## EXPERIMENT STATION RECORD

Editor: H. L. KNIGHT

EDITORIAL DEPARTMENTS

Agricultural and Biological Chemistry—SYBIL L. SMITH.  
 Meteorology—W. H. BEAL.  
 Soils and Fertilizers—R. W. TRULLINGER.  
 Agricultural Botany and Diseases of Plants—W. H. EVANS, Ph. D., W. E. BOYD.  
 Genetics—H. M. STEECE, J. W. WELLINGTON, G. HAINES.  
 Field Crops—H. M. STEECE.  
 Horticulture and Forestry—J. W. WELLINGTON.  
 Economic Zoology and Entomology—W. A. HOOKER, D. V. M.  
 Animal Husbandry, Dairying, and Dairy Farming—G. HAINES.  
 Veterinary Medicine—W. A. HOOKER.  
 Agricultural Engineering—R. W. TRULLINGER.  
 Rural Economics and Sociology, Agricultural and Home Economics Education—  
 LOUISE MARBUT.  
 Foods and Human Nutrition—SYBIL L. SMITH.  
 Textiles and Clothing—H. M. STEECE, SYBIL L. SMITH.  
 Home Management and Equipment—LOUISE MARBUT, R. W. TRULLINGER.  
 Indexes—MARTHA C. GUNDLACH.  
 Bibliographies—ANNA HOWARD.

### THE AGRICULTURAL EXPERIMENT STATIONS

<p><b>ALABAMA</b>—                  College Station: <i>Auburn</i>; M. J. Funchess.<sup>1</sup>                  Canebrake Station: <i>Uniontown</i>; W. A. Cammack.<sup>1</sup>                  Tuskegee Station: <i>Tuskegee Institute</i>; G. W. Carver.<sup>1</sup></p> <p><b>ALASKA</b>—<i>Sitka</i>: C. C. Georgeson.<sup>1</sup></p> <p><b>ARIZONA</b>—<i>Tucson</i>: J. J. Thornber.<sup>1</sup></p> <p><b>ARKANSAS</b>—<i>Fayetteville</i>: D. T. Gray.<sup>1</sup></p> <p><b>CALIFORNIA</b>—<i>Berkeley</i>: E. D. Merrill.<sup>1</sup></p> <p><b>COLORADO</b>—<i>Fort Collins</i>: C. P. Gillette.<sup>1</sup></p> <p><b>CONNECTICUT</b>—                  State Station: <i>New Haven</i>; } W. L. Slate, jr.<sup>1</sup>                  Storrs Station: <i>Storrs</i>; }</p> <p><b>DELAWARE</b>—<i>Newark</i>: C. A. McCue.<sup>1</sup></p> <p><b>FLORIDA</b>—<i>Gainesville</i>: W. Newell.<sup>1</sup></p> <p><b>GEORGIA</b>—  <i>Experiment</i>: H. P. Stuckey.<sup>1</sup>  <i>Tifton</i>: Coastal Plain Station; S. H. Starr.<sup>1</sup></p> <p><b>GUAM</b>—<i>Island of Guam</i>: C. W. Edwards.<sup>1</sup></p> <p><b>HAWAII</b>—                  Federal Station: <i>Honolulu</i>; J. M. Westgate.<sup>1</sup>                  Sugar Planters' Station: <i>Honolulu</i>; H. P. Agee.<sup>1</sup></p> <p><b>IDAHO</b>—<i>Moscow</i>: E. J. Iddings.<sup>1</sup></p> <p><b>ILLINOIS</b>—<i>Urbana</i>: H. W. Mumford.<sup>1</sup></p> <p><b>INDIANA</b>—<i>La Fayette</i>: G. I. Christie.<sup>1</sup></p> <p><b>IOWA</b>—<i>Ames</i>: C. F. Curtiss.<sup>1</sup></p> <p><b>KANSAS</b>—<i>Manhattan</i>: L. E. Call.<sup>1</sup></p> <p><b>KENTUCKY</b>—<i>Lexington</i>: T. P. Cooper.<sup>1</sup></p> <p><b>LOUISIANA</b>—                  State Station: <i>Baton Rouge</i>; }                  Sugar Station: <i>Baton Rouge</i>; } W. R. Dodson.<sup>1</sup>                  North La. Station: <i>Calhoun</i>; }                  Rice Station: <i>Crowley</i>; }                  Fruit and Truck Station: }  <i>Hammond</i>; }</p> <p><b>MAINE</b>—<i>Orono</i>: W. J. Morse.<sup>1</sup></p> <p><b>MARYLAND</b>—<i>College Park</i>: H. J. Patterson.<sup>1</sup></p> <p><b>MASSACHUSETTS</b>—<i>Amherst</i>: S. B. Haskell.<sup>1</sup></p> <p><b>MICHIGAN</b>—<i>East Lansing</i>: R. S. Shaw.<sup>1</sup></p> <p><b>MINNESOTA</b>—<i>University Farm, St. Paul</i>: W. C. Coffey.<sup>1</sup></p> <p><b>MISSISSIPPI</b>—<i>A. and M. College</i>: J. R. Ricks.<sup>1</sup></p>	<p><b>MISSOURI</b>—                  College Station: <i>Columbia</i>; F. B. Mumford.<sup>1</sup>                  Fruit Station: <i>Mountain Grove</i>; F. W. Faurot.<sup>1</sup>                  Poultry Station: <i>Mountain Grove</i>; T. W. Noland.<sup>1</sup></p> <p><b>MONTANA</b>—<i>Bozeman</i>: F. B. Linfield.<sup>1</sup></p> <p><b>NEBRASKA</b>—<i>Lincoln</i>: E. A. Burnett.<sup>1</sup></p> <p><b>NEVADA</b>—<i>Reno</i>: S. B. Doten.<sup>1</sup></p> <p><b>NEW HAMPSHIRE</b>—<i>Durham</i>: J. C. Kendall.<sup>1</sup></p> <p><b>NEW JERSEY</b>—<i>New Brunswick</i>: J. G. Lipman.<sup>1</sup></p> <p><b>NEW MEXICO</b>—<i>State College</i>: Fabian Garcia.<sup>1</sup></p> <p><b>NEW YORK</b>—                  State Station: <i>Geneva</i>; } R. W. Thatcher.<sup>1</sup>                  Cornell Station: <i>Ithaca</i>; }</p> <p><b>NORTH CAROLINA</b>—<i>Raleigh</i>: R. Y. Winters.</p> <p><b>NORTH DAKOTA</b>—<i>Agricultural College</i>: P. F. Trowbridge.<sup>1</sup></p> <p><b>OHIO</b>—<i>Wooster</i>: C. G. Williams.<sup>1</sup></p> <p><b>OKLAHOMA</b>—<i>Stillwater</i>: C. T. Dowell.<sup>1</sup></p> <p><b>OREGON</b>—<i>Corvallis</i>: J. T. Jardine.<sup>1</sup></p> <p><b>PENNSYLVANIA</b>—                  State College: <i>R. L. Watts</i>.<sup>1</sup>                  State College: <i>Institute of Animal Nutrition</i>  <i>E. B. Forbes</i>.<sup>1</sup></p> <p><b>PORTO RICO</b>—                  Federal Station: <i>Mayaguez</i>; D. W. May.<sup>1</sup>                  Insular Station: <i>Rio Piedras</i>; R. M. Ramos.<sup>1</sup></p> <p><b>RHODE ISLAND</b>—<i>Kingston</i>: B. L. Hartwell.<sup>1</sup></p> <p><b>SOUTH CAROLINA</b>—<i>Clemson College</i>: H. W. Barre.<sup>1</sup></p> <p><b>SOUTH DAKOTA</b>—<i>Brookings</i>: J. W. Wilson.<sup>1</sup></p> <p><b>TENNESSEE</b>—<i>Knoxville</i>: C. A. Mooers.<sup>1</sup></p> <p><b>TEXAS</b>—<i>College Station</i>: B. Youngblood.<sup>1</sup></p> <p><b>UTAH</b>—<i>Logan</i>: William Peterson.<sup>1</sup></p> <p><b>VERMONT</b>—<i>Burlington</i>: J. <sup>1</sup> Director.

<sup>2</sup> On leave.

<sup>3</sup> Superintendent.

## EDITORIAL NOTES

## VOLUME 26

	Page
The Columbus meetings.....	1
The affiliation of societies for agricultural science.....	3
The ethical side of experiment station practice.....	4
Aiding agriculture in Great Britain under the development act.....	101
Progress in agricultural instruction.....	301
The provision of agricultural teachers.....	303
The decline of the station annual report.....	401
Dr. John B. Smith, deceased.....	403
The occupation of the agricultural college graduate.....	601
Agricultural extension at the Southern Commercial Congress.....	701
The organization and administration of extension work.....	703

## VOLUME 27

The need for research in home economics.....	1
Fifth session of the Graduate School of Agriculture.....	101
The agricultural appropriation act of 1912-13.....	301
Dr. M. A. Scovell, deceased.....	401
The anniversary of agricultural education.....	601
The influence of the land-grant colleges on higher education.....	605
The semicentennial of the National Department of Agriculture.....	701
The quarter centennial of the experiment station system.....	708

## VOLUME 28

A closer union of agricultural libraries.....	1
Practical experience as a part of the agricultural course.....	101
The agricultural appropriation act, 1913-14.....	301
The retirement of Secretary Wilson.....	307
The coordination of State agricultural institutions.....	401
The agricultural engineer and some of his opportunities.....	601
Increasing interest in agricultural meteorology.....	701
Opportunity for study of the meteorological conditions of plant environment.....	706

## VOLUME 29

Fourth session of the General Assembly of the International Institute of Agriculture.....	1
The Tenth International Congress of Agriculture.....	101
The quarter centennial of Prof. Thorne's directorship.....	106
Fiftieth anniversary of the American Veterinary Medical Association.....	301
The administrative management of the modern station.....	401
The moral of 25 years.....	404
The essentials of research.....	406
Convention of Association of Agricultural Colleges and Experiment Stations.....	601
Closer relations between the Department of Agriculture and experiment stations.....	604
Research, experiment, and demonstration.....	701
The essentials of research.....	702
Lines of demarcation between experiment and demonstration.....	707

## VOLUME 30

	Page
The letters and writings of Dr. S. W. Johnson.....	1
Rediscovered ideals for agricultural investigation.....	5
Progress of studies in animal nutrition.....	101
Requirements of feeding experiments.....	103
Need of redirection of experimental work in animal husbandry.....	106
The "Village Moderne" at the Ghent Exposition.....	301
The opportunity of the agricultural college for civic betterment.....	305
Journal literature of agricultural science.....	401
The essentials of a scientific paper.....	403
Functions of criticism in agricultural science.....	407
The agricultural extension act.....	601
State and National cooperation in agricultural extension.....	605
The Louisville conference on country-life development.....	608
Rural sanitation—an opportunity for extension work.....	701

## VOLUME 31

The agricultural appropriation act, 1914-15.....	1
Formation of the American Association of Agricultural College Editors.....	101
Sixth session of the Graduate School of Agriculture.....	301
The United States and Canadian commissions on vocational training and some of their conclusions as to agricultural education.....	401
An agency for the publication of agricultural research.....	601
The organization of a section for agriculture in the American Association.....	604
Plant physiology in agricultural courses.....	701
Study of the life of the plant in field experiments.....	704

## VOLUME 32

The Washington convention.....	1
Some effects of extension development.....	4
Renewed importance of agricultural research.....	6
The new Section of Agriculture in the American Association.....	101
Some aspects of the field of rural economics.....	105
The habit of concentration.....	301
The qualities and conditions of research.....	302
A plea for the small laboratory.....	306
The agricultural appropriation act, 1915-16.....	401
A notable contribution to station literature.....	601
The need of constructive ideals in research.....	603
Economic aspects of experiment station work.....	701
Experimental inquiry and economic inquiry.....	703
Relation of the experiment stations to studies in rural economics.....	706

## VOLUME 33

Establishment of the States Relations Service.....	1
Review of the Office of Experiment Stations.....	2
Progress in the organization of agricultural extension work under the Smith-Lever Act.....	101
Some administrative problems being encountered.....	102
The Berkeley convention of the Association of American Agricultural Colleges and Experiment Stations.....	301
The preparation of men for teaching and research in agriculture.....	303
The effective correlation of station and extension work.....	306

	Page
Some other problems before the association.....	307
Some problems in publishing experiment station work.....	401
The practice of outside publication.....	403
The need of a systematic procedure.....	405
The element of chance in agricultural experimentation and investigation.....	601
Fourth Convention of the International Association of Dairy and Milk Inspectors.....	701

## VOLUME 34

Seventeenth Annual Convention of the Association of Southern Agricultural Workers.....	1
The more effective coordination of experiment station work.....	2
Dedication of memorial to Col. W. H. Hatch.....	8
Experience v. investigation in agriculture.....	101
The basis for agricultural extension and demonstration.....	104
Interpretation of experiment station work through extension.....	109
Dr. E. W. Hilgard, deceased.....	301
Agriculture at the Second Pan American Congress.....	303
Science and common sense.....	401
The growth of the science spirit.....	404
Establishment of a Division of Agricultural Meteorology in the United States Weather Bureau.....	601
Recent progress in agricultural meteorology.....	604
The experiment station as a field for the research worker.....	701

## VOLUME 35

Impressions of the stations in the Southwest.....	1
Rural credits legislation in its relation to the agricultural colleges and experiment stations.....	101
The Federal farm loan act.....	104
The agricultural appropriation act, 1913-17.....	301
Seventh Graduate School of Agriculture.....	401
Agriculture and the war in Europe.....	601
Effect of the war on agricultural institutions.....	605
The Washington Convention of the Association of American Agricultural Colleges and Experiment Stations.....	701

## VOLUME 36

The New York meeting of the American Association for the Advancement of Science.....	1
The adjustment of science to practice.....	2
Qualities and organization of research and experiment.....	5
Coordination in scientific effort.....	7
The training of investigators.....	101
Graduate students as research assistants.....	103
Physics in agricultural investigation.....	106
A decade under the Adams Act.....	301
The agricultural appropriation act, 1917-18.....	401
The experiment stations and the war.....	601
The coordination of science and practice in agriculture.....	604
The Federal Aid Vocational Education Act.....	701

## VOLUME 37

	Page
The response of the experiment stations to the present emergency.....	1
The adjustment of theory and practice to war conditions.....	4
Adequate station administration.....	101
Some tendencies under deficient administration.....	105
The Federal food production act.....	301
Research and the research worker in relation to national affairs.....	401
The development of American technical agricultural journals.....	405
The thirty-first annual convention of the Association of American Agricultural Colleges and Experiment Stations.....	601
Attendance at the agricultural colleges as affected by the war.....	701

## VOLUME 38

The opportunity for individual service.....	1
Helping to win the war.....	4
Closer relation of station and extension forces.....	6
An agricultural program.....	101
The regulation of agriculture abroad.....	102
"Speeding up" food production in England.....	107
Report of the commission on the investigation of agricultural education in Massachusetts.....	301
Agriculture under reconstruction.....	401
The place of the experiment stations in a reconstruction program.....	405
A decade of development of the insular experiment stations.....	601
Proposed station work in the Virgin Islands.....	608
The first decade of the International Institute of Agriculture.....	701

## VOLUME 39

The development of agricultural research in Australia.....	1
Scientific activity as a national asset.....	101
Responsibility for the development of science.....	104
The agricultural appropriation act, 1918-19.....	301
Reconstruction measures in Great Britain.....	401
The outlining of an agricultural policy.....	402
A new attitude toward cooperation and coordination.....	601
The organization of science for research.....	603
The thirty-second annual convention of the Association of American Agricultural Colleges and Experiment Stations.....	701

## VOLUME 40

The present position and outlook of the stations.....	1
Some effects of association.....	2
The need for safeguarding agricultural investigation.....	6
The Rothamsted Station in war time.....	101
Suggestions for agricultural education and research in Victoria.....	105
Birmingham meeting of the Southern Agricultural Workers.....	301
Abstract journals after the war.....	304
The return of station workers from war service.....	401
The influence of the war on station work in the future.....	403
The organization of agricultural research work in India.....	601
Science and prophecy.....	701
Elements of progress in research.....	702
Long-continued projects.....	705

# SUBJECT INDEX

NOTE.—The numbers inclosed in parentheses refer to volumes, the others to pages.

- Abacá**—  
 binder twine from, (27) 534.  
 culture and grading, (32) 828.  
 culture experiments, (30) 434; (36) 229.  
 culture in Philippines, (30) 230.  
 fiber, anatomy, (36) 229.  
 fiber, strength, (29) 313.  
 insects affecting, (38) 460.  
 production in Philippines, (39) 231.  
 standard grades, (36) 634.
- Abbe, C.**, biographical sketch, (35) 699.
- Abbella**—  
*americana* n.sp., description, (38) 661.  
*auriscutellum* n.sp., description, (34) 556.  
*auriscutellum* n.sp., notes, (33) 357.  
*perditrix* n.sp., description, (40) 760.  
*subflava*, notes, (34) 66.
- Abbotana clemataria**, studies. (36) 54.
- Abderhaiden**—  
 protective ferments of, diagnostic value, (33) 279.  
 reaction, studies (34) 577, 674; (35) 73, 179; (36) 380, 381; (39) 583, 886.  
 test, quantitative application. (32) 372.  
 test, sensitization of substratum for, (33) 385.
- Abera gardnerii**, culture experiments, (31) 441.
- Abia inflata**, notes, (28) 158.
- Abies**—  
*balsamea* as host of fern rusts, (29) 645.  
*concolor*, length of tracheids in, (33) 143.  
*concolor*, oils of, (33) 203.
- Ablerus**—  
*clisiocampae*, notes, (26) 152; (27) 556; (36) 556; (37) 667.  
 n.sp., notes, (27) 556.  
*perspicuosus* n.sp., description, (36) 259.
- Abney hand level**, use, (33) 393, 843.
- Abor tea**, notes, (29) 463.
- Abortin**—  
 as an immunizing agent, (28) 380.  
 diagnostic value. (29) 81, 500; (31) 380.  
 tests, (28) 480, 585.  
 therapeutic value, (34) 82.
- Abortion**—*see also* *Bacillus abortus*.  
 and sterility in cows, (29) 80, 81.  
*bacillus*, *see Bacillus abortus*.  
 bacterium in milk, (27) 281.  
 bibliography, (39) 681.  
 blood tests, (40) 885.  
 control, (38) 687; (39) 681.  
 control in England, (36) 275.  
 control in Michigan, (37) 274.  
 control in Oregon, (37) 374.  
 diagnosis, (26) 585, 681; (27) 581, 582, 682; (28) 284, 379, 380, 480; (29) 586, 779; (30) 184; (31) 379, 380; (33) 284; (34) 880; (35) 681; (37) 276.  
 dissemination, (36) 277.  
 effect on milk, (33) 774.  
 epizootic—  
   in cattle, (29) 481.  
   cows, (26) 381.  
   domestic animals, (33) 578.  
   mares, (29) 281; (30) 586.  
   sheep, (30) 684.  
 etiology, (27) 576.  
 immunization, (26) 578; (28) 380; (30) 184; (33) 679; (36) 481.  
 in cattle, (27) 77, 287, 478, 885; (28) 585; (29) 80, 305, 500, 677, 778; (31) 285, 779; (34) 581, 782; (35) 784, 879; (36) 82, 383, 675, 676, 680, 777, 881, 882, 883; (37) 181, 482, 687, 691; (38) 179, 183, 486, 588, 684, 787, 796; (39) 81, 83, 289, 391, 491, 589, 890; (40) 86, 290, 585, 782.  
 cattle, treatment, (28) 781; (29) 969.  
 cows, (26) 381, 681, 784; (30) 280; (32) 82, 581, 677.  
 live stock, (26) 883.  
 mares, (27) 77; (35) 282; (36) 780; (39) 891.
- Abortion—Continued.**  
 in mares—  
   and cows, (39) 188.  
   and jennets, (34) 185.  
   cause, (28) 886; (31) 683; (33) 183.  
   immunization, (35) 80.  
   in Ontario, (33) 879.  
   studies, (31) 381.  
   pigs, (31) 886; (36) 483.  
 notes, (27) 77, 181; (31) 177; (40) 778.  
 papers on, (34) 184, 575.  
 persistence of bacillus, (30) 583.  
 prevalence in—  
   Canada, (36) 179.  
   Great Britain, (34) 382.  
   Rhodesia, (35) 76.  
   United States, (37) 274.  
 review of literature, (35) 884.  
 studies, (27) 580, 581; (29) 779; (33) 278, 384; (34) 386; (37) 779; (39) 289; (40) 184, 383.  
 transmission by milk, (36) 480; (37) 78, 79; (38) 286; (39) 83.  
 treatment, (30) 184, 279; (40) 782, 885.  
 vaccine for, (34) 184.
- Abrin**—  
 and its antitoxins, (32) 78.  
 in locust seeds, (30) 204.  
 investigations, (31) 775.  
 notes, (26) 676.
- Abscess formation in hogs due to vaccination**, (39) 392.
- Abscission**—  
*Coleus blumei*, (40) 325.  
 plants, (36) 225.  
 Solanaceae, (39) 226.
- Absinth**, notes, (27) 665.
- Absorbents**, effect on soils, (36) 214.
- Absorption**—  
 and evaporation, (38) 210.  
 and transpiration in plants, differentiation, (26) 822.  
 in solutions, discussion, (27) 215.  
 pipettes, description, (40) 308.  
 review of investigations, (36) 622.  
 test, Castellani's, (40) 288, 579.
- Abstract journals after the war**, (40) 304.
- Aburachan seed**, oil of, (37) 109.
- Abutilon**—  
 moth, studies, (30) 157.  
 mucilage of, (40) 819.  
 spp. as host of cotton pests, (39) 160.  
 theophrasti seeds, permeability, (38) 126.
- Acacia**—  
 ants of Central America, (31) 452.  
*arabica*, beetles, affecting, (27) 863.  
*arabica*, descriptive account, (38) 45.  
 descriptive notes, (36) 45.  
 false, as coffee substitute, (40) 508.  
*farnesiana* injurious to horses, (37) 778.  
 galls, lycenid in, (31) 352.  
 gummosis, notes, (30) 543.  
 mollissima—  
   anatomy and distribution of tannin in, (33) 523.  
   motiling in, (33) 151.  
   nodules, analyses, (28) 815.  
   sap ascent in, (29) 524.  
*pycnantha* seeds, nitrogen in, (34) 729.  
 seedlings, studies, (39) 226.  
 seedlings, variation in, (35) 329.  
 spp., analyses and digestibility, (27) 871; (32) 167.  
 spp. of Australia, description, (36) 844.
- Acacias**—  
 economic importance, (30) 146.  
 of South African thorn veld, (39) 525.  
 tannin-yielding, of Senegal, (31) 839.
- Acalloides spp.**, notes, (30) 357.

- Acalypta grisea* n.sp., description, (37) 563.  
*Acamatus schmitti* destructive to Argentine ant, (31) 256.  
*Acanthaphis* n.g., description, (40) 60.  
*Acanthia lectularia*, see Bedbugs.  
*Acanthis linaria* destructive to Chinese cotton scale, (26) 556.  
*Acanthocephala*—  
 American species, (39) 359.  
 notes, (39) 892.  
 parasitic in birds, (31) 184; (39) 556.  
 review of studies, (31) 154.  
*Acanthomyops interjectus*, remedies, (34) 62.  
*Acanthorhynchus vaccini*, treatment, (39) 749.  
*Acanthoscelides obtectus*, see Bean weevil.  
 Acari—  
 on brown rats, (32) 353.  
 parasitic on mammals and birds in Great Britain, (37) 859.  
 parasitic on rodents, (33) 159.  
 Acarids, new, of Italy, (38) 460.  
 Acarina—  
 monograph, (34) 458.  
 of Barbados, (40) 56.  
 parasitism in, (27) 866.  
*Acarophenax tribolii* n.g. and n.sp., notes, (40) 855.  
*Acaulium* spp. in Norway, (31) 327.  
*Acaulona peruviana* n.sp., notes, (29) 358.  
*Accipiter cooperi*, notes, (27) 355.  
 Acclimatization of plants, (30) 328.  
 Accounting, farm, see Farm accounting.  
 Acer—  
 macrophyllum, notes (27) 846.  
 platanoides, measurements of hypocotyl, (28) 739.  
 pseudoplatanus—  
 regional spread of moisture in, (40) 541.  
 variations in salt content, (29) 28.  
*Acerates viridiflora*, leaf variation in, (27) 741.  
*Acerbia maydis* n.sp., notes, (37) 148.  
*Acerophagus* n.spp., descriptions, (25) 858; (40) 359.  
 Acetaldehyde—  
 in grape must, (36) 801.  
 in orchard fruits, (37) 246.  
 synthesis in fruits, (35) 611.  
 Acetamid—  
 as source of ammonia, (29) 723.  
 assimilation by plants, (26) 32.  
 nitrification rate, (32) 124.  
 Acetanilid—  
 determination in headache tablets, (27) 499.  
 methods of analysis, (33) 413.  
 Acetates, determination, (37) 617.  
 Acetic acid—  
 decomposition by sunlight, (30) 431.  
 detection in ethyl alcohol, (29) 312.  
 determination (33) 804; (38) 506; (39) 506.  
 effect on—  
 bread fermentation, (27) 268.  
 calcium phosphate, (36) 712.  
 hemolytic reaction, (36) 878.  
 inner qualities of rubber, (37) 347.  
 milk fat, (34) 507.  
 Penicillium glaucum, (26) 203.  
 rotatory power of sucrose and invert sugar, (37) 802.  
 in silage, (27) 205; (28) 608.  
 manufacture on rubber estates, (38) 715.  
 preparation from corncobs, (40) 17.  
 production from wood, (28) 50.  
 rôle in digestion, (36) 763.  
 toxicity, (28) 661.  
 Acetic ether as soil disinfectant, (31) 621.  
 Acetin as butter adulterant, (26) 508.  
 Acetone—  
 alcohol, nature and use, (26) 580.  
 determination, (39) 311.  
 effect on hemolytic reaction, (36) 878.  
 in milk, (35) 202.  
 production from wood, (28) 50.  
 sterilization of soils by, (32) 816.  
 waste products as source of lime, (38) 22.  
 Acetyl—  
 group, occurrence in lignin, (27) 310.  
 number of oils, determination, (31) 713.  
 Acetylene—  
 detection, (34) 714.  
 for small lighting plants (28) 788.  
 gas, effect on plants, (27) 826.  
 Acetylene—Continued.  
 gas for heating and lighting, (38) 190.  
 gas for mange parasites, (35) 279.  
 waste products as source of lime, (38) 22.  
 Achaeta moria, notes, (31) 58..  
*Acherontia lachesis*, studies, (40) 62.  
 Achetoidea of South America, (37) 157.  
*Achillea millefolium*, volatile oil of, (35) 807.  
*Achlya* sp., reproduction in, (38) 225.  
*Achoreutes armatum*, notes, (27) 658; (36) 854.  
 Achorion—  
 quinckeanum infection, studies, (40) 583.  
 schönleinii, studies, (40) 483.  
*Achorutes viaticus*, biology, (32) 552.  
*Achraea griseola*, immunity to tuberculosis, (31) 155.  
 Achras, ripening processes of, (26) 310.  
 Achroodextrinase, bacterial, preparation, (37) 411.  
*Achrysocharella albitibiae* n.sp., description, (37) 667.  
 Achrysocharelloidea in North America, (36) 557.  
 Acid—  
 accumulation and destruction in large succulents, (34) 730.  
 albumin, production of anaphylaxis by, (26) 374.  
 amids, ammonification in soils, (32) 718.  
 amids as sources of ammonia in soils, (29) 723.  
 amids, behavior in soils, (28) 813.  
 amins, determination and transformation in soils, (31) 515.  
 excretion—  
 as affected by water drinking, (34) 763.  
 during fasting, (30) 764.  
 of roots, (27) 514.  
 studies, (29) 62.  
 phosphate, see Superphosphate.  
 reaction on milk, (27) 810.  
 Acidia heraclei, notes, (33) 860, 862.  
 Acidimetric—  
 solutions, standardization, (31) 501.  
 titrations, indicator for, (39) 807.  
 Acidimetry—  
 indicator for, (36) 13.  
 of chlorinated solutions, (39) 506.  
 of colored solutions, (39) 503.  
 Acidity—  
 as test for flour, (33) 64.  
 determination in—  
 flour, bread, etc., (33) 14.  
 milk, (26) 113; (32) 606.  
 potatoes, (34) 807.  
 silage, (30) 415.  
 soil, see Soil acidity and Soils, acid.  
 Acidosis—  
 and creatinuria, (40) 765.  
 catalase in, (38) 870.  
 causes, (35) 473.  
 effect on creatin elimination, (36) 161.  
 in omnivora and herbivora, (32) 566; (33) 368; (34) 261.  
 studies, (34) 462, 763.  
 Acids—  
 absorption by plant tissue, (37) 433.  
 alkaline reaction in soils, (30) 122; (34) 720; (37) 18.  
 amino, see Amino acids.  
 and salts, antagonism between, (34) 429.  
 as affected by humus acid, (34) 324.  
 detection in cheese, (32) 313.  
 determination in—  
 cane juice, (27) 814.  
 fruit juices, (39) 107.  
 oils and fats, (26) 411.  
 soils, (28) 708.  
 effect on—  
 activity of sucrase, (27) 803.  
 Aspergillus niger, (27) 848; (29) 734.  
 bread fermentation, (27) 268.  
 catalase of taka-diastase, (31) 13.  
 concrete, (29) 184.  
 denaturation rate of proteins, (29) 502.  
 growth of rice, (34) 31.  
 lime requirements of soils, (36) 210.  
 malt diastase, (31) 806.  
 metabolism of pigs, (30) 268.  
 permeability, (34) 429.  
 plants, (37) 224.  
 rotatory power of sucrose and invert sugar, (37) 802.  
 seed germination, (26) 131; (36) 29.

- Acids—Continued.  
 effect on—continued.  
     soil bacteria, (37) 213.  
     soil granulation, (26) 420.  
 excretion by roots, (37) 222; (39) 27.  
 fatty, *see* Fatty acids.  
 hydrolyzing power in presence of invertase, (30) 86.  
 importance in digestive processes, (31) 772.  
 inhibition of oxidase activity by, (37) 9.  
 "Iclair bleu" test, (40) 311.  
 localization in fleshy fruits, (25) 226; (36) 110.  
 mineral, action on natural phosphate rock, (36) 711.  
 monoamino, detection in presence of polypeptides, (27) 410.  
 monobasic, as affected by Bulgarian ferment, (26) 203.  
 nonvolatile, of butter, refraction, (27) 312.  
 of agricultural products, identification, (40) 13.  
     fruit wines, (37) 310.  
     honey, (28) 166.  
     humus, (33) 609.  
 organic, action on pepsin, (36) 763.  
 organic, as affected by fungi, (27) 526.  
 organic, effect on—  
     carbon assimilation of plants, (27) 525.  
     fungi, (26) 203.  
     respiration of seeds, (27) 729.  
     tin, (26) 867.  
     wheat bread, (27) 462.  
 organic—  
     humification, (38) 26.  
     in soils, (32) 718.  
 reactions of ions and molecules, (37) 201.  
 rôle in—  
     digestion, (36) 763.  
     germination of seeds, (29) 26; (30) 521.  
 toxic inorganic, effect on plant growth, (30) 130.  
 toxicity, (28) 661.  
 vegetable, toxicity, (28) 443.  
 volatile—  
     aliphatic, of silage, (28) 608, 609.  
     determination, (37) 803.  
     determination in wine, (36) 112.  
     fatty, determination, (36) 506; (37) 13, 413; (38) 504.  
     fatty, distillation, (33) 414.  
     fatty, effect on milk secretion, (32) 471.  
     fatty, variation in milk fat, (30) 272.  
     formation after fermentation, (27) 223.  
     in honey, (26) 25; (27) 112.  
     in ripening cheese, (28) 879.  
     production by anaerobic bacteria, (33) 30.  
 Acidum nucleicum, nature and use, (26) 580.  
 Acne in horses, treatment, (33) 286.  
 Acocephalus—  
     spp., life histories, (35) 553.  
     striatus, notes, (33) 356.  
 Acokanthera venenata, notes, (35) 678.  
 Aconitum columbianum, description, (39) 386.  
 Acontia delecta, studies, (40) 754.  
 Acontianae in British Museum, catalogue, (28) 856.  
 Acorn poisoning in cattle, (26) 586.  
 Acorns—  
     analyses, (26) 371, 872; (38) 410.  
     analyses and feeding value, (31) 365.  
     composition and digestibility, (27) 669.  
     drying, (27) 669.  
     feeding value, (30) 169; (32) 566; (38) 168.  
     for fowls, (35) 172.  
     germinating, (36) 242.  
     storage in winter, (29) 343.  
     tannin-colloid complex in, (28) 528.  
 Acorus calamus, oils of, (34) 407.  
 Acremonium alternatum, notes, (32) 843.  
 Acremonium sp., notes, (28) 733.  
 Acridians—  
     injurious in Nova Scotia, (37) 156.  
     insect enemies of, (32) 848.  
 Acrididae—  
     egg-laying habits, (39) 656.  
     injurious in north Georgia, (36) 252.  
     of Minnesota, (31) 650; (32) 753.  
     of Nova Scotia, (38) 156.  
 Acridiinae, notes, (27) 858.  
 Acridity in plants, (34) 731.  
 Acridium peregrinum, *see* Locusts, migratory.  
 Acridoidea, South American, notes, (27) 55.  
 Acriflavin, antiseptic value, (39) 680; (40) 182.  
 Acrobasis—  
     caryae, notes, (28) 554; (40) 259.  
     nebulella, studies, (38) 656.  
     spp. affecting pecan, (38) 157, 762; (39) 557.  
     spp., notes, (38) 256.  
 Acroceroops cramerella—  
     notes, (29) 855.  
     relation with cacao ant, (39) 156.  
 Acroceroops—  
     sp., notes, (31) 849.  
     strigifinitella, *see* Neurobathra strigifinitella  
 Acroceridae of North America (40) 757.  
 Acrocomia sclerocarpa, oil content, (31) 234  
 Acrocystis batatae—  
     notes, (33) 347.  
     studies, (34) 156; (36) 544.  
 Acropteron rufipes, notes, (32) 352.  
 Acroptilon picris, notes, (32) 436.  
 Acrostalagmus—  
     albus, description, (33) 459.  
     caulophagus n.sp., description, (28) 348.  
     sp. on maples, (33) 249, 544.  
     sp., relation to potato stem lesions, (39) 649  
 Acrylic acid, isolation from soils, (28) 418.  
 Actia pilipennis—  
     biology, (39) 658.  
     notes, (35) 659.  
 Actinidias, Asiatic, notes, (28) 841.  
 Actinomyces—  
     albo-roseus, notes, (31) 15.  
     chromogenus—  
         as affected by acidity, (40) 644.  
         as affected by cold, (34) 538.  
         notes, (40) 844, 847.  
         relation to temperature, (33) 245.  
         studies, (32) 546; (33) 547.  
         treatment, (39) 755.  
     in limed cranberry soils, (40) 214.  
     lanfranchii, studies, (37) 482.  
     melanocyclus, notes, (31) 14.  
     odorifera, notes, (26) 881.  
     penicilloides n.sp., studies, (40) 721.  
     pneochromogenus n.sp., description, (37) 517.  
     poolensis n.sp., association with Cytospora batata, (39) 456.  
     scabies, notes, (30) 748.  
     scabies, studies, (36) 847.  
     sp. in Norway, (34) 226.  
     spp., proteolytic activity, (40) 721.  
 Actinomycetes—  
     as affected by inorganic salts, (36) 526.  
     function in soils, (35) 525; (36) 518.  
     in soils, (29) 222; (37) 517.  
     nitrogen transformations in, (31) 324.  
     pathogenic, studies, (40) 478.  
 Actinomycosis—  
     acute, in horses, (26) 787.  
     bovine, notes, (34) 782.  
     bovine, pathology, (35) 488.  
     in cattle, (29) 886.  
     in South American ox tongues, (31) 882.  
     notes, (32) 781.  
     of the mammary gland in dairy cattle, (30) 884  
     of the rectum in horses, (27) 86.  
 Actinonema rosae—  
     notes, (29) 552; (30) 537; (37) 348.  
     perfect stage of, (26) 650; (28) 449.  
     treatment, (27) 747; (38) 453.  
 Actinopelte japonica (?) on oak, (33) 250.  
 Actuaia spp. parasitic in fowls, (31) 184.  
 Acucula saltans n.g. and n.sp., description, (30) 159.  
 Acythopeus—  
     citrulli n.sp., description, (35) 365.  
     gilvornotatus n.sp., description, (40) 655.  
     orchivora, notes, (40) 754.  
 Adalia—  
     bipunctata—  
         negative geotropism of (30), 357.  
         notes, (30) 657.  
         studies, (39) 663.  
     spp., life history, (33) 562.  
 Adams Act—  
     administering fund, (28) 639.  
     decade of work under, (36) 301.  
     research at Cornell, (28) 639.  
 Adansonia digitata, fiber from, (37) 534.  
 Adelenecyrtus odonaspidis n.sp., notes, (29) 253.  
 Adelphocoris rapidus, notes, (33) 352, 744.  
 Adelura apii, notes, (33) 862.  
 Adelura gahani n.sp., description, (38) 264.

- Adenin**—  
 antineuritic properties, (40) 271.  
 in cow's milk, (37) 308; (38) 506.  
 hops, (32) 502.  
 molasses, (29) 614.  
 mulberry leaves, (31) 203.  
 rice polishings, (33) 167.  
 soils, (28) 418.  
 tea, (31) 358.
- Adenitis**, caseous, in swine, (37) 82.
- Adenosin**, metabolism of, (32) 256.
- Adia genitalis**, notes, (31) 852; (34) 449.
- Adipocere**, composition, (37) 309.
- Adipose tissue**, histogenesis of, (26) 366.
- Adisura atkinsoni**, notes, (38) 359.
- Adjab fat**, detection, (29) 613.
- Adobe** as building material, (27) 599.
- Adonite** as source of carbon for molds, (30) 226.
- Adoretus**—  
 spp., notes, (29) 858.  
*tenuimaculatus* in Hawaii, (34) 59.  
*umbrosus*, remedies, (38) 842.  
*vestitus* in Samoan Islands, (33) 158.
- Adoxus obscurus**, see Grape root worm.
- Adrenal functioning**; dependence on pituitary secretion, (29) 882.
- Adrenalin**—  
 determination in blood, (29) 408.  
 effect on milk production, (37) 173, 272.  
 effect on sex determination, (28) 63.  
 neutralization of tetanus antitoxin by, (30) 479.  
 use against milk fever, (26) 580.
- Adrenals**, effect on diabetic metabolism, (33) 754.
- Adsorption**—  
 phenomena, review of investigations, (35) 432.  
 use in biochemical analysis, (29) 408.
- Adults and infants**, digestion in, (34) 167.
- Advisory Board of American Plant Pathologists**, (40) 698.
- Adzuki beans**—  
 description, (31) 739.  
 for classroom work in genetics, (37) 831.  
 notes, (26) 362.  
 studies, (40) 131.  
 varieties, (26) 829.
- Aecidium**—  
*blasdaleanum* on pome fruits, (31) 150.  
*callistephi* n.sp., description, (34) 242.  
*clematidis*, effect on leaves of host, (37) 549.  
*enceliae* n.sp., from the Andes, (40) 133.  
*gossypii*, notes, (40) 154.  
*gossypii*, studies, (38) 149.  
*grossulariae*, notes, (33) 647.  
 index of species, (29) 749.  
*lactucae sativae*, notes, (30) 448.  
*Muricatum* and *Gymnosporangium ellisii*, identity, (32) 341.  
*sorbi* and *Uredo nootkatensis*, identity, (35) 844.  
 sp. on pomaceous hosts, (31) 345.  
 spp., telial stages, (36) 245.  
*tubulosum* and *A. passifloricola*, studies, (40) 344.
- Aedes**—  
*argenteus*—  
 as carrier of dengue fever, (39) 263; (40) 552.  
 development in relation to bacteria and yeasts, (37) 763.  
 distribution and bionomics, (27) 656.  
 eggs, vitality, (39) 157.  
 in Russia, (33) 749.  
 notes, (28) 254; (29) 656; (35) 258, 361.  
 studies, (29) 252.  
 new, of California, (36) 552.  
*scutellaris*, studies, (29) 252.  
 spp., notes, (28) 254; (38) 766.  
*sylvestris* as anthrax carrier, (39) 161.
- Aegeria**—see also *Sesia*.  
*exitiosa*, see Peach borer.  
*tipuliformis*, see Currant borer.
- Aegerita webberi**—  
 description, (33) 459.  
 notes, (26) 350, 860.
- Aegilops**—  
 and *Triticum*, hybrids of, (30) 341.  
 ovata, chromosome numbers in, (27) 636.  
 ovata, relation to cultivated wheat, (32) 131.  
 spp., relation to wheat mildew, (35) 651.
- Aelia germari cognata**, notes, (30) 854.
- Aelia rostrata**, notes, (35) 56.
- Aenasioidae**—  
*laticapus* n.g. and n.sp., description, (26) 254.  
 n.spp., descriptions, (35) 858.
- Aenoplegimorpha phytonomi**—  
 n.sp., description, (29) 563.  
 notes, (27) 561.
- Aenoplex**—  
*carpocapsae*, notes, (38) 565.  
 n.spp., descriptions, (30) 262.  
*nigrosoma* n.sp., description, (38) 565.  
*plesiotypus*, notes, (38) 565.  
 sp., studies, (26) 458.
- Aeolopus bruneri**, remedies, (34) 159.
- Aeolothripidae**, synopsis, (31) 452.
- Aeolothrips**—  
*bicolor*, notes, (28) 250.  
*fasciatus*, notes, (28) 250, 452.  
*floridensis* n.sp., description, (37) 561.  
 North American species, (37) 561.  
*vitis*, notes, (32) 754.
- Aeration of soils**, see Soils, aeration.
- Aerial contamination** in amebic infections, (26) 677.
- Aero-electric plant**, construction, (34) 191.
- Aerological**—  
 observations, (40) 19, 209, 715.  
 research in Canada, (35) 618.  
 Station, Drexel, (36) 419.
- Aerology**, standard units in, (31) 615.
- Aerostatic hairs** of lepidopterous larvae, (30) 55.
- Aeschynomene**—  
*americana*, culture, (34) 736.  
 indica as a green manure, (38) 234.
- Aesiotus leucurus**, notes, (27) 60.
- Afermol**, nature and use, (26) 580.
- Afforestation**, see Forestation.
- African coast fever**—  
 blood observations in, (36) 479.  
 complement fixing in, (26) 882.  
 immunization, (26) 173, 683, 882; (29) 284, 476; (31) 585; (32) 273; (35) 678.  
 investigations, (26) 678.  
 notes, (28) 478; (34) 879.  
 transmission, (26) 882; (29) 584; (30) 79.  
 treatment, (33) 478.
- African horse sickness**—  
 immunization, (26) 579.  
 transmission by *Stomoxys calcitrans*, (28) 756.
- Agalactia**, contagious—  
 in goats, (39) 492.  
 in goats and sheep, (29) 179; (30) 584; (31) 884; (40) 782, 783.
- Agallia sanguinolenta**—  
 notes, (27) 858.  
 remedies, (35) 465.
- Agaonella larvalis** n.g. and n.sp., description, (30) 55.
- Agaonidae** of Australia, (39) 154.
- Agar**—  
 agar—  
 ash analyses, (29) 861.  
 for bacteriological use, (36) 131.  
 Japanese, chemical studies of algae used in, (40) 110.  
 use in food products, (34) 167.  
 anaphylatoxin, studies, (37) 579.  
 effect of intravenous injections, (37) 580.  
 nutritive value and use, (36) 864.  
 plates, filling and inoculation (40) 805.  
 plates, photographic records, (40) 881.  
 sources, preparation, and composition, (36) 716.
- Agaricus**—  
*campestris*—  
 composition, (30) 804.  
 effect on red blood corpuscles, (30) 879.  
 nutrition, (26) 440.  
*maximus*, notes, (31) 247.  
*melleus*, notes, (26) 750; (35) 155; (40) 749.  
*mucidus*, notes, (27) 51.  
*muscarius*, precipitating serum for protein<sup>o</sup> (30) 880.  
 tabularis, effect on vegetation, (38) 222.
- Agathi weevil**, egg-laying habits, (38) 359.
- Agati grandiflora**, notes, (29) 652.
- Agave**—  
*americana*, composition, (40) 710.  
 anthracnose, notes, (29) 346.  
 diseases, notes, (28) 850; (31) 54.  
 fibers of Tunis, (37) 535.  
*rigida sisilana*, culture in Sicily, (34) 227.  
*sisalana*, leaf disease of, (35) 846.

- Agave—Continued.  
 spp., binder twine from, (27) 534.  
 spp., fibers, strength of, (29) 313.
- Agaves—  
 culture in India, (28) 634, 736.  
 feeding value, (40) 276.  
 fiber-producing, description, (38) 529.  
 fodder from, (30) 371.  
 frozen, as affected by rapid thawing, (32) 43.  
 in West Indies, (30) 526.  
 manufacture of alcohol from, (26) 415.  
 of Durango, Mexico, (31) 132.  
 studies, (27) 33.  
 treatise, (33) 131.
- Agchylostoma duodenale, anatomy and life history, (32) 759.
- Age—  
 as a factor in animal breeding, (31) 367; (33) 265.  
 relation to fecundity, (28) 767; (40) 468.
- Agelaius—  
 phoeniceus, environment, life history, and ecology, (32) 151.  
 spp., destruction of locusts by, (28) 351.
- "Agelarine," notes, (37) 744.
- Agelastica—  
 (Galeruca) alni, notes, (28) 554.  
 sp., notes, (27) 453.
- Agelasps fuscicollis, parasitism, (31) 458.
- Agglutinating principle in blood of transfused rabbits, (39) 584.
- Agglutination—  
 acid, of bacteria, (27) 384.  
 effect of sodium chlorid on, (40) 778.  
 notes, (32) 78.  
 reaction, mechanism, (37) 376.  
 reaction, notes, (30) 204.  
 reactions in hog cholera, (26) 785; (27) 289, 384.  
 studies, (40) 82.  
 technique and methods, (26) 676.  
 test—  
 diagnostic value for abortion, (29) 586.  
 rapid method, (39) 887.  
 standardizing reports, (38) 78.
- Agglutinin—  
 disappearance from blood of anaphylactic and normal animals, (37) 76.  
 from beans, (37) 81.
- Agglutinins, experimental production in animals, (30) 878.
- Aggregata eberthi, chromosom cycle, (34) 458.
- Aggregates, road, *see* Road materials.
- Aglaophenia helleri, biometrical study, (26) 162.
- Aglycideridae, catalogue, (26) 560.
- Agoutis, new, from Panama and Nicaragua, (37) 757.
- Agrarian—  
 matters, treatise, (29) 391.  
 problem in Mexico, (34) 489.  
 protection in Belgium, (26) 93.  
 reforms in Russia, (30) 192.  
 system in England, treatise, (32) 793.
- Agrarianism, treatise, (31) 93.
- Agria affinis, studies, (29) 760.
- Agricere of soils, notes, (27) 621.
- Agricultural—  
 activities of Jews in America, (29) 89.  
 adviser, work and value, (38) 594.  
 agencies, consolidation in British West Indies, (26) 495.  
 agencies in Peru, reorganization, (26) 698.  
 and live stock producers, advisory committee, report, (39) 295.  
 and mechanical society of South Carolina, history, (36) 688.  
 apprenticeships, notes, (28) 296.  
 appropriations in New York State, (30) 199.  
 arithmetic, notes, (27) 898.  
 arithmetic, textbook, (30) 795; (36) 597; (37) 95, 297.  
 associations—  
 cooperative, (38) 796.  
 in Bavaria, (34) 391, 392.  
 Canada, (33) 93.  
 France under war conditions, (35) 693.

 yearbook, (34) 494.

## Agrilus—

- anxious, *see* Birch borer, bronze.  
 bilineatus, *see* Chestnut borer, two-lined.  
 burkei n.sp., description, (37) 566.  
 champlaini, notes, (28) 554.  
 dozieri n.sp., description, (40) 759.  
 egenus, notes, (35) 356.  
 hastulifer, life history and control, (34) 361.  
 politus infesting roses, (33) 256.  
 politus, remedies, (31) 60.  
 sinuatus, *see* Pear tree borer, sinuate.  
 spp., habits, (32) 250.  
 spp., notes, (27) 755; (28) 158.  
 viridis fagi in New Jersey, (34) 355.  
 vittaticollis, studies, (32) 248.

## Agrimony, occurrence of barium in, (26) 432.

## Agriolimnax agrestis—

- feeding habits, (34) 458.  
 injurious in gardens, (39) 655.  
 notes, (40) 56.

## Agriophara rhombota, notes, (30) 660.

## Agriotes—

- (Elatr) segetis, notes, (34) 757.  
 lineatus, notes, (29) 858.  
 lineatus, remedies, (26) 256.  
 mancus larvae, fumigation, (40) 256.  
 mancus, notes, (26) 147; (29) 252; (32) 555.  
 obscurus, larval and pupal stages, (37) 765.

## Agronomy of Sahel, (31) 814.

## Agromyza—

- destructor n.sp., description, (36) 658.  
 destructor, studies, (40) 457.  
 diminuta, notes, (27) 155.  
 fabalis, notes, (30) 160.  
 gayi n.sp., description, (37) 460.  
 graminis, notes, (27) 560.  
 inaequalis n.sp., description, (31) 456.  
 key, (39) 661; (40) 263.  
 larvae on artichoke, (40) 58.  
 laterella, studies, (40) 169.  
 melampyga, notes, (26) 147.  
 n.spp., descriptions, (37) 764.  
 nigripes injurious to alfalfa, (33) 555.  
 parvicornis, *see* Corn leaf miner.  
 phaseoli, notes, (29) 637; (30) 458; (32) 350.  
 pruinosa, investigations, (30) 855.  
 pruni n.sp., description, (33) 749.  
 pusilla, studies, (29) 857; (39) 362.  
 schineri, notes, (29) 159.  
 scutellata, notes, (38) 653.  
 scutellata on cotton, (33) 255.  
 simplex, *see* Asparagus miner.  
 spp., parasites of, (29) 359; (30) 661.  
 spp., related to simplex, (40) 263.  
 spp., studies, (33) 749.

## Agromyzaphagus detritosus n.g. and n.sp., description, (27) 60.

## Agromyzidae, synopsis, (31) 552.

## Agromyzinae, synopsis, (29) 657; (30) 254.

## Agronomy—

- American Society of, (27) 106.  
 bibliography, (28) 638.  
 development and proper status, (26) 434.  
 fundamental principles in, (32) 199.  
 problems in, (36) 197.

## Agronomy—Continued.

- terminology, (28) 537; (35) 30; (36) 827.  
 textbook, (34) 598.

## Agropyron—

- occidentalis, culture under dry-land conditions, (31) 429.  
 repens, description and structure, (31) 37.  
 repens, monograph, (29) 141.  
 repens, plant food absorption and growth, (32) 630.  
 scabrum, analyses, (30) 565.  
 spp., culture experiments, (27) 234.  
 spp., digestibility, (32) 770.  
 spp., identification, (29) 741.  
 spp., identification of seeds, (32) 436.  
 spp., rust spores in seeds of, (30) 241.  
 tenerum, seeding on ranges, (30) 35.

## Agrostemma githago—

- notes, (30) 236.  
 rôle of saponins in, (33) 524.  
 seed weight, (37) 831.  
 toxicity, (39) 892.

## Agrostis—

- alba, analyses, (29) 270.  
 alba, seeding on ranges, (30) 35.  
 ash constituents, (30) 334.

## Agrotis—

- hand picking and trapping, (32) 59.  
 saucia, notes, (33) 252.  
 segetum—  
   artificial infestation with parasitic Hymenoptera, (38) 155.  
   biology, (32) 59.  
   injurious to tobacco, (31) 60.  
   life history and remedies, (31) 157.  
   remedies, (33) 748.  
   spp., biology, (32) 59.  
   spp., notes, (27) 453, 656; (28) 555.  
   ypsilon, *see* Cutworm, black.  
 Agropyron fuscipes, notes, (29) 858.

## Aguman, description, (30) 557.

## Ahnfeldtia plicata, analyses, (37) 814.

## Allanthus altissima, history and botanical notes, (35) 747.

Air—*see also* Atmosphere.

- alveolar, sampling, (34) 369.  
 and water, review of literature, (28) 115.  
 ascent above active volcanoes, (33) 118.  
 bacteria in, (34) 208.  
 bacteriology of, (26) 174.  
 bath, electric, description, (38) 9.  
 breathed, effect on metabolism, (32) 663.  
 circulation in forest soils, (31) 26.  
 cold, drainage, (27) 116.  
 conditioning apparatus, description, (36) 152.  
 cooling near the ground at night, (40) 314.  
 currents, ascending, formula for adiabatic changes in, (34) 207.  
 drainage in river valleys, (27) 413.  
 drainage, notes, (32) 614.  
 dry and moist, effect on gaseous metabolism, (27) 869.  
 examination, (32) 117.  
 exclusion, effect on trees, (31) 348.  
 expired—  
   in relation to ventilation, (31) 363.  
   moisture content, (32) 764.  
   reinspiration, (31) 70.  
   temperature of, (31) 466.  
   toxic bodies in, (33) 167.  
   water content and temperature, (33) 567.  
 humidification, (31) 70.  
 humidity—  
   of, (33) 806.  
   of in mines, (29) 121.  
   of, measurement, (34) 416.  
   relation to nocturnal cooling, (40) 715.  
 in textile mills, hygienic condition of, (31) 70.  
 indoor and outdoor, microbial content, (32) 211.  
 introduction into jugular vein, (27) 886.  
 mechanics within cyclones and anti-cyclones, (32) 25.  
 methods of analysis, (29) 412.  
 methods of bacterial analysis, (33) 610; (34) 183.  
 microbiology of, (26) 372.  
 mixing, (27) 316, 616.  
 movement—  
   control in transpiration experiments, (38) 223.

- Air—Continued.  
 movement—continued.  
 effect of earth's rotation on, (32) 25.  
 effect on illumination of foliage, (33) 826.  
 through soils, (26) 619.  
 of antarctic region, studies, (30) 818.  
 of Buenos Aires, bacteriological study, (37) 513.

 rate of flow in soils, (34) 216.  
 respired, composition, (28) 462.  
 respired, heat removed by, (28) 569.  
 routes and their regulation, (37) 807.  
 soil, composition and characteristics, (33) 618.  
 temperature—  
 and solar radiation intensities, relation, (32) 24.  
 reduction to true mean, (37) 116.  
 relation to soil temperature, (34) 15.  
 studies, (28) 116.  
 upper—  
 explorations, (32) 810.  
 illusions of, (35) 317.  
 of Australia, (36) 19.  
 study by means of telescopes, (34) 614.  
 washing, studies, (30) 790.  
 water, and food sanitation, treatise, (33) 258.  
 Aira, ash constituents of, (30) 334.  
*Aitonia capensis*—  
 analyses and digestibility, (27) 871.  
 microphylla, analyses and digestibility, (32) 167.  
 Ajowan—  
 bran, analyses, (27) 570.  
 seed, thymol content, (39) 712.  
*Ajuga reptans*, betains in, (27) 204.  
 Akebi seed, oil of, (37) 109.  
 Akonge, description, (30) 35.  
 Akoon seeds, notes, (32) 613.  
 Akron (Colo.) field station, description, (36) 33.  
 Alabama argillacea—  
 notes, (26) 856; (27) 756; (28) 60, 158, 762; (29) 456; (30) 356, 657; (31) 350; (39) 862.  
 outbreak in Peru, (29) 356.  
 remedies, (26) 757.  
 studies, (27) 556.  
 Alabama—  
 Canebrake Station, notes, (27) 696; (37) 97, 299, 797; (38) 96.  
 College, notes, (27) 300, 799; (28) 396; (29) 195, 300, 497, 697; (31) 496; (32) 395, 694; (33) 496; (34) 198, 495; (35) 397; (36) 196, 397; (37) 496, 700.  
 College Station, financial statement, (27) 396, 599; (28) 796.  
 College Station, notes, (26) 96; (27) 300, 799; (28) 396; (29) 195, 497, 697; (32) 395, 694; (34) 198, 495; (36) 196, 397; (37) 97, 496, 700.  
 College Station, report, (32) 496, 795, 899; (34) 693; (35) 299; (36) 693; (37) 599; (38) 899; (40) 796.  
 College Station, report of director, (27) 396, 599; (28) 796.  
 River, average stream flow, (27) 316.  
 Alanin—  
 action upon esters, (31) 711.  
 as source of ammonia, (29) 723.  
 heat of combustion, (26) 160.  
 in yeast protein, (36) 501.  
 influence on action of alkali on glucose, (37) 109.  
 ingested, metabolism rate of, (33) 755.  
 ingestion, effect on metabolism, (28) 867.  
 $\delta$ -alanin and  $\delta$ -valin, separation, (30) 313.  
 Alaptus—  
 crioceci, parasitic on orange scale, (26) 554.  
*immaculatus* n.sp., description, (37) 855.  
*Alaria* n.spp., descriptions, (39) 791.  
 Alaska Stations—  
 notes, (35) 397.  
 report, (28) 493; (29) 793; (33) 698; (36) 497; (39) 196.  
 work of, (38) 602.  
 Albinism—  
 in corn, (33) 131.  
 in inbreeding, (28) 531.  
 in man, monograph, (31) 467.  
 inheritance in cereals. (31) 329.  
 Albizzia—  
 anthelmintica, analyses and digestibility, (27) 871; (32) 167.  
 insects affecting, (26) 553.  
 Albugo—  
 (*Cystopus*) sp. on sweet potatoes, (37) 452.  
*tragopogoni* on salsify, (32) 341.  
 Albumin—  
 blood and muscular, differentiation, (38) 583.  
 coagulation by pressure, (32) 417.  
 constitution, (30) 110.  
 determination in milk, (31) 114.  
 dextrorotatory, in organic nature, (31) 607.  
 dynamic action on kidneys, (26) 465.  
 effect on reaction of iron salts, (28) 410.  
 egg—  
 and serum, density and solution volume, (31) 804.  
 coagulation by heat, (26) 306.  
 coagulation by ultraviolet light, (30) 110.  
 denaturation rate in alkali, (29) 501.  
 germicidal power, (27) 763.  
 hydrolysis, (28) 607.  
 identification in solutions, (26) 201.  
 in baking powders, (36) 561.  
 lysin content, (31) 559.  
 nitrogen distribution in, (38) 310.  
 nutritive value, (31) 264.  
 rôle in glycogen formation, (31) 763.  
 studies, (39) 801.  
 toxicity and nutritive value, (40) 463, 464, 562.  
 use in baking powder, (32) 356, 762.  
 fermentation in yeast, (33) 824.  
 globulin ratio in antitoxic immunity, (39) 388.  
 heat coagulation and solution, (29) 715.  
 humification, (34) 516; (38) 26.  
 labile, relation to living protoplasm, (36) 225.  
 milk in infant feeding, (34) 258.  
 production of anaphylaxis by, (26) 374.  
 silicates, colloidal, nature, (32) 420, 421.  
 use in food products, (34) 167.  
 water, effect on gastric secretion, (26) 466.  
 Albuminous—  
 bases, isolation from soils by hydrolysis, (35) 212.  
 crystalloids in potato leaves, (33) 824.  
 Albumoses in body tissues and blood, (38) 366.  
*Alcidas bubo*, egg-laying habits, (38) 359.  
 Alcohol—  
 amyl, use in milk fat tests, (36) 507.  
 anhydrous, preparation, (35) 110.  
 as fuel, (32) 885.  
 as substitute for gasoline, (32) 788.  
 boiling, extracting plants with, (26) 108.  
 coagulation of milk by, (33) 113.  
 denatured—  
 as a decarbonizer and engine cleanser, (29) 787.  
 detection, (30) 211.  
 fuel value, (28) 384.  
 detection in fermenting fluids, (26) 308.  
 determination, (38) 315.  
 determination—  
 from specific gravity, (31) 505.  
 in fermentation mixtures, (36) 508.  
 presence of ketones, (29) 716.  
 presence of phenol, (35) 13.  
 vinegar, (40) 712.  
 wine, (31) 505.  
 wine, beer, etc., (30) 508.  
 disinfection, theory and practice, (40) 581.  
 effect of X-rays on fermentation, (27) 231.  
 effect on—  
 ammonia fixing power of soils, (27) 323.  
 antigenic properties of horse meat protein, (30) 779.  
 catalase of blood, (40) 364.  
 egg development, (26) 772.  
 egg yolk of pigeons, (37) 773.  
 formation of carbon dioxide by dead yeast, (37) 203.  
 gastric secretion, (26) 466.  
 germ cells of fowls, (39) 177.  
 paunch movements in ruminants, (27) 68.  
 permeability of plant tissues, (28) 732.  
 psychological processes, (36) 763.  
 seed germination, (26) 131.  
 soils, (37) 519.

- Alcohol—Continued.  
 effect on—continued.  
   solution of casein by sodium hydroxid, (36) 108.  
 estimation in spirituous liquors, (40) 15.  
 ethyl, *see* Ethyl alcohol.  
 extraction from garbage, (37) 590.  
 extraction from plants, (27) 407.  
 forcing plants with, (28) 837.  
 formation by sprouting wheat, (30) 522.  
 from—  
   cactus, (33) 234.  
   corn and potatoes, comparison, (28) 715.  
   grapefruit, (39) 203.  
   horse chestnuts and acorns, (38) 411.  
   millet, (32) 117.

 metabolism, rapidity of, 764.  
 methods of analysis, (27) 205; (31) 806.  
 methyl, *see* Methyl alcohol.  
 microbiology of, (26) 372.  
 oxidation by seedlings, (35) 634.  
 physiological value, (29) 665.  
 power, crops for production, (40) 524.  
 production by yeast, (40) 326.  
 production by yeast, treatise, (29) 714.  
 psychological effects, (34) 663.  
 recovery from potash determination, (40) 806.  
 relation to neuritis in fowls, (28) 765.  
 solutions—  
   effect on germination of seeds, (27) 330.  
   refractive indexes, (27) 499.  
 sterilization of soils by, (32) 816.  
 substituting for sucrose in fixed diet, (36) 364.  
 test for milk, (33) 112, 113.  
 toxicity, (28) 661.  
 trichlorotertiarybutyl, determination, (39) 207.  
 use in plant respiration, (28) 428.  
 use in the Tropics, (30) 260.  
 value in the diet, (29) 664.
- Alcoholic—  
 beverages—  
   effects in diabetes and states of depression, (40) 364.  
   origin of methyl alcohol in, (40) 204.  
 fermentation—*see also* Fermentation.  
   chemistry of, (34) 711.  
   in seeds, (27) 220.  
 specimens, keeping, (36) 252.  
 Alcoholized fowls and eggs, studies, (40) 470.
- Alcohols—  
 determination, (40) 804.  
 determination in silage, (40) 413.  
 polyatomic, as sources of carbon for lower fungi, (31) 13.  
 polyatomic, as sources of carbon for molds, (30) 226.
- Alcohol-water mixtures, boiling and condensing points, (35) 11.
- Aldehyde—  
 catalase, origin and use, (28) 19.  
 detection in ethyl alcohol, (29) 312.  
 unidentified, from soils, (28) 418.
- Aldehydes—  
 color test for, (40) 114.  
 effect on protein hydrolysis, (38) 201.  
 formation in wine, (37) 805.  
 in soils, (32) 718; (40) 22.  
 in soils, harmful effect, (31) 620; (36) 424.
- Alder—  
 analyses, (38) 309.  
 analyses and nutritive value, (35) 164.  
 blight aphid, life history, (27) 257.  
 flea-beetle, biology, (39) 64.  
 flea-beetle, notes, (29) 252, 761; (40) 357.  
 leaf disease, new, notes, (27) 548.  
 red, as forest tree, (38) 349.  
 red, notes, (27) 846.  
 red, nutrient absorption in, (32) 748.  
 rust, notes, (26) 852.  
 seed, agglutinating properties, (31) 774.  
 wood disease, (40) 844.
- Aldopentoses, crystallography and optical properties, (40) 202.
- Aldoses—  
 and ketoses, separation, (28) 504.  
 determination, (34) 11.
- Ale, composition, (36) 864.
- Alebra albostriella, notes, (34) 752.
- Alectra arachidis, notes (29) 347.
- Aleirhogas n.subg., description, (39) 663.
- Aleochara bilineata, life history, (33) 861, 862.
- Aleurites—  
 fordii, culture in United States, (30) 536.  
 fordii, notes, (28) 843.  
 moluccana, analyses, (31) 631.  
 triloba nuts, analyses, (29) 811.
- Aleurobius farinae—  
 notes, (40) 855.  
 studies, (39) 664.
- Aleurocanthus—  
 n.spp., descriptions, (35) 552.  
 woglumi—  
   in Cuba, (38) 158.  
   notes, (37) 462; (38) 158, 459, 557.  
   remedies, (36) 457.  
   studies, (39) 864.
- Aleurodicus—  
 cardini n.sp., description, (27) 455.  
 destructor, notes, (27) 455.
- Aleurothrixus—  
 howardi—  
   in Florida, (40) 856.  
   notes, (27) 255; (31) 751; (37) 659.  
   studies, (29) 251; (33) 59.  
   porteri n.sp., description, (35) 552.
- Aleurothitius timberlakei n.g. and n.sp., description (31) 755.
- Alexin, effect on protein metabolism, (30) 478. \*
- Aleyrodes—  
 atriplex n.sp., description, (26) 859.  
 citri, *see* White fly, citrus.  
 horridus, notes, (30) 657.  
 howardi, *see* Aleurothrixus howardi.  
 mori, *see* Tetraleurodes mori.  
 olivinus, *see* Tetraleurodes olivinus.  
 packardii, notes, (33) 58.  
 spp., notes, (26) 348; (27) 455; (34) 60.  
 spp., remedies, (27) 357.  
 tabaci, notes, (28) 654.  
 trachoides n.sp., description, (27) 455.  
 vaporarium, *see* White fly, greenhouse.
- Aleyrodidae—  
 classification, (29) 54; (31) 755; (36) 755.  
 fungus parasites of, (28) 60.  
 of British Guiana, (36) 252.
- Aleyrodids, remedies, (38) 58.
- Alfalfa—  
 analyses, (26) 469, 770; (28) 463, 464, 669; (31) 524; (32) 171; (34) 169, 467, 667; (35) 562; (37) 767.  
 anatomy, (31) 330.  
 and corn for fattening lambs, (26) 73.  
 and sweet clover silage, chemistry, (40) 10.  
 Arabian, notes, (29) 33.  
 as affected by—  
   bog water, (28) 733.  
   calcium and magnesium, (35) 726.  
   sulphur, (38) 221.  
 as cause of sterility in dairy cattle, (34) 269.  
 cover crop for orchards, (33) 240.  
 forage crop, (31) 829.  
 grazing crop for pigs, (32) 224; (37) 679.  
 green manure, (32) 225; (35) 629; (37) 320; (39) 423.  
 hay crop, (39) 333.  
 honey-producing plant, (40) 65.  
 orchard crop, (40) 340.  
 orchard shade crop, (35) 236.

## Alfalfa—Continued.

- as pasture and meadow crop, (39) 135.
- pasture crop, (39) 130, 474; (40) 371, 470.
- sand binder, (29) 427.
- silage crop, (31) 829; (39) 134.
- soil binder, (28) 230.
- soil improver, (30) 37.
- winter cover crop, (40) 133.
- bacteria as affected by—
  - nitrates, (39) 338.
  - reaction, (39) 26, 722.
- bacterial—
  - blight in Utah, (31) 642.
  - disease, investigations, (26) 646.
- behavior in acid soils, (37) 422.
- blue, germination as affected by fertilizers, (29) 327.
- booklet, (31) 831.
- bread, analyses, (26) 660.
- breeding experiments, (26) 633, 734; (27) 528; (28) 42; (32) 532; (33) 31; (34) 34; (37) 827; (39) 126, 635; (40) 735.
- breeding, physiological correlations and climatic reactions in, (31) 629.
- butterflies affecting, (26) 655.
- caterpillar, studies, (32) 57.
- chart for schools, (31) 693.
- chopped, analyses, (29) 570.
- chopped, feeding value, (39) 783.
- coloring matters in, (28) 110.
- composition, (32) 533.
- composition as affected by—
  - irrigation, (28) 332.
  - maturity and curing methods, (36) 201.
- composition at different stages, (39) 836.
- conserving with straw, (39) 269.
- continuous culture, (40) 419.
- cooperative experiments, (27) 835; (28) 334, 737; (29) 331.
- cost of production, (26) 830; (30) 333; (32) 527; (34) 137; (37) 231.
- crane fly affecting, (28) 160.
- creatinin in, (26) 419.
- crown gall—
  - notes, (30) 348; (33) 742; (34) 241; (35) 245; (36) 747; (40) 844.
  - studies, (28) 150.
- crown rot, notes, (28) 544.
- crown wart, studies, (36) 543.
- culture, (26) 40, 633, 734; (27) 33, 235, 299, 337; (28) 634; (29) 32, 633; (30) 36, 37, 335; (31) 37, 227, 265, 330, 735, 831; (32) 132, 527, 828; (33) 97, 230, 635; (34) 35, 138, 139, 528, 630; (35) 33; (38) 434; (39) 834.
- culture—
  - and history, (35) 830.
  - experiments, (26) 38, 422, 434, 830; (27) 31, 420, 431, 735; (28) 431, 532, 734; (29) 225, 226, 631, 735, 736; (30) 133, 134, 229, 632; (31) 828; (32) 36, 132, 133, 430, 431, 526, 528, 529, 530, 730; (33) 229, 634, 828, 830; (34) 34, 227, 228, 229; (35) 228, 337; (36) 32, 131, 132, 333, 735; (37) 30, 226, 227, 535, 729; (38) 132, 133, 230, 334, 631, 632, 634, 827, 829, 830; (39) 124, 126, 128, 130, 131, 227, 334, 435, 436, 437, 530, 735, 737, 834, 835; (40) 32, 328, 430, 624, 735.
  - experiments in Canada, (40) 228.
  - handbook, (40) 526.
  - in Alabama and Mississippi, (27) 33.
  - Alberta, (27) 533.
  - Alberta and Saskatchewan, (32) 828.
  - apple orchards, (38) 443.
  - eastern United States, (36) 95.
  - Illinois, (30) 435.
  - Imperial Valley, (38) 184.
  - India, (39) 230.
  - Iowa, (36) 635; (38) 529.
  - Kansas, (37) 439.
  - Michigan, (28) 830.
  - New England, (33) 526; (36) 335.
  - New Jersey, (40) 137.
  - New Mexico, (40) 18.
  - North Carolina, (31) 132.
  - Ohio, (26) 131, 331.
  - Porto Rico, (29) 631.
  - Rhodesia, (27) 32, 637.
  - rows, (34) 735.
  - sand hills of Nebraska, (35) 827.
  - Scotland, (26) 535.

## Alfalfa—Continued.

- culture—continued.
  - in southern Mississippi, (28) 231.
  - Texas, (40) 729.
  - the Southwest, (32) 532.
  - Uruguay, (30) 733.
  - Washington, (40) 731.
  - western Nebraska, (35) 439.
  - Wisconsin, (28) 42; (34) 431; (37) 440.
  - Wyoming, (37) 334.
  - on alkali soil, (38) 118.
  - on Yuma reclamation project, (29) 226.
  - under dry farming, (26) 828; (30) 435; (31) 429; (33) 632; (34) 734; (36) 528, 529.
  - under irrigation, (34) 528.
  - cut at different dates, shrinkage, (33) 430.
  - cutting experiments, (28) 432.
  - cutworms affecting, (29) 158; (36) 53.
  - decomposition in soil, (40) 214.
  - diastase of, (32) 502.
  - digestibility, (39) 171.
- diseases—
  - descriptions, (30) 351.
  - notes, (28) 52; (29) 243; (31) 841; (32) 532, 543; (35) 245; (36) 543; (39) 149, 532.
  - of Western Australia, (33) 846.
  - studies, (33) 544; (35) 544.
- ditcher, description, (32) 888.
- odder in Colorado, (40) 536.
- odder, remedies, (29) 561.
- downy mildew, description, (26) 846.
- drought resistance in, (26) 632; (30) 526; (33) 31.
- effect of frequent cutting on water requirement, (33) 230.
- effect on—
  - fetal development, (33) 266.
  - milk and butter, (34) 570.
  - nitrification in soils, (29) 317.
  - nitrogen and carbon content of soils, (40) 719.
  - nitrogen content of soils, (40) 319, 722.
  - soil bacteria, (37) 421.
  - soil fertility, (29) 633.
  - soil moisture, (29) 634; (38) 418.
  - succeeding crops, (32) 223; (39) 127, 130, 436; (40) 331, 430, 432.
  - yield of sugar beets, (29) 137.
- ensiling with corn, (36) 76.
- enzymes in, (32) 410.
- feeding value, (34) 867; (40) 370.
- feeds, analyses, (29) 467; (30) 671.
- fertilizer experiments, (26) 422, 631; (27) 32, 233, 321; (28) 325, 737; (29) 737; (30) 134, 230, 335, 733, 820, 829; (31) 37, 133, 228, 421, 424, 735; (32) 133; (33) 33, 635; (34) 138; (35) 520; (36) 121, 626, 829; (37) 33, 133, 215, 535; (38) 131, 218, 431, 630; (39) 427, 436, 737, 816; (40) 32, 319, 624, 735.
- flour, studies, (40) 762.
- food value as affected by rapid curing, (32) 502.
- for irrigated lands of Colorado, (26) 734.
- for pigs, (31) 568; (32) 569; (36) 370, 767.
- for sheep, (29) 572.
- Fusarium wilt, notes, (39) 548.
- gall midge, notes, (27) 161.
- germination—
  - as affected by fertilizers, (29) 327.
  - of hard seeds, (27) 841.
  - studies, (32) 231.
- graphic summary of seasonal work, (39) 495.
- grasshoppers affecting, (32) 553.
- grasshoppers, notes, (35) 657.
- green—
  - analyses, (29) 467.
  - clover worm on, (39) 865.
  - effect on taste of milk, (39) 281.
  - fertilizing value, (34) 219.
  - manure for, (36) 133.
- growth and nitrogen-fixing power on acid soils (36) 514.
- growth as affected by—
  - alkali, (34) 125; (36) 118.
  - dandelions, (39) 37.
  - fertilizer salts, (29) 329.
  - phosphates, (37) 828.
  - sulphur, (32) 724.
- hardiness in, (28) 737; (35) 229.
- hardy, notes, (28) 194.

## Alfalfa—Continued.

- harvesting—
  - and shrinkage, (36) 132.
  - at different stages, (36) 171.
  - with sheep, (38) 68.
- hay—
  - amylolytic activity, (32) 503.
  - analyses, (26) 369, 665; (27) 170; (28) 265; (29) 370; (31) 437; (33) 469, 568, 761; (34) 164, 469; (38) 376.
  - analyses and feeding value, (30) 733.
  - and corn for lambs, (31) 867.
  - and silage for beef production, (33) 373.
  - and soy beans for milk production, (32) 265.
  - artificial curing, (28) 830.
  - as source of nitrogen in rations, (28) 264.
  - ash analyses, (29) 861.
  - box for feeding, (27) 899.
  - caps for, (39) 687.
  - chloroform extract of, (31) 71.
  - commercial grades, (32) 533.
  - composition, (27) 668.
  - composition as affected by irrigation, (29) 139.
  - digestibility, (27) 669; (28) 363; (31) 863; (36) 470; (37) 168; (39) 475.
  - effect on melting point of milk fat, (37) 73.
  - effect on milk flow, (34) 570.
  - energy value, (33) 72; (40) 365.
  - feeding value, (39) 73, 782; (40) 75.
  - for calves, (29) 771.
    - dairy cattle, (30) 72; (32) 367.
    - horses, (29) 370.
    - lambs, (29) 272, 870, 871; (32) 463.
    - milk production, (33) 382; (40) 573.
    - pigs, (33) 670; (35) 478.
    - range steers, (32) 467.
    - work horses, (36) 171; (38) 676.
  - grades of, (34) 528.
  - green, brown, and black, (40) 369.
  - ground, feeding value, (39) 778.
  - handling, (29) 633; (37) 599.
  - isolation of stachydrin from, (39) 610.
  - making and baling, (39) 231.
  - manurial value, (40) 127.
  - mineral constituents, digestibility, (40) 769.
  - nitrification, (31) 724.
  - nutritive value, (27) 659.
  - stewed, (39) 73.
  - v. alfalfa silage for dairy cows, (31) 77.
  - v. corn for cows, (32) 74, 863, 871.
  - v. cowpea hay for cows, (29) 876.
  - v. green alfalfa for cows, (34) 180.
  - v. oat straw for steers, (36) 269.
- histological identification, (30) 631.
- hopper, three-cornered, notes, (35) 657.
- hopper, three-cornered, studies, (32) 652.
- hybrid origin, (35) 332.
- hybridization, (31) 831.
- hybridization, field method, (33) 338.
- hybrids, machine transplanted, (39) 337.
- improvement, (32) 630.
- in dry-farm rotations, (39) 131.
- in grass mixtures, (37) 735.
- inoculation, (34) 528; (36) 197; (39) 336, 338; (40) 328.
- inoculation experiments, (26) 535; (27) 335; (28) 426, 519; (29) 332; (31) 735; (32) 433; (33) 633; (35) 336; (36) 335; (38) 134.
- insects affecting, (27) 155; (31) 648; (32) 532; (33) 555; (36) 152; (39) 358, 359, 532.
- irrigation, (28) 484; (31) 328; (34) 282.
- irrigation—
  - experiments, (27) 531; (28) 130, 133, 135, 827; (29) 32, 138, 139, 226; (30) 34, 886; (31) 829; (32) 186, 430; (33) 229, 390, 634, 823, 830, 884; (34) 785; (36) 886; (37) 30, 32, 54, 435, 639; (38) 184, 434, 633; (39) 132, 338; (40) 431.
  - in Sacramento Valley, (37) 586.
- ketones from, (26) 802.
- laccase, studies, (34) 225.
- land plaster for, (40) 730.
- leaf—
  - blotch, yellow, studies, (39) 354.
  - hopper, notes, (29) 252.
  - protein, nutritive value, (39) 666.
- leaf spot disease—
  - new, in America, (33) 848.
  - notes, (31) 746; (32) 443; (36) 735.

## Alfalfa—Continued.

- leaf spot disease—continued.
  - studies, (36) 450.
  - treatment, (30) 538.
- leaf weevil—
  - bird and other vertebrate enemies of, (31) 655.
  - notes, (31) 655.
  - parasites of, (31) 61.
  - relation to *Pseudomonas medicaginis*, (31) 642.
- lime and phosphorus content, (26) 873.
- liming experiments, (28) 724; (35) 229; (39) 336, 435, 737, 738; (40) 126, 134, 322, 328.
- looper—
  - notes, (28) 253; (32) 651; (34) 255.
  - studies, (28) 253; (39) 659.
- manuring experiments, (40) 430, 432.
- meadow culture experiments, (40) 136.
- meal, analyses, (26) 72, 165, 362, 468, 568, 665, 714, 768, 873; (27) 170, 469, 570, 670, 774, 872; (28) 265, 364, 464, 572; (29) 270, 367, 467, 570, 666, 769; (30) 67, 68, 169, 565, 868; (31) 73, 168, 366, 467, 663, 863; (32) 169, 568, 667, 862; (33) 71, 371, 568, 665, 870; (34) 72, 169, 263, 371, 467, 469, 566, 665, 767; (35) 373, 374, 562, 867; (36) 65, 167, 268, 667, 765; (37) 268, 471, 767; (38) 67, 368, 369, 665; (39) 167, 270, 370; (40) 72, 470, 571, 665.
- meal, fertilizing value, (34) 129.
- moisture content and shrinkage, (34) 828.
- nectar secretion, (37) 633.
- nitrogen and mineral constituents, (29) 32.
- nitrogen assimilation, (39) 738.
- nodule bacteria of, (32) 33, 327.
- northern v. commercial seed, (33) 226.
- nurse crop for, (29) 226, 425; (37) 226.
- on alkali soil, (39) 215; (40) 32.
- on reclaimed swamp, (40) 231.
- pasture for—
  - pigs, (31) 470; (33) 379, 871; (34) 173; (36) 170, 171; (38) 372; (39) 173, 272, 372, 375, 478, 479, 777, 778, 878; (40) 72, 75, 471, 472, 771.
  - sheep, (36) 169.
- Dasturing—
  - experiments, (33) 230, 379, 429, 871; (38) 67.
  - in Arizona, (34) 169.
  - off, (40) 430.
- Phytonomus variabilis affecting, (26) 151.
- pollination—
  - by bees, (39) 661; (40) 264, 760.
  - experiments, (37) 735.
  - studies, (31) 133; (37) 30.
- proliferation in, (28) 829.
- Pseudopeziza leaf spots, (37), 751.
- rate of seeding tests, (27) 335.
- residues, nitrogen content, (28) 217.
- root—
  - development as affected by clipping, (36) 832.
  - diseases, studies, (38) 646.
  - rot, notes, (35) 846.
  - rot, treatment, (39) 852.
  - stock development in, (34) 735.
  - system, (37) 827.
- rotation experiments, (33) 429, 829; (38) 129; (40) 331.
- rust, description and treatment, (27) 445.
- sampling device for, (37) 711.
- saponin, studies, (40) 607.
- Sclerotium disease, notes, (29), 845; (39) 753.
- seed—
  - analyses, (26) 739; (30) 733.
  - as affected by sulphuric acid, (27) 524.
  - chalcid fly in, (32) 454; (35) 551.
  - chalcid fly, remedies, (32) 549.
  - clover seed chalcid parasites in, (40) 862.
  - determination of origin, (37) 541.
  - factors affecting setting, (26) 633.
- seed, germination—
  - and purity tests, (29) 741.
  - energy of, (29) 538.
  - tests, (26) 44; (27) 338; (31) 43; (34) 143.
- seed—
  - high v. low grade, (26) 838.
  - impermeable, viability, (35) 740.
  - importations in Argentina, (37) 823.
  - imported, tests, (26) 634.
  - insects affecting, (27) 338.
  - inspection, (31) 438.

- Alfalfa—Continued.  
 seed—continued.  
 inspection in Maryland, (36) 442.  
 northern-grown, (39) 337.  
 oil, chemistry of, (34) 710.  
 persistence and vitality of bacteria on, (26) 820.  
 producton (26) 632; (27) 338, 836; (30) 35; (33) 430; (38) 131, 735.  
 production in Europe, (26) 436.  
 production, relation to moisture, (34) 824.  
 purity tests, (27) 733.  
 standards in Canada, (26) 839.  
 studies, (40) 39.  
 tests, (27) 142.  
 varieties, (39) 232.  
 vitality, (27) 740.  
 yields, (29) 330.
- seedling—  
 depths, (40) 227.  
 experiments, (29) 32, 224, 330, 531; (31) 735 (32) 430, 531; (33) 830; (34) 229; (35) 336 (37) 29, 535, 639; (39) 436, 437, 737, 834; (40) 332, 430, 433.  
 on ranges, (30) 35.
- seeds—  
 enzymes in, (28) 710.  
 hard, germination tests, (30) 738.  
 selection experiments, (36) 755; (39) 126.  
 self-sterility, (38) 425.  
 Semipalatinsk, (39) 338.  
 serpentine leaf miner affecting, (29) 857.  
 shredded, analyses, (33) 71.  
 sickness, notes, (36) 541.
- silage—  
 acidity, (39) 310, 878.  
 chemical studies, (37) 709.  
 composition, (32) 769.  
 feeding value, (39) 73.  
 for steers, (32) 769.  
 from, (38) 665.  
 nutritive value, (26) 360.  
 preservation and use, (37) 671.  
 studies, (40) 10, 503.  
 soil moisture removal by, (40) 430.  
 sowing with and without a nurse crop, (26) 434.  
 spacing tests, (39) 229.  
 Spanish, culture and identification, (36) 36.  
 steaming and ensiling (31) 467.  
 stem rot, studies, (34) 541; (38) 850.  
 stems and leaves, analyses, (26) 714.  
 strains, tests, (39) 738.  
 straw, ground, analyses, (39) 370.  
 studies, (26) 632.  
 successive cuttings, feeding value, (39) 166.  
 successive cuttings, protein content, (39) 737.  
 sulphur in, (31) 817.  
 tea, analyses, (34) 469.  
 thrips affecting, (29) 252.  
 time-of-harvesting test, (33) 429.  
 toxic effect on pigs, (38) 589.  
 transpiration in, (34) 522; (36) 226.  
 transpiration rate, (37) 429.  
 transplanting, (29) 331; (35) 830.  
 treatise, (28) 737; (32) 828.  
 treatment with sulphuric acid before planting, (3) 526.  
 tree, culture experiments, (30) 632.
- Turkestan—  
 as hog pasture, (40) 471.  
 commercial seed, (32) 38.  
 culture experiments, (30) 526.  
 culture in Hungary, (30) 36; (32) 133.  
 v. Hungarian, (31) 629.
- utilizing waste land for, (40) 137.  
 v. clover for milch cows, (39) 578.  
 v. clover in rotation, (29) 634.  
 v. red clover, (40) 328.  
 varieties, (26) 233, 534, 631, 632, 733; (27) 32, 235, 335, 431, 831, 835; (28) 533, 828; (29) 137, 139, 222, 426, 830; (30) 33, 434, 526; (31) 133, 829, 831; (32) 36, 431, 528, 529, 530, 730; (33) 31, 33, 632, 728; (34) 227, 630; (35) 81, 228, 229, 527, 528, 530, 826, 830; (36) 36, 133, 435, 436, 828; (37) 229, 230, 231, 331, 435, 531; (38) 32, 132, 231, 433, 632, 634, 827, 828, 829.
- varieties—  
 for Alaska, (39) 125, 126.  
 for Iowa, (39) 232; (40) 328.  
 new, (28) 533; (39) 337.
- Alfalfa—Continued.  
 variety tests, (39) 128, 130, 131, 227, 228, 433, 436, 437, 530, 736, 738; (40) 228, 430, 433, 733, 735, 828.  
 vegetative regeneration, (33) 528.  
 vitality of, (26) 734.  
 vitamin content, (40) 564.  
 water requirements, (26) 632; (29) 826; (32) 127, 226; (33) 229; (38) 434.
- webworm—  
 control, (39) 865.  
 notes, (28) 653.  
 studies, (35) 158.
- weevil—  
 control in Arizona, (35) 656; (37) 846.  
 control in Western United States, (38) 163.  
 notes, (32) 156; (35) 554; (37) 255; (40) 161, 853.  
 oviposition in relation to temperature, (33) 257.  
 popular account, (39) 264.  
 remedies, (29) 259.  
 studies, (27) 560; (37) 262.  
 white flowered selection, (39) 337.  
 white spot, notes, (35) 846; (36) 47; (40) 50.  
 wilt disease, description, (36) 47.  
 winterkilling, (27) 235; (28) 734; (35) 530; (36) 828.
- yellow—  
 composition, (37) 832.  
 leaf blotch disease, (36) 248.  
 selection and hybridization, (33) 831.  
 studies, (36) 334.  
 yield as affected by—  
 number of cuttings, (40) 522.  
 origin of seed, (28) 432.  
 slope of field, (30) 230.  
 yield in relation to precipitation, (37) 717.  
 yields, (27) 736; (29) 631; (30) 134; (39) 337; (40) 31, 735.
- yields—  
 basis for, (31) 329.  
 determination, (37) 439.  
 error in determination, (32) 38.
- Alfalfone, occurrence in alfalfa, (26) 802.
- Alfilaria—  
 as green manure, (39) 31.  
 seed, collection and sowing, (29) 533.  
 seed, impermeable, viability, (35) 740.  
 seeding on ranges, (30) 35.
- Algae—  
 analyses, (26) 324.  
 and bacteria, symbiosis, (28) 31.  
 brown, color change in, (31) 626.  
 carbon nutrition of, (31) 426.  
 chondriosomes in, (35) 635.  
 conduction of lithium, (39) 122.  
 control in canals, (40) 188.  
 culture in agar, (28) 727.  
 destruction in drinking water, (36) 183.  
 destruction in reservoirs, (38) 731.  
 development and nutritional physiology, (40) 130.  
 grass-green, nitrogen fixation by, (30) 727; (31) 827.  
 heat development of, (31) 323.  
 in soils, (28) 31.  
 lower, assimilation of nitrogen and phosphorus by, (28) 35.
- marine—  
 bibliography, (27) 22.  
 chemical analyses, (40) 725.  
 distribution, (34) 32.  
 enzym action in, (35) 25.  
 gas exchange in, (35) 431.  
 imbibitional swelling, (39) 731.  
 osmotic pressure in, (39) 223.  
 oxidases and catalase in, (31) 626.  
 sources of nitrogen for, (31) 828.  
 used in Japanese agar-agar, chemical studies, (40) 110.  
 new races and species, (40) 130.  
 red, diastase in, (29) 220; (32) 503.  
 relation to gases in water, (28) 821.  
 wood-penetrating, notes, (26) 853.
- Algaroba—  
 meal, use, (32) 730.  
 notes, (26) 362.  
 tree, culture experiments, (36) 340.
- Algie acids, studies, (40) 804.

- Algin, composition, (33) 108.  
 Algin, description, (29) 566.  
 Algocyan, notes, (36) 202.  
 Alimentary intoxications—  
   notes, (34) 575.  
   of horses, (26) 887.  
 Aliphatic acids, saturated, cleavage, (31) 465.  
 Alisma plantago seeds, delayed germination in,  
 (31) 824.  
 Alizarin oil, insecticidal value, (34) 359.  
 Alkali—  
   accumulation, relation to irrigation, (33) 419.  
   albumin, production of anaphylaxis by, (26) 4.  
   and salt industry, treatise, (36) 428.  
   brush, poison, analyses, (39) 184.  
   bush ash, analyses, (36) 429.  
   carbonated and caustic, titration of mixture,  
   (39) 714.  
   carbonates, determination, (26) 406.  
   content of soils as related to crop growth, (40)  
   719.  
   crusts of United States, (27) 22.  
   determination in—  
     arsenical dip fluid, (26) 411.  
     chlorinated solutions, (39) 506.  
     hypochlorite solutions, (40) 309.  
     silicates, (30) 11.  
     soils, (32) 504; (33) 610; (34) 609.  
   distribution by irrigation, (40) 719.  
   effect on—  
     cement, (27) 89; (28) 86; (32) 787; (37) 788.  
     concrete, (32) 381.  
     concrete drain tile, (34) 87.  
     creatin elimination, (36) 161.  
     denaturation of proteins, (29) 501.  
     growth of rice, (34) 31.  
     milk, (28) 18.  
     nitric-nitrogen accumulation in soils, (40)  
     722.  
     nitrogen-assimilating bacteria, (39) 722.  
     permeability, (34) 429.  
     peroxidase, (29) 202.  
     proteins, (38) 803.  
     quality of sugar beets, (28) 43.  
     soil bacteria, (37) 213.  
     specificity of precipitins, (26) 482.  
     wheat yield, (39) 736.  
   formation by enzymes, (30) 111.  
   metal salts, effect on saccharification of starch,  
   (26) 309.  
   origin, (37) 809.  
   production in soils by denitrification, (36) 321.  
   protection of concrete structures from, (29) 386.  
   relation to chlorosis, (28) 623.  
   relation to light precipitation, (27) 816.  
   salts—  
     as affected by calcium carbonate, (39) 721.  
     combination of chlorin ions in, (33) 623.  
     determination in soils, (28) 318.  
   salts, effect on—  
     ammonification, (39) 721.  
     burning quality of tobacco, (39) 34.  
     concrete, (29) 686.  
     crop growth, (36) 118.  
     germination and growth of crops, (34) 125.  
     growth of rice, (30) 630, 728, 833.  
     nitrification, (38) 322.  
     plants, (28) 527.  
     soil bacteria, (27) 124; (28) 519, 719.  
   salts—  
     in irrigation waters, (39) 792.  
     soil, antagonistic agents, (39) 619.  
     soils, (33) 421.  
     soils of India, (29) 514.  
     studies, (29) 137.  
     toxicity, soil factors affecting, (40) 315.  
   soils—  
     analyses, (34) 512.  
     analyses and treatment, (30) 622.  
     as affected by irrigation, (34) 16.  
     bacteriological studies, (26) 646.  
     black, of San Luis Valley, (38) 324.  
     drainage, (34) 283; (36) 186, 584; (38) 591.  
     durability of concrete and drain tile in, (39)  
     86; (40) 386.  
   soils, effect on—  
     concrete drainage tile, (34) 584.  
     cotton, (27) 640.  
     dry farm crops, (37) 437.  
     wilting coefficients of plants, (28) 823.
- Alkali—Continued.  
 soils—  
   gypsum for, (40) 51.  
   improvement, (26) 223, 224; (28) 32, 814; (31)  
   317; (33) 416.  
   irrigation, (33) 419.  
   methods of analysis, (32) 296.  
   of Egypt, (30) 21.  
   India, (28) 736.  
   Iowa, studies, (39) 720, 813.

   Ohio, (35) 510.  
   San Luis Valley, (38) 324, 386.  
   United Provinces in India, (33) 419.  
 origin, (37) 809.  
 plants tolerant to, (40) 221.  
 reclamation, (26) 590; (31) 889; (32) 36; (33)  
 88, 324, 392, 419, 421, 430, 814, 815; (35) 516;  
 (37) 281; (38) 118, 815.  
 reclamation with Bermuda grass, (29) 330.  
 studies, (27) 321; (28) 319, 515, 516; (36) 118.  
 treatment, (39) 215; (40) 32.  
 tolerance of—  
   eucalypts for, (26) 642.  
   wheat seedlings, studies, (27) 500; (29) 322.  
 water—  
   effect on dairy cows, (30) 775.  
   effect on dairy products, (27) 282.  
   notes, (28) 27.  
   still for, (28) 796.  
 Alkalimetry, indicator for, (36) 13.  
 Alkaline—  
   carbonates, determination, (40) 112.  
   earth metals, separation, (34) 409.  
   earth salts, effect on plants, (28) 527.  
   earths, effect on *Lupinus albus*, (31) 325.  
   solutions—  
     dilute, determining alkalinity, (40) 610.  
     effect on invert sugar, (27) 812.  
     toxicity toward plants, (35) 28.  
 Alkalis—  
   destructive action on vitamins, (36) 465.  
   determination in rocks, (31) 502.  
   effect on *Lupinus albus*, (31) 325.  
   effect on malt diastase, (31) 806.  
   in Colorado, studies, (39) 323.  
 Alkaloid—  
   animal, isolation from milk, (26) 212.  
   formation in tobacco, (35) 333.  
 Alkaloidal reactions, notes, (27) 208.  
 Alkaloids—  
   biological formation and function, (32) 327.  
   cinchona, disinfecting action, (40) 478.  
   detection, (29) 408.  
   detection in beverages, (31) 114.  
   detection in water, (34) 410.  
   distribution in belladonna plant, (31) 201.  
   effect on—  
     germination of seeds, (33) 825.  
     healthy cattle, (29) 476.  
   formation in tobacco, (27) 133.  
   identification by optical methods, (39) 415, 506.  
   in beverages, (31) 358.  
   origin in plants, (27) 228.  
   plant, synthesis of, (31) 409.  
   plant, treatise, (29) 503.  
   Senecio, effect on cattle, (27) 79.  
   variation in plant leaves, (30) 44.  
 Allantoin—  
   assimilation by plants, (26) 32.  
   determination in urine, (33) 116.  
   distribution in plants, (30) 129.  
   heat of combustion, (26) 160.  
   occurrence in sugar beets, (28) 810.  
   output as affected by water ingestion, (27) 168.  
   use against beri-beri, (34) 367.  
 Allergy—  
   notes, (32) 78.  
   parasitic, notes, (38) 689.  
 Alligator pears, *see* Avocados.  
 Alligators as human food, (39) 471.  
 Allium—  
   cepa, protein formation in bulbs of, (31) 224.  
   cepa, stomatal movement in, (26) 627.  
   polvanthum, occurrence of arsenic in, (27) 269.  
   sativum, selection experiments, (30) 738; (32)  
   834.  
   vineale, eradication, (29) 433; (31) 739.

- Allobraccon (*Diachasma*) pilosipes n.g. and n.sp., notes, (34) 455.
- Allocota thyridopteris, notes, (27) 558.
- Alloporus tomosiae n.sp. description, (33) 749.
- Allodus, North American species, (36) 542.
- Allonota agromyzina, studies, (37) 764.
- Allorhaptia—  
 frocta, parasitic on rose aphid, (31) 250.  
 obliqua, life history, (28) 254.  
 obliqua, notes, (36) 460.
- Allolobophora longa, carbon dioxide exhalation of, (26) 619.
- Allorhina—  
 mutabilis—  
 notes, (28) 451; (29) 453; (33) 57.  
 remedies, (35) 551.  
 nitida, see June beetle, green.
- Allorhogas gallicola n.g. and n.sp., description, (27) 60.
- Allotropa—  
 meridionalis n.sp. description, (31) 355.  
 thompsoni n.sp., description, (31) 62.
- Alloxan—  
 assimilation by plants, (26) 32.  
 nitrification as affected by lime, (38) 119.
- Alloroxin bases—  
 in grape leaves, (27) 731.  
 in stachys tubers and citrus leaves, (26) 107.
- Allspice—  
 effect on micro-organisms, (35) 557.  
 examination, (32) 161.  
 germicidal effect, (36) 864.  
 preservative value, (38) 469.
- Alluvial lands, underdrainage of, (26) 685.
- Allyl alcohol, insecticidal and larvicidal value, (34) 359.
- Allylamins, assimilation by plants, (26) 32.
- Almond—  
 and peach graft hybrid, description, (29) 838.  
 as rootstock, tests, (40) 445.  
 branches, development on peach trees, (26) 46.  
 flowers, polymorphism in, (28) 540.  
 Gloeosporium disease, notes, (36) 453.  
 ground, description, (29) 59.  
 gummosis, studies, (35) 849.  
 hulls as feeding stuff, (34) 262.  
 leaf and twig curl, (36) 647.  
 nitrogen, biological value, (40) 660.  
 oil, analyses, (26) 504.  
 oil, digestibility, (33) 868.
- Almonds—  
 bitter, hydrocyanic acid content, (28) 477.  
 crown gall affecting, (28) 447.  
 crown gall resistance in, (35) 645; (36) 352.  
 culture in southern Texas, (32) 539.  
 destruction by birds, (29) 51.

 sp. on sweet cherries, (36) 452.  
 sp. on sweet potato, (39) 854; (40) 347.  
 sp., studies, (30) 846.  
 sp., temperature relations, (36) 649.  
 spp., relation to—  
 apple rot, (33) 348.  
 citrus gummosis, (29) 247.  
 Jonathan spot rot, (31) 748.  
 studies, (39) 30, 248.  
 tenuis—  
 notes, (32) 843.  
 notes and treatment, (27) 354.  
 violae, studies, (29) 753.
- Althaea—  
 inheritance of doubleness, (39) 123.  
 rosea, coloring matter of, (34) 710.  
 rosea, symbiosis with fungi, (27) 751.
- Althaein, studies, (34) 710.
- Althaea officinalis, mucin-like substances of, (31) 409
- Altica—see also Haltica.
- ampelophaga, biology and control, (33) 555.  
 bimarginata, biology, (39) 64.  
 n.spp., descriptions, (40) 357.  
 spp., biology, (40) 357.
- Alto-cumulus with virgulus, (35) 115.
- Alucita sacchari, notes, (38) 465.
- Alum—  
 detection in bread, (27) 504; (30) 809.  
 detection in flour, (27) 504; (38) 412.  
 effect on action of chlorin, (34) 885.  
 in foods, (31) 556.  
 solution, chlorinated, antiseptic value, (40) 779.  
 toxicity, (28) 661; (35) 473.  
 use in baking powder, (26) 564.
- Alumina—  
 and carbon, fixation of nitrogen by, (29) 417.  
 determination in mineral phosphates, (34) 112.  
 distribution in loam soils, (31) 618.  
 effect on assimilation of phosphoric acid, (27) 722.  
 extraction from feldspar, (27) 724; (28) 222; (29) 518.  
 relation to nitrogen fixation, (29) 24.
- Aluminum—  
 absorption—  
 and distribution from foods, (27) 268.  
 from food products, (35) 860.  
 alloys for—  
 canteens and cooking utensils, (34) 257.  
 household utensils, (32) 457.  
 and iron, separation, (33) 313.  
 as affected by nitric acid, (35) 802.

- Aluminum**—Continued.  
 as factor in soil acidity, (37) 799.  
 chlorid, action on cymene, (38) 309.  
 compounds in vegetable foods, (32) 455.  
 concentration in subsoil, (31) 720.  
 cooking vessels, tests, (29) 362, 363.  
 dairy utensils, tests, (35) 189; (36) 571.  
 detection and distribution in plants, (31) 129;  
 (32) 609.  
 determination, (36) 203.  
 determination in—  
   biological materials, (35) 302.  
   foods, (29) 809.  
   plants, (29) 797.  
 digestion by chickens, (30) 873.  
 effect on—  
   *Aspergillus niger*, (30) 824.  
   development of corn, (33) 522.  
   health, (31) 556.  
   permeability, (34) 34.  
   plant growth, (30) 824.  
 in acid soils, (39) 114.  
 in plants, (38) 409.  
 milk cans, use, (31) 375.  
 nitrid—  
   ammonia from, (31) 822; (32) 125.  
   availability of nitrogen in, (35) 427.  
   fixation of atmospheric nitrogen by, (27)  
   325, 624.  
   formation, (29) 822.  
   manufacture, (28) 222.  
 nitrid, manufacture—  
   and use, (29) 319; (35) 428.  
   from the air, (27) 623.  
   progress in, (29) 730.  
   Serpek process, (29) 127.  
 nitrogen, fertilizing value, (31) 821.  
 oxid, effect on germination of seeds, (29) 528.  
 phosphate as affected by calcium carbonate,  
 (26) 527.  
 phosphate, fertilizing value, (26) 428, 622; (31)  
 823; (36) 626.  
 relation to soil acidity, (40) 125.  
 relation to soil productivity, (30) 518.  
 salts, effect on—  
   ferments, (26) 309.  
   plants, (34) 525.  
   solubility of phosphates, (37) 323.  
   sugar beets, (31) 233.  
 salts—  
   fertilizing value, (27) 327.  
   toxic effect on rice, (35) 817.  
   toxicity toward clover, (33) 328.  
 separation from iron, (38) 10.  
 silicate rocks of Madagascar and West Africa,  
 (32) 511.  
 silicates—  
   extraction of potash from, (26) 426.  
   fertilizing value, (31) 31.  
 sulphate—  
   effect on sugar beets, (26) 225; (35) 217.  
   extraction from feldspar, (28) 223.  
   fertilizing value, (27) 500, 628; (28) 34; (30)  
   824; (33) 841.  
   in sulphur-phosphate compost, (39) 624, 822.  
   injury to barley, (40) 220.  
   purification of water by, (35) 388.  
   use in detection of arsenic, (28) 804.  
**Alundum** crucible for determination of phosphoric  
 acid, (31) 17.  
**Alunite**—  
 as source of potash, (27) 500, 628; (31) 321; (33)  
 819; (34) 328, 821; (36) 17; (39) 727; (40) 128.  
 deposits in Spain, (26) 728.  
 deposits in United States, (26) 526; (31) 322.  
 fertilizing value, (29) 25.

## American—Continued.

## Society of—

Agricultural Engineers, (26) 398; (28) 199; (32) 400; (34) 498; (36) 397; (40) 500.  
Agronomy, (26) 1, 196, 434; (27) 106; (28) 536, 537; (32) 8, 199; (36) 197; (37) 601, 799; (39) 701; (40) 299.

Animal Nutrition, (26) 1, 71, 197; (27) 469; (28) 98.

Animal Production, (30) 99; (32) 8, 98, 566; (34) 400, 570.

Milling and Baking Technology, (32) 8, 300.

Veterinary Medical Association, (27) 576; (29) 197, 301, 498.

Wood Preservers' Association, (36) 45

Ameromyzobia aphelinoides n.g. and n.sp., description, (36) 556.

## Amersporium—

on cowpea, (39) 52.  
vanillae, description, (27) 450.

Amersibia prionoxyti n.sp., description, (34) 456.

Ames filter, description, (27) 805.

## Ametastegia glabrata—

as an apple pest, (36) 461.  
notes, (34) 557; (38) 156, 358.

Ami beans, effect on nitrogen content of soils, (31) 733.

Amianthum muscaetoxicum, chemical studies, (33) 177.

Amicroplus crambivorus n.sp., description, (26) 352.

Amidosulphonic acid, assimilation by plants, (26) 32.

## Amids—

acid, as sources of ammonia in soils, (29) 723.  
acid, behavior in soils, (28) 813.  
ninhydrin reaction with, (35) 615.  
nutritive value, (26) 71.  
synthesis by plants, (29) 133.

## Amino acid—

content of nutrient media, (40) 201.  
copper compounds, pharmacology and toxicology, (39) 685.  
new, isolation, (40) 611.  
nitrogen of soil as affected by heat, (39) 617.

## Amino acids—

absorption by the body, (29) 567; (38) 366.  
aliphatic, determination, (31) 610.  
ammonification in soils, (32) 718.  
and carbohydrates, reaction between, (36) 412.  
and vitamins in the diet, (32) 857.  
as affected by bromin, (34) 803.  
as sources of ammonia in soils, (29) 723.  
behavior in soils, (27) 500; (29) 124.  
deficiency in diet, (37) 265.  
detection in serum of nephritics and others, (32) 80.  
determination, (26) 107; (30) 764; (33) 207; (37) 506.

## effect on—

amylolytic enzymes, (37) 205.  
cobra venom hemolysis, (36) 276.  
dogs, (28) 568.  
metabolism, (28) 867.  
Penicillium glaucum, (27) 526.  
residual nitrogen in blood, (29) 768.  
uric acid metabolism, (40) 175.

## extraction, (40) 611.

late in digestive tract, (30) 464.  
formol titration method, (39) 503.  
free, utilization, (35) 165.  
hydrolytic action on esters, (27) 802; (30) 806; (31) 710.

in barley, malt, and beer, determination, (33) 613.

blood, determination, (37) 207.  
diet, effect on growth, (37) 865.  
feeding stuffs, (33) 665, 805; (34) 412; (37) 10.  
grape leaves, (27) 731.  
growth, (32) 662.  
metabolism of fowls, (33) 172.  
muscular tissues, (32) 359; (33) 755.  
plants, determination, (29) 411.  
proteins as an index to nutritive value, (33) 262.  
proteins, determination, (26) 22; (33) 867.  
proteins, percentage, (26) 665.  
proteolysis, bloods, and urine, determination, (31) 211.  
soils, (34) 515.

## Amino acids—Continued.

in soils, determination, (34) 811.  
stomach and intestines on vegetable diet (36) 664.  
tissue as affected by protein feeding, (40) 562.  
tissues, determination, (31) 808.  
urine, determination, (34) 808.  
wool, (34) 202.  
isolated, feeding experiments with, (35) 862.  
metabolism, (39) 873.  
minimum for maintenance and growth, (35) 268.  
monosubstituted, determination, (35) 315.  
ninhydrin reaction with, (35) 614, 615.  
nutritive value, (26) 71.  
place of retention in the body, (27) 169.  
precipitating agents for, (27) 713.  
resorption in the intestine, (31) 361.  
rôle in nutrition and growth, (31) 558; (35) 269 368.  
synthesis in the tissues, (28) 801.

## Amino—

aldehyde, significance in intermediary metabolism, (40) 71.  
butyric acid in prolin fraction of casein, (30) 463.  
compounds, effect on baking qualities of flour, (30) 556.  
groups, aliphatic, determination, (29) 108, 408.  
nitrogen, see Nitrogen.

Aminopropionic acid, assimilation by plants, (26) 32.

## Amins—

acid, determination and transformation in soils, (31) 515.  
from organ extracts and body fluids, (34) 777 778.  
in canned sardines, (40) 411.

Amitus minervae n.sp., description, (26) 149.

## Ammonia—

absorption—  
and distribution in soil, (36) 425.  
and nitrification in presence of zeolites (39) 520.  
by soils (36) 219, 816.  
from the atmosphere, (32) 121.

## accumulation—

by soil fungi, (35) 513.  
in partially sterilized soils, (30) 226.  
in soil, relation to carbon dioxide production, (39) 516.

action on superphosphate, (35) 519.

adsorption by soils, (34) 719.  
and nitric nitrogen, determination in soil solution, (39) 610.  
as by-product of sugar industry, (34) 318.  
as fumigant for mill insects, (34) 253.  
as source of protein for animals, (26) 72.

## assimilation by—

plants, (36) 631, 632.  
seedlings, (27) 633.  
soil microorganisms, (26) 617.  
cleavage in peat, (28) 508.

## compounds—

detection in ethyl alcohol, (29) 312.  
determination in meat and fish products, (29) 798.

concentration in tissues, (40) 562.  
conversion into nitric acid, (32) 423, 424.  
conversion into nitric acid and ammonium nitrate, (31) 822.

## crude—

fertilizing value, (26) 323.  
source, disposition, and use, (28) 626.  
studies, (29) 127.  
determination, (26) 709; (27) 497; (29) 609; (30) 764; (31) 108; (33) 12, 312, 313; (34) 111, 503; (36) 413; (39) 311.

## determination—

apparatus for, (40) 709.  
in carbonated waters, (27) 610.  
fertilizers, (31) 313; (37) 412.  
foods, (29) 809.  
milk, (32) 413.  
proteins, (26) 22.  
soils, (28) 111; (29) 797; (30) 215; (33) 411; (34) 314.  
urine, (26) 870; (34) 508; (36) 316; (37) 311.  
water, (26) 709.  
wine, (37) 414, 415.

- Ammonia—Continued.  
 distillation—  
   aeration method, (36) 504.  
   from water, (36) 15.  
   scrubber for, (40) 806.  
 effect on—  
   oviposition of house fly, (38) 563.  
   peroxidase, (29) 202.  
 electrical synthesis, (32) 33.  
 electrotechnical production, (29) 24.  
 elimination in urine during rest, (35) 863.  
 evaporation—  
   and transformation in cells, (26) 525.  
   from soils, (30) 425.  
 excretion—  
   as affected by water drinking, (34) 763.  
   during fasting, (30) 764.  
   from soil, (40) 203.  
 fixation—  
   by cell albumin, (34) 30.  
   in manure, (32) 819.  
   in soils, (37) 318.  
 formation—  
   and use in killed plants, (28) 327.  
   by mold fungi, (28) 803.  
   from cyanamid, (38) 516.  
   in higher plants, (28) 328.  
   in soil as affected by salts, (39) 218.  
   in soils, (27) 721.  
   organic nitrogen in, (32) 818.  
   from aluminum nitrid, (32) 125.  
 gas as a fumigant, (31) 256.  
 gas, effect on animals, (26) 373.  
 in canned sardines, (40) 411.  
   dew, (37) 116.  
   diseased plants, (37) 549.  
   peats and humus soils, (36) 612.  
   rain and snow of South Polar region, (26) 515.  
   rainwater, (40) 809.  
   soil as affected by heat, (39) 617.  
   stomach and intestines on vegetable diet, (36) 664.  
 loss from manured soils, (31) 421.  
 loss from soils, (27) 21.  
 manufacture, (28) 424, 723; (30) 427, 721.  
 manufacture—  
   from the air, (29) 822.  
   methods, (27) 520.  
   Serpek method, (31) 518.  
 metabolism, relation to acid and base-forming elements in foods, (26) 158.  
 methods of analysis, (27) 609.  
 nesslerization in urine, (39) 111.  
 nitric acid from, (29) 517.  
 origin and significance in portal blood, (26) 870.  
 oxidation, (38) 311, 710; (40) 815.  
 oxidation in plants, (34) 627.  
 physical and chemical data, (40) 607.  
 production in United States, (28) 522.  
 protein, determination in water, (33) 501.  
 retention by soils, (36) 299.  
 salt, effect on nitrogen retention in goats, (32) 261.  
 separation from pyridin, (26) 709.  
 solutions, effect on saccharin substances, (26) 307.  
 sources in soils, (29) 723.  
 "superphosphate of," (40) 127.  
 synthesis—  
   at high temperatures, (39) 817.  
   Haber process, (38) 423.  
 synthetic—  
   manufacture and use, (35) 428.  
   manufacture, progress in, (29) 730.  
   preparation, (28) 222; (29) 127.  
 tablet, reagents for, (26) 608.  
 titrations, indicators for, (38) 311.  
 utilization—  
   by corn plantlets, (27) 634.  
   by pea seedlings, (27) 730.  
   in protein metabolism, (29) 365.  
 Ammoniacal—  
   nitrogen, fertilizing value, (39) 726.  
   salts, adding to diet, (34) 762.  
   salts, effect on saccharification of starch, (26) 309.
- Ammoniates, fertilizing value, (28) 724.  
 Ammonification—  
   as affected by—  
     alkali salts, (26) 322; (39) 721.  
     alkali salts and calcium carbonate, (39) 721  
     carbon dioxide gas, (39) 618.  
     digestion of soils, (28) 121.  
     humus-forming materials, (35) 216.  
     irrigation, (31) 24.  
     lime-magnesia ratio, (32) 720.  
     liming, (26) 428.  
     manganese salts, (37) 126.  
     metallic salts, (31) 120.  
     soil temperatures, (29) 317.  
     sulphur, (40) 128.  
     various salts, (39) 323.  
   as criterion for measuring soil fertility, (35) 25.  
   in Hawaiian soils, (32) 719.  
   in Nebraska soils, (29) 734.  
   in soils, (26) 721; (31) 317, 420, 818; (33) 808; (35) 729; (36) 513, 724.  
   in soils—  
     and solutions, (30) 218; (31) 420.  
     as affected by arsenic, (30) 423, 424.  
     as affected by sulphur, (31) 125.  
     methods of studying, (36) 214.  
     nature, (36) 513; (38) 621.  
     studies, (27) 517; (29) 21; (34) 127, 619.  
   inhibition by alkali salts, (28) 719.  
   of green manures, (33) 514.  
   relation to availability of nitrogenous materials, (26) 124.  
   relation to osmotic pressure, (39) 323.  
   relation to temperature, (31) 127.  
   seasonal variation, (32) 514.  
   studies, (28) 718, 719; (39) 324.  
   studies with soil fungi, (32) 817.
- Ammonium—  
 acetate, effect on milk production and quality, (26) 476.  
 bicarbonate, fertilizing value, (35) 325, 518.  
 carbonate—  
   effect on determination of humus, (31) 111.  
   effect on germination and growth of crops (34) 125.  
   fertilizing value, (35) 126, 218, 519.  
   utilization by soil fungi, (39) 623.  
 chlorid—  
   absorption by plants, (35) 435.  
   as source of nitrogen for the body, (30) 65.  
 chlorid, effect on—  
   ferric and aluminum hydroxids during ignition, (34) 205.  
   germination of seeds, (29) 328.  
   plants and microorganisms, (27) 229.  
   solubility of sulphates, (28) 818.  
 chlorid—  
   fertilizing value, (35) 126, 218, 325, 427, 518.  
   hydrolysis of sugar cane by, (30) 811.  
 citrate—  
   effect on phosphates, (31) 125.  
   solubility of calcium phosphates in, (33) 412.  
 citrate solution—  
   apparatus for preparing, (27) 8.  
   neutral, notes, (28) 19.  
   neutral, preparation, (26) 709; (27) 110; (28) 312; (29) 203, 718; (31) 410.  
   preparation, (32) 116, 804; (38) 205.  
 compounds—  
   assimilation by streptothrix, (27) 621.  
   effect on baking quality of flour, (30) 555.  
   of fatty acids, properties, (26) 23.  
   stereochemistry and biological action, (35) 435.  
 humate as a source of nitrogen for plants, (30) 721.  
 hydroxid, use in extraction of rosin, (34) 412.  
 magnesium phosphate—  
   from urine, (40) 320.  
   precipitation in presence of ammonium citrate, (32) 804.  
 nitrate, displacement of potash by, (37) 321.

## Ammonium—Continued.

- nitrate, effect on—
  - germination of dodder, (27) 28.
  - nitrogen-assimilating bacteria, (38) 724.
  - nodule formation, (37) 133.
  - plants, (28) 225.
  - soils, (26) 216; (28) 520.
  - solubility of iron phosphate, (37) 324.
- nitrate—
  - fertilizing value, (27) 342; (29) 423; (31) 518, 822; (32) 831; (33) 25; (34) 130, 518; (35) 215, 427, 518; (36) 626, 818; (37) 739; (39) 726; (40) 622.
  - for mangels, (29) 830.
  - manufacture, progress in, (29) 730.
  - preparation, (38) 310.
  - production, (32) 423.
  - utilization by soil fungi, (39) 623.
- oxalate, nitrification rate, (32) 124.
- permutite, fertilizing value, (29) 127.
- persulphate, effect on germination of seeds, (26) 820.
- phosphate, effect on—
  - decomposition of soy bean fodder, (40) 214.
  - germination of seeds, (29) 328.
- phosphate, fertilizing value, (35) 519; (39) 622.
- presence in plants, (38) 629.
- salt, peculiar plant physiological action of, (34) 724.
- salts—
  - absorption and solution in soils, (35) 512.
  - absorption by plants, (35) 433, 435.
  - and soil constituents, interaction, (32), 121.
  - as feed for pigs, (31) 265.
  - assimilation by plants, (32) 121.
  - bacterial oxidation, (33) 124.
- salts, effect on—
  - baking quality of flour, (26) 356.
  - dogs, (28) 568.
  - nodule production, (32) 727; (33) 134.
  - phosphorites, (35) 816.
  - plants, (32) 538.
  - solubility of phosphates, (36) 626.
- salts—
  - fertilizing value, (38) 121.
  - flocculating power on clay, (27) 620.
  - manufacture, (28) 424.
  - metabolism of, (30) 64.
  - method of testing, (27) 208.
  - ninhydrin reaction with, (35) 614.
  - nitrification in soils, (26) 722.
  - separation from fatty acids, (26) 112.
  - utilization by plants, (27) 634; (29) 133.
- sodium sulphate, fertilizing value, (35) 218, 325.
- sulphate—
  - action as affected by distribution in soils, (35) 518.
  - action on muscovite, (37) 505.
  - absorption by soils and quartz sand, (37) 721.
  - analysis, (39) 222.
  - application, (34) 24; (38) 624.
  - as affected by lime, (26) 320.
  - as top-dressing for grains, (37) 29.
  - as winter spray for fruits, (30) 641.
  - availability, (40) 125.
- sulphate, availability—
  - in presence of sodium nitrate, (38) 723.
  - in relation to soil reaction, (37) 521.
  - of nitrogen in, (35) 123; (39) 817.
- sulphate containing sulphocyanid, fertilizing value, (31) 422.
- sulphate, effect on—
  - acid soil, (39) 627.
  - action of phosphates, (35) 326.
  - assimilation of phosphates, (29) 318.
  - Azotobacter, (31) 721.
  - bacterial flora of soils, (28) 815.
  - burning quality of tobacco, (38) 140.
  - carnations, (36) 446.
  - composition of meadow hay, (34) 620.
  - decomposition of feldspar, (30) 126.
  - decomposition of soy bean fodder, (40) 214.
  - disease susceptibility in cereals, (29) 844.
  - germination and growth of barley, (40) 218.
  - germination of seeds, (29) 328.
  - grass lands, (30) 133.
  - growth of soy beans, (40) 30.
  - hydrogen-ion concentration in soils, (39) 425.
  - legume bacteria, (29) 733.

## Ammonium—Continued.

- sulphate, effect on—continued.
    - marsh plants, (29) 531.
    - milk, (27) 506.
  - nitrification, (29) 21.
  - nitrogen fixing power of Azotobacter, (29) 527.
  - nodule formation, (37) 133.
  - Penicillium variable, (29) 529.
  - phosphorite, (29) 624.
  - plants, (27) 634; (28) 225.
  - resistance of grain to hail, (30) 519.
  - rotation of lactose, (33) 415.
  - soil acidity, (28) 137; (37) 815; (38) 20, 620.
  - soils, (27) 622; (28) 520; (29) 417; (30) 220.
  - solubility of calcium and phosphoric acid, (39) 23.
  - solubility of phosphates, (28) 818.
  - weed growth in meadows, (38) 141.
  - yield of rubber, (31) 444.
- sulphate—
    - fertilizing value, (26) 42, 125, 323, 324, 329, 330, 425, 534, 536, 629, 630, 635, 725, 829, 837; (27) 135, 218, 336, 724, 832, 833, 837; (28) 521, 533, 723, 724, 725, 736, 827, 832; (29) 23, 125, 127, 213, 829, 831; (30) 125, 427, 437, 526, 626, 632, 736, 835; (31) 36, 37, 124, 137, 517, 518, 731, 820, 829; (32) 323, 831, 832; (33) 33, 219; (34) 24, 25, 128, 219, 131, 219, 518, 520, 622, 820; (35) 30, 126, 218, 323, 325, 336, 427, 518, 519; (36) 121, 134, 332, 338, 637, 818, 833; (37) 123, 229, 321, 426, 539, 627, 636, 733, 739, 824; (38) 135, 137, 218, 229, 516, 517, 624; (39) 32, 241, 328, 428, 438, 529, 530, 537, 622, 623, 726, 817; (40), 134, 626, 633, 824.
    - for arid soils, (34) 621; (36) 726.
    - carnations and roses, (29) 840.
    - coffee, (40) 43.
    - grass land, (33) 527; (36) 438.
    - lawn grasses, (40) 125.
    - moor soils, (39) 438.
    - peat soils, (39) 428.
    - pineapples, (38) 748.
    - potatoes and sugar beets, (31) 833.
    - rubber trees, (26) 339.
    - sugar cane, (32) 336; (36) 219; (40) 242, 533.
    - fractioning of complement with, (33) 280.
    - from ammonia and sulphur dioxide, (29) 24.
    - from peat, (31) 321; (39) 425.
    - history and manufacture, (34) 423.
    - imports into United States, (26) 324.
  - sulphate industry—
    - in Austria-Hungary, (33) 822.
    - in Germany, (31) 30.
    - in Great Britain, (39) 522.
    - status, (27) 128, 519.
  - sulphate, injurious—
    - effect, (38) 624.
    - to fish, (29) 821.
    - to plants, (34) 135.
  - sulphate—
    - long-continued use, (34) 131, 622.
    - loss from soils, (29) 211.
    - manufacture, (30) 721.
  - sulphate, manufacture—
    - and use, (27) 624; (35) 428.
    - from sewage sludge, (26) 624.
    - in United States, (27) 22.
    - progress in, (28) 818.
  - sulphate, nitrification, (34) 127.
  - sulphate, nitrification—
    - in acid soils, (30) 626.
    - in soils, (26) 319; (31) 818; (39) 814.
    - rate, (32) 124.
  - sulphate—
    - nitrogen assimilation from, (27) 331.
    - oxidation, (39) 619.
    - preparation, (40) 801.
    - production, (39) 428.
  - sulphate, production—
    - and use, (27) 327, 420; (29) 126, 213, 318, 517; (30) 126; (32) 425, 517; (33) 218, 219.
    - from peat, (34) 822.
    - from sewage, (34) 424.
    - in France, (27) 727.
    - in Natal, (40) 127.
    - in 1913, (31) 725.
    - in 1915-16, (37) 524, 721.

- Ammonium**—Continued.  
sulphate—  
  relation to citrus chlorosis, (39) 458.  
  secondary and subsidiary effects, (30) 26.  
  source, production, and use, (38) 817.  
  storage on the farm, (40) 25.  
  trade in, (31) 29.  
  use, (39) 117.  
  use against weeds, (29) 530.  
  use in combination with salt, (33) 220.  
  use on calcareous soils, (32) 622.  
  use on peat soils, (37) 135; (38) 433.  
  v. sodium nitrate for sugar beets, (31) 422.  
  v. sodium nitrate, (37) 43; (38) 853.  
  sulphid, fungicidal value, (37) 43; (38) 853.  
  sulphite, fertilizing value, (20) 521.  
  toxicity toward plants, (30) 128.  
  vanadate, fertilizing value, (30) 627.  
**Amorphila** spp., bionomics, (35) 468.  
**Amorphophilus leucurus** einnamomeus, prevalence in Colorado, (28) 652.  
**Amobiinae**, new genera, (38) 767.  
**Amoeba**—  
  *eucameris* n.sp., description, (35) 454.  
  *lobospinosa* n.sp., notes, (27) 356.  
  *metacragidis*, notes, (36) 782.  
  n.sp., descriptions, (31) 420.  
  sp., relation to blackhead in turkeys, (26) 487.  
**Amoebiasis** in fowls, studies, (26) 89.  
**Amoebotaenia sphenoides**, anatomy and life history, (35) 81.  
**Amora rohituka**, oil content, (31) 234.  
**Amorbia emigratella**, notes, (27) 155, 657; (31) 249.  
**Amorphophallus** tubers, analyses, (29) 463.  
**Amorphota**—  
  *ephestia* n.sp., description, (28) 162.  
  *ephestia*, notes, (27) 564.  
  sp., parasitic on beet webworm, (26) 250.  
**Ampelodesma mauritanica**, culture and use, (33) 131.  
**Ampelographical station**, new, in Spain, (26) 398.  
**Ampelopsis**—  
  *hederacea*, autumn coloration of, (31) 34.  
  *tricuspidatum*, cladosporium disease, (31) 347, 844.  
**Amphicausta caraibea** injurious to plants, (38) 761.  
**Amphibians**—  
  of North America, check list, (39) 655.  
  of Pennsylvania, (31) 648.  
**Amphicerus**—  
  *bicaudatus*, see Apple twig borer.  
  *punctipennis*, notes, (30) 255.  
**Amphimixis** in *Spirogyra inflata*, (34) 370.  
**Amphiscepa bivittata** as a cranberry pest, (38) 559.  
**Amphistomum subtriquetrum**, studies, (33) 659.  
**Amphrophora cicutae** n. sp., description, (37) 163.  
**Amsacta albistriga**, notes, (27) 559.  
**Amsterdam colonial institute**, notes, (36) 699.  
**Amygdalase**—  
  in hypomyces, (30) 241, 805.  
  notes, (29) 509.  
**Amygdalin**—  
  as affected by enzymes, (28) 503.  
  decomposition by enzym action, (31) 14.  
  effect on fungi, (28) 444.  
  from various sources, tests, (29) 509.  
**Amygdalinase** in hypomyces, (30) 241, 805.  
**Amygdalus**—  
  *nana*, drought resistance, (36) 734.  
  new names in, (37) 220.  
**Amylaceous material**, feeding stuffs from, (33) 170.  
**Amylamins**, assimilation by plants, (26) 32.  
**Amylase**—  
  activity, determination in presence of alkaloids, (34) 713.  
  as affected by ultraviolet rays, (31) 711.  
  in alfalfa, (32) 411.  
  cereals, studies, (31) 609.  
  dried fodders, (32) 503.  
  malt extracts, properties, (31) 410.  
  mammary gland, (32) 412.  
  potatoes, (35) 634.  
  potatoes, pathological alterations in, (34) 428.  
  ripening horse beans, (36) 526.  
**Amylases**—  
  action on soluble starch, (36) 315.  
  nitrogenous stimulants, (37) 204.  
  studies, (30) 463; (40) 504, 608.  
  substrate for testing, (36) 315.  
**Amyloclastic and saccharogenic powers**, comparison, (30) 463.  
**Amyloidosis** in fowls, (39) 393.  
**Amyloids**, variations of in leaves, (29) 827.  
**Amylometer**, description, (32) 114.  
**Amylomycetes prairii**, notes, (28) 761.  
**Amylopsin**, notes, (34) 257.  
**Anabaena** sp., notes, (28) 31.  
**Anacardium occidentale**, notes, (29) 746.  
**Anaerobes**—  
  culture methods, (39) 887.  
  pathogenic, biochemistry, (38) 483, 503, 504; (39) 887; (40) 577.  
  pathogenic, culture, (40) 677.  
  proteolytic, from wounds, (39) 488.)  
  volatile acids from, (33) 30.  
**Anagrus**—  
  *armatus*—  
    *nigriceps* n.var., description, (35) 262.  
    notes, (31) 752.  
    *bartheli* n.sp., description, (36) 857.  
    *flaveolus* n.sp., description, (30) 856.  
    *frequens* n.sp., description, (37) 856.  
    *giraulti* n.sp., description, (30) 661.  
    *ovijentatus*—  
      description, (31) 550.  
      notes, (31) 650.  
    *spiritus*, parasitic on San José scale, (29) 758.  
**Anagyrella corvina** n.g. and n.sp., description, (34) 857.  
**Analytical methods**—  
  editing, (35) 311; (36) 299.  
  standard, (35) 415; (38) 506.  
**Anametis**—  
  *granulata*, notes, (36) 549.  
  *grisea*, notes, (32) 651.  
**Anaphes**—  
  *gracilis*, parasitic on codling moth, (26) 252.  
  sp., notes, (27) 561.  
  sp., parasitic on San José scale, (29) 758.  
**Anaphoidea**—  
  *conotracheli*, notes, (27) 864; (38) 565.  
  *luna* n.sp., description, (32) 852.  
  *luna*, studies, (36) 759.  
**Anaphothrips striatus**, notes, (27) 356; (31) 351.  
**Anaphylactic and immune reactions**, studies, (37) 76.  
**Anaphylactic shock**—  
  coagulation reaction in, (35) 486.  
  prevention, (40) 579.  
  studies, (37) 582; (39) 79.  
**Anaphylatoxin**—  
  and anaphylaxis, studies, (37) 578, 688.  
  anthrax and erysipelas, notes, (28) 778.  
  effect on heat production in rabbits, (29) 479.  
  effect of multiple doses, (37) 580.  
  nature, (34) 674.  
  poisoning, coagulation reaction in, (35) 486.  
  preparation from tubercle bacilli, (30) 184.  
  studies, (40) 579.  
**Anaphylaxis**—  
  alimentary, caused by eggs, (32) 178.  
  and immunity, (39) 79.  
  as affected by salt, (30) 478.  
  behavior of blood platelets in, (35) 574.  
  cause, (37) 76.  
  chronic, kidney lesions in, (34) 878.  
  formation from acid-fast bacteria, (30) 481.  
  hematic phenomena, (40) 880.  
  hypodermal, in cattle and sheep, (37) 379.  
  notes, (26) 676; (27) 466; (32) 78, 272.  
  papers on, (27) 576; (38) 580.  
  parasitic, notes, (38) 689.  
  produced by sensitization through vagina, (36) 277.  
  production by albumin, (26) 374.  
  protein, treatise, (32) 79.  
  reaction—  
    for detecting meat, (28) 204.  
    of vegetable proteins, (31) 377.  
    rôle of proteins in, (30) 680.  
    value in protein differentiation, (26) 176.  
  relation to—  
    coagulation of blood, (40) 380.  
    diet, (30) 168.  
    eclampsia, (26) 375.  
  review, (26) 481.  
  rôle of enzymes in, (40) 579.  
  studies, (27) 378; (30) 180, 201; (33) 82, 385; (34) 778; (36) 677; (37) 178, 578, 688; (38) 78, 181, 182.  
  treatise, (31) 277.  
**Anaplasma argentinum**, notes, (32) 183.

- Anaplasma marginale*—  
cultivation in vitro, (35) 678.  
culture in vitro, (34) 576.  
in Algeria, (30) 282.  
in German East Africa, (30) 285.  
notes, (26) 173, 584, 882; (28) 284.  
(var. centrale), use against anaplasmosis, (26) 584.
- Anaplasmata in anemic vertebrate blood, (35) 782.
- Anaplasmosis—  
bovine—  
immunization, (32) 476.  
in Argentina, (32) 183.  
Philippines, (38) 183.  
Roman Campagna, (28) 284.  
South Africa, (26) 584.  
South America, (29) 886.  
Turkey, (38) 183.  
notes, (26) 173.  
studies, (33) 384.  
treatment, (27) 482.  
canine, notes, (29) 385.  
clinical form of piroplasmosis, (33) 281.  
immunization, (31) 585; (35) 678.  
in Brazil, (31) 85.  
horses, camels, and hares, (30) 679.  
Russian Turkestan, (37) 374.  
sheep, (27) 482; (30) 285.  
review of literature, (37) 178.  
transmission by ticks, (26) 584, 883; (29) 584.
- Anaplasma—  
in erythrocytes of mammals, (29) 478.  
nature of, (31) 382; (33) 281.  
specificity, (39) 788.
- Anarsia lineatella, see Peach twig moth.
- Anasa—  
andresii, notes, (36) 55.  
spp., notes, (40) 754.
- Anastatus—  
(Antigaster) mirabilis, notes, (31) 650.  
bifasciatus in Maine, (37) 459.  
semiflavidus n.sp., description, (35) 262.
- Anastrepha—  
acidusa, notes, (27) 857.  
fraterculus, notes, (29) 652; (40) 56.  
fraterculus, studies, (40) 757, 758.  
ludens, notes, (26) 860.  
ludens, remedies, (31) 757.  
peruviana n.sp., notes, (29) 657.  
serpentina, notes, (34) 856.  
spp., danger of introduction, (39) 467.  
syvicola n.sp., description, (34) 554.
- Anatidae—  
new genus, (40) 254.  
shedding of stomach lining, (38) 457.
- Anatis 15-punctata, studies, (39) 663.
- Anatomy—  
bibliography, (32) 860.  
history, (38) 572.  
microscopic, treatise, (26) 876.  
of domestic animals, textbook, (32) 78, 682.  
domestic animals, treatise, (30) 276.  
the horse, atlas, (32) 584.  
the horse, treatise, (32) 278, 682.  
vertebrates, treatise and bibliography, (28) 668.  
pathologic—  
of man and animals, treatise, (33) 476.  
treatise, (27) 576; (28) 178; (31) 276; (32) 270.  
Anax junius, food habits, (34) 549.
- Anchonocranus oleae n.g. and n.sp., description, (28) 561.
- Anchovies, artificial coloration, (27) 809.
- Anchovy—  
butter adulteration, detection, (29) 361.  
paste, creatinin content, (31) 760.
- Anchylys—  
angulifasciana, see Clover leaf-tyer.  
comptana, see Strawberry leaf-roller.  
nuberculana, see Apple leaf-sewer.
- Andrena—  
helianthi, pollination of sunflowers by, (32) 556.  
n.spp. from Africa, (39) 566.  
notes, (40) 65.
- Andropogon—  
aciculatus injurious to horses, (37) 779.
- annulatus—  
culture experiments, (31) 524.  
notes, (30) 229.  
contortus for cattle, (28) 770.
- Andropogon—Continued.  
halepensis and A. sorghum, studies, (33) 221.  
rufus for dairy cattle, (32) 471.  
sericeus—  
analyses, (27) 68.  
culture experiments, (30) 632.
- sorghum—  
analyses, (38) 572.  
analyses and digestibility, (28) 464.  
loss in weight after harvesting, (38) 635.  
malting capacity, (40) 808.  
pollination and cross-fertilization, (38) 435.  
seed position in planting, (40) 635.  
short smut of, (38) 850.  
spp., seeding on ranges, (30) 35.  
spp., analyses, (27) 469, 871; (28) 463, 768; (31) 863.  
spp., analyses and digestibility, (27) 871; (32) 167.  
spp., hydrocyanic acid content, (27) 77.  
spp., notes, (26) 361.  
spp., toxicity, (27) 78.
- Andryala ragusina, analyses, (33) 466.
- Anemia—  
equine, intracellular bodies, in (27) 576, 684.  
equine, studies, (33) 676; (36) 79.  
experimental, in dogs, (38) 583.  
infectious—see also Swamp fever.  
in horses, (27) 181; (28) 184; (32) 881; (36) 581; (37) 82, 382; (38) 689, 788.  
in New York, (36) 676.  
treatment, (26) 483.  
pernicious—  
in horses, (26) 888; (27) 188; (33) 384, 681; (34) 274, 280, 681; (35) 80, 678; (39) 81.  
in rabbits, (30) 479.  
metabolism in, (35) 371.  
produced by hemolysis from streptococci, (32) 179.  
progressive, in ovines, (28) 782.  
relation to lime deficiency, (29) 622.
- Anemograph, simple forms, description, (30) 17.
- Anemometer—  
kite, calibrating, (35) 619.  
records, comparison, (37) 513.  
Robinson, (34) 118.
- Anemopheres diaphaniae n.sp., description, (26) 352.
- Aneristus oculatipennis n.sp., description, (35) 761.
- Anesthesia—  
and narcosis of animals and birds, handbook, (35) 379.  
by chloralose, (39) 885.  
effect on hemolytic reaction, (36) 878.  
paper on, (29) 500.  
production by injection of magnesium sulphate, (35) 484.
- Anesthetics—see also Ether and Chloroform.  
effect on—  
cyanogenetic compounds of sorghum, (37) 109.  
dormant woody plants, (35) 221.  
electrical potential in plant and animal tissues, (30) 630.  
germination of seeds, (27) 220.  
permeability of plant tissues, (28) 732; (36) 29.  
plant respiration, (37) 821.  
plant roots, (32) 626.  
in veterinary surgery, (34) 576.  
mechanism of action, (39) 286.
- Aneurism, verminous, in the horse, (37) 82.
- Angelica tyrrhea, notes, (28) 355.
- Angiosperms, disorganization of pollen-sac tapetum cells, (35) 431.
- Angitia—  
plutellae n.sp.—  
description, (30) 60.  
notes, (28) 657.  
tineaavora n.sp., description, (38) 164.
- Angieworms—  
relation to agriculture, (31) 154.  
relation to soil bacteria, (29) 316.
- Angoumois grain moth—  
affecting Sudan grass, (33) 746.  
biology, (38) 862.  
control, (39) 363.  
notes, (26) 453; (27) 657; (30) 655; (31) 57; (33) 856; (36) 854.

