D. M. FERRY & CO'S SEED ANNUAL

==1914

FOREWORD

THE ultimate aim of any catalogue is to sell goods. In this respect we do not claim our intention in publishing this Annual differs from that of others. It is always a pleasure to fill orders which result from people having seen our catalogue. However, our purpose, by no means an unselfish one, is primarily to induce people to take a permanent interest in Gardening.

It is our wish to have this book the standard guide to Gardening rather than a mere list of prices. The descriptions of the varieties of Vegetables and Flowers have been written with the aim of making them of real assistance to you in deciding what you want to grow. The cultural directions should be a help in successfully caring for what you have decided to plant.

Our business has long since outgrown an experimental stage. D. M. Ferry & Co's Seeds are known and sold by dealers throughout the United States and Canada. We hope you will acquire a permanent habit of planting your garden with our Seeds.

OUR TERMS ARE STRICTLY CASH WITH THE ORDER. We do not send C. O. D., as the cost of collecting return charges is quite an unnecessary item of expense and the prices being given, we can conceive of no necessity to warrant goods being so sent.

HOW TO SEND MONEY. Remittances may be made at our risk by any of the following methods, viz: Postal Money Order, Draft on New York or Chicago, or Express Company's Money Order.

The rates charged for Postal Money Orders and Express Money Orders are now so low that these are the best ways to remit. We will bear the expense of sending money in either of these ways. Deduct the cost of the order from amount sent. Express Money Orders can be obtained at all offices of the principal Express Companies. They are cheap and absolutely safe.

When Money Orders cannot be obtained, letters containing money should always be registered. Money in ordinary letters is unsafe. If currency is sent by express, the charges should be prepaid, and if local checks are used they must be certified.

FREE OF POSTAGE OR EXPRESS CHARGES. Packets, Ounces, Two Ounces, Quarter Pounds or Pounds, ordered at list prices, will be sent free by mail or express.

Customers ordering enough for a freight shipment, 100 pounds or more, or desiring to pay their own express charges, may deduct 10 cents per pound from prices of this catalogue on all seeds quoted by the pound or less.

PINTS AND QUARTS. Pints, Quarts and Four Quarts, ordered at list prices, fifteen cents per quart, tencents per pint, must be added for postage or express charges and they will then be sent free.

ONE-FOURTH BUSHEL, BUSHEL AND HUNDRED POUND LOTS. Where One-Fourth Bushel, Bushel or Hundred Pound lots are ordered, we deliver free at depot or express office in Detroit, Mich., the freight or express charges to be paid by the party ordering.

Where perishable or other goods are ordered to be sent by freight or express to such great distances that the cost of transportation will nearly or quite equal the value of the goods, we must decline to ship unless purchasers remit us, in addition to the price of goods, sufficient funds to prepay transportation charges. When this requirement is not complied with, we reserve the right of declining the order and returning money to the person ordering.

SEEDS BY MEASURE. One-fourth bushel and over sold at bushel rates; four quarts and over up to one-quarter bushel sold at four-quart rates; less than four quarts sold at quart or pint rates.

SEEDS BY WEIGHT. We supply half pound and over at pound rates; less than half pound lots are charged at ounce, two-ounce or quarter pound rates; 25 lbs. and over at 100 lb. rates when quoted.

BAGS. To every order for one-quarter bushel and upwards, to the amount of two bushels, 25 cents must be added for a new bag in which to ship.

SEEDS IN PACKETS. We offer the following inducements to those wishing to purchase seeds in packets: Select packets to the value of \$1.15 and send us \$1.00; for \$2.35 send \$2.00; for \$3.60 send \$3.00; for \$4.85 send \$4.00; for \$6.15 send \$5.00; for \$12.50 send \$10.00; for \$26.00 send \$20.00. The seeds will be sent by mail, postpaid, but these low rates apply to seeds in packets only and at catalogue prices and not to seeds by weight or measure.

NAME AND ADDRESS SHOULD ALWAYS BE GIVEN. Frequently we receive unsigned letters. Sometimes they contain money and orders. Sometimes too, letters are received in which the name of the town is left out and the postmark is blurred. We cannot fill orders unless we know the name and address of the buyer. The easiest way for you is to use our order sheet filling in the blanks.

NON-WARRANTY. Sometimes though not often our seeds do not come up after planting. This may be due to one or more of several reasons, such as covering too deeply or not deeply enough, too much or too little water, too cold weather or a baking sun which forms a crust too hard for the tender shoots to penetrate. Sometimes insects destroy plants at the surface before they are seen by the gardener. We cannot personally direct the use of our goods after they leave our hands; neither can we fully control anywhere or at any time the operation of natural law as it affects seeds; therefore, we give no warranty, express or implied, as to description, purity, productiveness, or any other matter of any seeds or bulbs we send out, and we will not be in any way responsible for the crop. If the purchaser does not accept the goods on these terms they are at once to be returned.

D. M. Ferry & Co.

Detroit, Mich., January 1, 1914.

Crego Giant Pink Aster

This is considered by many as decidedly the best Aster yet produced. The flowers are of largest size with exceptionally long petals which are very attractively curled and twisted; color beautiful soft shell pink. The plants are branching and very vigorous, producing about mid-season an abundance of flowers on very long strong stems. A most desirable variety for cutting. (See cut on this page; also see page 67) Pkt. 15c; Oz. \$1.75

Golden Ray Calliopsis

This dwarf variety forms compact plants covered with attractive flowers of rich maroon edged with golden yellow. (For further description, see page 69) Pkt. 10c.

Carnation—Extra Choice Double Mixed

The design of Carnations shown on the opposite page was executed in natural colors from specimens produced on plants wintered over outdoors at our Experimental Gardens. The mixtures we offer will produce finely formed double flowers in a great variety of shades and markings. (See also page 70) Pkt. 15c; Oz.\$2.50

Gypsophila — Elegans Large Flowering Pure White

For adding grace to a bouquet of cut flowers there is nothing more beautiful than our improved large flowering strain of Gypsophila. The delicate sprays of pure white flowers are easily grown and may be had from the outdoor garden through a long season. Combined with carnations, with violets or snapdragons, with hyacinths or orchids according to the season's opportunities, the effect with each is delightful. A few sprays add greatly to the charm of a bunch of sweet peas. (See also page 75) Pkt. 5c; Oz. 25c.

CREGO GIANT PINK ASTER

Snapdragon—Fine Mixed

The Snapdragon in its improved forms is one of the best perennials suitable for flowering in the garden as an annual. The long showy flower-spikes are fragrant as well as brilliantly colored and are desirable for cutting. The mixture we offer includes all the best colors. The flowers are of splendid substance and the throats finely marked. (See colored plate, page 85, and further description, page 84) Pkt 5c; Oz. 35c.

Stock-Double German Ten Weeks Mixed

Large Flowering

The fragrant flowers of this annual strain of Stocks are favorites for display in the summer garden. The mixture we offer is large flowering and affords a wide range of pleasing shades and colors. (See back cover, also page 86 for other varieties of Stocks) Pkt. 5c; Oz. \$1.00

Sweet Peas

King White is pronounced by experts as undoubtedly the leading Sweet Pea novelty for 1914. Its form, size, vigor, waviness and purity of color give pre-eminence to its claim as the best Spencer Sweet Pea yet introduced. Pkt. (15 seeds) 15c.

Two other additions of great merit this year to our list of Spencers are Constance Oliver, an exquisite cream pink, and Flora Norton Spencer, a charming bright blue tinted with purple. Our Ferry's Superb Spencer Mixed is without a superior in mixed sweet peas. (See pages 87, 88, 89 and 90)

Verbena

The showy Verbenas on the front cover of this Seed Annual are reproductions in natural colors of specimens from the regular Verbena trial at our Experimental Gardens. (See page 91 for list of Verbenas in named varieties and in mixtures)

Harlequin Bean

This splendid horticultural sort is earlier, more productive, and has much longer and more attractive pods than the well known London Horticultural or Speckled Cranberry. It is also hardier and a more reliable cropper. The large ovate beans are of the highest quality either green shelled or dry. The pods are very long, six to seven inches, striped or splashed a deeper and more brilliant red than London Horticultural dry.

long, six to seven inches, striped or splashed a deeper and more brilliant red than London Horticultural; dry beans a trifle longer. In our trials the past season Harlequin excelled not only in hardiness, evenness of growth and productiveness, but it matured at least a week earlier than London Horticultural. We consider Harlequin the most attractive in appearance and the highest in quality of the Horticultural class. We offer a very superior stock of our own growing. Pkt. 10c; Pt. 35c; Qt. 60c; 4 Qts. \$2.00; Bu. \$12.00

Dwarf Unrivaled Wax Bean

The handsome pods of this dwarf sort are longer than those of Golden Wax and a little lighter in color, are rather narrow and somewhat flattened but fleshy, and when in proper condition for use are very attractive on the market. Dwarf Unrivaled Wax usually matures soon after our Golden Wax. A valuable sort for market gardeners' use. (See further description, page 15) Pkt. 10c; Pt. 30c; Qt. 50c; 4 Qts. \$1.75; Bu. \$10.00

If beans are ordered by mail or express prepaid add 10 cents per pint, 15 cents per quart for charges.

Copenhagen Market Cabbage

We consider this unquestionably the most valuable cabbage of recent introduction. It is the earliest large round-headed cabbage, producing marketable heads earlier than Charleston or Large Wakefield. The plants are so compact in growth that they may be set very uearly as close as Early Jersey Wakefield. Even when comparatively small the heads of Copenhagen Market are so solid that they are in condition for shipping in crates. If allowed to reach full size under good culture and conditions favorable for normal growth, the heads become nearly as large as those of some second carly varieties. The heads when cut are white, exceptionally crisp and tender.

Our reports from critical growers both north and south are that they have found Copenhagen Market superior to the Wakefield strains of cabbage in weight of marketable product per acre. Its earliness, compact growth, evenness of maturing, uniformity and size of heads, firmness and most excellent quality combine to make Copenhagen Market the most desirable early cabbage of recent introduction. Our strain produces the characteristic large round heads that for their solidity and excellent quality make this variety so valuable. We recommend it unreservedly both for the home garden and the market gardening trade. (See colored plate, page 23, and further description, page 22) Pkt. 5c; Cz. 60c; 2 Oz. \$1.00; ½ Lb. \$1.75; Lb. \$6.00

Early Jersey Wakefield

Our stock of this standard first early cabbage is grown and selected with the greatest care. In the very important point of evenness of maturing we believe our strain has no equal. We know that experienced gardeners depend upon our seed to produce their earliest crop. They know by experience that the seed we offer insures them the greatest satisfaction and profit. (See colored ptate, page 23, and further description, page 22) Pkt. 5c; Oz. 30c; 2 Oz. 55c; ¼ Lb. \$1.00; Lb. \$2.75

Charleston or Large Wakefield

In this straiu the plant is larger and a little later than Early Jersey Wakefield, the solid heads being considerably larger, less pointed and very broad at the base. Its hardiness, earliness and size of head have made it with market gardeners and shippers a very popular sort to follow Early Jersey Wakefield. The seed we offer can be depended upon to produce uniformly fine, marketable heads. (See cotored ptate, page 23, and further description, page 22) Pkt. 5c; Oz. 30c; 2 Oz. 55c; ½ Lb. \$1.00; Lb. \$2.75

May King Lettuce

We are convinced by many trials of American and European lettuces that May King is the best extremely early heading sort yet introduced. Grown under glass this variety matures a handsome, light greeu head fully as early as any of the strictly forcing sorts which are generally, however, practically worthless for outdoor culture. Grown outdoors May King can be depended upon as the earliest of all to form a marketable head. The plant is very compact for so large a head. The inner leaves blanch rich golden yellow, very tender and buttery. Among extra early sorts it is unsurpassed in quality and we have no hesitation in recommending it for forcing under glass and as the best extra early sort for growing out of doors. (See colored plate opposite and further description, page 36) Pkt. 5c; Oz. 20c; 2 Oz. 35c; ¼ Lb. 60c; Lb. \$1.75

Big Boston Lettuce

Our opinion is confirmed after repeated trials that this compact, large heading lettuce can be depended upon to head up under cold weather conditions better than any other variety. Leaves broad, comparatively smooth but wavy at edge, thin, very hard and crisp; color bright light green, the head slightly tinged with reddish brown. It is a most desirable sort not only for outdoor culture but also for forcing in cold-frames. We heartily recommend Big Boston to our customers, especially to the market gardening trade. (See colored plate opposite and further description, page 36) Pkt. 5c; Oz. 20c; 2 Oz. 35c; ¼ Lb. 60c; Lb. \$2.00

HARLEQUIN BEAN

MAY KING LETTUCE

Columbia Celery

Perfection in celery is recognized by two groups—the gardeners who produce celery that uniformly commands the highest market price and the connoisseurs who will go without rather than eat any but the best. To both the successful producer and the intelligent buyer we commend our strain of Columbia as the peer of Golden Self Blanching, so long considered the standard. Columbia comes into use only a trifle later than Golden Self Blanching. The plant is very vigorous and hardy. In beauty of golden color and solidity and size of stalk it is unsurpassed. In delicacy of flavor Columbia is considered by many to surpass Golden Self Blanching. No better celery has ever been produced than our strain of Columbia. Try it in the home garden and be convinced. (See cut on this page and further description, page 28) Pkt. 5c; Oz. 85c; 2 Oz. \$1.35; ¼ Lb. \$2.25; Lb. \$8.00

Golden Yellow Self Blanching Celery

This standard variety is the one grown much more extensively than any other sort for early use. Our stock has been very carefully selected and grown and we believe it is the very best obtainable. (See cut and further description,

page 28) Pkt. 5c; Oz. \$1.65; 2 Oz. \$2.85; ¼ Lb. \$5.25; Lb. \$20.00

Mammoth White Cory Corn

We consider this unquestionably the best extraearly corn The ears are very large for so early a variety. They are twelve rowed; six to seven inches long,

COLUMBIA

symmetrical, very white and of remarkably good quality for such an early sort. Their size and beauty give them ready sale even when the market is overstocked. (See cut on this page and further description, page 30) Pkt. 10c; Pt. 15c; Qt. 25c; 4 Qts. 75c; Bu. \$5.00

Golden Bantam Corn

This early sweet corn with golden yellow grain is very tender and when in best condition for the table is of exceptionally rich and delicious flavor. Our stock has been very carefully selected during several seasons and will be found decidedly superior. (See cut and further description, page 30) Pkt. 10c; Pt. 20c; Qt. 30c; 4 Qts. \$1.00; Bu. \$6.00

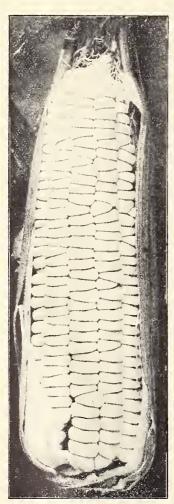

Avon Evergreen Corn

This splendid evergreen sort was introduced by us last year and wherever tried has been found of most superior quality. Those who like the old reliable Stowell's Evergreen will find in Avon Evergreen a variety better in every way. It is a trifle earlier and has a longer ear and thicker kernel. It remains long in condition for use and is of surpassing sweetness of flavor. Avon Evergreen stands alone in its class as a main crop variety for the market, the home garden and the canner. (See cut and further description, page 31) Pkt. 10c; Pt. 25c; Qt. 40c; 4 Qts. \$1.50; Bu. \$8.00

Black Beauty Pop Corn

An extremely early variety that pops very large and exceptionally white. The kernels are black but this color is not noticeable after popping, when this sort is the largest and most tender of any. (See further description, page 31) Pkt. 10c; Pt. 25c; Qt. 40c; 4 Qts. \$1.50; Bu. of ears \$5.00

If corn is ordered by mail or express prepaid add 10 cents per pint, 15 cents per quart for charges. We supply pop corn in lots of four quarts and less, shelled.

MAMMOTH WHITE CORY

ASTER TRIAL AT OUR EXPERIMENTAL GARDENS.

The one hundred fifty-one lots of Asters in this trial were all carefully noted with regard to habit of growth of the plant and the form, color, size and duration of bloom of the flowers.

SELECTING MUSK MELONS FOR STOCK SEED AT OAKVIEW.

Stock Seed is saved only from fruits that meet our critical requirements with regard to quality, size, shape and color.

MUSK MELONS

There are two distinct ideas in growing Musk Melons. One is to produce a melon that will be in the highest degree sweet, juicy and melting. This is the home garden ideal. It requires for its perfection good soil, good seed, healthy plants and plenty of sunshine. The best melon of this type is Emerald Gem.

The other ideal is a melon whose flesh while approaching closely the very high quality of the former will also have firmness of fibre to insure its keeping well. To stand shipment it must have also a hard rind. Admiral Togo possesses in high degree all these characteristics and is uniform in size and shape. We consider it the best shipping melon. It is delicious.

ADMIRAL TOGO—AN ORANGE FLESHED ROCKY FORD

Emerald Gem

The home gardener who grows Emerald Gem can pick his melons and be sure of having them properly iced and on his table a few hours afterwards. He is not obliged to accept a shipping melon several days after picking. He does not have to take a melon that, even had it been allowed to ripen thoroughly on the vines, would fall short of a rich juicy Emerald Gem with its superlative sweetness of flavor. Our strain produces melons of convenient size for the table and of the highest quality. Plant Emerald Gem in your garden. (See further description, page 39) Pkt. 5c; Oz. 15c; 2 Oz. 25c; 4 Lb. 40c; Lb. \$1.25

Admiral Togo An Orange Fleshed Rocky Ford

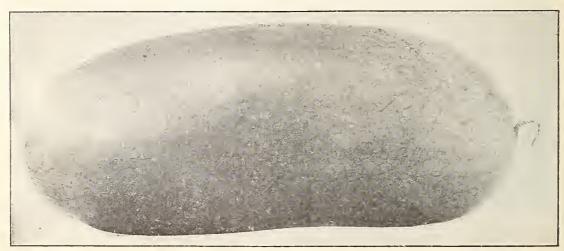

This is a small, oval orange fleshed variety, similar in size and shape to the green fleshed Netted Gem or Rocky Ford, and of most excellent quality. It stands shipment as well as any of the green fleshed sorts and wherever tried has been found distinctly superior in quality to any of that class. Our stock is carefully bred in size and shape, is densely netted, with very thick flesh, ripening clear to the skin. We believe the seed we offer will meet the demands of the most discriminating buyers. (See cut on this page and further description, page 39) Pkt. 5c; Oz. 15c; 2 Oz. 25c; ½ Lb. 40c; Lb. \$1.50

Harris' Earliest Water Melon

After carefully observing this splendid variety in our trials for several seasons we are convinced it is the very best first early melon for the home garden. The fruits are slightly oval, with irregularly mottled stripes of light and dark green and are very even in shape and size. The flesh is bright red, sweet and tender. (See cut, page 40) Pkt. 5c; Oz. 10c; 2 Oz. 20c; ¼ Lb. 30c; Lb. \$1.00

Tom Watson Water Melon

The increasing demand of late for a better quality of shipping melon has been met to a most exceptional degree in the Tom Watson. The fruits are large and long. They are similar in shape, color and splendid quality to Monte Cristo and average larger in size. The rind is tough, making the variety especially adapted for shipping to distant markets. Wherever grown in the south it has become the most popular of all shippers. (See cut on this page and further description, page 40) Pkt. 5c; Oz. 10c; 2 Oz. 20c; ¼ Lb. 30c; Lb. \$1.00

TOM WATSON WATER MELON

FIELD OF ONIONS AT OUR OAKVIEW STOCK SEED FARM.

Carefully selected pedigreed bulbs only are used in growing our Onion stock seed each year.

BULBS OF YELLOW GLOBE DANVERS BEFORE SORTING FOR STOCK SEED.

After topping, pulling and raking the bulbs into rows, only those are saved for stock seed which come up to our high standard with regard to shape, ripening habit and color.

Westerwold Italian Rye Grass

Lolium Italicum Westerwoldicum

An extremely rapid growing annual for spring and summer sowing. As a forage and pasture grass it thrives on almost any soil but does best on heavy loam, clay or land of a somewhat damp character. It is lighter in color and coarser in leaf than Perennial Rye but is very much stronger growing. We have found that after cutting, Westerwold is the quickest grass

ALDERMAN PEA

but is very much stronger growing. We have found that after cutting, Westerwold is the quickest grass to start again, making a new growth more rapidly than any other sort with which we are acquainted. From our comparative trials the past season we believe this will be found a most valuable addition to the grasses grown in this country. Lb. 30c. postpaid; for larger lots inquire for prices.

Sutton's Excelsior Pea

This early, wrinkled pea is one of the largest podded of the dwarf varieties. The pods mature very nearly as early as those of Nott's Excelsior but are broader and the foliage is distinctly lighter in color. The peas are of the best quality. We have given this variety special attention and the stock we offer is of superior quality. (See further description, page 46) Pkt. 10c; Pt. 30c; Qt. 45c; 4 Qts. \$1.50; Bu. \$9.00

Laxtonian Pea

We believe Laxtonian is one of the most valuable peas of recent introduction. It is the largest podded of the dwarf varieties on our list. The beautiful dark green pods are similar to Gradus in shape and splendid quality, are very nearly as large in size and mature a little earlier. The vines are vigorous and productive, averaging fifteen to eighteen inches: foliage dark green. The very large size and dark green color of the pods commend the variety particularly for market gardeners' use and the size, color and unsurpassed quality of green peas make them especially desirable for the table. (See further description, page 46) Pkt. 10c; Pt. 30c; Qt. 50c; 4 Qts. \$1.75; Bu. \$10.00

Alderman Pea

Alderman has proven to be in many respects the very best early main crop variety of the valuable Telephone type. The vines are tall growing, dark green, vigorous and exceedingly productive. Pods of largest size, dark green, similar to but a little larger and a shade darker in color than Duke of Albany and about the same in season. The peas are of largest size and unsurpassed in quality. Market gardeners are demanding the large podded, dark colored sorts which retain their fine appearance even after shipping a long distance. The Alderman answers these requirements and furthermore is the most productive of this class. We recommend it unreservedly. (See cut on this page and further description, page 48) Pkt. 10c; Pt. 25c; Qt. 40c; 4 Qts. \$1.50; Bu. \$7.50

Dwarf Champion Pea

The vines of this excellent main crop sort are of medium height, only about three feet, vigorous, hardy, and unusually productive. The pods are large, fully four inches long, broad, quite straight, deep green in color, handsome and very well filled with large peas which are tender and unsurpassed in quality. Dwarf Champion is becoming wherever known a popular main crop sort for the market or home garden. The stock we offer is very superior and we believe it will meet the requirements of the most critical trade. Pkt. 10c; Pt. 25c; Qt. 40c; 4 Qts. \$1.50; Bu. \$7.50

If peas are ordered by mail or express prepaid add 10 cents per pint, 15 cents per quart for charges.

Early Detroit Tomato

This splendid variety, introduced by us five years ago, is now generally recognized as one of the most valuable shipping tomatoes yet introduced. It is not only the most productive of the early purplish pink tomatoes but in uniformity and size of fruit, freedom from cracking and from tendency to blight it has been found to meet the most exacting requirements. (See cut and further description, page 57) Pkt. 5c; Oz. 35c; 2 Oz. 60c; ¼ Lb. \$1.00; Lb. \$3.50

OUR SEED WAREHOUSE "A" 300 X 120 FEET

The Essentials to the Production of

Good Vegetables and Beautiful Flowers

Good Soil A rich, sandy loam is the best, but a fair de-gree of success may be secured from any soil which can be made rich and friable. Vegetables of the best quality cannot be grown on barren sand, a cold, hard, lumpy clay, nor in the shade of orchard or other trees.

Liberal Manuring A soil which does not need enriching in order to produce the best results is rarely found and very often success is in proportion to the liberality with which fertilizers have been used. Well decomposed stable manure where straw bedding has been used is the best; manure where sawdust has been used for bedding is not so good. Often wood ashes at the rate of one peck up to one bushel to the square rod will be of great, benefit.

of great benefit.

When good stable manure is not available, commercial fer-When good stable manure is not available, commercial fertilizers may be used at the rate of four to twelve pounds to the square rod and the more concentrated forms, such as Nitrate of Soda, Guano, Dried Blood and Potash Salts, at the rate of one to six pounds to the rod, the larger amounts preferably in three or four applications and at intervals of about ten days. A mass or lump of any of the commercial fertilizers, even if it is but a quarter of an inch in diameter, is liable to kill any seed or young plant which comes in contact with it, so it is very important if such fertilizers be used that they be thoroughly pulverized and mixed with the soil.

Thorough Preparation Rich soil and liberal manuring will avail little without thorough preparation. The soil must be made friable by thorough and judicious working; if this is well done all that follows will be easy; if it is neglected, only partial success is possible and that at the cost of a great deal of hard work. The garden should be well plowed or dug to a good depth, taking care, if it is a clay soil, that the work is not done when it is too wet. If a handful from the furrow moulds with slight pressure into a ball which cannot be easily crumbled into fine earth again, the soil is too wet and if stirred then will be hard to work all summer. The surface should be made as fine and smooth as possible with the harrow or rake. It is generally desirable to plow the whole garden at once and to do this in time for the earliest crops, but the part which is not planted for some weeks should be kept mellow by frequent cultivation.

Good Seeds There is no more prolific source of dispression of appointment and failure among amateur Properly Planted gardeners than hasty, careless or consists of a minute plant enclosed in a hard and more or less impervious shell with a sufficient amount of food stowed in or around the germ to sustain it until it can expand its leaves, form roots and provide for itself. Moisture, heat and a certain amount of air are necessary to secure germination. The germinating seed first absorbs water and swells. The starchy matters gradually become soluble. The seed-coats are ruptured, the stemlet and bud emerge. The embryo lives for a time on the stored food, but gradually the plantlet secures a foothold in the soil and gathers food for itself. Germination is complete when the plantlet is able to shift for itself.

A dry seed may retain its vitality and remain unchanged for years, but after germination has commenced a check of a day or two in the process may be fatal. There is no time in the life of a plant when it is so susceptible of injury from the over-abundance or want of sufficient heat and moisture as at the period between the commencement of germination and the formation of the first true leaves. It is just then that the gardener should aid in securing favorable conditions. These are:

able conditions. These are:

FIRST—A proper and constant degree of moisture. The soil should always be moist, never wet. To secure this cover the seed as soon as it is planted with well pulverized, freshly prepared earth pressing it firmly over the seed. This firming of the soil is very important as it brings the particles of earth into close contact with seeds and roots, prevents the drying out of the soil and facilitates quick growth. The best results are obtained in small gardens by laying a board on the row and then walking upon the board, or the back of the hoe may be used, but for truck farms and field crops a roller is equally satisfactory.

SECOND—A proper degree of heat, secured by sowing the seed when the temperature of the soil is that most favorable to the germination of the seed of that particular plant. Too high a temperature is often as detrimental as one too low. The proper temperature for each sort may be learned from a careful study of the following pages and the experience of the most successful gardeners in your vicinity.

THIRD—Covering the seed to such a depth that while a uniform degree of heat and moisture is preserved the necessary air can readily reach the germinating seed and the tiny stem push the forming leaves into the light and air. This depth will vary with different seeds and conditions of the soil and can be learned only from practical experience. In general, seeds of the size of the turnip should not be covered with more than half an inch of earth pressed down, while corn may be an inch, beans an inch to two inches and peas one to three inches deep.

FOURTH—Such a condition of soil that the ascending stem can easily penetrate it and the young roots speedily find suitable food. We can usually secure this hy thorough preparation of the ground and taking care never to sow fine seeds when the ground is wet. Occasionally a heavy or long continued rain followed by a bright sun will so bake and crust the surface that it is impossible for the young plant to find its way through it, or a few days of strong wind will so dry the surface that the young plants will be killed. In such cases the only remedy is to plant again.

Judicious Cultivation

Not only should every weed be removed as soon as it appears, but the crust which forms after a rain should be broken up and the ground stirred as soon as it is dry enough to permit it. The more frequently aud deeply the soil is stirred while the plants are young, the better, but as they develop and the roots occupy the ground, cultivation should be shallower until it becomes a mere stirring of the surface. The yield and quality of vegetables have often been decidedly lowered by injudiciously deep and close cultivation after the roots of the plants had fully occupied the ground. A very small garden, well cultivated and cared for, will give larger returns and be in every way more satisfactory than a much larger one poorly prepared and neglected.

HOW TO BUILD AND MANAGE HOTBEDS

For early vegetables, some provision for starting certain plants earlier than can be done in the open air is desirable; for this purpose nothing is better than a good hotbed and its construction is so simple and the expense so slight that every garden should have one. A hotbed proper not only protects the plants from the cold, but supplies bottom heat. By this term the gardener means that the soil is constautly kept several degrees warmer than the air above, that being the coudition, so far as heat is concerned, which is most favorable for rapid and vigorous growth, and gardeners usually secure it by making a compact pile of some fermenting material and covering it with the earth in which the plants are to grow.

The best heating material that is

Heating Material The best heating material that is easily available is fresh horse manure, containing a liberal quantity of straw bedding. Such manure, if thrown into a loose pile, will heat violently and unevenly and will soon become cold. What is wanted in the hot-local track read a readerite but legitar both. To secure this bed is a steady and moderate but lasting heat. To secure this, the manure should be forked over, shaken apart and if dry, watered and allowed to stand a few days and then be forked over again, piled and allowed to heat a second time, the object being to get the whole mass into a uniform degree of fermentation and as soon as this is accomplished it's fit for use.

Sash soon as this is accomplished it's fit for use.

Sash some gardeners use sash made especially for hotheds and glazed with small lights cut from odds and ends and so furuished at very low rates. Such sash can usually be procured in any of our large cities and costs much less than if made to order. For garden use, however, we much prefer a smaller sash that can be easily handled and the use of larger and better glass. We recommend that for home gardens the sash he about two and one-half by four or five feet and that the glass be not less than 10x14, laid with not more than one-quarter inch lap. In giving the order to one unaccustomed to the work, it would be well to state what they are to be used for, and that they need to he made like skylight sash.

This may be made of sound one-inch lumber,

The Frame This may be made of sound one-inch lumber, the hack twelve to fourteen inches high, the front ten to twelve. It should be well fitted to the sash so as to

front ten to twelve. It should be well fitted to the sash so as to be leave as little opening as possible and yet allow the sash to be easily moved up and down, even when the frame is quite wet.

The Soil siderable amount of clay in it is very objectionable. If possible, it should be unfrozen when put into the bed; for this reason it is much hetter to prepare it the fall before and cover the pile with enough coarse manure or straw to keep out the frost.

Making the Bed This requires careful attention as future success depends largely upon the manner in which this work is done. Having cleared away snow and ice, build a rectangular bed oue foot larger each syay than the frame to be used, carefully shaking out and spreading each forkful and repeatedly treading down the manure so as to make the bed as uniform as possible in soild ity, composition and moisture. It is of the utmost importance that this shaking apart and evenly pressing down of the manure should be carefully and thoroughly done; unless it so ne portiou will heat quicker than the other and the soil will settle unevenly, making it impossible to raise good plants.

The proper depth of the bed will vary with the climate, season and the kind of plants to be raised. A shallow bed will quickly give a high temperature which will soon subside; a deeper one, if well made, will heat more modeately, but continue much longer. For general purposes, a bed about two feet deep will be best.

The bed completed, the frame and sash may be put on and fresh manure carefully packed around the outside to the very top (if the weather is at all severe, this outside banking should be replenished as it settles). The bed should he replenished as it settles). The bed should he replenished as it settles). The bed should he rearth should then be allowed to stand with the sash partially open for a day or two to allow the steam and rank heat to pass off. The earth should then be evenly distributed over the surface of the bed and carefully leveled. The earth should not be shoveled or dumped in one or more places in the bed and trially results. Care should be taken that the soil is dry and friable. If wet or frozen soil must be used, it should be placed in small piles untill well dried out before spreading. The ransplanting from a shading to prevent the air coming in contact with the firm provent the air coming in contact with the sing firmly so as to enable the plant to take a secure of the leaves. Where a rank or soft growth and the p

120 degrees, but it soon subsides and when it recedes to 90 degrees the seed may be planted. The importance of using dry soil and allowing the first rank heat to pass off is very great. Every season thousands of hotbeds fail of good results from these causes and seedsmen are blamed for failure resulting from overheat, or wet, soggy soil.

Management of the Bed success are a steady

Management of the Bed The essentials for Management of the Bed The essentials for Management of the Bed Success are a steady uniform degree of heat and moisture; keeping the soil at all times a few degrees warmer than the air and the careful "hardening off" (by exposure to the air and diminishing the supply of water) of the plants before transplanting into the open air. Simple as these may seem to be, there are many difficulties in the way of securing them, prominent among which is overheating the air under a bright sun.

Without experience one would scarcely believe how quickly the temperature inside of a well built hotbed will rise to 90 or 100 degrees upon a still, sunny day, even when the temperature outside is far below freezing, or how quickly the temperature will fall to that outside, if upon a windy, cloudy day the sash is left open ever so little. A rush of cold air driven over the plants is far more injurious than the same temperature when the air is still. Again, in cloudy weather, a bed will go several days without watering, but will dry up in an hour when open on a sunny day.

hour when open on a sunny day.

The details of management, however, must be learned by experience, but may be easily acquired by one who gives the matter careful attention, keeping constantly in mind the essen-

tials given above.

matter careful attention, keeping constantly in mind the essentials given above.

A Cold-Frame is a simple construction of boards for wintering over young plants, Cabbage, Lettuce, Cauliflower, etc., and is also useful to protect and harden off plants from the greenhouse or hotbed before fully exposing them in the open air.

Select a dry, southern exposure, form a frame from four to six feet wide and as long as required. The back should be fourteen to eighteen inches high and the front eight to twelve, with a cross-tie every three feet. The frame may be covered with sash or cloth. Seeds of the vegetables to be wintered, sown in open border early in September, will be ready to plant in cold frames ahout the last of October. The soil should be well prepared and smoothly raked before planting. Admit air freely on pleasant days, but keep close in severe weather.

These frames are particularly useful in the south and may be covered more cheaply with cloth shades than by sash. The shades are made as follows: Make light but strong wooden frames to fit over the hed and of a width to receive some common brand of cotton cloth. The cloth may be unbleached and should be stretched over and securely tacked to the frames. We have found that Plant Bed Cloth, which we have for sale, is superior to any ordinary cloth for this purpose.

Transplanting In transplanting, the main points to be regarded are: care in taking up the plants so as to avoid injury to the roots, setting out as soon as possible to prevent the air coming in contact with the roots, setpossine to prevent the air coming in contact with the roots, setting firmly so as to enable the plant to take a secure hold of the soil and shading to prevent the hot sun from withering and blighting the leaves. Where a rank or soft growth of tops bas heen made in hotbed it is frequently desirable to trim off some of the larger leaves before taking up to transplant so that evaporation later way be retarded.

poration later may be retarded.

In transplanting from a hotbed, harden the plants hy letting them get quite dry a day or two before, but give an abundance of water a few hours before they are taken out. It is most apt to be water a few hours before they are taken out. It is most apt to be successful if done just at evening, or immediately before or during the first part of a rain, about the worst time being just after a rain, when the ground heing wet it is impossible to sufficiently press it about the plant without its baking hard. If water is used at all it should be used freely and the wet surface immediately covered with dry soil.

Watering norming or in the evening. Water may be given to the roots at any time, but should never be sprinkled over the leaves while they are exposed to bright sunshine. If watering a plant has been commenced, continue to surpoly it as it is needed.

a plant has been commenced, continue to supply it as it is needed, or more injury than good will result from what has been given. One copious watering is better than many scanty sprinklings. The ground should always be stirred with a hoe or rake

ILLUSTRATED AND DESCRIPTIVE CATALOGUE

VEGETABLE SEEDS

ARTICHOKE

The seed we offer is that of the true artichoke which is a very popular vegetable in Europe. In it the edible portion is the thickened scales at the base of the flower-heads or buds. The plant is very different from what is known in America as Artichoke or Jerusalem Artichoke, in which the edible portion is the tuber.

In February or March sow and transplant in hotbed so as to give plenty of room until danger of frost is over. Then set in very rich, well drained soil in rows four feet apart and two feet apart in the row. The plants can be raised in seed beds out of doors, but in that case will not be likely to produce heads the first year. Late in the fall cut off the old tops and thoroughly protect the crowns with leaves or straw to prevent severe freezing.

The second year thin the starting shoots to three of the best, which will commence to form heads about July 1st. The plants may also be blanched like cardoons. This is done by cutting back the stems close to the ground in July, the rapidly growing sboots which then start up may be tied and blanched like celery. As artichoke plants do not yield satisfactorily after three or four years, it is best to start a new plantation as often as once in three years. vears.

Green Globe
The plant is of medium height with rather deep green leaves. The buds or flower-heads are green, nearly round or somewhat elongated. The scales are rather narrow and spiny, and are moderately fleshy at the base. Pkt. 5c; Oz. 40c; 2 Oz. 75c; 1/4 Lb. \$1.25; Lb. \$4.00

One of the earliest and most delicious of spring vegetables. We strongly urge all those baving enough available space to put in a bed for their own use, following carefully the cultural directions

Beds are usually formed by setting roots which can be procured of us. If you wish to grow plants from the seed yourself, pour warm water on the seed and allow it to stand until cool; pour it off and repeat two or three times with fresh warm water. Sow in spring in drills about eighteen inches apart and two inches deep in light, rich soil, planting fifteen to twenty seeds to each foot of row. When the plants are well up, thin to about one inch apart and give frequent and thorough cultivation during the summer. If this has been veryell down the right will be fit to get the pourt. has been well done, the plants will be fit to set the next spring.

has been well done, the plants will be fit to set the next spring.

The permanent beds should be prepared by deep plowing or spading and thoroughly enriching the ground with stable manure or other fertilizer; a moist, sandy soil is best. If the subsoil is not naturally loose and friable, it should be made so by thoroughly stirring with a subsoil plow or spade. Set the plants about four inches deep and one to two feet apart in rows four to six feet apart. After the plants are well started, give frequent and thorough cultivation. Early the next spring spade in a heavy dressing of manure and about one quart of salt and double the quantity of fresh wood ashes to each square rod and cultivate well as long as the size of plants will permit, or until they begin to die down. The next season the bed may be cut over two or three times, but if this is done, all the shoots, no matter how small, should be cut. After the final cutting, give a good dressing of manure, ashes and salt. Cultivate frequently until the plants meet in the rows.

In autumn after the tops are fully ripe and yellow, they should be cut and burned. A bed fifteen by fifty feet, requiring about one hundred plants, if well cultivated and manured, should give the following season an abundant supply for an ordinary family and continue productive for eight or ten years.

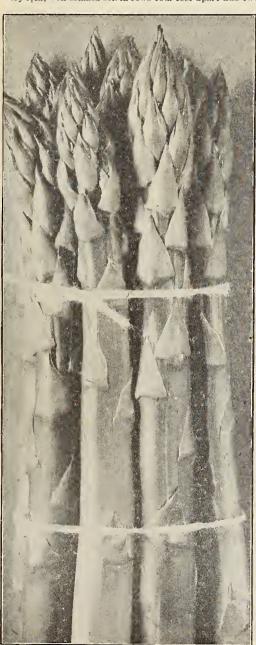

For additional cultural information on Asparagus, as well as other vegetables, see books listed on inside of back cover.

Palmetto A very early maturing and prolific variety, produc-of the best quality. SEED—Pkt. 5c; Oz. 10c; 2 Oz. 15c; ¼ Lb. 20c; Lb. 60c. ROOTS—Postpaid, \$1.35 per 100; by freight or ex-press, not prepaid, 85c. per 100; \$5.50 per 1000

Conover's Colossal This sort is one of the largest and most extensively used green varieties. Shoots bright green, sometimes tinged with purple at the top, very tender and of the best quality. SEED—Pkt. 5c; Oz. 10c; 2Oz. 15c; ½ Lb. 20c; Lb. 60c. ROOTS—Postpaid, \$1.30 per 100; by froight warrange and controlled the controlled to the co by freight or express, not prepaid, 80c. per 100; \$5.50 per 1000

Columbian Mammoth White

Introduced by us in 1893. Furnishes shoots of exceptionally large size and of superior tenderness and flavor. Color clear white until four to six inches above the surface. A large proportion of the seeds will produce white shoots and the green ones can be easily rejected when setting out the permanent bed. SEED—Pkt. 5c; Oz. 10c; 2 Oz. 15c; ¼ Lb. 25c; Lb. 75c. PALMETTO

BEANS

No crop responds more readily than Beans to good soil and cultivation. A light, rich, well drained loam which was manured for the previous crop is the most desirable. If too rank manure is used it is apt to make the plant run too much to vine. Beans are very sensitive to both cold and wet and it is useless to plant them before the ground has become dry and warm. The largest returns will result from planting in drills from two to three feet apart, covering the seed one and one-half to two inches deep and thinning the plants three to six inches apart in the row. If planted in hills, make the hills about two feet apart each way. For succession, plant at intervals of two weeks till midsummer. Up to the time of blossoming they should have frequent shallow cultivation, but any mutilation of the roots by cultivation after the plants come into bloom is likely to cause the blossoms to blast and so cut off the crop. Cultivation should always be very shallow and it is useless to expect a crop from a field so poorly prepared as to need deep stirring after planting. prepared as to need deep stirring after planting.

We give careful attention to selecting and improving the different varieties and keeping them pure and we invite the most critical comparison of our stocks with those of any other grower.

cruical comparison of our stocks with those of any other grower. The varieties we offer have been separated for convenience into five groups: Wax Podded Dwarf or Bush sorts. Green Podded Dwarf or Bush sorts, Dwarf Limas, Pole or Running sorts and Pole Limas. Nearly all of these sorts, except the Limas, are suitable when young for use as snaps. The low growing sorts are called Bunch beans in some sections. In northern latitudes the term "butter beans" is often applied to low growing wax podded sorts. In the south, however, by "butter beans" is usually meant limas.

DWARF OR BUSH WAX PODDED SORTS

Challenge Dwarf Black Wax has satisfied us of the great merit of this variety as the earliest wax podded bean. In all our many comparisons of this bean with other extra early sorts, we have found it the first to give a full picking of pods which were unexcelled by any in quality. Vines erect, compact, bearing the pods well up from the ground. The pods are an attractive medium yellow in color, medium sized, about four and one-fourth inches long, considerably curved, round, very fleshy, crisp, tender and stringless. Seed jet black, longer and more curved than Prolific German Wax. The best extra early wax bean for the home or market garden. Pkt. 10c; Pt. 30c; Qt. 45c; 4 Qts. \$1.50; Bu. \$9.00 Qt. 45c; 4 Qts. \$1.50; Bu. \$9.00

D. M. Ferry & Co's Golden Wax introduced by us in 1876. Extended and careful tests have convinced us that us in 1876. Extended and careful tests have convinced us that none of the so-called improved strains is equal in general excellence to the seed we offer, which has all been carefully selected and grown from the original D. M. Ferry & Co's Golden Wax. Early, very productive. Vines erect, compact, bearing the pods well up from the ground. Pods of medium length, four and one-half to five inches, nearly straight, broad, flat, golden yellow, very fleshy and wax-like; cooking quickly as snaps, shelling well when green, and of the highest quality used in either way. Seed medium sized, oval, white, more or less covered with two shades of purplish red. The amount and shade of color on this and all parti-colored beans will be affected greatly by conditions of soil and ripening. Pkt. 10c; Pt. 30c; Qt. 50c; 4 Qts. \$1.75; Bu. \$10.00

affected greatly by conditions of soil and ripening. Pkt. 10c; Pt. 30c; Qt. 50c; 4 Qts. \$1.75; Bu. \$10.00

Michigan White Wax and may be briefly described as a white seeded D. M. Ferry & Co's Gollen Wax but in several vital features it is distinctly superior to that excellent and exceedingly popular variety. The vine is a little larger, more robust and vigorous; foliage a little heavier. The handsome pods are produced in greater abundance and are very uniform in size and color which is a very attractive light golden yellow; pods four and one-half to five inches long, comparatively broad, meaty and of the same superior quality as our Golden Wax. Seed medium sized, oval, clear white. This last feature alone gives the variety a very decided advantage over all other early wax podded beans in that as snaps they cook without discoloring and thus are more attractive on the table, while as dry beans they are very handsome and quite as useful as any of the staple white beans. We believe canners have never been offered a bean so fully meeting their requirements as to earliness, color and splendid quality. Pkt. 10c; Pt. 30c; Qt. 50c; 4 Qts. \$1.75; Bu. \$10.00

Grenell Rust Proof Wax

Wax. The handsome deep yellow pods are about five inches long, broader and flatter than Golden Wax but slightly inferior in quality. Seed similar to our Golden Wax but slightly inferior in quality. \$1.50; Bu. \$9.00

Keeney's Rustless Golden Wax

Vines a little more upright. Vines trong and vigorous, with

Keeney's Rustless Golden Wax vigorous, with short runners. Pods produced in abundance; about five inches long, stringless, light yellow, wax-like and handsome. Seed similar to a light colored Golden Wax. Pkt. 10c; Pt. 30c; Qt. 45c; 4 Qts. \$1.50; Bu. \$9.00

The stock of our own growing which we sold, being very early. Every plant can be depended upon to produce thick, fleshy, round, stringless wax-like pods of fine quality and of a clear, light yellow color, none of the plants being green podded. Pods four to five inches in length. Seed medium sized, cylindrical, rounded at ends, yellowish drab, heavily splashed with a bluish black. Pkt. 10c; Pt. 30c; Qt. 50c; 4 Qts. \$1.75; Bu. \$10.00 4 Qts. \$1.75; Bu. \$10.00

MICHIGAN WHITE WAX

BEANS-DWARF OR BUSH WAX PODDED SORTS—Continued

D. M. Ferry & Co's Detroit Wax broad and flat, four to four and one-half inches in length, and as nearly rust-the eye. Pkt. 10c; Pt. 30c; Qt. 45c; 4 Qts. \$1.50; Bu. \$9.00

Prolific German Wax, Black Seeded This variety takes the place of the old black wax or butter bean and is wery vigorous, hardy and productive, maturing about midseason. Pods medium length, four and one-fourth to four and one-half inches, borne well up from the ground, curved, cylindrical, fleshy and of a clear, light golden yellow color and remain a long time in condition for use as snaps. Seed small, oblong, jet black. Pkt. 10c; Pt. 30c; Qt. 45c; 4 Qts. \$1.50; Bu. \$9.00

Pencil Pod Wax

This sort is particularly handsome, also medium early, hardy and very prolific. Leaves roughened. Pods are long, five and one-half to six inches, straight, round, fleshy and of a bright yellow color. They are tender, absolutely stringless, of excellent quality and are produced through a long season. One of the best sorts for home use and for near markets. Seed long, round, medium sized; color sold black Pkt. 10c; Pt. 30c; Qt. 50c; 4 Qts. \$1.75; Bu. \$10.00

Currie's Rust Proof Wax is absolutely rust proof and we have found it, like the Detroit Wax, as nearly rust proof as any good wax podded bean can be. Vine very vigorous, lardy and productive. Pods light yellow, similar in shape to Golden Wax, but are five and one-half to six inches long. Seed long, oval, rounded at ends, medium sized, purplish black. This is a standard market gardening sort. Pkt. 10c; Pt. 30c; Qt. 45c;

4 Qts. \$1.50; Bu. \$9.00

Dwarf Unrivaled Wax

The pods of this dwarf variety are longer than those of Golden Wax and a little lighter in color, are rather narrow and somewhat flattened but fleshy, and when in proper condition for use are very attractive on the market. Dwarf Unrivaled Wax usually matures soon after our Golden Wax and is sometimes as early as that variety. The vines are large and vigorous with leaves similar to Golden Wax in color and shape but are a little larger. The pods when well grown are borne in abundance well up from the ground. Seed small, flat, slightly kidney shaped; color ochre-brown. A valuable sort for market gardeners' use. Pkt. 10c; Pt. 30c; Qt. 50c; 4 Qts. \$1.75; Bu. \$10.00

Wardwell's Kidney Wax This variety maturing a little later than long, nearly straight, broad, light golden yellow, handsome pools. These are of large size, about six inches long, and are of good quality. They always command a ready sale, making the variety one of the most profitable for the market gardener. Suitable also for snaps for the home garden use. The leaves are large and slightly roughened. Seed large, flattened, kidney shaped, white with dark markings about the eye. Pkt. 10c; Pt. 30c; Qt. 50c; 4 Qts. \$1.75; Bu. \$10.00 4 Qts. \$1.75; Bu. \$10.00

Round Pod Kidney Wax handsome and very desirable, especially for snaps for the home garden. The vines are dwarf, spreading and very productive. The leaves are roughened. The podsare long and round, five and one-half to six inches, slightly curved, light yellow, wax-like, stringless and of the best quality. They are uniformly perfect, an ill shaped one being rarely seen. Seed long, cylindrical, medium sized, nearly white with a little dark marking about the eye. (Crop failed)

Davis Wax podded, white seeded midseason sort is wanted. Vines very vigorous. Pods invariably long, six and one-half to seven inches, light yellow, straight, handsome and when young are crispand tender. Seed medium large, kidney shaped, clear white; excellent for baking Pkt. 10c; Pt. 30c; Qt. 45c; 4 Qts. \$1.50;

Bu. \$9.00

This variety seems to do Scarlet Flageolet Wax cariet Flageolet Wax seems to do especially well in the south and is a favorite with many truck farmers. The vines are large, strong growing, erect and produce very long, flat, rather coarse, deep yellow wax-like pods seven to eight inches in length, which, though sometimes curved and twisted, are always handsome. Seed very large, flat, red. Pkt. 10c; Pt. 30c; Qt. 50c; 4 Qts. \$1.75; Bu. \$10.00

Violet Flageolet Wax also as Perfection Wax. The pods are very large, similar to the Scarlet Flageolet Wax, but sometimes a little longer. When well grown this sort is one of the most showy of the wax beans. The seed is very large, flat, dark violet. Pkt. 10c; Pt. 30c; Qt. 50c; 4 Qts. \$1.75; Bu. \$10.00

Hodson Wax The vines of this variety are exceedingly vigorous, hardy and productive. The pods are handsome, clear creamy white, very long, six to seven inches, straight or slightly curved, flat but fleshy and of good quality, stringless if picked when quite young; matures its crop late. Seed long, cylindrical, uniform in shape; color dull purplish red splashed with pale buff. Pkt. 10c; Pt. 30c; Qt. 45c; 4 Qts. \$1.50; Bu. \$8.50

Crystal White Wax
Vines large, spreading, very productive. Leaves small. Pods greenish white with silvery shade, short, about three and one-half inches in length, curved, round or thicker than wide, with crease in the back; very fleshy and brittle This variety is late maturing and very desirable for pickles. Seed very small, oval, white Pkt. 10c; Pt. 30c; Qt. 50c; 44 Qts. \$1.75; Bu. \$10.00

BEANS—DWARF OR BUSH GREEN PODDED SORTS

The green podded dwarf sorts are perhaps the most important class of garden beans and are probably more extensively used as snaps than the wax podded varieties, although the latter are considered by many as the more attractive in appearance. The green podded sorts are as a rule the more productive, being less sensitive to unfavorable conditions of soil and climate and of late years have been less susceptible to bean diseases.

Extra Early Refugee An extremely early, green podded sort furnishing round, fleshy, light green pods slightly curved, and leaves a little larger than those of the late Refngee; seed much the same in shape and color. Our stock is uniform, the vines ripening pods well together and long before those of the Refugee or Thousand to One. An excellent snap bean for early markets and stands shipment well Seed long, cylindrical, rounded at ends, drab, nearly covered with dark purple blotches. Pkt. 10c; Pt. 25c; Qt. 35c; 4 Qts. \$1.25; Bu. \$6.50

Round Yellow Six Weeks, not differ from Improved Round Pod Early Yellow Kidney general appearance of vine, the rather light green pods are shorter, about four and one-half inches, much thicker, fleshier and mature earlier. Seed medium sized, round, light yellow with slightly darker marking about the eye.

