the symptomatic cases, there was a decrease in symptoms and in some, complete amelioration of symptoms. All these patients are now working. In asymptomatic cases all the patients felt better than they had for years and showed an increase in their efficiency at work. In gonococcal arthritis, the result was spectacular with complete cure. I consider that fever cabinets in general hospitals are the answer to the problem of decreasing the number of neurosyphilis that eventually need treatment in Provincial institutions.
Ottawa General Hospital...	804	12	1	28	7	One case of progressive optic atrophy completely arrested. 5 cases of asymptomatic neurosyphilis now show negative spinal fluid. Gonorrhoeal arthritis, all recent cases, cured—old cases showed some improvement. Chorea cases cured inside of three weeks.
Ottawa Civic Hospital	1058	29	28	7	Of 29 cases of neurosyphilis treated, 20 are apparently cured and able to return to work. 28 cases of gonorrhoea and complications treated, 24 cured. Of 6 cases of syphilitic eye conditions, 5 were cured.

CLINIC	No. Hours over 105°	Total number of cases treated				Remarks by directors of Fever Therapy
		N/S	S.	G.C.	Others	
St. Joseph's Hospital (Sudbury).	197½	6	Clinic operating only 1 month. 2 patients with early neurosyphilis say that they feel much better and are now able to work without becoming tired. Patients who have had a couple of treatments are very willing to return for more.
Victoria Hospital (London).	1341½	22	11	10	In asymptomatic neurosyphilis, serological reversal and apparent cure have resulted in all cases. In early active paresis, clinical improvement has been immediately apparent. In tabes, relief of pain, vomiting and bladder disturbances have been striking. All cases of chronic gonorrhoea, resistant to all other forms of treatment have been cured.
Belleville General Hospital.	.607¾	7	14	1	Excellent results in cerebrospinal lues. 1 case of chorea responded remarkably well. Several cases of acute gonorrhoea responded very well.
Ontario Hospital, Toronto. (mental institution).	5447	111	Of 111 patients admitted suffering from paresis, 70 were able to take an adequate amount of fever therapy. 35 of these improved sufficiently to be released from hospital and 31 of these are now self-supporting. 25 others showed improvement, but so far not enough to warrant release. 1 showed no change.
Toronto General Hospital...	1781¼	51	27	
Kingston General Hospital.	309	9	3	
Burwash Industrial Farm..	194¾	6	4	
Total.....	18110	377	6	137	39	

DIVISION OF MATERNAL AND CHILD HYGIENE

J. T. PHAIR, M.B., D.P.H., *Director.*

Since the inception of the practice of requesting specific information from private physicians and from hospital authorities in respect to all deaths associated with pregnancy, this Division has periodically reported in some detail on the trend of certain presumably significant factors in respect to maternal mortality. While the Department is appreciative of the fact that such deaths still occur with a greater frequency than would appear to be warranted, it is gratifying to be able to report the rate for 1940 (the last available figure) to be the lowest in the history of the Province, namely, 3.7 per thousand living births. It is the hope of this Division that the aforementioned practice of continually asking for additional information on deaths occurring among pregnant women has had some effect in stimulating greater interest in the assumption of the maximum of potential responsibility by the profession in these cases. The following table presents a picture of the causes of death over the last eight years, as well as the rates in each group of causes:

CAUSE OF DEATH	1933-1937		1938		1939		1940	
	%	Rate	%	Rate	%	Rate	%	Rate
Abortion with Sepsis.....	11.8	0.64	10.4	0.40	15.2	0.65	12.9	0.48
Abortion without Sepsis.....	3.5	0.19	3.6	0.14	3.6	0.15	3.9	0.14
Ectopic Gestation.....	3.7	0.20	4.4	0.17	3.9	0.17	3.5	0.13
Puerperal Haemorrhage.....	11.4	0.61	8.8	0.34	13.8	0.59	9.9	0.37
Puerperal Septicaemia.....	20.7	1.10	19.9	0.76	18.1	0.78	13.7	0.51
Puerperal Albuminuria and Eclampsia.....	18.9	1.01	17.9	0.69	15.2	0.65	22.0	0.82
Other Toxaemias of Preg- nancy.....	5.3	0.28	3.6	0.14	4.7	0.20	5.9	0.22
Puerperal Phlegmasia Alba dolens, Embolism, etc.....	10.7	0.57	16.3	0.63	15.9	0.69	18.5	0.69
Other Accidents of Childbirth	11.6	0.62	13.9	0.55	7.6	0.3	7.5	0.27
Other Conditions.....	2.5	0.13	1.2	0.05	1.8	0.08	1.9	0.07

It will be noted from the above table that the toxaemias of pregnancy head the list of causes both in the percentage of the total maternal deaths as well as in the rate for each cause. With the present state of medical knowledge it is evident that deaths from toxaemia cannot be entirely prevented; however, a very large proportion of them might not have occurred had these women been fully appreciative of the vital necessity of seeking medical advice early in pregnancy, and co-operating scrupulously with the physician of their choice throughout the pre-natal period. While the percentage of deaths from puerperal phlegmasia alba dolens and embolism appears to be increased, the rate continues to be about the same over the period of years under review. It is generally conceded that thrombosis and embolism are usually the results of infection and, in so far as infections are preventable, thrombosis and embolism are preventable. The fact that there is little in the way of reduction in the death rate from these conditions continues to present a challenge to all those in the field of preventive medicine. The more or less dramatic results from the widespread use of the drugs of the sulphamide groups in infections are reflected in the appreciable lowering of the incidence of maternal deaths from septicaemia. While this type of infection still constitutes a major obstetrical problem, there is every hope that a further reduction will be brought about as the administration of this type of chemotherapy is more fully understood.

Another interesting approach to the problem of lessening maternal morbidity and mortality is opened up by a recent report of a study made in Toronto. This study, conducted by the Departments of Paediatrics and Obstetrics of the University of Toronto, was undertaken in order to determine the effect of poor and good pre-natal diets upon the outcome of pregnancy and condition of the infant during the first months' of life. Some 400 women in the low income brackets comprised the group studied; these were divided into three groups: one found to be on a poor diet was left as a control; a second group had their diet supplemented with additional food and vitamins; the diet of a third group found to be conforming reasonably well to good pre-natal diet was improved by education alone. It was observed that during the pre-natal period there were more cases of anaemia, toxæmia and threatened miscarriage in the poor diet group, and that the total number of complications in this group was almost double that of the others. This experiment lends further weight to the significance of the role played by nutrition in the health of the people as a whole.

The stillbirth rate is slightly reduced for the year 1940, the rate being 28.9 per 1,000 total births. This is the lowest rate recorded for the last 20 years. In this respect the Toronto experiment referred to in the previous paragraph is also of interest, their observation being that the incidence of miscarriages, stillbirths and premature births in the women on poor diets was much increased over the better fed groups. This comment on the lessening of premature births is of particular interest in view of the marked change in significance of certain causes of infant deaths. While the general infant death rate is further lowered, (it also is the lowest rate on record, viz. 43.2 per 1,000 living births) the percentage of deaths in this age group attributed to prematurity is more than double that of any other cause. The following table gives the numbers of infant deaths from the most important causes in five-year periods for the last twenty years:

	1920	1925	1930	1935	1940
Total number of infant deaths.....	7,802	5,530	5,260	3,515	2,959

Other Diseases peculiar to early infancy.....	333	379	254	241	246

While difficulty sometimes presents in the maintenance of a satisfactory health service for the pre-school age group, an increasing number of municipalities are attempting to meet the health needs of these children. The Divisional staff gave assistance to eight municipalities in the conduct of their pre-school health programme in the past year.

At the request of the Honourable the Minister of Education, the Division again made the necessary arrangements for the medical examination of all applicants to the teacher-training schools. The findings of the examining physicians in this group of young adults are very comparable to those found in the examination of recruits for active service. The figures for the examinations of these recruits as presented by the Minister of National War Services show that only two-thirds of the men between the ages of 21-24 were said to be eligible for Class A, and 22% of the total were in Class C or lower. A study of the defects found in the group leads one to believe that the vast majority are ostensibly preventable. It would appear that one of our most urgent problems is the further awakening of public interest in the medical examination and health supervision of elementary school children, and the extension of such examinations and supervision into the secondary school group. Further, that there should be serious stock-taking as to the reasons why defects are not corrected when discovered and some acceptable plan devised which will provide the necessary treatment for those who cannot afford to pay for it.

PUBLIC HEALTH NURSING

EDNA L. MOORE, REG. N., *Chief Public Health Nurse.*

The total strength of the Public Health Nursing Staff at the beginning of 1941 was ten. Two members of the group were on sick leave. Miss Marjorie Rutherford, Reg. N., of the United Counties Health unit staff, and on leave of absence from the Department staff since April, 1940, was called for service with the Royal Canadian Army Medical Corps in July. May first Miss H. Elizabeth Smith returned to duty in Timiskaming District and Miss N. Edna Howe reported for duty on the first of September.

During the year the supervisors visited 81 centres representing in population slightly less than one-third of the Province. Seventy-five centres received one visit, five centres were visited twice, while one community was visited three times. It is recognized that three visits to each centre during the year would be a limited standard of supervision, although the service reported indicates a creditable accomplishment on the part of a small staff whose plans are subject to frequent interruption.

Six members of the staff took the Basic Course (A.R.P.)

The supervisors and staff nurses gave 76½ nursing days to the Normal School entrance examination project.

Nursing service was provided for chest clinics at Burks Falls, South River, Parry Sound and Huntsville and for an extensive immunization programme at Sturgeon Falls.

Two members of the staff were engaged from August to November in securing information for a study of the extent and adequacy of medical care within an area comprising five townships of Muskoka District.

Assistance was provided in connection with a survey of the health services in the City of Kingston.

The Chief Public Health Nurse and members of the supervisory staff participated in conferences with graduate and under-graduate students at the University of Toronto School of Nursing and the University of Western Ontario Institute of Public Health, and graduate students at the School of Hygiene, University of Toronto.

The Chief Public Health Nurse made 39 visits to 33 centres and addressed 21 meetings at which the total attendance was 1,735. During the year she has served on the nursing advisory committees of the Canadian Red Cross Society, Ontario Division, and the Ontario Society for Crippled Children; the Emergency Nursing Committee, Registered Nurses Association of Ontario; and two committees in connection with Civilian Defence.

Hostess Houses have been established at R. C. A. F. and R. A. F. stations and Army camps by the Y. W. C. A. under the War Auxiliary Services Department, and the work of the hostesses has revealed health needs arising from changing situations. Visits have been made to six of the hostess houses for the purpose of securing information.

In Elmira the question of re establishing the public health nursing service was voted upon in January. The majority of the voters being in favour of the service, the nurse who had resigned in March, 1940, was re-engaged and the programme re-organized.

In the Township of East York, adjacent to the City of Toronto, a promising development began during 1941. The local health authorities, with the co-operation of the University of Toronto Schools of Hygiene and Nursing and the Ontario Department of Health, undertook an extension of their health services. The public health nursing staff was increased through the appointment of a supervisor and three staff nurses and the nursing programme was re-organized. The population of the township is 39,638. In addition to the generalized nursing service given by the staff of the Board of Health which numbers eight, educational bedside services are provided by the local branch of the Victorian Order of Nurses and the St. Elizabeth Visiting Nursing Association.

In September a public health nursing service was re-established in Kenora after a lapse of eleven years. In Kingston and in Timmins increases were made in the nursing personnel.

The health service at the Toronto Normal-Model School, established in September, 1940, was terminated with the closing of the school at the end of June.

Throughout the year requests for information with reference to the establishment and extension of public health nursing services were received. Visits were made to twelve districts for the purpose of discussing with officials and interested citizens their local health problems and the ways in which public health nursing services might contribute to their solution.

Requests from Boards of Health and industrial managers for assistance in securing qualified personnel were received in connection with 20 permanent and 2 temporary appointments. By means of the contact maintained with our office by public health nurses available for positions at the completion of their courses, and also by nurses seeking to broaden their experience, it has been possible to meet every request. In view of the increasing demands for public health nursing service, it is noteworthy that the 1941-42 enrolment in the two University Public Health Nursing Courses is the largest in their history.

From several centres where industrial development has been marked the public health nurses have reported that women are accepting employment and leaving pre-school and school children without any provision for regular or suitable meals. The younger children are frequently found in the home or on the street without supervision.

A Refresher Course on Mental Hygiene at the University of Toronto School of Nursing was attended by one of the supervisors who prepared a summary of the lectures for distribution to the public health nurses of the Province.

At the request of the Public Health Section of the Registered Nurses' Association of Ontario a one-week Refresher Course in Industrial Nursing was offered by the University of Toronto. It was attended by 115 nurses, of whom 60 were from industries as widely separated as Fort William and Cornwall.

Through the co-operation of local Boards of Health and School Boards and their nursing staffs, one-month periods of field practice were made available to 18 graduate students and 5 senior students of the undergraduate course

at the University of Toronto School of Nursing. Some assistance was given in connection with the field practice programme of the University of Western Ontario Public Health Nursing course.

Two Ontario public health nurses were granted fellowships for advanced study by the Rockefeller Foundation. The provisions of the fellowships which covered a period of one year included academic work as well as field experience with rural and urban health agencies in Canada and the United States. A four-month period of experience was arranged for one of the fellows with the Orillia Board of Health.

Distinguished visitors during the year were: Miss Mary C. Connor, R.N., National Organization for Public Health Nursing, New York City; Lulu Wolf, R.N., Vanderbilt University, Nashville, Tennessee; Mrs. Soledad A. Buenafe, R.N., Manila; Edith Fenton, Reg.N., Halifax; Isabel Chodat, Reg.N., Metropolitan Health Committee, Vancouver; Elizabeth Brackett, R.N., M.P.H., and Martha Jayne, R.N., Rockefeller students; Louise Harmon, R.N., Eastern Health Unit, Baltimore, and Mrs. E. A. Duke, President, Federated Women's Institutes of Ontario.

We are indebted to Miss Mary Clarke, Executive Director, Social Service Index for the privilege of visting the Index Office in connection with the staff education programme carried out during the last week of December. Miss Mildred Walker, Chief, Division of Study for Graduate Nurses, University of Western Ontario, contributed greatly by coming to us for a day to discuss problems in supervision. Thanks are due the Chief Medical Officer of Health and the Directors of the Divisions for their practical assistance with this programme.

Acknowledgement is made of the valuable contribution to the public health nursing in Ontario by the Ontario Society for Crippled Children through the services of Miss Gretta Ross, Reg. N., and Miss Margaret Armstrong, Reg.N., and also by the Canadian National Institute for the Blind through the work of Mrs. Margaret Moeller, Reg. N., in the conservation of vision programme.

Occasional conferences in the field between the supervisors of the Victorian Order of Nurses and our staff members continue to prove helpful.

The health teaching given by public health nurses associated with the Short Courses arranged by the Women's Institute Branch of the Department of Agriculture, has stimulated in several centres community interest in local health needs.

Our Honourary Consultant, Miss Elizabeth Smellie, C. B. E., R. R. C., Matron-in-Chief, R.C.A.M.C., has given generous assistance in the discussion of many problems.

To all members of the staff appreciation is extended for their loyal and cheerful co-operation.

DIVISION OF TUBERCULOSIS PREVENTION

G. C. BRINK, M.B., *Director.*

The death rate from tuberculosis dropped to a new low of 26.9 per 100,000 for the year 1940. This represents a 25.3% decrease in the last five years.

During 1941, 6,377 patients received the benefit of sanatorium care. This is an increase of 147 over the number treated in sanatoria in 1940. While these figures are encouraging, the influence of those hazards associated with increased industrialization as a result of the war may more than offset the benefits that normally could be expected, considering the increased facilities for treatment during the last five years.

The fundamental principles in the prevention of tuberculosis, remain the same in war as in peace. War does change environment and living conditions. The influence of increased industrialization, particularly in females, was shown in the last war, when there was a definite rise in the morbidity and mortality from tuberculosis. In England the tuberculosis death rate in 1918 was 25% higher than in 1913. In 1940 the rate in England was 13% higher than in 1939. The estimated 1941 tuberculosis death rate in Ontario shows no appreciable change from that in 1940—the first time in several years that a decrease has not occurred.

There are two facts that give encouragement:

(1) The incidence of infection in the young adult age group is probably not more than one-quarter what it was in 1914-1918.

(2) The sources of infection, human and bovine, have been markedly decreased in the last twenty years.

Those conversant with the tuberculosis problem have expressed a doubt that the decrease in mortality rates will continue beyond the present level unless new methods in discovery are made available. It is also believed that the usual clinic programme, namely, the examination of potential cases (contacts) and those who may be suspected of having the disease, has definite limitations and is not sufficient in itself for the control of tuberculosis. Mass examinations would seem to be indicated if tuberculosis is to be found in its early stages before it has produced symptoms or has rendered the individual ill. The miniature X-ray film and the mobile X-ray unit will overcome many of the difficulties associated with the X-raying of large numbers of people in industry or selected groups in the general population. The X-ray examinations by the use of small films will be less costly and can be made at a more rapid rate.

The Division has secured a Photo-Roentgen Unit capable of taking 4"x5" films of the lungs and has found it most efficient in survey work. This X-ray unit is being installed in a large truck and will be available to most districts in the province. X-rays can be taken within the truck; or the machine can be removed to other quarters if conditions so indicate.

Although there is a definite shortage in medical staff, sanatorium and clinic facilities in Ontario have as yet been only slightly affected. The number of tuberculosis contacts and other persons being referred for examination by

X-ray was greater in 1941 than in any previous year. It is imperative that we hold the gains already made and to do this diagnostic and treatment facilities must continue to be used to the limit of their capacities and increased if possible.

PART I.

REPORT OF THE WORK DONE BY THE TRAVELLING CHEST CLINIC.

During 1941 the clinic work has been considerably handicapped on account of lack of staff. Since April the North Bay unit has been without a clinician and since June the Toronto unit has been in like position. Clinics have been conducted from these two offices by an X-ray technician and nurse. Although the procedure is not as satisfactory as one would wish it has worked quite well and has resulted in bringing to light many new cases of pulmonary tuberculosis which would not have been discovered if the clinic work had been discontinued in these two units.

Toronto Unit—23 clinics in 16 centres:

Brockville (2 visits); Lindsay (2 visits); Oshawa (2 visits); Midland (2 visits); Penetanguishene (2 visits); Shelburne (2 visits); Orangeville (2 visits); and one to each of the following—Tillsonburg, Leamington, Palmerston, Listowel, Owen Sound, Newmarket, Chesley, Hanover and Warton.

Ottawa Unit—31 Clinics in 16 centres:

Ottawa—12 clinics, Smith's Falls (2 visits), Renfrew (2 visits), Pembroke (2 visits), Hawkesbury (2 visits), and one to each of the following:—Prescott, Carleton Place, Arnprior, Bourget, Plantagenet, Eganville, Casselman, Rockland, Almonte, Kemptville and Perth.

Timmins Unit—15 Clinics in 8 outside centres:

Clinics in Timmins 3 days each week when staff not travelling. Englehart (2 visits); Kapuskasing (2 visits); Hearst (2 visits); Moonbeam (2 visits); Cochrane (2 visits), Smooth Rock Falls (3 visits), Iroquois Falls (1 visit), Larder Lake (1 visit).

Belleville Unit—35 Clinics in 16 centres:

Belleville (16 clinics); Peterborough (3 visits), Picton (2 visits), Port Hope (2 visits), and one visit to each of the following:—Marmora, Stirling, Cobourg, Bancroft, Hastings, Tweed, Campbellford, Havelock, Napanee, Haliburton, Madoc and Brockville.

North Bay Unit—37 Clinics in 20 centres:

North Bay (12 clinics); Sudbury (3 visits), Sault Ste. Marie (2 visits), Sturgeon Falls (2 visits); one visit to each of the following:—Cheableau, Blind River, Thessalon, Verner, Mattawa, Espanola, Little Current, Gore Bay, Mindemoya, Manitowaning, Parry Sound, Burk's Falls, South River, Richard's Landing, Massey and Huntsville; also surveys of the House of Refuge and of the Indian School, Sault Ste. Marie.

Fort William Unit—30 Clinics in 18 centres:

(a) Nipigon (2 visits), Rainy River (2 visits), Emo (2 visits), Fort Frances (2 visits), Dryden (2 visits), Kenora (2 visits), Sioux Lookout (2 visits); one visit to Heron Bay, Geraldton, Beardmore, Upsala, Nolalu, Schreiber

(b) A clinic in each of four timber camps; (c) Surveys of five Indian Schools—St. John's Boarding School, Fort William; Cecilia Jeffrey School, Kenora; St. Mary's School, Kenora; Pelican Lake School, Sioux Lookout and Fort Frances Indian School.

Table I, General summary.

Tables II, III, and IV give details in respect to newly discovered cases of tuberculosis.

Tables V and VI give details in respect to persons recommended for sanatorium treatment.

Table VII gives details regarding changes in diagnoses made in repeat examinations.

Table VIII gives details regarding the present condition of ex-patients of sanatoria examined at the clinics.

Table IX gives the classification of non-tuberculous chest conditions.

TABLE I
SUMMARY OF CLINIC WORK

FINDINGS	Examinations	Toronto	Ottawa	Belle-ville	Tim-mins	North Bay	Fort William	TOTALS
1. Pulmonary Tuberculosis.....	First Repeat	90 287	59 286	107 338	70 266	147 418	132 178	605 1773— 2378

7. Number Individuals Examined.....	1868	1744	2247	2349	2690	2241	13139
8. Pneumothorax refills given.....	0	0	412	311	0	0	723
9. Totals.....	First Repeat	1070 953	869 1015	1440 1049	1382 1096	1622 1288	1414 983	7797 6384—14181
10. Total Number of Examinations.....	2023	1884	2489	2478	2910	2397	14181

Remarks on Table II:

1. 268, or 51.1%, of the newly discovered cases gave a history of contact with tuberculosis, while 256, or 48.9% gave no history of contact.