- Angoumois grain moth—Continued.  
 on corn, (40) 861.  
 popular account, (40) 356.  
 studies, (37) 356.
- Anilin—  
 colors, admission into plant cells, (27) 632.  
 dyes, acid, anticoagulant action on protein, (35) 880.  
 effect on tubercle bacilli, (37) 481.  
 sulphate, nitrification rate, (32) 124.
- Animal—  
 and plant life, treatise, (28) 897.  
 and plant tumors, comparison, (29) 548.  
 body—  
 adaptability to excessive diet, (26) 262.  
 oxidations and reductions in, (28) 607.  
 regulations of neutrality in, (29) 62.  
 resistance to disease, (26) 276.  
 breeders' associations in Germany, (26) 666.  
 breeding—*see also* Breeding, Hybridization, and specific animals.  
 age factor in, (31) 367; (35) 868.  
 anatomy and physiology in, (34) 195.  
 and feeding, notes, (28) 279.  
 and genetics, treatise, (39) 672.  
 applicability of pure-line theory, (39) 573.  
 bibliography, (34) 370.  
 biological principles, (28) 666.  
 circuits, discussion, (27) 171.  
 cooperative, in Wisconsin, (28) 593.  
 effect of popular sire in, (34) 370.  
 experiments, suggestions for, (26) 773.  
 fancy points in, (28) 68.  
 for disease resistance, (28) 370.  
 history and development, (28) 583.  
 in ancient times, (28) 466.  
 Bengal, (26) 578.  
 Germany, (33) 168.  
 India, (27) 781; (28) 79; (29) 676.  
 Kafa, Abyssinia, (27) 69.  
 North America, (27) 239.  
 Punjab, (27) 475.  
 Sao Paulo, (27) 69.  
 inheritance in "blood lines" in, (26) 162.  
 manual, (36) 667.  
 notes, (28) 667.  
 principles, (27) 172.  
 relation to heredity, (26) 161.  
 reversion in, (29) 570.  
 review of literature, (28) 370, 466; (32) 860; (38) 367.  
 selection, (27) 870.  
 selection problem in, (38) 64.  
 selecting for fancy points in, (26) 162.  
 studies, (39) 877.  
 studies, mathematics in, (28) 466; (38) 367.  
 studies, review, (33) 168.  
 systems, formulas for, (38) 268, 269.  
 teaching, (26) 162.  
 textbook, (26) 573.  
 treatise, (27) 469; (28) 271; (33) 71, 267.  
 use of averages and relative figures in, (29) 368.  
 value of pedigree, (27) 175.  
 yearbook, (28) 68.
- by-products—  
 analyses, (27) 670.  
 as fertilizers, (31) 323.  
 utilization, (27) 470.
- calorimetry, studies, (39) 772.
- castration, treatise, (32) 578.
- cells—  
 growth and viability, (28) 272.  
 synthesis, (27) 464.
- chemistry, progress in, (34) 311.
- communities in temperate America, treatise, (32) 549.
- diseases—*see also specific diseases.*  
 act in Canada, (31) 79.  
 book on, (39) 268.  
 caused by Gaertner group bacilli, (39) 488.
- diseases, contagious—  
 in Burma, (26) 374.  
 in India, (29) 676.  
 law in Canada, (26) 881.  
 treatment, (26) 374.
- diseases—  
 control, (39) 582, 884; (40) 778.  
 control by treatment of grass lands, (29) 676.  
 control in Netherlands, (27) 676.
- Animal—Continued.  
 diseases—continued.  
 control in United States, (34) 399; (36) 675.  
 control on the farm, (40) 380, 577.  
 diagnosis, (27) 77; (29) 477; (33) 279; (34) 81; (36) 875.

 notes, (26) 276, 581.

## Animal—Continued.

- diseases, infectious—continued.
  - specific therapy of, (31) 479.
  - textbook, (27) 76.
  - treatment, (27) 888.
- diseases—
  - investigations of Rockefeller Institute, (34) 498.
  - law in New York, (30) 778.
  - microbiology of, (26) 372.
  - nonbacterial, immunization, (26) 174.
  - notes, (26) 452.
  - protozoan, notes, (36) 880.
  - regulations among American countries, (37) 77.
  - relation to diet deficiency, (29) 66.
  - relation to food supply, (35) 178.
  - resistance to, (32) 270.
  - review of investigations, (31) 177; (33) 876.
  - serum diagnosis, (27) 478; (29) 377.
  - spread through garbage, (34) 274.
  - textbook, (26) 677.
  - tick transmitted, notes, (31) 356.
  - tick transmitted, review, (32) 380.
  - transmission by blood-sucking insects, (26) 150.
  - transmission by dogs, (34) 280.
  - transmission by insects, (36) 479.
  - treatise, (26) 82, 481. (27) 77, 377, 679; (28) 778; (29) 880; (32) 79, 371, 474, 874; (34) 383; (36) 477, 478; (37) 876; (40) 778.
  - treatment, (26) 578; (32) 578; (37) 876.
- ecology—
  - studies, (32) 549.
  - treatise, (30) 454.
- enemies of agricultural plants, treatise, (32) 752.
- experimentation and medical progress, (33) 876.
- extracts, effect on milk secretion, (26) 370; (28) 175; (30) 375.
- fats and oils, effect of free fatty acids on, (34) 312.
- fats, digestibility, (34) 364.
- feeding, textbook, (31) 468.
- ferments, saccharification of starch by, (28) 609.
- fluids, determination of viscosity, (26) 374.
- food—
  - for poultry, (33) 572.
  - products in United States, (38) 865.
  - products, transportation, (32) 76.
- genetics and eugenics, treatise, (40) 274.
- growth, treatise, (26) 658.
- heat and bio-energetics, treatise, (26) 265.
- heat, origin, (30) 563.
- husbandry—
  - bibliography, (28) 492.
  - courses in, (33) 696; (36) 595; (38) 897; (40) 492, 599.
  - experimental work, redirection, (30) 106.
  - extension course for boys' and girls' clubs, (35) 396.
  - in Denmark, (27) 391; (30) 91.
- husbandry instruction—
  - development of, (33) 493.
  - in high schools, (34) 195.
  - in United States, history, (35) 897.
- husbandry—
  - lessons on, (32) 597; (35) 562.
  - review of literature, (29) 271.
  - students, fundamental sciences for, (38) 896.
  - textbook, (28) 795; (29) 598.
- hybridization in United States, (26) 163.
- industry—*see also* Animal production.
  - in Alaska, (33) 666.
  - Kongo, (31) 865.
  - Philippines, (26) 666.
  - Russia, (29) 570.
  - instruction in United States, (28) 597.
  - inspection in Glasgow, (28) 375.
  - insurance societies in Holland, (30) 296, 493.
- life—
  - chemistry of, treatise, (30) 310.
  - relation to meteorology, (26) 513.
  - relation to saprophytic bacteria, (28) 570.
- liquids, drying, (28) 610.
- matter, showers of, (37) 808.
- meal—
  - analyses, (26) 362; (28) 265.
  - analyses and feeding value, (26) 468.
  - sterilized, manufacture, (38) 423.

## Animal—Continued.

- metabolism, phosphorus compounds in, (32) 601, 858.
- micrology, handbook, (37) 155.
- morphology, history, (38) 572.
- nutrition—
  - American society, (27) 469.
  - mineral elements in, (35) 867.
  - pathological aspects, (32) 99.
  - phosphates and wheat bran in, (31) 762.
  - phosphorus compounds in, (29) 869.
  - primer, (28) 265.
  - principles of, (26) 164.
  - problems in, (29) 169.
  - review of literature, (33) 169.
  - studies, (35) 670.
  - studies of Bureau of Animal Industry, (27) 469.
  - studies, progress in, (30) 101.
  - subnormal plane, (36) 669.
  - treatise, (30) 67.
  - value of proteins in, (27) 276.
  - vitamin factor, (40) 577.
- oil, detection in ethyl alcohol, (29) 312.
- organism—
  - as a machine, (32) 258.
  - defensive ferments of, (31) 278; (32) 270.
  - defensive ferments of, treatise, (30) 77.
- organisms—
  - energy transformations in, (30) 466.
  - growth in, (32) 165.
  - relation to soil formation, (26) 223.
- organs—
  - manganese content, (30) 562.
  - phosphorus content, (30) 669.
- parasites affecting livestock—
  - in India, list, (33) 279.
  - in Ohio, (33) 279.
- parasites—
  - and diseases, treatise, (32) 79.
  - and human disease, (39) 582.
  - atlas and textbook, (31) 576.
  - biological detection, (31) 281.
  - chemistry of, (32) 78.
  - detection, (26) 481.
  - effect of hibernation and migration on, (27) 655.
  - external, collecting, (38) 760.
  - handbook, (27) 779.
  - in Australia, (32) 377.
  - Belgian Kongo, (27) 77.
  - British Guiana, (37) 155.
  - Colorado, (26) 865.
  - Guam, (35) 460.
  - human feces, (37) 848.
  - man, treatise, (36) 152, 354.
  - Paraguay, (38) 580.
  - invasion by bacteria, (28) 681.
  - notes, (26) 452; (38) 459.
  - protozoan, notes, (27) 181.
  - remedies, (31) 50.
  - treatise, (31) 478; (32) 777.
- parasitology, treatise, (36) 574.
- pests—
  - and plant diseases, treatise, (28) 752.
  - of alfalfa, (31) 648.
- physiology, progress in, (29) 408.
- pigmentation, studies, (32) 360.
- pigments, bibliography, (32) 18.
- poisons, notes, (32) 78.
- power, measuring, (27) 666.
- production—
  - bibliography, (36) 468.
  - in Chile, (30) 671.
  - in Germany, (30) 170.
  - review of German literature, (31) 467.
  - review of literature, (26) 266; (32) 566.
  - textbook, (29) 570; (35) 167.
- products—
  - ash analyses, (29) 861.
  - exports, (34) 194.
  - in United States, (34) 393.
  - middlemen's function in, (33) 787.
  - prices and movement in Chicago, (33) 787.
  - prices in Switzerland, (26) 573.
  - purin content, (40) 205.
- quarantine—
  - laws, (32) 679.
  - regulations in Canada, (26) 881.
  - regeneration, notes, (28) 68.

## Animal—Continued.

- regeneration, treatise, (26) 163.
- relationships, symbolic statement, (28) 173.
- slaughter law in Massachusetts, (27) 65.
- species, identification, (36) 380.
- species, origin of, (26) 162.
- statistics in Germany, (29) 70.
- substances, conversion into fertilizers, (28) 125.
- tissues—
  - autolysis, (39) 608.
  - distribution of fluorin in, (28) 506.
  - electrical potential in, (30) 630.
  - exchange of energy in, (33) 567.
  - for laboratory examination, (36) 676.
  - indicators from, (35) 204; (39) 804.
  - stimulation by Roentgen rays; (30) 729.
  - water content, (29) 767.
- Animals—*see also* Live stock, Cattle, Sheep, *etc.*
  - adaptations in, (26) 347.
  - and plants, heliotropism in, (33) 129.
  - anesthesia and narcosis of, (35) 379.
  - artificial insemination, (27) 274.
  - as affected by—
    - environment, (26) 392.
    - eosin, (28) 880.
    - inbreeding, (31) 564.
  - as transformers of energy, (32) 860.
  - associated with ants, (26) 348.
  - blood parasites of, (33) 152.
  - blood relationship, studies, (28) 875; (30) 68; (32) 861; (35) 372.
  - bone content, (31) 564.
  - boron in, (28) 370; (30) 168.
  - breeding, root crops for, (26) 95.
  - castrated, abnormal bone growth in, (26) 471.
  - castration without surgical operation, (28) 466.
  - cause of death in, (27) 888.
  - classification, (36) 411.
  - classification, scientific basis, (31) 804.
  - coat color in, chemistry of, (33) 667.
  - cold-blooded, metabolism experiments, (30) 563.
  - color disguise in, treatise, (26) 246.
  - color variation and chromatic skin function of, (33) 168.
  - dead, fertilizer from (33) 219.
  - death-feigning instinct, (37) 559.
  - descent of, (29) 68.
  - destructive, control, (40) 254.
  - diagnostic inoculation with tuberculous material, (27) 184.
  - distribution, treatise, (31) 846.
  - domestic—
    - anatomy of, (32) 78.
    - bones of, (28) 767.
    - breeding and improvement, (33) 71.
    - breeds, origin, (27) 172.
    - calliphorine cutaneous parasites, (27) 656.
    - castration of, (33) 176.
    - danger of contaminated streams to, (29) 880.
    - dissection guide, (26) 578.
    - early maturity in, (26) 471.
    - factors limiting fertility, (32) 465.
    - fleas infesting, (26) 349.
    - hair and hair colors, (27) 369.
    - history, (28) 271, 667.
    - imported, in East Africa, (26) 768.
    - improvement, (27) 467; (33) 297.
    - inheritance in, (29) 665.
    - insects affecting, (26) 780: (27) 53, 453, 552; (28) 753, 855; (29) 252; (32) 448; (33) 746.
    - lysol poisoning in, (26) 581.
    - mucous membrane of, (26) 480.
    - of ancient Crete, (29) 169.
    - ancient Egypt, (27) 371.
    - Europe, origin, (26) 267.
    - Mediterranean islands, (26) 267.
    - parasitology of, (26) 882.
    - pulse rate of, (28) 768.
    - reproductive organs, (27) 369.
    - restraint of, treatise, (26) 678.
    - sea-transport regulations, (34) 575.
    - size of cell as factor, (27) 174.
    - skull and head measurements, (28) 767.
    - susceptibility to plague, (26) 280.
    - textbook, (32) 494.
    - variability in, (34) 370.
  - domestication, (27) 771; (30) 670.
  - double formations or composite monsters, (27) 576.
  - early maturity in, (33) 71.

## Animals—Continued.

- electric stimulation of, (30) 674.
- embryonic deformities in, (27) 274.
- evolution in, (28) 466.
- exercises with, for rural schools, (34) 292.
- experimental rooms for, (29) 167.
- fasting, tissue changes in, (33) 464.
- fecundity in, (28) 125.
- feeding—
  - treatise, (28) 465.
  - under germ-free conditions, (34) 564.
- feral, nervous system, (27) 870.
- fly repellents for, (32) 59.
- food—
  - lymph glands, (27) 180.
  - parasites transmissible to man, (37) 355.
  - prices in Germany, (30) 896.
- fumigation for external parasites, (35) 656.
- fungus parasites of, (32) 271.
- fur-bearing, *see* Fur-bearing animals.
- gall-like formations in, (26) 243.
- game, treatise, (33) 77.
- glandular cell structure in, (28) 272.
- growth of, (30) 467; (34) 305.
- guide for study, (27) 492.
- herbivorous, feeds of animal origin for, (26) 567.
- hibernation, (37) 156.
- hyperimmunizing for anti-rinderpest serum, (27) 380.
- immunization—
  - against nonbacterial diseases, (26) 174.
  - errors in, (31) 178.
- importation into Brazil, (34) 372.
- in zoological gardens, blood parasites, (27) 477.
- inheritance in, (28) 876.
- injurious—
  - handbook, (27) 452.
  - in Colorado, (34) 651.
  - in Ireland, (29) 555; (33) 554.
  - in Russia, (26) 693; (31) 547; (33) 856.
  - laws in Michigan, (26) 59.
  - notes, (26) 452.
  - to *Azalea indica*, (30) 247.
  - cacao, (30) 246.
  - crops, (30) 349, 649.
  - plants, (29) 547, 645.
  - sugar beets, (28) 654; (30) 853; (31) 58, 649; (34) 350.
  - tobacco, (29) 551.
  - vegetables, (27) 438.
- laboratory—
  - blood of, (28) 777.
  - identification, (35) 880.
  - kymograph for, (32) 565.
  - nutrition of, (36) 161.
- lime requirements, (29) 65.
- lower, fertilization in, (29) 167.
- male domestic, sterility and impotence in, (28) 571.
- manganese in, (27) 500, 670.
- meat-producing, lymphatic glands, (34) 876.
- meat, production and marketing, (26) 92.
- Mendelian characters in, (28) 370, 531.
- metabolism experiments, (26) 161, 265; (29) 62.
- mineral, balance of, (31) 663.
- mineral metabolism of, (35) 100.
- minimal lethal dose for, (33) 81.
- nutritive requirements, (31) 662.
- of America, treatise and bibliography, (27) 855.
- Australia, blood examination, (36) 879.
- District of Columbia, (40) 160.
- South India, treatise, (34) 549.
- Yellowstone Park, (40) 350.
- organisms in digestive tract of, (34) 564.
- paralysis in, investigations, (26) 185.
- periodic events, (39) 317.
- pet and laboratory, care and feeding, (28) 173.
- phosphorus content, (33) 167.
- physiology of response in, (27) 368.
- pigmentation in, (29) 466.
- poisoning by plants, (26) 86.
- poisonous, of desert, (39) 153.
- predatory—
  - control in range States, (31) 868.
  - extermination, (39) 555.
- prepotency in, (32) 861.
- price in Switzerland, (26) 573.
- purebred, registration in Brazil, (34) 372.
- ratio of heat production to body weight, (29) 569.

## Animals—Continued.

- response to stimuli, (32) 222.  
 seed destroying, combating, (29) 545.  
 sex-limited inheritance in, (30) 525.  
 skull measurements, (27) 69, 467.  
 slaughtering, (27) 279.  
 small—  
   breeding in Netherlands, (31) 596.  
   immunization, (26) 676.  
   respiration apparatus for, (33) 265; (34) 370.  
 structure terminology of, (29) 665.  
 studies of form, (28) 466.  
 susceptibility to—  
   infectious bulbar paralysis, (33) 179.  
   pneumonic plague, (28) 180.  
 tolerance to ammonia gas, (26) 373.  
 transmission of acquired characters in, (28) 531.  
 transportation, (27) 781.  
 transportation regulations in Germany, (27) 775.  
 tuberculous—  
   inspection, (34) 575.  
   kidney changes in, (26) 379.  
   rôle in infection of man, (29) 382.  
 uniparous, multiple gestation in, (28) 467.  
 urine and other excretions of, treatise, (26) 480.  
 utilization of mineral phosphates by, (29) 870.  
 variations in, treatise, (26) 227.  
 velocity of transmission of excitation in, (34) 29.  
 vertebrate, pulse rate in, (27) 68.  
 wanderings of, treatise, (31) 57.  
 warm-blooded—  
   calorimeter for, (27) 367.  
   calorimetric experiments on, (29) 569.  
   size of organs, (28) 375.  
 wild—  
   and domestic, structure of limb bones, (28) 767.  
   diseases of, (34) 576.  
   in-and-in breeding, (27) 671.  
   National reservations for, (28) 56.  
   of North America, (35) 354; (40) 646.  
   of the world, (39) 859.  
   restocking ranges, (40) 646.  
 young, mother's milk v. foreign milk for, (31) 174.
- Anions, antagonism between, (33) 323.
- Anisandrus—  
 dispar—  
   notes, (30) 161.  
   remedies, (40) 547.  
   studies, (29) 858.  
 pyri, *see* Pear-blight beetle.
- Anise—  
 extermination, (30) 838.  
 seed refuse for cows, (28) 372.
- Anised oil, insecticidal and larvicidal value, (34) 359.
- Anisoclavia 12-maculata, notes, (33) 58.
- Anisomyxa plantiginis n.g. and n.sp., studies, (31) 327.
- Anisoplia—  
 austriaca, biology and remedies, (32) 452.  
 austriaca, notes, (31) 155.  
 spp., notes, (32) 453.
- Anisoscelini, key, (39) 361.
- Anisostigma schenckii, analyses and digestibility, (27) 872; (32) 167.
- Anisota senatoria, notes, (29) 353.
- Ankylostoma—  
 caninum, dissemination by flies, (30) 659.  
 duodenale, transmission by flies, (38) 563.  
 ova, fate in house-fly larvae, (39) 468.
- Anatto—  
 extract, effect on digestion, (26) 68.  
 substitute, effect on digestion, (26) 68.
- Annona—  
 cherimolia—  
   crown gall affecting, (28) 447.  
   notes, (27) 242.  
   propagation, (31) 441; (32) 143.  
 diversifolia n.sp., description, (26) 743.  
 in Hawaii, (37) 345.  
 spp., possibilities of, (29) 642.  
 spp., propagation, (27) 537.
- Annonas, classification, (31) 339.
- Anobiidae, catalogue, (30) 458.
- Anobium—  
 domesticum in New Zealand, (40) 169.  
 rufipes, notes, (36) 853.
- Anoecia—  
 n.sp., nematodes affecting, (35) 658.  
 querci, notes, (36) 551.
- Anogeissus latifolius—  
 gums of, (31) 409.  
 notes, (29) 443.
- Anomala—  
 aenea, notes, (34) 454.  
 beetle in Hawaii, (40) 854.  
 beetle, natural enemies, (38) 557.  
 binotata—  
   life history, (38) 863.  
   notes, (28) 156; (30) 657.  
   marginata, notes, (37) 660.  
 Anomalini of Germany, (35) 661.
- Anomalon sp., parasitic on grapevine sphinx, (26) 250.
- Anomis n.spp., descriptions, (29) 456.
- Anomopteris fascipennis n.g. and n.sp., description, (31) 554.
- Anopheles—*see also* Mosquitoes and Malaria.  
 albimanus, relation to malaria, (32) 348.  
 anatomical studies, (35) 659.  
 apicimacula, relation to malaria, (32) 348.  
 as hosts of malarial parasites, (38) 160.  
 bariensis, notes, (35) 759.  
 bifurcatus—  
   destruction of larvae, (26) 560.  
   notes, (30) 361.  
   parasite of, (39) 766.  
   classification and habits, (39) 158.  
   control, (39) 158.  
 crucians—  
   malaria parasites in, (35) 759.  
   studies, (40) 552.  
 Egyptian, as malaria carriers, (40) 262.  
 flight of, (35) 258.  
 hyelephilus n.sp., description, (37) 565.  
 identification, (39) 562.  
 in Transvaal, (26) 173.  
 infectibility, (37) 463.  
 larvae—  
   bacillary parasite, (40) 552.  
   destruction, (27) 452.  
   winter hibernation, (40) 457.  
 maculipennis, relation to tertian malaria, (39) 156.  
 malarial, studies, (40) 168.  
 notes, (29) 856; (37) 565.  
 punctipennis—  
   as host of tertian plasmodial infection, (36) 255.  
   breeding, (34) 358.  
   infectibility, (36) 757.  
   relation to malaria, (34) 358; (40) 168.  
 quadrimaculatus—  
   breeding in deep water, (40) 168.  
   breeding in rice fields and flight distance, (40) 857, 858.  
   entangling in spider webs, (29) 861.  
   flight of, (37) 853.  
   prevalence in malaria districts, (33) 749.  
   transmission of malaria by, (35) 360, 361; (36) 460.
- Anophellinae—  
 in British Columbia, (35) 755.  
 Indian, nomenclature, (35) 759.
- Anoplocephala—  
 perfoliata, notes, (36) 183.  
 spp., notes, (40) 186.
- Anoplocephalidae, studies, (33) 863.
- Anoplura—  
 n.spp., descriptions, (36) 552.  
 of North American mammals, (36) 253.
- Anovulvitis in cattle, (33) 774.
- Antelopes, relation to Trypanosoma gambiense, (28) 80.
- Antennaria dioica, hydrocarbons in, (26) 107.
- Antennariella fuliginosa n.g. and n.sp., description, (36) 245.
- Anteoninae, studies, (39) 870; (40) 265.
- Anteris nepae n.sp., descriptions, (38) 264.
- Anthaxia manca, notes, (30) 455.
- Anthelmintic—  
 investigations, (40) 477, 482, 684.  
 investigations, differentiation of lesions in, (39) 791.  
 medication, principles, (38) 782.

- Anthelmintics**—  
 effect on parasites, (28) 80.  
 efficacy, (38) 883.  
 testing on earthworms, (40) 187.
- Anthemis**—  
 disease, notes and treatment, (27) 354.  
 nobilis, constituents of flowers, (33) 202.
- Anthephora**—  
 hochstetteri, analyses and digestibility, (27) 871.  
 spp., analyses and digestibility, (32) 167.
- Antheraea peryni**, notes, (38) 361.
- Anthicidae**, catalogue, (26) 560.
- Anthidium** spp., bionomics, (35) 468.
- Anthistiria**—  
 avenacea, analyses, (27) 68.  
 gigantea, production, (40) 243.  
 membranaecea, analyses, (28) 403.  
 spp., analyses, (27) 469; (30) 565.
- Anthoboscinae**, studies, (28) 455.
- Anthoceros**, chondriosomes, (39) 332.
- Anthoceptes n.sp.**, description, (30) 362.
- Anthocyanidins**—  
 formation in plants, (31) 626.  
 production, (33) 329.
- Anthocyanin**—  
 as effected by oxidase, (38) 128.  
 constitution, (36) 127.  
 distribution in plants, (28) 227.  
 electric charge of, (34) 525.  
 experimental production, (30) 729.  
 formation, (35) 333, 523.  
 formation—  
 in flowers, (31) 34, 427; (33) 427.  
 in Hedera, (30) 432.  
 in plants, (27) 634; (28) 36; (29) 219, 421;  
 (30) 129, 729; (31) 34, 128, 224, 626; (32)  
 202, 428, 524, 824; (33) 523, 824; (37) 25.  
 relation to mitochondria, (29) 827.  
 in Antirrhinum, (32) 202, 203, 220.  
 blossoms and fruits, (32) 309.  
 plants, (32) 428.  
 plants, treatise, (37) 633.  
 isolation, (34) 710.  
 markings and cell mutation, (36) 222.  
 origin, (33) 224.  
 preparation, (34) 710.  
 production, (33) 329.  
 products, origin and transformation, (35) 130.  
 relation to coloration of flowers, (28) 227.  
 review of literature, (34) 335.  
 sensitiveness to ultraviolet rays, (27) 827.  
 studies, (27) 228; (31) 324; (33) 627; (34) 223, 709;  
 (39) 224; (40) 819.
- Antholyza bicolor**, fertilization by birds, (28) 531.
- Anthomyia**—  
 antiqua, biology, (33) 746.  
 brassicae, remedies, (26) 256.  
 brassicae, treatment, (33) 848.
- Anthomyiidae**—  
 carnivorous larvae of, (35) 363.  
 investigations, (37) 764.  
 revision, (30) 254.  
 subfamily keys, (38) 61.
- Anthonomes**, notes, (38) 654.
- Anthonomus**—  
 druparium, notes, (27) 255.  
 eugenii, notes, (28) 657.  
 fulvus, destruction by white fungus, (26) 454.  
 grandis, see Cotton boll weevil.  
 grandis thurberia—  
 n. var., description, (30) 57.  
 notes, (31) 350.  
 relation to cotton culture, (33) 257.  
 hicoriae, notes, (37) 560.  
 pedicularius in Bessarabia, (38) 163.  
 pomorum—  
 in Russia, (34) 857.  
 notes, (31) 848; (33) 652.  
 parasites of, (29) 562; (40) 65.  
 quadrigibbus, see Apple curculio.  
 rubi, notes, (29) 658.  
 signatus, see Strawberry weevil.  
 spp., biology and remedies, (33) 750.  
 spp., notes, (27) 54; (30) 357.  
 suturalis, notes, (33) 352.  
 vestitus, notes, (29) 562, 658; (32) 658.  
 vestitus, studies, (28) 162.
- Anthostomella**—  
 arecae n.sp. notes, (37) 148.  
 coffeae, notes, (38) 51.  
 sullae, notes, (26) 747.
- Anthothrips**—  
 aculeata, notes, (28) 452.  
 floridensis, notes, (35) 852.  
 verbasci, parthenogenesis in, (36) 252.  
 verbasci, sex determination in, (38) 558.
- Anthoxanthum odoratum**, germination tests, (28) 327; (29) 143.
- Anthracene**—  
 as wood preservative, (27) 314.  
 effect on plants, (38) 647.
- Anthracic oil** for waterproofing cement, (35) 493.
- Antirax**—  
 address on, (31) 878.  
 affecting man, (37) 179.  
 anaphylatoxin, notes, (28) 778.  
 bacillus—  
 agglutination, (40) 779.  
 anaphylaxis against, (27) 577.  
 and pseudoanthrax bacilli, relationship,  
 (30) 682.  
 as affected by low temperature, (32) 81.  
 as effected by ultraviolet rays, (31) 379;  
 (32) 475.  
 capsule formation, (34) 877.  
 destruction by tanning process, (26) 84.  
 detection in bone marrow, (33) 676.  
 detection in foodstuffs, (27) 478.  
 disinfection by cinchona alkaloids, (40)  
 478.  
 from a contaminated stream, (32) 373.  
 hemolytic powers, (31) 878.  
 historical review of discovery, (33) 773.  
 immunization, (27) 781.  
 in fish meal, (33) 281.  
 natural immunity against, (29) 373.  
 protective action of capsule, (26) 781.  
 resistance to sodium chlorid solution, (37)  
 79.  
 staining, (34) 781.  
 toxin formation by, (27) 781.  
 virulent, in saliva of horses, (30) 83.  
 vitality of, (31) 281.
- control in**—  
 England, (36) 275.  
 Michigan, (37) 274.
- detection, precipitation method**, (33) 386.
- diagnosis**, (26) 375, 678; (27) 80, 284, 378, 478, 680,  
 781; (28) 376, 477, 583, 778; (29) 281, 378, 778;  
 (30) 180, 181, 480; (31) 282, 578, 878; (33) 579;  
 (34) 81, 676, 781; (35) 74; (36) 676; (38) 886.
- dogs as carriers**, (39) 633.
- eradication**, (26) 483; (37) 179.
- fulvohirta**, notes, (34) 556.
- immunity of fowls and pigeons to**, (40) 186.
- immunization**, (26) 279, 483, 578, 676; (27) 80; (28)  
 376, 778; (30) 181, 780; (31) 82, 577, 878; (32) 273;  
 (33) 387, 580; (34) 185, 579, 879; (35) 74; (36) 675;  
 (37) 479; (39) 81, 183; (40) 582.
- in birds**, (28) 678.  
 hogs, (26) 177; (28) 886; (31) 182.  
 hogs, diagnosis, (27) 577.  
 man, (26) 84; (36) 277.  
 man, treatment, (38) 586.  
 sheep, (29) 582.
- infection from**—  
 hides and skins, prevention, (26) 781.  
 wool and hair, (40) 783.
- intestinal, in swine**, (29) 888.
- n.spp.**, descriptions, (37) 565.
- nature and treatment**, (26) 883.
- notes**, (26) 279, 373; (27) 81, 475, 576; (32) 778;  
 (34) 573, 879; (36) 678, 779; (38) 179, 784; (39)  
 387; (40) 86, 676, 778.
- outbreak**—  
 among tannery workers, (37) 79.  
 due to tannery refuse, (32) 373.
- outbreaks in England**, (38) 282.
- precipitation, control extracts for**, (32) 579.
- prevalence in**—  
 Great Britain, (27) 680; (31) 177; (34) 382;  
 (36) 378.  
 Hawaii, (38) 80.  
 Japan, (31) 82.  
 Panama, (28) 79.  
 Prussia, (27) 181.

## Anthrax—Continued.

- relation to buzzards, (28) 79.
- resistance in fowls, (27) 378.
- review of investigations, (38) 182.
- serodiagnosis, (31) 877.
- serum—
  - anaphylaxis after using, (32) 373.
  - immunity studies, (36) 577.
  - precipitating, investigations, (31) 281.
  - precipitating, preparation, (27) 182.
  - preparation, (36) 779.
  - purification, (39) 183.
  - review of literature, (40) 84.
  - valuation, (31) 82, 181.

## spores—

- destruction in hides, (31) 677; (33) 178; (35) 882.
- disinfection in tannin effluent, (36) 180.
- germination as affected by culture media, (26) 781.
- longevity, (26) 781.
- resistance to heat, (35) 487.
- studies, (29) 478; (37) 78.
- symptomatic, *see* Blackleg.
- transmission, (26) 678; (39) 161.
- transmission by—
  - biting flies, (31) 776.
  - carion feeders, (28) 678.
  - insects and animals, (30) 780.
  - stable flies, (28) 756; (29) 761; (32) 552.
- treatment, (27) 182, 680; (29) 679; (35) 379, 784; (38) 483, 586; (40) 582.
- unusual, in a mare, (26) 279.

Antrenus scrophulariae, *see* Carpet-beetle.

## Anthrocephalus n.spp., descriptions, (28) 162.

## Anthrothrips—

- dozieri n.sp., description, (40) 353.
- floridensis n.sp., description, (37) 561.
- North American species, (37) 561.

## Anthus rubescens, destruction of grain aphids by, (29) 453.

## Anthyllus cytisoides, analyses, (33) 466.

## Antiagressin serums, notes, (27) 883.

## Antianaphylaxis—

- nature of, (30) 478.

## studies, (37) 178.

## Antianthrax serum, preparation, (29) 378; (30) 280.

## Antibodies—

- and antigens, coexistence in the body, (35) 781.
- detection, (29) 881, 882.
- detection in blood of horses immunized with voldagsen bacilli, (30) 685.
- fate in precipitin reaction, (34) 877.
- fixation in vitro, (26) 579.
- formation—
  - as affected by exudate leucocytes, (26) 278.
  - during preparation of serums, (29) 581.
  - in blood of immunized horses, (28) 779.
  - review of investigations, (28) 180.

## hemolytic, preparation and action in vitro, (40) 380.

## in Dorset-Niles serum, (29) 82.

## in rats fed pure vegetable proteins, (32) 875.

## in tuberculosis and John's disease, (31) 882.

## liberation on injection of foreign protein, (40) 180.

## local production of, (26) 579.

## nature, (37) 76.

## nonspecific, passive transference, (36) 878.

## notes, (26) 676.

## of spores, (36) 380.

## of the lymph, origin, (35) 73.

## preparation, (32) 78.

## production, effect of arsenamin and mercuric

## chlorid on, (40) 287.

## relation to antigen within the cell, (38) 78.

## specific, in blood serum of tuberculous subjects, (27) 481.

## studies, (36) 80, 576.

## transmission from mother to fetus, (38) 284.

## tubercular—

- inhibition reaction of, (31) 481.
- notes, (29) 583.
- production in bovines, (30) 582.
- production in sound animals, (28) 585.
- studies, (35) 784.

## Anticalf dysentery serum, valuation, (28) 782.

## Anticarsia—

- caterpillar on velvet beans, (33) 58.

## Anticarsia—Continued.

## gemmatilis—

## in West Indies, (38) 58.

## life history, (36) 459.

## notes, (31) 752.

## studies, (34) 358; (35) 852, 854; (39) 461.

## Anticoli serum, Jensen's studies, (32) 582.

## Anticyclones—

## in United States, (33) 807; (36) 718.

## nature, (32) 810.

## Anticyclonic stratus, formation, (38) 511.

## Antiemulsin, synthetic properties, (27) 612.

## Antierysipelas serum, preparation, (29) 378.

## Antiferments, bacterial—

## nature of, (35) 382.

## studies, (32) 678.

## Antiformin—

## action on tubercle bacilli, (31) 881.

## diagnostic value, (29) 285.

## Antigaster mirabilis, notes, (31) 650.

## Antigen—

## and antibody, coexistence in serum, (34) 779;

## (37) 877; (39) 584.

## and antiserum, simultaneous injections, (36)

## 677.

## dose and antibody production, relation, (38)

## 584.

## intracutaneous absorption, (38) 482.

## precipitin, production from bacteria, (38) 483.

## protein-free, injection of rabbits with, (27) 382.

## relation to antibody within the cell, (38) 78.

## serum mixture, injection of rabbits with, (27)

## 382.

## synthetic, for meiostagmin reaction, (31) 178.

## Antigenic—

## action of separated horse serum proteins, (36) 877.

properties of  $\beta$ -nucleoproteins, (37) 77.

## Antigens—

## bacterial, dried, (40) 678.

## bacterial, preparation, (40) 478.

## containing cholesterol, use, (32) 272.

## detection, (29) 881, 882.

## detection and concentration, (34) 579.

## excretion, (34) 579.

## from serum-grown bacteria, nonspecific reac-

## tions, (35) 679.

## in cultures of tubercle bacilli, (31) 778.

## notes, (26) 676.

## plant, hemagglutinating and precipitating

## capacity, (26) 607.

## preparation, (32) 78.

## preservation, (26) 83.

## tuberculous, (40) 481, 886, 887.

## tuberculous—

## inhibition reaction of, (31) 481.

## notes, (29) 583.

## preparation, (26) 783.

## visible detection, (26) 579.

## Antigeny, problem in, (27) 655.

## Antiglanders serum, preparation, (36) 679.

## Antihematoxins, bacterial, notes, (26) 676; (32) 78.

## Antihemolysin in animal serums, (28) 179.

## Antihog-cholera serum—

## bacterial studies, (32) 271.

## distribution, (26) 888; (29) 888.

## efficiency, (28) 587.

## keeping quality, (30) 185.

## notes, (31) 781.

## preparation, (32) 83, 277, 378, 480, 676.

## preparation and standardization, (31) 885.

## preparation and use, (31) 86.

## production and distribution in California, (30)

## 484.

## production and use, (29) 888.

## standardization, (32) 880.

## use, (29) 482; (32) 83, 277.

## Antihog erysipelas serum, preparation, (28) 381.

## Antiketogenesis, theory of, (34) 462.

## Antimony—

## detection in water, (34) 410.

## effect on geese, (28) 73.

## effect on respiration in plants, (33) 30.

## use against spirochete and trypanosome diseases,

## (31) 284.

## Antineuritic—

## substance from egg yolk, (37) 308.

## substances, isomerism in, (36) 314.

## Antineuritis bases, vegetable, relation to beri-beri,

## (28) 67.

## Antipsonic test, diagnostic value, (26) 283.

- Antioxidase—  
notes, (37) 203.  
of tomato plants, (34) 33.
- Antiperistalsis, relation to bacteria in alimentary tract, (28) 882.
- Antiphenol serum, tests, (35) 279.
- Antiphymatol—  
tests, (28) 680.  
use against tuberculosis, (31) 779; (32) 183; (33) 284, 481.
- Antipolynuric substances from carrots and yeast, (40) 174.
- Antipyrin—  
determination, (29) 800.  
periodicids of, (36) 313.
- Antirabic—  
inoculations, local reaction in, (26) 177.  
vaccine, preparation, (26) 782.
- Antiricin, chemical nature, (30) 204.
- Antirinderpest serum—  
preparation, (28) 782.  
production, (27) 380.  
tests, (27) 380; (29) 285.
- Antirrhinum majus—  
factor coupling in, (28) 531.  
flower pigments, (31) 224; (32) 202, 203, 220.
- Antirrhinum spp., hybridization experiments, (30) 330.
- Antirrhinums, culture experiments, (31) 340.
- Antiscorbatic—  
factor in lemon juice, (40) 364, 869.  
factor, studies, (40) 269, 272.  
property of vegetables, (40) 172, 762.  
substance—  
distribution in foodstuffs, (40) 868.  
in sprouted grains, (40) 565, 869.
- Antiscorbutics, rôle in the diet, (40) 70.
- Antiseptic—  
properties of some organic compounds, (39) 412.  
solution of crystal violet and brilliant green, (40) 255.  
solutions, bleaching powder for, (40) 414.  
use of brilliant green for, (40) 581.
- Antiseptics—  
action—  
of, (29) 802.  
on *Bacillus welchii* toxin, (39) 185.  
on necrotic tissue, (38) 685.  
on pus and pure cultures, (36) 479.  
bactericidal properties, (34) 675.  
chlorinated, alkalinity and acidimetry of, (39) 506.  
comparative study, (37) 176.  
effect on—  
action of maltase, (28) 503.  
concentration of soil solution, (37) 719.  
crop growth, (31) 27.  
soils, (35) 515.  
efficacy, studies, (39) 80.  
handbook, (39) 184.  
mixtures of, action, (40) 581.  
new, (38) 283, 782; (39) 80, 680, 885.  
oil, germicidal power, (40) 882.  
papers on, (40) 779.  
soil, tests, (28) 538.  
sterilization of soils by, (32) 816.  
toxicity, (39) 586.  
use in food materials, (26) 564.  
volatile—  
effect on soil bacteria, (31) 516.  
effect on soils, (37) 519.
- Antiserum—  
specific, for infections of unknown cause, (40) 678.  
testicular, toxicity, (28) 676.
- Antisheep—  
amboceptor, production, (35) 574.  
hemolytic amboceptor, preservation, (38) 181.
- Antistrangles vaccine, use, (30) 180.
- Antistreptococcus serum—  
curative power, (31) 479.  
studies, (26) 579.  
tests, (32) 272.
- Antitetanic serum, efficacy of, (31) 379.
- Antithrombin, rôle in coagulation of blood, (26) 580.
- Antitoxic—  
rôle of oxyhydrinase, (40) 580.  
serum, concentration, (37) 376; (40) 287, 288.  
serum production, (40) 580.  
substances, studies, (40) 179.
- Antitoxin—  
absorption as affected by protein concentration, (32) 372.  
concentration, (36) 178, 179; (39) 487.  
dosage, relation to serum sensitization, (32) 372.  
in milk of immunized sheep, (27) 680.  
oral administration of, (26) 83.  
preparation, (26) 374.  
preparation and standardization, (33) 280.  
studies, (39) 489.
- Antituberculin, notes, (26) 379.
- Antituberculosis—  
immunity, notes, (26) 379.  
serum, notes, (27) 580.
- Antler moth, notes, (38) 361.
- Antorgan as a wood preservative, (30) 647.
- Ants—  
acacia, of Central America, (31) 452.  
acrobat, notes, (31) 853; (35) 254.  
agricultural or hillock, studies, (27) 263.  
animals associated with, (26) 348.
- Argentina—  
as an orchard pest, (37) 568.  
control, (36) 60; (39) 264.  
distribution and control, (35) 761.  
in California, (26) 254; (29) 654.  
citrus groves, (39) 155, 156.  
Silesia, (37) 766.  
Texas, (31) 256.  
natural enemies, (40) 65.  
notes, (29) 654; (34) 158; (40) 655.  
studies, (29) 563.
- as carriers of—  
blister rust, (39) 248.  
cholera vibrios, (31) 752.  
pathogenic micro-organisms, (31) 849.
- as fruit tree pests, (32) 551.
- behavior toward larvae of *Lycaena* spp., (27) 258.
- black garden, notes, (27) 54.  
cacao, studies, (39) 156.  
combating, (39) 59.  
common house, trail formation and orientation, (29) 860.  
control in dwellings, (36) 555.
- cornfield—  
capture of living insects by, (33) 258.  
life history, (29) 860.
- cutting or parasol, studies, (27) 263.
- destruction—  
by dynamite, (34) 125.  
of pigs by, (26) 483.
- destructive to—  
bagworms, (27) 558.  
fly larvae, (28) 255.
- distribution of pear blight by, (33) 149.
- economic importance, (40) 547.
- feeding habits, (31) 458.
- fire, notes, (28) 158, 853.
- fungus-growing—  
in Louisiana, (38) 564.  
of Texas, (26) 658.  
remedies, (35) 761.
- Gramang, economic importance, ( 8) 364.
- guamá, remedies, (31) 637.
- harvester, notes, (29) 453.
- harvester, remedies, (32) 549; (33) 57; (35) 551; (39) 760.
- house, eradication, (39) 761.
- house, remedies, (35) 555.
- injurious to—  
cacao, (27) 53.  
coffee, (27) 856; (29) 652.  
okra, (29) 653.  
tobacco, (30) 759.
- larvae, studies, (40) 553.
- leaf-cutting, control in Argentina, (26) 452.
- little brown, destructive to flies, (30) 554.
- lycenid reared by, (31) 352.  
notes, (40) 259.
- of Great Britain, guide, (35) 262.  
Guam, (27) 264.  
Haiti, (34) 556.  
Hawaii, (30) 759; (34) 59; (35) 557.  
Illinois, list, (28) 758.  
Indiana, list, (39) 768.  
South Carolina, (38) 768.  
Wisconsin, list, (39) 869.
- orientation of, (33) 563.  
papers on, (27) 656.

## Ants—Continued.

- pavement, as a pest of cold-frame and greenhouse crops, (34) 657.  
 predacious on alfalfa caterpillar, (32) 58.  
 protecting acacia trees in Central America, (37) 568.  
 queen, founding of colonies by, (31) 452.  
 remedies, (31) 155; (32) 650; (38) 47.  
 removal of onion seeds by, (35) 365.  
 studies, (28) 562.  
 transmission of anthrax by, (26) 678.  
 weather-proof bands for, (37) 59.  
 white, *see* Termites.  
 Yakman, as enemy of bees, (40) 358.  
 yellow field, notes, (34) 752.
- Anuraphis** spp., *see* *Aphis*.  
**Anystis agilis**, notes, (27) 861.  
**Aonidia oleae** n.sp., description, (32) 449.  
**Aonidiella**—  
*aurantii*, *see* Orange scale.  
*inopinata* n.sp., description, (33) 653.
- Aorta** in warm-blooded animals, size of, (28) 375.  
**Apache** National Forest, composite type on, (29) 43.  
**Apamea basilinea**, notes, (36) 552.
- Apanteles**—  
*caja*, notes, (31) 251.  
*canarsiae*, notes, (36) 155.  
*congregatus*, notes, (30) 59.  
*diacrisiae* n.sp., description, (38) 165.  
*glomeratus*—  
 notes, (38) 768.  
 oviposition, (40) 263.  
 studies, (27) 459.  
*hyphantria*, notes, (27) 261.  
*impurus*, notes, (29) 562.  
 in Nova Scotia, (33) 746.  
*lacticolor*—  
 bionomics, (39) 661.  
 dispersion in New England, (33) 254.  
 in Maine, (37) 459.  
 notes, (27) 456.  
*lateralis*, parasitic on bee moth, (26) 657.  
*militaris*—  
 biology, (34) 455.  
 effect on army worm larvae, (35) 553.  
 n.sp., notes, (27) 159; (28) 752.  
 n.spp., descriptions, (26) 352; (29) 563; (30) 255; (34) 456.  
 (*Protopanteles*) *flavicombe*, parasitic on alfalfa caterpillar, (32) 58.  
 sp., notes, (29) 256; (36) 655.  
 spp., parasitic on gipsy moth, (31) 652.
- Apantesis argae**, notes, (32) 753.  
**Apate francisca**, notes, (36) 355.  
**Apatela populi**, notes, (28) 155.  
**Apateticus** spp., life histories, (35) 658.  
**Apatite**—  
 action of fertilizer salts on, (35) 326.  
 decomposition by soil bacteria and yeast, (31) 121.  
 deposits in Chile, (32) 723.
- Apechoneura**, studies, (34) 758.  
**Apemea** (*Hadena*) *didyma* (*oculea*), notes, (27) 552.  
**Apentelicus kotinskyi** n.sp., notes, (29) 253.  
**Apera spica venti**, germination as affected by light, (30) 531.
- Apes**—  
 infection with avian tuberculosis, (26) 583.  
 morphology of blood, (28) 777.
- Aphaenogaster barbara**, notes, (27) 54.  
**Aphaereta**—  
*sarcophagae* n.sp., description, (35) 262.  
 sp., parasitic on locusts, (32) 60.
- Aphalara** n.sp., description, (40) 354.  
**Aphanomyces laevis**, notes, (27) 544, 651, 728; (29) 647.  
**Aphanurus bodkini** n.sp., description, (31) 459.
- Aphelenchus**—  
*armerodis*, notes, (34) 841.  
 n.spp., descriptions, (31) 56.  
*olesistus*, description, (36) 52.  
*olesistus*, notes, (28) 854.  
*ormerodis*, notes, (37) 246.  
*ritsemabosi*, notes, (34) 249.  
 spp., parasitism, (30) 648.
- Aphelininae**, synopsis, (30) 161.  
**Aphelinoidea semifuscipennis**, notes, (31) 752.
- Aphelinus**—  
*chrysomphali*, notes, (38) 467.  
*diapsidis*, parasitic on orange scale, (26) 554.

## Aphelinus—Continued.

- European species, (30) 754.  
*fuscipennis*, notes, (27) 556; (28) 159; (29) 758.  
*lapisigni* n.sp., description, (37) 766.  
*lapisigni* n.sp., feeding on juices of its host, (37) 856.  
*mytilaspidis*, studies, (37) 59.  
 spp., notes, (27) 152; (31) 356.
- Aphelocoma cyanotis** and its allies, (38) 556.
- Aphelopus**—  
*dikraneuri* n.sp., studies, (40) 265.  
*thelae* n.sp., description, (39) 662.
- Aphidencyrthus aspidioli**—  
*britannicus* n.var., description, (35) 365.  
 n.sp., description, (35) 263.  
 notes, (38) 565.
- Aphididae**—  
 Cyrus Thomas collection, (30) 754.  
 habits, (32) 849.  
 infesting sage brush in Oregon, (34) 357.  
 intermediates in, (35) 256.  
 leaf feeding, on pines, (36) 459.  
 notes, (38) 357.  
 of Africa, (39) 559.  
 California, (26) 149, 755; (27) 859; (28) 452; (35) 56; (38) 260.  
 California, host index, (26) 149; (28) 556.  
 Indiana, (28) 554.  
 Italy, (38) 460.  
 Japan, (38) 463; (40) 262.  
 Java, (37) 850.  
 Lahore, (40) 650.  
 Nebraska, (26) 655.  
 Portugal, (33) 748.  
 on apples in Great Britain, (36) 253.  
 sensory structures, (37) 850.
- Aphidinae** of Japan, new, (40) 60.
- Aphidius**—  
*brasilensis* n.sp., description, (39) 566.  
*brassicae*, notes, (26) 149.  
*crepidis*, notes, (31) 757.  
*nigripes*, parasitic on grain louse, (26) 857.  
*obsoletus* n.sp., description, (30) 758.  
 testaceipes—  
 destructive to citrus plant lice, (26) 755.  
 notes, (27) 859.
- Aphidoletes meridionalis**, studies, (35) 855.  
**Aphidolysin** in plant lice, (40) 650.
- Aphids**—  
 alternation of generations, (28) 655.  
 alternation of hosts, (39) 464.  
 as fire blight carriers, (39) 251.  
 cat-tail as a summer host, (37) 461.  
 control—  
 by lady beetles, (34) 555; (39) 663.  
 in gardens, (39) 657.  
 dissemination of lettuce bacterial rot by, (31) 747.  
 ecology, problems in, (35) 658.  
 endoparasitism in, (37) 54.  
 food plants of, (30) 854; (31) 157; (39) 657.  
 hemolysin in, (40) 650.  
 injurious in Georgia, (38) 256.  
 injurious to peas, (31) 452.  
 new or little known, of eastern United States, (37) 850.  
 new species from California, (39) 658.  
 newly hatched, remedies, (35) 757.  
 nomenclature, (38) 462.  
 notes, (28) 60, 248; (29) 654, 854; (31) 155; (37) 258.  
 of British Columbia, (35) 755.  
 Colorado, (33) 857.  
 Oregon, (34) 356.  
 papers on, (40) 259.  
 relation to fire blight, (34) 452; (37) 151, 157.  
 remedies, (31) 848; (37) 254, 256, 358; (38) 47, 56, 159.  
 tobacco treatment, (39) 461.  
 wing development, (40) 456.
- Aphiochaeta**—  
*ferruginea*, relation to Asiatic cholera, (35) 258.  
 juli, habits, (29) 457.  
 perdita, parasitic on alfalfa caterpillar, (32) 58.  
*xantina*, notes, (36) 754.
- Aphis**—  
 abbreviata n.sp., description, (28) 60.  
 abietina—  
 notes, (32) 57, 448.  
 outbreak in England and Ireland, (29) 757.

## Aphis—Continued.

- avenae—  
 breeding experiments, (36) 253.  
 in Maryland, (38) 154.  
 injurious to apples, (33) 253.  
 injurious to cereals, (28) 653.  
 notes, (31) 753; (32) 755; (36) 458; (40) 648.  
 remedies, (38) 561.  
 bakeri—see also Apple aphid.  
 allied species, (39) 465.  
 bituberculata n.sp., description, (31) 850.  
 brassicae, see Cabbage aphid.  
 brevis, studies, (32) 755.  
 brevisiphona n.sp., notes, (29) 454.  
 cerasi, notes, (32) 651.  
 chenopodii, new genus for, (40) 650.  
 circeazandis, identity, (40) 754.  
 cookii n.sp., description, (26) 755.  
 crataegi, injurious to apples, (26) 247.  
 eggs, destruction with hydrocyanic acid gas,  
 (36) 551.  
 euonymi—  
 and A. papaveris, identity, (30) 252.  
 hymenopterous parasites of, (31) 757.  
 studies, (31) 652, 754.  
 fitchii, notes, (33) 554.  
 foot in horses, notes, (26) 888.  
 forbesi—  
 notes, (29) 653; (33) 554.  
 studies, (38) 357.  
 gossypii—see also Cotton aphid and Melon  
 aphid.  
 notes, (26) 755; (27) 155.  
 synonym of, (40) 754.  
 wing development, (40) 456.  
 green, notes, (36) 457.  
 grossulariae, notes, (27) 758; (30) 53.  
 immunity of teosinte-corn hybrids, (38) 561.  
 maidi-radicis, see Corn root aphid.  
 maidis, notes, (28) 158; (29) 252.  
 malifoliae—  
 in Nova Scotia, (38) 156.  
 key for stem mothers, (39) 360.  
 studies, (36) 357.  
 n.spp., description, (31) 157.  
 neo-mexicana pacifica, n.var., description, (37)  
 562.  
 papaveris in northern France, (30) 251.  
 persicae-niger, see Peach aphid, black.  
 pisi, see Macrosiphum pisi.  
 pomi, see Apple aphid, green.  
 pomi-mali, see Apple aphid.  
 pomonella n.sp., description, (36) 253.  
 pruni, remedies, (33) 555.  
 prunifoliae, key for stem mothers, (39) 360.  
 pseudoavenae n.sp., description, (39) 62.  
 pseudobrassicae—  
 n.sp., description, (31) 754.  
 notes, (37) 254; (39) 762.  
 studies, (34) 452; (35) 756.  
 pulverulens n.sp., description, (26) 149.  
 rosy—  
 control, (40) 754.  
 in Maryland, (38) 154.  
 in Nova Scotia, (38) 156.  
 notes, (40) 648.  
 remedies, (39) 761.  
 studies, (40) 649.  
 rumicis—  
 control, (29) 454; (34) 555, 755; (39) 256.  
 host plants and habits, (32) 849.  
 host plants of, (33) 557.  
 notes, (28) 556; (35) 54.  
 on artichoke, (40) 58.  
 saliceti and allied species, (39) 657.  
 scalliae n.sp., notes, (31) 848.  
 sensoriata n.sp., notes, (39) 465.  
 setariae, notes, (33) 452.  
 sorbi—  
 alternate or summer host plants, (35) 462.  
 in Maryland, (38) 154.  
 life history and remedies, (30) 251.  
 notes, (33) 253; (35) 853; (36) 357; (40) 648.  
 predatory enemy of, (30) 459.  
 remedies, (33) 253; (38) 561; (39) 760, 761.  
 studies, (40) 649.  
 sorghi, notes, (27) 53.  
 spp., injurious to cotton, (27) 454.  
 spp., notes, (26) 60, 654; (28) 252, 254, 655, 854;  
 (29) 454; (31) 755.

## Aphis—Continued.

- spp. on Rosaceae, (32) 848.  
 theobaldi n.sp., description, (39) 657.  
 woolly—see also Apple aphid, woolly.  
 as a pear pest, (34) 357.  
 control, (40) 258.  
 identity, (34) 854.  
 in core of apples, (30) 156.  
 migration from elm to mountain ash, (28)  
 251.  
 mouth parts and suction mechanism in, (34)  
 653.  
 notes, (27) 859; (29) 558; (35) 54, 552; (40)  
 256, 547.  
 of elm, (30) 854.  
 of elm and Juneberry, (34) 161.  
 relation to Nectria ditissima, (39) 150.  
 structure and biology, (28) 856.  
 studies, (32) 848; (34) 62; (36) 755; (39) 253;  
 (40) 165.  
 yellow, attacking sugar cane, (38) 762.  
 Aphrizidae of North and Middle America, (41)  
 547.  
 Aphrophora—  
 parallela, life history, (36) 458.  
 parallela, notes, (37) 255.  
 spumaria, notes, (30) 356.  
 Aphthomonas infestans, description, (36) 278.  
 Aphthous fever, see Foot-and-mouth disease.  
 Aphycoideus io, notes, (36) 556.  
 Aphyucus—  
 flavus, parasitic on black scale, (26) 556.  
 hesperidum n.sp., description, (38) 467.  
 immaculatus, parasitic on orange scale, (26) 554.  
 melanostomatus, studies, (40) 651.  
 n.spp., descriptions, (35) 857.  
 spp., notes (29) 654; (33) 555.  
 terryi n.sp., notes (30) 661.  
 Aphyllantes monspeliensis, analyses, (33) 466.  
 Apiaries, inspection—  
 in Connecticut, (26) 855; (28) 553; (30) 654; (33)  
 57; (35) 53; (37) 254; (39) 760.  
 Colorado, (30) 249; (31) 254; (34) 651.  
 Indiana, (28) 555; (35) 461; (38) 556.  
 Iowa, (37) 467.  
 Kansas, (33) 153; (37) 357.  
 Massachusetts, (27) 359; (32) 556; (35) 662;  
 (37) 855.  
 Michigan, (27) 767.  
 Ontario, (27) 458.  
 Pennsylvania, (37) 459; (39) 869.  
 Rhode Island, (27) 857.  
 Wisconsin, (37) 263; (38) 155.  
 law in Tennessee, (27) 756.  
 record system for, (33) 862.  
 Apiculate, see Beekeeping.  
 Apiochaeta absidhalteris, notes, (27) 657.  
 Apion—  
 hibisci, studies, (40) 754.  
 spp. injurious to alfalfa, (33) 555.  
 spp., notes, (31) 848.  
 xanthostylum, notes, (28) 555.  
 Apioninae, notes, (27) 863.  
 Apiospora camtospora, notes, (38) 550.  
 Apiosporium oleae, parasitic on olive scale, (26) 655.  
 Apis—  
 fasciata, bionomics, (38) 264.  
 indica, domestication, (37) 855.  
 mellifera, see Bees.  
 Aplanobacter—  
 agropyri—  
 n.sp., description, (36) 647.  
 occurrence in Montana, (38) 249.  
 michiganense, description, (31) 745.  
 rathayi—  
 n.sp., description, (30) 539; (31) 745.  
 notes, (34) 349.  
 stewarti n.comb., studies, (40) 846.  
 Apodonia, revision, (39) 759.  
 Apolappus ciliatus, occurrence of barium in (26)  
 432.  
 Apoparaksis fuligulosa n.sp., description, (26) 561.  
 Apluda mutica, notes, (26) 361.  
 Apocellus sphaericollis, studies, (33) 563.  
 Apocynum, rubber from, (30) 614.  
 Apodemus sylvaticus, notes, (37) 156.  
 Apomecyna binubila, notes, (27) 53; (32) 347  
 Apophyllite—  
 extraction of potash from, (27) 323.  
 fertilizing value, (27) 725.

- Apoplexy**—  
in winter-fed lambs, (26) 368.  
parturition, *see* Milk fever.
- Aporia crataegi**, notes, (33) 652.
- Aporetodea chlorotica**, carbon dioxide exhalation of, (26) 619.
- Aposphaeria**—  
pomi, notes, (26) 449.  
ulei, notes, (37) 253.
- Apparatus**—  
absorption, (40) 308.  
automatic burette, (40) 505.  
condensing, (40) 308, 709.  
digestion, (40) 410.  
distillation, (40) 709.  
extraction, (40) 806.  
filtration, (40) 409.  
for ammonia—  
distillation, (40) 709, 806.  
oxidation, (40) 815.  
for analysis of gases, (40) 111.  
for determining—  
nitrates and nitrites, (40) 309.  
urea in blood, (40) 207.  
water in food materials, (40) 204.  
for distributing Dakin's solution, (40) 12.  
filling and inoculating agar plates, (40) 805.  
measuring leather, (40) 208.  
rapid evaporation, (40) 505.  
serum distribution, (40) 581.  
tubing culture media, (40) 12.  
glass safety valve, (40) 709.  
laboratory, new or modified, (39) 9, 414, 502, 503, 505, 611, 713, 714, 804.  
mechanical pipette, (40) 806.  
nitrogen, all-glass, (40) 600, 806.  
osmotic pressure, description, (40) 801.  
respiration, portable, (40) 465.  
special stopcock, (40) 202.
- Appetite**—  
as affected by ventilation, (33) 664.  
studies, (37) 166.
- Apple**—  
**Alternaria rot**, Longyear's, (38) 453.  
**Anthracnose**—  
description and treatment, (27) 249.  
notes, (31) 53; (33) 98; (34) 95, 542.  
studies, (29) 153.  
**aphis**—  
and *Aphis sorbi*, remedies, (39) 760.  
and red bugs, notes, (34) 160.  
banded, remedies, (36) 857.  
biology of, (31) 250.  
brown, notes, (35) 253.  
control, (40) 162, 163, 549, 649, 754.  
correct name, (38) 462.  
distribution of pear blight by, (33) 149.  
green, notes, (29) 353; (35) 657.  
green, occurrence of an intermediate in, (33) 748.  
green, remedies, (33) 58, 557.  
in Great Britain, (36) 253.  
in Maryland, (38) 154.  
key for stem mothers, (39) 360.  
life histories and habits, (35) 402.  
migratory, notes, (33) 554.  
notes, (27) 53; (29) 353, 652; (33) 253; (36) 854; (38) 358; (40) 647, 648, 649, 650.  
purple, remedies, (33) 557.  
remedies, (29) 356; (30) 55, 852; (32) 449, 536; (33) 253; (34) 147; (35) 456, 757, 838; (36) 855; (37) 54, 156; (38) 257, 561, 857; (39) 345; (40) 161.  
aphis, rosy—*see also* *Aphis*, rosy.  
alternate hosts, (39) 464.  
life history and remedies, (30) 251.  
predatory enemy of, (30) 459.  
studies, (36) 356.  
aphis, studies, (32) 755; (34) 754; (37) 561; (40) 354, 649.  
aphis, woolly—*see also* *Aphis*, woolly.  
and elm cluster louse, identity, (34) 357.  
and *Schizoneura americana*, relationship, (28) 251.  
control, (26) 561; (33) 59; (40) 258.  
destruction by vegetable parasites, (28) 354.  
in core of apples, (30) 156.  
life history and remedies, (28) 251.
- Apple**—Continued.  
**aphis**, woolly—continued.  
notes, (26) 753, 856; (27) 353, 455, 555, 859; (29) 353, 453, 654; (34) 161; (35) 253, 853; (36) 253; (39) 258, 464, 804; (40) 547.  
on Rosaceae, (32) 848.  
structure and biology, (28) 856.  
studies, (30) 548; (32) 848; (38) 464; (39) 258; (40) 165.  
**bark**—  
canker, studies, (38) 453.  
disease, studies, (38) 251.  
healthy and diseased, oxidation in, (34) 136.  
spot, brown, (39) 251.  
base as a jelling agent, (32) 162.  
**bitter pit**—  
cause, (26) 55; (27) 749.  
cause and development, (32) 751.  
notes, (38) 646.  
relation to irrigation, (36) 50.  
studies, (29) 246; (31) 244; (33) 348, 852; (35) 456, 457; (37) 455; (38) 352.  
treatment, (37) 151.  
**bitter rot**—  
control, (39) 251.  
enzym activity in, (29) 648.  
fungus, utilization of pentoses by, (34) 351.  
notes, (27) 546.  
studies, (33) 148; (39) 551.  
treatment, (27) 153; (30) 650.  
**black root rot**—  
description, (36) 147.  
studies, (37) 456, 754.  
**black rot**—  
notes, (39) 850.  
studies, (36) 148, 750; (38) 649.  
treatment, (30) 650.  
**black spot**—  
canker, notes, (31) 53.  
notes, (30) 541; (40) 748, 749.  
treatment, (40) 749.  
**blight**—  
description and treatment, (31) 53.  
notes, (31) 644, 843; (33) 534; (34) 648.  
resistance to, (38) 350.  
resistant stocks, (39) 864.  
studies, (38) 650.  
**blister canker**—  
description and treatment, (27) 445.  
notes, (27) 749; (37) 151.  
studies, (39) 53.  
treatment, (37) 51.  
**blister**—  
disease, notes, (34) 543.  
spot, notes, (36) 148.  
spot, studies, (38) 251.  
**blossom**—  
blight, notes, (31) 345.  
morphology, (39) 338.  
weevil, parasite of, (40) 65.  
wilt and canker, studies, (38) 453.  
wilt, notes, (40) 850.  
**blotch**—  
control, (40) 639.  
notes, (28) 148.  
studies, (37) 654.  
treatment, (31) 53, 439; (38) 551.  
**branch blister**, notes, (32) 344; (37) 842.  
breeding in Canada, (28) 840.  
**brown rot**—  
notes, (34) 241; (37) 457.  
studies, (31) 749; (35) 248.  
treatment, (32) 148.  
**bud**—  
development as affected by summer pruning, (36) 239.  
disease, notes, (34) 49.  
formation as affected by soil management, (40) 148.  
moth, eye-spotted, remedies, (39) 659.  
moth, notes, (28) 752.  
selection, (37) 240; (39) 40, 844.  
**buds**—  
analyses, (31) 836.  
new disease of, (30) 352.  
resistance to frost, (30) 839.  
**bug, green**—  
remedies, (40) 354.  
studies, (36) 457; (37) 462.

## Apple—Continued.

- canker—  
and blossom wilt, studies, (38) 453.  
behavior in two grafts on same stock, (37) 250.  
description and treatment, (29) 752.  
diseases, treatment, (33) 248.  
European, in Quebec, (32) 544.  
in Ontario County, (26) 541.  
notes, (26) 446; (27) 546; (28) 446; (29) 793; (32) 445, 547; (33) 347; (36) 541.  
studies, (30) 651; (34) 744; (35) 653.  
transmission by tree crickets, (34) 653.  
treatment, (35) 848; (37) 754; (38) 639; (40) 341.
- capsids—  
remedies, (39) 763.  
studies, (40) 59, 60.
- caterpillar—  
red-humped, notes, (28) 158; (30) 157; (39) 761.  
yellow-necked, notes, (36) 358.  
chlorosis, treatment, (30) 749.  
cider as a source of alcohol, (35) 113.  
cider, preparation, (33) 316.  
collar blight, notes, (31) 346.  
collar blight, studies, (34) 247; (35) 548.  
collar rot, studies, (34) 154, 156.  
cork, studies, (37) 350.
- cracking disease—  
notes, (32) 344.  
studies, (39) 149.
- cricket canker, (35) 547.
- crown gall—  
studies, (35) 35; (39) 856.  
varietal relations, (37) 554.
- curculio—  
notes, (26) 759.  
remedies, (34) 147; (37) 242; (39) 348.
- die-back, notes, (28) 54; (32) 644.  
die-back, studies, (37) 554.  
disease in New Zealand, (35) 456.  
disease, notes, (31) 539.
- diseases—  
and pests, treatment, (38) 843.  
descriptions, (31) 449.  
in Indiana, (38) 251.  
Iowa, (29) 445.  
New South Wales, (34) 247.  
New York, (40) 249, 251.  
New Zealand, (38) 452.  
Pennsylvania, (34) 646; (35) 351.  
Tasmania, (36) 846.
- inoculation experiments, (27) 651.  
manual, (30) 642.  
notes, (26) 55, 742, 840, 844; (27) 241, 349, 353; (28) 544, 555, 747; (29) 146, 242, 353; (30) 245; (31) 641, 644; (32) 544, 641; (33) 447, 741, 840; (37) 51; (38) 50, 550; (39) 452; (40) 53.  
spray calendar for, (26) 539.  
studies, (26) 449; (28) 240; (29) 649; (32) 750; (33) 544.  
treatment, (26) 48; (27) 39, 849, 855; (28) 58; (31) 151, 335; (32) 751; (33) 45, 349; (34) 747; (35) 752; (37) 51.
- drop caused by lime-sulphur, (40) 57.  
drought spot, studies, (37) 350.
- ermine moth—  
identity and distribution, (38) 860.  
notes, (29) 252.  
studies, (28) 557.
- eye rot, notes, (35) 151.
- fire blight—  
description, (35) 848.  
dissemination by bees, (35) 662.  
notes, (29) 848; (31) 749; (32) 844; (33) 53.  
relation to fertilizers, (28) 144.  
studies, (29) 348.
- flca weevil—  
notes, (28) 156; (34) 254.  
remedies, (31) 456.
- flour, studies, (40) 762.
- flower wilt and young fruit rot, (36) 148.
- flowers—  
and fruits, abscission, (37) 240.  
polymorphism in, (28) 540.
- foliage—  
diseases, in investigations, (27) 152.  
studies, (26) 407.  
wind scorch of, (33) 148.

## Apple—Continued.

- frog-eye leaf spot, studies, (29) 648; (35) 151.
- fruit buds—  
development, (31) 335; (33) 838.  
formation, (29) 437; (33) 44; (35) 499, 837; (39) 40, 42, 241, 346.  
formation as affected by pruning, ringing, etc., (33) 735.  
winter injuries, (28) 741; (29) 41.
- fruit—  
miner, life history, (38) 261.  
pit disease, notes, (35) 456.  
rots, notes, (30) 147.  
spot, notes, (28) 345, 849; (30) 541; (32) 51, 749; (34) 842, 846; (35) 848; (40) 844.  
spot, studies, (27) 652; (33) 247.  
spots and rots, studies, (35) 242.  
spur system, (36) 239.
- gnarly disease, notes, (38) 453.  
grafts, comparative growth, (32) 635.  
heart rot, studies, (35) 653.  
hold-over blight, studies, (26) 646.
- industry—  
in United States, (36) 536.  
in Virginia, census, (40) 149.
- jelly, manufacture, (37) 15; (40) 414.  
jelly, preparation, (39) 808.
- Jonathan spot—  
rot, notes, (29) 847, 848; (31) 748; (34) 157; (37) 754.  
studies, (38) 353.
- juice—  
analyses, (33) 240; (37) 502; (40) 764.  
fermentation, (36) 801.  
notes, (29) 116.  
osmotic pressure, (28) 262.  
physico-chemical constants of, (31) 427.  
preservation by pressure, (32) 416.  
studies, (29) 711.
- June drop, (38) 745.
- leaf—  
blister mite, notes, (35) 263.  
cast, notes, (38) 647.  
crumpler, notes, (26) 856.  
diseases, description, (35) 752.  
dry spot, notes, (34) 842.  
jassid, description, (40) 261.  
miner, notes, (32) 651; (35) 253.  
miner, unspotted tentiform, notes, (29) 655.  
mining case bearer, notes, (38) 862.  
mites, notes, (37) 570.  
roller, notes, (36) 457, 855.  
roller, remedies, (37) 54.  
sawfly, notes, (30) 53.  
scorch, notes, (29) 845; (40) 844.  
scorch, studies, (38) 649.  
sewer, studies, (36) 254.  
sewer, notes, (38) 358.
- leaf spot—  
description, (30) 50, 650.  
in Indiana, (39) 52.  
notes, (29) 748; (34) 54.  
studies, (28) 548; (31) 150; (33) 247.  
treatment, (27) 153; (30) 650.
- leaf trumpet miner, notes, (30) 657.
- leafhopper—  
black, *see* *Idiocerus provancheri*.  
life history and habits, (38) 858, 859; (39) 61.  
notes, (26) 59; (27) 755, 858; (28) 752; (29) 354; (33) 352, 356.  
on potato, (40) 353.  
relation to fire blight, (36) 351.
- leaves—  
as affected by *Gymnosporangium*, (26) 649; (30) 245.  
diseased, respiration in, (32) 751.  
infection by cedar rust, (29) 49, 647, 648.  
infection by *Gymnosporangium macropus*, (29) 647.
- limb diseases, notes and treatment, (29) 49.
- maggot—  
affecting blueberries, (32) 350; (33) 97; (34) 852.  
biology and remedies, (29) 560.  
control, (40) 163, 654.  
in British Columbia, (37) 665; (40) 654.  
in Nova Scotia, (35) 853.  
in Ontario, (30) 53.  
notes, (26) 753; (32) 448; (36) 856; (40) 57, 169, 654.

## Apple—Continued.

- maggot—continued.  
remedies, (31) 757; (33) 59; (35) 660; (38) 358.  
studies, (32) 153; (38) 262.
- mildew—  
in Sweden, (33) 846.  
in Washington, (38) 47.  
notes, (35) 650; (36) 541.  
parasites of, (31) 544.  
treatment, (26) 750; (34) 352; (38) 47; (40) 251, 849.
- moth, light brown, notes, (27) 57.
- mushroom root rot—  
notes and treatment, (28) 748.  
studies, (35) 242.
- orchards—  
care and management, (29) 42, 353; (31) 45  
cost of establishing, (36) 444.  
cost of management, (31) 46; (32) 45.  
cost of spraying, (35) 838.  
cost to bearing age, (31) 45.  
cover crops for, (35) 540.  
culture experiments, (31) 141; (35) 644.  
dusting, (35) 447.  
eliminating unprofitable trees from, (32) 836.  
establishment and care, (27) 241; (31) 45.  
fertilizer experiments, (31) 141.  
fertilizers for, (29) 148.  
intercrops for, (35) 540.  
management, (27) 241; (35) 143, 456.  
mulching, (36) 396.  
profits from, (31) 46; (33) 237; (35) 342, 447.  
pruning, (29) 148.  
renovating, illustrated lecture, (39) 93.  
renovation and care, (32) 540.  
soil management, (40) 742.  
spraying, (26) 599.  
spraying schedule for, (28) 48; (32) 536.
- orchards, survey in—  
Berkeley County, West Virginia, (33) 839.  
Mills County, Iowa, (32) 540; (33) 240.  
Ontario County, New York, (26) 540.
- orchards, tillage v. sod mulch for, (31) 45, 337, 636; (35) 644.
- packing houses in Northwest, (37) 648.  
parings, analyses, (38) 626.  
Phytophthora rot, notes (35) 848.
- pollen—  
effect on size and number of seeds, (31) 440.  
germination, (35) 731.  
vitality, (29) 326.
- potomace—  
analyses, (26) 267, 714; (27) 775, 872; (32) 520.  
feeding value, (26) 72; (28) 268; (32) 363; (35) 373; (39) 269.  
fertilizing value, (34) 219.
- powdery mildew—  
description and treatment, (31) 748.  
in northwest, (39) 856.  
notes, (28) 447.  
studies, (33) 347.  
treatment, (30) 640; (36) 350.
- psyllid, remedies, (31) 548.
- red bug—see *Lygidea mendax*.  
false, notes, (28) 752; (32) 550; (33) 58; (34) 158; (35) 54; (39) 258, 760.  
lined, notes, (34) 752.
- residues, storage and use, (30) 612.
- root borer, notes, (26) 353.  
root borer, studies, (32) 248.  
root rot in Virginia, (36) 351, 649.  
root rot, notes, (34) 49.  
rosette, notes, (36) 351.
- rot—  
notes, (28) 241; (30) 349; (36) 47.  
studies, (30) 542; (33) 348.  
temperature relations, (36) 147, 649; (37) 754.
- rough bark, studies, (29) 154.
- rust—  
control in West Virginia, (35) 657.  
dusting experiments, (39) 54.  
new, description, (31) 150, 345.  
notes, (26) 52; (27) 546; (30) 542, 651; (32) 644; (35) 151; (39) 54.  
relation to cedar apples, (28) 151.  
studies, (34) 54, 154, 157, 444; (35) 49, 848; (39) 150.  
treatment, (28) 748; (30) 450; (33) 247, 348.
- sawfly, notes, (29) 861.

## Apple—Continued.

- scab—  
control, (39) 251, 349, 352, 548, 552, 651.  
description and treatment, (38) 550.  
fungus, overwintering, (38) 151.  
fungus, perithecia of, (31) 449; (35) 351.  
infection, relation to height of fruit, (37) 51.  
notes, (29) 247; (30) 147; (33) 647; (34) 247, 846; (36) 347, 647; (38) 546, 848, 852; (40) 748.  
on twigs, (38) 251.  
overwintering, (35) 753.  
resistance to, (36) 649.  
source of spring infection, (31) 151.  
spraying v. dusting for, (31) 449.  
studies, (27) 546; (30) 542, 848; (31) 645; (33) 148, 347, (37) 555.  
treatment, (27) 153; (28) 448, 544; (29) 146; (30) 348, 840; (31) 346, 439; (32) 51, 540, 751; (33) 237, 247, 347, 648; (34) 747, 843; (35) 248, 249, 343, 447, 548, 549; (36) 50, 351; (37) 242, 655, 755; (38) 540; (40) 154, 341, 647.
- scald—  
prevention by air movement, (39) 857.  
studies, (36) 148; (38) 353; (40) 849.
- scions, tests, (28) 436.
- seed chalcid, notes, (27) 255; (28) 654; (38) 156.  
seed chalcid, studies, (36) 461.
- seeds—  
agglutinating properties, (31) 774.  
analyses, (34) 201.  
composition, (27) 11.  
oil from, (40) 511.
- silver leaf disease, notes, (26) 749; (35) 650.  
sirup, manufacture, (33) 209.  
skeletizer in New York, (38) 60.  
skeletizer, notes, (40) 648.
- skins—  
ether extract of, (29) 461.  
isolation of fat from, (29) 459.  
yellow oil from, (31) 311.
- soft scald, studies, (39) 855.  
soils of Massachusetts and Connecticut, (32) 835.
- sooty—  
blotch, notes, (29) 154; (35) 550.  
blotch, treatment, (27) 747.  
fungus, treatment, (28) 47.
- spot disease—  
description, (36) 750.  
notes, (28) 443.
- spot diseases—  
development in storage, (38) 753.  
relation to soil moisture, (38) 753.  
studies, (35) 456; (38) 650.
- spot rots, studies, (33) 348.
- starch, studies, (31) 828.
- stems, variations in, (34) 144.
- stigonose, studies, (33) 348, 349.
- stocks, effect on vintage, (33) 240; (35) 645.
- storage spot, notes, (32) 441.
- strainer, studies, (31) 852.
- sucker—  
notes, (33) 652.  
remedies, (31) 548; (33) 555, 857; (37) 761.  
studies, (34) 451; (37) 761.
- tent caterpillar—  
egg parasites, (36) 556.  
life history and remedies, (29) 655.  
notes, (28) 557; (30) 153, 654, 657; (34) 158.  
remedies, (33) 59.
- tentiform leaf miner, unspotted, studies, (35) 359.
- tree borer—  
control in West Virginia, (35) 657.  
flat-headed, notes, (35) 656.  
flat-headed on pecan, (38) 157, 762; (39) 557.  
long-headed, notes, (33) 360.  
notes, (26) 500; (29) 353.  
round-headed, notes, (31) 249.  
round-headed, remedies, (37) 161.  
round-headed, studies, (39) 663, 868; (40) 654.
- tree trunks, introduction of solutions into, (36) 740.
- tree wounds, painting, (35) 446.
- trees—  
dynamiting experiments, (35) 539.  
potassium cyanid inoculation, (39) 225, 762.  
ringing, (36) 536.  
root systems, (35) 541.

## Apple—Continued.

- trees—continued.  
 starch storage and migration in, (35) 645.  
 wood decay in, (34) 53.  
 twig blight, prevalence in Ontario County, (26) 541.  
 twig borer, notes, (30) 154.  
 twig borer, studies, (31) 852.  
 twigs, composition, (26) 407.  
 water core—  
 cause, (26) 55.  
 notes, (28) 48, 549; (30) 749; (35) 40.  
 studies, (29) 848.  
 weevil—  
 notes, (26) 759.  
 oviposition, (39) 363.  
 parasites of, (29) 562.  
 wine, preparation, (27) 412.  
 winter injury—  
 or die-back, studies, (35) 242.  
 to roots, (35) 542.  
 wood-stainer, notes, (36) 258.  
 worm, green, *see* *Xylina* sp.  
 worms in Nova Scotia, (35) 853.

## Apples—

- abscission of flowers and fruits, (38) 745.  
 acidity, (32) 110; (37) 714.  
 advertising, (36) 494.  
 alternate cropping, (35) 37; (36) 140, 640.  
 analyses, (26) 46.  
 and pears, handbook, (26) 45.  
 angle and size of shoots as affecting growth and productiveness, (39) 43.  
 as affected by—  
 Bordeaux mixture, (27) 440.  
 formaldehyde gas, (30) 540.  
 imported western soil, (39) 40.  
 poisoning, (33) 329.  
 position in cluster, (40) 444.  
 removal of blooms, (38) 647.  
 spraying materials, (38) 156.  
 as host of—  
*Archips argyrospila*, (27) 160.  
*Fomes fomentarius*, (32) 51.  
 as source of alcohol, (36) 508.  
 ash analyses, (29) 861.  
 bark injury as affecting fruit-bud formation, (39) 43.  
 bending dormant shoots, (39) 43.  
 blooming dates in Utah, (39) 46.  
 blooming period, (26) 440; (30) 642; (31) 533; (37) 744.  
 blooming period as affected by sprays, (30) 641.  
 breeding, (36) 444.  
 breeding—  
 experiments, (27) 843; (32) 45, 438, 538; (34) 40, 634, 738; (36) 741; (37) 242; (38) 641; (39) 39, 346, 347, 542, 844; (40) 148, 341, 742.  
 for late blooming, (37) 743; (38) 639.  
 for South Dakota conditions, (39) 346.  
 in Canada, (38) 446.  
 in Idaho, (34) 42.  
 calyx cup of, studies, (34) 64.  
 cambial activity, (37) 128.  
 canned, keeping in open tins, (39) 317.  
 capsid bugs affecting, (32) 849.  
 cider—  
 analyses and classification, (34) 233.  
 and vinegar qualities, (39) 316.  
 feeding value, (39) 269.  
 monograph, (28) 437.  
 use in cookery, (37) 669.  
 classification, (35) 644.  
 climatic adaptations of varieties, (26) 45.  
 cold storage, (30) 41; (35) 447; (37) 833.  
 color in, (35) 645.  
 composition as affected by irrigation, (26) 336; (27) 10; (29) 237.  
 conservation without use of sugar, cooking qualities of different varieties, (32) 560, 855.  
*Coryneum*-like structures on, (33) 545.  
 cost of harvesting, (32) 541.  
 cost of production, (26) 238; (29) 439; (33) 439, 840; (34) 233, 438, 638; (36) 841; (38) 844; (39) 140.

## Apples—Continued.

- cost of production in Washington, (36) 443.  
 crab, *see* Crab apples.  
 critical months, (39) 811.  
 cross pollination, (27) 598; (31) 440, 554; (36) 442, 742; (38) 345; (39) 645; (40) 149.  
 crown gall affecting, (28) 447.  
 cull, utilization, (33) 209.  
 culture, (29) 745; (32) 45, 494, 751; (34) 833.  
 culture—  
 experiments, (28) 144, 436; (29) 42; (34) 148, 217; (35) 37, 342, 447, 540; (36) 237, 240, 443; (38) 42, 242, 244, 345, 443, 641; (39) 242, 348; (40) 444, 837.  
 in Alaska, (29) 742.  
 Brittany, (33) 640.  
 California, (32) 744.  
 Canada, (36) 742.  
 Delaware, (31) 236.  
 Georgia, (27) 644; (33) 439.  
 Indiana, (26) 742.  
 Maine, (27) 644.  
 Maryland, (30) 642.  
 Massachusetts, (30) 739; (36) 742.  
 Mesa County, (37) 241.  
 Mississippi, (26) 742.  
 New Jersey, (30) 739.  
 New Mexico, (40) 18.  
 New York, (35) 836.  
 Northwest, (34) 638.  
 Ontario, (26) 840.  
 southern Texas, (32) 539.  
 the Ozarks, (29) 237.  
 Vermont, (26) 541.  
 West Virginia, Jefferson Co., (33) 140.  
 western Nebraska, (32) 233.  
 on Long Island, (31) 45.  
 under dry farming, (30) 435.  
 custard, *see* Custard apples.  
 cutinization of skins, (40) 246.  
 defoliation experiments, (39) 42.  
 description, methods and terms, (32) 744.  
 destruction, (26) 334.  
 disease resistance in, (29) 41; (40) 742.  
 diseased, plaster cast of, (31) 748.  
 districts and varieties, (36) 536.  
 dried—  
 analyses, (30) 861.  
 examination, (36) 466.  
 microbiology, (34) 460.  
 preparation and use, (29) 462.  
 drying, (27) 146; (35) 418; (37) 114, 509; (39) 16.  
 Duchess, improved type, (38) 42.  
 dusting—  
 and spraying costs, (36) 53.  
 and spraying experiments, (30) 840; (32) 836; (34) 738.  
 experiments, (38) 546; (39) 349; (40) 341, 445.  
 v. spraying, (36) 351; (38) 540.  
 dwarf trees, (39) 347.  
 dwarf v. standard (33) 639; (34) 344.  
 effect of sprays on roots, (39) 40.  
 effect on composition of urine, (31) 761.  
*Emponsea unicolor* on, (40) 57.  
 enzymes of, (39) 310.  
 etherization, (40) 837.  
 evaporated, analyses, (32) 762.  
 evaporation, (26) 156; (35) 418; (38) 207; (39) 808.  
 factors affecting—  
 production, (28) 143.  
 yield, color, and growth, (28) 639.  
 fall v. spring planting, (26) 238; (37) 743.  
 fasciation in, (36) 837.  
 fertile and self-fertile varieties, (40) 638.  
 fertilizer experiments, (26) 817; (28) 47, 143, 740; (29) 437, 539; (30) 640; (31) 335; (33) 45; (34) 148, 149, 833; (35) 38, 235, 238, 342, 447, 540, 837; (37) 41, 344, 647, 749, 833; (38) 42, 244, 345, 540, 639; (39) 40, 139, 242, 346, 347, 445; (40) 149, 837.  
 fibro-vascular system, (27) 538; (29) 542.  
 fluctuating characteristics of, (26) 336.  
 for livestock, (31) 365.  
 forcing experiments, (38) 443.  
 forecasting probable bloom, (37) 744.  
 foreign markets for, (38) 42.

## Apples—Continued.

- from scions from high- and low-producing parents, (31) 334.
- frost injury, (27) 546; (29) 49, 547; (37) 344.
- frozen, as affected by rapid thawing, (32) 43.
- fruitfulness, factors in, (40) 836.
- girdling, (40) 837.
- grading and handling, (34) 149.
- grading and packing law in Delaware, (37) 745.
- grading and packing law in Maryland, (37) 143.
- graft hybrid, (31) 140; (39) 241.
- grafting experiments, (39) 40.
- grafting on pear stocks, (37) 40.
- graphic summary of seasonal work, (39) 495.
- gross morphology, (29) 541.
- gross vascular anatomy, (36) 140.
- growth—
  - and color development, (35) 838.
  - as affected by meteorology, (29) 510.
  - as affected by soils, (29) 416.
  - studies, (39) 844.
- handling and storing, (35) 342; (38) 143.
- hardiness—
  - in, (35) 236.
  - in relation to structure and composition, (34) 342.
  - on different stocks, (40) 837.
- hardy varieties, (39) 445.
- harvesting, (34) 438.
- harvesting and marketing, (36) 742.
- harvesting dates, (30) 344.
- hawthorn aphid affecting, (26) 247.
- household use, (40) 173.
- improvement, (28) 144; (35) 342.
- improvement by scion selection, (33) 237, 239.
- incipient drying of leaves and fruit, (35) 238.
- inflorescence and fruit of, (36) 331.
- inheritance of characters, in, (28) 639.
- inoculation experiments with brown rot fungus, (33) 247.
- insect scars, (39) 257.
- insects affecting, (26) 48, 742, 757, 840; (29) 353; (30) 642, 753, 853; (33) 45, 59, 652, 695, 840; (34) 833; (35) 853; (37) 847, 848; (38) 156, 460, 843.
- insoluble carbohydrates or marc, (27) 39, 241, 255, 664.
- internal structure, (36) 41.
- interrelation of root and scion, (35) 142.
- irrigated—
  - and nonirrigated, composition, (30) 643.
  - keeping quality, (32) 743.
- irrigation experiments, (27) 743; (33) 683; (38) 242.
- keeping quality, (34) 634; (38) 844; (40) 246.
- keeping quality, relation to soil moisture, (37) 41; (40) 741.
- lead arsenate injury, (31) 141; (40) 639.
- leopard moth affecting, (26) 150.
- Lepidoptera infesting, (40) 756.
- limb and twig disease of, (36) 746.
- liming experiments, (39) 445.
- marketing, (32) 91; (39) 90.
- marketing—
  - and distribution, (34) 149.
  - by parcel post, (36) 742.
  - cooperatively, (29) 392; (37) 143.
  - in North Carolina, (33) 595.
- McIntosh, characteristics, (28) 639.
- McIntosh, drought injury, (40) 849.
- Monilia affecting, (26) 849.
- mulching experiments, (34) 833.
- new, description, (29) 436, 838; (31) 337; (32) 438, 744; (35) 37.
- new varieties, (27) 144.
- nitrogen for, (39) 241; (40) 837.
- nomenclature, Australian, (39) 844.
- Northern Spy seedlings, characteristics, (31) 440.
- nursery, root systems of, (35) 142.
- odoriferous substances of, (26) 208.
- of colder parts of United States and Canada (26) 540.
  - Georgia, peculiarities, (31) 440.
  - Germany, (33) 838.
  - lower Seine regions, composition, (30) 16.
  - New York, (29) 41.
- orange rust of, (29) 547.
- oriental peach moth on, (39) 259, 261.
- packing, (28) 237; (29) 838; (30) 41; (35) 838; (37) 648; (38) 246.

## Apples—Continued.

- parthenocarp in, (34) 226.
- pear blight on, (40) 348.
- pear thrips affecting, (27) 156; (40) 547.
- picking and handling, (34) 437.
- picking maturity, (37) 543.
- plant food removed by, (36) 39.
- planting—
  - and care, (38) 245.
  - costs, (38) 41.
  - with dynamite, (32) 535; (35) 236, 752.
- pollination, (27) 744; (31) 534; (32) 743; (34) 233, 341; (39) 138; (40) 148, 149, 638, 740.
- pollination, relation to weather conditions, (35) 237.
- preservation, (29) 312.
- prices and receipts in Boston, (39) 895.
- propagation, (33) 238.
- propagation and shipping experiments, (34) 637.
- protection against rabbits, (34) 250.
- pruning, (29) 148; (30) 739; (33) 837; (37) 344; (39) 541; (40) 639.
- pruning—
  - and training, (37) 344.
  - at planting, (34) 342.
  - experiments, (26) 45; (35) 142; (36) 237, 535; (37) 240; (39) 40, 139, 347; (40) 837.
  - studies, (39) 42.
  - summer, (34) 533.
  - summer v. winter, (34) 738; (37) 647.
  - wounds, (40) 341.
- quality in, analysis, (29) 40.
- receipts and wholesale prices in New York City, (31) 46.
- reducing and nonreducing sugars in, (29) 503.

- self-fruitfulness and self-sterility in, (31) 337.
- self-sterility in, (33) 236; (35) 837; (40) 148.
- sensitivity to poison, (35) 456, 457.
- shipping, heavy loading in, (39) 748.
- silver lead disease affecting, (29) 845.
- snout beetles affecting, (26) 759.
- sod v. tillage, (26) 45.
- sod mulch v. tillage, (30) 640, 642; (34) 148.
- spray injury, (38) 641.
- spray schedule, (39) 140, 242.
- sprayed, arsenic on, (38) 54.
- spraying, (29) 436; (33) 439, 538; (36) 535; (37) 744; (38) 550; (40) 162, 837.
- spraying—
  - dust v. liquid, (32) 551; (37) 832, 833.
  - experiments, (27) 143, 439; (28) 47, 348, 436; (30) 640; (33) 45, 141, 648; (34) 146; (35) 39, 342; (36) 240; (37) 40, 242, 447, 647; (38) 551; (39) 343, 345, 348, 349, 548, 552, 651, 760, 865.
  - in blossom with tobacco extract, (31) 548.
  - summer, (29) 146.
  - with Bordeaux, (40) 746.
  - with lime arsenate, (40) 164.
- stock and scion relations, (39) 541.
- stocks—
  - dwarf, (39) 347.
  - for, (33) 239; (39) 40, 645, 843, 864.
  - Siberian crab, (39) 346.
- storage, (26) 441; (29) 40; (32) 141; (36) 240; (38) 143, 241; (39) 310, 770; (40) 849.
- storage—
  - changes during, (39) 121.
  - experiments, (33) 340.

## Apples—Continued.

- storage—continued.  
houses for, (32) 888; (38) 88.  
in peat dust, (29) 641.  
sulphur spotting, (39) 856.  
temperatures injurious to, (27) 413, 439.  
thinning experiments, (28) 47; (29) 541; (32) 438, 637; (33) 47; (37) 448; (39) 139.  
top working, (27) 744.  
top working, cost, (35) 342.  
transplanting experiments, (35) 37, 38.  
treatise, (27) 538; (34) 342.  
tree census in Washington, (40) 340.  
tree characters, (35) 236.  
variability of yield, (38) 744.  
variation in, (31) 636, 836; (35) 838; (39) 541.  
varieties, (28) 436, 838; (29) 235; (32) 538; (33) 237, 534, 637; (34) 42; (36) 742; (37) 143, 240, 241; (38) 41, 142; (39) 40, 445.  
varieties—  
for Australia, (29) 340.  
British Columbia, (35) 237.  
home orchard, (40) 341.  
Idaho, (33) 44.  
Minnesota, (39) 445; (40) 148.  
New Jersey, (33) 439.  
Northwest, (39) 346, 844.  
Ohio, (29) 395; (37) 241.  
Oregon, (39) 241.  
Pacific Northwest, (29) 745.  
Pennsylvania, (31) 45.  
western Washington, (33) 44.  
identification, (28) 237; (35) 236.  
in Australia, (39) 844.  
Germany, (31) 46.  
Iowa, (37) 647.  
Missouri, (27) 844.  
Ohio, (35) 40.  
Oklahoma, (27) 241.  
United States, (32) 438.  
United States and Canada, (28) 237.  
Virginia, (27) 144.  
recognizing, (31) 494.  
resistant to cedar rust, (33) 248.  
resistant to diseases, (29) 246.  
susceptible to diseases, (29) 436; (31) 53.  
variety index, (26) 238.  
variety tests, (39) 346.  
winter—  
injury, (36) 431; (40) 835.  
injury in Minnesota, (40) 837.  
pruning experiments, (39) 44.  
washes for, (35) 38.  
winterkilling, (32) 43.  
winterkilling of twigs and roots, (30) 147.  
wound stimulation and closure in, (26) 826.  
yield of individual trees, (33) 237.  
yields, (27) 343.  
yields at different ages, (33) 439.
- Apricot—  
as root stock, tests, (40) 445.  
brown rot, treatment, (40) 851.  
buds, analyses, (31) 837.  
buds, resistance to frost, (30) 839.  
buds, spray injury, (40) 52.  
Coryneum fruit spot, notes, (34) 352.  
Coryneum rust, notes, (33) 549.  
desert, description, (30) 41.  
dieback or winterkilling, notes, (30) 537.  
disease in Rhone valley, (35) 249; (37) 250.  
diseases in France, (35) 49, 50.  
fire blight, notes, (29) 848.  
flowers, polymorphism in, (28) 540.  
fruit spots, descriptions, (35) 654.  
gummosis—  
bacterial, (39) 151.  
description, (38) 650.  
notes, (34) 54.  
studies, (30) 749.  
kernel oil, analyses, (26) 504.  
kernels, microscopic identification, (28) 565.  
leaf and twig curl, notes, (36) 647.  
Monilia blight, studies, (34) 351.  
pollen, frost resistance of, (29) 437.  
rust, notes, (39) 850.  
rust, treatment, (40) 851.  
scab or black spot, notes, (36) 845.  
scab or freckle, notes, (30) 537.  
seeds, oil content, (36) 803.  
sour sap disease, notes, (34) 54; (36) 451.

## Apricot—Continued.

- stones—  
histological characteristics, (27) 112.  
hydrocyanic acid content, (27) 12.  
thrips, new species, (40) 853.  
tree disease, notes, (31) 539.
- Apricots—  
acidity, (32) 110; (37) 715.  
blooming periods, (37) 633.  
composition as affected by irrigation, (29) 236.  
cost of precooling, (34) 637.  
crown gall affecting, (28) 447.  
crown gall resistance in, (35) 645.  
culture in Mesa County, Colorado, (37) 241.  
destruction by black scale, (26) 555.  
dried—  
analyses, (30) 861.  
examination, (36) 466.  
inoculation experiments with brown rot fungus, (33) 247.  
microbiology, (34) 460.  
preparation and use, (29) 462.  
drying, (27) 146; (37) 114, 715.  
fruit stocks for, (38) 345.  
growth as affected by meteorology, (29) 510.  
injuries by freezing, (26) 749.  
localization of acids and sugars in, (36) 110.  
oriental peach moth on, (39) 259, 261.  
pear thrips affecting, (27) 156.  
pollination experiments, (34) 233.  
protection from cold, (39) 45.  
pruning, (32) 837.  
pruning experiments, (40) 445.  
"salmon fly" injury, (39) 257.  
spraying experiments, (28) 652.  
stocks for, (40) 445.  
sweet, composition of kernels, (27) 801.  
tree census in Washington, (40) 340.  
varieties, (37) 241; (38) 41.
- Aproctonema entomophagum n.g. and n.sp., notes, (38) 563.
- Aprostocetus whitmani n.sp., description, (36) 259.
- Apterotrix longiclava n.sp., description, (35) 366.
- Aptinothrips rufa, notes, (28) 452.
- Aptosimum albomarginatum, analyses and digestibility, (32) 167.
- Aquatic products, food value, (39) 67.
- Aqueous—  
extracts, evaporation apparatus, (34) 608.  
solutions—  
extraction with ether, (37) 414.  
ice crystallizations from, (36) 419.  
vapor in atmosphere, condensation, (38) 210.
- Arabinose—  
behavior in fermenting mixtures, (27) 502.  
decomposition by yeast, (36) 609.  
determination, (26) 709; (37) 617.  
reducing power, (33) 314.
- $\beta$ -*d*-Arabinose, crystallography and optical properties, (40) 202.
- Arabis disease, notes, (34) 750.
- Arachidic acid, detection, (36) 414.
- Arachin—  
basic nitrogen distribution in, (37) 501.  
chemistry of, (37) 8.  
hydrolysis, (40) 109.
- Arachis—  
hypogaea—  
agglutinating properties, (31) 774.  
analyses, (31) 833.  
analyses and digestibility, (28) 464.  
oil—  
accessory growth substance in, (38) 265.  
determination, (30) 209.  
germinal action, (40) 14.  
prostrata as a green manure, (32) 423.
- Arachnida—  
of British Columbia, (39) 464.  
species injurious to man, (39) 768.
- Arachnids—  
comparative physiology and morphology, (33) 553.  
injurious to orach, (29) 853.  
relation to disease transmission, (30) 546.
- Arachniopsis albicans n.g. and n.sp., description, (39) 30.
- Araceeris fasciculatus, see Coffee-bean weevil.
- Aragallus—  
lamberti, absorption of barium chlorid by, (28) 527.  
spicatus, poisoning of sheep by, (31) 781.

- Aralia**—  
 cordata, notes, (31) 140.  
 cordata, nuclein bases in, (33) 564.  
 spp., intumescences in, (26) 545.
- Araucaria**—  
 araucana (imbricata) and its resins, (40) 615.  
 forests of Chile, (32) 542.
- Arbela tetraonis**, description, (28) 753.
- Arbor Day**—  
 for roads, (29) 695.  
 in Kentucky, (27) 195.  
 in Porto Rico, (27) 899.  
 manual, (27) 598, 898; (31) 395, 495; (33) 495.  
 notes, (30) 196, 197.  
 suggestions, (31) 792; (32) 495, 496.
- Arbor vitae**—  
 Chinese, culture, (30) 346.  
 leaf miner, notes, (33) 252.
- Arboriculture**—  
 bibliography, (34) 435.  
 in Spain, (33) 238.  
 ornamental, notes, (29) 148.  
 treatise, (33) 537.
- Arbutin** in—  
 leaves of *Grevillea robusta*, (27) 527.  
 pears, (26) 327.
- Arceuthobium**—  
 injurious to conifers, (39) 57.  
 oxycedri, notes, (31) 56.
- Archibuteo lagopus sanctijohannis**, notes, (27) 355.
- Archips**—  
 argyrosipila—  
 notes, (28) 450; (30) 157, 361; (32) 651; (40) 161.  
 pupal instar, (34) 357.  
 remedies, (31) 850; (34) 755; (35) 551; (37) 56.  
 studies, (27) 160; (28) 754.  
 cerasivorana—  
 natural control, (40) 62.  
 notes, (26) 856; (34) 752; (36) 856.  
 postvittanus, notes, (27) 155.  
 rosaceana, notes, (28) 854; (35) 853.  
 rosana, life history and habits, (30) 654.  
 rosana, notes, (35) 54.  
 spp., notes, (27) 161.
- Archytas**—  
 analis, parasitic on army worm, (34) 251.  
 piliventris, notes, (29) 356.
- Arctia caja**—  
 bacillary septicemia of, (29) 855.  
 notes, (30) 54, 855.  
 parasites of, (31) 251.
- Arctomys bobac**—  
 notes, (27) 454.  
 relation to plague, (26) 252, 653.  
 susceptibility to pneumonic plague, (28) 180.
- Arctostaphylos columbiana** n.sp., description, (34) 336.
- Arcyptera flavicosta**, destruction by *Coccobacillus acidiorum*, (33) 154.
- Ardisia crispa**, symbiosis with bacteria, (29) 30.
- Arduenna** (Siproptera) strongylina, notes, (28) 285.
- Areca**—  
 catechu, culture in North Kanara, (34) 239.  
 nut mahali disease, treatment, (36) 48.  
 nuts, secondary bases of, (31) 309.  
 palm—  
 anaberoga, description, (37) 557.  
 collar rot, notes, (34) 50.  
 diseases, notes, (36) 348; (40) 48, 845.  
 koleroga, notes, (34) 55, 644; (38) 351, 548.
- Arecain**, chemical formula for, (31) 309.
- Arenga saccharifera**, culture and use, (32) 46.
- Arenavaga**, new species, (40) 754.
- Aressida annulicornis** n.sp., description, (28) 163.
- Argas**—  
 and spirochetes, notes, (31) 81.  
 miniatus—  
 anatomy, (29) 58.  
 as affected by Roentgen rays, (28) 57.  
 inheritance of spirochetal infection in, (27) 84.  
 notes, (26) 864; (27) 565, 762, 865; (31) 586; (39) 461, 768; (40) 267.  
 nymphs, infection by, (26) 460.  
 relation to spirochetosis in fowls, (26) 684.  
 remedies, (29) 58.  
 transmission of fowl pest by, (26) 890.
- Argas**—Continued.  
 persicus, see *Argas miniatus*.  
 spp., notes, (29) 563.
- Arge salicis** n.sp., description, (30) 60.
- Arginase**—  
 action on creatin, (35) 313.  
 determination in animal organism, (34) 304.  
 in plants, studies, (37) 204.  
 preparation from fresh liver, (37) 112.
- Argineta indica** affecting sugar cane roots, (38) 550.
- Arginin**—  
 determination, (35) 415.  
 determination in proteins, (26) 22; (37) 112.  
 distribution in plants, (30) 129.  
 effect on plant growth, (28) 324.  
 enzymatic splitting in lupines, (39) 733.  
 in chernozem soils, (35) 212.  
 grape leaves, (27) 731.  
 hops, (32) 502.  
 malt sprouts, (26) 24.  
 soils, (27) 500.  
 stachys tubers and citrus leaves, (26) 107.  
 metabolism, (38) 267.  
 notes, (28) 29.  
 nutritive value, (38) 569.  
 rôle in purin metabolism, (37) 265.
- Argulus foliaceus**, notes, (38) 661.
- Argyna cribraria** on san, (31) 850.
- Argyresthia**—  
 aternatella, notes, (34) 450.  
 atmoriella, notes, (34) 553.  
 conjugella, life history, (38) 261.  
 conjugella, notes, (36) 457.  
 illuminatella, notes, (34) 855; (35) 258.  
 n.sp., descriptions, (33) 748.  
 thuiella, notes, (33) 252.
- Argyrophyllax albincisa**, description, (36) 359.
- Argyroploce duplex**, notes, (40) 456.
- Arhar**, culture experiments, (28) 633.
- Arion circumscriptus**, feeding habits, (34) 458.
- Arisaema** seeds, germination, (33) 29.
- Aristida**—  
 adscensionis, analyses, (36) 334.  
 adscensionis, studies, (38) 66.  
 pungens, culture and use, (33) 131.  
 spp., analyses and digestibility, (27) 871; (32) 167.  
 spp., roots of, (26) 535.
- Aristonetta**, a good genus, (40) 161.
- Aristotelia**—  
 salicifungiella, life history, (33) 655.  
 sp., notes, (32) 556.
- Arithmetic**—  
 agricultural problems in, (31) 793.  
 agricultural, textbook, (30) 795.  
 rural, textbook, (37) 95.  
 textbook, (36) 597.
- Arizona**—  
 Station—  
 financial statement, (27) 599; (29) 496.  
 notes, (27) 98, 696; (28) 195, 900; (29) 396, 697; (30) 796; (31) 300, 397; (33) 699, 900; (34) 198, 396, 495; (35) 95; (37) 700; (38) 299; (39) 95, 500, 694; (40) 98, 297.  
 report, (32) 598; (33) 96; (35) 594; (39) 799.  
 report of director, (27) 599; (29) 496.  
 University, notes, (27) 98; (28) 195, 900; (29) 396, 697; (30) 796; (31) 99, 300, 397, 795; (32) 94, 395, 497; (33) 699, 900; (34) 396, 495; (35) 95, 596; (37) 700; (38) 299; (39) 95, 500, 694; (40) 98, 297, 495, 695.
- Arkansas**—  
 river, low water in, (27) 115.  
 Station, notes, (26) 494; (27) 696; (29) 300, 396, 497, 697; (30) 95, 796; (31) 197, 496; (32) 198, 395, 694; (33) 399, 900; (35) 95; (37) 97; (38) 96; (39) 95, 197, 300, 399; (40) 297.  
 Station, report, (40) 796.  
 University, notes, (26) 494; (27) 300, 696; (29) 300, 396, 497, 697; (30) 95, 796; (31) 197, 496; (32) 198, 395, 694; (33) 399, 900; (35) 95; (36) 694; (37) 97; (38) 96, 498; (39) 95, 300, 399; (40) 297.
- Armadiidium vulgare**—  
 as affected by Roentgen rays, (28) 57.  
 notes, (27) 658; (31) 758.
- Armadillo**, nine-banded, biology and habits, (29) 755.
- Armatella litseae**, notes, (37) 652.

- Armilaria**—  
**mellea**—  
 description, (30) 151; (32) 238.  
 development, (33) 130.  
 new hosts for, (33) 550.  
 notes, (26) 345, 628; (27) 450; (29) 851; (32) 50, 657, 845; (33) 846; (34) 644; (35) 351, 752; (40) 749.  
 on nursery stock, (33) 744.  
 orchard trees in California, (32) 241.  
 pear, (40) 252.  
 walnut, (39) 58.  
 studies, (31) 246; (36) 751.  
 symbiosis with *Gastrodia elata*, (27) 224.  
 treatment, (30) 649; (33) 149; (36) 846.  
**root rot**—  
 notes, (40) 748.  
 of citrus trees, (39) 152.  
 on English walnut, (33) 152.  
 sp., notes, (31) 152.  
 sp. on oaks, (34) 241.  
 spp. on forest trees, (40) 349.
- Army**—  
 baking, manual, (37) 63.  
 biscuit, recipes, (34) 256.  
 bread, notes, (26) 464.  
 cutworm, *see* *Chorizagrotis auxiliaris*.  
 raticons, (40) 68, 362, 560, 564.  
**rations**—  
 description and preparation, (29) 661.  
 field service, scale for, (30) 169.  
 food value, (29) 567.  
 in Europe, (32) 562.  
 in United States, (32) 459, 460.  
 notes, (33) 165, 365.  
**worm**—  
 baits, tests, (39) 361.  
 biology, (34) 455.  
 control in Massachusetts, (33) 144.  
**worm, fall**—  
 life history and remedies, (29) 655.  
 notes, (27) 559, 659; (28) 554; (29) 53, 353, 356, 652; (30) 154, 252, 656; (36) 254.  
 on cranberry, (38) 159.  
 studies, (34) 163; (35) 56.  
 summary of information, (40) 263.  
**worm**—  
 injurious to cranberries, (33) 352.  
 life history, (35) 854.  
 life history and remedies, (38) 54.  
 notes, (27) 155, 656, 659; (29) 252; (32) 153; (33) 58; (34) 158, 453, 494, 752; (35) 465; (36) 854.  
 on sugar cane in Mexico, (40) 57.  
 outbreak in 1914, (35) 553.  
 outbreaks in Canada, (35) 356.  
 parasites of, (34) 251.  
 parasitized, food of, (35) 553.  
 polyhedral virus, (40) 255.  
 remedies, (27) 434; (30) 456.  
 semitropical, notes, (28) 654.  
 studies, (35) 56.  
 wheat-head, notes, (26) 59; (28) 160.
- Arnica montana**, hydrocarbons in, (26) 107.  
**Arracacia esculenta**, analyses, (31) 863.  
**Arrak**, judging, (26) 209.  
**Arrhenal**, use against Texas fever, (36) 384.  
**Arrhenatherum**—  
**avenaceum**—  
 notes, (27) 35.  
 relation to oat mildew, (35) 651.  
**elatius**—  
 dissemination by insects, (27) 47.  
 seeding on ranges, (30) 35.
- Arrhenophagus**—  
 chionaspis, notes, (26) 152.  
 n.spp., descriptions, (35) 365.
- Arrowhead tubers**, sugar in, (30) 63, 502.
- Arrowroot**—  
 bagasse, analyses, (30) 565.  
 culture experiments, (31) 226.  
 culture in Philippines, (40) 231.  
 examination, (29) 361.  
 fertilizer experiments, (33) 227.  
 insects affecting, (30) 752.  
 production in St. Vincent, (39) 835.  
 starch content, (35) 108.  
 varieties, (30) 434.
- Arsenate**—  
 formation in dipping tanks, (31) 483.  
 of iron, insecticidal value, (27) 755.
- Arsenates**—  
 effect on sugar cane roots, (38) 238.  
 for oriental peach moth control, (40) 756.  
 toxicity, (37) 759.
- Arsenic**—  
 absorption by green plants, (30) 130.  
 acid, reduction to arsenious acid, (30) 801.  
 as a normal element of soils, (30) 321.  
**compounds**—  
 biological decomposition, (32) 474.  
 effect on plant growth, (31) 325; (32) 121.  
 toxicity toward plants, (33) 327.  
 tuberculoacid action, (35) 181.  
**content of**—  
 grapes and wine, (26) 841.  
 leaves, (29) 628.  
 copper sprays, preparation, (40) 843.  
 cumulative action in dipping, (34) 186.  
 detection, (28) 804; (36) 203.  
**detection**—  
 in bees, (36) 59.  
 in water, (34) 410.  
 modified Marsh's test, (27) 409.  
 determination, (28) 24, 410; (35) 207; (36) 300, 806; (39) 113, 508, 715.  
 determination in—  
 baking powder, (27) 497; (29) 799.  
 dipping fluids, (27) 477; (30) 801.  
 foods, (27) 613; (32) 298.  
 fungicides and insecticides, (30) 416.  
 insecticides, (26) 21; (32) 296; (36) 299; (38) 804.  
 lead arsenate, (27) 504; (29) 797.  
 organic matter, (37) 713.  
 shellac, (28) 310.  
 soils, (27) 499; (28) 507.  
 distribution in animals, (27) 180.  
**effect on**—  
 development of corn, (33) 522.  
 nitrogen-fixing organisms of soils, (35) 515.  
 nitrogen-fixing power of soils, (32) 720.  
 nitrogen transformation in soils, (30) 423, 424.  
 plants, (38) 628.  
 soil bacteria, (38) 322, 428.  
 soils, (32) 730.  
 sugar beets, (26) 225.  
 examination, (31) 509.  
 fixation in surface soils, (34) 421.  
 in baking powders, (29) 866.  
 gelatin, (26) 464.  
 hops, (38) 9.  
 milk, (27) 677.  
 orchard soils, (31) 720.  
 parasitic or parasitized plants, (27) 830.  
 plant kingdom, (28) 526.  
 plants, rôle, (37) 130.  
 shellac, (26) 710.  
 soils, (30) 423.  
 sulphured food products, (39) 206.  
 tobacco, (31) 715.  
 vegetables, (27) 269; (32) 628.  
 insecticidal value, (34) 60; (37) 559.  
 on sprayed fruits and vegetables, (38) 54.  
 poisons, use of fungicides with, (38) 156.  
 solutions, blood charcoal as a purifying agent for, (33) 110.  
 sprays for weed eradication, (40) 328.  
 sulphid, larvicidal value, (34) 359.  
**use against**—  
 foot diseases in horses, (29) 783.  
 surra, (29) 883.  
 water-soluble, determination in lead arsenate, (36) 715; (37) 616.  
 white, dosage for sheep, (27) 653.
- Arsenical**—  
 compounds, bactericidal action, (39) 488.  
 dip tester, (35) 678.  
**dips**—  
 alkali content, (26) 411.  
 for cattle ticks, (27) 77, 84, 163; (29) 287; (32) 274; (33) 679.  
 methods of analysis, (31) 115.  
 notes, (30) 778.  
 oxidation, (26) 174; (31) 776; (33) 478, 680; (38) 585.  
 preparation, (26) 382; (29) 585; (31) 776; (32) 778.  
 rendering harmless, (27) 899.  
 tick-killing properties, (29) 886.  
 treatment, (26) 382.

- Arsenical**—Continued.  
injury through bark of fruit trees, (36) 849.  
insecticides, chemistry of, (28) 308.  
salts, analyses, (23) 309.  
spray injury, prevention, (34) 154.  
sprays—  
  effect on bees, (32) 244.  
  effect on color of apples, (28) 145.  
  spreaders for, (38) 858.  
  use against wild morning-glory, (38) 140.  
  use of cactus solution in, (32) 557.
- Arsenicals**—  
as antiparasitides, (32) 474.  
effect of soap on settling, (23) 354.  
for plant protection, (30) 236.  
for poison baits, (39) 361.  
for weed control, (40) 429.  
production, (33) 876.  
root injury by, (40) 449.  
substitutes for, (29) 758.  
toxicity and use, (34) 851.  
toxicity, factors affecting, (36) 754.
- Arsenious acid**—  
detection in dips, (31) 483.  
determination, (28) 804.  
effect on sugar cane roots, (38) 238.
- Arsenious oxid**—  
as an alkalimetric standard, (34) 312.  
as standard in iodimetry, (40) 609.  
preparation and testing, (39) 507.
- Arsenite**—  
of zinc as a substitute for arsenate of lead, (30) 53.  
oxidation in cattle-dipping tanks, (26) 382.  
solutions, determination of strength, (32) 207.
- Arsenites**, *see* Paris green.
- Arsenobenzol**—  
bactericidal action, (39) 488.  
in giardiasis, treatment, (40) 884.  
use against equine influenza, (30) 385.
- Arsenophenyglycin**, use against dourine, (26) 881; (27) 284.
- Arsphenamin**, effect on complement and antibody production, (40) 287.
- Art in the home**, (26) 299.
- Artemisia**—  
*frigida*, analyses, (26) 612.  
*maritima*, hydrocarbons in, (26) 107.  
spp., analyses, (33) 466.  
water requirements, (29) 826.
- Arterial sclerostomatosis in horses**, (32) 84.
- Arteriosclerosis**—  
in sheep, studies, (28) 182.  
relation to calcium in the diet, (31) 357.  
studies, (26) 375.
- Artesian water**—  
for irrigation in Montana, (36) 486.  
in Australia, (31) 185.  
  eastern and southern Florida, (30) 119.  
  Missouri, (31) 812.  
  New South Wales, (30) 119.  
of Argerich, Argentina, (28) 214.
- Artesian wells**—  
decrease of flow, (34) 483.  
in western Queensland, (38) 591.  
increasing yield of, (29) 484.
- Arthritis**—  
chronic, in swine, (38) 381.  
in colts, studies, (31) 887.  
infectious, in foals, (37) 382.  
pyemic, in foals, (34) 83.  
septic, in foals, (26) 384.  
suppurative, treatment, (40) 181.
- Arthrocnemon macrostachyum**, analyses, (33) 466.
- Arthrocnodax**—  
*constricta* n.sp., description, (33) 255.  
*meridionalis* n.sp., description, (27) 57.  
*occidentalis*—  
  n.sp., notes, (28) 858.  
  notes, (23) 457.  
  parasitic on red spider, (32) 157.
- Arthrolytus aeneoviridis**, notes, (39) 870.
- Arthropods**—  
affecting dogs, (39) 892.  
affecting man, (32) 846.  
affecting man and animals, (27) 453.  
blood-sucking, relation to kala azar, (28) 159.  
entoparasites of, (39) 658, 659.  
relation to disease, (30) 455.
- Artichoke**—  
diseases, notes, (38) 41.  
foliage, digestibility, (32) 258.  
globe, culture and uses, (38) 41.  
globe, insects affecting, (40) 57.  
Jerusalem—  
  as food, (36) 561; (39) 67.  
  in France, (40) 35.  
  inulin in, (39) 524, 732.  
  notes, (26) 362.  
  moth, notes, (33) 554.  
  sclerotinia diseases, (40) 49.  
  sunflower grafts, studies, (39) 645.
- Artichokes**—  
analyses, (31) 433.  
culture, (27) 32.  
culture and use, (40) 763.  
culture experiments, (28) 531; (32) 132; (37) 132.  
culture in Gironde, (30) 738.  
insects affecting, (33) 856; (38) 41.  
v. potatoes for forage, (31) 433.  
variation in, (37) 342.
- Artocarpus integrifolia**, notes, (30) 525.
- Artona walkeri**, notes, (33) 856.
- Arum**, culture experiments, (30) 229.
- Arundinella setosa**, notes, (26) 361.
- Asafetida**, lead number, (27) 499.
- Asal fly**, notes, (27) 53.
- Asarum europaeum**, notes, (27) 851.
- Asbestos stopper** for use in distillation, (38) 203.
- Ascariasis**—  
in horses and swine, (35) 489.  
in horses, treatment, (40) 586.
- Ascarids**—  
affecting sheep in Algeria, (31) 86.  
chemistry and toxicology, (27) 290.  
development, (26) 279.  
in dogs, studies, (40) 186, 187.  
in horses, treatment, (26) 588.  
remedies, (37) 578.  
toxic product, studies, (40) 84.  
toxins of, (30) 278.
- Ascaris**—  
*canis* and *A. felis*, comparison, (37) 163.  
equorum extracts, effect on blood coagulation, (26) 279.  
infestation, effect on serum treatment of hog cholera, (37) 881.  
*inflexa*, treatment, (35) 385.  
lumbrioides—  
  and *A. mystax* in mice, (39) 286.  
  and *A. suilla*, development in rats and mice, (37) 374.  
  and related forms, life history, (38) 385.  
  blood-destroying substance in, (40) 880.  
  eggs of, (33) 681.  
  studies, (39) 587, 681, 886.  
  viability of ova, (26) 588.
- megaloccephala**—  
disease of, (28) 181.  
studies, (27) 384.  
toxic properties, (26) 481; (30) 784.  
poisoning, notes, (26) 883.  
spp., dissemination by flies, (30) 659.  
spp., embryology, (30) 555.  
spp., physiological investigations, (31) 679.
- suum**—  
  catalase content, (38) 582.  
  description, (34) 280.  
  in sheep, (31) 781.  
  vituli as a cause of intestinal impaction, (26) 279.
- Ascheronia**—  
*(cubensis?)* on star scale, (38) 157.  
*paraensis* n.sp., notes, (37) 148.  
spp., descriptions, (33) 459.  
spp., notes, (27) 860; (30) 455.  
*suzukii* n.sp., notes, (30) 455.  
*turbinata*, ascospore stage, (31) 145.
- Ascheronias**, culture and germination tests, (27) 356.
- Asclepias**—  
*curassavica*, carotinoid content, (31) 803.  
*fruticosa*, fiber from, (39) 442.  
spp., notes, (32) 778.  
*syriaca*, geographical distribution, (26) 335.  
*verticillata*, toxicity, (39) 787.
- Ascobolus parasiticus** n.sp., description, (33) 647.

- Ascochyta—  
   abelmoschi n.sp., description, (39) 649.  
   atropa, notes, (32) 749.  
   boerhaaviae n.sp., description, (37) 748.  
   cardiaca n.sp., description, (34) 843.  
   citrullina, inoculation experiments, (29) 847.  
   clematidina, studies, (33) 650; (34) 249.  
   colorata as affected by cold, (34) 538.  
   corticola, notes, (31) 244.  
   fagopyri tulensis, notes, (28) 443.  
   gerberae n.sp., description, (31) 845.  
   heveae n.sp., notes (39) 452.  
   hortorum—  
     notes, (27) 849.  
     on artichoke, (37) 150.  
     studies, (31) 344, 747.  
   laricina n.sp., description, (30) 746.  
   lycopersici on greenhouse tomatoes, (36) 250.  
   n.sp., descriptions, (28) 149.  
   on leguminous plants, life history, (33) 548.  
   on peas, (39) 354.  
   pallor, notes, (27) 448.  
   perfect stage, (28) 849.  
   piniperda, notes, (31) 646.  
   pisi—  
     ascigerous stage of, (29) 645.  
     life history, (28) 845.  
     notes, (29) 447; (32) 544; (33) 647.  
     studies, (31) 746.  
     treatment, (32) 546.  
   sp., notes, (27) 45; (37) 550.  
   sp. on cereals, (32) 843.  
   sp. on clematis, (31) 347.
- Ascogaster—  
   canifrons, notes, (30) 755.  
   carpocapsae, notes, (28) 61; (39) 361.
- Ascomycetes—  
   culture experiments, (32) 341.  
   sp. on betel vine, (34) 50.
- Ascomphyllum nodosum, analyses, (37) 814.
- Asemantoides dubius n.sp., description, (37) 59.
- Ash—  
   and willow scale, notes, (30) 53.  
   as affected by tarring roads, (26) 432.  
   borer, see *Podosesia syringae*.  
   characteristics and management, (34) 346.  
   constituents—  
     effect on growth of pigs, (28) 98.  
     role in living plants, (35) 131.  
   determination—  
     in foodstuffs, (29) 366, 809.  
     in plant substances, (34) 202.  
     of alkalinity, (36) 204.  
   distribution and cut in North Carolina, (33) 144.  
   eccentric growth of, (31) 538.  
   factor in poultry feeding, (31) 568.  
   forcing experiments, (28) 435.  
   from body fluids, methods of analysis, (32) 114.  
   in growing pigs as affected by protein consumption, (32) 72.  
   leaf bug, notes, (36) 551; (40) 753.  
   manna, composition and adulteration, (33) 443.  
   mountain—  
     host of apple aphid, (28) 251.  
     host of *Archips argyrospila*, (27) 160.  
   of grains, copper determination in, (40) 807.  
   of vinegar, notes, (27) 410.  
   psylla, notes, (26) 146.  
   rust, notes, (26) 52.  
   sawfly, notes, (26) 254.  
   seeds, oil from, (26) 503.  
   trees, metabolism and translocation in, (27) 425.  
   utilization, (37) 548.  
   volcanic, reclamation, (28) 220.
- Ashes—  
   analyses, (28) 326; (33) 723; (34) 425; (35) 127; (38) 625; (39) 739.  
   as fertilizer, (34) 494.  
   as source of potash, (34) 327, 425; (37) 427.  
   corn cob, analyses, (40) 621.  
   crematory, analyses, (27) 327.  
   damage caused by, (28) 811.  
   effect on vegetation, (30) 131.  
   fertilizing value, (30) 230; (32) 140; (39) 116, 429, 430.  
   from *Vesuvius*, analyses, (27) 422.  
   incinerator, analyses, (35) 128.  
   injury to plants, (32) 729.  
   leached, fertilizing value, (26) 427.  
   utilization in agriculture, (40) 129.
- Ashes—Continued.  
   volcanic, effect on soils, (29) 726.  
   weed, effect on tobacco soils, (36) 513.  
   wood, see *Wood ashes*.
- Asiatic ladybird, notes, (28) 159; (29) 258.
- Asilidae, new species from southern California, (35) 855.
- Asio wilsonianus, notes, (27) 355.
- Asiphonaphis pruni n.g. and n.sp., description, (40) 355.
- Asiphum sacculi n.sp., description, (31) 351.
- Askaron, studies, (40) 84.
- Asobara orientalis n.sp., description, (30) 256.
- Asparagin—  
   as source of ammonia, (29) 723.  
   assimilation by plants, (26) 32.  
   distribution in plants, (30) 129.  
   effect on—  
     baking quality of flour, (26) 356; (30) 555.  
     fungi, (28) 444.  
     legume bacteria, (29) 733.  
     milk production and quality, (26) 476.  
     wheat, (27) 731.  
   formation in lupines, (36) 632.  
   formation in sprouting vetches, (27) 634.  
   in hops, (32) 502.  
   malt sprouts, (26) 24.  
   sugar beets, (28) 810.  
   sugar cane juice, (30) 15.  
   nitrication—  
     as affected by lime, (38) 119.  
     in soils, (26) 722.  
     rate, (32) 124.  
   nitrogen assimilation from, (27) 331.  
   role in ripening seeds, (26) 730.  
   utilization by pea seedlings, (27) 730.
- Asparaginic acid—  
   in mulberry leaves, (31) 203.  
   inversion of saccharose by, (32) 711.
- Asparagus—  
   analyses and food value, (29) 461.  
   asiaticus, analyses and digestibility, (32) 167.  
   beans, description, (30) 828.  
   beetle—  
     egg parasite, studies, (33) 658.  
     notes, (27) 53; (28) 752; (38) 61.  
     12-spotted, notes, (28) 551.  
     12-spotted, studies, (29) 556.  
   breeding—  
     and selection, (38) 640.  
     experiments, (26) 44.  
     for rust resistance, (26) 44; (28) 339, 538; (36) 138.  
     review of investigations, (28) 539.  
   canned, tin poisoning from, (31) 67, 461.  
   canning, (38) 41.  
   chemical studies, (36) 839.  
   cold storage, (39) 344.  
   composition as affected by fertilizers, (27) 500.  
   cooking, (31) 855.  
   culture, (31) 739; (35) 141; (38) 41; (40) 538.  
   culture—  
     experiments, (35) 341; (38) 40.  
     in California, (35) 835.  
     in New Jersey, (40) 638.  
     on acid soil, (40) 324.  
     relation to soils, (26) 640.  
   deterioration in, (39) 13.  
   diseases, description, (32) 238.  
   diseases, treatment, (39) 52.  
   fertilizer experiments, (26) 31, 44, 299, 817; (28) 236, 325, 339; (34) 294; (36) 121, 138, 839.  
   fly, notes, (34) 851.  
   fly, remedies, (36) 355.  
   fungus disease of, (32) 146.  
   insects affecting, (28) 451; (38) 41.  
   juice, mannit from, (27) 502; (31) 10.  
   keeping after cutting, (37) 342.  
   marketing cooperatively, (29) 392.  
   miner, studies, (29) 555.  
   officinalis fruit, composition, (39) 107.  
   plumoseus nanus, tropisms of, (30) 430.  
   preparation and use, (32) 253.  
   preservation by freezing, (39) 344.  
   Rhizoctonia disease, (38) 648; (40) 747, 844.  
   roots as affected by fertilizers, (28) 236; (30) 142.  
   roots, carbohydrates in, (26) 24.  
   rust, notes, (28) 538; (38) 41.  
   rust-resistant strains, (40) 538.

- Asparagus**—Continued.  
seed, impermeable, viability, (35) 740.  
soup, notes, (29) 461.  
sp., analyses and digestibility, (27) 871.  
varieties, (38) 40, 241.
- Aspartic acid**—  
as source of ammonia, (29) 723.  
assimilation by plants, (26) 32.  
effect on—  
action of alcohol on plant cells, (34) 333.  
baking quality of flour, (26) 356; (30) 555.
- Aspen**—  
as permanent forest type, (37) 837.  
as temporary forest type, (38) 847.  
reproduction, (39) 50.  
reproduction as affected by grazing, (40) 448.  
soda pulp from, (31) 715.  
tortrix, notes, (40) 456.  
value in reforestation, (31) 839.
- Aspergillopsis** spp. in Norway, (31) 327.
- Aspergilliosis**—  
in canaries, (29) 84.  
in ostrich chicks, (35) 678.  
in poultry, notes, (28) 185.
- Aspergillus**—  
ammonifying power, (32) 29.  
flavescens, notes, (28) 557.  
flavus, description, (33) 459.  
fumigatus—  
description, (39) 648.  
notes, (29) 84.  
rôle in silage poisoning, (37) 728.  
spore formation in, (29) 30.  
toxin produced by, (27) 780.  
gracilis, occurrence in sugar, (26) 505.  
growth in arsenic solutions, (35) 281.  
nidulans, description, (39) 648.  
nidulans in canned foods, (40) 764.  
niger—  
action of zinc sulphate on, (40) 222.  
amygdalin diastases in, (30) 241.  
niger as affected by—  
acids and salts, (29) 734.  
chemicals, (28) 444; (30) 241, 630.  
manganese, (27) 129.  
metals, (30) 824.  
potassium, rubidium, and caesium, (28) 527.  
silver salts, (29) 554.  
zinc, (28) 226.  
niger—  
assimilation of zinc by, (30) 523.  
citrus acid fermentation, (37) 613.  
development as affected by various salts,  
(28) 824.  
development in acid solutions, (27) 848.  
enzymes in, (30) 805.  
niger, formation—  
and regulation of enzymes by, (31) 730.  
of ammonia by, (28) 803.  
of tannase in, (29) 132.  
niger—  
group, studies, (36) 130.  
growth as affected by manganese, (29) 219.  
growth in plant decoctions, (37) 728; (38)  
524.  
inulase formation in, (40) 518.  
invertase of, (28) 727.  
metabolism in, (30) 727.  
mutation in, (28) 430; (30) 630; (31) 225.  
nitrogen fixation by, (26) 123; (31) 721; (36)  
632; (37) 129.  
nitrogen nutrition of, (27) 26; (32) 327.  
notes, (30) 450; (37) 51.  
on citrus, (35) 748.  
on onions, (37) 349.  
phosphorus assimilation in, (26) 203.  
relation to apple rot, (33) 348.  
relation to iodine compounds, (29) 133.  
sensitiveness to manganese, (27) 228.  
niger, utilization of—  
copper by, (29) 628.  
glucinum by, (29) 28.  
phytin by, (30) 805.  
uranium nitrate by, (29) 422.  
zinc by, (31) 224.  
niger, zymase formation in, (39) 733.
- oryzae**—  
amylase of, (31) 13; (40) 504.  
enzymes of, (32) 710.  
in tamarl-koji, (29) 161.
- Aspergillus**—Continued.  
**oryzae**—continued.  
koji acid from, (30) 202.  
utilization of rice proteins by, (29) 565.  
varieties of, (29) 565.  
parasiticus n.sp., description, (28) 746.  
sartoryi n.sp., studies, (29) 844.  
selective power of, (33) 824.  
sp., treatment, (33) 149.  
spp. affecting coffee grains, (34) 545.  
spp. as affected by phosphorus and magnesium,  
(29) 825.  
spp., cleavage of methyl glucosid by, (30) 11.  
spp., formation of tannase by, (27) 408.  
spp., growth in presence of salt, (32) 176.  
spp., notes, (28) 252, 562.  
spp., proteolytic activities, (40) 721.  
terreus n.sp., description, (39) 648.  
terricola, enzymes of, (33) 410.
- Asperisporium caricae**, notes, (37) 550.
- Asphalt**—  
papers on, (33) 782.  
paving cements and road binders, (30) 290.  
penetration tests, (34) 685.  
production in United States, (38) 692.
- Asphalts**—  
rock, of Oklahoma, (29) 591.  
specifications and definitions, (35) 888.
- Asphaltum**—  
as dressing for fruit tree wounds, (34) 154.  
use against peach borer, (27) 54.
- Asphondylia**—  
miki, notes, (27) 161.  
opuntiae, see Cactus midge.  
websteri n.sp., description, (38) 563.
- Aspidiotiphagus citrinus**—  
endophagy, (38) 460.  
notes, (26) 247, 554; (28) 159, 754.  
parasitic on purple scale, (26) 757.
- Aspidiotus**—  
ancyclus, see Putnam's scale.  
articulatus, notes, (27) 357.  
camelliae, see Greedy scale.  
destructor affecting bananas, (30) 157.  
destructor, notes, (29) 858; (36) 355.  
(Diastidiotus) tsugae n.sp., description, (26)  
248.  
ficus, see Florida red scale.  
hartii, notes, (40) 259.  
hederae, notes, (32) 56.  
juglans-regiae, see Walnut scale.  
n.sp. and n.subsp., descriptions, (40) 355.  
osborni, notes, (33) 252.  
ostreaeformis, see Fruit scale, European.  
oxyccoccus, notes, (28) 854.  
pectinatus n.sp., description, (27) 358.  
perniciosus, see San José scale.  
rapax, see Greedy scale.  
spp., notes, (27) 756; (28) 854; (29) 654, 853; (38)  
157.  
(Targionia) vitis, notes, (26) 655.  
trilobitiformis, notes, (28) 752.  
tsugae in New Jersey, (34) 355.  
uvae, see Grape scale.  
viticola n.sp., description, (33) 653.
- Aspidistra**, leaf spot disease of, (30) 448.
- Aspidogastridae** of North America, (38) 865.
- Aspirator**, description, (39) 714.
- Aspirin**, determination, (27) 499.
- Asses**—  
breeding in United States, (39) 74.  
color inheritance and sex ratio, (38) 574.  
digestion experiments, (32) 262.  
feeding experiments, (31) 769.  
improvement, value of good sires, (37) 866.  
in Germany, (33) 296.  
in Tunis, description, (27) 571.  
Poitou, measurements, (29) 169.  
textbook, (31) 470.  
treatise, (37) 769.
- Assimilation and respiration of plants**, relationship,  
(31) 222.
- Association**—  
for Standardizing Paving Specifications, report,  
(28) 384.  
of Agricultural College Editors, (35) 199.  
of Agricultural Experiment Stations of Ger-  
many, (28) 715.