4 Qts. \$1.25; Bu. \$6.50

Early Yellow Kidney
Six Weeks Long Yellow Six Weeks, are large, vigorous, erect and very productive.
The leaves are large. The pods are long, about six inches, straight, flat, handsome, rather light greeu and when young are of good quality for snaps. This sort is early maturing and a fine shipper. Seed medium sized, long, kidney shaped, light yellow with small brownish circle about the eye. Pkt. 10c; Pt. 20c; Ot. 30c; 4 Ots. \$1.00; Bu. \$6.00 Qt. 30c; 4 Qts. \$1.00; Bu. \$6.00

Early Mohawk This sort is so much hardier than the others that it can be planted earlier and often will furnish beans fit for use before any other kiud. The vines are large and stout, with large coarse, dark green leaves. The pods are medium dark green, long, six to six and one-half inches, straight, coarse, flat, with long tapering points. Seed long, large, kidney shaped, variegated, drab, purple and brown. Pkt. 10c; Pt. 20c; Qt. 30c; 4 Ots. \$1.00: Bu. \$6.00 4 Qts. \$1.00; Bu. \$6.00

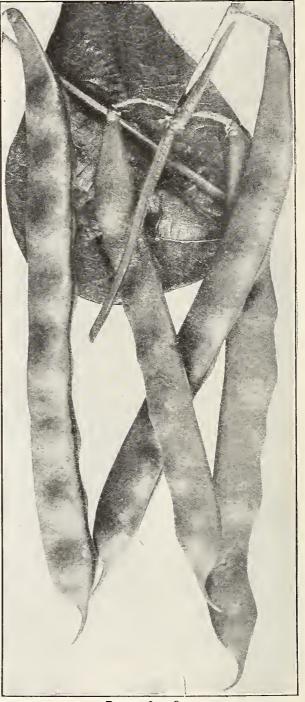

Extra Early Round Pod Red Valentine For snaps there is nothing superior to this variety among the dwarf green podded sorts both for the

home and market garden and many prefer it to the wax varieties. Vines me lium to large, erect, with dark green leaves. Pods medium length, about four and one-half inches, of medium green color, curved, cylindrical, with crease in back, very fleshy, crisp and tender. Seed long, of medium size and unsymmetrical fields. tender. Seed long, of medium size and unsymmetrical in shape, purplish pink splashed with pale buff. Lack of symmetry in the seed of this variety is an indication of superior fleshiness and good quality in the pods. We know of no stock of Red Valentine which can be compared with that we offer in uniformly high quality of pod. Onr strain combines in high degree all the good qualities of the sort. Pkt. 10c; Pt. 25c; Qt. 35c; 4 Qts. \$1.25; Bu. \$6.50

Black Valentine

A very hardy and productive green podded sort with strong, vigorous vines. The pods are nearly round or slightly flattened but very handsome, are much longer, straighter and less fleshy than the Red Valentine, the plant a little more spreading, and in season a little later. A large crop can be depended on and the product is very attractive on the market. The pods are of medium dark green color and about six inches long. Seed small to medium sized, black, oblong, slightly flattened. Fkt. 10c; Pt. 25c; Qt. 40c; 4 Qts. \$1.50; Bu. \$7.50

Tennessee Green Pod This dwarf, early intervery popular in some sections of the south and wherever known in other parts of the country is spoken of in terms of highest praise. The vines are large, somewhat spreading and prolific. The foliage is dark green, with leaves large and crumpled. The pods are very long, often six to seven inches, flat, irregular in shape, bright but rather dark green and of excellent quality. Seed of medium size, oval, flat, yellowish brown in color. After careful selection we have developed a uniformly true stock of the variety which is giving splendid satisfaction. Pkt. 10c; Pt. 25c; Qt. 40c; 4 Qts. \$1.50; Bu. \$7.50

TENNESSEE GREEN POD

BEANS-DWARF OR BUSH GREEN PODDED SORTS—Continued

Stringless Green Pod A very desirable green podded snap sort for the home garden and largely grown for the market. In the vines are vigorous, spreading and productive. The pods are medium green, five to six inches long, cylindrical, larger than those of the Red Valentine hut are quite as fleshy, of equally high quality and remain crisp and tender longer. They mature a little later. Seed of medium size and length, yellowish brown. Pkt. 10c; Pt. 25c; Qt. 40c; 4 Qts. \$1.50; Bu. \$8.00

Giant Stringless Green Pod An exceedingly productive and very handsome sort. The vines are vigorous and spreading. The pods are large and round, wedium green, mature a few days later than those of Stringless Green Pod, average about one-fourth inch longer and more nearly straight. The quality is very good for snaps for home use; suitable also for the market. The seed is long, slender, yellow. Pkt. 10c; Pt. 25c; Qt. 40c; 4 Qts. \$1.50; Bu. \$7.50

Dwarf Horticultural leaves. The mature pods are about five to five and one-half inches in length, broad and thick, curved, with splashes of bright red on a yellowish ground. They hecome fit for use as green shelled beans early and in this condition the heans are very large, easily shelled and are about equal to the Lima in quality. This is one of the hest sorts for green shell beans for home and market. Seed large, oval, plump, pale buff splashed with deep red. Pkt. 10c; Pt. 25c;

Refugee or Thousand to One
with many small, smooth light green leaves. The poles are about five and one-fourth inches long, cylindrical, slightly curved, medium green when in condition for use as snaps but as they mature becoming light yellow, sometimes splashed with purple. They are of good quality as snaps. Seed long, cylindrical, light drab, thickly dotted and splashed with purple. Pkt. 10c;
Pt. 25c; Qt. 40c; 4 Qts. \$1.50; Bu. \$7.50

The following four Dwarf or Bush sorts are also extensively planted as field beans.

Early Marrow Pea or Dwarf White Navy spreading, with small, thin leaves and occasional runners, ripening their crop early and all at once. Pods light greeu, straight, short, about three and three-fourths inches, hut usually containing six beans. The beans are small, oval, white, handsome and of superior quality. Pkt. 10c; Pt. 15c; Qt. 25c; 4 Qts. 75c; Bu. \$4.00

Vineless Marrow
A very prolific and valuable sort for field culture. Plant large, strong and vigorous, but compact and without runners, bearing its crop in the center and well up from the ground. Pods light green, about five and three-eighths inches long. The dry beans are medium large, ovoid, very white, cook quickly and are of exceptionally good quality. Pkt. 10c; Pt. 15c; Qt. 25c; 4 Qts. 75c; Bu. \$4.50

Large White Marrow or Mountain The vines of this very prolific sort are large, slender, spreading, with short runners and small leaves. The pods are broad, about five and one-half inches long, medium green, changing to yellow. Seed large, ovoid, clear white, cooking very dry and mealy. Pkt. 10c; Pt. 15c; Qt. 25c; 4 Qts. 75c; Bu. \$4.50

Royal Dwarf Kidney Plant upright, very large, branching, with large, broad leaves. Pods rather late in maturing, about six inches long, dark green, coarse. Seed large, white, kidney shaped, slightly flattened and of excellent quality, green or dry. Also called White Kidney. Pkt. 10c; Pt. 15c; Qt. 25c; 4 Qts. 75c; Bu. \$4.50

DWARF LIMAS

This class of limas cannot be recommended too highly. The beans can be grown and gathered much more easily than the pole limas as the vines require no support. They can also be grown closer together than those of any pole variety. Dwarf limas are fully equal in quality to pole limas and as a rule are earlier maturing.

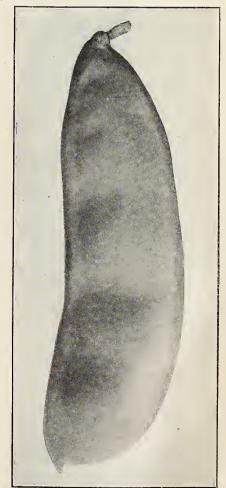

Do not plaut till the ground is dry, weather warm and danger of frost is over. If possible select rich, light soil. Plant in drills two to three feet apart, dropping the heans three to four inches apart and covering one and one-half to two inches deep. If planted in hills, make the hills two to three feet apart one way and two to two and one-half feet the other and plant four to six beans in a hill. Hoe often but only when the leaves are dry.

Bush Lima or Dwarf Sieva (HENDERSON'S) A dwarf form of the small White Lima, valuable on that account, and hecause of its extreme earliness and productiveness. Vines are without runners but continue to grow and set pods until stopped by frost. Leaves small and very dark green; flowers small, yellowish-white, horne in clusters and often above the foliage. Pods medium dark green, short, about two and three-fourths inches, flat and containing two to four beans which are of excellent quality either green shelled or dry. Seed small, flat and white with slight tinge of yellow. Pkt. 10c; Pt. 25c; Qt. 40c; Pt. 25c; Qt. 40c;

Burpee's Improved Bush Lima This is a little the earliest maturing of the large seeded limas. Vines vigorous, productive. Pods medium green, very large, ahout five inches long, thick and containing usually four beans, which are unusually thick, of largest size and of excellent quality. Seed very large thick and usually shows a greenish white tinge which is generally considered an indication of superior quality. One of the best lima heans yet introduced. Pkt. 10c; Pt. 40c; Qt. 70c; 4 Qts. \$2.50; Bu. \$14.00

Dwarf Large White Lima A bush form of the true Large White Plants uniformly dwarf, but very productive. The medium green pods are as broad and very nearly as long as those of the pole variety of Large White Lima and are a little more curved. They contain from three to five very large, flat beans of the best quality. Seed very large, flat, white with slight greenish tinge. Pkt. 10c; Pt. 30c; Qt. 45c; 4 Qts. \$1.50; Bu. \$9.00

Fordhook Bush Lima
An improved dwarf lima of the Kumerle type. The plant is vigorous and erect growing, hearing well above the ground. The pods, which are produced in large clusters, are medium green, about four and three-fourths inches long and each contains three to five large beans of exceptionally fine quality. It is much more productive than Kumerle and matures earlier. Seed large, irregularly oval in shape, very thick, white with greenish tinge. We consider this a decided acquisition to the dwarf limas, possibly the best of the class. Pkt. 10c; Pt. 40c; Qt. 70c; 4 Qts. \$2.50; Bu. \$14.00

FORDHOOK BUSH LIMA

BEANS-POLE OR RUNNING

Although pole beans require considerable care and labor, they are when properly grown usually of longer bearing period than the dwarf sorts and are generally more productive.

Pole beans are even more sensitive to cold and wet, as well as to drought and hot winds, than the dwarf varieties, but are of superior quality and productiveness. After settled warm weather, set poles four to eight feet long in rows four feet apart and extending north and south, the poles being three feet apart in the row. Let the poles slant slightly toward the north. Set in this way the vines climb better, and the pods are straighter and more easily seen. Around each stake plant five to eight beans one and one-half to two inches deep. When well started thin to four plants, and see that they all climb around the pole in the same way, for they will not grow if tied up in the opposite direction.

Another plan is to plant in rows thickly enough so that there will be one plant to eight or ten inches. Set posts five feet high firmly at each end of the rows and drive stakes made of 2x2 lumber at intervals of about sixteen feet along the rows. Stretch a wire, size number 10 or 12, between the posts along each row, and fasten it to the tops of the stakes with wire staples. Run a lighter wire or twine along the bottom about six inches from the ground and fasten to the posts and stakes with wire

from the ground and fasten to the posts and stakes with wire staples. Between these two stretch a wire or twine wherever there is a plant. The vines will run up these until they reach the top wire, when they will care for themselves. Another way is to omit the bottom wire and stick small stakes two to six inches in the soil and fasten to top wire.

White Crease Back Especially valuable for its experfecting all of its pods within a short time. Vines medium sized, vigorous and in good soil wonderfully productive, bearing round, fleshy pods in clusters of from four to twelve. bearing round, nesny pods in clusters of rom four to twerve.

Pods of medium length, usually about five inches, comparatively straight, attractive light green, of the best quality as snaps and stand shipping better than most sorts.

The beans are too small to be of much value when shelled green, but are of very superior quality baked. Seed small, oval, white. Our stocks are much more even than many on the parket. Blt. 10a, 125, 25c, 01, 40a, 40c, \$1.50, By, \$7.50.

oval, white. Our stocks are much more even than many on the market. Pkt. 10c; Pt. 25c; Qt. 40c; 4 Qts. \$1.50; Bu. \$7.50 Also known as Old Homestead. We believe this variety is the most practically useful of the green podded pole beans suitable for use as snaps. It is an early, very prollific sort, with showy pods which are of most excellent quality. The vines are vigorous, climbing well and very productive, bearing pods in large clusters. The pods are medium light green, very long, often reaching nine or ten inches, curved and twisted, nearly round and very crisp when young, becoming very irregular and spongy as the beans ripen. Seed long, oval, slightly flattened, dun colored. The quality of our stock is unsurpassed. Pkt. 10c; Pt. 25c; Qt. 40c; our stock is unsurpassed. Pkt. 10c; Pt. 25c; Qt. 40c; 4 Qts. \$1.50; Bu. \$8.00

St. Louis Perfection White An early maturing, white seeded St. Louis Perfection White ing, white seeded pole bean, very desirable for snaps and certainly unsurpassed green shelled. The vines are vigorous and very productive. Pods medium green, round, very long, often reaching eight to nine inches, irregular in shape and quite stringless. The beans when shelled green are large, very tender and white, a very desirable feature when comparison is made with the colored beans of other varieties of this class. Seed medium long, oval or well rounded, solid white. Many gardeners consider this bean by far the most desirable pole sort. Pkt. 10c; Pt. 30c; Qt. 45c; 4 Qts. \$1.50; Bu. \$9.00 Red Speckled Cut Short or Corn Hill variety, very popular in the central and southern states for planting

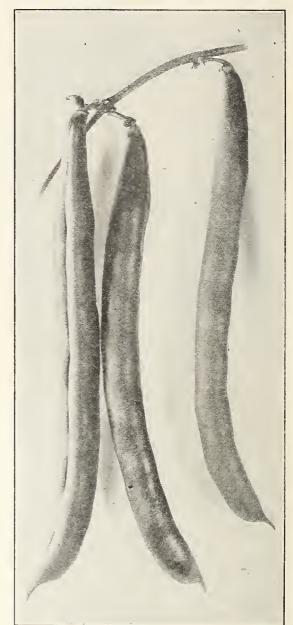

Red Speckled Cut Short or Corn Hill variety, very popular in the central and southern states for planting among corn. It will give a good crop without the use of poles. Vines medium sized, but vigorous, twining loosely with dark colored leaves. Snap pods medium green, short, three to three and one half inches in length, straight, flat to oval, fleshy and of good quality. The pods as they mature become light yellow tinged with red, the beans showing distinctly through the pod. Seed nearly oblong, cut off diagonally at the ends, light gravish white, covered about the eye and at one end with reddish or purplish brown, and irregularly dusted over most of the surface. Pkt. 10c; Pt. 25c; Qt. 35c; 4 Qts. \$1.25; Bu. \$7.00

Dutch Case Knife ing well, but twining more loosely than some and so may be used for a corn hill bean of medium season. Leaves large, crumpled; pods very long, seven to eight inches, flat, irregular, medium green, becoming lighter as they mature. Seed broad, kidney shaped, flat, clear white and of excellent quality whether used green or dry. Pkt. 10c; Pt. 25c; Qt. 40c; 4 Qts. \$1.50; Bu. \$7.50

Kentucky Wonder Way

Kentucky Wonder Wax

This remarkably vigyorded pole bean is very similar to the green podded Kentucky Wonder but the very long pods are a little broader,
very fleshy and quite stringless as snaps. The pods are
attractive light yellow and when mature are often eight
to nine inches in length. Seed medium sized, oval, flattened,
very irregular, dark brown. The seed even from the most
matured crops is usually somewhat shriveled in appearance.
Its earliness and hardiness commend it as a pole bean well
adequated even for porthern latitudes. Its very large pods matured crops is usually somewhat shrivered in appearance. Its earliness and hardiness commend it as a pole bean well adapted even for northern latitudes. Its very large pods are certainly handsome in appearance and are unexcelled in quality by any wax podded bean of its class. Pkt. 10c; Pt. 30c; Qt. 50c; 4 Qts. \$1.75; Bu. \$10.00

WHITE CREASE BACK

Early Golden Cluster Wax

A well known early and very beautiful sort. One of the best wax-podded snap pole beans. The vines are large, strong growing, vigorous and hardy, with large, light green, crimped leaves. The pods are six to eight inches long, borne in abundant clusters, each containing from three to six pods varying in color from golden yellow to creamy white. The pods are very broad, thick and fleshy, and are deeply creased along the edge to which the beans are attached. They are of the very best quality and stay in condition for use a long time. Seed medium sized, flattened, oval, dull white. Pkt. 10c; Pt. 30c; Qt. 50c; 4 Qts. \$1.75; Bu. \$10.00

BEANS-POLE OR RUNNING-Continued

Harlequin Earlier, more productive, and with much longer and larlequin and with much longer and more attractive pods than the well known London Horticultural or Speckled Cranberry, also hardier and a more reliable cropper. The large ovate beans are of the highest quality either green shelled or dry. Vines vigorous with large light colored leaves. Pods very long, six to seven inches, striped or splashed a deeper and more brilliant red than London Horticultural; dry beans a trifle longer. We consider this the most attractive and the finest bean of the Horticultural class. (See cut, page 4.) Pkt. 10c; Pt. 35c; Qt. 60c; 4 Qts. \$2.00; Bu. \$12.00 Bu. \$12.00

London Horticultural or Speckled Cranberry erately vig-orous with large, light colored leaves. Pods medium length, four and one-half to five and onelength, four and one half to five and one-half inches, broad, pale green when young, becoming as they mature vellowish green striped or splashed with red. Beans large, ovate, flesh colored, splashed and spotted with wine-red and of the highest quality, either green or dry. One of the best of the Horticultural varieties as a general pur-pose late green shell bean for home or market. Many like this sort better than limas. Known also as Wren's Egg. Pkt. 10c; Pt. 25c; Qt. 35c; 4 Qts. \$1.25; Ru. \$7.00 Bu. \$7.00

Bu. \$7.00

Lazy Wife green podded pole beans for snaps or green shell use. The medium green pods, borne in large clusters, are five and one half to six and one half inches long, broad, thick, fleshy and entirely stringless. When young they have a rich, buttery flavor which is retained until they are nearly ripe. Dry beans excellent for winter use. Seed white, medium size, slightly oval or nearly round. Pkt 10c; Pt. 30c; Qt. 50c; 4 Qts. \$1.75; Bu. \$10.00

POLE LIMAS

The culture is the same as for other pole beans except that being more tender, the seed is usually planted one to two weeks later. In some classes of soil it will be found of advantage to place the beans on edge with the eye down as when planted in this manner they germinate and come up more readily.

Seibert's Early Lima ease of shelling, size, beauty and quality of the green beans, this variety leads all other early limas for either the garden or market. Vine vigorous, very productive and continues so from the very first to the last of the season Pods medium green large flat. the season. Pods medium green, large, flat, about five inches long, moderately curved.

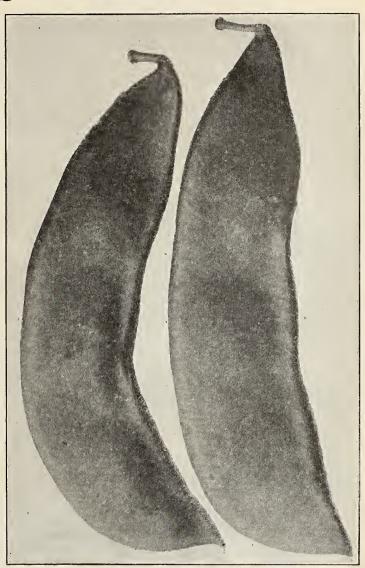

the season. Pods medium green, large, flat, about five inches long, moderately curved. Green shelled beans very large, very tender and of finest quality. Introduced by us in 1895. Seed ovoid, flat with slight greenish tinge. The beans shrink in drying so that the seed is about the size of the Large White Lima. Pkt. 10c; Pt. 25c; Qt. 40c; 4 Qts. \$1.50; Bu. \$8.00

Small White Lima, branches, and sometimes grown Carolina or Sieva without poles; very early, productive, with small, smooth, dark green leaves. Pods dark green, short, about three inches, curved, flat. Seed small, flat, white with slight tinge of yellow. Pkt. 10c; Pt. 25c; Qt. 40c; 4 Qts. \$1.50; Bu. \$7.50

Ideal Pole Lima Ima beans yet introduced. Vines unusually vigorous, very productive, bearing large clusters of broad medium green pods each six to seven inches long, and containing four to six large beans of most excellent quality. This variety matures a little later than Seibert's Early Lima but the pods are much larger. Seed large, ovoid, flat, white with slight greenish tinge. Splendid for market gardeners. Pkt. 10c; Pt. 25c; Qt. 40c; 4 Qts. \$1.50; Bu. \$8.00

King of the Garden Lima productive. Pods medium dark green, very large, five to six inches long, broad, flat, filled with four or five immense white beans of finest quality. On account of its large pods it is a favorite with market gardeners. It will come into bearing earlier and make larger pods if not more than two vines are left to grow on a pole. Seed very large, ovoid, flat, white, with slight greenish tinge. Pkt. 10c; Pt. 25c; Qt. 40c; 4 Qts. \$1.50; Bu. \$8.00

If beans are ordered by mail or express prepaid and the same ordered by mail or express prepaid and the same ordered by mail or express prepaid and the same ordered by mail or express prepaid and the same ordered by mail or express prepaid and the same ordered by mail or express prepaid and the same ordered by mail or express prepaid and the same ordered by mail or express prepaid and the same ordered by mail or express prepaid and

CARPINTERIA POLE LIMA

Carpinteria Pole Lima
Vines strong, vigorous, producing an abundance of fine, large, medium green pods, five to six inches long, usually closely filled with four beans of largest size, much thicker than the average pole lima. Color distinctive in having a decided greenish tint, an indication of very finest quality. When cooked the beans are very thin skinned, extremely tender and of finest flavor. Seed very large, exceptionally thick, retaining the distinctly green tinge. Splendid for the home and market garden. Pkt. 10c; Pt. 30c; Qt. 45c; 4 Qts. \$1.50; Bu. \$9.00

Large White I:

Large White Lima

Too late for the extreme north and is being supplanted by Seibert's Early Lima. Vines tall, vigorous, but slender; leaves medium sized, smooth, medium green. Pods borne in clusters, five to five and one-half inches long, broad, very thin, medium green. Seed very large, ovoid, flat, white with slight tinge of green. Pkt. 10c; Pt. 25c; Qt. 40c; 4 Qts. \$1.50; Bu. \$7.50

Challenger Lima Pods medium green about four inches long, shorter and comparatively thicker than those of the other pole limas and contain four to five beans which are large, thick, white and of the best quality. One of the most desirable of the later varieties. It is similar to, but better than Dreer's Improved Lima. Seed smaller and thicker than the other pole limas, ovoid, white with slight greenish tinge. Pkt. 10c; Pt. 25c; Qt. 40c; 4 Qts. \$1.50; Bu. \$8.00

dd 10 cents per pint, 15 cents per quart for charges.

BEET

The hest results are obtained on a deep, rich, sandy loam. If wanted very early, sow such sorts as Crosby's Egyptian and Detroit Dark Red in hotheds and transplant, cutting off the outer leaves. For general crop sow in freshly prepared soil as soon as the ground will permit, in rows eighteen inches apart covering about an inch deep and pressing the soil firmly over the seed. When the plants are well established thin out to six inches apart in the row. For winter use the turnip varieties may be sown in June so as to mature late in the season. The roots are stored in a cellar and covered with sand or sandy soil to prevent wilting, or they may he kept outdoors in pits such as are used for apples and potatoes.

The hest variety for forcing Extra Early Egyptian Blood Turnip

crop outdoors, heing very early, with small tops. Leaves dark green, shaded and veined with dark red. Root very dark red, moderately thick, a little rounded on top, distinctly flat on the hottom, and about two inches in diameter when mature. Flesh dark purplish red, zoned lighter shade; firm, crisp and tender. Pkt. 5c; Oz. 10c; 2 Oz. 15c; 1/4 Lb. 25c; Lb. 80c.

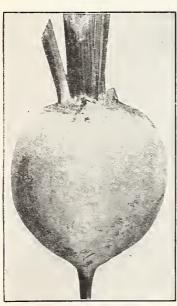

Pkt. 5c; Oz. 10c; 2 Oz. 15c; ¼ Lb. 25c; Lb. 80c.

Crosby's Egyptian

The name of this variety is misleading, as it resembles the Egyptian only in its extreme earliness. Tops small. The roots are flattened globe shaped and very smooth. Exterior color of root bright red. The flesh of our strain is bright vermilion-red, zoned with a lighter shade, very sweet, tender and of excellent quality. One of the best for early planting outdoors. Much used for bunching. It becomes fit for use earlier than any other variety hut it is not as well suited as the Egyptian for forcing in hotbeds or for transplanting. Our stock is exceptionally uniform in shape and color, and is earlier than the older strains which are similar in shape but show the purplish red color. Pkt. 5c; Oz. 10c; 2 Oz. 20c; ¼ Lb. 30c; Lb. \$1.00

Detroit Dark Red We believe this is the hest heet for the market and home garden, and on account of its uniformly shaded with red. Root medium sized, glohular or nearly round, very smooth and of dark hlood red color. Flesh is deep vermilion-red, zoned with a lighter shade of the same color. Very desirable for hunching. Careful comparisons with all the prominent varieties on the market in this country and in Europe prove that Detroit Dark Red is the most uniform beet in shape and size and the most attractive in color. It is unsurpassed in quality. Pkt. 5c; Oz. 10c; 2 Oz. 20c; ½ Lb. 30c; Lb. \$1.00

Early Eclipse An early heet especially desirable for the home garden and used for bunching. Tops small. Root hright deep red, smooth, round or slightly top shaped, with a small tap and small collar. Flesh bright red, zoned with pinkish white, very sweet, crisp and tender, especially when young. Pkt. 5c; Oz. 10c; 2 Oz. 15c; ¼ Lb. 25c; Lb. 80c.

Edmand's Early Tops short and rather spreading; rihs and leaf stalks dark red; hlade of leaf hright green, often with wavy edge. Root nearly round or slightly flattened; exterior color dark red, interior color purplish red with little zoning; crisp. tender, sweet and an excellent keeper. Pkt. 5c; Oz. 10c; 2 Oz. 15c; 1/4 Lb. 25c; Lb. 80c.

Early Blood Turnip (Improved) An extra selected stock of Blood Turnip, having larger, coarser tops and root than Detroit Dark Red and requiring a considerably longer time to mature. Root nearly round or slightly flattened. Flesh deep red, zoned with lighter shade, sweet, crisp and tender. Excellent for summer and autumu use. Pkt. 5c; Oz. 10c; 2 Oz. 15c; ½ Lb. 25c; Lb. 80c.

Bastian's Early An early, hright red, turnip shaped beet of very Blood Turnip good quality. Tops medium sized: leaves bright green.
Root thick, slightly top shaped, medium sized tap. Flesh light purplish red, zoned almost white: crisp and tender. Pkt. 5c; Oz. 10c; 2 Oz. 15c; ½ Lb. 25c; Lb. 75c.

Dewing's Blood Turnip sized; leaf stem and veins dark red; leaf green. Root dark purplish-red, turnip shaped with medium sized tap. Flesh carmine with purple tinge, zoned with 2 Oz. 15c; ¼ Lb. 25c; Lb. 75c.

Appeals with the control of the contro

Early Turnip Bassano

An early, quick growing variety, excellent for the table, and especially adapted for use as greens. Tops large. Root large, white; very sweet and tender when young. Pkt. 5c; Oz. 10c; 2 Oz. 15c; ¼ Lb. 25c; Lb. 75c.

D. M. Ferry & Co's Half Long Blood A half long, deep red heet, hy far the use. Tops very upright with exceptionally smooth leaves. Root deep red. half long, very smooth and uniform in shape. Flesh very deep, rich red, sweet and tender. Excellent to slice for pickles. It retains its good quality longer than other sorts. Pkt. 5c; Oz. 10c; 2 Oz. 20c; 4 Lb. 30c; Lb. \$1.00

Long Dark Blood A standard late variety of very good quality which keeps well through the winter. Root smooth, rather slender, growing largely underground, with few or no side roots and when mature ahout eight or ten inches in length, sometimes longer when grown in deep, well-dug and well-manured soil. Exterior color very dark purple, almost hlack; flesh dark red, tender and sweet. An excellent sort for pickles. Pkt. 5c; Oz. 10c; 2 Oz. 15c; 1/4 Lb. 25c; Lb. 75c.

Swiss Chard or Sea Kale Beet A variety of beet grown exclusively for its leaf stalks, which are much superior to those of other heets for use as greens. Later in the season the hroad, flat, wax-like leaf stems are cooked or pickled. This variety is worthy of a place in every garden. Known also as Silver or Spinach Beet. Pkt. 5c; Oz. 10c; 2 Oz. 15c; ¼ Lb. 25c; Lb. 75c.

D. M. FERRY & CO'S HALF LONG BLOOD

SUGAR BEET

Desirable not only for the manufacture of sugar, but are invaluable for stock feeding and when small may be used for the table. The best soil is a rich, friable sandy, or clayey loam. Rich, mucky soils will often give an immense yield of roots which, though excellent for feed, are of little value for sugar making. Plant in drills two to two and one-half feet apart, twelve to twenty seeds to the foot. The seed should be well covered with about one to one and one-balf inches of soil pressed firmly over it. Cultivate frequently. When about three inches high thin to about ten inches apart.

FOR SUGAR MAKING

Jaensch's Victrix
Unquestionably the most highly developed strain of beet for sugar making. Roots of medium size, white with tinge of gray, half long, and very uniform in type. Flesh white, exceptionally rich in sugar content. Per Lb. 40c, postpaid. Lots of 5 Lbs. to 25 Lbs. by express, at purchaser's expense, 30c per Lb.

Vilmorin's Improved richest in sugar content of the sorts in cultivation. It will do better on new lands than any other, suffers less from an excess of nitrogen and will keep the best. The tops are of medium size, with smooth, bright green leaves. The roots are of medium size, similar in appearance to Jaensch's Victrix; flesh white, often yielding from ten to sixteen tons per acre. Pkt. 5c; Oz. 10c; ¼ Lb. 15c; Lb. 40c.

Klein Wanzleben Roots a little than Vilmorin's Improved and a little hardler and easier grown. The tops are rather large and the leaves slightly waved. Yields from twelve to eighteen tons per acre. Probably the best sort for the experimenter to use. Pkt. 5c; Oz.10c; ¼ Lb. 15c;

Giant Feeding Sugar Beet strain or Half Sugar Mangel of beets is able for stock feeding, affording not only a very large crop much easier to harvest than other sorts but also having higher nutritive value, being especially rich in sugar. Roots light bronze green above ground, grayish white below, with white flesh. On account of growing partly out of the ground and the long ovoid shape the crop can be harvested and stored easily and at less expense than any other root crop. Pkt. 5c; Oz. 10c; 1/4 Lb. 15c; Lb. 35c.

GIANT FEEDING SUGAR BEET OR HALF SUGAR MANGEL

MANGEL WURZEI

Long Red A large, long variety grown for stock feeding. The roots are light red, grow well out of the ground and are easily harvested. The flesh is white, tinged with rose. Pkt. 5c; Oz. 10c; 1/4 Lb. 15c; Lb. 35c.

Mammoth Long Red thicker than the common sort. Flesh white tinged with rose. Under careful culture enormously productive.

Our stock will produce the largest and finest roots which can be grown for feeding stock and is vastly superior to many strains offered under other names, such as Norbitan Giant, Colossal, Monarch, etc. Pkt. 5c; Oz. 10c; ¼Lb. 15c; Lb. 35c.

Yellow Leviathan

The roots of this exceedingly productive sort grow about one-half out of the ground and very easily harvested. In shape they are long fusiform, or spindle shaped tapering from the middle to each end. Color light gray tinged with brown above ground, yellow below. Flesh white, sometimes slightly tinged with yellow. Tops green, comparatively small; collar small. The roots have less tendency to become woody than most sorts. Pkt. 5c; Oz. 10c; ¼ Lb. 15c; Lb. 35c.

Golden Tankard Tops comparatively small; leaf stalks and veins distinctly bottom usually of larger diameter than top, light gray above ground, deep orange below. Flesh yellow, zoned with white. Pkt. 5c; Oz. 10c; 1/4 Lb. 15c; Lb. 35c.

Early Large White French
This is probably the most useful variety. Plants very hardy, vigorous and easily grown.
Heads white, compact, hard and of good quality. Pkt. 5c; Oz. 35c; 2 Oz. 60c;

BRUSSELS SPROUTS This vegetable is used in the fall and early winter and by some considered more tender and delicious than any cabbage. The plant resembles the cabbage, the edible part being the numerous very small heads or sprouts an inch or two in diameter formed on the stalk at each leaf joint. The culture is the same in all essentials as for cabbage, except the leaves should be broken down in the fall to give the little heads more room to grow.

Improved Half Dwarf Probably the most useful variety, plants growing one and one-half to three feet high, very hardy and giving compact, round sprouts of large size and good quality. Pkt. 5c; Oz. 15c; 2 Oz. 25c; 1/4 Lb. 40c; Lb. \$1.50

YELLOW LEVIATHAN MANGEL WURZEL

CABBAGE

For many years cabbage seed has been a leading specialty with us. Our cabbage seeds are all grown from approved stock seeds which are largely of our own development on our Oakview Stock Seed Farm; they are all grown under our personal inspection and supervision. There is no seed more rehable, nor can any be more implicitly depended upon to give planters uniformly satisfactory results.

The requisites for complete success with cabbage are: First, good seed. In this crop the quality of the seed used is of the greatest importance. No satisfactory results can possibly be obtained when poor seed is planted. Second, rich, well prepared ground. A heavy, moist and rich loam is most suitable. Third, frequent and thorough cultivation. The ground should be highly manured and worked deep. Cabbage is grown all over the country and specific directions regarding the time and methods of planting applicable to all localities cannot be given. In general, north of the 40th parallel the early sorts should be sown very early in hotbeds, hardened off by gradually exposing them to the night air and transplanted as early as the ground is in good condition, setting eighteen to thirty-six inches apart, according to size of variety. South of the 40th parallel sow about the middle of September, or later according to latitude, transplanting into cold-frames if necessary to keep through winter and setting in open ground as early as possible in the spring.

The late autumn and winter varieties may be sown from the middle to the last of spring and transplanted when four to six inches high. If the weather and soil are dry the late sowings should be shaded and watered in order to hasten germination, but it is important that the plants should not be shaded or crowded in the seed-bed, or they will run up weak and slender and will not endure transplanting well. Cabbages should be hoed every week and the ground stirred as they advance in growth, drawing up a httle earth to the plants each time until they begin to head, when they should be thoroughly cultivated and left to mature Loosening the roots will sometimes retard the bursting of full grown heads.

Of late years many crops of early cabbages have been destroyed by maggots at the roots. The best remedy seems to be to remove the earth from around the stem and apply an emulsion of kerosene made as follows: Add one quart of kerosene oil to two quarts of boiling soft soap which has been thinned to the consistency of cream. Stir the oil thoroughly by churning or other method until it has united with the soap and forms a cream-like substance. Then dilute with five times as much water and apply once a week.

The cabbage worms which destroy the leaves and heads later may be killed by dusting with pyrethrum powder, slug shot or Paris green. The last two are poisonous and should not be used in large quantities, or late in the season; however, should their outside leaves before the heads are used. If the disease

called club-root should get a foothold, do not plant the land with any of the cabbage family for a year or two. This is usually an effective remedy.

To preserve cabbages during winter, pull them on a dry day and turn them over on the heads a few hours to drain. Set them out in a cool cellar, or bury them in long trenches in a dry situation, covering with boards or straw so as to keep out frost and rain.

For further information see books listed on inside of back cover.

A great many of the varieties of cabbages are simply strains rather than distinct sorts and are really the same as some older and better known kinds. We are confident that every good quality can be found in a greater degree in the varieties we offer than in any other kinds.

FIRST EARLY SORTS

Copenhagen Market

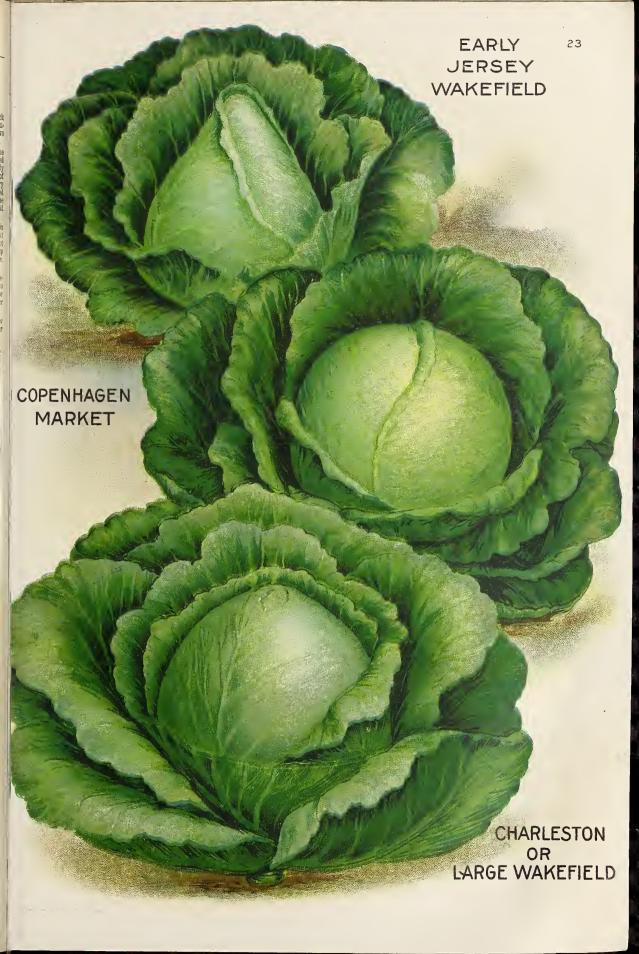

The earliest large round-headed cabbage yet introduced. Head exceptionally large for so early a variety, very solid and of most excellent quality. Plant vigorous but compact, with short stem and few outer leaves which are of rather upright growth.

Leaves medium light green, nearly round, comparatively thick and smooth. A most excellent sort, both for the home garden and market gardening trade. (See colored plate opposite and further description in Supplement, page 6.) Pkt. 5c; Oz. 60c; 2 Oz. \$1.00; ¼ Lb. \$1.75; Lb. \$6.00

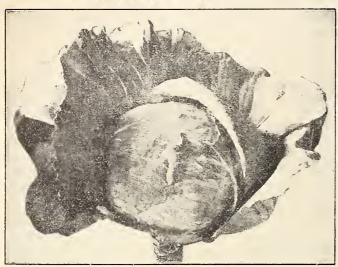

HENDERSON'S EARLY SUMMER (See page 24)

Charleston or Large the plant is larger Wakefield and a little later than Early Jersey Wakefield, the head being fully as solid but less pointed and considerably larger. Leaves rather large, smooth and comparatively thick, Exceedingly hardy and on account of its earliness and size of head with market gardeners and shippers it is deservedly a very popular sort to follow Jersey Wakefield, Plant medium sized, slightly spreading; head pointed but very broad at the base. The seed we offer can be depended on to produce uniformly fine, marketable heads. (See colored plate opposite and further description in Supplement, page 4.) Pkt. 5c; Oz. 30c; 2 Oz. 55c; ¼Lb. \$1.00; Lb. \$2.75

Early Spring headed variety. The plant is vigorous, very compact, with few outer leaves and short stem. The leaves are nearly round, broad, smooth and of distinctive light green color, without bloom. Pkt. 5c; Oz. 30c; 2 Oz. 55c; ¼Lb. \$1.00; Lb. \$2.75

CABBAGE—SECOND EARLY OR SUMMER SORTS

ALL HEAD EARLY

Early Dwarf Flat Dutch continued experience confirms our belief that this is a most valuable second early sort. The plant is short stemmed, upright and having comparatively few and short leaves, the rows can be set close together. Head large, nearly round or slightly flattened, very solid and uniform in size and shape, maturing with Early Summer. Practically every plant will form a good, solid head which will mature much earlier than the Late Flat Dutch or other sorts usually grown for market and shipping. Pkt. 5c; Oz. 25c; 2 Oz. 40c; ¼ Lb. 75c; Lb. \$2.25

Henderson's Early Summer An excellent. second early cabbage. The plant is strong growing with numerons but not large, rather spreading outer leaves which are somewhat frilled; stem rather short. The head is of medium size, round, somewhat flattened and keeps longer without bursting than most early sorts. Valuable for home garden and market, and well adapted for kraut. Pkt. 5c; Oz. 30c; 2 Oz. 55c; 1/4 Lb. \$1.00; Lb. \$2.75

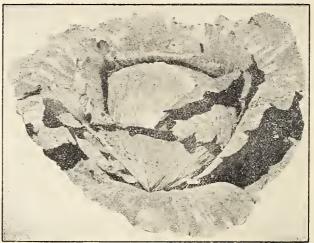

Clory of Enkhuizen
heading and of excellent quality. The plant is of vigorous growth, with large and rather spreading outer leaves which are noticeably curved and frilled. The head is globular or very nearly round, very solid and of large size for so early a variety. Pkt. 5c; Oz. 25c; 2 Oz. 40c; 1/4 Lb. 75c; Lb. \$2.50 Lb. \$2.50

All Head Early
outer leaves which are smooth and rather thick; outer leaves which are smooth and rather thick; stem short. Head very large for so early a variety, very solid, flat but very deep and uniform in size and shape. Well adapted for kraut. By planting late it can be used also as a winter cabbage. Our strain is of special value, Pkt. 5c; Oz. 35c; 2Oz. 60c; ¼ Lb. \$1.00; Lb. \$3.50

Early Winnigstadt the second early sorts, very hardy and sure heading. Owing to its compact and upright habit of growth and peculiar texture of its short thick, rich dark green leaves, the variety seems to suffer less from the cabbage worm than most other sorts. Head of medium size, sharply pointed, very hard and of good quality. Leaves covered with bluish white bloom. Keeps well both summer and winter. It is the hardiest, not only as regards frost, but will suffer less from excessive wet, drought, insects or disease than any other second early sort. Pkt. 5c; Oz. 25c; 2 Oz. 40c; ½ Lb. 75c; Lb. \$2.25

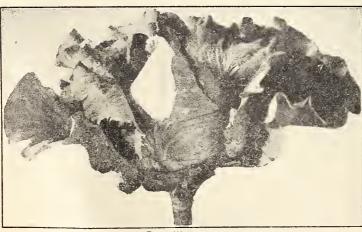

All Seasons desirable of the largest and most sorts. Plant very vigorous and sure heading, with few outer leaves which are large and smooth. Head very large for so early a variety nearly round or somewhat flattened, very solid and of the best quality. Adapted for autumn as well as early summer use, and considered one of the most desirable for kraut. Remarkable for its ability to stand the hot sun and dry weather, remaining au exceptionally long time in condition for use. Sometimes sold as Vandergaw. Pkt. 5c; Oz. 35c; 2 Oz. 60c; ½ Lb. \$1.00; Lb. \$3.50

1/4 Lb. \$1.00; Lb. \$3.50

Fottler's Early
Drumhead or
Brunswick
Short Stem
few outer leaves. The beed is love for solid and or welland. head is large, flat, solid and of excellent quality. Most desirable as an interme-diate variety and also well adapted for late use. We have taken pains to have our stock free from the longer stemmed, coarse plants often seen in inferior stocks of this variety. Pkt. 5c; Oz. 25c; 2 Oz. 40c; ¼ Lb. 75c; Lb. \$2.25

Succession A sure heading, long keeping variety, very similar to All Seasons but usually a little later maturing. The plant is very vigor-us with large outer leaves which are somewhat frilled. The head is deep and very firm. This second early sort is adapted for autumn as well as sumner use. The seed we offer is from carefully grown selected stock. Pkt. 5c; Oz. 35c; 2 Oz. 60c; ¼ Lb. \$1.00; Lb. \$3.50

EARLY WINNIGSTADT

CABBAGE—LATE OR AUTUMN AND WINTER SORTS

The Warren or Improved Stone

Mason ing much superior to that usually sold under this name. The plant is compact with only a moderate number of leaves. The head is large, lattened but very deep, very solid, and of excellent quality. Well adapted both for the bome garden and market Pkt. 5c; Oz. 25c; 2 Oz. 40c; ¼ Lb. 75c; Lb. \$2.50

Volga crop cabbages of superior quality. Very desirable where a large, uniformly round head with short stem and compact growth is wanted. This sort matures very early for a variety furnishing such large heads of excellent shape. It is also exceptionally hardy, usually very solid and a good keeper. Pkt. 5c; Oz. 25c; 2 Oz. 40c; ¼ Lb. 75c; Lb. \$2.50

Surehead one of the most feligable for all shape in the sure of the most religible for all superior to that most of the most religible for all shape. The superior to that usually a moderate number of the most religible for all shape in the plant is compact. The most religible for all superior to that usually superior to that usually a moder this name. The plant is name. The plant is name. The plant is name. The most religible for all shape in the most religible for all shape in the most religible for all shape.

Surehead able main crop cabbages. The plant has a short stem and many outer leaves. Head large, thick, somewhat flattened, very solid and uniform in size and color. Our stock is the best obtainable and will produce with certainty uniformly large, fine heads. Pkt. 5c; Oz. 25c; 2 Oz. 40c; ¼ Lb. 75c; Lb. \$2.50

D. M. Ferry & Co's strain is the result

Premium Late is the result of much care

Fremium Late of much care
Flat Dutch on our part to develop and maintain
the good qualities which have made
this sort so popular. The plant has
a short stem, rather large outer
leaves and is very sure heading.
Head uniformly large, flat but deep, solid and of splendid
quality. It is also an excellent keeper. Considered by many
the standard, very large, late cabbage. Pkt. 5c; Oz. 30c;
2 Oz. 55c; ¼ Lb. \$1.00; Lb. \$2.75

D. M. Ferry & Co's We recommend this sort for narkets that require a very Premium Late Drumhead large and deep head. Plant large with few out-

er leaves; stem of medium length. A sure heading variety which in good, rich soil will grow to a very large size and on poorer soils will give good sized heads which are very compact, and of excellent quality. The heads can be kept in good condition until spring. Pkt. 5c; Oz. 30c; 2 Oz. 55c; ¼ Lb. \$1.00; Lb. \$2.75

HOLLANDER OR DANISH BALL HEAD

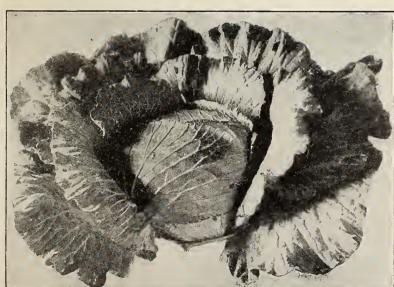

Hollander or Danish Ball Head Very hardy, handsome, tollander or Danish Ball Head handsome, very solid, of fine quality and as one of the very best keepers it is particularly desirable for distant markets or for late spring use. The plant is vigorous, compact growing, with stem of medium length, and exceedingly hardy in resisting cold and dry weather. The leaves are few but rather large, thick, smooth, bluish green covered with whitish bloom. The head is medium sized, round, very solid and stands shipment better than any other late sort. We offer seed of our own growing which, judging from recent trials, will produce more uniformly typical heads than can be grown from the best stock obtainable elsewhere. Pkt. 5c; Oz. 45c; 2 Oz. 85c; //4 Lb. \$1.50; Lb. \$4.50

Mammoth The largest and surest heading red cabbage, much better than stock offered as Red Drumhead. Plant

offered as Red Drumhead. Plant large, with numerous spreading leaves; stem of medium length. The head is large, round, very solid and of very attractive deep red color. Pkt. 5c; Oz. 35c; 2 Oz. 60c; ½ Lb. \$1.00; Lb. \$3.50

Early Dwarf One of the earliest and Ulm Savoy sweetest of the Savoys. The head is round and solid. The leaves are is round and solid. The leaves are small, much crumpled, thick, fleshy and of fine deep green color. The quality is excellent. Pkt. 5c; Oz. 25c; 2 Oz. 40c; ½ Lb. 75c; Lb. \$2.25

Improved American best
Savoy of the main crop and late Savoys for home use or the market. The plant is vigorous, with stem of medium length, has densely and uniformly crumpled leaves and is very sure heading. The head is larger, more solid and hetter than sorts that have been offered as Perfection, Green Globe or Drumhead Savoy. Pkt. 5c; Oz. 25c; 2 Oz. 40c; 1/4 Lb. 75c; Lb. \$2.50

D M FERRY & CO'S PREMIUM LATE FLAT DUTCH

The carrot is one of the most wholesome and nutritious of our garden roots deserving to be more extensively used for culinary purposes and we urge our customers to give some of the early table varieties as well as feeding sorts a trial. For horses and especially as winter feed for milch cows, the carrot cannot he surpassed and it should he more largely grown by farmers for this purpose.

While a sandy loam made rich by manuring the previous year is the best soil for the carrot, any good land if thoroughly and deeply worked will produce satisfactory crops. It is advisable to sow as early in the spring as the ground is fit to work, though good crops may be grown from sowings as late as June 15. For table use sow the smaller kinds early in rows sixteen to eighteen inches apart. For field culture sow in drills eighteen to twenty-four inches apart, using from one and one-half to three pounds of seed to the acre. Cover one-half to one inch deep and see to it that the soil is pressed firmly above the seed. As soon as the plants appear, use the cultivator or wheel hoe. Thin four to six inches apart in the row.

DANVERS

Earliest Short Horn (Efrench Forcing) One of the tion and very desirable for forcing. Tops very small. Roots reddish orange, nearly round when forced quickly in very rich, well prepared soil, hut are somewhat longer when grown outdoors. When fully matured about two to two and one-half inches long, but should he used hefore fully grown while young and tender. Pkt. 5c; Oz. 15c; 2 Oz. 25c; 1/4 Lb. 40c; Lb. \$1.25

Early Scarlet Horn Excellent for early planting out of doors. Tops small. Roots orange-red, about three inches long, top shaped but tapering ahruptly to a small tap. Pkt. 5c; Oz. 10c; 2 Oz. 15c; ¼ Lb. 25c; Lb. 90c.

Early Half Long Scarlet

Carentan slender, cylindrical with remarkably small roots of medium size.

Slender, cylindrical with remarkably small mecks, handsome deep orange color, tender throughout and of the hest quality. Roots usually four and one-half to five inches in length, hut sometimes considerably longer. The seed may be sown very thick and the variety is well adapted for forcing. Pkt. 5c; Oz. 10c; 2 Oz. 20c; ½ Lb. 30c; Lb. \$1.00

EARLY SCARLET HORN

Half Long Scarlet Nantes, Tops small. Roots cylindrical, smooth, hright orange; flesh orange, hecoming yellow in center hut very Stump Rooted tender throughout. This variety is of the finest quality and is one of the mature roots are usually five to six inches long. Excellent for the market or home garden. Pkt. 5c; Oz. 10c; 2 Oz. 15c; ¼ Lb. 25c; Lb. 90c.

Chantenay Very productive, medium early and of excellent quality. Tops medium sized, half long or stump rooted hut tapering slightly, smooth, deep orange-red in color. Flesh very crisp and tender. Although a medium early sort the roots are suitable for use nearly as early as any. One of the hest in quality for the market and home garden, while its great productiveness and the ease with which it can he harvested make it very desirable as a field sort. Pkt. 5c; Oz. 10c; 2 Oz. 15c; ¼ Lb. 25c; Lb. 85c.

Especially de-Guerande or Ox Heart sirable for soil suerange or Ox fleart sinahle for soil so hard and stiff that longer rooted sorts would not thrive in it. Tops comparatively small. Roots four and one-half to five inches long, very thick, ending abruptly in a small tap root. Flesh hright orange, fine grained and sweet. When young the roots are excellent for tahle use and when mature are equally good for stock feeding. Pkt, 5c; Oz. 10c; 2 Oz. 15c; ½ Lb. 25c; Lb. 85c.

Danvers

A half long orange carrot, grown largely on account of its great productiveness and adaptability to all classes of soil.

Tops of medium size. Roots of medium length, six to eight inches long, tapering uniformly to a blunt point. When does not not be a blunt point. Tops or meanum size. Roots of the six to eight inches long, tapering uniformly to a hlunt point. Flesh deep orange, tender and of good quality. Although the roots of this variety are comparatively short they often produce as large a hulk as the longer field sorts and are more easily harvested. Pkt. 5c; Oz. 10c; 2 Oz. 15c; ½ Lb. 25c; Lb. 85c.

Improved Long Orange
This is a decided improvement obtained by years of careful selection of the hest formed and deepest colored roots of the old Long Orange, which was the most popular of the older sorts for farm use on deep and mellow soil. The roots of the strain we offer are very deep orange, long and comparatively thick, often twelve inches in length and three inches in diameter at the crown, tapering regularly to a point. Tops large. Suitable for table use as well as stock feeding, combining great productiveness with uniform shape where grown in light, deep, rich soil. When of size suitable for the table, the roots are tender and of good quality. Pkt. 5c; Oz. 10c; 2 Oz. 15c; 1/4 Lb. 25c; Lb. 75c.

D. M. Ferry & Co's One of the very hest field carrots because of its Improved Short White it can he harvested. Roots half long, seven to shoulder hut tapering regularly to the point: color creamy white with light green crown. Flesh white, solid, crisp and of excellent quality for stock feeding. Pkt. 5c; Oz. 10c; 2 Oz. 15c; ½ Lb. 20c; Lb. 65c.

GUERANDE OR OX HEART

CAULIFLOWER

Cauliflower, although one of the most delicious vegetables, is but little grown except by professional gardeners because of the erroneous notion that it is so difficult to grow that only skilled gardeners can produce it. Any one will be reasonably sure of success with this most desirable vegetable if the cultural directions given below are carefully followed.