2. 261, or 49.8%, were recommended for sanatorium treatment.

Of these, 116 did not realize they were ill, as follows:

Childhood (primary infection).....	9
Minimal.....	67
Moderately advanced.....	22
Far advanced.....	18
	116

3. Of the 268 cases giving a history of contact with tuberculosis, 210, or 78.3%, attended the clinic because of contact only and with no symptoms referable to the chest.

TABLE III

TABLE SHOWING RELATION OF NUMBER OF NEW CASES OF TUBERCULOSIS DISCOVERED TO NUMBER OF CONTACTS EXAMINED

AGE GROUPS	Number Contacts Examined for First Time	Number Cases of Tuberculosis Discovered (Primary Infection Type not Included)	Percentage of Contacts Examined Showing Disease %	Number of Cases of Active Tuberculosis Discovered (Primary Infection Type not Included)	Percentage of Contacts Examined Showing Active Disease %
0 to 4	278	1	.36	1	.35
5 to 9	430	8	1.8	6	1.47
10 to 14	436	14	3.2	13	2.9
15 to 19	387	18	4.6	14	3.6
20 to 24	410	20	4.9	15	3.8
25 to 29	423	15	3.5	10	2.4
30 to 39	521	25	4.8	14	2.7
40 to 49	316	22	6.9	8	2.5
50 to 59	183	12	6.6	4	2.2
60 to 69	105	13	12.4	5	4.8
70 and over	46	4	8.7	2	4.3
	3535	152	4.3	92	2.6

Remarks on Table III:

The above Table indicates that the examination of contacts will reveal a greater percentage of cases of tuberculous disease and a greater number of cases requiring treatment than will be found in the same number of the general population in the same age groups.

TABLE III (a)

TABLE SHOWING RELATION OF NUMBER OF NEW CASES OF TUBERCULOSIS DISCOVERED TO PERSONS X-RAYED IN THE GENERAL POPULATION

AGE GROUPS	Number X-Rayed	Number Cases of Tuberculosis Discovered (Primary Infection Type not Included)	Percentage Showing Disease %	Number Cases of Active Tuberculosis Discovered (Primary Infection not Included)	Percentage Showing Active Disease %
15 to 19	87	0	0
20 to 24	210	2	1.0	2	1.0
25 to 29	312	0	0
30 to 39	606	8	1.3	2	0.3
40 to 49	602	13	2.1	1	0.1
50 to 59	531	16	3.0	0
60 to 69	236	9	3.8	0
70 and over	19	1	5.2	0
Age not Stated	96	0	0
Totals.....	2699	49	1.7	5	.18

TABLE IV

SUMMARY OF NEWLY DISCOVERED CASES

CLASSIFICATION	Number	Percentage of Total %	Percentage of Number with re-Infection (Adult) Type of Disease %
Pulmonary:			
Childhood (Primary infection)	81	15.4
Minimal.....	267	51.9	61.1
Moderately advanced.....	106	20.3	24.3
Far Advanced.....	64	12.3	14.6
Extra-pulmonary.....	6	1.1
TOTAL.....	524	100.	100.

Remarks on Table IV:

261 of the 524 Newly Discovered Cases required sanatorium treatment; in the remainder the disease was considered to be inactive; in many instances it was apparently of long standing.

TABLE V—Continued
 1st—1st Examination.
 R.—Repeat Examination
 CLASSIFICATION OF CASES RECOMMENDED FOR SANATORIUM TREATMENT—TOTAL, 395

Age Groups	Totals		History of Contact	Childhood		Minimal		Moderately Advanced		Far Advanced		Extra Pulmonary Tuberculosis				Suspects.				
	1st	R.		Active		Inactive		Active		Inactive		Pleurisy with Effusion	Tbc. Knee		Tbc. Spine		Adenitis			
				1st	R.	1st	R.	1st	R.	1st	R.		1st	R.						
40 to 49	6	4	+	3	1	3	1	2	
50 to 59	23	15	—	10	2	5	7	2	...	5	6	
60 to 69	5	6	+	2	1	1	2	1	...	2	1	1	...	1	
70 and Over	15	8	—	2	...	6	5	5	3	1	
	3	2	+	1	...	2	2	
	11	2	—	1	...	3	...	1	...	6	2	
	2	0	+	2	
	2	0	—	1	1	
	229	166	+180 -215	9	4	31	0	30	27	0	2	21	16	...	4	2	1	0	0

PREVIOUS DIAGNOSIS

Remarks on Table VII:

1. Of 4,234 persons examined by our travelling clinics in some previous year and classified as having no disease, 68 or 1.6% developed some form of tuberculous disease.

2. Of 1,350 persons examined by our travelling clinics in some previous year and classified as having inactive adult type of disease, 56 or 4.1% had become reactivated.

3. Of 81 persons examined by our travelling clinics in some previous year and classified as suspects 26 or 32.1% developed some type of tuberculous disease. The personal equation enters into the classification of suspects. However, the adequate follow-up of those suspected of having tuberculous disease is shown to be well worth while.

4. Of 156 persons examined by our travelling clinics in some previous year and classified as having childhood type of disease, only 5 or 3.2% had developed adult type of disease.

5. Of 792 persons examined by our travelling clinics in some previous year and classified as having minimal disease, in only 39 or 4.9% had the disease extended.

6. Of 547 persons examined by our travelling clinics in some previous year and classified as having moderately advanced inactive disease, 28 or 5.1% had become active.

7. Of 103 persons examined by our travelling clinics in some previous year and classified as having advanced inactive disease, 3 or 2.9% had become active.

TABLE VIII
CLASSIFICATION (on last examination) OF PATIENTS WHO HAD RECEIVED SANATORIUM TREATMENT—Total 870

Totals	...	49	...	12	281	28	313	35	115	2	10	8	2	1	1	1	1	1

Remarks on Table VIII:

1. 870 persons who had received sanatorium treatment attended the clinics.

2. In 49 or 5.6% the disease by X-ray had cleared or become so well healed that it was not considered to be a factor at the present time.

3. Of the 810 with tuberculous disease still evident, 77 or 9.5% were considered to have active disease and in need of further sanatorium treatment; 733 were considered to have inactive disease.

Cost of this Service.....		\$19,585.28
Number of New Cases of Tuberculosis Discovered.....	97	
Average Cost per case.....		201.91
Number of cases Recommended for Sanatorium.....	53	
Average Cost per case.....		369.53

MISCELLANEOUS

1. 884 films have been interpreted in the Central Office for various agencies—public hospitals, industrial schools, schools and private physicians.

2. 1,208 films were taken in the Central Office—113 on applicants, 138 on Provincial Police, 61 for Mothers' Allowance Commission, 71 on ex-patients of sanatoria receiving post-sanatorium care from the Department, 49 on teachers-in-training, 102 on members of staff of hospitals having no X-ray facilities, 212 on members of staff of various departments, 6 on recruits rejected because of chest conditions, 268 on persons referred by staff physicians and 188 referred by outside physicians.

3.* A record has been kept of all soldiers and recruits reported with tuberculous disease.

1. SOLDIERS	Number admitted to sanatorium.....	194
(a) Residents of Ontario.	Number discharged from Sanatorium.....	123
	Number still under treatment.....	71
(b) Residents of other provinces or U. S. A.	Number admitted to Sanatorium.....	12

	Number still under treatment.....	55
	Total number admitted to Sanatorium.....	376
	Total number discharged from Sanatorium.....	198
	Total number still under treatment.....	178

PART II

TUBERCULIN TESTING AND X-RAYING OF STUDENTS IN NORMAL SCHOOLS AND THE COLLEGE OF EDUCATION

The Division co-operated with the Department of Education in carrying out this work.

*As of Dec. 31, 1941.

TABLE XIV

	Number Enrolled	Number Tuberculin Tested	Number of Reactors	Percentage of Reactors %	Number X-Rayed	No. Showing Evidence Active Tuberculous Disease	Percentage with Active Tuberculous Disease %
Normal Schools	1,127	995	173	17.4	330	4	.35
College of Education.	205	165	31	18.8	78	0	0

Remarks: The percentage of reactors has decreased considerably during the past few years.

PART III

All Public and Red Cross Hospitals, Hospitals for Incurables, and Sanatoria reported the work done in respect to the tuberculin testing and X-raying of Graduate and Non-graduate Nurses on their staff.

There was a slight increase in the number of Non-graduate Nurses developing tuberculous disease, 32 being reported for 1941 as compared with 23 for 1940. From the records submitted, it is evident that student nurses should be tuberculin tested more often than once a year and if they react to tuberculin they should be X-Rayed more than once a year.

TABLE XV

RECORD OF TUBERCULIN TESTING AND X-RAYING OF GRADUATE AND NON-GRADUATE NURSES IN PUBLIC AND RED CROSS HOSPITALS, HOSPITALS FOR INCURABLES AND SANATORIA—1941

	INSTITUTIONS REPORTING	Number Reported	Number Reactors	Percentage Reactors %	Number X-Rayed	Number Previously Known Cases Tuberculous Disease	Number Newly Discovered Cases Tuberculous Disease	Percentage of Total with Newly Discovered Tuberculous Disease %

GRADUATE NURSES

CLASSIFICATION OF DISEASE

DISPOSAL

1. NEWLY DISCOVERED DISEASE.

*8 Minimal Active.....	(a)	5 entered sanatorium.
	(b)	3 treated at home.
*1 Moderately advanced, active.....		Entered sanatorium.
2 Minimal, inactive.....		Remained on duty.
*1 Pleurisy with effusion.....		Entered sanatorium.
* Of the 12 newly discovered cases of tuberculosis 11 required treatment.		

2. PREVIOUSLY KNOWN.

37 Minimal inactive.....		Remained on duty.
22 Moderately advanced, inactive.....		Remained on duty.
4 Far advanced, inactive.....		Remained on duty.

NON-GRADUATE NURSES

1. NEWLY DISCOVERED DISEASE.

*9 Pleurisy with effusion.....	(a)	8 entered sanatorium.
	(b)	1 treated in hospital and at home.
*1 Adenitis.....		Entered sanatorium.
*16 Minimal active.....	(a)	12 entered sanatorium.
	(b)	2 treated in hospital.
	(c)	2 treated at home.
*4 Moderately advanced, active.....		Entered sanatorium.
*1 Far advanced, active.....		Entered sanatorium.
*1 Minimal inactive.....		Remained on duty.
* Of the 32 newly discovered cases of tuberculosis, 31 required treatment.		

2. PREVIOUSLY KNOWN.

5 Minimal inactive.....		Remained on duty.
6 Moderately advanced, inactive.....		Remained on duty.
5 Far advanced, inactive.....		Remained on duty.
*1 Moderately advanced, active.....		Entered sanatorium.

*One previously known case became active and required treatment.

PART IV

HISTORY OF SANATORIUM TREATMENT WITHIN FIVE YEARS OF DEATH IN PERSONS DYING OF TUBERCULOSIS IN ONTARIO IN 1940

With the co-operation of the sanatoria, the record of persons dying of tuberculosis in Ontario in 1940, who had received sanatorium treatment within five years of death, was obtained.

Table XVI gives the summary of the findings for deaths from all forms of tuberculosis as well as for pulmonary only. A separate tabulation has been made for Indians; whites; and whites and Indians combined.

It will be noted that 64.3% of all persons dying of tuberculosis had been in sanatorium, while 73.3% of those dying of pulmonary tuberculosis, had received sanatorium treatment. (If the white population only is counted, these percentages are 68.2% and 77.2%, respectively.)

Tables XVII, XVIII, and XIX give the details re deaths from pulmonary tuberculosis in counties, districts, cities and towns.

Table XX shows the analysis of those persons (excluding Treaty Indians) who died of pulmonary tuberculosis in 1940 who had not been in sanatorium within five years of death. It will be noted that 62% of these were over 50 years of age and 45% were over 60 years of age, indicating that a source of infection is often present in the home in persons in the higher age group.

TABLE XVI

HISTORY OF SANATORIUM TREATMENT WITHING FIVE YEARS OF DEATH IN PERSONS DYING OF TUBERCULOSIS IN ONTARIO IN 1940

3. Analysis According to Reasons for not Entering Sanatorium

(a) Refused sanatorium treatment.....	54
(b) Diagnosed shortly before death or at autopsy.....	80
(c) Reason not known.....	9
(d) Sanatorium treatment not considered necessary by Physician or Clinic..	8
(e) Diagnosis said to be incorrect.....	2
(f) Died outside of Ontario.....	1
(g) No answer to questionnaire.....	7

*181

*11 of the 181 had been in sanatorium previous to the five-year period preceding death.

PART V

REPORT UPON POST-SANATORIUM CARE OF EX-PATIENTS OF
SANATORIA

There were 67 patients discharged from sanatoria who, upon admission, were acknowledged as the responsibility of this Department for post-sanatorium care but who did not require post-sanatorium care because their families were in a position to provide same, or they were able to return to employment immediately upon discharge.

26 of these were without municipal residence, one of whom was supplied with transportation from the sanatorium to his home. 41 were from unorganized territory, 7 of whom were supplied with transportation to their homes.

As at December 31st, 1941, there were 57 ex-patients of sanatoria from unorganized municipalities and without municipal residence receiving pneumothorax treatments at the expense of the Department and on whom reports are received regularly. In addition to their pneumothorax refills, four of these received assistance with transportation to and from pneumothorax centres, while 21 received aftercare assistance. The remaining 32 received assistance with cost of pneumothorax treatments only.

DIVISION OF INDUSTRIAL HYGIENE

J. G. CUNNINGHAM, D.P.H., *Director.*

If it takes 12 to 15 persons mostly in industry to keep one man in the firing line, the total war effort must include some supervision of their health. The Department undertakes to provide certain technical facilities for this purpose which the individual industry can hardly be expected to supply for itself. However, in the absence of some effort by the individual employer in the same direction, the benefits are temporary and scattered. It is past the time when the principles of preventive medicine should be applied for the control of general ill health to industrial groups, especially for the conservation of labour in war time. Lost time from strikes or accidents is a detail compared with that from general sickness, much of which can be prevented.

In spite of a shortage of physicians to meet all demands, the number directly identified with industry for the supervision of general health has increased recently. Many more nurses are employed. The nurse in the Division undertakes to keep in touch with Industrial Nursing personnel to assist with the programme within the plant as far as possible. The School of Nursing at Toronto University presented a refresher course of one week's duration last October for nurses in industry. There were 113 registrations. Many employers made it possible for their nurses to attend by providing a substitute in the plant, and in some cases paying all expenses. Arrangements are completed for a three-day refresher course for physicians by the Faculty of Medicine of Toronto University, to be held in January, 1942. Considerable interest is already evident.

Instead of a few, hundreds of factories should be equipped to provide for their employees and for the country as a whole the benefits of health, maintained at the highest possible level. The Division of Industrial Hygiene is equipped to keep the employer in touch with the best practice in the field, and to assist with special health problems arising out of industrial processes. A large section of industry fails to deal with the subject at all adequately, and when some action is taken, too often it is ill-advised because of failure to request guidance in a technical subject.

As might be expected, the war has increased the work of the Division considerably.

1. Accidents have increased out of proportion to the increase in the numbers of employees. Their care dominates the work of the plant dispensary to the detriment of effort directed to general ill health. Both are important.

2. The demand of employees for coverage for the treatment of sickness appears to have increased. This has not yet operated to stimulate employers to prevent sickness, although some factories engaged in war work are making a real effort while others are doing nothing.

3. Occupational diseases have increased in number and kinds, but requests for assistance from employers and physicians have also increased, indicating a growing appreciation of the importance of maintaining health.

4. In contrast to much indifference to the maintenance of general health, special problems are constantly referred. Examples:

- (a) Detailed procedures for radium dial painting have been set out for all factories so engaged.
- (b) Conditions surrounding the availability of certain volatile solvents have resulted in the increased use of benzol, requiring extra precautions.
- (c) Some employers are using dangerous materials with which they have not previously come in contact, or about which they have no information; e.g., hydrogen sulphide from a cylinder out of control was released, causing one fatality, and placing other workers in serious danger; welding parts which have been cadmium-plated are dangerous. Burns from splashes of cyanide solution used for case-hardening, if at all extensive, may cause sufficient absorption to be fatal.
- (d) Increased foundry work, resulting in two heats a day in place of one, is associated with increased exposure to silica dust.
- (e) Attempts are sometimes made to accelerate chemical processes, desirable under present conditions, but apt to be associated with increased exposure to poisonous substances. In two of these, formaldehyde was involved.
- (f) Lead, in glass manufacture and as the chromate for yellow and green colours in paint, when it is sprayed, is an increasing hazard. Skin eruption from repeated contact with oil in machine work has greatly increased. Human failure in hand-operated degreasing machines, using trichlorethylene, has produced sufficient concentration in the air for narcotic effects.

Physical Examinations:

Periodic physical examinations have been carried out by the plant physician, as required under *The Factory Act* in thirty factories; no cases of poisoning have been reported from these plants. In addition, a number of factories carry out such examinations on a voluntary basis including particularly storage battery manufacture for lead exposure, and certain foundries and porcelain manufacturing plants for silicosis. In most instances, the X-ray films obtained as part of these examinations, are reviewed here. The laboratory has examined blood smears from about 900 workers exposed to lead referred by 82 physicians. The groups exposed to this material in any one plant are usually small, although such exposure is quite widespread.

There were about a thousand industrial examinations conducted by the Division itself; about one-half of them by the Silicosis Referee Board in connection with claims for Workmen's Compensation. Six hundred additional X-ray films were reviewed, many for tuberculosis in industrial groups, some from silica trades, and a few of these from nearly every province. There were another nine hundred cases reviewed for various Department Boards.

The situation respecting the use of equipment for small X-ray films for survey purposes to detect cases of tuberculosis in industry, was canvassed. X-ray equipment for 35 mm. films was made available to the Division for this purpose. It is transported in a truck built for the purpose, so that small as well as large factories may be accommodated. The examinations will be carried out in co-operation with the Division of Tuberculosis Prevention, and directed at first to those industries employing largely increased numbers of young women.

Industrial Hygiene Laboratory:

The number of samples tested during 1941 showed a decrease from the previous year due mainly to the reduction in the number of press cakes and refining solutions received for arsenic determination. The investigation of the hazard due to arsine present in the cyanide mills where gold is extracted has been completed. Only samples from mills coming into production were analyzed during the present year.

Lead determinations on urine were approximately the same in number as in other years. The exposure occurred in various occupations and industries such as battery manufacture, spray painting, printing, metal refining and soldering. A considerable number of specimens were accompanied by no history of exposure. Of these, approximately twenty per cent. of the cases showed lead absorption. A little less than half of the specimens coming from cases with known exposure to lead presented evidence of excretion above the normal range. Over 1,500 blood smears were examined for stippling. These were contributed by 814 individuals in forty-seven plants engaged in the manufacture of paints, explosives, airplanes, batteries, vitreous enamels, and in plating and metal refining. Lead was also determined in air and in dusts as well as in water and food. The examination of paints used extensively in aircraft plants and other war industries was carried on, the number of samples analyzed being in excess of last year's figure.

Besides the routine silica analyses on such materials as rocks, partines, etc., eleven lungs were analyzed for the Workmen's Compensation Board as an aid in the diagnosis of silicosis. Seven of these lungs were from workers from the mining areas of the Province, the remainder being from sandblasters, molders and welders. A brief investigation of the silica hazard arising from industrial smoke was initiated during the year. Air samples and dusts were collected and examined from various types of war industries.

Benzene and other aromatic hydrocarbons were determined on paints, lacquers, shoe cements and solvents. In addition, sulphate determinations were done on a considerable number of urines from individuals exposed to benzol in war industries. Benzol concentration in air was also done in the case of one exposure.

Aromatic compounds (T.N.T.) were determined in urines from workers in explosive plants.

An investigation into the mercury hazard in the felt hat industry was commenced during 1940. This work was continued during the present year. Several samples of furs were analyzed for their mercury content and the concentration of mercury in air determined, using the Norlander Selenium Sulphide detector in the rooms where these materials were processed or stored. The use of non-mercury carotting compounds is being developed, especially in the United States.

There was a marked increase in the number of samples submitted in regard to cases of dermatitis. In most cases the skin irritant was a cutting oil used in machine shops. Examination of these products involved a variety of tests, including bacteriological examination, reaction and nature of constituents.

During the year, a method for the determination of fluorine was developed and a number of samples of bone were analyzed in suspected cases of fluorine intoxication.

Research was commenced on the determination of oxyhemoglobin, methemoglobin, carboxyhemoglobin in blood. In this investigation a Coleman spectrophotometer acquired by the laboratory during the year was used. It is hoped that this method will provide a rapid means of establishing the absorption of various substances occurring in industry such as carbon monoxide, cyanides and dyes.

Engineering Control:

The engineering facilities of the Division assist in determining whether present methods for control of poisoning are adequate. If not, they assist in correction and measure the results. Such investigations have been carried out in sixty plants, necessitating in some cases a number of visits. Apparatus was developed for the application of an organic mercury compound for disinfecting seed grain. A method was devised for the reduction of exposure to coal-tar distillation products, which may have been associated with the development of cancer of the lung. Ventilation has been recommended and used in spray painting rooms for aircraft, in the control of radium emanation in dial painting, in the control of dust in foundries, in the manufacture of rubber accessories and optical glass, in flax mills, and for the control of fumes in welding, particularly in confined spaces.