- Association—Continued.  
of American Agricultural Colleges and Experiment Stations, (26) 1, 8; (27) 798; (28) 7; (29) 601; (30) 399; (32) 1, 8, 194; (33) 94, 301; (34) 798; (35) 297, 701; (37) 601, 698; (38) 800; (39) 701, 800, 896.
- American Dairy, Food, and Drug Officials, (28) 863; (30) 862; (36) 561, 663; (38) 768.
- Austrian Experiment Stations, (30) 599.
- Drainage and Levee Districts of Illinois, proceedings, (28) 890.
- Farmers' Institute Workers, (26) 1.
- Feed Control Officials, (26) 1; (28) 74, 98; (30) 466; (32) 8, 200.
- Official Agricultural Chemists, (26) 97, 613; (27) 495, 616; (28) 513; (29) 795; (30) 317; (32) 8, 294; (33) 400; (34) 501; (35) 419; (36) 298; (37) 601; (39) 400, 702.
- Official Dairy Instructors, (27) 106.
- Official Seed Analysts, (26) 1, 200; (32) 8, 200; (34) 832; (39) 702.
- Southern Agricultural Workers, (34) 1; (40) 301.
- Asteia n.sp., notes, (35) 259.
- Asterochiton (Aleyrodes) packardii, notes, (33) 58.
- Asterocystis radialis, notes, (28) 52; (37) 248.
- Asterolecanium—  
bambusae in California, (35) 358.  
pustulans, notes, (33) 554.  
quercicola, notes, (27) 755; (28) 353.  
variolosum (A. quercicola), notes, (38) 654.
- Asteroma—  
brassicae, notes, (32) 545.  
rosae, notes, (37) 550.
- Asterostroma albidoearneum, notes, (27) 749; (28) 649.
- Asters—  
bacterial disease affecting, (27) 547.  
black neck or wilt disease affecting, (34) 649.  
China, varieties at Wisley, (33) 536.  
cut, preservation, (31) 837.  
fungus disease affecting, (26) 551.  
Fusarium disease of, (32) 48.  
martial, (28) 438.  
mildew affecting, (32) 544.  
woody, identification, (29) 77.  
woody, notes, (31) 578.
- Asterula chamaecyparidis n.sp., description, (27) 149.
- Asthenia, infectious, of fowls, (39) 291.
- Astragalus tristis, destruction of grain aphids by, (29) 452.
- Astragalus—  
bisulcatus, toxicity, (37) 780.  
mollissimus, description, (39) 386.  
mollissimus, histology, (38) 481.  
spp., notes, (32) 778.  
toxicity, (26) 432.
- Astrebla—  
pectinata, analyses, (28) 463.  
pectinata, culture experiments, (30) 632.  
triticoides, culture in Hawaii, (32) 729.
- Astysage—  
lineigera, notes, (33) 658.  
punctulata n.sp., notes, (37) 359.
- Astycus immunis, notes, (34) 652.
- Asymplesiella india n.sp., description, (36) 557.
- Asyndesmus lewisi, feeding habits, (29) 51.
- Ataxia crypta, notes, (38) 363.
- Atelenevra spuria, life history, (33) 860.
- Atelocera strictica, notes, (28) 654.
- Atemoya—  
a new fruit for the Tropics, (31) 47.  
asexual propagation, (32) 143.
- Athalia—  
flacca, notes, (38) 164.  
spinarum, biology, (33) 746.  
spinarum, notes, (31) 548.
- Athene noctua, economic importance, (29) 651.
- Athesapeuta oryzae n.sp., description, (35) 365.
- Athletes—  
and nonathletes—  
as affected by breakfast and caffeine, (39) 68.  
metabolism of, (33) 263.  
training, (30) 465.
- Athrosis, fetal, in pigs, (37) 278.
- Athysanus—  
n.sp., description, (34) 255  
spp., notes, (27) 858.
- Atichia dominicana n.sp., description, (31) 242.
- Atmometer—  
mounting, nonabsorbing, (40) 715.  
porous cup—  
construction and use, (34) 34.  
description, (33) 224; (36) 226.  
notes, (39) 810.
- Atmometers—  
discussion and use, (38) 523.  
relative merits, (33) 320; (37) 429.  
use in study of insects, (31) 350.
- Atmosphere—see also Air.  
absorption of ultraviolet light by, (32) 210.  
and the Névé, aqueous exchange between, (38) 812.  
aqueous vapor of, (38) 210.  
charts, notes, (26) 214.  
circulation and temperature, (34) 614.  
circulation of, (31) 615; (32) 315; (35) 419, 808.  
composition, (28) 213.  
condensation of aqueous vapor in, (37) 716.  
dust layers in, (27) 316.

 cloacae on green vegetables, (40) 658.  
 coagulans n.sp., description, (34) 78.  
 coli—  
 as affected by acids, (40) 881.  
 as test organism for disinfectants, (29) 803.  
 causing broncho-pneumonia in calves, (39) 290.  
 coli communis—  
 action on glucose and mannitol in presence of peptone, (38) 709.  
 in milk, (32) 577.  
 in swine, (40) 784.  
 in water supplies, (31) 718.  
 organism resembling, in condensed milk, (26) 81.  
 relation to broncho-pneumonia, (36) 384.  
 survival of pasteurization by, (37) 775.  
 coli—  
 destruction by electricity, (35) 176.  
 detection in water, (28) 509.  
 determination in ice cream, (32) 415; (34) 165.  
 determination in water, (35) 287; (37) 188.  
 Endo medium as a test for, (34) 167.  
 freezing, (40) 181.  
 from horse, cow, and man, (36) 379.  
 hydrogen-ion concentration by, (34) 524.  
 importance in judgment of water, (34) 389.  
 in butter, (31) 576.  
 eggs, (27) 61; (31) 571.  
 fresh and decomposing manure, (39) 23.  
 milk, (40) 376.  
 milk, significance, (37) 874.  
 itinerary in butter manufacture, (39) 78.  
 longevity, (26) 781; (38) 389, 488.  
 notes, (26) 846; (27) 751; (38) 354.  
 on coconut palm, (34) 241.  
 on green vegetables, (40) 658.  
 relation to coconut bud rot, (34) 442; (35) 353, 850.  
 relation to diarrhea in calves, (26) 381.  
 relation to slime formation in soils, (29) 723.  
 thermal death point, (39) 78.  
 cuniculicida, isolation from house fly, (38) 362.  
 cyanogenes, relation to blue milk, (32) 775.  
 cypripedii n.sp., description, (26) 650.  
 delbruecki, use in bread making, (33) 864.  
 de Loutraz, studies, (40) 552.  
 dianthi (?) on sugar beets, (33) 743.  
 diphtheriae, destruction by periodol, (39) 80.  
 dysenteriae—  
 as affected by metamorphosis of house flies, (29) 357.  
 destruction by periodol, (39) 80.  
 enteritidis—  
 accidental infection by, (36) 350.  
 as a cause of infectious diarrhea in calves, (35) 488.  
 occurrence in calves, (27) 289.  
 relation to croupous enteritis in cattle, (28) 886.  
 spontaneous occurrence in mice, (26) 176.  
 studies, (33) 178.  
 erysipelatis, detection after vaccinating, (29) 176.  
 erysipelatis suis—  
 effect of mixed and secondary infection in, (26) 185.  
 heat resistance of precipitinogens, (29) 882.  
 studies, (27) 384.  
 types, (29) 882.

**Bacillus**—Continued.  
 erysipelatis, toxins contained in, (28) 676.  
 extorquens—  
   decomposition of silicates by, (31) 121.  
   n.sp., notes, (29) 316.  
 faecalis alkaligenes, studies, (31) 479.  
 farnetianus n.sp., description, (26) 851; (40) 159.  
 fluorescens liquorfaciens, notes, (28) 473.  
 gallinarum, studies, (40) 685.  
 gangraenae emphysematosae, notes, (31) 579.  
 gortynae, notes, (30) 551.  
 gummicifans, notes, (28) 651.  
 histolyticus, biochemistry, (39) 887.  
 hoplosternus n.sp., description, (38) 162.  
 ichthyosmius n.sp., description, (37) 686.  
 ixiae n.sp., studies, (29) 845.  
 Koch's, method of entering the body, (29) 884.  
 lactis acidi, studies, (40) 377.  
 lactis erythrogenes, effect on milk, (26) 775; (30) 411.  
 lactis fermentans, studies, (29) 776.  
 lactis viscosus, notes, (27) 474.  
 lathyr—  
   n.sp., relation to sweet pea streak disease, (29) 352.  
   relation to sweet pea streak disease, (32) 446.  
   studies, (33) 547; (37) 155.  
 levans, notes, (26) 563.  
 liparis parasitizing gipsy moth, (38) 159.  
 lipolyticus—  
   pathogenicity, (39) 289.  
   studies, (40) 184.  
 lymantriac—  
   destructive to gipsy moth, (30) 54.  
   parasitizing gipsy moth, (38) 159.  
 lymphangiticus, notes, (34) 478.  
 mallei—  
   as affected by calcium hypochlorite, (40) 478.  
   morphology and biology, (31) 579.  
   notes, (28) 887.  
 mangiferae n.sp., description, (34) 447.  
 manihoti, notes, (35) 245.  
 megaterium, aerotropic growths, (27) 829.  
 melanogenes—  
   notes, (27) 446; (32) 239, 544.  
   treatment, (20) 549.  
 melitense—see also *Bacterium melitense*, and *Micrococcus melitensis*.  
   studies, (39) 289.  
 melonitiae—  
   relation to septicemia in cockchafers, (30) 54.  
   studies, (38) 162.  
 melonis as affected by cold, (34) 538.  
 minimus mammae, hygienic importance, (33) 175.  
 Morgan's, in flies, (30) 757.  
 morulans—  
   n.sp., description, (38) 250.  
   nitrate reduction by, (37) 543.  
 musae, description, (31) 745.  
 musae, notes, (26) 345; (27) 50, 449.  
 mycoides, notes, (26) 747.  
 n.spp., descriptions, (26) 581; (28) 628.  
 n.spp. in Brindza cheese, (33) 278.  
 n.spp. on orchids, descriptions, (40) 159.  
 necrophorus—see also *Microbacillus*.  
   affecting cattle, (30) 884.  
   diseases, pathology, (39) 590.  
   in swine, (40) 784.  
   notes, (28) 285; (33) 774.  
 necrosis—  
   lesions, (39) 683.  
   organism resembling in rabbits, (29) 677.  
 nicotianae and *B. solanacearum*, identity, (30) 541.  
 oedematis maligni, notes, (39) 890.  
 oedematis, pathogenicity, (37) 377.  
 of Group IV, studies, (31) 479.  
 of Schmorl, studies, (28) 676; (29) 478.  
 oleae, treatment (27) 251.  
 omnivorus, notes, (40) 844.  
 ovisepticus, studies, (38) 857.  
 paratuberculosis, notes, (30) 583.  
 paratyphoid equine, studies, (39) 492.  
 paratyphoid-like, from a dog, (26) 290.  
 paratyphosus B—  
   anomalous strain of, (32) 678.  
   food poisoning by, (34) 563.

**Bacillus**—Continued.  
 paratyphosus B—continued.  
   in pigeons, (34) 83.  
   in swine, (40) 784.  
   notes, (30) 786.  
   studies, (33) 178.  
 paratyphosus—  
   relation to abortion in mares, (31) 381.  
   studies, (39) 687.  
 perfringens—  
   notes, (39) 890.  
   studies, (38) 503, 504.  
 pertussis, lesions produced by, (34) 480.  
 pestis, development in bedbugs, (33) 747.  
 pestis, longevity in fleas, (33) 749.  
 petrosolini n.sp., description, (35) 454.  
 phlei, notes, (28) 481.  
 phytophthorus—  
   notes, (31) 641; (40) 847.  
   studies, (39) 456.  
 pollacii n.sp., description, (26) 851; (40) 159.  
 poncei n.form, description, (40) 164.  
 Preisz-Nocardi—  
   diagnostic value, (29) 281.  
   from equine, bovine, and ovine abscesses, (35) 574.  
   notes, (28) 182, 782.  
 prodigiosus—  
   destruction of paraffin by, (32) 523.  
   notes, (28) 241.  
   relation to rubber spotting, (29) 451.  
 proteus vulgaris, notes, (29) 64.  
 pseudopyogenes lactis in milk, (33) 115.  
 pseudotanicus, death rate as affected by temperature changes, (40) 313.  
 pullorum, relation to fowl typhoid bacillus, (32) 478.  
 pyocyaneus—  
   effect on denitrification, (27) 424.  
   in pupae and imagines of infected house flies, (26) 61.  
   in swine, (40) 784.  
   respiration, (31) 827.  
 pyogenes—  
   affecting pigs, (30) 484.  
   relation to contagious abortion, (29) 80.  
   relation to eye disease in cattle, (37) 691.  
   suppuration due to, (37) 276; (38) 555.  
 pyramis I and II, notes, (30) 551.  
 radiclea—see also *Nodule bacteria*.  
   cultures, preparation, (39) 723.  
   fixation of nitrogen by, (29) 629, 733.  
   groups of, (33) 823.  
   growth as affected by hydrogen-ion concentration, (39) 26.  
   in soils, (29) 423, 515.  
   isolation from soils, (32) 727; (33) 121.  
   nitrogen assimilation by, (33) 426.  
   notes, (26) 521; (39) 338.  
   of field peas, (35) 329.  
   of soy beans, studies, (33) 134; (36) 848.  
   specialization of forms, (29) 733.  
   studies, (32) 33, 727; (35) 729; (39) 116.  
   testing cultures of, (29) 30.  
 radiobacter in waxy soils, (30) 218.  
 Reading, in wounds, (40) 679.  
 rhusiopathiae suis, relation to polyarthritis in sheep, (31) 286.  
 saecharalis n.sp., description, (35) 505.  
 savastanoi, notes, (30) 751.  
 septicemiae ranarum n.sp., notes, (30) 851.  
 septicus insectorum, n.spp., (32) 62.  
 snermagis, acid-proofness of strains, (38) 485.  
 solanacearum—see also *Bacterium solanacearum*.  
   description and treatment, (29) 847.  
   notes, (26) 649; (27) 854; (28) 243, 446; (29) 423; (30) 48, 749, 847; (31) 127; (32) 50, 239; (39) 550, 551; (40) 348.  
   studies, (27) 650.  
   variability, (29) 136.  
   virulence against *Nicotiana*, (33) 446.  
 solaniperda, notes, (26) 846.  
 solanisaprus, notes, (36) 250.  
 sorghi (?) on Sudan grass, (33) 851.  
 sotto—  
   *B. alvei*, and *B. megaterium*, identity, (36) 380.  
   studies, (37) 853.  
   toxin of, (38) 466.

## Bacillus—Continued.

- sp. affecting garlic, (30) 449.  
 spongiosus, notes, (28) 746.  
 sporogenes—  
   as an indicator of manurial pollution in  
   milk, (34) 272.  
   biochemistry, (38) 483.  
   detection in milk and water, (33) 875.  
   studies, (38) 503, 504.  
 spp., absorption in intestinal canal, (28) 882.  
 spp., ammonifying power, (31) 317.  
 spp., distribution by flies, (28) 756.  
 spp., notes, (26) 847, 880.  
 spp., occurrence in sugar, (26) 505.  
 spp., on vegetables in Ontario, (37) 150.  
 spp., physiological studies, (27) 226.  
 spp., production of toxins by, (26) 184.  
 spp., relation to—  
   foul brood of bees, (27) 563.  
   white scours in calves, (26) 286.  
 subtilis—  
   in condensed milk, (29) 778.  
   in conjunctival sac of horses and bovines,  
   (26) 176.  
   isolation from cheese, (26) 479.  
   potassium requirements, (39) 619.  
   proteolytic activity, (35) 204.  
   rôle in utilization of organic compounds by  
   plants, (37) 223.  
 suisepiteticus—  
   effect on rabbits, (29) 288.  
   immunity of rabbits to, (26) 184.  
 suisepitifer—  
   agglutinins for, in hog cholera serum, (36)  
   280.  
   notes, (28) 183; (40) 783.  
   studies, (39) 188.  
   voldagsen, notes, (29) 883.  
 suisepiteticus—*see also* Bacterium suisepiteticus.  
   significance in hog cholera, (31) 680.  
 synxanthus in milk, (34) 78.  
 tabificans—  
   description and treatment, (28) 847.  
   notes, (30) 47.  
   treatment, (31) 243.  
 tetani, studies, (39) 389.  
 thuringiensis n.sp., notes, (35) 253.  
 tracheiphilus—  
   notes and treatment, (28) 746.  
   studies, (27) 45; (36) 249.  
   transmission by insects, (35) 546.  
 tuberculosis, *see* Tubercle bacilli.  
 tuberculosis ovis, notes, (28) 182.  
 tubifex n.sp., description, (26) 847.  
 typhi-exanthematici, isolation from body louse,  
 (37) 850.  
 typhi gallinarum alcalifaciens—  
   biochemical and agglutinating properties,  
   (38) 788.  
   studies, (30) 385.  
 typhi suis as a cause of meat poisoning, (32) 84.  
 typhosus—  
   as affected by metamorphosis of house flies,  
   (29) 358.  
   as test organism for disinfectants, (29) 803.  
   culture media for, (40) 677.  
   destruction by periodol, (39) 80.  
   destruction in sour milk, (40) 476.  
   longevity in water, (38) 488.  
   occurrence on vegetables, (26) 661.  
   persistence in pupae and imagines of house  
   flies, (26) 251.  
   vaccines, studies, (40) 286.  
   viability in ice cream, (34) 256.  
   viability in milk, (26) 776.  
 viscosus-panis, studies, (40) 360.  
 voldagsen—  
   and B. suisepitifer, relationship, (31) 87.  
   as cause of meat poisoning, (32) 84.  
   notes, (31) 680.  
   organism resembling, in man, (29) 882, 883.  
   relation to hog cholera, (28) 183; (29) 482;  
   (32) 83.  
 vulgare, penetration of egg shells by, (29) 765.  
 welchii—  
   and blackleg bacillus, resemblance, (38) 587  
   antitoxin for, (38) 379.  
   cultures, hemolysis, (39) 580.  
   in butter, (31) 576.  
   in pigeons, immunization, (37) 781.  
   studies, (38) 483, 503, 504.

## Bacillus—Continued.

- welchii—continued.  
 toxin, action of antiseptics on, (39) 185.  
 toxins of, (38) 378, 584, 783.  
 Bacon—  
   black pigment areas in, (35) 376.  
   curing and marketing, (29) 773.  
   curing, cooperative, in England, (27) 676.  
   curing on the farm, (27) 279; (30) 316, 373.  
   factories, cooperative—  
   in Denmark, (27) 590.  
   in Victoria, (27) 373.  
   industry in New South Wales, (28) 874.  
   price in England, (38) 90.  
   wrapped cured, inspection in Texas, (29) 61.  
 Bacteria—  
   absorption in intestinal canal, (28) 882.  
   absorption of congo red by, (29) 528.  
   acid agglutination, (27) 384.  
   acid-fast, anaphylaxis from, (30) 481.  
   acid-fast, studies, (33) 769.  
   acid-ribose, in udder of cows, (33) 175.  
   action of blood from different species on, (40) 236.  
   action of dyes on, (39) 412.  
   activity during infection, (26) 174.  
   activity in forest soils, (29) 325.  
   aerobic spore-bearing nonpathogenic, studies,  
   (35) 378.  
   agglutinating, biochemical activity, (38) 181.  
   anaerobic, *see* Anaerobes.  
   and algae, symbiosis, (28) 31.  
   and plants, symbiosis between, (36) 632.  
   and tropical plants, symbiosis, (28) 35.  
   as affected by—  
   cold, (34) 538.  
   freezing, (40) 180.  
   illuminating gas, (39) 632.  
   metamorphosis of house flies, (29) 357.  
   pressure, (38) 584.  
   radioactive minerals, (27) 826.  
   radioactivity, (30) 524.  
   radium emanations, (31) 821.  
   spices, (35) 557; (38) 469.  
   sterilized soils, (28) 324.  
   tobacco smoke and methyl iodid vapor, (39)  
   527.  
   ultraviolet rays, (26) 431; (36) 526.  
   volatile conifer products, (32) 618.  
   as an index to age of butter, (31) 576.  
   as cause of strawberry-like odor in milk, (26) 371.  
   Bulgarian group, morphology and biochemistry,  
   (35) 10.  
   butyric-acid-forming, in spoiled flour, (26) 68.  
   carbohydrate decomposing, detection in soils,  
   (31) 313.  
   cellulose-destroying, characteristics, (29) 817.  
   cellulose-digesting, isolation, (31) 827.  
   changes in the animal body, (34) 877.  
   chemical action of, (30) 10.  
   chemistry of, (32) 78.  
   chitin and cellulose in, (36) 501.  
   classification, (26) 276; (37) 290, 819.  
   classification and nomenclature, (40) 521.  
   coli-aerogenes, differentiation, (34) 136; (37) 506.  
   coli group, selective action of media on, (27) 177.  
   coli group, variation, (27) 177.  
   colon type—  
   in bovine feces, (32) 175.  
   in oat hay, (36) 280, 580.  
   in surface water, (36) 284.  
   on grains, (33) 631.  
   colon-typhoid, affecting birds, (40) 685.  
   counting, (33) 82.  
   counting in tomato products, (39) 13.  
   cultures, tests, (32) 320.  
   death rates as affected by temperature changes,  
   (40) 313.  
   decomposition of silicates by, (29) 316.  
   denitrifying, physiology, (27) 424.  
   denitrifying sulphur, physiology, (28) 35.  
   destruction—  
   by leucocytes, (27) 882.  
   in milk, (28) 675.  
   of cellulose by, (26) 825; (28) 627.  
   of mice and rats by, (26) 579.  
   of paraffin by, (32) 523.  
   with hydrocyanic acid gas, (35) 53.  
   determination in—  
   cream, (34) 612.  
   ice cream, (34) 165; (38) 75.  
   meat, (31) 854.

**Bacteria—Continued.**  
 development as affected by radioactivity, (28) 731.  
 diastase and invertase activity, (36) 31.  
 dissemination by flies, (27) 58; (28) 356; (30) 658.  
 dissemination by roaches, (30) 156.  
 distribution by cream separators, (32) 268.  
 distribution in New York soils, (26) 719.  
 effect on—  
   availability of phosphates, (28) 815.  
   catalase production in milk, (29) 717.  
   cycle of hog cholera, (31) 680.  
   fermentation of tea, (32) 111.  
   grain size and moisture content of soils, (29) 20.  
   milk held at low temperature, (31) 373.  
   nitrogen content of soils, (31) 731.  
   phosphoric acid in soils, (26) 817; (31) 721.  
   sewage, (34) 591.  
   soil phosphorus, (36) 515.  
   solubility of potash and phosphoric acid, (29) 315.  
   soluble phosphorus of manures, (26) 723.  
 fat splitting by, (26) 370.  
 fecal, determination, (26) 161.  
 formation of—  
   calcium carbonate by, (26) 618.  
   creatinin by, (33) 725.  
 gas-producing, detection, (34) 732.  
 gas-producing, in milk, (26) 576.  
 gas production by, in raw and pasteurized milk, (37) 874.  
 green fluorescent, of maple sap, (26) 825.  
 growth in—

 on moor soils, (30) 229; (38) 132; (39) 428, 437; (40) 523.  
 relation to rainfall, (33) 715.  
 under dry farming, (26) 828; (30) 435; (36) 528, 529; (37) 329; (39) 131.  
 under irrigation, (34) 528.  
 cytological studies, (26) 325.  
 decomposition in soil, (40) 214.  
 decorticated or sterilized, relation to beriberi, (35) 167.  
 depth of sowing tests, (27) 835.  
 development as affected by iron, (30) 728.  
 development of grains, (32) 121.  
 dietary qualities, (39) 666.  
 diseases—  
 in Egypt, (30) 747.  
 notes, (33) 146; (35) 245.  
 studies, (28) 844; (30) 846.  
 treatment, (31) 446; (35) 544; (36) 247, 845.  
 distance experiments, (30) 732.  
 dynamiting and subsolling experiments, (32) 528.  
 ears, abnormal, notes, (29) 446.  
 effect on—  
 companion crop of peas and beans, (32) 515.  
 milk and butter, (34) 570.  
 milk secretion, (34) 269; (36) 173; (40) 878.  
 milling quality of wheat, (29) 866.  
 electroculture, (27) 231; (39) 230; (40) 428.  
 embryo and aleurone layer, studies, (26) 229.  
 embryo, morphology, (37) 127.  
 enemies of, (29) 555.  
 eosin, for pigs, (27) 570.  
 fall-sown, in Maryland and vicinity, (36) 736.  
 feed—  
 analyses, (26) 165; (29) 367; (31) 467; (40) 571.  
 and screenings, analyses, (40) 571.  
 description, (40) 72.  
 feeding value, (34) 867; (39) 474, 879; (40) 72, 771.  
 fertilizer experiments, (26) 231, 329, 423, 424, 522, 527, 535; (27) 32, 125, 530, 628, 638, 831; (28) 34, 724, 725, 726, 736, 816; (29) 22, 126, 227, 625, 727, 731, 736, 796; (30) 125, 229, 235, 324, 335; (31) 31, 37, 123, 217, 330, 421, 828, 829; (32) 431, 519; (33) 219, 227, 326, 625, 632; (34) 132, 517, 518, 622, 630, 724, 820; (35) 30, 325, 326, 425, 520; (36) 217, 529, 626, 726, 818; (37) 34, 229, 436, 438, 823; (38) 122, 726, 820; (39) 428, 530, 622, 623, 624, 726; (40) 515, 523, 621, 733, 735, 824, 825.  
 fields, weed control in, (40) 536.  
 flour, analyses, (34) 164; (38) 666.  
 flour for bread making, (40) 67, 360, 556, 657.  
 flour, recipes, (39) 267; (40) 67.  
 following alfalfa, (39) 436.  
 for cows fed alfalfa, (33) 575.  
*Geocica squamosa* on, (40) 752.  
 germ meal, analyses, (33) 759.  
 germinated, maltase in, (35) 414.  
 germinating, enzymatic peptolysis in, (32) 130.  
 germinating power as affected by age, (27) 740.  
 germination, (29) 629.  
 germination and growth as affected by ammonium sulphate, (40) 218.  
 germination as affected by—  
 calcium cyanamid, (33) 818.  
 depth of planting, (36) 437.  
 fertilizers, (29) 327.  
 fungicides, (29) 346.  
 hot water treatment, (30) 449.  
 silver nitrate, (34) 31.  
 stimulants, (26) 131.  
 temperature, (30) 531.  
 germination—  
 at different dates after threshing, (40) 443.  
 in mercury vapor light, (30) 827.

## Barley—Continued.

- germination—continued.  
 tests, (29) 223; (31) 733; (37) 239.  
 tests in hydrogen peroxid, (27) 201.  
 germinative ability and vegetative force, (29) 740.  
 germ-ripening experiments, (26) 130.  
 grades of, (32) 138.  
 grain—  
 amino acid in, (33) 665.  
 development, studies, (27) 836.  
 morphology, (32) 823.  
 grass—  
 analyses, (28) 463; (30) 565.  
 smut, infection of wheat by, (26) 845.  
 green, analyses, (29) 467; (30) 565.  
 green manuring experiments, (37) 734.  
 ground, analyses, (26) 363, 468; (27) 570.  
 ground, digestibility, (37) 677.  
 growing with—  
 legumes, (40) 822.  
 soy beans, (39) 741.  
 growth as affected by—  
 alkali salts, (34) 125.  
 Azotobacter, (28) 814.  
 calcium oxid, (40) 124.  
 concentration of nutrient solution, (35) 436.  
 electric light, (28) 228.  
 electricity, (30) 827.  
 fertilizer salts, (29) 329.  
 meteorology, (29) 510.  
 radioactivity, (28) 731.  
 spacing, (31) 328.  
 growth in—  
 acid soil, (40) 324.  
 artificial light, (28) 735.  
 association with weeds, (38) 734.  
 heated soils, (31) 216.  
 sterilized soils, (31) 336.  
 volcanic ash, (29) 726; (32) 36.  
 water culture, (33) 223.  
 hail injuries to, (33) 127.  
 hardness, relation to sap density, (39) 430.  
*Helminthosporium* diseases of, (29) 645.  
 history of, (31) 131.  
 hordein and wheat gliadin, relationship, (31) 377.  
 hull content, determination, (26) 132.  
 humin nitrogen content, (40) 510.  
 hybrid, mosaic-like splitting in, (40) 825.  
 hybridization experiments, (28) 431, 828; (36) 436.  
 hybrids, dominant and recessive characters in, (28) 197; (30) 33.  
 hybrids, notes, (29) 735.  
 improvement, (28) 828; (29) 532; (32) 630; (37) 731.  
 improvement in Canada, (37) 831.  
 inheritance in, (37) 332.  
 inheritance of albinism in, (31) 329.  
 inoculation experiments, (28) 426; (35) 32.  
 insects affecting, (29) 555.  
 integumentary system in relation to permeability, (40) 519.  
 irrigation experiments, (28) 130, 132; (29) 182, 632; (30) 34; (31) 328; (32) 37, 225; (33) 225, 827; (37) 640, 822.  
 late blight, studies and bibliography, (29) 750.  
 leaf blight, notes, (27) 45.  
 leaf stripe—  
 notes, (28) 149, 150.  
 treatment, (31) 147; (33) 846.  
 lime and marl for, (40) 322.  
 liming experiments, (29) 223; (35) 429; (36) 27; (37) 733; (38) 22; (39) 530; (40) 134.  
 loose smut—  
 biology of, (31) 50.  
 description and treatment, (26) 341.  
 infection experiments, (30) 240.  
 investigations, (28) 545.  
 notes, (29) 150; (30) 241, 448.  
 treatment, (26) 546; (27) 246, 848; (28) 445, 646; (31) 147, 342; (33) 846; (37) 247.  
 malt, starch-forming enzyme of, (33) 312.  
 maltase content, (31) 204.  
 malted, analyses, (39) 167.  
 malting power, (39) 232.  
 meal, analyses, (26) 267, 666; (34) 469; (40) 571.  
 measure of enzymic strength, (40) 612.  
 Michigan Winter, (40) 233.

## Barley—Continued.

- middlings, analyses, (31) 663; (33) 371; (35) 867; (39) 370.  
 mildew, relation to light, (30) 747.  
 milling experiments, (40) 556.  
 milling value and use, (38) 663.  
 mosaic inheritance in, (30) 335.  
 mutation in pure line of, (30) 36.  
 new form, description, (30) 526.  
 new two-rowed winter variety, (30) 36  
 nitrogen distribution in, (36) 269.  
 nutrition, studies, (31) 729.  
 nutritive value and use, (32) 760.  
 of Khorassan, (37) 446.  
 on alkali soils as affected by copper and zinc, (39) 619.  
 pedigreed, in Wisconsin, (40) 624.  
 pedigreed, yields, (31) 134.  
 phenological observations, (40) 811.  
 phosphoric acid exchange in, (28) 818.  
 phosphorus content, (27) 461.  
 plant, relation to reaction of nutrient solution (40) 324.  
 planting and harvesting dates, (26) 533.  
 plat tests, technique, (40) 227.  
 pollination, (36) 527.  
 potash lime for, (26) 526.  
 potassium and phosphorus requirements, (37) 34.  
 powdery mildew infection of, (33) 244.  
 prevention of beriberi by, (31) 762.  
 prices and shrinkage, (34) 337.  
 production in—  
 Bohemia, (32) 827.  
 Chile, (39) 231.  
 1911, (26) 595.  
 Russia, (26) 294.  
 Spain, (28) 736.  
 United Kingdom, (26) 793.  
 protein, nutritive value, (26) 155; (39) 665.  
 protein substances of, (33) 310.  
 quality as affected by weather, (26) 415.  
 rate of sowing tests, (27) 335, 531, 638, 639.  
 ratio of grain to straw, (36) 218.  
 refuse, analyses, (39) 167.  
 relation between size of seed and yield, (26) 434  
 relation of tops to roots, (31) 733.  
 relative yielding capacity, (40) 625.  
 right- and left-handedness in, (27) 236; (30) 335  
 rolled-row tests, technique, (38) 429.  
 root—  
 analyses, (36) 765.  
 feeding value, (39) 776, 783.  
 root—  
 development, (26) 327.  
 development of seedlings, (30) 136.  
 development with other crops, (26) 129.  
 system, (32) 634.  
 rotation experiments, (29) 227; (40) 331, 733.  
 rust spores in seeds of, (30) 241.  
 rusts—  
 description, (35) 47.  
 in Canada, (34) 51.  
 notes, (26) 143; (37) 453.  
 rye stalk disease affecting, (26) 546.  
 secondary rootlets, (40) 32.  
 seed-bed preparation, (33) 230.  
 seed—  
 cleaning, (40) 40.  
 coats, permeability, (34) 626.  
 disinfection, (31) 738, 840.  
 migration of reserve material to, (34) 35, 729.  
 resistance to desiccation, (40) 39.  
 treatment, (39) 238.  
 viability as affected by age, (31) 624.  
 seeding—  
 depths, (40) 227.  
 experiments, (29) 224, 225, 426; (30) 333; (31) 328, 330; (32) 528, 530, 531; (36) 134; (37) 229, 733; (39) 130, 227, 228, 336; (40) 228.  
 in furrows, (36) 831.  
 tests under irrigation, (39) 133.  
 seedlings—  
 absorption of nitrogen by, (35) 434.  
 as affected by aluminum, (39) 115.  
 growth in nutrient solutions, (38) 736.  
 seeds—  
 absorption of water by, (28) 226.  
 migration of reserve material to, (32) 399.

## Barley—Continued.

- selection experiments, (37) 32; (40) 233.  
 selection of varieties, (28) 633.  
 selective permeability, (37) 25.  
 Septoria disease, (36) 48.  
 shorts, analyses, (27) 170; (33) 568; (35) 562; (37) 471.  
 smut—  
 as affected by date of planting, (31) 50.  
 effect on horses, (27) 882.  
 in Dutch East Indies, (38) 448.  
 smuts—  
 cause and treatment, (30) 47.  
 description and treatment, (38) 548.  
 life history and treatment, (28) 445.  
 notes, (28) 544; (35) 348.  
 treatment, (27) 137, 445; (28) 51; (31) 344; (39) 243, 353, 533, 851; (40) 156, 346.  
 soil moisture removal by, (40) 430.  
 spring v. fall sown, (39) 836.  
 sprouts, analyses, (31) 73.  
 starch, gelatinization point, (30) 10.  
 starch, studies, (31) 828.  
 statistical notes, (40) 626.  
 straw—  
 analyses, (28) 768.  
 composition and digestibility, (34) 565.  
 lime and phosphorus content, (26) 873.  
 streak disease, treatment, (32) 145, 341.  
 stripe, notes, (32) 544.  
 stripe, treatment, (39) 851.  
 substitute in malting operations, (40) 808.  
 susceptibility to mildew, (29) 844.  
 Svalof golden, notes, (30) 230.  
 Swiss types, (27) 338.  
 tables for wagonloads, (32) 42.  
 tannin in seed coats, (27) 730.  
 thrips affecting, (28) 452.  
 transformation of nitrogen by, (29) 133.  
 treatise, (30) 230.  
 v. hominy meal for pigs, (29) 671.  
 v. spring wheat, (40) 443.  
 varieties, (26) 39, 233, 629, 632, 733; (27) 32, 137, 334, 337, 530, 531, 533, 637, 638, 736, 834; (28) 432, 532, 827; (29) 138, 222, 225, 425, 428, 530, 630, 736; (30) 135, 229, 235, 434, 435, 525, 828, 829; (31) 829; (32) 36, 224, 334, 431, 433, 527, 528, 529, 530, 730, 731, 827; (33) 33, 34, 330, 431, 631, 632, 633; (34) 138, 227, 229, 629, 733, 734, 735; (35) 30, 33, 228, 229, 526, 637, 826; (36) 32, 33, 34, 36, 132, 133, 227, 335, 435, 437, 529, 634, 735, 830; (37) 29, 30, 32, 33, 132, 135, 227, 228, 230, 330, 332, 334, 436, 438, 530, 640, 641, 823, 824, 825; (38) 30, 131, 134, 333, 433, 632, 634, 636, 736, 830, 832; (39) 533.  
 varieties—  
 for Alaska, (39) 125, 126.  
 California, (26) 233.  
 Montana dry lands, (35) 735.  
 moor culture, (39) 438.  
 New South Wales, (27) 338; (38) 528.  
 the Dakotas and Montana, (38) 230  
 Utah dry lands, (38) 230.  
 identification, (38) 833.  
 in Argentina, (40) 234, 625.  
 new Swedish, (39) 833.  
 resistant to rust, (30) 230.  
 variety—  
 characteristics, (31) 228.  
 tests, (39) 128, 129, 130, 227, 228, 333, 334, 336, 337, 435, 436, 437, 735, 737, 738; (40) 31, 32, 135, 228, 230, 233, 332, 431, 523, 626, 728, 730, 731, 732, 733, 735, 825.  
 tests, technique, (40) 227.  
 volume weight and grain characteristics, (37) 643.  
 water requirements, (29) 826; (32) 127; (34) 720; (38) 227.  
 water requirements in India, (27) 429.  
 weed seeds in, (32) 833.  
 wheat midge on, (39) 159.  
 wild, eradication, (39) 842.  
 winter, northern limits in United States, (37) 533.  
 winter, notes, (28) 432.  
 xenia in, (40) 826.  
 yield as affected by—  
 antagonism between anions, (33) 323.  
 pasturing, (30) 633.  
 source of seed, (26) 329.  
 sulphur, (35) 529.

- Barley—Continued.  
 yield of plump v. shrunk seed, (27) 734.  
 yield on alfalfa stubble, (33) 828.  
 yields, (27) 734; (29) 138; (40) 735.  
 yields—  
 determination, (37) 634.  
 in Australia, (38) 133.  
 in relation to rainfall, (34) 319.
- Barn—  
 and field experiments in 1917, (39) 398.  
 conveniences, descriptions, (27) 90.  
 trusses, stresses in, (36) 399.
- Barnacle wax-scale notes, (28) 453.
- Barns—  
 cattle and sheep, plans, (31) 488.  
 circular, construction, (27) 589; (40) 90.  
 concrete, for cold climate, (38) 292.  
 construction, (37) 886, 887.  
 dairy—  
 construction and equipment, (31) 892.  
 plans, (32) 470.  
 ventilation, (29) 474.  
 disinfection, (29) 885.  
 for prairie farms, (35) 689.  
 framing, (26) 398.  
 plans, (26) 894; (28) 291; (36) 399.  
 plans and descriptions, (27) 89.  
 plans and specifications, (29) 390; (33) 783.  
 sanitary, construction, (27) 89.  
 sanitary, relation to clean milk, (29) 500.  
 ventilation, (32) 284; (33) 891.
- Barnyard—  
 grass, analyses, (34) 39.  
 grass, Japanese, culture experiments, (27) 735.  
 manure, *see* Manure.  
 millet, notes, (26) 362.
- Barometric pressure—  
 and carbon dioxide excretion, relationship, (30) 563.  
 at Washington, D. C., (34) 117.  
 diurnal variations, (27) 316; (28) 213; (32) 810.  
 effect on—  
 carbon dioxide excretion in man, (29) 569.  
 metabolism, (31) 362.  
 plant growth, (36) 730.  
 in absolute units, (31) 212.  
 in Italy, (35) 618.  
 in soils, (26) 323.  
 of western and equatorial Africa, (34) 208.  
 relation to—  
 sun spots, (38) 115.  
 temperature, humidity, and latitude, (34) 413.  
 water level, (39) 17.  
 wind velocity, (40) 715.  
 units, conversion, (31) 615.  
 variations in United States, (37) 807.
- Barrel, standard, Federal law, (37) 832.
- Barrels, wooden, tests, (31) 144.
- Bartonella bacilliformis  
 asexual cycle, (34) 858.  
 notes, (31) 847; (37) 377.
- Bartramia longicauda, notes, (27) 355.
- Baryconus oecanthi, notes, (31) 650.
- Baryscapus sp., notes, (29) 658.
- Basalt, ground, effect in water culture, (28) 817.
- Basedowsan, nature and use, (26) 580.
- Basella rubra, leaf disease of, (31) 56.
- Bases—  
 absorbed, determination in soils, (30) 215.  
 effect on seed germination, (26) 131.  
 natural, treatise and bibliography, (32) 201.  
 nutrient and nonnutrient, effect on plant growth, (30) 128.  
 organic, occurrence in rabbit meat, (26) 563.  
 plant, studies, (31) 309.  
 reactions of ions and molecules, (37) 201.
- Basi from sugar cane, (29) 118.
- Basic compounds, effect on plants and microorganisms, (27) 229.
- Basic slag, *see* Phosphatic slag.
- Basidiomycetes, culture experiments, (32) 341.
- Basilona imperialis, notes, (26) 656, 856.
- Basket willows, *see* Willows.
- Baskets, standard, (38) 40.
- Basset hounds, tricolor inheritance, (38) 269.
- Bassia—  
 butyracea, seeds of, (32) 613.  
 cake, analyses, (26) 363.  
 spp., oil content, (31) 234.
- Bassides in British Museum, revision, (31) 655.
- Bassus—  
 carpocapsae n.sp., description, (35) 262.  
 coleophorae n.sp., description, (34) 456.  
 earinoides, parasitic on bud moth, (34) 250.  
 gibbosus, notes, (36) 655.  
 laetatorius, notes, (28) 254.  
 sp., parasitic on Syrphidae, (26) 349.
- Basswood—  
 forcing experiments, (38) 443.  
 planting, (32) 853.
- Bast-fiber industry in Dutch East Indies, (38) 527.
- Bastol, analyses, (27) 371.
- Bastol, notes, (30) 202, 711.
- Bat guano—  
 analyses, (27) 824, 825; (29) 516; (31) 724; (33) 821; (35) 127, 328; (38) 23.  
 analyses and fertilizing value, (36) 325.  
 deposits in Cuba, (27) 118.  
 deposits in Mexico, (26) 623.  
 examination, (36) 319.  
 fertilizing value, (27) 825; (29) 129; (33) 517.  
 of Cuba and Isle of Pines, (33) 24.  
 of Porto Rico, (39) 426.
- Bat, new—  
 from Mexico, (37) 757.  
 from Porto Rico, (35) 460.
- Bathing in Great Salt Lake, metabolic effects, (31) 763; (33) 367; (35) 767.
- Bathyrhometer as anemometer, (38) 812.
- Bathyrhix tibialis n.sp., description, (38) 565.
- Batocera—  
 hector, injurious to kapok, (26) 354.  
 rubra in Tortola, (39) 862.  
 rubra, notes, (26) 151; (40) 655.
- Batrachedra rileyi, *see* Pyroderces rileyi.
- Bats—  
 eradication of mosquitoes by, (31) 62.  
 injurious to kapok, (26) 354.  
 of California, (40) 853.  
 relation to rabies, (27) 285.
- Batteries, dry, care of, (26) 686.
- Battle fields, leveling, (38) 690.
- Bauhinia esculenta, notes, (29) 362.
- Bavarian—  
 cereal breeding station in Weihenstephan, (33) 831.  
 Mooriculture Station, report, (26) 830.
- Bay—  
 flea louse, notes, (37) 157.  
 swamp, analyses, (26) 612.  
 tree, culture for oil, (35) 449.  
 trees, culture experiments, (38) 542; (40) 339.
- Bdella cardinalis, notes, (27) 861.
- Bdellolarynx sanguinolentus, life history, (35) 856.
- Beach fog and fracto-cumulus, (34) 118.
- Beachflies breeding in dead crabs, (39) 861.
- Beam ends, protection from decay, (26) 544.
- Bean—  
 and corn silage, analyses, (39) 773.  
 anthracnose—  
 notes, (33) 432; (37) 652; (38) 848.  
 relation to temperature, (34) 541.  
 resistant varieties, (34) 644; (35) 348; (40) 643.  
 studies, (39) 354, 455, 745.  
 treatment, (34) 746; (35) 652; (36) 748; (38) 249.  
 aphid, *see* Aphis rumicis.  
 bacteria as affected by acidity, (39) 722.  
 bacteria, notes, (39) 338.  
 bacteriosis in Indiana, (39) 52.  
 bacteriosis, studies, (34) 746.  
 beetle, studies, (37) 465.  
 blight or bacteriosis, notes, (37) 150.  
 blight, studies, (28) 846; (39) 354, 455.  
 blight, treatment, (34) 746; (35) 652; (36) 748.  
 Cercospora disease, notes, (39) 453.  
 diseases—  
 and pests in greenhouses, (38) 750.  
 bibliography, (39) 455.  
 description and treatment, (37) 248.  
 in Colorado, (39) 52.  
 in New York, (37) 840.  
 in Vermont, (40) 50.  
 notes, (31) 542; (35) 245; (38) 48; (39) 52, 249, 453; (40) 47.  
 studies, (33) 544, 547; (36) 746; (39) 354, 455.  
 embryos, nutrition and growth, (38) 127.  
 flour, protein digestibility, (33) 564.

## Bean—Continued.

- fly—*see also* *Phorbia fusciceps*.  
 notes, (29) 657; (30) 458; (32) 350.  
 Philippine, studies, (40) 457.
- Fusarium disease as affected by soil temperature, (39) 147.
- growing contest, notes, (29) 94.
- hay, analyses, (31) 740.
- lands, semiannual cropping, (37) 829.
- leaf-beetle—  
 notes, (29) 652.  
 on cowpeas, (34) 254; (40) 860.
- leaf roller, notes, (29) 652; (35) 355.
- leaf spot, treatment, (32) 843.
- maggot—*see also* *Phorbia fusciceps*.  
 in Chile, (40) 648.  
 notes, (26) 753; (35) 363.
- meal, analyses, (26) 468, 666; (29) 367; (32) 465.
- meal, effect on milk and butter, (34) 570.
- mosaic disease, notes, (37) 751.
- oil, constants of, (35) 611.
- Orobanche disease, (39) 52.
- pests, treatment, (33) 231.
- plant, relation to reaction of nutrient solution, (40) 324.
- pod blight, investigations, (38) 449.
- pod borer, notes, (27) 155.
- Pods, analyses, (26) 665.
- Pods, individuality as compared with that of the plant, (40) 31.
- refuse, analyses, (26) 714.
- root diseases, studies, (36) 248.
- rust—  
 and spot diseases, (39) 249.  
 control, (40) 845.  
 description, (32) 238.  
 notes, (29) 150; (31) 746; (37) 453.  
 resistance to, (38) 149.  
 susceptibility, studies, (39) 852.
- sclerotinia diseases, (40) 49.
- seed, preservation and treatment, (28) 846.
- seedlings—  
 as affected by cerium chlorid, (31) 326.  
 correlation in, (37) 630.  
 primordial leaves in, (36) 221.  
 stimulation by Roentgen rays, (30) 729.
- seeds, large v. small, (31) 634.
- slug, notes, (40) 56.
- starch, studies, (31) 828.
- stem disease, notes, (36) 748; (39) 354.
- stem disease, studies, (38) 148.
- stem maggot, notes, (30) 160.
- straw, analyses, (26) 665.
- straw, composition and digestibility, (34) 565.
- strings and stems, analyses, (38) 626.
- sun scald, studies, (39) 455.
- thrips—  
 internal parasite of, (26) 858.  
 notes, (38) 258.  
 on olive, (38) 157.  
 studies, (28) 249.
- tubercles, analyses, (27) 802.
- weevil—  
 biology and control, (39) 363.  
 control, (39) 664.  
 in Vermont, (40) 50.  
 Mexican, notes, (34) 857.  
 notes, (34) 754; (37) 262; (40) 50, 64, 266, 861.  
 remedies, (40) 553.  
 studies, (36) 855; (40) 553.
- weevils in Hawaiian Islands, (40) 266.
- weevils in South Africa, (40) 861.
- Beans—  
 abortiveness in relation to position in pod, (36) 838.
- absorption of ultraviolet rays, (39) 733.
- adzuki, *see* Adzuki beans.
- agglutinin from, (37) 81.
- analyses, (26) 267, 770; (31) 740; (37) 268, 343; (39) 773.
- as affected by—  
 alkali salts, (39) 720.  
 bog water, (28) 733.  
 copper fungicides, (28) 247.  
 fertilizers, (29) 339.  
 pod position, (34) 134.
- as dry-farm crop, (39) 736.
- food, (34) 164.
- forage crop, (37) 640.
- host plant of red spider, (32) 157.

## Beans—Continued.

- Asiatic, description, (31) 739.
- assimilation of nitrogen by, (26) 32.
- bacterized peat for, (39) 116.
- behavior of organic substances in, (39) 526.
- Bengal—  
 as green manure, (36) 737.  
 notes, (31) 864.  
 or Mauritius, as a cover crop, (34) 736.
- black, from Venezuela, tests, (33) 536.
- black-eye, as orchard intercrop, (39) 47.
- bonavist, lablab, or hyacinth, (34) 436.
- breeding experiments, (27) 528; (29) 433; (30) 343; (32) 540; (33) 635; (39) 747; (40) 524, 740.
- broad, culture experiments, (32) 132.
- bush, lime-magnesia requirements, (29) 520.
- bushel weights, (37) 889.
- Californian, composition, (39) 266.
- Canada, culture experiments, (31) 829.
- canning, (39) 165, 717.
- canning wastes, purification, (39) 717.
- catalytic fertilizers for, (27) 629.
- color inheritance in, (40) 536.
- composition at different stages, (39) 836.
- correlation studies, (36) 826.
- cost of production, (30) 830.
- creeping, notes, (31) 631.
- cull, analyses, (27) 170.
- cull, for fattening steers, (40) 768.
- culture, (26) 393; (32) 226; (37) 136, 195, 232, 343, 641, 642.
- culture—  
 and harvesting for drying, (37) 642.  
 and use in Trinidad, (40) 763.  
 experiments, (30) 237, 830; (31) 732; (33) 31; (35) 141; (36) 32, 340; (37) 742; (38) 830; (39) 128, 333, 437, 632.  
 for seed, (37) 436.  
 in Antigua, (36) 735.  
 Arkansas, (39) 635.  
 California, (39) 233.  
 Colorado, (39) 31.  
 Dutch East Indies, (30) 697.  
 greenhouses, (38) 749.  
 Michigan, (39) 320.  
 Montana, (33) 526.  
 New Mexico, (40) 18.  
 Northwest, (30) 138; (38) 434.  
 Nyasaland, (26) 829.  
 Philippines, (39) 444.  
 Porto Rico, (36) 341.  
 Rhodesia, (27) 32, 637.  
 project work in, (33) 792.  
 under dry farming, (36) 528, 529; (37) 329.  
 under shade, (27) 741.
- cumulative influence of starvation in, (27) 636; (28) 331.
- description, (30) 828.
- dietary deficiencies, (37) 163.
- doubling cotyledons and leaves in, (36) 331.
- drying, (37) 509.
- effect on—  
 companion crop of barley, (32) 515.  
 intestinal flora, (40) 867.  
 soil fertility, (27) 136.
- electroculture experiments, (30) 788.
- environment of pods and seeds in, (39) 738.
- environmental changes in, (30) 343.
- ere, culture experiments, (29) 830.
- factors affecting weight, (30) 433.
- feeding value, (27) 378.
- fertility in relation to ovules per pod, (38) 29.
- fertilizer experiments, (26) 630, 631, 727; (27) 32, 137, 421; (28) 236, 735; (29) 731; (30) 627; (31) 421; (33) 326; (34) 27, 723; (35) 425; (37) 742; (40) 134.
- fertilizing value, (32) 216, 630, 828.
- field, (40) 435.
- field—  
 analyses, (26) 363.  
 critical period of growing season, (39) 811.  
 culture, (33) 231; (39) 441, 834.  
 culture experiments, (32) 132, 431.  
 culture in Canada, (33) 432.  
 depth of sowing tests, (27) 835.  
 description and agricultural value, (36) 635.  
 graphic summary of seasonal work, (39) 495.  
 tests in Montserrat, (40) 228.  
 varieties, (27) 334; (32) 37, 132; (33) 432.  
 variety tests, (39) 128.

## Beans—Continued.

- fodder, of India, (40) 231.
- forcing experiments, (38) 443.
- forcing with radium, (28) 825.
- French, varieties at Wisley, (33) 536.
- from Sudan, analyses, (29) 569.
- from various countries, analyses, (40) 557.
- fruit thinning experiments, (27) 741.
- garden—
  - as an index to smoke injury, (31) 146.
  - culture, (30) 335.
  - nodule bacteria of, (32) 33, 327.
  - relation of mortality to seed weight, (30) 237.
- genetic studies, (32) 130.
- germinating, pentosans in, (27) 730.
- germination as affected by—
  - fertilizers, (29) 327.
  - metallic compounds, (29) 528.
  - Roentgen rays, (28) 128.
  - salt concentration, (39) 732.
- germination in—
  - hydrogen peroxid, (27) 201.
  - mercury vapor light, (30) 827.
- glucosid formation by, (36) 329.
- green, as meat substitute, (38) 166.
- ground, analyses, (26) 715; (31) 65.
- growth as affected by—
  - fertilizer salts, (29) 329.
  - light, (28) 227.
  - manganese salts, (32) 725.
- growth in—
  - acid soil, (40) 324.
  - calcareous soils, (31) 627, 816.
  - relation to climate, (33) 116.
- haricot, field tests in Fiji, (40) 231.
- harvesting and storage, (38) 41.
- hemagglutinating and precipitating properties, (30) 804.
- history and phylogenesis, (38) 539.
- home-canned string, botulism caused by, (33) 866.
- home drying, (38) 41.
- horse, *see* Horse beans.
- hybridization experiments, (29) 433.
- imported, inspection in France, (27) 310.
- inheritance—
  - in, (27) 740; (28) 740; (30) 343; (32) 538; (34) 146; (36) 729, 839.
  - of blossom color in, (30) 142.
  - eye pattern in, (36) 826.
  - habit in, (34) 41.
  - height in, (35) 836.
  - seed color in, (38) 539.
  - shape and size in, (36) 735.
- insects affecting, (33) 153; (39) 256.
- intoxication of horses by, (26) 887.
- irrigation experiments, (29) 638; (31) 732; (32) 186; (33) 683.
- irrigation on sandy soil, (33) 287.
- jack, *see* Jack beans.
- kidney—
  - as forage crop, (38) 336.
  - fertilizer experiments, (28) 735.
  - xenia in, (31) 836.
- lablab, analyses, (27) 68.
- Lima—
  - arsenical burn of, (31) 641.
  - culture, (26) 539.
  - downy mildew, (39) 52.
  - improvement by selection, (29) 540.
  - insects affecting, (35) 355; (37) 460.
- liming experiments, (40) 134.
- limitation studies, (34) 146; (36) 839; (39) 747.
- Lyon—
  - as cover crop, (31) 635; (34) 736.
  - breeding experiments, (27) 338.
  - culture experiments, (27) 336; (31) 829.
  - hybridization experiments, (27) 338; (29) 228; (31) 734; (34) 431; (35) 829.
  - notes, (26) 362.
- Madagascar, culture experiments, (38) 336, 527.
- marrow, elongation of hypocotyl, (28) 739.
- membracid attacking, (40) 753.
- microscopic character, (36) 714.
- milling experiments, (40) 556.
- moth, yields, (39) 434.
- mungo, *see* Mungo beans.
- mutation, (30) 329; (36) 138.
- Natal sugar, culture experiments, (30) 632.

## Beans—Continued.

- native, substitutes for in food of French Army, (40) 557.
- natural selection in, (28) 430; (29) 139.
- navy—
  - antineuritic value as affected by heat and alkalis, (40) 565.
  - ash analyses, (29) 861.
  - dietary properties, (39) 266, 666.
  - starch content, (35) 108.
  - variation in, (39) 330.
- nematodes affecting, (30) 448.
- nutritive value, (36) 63.
- of Burma, names and descriptions, (33) 229
- oil content, (27) 717.
- phosphorus content, (27) 461.
- plant nutrients removed by, (29) 837.
- Porto Rico, culture experiments, (31) 829
- potash lime for, (26) 526.
- preparation and use, (32) 253.
- preservation, (38) 266.
- preservation by pressure, (32) 416.
- production in Spain, (28) 736.
- Rangoon, examination, (30) 258.
- red spider attacking, (39) 65.
- relation—
  - between weight and germinability, (30) 522.
  - of tops to roots, (31) 733.
  - of weight of seed to yield, (29) 522, 633; (31) 824.
- salicylic acid reaction, (36) 63.
- Sclerotinia libertiana affecting, (26) 647.
- seed—
  - color variation in, (37) 334.
  - disinfection experiments, (31) 738.
  - testing, (38) 41.
  - treatment, (39) 238; (40) 443.
  - treatment with iron sulphate, (34) 528.
- selection experiments, (36) 735; (37) 32.
- small, seeding experiments, (35) 526.
- snap, Sclerotinia blight of, (36) 647.
- soaking seed, (40) 727.
- southwestern, studies, (28) 639.
- stachyose in, (31) 13.
- Stizolobium, culture in Porto Rico, (29) 631.
- stored, variations in weight of, (31) 235.
- string—
  - canning, (39) 165.
  - carbohydrates in, (31) 11.
  - drying, (37) 509.
  - electroculture experiments, (40) 147.
  - greenhouse, carbon dioxide for, (39) 38.
  - response to carbon dioxide, (40) 820.
- susceptibility to anthracnose, (26) 747.
- sword, as cover crop, (34) 736.
- sword, culture in Porto Rico, (29) 631.
- teparty, *see* Tepary beans.
- tetracotyledonous race, (36) 522.
- toxicity, (38) 539.
- translocation of mineral constituents, (34) 427.
- use by prehistoric Americans, (38) 167.
- use in bread making, (40) 66.
- variation in due to fertilizers, (29) 435.
- varieties, (26) 631; (27) 32; (28) 533; (29) 222, 228, 426; (30) 829; (31) 732; (32) 630; (33) 33, 34; (35) 141; (36) 32, 437; (37) 32, 329; (38) 344, 432, 632, 750, 832; (39) 233.
- varieties for Texas, (40) 729.
- varieties tolerant to salt, (40) 435.
- variety tests, (39) 128, 333, 434, 835; (40) 431, 730.
- velvet, *see* Velvet beans.
- water requirements, (32) 127; (34) 720; (38) 227.
- weight in relation—
  - number of pods per plant, (36) 826.
  - position in pods, (32) 521.
- white wax, seeding depths, (40) 227.
- Windsor, as affected by sodium chlorid, (40) 435.
- wire frames for, (33) 891.
- xenia in, (28) 431; (31) 224, 836.
- yield as affected by sulphur, (34) 726.
- Yokohama, culture experiments, (27) 335.
- Yokohama, yields, (29) 224.

## Bear—

- clover, effect on forest reproduction, (40) 842.
- grass as feeding stuff, (40) 277.
- grass, notes, (29) 441.
- River basin, hydrography, (32) 587.
- Valley, Calif., hydroelectric development, (28) 415.

- Beard grass, scented, golden, analyses, (30) 565.
- Bears**—  
grizzly and big brown, of North America, (38) 760.  
host of spotted fever tick, (26) 64.
- Beauveria**—  
(*Botrytis*) *bassiana*, notes, (32) 63.  
*peteloti* n. sp., notes, (37) 467.  
(*Sporotrichum*) *globuliferum*, notes, (30) 459.
- Beaver**—  
fluke, studies, (33) 659.  
mountain, habits and economic significance, (39) 759.  
mountain, notes, (37) 895.
- Bedbugs**—  
as affected by cold and starvation, (36) 53.  
biology, (28) 654; (31) 156.  
destruction by heat, (35) 658; (40) 456.  
destruction with cyanid gas, (36) 456.  
eggs and larvae, vitality, (32) 348.  
fumigation experiments, (36) 53.  
host of kala-azar parasite, (28) 655.  
notes, (26) 759; (27) 55; (29) 454; (36) 153.  
relation to—  
  influenza, (40) 548.  
  plague, (33) 747.  
  poliomyelitis, (28) 753.  
  relapsing fever, (36) 356.  
  typhoid fever, (28) 251.  
remedies, (28) 555; (31) 353; (39) 762.  
summary of information, (39) 763.  
transmission of—  
  diseases by, (26) 760; (31) 550.  
  plague by, (38) 559.  
  trypanosomes by, (30) 853.
- Bedding**—  
materials for live stock, (39) 621.  
plants, propagation, (40) 247.
- Bee**—  
colony, temperature of, (31) 254, 553.  
disease, notes, (36) 53, 258.  
diseases—  
  control by heating, (31) 255.  
  in British Columbia, (32) 551.  
  Germany, (37) 460.  
  Massachusetts, (37) 855.  
  New Jersey, (38) 865.  
  Ontario, notes, (27) 458; (29) 57.  
  Pennsylvania, (37) 459.  
  notes, (26) 63, 151; (27) 359; (28) 562; (30) 759; (31) 553; (32) 754; (37) 162, 360.  
  review of literature, (27) 60.  
  studies, (37) 59.  
fly, life history, (29) 456.  
genus *Andrena*, notes, (40) 65.  
moth—  
  bacterial diseases of, (26) 250.  
  destruction by cold, (40) 760.  
  fumigation, (40) 755.  
  immunity to microbes, (27) 655.  
  immunity to tuberculosis, (31) 155.  
  life history, (26) 349; (29) 859; (32) 151.  
  notes, (28) 352; (31) 352.  
  parasites of, (26) 657; (40) 359.  
  paralysis, cause, (38) 564.  
  pastures, tests, (40) 65.  
  sacbrood disease, (36) 659.
- Beech**—  
absorption of nitrogen by, (26) 443.  
and oak, union of, (33) 343.  
as affected by smoke, (31) 521.  
bark caterpillar, notes, (34) 63.  
canker, notes, (28) 446.  
coccus, felted, in Nova Scotia, (30) 358.  
density and porosity, (32) 47.  
destructive distillation, (27) 745; (38) 808.  
diseases, notes, (27) 51; (32) 242.  
distillation value, (32) 48.  
forcing experiments, (28) 435.  
grafting, (31) 443.  
growing with spruce and pine, (27) 542.  
gumming disease, (39) 254.  
historical sketch, (35) 241.  
humus, effect on plant growth, (32) 618.  
leaf mold, fertilizing value, (29) 622.  
leafy twigs, preservation, (37) 837.  
mast, feeding value, (32) 566.  
*Orchestes*, notes, (30) 33.  
periodicity in, (27) 425; (29) 442.  
red, studies, (26) 843.  
seedling mildew, notes, (26) 446.  
seeds, germination tests, (27) 444.
- Beech**—Continued.  
snap disease, studies, (30) 653.  
timber estimating tables for, (36) 345.  
volume tables for, (30) 744.  
winter foliation, (36) 224.  
wood—  
  analyses and use as human food, (33) 866.  
  as affected by ozone, (30) 711.  
  *Coniophora cerebella* on, (39) 553.  
  creosote, studies, (37) 114.  
  creosote, toxicity to wood-destroying fungi, (37) 502.  
  soils, nitrification in, (40) 418.  
  woods of United States, (30) 46.  
  yield tables, (27) 348.
- Beechnut**—  
cake, analyses, (26) 363.  
oil, manufacture and use, (38) 806.
- Beechnuts**, analyses and feeding value, (31) 365.
- Beef**—*see also* Cattle, beef.  
adulteration with horse meat, (34) 113.  
and buffalo meat, differentiation, (30) 314.  
as polyneuritis preventive, (28) 761.  
baby, production, (29) 571; (31) 866; (37) 269, 366, 367; (40) 74, 367.  
brisket fat, digestibility, (36) 800.  
by-products, utilization and shipment, (30) 711.  
changes in during cold storage, (36) 759.  
chilled, discolored spots on, (28) 659.  
clubs, farmers', (39) 773.  
cold storage cost, (27) 164.  
cold storage, statistics, (28) 869.  
cost of production, (28) 72.  
cost of production under semirange conditions, (31) 468.  
cured and salted, in United States, (38) 865.  
defrosting, (27) 470.  
dressed, exports from Argentina, (26) 768.  
drying, (27) 279.  
exports from Australia, (33) 268.  
extract, behavior of lactic acid in, (26) 408.  
extract, nutritive effects of, (26) 155.  
fat, accessory growth substance in, (38) 265.  
  composition, (37) 499.  
  detection in food, (29) 798.  
  determination in lard, (27) 497.  
  digestibility, (34) 364.  
  role in glycogen formation, (31) 763.  
fresh, fumeric acid in, (31) 759.  
frozen for 18 years, (32) 559.  
frozen, treatment and utilization, (35) 859.  
growers organization in Iowa, (29) 894.  
imports—  
  from Argentina, (31) 95.  
  into Great Britain, (27) 470; (30) 171.  
industry in—  
  Argentina, (28) 365; (29) 870.  
  Pennsylvania, (26) 667.  
  Philippines, (26) 666.  
jerked, industry in Argentina, (31) 75.  
kidney, extractive material in, (26) 154.  
meal, notes, (29) 765.  
prices as affected by cold storage, (28) 871.  
prices in Ireland, (31) 96.  
production—  
  as affected by plane of nutrition, (33) 265.  
  experiments, (26) 599.  
  importance of silage in, (29) 69.  
  in Argentina, (30) 171.  
  Florida, (27) 672.  
  southern Texas, (30) 468.  
  the South, (31) 74, 367.  
  United States, (30) 467.  
  notes, (32) 468.  
  studies, (28) 572.  
products, freezing and salting, in South America, (31) 367.  
proteins, studies, (39) 201.  
ratio of bone to meat, (40) 555.  
retail buying, (29) 194.  
scrap—  
  analyses, (26) 165, 362, 468, 568, 665; (27) 68, 570, 670, 774, 872; (28) 265, 464, 572, 669, 769; (29) 270, 271, 467, 666, 769; (30) 68, 169, 565, 868; (31) 73, 569, 663; (32) 169, 568, 667, 862; (33) 371; (34) 169, 263, 566, 665; (35) 867; (36) 667, 765.  
  for growing chicks, (37) 768.  
  for laying hens, (31) 569.  
  v. cottonseed meal for chicks, (30) 571; (31) 473.

## Beef—Continued.

- selection and cooking, (38) 567.
- soups, condensed, examination, (31) 659.
- storage in Philippines, (26) 262.
- studies of various cuts, (28) 163.
- supply of United States, (29) 770.
- supply, world's, notes, (28) 72.
- tallow, determination in lard, (30) 110.
- temperatures for roasting, (35) 267.
- v. buffalo meat, nutritive value, (26) 355.

## Beehive, Nicolson observatory, (40) 264.

## Beehives—

- cement, tests, (29) 653.
- heat insulators, (40) 64.

## Beekeepers—

- Association of Ontario, report, (27) 759; (30) 59; (31) 554; (35) 262; (36) 659; (38) 264.
- associations of Ontario, (27) 39.

## Beekeeping—

- and honey production, (39) 468, 565.
- as a school subject, (33) 791.
- experiments, (40) 759.
- extension work in, (38) 164.
- fairs and exhibitions concerning, (28) 796.
- for Connecticut, (39) 768.
- for West Virginia, (40) 170.
- guide, (28) 257.
- handbook, (26) 253, 658; (29) 57; (33) 563; (34) 362, 556, 657; (38) 164; (40) 264.
- in Australasia, (38) 564.
- British Columbia, (26) 151; (30) 856.
- British Guiana, (40) 358.
- Canada, (27) 356, 662; (36) 58, 158.
- Florida, (40) 358.
- Germany, (30) 759; (32) 759.
- Guam, (32) 758; (35) 856.
- Illinois, (39) 661.
- Indiana, (27) 452.
- Iowa, (30) 759.
- Maine, (40) 264.
- Montana, (28) 352.
- North Carolina, (36) 555.
- Ontario, (33) 159; (33) 264, 660; (40) 264.
- Oregon, (32) 352.
- Pennsylvania, (39) 869.
- Philippines, (30) 442; (34) 635; (38) 460.
- Porto Rico, (26) 62; (31) 354; (33) 459.
- Rhode Island, (27) 857.
- Tennessee, (29) 458.
- Texas, (27) 864; (35) 262.
- Tunis, (26) 253; (27) 458.
- war time, (39) 566, 869; (40) 358.
- Wisconsin, (35) 261.
- investigations, (29) 859; (32) 847.
- Mendelian methods in, (29) 860.
- monograph, (29) 761.
- notes, (26) 456; (27) 856; (28) 279; (29) 252; (30) 661; (31) 340, 354; (32) 448, 556, 852; (33) 98, 746; (34) 95, 758; (35) 461, 467, 499; (37) 360; (38) 660, 762.
- Pearce method, (39) 768.
- relation to spraying, (35) 662.
- treatise, (36) 158; (37) 568, 769.

## Beer—

- composition, (36) 864.
- home manufacture, (40) 116.
- industry in Philippines, (29) 118.
- methods of analysis, (27) 205.
- osmotic pressure and electrical conductivity of, (30) 523.

## Yeast—

- dried, for horses, (30) 175.
- dry, analyses and feeding value, (29) 467.
- for cows, (32) 871.

## Bees—

- and their diseases, notes, (34) 656.
- and their management, handbook, (38) 364.
- arsenic in, (36) 59.
- as affected by—
  - arsenical sprays, (32) 244.
  - weather, (37) 854.
- as carriers of—
  - fire blight, (37) 53; (39) 251.
  - pathogenic microorganisms, (31) 849.
- behavior in winter, (31) 254, 553.
- brood diseases of, (31) 655; (35) 761.
- census in Nebraska, (40) 194.
- collection of pollen by, (28) 561; (34) 556.
- crossing experiments, (36) 258.
- digestion in, (30) 856.

## Bees—Continued.

- disease, unusual, (39) 566.
- diseases, studies, (39) 468.
- distribution of pear blight by, (33) 149.
- domesticating, (27) 564.
- Egyptian, bionomics, (38) 264.
- embryology, treatise, (34) 362.
- enemies of, (31) 553.
- experimental work with, (38) 659.
- eyeless drone, (40) 759.
- feeding, (37) 467.
- fertile-worker, notes, (27) 865; (30) 759.
- food consumed by, (31) 61.
- formic acid in, (32) 507.
- foulbrood, *see* Foulbrood.
- from west coast of South America, (37) 357.
- handbook, (27) 759.
- in Germany, (33) 296.
- in India, (39) 862.
- Indian, domestication, (37) 855.
- infectious diarrhea of, (37) 360.
- inheritance in, (29) 860; (33) 159.
- insects affecting, (26) 63; (27) 459.
- inspection, (37) 262.
- inspection in Colorado, (27) 756.
- inspection law in Michigan, (31) 554.
- Isle of Wight disease—
  - notes, (37) 360; (39) 768, 869.
  - studies, (27) 458, 761; (29) 761; (40) 65.
- loss from foulbrood and poor management, (28) 450.
- Malpighian tubules of hind intestine, (38) 467.
- manipulation of wax scales, (28) 62.
- mason, notes, (33) 253.
- mason, treatise, (32) 758.
- mating, (38) 659.
- Megachile, pollination of alfalfa by, (31) 831.
- Melipona, dipterous enemies of, (31) 255.
- Moka, notes, (27) 865.
- mouth parts of, (35) 365.
- muscular coat of ventriculus, (40) 760.
- native, of Paraguay, (27) 564.
- new species, descriptions, (26) 63.
- new species from Africa, (39) 566.
- notes, (27) 662; (29) 761; (30) 554; (34) 796.
- odors emitted by, (37) 459.
- of genus Perdita, (39) 566.
- olfactory sense, (34) 758.
- on farms in United States, (31) 167.
- papers on, (38) 256.
- parasites of, (26) 882.
- pollination of—
  - alfalfa by, (31) 134; (39) 661; (40) 264, 760.
  - apples by, (31) 554.
  - cotton by, (40) 458.
  - cranberries by, (26) 858; (30) 143; (31) 741.
  - flowers by, (30) 454.
  - plums by, (36) 536.
  - prunes by, (36) 536.
  - red clover by, (27) 359.
  - sunflowers by, (32) 556.
- prevention of natural swarming, (33) 159.
- protozoa affecting, (26) 457; (27) 459.
- queen—
  - artificial fertilization, (32) 453.
  - candy for, (27) 865.
  - fertilization, (39) 264.
  - mating, (40) 655.
  - notes, (33) 698.
  - rearing, (29) 57; (36) 857; (38) 865; (40) 65, 264.
  - rearing and shipping, (34) 556.
  - relation to fire blight, (35) 662; (36) 59; (38) 164.
  - relation to horticulture, (38) 264.
  - removing from hollow trees, (35) 856.
  - rôle in pollination, (38) 747; (40) 638, 655.
  - rôle in production of beet seeds, (30) 39.
  - scent producing organ, (32) 352.
  - segmentation of abdomen, (40) 170.
  - sense organs on mouth parts, (37) 360.
  - shipment, (40) 760.
  - spider enemies of, (31) 159.
  - swarming, (35) 365.
  - swarming, control, (26) 457.
  - transferring, (35) 467; (39) 566.
  - treatise, (34) 362.
  - usefulness in agriculture, (27) 359.
  - value in coffee pollination, (26) 63.
  - value in horticulture, (32) 853.
- wild—
  - of Iowa, (32) 833.

- Bees—Continued.  
 wild—continued.  
 pollination of alfalfa by, (26) 633.  
 relation of *Nosema apis*, (27) 761.  
 treatise, (35) 468.  
 wintering, (34) 158, 454; (36) 158, 855; (37) 360;  
 (38) 358; (39) 264, 762; (40) 64, 547, 760.  
 wintering in Canada, (36) 58.  
 wintering in Ontario, (38) 564.
- Beeswax—  
 abnormal, notes, (27) 615.  
 analyses, (35) 203.  
 character of samples, (27) 208.  
 methods of analysis, (28) 511.  
 of Philippines, analyses, (36) 711.  
 refractive index, (26) 509.
- Beet—  
 aphid—*see also* Sugar beet root louse.  
 black, parasites of, (31) 757.  
 black, studies, (31) 754.  
 remedies, (29) 454.  
 army worm, *see* *Laphygma exigua*.  
 blight, causes, (27) 544.  
 blight, studies, (34) 349.  
 caterpillar, striped, studies, (29) 455.  
 chips—  
 analyses, (26) 266, 267, 363.  
 dried, methods of analysis, (29) 311.  
 fermenting power, (31) 413.  
 storing with lactic acid ferments, (30) 614.  
 curly leaf disease, studies, (38) 360.  
 disease, new, in northern France, (36) 543.  
 diseases—  
 in Sweden, (28) 847.  
 in Switzerland, (37) 47.  
 notes, (30) 47, 148, 647; (31) 747.  
 studies, (26) 142.  
 treatment, (30) 244; (39) 52.  
 dry rot, artificial infection with, (30) 648.  
 extracts, effect on fat content of milk, (26) 673.  
 fly, *see* *Pegomyia hyoscyami*.  
 foliage, dried, acidity, (35) 770.  
 gummosis, notes, (35) 742.  
 heart rot, notes, (31) 344.  
 juice, clarification, (31) 117.  
 juice, examination, (26) 505.  
 juice, viscous fermentation, (38) 317.  
 leaf diseases, notes, (28) 649.  
 leaf maggot, notes, (28) 752.  
 leaf silage, analyses, (26) 770; (29) 367.  
 leafhopper—  
 host plants, (37) 847.  
 natural enemies, (33) 747.  
 notes, (26) 452.  
 relation to curly top, (33) 743; (34) 646; (39)  
 763.  
 studies, (38) 360; (39) 464, 763.  
 leaves—  
 analyses, (27) 570.  
 dried, analyses, (26) 266, 362.  
 feeding value, (33) 268.  
 fermenting with lacto-pulp, (27) 170.  
 preservation with lactic acid starter, (31)  
 467.  
 meal, analyses, (30) 16.  
 meal, manufacture and use, (29) 161; (30) 15.  
 mildew, notes, (30) 748.  
 molasses, composition and use, (37) 416.  
 nematodes—  
 rearing on agar, (33) 547.  
 review of investigations, (28) 446.  
 studies, (27) 248.  
 plant louse—  
 in northern France, (30) 251.  
 life history, (31) 652.  
 pulp—  
 analyses, (27) 570, 670; (28) 464; (29) 367, 467;  
 (32) 862.  
 as affected by water and vinasse, (27) 210.  
 digestibility, (29) 367.  
 pulp, dried—  
 analyses, (26) 72, 165, 362, 568, 665, 768; (27)  
 371, 570, 774, 872; (28) 265, 364, 464, 669;  
 (29) 270, 570, 666, 769; (30) 67, 68, 169, 371,  
 565, 868; (31) 73, 168, 366, 467, 663; (32) 169,  
 259, 568, 667, 862; (33) 71, 371, 665; (34) 72,  
 169, 263, 371, 467, 566, 665, 767; (35) 373, 374,  
 562, 867; (36) 167, 268, 667, 765; (37) 268, 471,  
 767; (38) 67, 369, 572, 665; (39) 167, 270, 370,  
 773; (40) 72, 571, 665.
- Beet—Continued.  
 pulp, dried—continued.  
 digestibility, (31) 766.  
 feeding value, (33) 783.  
 for cattle, (27) 673; (28) 174.  
 notes, (27) 775.  
 pulp—  
 effect on milk, (28) 674.  
 ensiled v. dried, for oxen, (32) 770.  
 feeding value, (26) 468; (33) 267; (39) 474.  
 fermenting with lacto-pulp, (27) 170.  
 for calves, (39) 382.  
 for dairy cattle, (30) 774.  
 for livestock, (30) 868.  
 moistened, for cows, (34) 773.  
 plain and molasses, for cows, (30) 176.  
 residues for farm stock, (33) 267; (35) 373.  
 root—  
 gummosis, notes, (40) 844.  
 knot, notes, (39) 52.  
 rot, notes and treatment, (27) 47.  
 scab, treatment, (33) 848.  
 tumors, notes, (29) 153.  
 rot, notes, (26) 446, 747.  
 rust, notes, (32) 750.  
 scab, studies, (33) 547.  
 seed—  
 as affected by light, (29) 332.  
 cultivation and harvesting, (26) 42.  
 determination of moisture content, (27)  
 615.  
 from different size seed balls, germination,  
 (31) 232.  
 germination energy of, (29) 332, 538.  
 germination tests, (29) 740; (35) 442; (36)  
 339, 837; (37) 829.  
 germinative ability, (30) 439.  
 growing in Canada, (34) 635.  
 meal, analyses, (26) 714.  
 planting in sectional cylinders, (31) 633.  
 rôle of bees in production of, (30) 39.  
 small, value, (30) 39.  
 soaked, germination, (27) 838.  
 valuation, (33) 135.  
 silage, composition and digestibility, (31) 467.  
 silage, nutritive value, (26) 360.  
 sugar—  
 by-products, analyses, (39) 417.  
 detection in cane products, (36) 112  
 sugar industry—  
 in Europe, (28) 336; (30) 614.  
 1910, (26) 439.  
 1913, (33) 615.  
 Russia, (26) 693.  
 United States, (26) 94; (28) 294, 335  
 (39) 237; (40) 139.  
 notes, (28) 89.  
 sugar manufacture—  
 history, (27) 413.  
 losses in, (26) 116.  
 progress in 1912, (30) 510.  
 treatise, (28) 413.  
 sugar—  
 nitrogen content, (30) 529.  
 products, methods of analysis, (27) 205.  
 products, polarization, (27) 813.  
 ratio of ash to organic nonsugars, (26) 711.  
 raw, raffinose content, (26) 711.  
 v. cane sugar for fermentation purposes,  
 (35) 718.  
 sugarhouse waste, potash from, (37) 817; (39)  
 808.  
 top silage, analyses, (29) 367.  
 tops—  
 analyses and feeding value, (34) 664.  
 and shocked corn, silage from, (28) 873.  
 ensiling with lactic acid bacteria, (32) 567.  
 for dairy cattle, (30) 473.  
 fresh and dried, analyses, (31) 864.  
 tyrosinase, notes, (35) 414.  
 webworm—*see also* *Loxostege sticticalis*.  
 Hawaiian, notes, (29) 456.  
 Hawaiian, studies, (26) 249.  
 notes, (28) 158.  
 southern, studies, (26) 250.  
 spotted, studies, (29) 455.  
 yellows, notes, (35) 245.
- Beetle—  
 larvae, fumigation, (40) 256.  
 mites, synopsis, (37) 858.

## Beetles—

- bark-boring, notes, (26) 456.
- cerambycid, injurious to figs, (26) 147.
- coccinellid—
  - fumigation, (39) 463.
- parasitic on citrus mealybug, (26) 149.
- hydrophilid, new, (40) 265.
- in sugar plantations in Java, (35) 467.
- injurious—
  - in Porto Rico, (34) 753.
  - to babul, (27) 863.
  - coconut palm, (29) 858; (33) 154; (39) 159.
  - cotton in Arizona, (38) 61.
  - fruit and flowers, (36) 654.
  - fruit buds, (35) 363.
  - persimmons, (27) 458.
  - sugar cane, (28) 752; (29) 858.
- longicorn, in Australia, (36) 360.
- of Philippines, (36) 257.
- predaceous—
  - as insect destroyers, (27) 560.
  - packing for shipment, (26) 350.
- respiratory activity in sunlight, (34) 30.
- treatise, (40) 552.

## Beets—

- anomalies in, (35) 436; (37) 28.
- as affected by—
  - fertilizers, (29) 332.
  - smoke and fine dust, (26) 38.
  - spacing, (31) 633.
- as source of alcohol, (36) 508.
- assimilation of carbohydrates by, (26) 626.
- atavistic, composition, (29) 430.
- breeding experiments, (35) 442; (39) 542.
- canning, (39) 165.
- catalytic fertilizers for, (30) 627.
- cell size in, (36) 229.
- characteristics and variations in, (28) 538.
- color zones in, (36) 837.
- combined fungus attacks on, (35) 245.
- composition—
  - and yield as affected by sodium salts, (29) 420.
  - as affected by fertilizers, (28) 124.
  - of offspring of, (29) 833; (31) 529.
- cooperative experiments, (29) 138.
- crude fat of, (28) 201.
- culture, (26) 393.
- culture experiments, (29) 331; (34) 228.
- culture for feeding purposes, (32) 220.
- Cytospora batata attacking, (39) 456.
- determination of marrow content, (26) 117.
- dry matter content, (26) 436.
- effect on—
  - following crop, (32) 223; (40) 624.
  - milk, (34) 671.
  - soil moisture, (34) 17.
- electrical stimulation, (26) 136; (40) 428.
- fermenting power, (31) 413.
- fertilizer experiments, (26) 43, 522, 817, 819; (27) 125, 137; (28) 723, 735; (29) 23, 25, 127, 632; (30) 124, 435; (31) 29, 31, 36, 820; (33) 219; (34) 431, 517, 532, 622, 723; (35) 126, 218, 325, 425, 427, 519; (36) 132, 217; (38) 218, 820; (39) 130.
- field, *see* Mangels.
- fodder, analyses, (26) 267.
- following alfalfa, (39) 130.
- food value, (36) 863.
- for dairy cattle, (34) 873.
- fresh and ensiled, feeding value, (30) 371.
- from same seed ball, characteristics, (31) 633.
- fungicidal treatment, (29) 326.
- genetic studies, (27) 33.
- germination as affected by fertilizers, (29) 327.
- green manuring experiments, (39) 31.
- growth as affected by—
  - fertilizer salts, (29) 329.
  - manganese salts, (32) 725.
  - sulphur, (29) 215.
- hall injury to, (35) 734.
- in silage, (33) 468.
- inheritance of—
  - characters in, (29) 832.
  - form and color in, (29) 332.
  - shortened development, (39) 734.
- inoculation, (29) 326.
- insects affecting, (26) 454; (31) 58; (32) 848.
- invertase in, (34) 524.
- irrigation experiments, (32) 186; (33) 827.

## Beets—Continued.

- leaf growth and sugar formation, relationship, (30) 638; (31) 834.
  - liming experiments, (40) 134.
  - methods of analysis, (31) 18.
  - methods of variety testing, (26) 436.
  - mother, isolation of flower stalk, (33) 832.
  - muck and lime for, (40) 134.
  - mulching v. clean culture, (33) 534.
  - nematodes affecting, (27) 352; (28) 547; (30) 244.
  - nitrogen appropriation by descendants, (29) 832.
  - nitrogen content, (30) 209.
  - phosphatic fertilizers for, (35) 23.
  - plant lice affecting, (28) 354.
  - pollination of sugar beets by field beets, (26) 332.
  - pollination studies, (36) 522.
  - potassium fertilizers for, (26) 526.
  - preservation by pressure, (32) 416.
  - radioactive fertilizers for, (35) 628.
  - reducing sugars in, (36) 731.
  - relative yielding capacity, (40) 625.
  - resistance to cold, (39) 525.
  - root deformation affecting, (27) 544.
  - root systems, (31) 515.
  - Russian, sugar content, (26) 738.
  - seed production of different sizes, (30) 234.
  - steamed, composition and digestibility, (31) 467.
  - steaming and ensiling, (31) 467.
  - storage, formation of invert sugar in, (30) 15.
  - storage, winter, (38) 442.
  - sugar, *see* Sugar beets.
  - sugar content—
    - in relation to weight, (35) 640.
    - of root and character of descendants, (29) 832.
  - sulphur as fertilizer for, (28) 740; (30) 138; (34) 331.
  - top-dressing with sodium nitrate, (32) 223.
  - v. silage for milk production, (34) 670.
  - variability of descendants, (29) 832, 833.
  - varieties, (26) 733; (32) 528; (36) 36, 837.
  - wild, selection experiments, (31) 330.
  - yields, (28) 533.
  - yields in relation to rainfall, (34) 319.
- Befri, culture, (32) 226.
- Beggar weed—
- culture, (30) 335; (32) 226.
  - culture experiments, (30) 229, 632.
  - culture in Philippines, (26) 361.
  - culture under dry farming, (30) 435.
  - hay, analyses, (26) 362.
  - hay, ground, analyses, (34) 767.
  - varieties, (30) 229, 434.
- Beggiatoa spp., investigations, (28) 728.
- Begonia—
- flowers, abnormal, studies, (34) 225.
  - leaf blight nematode, (36) 52.
  - spot disease, notes, (27) 848.
- Behar hairy caterpillar, notes, (27) 54.
- Behenic acid, notes, (31) 312.
- Belah as lignum vitæ substitute, (40) 640.
- Belascaris marginata, studies, (40) 186.
- Belgian League of Family Education, (40) 699.
- Belladonna—
- alkaloids in, distribution, (31) 201.
  - alkaloids in, selection for, (34) 237.
  - alkaloids in, variation, (30) 44.
  - as affected by composition of soils, (34) 18.
  - breeding experiments, (30) 631.
  - breeding for atropin, (37) 44.
  - culture, (36) 538.
  - improvement by selection, (32) 143; (35) 443.
  - leaf miner, *see* Pego-myia hyoscyami.
  - root disease, (40) 844.
  - seed, germination, (32) 626; (37) 545.
- Belle Fourche—
- project in 1917, (40) 391.
  - reservoir as a bird reservation, (37) 355.
- Bellwort, seed formation in, (31) 225.
- Belostoma (=Zaitha) flumineum, death feigning, (27) 457.
- Belts—
- and pulleys, selection, (31) 590.
  - pulling power, (29) 389.
  - transmitting power, (28) 187; (30) 190.
  - use and care, (30) 89, 488.
- Bembex spp., bionomics, (35) 163.
- Bembicini, revision, (40) 234.

- Bengal**—  
beans, destruction of scale insects by, (26) 534.  
grass, culture, (37) 136.  
Veterinary College, report, (26) 578; (31) 177;  
(32) 678.
- Benni seed**, culture experiments, (32) 227.
- Bent grasses**, agricultural species, (39) 532.
- Benteak**, notes, (29) 443.
- Benzaldehyde**—  
determination, (39) 807.  
determination in liquors and cordials, (26) 99.  
manufacture, (36) 300.
- Benzene**—  
derivatives, insecticidal value, (37) 559.  
effect on—  
production of antibodies, (35) 781.  
soil microorganisms, (31) 27.  
soils, (37) 519.  
sterilization of soils by, (32) 816.
- Benzin**—  
locomotive, tests, (30) 388.  
petroleum, as vermifuge, (38) 884.  
petroleum, detection in ethyl alcohol, (29) 312.  
v. turpentine for thinning paint, (33) 91.
- Benzoic acid**—  
aerobic fermentation, (30) 28.  
and guaiacol solution, antiseptic value, (39) 885.  
as acidimetric standard, (28) 206; (31) 501.  
as food preservative, (30) 364.  
detection in cheese, (32) 313.  
detection in coffee, (27) 613.  
detection in fats, (28) 208.  
detection in foods, (27) 715; (28) 411.  
detection in milk, (26) 610; (28) 809.  
determination, (26) 609; (28) 313; (39) 807.  
determination in—  
animal foodstuffs, (35) 112.  
chopped meats, (33) 15.  
prunes and cranberries, (33) 15.  
effect on—  
bread fermentation, (27) 268.  
butter and margarin, (26) 778.  
composition of urine, (31) 761.  
cyanogen formation in plants, (28) 527.  
hemolytic reaction, (36) 878.  
meat, (29) 266.  
metabolism of pigs, (30) 269.  
the animal organism, (32) 164.  
in soils, (30) 610.  
isolation from soil, (37) 710.  
manufacture, (36) 300.  
methods of analysis, (33) 414.  
physiological effect, (27) 365.  
preparation, (39) 803.  
toxicity, (28) 661.
- Benzol**—  
derivatives, bactericidal action of, (31) 279.  
detection in ethyl alcohol, (29) 312.  
injections, effect on formation of antibodies,  
(35) 679.
- Benzyl alcohol**—  
antiseptic value, (40) 884.  
utilization by plants, (36) 329.
- Berberidaceae**, oils and alkaloids of, (36) 628.
- Berecynthus n.spp.**, descriptions, (35) 761.
- Berberi**—  
among English soldiers, eradication, (35) 369.  
among Philippine scouts, (33) 261.  
among Philippine scouts, disappearance, (27)  
66.  
and cottonseed meal poisoning in pigs, (34) 474.  
cause and prevention, (29) 463.  
dietary factors in, (35) 167.  
disease resembling, in rice meal fed pigs, (33)  
775.  
etiology, (26) 264; (28) 168, 185, 569, 763, 764; (30)  
285; (31) 857.  
experimental, studies, (32) 563.  
in Brazil, (34) 462.  
infantile—  
in Manila, (29) 270.  
relation to milk, (30) 861.  
treatment, (34) 662.  
notes, (33) 579; (31) 662; (40) 565.  
prevention, (28) 761; (31) 555, 762, 858; (32) 163;  
(35) 472.  
prevention and treatment, (28) 764.  
relation to—  
bacterial fermentation of rice, (29) 269.  
diet, (26) 264; (29) 180, 460; (30) 367, 764; (31)  
761; (36) 264; (38) 268.
- Berberi**—Continued.  
relation to—continued.  
experimental polyneuritis, (33) 167.  
glands of internal secretion, (33) 365.  
oryzantin, (28) 168.  
rice diet, (27) 461; (28) 360; (32) 67.  
vitamin, (28) 261.  
white flour, (27) 868.  
review of investigations, (34) 462; (36) 161, 363.  
similarity to zeism, (31) 464.  
studies, (26) 155, 871; (29) 664; (30) 63, 687; (31)  
463; (35) 666, 861; (40) 273, 363, 565, 662, 868.  
theory of, (29) 169.  
treatise, (32) 858; (33) 365.  
treatment, (38) 782.  
treatment with constituents of rice polishings,  
(34) 367.
- Bermuda grass**—  
alkali tolerance, (29) 330.  
as forage crop, (31) 829.  
as pasture crop, (37) 533.  
breeding experiments, (40) 624  
culture, (29) 830.  
culture and use, (37) 440.  
culture experiments, (34) 227.  
culture in cotton belt, (32) 534.  
culture in Hawaii, (32) 730.  
distribution, (26) 332.  
eradication, (29) 330; (39) 842.  
for cut-over lands, (39) 231.  
giant, notes, (37) 29.  
hay, chloroform extract of, (31) 71.  
hay, composition, (27) 668.  
hay, digestibility, (27) 669; (31) 863; (37) 168.  
hay, grades of, (34) 528.  
hay, mineral constituents, digestibility, (40) 769.  
notes, (26) 361.  
pasture experiments, (40) 32.  
root system, (36) 438.  
seed, germination tests, (28) 534.  
seed, sulphuric acid treatment, (40) 234.
- Berocera madagascariensis**, notes, (29) 855.
- Berry**—  
anthracnose, description, (31) 449.  
baskets and containers, standards for, (35) 598.  
diseases and pests in Baden, (31) 539.  
diseases, notes, (27) 848; (30) 240, 746; (31) 841;  
(33) 444.  
pigments, notes, (31) 728.  
wine, diminution of acidity in, (29) 117.
- Berries**, see Fruit, small, and Raspberry, Straw  
berry, etc.
- Berseem**—  
as forage plant, (36) 167.  
culture in—  
Egypt, (38) 338.  
India, (39) 230, 238.  
Italy, (39) 238.  
Rhodesia, (27) 32, 637.  
description and use, (30) 733.  
notes, (29) 140.  
varieties, (30) 434; (37) 233.  
yields in Australia, (38) 133.
- Besnoitia besnoiti** n.g., studies, (37) 81.
- Bessey**, C. E., biographical sketch, (32) 599.
- Betain**—  
as affected by microorganisms, (33) 312.  
assimilation by plants, (26) 32.  
effect on inversion of sucrose, (28) 613.  
extraction from molasses refuse, (26) 612; (28)  
413.  
formation in animals and plants, (30) 803.  
in grape leaves, (27) 731.  
hops, (32) 502.  
malt sprouts, (26) 24.  
rice polishings, (33) 167.  
sugar beets, (28) 810.  
tobacco leaves, (28) 109.  
isolation from oat farina, (31) 309.  
localization in plants, (31) 108.  
studies, (26) 713; (27) 203, 204; (28) 312.
- Betel-nut palm**—  
"band" disease, (37) 457.  
culture in North Kanara, (34) 239.

- Bison—see also Buffaloes.
- americanus hybrids, fertility of, (26) 163.
  - europaeus, notes, (27) 371.
- Bispora molinioides, fixation of nitrogen by, (27) 225.
- Biston—
- hirtarius, studies, (34) 63.
  - suppressaria, notes, (26) 61.
- Bittern, little yellow, new subspecies, (39) 860.
- Bitters, judging, (26) 209.
- Bitterweed, toxicity, (38) 883.
- Bitumens—
- and bituminous rock, production in United States, (38) 692.
  - fluid, effect of exposure on, (37) 711.
  - specifications and definitions, (35) 888.
  - tests, (29) 687.
  - use in road construction, (27) 291.
- Bituminous—
- aggregates, toughness, (37) 885.
  - materials—
    - for road making, (28) 186; (35) 390.
    - laboratory manual, (36) 586.
    - methods of examination, (34) 318.
    - testing, (27) 484; (35) 85.
- Blaberus discoidalis, notes, (37) 255, 660.
- Black—
- bean, toxicity, (26) 278.
  - cutworm, see Cutworm, black, and Agrotis.
  - disease of sheep, studies, (39) 686.
  - flies, see Flies, black, and Simuliidae.
  - head fireworm, see Eudemis vacciniana.
  - Hills beetle, notes, (26) 561.
  - knot—
    - biologic forms, (30) 542.
    - description, (30) 750; (31) 151, 449.
    - fungus-host relationship in, (33) 349.
    - notes, (32) 48.
  - lands of Texas, cropping systems for, (26) 331.

- Black—Continued.  
 medic—  
   culture experiments, (40) 136.  
   liming experiments, (40) 322.  
   variety tests, (40) 232.  
 quarter—  
   of cattle and sheep, treatment, (35) 784.  
   organism resembling, (26) 883.  
 root, betains in, (27) 208.  
 rot, chlamydospores of, (28) 152.  
 rot of cruciferous plants, studies, (27) 45.  
 sage, oil of, (33) 202.  
 scale—*see also* *Lecanium oleae*.  
   control by *Isaria*, (33) 858.  
   in California, (38) 157.  
   notes, (27) 155; (30) 853; (32) 56.  
   parasites, importation into California, (30) 753.  
   parasitism of, (26) 556.  
   studies, (26) 554.  
 tongue in dogs, (34) 275, 682.
- Blackberries—  
 acidity, (32) 110; (37) 715.  
 breeding and testing in Minnesota, (40) 148.  
 breeding experiments, (28) 542; (40) 740, 742.  
 cost of distribution, (29) 492.  
 crossing experiments, (33) 44.  
 culture, (31) 441; (32) 141, 639; (34) 42; (38) 246, 643; (39) 242.  
 culture experiments, (28) 436; (38) 41.  
 extracted, sale, (28) 661.  
 fertilizer experiments, (26) 31; (28) 325; (34) 294; (36) 121; (38) 218.  
 for home and commercial planting, (33) 537.  
 Himalaya, notes, (28) 840.  
 inoculation experiments with brown rot fungus, (33) 247.  
 insects affecting, (28) 352.  
 irrigation experiments, (33) 683.  
 picking and packing, (33) 47.  
 preservation by pressure, (32) 416.  
 respiration in gases, (29) 135, 538.  
 sprayed, arsenic on, (38) 55.  
 sterility in, (36) 444.  
 training, (33) 47; (40) 743.  
 utilization, (40) 268.  
 varieties, (28) 542; (37) 243; (38) 246, 643.  
 varieties in Oklahoma, (27) 241.  
 variety tests, (32) 141.
- Blackberry—  
 anthracnose, treatment, (33) 54, 98; (34) 445.  
 bud moth, notes, (28) 355.  
 crown gall, notes, (31) 644.  
 crown gall, studies, (35) 550.  
 diseases, notes, (28) 352; (37) 52; (39) 652; (40) 158.  
 diseases, treatment, (28) 748.  
 double blossom, investigations, (26) 850.  
 juice, preparation, (33) 316.  
 leaf roller, notes, (28) 156.  
 leafhoppers, remedies, (28) 555.  
 Logan, culture, (40) 150.  
 orange rust, notes, (32) 48.  
 orange rust, studies, (37) 457.  
 root borer, giant, notes, (40) 158.  
 rust, notes, (40) 53.  
 rusts, notes and treatment, (29) 50.  
 wine, preparation, (27) 412.
- Blackbird—  
 Brewer, destruction of locusts by, (28) 351.  
 red-winged, environment, life history, and ecology, (32) 151.
- Blackbirds, feeding habits, (28) 450.  
 Blackboys of South Australia, (37) 548.  
 Black-eyed Susan, variation in, (27) 741.
- Blackhead—  
 fireworm, *see Eudemis vacciniana*.  
 in turkeys, (26) 186, 384, 487, 588; (29) 273; (30) 586; (31) 79; (32) 481; (34) 275, 583; (36) 179, 384, 484; (37) 280, 383, 384.  
 in turkeys, etiology, (35) 683.
- Blackleaf 40—  
 insecticidal value, (34) 147.  
 tests, (40) 161.
- Blackleg—  
 atypical, in United States, (34) 276.  
 bacillus and *B. welchii*, resemblance, (38) 587.  
 bacillus, investigations, (31) 579.  
 control in Kentucky, (39) 679.  
 diagnosis, (27) 182; (29) 882; (31) 181, 878.
- Blackleg—Continued.  
 diseases resembling, (31) 181.  
 immunization, (26) 378, 676; (27) 81, 577; (31) 577, 883; (36) 578; (37) 376, 689; (38) 587, 686; (39) 681, 682.  
 in calves, (26) 483.  
 in pigs, (31) 585; (34) 479.  
 in pigs in Pennsylvania, (34) 276.  
 notes, (26) 373; (40) 86, 778.  
 pathological anatomy of, (26) 177.  
 prevalence in Prussia, (27) 181.  
 studies, (26) 883.  
 toxin, concentration, (39) 683.  
 toxin, studies, (40) 884.  
 toxins in, (26) 676.  
 treatment, (39) 188, 587; (40) 84.  
 vaccine, standardization, (40) 381.  
 vaccine, use, (30) 180.  
 vaccines, strength and composition, (36) 180.
- Blackseed—  
 for lambs, (36) 66.  
 for pigs, (36) 68.
- Blacksmiths Fork, Utah, profile survey, (36) 583.  
 Blacksmithing for farms, (27) 484.  
 Blackwood, Bombay, notes, (34) 240.  
 Blady grass, analyses, (27) 68.  
 Blapstinus pimalis, notes, (33) 746.  
 Blarina brevicauda, feeding habits, (32) 54.
- Blarfurnace—  
 dust, *see* Flue dust.  
 gases, loss of potash in, (37) 630.  
 potash from, (36) 625; (39) 118, 121, 625; (40) 128.  
 slag as concrete aggregate, (39) 87.  
 slag, fertilizing value, (37) 126.  
 slag for acid soils, (36) 728.
- (Blastobasis) Halocera iceryaella, notes, (36) 56.  
 Blastogenic characters, inheritance of, (28) 531.
- Blastomycosis—  
 and tuberculosis, (39) 187.  
 cutaneous, in horses, (39) 291.  
 hepatic, in geese, (29) 83.
- Blastophaga—  
 in California, (40) 264.  
 nota n.sp., description, (30) 55.
- Blastothrix britannica, studies, (40) 651.  
 Blastula as affected by spermatozooids, (29) 66.
- Blatella germanica—  
 as a factor in bacterial dissemination, (30) 250.  
 destruction, (38) 558.
- Blattidae—  
 of North America, (38) 258,  
 physiology of digestion, (38) 558; (39) 558.
- Blattotetrastichus, new genus, description, (37) 766.  
 Blau gas for small lighting plants, (28) 788.
- Bleaching powder—  
 disinfection of water by, (34) 885.  
 for use in hot countries, (40) 413.  
 stabilization, (40) 801.  
 use against fly larvae, (34) 160.
- Blepharis edulis analyses and digestibility, (27) 871; (32) 167.
- Blepharocalyx gigantea—  
 oil from, (38) 714.  
 turpentine-like essence from, (38) 447.
- Blepharocorys equi n.sp., notes, (34) 783.  
 Blepharoptera serrata, hibernation, (34) 254.  
 Blepharospora cambivora n.sp., studies, (39) 554.  
 Bletia hyacinthina, glycogen content, (27) 133.  
 Blight, insect carriers of, (34) 648.  
 Blights, horsehair, notes, (35) 244.  
 Blind staggers in horses, (27) 599.  
 Blissus leucopterus, *see* Chinch bug.
- Blister beetles—  
 ash-gray, notes, (38) 358.  
 injurious to potatoes, (33) 352.  
 notes, (27) 53, 452; (28) 351, 653, 654, 752; (29) 252; (33) 746.  
 of Mexico, (30) 757.  
 Say's, notes, (28) 158.
- Blister mite—  
 notes, (26) 147.  
 prevalence in apple orchards, (26) 541.
- Bloat in cattle, treatment, (33) 388, 698; (34) 581.  
 Bloater paste, creatinin content, (31) 760.
- Blood—  
 agar for streptococci, (40) 881.  
 agglutinating capacity and complement fixing power, (28) 375.  
 albumin, digestibility, (37) 673.

Blood—Continued.  
 albumin-globulin ratio in experimental intoxications and infections, (37) 375.  
 anaplasma-like bodies in, (35) 782.  
 and bone meal, analyses, (36) 765.  
 and lymph, amino nitrogen and glucose in, (39) 670.  
 antithrombin in, (33) 280.  
 as affected by—  
   muscular work, (32) 765.  
   nuclein, (26) 482; (27) 577.  
   underfeeding, (26) 360.  
 bacteria, elimination through intestinal wall, (33) 84.  
 bactericidal action, (40) 286.  
 bacteriology, (27) 284.  
 bread, analyses, (33) 865.  
 carabao, studies, (27) 785.  
 catalase, studies, (40) 364, 365, 766.  
 cells—  
   antigenic property, (40) 380.  
   biology of, treatise, (32) 874.  
   of healthy and sick fowls and pigeons, (31) 586.  
   structural transformations, (31) 876.  
 changes—  
   due to method of slaughter, (34) 372.  
   during fasting, (30) 867.  
   induced by feeding, (28) 362.  
 charcoal as purifying agent for arsenic solutions, (33) 110.  
 chlorids, determination, (39) 207, 807.  
 cholesterol—  
   content, (31) 465.  
   determination, (39) 716; (40) 15.  
   studies, (40) 767.  
 circulating—  
   effect of secretin on, (39) 285.  
   tubercle bacilli in, (26) 281; (27) 480; (29) 480; (30) 581, 683, 783; (32) 476.  
 circulation—  
   in man at high altitudes, (33) 366.  
   influence of iodine and sodium iodide on, (40) 274.  
 clot, action of chlorinated antiseptics on, (40) 883.  
 clotting, prevention by hypochlorite solution, (40) 182.  
 coagulation, (37) 177.  
 coagulation—  
   as affected by *Ascaris equorum* (26) 279.  
   by sodium nucleinate, (33) 177.  
   relation to anaphylaxis, (40) 380.  
 composition as affected by dextrose absorption, (28) 867.  
 constituents—  
   morphological, (30) 201.  
   reproduction in immunized horse, (29) 682  
 corpuscles—  
   as affected by poisonous fungi, (30) 879.  
   formalinized, use in complement fixation test, (30) 779.  
 count of cattle at different altitudes, (31) 679.  
 creatin and creatinin in, (40) 274, 765.  
 creatin content, determination, (39) 806.  
 cryoscopy of, (28) 262.  
 culture media from, (36) 676; (37) 220.  
 determination of—  
   fat-cleaving action of, (33) 310.  
   phosphoric acid in, (40) 16.  
   potassium in, (40) 116.  
   urea in, (40) 207.  
   uric acid in, (40) 16.  
 diseases and disturbances, (32) 78.  
 distribution of phosphoric acid in, (40) 176.  
 dried, *see* Dried blood.  
 examination in glands, (34) 81.  
 examination in urine, (30) 201.  
 fat and sugar content as affected by hydrazin, (36) 164  
   content, (28) 67.  
   of anemic dogs, (38) 583.  
   studies, (34) 562, 563; (35) 166.  
 feeding value, (34) 865.  
 fermented, use in bread making, (40) 461.  
 flour, analyses, (29) 467; (33) 371.  
 fluids, rôle in digestion of bacteria and red blood corpuscles, (36) 379.  
 iron content, determination, (39) 507.  
 manganese content, (30) 562.

Blood—Continued.  
 marginal points in, (33) 478.  
 meal—  
   acidity, (35) 770.  
   ammonification and nitrification under laboratory conditions, (30) 218.  
   analyses, (26) 267, 362, 468, 567, 568; (27) 774; (29) 367; (30) 67, 169, 565; (31) 168, 864; (32) 667; (33) 568, 870; (34) 467; (35) 562; (36) 167, 268; (38) 67, 369; (39) 270; (40) 72.  
   composition and feeding value, (36) 369.  
   digestibility, (26) 567.  
   fertilizing value, (34) 24; (35) 126; (38) 422.  
   iron-containing, effect on animals, (29) 671  
   methods of analysis, (29) 311.  
   nitrogen content after feeding, (35) 863.  
   nitrogen, nonprotein, estimation, (39) 111.  
   of animals as affected by castration, (26) 83.  
   Australian animals, (36) 879.

   domestic animals, pathology, (38) 481.  
   fowls affected with leukemia, (29) 285.  
   fowls, sexual differences, (37) 773.  
   insects, studies, (28) 853.  
   laboratory animals, morphology, (28) 777.  
   normal and cholera-infected hogs, (32) 582.  
   pigs, morphology, (37) 380, 381.  
   slaughtered animals as human food, (34) 459.  
   steers, composition, (27) 499.  
   transfused rabbits, agglutinating principle in, (39) 584.  
   tuberculous animals, cell content, (28) 283.  
   various species, amino-acid nitrogen in, (37) 206.  
 origin and significance of ammonia in, (26) 870.  
 parasites of animals, (33) 152.  
 pigment and chlorophyll, relation, (32) 711.  
 plasma and serum, rotation in various animals, (29) 881.  
 plasma chlorids, determination, (39) 807; (40) 714.  
 precipitin test, (39) 207.  
 preparations, immune, making, (31) 479.  
 preservation with formalin, (29) 676.  
 pressure—  
   as affected by physical and mental fatigue (32) 664.  
   raising, (36) 677.  
   treatise, (32) 371.  
 proteins, studies, (36) 778; (37) 375; (39) 388.  
 purin content, (40) 205.  
 reaction of different animal species, (35) 880.  
 reactions, heredity of, (29) 167.  
 rôle in fat metabolism, (39) 671.  
 samples, collecting and preserving, (36) 82.  
 serum, action on—  
   cane sugar, (34) 675.  
   protein of other animal species, (37) 478.  
   sucrose, (35) 483.  
 serum—  
   agglutinins for *Micrococcus melitensis* in, (32) 876.  
   albumin and globulin fractions, (36) 13.  
   antitryptic power, diagnostic value, (29) 477.  
   coagulative and noncoagulative fractions, (37) 177.  
   determination of nonprotein nitrogen in, (40) 310.  
   fertilizing and cytolyzing substance in, (26) 877.  
   hemolysis of, (32) 78.  
   method of obtaining, (38) 181.  
   of cows immunized against tuberculosis, (33) 181.  
   of different animals, (35) 372.  
   primary toxicity, (37) 581.  
   refraction coefficient, (32) 778.  
   yellow pigments of, (31) 274, (32) 18.  
 spectrophotometry of, (29) 408.  
 sugar—  
   as affected by diet, (34) 562; (37) 64.  
   determination, (39) 112, 611; (40) 116, 310, 713.  
   dialysis, (39) 671.  
   treatise, (31) 277.  
 transfusion, use of sodium acetate in, (39) 585.  
 tubercle bacilli in, (31) 83.  
 work, treatise, (26) 174.  
 worms, notes, (28) 158.

- Blossom fly, notes, (32) 651.  
 Blossoms, pollinated, protection, (34) 40.
- Blow flies—*see also* Calliphora spp.  
 life history and remedies, (37) 853.  
 notes, (26) 147.  
 remedies, (34) 359.  
 review of investigations, (29) 656.  
 studies, (33) 157; (37) 665.
- Blow fly—  
 larvae, reaction to light, (36) 256.  
 queen, life history, (30) 656.
- Blue grass—  
 analyses, (27) 68; (32) 171.  
 as affected by companion crop of clover, (37) 438.  
 as forage crop, (31) 829.  
 Australian, culture experiments, (30) 632.  
 billbug, control, (40) 655.  
 composition and digestibility, (36) 469.  
 culture experiments, (29) 631; (32) 431, 528; (33) 33.  
 culture in Kansas, (40) 330.  
 fertilizer experiments, (40) 723.  
 growth on volcanic ash, (32) 36.  
 growth with legumes, (33) 527.  
 hay, ash analyses, (29) 861.  
 history in United States, (36) 529.  
 in pasture mixtures, (39) 130.  
 irrigation experiments, (32) 224.  
 Kentucky—  
   culture experiments, (28) 431.  
   culture in the Ozarks, (29) 427.  
   seeding experiments on ranges, (29) 531.  
 liming experiments, (38) 219.  
 palatability, (34) 865.  
 pasture for lambs, (40) 569.  
 pastures, management, (31) 37.  
 pastures, value of, (35) 868.  
 root systems of, (35) 639.  
 Sclerotium disease, (39) 753.
- seed—  
 adulteration and misbranding, (27) 141; (29) 144.  
 germination tests, (30) 437.  
 harvesting and curing, (34) 830.  
 inheritance of germinability, (31) 834.  
 resistance to desiccation, (40) 40.  
 viability and germinability, (34) 630, 829.  
 seeding on ranges, (30) 35.  
 Texas, culture in Hawaii, (32) 729.  
 Texas, culture under irrigation, (33) 228.  
 yields, (40) 733.
- Blue-gum—  
 oil industry in Nilgiris, (38) 8.  
 plantations of Nilgiris, (29) 443.  
 yield in California, (28) 239.
- Blue—  
 joint, Sclerotium disease affecting, (27) 150.  
 lettuce, eradication, (40) 430.  
 pine bark borer, notes, (26) 351.  
 tongue, immunization, (33) 384.
- Blueberries—  
 breeding experiments, (33) 637; (35) 647; (36) 443.  
 canned, examination, (38) 166.  
 culture, (29) 148; (34) 534; (36) 641; (38) 43.  
 culture experiments, (35) 647; (39) 47, 347.  
 desiccation, (32) 117.  
 dried, analyses, (36) 502.  
 infection with apple maggot, (32) 350.  
 insects affecting, (34) 851.  
 wild, taming, (35) 744.  
 wood structure, (39) 243.
- Blueberry—  
 flea-beetle, studies, (40) 357.  
 wine, preparation, (27) 412.
- Bluebirds—  
 economic importance, (31) 349.  
 feeding habits, (32) 648.
- Bluestone, dosage for sheep, (27) 683; (28) 82.  
 Bluetop grass, culture and use, (33) 632.  
 Bluets as affected by top dressing, (26) 40.  
 Blue-violet rays, notes, (32) 429.  
 Blumea balsamifera, distillation, (27) 210.  
 Boars, wild, susceptibility to infectious bulbar paralysis, (33) 179.  
 Bobolink as a conveyer of Mollusca, (30) 851.  
 Bobwhite, food habits, (39) 860.
- Body—  
 composition, relation to diet and growth, (36) 663.  
 fluids, methods of ash analysis, (32) 114.  
 heat, elimination, (35) 768.  
 lice, papers on, (38) 765.  
 secretion and fluids, man and animal, treatise, (26) 160.  
 surface—  
   and heat production, relation, (36) 64.  
   measurement in man, (34) 68; (36) 64.  
   relation to gaseous exchange, (28) 263.  
 temperature—  
   determination, (26) 466.  
   regulation, (28) 666.  
   rise during marching, (26) 566.  
   variations in, (32) 564.  
 tissues and fluids, salts of, (36) 804.  
 weight and length, relation, (40) 872.  
 weight, variations in different seasons, (31) 661.
- Boehmeria utilis as affected by tobacco smoke, (26) 230.
- Boengkil, fertilizing value, (37) 123.
- Boerhavia pentandra, analyses and digestibility, (27) 871; (32) 167.
- Boettcheria n.g. and n.spp., descriptions, (33) 158.
- Bog—  
 land, reclamation; (35) 215.  
 soils and moss, fertilizer experiments, (40) 135.  
 soils and moss, water table and root growth in, (40) 211.  
 soils, reclamation, (35) 215.  
 water, effect on—  
   plants, (28) 733.  
   plants and biocolloids, (40) 520.  
   Tridescantia root hairs, (29) 523.  
 water, toxicity, (36) 320; (37) 27.
- Bogeria scudderii n.sp., description, (37) 565.
- Boller—  
 compounds, notes, (30) 620.  
 laws in United States and Canada, (34) 588.  
 tests, conducting, (31) 590.
- Boilers—  
 house heating, tests, (31) 489.  
 steam, repairing, (34) 890.
- Bolacothrips sp., notes, (28) 452.
- Bolax sp. (?) on bamboo, (32) 352.
- Boletus—  
 edulis—  
   composition, (30) 804.  
   effect on red blood corpuscles, (30) 879.  
   harmful effects of, (31) 558.  
   histidin betain in, (31) 203.  
   nitrogenous constituents of, (28) 501.  
   scaber fuscus n.sp., description, (31) 127.  
   spp. on tree roots, (37) 756.
- Bolitophila cinerea, notes (33) 253.
- Boll weevil, *see* Cotton boll weevil.
- Bollworm, *see* Cotton bollworm.
- Bolly refuse, feeding value, (40) 366.
- Bologna, detecting horse meat in, (28) 615.
- Bolometer, description, (30) 368.
- Bolts, charts for estimating strength, (35) 87.
- Bomb—  
 calorimeter, adiabatic device for, (34) 168.  
 calorimeter, construction and operation, (27) 667.  
 calorimetry, corrections in, (33) 265.
- Bombias henshawi n.sp., description, (28) 758.
- Bombidae—  
 notes, (34) 362.  
 of the New World, (28) 758; (30) 59, 754.
- Bombus—  
 auricomus, life history, (38) 564; (40) 170.  
 n.spp., descriptions, (28) 758.  
 nesting habits, (40) 655.  
 paper on, (38) 256.  
 spp., parasites of, (28) 662.  
 spp., pollination of red clover by, (27) 359.
- Bombycilla garulla, synopsis of races, (40) 351.
- Bombycine moths of North America, monograph, (32) 850.
- Bombycomorpha—  
 bifascia, larval habit, (31) 752.  
 bifascia, notes, (28) 557.  
 pallida, notes, (36) 654.
- Bombyx mori, *see* Silk worm.
- Bonasa umbellus—  
 coccidiosis in, (26) 187.  
 notes, (27) 355.

Bonavist, notes, (26) 362.

**Bone—**

- amount of in meat animals, (31) 564.
- analyses, (29) 626; (31) 624; (37) 268.
- ash, feeding value, (40) 371.
- boiled, use on pastures, (26) 437.
- char, analyses, (38) 626.
- charcoal, fertilizing value, (31) 139.
- charcoal, methods of analysis, (31) 806.
- chewing disease, notes, (32) 374.
- chop, analyses, (36) 765.
- cracked, analyses, (29) 769; (34) 371; (35) 373.
- degelatinized, fertilizing value, (35) 428.
- dissolved, fertilizing value, (38) 527; (39) 625.
- dust, fertilizing value, (27) 337; (31) 139; (38) 519.
- effect of calcium nourishment on, (32) 465, 764.
- feeds, analyses, (38) 369.
- fertilizing value, (29) 129; (35) 219.
- flour, steamed, fertilizing value, (27) 535.
- granulated—
  - analyses, (31) 569; (36) 268, 765; (38) 368.
  - for fowls, (31) 569.
- ground—
  - analyses, (26) 568, 819; (29) 367; (31) 126; (35) 128; (36) 268; (37) 219; (38) 369.
  - effect on soil acidity, (28) 137.
  - fertilizing value, (33) 722; (37) 626.
  - for pig feeding, (40) 772.
  - nitrification of (31) 724.
- growth, abnormal, in absence of functioning testicles, (26) 471.
- growth as affected by food poor in phosphorus, (31) 69.
- manures, fertilizing value, (29) 737.
- meal—
  - analyses, (26) 325, 362, 665; (27) 872; (28) 265, 364, 523, 627; (29) 769; (30) 67, 565; (31) 366, 663; (32) 169, 259; (33) 568; (34) 263, 371, 467, 665; (35) 374, 867; (36) 667; (37) 471; (38) 67; (40) 571.
  - as affected by calcium carbonate, (26) 428, 527.
  - availability as affected by fineness, (32) 125.
  - decomposition by Streptothrix, (27) 620.
  - effect on composition of bone, (33) 171.
  - fertilizing value, (26) 426; (27) 337, 639, 835; (28) 42, 816; (29) 319, 418, 519, 829; (30) 25, 230, 721, 839; (31) 518, 820; (33) 131; (35) 220, 629; (36) 425; (37) 743; (38) 217, 517, 519, 527, 619; (39) 25, 127, 438, 625, 814.
  - for moor soils, (39) 438.
  - steamed, fertilizing value, (34) 219, 519; (39) 220; (40) 218.
  - steamed, for arid soils, (34) 621; (36) 726.
  - sterilized, detection, (27) 812.
  - use on peat soils, (37) 135.
  - utilization by oats and lupines, (31) 733.
  - utilization in different soils, (30) 221.

- nutrition and growth of, (30) 366.
- pathogenic disturbance due to phosphorus deficiency, (32) 561.
- precipitate, fertilizing value, (26) 622.
- products, analyses, (35) 562.
- products and manures, handbook, (30) 221.
- residual effects, (37) 23.
- steamed and unsteamed, fertilizing value, (30) 126.
- unsteamed, importance of grinding, (30) 126.

**Boneblack—**

- analyses, (35) 128.
- dissolved, effect on soil acidity, (28) 137.
- dissolved, fertilizing value, (33) 723; (35) 220; (37) 626; (39) 25.

**Bones—**

- breaking strength, (28) 271.
  - chemistry of, (28) 201.
  - export from India, (33) 327.
  - purin content, (40) 205.
  - use as human food, (34) 659.
- Bonito, salt pickled, analyses, (28) 359.
- Book lice, fumigation, (39) 161.

**Bookkeeping—**

- for farmers, (26) 595; (27) 794; (28) 191; (30) 793; (31) 293, 299; (32) 893; (33) 92, 893.
- principles of, (32) 494.
- textbook, (29) 792.

Books, insects affecting, (26) 354; (28) 159.

**Books on—**

- agaves, (33) 131.
- agrarian matters, (29) 391.
- agrarian system in England, (32) 793.
- agrarianism, (31) 93.
- agricultural—
  - and forest products in British West Africa, (26) 189.
  - arithmetic, (30) 197, 795; (36) 597.
  - associations of Mohammedans of Maghreb, (30) 593.
  - bacteriology, (30) 631.
  - chemistry, (27) 109.
  - colleges, (36) 791.
  - commerce, (34) 595.
  - commerce in France, (31) 596.
  - cooperation, (26) 92; (28) 487, 790; (29) 89, 188, 595; (30) 191, 693; (31) 389, 593; (32) 792; (33) 694; (38) 190, 191.
  - cooperation in Denmark, (40) 689.
  - credit, (26) 594; (28) 389; (32) 892; (33) 294, 393, 787; (34) 595, 894; (37) 391, 888.
  - development policy of British Empire, (40) 686.

## Books on—Continued.

- building construction, (31) 386.
- bulbs, (26) 337; (31) 743; (32) 143; (35) 450; (36) 643.
- bumblebees, (28) 562.
- Burbank, Luther, (34) 440; (37) 342.
- Burbank's plant breeding work, (32) 143.
- butter, (31) 468; (40) 283.
- butter industry in United States, (35) 278.
- butter making, (26) 275, 778; (38) 281.
- butter making on the farm, (33) 577; (37) 175.
- butterflies, (27) 558; (34) 552; (38) 260.
- butterflies and moths, (37) 353.
- butterflies of Australia, (34) 453.
- cabbage, (37) 543.
- cacao, (26) 47; (30) 533, 712, 741; (32) 235, 745; (39) 448, 544; (40) 158.
- cacao culture, (28) 542.
- cacao culture in Bahia, (33) 240.
- cacao products, (29) 312.
- California Redwood Park, (29) 44.
- calorimetric methods, (26) 872.
- camp cookery, (38) 469.
- candy making, (29) 60; (31) 558; (32) 253, 560.
- cane sugar factories, chemical control in, (37) 509.
- cane sugar manufacture, (29) 432; (35) 114; (38) 508.
- canned foods, (30) 613.
- canning, (35) 717; (39) 317, 716.
- canning—
  - and drying, (39) 208, 718, 808.
  - and preserving, (36) 113; (38) 114.
  - of fruits and vegetables, (36) 717.
  - preserving, and pickling, (32) 253.
- carbohydrate metabolism and internal secretions, (30) 380.
- carbohydrates, (30) 610.
- carbohydrates and glucosids, (28) 710.
- carbon bisulphid as an insecticide, (34) 249.
- carburation, (31) 785.
- carinations, (26) 139, 337; (27) 41; (28) 438; (31) 743; (34) 44; (38) 44.
- carinations, perpetual flowering, (39) 449.
- carob, (37) 747.
- casein, (29) 312.
- cassava, (40) 435.
- castor oil plant, (40) 234.
- castration of animals, (33) 176; (34) 477.
- catalysis, (29) 504; (34) 312; (35) 801.
- catalyzers, biochemical, (32) 662.
- caterpillars, (31) 850.
- cattle, (27) 277; (28) 769; (30) 170; (31) 468; (34) 467; (39) 673, 881.
- cattle—
  - Aberdeen-Angus, (33) 72.
  - ancestry, (28) 466.
  - diseases, (26) 485; (34) 477, 478.
  - feeding and dairying, (32) 258.
  - feeding and management, (37) 172.
  - Guernsey, (40) 179.
  - Hereford, (33) 73.
  - industry in Württemberg, (28) 873.
  - judging, (27) 571.
  - measurements, (27) 675.
  - Moravian, (26) 268.
  - raising, (29) 368.
  - raising on western ranges, (29) 666.
  - Shorthorn, (35) 169; (39) 673.
- cecidia of central and northern Europe, (26) 658.
- cellulose, (30) 202; (37) 112; (39) 614.
- cellulose chemistry, (28) 312.
- cement and concrete, (35) 289.
- cereal foods, (36) 560.
- cereals, (34) 598.
- cereals and forage crops, (30) 696.
- cereals, ground, in the diet, (29) 564.
- cheese, (26) 479.
- cheese, Camembert, (37) 176.
- cheese making, (28) 475; (40) 283.
- chemical—
  - analysis, (27) 609; (29) 203, 307, 506; (30) 309; (31) 803; (34) 711; (35) 11; (37) 310, 614, 802.
  - calculations, (36) 411.
  - constitution and physiological action, (36) 411.
  - French, (39) 418.
  - German, (40) 709.
  - industry, electrolysis in, (40) 109.
  - mixing, stirring, and kneading, (27) 14.
  - pathology, (32) 78; (39) 79.
  - technology, (27) 14; (29) 413.

## Books on—Continued.

- chemicals, (38) 810.
- chemistry, (27) 107, 205, 806; (28) 407; (29) 792, 801; (30) 309, 310, 610, 695, 707; (32) 801; (34) 407, 599; (35) 8; (37) 108; (39) 8, 501, 607; (40) 10, 109, 308, 408, 709, 801.
- chemistry—
  - agricultural, (30) 10, 309; (32) 501; (35) 501; (37) 598, 801.
  - analytical, (32) 501.
  - applied analytical, (40) 10.
  - colloid, (34) 801; (38) 309, 501; (40) 408.
  - household, (30) 63; (32) 558, 854; (34) 458.
  - industrial, (29) 107.
  - inorganic, (40) 801.
  - of plant products, (31) 803.
  - of the farm and home, (36) 692.
  - of urine, (26) 809.
  - organic, (31) 309; (32) 109; (34) 801; (40) 408, 709.
  - physiological, (26) 201; (31) 361; (34) 563, 607; (35) 311; (40) 109, 308.
  - physiological and pathological, (29) 267.
  - technical, (32) 308; (34) 801.
- Chenopodium quinoa, (39) 610.
- cherries, (32) 338; (36) 641.
- cherries of New York, (33) 439.
- children, care and feeding, (40) 560.
- children, care, diet, and common ills of, (30) 260.
- chlorid of lime in sanitation, (29) 512.
- chlorophyll, (30) 311.
- chrysanthemums, (28) 543; (37) 44; (40) 540.
- church and country life, (36) 92.
- churches, country, (31) 391; (32) 388; (33) 190.
- chymology, (31) 265.
- cinchona, (33) 343.
- citrus fruits, (30) 444; (33) 441; (35) 448; (38) 446.
- citrus fruits, wild and cultivated, (39) 142.
- climate, (39) 16.
- climate—
  - and weather, (28) 211.
  - and weather of San Diego, California, (31) 21.
  - of France, (36) 510.
  - of Switzerland, (27) 15.
- climatic changes, (32) 417.
- climatic changes in arid America, (31) 509.
- climatology, (26) 613.
- cloth making, (40) 899.
- clothing, (36) 497.
- clothing and health, (36) 396.
- clover, (29) 140.
- Coccidae, (28) 556.
- cocoa and chocolate, (26) 662, 710.
- coconut culture, (39) 449; (40) 247.
- coconuts, (27) 146; (29) 840; (31) 239; (32) 236, 339; (36) 445; (37) 345.
- coffee culture, (39) 449, 846.
- coffee culture in Java, (31) 639.
- coffee culture in Uganda, (30) 741.
- coffees of Dutch East Indies, (30) 43.
- cold storage, (33) 892.
- Coleoptera of British India, (29) 57, 358.
- colic in horses, (32) 584.
- colics and their treatment, (31) 382.
- colloidal solutions, (36) 108; (37) 501.
- colloids, (32) 308; (33) 801; (35) 501.
- colloids in biology and medicine, (27) 881.
- color in relation to chemical constitution, (40) 505.
- color standards in biology, (29) 762.
- commercial geography, (28) 298.
- concrete, (28) 186; (36) 188, 285; (37) 590.
- concrete—
  - construction, (27) 484, 645; (31) 186; (32) 188; (35) 390.
  - construction inspection, (30) 487.
  - on the farm, (38) 87, 291.
  - reinforced, (27) 688.
  - roads, (30) 386, 589.
- condiments chemistry, bacteriology, and technology, (32) 588.
- conifers, (26) 642.
- conifers of British Isles, (28) 843.
- conifers of central Europe, (30) 742.
- cooking, (26) 66, 261; (27) 461, 868; (28) 259, 493, 566, 863; (29) 61, 362, 464, 661, 766; (30) 259, 365, 462, 559, 560, 763, 862; (31) 259, 260, 557, 857; (32) 255, 358, 394, 495, 558, 662, 763; (33) 165, 662, 753; (34) 395, 794; (37) 94, 894; (38) 167, 469, 567, 568; (40) 693, 899.
- cooking, army, (37) 63, 166.

## Books on—Continued.

- cooking, Chinese, (40) 560.  
 cooking, French, (32) 662.  
 cooperage, (29) 644.  
 cooperation in Russia, (39) 191.  
 cooperation, industrial, (29) 594.  
 cooperative finance, (28) 790.  
 corn, (31) 331, 898; (34) 529; (37) 94.  
 corn among Indians of the upper Missouri, (39) 738.  
 corn and sorghum, (30) 635.  
 corn culture, (27) 640; (29) 830; (32) 228, 434, 829.  
 corn culture for school children, (38) 93.  
 cost of living, (30) 559; (32) 662; (33) 694; (38) 392; (40) 173.  
 cost of living in Portugal, (39) 191.  
 cotton, (26) 190, 332, 437, 535; (28) 631; (29) 738; (31) 525, 735; (32) 434; (33) 433; (35) 230, 639.  
 cotton—  
   as a world power, (36) 894.  
   boll weevil, (31) 457.  
   bollworm, pink, (40) 856.  
   culture, (30) 831.  
   culture in Egypt, (30) 527.  
   forecasting yield, (39) 191.  
   statistics, (34) 595, 691.  
   trade, (31) 690.  
 country churches, (29) 190, 294.

 country homes, (40) 486.  
 country life, (28) 687, 692; (39) 299.  
 country towns, (36) 238.  
 cow-testing associations, (26) 169.  
 creamery practice, (30) 271, 275.  
 crop production, (32) 393.  
 crops, (28) 298, 493, 632; (36) 692.  
 cultivation, (29) 329.  
 cultivation, ridge method, (28) 632. ●  
 cyanamid, (29) 518.  
 cypresses, (33) 49.  
 daffodils, (32) 143; (34) 741.  
 dahlias, (29) 441; (36) 743.  
 dairy—  
   and food laws of Minnesota, (30) 877.  
   bacteriology, (27) 74; (30) 378, 677; (32) 577.  
   cattle, (37) 574.  
   chemistry, (32) 501.  
   farming, (40) 590.  
   laboratory exercises, (37) 872.  
   laboratory work, (31) 792.  
   practice, (30) 271.  
   technology, (28) 878.  
 dairying, (26) 78, 574, 674; (27) 176; (28) 176; (29) 93, 775; (31) 76, 173, 395, 475, 494, 694; (32) 173, 258, 291; (34) 670; (35) 378; (37) 94, 172, 894.  
 dairying in Australasia, (28) 878.  
 Dalmeny Experiment Station, work, (31) 516.  
 dams and weirs, (35) 288.  
 dams, earth, (29) 289.  
 Darwinism, (27) 175.  
 dates, (30) 238.  
 deer breeding, (29) 171.  
 dew ponds, (33) 806.  
 diagnosis, (36) 412.  
 diagnostic methods, (27) 284.  
 diet, (26) 262; (27) 269; (29) 267, 360, 661; (30) 259, 463; (32) 561; (37) 469; (40) 68, 561, 659, 865, 866.  
 diet—  
   and dietetic therapeutics, (35) 858.  
   and hygiene in schools, (29) 363.  
   cookery, and hygiene in schools, (31) 261.  
   of working women in Boston, (38) 64.  
   uric-acid-free, (31) 361.  
 dietaries for institutions, (40) 866.  
 dietetics, (26) 658; (28) 257; (29) 163; (31) 557, 859.  
 digestion as affected by emotions, (33) 566.  
 Diptera, (34) 654.  
 Diptera, Danish, (33) 263.  
 disease transmission by flies, (30) 552.  
 diseases, infectious, (27) 76.  
 diseases of wild animals, (34) 576.  
 disinfection, gaseous, (26) 173.  
 dissection of domestic animals, (26) 578.  
 dog diseases, (36) 183.  
 dog medicine and surgery, (32) 783.