For spring and early summer crop, sow in March or early in April in hotbed and transplant to cold-frame when sufficiently large to handle. As soon as danger of hard freezing is over set in the open ground in rows two and one-half feet apart and eighteen inches apart in the row. The plants will endure a light frost. The soil for cauliflower should be like that for cabbage, but it is better if made richer than is ordinarily used for that crop. Plenty of good manure must be well incorporated with the soil and the latter be brought into the highest state of tilth. No application, however, can be more necessary or more useful than that of cultivator and hoe.

For late crop, sow at same time as for late cabbage and treat in the same manner. It should be borne in mind that cauliflower will not head up well in hot, dry weather and hence the sowings need to be so timed as to bring the heads to maturity either before the hot summer weather sets in or not until the cooler weather of the fall. If it receive at this time a liberal supply of water, the size and quality of the heads will be greatly improved. After the head begins to form, draw the leaves over and tie them together to protect it from the sun and to keep it white. The heads should be cut for use while the "curd" is compact and hard, as they soon become much impaired in quality and appearance after they open and separate into branches.

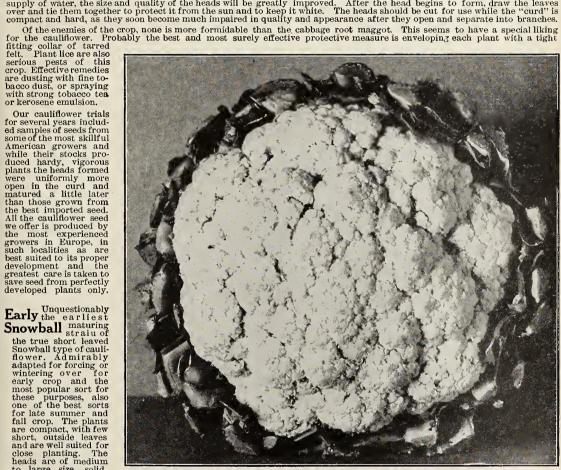

Our cauliflower trials for several years included samples of seeds from some of the most skillful American growers and while their stocks produced hardy, vigorous plants the heads formed were uniformly more open in the curd and matured a little later than those grown from the best imported seed. All the cauliflower seed we offer is produced by the most experienced growers in Europe, in such localities as a rebest suited to its proper development and the greatest care is taken to save seed from perfectly developed plants only. Our cauliflower trials

Early the earliest Snowball maturing the true short leaved Snowball type of cauliflower. Admirably adapted for forcing or wintering over for adapted for foreing or wintering over for early crop and the most popular sort for these purposes, also one of the best sorts for late summer and fall crop. The plants are compact, with few short, outside leaves and are well suited for close planting. The close planting. The heads are of medium to large size, solid, compact, round, very

compact, round, very white and curd-like and are developed earlier than those of any other sort. In our recent comparative trials of samples from the best known growers and prominent seedsmen in Europe and America our stocks of Early Snowball were unsurpassed by any in earliness. They also gave the highest percentage of well formed heads. After a careful inspection of the fields of the most expert Danish and other European growers we know we are in position to supply the most critical trade with seed which can be depended upon as the very best. Pkt. 25c; ½ Oz. 75c; Oz. \$2.25; 2 Oz. \$4.25; ½ Lb. \$8.00

Extra Early Dwarf Erfurt

A remarkably sure flower. It is of dwarf habit with short outside leaves and is similar in all respects to Early Snowball, and nearly as early. The heads when ready for market are of medium to large size, curd white, exceptionally deep and of finest quality. It will give excellent results either in the home garden or for market use and is superior to most seed sold at higher prices. Where extreme earliness is not the greatest consideration we recommend this strain after having proven it far superior to most stocks offered as Snowball. Pkt. 25c; ¼ Oz. 65c; Oz. \$2.00; 2 Oz. \$3.75; ¼ Lb. \$7.00

EARLY SNOWBALL

Early Favorite

This is a second early, exceedingly hardy, easily grown and perhaps the best sort for the inexperienced grower, as it will head under conditions in which many sorts would fail. The plants are large and form large heads which, although inclined to be open, are crisp, tender and of fine quality. It keeps in condition for use a long time. Many years' experience has convinced us that it is one of the hardiest sorts. Pkt. 5c; Oz. 85c; 2 Oz. \$1.35; 1/4 Lb. \$2.25

Large Algiers

A valuable late sort, sure to head, of excellent quality and popular with market gardeners. Plant large but of upright growth, the leaves protecting the heads so that they will endure uninjured a frost that would ruin most other sorts. One of the very best of the late varieties. Pkt. 5c; Oz. 75c; 2 Oz. \$1.25; 1/4 Lb. \$2.00

Veitch's Autumn Giant
A distinct and valuable stems and dark green leaves. The heads are very large, white, firm and compact and being well protected by foliage, remain a long time fit for use. and transplanted early in the season to insure their full development. Pkt. 5c; Oz. 40c; 2 Oz. 75c; ¼ Lb. \$1.25

CELERY

Sow the seed (which is slow to germinate) from about February 20 to April 20 in shallow boxes indoors or sow in a finely prepared seed hed out of doors in April instraight rows so that the small plants may be kept free from weeds. See to it that the seed is not covered too deep and that the hed is kept moist, almost wet, until the seeds germinate, as plenty of moisture is essential to get a satisfactory growth. The seed will not germinate well if planted in a bothed or where subjected to a temperature above 60° F. When the plants are one to two inches high, thin out and transplant so that they may stand two or three inches apart each way. When they are four inches high, cut off the tops, which will cause the plants to grow stocky. Plants are usually set out when ahout five inches high. It is well to cut off the lower balf of the roots before transplanting.

The crop is usually made to succeed some earlier one, but in order to grow good celery the soil nust be made as rich as possible, the essentials to succeed some earlier one, but in order to grow good plants are used, they may he set out as late as the middle of August, but the best results are usually obtained from setting about the middle of June or first of July. The most desirable time will depend upon local climate and is that which will bring the plants to maturity during cool, moist weather. In setting, prepare broad trenches about six inches deep and four to six feet apart, in which the plants should be set in from the roots until new rootlets are started. The only care now necessary for about six weeks is to keep the plants free from weeds hy frequent cultivation.

When the plants are nearly full grown they should be "handled" which is done by gathering the leaves together while the

from weeds by frequent cultivation.

When the plants are nearly full grown they should be "handled" which is done by gathering the leaves together while the earth is drawn about the plant to one-third its height, taking care that none of it falls hetween the leaves, as it would he likely to cause them to rust or rot. After a few days draw more earth about them and repeat the process every few days until only the tops of the leaves are visible. Or it may he blanched by pressing the leaves together with two wide boards held in place by stakes or by wire hooks at the top. This is the method commonly used by market gardeners and the rows need to be only about there feet apart, but celery so blanched is not so good in quality and is more likely to become pithy than that blanched with earth. Care should be taken that the plants are not disturbed while they are wet or the ground is damp; to do so increases the liability to injury from rust.

earth. Care should be taken that the plants are not disturbed wine they are wet or the ground is using, to as a metastal liability to injury from rust.

A part of the crop may be simply "handled" and then at the approach of severe freezing weather taken up and set out compactly in a dark cellar or an unused cold frame, where the temperature can be kept just above the freezing point and it will then gradually blanch so that it may be used throughout the winter. Should the plants begin to wilt, water the roots without wetting the stalks or leaves and they will revive again.

Celery is sometimes grown by what is termed the new process which consists in making a spot as rich as possible and there setting the plants six to eight inches apart each way. If the soil is very rich and there is an abundance of water, the plants will blanch each other and the product will he very white and handsome, but we think it is inferior in quality to that grown by the old method. For further cultural information see list of books on inside of back cover.

This is the best celery for early use. It is in condition as early in the fall as any

1/4 Lb. \$1.00; Lb. \$3.00

Columbia An early maturing sort unsurpassed in sbape and quality. The plant is of medium beight but very stocky and heavy. The stalks are thick, almost round, resembling in sbape those of Giant Pascal; the color has in it more of the rich yellow tint of Golden Yellow Self Blanching, which variety it resembles very much in appearance when trimmed and bunched for the market. The foliage is of a distinctly light shade of in appearance when trummed and bunched for the market. The foliage is of a distinctly light shade of green with a tinge of yellow. In season it follows in close succession Golden Yellow Self Blanching. Its quality is certainly exceptionally fine, some connoisseurs considering it equal or even superior to either Golden Yellow Self Blanching or Giant Pascal. Introduced by us in 1906. (See cut. and further description in Supplement, page 6) Pkt. 5c; Oz. 85c; 2 Oz. \$1.35; ½ Lb. \$2.25; Lb. \$8.00

Dwarf White Solid
An erect, compact growing variety.
Stalks moderately tbick, solid and crisp, tecoming when blanched attractive light yellowish white.
This variety is also sold as Large Ribbed Kalamazoo and Kalamazoo. Pkt. 5c; Oz. 25c; 2 Oz. 40c; 14 Lb. 75c; Lb. \$2.50

Seymour's White Solid A large sized, vigorous grow-

Seymour's White Solid A large sizew, ing variety; stalks when hlanched attractive light yellow or nearly white, nearly round, crisp, solid and of good flavor. Matures a little earlier than Giant Pascal. Pkt. 5c; Oz. 20c; 2 Oz. 35c; ¼Lb. 60c; Lb. \$2.00

Giant Pascal developed from the Golden Yellow Self Blanching and we recommend it as heing of the very best quality for fall and early winter use. It hlanches to a heautiful yellowish white color; is very solid and crisp and of a fine nutty flavor. The stalk is of medium height, very tbick, the upper portion nearly round but hroadening and flattening toward the base. With high culture this variety will give splendid satisfaction as a large growing sort for fall and winter use. In the south it is prized more than almost any other kind. Pkt. 5c; Oz. 25c; 2 Oz. 40c; ¼Lb. 75c; Lb. \$2.50

GOLDEN YELLOW SELF BLANCHING

CELERY-Continued

Evans' Triumph of the large, late sorts. The variety produces a very strong and vigorous plant with dark green foliage and large stalks which when blanched are attractive light yellow or nearly white, crisp, tender and of fine flavor, It is late and requires the whole season to develop but will keep well for a long time and has proven to be a very popular late variety. When properly grown a dozen plants trimmed for market will weigh nearly twice as much as the same number of some smaller and earlier sorts. Pkt. 5c; Oz. 25c; 2 Oz. 40c; ½ Lb. 75c; Lb. \$2.50

This is considered the most attractive in color and the best in quality of any of the late keeping sorts. Plant moderately dwarf, compact, with solid heart and habit of growth very well adapted for late keeping. When ready for the late market the color is a light creamy yellow, very handsome. Its quality is unsurpassed by any variety of its class and is decidedly superior to most of the older, long keeping sorts. Pkt. 5c; Oz. 35c; 2 Oz. 60c; ½ Lb. \$1.00; Lb. \$3.50

French's Success troduced. Growth compact and short in stem so that plants may be well earthed up for blanching while growing close together. Foliage dark green; heartlarge, solid and formed early; stalks become when blanched almost white or very light creamy yellow, thick, yet brittle, without stringiness and of good quality. It requires more time to mature than some sorts but remains firm, solid and in perfect condition until late in the spring. Pkt. 5c; Oz. 35c; 2 Oz. 60c; ½ Lb. \$1.00; Lb. \$3.50

Soup or Cutting Celery ing but is sown thick in rows for soup flavoring. The tops grow very rapidly and furnish a succession of cuttings throughout the season. Pkt. 5c; Oz. 15c; 2 Oz. 25c; ¼ Lb. 40c; Lb. \$1.25

the ely nly by out ith

ere

CELERY SEED FOR FLAVORING. Oz. 10c; 1/4 Lb. 15c; Lb. 40c.

FRENCH'S SUCCESS

WINTER RELIANCE

CELERIAC OR TURNIP ROOTED CELERY. Sow seed at the same season and give the same treatment as common celery. Transplant to moist, rich soil, in rows two feet apart and six inches apart in row. Give thorough culture. As the roots are the edible portion it is not necessary to earth up or "handle" it. After the roots have attained a diameter of two inches, they are fit for use. To keep through winter pack in damp earth or sand and put in the cellar or leave out of doors, covering with earth and straw like beets and carrots.

Large Smooth Prague An improved form of turnip rooted celery, excellent for soups and stews. Produces roots of nearly globular shape and comparatively smooth surface. Pkt. 5c; Oz. 25c; 2 Oz. 40c; ¼ Lb. 75c; Lb. \$2.50

CHERVIL A hardy annual with aromatic leaves resembling parsley in appearance and by many considered superior to that vegetable in flavor. The young leaves are used in soups and salads and for flavoring and garnishing dishes of meats and vegetables. They are ready for use in six to ten weeks from sowing. Sow in early spriug in rich, well prepared soil. The seed is slow to germinate, sometimes remaining in the earth four or five weeks before the plants appear. When the plants are about two inches high, transplant or thin to about one foot apart.

Curled Greatly superior to the old, plain variety, as fine fragrance and flavor. Pkt. 5c; Oz. 10c; 2 Oz. 20c; ¼ Lb. 30c; Lb. \$1.00

CHICORY—Large Rooted or Coffee

The dried and prepared roots are much used as a substitute for coffee, and the young leaves may be used as a spring salad. Our stock is the improved type, with very much larger, smoother, whiter and proportionately shorter roots than the old kind.

Sow seed as early in spring as the ground can be prepared, in rather light, moderately rich soil, in 'drills two to two and one-half feet apart for either garden or field culture. When the plants are sufficiently large, thin to six inches apart in the row. Cultivate well and in the fall dig the roots, slice them and dry in an apple evaporator or kiln constructed for the purpose. When the roots are grown in quantity for the manufacturers of "prepared" chicory, they are usually brought to the factory in the "green" state and there dried in kilns constructed specially for the purpose. Pkt. 5c; Oz. 15c; 2 Oz. 25c; ½ Lb. 40c; Lb. \$1.25

CHIVES—Allium Schoenoprasum An onion-like plant used as a salad and for flavoring soups. It also be cut, a new growth of leaves appearing soon after each cutting. Height about ten inches. One sowing will answer for about three years. Pkt. 10c; Oz. 50c.

COLLARDS A tall, loose leaved cabbage-like or kale-like plant grown throughout the south and known in different sections as "Cole," "Colewort," or simply "Greens," It is extensively used for the table and for stock in the south where it continues in growth and is usable throughout the entire winter. Collards usually succeed in locations where cabbage cannot be grown to perfection.

Sow the seed thickly in drills, in rich ground, transplanting when about four inches high; or sow in drills where the plants are to remain and when well started thin to two or three feet apart in the row. In the south, seed may be sown from January to May and from August to October.

Georgia, Southern or Creole
large, loose, open head or cluster of leaves with a rather long stem. A frost, if not too severe, will improve rather than injure the quality of the leaves.

Pkt. 5c; Oz. 10c; 2 Oz. 15c; 1/4 Lb. 25c; Lb. 80c.

CORN SWEET OR TABLE VARIETIES

A rich, warm, alluvial soil is the best, but excellent sweet corn can be raised on any good, ordinary soil, if it is deeply and thoroughly worked before planting. In the north sweet corn should be planted as early as can be done without risking great loss from frosts or from rotting of the seed in the soil.

If planted in rows, make the rows about four feet apart and place the seed fourteen to sixteen inches apart in the row, covering one inch deep with fine soil firmly pressed down.

If planted in hills, make the hills for the early varieties three feet apart each way and plant six kernels to the hill. For the later sorts the hills should be not less than four feet apart each way. Hoe frequently, and when six inches high thin so as to leave three or four plants in the hill. Give frequent and thorough but shallow cultivation until the tassels appear.

Mammoth White Cory We consider this unquestionably the best extra early corn. Ears very large for so early a variety. Stalks about four feet high, each generally bearing two large, finely shaped ears which become fit for use as early as those of any variety in cultivation. They are twelve rowed, six to seven inches long, very symmetrical and handsome, seldom with any opening between the rows at the base. Grain large, broad, very white and of remarkably good quality for such an early sort. The size and beauty of this variety give it ready sale even when the market is overstocked. (See cut in Supplement, page 6) Pkt, 10c; Pt. 15c; Qt. 25c; 4 Qts. 75c; Bu. \$5.00

White Malakhof A handsome, very early sweet corn of splendid quality. Stalks slender but with very small cob which is well filled with small, deep, sweet and tender grains. It follows closely Mammoth White Cory in time of maturing. Pkt. 10c; Pt. 20c; Qt. 30c; 4 Qts. \$1.00; Bu. \$5.50

White Mexican four and one-half feet high: ears eight inches long, usually eight rowed: about the same season as Crosby's Early and of better quality than any other early variety of equally large size. Our stock is far superior to much that has been sold under this name. Pkt. 10c; Pt. 15c; Qt. 25c; 4 Qts. 75c; Bu. \$5.00

Crosby's Early

A most excellent early variety of fine quality. Ears five and onehalf to six and one-half inches long, fourteen rowed or more, with
short nearly square grains which are very white, sweet and tender. Plants about four
and one-half feet high. This is the sort so largely grown in Maine for canning and it is
the use of this variety rather than any peculiarity of soil that has given Maine sweet
corn its reputation for quality. Pkt. 10c; Pt. 15c; Qt. 25c; 4 Qts. 75c; Bu. \$4.75

Golden Bantam

An early sweet corn with golden yellow grain, very tender and of excellent quality. Ears eight rowed, six to seven inches long and of the medium size found most suitable for the table. The flavor is exceptionally rich and delicious. Height four to five feet. Our stock has been very carefully selected during several seasons and will be found decidedly superior to much that is offered. Pkt. 10c; Pt. 20c; Qt. 30c; 4 Qts. \$1.00; Bu. \$6.00

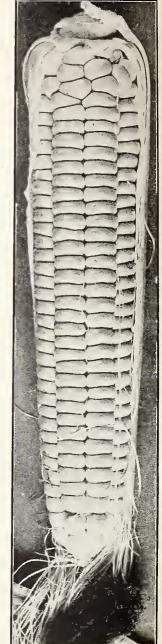

Early Minnesota This deservedly popular variety is one of the best second early sorts for the market and the home garden. The stalks are about six feet high bearing one or two ears well covered with husks. The ears are about eight inches long, eight rowed; kernels very broad, sweet and tender, not shrinking much in drying. By careful selection we have developed a stock of this standard variety which is remarkably uniform and in which all the good qualities that have made this sort so desirable are intensified. Pkt, 10c; Pt. 15c; Qt. 25c; 4 Qts. 75c; Bu. \$4.50

Kendel's Early Giant Remarkably large in ear for a second early sort and five and one-half feet high. The ears are about eight to nine inches long, twelve rowed. The grain is rather broad and shallow, and the quality very good. Pkt. 10c; Pt. 15c; Qt. 25c; 4 Qts. 75c; Bu. \$4.50

Early Sweet or Sugar about six feet high, hardy and productive. An old but excellent table sort. Our stock is distinct and true and not such a mixture of all sorts of early sweet or sugar corn as is often offered under this name.

Ears about nine inches long, slender, eight rowed, with grain very white, tender and sugary. The stalks are about six feet high, hardy and productive. An old but excellent table sort. Our stock sugar corn as is often offered under this name.

Pkt. 10c; Pt. 15c; Qt. 25c; 4 Qts. 75c; Bu. \$4.50

GOLDEN BANTAM

CORN

SWEET OR TABLE VARIETIES—Continued

Perry's Hybrid This is a very popular eastern variety. Stalks about six feet high, bearing two ears about eight inches long, twelve or fourteen rowed, which often have a red or pink cob, grain medium sized, cooking very white and tender Matures a little later than Early Minnesota. Pkt. 10c; Pt. 15c; Qt. 25c; 4 Qts. 75c; Bu. \$4.50

Black Mexican

This corn, when in condition for the table, cooks remarkably white, but the ripe grain is black or the most desirable second early sort. It does especially well for second early in the south. Stalks about six and one-half feet high; ears about eight inches long; usually eight rowed. Pkt. 10c; Pt. 15c; Qt. 25c; 4 Qts. 75c; Bu. \$4.75

Ferry's Early Evergreen

We have tested many samples of Evergreen corn that were claimed to be earlier than valuable as the stock of this variety we offer. It has been proven both on our trial grounds and in the field to come into fit condition for use much earlier than Stowell's Evergreen and to remain in condition quite as long. Ears about seven to seven quality. Plants about six and one-half inches long, with fourteen to twenty more or less irregular rows with very deep grain which is of the very best quality. Plants about six and one-half to seven feet high. A standard main crop variety for home garden and market; also well adapted for canning.

Pkt. 10c;

Those who like the all.

Avon Evergreen find in Avon Evergreen a variety better in every way. It is a trifle earlier, of superior quality, has a longer ear and thicker kernel. Ears cylindrical, about nine inches long, well filled at ends, fourteen or sixteen even rows. Grain very white, tender, delicious in sugary flavor, thick and of good depth. Stalks vigorous, seven to eight feet high. This is a splendid main crop variety for the market, the home garden or the canner. It remains long in condition for use. (See further description in Supplement, page 6.) Pkt. 10c; Pt. 25c; Qt. 40c; 4Qts. \$1.50; Bu. \$8.00

Stowell's Evergreen

The standard main crop variety, much used for the productive, very tender and sugary, remaining a long time in condition suitable for boiling. Our stock has been carefully grown and selected to avoid the tendency to a shorter grain and deterioration in the evergreen character of this best known of all late sorts. Ears about seven to eight inches long, fourteen to twenty rowed; stalks about seven and one-half feet high. Pkt. 10c; Pt. 15c; Qt. 25c; 4 Qts. 75c; The standard main crop variety, much used for the Bu. \$4.75

Country Gentleman

This variety has a small, white cob, densely covered with irregular rows of very long slender, white grains of excellent quality. Ears seven to nine inches long; stalks from six and one-half to seven feet high. Well adapted for canning as well as the home garden and market and by many it is regarded as the best of the late varieties. Pkt. 10c; Pt. 15c; Qt. 25c; 4 Qts.75c; Bu. \$5.00

Mammoth A rather late variety, but producing the largest ears of any sort with which we are acquainted. It is of excellent quality, sweet, tender and delicious and its only fault is the immense size of the ears, which are often about twelve inches long; sixteen or eighteen rowed Plants very large, about eight feet high. Pkt. 10c; Pt. 15c; Qt. 25c; 4 Qts. 75c; Bu. \$5.00

FIELD VARIETIES

Extra Early Adams

Very early and used extensively for a first early table corn in the south. Stalks about four feet high, with small tassel, very few leaves, and without suckers. Ears short, very full, twelve or fourteen rowed, often uearly as thick as they are long, well covered with coarse husks; kernels white, smooth. An extremely hardy variety which can be grown closer together than most sorts. Pkt. 10c; Pt. 15c; Qt. 20c; 4 Qts. 60c; Bu. \$3.50.

Early Adams or Burlington

Ears about eight inches long, twelve or somewhat deeper than broad and indented at the outer end which is whiter and less transparent than the increase. Stalks about six feet high. Pkt. 10c; Pt. 15c; Qt. 20c; 4 Qts. 60c; Bu. \$3.50

Early Red Blazed An early flint sort about seven feet high. Ears ten to of fine quality, bright yellow at base of ears, but red at the tips. Known also as Smut Nose. Pkt. 10c; Pt. 15c; Qt. 20c; 4 Qts. 50c; Bu. \$2.50

Early Golden Dent or Pride of the North

A very early dent
seven feet high, with broad leaves. Ears about seven inches long, twelve to sixteen
rowed, well filled Grain long, yellow, making an extra quality of meal. Pkt. 10c;
Pt. 15c; Qt. 20c; 4 Qts. 50c; Bu. \$2.50

POP CORN

We supply pop corn in lots of four quarts and less, shelled.

Black Beauty tionally white. The kernels are black but this color is not noticeable after popping, when this sort is the largest and most tender of any. Ears about six inches long, twelve rowed; kernels smooth, shallow, nearly square. Pkt. 10c; Pt. 25c; Qt. 40c; 4 Qts. \$1.50; Bu. of ears \$5.00

White Rice Avery handsome and prolific variety. Ears six to seven inches best for parching. Pkt. 10c; Pt. 20c; Qt. 30c; 4 Qts. \$1.00; Bu. of ears \$3.00

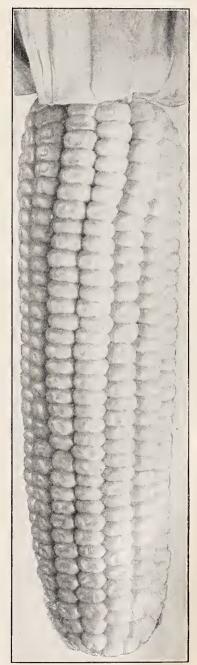

If corn is ordered by mail or express prepaid add 10 cents per pint, 15 cents per quart for charges.

CORN SALAD—Fetticus or Lamb's Lettuce

A small, quick growing salad plant for late fall, winter and spring use. The leaves

A small, quick growing salad plant for late fall, winter and spring use. The leaves are used as a substitute for lettuce and spinach.

During August and September sow the seed in shallow drills about one foot apart, covering with about one-fourth inch of fine soil firmly pressed down. On the approach of severe cold weather, cover with straw or coarse litter. The plants will also do well if the seed is sown very early in the spring and like most salad plants, are greatly improved if sown on very rich soil; indeed the ground can scarcely be made too rich for them. The seed we offer is extra cleaned, quite different from much that appears on the market. Pkt. 5c; Oz. 10c; 2 Oz. 15c; ¼ Lb. 20c; Lb. 60c.

AVON EVERGREEN

CUCUMBER

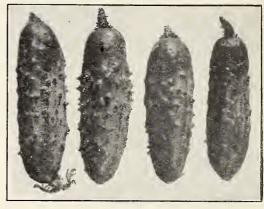

This is one of the vegetables that can be grown to perfection by any one who can control a few square yards of reasonably good soil that is fully exposed to the sun. Every family should be supplied from its own garden, since the fruit is so much better when gathered fresh from the vines as desired for use than it is in the more or less wilted condition in which it is found on the market.

In order to obtain the largest yield of encumbers, the soil should be well enriched with well-rotted manure, butan abundance of good fruit can be raised on any rich garden soil. Plant the seed not over an inch deep in hills four to six feet apart each way, dropping fifteen to twenty seeds in a hill. After the plants begin to crowd and danger from the striped beetle is pretty well over, thin to three plants to the hill. Give frequent but shallow cultivation until the plants make runners so long that this is impracticable.

In field culture, plow furrows four feet apart and similar ones at right angles to the first. At each intersection drop a shovelful or more of well-rotted manure which should be well mixed with the soil, forming a broad, flat hill four to six inches above the surface. Many growers omit every fourth row, thus forming paths for the distribution of manure and gathering the fruit.

In many sections, where earliness is very important, market gardeners start plants in boxes made like the ordinary berry box, but without the raised bottom. The boxes are set in hotbeds or

t m hotbeds or cold - frames, filled with rich, friable soil and the seed planted. When danger of frost is over, the plants are set in the ope

Snow's Pickling

set in the open ground, the boxes being cut away, so that the roots are not disturbed at all.

The plants are liable to attack from the striped cucumber beetles which are so numerous in some cases as to destroy them. These insects may be kept off by frequent dusting with air slaked lime, soot or sifted ashes diluted with fine road earth. Care should be taken not to use too much of any of the above materials, for if used too freely they will kill the vines. The best protection against injury is a vigorous and rapid growth of the young plants.

Pick the fruit as soon as it is large enough and before it begins to ripen, as the vines will cease setting fruit as soon as any seed begins to mature. In gathering for pickles, cut the stem instead of pulling the fruit off and be careful not to mar the fruit in any way, for if the skin be broken the pickles will not keep so well.

We pay particular attention to growing and selecting the various strains so as to keep them pure and true to name.

Early Cluster An early and very productive variety. The vines are two or three. The fruits are short, thick, bright green, shading lighter at blossom end, crisp and tender. This sort is extensively used as a pickling cucumber as well as for slicing. Pkt. 5c; Oz. 10c; 2 Oz. 15c; ¼ Lb. 25c; Lb. 90c.

Early Short Green is an early, bright green cucumber of medium size, very extensively used for slicing and pickling. The vines are very vigorous and productive. The fruits are straight, a little smaller at the ends, bright green in color, shading lighter at the blossom end. The flesh is crisp and tender. Our stock is very superior. Pkt. 5c; Oz. 10c; 2 Oz. 15c; ¼ Lb. 25c; Lb. 90c.

Snow's Pickling with many growers.

An early maturing, very small, dark green eucumber; cylindrical, square ended, and very popular the seed procured from the originator. We have been growing this variety ourselves for several years, giving special attention to purity and uniformity of type and we believe the seed we offer meets in all respects the requirements of those who want an ideal bottle pickle. Pkt. 5c; Oz. 10c; 2 Oz. 20c; ½ Lb. 30c; Lb. \$1.00

Muscatine Pickling A pickling strain of western origin, even in shape, of deep green color, blunt ended and very desirable for small pickles. One of the most promising of the recent improvements in pickling cucumbers. Pkt. 5c; Oz. 10c; 2 Oz. 20c; 1/4 Lb. 30c; Lb. \$1.00

Chicago or Westerfield The fruits of this very desirable sort are of medium length, pointed at each green. A very prolific variety and one of the best for those who want crisp, coarsely spined pickles. Pkt. 5c; Oz. 10c; 2 Oz. 15c; ¼ Lb. 25c; Lb. 90c.

Boston Pickling

This is a very productive variety that is extensively grown for pickles. The vines are vigorous. The fruits are bright green, of medium size, very smooth and symmetrical. The flesh crisp and tender. Our seed is decidedly superior to much that is offered. Pkt. 5c; Oz. 10c; 2 Oz. 15c; ¼ Lb. 25c; Lb. 90c.

Jersey Pickling

This variety is between the Long and the Short Green, forming a long, slender, cylindrical pickle which is very crisp and tender. The vines are very vigorous and productive. This sort is excellent for slicing as well as for pickling. Pkt. 5c; Oz. 10c; 2 Oz. 15c; 1/4 Lb. 25c; Lb. 90c.

EARLY WHITE SPINE

CUCUMBER-Continued

Early White Spine One of the best sorts for table use. The vines are vigorous, fruiting early and abundantly. The fruits are uniformly straight, light bright green in color, with a few white spines and when mature are often about seven inches long. The flesh is crisp, tender and of excellent quality. Pkt. 5c; Oz. 10c; 2 Oz. 15c; 1/4 Lb. 25c; Lb. 90c.

Arlington

A selection from the Early White Spine, being more pointed at each end. The young fruits are crisp and tender and are of dark green color. The mature fruits are about six and oue-half to seven inches long. Considered by many to be the best sort for small pickles. Excellent also for slicing. Pkt. 5c; Oz. 10c; 2 Oz. 15c; 14 b. 25c; 14 90c. 2 Oz. 15c; 1/4 Lb. 25c; Lb. 90c.

Klondike

A medium early, white spined cucumber of handsome, very dark green color and of excellent quality for slicing. The vines are very hardy and productive. The fruits when mature are about eight inches loug, and are uniform in size and shape. Color dark green, slightly striped at the ends. The dark greeu color is retained much longer and is affected less by the hot sun than any other sort with which we are familiar. Its uniform size and shape and splendid color are making this variety very popular as a shipping sort. Pkt. 5c; Oz. 10c; 2 Oz. 20c; ½ Lb. 30c; Lb. \$1.00

Extra Long or Evergreen ful in White Spine shape and color and of the finest quality. The fruits are loug, cylindrical, dark green, with very white, crisp and teuder flesh. This is an entirely distinct sort developed by ourselves through very careful selection, our aim being to secure the best possible table cucumber. The vine is vigorous and productive and comes into full bearing somewhat later than Early White Spine. The mature fruits are about eight to nine inches long. This variety is adapted also for forcing. Pkt. 5c; Oz. 10c; 2 Oz. 20c; 1/4 Lb. 30c; Lb. \$1.00

Improved The vines are very vigorous and productive. The fruits Long Green are very long, often twelve inches, stender and of uniformly dark green color. The variety furnishes some fruits early but matures the bulk of its crop rather late. This is an excellent sort for slicing and is very largely used for pickles. The mature fruits are often used for making sweet pickles. We offer a carefully selected strain uniformly long, of good form and with the large warts and spines well distributed over the surface instead of being clustered at one end as in inferior stocks. Pkt. 5c; Oz. 15c; 2 Oz. 25c; ½ Lb. 40c; Lb. \$1.25

Small Gherkin (For Pickles) A very small, oval, prickly fruited sort quite distinct from all others and grown exclusively for pickles. It is the smallest of all the varieties and should always be picked when young and tender.

Seed distinctly smaller than other cucumbers and is slow to germinate, requiring usually from two to three weeks. Pkt. 5c; Oz. 15c; 2 Oz. 25c; ¼ Lb. 40c; Lb. \$1.50

CRESS

As early in spring as the ground can be worked sow the seed in rich, well prepared soil, in shallow drills about sixteen inches apart, covering with about one-half inch of fine soil firmly pressed down. When the young plants are well started thin four to six inches apart in the row. For succession plant every two weeks, thinning out as required for use. Keep off insects by dusting with Pyrethrum powder.

The leaves of this small salad are much frilled or Curled or Pepper Grass able with lettuce, to the flavor of which its warm, pungent taste makes a most agreeable addition. The plant is of rapid growth, about one foot high. Pkt. 5c; Oz. 10c; 2 Oz. 15c; ¼ Lb. 20c; Lb. 50c.

True Water

This is a distinct variety of cress with small, oval leaves and thrives best when its roots and stems are submerged in water. A fair growth may be obtained in soil which is kept wet but does best when grown along moist banks or in tubs in water-covered soil. It is one of the most delicious of small salads and should be planted wherever a suitable place can be found. The seed is usually sown and lightly covered in gravelly, mucky lands along the borders of small, rapid streams. The plants will need no subsequent culture, as under favorable conditions they increase very rapidly by self-sown seed and extension of the roots. When gathered for the market the shoots should be cut, not broken off. In summer it is best to cut them closely, the oftener the better. Pkt. 5c; Oz. 35c; 2 Oz. 60c; ¼ Lb. \$1.00; Lb. \$3.50 1/4 Lb. \$1.00; Lb. \$3.50

DANDELION

Sow early in spring, in very warm, rich soil, in drills eighteen inches apart; thin to five inches apart and cultivate well; they will be fit for cutting the next spring. When grown for the roots, sow in September and cultivate well during the fall and the following summer; the roots will be fit to dig in October.

Cultivated or French Common A decided improvement on the wild dandelion. Very early and vigorous in growth. Pkt. 5c; Oz. 15c; 2 Oz. 25c; ½ Lb. 40c; Lb. \$1.50

Improved Thick Leaved of leaf and deep green color It is much superior to the common uncultivated dandelion Pkt. 5c; Oz. 40c; 2 Oz. 75c; ½ Lb. \$1.25; Lb. \$4.00

EGG PLANT

Seed germinates slowly and should be started in hotbed, for in this, as in all sub-tropical plants, it is important to secure a rapid and continuous growth from the first, the plants never recovering from a check received wheu young. When plants have two rough leaves transplant three or four inches apart. When the ground is warm and all danger not only from frosts but from cold nights is past, harden off by gradual exposure to the sun and air and decreasing the supply of water, then carefully transplant to open ground, setting two and oue-half feet apart. It is desirable to shade the young plants from very hot sun and to protect them from the potato bug which otherwise often destroys them. Some seasons egg plants will fail to set fruit or will not begin bearing until too late to mature, no matter how faithfully they may have been cared for. This is especially likely to happen if the summer is cool and rather moist. We know of no certain remedy for it, although it is a good practice to pinch off the ends of the branches after the plants begin to bloom, so that only two or three fruits will set.

Early Long Purple This is a very early maturing, fruit loug, rich purple and of fine quality. Pkt. 5c; Oz. 30c; 2 Oz. 55c; ¼ Lb. \$1.00; Lb. \$2.75

Black Pekin An early variety with fruit nearly as large as the later sorts. Fruit nearly round; skin smooth, black, glossy; flesh white, fine grained and delicate. Pkt. 5c; Oz. 35c; 2 Oz. 60c; ½ Lb. \$1.00; Lb. \$3.50

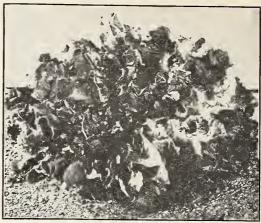

Black Beauty

Rich dark purple, large and symmetrical, maturing a little earlier than our Improved Large Purple but usually not quite as large. Very desirable for the market as the fruit holds its color a long time. Pkt. 5c; Oz. 40c; 2 Oz. 75c; 1/4 Lb. \$1.25; Lb. \$4.25

D. M. Ferry & Co's (SPINELESS) This variety is a general favorite both for marImproved Large Purple ket and home garden. spreading with light green foliage. Usually produces four to six large, oval fruits of a splendid dark purple color. Early, productive and of excellent quality. The vigor and productiveness of the plant and the large size and fine quality of its fruit make it most profitable for market gardeners. Pkt. 5c; Oz. 40c; 2 Oz. 75c; ¼ Lb. \$1.25; Lb. \$3.75

EGG PLANT, D. M. FERRY & CO'S IMPROVED LARGE PURPLE

BROAD LEAVED BATAVIAN ENDIVE

ENDIVE

One of the best salads for fall and winter use. Endive is not only much used for salads and garunshing but is also desirable for greens and for flavoring soups and stews. Plants may be grown at any season of the year but are more generally used late in the fall. For early use sow about April 15th; for later supply sow in June or July in drills fourteen to twenty inches apart and when well started thin the plants to one foot apart. When nearly full grown tie the outer leaves together over the center in order to blanch the heart of the plant. By covering fresh plants every few days a succession may be kept up.

Large Green Curled

A hardy, vigorous growing valeaves. The dense mass of deeply divided leaves formed in the center blanches very readily to rich creamy white. Highly esteemed and much used for salads. Pkt. 5c; Oz. 20c; 2 Oz. 35c; ½ Lb. 60c; Lb. \$1.75

Ever White Curled Plant moderately dense, with divelowish green in color, even the outer ones being very light. Blanches very readily to creamy white. Considered by many the most attractive sort. Pkt. 5c; Oz. 20c; 2 Oz. 35c; 4 Lb. 60c; Lb. \$2.00

Moss Curled dense clusters of finely divided, medium green leaves which, when properly blanched, are rich creamy white, crisp and tender. Leaf stems sometimes tinged with light purplish red. One of the best autumn, winter or spring salads. Pkt. 5c; Oz. 20c; 2 Oz. 35c; ¼ Lb. 60c; Lb. \$1.75

Broad Leaved Batavian (Escarolle) A variety less twisted and waved bright deep green leaves with thick, nearly white midribs. The inner leaves form a fairly solid, clustering head which blanches beautiful deep creamy white and is crisp, teuder and of fine flavor. Unsurpassed for salads. Pkt. 5c; Oz. 15c; 2 Oz. 25c; ½ Lb. 40c; Lb. \$1.50

FENNEL FLORENCE (Famiculum dulce) An excellent bulb-like vegetable which is formed above the ground at the base of the leaf stalk if the plant is well grown. Blanched and boiled it has a slightly aromatic odor and pleasant taste. Plant very branching, upright with dense thread-like foliage. Sow early in spring, in rich, well prepared soil, in drills two feet apart and cover one-fourth to one-half inch deep. When the plants are about two inches high thin to ten inches apart in the row, When half grown, if the plants are earthed up and treated as celery, the stems will be nearly as white, crisp and palatable. Hardy annual, two to four feet high. Pkt. 5c; Oz. 10c; 2 Oz. 20c; ½ Lb. 30c; Lb. \$1.00 (For Sweet Fennel see page 61.)

GARLIC A bulbous rooted plant of the onion family with a strong, penetrating odor but much esteemed by some for flavoring soups, stews, etc. We frequently receive orders for garlic seed but we can supply bulbs only. Prepare ground the same as for onions, plant the bulbs in drills eight fuches apart and four inches apart in the row, covering two inches deep. When the leaves turn yellow take up the bulbs, dry in shade and lay them up in a dry loft as you would onions. BULBS, ¼ Lb. 20c; Lb. 50c.

HORSE RADISH Horse Radish rarely produces seed but is grown from pieces of the roots. Mark off the rows two and one half feet apart in rich, moist, well prepared ground and set the pieces of roots eighteen inches apart in the rows vertically, the small end down and the top one to three inches below the surface. Cultivate thoroughly until the tops cover the ground, when their shade will keep down the weeds SMALL ROOTS—3 for 10c; 25c. per dozen, postpaid, By freight or express at purchaser's expense, 75c. per 100.

KALE OR BORECOLE

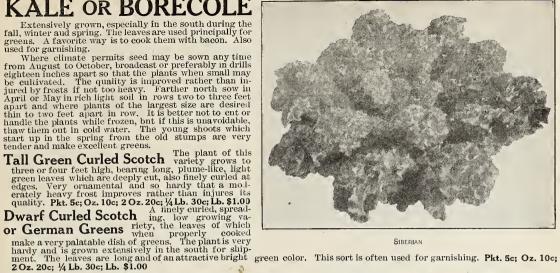

Extensively grown, especially in the south during the fall, winter and spring. The leaves are used principally for greens. A favorite way is to cook them with bacon. Also used for cappibling

used for garnishing.

used for garnishing.

Where climate permits seed may be sown any time from August to October, broadcast or preferably in drills eighteen inches apart so that the plants when small may be cultivated. The quality is improved rather than injured by frosts if not too heavy. Farther north sow in April or May in rich light soil in rows two to three feet apart and where plants of the largest size are desired thin to two feet apart in row. It is better not to ent or handle the plants while frozen, but if this is unavoidable, thaw them out in cold water. The young shoots which start up in the spring from the old stumps are very tender and make excellent greens.

2 Oz. 20c; 1/4 Lb. 30c; Lb. \$1.00

Siberian A very vigorous growing variety of spreading habit, its green foliage having a distinctive bluish tinge or bloom. The leaves are very large, comparatively plain in the center but are cut and frilled at the edges. Very hardy, a favorite for greens and in many sections is extensively grown for forage. Sometimes called Sprouts or German Greens. Pkt. 5c; Oz. 10c; 2 Oz. 15c; ½ Lb. 25c; Lb. 75c.

German Dwarf Purple Like Dwarf Curled Scotch but rich, purple color. Pkt. 5c; Oz. 10c; 2 Oz. 20c; ½ Lb. 30c; Lb. \$1.00

KOHL RABI
The edible part is the turnip-shaped bulb formed above ground. It is tender and excellent when the ground are proved to the spring as possible in rows one and one-half feet apart and when well established thin to six inches apart in the row. Plantings at intervals of ten days will give a succession until hot weather, when they fail to grow well. Plantings may be made the latter part of July for fall use.

Early White Vienna (Extra for forcing) Extremely early with distinctly small tops. Bulbs of medium size, very light green or

nearly white, and of the best quality if used when not more than two inches in diameter. Pkt. 5c; Oz. 20c; 2 Oz. 35c; ¼ Lb. 60c; Lb. \$1.75

Vienna top, the leaf stems being tinged with small vienna top, the leaf stems being tinged with purple. Bulbs of medium size, purple; flesh white. Desirable for foreing and early outdoor planting. Pkt. 5c; Oz. 20c; 2 Oz. 35c; ¼ Lb. 60c; Lb. \$1.75

Large Green Hardy, quite late and used for feeding stock. Bulbs large, weighing eight to ten pounds when fully grown, whitish green in color; leaves large and very numerous. Pkt. 5c; Oz. 15c; 2 Oz. 25c; ½ Lb. 40c; Lb. \$1.25

LEEK This belongs to the onion family.

Leaves flat; stems very large, cylindrical, bulbous.

very large, cylindrical, bulbous.
Sow early in spring in drills twelve to fifteen inches apart covering one-half inch deep. Thin plants to six inches apart in row and draw the earth about them when cultivating.

If one desires very white and tender leeks transplant when about six inches high, setting four inches apart in trenches about two feet apart and gradually earth up like celery.

London Flag
This variety is hardy, of good quality, and is extensively cultivated in this country. Pkt. 5c; Oz. 20c; 2 Oz. 35c; ¼ Lb. 60c; Lb. \$2.00
Large American Flag A variety similar to, but larger than some market gardeners. Pkt. 5c; Oz. 20c; 2 Oz. 35c; ¼ Lb. 60c; Lb. \$2.00

Large Rouen
Stems very large but comparatively short; the leaft is very broad, covered with whitish bloom. This sort stands a long time in condition for use. Pkt. 5c; Oz. 20c; 2 Oz. 35c; 4 Lb. 60c; Lb. \$2.00

Monstrous Carentan The largest variety, often three in diameter and becoming very white and tender. An exceptionally hardy and desirable sort. Pkt. 5c; Oz. 20c; 2 Oz. 35c; 1/4 Lb. 60c; Lb. \$2.00

MONSTROUS CARENTAN

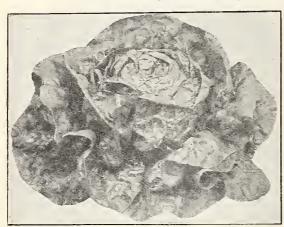

LETTUCE

For early outdoor culture in the latitude of Cincinnati and southward the seed may be planted in the fall, protecting the young plants from severe freezing either with frames or coarse litter which may be removed as soon as danger of severe freezing is over. Lettuce in ground out of doors will stand some freezing but is killed by prolonged frost or frequent freezing and thawing. North of Cincinnati an early crop may be secured by starting under glass from January to March and hardening off well before setting in ground, which should be done as soon as weather will permit.

Lettuce to be at its best should be grown as rapidly as possible, hence the soil should be made as rich and friable as possible by liberal manuring and thorough preparation. For winter, sow under glass from November to February and thin out as necessary to prevent crowding. Keep a moderate heat and give all the light and air possible. For general crop, sow outdoors as early in the spring as the ground can be worked, in drills eighteen inches apart and thin the young plants to four inches apart in the row. As the plants begin to crowd thin them out and use as required. For the cabbage or heading varieties where large heads are desired, the plants should be thinned ten to twelve inches apart in the row. In this way a much longer succession of cuttings may be had from the same ground.

Varieties marked a are particularly adapted for culture under glass and for early spring use. Those marked B are sometimes grown under glass, but are especially desirable for outdoor, summer culture. Big Boston, Brown Dutch, California Cream Butter and Jersey Winter are very hardy and suited for winter outdoor culture in the south.

CABBAGE OR HEADING VARIETIES

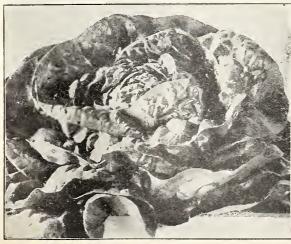

SALAMANDER

May King a. (Seed white) A handsome, extremely early, compact, cabbage or heading variety, forming very firm heads of medium size and excellent quality. Color light yellowish-green, tinged with reddish brown when mature. Inner leaves blanch rich golden-yellow, very tender and buttery. Plant very compact for so large a head. Exceptionally early outdoors, attaining a size suitable for use before other sorts, and also very satisfactory for forcing. (See colored plate, page 5, and further description in Supplement, page 4) Pkt. 5c; Oz. 20c; 2 Oz. 35c; ¼Lb. 60c; ib. \$1.75

Boston Forcing

A. (Seed white) A medium sized, light green, compact, very early heading lettuce of excellent quality and desirable for forcing. Outdoors it is one of the earliest to form a head under favorable conditions. Pkt. 5c; Oz. 15c; 2 Oz. 25c; ½ Lb. 40c; Lb. \$1.50

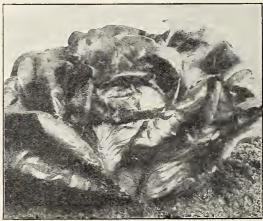

CALIFORNIA CREAM BUTTER

Early Tennis Ball A. (Seed black) One of the best heading lettuces, especially desirable for early planting outdoors and also suitable for forcing. Plants large, with thick, bright green leaves, and forming very solid heads, the inner leaves blanching to a rich, creamy white, and are crisp, tender and buttery. Pkt. 5c; Oz. 15c; 2 Oz. 25c; ½ Lb. 40c; Lb. \$1.25

Salamander

B. (Seed black)

A large, compact, light
green head of excellent quality. The
leaves are broad, thick, somewhat crumpled and closely
overlapping so that the inner ones are very finely blanched.
The variety withstands hot weather remarkably well. It is
one of the most satisfactory heading lettuces for growing
outdoors. Pkt. 5c; Oz. 15c; 2 Oz. 25c; ½ Lb. 40c; Lb. \$1.25

DEACO

Hubbard's Market leaved, bright green heading variety, forming a large, very compact head similar in type to Salamander, slightly larger, but a little later maturing. Pkt. 5c; Oz. 15c; 2 Oz. 25c; ¼ Lb. 40c; Lb. \$1.25

Mammoth Black B. A smooth leaved lettuce forming very large, compact, cabbage-like heads of thick, yellowish-green leaves, the inner ones beautifully blanched, very crisp, tender and buttery. Pkt. 5c; Oz. 20c; 2 Oz. 35c; ¼Lb. 60c; Lb. \$1.75

B. (Seed white) This is an excellent summer variety. The heads are of large size, very firm and remain in condition for use a long time. The plant is very compact, with few outer leaves which are usually very smooth, thick and of light green color. The inner leaves blanch to a bright, rich yellow and are crisp, buttery and very well flavored. Pkt. 5c; Oz. 15c; 2 Oz. 25c; 4 Lb. 40c; Lb. \$1.25

2 Oz. 25c; ¼ Lb. 40c; Lb. \$1.25

Big Boston A. (Seed white) Popular for outdoor culpact, large heading, forcing sort for cold frames. Plants large, very hardy and vigorous. Leaves broad, comparatively smooth but wavy at edge, thin, very hard and crisp: color bright light green, the head slightly tinged with reddish brown. Grown extensively in the south for shipment north in the winter. It usually heads up under cold weather conditions better than any other variety, and we therefore heartily recommend it, especially to the market gardening trade. (See colored plate, page 5, and further description in Supplement, page 4) Pkt. 5c; Oz. 20c; 2 Oz. 35c; ¼ Lb. 60c; Lb. \$2.00

LETTUCE—CABBAGE OR HEADING—Continued

California Cream Butter or Royal Summer Cabbage glossy, deep green leaves, the outer ones slightly spotted or splashed with brown. The inner leaves form a large, very solid head, rich light yellow in color, very thick, tender and buttery. Pkt. 5c; Oz. 15c; 2 Oz. 25c; ½ Lb. 40c; Lb. \$1.25

Brown Dutch

B. (Seed black) Outer leaves large, thick, green tinged with brown and covering a solid head which is beautifully blanched, sweet, tender and well flavored. Desirable because of its hardiness and well adapted to planting in the south as a winter lettuce. Pkt. 5c; Oz. 15c; 2 Oz. 25c; ¼ Lb. 40c; Lb. \$1.25

Jersey Winter beading, medium sized lettuce. The variety is very hardy and when wintered over it has proven to be one of the very earliest to mature its heads. Pkt. 5c; Oz. 15c; 2 Oz. 25c; ¼ Lb. 40c; Lb. \$1.50

Hanson summer lettuces. The plant is compact and forms a large, cabbage-like head which remains in condition longer than most heading sorts. Outer leaves bright yellowish-green, broad, somewhat crumpled and frilled at edge and with distinctive midrib. Inner leaves white, very crisp and sweet. Pkt. 5c; Oz. 15c; 2 Oz. 25c; ¼ Lb. 40c; Lb. \$1.50

CURLED OR LOOSE LEAVED VARIETIES

Grand Rapids

A. (Seed black) As a lettuce for greenhouse forcing this variety undoubtedly stands at the head of the list, being of quick growth, hardy, little liable to rot and remaining in condition several days after being fit to cut. The plant is upright and forms a loose cluster of large, thin, bright green leaves, savoyed, finely crimped at edges. The leaves do not wilt quickly after cutting so that the variety will stand shipping long distances better than most sorts. Very attractive and desirable for garnishing.