The Factory Inspection branch of the Department of Labour, the Workmen's Compensation Board, and the Industrial Accident Prevention Associations have co-operated with the Division in bringing suspected hazards in industry to its attention, and in assisting the Division in the inquiries which it has itself initiated.

During the year, at the request of the Allied War Supplies Corporation, the services of Dr. F. M. R. Bulmer have been loaned to it as medical director of the war factories under its control. Dr. Bulmer's services are important to this Division but are required more directly in war work. Dr. W. H. Cruick-

shank joined the Division in August, 1940. He is well-trained and has already assisted materially in its work. Dr. G. M. Parker has recently joined the staff to assist in the X-ray examinations for tuberculosis in industry. Fortunately Mr. R. G. Elson, physicist, joined the staff in December, 1940, replacing Mr. E. O. Braaten, who resigned at that time. So far, it has been impossible to find a suitably trained worker to replace Dr. Leppard, physicist, while he is on active service.

The arrangement for industrial hygiene research work with the School of Hygiene, University of Toronto, has made it possible to continue investigations directed to quantitative determination of certain substances in the urine of those exposed to T. N. T. Such determinations would be used to assist in detecting undue exposure to this material.

Literature on industrial health hazards, and to a less extent on general health topics, has been distributed to industry. Addresses and articles for publication have been directed to the following groups:

- 1: "Industrial Health and National Defence," given at the Academy of Medicine, Toronto, January, 1941.
- 2: "The Detection of Second-hand White Cotton in Mattresses and Upholstered Furniture," presented at the Canadian Institute of Chemistry Meeting, Toronto, in February, 1941.
- 3: "The Effect of Poisonous Substances in Industry," Industrial Accident Prevention Associations' Training Course, University of Toronto, March, 1941.
- 4: "The Thief of Time," presented at the Annual Conference of the Industrial Accident Prevention Associations, Toronto, April, 1941.
- 5: "The Influence of Health on Conditions of Work Other Than the Use of Poisonous Substances," given at the Industrial Accident Prevention Associations' Training Course, University of Toronto, April, 1941.
- 6: "The Physician's Contribution to Industrial Health in War Time," Ontario Health Officers Association, Annual Conference. June, 1941, Toronto.
- 7: "The Health of the Industrial Worker in War Time," presented at the Quebec Meeting of the Canadian Public Health Association, June, 1941.
- 8: "Fatigued Workers and Reduced Industrial Output," presented at the General Motors Corporation of Canada Conference, June, 1941, Oshawa.
- 9: "Occupational Conditions of Increasing Importance," presented at the General Motors Corporation of Canada, Conference, Oshawa, June, 1941.
- 10: "The Challenge of War Industry to the Physician," Hamilton Academy of Medicine, October, 1941.

Bedding Regulations:

Most manufacturers and retailers have co-operated in the attempt to make the Bedding Regulations effective. There are now 331 companies using labels approved by the Department.

During the year there were 1,100 inspections made. On fifty-seven occasions 440 mattresses or articles of upholstered furniture were placed "off sale." Of these, 341 originated outside Ontario and they were either returned to the manufacturer or were re-labelled according to the regulations. As these procedures involve considerable inconvenience to the retailer and manufacturer, they are likely to have a salutary effect. A considerable number of the ninety-nine articles made by Ontario manufacturers were put "off sale" due to non-labelling. The policy of prosecuting those companies who mis-labelled their products was continued. In all cases convictions were obtained.

Nearly five hundred samples were collected from 106 different mattress manufacturers, upholsterers, wholesalers, supply houses and renovators. Of these, eighty-seven companies were in Ontario. In all, 1,621 chemical determinations were made on these samples. Of the total number analyzed, 139 were obtained from different mattresses and articles of upholstered furniture. Sixty-four of these were found to be correctly labelled and seventy-five, of which fifty-eight originated outside the Province, were found to be incorrectly labelled. Efforts are being made to improve this aspect of the situation.

Fumigation Regulations:

Unfortunately, it is necessary to report two deaths associated with the use of cyanide for fumigation. Apparently in spite of instructions to the contrary, a man and his wife retired for the night without leaving the windows in their room open, after it had been fumigated. The fumigator's license was suspended for six months.

Those carrying out this procedure are required to be licensed by the Department. This year twenty-four licenses for the general use of this material and twenty-two licenses limited to commercial fumigation, were issued. Some consideration has been given to extending the minimum period of airing-out after fumigation from four to twelve hours. This would involve marked inconvenience for those in neighboring dwellings, and would probably terminate cyanide fumigation in apartment blocks because of the necessity for staying out of the premises overnight.

It appears that some provision should be made whereby the licensed fumigator will take complete responsibility for all arrangements connected with fumigation, to prevent persons not licensed from dividing financial responsibility with the fumigator. It should be emphasized that the regulations including the granting of licenses are directed entirely to the safety of the public, of the fumigator, and of his employees, and do not deal with the adequacy of the disinfection performed.

Medical Service and Sanitation in Unorganized Territory:

The regulations on this subject are enforced by six sanitary inspectors with a chief sanitary inspector. The sections dealing with medical care in the regulations were amended this year, providing for the establishment of a medical service of wider coverage, if the plan submitted is satisfactory to the Minister. The employer's liability for medical care is reduced, from a period of three months to one month, owing to war conditions; and, for maintenance outside hospital, to those who are indigent.

The increasing employment in camp operations, the difficulty experienced by contract physicians in obtaining medical assistants, the need for some arrangements for local supervision of private tourist camps and of sanitary conditions in unorganized municipalities, is considered in some detail in the chief sanitary inspector's report which follows:

Report of the Chief Sanitary Inspector:

In the year just closed employers of labour in Northern Ontario have experienced considerable difficulty with the acute shortage of labour, and it is quite apparent that large groups of workmen who usually have found employment in lumber, construction, mining and other industries located in the unorganized districts are now engaged in munition plants and subsidiary industries which are non-seasonal, permanent and more remunerative. However, to counteract the shortage of experienced workmen, lumber and pulpwood operators have to a considerable extent continued logging operations into the spring and summer months, only closing their camps for a few weeks during the year.

From our inspectors' reports it is shown that the employers are now taking a keener interest in living and environmental conditions for their employees in the camps. In many cases the employer is willing to go beyond what is legally required under the regulations. This condition is substantiated by the increased number of conferences between the operators and the district sanitary inspectors relative to the requirements under the regulations, and also in reference to the medical care and hospitalization of their workmen.

During the year conferences were held with the employers at every opportunity in the respective districts, also representatives of industry met in conference with Dr. J. G. Cunningham, Director, Division of Industrial Hygiene. From these meetings it was pointed out that owing to the war conditions and the apparent shortage of experienced labour, operators were now employing many workmen with known physical defects which originated previous to employment, thus creating a much greater liability than in other years. To meet this condition the regulations were amended during the year, reducing the employer's liability for medical, surgical and hospital care from three months to one month after the onset of illness. Under the new amendment many workmen with some form of physical disability or old age are now gainfully employed in industry without incurring any serious increased liability to the employer or the contract physician.

Industrial Camp Statistics:

In the four basic industries a total of 51,961 were employed as follows:

INDUSTRY	No. of Operators	No. of Camps	No of Men Employed
Mining.....	63	56	12,421
Lumber and Pulpwood.....	180	548	31,588
Sawmills.....	42	47	2,496
Construction.....	45	78	5,456
	330	729	51,961

From the above figures it is shown that 3,842 more workmen were employed over the previous year. This combined with a longer period of seasonal operations represents a very substantial gain in wages and production during 1941.

During the year the industrial contract physicians and the assistant physicians have submitted 2,614 camp inspection reports covering visits of inspection of the camps and the medical services rendered to the workmen under the regulations.

The following data have been compiled from the contract physicians' monthly reports as submitted to the Department during the year:

No. of Physicians' Reports Received	No. of Men Treated	Physical Examination	Communicable Diseases Reported	Immunizations
2,671	33,627	12,025	2,613	5,174

It will be noted that 33,627 workmen received medical attention either in the camps, the doctor's office or hospital, which shows 4,876 more workmen received medical care and treatment than in 1940. There has been improvement in the arrangements for transportation of sick and injured employees from the centre of operations to the established medical service and hospital centres but further effort in this direction is necessary. This condition is partially brought about by new developments opening up each year on limits far remote from the nearest railway centres or highways, thus increasing the mileage to be travelled and time involved by the contract physician. This combined with poor transportation facilities to the camps and workmen retards the development of the most satisfactory medical service by limiting the frequency of visits by the contract physician other than the minimum of one visit per month as required under the regulations.

With the present shortage of available assistant physicians for this type of medical work the operators are now considering the establishment of full time resident physicians in the camps with a local infirmary in the immediate vicinity for the treatment of minor injuries and illness, making arrangements in the hospital centres for the treatment of major illness and surgery. It is thought by approving medical contracts with a resident physician in camps where 500 or more workmen are employed, that this might attract the younger physician where available to take a keener interest in the frequency of sickness and accident cases at the point of operations, which is very desirable.

Physical examination of the workmen before employment is still a requirement by the mining companies and has to a great extent been carried out in other industries. However, it is now apparent that with the present shortage of labour, workmen with minor physical defects are now employed to a greater extent in industry than in previous years. In 1940 a total of 12,025 physical examinations of workmen for employment was made, a noticeable decrease of 2,278 than was made in the previous year, no doubt associated with the scarcity of labour.

Immunizations against typhoid and paratyphoid made were 5,174 compared with 7,276 carried out in 1940. This decrease may be explained by the extensive programmes of immunization inaugurated during the two previous years, the immunity being effective for two years. Immunization for typhoid fever is also a condition of employment in most of the mining camps and other industries in the unorganized territory.

From our records it is reported that 2,671 visits to the camps and workmen were made by the contract physicians and the assistant physicians. These visits of inspection with 784 inspections made by the district sanitary inspectors and from the central office, show that a total of 3,455 camp inspections were made during the year.

Communicable Diseases:

A total of 2,613 cases of communicable diseases were reported and investigated during the year from industrial camps located in unorganized territory as follows:

Influenza.....	1517	Measles.....	34
Pneumonia.....	18	Mumps.....	10
Impetigo.....	3	Tuberculosis.....	3
Conjunctivitis.....	77	Gonorrhoea.....	9
Diarrhoea.....	814	Scarlet Fever.....	5
Syphilis.....	8	Dysentery.....	59
Typhoid Fever.....	10	Chickenpox.....	4
Scabies.....	42		
			2,613

In addition to the above cases as recorded from the contract physicians' monthly reports we have 429 cases of communicable disease reported and investigated by the staff of inspectors in unorganized townships.

The higher incidence of communicable diseases is attributed to two conditions, first, more frequent reports and details of illness from the industrial physicians; secondly, influenza was epidemic in many camps in the districts of Kenora, Geraldton and North Bay during the past year.

It will be noted that 10 cases of typhoid fever were reported from the industrial camps. With the exception of 4 cases which developed in the lumber camps at Gogama, the others were isolated cases, two in the construction camps at Hearst, one in a camp in the Kenora district, one in the Sault Ste. Marie district, one in Fort William and one in the Kirkland Lake area. Two cases of paratyphoid were reported from one of the mines in the Kirkland Lake district. Diarrhoea was epidemic again this year during the summer and fall months in the mining camps and the area around Larder Lake. It is reported that this disease was endemic until late in the fall months. The source of the infection has not been established to date. From the reports received it is evident that a considerable amount of lost time to the workmen has occurred again this year through this source of illness. In some of the mines it is reported that 70 per cent of lost time to the workmen was caused by some form of intestinal disturbance. Our district inspectors in co-operation with the local physician in that area are carrying out further investigations to determine the cause.

Investigations were made regarding 17 cases of food poisoning which developed in one of the mining camps at Madsen Red Lake. The source of infection was traced to egg sandwiches, which had been carelessly prepared from an egg mixture. All the workmen recovered after a three-day illness.

Again this year the staff of inspectors was called on to make special investigations regarding home conditions of ex-sanatoria patients, known typhoid fever carriers, venereal disease control, bedding regulations and the enforcement of the Fire Marshal's Act.

The sanitary supervision of small villages and communities in the territorial districts without municipal organization with populations ranging from 100 to 1,800 has again this year presented some difficult problems. Numerous complaints have been received by the inspectors and the Department in regard to the question of garbage and night soil collection and disposal, and contamination of drinking water supplies and other nuisances which are continually recurring in these communities. From our inspectors' reports it is practically

impossible to organize a satisfactory voluntary system, as some of the residents will not contribute to the cost of such services on a voluntary basis. It is hoped that amendments to the *Public Health Act* will be made to meet this condition providing for the setting up of some form of taxation for this purpose under a local sanitary area board.

While the Provincial Sanitary Inspector's efforts are primarily concentrated in the unorganized territory, in the enforcement of the *Public Health Act* and regulations, the staff of inspectors has been called upon to assist the local boards of health in many organized municipalities during the year. The co-operation and assistance given by our inspectors have been much appreciated in such matters as the sanitary supervision of public water supplies, milk supplies and other local health problems.

In the judicial districts of the inspectors there are 60 pasteurization plants in organized municipalities; 9 plants are located in unorganized territory. Twenty-one chlorination plants are in organized municipalities and 36 in unorganized territory. All these plants located in the unorganized territory have come under the inspectors' routine inspection at regular intervals when in the areas on other department work.

During the months of July, August and September, many complaints were received and investigated by our staff of inspectors in regard to tourist camp sanitation. Most of the complaints were found to be justified and the results of these investigations have shown that many of our tourist camp operators and those who go camping are either inexperienced or untrained in elementary camp sanitation. There is a vast increase in the number of tourists now entering the Province each year. New highways and improved road facilities throughout the northwest part of the Province have decidedly encouraged the motor tourist combined with the foresight of the Department of Highways in establishing approximately two hundred parking lots for stop-over campers. These parking lots are usually placed under the supervision of one or more caretakers and come under the district sanitary inspectors for sanitary supervision.

Housing and catering to the tourist trade has now developed into a large business enterprise, and with the prospects of a still further influx of tourists in 1942 it is evident that our inspectors will be required to give more attention and time to the sanitary supervision of the tourist operators' camps and the adjacent settlements such as Temagami and other stopping-off points.

In regard to fresh air camps, with a Provincial sanitary inspector's office in the centre of each district in Northern Ontario, the various officials and leaders of organizations and charitable institutions, who operate children's fresh air camps in the summer months, have co-operated with the inspectors. They usually request the inspector to make a sanitary survey of the camp site, sanitary conveniences and laboratory tests of the proposed water and milk supplies before the camp is opened up for the season. When it is possible there is a follow-up inspection made when the camp is in operation.

During the course of the year the staff of inspectors made a total of 1,554 investigation inspections in the territorial districts.

Cancer Control:

In 1941, there were approximately 2,100 new cases of cancer treated at the seven clinics across Ontario. Preliminary data on the Middlesex survey to determine the number of cases in the country in 1939, suggest that the number of cases of cancer reaching the clinics is considerably below what should be

expected. There is involved more public education on the importance of the early recognition and adequate treatment of the disease. The Canadian Society for the Control of Cancer is engaged in such educational work.

This year the technical meeting of the Directors of the Cancer Clinics was held in Toronto in June, when detailed discussion took place on the results of treatment of cancer of the cervix, based on the records of the clinics. The new record system has now been in effect for five years and this, together with records previously developed at some of these hospitals, will make these discussions of increasing value as each year passes.

Radon was supplied to the extent of 7,162 millicuries, including a small amount to the National Research Council and to the Toronto General Hospital for research purposes. The radium emanation plant which has now been operating for nine years, required renovating carried out by the Division staff. There have been three changes in personnel operating this equipment in the past year. The X-ray equipment at some of the clinics has been calibrated for X-ray output. The others will be completed shortly. A full time physicist is now employed at the Toronto General Hospital clinic, which makes it possible for the physicist in the Division to devote more attention to the cancer clinics in the other centres. The ionization chamber for measuring the strength of radon seeds has been rebuilt and improved. The Henson quartz fibre electroscope has been obtained for measuring stray radiation from X-ray equipment and radioactive materials used in the cancer clinics and in industry.

THE SIXTH ANNUAL STATISTICAL REPORT ON CANCER
CALENDAR YEAR 1941

PREPARED BY DIVISION OF MEDICAL STATISTICS

In the following report there are presented trends in cancer mortality for the year 1940, and tabulations of the work performed by the seven Cancer Centres in Ontario for the year 1941.

CANCER MORTALITY

Table A shows the volume of deaths attributed to cancer for the past twenty years. It will be seen in column 4 that the percentage of deaths attributed to this disease has almost doubled since 1921, from 7.5 per cent. to 12.6 per cent. The crude death rate has also shown a steady increase with a rate of 88.1 per 100,000 in 1921 to 128.5 per 100,000 in 1940. To be kept in mind when reviewing statistics over a period of years, is the fact that possible changes may have occurred in death certification.

TABLE A
RECORDED CANCER MORTALITY
ONTARIO, 1921-1940

YEAR	Total Deaths All Causes	Cancer Deaths	Per Cent. of Total Deaths	Crude Death Rate*
1921	34,551	2,585	7.5	88.1
1922	34,034	2,609	7.7	87.5
1923	35,636	2,724	7.6	89.9
1924	33,078	2,946	8.9	96.2
1925	33,960	2,951	8.7	95.1
1926	35,909	3,116	8.7	99.0
1927	34,775	3,117	9.1	99.7
1928	37,128	3,441	9.3	106.8
1929	38,123	3,402	8.9	104.0
1930	37,313	3,635	9.7	109.7
1931	35,705	3,726	10.4	108.6
1932	36,436	3,825	10.5	110.1
1933	35,301	4,044	11.5	114.7
1934	35,105	4,034	11.5	113.2
1935	36,317	4,214	11.6	117.1
1936	37,571	4,441	11.3	120.4
1937	38,475	4,547	11.8	122.0
1938	36,890	4,472	12.1	119.9
1939	37,530	4,567	12.2	121.7
1940	38,503	4,847	12.6	128.5

*Rate per 100,000 population (estimated).

Site of Disease.—The distribution of cancer deaths by site and sex for the five years 1936-1940, is given in Table B. Nearly one-third (31.6%) of the 22,874 deaths during this period were classifiable as cancer of the digestive tract (other than stomach and duodenum). This site is found to be the most frequent in both men and women. The next most frequent site among men is the stomach and duodenum, comprising nearly one-quarter of all male cancer deaths. Among women the next most frequent sites are the breast and genital organs, each with

approximately one-fifth of the female cancer deaths. Deaths from cancer of the buccal cavity, urinary organs and respiratory organs are shown to be more common among males than among females.

TABLE B
CANCER DEATHS BY SEX AND SITE
ONTARIO, 1936-1940

SITE	Males		Females		Both Sexes	
	Deaths	Per Cent. of Total	Deaths	Per Cent. of Total	Deaths	Per Cent. of Total
Stomach and Duodenum.....	2,582	24.0	1,634	13.5	4,216	18.4
Other Digestive Tract.....	3,543	32.9	3,685	30.5	7,226	31.6
Genital Organs.....	1,271	11.8	2,459	20.3	3,730	16.3
Breast.....	36	0.3	2,514	20.8	2,550	11.1
Buccal Cavity.....	650	6.0	133	1.1	783	3.4
Urinary Organs.....	795	7.4	384	3.2	1,179	5.2
Respiratory Organs.....	736	6.8	300	2.5	1,036	4.5
Skin.....	267	2.5	183	1.5	450	2.0
Other or Unspecified Sites.....	900	8.3	804	6.6	1,704	7.4
ALL SITES.....	10,780	100.0	12,094	100.0	22,874	100.0

Age.—Deaths from cancer at certain ages is shown in Table C. During 1940, 12.6 per cent. of all deaths in the province were attributed to cancer. At ages 50-69 years this disease held second place as a cause of death. Over 14 per cent. of the cancer deaths were at ages under 50 years. For ages over 59 years the cancer deaths exceeded only by diseases of the heart in the group 60-69 years and by diseases of the heart and diseases of the arteries in the group 70 years and over.

TABLE C
CANCER AS A CAUSE OF DEATH BY AGE
ONTARIO, 1940

AGE GROUP	Cancer Deaths	Per Cent. of All Deaths	Rank as a Cause of Death	Specific* Death Rate	Per Cent. of Cancer Deaths
0-19	42	0.9	3	0.9
20-49	669	13.0	Third	41	13.8
50-59	1,011	21.3	Second	293	20.9
60-69	1,258	17.6	Second	553	26.0
70 and Over	1,867	11.1	Third	1,196	38.5
ALL AGES	4,847	12.6†	Third	128.5	100.0

*Per 100,000 population.

†Total deaths in 1940 were 38,386.

Of prime importance are those cases in which death was attributed to cancer of an "accessible" site at ages under 70 years. Only 92 or 6.8 per cent. of the male cancer deaths are classified as being accessible sites. In the case of females, 42.3 per cent. are in this category. Breast cases constituted nearly one-quarter (23.5%) of the female cases and uterus cases nearly one-sixth (17.4%).

TABLE D
 "ACCESSIBLE" CANCER MORTALITY AT AGES UNDER 70

Other Sites.....	1,261	93.2	938	57.7
ALL SITES.....	1,353	100.0	1,627	100.0

ONTARIO CANCER CENTRES—CALENDAR YEAR 1941

As in previous years the Division of Medical Statistics, Department of Health, has compiled a statistical analysis obtained from the individual record card of each patient admitted to one of the seven Cancer Centres in the province. Each Centre is supplied with a report concerning its own patients and these individual reports are then combined to provide data for the present report.

The volume of new cases seen and treated by each clinic is shown in Table 1. During the year 4,697 patients were treated at the clinics. Slightly over one-half of these cases were classified as being non-malignant tumours or non-neoplastic diseases.