## Books on—Continued.

- dogs and cats, parasites and diseases, (31) 586.  
 drafting, (31) 592.  
 dragonflies, (39) 558.  
 drainage, (26) 588; (33) 585, 586; (35) 788; (37) 587.  
 drug analysis, (34) 713.  
 drugs, (26) 277; (39) 884.  
 dry farming, (28) 393; (32) 430; (40) 823.  
 ducks, Indian Runner, (30) 873.  
 dyestuffs, (39) 506.  
 earth pressure, retaining walls, and bins, (35) 786.  
 earths, rare, and their acids, (30) 205.  
 earth work haul and overhaul, (30) 487.  
 earthworms, (28) 451.  
 economic associations of rural Poland, (31) 690.  
 economic conditions in Serbia, (40) 791.  
 economic cycles, (35) 496.  
 edaphon, (30) 323.  
 education, (33) 596.  
 eggs, preparation, (37) 668.  
 electric heating, (37) 387.  
 electrical engineering, (29) 893.  
 electricity—  
   agricultural, (26) 893.  
   for the farm, (27) 388; (30) 589; (33) 690.  
   relation to vegetation and agricultural products, (27) 231.  
 electrochemistry, (26) 818.  
 embryology of chicks and pigs, (29) 371.  
 engineering, (29) 289.  
 engineering—  
   formulas and memoranda, (32) 188.  
   highway, (27) 189; (30) 289; (34) 586.  
   river and canal, (32) 481.  
   structural, (33) 487.  
 engines, (31) 385.  
 engines—  
   gas, gasoline, and oil, (34) 287.  
   gasoline, (29) 86; (32) 788.  
   internal combustion, (29) 184; (31) 92, 590.  
 entomological nomenclature, (27) 551.  
 entomology, (27) 898; (28) 451; (29) 555, 853; (30) 745, 851, 852; (31) 349; (38) 93, 357.  
 entomology—  
   agricultural, (35) 355.  
   economic, (32) 56; (33) 652.  
   medical, (32) 846.  
   medical and veterinary, (34) 850.  
 enzymes, (28) 202; (32) 19, 662; (39) 110.  
 enzymes, chemistry, (30) 409.  
 equitation, (28) 269.  
 essence industry, (35) 717.  
 eucalypts, (30) 447; (39) 146, 351.  
 eucalyptus culture, (27) 442.  
 evolution, (26) 365, 470; (28) 876; (33) 552; (37) 432, 573.  
 exercise in education and medicine, (34) 261.  
 farm—  
   accounting, (29) 792; (31) 293; (32) 494; (33) 92, 893; (39) 496.  
   and forest, (26) 391.  
   and school problems for high schools and normals, (34) 793.  
   boys and girls, (26) 899.  
   buildings, (26) 894; (27) 892; (28) 290, 487; (29) 186, 689; (31) 291; (35) 587; (36) 891; (37) 90, 789.  
   buildings and machinery, (26) 686.  
   business arithmetic, (33) 899.  
   crops, (30) 133; (35) 593.  
   crops, feeding of, (34) 326.  
   economics, (30) 795.  
   equipment, (37) 388.  
   equipment in Minnesota, (31) 93.  
   houses, (28) 188; (31) 591.  
   leases, (35) 589.  
   life, (29) 598.  
   management, (28) 789; (31) 494; (32) 393.  
   management and credit, (39) 689.  
   mortgages, (36) 688.  
   motors, (31) 186.  
   practice, (35) 93.  
   science, (40) 295.  
   shop work, (33) 792.  
   woodwork, (35) 298.  
 farmers, organization, (40) 193.

## Books on—Continued.

- farming, (26) 298, 691, 693; (29) 293; (30) 141, 193; (31) 787; (32) 291, 429; (34) 635, 796; (35) 696, (36) 897; (37) 290; (38) 297; (39) 89; (40) 95; 193, 589, 590.
- farming—  
costs, determination, (40) 192.  
in China, Korea, and Japan, (26) 290.  
in England, (33) 93; (38) 192.  
in England, war-time, (40) 790.  
intensive, in India, (32) 131; (39) 834.
- fats and oils, edible, (26) 258.
- fats, oils, and waxes, (31) 201.
- fauna of America, (27) 855.
- fauna of British India, (37) 54, 765.
- fauna of Hawaii, (29) 250.
- faunas of natural regions of the globe, (31) 846.
- Federal Farm Loan Act, (39) 89.
- Federal farm loan system, (36) 688.
- feeding—  
farm animals, (28) 465, 898; (30) 67; (31) 563; (37) 94, 795.  
infants and young children, (26) 763.  
school children, (33) 364, 864.  
stuffs, (28) 265.  
the poorer classes, (33) 166.
- feeds and feeding, (26) 164; (34) 261, 565; (37) 767.
- fences, gates, and walls, (33) 291.
- fermentation, alcoholic, (29) 714; (34) 318.
- fermentation processes in breweries, distilleries, and yeast factories, (29) 509.
- ferments, (30) 77, 311, 610.
- ferments, defensive, of the animal organism, (31) 278; (32) 270.
- fertilizer industry, (36) 124, 817.
- fertilizers, (26) 84, 124, 725; (27) 123, 327; (29) 193, 213, 517; (31) 323, 517; (33) 398; (34) 23, 29; (36) 119; (37) 724; (38) 119; (39) 724; (40) 421.
- fertilizers and crops, (27) 218.
- fertilizers and manures, (30) 24.
- fertilizers for truck crops, (29) 837.
- fiber plants, (30) 436; (34) 829.
- fibers, (40) 333, 435.
- fibers, textile, chemical technology of, (32) 308.
- field crops, (28) 493; (31) 791; (40) 622.
- field crops—  
culture in Russia, (35) 636.  
for the cotton belt, (36) 897.  
of India, (33) 526.
- field management and crop rotation, (33) 429.
- flavoring compounds, (33) 164.
- flavoring extracts, (28) 863.
- flax culture, (33) 133, 731.
- flax, culture and preparation, (40) 827.
- flax culture in Argentina, (34) 434.
- feas, (30) 554.
- flies, (30) 552.
- flies, bloodsucking, in relation to disease, (33) 560.
- flora of—  
northwest coast of United States, (34) 336.  
southeastern Washington and adjacent Idaho, (31) 731.  
the Northwest, (30) 521; (32) 898.  
vicinity of New York, (33) 429.  
western United States, (38) 732.
- floriculture, (34) 535, 836.
- flour milling, (29) 263.
- flour, starch, bread, etc., methods of analysis, (32) 505.
- flower gardens, (29) 239; (33) 738, 899; (35) 345, 745.
- flowering plants, (26) 35.
- flowers, (30) 238; (31) 35, 143; (37) 145, 630, 746.
- flowers—  
in California, (31) 837.  
of the woods, (33) 541.  
of western United States, (33) 842.  
shrubs, etc, in California, (33) 441.  
wild, (35) 450.
- food, (33) 364; (39) 195, 567, 614, 768, 899.
- food—  
accessories, (29) 265.  
adulteration, (26) 65, 355.  
analysis, (29) 204, 506; (30) 710; (33) 206; (34) 506, 610, 713; (37) 508.  
and drug laws in United States, (29) 266.  
and drug legislation, (32) 65.  
and Drugs Act decisions, (32) 254.

## Books on—Continued.

- food—continued.  
and household management, (31) 298.  
and nutrition, (30) 63; (36) 396, 497; (38) 661.  
and sanitation, (32) 659.  
bacteriological examination, (38) 11.  
beverages, and toilet accessories, (32) 162; (36) 63.  
chemistry, (29) 598; (32) 854.  
chemistry, bacteriology, and technology, (32) 558.  
conservation, (38) 94; (40) 659.  
in war time, (38) 662.  
industries, (32) 658.  
inspection, (28) 259; (33) 67.  
materials and condiments, (30) 763.  
preparation and service, (32) 65.  
preservation, (29) 264; (40) 808.  
products, source, chemistry, and use, (32) 353.  
reforms, modern, (32) 66.  
requirements, appetite, and hunger, (31) 859.  
selection, (36) 762.  
statistics, (40) 765.  
supply of Germany, (29) 162; (40) 561.  
supply of Great Britain, (29) 162; (36) 290.  
tables, (38) 469.  
values, (36) 663.
- foods, (26) 65, 261, 355; (27) 207, 270, 365, 567, 868; (28) 163; (29) 360, 412; (37) 94, 166, 894; (40) 173, 361, 459, 559, 795.
- foods and candies, (31) 856.
- foods in the home and market, (31) 68.
- foods, wild, of Great Britain, (40) 360.
- foot-and-mouth disease, (35) 280.
- forage crops, (28) 632; (34) 593.
- forage plants and their culture, (32) 827.
- forest—  
fire control, (39) 352.  
flora of Bengal, (26) 49.  
flora of New South Wales, (39) 145.  
insects of Central Europe, (32) 151.  
insects of India, (32) 351.  
law in America, (37) 836.  
mensuration, (33) 298.  
physiography, (26) 338.  
policy of France, (33) 541.  
products of India, (27) 541.  
protection, (31) 143.  
surveying, (26) 644.  
trees and timber supply of China, (33) 50.  
valuation, (32) 840.
- forestry, (26) 140, 338, 542, (27) 41, 42, 95, 444, 598; (28) 193, 544, 644; (30) 44, 146, 742; (31) 49, 640; (32) 46, 692; (35) 240, 346, 543, 648, 841; (36) 242, 596; (37) 243; (38) 751; (39) 50; (40) 151.
- forestry—  
for high schools, (33) 298.  
for rangers and woodmen, (36) 446.  
in Great Britain, (27) 646; (36) 143.  
New England, (27) 646.  
Pacific Northwest, (26) 49.  
Tunis, Algeria, and Corsica, (37) 650.  
terms, (31) 840.
- forests, national, (39) 648.
- forests of the Far East, (30) 45.
- forests, protection against animals, (35) 851.
- fowls, anatomy, (37) 772; (40) 483.
- fowls, Campines, (33) 273.
- foxes, (31) 770.
- fresh-water biology, (30) 554.
- fruit—  
and vegetables, conservation, (36) 615.  
culture, (26) 45, 741; (29) 837; (31) 394; (32) 337; (34) 533; (37) 41, 544; (38) 446.  
diseases, (37) 151.  
growing, (33) 438, 639; (39) 543.  
marketing, (36) 443.  
propagation, (36) 140.
- fruits, (27) 344, 439.
- fruits—  
drying, (40) 615.  
for cider and perry making, (28) 437.  
of California, (27) 439; (31) 836.  
of Hawaii, (26) 741.  
of Ontario, (31) 336.  
preserved, (28) 258.  
small, (37) 544, 648.  
tropical and subtropical, (27) 645.

## Books on—Continued.

fungi, (27) 149, 329, 727.  
 fungi and lichens of Great Britain, (27) 25.  
 fungi of Japan, (38) 426.  
 fungicides, (31) 517.  
 fur, (34) 570.  
 fur-bearing animals, (40) 646.  
 fur farming, (27) 774; (29) 672.  
 fur farming in Canada, (32) 870.  
 fur trade, (26) 772.  
 furs and skins, home manufacture, (38) 13.  
 galls of plants, (26) 242.  
 game and fish laws of various States and of Canada, (30) 153.  
 game animals, (33) 77.  
 game, fish, and forestry laws, (32) 150.  
 game protection and propagation in America, (30) 153.  
 garden—  
   architecture, (31) 536.  
   crop manuring, (31) 336.  
   design, (31) 239, 743.  
   furniture and accessories, (37) 746.  
   insects, (40) 649.  
   ornaments, (36) 644.  
   plans, (35) 841.  
   plants, diseases and pests, (39) 444.  
 gardening, (26) 47, 298, 337, 393, 538, 693, 899; (27) 41, 442, 842; (28) 538, 642, 838; (29) 42, 341, 441, 495, 840; (30) 40; (31) 140, 142, 143, 236, 239, 340, 532, 791; (32) 232; (33) 398, 898; (34) 39, 340, 345, 635, 833, 836; (35) 36, 444, 445, 741; (36) 535, 639, 693, 743, 744; (37) 94, 145, 543, 645, 742; (38) 39, 94, 344, 842; (39) 139, 240, 245, 899; (40) 245, 340, 444, 536, 638, 640.  
 gardening—  
   for little girls, (38) 297.  
   in city backyards, (33) 540.  
   in Saxony, (26) 842.  
   indoor, (30) 238.  
   market, (36) 639.  
   ornamental, (33) 143, 442; (34) 238, 345, 535; (35) 42, 648; (36) 142, 143, 639, 643, 644; (37) 145, 346, 746.  
   ornamental, in Europe, (30) 644.  
   tropical, (32) 45.  
 gardens in America, (35) 345.  
 gardens, Italian, (33) 644.  
 gardens, mountain, (34) 45.  
 gas cooking, heating, and lighting, (33) 753.  
 gas engines, (28) 84, 384; (30) 487; (36) 287, 587.  
 gaseous exchange of animals and man, (36) 266.  
 genetics, (28) 876; (30) 264; (31) 70; (34) 563; (39) 671.  
 genetics and eugenics, (40) 274.  
 genetics, laboratory course, (40) 693.  
 geography, (31) 793.  
 geology—  
   agricultural, (36) 617.  
   engineering, (32) 784; (35) 489.  
   in relation to agriculture and sanitation, (30) 212.  
 ginseng and golden seal, (27) 346.  
 glycosuria and allied conditions, (30) 277.  
 glycosuria and diabetes, (32) 474.  
 goats, (34) 270.  
 gooseberries, (30) 42.  
 grain and feeding stuffs drying, (27) 669.  
 grain, forage, and pasture crops, (29) 530.  
 grain inspection in Canada, (33) 228.  
 grain production in Switzerland, (40) 525.  
 grains, (27) 638.  
 grains, small, (35) 593.  
 granger movement, (30) 693.  
 grape berry moths, (34) 553.  
 grapes, (27) 539; (30) 43.  
 grapes, history and culture, (33) 736.  
 grasses, (29) 139; (32) 133.  
 grasses, British, (40) 525.  
 grasshoppers, (38) 359.  
 green manure farming, (26) 425, 817.  
 green manures and manuring in the Tropics, (37) 28.  
 greenhouses, (38) 39.  
 ground levels in democracy, (34) 796.  
 ground water supply, (32) 685.  
 grouse, (26) 146.  
 growth and form, (40) 566.  
 guinea pigs, (30) 874; (37) 775.  
 hardwoods of central Europe, (31) 538.

## Books on—Continued.

hay, (28) 829.  
 hay tonnage tables, (33) 228.  
 heather burning for grouse and sheep, (40) 667.  
 heating and ventilation, (29) 390.  
 hematology, (38) 481.  
 herbs, (26) 239; (36) 743.  
 herbs, culinary, (28) 259.  
 heredity, (26) 161, 272, 365; (28) 876; (31) 466; (33) 869.  
 heredity—  
   and development, (30) 564.  
   eugenics, (28) 271.  
   evolution, (29) 665.  
   sex, (30) 767.  
   vigor, (35) 371.  
   in horses, (30) 269.  
   in plants, (26) 325.  
 hides and skins, (27) 775.  
 histology, (26) 876; (29) 676.  
 histology, pathologic, (36) 674.  
 home economics, (26) 394, 597; (28) 461, 566, 795; (29) 162, 266, 496; (30) 763; (31) 495, 760; (32) 65, 394, 495; (33) 495, 598; (34) 293, 794; (36) 497; (37) 396; (40) 296, 899.  
 home economics—  
   and school lunches, (36) 598.  
   instruction in France, (34) 899.  
   teaching equipment, (36) 396.  
 home grounds, (34) 238; (37) 44, 346.  
 honey chemistry, (29) 109.  
 horse diseases, (30) 285; (34) 477, 794; (37) 784; (39) 85, 190, 492.  
 horses, (26) 269, 369, 571, 668, 770, 875; (27) 471, 772, 875; (28) 269; (29) 573; (30) 174; (31) 169, 269, 470; (34) 268, 668, 794, 869; (37) 770; (38) 274.  
 horses—  
   Belgian draft, (26) 76; (27) 72.  
   breaking and training, (32) 263.  
   dissection of, (33) 87.  
   Percheron, (37) 771.  
   trotters and pacers, (33) 571.  
   v. motor power for farm and transportation, (29) 388.  
 horseshoeing, (27) 476; (29) 292, 682; (31) 488, 887; (32) 185; (36) 182.  
 horticulture, (27) 644; (29) 193; (31) 532; (32) 436; (33) 899; (36) 137.  
 horticulture, elementary, (40) 795.  
 horticulture in America, (39) 541.  
 horticulture, tropical, (30) 532.  
 hotbeds and cold frames, (35) 445.  
 house flies, (28) 560; (29) 656; (33) 561; (34) 855; (35) 57.  
 house plants, (37) 346.  
 house plants and flowers, (26) 744.  
 house sanitation, (28) 566.  
 household—  
   accounting, (40) 659.  
   chemistry, (40) 493.  
   finance, (40) 796.  
   insects, (32) 449.  
   mechanics, (36) 891.  
   thrift, (40) 96.  
   wastes, disposal, (34) 790.  
 housekeeping, (27) 96; (28) 599, 763.  
 housekeeping conditions among "Pennsylvania Germans," (34) 257.  
 housing and town planning, (31) 293.  
 housing in rural districts, (33) 893.  
 hunger control in health and disease, (36) 363.  
 hydraulics, (27) 385; (28) 288, 588; (31) 537; (35) 786; (37) 584.  
 hydroelectric power, (36) 783; (37) 287.  
 hydrogen ion concentration, (32) 801.  
 hydrogenation of oils, (32) 416.  
 hygiene, (26) 65, 386; (28) 78, 461; (30) 63, 763; (40) 694, 866, 899.  
 hygiene and sanitation, military, (34) 369.  
 Hymenoptera, (26) 352.  
 ice cream, (33) 65.  
 ice cream and ices, (34) 860.  
 ice cream manufacture, (38) 281.  
 Ichneumonidae of Great Britain, (34) 657.  
 ichneumons of Great Britain, (27) 359.  
 illumination, dark ground, (26) 82.  
 immune serums, (26) 579.  
 immunity, (26) 481, 676; (27) 76; (32) 578; (35) 73.

## Books on—Continued.

- immunology, (34) 275; (37) 76.
- incubation and brooding, (29) 373.
- incubation periods of birds, (37) 774.
- Indian chutneys, pickles, and preserves, (32) 560.
- infant feeding, (40) 560.
- infant feeding and metabolism, (34) 460.
- infection—
  - and immunity, (30) 878; (35) 573; (38) 482, 781.
  - and resistance, (32) 270; (39) 679.
  - immunity, and specific therapy, (33) 476.
- insect pests, (39) 255.
- insect pests of orchards, (33) 856.
- insect wings, (40) 351.
- insecticides, (31) 517.
- insecticides, fungicides, and weed killers, (29) 341.
- insects, (26) 552, 752; (27) 452, 551; (28) 553, 745; (31) 155; (33) 153, 495, 745; (34) 651; (38) 256, 761; (40) 255, 351, 647, 795.
- insects—
  - forest, (27) 554.
  - habits and instincts of, (32) 846.
  - harmful and beneficial to man, (33) 856.
  - in relation to disease, (26) 658; (30) 455.
  - injurious, (36) 355; (37) 395.
  - injurious in Great Britain, (36) 853.
  - injurious in Italy, (35) 460.
  - injurious to fruit, (31) 849.
  - injurious to grapes, (33) 652.
  - injurious to man, (37) 156, 760.
  - injurious to man in war, (34) 251.
  - instinct, (29) 52; (40) 255.
  - knowing through stories, (40) 795.
  - of California, (28) 853; (33) 553, 652.
  - central Europe, (35) 254.
  - Costa Rica, (38) 358.
  - Great Britain, (38) 557.
  - North America, (33) 652.
  - South India, (34) 549.
  - Uganda, (39) 656.
  - Victoria, (26) 147.
  - psychic life, (40) 647.
- internal secretions, (26) 264.
- irises, (26) 841; (28) 743.

- medicines, patent and proprietary, (40) 182.
- Mendelism, (38) 367.
- metabolism and energy of men, (32) 663.

## Books on—Continued.

- metabolism, chemistry of, (35) 765.  
 meteorology, (27) 11 5; (29) 615; (32) 24; (34) 13;  
 (35) 808; (36) 509.  
 meteorology and weather forecasting, (26) 513.  
 meteorology of Brazil, (37) 619.  
 methyl alcohol, (28) 511.  
 microbes and toxins, (26) 373.  
 microbiology, (26) 372; (27) 223, 575; (31) 177;  
 (35) 593; (37) 76.  
 microbiology of infectious diseases of animals,  
 (32) 474.  
 microchemistry, (29) 801.  
 microchemistry of plants, (30) 310.  
 microorganisms, (30) 133, 379.  
 microorganisms—  
   and fermentation, (27) 204.  
   pathogenic, (26) 677; (32) 78; (38) 480.  
 microscopical technique, (26) 82.  
 microscopy of vegetable foods, (35) 503.  
 mildews, rusts, and smuts of Great Britain,  
 (30) 745.  
 milk, (26) 171, 779; (31) 468; (32) 660.  
 milk—  
   analysis, (32) 312.  
   and cream testing and grading, (26) 578.  
   and dairy products examination, (26) 111.  
   and its hygienic relations, (37) 174.  
   and its products, (28) 176, 276, 373, 473, 674;  
   (34) 380, 611.  
   and its products in the home, (33) 899.  
   chemistry, (31) 413.  
   condensed, and milk powder, (31) 375; (40)  
   283.  
   desiccated, (29) 777.  
   examination, (40) 376.  
   hygiene, (29) 877; (30) 276; (31) 676; (38) 280.  
   laboratory guide, (34) 571.  
   pasteurization, (36) 274.  
   production cost accounts, (36) 271.  
   products, (37) 777.  
   supply, (26) 478.  
   supply of cities, (37) 174, 874.  
   supply of Massachusetts, (37) 372.  
   supply of Paris, (36) 572.  
   testing, (29) 206; (33) 298.  
 milling and baking, (35) 859; (40) 863.  
 mimicry, (31) 57.  
 mimicry in butterflies, (37) 55.  
 mineral deposits, (30) 719.  
 molds, bacteria, and yeasts, (27) 727.  
 moor culture, (27) 638; (31) 620.  
 moorland pastures and meadows, (31) 830.  
 moose and elk, (38) 53.  
 mosquito control, (39) 867.  
 mosquito control in Panama, (35) 855.  
 mosquitoes, (26) 251; (28) 455.  
 mosquitoes, anopheline, of India, (26) 349.  
 mosquitoes of North America and West Indies,  
 (29) 357; (34) 453; (37) 762.  
 motor cultivation, (31) 488.  
 motors and dynamos, (29) 892.  
 mules, (31) 470.  
 mushrooms, (34) 532, 761.  
 mushrooms of Minnesota, (27) 528.  
 mutation in living beings, (26) 472.  
 mutation in plants, (34) 629.  
 mycology and plant pathology, (38) 147.  
 mycology of water supplies and sewage, (30) 418.  
 mycoses, (27) 882.  
 myriapods, (30) 256.  
 natural history of the farm, (32) 493.  
 natural science technique, (32) 625.  
 natural selection, (31) 865.  
 nature sketches in temperate America, (26) 346.  
 nature study, (26) 297, 298; (28) 298, 897; (29),  
 495; (33) 95, 397; (34) 599; (38) 196; (40) 898.  
 Nematocera of British India, (29) 57.  
 nitrogen—  
   atmospheric, fixation, (29) 417; (31) 822.  
   atmospheric, synthetic fixation, (32) 217.  
   atmospheric, utilization, (30) 26.  
   metabolism of bacteria, (39) 110.  
 nucleic acids, (32) 201.  
 nutrition, (26) 658; (28) 567, 569; (29) 266; (31)  
 262, 263; (33) 662; (34) 658; (35) 268; (38) 468,  
 661; (40) 554.  
 nutrition and clinical dietetics, (39) 567.  
 nutrition and diet, (30) 463.  
 nutrition of farm animals, (38) 268.

## Books on—Continued.

- nutritional physiology, (40) 463.  
 oil analysis, (39) 207.  
 oil and fat analysis, (29) 811.  
 oil seeds and feeding cakes, (34) 565.  
 oils and fats, (39) 411, 504.  
 oils and fats, hydrocarbon, (30) 313.  
 oils, fats, and waxes, (34) 507; (39) 8; (40) 804.  
 oils, volatile, (30) 310, 710.  
 oleomargarine, (31) 176.  
 olive diseases, (39) 457.  
 onion culture, (33) 837.  
 ophthalmology, (27) 284; (29) 377.  
 orange culture, (37) 835.  
 orchard renovation, (27) 241.  
 orcharding, (32) 394.  
 orcharding on rough lands, (26) 440.  
 orchids, (27) 41; (34) 741.  
 organic compounds, (34) 312.  
 orientation in ants, etc., (33) 563.  
 osier culture, (30) 347.  
 osiers and willows, (31) 49.  
 osmotic pressure, (30) 310; (40) 801.  
 ostrich breeding, (26) 772.  
 ostriches, (30) 472, 874.  
 outdoor work, (26) 298.  
 palms, (28) 542.  
 paper technology, (26) 316.  
 parasitic amebae in man, (26) 375.  
 parasitology, (26) 174; (30) 536, 654; (31) 177.  
 parasitology—  
   of domestic animals, (26) 882.  
   of man and domestic animals, (32) 777.  
 parks, (36) 743.  
 partridges, (27) 774.  
 pastures, Alpine, (26) 130.  
 pathological technique, (26) 276; (40) 676.  
 pathology, (27) 576; (28) 178; (29) 174; (31) 276.  
 pathology and anatomy of man and animals,  
 (32) 270; (33) 476.  
 pathology, special, (36) 378.  
 pavement specifications, (29) 387.  
 pavements and paving materials, (31) 385.  
 peach culture in North America, (30) 42.  
 peach growing, (40) 149.  
 peaches of New York, (38) 42.  
 peat and peat moors, (34) 618.  
 peat litter, (34) 624.  
 peat moors and water powers with reference to  
   air nitrogen, (32) 820.  
 pellagra, (36) 763.  
 Penicillium, (31) 327.  
 peonies, (37) 145.  
 perennials, (27) 645.  
 perennials and herbaceous borders, (29) 840.  
 perennials, hardy, (35) 345.  
 pets, (28) 173; (38) 776.  
 pharmacognostic tables, (32) 79.  
 pharmacology for veterinarians, (29) 580.  
 pheasants, (35) 275.  
 phosphates, (33) 126.  
 phosphates, inorganic, of soils, (27) 21.  
 phototropism of plants, (39) 223.  
 Phylloxerae, (27) 859.  
 physical-chemical tables, (29) 107, 201.  
 physics of household, (33) 364.  
 physiology, (26) 659; (34) 777.  
 physiology—  
   and metabolism of growth, (26) 658.  
   chemical, (37) 501.  
   comparative, (33) 168.  
   human, (29) 767.  
   nutritional, (28) 763.  
   of invertebrates, (31) 154.  
 phytopathology, (39) 352.  
 picotees, carnations, and pinks, (26) 139.  
 pig clubs, (40) 96.  
 pig diseases, (32) 83, 277, 378; (40) 88, 783.  
 pigeons, (30) 696; (31) 76; (32) 265; (33) 173.  
 pigs, (26) 668; (27) 470; (28) 769; (29) 872; (30)  
 871; (31) 470, 769; (32) 262; (33) 172, 791; (34)  
 268; (37) 769.  
 pigs, large white English, (36) 371.  
 pine-barren vegetation in New Jersey, (36) 539.  
 pine, yellow, (31) 444.  
 pinks, (32) 440.  
 Pinus, (31) 743.  
 Plant—  
   alkaloids, (29) 503; (31) 409.  
   anatomy, (33) 724.

## Books on—Continued.

## plant—continued.

- anatomy, physiological, (31) 728; (36) 46.
- and animal life, (28) 897.
- bases, (31) 10.
- breeding, (26) 43, 325; (28) 736; (31) 131; (32) 220, 425, 430, 822.
- breeding in Scandinavia, (29) 636.
- classification, (29) 216.
- culture, (28) 235; (35) 499.
- diseases, (26) 51, 142, 242; (27) 746; (28) 345, 745; (29) 150, 546, 644; (30) 240, 347, 745; (31) 241, 539, 745; (33) 646; (34) 49, 794; (36) 540, 645; (39) 148; (40) 47.
- diseases and injuries, tropical, (32) 340.
- diseases and pests, (35) 835; (36) 236.
- distribution by ocean currents, (38) 125.
- exploitation, (40) 524.
- galls, (26) 658; (30) 852.
- genetics, (40) 817.
- plant growth—
  - and soil conditions, (34) 321.
  - and soils, (39) 512.
  - as affected by smelter fumes, (28) 623.
- plant—
  - histology, (34) 727.
  - kingdom raw materials, (36) 628.
  - life, (31) 32; (35) 128.
  - life and evolution, (26) 528.
  - microchemistry, (32) 308.
  - names, (38) 125.
  - nutrition, (34) 135, 326.
  - nutrition and manuring, (36) 114.
  - parasites, (31) 539.
  - pathology, (36) 645.
  - physiology, (27) 219; (31) 323; (32) 520; (33) 425; (36) 429; (37) 220; (38) 728.
  - poisons and stimulants, inorganic, (33) 327.
  - propagation, (35) 642; (38) 539.
  - propagation and breeding, (37) 795.
  - propagation and pruning, (30) 236.
  - stimulation, (27) 331.
  - succession, (37) 434.
  - teratology, (36) 430.

## plantains, (26) 47.

## plants, (29) 420.

## plants—

- alimentary and medicinal, (34) 533.
- aromatic, (33) 643.
- biology of, (30) 429.
- climbing, (34) 741.
- colonial, (33) 437; (36) 142.
- cultivated of East Indies, (30) 697.
- economic, of Dutch East Indies, (30) 521.
- economic, of New Caledonia, (30) 445.
- herbaceous, (27) 346.
- house, (34) 238, 836; (35) 450.
- in health and disease, (36) 628.
- irritability of, (30) 429.
- of Connecticut Valley in Massachusetts, (29) 216.
- ornamental, (37) 746.
- ornamental, of central Europe, (30) 742.
- poisonous, (26) 327.
- poisonous to livestock in Great Britain, (37) 688.
- tropical, (33) 221.
- tropical and subtropical, (31) 235.
- useful, (33) 96.

## plumbing, (35) 690.

## plumbing, country practice in, (33) 590.

## poisons, (26) 373.

## pollination by insects, (40) 655.

## ponies, (31) 470.

## ponies, Welsh, (31) 170.

## population, Malthusian theory, (34) 594.

## potash industry, (26) 316.

## potato culture, (40) 36, 439, 828.

## potato diseases of Australia, (30) 48.

## potatoes, (28) 738; (33) 531; (37) 533, 543, 645; (38) 235.

- poultry, (26) 270, 473, 669; (27) 72, 73, 572, 674; (28) 270, 470, 673; (29) 69, 193, 371, 573; (30) 270, 572, 696; (31) 270, 474, 568; (32) 173, 570; (33) 77, 173, 473, 598; (34) 269, 377, 470; (36) 597; (37) 769, 775; (40) 177, 280, 693.

## poultry—

- breeding and management, (36) 668.
- diseases, (30) 687; (33) 681; (34) 280, 481, 881; (35) 284, 379; (39) 393.

## Books on—Continued.

## poultry—continued.

- feeds and feeding, (28) 769.
- for fighting and pit purposes, (30) 175.
- houses, (27) 793; (29) 689; (31) 88, 893.
- houses and appliances, (26) 188, 591; (38) 190.
- keeping, (35) 93.
- power for the farm, (29) 688.
- preservation of fruits and legumes, (29) 116.
- preserving and canning, (39) 317, 716, 808.
- preserving and pickling, (39) 614.
- preventive medicine and hygiene, (38) 882.
- protein—
  - anaphylaxis, (32) 79.
  - and humin substances, (34) 708.
  - chemistry, (29) 408.
  - in the diet, (28) 567.
  - metabolism, (28) 167.
  - split products in relation to immunity and disease, (30) 379.
- proteins, (26) 801; (27) 803; (31) 607; (39) 801.
- proteins, physical chemistry, (38) 708.

## Books on—Continued.

- yeasts, bacteria, and molds, (27) 727.  
zebras, (28) 269.  
zebu cattle, (38) 69.  
zoological philosophy, (33) 552.  
zoology, (26) 163, 652; (30) 52, 248.  
zoology, economic, (33) 652; (38) 456.  
zootechy, (26) 873; (30) 170, 174.
- Boophilus**—  
annulatus, *see* Cattle tick.  
annulatus var. microplus, in Australia, (30) 82.  
decoloratus, relation to anaplasmosis, (26) 585.
- Borate buffer mixtures**, hydrogen electrode potentials of, (35) 801.
- Borax**—  
as food preservative, (30) 364.  
as growth stimulant for hemp, (33) 432.  
in fertilizers, effect on corn, (40) 322.  
larvicidal value, (34) 359.  
toxicity, (28) 661.  
use against fly larvae, (31) 654; (34) 160.
- Bordeaux mixture**—  
acid and alkaline, (38) 153, 154, 756; (39) 151, 548.  
adhesiveness, (27) 847.  
analyses, (27) 441; (31) 49, 142; (33) 47; (34) 436, 639; (37) 243; (39) 240.  
application to under side of grape leaves, (26) 450.  
as citrus spray, (33) 649.  
as spray for rubber trees, (35) 459.  
as sugar cane dip, (27) 448.  
as summer spray for apples, (33) 46.  
calculating values, (40) 45.  
chemistry and fungicidal action, (28) 552  
composition, (32) 544; (34) 540.  
copper content, (34) 748.  
decomposition, (35) 352.  
effect on—  
apples, (28) 47.  
leaf transpiration, (38) 126.  
plants, (32) 243.  
potatoes, (26) 53; (27) 151, 237, 738; (28) 433, 434; (31) 643, 825; (33) 40; (36) 147.  
sugar content of saps, (30) 647.  
transpiration, (39) 828.  
transpiration from abscised leaves and potted plants, (36) 454.  
factors affecting efficiency, (28) 537; (31) 50.  
fungicidal action, (30) 399; (32) 545.  
fungicidal value, (31) 439, 541; (33) 648; (34) 147; (35) 39; (37) 447; (38) 235, 454; (39) 348, 651; (40) 747.  
homemade, tests, (33) 549.  
inert and active ingredients of, (26) 658.  
injurious to apples, (27) 440.  
investigations, (33) 151.  
methods of analysis, (32) 296.  
mixing plant, description, (33) 358.  
modified, for grape mildew, (28) 152.  
neutral and alkaline, (40) 252.  
notes, (35) 46.  
physico-chemical studies, (31) 802; (32) 242.  
physiological effects, (28) 247.  
precipitation membranes, (27) 154.  
preparation, (26) 539; (30) 153, 197; (32) 243; (39) 251, 548, 851; (40) 746, 748, 801.  
preparation and analyses, (34) 711.  
preparation and use, (26) 843; (27) 254; (33) 449, 639; (34) 643; (35) 646; (36) 16, 353; (39) 854; (40) 748, 750.  
spraying celery with, (40) 155.  
spraying v. dusting, (33) 336.  
stains, removal, (35) 644.  
studies, (36) 548.  
tests, (27) 439, 440; (28) 48.  
use, (32) 632.  
use with lead arsenate, (38) 258.  
v. lime-sulphur mixture for potatoes, (35) 831.  
wetting capacity, (27) 753.  
wetting power, increasing, (29) 850.
- Bordorite mixture**, fungicidal value, (40) 747.
- Borecole**, notes, (26) 835.
- Borers**—  
flat-headed, notes, (28) 653; (36) 554; (37) 566.  
injurious to timber, (29) 761.  
of Java, (34) 656.  
pin hole, studies, (31) 852.  
rearing, (26) 59.

## Boric acid—

- antiseptic and germicidal value, (37) 176.  
as butter preservative, (28) 277.  
as fish preservative, (29) 659.  
as food preservative, (30) 364.  
as milk preservative, (32) 414.  
detection in cheese, (32) 313.  
detection in milk, (32) 414.  
determination, (33) 804.  
determination in foods, (32) 506.  
determination in presence of magnesium chloride, (29) 609.
- effect on—  
butter and margarin, (26) 778.  
development of fungi, (28) 444.  
growth of plants, (31) 325.  
metabolism of *Aspergillus niger*, (30) 630.  
milk, (33) 577.  
sugar beets, (31) 233.  
fertilizing value, (27) 327, 628.  
in foods, (36) 466.  
in honey, (27) 410.  
insecticidal value, (34) 359.  
powdered, fertilizing value, (28) 735.  
solution, effect on potatoes, (27) 748.  
stimulation of radishes, (39) 730.
- Boring machine for stumps**, (31) 486.
- Borna disease in horses**, studies, (26) 786; (28) 783; (29) 587.
- Bornetina corium**, notes, (29) 752.
- Borocera madagascariensis**, studies, (27) 456.
- Boron**—  
compounds, nitrogen fixation by, (29) 822; (32) 125.  
determination in organic matter, (32) 206; (33) 713.  
effect on—  
crops and distribution, (39) 429.  
development of corn, (33) 522.  
plant growth, (29) 219; (31) 126; (32) 121; (34) 428, 625.  
wheat, (38) 22.  
wheat and barley, (36) 520.  
fertilizing value, (27) 128, 500; (28) 34.  
in animals, (28) 370; (30) 168.  
in milk and eggs, (30) 168.  
toxic effect on plants, (33) 327; (38) 629.
- Bos**—  
orthoceros, studies, (28) 467.  
primigenius, notes, (27) 371.  
primigenius, perfect skull, (27) 870.  
sub. hybrid, notes, (28) 68.  
taurus brachyceros, notes, (28) 767.  
taurus hybrids, fertility of, (26) 163.  
urus minutus n. sp., description, (26) 768.
- Boscia** spp., analyses and digestibility, (32) 167.
- Boston Chamber of Commerce**, floor rules, (26) 792
- Bostra** sp., notes, (28) 555.
- Bostrichidae**—  
feeding habits, (26) 151.  
notes, (26) 759.
- Bostrychus**—  
gibbicollis, lead-boring, (39) 467.  
monachus, notes, (29) 652.
- Boswellia serrata**—  
gum-oleo-resin, (40) 248.  
products, manufacture and composition, (35) 317.  
tapping experiments, (29) 43.
- Botanic**—  
gardens—  
in the Tropics and Subtropics, (28) 820.  
of British Guiana, (32) 236; (35) 643.  
Saharanpur, report, (27) 537.  
station—  
and experiment plats, Montserrat, report (26) 534.  
in Honduras, report, (33) 438.
- Botanical**—  
activity in District of Columbia, (40) 726.  
cross section of northern Mississippi, (29) 513.  
features of African deserts, (30) 223.  
features of Algerian Sahara, (29) 626.  
geography, meteorological observations in (31) 614.  
literature in Washington, D. C., libraries, catalogue, (26) 38.  
research at Carnegie Institution, (27) 428; (30) 223; (32) 429; (33) 220; (36) 327; (37) 524, 630.

## Botany—

- agricultural, course in, (37) 795.
- American, unification, (40) 817.
- and phytopathology, relationship, (34) 48.
- bibliography, (26) 596, 629; (27) 31; (29) 327, 626; (30) 223.
- course for high schools, (28) 298.
- economic, investigations, (33) 741.
- elementary course in, (38) 795.
- in agricultural colleges, (32) 393.
- international catalogue, (35) 29; (37) 630.
- laboratory guide, (32) 520.
- lexicon, (32) 219.
- of Hawaii, (29) 239.
- of southern Patagonia, (34) 306.
- relation to scientific agriculture, (38) 697.
- taxonomic, of Washington, D. C., and vicinity, (37) 435.
- taxonomic, scope and relations, (35) 730.
- textbook, (26) 227, 596; (27) 328, 423; (30) 520; (31) 425; (36) 429; (38) 728; (39) 222; (40) 898.
- treatise, (28) 820; (30) 428; (33) 27; (37) 220, 818.
- tropical, guide, (28) 435.
- yearbook, (34) 494.
- Botflies—see also Horse and Sheep botflies.**
- in Argentina, notes, (27) 259.
- notes, (29) 454; (36) 456.
- paper on, (40) 259.
- relation to pernicious anemia in horses, (33) 681.
- studies, (38) 83; (40) 458, 858.
- Botfly, new, from reindeer, (30) 457.**
- Bothrioccephalus latus, life cycle, (38) 783.**
- Bothriocraera flavipes n.g. and n.sp., description, (35) 857.**
- Bothynoderes punctiventris, notes, (31) 654.**
- Botor tetragonoloba, notes, (36) 340.**
- Botrydiplodia—**
- chamaeropsis, studies, (31) 746.
- nonvalidity of genus, (34) 242.
- sp. on coconut, (38) 758.
- sp. on oaks, (34) 448.
- theobromae, notes, (31) 55; (34) 849; (36) 852; (37) 252, 253; (38) 52, 53, 759.
- Botryomyces of the udder in mares, (31) 184.**
- Botryorhiza hippocrateae n.g. and n.sp., notes, (37) 552.**
- Botryosphaeria—**
- berengeriana—
- induced sporulation in, (36) 752.
- notes, (39) 459, 553.
- studies, (35) 850.
- treatment, (37) 632.
- fuliginosa—
- injurious to cotton, (26) 341.
- notes, (28) 648.
- marconii n.sp., description, (32) 146.
- minuscula n.sp., notes, (37) 148.
- ribis, treatment, (28) 748.
- Botrytis—**
- alli studies, (38) 450.
- anthophila n.sp., description, (30) 538; (36) 748.
- bassiana, notes, (27) 56; (28) 354; (32) 63.
- blight of goldenseal, (39) 853.
- cinerea—see also Grape gray rot.
- cultures, cytase in, (39) 247.
- notes, (40) 347, 847.
- on conifer seedlings, (40) 545.
- on peony, (40) 844.
- studies, (39) 854.
- detection in fruit tissue, (39) 248.
- effusa n.sp., notes, (26) 757.
- effusa n.sp., studies, (27) 456.
- on flowers, (37) 47.
- parasitica—
- introduction into United States, (36) 245.
- notes, (26) 851.
- on tulips, (39) 653, 858.
- treatment, (35) 51.
- relation to Sclerotinia fuckeliana, (39) 250.
- rileyi, description, (33) 459.
- sp. affecting dahlias, (30) 151.
- sp. affecting strawberries, (31) 645.
- sp., notes, (28) 552.
- sp. on crated strawberries, (35) 458.
- sp. on fig, (38) 454.
- sp. on geranium, (39) 857; (40) 249.
- sp. on greenhouse tomatoes, (36) 250.
- sp., relation to potato stem lesions, (39) 649.
- spp., notes, (29) 243, 650; (33) 56.
- spp., studies, (26) 448.

## Botrytis—Continued.

- unusual spore forms of, (26) 243.
- vulgaris, notes, (27) 252; (30) 51, 349, 749.
- vulgaris, studies, (29) 753; (33) 55.
- Bots—**
- cottontail, notes, (35) 756.
- head and throat, of American game animals, (37) 565.
- in cattle, notes, (31) 98.
- of horses, studies, (39) 81, 156, 189, 686.
- Bottle—**
- collecting, description, (34) 751.
- tree, Victoria, crown gall affecting, (28) 447.
- Bottling—**
- establishments, law in Ohio, (33) 662.
- works, inspection in Indiana, (34) 861.
- Botulism—**
- antitoxic serum, (39) 788.
- due to canned goods, (37) 669, 670; (38) 208; (40) 558.
- immunization, (39) 388.
- in man, notes, (38) 383.
- isolation of organism, (39) 788.
- notes, (37) 165.
- relation to limber-neck in chickens, (36) 681.
- studies, (33) 866; (40) 176.
- Botys silacealis, life history and remedies, (28) 857.**
- Bouchea pinnatifida, analyses and digestibility, (27) 871; (32) 167.**
- Bouillon—**
- bacteriological, new, (40) 180.
- cubes—
- analyses, (30) 257; (34) 761.
- composition and nature, (30) 162, 163.
- examination, (31) 656, 854.
- making and judging, (31) 554.
- notes, (31) 658.
- Bouillons, bacteriological, analyses, (40) 310.**
- Bourletia horticola affecting soy beans, (30) 753.**
- Bouteloua—**
- gracilis, culture experiments, (30) 632.
- oligostachya, seeding on ranges, (30) 35.
- spp., botanical studies, (26) 830.
- Bovidae in British Museum, (30) 767.**
- Bovie potentiometer, value, (38) 284.**
- Bovotuberculol, diagnostic value, (26) 180.**
- Bovovaccine—**
- use against tuberculosis, (32) 183.
- von Behring's, tests, (29) 884.
- Bowfin, use as a food, (38) 468.**
- Bowlders, blasting, (26) 591; (32) 85.**
- Box—**
- brush, strength and elasticity tests, (27) 43.
- cecidomyiid, notes, (30) 233.
- elder aphid, notes, (38) 257.
- elder aphid, studies, (38) 560.
- elder borer, notes, (26) 59.
- elder, poisoning of cows by, (37) 80.
- leaf midge, notes, (34) 752.
- leaf miner, fumigation experiments, (33) 859.
- leaf miner, notes, (30) 154; (32) 245.
- scale, notes, (28) 854.
- Boxes, packing, tests, (28) 843.**
- Boxwood—**
- leaf miner, European, (36) 551.
- leaf miner in California, (34) 64.
- leaf miner, notes, (40) 754.
- midge, remedies, (39) 362.
- Boy Scouts—**
- farm colony for, (28) 497.
- of Michigan, (28) 99.
- Boys—**
- agricultural club champions in 1913, (30) 999.
- agricultural clubs—
- formation, (28) 792.
- in Maine, (33) 697.
- Massachusetts, (30) 597.
- Michigan, (30) 794.
- Oklahoma, (36) 94.
- Pennsylvania, (31) 393.
- West Virginia, (31) 297.
- notes, (29) 394, 395; (33) 599.
- agricultural competition, (33) 196.
- and girls—
- agricultural clubs, (28) 194.
- club contests in Canada, (38) 297.
- clubs, notes, (28) 395.
- on the farm, (26) 299.
- city, agricultural instruction, (38) 194.

## Boys'—Continued.

- club work—  
 manual for rural teachers, (36) 294.  
 paper on, (33) 195.  
 school credit for, (33) 799; (36) 293.
- clubs—  
 animal husbandry course for, (35) 396.  
 food production by, (38) 795.  
 gardening for, (36) 496.  
 in Arkansas, (33) 95.  
 Canada, (40) 396.  
 Massachusetts, (31) 598; (34) 394.  
 Michigan, projects for, (33) 792.  
 Nebraska, (32) 598.  
 Nevada, (34) 899.  
 rural schools, (32) 693.  
 Utah, (31) 693.  
 instructions for, (31) 298.  
 material supplied to, (33) 792.  
 notes, (29) 93; (33) 898.  
 organization, (31) 499, 793, 794; (32) 596, 692; (34) 793.  
 contest clubs, dangers in, (33) 296.  
 contests in Rhode Island, (28) 299.  
 corn and pig clubs, combining, (30) 694.
- corn clubs—  
 in Alabama, (26) 298, 794.  
 Kentucky, (32) 197.  
 Philippines, (30) 395.  
 South Carolina, (28) 792.  
 notes, (27) 395; (28) 796; (29) 193; (31) 693; (32) 898; (33) 598.
- corn growing contests, (29) 193.  
 demonstration work in the South, (26) 598; (32) 492.  
 farm labor camp, (40) 96.  
 field crop competitions, (34) 493.  
 gardening clubs in Rhode Island, (31) 693.  
 high school, in agriculture, (40) 598.  
 industrial and vocational training, (28) 499.  
 industrial clubs in Oregon, (31) 393; (32) 394.  
 menus, (29) 464.  
 metabolism, (40) 868.  
 metabolism experiments, (28) 260; (35) 370.  
 mobilization for farm work, (37) 199; (39) 90, 597, 693.
- pig clubs—  
 in Alabama, (29) 792; (31) 794.  
 in Louisiana and Georgia, (31) 598.  
 organization, (30) 395.  
 potato clubs, organization, (27) 298.  
 potato growing contests in Canada, (31) 194.  
 poultry clubs, organization, (30) 395.  
 purposeful occupations, (31) 499.  
 stock judging contest, (27) 395, 396.  
 training farm in South Australia, (26) 799.  
 training in cooking, (30) 598, 763.  
 Working Reserve in New York, (40) 591.
- Brabantia rhizoleuca*, redescription, (38) 766.
- Brachistella*—  
*acuminata*, notes, (33) 357.  
 new genus, description, (26) 152.
- Brachyacantha* of North and South America, (26) 657.
- Brachycolus tritici*, studies, (35) 757.
- Brachydeutera argentata*, notes, (38) 557.
- Brachymelia* in domestic animals, studies, (26) 472.
- Brachyopa* n.s.p., notes, (34) 554.
- Brachypodium pinnatum*, analyses, (33) 466.
- Brachyrhinidae*, notes, (30) 856.
- Brachysm* in cotton and other plants, (32) 731.
- Brachysporium phragmitis* n.s.p., description, (27) 848.
- Brachytarsus niveovariegatus*, parasitic on white wax coccid, (35) 256.
- Brachytrypes achatinus*, notes, (28) 249, 353, 753.
- Brachyunguis* n.g. and n.spp., descriptions, (40) 650.
- Bracken*—  
 as source of potash, (37) 427, 817; (39) 220, 626; (40) 321.  
 eradication, (36) 740.  
 poisoning in cattle, (34) 383; (39) 891.  
 poisoning in horses, (37) 182; (38) 589.
- Bracon*—  
*brachycerus*, notes, (26) 861.  
*brevicornis*, see *Habrobracon brevicornis*.  
*hebeter*, see *Habrobracon hebeter*.  
*hylobii*, notes, (32) 852.  
*nearctic* species, (37) 360.  
 sp., notes, (30) 659.

*Bracon*—Continued.

- sp., parasitic on beet webworm, (26) 250.  
 sp., parasitic on cotton bollworm, (33) 750.  
 sp., parasitism, (38) 364.  
 (*Tropidobracon*) *meromyzae* n.s.p., description, (31) 355.
- Braconidae*, British, notes, (31) 159; (32) 454; (40) 862.
- Braconids*, cocoon-spinning habits, (40) 761.
- Brahmaeidae*, monograph, (32) 850.
- Brain*—  
 extraction of poison from, (28) 280.  
 gaseous exchange of, (28) 765.
- Brains of domestic animals, (31) 168.
- Braids, prony, description and use, (29) 488.
- Bramble flea louse, notes, (28) 752.
- Bran*—see also *Corn bran*, *Rye bran*, *Wheat bran*, etc.  
 analyses, (26) 362, 768; (27) 68, 171, 371; (29) 467, 570, 769; (30) 371; (31) 73, 168, 366, 467, 863; (32) 169, 465, 862; (33) 71, 371, 568, 665, 759; (34) 168, 371, 663; (35) 374; (36) 65; (37) 873; (38) 666; (39) 370; (40) 768.  
 analyses and use in bread making, (39) 870.  
 as human food, (34) 460.  
 bacterial flora of, (32) 75.  
 detection of ustiliginous spores in, (26) 408.

 oxidation of carbohydrate mixtures by, (37) 10.  
 recovery from laboratory waste liquors, (36) 805.  
 toxic effect on plants, (38) 628.  
 use in seed treatment, (40) 443.  
 water, effect on germination of seeds, (26) 820.
- Bromium vitis**, notes, (27) 558.
- Bromoaectylglucose**, preparation, (36) 313.
- Bromoaectylxylose**, notes, (34) 408.
- Bromus**—  
 erectus, drought resisting qualities, (28) 533.  
 erectus, fungus parasites, (40) 156.  
 fruit and leaves, anatomy of, (34) 35.  
 mollis, rust spores in seeds of, (30) 241.  
 rubens, analyses, (33) 466.  
 spp., culture in New Zealand, (29) 428.  
 tectorum, geographical distribution, (26) 335.  
 tectorum, roots of, (26) 535.  
 uniloides, analyses, (31) 863.  
 uniloides, culture under dry land conditions (31) 429.
- Bronchitis**—  
 in calves, (26) 483.  
 verminous, in bovines, (31) 85.  
 verminous, in dogs, (36) 676.
- Bronchopneumonia**—  
 contagious, (36) 384.  
 in calves, (39) 290; (40) 887.
- Bronthyspa froggattii**, notes, (40) 260.
- Bronze** on bronze, friction coefficients, (36) 682.
- Brooder**—  
 description, (26) 572; (32) 570.  
 house, construction, (35) 773.  
 house, colony, construction, (29) 293; (33) 98; (36) 770.  
 stoves, tests, (34) 178.
- Brooders**—  
 and brooding, notes, (33) 273.  
 disinfection, (28) 73.  
 fresh air, (27) 599.  
 fresh air, construction, (35) 495.  
 notes, (32) 264.  
 tests, (28) 773; (30) 373.
- Brooding**—  
 colony, (37) 71.  
 instinct in relation to egg production, (33) 74.
- Broom**—  
 as a sand binder, (29) 427.  
 corn—  
 analyses, (37) 539.  
 as a feeding stuff, (29) 223.  
 covered kernel smut on, (39) 756.  
 culture, (27) 299; (34) 630.
- corn, culture—  
 experiments, (27) 136, 529; (28) 532; (29) 225, 426; (30) 136; (32) 431; (34) 229; (36) 34; (38) 830; (39) 128.  
 handbook, (29) 737.  
 in Arizona, (32) 226.  
 eastern Oregon, (38) 432.  
 Iowa, (39) 738.  
 New Mexico, (40) 18.  
 Texas Panhandle, (29) 430.  
 under dry farming, (31) 429; (37) 329.
- corn—  
 dwarf, culture, (36) 229.  
 fertilizer experiments, (26) 830.  
 millet, culture in Texas Panhandle, (29) 429.  
 notes, (29) 395.  
 smuts, cause and treatment, (30) 47.  
 standard, (39) 441.  
 varieties, (26) 733, 830; (27) 736; (29) 32, 222; (30) 525; (36) 133, 831; (37) 329; (38) 830, 832.  
 variety tests, (39) 128.  
 water requirement, (32) 226, 335.  
 yields, (29) 32.  
 yields of stover, (40) 731.
- grass, seeding on ranges, (30) 35.  
 making, notes, (29) 395.  
 millet, classification, (33) 834.  
 millet seed, analyses and nutritive value, (33) 870.  
 plant seed, germination tests, (29) 740.  
 rape, notes, (37) 239.  
 Spanish, notes, (29) 441.
- Broomella zaeae** n.s.p., notes, (37) 148.
- Brossimum alicastrum**, analyses, (28) 464.
- Brotolomia meticulosa**, notes, (30) 356.
- Broussonetia papyrifera**, proteolytic enzymes in latex of, (31) 409.
- Brown rot**—  
 in northern Vermont, (35) 849.  
 Sclerotinia, hosts of, (33) 247.  
 studies, (31) 749, 843.
- Brown-tail fungus**, notes, (27) 456.
- Brown-tail moth**—  
 bacillary septicaemia of, (30) 54.  
 control, (26) 561, 855; (28) 553; (29) 762; (30) 654; (33) 57; (36) 456; (37) 254, 563; (38) 143, 159; (39) 750, 760, 764, 804.
- control—  
 by starlings, (40) 647.  
 in Canada, (32) 448; [(33) 746; (35) 465; (38) 556; (40) 57.  
 Connecticut, (35) 53.  
 Massachusetts, (27) 455; (28) 643; (30) 98, 743; (33) 144; (36) 843; (37) 646.  
 New Brunswick, (27) 558.  
 New Hampshire, (33) 858; (35) 461.  
 United States, (31) 251.
- egg parasite of, (26) 557.  
 important natural enemy of, (26) 350.  
 in Canada, (38) 459.  
 Connecticut, (37) 259.  
 France, (29) 558.  
 New Brunswick, (27) 356.  
 Nova Scotia, (30) 752; (35) 853.  
 larvae, poison glands of, (33) 558.  
 notes, (26) 59, 753; (27) 356, 658, 857; (28) 57, 155, 752; (29) 251, 252; (30) 53, 549, 854; (33) 254; (34) 250, 752; (38) 58, 358.  
 parasites of, (28) 859; (30) 460; (31) 355; (37) 459; (39) 661.  
 wilt disease, notes, (28) 859.
- Brown thrasher**, food habits, (38) 457.
- Brown top**, analyses, (30) 565.
- Bruches libiscl**, studies, (40) 754.
- Bruchidae**—  
 catalogue, (30) 458.  
 in Hawaiian Islands, (40) 266.  
 in South Africa, (40) 861.  
 North American, host plants and parasites, (26) 861.
- Bruchophagus funebris**, see Clover seed chalcis fly.
- Bruchus**—  
 chinensis, see Cowpea weevil.  
 limbatus, notes, (34) 857.  
 obtectus, see Bean weevil.  
 pisorum, see Pea weevil.  
 prosopis, life history, (29) 253.  
 quadrimaculatus, notes, (34) 754; (40) 170.  
 rufimanus, control, (39) 256.  
 rufimanus, studies, (27) 563.  
 spp., control, (39) 664.  
 spp., notes, (27) 155.  
 spp., studies, (39) 363.
- Brucin**, detection in water, (34) 410.
- Bruggmannella pisoniae** n.s.p., description, (27) 57.
- Brunchorstia destruens**, notes, (30) 453.
- Brush**—  
 disposal, (29) 545.  
 feed, analyses, (27) 170.  
 ground, analyses, (30) 868.  
 meal, composition and digestibility, (29) 373.  
 pulling, piling, and scattering, (36) 844.
- Brussels sprouts**—  
 finger-and-toe disease, (31) 149.  
 pollination experiments, (35) 342.
- Brustseuche**—  
 immunization, (31) 184.  
 investigations, (28) 482.  
 treatment, (28) 287; (30) 285.
- Bryobia praetiosa (pratensis)**, see Clover mite.
- Bryonia dioica**, Mendelian inheritance in, (35) 819.
- Bryophyllum**—  
 calycinum—  
 growth studies, (37) 127, 324, 325, 821.  
 inhibition of regeneration or growth in, (34) 730.  
 regeneration, (40) 224.  
 root formation and geotropic curvatures of stem, (35) 820.  
 culture under shade, (27) 741
- Bryophytes**, epiphytic, on trees in Denmark, (36) 825.
- Bubble fountains**, bacteriology of, (35) 860.
- Bubonic plague**, transmission by rat fleas, (30) 254.

- Bucculatrix**—  
*canadensis*ella, notes, (26) 147; (28) 351; (30) 665.  
*lucella* n. sp., description, (33) 748.  
*thurberiella* n. sp., description, (31) 352.  
*thurberiella*, notes, (35) 657; (36) 56.
- Buck beans**, new glucosid from, (26) 24.
- Buckeye**, red, toxicity, (40) 778.
- Buckhorn**, geographical distribution, (26) 335.
- Buckthorn**—  
 as hedge plant, (37) 241.  
 varieties, (37) 143.
- Buckwheat**—  
 analyses, (29) 270; (31) 366.  
 as affected by—  
   chemicals, (32) 538.  
   preceding crop, (40) 623.  
   uranium and lead, (28) 731.  
 as cover crop, (32) 332.  
 cover crop for orchards, (33) 240.  
 green manure, (38) 817; (39) 326; (40) 229, 734.  
 nurse crop, (39) 130.  
 supplement for wheat, (37) 263, 895.  
 assimilation of phosphorites by, (27) 340.  
 bran, analyses, (26) 714; (27) 774; (29) 769; (30) 169; (31) 663; (32) 169, 667; (33) 568; (34) 263; (35) 562, 867; (36) 667; (40) 571.  
 bran and middlings, analyses, (28) 464.  
 bushel weights, (37) 889.  
 by-products, analyses, (28) 364; (30) 68.  
 chlorin requirement, (36) 439.  
 cost of production, (37) 191.  
 critical period of growing season, (39) 811.  
 culture, (30) 228; (37) 895; (39) 834.  
 culture—  
   and improvement, (27) 137.  
   experiments, (27) 638, 639; (32) 132; (33) 830; (36) 32, 133; (38) 634; (39) 124, 125, 435; (40) 735, 825.  
   for chicken feed, (38) 827.  
   in Hawaii, (32) 729.  
 decomposition in soil, (40) 214.  
 effect on following crop, (38) 337; (40) 623.  
 effect on milk and butter, (34) 570.  
 elongation of hypocotyl, (28) 739.  
 feed, analyses, (27) 170, 670; (29) 367; (31) 467; (36) 167; (38) 369.  
 feed, middlings, and offal, analyses, (40) 665.  
 fertilizer experiments, (26) 331, 527, 725; (27) 638; (28) 721, 735, 736; (29) 22, 624, 625, 821; (30) 216, 229, 427, 820; (34) 130; (35) 428; (36) 427, 626; (37) 521; (38) 817; (39) 623, 624, 726; (40) 735, 825.  
 flour, analyses, (26) 714; (39) 870.  
 flour, digestibility of protein of, (33) 564.  
 flour, globulin of, (39) 202.  
 germination—  
   as affected by temperature, (38) 25.  
   tests in hydrogen peroxid, (27) 201.  
 globulin of, (39) 201.  
 growing with soy beans, (39) 741.  
 growth—  
   as affected by stimulants, (35) 434.  
   in association with weeds, (38) 734.  
   greenhouses, seasonal variations, (38) 627.  
   heated soils, (31) 216.  
   water cultures, (38) 627.
- hulls**, analyses, (27) 170; (29) 666; (36) 268; (40) 72.
- hulls**, fluorescent substance in, (31) 280.
- liming** experiments, (29) 223; (38) 22.
- maltase** content, (31) 204.
- meal**, analyses, (31) 663.
- middlings**—  
 analyses, (26) 665; (27) 670, 774, 872; (28) 669; (29) 666; (30) 169, 868; (31) 366, 663; (32) 667; (33) 71; (34) 72, 263, 665; (35) 867; (36) 167, 268; (37) 268; (38) 369; (40) 665.  
 and offal, analyses, (39) 270.  
 digestibility, (29) 367.  
 milling experiments, (40) 556.  
 mixed feed, analyses, (30) 169.  
 nematodes affecting, (29) 151.  
 nutrition, studies, (31) 729.  
 offal, analyses, (27) 570, 774; (32) 667; (34) 665; (36) 167; (39) 270; (40) 665.  
 planting and harvesting dates, (26) 533.  
 plants, physiological balance of nutrient media for, (39) 732.  
 poisoning in pigs, (38) 589.  
 products, analyses, (32) 568; (38) 67.
- Buckwheat—Continued.**  
 rotation experiments, (40) 229.  
 rye stalk disease affecting, (26) 546.  
 screenings—  
   analyses, (26) 165.  
   analyses and feeding value, (34) 663.  
   ground, analyses, (33) 371.  
 seeding experiments, (39) 130.  
 starch, studies, (31) 828.  
 studies of species, (27) 137.  
 transpiration and water requirement, (39) 631, 732.  
 varieties, (27) 31, 137, 638, 736; (30) 228, 435, 525; (31) 829, 831; (32) 431; (33) 33, 34, 632; (34) 630; (35) 528; (36) 32, 437; (38) 634.  
 varieties for Alaska, (39) 125.  
 variety tests, (39) 130, 738; (40) 735.  
 water requirement, (29) 826; (32) 127.  
 yield in relation to physical properties of soils, (38) 815.  
 young and mature, salt requirements, (39) 524, 630; (40) 425.
- Bud**—  
 click beetle, notes, (32) 651.  
 development, studies, (37) 324.  
 mite, remedies, (38) 468; (40) 266.
- moth**—  
 eye-spotted, notes, (32) 651; (38) 459, 655; (40) 756.  
 eye-spotted, remedies, (38) 59; (39) 659.  
   in Nova Scotia, (35) 853.  
   lesser, studies, (31) 252, 755; (36) 656.  
   notes, (30) 154.  
 sport on lilac, (39) 244.  
 variation—  
   factors in, (37) 433.  
   in Coleus, (32) 726.  
   in dahlias, (40) 447.  
   in oranges, (39) 142, 447, 448.  
   notes, (32) 638.  
   relation to fruit markings, (29) 147.  
 weevils and other bud-feeding insects, (35) 363.  
 weevils, notes, (32) 651.
- Buda** kale as forage crop for sheep, (28) 267.
- Budding**, notes, (29) 838.
- Buddleia**, notes, (40) 844.
- Buds**, anatomical and biological studies, (27) 30.
- Buffalo**—  
 and cattle hybrid, notes, (28) 68.  
 and cattle hybrids, skull characters, (38) 65.  
 blood, analyses, (36) 779.  
 fats, analyses, (27) 670.  
 fly, bionomics, (39) 467.  
 gnats—  
   American, synopsis, (31) 254.  
   notes, (29) 454.  
   relation to pellagra, (28) 853.  
   studies, (34) 756.
- grass**—  
 composition, (27) 668.  
 digestibility, (27) 669; (37) 168.  
 hay, chloroform extract of, (31) 71.  
 hay, mineral constituents, digestibility, (40) 769.  
 water requirement, (32) 127.  
 meat and beef, differentiation, (30) 314.  
 meat, nutritive value, (26) 355.  
 milk, analyses, (27) 473.  
 milk, nutritive value, (26) 574.  
 moth, notes, (32) 250.  
 tree hopper, notes, (35) 54; (40) 340.
- Buffaloes**—  
 American, preservation, (30) 469.  
 and cattle, crossing experiments, (31) 266, 566, 567.  
 breeding in Western Transcaucasus, (28) 670.  
 domestic, characteristics, (31) 566.  
 East Indian, tuberculosis in, (26) 378.  
 flagellated organism from ulcers, (26) 784.  
 Formosan, measurement, (33) 469.  
 immunization against hemorrhagic septicemia, (28) 281, 881.  
 immunization against rinderpest, (38) 484.  
 in North America, (33) 470.  
 Indian, milk analyses, (28) 274.  
 milk yielding, of Bombay, (32) 367.  
 old pictures of, (28) 365.  
 wood, in Canada, (33) 843.
- Bufo**—  
 halophilus, economic status, (32) 244

- Bufo**—Continued.  
*marinus*, blood parasite of, (26) 883.  
*regularis*, protozoan parasites of, (30) 680.
- Bugbane**, insecticidal value, (31) 350.
- Bugyi** experimental plat, report, (36) 830.
- Building**—  
 and construction methods, treatise, (29) 86.  
 and loan associations, law in Indiana, (31) 594.  
 code suggestions, (36) 687.  
 construction, treatise, (31) 386.  
 materials—  
   heat transmission through, (31) 688; (38) 87, 492.  
   properties of, (31) 91.  
   stone deposits in Virginia coastal plain, (29) 513.
- Buildings**—  
 for small farms, (31) 786.  
 insects affecting, (28) 248.  
 lightning protection of, (29) 88.  
 public, inspection in South Dakota, (29) 567.
- Bulbar** paralysis, infectious—  
 feeding experiments with virus of, (30) 181.  
 in mules in Florida, (34) 275.  
 notes, (31) 579.  
 treatment, (33) 179.
- Bulbils** dactyloides, culture in Hawaii, (32) 729.
- Bulbocephalus** n.g. and n.spp., descriptions, (37) 558.
- Bulbs**—  
 culture experiments, (30) 145.  
 culture, manual, (32) 143.  
 culture, treatise, (31) 743; (36) 643.  
 etherized, enzymatic activities of, (30) 728.  
 flowering, composition and fertilizer requirements, (28) 49.  
 flowering, culture, (35) 450.  
 of doubtful food value, (32) 855.  
 ornamental, descriptive list, (31) 743.  
 rest period in, (33) 223.  
 treatise, (26) 337.
- Bulgaria** polymorpha on beech, (39) 254.
- Bulgarian** bread, description, (27) 868.
- Bull** associations, cooperative, (37) 574; (39) 483; (40) 79.
- Bullfinches**, feeding habits, (28) 450.
- Bulls**, Deccan, as affected by castration, (32) 865.
- Bulls**—see also Sires.  
 dairy, selection, (37) 473.  
 immunization against hemorrhagic septicemia, (28) 881.  
 influence upon offspring, (37) 373.  
 maintenance test with oat hulls, (29) 367.  
 management, (33) 698.  
 mature, as sires, (31) 475.
- Bumblebees**—  
 and their ways, (30) 52.  
 collection of pollen by, (34) 556.  
 domestication, (28) 357.  
 inquiline, in British Columbia, (33) 658.  
 life history, (38) 564; (40) 170.  
 nesting habits, (40) 655.  
 notes, (27) 459.  
 paper on, (38) 256.  
 parasite of, (32) 759.  
 pollinating—  
   alfalfa, (26) 633; (31) 134; (40) 760.  
   fruits, (28) 237.  
   red clover, (27) 359.  
 relation to *Nosema apis*, (27) 761.  
 treatise, (28) 562.
- Bunias** orientalis, heredity of fasciation in, (33) 727.
- Bunostomum** phlebotomum in Philippines, (37) 277.
- Bupalus** piniarius—  
 biology and parasites of, (33) 858.  
 fungus disease affecting, (26) 757.  
 life history, (34) 251.  
 yellow disease or jaundice of, (26) 759.
- Buprestidae**—  
 notes, (37) 566.  
 of northern California, (37) 666.  
 of Philippines, (31) 553.  
 southwestern, studies, (39) 264.
- Buprestis**—  
 in North America, (40) 266.  
 spp., biological notes, (39) 467.
- Burbank**, Luther—  
 life and work, (34) 440.  
 methods and discoveries of, (32) 143.  
 treatise, (37) 342.
- Burbot**, use as a food, (38) 468.
- Burdock**, lesser, destruction by *Metzneria lappella*, (33) 859.
- Bureau** of Chemistry, Plant Industry, etc., see United States Department of Agriculture.
- Burette**—  
 automatic, description, (40) 505.  
 for calibrating Babcock test bottles, (31) 875.  
 support, description, (36) 805.
- Burgundy** mixture—  
 acid and alkaline, (39) 151, 548.  
 as substitute for Bordeaux mixture, (34) 843.  
 combining with soap, (40) 746.  
 copper content, (34) 748.  
 fungicidal value, (33) 152; (40) 747.  
 notes, (35) 46.  
 preparation, (30) 153; (40) 252.  
 preparation and use, (27) 254; (34) 643.  
 use, (40) 750.  
 wetting capacity, (27) 753.
- Buri** palm sap, studies, (30) 16.
- Burkheiser** salt, fertilizing value, (28) 736; (29) 214; (30) 326; (31) 518.
- Burnet**—  
 analyses, (27) 371.  
 sheep, culture in Rhodesia, (27) 32.  
 sheep, notes, (30) 434.
- Burns**, treatment, (38) 885; (39) 488; (40) 780, 883.
- Bursa** hybrids, defective inheritance ratios in, (28) 531.
- Bursati**, studies, (32) 81.
- Bush**—  
 disease in livestock, (26) 581.  
 sickness, prevention, (30) 83; (31) 381.
- Bushel** weight—  
 determination, (33) 534.  
 determinations, accuracy of, (31) 131.
- Busseola** sorghicida, notes, (28) 555.
- Butcher** shops, inspection in Porto Rico, (26) 261.
- Butchers'** goods manufactories for slaughterhouses, (32) 457.
- Buteo**—  
 borealis calurus, feeding habits, (30) 654.  
 platypterus, monograph, (26) 245.
- Butia** palm as a food, (35) 266.
- Butorides** virescens anthonyi, destruction of locusts by, (28) 351.
- Butter**—  
 abnormal, detection, (27) 812.  
 absorption of water by, (32) 577.  
 adulteration, detection, (26) 212, 410, 508, 610; (27) 312, 716, 812; (28) 809; (29) 508; (31) 210; (33) 505; (34) 13.  
 adulteration with acetin, (26) 508.  
 aldehyde figure, (27) 209.  
 American creamery, composition, (28) 76.  
 analyses, (26) 80, 171; (27) 75, 473, 677; (28) 76 178; (30) 76, 178; (31) 359, 509, 576; (32) 675; (36) 571; (38) 666.  
 analysis, miscibility curves in, (26) 508.  
 analytical standards for, (26) 712.  
 anchovy, examination, (29) 361.  
 and lard, comparative value for growth, (36) 160.  
 and milk fat, differences between, (38) 280.  
 as affected by—  
   age of cow, (38) 578.  
   alkali water, (27) 283.  
   cold storage, (27) 376; (29) 268.  
   cotton seed products, (31) 370; (37) 72.  
   cream molds, (39) 785.  
   cream quality, (33) 80.  
   fat globules in cream, (29) 579.  
   feeding stuffs, (31) 77, 375; (32) 270; (34) 471, 570; (39) 485.  
   microorganisms, (26) 576.  
   pasteurization, (39) 78.  
   phosphates, (27) 326.  
   plane of nutrition of cow, (35) 774.  
   preservatives, (26) 778.  
   salt, (28) 278.  
   soy bean cake, (28) 372.  
   too acid a ferment, (31) 375.
- bacteria** in, (31) 575; (34) 672.  
 bibliography, (31) 176.  
 brands, State and National, (40) 476.  
 catalase in, (29) 508.  
 cause of mottling, (27) 74; (28) 879.  
 changes in during storage, (36) 773; (38) 880; (39) 78.

**Butter—Continued.**

- chemistry and physical constants, (26) 477.

  - relation to escutcheon, (34) 670.
- quality, as affected by—
  - acidity of cream, (38) 281; (39) 679.
  - legumes, (29) 278.
  - sesame cake, (26) 369.
- rancid, as a cause of intestinal trouble, (26) 275.
- rancidity, (39) 485.
- relation to microorganisms, (26) 372.

## Butter—Continued.

- removal of odors from, (33) 474.
  - renovated, refractive index, (27) 615.
  - renovating in Canada, (28) 278.
  - renovation, use of lime in, (37) 313.
  - rôle in glycogen formation, (31) 763.
  - scoring exhibitions at Hango, (28) 374.
  - shrinkage—
    - in, (30) 474.
    - in prints, (28) 76.
    - in shipping, (39) 580.
    - in storage, (36) 176; (38) 77.
    - tests, (35) 471.
  - Siberian, examination, (27) 283.
  - Siberian, on Hamburg market, (31) 675.
  - specific heat, (32) 715.
  - spoilage and preservation, (26) 355.
  - standards, (29) 777; (38) 480; (39) 786; (40) 461.
  - statistics in United States, (28) 390; (33) 894.
  - sterilization, (29) 280.
  - storage, (39) 770.
  - storage, as affected by salt, (39) 384.
  - storage, factors affecting flavor, (29) 71.
  - streptococci in, (28) 581.
  - substitutes—
    - accessory growth substance in, (38) 265.
    - composition, (32) 63.
    - for, (33) 660; (36) 466.
    - nutritive value, (37) 165.
    - purchasing and use, (38) 867.
  - Swedish "Rune" brand, (34) 572.
  - sweet cream, keeping quality, (31) 175.
  - Swiss, characteristics, (26) 372.
  - tallowy, (39) 785.
  - testing, (29) 876.
  - tests in Great Britain, (27) 676.
  - textbook, (31) 468; (40) 283.
  - tree, India, seeds of, (32) 613.
  - tubercle bacilli in, (26) 880; (27) 879; (37) 481.
  - typhoid infection through, (38) 265.
  - valuation, fat v. moisture standard, (35) 378.
  - vegetable, description, (33) 660.
  - vitamin content, (39) 770.
  - Vorbruch, manufacture, (26) 372.
  - wash water, iron salts in, (31) 375.
  - water content, factors affecting, (38) 781.
  - wey, see Whey butter.
  - yellow color in, (33) 175.
  - yields of different breeds, (29) 475.
- Buttercups**—
- as affected by top dressing, (26) 40.
  - destruction with sulphate of ammonia, (29) 530.
- Butterfish, nematodes in**, (36) 662.
- Butterflies**—
- collecting and preserving, (35) 594.
  - common, of United States, (32) 756.
  - injurious to alfalfa, (26) 655.
  - injurious to cocoon, (39) 160.
  - manual, (34) 552.
  - mimicry in, (37) 55.
  - North American, mimicry in, (28) 655.
  - of Australia, monograph, (34) 453.
  - of India, (35) 358.
  - pollination of alfalfa by, (26) 633; (31) 134.
  - treatise, (27) 558; (37) 358; (38) 260.
- Buttermilk**—
- analyses, (26) 80; (27) 377; (39) 278.
  - analyses and use, (26) 477.
  - artificial, manufacture, (34) 474.
  - as affected by—
    - boiling, (31) 505.
    - Bacillus Bulgaricus, (39) 486.
    - cooking, (29) 160.
  - as food, (37) 669.
  - casein from, (39) 386.
  - cheese for ducks, (35) 377.
  - cheese, manufacture, (33) 382; (40) 379.
  - chemistry and physical constants, (26) 477.
  - condensed, analyses, (39) 773.
  - dried casein from (29) 676.
  - for chicks, (34) 881; (39) 377.
  - for pigs, (27) 179; (33) 762.
  - freedom from typhoid bacilli, (40) 476.
  - from pasteurized cream, improvement, (29) 674.
  - from sheep and buffalo milk, analyses, (27) 575.
  - manufacture, (34) 775.
  - manufacture and use, (40) 379.
  - market, of Iowa, (35) 572.
  - metallic flavor in, (35) 276.
  - methods of analysis, (31) 114.

## Buttermilk—Continued.

- porridge, judging, (40) 807.
  - powder, manufacture, (30) 576.
  - preparation and use, (34) 474.
  - preservation, (31) 874.
  - protein content, (31) 413.
  - testing, (30) 875; (39) 182; (40) 378.
  - utilization, (26) 779.
  - variation in fat content, (28) 277.
  - watered, detection, (30) 508.
- Butternut**—
- oil, digestibility, (38) 868.
  - posts, preservation, (36) 244.
- Butternuts, culture in Minnesota**, (32) 840.
- Butyric acid**—
- action of symbiotes on, (40) 464.
  - determination, (38) 506; (39) 314.
  - effect on bread fermentation, (27) 268.
  - effect on plants, (37) 224.
  - in silage, (28) 608.
  - rôle in digestion, (36) 763.
  - separation and determination in biological products, (37) 206.
- Butyrometer, modified, for cheese**, (29) 311.
- Butyrospermum parkii, description**, (20) 60.
- Buzzards**—
- blood parasites of, (26) 883.
  - relation to anthrax, (26) 678; (28) 79, 678.
  - relation to hog cholera, (34) 275.
- Byrrhidae, catalogue**, (26) 560.
- Byturus**—
- tomentosus, notes, (32) 448; (33) 652; (40) 265.
  - unicolor, notes, (28) 158.
- Cabbage**—
- analyses and feeding value, (34) 664.
  - and collards, crossing, (31) 438; (35) 35.
  - antineuritic value as affected by heat and alkalis, (40) 565.
  - antiscorbic value, (39) 771.
- aphis**—
- control by lady beetles, (34) 555.
  - control by parasites, (37) 459.
  - endoparasites of, (34) 753.
  - false, notes, (39) 762.
  - false, studies, (35) 756.
  - hemolysin in, (40) 650.
  - new generic name, (40) 650.
  - notes, (28) 254; (31) 649; (32) 753; (34) 62.
  - parasites of, (26) 149.
  - remedies, (30) 654.
  - wing development, (40) 456.
- as affected by—
- previous crop of sesame, (31) 329.
  - sterilization of soil, (40) 619.
- ash analyses, (29) 861.
- bacterial black rot, studies, (33) 346.
- bacterial rot, notes, (29) 547.
- black rot—
- notes, (34) 644; (40) 47, 844.
  - or brown rot, notes, (37) 150.
  - studies, (39) 149.
- blackleg—
- notes, (39) 52.
  - organism, host range, (31) 446.
  - studies, (40) 846.
- breeding experiments, (29) 638; (38) 40, 241; (39) 542.
- breeding for disease resistance, (31) 840.
- bug, see Harlequin cabbage bug.
- butterfly—
- European, remedies, (28) 59.
  - notes, (26) 857; (36) 254.
  - southern, notes, (28) 554.
  - studies, (40) 656.
- by-products of fermentation, (39) 412.
- calcium cyanamid for, (31) 524.
- club root—
- effect on ash content of roots, (26) 54, 143.
  - effect on crucifers, (33) 648.
  - in South Africa, (29) 846.
  - notes, (26) 447, 844; (31) 148; (32) 48; (33) 647; (34) 241, 842; (36) 541; (37) 550, 551.
  - reduction of tellurium salt by, (31) 826.
  - studies, (31) 642; (37) 454; (40) 50.
  - susceptibility of cruciferous plants to, (28) 547.
  - treatment, (29) 752; (31) 842; (33) 848; (35) 48, 150, 245, 453, 546; (37) 150, 248; (38) 646.
- composition as affected by irrigation, (28) 332.
- creamed, food poisoning due to, (31) 855.

## Cabbage—Continued.

- critical period of growing season, (39) 811.  
 culture, (26) 393; (29) 338, 639; (32) 337; (33) 238; (35) 36; (37) 143; (39) 140, 345.  
 culture—  
   experiments, (27) 430; (28) 740; (29) 331; (32) 132; (34) 636; (35) 141; (38) 40, 241.  
   for forage, (31) 829; (33) 34.  
   in California, (33) 537.  
   treatise, (37) 543.  
 digestion coefficients, (39) 171.  
 disease resistance in, (29) 646.  
 diseases—  
   description and treatment, (27) 249; (38) 850.  
   notes, (27) 45; (28) 148; (38) 648; (39) 52, 147.  
   studies, (26) 546; (28) 844.  
 dried, antiscorbic properties, (40) 172.  
 effect on following crop, (40) 623.  
 electroculture, (28) 326; (40) 428.  
 extract, red, as an indicator, (30) 313.  
 fertilizer experiments, (26) 630, 631; (28) 236, 735, 740, 816; (31) 36; (33) 326; (34) 532, 833; (35) 629; (36) 839; (39) 745.  
 field, varieties, (27) 32.  
 flower beetle, notes, (27) 457.  
 Fusarium disease, relation to temperature, (33) 346.  
 green manuring experiments, (39) 31.  
 growth as affected by sulphur, (32) 724.  
 hardening by exposure to cold, (40) 26.  
 hybridization experiments, (30) 329.  
 hybrids, inheritance in, (29) 638.  
 improvement, (28) 639.  
 insects affecting, (26) 59, 553; (29) 338; (32) 753; (35) 55; (38) 459; (39) 661.  
 intumescences on, (39) 355.  
 irrigation experiments, (28) 131, 134, 135; (31) 732.  
 irrigation on sandy soil, (33) 287.  
 leaf spot, notes, (37) 551.  
 leaves, feeding and fertilizing value, (39) 628.  
 leaves, fermenting power, (31) 413.  
 liming experiments, (39) 745.  
 looper larvæ on artichoke, (40) 58.  
 looper, notes, (33) 352; (38) 154.  
 losses in cooking, (28) 460.  
 maggot—  
   notes, (26) 59; (29) 158; (36) 456, 457.  
   on radish, (39) 362.  
   parasites of, (33) 861, 862.  
   remedies, (26) 256; (27) 340; (28) 555; (30) 654  
   (31) 352, 654; (35) 53; (36) 657; (37) 764.  
   studies, (33) 58; (35) 855.  
 moth, small, in South Africa, (39) 561.  
 mulching experiments, (38) 344.  
 mulching v. clean culture, (33) 534.  
 palm, of Madagascar, (27) 766.  
 planting experiments, (28) 236.  
 pollination experiments, (35) 342.  
 preservation, (38) 266.  
 purin content, (40) 205.  
 radish hybrid, description, (31) 236.  
 resistance to club root, (33) 52.  
 root fly, parasites of, (33) 861, 862.  
 Savoy, carbohydrates of, (33) 310.  
 Savoy, monstrosities of germination in, (32) 825.  
 seed—  
   bed, sand for, (35) 141.  
   bed, screening, (26) 599.  
   disinfection experiments, (31) 738.  
   growing in Canada, (34) 635.  
   production, (33) 226.  
   production and harvesting, (34) 232.  
   studies, (39) 841.  
   treatment, (39) 238.  
 sprayed, arsenic on, (38) 55.  
 stem rot, notes, (34) 241.  
 storage, (39) 770.  
 storage experiments, (38) 344.  
 storage house, description, (26) 45.  
 sulphur in, (31) 817.  
 tokras disease, notes, (38) 351.  
 tomato graft, notes, (35) 341.  
 utilization of sugar by, (30) 125.  
 variation in, (38) 639.  
 varieties, (26) 631; (27) 736; (28) 539, 740; (29) 41; (31) 829; (32) 834; (34) 146, 833; (35) 141; (36) 237; (37) 645, 832; (38) 41.  
 varieties resistant to Fusarium, (31) 446; (33) 346; (36) 248.

## Cabbage—Continued.

- varieties resistant to rot, (33) 344.  
 variety tests, (40) 638.  
 vitamin content, (40) 564.  
 water requirement, (32) 127.  
 watering, continuous, (37) 543.  
 webworm, imported, studies, (27) 159.  
 webworm, notes, (30) 660.  
 winter storage in Holland, (26) 45.  
 worm—  
   imported, notes, (31) 649.  
   imported, remedies, (38) 860.  
   in Maryland, (38) 154.  
   notes, (29) 652; (36) 254.  
   remedies, (26) 250, 561; (33) 555; (39) 659.  
 yellows—  
   control, (34) 542; (37) 150.  
   resistant strains, (36) 845.  
   studies, (35) 544; (36) 248; (40) 156.
- Cabuya—  
 binder twine from, (27) 534.  
 fiber, strength of, (29) 313.
- Cacao—  
 abnormal growths, (40) 249.  
 algal disease, notes, (32) 445; (40) 851.  
 algal disease, studies, (38) 758.  
 analyses, (38) 8.  
 and woodpeckers, (40) 254.  
 animal pests of, (30) 246.  
 ant, black, studies, (39) 156.  
 aphid, notes, (37) 662.  
 bark beetles affecting, (30) 660.  
 bean husks, analyses, (33) 759.  
 beetle, notes, (35) 254.  
 beetle, trapping, (26) 759.  
 black pod, notes, (31) 645.  
 brown rot, notes, (36) 746.  
 budding and grafting experiments, (34) 740; (35) 344.  
 butter—  
   detection, (29) 613.  
   digestion and absorption, (34) 257.  
   refractive index, (27) 615.  
 cake for cows, (38) 477.  
 cake, toxicity, (38) 477.  
 canker—  
   notes, (29) 248; (32) 445, 548.  
   studies, (27) 751; (31) 54, 242, 347, 750.  
   treatment, (30) 543; (39) 152.  
 cercopid pest, (40) 860.  
 character and habits, (35) 730.  
 characteristics, (36) 642.  
 culture, (27) 844; (30) 644; (35) 145; (39) 544, 846; (40) 158.  
 culture—  
   and curing, manual, (26) 47.  
   experiments, (31) 637, 638; (32) 745; (33) 536, 738; (35) 647; (36) 141, 343, 537, 642; (37) 144; (38) 749, 845; (39) 143; (40) 339.  
   in Bahia, (33) 240.  
   Dutch East Indies, (30) 697.  
   Grenada, (31) 48.  
   Guiana, (31) 391.  
   Hawaii, (38) 842.  
   Philippines, (35) 353; (38) 8.  
   Samoa, (31) 142.  
   Uganda, treatise, (30) 741.  
   Venezuela, (31) 637.  
   treatise, (28) 542.  
 dieback, notes, (36) 550.  
 diseases, (39) 146, 151, 544.  
 diseases—  
   and pests in Ecuador, (40) 158.  
   in Grenada, (34) 841.  
   Gold Coast, (37) 349.  
   Jamaica, (34) 349; (35) 458.  
   Philippines, (35) 353.  
   Uganda, (34) 540; (35) 45.  
   West Indies, (37) 452.  
   notes, (26) 51; (27) 751; (28) 443, 545; (29) 155, 345, 547, 749; (30) 246; (31) 142, 347, 540; (32) 340, 345; (33) 241; (36) 46, 347; (40) 155, 252.  
   studies, (33) 549.  
   treatment, (26) 145; (27) 750.  
 enzymes, (35) 414.  
 fermentation, (30) 614; (38) 8.  
 fermentation, treatise, (30) 712.

## Cacao—Continued.

- fertilizer—  
 and mulching experiments, (29) 42.  
 and shading experiments, (29) 746.  
 experiments, (27) 242, 541, 645; (30) 444, 741;  
 (31) 421; (32) 45, 838; (33) 738; (34) 344, 438;  
 (35) 344, 647; (36) 141, 537; (37) 144, 345,  
 648; (39) 143.
- flowers, development of female sexual organs in,  
 (32) 235.
- fungus diseases affecting, (26) 851.
- green manure crops for, (34) 344.
- green manuring experiments, (30) 741.  
 handbook, (39) 448.
- hulls, analyses, (30) 466.
- husks for cows, (36) 76.
- improvement, (28) 736.
- industry—  
 in West Indies, (34) 438.  
 statistics, (26) 542; (38) 347.  
 treatise, (30) 533.
- insects affecting, (26) 354, 553; (27) 53, 857; (28) 249;  
 (29) 653; (30) 246, 546, 752; (31) 142; (32) 340; (33)  
 153, 241, 555; (34) 349, 549, 652, 851; (35) 353,  
 463; (36) 457; (37) 560; (38) 461; (39) 151, 256,  
 544, 556, 557, 656.
- leaf disease, notes, (34) 56.
- leaf spot, description, (37) 755.
- meal, analyses, (31) 467.
- mealy bug, studies, (39) 156.
- moth, parasites of, (29) 855.
- moth parasites, rearing and liberating, (34) 855.
- mulching experiments, (30) 741.
- pests in Belgian Congo, (39) 256.
- pink disease, studies, (37) 52.
- pod disease in Philippines, (37) 148.
- pod rot, notes, (39) 752, 849.
- preparation, (29) 340; (30) 614, 712.
- products—  
 analyses, (39) 612.  
 treatise, (29) 312.  
 use by prehistoric Americans, (38) 167.
- root disease—  
 notes, (27) 445.  
 studies, (33) 448.  
 treatment, (31) 549.
- root diseases—  
 in Lesser Antilles, (37) 454.  
 notes, (26) 245; (28) 149.
- rot, notes, (31) 242.
- selection experiments, (32) 235, 236; (37) 745.
- selection studies, (39) 243.
- shell—  
 dust, analyses, (32) 32.  
 estimation, (40) 612.  
 meal, analyses, (39) 773.  
 separation and uses, (39) 809.
- shells—  
 analyses, (33) 71, 870; (35) 128.  
 as feeding stuff, (38) 368.  
 composition and digestibility, (32) 666.  
 detection in cocoa, (26) 111; (27) 809; (30)  
 413.  
 determination, (32) 298.  
 determination in cacao preparations, (29)  
 205, 611.  
 digestibility, (30) 862; (31) 766.  
 feeding value, (26) 468.  
 for dairy cows, (28) 371.
- shield budding, (30) 644.
- spraying experiments, (30) 750; (34) 50; (39) 652.
- sunstroke or apoplexy, notes, (30) 50.
- thrips—  
 fungus, trials, (38) 57.  
 notes, (35) 254, 357; (36) 550; (37) 357, 461,  
 652; (40) 856.  
 parasite of, (39) 158.  
 studies, (28) 353.
- tolerance for salt, (27) 824.  
 treatise, (32) 235, 745.  
 trees, grafted, yield data, (34) 438.  
 witches' broom, notes, (29) 851; (36) 149, 846;  
 (37) 838.  
 witches' broom, studies, (34) 848.  
 yield data, (40) 43.
- Cachexia—  
 of ovines, notes, (28) 782.  
 osseous and verminous, in equines, (36) 779.

## Cacoecia—

- argyrospla, *see* Fruit tree leaf roller and Archid,  
 argyrospla.
- confictana, notes, (40) 456.
- costana, habits and remedies, (29) 758.
- lambertiana n. sp., description, (33) 748.
- piceana, notes, (34) 855.
- responsana, notes, (27) 57.
- Cactaceae, studies, (32) 429; (33) 221.
- Cacti—*see also* Opuntia and Echinocactus.  
 accumulation and destruction of acid in, (34)  
 730.  
 acidity and gas interchange in, (30) 429; (35) 22f.  
 adaptability to dry climates, (26) 529.  
 analyses, (32) 166, 769; (33) 70.  
 analyses and digestibility, (33) 766.  
 analyses and feeding value, (31) 265.  
 as emergency forage, (27) 569.  
 as human food, (33) 64.  
 as stock food, (33) 70.  
 behavior under cultural conditions, (30) 336.  
 carbohydrate metabolism, (40) 29, 30, 223.  
 carbohydrates of, (27) 9.  
 culture, (31) 137.  
 culture and use, (27) 569.  
 culture experiments, (36) 332.  
 culture in Michigan, (38) 222.  
 culture in southern Texas, (33) 134.  
 desiccation and starvation experiments, (34) 430.  
 destruction, (27) 36; (33) 134.  
 destruction in Australia, (26) 551; (33) 233; (34)  
 530.  
 diseases—  
 in Queensland, (34) 543.  
 notes, (26) 551; (28) 342, 645.  
 studies, (27) 352.  
 distribution, (34) 430.  
 distribution in relation to soil temperature and  
 moisture, (36) 733.  
 edible, of New Mexico, (28) 860.  
 ensiling, (33) 70.  
 for cattle, (31) 77; (32) 769; (33) 766; (38) 571, 774.  
 host plant of fruit fly, (26) 758.  
 induced plant parasites of, (26) 433.  
 insects affecting, (27) 357, 453; (28) 342, 451;  
 (34) 549; (35) 55; (38) 257.  
 ornamental, culture and value, (28) 342.  
 physiological studies, (37) 524.  
 reversion in, (31) 523.  
 root habits, (26) 729.  
 root systems, (30) 827; (39) 29.  
 seasonal movements in, (35) 27.  
 studies, (26) 35, 529.  
 symptomology and morphology, (27) 352.  
 transpiring power, (35) 733.  
 use, (33) 134, 233.  
 use as fertilizer, (33) 25.  
 value for milk and meat production, (28) 169.
- Cactus—  
 experimental station at Dulacca, (33) 233.  
 fruits, analyses, (40) 763.  
 giant, behavior of excised branch of, (35) 820.  
 giant, flowers of, (34) 430.  
 growth—  
 and colloid hydration, (34) 34.  
 in relation to light and temperature, (33)  
 128.  
 metabolism, and imbibition, (38) 729.  
 rate and course of, (40) 30.  
 leaves, analyses, (33) 65.  
 midge, notes, (28) 451; (33) 252.  
 narcotic, studies, (34) 336.  
 opuntia, culture and uses, (31) 134.  
 parasitic on cactus, (39) 148.  
 polar bear, description, (37) 434.  
 products, analyses, (31) 461.  
 scale, notes, (35) 54.  
 slabs, analyses, (36) 173.  
 solution as an adhesive for arsenical sprays, (32)  
 557.  
 spineless—  
 analyses, (28) 464; (38) 368.  
 breeding experiments, (32) 742.  
 culture experiments, (30) 632; (31) 829.  
 diseases, (39) 149.  
 feeding value, (38) 168.  
 for Arizona, (31) 228.  
 for cows, (36) 173.  
 for lambs, (36) 170.  
 notes, (27) 35.

- Cactus—Continued.  
 spineless—Continued.  
   resistance to cold, (38) 23.  
   selection experiments, (33) 231.  
 weevils, notes, (29) 562.
- Cactus oecanthi, notes, (31) 650.
- Cadaba juncea, analyses and digestibility, (32) 167.
- Cadaverin as a source of ammonia, (29) 723.
- Caddice flies. *Limnephilid*, classification, (35) 853.
- Caddis-fly, life history and habits, (26) 561.
- Cadelle—  
 notes, (26) 453; (30) 655.  
 remedies, (27) 258.
- Cadmium—  
 assimilation by *Aspergillus niger*, (31) 224.  
 chlorids, effect on starch ferments, (27) 109.  
 oxid, effect on germination of seeds, (29) 528.  
 sulphate, antiseptic value, (40) 779.
- Caenocryptus newcomeri n.sp., description (38) 565.
- Caecoma—  
 dubium n.sp., description, (34) 539.  
 euonymi, notes, (37) 550.  
 interstitiale and *Puccinia peckiana*, relation, (40) 155.  
 laricis, notes, (29) 554.  
 makinol, notes, (26) 343.  
 nitens, notes, (37) 457.  
 pseudotsugae douglasii, n.var., studies, (31) 246.
- Caesium—  
 chlorid, fertilizing value, (30) 627.  
 determination in plant ash, (38) 412.  
 effect on *Aspergillus niger*, (28) 527.  
 in plants, (38) 409.  
 in solids, (31) 720.  
 salts, effect on saccharification of starch, (26) 309.  
 sulphate, effect on plants, (28) 527.
- Cafeterias, handbook, (40) 560.
- Caffaro paste, effect on germination of wheat, (30) 837.
- Caffein—  
 cleavage in the human body, (27) 272.  
 determination, (27) 499; (32) 298.  
 determination in—  
   cocoa and chocolate, (37) 312.  
   coffee, (40) 115.  
   coffee and tea, (35) 504.  
 effect on—  
   gastric secretion, (26) 466.  
   heat production, (37) 266.  
   mental and motor efficiency, (29) 265.  
   plant growth, (37) 632.  
   seeds, (27) 330.  
   uric acid excretion, (37) 470.  
   working power of men, (39) 68.  
 elimination—  
   and toxicity, (29) 265.  
   studies, (27) 464.  
 extraction with ether, (37) 414.  
 fo nation and distribution by plants, (26) 823.  
 in beverages, (31) 164, 358.  
 in Java tea, (34) 166.  
 isomer of, (40) 202.  
 methods of analysis, (33) 414.  
 rôle in cardiac action of coffee, (27) 767.  
 substances, action of, (33) 464.  
 toxicity, (27) 166; (28) 662; (35) 473.
- Caffeols, origin, (29) 361.
- Caffetannin, notes, (29) 434.
- Cajanus—  
 culture experiments, (28) 633.  
 indicus—  
   analyses, (31) 863; (38) 368.  
   analyses and digestibility, (28) 464.  
   culture experiments, (28) 136; (36) 830.  
   germinating, enzymes of, (38) 9.  
   oil content of seeds, (27) 716.  
   seeding experiments, (37) 826.  
   selection experiments, (38) 635.
- Cake and corn feeding, manurial value, (40) 824.
- Cakes—  
 artificial coloring, (28) 510.  
 making, (33) 695.  
 making, principles of, (31) 299.  
 oven temperature for, (33) 565.
- Caladiums—  
 culture experiments, (40) 434.  
 varieties, (31) 524; (35) 134; (38) 526.
- Calafatite deposits in Spain, (26) 728.
- Calamagrotis canadensis, fungus disease of, (26) 646.
- Calamistis fusca, studies, (39) 158.
- Calamondin as a stock for cultivated citrus, (32) 143.
- Calandra—  
 granaria, *see* Granary weevil.  
 oryza, *see* Rice weevil and Wheat weevil.
- Calaphis—  
 n.spp., descriptions, (36) 357.  
 synopsis, (36) 357.
- Calaveras Dam slide, (40) 188.
- Calcareous—  
 deposits from rivers and lakes, analyses, (38) 626.  
 marl, use in agriculture, (40) 816.
- Calceolaria rugosa, carotinoid content, (31) 803.
- Calciferin, use in bread making, (31) 357.
- Calcimeter, description, (34) 503.
- Calcite, fertilizing value, (40) 815.
- Calcium—  
 absorption in the body from milk, (27) 168.  
 aluminum silicate, fertilizing value, (28) 521.  
 and sodium chlorids, antagonism between, (33) 31.  
 and strontium, separating and identifying, (26) 21.  
 arsenate—  
   analyses, (38) 643.  
   as a spray, (37) 759.  
   fungicidal value, (39) 652.  
   insecticidal value, (34) 60, 250; (40) 164.  
   preparation, (40) 10.  
   v. lead arsenate, (33) 339, 340; (39) 256, 767.  
 arsenates, studies, (39) 310, 311, 359.  
 arsenite—  
   and arsenate as insecticides, (39) 712.  
   insecticidal value, (27) 500.  
   preparation and properties, (28) 308.  
 as growth stimulant for hemp, (33) 432.  
 behavior during meat digestion, (28) 665.  
 borate, effect on crops, (39) 429.  
 bread, notes, (31) 860.  
 carbid—  
   for heating and lighting, (38) 190.  
   fungicidal value, (40) 750.  
   industry, statistics, (26) 725.
- carbonate—  
 availability, determination, (38) 819.  
 chemical effects on soil, (40) 124.  
 composition and solubility, (36) 713.  
 determination in limestones, (34) 503.  
 determination in soils, (27) 610.
- carbonate, effect on—  
 alkali salts, (39) 721.  
 ammonia absorbing power of soils, (30) 425  
 ammonia fixing power of soils, (27) 322.  
 ammonification, (39) 721.  
 availability of soil potash, (32) 126.  
 development of *Digitalis purpurea*, (34) 135.  
 hydrogen-iron concentration in soils, (39) 425.  
 legume bacteria, (29) 733.  
 nitrification, (40) 723.  
 nitrification in soils, (28) 217.  
 nitrification of ammonium sulphate, (26) 722.  
 nitrogen fixation by *Azotobacter chroococcum*, (33) 427.  
 nitrogen transformation, (26) 226; (28) 523.  
 oxidation of sulphur in soils, (30) 223.  
 phosphate reversion, (39) 521.  
 phosphates, (26) 428, 52; (27) 726; (34) 421; (35) 816.  
 plant growth, (36) 22.  
 protein content of soy bean, (34) 141.  
 soil molds, (40) 123.  
 soil potash, (36) 625.  
 soils, (27) 622; (39) 821.  
 solubility of calcium and phosphoric acid, (39) 23.  
 solubility of iron phosphate, (37) 324.  
 strawberries, (34) 150.  
 strawfying power of soils, (37) 120.  
 superphosphate, (36) 325, 821; (39) 119  
 wine, (29) 117.
- carbonate—  
 fertilizing value, (30) 127.  
 fixation in soils, (31) 25.

## Calcium—Continued.

- carbonate—continued.
  - formation by bacteria, (26) 618.
  - from causticizing plant, analyses and fertilizing value, (31) 125.
  - loss from cultivated soil, (30) 817.
  - methods of analysis, (29) 311.
  - relation to chlorosis, (28) 242, 425, 623; (33) 520.
  - role in assimilation of ammonia, (36) 631.
  - waste, use against finger-and-toe disease, (35) 522.
- caseinate, basic, preparation, (29) 10.
- chlorid—
  - absorption by plants, (35) 435.
  - as coagulant for rubber latex, (26) 141.
  - as dust preventive, (32) 884.
- chlorid, effect on—
  - action of trypsin, (26) 159.
  - activity of malt diastase, (29) 528.
  - ammonia fixing power of soils, (27) 323.
  - concrete, (36) 286.
  - disease resistance in animals, (32) 373.
  - germination and growth of crops, (34) 125.
  - germination of seeds, (29) 327.
  - growth of rice, (30) 833.
  - moor soils, (35) 724.
  - permeability of protoplasm, (33) 328.
  - physical properties of soils, (39) 215.
  - roads, (30) 486.
  - seed germination, (26) 131.
  - strength of concrete, (30) 589.
- chlorid—
  - for calves and pigs, (30) 67.
  - for pigs, (27) 872.
  - purification of water by, (26) 214; (27) 512.
  - relation to ammonification and concentration of soil solution, (39) 323.
  - use in bread making, (29) 565; (31) 357.
- compounds, effect on plant growth, (35) 726.
- content of cucurbit vines, (39) 747.
- cyanamid—
  - action as affected by iron, (27) 500.
  - after-treatment, (26) 425.
  - ammonia from, (31) 822; (38) 516.
  - analyses, (32) 32.
  - application, (31) 518.
  - application to winter grain, (33) 125.
  - as affected by carbon dioxide, (32) 125.
    - herbicide for *Cuscuta*, (26) 44.
    - retarder of denitrification, (34) 219.
    - top-dressing for oats, (35) 519.
    - top-dressing for rye, (28) 626.
  - availability of nitrogen in, (35) 426.
  - catalysis, (32) 125.
  - change of in soils, (26) 425; (39) 522.
  - decomposition, (27) 624.
  - decomposition in presence of water, (36) 426.
  - destruction of wild mustard by, (27) 724.
  - detection, (26) 804.
- cyanamid, effect on—
  - composition of beets, (31) 737.
  - decomposition of soy bean fodder, (40) 214.
  - germination of cereals, (33) 818.
  - germination of dodder, (27) 28.
  - soils, (27) 625.
  - sugar beets, (33) 434.
  - superphosphate, (30) 26.
  - the eye, (31) 29.
- cyanamid—
  - eradication of weeds by, (26) 839.
  - experiments, review and bibliography, (27) 128.
  - fertilizing action in relation to soils, (34) 820.
  - fertilizing value, (26) 125, 233, 323, 324, 425, 525, 536, 537, 622, 630, 725, 818, 837; (27) 218, 336, 337, 519, 625, 626, 832, 833; (28) 521, 723, 817; (29) 23, 125, 127, 213, 831; (30) 125, 427, 626, 627, 632, 731, 822, 835; (31) 36, 37, 124, 517, 518, 524, 725, 732, 820; (32) 336, 831, 832; (33) 219, 624; (34) 22, 24, 25, 130, 219, 431, 518, 622, 820; (35) 22, 126, 218, 323, 325, 336, 427, 518, 519, 629, 630; (36) 232, 332, 427, 818, 833; (37) 23, 216, 426, 539, 540, 815; (38) 516; (40) 539.
  - for peat soils, (39) 428.
  - for summer crops, (37) 217.
  - formation and decomposition, (26) 33.
  - formation from free nitrogen, (32) 217.
  - granular, fertilizing value, (39) 116.

## Calcium—Continued.

- cyanamid—continued.
  - granulated, manufacture, (35) 22.
  - in mixed fertilizers, (33) 25.
  - industry in various countries, (32) 820.
  - industry, status, (27) 128, 519; (30) 125.
  - injurious action, (37) 815.
  - lessening dusty conditions of, (30) 26.
  - loss of nitrogen in, (27) 824.
  - manufacture, (34) 622.
  - manufacture and use, (27) 520; (35) 428.
  - manufacture, progress in, (29) 730.
  - methods of analysis, (26) 109, 606, 804.
- cyanamid, mixing with—
  - coal tar, (38) 725.
  - pulverized bog iron ore, (35) 126.
  - superphosphate, (29) 24; (31) 822.
  - Thomas slag and kainit, (31) 422.
- cyanamid—
  - nitrites in, (32) 217.
  - oiled, fertilizing value, (31) 422.
  - paper on, (32) 121.
  - preparation and properties, (26) 525.
  - production, (28) 817; (31) 321, 725; (39) 825.
  - production and use, (29) 126, 213, 517; (30) 126; (32) 425.
  - solubility in water, (31) 725.
  - spoiled, effect on oats, (40) 815.
  - storage, (34) 724; (36) 426.
  - studies, (29) 127.
  - time of application, (30) 125.
  - trade in, (31) 29.
  - transformation in soils, (27) 625.
  - transformation in storage, (27) 621.
  - transformation into ammonia, (31) 725.
  - use, (32) 323; (36) 427.
  - use against *Colaspidea atrum* and dodder, (29) 561.
  - use against nematodes, (37) 453, 652.
  - use against weeds, (31) 532; (35) 340.
  - use against wild mustard, (31) 524, 633, 739.
  - use in Austria, (28) 723.
  - valuation, (36) 426.
- deficiency, effect on oat plant, (40) 324.
- determination, (32) 714; (34) 712; (36) 112; (39) 311.
- determination—
  - as oxalate, (32) 504.
  - as tungstate, (32) 116.
  - filter for, (38) 506.
  - in ash, (29) 610; (36) 317, 613.
  - blood and milk, (37) 207.
  - foods, (29) 809.
  - plants, (29) 797.
  - presence of magnesium, (26) 205.
  - presence of manganese, (27) 503.
  - presence of phosphoric acid and iron, (36) 14.
  - solids and fluids from animal organism, (33) 713.
  - urine and feces, (34) 508.
  - urine and other physiological fluids, (30) 210.
  - water, (35) 805.
- effect on—
  - Aspergillus niger*, (26) 431.
  - coagulation of milk, (33) 674.
  - concrete sand, (34) 787.
  - growth and composition of bone, (32) 465, 764.
  - herbaceous plants, (33) 428.
  - lupines, (34) 724.
  - soils, (32) 33.
  - toxicity of salts in nutritive solutions, (29) 322.
- excretion as affected by lecithin, (26) 766.
- excretion in the dog, regulation, (37) 64.
- fed pregnant swine, effect on offspring, (32) 366.
- feed analyses, (31) 864.
- fluosilicate, fertilizing value, (29) 823.
- for horses, (30) 571.
- function in plants, (30) 523.
- hypochlorite—
  - antiseptic and germicidal value, (37) 176.
  - as a seed sterilizer, (35) 46.
  - effect on bacteria in water, (38) 489.
  - effect on glanders bacillus, (40) 478.
  - purification of water by, (32) 87, 786.
  - purifying action on water, (36) 889.
  - sterilization of milk bottles with, (27) 232.

**Calcium—Continued.**

- hypochlorite—continued.
  - sterilization of water by, (33) 883; (37) 588.
  - use against apple scab, (37) 755.
- hyposulphite, fungicidal value, (39) 349.
- importance in animal nutrition, (31) 663; (33) 758.
- in Asiatic foodstuffs, (29) 64.
  - blood of lactating cows, (37) 308.
  - feeding stuffs, (30) 867.
  - normal urine, (36) 366.
  - nutrition of plants, animals, and man, (40) 767.
  - soil, (36) 621.
  - soil, solubility, (39) 24, 821.
  - the diet, (31) 357, 860.
- inorganic, in milk, (37) 208.
- loss in drainage water, (26) 421.
- magnesium ratio in the diet, (29) 565.
- metabolism—
  - in dogs, (38) 569.
  - 14-year-old boys, (30) 262.
  - infants, (29) 166.
  - women, (40) 174.
  - index of, (32) 858.
  - studies, (39) 875, 876.
- nitrate—
  - analyses, (32) 424.
  - assimilation by mold fungi, (29) 29.
  - availability of nitrogen in, (35) 426.
- nitrate, effect on—
  - assimilation of phosphates, (29) 318.
  - germination of dodder, (27) 28.
  - nitrogen-assimilating bacteria, (38) 724.
  - nodule formation, (37) 133.
  - phosphorite, (29) 624.
  - plants, (28) 527.
  - sugar beets, (33) 434.
  - toxic salts, (30) 31.
  - weed growth in meadows, (38) 141.
  - wheat seedlings, (31) 426.
- nitrate—
  - fertilizing value, (26) 233, 324, 425, 525, 536, 622, 630, 631, 725, 837; (27) 24, 336, 337, 519, 626, 724, 832, 833, 837; (28) 521, 723, 817, 827; (29) 23, 125, 213, 423, 829; (30) 626, 627, 632, 637, 835; (31) 124, 517, 518, 732, 820, 821; (32) 336, 532, 832; (33) 25, 219; (34) 130, 518, 622; (35) 22, 218, 323, 336, 427; (36) 134, 232, 626, 833; (37) 426, 739; (39) 428, 537.
  - for arid soils, (36) 726.
    - corn, (31) 831.
    - mangels, (29) 830.
    - peat soils, (39) 428.
  - hygroscopicity, (26) 425.
  - in nutrient solutions, effect on plant growth, (39) 28, 331.
  - industry in various countries, (32) 820.
  - manufacture, (28) 221.
    - manufacture in the South, (27) 824.
    - manufacture, progress in, (29) 730.
    - methods of analysis, (26) 606.
    - mixing with superphosphate, (29) 214.
    - nitrogen assimilation from, (27) 331.
    - preparation and properties, (26) 525.
    - production and use, (29) 126, 213; (30) 126; (32) 425.
    - production in 1912, (28) 817.
    - relation to ammonification and concentration of soil solution, (39) 323.
    - trade in, (31) 29.
    - treatment with oil, (29) 214.
    - use in Austria, (28) 723.
    - valuation, (26) 606.
- nitrite, fertilizing value, (28) 723; (29) 331; (31) 821; (33) 219.
- of cow's milk, effects in infant feeding, (40) 661, 869.
- of vegetables, utilization in the diet, (39) 876.
- output, urinary and fecal, in normal men, (36) 365.
- oxalate, origin and function in plants, (27) 133; (39) 827.
- oxid—
  - chemical effects on soils, (40) 124.
  - conversion in soil, (40) 622.
  - determination in peat soils, (35) 716.
  - diffusion in soils, (29) 128.
  - effect on availability of soil potash, (32) 126.
  - on physical character of soils, (40) 622.
  - v. calcium carbonate, (40) 515.

**Calcium—Continued.**

- paracaseinate of cow's and goat's milk, cleavage, (27) 12.
  - phosphate—
    - citrate solubility, (37) 713.
    - decomposition by acetic acid, (36) 712.
    - determination, (32) 409.
    - diffusion in soils, (29) 128.
  - phosphate, effect on—
    - composition of milk, (34) 270.
    - germination of seeds, (29) 328.
    - sugar content of cane, (38) 230.
  - phosphate—
    - fertilizing value, (26) 622; (27) 342.
    - in animal nutrition, (29) 869.
    - in rations of domestic animals, (32) 566.
    - in vicinity of Monterey, Mexico, (36) 821.
    - manufacture from milk, (30) 378.
    - precipitated, fertilizing value, (31) 823.
    - solubility and assimilability, (40) 128.
    - solubility in ammonium citrate solution, (33) 412.
  - physiological action, (27) 229.
  - physiological functions in plants, (29) 528.
  - potassium permittive, fertilizing value, (29) 211.
  - pyrophosphate as a fertilizer, (30) 222.
  - relation to plant nutrition, (37) 631, 799.
  - removal from soils, (39) 517.
  - resorption and retention by the intestine, (28) 865.
  - retention by pigs, (28) 469; (29) 66.
  - rôle in forest vegetation, (32) 728.
  - rôle in germination, (39) 526.
  - salts—
    - absorption by plants, (35) 433.
    - as a factor in onset of labor, (34) 184.
    - as affected by Bulgarian ferment, (26) 203
  - salts, effect on—
    - action of phosphoric acid, (27) 623.
    - activity of lipase, (31) 264.
    - Aspergillus niger, (28) 824.
    - canned foods, (34) 67.
    - fowls, (39) 177.
    - generation of trypsin, (29) 662.
    - nitric-nitrogen accumulation, (40) 722.
    - nodule production in vetch, (32) 727.
    - plants, (32) 538.
    - root hairs, (38) 330.
    - soil bacteria, (38) 818.
    - solubility of phosphates, (36) 626.
  - salts—
    - flocculating power on clay, (27) 620.
    - rôle in nutrition, (40) 273.
    - toxicity in soil, (36) 515.
  - separation from barium and strontium, (26) 204.
  - separation from magnesium, (28) 409; (33) 412.
  - sources for growing pigs, (31) 268.
  - sulphate, *see* Gypsum.
  - sulphid—
    - effect on soil microorganisms, (31) 27.
    - soil treatment with, (40) 619.
    - sterilization of soils by, (32) 816.
  - sulphite—
    - fertilizing value, (29) 521.
    - insecticidal value, (31) 408.
    - solubility in sugar solutions, (38) 616.
    - solubility in water and sugar solutions, (36) 716.
  - tetraphosphate, fertilizing value, (30) 427, 428.
  - thioarsenate, fungicidal value, (30) 712.
  - toxicity toward plants, (30) 128.
  - translocation in soils, (40) 719.
  - use in bread making, (32) 161.
- Calendula officinalis, adventitious buds, (36) 837.
- Calometer, description, (33) 367.
- Calf—
- barns, ridding of flies, (26) 861.
  - diphtheria, notes, (31) 879.
  - diseases, immunization, (26) 578.
  - diseases, notes, (36) 773.
  - dysentery, immunization, (29) 581; (32) 582.
  - dysentery, treatment, (29) 680.
  - feeds, analyses, (29) 467.
  - meals—
    - analyses, (27) 670; (29) 769; (30) 67, 169; (40) 571, 665.
    - preparation and analyses, (34) 667.
    - tests, (39) 76.
  - pneumonia bacterium, opsonic power of serums against, (27) 285.
  - stanchions, notes, (32) 590.

- Caliche—  
composition, (35) 511.  
studies, (39) 730.
- Calidea apicalis, injurious to cotton, (27) 454.
- California—  
College, cooperation with schools, (26) 192.  
College, organization and scope, (29) 191.  
Fruit Growers' Exchange, report, (32) 287.  
Redwood Park, booklet, (29) 44.
- Station—  
notes, (26) 395; (27) 197, 397, 696, 799; (28) 93;  
(29) 96; (30) 396, 698; (31) 99, 397, 695, 795;  
(32) 395; (33) 496, 794; (35) 196; (36) 397, 796;  
(37) 496; (38) 797; (39) 95, 694; (40) 495, 695,  
795.  
publications, (40) 599.  
report, (32) 290; (34) 294; (36) 195; (38) 197;  
(40) 599.  
report of director, (29) 899.
- University—  
agricultural education at, (40) 599.  
Farm School at Davis, announcement, (27)  
491.  
notes, (26) 395, 796; (27) 197, 696, 799; (28) 93,  
396, 696; (29) 96; (30) 396, 698, 900; (31) 99,  
397, 695, 795; (32) 395; (33) 496, 794; (34)  
295, 600; (35) 95, 196, 798; (36) 397, 796; (37)  
496, 600, 700, 797; (38) 797; (39) 95, 197, 694;  
(40) 495, 600, 695, 798.  
School of Tropical Agriculture, (40) 294.
- Caligonus—  
mall n.sp., description, (38) 63.  
terminalis, notes, (28) 457.
- Calipers—  
chest contour, (40) 277.  
circular area, notes, (28) 440.  
for measuring cattle, (40) 872.
- Caliroa, *see* Eriocampoides.
- Calisto archebates—  
introduction into Porto Rico, (39) 58.  
notes, (36) 754.
- Calla lily pollen, parasite of, (31) 641.
- Callas, phyllody of corolla in, (34) 143.
- Callicratides rama, notes, (34) 652.
- Callidryas eubule, notes, (27) 559.
- Calliophthaltes—  
sp., in California, (31) 256.  
sp., parasitic on codling moth, (30) 360.  
thurberiae n.sp., description, (34) 363.
- Callimome n.spp., descriptions, (28) 162.
- Callinomidae of Australia, (39) 154.
- Calliphora—*see also* Blow flies.  
erythrocephala—  
"critical" point for, (36) 265.  
destruction by heat, (28) 752.  
hibernation, (34) 254.  
notes, (28) 255; (30) 458, 459.  
spp., development, (31) 456.  
spp., hibernation, (38) 262.  
viridescens, notes, (26) 147.
- Calliphorine cutaneous parasites of domestic animals, (27) 656.
- Callipterinella annulata, notes, (37) 562.
- Callipterus—  
bellus, notes, (35) 56.  
trifoli, studies, (32) 247.
- Callirhoe spp., food plants of cotton boll weevil, (31) 458.
- Calloptistria floridensis—  
notes, (28) 854; (34) 158; (36) 355; (38) 358.  
studies, (29) 854.
- Callosamia promethea, notes, (30) 655.
- Callose, occurrence in root hairs, (29) 326.
- Callosities, inheritance in horses, (26) 571.
- Callospermophilus—  
(Citellus) chrysoideirus, susceptibility to plague, (26) 59.  
lateralis caryi n.subsp., description, (37) 758.  
lateralis cinerascens, relation to spotted fever, (31) 160.  
spp., prevalence in Colorado, (28) 652.
- Calluna vulgaris—  
behavior on lime soils, (31) 425.  
obligate symbiosis in, (33) 221.  
sprigs, as a substitute for black tea, (33) 866.
- Calocampa—  
cineritia, notes, (35) 756.  
nupera, parasites of, (31) 752
- Calocoris—  
angustatus, life history and control, (36) 857.  
rapidus affecting potatoes, (32) 57.
- Calomel as a vermifuge, (38) 883.
- Calonectria—  
flavida, notes, (29) 155.  
graminicola, occurrence in United States, (30)  
537.  
nivialis n.sp., description, (29) 445.  
studies, (30) 537.
- Calophya nigripennis, life history, (40) 754.
- Calophyllum inophyllum, oil of, (31) 234; (37) 109.
- Caloptenus italicus—  
fungus disease affecting, (26) 247.  
notes, (31) 850.
- Calorimeter—  
bomb, adiabatic device for, (34) 168.  
bomb, construction and operation, (27) 667.  
for large animals, description, (31) 764.  
for small animals, (30) 66.  
respiration, description, (39) 676.
- Calorimeters, descriptions, (27) 367.
- Calorimetric—  
methods, treatise, (26) 872.  
observations on man, (32) 257.
- Calorimetry—  
animal, studies, (39) 772.  
bomb, corrections in, (33) 265.  
clinical, (40) 868.  
combustion, notes, (30) 466.  
of urine and feces, (26) 161.
- Calosoma—  
imbricata, notes, (27) 862.  
inquisitor, notes, (35) 460.  
scrutator, notes, (28) 755.  
studies, (38) 61.  
scyophanta—  
dispersion in New England, (33) 254.  
in Florida, (37) 659.  
in Maine, (37) 459.  
life history and distribution, (35) 460.  
locomotion of larvae, (27) 360.  
notes, (27) 560.  
studies, (26) 350; (33) 457.
- Calosphaeria princeps, notes, (31) 539.
- Calospora vanillae, description, (27) 450.
- Caloteleia sp., notes, (31) 650.
- Calotermes—  
(Glyptotermes) satsumensis n.sp., description,  
(35) 255.  
lucifugus attacking grapes, (36) 651.
- Calotropis—  
gigantea, seeds of, (32) 613.  
procera latex, rennet of, (31) 410.
- Calpodex ethlius, notes, (27) 56.
- Calvatia spp., effect on vegetation, (38) 222.
- Calves—  
anaerobes in, (26) 586.  
as affected by pleuro-pneumonia virus, (27) 785.  
as affected by rations from single plant sources,  
(33) 367.  
birth weights, (37) 684.  
bone content, (31) 564.  
brains, creatin and creatinin content, (31) 760.  
calcium chlorid for, (30) 67.  
care and management, (34) 471; (35) 94.  
cost of raising, (32) 574; (38) 683; (39) 782.  
cottonseed meal for, (26) 879.  
dairy, raising, (29) 771; (34) 667; (39) 182, 882.  
dairy, rearing chart, (37) 675.  
dairy, wintering experiments, (37) 682.  
destruction by cottonseed meal, (20) 77.  
estimating age of, (31) 266; (33) 469.  
factors affecting growth, (35) 868.  
feeding and care, (28) 581; (32) 568; (33) 98; (36)  
773; (37) 367, 683.  
feeding experiments, (26) 367; (27) 372, 673; (28)  
572; (29) 169, 170, 277, 468, 571, 668; (30) 671;  
(31) 75, 866; (32) 362, 669, 672, 768; (33) 268, 269,  
570, 765; (34) 180, 265, 667, 773, 774, 868; (35)  
870; (36) 75, 369, 370, 565, 567; (37) 366, 675, 866,  
873; (38) 69, 679, 773; (39) 71, 76, 169, 273, 382;  
(40) 369.  
food requirements, (34) 775.  
for veal, (39) 76.  
growth on pasture, (31) 767.  
hand feeding, (38) 773.  
hairless, (39) 187.

- Calves—Continued.  
 immunization against—  
 anthrax, (31) 82.  
 dysentery, (26) 682.  
 tuberculosis, (26) 181, 284, 380; (27) 383; (29) 884; (33) 878.  
 large, obstetrical aid for, (26) 277.  
 marketing in the South, (37) 391.  
 metabolism experiments, (26) 768.  
 milk as sole diet, (40) 767.  
 milk substitutes for, (33) 669.  
 mineral phosphates for, (33) 469.  
 newborn—  
 composition, (37) 72.  
 diseases of, (37) 379.  
 infection of, (40) 887.  
 mineral constituents, (27) 499.  
 weights, (32) 862.  
 parathyroid glands of, (29) 377.  
 preserved skim milk for, (38) 377.  
 profit and loss in feeding, (28) 374.  
 raising, (29) 571; (30) 671; (31) 299, 566.  
 raising—  
 and fattening in Alabama, (31) 169; (32) 69.  
 and finishing, (28) 395.  
 emulsion system, (29) 369.  
 in Hungary, (33) 269.  
 on skim milk, (33) 374.  
 range, winter feeding, (31) 468.  
 rations for, (30) 169.  
 raw v. heated milk for, (28) 775.  
 rennet, immunizing against, (30) 477.  
 sex control in, (29) 468.  
 skim milk and cassava meal for, (30) 768; (31) 266.  
 slaughtering in Great Britain, (29) 571.  
 slaughtering on the farm, (35) 317.  
 spleen, bacterial content, (39) 389.  
 spring, advantages of raising, (33) 570.  
 suckling, intestinal flora of, (35) 282.  
 susceptibility to tuberculosis, (26) 178.  
 triplet, notes, (34) 767.  
 triplet, studies, (28) 467.  
 variation in weight, (36) 566.  
 weight of, (33) 171.  
 wintering, (40) 472.  
 young—  
 digestion of starch by, (38) 874.  
 slaughtering, (26) 473.  
 sour milk for, (33) 269.
- Calycanthus—  
 occidentalis, volatile oil of, (36) 206.  
 spp., hydrocyanic acid in, (28) 429.
- Calyptospora—  
 columnaris, infection experiments, (30) 745.  
 goepertiana, life history, (30) 745.
- Cambium miners—  
 new, (37) 764.  
 notes, (29) 44.  
 studies, (33) 749
- Cambridge University, notes, (36) 699.
- Camden chert as a road-making material, (26) 685.
- Camel—  
 diseases in India, (28) 482; (36) 680.  
 diseases, notes, (32) 134.  
 louse, notes, (26) 655.
- Camellidae, South American, economic importance, (27) 470.
- Camellia—  
 drupifera fruit, chemical study, (39) 501.  
 japonica, stomata of, (36) 223.  
 scale, notes, (28) 854.
- Camels—  
 in Tunis, description, (27) 571.  
 management in East Africa, (28) 268.  
 notes, (30) 569, 784.  
 variations in normal temperature, (37) 690.
- Camera—  
 lucida, installation, (35) 899.  
 microscopic, installation, (35) 899.
- Camnula pellucida, notes, (28) 59; (36) 153.
- Camomile flowers, chemistry of, (33) 202.
- Camp—  
 cookery, book on, (38) 469.  
 cookery, notes, (27) 463.  
 rations and equipment, (30) 763.  
 sanitation and housing, (33) 691.
- Campanula—  
 carpatica, segregation in, (39) 123.  
 leaf spot, notes, (27) 45.  
 medium, Sclerotinia disease of, (34) 354.
- Campers, handbook for, (34) 46.
- Camphor—  
 analyses, (40) 559.  
 blackening and dying of shoots, (30) 48.  
 chemistry of, (35) 317.  
 detection in ethyl alcohol, (29) 312.  
 determination, (27) 499.  
 diseases, new, in Texas, (37) 843.  
 diseases, notes, (28) 148.  
 effect on hyacinths and tulips, (26) 731.  
 from black sage, (33) 202.  
 from Cinnamomum camphora, (27) 442.  
 insecticidal value, (39) 762.  
 insects affecting, (31) 849.  
 liniment, notes, (31) 658, 676.  
 methods of analysis, (27) 210.  
 spirits of, analyses, (32) 456.  
 thrips, see Cryptothrips floridensis.  
 trees, culture experiments, (40) 339.  
 trees, growing in Florida, (37) 346.  
 trees, insects affecting, (29) 853.  
 trees of Mauritius, (37) 310.
- Camphora, nature and use, (26) 580.
- Campoletis prodeniae n. sp., description, (26) 352.
- Camponotus—  
 herculeanus ferrugineus, embryology, (29) 860.  
 herculeanus, notes, (26) 147.  
 maculatus turkestanicus, remedies, (31) 155.  
 reticulatus fullawayi n. subsp., description, (27) 264.
- Campoplex—  
 n. spp., descriptions, (29) 563; (30) 60.  
 phthorimaeae, notes, (36) 655.  
 variabilis n. sp., description, (34) 363.  
 variabilis n. sp., notes, (33) 352.
- Campsomeris dorsata, notes, (34) 455.
- Camptobrochis nitens, notes, (28) 252.
- Camptosorus rhizophylus, studies, (33) 27.
- Campylodendria curvata, notes, (29) 252.
- Campylochaeta obscura, studies, (39) 659.
- Campylomma verbasci—  
 notes, (30) 359.  
 relation to fire blight, (33) 744.
- Canada Experimental Farms—  
 notes, (28) 94; (30) 599; (34) 498; (36) 600, 697  
 report, (36) 97; (38) 698; (40) 797.
- Canada thistle—  
 control, (26) 839.  
 destruction, (27) 31.  
 eradication, (28) 834; (31) 438.  
 geographical distribution, (26) 335.
- Canadian—  
 agricultural institutions, notes, (37) 100.  
 Forestry Association, report, (32) 238.  
 Fruit Marks Act, (29) 868.  
 Phytopathological Society, (40) 699.  
 Seed Growers' Association, (28) 638, 739; (37) 141, 831.
- Canaigne, acclimatization in France, (37) 220.
- Canal—  
 banks, blanketing, (40) 188.  
 banks, grass mixtures for, (28) 829.  
 engineering, treatise, (32) 481.  
 measurement, (40) 188.
- Canals—  
 algae control in, (40) 188.  
 concrete lining for, (32) 481.  
 excavation, estimating for, (33) 586.  
 frictional resistance in, (30) 885.  
 irrigation, see Irrigation.  
 losses from by seepage, (30) 288.  
 power, design, (33) 885.  
 silting in, (30) 588; (31) 383.  
 unlined, seepage from, (33) 885, 886.
- Canaries—  
 breeding experiments, (30) 564.  
 care and management, (36) 455.  
 hybridization, (27) 276.
- Canarium—  
 bengalense, methods of analysis, (27) 210  
 nut milk as a food for infants, (29) 566.  
 nuts, microscopic identification, (28) 565.
- Canary—  
 disease resembling fowl cholera, (31) 879.  
 grass—see also Phalaris bulbosa.  
 culture experiments, (32) 431.  
 on bog and moss soils, (40) 212.  
 seed, agglutinating properties, (31) 774  
 Toowomba, varieties, (30) 434.  
 varieties, (29) 222.

- Canary—Continued.  
seed—  
culture experiments, (37) 823.  
production in Spain, (28) 736.
- Canavali obtusifolia, culture, (34) 736.
- Canavalia—  
agronomic value and species, (39) 635.
- ensiformis—  
analyses and digestibility, (28) 464.  
anatomical structure, (31) 314.  
as a cover crop for coconuts, etc., (33) 535.  
composition and digestibility, (33) 267.  
culture, (30) 335.  
culture experiments, (28) 136.  
culture in German East Africa, (27) 419.  
fertilizing value, (34) 34.  
notes, (31) 336.  
oil content of seed, (27) 717.  
urease content, (35) 612.
- gladiata—  
as green manure, (32) 423.  
culture experiments, (27) 233.
- ssp., notes, (28) 838.
- Canavalin—  
chemistry of, (37) 8.  
studies, (40) 308.
- Cancer—  
diagnosis, (32) 179, 372.  
diagnosis, dialysis method, (31) 877.  
in rats, studies, (32) 353.  
papers on, (38) 580.  
pathology, (31) 277.  
relation to crown gall, (35) 545, 650; (37) 245.  
relation to melanosis, (27) 289.  
serum reaction, (33) 477.
- Candelilla wax, chemistry of, (26) 611.
- Candlenut oil, detection, (29) 613.
- Candlenuts, analyses, (31) 631.
- Candy—  
adulterated, law in Michigan, (27) 767.  
examination, (30) 664.  
for queen cages, (27) 865.  
handbook, (31) 856.  
making in the home, treatise, (31) 558.  
making, principles of, (26) 358.  
making, treatise, (29) 60; (32) 253, 560.  
manufacture, sanitary aspects, (34) 365.  
notes, (28) 862.  
sirups, cooking temperatures, (32) 762.  
sulphurous acid in, (27) 868.
- Cane—*see also* Sugar cane.  
analyses, (30) 565.  
as a forage and silage crop, (31) 829.  
beetles in Queensland, (39) 255.  
borer beetle, studies, (36) 257.  
borers, notes, (34) 361.  
culture, (31) 265.  
culture in Burma, (29) 736.  
grub in Queensland, (32) 555.  
irrigation experiments, (28) 588.
- Japanese—  
culture experiments, (27) 336; (29) 224; (30) 434.  
fertilizer experiments, (27) 336.  
juice, determination of acidity, (27) 814.  
molasses, methods of analysis, (28) 713.  
products, methods of analysis, (27) 205.  
products, polarization, (27) 813.  
seed chop, analyses, (28) 465.  
silage from (27) 872.  
sirup, manufacture, (26) 213; (30) 614.  
stems, dorsiventral structure, (31) 233.
- sugar—*see also* Sugar.  
as affected by ultraviolet rays, (26) 308.  
calculation tables, (29) 113.  
content as affected by heading, (31) 431.  
detection in honey, (31) 208.  
determination of specific gravity, (35) 14.  
distillation, (36) 508.  
effect on action of blood serum, (34) 675.  
effect on secretion of diastase by fungi, (31) 13.  
factories, chemical control in, (37) 509.  
factories, germicides for, (32) 717.  
factories, heat balance of, (30) 891.  
formation, (28) 127.  
formation in germinating peas, (35) 432.  
harmful effect of, (33) 65.  
in milk, as affected by heat, (34) 164.  
industry in Queensland, (35) 230.  
industry, treatise, (29) 432.
- Cane—Continued.  
sugar—continued.