Pkt. 5c; Oz. 20c; 2 Oz. 35c; ½ Lb. 60c; Lb. \$2.00

Detroit Market are growing under glass where it Gardeners' Forcing stands higher temperature than Grand Rapids and can be crowded to maturity. Also well adapted for outdoor growing. Plant more compact than Grand Rapids, lighter colored and less frilled at edge of leaves which are crisp and tender. Pkt. 5c; Oz. 20c; 2 Oz. 35c; ¼ Lb. 60c; Lb. \$2.00

Simpson's Early Curled B. (Seed white) A used early loose leaved, or clustering variety. Leaves light green, slightly frilled and much blistered, crisp, sweet and tender. The sort is especially adapted for sowing thickly and cutting when the plants are young. Pkt. 5c; Oz. 15c; 2 Oz. 25c; ¼ Lb. 40c; Lb. \$1.25

Ferry's Early

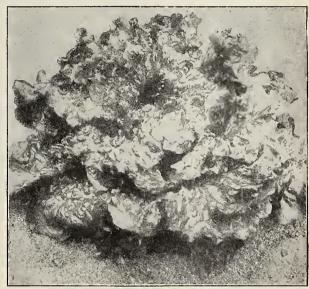

B. (Seed white)

A large, clustering, non-heading lettuce, most exprize Head

cellent for the home garden and undoubtedly the most easily grown variety in cultivation. It is too tender, however, to stand shipping or handling on the market. Leaves finely curled and crumpled, bright green tinged with brownish red, very crisp, tender and sweet. Pkt. 5c;

Oz. 15c; 2 Oz. 25c; ¼ Lb. 40c; Lb. \$1.25

Black Seeded Simpson for sowing outdoors where an exceedingly tender leaf is desired and for those markets which demand a very large, loose clustering sort of a light yellowish green color. It is used also for growing under glass or in frames. Leaves ruffled and blistered and even the large outer ones are very tender. Uniformly attractive and remains of excellent quality a very long time. Pkt. 5c; Oz. 15c; 2 Oz. 25c; ¼ Lb. 40c; Lb. \$1.50

BLACK SEEDED SIMPSON

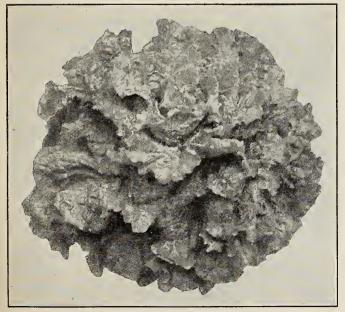

Denver Market B. (Seed white) A much frilled, bright green clustering lettuce, forming a loose medium sized head, the inner leaves well blanched and finely crumpled. An outdoor summer sort, suitable also for forcing. Pkt.5c; Oz.15c; 2Oz.25c; ¼ Lb. 40c; Lb.\$1.50

Cos Lettuce (Romaine) Cos Lettuce is distinct in laying long, narrow, spoon-shaped leaves, folding into loose, sugar-loaf shaped heads which blanch better by having the outer leaves drawn about them and tied. Sow seed early in spring in rich, well prepared soil, in rows eighteen inches apart, covering one-balf inch deep. When plants have two or three leaves thin to three or four inches apart. As the plants begin to crowd thin and use as required. If large heads are desired plants should be thinned ten to twelve inches apart.

Early White Self-Folding "(Seed white) Leaves yellowish white, crisp, tender and of good quality; a self-blanching lettuce of superior flavor. Trianon. Pkt. 5c; Oz. 15c; 2 Oz. 25c; 1/4 Lb. 40c; Lb. \$1.50 (Seed

Martynia PROBOSCIDEA A strong growing, hardy, annual plant with numerous seed pods which when young and tender are highly prized for pickling. Sow in rich, warm soil when danger of frost is past, in drills three feet apart and thin to two feet apart in the row. Pkt. 10c; Oz. 30c; 20.55; 1/4 Lb. \$100. Lb. \$300. 2 Oz. 55c; 1/4 Lb. \$1.00; Lb. \$3.00

FERRY'S EARLY PRIZE HEAD

MELC

Plant the seed in hills six feet apart each way, dropping ten to twelve seeds in a hill. After the plants begin to crowd and the striped beetles are pretty well gone thin to four of the most vigorous plants in a hill. Give frequent but shallow cultivation, until the plants make runners so long that this is impracticable. Rich earth for the young plants is far better than manure, but if the latter must be used, see that it is well rotted and thoroughly mixed with the soil.

If the plants grow very rank, more and finer fruit will be secured by allowing the main branch to continue growing but pinch off the end of each side branch after it has one fruit set. The quality of melons of all varieties is largely dependent upon conditions of growth and ripening. Unhealthy vines or unfavorable weather produces fruit of comparatively poor flavor. The plants are liable to attack from the striped beetles which are so numerous in some cases as to destroy them. The beetles may be kept off by frequent dusting with air-slaked lime, soot or sifted ashes diluted with fine road earth. Care should be taken not to use too much of any of the above materials or the vines will be injured. Should even the diluted material prove injurions to the vine, use road earth only, as frequent dusting with this alone will often prove effective especially if a wind is blowing.

GREEN FLESHED VARIETIES

Extra Early Citron

A small, round melon, valuable on account of its extreme earliness, hardiness and great productiveness. The skiu is green, becoming yellowish at maturity. The flesh is light green, sweet and of good quality.

Pkt. 5c; Oz. 15c; 2 Oz. 25c; ½ Lb. 40c; Lb. \$1.25 Jenny Lind Note that the size is desirable as a table melon. We know of no green fleshed melon maturing equally as early that is of more excellent quality. Pkt. 5c; Oz. 15c; 2 Oz. 25c; Walb. 40c; Lb. \$1.25

Extra Early Hackensack der this name distinct stock, very different and much superior to that often sold as Extra Early Hackensack. The fruits are nearly two weeks earlier than Hackensack, medium to large sized, nearly round or somewhat flattened, evenly and deeply ribbed and with very coarse netting. The skin is green, slightly tinged with yellow as the fruits mature. The flesh is green, a little coarse but juicy and sweet. Pkt. 5c; Oz. 15c; 2 Oz. 25c; ½ Lb. 40c; Lb. \$1.25

This has become Netted Gem or Rocky Ford one of the most popular of small or crate melons and is shipped in large quantities from Colorado and Arizona. The vines are vigorous and productive. The fruits are oval, slightly ribbed, densely covered with fine netting Flesh green, very sweet and highly flavored. We offer an exceptionally fine stock of this early sort, the fruit being very uniform in shape and quality and of the even size that is so desirable in a shipping melon. Pkt. 5c; Oz. 10c; 2 Oz. 20c; ½ l.b. 30c; l.b. \$1.00 2 Oz. 20c; ¼ Lb. 30c; Lb. \$1.00

Baltimore or Acme

The fruits are medium sized, oval or long oval, slightly pointed at stem end, slightly pointed at stem end, slightly ribbed, and are covered when ripe with coarse netting. The flesh is thick, green, well flavored and sweet. This variety is a very productive, sure cropper of good quality. One of the most desirable green fleshed melons of medium size. Pkt. 5c; Oz. 10c; 2 Oz. 20c; 44. b. 30c; l.b. \$1.00. Baltimore or Acme

1/4 Lb. 30c; Lb. \$1.00

NETTED GEM OR ROCKY FORD

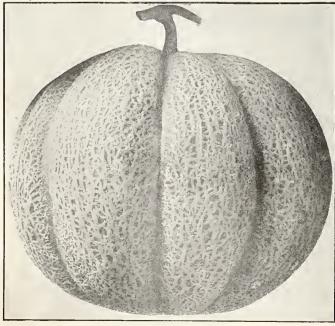

Cosmopolitan

This variety, combining, as it does, the firm, sweet flesh of the French Cantaloupe and the delicious flavor of the American Musk Melon, is truly cosmopolitan in character. It is the most beautiful of the green fleshed melons. The fruits are of medium size, nearly round or slightly oval, without ribs. The skin is light green in color, becoming covered at maturity with dense silver gray netting. The flesh is green, firm, sweet and uniformly high flavored. Pkt. 5c; Oz. 15c; 2 Oz. 25c; ½ Lb. 40c; Lb. \$1.25

Champion Market The fruits are large, round or slightly oval, slightly ribbed and covered with dense netting. The flesh is green, very thick and sweet. The variety is a improvement on Montreal in earliness and productiveness and will suit those who like a large, sweet, green fleshed sort. It can always be depended upon for a good crop. Pkt. 5c; Oz. 15c; 2 Oz. 25c; 1/4 Lb. 40c; Lb. \$1.25

Hackensack or Turk's Cap large, green fleshed melon. Vines hardy, vigorous and productive. Fruits nearly round, usually somewhat flattened; ribs large and of irregular width, densely covered with coarse netting. Flesh green, thick, coarse but juicy and sweet. Our stock is true to the "Turk's Cap" type and after careful comparison with that of other growers we do not hesitate to pronounce it the best in the country. Often sold as Improved Large Green Nutmeg. Pkt. 5c; Oz. 10c; 2 Oz. 20c; ¼ Lb. 30c; Lb. \$1.00 Pkt. 5c; Lb. \$1.00

Bay View fruits are of largest size, frepounds, long, distinctly ribbed and covered with coarse netting. The skin is green, becoming slightly yellow as fruits ripen. The flesh is green thick and of fine flavor. This variety is by far the best of the large late green fleshed melons and so hardy that we especially recommend it to mexperienced cultivators. Pkt. 5c; Oz. 10c; 2 Oz. 20c; ¼ Lb. 30c; Lb. \$1.00 1/4 Lb. 30c; Lb. \$1.00

HACKENSACK

MUSK MELON-Continued

ORANGE FLESHED VARIETIES

Emerald Gem

A very early, yellow fleshed melon of small to medium size. One of the very best for the home garden, very slightly netted.

Skin deep green while young, becoming slightly tinged with yellow as the fruit matures. Flesh is deep set the rind, juicy, melting and very highly flavored. For home use and near-by markets it leads all other kinds on account of its sweetness and convenient size. Pkt. 5c; Oz. 15c; 2 Oz. 25c; ½ Lb. 40c; Lb. \$1.25

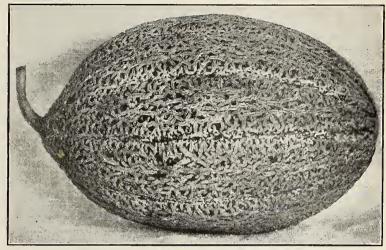

Tip Top This very productive melon is of large size, nearly round, slightly ribbed and fairly well covered with shallow netting; skin light yellow when mature. Flesh deep yellow in color, very rich and highly flavored. Pkt. 5c; Oz. 15c; 2 Oz. 25c; ¼ Lb. 40c; Lb. \$1.25

Surprise ductive; fruit medium to large size, oval, distinctly ribbed, covered with slight patches of netting; skin light yellow when mature. Flesh deep salmon color and of excellent quality. Pkt. 5c; Oz. 15c; 2 Oz. 25c; ¼ Lb. 40c; Lb. \$1.25

Extra Early Osage week earlier than the Osage, fruits a little smaller, more nearly round and the netting extends over more of the surface. These very desirable features, combined, with the thick, deep salmon colored flesh and small seed cavity characteristic of the Osage, make this melon deserving of a place in every home and market garden. Pkt. 5c; Oz. 15c; 2 Oz. 25c; 1/4 Lb. 40c; Lb. \$1.50

Petoskey or sort of suitable
Paul Rose and of excellent
quality. The vines are vigorous and
productive. The fruits are oval,
slightly ribbed and densely netted.
In general appearance they are
much like Netted Gem but larger.
The flesh is orange-yellow, very thick, firm, sweet and highly
flavored. Pkt. 5c; Oz. 15c; 2 Oz. 25c; ½ Lb. 40c; Lb. \$1.25

Admiral Togo We have developed in the Admiral Togo a small musk melon with the very thick, or Orange Fleshed Rocky Ford orange flesh and splenfender and possessing the characteristic netting, shape, size and shipping quality of Netterl Gem or Rocky Ford. Combining all the good qualities of these two fine varieties we believe the Admiral Togo is an ideal table melon. Our stock is carefully bred in size and shape, is densely netted, with very thick flesh, ripening clear to the skin. We believe the seed we offer will meet the demands of the most discriminating buyers. We consider it the best small shipping melon yet introduced. (See cut and further description in Supplement, page 8). Pkt. 5c; Oz. 15c; 2 Oz. 25c; ¼Lb. 40c; Lb. \$1.50

Sometimes sold as Ordway Queen. This is an orange fleshed variety, ideal as a shipping melon and of the very finest quality. The vines are vigorous, remarkably blight resisting and very productive. The fruits are uniformly of medium size. The netting is exceptionally fine and dense, extending over practically the entire surface. The rind is thin yet very firm, so that the melons arrive in perfect condition in distant markets. The flesh is very thick, firm, highly colored, of fine texture and delicious flavor. Pkt. 5c; Oz. 15c; 2 Oz. 25c; ½ Lb. 40c; Lb. \$1.50

Pkt. 5c; Oz. 15c; 2 Oz. 25c; ¼ Lb. 40c; Lb. \$1.50

Defender

class. The fruit is medium sized, oval in shape, slightly ribbed, covered with gray netting. The flesh is firm, fine grained, rich, deep yellow, darker than that of the Osage and of higher flavor. The flesh extends to the rind and retains its color and quality quite to the outer shell which, though thin, is very hard and firm so that one can remove the edible portion with a spoon, leaving a rind no thicker than that of an orange. Vines are vigorous and very productive. The fruit because of the hard, firm rind, keeps and bears shipment remarkably well. This splendid variety was originated and introduced by us in 1901 and we have taken pride in maintaining our stocks in the highest state of purity and excellence. We believe it to be identical with the melon introduced seven years ago and sold largely as Burrell's Gem. Pkt. 5c; Oz. 15c; 2 Oz. 25c; ¼ Lb. 40c; Lb. \$1.25

Osage or salmon fleshed melon of exMiller's Cream cellent quality. The
vines are vigorous
and productive. The fruits are oval, dark
green in color, slightly ribbed and partly
covered with shallow gray netting. The
flesh is salmon colored, thick, fine grained
and highly flavored. A favorite variety
for the later markets, as there is always
a considerable demand for it from the
restaurants and hotels, where its excellent qualities are highly appreciated.
We have taken a great deal of pains to
develop the thick, deep, rich colored and
finely flavored flesh of this sort, and
careful comparisons on our trial grounds
prove it to be unequalled, even by
"special selected seed" offered at very
high prices. Pkt. 5c; Oz. 15c; 2 Oz. 25c;
1/4 Lb. 40c; Lb. \$1.25

WATER MELON

To make certain of raising good Watermelons, it is essential that the plants have a good start and to this end it is important to prepare hills about eight feet apart, by thoroughly working into the soil an abundance of well rotted manure—hen manure, guano, or other forms rich in nitrogen, being most desirable. Over this highly manured soil put an inch or more of fresh earth and plant the seeds on this, covering them about an inch deep. It is important that the seed should not be planted before the ground becomes warm and dry, as the young plants are very sensitive to cold and wet. Put ten or twelve seeds in a hill. When the plants have formed the first pair of rough leaves, they should be thinned so as to leave two or three of the strongest and best to each hill,

Frequent watering of the plants with liquid manure will hasten the growth, thus diminishing the danger from insect pests. The best protection against blight and insect pests is to maintain a vigorous and continuous growth. It is desirable to change the location as often as practicable.

Harris' Earliest She extra early melon of excellent quality. Fruits exceptionally large for so early a variety, sweet and teuder. Seed black. The vines are vigorous and productive. One of the best varieties for northern latitudes. We have carefully observed this splendid variety in our We have carefully observed this splendid variety in our trials for several seasons and are convinced that it is the very best first early melon for the home garden. Pkt. 5c; Oz. 10c; 2 Oz. 20c; ¼ Lb. 30c; Lb. \$1.00

D.M. Ferry & Co's Sometimes sold as Ice Cream. One of the best early sorts for the Peerless home garden and for market gardeners who deliver direct to consumers. Vine moderately vigorous, hardy, productive. Fruits medium sized, oval, but somewhat uneven in shape, bright green, finely veined with a darker shade. Rind thin: flesh bright searlet, solid, crisp and very sweet. Seed white. Pkt. 5c; Oz. 10c; 2 Oz. 15c; W.Lh. 25c; Lh. 75c. 1/4 Lb. 25c: Lb. 75c.

Long Light leing Our stock of this sort is much better than that usually offered and superior to many strains offered as Gray Monarch, etc. Fruits uniformly long and large, a little irregular in shape, light green, slightly veined with a little darker shade. Flesh deep, rich red, and of splendid quality. Seed white. Pkt. 5c; Oz. 10c; 2 Oz. 15c; ¼ Lb. 25c; Lb. 75c.

Round Light Icing Fruit medium sized, nearly round greenish white, slightly veined or dotted with light green. Flesh bright, light red, very sweet and tender. Seed white. Pkt. 5c; Oz. 10c; 2 Oz. 15c; 1/4 Lb. 25c; Lb. 80c.

Dark Icing Fruit medium sized, nearly round, dark green, very indistinctly veined and nottled with Flesh very rich, bright red, sweet and of excellent quality. Seed white. Pkt. 5c; Oz. 10c; 2 Oz. 15c; 1/4 Lb. 25c; Lb. 80c.

Monte Cristo or Kleckley's Sweets for home wionte Cristo or Kieckiey's Sweets for home use or near markets. Vine vigorous and productive; fruits medium to large, oblong, tapering slightly towards the stem end, dark green, often showing fine russeting. Flesh very bright, rich red, exceedingly sweet. So crisp and tender that it will not stand shipping, the fruit bursting open if subjected to even a slight jar, or when the riud is penetrated with a knife. Seed white. Pkt. 5c; Oz. 10c; 2 Oz. 15c; ¼ Lb. 25c; Lb. 90c.

CHILIAN

HARRIS' FARLIEST

Florida Favorite A splendid melon of very large size and excellent quality. Fruits long, dark green, mottled and striped with lighter shade; rind thin but firm. Flesh very bright, deep red, very sweet and tender. Vines vigorous and productive. Seed white. Pkt. 5c; Oz. 10c; 2 Oz. 15c; ¼ Lb. 25c; Lb. 75c.

Alabama Sweet quality; very popular in the south where it is grown extensively for shipping. Color rather deep green, with dark, irregular striping. Rind thin but very tough; flesh bright red, fine grained and sweet. Fruits average a little thicker than Florida Favorite. Seed white. Pkt. 5c; Oz. 10c; 2 Oz. 15c; ½ Lb. 25c; Lb. 75c.

Tom Watson A large, long melon similar in shape, color and splendid quality to Monte Cristo but averaging larger in size and with a tougher rind, making it especially adapted for shipping. Vines vigorous and productive. Flesh rich red, sweet and tender. Seed white, more or less marked with brown. A comparatively new water melon which has become very popular in the south. (See cut and further description in Supplement, page 8) Pkt. 5c; Oz. 10c; 2 Oz. 20c; ¼ Lb. 30c; Lb. \$1.00

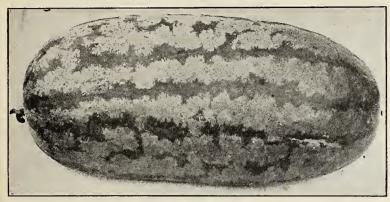

Ferry's Iceberg general shape, size and appearance it is similar to Kolb's Gem. but is distinctly darker and the skin where the melon rests on the ground is rich yellow instead of white as in that variety. It has a very firm, hard rind and is as good a shipper as Kolb's Gem but the flesh is much deeper colored, extends nearer to the rind, is more tender and sweet. Sometimes sold as Blue Gem. Seed black. The best dark colored round shipping melon yet produced. Pkt. 5c; Oz. 10c; 2 Oz. 15c; ½ Lb. 25c; Lb. 75c.

Kolb's Gem A very large, round or slightly oval melon, often flattened on the ends, marked with irregularly mottled stripes of dark and light green. Rind exceedingly hard and firm, making it one of the best round sorts for shipping. Flesh bright red solid, a little coarse, but sweet and tender. Vines vigorous and productive. Seed black. Pkt. 5c; Oz. 10c; 2 Oz. 15c; ½ Lb. 25c. Lb. 75c.

A new melon of splendid quality, already very popular on the Pacific coast and will doubtless take high rauk elsewhere as soon as it is more generally known. Fruits medium sized, nearly round or slightly oblong, skin rich very deep green, indistinctly mottled and striped with a lighter shade. Flesh decidedly bright vermilion-red; remarkably fine grained but firm and very sweet. Quality equalled by few and surpassed by none for the home garden. Desirable also for shiping and keeps exceptionally well. Seed white. Pkt. 5c; Oz. 10c; 2 Oz. 15c; ¼ Lb. 25c; Lb. 85c.

WATER MELON-Continued

Sweet Heart Introduced by us in 1894 and is very popular as a shipping melon particularly in the south. Vine vigorous and very productive, ripening its fruit evenly. Fruit of largest size, oval, very heavy, rind thin but firm; color very light green, very slightly veined with a little darker shade. Flesh bright red, firm but very tender and sweet. The fruit remains in good condition a long time after ripening. Seed black. Our stock will be found very uniform in shape, size and color. Pkt. 5c; Oz. 10c; 2 Oz. 15c; ¼ Lb. 25c; Lb. 75c.

GYPSY, OR GEORGIA RATTLESNAKE

Gypsy or Georgia largest, Attlesnake oldest and most pecially in the south. Fruit very long, of light green color, distinctly striped and blotched with a darker shade. Flesh bright scarlet, very sweet and tender. Vines large and vigorous. Seed nearly white. Pkt. 5c; Oz. 10c; 2 Oz. 15c; 1/4 Lb. 25c; Lb. 75c.

Triumph used largely for shipping. Fruit of largest size, nearly round, dark green, sometimes indistinctly striped with a lighter shade and has a thin and firm rind which makes it an excellent shipper. Flesh bright red and of good quality. The vine makes a strong and vigorous growth and can be depended upon under ordinarily favorable circumstances to set a large number of fruits. Seed black. Pkt. 5c; Oz. 10c; 2 Oz. 15c; ¼ Lb. 25c; Lb. 75c.

Medium sized, uniformly round, used only for preserves or pickles. Color dark green, distinctly striped and marbled with light green. Flesh white and solid but not at all suitable for eating raw. Seed red. Fruits mature late in the fall and in this condition can be kept a long time. Pkt. 5c; Oz. 10c; 2 Oz. 15c; ¼ Lb. 25c; Lb. 85c.

MUSHROOM The Mushroom is an edible fungus of which there are numerous varieties. We handle the ordinary changing to liver color. The mushroom produces "seed" or spores and there is developed a white, fibrous substance in broken threads, called spawn, which is developed and preserved in horse manure, pressed in the form of bricks. Mushrooms can be grown in cellars, in sheds, in hotbeds or sometimes in the open air, the great essential being a uniform degree of temperature and moisture. Our space is too limited here to give the necessary cultural directions, but these are published in book or pamphlet form. We can furnish, postpaid, for 35c., a book containing very complete directions for the culture of mushrooms. (See list inside of back cover)

PURE CULTURE MUSHROOM SPA WN. By a newly discovered process of selection and grafting, the spawn is scientifically propagated so that large, vigorous and finely flavored mushrooms are reproduced. The sort we offer is earlier, more productive and a marked improvement on wild spawn, either French or English. Brick (about 1¼ lbs.), postpaid 35c; 5 bricks, not prepaid, \$1.00

MUSTARD Mustard is not only used as a condiment but the green leaves are used as the ground will permit, in drills about eighteen inches apart, covering one-half inch deep. For succession, sow every few weeks till autumn. Water freely. In the south the seed may be sown in autumn and the plants used early in the spring as a salad and for greens.

White English Leaves comparatively small and smooth, deeply cut or divided and of bolts to seed. Leaves, when young, are mild and tender. Seed light yellow and larger than that of other varieties. Pkt. 5c; Oz. 10c; ¼ lb. 15c; Lb. 40c.

Southern Giant Curled crimped and frilled at edges. Plant upright or slightly spreading in growth. Highly esteemed in the south for its vigorous growth, hardiness and good quality. Seed small, reddish brown to nearly black. Pkt. 5c; Oz. 10c; 2 Oz. 15c; ¼ lb. 25c; Lb. 75c.

An excellent sort with remarks the south for its vigorous growth.

Large Smooth Leaved
An excellent sort with very large, light green, plain or comparatively smooth leaves, borne well above the ground. Plant of very quick growth, fairly upright when young becoming somewhat spreading at maturity. This sort is preferred by many as it is more easily prepared for the table than the rougher leaved varieties. Seed small, reddish brown to nearly black. Pkt. 5c; Oz. 10c; 2 Oz. 15c; ¼ Lb. 25c; Lb. 75c.

NASTURTIUM TALL MIXED GARDEN. Sometimes called Indian Cress. Grown not only for ornament but the beautiful orange and yellow flowers and the foliage are used for garnishing. The young leaves or shoots are excellent for salads. The green seed pools are greatly esteemed by many for use in mixed pickles. Early in spring sow, preferably in rather light soil, in rows three feet apart and two inches apart in the row, covering one inch deep. When the young plants are about four inches high thin to six inches apart in the row. The vines can be supported if so desired by stakes, strings or brush. Pkt. 5c; Oz. 10c; 2Oz. 15c; ¼ Lb. 25c; Lb. 75c. For other varieties of Nasturtium see page 79.

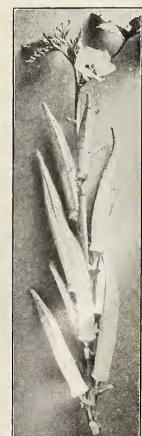

OKRA OR GUMBO
The young seed pods are used in soups, stews, catsups, etc. Highly esteemed in the south. After danger of frost is past, the ground being warm and in good condition, plant in rows about two and one-half feet apart, covering with about an inch of fine soil firmly pressed down. When about three inches high, thin to about one foot apart in the row. Cultivate and keep free from weeds. The pods are in best condition for use when from one to three inches long.

White Velvet
The plants are about three and one-half feet high, early maturing and very productive. Pods white, long, smooth and are tender until nearly full sized. Pkt. 5c; Oz. 10c; 2 Oz. 15c; ½ Lb. 20c; Lb. 60c.

Perkins' Mammoth Long Pod and productive. Pods deep green, very early slender, slightly corrugated, very tender and of good quality. Pkt. 5c; Oz. 10c; 2 Oz. 15c; ½ Lb. 60c.

Dwarf White and of good quality. Pkt. 5c; Oz. 10c; 2 Oz. 15c; ½ Lb. 20c; Lb. 60c.

Plants are about three and one-half feet high and very productive. Pods of medium length, greenish white, quite thick, slightly corrugated, tender Pkt. 5c; Oz. 10c; 2 Oz. 15c; ½ Lb. 20c; Lb. 60c.

OKRA. WHITE VELVET

ONION

The Onion not only contains considerable nutriment and has valuable medicinal properties, but is most useful in counteracting the bad effects of sedentary life. The disagreeable odor it imparts to the breath may be avoided in a great measure by thorough cooking, or by eating a few leaves of parsley.

In onion culture, thorough preparation of the ground, careful sowing and the best of after culture, though essential for a full yield, will avail nothing unless seed of the best quality he used. Given the same care and conditions, the product from two lots of onion seed of the same variety but of different quality may he so unequal in the quantity of merchantable onions that it would he more profitable to use the good seed though it cost twenty times as much as the other. Our equipment and experience enable us to produce onion seed that is unsurpassed. The seed we offer is the best obtainable. Although onions are often raised from sets and from division, by far the best and cheapest mode of production is from seed. The facility with which seed is sown and the superior bulbs it produces, recommend it for general use.

As early in spring as grounl can be worked, sow in rich soil, thoroughly pulverized and leveled, in rows fifteen inches apart, covering one-half inch deep. When the plants are well up cultivate, thin out as desired and keep free from weeds. When grown for bunching the rows need to be only about one foot apart and the plants thinned about one inch apart in the row. The same location may be used for a succession of years if the ground is kept rich by applications of well rotted manure or other suitable fertilizer and is thoroughly worked at proper intervals. Where climate permits seed may be sown early in winter. If onions are to be grown for the market the following suggestions should be given careful consideration.

HOW TO RAISE ONIONS FOR THE MARKET

THE SOIL. We prefer a soft, dark sandy loam, not too fine. This is much hetter if it has been cultivated with hoed crops, kept clean from weeds and well manured for two years previous, because if a sufficient quantity of manure to raise an ordinary soil to a proper degree of fertility is applied at once, it is likely to make the onions soft. The same result will follow if we sow on rank mucky ground or on that which is too wet and it is impossible to raise either a large or profitable crop on stiff clay, very light sand or gravel.

PREPARATION. Onions respond well to very liberal manuring. As much as forty loads of stock manure well composted or one ton of high grade commercial fertilizer per acre may he applied to good advantage. The stock manure should be spread and worked into the top soil in the fall but if commercial fertilizer is used it should be distributed and thoroughly worked into the top soil after plowing in the spring. A liberal use of potash is very beneficial to the crop especially when raw manure is used or if the soil is rank and mucky, as potash reduces the tendency to scallions or coarse necked bulbs. The top soil should be cleared of everything that will interfere with the best possible work with drill and wheel hoe. The whole ploughed soil should be well pulverized and worked with tools that leave the surface smooth and compact.

SOWING THE SEED. This should be done as soon as the ground can he made ready and can be done best hy a hand seed drill. This should be carefully adjusted to sow the desired quantity of seed about one-half inch deep. The quantity

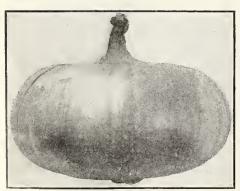

needed will vary with the soil, the seed used and the kind of onions desired. Thin seeding gives much larger onions than thick seeding. Four or five pounds per acre is the usual quantity useded to grow large onions. We prefer a drill that sows a very close row.

CULTIVATION. As soon as the young plants can be seen in the rows give a shallow working either with rake or some other tool that pulverizes well the whole top soil. Work the crop again in a few days with a hoe or tool that cuts the ground over, this time as closely as is possible to the row without injury to the young plants; follow as quickly as possible with a thorough hand weeding keeping in mind that a very small weed today is a large one next week. The ground should be cultivated once a week if possible and any remaining weeds pulled out by hand every two weeks For hest results these operations should be continued until the crop occupies the ground.

GATHERING. As soon as the tops die and fall the bulbs may be pulled and raked into small open windrows, turning every few days with a rake. At convenience cut off the tops half an inch to an inch from the bulbs and very soon afterward the bulbs may he picked up in crates and piled loose under cover. The large onion growers use a puller attachment to the wheel hoe that runs under the row of onions and lifts the bulbs. Where help can be procurred readily we find it much cheaper to top the onions with a rough edged case kuife and rake away the tops before pulling.

It will not do to store onions in large piles or masses, particularly in warm weather, or if they are the least moist, but if perfectly dry when gathered and stored in crates, they can be kept in fine condition till spring. The best way is to keep them dry, giving bottom ventilation if possible, and at a uniform temperature of about 32° to 34° Fr.

Extra Early Red Although the first of the red sorts to ripen, the bulbs are firm and keep remarkably well for so early a size. Skiu uniformly rich purplish red; moderately strong flavored and comes into use about a week or ten days earlier than Large Red Wethersfield. Flesh white with tinge of light purple. Succeeds in cool soils. Very desirable for early market use. Pkt. 5c; Oz. 15c; 2 Oz. 25c; ¼ Lb. 40c; Lb. \$1.25

EXTRA EARLY RED

Large Red Wethersfield This is the standard red vain the east, where immense crops are grown for shipment.
Bulbs large, flattened yet quite thick. Skin deep purplish red;
flesh light purplish white, moderately fine grained, rather
strong but of pleasant flavor. Very productive, one of the best
keepers and very popular for general cultivation. This medium
early or main crop variety does best on rich, moderately dry
soil, but on low muck land it is more apt to form large necks
than the Danvers. There is no hetter sort for poor and dry
soils. Pkt. 5c; Oz. 15c; 2 Oz. 25c; 4 Lb. 40c; Lb. \$1.25

LARGE RED WETHERSFIFLD

ONION-Continued

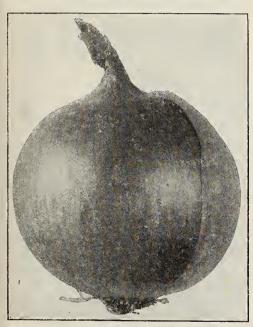

Southport Red Globe

The bulbs are of medium to large size, ideally globe shaped, with very smooth, glossy surface, very small neck and remarkably beautiful deep purplish red color. The flesh is white, tinged with light purple, mild, very fine grained and tender. One of the best keepers, well adapted for shipping. Our splendid stock of the medium early or main crop onion is the result of years of careful selection on our Oakview Stock Seed Farm and is unsurpassed by any. Pkt. 5c; Oz. 20c; 2 Oz. 35c; ¼ Lb. 60c; Lb. \$2.00

Large Yellow Dutch
The bulbs are large and quite flat. The skin is light yellow or straw or Strasburg colored, and the flesh creamy-white, mild and keeps well. Our stock of this carly variety, compared with most on the market, is distinctly superior in size of bulb, uniformity of shape and evenness of color. Pkt. 5c; Oz. 15c; 2 Oz. 25c; ½ Lb. 40c; Lb. \$1.25

Yellow Danvers

A productive and very extensively used early or main crop variety of medium size. The skin is light coppery yellow in color. The flesh is creamywhite, mild and of excellent flavor. The bulbs are flattened yet quite thick with small necks, ripen down quickly and very evenly and keep very well. This is still a standard, general crop, yellow onion where a strictly globe shaped bulb is not demanded. Pkt. 5c; Oz. 15c; 2 Oz. 25c; ¼ Lb. 40c; Lb. \$1.25

YELLOW GLOBE DANVERS

Yellow Globe Danvers

One of the most extensively used main crop yellow onions. Bulbs of medium to large size, uniformly globe shaped, with small neck, and ripen very evenly. Skin rich coppery yellow; flesh creamy white, crisp, and of mild and excellent flavor. Keeps very well; excellent for shipping. We have by careful selection and breeding developed a strain which has the ripening labit and small neck of the original Danvers and yet is more globular, thus giving larger yields and handsomer bulbs without sacrificing any of the good qualities of the original Danvers.

Pkt. 5c; Oz. 15c; 2 Oz. 25c; W.Lb. 40c; Lb. \$1.50

Michigan Yellow Globe The heaviest yield of onions black lands. On such soils it is found that a globe shaped onion with a somewhat flattened base gives the largest returns and to meet the demands of the professional onion growers located on such lands, we have developed this variety. The bulbs are large, uniformly globe shaped, with small necks; shoulder usually slightly sloping, base often distinctly flattened, the largest diameter below the center of the bulb. Color rich yellow with tinge of orange. Flesh creamy-white, mild and of very fine quality. A main crop sort that ripens down very evenly. Keeps very well and is excellent for shipping. No onion grower can afford to plant inferior seed when such as this can be procured. Pkt. 5c; Oz. 20c; 2 Oz. 35c; ¼ Lb. 60c; Lb. \$1.75

SOUTHPORT RED GLOBE

Southport Yellow Globe
This very hardy and exceedingly productive late or main crop variety is of the same general character and quality as the Southport Red Globe, but the color is a rich yellow. Bulbs large, globe-shaped with rather full shoulder, ripen down very evenly, keep well and are suitable for shipping. Flesh creamy-white, fine grained, and of mild and excellent flavor. Pkt. 5c; Oz. 20c; 2 Oz. 35c; ¼ Lb. 60c; Lb. \$1.75

Mammoth Yellow Spanish A very handsome late or or Prizetaker with shoulder and base slightly sloping. Skin is yellowish-brown or light yellow with slight tinge of brown; flesh creamy-white, very mild, tender and of excellent flavor. Keeps well if thoroughly ripened: very desirable for shipping. It is one of the best of the large European sorts that has become thoroughly acclimated in America and is exceptionally productive under proper conditions. If started very early in hotbed it will produce a mammoth onion the first season. Pkt. 5c; Oz. 20c; 2 Oz. 35c; ½ Lb. 60c; Lb. \$1.75

SOUTHPORT YELLOW GLOBE

NION-Continued

White Portugal or A medium sized onion of mild flavor and with beautiful, clear white skin. A favorite with many for use when young as a salad or bunching onion and for pickles. It usually matures about ten days earlier than White Globe and is fine for fall and early winter use. An excellent medium early sort for gardeners who do not care to plant more than one variety. Bulbs nearly round when of bunching size, somewhat flattened when mature. The best flattened white onion for northern latitudes. Pkt. 5c; Oz. 20c; 2 Oz. 35c; ½ Lb. 60c; Lb. \$2.00

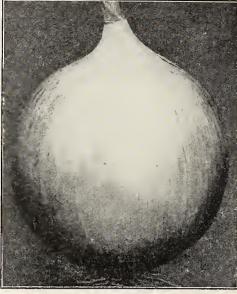

Pkt. 5c; Oz. 20c; 2 Oz. 35c; ¼ Lb. 60c; Lb. \$2.00

White Globe

A most desirable medium early or main crop variety for the home garden. Yields abundantly, producing medium to large, handsome and finely shaped, clear white bulbs. The flesh is firm, fine grained, quite mild in flavor and is more attractive than the colored sorts when cooked. Sometimes called Southport White Globe. Bulbs globe-shaped, full at the shoulder, rounded at the base, keep well and are desirable for shipping. To produce the beautifully white onious so much sought in every market, one must first of all have good seed; second, grow them well on rich lands; third, exercise great care in harvesting and curing the crop. In Southport they "cord" up the onions in long rows, the bulbs on the inside and cover with boards, so that the bulbs in the open air are well protected from rain or dew which would be sure to discolor them. We have by years of careful selection and breeding developed a strain which has no equal in uniformity and beauty of shape and color. Pkt. 5c; Oz. 25c; 2 Oz. 40c; ¼ Lb. 75c; Lb. \$2.25

IMPORTED ONIONS

They are particularly adapted to southern latitudes where they are sown in the fall or early spring. The best results are obtained by sowing in beds or boxes and transplanting.

Extra Early Barletta An extremely early maturing variety, white with silvery tinge and particularly desirable for pickling. Bulbs very small and quite similar to Queen. If seed is sown out of doors in spring in the usual manner and plants thinned about two inches apart they will produce bulbs one to two inches in diameter. If these bulbs are set out the following spring, or if plants are grown under glass in winter and set out in the spring, they will produce large onions. This variety and Queen are the ones most generally used in this country for producing the small pickling bulbs. For this purpose if the seed has been sown eight to ten seeds to the inch of drill, no thinning will be required. Growers usually plant the seed thickly in drills fifteen inches apart and use forty to fifty pounds to an acre. Pkt. 5c; Oz. 20c; 2 Oz. 35c; ¼ Lb. 60c; Lb. \$2.00

Queen are quite flattened but as grown for pickles are nearly round. The large sized bulbs attain a size of about two inches in diameter. Pkt. 5c; Oz. 20c; 2 Oz. 35c; ¼ Lb. 60c; Lb. \$1.75

Early Neapolitan Marzajola

Carly Neapolitan Marzajola An early and productive flat, white-skinned variety, desirable for early use and used for pickling. If seed is sown as soon as the ground can be worked, it will mature a crop early in the season. In the south the seed can be sown in autumn and large onions produced in March. Known also as Early May. Pkt. 5c; Oz. 15c; 2 Oz. 25c; ¼ Lb. 40c; Lb. \$1.50

Giant White Italian Tripoli Alarge, pure white, flat onion of mild and excellent flavor. This medium early and protain full size the seed should be sown very early in a hotbed and the young plants set out in rich soil. When grown under proper conditions the bulbs are often three to four inches across, with pure white skin. Pkt. 5c; Oz. 15c; 2 Oz. 25c; ½ Lb. 40c; Lb. \$1.50

Mammoth Silver King size. Slightly later maturing and rather a better keeper, making the sort more desirable for the fall market. A very productive flat variety with bulbs often four to five inches across, the largest of the white onions. The skin is silvery white. The flesh is white, very tender and mild flavored. Pkt. 5c; Oz. 15c; 2 Oz. 25c; ¼ Lb. 40c; Lb. \$1.50

To raise onion sets from seed, use good ground prepared as for large onions and sow the seed very thick in broad drills, using forty to sixty pounds per acre. If the seed is sown thin, the bulbs will not only be too large for sets but will not be of the right shape and if sown thick on poor land they will be necky or bottle shaped. Onion seed sown for sets may be planted somewhat later than if a crop of large bulbs is desired.

RED BOTTOM SETS. Treated precisely revealed by the second set of the results of the second set of the second second

RED BOTTOM SETS. Treated precisely as top onions are, setting them out in the spring instead of sowing seed. Per Lb. 25c. postpaid: 100 Lbs. \$10.00
YELLOW BOTTOM SETS. Like the preceding except in color and used in the same manner Per Lb. 25c. postpaid; 100 Lbs. \$10.00

100 Lbs. \$10.00

WHITE BOTTOM SETS. These do not keep as well as the red or yellow, but produce beautiful white onions early in the season. Per Lb. 30c. postpaid: 100 Lbs. \$12.00
Prices by the 100 lbs. of all onion sets are subject to fluctuations of the market. The price per single pound will hold good throughout the season, or as long as our stock lasts.

The 100 pound prices of Onion Sets are by freight or express at purchaser's expense for transportation.

PARSLEY

Very useful for flavoring soups and stews and for garnishing. The green leaves are used for flavoring or they may be dried crisp, rubbed to powder and kept in bottles until needed.

and kept in bottles until needed.'

Parsley succeeds the best on rich, mellow soil. The seed is even slower than parsnip in germinating and should be sown as early as possible in the spring, in drills one to two feet apart covering not more than one-half inch with fine soil firmly pressed down. When the plants are well up thin eight to twelve inches apart in the row. When the plants of the curled varieties are about three inches high cut off all the leaves; the plant will then start a new growth of leaves which will be brighter and better curled and later, if these turn dull or brown they can be cut in the same way; every cutting will result in improvement. sult in improvement.

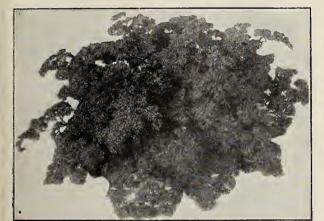

Plain The leaves of this variety are flat, deeply cut but not curled. Very desirable for flavoring soups and stews and for drying. It is a favorite on account of its very dark green leaves as well as its hardiness of plant. The curled sorts are more extensively used for garnishing. Pkt. 5c; Oz. 10c; 2 Oz. 15c; ¼ Lb. 25c; Lb. 90c.

Champion Moss Curled

This is a vigor ous, compact growing variety, excellent for garnishing and flavoring, and a handsome decorative plant.

Leaves very finely cut and so closely crisped or curled as to resemble bunches of moss. Owing to its uniformly fine deep green color and very attractive foliage, this is one of the most popular sorts for both the market and home garden. Pkt. 5c; Oz. 10c; 2 Oz. 15c; ½ Lb. 25c; Lb. 90c.

CHAMPION MOSS CURLED

ong White Dutch or Sugar
hardy and will keep well through the winter without protection. The roots are long, white, smooth, tender and of most excellent flavor. Much used for the table and suitable also for stock feeding. Pkt. 5c; Oz. 10c; 2 Oz. 15c; ¼ Lb. 25c; Lb. 75c. Long White Dutch or Sugar

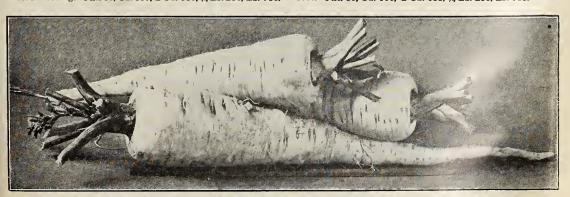

Hamburg or Rooted portion of this variety and resembles a small parsnip both in color and shape. Flesh white, a little dry and in flavor is similar to celeriac. The foliage is practically the same as that of Plain Parsley. The roots can be dug late in the fall and stored in sand for winter use. Extensively used for flavoring soups and stews. This variety is sometimes called Turnip Rooted. Pkt. 5c; Oz. 10c; 2 Oz. 20c; ¼ Lb. 30c; Lb. \$1.00

PARSNIP

The value of the Parsnip as a culinary vegetable is well known but is not generally appreciated at its full value for stock feeding. On favorable soil it yields an immense crop of roots, more nutritious than turnips and very valuable for dairy stock.

Parsnips are usually grown on deep, rich, sandy soil, but will make good roots on any soil which is deep, mellow and moderately rich. Fresh manure is apt to make the roots coarse and ill shaped. As the seed is sometimes slow and uneven in growth, it should be sown as early as possible in drills two and one-half feet apart; cover one-half inch deep and press the soil firmly over the seed. Give frequent cultivation and thin the plants to six inches apart in the row.

Hollow Crown or Guernsey long, with smooth white skin, uniform in shape, tender and of the best quality. The variety is easily distinguished by the leaves growing from the depression on top or crown of the root. Pkt. 5c; Oz. 10c; 2 Oz. 15c; ½ Lb. 25c; Lb. 75c.

HOLLOW CROWN

For early peas the soil should be light and warm, but for general crop a moderately heavy soil is better. Fresh manure and very rich or wet mucky soil should be avoided, as they cause a rank growth of vine at the cost of the quality of the peas; such soil is often the cause of early sorts maturing unevenly. Sow as early as possible a few of some early variety in warm, quick soil, prepared the fall before, planting in double rows six to eight have met with better success from sowing all the varieties comparatively early, depending for succession upon selecting sorts most important they may be treated in that way. Larger pods and more of them will be produced if the seed be planted in trenches three to six inches deep and covered with only one or two inches of soil; when the plants are five or six inches high fill the trench level with the surface; this will secure deep rooting, prevent mildew and prolong the bearing season. If the peas be covered to the full depth at first, or if water be allowed to stand in the trenches they will not germinate or grow well. All varieties growing more than one and one half feet do better if staked up or brushed when four to six inches high. This support is usually given by sharpened branches of trees set between the double rows.

By careful selection and growing we have Earliest of All or Alaska carllest of All of Alaska and growing we have developed a stock of this smooth blue pea of unequaled evenness in growth of vine and early maturity of pods which are filled with medium sized, bright green peas of good flavor. Vines of medium height, about two and one-half to three feet and of distinctive light color. Pods of good size, about two and one-half to two and three-fourths inches long. Seed small, smooth, and hluish green in color. Matures all the crop at once and is an iuvaluable variety for market gardeners and canners. Pkt. 10c; Pt. 25c; Qt. 35c; 4 Qts. \$1.25; Bu. \$6.50

Thomas Laxton A very early wrinkled variety of dium height, about three feet, similar to that of Gradus, but darker in color, hardier and more productive. Pods large, often four inches long, with square ends, similar to but larger, longer, and darker than those of Champion of England and as uniformly well filled. The green peas are very large, of fine deep color and unsurpassed in quality. We are certain that the earliues and productiveness of this pea ueed only to be known to make it one of the most popular sorts for the market and home garden, as in appearance and quality it is one of the very best varieties yet introduced. Pkt. 10c; Pt. 30c; Qt. 45c; 4 Qts. \$1.50; Bu. \$9.00 Bu. \$9.00

Gradus A very early, wrinkled pea. Vine similar in appearance to Telephone but of medium height, only about three to three and one-half feet. The pods are very large, about four and one-fourth inches long, very nearly as large as those of Telephone, uniformly well shaped, pointed, handsome and more attractive than those of the first earlies. Peas very large, of splendid quality and beautiful light greeu color which they retain after cooking. Practically the same as Prosperity. Pkt. 10c; Pt. 30c; Qt. 45c; 4 Qts. \$1.50; Bu. \$9.00

American Wonder The carliest of the dwarf, ally branching, about nine to twelve inches high and covered with well filled pods of medium size, about two and five-eighths to two and three-fourths inches long, containing five to eight large, exceedingly sweet, tender and well flavored peas. Seed medium sized, generally flattened, wrinkled and pale green. We have taken great pains in growing our stock and know it to be much better than that usually offered. Pkt. 10c; Pt. 25c; Qt. 40c; 4 Qts. \$1.50; Bu. \$7.50 Bu. \$7.50

Nott's Excelsior The best early, dwarf pea. It combines the good qualities of the American Wonder and Premium Gem peas. The vines are larger and more productive than American Wonder and earlier than Premium Gem and average about twelve inches high. Pods medium sized, about two and three-fourths inches long. The peas, in sweetness and quality, are unsurpassed. Seed medium sized, wrinkled, green and somewhat flattened. A most desirable sort for the market gardener and unsurpassed for the home garden. Pkt. 10c; Pt. 25c; Qt. 40c; 4 Qts. \$1.50; Bu. \$7.50

Sutton's Excelsior

An early, wrinkled pea, one of the largest podded of the dwarf varieties. It is also one of the most vigorous in growth of vine and is unsurpassed in quality. The pods mature very nearly as early as those of Nott's Excelsior but are broader and with the foliage distinctly lighter green. Pods large for so early a variety, two and three-fourths to three inches long. Vines about fourteen to sixteen inches high. Pkt. 10c; Pt. 30c; Qt. 45c; 4 Qts. \$1.50; Bu. \$9.00

LAXTONIAN

This very handsome wrinkled pea is the largest podded of the dwarf varieties on our list. The beautiful dark green pods are similar to Gradus in shape and splendid quality, are very nearly as large in size and mature a little earlier. The vines are vigorous and productive, averaging fifteen to eighteen inches high; foliage dark green; pods about four inches in length. Seed light green, large, wrinkled, flattened, irregular in shape. Pkt. 10c; Pt. 30c; Qt. 50c; 4 Qts. \$1.75; Bu. \$10.00

Premium Gem (Improved Little Gem) A very desirable early green wrinkled dwarf, variety similar to but better than McLean's Little Gem. The vine is very productive and grows to a height of from fifteen to eighteen inches. The pods are of medium size, about two and three-fourths inches long, and crowded with six to eight very large peas of fine quality. The seed is green, large, wrinkled, often flattened. Fkt. 10c; Pt. 25c; Qt. 40c; 4 Qts. \$1.50; Bu. \$7.50

If peas are ordered by mail or express prepaid add 10 cents per pint, 15 cents per quart for charges.