Of the total of 2,473 cancer cases seen during the year, 2,295 or 93 per cent. received treatment. This is an increase of 166 cases over the previous year.

In every centre, excepting Ottawa General, the private cases exceed the public cases.

TABLE 1
NEW CASES ADMITTED—BY CENTRE
CALENDAR YEAR 1941

CENTRE	NEW CANCER CASES						Non-Cancer Cases†	Total New Patients Treated
	On Record			Treated*				
	Private	Public	Total	Private	Public	Total

Windsor	186	33	219	159	27	186	190	376
TOTAL	1,540	933	2,473	1,460	835	2,295	2,402	4,697

*Treated by any method or combination. Includes cases treated by surgery alone, but excludes palliative surgery.

†Non-malignant tumours and non-neoplastic diseases.

Table 2 shows the number of new cases admitted during the year by site of disease for each of the seven Centres. On comparing these figures with those of the previous year, an increase in the number of cases will be seen for all sites except breast. In 1940, there were 451 cases of breast cancer admitted, while in 1941 there were only 396 cases. Cases of oral cancer increased in from 331 cases in 1940 to 373 cases in 1941.

*Recurrences excluded.

Upon comparing the two periods (1936-1940 and 1941) it will be seen that there has been a decrease in both stage I and II in the breast cases. There is a more pronounced decrease for these two stages when the figures for 1940 and 1941 are compared. Over 50 per cent. of the cervix uteri cases were staged either I or II upon admission. In 1940, this percentage amounted to only 45 per cent. Excluding skin cases of which 80.2 per cent. were classified as stage I,

it is found that only 37.4 per cent. of the patients with cancer of the breast, cervix uteri and oral cavity presented themselves for treatment before local spread, extension or metastasis.

Evidence of greater delay (in terms of stage of disease when treatment was begun) in public patients as compared with private patient still persists. In cases of oral cancer 67.4 per cent. of the private patients presented themselves for treatment before local spread or metastasis had occurred, while for public cases this percentage amounted to only 37.2 per cent. Much the same trend is found in the other two accessible sites shown.

TABLE 7

*Excluding recurrences.

Table 8 shows the classification of patients admitted during the year. There is only a very slight rise in the percentage of patients with recurrences treated, the figures being 6.4 per cent. in 1940 and 7.1 per cent. in 1941. Nearly one-third of these recurrences were breast cases. One-half of the previous cases (those cases in which other methods first preceded radiotherapy) were breast cases.

TABLE 8

The frequency of histological examination is shown in Table 9. Of the total of 2,295 cases treated, there were 1,888 cases or 82 per cent. for which a histological confirmation of the clinical diagnosis was available. A pathological examination was done on 88 per cent. of the breast cases; 97 per cent. of the uterus cases; and 90 per cent. of the oral cases.

Table 10 shows the proportion of breast, uterus, oral cavity, air passages and rectum cases in each clinic for which a pathological report was obtained. Both of these figures (89.0% and 89.9%) show a slight increase over the previous year. Private cases at the Toronto clinic and public cases at the Windsor clinic for 1941 have both shown a rise of 10 per cent. over 1940.

The prognosis (*i.e.* whether regarded at the outset as treatable for cure or for palliation only) of new cases treated during the year is given in Table 11.

Of the total of 2,473 cases seen at the Centres, 1,561 or 63.1 per cent. were considered treatable for cure. This is an increase of 6 per cent. over the previous year. In cases of skin cancer there is a significant increase in the ratio of cure to palliation, the figures being 52.1 in 1941 and 35.9 in 1940.

*For any reason—see subsequent section and tabulation.

A summary of the methods of treatment among new cases during the year is shown in Table 12. In 1941, 69.6 per cent. of the 2,299 cases received radiotherapy alone. The corresponding figure for 1940 was 62.9 per cent. Those cases treated by radium alone in 1941 showed a substantial increase over the previous year—590 in 1941 and 504 in 1940. Cases treated by surgery and X-ray decreased from 476 or 22.1 per cent. in 1940 to 393 or 17.2 per cent. in 1941.

TABLE 12
METHOD OF TREATMENT OF NEW CASES DURING 1940—BY SITE*

*Recurrences excluded.

†Includes 2 cases treated with diathermy only.

‡Includes 5 cases treated with fulguration and 1 case treated with endothermy.

In Table 13, there is shown the distribution of treated cases by Centre and method of treatment. Radium alone, or in combination, as a method of treatment shows a marked variation from clinic to clinic. In Kingston clinic, 60 per cent. of the cases were treated in this way. In Toronto, the percentage was 55 per cent. In Hamilton clinic only 19 per cent. were so treated. Differences in site distribution at different Centres would not be great enough to account for the whole of this variation.

xPercentages calculated only where 5 or more cases.

†Includes 5 cases treated with fulgaration and 1 case with endothermy.

‡Includes 2 cases treated with diathermy.

The proportion of cases treated with radium alone and in combination in each Centre is shown in Table 14. A more extensive use was made of radium alone as a form of treatment at Kingston, London, Ottawa Civic and Toronto than at the other three Centres. There is a high proportion of cervix cases treated by radium alone or in combination in all seven centres, ranging from 63 per cent. at the Ottawa General to 91 per cent. at Kingston. The total percentage of cases for this site has increased over the two previous years—84 per cent. in 1941, as compared with 76 per cent. in 1940 and 74 per cent. in 1939. Kingston, London, Ottawa Civic and Windsor Centres have used radium more extensively for oral cases than have the others. Radium was not used to treat skin cases at the Ottawa General clinic and was used in only 3 per cent. of these cases at Hamilton. Radium treatment was given to 96 per cent. of the skin cases at the Toronto Centre and 95 per cent. of the skin cases at the Ottawa Civic Centre.

†With X-Ray, Surgery or both.

Table 15 shows the number and the reason why 178 or 7.8 per cent. of the 2,295 patients seen during the year were not treated. Patients who received palliative surgery are included in this group. In nearly one-third of these cases, treatment was not advised because of the late stage of disease at the time of admission. The distribution of the cases by clinic is as follows: Hamilton, 3; Kingston, 11; London, 24; Ottawa Civic, 16; Ottawa General, 19; Toronto, 72; Windsor, 33.

The number of physicians referring cancer cases to the clinics is illustrated in Table 17. The 1,230 different physicians referred one or more cases each to the clinics during the year, or an average of 2.01 new cases per referring physician. The ratio of physicians to patients for each individual clinic shows very little variation from the previous year. The 1,230 referring physicians represent more than one-quarter of the total number of physicians engaged in practice in the province.

*Per 100,000 population.

†Estimated for 1941.

‡Includes District of Patricia.

Of the 4,697 cases admitted to the Cancer Centres, 2,402 were classified as being non-cancerous. Of these 1,126 were patients with benign tumours and 1,276 were patients with various non-neoplastic diseases. Table 19 shows the summary of these cases. There is an increase of these non-cancerous conditions of 293 cases or 13.9 per cent. over the previous year.

Keratosis, considered a pre-cancerous lesion, remains high. There is an increase in this condition of 92 cases over the year 1940. Leukoplakia, also considered a pre-cancerous lesion, dropped from 77 in 1940 to 30 in 1941.

DIVISION OF DENTAL SERVICES

H. J. HODGINS, D.D.S., *Director.*

As in former years, the activities of the Division have included dental health education; supervision of dental services in Ontario Hospitals, Reformatories, Sanatoria and General Hospitals; direction of the operation of the dental car; and administration of the plan of emergent dental treatment for relief recipients.

The Division supplied literature to interest the children and teachers in dental health, and mouth examination charts for use in a dental survey. The Provincial Treasury grant to pay a percentage of the cost of establishing and operating school dental clinics, according to the regulations set up, has been taken advantage of by a number of municipalities this past year, in addition to those already in existence. A number of Women's Institutes, Service Clubs and local organizations have evinced an interest in dental health problems, and the Director, assisted by members of the Public Dental Health Committees of the Ontario Dental Association and the Canadian Dental Hygiene Council, gave informative talks and showed educational slides and pictures. A number of interested persons were reached by means of the exhibit at the Plowing Match, held this year at Peterborough, where there was an attendance of 100,000. The dentist of Peterborough and district co-operated with the Director and members of the Public Dental Health Committees in supplying information to the public in respect to school dental services, and showing motion pictures on dental health.

Every patient admitted to the Ontario Hospitals is given a dental examination, mouth conditions charted and radiographs made when advisable. During the year the Director regularly inspected the clinics, checked the monthly reports of the dentists in charge, and was available for consultation when required. In addition, dental clinics in Training Schools and Reformatories under the jurisdiction of the Provincial Secretary were inspected by the Director of this Division.

By Order-in-Council this year the Director has been appointed to inspect the dental clinics in all Sanatoria and public general hospitals. A large number of these were visited and it was found that the majority of the Sanatoria are well-equipped; while possibly more time might be spent by the dentists, the patients are well taken care of. In view of the importance attached to dental conditions in the Army and in public dental health, it is hoped that the general hospitals will see their way clear to provide adequate dental service to meet their individual needs.

The Central Dental Laboratory has taken care of the denture work for all the Ontario Hospitals, and in addition to making 237 full dentures and 68 partial dentures has been busy with repairs, rebases, etc. The Laboratory was changed to a better location, and remodelled to modern standards, during the year.

The Dental Car, in the unorganized territory of Kenora, has done excellent work. Approximately 1,200 school children received treatment in the car clinic,

and we feel that the health of these children, otherwise unable to secure dental treatment, will benefit.

The plan of emergent dental treatment has been changed somewhat in the past year. While the patient is still required to secure a relief voucher from the Relief Officer, the accounts of the dentists are sent on to the Medical Relief Board for payment instead of to the Treasury Department. The Medical Relief Board receives funds from the Department of Public Welfare according to the number of persons on relief in each municipality from which dental accounts are received.

Further enlistments in the Canadian Dental Corps during the year, were Dr. H. Mason and Dr. E. G. Sinclair.

HEALTH EDUCATION

MARY POWER, B.A.

1. *Health Education of the Public* has been carried on chiefly through the distribution of leaflets. The policy of the Department is to refer to the local medical officer of health all requests for information received in our office from his community. In this way the M. O. H. has knowledge of the number and nature of the health education needs of his area. According to his wishes, material is supplied to him or sent direct to the organization or individual requesting it.

Among the departmental publications, "The Baby" and "Safe Milk" have been in greatest demand. While leaflets on various communicable diseases are always popular, the public is showing increased interest in immunization.

We wish to acknowledge our sincere thanks to the Canadian Tuberculosis Association for their generous co-operation in supplying us with the various leaflets on this subject for distribution throughout Ontario again this year.

To the life insurance companies we are indebted also for assistance in this connection. The London Life Insurance Company have supplied us with their leaflet on Colds, while the Metropolitan Life Insurance Company has been most generous in donations of material.

Special Groups:

The Department has been most gratified by the intense interest in health as a subject for discussion and activity by Home and School Clubs and Women's Institutes. We have special packages of material selected for such groups and have sent more than fifteen thousand leaflets to interested members this year.

Exhibits:

The 1941 International Ploughing Match was held at Peterborough and the booth of the Department featured tuberculosis and materials for health education in the school and for the general public. The health interest of the Match this year was enhanced by the attractive display and moving pictures exhibited by the Ontario Dental Association.

Our service to training schools for nurses was continued, two thousand pieces of material having been sent to instructresses requesting them.

For their work with teachers we have forwarded special packages of material to local public health nurses, representing a total of thirteen hundred leaflets.

Our annual check of sources of free or inexpensive material which may be secured by teachers and nurses was made again this year, and covered Canada and the United States.

2. *School Health Education:*

All courses for teachers were dropped during the summer of 1941, and there was in consequence no summer course in Health Education.

We have endeavoured to keep in touch with the teachers who took the Course in former years. Open House has been continued on Saturday morning for those who wish to look up references or discuss school health problems with us.

The mailing list of the Course is revised each year, and a budget of new reference material sent to teachers requesting same.

Service was given during the year as follows:

	Budgets Sent	Material Sent
To Teachers who have taken S. Course in Health Education	535	4,933
Elementary School Teachers.....	125	4,181
High School Teachers	90	2,781
Normal School Instructors	4	1,925

The loan service of references for teachers was continued; two hundred books were loaned to teachers and others interested in school health.

3. Ontario Health Officers' Association Annual Conference, 1941:

The meeting this year was a joint conference with the Canadian Institute of Sanitary Inspectors (Ontario Branch). The Veterinary Public Health Services Section held their first meeting, having organized the Section in 1940. The combined attendance exceeded five hundred.

No dinner session was held this year but a luncheon meeting was held on each day of the Conference. The speaker for the first luncheon was Group Captain R. W. Ryan, Director Medical Services, Royal Canadian Air Force, who gave a very interesting and valuable talk upon certain aspects of aviation medicine. The second luncheon was the Business Meeting of the Association, upon which occasion the President, Dr. F. A. Ladouceur, paid tribute to the members who had died since the last Conference, with special mention of Dr. J. W. S. McCullough, Dr. J. G. Fitzgerald and Sir Frederick Banting. The meeting stood during the reading of the following list of members who had passed on:

Medical Officers of Health who have Died During the Period, May, 1940-1941:

Name of Doctor—Municipality	Name of Doctor—Municipality
Berdan, O. L., Strathroy T.	McNeice, E. W. G., Aylmer T. and Malahide Tp.
Dewar, R. D., Ekfrid Tp.	Patterson, H. Mc., Rodney V.
Dowsley, G. W. O., Thorah Tp.	Rigg, J. F., Niagara T.
Hyndman, A. B., Huntley and Torbolton Tps.	Rogers, N. W., Barrie T.
Johnston, R., Kennebeck Tp.	Rutherford, T. D., Burford Tp.
Kane, J. A., Dack Tp.	Sadler, G. S., Bangor, Radcliffe and Raglan Tps.
McKay, D., Collingwood T.	Simpson, A. A. J., Ashfield Tp.
McKee, J. G., James Tp.	Stallwood, J. B., Beamsville V.
McLean, C. E., E. York Tp.	Lockhart, G. D., King Tp.

The Secretary also read the names of those who have entered military service since the last meeting and the list of retirements during the year:

Enlisted Members:

C. G. Bell, Lion's Head.
 W. H. Carson, Southampton.
 E. J. Cloutier, Ansonville.
 P. Poisson, Tecumseh.
 F. Adams, Windsor.
 R. R. Burnett, Durham.
 J. B. Aiken, Fisherville.
 C. D. Kilpatrick, Blyth.
 C. C. Misener, Crediton.
 W. A. McKibbin, Wingham.
 R. L. Norris, Wyoming.
 E. S. Bissell, Mallorytown.
 H. C. Burleigh, Bath.
 J. P. McManus, Tamworth.
 F. A. Strain, Gore Bay.
 Sandford English, Simcoe.
 W. B. Marshall, Colborne.
 J. A. McDonald, Hastings.

T. B. Feick, New Hamburg.
 R. B. Gillrie, Mitchell.
 J. G. Kirk, Listowel.
 Wm. Aberhart, Mitchell.
 O. Van Luven, Consecon.
 C. W. McCormack, Renfrew.
 J. M. Nettleton, Penetanguishene.
 R. W. Mole, Tottenham.
 W. A. Milligan, Cornwall.
 J. Feller, Warren.
 G. E. McCartney, Fort William.
 L. V. Shier, Lindsay.
 K. B. Waller, Rockwood.
 L. M. Stuart, Guelph.
 C. V. Milligan, Forest Hill.
 W. L. Carruthers, Mt. Albert.
 H. R. Adams, Long Branch.
 G. Allison, Picton.

Retired Members:

H. E. Peart, Elmwood.
 J. A. McInnes, Timmins.
 F. Martin, Dundalk.
 H. O. Singer, Markdale.
 A. H. Jeffrey, Baysville.
 C. E. Lindenfield, Bala.
 W. Robertson, Elora.

W. H. Oaks, Bright.
 R. A. Burns, Inglewood.
 A. T. Shanette, Everett.
 W. Glaister, Wellesley.
 Wm. Geiger, Waterloo.
 E. C. McFarlane, Arthur.

Following the reception of the report of the Nomination Committee, of which Dr. G. B. Stalker, Hanover, was convener, and Dr. H. M. Young, Iroquois Falls, and Dr. C. H. Bird, Gananoque, were members, the President, introduced to the meeting the President-elect, Dr. H. B. Kenner, Medical Officer of Health, Stratford. Other nominations were:

1st Vice-President,	Dr. J. C. Gillie, Fort William.
2nd Vice-President	Dr. J. W. Mackie, Lansdowne.
Secretary,	Miss Mary Power.

Executive Committee:

Representing Districts of the Ontario Medical Association—

Dr. C. A. Harris, London.
 Dr. J. E. Davey, Hamilton.
 Dr. J. W. Mackie, Lansdowne.
 Dr. G. B. Stalker, Hanover.
 Dr. W. E. Brown, Orillia.
 Dr. H. M. Young, Iroquois Falls.
 Dr. G. S. Cronk, Belleville.
 Dr. D. G. Dingwall, Dryden.
 Dr. C. H. Bird, Gananoque.
 Dr. M. G. Thompson, Cornwall.

The Resolutions Committee, composed of Dr. J. E. Davey, Chairman, Dr. J. W. Mackie, and Dr. C. A. Harris, brought in a report sponsoring the following four (4) resolutions—all of which were adopted.

Resolutions:

- I. That the Ontario Health Officers' Association send to the Minister of Health a recommendation that provision be made in the Regulations under the *Public Health Act* requiring that the local Boards of Health make available in the municipality immunization facilities for the prevention of those communicable diseases for which preventive measures are recommended and biological products supplied by the Department of Health of Ontario.
- II. That this Conference submit to the Minister of Health the suggestion that serious consideration be given to the setting up of a standard rate of allowance for attendance at the Annual Conference of the Medical Officers of Health.
- III. In view of the fact that the great need of our country for the present and future generations is to make sure that the youth of our country should be of the highest standard of mental, moral and physical fitness;

BE IT RESOLVED that this Conference request that serious consideration be given by our Executive Committee to the advisability of initiating a campaign of education for young people contemplating marriage; and to the preparation of a brief for submission to the Provincial Secretary requesting his consideration of such amendments to the Solemnization of Marriage Act as will ensure that good health and sound constitution be necessary pre-requisites for those entering the marital relation.

- IV. That this Convention request the Executive to include in each year's program a period for a Round Table discussion with the various directors of the Department; that previous to the Convention Medical Officers of Health be requested to forward to the Secretary a statement of the most serious problems and difficulties that have been encountered during the year.

The following resolution, drawn up by the Medical Officers of Health for communities of 4,000 and over, was submitted from the floor. After due discussion, it was adopted by the meeting:

- V. BE IT RESOLVED that this Conference, (Medical Officers of Health in municipalities of 4,000 and over in Ontario), recommend that all recruits to all the branches of the Canadian Active Services, have a blood serological test included in the routine examination for the service and also upon discharge; and that this resolution be forwarded to the responsible authorities.

Following submission of Resolution III the following motion was offered as an amendment:

- VI. That the Ontario Health Officers' Association recommend to the Minister of Health, legislation providing that no feeble minded inmate of an Ontario Hospital, capable of bearing children, be discharged until an effort has been made to secure the consent of the parent or guardian, to the voluntary sterilization of such inmate.

The meeting questioned the status of the motion as an amendment; it was then submitted as a separate motion and later adopted.

The meeting showed its appreciation of the programme by a full attendance and sustained interest in the general sessions. The plan of holding section

meetings on the second morning of the Conference was heartily endorsed and resulted in a unanimous expression of satisfaction accompanied by a request for a repetition of the plan at the next Conference.

The Veterinary Public Health Services Section, under the able guidance of Dr. H. G. Davis, of Aylmer, arranged a programme of great interest and value. The members who participated gave unstintingly of their time and provided a contribution of much merit to the Annual Conference.

The Canadian Institute of Sanitary Inspectors increased their attendance and accomplished a great deal in the two days of business. The members who submitted papers based their material on wide experience and technical knowledge which speaks well for the future contribution of this group to Public Health in Ontario.

The programme of the Joint Conference is given in detail:

ONTARIO HEALTH OFFICERS' ASSOCIATION

ANNUAL CONFERENCE 1941

Joint Meeting with the

CANADIAN INSTITUTE OF SANITARY INSPECTORS (ONTARIO BRANCH)

ROYAL YORK HOTEL, TORONTO, MAY 22-23, 1941
(Daylight Saving Time)

THURSDAY, MAY 22

9.00 a.m.—Executive Meeting. Secretary's Room.

9.00 a.m.—Registration.

9.00 a.m.—Showing of Films.

10.15 a.m.—General Session. Crystal Ball Room.

Review of Legislation as passed at the 1941 Session of the Legislature:

Interpretation of the Legislation in General Terms.

Dr. B. T. McGhie, Deputy Minister of Health.

Alan Van Every, Solicitor to the Department of Municipal Affairs.

Specific Legislation and its Application by the Local Community.

Directors of the Divisions, Ontario Department of Health.

11.30 a.m.—Appointment of Committees:

Committee on Resolutions.

Committee on Nominations.

SECTION MEETINGS

10.15 a.m.—General Session. Crystal Ball Room.

SECTION:—CANADIAN INSTITUTE OF SANITARY INSPECTORS (Ontario Branch)

Hall "B"

10.00 a.m.—Registration.

Conference opened.

Chairman: D. S. McKee, C.S.I.(C), President, Ontario Branch, Canadian Institute of Sanitary Inspectors.

(a) Housing and Sanitary Control in Rural and Small Urban Communities.
Hugh McIntyre, A.R. San.I., Provincial Sanitary Inspector, Kirkland Lake.