- bisulphid—
  - as disinfectant for stored corn, (31) 849.
  - fumigant, (40) 350.
  - soil disinfectant, (31) 621.
  - soil sterilizer, (26) 322.
  - combination products, (40) 505.
  - destruction of cockchafer, by, (27) 661.
- bisulphid, effect on—
  - baking quality of flour, (26) 357.
  - catalytic power of soils, (28) 118.
  - germination of corn, (28) 456.
  - germination of seeds, (27) 131, 342, 633.
  - germination of wheat, (30) 837.
  - nitrate accumulation in soils, (31) 342.
  - nitrification, (30) 717.
  - parasites, (28) 80.
  - plants, (27) 27, 131.
  - soil organisms, (28) 824; (30) 219; (31) 27; (38) 420; (40) 513, 619.

**bisulphid—**

- explosion in heated corn, (26) 864.
- fertilizing value, (27) 422; (29) 25.
- for ascarids in horses, (26) 588.
- fumigation, (29) 640.
- fumigation of potatoes with, (31) 756.
- insecticidal value, (34) 249, 252, 851; (37) 559; (40) 162.
- relation to soil organisms and plant growth, (33) 323; (35) 20.
- use against harvester ant, (33) 57.
- against leopard moth, (31) 632.
- against mill insects, (30) 155.
- against weeds, (30) 837.
- in kerosene emulsion, (31) 549.
- black, effect on—
  - action of soil organic compounds, (34) 126.
  - nitrification in soil, (38) 119.
  - plant growth, (36) 212.
  - soils, (36) 214.
- compounds, assimilation by mold fungi, (33) 726.
- determination, (31) 313; (33) 207; (37) 110, 803; (40) 206, 308.
- determination in—
  - biological products, (40) 206.
  - carbon dioxide, (36) 15.
  - soils, (32) 121, 805; (36) 15, 711.

**dioxid—**

- absorption apparatus, (36) 805.
- absorption by green plants, (31) 33.
- analysis, apparatus for, (40) 111.
- and oxygen, effect on nitrogen transformation in soils, (36) 724.
- as affected by ultraviolet rays, (30) 431.
- as affecting root growth, (40) 30, 820.
- as soil disinfectant, (31) 248.
- assimilation, (39) 225.
- assimilation by plants, (26) 822; (28) 728; (29) 324; (31) 236; (35) 633; (36) 632.
- concentration, effect on plants, (33) 628.
- conservation of grapes in, (28) 437.
- content of soil air, (39) 516.
- content of urine, (39) 670.
- detection, (28) 410.
- determination, (26) 708; (27) 805; (28) 506; (31) 313; (34) 504, 610.
- dioxid, determination in—
  - air, (36) 806.
  - baking powders, (40) 412, 508.
  - carbonates, (38) 110; (39) 503; (40) 113.
  - expired air, (29) 167.
  - plant respiration studies, (39) 27.
  - soils, (26) 99.
  - solution, (37) 804.
  - water, (28) 203; (29) 808; (31) 806.
  - waters and effluents, (34) 410.
- dioxid, determination of minute quantities (33) 711.

## Carbon—Continued.

- dioxid, effect on—  
 availability of plant food, (27) 514.  
 calcium cyanamid, (32) 125.  
 germination of seeds, (27) 201; (31) 521;  
 (32) 328.  
 hemolytic reaction, (36) 878.  
 nitrification in soils, (35) 627.  
 oviposition of house fly, (38) 563.  
 plant growth, (28) 38; (29) 417; (31) 521, 532;  
 (32) 422, 723.  
 respiration in plants, (35) 821.  
 ripening of persimmons, (26) 327.  
 rotatory power of sucrose and invert sugar,  
 (37) 802.  
 soil reaction, (38) 720.  
 solubility of soils, (33) 513.  
 sprouting of potatoes, (32) 829.  
 taste of water, (30) 714.
- dioxid—  
 elimination by nerves, (29) 466.  
 evolution in seeds, (27) 220.
- dioxid, excretion—  
 after muscular work, (29) 569.  
 and barometric pressure, relationship, (29)  
 569; (30) 563.  
 during muscular work, (28) 462; (31) 561.
- dioxid—  
 fertilizing value, (28) 728, 837; (31) 140, 235,  
 519.  
 for orchard heating, (39) 45.  
 forcing plants with, (28) 837.  
 formation from humus preparations, (34) 19.  
 formation in presence of carbohydrates, (34)  
 127.  
 generator, stopcock for, (40) 202.  
 in incubation, (31) 172.  
 in soils, (28) 320; (32) 718.  
 in soils, relation to bacterial activity, (29)  
 423.  
 loss from incubating eggs, (33) 575.  
 output during muscular work, (26) 871.  
 output, relation to fatigue, (30) 867.
- dioxid, production—  
 by autofermentation of yeast, (26) 867.  
 during mental work, (29) 768.  
 in soil, (31) 127; (38) 118.  
 in soil, relation to ammonia accumulation,  
 (39) 516.  
 of cultures, apparatus for determining, (38)  
 181.
- dioxid—  
 relation of growth to algae, (28) 821.  
 respiration in plants, (28) 728.  
 seed treatment, production of secondary  
 dormancy by, (39) 225.  
 separation in sprouting seeds, (28) 728.  
 tension in alveolar air, (34) 369.  
 titration of small quantities, (33) 413.  
 treatment of soils, (39) 38, 618, 620; (40) 739.  
 use with organic manures, (32) 322.
- effect on nitrification, (27) 322.  
 in clays and marls, (32) 121.  
 in cultivated and abandoned lands, (38) 622.
- monoxid—  
 analysis, apparatus for, (40) 111.  
 detection, (29) 610.  
 effect on catalytic hydrogenation, (38) 409.  
 effect on sprouting of potatoes, (32) 829.  
 in kelp, (36) 804.
- nitrogen, and humus ratios in soils, (28) 217.  
 nutrition of plants, (31) 426.  
 of food protein, conversion into fat and carbo-  
 hydrates, (26) 158.  
 of urine, heat of combustion, (26) 161.  
 organic, determination in soils, (28) 708; (37) 505.  
 organic, direct assimilation by *Ceratodon pur-*  
*pureus*, (40) 325.  
 protein, utilization by the body, (26) 564.
- tetrachlorid—  
 as a substitute for carbon bisulphid in  
 fumigation, (26) 65.  
 as delousing agent, (40) 651.  
 fumigation, (29) 640.  
 insecticidal value, (34) 253.  
 transformation in soils, (31) 818.
- Carbonaceous food, effect on secretion of enzymes,  
 (28) 727.
- Carbonate and bicarbonate mixtures, titration,  
 (39) 714.

## Carbonates—

- alkali, determination, (26) 406.  
 alkaline, determination in chlorinated solutions,  
 (39) 506.  
 determination, (37) 616, 802.  
 determination in—  
 hypochlorite solutions, (40) 309.  
 soils, (30) 113, 808; (35) 415; (38) 313.  
 solution, (37) 804.  
 determination of carbon dioxide in, (40) 113.  
 effect on—  
 nitrification in soils, (26) 817.  
 saccharification of starch, (26) 309.  
 soil bacteria, (38) 818.  
 mixture of, analysis, (40) 112.  
 relation to growth of algae, (28) 821.  
 rôle in soils, (30) 822.  
 soluble, reaction with metallic salts, (31) 504.  
 v. silicates as sources of lime and magnesia for  
 plants, (32) 622.
- Carbonation—  
 in bottles, stirrer for, (37) 716.  
 studies, (39) 804.
- Carbonic acid, combined, determination, (39) 205
- Carbonized material in soils, (28) 418.
- Carboxylase—  
 in potatoes and sugar beets, (35) 634.  
 notes, (30) 504.
- Carbunculosi, hematic, diagnosis, (30) 180.
- Carburation, treatise, (31) 785.
- Carburetor—  
 kerosene, description, (38) 492.  
 performance, standards, (37) 188.
- Carburetors—  
 adaptation to low volatile fuels, (40) 191.  
 for burning kerosene, (36) 288.
- Carcelia—  
 (*Exorista*) *pyste*, notes, (31) 752.  
 gnava, biology, (39) 658.
- Carcinoma—  
 diagnosis, (26) 483; (30) 682; (31) 876.  
 human, viability in animals, (27) 81.  
 of the genitals, diagnosis, (31) 877.  
 on the skull of a horse, (26) 483.  
 serodiagnosis, (26) 83; (32) 179.  
 transmission by bedbugs, (31) 550.  
 treatment, (40) 767.  
 ulcerating, spirochetes of, (26) 581.
- Cardiac—  
 disease, metabolism in, (35) 371.  
 stimulants, tests, (36) 576.
- Cardiophorus spp., notes, (30) 758.
- Carex—  
 frankii as a host of curlew bug, (27) 162.  
 rusts affecting in North America, (29) 750.  
 spp., digestibility, (32) 770.
- Caribou—  
 conservation, (37) 757.  
 protection in Alaska, (36) 791.
- Carica—  
 papaya—  
 botany and culture, (33) 440.  
 origin, (30) 842.  
 sex in, (28) 639.  
 quercifolia, host plant of fruit fly, (26) 758.
- Carissa arduina—  
 culture in Guam, (30) 41.  
 host plant of fruit fly, (26) 758.
- Carnation—  
 bud rot, notes, (28) 854.  
 disease, notes, (32) 549.  
 foot rot, notes, (27) 752.  
 leaf spot in Italy, (37) 155.  
 mildew, notes, (36) 547.  
 plant bearing flowers of two colors, (36) 837.  
 rust, notes, (37) 453.  
 soils, temperature and moisture studies, (32)  
 535.  
 stem rot, notes, (30) 247.  
 stem rot, studies, (28) 851; (33) 350.  
 stem rot, treatment, (27) 752.  
 white tip, notes, (36) 47.  
 wilt, notes, (34) 242.  
 wilt or crown rot, cause and treatment, (38) 51.  
 yellows, studies, (38) 51.
- Carnations—  
 and pinks, treatise, (27) 41.  
 breeding, (28) 543.  
 breeding experiments, (28) 438; (35) 240.

- Carnations—Continued.**  
 calyx splitting, (39) 746.  
 culture and breeding experiments, (39) 746.  
 culture, treatise, (26) 337.  
 fertilizer experiments, (26) 739; (27) 844; (29) 840; (32) 746; (36) 445; (38) 144; (40) 741.  
 greenhouse, red spider on, (39) 65.  
 guide, (28) 438.  
 inheritance of doubleness, (39) 123.  
 insects affecting, (30) 356.  
 Mendelian inheritance in, (28) 438.  
 multiplication of floral parts in, (30) 644; (31) 443; (32) 535.  
 perpetual flowering, (39) 449.  
 picotees, and pinks, handbook, (26) 139.  
 Thrips flava affecting, (26) 347.  
 treatise, (31) 743; (34) 44.  
 yearbook, (38) 44.
- Carnauba wax, methods of analysis, (28) 511.**
- Carnaubon in horse kidneys, (30) 477.**
- Carnegiea—**  
**gigantea—**  
 accumulation and destruction of acid in, (34) 730.  
 behavior of excised branch of, (35) 820.  
 rate and course of growth, (40) 30.
- Carnitin in horseflesh, (30) 61.**
- Carnivora, susceptibility to infectious bulbar paralysis, (33) 179.**
- Carnosin—**  
 in meat extracts, (30) 61.  
 in rabbit meat, (26) 563.
- Carob—**  
 notes, (25) 362; (29) 330.  
 pods for skim-milk calves, (36) 369.  
 treatise, (37) 747.
- Carotin—**  
 detection, (27) 806.  
 detection in oleomargarine, (36) 16.  
 fate during digestion, (31) 275.  
 formation, relation to mitochondria, (29) 827.  
 in milk fat, relation to other carotins, (31) 273.  
 milk fat, studies, (32) 18.  
 oils and vegetables, (39) 713.  
 ripening tomatoes, (29) 132.  
 pigments, formation, (37) 632.  
 spectro-colorimetric estimation in plants, (31) 520.  
 toxicity, (36) 164.  
 xanthophyll group in Chrysomelidae, (34) 865.
- Carotinoids—**  
 in insects, (34) 865.  
 in plants, (34) 627.  
 plant and animal, relation, (36) 411.  
 plant, studies, (31) 803.
- Caroto-albumin, notes, (31) 275.**
- Carp—**  
 breeding in rice fields, (30) 675.  
 nutritive value and recipes, (38) 165.
- Carpenter—**  
 ant, large black, notes, (26) 147.  
 moth, notes, (27) 658.  
 worm, *see* Prionoxystus robiniae.
- Carpet beetle—**  
 notes, (32) 250.  
 remedies, (39) 762.
- Carpet grass—**  
 culture in cotton belt, (32) 534.  
 for cut-over lands, (39) 231.
- Carpopaps—**  
 funebrana, morphology and biology, (33) 748.  
 pomonella, *see* Codling moth.  
 splendana, notes, (40) 854.
- Carpophylus anonus, studies, (39) 664.**
- Carpophilus hemipterus, notes, (34) 454; (40) 853.**
- Carposina adreptella, notes, (28) 355.**
- Carrichtera—**  
 annua, description, (36) 442.  
 velle, analyses, (33) 466.
- Carrion's fever and verruga, identity, (30) 658.**
- Carrot—**  
 fly, remedies, (31) 158.  
 leaf spots in Indiana, (39) 52.  
 rust fly, *see* Psila rosae.  
 seed production in Canada, (33) 226; (34) 635.  
 seed production in Denmark, (37) 742.  
 seed, vitality, (27) 740.
- Carrots—**  
 analyses, (27) 469; (32) 461, 465; (33) 759; (36) 65; (38) 665.
- Carrots—Continued.**  
 antipolyneuritic substances from, (40) 174.  
 as catch crop after wheat, (37) 136.  
 as source of calcium in diet, (39) 876.  
 breeding experiments, (39) 542.  
 catalytic fertilizers for, (27) 629.  
 composition as affected by irrigation, (28) 332.  
 culture, (26) 393; (27) 32; (28) 42.  
 culture—  
 experiments, (27) 33; (32) 132, 431; (34) 34; (35) 440; (36) 32, 228; (37) 742; (40) 625, 735.  
 in Rhodesia, (27) 32, 637.  
 in South Dakota, (40) 32.  
 on moor soils, (40) 523.  
 with cereals, (31) 735.  
 digestion coefficients, (39) 171.  
 effect on following crop, (40) 624.  
 effect on milk and butter, (34) 570.  
 electroculture experiments, (30) 733; (40) 428.  
 feeding value, (32) 461; (38) 665.  
 fertilizer experiments, (26) 436, 631, 727; (30) 138; (31) 133; (35) 440; (37) 742; (40) 735.  
 fertilizer requirements, (27) 639.  
 field, varieties, (30) 33.  
 food value, (36) 863.  
 formation of pigments in roots, (28) 36.  
 germination in mercury vapor light, (30) 827.  
 growth as affected by sulphur, (29) 215.  
 influence on toxicity of sodium tartrate, (40) 285.  
 inheritance of shortened development, (39) 734.  
 irrigation experiments, (28) 131, 133, 134; (29) 427; (33) 287.  
 losses in cooking, (28) 460.  
 mulching v. clean culture, (33) 534.  
 radio-active fertilizers for, (35) 628.  
 raw and boiled, nutritive value, (40) 267.  
 relation between size of seed and yield, (26) 434.  
 relative yielding capacity, (40) 625.  
 Rhizoctonia disease, studies, (39) 53.  
 sclerotinia diseases, (26) 647; (40) 49.  
 seeding experiments, (29) 432.  
 stock, yields, (40) 734.  
 varieties, (26) 436, 631; (27) 32, 334, 637, 736; (28) 531; (29) 222, 530; (31) 133; (32) 528, 532; (33) 34, 831; (35) 440; (37) 228.  
 varieties for moor culture, (39) 438.  
 variety tests, (39) 336; (40) 735.  
 winter storage, (38) 442.  
 yield as affected by time of thinning, (29) 431.  
 yields, (39) 334.
- Carsidarinae, (26) 149.**
- Carthamus tinctorius—**  
 culture for seed, (37) 230.  
 oil content, (31) 234.  
 studies, (36) 228.
- Cartilage—**  
 chemistry of, (28) 201.  
 occurrence of fat in, (26) 366.
- Carum petroselinum as a host of eelworm, (34) 349.**
- Carvacrol, manufacture, (40) 110.**

 production in St. Vincent, (39) 835.  
 pulp, analyses, (34) 665.  
 red mite of, (40) 656.  
 root, notes, (29) 362.  
 roots and their by-products, analyses, (30) 613.  
 roots, starch content, (30) 502.  
 silage, notes, (31) 732.  
 spraying experiments, (34) 50.  
 starch, determination, (26) 709.  
 stem borer, notes, (34) 65.  
 use, (32) 761.  
 varieties, (26) 435, 534, 733; (28) 828; (30) 434,  
 525; (31) 524; (35) 134; (36) 735; (38) 33, 335,  
 526, 530, 828.  
 variety tests, (40) 522.  
 Cassia—  
 auriculata bark for tanning, (37) 147.  
 chamaecrista, culture, (34) 736.  
 ground, analyses, (29) 462.  
 hirsuta as a green manure, (26) 528.  
 oil, constituents of, (34) 501; (40) 202.  
 Cassida—  
 nebulosa, notes, (31) 157.  
 pallidula, notes, (35) 657.  
 pallidula, studies, (36) 57.  
 Cassytha—  
 filiformis, habits and relations, (30) 745.  
 filiformis, notes, (37) 452.  
 melantha, autoparasitism in, (34) 626.  
 Castaneas—*see also* Chestnuts.  
 parthenogenesis in, (30) 544.  
 Castanopsis chrysophylla, planting in Southern  
 States, (26) 651.  
 Castanospermum australe, toxicity, (26) 278.  
 Castilla—  
 elastica, culture in Dominica, (29) 748.  
 elastica, tapping experiments, (26) 443.  
 seed, prolonging viability of, (29) 642.  
 Castnia—  
 daedalus, notes, (30) 359.  
 licus, notes, (28) 555; (30) 853; (38) 459.  
 licus on sugar cane, (40) 57.  
 therapon in New Jersey, (36) 54.  
 Castor bean—  
 ash, analyses, (29) 714.  
 bacterial wilt, studies, (39) 550.  
 cake, fertilizing value, (27) 337; (38) 220, 337.  
 crown gall, X-rayed, (39) 453.  
 diseases, notes, (33) 545.  
 floral anomalies in, (29) 629.  
 leaf rust in Morocco, (39) 53.  
 lipase—  
   action upon esters, (31) 710.  
   action upon fats, (39) 411.

- Castor bean—Continued.  
 lipase—continued.  
   as affected by manganous sulphate, (29) 713.  
   as affected by neutral salts, (30) 409.  
   extraction experiments with, (31) 711.  
   notes, (30) 204.  
   studies, (27) 712.
- meal—  
   as wheat bran adulterant, (38) 712.  
   detection in feeding stuffs, (29) 205; (30) 204.  
   fertilizing value, (31) 820; (35) 126.  
   plant for sheep, (26) 368.  
   plants as test for ethylene gas, (30) 227.  
   poisoning, notes, (28) 80.  
   poisoning, studies, (34) 466.  
   products, detection in feeding stuffs, (26) 209.  
   rust, studies, (30) 845.  
   urease, experiments with, (32) 710.
- Castor beans—  
   breeding experiments, (40) 435.  
   culture and utilization, (33) 438.  
   culture experiments, (32) 227; (36) 830; (38) 336, 527.  
   culture in Egypt, (38) 338.  
   description and analyses, (30) 733.  
   esterase and lipase of, (32) 803.  
   fumigation with hydrocyanic acid gas, (33) 522.  
   in northern Africa, (40) 234, 334.  
   in Rhodesia, (40) 526.  
   insects affecting, (40) 453, 649.  
   lipase in, (28) 610.  
   of Indo-China, analyses, (40) 627.  
   production and exploitation, (40) 334.  
   Pythium debaryanum affecting, (31) 51.  
   toxicity, (27) 378; (31) 80.  
   urease in, (30) 409.  
   varieties, (30) 434, 525.  
   yields, (39) 434.
- Castor oil—  
   as a vermifuge, (38) 883.  
   detection, (29) 613.  
   detection in ethyl alcohol, (29) 312.  
   determination of purity, (39) 109, 110, 416.  
   hydrolysis and constitution, (27) 804.  
   Indo-Chinese, acidity, (39) 504.  
   physical constants, (35) 312.  
   plant, treatise, (40) 234.  
   production in United States, (40) 614.
- Castor pomace—  
   availability of nitrogen in, (35) 426.  
   fertilizing value, (30) 835; (37) 144, 321.
- Castration—  
   effect on—  
     blood of animals, (26) 83.  
     growth of bones, (26) 471.  
     horn growth in sheep, (29) 772; (31) 867.  
     internal organs, (29) 168.  
     internal secretion glands of rabbits, (34) 864.  
     man and domestic animals, (28) 571.  
     sheep, (27) 70.  
     size of cells, (26) 364.  
   in birds, (40) 871.  
   of animals, treatise, (32) 578; (33) 176; (34) 477.  
   parasitic, in Membraecidae, (26) 148.  
   relation to secondary sexual characters in Brown Leghorns, (29) 69.  
   relation to transmissible tumors of rats and mice, (30) 167.
- Casuarina—  
   insects affecting, (28) 753.  
   trees, borer injury (40) 860.
- Cat flea, *see* Ctenocephalus felis, *and* Fleas.
- Cat-tail rush as summer host of insects, (37) 461.
- Catalase—  
   activity and respiration in sweet corn, (39) 524.  
   activity in etherized bulbs and tubers, (30) 728.  
   activity of tissues in avian polynneuritis, (40) 563.  
   and oxidase reactions, separation, (36) 503.  
   as affected by inorganic salts, (26) 504.  
   chemical nature, (33) 311.  
   determination, (26) 204; (31) 413.  
   in blood as affected by—  
     acetone and certain acids, (40) 766.  
     alcohol, (40) 364.  
     food ingestion, (40) 364, 365, 766.  
   in butter, (29) 508.  
   chicken fat, (28) 63.  
   eggs, (28) 64.
- Catalase—Continued.  
   in liver, effect of emotions on, (38) 167.  
   milk, (26) 112, 507; (28) 611.  
   milk, factors affecting, (35) 10.  
   sterile milk, (28) 411.  
   tissues during starvation, (38) 869.  
   tissues during thyroid feeding, (38) 870.  
   increasing and inhibiting activity of, (28) 504  
   localization in marine algae, (31) 626.  
   notes, (27) 109.  
   plant, physiology of, (26) 803.  
   production, action of vitamin on, (40) 563.  
   relation to oxidase in plant tissue, (36) 610  
   role in—  
     acidosis, (38) 870.  
     plant respiration, (34) 523; (36) 329.  
     plants, (27) 526.  
     separation of peroxides from, (27) 408.  
     solution, destruction by erepsin, (33) 311.  
     studies, (33) 409.  
   tests in dairy inspection, (27) 781.  
   use of term, (33) 329.
- Catalpa—  
   as affected by tarring roads, (26) 432.  
   cost of growing, (37) 451.  
   description and culture, (27) 346.  
   hardy, culture, (27) 147.  
   hardy, notes, (26) 51.  
   leaf spot, notes, (39) 353.  
   midge in Maryland, (38) 155.  
   speciosa, culture, (27) 147.  
   sphinx, notes, (26) 753; (28) 155, 353; (34) 755.  
   wood rots, notes, (27) 752.  
   wood rots, studies, (28) 551.
- Catalysis, treatise, (29) 504; (34) 312; (35) 801.
- Catalysts, oxidation by, (33) 329.
- Catalytic—  
   fertilizers for sugar beets, (26) 225.  
   fertilizers, studies, (27) 628.  
   substances, fertilizing value, (33) 841.
- Catalyzers—  
   biochemical, textbook, (32) 662; (38) 611.  
   use in destructive distillation of hardwoods, (38) 808.
- Catarrh—  
   in horses, treatment, (34) 881.  
   intestinal—  
     effect on milk, (32) 479.  
     immunization, (27) 582.  
     in cattle, (34) 575.  
     transference from mother to offspring, (27) 583.  
   laryngo-tracheal, in horses, (34) 480.  
   uterine, in a mare, (27) 684.  
   vaginal—  
     immunization, (30) 578.  
     in cows, treatment, (26) 285; (27) 886.  
     relation to abortion, (27) 287.  
     treatment, (27) 888.
- Catarrhal fever, malignant—  
   in cattle, (31) 381; (37) 80.  
   in horses and mules, (31) 287.
- Catasetum, flowers of, (35) 431.
- Catostoma spp., effect on vegetation, (38) 222.
- Catch crops, notes, (29) 331; (36) 529.
- Caterpillar plague in California, (26) 346.
- Caterpillars—  
   bacterial diseases of, (32) 554.  
   bag-shelter, injurious to horses, (26) 456.  
   defoliating, remedies, (31) 60; (32) 850.  
   dipterous parasites of, (32) 847.  
   flacherie and polyhedral disease of, (32) 851.  
   habits, (27) 559.  
   looper, notes, (30) 753.  
   range, studies, (36) 55.  
   red-humped, notes, (30) 157.  
   remedies, (26) 561.  
   studies, (26) 859, 860.  
   surface-feeding, locomotions, (40) 352.  
   treatise, (31) 850.  
   wilt disease of, (30) 252.  
   yellow bear, control by parasites, (37) 760.
- Catha edulis—  
   culture in Egypt, (34) 232.  
   description, (26) 139.
- Cathartics, saline, effect on metabolism, (28) 867.
- Cations—  
   bivalent, effect on permeability of protoplasm, (33) 328.  
   toxicity toward plants, (30) 128

- Catjang, notes, (26) 362.  
 Cato seed oil, physical constants, (35) 312.  
 Catoceala spp. affecting pecan, (38) 762.  
 Catocealinae in British Museum, catalogue, (31) 652.  
 Catochrypsops pandava, notes, (40) 260.  
 Catolacus townsendi n.sp., description, (30) 59.  
 Catophractes alexandri, analyses and digestibility, (27) 871; (32) 167.  
 Catorama mexicana, notes, (27) 155.
- Cats—  
 care and feeding, (28) 173.  
 color inheritance in, (40) 870.  
 destruction of wild life by, (36) 653.  
 dissemination of anthrax by, (28) 678.  
 ear, geographical distribution, (26) 335.  
 factors affecting pulse rate, (28) 768.  
 growth of, (30) 467.  
 mange affecting, (37) 584.  
 milk, composition, (40) 775.  
 morphology of blood, (28) 777.  
 mucous membrane of, (26) 480.  
 paralysis in, (26) 185.  
 parasites and diseases of, treatise, (31) 586.  
 relation to Rocky Mountain spotted fever, (27) 479.  
 reproductive organs of, (27) 369.  
 tortoise-shell, color inheritance in, (38) 269.
- Catsup—  
 bacteriological examination, (37) 468.  
 determination of sodium benzoate in, (27) 809.  
 manufacture, (32) 356.  
 methods of analysis, (32) 253, 298.
- Catatoes, notes, (31) 266, 566, 567.
- Cattle—*see also* Cows, Calves, Heifers, Steers, etc.  
 Aberdeen-Angus, economic importance, (38) 69.  
 Aberdeen-Angus, history, (33) 72.  
 Afrikander, notes, (34) 767.  
 Afrikander, origin and characteristics, (28) 670.  
 Algau-African crosses, notes, (29) 171, 369.  
 amoebae affecting, (27) 477.  
 anaphylactic shock due to ox warble extract, (36) 478; (37) 379.  
 anatomy and physiology of mammary glands, (26) 774.  
 ancestry, (27) 870.  
 ancestry, treatise, (28) 466.  
 as affected by—  
   certain alkaloids, (29) 476.  
   dips, (27) 477.  
   excessive wheat feeding, (36) 865.  
   frozen silage, (26) 570.  
   Hypoderma lineatum, (39) 157.  
 as draft animals, (38) 790.  
 Australian, worm nodules in, (26) 183.  
 Ayshire—  
   inheritance of aural abnormality in, (33) 873.  
   measurements and descriptions, (28) 467.  
   milk production in relation to advanced registry, (37) 775.  
   origin and characteristics, (33) 873.  
   sex-limited color in, (35) 272.
- barns—  
 for prairie farms, (35) 689.  
 plans, (31) 488.  
 ventilation, (32) 284.
- basal katabolism, (39) 270.  
 Bazadaise, notes, (31) 367.
- bee—  
 breeds, (32) 568.  
 care and management, (31) 266.  
 cost of raising, (35) 670; (39) 169.  
 feeding experiments, (39) 72, 168, 273, 370.  
 growth on limited ration, (40) 567.  
 maintenance, (38) 270.  
 raising in Pennsylvania, (35) 168; (39) 72.

wood, (39) 614.  
with nitric acid, (31) 17.  
digestibility, (26) 363; (29) 65; (35) 559.  
digestible, detection in feces, (27) 312.  
digestion by sheep and pigs, (31) 667.  
distillation in vacuo, (33) 708.  
distillation under reduced pressure, (40) 110.  
effect on soil bacteria, (30) 125, 217.  
effect on soil nitrogen, (35) 218.  
fermentation, (29) 528.  
fermentation by thermophilic bacteria, (31) 310.  
fermentative cleavage, (28) 802.  
for laying hens, (34) 179.  
from millet, (32) 117.  
furnace for incineration, (35) 206.  
humification, (38) 26.  
hydrolysis, (30) 615; (31) 310.  
in bacteria, (36) 501.  
in mixed rations, digestibility, (32) 70.  
manufacture from bamboo, (27) 647.  
manufacture from vine shoots, (26) 613.  
preparation and use, (30) 315.  
production from wood, (28) 50.  
studies, (29) 201.  
treatise, (30) 202; (37) 112; (39) 614.
- Cellulose—Continued.  
variations of in leaves, (29) 827.  
waste liquors as source of potash, (34) 328.  
Celosia empress as a host of eelworm, (34) 349.
- Cement—*see also* Concrete.  
as affected by—  
alkali, (27) 89; (28) 86; (37) 788.  
alkali salts and sea water, (29) 686.  
sulphid, (38) 691.  
various substances, (29) 891.  
asphalt, penetration tests, (34) 685.  
autoclave boiling test for, (28) 290.  
blended Portland, (38) 691.  
concrete in draintile, proportioning, (40) 787.  
determination of fineness, (30) 888.  
draintile, durability in alkali soils, (39) 86.  
draintile in alkali soils, (40) 386.  
dust—  
as source of potash, (37) 218, 630, 817.  
effect on citrus vegetation, (35) 313.  
effect on fruit trees, (27) 152; (31) 150.  
fume as source of potash, (34) 328.  
mill dust, fertilizing value, (39) 429.  
mills, potash from, (36) 625; (38) 123, 124; (39) 328, 329.  
mortar—  
action in different salt solutions, (35) 291.  
as affected by hydrated lime, (30) 889.  
as affected by lime, (40) 786.  
as affected by temperature, (33) 589.  
containing lime, tensile strength, (36) 286.  
paste, determination of consistency, (31) 91.  
Portland—  
control of initial setting time, (29) 488.  
high-pressure steam test for, (35) 687.  
methods of testing and of analysis, (29) 290.  
mortars and concretes, (39) 86.  
setting and hardening, (28) 891.  
specifications, (29) 290.  
thermal activities in during setting, (31) 91.  
rollers, construction, (29) 688.  
sand, investigations, (29) 183.  
sand, manufacture, (30) 689.  
sieves, tests, (30) 888.  
specifications, (37) 386.  
storage, (27) 386.  
testing, (31) 91.  
tests of strength, (30) 87.  
tile, curing, (27) 586.  
tile, solubility, (31) 92.  
treatise, (35) 289.  
tufa, tests, (28) 589.  
use in farm structures, (34) 787.  
use in irrigation structures, (37) 787.  
vats, coatings for, (34) 287.  
works, by-product potash, (40) 128.
- Cenangium abietis—  
injurious to white pines, (26) 752.  
notes, (28) 750; (32) 845.
- Cenchrus echinatus, notes, (26) 361.
- Centaurea—  
cyanus—  
coloration of flowers, (31) 324.  
effect on yield of rye and barley, (30) 531  
scabiosa, root system, (37) 542.  
spp., drought resistance, (36) 734.
- Centipedes—  
and their venom, (35) 858.  
house, notes, (32) 353.  
summary of information, (39) 768.
- Centistidea ectoedemiae n.sp., description, (31) 554
- Centothea malabarica, notes, (26) 361.
- Central Moor Commission, report, (31) 830.
- Centralblatt für Bakteriologie, index, (27) 476.
- Centrifugal force, effect on chemical systems, (28) 168.
- Centrifuge, use in analytical chemistry, (36) 111.
- Centro-epigenesis, notes, (26) 365.
- Centrosema—  
plumieri as a green manure, (36) 324.  
plumieri, fertilizing value, (34) 34.  
pubescens, culture, (34) 736.
- Cephaelin derivatives, protozoocidal and bacteri-  
cidal action, (38) 180.
- Cephalandria indica, analyses, (31) 366.
- Cephaluros—  
henningsii, description, (27) 450.  
mycoidea, notes, (29) 345; (39) 849.  
notes, (30) 354.  
sp. on rubber, (33) 449; (38) 53.

- Cephaluros—Continued.  
*virescens*—  
 in Sumatra, (39) 57.  
 notes, (31) 55; (32) 445; (34) 55, 249, 744;  
 (37) 253; (38) 354, 758.  
 on cacao, (40) 851.
- Cephalin—  
 fatty acids of, (31) 608.  
 thromboplastic action, (37) 877.
- Cephalobus dubius, studies, (40) 267.
- Cephalocroton püschelii, analyses and digestibility,  
 (32) 167.
- Cephalonema polyandrum, fiber from, (37) 535.
- Cephalonomia meridionalis n.sp., description, (31)  
 355.
- Cephalosporium—  
*lecanii*—  
 description, (33) 459.  
 notes, (26) 533; (27) 358; (28) 453.  
*lefrovi*, association with greenhouse white fly,  
 (34) 452.  
*sacchari*—  
 n.sp., description, (30) 650.  
 notes, (34) 49; (35) 49; (37) 452; (40) 47, 157.  
 sp., notes, (28) 733.  
 sp. on coffee, (32) 646.
- Cephalothecium—  
 infection of wheat by, (26) 747.
- roseum—  
 as affected by cold, (34) 538.  
 notes, (31) 641; (37) 550.  
 relation to apple rot, (33) 348.  
 temperature relations, (33) 545; (36) 649.  
 sp. on pecan, (39) 553.
- Cephenomyia—  
*abdominalis* n.sp., description, (34) 64.  
 biology, (37) 565.  
*pratti* n.sp., description, (34) 554.
- Cephalidae larvae, notes, (40) 655.
- Cephus—  
 American species, (40) 655.  
 occidentalis, habits, (37) 855.  
 occidentalis, studies, (34) 250.
- Cerambycid larvae—  
 determination of abdominal and thoracic areas,  
 (36) 258.  
 Henriksen's review, (34) 361.
- Cerambycidae—  
 North American, classification and biology,  
 (33) 360.  
 of California, (40) 861.
- Cerambycobius—  
*cyaniceps*, notes, (26) 861.  
*townsendi* n.sp., description, (30) 59.
- Cerambycoidea, notes, (27) 756.
- Cerambyx heros, biology, (36) 257.
- Ceramica picta, notes, (40) 648.
- Ceraproceroideus cinctipes n.g. and n.sp., descrip-  
 tion, (35) 761.
- Ceratitidis—  
 African species, (29) 760.
- capitata—  
 breeding in bananas, (29) 54.  
 control by poisoned bait, (34) 360.  
 control in Hawaii, (34) 758.  
 danger of introduction, (39) 467.  
 development in lemons, (35) 259.  
 in environs of Paris, (35) 259.  
 in Hawaii, (38) 658; (40) 62.  
 notes, (27) 359; (28) 62, 657; (29) 234, 257;  
 (30) 361, 845; (34) 856; (37) 565.  
 parasites of, (35) 760; (38) 659.  
 remedies, (29) 656; (31) 757.  
 studies, (32) 56, 655.  
 trapping and poisoning, (40) 356.  
 spp. in Africa, (31) 455.
- Ceratocampidae, monograph, (32) 850.
- Ceratodon purpureus, direct assimilation of organic  
 carbon, (40) 325.
- Ceratodrilus thysanosomus n.g. and n.sp., descrip-  
 tion, (35) 254.
- Ceratonia—  
*amyntor*, life history, (32) 850.  
*catalpae*, see *Catalpa* sphinx.
- Ceratonia siliqua, see *Carob*.
- Ceratophyllum demersum, culture for wild ducks,  
 (33) 251.
- Ceratophyllum—  
*acutus*, transmission of plague-like disease by,  
 (26) 461.
- Ceratophyllum—Continued.  
*famulus*, notes, (37) 879.
- fasciatum*—  
 biology, (27) 58.  
 bionomics of, (31) 353.  
 distribution on rats, (29) 755.  
 life history, (31) 552.  
 longevity of, (30) 757.  
 notes, (28) 255, 356; (33) 159.  
 relation to plague, (33) 749.  
 remedies, (31) 353.  
*gallinae*, see *Hen* flea.  
*silantiewi*, relation to plague, (26) 252.  
 spp., notes, (28) 757.
- Ceratopogoninae—  
 blood-sucking, of Brazil, (29) 54; (32) 450.  
 new, from Peru, (34) 553.  
 notes, (31) 455; (32) 851.  
 review of literature, (30) 159.
- Ceratostoma juniperinum in France, (37) 253.
- Ceratostomella spp., studies, (27) 354.
- Cerceris—  
 n.spp., notes, (35) 262.  
 spp., bionomics, (35) 468.
- Cerchysius—  
 females, of America, (39) 364.  
 sp., parasitic on black scale, (26) 555.
- Cercidiphyllum japonicum, food plant of purple  
 scale, (26) 756.
- Cercis—  
*canadensis*, relation between ovules and seeds,  
 (31) 523; (33) 130; (36) 628.  
 fruit, physico-chemical constants of, (31) 427.
- Cercomonas termo, notes, (29) 316.
- Cercopeus artemisiae, notes, (35) 364.
- Cercopids of Trinidad, (30) 250.
- Cercospora—  
*acrocorniae* n.sp., description, (39) 52.  
*agatidis* n.sp., description, (30) 51.  
*aleuritidis* n.sp., description, (27) 848.  
*apii*, see *Celery* blight.  
*beticola*—  
 climatic conditions affecting, (35) 47.  
 description and treatment, (28) 847.  
 effect on composition of sugar beets, (31)  
 436.  
 notes, (28) 649; (29) 153; (30) 47; (32) 50;  
 (33) 851; (35) 245, 350, 750; (37) 249.  
 studies, (34) 845; (40) 344.  
 treatment, (26) 648; (29) 48.  
*carbonacea* n.sp. on yam, (39) 248.  
*cearae*, notes, (28) 241.  
*cerasella*, notes, (27) 849.  
*chrysanthemii* n.sp., description, (27) 848.  
*citrullina* on watermelons, (35) 749.  
*coffeicola*, notes, (30) 751; (31) 646; (32) 645, 749;  
 (38) 51.  
*concois*, description, (28) 548.  
*coryli* n.sp., description, (37) 550.  
*cucurbitae*, notes, (37) 550.  
*epigaeina*, notes, (26) 341.  
*fraxini*, notes, (35) 454.  
*fusca*, description, (30) 452.  
*fusca*, treatment, (37) 756; (39) 553.  
*guizotiae* n.sp., description, (35) 454.  
*helvola* medicaginis, notes, (28) 52.  
*herreraana* n.sp., description, (35) 353.  
*heveae* n.sp., notes, (37) 253.  
 leaf spots in Indiana, (39) 52.  
 longipes, studies, (38) 851.  
*lumbrioides* n.sp., description, (35) 45.  
*medicaginis*, dissemination, (36) 450.  
*melonis*, notes, (32) 641.  
*melonis*, studies, (35) 750.  
*musae*, notes, (36) 347; (38) 651.  
 n.spp., descriptions, (37) 748.  
 n.vars., descriptions, (37) 749.  
*nicotiana*, notes, (30) 47.  
 on celery, (39) 753.  
*persicae*, notes, (27) 850.  
*personata*—  
 notes, (29) 347; (33) 741; (37) 349, 452, 551.  
 studies, (32) 546; (34) 645.  
*raciborskii*, notes, (36) 348.  
*sacchari*, notes, (29) 345; (40) 51.  
 sp. on grapes (36) 541.  
 sp. on jute, (36) 348.  
 sp. on pistachio, (34) 843.  
 spp., notes, (32) 749; (39) 453.  
 spp. on pigeon peas, (34) 52.

- Cercospora**—Continued.  
 spp. on sugar cane, (38) 550; (40) 157.  
 theae, notes, (33) 545.  
 vaginae, notes, (26) 445; (29) 45; (30) 541; (36) 846; (40) 47.  
 vaginae, studies, (38) 851.  
 vignae, notes, (35) 749.  
 vitiphylla, notes, (36) 647.  
 zygophylli n.sp., description, (35) 844.
- Cercosporella**—  
 epimediæ n.sp., description, (35) 454.  
 herpoticoides, notes, (27) 747; (37) 248.  
 lini n.sp., description, (35) 454.
- Cercosporina ricinella**, notes, (33) 545.
- Cereal**—  
 black stem rust, notes, (37) 552.  
 cropping, relation to soil sanitation, (29) 516; (32) 0.  
 crops, native, in Punjab, (40) 230.  
 diseases—see also *specific hosts*.  
 and pests, review, (36) 542.  
 descriptions, (30) 351.  
 in Italy, (38) 351.  
 Russia, (34) 842.  
 Saxony, (32) 749.  
 Switzerland, (37) 47.  
 notes, (29) 242, 845; (31) 841; (39) 452; (40) 344, 747.  
 reducing losses from, (39) 454.  
 review of literature, (30) 648.  
 studies, (30) 846.  
 treatment, (32) 545; (34) 541; (35) 46; (37) 247.  
 downy mildews, notes, (30) 845.  
 "drunk bread" disease, notes, (34) 842; (35) 453.  
 dry spot, relation to fertilizers, (29) 46.  
 dust as a feeding stuff, (30) 565.  
 dust explosions, (36) 686.  
 Field Station in California, (29) 99.  
 fly, winter, control in Kief, (38) 257.
- foods**—  
 analyses, (34) 661; (35) 558, 859.  
 dietary deficiencies, (38) 869.  
 examination, (30) 664; (31) 760.  
 history, (36) 560.  
 nutritive value and cost, (38) 663.  
 preparation, (38) 365.  
 use in the diet, (37) 668.
- foot disease**, investigations, (30) 747.
- foot rot or stalk disease**, notes, (30) 648; (32) 145, 545, 641, 843; (33) 445.
- foot rot or stalk disease**, studies, (31) 542; (33) 51.
- hybrids**, unusual, (30) 525.
- leaf beetle**, life history and control, (34) 857.
- leaf spot**, notes, (29) 46.
- leaf spot**, studies, (28) 545.
- market of Rotterdam**, (39) 797.
- mildew in France**, (34) 243; (35) 149.
- mildew**, notes, (36) 846; (40) 844.
- of ancient America**, (39) 532.
- pathologists**, conference, (39) 549.
- products**—  
 ash analyses, (29) 861.  
 determination of acidity, (36) 299.  
 insects affecting, (32) 246.  
 methods of analysis, (29) 799.  
 middlemen's function in, (33) 787.
- proteins**, effect on growth, (33) 465.
- rust fungi**, teleutospore formation, (34) 745.
- rust in Denmark**, (36) 247.
- rust**, treatment, (26) 846.
- rusts**—  
 control, (39) 52.  
 culture experiments, (30) 846.  
 germination of uredospores, (27) 149.  
 in Canada, (34) 51.  
 in South America, (36) 542.  
 notes, (32) 340.  
 overwintering and distribution in South America, (38) 148.  
 propagation, (31) 842; (33) 145.  
 resistance to, (40) 745.  
 specialization, (37) 149.  
 studies, (31) 146; (33) 245, 345, 546; (36) 542; (40) 249, 641.  
 wintering over, (33) 445, 546.
- seedlings** as affected by narcotics, (31) 730.
- smuts**—  
 in Argentina, (38) 148.  
 life history and treatment, (28) 445.  
 notes, (32) 340; (40) 845.
- Cereal**—Continued.  
 smuts—continued.  
 spore germinations of, (31) 642.  
 treatment, (38) 648; (39) 245, 353.  
 snow mold, studies, (29) 47, 244.  
 stalk disease, investigations, (28) 445.  
 station in California, (28) 98.  
 stem rot, notes, (31) 147.  
 streak disease, treatment, (35) 149.  
 zapal or zakvat, studies, (29) 244.
- Cereals**—see also *Barley, Oats, Wheat, etc.*  
 analyses, (26) 45.  
 ancient classification, (31) 830.  
 and cereal products, methods of analysis, (33) 258.  
 and leguminous plants, associative growth, (28) 720.  
 area and production, 1907–1911, (26) 792.  
 as affected by—  
 parasitic fungi, (31) 541.  
 precipitation and temperature, (28) 41.  
 rain and temperature, (27) 15.  
 soil volume and available plant food, (31) 132.  
 soils, (26) 814.  
 behavior toward fungi, (32) 426.  
 bread-making value, (32) 760.  
 breeding, (28) 633, 828.  
 breeding—  
 and improvement in Sweden, (39) 833.  
 and improvement in Uruguay, (39) 835.  
 experiments, (29) 226; (31) 830; (33) 331, 831.  
 experiments, methods, (40) 232.  
 for drought resistance, (28) 537.  
 for rust resistance, (28) 537; (39) 550.  
 chlorophyll content, variations in, (32) 220.  
 cold resistance of, (30) 524.  
 competition in, (27) 430.  
 consumption, 1902–1911, (40) 93.  
 cooked, analyses, (29) 660.  
 culture, (30) 435; (37) 96.  
 culture—  
 after soil sterilization, (28) 537.  
 continuous, (27) 734; (31) 226.  
 experiments, (26) 131; (27) 438; (29) 226, 331, 425; (31) 732, 733; (32) 528; (33) 227, 633; (34) 736; (37) 733; (38) 433, 527; (39) 128; (40) 624.  
 in Argentina, (40) 625.  
 Hawaii, (32) 730.  
 India, (29) 736.  
 Novo-Russia, (26) 535.  
 Texas Panhandle, (29) 428; (35) 440.  
 Washington, Oregon, and Idaho, (38) 824.  
 Wyoming, (36) 33.  
 under dry farming, (33) 632; (39) 736.  
 under irrigation, (28) 839.  
 cytological studies, (26) 325.  
 detection of ustilaginous spores in, (26) 408.  
 determination of—  
 moisture in, (27) 713.  
 smut spores in, (36) 146.  
 specific gravity, (28) 22.  
 digestibility, (33) 361.  
 disease resistance in, (36) 145.  
 effect of root development on tillering power, (27) 231.  
 embryology, (30) 633.  
 fermentation in, (29) 269.  
 fertilizer experiments, (26) 331, 425, 733; (28) 828; (30) 229, 626; (31) 29, 133, 226, 328, 733; (32) 37, 622, 630; (37) 323, 521, 827; (38) 433, 527; (40) 624.  
 fertilizers for, (32) 827.  
 fertilizing value, (31) 320.  
 frost injury, (31) 541, 542; (38) 148.  
 Fusarium diseases of, (28) 446.  
 germination in light and darkness, (30) 633.  
 green manuring experiments, (40) 24.  
 ground, handbook, (29) 564.  
 growth—  
 as affected by meteorology, (29) 510.  
 in association with weeds, (38) 734.  
 studies, methods, (38) 526.  
 hail injuries to, (33) 127.  
 harrowing experiments, (26) 331.  
 heredity of albinism in, (31) 329.  
 history of, (31) 131.  
 hybridization experiments, (26) 733; (34) 228.

## Cereals—Continued.

- identification, (36) 541.  
improvement, (32) 333.  
improvement—  
  at Svalof, (40) 823.  
  by selection, (29) 532.  
  in Italy, (37) 827.  
in the diet, (40) 762.  
insects affecting, (27) 452; (30) 53; (33) 746; (34) 651; (37) 156, 895; (38) 459, 556.  
international statistics, (33) 396.  
introduction into Philippines, (27) 537.  
irrigation, (29) 736.  
irrigation experiments, (28) 828; (29) 226; (38) 631; (40) 331.  
laboratory manual, (30) 696; (34) 598.  
light v. heavy kernels, (28) 536.  
liming experiments, (30) 724.  
lodging in relation to vascular bundles, (33) 332.  
lodging, prevention, (30) 136.  
maltase content, (31) 204.  
"May-sick" disease of, (30) 399.  
mechanical winter covering, (37) 48.  
microscopy of, (32) 715.  
of Chile, (38) 336.  
of India, malting capacity, (40) 808.  
paper carton for protection from insect attack, (30) 53.  
phosphorus content, (26) 501.  
planting and harvesting dates, (26) 532.  
prices in Bern, (32) 162.  
prices in France for 1919, (40) 390.  
production in—  
  arid districts, (40) 523.  
  Nebraska, (40) 194.  
  1913, (31) 392.  
  Spain, (30) 791; (35) 393; (37) 827; (40) 434, 594, 793.  
purchasing and use, (38) 867.  
pure line breeding, (35) 831.  
pure types, variation in, (30) 334.  
purin content, (40) 205.  
recipes, (37) 670.  
resistance to diseases and insects, (26) 246.  
right- and left-handedness in, (30) 335.  
ripening under wire netting, (30) 633.  
root development, (30) 630.  
root systems of, (31) 515, 830; (39) 230.  
secondary rootlets, (40) 32.  
seed, cleaning and grading, (30) 488.  
seed production, (31) 524.  
seedling experiments, (32) 36.  
selection experiments, (40) 330.  
selection, rod-row system, (40) 232.  
sensitiveness to fungicidal treatment, (29) 151.  
small v. large seed, (38) 229.  
snow mold affecting, (31) 343.  
spring-sown, culture experiments, (36) 830.  
spring-sown, varieties, (36) 830.  
stalk formation studies, (31) 227.  
statistical notes, (40) 625.  
statistics, international, (34) 290.  
stooling in, (30) 235.  
stored, insects injuring, (39) 463.  
straw blight affecting, (27) 747.  
studies, (40) 232, 233.  
temporary roots in, (35) 135.  
textbook, (32) 659.  
use in the dietary, (29) 862.  
varietal differences in, (31) 227.  
varieties, (26) 733; (27) 438; (28) 828; (29) 138, 226, 426, 427; (30) 229, 829; (31) 133, 732, 829; (32) 37, 132, 630; (33) 831; (34) 736; (37) 733; (38) 433.  
varieties, new Swedish, (39) 833.  
variety tests, (39) 128, 334, 337, 799; (40) 330.  
variety tests, new method for, (31) 830.  
water content as affected by cooking, (26) 462.  
water requirements, (31) 729; (38) 227.  
winter, rest period in, (30) 732.  
wintering of, (26) 733.  
winterkilling, (38) 415; (39) 430, 441; (40) 329.  
yields, analysis, (28) 536.
- Cerebrospinal—  
fever organism, agglutination test, (40) 82.  
meningitis—  
  epizootic, in horses, (28) 784.  
  in horses, (26) 786; (27) 684; (28) 184, 783; (29) 304, 499, 587; (30) 285, 685.

## Cerebrospinal—Continued.

- meningitis—continued.  
  outbreak in Kansas and Nebraska, (29) 587.  
  studies, (28) 378, 886.  
Cerebrum, effect on metabolism of matter and energy, (30) 466.  
Ceresa—  
  basalis, notes, (32) 651.  
  bubalus, see Buffalo tree hopper.  
  militaris n.sp., description, (38) 858.  
  sp., notes, (32) 651.  
  spp. north of Mexico, (38) 858.  
  spp. ovipositing in apple, (38) 156.  
Cereus—  
  flowers, self-warming in, (36) 226.  
  forbesii as a host of mistletoe, (29) 352.  
Cerin, notes, (31) 312.  
Cerium—  
  effect on development of seedlings, (31) 325.  
  effect on permeability, (34) 34.  
  effect on Spirogyra, (38) 27.  
  oxid; effect on germination of seeds, (29) 528.  
  salts, effect on wheat, (31) 218.  
Cerodonta—  
  dorsalis, studies, (36) 256; (40) 169.  
  femorals, notes, (37) 255.  
  femorals, studies, (37) 160.  
Cermasia sphenophori—  
  introduction into Hawaii, (33) 256; (36) 257.  
  life history and breeding, (32) 350.  
Ceropales foxii n.sp., description, (36) 551.  
Ceroplastes—  
  cirripediformis, notes, (28) 453.  
  grandis in Argentina, (40) 165.  
  janelensis, notes, (30) 657.  
Ceroplastodes deani n.sp., description, (39) 255.  
Cerotoma—  
  ruficornis, studies, (37) 256.  
  trifurcata, see Bean leaf-beetle.  
Cerotrioza n.g., erection, (40) 262.  
Cervus—  
  elaphus, notes, (27) 371.  
  spp., breeding experiments, (29) 171.  
Cesspool and septic tank combined, description, (31) 190.  
Cesspools, construction, (36) 892.  
Cestode parasites, new, of fowls, (33) 775.  
Cestodes—  
  avian, new species, (34) 281.  
  avian, studies, (26) 561.  
  injurious to muskrats, (29) 484.  
  life history, (37) 163.  
  of Australia, (32) 399.  
  parasitic in birds, (31) 184.  
  parasitic in equines, (27) 553.  
  polyradiate, notes, (37) 361.  
  protocephalid, monograph, (32) 853.  
  reproduction, (39) 655.  
Ceuthophilus pacificus, notes, (27) 658.  
Ceuthospora punicea, notes, (37) 550.  
Ceutorhynchus—  
  marginatus, notes, (36) 555; (37) 568.  
  pleurostigma (sulcicollis), notes, (35) 467.  
  portulacae n.sp., description, (35) 365.  
Chaeromeros humuli, notes, (28) 754.  
Chaeretymma minuta n.sp., description, (38) 565.  
Chaetocerotostoma hispidum n.g. and n.sp., notes, (40) 160.  
Chaetocnema—  
  ectypa, notes, (33) 746.  
  ectypa, studies, (36) 658.  
  quadricollis, studies, (40) 754.  
  spp., notes, (26) 856.  
Chaetodiplodia—  
  anthurii n.sp., description, (37) 550.  
  nonvalidity of genus, (34) 242.  
Chaetogedia monticola, notes, (27) 656.  
Chaetomidium barbatum n.sp., description, (34) 245.  
Chaetomium spirochaete on sweet peas, (32) 446.  
Chaetophorus spp., notes, (28) 655.  
Chaetopsis aenea, see Onion fly, barred-winged.  
Chaetospaeria eximia n.sp., notes, (37) 148.  
Chaetothyrium colchicum n.sp., description, (36) 245.  
Chaff scale, notes, (28) 854.  
Chafing-dish dainties, salads, and sandwiches, (32) 860.  
Chagas disease in Argentina, studies, (34) 580.

- Chaitophorus—  
 acris, biology and anatomy, (37) 55.  
 delicata n.sp., description, (29) 654.  
 japonicus n.sp., description, (40) 165.  
 maculatus, studies, (32) 247.  
 negundinis, *see* Box elder aphid.  
 spp., dimorphs, (40) 165.
- Chalaropsis thielavioides n.g. and n.sp., description, (39) 53.
- Chalastogastra, classification, (26) 863.
- Chalcid—  
 flies—  
   in alfalfa seed, (32) 454.  
   new, of Australia, (37) 569; (38) 768.  
   new, of California, (37) 360, 467.  
   new, of Maryland, (37) 766.  
   new, of North America, (38) 565.  
   of North America, (37) 162.  
   West Indian and North American, (39) 869.  
 parasites, immunity to hydrocyanic gas, (38) 460.
- Chalcididae—  
 of Australia, (39) 154.  
 of wild fig in India, Ceylon, and Java, (38) 565.
- Chalcids—  
 injurious to forest tree seeds, (28) 657.  
 injurious to grain crops in Russia, (33) 563.  
 new, from Maryland, (36) 556.
- Chalcidoidea—  
 bred from *Glossina morsitans* in Northern Rhodesia, (35) 263.  
 new, of West Coast of Africa, (37) 667.  
 notes, (26) 152.  
 of Australia, (28) 563.  
 phoresy in, (40) 459.
- Chalcis—  
 abiesae, notes, (40) 760.  
 amenocles from *Glossina*, (39) 566.  
 calliphorae, description, (36) 360.  
 calliphorae, notes, (38) 466.  
 coloradensis, parasitic on locusts, (32) 60.  
 compsilurae n.sp., description, (29) 562.  
 hammari n.sp., description, (34) 66.  
 obscurata, notes, (26) 758.  
 ovata, parasitic on alfalfa caterpillar, (32) 58.  
 pandora n.sp., description, (31) 459.  
 pomonae n.sp., description, (28) 162.  
 sp., notes, (26) 151.  
 thracis, parasitic on banana leaf roller, (26) 857.
- Chalcoedermis aeneus, notes, (37) 659.
- Chalcophora mariana, notes, (27) 863.
- Chalepus—  
 dorsalis, notes, (29) 353; (30) 657; (36) 257.  
 rubra, notes, (40) 357.  
 spp., notes, (28) 157; (35) 356.
- Chalcoedoma spp., treatise, (32) 758.
- Chalioides junodi, notes, (29) 758.
- Chalk—  
 as neutralizer for sour milk bacteria, (29) 877.  
 deposits in Yonne, France, (27) 422.  
 effect on soil fertility, (32) 399; (34) 221.  
 fertilizing value and use, (40) 322.  
 ground, for grassland, (40) 824.  
 use on clay soils, (36) 519.
- Chalognus osborni n.sp., studies, (40) 265.
- Chamaebatia foliolosa, effect on forest reproduction, (40) 842.
- Chamaecrista diphylla, culture, (34) 736.
- Chamaecyparis—  
 nootkatensis, biennial fructification, (29) 543.  
 obtusa, fertilizer experiments, (38) 624.  
 obtusa wood, essential oil of, (34) 802.
- Chamber of Horticulture for Great Britain, (40) 500.
- Chamomile, dissemination by farm animals, (26) 839.
- Champagne—  
 composition in relation to effervescence, (35) 647.  
 effervescence of, (36) 113.
- Changa—  
 notes, (31) 452; (36) 355.  
 parasites of, (29) 653.  
 remedies, (33) 452.  
 studies, (38) 762.
- Chaparral—  
 biologic and economic aspects, (40) 842.  
 eradication by goats, (29) 543.
- Charadrius dominicus fulvus, migration, (27) 355.
- Charaeas graminis, notes, (38) 361.
- Charbon, *see* Anthrax.
- Charcoal—  
 action on sugar solutions, (36) 807.  
 as dressing for forest seed beds, (32) 748.  
 as filler for feeding stuffs, (30) 672.  
 as medium for plant growth, (33) 540.  
 burning in Japan, (35) 347.  
 decolorizing efficiency, (35) 612.
- Chard—  
 fertilizer experiments, (26) 631.  
 varieties, (26) 631.
- Chariaps xanthopsis, destructive to citrus plant lice, (26) 755.
- Charitopodinus n.g., erection, (40) 266.
- Charlock—*see* Mustard, wild.  
 oil, chemistry and use of, (35) 412.
- Chatopsis aenea, notes, (29) 454.
- Chaulognathus pennsylvanicus, fungus diseases of, (26) 252.
- Chayote—  
 culture experiments, (30) 632.  
 culture in Louisiana, (29) 534.  
 diseases, notes, (37) 755.  
 notes, (29) 461; (30) 532; (34) 835.
- Cheese—  
 acid rennet bacteria of, (26) 881.  
 acidity, (37) 373.  
 adulteration and misbranding, (28) 776.  
 American, in England, (35) 379.  
 analyses, (26) 80, 171, 479; (29) 59, 376, 863; (30) 208; (35) 558; (38) 781.  
 as affected by—  
   alkali water, (27) 283.  
   feeding stuffs, (27) 173.  
   salt, (28) 278.  
 bacterial flora, (27) 284.  
 "Bankrote," red coloring in, (29) 376.  
 bibliography, (31) 176.  
 blue-veined or Dorset "Viny", making, (33) 578.  
 box, description, (36) 874.  
 brands, State and National, (40) 476.  
 Brindza, bacteriology of, (33) 277.  
 brine salting, (30) 275.  
 brine-soluble compound in, (26) 212; (29) 805.  
 Brinsen, manufacture, (27) 679.  
 Bulgarian and Kaschkawal, description, (37) 273.  
 Bulgarian, manufacture and composition, (40) 777.  
 buttermilk, manufacture, (27) 74; (31) 874; (33) 382.
- Caerphilly—  
 manufacture, (30) 77.  
 manufacture and quality, (29) 676.  
 manufacture in Ireland, (26) 372.
- Jamembert—  
 bacterial studies, (35) 177.  
 control in France, (37) 176.  
 keeping, (27) 777.  
 manufacture, (30) 378; (32) 176.
- Cheddar—  
 analyses, (40) 865.  
 bacteria in, (31) 476.  
 changes in during ripening, (37) 373.  
 chemistry of, (28) 114.  
 cold storage, (27) 377.  
 factors affecting texture, (31) 576.  
 factors affecting yield and moisture content, (30) 877.  
 flavor of, (31) 476.  
 fruity or sweet flavor in, (31) 79.  
 manufacture, (29) 475; (40) 880.  
 manufacture from pasteurized milk, (27) 74; (28) 581; (29) 475; (31) 874; (33) 175.  
 prevention of polyneuritis by, (31) 762.  
 ripening studies, (27) 879; (28) 78, 879.  
 shrinkage in, (32) 270.
- Cheshire, manufacture, (26) 778; (31) 375.  
 chromogenic microorganisms of, (36) 477.  
 coating, (27) 377; (31) 375.  
 color, feeding to cows, (38) 680.  
 coloring experiments, (27) 777.  
 comparison of types, (29) 564.  
 composition, (26) 880; (28) 374.  
 composition and characteristics, (34) 380.  
 composition and quality, (36) 663.  
 control in Holland, (31) 376.  
 cost of making, (26) 82; (27) 377.  
 cottage, (39) 267.

## Cheese—Continued.

- cottage—  
 as a food, (37) 669.  
 making, (37) 686; (38) 78, 178.  
 metallic flavor in, (35) 277.  
 recipes, (39) 267.
- Coulommier, manufacture, (27) 375; (29) 777; (33) 765.
- cow pot, analyses, (28) 278.
- cream—  
 fat content, (26) 778.  
 manufacture, (27) 375.  
 manufacture and analyses, (32) 176.  
 curd, iron content, (27) 811.  
 curd knife, description, (31) 875.  
 Danish, fat content, (33) 81.  
 decomposition by enzymes of rind flora, (32) 175.  
 descriptions and requirements, (35) 110.  
 determination of—  
 acidity, (31) 613.  
 fat content, (26) 276; (27) 312.  
 proteolysis in, (30) 415.  
 total solids, (32) 414.  
 determining yield of, (26) 478.  
 digestibility as compared with beef, (26) 761.  
 diminution of fats in during ripening, (31) 475.  
 discoloration, studies, (26) 479.  
 dishes, recipes, (31) 656.  
 Dorsel-Blue, manufacture and quality, (29) 676.
- Edam—  
 composition and control, (34) 273.  
 "cracking" of, (36) 673; (37) 176.  
 factors affecting water content of curd, (30) 179.  
 faulty "Knijpers" in, (30) 179.  
 investigations, (27) 678.  
 preparation, (37) 373.
- Emmental—  
 bacteria in, (31) 478, 772.  
 composition, (28) 278.  
 discoloration of, (26) 479.  
 formation of eyes in, (37) 875.  
 gases of, (28) 77.  
 gassy fermentations in, (31) 477, 772.  
 manufacture, (26) 872; (28) 475, 583; (30) 778; (32) 870.  
 starters for, (32) 776.  
 estimating yield, (28) 177.  
 examination, (30) 664.  
 experiment station at Lodi, report, (28) 374.
- exports—  
 and imports of Canada, (30) 574.  
 from Canada, (29) 673; (39) 283.  
 from Italy, (30) 575.
- eye formation in, (28) 77.
- factories—  
 construction, (32) 889.  
 cooperative, in Minnesota, (38) 178.  
 cooperative, in Wisconsin, (28) 895; (38) 293.  
 cooperative, organization, (32) 893.  
 in Minnesota, (37) 777.  
 in Norway, (29) 897.  
 in Wisconsin, (30) 679.  
 inspection in Virginia, (30) 74.  
 instruction and inspection, (36) 476.  
 law in Ohio, (33) 662.  
 payment for milk at, (28) 776; (30) 476.  
 plans, (27) 573; (31) 675.
- fat content standard for, (30) 476.  
 fat tester for, (33) 314.  
 Finnish egg, manufacture, (28) 258.  
 Fontina, manufacture, (28) 374.  
 food value, (37) 669.  
 fresh cream, making, (30) 275.  
 from buttermilk, (40) 379.  
 carabao's milk, composition, (31) 374.  
 milk mixtures, fat and casein content, (33) 475.  
 mixed and unmixed milks, (31) 475.  
 pasteurized milk, (28) 675; (29) 674; (33) 382; (37) 576; (39) 282, 582.  
 sheep and buffalo milk, analyses, (27) 575.  
 gas formation in, (36) 673.  
 Gervais, analyses, (26) 578.  
 Gervais, making, (39) 582.  
 Gloucester, manufacture and quality, (29) 676.  
 Gouda, analyses, (30) 575.  
 Gouda, composition and control, (34) 273.

## Cheese—Continued.

- Grana—  
 manufacture, (30) 275; (33) 876; (34) 572.  
 or Parmesan, manufacture, (28) 583; (29) 777.  
 or Parmesan, pure cultures for, (27) 283.  
 warm-chamber method of making, (29) 880.
- gray, manufacture in the Tyrol, (27) 377.  
 green color in, (28) 583.  
 green mold, flavor of, (26) 775.  
 Harz, dark coloration in, (26) 675.  
 Herrgård, notes, (35) 379, 483.  
 Holland, digestibility, (28) 258.  
 homemade, manufacture, (29) 675.  
 Hungarian, analyses, (26) 372.  
 imports into Peru, (27) 469.  
 imports into United Kingdom, (26) 479.
- industry—  
 in Canada, (38) 294.  
 Ireland, (26) 372.  
 Netherlands, (28) 178.  
 New Zealand, (38) 281.  
 Siberia, (37) 778.  
 United Kingdom, (28) 178.  
 United States, (30) 777, 791.  
 refrigeration in, (27) 377.  
 international trade in, (27) 574.  
 Italian, fat content, (33) 81.  
 Jack, manufacture, (27) 377; (40) 576.  
 judging by score cards, (27) 74.  
 Königsberg, analyses, (34) 572.
- Liptauer—  
 microflora of, (32) 473.  
 or Brinsen, analyses, (28) 278.  
 ripening, (30) 275.
- making, (26) 479; (33) 175; (34) 573; (36) 574.
- making—  
 at Lodi Experiment Station, (29) 777.  
 Bacillus bulgaricus in, (31) 772.  
 experiments, (27) 779; (30) 76; (31) 675, 875.  
 (34) 875.  
 experiments in Quebec, (36) 574.  
 ferment serum for, (29) 280.  
 guide, (28) 475.  
 high v. low testing milk for, (34) 473.  
 homogenized cream for, (40) 576, 865.  
 in northern Europe, (30) 177.  
 Norway, (35) 379.  
 Philippines, (39) 785.  
 South America, (34) 572.  
 South Australia, (29) 280.  
 southern mountain districts, (39) 486.  
 Sweden, (26) 477.  
 the home, (30) 275; (38) 580.  
 Vermont, (36) 877.
- lactic ferment cultures in, (31) 375.  
 notes, (28) 371, 374; (32) 175; (35) 483; (36) 176.  
 on the farm, (35) 573; (37) 778; (40) 675, 879.  
 selected ferments in, (29) 777; (33) 277, 577.  
 starters for, (28) 374.  
 starters, propagation, (26) 299.  
 treatise, (40) 283.  
 use of pathological milk, (26) 676.  
 use of pepsin in, (37) 175, 875; (39) 884.  
 with definite fat content, (36) 176.
- manufacturing and marketing association, cooperative, (37) 594.  
 marketing, (29) 675; (31) 893; (36) 378.  
 marketing by parcel post, (39) 182.  
 marketing cooperatively, (26) 92.  
 markets and prices, (33) 383.  
 marking regulations in Italy, (27) 179.  
 Marolle, analyses, (26) 778.  
 mass, consistency, (27) 678, 679.  
 methods of analysis, (28) 612; (29) 810; (31) 114, 811; (32) 313; (33) 208, 258; (35) 110.  
 milk, pasteurization, (29) 376.  
 mites, life history and economics, (38) 460.  
 mites, studies, (39) 664.  
 moisture content, law regulating, (34) 273.  
 mold growth on, (36) 176.  
 mold-ripened, salt factor in, (32) 176.  
 mold, ripening of, (31) 176.  
 Naitofu, manufacture and composition, (34) 574.  
 Neufchâtel—  
 and cream, (39) 570, 581; (40) 79.  
 manufacture, (40) 675.  
 manufacture and analyses, (32) 175.  
 ripening, (32) 473.  
 North Wilts, manufacture and quality, (29) 676.  
 Norwegian "old," manufacture, (26) 371.

## Cheese—Continued.

- nutritive and fuel value, (29) 564.
- of Forez and D'Ambert, (27) 75.
- of Saint-Marcellin, characteristics, (26) 82.
- of southern Italy, descriptions, (27) 475.
- overripe, nutritive value, (29) 59.
- paraffining, (26) 172; (34) 574.
- Parmesan and Lodi, comparison, (28) 278.
- Parmigiano, manufacture, (34) 474.
- phosphorus content, (27) 461.
- physical and chemical constants, (28) 372.
- poisoning, studies, (35) 556.
- Portuguese, analyses, (29) 173.
- preservatives, tests, (27) 777.
- production—
  - in California, (28) 371.
  - in Italy, (27) 472.
  - statistics, (26) 477.
- proteolysis in, (27) 501.
- Raffiné, of Island of Orleans, (26) 276.
- recipes, (29) 564.
- reindeer, analyses, (30) 275, 476.
- reindeer, making, (32) 577.
- relation to microorganisms, (26) 372.
- rind flora, effect on inner portion of the cheese, (32) 776.
- ripening, (34) 573.
- ripening—
  - as affected by fat content, (36) 673; (37) 175.
  - by electricity, (29) 675.
  - chemistry of, (32) 473, 503.
  - experiments, (27) 779; (30) 77.
  - lactic acid bacteria in, (34) 76.
  - microorganisms in, (31) 477; (37) 503.
  - notes, (29) 59.
  - studies, (27) 75; (28) 114; (29) 9; (31) 475.
- robbiola, bacterial flora, (36) 477.
- Roquefort—
  - bacterial studies, (35) 177; (39) 385.
  - biology, (32) 176.
  - cold storage, (27) 377.
  - composition of fat, (32) 77.
  - flavor of, (31) 107.
  - gases in, (30) 312.
  - like, from cows' milk, (32) 177.
  - tyrosin crystals in, (26) 313.
- Roumanian sheep, manufacture and analyses, (26) 675.
- Russian, analyses, (26) 778.
- Russian Schweitzer, composition, (28) 278.
- Russos, cooperative, in England, (40) 896.
- score cards for, (26) 779.
- sheep, ripening, (30) 679.
- sheep's milk, chemical and physical constants, (33) 505.
- shrinkage in, (29) 777.
- shrinkage tests, (35) 471.
- skim milk, manufacture, (30) 878; (37) 576.
- skipper, bionomics and structure, (31) 552.
- Slipcote, manufacture, (26) 82.
- soft, cold storage, (40) 777.
- soft, making, (28) 371; (30) 575; (34) 184; (38) 78.
- soft, ripening experiments, (27) 777.
- soy bean, analyses, (28) 166.
- standards, German, (27) 879.
- statistics in United States, (28) 390; (33) 894.
- Stilton—
  - and Wensleydale, notes, (31) 676.
  - manufacture, (30) 679.
  - microflora of, (28) 879.
  - yellow discoloration, (27) 474, 475.
- streptococci, studies, (39) 385.
- Swedish—
  - Emmental, manufacture, (33) 81.
  - Emmental, studies, (35) 483.
  - Estate, manufacture, (33) 81.
  - varieties, (33) 275.
- Swiss—
  - as affected by silage feeding, (36) 876.
  - Emmental, fat content, (33) 81.
  - exports in 1910, (27) 76.
  - gases of, (26) 775.
  - imported v. domestic, (36) 876.
  - ripening, (34) 574.
- testing, (29) 876.
- textbook and bibliography, (26) 479.
- Touareg, analyses, (26) 479.
- tubercle bacilli in, (28) 278.
- uses in the diet, (27) 63.
- varieties, (27) 75; (38) 781.

## Cheese—Continued.

- vegetable, notes, (26) 809.
- Wensleydale, notes, (30) 179.
- whey, paraffining, (34) 474.

 handbook, (32) 109.  
 industrial, treatise, (40) 408.  
 laboratory guide, (35) 8.  
 textbook, (27) 806; (31) 309.  
 treatise, (29) 801; (34) 801; (39) 607; (40) 709.  
 papers on, (29) 676.  
 papers on from Rockefeller Institute, (33) 279.  
 physical, notes, (27) 406.  
 physical, of vital phenomena, treatise, (39) 8.  
 physiological—  
 and pathological, treatise, (29) 267.  
 progress in, (34) 167; (35) 162; (40) 554.  
 review of literature, (28) 801.  
 textbooks, (26) 201; (31) 361; (34) 563, 607.  
 treatise, (35) 311; (40) 109, 308.  
 progress in, (26) 405; (27) 107, 616; (29) 501; (35) 8, 201; (37) 166, 409; (40) 109, 801.  
 relation to immunity research, (26) 83.  
 sanitary and applied, (39) 501.  
 sanitary and applied, textbook, (30) 695.  
 studies, (31) 277.  
 technical, encyclopedia, (32) 308.  
 technical, treatise, (34) 801.  
 textbook, (29) 792; (34) 599; (37) 108, 598, 801.  
 toxicological, notes, (30) 314.  
 treatise, (27) 205; (30) 63, 309, 310, 409, 512, 610, 707; (34) 407; (39) 8, 501, 607.  
 writings of J. von Liebig, (32) 109.  
 yearbook, (32) 801; (34) 494.
- Chemotherapeutic substances, action of, (35) 380, 381.
- Chemotherapy—  
 address on, (31) 177.  
 notes, (26) 677.  
 oxido-therapy, new method, (38) 585.
- Chemotropism in rootlets, (32) 128.
- Chenopodium—  
 album—  
 analyses, (33) 70, 466; (34) 39.  
 dissemination by farm animals, (26) 839.  
 feeding value, (33) 70.  
 amaranticola, culture experiments, (30) 632.  
 anthelmintic, notes, (30) 145.  
 effect on defecation, (40) 477.  
 nuttalliae n.sp., description, (40) 728.  
 oil as a cardiac stimulant, (36) 576.  
 as a vermifuge, (38) 883.  
 as an anthelmintic, (37) 578.  
 composition, (28) 506.  
 effect on circulation and respiration, (34) 476.  
 effect on intestinal contractibility, (34) 381.  
 studies, (39) 585.  
 quinoa, studies, (39) 610.
- Cherimoya—  
 asexual propagation, (32) 143.  
 composition, (35) 663.  
 notes, (27) 242.

## Cherimoya—Continued.

- propagation, (27) 537.  
 propagation by inarching, (31) 441.
- Chermes—  
 abietis, notes, (28) 353.  
 attacking fir trees, (38) 158.  
 cooley, life history, (36) 456.  
 cooley, notes, (26) 146; (33) 857; (37) 255.  
 injurious to conifers, (35) 56.  
 obliteration of sexual reproduction in, (31) 59.  
 of spruce and larch, (40) 262.  
 piceae, notes, (26) 147; (35) 256.  
 pinicorticis, notes, (28) 353; (30) 657.  
 spp., biology, (34) 854.  
 spp., notes, (26) 856; (27) 755.  
 studies, (34) 551.
- Chermesidae—  
 injurious to British forests, (38) 561.  
 of Switzerland, (30) 854.
- Chermesinae, virginoparus forms, (33) 748.
- Cherries—  
 acidity, (32) 110; (37) 714.  
 blooming period and fertility, (37) 745.  
 breeding experiments, (36) 741; (37) 833.  
 composition as affected by irrigation, (29) 236.  
 cost of production, (29) 439.  
 cover crops for, (34) 231.  
 cross-pollination experiments, (38) 345.  
 crown gall affecting, (28) 447.  
 culture, (27) 843; (32) 45; (33) 440; (36) 444; (39) 447.  
 culture—  
 experiments, (27) 343; (28) 436; (36) 443.  
 in Alaska, (29) 743.  
 Mesa County, Colorado, (37) 241.  
 New Mexico, (40) 18.  
 New York, (35) 836.  
 Ontario, (33) 440.  
 southern Texas, (32) 539.  
 Utah, (30) 442; (33) 638.  
 on a commercial scale, (27) 241.  
 treatise, (36) 641.  
 dried, microbiology, (34) 460.  
 dried, preparation and use, (29) 462.  
 drying, (37) 509, 715.  
 dusting experiments, (38) 546.  
 fall v. spring planting, (26) 238; (35) 837; (37) 743.  
 fertile and self-sterile varieties, (40) 638.  
 frost injury, (37) 344; (38) 646.  
 geographic distribution, (28) 742.  
 growth as affected by meteorology, (29) 510.  
 growing on grass land, (26) 539.  
 handling and shipping, (34) 534.  
 hardy Russian variety, (39) 346.  
 host of Archips argyrospila, (27) 160.  
 injury by wet soil, (38) 646.  
 inoculation experiments with brown rot fungus, (33) 247.  
 insects affecting, (26) 553; (30) 753; (33) 440; (38) 460, 843; (39) 257, 259.  
 localization of acids and sugars in, (36) 110.  
 maraschino, labeling, (26) 762.  
 marketing by parcel post, (39) 543.  
 Monilia affecting, (26) 849.  
 new, descriptions, (29) 838; (31) 337; (33) 238; (35) 37.  
 of Germany, (33) 838.  
 of Japan, (35) 343, 645, 743.  
 of New York, (33) 439.  
 oriental peach moth injury, (40) 756.  
 pear slug affecting, (26) 863.  
 pear thrips affecting, (27) 156; (40) 547.  
 picking and handling, (34) 437.  
 pollination, (30) 443; (34) 233, 341; (36) 139; (40) 148, 638.  
 preservation by freezing, (39) 344.  
 pruning, (30) 739; (32) 837; (40) 742.  
 pruning and training, (37) 344.  
 respiration in gases, (29) 135, 538.  
 ringing experiments, (32) 636.  
 Sclerotinia affecting, (28) 649.  
 seedling, variation in, (30) 144.  
 self-sterility in, (40) 148.  
 sod mulch v. clean culture, (33) 43.  
 spray schedules, (39) 39, 140.  
 spraying, (37) 744.  
 spraying, dust v. liquid, (37) 832.  
 spraying experiments, (27) 143, 439; (28) 436; (30) 641.  
 standard package for, (34) 438.

## Cherries—Continued.

- stock for, (40) 445.
- sunburn of, (29) 547.
- treatise, (32) 338.
- tree census in Washington, (40) 340.
- varieties, (32) 538; (33) 637; (36) 237; (37) 241.
- varieties—
  - for home orchard, (40) 341.
  - Indiana, (39) 447.
  - New Jersey, (33) 439.
  - Ohio, (37) 241.
  - Pacific Northwest, (29) 745.
  - western Washington, (33) 44
  - in Oklahoma, (27) 241.
  - resistant to disease, (29) 246.
- variety for Oregon, (39) 241.
- winter injury, (32) 43; (40) 835.
- winter injury of buds, (39) 541.

## Cherry—

## aphis—

- alternate hosts, (39) 464.
- notes, (32) 651; (40) 648.
- predatory enemy of, (30) 459.
- secondary host, (38) 58.
- studies, (39) 158, 360.

## bacterial—

- canker, notes, (34) 351.
- disease, notes, (28) 746.
- disease, studies, (38) 551.

## black knot—

- description and treatment, (38) 853.
- notes, (37) 555.
- studies, (32) 52.

## blight, notes, (34) 648.

## blister disease, notes, (34) 543.

## brown bark spot on, (39) 251.

## brown rot—

- notes, (28) 544; (34) 241; (35) 351.
- or gummosis, treatment, (38) 454.
- spraying, (39) 652.
- studies, (31) 749.
- treatment, (28) 244; (40) 154.

## by-products, utilization, (34) 808.

## Coccomyces disease, wild hosts, (39) 456.

## Coryneum rust, notes, (33) 549.

## Cytospora disease, notes, (30) 352.

## disease in Rhine Provinces, (26) 144.

## diseases—

- and insects, studies, (33) 440.
- in Netherlands, (35) 351.
- notes, (26) 844; (27) 45, 349; (28) 747; (33) 741; (38) 50.
- studies, (28) 241.
- treatment, (33) 349.

## ermine moth, notes, (29) 252.

## ermine moth, studies, (28) 557.

## flowers, polymorphism in, (28) 540.

## fruit fly—

- black bodied, *see* *Rhagoletis fausta*.
- notes, (26) 146; (27) 53; (35) 356.
- studies, (29) 55; (33) 561.

## fruit maggots, remedies, (31) 757.

## fruit rot, notes, (35) 454.

## fruit sawfly—

- life history and remedies, (28) 657.
- notes, (30) 857.

## gummosis, bacterial, (26) 144; (32) 644; (33) 299; (39) 151.

## gummosis, studies, (27) 852; (28) 549; (29) 154; (30) 749; (32) 344.

## Japanese, description, (31) 236.

## juice, preparation, (33) 316.

## kernels, hydrocyanic acid content, (28) 477.

## lace-bug, new, (39) 763.

## laurel, hydrocyanic acid in, (29) 133.

## laurel leaves, hydrocyanic acid content, (28) 477.

## leaf beetle—

- food plant, (40) 170.
- life history, (34) 756.
- notes, (36) 856.
- studies, (35) 260; (37) 459; (40) 63.

## leaf blight—

- control, (39) 552.
- notes, (40) 249, 251.

## leaf diseases, treatment, (34) 747.

## leaf spot—

- new, in United States, (36) 452.
- or shot hole disease, notes, (32) 49; (38) 546.
- studies, (36) 149; (37) 755; (38) 251; (39) 55, 855.
- treatment, (36) 845.

## Cherry—Continued.

## leaves, free hydrocyanic acid in, (27) 635

## little leaf, studies, (32) 238.

## mildew, notes, (40) 53.

## moth, notes, (35) 56.

## orchard soils, chemical and biological notes, (33) 640.

## pits, oils of, (39) 8.

## powdery mildew, investigations, (33) 347.

## rot, treatment, (38) 541.

## sawfly leaf-miner—

## notes, (28) 158; (29) 252.

## studies, (34) 456, 657.

## shothole, notes, (35) 454.

slug, *see* *Eriocampoides limacina*.

## soft scald, studies, (39) 855.

## stocks, effect on scion, (28) 541.

## stones, hydrocyanic acid content, (27) 11.

## "stop-back," relation to tarnished plant bug, (40) 455.

## tent-maker or tortrix, notes, (26) 856.

## tree trunks, introduction of solutions into, (36) 740.

## tree ugly nest tortricid, natural control, (40) 62.

## twigs, composition, (26) 407.

## weevil, oviposition, (39) 363.

## wild, poisoning stock, (39) 386.

## wine, preparation, (27) 412.

## witches' brooms, studies, (37) 250.

## worm, ugly nest, notes, (34) 752; (36) 856.

## yellow leaf—

## description and treatment, (30) 848.

## studies, (33) 347.

## Chess seed, analyses, (29) 367.

## Chestnut—

## bark disease—

## control, (26) 146; (27) 252, 354.

## control in Massachusetts, (28) 643; (30) 743.

## dissemination by insects, (35) 756.

## history and distribution in Massachusetts, (26) 551.

## in British Columbia, (31) 845.

## Massachusetts, (36) 454.

## southern Indiana, (35) 551.

## Vermont, (34) 848.

## notes, (27) 252, 444, 653, 654; (28) 345; (30) 746; (33) 448; (40) 53, 159, 349.

## on freshly fallen nuts, (34) 546.

## reversion caused by, (30) 751.

## studies, (26) 345; (27) 548, 852; (29) 156, 451, 552, 553, 651, 753; (30) 349, 543, 653; (31) 751; (33) 551.

## threatening Pacific States, (34) 354.

## treatment, (27) 853.

## bast miner, description, (32) 450.

## black canker—

## in nurseries, (35) 655.

in Italy, (32) 54.

notes, (26) 551; (30) 52, 247.

or ink disease, studies, (33) 854.

studies, (29) 156, 851; (35) 250; (36) 752; (37) 657, 658; (39) 554; (40) 160.

black rot, studies, (40) 851.

blight—

ascospore expulsion in, (32) 346.

control by injection of chemicals, (34) 546.

control in Massachusetts, (36) 843.

control in Pennsylvania, (28) 153; (29) 753; (35) 51.

control in West Virginia, (35) 154, 657.

description, (31) 153, 449.

dissemination, (29) 351, 753, 754; (33) 56.

dissemination and growth, (38) 854.

dissemination by birds, (31) 57; (32) 55.

dissemination by insects, (34) 448, 853.

fungus as affected by tannin, (36) 149.

fungus, effect of dyes on, (39) 153.

fungus, identity, (27) 450.

fungus, longevity of pycnospores, (31) 153.

fungus, morphology and life history, (31) 246.

fungus, notes, (34) 49.

fungus, relationships, (28) 651.

in China, (29) 753.

Massachusetts, (39) 750.

Pennsylvania, (36) 454.

United States, (27) 450.

West Virginia, (37) 558.

life history and morphology, (34) 157.

notes, (28) 246, 750; (30) 151; (31) 546; (36) 150.

- Chestnut—Continued.  
 blight—continued.  
 parasite and other chestnut fungi in Japan, (34) 848.  
 poisoning, notes, (31) 657.  
 reforestation after, (38) 45.  
 resistance, studies, (30) 544.  
 resistant species, (36) 645; (37) 756.  
 studies, (28) 551; (32) 54, 446; (34) 154, 545; (35) 154; (37) 557; (38) 52.  
 treatment, (28) 154; (29) 754.  
 blighted timber, cutting out, (36) 52.  
 borer—  
 notes, (30) 154.  
 remedies, (36) 856.  
 two-lined, notes, (27) 755, 756; (28) 158, 653.  
 two-lined, remedies, (35) 760.  
 two-lined, studies, (32) 656.  
 bur borer, notes, (40) 854.  
 canker, studies, (36) 548.  
 destructive distillation, (27) 745.  
 disease—  
 description, (31) 451.  
 new, description, (33) 448.  
 notes, (26) 651.  
 diseases—  
 in France, (33) 56.  
 notes, (27) 753.  
 studies, (28) 240.  
 Endothia canker, histology, (31) 845.  
 flakes, preparation and use, (36) 367.  
 flour, analyses, (39) 870.  
 flour, soluble carbohydrate of, (26) 464.  
 fruits, infection with chestnut blight fungus, (33) 551.  
 hybrids, blight resistance in, (31) 142.  
 ink disease, paper on, (27) 438.  
 lands, reforestation, (31) 341.  
 leaf—  
 bacteriosis, (37) 550.  
 injury in Paris, (37) 224.  
 spot, large, notes, (28) 55.  
 leaves, mottling, (30) 147.  
 leaves, plant food constituents, (37) 629.  
 Oidium, notes, (38) 455.  
 pocketed or piped rot, description, (30) 52.  
 seeds, reserve material in, (34) 427.  
 starch, studies, (31) 828.  
 survey in Tennessee, (26) 745.  
 timber killed by bark disease, utilization, (31) 144.  
 tree disease in Ardèche, (36) 149.  
 trees as affected by injection of chemicals, (33) 350.  
 trees, diseased, treatment, (29) 755.  
 weevils—*see also* *Balaninus* spp.  
 notes, (26) 753.  
 Chestnuts—  
 breeding, (31) 142.  
 composition, (39) 107.  
 culture experiments, (28) 236.  
*Diaporthe parasitica* affecting, (26) 56.  
 dying, (31) 246.  
 ood value, (40) 173.  
 grafting upon oaks, (26) 551.  
 horse, *see* *Horse*-chestnuts.  
 in horses, (26) 672; (28) 772.  
 insects affecting, (27) 756; (30) 456.  
 Japanese, resistance to black canker, (27) 51.  
 Japanese, resistance to black root rot, (29) 553.  
 keeping over winter, (35) 840.  
 new, description, (31) 337.  
 varieties for blight districts, (38) 152.  
 Cheyletus—  
 eruditus, notes, (40) 855.  
 semivivorus, life history and habits, (28) 859.  
 Chhana, analyses, (27) 268.  
 Chicago—  
 Board of Trade, rules and by-laws, (33) 787.  
 stockyards district, wages and family budgets in, (32) 163.  
 Chick—  
 embryo—  
 as affected by temperature, (39) 482; (40) 671.  
 behavior of transplanted tissue in, (27) 368.  
 development, (26) 271.  
 electro-cardiogram of, (31) 173.  
 Chick—Continued.  
 embryo—continued.  
 interchange of limbs by transplantation, (26) 877.  
 embryology, (29) 371.  
 embryonic nutrition, (30) 170.  
 embryonic tissues, growth in artificial media, (26) 164.  
 peas—*see also* *Cicer arietinum*.  
 analyses, (30) 558; (31) 258; (40) 557.  
 anatomical structure, (28) 660.  
 culture experiments, (28) 735; (29) 538; (39) 735.  
 culture in India, (36) 635.  
 culture in Washington, (40) 730.  
 for pigs, (28) 364; (33) 171.  
 oil content, (27) 716.  
 production in Spain, (28) 736.  
 seeds, proteins of, (28) 460.  
 use in bread making, (40) 66.  
 varieties, (28) 533.  
 water requirement, (32) 127.  
 Chicken—  
 blood, dried, analyses, (36) 268.  
 bug, Mexican, notes, (29) 454.  
 cholera, prevalence in Frussia, (27) 181.  
 disease, notes, (31) 879.  
 diseases and intestinal parasites, (37) 779.  
 fat, constants of, (27) 111.  
 fat, digestibility, (36) 860.  
 fat, studies, (26) 761; (28) 63; (31) 758.  
 flea, *see* *Hen* flea.  
 flesh as affected by temperatures above and below freezing, (37) 62.  
 guinea hybrid serum, refractive index, (35) 279.  
 lice and mites, description, (32) 754.  
 lice and mites, notes, (35) 183.  
 lice, remedies, (32) 754; (37) 258.  
 meat, poisoning by cantharides, (26) 660.  
 mites—*see also* *Poultry* mites.  
 destruction, (34) 682.  
 dissemination by English sparrows, (26) 246.  
 life history and habits, (37) 859.  
 notes, (33) 354; (35) 183, 878; (37) 361.  
 pox, complement fixation in, (34) 877.  
 immunization, (30) 785; (31) 887; (34) 274, 784; (35) 885; (37) 584.  
 notes, (36) 498.  
 paper on, (38) 179.  
 pathology, (26) 889; (27) 576.  
 secondary invader, (34) 481.  
 studies, (35) 283.  
 transmission by *Stomoxys calcitrans*, (28) 756.  
 treatment, (39) 791.  
 vaccination, (39) 792.  
 sarcoma, serum treatment, (40) 678.  
 sarcoma, spindle-celled, (28) 287, 288.  
 soup, condensed, examination, (29) 659; (31) 659.  
 testes, histological studies, (27) 869.  
 testes, interstitial cells in, (34) 264.  
 tick, *see* *Argas miniatus*.  
 Chickens—*see also* *Chicks*, *Fowls*, *Hens*, and *Poultry*.  
 American class, (37) 368.  
 anthelmintics for, (40) 778.  
 as affected by—  
 Roentgen rays, (31) 369.  
 vitamin-free diet, (30) 865.  
 bare necked, of Barbados, (32) 367.  
 bovine variola in, (27) 685.  
 breeding and management, (33) 77.  
 breeding experiments, (32) 572; (35) 869.  
 cestode infection in, (35) 577, 683.  
 cost of raising, (33) 77; (39) 481.  
 crest of, (30) 773.  
 digestion of aluminum by, (30) 873.  
 dissemination of—  
 anthrax by, (28) 678.  
 forage poisoning by, (38) 383.  
 early hatching, (38) 678.  
 factors affecting pulse rate, (28) 768.  
 Garonnaise, notes, (31) 568.  
 grit for, (34) 377.  
 growing, cholesterol content, (30) 674.  
 growth as affected by electricity, (30) 674, 873.  
 growth in confinement, (40) 876.  
 hatching and rearing, (29) 574.

## Chickens—Continued.

- hatching on a large scale, (26) 772.
- immunity against anthrax bacillus, (29) 378.
- immunization against tuberculosis, (26) 85.
- in Philippines, (26) 666; (30) 374.
- limber-neck in, (36) 681.
- malta fever affecting, (26) 84.
- Mediterranean and Continental classes, (38) 373.
- milk-fed, (35) 499.
- milk-fed, in Europe, (32) 264.
- natural and artificial brooding, (32) 264.
- nematodes in crop, (40) 537.
- nutrition studies with, (39) 369.
- odd chromosome in spermatogenesis of, (30) 772.
- of Guam, (30) 69.
- of Philippines, improvement, (38) 576.
- origin and history of breeds, (27) 572.
- poisoning with rose chafer, (34) 655; (35) 489; (36) 281.
- relation to typhoid fever, (32) 477.
- trussing and boning, (26) 168.
- tuberculin test for, (27) 181; (31) 582.

## Chicks—

- artificial brooding, (35) 773; (37) 71.
- as affected by—
  - alcoholization, (40) 470.
  - pituitary substances, (36) 468.
  - rice diet, (38) 677.
- brooders for, (40) 372, 485.
- brooding, (33) 97; (36) 871; (39) 781.
- care and management, (37) 96; (39) 75, 781.
- care of, (32) 869.
- cost of raising, (32) 868; (35) 377; (36) 72; (37) 681; (39) 577.
- day-old, sex of, (33) 672.
- day-old, shipping long distances, (38) 677.
- developing, lipid metabolism in, (28) 876.
- digestion in, (29) 372.
- diseases of, (37) 280.
- effect of mineral matter on, (39) 377.
- feeding, (28) 73; (33) 98; (35) 773.
- feeding—
  - and care, (33) 381.
  - and management, (39) 75.
  - experiments, (28) 172, 773; (29) 273; (30) 571; (31) 473, 569; (32) 570; (33) 273; (34) 176, 871, 872; (35) 479; (37) 768; (39) 376, 577, 780.
  - experiments, résumé, (33) 572.
  - pineal gland secretion, (39) 780.
- growth as affected by pituitary and thymus substances, (35) 171.
- growth under laboratory conditions, (35) 472; (36) 373.
- hatching artificially, (31) 670.
- hatching, early v. late, (36) 870.
- incubating and care, (26) 270.
- incubation and brooding experiments, (33) 76.
- instincts and habits in, (26) 670.
- lysin requirements, (39) 480.
- mineral requirements, (39) 577.
- mortality in, (34) 881.
- outline for laboratory study, (40) 483.
- primordial germ cells in, (30) 872.
- proteins for, (39) 480.
- raising, (31) 271; (40) 670.
- raising on new land, (36) 173.
- Rhode Island Red, rate of growth, (40) 670.
- scale and feather development of, (31) 369.
- shipping boxes, (40) 78.
- teaching to roost, (35) 377.
- troubles and vices, (39) 791.
- White Leghorn, rate of growth, (40) 670.

Chickweed, destruction, (26) 333; (31) 739.

Chicle from Euphorbia loricifolia, (28) 49.

Chico mamey, analyses and use, (30) 363.

## Chicory—

- adulteration, (39) 715; (40) 658.
- betains in, (27) 203.
- catalytic fertilizers for, (27) 629.
- culture, (28) 839.
- detection in roasted coffee, (31) 208.
- fertility experiments, (26) 651.
- fertility in, (38) 226; (39) 432; (40) 427.
- flower number per head, (40) 225.
- insects affecting, (31) 249.
- inulin coagulating substances in, (36) 127.
- inulin in, (39) 202, 524.
- inulin metabolism in, (28) 821; (30) 432.

## Chicory—Continued.

- irrigation experiments, (30) 886.
  - monograph, (31) 336.
  - notes, (29) 338.
  - physiological effect, (27) 868.
  - pollination studies, (36) 523.
  - preparation and methods of analysis, (29) 660.
  - products, description and analyses, (35) 504.
  - root, betains in, (27) 203.
  - root, inulin in, (40) 325, 727.
  - roots, dried, for horses, (33) 670.
  - Sclerotinia disease of, (29) 646.
  - studies, (28) 762; (34) 427.
  - substitute for, (40) 508.
  - varieties, (26) 631; (30) 435.
  - watering, continuous, (37) 543.
  - Witloof, culture and forcing, (35) 742.
  - Witloof, forcing, (36) 443.
- Chigger mites, studies, (39) 265.
- Chiggers—*see also* Trombidium spp.
- notes, (35) 552.
  - remedies, (33) 258.
- Child—
- labor in—
    - agriculture, (40) 591.
    - cotton picking, (30) 793.
    - sugar-beet fields of Colorado, (38) 191.
  - nurture education in United States, (35) 394.
- Children—*see also* Boys and Girls.
- anemic and tuberculous, nutrition, (32) 358.
  - as affected by coffee drinking, (27) 272.
  - as affected by meat ingestion, (29) 365.
  - care, (29) 465; (30) 260; (31) 660; (32) 66, 495; (34) 861; (35) 664; (40) 560.
  - choice of bread for, (26) 260.
  - creatin and creatinin of blood, (40) 274.
  - creatin excretion in, (31) 860.
  - diet of, (26) 465; (34) 861.
  - energy requirements, (39) 876.
  - feeding, (29) 465; (30) 462; (31) 660; (32) 66, 495; (35) 664; (37) 166, 671; (39) 66, 282, 472, 772, 876; (40) 68, 361, 560.
  - feeding, treatise, (26) 763.
  - food requirements, *see also* Infants, feeding.
  - food requirements, (29) 464; (31) 261, 463; (33) 364; (34) 861; (35) 664.
  - growth, (28) 664.
  - growth and nutrition standards, (40) 865.
  - hospital, energy metabolism of, (33) 756.
  - increased cost of maintenance, (30) 166.
  - infection with bovine tubercle bacilli, (29) 332.
  - (32) 477.
  - light farm work for, (36) 496.
  - malnutrition, (40) 362.
  - measurement of surface area, (35) 369.
  - menus for, (31) 760.
  - milk for, food value, (39) 282; (40) 179.
  - milk for, raw v. boiled, (29) 360.
  - milk for, statistics, (40) 863.
  - nervous, management, (26) 465.
  - nursing, tuberculosis in, (29) 382.
  - nutrition of, (34) 561.
  - rectal temperature in, (31) 563.
  - rural, survey in North Carolina, (40) 892.
  - school, feeding, (27) 767; (28) 664.
  - school, nutrition of, (26) 262.
  - sleeping, chemistry and energy metabolism of, (26) 466.
  - sugar in diet of, (29) 460; (34) 164.
  - undernourished, in factories and schools, (39) 772.
  - undernourished, nutrition class for, (40) 661.
  - undeveloped, nutrients for, (32) 458.
- Children's gardens, *see* School gardens.
- Chili sauce, recipes, (28) 715.
- Chilies, *see* Pepper.
- Chilo—
- infuscatellus, notes, (34) 758.
  - simplex, notes, (31) 851.
  - simplex, studies, (40) 167.
  - spp., notes, (35) 58.
- Chilocorus—
- bipustulatus—
    - as enemy of scales, (39) 767.
    - introduction into California, (34) 361.
    - notes, (38) 467.
  - bivulvatus, notes, (28) 754.
  - similis, *see* Asiatic ladybird.
  - spp., parasitic on white wax coccid, (35) 1.
- Chilopoda of Kansas, (30) 759.

- Chilosia* sp., notes, (34) 358.  
*Chimonanthus* spp., hydrocyanic acid in, (28) 429.  
 Chin fly, *see* *Gastrophilus* nasalis.  
 China berries, effect on pigs, (27) 533.  
 Chinch bug—  
   burning, (31) 156.  
   control, (28) 354.  
   control in Illinois, (29) 53.  
   disease, notes, (27) 299.  
   egg parasites of, (29) 854; (31) 354; (34) 66; (38) 653.  
   false—  
     notes, (29) 252; (37) 847.  
     remedies, (36) 154; (39) 760.  
     studies, (39) 464.  
   fungus diseases, studies, (26) 454.  
   fungus, notes, (26) 455.  
   in Ohio, (39) 863.  
   in Ontario, (30) 52.  
   insect enemies, (40) 165.  
   life history, (26) 454; (38) 54.  
   notes, (28) 653; (29) 252, 793, 854; (31) 156; (32) 448; (33) 58, 59.  
   nymphal stages, (40) 353.  
   poisoning, (39) 258.  
   remedies, (26) 454, 455; (27) 158; (29) 653; (38) 54.  
   studies, (26) 347; (30) 547; (36) 153.  
 Chinese—  
   bean, culture, (32) 226.  
   wood oil—  
     in varnish, estimating, (39) 613.  
     notes, (30) 616.  
     tree, culture in United States, (30) 535.  
     tree, notes, (28) 843; (32) 539.  
 Chinin, new variety of avocado, (40) 151.  
 Chinosol as treatment for—  
   Fusarium in cereals, (33) 546.  
   seed grain, (28) 846.  
 Chinquapin pocketed or piped rot, description, (30) 52.  
 Chinquapins—  
   blight resistance in, (30) 544; (31) 142.  
   giant, planting in Southern States, (26) 651.  
   parthenogenesis in, (31) 443.  
 Chion cinctus on pecan, (38) 157.  
 Chionaspis—  
   americana, notes, (26) 147.  
   aspidistrae gossypii, injurious to cotton, (27) 454.  
   bielavis, destruction by fungi, (28) 556.  
   citri, notes, (31) 58.  
   euonymi, *see* *Euonymus* scale.  
   furfura, *see* *Scurfy* scale.  
   lintneri, notes, (29) 251.  
   pinifoliae, notes, (28) 353; (34) 752.  
   salicis, notes, (30) 53.  
   tegalensis, notes, (33) 155.  
 Chipmunks—  
   host of spotted fever tick, (26) 64.  
   new subspecies, (39) 654.  
   susceptibility to plague, (26) 59.  
 Chiricahua cavicola n.g. and n.sp., description, (40) 357.  
 Chirodiscoidea caviae n.g. and n.sp., description, (38) 865.  
 Chironomidae of Illinois, (34) 654.  
 Chironomus—  
   anonymus, notes, (28) 254.  
   cavazzai, biology, (32) 450.  
   sp., notes, (28) 158.  
   (*Tendipes*) plumosus, notes, (32) 554.  
 Chironetes albomanicatus, studies, (39) 656.  
 Chisel, pneumatic, use in tree surgery, (30) 642.  
 Chitin, occurrence in bacteria, (36) 501.  
 Chlamydiae, catalogue, (30) 458.  
 Chlamydobacteriales, subgroups and genera, (40) 521.  
 Chlamydomonas—  
   as affected by luminous radiations, (26) 431.  
   movement of zoospores, (27) 729.  
   reticulata, assimilation of nitrogen and phosphorus by, (28) 35.  
 Chlamydozoa—  
   intermediate hosts of, (26) 759.  
   notes, (27) 780.  
 Chlamydozoon—  
   bombycis, notes, (26) 757.  
 Chlamydozoon—Continued.  
   prowazeki n.sp., description, (26) 757.  
   sphingidarum n.sp., description, (26) 758.  
 Chloral hydrate—  
   and copper sulphate, antagonistic action on peas, (30) 728; (32) 35.  
   effect on permeability of plant tissues, (28) 732.  
   toxicity toward plants, (34) 526.  
   use in fistula, (26) 277.  
   use in veterinary medicine, (32) 278.  
   vapor, larvicidal value, (34) 359.  
 Chloralose, anesthetic value, (39) 885.  
 Chloramin—  
   compounds, antiseptic action, (35) 380.  
   compounds for sterilizing water, (38) 188.  
   preparation, properties, and use, (35) 380.  
 Chloramin-T—*see also* Dakin's solution, Dichloramin-T, and Hypochlorite.  
   action on proteins, (36) 878.  
   antiseptic value, (40) 182, 284.  
   in treatment of wounds, (37) 876.  
   preparation, (40) 13.  
   solution, studies, (39) 185, 786.  
   toxicity, (39) 586.  
 Chlor-antiseptics, formulas, (37) 477.  
 Chlorates—  
   alkaline, pharmacodynamics, (40) 581.  
   determination, (34) 712; (39) 207.  
   determination in hypochlorite solution, (40) 410.  
   determination in presence of chlorids and perchlorates, (26) 511.  
 Chlorazene, composition and use, (38) 782.  
 Chlorid—  
   excretion during fasting, (30) 764.  
   iodin, antiseptic value, (40) 779.  
   of lime—  
     decomposition in water, sewage, and organic solutions, (38) 592.  
     for moor soils, (39) 438.  
     in sanitation, treatise and bibliography, (29) 512.  
     purification of water by, (28) 214; (29) 315; (33) 883; (34) 83.  
     relation to tobacco gummosis, (28) 243.  
     sterilization of milking machines by, (29) 578.  
     sterilization of soil by, (26) 322.  
 Chloridea—  
   assulta, studies, (40) 62.  
   obsoleta, *see* Cotton bollworm, Corn earworm, and Corn worm.  
   virescens, studies, (37) 664.  
 Chlorids—  
   absorption and utilization by plants, (35) 435.  
   as an indicator of water contamination, (30) 714.  
   determination in—  
     blood, (37) 804; (39) 207, 807.  
     body fluids, (34) 507.  
     cheese, (34) 807.  
     cultivated soils, (30) 205.  
     presence of chlorates and perchlorates, (26) 511.  
   effect on—  
     activity of malt diastase, (29) 528.  
     nitrification in soils, (26) 817.  
     nodule production, (32) 727; (33) 134.  
     potato scab, (32) 750.  
     soils and plants, (35) 423.  
   excretion as affected by water drinking, (34) 763.  
   flocculating power on clay, (27) 620.  
   titration, McLean-Van Slyke method, (38) 204.  
 Chlorin—  
   absorption by soils, (40) 619.  
   antiseptics, (40) 181, 284.  
   antiseptics, action on blood clot, (40) 883.  
   compounds, purification of water by, (32) 87.  
   content of—  
     milk, (27) 715.  
     muscles, (26) 566.  
     rain, (30) 418, 620, 815.  
     snow, (30) 815.  
   determination in—  
     body fluids, (38) 204.  
     chlorids, (37) 714.  
     drinking water, (37) 714.  
     foods, (29) 809.  
     milk, (28) 314; (38) 112.  
   organic substances, (39) 507.

## Chlorin—Continued.

- determination in—continued.
  - potable waters, (26) 110.
  - rice, (29) 231; (31) 110.
  - vegetable matter, (34) 410.
  - water, (33) 90.
- disinfecting value as affected by alum, (34) 885.
- effect on coagulation of milk, (28) 504.
- fertilizing value, (27) 128.
- in cereals and dry legumes, (36) 761.
  - inland ground waters, (31) 813.
  - rain and snow, (32) 616; (38) 416.
  - soils and atmospheric precipitation, (30) 422.
- ions, combination in alkali salts, (33) 623.
- ions, determination in blood, (30) 201.
- ions, determination in honey, (33) 502.
- larvicidal value, (37) 665.
- liquid, sterilization of water by, (37) 588.
- loss on incinerating organic substances, (33) 611.
- number, a new constant of fat, (32) 808.
- relation to plant growth, (38) 729, 730.
- renal excretion of, (28) 765.
- rôle in plant nutrition, (33) 725.
- rôle in protein metabolism, (28) 66.
- sterilization of water by, (33) 883; (34) 885.
- supply of body, effect of decrease, (26) 465.

## Chlorinated—

- alum solution, antiseptic value, (40) 779.
- antiseptics, (39) 184, 506.
- antiseptics, action on necrotic tissue, (38) 685.
- toluene mixtures, methods of analysis, (39) 807.

## Chloris—

- ciliata, germination studies, (27) 219; (31) 222.
- elegans, nutritive value, (27) 569.
- gayana—
  - analyses, (30) 565.
  - culture experiments, (27) 234.
  - culture in Philippines, (30) 233.
  - leaf structure, (36) 331.
  - notes, (27) 525.
  - root system, (36) 438.
- spp., analyses, (28) 463; (36) 334.
- spp., notes, (26) 361.
- spp., studies, (38) 66.
- virgata—
  - analyses, (33) 169.
  - analyses and digestibility, (27) 871; (32) 167.
  - notes, (31) 228.

Chlorochroa uhleri, notes, (34) 752.

Chlorocodon whitei, notes, (27) 33.

## Chloroform—

- as an anthelmintic, (37) 578.
- milk preservative, (32) 472, 576.
- serum preservative, (33) 280.
- stimulant in soil extracts, (36) 815.
- vermifuge, (38) 884.
- detection in ethyl alcohol, (29) 312.
- effect on—
  - action of maltase, (28) 504.
  - assimilation of chlorophyll, (33) 827.
  - blood treated with vaselin, (31) 620.
  - chernozem soil, (38) 17.
  - development of eggs, (26) 772.
  - factors of coagulation, (35) 380.
  - germination of wheat, (27) 220.
  - grape must fermentation, (36) 801.
  - hemolytic reaction, (36) 878.
  - inversion of saccharose, (33) 523.
  - micro-flora and fauna in soils, (30) 219.
  - must and wine, (30) 612.
  - permeability of plant tissues, (28) 732.
  - plasma membranes, (26) 824.
  - plant respiration and assimilation, (26) 227.
  - plants, (28) 429.
  - respiratory exchange of leaves, (30) 227.
  - seed germination, (26) 131.
  - soil microorganisms, (31) 27.

## extract of—

- hays and fodders, (31) 71.
- hays and fodders, composition and digestibility, (28) 69.
- plants, composition and digestibility, (27) 500.
- soils, (29) 801.
- sterilization of soils by, (31) 621; (32) 816.
- use against lungworms, (35) 182.
- Chlorophora excelsa, insects affecting, (28) 555.
- Chlorophyceae, development and nutritional physiology, (40) 130.

## Chlorophyll—

- and blood pigment, relation, (32) 711.
  - as affected by light, (31) 222.
  - assimilation as affected by chloroform, (33) 827.
  - assimilation, notes, (30) 225.
  - chemistry, (27) 107, 310.
  - chemistry, progress in, (27) 802.
  - colloidal nature, (28) 407; (32) 19.
  - constitution of, (26) 229.
  - content and respiration of plants, relationship, (31) 222.
  - formaldehyde from, (31) 222.
  - formation as affected by—
    - magnesium, (36) 225; (39) 827.
    - manganese, (29) 323.
    - ultraviolet rays, (33) 28.
  - formation—
    - effect on toxicity of magnesium nitrate, (38) 224.
    - in plants, (31) 519, 520.
    - relation to light wave length, (33) 29.
    - relation to mitochondria, (29) 827.
    - under action of light, (28) 731.
  - function of, (34) 30.
  - grains, dimorphism in plants, (27) 427.
  - in autumn leaves, retention, (36) 225.
    - leaves, determination, (27) 713.
    - peach leaves, (32) 823.
    - plants, rôle, (34) 525.
    - plants, state of, (29) 323.
    - plants, studies, (27) 227.
  - inheritance in maize, (39) 825.
  - living, stability of, (31) 127.
  - notes, (31) 728.
  - photochemical reactions, (37) 26.
  - physiological theory, (33) 824.
  - pigments, replacing, (31) 128.
  - quotients in leaves, (30) 629.
  - relation to—
    - formation of formaldehyde, (29) 132.
    - lycopin, (32) 824.
    - transpiration in leaves, (28) 529.
    - ultraviolet rays, (27) 827; (28) 37.
  - review of Willstätter's researches on, (31) 427.
  - rôle in condensation of nitrogenous substances, (28) 328.
  - spectro-colorimetric estimation in plants, (31) 520.
  - studies, (25) 332, 435, 611; (28) 110, 608.
  - synthesis, rays concerned in, (30) 225.
  - treatise, (30) 311.
- Chloropsisca—
- glabra, studies, (39) 562.
  - notata, hibernation, (34) 254.
- Chloroplasts—
- iron compounds in, (33) 627.
  - photosynthetic function of, (31) 427.
  - primordia of, (39) 332.
  - rôle of yellow pigment in, (31) 128.
  - studies, (33) 824.
- Chlorops taeniopus, notes, (27) 560; (31) 50.
- Chlorosis—
- in corn, (31) 221.
  - in orchards, relation to soils, (28) 623.
  - in plants—
    - in nutrient solutions, (36) 633.
    - notes, (34) 525; (36) 432, 847.
    - relation to calcium carbonate, (28) 242.
    - studies, (29) 826; (33) 519, 520, 522; (34) 52; (38) 728.
- Chlorosplenium aeruginosum, notes, (32) 341.
- Chlorostanoliths, notes, (36) 730.
- Chlorotettix—
- n.spp., descriptions, (34) 255.
  - unicolor, life history, (35) 553.
- Chlorotone, effect on development of eggs, (26) 772.
- Chlorpicrin as a fumigant, (39) 558.
- Chlor-xyleneol-sapocresol as a disinfectant, (32) 80.
- Choanataenia affinisbulbiformis, intermediate host, (35) 577, 683.
- Choanephora cucurbitarum, studies, (36) 848.
- Chocolate—
- analyses, (26) 506; (28) 461; (35) 558.
  - and cocoa, treatise, (26) 662, 710.
  - artificial coloration, (27) 809.
  - copper in, (28) 862.
  - examination, (26) 659; (36) 506.
  - judging, (26) 609.
  - manufacture, (29) 312; (30) 258.
  - manufacture, progress in, (32) 23.

- Chocolate—Continued.  
 methods of analysis, (27) 207.  
 milk, determination of lactose and sucrose in,  
 (40) 14.  
 milk, methods of analysis, (27) 498, 613.  
 value in the diet, (29) 664.
- Choeromyia—  
 n.spp., descriptions, (26) 559.  
 notes, (30) 458.
- Choetochloa palmifolia as a forage crop, (38) 827.
- Chokecherries, black knot affecting, (30) 750.
- Chokecherry aphid, description, (39) 62.
- Cholam—  
 in malting operations, (40) 808.  
 short smut, studies, (38) 850.
- Cholera—  
 Asiatic, transmission, (26) 61; (31) 752.  
 evolution of, (39) 285.  
 like diseases of birds, (40) 685.  
 relation to tomatoes, (27) 766.  
 rôle of specific fats in complement fixation, (39)  
 80.  
 toxins and antitoxins, notes, (26) 676.  
 vibrio, destruction by periodol, (39) 80.  
 virus, action in immune animal organism, (35)  
 280.
- Cholesterin—  
 metabolism of, (32) 764.  
 of diet, relation to bile cholesterin and salts,  
 (33) 566.  
 origin, (33) 166.  
 synthesis of, (34) 168.  
 variations during inanition and feeding experi-  
 ments, (34) 258.
- Cholesterol—  
 absorption in intestine, (33) 166.  
 absorption, mechanism, (36) 265.  
 addition to fat-deficient diet, (36) 366.  
 constancy in animals, (33) 69.  
 crude, from butter fat, (28) 809.  
 determination, (29) 309; (35) 805.  
 determination in blood, (35) 13; (39) 716; (40)  
 15.  
 determination in serum, (33) 315.  
 effect on growth of white mice, (35) 865.  
 excretion by man, (28) 462.  
 importance in the organism, (31) 465.  
 in blood during fat absorption, (39) 671.  
 edible fats, (32) 205.  
 growing chickens, (30) 674.  
 milk, (26) 775; (40) 11.  
 tissues as affected by diet, (33) 754.  
 metabolism of eggs during incubation, (33) 472.  
 nephelometric values, (39) 311.  
 preparation and determination, (30) 501.  
 studies, (40) 767.  
 synthesis in the animal organism, (30) 675.
- Cholin—  
 assimilation by plants, (26) 32.  
 determination, (35) 202.  
 effect on plant growth, (28) 324.  
 effect on sex determination, (28) 68.  
 in dried herring roe, (29) 863.  
 grape leaves, (27) 731.  
 hops, (32) 502.  
 rice polishings, (33) 167.  
 stachys tubers and citrus leaves, (26) 107.  
 sugar beets, (28) 810.  
 isolation from oat farina, (31) 309.  
 isolation from soils, (28) 418.  
 use against tumors, (29) 476.
- Cholina spp., list, (39) 99.
- Cholla fruit—  
 analyses, (27) 570.  
 nutritive value, (27) 569.
- Chollas as emergency forage, (27) 569.
- Cholomyia inaequipes, notes, (27) 864.
- Cholus—  
 cattlesæ—  
 (cattleyarum), in Wisconsin, (38) 155.  
 n.sp., description, (36) 555.  
 notes, (40) 754.  
 cattleyarum n.sp., description, (36) 360.  
 forbesii, introduction into New Jersey, (37) 660.
- Chondriomes in tulip flower, (38) 127.
- Chondriosomes—  
 in epidermal cells of *Iris germanica*, (34) 524.  
 fungi, (32) 822.  
 fungi and algae, (35) 635.
- Chondriosomes—Continued.  
 in living plant cells, (29) 217.  
 vegetable cells, (32) 428.  
 nature of, (35) 226.  
 review of literature, (33) 631.  
 rôle in secretion, (28) 272.  
 studies, (39) 332; (40) 223, 323.
- Chondromyces crocatus, development, (30) 28.
- Chondrosamin, isomeric pentacetates of, (36) 202.
- Chondrus crispus, analyses, (37) 814.
- Chop-feed, analyses, (29) 769; (34) 663.
- Chops, analyses, (27) 364; (31) 73; (32) 862.
- Chordelles, notes, (35) 254.
- Choreutis—  
 inflatella, life history, (33) 655.  
 parialis, notes, (31) 848.
- Chorizagrotis—  
 agrestis, notes, (33) 746; (35) 758.  
 auxiliaris, life history, (35) 854.  
 auxiliaris, notes, (35) 853.  
 sp., poisoned bait for, (34) 358.
- Chortophaga viridifasciata, notes, (36) 153.
- Chortophila—  
 brassicæ, see Cabbage maggot.  
 cillierura as a rye pest, (38) 557.  
 trichodactyla, attacking cucumbers, (34) 454.
- Chou moelleri, notes, (26) 833, 835.
- Chowchow, recipes, (28) 715.
- Chremylus rubiginosus, notes, (27) 564.
- Christchurch Technical College, notes, (31) 898.
- Christmas-berry tingis, California, notes, (26) 148.
- Christmas trees—  
 culture and marketing, (36) 745.  
 growing, (35) 746.
- Chromaphis juglandicola—  
 control, (39) 461.  
 fungus enemy, (39) 464.  
 remedies, (33) 557.  
 studies (31) 753.
- Chromatophores—  
 coloring matters of, (35) 333.  
 movement, (38) 426.
- Chrome yellow, effect on linseed oil, (28) 714.
- Chromii sulphas, nature and use, (26) 580.
- Chromium—  
 compounds, effect on ferments, (26) 309.  
 compounds, effect on plants, (28) 730.  
 determination in minerals and rocks, (31) 16.  
 fertilizing value, (27) 128.  
 in plants, (38) 409.  
 in soils, (31) 720.  
 oxid green, effect on linseed oil, (28) 714.  
 toxic effect on plants, (38) 629.
- Chromogenesis, induced variations in, (33) 630.
- Chromogens—  
 formation in plants, (29) 421.  
 plant respiratory, absorption of oxygen by,  
 (29) 324.  
 purpling, isolation from air potatoes, (28) 505.  
 vegetable, oxidation and reduction in, (34) 32;  
 (35) 225.
- Chromoleucites, pigments of, (34) 33.
- Chromophylls in plant and animal world, (26) 710.
- Chromoplasts, origin, (37) 632.
- Chromosome—  
 action, hormone theory, (38) 525.  
 combinations in the strawberry, (39) 49.
- Chromosomes—  
 function, (27) 769.  
 function in heredity, (34) 527.  
 in wheat, studies and bibliography, (27) 636.  
 mammalian, fixation, (40) 662.  
 measurements, (28) 766.  
 nature and importance, (29) 665.  
 relation to heredity, (27) 468.  
 relation to hybridization in plants, (40) 817.  
 segmentation, (39) 574.  
 significance in heredity, (29) 321.  
 structure, (29) 67.
- Chromosporium crustaceum n.sp. on rubber, (32)  
 347.
- Chrosperma muscaetoxicum, toxicity, (39) 886.
- Chrysalids, external sexual characters, (27) 456.
- Chrysanthemum cinerariaefolium—  
 betains in, (27) 204.  
 culture, (40) 151.  
 manganese content, (38) 207.

- Chrysanthemum**—  
 crown gall, notes, (37) 252.  
 frutescens as a host of eelworm, (34) 349.  
 gall fly, *see* *Diarthronomyia hypogaea*.  
 leaf miner—  
   in Wisconsin, (38) 155.  
   notes, (26) 856; (35) 54; (38) 155.  
   remedies, (29) 55.  
   studies, (32) 451.  
 leaf mining fly, notes, (27) 552.  
 leucanthemum—  
   as affected by top dressing, (26) 40.  
   dissemination by farm animals, (26) 839.  
   midge, notes, (34) 251; (36) 856; (38) 160, 358.  
   root tumors or crown gall, treatment, (30) 354.  
   Septoria disease, notes, (35) 550.
- Chrysanthemums**—  
 as affected by radio-active substances, (32) 34.  
 culture, (37) 44.  
 culture in greenhouses, (26) 740.  
 dimorphism in, (28) 541.  
 evolution, (34) 237.  
 fertilizer experiments, (26) 739; (40) 741.  
 growth in partially sterilized soils, (26) 815.  
 growth on sterilized soils, (31) 336.  
 insects affecting, (28) 451.  
 red spider on, (39) 65.  
 spontaneous decapitation of, (31) 844.  
 treatise, (28) 543; (40) 540.  
 varieties, (34) 232; (38) 446.  
 varieties at Wisley, (33) 536.
- Chrysobothris**—  
 femorata, *see* Apple-tree borer, flat-headed.  
 scitula, notes, (38) 762.  
 tranquebarica, studies, (40) 860.
- Chrysoceles lupini** n.g. and n.sp., description, (35) 245.
- Chrysocharis mallochi** n.sp., description, (38) 165.
- Chrysocharis** n.sp., descriptions, (30) 59.
- Chrysolampis lycti** n.sp., description, (31) 459.
- Chrysolite**, solubility of magnesia in, (40) 812.
- Chrysomelians** of Ontario, (31) 155.
- Chrysomelid beetle**—  
 evolution, (32) 429.  
 notes, (28) 854.
- Chrysomelidae**—  
 catalogue, (26) 560.  
 of Philippines, (29) 657.
- Chrysomphalus**—  
 aonidium (ficus), *see* Florida red scale.  
 aurantii, *see* Orange scale and Red scale.  
 dictyospermi—  
   in California, (35) 658.  
   minor, coccinellid enemy, (39) 767.  
   mycosis of, (36) 755.  
   natural enemies, (39) 566.  
   notes, (32) 56.  
   on castor bean, (40) 453.  
   parasites of, (38) 467.  
   pinnulifera, remedies, (34) 552; (36) 754.  
   remedies, (36) 655.  
   variation in, (38) 460.  
   varieties, (37) 462.  
 paulistus in Brazil, (40) 165.  
 spp., notes, (31) 58.  
 spp., remedies, (30) 355.  
 tenebriocosus, *see* Gloomy scale.
- Chrysonyia**—  
 macellaria, *see* Screw-worm.  
 megacephala, notes, (29) 482.  
 ruffiacis in Hawaii, (40) 263.
- Chrysonyxa**—  
 abietis, studies, (35) 155.  
 rhododendri, studies, (35) 155.  
 sp., new to North America, (37) 757.  
 spp. on conifers in Scotland, (32) 844.  
 vitis n.sp., description, (27) 353.  
 weirli n.sp., description, (39) 254.
- Chrysopa**—  
 californica—  
   destructive to citrus plant lice, (26) 755.  
   notes, (28) 250, 457; (29) 261.  
   parasitic on red spider, (32) 157.  
   studies, (35) 758.  
 oculata, notes, (32) 654.  
 or golden-eyed fly, notes, (37) 156.  
 vulgaris, notes, (27) 862.
- Chrysophagus compressicornis**, notes, (31) 757.
- Chrysophana placida** as a household pest, (37) 854.
- Chrysophanus dispar**, notes, (38) 562.
- Chrysophylectis**—  
 endobiotica—  
   life history, (40) 848.  
   notes, (26) 448; (27) 245; (28) 243, 648; (29) 243; (30) 47, 448; (31) 243; (32) 443, 546; (33) 446, 846, 850; (34) 241; (35) 48; (40) 157, 543, 848.  
   studies, (26) 547.  
   treatment, (31) 149.  
 transfer to *Synchytrium*, (26) 547.
- Chrysophyllum**—  
 cainito, cold storage of, (32) 439.  
 oliviforme, notes, (27) 862.
- Chrysopidae**—  
 feeding habits, (36) 552.  
 of Japan, (30) 754.
- Chrysopids**, parasites of, (31) 757.
- Chrysoplaticerus splendens**, notes, (26) 149.
- Chrysopogon parviflorus**, analyses, (30) 565.
- Chrysops**—  
 collecting larvae, (40) 757.  
 egg-laying habits and early stages, (37) 853.  
 spp., transmission of floria by, (36) 86.  
 spp., transmission of *Trypanosoma equinum* by, (31) 82.
- Chrysopus** sp., destructive to purple scale, (26) 757.
- Chrysotoxum coloradensis** n.sp., description, (40) 757.
- Chufas**—  
 as a duck food, (30) 545.  
 culture experiments, (40) 434.  
 culture in Philippines, (26) 361.  
 notes, (26) 362.
- Church and country life**, handbook, (36) 92.
- Churches**—  
 relation to rural problems, (33) 190.  
 rural—  
   conference on, (34) 297.  
   cooperation, (37) 593.  
   decadence of, (30) 893.  
   economic and social force, (37) 90.  
   educational opportunities, (32) 388.  
   federation, (32) 285.  
   handbook, (29) 294.  
   improvement, (29) 594.  
   in Kansas, (33) 694.  
   problems of, (31) 391; (35) 891.  
   treatise, (29) 190; (32) 388; (33) 190.
- Churning**—  
 in Danish creameries, (28) 776.  
 relation to milk fat globules, (26) 477.
- Churns**, notes, (27) 792.
- Churns**, tests, (34) 590.
- Chutes**, frictional resistance in, (30) 885.
- Chutneys**, recipes, (32) 560.
- Chyliza persicorum**, notes, (30) 757.
- Chymase** in *Solanum elaeagnifolium*, (36) 412.
- Chymology**, physiological and pathological, treatise, (31) 265.
- Chymosin**—  
 and pepsin, identity, (26) 107.  
 secretion by young animals, (29) 665.
- Cibotium chamissoi**, analyses, (29) 270.
- Cicada**—  
 cinctifera, notes, (28) 853.  
 net-winged, on olive, (38) 157.  
 periodical—  
   in 1919, (40) 754.  
   Ohio, (35) 658; (37) 258.  
   West Virginia, (35) 657.  
   western New York, (37) 257.  
 life history and bionomics, (34) 754.  
 notes, (26) 753, 856; (27) 755; (28) 157, 752; (29) 793; (30) 657; (31) 59, 351; (34) 752; (36) 856; (39) 762.  
 on Staten Island, (28) 655.  
 popular account, (40) 549.
- Cicadas**—  
 in United States, (36) 551.  
 notes, (29) 558.  
 of Mississippi, (40) 856.
- Cicadellidae**—  
 of Missouri, (37) 157.  
 of Wisconsin, (37) 761.
- Cicadidae** of Japan and Formosa, (38) 264.
- Cicadula 6-notata**—  
 life history, (35) 553.  
 notes, (27) 858; (33) 356.

- Cicer**—  
 arletinum—see also Chick peas.  
 acid secretion of, (34) 525.  
 analyses, (30) 558; (31) 258; (28) 368, 572.  
 anatomical structure, (31) 314.  
 as a green manure for rice, (37) 824.  
 culture, (32) 226.  
 culture experiments, (27) 336.  
 culture in India, (36) 635.  
 for pigs, (28) 364.  
 loss in weight after harvesting, (38) 635.  
 nodule formation, (38) 528.  
 seed position in planting, (40) 635.  
 water requirements in India, (27) 429.  
 culture experiments, (28) 633.
- Cichorium intybus**, see Chicory.
- Cicindelidae** of Indiana, studies, (39) 767.
- Cicinnobolus**—  
 abelmoschi n.sp., description, (26) 446.  
 brempiphagus n.sp., description, (30) 240.  
 sp., parasitic on apple mildew, (31) 544.
- Cicuta**—  
 description, (32) 474.  
 maculata, eradication, (27) 733.  
 sp., notes, (32) 778.  
 spp., chemistry and toxicology, (34) 185.  
 toxicity, (30) 880.  
 vagans, description, (39) 386.
- Cicutin hydrobromid**, use against tetanus, (37) 79.
- Cider**—  
 alcohols in, (39) 113.  
 analyses, (32) 207; (38) 114.  
 apple jelly, manufacture, (39) 808; (40) 414.  
 as affected by preservatives, (30) 665.  
 changes in during fermentation and storage, (37) 716; (38) 365.  
 chemistry and biology of, (29) 116.  
 clarifying with casein, (26) 26.  
 defective, utilization, (40) 116.  
 fermentation as affected by cold, (27) 461.  
 from Minnesota apples, (39) 316.  
 industry in England, (37) 416.  
 industry in Uruguay, (32) 744.  
 manufacture, (33) 209; (38) 806; (40) 116, 808.  
 manufacture, new methods in, (29) 798.  
 of lower Seine regions, composition, (30) 16.  
 press pulp, studies, (34) 256.  
 quality as affected by apple stock, (33) 240.  
 sickness, (26) 512; (28) 114; (29) 208.  
 sickness, treatment, (35) 717.  
 single-variety, analyses, (35) 717.  
 studies, (40) 414.  
 vinegar—  
 adulteration, detection, (27) 613.  
 composition, (28) 361.  
 manufacture from pure apple juice, (30) 16.  
 standards, notes, (26) 117.
- Cienfuegosia**, glands of, (39) 431.
- Cigar**—  
 ashes, analyses, (38) 626.  
 case bearer, notes, (26) 146.  
 molds, (31) 613; (35) 749.
- Cigarette beetle**—  
 as affected by Roentgen rays, (29) 359; (35) 554; (37) 359.  
 in Dutch East Indies, (40) 170, 854.  
 in Philippines, (29) 458.  
 life history and remedies, (38) 62; (39) 565.  
 notes, (26) 453, 856; (31) 249.  
 predacious enemies of, (29) 359.  
 studies, (40) 758.
- Cimbex americana**, notes, (28) 554.
- Cimex**—  
 boueti, biology, (30) 547.  
 lectularius, see Bedbugs.  
 pipistrelli, relation to trypanosomiasis of bats, (33) 552.  
 rotundatus, relation to kala-azar, (28) 655; (37) 357.  
 spp., transmission of trypanosomes by, (30) 853.  
 studies, (34) 857.
- Cimicifuga**, insecticidal value, (31) 350.
- Cinchona**—  
 alkaloids, disinfecting action, (40) 478.  
 alkaloids, identification, (39) 506.  
 culture, (36) 538; (38) 542.  
 culture in Java, (36) 643.  
 diseases, notes, (37) 844.  
 gray root, notes, (37) 352.  
 industry in India, (27) 347.
- Cinchona**—Continued.  
 industry in Netherlands East India, (34) 239.  
 mopo disease, (34) 749; (36) 145.  
 red mite of, (40) 656.  
 treatise, (33) 343.  
 white root fungus, (39) 858.
- Cinchonidin**, methods of analysis, (37) 113.
- Cineol** from black sage, (33) 202.
- Cinnamic aldehyde**—  
 determination in cinnamon, (40) 15.  
 preservative action, (26) 157.
- Cinnamomum**—  
 camphora—  
 culture and preparation, (27) 442.  
 insect enemies of, (31) 849.  
 oliveri, essential oil of, (36) 611.
- Cinnamon**—  
 disease, notes, (35) 153.  
 effect on microorganisms, (35) 557.  
 germicidal effect, (38) 854.  
 ground, analyses, (29) 462.  
 ground, distribution of sand in, (26) 564.  
 preservative value, (38) 469.
- Cinquefoil**, shrubby, notes, (29) 741.
- Cintractia sorghi vulgaris**—  
 inoculation of Guinea corn, (34) 644.  
 studies, (38) 850.
- Cioidae**—  
 catalogue, (26) 560.  
 of America north of Mexico, (38) 768.
- Cionus scopularia**, life history, (26) 452.
- Circular scale**, notes, (28) 854.
- Circumhorizontal arc**, (35) 618.
- Cirina butyrospermi**, notes, (28) 555.
- Cirphis unipuncta**, see Army worm.
- Cirrhencyrtus** n.g., erection, (40) 359.
- Cirrospiloideus guamensis** n.sp., description, (31) 62.
- Cirrospilopsis** sp. from Maryland, (38) 565.
- Cirrospilus**—  
 flavoviridis n.sp., description, (30) 661.  
 ovisugosus n.sp., description, (34) 363.
- Cirrus**—  
 bands and the aurora, (34) 117.  
 directions at Melbourne, (35) 116.
- Cirsium**—  
 arvense, analyses and feeding value, (33) 70.  
 arvense, root system, (37) 542.  
 spp., geographical distribution, (26) 335.
- Cisidae** of America north of Mexico, (38) 768.
- Cissus laciniata** and *Opuntia blakeana*, structural relationship, (28) 332.
- Cisthene**, new, of North America, (37) 564.
- Citellus**—  
 beecheyi—  
 and subspecies, control, (33) 456.  
 new microflaria from, (26) 653.  
 tuberculosis in, (26) 484.  
 chrysoideirus, susceptibility to plague (26) 59.  
 columbianus, immunity to spotted fever, (31) 160.  
 elegans, notes, (28) 450; (30) 249.  
 spp., in Colorado, (28) 652.
- Citral**—  
 determination, (39) 716.  
 determination in essential oils, (28) 114.
- Citranges**—  
 and citrandarin, susceptibility to canker, (39) 857.  
 culture experiments, (28) 235.  
 culture in southern Texas, (32) 337, 539.  
 paper on, (29) 839.  
 resistance to cold (39) 843.
- Citrates**—  
 action on isolated intestine, (37) 471.  
 toxic action, (40) 465.
- Citric acid**—  
 assimilation by plants, (31) 426.  
 decomposition by sunlight, (30) 431.  
 determination, (26) 509; (36) 317.  
 determination in—  
 citrates and lemon juice, (31) 612.  
 fruit, (27) 497; (32) 297.  
 milk, (36) 415.  
 presence of other acids, (28) 806; (31) 714.  
 tomato products, (26) 25.  
 effect on—  
 bacterial flora of soils, (28) 815.  
 bread fermentation, (27) 268.  
 carbon assimilation of plants, (27) 525.  
 fungi, (28) 444.