PEAS, CHAMPION OF ENGLAND

PEAS-SECOND EARLY VARIETIES

McLean's Advancer

A green, wrinkled variety of medium height, about two and three-fourths to three inches long, broad pods, about two and three-fourths to three inches long, which are abundantly produced and well filled to the ends. This pea is used very extensively by market gardeners because of its productiveness, the fine appearance of its pods and is popular with consumers on account of its quality. It is also largely used by canners. By careful selection we have developed a strain showing marked improvements in vigor of plant, size of pod and productiveness. Pkt 10cr Pt. 25c. Qt. 35c. 40ts \$1.25. Ru \$7.00. ductiveness. Pkt. 10c; Pt. 25c; Qt. 35c; 4 Qts. \$1.25; Bu. \$7.00

Vincs stout, of medium height, about two and one-half feet, bearing near the top a number of broad pods of medium size, about two and one-half to three inches long, filled with large peas that remain a long time in condition for use and which never become as hard as most sorts. The peas are of fine quality and will be preferred to any other by those who like a rich, marrow-like pea. Seed large, wrinkled and flattened. Pkt. 10c; Pt. 25c; Ot. 35c; 40ts \$1.25. Bu. \$7.00. pea. Seed large, wrinkled and Qt. 35c; 4 Qts. \$1.25; Bu. \$7.00

Bliss' Everbearing

ing at the top six to ten broad pods of medium height, about two and one-half feet, bearing at the top six to ten broad pods of medium size, about two and one-half to three inches long. If these are picked as they mature and the season and soil are favorable, the plant will throw out branches bearing pods which will mature in succession, thus prolonging the season. The peas are large and wrinkled, cook very quickly, are tender, of superior flavor and preferred by many to any other sort. Pkt. 10c; Pt. 25c; Qt. 35c; 4 Qts. \$1.25; Bu. \$7.00

Duke of Albany
darker in color of foliage and pods. Vines tall, about four and one-half to five feet high, vigorous and strong growing; pods of largest size, often four and one-half to five inches long, straight and thick, borne in great profusion and when in condition for picking, of a deep green color. There is an increasing demand for peas of this color and the productiveness of this variety makes it a very profitable sort for market gardeners while its splendid quality should give it a place in the home garden. In many localities this variety is sold as an improved strain of Telephone. Pkt. 10c; Pt. 25c; Qt. 40c; 4 Qts. \$1.50; Bu. \$7.50

The Admiral Vines tall and vigorous, about four feet bright green, about two and three-fourths inches long, crowded with six to nine peas of the very best quality and color. We know of no pea which remains palatable longer after it becomes large enough to use. Seed much wrinkled, of medium size, cream color. Owing to its great vigor, productiveness, fine color, quality and suitable size of the green peas, this variety is admirably adapted for canners use. Pkt. 10c; Pt. 25c; Qt. 35c; 4 Qts. \$1.25; Bu. \$7.00

This has become the leading pea with market gardeners whose trade appreciates fine appearance and high quality. Vines tall and vigorous, growing about four feet high, with large, coarse, light colored leaves and producing an abundance of pointed pods of largest size, often four and one-half to five inches long, attractive bright green, filled with very large peas which are tender, sweet and of excellent flavor. It comes into use soon after the Premium Gem and is one of the best sorts for either home or market. Pkt. 10c; Pt. 25c; Qt. 40c; 4 Qts. \$1.50; Bu. \$7.50 Telephone

Telegraph or Long
Island Mammoth
Island Mammoth
Island Mammoth
Islame and of dark green color; seed almost smooth. Vines tall, about four and one half inches long. A splendid sort for the market garden; will give good returns even under conditions that would cause most varieties to fail. Pkt. 10c; Pt. 25c; Qt. 35c; 4 Qts. \$1.25; Bu. \$7.00

Alderman This is in many respects the very best early main crop variety of the valuable Telephone type. The vines are tall growing, about four and one-half to five feet high, dark green, vigorous and exceedingly productive. Pods of largest size, often five to five and one-half inches long, dark green, similar to but a little larger and a shade darker in color than Duke of Albany and about the same in season. The peas are of largest size and unsurpassed in quality. Market gardeners are demanding the large podded, dark colored sorts which retain their fine appearance even after shipping a long distance. The Alderman answers these requirements and furthermore is the most productive variety of this class. We recommend it unreservedly. Pkt. 10c; Pt. 25c; Qt. 40c; 4 Qts. \$1.50; Bu. \$7.50 Pkt. 10c; Pt. 25c; Qt. 40c; 4 Qts. \$1.50; Bu. \$7.50

LATER VARIETIES

Improved Stratagem

Most stocks of the large podded, semi-dwarf, English varieties of peas have been so wanting in which comes true and is one of the best of the large podded sorts. Vines about two to two and one-half feet high, with medium dark green foliage. Pods very large, often four and one-quarter to four and one-half inches long, pointed, dark green, and uniformly filled with very large, dark green peas of the finest quality. Pkt. 10c; Pt. 25c; Qt. 40c; 4 Qts. \$1.50; Bu. \$8.00

Dwarf Champion This is proving wherever known a popular main crop sort for the market or home garden. The vines are of medium height, only about three feet high, vigorous, hardy, and unusually productive. Pols large, fully four inches long, broad, quite straight, deep green in color, handsome and very well filled with large peas which are tender and unsurpassed in quality. The stock we offer of this variety is very superior and we believe it will meet the requirements of the most critical trade. Pkt. 10c; Pt. 25c; Qt. 40c; 4 Qts. \$1.50; Bu. \$7.50

Horsford's Market Garden
height, about three feet, hardy and very productive, giving the greatest number of pods of any on our list. The foliage is dark green and the leaves are small. The pods are of medium size, about two and three-fourths inches long, each containing five to seven medium sized, sweet, dark green peas which retain well their color and sweetness after canning. Seed wrinkled and of medium size. Pkt. 10c; Pt. 25c; Qt. 35c; 4 Qts. \$1.25; Bu. \$7.00

Melting Sugar not generally known in this country but much used abroad in which the sweet, brittle and succulent pods have none of the tough, inner liming found in the ordinary varieties of garden peas. They are used in the same way as snap or string beans. The best of these edible podded sorts is the Melting Sugar of which we offer a very fine strain The pods are very large, four to four and one-half inches long, broad, often curved or twisted, and when young, stringless, very tender and finely flavored. The variety is rather late maturing, very prolific, strong growing, about four to five feet high with large light colored foliage. Seed medium to large, smooth, round, light yellowish white in color. We have given this variety especial attention and we believe the seed we offer is equal to the best obtainable. Pkt. 10c; Pt. 30c; Qt. 50c; 4 Qts. \$1.75; Bu. \$10.00

Champion of England

A very productive variety, universally admitted to be one of the richest and best flavored of the late peas. The vines are tall, about four to five feet high. Pods large, about three inches long. The seed is light green and wrinkled. Very inferior and mixed stocks of this sort are frequently offered but when the seed is as well grown and selected as that we offer we consider the variety equal in quality to any in cultivation and one of the best of its season, either for the home garden or market gardener. Pkt. 10c; Pt. 25c; Qt. 35c; 4 Qts. \$1.25; Bu. \$6.50

Large White Marrowfat variety are about five feet high and of strong growth. The pods are large, about three inches long, cylindrical, surface somewhat roughened, light colored and well filled; seed large, smooth, round and light creamy yellow. Excellent for summer use but is not as sweet and tender as most of the newer sorts, although undoubtedly one of the most productive of the garden varieties. Pkt. 10c; Pt. 15c; Qt. 25c; 4 Qts. 75c; Bu. \$5.00

Large Blackeye Marrowfat An excellent tall validly. It is a very prolific bearer of large pods, about three inches long. Seed large, smooth, round, light creamy yellow with black eye. One of the very best of the Marrowfat sorts. Pkt. 10c; Pt. 15c; Qt. 25c; 4 Qts. 75c; Bu. \$5.00

FIELD PEAS

Field Peas deserve more general attention for fodder than they now receive. In the north for dairy cows and for hogs, they are fully equal to corn, and about six weeks earlier. For cows, the crop should be cut and fed green. For hogs alone it can be used as pasturage. Field Peas can be sown either alone or with oats as early as the condition of the soil will permit. If the stubble from green winter rye or other crops cut in June he turned under and sown to mixed peas and oats, it will furnish a large amount of forage in August when grass pasture is usually short.

As fertilizer, field peas should be plowed under when in blossom. They will grow on land that will not produce clover.

No. 1 White and Common White, write for quotations.

If peas are ordered by mail or express prepaid add 10 cents per pint, 15 cents per quart for charges.

Peppers are most largely used for seasoning meat, and vegetable dishes; also for making chow chow and chili sauce. The culture is the same as for egg plaut and the plants need quite as much heat to perfect them. Sow seed early in hotbed, or about middle of spring in open seed bed, the soil being light and warm. When three inches high transplant in rows about two and one-half feet apart and two feet apart in the row. Cultivate and keep free from weeds. Guano, hen dung, or any other bird manure hoed into the surface soil when the plants are about six inches high, will undoubtedly increase the product.

Red Cherry A second early sort. Plant tall, bearing a profusion of round, bright red fruits which are very pungent when ripe. A very ornamental plant, when in fruit. Pkt. 5c; Oz. 30c; 2 Oz. 55c; 1/4 Lb. \$1.00; Lb. \$2.75

Red Chili Alate variety. Pods bright, rich red, about two inches long, one-third to one-half inch in diameter at the base, tapering to a sharp point and exceedingly pungent when ripe. Pkt. 5c; Oz. 30c; 2 Oz. 55c; ¼ Lb. \$1.00;

Long Red Cayenne A well known medium early variety having a slender, twisted and pointed pod about four inches long. Color deep green when fruit is young, bright red when ripe. Extremely strong and pungent flesh Pkt. 5c; Oz. 30c; 2 Oz. 55c; 1/4 Lb. \$1.00;

Large Bell or Bull Nose called Sweet Mountain, is very superior. Plant vigorous, about two feet high, compact and very productive, ripening its crop uniformly and early. The fruits are large, with thick, mild flesh of excellent quality for use in salads and mangoes or stuffed peppers. The color is deep green when fruit is young, bright crimson when ripe. Pkt. 5c; Oz. 35c; 2 Oz. 60c; ¼ Lb. \$1.00; Lb. \$3.50

Ruby King
An improved American variety, very large and attractive. The plant is about two and one-half feet high, vigorous, compact and productive. The fruits are often four to four and one-half inches long and of deep green color when young, bright red when ripe. The flesh is thick and mild flavored. One of the best varieties for mangoes or stuffed peppers. Pkt. 5c; Oz. 35c; 2 Oz. 60c; ¼ Lb. \$1.00; Lb. \$3.50

Giant Crimson

The earliest maturing of the extremely large, red sweet peppers and surpassed by none in evenness of size and shape. The plant is vigorous and upright, growing two and one-half to three feet high, larger than that of Chinese Giant and more productive. The fruits are of the largest size, ripen earlier than any of the other very large sorts and average heavier, as the flesh is exceptionally thick. Color deep green when fruit is young, deep crimson when matured; flavor very mild. Pkt. 5c; Oz. 45c; 2 Oz. 85c; ½ Lb. \$1.50; Lb. \$4.50

PEPPER, GIANT CRIMSON

Large Sweet Spanish

A late maturing and attractive, red, sweet pepper. Plant about two and one-half feet high, inches in length and about two inches in diameter, with very thick, mild flesh of excellent quality. Color deep green when fruit is young, rich red when ripe.

Pkt. 5c; Oz. 30c; 2 Oz. 55c; ½ Lb. \$1.00; Lb. \$3.00

PUMPKIN

Pumpkins are not so particular in regard to soil as melons or cucumbers, but are cultivated the same, though on a larger scale. They are raised between hills of coru or in fields by themselves, but more properly belong to the farm than the garden as they readily mix with and injure the quality of the finer squask. After danger of frost is over plant the seed in hills eight to ten feet apart each way, dropping about a dozen seeds in a hill. The soil should be made as rich as possible. If planted with corn two or three seeds a rod apart each way will be sufficient. When danger from bugs is past, thin to three plants to a hill.

Pie Fruits of medium size, nearly round; skin light yellow, smooth and covered with a fine gray netting. Flesh light yellow, very thick, sweet and finely flavored. Makes very delicious pies. Pkt. 5c; Oz. 10c; 2 Oz. 15c; ¼ Lb. 25c; Lb. 75c.

Sugar or New England Pie This variety is small, but of most excellent quality for pies. Fruits deep orange, eight to ten inches in diameter, round or somewhat flattened and slightly ribbed. Flesh rich deep vellow fine grained and variety of the control of the c yellow, fine grained and very sweet. Pkt. 5c; Oz. 10c; 2 Oz. 15c; ¼ Lb. 25c; Lb. 75c.

Large Yellow
to a large size and varies in shape from nearly round or slightly flattened to quite long. Flesh deep, rich yellow, fine grained and highly flavored. Often planted with corn. Known also as Field Pumpkin. Pkt. 5c; Oz. 10c; 2 Oz. 15c; 1/4 Lb. 20c; Lb. 50c.

Green Striped Cushaw Fruits very large, with crooked neck; color creamy white, irregularly striped or traced with green. Flesh light yellow, very thick, rather coarse but sweet. Very productive and popular in some sections. Pkt. 5c; Oz. 10c; 2 Oz. 15c; 1/4 Lb. 25c; Lb. 75c.

Sweet Cheese or Very popular in the south, but not as Well adapted to northern latitudes. Fruit Kentucky Field flattened, diameter usually about twice the length; skiu mottled light green and yellow, tender and of excellent quality. Pkt. 5c; Oz. 10c; 2 Oz. 15c; 1/4 Lb. 20c; Lb. 50c. By freight or express at purchaser's expense, \$30.00 per 100 lbs.

PUMPKIN, SUGAR OR NEW ENGLAND PIE

RADISH

For forcing sow in hotbed or under glass in rich, sandy soil made perfectly level. Scatter evenly over the surface from fifty to one hundred seeds to the square foot and cover with one-half inch of soil sifted on. Careful watering to keep soil moist, even, moderate temperature and good ventilation are required for rapid and best root development. If the bed is a good one the whole crop can be marketed in twenty-oue to forty days after planting.

For open ground culture sow in rich, sandy soil as soon in the spring as it is fit to work, in drills twelve to eighteen inches apart and thin out the plants to prevent crowding. A good dressing of nitrate of soda will greatly stimulate growth and insure tender, brittle roots. Successioual sowings from one week to ten days apart will keep up a supply. After the hot weather of summer begins, it is better to sow the summer and winter varieties, as they do not become tough and stringy nor pithy so quickly as the early sorts.

Radishes are subject to root maggots which make them useless for culinary purposes. We know of uo certain remedy for this pest. We have found that the best preventive measures are to avoid the use of rank manure and not to sow ou ground where radishes, turnips or cabbages were grown the year previous.

We have been very careful to secure the very best seed possible and there is none sold under other names which is better than that of the varieties we

Non Plus Ultra or Early Deep This is an excellent extra early forcing radish. The roots are small, nearly round and of bright scarlet color. Tops very small; flesh white, crisp and well flavored. One of the handsomest of the forcing varieties. Pkt. 5c; Oz. 10c; 2 Oz. 15c; ¼ Lb. 20c; Lb. 70c.

Prussian Globe The smallest forcing radish offered. Tops distinctly small; roots round or slightly flattened, very deep red in color and of the best quality. Remains in condition for use the longest of any of the first early forcing sorts and is a favorite where a very small, deep red radish is desired. Pkt. 5c; Oz. 10c; 2 Oz. 15c; ¼ Lb. 20c; Lb. 70c.

Early Scarlet The roots of this variety are slightly olive shaped, a rich, bright searlet in color; flesh white and tender, fit to pull Globe as early as Non Plus Ultra but larger when matured. We specially recommend this to gardeners as a large, first early forcing radish. It is also very desirable for first early planting outdoors. Pkt. 5c; Oz. 10c; 2 Oz. 15c; ¼ Lb. 20c; Lb. 70c.

Early Scarlet Turnip, A beautiful variety, bright scarlet with white tip, very nearly as early as Non Plus Ultra, White Tipped, Forcing has as small a top and may be plauted as closely. It is most attractive in appearance and caunot fail to give satisfaction as a forcing radish. Very popular as a market sort. Sold sometimes as Rosy Gem, Rapid Forcing, etc. Pkt. 5c; Oz. 10c; 2 Oz. 15c; 1/4 Lb. 20c; Lb. 70c.

1/4 Lb. 20c; Lb. 70c.

Early White Turnip

This is an early white radish, a little more flattened than Early Scarlet Turnip, and as offered by us, of smaller size and usually a little earlier maturing. While generally used for early outdoor planting, its very small tops and quick growth make it suitable for forcing. Roots about one inch in diameter, when mature. Flesh pure white, crisp and tender.

Pkt. 5c; Oz. 10c; 2 Oz. 15c; 1/4 Lb. 20c; Lb. 70c.

Early Scarlet Turnip

A round, red, turnip shaped radish with small tops and of very quick growth, deserving general cultivation on account of its rich, scarlet-red color and white, crisp and tender flesh. Roots often grow one inch long by one and one-eighth inches in diameter before becoming pithy. Very desirable for early outdoor planting, as well as for forcing. Pkt. 5c; Oz. 10c; 2 Oz. 15c; ¼Lb. 20c; Lb. 60c.

Early Scarlet Turnip, and a great favorite in many large markets White Tipped for early planting outdoors. It is but little later than give entire satisfaction where extreme earliness and small tops are not the chief considerations. Roots nearly round, slightly flattened on the under side. Color very deep scarlet with a distinctly white tip. Flesh white and of the best quality. The stock we offer is exceptionally attractive in its splendid coloring. The scarlet is unusually deep and affords a very distinct and pleasing contrast with the large, clear white tip. Pkt. 5c; Oz. 10c; 2 Oz. 15c; ¼ Lb. 20c; Lb. 70c. 1/4 Lb. 20c; Lb. 70c.

French Breakfast A quick growing, small, olive shaped radish about one and one-half inches long by five-eighths to three-fourths of an inch in diameter when fully grown. Color beautiful deep scarlet except a little clear white about the tip. Its small tops and earliness make it very desirable for growing under glass as well as for planting outdoors. A splendid variety for the table on account of its excellent quality and attractive color. Pkt. 5c; Oz. 10c; 2 Oz. 15c; 1/4 Lb. 20c; Lb. 70c.

Crimson Giant Turnip

A round radish of exceptionally large size for so early a variety. The root is nearly globe-shaped of beautiful crimson-earmine color and most excellent quality, often growing one and three-fourths inches in diameter hefore becoming pithy. A very desirable variety for general outdoor planting, and also suitable for forcing where a very large, round radish is wanted. It remains in condition a remarkably long time for so early a radish. Pkt. 5c; Oz. 10c; 2 Oz. 15c; ½ Lb. 25c; Lb. 75c.

EARLY SCARLET TURNIP, WHITE TIPPED

RADISH-Continued

Half Long Deep Scarlet

The roots of this desirable early variety are of a deep, rich red color and are olive shaped or half long with a somewhat tapering point. Tops comparatively small. Flesh very white, crisp and tender, and does not become pithy as soon as most other carly sorts. Roots when mature about two and one-half to three inches long. Pkt. 5c; Oz. 10c; 2 Oz. 15c; ¼ Lb. 25c; Lb. 75c.

Long Brightest Scarlet, One of the brightest and handsomest scarlet radishes known and a decided improvement White Tipped in earliness and color over other varieties of this class. Roots mature in about twenty-five days from the time of planting and continue in good condition until fully grown when they are as large in diameter but a little shorter than Early Long Scarlet; has a small top and can be used for forcing. Pkt. 5c; Oz. 10c; 2 Oz. 15c; ¼ Lb. 20c; Lb. 70c.

Early Long Scarlet, This is a standard, most excellent sort either for Short Top, Improved comparatively small. Roots smooth, slender, uniform in shape and a very attractive bright red in color. They grow about one-third out of the ground and continue crisp and tender until fully matured, when they are about six inches long. This is the variety which is grown so extensively in Petite Cote, Ontario, where the finest radishes in America are grown. Pkt. 5c; Oz. 10c; 2 Oz. 15c; ¼ Lb. 20c; Lb. 60c.

Wood's Early Frame
Scarlet Short Top, but is one of the very best sorts for first crop out of doors.

Pkt. 5c; Oz. 10c; 2 Oz. 15c; 1/4 Lb. 20c; Lb. 60c.

Cincinnati Market Pery similar to Early Long Scarlet, Short Top, Immains a little longer in condition for use. Roots slender, and before becoming pithy often six to seven inches long by about five-eighths of an inch in diameter at shoulder. Pkt. 5c; Oz. 10c; 2 Oz. 15c; 4 Lb. 20c; Lb. 70c.

Improved Chartier

This American variety is one of the very best long radishes for general planting outdoors. Tops of mediathes the preach a diameter of about one and one-fourth inches, thus affording good roots for a long time. The roots are rather long, averaging seven to eight inches when mature, scarlet rose im color, shading into white at the tip. Pkt. 5c; Oz. 10c; 2 Oz. 15c; ¼ Lb. 20c; Lb. 70c.

Farly Golden

Matures quickly, has a small top and neck and resists the summer heat better than the early scarlet or white kinds. Roots oval, about one and one-half inches long by about one bright, light yellow in color and of excellent quality. Our stock is grown from selected roots and is very fine. Pkt. 5c; Oz. 10c; 2 Oz. 15c; ¼ Lb. 20c; Lb. 70c. A very attractive, pure white radish, the earliest of the long, white summer sorts and of most excellent quality. The roots are somewhat shorter, with smaller tops then Long, White

FRENCH BREAKFAST

shorter, with smaller tops than Long White Short Top Improved Vienna and mature a little earlier. Roots when mature five to six inches long by about one half to five-eighths of an inch in diameter. One of the most desirable varieties for outdoor summer planting. It is also adapted for forcing. Pkt. 5c; Oz. 10c; 2 Oz. 15c; ¼ Lb. 20c; Lb. 70c.

Long White Vienna white, summer radish of most excellent quality. Tops are of medium size. Roots pure white, slender, smooth and averaging when mature six to seven inches long by about five-eighths to seven-eighths of an inch in diameter at thickest part. Flesh very crisp and tender. It matures shortly after Wood's Early Frame. Pkt. 5c; Oz. 10c; 2 Oz. 15c; 1/4 Lb. 20c; Lb. 70c.

Golden Globe This variety is of quick growth, affording crisp and tender radishes even in the hottest climate and is extensively grown in the south. Root uniformly globe-shaped, with skin golden yellow in color; about two inches long by two and one-fourth inches in diameter when mature. Pkt. 5c; Oz. 10c; 2 Oz. 15c; ¼ Lb. 20c; Lb. 70c.

Large White Summer Turnip
Root round, smooth, white and attractive, two to three inches in diameter when mature; flesh crisp, firm and rather pungent in flavor.
Pkt. 5c; Oz. 10c; 2 Oz. 15c; ¼ Lb. 20c; Lb. 70c.

White Strasburg is in good condition for use and continues crisp until matured when the roots are four to six inches long by one and one-half to two inches iu diameter. This is considered one of the best large, white summer sorts. The roots remain in condition for use much longer than the early varieties. Pkt. 5c; Oz. 10c; 2 Oz. 15c; ¼ Lb. 20c; Lb. 70c.

Early White Giant Stuttgart in diameter, top shaped; skin white: flesh white and crisp and uot becoming pithy until very late, so that those not used as a summer radish can be stored for winter use. Pkt. 5c; Oz. 10c; 2 Oz. 15c; 1/4 Lb. 20c; Lb. 70c.

RADISH—Continued

WINTER VARIETIES

Seed for winter radishes should be sown about the first of August in rich, warm, sandy loam, in rows about twenty inches apart, covering half an inch deep. When well up thin to three inches apart in the row and give frequent cultivation. For winter use, the roots should be pulled and packed in damp sand and stored in a cool cellar.

Scarlet China

Roots cylindrical, or largest near the bottom, stump rooted, blunt at both ends. Skin smooth, bright deep rose. Flesh white, firm, crisp and pungent. Tops moderately large with leaves distinctly cut and divided; leaf-stems timged with rose. Roots usually four to five inches long by about one and one-half to two inches in diameter when fully mature, sometimes growing considerably thicker. Very extensively used for fall and winter. Known also as Chinese Rose. Pkt. 5c; Oz. 10c; 2 Oz. 15c; ¼ Lb. 20c; Lb. 70c.

Celestial Sold also as Chinese White Winter. Roots long, cylindrical, with beautiful white skin and flesh, the whitest and usually the least pungent of the winter varieties; when fully mature six to nine inches long by about two and one-half inches in diameter. Flesh compact

and erisp. Pkt. 5c; Oz. 10c; 2 Oz. 15c; 1/4 Lb. 25c; Lb. 75c.

California Mammoth
Roots white and when fully mature nine to White China twelve inches long by three to four inches in diameter just below the shoulder, tapering regularly to the tip. Flesh firm, crisp, decidedly pungent but well flavored, keeping well through the winter. The variety matures later than Celestial and the roots are not as mild in flavor but they attain a larger size under favorable conditions and sometimes keep a little better. Pkt. 5c; Oz. 10c; 2 Oz. 15c; ¼ Lb. 25c; Lb. 75c.

Round Black Spanish Roots round, sometimes slightly top shaped, three or four inches in diameter; skin black, flesh white, very compact and pungent, but well flavored. Keeps well through the winter. Pkt. 5c; Oz. 10c; 2 Oz. 15c; ¼ Lb. 20c; Lb. 70c.

Half Long Black Winter Grayish black skin and crisp. pungent but well flavored white flesh. Roots four to five inches long and one and one-half to two inches in diameter, sometimes approaching stumprooted form at maturity. This variety is intermediate in shape between the Round and the Long Black Spanish, and seems to combine the good qualities of both. Pkt. 5c; Oz. 10c; 2 Oz. 15c; ¼ Lb. 25c; Lb. 80c. 1/4 Lb. 25c; Lb. 80c.

Long Black Spanish One of the latest and hardiest long radishes, especially adapted for winter use. Roots rather long, thick, almost black, with white flesh of firm texture, decidedly pungent but well flavored. The roots when mature are usually seven to nine inches long by two to three inches in diameter at thickest part. Pkt. 5c; Oz. 10c; 2 Oz. 15c; ½ Lb. 25c; Lb. 75c. One of the latest and Lb. 75c.

RADISH, CELESTIAL

RHUBARB or Pie Plant

Rhubarb, also known as Pie Plant, or Wine Plant, is the earliest spring vegetable and is grown for its leaf stalks which are extensively used for pies and sauce.

Rhubarb succeeds best in deep, somewhat retentive soil and the richer this is and the deeper it is stirred, the better. Sow in drills an inch deep and thin out the plants to six inches apart. In the fall transplant into very highly manured and deeply stirred soil, setting them four to six feet apart each way and give a dressing of coarse manure every spring. The stalks should not be plucked until the second year. When a blossom stalk appears, it should be cut back well into the ground and the plant never allowed to exhaust itself by running to seed. Our seed is saved from selected plants of the Linnæus, Victoria, Giant and other improved sorts, but like the seeds of fruit trees, rhubarb seed cannot be relied upon to reproduce the same varieties.

SEED—Pkt. 5c; Oz. 15c; 2 Oz. 25c; ¼ Lb. 40c; Lb. \$1.25 ROOTS—by mail, prepaid, 15c each; by express, not prepaid, \$1.25 per dozen.

RADISH, HALF LONG BLACK WINTER ROQUETTE A hardy annual, the leaves of which are long, smooth and glossy and when young are used like mustard for salads. When in condition for use the plants are from eight to ten inches high. Sow the seed in shallow drills about sixteen inches apart, in early spring and for succession every few weeks thereafter. Water freely. The young leaves will be ready for cutting in about six weeks from time of planting. Pkt. 5c; Oz. 15c; 2 Oz. 25c; 1/4 Lb. 40c; Lb. \$1.25

SALSIFY or Vegetable Oyster

One of the most desirable winter vegetables. The roots when cooked are very palatable and nutritious and are served in a variety of ways. The flavor is similar to oysters. Salsify succeeds best in a light, well enriched soil, which should be stirred to a good depth. Coarse and fresh manure should be avoided, as it will surely cause the roots to grow uneven and ill-shaped. Sow early and quite deep, giving the general culture recommended for parsnip. The roots are perfectly hardy and may remain out all winter, but should be dug early in spring, as they deteriorate rapidly after growth commences. Frost does not injure the roots, but before the ground freezes a quantity for winter use may be stored in a pit or in a very cool cellar.

Mammoth Sandwich Island This variety is large and strong growing with long, smooth, white, tapering roots, and gardeners' use. Pkt 50:02 20:20 2 gardeners' use. Pkt. 5c; Oz. 20c; 2 Oz. 35c; 1/4 Lb. 60c; Lb. \$2.00

SORREL The improved varieties of Sorrel when well grown and cooked like spinach make a palatable dish. Sow in drills early in spring and thin the seedlings to six or eight inches apart in the row. One may commence cutting in about two months and the plants will continue in full bearing from three to four years.

Large Leaved French The best garden variety, having large, pale green leaves of fine quality. Pkt. 5c; Oz. 15c; 2Oz. 25c; 1/4 Lb. 40c; Lb. \$1.50

SPINACH

No plant makes more palatable and nutritious greens than spinach when properly prepared.

when properly prepared.

Seed should he planted in very rich ground, the richer the better.

Sow in drills sixteen to twenty inches apart and thin to about six inches apart when the leaves are an inch wide. All should he cut before hot weather, while young and tender. For early spring use so early in autumn and protect the plants with a light covering of leaves or straw, or plant as soon as the land can be worked in the spring. Under favorable conditions the leaves may be large enough for eating in eight weeks. South of Cincinnati spinach can be grown through the winter with very little or no covering.

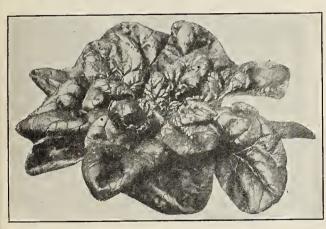

Savoy Leaved Also known as Bloomsdale. A very early vafore arly spring use. The plant is of upright growth, with thick, glossy, dark green leaves of medium size, pointed but quite broad, and crumpled or blistered like those of Savoy cabbage. Seed round. It is hardy and grows rapidly to a suitable size for use, running to seed quickly in warm weather. Pkt. 5c; Oz. 10c; 44 Lb. 15c; Lb. 40c.

W. Lb. 15c; Lb. 40c.

Broad Flanders variety. Leaves hright green, broad and thick with long petiole; usually broad arrow shaped but sometimes rounded; surface fairly smooth or sometimes slightly crumpled. A most desirable hunching sort for market gardeners.

Pkt. 5c; Oz. 10c; W. Lb. 15c; Lb. 35c.

Thick Leaved, Round Seeded A desirable variety for popular with market gardeners. Plant large and vigorous. Leaves large, thick, fleshy and bright green in color. Seed round. Pkt. 5c; Oz. 10c; ¼ Lb. 15c; Lb. 35c.

VICTORIA

Improved Thick Leaved A variety which forming a cluster of very large, slightly crumpled leaves of deep green color and good quality. Leaves usually broad arrow shaped but sometimes rounded. Season medium early. Seed round. Pkt. 5c; Oz. 10c; ¼ Lb. 15c; Lb. 35c.

Early Giant Thick Leaved and early maturing sort, with very large, thick leaves of fine, deep green color. Leaves usually rounded or broad arrow shaped; surface fairly smooth or slightly crumpled. Seed round. One of the most desirable medium early varieties. Pkt. 5c; Oz. 10c; ¼ Lb. 15c; Lb. 40c.

Victoria An excellent sort, forming a very large, exceedingly thick, very dark green leaf slightly crumpled in the center. Plant large, compact, procumbent; season intermediate. Leaves usually blunt or rounded at end but sometimes broad arrow shaped. Seed round. The variety becomes fit for use nearly as early as any, remaining so much longer than most kinds and cannot fail to please, whether grown for the market or home garden. Pkt. 5c; Oz. 10c; 1/4 Lb. 15c; Lb. 40c.

Long Season similar to Savoy Leaved hut considerably larger and hroader in leaf. less crumpled and very much longer standing. Seed round. One of the very best for early spring and successional planting. Pkt. 5c; Oz. 10c; ¼ Lb. 15c; Lb. 45c.

SAVOY LEAVED

Long Standing An improved round seeded strain of excellent quality; season comparatively late but after reaching maturity it remains in condition for use much longer than most sorts. Plant very large, becoming rather procumbent when mature; leaves usually very broad arrow shaped or rounded, comparatively smooth and dark, rich green. Very popular with market gardeners. Pkt. 5c; Oz. 10c; ¼ Lb. 15c; Lb. 35c.

Long Standing Prickly
improved strain of
the long standing type of spinach that matures a
little later than the round seeded sorts. The plant
is very large at maturity, very vigorous and hardy,
and yields a large quantity of medium sized leaves,
which are usually rounded at end, quite thick and
uniformly dark green. Seed prickly. Usually planted
in the fall, but also well adapted for spring use,
Sometimes called Prickly Winter. Pkt. 5c; Oz. 10c;
¼ Lb. 15c; Lb. 45c.

New Zealand (Tetragonia expansa) Unlike true spinach in type and in that it thrives during hot weather and in any soil rich or poor. The tender shoots are of good quality and may be ent throughout the summer. The plant hecomes very large and spreading; leaves small, broad but pointed. Plant three or four seeds in hills two feet apart each way. Germination of seed can be hastened by soaking in warm water twenty-four hours. Pkt. 5c; Oz. 10c; 2 Oz. 15c; ¼ Lb. 25c; Lb. 80c.

LONG SEASON

SOUASH

One of the most nutritious and valuable of garden vegetables. The summer varieties come to the table early in the season, while the fall and winter sorts can be had from August until the following spring. The winter varieties are very well adapted for stock feeding and we heartily recommend them for that purpose.

Squash plants are very tender and sensitive to cold and so planting must be delayed until settled warm weather. squasic plants are very tender and sensitive to coid and so planting must be delayed until settled warm weather. General methods of culture are the same as for cucumbers and melons, but squash is less particular as to soil. Summer varieties should be planted four to six feet apart each way and winter sorts eight to ten. Three plants are sufficient for a hill. In gathering the winter sorts care should be taken not to bruise or break the stem from the squash, as the slightest injury will increase the liability to decay. Winter squashes should be stored in a moderately warm, dry place and the temperature kept as even as possible. For those who desire very early squashes, seed can be planted in boxes, and transplanted.

Insect pests that attack the vines when small, such as the striped beetle, may be kept off by frequent dustings with air slaked lime, soot or sifted ashes diluted with fine road earth. For the large squash bug, the best remedy is a kerosene emulsion.

SUMMER VARIETIES

Long Island White Bush The earliest of the squashes. The vines are vigorous and very productive. The fruits are rather small and often nearly spherical, thick, with only a slight indication of a scallop. The skin is white, flesh tender and of good quality. Our stock of this variety is very uniform. Pkt. 5c; Oz. 10c; 2 Oz. 15c; 1/4 Lb. 25c; Lb. 85c.

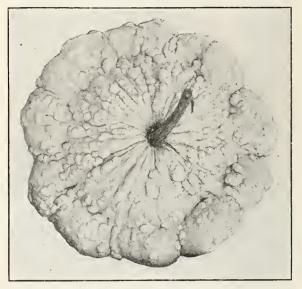

Mammoth White Bush Scallop An early somewhat flattened, scalloped bush squash, of largest size and the handsomest of the summer varieties. The fruit is uniformly warted and a beautiful. clear waxy white, instead of the yellowish white so often seen in the old Early White Bush Scallop. The stock we offer of this variety is exceptionally true to type. Pkt. 5c; Oz. 10c; 2Oz. 15c; ¼ Lb. 25c; Lb. 90c.

Early White Bush Scallop

Somewhat flattened, scalloped bush squash of medium size. The color is creamy white with comparatively smooth surface. The vines are vigorous and very productive. This variety is also known as Patty Pan or Cymling. Pkt. 5c; Oz. 10c; 2 Oz. 15c; 1/4 Lb. 25c; Lb. 85c.

Early Yellow Bush Scallop somewhat Larly I ellow Bush Scallop somewhat flattened, scalloped bush squash of largest size. Skin deep orange; flesh pale yellow and of very good flavor. We have developed a strain of the old Yellow Bush Scallop which is fully as productive but uniformly larger and flatter than the old stock and has a very small seed cavity. Its superiority is so great that we would be justified by prevailing custom in renaming it. Pkt. 5c; Oz. 10c; 2 Oz. 15c; ¼ Lb. 25c; Lb. 85c.

White Summer Crookneck Introduced by us in size and shape to the Summer Crookneck, but of an ivory white color and unsurpassed in quality. When fully grown twelve to sixteen inches long, with crooked neck and surface moderately warted. We recommend this sort as one of the less of the summer varieties. Put 50.00-100. moderately warted. We recommend this sort as one of the best of the summer varieties. Pkt. 5c; Oz. 10c; 2 Oz. 15c; 1/4 Lb. 25c; Lb. 85c.

MAMMOTH WHITE BUSH SCALLOP

Mammoth Summer Crookneck The largest and one of the earliest of the crookneck summer squashes. Vines of bush habit, large and more vigorous than Summer Crookneck. Fruits when mature are very large, often one and one-half to two feet long, with exceedingly warted surface. The color is deep yellow. Its large size and attractive color make this variety a favorite with market gardeners. Pkt. 5c; Oz. 10c; 2 Oz. 15c; ¹/₄ Lb. 25c; Lb. 90c.

Summer Crookneck

The old standard sort, early and very productive. It matures the bulk of its crop a little earlier than the Manmoth Sumner Crookneck. The fruits when Manmoth Summer Crook-neck. The fruits when fully grown are about one foot long, with uni-formly crooked neck and surface densely warted. The color is bright yellow. The shell is very hard when fruit is ripe Pkt. 5c; 0z. 10c; 2 0z. 15c; ½ Lb. 25c; Lb. 85c.

Italian Vegetable

Italian Vegetable Marrow (Cocozella di Marrow Napoli) Vines of bush habit, producing large, much elongated fruits, dark green at first but as they mature becoming marbled with yellow and lighter green instripes. Fruits in best condition for the table when six to eight inches long, but can be used when much larger. The young and tender fruits when sliced and fried in oil constitute a vegetable deheavy very popular, especially in Naples. Pkt. 5c; Oz. 10c; 2 Oz. 15c; 14 Lb. 25c; Lb. 90c. Lb. 90c.

SUMMER CROOKNECK

SOUASH-AUTUMN AND WINTER

DELICIOUS

Hubbard One of the best of the winter squashes. Vines vigorous and very productive. Fruit large, heavy, moderately warted, with very hard shell. Skin uniformly dark bronze green. Flesh bright orange-yellow, fine grained, thick, dry and richly flavored. Cau be kept in good condition until spring. It is esteemed by many to be as good baked as the sweet potato. Our stock is carefully selected in regard to quality of the flesh and color of the shell and is much superior to

color of the shell and to that sold as Chicago Warted or Warty Hubbard. Pkt. 5c; Oz. 15c; 2 Oz. 25c; ½ Lb. 40c; Lb. \$1.25

TOBACCO

The seed should be sown as early as possible after danger of frost is over. It is customary to over. It is customary to burn a quautity of brush and rubbish in the spring on the ground intended for the seed bed; then dig and pulverize the earth and mix with the ashes, after which the seed may be sown and covered very lightly. When the plants are about six inches high, transplant into rows four or five feet apart each way. Cultivate thoroughly with plow and hoe.

Delicious squash is particularly excellent in quality and in that respect it is now by many considered even better than the Hubbard which has been so long looked upon as the standard. Delicious is a fall and winter variety of medium size. The fruits are moderately hard, usually dark green but sometimes lighter in color and mottled, and are without any hard shell. The flesh is thick, very fine grained and bright yellow in color. Even when somewhat immature this squash is in condition tor use and of finest flavor. Although when first introduced a little uneven in shape and exterior color, we have by continued and careful selection made a marked improvement in uniformity of type and we believe the seed we offer is equal to the best obtainable. Pkt. 5c; Oz. 15c; 2 Oz. 25c; ½ Lb. 40c; Lb. \$1.25 Delicious

Boston Marrow This is a very productive fall and winter vaioston Iviarrow ive fall and winter variety of medium to large size, oval shape, and thin skin. The fruits when ripe are bright orange with a shading of light cream color. The fresh is of rich salmon yellow color, fine graiued and of excellent flavor, but not as dry as the Hubbard. Pkt. 5c; Oz. 10c; 2 Oz. 15c; ¼ Lb. 25c; Lb. 85c.

Golden Hubbard

The viues of this variety are vigorous and very productive. The fruits are of medium size, weighing from six to eight pounds and in shape are like the Hubbard, although in condition for use decidedly earlier. They are wonderfully long keepers and can be held over in good condition for spring use.

The shell is moderately warted, hard, strong and of a beautiful orange-red color, except for a bit of olive-green on the blossom end. The flesh is deep orange, dry, fine grained and richly flavored. A very superior table variety. Pkt. 5c; Oz. 15c; 2 Oz. 25c; ¼ Lb. 40c; Lb. \$1.25

HUBBARD SQUASH

STERLING. Very early. Fine for wrappers, cutters and fillers. Pkt. 5c; Oz. 25c; 2 Oz. 40c; ½ Lb. 75c; Lb. \$2.50

SWEET ORONOCO. For first class plug fillers. Makes when sun cured the best natural chewing leaf. Pkt. 5c; Oz. 25c; 2 Oz. 40c; ½ Lb. 75c; Lb. \$2.50

WHITE BURLEY. A favorite for plug fillers and wrappers. Pkt. 5c; Oz. 30c; 2 Oz. 55c; ½ Lb. \$1.00; Lb. \$3.00

BRADLEY BROAD LEAF. A popular variety for exports, manufacturing and cigars. Pkt. 5c; Oz. 25c; 2 Oz. 40c; ½ Lb. 75c; Lb. \$2.50

PERSIAN ROSE. A high grade manufacturing variety. Pkt. 5c; Oz. 30c; 2 Oz. 55c; ½ Lb. \$1.00; Lb. \$3.00

BIG HAVANA. A hybrid Havana or Cuban seed leaf. A heavy cropper, and the earliest cigar variety. Pkt. 5c; Oz. 25c; 2 Oz. 40c; ¼ Lb. 75c; Lb. \$2.50

SUMATRA. Produces cigar wrappers of the highest quality; popular with Florida growers. Pkt. 5c; Oz. 50c; 2 Oz. 85c; 4 Lb. \$1.50; Lb. \$5.00

CONNECTICUT SEED LEAF. A hardy cigar variety, well adapted to growing in the middle and northern states. Pkt. 5c; Oz. 20c; 2 Oz. 35c; 1/4 Lb. 60c; Lb. \$2.00

HAVANA. Leaf very thin, fine texture. Much used for cigar wrappers. Pkt. 5c; Oz. 40c; 2 Oz. 75c; 1/4 Lb. \$1.25; Lb. \$4.00

TOMATO

Tomatoes do best on light, warm, not over rich soil and success depends largely upon securing a rapid, vigorous and unchecked growth during the early part of the season. Sow in hotbed from six to eight weeks before they can be set out of doors, which is when danger from frost is past, when the plants have four leaves transplant into shallow boxes or cold-frames, setting them four or five inches apart; give plenty of air and endeavor to secure a vigorous but steady and healthy growth, so that at the time of setting in the open ground they will be strong and stocky. Even a slight check while the plants are small will materially diminish their productiveness. Set out of doors as soon as danger from frost is over, but before doing so harden off the plants by gradually exposing them to the night air and by the withdrawal of water until the wood becomes hard and the leaves thick and of a dark green color. Transplant carefully and cultivate well as long as the vines will permit.

To insure best results in respect to early ripening as well as the amount and perfection of fruit, it is advisable to train up and trim the vines, especially if the patch is rather small. When the plants have been properly started and are six to ten inches high they will begin to throw out branches. Select the largest and most vigorous of these and pinch off all others except this one and the main stem. Care must be exercised not to pinch off the fruiting branches which, as they appear, can be distinguished by the buds that are formed very early. In a short time these two remaining branches will become equally vigorous and as ordinary varieties will grow four to six feet high during the season, they should be securely tied at intervals of about ten inches to a long stake, preferably two inches square, which has been securely set in near the root of the vine.

Fruit will set to almost any height desired if all side branches are kept trimmed off at intervals of a week. By such a method of training and trimming the fruits are kept clear from the ground and with free access of sunlight they ripen much earlier; the vitality, otherwise exhausted in superfluous branches and leaves, is utilized in forming fruits of largest size, greatest perfection of shape and best quality. For further cultural directions see books listed on inside of back cover.

All our Tomato seeds are from seed stocks carefully selected and saved by ourselves. We challenge comparison of our stocks with any offered.

Known also as Essex Early Hybrid. The vine is large, hardy and productive, ripening its first fruits very early, although not an extra early variety. The fruits are purplish pink, invariably round, smooth and of good size, free from cracks and stand shipment well. The fiesh is solid and of excellent flavor. Pkt. 5c; Oz. 25c; 2 Oz. 40c; ¼ Lb. 75c; Lb. \$2.50

Early Michigan A second early, bright red variety of the best quality. Vine vigorous and productive. Fruits of medium size, very smooth and of very attractive crimson-scarlet color. Pkt. 5c; Oz. 25c; 2 Oz. 40c; ¼ Lb. 75c; Lb. \$2.50

Livingston's Globe
A large, purplish pink, globe-shaped or very nearly round tomato of excellent quality. Vine very vigorous and productive. The fruits are rather uneven in size but are very smooth and mature a little earlier than most main crop varieties. Pkt. 5c; Oz. 30c; 2 Oz. 55c; ¼ Lb. \$1.00; Lb. \$3.25

Beauty large, vigorous and very productive. Fruits large, purplish pink, exceptionally smooth and uniform in size, very solid and of excellent quality. The variety ripens about midseason. Pkt. 5c; Oz. 25c; 2 Oz. 40c; ¼ Lb. 75c; Lb. \$2.50

Perfection
Vine large, vigorous and productive. Fruits nearly round, uniformly smooth and even in size. Ripens about midseason. Pkt. 5c; Oz. 25c; 2 Oz. 40c; 1/4 Lb. 75c; Lb. \$2.25

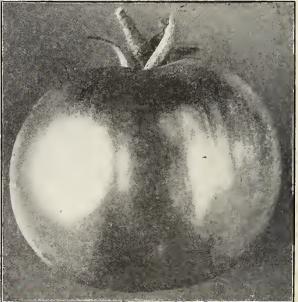

EARLIANA

Earliana our straiu of this most valuable first early sort is earlier and decidedly superior to much that is sold as Sparks' Earliana, and the extreme earliness of its large, smooth fruits makes it a particularly profitable tomato for market gardeners. Vine small but vigorous and productive. Fruits deep searlet, medium to large, nearly round and exceptionally smooth for so early a variety. The fruit is borne in clusters near the base of the plant and the bulk of the crop ripeus very early. Pkt. 5c; Oz. 30c; 2 Oz. 55c; ¼ Lb. \$1.00; Lb. \$3.25

June Pink
An extra early, purplish pink tomato similar to the popular searlet fruited Earliana in growth of vine, shape and size of fruits and time of maturing. A valuable variety for market gardeners who want a very early, purplish pink tomato. Pkt. 5c; Oz. 30c; 2 Oz. 55c; 1/4 Lb. \$1.00; Lb. \$3.00

Chalk's Early Jewel tomatoes yet introduced. Vine vigorous and very productive. Fruits deep scarlet-red, nearly round or somewhat flattened, smooth, of large size and most excellent quality. They ripen very early and the pickings continue through a long season. Unsurpassed for the home garden. Pkt. 5c; Oz. 30c; 2 Oz. 55c; ½ Lb. \$1.00; Lb. \$3.25

Early Detroit us five years ago, is the largest and best of the early purplish pink tomatoes. The vine is vigorous and very productive. The fruits are very smooth uniform in size, nearly globe-shaped, firm, and of excellent quality. One of the most valuable shipping tomatoes yet produced. (See further description in Supplement, page 10) Pkt. 5c; Oz. 35c; 2 Oz. 60c; ½ Lb. \$1.00; Lb. \$3.50

EARLY DETROIT

TOMATO—Continued

Pkt. 5c; Oz. 30c; 2 Oz. 55c; 1/4 Lb. \$1.00;

Magnus producing purplish pink fruits of very large size; much smoother than most of the large fruited sorts and matures earlier. Pkt. 5c; Oz. 30c; 2 Oz. 55c; 1/4 Lb. \$1.00; Lb. \$2.75

Matchless in the east. Fruits large, very smooth and symmetrical, ripening well to stem. Flesh rich, bright red in color and of fine quality, although possibly not quite as firm as Improved Trophy or Stone. Pkt. 5c; Oz. 30c; 2 Oz. 55c; ½ Lb. \$1.00; Lb. \$2.75

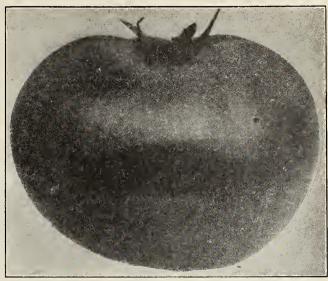

One of the largest and most solid, late, hright red varieties. Unsurpassed for slicing and canning. Vine large, vigorous and very productive. Fruits deep scarlet, nearly round or slightly flattened, exceptionally smooth and uniform in size. Our stock is distinctly superior to most of that offered under this name, being larger, smoother, more uniform and better colore i. Pkt. 5c; Oz. 25c; 2 Oz. 40c; ½ Lb. 75c; Lb. \$2.50

Ponderosa A purplish pink tomato of the largest size. Vine vigorous and very productive. Fruits very solid, with exceptionally few seeds, fairly smooth and considered of very good quality, especially by those who prefer a tomato quite free from acid. Ripens ahout midseason. Very desirable for slicing. Pkt. 5c; Oz. 50c; 2 Oz. 85c; 1/4 Lb. \$1.50; Lb. \$5.00

Coreless bright scarlet, main crop or late to-mato. Fruits very solid, almost entirely free from green core and with little or no depression at stem end, making the variety especially desirable for slicing, canning and shipping. Vines very vigorous, blight resistant and productive. Pkt. 5c; Oz. 30c; 2 Oz. 55c; ¼ Lb. \$1.00; Lb. \$3.00

Buckeye State
One of the hest late purplish pink varieties. Vine very strong growing and vigorous and growers in some sections of the south claim that it is hlight proof. It should he given more room than most. Fruits very large, round, smooth and firm. An excellent shipper. Pkt. 5c; Oz. 30c; 2 Oz. 55c; ¼ Lb. \$1.00; Lb. \$2.75

Dwarf Stone While maturing with the later sorts the bright red fruits are of good color, exceedingly smooth and very solid. We consider this the hest of the large fruited dwarf tomatoes. Pkt. 5c; Oz. 30c; 2 Oz. 55c; 1/4 Lb. \$1.00; Lb. \$3.25

REALITY

Dwarf Champion Sometimes sold as the "Tree Tomato." A second early, purplish pink variety, especially desirable where garden space is limited. Vine ahout two feet high, vigorous, upright and compact growing. Fruits medium sized, exceptionally smooth and of very good quality. Our stock is a very superior strain with more even, smoother fruit than the original. Pkt. 5c; Oz. 30c; 2 Oz. 55c; ¼ Lb. \$1.00; Lb. \$3.25

Golden Queen ful golden yellow, sometimes with a slight blush of red, as smooth and well shaped as the best of the red varieties and of superior flavor. Pkt. 5c; Oz. 30c; 2 Oz. 55c; ¼ Lb. \$1.00; Lb. \$3.00

Peach
Desirable for preserving, eating from the hand or for table decoration. Fruits resemble a peach in shape and size and the color a light terra cotta red with a delicate hloom; flesh tender and of good flavor. Pkt. 5c; Oz. 30c; 2 Oz. 55c; ½ Lb. \$1.00; Lb. \$3.00

WHITE APPLE. The fruits are about one and one-half inches in diameter, round, perfectly smooth and of yellowish white color. Flesh very mildly flavored and delicate. Pkt. 5c;

very mildly flavored and delicate. Pkt. 5c; Oz. 30c; 2 Oz. 55c; ½ Lb. \$1.00; Lb. \$3.00

RED PEAR. Used for preserves and to make "tomato figs." Fruits bright red, distinctly pear shaped and of excellent flavor. Our stock is the true pear shaped and not the larger red plum tomato often sold under this name. Pkt. 5c; Oz. 30c; 2 Oz. 55c; ½ Lb. \$1.00; Lb. \$3.00

Lb. \$3.00
YELLOW PEAR. Fruits similar to the Red Pear, but of rich, clear, yellow color and quite distinct from the variety sometimes sold under this name. Pkt. 5c; Oz. 30c; 2 Oz. 55c; ¼ Lb. \$1.00; Lb. \$3.00
YELLOW PLUM. Fruits plum shaped, of clear, deep yellow color; flesh yellow and finely flavored. Much esteemed for preserves. Pkt. 5c; Oz. 30c; 2 Oz. 55c; ¼ Lb. \$1.00; Lb. \$3.00
FED CHERRY Fruits small, ahout five-eighths

Lb. \$3.00

RED CHERRY. Fruits small, ahout five-eighths of an inch in diameter, perfectly round and smooth. Fine for pickles and preserves. Pkt. 5c; Oz. 30c; 2 Oz. 55c; ¼ Lb. \$1.00; Lb. \$3.00

FLLOW CHERRY. This variety differs from Red Cherry in color only. Pkt. 5c; Oz. 30c; 2 Oz. 55c; ¼ Lb. \$1.00; Lb. \$3.00

Z Uz. 55c; ¼ Lb. \$1.00; Lb. \$3.00 YELLOW HUSK OR GROUND CHERRY. Very sweet, mild flavor; used for preserves. Vines low and spreading. Fruits small, about one-half inch in diameter, enclosed in a loose husk. The seed we offer is that of the true Yellow Ground Cherry, not the purple fruited sort which is scarcely edible. Pkt. 5c; Oz. 30c; 2 Oz. 55c; ¼ Lb. \$1.00; Lb. \$3.00

TURNIP

The value of Turnips and Ruta Bagas for feeding stock in fall and winter is not fully appreciated, as they are much liked by all kinds of stock and serve to keep them in good condition. They should not be fed, however, in large quantities to milch cows, or the flavor of the milk will be disagreeably affected. We earnestly recommend that farmers increase their sowings largely, for we are sure the crop will prove remunerative.

Both of these wholesome vegetables are very easily affected in their form and flavor by soil, climate, and mode of culture. There are a great many varieties, but our list comprises the best for the garden and farm.

For summer use sow early in spring in light, rich or new soil, in drills one and one-half to two feet apart according to the size of the variety and cover one-half inch deep, or sow broadcast, but in either case be sure to have the ground rich and freshly stirred. Thin early and keep free from weeds so that the young plants will not be checked in growth. Any overcrowding will result in rough and poorly flavored roots. It is important to get the spring and summer crop started very early so that the turnips may have time to grow to sufficient size before hot weather causes them to become tough and bitter.

In the middle and western states sow for fall and main crop from the middle June to the first of August and in the manner given for spring sowing. In the field, turnips are often sown broadcast, though in most cases better results are obtained by drill culture; good results from broadcast sowing are often obtained on new and burned over land where the weeds are not likely to be troublesome.

For winter keeping, store the turnips in a cool cellar and cover with sand or turf to keep them fresh. Another method is to put them in a pit dug in dry soil where there will be no danger of water standing and to cover with straw overlaid with earth sufficiently deep to keep out frost. Thus protected, turnips will keep well till spring

Extra Early White Milan

Tows can be planted close together. Roots clear white, very smooth, flat and are of best quality when only about two inches in diameter. Flesh clear white, mild, sweet and tenier. Very desirable for early use. Pkt. 5c; Oz. 15c; 2 Oz. 25c; 1/4 Lb. 40c; Lb. \$1.25

Extra Early Purple Top Milan Similar to Extra Early White Milan, except that the roots are a little flatter and an attractive purplered on the upper portion. All in all, the Milan turnips leave nothing more to be desired in the way of an extra early garden turnip. Pkt. 5c; Oz. 15c; 2 Oz. 25c; ½ Lb. 40c; Lb. \$1.25

White Egg an early, oval or egg-shaped variety with smooth, clear white roots of medium size which grow half out of the ground. The tops are small with leaves distinctly cut. The flesh is clear white, firm, fine grained and sweet. The roots when in best condition for use are usually about two inches in diameter and about three and one-half inches long. Pkt. 5c; Oz. 10c; 2 Oz. 15c; 1/4 Lb. 25c; Lb. 75c.