(b) The Role of the Sanitary Inspector in a Modern City Health Service.
E. J. Picton, C.S.I.(C), Sanitary Inspector, Hamilton.

(c) Sanitization of Eating Utensils.

R. A. MacPherson, B.A., C.S.I.(C.), Sanitary Inspector, Peterborough.

Discussion.

LUNCHEON MEETING

Tudor Room

12.30 noon—Luncheon Session. All Sections.

Address of Welcome. Harold J. Kirby, K.C., Minister of Health for Ontario.

Address. Group Captain R. W. Ryan, Director, Medical Services, Royal Canadian Air Force.

THURSDAY, MAY 22

(AFTERNOON SESSION)

Crystal Ball Room

2.15 p.m.—Presidential Address. Dr. F. A. Ladouceur.

2.30 p.m.—Symposium: "Public Health in Wartime."

1. Communicable Disease Control. Dr. John T. Phair, Chief Medical Officer of Health.

2. Special Measures with Regard to Cerebro-Spinal Meningitis.
Dr. Nelles Silverthorne, Research and Clinical Associate, Connaught Laboratories.

3. The Physician's Contribution to Industrial Health in Wartime.
Dr. J. Grant Cunningham, Director Division of Industrial Hygiene, Ontario Department of Health.

4. Civilian Defence. Dr. W. L. Hutton, Medical Officer of Health, Brantford.
Showing of Film: "London Can Take It."

4.00 p.m.—Committee on Resolutions will meet in the room of the President.

FRIDAY, MAY 23

(MORNING SESSION)

SECTION MEETINGS

SECTION: MEDICAL OFFICERS OF HEALTH FROM COMMUNITIES OF POPULATION 4,000 AND OVER

Hall "D"

Chairman: Dr. H. B. Kenner, Medical Officer of Health, Stratford.

9.30 a.m.—Administrative Procedures in Problems of Sanitation.

Dr. A. E. Berry, Director Division of Sanitary Engineering, Ontario Department of Health.

Value of the Annual Report.

Dr. J. Edgar Davey, Medical Officer of Health, Hamilton.

The Health Programme in the High School.

Dr. D. V. Currey, Medical Officer of Health, St. Catharines.

Whose is the Responsibility for Following Up the Venereal Disease Contact?

Dr. W. H. Avery, Director Division of Venereal Disease Control, Ontario Department of Health.

The Urban Centre and Suburban Areas: Responsibility for Child Health Services
Dr. C. A. Harris, Medical Officer of Health, London.

Question Box.

SECTION: MEDICAL OFFICERS OF HEALTH FROM COMMUNITIES OF POPULATION 4,000 OR LESS

Committee on Accident Prevention.

Committee on Nominations.

Election of Officers.

FRIDAY, MAY 23

(AFTERNOON SESSION)

Crystal Ball Room

2.15 p.m.—Influenza. Dr. Ronald Hare, Research and Clinical Associate, Connaught Laboratories, University of Toronto.

Value of Tuberculin Testing and X-Raying of Positive Reactors in Certain Groups of the Population.

Dr. L. A. Pequegnat, Deputy Medical Officer of Health, Toronto.

Psittacosis. Dr. A. L. MacNabb, Director of Laboratories, Ontario Department of Health.

Trichiniasis—Report of a Recent Outbreak: Parasitology—Symptomatology—Pathology—and Control.

Dr. W. J. Deadman, Director of Laboratories, Hamilton.

SECTION MEETING

SECTION: CANADIAN INSTITUTE OF SANITARY INSPECTORS (Ontario Branch)

Hall "B"

2.15 p.m.—Annual Meeting and Election of Officers.

DIVISION OF NURSE REGISTRATION

ALEXANDRA M. MUNN, *Reg. N., Director.*

I have the honour to present the Report of the Division of Nurse Registration for 1941.

Hospital inspection visits were fewer for 1941 due to epidemics in nursery units, and a subsequent survey of these units.

Hospital inspection visits, covering from one to three days, were made to thirty-eight general hospital training schools, three mental hospital training schools and three affiliate hospitals. As well, there were twenty-nine emergency and "brief call" visits paid to various hospitals throughout the Province. These visits were introductory to a newly appointed Inspector of Training Schools.

Special stress was laid on shorter hours of duty for student nurses, development of the services in the hospital with a view to more valuable practical experience for student nurses; and the health programme. The new cumulative health record is in use in most training schools and is being enthusiastically endorsed by those using it.

In discussing the student educational programme with Superintendents of Nurses and Instructresses the need for more and closer clinical supervision of students was stressed.

There would appear to be a definite lessening in days of illness among student nurses where hours of duty have been shortened. Night hours of duty remain too long in many hospitals.

The majority of training schools have appointed full time Instructresses. In a number of the small hospitals this executive fills the dual position of Instructress and Assistant to the Superintendent. This is an encouraging, progressive step.

Superintendents report less applicants than during 1940, but applications in the majority of hospitals were still sufficient to give a satisfactory choice.

Regular hospital inspections were interrupted because of epidemics in obstetrical nurseries. A survey was organized. Twenty-six hospitals were visited where details of nursing techniques were inquired into and, where possible, observed. This survey was carried on in conjunction with the Division of Provincial Laboratories and Division of Epidemiology.

Council of Nurse Education:

Seven meetings were held. Routine business included arrangements for registration examinations in May and November.

The Headmasters' Regional Conference in connection with secondary schools presented certain recommendations for the consideration of the Council of Nurse Education, with the hope that the high school diploma would be acceptable in lieu of twelve Middle School papers. No action has been taken, but this request will come up again for final decision when annual reports from training schools have been received.

Following the Nurse Registration Examinations in May a recommendation was made by the Chairman of the Examining Board, that the time table should be re-arranged so as to give students more time. A half-day was added in November and the results seem to have justified this change.

At the request of the Registered Nurses' Association of Ontario, consideration was given to the organization of a course in practical nursing, sponsored by that organization, and directed by the London Central Registry. The outline is as follows:—

1. A central school for the training of the practical nurse.
2. The course of training to cover a period of six months.
 - (a) Three months' tuition in the Central School.
 - (b) Two months in a hospital for general training. (A hospital for chronic and incurable cases; not caring for actually ill patients.)
 - (c) One month in field work under supervision of a Registered Nurse. (The housekeeping and care of sick in homes.)
3. At the successful completion of the course a certificate that would be recognized by the Provincial Department of Health at such time as practical nurses are registered and licensed.

A progress report received gives the information that twelve students were entered in September and that ten have completed the first three months of the course. This experiment is being watched with interest since it is the first of its kind to be attempted in Ontario.

Following the annual meeting of the Registered Nurses' Association of Ontario we were asked to approach all Superintendents of training schools with a request that all student nurses be given first aid and emergency nursing in their final year. There has been a satisfactory response and there will be no difficulty in covering the work satisfactorily in hospitals so that nurses will graduate with full knowledge of their place in basic organization.

The Ontario Dental Association approached the Council of Nurse Education with an outline of lectures on Dentistry, to be given to all student nurses. The outline which was offered was modified to meet the needs of student nurses and all schools are now asked to give a minimum of three lectures on Dental Surgery and Hygiene. The Dental Association is giving fine co-operation in assisting with the selection of lecturers where necessary in certain centres. The outline of the course is as follows:

Lecture I.—The Importance and Anatomy of the Teeth:

1. The purpose, value, importance and number of teeth.
2. The dentitions and their development.
3. Dental nomenclature, anatomy and gross histology of the teeth and adjacent structures.
4. The importance of first dentition; the six year molar; and the effect on facial development.

Lecture II.—Dental Infections:

1. The theory of caries.
2. Pulpitis.
3. Devitalization of the pulp.
4. Abscesses and root infections.
5. Periodontal diseases.

Lecture III.—Preventive Measures for the Maintenance of Dental Health:

1. Periods of susceptibility to caries.
2. Correction of harmful habits and prevention of irregularities.
3. Oral prophylaxis and care of sick patient.
4. The influence of diet and mastication.

DIVISION OF SANITARY ENGINEERING

A. E. BERRY, M.A.Sc., C.E., Ph.D., *Director.*

War programmes have had a direct bearing on the work of the Division for the year 1941. Expenditures on municipal projects have been carried on to a considerable degree in those places where extensions were necessary to serve industries and increased populations resulting from camps and industrial developments. Municipal programmes, not influenced by these war conditions have not proceeded to any great extent. Municipal officers have exercised strict surveillance over their plants to guard against any attempted sabotage. There has been a noticeable increase in many centres in water consumption. Milk pasteurization in the Province has been maintained at a high level and the diseases normally associated with this product have shown continued reductions. Sanitary problems have been intensified in places owing to changes in housing conditions and the movement of population. Recreational facilities were engaged to a high capacity during the early part of the summer of 1941, but restrictions placed on travel curtailed this towards the latter part of the season.

Waterworks:

The expenditures approved by the Department for water works systems, including extensions and treatment, amounted to \$982,564.79 as compared with a total of \$833,903.48 for the previous year. This figure is naturally much below that of a normal peacetime year, and much of the work involved in this expenditure had to do with extensions made mandatory by the war. 122 certificates were issued during the year as compared with 120 for the previous year.

Major changes involved in these approvals included the City of Kingston where a new intake and supply mains were endorsed. The City of Peterborough received approval for the construction of a feeder main from the filtration plant to the distribution system. Many extensions of mains were made in different municipalities to supply houses constructed by Wartime Housing Limited. Most of these were made in isolated sections of the urban centre, or in the adjoining townships. At Bowmanville, additions were made to the supply works whereby the volume of water available in that centre has been increased substantially.

Water Treatment:

No new Water Treatment plants of moderate or large size have been built during the year. The City of Toronto put into service on November 1st the new Victoria Park filtration plant. This gives the city a second supply, with a plant having a designed capacity of 100,000,000 gallons per day.

During the year continued supervision has been maintained by the Department over all water treatment plants in the Province. Chlorination inspections have been made periodically, and as frequently as the limited staff of the Division made this possible. There are now 203 chlorination installations in the Province for treatment of municipal water supplies. Difficulty has been experienced in the changes in personnel and it has been difficult to retain

trained officials to carry on the treatment of the water. There has been a general increase in water consumption during the year, for which a number of factors may be involved.

Industrial development and war activities have increased to some considerable degree the volume of sewage discharged into surface streams. In many of these the effect on the municipal water supplies is too direct. The larger volume of sewage has resulted from increase in population, and from the corresponding increase in water consumption. Attempts have been made to improve taste conditions in certain municipalities. Means are now available for dealing with most objectionable tastes and it is a problem of applying those measures.

Sewerage Programmes:

A number of changes have taken place in sewerage systems but these, for the most part, have been extensions to existing systems made necessary by housing developments and industrial expansion. Municipal sewage plants have not increased in numbers, but efforts have been made to utilize existing ones to take care of the increased flow of sewage.

Approval certificates were issued during the year to an estimated value of \$797,621.70. This is considerably lower than previous years and is due to the curtailment of normal municipal programmes. 142 certificates were involved in this list as compared with 129 for the previous year.

The important sewage disposal project at this time is the plant for the City of Toronto. This has been under discussion most of the year but has been delayed owing to the problem of getting steel for the plant. This plant, as now proposed, is the first part of a complete treatment plant. It has been designed to relieve the load on the waterworks intakes, and on the bathing beaches in the East end of the City.

Sewage treatment plants have been under the supervision of the Department during the year, with periodical examination of these and assistance given to operators. There are treatment plants in 77 municipalities now, as well as industrial units, and plants in various camps. A number of treatment plants have been built for industrial plants. These have been either sedimentation or trickling filters, each of relatively small capacity.

War Sanitation:

The Division has co-operated during the year with authorities responsible or camps of various kinds in their problems of water supply, sewage disposal and all forms of sanitation. New industrial plants have brought difficulties in sewage disposal since many of these are situated on small streams, and adequate sewage treatment must be provided.

Milk Control:

Milk control has continued as in previous years with general supervision over all pasteurization plants. There were 810 of these in operation at the end of the year. Some amalgamations have taken place because of labor scarcity, and other difficulties. These plants required 1,738 inspections during the year. It was necessary to reduce this work because of insufficient staff.

It is now estimated that over 98% of all milk sold for consumption in fluid form or delivered in the province is pasteurized. The total milk consumption for the Province continues to rise. Diseases which may be milk-borne have

continued at the same low level or somewhat lower. A major decline occurred in 1939, the first year of the pasteurization legislation.

The Provincial programme at present does not include inspection of farms. This is purely a local responsibility. One of the major difficulties encountered in the milk control of the year was turnover in employees, and the general scarcity of men for this work.

Recreational Sanitation:

Summer camps were controlled for the second year under provincial regulations, which require a license from the Department. 182 licenses were issued during the year. These requirements are gradually bringing the camps up to a uniform standard, in which safety to the vacationists is the major point.

As in previous years an effort was made to supervise the more important recreational facilities of the province during the summer. Water supply and sewage disposal were given major attention in these places. No inspections were made of tourist camps and highway refreshment services.

Cemetery Regulations:

An amendment to the "Cemetery Act" was passed at the legislative session. This gave the Department authority to pass regulations having to do with cemetery control. These were adopted by Order-in-Council on October 9th. The full text of the regulations will be found in this report. (See page 22.)

The new regulations require the filing for approval of all plans and rules or by-laws. The total number of these in the Province is not yet known, but an improvement in the maintenance of cemeteries appears to be in prospect as the result of these new regulatory measures.

Nuisances and Complaints:

The Division continues to receive numerous requests for the correction of complaints and nuisances. These come from private parties, health officers and municipal officials. Over 185 of these were received and investigated during the year in addition to the regular work of the staff.

Attached is a list of the waterworks and sewerage certificates issued during the year.

DIVISION OF LABORATORIES

A. L. MACNABB, B.V.Sc., *Director*

The volume of work performed by the Division of Laboratories in the year 1941 exceeded that of any previous year by 154,793 specimens of which 99,793 specimens were examined at the Central Laboratory. In addition to the routine work performed for the civilian population, 56,760 examinations were made for members of the Canadian Army and 41,860 examinations for the personnel of the R. C. A. F. The work conducted for the personnel of the Army and the Air Force represented 6.8 and 4.8 per cent. respectively, of the total number of examinations made.

The marked increase in the volume of work has necessitated an increase in personnel. The Central Laboratory staff now has 94 members. An additional staff member was added to each of two of our branch laboratories, Kingston and Ottawa, and five members to the office secretarial staff.

During the year 1941, Dr. Doris Howell volunteered for service with the British Ministry of Health, Blood Donation Branch, Dr. Howell left our staff in September last. Dr. Norman Garand of our pathological staff, Toronto, and Mr. A. D. McClure, B.A., of our North Bay Branch laboratory joined the R. C. A. F. Five technical workers, two from the Ottawa branch and three from the Central Laboratory, offered their services to the R. C. A. F. Mr. John Percy, M.A., of the Central Laboratory staff, was promoted to the Directorship of the North Bay Branch.

The increased volume of work necessitated a marked increase in the number of outfits prepared. During the year 1941, 360,773 outfits were prepared at the Central Laboratory. It was necessary to transfer the preparation of these outfits from the fourth floor, East Block, to 11 Queen's Park, where more adequate space was available.

Saline solution.....	985 litres
Stains.....	495 litres

Table II outlines the amount of media prepared during 1941.

Psittacosis infection was identified in our province in 1940. In March, last year a new laboratory unit, located at 999 Queen St. W., was opened. This laboratory provides necessary space for diagnostic work for Psittacosis and other virus infections. The Laboratory also provides adequate and suitable quarters for experimental animals.

During the past year, the Department of Health entered into agreement with the Belleville General Hospital, whereby the laboratory at that Institution would serve as a diagnostic centre, and it would receive specimens submitted by physicians residing in Hastings, Frontenac and Prince Edward Counties. The value of local laboratory service has been demonstrated. The introduction of chemotherapy renders it highly desirable, in fact necessary, in certain diseases, *e.g.* pneumonia and meningitis, that both a bacteriological and chemical diagnosis should be readily available. The Department contemplates the establishment of two other such laboratory units. In other words, the Central and larger Branch Laboratories, while still serving as diagnostic centres for some of the more technical procedures, will also serve as reference laboratories, to which the local subsidized laboratory may refer certain specimens and forward certain strains of organisms for confirmation.

Table III shows in detail the work performed at the Central and each Branch Laboratory, as well as the total for the whole Division of Laboratories. It will be noted that the Division examined 863,542 specimens, 154,793 more than the previous year. Of the examinations performed at the Central Laboratory 56,760 were performed for the personnel of the Army and 48,860 for the personnel of the Air Force.

Table V shows the percentage of work performed for the personnel of the Army in relation to the total volume performed by the Division of Laboratories.

A brief summary, relative to the bacteriological diagnostic work performed at the Central Laboratory follows:

Bacteriology:

Diphtheria:—The past year showed a definite increase in the number of diphtheria isolations. The Central Laboratory staff examined 17,537 nose and throat cultures from one camp for the presence of *C. diphtheriae*. Virulence tests were done on 1850 of these, of which 814 were positive. Table VI outlines the cultural, microscopic and virulence tests conducted for the civilian population.

TABLE VI
DIPHTHERIA

Total No. Examined	Cultures		Virulence Tests	
	Positive	Negative	Positive	Negative
6078	216	5862	44	107

We are very grateful for the help given us by various members of the School of Hygiene at the time of the diphtheria outbreak. We also appreciate the help given us by the members of our Kingston Laboratory staff, namely Dr. E. P. Johns and Dr. E. C. Beck.

Tuberculosis:—There were 13,683 specimens received and examined microscopically for the presence of tubercle bacilli. The following table indicates the number examined and the number positive during each month.

Table VIII outlines the cultural examinations performed during the period from December 1st, 1940, to October 31st, 1941. In this table, we note that of the 9965 specimens, 760 yielded a growth of tubercle bacilli. Of these 760 primary isolations positive results were obtained after 4 weeks incubation in 403 instances.

Pneumonia.—The number of specimens subjected to pneumococcus typing in 1941 shows a decrease of 606 from the year 1940. This decrease is undoubtedly due to the fact that chemotherapy has practically replaced serum therapy.

Grand Total 1845

Table X outlines the number of examinations made, stating the nature and the source of material subjected to the pneumococcus typing procedures.

Fungus Organisms:

An increasing number of specimens are being submitted for the cultural examination for fungus organisms. These specimens include samples of sputum, skin and nail clippings, hair, etc.

TABLE XI
FUNGUS CULTURE—JANUARY 1st, 1941—NOVEMBER 1st, 1941

ORGANISMS	Sputum	Toes and Feet	Hand and Fingers	Head and Hair	Skin	Ear	Vagina	Misc.
Monilia.....	43	2	2	1	1	3	1
Aspergillus.....	21	7	5	2	5
Trichophyton purpureum.....	1
Trichophyton gypseum	1
Trichophyton rosaceum.....	1
Epidermogphyton inguinale.....	1
Achorion.....	1
Negative.....	75	17	9	17	17	1	26

Table XI indicates the number of specimens received, the source of the specimen and the species of fungus organism isolated.

Spinal Fluids:—2,277 bacteriological examinations of spinal fluid were performed. Microscopic smears revealed tubercle bacilli present in 5 instances, whilst cultural examination yielded a growth of tubercle bacilli in 9 instances and animal inoculation in 7 instances. Organisms resembling meningococci were found present in 87 instances. Cultures yielded growth of meningococci in 39 instances, and of other organisms in 26.

Colon Typhoid:—2659 specimens of whole blood were received for agglutination tests. Table XII indicates 3944 fecal specimens received for cultural examination.

Table XII
FAECES CULTURES

POSITIVES:

No. Tested.....	164

Table XIII outlines the number of typings, tests performed and instances where each type was found. Typing results are forwarded to the Preventable Disease Division so that an accurate record may be maintained, also information regarding chronic carriers and active cases.

Bovine Brucellosis:—1045 cows' bloods were received and subjected to agglutination test to determine the presence of agglutinins for Bovine Brucellosis (Bang's infection). These samples were from animals, the milk from which was offered for sale in certain municipalities.

Blood Cultures:—From Table XIV it may be noted that 2,775 cultural examinations and 2659 agglutination tests were performed on specimens of blood.

TABLE XIV
BLOOD CULTURES AND AGGLUTINATION TESTS

Table XV outlines the source of streptococcal strains and the serological group with which each is identified.

Syphilis.—249,245 examinations were made to determine the presence or absence of specific infection by serodiagnostic means. The routine procedure during the past year has been to subject all samples of blood received to both the Presumptive and Standard Kahn tests. In cases where the results of both these tests were negative, a report was sent forth. In instances where the results of both tests were positive, a Quantitative Kahn test was conducted. The Quantitative Kahn test gives the degree of positivity, and the laboratory report is expressed in units. The unitage of any serum is obtained by multiplying the highest serum dilution, with which a positive reaction is obtained, by four. The Quantitative Kahn test performed on sera of patients who are undergoing treatment, assists the physicians in determining the effectiveness of the treatment. It also is of value at times in determining whether or not a reaction obtained by the Qualitative Kahn test method is of specific or viologic type. Most of the so-called biological reactions, when subjected to Quantitative test methods do not yield a unitage greater than four Kahn units.

In cases where the results of the Presumptive and Standard Kahn tests are not in agreement, a Kolmer Wassermann test is performed. Thus it may be seen that all sera which yield positive findings are tested by Presumptive, Standard and Quantitative Kahn test methods. In cases where the results of these tests are not in agreement, specimens are then studied by Kolmer Wassermann test method. A Kolmer Wassermann test is performed on each spinal fluid submitted.

Gonorrhoea.—14,528 slides were examined microscopically for the presence of gonococcal organisms. The Central Laboratory performed 574 complement fixation tests. This latter test has marked limitations, but is of value in determining whether or not arthritis may be due to gonococcal infection in cases where there is a previous history of infection.