- Citric acid**—Continued.  
 effect on—continued.  
   germination of seeds, (36) 29.  
   nitrication in soils, (28) 218.  
 extraction with ether, (37) 414.  
 fermentation in milk, (26) 112.  
 formation from glycerin by fungi, (30) 805.  
 from limes and lemons, (33) 540.  
 in wines, (32) 613; (36) 808.  
 methods of analysis, (27) 205.  
 solubility of mineral phosphates in, (30) 721.  
 toxicity, (28) 661.
- Citricola scale**—  
 control, (39) 461, 463.  
 notes, (34) 255.  
 studies, (33) 558.
- Citriculture**, summer practice course in, (34) 292.
- Citromyces**—  
 glaber, proteolytic activity, (40) 721.  
 n.spp., descriptions, (27) 543.  
 siderophilus, notes, (27) 527.  
 spp., behavior in iron solutions, (27) 527.  
 spp., notes, (28) 562.  
 spp., relation to *Penicillium*, (38) 448.  
 spp., studies, (29) 547.
- Citron**—  
 candied, analyses, (26) 157.  
 candied, labeling, (27) 269.  
 dried, preparation and use, (29) 462.  
 food plant of portable scale, (26) 756.  
 preserving, calcium content, (39) 747.
- Citronella**—  
 grass—  
   fertilizer experiments, (36) 332.  
   insects affecting, (28) 249.  
   residue, analyses and fertilizing value, (36) 417.  
   oil, production, (36) 417.
- Citronellal**, determination in essential oils, (28) 114.
- Citro-phosphate solutions**, nature of, (32) 115.
- Citropsis spp.**, studies, (30) 643.
- Citrullus**—  
 spp., analyses and digestibility, (27) 871.  
 vulgaris, analyses and digestibility, (32) 167.  
 vulgaris, notes, (29) 362.
- Citrus**—  
 anthracnose, notes, (29) 650.  
 aphid, notes, (26) 755.  
 Armillaria root rot, (39) 152.  
 aurantium, betains in, (27) 204.  
 aurantium, isolation of stachydrin from, (26) 107.  
 bacterial disease, new, studies, (37) 153, 154.  
 bacterial spot, studies, (38) 552, 553.  
 bark disease in Florida, (35) 850.  
 bark rot, studies, (35) 249.  
 black—  
   blight, notes, (30) 746.  
   fly, *see* *Aleurocanthus woglumi*.  
   scale, remedies, (39) 461.  
   spot and brown spot, treatment, (37) 352.  
 blast in California, (39) 252.  
 blast, notes, (38) 354.  
 blast, studies, (37) 153.  
 butterfly, notes, (34) 851.  
 canker—  
   cause, (33) 149.  
   control, (39) 56, 252, 253, 458, 857.  
   control in Florida, (36) 52, 352; (37) 556.  
   control in Porto Rico, (33) 441.  
   description, (35) 656.  
   eradication, (37) 556.  
   identification, (36) 352.  
   in Alabama, (33) 248.  
   Florida and the Gulf States, (33) 149.  
   Philippines, (36) 651; (37) 745.  
   South Africa, (37) 657.  
 inoculation experiments, (37) 843.  
 n.s.p., description, (33) 149.  
 notes, (32) 53, 245, 548; (34) 649, 845; (37) 556, 657; (39) 152, 850, 864; (40) 349.  
 quarantine in United States, (36) 245.  
 resistance of tangelos to, (40) 247.  
 studies, (31) 54; (32) 345; (34) 447; (35) 152, 550, 850; (36) 850, 851; (37) 656, 843; (39) 253, 457, 458, 757, 857; (40) 544, 851.  
 chlorosis, description, (28) 850.  
 collar rot, notes, (40) 748.  
 crown gall, (28) 447.
- Citrus**—Continued.  
 die-back—  
   cause, (31) 450.  
   cause and treatment, (38) 151.  
   in Queensland, (33) 56.  
   notes, (27) 344.  
   studies, (29) 237, 248.
- Diplodia diseases**, (39) 152.
- diseases**—  
 and pests, relation to Argentine ant, (39) 155.  
 in Florida, (40) 158.  
 Isle of Pines, (34) 446.  
 Jamaica, (35) 458.  
 Porto Rico, (35) 748; (37) 246; (40) 47, 52.  
 West Indies, (37) 452.  
 Western Australia, (33) 846.  
 notes, (26) 549; (27) 50, 750; (29) 350; (31) 152, 244, 645, 646; (37) 656; (39) 56, 149, 753; (40) 155.  
 studies, (27) 50, 350; (32) 238; (33) 55, 149, 549, 649; (34) 446; (35) 849; (39) 457.
- fruit**—  
 juices, analyses, (31) 461.  
 juices, preparation, (33) 316.  
 rot, investigations, (32) 346.  
 rot, notes, (31) 750.  
 rots, descriptions and treatment, (28) 245.  
 stain, notes, (34) 354.  
 fruits—*see also* Lemons, Oranges, etc.  
 abnormal water relations, (37) 834.  
 action of vanillin and limestone on, (37) 656.  
 Argentine fly on, (40) 758.  
 fruits as affected by—  
   freezing, (40) 247, 539.  
   kerosene oil and alcohol, (27) 145.  
   oil insecticides, (29) 354.
- fruits**—  
 asexual reproduction of seeds, (31) 533.  
 bibliography, (26) 441; (28) 742.  
 blemishes, notes, (26) 549.  
 breeding, (27) 441.  
 bud variations in, (36) 538.  
 budding, (32) 143.  
 budding and grafting, (39) 243.  
 changes in during ripening, (29) 641.  
 cost of distributing, (33) 141.  
 cost of production, (37) 144.  
 cotton stainer injury, (40) 353.  
 cover crops for, (33) 535; (34) 344, 736.  
 cull, utilization, (37) 313.  
 culture, (35) 542, 840; (37) 345; (38) 40, 446.
- fruits, culture**—  
 experiments, (27) 744; (28) 142; (31) 441; (38) 845.  
 in Brazil, (36) 241, 743.  
 Florida, (33) 642.  
 Gulf States, (29) 542.  
 Japan, China, and Formosa, (37) 834.  
 lower Rio Grande Valley, (26) 47.  
 New South Wales, (33) 841.  
 Philippines, (30) 644; (34) 635; (37) 745.  
 Spain, (32) 236.  
 Surinam, (38) 43.  
 Transvaal, (37) 545.  
 treatise, (30) 444.
- fruits**—  
 cytological and experimental studies, (28) 524.  
 dying in Queensland, (35) 654.  
 enemies of, (28) 352.  
 fertilizer experiments, (27) 344, 350, 841; (29) 237, 637; (31) 634, 723, 742; (33) 24, 48, 241, 535, 642; (35) 448, 839; (36) 139; (37) 43, 649; (39) 448.  
 fertilizer needs in Porto Rico, (40) 44.  
 fertilizers for, (36) 743; (38) 144.  
 freeze injury, (39) 448, 843.  
 frost damage in transit, (37) 649.  
 frozen, greening, (28) 662.  
 frozen, separation by floating, (30) 206.  
 fumigation, (31) 550; (37) 634; (40) 855.  
 fumigation in Spain, (28) 754.  
 green manuring experiments, (39) 31  
 handling, (32) 234.
- fruits, handling**—  
 and packing, (39) 545.  
 and shipping, (34) 235.  
 and storing, (31) 338.  
 in Italy, (26) 47.

## Citrus—Continued.

## fruits—

- improvement, (28) 541, 736; (37) 144; (39) 447, 448, 845.  
 improvement by bud selection, (32) 439; (34) 740.  
 in India, (28) 754.  
 industry, cooperation in, (38) 43.  
 industry in California, (30) 197; (39) 846.  
 industry in Porto Rico, (32) 745.  
 injury from limestone, (39) 458.  
 insects affecting, (26) 553, 858; (27) 453; (28) 457, 754; (30) 853; (31) 751; (32) 56; (33) 353, 746; (34) 60, 349, 449, 652; (35) 355, 657; (36) 457, 754; (37) 255; (38) 459, 460; (39) 59, 155, 160, 461, 557, 767; (40) 853.  
 inspection in Florida, (36) 467, 864.  
 irrigation, (33) 779; (35) 787; (36) 784; (37) 319; (39) 591.  
 irrigation experiments, (36) 841; (37) 186.  
 irrigation, overhead, (27) 788.  
 law of Florida, (28) 196; (30) 740.  
 lightning injury, (37) 656.  
 lime-magnesia requirements, (29) 520.  
 marketing, (38) 595.  
 methods and cost of distributing, (34) 835.  
 monograph, (35) 448.  
 mulched basin culture, (39) 448.  
 mulching experiments, (34) 740; (36) 841.  
 nematode affecting, (33) 550.  
 new genus, from Australia, (34) 235.  
 new, paper on, (29) 839.  
 nitrogen nutrition, (37) 318, 353.  
 notes, (29) 235.  
 nursery stock, bench rooting of, (33) 540.  
 oxidases in, (31) 826.  
 peeling machine for, (36) 416.  
 production and commerce in, (31) 48.  
 propagation, (29) 542.  
 protection against frost, (27) 414, 509; (29) 542; (32) 541; (33) 48; (35) 537.  
 ratio of solids and acids, (39) 49.  
 scale insects affecting, (29) 654.  
 seed formation in, (32) 236.  
 spotting of, (35) 50, 144.  
 spraying, (37) 460.  
 stocks for, (33) 736; (35) 144.  
 susceptibility to Mediterranean fruit fly, (32) 655.  
 treatise, (33) 441.  
 variations and hybridization in, (31) 48.  
 varieties, (28) 533; (38) 40.  
 wild and cultivated, (39) 142.
- galls, notes, (28) 651.  
 gray mold or Botrytis disease, studies, (35) 152.  
 grove soils, studies, (39) 421.
- groves—  
 Argentine ant in, (39) 155.  
 cost of smudging, (29) 339.  
 intercropping, (39) 47.  
 lightning injury, (40) 645.  
 plowsole in, (40) 417.
- gum diseases, notes, (27) 546.
- gummosis—  
 description, (34) 353.  
 in California, (31) 449.  
 induced by chemicals, (31) 449, 749.  
 notes, (28) 246; (37) 846; (39) 253, 653.  
 studies, (29) 247; (30) 749; (37) 656.  
 treatment, (27) 40; (33) 55.
- heart rot, treatment, (33) 55.  
 hybrids, studies, (26) 441.  
 ichangensis, description, (29) 839.  
 ichangensis latipes, description, (29) 840.  
 japonica, monograph, (31) 48.  
 knot disease, investigations, (27) 652.  
 knot, notes, (36) 846; (37) 839.  
 leaf disease, notes, (37) 453.  
 leaf miner, notes, (33) 655.  
 mal di gomma, studies, (33) 550.  
 malnutrition diseases, investigations, (31) 237.  
 mealy bug—  
 control, (34) 255; (37) 158.  
 natural enemies of, (26) 149.  
 notes, (29) 652; (32) 56; (38) 464.  
 studies, (34) 162.
- medici, culture in California, (40) 246.
- melanose—  
 description and history, (40) 158.  
 distribution, (38) 757.

## Citrus—Continued.

## melanose—Continued.

- studies, (28) 651; (31) 750; (39) 56, 457.  
 treatment, (37) 656.  
 mildew, notes, (34) 649.  
 mite, description, (36) 261.  
 mites, notes, (32) 557.  
 mitis as a stock for cultivated citrus, (32) 143.  
 mosaic disease or mottling, studies, (35) 745.  
 mottled leaf, notes, (34) 353.  
 mottled leaf, studies, (28) 850; (30) 51; (35) 754; (37) 352, 353.  
 nursery stock diseases, notes, (34) 240.  
 pest, new, (40) 169.  
 plant lice, natural enemies of, (26) 755.  
 pollen, long-distance shipment of, (34) 43.  
 powdery mildew in southern California, (34) 447.  
 ranch employees, housing, (39) 795.  
 red spider in Oregon, (28) 859.  
 red spider, remedies, (29) 459.  
 root diseases, notes, (32) 442.  
 root nematode, (28) 850; (31) 449.  
 rust mite, life history and habits, (28) 457.
- scab—  
 cause, (37) 556.  
 in Porto Rico, (38) 454.  
 notes, (28) 246; (29) 242; (31) 750.  
 studies, (27) 653.  
 treatment, (40) 52.
- scale—  
 gray, remedies, (40) 454.  
 parasites as affected by sprays, (40) 52.  
 remedies, (38) 58.  
 scaly bark, new fungus of, (26) 145.  
 scaly bark, notes, (37) 846.  
 seedlings as affected by irrigation water, (34) 235.  
 soils, fertilization, (29) 317.  
 sooty mold, remedies, (36) 754.  
 sour rot, notes, (37) 843.  
 sour scab, studies, (36) 352.  
 stem-end rot—  
 cause, (28) 549.  
 distribution, (38) 757.  
 notes, (26) 449; (30) 841; (31) 750.  
 prevention, (39) 252, 253.  
 studies, (28) 651; (29) 247.
- stocks, tests, (29) 637.
- thrips—  
 notes, (29) 453.  
 remedies, (33) 354.  
 studies, (38) 763.  
 summary of information, (40) 649.
- trees—  
 frosted, pruning, (29) 542.  
 fumigation, (39) 161, 463.  
 old, renewing, (35) 343.  
 phosphorus content of soils under, (39) 421.  
 spraying in Florida, (39) 160.  
 trifoliata, asexual reproduction of seeds, (31) 533.  
 vegetation as affected by cement dust, (35) 313.  
 white fly, see White fly, citrus.
- witherip—  
 description, (30) 746.  
 notes, (34) 354; (37) 453.  
 studies, (28) 749.  
 wood rot, description and treatment, (38) 51.
- City persons who desire to farm, suggestions for, (31) 787.
- City refuse, utilization, (28) 224.
- Cladius pectinicornis, parasite of, (29) 359.
- Cladochytium—  
 graminis, description and treatment, (29) 751.  
 mauri n.sp., description, (32) 346.  
 ollivieri n.sp., description, (32) 346.
- Cladophora sp., carotinoid content, (31) 803.
- Cladosporium—  
 brunneoatrum, notes, (27) 350.  
 brunneoatrum, treatment, (33) 149.  
 carpophilum—  
 description, (35) 654.  
 dusting experiments, (39) 55.  
 infection of peaches with, (31) 449.  
 notes, (30) 537; (36) 649, 751; (38) 550; (40) 53.  
 studies, (36) 545.
- citri—  
 in Porto Rico, (39) 56.  
 notes, (27) 350; (28) 246; (30) 47; (31) 539; (34) 446; (36) 348; (37) 556; (40) 47, 52.

## Cladosporium—Continued.

- citri—continued.  
on grapefruit, (35) 748.  
studies, (27) 653; (36) 353.
- cucumerinum—  
notes, (32) 641; (35) 246, 750.  
studies, (36) 248; (38) 449.  
virulence, (37) 840.
- disease on sorghum, (33) 545.
- epiphyllum, parasitism, (32) 640.
- fulvum—  
description, (26) 849; (27) 249; (30) 5C  
notes, (26) 649; (27) 651; (31) 644; (34) 841.  
resistance of tomatoes to, (33) 247.  
studies, (39) 854.  
treatment, (26) 849; (30) 50, 244; (35) 350.
- fulvum violaceum—  
n.var., description, (30) 749.  
notes, (31) 748.  
studies, (32) 148.
- graminum—  
affecting wheat seed, (31) 148.  
notes, (37) 553.  
studies, (30) 846.
- herbarum—  
agave-echeveria, notes, (32) 149.   
citricolium n.var., description, (26) 145.  
in frozen reindeer meat, (30) 761.  
notes, (27) 763; (28) 659; (29) 161, 243, 845;  
(31) 347, 542, 844; (32) 644, 843; (33) 146;  
(38) 646.  
penetration of egg shells by, (29) 765.  
relation to citrus gummosis, (29) 247.  
relation to iodine compounds, (29) 133.  
source of nitrogen for, (27) 226.  
studies, (26) 749; (38) 849.  
toxicity to bees, (38) 564.
- laricis, notes, (29) 156.
- paeoniae, notes, (33) 56.
- sp., notes, (31) 646.
- sp. on chrysanthemums, (31) 844.
- sp. on tea, (38) 354.
- spp., studies, (30) 349.
- syringae n.sp., description, (37) 550.
- Cladostephu verticellatus, analyses, (37) 814.
- Clam—  
beds, inspection in New Jersey, (28) 862.  
chowder, examination, (31) 659.  
shells, crushed, analyses, (36) 27.
- Clams—  
canned, industry in United States, (31), 67.  
creatin and creatinin content, (31) 760.  
culture, (27) 472.  
examination, (26) 868; (28) 166; (31) 64; (32) 854;  
(36) 159.  
handling and marketing, (31) 63.  
preparation for market, (32) 357.  
sewage-polluted, danger from, (27) 866.  
soaking in fresh water, (26) 868.  
transmission of diseases by, (30) 368.
- Clania variegata, notes, (31) 849.
- Clark Fork of Columbia River, hydrography, (32) 279.
- Clasterosporium—  
amygdalearum, notes, (28) 443.  
carpophilum, notes, (35) 454.  
degenerans, notes, (37) 652.  
maydicum n.sp., notes, (37) 148.  
putrefaciens, notes, (34) 350; (35) 245.
- Clastoptera spp., life history, (36) 458.
- Clathrus sp., notes, (27) 749.
- Clausena lansium, description, (32) 742.
- Claviceps—  
paspali—  
life history and poisonous properties, (36) 449.  
poisoning in cattle, (39) 891.  
toxicity, (34) 676.
- purpurea—  
infection experiments, (28) 546.  
notes, (31), 539; (33) 146; (34) 845.  
on Manitoba wheat, (40) 849.  
on oats, (27) 149.
- sclerotia, toxicity, (36) 179.
- Clay—see also Soils, clay.  
analyses, (28) 215.  
as affected by hydroxyl ions, (31) 216; (32) 318.  
colloidal, notes, (34) 816.  
colloids in, (30) 718, 807; (32) 318.  
composition, (27) 409.

## Clay—Continued.

- deposits in Virginia coastal plain, (29) 513.  
determination in soils, (27) 7.  
determination of fineness, (30) 422, 817.  
distribution in soils, (28) 28.  
drainage tile, tests, (29) 685.  
effect of fineness on strength of mortar, (33) 781.  
effect on loamy land, (29) 19.  
flocculation by soluble salts, (27) 620.  
new reaction for, (33) 610.  
plasticity, (27) 499; (28) 29.  
plasticity and cohesion, (30) 214.  
plasticity and origin, (35) 16.  
plasticity, measuring, (33) 811.  
red boulder of Netherlands, studies, (26) 813.  
red saline, composition, (27) 619.  
rôle of microorganisms in formation, (27) 619.  
studies, (35) 211.
- suspensions—  
coagulation by electrolytes, (31) 618.  
formation of layers in, (39) 420.
- Clays, native, white and color washing with, (26) 189.
- Cleaning fluid, effect on germination of seeds, (26) 820.
- Clematis—  
stem rot, studies, (33) 650.  
stem rot and leaf spot, studies, (31) 347; (34) 249.  
vitalba, chemical constituents of, (32) 711.
- Clemson College, notes, (26) 194, 495, 696; (27) 199,  
800; (29) 98, 399; (30) 398, 600, 900; (31) 198; (32) 600;  
(34) 199; (36) 197, 696, 899; (37) 300; (38) 98, 499, 800;  
(40) 398.
- Cleome—  
integrifolia, geographical distribution, (26) 335.  
rubella, analyses and digestibility, (27) 871; (32) 167.
- Cleonus—  
calandrocides, notes, (29) 761.  
canescens, notes, (28) 161.  
mendicus, notes, (36) 355.  
sparsus, notes, (32) 651, 652.  
spp., notes, (35) 364.
- Cleonymidae of Australia, (39) 154.
- Cleora pampinaria, see Cranberry spanworm.
- Cleptomyces—  
lagerheimianus, n.comb., (40) 133.  
n.g. from the Andes, (40) 133.
- Clerada apicicornis sucking blood, (38) 557.
- Clianthus dampieri, hybridization experiments,  
(26) 834.
- Click beetle, spotted, studies, (33) 63.
- Climate—see also Meteorology.  
and cropping systems, correlation, (34) 603.  
plant growth at different elevations, (39) 809.  
plant growth, relationship, (30) 16.  
sun spots, correlations, (40) 416.  
types of farming, (40) 116.  
weather, treatise, (28) 211.
- as a factor in pollination of grasses and legumes,  
(37) 735.
- as affected by—  
forests, (29) 642, 842; (30) 743; (31) 716.  
reservoirs, (27) 509.  
surface slope, (27) 616.  
volcanic dust, (29) 720; (32) 509; (33) 806.
- changes in, (30) 815; (31) 20, 509, 510, 717; (32) 118; (33) 19; (34) 14; (35) 14, 210, 619; (37) 15;  
(38) 15, 415, 718.
- changes in, treatise, (32) 417.
- effect on—  
agriculture, (36) 417; (37) 209; (39) 317.  
agriculture in California, (34) 114.  
agriculture in Germany, (27) 617; (29) 811.  
apples, (26) 45.  
burning quality of tobacco, (38) 239.  
cattle ticks, (26) 458; (28) 758.  
composition of plant oils, (37) 418.  
composition of wheat, (26) 133; (29) 834, 835;  
(30) 440; (37) 38.  
crop systems and farm operations, (34) 308;  
(38) 414.  
cultivated crops, (33) 825.  
flowering of plants, (26) 429.  
growth of date palms, (31) 326.  
mineral content of feeds, (28) 364.  
Oenothera, (28) 733.  
pecans, (34) 151.  
protein content of wheat, (30) 836.

- Climate—Continued.  
 effect on—continued.  
   quality of sugar beets, (28) 43.  
   soil temperature, (34) 319.  
   soils, (31) 214; (35) 210.  
   tree growth, (37) 450, 837.  
   yield of corn, (28) 433.  
 of Abyssinia, (33) 807.  
 Africa, (26) 715.  
 Alaska, (35) 295.  
 America, types of, (30) 814.  
 Anne Arundel Co., Maryland, (39) 419.  
 arid America, changes in, (31) 509.

  for milk production, (40) 572.  
  loader for, (39) 231.  
  manurial value, (40) 127.  
  production in United Kingdom, (26) 793.  
  v. shelled corn for sheep, (29) 572.  
  worm, notes, (29) 252; (30) 854.  
histological identification, (30) 631.  
hop, as pasture crop, (39) 231.  
in dry-farm rotations, (39) 131.  
inoculation, (29) 326.  
inoculation experiments, (27) 335; (28) 426.  
insects affecting, (31) 848; (34) 251; (38) 557; (39) 262, 264, 358, 532, 557, 565; (40) 163, 650.  
irrigation experiments, (32) 186, 225; (36) 35; (37) 639.  
Japan—  
  analyses, (26) 234.  
  as cover crop, (38) 346.  
  as pasture crop, (37) 533.  
  culture, (30) 335; (32) 527.  
  for cut-over land pasture, (39) 231.  
  hay, feeding value, (39) 269.  
  papers on, (26) 234.  
  purity and germination tests, (35) 441.  
leaf beetle, notes, (39) 358.  
leaf spot, notes, (32) 443.  
leaf tyer, identification, (36) 97.  
leaf tyer, studies, (35) 553.  
leaf weevil—*see also* Clover weevil.  
  control, (39) 264.  
  lesser, notes, (37) 255.  
  notes, (27) 259, 561; (31) 457; (37) 262.  
leafhopper, remedies, (35) 465.  
liming experiments, (28) 136; (31) 820; (32) 31; (33) 333; (34) 133; (38) 219; (39) 221, 421; (40) 322, 815.  
Maltese, as a forage crop, (32) 41.  
mammoth, as winter cover crop, (40) 133.  
management in corn belt rotation, (29) 140.  
meal, analyses, (36) 667; (38) 369.  
meal for pigs, (34) 869.  
Mexican, analyses, (34) 767.  
Mexican, culture, (30) 335.  
mite, notes, (27) 662; (28) 457; (35) 656; (38) 365.  
mite, review of literature, (31) 159.  
mixtures, tests, (39) 135.  
multiple leaves in, (35) 329.

## Clover—Continued.

- nectar secretion, (37) 633.  
nematodes affecting, (29) 151, 446.  
nitrogenous fertilizers for, (37) 133.  
nodule bacteria of, (32) 33, 327.  
notes, (26) 362.  
nurse crops for, (39) 436.  
on bog and moss soils, (40) 212.  
pasture for pigs, (37) 270.  
pasture, notes, (30) 829.  
pollen, physiology of, (29) 829.  
pollination, (31) 134.  
pollination studies, (37) 30, 735.  
potash fertilizers for, (26) 526.  
potash requirement, (33) 517.  
precipitin test for, (31) 733.  
Pseudopeziza leaf spots, (37) 751.  
rate of seeding tests, (27) 836.  
red—  
  analyses, (26) 770; (27) 35; (32) 171.  
  anthracnose of, (34) 155.  
  as affected by potash, (32) 228.  
  as green manure, (28) 339; (35) 337; (39) 816.  
  as meadow crop, (40) 136.  
  behavior in acid soils, (37) 422.  
  breeding experiments, (32) 431; (33) 131; (34) 34; (40) 735.  
  changes during ensiling, (39) 166.  
  color characteristics in, (31) 330.  
  composition at different stages, (30) 634.  
  culture, (30) 335.  
  culture experiments, (27) 735; (28) 231; (29) 226; (32) 36, 431; (34) 34; (36) 435; (38) 334; (40) 328, 526.  
  decomposition in soil, (40) 214.  
  disease of, (33) 445.  
  disease resistance, (39) 454.  
  effect on *Azotobacter*, (40) 618.  
  effect on following crop, (38) 337; (40) 623.  
  fertilizer experiments, (34) 622; (35) 520; (39) 116.  
  floral development, (30) 132.  
  gall gnat affecting, (30) 159.  
  germination tests, (27) 431.  
  greensand potash for, (40) 423.  
  growing with grain, (40) 822.  
  improvement, (27) 136; (28) 434.  
  in rotation with cereals, (39) 127.  
  inoculation, (40) 328.  
  insects affecting, (40) 650.  
  irrigation experiments, (37) 435.  
  leaf-spot disease, (40) 156.  
  liming, (40) 328.  
  liming experiments, (32) 132; (34) 133, 725; (39) 127, 626.  
  nectary of, (33) 27.  
  notes, (31) 830.  
  nurse crops, (40) 329.  
  on inoculated soil, (39) 519.  
  pollination by bumblebees, (27) 359.  
  pollination studies, (33) 832.  
  propagation experiments, (31) 228.  
  relation of tops to roots, (31) 733.  
  relative yielding capacity, (40) 625.  
  root system, (32) 634.  
  seed, adulteration and misbranding, (27) 141.  
  seed color in, (29) 533.  
  seed of, and its impurities, (40) 627.  
  seed production, (40) 730.  
  seeding, (27) 337; (29) 634.  
  seeding experiments, (32) 531.  
  spider attacking, (39) 65.  
  sulphur requirement, (40) 727.  
  Uromyces fallens on, (39) 550.  
  v. alfalfa, (40) 328.  
  variation in, (31) 134.  
  varieties, (26) 733; (29) 139; (30) 634; (33) 33.  
  yield as affected by source of seed, (26) 833.  
  yields, (40) 732.  
relation to climate, (28) 27.  
residues, nitrogen content, (28) 217.  
resistance to *Colletotrichum*, (38) 350.  
rhizoctoniosis, notes, (26) 844.  
root borer, notes, (31) 848.  
root borer, popular article, (39) 565.  
root curculio affecting alfalfa, (32) 851.  
rotation experiments, (29) 227; (33) 828; (36) 829.  
rust, aestival stage, (37) 752.  
rye stalk disease affecting, (26) 546.

## Clover—Continued.

- Sclerotinia libertiana affecting, (26) 647.  
Sclerotium disease, (39) 753.
- seed—  
analyses, (26) 739.  
boiling, (37) 829.  
bushel weights, (37) 889.  
caterpillar, notes, (32) 651; (39) 557.
- seed chalcis fly—  
notes, (26) 452; (28) 653; (29) 252; (32) 454;  
(35) 551; (39) 557; (40) 853.  
parasites of, (40) 862.  
remedies, (32) 550; (39) 760.
- seed—  
cleaning, (40) 40.  
coat, (26) 132; (33) 428.  
determination of origin, (37) 541.  
dry and soaked, measurement, (36) 339.
- seed, germination—  
and purity tests, (29) 741; (30) 40; (36) 638.  
energy of, (29) 538.  
tests, (26) 44; (29) 740; (34) 143.
- seed—  
hard, germination, (30) 738; (31) 228.  
hard, treatment in hulling, (33) 334.  
high v. low grade, (26) 838.  
impermeable, viability, (35) 740.  
imported, germination tests, (35) 140.  
inspection, (31) 438; (36) 442.  
investigations, (40) 39.  
longevity, (32) 634.  
midge, *see* *Dasyneura leguminicola*.  
mixtures, tests, (26) 630.  
production, (38) 441; (39) 835.  
production in Europe, (26) 436.  
production in Idaho, (38) 231.  
purity tests, (27) 733.  
scarifying experiments, (37) 30.  
standards in Canada, (26) 839.  
tests, (27) 142.  
treatment with sulphuric acid, (27) 37, 524.  
valuation, (30) 40; (36) 638.  
viability as affected by age, (31) 624.  
vitality, (27) 740.
- seeding experiments, (38) 130; (39) 436, 437.  
seeding on ranges, (30) 35.  
selection and breeding, (31) 829.  
serpentine leaf miner affecting, (29) 857.  
sickness, notes, (28) 847; (32) 544.  
sickness, studies, (36) 348.
- silage—  
acidity, (39) 878.  
analyses, (29) 270; (32) 465.  
and hay for dairy cows, (31) 673.  
composition and nutritive value, (39) 166.  
for dairy cows, (37) 75.  
studies, (39) 166, 310.
- snout beetle, notes, (32) 650.
- sour, as a cover crop for citrus, (34) 344.
- sowing with and without a nurse crop, (26) 434.
- stem borer, notes, (35) 657.
- stem rot, investigations, (38) 850.
- stem rot, studies, (34) 541.
- strawberry—  
culture experiments, (30) 632.  
introduction into Victoria, (26) 833.
- streak disease, notes, (29) 352.
- sulphur in, (31) 817.
- sweet, *see* Sweet clover.
- toxic effect—  
of iron and aluminum salts, (33) 328.  
on pigs, (38) 589.
- transpiration, (39) 517.
- utilization of sugar by, (36) 125.
- utilization test, (39) 436.
- v. alfalfa for milch cows, (39) 578.
- v. alfalfa in rotation, (29) 634.
- varieties, (26) 631; (27) 32, 334, 836; (29) 830;  
(30) 828; (31) 829; (32) 36; (33) 632; (34) 736;  
(38) 131, 433, 634.
- varieties for Texas, (40) 729.
- varieties, foreign, (39) 338.
- variety tests, (40) 735.
- vitamin content, (40) 564.
- water requirement, (26) 129; (32) 127.
- weevil in Iowa, (37) 262.
- weevil, notes, (28) 752.
- weevil pupa cells, notes, (30) 655.

## Clover—Continued.

- white—  
analyses, (27) 35.  
as meadow crop, (40) 136.  
culture, (30) 335.  
Dutch, culture experiments, (32) 431.  
for irrigated pastures, (40) 432.  
history in United States, (36) 529.  
honey production, (40) 65.  
hydrocyanic acid in, (28) 36; (30) 36.  
new species resembling, (26) 40.  
root systems of, (35) 639.  
variation in, (29) 321.  
varieties, (29) 139.  
variety tests, (39) 530; (40) 232.  
wild v. ordinary seeds, (38) 338.  
yield as affected by origin of seed, (28) 432.
- wilt disease, description, (36) 47.
- winterkilling, (35) 530; (40) 331.
- worm, green, (39) 865.
- yield as affected by windbreaks, (28) 40.
- Cloves—  
as affected by storage, (36) 562.  
effect on microorganisms, (35) 557.  
examination, (32) 161.  
germicidal effect, (36) 863.  
insecticidal value, (39) 762.  
leaf spot disease, (36) 348.  
powdered, adulteration, detection, (30) 415.  
preservative value, (38) 469.
- Club root—*see also* Cabbage and Turnip club root.  
notes, (35) 150.  
studies, (31) 642; (33) 52; (37) 454.  
treatment, (35) 48, 245.
- Club work—*see also* Boys' clubs and Girls' clubs.  
in Indiana, (34) 599.
- Clubs, neighborhood improvement, (28) 194; (29) 95.
- Cluster fly, studies, (37) 665.
- Clysia ambigua—  
monograph, (34) 553.  
notes, (31) 157.
- Clytrinae, catalogue, (36) 458.
- Clytus devastator in Florida, (40) 169.
- Cnaphalocrocis medialis, notes, (33) 856.
- Cnaphalodes, studies, (40) 262.
- Cnemidocoptes mutans, notes, (35) 183.
- Coagulase in alfalfa, (32) 411.
- Coal—  
analyses, (31) 359.  
ash from iron industry, fertilizing value, (34) 725.  
ash, potash content, (39) 329.  
ashes, fertilizing value, (39) 430.  
lignite, analyses, (30) 697.  
mine disasters v. weather, (32) 25.  
mining in North Dakota, (33) 683.  
prices in United States, (31) 558.  
smoke, effect on health, (27) 212.  
spontaneous combustion, (37) 788.  
tar as coating for concrete, (34) 889.  
as wood preservative, (28) 344.  
colors, use in food products, (26) 609.  
creosotes as food preservatives, (32) 841.  
disinfectants, toxicity, (38) 284.  
dust, effect on plants, (28) 129.  
dye mixtures, review of literature, (32) 297.  
dyes, effect on health, (36) 262.  
dyes, methods of analysis, (27) 205.  
dyes, notes, (27) 64.  
dyes, separation, (26) 506; (36) 714; (38) 12.  
injury to vegetation, (32) 826.  
preparation, use on moor soil, (39) 438.  
vapors, effect on vegetation, (27) 635; (29) 530; (30) 647.  
waste as a source of ammonia, (27) 623.  
wetting for domestic use, (38) 87.
- Coast erosion, Spartina for, (40) 530.
- Cob meal, analyses, (27) 774, 872; (29) 666; (30) 68; (31) 366.
- Cobaea scandens, flower development in, (31) 427; (33) 427.
- Cobalt—  
chlorid, effect on olives, (26) 825.  
in soils, (31) 720.  
salts, effect on plant growth, (28) 38.  
toxic effect on plants, (38) 628.
- Cobra venom, hemolysis by, (36) 276.

- Coca cola**—  
adulteration and misbranding, (27) 365.  
sirup, analyses, (27) 167.
- Cocainae hydrochloridum**, nature and use, (26) 580.
- Cocaine**—  
determination in beverages, (27) 499.  
effect on coagulation of blood, (37) 177.  
effect on germination of wheat, (27) 220.  
separation and identification, (27) 208.
- Coccaceae**—  
bibliography and classification, (34) 477.  
in American Museum of Natural History, (29) 676.  
nomenclature and classification, (39) 124.
- Coccid enemies of grapes in Hungary**, (38) 464.
- Coccidae**—*see also* Scale insects.  
catalogue, (28) 754.  
fungus parasites of, (28) 60.  
injurious to citrus fruits, remedies, (31) 550.  
insect parasites, (40) 651.  
leaf feeding, on pines, (36) 459.  
monograph, (35) 256.  
morphology and physiology, (36) 655.  
new, catalogue, (33) 748.  
new chalcidoid parasites, (37) 467.  
notes, (26) 149; (28) 754.  
of Argentina, (26) 247.  
Barbados, (36) 252.  
California, (29) 158.  
Cuba, (40) 355.  
Florida, (38) 562.  
Great Britain, (34) 552.  
greenhouses, (39) 762.  
Indiana, (35) 461.  
Japan, (31) 157.  
Kansas, (39) 255.  
Louisiana, (26) 859.  
New Jersey greenhouses, (35) 256.  
New York, (34) 752.  
Peru, (33) 254.  
Philippines, (34) 552; (38) 404.  
Porto Rico, (37) 158.  
Samoa, (35) 358.  
Uganda, (39) 560.  
West Africa, (34) 851.  
parasites of, (29) 253.  
preparation for microscopical study, (32) 57.  
remedies, (27) 357.  
treatise, (28) 556.
- Coccidencyrthus ensifer**, notes, (35) 263.
- Coccidia**—  
chromosome cycle, (34) 458.  
in sparrows, relation to blackhead in turkeys, (37) 384.  
notes, (27) 181.  
of intestines of birds, (37) 280.
- Coccidian dysentery of cattle**, (40) 290.
- Coccidiascus legeri** n.g. and n.sp., notes, (29) 759.
- Coccidioides immitis**, studies, (40) 83.
- Coccidiosis**—  
avian, studies, (26) 187.  
in calves, (26) 483; (38) 183; (40) 185.  
in cattle, (30) 679.  
in cattle—  
and carabaos, (33) 482; (35) 76, 282.  
intestinal, (39) 686.  
studies, (26) 678.  
treatment, (29) 676.  
in chicks, (37) 182.  
dogs, (37) 280; (39) 392.  
goats, (30) 680; (35) 488.  
poultry and game birds, (26) 483, 588; (32) 784.  
poultry in South Africa, (38) 83.  
poultry, treatment, (29) 889.  
rabbits, (32) 180.  
sheep, (35) 488.
- Coccidium**—  
avium, notes, (27) 760.  
bovis, studies, (26) 483.
- Coccidoctonus trinidadensis** n.g. and n.sp., description, (30) 59.
- Coccidoxenus portoricensis** n.sp., description, (30) 661.
- Coccids**—  
in Seychelles, (30) 252.  
introduced, in South Africa, (39) 560.  
on coffee in India, (40) 651.
- Coccinella**—  
9-notata, negative geotropism of, (30) 357.  
9-notata, notes, (27) 561.  
septempunctata, parasite of, (39) 868.  
spp., destructive to citrus plant lice, (26) 755.  
spp., life history, (33) 562.  
spp., notes, (27) 656.  
spp., studies, (29) 355; (39) 663.
- Coccinellidae**—  
aphid feeding, studies, (34) 555.  
biology, (30) 754.  
of California, life history and feeding records (37) 58.  
of Oregon, (30) 357.  
of Philippines, (29) 657.
- Coccinellids**—  
beneficial in Piedmont, Italy, (28) 757.  
larvae in U. S. National Museum, (36) 658.  
parasitic on black scale, (26) 556.  
statistics, (33) 256.
- Coccobacillus**—  
acridiorum—  
destruction, (31) 752.  
destruction of locusts by, (31) 752, 753; (33) 154; (34) 854; (36) 356, 755; (37) 461, 561, 760, 849; (39) 656, 863; (40) 164.  
in Algeria, (33) 653.  
inoculation experiments with, (35) 853.  
n.sp., destructive to locusts, (27) 357.  
notes, (29) 354; (30) 546; (35) 255.  
relation to septicaemia in cockchafer, (30) 54.  
cajane, notes, (29) 855.  
cajane, pathogenicity, (30) 54.  
erausquini n.sp., description, (29) 757.  
infections of insects, (30) 53, 54, 551.  
liquefaciens n.sp., description, (26) 581.  
mycoides peripneumoniae, notes, (27) 184.
- Coccyoecus**—  
from Prunus, inoculation tests, (39) 456.  
hiemalis n.sp., description, (29) 349.  
hiemalis, studies, (36) 149; (37) 755.  
kerriae n.sp., description and studies, (39) 253.  
pini, notes, (29) 851.  
spp., investigations, (33) 347.
- Coccyophagus**—  
acanthosceles n.sp., description, (37) 162.  
aleurodici n.sp., description, (36) 555.  
javis n.sp., description, (37) 59.  
lecanii, notes, (26) 152.  
lumulatus, parasitic on orange scale, (26) 554.  
n.sp., notes, (27) 556.  
n.spp., descriptions, (34) 557.  
spp., notes, (29) 654.
- Coccyotrypes dactyliperda**, notes, (33) 750.
- Coccus**—  
ciridis, notes, (31) 58.  
citricola—  
and C. hesperidum, comparison, (37) 563.  
fumigation, (39) 463.  
n.sp., description, (32) 57.  
notes, (34) 255.  
remedies, (36) 357; (40) 454.  
studies, (33) 558.  
hesperidum, *see* Scale, soft.  
lacca industry in India, (40) 550.  
mangiferae, fungus parasite of, (27) 358.  
spp. destroying prickly pear, (39) 559.  
viridis, notes, (38) 364.  
viridis, remedies, (26) 534.
- Cochineal**—  
insect, cottony, notes, (28) 451.  
insects, as pests, (39) 559.
- Cochliomyia (Chrysomyia) macellaria**, notes, (34) 756.
- Cochylis**—  
ambiguella—  
biology and control, (33) 555; (34) 654.  
control, (34) 63; (35) 253; (38) 257; (39) 765.  
life history and control, (29) 655.  
monograph, (34) 553.  
notes, (26) 655; (28) 559; (35) 54, 257.  
parasites of, (35) 659.  
polyphagous habits, (32) 554.  
school chart of, (31) 395.
- moth**—  
biology and control (27) 758.  
control, (26) 758; (30) 550.  
control in Switzerland, (38) 159.  
destruction by heat, (27) 856; (28) 752; (34) 653.

- Cochylis**—Continued.  
moth—continued.  
notes, (26) 56, 57; (28) 160; (34) 851; (36) 460.  
studies, (36) 355.
- Cockchafer**—  
bacillary septicemia of, (30) 53, 54.  
bacterial diseases of, (38) 273.  
biology, (27) 661.  
control, (37) 467.  
destruction, (27) 661, 662.  
small green, life history, (28) 757.
- Cockerels**—  
as affected by time of hatching, (39) 780.  
fattening test, (37) 268.  
feeding experiments, (36) 70.  
feeding for market, (35) 273.  
feminization, (34) 870; (38) 275.  
raising for broilers, (39) 577.
- Cockle, eradication**, (27) 733.
- Cocklebur, water requirement**, (32) 127.
- Cockroaches**—  
American, as carriers of cholera vibrios, (31) 752.  
as blister rust carriers, (39) 248.  
as pest of greenhouses, (39) 761.  
Australian, as cotton pest, (32) 348.  
bacteriology of, (26) 347.  
control, (33) 59; (35) 899; (36) 457; (39) 762; (40) 353.  
destruction, (38) 558.  
notes, (37) 156.  
of North America, (38) 258.  
of Nova Scotia, (40) 856.  
oriental, remedies, (28) 157.  
parasite of, (40) 854.  
physiology of digestion, (38) 558.  
relation to cancer in rats, (32) 353.  
rôle in milk infection, (26) 674.  
trap for, (29) 653.
- Cockshin grass, analyses**, (30) 565.
- Coco cake and meal, analyses**, (33) 870.
- Cocoa**—  
alkali treatment, (39) 314, 415.  
alkalinity, (37) 414.  
alkaloids in, (31) 358.  
analyses, (26) 506; (28) 461; (32) 298; (35) 558.  
and chocolate, treatise, (26) 662, 710.

   of America, (31) 298.  
 Collembola—  
   destructive to cattle ticks, (28) 758.  
   notes, (27) 656.  
 Colletotrichum—  
   agaves—  
   description and treatment, (29) 346.  
   notes, (30) 845; (31) 641; (34) 442.  
   studies, (33) 851.  
   and Gloeosporium on chili, identity, (34) 50.  
   anthurii, notes, (37) 550.  
   atramentarium, notes, (36) 544.  
   cajni, notes, (34) 52.  
   camelliae—  
   notes, (37) 252; (38) 354, 355, 548.  
   studies, (33) 650.  
   treatment, (39) 752.  
   cereale, notes, (38) 147.  
   cinnamoni n.sp., description, (37) 748.  
   circinans, studies, (37) 841.  
   cliviae, notes, (37) 353.  
   coffea (?), notes, (37) 838.  
   cradwickii—  
   fungus resembling, (31) 645.  
   notes, (34) 349.  
   falcatum, notes, (26) 445; (29) 348, 647; (30) 541, 650; (31) 746; (32) 442; (33) 444; (34) 49, 841; (36) 541; (37) 452, 551, 553; (40) 47, 157.

## Colletotrichum—Continued.

- falcatum, studies, (26) 548; (27) 48; (38) 851.  
 gloeosporioides—  
   effect on citrus fruits, (34) 354.  
   notes, (28) 749; (29) 243; (31) 152; (34) 241,  
   446, 644, 750; (35) 153; (36) 851; (37) 453;  
   (40) 47.  
   relation to citrus gummosis, (29) 247.  
   studies, (30) 451.  
   treatment, (33) 149; (37) 352; (38) 455.  
   variations, (38) 252.  
 gossypii—  
   notes, (29) 548; (33) 741; (37) 452.  
   resistance of cotton to, (35) 348.  
 graminiocolum n.n., studies, (31) 746.  
 heveae, notes, (37) 253.  
 higginscanum n.sp., description, (37) 754.  
 incarnatum, notes, (34) 540; (35) 45.  
 infection of wheat by, (26) 747.  
 lagenarium—  
   notes, (32) 641.  
   studies, (35) 652, 750; (36) 248; (40) 250.  
 lindemuthianum—  
   as affected by temperature, (32) 749; (34) 538.  
   notes, (26) 747; (29) 150; (31) 542; (34) 645;  
   (37) 550; (39) 249.  
   resistance of beans to, (35) 348.  
   resistance to, (40) 645.  
   studies, (39) 455, 745.  
   treatment, (32) 843; (37) 248.  
 luxificum, notes, (26) 851; (29) 155.  
 lycopersici on tomatoes, (34) 53.  
 n.sp. on clover, (33) 346.  
 n.sp. on milk weed, (33) 350.  
 n.sp. on potatoes, (33) 346.  
 n.sp. on Schinus molle, (34) 242.  
 n.spp., descriptions, (32) 842.  
 necator, description, (26) 448; (27) 445.  
 nigrum, notes, (34) 442; (38) 547.  
 nigrum on pepper, (31) 542.  
 oligochaetum, notes, (26) 244.  
   on sugar cane, (40) 844.  
 schizanthi n.sp., description, (26) 56.  
 solanicolum on eggplant, (38) 250.  
 sp. on coffee, (36) 846.  
 sp. on Licuala grandis, (36) 348.  
 sp. on snapdragon, (34) 841.  
 spp. as affected by temperature, (34) 542.  
 spp., notes, (26) 549, 649; (27) 250; (28) 444.  
 spp. on coffee, (38) 51.  
 spinaciae, studies, (32) 147.  
 theobromicolum, notes, (29) 548.  
 trifolii—  
   description and treatment, (39) 754.  
   notes, (28) 52.  
   perfect stage, (28) 746.  
   resistance to, (39) 454.  
 Collodion—  
   dialyzing membranes, preparation, (38) 710.  
   germicide effect, (38) 752.  
   membranes for ultrafiltration and pressure dialysis, (35) 612.  
 Colloid chemistry—  
   application to agriculture, (29) 408.  
   handbook, (40) 408.  
   in soils, geology, and mineralogy, (30) 513.  
   of Fehling's sugar test, (39) 14.  
   review of literature, (26) 307.  
 Colloidal—  
   gels, water absorption and evaporation, (40) 27.  
   hypothesis of permeability, (40) 818.  
   metals, therapeutic value, (38) 585.  
   mixtures—  
     for studying protoplasmic action, (37) 325, 821.  
     imbibition in, (40) 29.  
     showing water relations of plants, construction, (40) 28.  
     swelling, (35) 822; (39) 731.  
     swelling, effect of bog and swamp waters on, (40) 520.  
   phenomena in pollen-tube protoplasm, (40) 28, 818.  
   properties of plant mucilage, (40) 818.  
   solutions, monograph, (37) 501.  
   solutions, treatise, (36) 108.  
   substances in soil solution, (28) 516.

## Colloids—see also Biocolloids.

- as protective substances for bacteria, (31) 24.  
 chemistry of, (38) 309, 501, 708.  
 determination in clay and soils, (30) 807.  
 effect on electrical conductivity of salts, (37) 520.  
 effect on nitrogen fixation, (30) 431.  
 handbook, (34) 801.  
 in immunity, (32) 78.  
 in soils, (26) 819; (30) 718; (32) 311, 318, 813; (33) 118, 215, 513; (35) 512.  
 in soils—  
   adsorptive power, (32) 318.  
   as affected by soluble salts, (35) 622.  
   importance, (29) 817; (34) 816.  
   properties, (31) 514.  
   studies, (35) 819, 813.  
   treatise, (34) 515.  
 in water and sewage purification, (31) 616.  
 metallic, bactericidal properties, (32) 272.  
 movement through cell membranes, (28) 37.  
 movement through plasma membrane, (30) 28.  
 of clay, notes, (34) 816.  
 of humus, (33) 609.  
 physics and chemistry, (29) 608; (35) 501.  
 plant, studies, (30) 111.  
 precipitation by aluminum hydroxide, (30) 504.  
 relation to soil fertility, (28) 814.  
 significance in physiology, (38) 820.  
 soluble, determination in soils, (31) 801.  
 studies, (29) 201.  
 treatise, (27) 881; (32) 308; (33) 801.  
 Collops—  
   bipunctatus, notes, (27) 561.  
   vittatus, predacious on alfalfa caterpillar, (32) 58.  
 Collybia—  
   albuminosa, growth on Odontotermes, (38) 849.  
   velutipes, use as food and identification, (39) 571.  
 Collyria calcitrator, development, (34) 363.  
 Collyricium sp. in sparrows, (39) 760.  
 Colobogaster quadridentata, notes, (30) 454.  
 Colocasia—  
   blight, notes, (31) 52, 641.  
   spp., analyses and culture, (31) 41.  
   storage roots, (35) 750.  
 Colocasiaceae, varieties, (35) 134.  
 Colon-aerogenes organisms, culture medium for enumeration, (40) 381.  
 Colon—  
   bacilli—  
   from horse, cow, and man, (36) 379.  
   human and equine, (35) 681.  
   survival after pasteurization, (32) 775.  
   typhoid intermediates in bird diseases, (40) 685.  
 Colonial science school in Germany, (27) 395.  
 Colonization—  
   Association of Republic of China, (28) 498.  
   in the Punjab, (40) 595.  
 Colopha ulmicola, notes, (27) 658.  
 Colophony, methods of analysis, (27) 210.  
 Color—see also Pigmentation.  
 aleurone, inheritance in maize, (40) 436.  
 analysis, reagents used in, (36) 714.  
 characters, Mendelian, biochemistry, (30) 129.  
 constituents in higher plants and algae, (35) 333.  
 development in mammals and birds, (32) 766.  
 effect on radiation from soils, (29) 619.  
 in animals, chemistry of, (33) 667.  
 in plants, studies, (33) 224.  
 in relation to chemical constitution, (40) 505.  
 inheritance, (40) 665.  
 inheritance in—  
   animals, (38) 269, 574, 776.  
   barley, (40) 825, 826.  
   beans, (40) 536.

 natural root grafting, (36) 144.  
 of central Europe, handbook, (30) 742.  
 Japan, (36) 539.  
 North America, leaf characters, (37) 147.  
 Rocky Mountains, (39) 546.  
 the British Isles, treatise, (28) 843.  
 ornamental, culture, (33) 143.  
 plantations in Massachusetts, (33) 645.  
 red heart rot, studies, (35) 155; (40) 160.  
 reproduction by layering, (28) 344.  
 reproduction in New England, (35) 747.  
 spraying experiments, (29) 252.  
 stem lesions due to heat, (40) 53.  
 structure of bordered pits, (35) 223; (37) 128.  
 structure of tracheids, (29) 217.  
 taking impressions of year rings, (26) 842.  
 transplanting tools for, (26) 842.  
 variation in size of ray pits, (33) 645.  
 western, destructive distillation, (34) 509.  
 wood, identification, (33) 143.  
 wood structure, (28) 440.
- Coniodyctium chevaleri, studies, (27) 51.
- Coniophora cerebella—  
 biology, (27) 355.  
 infection of wood by, (33) 651.  
 notes, (26) 551; (29) 157; (35) 252; (37) 253.  
 on living trees, (35) 459.  
 studies, (30) 850; (34) 547; (39) 553; (40) 350.
- Coniosporium—  
 gečevi as cause of cornob rot, (31) 642.  
 gečevi n.sp., description, (26) 446.  
 oryzinum n.sp., notes, (37) 148.  
 spp. on sugar cane, (38) 550.
- Coniothecium—  
 chomatosporem—  
 notes, (32) 344, 644; (34) 543.  
 studies, (37) 842; (39) 149.  
 sp., notes, (31) 746.
- Coniothyrium—  
 caryogenum—  
 n.sp., description, (30) 453.  
 transmission, (39) 763.  
 coffeae, notes, (38) 51.  
 diploidiella, notes, (30) 247.  
 fückelii—  
 dissemination by tree crickets, (35) 548.  
 notes, (27) 250; (32) 544; (34) 55; (38) 546.  
 relation to apple canker, (34) 653.  
 hellebori, notes, (26) 844.  
 kraunhia, n.sp., description, (27) 848.  
 melasporium on sugar cane, (40) 157.  
 n.spp., descriptions, (34) 242; (37) 748.  
 oleae n.sp., description, (35) 353.  
 oleae, notes, (26) 849.  
 opuntiae n.sp., description, (30) 746.  
 paoniae n.sp., description, (37) 550.  
 pirinum, inoculation experiments, (27) 651; (31)  
 150.  
 pirinum, studies, (29) 648; (35) 152, 547.  
 sacchari, notes, (37) 553.  
 tirolense, variation in, (38) 731.  
 trabuti n.sp., description, (27) 752.
- Conium maculatum, notes, (30) 145.
- Conjunctival reaction, diagnostic value, (26) 379.
- Conjunctivitis—  
 in man, (33) 450.  
 pseudomembranous, in horses, treatment, (30)  
 385.
- Connecticut—  
 College, notes, (27) 98, 397, 799; (28) 396, 696;  
 (29) 96, 195, 697; (30) 796; (31) 397; (32) 599; (33)  
 300, 699; (34) 96; (35) 95, 697; (37) 97, 496, 896.
- State Station—  
 financial statement, (27) 798; (29) 599.  
 food and drug reports, index, (34) 458.  
 notes, (27) 696; (28) 696; (31) 397, 900; (32)  
 94; (36) 499, 899; (37) 196, 700, 896; (38) 699;  
 (39) 399; (40) 398, 695.  
 report, (29) 599; (31) 396; (34) 95; (36) 97; (38)  
 297; (39) 799.  
 report of board of control, (27) 798.  
 work of, (32) 496.
- Stations, notes, (27) 900; (29) 195; (30) 900; (35)  
 300, 697.
- Storrs Station—  
 financial statement, (27) 492.  
 notes, (27) 98, 696; (28) 396; (29) 697; (31)  
 300; (37) 496, 896; (39) 399; (40) 495, 695.

- Connecticut—Continued.  
 Storrs Station—Continued.  
 report, (32) 291; (31) 497.  
 report of director, (27) 492.
- Conognatha magnifica, notes, (30) 657.
- Conophthorus spp. injurious to pines, (33) 458.
- Conopidae, notes, (36) 255.
- Conorhinus—  
 megistus, biology, (26) 755.  
 rubrofasciatus—  
 host of kala-azar parasite, (28) 655.  
 relation to kala-azar, (37) 358.  
 trypanosome from, (27) 555.  
 spp., transmission of trypanosomes by, (30) 853.
- Conorhynchus luigionii, notes and remedies, (29) 562.
- Conostegia subhirsuta, nematodes affecting, (28) 658.
- Conostigmus rodhaini n.sp., description, (29) 563.
- Conotelus mexicanus—  
 notes, (37) 847.  
 on cucumber, (40) 853.
- Conotrachelus—  
 crataegi, see Quince curculio.  
 erinaceus, destruction by white fungus, (26) 454.  
 fissunguis, studies, (40) 754.  
 juglandis, life history and habits, (28) 553.  
 juglandis, notes, (28) 561; (38) 762; (40) 259.  
 nenuphar, see Plum curculio.  
 spp., fumigation experiments, (32) 650.  
 spp., notes, (30) 357.
- Conringia orientalis, analyses, (33) 466.
- Conservation—  
 Commission of California, report, (30) 599.  
 law in New York, (37) 244.
- Conserves for the army, (34) 365.
- Consomme, examination, (31) 659.
- Contarinia—  
 nasturtii, notes, (28) 355.  
 pyrivora, notes, (27) 755; (28) 752; (30) 655, 657; (34) 752.  
 sorghicola, see Sorghum midge.  
 tritici, see Wheat midge.  
 viticola, notes, (30) 756.
- Contheylea rotunda, life history and habits, (38) 359.
- Contingency, multiple and partial, theories, (36) 166.
- Controdora sp., notes, (27) 556.
- Convection—  
 diurnal system, (32) 24.  
 planetary system, (35) 419.
- Conventzia hageni—  
 notes, (28) 457.  
 parasitic on red spider, (32) 157.
- Convict—  
 labor for road work, (36) 386.  
 road camp, experimental, (38) 789.
- Convolvulus—  
 arvensis—  
 analyses and feeding value, (33) 70.  
 extermination, (26) 236.  
 inheritance in, (40) 541.
- Cooker, thermal storage, description, (33) 461.
- Cookers, fireless—  
 construction and use, (36) 467.  
 homemade, (31) 299.  
 notes, (38) 867; (40) 361.  
 tests, (26) 762.
- Cookery—  
 for campers, (27) 463; (30) 763; (34) 46; (38) 469.  
 French, treatise, (32) 662.  
 history of, (36) 497.  
 in high schools, (35) 897.  
 in schools, report on, (31) 261.  
 instruction, cards for, (32) 495.  
 oriental, book, (31) 259.
- Cooking—  
 appliances, electric, (40) 559.  
 army, manual, (37) 166; (38) 567.  
 boilers for poultry farms, (32) 591.  
 book, (26) 261; (27) 461, 868; (28) 259, 566, 863; (29) 61, 362, 464, 661, 766; (30) 259, 365, 462, 559, 560, 763, 862, (31) 259, 260, 557, 857; (32) 255, 394, 495, 558, 662, 763; (33) 165, 662, 753; (34) 794; (37) 894.  
 book, Jewish, (39) 472.  
 books, bibliography, (29) 567.
- Cooking—Continued.  
 by electricity, (27) 463; (30) 166, 862; (31) 558, 856; (32) 65; (33) 67, 68, 461, 565; (36) 763.  
 by electricity, economics of, (35) 267.  
 by electricity in cafeteria, (34) 861.  
 Chinese and Japanese, recipes, (32) 763.  
 Chinese, recipes, (40) 560, 865.  
 cooperative or public, (39) 769.  
 cost of fuels, (40) 658.  
 Creole, manual, (32) 358.  
 destruction of vitamins by, (31) 660.  
 during early history of Rome, (33) 462.  
 effect on—  
 digestibility of foods, (28) 66; (32) 760.  
 milk, (29) 160.  
 water content of foods, (26) 462.  
 encyclopaedia, (26) 66.  
 fireless, notes, (32) 495.  
 for the sick and convalescent, (29) 898.  
 gas and electric, tests, (27) 65.  
 instruction in—  
 continuation schools, (33) 792.  
 graded schools of Wisconsin, (33) 195.  
 London, (38) 394.  
 Porto Rico, (33) 397.  
 rural schools, (30) 462.  
 vocational schools, (33) 397.  
 Italian, notes, (38) 662.  
 laboratory guide and notebook, (33) 697.  
 laboratory manual, (37) 94.  
 lessons in, (28) 493, 693, 795; (35) 898; (36) 497.  
 low-temperature, (40) 865.  
 New Mexican, booklet, (38) 568.  
 oven temperatures in, (31) 359.  
 paper bag, book, (28) 863.  
 temperatures for, (38) 366.  
 textbook, (32) 394; (33) 598; (34) 395; (40) 693, 899.  
 training of boys in, (30) 598, 763.  
 utensils—  
 aluminum alloys for, (34) 257.  
 enameled, danger from, (31) 260.  
 field, notes, (32) 562.  
 nickel, solubility, (32) 561, 763.  
 nickel, usefulness, (33) 68.  
 tinning, (27) 767.
- Cooks—  
 supervision of health of, (30) 863.  
 training school for, (26) 262.
- Coontail, culture for wild ducks, (33) 251.
- Cooperage—  
 industry in Canada, (26) 445.  
 stock industry in United States, (30) 845.  
 treatise, (29) 644.
- Cooperation—See also Agricultural cooperation.  
 and coordination in scientific effort, (39) 601.  
 in various countries, (27) 269.
- Cooperative—  
 associations, accounting system for, (33) 191, 192.  
 farm implement societies, (39) 594.  
 movements, success of, (31) 294.  
 organizations, (38) 895.  
 organizations, suggestions for, (32) 792.  
 societies, by-laws for, (31) 294.  
 storage and marketing in France, (40) 688.  
 Wholesale Society Limited, history, (31) 193.
- Cooperia oncophora in calves, (29) 384.
- Cooperia-Zephyranthes hybrids, description, (29) 341.
- Cooper's dip, dosage for sheep, (27) 683; (28) 82.
- Cossa River, average stream flow, (27) 316.
- Coot—  
 European, as a game bird, (31) 555.  
 North American, distribution and migration, (32) 55.
- Coover, Adah B., biographical sketch, (39) 799.
- Copestylum marginatum, notes, (28) 451.
- Copidosoma—  
 sp. polyembryony, (40) 653.  
 truncatellus, parasitism, (31) 458.
- Copper—  
 acetate and carbonate, fungicidal coefficient, (40) 253.  
 and phosphate mixtures as sugar reagents, (38) 614.  
 antagonism to alkali salts, (39) 619.  
 arsenate, effect on sugar cane roots, (38) 238.  
 arsenite, analyses, (26) 65.  
 carbonate—  
 fungicidal value, (34) 745.  
 insecticidal and larvicidal value, (34) 359.

- Copper—Continued.  
 chlorid, effect on—  
   activity of malt diastase, (29) 528.  
   starch ferments, (27) 109.  
 compounds—  
   effect on irrigated crops, (38) 28.  
   of organic acids, toxicity for protozoa, (37) 375.  
   protein of, (37) 8.  
   toxicity toward plants, (33) 327.  
 detection, (34) 112.  
 detection in water, (34) 410.  
 determination, (33) 612; (34) 611.  
 determination in—  
   canned goods, (26) 408.  
   conserves, (26) 208; (32) 114.  
   copper sulphate, (33) 313; (35) 314.  
   foods, (31) 502.  
   gelatin, (40) 712.  
   sprays, (32) 114.  
 effect on—  
   *Aspergillus niger*, (30) 630, 824.  
   nitrogen-fixing bacteria, (38) 428.  
   nutrition and health, (30) 762.  
   plant growth, (36) 520.  
 ferrocyanid—  
   fungicidal value, (35) 40; (39) 348.  
   tests, (28) 48.  
 fungicidal value, (35) 352.  
 fungicides—  
   absorption by potatoes, (28) 648.  
   physiological effects, (28) 247.  
   preparation and use, (27) 254; (28) 247.  
   studies, (26) 853.  
 in cocoa and chocolate, (28) 862.  
 flora of copper-tailing region, (37) 432.  
 fresh tomatoes, (37) 263.  
 green oysters, (36) 861.  
 orchard soils, (31) 720.  
 soils, (31) 720.  
 soils and water, effect on crops, (37) 527.  
 methods of analysis, (34) 13.  
 mixtures, methods of analysis, (26) 205.  
 new precipitants for, (31) 109.  
 oxid, effect on germination of seeds, (29) 528.  
 oxychlorid, fungicidal value, (26) 853.  
 reaction, sensitive, (40) 807.  
 reduced, determination, (40) 114.  
 salts—  
   as food preservative, (30) 364.  
   bactericidal and fungicidal action, (35) 181.  
   detection in wood, (26) 242.  
 salts, effect on—  
   ammonification in soils, (31) 120.  
   catalase, (26) 504.  
   nitrification in soils, (29) 529; (30) 424; (31) 120.  
   nutrition and health, (29) 762.  
   wheat, (31) 218; (35) 324.  
 salts—  
   of amino acids, pharmacology and toxicology, (39) 685.  
   use against tuberculosis, (29) 481.  
   use in greening foods, (27) 868; (28) 662.  
 silicifluorid as a wood preservative, (30) 646.  
 solution—  
   action on sucrose, (35) 504.  
   by fungi, (26) 853.  
   for sugar determination, (40) 613.  
 sprays—  
   acid and basic, (39) 151, 548; (40) 158.  
   fungicidal value, (34) 243, 643.  
   hot, insecticidal action, (34) 243.  
   preparation, (40) 843.  
   wetting power, increasing, (29) 850.  
 stearate, fungicidal value, (40) 746.  
 sulphate—  
   analyses, (26) 26.  
   and chloral hydrate, antagonistic action on peas, (30) 728; (32) 35.  
   antiseptic and germicidal value, (37) 176.  
   as pole preservative, (27) 148.  
   potato disinfectant, (40) 450.  
   soil disinfectant, (31) 621.  
   vermifuge, (38) 884.  
   destruction of algae by, (38) 731.  
   destruction of horsetail by, (31) 741.  
 sulphate, effect on—  
   algae in drinking water, (36) 183.  
   ammonification, (28) 724.  
   apple roots, (39) 40.
- Copper—Continued.  
 sulphate, effect on—continued.  
   cereals, (29) 151.  
   germination of cereals, (29) 346.  
   germination of wheat, (28) 242; (30) 242, 837; (32) 749.  
   growth of barley, (32) 121.  
   microorganisms, (39) 27.  
   nitrification in soils, (35) 321.  
   olives, (26) 825.  
   plants, (27) 130, 131; (30) 130.  
   sprouting of potatoes, (32) 829.  
 sulphate—  
   for rice, (39) 235.  
   fungicidal action, (28) 552.  
   hydrolysis and oxidation in soil, (39) 522.  
   preparation, (40) 801.  
 sulphate, production—  
   and use in 1913, (32) 425.  
   and use in 1913-1915, (35) 631.  
   in 1915-1916, (37) 524.  
 sulphate—  
   sprays, preparation, (39) 851.  
   use against olive fumagine, (26) 850.  
   use in soil disinfection, (33) 250.  
   use on moor soils, (39) 439.  
   valuation, (33) 313.  
   toxic effect on plants, (38) 628.  
   tube, crushing by lightning, (34) 118.  
   use against cryptogamic diseases, (30) 648.  
   use against tuberculosis, (33) 677.  
   use on cranberries, (39) 749.  
   utilization by *Aspergillus niger*, (29) 628.  
 Copperized oil as a wood preservative, (32) 841.  
 Copra—  
   cake—see also Coconut cake.  
   meal, analyses, (36) 167; (40) 665.  
   nutritive value, (28) 673.  
   composition and nutritive value, (34) 565.  
   cost of production, (29) 439.  
   drying, (26) 513.  
   examination, (26) 611.  
   Indian trade in, (40) 231.  
   meal as a feeding stuff, (38) 368.  
   preparation, (29) 840; (32) 236, 315.  
   studies, (39) 107, 108.  
 Coprinus—  
   comatus, prevalence in South Africa, (29) 461.  
   micaceus, transmission by tree crickets, (34) 653; (35) 548.  
   sterquilinus, spore generation and release, (35) 431.  
 Coprophagia and *Ascaris lumbricoides*, (39) 681.  
 Coprosterol, determination in feces, (40) 15.  
 Coptodisca splendiferella, notes, (30) 657.  
 Coptorhynchus sp., notes, (27) 857.  
 Coptotermes—  
   formosanus n.sp., description, (35) 255.  
   gestroi, notes, (31) 156.  
 Coquillettina plankii n.g. and n.sp., description, (34) 360.  
 Coquina, use in agriculture, (40) 816.  
 Coraebus spp., notes, (27) 863.  
 Coral—  
   as sewage filtering material, (28) 789.  
   rock phosphate, fertilizing value, (35) 428.  
   sand, examination, (36) 319.  
 Corbin, tests, (33) 58.  
 Corchorus—  
   capsularis, fertilizer experiments, (33) 432.  
   olitorius, culture in Egypt, (34) 232.  
 Cordials, judging, (26) 209.  
 Cordyceps—  
   barberi, description, (33) 459.  
   barberi, notes, (29) 52.  
   clabicipitis n.sp., description, (36) 48.  
   n.sp., notes, (36) 153.  
   sp., notes, (28) 746.  
   sp. on flies, (36) 360.  
   spp., descriptions, (33) 459.  
 Cordylobia—  
   anthropophaga, life history and habits, (27) 759.  
   anthropophaga, notes, (31) 551.  
   (Stasia) rodhaini, notes, (36) 359.  
 Coregonus—  
   sp., analyses and curing, (31) 356.  
   spp., breeding in Switzerland, (35) 774.  
 Coremium sp., notes, (30) 751; (40) 252.  
 Coreopsis, cut, preservation, (31) 837.  
 Coriander, culture under dry farming, (30) 435.  
 Coriaria myrtifolia as marjoram adulterant, (39) 669.

- Corigetus bidentulus* n.sp., description, (35) 365.
- Coriscus ferus*—  
destruction by white fungus, (26) 454.  
notes, (32) 654.
- Corn**—  
composition, (31) 312.  
formation of fat in, (31) 312.  
ground, conservation of grapes in, (28) 437.  
insects affecting, (26) 60.  
stoppers, insects affecting, (31) 155.
- Corns**, extraction apparatus, treatment, (38) 411.
- Corn**—  
abnormalities due to—  
copper treatment, (39) 526.  
smut infection, (26) 447.  
acidity investigations, (30) 734; (31) 525.  
albinism in, (33) 131.  
alcohol from, (28) 715.  
aleurone color factors, (40) 436.  
among Indians of the upper Missouri, (39) 738.  
amylase, studies, (31) 609.  
analyses, (26) 266, 267, 770; (27) 170, 570, 872; (28) 265, 335; (29) 470, 633; (31) 366, 431, 464, 470, 864; (32) 862; (33) 71, 568, 761; (34) 630, 667; (39) 773.  
and alfalfa for fattening lambs, (26) 73.  
and alfalfa hay for lambs, (31) 867.  
and cob—  
ground, analyses, (34) 767.  
meal, analyses, (26) 468, 568; (27) 774; (28) 464; (29) 666; (31) 863; (32) 667; (34) 665; (36) 167; (38) 665; (39) 270; (40) 665.  
and corn products, use in the diet, (38) 662.  
and cowpeas, associated growth, (33) 226; (37) 731; (38) 32.  
and cowpeas, seeding together, (35) 826.  
and legumes, associated growth, (33) 527.  
and oats, analyses, (40) 665.  
and oats, ground, analyses, (27) 170; (29) 367.  
and peanuts as a mixed crop, (37) 734.  
and pig clubs, combining, (30) 694.  
and rye, analyses, (32) 667.  
and sorghums, transpiration, (39) 440.  
and soy beans—  
as silage crop, (40) 135.  
associated growth, (38) 338.  
for silage, seeding experiments, (40) 135.  
and teosinte, crossing experiments, (26) 40.  
and teosinte hybrids, immunity to aphids, (38) 561.  
and the westward migration, treatise, (37) 94.  
anomalies of, (32) 131.  
anomalous seed, (39) 32.  
anomalous seeds and bud sports in, (36) 134.  
antagonistic effect of salts on, (39) 824.  
antineuritic vitamins in, (38) 581, 869.  
artificial pollination, (26) 535.
- as affected by—  
barium and strontium, (40) 819.  
borax in fertilizer, (40) 322.  
detasseling, (33) 426.  
*Diplodia zeae*, (36) 247.  
disinfectants, (26) 820.  
distance of planting, (30) 436.  
frost, (30) 138.  
guanidin, (28) 427.  
kerosene, (32) 729.  
lead nitrate, (26) 225.  
lithium salts, (28) 526.  
manganese sulphate, (26) 226.  
maturity and harvesting methods, (40) 330.  
radioactivity, (30) 224.  
soil fertility, (39) 339.  
soil temperature, (38) 530.  
submersion, (32) 829.
- as dry-farm crop, (37) 637; (39) 131, 736.  
feeding stuff, (32) 97, 200.  
food, (31) 555, 656; (38) 265.  
forage crop, (31) 829.  
host of curlew bug, (27) 162.  
silage crop, (31) 829; (39) 33, 134, 227, 231, 737; (40) 134, 330, 331, 332, 336, 337, 431, 731, 733, 735.  
sole ration for animals, (33) 367, 662; (39) 71.  
source of nitrogen in rations, (28) 264.  
substitute for rice in Philippines, (32) 64.  
supplement for wheat in bread making, (37) 263.  
ash analyses, (29) 861.
- Corn**—Continued.  
assimilation of—  
nitrogen by, (26) 32; (28) 225; (37) 223.  
organic phosphates by, (29) 423.  
bacterial disease, new, (37) 48.  
barren, composition, (40) 330.  
barren stalks, (37) 536; (38) 849.  
barrenness, studies, (40) 624.  
beetle in Rhodesia, (39) 565.  
beetle, notes, (34) 754.  
behavior of organic substances in, (39) 526.  
belt, climatic and edaphic factors, (39) 734.  
belt, climatic features, (40) 117.  
biennial cropping, (32) 226; (38) 430.  
billbug—  
control, (40) 655.  
life history, (35) 760.  
life history and habits, (29) 56.  
notes, (28) 653.  
southern, (36) 157; (37) 666.  
studies, (26) 862; (27) 162; (37) 666.
- borer—  
European, in Massachusetts, (39) 62.  
European, notes, (31) 252.  
in young plants, (39) 358.  
lined, notes, (33) 252.
- bran—  
analyses, (26) 468, 568, 665; (27) 570, 670; (28) 364, 464; (29) 270, 666; (30) 67, 68, 169, 868; (31) 663, 863; (32) 169, 667, 862; (33) 371; (34) 72, 169, 263, 467, 665, 767; (36) 167, 268, 667, 765; (38) 67, 369, 665; (39) 167, 270, 370; (40) 72, 571, 665.  
ash analyses, (29) 861.  
description, (40) 72.  
digestibility, (31) 863; (39) 171.  
mineral constituents, digestibility, (40) 769.
- brandy, judging, (26) 209.  
bread, recipes, (37) 364.  
breakfast foods, manufacture and use, (28) 861.  
breeding, (29) 633, 737; (40) 523.
- breeding—  
and selection experiments, (35) 32.  
experimental error in, (39) 831, 832.  
experiments, (26) 833; (27) 737, 741; (28) 232; (29) 229; (30) 231, 336; (31) 331, 734; (32) 536, 827; (33) 34, 331; (34) 144; (35) 229, 336, 531, 829; (36) 735, 838; (37) 226, 827; (38) 231, 336; (39) 31, 338, 339, 746; (40) 33, 332, 624, 826.  
experiments, personal equation in, (26) 734.  
for protein and oil, (32) 733.  
plan for, (39) 339.  
statistical study, (38) 232.  
work with northwestern Indian varieties, (39) 738.
- brown rust, studies, (29) 45.  
budworm, notes, (30) 56.  
bushel weights, (37) 889.
- by-products, analyses, (27) 570; (28) 464; (29) 271; (39) 270.  
cake, analyses, (30) 268.  
canned, examination, (26) 68; (28) 357; (32) 161; (38) 166.  
canned, starch in, (35) 765.  
canning, (39) 165.  
canning industry in United States, (32) 210.  
"Cariaco," tests, (33) 536.  
characters in, analysis, (28) 534.  
chlorophyll inheritance, (39) 825.  
chlorosis in, (31) 221.  
chlorosis, studies, (26) 213; (33) 522; (38) 48.
- chop—  
analyses, (26) 467, 568, 665, 768; (27) 469; (28) 464, 572; (29) 270, 467; (30) 565; (31) 366, 863; (32) 568, 667, 862; (33) 870; (34) 169, 263, 467; (36) 765; (38) 369, 572; (39) 370; (40) 571.  
digestibility, (37) 678.  
digestibility and productive value, (37) 865.  
heating, (28) 168.
- club—  
champions in 1913, (30) 399.  
contests, notes, (28) 395.  
work, contests for, (28) 493.
- clubs—  
in Arkansas, (33) 95.  
Kentucky, (32) 197.  
Philippines, (30) 395; (32) 495.  
rural schools, (32) 693.

## Corn—Continued.

- clubs—continued.  
 in Southern States, (32) 492.  
 Virginia, (29) 599.  
 notes, (32) 898.  
 suggestions for, (31) 793, 794.  
 cob and other ear characters, relation, (38) 532.  
 cockle—  
 effect on baking quality of wheat, (34) 558.  
 poisoning horses, (39) 892.  
 seeds, variation in during maturity, (28) 525.  
 commercial grades, (31) 73.  
 competition in, (27) 431.  
 composition, (31) 431.  
 composition and—  
 digestibility, (33) 568.  
 yield, as affected by width of rows, (29) 533.  
 composition as affected by—  
 companion crop, (26) 617.  
 fertilizers, (40) 434.  
 irrigation, (28) 332.  
 composition at different stages, (31) 431; (36) 36.  
 contests for boys and girls, (28) 194.  
 contests in Rhode Island, (28) 299.  
 cooperative experiments, (27) 430.  
 correlation—  
 of aleurone and chlorophyll factors, (37) 526.  
 of characters in, (30) 830; (35) 531.  
 studies, (33) 426.  
 cost of production, (26) 830; (28) 41; (29) 690; (32) 135, 594, 688; (33) 34, 293; (34) 137; (35) 691; (37) 191; (40) 292.  
 cost of production in—  
 Fiji Islands, (27) 234.  
 Great Plains area, (33) 231.  
 South, (39) 294.  
 cover crops for, (40) 133.  
 cracked, analyses, (26) 568, 665; (27) 171; (28) 265, 669; (29) 270, 467; (31) 467; (32) 667, 862; (34) 665; (36) 268, 765; (37) 268; (38) 572.  
 critical period of growth, (35) 617; (39) 811.  
 crossbreeding, (26) 634; (29) 229; (34) 228, 529.  
 crushed, analyses, (26) 568.  
 crushed ear, analyses, (29) 270.  
 cucujus, notes, (26) 453.  
 culture, (26) 834; (27) 337, 339; (28) 299; (29) 193, 229, 335, 395, 830; (30) 37, 435; (31) 432, 693, 791; (32) 132, 226; (33) 36; (34) 337, 529, 630, 694; (35) 33, 598; (36) 95; (37) 396, 642; (39) 834.  
 culture—  
 contest in Iowa, (33) 697.  
 contests in Alabama, (28) 194.  
 continuous, (31) 430; (40) 419.  
 continuous, effect on soils, (35) 813.  
 continuous, v. rotation, (33) 35.  
 effect on height of stalk and ears, (33) 729.  
 experiments, (26) 38, 233, 422, 437, 630, 733, 735, 830; (27) 136, 232, 430, 529, 530, 533, 638; (28) 135, 136, 233, 534, 633; (29) 137, 223, 225, 226, 425, 630, 736, 738, 830; (30) 229, 632, 828; (31) 628, 829; (32) 132, 430, 431, 526, 529, 530; (33) 31, 34, 35, 231, 332, 528, 729, 830; (34) 34, 228, 431, 434, 735; (35) 135, 337, 338, 827, 829; (36) 132, 133, 332, 735, 829; (37) 32, 226, 329, 436, 529, 535, 730, 734; (38) 31, 217, 229, 334, 336, 430, 527, 630, 632, 634, 735, 825, 827, 829, 830; (39) 127, 128, 217, 227, 335, 336, 339, 435, 436, 437, 632, 834, 835; (40) 34, 228, 319, 329.  
 experiments in India, (40) 230, 523.  
 experiments in Queensland, (40) 230.  
 experiments in Rhodesia, (40) 230, 825.  
 for silage, (32) 431.  
 in Argentina, (35) 136.  
 Bessarabia, (29) 335.  
 California, (26) 234.  
 Dutch East Indies, (30) 697.  
 Egypt, (37) 233.  
 Guam, (30) 37.  
 Hawaii, (29) 633.  
 Kansas, (39) 815.  
 Kentucky and West Virginia, (29) 534.  
 Manitoba, (30) 830.  
 Mexico, (32) 131.  
 Michigan, (39) 320.  
 Montana, (32) 134; (35) 735; (38) 135.  
 Nebraska, (30) 831; (35) 438.  
 New Mexico, (40) 18.

## Corn—Continued.

- culture—continued.  
 in New South Wales, (31) 831; (36) 439; (40) 526.  
 North Carolina, (30) 37; (36) 95.  
 Northwest, (37) 437.  
 Nyasaland, (26) 829.  
 Philippines, (26) 361; (28) 634; (40) 228, 231, 627.  
 Rhodesia, (40) 230, 333, 825.  
 sand hills of Nebraska, (35) 827.  
 South Africa, (34) 227.  
 South Dakota, (40) 34.  
 Southeastern States, (35) 639.  
 Texas, (28) 738; (29) 429.  
 the East, (27) 639.  
 Tucuman, (37) 134.  
 Utah, (38) 230.  
 Washington, (35) 339.  
 Wisconsin, (28) 823.  
 lessons on, (28) 598.  
 new method, (31) 629.  
 on muck soils, (33) 33.  
 on Ozark uplands, (38) 217.  
 on Wisconsin drift soil, (36) 623.  
 relation to rainfall, (33) 715.  
 rotations for, (27) 531.  
 treatise, (27) 640; (29) 830; (31) 898; (32) 228, 434, 829; (38) 93.  
 under dry farming, (26) 828; (30) 435; (31) 429; (33) 632; (36) 439, 528, 529; (37) 329; (39) 131.  
 under shade, (27) 741.  
 Williamson plan, (27) 433.  
 with soy beans, (39) 336.  
 with velvet beans, (39) 529.  
 cutworms affecting, (29) 252.  
 Dahomey white, analyses, (28) 359.  
 day annual for schools of Illinois, (31) 298.  
 degerminated, analyses, (29) 367.  
 dent, scoring, (28) 492.  
 depth of sowing tests, (27) 835.  
 destruction by crawfish, (27) 551.  
 deterioration, (29) 7.  
 determination of acidity, (36) 414.  
 determination of soundness, (31) 525.  
 determining proper stand, (40) 299.  
 development, factors affecting, (35) 827.  
 development, studies, (33) 226.  
 diet, excessive, effects of, (31) 859.  
 diet, relation to pellagra, (26) 871.  
 dietary deficiencies, (36) 360.  
 dietary properties, (37) 164, 264, 767.  
 different types, water absorption, (40) 137.  
 digestibility, (28) 335; (32) 866; (37) 672.  
 dipteran pest, (40) 56.  
 direct panification, (40) 460.  
 disease in Porto Rico, (37) 839.  
 diseases—  
 and insect pests, (38) 834.  
 descriptions, (30) 351.  
 in West Indies, (37) 452; (40) 155.  
 notes, (26) 446; (31) 841; (33) 146; (35) 245.  
 studies, (39) 149.  
 distance experiments, (29) 737, 738; (36) 131; (38) 31, 335.  
 distillery residues, effect on composition of milk, (29) 374.  
 distribution of nitrogen in, (36) 269.  
 downy mildew, notes, (31) 51, 242.  
 drills, tests, (27) 387; (30) 292.  
 drought resistance and stomata in, relationship, (30) 628.  
 drought resistance of, (28) 633.  
 drought-resistant strains, (36) 131.  
 dry rot, notes, (34) 242.  
 dry rot, studies, (36) 48.  
 drying, (37) 509.  
 drying and storing, (27) 277.  
 ear and kernel, measurement, (38) 33.  
 ear characters in, (36) 197.  
 ear characters, relation to yield, (37) 136; (39) 635; (40) 435.  
 ear rot, transmission by insects, (36) 55.  
 ear rots, notes, (29) 793.  
 ear, shuck protection, (39) 862.  
 early maturing, developing, (30) 197.  
 ears, monstrosity in, (31) 51.  
 ears, soft, ensiling, (34) 371.  
 ear-to-row test, (30) 830; (35) 338.  
 ear-type selection, (39) 339.

## Corn—Continued.

## earworm—

- control, (32) 551; (34) 63; (37) 760; (40) 352.
- dust sprays for, (36) 56.
- injurious to alfalfa, (29) 252.
- life history and habits, (32) 652.
- notes, (29) 652; (30) 356; (34) 62, 232; (38) 261, 445, 653.

## effect of—

- crossing on yield, (29) 533.
- hybridization on maturity and yield, (39) 31.

## effect on—

- color of egg yolk, (26) 771; (31) 474.
- composition of following wheat crop, (34) 230.

- fetal development, (33) 266.
- following crop, (32) 224; (40) 623.
- milk and butter, (34) 570.
- nitrate content of soils, (29) 818.
- soil bacteria, (37) 421.
- soil fertility, (27) 136.
- soil moisture, (28) 321.

## Egyptian, notes, (29) 141.

- elements necessary to development of, (33) 522.
- embryo, morphology, (37) 127.
- endosperm color and albinism, (38) 28.
- evaporation of water by, (29) 525.
- evolution of, (40) 728.
- exhibits, preparation, (26) 392; (31) 495.
- experiments, contradictory results, (40) 300.
- exposition, Columbia, S. C., meeting, (28) 399.
- extracts, toxicity, (29) 175.
- fairs and exhibitions in United States, (28) 796.

## feed meal—

- analyses, (31) 863; (32) 667; (34) 72; (36) 268, 765; (37) 471; (38) 369; (39) 270, 370; (40) 571, 665.

## description, (40) 72.

## feeding value, (40) 668.

## feeding value, (34) 867.

## feeding value as affected by soaking, (26) 667.

## fertilizer—

- experiments, (26) 32, 422, 630, 631, 735, 817, 829, 830, 834; (27) 32, 137, 324, 629, 638, 639; (28) 34, 124, 230, 325, 338, 493, 721, 724, 734, 735; (29) 31, 32, 129, 137, 728, 731, 736, 737, 829; (30) 34, 232, 325, 326, 327, 426, 436, 525, 820, 821; (31) 38, 122, 331, 421, 428, 430, 432, 628, 829; (32) 132, 217, 226, 321, 423, 431, 434, 629, 630, 732, 733, 819, 829; (33) 32, 34, 35, 36, 828, 830; (34) 35, 128, 131, 294, 421, 431, 434, 529, 621, 622, 723; (35) 220, 336, 338, 531, 724, 728; (36) 212, 229, 425, 623, 626, 735, 832; (37) 28, 229, 436, 440, 627, 731; (38) 217, 218, 230, 335, 517, 619, 634, 820, 825, 828; (39) 21, 22, 127, 217, 327, 335, 339, 421, 434, 436, 528, 531, 623, 624, 726; (40) 125, 218, 230, 319, 323, 332, 422, 431, 434, 515, 523, 524, 624, 723, 728, 733, 825.

## experiments with bat guanos, (39) 426.

## formulas for, (31) 628.

## fertilizing in the hill, (35) 499.

## field tests in Fiji, (40) 231.

## flakes, analyses, (28) 464; (32) 169.

## flea-beetle—

- desert, (36) 658.
- notes, (26) 856; (33) 746; (34) 232; (36) 753.

## flint—

- culture in Montana, (33) 526.
- seeding depths, (40) 227.

## flour—

- analyses, (27) 570, 670.
- digestibility, (40) 360, 657.
- nutritive value, (35) 368.

## recipes, (40) 67.

## flower, effect on yield of rye and barley, (30) 531.

## flowers—

- abnormalities in, (29) 33, 629.
- morphology, (36) 430.
- perfect, (26) 40, 325.

## fly or leafhopper, notes, (30) 356.

## fodder—

- analyses, (32) 169; (33) 759.
- digestibility, (28) 363.
- handling, (27) 889.
- mineral constituents, digestibility, (40) 769.

## following alfalfa, (39) 130, 436.

## following clover, (39) 436.

## Corn—Continued.

## food value, (30) 557.

## for forage, experiments, (26) 632.

## for forage, seeding rate, (40) 522.

## for silage—

- analyses, (33) 71; (35) 532.
- cost of production, (34) 137.
- culture experiments, (36) 32.
- seeding experiments, (31) 35; (32) 530.
- time of cutting, (37) 99.
- varieties, (31) 35, 226; (32) 333, 827; (33) 631 (34) 139; (35) 229; (37) 435; (39) 128, 134 333, 435, 736, 835; (40) 134, 332, 431.
- yields, (37) 228; (38) 174.

## for steers in South, (40) 873.

## formation of sugar in, (28) 225.

## from Sudan, (29) 633.

## fungus disease affecting, (28) 150, 846.

## Fusarium disease, studies, (36) 348.

## germ cake, analyses, (30) 467.

## germ cake for pigs, (26) 477.

- germ, effect on milk and butter, (34) 570.
- germ meal, analyses, (28) 464; (30) 169; (31) 863; (32) 169, 667; (34) 263; (35) 562; (36) 268; (38) 67, 665; (39) 370; (40) 571.

## germ meals, starch and hominy, feeding value, (40) 668.

## germinability in relation to temperature and humidity, (37) 736.

## germinated, meal from, (38) 665.

## germinating, constituents of, (35) 202.

## germination as affected by—

- carbon bisulphid, (28) 456.
- depth of planting, (36) 437.
- metallic compounds, (29) 528.
- salt concentration, (39) 732.

## germination—

- energy of, (29) 538.
- in presence of quinonoids, (35) 129.
- studies, (38) 24.
- tests, (26) 795; (27) 737; (28) 831; (29) 740.
- tests in hydrogen peroxid, (27) 201.
- tests, value of (33) 36.

## germs, acidity, (35) 770.

## gluten feed—

- analyses, (33) 371; (34) 72, 263; (37) 268; (38) 67, 368, 369, 572; (39) 773; (40) 571, 665.
- and meal, analyses, (39) 370.
- for lambs, (40) 874.

## gluten meal, analyses, (34) 72, 371; (37) 268; (38) 67, 369; (40) 571, 665.

## gluten, protein supplements for, (36) 666.

## grades for, (32) 138, 433; (36) 268.

## grading, (36) 230.

## grading for planters, (28) 233.

## graphic summary of seasonal work, (39) 495.

## grazing off, (40) 371.

## green—

- analyses, (27) 170.
- cost of distribution, (29) 492.
- judging, (28) 669.
- manuring experiments, (36) 518; (39) 31, 326, 339, 423, 725; (40) 126.
- steaming and ensiling, (31) 467.

## grinding—

- and shelling for hogs, (30) 100.
- for steers, (32) 864.
- power required for, (35) 586.
- stone and roller process, (33) 259.

## ground—

- analyses, (36) 65; (38) 376; (39) 167.
- digestibility, (32) 69, 70; (37) 677.

## growing—

- contest for boys, (27) 395.
- with legumes, (40) 627, 729.
- with oats and millet, (40) 822.
- with pumpkins, (40) 230.
- with soy beans, (40) 135.
- with tobacco for shade, (40) 229.

## growth and maturity as affected by soil moisture, (39) 20.

## growth as affected by—

- alkali salts, (34) 125.
- Azotobacter, (28) 814.
- carbon dioxide, (32) 422.
- lead nitrate, (31) 226.
- manganese, (30) 823.
- meteorology, (29) 510.
- radioactivity, (28) 731.

## Corn—Continued.

## growth—

- at different temperatures, (32) 334.
- daily course, (40) 31.
- in atmospheres lacking carbon dioxide and oxygen, (39) 526.
- relation to climate, (33) 116.
- relation to temperature and moisture, (40) 19.
- shade, (29) 130.
- metabolism, and imbibition, (38) 729.
- on acid soil, (40) 324.
- on cogen soils, (31) 38.
- studies, (40) 233.
- studies, methods, (38) 526.

- Guinea, smut, of treatment, (40) 48.
- hail injury to, (35) 734.
- harvesting, (29) 534.
- harvesting with sheep, (38) 68.
- head smut, notes, (35) 45.
- head smut, studies, (31) 747.
- heated, carbon bisulphid explosion in, (26) 864.
- heterosis in, bearing on double fertilization, (40) 226.
- high-protein strains, isolation, (40) 732.
- hill and row tests, technique, (39) 129.
- history and culture, (35) 338.
- hogging down, (30) 69; (31) 471; (32) 224; (33) 871; (36) 171, 767, 869; (37) 679; (38) 68; (39) 173, 375, 778, 779, 878; (40) 75, 371, 471, 771.
- Hopi, drought resistance in, (30) 436.
- humin nitrogen content, (40) 510.
- huskers and shredders, specifications, (37) 886.
- husks, use as tamale wrappers, (26) 234.
- hybrid strains, (40) 329.
- hybridization and selection, (38) 336.
- hybridization experiments, (26) 833; (27) 428.
- hybrids—

- and parents, comparison, (32) 133.
- chimeras in, (40) 826.
- notes, (27) 339.
- identification of races, (38) 33.
- imports from Argentina, (31) 95.
- improvement, (28) 737; (29) 736; (30) 336; (32) 630; (40) 327.

## improvement—

- by selection, (32) 433.
- in Nebraska, (29) 534.
- Philippines, (36) 529.
- Russia, (29) 534.
- Uruguay, (34) 630.

## Improvers' Association of Nebraska, proceedings, (40) 826.

- in the diet, recipes, (39) 67, 367, 768, 871.
- in the diet, studies, (39) 769, 873.
- inbreeding experiments, (34) 228; (35) 441; (40) 323.

## Indian recipes, (40) 172.

## inheritance—

- in, (27) 737, 740; (28) 534, 739; (29) 34, 333; (30) 342; (34) 431.
- of alterations in, (34) 31.
- characters in, (27) 533.
- color in, (28) 331.
- color in aleurone cells, (28) 634.

  - and care, (35) 136, 229.
  - curing, (35) 735.
  - storage, (39) 637; (40) 34.
  - testing, (38) 739.
  - experiments, (37) 830.

## Corn—Continued.

- seed—  
 situation, review, (29) 634.  
 storage, (34) 139; (40) 334.  
 storing under tropical conditions, (39) 738.  
 testing, (26) 299; (28) 42; (29) 899; (31) 394;  
 (33) 898; (38) 834; (39) 238.  
 treatment, (39) 238, 363; (40) 443.  
 viability as affected by age, (31) 624.  
 seedling experiments, (29) 224, 225; (30) 232; (35)  
 828; (37) 226, 232, 734; (39) 130, 338, 830; (40) 730.  
 seedlings as affected by—  
 cerium chloride, (31) 326.  
 position of grain on cob, (39) 533.  
 ultraviolet rays, (26) 430.  
 seedlings, translocation of seed protein reserves  
 in, (37) 24.  
 selection, (31) 525.  
 selection experiments, (33) 35; (37) 32, 636, 732;  
 (39) 339, 835; (40) 522, 623.  
 self-fertilization, (40) 33.  
 self-pollination, determination, (37) 537.  
 shelled, official standards, (40) 39.  
 shelled, v. clover hay for sheep, (29) 572.  
 shock, ensiling, (33) 274.  
 shock, for silage, (32) 666.  
 shocked, and beet tops, silage from, (28) 873.  
 shoots, etiolated, absorption of nitrogen by,  
 (35) 435.  
 shrinkage—  
 in, (33) 36.  
 in transit, (30) 337.  
 tests, (38) 840.  
 shucks—  
 chloroform extract of, (31) 71.  
 composition, (27) 668.  
 digestibility, (27) 669; (37) 168.  
 silage, *see* Silage.  
 silk beetle, notes, (34) 555.  
 silks, oxydases in, (30) 709.  
 Silver King, for northern Iowa, (30) 37.  
 simple exercises with, (27) 598.  
 sirup and corn sugar manufacture (38) 266.  
 sirup, standards for, (29) 867.  
 smut—  
 cause and treatment, (30) 47.  
 description and treatment, (26) 341; (31) 446;  
 (39) 248.  
 dissemination and treatment, (33) 51.  
 introduction into New South Wales, (26) 52.  
 life history and treatment, (28) 445.  
 notes, (35) 348; (39) 851.  
 notes and treatment, (28) 51.  
 studies, (37) 750; (38) 249; (40) 344.  
 smuts in Barbados, (33) 445.  
 soaked, feeding value, (39) 777.  
 soaked, loss of nutrients from, (31) 357.  
 soft or flour, (37) 799.  
 soft, utilization, (38) 532, 571.  
 soils in United States, (37) 799.  
 spacing experiments, (33) 830; (40) 736.  
 spoiled, relation to pellagra, (31) 858.  
 spraying v. dusting, (32) 551.  
 spurry seeds as coffee substitute, (40) 508.  
 spurry varieties of, (30) 399.  
 starch content, (31) 828; (35) 108.  
 statistical notes, (40) 626.  
 steamed, composition and digestibility, (31) 467.  
 storage, (34) 529.  
 stored—  
 disinfection, (30) 849.  
 insects affecting, (31) 58, 353.  
 variations in weight of, (31) 235.  
 stover—  
 amylolytic activity, (32) 503.  
 as feeding stuff, (35) 669.  
 ash analyses, (29) 861.  
 effect on bacterial activity of soils, (35) 216.  
 energy value, (33) 72.  
 feeding value, (40) 666.  
 for silage, (39) 272.  
 frozen, analyses, (36) 65.  
 silage, studies, (38) 270, 802.  
 study of in Philippine College of Agriculture,  
 (33) 597.  
 subsolling experiments, (28) 827; (31) 131; (33) 34.  
 substitutes for pigs, (31) 868; (40) 668.  
 sucker production in, (28) 537.  
 suckering, (33) 34.  
 suckering, cause, (26) 234.

## Corn—Continued.

- suckers, economic value, (29) 31, 35.  
 sucrose from, (34) 113.  
 sugar content as affected by detasseling, (31) 44,  
 431; (32) 434; (33) 426; (34) 434; (35) 227.  
 sugar, review of literature, (31) 409.  
 supplements for pigs, (38) 473.  
 sweet, *see* Sweet corn.  
 tables for wagonloads, (32) 42.  
 tassels as affected by soil conditions, (31) 831.  
 temporary roots in, (35) 135.  
 tester, homemade, description, (27) 491.  
 textbook, (30) 635.  
 thinning experiments, (33) 36.  
 threshing machine for, (32) 134.  
 transformation of nitrogen by, (29) 133.  
 translocation of mineral constituents, (34) 427.  
 transpiration, (36) 226; (39) 440, 517.  
 transpiration and photosynthesis, (36) 525.  
 trash compost, nitrogen content, (39) 523.  
 treatise, (31) 331; (34) 529.  
 use by prehistoric Americans, (38) 167.  
 use of machinery in cutting, (39) 794.  
 utilization of hydrocyanic acid by, (31) 730.  
 utilization of sugar by, (36) 125.  
 v. alfalfa hay for cows, (32) 74, 863, 871.  
 v. barley for pigs, (40) 72.  
 v. cane for silage, (31) 36.  
 v. mangels for forage, (28) 41.  
 v. oats for mules, (30) 772.  
 v. oats for work horses, (37) 195.  
 v. sorghum for forage, (35) 529.  
 v. wheat for hens, (39) 74, 275.  
 variation and growth in, (33) 28.  
 variation in due to fertilizers, (29) 435.  
 variations in, (39) 837.  
 variegated pericarp in, (37) 737.  
 varieties, (26) 233, 437, 535, 634, 733, 735, 828,  
 830, 834; (27) 32, 234, 334, 336, 529, 533, 637, 638,  
 736; (28) 230, 531, 533, 534, 734, 736; (29) 31, 32,  
 137, 138, 222, 225, 330, 335, 426, 429, 530, 631, 736,  
 737; (30) 37, 229, 231, 435, 525, 635, 734, 828,  
 829; (31) 133, 135, 226, 331, 430, 432, 525, 628,  
 629, 732, 828, 829; (32) 224, 226, 332, 333, 430,  
 431, 526, 527, 528, 529, 532, 630, 631, 730; (33) 33,  
 34, 35, 36, 430, 528, 529, 728, 828, 830; (34) 139,  
 227, 229, 431, 433, 434, 735; (35) 229, 337, 338,  
 339, 526, 828, 830; (36) 36, 131, 132, 135, 529, 735,  
 828, 829, 832; (37) 29, 32, 35, 227, 228, 229, 232,  
 233, 329, 330, 334, 436, 529, 531, 536, 636, 728,  
 730, 823, 824; (38) 31, 33, 131, 335, 336, 430, 431,  
 532, 632, 634, 828, 829, 830, 831; (39) 337.  
 varieties—  
 acclimated, (40) 329.  
 for Arkansas, (30) 337.  
 for dry farming, (39) 736.  
 for Massachusetts, (28) 335.  
 in Ohio, (26) 437.  
 old Indian, (39) 738.  
 taxonomy, (40) 627.  
 tropical, (34) 306.  
 tropical, adaptations in, (39) 837.  
 variety—  
 many-eared, (31) 525.  
 testing, methods, (26) 436.  
 tests, (39) 127, 227, 233, 336, 337, 338, 436, 437,  
 528, 737, 738, 835; (40) 31, 34, 228, 230, 328,  
 329, 331, 431, 523, 524, 624, 729, 823.  
 tests, experimental error, (39) 830, 831.  
 viability and vigor as affected by position on  
 cob, (34) 134.  
 viability tests, (34) 145.  
 water requirement in India, (27) 429, 432; (29)  
 826; (32) 127, 335; (33) 726; (34) 228, 720; (35)  
 529, 823; (38) 227, 228, 619.  
 weather factor for, (35) 114.  
 weevil—  
 life history and remedies, (28) 455.  
 on Gulf Coast, (40) 861.  
 remedies, (38) 768.  
 resistance in, (31) 354.  
 shuck protection against, (39) 862.  
 weight ratios, (36) 131.  
 white flint, development, (35) 336; (37) 529.  
 wilting coefficient, (32) 335.  
 wireworm—  
 habits and anatomy, (34) 556.  
 notes, (29) 252, 858; (32) 555; (35) 467.  
 slender, studies, (30) 545.  
 studies, (33) 63, 158.

- Corn—Continued.  
 worm, pink—  
   in New South Wales, (40) 453.  
   studies, (35) 256.  
 worm, small pin, notes, (36) 56.  
 xenia in, (28) 739.  
 yield as affected by—  
   change of place, (38) 738.  
   climate, (28) 433.  
   detasseling, (26) 735.  
   ear characteristics, (27) 836.  
   hybridization, (32) 133.  
   number of stalks per hill, (33) 730.  
   removal of suckers, (26) 829.  
   source of seed, (27) 432; (32) 226.  
   sulphur, (34) 726.  
   tillage, (38) 815.  
   weather, (31) 213, 229; (35) 618; (38) 317, 319, 415; (39) 418.  
 yield—  
   on alfalfa stubble, (33) 828.  
   per acre, 1866-1917, (40) 490.  
   per-acre unit v. score card for, (29) 633.  
 yield, relation to—  
   nitrogen and phosphorus content of soil, (40) 316.  
   physical properties of soils, (33) 815.  
   temperature, (39) 319.  
 yield tests, experimental error, (39) 829.  
 yields, (26) 638; (29) 32; (34) 228; (40) 731.  
 yields—  
   and prices, 1866-1915, (36) 832.  
   in Chester Co., Pennsylvania, (39) 621.  
   of fodder, (40) 330, 331.  
   of selected strains, determining, (39) 129.  
 Cornaphis populi n.g. and n.sp., description, (31) 351.  
 Corncob—  
   ashes, analyses, (26) 715; (40) 621.  
   meal, analyses, (26) 665.  
   rot, studies, (31) 642.  
 Corncocks—  
   analyses, (27) 170; (38) 626.  
   effect on soil potash, (36) 625.  
   ground, analyses, (34) 665, 767; (38) 369.  
   ground, effect on soil phosphates, (34) 421.  
   use, (40) 17.  
   use in gas manufacture, (28) 115.  
 Cornell University, notes, (26) 97, 300, 397, 797, 900; (27) 99, 198, 398, 493, 600, 699; (28) 94, 195, 397; (29) 98, 196, 398, 699; (30) 300, 497, 699, 797; (31) 197, 399, 497, 797; (32) 95, 397, 695; (33) 198, 795; (34) 198, 695, 900; (35) 97, 399, 798; (36) 695, 797; (37) 98, 498, 600, 898; (38) 499, 699; (39) 96, 300, 500, 697; (40) 199, 498, 697.  
 Cornflower color, studies, (31) 324.  
 Cornifrons elautalis, notes, (28) 451.  
 Cornstalk—  
   beetle, notes, (34) 757.  
   beetle, rough-headed, life history and remedies, (38) 263.  
   borer—  
   European, notes, (40) 756.  
   larger, notes, (32) 449; (40) 856.  
   lesser, notes, (39) 765.  
   lesser, studies, (37) 851.  
   notes, (29) 356, 453; (37) 847; (39) 358.  
   studies, (39) 158.  
   summary of information, (40) 856.  
   disease, cause, (28) 284.  
 Cornstalks—  
   effect on soil moisture, (26) 533.  
   feeding value, (38) 168.  
   formation of sugar in, (29) 409.  
   ground, analyses, (30) 868.  
   manufacture of paper and fodder from, (27) 314.  
   manufacture of sugar from, (28) 314, 810.  
   sugar content, (27) 314; (30) 14.  
   utilization, (28) 114.  
 Cornstarch—  
   effect on intestinal flora, (36) 665.  
   gelatinization temperature, (37) 410.  
   hydrolysis, erythro-dextrin in, (40) 460.  
   manufacture, (38) 266.  
   relation to polyneuritis, (29) 460.  
 Cornus—  
   controversa as affected by ringing, (38) 128.  
   wood, use, (33) 443.  
 Corollium n.g. and n.spp. in Norway, (31) 327.  
 Coronilla minima, analyses, (33) 466.  
 Corotoma trifurcata, effect on cowpeas, (40) 860.  
 Corozo palm leaf spot, description, (39) 52.  
 Corpus luteum—  
   effect on ovulation, (32) 671; (33) 96.  
   extracts, effect on cows, (29) 578.  
   function, (27) 174; (28) 571.  
   of pregnancy in swine, (40) 663.  
   of the fowl, studies, (40) 664.  
   pigments of, (31) 274.  
   substance, effect on growth and—  
   egg production, (34) 668.  
   sexual development, (34) 766.  
   supply of, (33) 86.  
 Correlation coefficient—  
   computation, (40) 870.  
   discussion, (36) 166.  
   limitations and applicability, (37) 621.  
 Correlation—  
   in farm survey data, (37) 269.  
   tables, formation, (27) 870.  
   theories for meteorology and agriculture, (36) 419.  
 Corrosive sublimate—  
   absorption by potatoes, (29) 242.  
   as milk preservative, (32) 576.  
   as wood preservative, (30) 647.  
   effect on starch ferments, (27) 109.  
   for rye smut, (28) 647.  
   for seed grain, (28) 846.  
   for winter grains, (27) 351.  
   fungicidal value, (31) 242.  
   poisoning of live stock by, (34) 279.  
 Cortihylus punctatissimus, notes, (30) 357; (33) 252.  
 Corticum—  
   calceum, notes, (28) 350.  
   javanicum, notes, (26) 851.  
   javanicum, studies, (27) 746.  
   laeve, notes, (27) 445.  
   lilacofuscum, notes, (35) 51; (36) 347; (39) 151.  
   ochroleucum, notes, (35) 749.  
   salmonicolor—  
   notes, (27) 451; (28) 241; (29) 547, 749; (34) 448, 849; (35) 251; (36) 852; (38) 53, 759; (40) 155.  
   on fig, (39) 757.  
   or C. javanicum on rubber, (32) 54.  
   studies, (33) 151; (37) 52, 452.  
   treatment, (29) 552; (30) 845.  
   sp., notes, (27) 749; (28) 649.  
   spp. on rubber, (34) 744; (37) 253, 349.  
   stevensii n.n., description, (40) 49.  
   vagus—  
   notes, (34) 840; (35) 48.  
   pathogenicity, (32) 446.  
   studies, (37) 155; (40) 545.  
   vagus solani—  
   notes, (29) 647; (31) 344.  
   relation to sugar beet damping off, (33) 246.  
   studies, (32) 147.  
   treatment, (29) 242; (36) 47, 547.  
 Corticium, studies, (40) 48.  
 Cortinarius n.sp., description, (31) 127.  
 Cortinellus spp., culture in Japan, (35) 347.  
 Corvus—  
   brachyrhynchos, notes, (30) 851.

  - fertilization by bees, (40) 458.
- machinery, (36) 400.
- market—
  - conditions in Oklahoma, (30) 193.
  - prices and qualities, (36) 493.
  - review, (26) 835.
- marketing, (29) 894; (32) 91; (38) 834.
- marketing—
  - association, by-laws for, (34) 288.
  - cooperatively, (26) 535; (30) 591; (32) 435.
  - in North Carolina, (33) 595; (37) 36.
  - in the seed, (35) 793; (36) 289.
  - in the South, (26) 483, 489.
  - statistics, (33) 788.
- maturity as affected by fertilizers, (31) 39.
- Meade, (40) 237, 437.
- method of selfing, (39) 234.
- microscopical studies, (33) 210.
- mill operators, food raised by, (38) 792.
- mill picker dirt, analyses, (32) 32.
- mill waste, analyses, (38) 626.
- moth, *see* Alabama argillacea.
- native wild, notes, (29) 441.
- natural crossing in, (27) 837.
- new nematode infesting, (38) 147.
- of Cambodia, (32) 229.
- of Hopi Indians, description, (30) 37.
- of North Carolina, staple lengths, (39) 234.
- packing and marketing, (28) 433.
- perjurate hybrids, characteristics, (33) 132.
- pests in Egypt, treatise, (40) 856.
- photosynthesis in, (27) 732.
- physiological disturbances, (32) 543.
- picking—
  - effect on children, (30) 793.
  - machine, description, (27) 293, 792.
  - prices paid for, (40) 93.
- plant, chemistry of, (39) 411, 431.
- plant, glands of, (39) 431.
- planter, lister attachment for, (37) 90.
- planting and harvesting dates, (26) 532.
- planting for early maturity, (33) 133.
- prevention of cross-pollination, (40) 335.
- prices and movement in 1916, (37) 492.
- production—
  - and distribution, (40) 238.
  - and prices in United States, 1908-1918, (40) 93.
  - and utilization, (40) 333.
  - and weather, correlation, (33) 117, 715.
  - in British Empire, (27) 34; (39) 837.
  - Egypt, (40) 335.
  - Louisiana, (40) 527.
  - 1914, (32) 435.
  - St. Vincent, (39) 835.
  - United States, (26) 389; (27) 593, 738; (36) 230; (37) 441; (38) 740; (40) 391.
  - 1918 program, (38) 834.
- propagation—
  - by slips, (30) 139, 337.
  - experiments, (29) 330.
- pruning experiments, (27) 136, 433; (32) 829.
- red spider affecting, (26) 153, 856; (27) 264; (29) 360; (32) 157; (36) 557; (38) 63.
- refuse, fertilizing value, (26) 631.
- region, meteorological service, (39) 718.
- Research Association, British, (40) 234.
- resistance to anthracnose, (26) 736.
- resistance to leaf blister mite, (37) 732.
- resources of French colonies, (40) 438.
- Rhizoctonia diseases, notes, (30) 845.
- root—
  - disease, notes, (38) 334.
  - knot, notes, (32) 342.
  - knot, treatment, (26) 846.
  - louse, notes, (31) 250.
  - louse, studies, (30) 546.
  - notes, (27) 237.
- root rot—
  - effect of rotation and tillage on, (35) 828.
  - notes, (29) 445; (31) 746; (40) 48.
  - studies, (36) 146; (39) 852.
- rotation experiments, (27) 234; (35) 135; (38) 334; (40) 729.
- rubelzul, description, (30) 37.

## Cotton—Continued.

- rust—
  - investigations, (38) 752.
  - outbreak in Texas, (38) 149.
  - prevention, (29) 35; (32) 735.
  - treatment, (26) 736.
- Sakellariadis—
  - in Montserrat, (30) 636.
  - notes, (27) 35.
- sampling, (39) 135.
- scale, Chinese, bird enemies of, (26) 556.
- Sea Island, (36) 530.
- Sea Island—
  - culture in Cuba, (26) 736.
  - culture in West Indies, (34) 227.
  - factors affecting yield, (39) 637.
  - fertilizer experiments, (40) 627.
  - improvement by selection, (34) 631.
  - lint characters, (38) 234.
  - price in 1913, (32) 229.
  - relation of lint length to rainfall, (40) 827.
  - selection experiments, (36) 332.
  - spacing, (40) 628.
- seed—*see also* Cottonseed.
  - analyses, (36) 804.
- seed as affected by—
  - storage, (29) 140.
  - sulphuric acid, (27) 524.
- seed—
  - as human food, (37) 60; (39) 870.
  - buying for planting, (31) 41.
  - calculator, (37) 137; (39) 441.
  - changes in during storage, (35) 412; (36) 12.
  - chemistry of, (32) 111.
  - composition, (36) 615.
  - composition and digestibility, (33) 568.
  - delinted, (40) 32.
  - detection of anthracnose in, (26) 648.
  - deterioration at public gin, (37) 335.
  - deterioration, relation to ginning, (33) 833.
  - digestibility and productive value, (37) 865.
  - distribution, (30) 436.
  - effect on maturity of cotton, (31) 40.
  - fertilizing value, (29) 831.
  - for planting purposes, (39) 135.
  - formation of oil in, (32) 427.
  - from dry sections, (40) 729.
  - fumigating experiments, (34) 458; (35) 257, 678.
- seed, germination—
  - as affected by green manures, (33) 331; (37) 29.
  - as affected by hot water, (31) 643.
  - tests, (26) 534; (31) 631; (39) 135.
- seed—
  - globulin from, (36) 804.
  - gossypol-like substance in, (38) 801.
  - heavy, selecting, (40) 237.
  - improving quality of, (29) 738.
  - internal disease of, (34) 645.
  - machines for treating, (39) 158.
  - moth, new, from West Africa, (33) 155.
  - position in planting, (40) 635.
  - pressure in warehouses, (34) 687.
  - production, cooperation in, (26) 535.
  - raffinase, content, (40) 171.
  - select, nurse planting, (39) 341.
  - selection, (31) 226, 433.
  - tests, (39) 135.
  - toxicity, (33) 311; (38) 685, 801.
  - transportation regulations, (30) 357.
  - treatment for pink bollworm, (36) 857.
  - valuation on dry matter content, (36) 92.
  - varietal characteristics, (36) 804.
- seedling experiments, (35) 828; (36) 36, 37.
- seedlings, insects affecting, (35) 156.
- selection, (30) 636, 735.
- selection experiments, (30) 525; (35) 134; (37) 335, 636, 732; (38) 33, 336, 433; (39) 337, 433; (40) 522.
- self-pollination in, (29) 36.
- serpentine leaf miner affecting, (29) 857; (33) 255.
- shedding, (30) 538; (34) 227, 643, 844; (36) 646; (37) 224, 553.
- shortage of the world, (40) 335.
- snapped and bolly, (40) 93.
- spacing experiments, (34) 229; (37) 734; (38) 832; (39) 739; (40) 235, 433.
- spinning and weaving tests, (38) 434.
- spinning tests, (30) 527; (35) 137; (40) 228.
- spraying for boll weevil, (34) 830.
- square-weevil, studies, (28) 161; (29) 658.

## Cotton—Continued.

## stainer—

- control, (40) 256.
- effect on germination of cotton seed, (26) 534.
- life history and remedies, (38) 461.
- muscid parasites of, (29) 358.
- notes, (27) 256; (37) 460, 550, 847; (39) 559, 635, 754, 862; (40) 165, 261, 854.
- on citrus, (40) 353.
- studies, (26) 454; (36) 654.
- West Indian, notes, (39) 559, 638.

## staining, notes, (35) 44.

## stalk cutter, description, (26) 95; (34) 163.

## stalks—

- composition and use, (27) 727.
- conversion into charcoal, (32) 449.
- for cattle, (38) 371.
- plowing under, (38) 234.
- silage from, (38) 371.
- statistics in United States, (33) 894.
- stem borer, notes, (27) 53.
- stem weevil, notes, (40) 553.
- subsoiling experiments, (28) 827; (31) 131.
- substitute crops for, (32) 594.
- substitutes, notes, (26) 835.
- supply and distribution, (28) 390.
- thinning experiments, (35) 135, 337; (37) 29; (40) 433.
- topping experiments, (26) 233; (27) 433; (29) 35; (35) 135.

## trade, manual, (34) 595, 691.

## trade, treatise, (31) 690.

## treatise, (26) 437; (28) 631; (29) 738; (31) 525, 735; (32) 434; (33) 433; (35) 230, 639; (40) 526.

## upland—

- chemistry of, (39) 411.
- classification, (37) 830.
- long staple, spinning tests, (31) 631.
- use and influence, treatise, (36) 894.
- use by prehistoric Americans, (38) 167.
- variation in, (38) 340.
- variation with a self-fertilized ancestry, (26) 834.

## varietal differences in fruiting processes, (40) 235.

- varieties, (26) 233, 535, 631, 733, 736, 828; (27) 35, 136, 337, 340, 433, 837; (28) 230, 533, 534, 828, 832; (29) 31, 32, 35, 426, 430, 534, 738, 830; (30) 229, 232, 338, 434, 525, 635, 731, 734, 831; (31) 133, 136, 432, 524, 525, 628, 631, 732, 733, 829; (32) 37, 226, 227, 229, 332, 526, 631, 734, 829; (33) 529, 834; (34) 830, 831; (35) 134, 135, 136, 830; (36) 735, 832; (37) 35, 329, 335, 636, 642, 728, 731, 823, 824, 825; (38) 31, 230, 233, 334, 336, 430, 433, 533, 634, 829, 830, 832; (39) 32; (40) 437, 438.

## varieties—

- for weevil conditions, (40) 235, 236, 237.
- in Brazil, (37) 441.
- in Italian Somaliland, (37) 336.

## variety—

- new and prolific, (33) 232.
- relation to oil content of seed, (40) 238.
- tests, (39) 128, 337, 433, 528, 637, 835; (40) 230, 231, 234, 237, 328, 332, 335, 433, 437, 523, 624, 625.

## Verticillium albo-atrum on, (33) 244.

## volunteering experiments, (32) 226.

## warehouse law in Arkansas, (38) 294.

## warehouses—

- accounts for, (37) 594.
- construction, (33) 784.
- in the South, (33) 191.
- regulations, (38) 895.

## water requirement, (26) 631; (32) 127, 226; (37) 29; (40) 236.

## wax, notes, (26) 114.

## weather conditions for, (37) 316.

## weevil resistance in, (26) 41.

## weevils in Peru, (32) 658.

## weevils, notes, (29) 562.

## white scale—

- control, (28) 159.
- in Peru, (29) 654.
- parasites of, (26) 247.

## wild—

- as host plant of cotton boll weevil, (30) 57.
- insects affecting, (31) 350; (33) 57.
- of Arizona, description, (31) 633.

## Cotton—Continued.

## wilt—

- and root knot, notes, (34) 643.
- notes, (28) 241; (29) 446; (30) 538; (31) 641; (32) 342, 543; (34) 50; (38) 351, 547.
- resistant strains, (40) 235, 237.
- resistant varieties, (28) 746; (35) 339; (38) 233.
- studies, (28) 746; (35) 846.
- treatment, (26) 846.

## wireworm—

- notes, (32) 555; (35) 467.
- slender, studies, (30) 545.
- studies, (33) 63, 158.

## worm—

- Egyptian, remedies, (28) 355.
- in Egypt, (30) 252.
- natural enemies, (27) 862.
- notes, (27) 554, 756; (34) 62.
- notes and remedies, (28) 60.
- remedies, (26) 757.
- studies, (27) 556.

## yield as affected by—

- rate of seeding, (27) 434.
- source of seed, (32) 226.
- water level, (30) 232; (31) 229, 230.

## yield in relation to—

- density of stand, (33) 133.
- potash scarcity, (40) 335.

## yield under boll weevil conditions, (27) 34.

## yields, (29) 32.

Cottonseed—*see also* Cotton seed.

## by-products, effect on composition of milk, (33) 274.

## cake—

- agglutinating properties, (31) 774.
- analyses, (26) 767, 809; (27) 170, 371; (28) 464; (29) 367; (30) 169; (31) 863; (33) 665; (34) 169, 467; (36) 765; (37) 873; (38) 369; (39) 370; (40) 571.

## cake, cold-pressed—

- analyses, (26) 468; (28) 464; (31) 863; (32) 169; (34) 169, 263, 467; (36) 268; (38) 369; (40) 72, 571.
- digestibility, (31) 863.
- for dairy cows, (35) 872.
- from bolly seed, analyses, (36) 765.

## cake—

- digestibility, (38) 168.
- effect on composition of butter, (36) 875.
- effect on milk and butter, (34) 570.
- Egyptian, digestibility, (36) 765.
- feeding value, (26) 468.
- fertilizing value, (26) 631; (27) 337; (28) 42; (38) 220, 527.
- for cows, (29) 577.
- for range flocks, (39) 172.
- for sheep and steers, (29) 169.
- nutritive value, (28) 673.
- residual manurial value, (39) 530.
- v. cold pressed cottonseed cake for cattle, (34) 170.
- v. soy bean cake for cows, (29) 172.

- feed, analyses, (27) 669, 774; (28) 572; (30) 68, 565; (31) 366, 467, 564, 663; (32) 169, 666; (36) 268, 765; (37) 471; (38) 368, 369, 572; (39) 167, 270, 370, 773; (40) 72, 571, 665.

## feed meal, digestibility, (31) 766.

## flour as food for man, (31) 855.

## flour, use in bread making, (27) 268; (34) 762.

## hull bran, analyses, (32) 666.

## hulls—

- analyses, (28) 169, 464; (30) 169; (32) 169; (34) 263; (36) 268, 615.
- composition and digestibility, (32) 666.
- detection in cottonseed meal, (30) 115; (33) 16.
- digestibility, (31) 863.
- feeding value, (39) 272; (40) 666.
- lintless, for cows, (38) 681.
- screenings, analyses, (26) 468.
- v. silage for steers, (31) 469; (32) 260, 568.

## meal—

- acidity, (35) 770.
- amino acid in, (33) 665.
- ammonification, (34) 127.
- ammonification in soils, (33) 808.
- ammonification studies, (32) 817.

## Cottonseed—Continued.

## meal—continued.

analyses, (26) 72, 165, 266, 325, 362, 363, 369, 468, 469, 568, 665, 714, 728, 768, 770, 873; (27) 68, 170, 171, 371, 469, 570, 669, 670, 774, 775, 872; (23) 169, 224, 265, 364, 464, 465, 571, 627, 669, 769; (29) 270, 271, 367, 467, 570, 665, 769; (30) 67, 68, 169, 466, 467, 565, 671, 868; (31) 73, 168, 366, 467, 470, 564, 663, 863; (32) 169, 259, 568, 667, 862; (33) 71, 371, 568, 665, 759, 870; (34) 72, 169, 263, 371, 426, 467, 566, 665, 727, 767; (35) 373, 374, 562, 867; (36) 65, 167, 268, 571, 667, 765; (37) 220, 268, 471, 767; (38) 67, 368, 369, 376, 572, 665; (39) 70, 167, 270, 370, 773; (40) 72, 470, 571, 665.

analyses and valuation, (27) 423.

and feed, analyses, (32) 667.

and hulls, analyses, (29) 666; (32) 667.

as an incomplete feeding stuff, (36) 367.

as source of nitrogen, (26) 735.

as top-dressing for grains, (37) 29.

ash analyses, (29) 861.

availability in presence of sodium nitrate, (38) 723.

availability of nitrogen in, (26) 124, 523; (27) 723; (28) 724.

cold-pressed, analyses, (31) 863.

composition, (30) 466; (36) 615.

composition and digestibility, (32) 666; (33) 568.

decomposition in soils, (36) 116.

definition, (28) 98.

determination in feeding stuffs, (35) 504.

digestibility, (28) 464; (31) 863; (37) 65, 678.

digestibility in mixed rations, (34) 169.

distribution of nitrogen in, (36) 269.

## meal, effect on—

activity of soil fungi, (36) 215.

breeding power of heifers, (34) 775; (36) 773.

butter, (39) 485.

calving ability of cows, (32) 98.

composition of milk, (33) 274.

composition of milk fat, (26) 170.

cows, (34) 279.

milk production and quality, (26) 476.

## meal—

feeding, (29) 76.

feeding value, (39) 375, 478, 482, 676, 784; (40) 75, 278.

feeding value as affected by added hull bran, (32) 666.

fertilizing value, (27) 429, 434, 436, 437; (28) 832; (29) 335, 336, 831; (30) 636, 820, 835; (31) 40, 822; (34) 129, 219; (35) 531; (37) 731, 823; (38) 33, 517; (39) 21, 528, 623; (40) 515, 828.

food products, recipes, (31) 66.

for arid soils, (34) 621; (36) 726.

beef cattle, (32) 99, 865.

breeding animals, (39) 370, 372.

breeding ewes, (37) 676.

calves, (26) 879; (37) 675, 682.

corn, (32) 732.

dairy cows, (35) 871, 872.

egg production, (36) 769.

horses and mules, (37) 681; (39) 375.

human food, (31) 65, 264; (35) 469; (38) 166, 566.

laying hens, (30) 175; (33) 763; (36) 373; (37) 682; (38) 678; (39) 176, 376, 480, 578.

milk production, (40) 572.

pigs, (36) 471; (38) 370.

potatoes, (32) 739.

steers, (31) 469.

sweet potatoes, (33) 337.

forms of phosphorus in, (27) 611.

inositol phosphoric acid of, (36) 299.

inspection, (27) 219.

low-grade, analyses, (37) 168.

manurial value, (40) 127.

milling, (36) 615.

nitrification in acid soils, (30) 626.

nitrification in soils, (26) 722; (39) 814.

nitrogen determination in, (39) 506.

organic phosphoric acid of, (28) 505; (31) 707.

oxidation in soils, (34) 420.

palatability and nutritive value, (38) 66.

paper on, (28) 74.

## Cottonseed—Continued.

## meal—continued.

phosphorus compounds in, (29) 804; (37) 502; (40) 772.

physical changes during digestion, (39) 476.

phytic acid in, (30) 707.

production and use, (27) 327.

rations for steers, (28) 71; (29) 667.

relation to citrus chlorosis, (39) 458.

sugar content, (37) 208.

toxic properties, removal, (28) 279.

toxicity, (26) 780; (27) 78; (28) 197; (29) 76, 477; (31) 578; (32) 80; (33) 311; (34) 79, 381, 474, 476; (35) 333, 682; (37) 60, 639; (38) 282; (39) 174, 373, 478.

toxicity, neutralizing, (37) 680.

v. beef scrap for chicks, (30) 571; (31) 473.

v. coconut meal for cows, (30) 176.

v. soy-bean meal for cows, (32) 573.

v. velvet beans for cattle, (29) 576; (36) 563; (38) 680.

nut cake, feeding value, (39) 775.

oil, accessory growth substance in, (38) 265.

chemical and physiological tests, (33) 362.

composition, (32) 313.

content, relation to variety, (40) 238.

detection, (26) 508; (27) 207, 497; (29) 613, 798; (37) 13; (38) 616.

digestibility, (36) 850; (40) 268.

effect on composition of milk fat, (35) 775.

for calves, (29) 170, 668.

hardened, analyses and digestibility, (33) 564.

hydrogenated, digestibility, (34) 659.

hydrogenated, properties, (34) 9.

hydrogenation, (29) 413, 459; (34) 10.

hydrolysis and constitution, (27) 804.

industry, (36) 124.

production and use, (37) 511.

production in United States, (40) 614.

refractive index, (27) 614.

relation to pellagra, (26) 263.

rôle in glycogen formation, (31) 763.

soap as substitute for whale oil soap, (34) 250.

specific heat, (40) 68.

toxic effect on rats, (36) 61.

toxicity (30) 479.

## products—

as fertilizers, (31) 323.

as human food, (36) 865.

composition and use, (38) 266.

## products, effect on—

composition and properties of butter, (37) 72.

composition of milk, (38) 682.

milk, (31) 370.

texture and flavor of butter, (38) 683.

## products—

fertilizing value, (39) 429.

for steers, (40) 873.

in northern Europe, (31) 864.

industry in United States, (26) 389.

methods of analysis, (30) 115.

mineral constituents, digestibility, (40) 769.

nutritional value, (40) 463.

of Texas, (33) 788.

toxicity, (39) 886.

toxicity, determination, (38) 113.

protein, nutritive value, (39) 666.

proteins, utilization, (26) 662.

waste, analyses, (28) 523.

## Cottonwood—

analyses, (38) 309.

borer beetle parasite, (34) 66.

borer, studies, (36) 157.

change from radial to bilateral symmetry, (32) 426.

forcing experiments, (38) 443.

in Mississippi Valley, (30) 346.

leaf beetle, notes, (28) 353; (30) 154.

mite, new, (40) 359.

## Cottony cushion scale—

in Ceylon, (38) 561.

in France, (34) 850.

notes, (27) 155; (29) 654; (30) 752; (31) 60, 751;

(32) 56; (33) 59.

parasite of, (36) 757.

remedies, (31) 157; (32) 152; (33) 725; (35) 852;

(36) 754.

- Cotyledon—  
fluid in study of anaphylaxis, (39) 79.  
orbiculata, toxicity, (29) 476.
- Couch grass, monograph, (29) 141.
- Coula edulis fruits and seeds, analyses, (35) 806.
- Coule cricket, notes, (37) 54.
- Coumarin—  
detection, (27) 112.  
determination in vanilla, (39) 505.  
disappearance in soil, (36) 725, 732; (38) 129.  
effect on—  
action of fertilizers, (26) 224; (27) 520.  
nitrification in soil, (38) 119.

value, (36) 195; (40) 375.  
testing—  
illustrated lecture, (38) 95.  
new plan for, (39) 678.
- Cowbane, spotted, eradication, (27) 733.
- Cowhage and related species, (37) 328.
- Cowpea—  
and hull chops, analyses, (36) 765.  
and sorghum silage, digestibility, (31) 863.

## Cowpea—Continued.

- and sorghum silage, mineral constituents, (40) 769.
  - beetle, longicorn, (40) 654.
  - Cercospora disease, notes, (39) 453.
  - diseases, descriptions, (30) 351.
  - fly in Philippines, (40) 457.
  - hay—
    - analyses, (31) 437.
    - ash analyses, (29) 861.
    - composition, (27) 668.
    - cost of production, (39) 294.
    - digestibility, (27) 669; (37) 168.
    - effect on bacterial activity of soils, (35) 216.
    - feeding value, (40) 667.
    - mineral constituents, digestibility, (40) 769.
    - v. alfalfa hay for dairy cows, (29) 876.
  - leaf spot, notes, (35) 749; (39) 52.
  - meal, availability of nitrogen in, (26) 124; (27) 723.
  - plant louse, notes, (28) 653.
  - pod weevil, notes, (37) 659.
  - Rhizoctonia diseases, notes, (30) 845.
  - root rot, notes, (29) 445.
  - seed, half-grown, (39) 841.
  - silage, analyses, (27) 469.
  - vines, nitrification in soils, (26) 722.
  - weevil—
    - biology and control, (39) 363.
    - control, (31) 256, 553; (37) 262; (39) 664.
    - in Hawaiian Islands, (40) 266.
    - injurious to cotton, (37) 560.
    - notes, (34) 754.
    - studies, (28) 256; (31) 254.
  - wilt—
    - and root knot, notes, (34) 643.
    - description, (28) 346.
    - notes, (29) 444; (30) 538; (32) 543; (39) 52.
- Cowpeas—
- amino acid in, (33) 665.
  - analyses, (27) 68, 235; (29) 271.
  - anatomical structure, (28) 660.
  - and corn, associated growth, (33) 226; (35) 826; (37) 731; (38) 32; (40) 627, 729.
  - kafir, silage from, (28) 734.
  - sorghum mixture for hay, (39) 128.
  - sorghum, sowing experiments, (28) 735.
  - soy beans, comparative yields, (40) 330.
- as affected by—
- barium and strontium, (40) 819.
  - bean leaf beetle, (40) 860.
  - calcium and magnesium, (35) 726.
  - guanidin, (28) 427.
  - pod position, (34) 134.
- as cover crop, (32) 332; (34) 736.
- dry-farm crop, (39) 736.
  - forage crop, (31) 829; (37) 640.
  - green manure, (32) 225, 423; (34) 230; (35) 337; (37) 320, 425; (38) 220, 230; (39) 423.
  - preliminary crop for wheat, (38) 619.
  - silage crop, (31) 829.
- ash analyses, (29) 861.
- Blackeye, as affected by salt, (40) 435.
  - Blackeye, drought resistance, (39) 835.
  - breeding experiments, (36) 646.
  - breeding for disease resistance, (30) 331.
  - color correlation in, (30) 636.
  - color inheritance in, (26) 36.
  - coloration of seed coat, (31) 130.
  - colorations in, studies, (27) 632.
  - cost of production, (33) 293.
  - creatinin in, (26) 419.
  - culture, (26) 830; (27) 32, 340; (30) 139, 232, 335; (31) 265; (32) 226, 431, 736; (34) 630, 694; (35) 231, 567.
- culture—
- and use, (31) 832; (35) 33.
  - experiments, (26) 422, 632, 830; (27) 235, 735, 841; (29) 830; (30) 229, 434, 632; (31) 37, 829; (33) 31, 225, 229, 830; (34) 227; (35) 526; (36) 340; (37) 329; (38) 217, 334, 336, 632, 827, 829, 830; (39) 128, 835; (40) 624.
  - in German East Africa, (27) 419.
  - Guam, (40) 328.
  - Hawaii, (40) 823.
  - Illinois, (37) 438.
  - Montana, (33) 526.
  - North Carolina, (31) 132.
  - Philippines, (26) 361; (30) 237; (36) 230; (40) 231.