Early White Flat Dutch, Strap Leaved Avery early, white turnip.

extensively used for the table, especially in the southern states. The leaves are entire and upright in growth. The roots are of medium size, flat, very white fleshed, fine grained and sweet. The roots when in best condition for table use are about two and one-half inches in diameter. This variety is

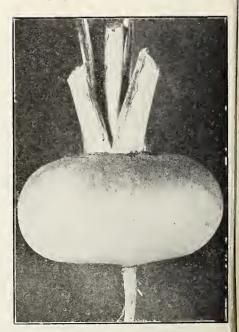

also grown as a field crop. Pkt. 5c; Oz. 10c; 2 Oz. 15c; 1/4 Lb. 25c; Lb. 75c. Early Purple Top, Strap Leaved variety, very extensively used for the table. The leaves are few, entire, upright in growth. The roots are flat, of medium size, purple or dark red above ground, white below. The flesh is white, fine grained and tender. Roots when in best condition for table we are

tion for table use are about two and one-half inches in diameter, but can be grown much larger for stock feeding. Also known as Early Red Top, Strap Leaved Pkt. 5c; Oz. 10c; 2 Oz. 15c; ¼ Lb. 25c; Lb. 75c.

EARLY WHITE FLAT DUTCH, STRAP LEAVED

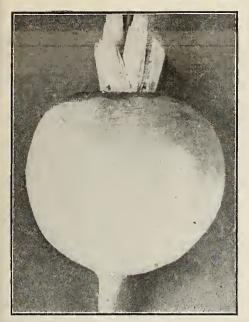

Top White ty is globular in shape, of good size and very attractive, appearance. The roots when in best condition for the table are about three inches in diameter, but cau be grown much larger for stock feeding. This sort keeps well for so early a variety and is one of the best for market use Sometimes known as Red Top White Globe. Pkt. 5c; Oz. 10c; 2 Oz. 15c; ¼ Lb. 25c; Lb. 75c. 2 Oz. 15c; 1/4 Lb. 25c; Lb. 75c.

Cow Horn, or Long White little shade of green at the top of the root, which is long and carrot-like in form, cylindrical but usually ending in a point, and slightly crooked. The roots are often twelve to fifteen inches long by about two and one-half inches in diameter and grow about three inches out of the ground. The flesh is fine grained and well flavored, and for table use is in best condition when the roots are about two inches in diameter. Desirable for stock feeding and has obtained considerable favor as a market sort. The variety is of very rapid growth and well adapted for fall and early winter use. Pkt. 5c; Oz. 10c; 2 Oz. 15c; ¼ Lb. 25c; Lb. 75c.

EARLY PURPLE TOP. STRAP LEAVED

TURNIP-Continued

PURPLE TOP WHITE GLOBE

Sweet This is a medium German large white

white turnip, somewhat globular in shape, remarkably solid in textnre, sweet and of very good quality. The roots are in best condition for table use when four to five inches in diameter, but can be grown much larger for stock feeding. It requires a long season for maturing and should be season for matur-ing and should be sown a month earlier than the flat turnips, but flat turnips, but can be kept in good condition well into

the winter, in this respect resembling a Ruta Baga. Pkt. 5c; Oz. 10c; 2 Oz. 15c; ¼ Lb. 25c; Lb. 75c.

Seven Top

Cnltivated extensively in the south for the tops which are used for greens. In many sections it is a favorite green feed for stock and its use like Rape for a pasture croo is quite general. It is very hardy and the growth usnally continues throughout the winter. The variety is not generally depended on for the root since the tops are produced so abundantly. Pkt. 5c; Oz. 10c; 2 Oz. 15c; ¼ Lb. 20c; Lb. 70c.

Southern Prize
Suthern Prize
Suthern Prize
Suthern Prize
Superior to Seven Top as usually sold and extensively grown in the south where the tops firmish an abundance of cuttings. These are valued highly for salad or greens. The roots of Southern Prize are valuable as well as the tops, being remarkably large, symmetrical and excellent for feeding stock. A favorite for forage in the Virginias and Carolinas where it usually thrives throughout the winter without protection. Pkt. 5c; Oz. 10c; 2 Oz. 15c; ¼ Lb. 25c; Lb. 75c.

YELLOW FLESHED VARIETIES

Large Amber Globe One of the best yellow fleshed varieties, Roots of large size and of globular

WHITE GLOBE

Large White Norfolk Usually grown for feeding stock, and although a little coarse in texture it is of good quality for the table, but for the latter purpose is in best condition when about four inches in diameter. Roots of largest size, smooth, globe-shaped or slightly flattened and very white. It is allowed to stand out during the winter in the south where the tops are used for greens. Pkt. 5c; Oz. 10c; 2 Oz. 15c; ¼ Lb. 20c; Lb. 70c.

Pomeranean White Globe One of the most productive kinds and in good, rich soil roots will frequently grow to twelve pounds in weight. It is globeshaped or slightly flattened; skin very white and smooth. Used for stock feeding; also good for table use if pulled when the roots are not more than four to five inches in diameter. Where the winters are mild the tops are used for greens. Pkt. 5c; Oz. 10c; 2 Oz. 15c; ½ Lb. 20c;

ORANGE JELLY OR GOLDEN BALL

of grobular shape. Skin clear yellow except the top which is tinged with green. Flesh light yellow, fine grained and sweet. The variety keeps well and is a good cropper. Pkt. 5c; Oz. 10c; 2 Oz. 15c; 14 Lb. 20c; Lb. 70c.

Yellow Stone
Roots of medium size, uniformly globular and perfect in shape; skin smooth and of atof very good quality. The roots are suitable for table use when three to four inches in diameter, but are more generally used for stock feeding. Pkt. 5c; Oz. 10c; 2 Oz. 15c; ½ Lb. 25c; Lb. 75c.

Yellow Globe Around, smooth, light yellow thrnip of medium size, The flesh is crisp, firm and of very good quality for the table or for stock feeding. The roots are in best condition for table use when three to four inches in diameter. This sort keeps well and is a good cropper. Pkt. 5c; Oz. 10c; 2 Oz. 15c; '4 Lb. 25c; Lb. 75c.

Orange Jelly or Golden Ball of the most delicately flavored of the yellow fleshed turnips. The tops are small. The roots are medium sized, round, very smooth and with deeper yellow skin than most of this class. The flesh is firm, crisp and of most excellent quality. The roots are in best condition for table use when about three inches in diameter. This variety is of quick growth, adapted to spring as well as fall planting, and keeps exceptionally well. Known also as Robertson's Golden Ball. Pkt. 5c; Oz. 10c; 2 Oz. 15c; ½ Lb. 20c; Lb. 70c.

Purple Top Yellow ing, yellow fleshed turnip. The roots Aberdeen are yellow with purple top. The flesh is pale yellow in color, of very firm texture, approaching the Ruta Baga in this regard, but tender and sweet. Since it requires a longer time to mature, the seed should be sown about two weeks earlier than most sorts. The variety is hardy, productive and especially valuable for stock feeding. Unequalled for its long keeping qualities and therefore particularly desirable for late winter and syning use Plet 5c. 02, 10c. 20, 7. 15c. 44 L. 20c. Lb. 65c. and spring use. Pkt. 5c; Oz. 10c; 2 Oz. 15c; 1/4 Lb. 20c; Lb. 65c.

RUTA BAGA OR SWEDE

Uses and value much the same as turnip. Sow from the middle of June to the middle of July, in ground previously enriched with well rotted manure, in drills about two and one-half feet apart, covering about one-half inch deep. Thin the young plants eight to twelve inches apart in the row. When the roots are full grown and before hard freezing weather, pull them, cut off the tops and store in a root cellar or pit. Ruta Bagas are some times sown broadcast and left to take chances with the weeds but the grown is selden a spaces. Success though crossionally or

but the crop is seldom a success, though occasionally on new clearings free from weed seed, fair results are obtained.

American Purple Top or Top Yellow ruta baga of American orgin, and much shorter neck than is usually found, while the roots are a little more globular, grow to a large size and are of the finest quality. Excellent for table use and stock feeding. We consider this one of the most desirable sorts. Pkt. 5c; Oz. 10c; 2 Oz. 15c; ½ Lb. 20c; Lb. 65c.

Bangholm
An excellent variety both in shape and quality. The roots are of large size, slightly tankard shaped, with small neck, fewor no side roots and yields well. The skin is yellow with purple top. The flesh is yellow, sweet and solid. Pkt. 5c; Oz. 10c; 2 Oz. 15c; 14.14. 20.14.60.

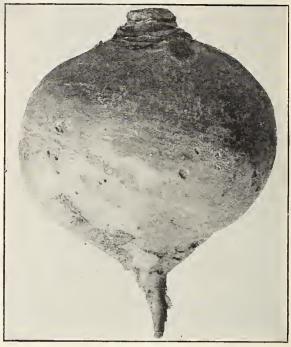

Carter's Imperial Purple Top
feeding stock Roots nearly round; skin yellow with
purple top; flesh yellow, solid and sweet. Hardy and yields
heavily. Pkt. 5c; Oz. 10c; 2 Oz. 15c; 4 Lb. 20c; Lb. 60c.

D. M. Ferry & Co's Improved A hardy and Purple Top Yellow variety having but little neck. The roots are large, slightly oblong or nearly globe shaped, fairly smooth, with comparatively small tap root. Color purplish-red above ground and bright yellow beneath. Flesh yellow, of solid texture, crisp and of very good quality. Pkt. 5c; Oz. 10c; 2 Oz. 15c; ½ Lb. 20c; Lb. 65c.

Drummond's An improved strain of Purple Top shape, color and quality. This variety is considered by many an excellent table sort. Pkt. 5c; Oz. 10c; 2 Oz. 15c; 1/4 Lb. 20c; Lb. 60c.

MONARCH OR TANKARD

PURPLE TOP YELLOW

Hall's Westbury
A large, round variety, a good keeper and very heavy yielder, which it is claimed will endure dry weather better than most sorts. Skin yellow with purple top. Flesh yellow, firm and of good quality. Pkt. 5c; Oz. 10c; 2 Oz. 15c; 1/4 Lb. 20c; Lb. 65c.

Hartley's Bronze Top short neck. The color of the root is yellow, with bronze green top. This is a favorite sort in Canada and can be depended upon to give good satisfaction. Similar to Kangaroo. Pkt. 5c; Oz. 10c; 2 Oz. 15c; ¼ Lb. 20c; Lb. 65c.

Laing's Purple Top large, oval swede with very short neck. The color of the root is yellow, with bronze green top. This is a favorite sort in Canada and can be depended upon to give good satisfaction. Similar to Kangaroo. Pkt. 5c; Oz. 10c; 2 Oz. 1b. 65c.

Laing's Purple Top globe shaped; skin purplish red above ground, yellow beneath; flesh yellow: necks small: tops distinctly strap leaved or entire. Pkt. 5c; Oz. 10c; 2 Oz. 15c; ¼ Lb. 20c; Lb. 65c.

Monarch or Tankard large, tankard shaped roots with relatively small neck and tops. The color is purplish red above ground, yellow beneath. The flesh is very solid. fine grained and sweet. Sometimes sold as Elephant or Jumbo. Pkt. 5c; Oz. 10c; 2 Oz. 15c; 1/4 Lb. 20c; Lb. 65c.

Perfection White
ed. Vigorous in growth
ed. Vigorous in growth
fleshed sorts. While valuable for stock feeding, the white flesh is so excellent in quality that it is particularly desirable for table use. Pkt. 5c;
Oz. 10c; 2 Oz. 15c; ½ Lb. 25c; Lb. 75c.

Skirving's King of Swedes
size the yellow flesh is of most excellent quality. Pkt. 5c; Oz. 10c;
2 Oz. 15c; ½ Lb. 20c; Lb. 60c.

Roots large spherical purple on ton dorse.

Sutton's Champion Roots large, spherical, purple on top; flesh yellow, tender and sweet. It is an excellent keeper and yields heavily. Pkt. 5c; Oz. 10c; 2 Oz. 15c; ¼ Lb. 20c;

Universal or Canadian Gem above ground, yellow beneath; very small in top and neck; flesh yellow and of excellent quality. Exceptionally hardy and vigorous. Sometimes sold as Century. Pkt. 5c; Oz. 10c; 2 Oz. 15c; ¼ Lb. 20c; Lb. 65c.

White Swede or An excellent keeper and very desirable either for the table or for stock. Tops small; strap Sweet Russian leaker. Root very large, nearly globe shaped with small neck; color white with a shade of green or bronze at the top. Flesh white, very firm and sweet. Sometimes sold as Sweet Russian Turnip. Pkt. 5c; Oz. 10c; 2 Oz. 15c; 1/4 Lb. 20c; Lb. 65c.

Yellow Swede Shape oblong, dull reddish color above ground but yellow underneath; is hardier than the common turnip and will keep solid until spring. Pkt. 5c; Oz. 10c; 2 Oz. 15c; 1/4 Lb. 20c; Lb. 60c.

AROMATIC, MEDICINAL AND POT HERBS Most of the varieties of herbs thrive best on sandy soil and some are stronger and better flavored when grown on that which ather poor. In all cases the soil should be carefully prepared and well cultivated, as the young plants are for the most part

delicate and easily choked out by weeds

Sow as early as the ground can be made ready, in drills sixteen to eighteen inches apart, taking pains that the soil is fine and pressed firmly over the seed, or they may be planted as a second crop—the seeds sown in beds in April and the plants set out in June. Most of them should be cut when in bloom, wilted in the sun and thoroughly dried in the shade.

ANISE (Pimpinella anisum) An annual herb cultivated principally for its seeds which have a fragrant, agreeable smell and a pleasant taste; used medicinally for aromatic cordials, colic and nausea. The leaves are sometimes used for garnishing and flavoring. Plant of slender upright growth with deeply cut foliage; flowers small, yellowish white, borne in large loose umbels. Pkt. 5c; Oz. 10c; 2 Oz. 20c; ¼ Lb. 30c; Lb. \$1.00

BALM (Melissa officinalis) A perennial herb, easily propagated by division of the root or from seed. The leaves have a fragrant odor similar to lemons and are used for making balm tea for use in fevers and a pleasant beverage called balm wine. Plant one to two feet high, hairy, loosely branched with ovate leaves; flowers white or pale yellow in loose axillary clusters. Pkt. 5c; Oz. 30c; 2 Oz. 55c; ¼ Lb. \$1.00; Lb. \$3.00

BASIL, SWEET (Ocimumbasilicum) A hardy, aromatic annual. The seeds and stems have a strong flavor and are used in soups and sauces. Plant about eighteen inches high, branching, with ovate toothed leaves; flowers white or bluish white in leafy terminal racemes or spikes. Pkt. 5c; Oz. 15c; 2 Oz. 25c; ¼ Lb. 40c; Lb. \$1.50 \$1.50

Lb. \$1.50

BORAGE (Borago officinalis) A hardy annual used as a pot herb and for bee pasturage. The bruised leaves immersed in water give it an agreeable flavor and are sometimes used in salads to give a cucumber-like taste. Plant of coarse growth, hairy, with large oval leaves; flowers blue or purplish in racemes. Pkt. 5c; Oz. 10c; 2 Oz. 20c; ¼ Lb. 30c; Lb. \$1.00

CARAWAY (Carum carui) A well known herb, cultivated for its seeds, which are used in confectionery, cakes, etc. The leaves are sometimes used in soups, for flavoring liquors and for colic in children. Plant one and one-half to two feet high, with finely cut foliage and clusters of small, white flowers. The plants never seed till the second year. Pkt. 5c; Oz. 10c; 2 Oz. 15c; ¼ Lb. 20c; Lb. 65c.

CARAWAY, for Flavoring. Oz. 10c; 2 Oz. 15c; 1/4 Lb. 20c; Lb. 50c.

CARAWAY, for Flavoring. Oz. 10c; 2 Oz. 15c; ¼ Lb. 20c; Lb. 50c. CORIANDER (Coriandrum sativum) A hardy annual cultivated for its seed which has an agreeable taste and is used in confectionery and to disguise the taste of medicine. Gather on a dry day, bruising the stems and leaves as little as possible, for when injured they have a disagreeable odor which they impart to the seed. Plant slender, two to two and one-half feet high, strong smelling, with smooth, finely cut foliage and small white flowers. Pkt. 5c; Oz. 10c; 2 Oz. 15c; ¼ Lb. 20c; Lb. 65c.

CORIANDER, for Flavoring. Oz. 10e; 2 Oz. 15c; 1/4 Lb. 20c; Lb. 50c.

CORIANDER, for Flavoring. Oz. 10e; 2 Oz. 15c; ¼ Lb. 20c; Lb. 50c. DILL (Anethum graveolens) An annual of aromatic odor and warm pungent taste. Its seeds are used for seasoning. It possesses medicinal properties but its largest use is for making Dill pickles. Plant branching, two to three feet high; leaves very much cut into thread-like segments; flowers small, yellowish borne in umbels. Seed flat. Pkt. 5c; Oz. 10c; 2 Oz. 15c; ¼ Lb. 25c; Lb. 75c. FENNEL. SWEET (Fæniculum officinale) A hardy perennial. The seeds of this aromatic herb have a pleasant taste, and are sometimes used in confectionery, also in various medicinal preparations. The young shoots are sometimes eaten raw and are used in salads, soups and fish sauces. Plant very branching, two to four feet high, with dense thread-like foliage; flowers light yellow in large loose umbels. Seed oval. Pkt. 5c; Oz. 10c; 2 Oz. 15c; ¼ Lb. 25c; Lb. 75c.

HOREHOUND (Marrubium vulgare) A perennial herb with an

ots

nd,

50;

lor rge

rap

154

Oz. 10c; 2 Oz. 15c; ¼ Lb. 25c; Lb. 75c.

HOREHOUND (Marrubium vulgare) A perennial herb with an aromatic odor and a bitter, pungent taste. It is a tonic and enters largely into the composition of cough syrups and lozenges. Laxative in large doses. Will thrive in any soil but is stronger if grown on light, poor land. Plant spreading, one to two feet high; leaves ovate, roughened, covered with whitish down; flowers small, white, borne at axils of leaves. Pkt. 5c; Oz. 20c; 2 Oz. 35c; ¼ Lb. 60c; Lb. \$2.00

Pkt. 5c; Oz. 20c; 2 Oz. 35c; ¼ Lb. ouc; Lb. \$2.00

HYSSOP (Hyssopus officinalis) A hardy perennial with an aromatic odor and a warm, pungent taste. It is a stimulant, expectorant and mild tonic. The flowering summits and leaves are the parts used. It does best on dry, sandy soil. Plant upright with narrow glossy dark green leaves; flowers small, borne in whorled spikes, blue, sometimes white or pink. Pkt. 5c; Oz. 15c; 2 Oz. 25c; ¼ Lb. 40c; Lb. \$1.50

LAVENDER (Lavendula spica) A hardy perennial, growing about two feet high. It is used for the distillation of lavender water or dried and used to perfume linen. It should be picked before it becomes dry and hard, and dried quickly. The seed is of rather slow and uncertain germination. Plant erect, with slender grayish green leaves and small violet-blue flowers. Pkt. 5c; Oz. 20c; 2 Oz. 35c; ¼ Lb. 60c; Lb. \$2.00

MARJORAM, SWEET (Origanum marjorana) An aromatic herb for seasoning. The young tender tops and leaves are used green in summer to flavor broths, dressings, etc., and are also dried for winter use. Usually grown as an annual as it is not hardy enough to endure the winter of the northern states. Plant erect but branching with small oval grayish green leaves and small purplish or whitish flowers. Pkt. 5c; Oz. 15c; 2 Oz. 25c; ¼ Lb. 40c; Lb. \$1.50

2 Oz. 25c; ¼ Lb. 40c; Lb. \$1.50

ROSEMARY (Rosmarinus officinalis) A hardy perennial, with fragrant odor and a warm bitter taste. The leaves are used for flavoring meats and soups, and for medicinal drinks. Plant erect, branching with small slender leaves and small light blue flowers. The blossoms form the principal ingredient in the distillation of toilet waters. Plants do not reach a size suitable for use until the second season. Pkt. 5c; Oz. 30c; 2 Oz. 55c; ¼ Lb. \$1.00; Lb. \$3.00

MARJORAM, SWEET

UE (Ruta graveolens) A hardy perennial with a peculiar, unpleasant smell. The leaves are bitter and so acrid as to blister the skin. It is a stimulant and antispasmodic but must be used with great caution, as its use sometimes results in serious injury. It must not be suffered to run to seed and does best on poor soil. Plant one and one-half to two feet high, becoming woody at the base; leaves much divided; flowers yellow. Pkt. 5c; Oz. 30c; 2 Oz. 55c; ½ Lb. \$1.00; Lb. \$3.00

becoming woody at the base; leaves much divided; flowers yellow. Pkt. 5c; Oz. 30c; 2 Oz. 55c; ½ Lb. \$1.00; Lb. \$3.00

SAFFRON (Carthamus tinctorius) A hardyannual. Cultivated for its flowers which are used principally for coloring, sometimes for flavoring and to make the cosmetic powder called rouge. The flowers should be picked while in full bloom. Plant upright in growth, one to three feet high; leaves ovate, prickly; flower-heads yellow, thistle-like. Pkt. 5c; Oz. 10c; Ya Lb. 30c; Lb. \$1.00

SAGE (Salvia officinalis) One of the most extensively used herbs for seasoning. It is also believed to possess medicinal properties. Hardy perennial, about fifteen to eighteen inches high. Plant very branching; flowers usually blue, sometimes pink or white; leaves grayish green, oval, wrinkled. Cut the leaves and tender shoots just as the plant is coming into flower and dry quickly in the shade. The plants will survive the winter and may be divided. If this is done they will give a second crop superior in quality. Pkt. 5c; Oz. 15c; 2 Oz. 25c; ½ Lb. 40c; Lb. \$1.25

SAVORY, SUMMER (Satureia hortensis) A hardy aromatic annual twelve to fifteen inches high, the dried stems, leaves and flowers of which are extensively used for seasoning, especially in dressings and soups. Plant erect, branching; leaves small, narrow; flowers small, purple, pink or white, borne in short spikes. Pkt. 5c; Oz. 25c; 2 Oz. 40c; ½ Lb. 75c; Lb. \$2.50

THYME (Thymus vulgaris) An aromatic perennial herb, eight to ten inches high, to seasoning.

short spikes. Pkt. 5c; Oz. 25c; 2 Oz. 40c; ½ Lb. 75c; Lb. \$2.50
THYME (Thymus vulgaris) An aromatic perennial herb, eight to ten inches high, used principally for seasoning. Plant very branching with wiry foliage and small lilac flowers. Sometimes the leaves are used to make a tea for the purpose of relieving nervous headache. Sow as early as the ground will permit. Pkt. 5c; Oz. 40c; 2 Oz. 75c; ½ Lb. \$1.25; Lb. \$4.00
WORMWOOD (Artemisia absinthium) A perennial plant of fragrant and spicy odor, but with intensely bitter taste. The leaves are used as a tonic, vermifuge and as a dressing for fresh bruises. Plant erect, two to three feet high, with much divided leaves and loose clusters of small light yellow flowers. It may be raised from seed, propagating by cuttings or dividing the roots. A dry, poor soil is best adapted to bring out the peculiar virtues of this plant. Pkt. 5c; Oz. 25c; 2 Oz. 40c; ½ Lb. 75c; Lb. \$2.50 ¹/₄ Lb. 75c; Lb. \$2.50

CLOVER SEEDS

Alfalfa or Lucerne

(Medicago sativa) It is useless to sow this clover on land having a stiff clay or hard pan subsoil, as the roots naturally penetrate to a great depth and must do so if the plants live any time. Sow on rich, moist loam or sandy soil having a deep, porous suhsoil. Prepare the land thoroughly and sow seed at the rate of fifteen to twenty-five pounds per acre with a broadcaster or grass seeder. Cover with a hrush or light harrow. The young plants are quite tender and the land must be free of weeds until they become established. 4 Lb. 15c; Lb. 35c. post-

paid; for larger lots inquire for prices

Alsike or Swedish (Trifolium hybridum) The most hardy of all clovers; perennial. On rich, moist soil it yields an enormous quantity of hay or pasturage, but its greatest value is for sowing with other clovers and grasses, as it forms a thick hottom and greatly increases the yield of hay; cattle prefer it to any other forage. The heads are globular, fragrant and much liked by bees which obtain a large amount of honey from them. Sow the seed in spring or fall, at the rate of six pounds per acre, when used alone. 4 Lb. 15c; Lb. 40c, postpaid; for larger lots inquire for prices.

Crimson Trefoil or Scarlet Italian (Trifolium incarnatum) An anothe southeast for feeding green and for hay, and also found profitable on the sandy soils of New Jersey. The yield in fodder is immense and after cutting, it at once commences growing again, continuing until severe, cold, freezing weather. It grows about one foot high; the roots are nearly black; leaves long; blossoms long, pointed and of very deep red or carmine color. Makes good hay. It is sown in August or September in the south, but should not be planted in the north until spring. Sow ten to fifteen pounds per acre. 4 Lb. 15c; Lb. 35c. postpaid; for larger lots inquire for prices.

Mammoth or Large Red (Trifolium pratense) Grows nearly twice the size of the Common Red Clover, often making a stand when the other clovers fail. Sow about eight to twelve pounds per acre. 4 Lb. 15c; Lb. 35c. postpaid; for larger lots inquire for prices.

Medium Red or June (Trifolium pratense) This is by far the most imposes. Sow in spring or fall and if no other grasses are used, at the rate of eight to twelve pounds per acre: more is required on old, stiff soils than on new and lighter ones. ¼Lb. 15c; Lb. 35c. postpaid; for larger lots inquire for prices.

White Dutch (Trifolium repens) A small, creeping perennial variety valuable for pasturage and for lawns. It accommodates itself to a variety of soils, but prefers moist ground. Sow in spring at the rate of six pounds per acre, or when used with other grasses, half that amount. 4Lb. 20c; pounds per acre, or when used with our for prices.

Lb. 60c. postpaid; for larger lots inquire for prices.

GRASS SEEDS

Prices on Grass Seeds subject to change.

Awnless Brome Grass (Bromus inermis) A perennial, valuable for binding the soil of embankments and for resisting both drought and cold, on light, dry soils it is used for hay and pasturage, hut is not recommended where better grasses will succeed. Sow forty pounds per acre. Lb. 30c. postpaid; for larger lots inquire for prices

Canadian Blue Grass (Poa compressa) A hardy perennial with creeping rootstalks which form a strong turf. It withstands drought better than most cultivated grasses and is especially valuable in Lawn Grass mixtures. It succeeds best on clay soils but does well on sandy soils, being better adapted for use on sterile knolls and harren fields than prohahly any other cultivated grass. For hay or pasturage it is best sown in nixture with other grasses. It is distinguished from the Kentucky Blue Grass by its flattened, shorter stems and bluer color of leaf. Height six to twenty inches. Lb. 30c. postpaid; for larger lots inquire for prices. inquire for prices.

Creeping Bent Grass (Agrostis stolonifera) Particularly valuable for lawns that are to be used as croquet and tennis grounds, because it is benefited more than hurt by tramping and by its hright color adds to the beauty of the lawn. Lb. 40c. postpaid; for larger lots inquire for prices.

Hard Fescue (Festuca duriuscula) Similar to Sheep's Fescue, hut not so dense and taller; this often will cover sandy soil under the shade of large trees where no other grass will grow. It is a desirable addition to lawn grass. Sow thirty pounds per acre. Lb. 35c. postpaid; for larger lots inquire for prices.

Kentucky Blue Grass (Poa pratensis) Fancy Clean. Sometimes called June Grass, but the true June or Wire Grass is much inferior. Kentucky Blue Grass is the most nutritious, lardy and valuable of all northern grasses. Sown with White Clover it forms a splendid lawn; for this purpose use not less than fifty-four pounds of Blue Grass and six pounds of White Clover per acre. If sown hy itself for meadow or pasturage use about twenty-eight pounds per acre. Lb. 35c. postpaid; for larger lots inquire for prices.

Meadow Fescue or English Blue Grass (Festuca pratensis) A perennial, from two to four feet high, with flat, broad leaves. One of the standard European grasses. It needs rich ground and succeeds well on prairie soil. An excellent pasture grass to take the place of the wild grasses, as it yields a large amount of early and late feed. Sow about twenty-five pounds per acre. Lb. 40c. postpaid; for larger lots inquire for prices.

Orchard Grass (Dactylis glomerata) Desirable on account of its quick growth and valuable aftermath. It is ready for grazing in spring two weeks sooner than most grasses and when fed off is again ready for grazing in a week and will continue green when other grasses are withered by dry weather. It is palatable and nutritious and stock eat it greedily when green. A tendency to grow in tufts unfits it for lawns. It does hetter if sown with clover and as it ripens at the same time, the mixed hay is of the best quality. If sown alone, about twenty-eight pounds are required per acre; if sown with clover, half that quantity. Perennial. Lb. 40c. postpaid; for larger lots inquire for prices.

(Lolium nerenne) A very valuations.

Perennial Rye Grass (Lolium perenne) A very valuable pasture. Succeeds well on almost any soil, but is particularly adapted to moderately moist or irrigated lands. Sow thirty to forty pounds per acre in spring. Lb. 25c. postpaid; for larger lots inquire for prices.

Vesterwold Italian Rye Grass (Lolium Italicum Westerwoldicum) Vesterwold Italian Rye Grass Westerwoldicum)
An extremely rapid growing new annual for spring and sumer sowing. As a forage and pasture grass it thrives on almost any soil but does best on heavy loam, clay or land of a somewhat damp character. It is lighter in color and coarser in leaf than Perennial Rye but is very much stronger growing. After cutting it is the quickest grass to start again, making a new growth more rapidly than any other sort with which we are acquainted. From our comparative trials the past season we believe this will be found a most valuable addition to the grasses grown in this country. Lb. 30c. postpaid; for larger lots inquire for prices. lots inquire for prices.

(Festuca rubra) A creep-Red or Creeping Fescue (Festuca rubra) A creep-extreme drought, and especially adapted for forming a close and lasting turf in shady places. Valuable also for exposed hillsides, and golf courses. Sow thirty pounds per acre. Lb. 40c. postpaid; for larger lots inquire for prices.

Red Top (Agrostis vulgaris) In Pennsylvania and states farther south this is known as Herd's Grass, a name applied in New England and New York to Timothy. It is a good, permauent grass, standing our climate well, and makes good pasture when fed close. It is also valuable for low, wet meadows, producing a large return in good hay. When sown alone, use about twenty-eight pounds of the chaff seed per acre. Sow in spring or fall.

Red Top Fancy (cleaned from chaff) Sow eight to ten pounds per acre. Lb. 45c. postpaid; for larger lots inquire for prices.

Red Top Unhulled Fancy (free from light chaff) Lb. 30c. postpaid; for larger lots inquire for prices.

GRASS SEEDS-Continued

Rhode Island Bent Grass (Agrostis canina) A valuable perennial for lawns and pasturage. Much like Red Top, though smaller. Thrives ou light, dry soils as well as ou rich, moist ones. For lawn purposes, if used alone, it should be sown at the rate of about forty pounds per acre; for pasture, it used alone, twenty-four pounds per acre. Lb. 40c. postpaid; for larger lots inquire for prices.

Timothy (Phleum pratense) The most valuable of all the grasses for hav, especially in the content of the cont

Sheep's Fescue (Festuca ovina) A small tufted, hardy cylindrical leaves. Valuable in mixture for lawns on dry soils and in shady locations. Sow about thirty-five pounds per acre. Lb. 40c. postpaid; for larger lots inquire for prices.

Tall Meadow Oat Grass (Arena elatior) A hardy perennial much used in the south and west. Roots penetrate deep. It yields a heavy crop on any good soil, and is valuable both for meadow and pasture. Sow thirty to forty pounds per acre. Lb. 40c. postpaid; for larger lots luquire for prices.

Timothy (Phleum pratense) The most valuable of all the grasses for hay, especially in the north. Thrives best ou moist, loamy soils of medium tenacity. It should be cut just when the blossom talls. Sow early in the spring or fall, at the rate of twelve pounds per acre, if alone, but less if mixed with other grasses. Lb. 25c. postpaid; for larger lots inquire for prices lots inquire for prices

Wood Meadow Grass one and one-half to two feet high; has a perennial creeping root and an erect, slender, smooth stem. Well adapted to shaded situations, such as orchards and parks, for either hay or pasturage. Sow about thirty pounds per acre.

Lb. 60c. postpaid; for larger lots inquire for prices.

LAWN GRASS SEEDS

Prices on Grass Seeds subject to change. The pound prices include postage; 100 pound prices are by freight or express, at purchaser's expense.

The essentials for a fine lawn are: First, a rich, well drained soil; second, careful preparation of the ground, making it as fine and smooth and mellow as possible; third, a wise selection of seeds; fourth, sowing at such a time as to give the young plants a chance to become well established before being subjected to very dry or cold weather or to the direct rays of the hot summer sun. However much care is bestowed on the soil and seed, no lawn will be beautiful without frequent mowing and rolling. Too much care cannot be bestowed upon the selection of grasses, as some varieties are the most luxuriant in spring, others in summer, others again in autumn and a combination of the proper sorts is required for a perfect, carpet-like lawu. It may be planted early in spring or fall and should be sown at the rate of sixty to one hundred pounds per acre; much more is required than for hay or pasturage. If sown in the spring, sow as early as possible, making the surface very fine and smooth, then raking it over and sowing the seed just before a rain which, if the surface has just been raked, will cover the seed sufficiently. If the expected rain does not come, cover by rolling with a light roller. For fall seeding sow before the autumn rains and early enough to enable the young grass to become well established before very cold weather, when a light dressing of manure should be given.

Central Park Mixture We have *** While there are on the

Extra Fine Mixed (Central Park Mixture) We have given much thought and made many experiments to secure the best selection and think our Central Park Mixture is the best possible for permanent lawns. One pound is the minimum quantity sufficient to sow 600 square feet. Lb. 45c; 100 Lbs. \$30.00

Fine Mixed Lawn Grass A thoroughly first-class mixture made of the best and cleanest grades of those adapted to general lawn purposes.

A thoroughly first-class mixture made of the varieties used and best Lb. 35c; 100 Lbs. \$20.00

Shady Lawn Mixture This is a selection of fine the shade of trees or buildings where there is little sun. Lb. 60c.

Mixtures for Golf Links While there are on the prepared golf mixtures of more or less value, we have found that the best results are obtained by giving individual attention to each customer and making a special mixture to suit his needs. We have thus overcome the difficulties presented by the great dissimilarity of local conditions of various links and are willing to give you the benefit not only of our experience on some of the best greens in this country but of expert knowledge of grass seeds as well. Write us a description of your links, telling what the nature of the soil is, how drained, how much it has the sun, whether the winters are long or open and whether the summers are wet or dry and we will offer you two or more mixtures especially adapted to the various parts of your grounds. While there are on the

MISCELLANEOUS FARM SEEDS

Barley, Common

Barley succeeds best on rich lands more sandy and lighter than those adapted to wheat. It is sown in the spring and can be grown farther north than any other grain. Unless intended for seed it should be cut before fully ripe as it is then heavier, of better quality and less liable to shell. Use about two and one-half bushels per acre. 3 Lbs. postpaid 50c; for larger lots inquire for prices.

Buckwheat, Common twenty-five to thirty bushels. mass it is apt to spoil. 3 Lbs.

Buckwheat, Japanese and has a thinner hull than Common or Silver Hull. Recommended especially for well drained or sandy land and the dry climate of the western plains. 3 Lbs. postpaid 50c; for larger lots inquire for prices.

Buckwheat, Japanese and has a thinner hull than Common or Silver Hull. Recommended especially for well drained or sandy land and the dry climate of the western plains. 3 Lbs. postpaid 50c; for larger lots inquire for prices.

Buckwheat, Silver Hull bloom longer, matures sooner, and yields double the quantity per acre; husk thinner, corners less prominent; grain a beautiful light gray. The flour is said to be better and more nutritious.

3 Lbs. postpaid 50c; for larger lots inquire for prices.

Cowpea, Blackeye a soil renovator and enricher. It is used not only for green manuring but also for forage. Cowpeas are very rich in nitrogen and when plowed under they leave the land in splendid condition for the future crop. Sow June 1 to July 1, one bushel per acre, in drills; two to two and one-half bushels per acre if sown broadcast. Qt. 15c; ½ Bu. \$1.00; Bu. \$3.00

Flax (Linum usitatissimum) Sow late enough in the spring to avoid frost aud early enough to secure a good stand and enable the crop to ripen before the fall rains. A fair average quantity of seed to be sown on an acre is one-half bushel, when cultivated for seed; if for the fibre a larger quantity should be sown. Cut before quite ripe and if the weather be dry let it lie in the swath a few hours, when it should be raked and secured from the weather; thresh early in the fall and in dry weather. 3 Lbs. postpaid 60c; for larger lots inquire for prices.

Hungarian (Panicum germanicum) This is a species of annual millet growing less rank, with smaller stalk, and darker heard, and often yielding two or three tons of hay per acre. It is very valuable and popular with those who are clearing timber lands. Sow and cultivate like millet. 3 Lbs. postpaid 50c; for larger lots inquire for prices.

[Panicum miliaccum] Requires a dry, light, rich soil, and grows two and

Millet, Common (Panicum miliaceum) Requires a dry, light, rich soil, and grows two and one-half to four feet high with a fine bulk of stalks and leaves. It is early maturing and is excellent for forage. For hay, sow broadcast, about twenty-five pounds per acre, from May 1st to Angust 1st. For grain, sow in drills, about twelve pounds per acre and not later than June 20th. 3 Lbs. postpaid 50c; for larger lots inquire for prices.

Millet, German or Golden feet high, later maturing than Common Millet, and a heavy yielder. The heads, though numerous, are very large and compact. The seeds are contained in rough, bristly sheaths and are round, golden yellow in color and very attractive in appearance, 3 Lbs. postpaid 55c; for larger lots inquire for prices.

tes

MILLET, GERMAN OR GOLDEN

MISCELLANEOUS FARM SEEDS—Continued

Rape

DWARF ESSEX FOR SOWING. There is but one variety of Rape that has proven profitable to sow in America and that is the Dwarf Essex. No other plant will give as heavy a yield of forage at such a small cost as this, and its general cultivation would add largely to the profits of American farms. Especially valuable for green manuring and pasture. When fed off by sheep, it will probably do more to restore and make profitable exhausted soils

manuring and pasture. When fed off by sheep, it will price than any other plant. Biennial.

Ground should be prepared same as for turnips. Sow in June or July, with a turnip drill, in rows two and one-half feet apart, at the rate of two and one-half pounds of seed per acre. It may be sown broadcast, either with other fall forage crops or by itself, using from one to five pounds of seed per acre. Lb. 25c. postpaid. By freight or express at purchaser's expense, 10 Lbs. \$1.25; 100 Lbs. \$7.50

Rye, Fall or Winter

A hardy, strong growing annual, cultivated not only for its grain and straw but valuable also for soling and as a covercrop and for use as green-manure. It can be successfully grown under greater extremes of climatic conditions than probably any other cereal, but makes its best growth on soils containing less clay than some which are adapted to wheat. Good drainage is very important. The time for sowing is from the middle of August to the last of September. Prepare the ground as for wheat and sow broadcast or with a drill at the rate of one and one-half bushels per acre.

3 Lbs. 50c. postpaid. For larger quantities inquire for prices.

Rye, Spring Although this grain is often plauted especially for paper makers, who prefer it to any other, its principal value is as a "catch" crop to sow where winter grain has failed. Straw shorter and stiffer than the winter variety and always easily secured. The grain, although smaller, is of equal value. 3 Lbs. 50c. postpaid. For larger quantities inquire for prices.

Sugar Cane (Sorghum)

RAPE, DWARF ESSEX

Early Orange An exceedingly valuable variety; very large, of strong and vigorous habit and does not fall down. It is early and often yields as much as two hundred and forty gallons of very beautifully colored and highly flavored syrup to the acre. We recommend it highly to all desiring a superior cane. Lb. 20c. postpaid. By freight or express at purchaser's expense, 100 Lbs. \$6.00

Imperial This new variety is particularly valuable for feeding stock, as well as for sugar making. The plants do not grow as tall as the Early Orange or the Albaugh Early but show a decided tendency to stool, or send up shoots. The cane is very leafy and comparatively slender and practically the entire plant is suitable for feed. Our seed is northern grown and should not be confused with the inferior western and southwestern grown cane. Lb. 20c. postpaid. By freight or express at purchaser's expense 100 lbs \$6.00. By freight or express at purchaser's expense, 100 Lbs. \$6.00

Sunflower
talk usually, and with much more and larger seed than the common sorts. It is used extensively for feeding poultry. The plant often grows ten feet high. Sow seed as soon as ground is fit for planting corn, in rows three to four feet apart and ten inches apart in row. Cultivate same as corn. When the seed is ripe and hard, cut off the heads and pile loosely in a rail pen having a solid floor or in a corn crib. After curing so that they will thresh easily, flail out or runthrough a threshing machine and clean with a fanning mill. This variety will yield 1.000 pounds or more of seed per acre. Some species are planted largely in the flower garden for ornament. (See Sunflower, page 86.) Pkt. 5c; ¼ Lb. 10c; Lb. 25c. postpaid; for larger quantities inquire for prices.

Vetches or Tares
SPRING (Vicia sativa) A perennial pea-like plant grown as an annual in the north. Desirable as a forage plant and valuable as a cover-crop for orchards. Culture same as for field peas. Sown intext to one hundred twenty pounds per acre. Lb. 25c. postpaid; for larger lots inquire for prices. inquire for prices

Vetches SAND, WINTER OR HAIRY (Vicia villosa) A very hardy forage plant growing well on soils so poor and sandy that they will produce but little clover. Its nitrogen gathering properties make it particularly valuable as a soil renewer and enricher but it is not recommended for land which is to be cultivated for grain crops on account of its tendency to volunteer and persist. The plants, when mature, are about forty inches high and if cut for forage as soon as full grown and before setting seed, they will start up again and furnish even a larger crop than the first. Seed round, black and should be sown thirty to sixty pounds per acre. Lb. 30c. postpaid; for larger lots inquire for prices.

A DESCRIPTIVE LIST

CHOICE FLOWER SEEDS

WITH GENERAL DIRECTIONS FOR CULTIVATION

MOST flowering plants will live in almost any soil, but to give them a fair chance to develop, some care should be taken to make the ground suited to their needs. Many flowers are better if produced on plants of vigorous growth, hence a portion of the garden should be prepared by deep digging, thorough pulverization and liberal enriching with large quantities of well rotted manure. Since some other varieties produce the largest and fluest colored flowers when grown on rather light, poor soil, a portion of the garden should not be enriched.

Cultural directions are given on the packets, and we urge purchasers to study them carefully. While some seeds need special treatment, the following general rules will apply to all. Make the surface of the soil as fine, smooth and level as possible; do not plant when the ground is wet; cover each lot of seeds to a uniform depth, which should not be more than four or six times the diameter of the seed; press the soil firmly over the seed: plant in rows so that the starting plants can be seen easily; thin out the young plants to prevent crowding and keep entirely free from weeds.

Plants are usually divided into these

Plants are usually divided into three classes, Annuals, Biennials and Perennials. Annuals are plants which normally live but a single season. Biennials are plants living two years; particularly those which do not bear flowers and fruit until the second season. Perennials tend to live from year to year.

ALL FLOWER SEEDS SENT POSTPAID ON RECEIPT OF PRICE

These Rates apply only to Seeds in Packets, but not to Seeds by Weight.

No discount can be allowed on Flower Seeds by Weight.

Half ounces will not be supplied of kinds which sell for less than 30 cents per ounce.

Acroclinium (Everlasting) A very pretty, half hardy annual producing white and rose colored, double daisy-like flowers, about one and one-half inches in diameter. Each flower-head is borne singly on a very long stem; leaves small, narrow, alternate. These are "Immortelles" so desirable for wreaths and winter bouquets.

Sow the seed in open ground early in spring, preferably in light, well prepared soil, and cover with one-fourth inch of fine soil firmly pressed down. Thin the young plants to four inches apart. Height fifteen inches.

Album. Pure white. Oz. 20c. Pkt. 5c.
Roseum. Light rose. Oz. 20c. "5c.
Mixed. Oz. 20c. "5c.

Ageratum

A beautiful, hardy annual of neat bush habit. The attractive feathery flowers borne in dense clusters are very useful for bouquets. Very desirable for outdoor bedding and borders, being covered with bloom nearly all summer. Sow outdoors after danger from frost is over; or for earlier blooming start under glass and transplant. Cover the seed with one-eighth to one-fourth inch of fine soil firmly pressed down.

Mexicanum. Light blue; about two feet high. Oz. 30c. Pkt. 5c. Imperial Dwarf White. Height ten inches. Oz. 50c. ... 5c. Tom Thumb Dwarf Blue. For edging. ... 5c. Mixed. Seeds of the above varieties mixed. ... 5c. ANTIRRHINUM—(See Snapdragon)

AQUILEGIA—(See Columbine)

The annual varieties can be grown

Alyssum the annual varieties can be grown very readily either outdoors or in the house and by cutting back the plants properly an almost constant succession of bloom may be had. Seed can be sown in open ground very early in spring, or may also be sown outdoors in fall.

Amaranthus
These plants afford brilliant contrasts of color, being useful for tall borders, groups and of red, blended usually with green; two to three feet high.

Seed may be sown in open ground early in spring, covering one-fourth inch deep; thin two to three feet apart.

Melancholicus ruber. Deep coppery red foliage; very hardy an-

Tricolor. A hardy annual with leaves of red, yellow and green; well known as "Joseph's Coat." Especially brilliant if grown in rather poor soil. Oz. 25c. Pkt. 5c.

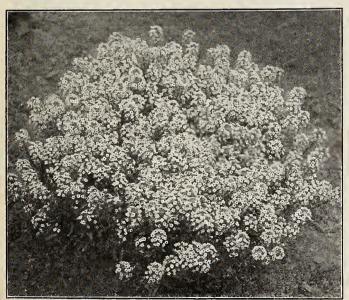

Anemone Coronaria (Wind Flower)
Among the earliest of spring flowers. They are about two inches across, resemble the single poppy in shape and come in several shades of color.
Sow from April to August. Succeeds well in rich, light loam, in a sunny situation. Hardy perennial; six inches high......Pkt. 5c.

Arabis Among the earliest blooming plants. Very useful for rock work, edgings, etc. Sow early in spring. Some winter protection is advisable. Hardy procumbent perennial.

Alpina. Small pure white, cruciform flowers. Leaves rather slender, somewhat clasping, small-toothed and pubescent......Pkt. 5c.

The ornamental Asparagus are in sparagus are highly valued for their finely cut foliage. Both the climbing and trailing sorts are exceptionally

Verticillatus. A beautiful climber with feathery foliage and scarlet berries which are quite ornamental. Sow early in spring. Hardy perennial; ten to fifteen feet high...Pkt. 10c.

ALYSSUM

ASTER

The Aster, in its many varieties, is unsurpassed for bedding and cutting, and is not only one of the most profitable annuals for the professional florist but also one of the most satisfactory for the home garden. The great diversity of size, color, form and season of blooming makes it one of the most suitable plants for supplying cut flowers. The plants are usually of vigorous growth and so hardy that they endure a slight frost without serious injury. By planting the different strains and at different times, one may have in the latitude of Detroit a constant succession of bloom from the last of July till the middle of October without the aid of a greenhouse or even a hotbed.

Seed may be sown outdoors as early in spring as the ground is warm and dry, or for earlier blooming may be started indoors or in a cold frame and transplanted in the open ground after danger of killing frost is over. If conditions are favorable they will usually do well in any well prepared garden soil but a strong loam that has been well fertilized the previous year is preferable. In planting cover the seed with about one-fourth inch of fine soil firmly pressed down. The rows for most of the varieties should be about one and one-half feet apart. When about one to two inches high, thin to sixteen inches apart in the row. It is desirable during warm and dry weather to water thoroughly the plants two or three times a week, preferably early in the morning or evening. It is desirable to change the location as often as practicable.

Insects, such as the red spider, may be kept at bay by frequently spraying with clear water, or for insects that eat the foliage add one-fourth teaspoonful of Paris Green to ten gallons of water. Sprinkle with tobacco water or dust to keep off the plant louse. We offer choice seed that has been grown for us from the best types by the most skilful cultivators in America and Europe and which is more certain to give good results than most of that on the market.

Queen of the Market Very desirable on account of extreme earliness as well as profuse blooming and wide to eighteen inches high, bearing on long stems from ten to fifteen finely formed double flowers of medium size. Fine for cutting and used extensively for growing under glass. This class is known also as Queen of the Earlies.

Victoria An early strain superior to the old type of Victoria. The flowers are large when grown under favorable conditions, sometimes three and one-half inches across and are very full in the center. The petals are broad and thick and curve outward, overlapping so regularly as to resemble those of the double dahlia. Plants about fifteen to eighteen inches high.

Purity Similar to Daybreak but pure white. The flowers are abundantly produced, symmetrical in form, very full and globe shaped, with rather short petals which are slightly folded lengthwise. One of the best early white asters. An excellent variety for cutting. Oz. \$1.50.Pkt. 10c.

Comet, Semi-Dwarf This midclass of semi-dwarf Comet Asters is fully two weeks earlier in blooming than the older Comet strains and though more compact in growth of plant is very florifierous. Flowers often three inches or more in diameter with centers well covered and petals broad and recurved; very satisfactory for cutting. Plant branching but rather upright in habit, about eighteen inches high.

 Light Blue
 " 10c.

 Lilac
 " 10c.

 Mixed, Includes the four above varieties mixed
 " 10c.

Mikado Pink (Rochester) A remarkably beautiful midseason aster of very large size and fine form, at first white but changing gradually to light rose or rose with lavender tint. The petals are quite long and narrow, rather flat, some of them slightly curved and twisted, and cover well the centers of the flowers. Plants about two feet high, branching and bear very large flowers on stems twelve to sixteen inches long. Oz. \$1.50. Plat. 15c.

ASTER, PURITY

ASTER—Continued

Crimson King The flowers are a most attractive rich crimson, are very double in form and they last an exceptionally from color, to Violet King.

The flowers are a most attractive rich crimson, are very double in form and they last an exceptionally from color, to Violet King.

Pkt. 10c.

Truffaut's Perfection Peony Flowered Plants of this mid-season class are upright, about two feet high. They produce on long stems large, perfectly formed and brilliantly colored blooms of great beauty.

Crego Giant White Similar to Crego Giant Pink, but the flowers are glistening pure white. The petals grow so thickly that the flowers show nothing of the ragged appearance seen in some of this class of asters.

Oz. \$1.75.....

Giant Comet In this class of asters the petals are very long and recurved and twisted near the center. Plants branching about two feet high, more vigorous and taller growing than the ordinary Comet; flowers larger and equal in form. A desirable class coming into bloom rather late. Known also as Ostrich Plume.

ASTER, SEMPLE'S WHITE

Pkt. 15c.

Peerless Pink.

Flowers a very pleasing shade of rich shell pink.
They are of very large size, exceptionally attractive form and are borne on very long stems.
Plants branching, two to two and one-half feet high. One of the most desirable late asters for cutting. Oz. \$1.50...Pkt. 20c.

Semple's A class of very growing asters usually not coming into bloom until the latter part of August, but producing on very long stems full petalled, exceptionally large, double blossoms of fine form. The plants are distinctly branching in habit of growth and are about two feet high. For many years this class with us has been almost entirely free from the aster blight. free from the aster blight.

White. Pure white, very attractive. Oz. \$1.00..Pkt. 10c.

Mary Semple. Flesh pink. A very light and charming shade. Oz. \$1.00...

ing shade. Oz. \$1.00...

Light Pink. A beautiful light pink, slightly tinged with rose. Oz. \$1.00....

Tyrian Rose. Very attractive deep purplish rose. Oz. \$1.00....

Lavender. Bright lavender; very large flowers of fine form. Oz. \$1.00. 10c.

10c. 10c.

Crimson. Bright deep crimson, tinged with carmine. Oz. \$1.00.... " 10c.

Purple. Flowers are very deep purplish blue; rich and pleasing shades. Oz. \$1.00..... "10c.

Semple's Mixed. A su-perb mixture of all the shades and colors found in the Semple's class of late branching asters. late branching asters, Oz. 90c " 10c.

Aster, Finest of very fine the dean be made more attractive by pulling up the early plants as soon as they are out of bloom. Oz. 90c....Pkt. 5c.

BABY'S BREATH-(See Gypsophila) BACHELOR'S BUTTON—
(See Centaurea) Balloon Vine (Cardiospermum halicacabum) A favorite with children, being remarkable for its inflated membranous capsules containing the seed. It is sometimes called "Love-in-a-Puff." A rapid and graceful climber. Flowers small, white. The round black seed is marked with a white heart-shaped spot. Sow seed in open ground early in spring and give the plant some support to run upon. Tender annual; six feet high. Oz. 20c.........Pkt. 5c.