Cultural examination for gonococci was performed in the Central Laboratory in 2738 instances. As a routine procedure in special treatment clinics, three cultural examinations are performed on each patient. The cultural examination for gonococci is a more sensitive laboratory test than the microscopic examination of smears, and is especially useful in special treatment clinics as a criterion of cure in determining the release of the patient. False negative results are, however, frequently obtained by cultural methods, if the specimens for cultural examination are collected during, or less than 10 days after, the administration of a chemotherapeutic agent.

Chemical Section:—The chemical section prepares certain chemical products for distribution, namely bismuth oxychloride, mercury salicylate, silver nitrate (one per cent. solution) for the prevention of Ophthalmia neonatorum, and distilled water which is distributed in 20 c.c. ampoules. Following is a list and the amounts of the preparations prepared by the Chemical Section of the Central Laboratory.

Bismuth Oxychloride.....	193,508 grains.
Mercury Salicylate.....	2,592 grains.
Silver Nitrate.....	1,166 ozs.

Psittacosis:—65 samples of sputum were received to determine the presence or absence of psittacosis virus. These samples were from 45 patients, 11 of whom were found to harbour the virus. Blood samples for complement fixation test on patients whose illness had been longer than two weeks were received. In 27 instances, where both a blood and a sputum sample were submitted, 12 blood samples were positive and 9 sputum specimens contained the virus. This fact, however, does not indicate that the complement fixation test is a more reliable index than is the examination of sputum. The sputum examination is the most reliable method for the diagnosis of psittacosis infection. In all cases where psittacosis infection is suspected, the sputum sample should be submitted early in the case. Little reliance should be placed on examination of one specimen only. At least three or four samples should be submitted. The virus of psittacosis is present in the sputum in active cases for a period up to and sometimes exceeding thirty days. The complement fixation test is relatively specific, providing the patient is not suffering from lymphogranuloma inguinale or syphilitic infection. The laboratory autopsied 184 birds collected from 12 aviaries, where the epidemiological evidence pointed to psittacocis infection being present. The infection was identified in 11 of the 12 aviaries examined. Of the 184 birds tested, 88 or 47.8 per cent. were found positive. In all, 426 birds have been examined and subjected to animal inoculation tests.

A separate report of the pathological section of the Central Laboratory and a report from each Branch Laboratory follows:

In closing, I wish to thank my associates at the Central Laboratory and the various Directors of the Branch Laboratories who have co-operated so wholeheartedly. I also wish to thank the Deputy Minister and the Honourable the Minister for their very sympathetic support in obtaining additional help and space for the Laboratory.

PATHOLOGY

S. F. PENNY, M.D., *Pathologist*

The section of Pathology of the Central Laboratory during 1941 has had a considerable increase in volume of work performed. Specimens examined in 1941 totalled 12,145, in contrast to the 1940 total of 10,860, making an increase of 10.9%. Pathological specimens examined for the Army and Air Force totalled 348.

Numerous staff changes took place during the year. Dr. H. Doris Howell left the section in August on leave to join the staff of the British Ministry of Health in the Transfusion Service. Dr. Norman D. Garand, who had joined the section in February, 1941, enlisted in November in the R. C. A. F. Two technicians left during the year; and six received short courses of training in the section, two being retained as replacements.

The charge for tissue examination was increased by the Department from \$1.00 to \$2.00 per tissue, on June 1st, 1941. This increase, it is hoped, will stimulate the growth of local approved laboratories throughout the province and aid in the decentralization of pathological service. This charge is applied to all tissues submitted, including tissues from indigent patients who are hospitalized in Ontario and to whose maintenance the Province contributes. No charge is made for examination of tissue removed from indigent patients when the operation is performed in doctor's office.

The technical methods of paraffin and frozen sections were continued with minor adjustments. Examination of blood smears was added to the service of the section.

We wish to again thank our consultants, Dr. James Miller, Dr. W. L. Robinson and Dr. E. A. Linell, for their valuable assistance in diagnosis.

The work of the section in 1941 is outlined in the tables below:—

FORT WILLIAM BRANCH LABORATORY

A. E. ALLIN, B.A., M.D., D.P.H., *Director.*

I have the honour to submit herewith the Annual Report of the Branch Laboratory, Fort William, for the year 1941.

Routine examinations numbered 51,354, an increase of 2,962 tests or 6.1 per cent. over 1940. Of these examinations 2491 or 4.8 per cent. were carried out for the branches of the armed service. 22,409 outfits, 2,796 Biologicals, and 1393 bottles of Insulin were distributed.

Three changes occurred on the staff during 1941. We regret losing Miss Evelyn Tuft, who had spent a year with us after working for the Central Laboratory for many years. Miss Kathleen O'Shea joined the staff as Clerk-stenographer and Miss Ellen Hirst as Laboratory Assistant.

Some 50 lectures were again given on Bacteriology and Immunity to the nurses of the three local hospitals. The graduating classes of McKellar Hospital, Fort William, and of St. Joseph's Hospital and the General Hospital, Port Arthur, availed themselves of the privilege of spending two mornings a week with us in connection with their Public Health studies.

No major outbreaks occurred during the year in the area served by the laboratory. Only one swab positive for Diphtheria was received. There were two small outbreaks of typhoid fever. A blood sample submitted from an Indian woman gave a positive agglutination test for *P. tularensis*. A faeces specimen contained a full-grown larva of the Latrine Fly (*Fannia scalaris Fabr.*). This is of particular interest since cases of intestinal myiasis occur so rarely in this country.

One paper was published by us: "Meningitis of the New Born Due to *Pseudomonas aeruginosa*" (C. M. A. J. 44, 288, 289, 1941). A second paper entitled "Cat-bite Wound Infection" will appear shortly. This is based on the isolation of a species of *Pasteurella* from two wounds due to cat-bites. The same organism was isolated from one of the cats. This condition has not hitherto been reported from this hemisphere, the original work on the subject having been carried out in Western Europe.

I wish to express my thanks to Dr. A. L. MacNabb for his co-operation and assistance during this past year.

RICHARDSON LABORATORY, QUEEN'S UNIVERSITY, KINGSTON

PROFESSOR JAMES MILLER, M.D., F.R.C.S., (Edin.), *Director.*

I beg to submit statistics of the work done in the Kingston Branch Laboratory during 1941. These include the examinations carried out in the Department of Preventive Medicine. As in previous years the routine examinations of the water supplies of Kingston Municipality, of the Penitentiary and of the Royal Military College, are done in this department under Dr. Wyllie. Dr. Wyllie also carried out the phosphatase tests. The co-operation between the two laboratories has been harmonious and satisfactory.

There have been the usual variations as regards the number of examinations done under the different headings, increase in certain departments and diminution in others. There has been a notable rise in the number of milk tests done and some increase in the water examinations. The number of sera

examined for agglutinins has risen slightly but the rise in faeces investigated culturally has been considerable. The tuberculosis and venereal work is now carried out entirely in the Department's laboratory on Barrie St. under Dr. Johns. Here also the co-operation between the two laboratories has been cordial. A list of the services rendered to the Army, Air Force, Navy and recruits is appended in a separate list.

May I, as in former years, express my gratitude to you, Sir, to the Honourable the Minister of Health and to Dr. MacNabb for your kindness and ready co-operation.

KINGSTON BRANCH LABORATORY,

E. P. JOHNS, M.D., *Director.*

It is my privilege to submit herewith a report of the routine laboratory examinations performed in this laboratory during the past year. This report of course, includes only a portion of the Public Health laboratory examinations performed in this district, namely, those pertaining to the laboratory diagnosis of venereal disease, tuberculosis and the examination of cerebrospinal fluids exclusive of bacteriological examination. All other diagnostic facilities are provided by the Richardson Laboratory.

The enclosed table gives the detailed number of the various tests performed, a total of 34,201. It will be noted that 9,589 tests were performed for the Medical Services of the Armed Forces stationed in this vicinity, approximately 28% of the total number of examinations.

During the year there have been several changes in the personnel of the routine laboratory staff, two of our members leaving to join the Armed Forces, and one other accepting a position with the National Research Council. The remainder of the staff are commended for the faithful service performed throughout the year. I wish also to express my sincere appreciation for the constant co-operation of the Director of Laboratories, Dr. A. L. MacNabb and the members of the Central Laboratory staff who have so kindly assisted in the solution of some of our problems.

INSTITUTE PUBLIC HEALTH, LONDON

A. J. SLACK, Ph.C., M.D., D.P.H., *Director.*

I have the honour to submit herewith the annual report of laboratory examinations made during the year 1941 by the Branch Laboratory of the Department, located in the Institute of Public Health, London.

Laboratory examinations made during the year numbered 121,002 as compared with 112,093 examinations for the previous year. This represents an increase of 8,909 examinations or 7.95 per cent. over the total for 1940. During the year approximately 14,581 laboratory examinations were made for the Army, Navy and Air Force. Analysis of these figures shows a definite decrease in pneumococcus typing and in non-protein nitrogen determinations while moderate to marked increases are shown in practically every other type of laboratory examination. During the year 55,598 outfits were reclaimed and prepared for redistribution and 59,968 outfits were distributed as compared with 52,432 outfits reclaimed and 55,394 outfits distributed during 1940.

Biologicals distributed from this centre, exclusive of insulin, numbered 25,038 packages as compared with 15,852 packages distributed during 1940. Free insulin distributed included 6,572 packages or 2,393,600 units of ordinary insulin and 3,139 packages or 1,319,600 units of Protamine Zinc Insulin.

This brief summary indicates a gratifying increase in all branches of laboratory activity but cannot show the many other ways in which this laboratory has been able to provide valuable assistance to physicians and to the Armed Forces. This has all been accomplished with a smaller staff than previously, owing to the difficulty experienced in obtaining professional assistants.

Appreciation is due to every member of the Institute staff and to Dr. MacNabb and his staff for their hearty co-operation throughout the year.

NORTH BAY BRANCH LABORATORY

W. J. A. PERCY, M.A., *Director.*

I have the honour of submitting a report of the examinations made at the Branch Laboratory in North Bay during the year nineteen hundred and forty-one.

During the past year a total of sixty-one thousand, three hundred and eighty-seven (61,387) examinations were made. This represents an increase of fourteen thousand four hundred (14,400) (30.7 per cent.) over the preceding year.

An examination of the figures shows a general increase in all types of specimens. While the increment in many instances was numerically small, the growth in the number of specimens of milk, water, blood for syphilis and blood for glucose determination, was quite large. The percentage increase of these specimens is worthy of note: milks 48%, waters 20%, bloods for syphilis 28% and bloods for glucose determination 14%.

In November, the director, Mr. A. D. McClure, obtained leave of absence to serve his country as a Pilot Officer in the Royal Canadian Air Force. One month later, Mr. Wm. Sullivan left to take another position. This, and the increased amount of work, left a burden on the remaining members of the staff. I wish at this time to express my appreciation for the excellent co-operation that they have given me and for the efficient manner in which they have carried out their respective duties.

The success of the North Bay Laboratory during the year nineteen hundred and forty-one, has been due in no small measure to the interest and valuable assistance of the Director of Laboratories, Dr. A. L. MacNabb. To him, I wish to express my gratitude; and to the members of the staff at the Central Laboratory, who have so kindly assisted us in the examination of some specimens and in the identification of certain cultures, my sincere appreciation.

OTTAWA BRANCH LABORATORY

F. L. LETTS, M.B., D.P.H., *Director.*

I have the honour to submit herewith a summary of the work of this Branch Laboratory during the year 1941.

The number of specimens continues to increase; there being 15,200 more for 1941 than for 1940.

We have not lost any members of our Staff to the Active Canadian Army; some are on the Reserve Force.

PETERBOROUGH BRANCH LABORATORY

C. B. WAITE, M.D., *Director.*

I have the honour to submit my report for the Branch Laboratory, Peterborough, for the year 1941, as follows:—

A small epidemic of diphtheria during the summer was perhaps the most notable feature of the work during the year. A few cases of meningococcal meningitis occurred sporadically, but no epidemic.

The presence of a Military Training Centre on the outskirts of the City has meant an increase in the amount of work.

During the year, a start was made in the performing of the Khan test and I am indebted to the Central Laboratory for the training of the technician for the performance of this work.

The work still continues to increase, having increased approximately thirty-five per cent. during the past year. This throws a heavy strain on the Director, whose services are supposed to be part-time.

I wish to thank the Director for his co-operation and assistance throughout the year.

SAULT STE. MARIE BRANCH LABORATORY

N. F. W. GRAHAM, B.A., M.B., *Director.*

I have the honour to submit herewith a report of the examinations performed in this laboratory during 1941. It will be noted that the work done was greater than in 1940.

More water samples from passenger and freight boats have been examined, due to the increase of shipping through this port.

The increasing use of drugs of the sulphanilamide group in the treatment of gonorrhoea has resulted in a diminution of the number of smear examinations per case but has increased the number of gonococcus cultures.

In addition to the routine work of the laboratory a considerable number of urinalyses have been performed for the Army.

SEVENTY-FOURTH ANNUAL REPORT

OF THE

HOSPITALS DIVISION
DEPARTMENT OF HEALTH

UPON THE

Ontario Hospitals for the
Mentally Ill, Mentally Defective,
Epileptic and Habitué Patients

OF THE

PROVINCE OF ONTARIO

FOR THE YEAR ENDING MARCH 31st, 1941

PRINTED BY ORDER OF
THE LEGISLATIVE ASSEMBLY OF ONTARIO

ONTARIO

TORONTO

Printed and Published by T. E. Bowman, Printer to the King's Most Excellent Majesty,

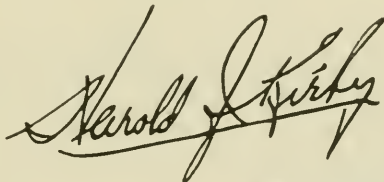

1942

TO THE HONOURABLE ALBERT MATTHEWS,
Lieutenant-Governor of the Province of Ontario.

MAY IT PLEASE YOUR HONOUR:

The undersigned has the honour to present the Seventy-fourth Annual Report of the Hospitals Division, Department of Health, upon the Ontario Hospitals for the Mentally Ill, Mentally Defective, Epileptic and Habituate Patients of the Province of Ontario, for the year ending March 31st, 1941.

Respectfully submitted,

A handwritten signature in black ink, reading "Harold J. Kirkby". The signature is written in a cursive style with a horizontal line underlining the name.

Minister.

THE HONOURABLE H. J. KIRBY, K.C.,
Minister, Department of Health,
Parliament Buildings,
Toronto, Ontario.

Dear Sir:—

I have the honour to present herewith the Seventy-fourth Annual Report of the Hospitals Division on the Ontario Hospitals for the Mentally Ill, Mentally Defective, Epileptic, and Habitué Patients of the Province of Ontario for the year ending March 31st, 1941.

In doing so I desire to invite your attention to the lowered admission rate during the past year; in fact, the trend has been downwards since 1939. While this may not be entirely due to the war, a similar reduction in the 1914-18 period leads one to believe that it may be.

In spite of the lowered admission rate, the accumulation of patients in most of our hospitals continues. This is due, in a large measure, to the increasing percentage of the older age groups among admissions. These persons suffer from degenerative mental disorders, and the number of recoveries decreases proportionately; this in spite of the fact that the recovery rate of the younger age group has never been higher in the history of these hospitals.

Respectfully submitted,

B. T. McGHIE, M.D.
Deputy Minister.

DR. C. S. TENNANT, Superintendent.

CARE AND TREATMENT OF PATIENTS:

Our statistical report for the fiscal year recently closed reveals unfortunately a noticeable increase in the number of patients in residence, but it is satisfactory to record a noticeable decrease in the daily average population in residence and in the daily average population on the books. The increased population in residence occurred in spite of a lowered admission rate for the year and cannot be explained entirely satisfactorily. There are, in my opinion, certain definite factors contributing and they include: — (1) increased overcrowding; (2) great changes and frequently marked shortage of staff owing to enlistments in the fighting forces. The medical staff for nine months of the year was less by a third than our regular medical staff; (3) intensive efforts made during the past several years to place in Houses of Providence, Houses of Refuge and in Approved Homes all patients who were considered at all well enough to be cared for outside a mental hospital, and who could not be placed with their own relatives. Gradually the point has been reached where extremely few patients, except those more recently admitted, can be so placed and we all know that few patients are released from hospital by these methods except those who have been in hospital for a year or longer.

During the last year we have had to cease operation of an Insulin Treatment Unit because we were finally left without a properly trained physician to carry on.

STAFF, ADMINISTRATION AND BUILDINGS:

Doctors H. C. Moorhouse and McLean Houze were granted leave-of-absence to join the medical services of the R.C.A.F.; Dr. G. C. Ferrier was transferred for temporary duty to the Ontario Hospital at Fort William for a short period prior to reporting at the Psychiatric Hospital, Toronto; Dr. Florence Nichols left to take one year's special course at the Psychiatric Hospital, Toronto; Dr. Elizabeth C. Coope from Blackpool, England joined our staff in August, 1940; Dr. W.T. Joynt, D.D.S. was transferred to the Ontario Hospital, New Toronto and was succeeded by Dr. D. R. Parkes.

In spite of staff shortages, numerous addresses have been given by the Superintendent and other members of the Medical Staff and Mental Health Clinic to Service Clubs and other groups.

No new building program was approved or acted upon during the past year but the two solaria on the male and female admission wards were practically reconstructed, with entirely new roofs. This adds greatly to the comfort of patients.

An Aga Cooker installed in the Elmgrove kitchen and changes made in the existing facilities there have improved greatly the quality of the meals and the food service generally. Two Electrically-heated food trucks for use in staff dining-rooms are much appreciated.

Considerable work has been completed throughout the hospital in connection with the electric power service which has resulted in greatly improved lighting with the increased current made available.

Electric clocks, purchased from Canteen profits, were installed on all wards.

We are glad to report that in four patients' dining rooms where the hardwood floors were in exceedingly bad state of repair, replacement has been made with most satisfactory results for everyone. Also in two cottages, sculleries have been greatly improved with the installation of double-compartment sinks.

ONTARIO HOSPITAL, COBOURG

DR. G. C. KIDD, Superintendent

CARE AND TREATMENT OF PATIENTS:

During the year 57 patients were admitted, 149 were placed on probation, of these 62 were returned to the Hospital. 17 died and 61 were discharged. 20 were placed in Lorimer Lodge and Oxley House and 5 of these were returned.

Religious Services were conducted by the Protestant and Roman Catholic Clergy in the Auditorium every Sunday morning throughout the year and a number of our girls attended Services in the down town Churches.

We were successful in building an open air rink this year and many of our girls enjoyed skating in the afternoons and evenings.

Other recreations provided for our patients — walking parties, games, basketball, badminton, alley bowling, physical drill.

Our Softball Team had another successful season, and we are again indebted to Mr. Edward Campbell for coaching the girls and arranging games with teams in this District.

Playground equipment, namely two teeters and 2 swings, were set up in the Hospital grounds and some of the patients get a great deal of enjoyment from them.

More books were added to our library and many magazines and newspapers were distributed on the Wards. The Library is open for the exchange of books three afternoons each week and at this time one of the girls assists with this work.

STAFF, ADMINISTRATION AND BUILDINGS:

Miss D. Froats, our Dietitian, resigned to be married and Miss M. Gardner was transferred from the Ontario Hospital, Hamilton, to fill this vacancy.

Mr. W. Simmons resigned to accept a position in Western Ontario, and Mr. Wm. Train and Mr. John Simmons were appointed to our Engineering Staff.

The Annual Meeting of District No. 6, R.N.A.O., was held at this Hospital on March 19th.

Every member of our Staff received instruction in Civilian Defence, A.R.P. work. Our Nurses received a course in First Aid and Emergency Nursing and were given certificates. The remainder of the Staff are at present taking a course in St. John First Aid to the Injured.

The work about the Hospital for the past year has been almost entirely confined to maintenance, consisting chiefly of upkeep of the Boiler Room, repairs to pumps and pipe lines, laundry maintenance and repairs to furniture. No new electric work was undertaken and only repairs to electric irons, toasters, switches, etc., carried out.

The telephone cables were repaired twice during the year. A new rear arch was installed in No. 3 Boiler, most of the material used being on hand.

A combination linen and shoe cupboard was built for Ward 4. New shelves for Ward 2 linen room. Six new ironing boards were made for the laundry. One dozen snow shovels were made.

Part of the wall structure of the shower bathrooms on Wards, 3, 4, 5 & 6 was found to be in poor condition due to dampness. The Public Works arranged for the necessary repairs.

ONTARIO HOSPITAL, FORT WILLIAM

DR. J. N. SENN, Superintendent

CARE AND TREATMENT OF PATIENTS:

During the year we have endeavoured to supervise patients on probation from this hospital and also a certain number referred to us from other Ontario Hospitals. This supervision is frequently very difficult in view of the transient habits of many of our patients who have no set abode.

An insulin and metrazol clinic was opened at this hospital and results were satisfactory during the latter part of the year.

STAFF, ADMINISTRATION AND BUILDINGS:

Dr. G.C. Ferrier joined our staff in May, 1940 and was transferred September 1st to Toronto Psychiatric Hospital to receive advanced instruction. He was replaced by Dr. George D. Scott on September 1st, 1940. Dr. Scott was transferred to Ontario Hospital Hamilton on January 1st, 1941, and returned here March 1st, 1941, to assume charge of the insulin and metrazol clinic. He was accompanied by a specially trained nurse from New Toronto. During the year, our chief attendant, J. R. Martindale, enlisted for active service with the R.C.A.F. Our steward, Mr. H. U. Western, received an appointment as captain in the Second Lake Superior Regiment and is at present on active service. Mr. Martindale was replaced by Andrew Currie and the steward's work is being cared for by Miss Ruth Black. An additional clerk-stenographer was appointed in the person of Miss Elizabeth Wilson. In this way, our office is functioning satisfactorily.