## Cowpeas—Continued.

- culture—continued.
  - in Porto Rico, (29) 631.
  - Rhodesia, (27) 32, 637.
  - the cotton belt, (32) 631.
  - Tucumán, (37) 134.
  - western Nebraska, (32) 224.
  - on Ozark uplands, (38) 217.
  - on Wisconsin drift soil, (36) 623.
  - under dry farming, (30) 435; (37) 329.
  - disking v. plowing under, (33) 226.
  - drilling v. broadcasting, (33) 33.
  - effect on—
    - following wheat crop, (37) 732.
    - soil, (34) 420.
    - soil nitrogen, (26) 196; (31) 733.
    - yield of wheat, (35) 826.
  - elongation of hypocotyl, (28) 39, 739.
  - feeding value, (34) 867.
  - fertilizer experiments, (26) 422, 426, 631, 830; (29) 829; (30) 820; (31) 829; (32) 819; (35) 428, 520; (36) 427; (38) 217, 517; (39) 421, 624, 728; (40) 218, 323, 624.
  - fertilizing value, (32) 321, 629; (33) 227; (35) 125.
  - field tests in Fiji, (40) 231.
  - green, analyses, (30) 565.
  - ground, analyses, (39) 167.
  - growth as affected by manganese, (30) 823.
  - growth on partially sterilized soils, (35) 515.
  - hogging down, (35) 672.
  - inoculation experiments, (37) 729; (40) 215.
  - insects affecting, (27) 155.
  - irrigation experiments, (40) 331.
  - liming experiments, (28) 624; (32) 132; (36) 229; (39) 421, 729; (40) 126.
  - New Era, selection experiments, (36) 230.
  - nitrogen assimilation by, (33) 426.
  - nitrogen distribution in, (36) 269.
  - nodule bacteria of, (32) 327.
  - notes, (26) 362; (28) 532.
  - nutritive value and use in the diet, (29) 864.
  - oil content, (27) 717.
  - origin, (29) 229.
  - perennial, analyses, (28) 463.
  - plowing under, (38) 816.
  - recipes, (38) 567.
  - rotation experiments, (40) 729, 829.
  - seed color variation in, (37) 334.
  - seedling experiments, (38) 32.
  - seedling with soy beans, (40) 829.
  - serpentine leaf miner affecting, (29) 857.
  - silage from, (39) 272.
  - varieties, (26) 631, 828; (27) 335; (28) 735; (29) 31; (30) 229, 525; (31) 37, 829; (32) 226, 527, 736; (33) 32, 33, 229; (34) 228; (35) 337; (37) 235, 329, 330, 331, 439, 635; (38) 334, 336, 632, 827, 829, 830, 832; (39) 337.
- varieties—
- catalogue of, (26) 635.
  - identification, (26) 635.
  - resistant to root knot, (27) 335.
  - variety tests, (39) 128, 434; (40) 32, 624, 729.
  - water requirement, (32) 127, 226.
  - wilting coefficient, (32) 335.
  - yields, (31) 226.
- Cowpox—
- compensal fixation in, (34) 877.
  - in horses, (38) 586.
- Cows—see also Calves, Cattle, and Heifers.
- advanced registry—
    - milk and fat production, (38) 377.
    - statistical weighting for age, (36) 272.
    - tests, (40) 773.
  - age as affecting production, (32) 575; (33) 97; (38) 176; (39) 381, 579.
  - age as affecting value, (35) 891.
  - age at first calving and milk production, (38) 74; (40) 178.
  - aged, milk and milk fat of, (38) 578.
  - alfalfa hay for, (30) 72.
  - alfalfa v. clover for, (39) 578.
  - apple pomace for, (26) 72.
  - artificial fecundation of, (33) 71.
  - as affected by—
    - alkali water, (30) 775.
    - cottonseed meal, (35) 871, 872.
    - environment and breeding, (35) 570.
    - extra care, (35) 873.
    - extracts of pituitary body and corpus luteum, (29) 578.

Cows—Continued.  
 as affected by—continued.  
   gestation and parturition, (28) 885.  
   overfeeding, (35) 774.  
   underfeeding, (36) 669.  
 assumption of male secondary characters by, (33) 369.  
 Ayrshire, relation between amount and composition of milk produced, (29) 876.  
 balanced rations for, (26) 774.  
 balanced v. unbalanced rations for, (28) 174.  
 barley for, (40) 878.  
 body weight and milk yield, relation, (32) 267.  
 bone growth, horn development, and performance in, (32) 266.  
 breeding for high production, (29) 375.  
 breeds and origin, textbook, (39) 881.  
 Brown Swiss, milk production, (30) 572.  
 cacti for, (31) 77; (33) 766.  
 calving, fall and spring, milk yield of, (31) 770, 771.  
 care and management, (29) 775, 876; (30) 678; (31) 272, 299; (36) 473.  
 chopped alfalfa v. bran for, (39) 783.  
 coconut meal for, (39) 676.  
 competition, (35) 674; (40) 375.  
 concentrated v. bulky rations for, (28) 174.  
 conformation and milk yield, (28) 878; (31) 76, 573; (33) 78; (34) 379.  
 conformation of, (26) 574.  
 correlation between form and function, (29) 473; (30) 271.  
 cost of feeding by breeds, (34) 181.  
 cost of raising, (30) 472; (32) 574; (34) 472, 671; (38) 679.  
 dairy breeds, (38) 376.  
 "dairy temperament," (39) 279.  
 difficult parturition in, (26) 381.  
 digestion experiments, (26) 475; (30) 774; (38) 73; (39) 75, 381.  
 dried yeast for, (33) 467.  
 economy of production, (38) 277.  
 effect of—  
   fatness on fat content of milk, (27) 280.  
   fetal growth on milk production, (29) 577.  
   work on milk yield and fat content, (30) 475.  
 efficiency table, (37) 775.  
 factors affecting development, (33) 274.  
 factors affecting growth and dairy qualities, (34) 378.  
 fattening, (33) 175.  
 feed rations for, (31) 77.  
 feed requirements, (27) 374.  
 feed unit system for, (28) 74.  
 feeding, (26) 273; (27) 877; (29) 276, 473, 575, 577; (32) 173; (33) 275, 673; (34) 269, 694; (35) 378, 674.  
 feeding experiments, (26) 170, 266, 267, 273, 369, 467, 468, 476, 673, 879; (27) 280, 374; (28) 174, 175, 265, 363, 371, 372, 872, 877, 878; (29) 172, 277, 373, 374, 475, 575, 576, 774, 775; (30) 175, 176, 177, 375, 573, 576, 773, 774, 874; (31) 77, 173, 673, 771; (32) 68, 74, 168, 258, 265, 266, 367, 470, 573, 666, 672, 773, 871; (33) 77, 170, 174, 381, 382, 575, 674, 765, 766, 872; (34) 180, 181, 182, 269, 471, 663, 670, 671, 773, 774, 873; (35) 174, 481, 562, 571, 673, 871, 872; (36) 75, 173, 174, 273, 374, 571, 669, 765, 772, 871, 872, 875; (37) 75, 169, 171, 372, 682, 683, 766, 872; (38) 66, 73, 168, 174, 277, 375, 477, 571, 678; 680, 681, 778, 876; (39) 73, 381, 482, 575, 782; (40) 573, 672.  
 feeding—  
   experiments in Denmark, (33) 174.  
   experiments, methods, (39) 380.  
   for milk production, (29) 577.  
   in summer, (30) 875.  
   in the South, (32) 574.  
   in winter, (30) 73.  
   standard for, (30) 774; (34) 670.  
 fish meal for, (29) 270; (35) 769.  
 floating ribs, (27) 175.  
 forage crops for, (37) 599.  
 genital organs and udder, bacterial flora, (39) 383.  
 gestation and sterility in, (39) 279.  
 gestation period, (28) 466; (33) 171.  
 giving abnormal milk, detection, (26) 87.  
 grain rations, (40) 574.  
 grapevines for, (31) 72.

Cows—Continued.  
 green alfalfa for, (39) 281.  
 Guernsey, history, (40) 179.  
 Guernsey, milk records, (40) 872.  
 Guernsey, records of, (32) 774.  
 handling, (32) 590.  
 heat period and milk production, (40) 878.  
 heating drinking water for, (28) 175.  
 height measurement, (33) 274.  
 high milk producing, notes, (34) 472.  
 high milk producing, records of, (26) 476.  
 high milk producing, sterility, (40) 374.  
 Holstein-Friesian—  
   official tests, (40) 773.  
   7-day tests, (40) 774.  
 home-grown v. purchased feeds for, (36) 872.  
 imported in New South Wales, (27) 277.  
 imported in Victoria, (36) 572.  
 in Japan, (28) 370.  
 in tick-infested regions, blood of, (26) 382.  
 in United States, (28) 390; (31) 73.  
 individuality, (26) 95.  
 inheritance of milking qualities in, (26) 169.  
 irrigated pastures for, (36) 173.  
 Jersey and Holstein, economy of production, (38) 277.  
 judging, (26) 597; (27) 375; (29) 577, 673; (36) 194, 473.  
 Kerry and Dexter, milk and fat records, (37) 172.  
 labor requirements, (36) 790.  
 large v. small for milk production, (34) 773.  
 leguminous feed for, (38) 681; (40) 374.  
 lime requirements, (31) 864.  
 maintenance requirements, (26) 475; (30) 773.  
 maintenance standard, (31) 673.  
 management on a small holding, (30) 90.  
 measurements, (28) 873.  
 metabolism experiments, (27) 775.  
 milk flow as affected by dipping, (35) 873.  
 milk production, *see* Milk production.  
 milk vein system in relation to production, (38) 476.  
 milking capacity, transmission, (32) 174.  
 milking tests, (27) 676; (29) 373, 375; (32) 75.  
 mineral metabolism, (35) 481; (36) 297; (37) 169; (38) 374, 779; (40) 373.  
 mortality tables, (27) 375.  
 newly lactating, detection, (31) 180.  
 normal flora of genitalia, (28) 885.  
 nutrients returned by, (38) 376.  
 oestral period as affecting production, (39) 882.  
 on general farms, (40) 574.  
 on Para grass pasture, (40) 366.  
 on pasture, concentrate feeding, (40) 877.  
 open shed v. closed stable for, (30) 676; (34) 181, 182; (35) 571; (38) 277; (40) 177.  
 osage oranges for, (36) 374.  
 outer milk signs, (27) 675.  
 parturition, diagnosing time of, (31) 876.  
 pasturing, (40) 575.  
 pasturing experiments, (37) 271; (38) 175; (39) 272, 474, 879; (40) 374.  
 pasturing v. stable feeding, (37) 574.  
 pine needles for, (28) 768.  
 poisoning with box elder, (37) 80.  
 protection from flies, (37) 260.  
 protein requirements, (31) 173; (38) 74; (40) 572.  
 pumpkins for, (38) 571.  
 rations for, (30) 169; (36) 374; (37) 195, 684.  
 records, *see* Dairy herd records.  
 refuse brewers' yeast for, (33) 568.  
 register-of-merit Jerseys, age factor in, (26) 166.  
 register of production in Wisconsin, (39) 784.  
 registration in Denmark, (30) 572.  
 relation between milk and fat yields, (27) 574.  
 resistance toward tubercle bacilli, (27) 383.  
 respiration experiments, (39) 676.  
 retained placenta, cause and treatment, (36) 675.  
 rice-blurley meal for, (32) 266.  
 rolled gran for, (39) 783.  
 rutting, studies, (26) 367; (27) 672.  
 salt requirement, (40) 775.  
 school lessons on, (32) 494.  
 score cards for, (28) 775; (37) 172.  
 selection by score card totals, (40) 872.  
 selection and feeding, (29) 577.  
 Shorthorn, cost of milk production, (39) 182.

- Cows—Continued.  
 silage crops for, (38) 174.  
 slop-fed, milk from, (26) 370.  
 soilage v. silage for, (27) 68; (30) 874; (34) 671.  
 sterility and abortion in, (32) 82.  
 sterility in, (30) 777; (37) 379.  
 succulent feed for, (26) 574.  
 sugar-beet tops for, (33) 169.  
 sunflower silage for, (38) 74; (39) 182.  
 sweet sorghum silage for, (39) 71.  
 testing, (27) 375; (32) 575; (36) 773; (38) 74.  
 testing in Argentina, (36) 673.  
 testing, rules for, (34) 75, 182.  
 tests of breeds, (30) 73.  
 tests, one-v. two-day, (31) 871, 872.  
 tests, 7-day v. yearly, (35) 481.  
 tuberculous—  
   eradication, (28) 675.  
   relation to human health, (29) 382.  
 udders, *see* Udder.  
 urinalysis, (28) 81.  
 utilization of protein and energy rations, (39) 75, 381.  
 vegetable-ivory meal for, (36) 368.  
 water requirements, (40) 774.  
 water supplies for, (35) 189.  
 watering, (38) 374, 680.  
 wild onion poisoning, (40) 577.  
 winter fodder for, (29) 577.  
 wintering experiments, (28) 266.  
 Wisconsin Register of Production, (40) 774.
- Coyote—  
 parasites, notes, (32) 185.  
 proof pastures for sheep, (26) 73.
- Coyotes—  
 combating, (39) 59.  
 host of spotted fever tick, (26) 64.  
 relation to Rocky Mountain spotted fever, (27) 479.  
 spreading disease among, (32) 480.

 varieties, (37) 142.  
 varieties—  
   for Missouri, (40) 341.  
   for Oregon, (39) 241.  
   in Oklahoma, (27) 241.  
   new, (39) 346.
- Crab grass—  
 as affected by soil acidity, (40) 125.  
 eradication, (27) 733.  
 notes, (26) 361.
- Crab louse, studies, (39) 764.
- Crab, tarabagani, composition, (40) 171.
- Crabs—  
 as host of lung distome, (35) 384, 681; (36) 577.  
 control, (39) 461.  
 creatin and creatinin content, (31) 760.  
 destruction of oysters by, (36) 853.
- Cracker waste, analyses, (35) 562; (39) 773.
- Crackers, examination, (27) 165.
- Crambid moths, trap lights for, (37) 259.
- Crambids—  
 new, from United States, (37) 564.  
 notes, (35) 659.
- Crambinae—  
 of North America, (40) 168.  
 of Nova Scotia, (40) 57.
- Crambus—  
 caliginosellus, notes, (28) 158.  
 caliginosellus, studies, (31) 253.  
 hemiochrellus, studies, (40) 168.  
 hortuellus—  
   notes, (28) 352, 854; (34) 756; (40) 753.  
   remedies, (26) 858; (30) 155.  
   studies, (38) 59.  
 luteolellus, notes, (34) 752; (36) 856.
- Cranberries—  
 acidity, (32) 110; (37) 714.
- Cranberries—Continued.  
 apparatus for investigating nutrition of, (26) 196.  
 as affected by copper fungicides, (28) 247.  
 benzoic acid in, (33) 15.  
 breeding experiments, (33) 637; (36) 443; (39) 749.  
 culture, (26) 841; (30) 643; (31) 742; (33) 736.  
 culture—  
   experiments, (28) 838; (30) 142; (31) 441, 740, 835; (33) 341, 342; (36) 43; (39) 47.  
   in Canada, (34) 240.  
   in Massachusetts, (36) 141.  
   in Wisconsin, (34) 42.  
 effect on composition of urine, (31) 761.  
 false blossom of, (31) 840; (36) 240.  
 fertilizer experiments, (26) 840; (28) 341; (30) 143; (31) 441, 741, 835; (32) 541; (33) 341; (34) 150, 834; (36) 44, 641; (37) 745; (39) 48, 748.  
 improvement, (31) 741; (35) 838.  
 insects affecting, (26) 840, 857; (28) 341, 352, 752, 854; (30) 154; (31) 752; (33) 351, 352; (35) 55; (36) 54; (37) 53; (38) 460; (39) 60; (40) 753.  
 irrigation, Skinner system, (28) 341.  
 liming experiments, (31) 442; (39) 48, 749.  
 pollination experiments, (26) 840, 858; (30) 143; (31) 741.  
 protection against frost, (26) 514; (31) 740; (33) 341; (36) 43.  
 root growth, (33) 341.  
 Scandinavian, desiccation, (32) 117.  
 seeds and seed oil of, (30) 803.  
 shipment, (39) 750.  
 spoilage, (39) 56.  
 spoilage after picking, (34) 252; (37) 745; (39) 749.  
 spraying experiments, (31) 741; (39) 55.  
 standard barrel for, (32) 499.  
 storage experiments, (30) 143; (36) 43; (39) 47, 749.  
 varieties, (28) 341.

- Cryptococcus—  
 anseris, description, (29) 83.  
 fagi in Nova Scotia, (30) 358.  
 farciminosus—  
 infection, association of bacteria in, (40) 680.  
 notes, (34) 480, 585.  
 studies, (39) 291, 789.  
 glutinis, isolation from cheese, (26) 479.  
 of Rivolta, notes, (28) 379.
- Cryptodiaspis n.g. and n.spp., descriptions, (27) 358.
- Cryptogamic—  
 flora of moor lands, (28) 727.  
 laboratory of Pavia, publications of, (31) 746.
- Cryptognatha flavescens, studies, (28) 754.
- Cryptogomus orbiculus, notes, (26) 149.
- Cryptolaemus moutrouzieri, notes, (28) 159; (29) 652.
- Cryptomeigenia—  
 aurifacies n.sp., description, (28) 657.  
 aurifacies, notes, (29) 52.  
 sp., notes, (29) 652.
- Cryptomeria japonica—  
 fertilizer experiments, (38) 624.  
 leaves, essential oil of, (34) 802.  
 red plague of, (35) 354.
- Cryptorhynchus—  
 batatae, *see* Euscèpes batatae.  
 lapathi—  
 notes, (26) 753; (28) 156; (36) 456; (38) 155, 358.  
 remedies, (34) 656.  
 studies, (31) 159; (37) 464.  
 mangiferae, notes, (27) 255; (32) 352.  
 n.sp. on cassava, (34) 65.  
 sp. affecting sugar cane, (34) 556.
- Cryptosiphum tahoense n.sp., description, (26) 859.
- Cryptosporella viticola, studies, (29) 450; (32) 52, 751.
- Cryptostemma calendulacea, description, (35) 642; (36) 639.
- Cryptothrips—  
 brevicollis n.sp., description, (35) 255.  
 citri n.sp., description, (40) 353.  
 floridensis n. sp., notes, (29) 354.  
 floridensis, notes, (30) 357; (31) 752, 849; (35) 852.
- Cryptus sp., parasitic on grapevine sphinx, (26) 250.
- Crystal Lake region, Michigan, ecology, (40) 226.
- Crystal violet, antiseptic value, (40) 285.
- Crystallization—  
 colloidal bags or containers in, (37) 409.  
 notes, (36) 804.
- Crystalloids—  
 effect on starch granules, (30) 111.  
 relation to soil fertility, (28) 814.
- Cryptoblabes gnidiella, notes, (32) 151.
- Ctenocephalus—  
 canis—  
 bionomics of, (31) 353.  
 distribution on rats, (29) 755.  
 relation to leishmaniasis, (36) 654.
- felis—  
 as host of Indian kala-azar parasite, (32) 61.  
 notes, (35) 260.  
 spp., notes, (26) 781.
- Ctenophora angustipennis, notes, (32) 651.
- Ctenosyllus musculi, distribution on rats, (29) 755.
- Ctenucha—  
 brunnea, notes, (35) 465.  
 virginica, notes, (29) 251.
- Cuban Experiment Station, notes, (38) 500.
- Cucasa—  
 fungicidal value, (26) 345.  
 tests, (28) 48.
- Cuckoo, new, from New Zealand, (40) 55.
- Cucujus sp., notes, (26) 453.
- Cucumber—  
 angular leaf spot, studies, (34) 442; (36) 249; (39) 853; (40) 250, 449.  
 anthracnose, dissemination, (37) 840.  
 anthracnose, studies, (35) 652; (39) 853; (40) 250.  
 bacterial rot, notes, (31) 747.  
 bacterial rot, studies, (30) 149, 648.  
 bacteriosis, studies, (35) 454, 546.  
 beetle—  
 belted, hibernation, (39) 868.  
 belted, remedies, (32) 557.  
 injurious to potatoes, (37) 157.  
 notes, (29) 652; (34) 656.  
 relation to cucumber wilt, (35) 546.  
 spotted, remedies, (38) 864.  
 striped, control, (37) 254; (39) 264.  
 striped, notes, (37) 261, 659; (39) 760.  
 twelve-spotted, notes, (36) 57, 859.  
 western 12-spotted, notes, (34) 857.  
 blossoms, beetle on, (40) 853.  
 canker, notes, (27) 353; (29) 847; (30) 148, 845.  
 collar rot, notes, (26) 446.  
 Corynespora leaf disease, notes, (30) 149, 450.  
 disease, new, description, (29) 242.  
 disease, studies, (31) 52.  
 diseases—  
 in Michigan, (38) 545.  
 in Sweden, (32) 641; (35) 750.  
 notes, (30) 647; (35) 246; (37) 653.  
 studies, (35) 544; (36) 248.  
 treatment, (28) 142; (39) 52.  
 downy mildew—  
 notes, (32) 342; (33) 146, 245.  
 studies, (38) 249.  
 first generation crosses, (38) 241.  
 flea-beetle, *see* Epitrix cucumeris.  
 fly, notes, (36) 654.  
 leaf blotch, notes, (26) 446.  
 leaf rust, treatment, (35) 546.  
 leaf scorch, notes, (37) 248.  
 leaf spot—  
 description and treatment, (29) 48.  
 dispersal and treatment, (26) 447
- leaf spots—  
 notes, (37) 840; (39) 52.  
 studies, (39) 355, 853.
- mildew, notes, (37) 453.
- mosaic—  
 notes, (36) 47; (37) 752.  
 studies, (36) 349, 350; (39) 853.  
 transmission, (36) 543.
- pickles, curing, (33) 17.  
 root knot, notes, (36) 349.  
 rust, notes, (35) 844.  
 scab, studies, (38) 449.  
 sclerotinia diseases, (40) 49.  
 seed, germination tests, (26) 44.  
 skins, analyses, (38) 626.  
 "white pickle," investigations, (36) 47, 344.  
 wild, seeds of, (38) 410.  
 wilt, notes, (29) 245.  
 wilt, notes and treatment, (28) 746.  
 worm, studies, (34) 855.
- Cucumbers—  
 calcium content, (39) 747.  
 carbon dioxide for, (31) 532.  
 culture, (26) 539; (29) 145; (36) 640.

- Cucumbers—Continued.  
 culture—  
 and preservation, (30) 640.  
 experiments, (37) 742.  
 in greenhouse, (37) 41; (40) 147.  
 fertilizer experiments, (36) 839; (37) 41, 742; (39) 745, 843.  
 fungus disease affecting, (26) 244.  
 Fusarium disease affecting, (26) 54.  
 greenhouse, red spider on, (39) 65.  
 growth in—  
 partially sterilized soils, (26) 815.  
 sterilized soils, (31) 336.  
 varying light and soil moisture conditions, (30) 142.  
 insects affecting, (31) 248.  
 lightning injury, (40) 645.  
 liming experiments, (39) 745.  
 mulching v. clean culture, (33) 534.  
 pickling (28) 616.  
 preservation, (35) 367.  
 seed treatment, (40) 450.  
 spraying, (39) 345.  
 water requirement, (32) 127.
- Cucumis—  
 prophetarum, analyses and digestibility, (27) 871; (32) 167.  
 sativus, root system of, (28) 228.
- Cucurbit—  
 anthracnose, studies, (35) 652; (40) 250.  
 bacterial wilt, notes, (37) 150.  
 bacterial wilt, studies, (34) 244; (35) 546.  
 diseases, notes, (39) 353.  
 mosaic diseases, (39) 853.  
 wilt, studies, (27) 45.
- Cucurbita—  
 maxima, root system of, (28) 228.  
 melanosperma, carotinoid content, (31) 803.
- Cucurbitacea acanthosicyos horrida, description, (20) 60.
- Cucurbitaria pithyophila, studies, (37) 353.
- Cucurbits—  
 forcing with radium, (28) 825.  
 parthenogenesis in, (38) 331.
- Culex—*see also* Mosquitoes.  
 breeding in rice fields, (40) 857.  
 brehmei n.sp., description, (36) 359.
- Pipiens—  
 as affected by Roentgen rays, (28) 57.  
 as host of Crithidia fasciculata, (30) 757.  
 control in England, (26) 860.  
 destruction of larvae, (26) 559.  
 migration, (37) 664.  
 notes, (28) 355.  
 outbreak in Connecticut, (31) 455.  
 relation to temperature, (33) 860.
- quinquefasciatus (fatigans)—  
 as dengue fever carrier, (39) 263.  
 notes, (35) 258.  
 range in United States, (36) 657.  
 studies, (29) 252.
- spp., control, (27) 559.  
 spp. in Bahamas, (34) 553.  
 spp., notes, (28) 158, 254.  
 spp., transmission of poliomyelitis by, (28) 753.
- Culicella vigilax, notes, (35) 258.
- Culicidae—*see also* Mosquitoes.  
 of Saskatchewan, (39) 661.
- Culicoides—  
 kiefferi n.sp., notes, (30) 551.  
 sp., destructive to mosquitoes, (26) 559.
- Cultivation—  
 animal v. motor power, (37) 591.  
 effect on—  
 composition of soils, (29) 416, 417.  
 swamp soils, (30) 120.  
 water economy of light sandy soil, (33) 287.
- factors in, (31) 215.  
 handbook, (29) 329.  
 mechanical—  
 in Europe, (32) 485; (37) 490.  
 in France, (31) 187; (33) 790.  
 in Germany, treatise, (30) 191.  
 treatise, (30) 191.  
 motor, handbook, (31) 488.  
 ridge method, treatise, (28) 632.
- Cultivator—  
 motor, description, (27) 293; (28) 84.  
 spring-shovel, description, (27) 293.
- Cultivators—  
 mechanical, tests, (31) 188, 487; (35) 87, 890; (36) 189.  
 rotating, notes, (31) 188.  
 tests, (29) 186.
- Culture—  
 media—*see also* Nutrient media.  
 amino acid content, (40) 201.  
 bacteriologic, (39) 9, 583, 668, 888.  
 bouillon, new, (40) 180.  
 bouillon, studies, (40) 310.  
 for counting colon-aerogenes organisms, (40) 381.  
 counting soil bacteria, (32) 625.  
 pathogenic anaerobes, (40) 677.  
 soil organisms, (40) 739.  
 streptococci, (40) 180, 881.  
 vaccine organisms, (40) 677.  
 water examination, (35) 591.  
 from blood, (37) 220.  
 from sheep or ox serum, (36) 575.  
 from whole blood, (36) 676.  
 hydrogen-ion concentration in, (34) 136.  
 improvement, (38) 710.  
 physiological balance in, (36) 328.  
 pipette for tubing, (40) 12.  
 preparation, (40) 408.  
 reactions, notes, (40) 805.  
 relation to production of hemolysin, (26) 481.  
 synthetic, studies, (36) 524.  
 tests, (38) 684.  
 methods for anaerobic organisms, (39) 887.  
 solutions, aerating, (36) 524.  
 solutions, studies, (38) 730.  
 studies, bacteriologic, methods, (39) 9, 828.  
 volumeter, anaerobic, (39) 713.
- Cultures—  
 bacterial, system of notes, (40) 881.  
 dried, preparation, (31) 773.  
 mass, on solid media, (40) 805.
- Culvert—  
 pipe, corrugated, tests, (35) 580.
- slabs, reinforced concrete, tests, (33) 487.
- Culverts—  
 concrete—  
 plans, (38) 189.  
 specifications, (32) 485, 686, 884.  
 v. cast-iron, for roads, (37) 885.  
 construction, (26) 890; (27) 190, 292; (33) 291, 588, 688, 782.  
 construction and maintenance, (26) 385.  
 corrugated metal, specifications, (27) 190.  
 corrugated metal, tests, (37) 288.  
 designing, (28) 684.  
 for country roads, (28) 485.  
 inspection and maintenance, (36) 386.  
 plans and specifications, (28) 289.  
 standards for, (31) 890.
- Cumbu, culture experiments, (31) 733; (38) 433.
- Cumulus—  
 clouds, violent uprushes in, (29) 120.  
 over a fire, (34) 413.
- Cunila mariana, ice fringes on, (30) 221.
- Cunninghamella bertholletiae n.sp., studies, (28) 646.
- Cuorin—  
 in horse kidneys, (30) 477.  
 ox heart, fatty acids of, (31) 608.
- Cuprammonium washes, studies, (38) 255.
- Cupressus—  
 lawsoniana, damaged by squirrels, (26) 552.  
 macrocarpa, structure of wood, (28) 843.
- Cupri sulphas, nature and use, (26) 880.
- Cuproform, use against grain smuts, (27) 445.
- Cuprous oxid, determination in Fehling's solution, (34) 611.
- Curb, concrete caisson, for shallow wells, (29) 484; (32) 586.
- Curelin, toxicity, (31) 775.
- Curculionidae—  
 in bamboo stems, (32) 352; (33) 658; (37) 359  
 in beet plantations in Kief, (31) 655.  
 new neotropical, (37) 765.  
 of British India, (37) 765.  
 of North America, (27) 259.
- Curd—*see also* Cheese making.  
 Don, bacterial content, (26) 779.  
 knife for cheese, (31) 875.

- Curlew—  
 bug, control, (40) 655.  
 bug, investigations, (27) 162.  
 subspecies, notes, (39) 654.
- Curran—  
 anthracnose, investigations, (33) 347.  
 anthracnose, notes and treatment, (28) 748.
- aphis—  
 alternate hosts, (39) 464.  
 migratory habits, (37) 562.  
 northern, notes, (30) 53.  
 notes, (27) 758; (37) 358.  
 studies, (31) 157.
- borer in Tasmania, (38) 261.  
 borer, notes, (40) 753.
- cane necrosis, treatment, (28) 748.
- clearwing moth, *see* Curran borer.
- dieback, notes, (37) 251.  
 diseases, notes, (30) 147; (39) 652.  
 diseases, studies, (32) 441.
- felt rust, notes and treatment, (29) 249.
- fly, yellow, life history and habits, (28) 255.
- fruit fly—  
 dark, in California, (37) 566.  
 life history and habits, (28) 255.  
 notes, (35) 466; (40) 56, 169.  
 remedies, (31) 757.  
 studies, (38) 466.
- fruit weevil—  
 attacking blueberries, (34) 852.  
 notes, (31) 351.
- gooseberry hybrid, description, (31) 236.
- industry in Ontario, (31) 142.
- juice, composition as affected by fertilizers, (29) 838.
- juice, preparation, (33) 316.
- leaf—  
 diseases, treatment, (34) 747.  
 fall, notes, (30) 246.  
 spot, notes, (26) 446, 850; (40) 154.  
 spot, studies, (38) 546.
- maggot, notes, (29) 158.
- mildew, notes, (34) 648.
- mite, notes, (31) 853, 854.
- oidium, notes, (30) 448.
- pollen, germination, (35) 731.
- pollen, viability, (32) 534.
- root rot, studies, (38) 650.
- rust, notes, (30) 448; (32) 241.  
 rust, treatment, (31) 346.
- sap as affected by Bordeaux mixture, (30) 647.
- seeds, oil and press cake from, (40) 803.
- Septoria leaf spot, investigations, (33) 347.
- twig borer or budworm, notes, (36) 754.
- wine, preparation, (27) 412.
- worm, imported, notes, (33) 659.
- worm, notes, (37) 599.
- Currants—  
 acidity, (32) 110; (37) 714.  
 Alpine, as a hedge plant, (37) 241.
- black—  
 abnormal blossoms, (38) 552.  
 nematodes affecting, (37) 843.  
 pine rust of, (29) 547.  
 reversion, (38) 650; (39) 646.
- breeding experiments, (32) 535; (33) 637; (39) 346.
- culture, (31) 142, 441; (34) 42.
- culture—  
 and marketing, (38) 844.  
 experiments, (28) 436; (32) 540.  
 in California, (38) 346.  
 in western Washington, (38) 298.
- destruction by *Cronartium ribicola*, (29) 649.
- dried, analyses, (30) 861.
- drying, (37) 114, 509.
- fertilizer experiments, (36) 121; (38) 540.  
 for home and commercial planting, (33) 337.
- insects affecting, (28) 352; (38) 843.
- Lübeck, partial sterility in, (31) 225.
- new, descriptions, (29) 838; (31) 337.  
 of Germany, (33) 838.
- overwintering of pine rust on, (31) 54.  
 preservation by freezing, (39) 344.
- red, as affected by tarring roads, (26) 432.
- red, gooseberry mildew affecting, (26) 344.
- red, history and development, (37) 833.
- relation to white pine blister rust, (30) 152.
- resistance to pine blister rust, (38) 151.
- spray schedules, (39) 39.
- Currants—Continued.  
 sprayed, arsenic on, (38) 55.  
 spraying experiments, (27) 439.  
 transplanting experiments, (35) 37.  
 varieties, (28) 542; (32) 538; (37) 243.  
 varieties, classification, (39) 541.  
 varieties for New York, (26) 239.  
 variety tests, (32) 141; (40) 340.  
 wild, aphids affecting, (27) 758.
- Current meter—  
 gaging stations, equipment for, (34) 84.  
 measurements, accuracy of, (30) 855.
- Current meters—  
 cup, tests, (31) 288.  
 rating, (30) 386; (31) 587, 888.  
 use in irrigation canals, (34) 281.
- Curriculum, change of stress in, (36) 393.
- Currying machines for horses and cattle, (27) 90.
- Cuscuta—*see also* Dodder.  
 americana, notes, (37) 452.  
 destruction, (31) 835.  
 epillum, vitality of seed, (27) 841.  
 host relationships, (35) 460.  
 seeds, determination, (33) 533.  
 sp., notes, (28) 52; (37) 755.  
 spp., destruction by chemicals, (27) 28.  
 spp., germination, (27) 342; (34) 155.  
 spp., investigations, (28) 545.
- trifolii, destruction by calcium cyanamid, (26) 44.
- Custard apples—  
 as stock for cherimoya and atemoya, (32) 143.  
 insects affecting, (27) 453.  
 of the Aztecs, (26) 743.  
 propagation, (27) 537.
- Cuterebra—  
 cuniculi, reproductive and host habits, (34) 358.  
 fontinella, egg and ovipositor of, (35) 756.  
 n.spp., descriptions, (40) 458.
- Cut-over land—  
 clearing, (26) 787; (39) 687; (40) 788.  
 fertility indication, (39) 115.  
 in Adirondacks, (40) 841.  
 south Mississippi, (28) 215.  
 the South, (38) 391.  
 the South, live stock on, (39) 268.  
 pasture and forage crops for, (39) 230.  
 re-afforesting, (40) 248.  
 utilization, (40) 91.
- Cutthroat grass in Florida, (40) 137.
- Cuttings—  
 hardwood, propagation by, (40) 340.  
 stimulation of root growth, (39) 826.
- Cutworm—  
 army—  
 control, (33) 654.  
 in southern Alberta, (36) 456.  
 life history, (35) 854.  
 notes, (35) 758, 853; (37) 255.  
 baits, tests, (34) 358; (39) 361.
- black—  
 biology, (40) 167.  
 notes, (27) 53, 659; (28) 455; (34) 250.  
 remedies, (36) 254.  
 moths, trap for, (31) 851.  
 olive green, notes, (32) 651.  
 variegated, notes, (26) 452; (27) 659; (29) 252;  
 (32) 651; (33) 252, 352; (35) 253.  
 variegated, remedies, (36) 56.  
 variegated, trap for, (31) 851.
- Cutworms—  
 control, (27) 136; (32) 246; (39) 158.  
 control in greenhouses, (38) 762.  
 fungus parasite of, (36) 757.  
 in Hawaii, (34) 59.  
 in Louisiana, (40) 58.
- injurious to—  
 alfalfa, (29) 158; (36) 53.  
 grain in western Canada, (31) 352.  
 potatoes, (37) 157.  
 strawberries, (32) 556.  
 tobacco, (28) 555; (29) 756; (34) 453.
- life history and remedies, (38) 54.  
 notes, (27) 659, 755; (28) 351, 653, 654, 752, 854;  
 (29) 252, 652, 653, 759; (30) 140, 454, 753; (31)  
 155, 848; (32) 349, 448; 753; (33) 652, 746; (34)  
 251, 360; (35) 360, 465; (37) 195.  
 studies, (26) 453.

- Cyamopsis**—  
 psoralioides, analyses, (38) 572.  
 psoralioides, notes, (26) 362.  
 tetragonoloba, culture in New South Wales, (26) 835.
- Cyanamid**—  
 action as affected by iron oxid, (28) 33.  
 ammonification of, (33) 219.  
 as source of nitrogen, (38) 220.  
 decomposition in soil, (40) 724.  
 decomposition, seasonal variation, (32) 514.  
 determination, (33) 110.  
 determination in fertilizers, (26) 804.  
 fertilizing value, (27) 724.  
 for corn, (31) 831.  
 handbook, (29) 518.  
 in fertilizer mixtures, (33) 624.  
 industry, (31) 323; (36) 124.  
 injurious to fish, (29) 821.  
 manufacture, (27) 623; (30) 721.  
 manufacture and use, (27) 520; (29) 24.  
 nitrogen, fertilizing value, (39) 726.  
 paper on, (29) 517.  
 preparation, (38) 711.  
 process, development and status, (33) 424.  
 studies, (29) 127.  
 use on moor soils, (39) 438.  
 works at Niagara Falls, (32) 622.
- Cyanid**—  
 as affected by salt, (26) 206.  
 detection in water, (34) 410.  
 effect on—  
 locust borer and locust tree, (34) 757.  
 oxidation in arsenical dips, (38) 585.  
 plants, (32) 846.  
 scale-insect eggs, (32) 245.  
 fumigation—  
 effect on bud formation, (34) 143.  
 of ships, (33) 556.  
 gas as cause of fruit pitting, (37) 634.  
 gas, use against insects, (36) 456.
- Cyanin**, studies, (34) 709.
- Cyanogen**—  
 determination, (28) 310.  
 formation in plants, (28) 527.  
 in grasses, (33) 665.
- Cyanogenesis**—  
 review of investigations, (29) 713.  
 under digestive conditions, (30) 682.
- Cyanophyceae**—  
 as affected by copper sulphate, (39) 27.  
 distribution in soils, (34) 513.  
 studies, (27) 780.
- Cyanopterus** (Iphiaulax) clypeolus n.g. and n.sp., description, (26) 352.
- Cyanuric acid**—  
 assimilation by plants, (27) 32.  
 distribution in soils, (38) 202.  
 identity with "tetra-carbonimid," (38) 202.  
 isolation from soils, (37) 612.
- Cyathea medullaris**, slime disease of, (27) 51.
- Cyathula hereroensis**, analyses and digestibility, (27) 871; (32) 167.
- Cybocephalus nigriritulus**, notes, (28) 754.
- Cyclamen mite**, see Tarsonemus pallidus.
- Cyclocephala villosa**—  
 life history, (38) 863.  
 notes, (29) 252.
- Cyclocoenium oleaginum**—  
 biology of, (30) 246.  
 description, (27) 850.
- Cyclohexane**—  
 effect on soil microorganisms, (31) 27.  
 sterilization of soils by, (32) 816.
- Cyclone insurance**, mutual, in Illinois, (36) 791.
- Cycloneda** (Neda) sanguinea, notes, (33) 860.
- Cyclones**—  
 in perspective, (36) 419.  
 in United States, (33) 807.  
 mechanism of, (35) 619.  
 nature, (32) 810.  
 relation to sunspots, (27) 718; (40) 416.
- Cyclonic precipitation**, distribution, (35) 419.
- Cyclorella** as affected by copper sulphate, (39) 27.
- Cyanoches**, flowers of, (35) 431.
- Cydia**—  
 (Grapholita) funebrana, bionomics and remedies, (33) 155.  
 pomonella, see Codling moth.
- Cydonia**—  
 japonica, inoculation experiments with brown rot fungus, (33) 247.  
 lusitanica, Monilia affecting, (28) 241.  
 veitchii, description, (35) 743.
- Cylas**—  
 formicarius—see also Sweet potato weevil.  
 notes, (28) 158; (34) 65; (37) 256; (38) 467, 564, 864; (40) 259, 260.  
 preventing introduction, (39) 159.  
 studies, (40) 357.  
 spp. attacking sweet potatoes, (38) 864.
- Cylichlostomum**—  
 mettami n.sp., notes, (29) 889.  
 n.sp., descriptions, (37) 280; (39) 686.  
 notes, (40) 586.  
 spp., anatomy and biology, (28) 887.
- Cylicostomiasis** in equines, (36) 779.
- Cylindrocladium**—  
 parvum n.sp., description, (39) 858.  
 scoparium, control, (40) 751.  
 scoparium, studies, (38) 854; (39) 858.
- Cylindrosporium**—  
 dioscoreae n.sp., description, (38) 446.  
 juglandis, n.sp., description, (32) 150.  
 mori, studies, (36) 751.  
 on Prunus avium, perfect stage, (29) 349.  
 on stone fruits, studies, (31) 544.  
 padi, description and treatment, (30) 849.  
 padi, notes, (39) 546.  
 pollacci n.sp., description, (35) 354.  
 pomi as affected by cold, (34) 538.  
 pomi, notes, (27) 652; (29) 547; (32) 749.  
 sp., notes, (27) 649.  
 spp., notes, (27) 341.  
 spp., studies, (30) 750.  
 vaccarianum n.sp., notes, (37) 630.  
 yuccae n.sp., description, (37) 550.
- Cylindrotoma splendens**, life history, (40) 169.
- Cyllene**—  
 picta, see Hickory borer.  
 robiniae, notes, (26) 856; (28) 156; (33) 253; (37) 566; (38) 459.  
 robiniae, remedies, (34) 757.  
 robiniae, studies, (35) 355, 552.
- Cylophorus rubrosignatus** n.sp., description, (33) 159.
- Cymatodera aethiops**, notes, (38) 61.
- Cymatophora sulphurea**—  
 parasites of, (31) 752.  
 studies, (36) 54.
- Cymbopogon**—  
 citratus, culture, (36) 538.  
 martini, economic uses, (35) 807.
- Cymodosopsis aristoteliae** n.sp., description, (30) 60.
- Cynipidae**—  
 gall-making, of California, (27) 264.  
 gall-making, of North America, (33) 857.  
 of North America, (26) 759.
- Cynipoidea**, type species, (38) 63; (40) 862.
- Cynips calicis**, notes, (38) 654.
- Cynodon**—  
 dactylon—  
 analyses, (31) 863.  
 analyses and digestibility, (27) 871; (32) 167.  
 as lawn grass, (32) 828.  
 for shifting soils, (37) 333; (39) 441.  
 notes, (26) 361; (28) 534.  
 plecto stachyum—  
 analyses, (36) 334.  
 studies, (38) 66.  
 undescribed species, (39) 231.
- Cynomolgus philippinensis**, notes, (28) 180.
- Cynomyia cadaverina**, hibernation, (38) 262.
- Cynomys**—  
 ludovicianus, control, (34) 57.  
 spp., in Colorado, (28) 652.  
 spp., systematic account, (35) 551.
- Cyperus**—  
 alopecuroides as reclamation crop, (30) 234.  
 edulis, notes, (29) 362.  
 esculentus as duck food, (30) 545.  
 esculentus, description, (29) 59.  
 rotundus, eradication, (40) 823.  
 spp., host of corn billbug, (26) 862.  
 spp., host of curlew bug, (27) 162.  
 usitatus, analyses and digestibility, (27) 871; (32) 167.
- Cyphella heveae**, notes, (38) 52, 759.

- Cypress—  
 Alaska, biennial fructification, (29) 543.  
 of Rocky Mountain region, (33) 343.  
 pecky condition of, (31) 349.  
 southern, (34) 46.  
 treatise, (33) 49.  
 twig tuberculosis, notes, (29) 651.  
 young, water requirements and growth, (35) 747.
- Cyrtidae of North America, (40) 757.
- Cyrtogaster—  
 glasgowi n.sp., description, (32) 557.  
 javensis n.sp., description, (37) 607.
- Cyrtolobus sp., notes, (26) 148.
- Cyrtoneura stabulans, notes, (35) 659.
- Cyrtospermum, culture and analyses, (32) 37.
- Cyrtotrachelus longipes, life history, (31) 61.
- Cyrtocirci in American sheep, reindeer, and cattle, (27) 182.
- Cyrtocercus—  
 bovis, destruction by freezing, (32) 880.  
 cellulosa, hosts of, (29) 586.  
 n.sp., affecting sheep, (28) 681.  
 ovis, investigations, (29) 886.  
 pisiformis in kittens, (37) 693.  
 spp., notes, (28) 681.
- Cystin—  
 addition to low-protein diet, (38) 570.  
 and tyrosin, separation, (31) 807.  
 determination in proteins, (26) 22.  
 effect on growth, (35) 269.  
 nutritive value, (38) 569.
- Cystitis, hemorrhagic in cattle, (26) 881.
- Cystoadenoma in a fowl, (36) 676.
- Cystospora oleae, life history, (28) 153.
- Cystopus—  
 candidus—  
 notes, (29) 245; (34) 750.  
 on white mustard, (32) 544.  
 spore germination and infection in, (26) 342.  
 ipomoeae panduranae—  
 notes, (31) 447.  
 studies, (34) 156.  
 on cruciferous plants, (26) 342.  
 sp. on sweet potatoes, (37) 452.  
 spp., oospore parasite of, (31) 641.
- Cystospora batata—  
 n.g. and n.sp., description, (36) 544.  
 studies, (39) 456.
- Cyta brevipalpa, notes, (27) 861.
- Cytase, excretion by *Penicillium pinophilum*, (28) 803.
- Cytisus—  
 adami, description, (27) 31.  
 adami, graft hybrids of, (33) 429.  
 adami, oxidases, (27) 733.  
 notes, (40) 844.  
 proliferus, culture in Hawaii, (32) 730.  
 scorpius, notes, (29) 441.  
 spp., anatomical structure of wood, (26) 827.
- Cytoplasma castaneae, notes, (36) 752.
- Cytophthorus nudus in fowls in South Africa, (35) 678.
- Cytology—  
 index catalogue, (32) 166.  
 methods and value, (38) 328.  
 progress in, (26) 876.  
 relation to study of genetics, (26) 672.  
 treatise, (26) 876.
- Cytoplasm—  
 fixation, (38) 329.  
 rôle in heredity, (29) 66.
- Cytorhynchus—  
 aphtharum, studies, (27) 379; (28) 376.  
 cocci, detection, (26) 682.  
 cocci, relation to foot-and-mouth disease, (31) 282.
- Cytospora—  
 chrysosperma, studies, (39) 357.  
 leucostoma—  
 affecting cherries, (30) 353.  
 notes, (31) 539.  
 studies, (37) 554; (39) 149.  
 on sugar cane, (40) 844.  
 sacchari, notes, (35) 749; (37) 553; (40) 157.  
 sacchari, studies, (38) 851.  
 sp., notes, (28) 750.  
 spp., inoculation experiments, (27) 651.
- Cytospora—Continued.  
 spp. on plums, (34) 648.  
 stictostoma and *Phoma asparagi*, relation, (38) 752.
- Cytosporina septospora n.sp., description, (26) 852.
- Cyttaria darwinii, notes, (27) 51.
- Dacnusa n.sp., descriptions, (29) 359.
- Dactylis glomerata, see Orchard grass.
- Dactyloctenium aegyptiacum—  
 analysis, (36) 334.  
 analyses and digestibility, (32) 167.  
 notes, (26) 361.  
 studies, (38) 66.
- Dactylomyces spp., in Norway, (31) 327.
- Dactylopiinae of Hawaii, (36) 551.
- Dactylopius—  
 calceolariae—see also Mealy bugs.  
 fungus disease affecting, (26) 553.  
 confusus, notes, (28) 451.  
 perniciosus—  
 injurious to cotton, (27) 454.  
 notes, (30) 549.  
 spp. on sugar cane, (40) 57.  
 vitis, notes, (26) 655; (36) 755.
- Dacus  
 cucurbitae—  
 life history, (32) 452.  
 studies, (33) 562; (37) 566.  
 ferrugineous, notes, (27) 359; (29) 453.  
 oleae—  
 danger of introduction, (39) 467.  
 notes, (27) 357, 857; (32) 56.  
 remedies, (35) 57.  
 spp. as affected by oil of citronella, (28) 455.  
 spp. in Africa, (31) 456.  
 spp. in India, Burma, and Ceylon, (37) 160.  
 spp., notes, (30) 552; (35) 259.  
 spp., remedies, (31) 757.  
 tryoni, control, (40) 356.  
 tryoni, notes, (27) 857.  
 vertebratus, notes, (36) 654.
- Daedalea unicolor—  
 fruit bodies of, vitality, (30) 350.  
 in northern France, (31) 547.  
 injurious to maples, (26) 752.
- Daffodil—  
 bulb mite, notes, (27) 457.  
 bulbs, food poisoning caused by, (35) 556.  
 fly, life history, (32) 350.
- Daffodils—  
 certificated by Royal Horticultural Society, (31) 340.  
 classification, (31) 837.  
 improvement, (37) 836.  
 manual, (32) 143.  
 treatise, (34) 741.
- Dahi, analyses, (27) 268.
- Dahlia—  
 Botrytis disease, notes, (30) 151.  
 diseases, notes, (31) 343.  
 inulin coagulating substance in, (36) 127.  
 phylloidy of corolla in, (34) 143.  
 storage rot, notes, (30) 349.  
 tubers, transformation of reserve substance in, (27) 525.  
 variabilis, betains in, (27) 203.  
 Verticillium wilt, studies, (33) 244.
- Dahlias—  
 and their culture, (35) 41; (40) 541.  
 bud variation, (40) 447.  
 cut, preservation, (31) 837.  
 notes, (29) 341.  
 stunted growth of, (28) 345.  
 treatise, (29) 441; (36) 743.  
 varieties, (31) 340; (33) 540.
- Dalkons, culture, (34) 41.
- Daincha as green manure, (37) 824; (38) 220, 336.
- Dalpreps abbreviatus, remedies, (26) 552.
- Dairies—  
 cooperative—  
 in Denmark, (27) 590.  
 in Netherlands, (28) 669.  
 in United Kingdom, (27) 794.  
 disinfection, (26) 478.  
 farm, plans, (38) 292.  
 hot water for, (28) 892.  
 letting, in England, (27) 676.

## Dairies—Continued.

steam and electricity in, (27) 690.  
steam pipes in, (29) 893.

## Dairy—

apparatus—*see also* Cream separators, Creamery equipment, Churns, etc.  
notes, (27) 792; (34) 571.  
tests, (27) 676; (28) 372; (36) 571.  
arithmetic, courses in, (35) 195.  
association, cooperative, in Missouri, (27) 591.  
bacteriological laboratory at Dorpat, report, (28) 178.

## bacteriology—

at Berne Congress, (34) 76.  
handbook, (27) 74.  
investigations, (27) 376.  
outline, (38) 781.  
treatise, (30) 378, 677; (32) 577.

barn—*see also* Cow barn.

at Kentucky Station, (31) 893.  
at McNeill substation, (28) 274.  
at University of Missouri, (27) 792.  
description, (32) 589; (35) 499.

## barns—

as factor in sanitary milk production, (37) 684.  
construction, (34) 789; (35) 495; (36) 91, 190; (37) 696, 872.  
evolution in, (28) 371.  
for prairie farms, (35) 689.  
plans, (28) 371; (32) 470; (34) 487.  
plans and specifications, (33) 783.  
remodeling, (28) 787.  
sanitary, lecture on, (26) 188.  
sanitary mangers for, (33) 489.  
ventilation, (29) 474.

## building—

at U. S. Naval Academy farm, (36) 590.  
construction and equipment, (31) 892.  
notes, (29) 876.  
plans, (37) 90.

## by-products—

for pigs, (39) 375.  
pasteurization, (34) 673.  
utilization, (27) 97.

cattle, *see* Cattle, Cows, etc.

chemistry, progress in, (26) 315; (37) 373.  
chemistry, treatise, (32) 501.  
competitions in Denmark, (28) 775.  
competitions in Wisconsin, (28) 74, 272.  
conveniences, (32) 590.  
convention in Washington, (35) 98, 275.  
education in Great Britain, (37) 893.  
education in United States, (37) 893.  
efficiency table, (37) 775.  
experimental work in Pennsylvania, (34) 498.  
exports from Denmark, (30) 91.  
extension work in Nevada, (36) 95.  
factories, distribution in Wisconsin, (27) 74.

## farm—

cost accounting, (40) 375.  
in Wisconsin, notes, (28) 790.  
modern, description, (28) 176.  
plant, construction, (37) 591.  
score card, (40) 476.  
small, developing, (34) 494.

## farmers—

business methods for, (30) 678.  
cooperation among, (26) 92.

## farming—

crop rotation in, (40) 375.  
factors of success in, (32) 89.  
for small farmers, book on, (40) 590.  
in Arizona, (39) 295.  
blue-grass region of Kentucky, (37) 873.  
Finland, (27) 877.  
Kentucky, (40) 78.  
Mississippi, (39) 482.  
Monmouth Co., New Jersey, (39) 293.  
New Hampshire, (29) 391.  
Sussex Co., New Jersey, (40) 473.  
the Ozarks, (26) 273.  
lessons on, (28) 393.  
meaning of, (33) 97.  
notes, (32) 870; (36) 195.  
papers on, (40) 299.  
profitable systems, (28) 395.  
profits from, (26) 273.  
ready alternative use of crops in, (39) 593.  
relation to soil fertility, (27) 280.

## Dairy—Continued.

## farming—continued.

relation to tenancy, (26) 687.  
textbook, (37) 94, 172.  
treatise, (26) 78, 574.

## farms—

bookkeeping for, (26) 774.  
capital, income, and expenses, (28) 894.  
cropping systems for, (36) 498.  
feed unit system for, (27) 374.  
ice for, (32) 591.

## farms, inspection—

in Idaho, (30) 178.  
in Virginia, (30) 74, 377.  
score-card system for, (33) 576.

## farms—

management, (30) 391.  
management in the Tyrol, (27) 377.  
sanitary control, (36) 774.  
share-rented, in Wisconsin and Illinois, (38) 877.

water supplies for, (29) 722.

## glassware, inspection, (39) 782.

## glassware, testing, (27) 473.

## herd improvement, (29) 775; (30) 678.

herd records, (26) 79; (27) 73, 283, 375, 676, 776, 877; (28) 74, 175, 176, 371, 472, 673, 775, 796; (29) 70, 272, 278, 375, 475, 577, 876; (30) 177, 271, 375, 377, 572; (31) 174; (32) 267, 470, 573, 774; (33) 96, 275, 765; (34) 181, 182, 269, 472, 774; (36) 673, 872, 873; (37) 574, 684; (38) 74, 176; (39) 483, 782; (40) 375.

## herd records—

analyses, (40) 872.  
illustrated lecture on, (38) 95.  
in New South Wales, (27) 277.  
methods of obtaining, (28) 276.  
value, (29) 71; (32) 399; (36) 76.

## herds—

accredited, papers on, (38) 179.  
care and management, (31) 272; (32) 870; (38) 278.  
cooperative testing, (27) 899.  
economy in relation to size, (38) 777.  
eradication of tuberculosis from, (28) 675.  
feed and production records of, (31) 793.  
improvement, (37) 271; (38) 877; (39) 882.  
management, (31) 394; (38) 578, 777; (39) 678.  
on general farms, (40) 574.  
testing and grading, (29) 280.

## houses—

construction, (35) 791.  
construction and equipment, (27) 486.  
plans, (27) 190; (33) 892; (38) 480.

## husbandry, bibliography, (28) 492.

husbandry instruction, development of, (33) 493.

## inspection—

and sanitation, (38) 781.  
catalase and reductase test in, (27) 781.  
common sense in, (36) 474.  
discussion, (33) 701.  
fermentation test in, (28) 279.

varieties for southern Arizona, (27) 539.
- Datura—  
breeding experiments, (36) 838; (37) 546.  
electroculture experiments, (30) 430.  
for classroom work in genetics, (37) 831.  
inheritance studies, (39) 747.  
origin of alkaloids in, (27) 228.  
spp., breeding experiments, (30) 631.  
stramonium—  
agglutinating properties, (31) 774.  
inheritance studies, (40) 131.  
notes, (30) 145.
- Daucus carota, carotinoid content, (31) 803.
- Davainea—  
cesticillus, life history, (40) 359.  
n.spp., descriptions, (33) 775.  
n.spp., in fowls, (34) 281.  
spp., intermediate host, (35) 578, 683.
- Daviesia latifolia, constituents of leaves and stems, (32) 501.  
Dawn, "warmth of," (40) 314.
- Daylight illumination, measurement, (32) 810.
- Deamination—  
by tyrosinase, (36) 412.  
in the animal body, (40) 866.
- Death camas—  
description, (32) 474; (39) 386.  
examination, (27) 881.  
monograph, (33) 177.  
notes, (31) 578; (32) 778.  
poisoning of sheep by, (28) 197.  
poisoning stock, (39) 184, 787.
- Death feigning in insects, studies, (27) 457.
- Debab, transmission by blood-sucking insects, (26) 150.
- Debility in horses, cause, (39) 892.
- Deer—  
breeding, treatise, (29) 171.  
chromatin bodies in erythrocytes of, (29) 478.  
destruction by helminths, (26) 653.  
Flat bird reservation, (37) 355.  
host of spotted fever tick, (26) 64.  
protection in Alaska, (28) 450; (36) 791.
- Deficiency disease, see Diet deficiency.
- Defoliation, effect on—  
composition of sugar beets, (31) 435.  
wood growth and structure, (30) 228.
- Deforestation in Savoy, (35) 346.
- Degeeria funebris, notes, (30) 459; (31) 251.
- Deilephila—  
elphenor, notes, (26) 250.  
euphorbiae, notes, (26) 656.
- Delaware—  
College, notes, (27) 900; (28) 494; (29) 195, 697; (31) 496; (33) 794; (34) 295, 797; (35) 95, 397, 596; (36) 694, 796; (37) 397, 600; (38) 96, 399, 699, 900; (39) 694; (40) 98, 798.  
Station—  
Farmers' Day guide for, (32) 693.  
financial statement, (27) 396; (29) 793.  
guide to experiments, (26) 795.  
notes, (26) 300; (29) 195; (31) 600; (34) 797; (35) 95, 596; (36) 694, 796; (37) 397, 600; (38) 96, 900; (39) 300, 694, (40) 98, 798.
- Delaware—Continued.  
Station—Continued.  
report, (32) 496, 796; (35) 195; (36) 898; (39) 196.  
report of director, (27) 396; (29) 793.
- Delphacidae—  
of Hawaii, new, (38) 557.  
of North and South America, (31) 550.
- Delphacinae of North and South America, (32) 247.
- Delphastus catalinae—  
notes, (39) 461.  
parasitic on white flies, (37) 58.
- Delphax saccharivora, notes, (29) 52; (34) 753.
- Delphinin, studies, (34) 709.
- Delphinium—  
alkaloids of, (35) 780.  
consolid, agglutinating properties, (31) 774.  
spp., analyses, (30) 577.  
spp., notes, (32) 778.  
spp., poisoning stock, (39) 386, 587.
- Deltoccephalus—  
minki, life history, (35) 553.  
n.spp., descriptions, (34) 255.  
spp., notes, (27) 858; (33) 356.
- Dematophora—  
glomerata injurious to grapes, (31) 544.  
necatrix—  
notes, (26) 750; (34) 49; (38) 51; (40) 749.  
studies, (32) 149.  
treatment, (30) 543.  
sp. on coffee, (32) 645.
- Demodex—  
erinacei n.sp., description, (38) 865.  
folliculorum, remedies, (34) 275.  
muscardini n.sp., description, (38) 865.
- Demurrage information for farmers, (33) 91.
- Denaturants, detection in ethyl alcohol, (29) 312.
- Dendragapus canadensis, growing in captivity, (27) 675.
- Dendrobium thyrsoiflorum, carotinoid content, (31) 803.
- Dendrocalamus strictus, culture experiments, (34) 232.
- Dendroctonus—  
brevicornis, see Western pine beetle.  
engelmanni, see Spruce beetle, Engelmann.  
frontalis, see Pine beetle, southern.  
jeffreyi, see Jeffrey pine beetle.  
micans, see Spruce beetle, European.  
monticola, see Mountain pine beetle.  
murrayanae, see Lodgepole pine beetle.  
ponderosae, see Black Hills beetle.  
pseudotsugae, see Douglas fir beetle.  
valens, see Turpentine beetle, red.
- Dendrograph, description, (40) 817.
- Dendrolimus—  
pini, egg parasite of, (26) 557.  
pini, metamorphosis, (34) 361.  
spp., biology and remedies, (31) 655.
- Dendrology—  
bibliography, (26) 240; (27) 846.  
scope of, (31) 342.
- Dendrometer, description, (30) 347; (38) 248.
- Dendropemon—  
sp., notes, (37) 453.  
spp. on citrus trees, (39) 56.
- Dendrophoma—  
coffeicola, notes, (38) 51.  
marconii, notes, (32) 146.  
saccharicola, notes, (37) 553.
- Dendrotettix quercus, notes, (35) 255.
- Dengue fever—  
in Australia, (40) 552.  
mosquito carriers, (39) 262, 263.
- Denitrification—  
as affected by—  
organic substances, (31) 223.  
soil moisture, (36) 513.  
Streptothrix, (27) 621.  
in Nebraska soils, (29) 734.  
plants, studies, (29) 325.  
sandy loam soils, (36) 321.  
soils, (26) 721, 723; (27) 424; (29) 817; (31) 722, 818, 819; (34) 423.  
soils of different water content, (32) 618.  
tilled and untilled fallow, (30) 216.  
mechanism of, (30) 718.  
role of enzymes in, (32) 112.

- Dental—  
 caries, cause, (26) 867.  
 decay, relation to foods, (29) 364.  
 tartar, formation, (26) 160.
- Denudation, problems of, (40) 118.
- Deodar—  
 distillation products of, (35) 317.  
 fungus disease, notes, (39) 459, 653.  
 needle-cast, notes, (27) 655.  
 witches' brooms on, (32) 346.
- Department of Agriculture—*see also* United States  
 Department of Agriculture.  
 of Finland, report, (37) 295.  
 of Union of South Africa, history and activities,  
 (36) 898.
- Depressaria—  
 atomella, notes, (28) 158.  
 heracliana, destructive to parsnips, (29) 855.  
 heracliana, notes, (35) 853.  
 persicaeella, biology and remedies, (38) 861.
- Derbidae of Philippines, (38) 461.
- Dermacentor—  
 albipictus—  
 affecting moose, (38) 487.  
 in Minnesota, (38) 566.  
 notes, (27) 356.  
 andersoni, control in Bitter Root Valley, (29)  
 658.  
 hunteri n.sp., description, (26) 864.  
 nitens, relation to equine piroplasmiasis, (29) 83,  
 483.  
 nitens, studies, (35) 58.  
 parumapertus marginatus, parasite of, (26) 863.  
 spp., life histories, (29) 861.  
 spp. notes, (27) 866.  
 variabilis, transmission of splenic fever by,  
 (28) 758.  
 venustus—  
 as affected by Roentgen rays, (28) 57.  
 biology, (29) 359.  
 effects following bite of, (29) 585; (30) 182;  
 (36) 180.  
 eradication, (30) 162, 760; (32) 853.  
 in California, (38) 484.  
 in Montana, (28) 352; (35) 853; (37) 560; (39)  
 265.  
 life history, (26) 64; (31) 176.  
 notes, (29) 652; (32) 448; (33) 553, 862; (35)  
 853; (37) 459.  
 relation to paralysis in lambs, (29) 482.  
 studies, (26) 254; (36) 158.
- Dermanyssus—  
 gallinae, *see* Chicken mites and Poultry mites.  
 sp., transmission of spirochetes by, (32) 279.  
 spp., dissemination by English sparrows, (26)  
 246.  
 spp., on rodents, (33) 159.
- Dermaptera of Plummers Island, Maryland, (40)  
 649.
- Dermatea eucrista, relation to fir withertip, (35) 850.
- Dermatella prunastri, investigations, (30) 451.
- Dermatitis—  
 granular, studies, (40) 586.  
 in horses, (26) 482; (33) 774; (34) 274.  
 in pigs, (26) 482; (33) 774.  
 pustular, notes, (40) 283.
- Dermatobia—  
 cyaniventris, notes, (38) 362.  
 hominis—  
 egg disposal in, (36) 359.  
 life history, (30) 361.  
 notes, (26) 781.  
 parasitic on man, (27) 259.  
 relation in ticks, (40) 62.  
 reproduction and host habits, (34) 358.  
 summary of information, (40) 263.
- Dermatomycosis of swine, (28) 783.
- Dermatophilus penetrans, notes, (28) 753.
- Dermestes—  
 cadaverinus, notes, (28) 249.  
 spp., infesting cotton bales, (26) 560.  
 vulpinus in Hawaii, (40) 266.
- Dermestidae, catalogue, (26) 560.
- Dermatitis, pustular, in horses, (29) 179.
- Derostenus—  
 diastatae, notes, (31) 158.  
 fullowayi n.sp., description, (31) 554.  
 n.spp., descriptions, (30) 661.  
 pallipes n.sp., description, (38) 165.  
 punctiventris n.sp., description, (30) 59.
- Derostenus—Continued.  
 salutaris, parasitic on plum leaf-miner, (26) 558.  
 sp., studies, (28) 560.
- Derrengadera, treatment, (40) 583.
- Deschutes River, Oregon, utilization, (32) 279.
- Desert—  
 habit, experimental evolution in, (40) 129.  
 lakes as source of potash, (40) 128.  
 mountains, plant distribution on, (40) 129.  
 plants, *see* Plants, desert.
- Deserts, precipitation-evaporation factor in, (37)  
 525.
- Desiantha nociva, notes, (30) 753; (35) 261.
- Desiccation—  
 effect on tubercle bacilli, (33) 282.  
 of Africa, (37) 807; (40) 717.  
 of the earth, (38) 718.
- Desiccator—  
 description, (37) 110.  
 electrically heated vacuum, (36) 504.  
 vacuum, for soils, (31) 16.
- Desmia funeralis, *see* Grape leaf-folder.
- Desmodium—  
 adscendens, culture, (34) 736.  
 gyroides as a green manure, (36) 324.  
 hirtum, culture experiments, (37) 131.  
 hirtum, description and use, (30) 735.  
 incanum, culture, (34) 736.  
 leicarpum, analyses, (31) 863.  
 spp., notes, (26) 362.  
 tortuosum, culture, (27) 419; (30) 335, 632; (32)  
 730.
- Desmometopa, commensalism in, (34) 359.
- Desmonycinae of British India, (40) 63.
- Desmopsis n.g. and n. spp., descriptions, (36) 433.
- Desmosomus longipes, notes, (37) 359.
- Desserts, recipes, (39) 769.
- Deudorix livia, notes, (32) 151.
- Development—  
 Act in Great Britain, (38) 794.  
 Fund in England, (30) 793.
- Dew—  
 ammonia in, (37) 116.  
 effect on composition of hay, (26) 235.  
 genesis of, (31) 22.  
 measurement, (34) 510.  
 point, determination, (31) 22.  
 point, investigations, (35) 318.  
 ponds, accumulation of water in, (30) 118.  
 ponds, treatise, (33) 806.  
 relation to grape mildew, (28) 152, 448.  
 relation to spread of plant diseases, (38) 47.
- Dewberries—  
 breeding experiments, (28) 542; (40) 742.  
 culture, (31) 441; (32) 639; (34) 42; (35) 448.  
 culture experiments, (28) 436; (38) 41.  
 culture in southern Texas, (32) 539.  
 phylloxy of corolla in, (34) 143.  
 sterility in, (36) 444.  
 varieties, (27) 241; (28) 542; (37) 243.
- Dewberry—  
 diseases, notes, (37) 52; (39) 652.  
 double blossom, investigations, (26) 850.  
 rusts, notes and treatment, (29) 50.
- Dexiidae, new, in South America, (34) 65.
- Dextrin—  
 commercial, examination, (39) 805.  
 determination in—  
 food products, (27) 111; (34) 205.  
 sugar products, etc., (31) 412.  
 wheat, (28) 836.  
 digestion by bees, (31) 255.  
 history of, (26) 106.  
 methods of analysis, (27) 205.  
 oxidation with bromin, (40) 613.  
 production and use, (32) 117.  
 products, examination, (34) 11.  
 use in food products, (34) 167.
- Dextrinase, bacterial, preparation, (37) 411.
- Dextrose—  
 absorption by plants, (27) 635.  
 absorption, effect on composition of blood, (28)  
 867.  
 and picrate solutions, color production in, (39)  
 611.  
 content of preserved fruits, (27) 766.  
 detection in presence of lactose, (28) 205.  
 determination, (34) 611.

- Dextrose—Continued.  
determination in—  
  blood, (39) 611.  
  muscular tissue, (37) 617.  
  presence of nitrogenous bodies, (28) 504.  
effect on—  
  ammonification, (28) 718; (35) 729.  
  availability of nitrogen, (28) 724, 725.  
  carbon dioxide production, (30) 123; (34) 127.  
  soil nitrogen, (31) 722; (35) 218.  
  feeding during inanition, (26) 465.  
  from cellulose in digestion, (26) 873.  
  heat of combustion, (26) 160.  
  in Fucoidae, (29) 566.  
  in grape leaves, (27) 731.  
  ingestion, effect on metabolism, (28) 866.  
  solution, osmotic pressure, (28) 262.
- Deyouxia forsteri, analyses, (30) 565.
- Dhaincha as green manure, (27) 337, 637; (36) 232.
- Dhaura, notes, (29) 443.
- Dhuri, notes, (34) 239.
- Dholl, factors affecting cooking, (35) 556.
- Diabetes—  
  acidosis in, (35) 473.  
  and glycosuria, treatise, (32) 474.  
  blood lipoids in, (35) 666.  
  carbohydrate cures for, (28) 262.  
  effect of alcohol in, (40) 364.  
  experimental, in cats, (32) 180.  
  increased oxidation in, (40) 766.  
  metabolism in, (35) 369, 371; (36) 763; (37) 267.  
  pancreatic, in dogs, (36) 562.  
  protein feeding and creatin elimination in, (35) 665.  
  relation to diet, (30) 168.  
  soy bean flour for, (27) 664.  
  studies, (34) 462.  
  treatment, (35) 371.
- Diabetic—  
  blood sugar, dialysis, (39) 671.  
  coma, cause, (40) 463.  
  foods, (30) 664; (40) 284.  
  foods, analyses, (29) 660; (35) 558.  
  metabolism as affected by adrenals, (33) 754.
- Diabetics, use of rice by, (28) 861.
- Diabrotica—  
  baateata, hibernation, (39) 868.  
  baateata, remedies, (32) 557.  
  duodecim-punctata, notes, (27) 360; (36) 859; (40) 58.  
  graminea, notes, (29) 53.  
  graminea, studies, (37) 256.  
  longicornis, life history and habits, (35) 356.  
  longicornis, notes, (29) 252.  
  soror, notes, (32) 651; (34) 656, 857.  
  spp. injurious to potatoes, (37) 157.  
  spp., notes, (29) 652; (30) 56.  
  trivittata, notes, (34) 656.  
  virgifera notes (26) 654; (28) 161.  
  vittata, *see* Cucumber beetle, striped.
- Diachasma—  
  as fruit fly parasite, (40) 459.  
  crawfordi n.sp., description, (26) 352; (30) 460.  
  fullawayi, notes, (38) 767.  
  fullawayi, studies, (38) 659.  
  pilosipes, notes, (34) 455.  
  spp., parasitic on fruit fly, (37) 856.  
  tryoni—  
    in Hawaii, (32) 757.  
    notes, (34) 556.  
    parasitic on fruit flies, (31) 456.  
    studies, (38) 659, 767.
- Diachasmimorpha comperi n.g. and n.sp., description, (30) 256.
- Diacrisia—  
  obliqua, notes, (27) 54.  
  virginica, control by parasites, (37) 760.
- Diacrurus muliebris, systematic position, (40) 656.
- Diagnosis—  
  chemical and microscopical, treatise, (36) 412.  
  exercises in, (31) 376.
- Diagnostic methods—  
  biologic, efficacy, (31) 376.  
  treatise, (27) 284.
- Diagnosics, inconsistencies of, (29) 500.
- Dialysis—  
  quantitative, new apparatus for, (31) 501.  
  value in soil studies, (30) 123.
- Diamalt, value in bread making, (29) 765.
- Diamertus fici, notes, (27) 458.
- Diamesa mendotae n.sp., life history, (34) 651.
- Diamid, assimilation by plants, (26) 32.
- Diamino acids in proteins, nutritive value, (38) 569.
- Diamond-back moth—  
  in South Africa, (39) 561.  
  life history, (37) 663.  
  notes, (28) 854.  
  remedies, (26) 250; (28) 59; (34) 654.
- Dianthidium—  
  arizonicum, notes, (36) 360.  
  n.sp., description, (36) 258.
- Dianthus—  
  breeding experiments, (27) 741.  
  inheritance of doubleness, (39) 123.
- Diaphania nitidals, *see* Pickle worm.
- Diapheromera—  
  femorata, *see* Walking-stick.  
  veliei, notes (40) 353.
- Diaporthe—  
  ambigua, notes, (34) 543.  
  batatas—  
    n.sp., description, (28) 548.  
    notes, (32) 343.  
    studies, (29) 153; (34) 156; (39) 854; (40) 347.  
    cubensis n.sp., description, (39) 254.  
  parasitica—  
    and Endothia radicalis, relationship, (27) 451.  
    history and distribution in Massachusetts, (26) 551.  
    in France, (33) 56.  
    life history and morphology, (34) 157.  
    notes, (26) 56; (27) 252, 653, 753; (40) 53.  
    relationships, (28) 651.  
    studies, (26) 345; (27) 852; (28) 551; (29) 156; (38) 449.  
  umbrina n.sp., on roses, (40) 544.
- Diaprepes—  
  abbreviatus—  
    doublieri, notes, (39) 862.  
    notes, (28) 752; (34) 753; (39) 742.  
    in West Indies, (38) 61.  
    n.sp., and n.subsp., description, (37) 765.  
    quadrivittatus, notes, (39) 58.  
  spengleri—  
    dentatus n.var., description, (33) 360.  
    notes, (30) 355; (39) 59.  
    studies, (33) 458.  
  spp. of West Indies, (33) 360.
- Diaprus furtivus, life history, (37) 854.
- Diaretus (Aphidius) obsoletus n.sp., description, (30) 758.
- Diarrhea—  
  bacillary, white—  
    in chicks, (29) 288; (31) 484; (34) 189, 275, 387; (35) 184, 878; (36) 281; (37) 82, 182, 280, 383.  
    in chicks, treatment, (30) 286; (32) 380.  
    in fowls, (36) 884; (38) 281, 689; (39) 792; (40) 685.  
    prevention, (33) 273.  
  chronic, in cattle, (29) 284, 587.  
  epidemic, relation to flies, (28) 756; (36) 156.  
  in calves, (26) 381, 483; (35) 488; (40) 887.  
    chicks, treatment, (34) 881.  
    infants, relation to heat, (34) 462.  
    infants, transmission by house flies, (26) 61.  
  poultry, treatment, (26) 78.
- Diarrheal diseases, relation to flies, (31) 654.
- Diarsenol, bactericidal action, (39) 488.
- Diarthronomyia hypogaea—*see also* Rhopalomyia hypogaea.  
  in United States, (38) 160.  
  notes, (36) 59, 856; (38) 358.
- Diarthrotrichs coffeae n.g. and n.sp., description, (35) 357.
- Diaspidiotus—  
  tsugae n.sp., description, (26) 248.  
  uvae, notes, (27) 555.
- Diaspiniae, new, of Italy, (38) 460.
- Diaspis—  
  bromeliae, notes, (28) 854.  
  caruelli, notes, (30) 154.  
  echinocacti, *see* Cactus scale.  
  pentagona—*see also* Aulacaspis pentagona.  
    control in Italy, (34) 851.  
    in Argentina, (27) 556; (37) 460.  
    notes, (26) 247, 452, 655; (28) 457.  
    parasites of, (27) 455.  
  remedies, (29) 854.  
  piri, remedies, (26) 561.  
  spp., parasites of, (39) 465, 663.

- Diastase**—  
 absorption of hydrogen chlorid by, (31) 806.  
 activity in etherized bulbs and tubers, (30) 728.  
 activity in plant extracts, measurement, (33) 315.  
 and glycogen of animal tissues, correlation, (30) 204.  
 and starch of plant tissues, relationship, (28) 729.  
 as affected by ultraviolet rays, (26) 203.  
 effect on alcoholic fermentation, (27) 426.  
 effect on plant respiration, (27) 221, 426.  
 formation and regulation by mold fungi, (31) 730.  
 hydrolysis of rice starch by, (28) 407; (30) 111.  
 in alfalfa, studies, (32) 502.  
   honey, (26) 710.  
   red algae, (29) 220; (32) 503.  
   tobacco plant, (31) 204.  
 oxida-reducing, (40) 580.  
 pancreas, effect on oat and wheat starch, (28) 660.  
 preparation and properties, (28) 408.  
 value in bread making, (29) 765.
- Diastases, animal or vegetable, fatal temperatures for,** (33) 30.
- Diastatic action**—  
 as affected by filtration, (29) 505.  
 as affected by halogens, (28) 504.  
 determination in starch solutions, (36) 329.  
 in bread making, (26) 358.
- Diastrophus fragariae n.sp.,** description, (34) 362.
- Diatomaceous earth deposits in Virginia coastal plain,** (29) 513.
- Diatraea**—  
 canella, remedies, (32) 553.  
 larval characters and distribution, (35) 758.  
 lineolata, notes, (33) 657.  
 saccharalis, *see* Sugar cane borer.  
 spp. in British Guiana, (38) 459.  
 spp., notes, (29) 353.  
 striatalis, notes, (34) 758.  
 striatalis, parasites of, (34) 656.  
 zeaeolella, *see* Cornstalk borer.
- Diatrippella barleriae n.sp.,** notes, (37) 148.
- Diauliniopsis callichroma n.g. and n.sp.,** description, (30) 59.
- Diaulinus**—  
 begini n.sp., description, (30) 59.  
 begini, notes, (29) 857.  
 insularis n.sp., description, (35) 262.  
 intermedius n.sp., description, (36) 260.  
 spp., notes, (31) 158.  
 websteri n.sp., description, (30) 59.
- Dibenzoylglucosylase,** notes, (32) 502.
- Dibothriocephalus latus**—  
 dissemination by flies, (30) 659.  
 from the dog, (39) 791.  
 life cycle, (38) 783.
- Dibrachoides (Pteromalus) dynaster,** parasitic on alfalfa weevil, (31) 61.
- Dibrachys**—  
 australia n.sp., description, (38) 768.  
 boncheanus, notes, (26) 151; (27) 558.  
 clisiocampae, notes, (38) 565.  
 clisiocampae, studies, (40) 359.  
 meteori n.sp., description, (31) 355.  
 notes, (36) 556.  
 parasite of granary weevil, (39) 468.  
 spp., notes, (36) 655.
- Dibromothioresolsulphonphthalein,** use in milk cultures, (37) 686.
- Dicalcium phosphate**—  
 as affected by calcium carbonate, (26) 527.  
 determination, (32) 409.  
 utilization by oats and lupines, (31) 733.
- Diacasticus gerstaeckeri,** notes, (29) 853.
- Dichloramin-T—see also Chloramin-T, Dakin's solution, and Hypochlorite.**  
 and petrolatum dressing for burns, (40) 883.  
 antiseptic value and use, (40) 181, 182, 254.  
 composition and use, (38) 782.  
 for ocular infections, (39) 185.  
 notes, (40) 882, 883.  
 preparation, (38) 378.  
 toxicity, (39) 586.
- Dichlorethylsulphid poisoning,** studies, (40) 382.
- Dichrocrosis punctiferalis,** habits and remedies, (29) 759.
- Dichomeris**—  
 deflecta n.sp., description, (31) 352.  
 marginellus, notes, (35) 54.
- Dichomeris—Continued.**  
 marginellus, occurrence in New York, (26) 146.  
 vacciniella n.sp., description, (33) 748.
- Dichromorpha viridis,** parasite of, (40) 459.
- Dickinson County Cow-Testing Association,** report, (31) 76.
- Dicoeoma spp.,** notes, (39) 549.
- Dicoma anomela,** analyses and digestibility, (27) 871; (32) 167.
- Dicotyledon leaflets,** water channels in, (28) 629.
- Dicraeus n.spp.,** descriptions, (40) 263.
- Dicranoura cockerelli,** notes, (26) 452.
- Dicranomyia foliocunicular n.sp.,** description, (34) 554.
- Dicranotropis maidis,** notes, (30) 356.
- Dicrocoelium lanceatum,** life history, (26) 286.
- Dictyna volupis,** notes, (29) 256.
- Dictyocaulus**—  
 filaria—  
   first stages, (28) 182.  
   notes, (27) 886.  
   studies, (34) 274.  
   spp., destructive to deer, (26) 653.  
   spp., life history and treatment, (35) 182.  
   spp., notes, (30) 285.
- Dictyophara spp.,** key, (38) 560.
- Dictyophora phalloidea,** notes, (38) 550.
- Dictyophorodelphax**—  
 mirabilis, notes, (38) 557.  
 swezeyi n.sp., description, (40) 261.
- Dictyothrips**—  
 aegyptiacus injuring grape, (39) 158.  
 betae, notes, (28) 452.
- Dicyanamid**—  
 determination in fertilizers, (26) 804.  
 manufacture from lime nitrogen, (33) 614.
- Dicyandiamid**—  
 assimilation by plants, (26) 32.  
 decomposition in soil, (40) 724.  
 effect on plant growth, (39) 116.  
 injuring barley and mustard, (40) 515.  
 studies, (29) 127.
- Dicyphus**—  
 luridus and *D. prasinus*, studies, (39) 58.  
 minimus, notes, (28) 654.  
 n.spp., descriptions, (37) 561.
- Didea fasciata**—  
 fuscipes, life history, (29) 456.  
 notes, (36) 460.
- Didelphis marsupialis particeps n.subsp.,** description, (37) 757.
- Didinium,** resistance to potassium cyanid, (40) 455.
- Didonerus minutus,** notes, (34) 754.
- Didymella applanata,** notes, (34) 55.
- Didymium nigripes,** sexuality in, (38) 331.
- Didymosphaeria**—  
 coffeicola, notes, (38) 51.  
 (Didymella) alhaginis n.sp., description, (35) 844.
- Didrocephala coccinea,** notes, (27) 859.  
 (Dielis) Campsomeris dorsata, notes, (34) 455.
- Diestrammena marmorata**—  
 economic importance, (38) 258.  
 life history and habits, (30) 754.
- Diet—see also Food and Nutrition.**  
 adequate and economical, (39) 163.  
 adequate and inadequate, choice of by rats, (39) 770.  
 amino acids and vitamins in, (32) 857.  
 and body condition, relation to energy production, (37) 469; (39) 772.  
 dietetic therapeutics, treatise, (35) 858.  
 foods, textbook, (29) 360.  
 hygiene in schools, treatise, (29) 363.  
 nutrition, textbook, (30) 463.  
 vitamin, quantitative relationship, (32) 163, 164.  
 as affected by environment, (26) 465.  
 as cause of inefficiency in school children, (32) 458.  
 balancing, (33) 364.  
 butterfat in, (39) 770.  
 calcium in, (31) 357, 860.  
 calcium-magnesium ratio in, (29) 565.  
 cereals in, (40) 762.  
 change, effect on carbon dioxide excretion of nursing infants, (31) 662.  
 charts for physicians' use, (31) 557.  
 chemical constituents of in relation to growth, (30) 64.

## Diet—Continued.

- daily, notes, (31) 861.  
 deficiencies, correction, (36) 161; (38) 367.  
 deficiency diseases—*see also* Beriberi, Rickets, Scurvy, etc.  
   bibliography, (36) 663.  
   notes, (38) 267, 568.  
   review of investigations, (36) 363.  
 deficiency, relation to animal diseases, (29) 66.  
 during growth, essential factors in, (34) 368.  
 economical, description, (36) 363.  
 effect on—  
   blood sugar, (34) 562.  
   cholesterol content of tissues, (33) 754.  
   disease resistance, (31) 464.  
   elimination of creatin and creatinin, (35) 665.

 working men, (32) 857.  
 working women in Boston, (38) 64.  
 young children, (35) 664.  
 one-sided, effects of, (31) 361.  
 planning, (28) 863; (40) 463.  
 poor in calcium, effect, (38) 570.  
 prenatal, summary of data, (31) 463.  
 preparation, (27) 365.  
 principles of, (32) 659.  
 protective action against drugs and poisons, (40) 465.  
 protein and carbohydrates in, (32) 857.  
 qualitatively insufficient, studies, (32) 561.  
 rational apportionment during 24-hour cycle, (33) 464.  
 reduced, effects, (39) 567; (40) 269, 561.  
 relation between mineral elements and protein content, (29) 64.  
 relation to—  
   beriberi, (28) 764; (29) 180; (31) 857; (33) 261; (36) 264.  
   blood cholesterol and "lymphoid defense," (40) 767.  
   disease, (30) 367, 764.  
   diseases, (26) 264; (38) 267.  
   glycogen content of liver, (37) 64.  
   growth and body composition, (36) 663.  
   intestinal flora, (40) 867.  
   pellagra, (26) 263; (32) 255, 564; (34) 258, 259, 764; (35) 767; (36) 464, 466; (38) 366; (39) 70, 266, 665, 666.  
   polyneuritis, (27) 868.  
   rickets, (29) 464.  
   scurvy, (27) 567; (39) 365, 770, 771.  
   skin diseases, (31) 463.  
   transmissible tumors in rats and mice, (30) 167.  
 restricted—  
   deficiencies of, (35) 368, 861.  
   vegetable, effect on nervous system, (35) 560.  
 rôle of vitamins in, (38) 568.  
 social service in dispensary work, (30) 167.  
 standards for hard work, (39) 267.  
 summary and digest of data, (37) 571.  
 treatise, (29) 267, 661; (32) 561; (40) 68, 173, 361, 561, 865, 866.  
 types of, merits, (31) 462.  
 unbalanced, studies, (33) 68, 664.  
 uric-acid-free, treatise, (31) 361.  
 value of milk and vegetables in, (40) 359.  
 value of milk in, (40) 179.  
 value of seasoning in, (29) 663.  
 vegetable, effect on growth and reproduction, (35) 563.  
 vegetable, harmful effect, (33) 867.

- Diet**—Continued.  
 vegetables in, as source of calcium, (39) 876.  
 vegetarian—  
   effect on reproduction in rats, (39) 672.  
   notes, (36) 467.  
   of Japanese monks, (30) 863.  
   studies, (36) 60, 664.  
 vitamin-free, effect on—  
   carbohydrate metabolism, (32) 257.  
   growth of chickens, (30) 865.  
 war-ration, in England, (38) 167.
- Dietaries**—  
 accessory factors in, (28) 260.  
 calculation, (38) 366.  
 for institutions, (40) 866.  
 for Poor Law Unions in England and Wales, (30) 167.  
 review of investigations, (30) 560.  
 statistics, (32) 163; (40) 362.  
 treatise, (40) 68.
- Dietary**—  
 changes, effect on output of urinary constituents, (36) 162.  
 computer, (40) 659.  
 diseases, nature of active agents, (40) 465.  
 factors, isolation, (36) 61.  
 family, planning, (31) 394.  
 for hospitals for insane, (40) 866.  
 for miners, (40) 362.  
 for poor families, (26) 762.  
 importance in higher education, (29) 464.  
 of a 99-year-old man, (31) 360.  
 of Filipino families, (35) 471.  
 of laborers in Spain, (35) 471.  
 properties of the pea, (40) 762.  
 properties of the potato, (40) 172.  
 qualities of barley, (39) 666.  
 ration tables, use, (29) 463.  
 standards, discussion, (26) 562.  
 studies, (29) 861.  
 studies—  
   at New York City Municipal Sanatorium, (35) 471.  
   at Peoria State Hospital, (28) 663.  
   at Rhode Island State College, (26) 762.  
   in Bengal, (28) 567.  
   cities, (38) 63.  
   Paris, (29) 463.  
   Rhine provinces, (28) 663.  
   Stockholm, (28) 662.  
   Syria, (27) 665.  
   review of, (30) 364.  
   with men, (27) 666.  
 substances, regulatory—  
   distribution in plants, (36) 61.  
   formation in the animal body, (36) 62.  
 tables, data on, (35) 765.
- Dietetics**—  
 calculating energy values in, (29) 166.  
 clinical, and nutrition, (39) 567.  
 essentials in, (37) 164.  
 fundamental principles, (40) 865.  
 handbook, (26) 658; (28) 257.  
 history, (31) 557; (32) 66.  
 in Italian tenements, (31) 360.  
 invalid, notes, (27) 464.  
 review of investigations, (30) 364, 463.  
 teaching, (35) 898.  
 treatise, (29) 163; (31) 859; (40) 561.  
 Dietrich, T., biographical sketch, (39) 900.
- Digestibility of fat, relation to melting point, (26) 159.**
- Digestion**—  
 acid medium for, (36) 763.  
 apparatus, description, (37) 503; (40) 410.  
 as affected by—  
   coloring substances, (26) 68.  
   saccharin, (26) 257.  
   sterilization of air, food, and surroundings, (28) 569.  
   sugar, (29) 663.  
 crate for pigs, description, (37) 678.  
 effect of emotions on, (33) 566.  
 experiments, *see specific foods and animals*.  
 mechanical factors in, (31) 865.  
 products, methods of examining, (29) 408.  
 products, passage from mother to fetus, (29) 665.  
 relation to protein metabolism, (26) 764.  
 review of investigations, (30) 364, 560; (31) 265.
- Digestion**—Continued.  
 rôle of spleen in, (31) 361.  
 salivary, in horses, (37) 681, 771.  
 salivary, in vitro, (35) 468.  
 specific parenteral, (38) 580.  
 studies, first American report, (40) 869.
- Digestive**—  
 ferments, assay of, (27) 108.  
 leucocytosis, studies, (40) 71.  
 tract as affected by diet, (31) 859; (32) 265, 366, 367.  
 tract, periodic work of, (29) 465.
- Digitals**—  
 action in pneumonia, (37) 375.  
 as affected by composition of soils, (34) 18.  
 improvement by selection, (32) 143.  
 leaf spot, notes, (36) 145.  
 purpura—  
   agglutinating properties, (31) 774.  
   assimilation of mineral salts by, (34) 135.  
   behavior on lime soils, (31) 425.  
   breeding experiments, (30) 631.  
   species hybrids of, (28) 229.
- Digitaria**—  
 didactyla, tests, (38) 828.  
 horizontalis, analyses, (36) 334.  
 horizontalis, studies, (38) 66.  
 sanguinalis, eradication, (27) 733.  
 spp., notes, (26) 361.
- Digits, supernumerary, in ungulates, (27) 369.**
- Diglycylglycin, anaphylaxis produced by, (35) 280.**
- Digonochaeta setipennis, studies, (39) 658.**
- Dihydroxystearic acid**—  
 effect on action of fertilizers, (27) 520.  
 effect on plants, (34) 126, 325; (36) 212.
- Dika fat, detection, (29) 613.**
- Dikes, *see* Levees.**
- Dilatometer**—  
 description, (39) 18.  
 method for wilting coefficient, (40) 22.
- Dilophia graminis**—  
 in England and Wales, (35) 650.  
 notes, (27) 351; (37) 247.
- Dilophonota ello, notes, (28) 354, 854; (30) 853; (38) 261.**
- Dilophosphora graminis on wheat, (37) 247.**
- Dimeromyces n.spp., descriptions, (27) 460.**
- Dimerosporium mangiferum, notes, (37) 839.**
- Dimethylanilin, insecticidal and larvicidal value, (34) 359.**
- Dimorphism in chrysanthemums, (28) 541.**
- Dimorphopteryx spp., notes, (35) 263.**
- Dindymus versicolor, notes, (27) 858; (40) 753.**
- Dineutes, predacious on mosquito larvae, (36) 57.**
- Dining room service, public, in United States, (38) 769.**
- Dinocampus**—  
 americanus, two generations from individual host, (35) 661.  
 terminatus, biology, (30) 754.
- Dinocleus spp., notes, (30) 357.**
- Dinoderus brevis, notes, (29) 458.**
- Dinurothrips hookeri, n.g. and n.s.p., description, (30) 658.**
- Diocetes obliteratus, notes, (28) 454.**
- Diocetophyme renale in**—  
 abdominal cavity, (37) 281.  
 liver of a dog, (36) 681.  
 United States and Canada, (36) 86, 885.
- Dionaea, leaf closure in, (36) 129.**
- Dionea timberlakei, n.s.p., description (31) 458.**
- Dionychus parallelogramus, notes, (33) 650.**
- Dioryctria**—  
 abietella, notes, (31) 849; (36) 856.  
 schützeella, notes, (34) 855.
- Diorymellus laevimargo**—  
 n.s.p., description, (36) 555.  
 notes, (40) 754.
- Dioscorea**—  
 notes, (31) 334.  
 spp., analyses, (27) 268.  
 spp., descriptions, (40) 637.  
 studies, (40) 557.  
 treatise, (33) 437.
- Diosphyrus vulgaris, notes, (27) 862.**
- Diospilus**—  
 neolytri n.s.p., description, (38) 165.  
 polydrusi n.s.p., description, (37) 359.

- Diospyros—  
 kaki—  
   as affected by pollination (31) 440.  
   classification, (31) 639.  
   leaf coloration, (36) 633.  
   virginiana, seedless fruits of, (32) 142.
- Dioxydiamidoarsenobenzol—  
 detection (26) 411.  
 for equine influenza, (26) 288.
- Dipachystigma cushmani n.sp., description, (26) 63.
- Dipalmitylsterin in lard, (32) 801.
- Diparopsis castanea, control, (40) 256.
- Diphachne fusca, analyses and digestibility, (32) 167.
- Diphosphate, fertilizing value, (37) 323.
- Diphtheria—  
 antitoxin, valuation, (26) 676.  
 avian, (39) 687.  
 avian, virus of, (31) 88.  
 bacilli—  
   disinfectants for, (40) 478.  
   in birds, (34) 83.  
   stain for, (39) 286.  
 human and avian, relation, (26) 177; (32) 271.  
 immunization, (35) 574; (39) 388; (40) 179.  
 in fowls, studies, (35) 283.  
 milk as source of infection, (40) 79.  
 of suckling pigs, notes, (27) 483.  
 outbreak, of bovine origin, (26) 883.  
 serodiagnosis, (31) 877.  
 toxin-antitoxin mixtures, immunization with, (40) 580.  
 toxin, studies, (34) 579; (38) 886.
- Diphtheroid bacillus in horses and calves, (34) 186.
- Diplachne fusca, notes, (26) 461.
- Diplazon laetatorius, parasitism, (31) 458.
- Diplobacillus capsulatus, notes, (32) 178.
- Diplocarpon rosae—  
 control, (40) 159, 751.  
 notes, (26) 650; (29) 552.  
 studies, (33) 347.
- Diplococcus—  
 glintheri, notes, (28) 777.  
 lymantriae parasitizing gipsy moth, (38) 159.  
 melolonthae, studies, (38) 162.  
 pneumoenteritis equi, notes, (28) 483.  
 spp., organism resembling, (26) 376.  
 (Streptococcus) lanceolatus, notes, (26) 586.
- Diplocyrtis schneideri, chromosome cycle, (34) 458.
- Diplodia—  
 bataticola, studies, (39) 854.  
 cacaoicola, notes, (33) 449; (37) 349; (39) 53; (40) 157.  
 coffeicola, notes, (38) 51.  
 crebra n.sp., notes, (37) 148.  
 gossypina, notes, (28) 647.  
 griffoni, relation to apple sour sap, (38) 452.  
 inoculation experiments, (29) 248.  
 longispora, notes, (30) 453.  
 maydis, notes, (34) 242.  
 natalensis—  
   life history and treatment, (28) 245.  
   notes, (27) 350, 750; (31) 152; (33) 549; (34) 446.  
   on citrus, (32) 346; (35) 748.  
   relation to citrus gummosis, (29) 247; (37) 656.  
   studies, (39) 152.  
 on tea roots, (37) 52.  
 palmicola, notes, (34) 242.  
 pinea, notes, (27) 548; (34) 242.  
 sp. affecting coconuts, (30) 652.  
 sp., injurious to rubber, (26) 451.  
 sp. on citrus fruit, (39) 56.  
 sp. on Hevea stumps, (35) 243.  
 sp. on limes, (34) 750.  
 sp., studies, (28) 240.  
 spp., notes, (29) 548; (34) 247; (35) 750.  
 tuberculicola, studies, (34) 156; (40) 347.  
 zeae, notes, (26) 447.  
 zeae, studies, (36) 48, 247; (39) 149.
- Diplodiella, nonvalidity of genus, (24) 242.
- Diplodina—  
 cacaoicola, notes, (26) 851.  
 castanea, studies, (28) 240.  
 degenerans, n.sp., notes, (37) 148.
- Diplodinium ecaudatum, morphology and new forms of, (32) 376.
- Diplogaster—  
 aerivora, studies, (40) 267.  
 n.spp., life history and habits, (35) 161.
- Diplopoda of Kansas, (30) 759.
- Diplois—  
 pyrivora, notes, (30) 655.  
 sorghicola, see Contarinia sorghicola.  
 tritici—see also Thecodiplois mosellana.  
   notes, (27) 453.
- Diplopora bigemina in dogs, (39) 392.
- Diplotaxis—  
 atlantis, notes, (35) 54.  
 excavata, notes, (38) 762.
- Dipping—  
 agents, effect on wool, (30) 584.  
 agents, tests, (27) 476.  
 fluids, oxidation, (38) 585.  
 fluids, wetting power of, (35) 356.  
 tanks—  
   construction, (29) 87, 585; (30) 487, 778, 893;  
   (31) 786; (36) 687.  
   control of fluid in, (31) 776.  
   for sheep, description, (30) 783.  
   formation of arsenate in, (31) 483.  
 theory and practice, (34) 186.  
 vat, circular, description, (26) 485.  
 vat for cattle, construction, (26) 382.  
 vats, concrete, construction, (27) 89; (32) 251.  
 vats, construction, (28) 181; (29) 585; (33) 680,  
 691; (34) 479; (37) 477.
- Diprion—see also Neodiprion.  
 grandis n.sp., description, (30) 60.  
 simile, notes, (34) 363; (35) 54, 760; (37) 255, 261,  
 568; (40) 754.  
 simile, review of investigations, (39) 760.  
 spp. in Europe, (35) 760.
- Diprioninae, new species, (40) 761.
- Dips—  
 arsenical—  
   methods of analysis, (31) 115.  
   oxidation of, (31) 776.  
   preparation and use, (31) 776:  
   effect on animals, (29) 585.  
   effect on wool, (33) 571.  
 soda-sulphur, methods of analysis, (40) 208.
- Dipsacus fullonum, description and culture, (29) 142.
- Diptera—  
 attraction to ammonia, (36) 460.  
 blood-sucking—  
   mouth parts and sucking apparatus, (29) 760.  
   of Brazil, (29) 54.  
   of British Columbia, (32) 551.  
   of Venezuela, (27) 862.  
 classification, (36) 255; (38) 161.  
 coprophagous, biology, (29) 760.  
 head capsule and mouth parts, (37) 159.  
 larvae, biology, (36) 359.  
 larvae, entomophagous, studies, (30) 458.  
 leaf-mining, ichneumon parasites of, (29) 359.  
 new North America, (36) 553.  
 of Denmark, (38) 263.  
 District of Columbia, (37) 57.  
 Florida, (30) 752.  
 North America, biology, (32) 153; (40) 653.  
 Philippines, (38) 466.  
 West Indies, (34) 65.  
 parasitic and predacious in New Mexico, (35) 259.  
 parasitic, of Africa, (36) 359; (38) 263.  
 photographic atlas, (34) 654.  
 photography of, (26) 252.  
 viviparus, (38) 261.
- Dipterocarp forests in Philippines, (33) 443.
- Dipterous larvae—  
 and pupae, notes, (36) 460.  
 structure, (26) 558.
- Dipylidium caninum—  
 dissemination by flies, (30) 659.  
 in an infant, (37) 660.  
 life history, (37) 163.
- Dirhinus—  
 giffardi, parasitic on fruit flies, (31) 456.  
 inflexus n.sp., from Glossina, (39) 566.
- Dirphya (Nitocris) princeps, notes, (31) 61; (32) 847.
- Dirr, determination in milk, (26) 507; (27) 810; (28) 808; (30) 876; (31) 574.
- Dirr test for butter, (31) 575.

- Disaccharids—  
 absorption in the intestines, (28) 763.  
 enzymatic synthesis, (34) 803.  
 resorption in small intestine, (29) 268.
- Discoecolla pirina, notes, (26) 449.
- Discozia theae, notes, (38) 61.
- Discothecium bakeri n.g. and n.sp., notes, (37) 148.
- Disease resistance as affected by diet, (31) 464.
- Diseases—  
 air-borne, relation to ventilation, (34) 192.  
 and insects, paper on, (32) 151.  
 and malnutrition, correlation, (32) 358.  
 bibliography, (26) 246; (29) 652.  
 caused by nematodes, treatment, (32) 578.  
 deficiency, *see* Diet deficiency diseases.  
 effect on metabolism, (32) 563.  
 infectious—  
   control, (26) 373.  
   immunization, (31) 576.  
   serodiagnosis, (31) 877.  
   vaccine treatment, (35) 486.  
 insect-borne, in Pan-America, (34) 754.  
 insect-borne, notes, (38) 558, 580.  
 microbiology of, (26) 372.  
 milk-borne, control, (33) 701.  
 mosquito-borne, textbook, (33) 156.  
 nonsyphilitic, use of salvarsan in, (31) 775.  
 notes, (30) 249.  
 of animals, *see* Animal diseases and specific diseases.  
 of plants, *see* Plant diseases and specific host plants.  
 relation to—  
   diet, (30) 367, 764.  
   insects, (27) 862.  
   milk supply, (28) 674.  
   protein split products, (30) 379.  
 transmission by—  
   bedbugs, (31) 550.  
   blood-sucking insects, (28) 57, 756.  
   flies, (30) 254, 552, 658, 756; (31) 551, 852; (36) 400.

- subsoil, for preventing malaria, (30) 486.
- textbook, (35) 788.
- tile—
  - bulkheads, plans and specifications, (28) 289.
  - clogging by roots, (26) 37.
  - cost, (35) 491.
  - in Illinois, (27) 484.
  - manufacture and use, (28) 890.
  - methods of testing, (27) 87, 88.
  - notes, (27) 386; (36) 89.
  - paper on, (27) 189.
  - principles, (27) 290.
  - specifications and tests, (27) 587.
  - studies, (28) 890.
  - system, (37) 286; (40) 587.
- treatise, (26) 588; (33) 585, 586; (37) 587.
- use of—
  - day labor in, (35) 286.
  - explosives in, (26) 91; (29) 182; (31) 589; (33) 90.
  - pumps in, (34) 283.
  - small waterfalls for, (36) 89.
- water—
  - analyses, (27) 320.
  - composition, (27) 19.
  - composition as affected by vegetation, (26) 421.
  - composition, seasonal variation, (32) 123.
  - from unmanured and uncropped land, (32) 121.
  - loss of fertilizer constituents in, (27) 519.
  - waters of Africa, barrages for, (40) 717.
  - work, conversion table and diagram for, (27) 87.
  - work, heavy, excavating plant for, (33) 288.
- Draining the Zuider Zee, (40) 487.
- Drainpipe deposits in swamp soils, (31) 721.
- Drains, pipe, renovation, (31) 685.
- Draintile—
  - in cement, in alkali soils, (39) 86; (40) 386.
  - concrete, durability, (35) 386; (39) 393.
  - mixtures and mixing for, (40) 787.
  - reinforced, tests, (40) 787.
- Drakes, reproductive organs of, (26) 876.
- Drasterius livens, notes, (30) 758.

## Drawing—

- agricultural, textbook, (34) 487, 598.
- in agricultural schools, (36) 597.
- Dredgers, suction, manual, (37) 585.
- Dredges, use in land drainage, (34) 189.
- Dredging machinery, description, (30) 289.
- Drepanidae of Japan, (39) 262.
- Drepanothripsrouteri, notes, (28) 354.
- Drexel serological station, (32) 810; (36) 619.
- Dreyfusia piceae, notes, (26) 147; (35) 256.
- Dried blood—
  - adulteration and use, (38) 711.
  - amino acid in, (33) 665.
  - ammonification in soils, (32) 817; (33) 808; (34) 127; (36) 25.
  - analyses, (28) 364; (32) 169; (34) 263; (39) 222.
  - as affected by calcium and magnesium carbonates, (28) 523.
  - availability, (40) 125.
  - availability—
    - as affected by soils, (32) 516; (34) 130; (39) 726.
    - in presence of sodium nitrate, (38) 723.
    - in soils, (36) 819.
    - of nitrogen in, (26) 124; (27) 723; (28) 724, 725; (35) 123, 426; (39) 817.
  - composition and use, (39) 117.
  - decomposition by Streptothrix, (27) 620.
  - decomposition in soils, (36) 116; (39) 814.
  - distribution of nitrogen in, (36) 269.
  - effect on—
    - acid soil, (39) 627.
    - activity of soil fungi, (36) 215.
    - ammonification, (28) 724.
    - carnations, (36) 445.
    - composition of wheat, (38) 518.
    - lime requirement of soils, (28) 122.
    - maturity of cotton, (31) 40.
    - nitrification, (26) 721.
    - osmotic pressure of soil solution, (39) 324.
    - soil acidity, (28) 137.
    - solubility of calcium and phosphoric acid, (39) 24.
    - tomatoes, (29) 339.
    - fertilizing value, (26) 534, 838; (27) 321, 325; (28) 724, 725; (29) 129; (30) 324, 835; (31) 124, 731; (32) 516, 831; (34) 128, 129, 131, 219, 520; (35) 535; (36) 121, 818; (37) 449, 627; (38) 218, 220, 517; (39) 31, 32, 327, 623, 817.
  - for arid soils, (36) 726.
  - carnations and roses, (29) 840.
  - potatoes, (32) 739.
  - sugar cane, (32) 336.
  - loss from soils, (29) 211.
  - nitrification, (31) 724.
  - nitrification—
    - as affected by lime, (38) 119.
    - in acid soils, (30) 626.
    - in semiarid soils, (37) 319.
    - in soils, (39) 814.
  - notes, (31) 323.
  - preparation in army slaughterhouses, (37) 321.
  - production and use, (27) 327; (29) 517; (30) 126.
  - v. nitrate of soda for cotton, (31) 630.
- Dried-fruit beetle, notes, (34) 454.
- Dried grains in ration, effect on bulk of manure, (40) 126.
- Drinking glasses, sterilization, (38) 663.
- Dropsy—
  - epidemic, investigations, (26) 155.
  - in cattle at high altitudes, (32) 781.
- Drosicha lichenoides n.sp., description, (29) 255.
- Drosophila—
  - ampelophila, *see* Pomace fly.
  - confusa, rearing on sterile media, (31) 63.
  - crossing-over in, (35) 867.
  - hereditary tumor in, (40) 860.
  - melanogaster, food of, (38) 61.
  - mutations in, (33) 758.
  - obscura, notes, (27) 54.
  - paradoxa n.sp., description, (40) 860.
  - segregation of fecundity factors in, (30) 267.
  - sex chromosomes in, (31) 865.
  - spp., notes, (26) 349.
- Drought—
  - at New York City, (32) 810.
  - distribution in Sicily, (31) 716.
  - effect on composition of grasses, (28) 533.
  - frequency during crop-growing seasons, (33) 615.
  - in Georgia, (26) 27.
  - Louisiana, (29) 812.

## Drought—Continued.

- in Meramec, Arkansas, and Red River Drainage Basins, (29) 812.
- Middle West, (30) 417.
- Minnesota, (28) 716.
- New York, (29) 812.
- North Carolina, (26) 27.
- Rhodesia, (30) 211.
- the Ozarks, (26) 27.
- intensity, graphic representation, (36) 718.
- nature and methods of combating, (31) 514.
- of 1911 in England, (27) 510.
- of 1911 in Kansas, (26) 214.
- of 1918 in the Gironde, (40) 511.
- relation to weevil resistance in cotton, (26) 41.
- resistance in grapevines, (26) 239.
- resistance in Hopi corn, (30) 436.

## Droughts—

- in European Russia, (33) 20.
- in Union of South Africa, (34) 818.

## Drug—

## law in—

- Connecticut, (27) 767.
- Florida, (26) 157; (31) 259.
- Great Britain and Ireland, (28) 459.
- Louisiana, (29) 566.
- Michigan, (26) 660; (29) 61.
- Nebraska, (26) 868; (31) 67.
- Nevada, (30) 165.
- New Hampshire, (28) 862.
- South Dakota, (29) 566; (36) 63.
- Tennessee, (32) 357.
- Texas, (26) 868.
- United States, results of, (28) 357.
- Wyoming, (27) 767.

## laws—

- in California, (37) 63.
- Kansas, (28) 662; (32) 254.
- North Dakota, (33) 662.
- Rhode Island, (37) 570.
- treatise, (29) 266.

## legislation, manual, (32) 65.

## plants—

- as affected by composition of soils, (34) 18.
- breeding experiments, (30) 631.
- culture, (33) 643; (34) 236; (35) 840.
- culture and drying, (36) 642; (37) 145.
- culture experiments, (31) 536; (34) 43.
- culture in Canada, (33) 842.
- culture in England, (32) 46.
- culture in United States, (33) 241.
- description, (26) 327; (40) 247.
- fertilizer experiments, (34) 43.
- growing and collecting, (36) 743.
- improvement, (29) 31; (32) 143.
- methods of analysis, (27) 498.
- notes, (30) 145.
- of Chile, (38) 336.
- of North Dakota, (35) 730.
- of Wisconsin, (34) 345.
- production in America, (39) 449, 545.
- powders, microscopic examination, (28) 807.
- products, analyses, (29) 866.
- products, examination, (26) 462, 660.
- standards in Australia, (31) 462.
- store beetle, notes, (21) 453; (33) 253.
- stores, inspection, (26) 868.

## Drugs—

- action under pathological conditions, (26) 71.
- analyses, (30) 165; (31) 359; (32) 763; (33) 164, 165; (39) 68, 267, 669.
- bacteriological examination, (34) 713.
- control of hunger by, (40) 270.
- dispensatory, (39) 884.
- dosage, (31) 80; (33) 81.
- effect on milk secretion, (28) 175.
- effect on polyneuritis, (29) 568.
- examination, (26) 69, 461; (27) 463, 665; (36) 262.
- inspection, (32) 254; (36) 561; (40) 461, 559.
- inspection in—
  - Alabama, (33) 66.
  - California, (30) 558.
  - Connecticut, (26) 659; (28) 357; (30) 664; (33) 363; (34) 458; (35) 558; (37) 863; (39) 366.
  - Florida, (26) 69; (29) 567, 766; (31) 358; (33) 66, 164; (34) 762; (36) 467, 864.
  - France, (35) 765.
  - Georgia, (26) 660; (31) 358; (32) 763.

## Drugs—Continued.

## inspection in—continued.

- Idaho, (29) 867.
  - Indiana, (32) 254, 357; (34) 861; (37) 63.
  - Iowa, (36) 762.
  - Kentucky, (26) 69, (31) 358, 359; (34) 761.
  - Louisiana, (32) 357; (35) 663; (40) 461.
  - Maine, (31) 68; (32) 856; (36) 467; (37) 570.
  - Massachusetts, (31) 67; (33) 260; (35) 470; (37) 165.

 azo, purification, (40) 808.  
 coal tar, separation, (36) 714.  
 fat-soluble—  
 behavior in the organism, (26) 671; (27) 670.  
 effect on health, (36) 262.  
 effect on tuberculous guinea pigs, (29) 177.  
 methods of analysis, (36) 714.  
 of Dutch East Indies, (30) 697.  
 organic, methods of analysis, (27) 609.  
 photosensitizing, (40) 16, 710, 711.  
 subsidiary, determination in food colors, (29) 11.  
 use against tuberculosis, (31) 583.  
 use in food coloring agents, (29) 661.
- Dyestuffs—  
 analysis and identification, (39) 506.  
 from Latin America, (38) 248.  
 identification, (29) 12.  
 natural, (40) 16.  
 vegetable, in Madras, (36) 319.  
 vegetable, of New Zealand, (38) 309.
- Dynamite—  
 agricultural, tests, (31) 589.  
 as soil improver, (29) 748; (32) 730  
 effect on soil, (34) 125.

- Dynamite**—Continued.  
 effect on yield of cotton and corn, (31) 432; (38) 335.  
 experiments with, (33) 684.  
 for blasting ditches, (35) 789; (36) 89.  
 clearing land, (35) 887; (36) 785.  
 field crops, (35) 30.  
 heavy soils, (34) 819; (35) 493.  
 orchard soils, (33) 239; (35) 539.  
 soil preparation for alfalfa, (34) 228.  
 tree planting, (29) 339; (32) 535; (33) 439; (35) 38, 236, 752.  
 stumps, removal with, (26) 187.  
 subsoiling with, (30) 386; (32) 884.  
 use in agriculture, (33) 90.  
 use in drainage, (29) 182.  
 use in rubber culture, (34) 47; (35) 582.  
 use on the farm, (27) 292, 689; (28) 185.
- Dynamiting**—  
 effect on yield of cereals, (32) 528.  
 effect on yield of oats, (32) 430.  
 experiments, (39) 336.  
 for citrus fruit and pineapples, (31) 635.  
 for Great Plains soils, (39) 812.
- Dynamometer**—  
 for steam plows, description, (30) 389.  
 traction, description and tests, (33) 890.
- Dynamos and motors**, treatise, (29) 892.
- Dyomyx**, notes, (34) 855.
- Dyscedestis farinatella**, notes, (34) 855.
- Dyscinetus**—  
 bidentatus, notes, (38) 459.  
 spp., notes, (36) 753.
- Dysdercus**—  
 albidiventris, notes, (37) 847.  
 andreae, notes, (30) 356; (39) 862.  
 cingulatus, injurious to kapok, (26) 354.  
 delauneyi—  
 investigations, (36) 654.  
 life history and remedies, (38) 461.  
 notes, (39) 559, 638; (40) 165.  
 howardi, studies, (26) 454.  
 nigrofasciatus, notes, (28) 654.  
 ruficollis, notes, (27) 54.  
 ruficollis, parasite of, (29) 358.  
 scassellatilis, notes, (40) 854.  
 spp. on cotton, (27) 454; (39) 754, 862.  
 suturellus, see Cotton stainer.
- Dysentery**—  
 amebic, in horses, (27) 477.  
 amebic, transmission by flies, (38) 563.  
 amoebae, notes and bibliography, (26) 246.  
 chronic bacterial, see John's disease.  
 epidemic, relation to flies, (36) 156.  
 in bees, notes, (26) 561.  
 calves, studies, (26) 483, 682.  
 farm animals, treatment, (27) 181.  
 newborn calves, (40) 887.  
 red, of cattle, (40) 290.  
 spontaneous amebic, in monkeys, (36) 576.  
 toxins and antitoxins, notes, (26) 676.  
 transmission by house flies, (26) 61.
- Dytiscus**—  
 destructive to mosquito larvae, (38) 766.  
 marginalis, digestive ferments of, (26) 657.
- Dytopasta yumaella**, notes, (28) 451.
- Eagles of France**, treatise, (26) 452.
- Eantis thraso**, notes, (39) 59.
- Ear diseases**, (27) 576.
- Ear tick**—see *Ornithodoros megnini*.
- spinose**—  
 in South Africa, (39) 81.  
 life history and habits, (37) 856.  
 notes, (37) 255; (40) 656.  
 remedies, (40) 682.
- Earflies**, notes, (29) 454.
- Earias**—  
 chlorana, notes, (29) 853.  
 fabia, injurious to kapok, (26) 354.  
 insulana—  
 control, (40) 256.  
 notes, (27) 862; (28) 654; (32) 847.  
 relation to pink bollworm, (40) 857.  
 seasonal variation in, (32) 152.  
 studies, (37) 55.  
 spp. and *Rhogas* parasite in India, (38) 54.
- Earth**—  
 internal structure, (34) 614.  
 pressure, treatise, (35) 786.
- Earthquake**—  
 in Alabama, (36) 719.  
 in Missouri, (37) 513.  
 in North Carolina, (36) 19.  
 observations in a telescope, (35) 419.  
 of July 1, 1911, (26) 27.  
 southern Appalachian, of February 21, 1916, (35) 419.
- Earthquakes in**—  
 California in 1915, (35) 116.  
 California in 1916, (38) 115.  
 1916, (36) 719.  
 Philippines, (31) 615.  
 United States, (34) 615.
- Earth's electric charge**, (35) 115.
- Earths, rare**—  
 and their acids, treatise, (30) 205.  
 in soils, (31) 720.
- Earthwork haul and overhaul**, treatise, (30) 487.
- Earthworms**—  
 aeration of soils by, (26) 619.  
 effect on soil fertility, (27) 518.  
 in forest soils, (26) 223.  
 in Indiana, (36) 251.  
 of North America, (40) 267.  
 parasites of, (36) 359.  
 relation to agriculture, (30) 425.  
 relation to *Dictyocaulus filaria*, (28) 182.  
 remedies, (32) 246.  
 transmitting nematodes to fowls, (38) 83.  
 treatise, (28) 451.
- Earwig**—see *Forficula auricularia*.
- European**, life history and remedies, (38) 56.  
**European**, notes, (39) 464.
- East coast fever**, see African coast fever.
- East Park bird reservation**, California, (37) 355.
- Eceoptogaster**, see *Scolytus*.
- Ecdytophaga insiticiaria**, notes, (35) 356.
- Echelon clouds**, paper on (27) 316.
- Echidnophaga gallinacea**, see Hen flea.
- Echinacea augustifolia**, nature and use, (26) 580.
- Echinocactus**—  
 desiccation and respiration, (40) 29, 223.  
 rate and course of growth, (40) 30.  
 wislizeni—  
 accumulation and destruction of acid in, (34) 730.  
 root habits, (26) 728.
- Echinocasmus perfoliatus** in pigs, (34) 480.
- Echinochloa crus-galli**—  
 analyses, (34) 39.  
 as duck food, (30) 545.
- Echinococcus**, alveolar and hydatid, (32) 271.
- Echinococcus**—  
 disease, diagnosis, (27) 883; (30) 781.  
 veterinarian in sheep, (39) 283.
- Echinocystis oregana**, seeds of, (38) 410.
- Echinodontium tinctorium**—  
 control, (40) 842.  
 new hosts for, (33) 551.  
 notes, (27) 653.  
 on hemlock, (40) 159.  
 sporophores of, (33) 552.
- Echinomyia fera**, parasitic on gipsy moth, (31) 652.
- Echinorhynchus**—  
 canis, notes (39) 892.  
 gigas, description, (34) 280.
- Echinostoma piriforma** n.sp. notes, (30) 785.
- Echthrogonatopus hawaiiensis** n.sp., description, (28) 63.
- Eciton**—  
 (*Acamatus*) *schmitti* destructive to Argentine ant, (31) 256.  
 burchelli, notes, (40) 358.
- Eclampsia**—  
 and milk fever, similarities, (27) 185.  
 puerperal, see Milk fever.  
 relation to anaphylaxis, (26) 375.  
 serology of, (31) 180.
- Ecology**—  
 bibliography, (29) 626.  
 of Michigan dunes, (40) 226.  
 of vegetation of Breckland, (40) 424.  
 relation to agriculture, (30) 98.  
 studies, (27) 636; (31) 537; (40) 129.
- Economic**—  
 associations of rural Poland, treatise, (31) 690.  
 conditions in Serbia, (40) 791.  
 cycles, treatise, (35) 496.  
 survey in southern Minnesota, (29) 489.

- Economics—  
 home, *see* Home economics.  
 in agricultural education and research, (26) 386.  
 rural, *see* Rural economics.
- Ecpanttheria eridanus—  
 life history, (35) 758.  
 notes, (33) 554.
- Echphylus spp., table, (30) 758.
- Ecthetopyga gossypii n.g. and n.sp., notes, (29) 562.
- Ectobia germanica, *see* Blattella germanica.
- Ectoedemia—  
 castaneae n.sp., description, (29) 758.  
 heinrichi n.sp., description, (33) 655.  
 phleophaga n.sp., description, (32) 450.  
 spp. in North America, (37) 564.
- Ectogony, definition, (38) 526.
- Ectoparasites—  
 injurious to man, (34) 251.  
 of rats, (27) 754.
- Ectoproteases, properties of, (31) 377.
- Eczena—  
 epizootic, in cattle, (28) 481.  
 in horses and bovines, (29) 378.  
 relation to diet, (31) 463.
- Edaphism—  
 definition and application, (28) 718.  
 Gola's osmotic theory, (33) 321.
- Edaphon, monograph, (30) 323.
- Eddoes—  
 culture and use, (40) 763.  
 varieties, (26) 733; (36) 735; (38) 33, 335.  
 variety tests, (40) 522.
- Edema—  
 malignant, and blackleg, differentiation, (27) 182.  
 malignant, in hogs, due to vaccination, (39) 392.  
 of the wattles of fowls, (30) 785.
- Edessa mediatubunda, notes, (40) 165.
- Edestin—  
 copper compounds of, (37) 9.  
 determination in flour, (27) 498.  
 effect on gaseous metabolism in man, (28) 569.  
 hydrolysis, (28) 607.  
 immunity reactions of, (30) 778.  
 lysin content, (31) 559.  
 maintenance experiments with, (28) 864.  
 refractive indexes, (34) 803.  
 tryptophan in, (28) 411.  
 value for growth or maintenance, (37) 864.
- Education—  
 agricultural, *see* Agricultural education.  
 at Pan American Scientific Congress, (38) 794.  
 bibliography, (31) 196.  
 economic value, (27) 793.  
 in Manitoba, (27) 896.  
 relation to agriculture, (36) 595.  
 relation to mental development, (31) 557.  
 rural Denmark, (31) 598.  
 the home, (33) 397.  
 the South, conference on, (26) 697.  
 United States, statistics, (27) 797.  
 Württemberg, (27) 897.  
 industrial, in Oregon, (31) 97.  
 relation to industry, (26) 296.  
 rôle of school gardening in, (36) 94.  
 secondary, science in, (26) 296.  
 technical, in Canada, (31) 596.  
 treatise, (33) 596.  
 value to the farmer, (34) 393.  
 vocational, *see* Vocational education.
- Educational—  
 ideals, changes, (26) 299.  
 institutions—  
 effect on development of agricultural science, (29) 191.  
 higher, in Iowa, (37) 292.  
 of Washington, survey, (37) 597.  
 resources of village and rural communities, (31) 193.  
 system of Denmark, (35) 695.  
 system, state, report on, (30) 92.
- Bel—  
 grass, culture for wild ducks, (33) 251.
- Belworms, *see* Nematodes.
- Egg—  
 abnormality, (32) 870; (40) 672.  
 albumin, *see* Albumin, egg.  
 associations, cooperative, organization, (32) 870.  
 breaking outfit, description, (27) 663.
- Egg—Continued.  
 breaking plants, (39) 379.  
 conserves, artificial coloration, (27) 809.  
 conserves, methods of analysis, (32) 109.  
 demonstration train in North Wales, (30) 495.  
 diet, anaphylaxis due to, (32) 178.  
 industry in United States, (29) 774.  
 laying container—  
 at Munster Institute, Cork, (31) 569.  
 at Vineland, N. J., (37) 71; (38) 677; (39) 780.  
 in British Columbia, (34) 470.  
 Connecticut, (29) 70; (30) 271; (33) 672; (36) 570; (37) 368.  
 Kentucky, (35) 673; (39) 480.  
 Missouri, (34) 869.  
 Queensland, (38) 173.  
 laying contests—  
 average and frequency curves in, (33) 271.  
 farm-flock, in Missouri, (40) 876.  
 in Australia, (27) 876; (29) 275, 472, 672; (33) 673, 872.  
 England, (31) 472; (33) 572; (38) 72.  
 England and Australia, (26) 369.  
 Ireland, (38) 172; (40) 671.  
 New South Wales, (26) 270; (30) 773; (37) 72.  
 South Australia, (26) 876; (31) 871.  
 United States, (33) 872.  
 notes, (28) 369; (29) 696.  
 laying in different breeds of poultry, (32) 868.  
 laying records, (27) 374; (30) 675, 873.  
 marketing packages, description, (30) 873.  
 membranes, ovarian, permeability, (26) 671.  
 noodle tables, recalculation, (26) 99.  
 pastes, judging, (29) 564.  
 powder, nutritive value, (35) 368.  
 preservative, analyses, (29) 661; (38) 666.  
 production—*see also* Hens, laying.  
 and handling, (33) 299, 872.  
 and marketing, (26) 78.  
 and yellow pigment in fowls, correlation, (33) 172.  
 production as affected by—  
 hatching date, (39) 275; (40) 772.  
 inbreeding, (33) 572.  
 pituitary substance, (34) 75.  
 production—  
 breeding for, (29) 472, 696, 874; (32) 172; (36) 693; (38) 172; (39) 781.  
 computation of correlation coefficients, (40) 871.  
 cycles in birds, (37) 869.  
 diurnal time, (40) 77.  
 external characters as indications of, (35) 480.  
 feeding for, (33) 97, 672; (34) 377; (38) 577.  
 for war emergency, (38) 94.  
 illustrated lecture, (34) 196.  
 improvement, (33) 98, 271, 273; (34) 870; (37) 871.  
 in Belgium, (31) 65, 161.  
 Canada, studies, (27) 773.  
 Rhode Island Red fowls, (38) 876.

 limitations of, (30) 471.  
 of champion hens, (30) 873.  
 of different breeds, (32) 572; (34) 569.  
 of February-hatched pullets, (34) 377.  
 on the farm, (39) 176.  
 physiology, (32) 870; (36) 73.  
 production, relation to—  
 brooding instinct, (33) 74.  
 molting, (40) 77.  
 phosphorus in rations, (30) 71.  
 pigmentation, (38) 276; (39) 378.  
 size of eggs, (35) 773.  
 production—  
 rhythm of, (33) 574.  
 selection for, (33) 173; (38) 276; (39) 74, 480, 675.  
 studies, (26) 572, 770; (27) 773; (28) 367, 570, 577; (30) 378; (31) 668, 669; (32) 73; (34) 176, 869; (35) 274, 773; (36) 173; (37) 369, 869; (38) 171, 172, 373; (39) 480; (40) 876.  
 winter, (29) 574; (32) 869; (33) 574; (36) 669; (38) 497.  
 winter cycle in, (34) 470.

## Egg—Continued.

- products—  
 bacteriology, (28) 164.  
 Chinese, notes, (30) 675.  
 preservation, (27) 663.  
 proteins, digestibility and utilization, (35) 861.  
 record of a Leghorn hen, (28) 270.  
 records, individual, (39) 278.  
 shows, value of, (35) 274.  
 societies in England, (32) 792.  
 substitutes—  
 analyses, (35) 470; (39) 68, 669.  
 baking experiments, (39) 68.  
 description, (28) 862.  
 descriptions and analyses, (40) 558.  
 examination, (31) 760.  
 trade, wholesale, of Berlin, (28) 270.  
 white, digestibility, (26) 263.  
 white, effect on creaming ability of milk, (36) 76.  
 yolk—  
 antineuritic substance from, (37) 308.  
 lutein in, (26) 533; (27) 611.  
 metabolism during incubation, (37) 772.  
 osmotic phenomena of, (31) 357.  
 phosphatids, studies, (30) 163.  
 preservation and use, (29) 564.  
 prevention of beriberi by, (31) 762.  
 rôle in glycogen formation, (31) 763.  
 white and yellow, composition, (37) 772.

## Eggplant—

- canker or rot, notes, (27) 849.  
 diseases, notes, (39) 52, 453, 852.  
 early blight, notes, (38) 451.  
 fruit rot, leaf spot, or stem blight, studies, (31) 747.  
 fruit rots, studies, (31) 344; (32) 843.  
 grafting on *Solanum torbum*, (33) 139.  
 lace bug, studies, (33) 355; (38) 858.  
 Phomopsis, notes, (35) 844.  
 seedlings, breaking over, (39) 454.  
 tortoise beetle, studies, (36) 57.  
 Verticillium wilt, studies, (33) 244.  
 wilt disease, notes, (31) 343.

## Eggplants—

- breeding experiments, (27) 741; (30) 343; (36) 839; (39) 747; (40) 538.  
 color inheritance, (38) 443.  
 crossing experiments, (34) 146.  
 culture experiments, (35) 341; (37) 742.  
 fertilizer experiments, (37) 742.  
 fruit thinning experiments, (27) 741.  
 (*Gnomonia* on, (37) 732.  
 heredity in, (27) 740; (28) 740; (30) 343; (32) 538.  
 insects affecting, (36) 354.  
 irrigation experiments, (29) 638.  
 limitation studies, (34) 146.  
 new fruit disease affecting, (27) 152.  
 red spider attacking, (39) 65.  
 storage, (39) 745.  
 varieties, (34) 146.

## Eggs—

- abnormal, (33) 793.  
 alcoholized, mortality of chicks from, (40) 470.  
 artificial incubation, (26) 270.  
 as affected by quinin feeding, (40) 664.  
 as food, (28) 459.  
 as protection against pellagra, (33) 565.  
 ash analyses, (29) 861.  
 bacterial content and keeping quality, (32) 172.  
 bacterial flora of, (26) 168.  
 bacterial infection of, (33) 764.  
 bacteriology, (27) 61, 73, 374; (28) 164; (31) 171.  
 boron in, (30) 168.  
 candling, (39) 279, 881.  
 care, (28) 369, 395.  
 care and marketing, (30) 773.  
 care on the farm, (32) 763.  
 changes in during incubation, (30) 170.  
 changes in during storage, (32) 854.  
 characteristics, (38) 577.  
 chemistry and bacteriology of, (28) 860; (31) 570.  
 chemistry of, (26) 258.  
 Chinese preserved, analyses, (36) 362.  
 cholesterol metabolism of during incubation, (33) 472.  
 classification, (31) 759, 770.  
 classification at New York, (27) 572.  
 cold storage of, (26) 369.  
 cold storage, statistics, (28) 869.

## Eggs—Continued.

- collection and grading, (26) 271.  
 color xenia and teleomy in, (34) 569.  
 composition, (34) 569.  
 composition relation to vitality of the chick, (32) 869.  
 composition, seasonal variation in, (31) 271.  
 cost of—  
 cold storage, (27) 164.  
 distribution, (29) 492.  
 production, (31) 472, 473; (33) 763; (37) 871; (38) 373.  
 decomposition, (27) 763; (29) 765.  
 demonstration car work, (33) 273.  
 desiccated, bacterial content, (33) 362.  
 desiccating, (32) 264.  
 detection in foodstuffs, (30) 112.  
 detection in pastes, (40) 205.  
 deterioration—  
 (26) 154, 270; (29) 276.  
 determination—  
 in food pastes, (33) 502.  
 of decomposition in, (33) 112.  
 of nitrogen in, (39) 715.  
 determining age, (39) 278.  
 development, (33) 793.  
 development as affected by narcotics, (26) 772.  
 digestibility, (27) 108.  
 double- and triple-yoked, occurrence, (31) 170.  
 double-yoked—  
 notes, (27) 573.  
 origin, (29) 69.  
 production, (32) 771.  
 studies, (37) 371.  
 dried, examination, (26) 660.  
 drying, (28) 165.  
 ducks—  
 preservation in China, (36) 362.  
 toxicity, (33) 163.  
 duration of fertility, (26) 270.  
 dwarf, studies, (36) 73, 473.  
 early development in hens, (26) 271.  
 effect of X-rays on fermentation, (27) 231.  
 effect on bacterial content of ice cream, (32) 660.  
 enzymes of, studies, (23) 64.  
 evaporation in cold storage, (29) 276.  
 examination, (33) 164.  
 exportation from Bulgaria, (27) 279.  
 factors affecting weight, composition, and hatchability, (31) 270, 869.  
 fall and winter production, (36) 195.  
 fatty acids of, (30) 675.  
 fertile, immunity against bacterial infection, (29) 159.  
 fertility, (26) 770; (27) 73; (31) 472; (36) 71.  
 fertility experiments, (29) 574; (35) 377; (37) 682; (38) 677.  
 fertilization and incubation of, (26) 876.  
 food value, (32) 854.  
 food value and uses, (36) 761.  
 for hatching—  
 production, (36) 871.  
 shipping, (33) 763; (36) 70; (37) 682; (38) 677.  
 formation of hydrocyanic acids in, (30) 802.  
 fresh, bacterial infection, (35) 174.  
 frozen and desiccated—  
 deterioration, (27) 61.  
 healthfulness, (27) 62.  
 preparation, (27) 663; (35) 173.  
 frozen, examination, (32) 357.  
 grading, (27) 374.  
 grading, breaking, and mixing, (28) 165.  
 handling—  
 and marketing, (27) 572; (32) 252.  
 through the creamery, (27) 179.  
 hatchability, (34) 178; (40) 77.  
 hatching, Chinese incubator method, (30) 572.  
 importation from China, (31) 76, 370.  
 improving quality of, (29) 472; (34) 179.  
 increasing size of, (29) 574.  
 incubated, formation of  $\delta$ -lactic acid in, (28) 564, 711.  
 incubating—  
 carbon dioxide thrown off by, (33) 575.  
 metabolism of, (26) 877.  
 incubation, (31) 173; (36) 871; (38) 796, 876; (39) 75, 481, 781; (40) 372, 671.  
 incubation experiments, (28) 773; (29) 275; (32) 868; (33) 763; (34) 179; (36) 770.  
 infected, toxicity, (35) 264, 481, 683.  
 infection by pathogenic bacteria, (35) 264.