Balsam

(Impatiens Balsamina) Kuown also as Lady Slipper. The brilliantly colored, double rose-like flowers of this well-known border and bedding annual are thickly set along the branches of the erect bushy plants. The dainty individual flowers, often two inches across, are borne on very short stems and when cut they show to best advantage floating in a dish of water. The colors range from white to dark purple, and are either self colored or spotted and striped. Balsams are tender and should be started in boxes indoors or in the open ground when danger of frost is past. The plants prefer a rich, moist or even wet sandy loam, and must not suffer for moisture. They do best if allowed eighteen inches apart each way in a sunny situation. Larger and more double flowers will be obtained if some of the young shoots are cut out when quite small, or by transplanting two or three times. Hardy annual; one to two feet high.

Double Solfering. Flowers satiny white, streaked and spotted with

Begonia

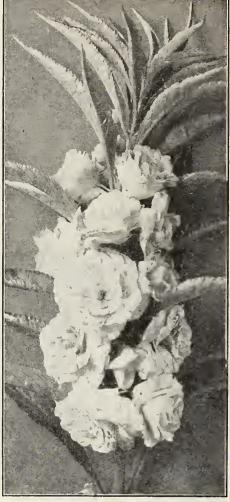

Very desirable for pot culture or for bedding out in partially shaded locations. Suitable also for window boxes. Some varieties are grown for their foliage, but most sorts when beautiful wax-like flowers of fine form and substance.

Sow seed in March in shallow boxes or small pots plunged in moss. Begonia seed is extremely small and great care should be taken in opening the packet and planting. Open the packet directly over the surface to prevent any seed being lost. The surface of the soil should be very smooth and the seed carefully scattered on the surface and lightly pressed in. The moss should be kept quite damp, but the surface of the soil should not be watered. Moisture can be retained in the soil by placing a glass over the box or pots. When the plants are large enough to handle, transplant into small pots, and to larger sized pots as required. For winter or spring blooming, sow from August to September. For outdoor belding, select a shady moist situation, making the bed rich with well rotted manure and leaf mold, if obtainable. The young plants started indoors may be set out when the perennial, blooming the first year if started early, one foot high.

Tuberous Rooted Begonias

Tuberous Rooted Begonias

The tuberous rooted varieties, if planted early in a temperature of sixty to seventy degrees, will with proper care give an abundance of bloom the first year. At the end of the season they may be dried off by withholding water, the tubers kept in a dry place free from frost and planted the following spring, when they will bloom more freely than before.

Fibrous Rooted Begonias

BELLIS—(See Daisy)

For Begonia Bulbs, see Bulbs and Roots, page 93.

BUTTERFLY FLOWER—(See Schizanthus)

Calceolaria

A much admired genus distinguished by its abundance of large showy sac-shaped or slipper-like flowers which are creamy white and various shades of yellow, often splashed, spotted or blotched with dark reddish brown, two plants rarely having flowers marked exactly alke. Leaves large, felty, close growing. Under proper conditions can be grown indoors to perfection, making an exceedingly decorative plant.

Start the seed at any time, except during hot weather, in a temperature of about 60° F. Herbaceous annuals or shrubby evergreen perennials.

Hybrida grandiflora. Large self colored flowers. Pkt. 25c.
Hybrida tigrina. Flowers beautifully spotted. 25c.
Finest Hybrids Mixed. Seeds saved only from the most perfect flowers; all desirable. 25c.

CALENDULA—(See Marigold)
CALIFORNIA POPPY—(See Eschscholtzia)

Calliopsis, or Coreopsis Very showy bedding or borders, producing in great profusion and for a long time flowers which are bright yellow and rich brown, either self colored or with these colors and red contrasted.

Sow outdoors early in spring where plants are wanted to bloom, covering seed one-half inch deep; thin to two feet apart. To secure an earlier bloom sow indoors and

transplant.

Coreopsis tinctoria.

CAMPANULA—(See Canterbury Bell)

Canna Stately, very ornamental plants of semigroups and in masses. Plants branching from the roots, with very large, broad leaves, producing clusters of large flowers of
varied and brilliant colors from August until cut down by frost.

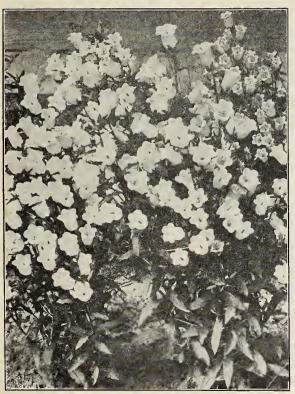

Sow seed indoors in February in light, sandy soil, first cutting a small notch through the hard outer coat with a knife or
file, care being taken not to cut into the germ. Cover with one-half inch of fine soil. Keep the soil moist and the temperature
averaging 60° F. Transplant outdoors after danger of frost is over, preferably in very rich soil, giving each plant two feet of
room. Tender annual in the open ground, or tender perennial in the greenhouse.

Finest Large Flowering Mixed. Plants comparatively dwarf, about three feet high. Oz 30c.

(

CANTERBURY BELL

Oz. 20c. Pkt. 5c.
Purple. A rich dark shade. Oz. 25c. 5c.
Rose Carmine. Compact habit. Oz. 25c. 10c.
Fine Mixed. Oz. 15c; Lb. \$1.00. 5c.

Canterbury Bell (Campanula medium) Handsome, easily grown herbloom for beds and backgrounds. They produce long racemes of strikingly effective bell-shaped or saucershaped flowers of rich color. Leaves sessile, lanceolate. Usually grown as a hardy biennial, but if seed is sown very early iudoors it may be treated as a tender annual.

Sow seed outdoors early in spring in rows about two feet apart covering with about one-fourth inch of fine soil firmly pressed down. The plants succeed best in light, rich soil with good drainage and in the fall should be transplanted or thinned to eighteen inches or two feet apart and given some protection in severe winter weather. Height of plants, from two to four feet.

But Shedge of the grown and the fall should be transplanted, from two to four feet.

CARPET OF SNOW-(See Alyssum)

Carnation (Dianthus Caryophyllus) "Carnation," "Pink," "Clove Pink," "Florists' Pink," are names applied by different people to the same or to different plants of several species as well as to hybrids between them. They are all easily grown from seed and very free blooming, the flowers seem of the varieties are hest adapted for pot culture and make fine house plants; others do best in beds in the open ground. The improved varieties we offer are suitable also for cutting. They produce very double, semi-circular blooms with thick wax-like petals and long pod-like calyx. The plants are branching but compact and erect, with slender, hluish green foliage. The bursting of the calyx may be prevented by using ashes or some form of potash. Where size and quality of flowers are desired rather than profusion of bloom, all except the terminal huds should be removed. This is the method employed by florists to obtain the larger longer-stemmed beauties. Half hardy perennial, usually treated as a hiennial.

Large Flowering Carnations Best Suited for Pot Culture

Varieties Adapted to both Pot and Outdoor Culture

Castor Bean (Ricinus) Tall majestic plants for lawns or driveways; with hroad, beautifully lobed, palm-like leaves of glossy green, hrown or bronzed metallic hue and long spikes of scarlet, or of green, prickly seed pods, and long spikes of scarlet, or of green, prickly seed pods, earlier blooms start indoors and transplant. For hest development each plant should have at least four feet each way. Its rich, luxuriant growth makes it wery attractive for a long distance either grown singly or in groups, or as center plants with Cannas, Dahlias, etc., giving a semi-tropical effect. Seed beautifully striped or mottled. Tender annual; six to fifteen feet high. Zanzibariensis, Wonderfully vigorous, from ten to fifteen feet high. Leaves have a brilliant luster, measuring about thirty inches across, ranging in color from bright green to deep hronze. Seed very large, oval. Mixen Varieties. Oz. 20c. Pkt. 5c. Sanguineus. (Tricolor) Blood red stalks with red venation in leaves; height about six feet. Oz. 15c. 5c.

An odd and picturesque class of plants having colored foliage and in which the innumerable small flowers and seed vessels together with their supports form a very brilliantly colored mass, sometimes gracefully arranged like plumes and sometimes more dense, heing corrugated and frilled at the edge like a cock's comb. They form the gayest possible decoration in beds and borders, retaining their brilliant coloring often from midsummer until frost. The red Cristata sorts are sometimes cut hefore fully ripe and dried in the

Dwarf Cockscomb Varieties (Celosia Cristata)

Centaurea

Centaurea

Centaurea

Centaureas embrace some foliage plants but are more generally known for their hardy flowering annuals which include some of

our most graceful and showy garden flowers that have long been favorites for cutting. The tall slender straight or slightly branching plants with narrow leaves thrive well in common garden soil. They produce bright colored single and double heads of flowers on long graceful stems and some sorts are fragrant.

Annual Varieties Cultivated for Their Flowers

time afte Oz. \$1.00.

Perennial Varieties Cultivated for Foliage

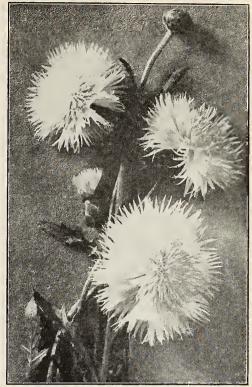

Seed should be sown under glass and the young plants grown in pots or boxes until settled warm weather, when they may be set about one foot apart where wanted for borders or bedding. In southern latitudes seed may also be sown outdoors in fall.

Candidissima. Sometimes called Dusty Miller. Ornamental plants of great beauty: foliage deeply cut, silvery white and densely covered with white hairs. Half hardy perennial, about one foot bigh.

Gymnocarpa. This is also called Dusty Miller. Valuable because of its finely cut silvery gray foliage and graceful drooping habit of growth. Half hardy perennial; one and one-half to two feet high. Oz. 65c.

CHRYSANTHEMUM, MORNING STAR

CENTAUREA, MARGUERITE

Chrysanthemum "These outdoor summer Chrysanthenum" are showy and effective for bedding or borders in the garden and desirable for cut flowers. Plants become more bushy and shapely if pinched back in early growth and the practice of disbudding will result in much larger flowers. These annuals are not the winter flowering sorts sold by florists and which are propagated only by division of roots.

Early Blooming Garden Sorts

Early Blooming Garden Sorts

Seed may be sown in the open ground after danger of frost is over and the seedlings thinned eight or ten inches apart, but the best results come from sowing under cover early in May, and transplanting the young plants to open border. Height one and one-half to two feet.

Morning Star. Very handsome, large, single flowers, bright yellow with deeper center; excellent for cutting and desirable for both spring and fall markets.Pkt. 10c.

Carinatum Eclipse. Pure golden yellow, with a bright purplish scarlet ring or center on the ray florets, the disc being dark brown; very striking......Pkt. 5c.

Coronarium, double white. Very double white flowers, with petals reflexed and imbricated......Pkt. 5c.

Coronarium, double yellow. Very attractive, rich golden yellow double flowers, about one inch across; abundantly produced...........Pkt. 5c.

Mixed. The choicest Carinatum and Coronarium varieties, both single and double.........Pkt. 5c.

Later and Taller Fall Blooming Sorts

CHEIRANTHUS CHEIRI—(See Wallflower)
CHEIRANTHUS MARITIMUS — (See Virginian Stock)

Cinerarias are easily grown from seed in the greenhouse. The large heads of brilliant daisy-like sharply margined and with dark eye, are very desirable in pots. The plants are often as broad as high and the velvety leaves are shaded on the under side.

Sow preferably early in fall. They thrive best in a mixture of loam and peat. Perennial, usually one to two feet high.

Clarkia Beautiful, hardy annuals with rose colored, white and purple flowers, in delicate but very hrilliant shades. Plants about one and one-half to two feet high aud profuse bloomers. Sow early in spring. DOUBLE MIXEN...Pkt. 5c.

Clematis Well known heautiful climbers, much admired for their gracefulness and attractive flowers. They are splendid for covering arbors, verandas, etc., as they cling readily to almost any object.

For best results start very early indoors and transplant to place one foot apart, or seed may be sown outdoors early in spring. Perennial, but some little protection in northern latitudes through winter is advised. The roots should be given plenty of water during dry weather to ensure free blooming, the plants being quickly injured if they become very dry.

Flammula. A slender but vigorous climber, from ten to fifteen feet high, with clusters of small, white, fragrant flowers in August and September. Known as Sweet Virgin's Bower. Pkt. 5c.

COCKSCOMB—(See Celosia) COIX LACHRYMA-(See Job's Tears)

Cobaea Scandens A fine rapid growing climber with handsome dark green foliage and bearing on graceful stems large, bell-shaped flowers, green at first but rapidly changing to a beautiful deep violet-hlue. A wire-netting trellis or support for the green profusion of tendrils to fasten upon is preferable to cords or smooth wire. A well established plant will run about thirty feet in a season, covering a large verauda.

COSMOS. GIANT WHITE

Magnificent ornamental foliage plants for house or garden culture. The leaves are of many shapes, shades and colors of remarkable heauty.

Sow in shallow pots in rich light soil. Cover the seed lightly sow in snanow pots in first night soil. Cover the seed lightly with earth and keep the plants in an even moist temperature. Transplant to the open ground in bed or border as soon as danger of frost is over, and in a sheltered situation where they will not be too much exposed to the sun. For house plants seed may be sown indoors in fall. Tender perennial; plants about one to two feet high.

Convolvulus Minor (Dwarf Morning Glory) Dwarf habit, each covering a space ahout two feet in diameter. At midday they are completely covered with a mass of pure white and variously colored funnel-shaped hlossoms which remain open in clear weather until evening.

Sow the seed early in spring in any good garden soil, covering with ahout one-half inch of fine soil firmly pressed down. Half hardy annual; about one foot high. Mixen. Oz. 10e; bb. 50c. Pkt. 5c.

CONVOLVULUS MAJOR-(See Morning Glory)

Very effective for autumn flowering cosmos in broad masses or hackgrounds. A hardy and rapid growing annual, forming bush-like plants with feathery green foliage, four to six feet high, covered with large flowers somewhat resembling the single dahlia. They are gracefully poised on long stems and very useful for decorative purposes.

Well known and universally ad-

Sow outdoors early in spring in rather light soil, not too rich, and preferably in a sunny situation. Cover the seed with one-fourth to one-half inch of fine soil firmly pressed down. If planted in rows, make the rows about two feet apart and when the young plants are well up thin from four to six inches apart in the row.

Early Flowering Cosmos

These early flowering strains are about four feet high and bloom profusely four to six weeks earlier than the giant sorts. The flowers are of good size; well adapted to northern latitudes.

Early Flowering Dawn. Flowers white. Oz. 40c. Pkt. 5c.
Early Flowering Mixed. Includes white, bright red and rose colored flowers. Oz. 30c. Pkt. 5c. CUCURBITA-(See Gourd)

Cyclamen

Well known and universally admired tuherous rooted pot handsome red and white flowers for indoor winter or spring blooming in greenhouse or window garden. The graceful richly colored single flowers are of distinctive shape and are horne on stems of good length for a long blooming season well above the beautiful foliage. The glossy ovate or nearly round leaves are usually marbled or variegated with white. Sow the seed, which is of rather slow germination, in shallow boxes or pans, using light rich soil and covering the seed slightly. Keep at a temperature of 50° to 60° F, and water freely until well started. Seed sown in spring, by autumn will produce a little bulb. If this is placed first in a three inch pot and later repotted as required in a five or six inch pot it will produce blooms the following spring. Seed may also he sown in fall. Tender perennial; one foot high.

Persicum, mixed. Of great beauty; many colors. Pkt. 15c.

Persicum, mixed. Of great beauty; many colors .. Pkt. 15c. Cypress Vine (Ipomæa quamoclit) A most beautiful rapid growing climber with delicate dark green, feathery foliage and many bright, star-shaped, scarlet or white blossoms which contrast most effectively with the graceful foliage. Planted by the side of veranda, tree or stakes, and trained properly, there is no handsomer climber.

Seed is usually sown outdoors early in spring in the row where the plants are to remain. Cover seed one-half inch deep. Germination will be hastened if the soil is warm and kept in moist condition. Thin the young plants four to six inches apart. If very early blooming is desired, seet should be started indoors. Seed rather small, black, wedge-shaped. Tender annual; about fifteen feet hiel.

Mixed. The two colors above. Oz. 25c

Dahlia
A favorite for autumn flowering, blooming the first season from seed if started early. The flowers are so symmetrical that they will always be popular where display is wanted.

Seed may be sown in spring in open ground after danger of frost is over, but for best results sow in shallow pans at any time from March to June, and transplant the seedlings to small pots. When strong enough and danger from frost is over plant out one foot apart. These plants will produce tubers which should be taken up in the fall and replanted the following spring; these roots will flower freely the following autumn. Tender herbaceous perennial, three to four feet high.

Finest Double Mixed. Seeds saved from choicest double flowers, including shades of red, pink, dark maroon, yellow, white, etc. Pkt. 15c.

Finest Single Mixed. Will produce brilliant flowers running through a wide range of striking colors. Oz. 50c. Pkt. 10c. For Dahlia Roots see Bulbs and Roots, Page 93.

Daisy (Bellis perennis) Charming little plants for edgings and borders, also used for low beds and rock work. The flowers of the improved varieties we offer are borne above the low cluster of leaves on stiff flower stalks, making them suitable for bouquets. With careful cultivation nearly seventy-five percent are double. Leaves spatulate or obovate

For best results sow seed early in hotbed and when plants are large enough transplant to a rich soil in a cool and partially shaded situation, setting the plants six inches apart. If plants are started early indoors they will flower the same season, but bloom more abundantly in the spring if sown in autumn and the plants wintered over in cold frames; or can be set out in the open border and protected with mulching. Half hardy perennial; about six inches high.

Double Rose. (Longfellow) Finest strain. Oz. \$2.50..Pkt. 10c.
Double White. Very double, clear white. Oz. \$2.50.. "10c.
Double Mixed, Shades of rose and white. Oz. \$2.50.. "5c.

Datura Large brauching plants producing very large, handsome, double or single, trumpet-shaped blossoms of exquisite fragrance. Excellent for late summer and autumn flowering.

Seed may be sown outdoors after danger of frost is over, but for early blooming sow in hotbed and transplant about three feet apart each way. Roots can be kept all winter in cellars. Tender annual; three feet high.

Mixed. The above varieties...... " 5c.

DELPHINIUM—(See Larkspur)
DIANTHUS—(See Pinks)
DIANTHUS BARBATUS—(See Sweet William)
DIANTHUS CARYOPHYLLUS—(See Carnation)
DIGITALIS—(See Foxglove)

Dimorphotheca Aurantiaca
orange-yellow flowers, is sometimes called African "Golden-Orange" Daisy. Plants somewhat spreading, with finely cut foliage, producing abundantly on stems of good length glossy, single daisy-like blossoms about two and one-half inches across. The brilliant orange coloring of the petals contrasts strikingly with the black center which is surrounded by a dark colored disc. Well adapted for summer flowering in beds or borders.

Eschscholtzia, Bush (Hunnemannia)

DOLICHOS—(See Hyacinth Bean) EMERALD FEATHER—(See Asparagus Sprengeri)

Eschscholtzia (California Poppy) The state flower of California. It is fully as valuable as the common Poppy for garden ornamentation since it blooms through a much longer season. A bed in full bloom of these large saucer-shaped flowers in various shades of yellow with orange center gives a brilliant color effect. The foliage is finely cut and has a bluish tinge or bloom, delicate and very attractive.

attractive.

Sow seed early in spring or late in autumn where plants are wanted to bloom as they do not bear transplanting well. Use well pulverized soil, make the rows one foot apart and cover the seed one-fourth inch deep. Thin six to eight inches apart. Effective results are also obtained by thinly sowing broadcast and lightly raking in the seed. Hardy annual, low spreading; about one to one and one-half feet high.

Bush (Hunnemannia) Flowers beautifully cup-shaped, about three inches across; petals broad, bright yellow with wavy edges; leaves coarser and larger than common kinds. Stems ten inches long and desirable for cutting. In the northern states for early blooming and largest flowers start in pots and transplant outdoors. Height about two feet. Hardy annual, becoming in warm latitudes a tender perennial. Oz. 50c.Pkt. 5c. EVENING GLORY-(See Ipomæa Bona Nox)

Ferns Perennial flowerless plauts, too well known to need description. The seed spores are very small and of slow germination but the exceeding grace and beauty of the plants will usually well repay all the care necessary to start them properly in the greenhouse or some place indoors where they will keep moist. The young ferns may be placed in a window-box without much sun, or can be set outdoors in summer in some moist and shady place.

Fine Mixed Pkt. 20c.
Finest Species, Mixed 25c.

 ${\tt FEVERFEW--} (See\ Matricaria\ and\ Pyrethrum)$

Forget-Me-Not (Myosotis) This is a favorite old fashioned flower, hearing in profusion, especially in fall and spring, clusters of dainty blue five-petalled blossoms. It thrives well in the shade or open horder but flourishes best in a moist, shady struction

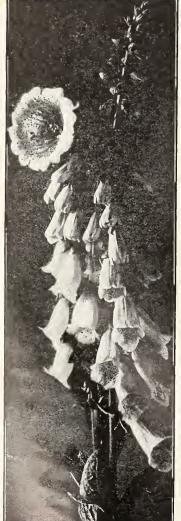

in the shade of open norder int hourisines best in a moise, shady situation.

For bloom the first year sow indoors in Fehruary or March, and transplant as soon as the ground is warm enough, or sow outdoors as early as possible, covering seed one-half inch deep; thin to six inches apart. Seed may also be sown in fall. Hardy perennial hut usually does better if given some protection during winter.

Four O'Clock (Marvel of Peru, Mirabilis Jalapa) plants of erect bushy hahit which produce in profusion a succession of brilliantly colored tube-shaped flowers, that open ahout four o'clock in the afternoon, remaining open all night and usually are closed hefore noon the next day. The flowers are red, white, yellow, or are striped and hlotched in shades of these colors. Very desirable for borders, along a wire fence, or as the hackground of a flower garden, hlooming during the late summer and autumn.

Sow seed in spring in open ground after danger of frost is over, covering one-half inch deep. For best development allow two to three feet apart each way. Hardy annual, about two feet high.

FOXGLOVE

Foxglove

(Digitalis) Stately, old fashioned horder plants, affording dense spikes of large hrilliantly colored flowers which are terminal and half as long as the height of the plant. The flowers are very distinct and showy, being thimhle-like or long hell-shaped, and the colors include white, lavender and rose, many heing spotted or blotched. It is often used as a hackground, and does especially well in cool, shady locations in front of shrubbery. The leaves are wrinkled and somewhat downy.

GAILLARDIA, PICTA LORENZIANA

Coronarium, Scarlet Pkt. 5c. Coronarium, Album, white

Fuchsia Known also as "Lady's Eardrops" from the bright colored pendulous double flowers with four parted, funnel shaped calyx. Plants with hossoms may be grown from seed with proper care. Results are usually most satisfactory when grown indoors in pots in firm rich soil, but if seed is started early under glass, it often succeeds well in an outdoor window-box, or a shady situation in the garden. Tender perennial; one to two and one-half feet high. Double Finest Mixed. Seed from finest named sorts. Pkt. 25c.

Gaillardia

Showy bedding and border plants, remarkable for the profusion, size and hrilliancy of their flowers, blooming the first year and among the gayest ornaments of the garden in summer and autumn. Combinations of yellow and red predominate in the highly colored single and double flower-heads, two inches or more across, which are horne singly well above the foliage on long, slender stems, suitable for cutting. Leaves alternate, simple, and more or less toothed.

Sow seed outdoors early in spring; cover one-fourth inch deep. Make rows eighteen inches apart and thin eight to ten inches apart in the row; or a longer season of hloom may be secured by planting in frames and transplanting. Plants one to one and one-half feet high.

Picta. Plants about one foot high: flowers single particular.

one and one-half feet high.

Picta. Plants about one foot high; flowers single. purplish-crimson and yellow. Hardy annual; with root protection in winter is a perennial. Oz. 20c.....Pkt. 5c.

Picta Lorenziana. Gaily colored flowers, double with tuhular florets, produced from July even until hard freezing weather. Invaluable for bouquets. Hardy annual; one to one and one-half feet high; with root protection in winter is often treated as a perennial. Sulphur, orange, claret and amaranth mixed........Pkt. 5c.

Grandiflora. Flowers scarlet and orange, single, often three inches across with flat petals. Excellent for cutting. Hardy perennial, blooming the first year...Fkt. 5c.

Geranium

(Pelargonium) When properly grown, the constant succession of bloom and the exquisite zone or horse shoe markings of the leaves of some of the varieties, render the Geranium very desirable for pot culture as well as for bedding out of doors and for growing in window boxes.

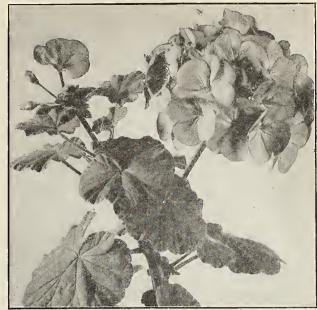

The seed is slow to germinate. Sow in a pot or box in the house in rather light soil, preferably containing a little leaf mold and sand. Cover seed one-fourth inch deep, and keep as near 65° F. as possible. Water moderately, and as soon as the third leaf appears, pot singly in two inch pots, transferring to larger ones as the plants require. Plunge the pots or set in open border, and on approach of frost remove to cover. They will blossom the succeeding spring. Half hardy perennial; about two feet high.

Scarlet Mixed (Zonale) The seed we offer will produce a large percentage of double flowers in many beautiful shades of scarlet and red......Pkt. 25c.

GILLIFLOWER-(See Stock)

Gladiolus These magnificent plants for bedding and cutting with their long spikes of tubular lily-form flowers can be raised from seed in nearly every conceivable color and shade, some being most beautifully striped and blotched. Sow seed thickly, as soon as the ground is warm in spring, covering one-fourth inch deep. The plants should have very careful attention and be kept free from weeds. The bulbs which have formed should be taken up in the fall and kept dry during winter. The stronger bulbs will flower the second season; the balance the third season. Tender perennial; about two and one-half feet high.

Finest Mixed. Finest named sorts mixed Pkt. 15c. For Gladiolus Bulbs see Bulbs and Roots, page 94.

GERANIUM

Globe Amaranth (Gomphrena globosa) A desirable everlasting, valued for its handsome small, globular flower heads which, if cut when well matured, will retain their beauty through the winter. Seeds germinate slowly; start in hot-bed, or soak in warm water to soften the woolly husk. Set the plants one foot apart. Tender annual; twelve to eighteen inches high.
 Striped
 Pkt. 5c.

 Mixed. Oz. 25c
 " 5c.

Gloxinia Greenhouse perennial plants producing soft, velvety green leaves, and rich, beautifully colored trumpet-shaped flowers. Gloxinias thrive best in an equal mixture of leaf mold, loam and sand. If started in February will usually bloom the latter part of summer. Seed may also be sown in fall. The plants are delicate and not easily grown, but the flowers are of such beauty that one generally feels amply repaid for the effort.

Hybrida, mixed. A strain of the richest color and variety of markings. Plants ten to twelve inches high.......Pkt. 25c.

Attractive garden plants, sometimes included in the Evening Primrose or Oenowidely opened single flowers, which are delicately shaded and of satiny texture. Flowers are scattered singly on the leafy branches or borne in short dense spikes. Suitable for pot culture as well as bedding and borders.

Sow outdoors after danger of frost is past or for earlier blooming start indoors and transplant. Hardy annual; about one foot high.

Duchess of Albany. Large, rich, satiny-white flowers. Pkt. 5c. Lady Albemarle. Carmine-crimson; compact habit.... "5c.

Gypsophila Delicate, free-flowering plants covered with star-shaped flowers, valuable for mist-like effects and as trimming in bouquets; also for hanging baskets or edgings. Sometimes called Baby's Breath. Will thrive in almost any well prepared ground but does best on a limestone soil. Make handsome specimens dried.

Elegans Large Flowering Pure White. Superior to the common Elegans not only in size of flowers but also in color. Very charming in bouquets with Sweet Peas or other cut flowers. (See further description in Supplement, page 2) Oz. 25c. Pkt. 5c. Elegans Mixed. Very small, delicate white and rose-pink flowers. Hardy annual; one foot high. ... Pkt. 5c. Muralis. Charming, easily grown border plants having very small pink flowers. Hardy annual; six inches high...Pkt. 5c.

HEDYSARUM—(See French Honeysuckle)
HELIANTHUS—(See Sunflower)

Helichrysum (Everlasting) Straw Flower. Large full, double daisy-like flower heads with prominent centers and stiff overlapping scales, produced in various shades of bright yellow and scarlet on stems of good length. Desirable as dried specimens and for use in making winter bouquets. For this purpose the flowers should be gathered when on the point of expanding Sow early in spring; thin to one foot apart each way. Hardy annual; two to two and one-half feet high.

Monstrosum, fl.pl., mixed. Largest double flowers. Oz. 40c. Pkt. 5c.

Heliotrope

Well-known and much admired border and bedding plants, highly valued for the blue color and fragrance of their branching clusters of small salver-shaped flowers as well as the duration of their bloom.

Sow the seed early in spring, in mellow soil indoors, and when plants are one to two inches high, prick out into pots. Transplant to place when three to four inches high. Will live outdoors through the winter in a warm clinate. Desirable also as a pot-plant for indoor blooming from fall sown seed. Half hardy perennial; one and one-half to two feet high.

Anna Turrell. Violet-blue.....Pkt. 10c. HESPERIS MATRONALIS—(See Rocket)

IMMORTELLES—(See Acroclinium, Globe Amaranth, Helichrysum, Rhodanthe)
IMPATIENS BALSAMINA—(See Balsam)

IMPATIENS BALSAMINA—(See Balsam)

Beautiful annual outdoor climber of luxuriant growth for covering verandas and arbors, or for screening unsightly objects. Sow preferably in heat and transplant to open border; or sow in open border after the ground becomes warm. Soak seed in luke-warm water before planting. Tender annual; ten to fifteen feet high.

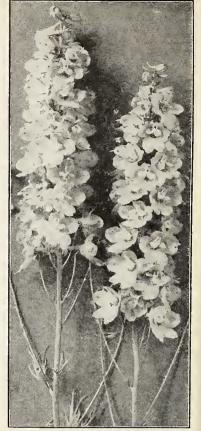

Setosa (Brazilian Morning Glory) Very vigorous rapid growing vine with large, three-lobed leaves and stems covered with brown hair. Flowers open in morning; salver formed, delicate blue or reddish purple with pink star in center and produced in clusters. Seed black, a little larger than Limbata. Oz. 40c. Pkt. 10c.

Coccinea (Star Ijomæa) Like a Morning Glory but with smaller, rather pointed leaves, and covered with small scarlet, star-shaped flowers. Height often ten feet. Seed small, black. Oz. 20c. Pkt. 5c.

Bona Nox (Evening Glory) Violet blue flowers, open in the evening; similar to the white Moon Flower but not as large; seed as large but darker. Oz. 20c. Pkt. 5c.

Limbata mixed. Very large violet or blue flowers with white margins and throats. The leaves are similar to those of Japanese Morning Glory but are less variegated. Seed large, black. Oz. 20c. Pkt. 5c.

Early Flowering Sky Blue (Ijomæa grandiflora rubro cærulea) A most desirable, early, free flowering sort, with glossy dark foliage and very large flowers that open with a tinge of carmine-rose and when mature are bright light blue. Pkt. 15c.

LARKSPUR, FORMOSUM

IPOMŒA GRANDIFLORA—(See Moon Flower) IPOMŒA QUAMOCLIT—(See Cypress Vine)
IPOMŒA PURPUREA—(See Morning Glory) JAPANESE HOP—(See Humulus Japonicus) JOSEPH'S COAT—(See Amaranthus tricolor)

Job's Tears (Coix lachryma) Curious ornamental grass with broad, corn-like leaves and lustrous slate colored seeds used for beads. Valuable for winter bouquets with everlasting flowers. Plant outdoors early in spring in hills three feet apart, four or five seeds in a hill, and cover half an inch deep. Hardy annual; three feet high. Qz. 15c. Pkt. 5c. Kochia Trichophylla (Mexican Fire Bush, or Summer Cypress) A quick growing foliage or hedge plant, very symgren color. Early in the fall innumerable little flowers appear and the bush takes on a deep red tinge. Sow outdoors early in spring, covering one-fourth inch deep. Make the rows two feet apart and thin eighteen inches apart. For earlier blooming start indoors and transplant to open ground. Hardy annual; about two and one-half feet high. Oz. 35c.......Pkt. 5c.

Larkspur (Delphinium) The Larkspur with its long clustered spikes of beautiful irregular flowers, often with long spurs, is especially spirally and the perennials are strikingly effective as a background for borders and for planting among shrubbery. Seed of annual varieties may be sown outdoors early in spring. For earlier blooming start very early indoors or sow in fall. Thin one to one and one-half feet apart. The perennial sorts are sown in fall or early in spring.

Annual Varieties Double Dwarf Rocket mixed. Beautiful spikes of double flowers in many shades. Hardy annual; one foot high. Oz. 25c...Pkt. 5c. Tall Stock Flowered, mixed (Consolida fl. pl.) Flowers double, borne on spikes about fifteen inches long. Colors rose, white and shades of blue. Hardy annual: two feet high.....Pkt. 5c. Double Emperor (Imperiale fl. pl.) Compact and profuse bloomer having erect spikes of very double flowers. Hardy annual; one and one-half feet high. MIXED COLORS......Pkt. 5c.

Perennial Varieties Elatum (Bee Larkspur) Flowers blue with hairy petals in the center giving them a fancied resemblance to a bee. Hardy perennial; three to five feet high.

Pkt. 5c.
Formosum. Flowers large, deep blue shaded indigo, small white center. Hardy perennial; three to five feet high; long blooming season. Sometimes called Mexican Larkspur.

Pkt. 5c.

KOCHIA (MEXICAN FIRE BUSH)

LATHYRUS LATIFOLIUS—(See Peas, Everlasting) LATHYRUS ODORATUS—(See Sweet Peas)

The four dwarf (Erinus) sorts are charming plants, well adapted for bedding, pots or rockeries. They make a neat edging for beds of white covered with flowers for a long time. The flowers are usually blue with lighter center and are borne in neat clusters, each irregularly lobed flower being about five-eighths inch across.

Seed may be sown in place of

Seed may be sown in place after danger of frost is over; or start the plants in pots in greenhouse or hotbed, early in spring and transplant to border in May. Half hardy annual;

usually about six inches high.

LONDON PRIDE—(See Lychnis Chalcedonica)

Love-in-a-Mist (Nigella) Also known as Lady-in-the-Green and as Devil-in-a-Bush, because the blossoms are partly concealed by the finely cut foliage. The large oddly shaped flowers are surrounded by a very dense fringe or wreath of mossy fibres. Both plant and flower are handsome and require but little care. Sow seed in spring in any good garden soil, or may be sown in fall. Hardy annual. Double blue flowers; one and one-half to two feet high. Oz. 20c. Pkt. 5c.

Damascena, fl. pl. Lupin

A very attractive free-flowering plant with long graceful terminal spikes of fragrant pea-shaped blossoms.

Blooms early in the season and is desirable for cutting. Sow seed in place in spring and thin to one and one-half feet apart.

Hardy annual; about three feet high.

MALCOMIA MARITIMA—(See Virginian Stock)

Marigold

No flower garden seems complete without this fine old-fashioned garden plant with its brilliant displays of yellow and orange, both tall and dwarf sorts, and with finely cut or entire bright green foliage. The African (Tagetes erecta) varieties are tall, usually one and one-half to three feet, and are more dwarf and are often used for borders and pot culture as well as bedding. All of these varieties bave finely cut foliage, while the Pot Marigold (Calendula officinalis) has entire leaves, somewhat clasping the rather hairy stems.

For best results start seed early indoors and transplant six inches apart when danger from frost is over, but good blooms of all varieties of Marigold are often successfully obtained from seed planted in the open ground after danger from frost is past. Make the rows one foot apart. Use well pulverized soil, preferably light sandy loam and cover the seed with about one-fourth inch of fine soil firmly pressed down. When about two inches high, thin six to twelve inches. Hardy annuals; in bloom till frost comes.

of fine soil firmly pressed down. When about two inches nigh, the African Double Dwarf, Lemon Colored. Very early and a profuse bloomer of very compact habit. One of the best of this class. Comes true from seed; about eighteen inches high. Desirable for shrubbery or mixed border. Pkt. 5c. African Orange Quilled. A double variety with quilled petals; flowers showy, bloom very early and are used for cutting. Plants rather dwarf, about fifteen inches high. Pkt. 5c. African El Dorado, Double. Flowers about three inches in diameter, imbricated, extremely double and in tints of primrose, orange and gold. Two to three feet high. Oz. 40c. Pkt. 5c. African Double Mixed. A tall mixture well adapted for large beds. About two feet high, Oz. 30c. Pkt. 5c. Prench Double Dwarf, Gold Striped. Brown and golden yellow; very double. Valuable for bedding; one foot high. Pkt. 5c.

MARVEL OF PERU-(See Four O'Clock) MATHIOLA—(See Stock)

Maurandia Graceful slender climber with glossy ivyshaped leaves. It produces an abundance of showy irregular trumpet-shaped flowers, one and one-half inches long, usually purplish blue, white or rose colored with lighter throat. Suitable for greenhouse and hanging baskets in the winter and very satisfactory outdoors especially if a small trellis is given as support.

Seed should be started in bothed on indexe and the

Seed should be started in hotbed or indoors and the young plants set out in open border after danger of frost is over. Tender perennial, blooming the first season; six to ten feet high. Fine Mixed. Oz. \$1.50.....

MEXICAN FIRE BUSH-(See Kochia)

Mignonette (Reseda) A well known hardy annual producing dense cone-shaped flower-spikes, made up of thickly to often used for cutting to combine in bouquets with other more pretentious flowers lacking its delicate and pleasing fragrance.

ing its delicate and pleasing fragrance.

Seed is usually sown outdoors after danger of frost is over and if sown at intervals in spring and early summer a succession of bloom, under favorable conditions, is assured till frost. Well pulverized soil, preferably light sandy loam, should, be used and the seed covered one-fourth inch deep. Make rows one foot apart; thin to six inches. For very early blooming, seed may be sown in the fall, or started indoors and transplanted. May also be grown in pots. Thrives best in a cool temperature and is usually most fragrant in rather light soil. Hardy annual; one foot high.

Victoria. Dark red blossoms, very desirable...... " 10c.

border. Oz. 35c. Pkt. 5c.

Ruby. A dwarf, compact and vigorous plant producing magnificent coppery-red flower spikes. Oz. 50c. Pkt. 5c.

Machet. Of dwarf and vigorous growth, with numerous stout flower stalks, terminated by large spikes of red flowers. This is one of the very best for pot culture. Oz. 60c. Pkt. 5c.

Improved Machet. A highly developed strain; splendid, large, red flower spikes. Pkt. 5c.

Machet White Pearl. Flowers almost pure white, borne on spikes six inches to a foot in length. Pkt. 5c.

Reseda odorata grandiflora (Sweet) Large flowered, very sweet; light yellowish white. Oz. 15c; Lb. 55c. Pkt. 5c.

Monordica Gracefully climbing vines with small yellow blossoms, followed by fruits of curious shape. Foliage gracefully cut and although tender annuals, the vines run ten feet or more during the season. The seed is very hard and germination will be hastened if a notch is carefully cut through the shell before planting. For best results, sow indoors early in spring and transplant after danger of frost is over, or sow in place as soon as ground is warm and dry.

Balsam Pear (Charantia) The fruit is pear-shaped, green changing to bright red and has a warty skin; when ripe it bursts open and shows a brilliant interior of large carmine seeds.

Pkt. 5c.

Pkt. 5c.

Pkt. 5c.

Moon Flower (Ipomæa grandiflora alba) One of the most vigorous summer climbers and will grow under with very large, white trumpet-shaped flowers widely extended, often four inches across. Leaves large, frequently four to five inches across. The hard outer coat of the very large, light yellow seed should be cut through with a sharp knife, care being taken not to cut any deeper than the hard shell and the seed planted about one inch deep in moist soil in a box or pan and set in a warm place. If soil be kept moist, germination will take place in about two weeks. After plants are up, transplant outdoors in a sunny situation when danger from frost is past. Known as Ipomæa Noctiflora, Tender annual. Oz. 65c...Pkt. 10c.

Morning Glory (Convolvulus major, Ipomea purpurea) A handsome showy climber of easy culture and suitable for covering arbors, windows, trellises, old stumps, etc., if support be given the Seed is usually sown outdoors early in spring in row where plants are to remain. Well pulverized soil should be used and the seed covered one-half inch deep; thin four to six inches apart. If very early blooming is desired, seed may be started indoors and transplanted. Give some support such as strings or cord to the vines as soon as they begin to run and they will often exceed ten feet in height before the season is over. Seed triangular, black, except White, which is light yellow. Plet 5c. Purple.

 Pkt. 5c.

Mourning Bride

(Scabiosa or Sweet Scabious)

An old fashioned but most attractive flower. Its great abundance and long succession of richly colored, fragrant blossoms on long stems make it one of the most useful decorative plants of the garden. Desirable for cutting as well giving a fancied resemblance to a pin cushion.

Seed may be sown in place as soon as ground can be worked; or for earlier blooming sow in hotbed early in spring and transplant one and one-half feet apart. Hardy annual; about two to two and one-half feet high.

Double Dark Maroon. A beautiful and attractive shade. Oz. 20c.

Double White. Especially desirable for mixed bouquets. Oz. 20c.

Double Mixed. Colors include deep and light purple, scarlet, pure white and a dark mulberry red; some of the darker shades are tipped with white. Oz. 20c.

MYRSIPHYLLUM—(See Smilax)

Few plants are more easily grown or remain longer in bloom than the Tropæolum, with its large shield-shaped leaves and beautifully irregular flowers having long spurs and brilliantly colored petals. In favorable soil flowers are produced in abundance throughout the season. Much used for window boxes. Nasturtiums are usually free from insects of any kind.

Well pulverized soil, perferably well drained and moderately rich, should be used and the seed covered with about one inch of fine soil firmly pressed down. A sunny situation is essential for free blooming. If the soil is very rich the plants give a large amount of foliage but few flowers. For earlier blooming, start indoors and transplant to the open ground after danger of frost is over.

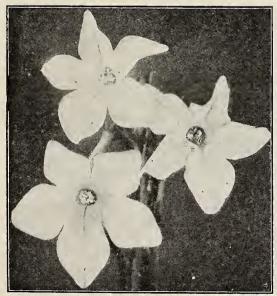

Dwarf Varieties (Tropæolum minor) The flowers are very brilliant and attractive. Plauts evenly dwarf and are often used for a border. When about two inches high, thin so as to give each plant about one foot of room. Hardy annual; about one foot bigh

Nicotiana Handsome bedding plants of the tobacco family, valuable for long and free blooming. The flowers are salver-

shaped, with long tubular corollas.
Seed may be sown outdoors when ground is warm and dry or for earlier blooming start in boxes indoors early in spring and transplant to open ground after danger of frost is past. Cover the fine seed one-eighth inch deep. Half hardy annuals; about three feet high.

NIGELLA—(See Love-in-a-Mist) CENOTHERA—(See Primrose) Oxalis Very pretty, spreading herbaceous plants with clover-like leaves and richly colored blossoms. They thrive well in a mixture of loam and sand. Desirable for greenhouse decoration, rock work or baskets. Sow seed in gentle heat in early spring and when well started transplant where they are desired to flower. Half hardy perennial; six to nine inches high.

Rosea. Rose colored or light purple.....Pkt. 10c.

Pansies are now produced in an almost infinite variety of colors and markings. Their brilliancy of shading, extended season of blooming and long keeping characteristics make them general favorites. The strains now offered are far superior to the old Heart's Ease or Viola Tricolor and the esteem in which they were held by older generations has been heightened by the greater variety and more brilliant colors of the improved sorts. We have been interested in the bringing obtainable. We spare neither pains nor expense to satisfy the most critical trade. Every year we visit the gardens of the most expert specialists in Europe and are in position to give our customers the benefit of their knowledge.

most expert specialists in lately each to a person of the most successful European growers from prominent seedsmen. While the variations in shades of color and markings appear almost limitless our list includes and from prominent seedsmen. While the very best strains the world produces.

Seed may be sown indoors very early in spring, or a little later in the open ground, and transplanted when an inch high. Such plants will commence to bloom in June. If sown in July, the plants will bloom in the fall, or if sown in September, the following spring. Well pulverized soil should be used and the seeds covered one-eighth to one-fourth inch deep with fine soil firmly pressed down. The largest and best flowers are produced by young plants which have been grown rather slowly in a partially shaded situation, and in very rich soil; coolness and moisture are necessary. A situation sheltered from high winds and exposed to the morning sun is most favorable and frequent sprinklings are 'advantageous. Grown indoors pansies make a good winter blooming pot plant. Hardy perennial, four to six inches high.

LARGE FLOWERING

Gold Margined. Large, well formed flowers; very rich dark red, bordered and tinged golden yellow. This variety is sometimes sold as Purple, Gold Edged. Oz. \$1.25..... King of the Blacks. Odier, or Very Large Stained, mixed. Known also as Cassier's. Very large flowers, distinct veined and each petal beautifully blotched. This is a very fine strain of pansies with wide range of splendid colors, Sturdy plants, very vigorous and floriferous, Oz. \$1.00. Pkt. 15c.

Extra Choice Mixed. From best named flowers of very large size. An extra fine Trimardeau mixture, very superior in size, form, coloring and substance. Oz. \$1.50. Pkt. 10c.

Peas, Everlasting (Lathyrus Intifolius) An easily grown, hardy perennial climber with smaller flowers lacking the fragrance of Sweet Peas, but producing for many weeks a succession of blossoms in clusters of eight to ten each. Only a few flowers can be expected the second season but in the third and fourth, the plants then being well established, an abundance of foliage and blooms is afforded. The plants die down late in the fall and start again in the spring.

Sow the seed outdoors early in spring, using well prepared soil and covering the seed about one inch deep with fine soil firmly pressed down. The perennial sorts are suitable for covering stumps and fences, and on a trellis will often grow five to six feet. PELARGONIUM—(See Geranium)

Petunias are unsurpassed for massing in beds and are often grown in window boxes. Their richness of color, duration of bloom and easy culture will always make them popular. They endure drought exceptioually well. The full, double petunias do not produce seeds. To procupe the fertilized by hand with pollen from the double ones. The seed we offer is the result of careful pollen from the theoretic and the pollen from the double ones. The seed we offer is the result of careful fertilized by hand with pollen from the double ones. The seed we offer is the result of careful pollen from the sacross; in others, they are deeply fringed; still others have star-like markings radiating from the throat and extending nearly or quite to the outer margin of the blossom; again, others have full, double flowers. The colors range from white to deep red-purple and are variously striped and blotched.

Plant in a warm, open, sunny place. Seeds may be sown directly in the open ground; or for early results the plants may be started in cold frame, hotbed or in pots indoors, in a temperature averaging sixty to seventy degrees. Water with a fine spray and do not permit the seedlings to dry out. The plants are tender and should not be trusted in the open until danger of frost is over. Any good, friable garrien soil, well pulverized and in good condition may be used and the seed covered with about one-eighth to one-fourth inch of fine soil firmly pressed down. The rows should be two feet apart. Thin to eighteen inches apart. The plants begin to bloom when small and continue until cut off by frost. Teuder percunial, blooming the first year; about one and one-half feet high.

Petunias are also sometimes grown under glass in winter. The best method is to sow seeds in late suppose a carefully.

Petunias are also sometimes grown under glass in winter. The best method is to sow seeds in late summer or early fall and grow stocky plants in pots, but old plants can be lifted on the approach of cold weather, cut back and taken inside for winter bloom.

Double Dark Purple. An attractive and particularly useful color in pinks. The flowers are double, of large size, fine form and are suitable for cutting...Pkt. 15c.

Double Diadem Mixed. (Heddewig's) Very regular, double, and all tints from crimson purple to deep black purple. Oz. 90c...Pkt. 5c.

Poppy

(Papaver) These well-known hardy annuals and perennials flower in great profusion throughout the summer. Both the single and double varieties are remarkable for bedding and borders. The flowers are remarkable for their large size, delicacy of tissue and wide range of bright dazzling colors.

As early in spring as ground can be worked sow seed where flowers are to bloom as the annual varieties do not bear transplanting. Fulverized soil, preferably light sandy loam, should be used. Make rows fifteen inches apart and cover seed one-fourth inch deep. When two inches high, thin from six inches to one foot. To insure continuous bloom during a long season the flowers should be cut regularly and no seed pods allowed to form.

Annual Varieties

Perennial Varieties

Perennial poppies do best in rows one and one-half feet apart and one foot apart in the row. The plants have stout, leafy flower-stalks; leaves rough, pinnately parted; lobes oblong-lanceolate, toothed. Seed may be sown outdoors either in spring or fall.

Bracteatum. Flowers very large, single brilliant orange-crimson; base of petals bluish black. A garden perennial of most striking appearance; about two feet high.....Pkt. 5c. Orientale. Very large single gorgeous scarlet blossoms; base of petals bluish black. One of the most showy garden peren-nials; about two feet high. Oz. \$2.00..........Pkt. 5c.

The Carnation Poppy is an improved double form of the single Papaver Somniferum, used for the extraction of opium. We do not furnish seed of the opium poppy.

Portulaca
Sometimes called Rose Moss. Few flowers make such a dazzling display of color in the bright sunshine as a bed of portulacas. The glossy cup-shaped single flowers and rose-like double flowers, about one inch across, range through many shades of red, white, pink, orange, yellow, striped, etc. Plants low growing or creeping with thick, fleshy stems tinged with red and small quill-shaped leaves. Desirable also for edgings. They are in bloom through a long season. Sow seed outdoors, after weather is warm and settled, where the plants are to stand in rows one foot apart. They should have a sunny situation. Well pulverized soil should be used but it does not need to be rich. Cover seed about one-eighth inch deep. Thin to two inches apart. For massed beds seed can be sown broadcast, the soil sifted on and the whole bed carefully pressed with a board. For earliest blooming start under glass and transplant to place after danger of killing frost is over. Tender annual; about nine inches high.

Single Varieties

 Alba. Pure white. Oz. 40c.
 Pkt. 5c.

 Aurea. Deep golden. Oz. 40c.
 5c.

 Fine Mixed. A wide range of colors. Oz. 35c.
 5c.

Double Varieties

The seed we offer can be depended upon for a large proportion of fine, very double flowers and the few that come single can be pulled out if desired.

POOR MAN'S ORCHID-(See Schizanthus)

POPPY, SHIRLEY

Primrose, Evening (*Enothera*) Large, showy saucer-shaped blossoms, usually fully expanded only towards and during evening. The blossoms are yellow or white and are very freely produced.

Acaulis Alba (Low White Evening) Plants of prostrate habit, the leaves lying on the ground. This sort produces many large flowers about three inches across which open clear white and turn to deep primrose pink. Sow in open ground early in spring. Make rows fifteen inches apart; thin six inches apart in row. Hardy perennial; six inches high. Pkt. 5c.

Lamarckiana. (Showy Evening) Superb spikes of large, bright yellow blossoms about three inches across. Sow in open ground early in spring, or if blooms are wanted the first season, start very early in hotbed and transplant. For best development make rows two and one-half feet apart and thin fifteen inches apart in the row. Plants branching, with lanceolate to oblong dark green leaves, somewhat roughened and pubescent. Hardy perennial but blooms the first year; height four feet. Oz. 20c. ... Pkt. 5c.

Primula Sinensis

plant is especially valuable in that its brightly colored and finely formed flowers and prettily cut foliage may be had in perfection from November until late in spring. The splendid salver-formed flowers are produced in large clusters.

Sow seed indoors in well drained, shallow pans or boxes from April to last of July, to insure flowering the following winter. For best results use finely sifted leaf mold, loam and sand in equal parts. Cover slightly and place the pans in a temperature of about 60° F. Water with a fine spray. If covered too deeply or if allowed to dry after being wet the seed will not germinate. Transplant into pots and keep in a cool place so that the plants will grow slowly until ready to bloom. Seed may also be sown in fall. Greenhouse perennial, six to ten inches high.

Single Fringed, Scarlet. A deen shade: very attractive Places.

Pyrethrum Very ornamental, both foliage and flowers. Well adapted for bedding and borders. Sow outdoors in spring as soon as ground can be worked, or for best results start the seed indoors and transplant after danger from frost is past. (See also Matricaria)

Rhodanthe One of the most beautiful everlastings. Sometimes called Straw Flower. The flower-heads are somewhat bell-shaped, becoming when mature fully expanded and sometimes reflexed. They are gracefully poised on slender stems. The mixture we offer includes rose with golden center and white with yellow disc. Blooms should be gathered before fully expanded and dried in the shade. The leaves are glaucous, clasping and are oval or elliptical in shape.