All newly appointed members of staff, including outside staff have been given instruction in care of hospital patients. All members of staff, including farm and mechanics staff care for patients and we feel that in this way the whole staff are kept more aware of the hospital aims and of the part that they are called upon to lay in assisting towards recovery of patients. We have, at this hospital, adequate facilities for occupational employment of patients with the various maintenance procedures and also about the farm and gardens. During the last year our admission of elderly and infirm patients has markedly increased and patients who are physically capable of employment all have adequate facilities for occupational adjustment.

The introduction of the insulin and metrazol clinic was a novel experience. The intensive training of staff and therapy provided, have been stimulating and instructive.

Courses of instruction to the under-graduate nurses at the three local hospitals have been continued and addresses have also been given to various St. John Ambulance Brigades regarding psychiatric problems and A.R.P.

At various times during the year, the district has been without a full time medical officer to care for preventable diseases in the unorganized districts. This work has been taken over by the medical staff of this hospital and they appreciate the opportunity of co-operating with the Division of Preventable Diseases.

During the past year we have constructed with hospital labour a building to accommodate the poultry annex to the farm. Previously, the poultry had been unsatisfactory owing to lack of adequate accommodation, particularly during winter months. We have purchased a foundation stock for a herd to care for our own demands.

With our program of beef production we were able, during this year to fatten, slaughter and ship to Eastern Hospitals 90 carcasses of beef in addition to 80 breeding ewes which were shipped to the Ontario Hospital, Langstaff, as a foundation herd. This policy is being carried on at this hospital.

ONTARIO HOSPITAL, HAMILTON

DR. J. S. STEWART, Superintendent

CARE AND TREATMENT OF PATIENTS:

Metrazol treatment continues to be used with gratifying results. Eighty-three patients were treated, during the year. Of these, twenty-four were recovered, twenty-four were much improved, fifteen were improved and twenty showed negative results.

The number of boarding-out patients remains at about the same level as other years.

The occupational therapy work has been extended to provide evening classes, of a recreational nature, on the female wards.

STAFF, ADMINISTRATION AND BUILDINGS:

As in previous years, a great many changes have occurred in the general staff. Twenty-seven members of the staff are now enlisted, including five medical officers, and Dr. McLaren, our dentist. Our present staff is still inadequate to properly care for the patients in hospital. During the past year, Dr. Brillinger, Director of the Mental Health Clinic, enlisted in the Air Force and has been replaced by Dr. K.M. Barrington, of England. Dr. Barrington, who in addition to carrying on a practice with her husband in England, has taken her degree in psychology, prior to taking her medical degree and has always kept up her connection with Child Welfare Clinics in the Old Country, and has assumed the duties of Clinical Director here, with a minimum disturbance of the Clinic routine. Dr. K. C. Forsyth, who joined the staff in July, 1940, was in ill-health, which necessitated periodical trips to New York for treatment, and Dr. Forsyth found it necessary to resign in April, 1941. Dr. C.A. Cleland succeeded Dr. Kreiner, as Senior Assistant Physician but in February, 1941, Dr. Cleland was transferred to the Ontario Hospital, New Toronto, as Senior Assistant Physician, and was succeeded here by Dr. J. R. Howitt. Dr. Anna Martins was transferred to this hospital in September of 1940 and has been a valuable addition to our staff. Dr. Betty Aiken, who was formerly in the Service, was reappointed, temporarily, to the staff of this hospital in February, 1941. We now have a total of five medical officers, other than the Superintendent. There have been so many changes, during the year, that the ward service has, of necessity, been interrupted and has suffered accordingly and the teaching of the Nurses' Training School has also been interrupted to the detriment of the nurses.

The effects of the war are showing itself in the attendant staff. The younger and more active men, who have enlisted, have been replaced by older men, many of whom have been unemployed for a long period and are unable to adapt themselves to the work. In some instances, it is quite easy to understand why these men have had several years of unemployment.

In August, 1940, we suffered a disastrous fire and the large barn, on the main farm, was burned to the ground and the contents of the grainery and mows were a complete loss. Fortunately no stock was lost, during this fire. It occurred during the day time, when the herd and most of the horses were out and the staff available at the barn, at the time, were able to remove the young calves and horses remaining in the stable, so that no animals were lost. I cannot praise too highly the efforts of the attendant staff and farm hands, who were available at the beginning of the fire and who rescued the live stock. The milk herd is now housed at the Hickory Farm barn and part of the young cattle are maintained on the farm at Brampton. A very fine herd had been built up and its disruption is greatly to be regretted. As previously reported it was found that this fire was incendiary in origin, having been set by a patient.

In conclusion, I should like to express my appreciation to the staff, in general, for their loyalty to the interests of the institution, during the past year.

ONTARIO HOSPITAL, KINGSTON

DR. E. A. CLARK, Superintendent

CARE AND TREATMENT OF PATIENTS:

As in the preceding year, and excluding transfers, there has again been a slight decrease in the number of admissions and the resident population is also less. The comparative certainty of securing employment immediately on discharge has undoubtedly been a factor in reducing the male population of the hospital.

No new major therapeutic programme has been instituted during the year. Metrazol Treatment has been continued and the anti-tuberculosis and immunization measures have been carried on. Increasing use is being made of the available clinical material for teaching purposes, and this has a two-fold advantage, — it gives the patient the benefit of frequent consultant advice, and it is stimulating to the resident medical and nursing staff.

STAFF, ADMINISTRATION AND BUILDINGS:

An additional twenty employees enlisted during the year, bringing to forty the total enlistments since the out-break of war. This number includes several fairly senior staff members, but by making the necessary readjustments no serious difficulty has resulted and all the services of the hospital have continued without interruption. Included in the enlistments were Doctors S. G. Chalk and G. W. Telfer, and Nurse Supervisors Helen Bostock, Harriette Smith and Winnifred Ferguson.

Dr. A. M. Doyle rejoined the staff after a year's absence in Boston, Mass., under the auspices of the Rockefeller Foundation.

Dr. A. Bochner was transferred to the Office of the Health Department, in Toronto.

Mr. Herbert Flowers, a supervisor for many years, was superannuated.

Beyond regular repairs and minor alterations, the most extensive work done by the hospital staff during the year was a fairly complete renovation of North Cottage, the oldest building on the hospital grounds. This has been made into a very attractive cottage, and will be used largely as a centre for convalescent female patients.

ONTARIO HOSPITAL, LANGSTAFF

DR. T. D. CUMBERLAND, Acting Superintendent

CARE AND TREATMENT OF PATIENTS:

During this fiscal year fifty-nine patients were admitted by transfer from other hospitals, six were discharged, fifty-one were transferred to other hospitals and there were four deaths. Our daily average population was 337.8.

Our patients, of necessity, are all workers as we have no means of giving special treatments, and no nursing staff. Our average outside work parties for the year were 218 men or about sixty-five per cent of our population and on several occasions when emergency operations on the farm demanded it 313 men were out working.

The general health of our patients was exceptionally good, due no doubt to the fact that we have four large airy wards, keep our men outside as much as possible and their food such as milk, eggs, meat and vegetables are grown on our own farm.

Recreation for our patient population consists of occasional concerts, moving pictures twenty-six weeks during the year, games both outside and in the wards and reading material, consisting of books and periodicals.

STAFF, ADMINISTRATION AND BUILDINGS:

Beginning this fiscal year Dr. A. J. MacIntyre was Acting Superintendent but was transferred to the Ontario Hospital, Whitby on June 11th, 1940. During the next two months administration was carried on by Dr. W. H. Cruickshank and Dr. C. H. Lewis and following this Dr. T. D. Cumberland, Superintendent, Ontario Hospital, New Toronto was appointed Acting Superintendent of the Ontario Hospital, Langstaff. Dr. A. D. Campbell became resident physician on August 31st, 1940, being transferred here from the Ontario Hospital, New Toronto. Dr. E. J. Hambly acted as part time Dentist, spending two afternoons here each week at our hospital.

Many changes have taken place in our staff during this year. There have been twelve enlistments, twelve staff members left the service and eleven have been transferred. Thirty-eight new staff members reported to duty and farm staff was increased from nine to fourteen. Our attendant staff was increased from thirty-one to thirty-four. Thanks must here be paid to all staff for their loyal co-operation in all our farm operations, general routine of wards and all other activities.

Our farm operations include Langstaff Farm of 800 acres, Concord Farm of 200 acres and Brampton Farm of 300 acres.

(1) On the Langstaff Farm, crops and garden consisted of the following; 171 acres of spring grain, 22 acres fall wheat, 21 acres soy beans, 23 acres roots, 235 acres hay and pastoral lands, 35 acres corn, 88 acres potatoes and 79 acres garden.

Due to this season being very wet the hay crop was good, grain fairly good but late in threshing, potatoes very poor due to late seeding and rot, garden crop very good but hard to take care of in storage due to the wet season.

As at March 31st, 1941 we had the following livestock; cattle 96 head of which 62 were milking cows, 22 work horses, 307 hogs and 326 laying hens.

During this fiscal year we built the following new buildings, slaughter house \$750.00, double bull pen \$350.00, vegetable root cellar in our garden \$1250.00, brooder house for chickens \$100.00, seven colony houses for hogs \$175.00 and garbage cooking room for hogs \$500.00. The following building repairs were made; hen house \$100.00 and alterations in dairy barn for cow stalls \$250.00.

(2) On the Concord Farm we had 54 acres in oats and barley, 27 acres fall wheat, 78 acres hay and pasture, 10 acres roots and six acres corn. Weather and crop conditions were of course about the same as at Langstaff and as at March 31, 1941 we had the following stock; 24 breeding heifers, 4 work horses, 178 breeding ewes and lambs and 274 laying hens.

Building repairs consisted of alterations to stables \$50.00, alterations to shed for hen pens \$25.00 and alterations to shed for sheep pens \$100.00.

(3) On the Brampton Farm we had the following crops; 115 acres of oats and mixed grain, 35 acres fall wheat, 90 acres hay and pasture, 9 acres corn and 5 acres roots. The livestock as at March 31st, 1941 were breeding heifers and four work horses.

The building repairs on this farm consisted of alterations to windows, doors and floors in the south barn \$125.00 and a new granary in the south barn \$150.00.

In conclusion, considering the fact that the Concord Farm is four miles from Langstaff and the Brampton Farm about twenty-four miles, I feel that great credit should be given to our Farmer with his farm staff and the co-operation of our attendant staff who with our work parties have to be transported to and from our hospital at Langstaff to these other two farms to carry on these farm operations successfully.

ONTARIO HOSPITAL, LONDON

DR. G. H. STEVENSON, Superintendent

CARE AND TREATMENT OF PATIENTS:

During the year ending March 31, 1941, there were admitted 391 patients and there were 259 patients discharged, the discharge rate based on admissions, therefore, being 66 per cent. Although this discharge rate is much lower than the preceding year, it should be noted that the discharge rate of 80 per cent. the preceding year was due to a number of special factors incident to the war and the opening and closing of the Ontario Hospital at St. Thomas.

A point of more definite interest, however, is the reduction in the number of patients admitted as compared with the previous year, a total of 391 against 459. Discharges also fell disproportionately from 370 to 259 so that even with the admission of a smaller number of patients our population increased from 1579 at March 31, 1940 to 1625 at March 31, 1941. The statistical tables show these matters in detail.

In spite of the added difficulties caused by the war, we have endeavoured to maintain and improve our treatment standards and facilities. Dozens of letters of appreciation from grateful patients and their relations have been received, testifying to the kindly and efficient care given by all members of the staff for the welfare of the mentally ill who have come under our care. I should like here to express my appreciation to the fine spirit of the staff for their loyal co-operation.

The general care of male patients has been improved during the year by the introduction of registered women nurses on all male wards. For several years the male admission ward and an infirmary male ward in the North Building have been in charge of women nurses with very satisfactory results. Although the male supervisors continue in charge of all other wards, a graduate registered nurse and assisted by a student nurse, is responsible for all medications and treatments and nursing procedures in the male wards of the Main Building and similar arrangements on a part time basis have been arranged for all other male wards, both day and night.

Our teaching of medical students has been improved this year by the experiment, approved by the Honorable the Minister, of having all final year students come to the hospital, two at a time, for a week of intensive training. During this week they attend all conferences, make case studies and have practical experience in all hospital clinics. The students have greatly appreciated this opportunity and it is hoped to continue it as a regular part of the training of the final year students.

STAFF, ADMINISTRATION AND BUILDING:

Dr. G. E. Hobbs was granted leave of absence September 1, 1940 from his duties as Director of the Mental Health Clinic to accept a fellowship from the Rockefeller Foundation. Dr. H. B. Carscallen returned from the post-graduate course at the Toronto Psychiatric Hospital on July 8, 1940 and is relieving Dr. Hobbs as clinic director. Dr. Hilda Lewis, who had come from England to Canada with her children, was appointed as graduate interne on August 22, 1940. Dr. M. G. Whillans was appointed on August 10, 1940 as assistant physician. Miss Lorna Horwood, superintendent of nurses, resigned September 8, 1940 to accept a similar position at the McKellar General Hospital, Fort William. Miss Florence Thomas was transferred from the staff of the Ontario Hospital, New Toronto, to succeed Miss Horwood on September 21, 1940.

The war has taken 58 of our men into the armed forces, their names appearing on an honor roll in the main lobby of the hospital. We are proud of this loyal response to their country's need and we are also happy to record that there have been no serious casualties among them.

At the request of the Deputy Minister, our staff have been taking training in Civilian Defence. All members of staff have taken the Basic Course and as the year ends all nurses and attendants are taking the St. John Ambulance Brigade Course in First Aid which will be completed about the middle of April. We are indebted to the local St. John Ambulance Association for generous assistance in the practical work of this course.

Dr. Penrose and Dr. Whillans have been assisting materially in war research projects, particularly in the matter of psychological tests and aviation medicine.

Many of our patients, in the hospital and in approved homes, have been sewing for the Red Cross.

Another effect of the war on the hospital has been the erection on hospital land, loaned to the Dominion Government, of a Mechanization Depot for the assembly and storage of military vehicles. Some 20 acres of the east garden and the 20 acre field south and west of the main building were used for this purpose. These areas face each other across Highbury Avenue and lie along the C.P.R.

Hospital property was further depleted during the year by a fire on the night of August 20th, 1940, which destroyed a large section of the Dairy Barn. No stock was lost but the Department decided to sell the Dairy Herd by auction, the sale being held on October 11th, 1940.

The only other changes in the buildings have been the conversion of the former staff dining room scullery into toilets for office staff; the installation of toilet facilities in one of the dressing rooms of the auditorium and the installation of showers in Annex 1. The water tank was also repainted. New pasteurizing equipment was installed and main kitchen refrigeration units altered. Bathrooms in Examination Building wards 3 and 4 were re-modelled.

ONTARIO HOSPITAL, NEW TORONTO

DR. T. D. CUMBERLAND, Superintendent

CARE AND TREATMENT OF PATIENTS:

This has been very satisfactory during the past year. A very large percentage of our patient population is bed-ridden, due to the number of bed-ridden cases transferred from Queen Street to Concord and finally to this hospital. Also due to the transfer of patients to other hospitals of middle age and younger who are able to be employed around the hospital, leaving a residue of patients at this hospital who have become incapacitated through old age and mental deterioration. More continuous baths are required for hydrotherapeutic treatment. We have practically eliminated the administering of sedatives at night to keep the patients quiet. All the active patients are given biscuits at night between 7 and 8 o'clock and this has had a marvellous effect upon the patients being quiet at night. It has proven that a lot of the restlessness and noise is due to patients being hungry. Insulin and metrazol treatment is giving satisfactory results.

STAFF, ADMINISTRATION AND BUILDINGS:

There have been a great many changes in the staff due to enlistment in His Majesty's Forces and resignations to enter in war industry. This has necessitated the employment of men over military age. We have also difficulty in securing sufficient graduate nurses. This is also due to enlistments and resignations to go into private nursing or other work.

The ordinary routine repairs have been kept up. There have been no new buildings or extensive alterations.

ONTARIO HOSPITAL, ORILLIA

DR. S. J. W. HORNE, Superintendent

CARE AND TREATMENT OF PATIENTS:

Considerable re-arrangements and re-organization was necessary to provide for the ever increasing demands for accommodation. The patient population increased from 1963 per day to 1983. There were 200 admissions and 149 discharges. To provide for this increased accommodation, it was necessary for us to use day rooms for dormitory accommodation.

Owing to the fact that the larger percent of our admissions were of the idiot and low grade imbecile class, there has been a natural falling-off in the number of patients probated and discharged.

Consideration was given to a boarding-out plan for defectives.

ONTARIO HOSPITAL, PENETANGUISHENE

DR. C. A. McCLENAHAN, Superintendent.

CARE AND TREATMENT OF PATIENTS:

There has been little change in population with 44 admissions — 37 discharges — 19 deaths.

The tuberculosis policy has greatly reduced the prevalence of this disease among patients so that the male isolation ward has been closed, and there are only eight suspect female cases, and the whole number of tubercular cases was reduced from sixty-five to eight in two years.

The Clinics held by the Dentist and Physicians for Venereal Disease have functioned throughout the year.

STAFF, ADMINISTRATION AND BUILDING:

Six enlistments have occurred in the Staff during the year. Assistant Physician, Dr. Joseph Scheinert, reported to Camp Borden in August for military duty. Chief Engineer, James Howell, joined the R.A.F. and his position was temporarily filled by Mr. Andrew Clark. Dr. M.O.L. Barrie was appointed Medical Intern on November 1, 1940.

Home Guard Training was carried on among male employees in the Fall with our returned men acting as instructors.

An A.R.P. course is at present being given to whole staff.

The Staff have donated frequently and generously in past year to various war programmes.

Weekly sewing meetings are held in aid of the Red Cross by members of employees' families.

Salvage campaign with regard to metals, rags, papers, etc. is in operation.

Medical staff has been short so that little new scientific work has been undertaken.

The Superintendent was granted the opportunity of attending the annual American Psychiatric meeting held in Cincinnati.

A new x-ray room combined with laboratory was made in one of the basement store rooms, and is much more satisfactory than the old one, and also gives proper facilities for laboratory work.

In the laundry a new washer was installed, and the large extractor was reset.

The auxiliary fire pump was overhauled.

Painting of the outside metal work at the New Building was continued.

On the farm two small new chicken houses were built.

A cooling tank was constructed in the dairy room at the barn.

2500 trees were planted in the waste places along the front.

It was impossible to get any new land broken this year.

The herd has been placed on the R.O.P. Seven cases of Mastitis are being slaughtered.

The poultry flock has been quite a success, and are supplying all the egg requirements as well as fowl for Christmas. In addition \$1,200 worth of Christmas fowl was sold to the Toronto Hospital.

Pork to the value of \$979.25 was sold to Guelph after Hospital needs were filled.

The rainy season was good for all vegetables, but the potatoes were badly blighted so that only early ones are being planted this year.

ONTARIO HOSPITAL, TORONTO

DR. S. R. MONTGOMERY, Superintendent

CARE AND TREATMENT OF PATIENTS:

The Artificial Fever Therapy Unit, under the direction of Dr. W. H. Avery, Dr. A.J. Bromley and Dr. M.G. Rendall, is functioning smoothly and many very satisfactory results are being obtained.

The Metrazol Clinic is still functioning with some rather remarkable results.

Many of the patients are employed about the hospital in such departments as the wards, kitchen, dining rooms, laundry, shoe repair shop, carpenter shop, paint shop and garden. These activities are ordered by the physicians as a therapeutic measure.

STAFF, ADMINISTRATION AND BUILDINGS:

On February 6th, 1941, Dr. J.R. Howitt was transferred to the Ontario Hospital, Hamilton, and Dr. S. R. Montgomery took over the duties of Superintendent on February 10th, 1941.

On September 1st, 1940, Dr. Anna Martins was transferred to the Ontario Hospital, Hamilton, and Dr. K. W. Walter's reported for duty at this hospital.

Dr. Ida M. Brill was appointed to the staff on August 6th, 1940.

Dr. Thomas O. Byrnes was appointed to the staff on September 1st, 1940.

During the past few months, lectures and demonstrations have been completed in the basic A.R.P. Course and at the present time First Aid and St. Johns Ambulance Courses are underway.

The special laboratory for the study of Psittacosis has been completed and is now in use. In this connection, some changes have been made in the Animal House, some of the work being done by the Public Works Department and some by our own mechanical staff. The laboratory is apparently proving satisfactory to those employed there.

The new dental laboratory has also been completed and the old laboratory in the Main Building has been closed. This new laboratory is also considered to be very satisfactory.

ONTARIO HOSPITAL, WHITBY

DR. D. R. FLETCHER, Superintendent.

CARE AND TREATMENT OF PATIENTS:

During the year there have been no innovations in the care and treatment of patients. We have continued with our metrazol therapy and, in some cases, with gratifying results. After careful study, we are of the opinion that no patient could be said to be worse from having had this treatment.

We regard our follow-up work with our Boarding Out Group and with our Probationary Group as very important and Dr. James D. Grieve and his staff have been indefatigable in keeping in touch with these patients and trying to help them during their convalescent period. Our Boarding Out Group has been particularly active, although we have not increased the number who are so treated, partly due to the fact that owing to the situation brought about by defence activities, boarding homes in the vicinity of a suitable type are more difficult to obtain.

Our Nurses' Training School has been functioning well, and also our training school for attendants which was well attended during the past winter season. All members of the staff had the basic course in A.R.P.

STAFF, ADMINISTRATION AND BUILDINGS:

The following members of the attendant staff enlisted during the year for Active Service. Messrs. Cecil Alloway, Samuel Collington, Stewart Cowan, James M. Crowth, Robert Finlay, John Hancock, David Haire, Leonard Hoad, John C. M. Kirk, Frank Lawrence, Oscar Moore, David Rooke, George Ross and Clarence Sleep.

Four members of our Domestic staff enlisted; Messrs. Lyle Atkinson, Francis Hayes, E. J. Jackson and Alfred Luke; as well as Doctor T. A. Sweet and Doctor G. C. Caughey, Miss Jessie M. Matheson and James Grunerud of the Medical Staff; and Leonard Hudgin of the Engineering Staff.

Doctor Margaret H. Miller, Doctor Carson, Doctor Steer, and Doctor McIntyre were added to our staff during the year.

Doctor Goddard left to take his Post Graduate Course. Doctor Viola Vail was transferred to the Ontario Hospital, Brockville and Doctor Cruickshank was transferred to the Department of Health.

Mrs. Emily Calbeck, who entered the Service at Kingston on January 7th, 1924, was superannuated on October 1st, 1940, owing to ill health.

In conclusion, may I say that those members of the staff who, for various reasons, are unable to enlist for active service would welcome and cooperate loyally with any plan that the Department may have in mind for advancing the Country's War Contribution, even though it meant a personal hardship for themselves.

ONTARIO HOSPITAL, WOODSTOCK

DR. D. O. LYNCH, Superintendent

CARE AND TREATMENT OF PATIENTS:

During the past year, our accommodation both in the Epileptic and T.B. Units has been taxed to the limit and at the close of the fiscal year, 1229 patients were in residence, 634 epileptics and 595 tuberculous mentally ill. Admissions for the year totalled 106, transfers from other hospitals 120, transfers to other Ontario Hospitals 30, discharges amounted to 110 and deaths accounted for 82.

Phenobarbital, in gradually increased dosage based on the individual case requirements, is still our main therapeutic agent in the treatment of epilepsy. Dilantin-Sodium, however, has proven a valuable alternative in cases refractory to Phenobarbital within the limits of tolerance. Few of our cases have been completely controlled by this drug alone. Much better results have been obtained when it is combined with Phenobarbital. The frequency with which toxic reactions are encountered in the use of this drug, makes it imperative that it be not given indiscriminately and only under the careful supervision of a physician.

Our electro-encephalography laboratory has been in operation since September with Dr. Pratt of our staff in charge. A considerable amount of work has been done studying the cortical activity of our known epileptics and valuable assistance has been given in the diagnosis of many doubtful cases newly admitted. Numerous out-patients have also been examined, including cases from the Westminster Hospital, London, Ontario Hospital, London, the Mental Health Clinic of the latter hospital, the Woodstock General Hospital, cases referred by the Mothers' Allowance Commission and the Motor Vehicles Branch of the Department of Highways, and cases of private practitioners.

In conformity with the findings of more experienced workers in this field, it has been found that this technique is of most assistance in the diagnosis of epilepsy where clinical methods are weakest, i.e., in cases of petit mal or psychomotor seizures rather than grand mal seizures alone. The latter are most obvious clinically but not infrequently the E. E. G. in these cases is within normal limits in the inter-seizure periods.

This laboratory was also utilized on two occasions by Flight-Lieutenant Evelyn of the Research Department of the Air Force Training Centre of London in conjunction with the Medical School, as part of special research work on a group of medical students concerning Air Force problems.

During the past year the work of the Tuberculosis Unit has been conducted on much the same scale as during the previous year, in spite of difficulties encountered by changes in staff caused by the war situation.

The greater number of the patients are receiving general nursing care and rest treatment. A large proportion, however, which comprises all those patients upon whom the procedure is possible from their mental standpoint, and indicated by their physical condition, are receiving pneumothorax therapy. The number receiving this treatment has been substantially increased as compared with the previous year. This is probably accounted for by the fact that the Ontario Hospitals Chest Clinic in its intensive programme, is sending to the Unit patients with less far advanced tuberculosis than was possible before the Unit was established on its present scale.

The more radical surgical procedures, such as thoracoplasty, extrapleural pneumothorax, etc., have not been considered advisable on mentally ill patients up to the present time.

During the year it has been possible to admit mentally ill patients from the sanatoria without delay.

Dr. F. T. Fralick has continued as Travelling Chest Clinician for the Ontario Hospitals Service, working from the T.B. Unit, Woodstock, and has completed Chest Surveys and Re-checks in all Ontario Hospitals.

Specific treatment on a number of luetic patients has been conducted during the year.

A detailed statement covering the activities of the T.B. Unit and the Ontario Hospitals Chest Clinic has been included with the special statistical tables already forwarded to the Department.

STAFF, ADMINISTRATION AND BUILDINGS:

Dr. Sophie Bookhalter was appointed to the staff of the Tuberculosis Unit on May 1st, 1940 and was later transferred to the Epilepsy Unit.

Dr. O.V. Dent was transferred from the Tuberculosis Unit to the Tuberculosis Prevention Branch in the Parliament Buildings.

Miss Hilda Bennett, Superintendent of Nurses of the Tuberculosis Unit, was transferred to the office of the Inspector of Training Schools in the Parliament Buildings.

Miss Jessie C. MacKay was transferred from the Ontario Hospital, New Toronto, as Acting Superintendent of Nurses of the Tuberculosis Unit.

Mr. James King of the Psychiatric Hospital, Toronto, was transferred as X-ray Technician to the Tuberculosis Unit.

The following staff members have enlisted during the past year and are now on Active Service: John E. Likins, Wallace C. Featherston, Kenneth J. Healy, William J. Donoghue, John C. Blewett, Clifford W. Sinclair, Bartholamew P. Regan, Edward Baldwin, R. Ross McCleary, Jack M. Kenyon, M.D., Harold G. McCarty, Clayton Pooley, Miss Alma E. Rath, Reg. N., Kenneth B. Rutherford, James F. Cluff, Charles G.O. Munro. This brings the total of enlistments since the war started to thirty-one. The following staff members were discharged as physically unfit for Active Service and have resumed their duties at the hospital: Thomas H. Pitt, James F. Cluff.

During the year the following addresses and papers were given by Dr. D. O. Lynch:

Address at the Seminar at the Toronto Psychiatric Hospital — "Recent Advances in the Treatment of Epilepsy."

Address to the members of the Y.M.C.A.—"Mental Health in War Time."

Address to the convention of Public Health Nurses—"Mental Diseases."

Lecture on Civilian Defence Organization to the senior members of the staff.

Twelve lectures in psychiatry to the Woodstock General Hospital Nurses and clinical demonstration by the members of the medical staff.

Twenty-four lectures in psychiatry to the graduate nurses in the Tuberculosis Unit and clinical demonstration by staff.

Eighteen lectures to attendants and nurse-attendants on routine hospital procedures.

By Dr. C. H. Pratt:

Lecture in "Epilepsy" to post-graduate medical groups from Toronto Psychiatric Hospital.

Lecture in "Epilepsy" to the graduate nurses in the Tuberculosis Unit of the Hospital.

Lecture in the administration of medication to the senior attendants.

By Dr. J. J. Weber:

Addresses on "Tuberculosis Prevention" to the Rotary Club, the Catholic Women's League and the Victorian Order of Nurses.

By Dr. F. S. Lawson:

Address on A.R.P. to the Victorian Order of Nurses.

A course of ten lectures in A.R.P. given to all staff by Dr. D. O. Lynch, Dr. F. S. Lawson and Mrs. Jean Sanders.

Extensive repairs and alterations were carried out during the year by the hospital maintenance staff.

ANNUAL REPORT OF ONTARIO HOSPITALS CHEST CLINIC

(FOR THE FISCAL YEAR ENDING MARCH 31st, 1941)

J. J. WEBER, Clinician

The work of this Clinic in the control of tuberculosis among the patients and staff of the Ontario Hospitals by means of chest X-rays and Tuberculin tests, has continued during the past fiscal year according to the plan described in the report for the fiscal year ending March 31st, 1938.

The large table* accompanying this report indicates the volume of work carried out by this Clinic during the fiscal year ending March 31st, 1941. The grand totals show, in spite of the difficulties encountered by changes in staff caused by the war situation, that the volume of work has remained much the same as in the previous fiscal year. Through the past fiscal year we have been able to remove all cases of active tuberculosis from the Ontario Hospitals as soon as they have been discovered, and in addition to this, there has been no delay in admitting tuberculous cases who have become mentally ill, from sources other than Ontario Hospitals, mainly, from sanatoria. It is noticeable that since all the active cases were removed from the Ontario Hospitals when the Unit first came to Woodstock in October 1939, that during the past fiscal year only 99 new cases of tuberculosis were discovered in the Ontario Hospitals; whereas in the fiscal year ending March 31st, 1940, 137 new cases were discovered among the patients in the Ontario Hospitals.

It may be in order to mention that during the past fiscal year, 1,126 staff applicants were examined radiologically, and of these 9 or 0.8% were considered unsuitable for employment because of pulmonary tuberculosis, either active or questionably active, and 135 or 12% were accepted with reservations because of abnormal chest x-ray markings, possibly but not necessarily tuberculous in nature. These were accepted for temporary staff employment only, and were to have some further investigation, repeat x-rays, etc., within six months of commencing employment. Three thousand and two hundred and seventy-nine (3,279) patient admissions to Ontario Hospitals were examined radiologically, and of this number 19 or 0.5% were recommended for transfer to the T.B. Unit because of active pulmonary tuberculosis, and 43 or 1.2% were recommended for isolation and further investigation in their respective hospital because of questionably active disease. In addition, 166 or 4.5% were placed on casual observation because of abnormal chest X-ray markings, possibly but not necessarily tuberculous in nature.

The following table indicates the status of tuberculous patients in all Ontario Hospitals as it existed near the termination of the fiscal year ending March 31st, 1941:—

	Male	Female	Total
Number under treatment in T.B. Unit at Woodstock	321	274	595
Number under isolation at the various Ontario Hospitals awaiting transfer to the T.B. Unit ..	None	None	None
Number under segregation for further investigation at the various Ontario Hospitals (Tuberculosis of questionable activity or suspect tuberculosis).	114	110	224

A word of explanation appears necessary here as there is some conflict between this table and the large table* attached to this memorandum, in that the column "Number of cases advised for investigation, staff merely repeat X-rays. Patients segregated while investigated," the patient total is —1,272— this includes not only 'questionably active' cases but those whose X-ray show tuberculous markings, whether definitely arrested, probably arrested, questionably active, or suspect tuberculosis, whereas the short table above shows only those isolated because of 'questionably active' tuberculosis. The large table includes all those segregated or under casual

*Table 47, Page 106.

observation for chest disease as well as the questionably active cases.

A further sub-division of the cases under treatment in the T.B. Unit is presented in the following table, and this indicates the tuberculous status of patients in the T.B. Unit at or near the end of the fiscal year. These figures change frequently as a result of the necessary re-check examinations carried out on each patient, but the table is of interest in showing an approximation of the tuberculosis status of patients under treatment at the end of the fiscal year. It should be added that patients who are classed as — 'quiescent,' are on part time exercise, and those classed as 'probably arrested,' are for the most part, on full exercise, and depending upon their next re-check examination, their classification will be altered; if improved, they will be classed as 'arrested'. The 'arrested' group have been on full exercise for at least six months without showing any radiological changes; this is the group from which patients will be selected from time to time for transfer out of the T.B. Unit, either to return to the various Ontario Hospitals if their mental condition is unchanged, or they will be placed on probation if their mental condition warrants such a procedure. It should also be added that from time to time patients whose tuberculosis is classified as other than 'arrested,' are transferred to a sanatorium for further treatment of their chest disease if their mental condition improves sufficiently.

	Active Activity		Probably		Totals
	Questionable	Quiescent	Arrested	Arrested	
Male	132	60	73	56	321
Female	94	93	52	35	274
Total	226	153	125	91	595

This Clinic undertakes the re-examinations or arranges for the re-examination of all Ontario Hospital employees during their convalescence following their discharge from sanatoria. The Clinic also performs artificial pneumothorax refills upon those employees discharged from sanatoria where they require these treatments and when it is convenient for them to come to the Unit for treatment. This aspect of the work has been curtailed somewhat since the Clinic office was moved from New Toronto to Woodstock. There is close co-operation between this Clinic and the Division of Tuberculosis Prevention regarding the after-care of members of staff discharged from sanatoria.

There were a number of changes among the Medical Staff of the T.B. Unit during the past year. In April 1940, Dr. O.V. Dent was transferred to the Division of Tuberculosis Prevention, and the loss of his experienced services made considerable extra work for the remaining medical staff. Dr. S. Bookhalter was appointed to the staff in May 1940, but was transferred to the staff of the Epileptic Unit at the end of August. In September 1940, Dr. Harry P. Granger was appointed to the staff of the T.B. Unit, and no other changes were made during the remainder of the fiscal year. Dr. F. T. Fralick has continued as Travelling Chest Clinician for the Ontario Hospitals Service, working from Woodstock.

The continued assistance and co-operation of the Superintendents and the staff of the various Ontario Hospitals, has been of great help in the completion of this work. Moreover, Dr. G.C. Brink and members of the Chest Consultant Board have continued to take a very active interest in this service, and we herewith express our appreciation of their help.

ONTARIO HOSPITAL POPULATION STATISTICS ANNUAL REVIEW - 1941

An attempt is made in the following review to indicate certain trends in the mental hospital statistics for this province. All inferences are based on data included in the detailed tables on pages 35 to 108.

In Table I are shown the number of patients in residence and the number on the books of the Ontario Hospitals for the last fifteen years. The increase for this year of both these totals is somewhat greater than for last year. When the concurrent increase of the general population is taken into account, this increase is less pronounced than it at first appears.

After having shown an increase for several years, the proportions of both the patients boarded out and those placed on probation, given in Table II, have remained almost stationary. Although over the last ten years there has been a definite increase in the number of patients cared for in boarding homes, the proportion of patients on probation has not been decreased.

A comparison of the mental hospital population with the general population of the province is presented in Table III. The totals of the two sexes in the general population differ slightly, and the totals of male and female mental patients are in practically the same ratio. However, in the earlier age groups, up to the age of 44, the male patients show a consistent predominance. The female patients conversely, are more numerous in the later age groups.

In Table IV, the likelihood of admission to a mental hospital is shown to increase as the subject's age increases. The rate per 1,000 general population rises steadily from 0.13 at ages under 15 years to a rate of 1.37 at 65 years and over. Among the resident population the same type of distribution is indicated, but the maximum for this group is reached at ages 55-64 years. The mean age of first admission is approximately 41.5 years, whereas the mean age for patients in residence is 44.0 years.

The psychiatric diagnosis of patients in residence over a period of six years is shown in Table V. Of interest is the gradual increase in the number of cases classified under the headings, Dementia Praecox, Paranoia, G.P.I., and Mental Deficiency without Psychosis. This fact does not imply that these diseases are becoming more prevalent, it merely indicates that the patients who suffer from them tend to accumulate in the resident population in contrast to those with Manic Depressive diagnoses, for example.

In Table VI it is shown that when the psychiatric classification of first admissions is studied over the same period (Table V), the admissions classified as Dementia Praecox, Paranoia, G.P.I., and Mental Deficiency without Psychosis will be found actually to have declined in number. Since 1938 there has, in fact, been a steady drop in the total admission rate. The admission rate for cases of Manic Depressive Psychosis, however, has shown little diminution and the rate for cases of senile psychosis has increased.

The discharge and death rates for each hospital are shown in Table VII. These rates vary considerably for different hospitals. It should be kept in mind, when comparing these figures, that there are local differences in the composition of the patient populations and in the standards used to determine the patients' conditions.

Table VIII gives a more detailed picture of the numbers of patients discharged and discharge rates for each hospital. It will be noted that in some hospitals, where recovery rate is low, the rate for "Improved" patients is high. Out of the total of 1,974 patients, who were discharged, 52 per cent were discharged as "Improved" and 23 per cent were discharged as "Recovered."

Discharge and death rates for each of the major psychoses are shown in Table IX. The discharge rate for the Manic-Depressive group is highest and the rate for the Dementia Praecox group is lowest. Senile psychosis is associated with the highest death rate and Dementia Praecox with the lowest. Eleven per cent of the total of 17,279 patients under treatment during the year were discharged and 5 per cent died.

Detailed discharge rates are shown in Table X. Out of the total of 1,595 patients with psychoses, who were discharged, 65 per cent were discharged as "Improved" and 29 per cent were discharged as "Recovered". In the case of those classified as Manic-Depressive, 452 or 27 per cent of the number treated were discharged during the year. Over 50 per cent of the 210 cases classed as Psychoneurosis and Neurosis were discharged as either "Recovered" or "Improved".

Table XI shows the rates of discharges and deaths for specific age groups. Of the total number treated during the year for the age group 15-24 years, 346 or 17 per cent were discharged. Discharge rates tend to show a decrease with advancing age after 45 years, while death rates show an increase. The specific death rate per 1,000 patients under treatment is lowest in the age group 25 to 34 years.

Presented in Table XII are the chief causes of death for the Ontario Hospital population as compared with the general population. Last year, deaths from pneumonia and bronchitis headed the list, with 260 deaths or 30 per cent of the total deaths in Ontario Hospitals. This year, diseases of the heart are first, with 246 deaths or 30 per cent of the total. The fact that these two diseases are the leading causes of death among the patients in the Ontario Hospitals is probably accounted for by the large number of old people in hospital.

The foregoing review is intended merely to draw attention to the general trends and rates observed in the mental hospital population. Detailed information will be found in the standard statistical tables which follow on page 35.

MENTAL HEALTH CLINICS

C. R. MYERS, Ph.D., CONSULTANT PSYCHOLOGIST

The following brief analysis draws attention to some of the salient features of the work done by the Ontario Mental Health Clinics during the year April 1, 1940 to March 31, 1941.

Table No. 1 shows the number of new cases seen by each clinic during the year, the number of case contacts during the year and the total number of new cases seen by the clinics since the inauguration of the Mental Health Clinic service in June, 1930.

In Table No. 2 there are given a number of the sources from which the clinics receive their cases. It will be seen that 48 per cent of the total number of new cases were referred to the clinic by Medical Agencies. Welfare Agencies referred 28 per cent. These two Agencies refer more than 75 per cent of the total cases examined by the clinics.

The slight predominance of the male cases over the female cases is shown in Table No. 3. Fifty-six per cent of the new cases examined were males.

Table No. 4 shows the number and per cent of new cases by age groups. The greatest percentage of these cases (42.2%) are adults. The next largest group may be classified as being of school age, (6-13 years) and contribute 26.8 per cent of the total cases. Previous to 1938, this group, (6-13 years) contributed up to fifty per cent of the total. It may be assumed, therefore, that there is an increasing tendency on the part of adults to make use of the clinic facilities.

Table No. 5 presents certain of the specific problem encountered by the Mental Health Clinics. Suspected Mental Illness and Suspected Mental Defect combined contribute 1,085 cases or 33.5 per cent of the total number of cases for the year. Juvenile Delinquency follows with 469 cases or 14.5 per cent of the total. Since 1937, the number of cases classified as Suspected Mental Defect has dropped from 24.3 per cent to 13.1 per cent.

The Intelligence grades of Clinic patients are given in Table No. 6. The group comprising "Normal" and "Undiagnosed" contributed 57.2 per cent of the total cases for the year, whereas the "Mental Defect" group contributed only 15.0 per cent. In 1937 these two groups comprised 46.8 per cent and 21.0 per cent, respectively. As the "Normal" and "Undiagnosed" group has increased and the "Mental Defect" group has shown a corresponding decrease.

In Table No. 7 are shown certain specific psychiatric conditions, which were found among the 3,235 new cases seen by the Mental Health Clinics. Of the total number, 11.9 per cent were classified as "Neuroses;" those classified mentally "Schizophrenia" were less numerous (7.3 per cent). Patients classified mentally defective contributed 13.3 per cent.

In Table No. 8 the frequency, with which certain forms of treatment have been recommended, will be found. For over 500 cases, "Physical Care" has been recommended. Institutionalization has been advised for 485, or 15 per cent of all cases seen. Nine per cent were recommended for admission to the Ontario Hospital, Orillia, and 62 per cent for admission to other Ontario Hospitals. The number of cases recommended for institutionalization had been steadily decreasing for the last few years, but this year it has risen again sharply, as is shown by the following figures — 1937 - 276; 1938 - 178; 1939 - 166; 1940 - 151; 1941 - 344.

TABLE No. 1
CASE LOAD — YEAR ENDING MARCH 31, 1941

CLINICS	Current Year		
	No. of New Cases	No. of Case Contacts x	All Years
Brockville	838	3,973	5,000
Hamilton	705	4,839	6,288
Kingston	567	2,001	3,705
London	782	2,049	6,533
New Toronto	—	—	1,720*
Orillia	—	—	1,568*
Whitby	517	2,153	3,745
Toronto Psychiatric	625	Not Available	7,163
TOTAL	4,034	14,997	35,722

* New Toronto Clinic figures are for 1931-1937.

Orillia, Clinic figures are for 1931-1940.

x Any contact made by any ONE member of the clinic staff and includes all the new cases.

In the tables No. 2 to No. 8, all cases examined at the Toronto Psychiatric Out Patient Clinic are excluded. Only 531 (cases seen only at Clinic Centres) of the 705 new cases seen by the Hamilton Clinic are included in the following tables.

TABLE No. 2
NEW CASES BY REFERRING AGENCY

REFERRING AGENCY	Number of Cases	Per Cent
Welfare Agencies	921	28.4
Relief Agencies	11	0.3