RICINUS-(See Castor Bean)

RICINIS—(See Castor Bean)

Rocket, Sweet (Hesperis matronalis) Proflowers very fragrant during the evening and useful for cutting. Flowers cruciform, somewhat resembling the single Stock but smaller.

Seed germinates rea lily in open ground if sown after danger from frost is past. Hardy perennial.

Purple. Plants two and one-half to three feet high.

Plt. 5c.

White. About two feet high.

Scott

Rose Multiflora Dwarf Perpetual, Mixed. Plants under ordinary cure will commence to flower when six inches high grow and bloom until they form compact bushes about sixteen inches high, well covered with single and double flowers.

ROSE MOSS—(See Portulaca)

Salpiglossis Very showy bedding or border plants with richly colored, funnel-shaped flowers which are purple, scarlet, crimson, yellow, buff, blue or almost black, beautifully marbled and pencilled.

For early blooming seed may be started indoors as early as the middle of March and the young plants set out in the garden one foot apart, or seed may be sown outdoors after settled warm weather. Useful for cutting. Blooms from August to October. Half hardy annual; about two feet high.

Fine Mixed, Hybrids. Easily grown large, long stemmed flowers, in many beautiful shades and markings. Oz. 50c. Pkt. 5c.

Large Flowering Mixed. A mixture of improved dwarf, very large flowering sorts, more compact than ordinary varieties and with much larger, more richly colored flowers. Pkt. 10c.

(Flowering Sage) Among the most brilliantly colored of garden flowers and extremely useful for bedding; also valuable for pot culture and cutting. Blooms are borne in long spikes well above the foliage and are of fiery red, crimson or blue, continuing in flower a long time. The densely filled flower spikes are often eight to ten inches long and include thirty or more tube-like florets, one to two inches in length. Start early in heat and transplant into light soil one to two freet apart; or seed can be sown outdoors after danger from frost is past. Tender perennial, but blooms the first season; height one and one-half to three feet.

Leens. One of the finest blue flowers known; not as well suited in bedding as the other varieties of salvia, but very attractive in the mixed border or in the greeuhouse. Height of peant, about one and one-half to two feet. Pkt. 15c. reball. Many strains of Salvia Splendens have been offered under different names claiming they are larger flowered or ance floriferous than the old type. We have found none more valuable than this strain in which the plant is more uniformly dwarf, and comes into bloom earlier than most sorts and remains covered with brilliant red flower spikes a remarkably long time. About two feet high. Pkt. 10c. SCABIOSA—(See Mourning Bride) SCARLET FLAX—(See Linum)

SALPIGLOSSIS

Schizanthus Retusus trimaculatus. Also known as Butterfly Flower or Poor Man's Orchid. Dainty compact branching plants with finely cut foliage, covered when in bloom with clusters or spikes of brilliantly colored butterfly-like flowers. Valuable for garden decoration or pot culture. Petals bright yellow with margins and tube of purple-rose, shading from lighter to darker shades.

The seed may be sown outdoors after danger of frost is past, where the plants are to remain; or start iuside and transplant when weather is suitable. Hardy annual; about twenty inches high.

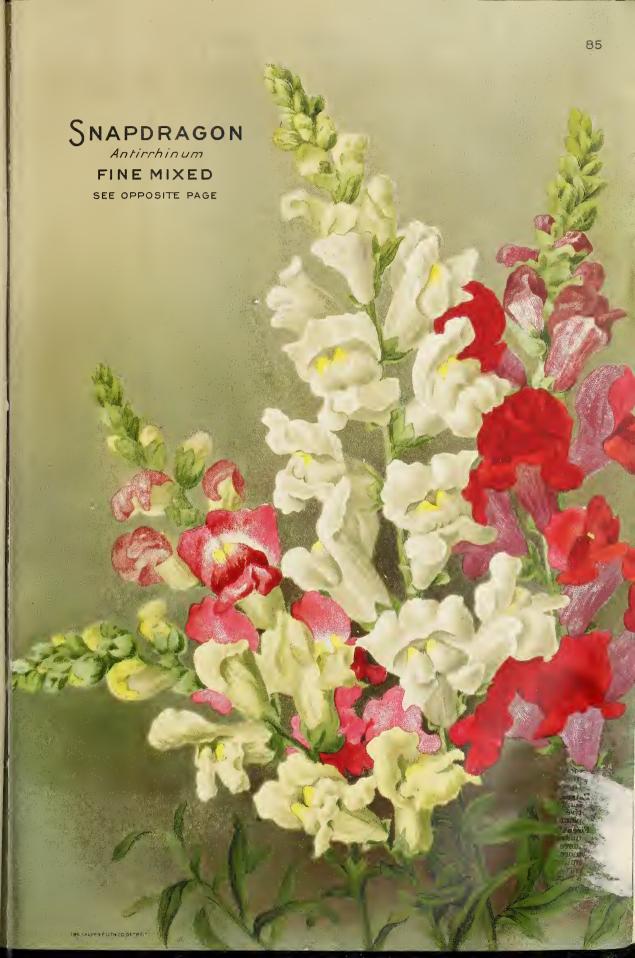

Pkt. 15c.

SENSITIVE PLANT-(See Mimosa Pudica)

Snapdragon

(Antirrhinum) This well known old border and bedding plant of long blooming season

Majus album. Pure white, light yellow throat......Pkt. 5c.

Stock

(Mathiola) Sometimes called Gilliflower. Considered almost indispensable where a fine display of flowers is wanted and particularly valued for edgings, bedding and pot culture. The improved varieties very fragrant and beautiful rosette-like double flowers in a wide range of attractive colors. They are suitable for cutting, being produced on stems of good length in pleasing contrast with the dark green foliage of the bushy plants. Each of the four types is of long flowering period, and if the earlier ones are started indoors, a profusion of fragrant and pleasing flowers is afforded for the entire season.

Sow outdoors early in spring, using well fertilized, carefully pulverized soil and cover seed with one-fourth inch of fine soil firmly pressed down. Make the rows fifteen inches apart; thin to six inches apart. For earlier blooming start indoors and transplant. Height of plants, one to one and one-half feet.

transplant. Height of plants, one to one and one-half feet.

Early Flowering Brompton
A decidedly superior annual strain with the splendid foliage

A decidedly superior annual strain with the splendid foliage and bloom of the older type but flowering with the German Ten Weeks and decidedly superior in length of stem and size of flower spike. This group is also called Beauty Stocks. Belle of Naples. Old rose or light purplish rose. Pkt. 15c. Camaldoli. Dark violet or light purplish red. "15c. Snow White "10c. Vesuvius. Blood-red or deep purplish red. "15c. Mixed. Includes shades of white, old rose, blood-red, purple and violet. Oz \$3.00. Pkt. 5c.

Double German Ten Weeks (Large Flowering)
This favorite half-hardy summer blooming annual has deliciously fragrant flowers and is very desirable for cutting.

Double German Ten Weeks, Mixed (Levkojen) Shades of white, red, purple, lavender and maroon. Oz. \$1.00. Pkt. 5c.

Double German Ten Weeks, Pure White. Very useful for floral work and bouquets. Oz. \$2.75. Pkt. 10c. Intermediate or Autumnal Stocks

Intermediate or Autumnal Stocks
Sown at the same time as the Ten Weeks, will succeed them
in bloom, thus affording flowers continuously until late in the
fall. Flowers larger, on longer, bolder spikes. For indoor
blooming, if sown in pots late in summer the plants will bloom
the following spring.
Intermediate White. Pkt. 15c. Intermediate Scarlet. Pkt. 15c.
Brompton and Emperor Stocks
These requires a longer time than the Intermediate to grow

STRAW FLOWER—(See Helichrysum and Rhodanthe)

SUNFLOWER, DOUBLE CHRYSANTHEMUM FLOWERED

STOCK, EARLY FLOWERING BROMPTON

Sunflower (Helianthus)
These stately, old
fashioned flowers with the
newer improved varieties are coming into special
favor as a background for lawns and in front of
high fences. Valuable also as a screen to hide
unsightly places and sometimes used to mitigate
the evil of adjacent swamp holes. Their very
tall dense growth and bright yellow disc-like
flowers of very large size and long blooming
period make them one of the most deserving
and useful of hardy annuals.

Sunflowers grow readily in almost any soil but

Sunflowers grow readily in almost any soil but do best on light, rich limestone or alluvial land well supplied with moisture and not shaded by trees or buildings. Sow seed outdoors in spring after danger of frost is over, preferably in well pulverized soil either broadcast or in rows two to three feet apart and cover about one-half inch deep. When about four inches high, thin one and one-half to two feet apart to secure best development.

Globosus Fistulosus (Globe, or Dahlia Stanflower)
This variety produces very large, exceedingly double flowers, often six to eight inches in diameter and of bright yellow color. The plants are about five feet high. Oz. 15c. Pkt. 5c.

SWEET ROCKET-(See Rocket)

SWEET PEAS

(Lathyrus odoratus) No garden is too small for a row of Sweet Peas and no estate, however extensive or magnificent, should fail to include many varieties of this most popular flower. Its long blooming season usually extends from early summer until equals it for cutting, either for use in bouquets or for table decoration.

Hundreds of varieties have been offered for sale by seedsmen but owing to recent marked improvements many sorts are de-cidedly inferior and have been dropped from our list.

In describing varieties, by "staudard" is meant the wide petal at the top of the flower; the "wings" are the two petals below.

Extra Early Blanche Ferry and Earliest White, being the earliest known varieties are excellent for growing indoors.

For Outdoor Planting there are two general classes. By far the more extensive is the Grandiflora or large flowering division which, aside from the Spencer types, comprises practically all of the varieties we list. This class, owing to its general vigor of growth, its freedom of blooming and extremely wide range of colors, is best suited for most conditions of growth and location.

The Spencer Types are of excentionally

The Spencer Types are of exceptionally ge size, the standards and wings waved or large size, the standards and wings waved or frilled and the general effect remarkably graceful and attractive. Undoubtedly the inest Sweet Peas yet developed are found in this class. They are usually in bloom much longer than other sweet peas, as most of the blossoms fall off after maturity without setting pods. All Spencers are decidedly shy seeders, hence the price will doubtless always be considerably higher than for the older types. We offer on page 88 what we consider to be the best varieties yet introduced of the Waved or Spencer class and we recommend them unreservedly.

In addition to these two classes which

them unreservedly.

In addition to these two classes which are generally recognized, there is also a third subdivision or class, called the Unwin type, in which the blossoms are waved like the Spencers but are not so large, although distinctly larger than those of the Grandiflora type. The Unwins are frequently of heavier texture than the Spencers and are sometimes more dependable for growing under adverse conditions. They seed more freely, hence are usually cheaper in price than the Spencers, but are dearer than the Grandifloras. The larger Unwin varieties which we list will be found in the Spencer division.

Culture. Early in spring make a trench

we list will be found in the Spencer division.

Culture. Early in spring make a trench three to four inches deep in rich, mellow soil, so arranged that no water can stand in it and plant the seed in the bottom, covering at first only one inch deep. Sweet Peas, particularly the white seeded sorts, are often a little difficult to start. If the soil is too dry they will remain a long time without germinating; if it is too wet and cold they will not sprout at all. In soils at all heavy, or composed largely of clay, put about one inch of sand in the bottom of the trench and sow the seed on this, covering with more sand. Cover the row with a board to shed the rain and protect the soil from the hot sun but remove this as soon as the young plants appear.

When the plants are two inches high.

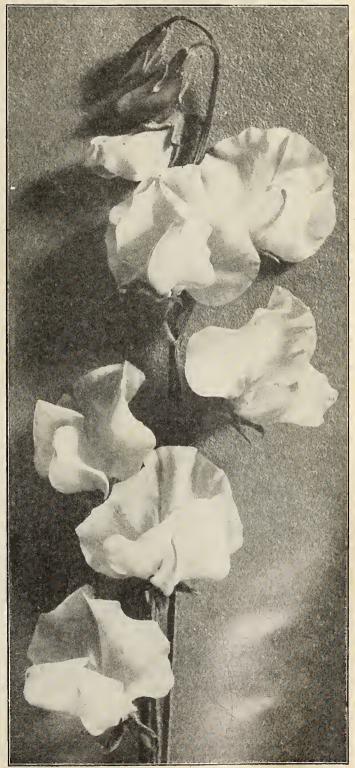

When the plants are two inches high, cultivate and as they grow gradually fill up the trench. When the plants are about five inches high it is desirable to furnish some support for the vines to run upon, preferably a wire netting firmly supported by stakes to prevent sagging, but strings or brush are often used with satisfactory results.

The roots should not be allowed to become too dry. Water applied thoroughly once or twice a week preferably early in the morning or in the evening, is usually better than light sprinkling more frequently.

For the aphis or plant louse, spraying with solutions of some tobacco extract or whale-oil soap is usually effective; and for the Red Spider, which also causes trouble at times, spraying with pure water is usually sufficient. A frequent change of location has also been found important.

A better growth of vine and earlier blooming often results from planting seed late in the fall instead of early in the spring.

The blooms should be picked before they m pods or the plants will soon stop form pods flowering.

SWEET PEAS, WHITE SPENCER

SWEET PEAS-Continued

SPENCER VARIETIES

This group includes the largest and most beautifully formed sweet peas. The typical Spencers have very large waved flowers which are produced abundantly on long strong stems, making the blossoms most desirable for cutting.

- APPLE BLOSSOM SPENCER. Bright rose standard with wings of very light primrose flushed or tinted rose-carmine. Very large; best Spencer form. A free blooming sort and a very reliable bicolored sweet pea of robust growth. Pkt. 5c; Oz. 35c; ¼ Lb. \$1.00
- ASTA OHN. Suffused lavender or tinted mauve sometimes with pinkish tinge. Spencer form, large and wavy. The best of the deeper lavender sweet peas. Pkt. 5c; Oz. 35c; ¼ Lb. \$1.00
- AURORA SPENCER. Flowers brilliant orange rose, striped and flaked on white. The most attractive very large striped Spencer. Pkt. 5c; Oz. 35c; ½ Lb. \$1.00
- BLANCHE FERRY SPENCER. This is similar in color to the old Blanche Ferry but like all Spencers the type is not unalterably fixed. Rose pink standard; wings white, suffused and tinted with light pink. It is a very pleasing sweet pea and is one of the most attractive varieties yet introduced. Pkt. 5c; Oz. 40c; ¼ Lb. \$1.25
- CAPTAIN OF THE BLUES SPENCER. Purple, with blue wings, beautifully waved; margin of petals marbled. Flowers of large Spencer form, but lighter shade than Captain of the Blues; more truly Waverly Spencer in color. A very distinct and pleasing variety. Pkt. 5c; Oz. 35c; ½ Lb. \$1.00
- CONSTANCE OLIVER. Cream ground, beautifully suffused with pale orange pink, sometimes called bright pink on primrose ground. A large Spencer of vigorous growth, and one of the finest cream pinks. Pkt. 5c; Oz. 75c; ½ Lb. \$2.00
- COUNTESS SPENCER. Bright clear pink, sometimes darker towards the edges; very large, open form; long stems. Although the first variety introduced of the Spencer type, it is still the best deep pink sweet pea. Pkt. 5c; Oz. 30c; 1/4 Lb. 90c.
- DAINTY SPENCER. White suffused and edged with rose pink; large and of splendid Spencer form; picotee edged; very free blooming. Pkt. 5c; Oz. 35c; ¼ Lb. \$1.00
- FLORENCE MORSE SPENCER. A very large, delicate blush shaded and edged with rose. Of the best type; excellent for cutting. One of the very best light pink sweet peas. Pkt. 5c; Oz. 35c; ¼ Lb. \$1.00

- Bright rose standard with the or tinted rose-carmine. A free blooming sort and a Cz. 40c; ¼ Lb. \$1.25
 - GEORGE HERBERT. A bright, rose crimson or rose carmine Spencer variety of large size suffused with magenta and showing veins in wings. Both standard and wings beautifully waved. The best carmine and rose sweet pea yet introduced. Pkt. 5c; Oz. 30c; ½ Lb. 90c,
 - GLADYS UNWIN. Clear light bright pink with deeper shade at edge of standard; texture heavy. One of the best of the large waved types. Pkt. 5c; Oz. 25c; 1/4 Lb. 75c.
 - HELEN LEWIS. A rich crimson orange, with wings of orange rose. Large, fine Spencer form. We consider this the finest reliable orange sweet pea. Pkt. 5c; Oz. 35c; ¼ Lb. \$1.00
 - KING EDWARD SPENCER. Brilliant crimson scarlet; very large size and of open form. The best of the pure red or crimson Spencers. Pkt. 5c; Oz. 35c; ¼ Lb. \$1.00

 MRS. ROUTZAHN. A most attractive Spencer of largest size
 - MRS. ROUTZAHN. A most attractive Spencer of largest size and very graceful form; primrose and buff, shaded light rose at edges. Considered by many to be the best cream pink sweet pea. Pkt. 5c; Oz. 40c; ¼Lb. \$1.25
 - NORA UNWIN. Flowers very large, pure white, waved type, heavy texture, beautifully frilled. One of the best white sweet peas; practically a Spencer. Pkt. 5c; Oz. 35c; ¼ Lb. \$1.00
 - OTHELLO SPENCER. A beautiful, deep, pure maroon of very large Spencer type. One of the very best of the maroon shades of Spencers. Pkt. 5c; Oz. 35c; ½ Lb. \$1.00
 - PRIMROSE SPENCER. We consider this the best primrose, or cream and ivory sweet pea yet developed. True Spencer type. large wavy petals, frilled at edges; clear, distinct color, Pkt. 5c; Oz. 35c; ¼ Lb. \$1.00
 - TENNANT SPENCER. A light rosy purple or purplish mauve Spencer of very large size and excellent form. The best mauve sweet pea. Pkt. 5c; Oz. 35c; ¼ Lb. \$1.00
 - WHITE SPENCER. Standard and wings of pure white, beautifully waved and fluted. An especially attractive variety of very large size. One of the very best white sweet peas. Pkt. 5c; Oz. 75c; ¼ Lb. \$2.00

GRANDIFLORA VARIETIES

The Grandiflora varieties of sweet peas, sometimes called the Eckford class, are an older type than the Waved or Spencer sorts and the flowers are not so large. They are usually not as long in bloom, but are decidedly cheaper and more easily grown. There are two forms, the "hooded or shell shaped" flowers and those of "open" form.

A group of Extra Early Flowering sorts, sometimes called the Christmas class, includes as representative varieties Extra Early Blanche Ferry, Earliest White and Mont Blanc.

WHITE

- DOROTHY ECKFORD. Flowers large, pure white, shell shaped, extra good substance. One of the best of this class. Seed white. Pkt. 5c; Oz. 15c; ½ Lb. 40c; Lb. \$1.50
- EARLIEST WHITE. The earliest blooming white sweet pea. Hooded form. Seed black. A most desirable variety for forcing. Pkt. 10c; Oz. 20c; ¼ Lb. 60c; Lb. \$1.75
- EMILY HENDERSON. A clear white of open form. Early, free bloomer. Seed white. Pkt. 5c; Oz. 15c; ¼ Lb. 40c; Lb. \$1.25
- MONT BLANC. Flowers of open form, good size, very clear white, very early. Vines dwarf, slender, graceful, with narrow leaves. Seed white. Pkt. 5c; Oz. 15c; ½ Lb. 40c; Lb. \$1.50

PRIMROSE OR LIGHT YELLOW

- HON, MRS. E. KENYON. Clear primrose; large semi-hooded flower. White seeded. Pkt. 5c; Oz. 15c; ½ Lb. 40c; Lb. \$1.50
- MRS. COLLIER. Large, light primrose. Similar to Hon. Mrs. E. Kenyon but lighter. Seed white. Pkt. 5c; Oz. 15c; ¼ Lb. 40c; Lb. \$1.25
- QUEEN VICTORIA. Light primrose of hooded form showing a pink tint in the bud; clear, soft primrose when matured. Pkt. 5c; Oz. 15c; ½ Lb. 40c; Lb. \$1.25

ROSE WITH WHITE WINGS

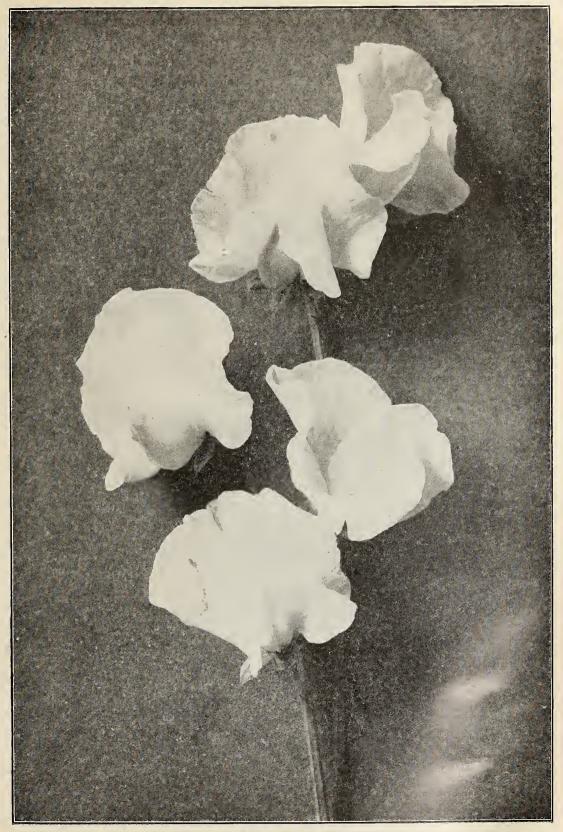

- BLANCHE FERRY. Blooms very early and continues to produce abundantly through a long season. Standard medium sized, open form and bright rose-pink color; wings large, rounded and nearly white. Pkt. 5c; Oz. 15c; 1/4 Lb. 40c; Lb. \$1.50
- EXTRA EARLY BLANCHE FERRY. The earliest known sweet pea. Vines vigorous and hardy though of dwarf habit. It will be found to be the first to furnish flowers either in greenhouse or out of doors and it will continue to furnish them in great abundance longer than most varieties. Pkt, 5c; Oz. 20c; ½ Lb. 60c; Lb. \$1.75

LIGHT PINK

- AGNES ECKFORD. The flowers are a most delicate shade of light pink, medium large in size and of hooded form. Pkt. 5c; Oz. 15c; ¼ Lb. 40c; Lb. \$1.50
- **DAINTY.** The flowers are white, edged with fight pink. They are of hooded form and are borne on very long stems. The variety is similar to but lighter than Eliza Eckford. **Pkt. 5c**; **Oz. 15c**; ¼ **Lb. 40c**; **Lb. \$1.50**
- KATHERINE TRACY. Flowers soft but brilliant pink; open form. The plants are vigorous and give a profusion of flowers which continue of good size until the end of the season. Pkt. 5c; Oz. 15c; ¼ Lb. 40c; Lb. \$1.50
- LOVELY. Flowers large, hooded form. Standard and wings both deep pink, shading to very light pink at the edges: often four flowers on a stem. One of the best of this class. Pkt. 5c; Oz. 15c; 1/4 Lb. 40c; Lb. \$1.50
- PRIMA DONNA. The stems bear three or four large perfect flowers of a brilliant yet soft shade of pink. One of the best of the hooded pink varieties. A very clear shade. Pkt. 5c; Oz. 15c; 1/4 Lb. 40c; Lb. \$1.50
- STELLA MORSE. Flowers of a peculiar warm buff-pink; hooded form and of good size. A very attractive combination yellow and pink. Pkt. 5c; Oz. 15c; ¼ Lb. 40c; Lb. \$1.25

ORANGE PINK

- BOLTON'S PINK. Orange-pink veined with rose, large size; semi-hooded form. An excellent variety. Pkt. 5c; Oz. 20c; 1/4 Lb. 60c; Lb. \$1.75
- MISS WILLMOTT. A fine, semi-hooded type; standard orange pink; wings rose tinted with orange; veins of orange-rose. Flowers of good size, borne on long stems; plant very vigorous. Pkt. 5c; Oz. 15c; ¼ Lb. 40c; Lb. \$1.25
- ST. GEORGE. The brightest of the orange-pinks. Flowers large, of open form and slightly waved Unwin type. A wonderfully brilliant shade. Pkt. 5c; Oz. 15c; ¼ Lb. 40c; Lb. \$1.50

SPENCER SWEET PEAS GROWN AT QAKVIEW

SWEET PEAS-Continued

GRANDIFLORA VARIETIES

SHADES OF RED

COCCINEA. Distinct in color, a bright cherry red or cerise. A very pleasing and effective flower of good size and semi-hooded form. Pkt. 5c; Oz. 15c; ¼ Lb. 40c; Lb. \$1.50

E. J. CASTLE. Carmine rose, similar in color to John Ingman, but of larger Unwin type; open form with wavy edges. Pkt. 5c; Oz. 15c; ¼ Lb. 40c; Lb. \$1.25

Very bright, intense crimson scarlet, of good size FIREFLY. Very bright, intense crimson scarlet, of good and open form. Pkt. 5c; Oz. 20c; ¼ Lb. 60c; Lb. \$1.75

HER MAJESTY. The flowers are large and both the standard and wings are of beautifully curved hooded form and delicate rosy crimson color. Pkt. 5c; Oz. 15c; 1/4 Lb. 40c; Lb. \$1.50

KING EDWARD VII. A bright crimson scarlet or pure red of largest size; open form well expanded, round standard. One of the very best; of as fine color as Firefly and of larger size and better form. Pkt. 5c; Oz. 20c; ¼ Lb. 60c; Lb. \$1.75

and better form. Pkt. 5c; Oz. 20c; ¼ Lb. 60c; Lb. \$1.75
LORD ROSEBERRY. Magenta rose, veined with a deeper shade, of good size and hooded form. Larger and brighter than Lord Kenyon. Pkt. 5c; Oz. 15c; ¼ Lb. 40c; Lb. \$1.25
MILLIE MASLIN. An attractive crimson-red. Large hooded or shell-shaped flowers. Pkt. 5c; Oz. 15c; ¼ Lb. 40c; Lb. \$1.25
PRINCE OF WALES. Flowers large, hooded form, and of a peculiar brilliant red or pure rose crimson, distinct in shade. Very attractive. Pkt. 5c; Oz. 15c; ¼ Lb. 40c; Lb. \$1.25
QUEEN ALEXANDRA. Flowers very bright red, large, semi-hooded. Uusurpassed in brilliancy of color. The nearest scarlet in sweet peas. Pkt. 5c; Oz. 20c; ¼ Lb. 60c; Lb. \$1.75
SALOPIAN. The flowers are of hooded form, large and a

SALOPIAN. The flowers are of hooded form, large and a very rich, brilliant cardinal red. A little deeper than King Edward VII. Pkt. 5c; Oz. 20c; ½ Lb. 60c; Lb. \$1.75

PINK AND RED STRIPES

AMERICA. White, nearly covered with splashes, stripes and dots of very bright carmine. Open form; good size. The most brilliant red striped sort. Pkt. 5c; Oz. 15c; ¼ Lb. 40c; Lb. \$1.50

AURORA. Large, hooded form; striped and flaked with orangesalmon-pink over white. Pkt. 5c; Oz. 15c; 1/4 Lb. 40c; Lb. \$1.25

MRS. JOSEPH CHAMBERLAIN. Large and perfectly shaped flowers of hooded form; white, striped with light purplish rose. Pkt. 5c; Oz. 15c; ½ Lb. 40c; Lb. \$1.25

BLUE AND PURPLE

CAPTAIN OF THE BLUES. Standard large, broad, bright purplish blue; wiugs lighter and brighter blue than standard; open form. Pkt. 5c; Oz. 15c; ½ Lb. 40c; Lb. \$1.50

COUNTESS OF CADOGAN. Stems very long, each bearing three or four flowers, a little darker than Navy Blue. Pkt. 5c; Oz. 15c; ¼ Lb. 40c; Lb. \$1.50

DUKE OF WESTMINSTER. Standard purple, wings of purple shading to violet, large size, hooded form. Pkt. 5c; Oz. 20c; 1/4 Lb. 60c; Lb. \$1.75

FLORA NORTON. Flowers light clear blue; medium size, hooded form. Pkt. 5c; Oz. 15c; ¼ Lb. 40c; Lb. \$1.50

LORD NELSON. Deeper in color than Navy Blue and especially on the vine is a very attractive rich deep blue. Flowers of good size; semi-hooded. Pkt. 5c; Oz. 15c; ¼ Lb. 40c; Lb. \$1.50

NAVY BLUE. A true blue, quite distinct. Medium size; semi-hooded form. Standard indigo and violet; wings navy blue shading to light blue. Pkt. 5c; Oz. 15c; ½ Lb. 40c; Lb. \$1.25

LAVENDER AND LIGHT BLUE

COUNTESS OF RADNOR. Flowers of hooded form, nearly self colored in a very distinct and beautiful shade of lavender. Pkt. 5c; Oz. 20c; ¹/₄ Lb. 60c; Lb. \$1.75

FRANK DOLBY. A lavender and mauve of Unwin type, similar to Lady Grisel Hamilton, but the flowers larger and beautifully waved and frilled. Pkt. 5c; Oz. 20c; 1/4 Lb. 60c; Lb. \$2.00

HELEN PIERCE. Flowers veined and finely mottled bright blue on ivory white; semi-hooded form. Very attractive in its "gloxinia-like" coloring. Pkt. 5c; Oz. 15c; ¼ Lb. 40c; Lb. \$1.50

LADY GRISEL HAMILTON. A large flower similar in color to Countess of Raduor, but nearer blue; hooded form. One of the best. Pkt. 5c; Oz. 20c; ¼ Lb. 60c; Lb. \$1.75

LOTTIE ECKFORD. White, heavily shaded lilac; wings shaded with lighter shade of lilac. Both standard and wings have a picotee edge of magenta blue. Hooded form. Coloring delicate and pleasing. Pkt. 5c; Oz. 20c; ¼ Lb. 60c; Lb. \$1.75

MAID OF HONOR. Medium sized flower, nearly white having a distinct edging of blue which gives it a peculiar and very attractive appearance. Fine open form. Pkt. 5c; Oz. 15c; 1/4 Lb. 40c; Lb. \$1.25

MRS. GEORGE HIGGINSON, JR. A very clear delicate shade of lilac blue, self colored; medium size, semi-hooded form. Pkt. 5c; Oz. 15c; ¼ Lb. 40c; Lb. \$1.50

MAUVE AND PURPLE

MRS. WALTER WRIGHT. A very large, hooded, rosy purple self, changing to rich bluish purple. A splendid variety, similar to Dorothy Tennant but larger. Pkt. 5c; Oz. 15c; 1/4 Lb. 40c; Lb. \$1.50

ROMOLO PIAZANNI. Flowers rosy purple, changing to lilac and blue. Large size, hooded, and better than Fascination. Pkt. 5c; Oz. 20c; ¼ Lb. 60c; Lb. \$1.75

BLUE AND MAROON STRIPES

HESTER. Large, finely shaped flowers of open grandiflora type; color purplish blue, marbled and shaded on white ground. Pkt. 5c; Oz. 15c; ¼ Lb. 40c; Lb. \$1.25

ENATOR. Standard broad, very large, delicate lavender, nearly covered with stripes and splashes of purplish maroon; wings medium sized, round, striped with a bluer shade than the standard. Pkt. 5c; Oz. 15c; ¼ Lb. 40c; Lb. \$1.25

VIOLET AND MAROON

BLACK KNIGHT. One of the darkest varieties; very deep maroon flowers of medium size and open form. Pkt. 5c; Oz. 15c; ¹/₄ Lb. 40c; Lb. \$1.50

BOREATTON. Rich, satin-like maroon flowers of open form, Pkt. 5c; Oz. 15c; ¼ Lb. 40c; Lb. \$1.25

HORACE J. WRIGHT. Large violet-maroon flowers with violet wings; somewhat waved, hooded form. Better than Duke of Sutherland. Pkt. 5c; Oz. 15c; 1/4 Lb. 40c; Lb. \$1.25

OTHELLO. A very dark maroon, practically self colored with almost black veining. Large size, hooded form, very attractive. Pkt. 5c; Oz. 15c; ¼ Lb. 40c; Lb. \$1.50

STANLEY. A very beautiful sort of open form. Standard large and flat; color a deep maroon and warmer than Boreatton. Pkt. 5c; Oz. 20c; ½ Lb. 60c; Lb. \$1.75

Mixtures of Sweet Peas

Most people obtain more satisfaction from planting Sweet Peas in mixture than from growing named sorts, but to be successful it is necessary that the seed be of the best quality obtainable. Often what is offered as mixed seed is stock harvested from plants that have come up as volunteers on ground where Sweet Peas have been grown before, or a lot of seed which has been grown, saved or handled so carelessly that it cannot be sold as any distinct variety. The use of such seeds will not give satisfactory results. However, where the seed is grown from the very best stock that can be produced, is mixed in most carefully studied proportions and then the seeds of desirable but shy seeding sorts are added, there is nothing superior for use in the

We assure our customers the Mixtures of Sweet Peas which we offer are the results of as great care in selecting as any stocks we grow and as fine flowers are obtained from them as from any seed that can be bought. We invite comparison with any and all others, no matter under what name or at how high prices offered and are certain that a trial will demonstrate the superiority of our mixtures.

Choice Mixed This mixture has been most carefully grown from our selected stock seed and it will afford a splendid variety of blooms of improved forms and in the widest possible range of desirable colors. Many of the most pleasing and brilliant colors are included. Pkt. 5c; Oz. 15c; 1/4 Lb. 40c; Lb. \$1.25

Ferry's Superb Mixed We make up this mixture by combining in carefully considered proportions twenty-one separate named varieties, each the very choicest of its class. This was done after first carefully considering the desirability of color, form and freedom of blooming in our many trials of nearly two hundred different named sorts. Nowhere else can one procure a more magnificent mixture of finely formed and beautifully colored, large flowering Sweet Peas. Pkt. 5c; Oz. 15c; ¼ Lb. 40c; Lb. \$1.50

Spencers Mixed A splendid mixture of Spencer varieties grown for us by the most careful methods from proven stocks.

A wide range of colors is thus assured in this comparatively new class of Sweet Peas of such remarkably large size and wonderfully attractive form. Pkt. 5c; Oz. 35c; 1/4 Lb. \$1.00; Lb. \$3.00

Ferry's Superb Spencers Mixed We make up this magnificent mixture by combining eighteen separate named spencer varieties, each of which our trials have repeatedly shown to be the very best of its class. Unsurpassed as a mixture of this superb class and showing the most desirable range of colors and the finest forms. No better mixture in all the world than this. Pkt. 10c; Oz. 50c; ½ Lb. \$1.50

(See page 88 for list of named Spencer varieties.)

Sweet William

(Dianthus barbatus) A well known sweet scented old fashioned perennial for bedding and borders, forming fine clumps in any good garden soil and under proper conditions lasting for several seasons. It is one of the most desirable for display in the garden. The plants are easily grown, hardy and free flowering. thus affording splendid bloom for several weeks. The florets are handsomely to four inches across. The colors are exceedingly varied, ranging from white through many shades or clusters, often three to four inches across are lanceolated in shape, and grow opposite or conduplicate.

Some outdoors was adjusted by the proposite of the plants are barbed or bearded and the leaves are lanceolated in shape, and grow opposite or conduplicate.

Sow outdoors very early in spring, preferably in rich, mellow soil, in rows one foot apart. Cover seed with one-fourth inch of fine soil firmly pressed down. When two inches high, thin to six inches apart. In the more northerly latitudes, protect with mulching in winter. Seed can also be sown in fall. There are usually no tlowers until the second season, but if seed is started very early under glass and transplanted, blooms may be had late in autumn. The old clumps may be divided but it is usually more satisfactory to start vigorous young plants every year or two. Hardy perennial; one and one-half feet high.

Black. Flowers reddish, velvety black; very desirable on account of its rich, deep color. Oz. 25c	Pk	t. 5c.
White, pure. Beautiful white flowers, sometimes faintly marked about the eye. Oz. 25c	"	5c.
Fine Mixed. This mixture will be found especially satisfactory. Oz. 25c	"	5c.
Double Mixed. Double flowers in a great variety of colors and shades. Oz. 50c	"	5c.

TAGETES—(See Marigold)

TROPÆOLUM CANARIENSE— (See Canary Bird Flower)

TROPÆOLUM LOBBIANUM— (See Nasturtium, Trailing)

TROPÆOLUM MINOR— (See Nasturtium, Dwarf)

Torenia A fine annual with trumpet-shaped, sky-blue flowers, each having three spots of dark indigo blue and a yellow stain in the center. Plants of bushy habit, about ten inches high. Extremely handsome when grown in pots or out of doors in a shaded location. cation.

This well

Verbena

growing decumbent habit of growth is very desirable for massing in beds on the lawn. It is suitable also for borders and window boxes. (See front cover.)

front cover.)

Large clusters of showy flowers are borne in succession through a long season until frost. Each truss or cluster is about two to three inches across, and includes a dozen or more single flowers about three-fourths of an inch across, tubular with five spreading lobes. The length of stem and texture of the flowers make them of value for bouquets and table decorations. There is a wide range of colors, shades and stripes usually running from pure white to deep purple.

Verbenas usually flower well iu

From pure white to deep purple.

Verbenas usually flower well in August from seed sown in open ground in May. Germination will be hastened if the seed is soaked in lukewarm water before planting. It is desirable to have the soil well fertilized and carefully pulverized. Cover seed about one-fourth inch deep. When the young plants have three or four leaves transplant in rows two feet apart and about twenty-four inches apart in the row, choosing preferably a sunny situation. At this distance the plants, if conditions are favorable, will spread so as to cover the ground completely.

Earlier blooming may be had if plants are started indoors.

Earlier blooming may be had if plants are started indoors and transplanted in the open ground after danger of killing frost is over. Half hardy perennial trailer, one foot high, usually treated as an annual.

Hybrida Defiance. May be relied upon to produce the true, deep scarlet color. No variety gives a more brilliant effect when used as a bedding plant. Oz. \$1.25...........Pkt. 10c.

Hybrida Blue. All shades of blue. Oz. 75c..... " 10c. Hybrida Auriculæflora. Various shades of pink, red. purple and blue, all with distinct white eye. Oz. \$1.00.....Pkt. 10c.

Hybrida White. Produces large, pure white flowers; very floriferous, fine for florists; comes true from seed. Oz. \$1.00.Pkt. 5c.

SWEET WILLIAM

Hybrida Italian Striped. A strikingly attractive and beautiful sort, producing large, brilliant, striped blossoms in great abundance. Oz. \$1.25. Pkt. 10c.

Fine Mixed. This desirable mixture includes a wide range of colors, shades and stripes usually running from pure white to deep name. deep purple. Oz. 75c.....

Mammoth Mixed. Embraces a wide range of the most beautiful colors, the clusters being of largest size. Oz. \$1.75.Pkt.15c.

Hybrida Compacta Mixed. A distinct sort. The plant forms a compact bunch about five inches high and eighteen inches across, covered throughout the season with large trusses of white, scarlet and violet flowers. Pkt. 15c.

VIOLA TRICOLOR—(See Pansy)

Wallflower (Cheiranthus cheiri) An old favorite European garden flower. The long, fragrant terminal spikes of the Wallflower when properly grown are very conspicuous in beds and borders and are them out into pots and sink in the earth. On approach of cold weather remove the pots to the house and the plants will bloom all winter. Tender bushy biennial or perennial that will live through the winter in a mild climate; height of plants about one and one half feet. bloom all winter. To one and one-half feet.

ZINNIA

Wistaria Chinensis One of the most beautiful and rapid growing of the hardy perennial climbers. When well established in good soil it will often grow fifteen to twenty feet during the season and frequently blooms both in spring and fall. The flowers are very fragrant, single, pale blue, peashaped and are borne in long, drooping grape-like clusters, often over a foot in length. Foliage light green, pinnate. The seed should be sown in mellow loam early in the spring, or in greenhouse or hotbed in winter and when plants are one foot high transplanted into permanent situations. Pkt. 20c.

Zinnia

Sometimes called Youth and Old Age. The well known bush-like plants of Zinnias produce a project of Zinnias produce a project of Linnias projec

There is much satisfactor in a bed of Zinnias with their twisted and recurved petalled nowers in many bright colors and when nearly every other flower has been killed by frost this plant is still in full bloom. Few flowers are more easily grown or bloom more abundantly throughout the season, and the wide range of color is not less remarkable than their unusual depth and richness.

Sow the seed early in spring, in open ground in good, rich soil, preferably in rows one and one-half feet apart and covering about one-fourth inch deep. When the young plants are one to two inches high thin to six inches apart. Start under glass for earlier blooming. Half hardy annual; tall growing, usually ahout one and one-half to two feet birth.

Mexicana Hybrida, variegated. Distinctive in its wellformed single flowers of deep maroon and golden yellow,
strikingly contrasted. Flowers similar to French Legion
of Honor Marigold, but are earlier and more easily grown.
Hardy annual; one foot high. Pkt. 15c.

FOR SPRING ROOTS FOR SPRING BULBS AND

Included in this class are some of our most showy garden flowers and their culture is very easy. In the spring, after danger from frost is over, plant in a rich, loamy soil, having a sunny position and flowers the same season are assured. All bulbs and roots will be sent by mail or express, charges prepaid, when ordered at single or dozen rates. At the 100 rate they will be sent by express or freight, the purchaser paying the charges unless otherwise stated. Not less than six of any one variety supplied at dozen rates and not less than 25 at the 100 rate. Orders with money should be sent to us as early as possible and they will be filled in rotation. Bulbs subject to injury by frost will not be sent until such danger is over.

Begonia Tuberous Rooted. The tubers which we offer are of the very best quality and with proper care will give a beautiful display early in the summer. For growing in pots or boxes in the house, plant in rich, sandy soil, give good drainage and water freely after the leaves start but do not let the soil become sour or soggy from over-watering. If it is desired to have a bed outdoors, select a shady, from frost is over. After the plants start into vigorous growth keep well watered.

Third Size Bulbs, Under seven inches in circumference. Each 10c; doz. \$1.00

Dahlia orative" types are characterized by gracefully formed flowers of large

The "Decorative

gracefully formed flowers of large size and broad petals being intermediate in form between the compact "Show" sorts which are nearly round and the "Cactus" varieties which have loosely formed blossoms with long twisted petals. The roots are tender and easily injured by frost. They should be set out three feet apart, after all danger of frost is over. The best blooms are sometimes obtained if planting is deferred until about June 1. Place the roots horizontally, covering two to three inches deep. Give thorough cultivation and during dry weather water well once a week. Larger blossoms are usually obtained if most of the side shoots are removed. The roots should be placed during winter in a cool cellar but not allowed to freeze. Dahlias usually do not require much fertilizer and fresh barnyard manure especially should not be used. The plants should be supported by tying to stakes.

Should be supported by tying to stakes.

Blue Oban. One of the choicest decorative varieties, very large; nearest to a blue dahlia. Each 20c; doz. \$2.00

Cuban Giant (Giant) Dark, glowing crimson, shaded maroon; flowers of immense size; decorative. Each 20c; doz. \$2.00

Gabriel (Cactus) Striking shades of scarlet and clinamon; long twisted, incurved petals give fringed appearance. Each 20c; doz. \$1.75

Jack Rose. Brilliant crimson flowers of large size. One of the best decorative dahlias for garden display or for cutting. Each 20c; doz. \$2.00

Dahlia, Double, pink.

Twentieth Century (Single) Flowers very large, of perfect form and strikingly beautiful; intense rosy crimson with white tips and white disc around yellow center. Each 20c; doz. \$2.00

White Swam (Show) Snow white; unusually full and round with long stems. Each 15c; doz. \$1.50

Yellow Duke (Giant) Pure canary-yellow flowers of very large size. A grand decorative variety. Each 20c; doz. \$2.00

Dahlia, Double, pink.

the best decorative dahlias for garden display or for cutting. Each 20c; doz. \$2.00

Jeanne Charmet. Remarkably free flowering and vigorous decorative variety. Rose shaded and edged with carmine. Flowers of largest size. Each 25c; doz. \$2.50

Lyndhurst. A dazzling bright scarlet; large full-centered decorative sort. Excellent for cutting. Each 15c; doz. \$1.50

Maid of Kent. Cardinal red tipped with white; variable. Each 15c; doz. \$1.50

GLADIOLUS

The Gladiolus is one of the most decorative plants in the garden, and as a cut flower lends itself readily to any arrangement. If the spikes are cut when the lowest flower is in bloom, the others will open in succession and remain fresh a week or ten days. No flower has gained more rapidly in public favor than the Gladiolus; this could not well be otherwise, for in addition to the great intrinsic merit of the flower, it is hardy and blooms the first season from bulbs.

Gladiol will thrive in almost any good soil except a stiff clay. They require full sunlight and are liable to injury only from rank manure. Plant the bulbs six to nine inches apart, the large ones four inches and the small ones two inches deep. Make an early planting of the smallest bulbs first as soon as the ground is sufficiently dry and warm. Continue to plant at intervals of two weeks during the spring and early summer; in this way a succession of bloom may be had from midsummer until frost. A free use of water during the season of active growth and particularly as the buds begin to show color will be beneficial in producing fine blossoms. In the autumn, before freezing, they should be dug up and the tops allowed to dry down, after which the dry tops, earth and old bulbs can be removed. Store in a cool, dry place, secure from frost until spring.

GIANT FLOWERED VARIETIES

A class of hybrids between Gladiolus Gandevensis and Gladiolus Saundersoni which for varied and exquisite beauty has never n equaled. The flowers are of very large size, frequently eight inches across, borne on spikes four to five feet high, the upper been equaled. two feet covered with flowers.

America. The finest of the light colored sorts. Very light pink, exquisitely tinted with lavender. Unsurpassed in freedom of bloom and size of thower spike. A magnificent variety. Each 10c; doz. \$1.00

Attraction. Bright deep rich erimson with large white center and throat. One of the

most pleasing sorts. Each 10c; doz. \$1.00 Baron Hulot. Flowers dark velvety purple and of the Lemoine type. One of the very best so-called blues. Each 15c; doz. \$1.50

Columbia. Very attractive, light orange-scarlet blotched and penciled with bluish purple: throat freely mottled. Each 7c; doz. 70c.

Dawn. Strong, straight and vigorous plant. Flowers large, very beautiful shell pink, slightly penciled in throat. Excellent for cutting. Each 15c; doz. \$1.50

Jane Dieulafoy. Flowers creamy white, lower petals stained maroon. Remains in bloom a long time; exceptionally fine for bouquets. Each 15c; doz. \$1.50

Sunlight. Light rosy crimson with canary yellowthroat; attractively blotched flowers. Each 10c; doz. \$1.00

Giant Flowered, fine mixed. Each 5c doz. 50c.

CHOICE NAMED VARIETIES

These named varieties are selected with special reference to beauty of flower, range of color and habit of plant.

Augusta. Pure white, with blue anthers. Strong, straight spikes. Each 6c; doz. 60c.

Baron Staffe. Clear lilac, stained pale violet and yellow. Each 15c; doz. \$1.50

Brenchleyensis. Rich, brilliant, dark scarlat. Much used on account of its brilliant color and distinct marking. Each 5c; doz. 50c.

Ceres. Beautiful white flowers, spotted rose on lower petals. Each 5c; doz. 30c.

Ceres. Beautiful white flowers, spotted rose on lower petals. Each 5c; doz. 30c. Eugene Scribe. Flowers very large and wide, perfect, tender rose, blazed with carminate red; beautiful. Each 10c; doz. \$1.00 Kunderdi Glory. A very striking variefy with fluted or ruffled petals. Flowers very large, delicate cream pink with a crimson stripe on each lower petal; fine spike. Each 15c; doz. \$1.50 Mrs. Francis King. A most effective variety for decorations. Spikes extra long; flowers brilliant pink, blazed with vermilion. Each 5c; doz. 50c.

Each 5c; doz. 50c.

Madam Monneret. Bright, clear pink. A late variety and very popular. Each 5c; doz. 50c.

doz. 50c.

May. Pure white, finely flaked with bright, rosy crimson, superb spike. Fine for forcing. Each 5c; doz. 50c.

Shakespeare. Flowers well opened on long spike; a very delicate white, blazed with rosy-carmine, large rose-colored stain.

Good for foreing. Each 10c; doz. \$1.00

GLADIOLUS

GLADIOLUS MIXTURES

These choice assortments must not be confounded with the common mixed sorts. We recommend this stock with perfect confidence, as it is composed only of choice varieties and purchasers can depend upon having a magnificent variety of colors. LILIES

No flower is more expressive of the idea of queenly beauty and faultless purity than the Lily. Nearly every variety we offer will, with a little care, endure the severity of our winters, and some are among the most hardy of our garden flowers. Most lilies last a long time after cutting and are admirably suited for decorative

ers. Most mice active the purposes.

Bulbs should be planted as soon as the frost is out of the ground; the earlier the better. Select a well drained spot, dig the soil deep and make it fine, enriching it abundantly with well rotted cow manure, adding a liberal mixture of sand. Set the bulbs from three to five inches deep according to size. During the winter it is advisable to cover the surface of the bed with a thin layer of manure which will afford a slight protection to the bulbs and also materially enrich the soil. In spring the manure may be removed or dug in between the rows. Care should be taken that they have proper drainage, no water being allowed to stand around the roots. Once firmly established, they should not be disturbed oftener than once in five years.

To produce extra fine specimens, plant bulbs in pots early in spring and grow them in the house or under glass.

Auratum (Gold-Banded Lily of Japan) This favorite garden lily is one of the grandest plants in cultivation. Its immense ivory-white flowers are thickly studded with yellow and crimson spots, while in the center of each petal is a golden band. fading at its edges into the white. Such choice bulbs as we offer, if well cared for, will give from five to ten magnificent flowers the first year and under good cultivation will, after becoming well established give many more. Height outdoors in the open, usually three to five feet. 20c. each; \$2.00 per doz.

Longiflorum A very uniform and exceptionally neat plant. Comes readily into bloom for Memorial Day, being a little later forcing variety than Lilium Harrisii and preferred by some to that, since the flowers are of better substance. Extensively used by florists for cut flowers. When grown in the open ground it blooms in June or July. The pure white flowers resemble the well-known Bermuda Easter Lily. Height outdoors in the open, usua lly two to three feet. 12c. each; \$1.25 per doz.

Speciosum Rubrum (Roseum) The Speciosum or Lancifolium are among the most charming and brilliantly beautiful of the Japanese Lilies. The six broad, white or pink petals are thickly dotted with rose or crimson spots. Especially thrifty and hardy. One of the best for garden culture. Height, two to four feet. 20c. each; \$2.00 per doz.

Speciosum Album
Pure white flowers with a greenish band through the center of each petal; of great substance, very fragrant. One of the best for general culture. Height of plants in the open usually two to four feet. 25c. each; \$2.00 per doz.

Tigrinum Splendens (Improved Single Tiger Lily) pearance with very large, nodding flowers of excellent form; color, orange-salmon with dark spots. The plants are of more robust habit, with longer flower spikes than the older type and are highly recommended. Height outdoors in the open usually three to four feet, sometimes taller. 12c. each; \$1.25 per doz.

Tigrinum Flore Pleno (Double Tiger Lily) This stately habit, bearing immense clusters of very large, double flowers on tall, strong stems; color, bright orange-red spotted with black. Height outdoors in the open usually three to five feet. 12c. each; \$1.25 per doz.

Madeira Vine Tuberous rooted climber with glossy green leaves and delightfully fragrant, white blossoms. Sometimes called Mignonette Vine. It is of rapid growth, and from a few tubers vines will be produced sufficient to cover one side of a cottage in a single season. The tubers are tender and must be protected from frost during winter. Each 5c; doz. 40c.

Tritoma Pfitzeri. An improved variety of the plant some flowers are produced in large spikes of rich orange-red tinted flower tubes. Plant two feet apart. Tritomas are hardy south of Cincinnati when well covered in winter. In the north, dig up the plants in November, place in boxes with dry earth and store in a cellar. In spring place in a warm, sheltered, well drained spot, preferably with a background of shrubbery. Each 15c; doz. \$1.50

Tuberose

The flowers of this popular plant are waxy-white, double and exceedingly fragrant. They are useful in buttonhole bouquets, a good way to grow Tuberoses is to fill five-inch pots half full of well rotted cow manure and the remainder with good, rich, sandy soil. Plant the bulbs in this in April, water moderately and hasten growth by putting in a warm, light place. When weather has become warm, plunge the pots in the earth out of doors. They will usually flower before cold weather; if they do not, the pots can be brought in and bulbs will bloom in the house.

Double Dwarf Pearl, extra large bulbs.

Double Dwarf Pearl, extra large bulbs, 4c. each; 40c. per doz; \$2.00 per 100. We will supply second size bulbs 3 for 10 cents, 25 cents per dozen. The 100 rates are by express at purchaser's expense.

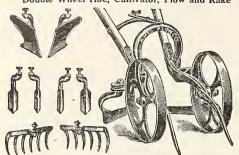

About September First next we will issue our Annual Catalogue of CHOICE DUTCH BULBS AND SEEDS FOR FALL PLANTING. It will be sent free to all customers without ordering it, and to others who apply for it.