- Eggs—Continued.  
 infertile, production, (37) 573.  
 judging, (29) 395.  
 marketing, (26) 271; (27) 773; (28) 599, 773; (29) 875; (32) 273, 673.  
 marketing—  
     cooperatively, (26) 92; (28) 669; (32) 870; (34) 178; (38) 392.  
     in Canada, (38) 294.  
     in Ontario, (29) 70.  
     in Wisconsin, (28) 593.  
     through creameries, (33) 294.  
 meaning of size, (34) 770.  
 methods of analysis, (32) 109; (33) 258.  
 monthly receipts, (26) 94, 190, 491, 595; (28) 871.  
 mycology of, (26) 355.  
 natural incubation, (39) 781.  
 nest, (37) 70.  
 nutritive value, (31) 65, 161.  
 of hybrid ducks, nonfecundity, (29) 167.  
 opened, grading, (40) 372.  
 osmotic activity in, (27) 811.  
 ostrich, (39) 781.  
 ovomucoid and sugar in, (28) 65.  
 packing, (38) 94.  
 partly incubated, shipping, (38) 677.  
 photographic examination, (40) 115.  
 pigeons'—  
     bilaterality of, (28) 668.  
     sexual differentiation, (33) 272.  
 preservation, (26) 270, 369; (27) 374, 663, 674, 763; (28) 359, 694; (29) 172, 765, 875; (30) 271; (31) 76; (32) 470, 854, 870; (33) 299; (34) 470; (35) 396; (36) 870; (37) 268, 473, 668, 682; (38) 867; (39) 379, 780, 781.  
 preservation in China, (29) 59.  
 preserved, bacteria in, (33) 764.  
 prices—  
     as affected by cold storage, (28) 871; (35) 589.  
     in Chicago, (32) 490.  
     in Ireland, (31) 96.  
 purin content, (40) 205.  
 refrigeration, (27) 461; (28) 563; (33) 660.  
 relation between spoiling and age, (31) 759, 770.  
 reasonable variation in quality, (34) 669.  
 selection for incubation, (33) 77.  
 shipping, (26) 271.  
 shipping—  
     associations, (33) 91.  
     by parcel post, (31) 370; (32) 572; (38) 72; (39) 780.  
     by parcel post and express, (37) 682.  
     from New Zealand to Vancouver, (29) 70.  
     in carlots, (39) 378.  
 standardizing, (38) 298.  
 statistics, (31) 165.  
 statistics in United States, (28) 390; (33) 894.  
 storage, (32) 356; (39) 770.  
 structure and composition, (32) 854.  
 structure and quality, (32) 870.  
 supervision and marketing, (31) 357.  
 supply and consumption in Ithaca, N. Y., (33) 572.  
 tanners', denaturation, (27) 62.  
 testing, (31) 173.  
 time required to fertilize, (26) 470.  
 turning by the incubating hen, (26) 772.  
 use in the dietary, (29) 862.  
 variations in, (31) 569, 669.  
 weight in relation to dimensions, (36) 73.  
 weight in relation to rations, (34) 179.  
 weight of, (33) 672, 673; (36) 570.  
 weight of parts, (26) 503.  
 weights and measurements, (29) 275.  
 white v. brown shelled, (39) 376.  
 Eggshell color, studies, (36) 870; (39) 781.  
 Eggshells—  
     analyses, (38) 626.  
     in fowls as affected by male parent, (32) 263.  
     penetration by microorganisms, (29) 765.  
     structure, (29) 276.  
 Egrets, protection, (38) 556.  
 Ehretia hottentotica, analyses and digestibility, (27) 871; (32) 167.  
 Eichhornia speciosa, stomatal movement in, (26) 627.  
 Eight-spotted forester, notes, (37) 158, 255.  
 Eimeria—  
     avium, morphological study, (37) 280.  
     avium, notes, (26) 588; (27) 760; (30) 586.  
     spp., notes, (26) 483; (32) 180.  
     spp., studies, (30) 759.  
     stiedae as cause of coccidiosis in calves, (38) 183.  
     stiedae, parasitic in liver of dogs, (37) 280.  
     zurni-rivolta, studies, (40) 290.  
 Einkorn—  
     milling and baking tests, (40) 234.  
     temporary roots in, (35) 135.  
     varieties, (27) 137; (32) 528.  
 Elaphidion—  
     mite, notes, (28) 858; (31) 58.  
     villosum, notes, (28) 156; (33) 58; (34) 752; (38) 157.  
 Elasmidae of Australia, (28) 563; (39) 154.  
 Elasmopalpus lignosellus—  
     notes, (39) 765.  
     studies, (37) 851.  
 Elasmus—  
     apanteli n.sp., description, (31) 355.  
     aspidiscae n.sp., description, (36) 556.  
     mordax n.sp., description, (36) 556.  
 Elater segetis, notes, (34) 757.  
 Elaterid larvae, remedies, (31) 852.  
 Elateridae—  
     of Brazil, (35) 261.  
     phylogeny, (38) 564.  
 Elder—  
     barium in, (26) 432.  
     cork from, (31) 312.  
     frost injuries, (29) 547.  
     leaves, composition, (31) 312.  
     marsh, analyses, (34) 39.  
     notes, (30) 145.  
 Elderberries, culture experiments, (32) 540.  
 Electric—  
     cooking—  
         appliances, (31) 856; (40) 559.  
         economics of, (35) 267.  
         tests, (27) 65.  
     current—  
         cost of, (30) 88.  
         effect on concrete, (28) 589.  
         effect on transmission of excitation in plants and animals, (34) 29.  
         use in soil analysis, (26) 519, 520.  
     equipment and transmission, treatise, (37) 287.  
     equipment for farms, (36) 400.  
     heater for ether extraction, (27) 508.  
     heater for orchards, (39) 46.  
     heating, treatise, (37) 387.  
     heating units and ranges, descriptions, (36) 562.  
     incubator for bacteriological work, (29) 222.  
     light and power for rural service, (34) 488; (36) 890.  
     lighting—  
         for farms, (27) 90, 455, 589; (30) 89, 388; (36) 590.  
         for farms, treatise, (27) 388.  
         plants, storage batteries in, (27) 790.  
     motors—  
         connecting for direct drive, (30) 190.  
         cost of operation, (27) 485.  
         for irrigation pumping, (38) 186.  
         for pumps, (39) 87.  
     niagaras, use against hail, (30) 511; (34) 208.  
     oven, description, (29) 567.  
     ovens, notes, (34) 460.  
     paragresles, (31) 615.  
     plowing, (39) 88.  
     power plant at Powersite, Mo., (28) 716.  
     power, rural distribution of, (30) 589.  
     response in cotton plants, (29) 27.  
     service, rural, in Wisconsin, (37) 189.  
     slag, fertilizing value, (27) 725.  
     stimulus, application to animal life, (30) 674.  
     substations, cooperative in Denmark, (28) 487.  
 Electrical conductivity—  
     in plants, (30) 523.  
     in plants, measurement, (33) 626.  
     of solutions, measurement, (36) 503.  
 Electricity—  
     agricultural, treatise, (26) 893.  
     atmospheric, effect on plants, (30) 430; (40) 424.  
     atmospheric, variations at sunset and sunrise, (36) 419.

## Electricity—Continued.

- effect on—  
 absorption by plants, (32) 328; (35) 223.  
 germination of seeds, (31) 427.  
 growth of chickens, (30) 873.  
 plant growth, (27) 28; (28) 227, 228, 529, 530, 827; (30) 225, 524, 788, 821, 827, 828; (31) 189, 428; (36) 227; (37) 336; (38) 525, 526.  
 plant respiration, (31) 33.  
 plants, (28) 326, 428.  
 respiration of germinating seeds, (28) 732.  
 seed germination, (26) 131.  
 trees, (28) 340; (31) 153; (32) 428.  
 fixation of nitrogen by, (28) 522; (32) 125.  
 for country houses, (31) 591.  
 farms, (26) 91; (29) 184; (30) 388, 891; (32) 589, 885; (37) 387; (38) 791.  
 farms in Ontario, (30) 493; (33) 488.  
 farms, treatise, (30) 589; (33) 690.  
 irrigation pumping, (27) 86, 483; (34) 86; (35) 386; (37) 281, 786.  
 plowing, (31) 591.  
 pumping, (32) 87.  
 rural districts, (30) 788, 892; (32) 885.  
 threshing, (32) 282.  
 forcing of plants by, (26) 136.  
 of atmospheric precipitation, (34) 413.  
 prevention of accidents in use of, (30) 690.  
 production by wind power, (27) 388; (29) 184, 788; (34) 191.  
 relation to threshing machine fires, (32) 86.  
 societies, farmers' cooperative, (35) 794.  
 static, effect on sugar beets, (27) 500.  
 sterilization of milk by, (29) 580; (30) 776; (31) 175; (32) 77, 269; (33) 78; (35) 175, 378.  
 use in—  
 agriculture, (26) 789; (27) 89, 292, 388, 484, 485, 790, 891; (28) 290, 533; (30) 88; (33) 690, 890; (34) 87, 287, 686.  
 cafeteria cooking, (34) 861.  
 cooking, (27) 463; (28) 167; (33) 67, 68, 461, 565.  
 cooking and heating, (30) 166, 862; (32) 65; (35) 558; (36) 763.  
 dairies, (27) 690.  
 greenhouses, (30) 488.  
 hail protection, (31) 416.  
 ice harvesting, (28) 187; (30) 892.  
 irrigation, (28) 289; (33) 584, 589.  
 v. horsepower for threshing, (28) 591.  
 v. steam for filling silos, (32) 590.  
 v. steam for threshing, (28) 685; (30) 590.  
 v. steam in drainage pumping, (31) 890.  
 waterfall, (34) 414.  
 Electro Bordo Pulp, analyses, (31) 142.  
 Electrocardiogram—  
 of embryo chicks, (31) 173.  
 of horses, (30) 784.  
 Electrochemistry, treatise, (26) 818.  
 Electroculture—  
 experiments, (33) 827; (34) 727; (35) 524; (39) 230, 616, 735; (40) 147, 428, 429.  
 experiments—  
 at Halle, (27) 231.  
 distribution of overhead discharge wires in, (32) 486.  
 in Prussia, (27) 531.  
 résumé and methods, (30) 33.  
 review of literature, (33) 690.  
 studies, (28) 326.  
 Electrolysis, in chemical industry, (40) 109.  
 Electrolyte solutions, effect on germination, (29) 218.  
 Electrolytes—  
 absorption and excretion by lupines, (32) 824.  
 effect on—  
 coagulation of clay suspensions, (31) 618.  
 germination of seeds, (37) 431.  
 hydrolysis of starch by malt amylase, (37) 613.  
 permeability of plant cells, (27) 732.  
 seeds, (33) 727.  
 exosmosis from plant tissue, (34) 731.  
 measuring conductivity, (34) 732; (38) 523.  
 rôle in action of animal ferments, (27) 712.  
 synergetic action, (39) 630.  
 Electrolytic apparatus, platinum substitute for, (40) 109.  
 Electrometric titrations of solutions containing protein, (39) 611.

- Electromotive phenomena in plants, (26) 227; (28) 731; (32) 522; (36) 732.  
 Eleocharis palustris, digestibility, (32) 770.  
 Eleodes—  
 omissa borealis, notes, (30) 161.  
 spp., investigations, (27) 260.  
 sulcipennis, notes, (27) 561.  
 tricostata, notes, (39) 363, 565.  
 Eleodiphaga n.g. and n.spp., descriptions, (40) 653.  
 Eleolite as a source of potash, (26) 426.  
 Elephant grass—  
 composition and culture, (36) 230.  
 notes, (30) 527.  
 Elephantorrhiza elephantina, culture experiments, (37) 730.  
 Elephants, domestication in Belgian Kongo, (34) 376.  
 Eleusine—  
 coracana—  
 analyses, (38) 368.  
 analyses and digestibility, (28) 464.  
 culture experiments, (32) 227; (38) 135.  
 notes, (27) 32; (30) 229.  
 indica, analyses, (28) 463.  
 spp., notes, (26) 361.  
 Eleutheroda dytiscoides in Hawaii, (34) 59.  
 Elevator—  
 dust, analyses, (38) 666.  
 hay and grain, description, (30) 690.  
 Elevators—  
 cooperative—  
 accounting system for, (33) 192.  
 grain, in Iowa, (32) 593.  
 in Minnesota, (32) 688; (34) 392; (36) 790.  
 warehouse, in Wisconsin, (28) 593.  
 farmers', in Ohio, (40) 592.  
 Government operation, (40) 688.  
 grain, fumigation, (30) 155.  
 grain, in Canada, (32) 894; (33) 492.  
 local and terminal, (35) 296, 393.

 progress in, (27) 655; (32) 97; (34) 449.  
 textbook, (33) 652.  
 elementary, textbook, (27) 898.  
 forest—  
 in United States, (27) 858.  
 textbook, (29) 853; (32) 151.  
 treatise, (30) 851.  
 handbook, (30) 851.  
 high school, notes, (31) 395.  
 imperial bureau of Great Britain, (28) 799.  
 importance of, (32) 846.  
 in public schools, (37) 459.  
 in United States, history, (27) 656.  
 in West Indies, (26) 346.  
 international congress, (27) 399.  
 life zones in, (36) 456.  
 medical—  
 and veterinary, treatise, (34) 850.  
 as factor in the war, (40) 754.  
 textbook, (30) 852.  
 treatise, (32) 846.  
 North American, bibliography, (26) 147.  
 paper on, (31) 155.  
 teaching in public schools, (35) 897.  
 textbook, (38) 93.  
 treatise, (28) 451; (29) 555; (38) 357.
- Entomophthora—  
 chromaphidis n.sp., notes, (39) 464.  
 in Hawaii, (40) 854.  
 pseudococci n.sp., description, (28) 746.  
 spp., descriptions, (33) 459.  
 tampridarum, notes, (26) 253.
- Entomophthorae, parasitism, (32) 245.
- Entomoscelis adonidis, notes, (31) 548.
- Entomosporium—  
 maculatum—*see also* Pear and Quince leaf blight.  
 description, (26) 449.  
 notes, (34) 846; (38) 853.  
 mespili, notes, (27) 350.
- Entomothera coromanda, subspecies of, (35) 252.
- Entoromorpha intestinalis, analyses, (26) 324.
- Entorrhiza, studies and bibliography, (32) 749.
- Entylia sinuate on artichoke, (40) 58.
- Entyloma spp., life history and cytology, (26) 341.
- Environment, effect on—  
 composition of wheat, (29) 263.  
 diet, (26) 465.  
 plants, (33) 126.
- Enzym—  
 action—  
 inhibition by lime-softened water, (31) 204.  
 monograph, (39) 110.  
 nature, (27) 612, 712; (35) 203.  
 reversibility, (29) 505, 506.  
 starch as a substrate for, (36) 315.  
 studies, (29) 713; (30) 504, 806; (31) 608, 710, 761; (32) 710, 803; (34) 111; (38) 709, 802, 803; (39) 203.  
 treatise, (32) 19.  
 reactions—  
 as affected by viscosity of medium, (26) 504.  
 of milk, (32) 299.  
 synthesis, studies, (28) 729.  
 synthesis, theory of, (30) 204.
- Enzymes—*see also* Ferments.  
 as affected by—  
 carbonaceous food, (28) 727.  
 halogens, (28) 609.  
 light, (28) 110.  
 low temperatures, (33) 803.  
 behavior in after-ripening of potatoes, (26) 626.  
 chemistry of, (27) 802; (34) 502.  
 chemistry of, treatise, (30) 409.  
 cleavage of cellulose by, (28) 802.  
 coagulating, action on caseinogen, (32) 607.  
 composition and formation, (26) 309.  
 determination in sputum, (29) 782.  
 diastatic, hydrolysis of glycogen by, (29) 166.  
 diffusion from rind toward interior of cheeses, (32) 175.  
 digestive, action on intestinal parasites, (33) 478.

## Enzymes—Continued.

- effect on—  
 glucosids, (28) 503.  
 hexose phosphate, (30) 410.  
 milk held at low temperature, (31) 373.  
 respiration of plants, (27) 221.  
 saccharin, (26) 257.  
 formation, (30) 111.  
 formation and regulation by mold fungi, (31) 730.  
 formation of alkali by, (30) 111.  
 fungus, studies, (27) 25.  
 handbook, (28) 202.  
 hydrolysis of phosphorus compounds by, (29) 166.  
 importance in medicine and surgery, (32) 474.  
 in treatment of diseases, (31) 607.  
 intracellular, studies, (32) 112.  
 method of dialysis, (40) 111.  
 method of purifying, (40) 408.  
 of alfalfa (32) 410.  
 alfalfa seeds, (28) 710.  
 animal tissues, (39) 608.  
 apples, (34) 201; (39) 310.  
 Aspergillus oryzae, (32) 710.  
 Aspergillus terricola, (33) 410.  
 Botrytis cinerea cultures, (39) 247.  
 bread making, (26) 358.  
 cacao, (35) 414.  
 eggs, studies, (28) 64.  
 Fucus vesiculosus, (30) 728.  
 germinating red gram, (38) 9.  
 large intestine, (36) 366.  
 leaves of Salix caprea, (31) 310.  
 Linaceae, (28) 502, 503, (31) 610.  
 mammary gland and milk, (32) 411.  
 marine algae, (35) 25.  
 milk, (26) 313.  
 milk and butter, (38) 479.  
 milk, filtering, (39) 713.  
 normal serum, (39) 608.  
 pancreatic juice, coagulation, (38) 710.  
 pig ovaries, (27) 670.  
 tobacco plant, (31) 204.  
 washed zymoin and dried yeast, (30) 504.  
 yeast, proteoclastic, (39) 607.  
 oxidase, notes, (34) 711.  
 oxidizing, studies, (27) 502.  
 oxidizing, toxicity of, (28) 443.  
 peptid-splitting, in human milk, (26) 803.  
 plant, studies, (32) 523; (34) 428, 731; (35) 334.  
 precipitation by aluminum hydroxide, (30) 504.  
 production and activity of, (34) 32.  
 protective, appearance after injection of foreign substratum, (32) 112.  
 protective, studies, (31) 378; (33) 385.  
 proteolytic—  
 action and regeneration, (30) 409.  
 activity, (27) 878.  
 activity in flour, (35) 265.  
 as affected by phosphates, (29) 309.  
 as affected by salt and cold storage, (29) 268.  
 detection, (27) 803.  
 distribution in animal and vegetable kingdoms, (31) 377.  
 in grape must, (27) 803.  
 of blood, (37) 478.  
 plant, inhibitors, (37) 204.  
 textbook, (38) 611.  
 regeneration, (28) 408.  
 relation to citrus diseases, (29) 248.  
 relation to manganese, (31) 220.  
 respiratory, of Sauromatum venosum, (28) 528.  
 review of investigations, (30) 11; (39) 10.  
 role in—  
 blood reactions by ricin, (31) 773.  
 denitrification, (32) 112.  
 immunity, (40) 579.  
 silage fermentation, (36) 802.  
 synthesis of fats by, (26) 307; (27) 108.  
 synthetic action, (31) 608.  
 textbook, (32) 662.  
 use in carbohydrate analysis, (35) 206, 315.  
 $\beta$ -Enzymes, distribution in plants, (28) 503.  
 Eocornarium musciola, studies, (40) 452.  
 Eocymar n.g. and n.spp., descriptions (27) 554.  
 Eosin—  
 effect on animals, (28) 880.  
 feeding value, (27) 378.  
 toxicity toward plants, (28) 740.

- Eosinophil leucocyte, development, (30) 681.  
 Eosinophilia—  
 natural occurrence, (39) 585.  
 notes, (34) 276.  
 Eosinophils, investigations, (34) 878, 879.  
 Epalpus sp. (?) with intracuticular stage, (33) 157.  
 Epelis truncataria faxonii, notes, (31) 752; (33) 352.  
 Ephemera—  
 aestivalis n.sp., description, (34) 363.  
 incompletus, parasitic on rose aphid, (31) 250.  
 nitidus n.sp., description, (38) 165.  
 Epheleis oryzae, notes, (38) 547, 848.  
 Ephestia—  
 cahiritella, notes, (34) 754.  
 cautella, notes, (32) 151; (37) 156.  
 cautella, studies, (26) 248.  
 elutella, notes, (26) 354; (29) 54.  
 kuehniella, see Mediterranean flour moth.  
 Epialtes, notes, (40) 760.  
 Ephydra—  
 gracilis, notes, (39) 362.  
 macellaria, notes, (38) 363.  
 Epiblema tedella, notes, (34) 855.  
 Epicampe macrousa as a paper-making material, (34) 318.  
 Epicauta—see also Blister beetles.  
 adspersa, cantharidin content, (30) 357.  
 atomaria, notes, (40) 170.  
 spp., injurious to potatoes, (37) 157  
 spp., notes, (28) 654.  
 Epichloe typhina—  
 notes, (30) 746.  
 on Bromus erectus, (40) 156.  
 Epicoccum—  
 purpurascens, fixation of nitrogen by, (27) 255.  
 sp. on sweet potato, (39) 854; (40) 347.  
 Epiddymo-vaginalitis, infectious, in horses, (27) 888.  
 Epidinocarsis pseudococci n.sp., description, (34) 456.  
 Epidote, solubility of lime in, (40) 812.  
 Epilachna—  
 borealis, reflex "bleeding", (36) 58.  
 corrupta, notes, (28) 853; (29) 453.  
 corrupta, studies, (37) 465.  
 drugei, notes, (36) 654.  
 spp., injurious to potatoes, (30) 255.  
 vigeniotoxipunctata, notes, (29) 453.  
 Epilepsy in guinea pigs, (35) 564.  
 Epilobium—  
 angustifolium, textile fibers from, (32) 509.  
 factors affecting development, (26) 728.  
 hirsutum, fiber from, (39) 510.  
 hirsutum, germination in light, (31) 323.  
 hybrids of, (35) 818.  
 Epimechus spp., notes, (30) 357.  
 Epimechus willii, parasitic on spiders, (31) 355.  
 Epimys rattus, history, (35) 656.  
 Epinephrin in fetal pituitary and suprarenal glands, (34) 675.  
 Epinotia—  
 fasciolana, studies, (34) 852.  
 nanana, notes, (34) 855.  
 piceafoliana, notes, (29) 256.  
 Epiphanin reaction—  
 notes, (26) 579; (29) 881, 882.  
 studies, (28) 375.  
 Epiphytes—  
 extreme atmospheric, nutrition, (35) 431.  
 osmotic pressure of, (32) 221.  
 Epiprira dilutata, notes, (35) 756.  
 Epitetrastichus lecanii n.sp., description, (37) 59.  
 Epithelioma, contagious—  
 immunization, (30) 785.  
 in chickens, (32) 677.  
 in fowls, (30) 884; (34) 189; (35) 885; (37) 78;  
 (39) 184, 687, 791.  
 in quail, (37) 83.  
 virus of, (31) 88.  
 Epitheliosis infectiosa avium, studies, (35) 283.  
 Epithelium, occurrence of fat in, (26) 366.  
 Epitetrastichus ibseni n.sp., description, (37) 59.  
 Epitrix—  
 cucumeris, see Potato flea-beetle.  
 fuscula remedies, (34) 361.  
 nigroaenea, notes, (37) 765.  
 parvula, see Tobacco flea-beetle.  
 sp. on castor bean, (40) 453.  
 sp. injurious to horse-nettle, (35) 657.

- Epitrix**—Continued.  
 spp. injurious to tobacco, (36) 355; (37) 256.  
 subserinita, notes, (37) 157.
- Epitrius** indigator, notes, (28) 755.
- Epizootics** and their control during war, (38) 287.
- Epocha** canadensis, *see* Currant fruit-fly.
- Eprhopalotus**, new genus, (39) 468.
- Epyris** extraneus n.sp., notes, (38) 557.
- Equidae**—  
 digestion experiments, (31) 769; (32) 262.  
 teeth, studies, (27) 674.
- Equilibrium** in solutions of salts, (39) 203, 204.
- Equisetum**—  
 arvense, poisoning of horses by (29) 281.  
 sylvaticum, eradication, (27) 733.
- Equitation**, treatise, (28) 269.
- Equus**—  
 przewalskii—  
   hybrids, fertility of, (26) 163.  
   notes, (27) 471.  
 spp., hybrid, notes, (26) 269; (28) 68.
- Eragrostis**—  
 abyssinica—  
   analyses (28) 738; (32) 465.  
   culture in Porto Rico, (29) 631.  
   notes, (27) 32, 637.  
   major, analyses, (30) 565.  
 spp., analyses, (36) 334.  
 spp., analyses and digestibility, (27) 871; (32) 167.  
 spp., notes, (26) 361.  
 spp., studies, (38) 66.
- Erannia** tiliaria, *see* Limes, winter moth.
- Ere** beans, culture experiments, (29) 830.
- Erebus** odora, notes, (27) 756.
- Eremaeus** modestus, notes, (28) 457.
- Eremascus** fertilis, notes, (28) 562.
- Eremnus** fulleri n.sp., description, (33) 159.
- Eriocetrus**, new genus, description, (31) 237.
- Erepsin**—  
 effect on catalase solutions, (33) 311.  
 protein cleavage by, (36) 108.
- Erepton**, effect on dogs, (28) 568.
- Erethistes** lateralis—  
 catherinensis, notes, (33) 658.  
 notes, (32) 352.
- Ergates** faber, notes, (30) 249.
- Eriograph** for lower extremities, description, (30) 563.
- Ergometer**—  
 bicycle—  
   calorimetric calibration, (33) 757.  
   description, (30) 767.  
   with electric brake (27) 768.  
   brake type, description, (31) 764.
- Ergot**—*see also specific host plants.*  
 dissemination by insects, (27) 47.  
 notes, (32) 337, 441.  
 of Equidae (34) 568.  
 of oats, (27) 149.  
 of wild rice, studies, (34) 444.  
 toxicity toward cattle, (26) 586; (28) 80.
- Eri** silk, notes, (27) 861.
- Erianthus** cary-cog, description and use, (31) 332.
- Eriaceae**, endotrophic mycorrhiza, (39) 26.
- Eriacids**, evergreen, xerophily of, (31) 728.
- Eriacus** pela, studies, (35) 256.
- Erichloa** punctata, analyses, (27) 469.
- Eriogon** annus and its control, (40) 738.
- Eriocampa** adumbrata, notes, (31) 848.
- Eriocampoides**—  
 amygdalina, studies, (26) 152.  
 cerasi, remedies, (28) 659.  
 limacina, *see* Pear slug.
- Eriocera** spp., biological and systematic studies, (32) 153.
- Eriochloria japonica** as a host of lung distome, (36) 577.
- Eriochloa**—  
 punctata, analyses, (28) 463.  
 ramosa, description and analyses, (31) 431.  
 ramosa, notes, (26) 361.
- Eriococcis**—  
 azaleae, notes, (37) 255.  
 cockerelli n.sp., description, (30) 549.
- Eriopeltis** coloradensis, notes, (29) 252.
- Eriophorum** vaginatum as a source of fiber, (37) 736.
- Eriophyes**—  
 calacladophora, notes, (28) 654.  
 effect on maples, (40) 554.
- Eriophyes**—Continued.  
 gossypii, notes, (30) 356.  
 gossypii, occurrence in Barbados, (27) 60.  
 malifoliae, notes, (37) 570.  
 n.sp., notes, (36) 261.  
 n. sp., descriptions, (30) 362.  
 oleivorus, *see* Citrus rust mite.  
 pruni, remedies, (40) 459.  
 pyri, *see* Pear-leaf blister mite.  
 quadrisetus, notes, (34) 450.  
 ribis, life history, (30) 399.  
 ribis, notes, (31) 853, 854.  
 sp., notes, (31) 752.  
 sp. on apples, apricots, and plums, (32) 551.  
 sp. on poplar, (40) 359.  
 spp., notes, (32) 651.  
 triradiatus on willows, (33) 56.  
 vitis, remedies, (26) 561.
- Eriopus** floridensis, *see* Callopietria floridensis.
- Eriosoma**—*see also* Schizoneura.  
 crataegi and E. lanigera, synonymy, (39) 258.  
 lanigerum, *see* Apple aphid, woolly.  
 pyri, identity, (34) 854.  
 pyricola, n.sp., description, (35) 463.  
 pyricola, studies, (37) 661; (38) 560.  
 quercu, identity, (36) 551.  
 spp., alternate host habits, (39) 464.  
 spp., comparison, (35) 464.  
 ulmi, notes, (27) 758; (29) 654.  
 ulmi, studies, (38) 464.
- Eriosphæria** sacchari, notes, (40) 157.
- Erioxylon**, glands of, (39) 431.
- Eristalis**—  
 aeneus, life history, (29) 456.  
 sp., relation to intestinal myiasis, (28) 780.
- Ermine** moths, small, notes, (32) 754.
- Erodium**—  
 bacterial disease of, (32) 53.  
 cicutarium, seeding on ranges, (30) 35.  
 cygnorum, analyses, (27) 469.
- Erotylidae**, catalogue, (26) 560.
- Eruca** sativa, oil content, (31) 234.
- Ervum** lens, fertilizing value, (26) 233.
- Erynnia** vibrissata, notes, (31) 251.
- Erysipelas**—  
 anaphylatoxin, notes, (28) 778.  
 bacilli, culture differences, (39) 287.  
 diagnosis, (30) 180.  
 immunization, (29) 176.  
 in hogs, *see* Hog erysipelas.  
 in pigeons and ducks, (39) 287.
- Erysiphaceae**—  
 characteristics, (30) 537.  
 formation of conidiophores, (27) 351.
- Erysiphe**—  
 communis—  
   notes, (29) 243.  
   spread from wild to cultivated plants, (26) 243.  
 graminis—  
   notes, (26) 646; (28) 149; (34) 644, 845; (36) 846; (38) 48.  
   overwintering, (33) 647.  
   studies, (33) 146, 847; (35) 651.  
   susceptibility of wheat to, (29) 844.  
   treatment, (28) 346.  
 polygoni—  
   notes, (28) 52; (29) 450, 650; (30) 351; (33) 545; (34) 52.  
   treatment, (32) 545.  
   sp. on tomato, (39) 651.  
   spp., notes, (37) 453, 551, 657.  
   tortilis, notes, (37) 550.
- Erythraeus**—  
 arvensis, notes, (27) 561.  
 sp., notes, (28) 755.
- Erythrastides** pygmaeus, notes, (37) 255.
- Erythrina** vulgata, disease of (35) 354.
- Erythrite**—  
 as source of carbon for molds, (30) 226.  
 determination, (26) 709.  
 structure of, (28) 506.
- Erythrocytes**—  
 nonnucleated, origin, (32) 377.  
 of Australian vertebrates, (34) 577.  
 of ox, pig, and sheep, (38) 481.
- Erythroextrin**—  
 in starch hydrolysis, (40) 460.  
 salivary digestion, (36) 661.

- Erythroneura**—  
 ador n.sp., description, (40) 261.  
 comes, *see* Grape leafhopper.  
**Erythrosin**, action of, (28) 880.  
**Escanaba River**, water power projects on, (28) 415.  
**Escutcheon**—  
 relation to milk and butter production, (34) 670.  
 value in judging dairy cattle, (29) 775.  
**Eskimos**, Alaskan, standard of living, (32) 358.  
**Esparto**—  
 grass dust, analyses, (28) 523.  
 notes, (31) 832.  
**Espersette**, culture experiments, (33) 33.  
**Essence industry**, manual, (35) 717.  
**Essences**, determination in liquors, (35) 717.  
**Essential oils**, *see* Oils, essential.  
**Essigella pini** n.sp., description, (40) 651.  
**Esterase**—  
 detection, (33) 713.  
 distribution in animal body, (37) 308.  
 of castor beans, (32) 803.  
**Ester-hydrolyzing substances**, activity, (38) 803.  
**Esters**—  
 as affected by temperature, (28) 63.  
 fatty acid, of glucose, (29) 269.  
 hydrolytic action, (27) 802.  
 occurrence in silage, (28) 608.  
 unsaponifiable, absorption in the intestine, (29) 768.  
 volatile, determination in citrus oils and extracts, (34) 410.  
**Ether**—  
 detection in ethyl alcohol, (29) 312.  
 effect on—  
 germination of seeds, (31) 335.  
 germination of wheat, (27) 220.  
 growth of *Endothia*, (35) 250.  
 hemolytic reaction, (36) 878.  
 inversion of saccharose, (33) 523.  
 nitrification, (27) 131.  
 permeability of plant tissues, (28) 732; (37) 326.  
 plants, (27) 27, 131.  
 plasma membranes, (26) 824.  
 seed germination, (26) 131.  
 soil micro-organisms, (31) 27.  
 soils, (37) 519.  
 extract—  
 determination, (39) 313.  
 of egg yolk, chemistry of, (26) 503.  
 of feeding stuffs, (32) 709; (34) 13.  
 of fodders, composition and digestibility, (27) 500.  
 of hays and fodders, composition and digestibility, (28) 69, 108.  
 forcing plants with, (28) 837.  
 forcing strawberries with, (28) 145; (31) 238.  
 sterilization of soils by, (32) 816.  
 still, description, (36) 504.  
**Ethereal oils**—  
 in spruce wood, (29) 504.  
 production from wood, (28) 50.  
**Etherization**, effect on—  
 enzymatic activity of bulbs and tubers, (30) 728.  
 plant metabolism, (26) 127.  
**Ethers**, fruit, character and uses, (30) 258.  
**Ethyl**—  
 acetate vapor, larvicidal value, (34) 359.  
 alcohol—  
 adulteration, detection, (29) 312.  
 assimilation by yeasts and fungi, (28) 824.  
 effect on soil microorganisms, (31) 27.  
 effect on synthetic action of emulsin, (29) 505.  
 insecticidal value, (39) 762.  
 methods of analysis, (29) 312.  
 occurrence in silage, (28) 608.  
 wood waste as source of, (40) 17.  
 butyrate as affected by glycin, (28) 409.  
 nitrate, assimilation by plants, (26) 32.  
 nitrite, determination in spirit of nitrous ether, (27) 614.  
 phosphoric acid, hydrolysis by dilute acid and alkali, (31) 805.  
**Ethylene**—  
 detection, (29) 529.  
 effect on plant metabolism, (34) 266.  
 gas, detection in laboratory air, (30) 227.  
 gas, detection with sweet pea seedlings, (29) 132.  
**Ethylgalactosid**, sources, (38) 429.  
**Eticlla zinckenella schisticolor**, studies, (27) 552.  
**Etros**, culture in California, (40) 246.  
**Eubacteriales**, nomenclature and classification, (39) 124.  
**Eucactophagus**—  
 graphipterus, notes, (34) 158.  
 n.spp., descriptions, (40) 655.  
**Eucallipterus flavus**, notes, (34) 453.  
**Eucalymnatus tessellatus**, notes, (28) 854.  
**Eucalyptol**—  
 chlorination products, preparation, (38) 378.  
 toxicity, (39) 586.  
**Eucalypts**—  
 and their products, (33) 646.  
 botanical and chemical characters, (35) 841.  
 culture and exploitation, (39) 351.  
 culture in Dominica, (34) 438.  
 growth on overflow land, (29) 338.  
 in Coronado National Forest, (26) 51.  
 manual, (30) 447.  
 new species, descriptions, (26) 745.  
 reforestation in the Tropics, (26) 141.  
 tolerance for alkali, (26) 642.  
 varieties, (27) 842; (29) 638.  
 Western Australian, notes, (26) 745.  
**Eucalyptus**—  
 australiana n.sp., description, (36) 45.  
 borer in South Africa, (39) 868.  
 canker, studies, (39) 254.  
 critical revision of genus, (39) 146.  
 crown gall affecting, (28) 447.  
 culture in northwest India, (28) 643.  
 culture, treatise, (27) 442.  
 descriptive notes, (36) 45.  
 disease, description, (27) 253.  
 frost resistance in California, (39) 146.  
 globulus, *Hendersonia* disease of, (27) 548.  
 globulus plantations of Nilgiris, (29) 443.  
 industry in California, (28) 643.  
 n.spp., descriptions, (34) 742.  
 oil industry in Nilgiris, (38) 8.  
 oil, larvicidal value, (34) 359.  
 platypus, essential oil of (36) 710.  
 posts, preservation, (29) 443.  
 pulverulenta, leaf spot of, (29) 156.  
 rudis, culture experiments, (34) 232.  
 rudis, yields, (33) 49.  
 strength and elasticity tests, (27) 43.  
 variant forms, (38) 45.  
 yield in California, (28) 239.  
**Eucelatoria australis**, notes, (29) 357.  
**Euceraaphis gillettei** n.sp., description, (34) 453.  
**Eucerychysus scolyti** n.sp., description, (31) 355.  
**Eucharidae** of Australia, (39) 154.  
**Euchirinae** of British India, (40) 63.  
**Euchlaena**—  
 and *Tripsacum*, hybrid between, (36) 27, 28.  
 mexicana, composition, (33) 162.  
**Euclea** indetermina, notes, (29) 855.  
**Euclemensia bassettella**, notes, (37) 255.  
**Eucolla**—  
 keilini, notes, (30) 758.  
 rapae, notes, (33) 862.  
**Eucommia ulmoides** as a source of rubber, (37) 417.  
**Eucosma haracana**, life history, (33) 655.  
**Eudamus**—  
 proteus, *see* Bean leaf roller.  
 tityrus, notes, (35) 356.  
**Eudemis**—  
 botrana—  
 biology and control, (33) 555.  
 control, (38) 257; (40) 167.  
 notes, (28) 453; (36) 460.  
 moth—  
 biology and control, (26) 758, 860; (27) 758.  
 destruction by heat, (28) 752; (34) 653.  
 notes, (27) 56, 57; (28) 160; (34) 851.  
 studies, (36) 355; (40) 167, 356.  
 vacciniana—  
 notes, (28) 854; (33) 352.  
 remedies, (30) 154; (37) 56; (39) 60.  
 studies, (26) 857; (31) 453; (36) 54; (40) 753.  
**Euderomphale fuscipennis** n.g. and n.sp., description, (36) 557.  
**Euderus columbianus**, notes, (36) 556.  
**Eudiagogus rosenchoeldi**, notes, (34) 656.  
**Eudialeurodicus bodkini** n.g. and n.sp., description, (35) 256.  
**Eudorina** as affected by copper sulphate, (39) 27.

- Euetheola rugiceps*, life history and remedies, (38) 263.
- Eugenia*—  
*smithii*, essential oil of, (36) 710.  
*uniiflora*, description and culture, (35) 144.  
*uniiflora* host plant of fruit fly, (26) 758.
- Eugenics*—  
 and agriculture, (36) 92.  
 and heredity, treatise, (28) 271.  
 discussion, (27) 486.  
 tables of statistical error, (26) 773.
- Eugenol, preservative action, (26) 157.
- Euglobulin, solution and precipitation, (31) 804.
- Eugonia californica*, bird enemies of, (26) 346.
- Euguform, use against foot-and-mouth disease, (27) 379.
- Euhallidaya severinii* n.g. and n.sp., description, (32) 851.
- Eulachnus thunbergii* n.sp., description, (40) 651.
- Eulachon, food value, (38) 468; (39) 570.
- Eulecanium*—  
*cerasi*, remedies, (33) 653.  
*corni*, notes, (29) 251; (38) 464.  
*nigrofasciatum*, see *Terrapin* scale.  
*persicae*, see *Peach* scale.  
*pruinorum*, notes, (26) 149.
- Eulophidae*—  
 of Australia, (39) 154.  
 of North America, (39) 468.
- Eulophus*—  
*longulus*, studies, (28) 560.  
 sp., notes, (26) 151.  
 sp., parasitic on alfalfa weevil, (31) 61.
- Eulyptus* spp., notes, (30) 357.
- Eumarschalia gennadii* n.subg. and n.sp., notes, (34) 360.
- Eumenes maxillosa*, notes, (27) 862.
- Eumerus strigatus*—  
 in Canada, (37) 565.  
 in New Jersey, (40) 654.  
 notes, (28) 158; (30) 453; (31) 757.
- Eumeta junodi*, notes, (27) 456.
- Eumicrosoma benefica*—  
 life history, (34) 363.  
 n.g. and n.sp., description, (31) 355.  
 studies, (31) 354.
- Eumonycha pictipes* n.sp., description, (37) 58.
- Eumotus americanus* n.sp., description, (35) 262.
- Euonymus*—  
 bud variation in, (37) 145.  
*japonicus*—  
 anthracnose disease, new, (39) 758.  
 mildew affecting, (28) 241.  
 respiration investigations, (34) 523.  
 Oidium, treatment, (27) 855.  
 scale, notes, (31) 548.
- Eupachylomma rileyi*, parasitic on spring grain aphid, (32) 353.
- Eupachyrrhynchus*, n.g. and n.sp., description, (28) 561.
- Eupad*, preparation and use, (39) 80.
- Eupalus* sp., notes, (27) 861.
- Eupatorium urticaefolium*—  
 relation to milk sickness, (37) 583; (39) 490.  
 toxicity, (38) 685, 883; (40) 681.
- Eupelminus*—  
*coleopterophagus* n.sp., description, (36) 259.  
*meteorii* n.sp., description, (31) 355.  
*saltator*, studies, (39) 265.  
*swzeyi* n.sp., description, (34) 66.
- Eupelmis testaceiventris* n.sp., description, (28) 162.
- Eupelmus*—  
*allynii*, studies, (35) 466.  
*cereanus*, parasitic on bee moth, (26) 657.
- Eupeodes volucris*, parasitic on rose aphid, (31) 250.
- Euphagus cyanocephalus*, destruction of locusts by, (28) 351.
- Euphonia*, development of stomach in, (32) 265.
- Euphorbia*—  
*characias latexi*, lipases of, (31) 410.  
*cyprissias* as affected by *Uromyces pisi*, (26) 650; (31) 347.  
 hemagglutinin content, (30) 503.  
 latex, chemical constitution, (29) 30.  
*lorifolia* as a source of rubber and chicle, (28) 49.  
 of Hawaii, (40) 261.  
 spp., coagulation of latexes, (27) 44.  
 spp., root systems, (37) 542.  
 systematic position of genus, (20) 30.  
*tirucalli*, monograph, (35) 842.
- Euphoria sepulchralis* on artichoke, (40) 58.
- Euphoriana uniformis* n.g. and n.sp., description, (31) 355.
- Euphorocera*—  
*claripennis*—see also *Phorocera claripennis*.  
 notes, (31) 752.  
*floridensis*, notes, (36) 255.
- Euphyllura olivina*, notes, (30) 455.
- Eupithecia assimilata*, hymenopterous parasite of, (26) 657.
- Euplectrus*—  
*insuetus* n.sp., description, (35) 262.  
 n.spp., descriptions, (26) 63.
- Euplexoptera* of Connecticut, (26) 147.
- Euproctis*—  
*chryssorrhoea*, see *Brown-tail* moth.  
 sp. affecting tea, (34) 652.
- Eupteroecalla opazoi* n.g. and n.sp., description, (37) 460.
- Eupteromalus*—  
*arvensis* n.sp., description, (30) 661.  
*sarcophagae* n.sp., description, (35) 262.  
 sp. parasitic on locusts, (32) 60.  
*tachinae* n.sp., description, (38) 165.
- Eupterygidae*, genera of, (40) 354.
- Euptoieta heyesia*, notes, (27) 559.
- Eurosta solidaginis*, notes, (33) 55.
- Euryachora*—  
*coffeicola*, notes, (38) 51.  
*sacchari*, notes, (37) 553.
- Eurycreon rantis*, notes, (28) 752.
- Eurydinota lividicorpus* n.sp., description, (38) 565.
- Eurygaster integriceps*—  
 egg parasites of, (31) 256.  
 studies, (31) 59.
- Euryum eurytheme*, studies, (32) 57.
- Eurytoma*—  
*amygdalis*, biology and remedies, (32) 156.  
*ctenodactylomyii* n.sp., description, (36) 556.  
*juniperinus* n.sp., description, (34) 450.  
 n.sp., description, (36) 557.  
*pissodis* n.sp., description, (38) 565.  
*piurae* n.sp., description, (30) 59.  
*pyrrhocerus* n.sp., description, (29) 562.  
 sp., description, (37) 59.
- Eurytomidae* of Australia, (39) 154.
- Eusattus muricatus*, notes, (35) 364.
- Eusepes*—  
*batatae*, notes, (28) 158; (30) 356; (33) 554, 563; (37) 256; (38) 864.  
*porcellus*, notes, (40) 259.
- Eusol*—  
 antiseptic value, (40) 182.  
 preparation, (40) 414.  
 preparation and use, (39) 80, 286.
- Eusophara osseatella* on potatoes, (39) 466.
- Eustrongylus filaria*, notes, (30) 381.
- Eustylomorphus squampunctatus* n.g. and n.sp., description, (32) 658.
- Eutane terminalis*, notes, (39) 557.
- Eutelanae* in British Museum, catalogue, (28) 856.
- Eutelus*—  
*betulae* n.sp., notes, (38) 565.  
*bruchophagi* n.sp., description, (38) 165.  
*bruchophagi*, studies, (40) 862.  
 sp., notes, (26) 151.
- Eutermes*—  
*monoceros*, notes, (31) 58.  
*morio*, remedies, (36) 355.
- Eutettix*—  
 n. spp., description, (34) 255.  
*tenella*, see *Beet leafhopper*.
- Euthamia caroliniana*, volatile oil of, (36) 206.
- Euthrips*—  
*citri*, see *Orange thrips*.  
*insularis*, notes, (28) 250.  
 n.spp., descriptions, (31) 549.  
 occidentalis, studies, (34) 450.  
*pyri*, see *Pear thrips*.  
*tritici*, see *Flower thrips* and *Frankliniella tritici*.
- Eutochia fullo*, notes, (29) 858.
- Eutrixoides jonesii* n.g. and n.sp., description, (28) 560.
- Eutypa*—  
*caulivora*, notes, (34) 442.  
*crumpens*, notes, (31) 746; (34) 841.  
*lutibunda coffeicola*, notes, (38) 51.
- Eutypella prunastri*, notes, (26) 446.
- Euvalsa paulowniae* n.sp., description, (38) 648.

*Euванessa antiopa*, notes, (28) 158; (29) 251.

**Euxesta**—

*chavannei* n.sp., description, (33) 860.  
*notata*, larvae of, (36) 359.  
*notata*, notes, (34) 360.

**Euxoa**—

*excellens*, notes, (38) 60.  
*ochrogaster*, notes, (32) 448.  
*ochrogaster*, poisoned bait for, (34) 358.  
*ridingsiana*, notes, (29) 158; (36) 53.  
*segetum*, see *Agrotis segetum*.  
spp., notes, (27) 659.

*Euzenillloipsis diatraeae* n.g. and n.sp., description, (36) 554.

**Euzophera**—

*aeglaella*, notes, (35) 656.  
semifuneralis, studies, (33) 454.

*Evania* spp. on *Stylopyga orientalis*, (33) 750.

**Evaporation**—

and absorption, (38) 210.  
and plant succession in southeastern Washington and adjacent Idaho, (32) 626.  
and rainfall in eastern Pennsylvania, (32) 34.  
and run-off, relation to precipitation, (40) 810.  
apparatus, description, (40) 505.

as affected by—

forests, (29) 842.  
shade, (26) 821.  
volcanic haze, (29) 721.

at different levels above soil surfaces, (29) 615.

devices, description, (37) 409, 503.  
effect on soil moisture, (28) 218.  
formula, (37) 882; (38) 511.

from circular water surfaces, (38) 115, 223.

forest and cultivated soils, (37) 418.  
irrigation reservoirs and canals, (34) 387.  
lakes, (27) 817.

loam and sandy soils, (30) 21.  
snow surfaces, (38) 209, 416.  
soils, (29) 125, 615; (31) 25; (36) 421.  
soils and plants, relation to weather, (28) 212.

the Nile at Khartum, (28) 27.  
water surfaces, (26) 417, 614; (28) 219; (29) 225, 615; (30) 118, 713.

water surfaces and river beds, (37) 785.

in Egypt and Sudan, (27) 817.

marshes, (29) 615.  
prairie and forest plants, (26) 821.  
studies of insects, (31) 350.  
the atmosphere, (31) 615.  
Turgai-Ural Colonization District, (26) 620.

kinetic theory, (36) 719.

lunar periods, (38) 510.

measurement, (33) 320; (36) 226; (39) 810.

multiple effect, studies, (30) 890.

observations, (30) 317; (36) 719.

paper on, (31) 213.

relation to—

plant distribution, (28) 212; (29) 826.  
plant succession, (32) 128; (37) 725; (39) 122.  
soil bacteria, (27) 516.  
wilting of plants, (27) 515.

stations, installation and operation, (34) 509.

studies, (28) 812; (38) 522.

studies, equipment for, (38) 115.

summer, studies, (26) 628.

**Evaporator**—

for frozen vegetables, description, (37) 806.  
vacuum, heat transmission and entrainment in, (28) 893.

**Evaporimeter**, description, (30) 118.

**Evergreen**—

bagworm, studies, (27) 557.  
damping off and sun scorch, notes, (29) 547.

**Evergreens**—

as affected by soils, (29) 513.  
culture, (36) 535.  
culture on heath land, (35) 242.  
dwarf, descriptions, (33) 242.  
injury in winter of 1918, (40) 253.  
leaf persistence, (37) 726.  
of Colorado, (35) 147.  
selection and care, (33) 242.  
water conductivity, (40) 821.  
winterkilling, (27) 542.

**Evetria**—

*buolliana*—  
in New Jersey, (34) 355.  
notes, (33) 58; (34) 752; (36) 854; (40) 652.

**Evetria**—Continued.

*buolliana*—continued.  
occurrence on Long Island, (32) 251.  
studies, (32) 654.  
n.spp., descriptions, (33) 655.  
*resinella*, notes, (34) 855.

**Evolution**—

address on, (31) 727.  
and formation of species, notes, (39) 825.  
bibliography, (27) 175; (28) 370.  
biological principles, (29) 67.  
by means of hybridization, treatise, (37) 432.  
heterozygosis in, (27) 428; (29) 31.  
in animals, (28) 466.  
in plants, (27) 733.  
mutation factor in, (34) 629.  
mutation theory, (28) 768.  
notes, (26) 346.  
relation to heredity, (26) 161.  
review of literature, (27) 368.  
rôle of selection in, (39) 573.  
studies, (26) 878.  
treatise, (26) 365, 470, 528; (28) 876; (29) 665; (33) 552; (37) 573.

**Ewes**—see also Sheep.

breeding, rations for, (32) 669.  
breeding, roughages for, (31) 367.  
cull, for early market lambs, (32) 863.  
feeding experiments, (33) 171; (39) 168, 372.  
maintenance experiments, (36) 667.  
milk, composition, (40) 775.  
pastures for, (33) 171.  
pregnant, wintering, (28) 573.  
range, milk production, (39) 774.

**Exanthema**—

coital, in cattle, (31) 381.  
vesicular, in horses and cattle, (26) 678.

*Exartema permundanum*, notes, (28) 156.

Excavating machinery, investigations, (34) 189.

Excelsior industry in United States, (30) 845.

Excitation in plants and animals, (34) 29.

*Exechia* spp., notes, (27) 57.

*Exenterus diprioni* n.sp., description, (34) 456.

**Exercise**—

effect on internal organs, (28) 272.  
in education and medicine, treatise, (34) 261.  
severe, in cold weather at high altitude, (32) 564.

**Exoascus**—

*bullatus*, notes, (37) 550.  
*cerasi*, studies, (37) 250, 550.  
deformans—  
biology and treatment, (37) 250, 655.  
notes, (27) 849; (36) 347, 750; (37) 550; (38) 50, 546, 550.  
studies, (33) 347.  
treatment, (27) 855; (28) 152; (30) 50, 353, 448; (31) 749, 843; (32) 241, 842; (35) 458; (40) 749.  
*insitiae* on plum, (39) 353.  
*pruni*, notes, (36) 751; (40) 749, 845.  
*pruni*, treatment, (36) 849.  
spp., notes, (28) 747; (31) 540.  
*theobromae*, notes, (29) 155.

**Exobasidium**—

*aequale* n.sp., notes, (37) 630.  
*azaleae*, notes, (30) 448.  
*azaleae*, treatment, (27) 855.  
*citri* n.sp., description, (35) 454.  
*hesperidum* n.sp., description, (38) 849.  
*oxycoeci*, notes, (39) 56.  
*reticulatum* n.sp., description, (29) 450.  
sp., notes, (28) 551; (29) 446; (30) 247.  
*unedonis* n.sp., description, (37) 557.  
*vexans*, notes, (31) 55, 56; (37) 252; (38) 354; (40) 48.

**Exochomus**—

*constriatus*, studies, (29) 355.  
*quadripustulatus*, introduction into California, (34) 361.

*Exophthalmus spengleri*, notes, (30) 355.

*Exoprosopa* n.sp., description, (36) 552.

**Exorista**—

*arvicola*, notes, (28) 558.  
*blepharipoda*, biology, (39) 658.  
*caesar*, n.sp., description, (34) 855.  
*pyste*, notes, (28) 554; (30) 654; (31) 752; (36) 155.  
*spinipennis*, notes, (37) 764.  
spp., notes, (28) 755.  
(*Tachina*) *robusta*, notes, (31) 752.

*Exoristoides slossonae*, notes, (37) 764.

- Exosmosis**—  
from roots of anesthetized plants, (32) 626.  
studies, (37) 128.
- Exosporium**—  
*durum* n.sp., notes, (37) 148.  
n.spp., descriptions, (37) 748.  
*pulchellum* n.sp., notes, (37) 148.  
*ulmi* n.sp., description, (27) 451.
- Experiment**—  
**farm**—  
at Akola, Berar, description, (35) 135.  
at Ottawa, (32) 490.  
potato, in Lancashire, (40) 500.  
farms, county, (28) 40; (31) 98, 495.  
field at Bromberg, report, (31) 732.
- station**—  
activities, value to Nation, (39) 101.  
at Añas, (30) 599.  
Cawnpore, report, (31) 732.  
Coimbatore, report, (31) 733.  
Guadeloupe, publications, (40) 700.  
Harleshausen, report, (28) 736.  
Hildesheim, report, (27) 815.  
Hmawbi, report, (31) 736.  
Ivoloina, Madagascar, (35) 835.  
Koilpatti, report, (31) 733.  
Königsberg, report, (28) 178.  
Palur, report, (33) 130.  
Partabgarh, report, (28) 736.  
Tucumán, Argentina, report, (31) 628.  
Yawnghwe, Burma, (34) 696.
- citrus**, at Riverside, (40) 294.  
**forest biological**, in New York, (40) 800.  
**horticultural**, in Brazil, (39) 199.  
in Philippines, (40) 499.  
in Santo Domingo, (38) 99.  
in Virgin Islands, (38) 608.  
**movement in United States**, history, (27) 708.  
new, at Guadeloupe, (39) 98.  
**news service**, development, (28) 11.  
of agricultural bacteriology in Italy, (39) 99.  
**projects**, long-continued, (40) 703.  
**publications**, distributions, (28) 8.  
**publications**, editing, (31) 105.  
**publications**, papers on, (28) 13.  
**Record**, notes, (38) 500.  
**research** as seen from within and without (33) 793.
- station work**—  
as a basis for agricultural extension and demonstration, (34) 104.  
**constructive ideals** in, (32) 603.  
**coordination**, (34) 2.  
**ethics** of, (26) 4.  
**publication**, (33) 401.
- station workers**—  
return from war service, (40) 401.  
**training**, (36) 102.  
**war service opportunities**, (38) 1.
- stations**—*see also* Alabama, Arizona, etc.  
**administration**, (37) 101.  
**administrative management**, (29) 401.  
**advancing scientific character of work**, (32) 13.  
**and agricultural colleges**, relation (27) 490; (31) 196.  
**extension institutions relation**, (36) 498.  
**extension work**, relation, (31) 196; (32) 96; (38) 6.  
**laboratories in France**, Superior Council, (40) 99.  
the war, (36) 601.  
U. S. Department of Agriculture, relations, (29) 604; (32) 194.  
as affected by European war, (35) 605.  
as field for research workers, (34) 701.  
**branch**, discussion, (28) 12.  
**contributions to chemical journals**, (36) 600.  
**control and regulatory work of**, (33) 307.  
**decline in annual reports**, (26) 401.  
**engineering**, need of, (33) 308.  
**forest**, administration, (31) 341.  
**forestry in**, (26) 15.  
**functions of**, (34) 699.  
**future work**, influence of war on, (40) 403.
- Experiment**—**Continued.**  
**stations**—**continued.**  
in Austria, report, (26) 692; (29) 119.  
Canada, (28) 695.  
China, (36) 799.  
Dutch East Indies, (35) 696.  
France, (38) 406.  
Norway, (30) 194; (32) 392.  
the Southwest, progress of, (35) 1.  
the Tropics and Subtropics, (28) 820.  
United States, statistics, (29) 897.  
**insular investigations** at, (38) 601.  
**laws concerning**, (32) 496; (35) 94; (36) 598; (38) 95.  
**organization and policy**, (39) 705.  
**organization lists**, (26) 795; (28) 691; (31) 599; (34) 94; (36) 794; (39) 497.  
**present position and outlook**, (40) 1.

**relation to reconstruction problems**, (39) 702.  
**relation to secondary schools of agriculture**, (28) 97.  
**relation to the State**, (39) 298.  
**response to war conditions**, (37) 1, 605.  
**retiring allowances for**, (32) 195.  
**rural economics in**, (32) 701.  
**salaries and distribution of service in**, (32) 195.  
**statistics**, (28) 691.  
**war emergency activities**, (38) 4.  
**work and expenditures**, (33) 299; (34) 493; (36) 794; (38) 898.
- Experimental**—  
**farms in Canada**, (28) 695; (33) 93; (36) 296.  
**farms in Kentucky**, (35) 122.  
**field in Josephsdorf**, (29) 290.  
**Explorers**, polar, food for, (32) 857.  
**Explosions in milling plants**, (32) 790.  
**Explosives**, use in—  
agriculture, (26) 91; (29) 183, 785; (30) 589; (32) 85, 589, 884.  
clearing land, (26) 591; (31) 288.  
**drainage**, (27) 687.  
**gardening**, (33) 684.
- Extension work**—*see also* Agricultural colleges and Agricultural extension.  
in horticulture, (40) 833.  
in pomology, (40)-834.  
in United States, (40) 396.
- Extraction**—  
**apparatus**—  
description, (26) 511, 802.  
drip protection, (40) 806.  
modified Wiley, (27) 806.  
notes, (29) 800.  
treatment of corks, (38) 411.  
by partially miscible solvents, (40) 611.  
**methods**, studies, (33) 413.  
**processes**, discontinuous, (37) 803.
- Extractives**, value in nutrition, (34) 258.  
**Extractor for plant material**, description, (36) 413.  
**Extracts**, analyses, (35) 663.
- Eye**—  
disease, infectious, in cattle, (37) 691.  
fly, life history and habits, (38) 359.  
worms in chickens, notes, (29) 784.
- Eyes**, embryonic, origin of melanotic pigment in, (27) 468.
- Eysenhardtia**—  
*olivana* n.sp., description, (35) 228.  
*polystachya*, wood of, (33) 740
- Fabraea maculata**—  
investigations, (33) 347.  
treatment, (39) 548.
- Fabrics**—  
cold storage, (27) 565.  
conservation, (40) 595.  
processed, for frost protection, (33) 48; (35) 537
- Factor**, meaning of term in genetic discussion, (37) 526.
- Fagaceae** of eastern North America, (33) 646.
- Fagara**—  
*integrifolia*, root cotton of, (27) 237.  
*xanthoxyloides*, betains in, (27) 204.
- Fagopyrism**—  
cause of, (31) 280.  
in pigs, (38) 589.
- Fagopyrum tataricum**, notes, (30) 838.

- Fairs—  
and their educational value, (39) 693.  
community, (38) 392.  
county school, in Virginia, (29) 599.  
illustrative exhibits, (37) 297.  
organization, (39) 693.  
school, receptacles for exhibits, (40) 96.
- Fairy rings—  
notes, (31) 247.  
studies, (26) 446; (38) 222.
- Falco sparverius, notes, (27) 355.
- Following—  
effect on soil moisture, (26) 533; (29) 211, 425.  
effect on soils, (26) 421.  
experiments, (27) 638, 833; (28) 321; (29) 735; (30) 124, 731; (32) 525, 531; (40) 229.  
summer, (32) 793.
- Families, poor—  
diet of, (28) 662.  
living conditions in London, (30) 166.  
proper feeding, (26) 262.
- Family budgets—  
importance of (30) 863.  
in Chicago stockyards district, (32) 163.  
of laborers in Holland, (32) 163.
- Fan weed, notes, (28) 46; (36) 442.
- Fannia—  
canicularis—  
hibernation, (34) 254.  
notes, (30) 458.  
studies, (37) 665.  
pusio, notes, (38) 557.  
scalaris, relation to myiasis of urinary passages, (32) 450.  
spp., "critical" point for, (36) 256.  
spp., notes, (27) 759.  
spp., relation to myiasis, (30) 757.
- Farase, use against glanders, (30) 481.
- Farcy, *see* Glanders.
- Farina, determination of acid content, (33) 14.
- Farine, analyses, (40) 173.
- Farm—  
account of South Dakota farmer, (40) 488.  
accounting, (26) 896; (28) 594; (29) 293, 633, 690, 691; (30) 793; (31) 689; (32) 292, 494; (33) 92, 893; (39) 496, 844; (40) 192, 687.  
accounting, textbook, (29) 792.  
accounts, diary for, (36) 593.  
adviser, county, (33) 697.  
advisers—  
in California, (30) 695.  
in Missouri, (29) 899.  
reports, (40) 789.  
and forest, manual, (26) 391.  
animals, *see* Animals, Livestock, Cattle, etc.  
arithmetic, textbook, (30) 197.  
arithmetic, type problems, (40) 493.  
bookkeeping, notes, (28) 191.  
boy, autobiography, (35) 696.  
boys and girls, treatise, (26) 899.  
boys, education for, (27) 595.  
buildings—  
concrete, construction, (32) 888.  
construction, (30) 892; (35) 587.  
drawings and photographs, (37) 699.  
galvanized iron for, (28) 188; (31) 591.  
handbook, (26) 686, 894; (27) 892; (28) 290, 487; (29) 186, 689.  
heating systems for, (38) 492.  
hollow clay blocks for, (36) 399.  
lighting, (26) 398; (35) 391.  
location, (36) 687.  
paper on, (26) 398.  
permanent, design, (32) 790.  
permanent, economy of, (31) 688.  
plans, (31) 291; (34) 487, 598, 892.  
probable duration of, (31) 591.  
reconstruction in France, (36) 891.  
roofing for, (36) 590.  
treatise, (31) 291, 591; (36) 891; (37) 90, 789.  
ventilation, (32) 592.
- bureau—  
at Binghamton, New York, (28) 492.  
county, in California, (31) 690; (37) 888.  
in New York, (26) 699; (29) 692; (32) 388.
- bureaus, work of, (31) 894.
- business—  
analyzing, (33) 91.  
arithmetic, (33) 899.  
size of, (35) 692.
- Farm—Continued.  
census in Nebraska, (40) 194.  
census in New York, (37) 491.  
colonies, bibliography, (32) 490.  
contracts, types of, (35) 589.  
conveniences, descriptions, (27) 90.  
conveniences, notes, (31) 291, 388.  
courses, winter, in maritime Canada, (28) 497.  
demonstration—  
editorial on, (29) 701.  
in New Jersey, (29) 599.  
work-in Kentucky, (32) 197.  
development bureau, report, (32) 793.  
diary, (39) 486.  
equipment—  
calculating interest on, (34) 194.  
care of, (29) 595.  
determining average length of life, (28) 895.  
for sheep raising, (37) 388.  
in Minnesota, manual, (31) 93.  
minor articles, (37) 491.  
treatise, (37) 388.  
forestry, notes, (28) 843.  
granary, portable, (39) 494.  
grounds, improvement, (37) 396.  
handicraft for rural schools, (37) 699.  
home grounds, syllabus of lecture on, (27) 299.  
homes—*see also* Rural homes.  
arrangement and adornment, (34) 836.  
attractive, (40) 640.  
in United States, ownership, (32) 193.  
labor saving devices for, (26) 790; (28) 662; (39) 165.

## Flax—Continued.

- industry in Sweden, (40) 827.
  - inheritance of wilt resistance in, (36) 845.
  - irrigation, (31) 828.
  - irrigation experiments, (28) 827; (29) 32; (32) 430; (33) 430, 884; (39) 434.
  - leaves, free hydrocyanic acid in, (27) 635.
  - liming experiments, (38) 34.
  - materials, composition and feeding value, (30) 370.
  - meal, analyses, (29) 367; (32) 465; (36) 65.
  - New Zealand, culture experiments, (30) 632.
  - of East Africa Protectorate, (32) 229.
  - on peat soils, fertilizer experiments, (39) 428.
  - pests and diseases in New Zealand, (38) 257.
  - planting and harvesting dates, (26) 532, 533.
  - pollination, (36) 527.
  - potash fertilizers for, (26) 526.
  - preparation, (40) 827.
  - production in Argentina, (27) 193.
  - rate of sowing tests, (27) 435.
  - retting—
    - experiments, (30) 37.
    - Fribes' method, (30) 637.
    - review of literature, (38) 715.
    - studies, (30) 509.
  - root development with other crops, (26) 129.
  - root system, (31) 515; (36) 135, 223; (39) 230.
  - rotation experiments, (33) 429; (36) 736; (38) 129; (40) 331.
  - screenings—
    - analyses, (27) 170; (33) 371.
    - ground, analyses, (29) 666.
    - toxicity toward cattle, (28) 477.
  - seeding experiments, (29) 224, 425; (36) 134; (38) 431; (39) 227, 228; (40) 433.
  - selection experiments, (33) 335.
  - shipments and prices in Minneapolis, (32) 894.
  - shives—
    - analyses, (35) 562; (37) 767; (38) 666.
    - composition and digestibility, (32) 666.
    - digestibility, (31) 766.
  - sowing on winterkilled wheat fields, (28) 829.
  - stem fiber and waste, determination, (32) 415.
  - straw, analyses, (28) 464.
  - straw, paper and fiber-board from, (34) 509.
  - sucotath, analyses and feeding value, (34) 663.
  - toxicity, (30) 380.
  - varieties, (27) 32, 334, 736; (29) 222, 225, 425, 530, 630; (30) 434, 637, 731; (31) 133, 733, 829; (32) 334, 431, 527, 528, 630; (33) 34, 633; (34) 630; (35) 31, 526, 829; (36) 32, 33, 34, 132, 133, 437, 530, 635, 736; (38) 31, 230, 431, 634.
  - varieties for Montana dry lands, (35) 735.
  - variety and geographical source, effect on oil product, (39) 208.
  - variety tests, (39) 227, 228, 334, 336, 434, 436, 437, 735, 835; (40) 332, 730, 732, 735.
  - waste as source of potash, (37) 817.
  - water requirements, (32) 127.
  - water requirements in India, (27) 429.
  - wilt—
    - investigations, (38) 449.
    - relation to temperature, (39) 249.
    - studies, (36) 748.
  - yields, (30) 134.
- Flaxseed—
- and legume combinations, preparation, (38) 365.
  - as affected by freezing, (36) 136.
  - bushel weights, (37) 889.
  - cake meal, analyses, (28) 464.
  - cleaning, (40) 40.
  - culture and analyses, (30) 637.
  - damaged, examination, (31) 658.
  - formation of hydrocyanic acid in, (27) 132.
  - germination as affected by green manures, (33) 331.
  - ground, analyses, (27) 774.
  - ground, for pigs, (37) 268.
  - hydrocyanic acid in, (35) 167.
  - meal, analyses, (29) 467, 769; (36) 765.
  - oil, chemistry of, (36) 206.
  - oil feed, analyses, (39) 167.
  - press cake, analyses, (40) 72.
  - production, (26) 595, 792; (36) 736.
  - protein, nutritive value, (39) 666.
  - screenings, analyses, (27) 774; (28) 464.
  - screenings, poisoning of live stock by, (26) 86.
  - selection, (30) 637.
  - treatment, (39) 238; (40) 443.

## Flaxseed—Continued.

- water-soluble carbohydrates in, (32) 802.
  - yield as affected by depth of plowing, (30) 232.
- Flea beetle—
- banded, (35) 54.
  - bronze, notes, (32) 556.
  - destruction by white fungus, (26) 454.
  - green, notes, (33) 746.
  - notes, (32) 550.
  - remedies, (33) 158.
  - wavy striped, notes, (32) 556.
  - yellow-necked, notes, (29) 456.
- Flea beetles—
- as garden pests, (39) 767.
  - affecting—
    - Cruciferae in central Europe, (30) 160.
    - horse nettle, (35) 657.
    - mustard, (34) 65.
    - tobacco, (31) 452; (36) 355; (37) 256.
  - injurious in Quebec, (32) 151.
  - metallic, injurious to strawberries, (30) 758.
  - notes, (28) 654; (29) 761; (36) 854.
  - studies, (40) 357.
- Flea bites, relation to plague transmission, (26) 61.
- Flea larvae, morphology, (32) 452.
- Flea-seed in South Australia, (37) 542.
- Fleas—
- and their control, (38) 363.
  - bionomics of, (29) 756; (31) 353.
  - destruction with cyanid gas, (36) 456.
  - handbook and bibliography, (30) 554.
  - injurious to domestic animals, (26) 349.
  - injurious to man and domestic animals, (37) 764.
  - new, of America, (36) 257.
  - notes, (33) 657; (34) 159.
  - of Peru, (27) 862.
  - on rats and other rodents in Upper Egypt, (33) 749.
  - rat, *see* Rat fleas.
  - relation to—
    - leishmaniasis, (28) 185; (36) 654.
    - plague, (33) 749.
    - plague-like disease of rodents, (34) 355.
  - remedies, (31) 58, 351, 353.
  - studies, (33) 563.
  - survival of bacteria in, (31) 353.
  - transmission of—
    - leprosy by, (26) 758.
    - plague by, (27) 59, 754.
    - plague-like disease by, (26) 461.
- Flesh—
- fly, Georgian, notes, (30) 656.
  - meal, ammonification and nitrification laboratory conditions, (30) 218.
- Flexor pedis perforans tendon, resection, (27) 576.
- Flies—
- and disease in the British army, (30) 254.
  - as carriers of infection, (28) 356; (34) 254.
  - as carriers of *Lambia* spores, (30) 254.
  - baits for, (33) 357.
  - biting—
    - in the Punjab, (32) 184.
    - relation to swamp fever, (32) 754.
    - relation to trypanosomiasis, (37) 879.
    - relation to verruga, (32) 248.
  - black—*see also* Simuliidae and Simulium spp.
    - American, synopsis, (31) 254.
    - lesions produced by, (33) 156.
    - relation to pellagra, (28) 853.
  - blood-sucking—
    - notes, (27) 53; (39) 661.
    - parasitic flagellates of, (26) 84.
    - relation to diseases, (29) 760.
  - blue bottle, distance of flight over water, (30) 159.
  - chaetotaxy and pilotaxy of, (35) 660.
  - color preference of, (30) 757.
  - conservation of pathogenic bacteria by, (30) 552.
  - control—
    - in Egyptian campaign, (39) 563.
    - in military camps, (38) 60, 262.
    - in New Jersey, (32) 551.
    - on college farm, (34) 160.
    - paper on, (39) 157.
  - coprophagous, biology, (29) 760.
  - destruction, (34) 856.
  - destruction by bacterial cultures, (34) 254.
  - dissemination of—
    - microorganisms by, (27) 58; (28) 756.

## Flies—Continued.

- dissemination of—continued.
  - parasitic worms by, (30) 658.
  - pear blight by, (33) 149.
- domestic, of New Jersey, (37) 665.
- flesh, studies, (37) 665.
- flight range of, (30) 658, 756.
- frequenting privy vaults, (39) 766.
- green bottle, dissemination of anthrax by, (28) 678.
- habits and parasites, (36) 256.
- house, *see* House fly.
- hystricine—
  - of Peru, (34) 65.
  - with white maggots, (34) 65.
- infecting meat, studies, (39) 564.
- injurious to man, (34) 251.
- larvae—
  - and pupae in nest of gray-headed sparrow, (32) 555.
  - destruction, (33) 455.
  - destruction by ants, (28) 255.
  - destruction in horse manure, (31) 653; (36) 156.
  - relation to rabies, (27) 560.
- larval rôle in dissemination of ascarids, (30) 659.
- manure-breeding, control, (39) 467; (40) 356.
- March, of Australia and Tasmania, (26) 456.
- morphological studies, (37) 358.
- muscid, winter observations, (38) 262.
- muscid—
  - new genera and species, (39) 467.
  - notes, (29) 358; (34) 65; (36) 554.
  - studies, (26) 860.
- nonlactose-fermenting bacilli in, (30) 757.
- of Yellowstone Valley, (33) 554.
- overwintering, (38) 766.
- phorid, from west coast of South America, (37) 357.
- relation to—
  - bacillary enteritis, (38) 363.
  - disease, (33) 560.
  - epidemic diarrhea, (28) 756.
  - filariasis in horses, (35) 362.
  - gastro-intestinal diseases, (36) 156.
  - myiasis in man and animals, (34) 359.
  - pellagra, (27) 156.
  - poliomyelitis, (38) 262.
  - summer sores, (40) 586.
  - Trypanosoma evansi, (27) 53.
  - typhoid fever, (28) 258.
- remedies, (29) 299; (30) 159; (31) 57, 58, 158, 351; (32) 753; (36) 853; (37) 53, 260, 464, 560, 665; (38) 282.
- repellents, tests, (32) 59; (38) 679.
- sand, *see* Sand flies.
- seasonal abundance in Montana, (37) 764.
- sense reactions, (40) 859.
- spallanzanine, of Andes, (34) 65.
- structure of larvae, (26) 558.
- studies, (35) 856; (38) 563.
- syrphus, parasitic on cabbage aphid, (26) 149.
- transmission of—
  - anthrax by, (31) 776.
  - diarrheal diseases by, (31) 654.
  - diseases by, (30) 658, 756; (31) 551; (36) 460.
  - leprosy by, (26) 758; (31) 851.
- traps for, (38) 60.
- treatise, (30) 552.
- white, *see* White fly.
- wind-forced migration, (39) 861.

Flindersia australis, strength and elasticity tests, (27) 43.

Floats, *see* Phosphate rock.

## Flood—

- at Boise, Idaho, (29) 812.
- control for Pecos River, (37) 186.
- control in California, (35) 787; (36) 186.
- control, papers on, (36) 186.
- in Colorado River, (27) 616.
- Louisiana, (30) 417.
- Michigan, (27) 616.
- Ohio Valley in 1913, (30) 18.
- Nile, of 1909, (26) 118.
- Nile, of 1910, (28) 315.
- Nile, of 1911, (30) 511.
- Nile, prediction, (28) 316.

## Flood—Continued.

- protection in Papago Indian Reservation, Arizona, (29) 889.
- protection in Victoria, (30) 887.
- Floods—
  - and their prevention, (33) 885.
  - at Los Angeles, (32) 25.
  - extent and damage caused by, (35) 506.
  - in Alabama, (29) 510.
  - Cairo, Ill., district, (29) 510.
  - California, (37) 486.
  - China, (35) 618.
  - Colorado and New Mexico, (26) 614.
  - Connecticut Valley and Vermont, (31) 214.
  - Indiana, (35) 83.
  - lower Mississippi, (35) 618.
  - New England rivers, (32) 810.
  - New York State, (31) 214.
  - Ohio, (35) 83.
  - Pascagoula and Pearl rivers, (29) 121.
  - Scioto Valley, Ohio, control, (36) 584.
  - laws in Indiana, (35) 787.
  - of March, 1913, recurrence, (31) 615.
  - Nile, (34) 413.
  - Ohio and lower Mississippi valleys in 1913, (31) 214.
  - Ohio and Mississippi rivers, (30) 417.
  - Ohio valley, (29) 121.
  - Rio Grande and Rio Pecos, (26) 27.

## Foods—

- accessory, effect on gastric secretion, (26) 466.
- acid and base-forming elements in, balance, (26) 158.
- alkalinity of ash, determination, (40) 204.
- aluminized, effect on dogs, (27) 268.
- analyses, (27) 64, 463, 767; (28) 762, 811; (29) 865; (30) 165, 258; (31) 67, 166, 358, 359, 509, 557; (32) 456, 661, 763; (33) 66, 67, 164, 165; (34) 67; (35) 558; (37) 63; (39) 669.
- and diet, textbook, (29) 360.
- and their relative nourishing value, (39) 768.
- antineuritic value as affected by heat and alkal-  
lis, (40) 565.
- aromatic substances of, (27) 268.
- artificial and predigested, use, (28) 359.
- artificial coloring, (27) 809; (28) 510.
- as affected by saccharin, (26) 257.
- ash, alkalinity and phosphoric content, (36) 204.
- ash analysis, (29) 861.
- ash constituents, (39) 365.
- Asiatic, calcium and magnesium in, (29) 64.
- bibliography, (29) 360.
- camp, of Southwest Africa, (27) 269.
- canned, *see* Canned foods.
- cereal and vegetable, in United States, (38) 866.
- changes in during cold storage, (27) 460; (31) 659.
- choice of, (35) 765.
- classification, (29) 362.
- cold storage, (27) 362; (39) 472.
- colloid chemistry, (27) 310.
- composition, (31) 760.
- composition and—
  - cost, (38) 366.
  - cost in Spain, (34) 255.
  - energy content, (31) 260.
  - energy value, (34) 561.
  - nutritive value, (29) 463.
- content of purin bases, (40) 205.
- cooperative buying, (29) 868; (31) 261.
- cost—
  - and nutritive value, (28) 762; (30) 364.
  - at Garland School of Home Making, (31) 659.
  - chart, (40) 68.
  - in New York, (33) 565.
  - in various countries, (27) 269.
  - treatise, (40) 68.
- court decisions on, (28) 459; (35) 860.
- creatin- and creatinin-free, studies, (31) 760.
- crumbing, analyses, (31) 358.
- decomposition, (27) 566.
- decomposition, organisms concerned in, (28) 563.
- denaturalized, nutritive value, (28) 66.
- detection of—
  - anthrax bacteria in, (27) 478.
  - benzoic acid in, (27) 715; (28) 411.
  - poisons in, (31) 207.
  - saccharin in, (26) 506.
  - saponin in, (27) 505.
- determination of—
  - arsenic in, (27) 613.
  - phosphoric acid in, (28) 20.
- diabetic, analyses, (29) 660.
- digestibility, (26) 263.
- digestibility as affected by—
  - cooking, (28) 66; (32) 760.
  - preparation, (26) 263.
- digestion and absorption, (28) 801.
- digestion and resorption, (30) 201.
- dipterous larvae in, (26) 558.
- Dominican, analyses, (40) 173.
- drying, (40) 414, 864.
- drying and canning, (38) 94.
- drying in Hawaii, (39) 208.
- dynamic action, (40) 866.
- effect on—
  - amylase content of saliva, (29) 164.
  - composition of urine, (31) 761.
  - elimination of uric acid, (37) 167.
  - heat production in man, (34) 68.
  - metabolism, (33) 753.
  - oxidation rate, (40) 364, 365, 766.
  - secretion of digestive ferments, (32) 256.
  - solubility of uric acid, (27) 464.
  - stomach development of birds, (32) 265.
  - the growing organism, (30) 365.
- examination, (26) 69, 157, 355, 608; (29) 567; (31) 462; (34) 762.
- examination and judgment, progress in, (26) 408.

## Foods—Continued.

- exposed, dangers from, (30) 665.  
 extra, energy content, (40) 269.  
 factors affecting increased cost, (32) 255.  
 fresh, enzymic action, (30) 463.  
 gastric response to, (40) 269.  
 green, vitamins in, (40) 564.  
 greening, (27) 868; (28) 662.  
 handbook, (28) 163.  
 heat of combustion, (26) 872.  
 importance of mineral matter in, (29) 366.  
 increase in cost of, (26) 359.  
 indian, phosphorus content, (27) 461.  
 insects affecting, (28) 248.  
 left-over, utilization, (38) 770.  
 lessons on, (26) 493; (32) 597.  
 malted and farinaceous, analyses, (28) 359.  
 methyl alcohol in, (40) 204.  
 microanalytical methods of examining, (26) 110.  
 microbiology of, (26) 372.  
 microflora of, (26) 355.  
 microscopic examination, (30) 709.  
 mineral constituents of, (29) 809.  
 miscellaneous, (39) 267.  
 monetary value, (31) 262.  
 nitrogen-free extracts in, (32) 21.  
 nutritive ratio, (29) 362.  
 nutritive value as affected by preparation, (30) 364.  
 oryzanin in, (28) 168.  
 osmotic pressure, (28) 262.  
 oven temperatures for, (31) 359.  
 perishable, commerce in, (27) 65.  
 physiology of, (37) 166.  
 preserved handbook, (31) 856.  
 preserved, rôle of salt and sugar in, (28) 361.  
 prevention of polyneuritis by, (28) 760.  
 purin content, (26) 355.  
 purity of, (26) 69.  
 ready-to-serve, analyses and cost, (33) 753.  
 relation to dental decay, (29) 364.  
 relation to polyneuritis, (28) 567.  
 saccharin in, (31) 557.  
 science of, (26) 66.  
 specific dynamic action, (30) 365; (32) 359, 562; (33) 755.  
 standards for, in Australia, (30) 862.  
 sterilized, pulp and paper containers for, (30) 462.  
 storage, (26) 261; (39) 472, 770.  
 stored, insects affecting, (30) 53; (34) 651; (40) 259.  
 studies, (27) 598.  
 summer, saving for winter, (39) 718.  
 supplemental dietary relationships, (37) 166.  
 textbook, (26) 261; (32) 394, 558; (33) 364; (37) 894; (39) 567, 899.  
 tissue-forming, (39) 472.  
 toxicity of substances found in, (28) 661, 863.  
 treatise, (26) 355; (27) 207, 270, 365, 567, 868; (29) 412; (32) 162, 353, 659, 854; (36) 63; (40) 459.  
 tropical vegetable, notes, (31) 855.  
 uncooked, tubercle bacilli in, (26) 880.  
 uniform laws, (28) 762.  
 use during war, (34) 561.  
 use in Surinam, (28) 761.  
 use of saccharin in, (26) 868; (27) 665.  
 vegetable—  
   analyses, (29) 659.  
   course in, (26) 597; (34) 899.  
   digestibility, (28) 462; (31) 161.  
   for the diabetic, (39) 571.  
   microscopy of, (35) 503.  
   nutritive value, (31) 161.  
   of German Africa, (29) 59.  
 vitamin-free, nitrogen balance with, (36) 159.  
 vitamins in, (31) 558.  
 war, manual, (37) 715.  
 water content, (40) 204.  
 water content as affected by cooking, (26) 462.  
 wild, of Great Britain, (40) 360.  
 world's production of, (35) 497.
- Foot-and-mouth disease—  
 causative agent, (26) 376, 682; (28) 376; (36) 278.  
 control, (34) 781.  
 control in—  
   Great Britain, (36) 275, 676; (37) 779.  
   Maryland, (36) 777.  
   Pennsylvania, (37) 577.  
   United States, (35) 74; (36) 675.

## Foot-and-mouth disease—Continued.

- diagnosis, (26) 582; (40) 283.  
 differentiation from stomatitis, (39) 390.  
 dissemination, (27) 284.  
 effect on milk, (30) 573; (32) 479; (33) 577.  
 effect on milk and butter, (32) 76.  
 eradication and treatment, (33) 580.  
 etiology, (26) 681; (27) 378.  
 historical discussion, (26) 284.

 secondary infection, (33) 180.  
 studies, (26) 781; (31) 282, 878; (32) 475, 876; (33) 281; (34) 273, 575, 677, 879; (35) 681; (36) 578.  
 transmission to man by milk, (32) 374.  
 treatise, (35) 280.  
 treatment, (26) 682, 782; (27) 81, 379, 478; (31) 879; (35) 180.  
 virulence of blood in, (36) 382; (37) 689.  
 virus carriers of, (33) 179.  
 virus, destruction in manure, (29) 283.
- Foot—  
 diseases in horses, treatment, (29) 783.  
 evil in horses and mules, (27) 576.  
 lesions, treatment with sugar, (37) 82.  
 rot in sheep, (33) 774.
- Forage crop—  
 diseases in Texas, (26) 645.  
 diseases, notes, (31) 539, 841; (40) 747.  
 mixtures—  
   digestibility, (38) 778.  
   for silage, (26) 666.  
   tests, (27) 234, 736; (28) 532; (34) 735; (37) 733, 734.  
 smuts, notes, (35) 348.
- Forage crops—  
 analyses, (30) 565; (31) 863; (33) 171.  
 breeding, (31) 228.  
 breeding experiments, (31) 830; (38) 526.  
 composition at different stages, (39) 836.  
 cost of production, (26) 830; (32) 171.  
 culture, (27) 32, 899; (32) 430; (33) 33, 98, 698; (34) 630; (35) 33; (39) 834.  
 culture—  
   experiments, (26) 632, 830; (27) 438, 638; (28) 735; (29) 224, 631; (30) 228, 828; (32) 532; (33) 227, 333, 526, 667; (34) 34, 228, 736; (35) 826, 829; (36) 32, 133; (37) 329, 331, 435, 826; (38) 31, 433, 526, 632, 735, 828; (39) 229, 632, 835.  
   in India, (39) 229, 230.  
   in Wyoming, (36) 33; (39) 229.  
   under dry farming, (28) 533.  
 determination of yield, (37) 439.  
 development as affected by water, (31) 524.  
 fertilizer experiments, (26) 424, 631; (27) 736; (31) 421; (34) 22; (38) 433.

## Forage crops—Continued.

- field tests, accuracy in, (34) 827.
  - field tests in Philippines, (40) 228.
  - for Colorado plains, (34) 630.
  - cotton region, (28) 40.
  - cut-over lands, (39) 230.
  - dry lands, (40) 429.
  - Guam, (40) 327.
  - Oklahoma, (31) 829.
  - pigs, (27) 571; (28) 468; (29) 670; (32) 170; (33) 227, 266; (34) 172; (36) 866, 867; (39) 173, 777.
  - pigs in cotton belt, (31) 169.
  - pigs in Pacific Northwest, (31) 470.
  - pigs under southern conditions, (39) 479.
  - western Kansas, (40) 330.
  - handbook, (29) 530.
  - improvement, (34) 34.
  - in Barbados, (40) 434.
  - Bombay Presidency, (37) 826.
  - Brazil, (40) 625.
  - India, (34) 262; (40) 230, 332, 523, 625.
  - Nebraska, (40) 521.
  - New South Wales, (40) 524.

  - Philippines, (26) 361; (40) 231.
  - Punjab, (27) 669.
  - Queensland, (40) 230.
  - Rhodesia, (40) 230.
  - South Australia, (40) 524.
  - Tahiti, (28) 266.
  - Union of South Africa, (34) 241.
  - introduction, (32) 793.
  - introduction into Philippines, (27) 537.
  - irrigation experiments, (39) 229.
  - laboratory manual, (30) 696; (34) 598.
  - midsummer, (39) 532.
  - native, of Australia, (40) 524.
  - notes, (28) 274.
  - on reclaimed swamp, (40) 231.
  - production, (39) 737.
  - production in New York, (39) 532.
  - residual effects on swine, (33) 266.
  - root systems, (39) 230.
  - rotation experiments, (26) 631.
  - seed production in, (26) 436.
  - seed selection, (36) 638.
  - seeding and harvesting dates, (37) 135.
  - sewage for, (26) 716.
  - temporary, notes, (26) 130.
  - tests, (38) 827.
  - treatise, (28) 632.
  - utilization in Germany, (27) 669.
  - varieties, (27) 438; (28) 828; (29) 222, 830; (34) 736; (37) 533; (38) 31, 333, 431, 433, 632.
  - variety tests, (39) 128, 227, 334, 433, 738; (40) 731, 733.
  - winter, (38) 735.
  - yields, (29) 32.
- Forage—**
- devices for curing, (30) 191.
  - drying artificially, (27) 277.
  - grasses of India, (39) 231, 234.
  - green, preservation, (28) 464.
  - green, production during entire year, (35) 135.
  - moisture content and shrinkage, (34) 827.
  - notes, (30) 197.
  - plants—
    - and their culture, textbook, (32) 827.
    - drought-resisting, analyses, (33) 169.
    - frost injuries, (32) 532.
    - indigenous to Australia, (26) 830.
    - mountain, of central France, (30) 733.
    - of Brazil, (36) 529.
    - German East Africa, (28) 364.
    - German Southwest Africa, (27) 871; (32) 167.
    - Hawaii, (32) 731.
    - Java, (30) 525; (31) 431.
    - Mexico, analyses, (28) 464.
    - Queensland, analyses, (28) 463.
    - Russia, notes, (28) 364.
    - Samara, (37) 168.
    - Sao Paulo, (27) 871.
    - South Africa, analyses, (32) 166.
    - Spain, analyses, (33) 466.
    - Wallowa National Forest, (37) 818.
    - seeding on ranges, (30) 35.
    - varieties, (33) 227.
  - poisoning, *see also* Cattle, Live stock, Range poisoning, and Plants poisonous.

## Forage—Continued.

- poisoning, (39) 184, 336, 586, 587, 787, 788, 886.
- poisoning—
  - by wild onion, (40) 577.
  - due to *Bacillus botulinus*, (39) 387.
  - due to *Claviceps paspali*, (34) 676.
  - in California, (40) 778.
  - notes, (30) 685; (39) 387, 891, 892.
  - of horses, (29) 499, 587; (31) 87; (36) 280.
  - horses and mules, (33) 880; (34) 681.
  - horses, cattle, and mules, (28) 378.
  - studies, (28) 886; (35) 76; (36) 580, 581; (37) 179, 689; (38) 383, 384; (39) 680.
  - production on lawns and parks, (36) 439.
  - rations for growing horses, (27) 572.
  - use of wild vegetation for, (40) 665.
  - yields, error in determination, (32) 38.
- Forcipomyia* n. spp., descriptions, (31) 455.
- Forda—**
  - formicaria, morphology and biology, (28) 655.
  - occidentalis, notes, (29) 252.
  - spp., notes, (40) 649.
- Forest—**
  - administration—*see also* Forestry.
    - in Ajmer-Merwara, (27) 245.
    - Andamans, (27) 445; (30) 645.
    - Baden, (26) 49; (29) 239; (30) 743.
    - Baluchistan, (27) 44; (29) 44; (30) 844.
    - Bavaria, (32) 144.
    - British Columbia, (32) 747.
    - Ceylon, (26) 643.
    - Dutch East Indies, (32) 441.
    - German East Africa, (27) 245.
    - India, (26) 340; (27) 147, 543, 647; (28) 343, 344, 643; (29) 149, 239, 342, 444, 643; (30) 347, 645; (31) 240, 537, 641; (32) 237, 340, 640.
    - Oregon, (32) 747.

- site classification in, (35) 43.
- soil aeration in, (36) 44, 844; (39) 648.
- tables for determining profits, (32) 748.
- teaching by pictures, (26) 193.
- terms, (31) 840; (36) 744.
- textbook, (27) 95; (28) 193; (32) 692; (36) 596.
- theory of errors in, (30) 599.
- treatise, (26) 140, 338, 542; (27) 42, 444; (30) 44, 742; (31) 49; (35) 240, 346, 841; (36) 242.
- yearbook, (34) 494.
- yield tables, (27) 347.

## Forests—

- Alpine, management in Bavaria, (29) 842.
- as affected by—
  - light burning, (34) 441.
  - origin of seed, (29) 841; (30) 239; (31) 838.
- as check for avalanches, (26) 241.
- as windbreaks, (29) 842.
- brush disposal in, (34) 441.
- climatic formations in Cape Breton Island, (40) 152.
- close utilization, (36) 539.
- community, development, (40) 744.
- composite type, management, (29) 43.
- coniferous—
  - of eastern North America, (31) 839.
  - reproduction, (39) 750.
  - reproduction in northern New England, (37) 651.
  - thinning experiments, (31) 537.
- conservation, (36) 644.
- conservation—
  - and reconstruction, (40) 743.
  - by private land holders, (28) 842.
  - in British Columbia, (30) 45.
  - in Eastern States, (28) 842.
  - in United States, (26) 842; (36) 96.
- conversion systems, (31) 537.
- county or community working plans, (35) 841.
- culture experiments in Prussia, (33) 541.
- determination of—
  - increment, (30) 347; (35) 452.
  - site qualities, (31) 537.
  - stocking, (31) 538.
- determining normal growing stock in, (35) 748.
- dipterocarp, in Philippines, (33) 443.
- discontinuous light in, (36) 242.
- effect on—
  - climate, (29) 642, 842; (30) 743; (31) 716.
  - climate of Switzerland, (38) 14.
  - conservation of snow, (29) 813, 814; (31) 510, 716.
  - frosts, (27) 816.
  - run-off, (30) 620.
  - stream flow, (29) 642.
  - streams, (27) 348.
  - temperature of air current, (34) 413.
  - water supplies, (33) 587.
- fertilizers for, (28) 843.
- grazing in, (40) 343, 448.
- growth in Natal, (38) 144.
- growth in relation to oxygen content of soil water, (27) 121.
- growth studies, (35) 841.
- Hawaiian, notes, (28) 842.
- high mountain, management, (31) 49.
- hygienic influence, (29) 842.
- injury from coal smoke, (33) 629.
- insects affecting, (26) 553; (27) 452; (28) 159, 352, (30) 657; (32) 448; (34) 251; (35) 356, 851.
- irrigation with sewage water, (33) 343.
- light measurements in, (30) 45.
- miniature model, (30) 196.
- National, (39) 648, 750.
- National—
  - appraising stumpage on, (32) 340.
  - as hunting grounds, (40) 743.
  - conservation of game in, (38) 555.
  - grazing resources, (31) 767; (36) 242.
  - handbook for campers, (34) 46.
  - landscape engineering in, (40) 248.
  - laws applicable to, (34) 837.

## Forests—Continued.

- National—Continued.
  - management, (36) 346.
  - manual, (26) 241, 340.
  - nursery practice in, (37) 348.
  - of Arkansas, (27) 443.
  - Eastern United States, (37) 348.
  - Pacific Northwest, working plans, (26) 51.
  - southern Appalachians, influences, (40) 841.
  - United States, (34) 46.
  - planting policy in, (40) 743.
  - range reconnaissance on, (33) 843.
  - recreation uses, (40) 542.
  - reforestation, (33) 645.
  - road building, (37) 547.
  - roads in, (40) 90.
  - sales policy, (29) 444.
  - statistical report, (40) 447.
  - stumpage appraisals, (37) 838.
  - summer homes in, (36) 744.
  - telephone construction in, (34) 191.
  - timber sales, (27) 543; (36) 644.
  - timber surveys, (38) 349.
  - trail construction in, (34) 190.
  - use, (33) 242, 541; (39) 750.
  - volume tables, (37) 450.
  - water supply from, (40) 743.
  - work of Forest Service on, (39) 648.
  - working plans, (31) 341; (34) 441.
  - yield regulation data for, (31) 639.
- natural regeneration in, (29) 842.
- Nematus injury in, (35) 55.
- nitrification of soils, (40) 418.
- northern hardwood, (34) 152.
- of Alabama, (29) 746; (35) 748; (36) 843.
- Alaska, (34) 640.
- Alsace-Lorraine, (26) 744; (40) 248.
- Atlantic plain, relation to humidity of Central States, (29) 642; (31) 716.
- Bellinger River, New South Wales, (30) 743.
- British Columbia, (34) 641.
- British Guiana, (28) 343.
- Cape of Good Hope, (28) 239.
- Chile, (33) 144.
- Colorado, (37) 209.
- Crater National Park, (35) 748.
- East Africa, (40) 152.
- Eritrea, (26) 643.
- Florida, (35) 347; (38) 643.
- France, effect of the war on, (40) 152.
- Guindos hacienda in Chile, (35) 842.
- Isthmus of Panama, (38) 544.
- Japan, (33) 443.
- Java, (34) 239.
- Java and Madura, (37) 346.
- Kongo, (38) 247, 248.
- Madagascar, (31) 839.
- Maryland, Anne Arundel Co., (34) 440.
- Maryland, Prince Georges Co., (29) 441.
- Massachusetts, Plymouth Co., (39) 450.
- Massachusetts, Worcester Co., (36) 447.
- Mesa Verde National Park, (35) 648.
- Mexico, (35) 242.
- Montana, economic use, (40) 542.
- Montana, winterkilling and smelter injury in, (26) 826.
- Mount Rainier National Park, (35) 451.
- New South Wales, (30) 743.
- northern Manitoba, ecological features, (38) 732.
- northern Russia, (28) 239.
- Oregon, conservation, (26) 240.
- Pennsylvania, (36) 843.
- Philippines, (28) 343; (36) 644; (39) 145.
- Porto Rico, (32) 697; (36) 243.
- Prussia, (30) 645.
- Quebec, (37) 147.
- Smoky River Valley and Grande-Prairie country, Canada, (34) 538.
- Switzerland, (30) 346.
- the Andes, (36) 27.
- the Far East, handbook, (30) 45.
- United States, (34) 46.
- Virginia, (39) 546; (40) 343.
- western Caucasus, (31) 49.
- Yosemite, Sequoia, and General Grant National Parks, (35) 242, 648.
- precipitation-evaporation factor in, (37) 525.

## Forests—Continued.

- private, management in New York, (35) 452.  
 public, state v. national control, (29) 491.  
 rain, in Jamaica, (32) 748.  
 regeneration in Austria, (30) 447.  
 regeneration in north Sweden, (31) 537.  
 relation to—  
   atmospheric and soil moisture, (36) 843;  
   (37) 716.  
   conservation of snow, (27) 617; (28) 414, 514;  
   (36) 17, 143.  
   European war, (38) 643.  
   floods, (31) 515; (32) 237.  
   ground water, (29) 240.  
   hailstorms, (31) 22.  
   rainfall, (36) 346; (38) 510.  
   run-off and stream flow, (28) 643.  
   soil erosion, (37) 520.  
   soil formation, (28) 421.  
   soils, (38) 542.  
   stream flow (26) 51; (33) 885; (36) 346.  
   water supply, (28) 842.  
 reproduction as affected by fires, (27) 348.  
 second-growth, improvement, (39) 246.  
 selection—  
   regulating yield in, (28) 744.  
   strip method of felling, (27) 444; (35) 346.  
   system, (29) 240; (30) 844.  
   system, formula for normal growing stock  
   in, (33) 738.  
 site determination and classification, (37) 450.  
 smelter injury, (29) 851.  
 soil types for, (34) 640.  
 State administration, (40) 688.  
 State, in Pennsylvania, (35) 452.  
 strip thinnings, (26) 51.  
 subdivision of, (33) 442.  
 sun energy in, (30) 45.  
 taxation, (27) 646; (38) 146.  
 thinning experiments, (28) 744.  
 Tintern crown, management, (33) 645.  
 tolerance studies, (40) 152.  
 topographic survey methods, (35) 841.  
 treatise, (28) 544.  
 tropical, timbers of, (39) 245.  
 tropical, utilization, (36) 145.  
 utilization with portable mills, (34) 642.  
 windfall damage in, (34) 640.  
 windfall in, (33) 843.  
 yield tax, basis for, (38) 46.  
 yields, determination, (27) 647; (31) 538.
- Forficula auricularia**—  
 feeding habits, (32) 246.  
 in Rhode Island, (32) 247.  
 life history, (36) 857.  
 life history and remedies, (38) 56.  
 notes, (39) 464; (40) 753.
- Forget-me-not**, culture in Alaska, (29) 743.
- Forging and smithing**, handbook, (36) 287.
- Forhin**—  
 analyses, (28) 154.  
 tests, (30) 448.
- Forleule**, outbreak in northern Bohemia, (31) 756.
- Formaldehyde**—  
 analyses, (33) 735.  
 as blood preservative, (29) 676.  
 fly poison, (37) 53.  
 food preservative, (30) 364.  
 milk preservative, (30) 74; (31) 674.  
 oxidation product of chlorophyll, (31) 222.  
 serum preservative, (33) 280.  
 source of carbon for plants, (35) 821.  
 treatment for seed grain, (28) 846.  
 destruction of flies by, (26) 861.  
 detection, (32) 506.  
 detection in—  
   illuminated green plants, (35) 821.  
   milk, (28) 809; (30) 414; (40) 413.  
   plant leaves, (29) 308.  
 determination, (26) 510; (30) 115; (31) 109; (35)  
 616.  
 determination in fumigants, (31) 414.  
 disinfection with, (26) 174.  
 effect on—  
   action of maltase, (28) 504.  
   animal organism, (34) 459.  
   bacterial oxins, (26) 782.  
   formation of botulinus toxins, (30) 479.  
   germination of cereals, (29) 151, 346.  
   germination of dodder, (27) 28.

## Formaldehyde—Continued.

- effect on—continued.  
 germination of seeds, (26) 131, 820.  
 germination of wheat, (26) 846; (28) 242; (30)  
 242, 837.  
 living plants, (29) 827.  
 plants, (26) 731.  
 potatoes, (30) 539, 540.  
 protein hydrolysis, (38) 201.  
 soil organisms, (31) 27; (38) 420.  
 gas, liberation from water solutions, (33) 12, 111.  
 gas, use against flies, (30) 757.  
 house disinfection with, (32) 683.  
 in Adamkiewicz reaction, (40) 507.  
 in sap of green plants, (29) 132.  
 method of generating, (39) 649.  
 nature and use, (26) 580.  
 oxidation to formic acid, (35) 713.  
 preserved milk for calves, (32) 669.  
 rôle in plant growth, (28) 38.  
 solution, effect on potatoes, (27) 748.  
 sterilization of soils by, (32) 816.  
 sulphurous acid, detection, (32) 507.  
 synthesis by sunlight, (30) 129.  
 use against—  
   bloat in cattle, (33) 389.  
   Fusarium in cereals, (33) 546.  
   mastitis, (37) 277; (38) 286.  
   potato diseases, (26) 547.  
   potato wart disease, (33) 446.  
   wheat stinking smut, (33) 744.  
   use in seed treatment, (39) 851.
- Formalin**, see Formaldehyde.
- Formalinized blood corpuscles**, use in complement  
 fixation test, (30) 779.
- Formamid**, assimilation by plants, (26) 32.
- Formic acid**—  
 as food preservative, (30) 364.  
 as fruit sirup preservative, (29) 463.  
 content of vinegar, (27) 808; (29) 798.  
 detection, (27) 498; (32) 506, 507.  
 detection in—  
   food products, (28) 806; (29) 799.  
   fruit products, (28) 204.  
   meat, (29) 716.  
   sirups, (29) 717.  
   vinegar, (26) 208.  
 determination, (26) 510; (31) 509; (32) 115; (33)  
 804.  
 determination in—  
   foods (26) 312; (28) 863.  
   preservatives, (32) 299.  
 effect on plants, (37) 224.  
 in honey, (26) 25; (27) 714; (28) 166.  
 in silage, (28) 608, 609.  
 or formates, determination, (38) 313.  
 toxicity to plants, (39) 224.
- Formic aldehyde** as soil disinfectant, (31) 621.
- Formica**—  
 fusca cinerea, injurious to tobacco, (30) 759.  
 montana, notes, (28) 755.
- Formicenyrtus thoreauini** n.g. and n.sp., de  
 scription, (35) 761.
- Formicidae**—  
 of Guam, (31) 62.  
 of Italy, (38) 364.  
 of South Africa, (35) 365.  
 studies, (29) 860.  
 type species, (26) 352.
- Formol**, titration, (29) 408.
- Formyl group**, occurrence in lignin, (27) 310.
- Forsythia**—  
 suspensa, leaf variation in, (27) 741.  
 viridissima, sclerosis of, (36) 251.
- Fortunella** n.g. and n.sp., descriptions, (32) 838.
- Fossil ruminant** from Rock Creek, Texas, (34) 264.
- Foul brood**—  
 control, (39) 264, 869.  
 control in Kansas, (37) 357.  
 control in Texas, (36) 758.  
 etiology, (27) 563.  
 European, control, (39) 661.  
 European, in South Africa, (40) 648.  
 in Cuba, (27) 364.  
 in South Africa, (40) 648.  
 law in Texas, (34) 454, 657; (39) 869.  
 notes, (26) 151, 759; (28) 352, 450, 456; (30) 161,  
 759; (31) 553; (32) 853; (37) 255.  
 recognition and treatment, (38) 264.  
 treatment, (38) 263; (39) 869.

- Foundations, masonry, preventing dampness in, (28) 786.
- Fouquieria splendens*—  
density of cell sap, (32) 35.  
water content of leaves, (26) 627.
- Fowl**—  
cestode, life cycle, (40) 359.  
cholera, (40) 183.  
cholera—  
and fowl typhoid, (40) 685.  
bacillus affecting man, (39) 186.  
bacterium, opsonic power of serums against, (27) 285.  
immune serum, action, (32) 379.  
immune serum, protective substances of, (30) 186.  
immunization, (26) 676; (37) 78, 83, 183.  
notes, (26) 373; (35) 878.  
pathological anatomy, (26) 486.  
serum therapy of, (26) 578.  
studies, (27) 583; (31) 485, 781; (33) 676; (35) 80; (39) 183, 892.  
treatment, (30) 286; (36) 79.

  - pruning and manuring, (28) 640.
  - sap studies, (32) 139.
  - spraying, (31) 141; (32) 834.
  - spraying experiments, (33) 339, 340.
  - summer pruning, (33) 338.
  - tree fillings and wound dressings for, (32) 637.
  - varieties, (29) 237; (30) 41; (31) 828; (33) 43, 430; (34) 231; (36) 137, 140, 237; (38) 641.
- orchard, varieties for—
  - Great Britain, (31) 337.
  - Illinois, (28) 437.
  - New Jersey, (33) 439.
- orchard, wood decay of, (32) 238.
- ornamental, economic use, (32) 339.
- oxidase occurring in, (26) 310.
- packages, notes, (30) 443.
- packing, (26) 237; (32) 392.
- packing—
  - and sale in Michigan, (33) 438.
  - and transportation in India, (36) 140.
  - law in California, (35) 342.
  - marketing, and exporting, (33) 838.
- papers on, (27) 598.
- parasites, remedies, (27) 438.
- parthenocarp in, (31) 535; (34) 226.
- persistency of style on, (36) 523.
- phenological data, (33) 825.
- physico-chemical constants of, (31) 427.
- picking and handling, (34) 437.
- picking maturity, (37) 543.
- pit, studies, (32) 644.
- planting along highways, (26) 189.
- poisoning by factory smoke, (27) 831.
- pollen, germination, (35) 731.
- pollination, (27) 439; (28) 237; (30) 237; (34) 233, 341; (35) 743; (39) 445; (40) 148, 638.
- pollination—
  - and fertilization, (33) 140.
  - by bees, (38) 264.
  - experiments, (29) 235.
- pome—
  - and stone, diseases of, (33) 444.
  - factors in fruit-setting, (40) 41.
  - hypochinose, (40) 48.
  - new rust of, (31) 150.
  - pollination, (29) 541; (33) 838; (36) 140.
- precooling, (27) 441; (29) 436.
- precooling and refrigeration, (31) 44.
- premature dropping, (29) 339.
- preparations, suspicious, inspection, (26) 482.
- preservation, (30) 443, 665; (32) 509; (35) 14; (38) 616.
- preservation—
  - and inspection, (35) 367.
  - by freezing, (39) 344.
  - by pressure, (32) 416.
  - of natural colors in, (28) 237.
  - treatise, (29) 116.
- preserved—
  - dextrose content, (27) 766.
  - examination, (30) 862.
  - handbook, (28) 258.
  - inspection in Canada, (26) 157.

## Fruit—Continued.

- preserving and processing, (30) 316.
- preserving without sugar, (39) 717.
- prices in Bern, (32) 162.
- processing for exhibition, (36) 319.

  - new fermenting, description, (27) 224.
  - paint-destroying, description, (27) 253.

## Fungus—Continued.

- parasites of—  
 Coccidae and Aleurodidae, utilization, (28) 60.  
 man and animals, (32) 271.  
 plants, effect on soils, (29) 150.
- Funkia ovata*, stomatal movement in, (26) 627.
- Funnel, laboratory, description, (40) 409.
- Funtumia—  
 elastica—  
 culture and tapping, (26) 339.  
 culture in Belgian Kongo, (35) 544.  
 plantings in Kongo, (26) 50.  
 tapping experiments, (31) 342.  
 growth and rubber yielding value, (37) 548.
- Fur-bearing—  
 animals—  
 breeding and raising, (29) 373.  
 domestication, (37) 573.  
 laws relating to, (34) 751; (36) 455; (38) 456; (40) 350.  
 natural history, (26) 772.  
 of an Indiana farm, (30) 354.  
 treatise, (40) 646.  
 mammals of North America, (29) 70.
- Fur—  
 buyers' guide, (34) 570.  
 farming—  
 booklet, (29) 672.  
 in Canada, treatise, (32) 870.  
 in United States and Canada, (39) 880.  
 notes, (37) 573.  
 textbook, (27) 774.  
 with mink, (40) 373.  
 industry in Alaska, (31) 727.  
 trade, treatise, (26) 772.  
 waste, analyses, (28) 523.
- Furcraea—  
 cabuya fiber, strength of, (29) 313.  
 fiber from, (39) 442.  
 gigantea as a fiber plant, (37) 233.  
 gigantea, varieties grown in Mauritius, (34) 434.  
 spp., binder twine from, (27) 534.
- Furfurool—  
 detection in ethyl alcohol, (29) 312.  
 determination, (27) 113.  
 formation from wood during steaming process, (33) 614.  
 formation in wine, (31) 316.  
 in cider vinegar, (32) 808.  
 precipitants for, (36) 318.  
 production in curing hay, (35) 312.
- Furniture—  
 disinfection, (32) 456.  
 insects affecting, (28) 248; (30) 53; (34) 651.
- Furs—  
 cold storage, (27) 565.  
 home manufacture, treatise, (38) 13.
- Fusaea, description, (31) 339.
- Fusariella populi* n.sp., description, (40) 155.
- Fusarium—  
 batatatis—  
 description, (32) 51.  
 notes, (31) 447.  
 relation to sweet potato stem rot, (29) 647.  
 treatment, (28) 849.  
 blight of potatoes, (40) 847.  
 bulbigenum, notes, (30) 354; (31) 646.  
 coeruleum, notes, (37) 350.  
 coeruleum, studies, (39) 250, 651.  
 colorans, notes, (26) 851.  
 colorans, relation to cacao canker, (32) 548.  
 conglutinans, control, (37) 150.  
 conglutinans, studies, (34) 542; (36) 248; (40) 156.  
 cubense—  
 description, (38) 757.  
 generation of aldehydes by, (37) 843.  
 notes, (28) 349.  
 culmorum, studies, (30) 846.  
 dianthi, description, (28) 154.  
 dianthi, notes, (27) 752.  
 didymum, notes, (32) 750.  
 diseases as affected by winter covering of cereals, (37) 48.  
 diseases of cereals, review, (26) 446.  
 distribution in soil, (39) 254.  
 effect on composition of rye, (36) 633.  
 erubescens on tomatoes, (34) 53.

## Fusarium—Continued.

- eumartii—  
 n.sp., description, (34) 246.  
 notes, (36) 147.  
 studies, (36) 648.
- gemmiperda, notes, (28) 241.
- gramineum, relation to citrus gummosis, (29) 247.  
 heveae n.sp., notes, (37) 253.  
 incarnatum, notes, (29) 150.  
 infection of grain by, (29) 244.  
 lateritium—  
 notes, (36) 752.  
 relation to apple sour sap, (38) 452.
- lathyr—  
 investigations, (37) 155.  
 n.sp., description, (32) 446.
- limonis, notes, (31) 152, 244.  
 limonis, treatment, (33) 149.
- lini—  
 notes, (30) 649.  
 relation to soil temperature, (36) 748.  
 relation to temperature, (39) 249.  
 resistance to, (40) 745.  
 studies, (38) 449.
- lycopersici—  
 description, (31) 49.  
 description and treatment, (30) 50; (32) 147.  
 notes, (26) 649; (37) 551.  
 tomatoes resistant to, (34) 646.
- malli n.sp., on onion, (40) 643.
- maydiperdum n.sp., description, (26) 446.
- metachroum, notes, (28) 847.
- moniliforme, treatment, (36) 547.
- mycelium in tobacco, staining, (39) 248
- n.spp., descriptions, (31) 544.  
 n.spp. in soils, (39) 249.  
 n.spp., notes, (29) 243.  
 neglectum n.sp., description, (28) 845.
- nivale—  
 notes, (29) 47, 244, 445; (30) 448.  
 relation to *Nectria graminicola*, (30) 846  
 studies, (31) 343.  
 treatment, (26) 446.
- niveum on watermelon, (34) 53.  
 on cereals, treatment, (35) 245.  
 orobanchus, pigments of, (32) 428.  
 oxysporum, notes, (29) 646; (30) 649; (32) 136, 239; (36) 846.  
 oxysporum, studies, (28) 851; (36) 846; (38) 848
- pathological species, (34) 840.  
 putaminum, notes, (31) 539.  
 putrefaciens, studies, (26) 749.
- radicicola—  
 studies, (35) 455.  
 temperature relations, (36) 649.
- rots of sweet potato, (39) 854.  
 rubi, investigations, (26) 850.  
 rubiginosum, notes, (31) 542; (32) 642, 843.  
 samoense n.sp., description, (31) 347.  
 solani, notes, (30) 48, 847; (32) 546 (35) 750; (37) 551.
- sp. affecting—  
 alfalfa caterpillar, (32) 58.  
 apple buds, (30) 352.  
 Lolium, (26) 545.  
 potatoes, (30) 539.  
 sp. as affected by cold, (34) 538.  
 sp., notes, (27) 45, 750; (28) 246, 647.  
 sp. on bananas, (32) 751; (34) 841.  
 sp. on beans, (36) 248; (37) 840.  
 sp. on carnations, (38) 51.  
 sp. on garden peas, (39) 853.  
 sp. on oranges, (35) 749.  
 sp. on raspberry roots, (34) 55.  
 sp. on rubber, (32) 347.  
 sp. on sesame, (34) 50.  
 sp. on sugar cane, (37) 553.  
 sp. on tobacco, (32) 844; (39) 854.  
 sp. relation to—  
 citrus gummosis, (31) 449.  
 damping-off of truck crops, (35) 844.  
 sp., studies, (26) 57; (27) 447.  
 sp., treatment, (27) 655; (31) 647.  
 spp., descriptions and treatment, (29) 847.  
 spp., distribution on potatoes, (27) 247.  
 spp., effect on composition of potatoes, (35) 246.  
 spp., enzymatic activity, (27) 249.  
 spp. from cankered cacao bark, (31) 750.  
 spp. in soils, relation to potato diseases, (39) 249.

- Fusarium**—Continued.  
 spp., infection experiments with, (27) 247.  
 spp., notes, (28) 546, 845; (29) 243; (31) 147; (39) 52.  
 spp. on—  
   bananas, (31) 244.  
   cacao, (31) 242, 750.  
   coffee, (32) 646; (38) 51.  
   conifer seedlings, (40) 545.

   sweet potatoes, (31) 544; (32) 50, 343; (33) 743; (34) 156; (40) 347.  
   tomatoes, (33) 845.  
 spp., relation to—  
   apple rot, (33) 348.  
   potato stem lesions, (39) 649.  
   potato tuber rot and wilt, (35) 246; (38) 149.  
   rye "drunk bread" disease, (35) 845.  
   tomato blight, (32) 444.  
 spp., studies, (30) 542.  
 spp., treatment, (27) 351; (31) 647.  
 taxonomy, (29) 444.  
 tracheiphilum, studies, (37) 50.  
 trichothecioides—  
   n.sp., description, (27) 650.  
   on watermelon, (38) 645.  
   treatment, (28) 848; (35) 847.  
 trifolii n.sp., description, (36) 748.  
 tritici, notes, (28) 443.  
 tuberi vorum—  
   and *F. trichothecioides*, identity, (36) 846.  
   n.sp., description, (29) 47.  
 vasinfectum—  
   description, (28) 346.  
   notes, (26) 844; (30) 149, 538; (31) 343; (40) 845.  
   on cotton, (32) 342.  
   on okra, (38) 851.  
   willkommii, description, (27) 152.  
**Fusel oil**—  
 determination in distilled spirits, (29) 798.  
 insecticidal and larvicidal value, (34) 359.  
**Fushia** n.g. and n.sp., description, (38) 857.  
**Fusicladium**—  
 butyrospermi n.sp., description, (30) 48.  
 dendriticum, *see* Apple scab.  
 depressum petroselinii, notes, (28) 851.  
 effusum, notes, (39) 459.  
 effusum, treatment, (31) 245; (39) 553.  
 macrosporium n.sp., description, (26) 651.  
 macrosporium, notes, (37) 253, 838; (38) 153, 356.  
 parasitism, (27) 46.  
 pirinum—  
   description, (31) 749.  
   notes, (34) 846.  
   relation to weather, (32) 842.  
 pruni, notes, (40) 749.  
 sp. on pears, treatment, (32) 842.  
 spp. on orchard fruits, (37) 550.  
 spp., studies, (28) 241.  
 vanillae, description, (27) 450.  
**Fusicoccum**—  
 cinerescens, notes, (27) 747.  
 perniciosum, notes, (40) 160.  
 putrefaciens—  
   n.sp., description, (38) 252.  
   relation to temperature and rainfall, (38) 454.  
   treatment, (39) 749.  
**Gabi**—  
 culture, (38) 231.  
 culture and analyses, (32) 37.  
 culture in Philippines, (40) 231, 244.  
**Gadfly**—*see also* *Tabanus* spp.  
 in Florida Everglades, (40) 757.  
 in lands, prevention, (37) 867.  
 notes, (29) 454.  
**Gages**, automatic, use in stream measurement, (33) 777.  
**Galactan**—  
 determination in food and feeding stuffs, (29) 411.  
 of *Larix occidentalis*, (35) 611.  
 Galactase of milk, fermenting power, (31) 413.  
**Galactose**—  
 absorption in the intestines, (28) 763.  
 acustomation of yeast to, (28) 202.  
 crystalline pentacetate of, (35) 502.  
 detection in presence of lactose, (28) 205.  
 determination, (26) 709; (36) 713.  
**Galactose**—Continued.  
 separation from lactose and glucose, (26) 202.  
 toxicity for green plants, (38) 224.  
 toxicity toward dogs, (28) 462.  
 toxicity toward plants, (35) 28.  
 utilization by pea seedlings, (27) 730.  
 Galactosidase  $\beta$  in vegetable kingdom, (38) 524.  
 Galalith, fertilizing value, (28) 736; (31) 518.  
 Galbraith, A. J., neurological notice, (40) 500.  
**Galega officinalis**—  
 analyses, (31) 863.  
 culture experiments, (30) 632.  
 description and control, (37) 142.  
 Galeopsis grandiflora, betains in, (27) 204.  
 Galeopsomyia, new genus, description, (36) 556.  
**Galeruca**—  
 alni, notes, (28) 554.  
 xanthomelaena, *see* *Galerucella luteola*.  
**Galerucella**—  
 cavicollis, *see* Cherry leaf beetle,  
 decora, notes, (28) 256; (34) 853; (38) 257.  
 luteola—  
   biology and control, (39) 564.  
   life history, (36) 461.  
   notes, (26) 147; (27) 658; (28) 57, 158; (30) 455, 655; (33) 253; (34) 752.  
   remedies, (29) 556.  
   reproduction in, (32) 351.  
   tenella, notes, (40) 64.  
 Galesus silvestrii, parasitic on fruit flies, (31) 456.  
 Gainsoga parviflora, studies, (33) 534.  
**Galium**—  
 aparine, notes, (29) 144.  
 spp., competition on different soil types, (40) 424.  
**Gall**—  
 bladder infections, studies, (36) 773.  
 formation in plants, (37) 26.  
 insects and their relations to plants, (39) 664.  
 midges—  
   adaptation in, (31) 155.  
   American, feeding habits, (26) 860.  
   in New England States, (30) 253.  
   new species, descriptions, (26) 860.  
   notes, (27) 57.  
   of New York, (34) 752.  
   of north of England, (39) 866.  
   studies, (28) 455; (30) 657; (33) 253; (40) 163.  
 mites, injurious, notes, (32) 651.  
 pod-shaped, description, (30) 251.  
 sickness, *see* Anaplasmosis.  
 wasps, type species, (40) 862.  
 weevil, rigla, notes, (27) 53.  
 weevils injurious to crucifers, (33) 648.  
 Gal-lamziekte, paper on, (29) 476.  
 Galleria mellonella, *see* Bee moth, and Wax moth  
**Gallflies**—  
 of Germany, (31) 157.  
 parasites of, (28) 456.  
 studies, (26) 361.  
**Gallic acid**—  
 effect on fungi, (28) 444.  
 utilization by plants, (36) 329.  
**Gallinaceae**—  
 female, secondary male sex characters in, (31) 572.  
 secondary sex characters in, (26) 774; (28) 877.  
**Gallinae**, secondary sex characters, changes in, (33) 272.  
**Gallinules**, North American, distribution and migration, (32) 55.  
**Gallogen**, nature and use, (26) 580.  
**Gallowaya pini**, notes, (31) 348.  
**Galls**—  
 artificial production, (38) 426.  
 Chinese, notes, (38) 764.  
 fungus, storage of reserve materials in, (28) 429.  
 insect—  
   descriptions, (39) 868.  
   formation, (34) 557.  
   morphology and biology, (29) 353.  
   notes, (31) 155.  
   of America, key, (40) 554.

 in the South, (32) 743.  
 management, (31) 44.  
 notes, (30) 696; (32) 494; (33) 598, 599, 696.  
 on cotton farms, (40) 293.  
 paper on, (31) 499.  
 preparation and management, (29) 495.  
 suggestions for, (34) 635.  
 in South Australia, (31) 836.  
 insects affecting, (26) 553; (29) 158; (32) 151;  
 (33) 746; (35) 355.  
 Italian, treatise, (33) 644.  
 laws for protection in Michigan, (33) 438.  
 management, (26) 539.  
 mountain, treatise, (34) 45.  
 notes, (30) 462.  
 planning and planting, (39) 450.  
 planting and care, (31) 693.  
 rock, treatise, (26) 139; (27) 442; (31) 536.  
 seeding machine for, (27) 191.  
 small, color grouping for, (33) 442.  
 small, value, (38) 792.  
 spraying, (32) 834.  
 treatise, (26) 393, 899; (31) 143, 236.  
 vacant lot, notes, (29) 95.  
 vegetable—  
 culture, (31) 438.  
 illustrated lecture, (37) 297.  
 notes, (26) 237; (30) 738; (31) 494; (37) 447.  
 on irrigated farms, (31) 336.  
 planting, (31) 394.  
 Gargaphia solani—  
 investigations, (33) 355.  
 n.sp., description, (33) 355.  
 notes, (35) 657.

Garget, *see* Mammitis.

Garland School of Home Making, food cost at,  
 (31) 659.

Garlic—

bulblets, destruction in seed wheat, (31) 739.  
 culture, (40) 833.  
 culture experiments, (37) 529.  
 disease, description, (30) 449.  
 eradication, (36) 740.  
 flavor, removal from milk and cream, (31) 771.  
 food value, (36) 863.  
 for rice soils, (35) 338.  
 selection experiments, (30) 738; (32) 834.  
 value in the diet, (29) 664.  
 wild, eradication, (29) 433; (31) 739; (34) 736.

Garuleum bipinnatum, analyses and digestibility,  
 (32) 167.

Garvanzo, varieties, (28) 533.

Gas—

analysis of small quantities, (32) 117.  
 asphyxiating, effect on vegetation, (37) 153, 253.  
 burette, description, (35) 313, 314.  
 burner, new Teclu, (35) 801.  
 cooker, description, (27) 65.  
 cookers, efficiency, (31) 856.  
 cooking, heating, and lighting, manual, (33)  
 753.  
 cooking, tests, (27) 65.  
 effect on plants, (30) 131, 432; (32) 524, 729;  
 (33) 629; (38) 28.  
 engines, *see* Engines, internal-combustion.  
 evolved, apparatus for measuring, (26) 26.  
 formation in milk, (35) 676.  
 gangrene, *see* Gangrene.  
 generator, description, (37) 110.  
 illuminating, effect on—  
 greenhouse plants, (27) 332.  
 plants, (30) 131; (35) 636; (37) 726, 727.  
 roots, (34) 243.  
 infections, evolution of views on, (39) 889.  
 injurious to agriculture and forestry in Austria,  
 (37) 528.  
 injurious to plants, (38) 28.  
 lighting for farm houses, (27) 90.  
 lighting plants, individual, tests, (28) 788.  
 locomobile, description, (27) 791.  
 manufacture products, methods of analysis, (27)  
 205.  
 methods of analysis, (33) 207.  
 molecules, condensation and evaporation, (38)  
 511.  
 movement in plants, (30) 202.  
 mustard, pathology of poisoning by, (40) 382.  
 phlegmon, specific, in hogs, (34) 479.  
 plant, residue, fertilizing value, (39) 428.  
 plants and engines, suction, notes, (28) 786.  
 poisoning of trees by, (31) 730.  
 prices of in United States, (31) 558.  
 pump, description, (26) 893.  
 purification residue, utilization, (27) 219.  
 tractors—  
 for farm use, (32) 886.  
 for plowing, (27) 387.  
 testing, (28) 200.  
 use in cooking, (28) 167.

Gases—

analysis, apparatus for, (40) 111.  
 dissolved, determination in waters and efflu-  
 ents, (34) 410.  
 insoluble, from organic matter, composition  
 (29) 617.  
 measuring density, (40) 202.  
 methods of analysis, (27) 205.  
 of swamp rice soils, (30) 515; (33) 216.

Gasoline—

as vermifuge, (38) 884.  
 carburetion, (37) 189.  
 distillation, (38) 390.  
 effect on soils, (37) 519.  
 engines, tests, (27) 387, 388.  
 fuel value, (27) 690; (28) 354.  
 gas for small lighting plants, tests, (28) 788.  
 insecticidal value, (34) 252; (39) 762.  
 lighting plants, notes, (28) 291.  
 power, use on farms, (27) 484.  
 properties, testing, and specifications, (38) 389.  
 substitutes, tests, (32) 788.  
 tiller, description, (36) 891.

Gasometric determinations, technique, (40) 202.

- Gasterocerodes gossypii**—  
in Brazil, (38) 54.  
n. g. and n. sp., description, (32) 658.
- Gasteromyces**, new or rare species, (39) 30.
- Gastric**—  
and pancreatic fat digestion in infants, (29) 365.  
digestion as affected by rice diet, (28) 760.  
digestion of proteins in man, (31) 161.  
juice—  
action on zein and gliadin, (28) 66.  
antiseptic action, (35) 559.  
normal secretion, (35) 664.  
of constant acidity, secretion, (32) 764.  
Young's studies in 1803, (40) 869.
- lipase, studies, (39) 875.
- residuum of women and men, (36) 562.
- residuum of women, phosphorus content, (39) 670.
- residuum, properties of, (34) 663.
- response to foods, (40) 269.
- secretion—  
and urine ammonia, (40) 766.  
as affected by bitter tonics, (32) 858.  
as affected by food accessories, (26) 466.  
as affected by meat extract, (31) 662.  
as affected by muscular fatigue, (26) 160.  
during digestion, (30) 464.  
during fasting, (40) 270.  
effect on chlorin supply of body, (26) 465.  
following water ingestion, (30) 766.  
in infants' stomachs, (40) 71.  
in man, (34) 465.  
mechanics of (30) 201.  
relation to salivary glands, (40) 867.
- Gastritis, parasitic**—  
in cattle, (28) 481.  
in goats, (30) 685.  
in sheep, (27) 86, 475; (28) 481; (34) 275.
- Gastrodia elata**, symbiosis with *Armillaria mellea*, (27) 224.
- Gastrodiscus aegyptiacus**, injurious to horses, (26) 384.
- Gastroenteritis**—  
of cattle, (26) 678.  
of sheep and goats, (37) 380.
- Gastroidea viridula**, feeding habits, (28) 553.
- Gastrointestinal**—  
disturbances due to rancid butter, (26) 275.  
disturbances, relation to oysters, (27) 866.  
infections, hemorrhagic, in dogs, (26) 588.  
lavage in dogs, (40) 482.  
studies, (34) 659, 862.
- Gastropacha pini**, studies, (35) 759.
- Gastrophilus**—*see also* Horse bots.  
duodenalis, studies, (40) 458.  
equi, *see* *Gastrophilus intestinalis*.  
haemorrhoidalis, notes, (36) 553.  
intestinalis, investigations, (38) 83.  
nasalis, notes, (27) 259; (40) 458.  
nasalis, oviposition, (39) 362; (40) 684.  
pecorum, studies, (39) 686.  
spp., notes, (26) 781.  
spp., relation to swamp fever in horses, (38) 689.  
spp., studies, (39) 81, 156, 189, 686; (40) 458, 858.
- Gates**, construction, handbook, (33) 291.
- Gayal-cattle hybrids**, measurements, (27) 672.
- Gayals**—  
hybridization experiments, (28) 670.  
measurements, (27) 672.
- Gazella dorcas**, relation to sheep pox, (28) 183.
- Gazelle**, relation to sheep pox, (28) 183.
- Geanthemum**, description, (31) 339.
- Gear**, traction, description and tests, (29) 389.
- Geasteroides texensis**, n. g. and n. sp., description, (39) 30.
- Gecko** as a host of *Phlebotomus minutus*, (30) 159.
- Geese**—  
ancestry, (34) 569.  
as affected by antimony, (28) 73.  
care and management, (32) 869; (39) 176.  
disease of, notes, (39) 892.  
fattening in Germany, (30) 873.  
management, (40) 177.  
origin and history of breeds, (27) 572.  
raising, (36) 772.  
serum proteins of, (32) 861.  
treatise, (26) 270.
- Gelatin**—  
and protoplasm, similarity in behavior, (37) 431.  
antigenic properties, (39) 787.  
as binder for ice cream, (36) 78.  
as human food, (35) 163.  
as source of bacteria in ice cream, (28) 167.  
detection in sour cream, (31) 210.  
determination, (26) 805.  
determination of zinc and copper in, (40) 712.  
distribution of nitrogen in, (36) 269.  
effect on—  
bacterial content of ice cream, (32) 660.  
dogs, (28) 568.  
ice cream, (30) 476.  
feeding during inanition, (26) 465.  
food preparations from, (32) 854.  
hydrolysis of, (26) 22.  
manufacture, (27) 763.  
nitrification in soils, (26) 722.  
nutritive value, (29) 868.  
occurrence of arsenic in, (26) 464.  
resorption in the small intestine, (26) 159.  
rôle in glycogen formation, (31) 763.  
roller waste, analyses, (34) 521.  
swelling in polybasic acids and their salts, (38) 501, 502.  
use in food products, (34) 167.  
use in ice cream making, (36) 875.  
use in spraying materials, (33) 450.
- Gelechia**—  
cerealella, control, (39) 862.  
confusella, biology and remedies, (38) 861.  
gossypella, *see* Cotton bollworm, pink.  
hibiscella, studies, (40) 754.  
operculella, *see* Potato tuber worm.  
pseudamacella, notes, (35) 356.  
tribadacucella, notes, (28) 352.
- Gelignite**, subsoling experiments with, (29) 785.
- Gels** for studying protoplasmic action, (37) 325.
- General Education Board**—  
activities of, (32) 896.  
agricultural grants of, (31) 400.
- Generative organs**, internal, diseases of, (32) 581.
- Generic types**, determination, (35) 328.
- Genetic**—  
and nongenetic factors, interrelation, (28) 531.  
data, accuracy in recording, (36) 332.  
relationships, studies, (33) 822, 823.  
research, evolutionary aspects, (31) 727.
- Genetics**—*see also* Heredity and Hybridization.  
application of principles of, (30) 329.  
application to breeding problems, (39) 877.  
at Graduate School of Agriculture, (31) 305.  
bibliography, (28) 370.  
cytology in study of, (26) 672.  
international congress of, (31) 200.  
laboratory manual, (40) 693.  
modes of research in, treatise, (34) 563.  
of plants, textbook, (40) 817.  
present status, (27) 671.  
teaching, (28) 570.  
teaching in agricultural colleges, (29) 769.  
textbook, (39) 671.  
treatise, (28) 876; (30) 264; (31) 70.
- Geniocerus**—  
n. spp., descriptions, (30) 857; (33) 360.  
spp., notes, (34) 450.
- Genital glands**, endocrine rôle, (40) 871.
- Genitalia**, female, biochemistry of, (29) 66.
- Genotypical factors**, mutual influence, (36) 434.
- Genian violet**—  
effect on protozoa and growing tissue, (32) 373.  
toxicity and fate in the animal body, (30) 277.
- Genitobiose**—  
derivatives, rotatory powers, (37) 502.  
notes, (31) 310.
- Geniopicrin**, decomposition by emulsin, (29) 505.
- Geochemistry**, data of, (26) 517; (35) 16.
- Geococcyx californianus**, food habits, (37) 156.
- "Geocol,"** notes, (36) 419.
- Geoderes**—  
incomptus, notes, (40) 753.  
melanothrix, notes, (35) 364.
- Geography**—  
commercial, textbook, (28) 298.  
forestry in, (27) 393.  
industrial and commercial, textbook, (31) 793.  
manual, (34) 599.  
of Minnesota, (26) 385.

- Geography—Continued.  
   of northern Florida, (33) 525.  
   of world's agriculture, (38) 895.  
 Geoea squamosa, notes, (29) 252; (40) 752.  
 Geologic-agronomic maps—  
   importance, (28) 619.  
   notes, (27) 720.  
 Geological—

   root rot, studies, (27) 247; (34) 245.  
   root rot, treatment, (36) 249.  
   Sclerotinia affecting, (34) 350.  
 Glioddu—  
   composition, (36) 674.  
   effect on human metabolism, (35) 472.  
   studies, (30) 276.  
 Gipsy moth—  
   bacillary septicaemia of, (30) 54.  
   caterpillars, bacterial disease, (39) 465.  
   control, (26) 855; (28) 553, 556; (29) 255; (30) 654; (32) 850; (33) 57; (36) 456; (37) 55, 254, 452, 563; (39) 750, 760, 764.  
   control—  
     by forest utilization, (38) 145.  
     by natural enemies in Canada, (35) 465.  
     by parasites, (38) 159.  
     in Canada, (33) 746.  
     Connecticut, (35) 53.  
     Massachusetts, (27) 455; (28) 643; (30) 98, 743; (33) 144; (36) 843; (37) 646.  
     New England, (33) 254.  
     New Hampshire, (33) 858; (35) 461.  
     United States, (31) 251.  
   destruction by starlings, (40) 647.  
   dispersion by wind, (37) 254.  
   dissemination, (28) 655.  
   distribution in Canada, (38) 459.  
   eggs, destruction by birds, (27) 355.  
   food plants of, (33) 453.  
   important natural enemy of, (26) 350.

## Gipsy moth—Continued.

- in cranberry bogs, (33) 352; (36) 54; (39) 60.
- Crimea, (33) 155.
- Connecticut, (37) 259.
- Great Britain, (38) 562.
- Nova Scotia, (30) 752.
- larvae, dispersion by wind, (33) 653.
- larvae, dissemination of white pine blister rust by, (38) 860.
- notes, (26) 59; (27) 356, 857; (28) 57, 155, 157, 752, 854; (29) 251, 252; (30) 549; (31) 548, 848; (33) 61; (34) 752; (35) 58.
- parasite of, (27) 359.
- parasites and enemies in Canada, (38) 556.
- parasites in Maine, (37) 459.
- parasites of, (28) 859; (30) 460; (31) 355, 652; (34) 652; (39) 662; (40) 57.
- parthenogenesis in, (38) 261.
- polyhedral virus, (40) 255.
- portable insectary for, (40) 752.
- sex development in, (32) 349.
- tree bands for, (37) 258.
- wilt disease—
  - dissemination, (35) 758.
  - notes, (27) 456; (28) 254, 859; (30) 755.
  - studies, (27) 659, 660; (30) 456; (33) 254.
- Girls'—
  - agricultural—
    - club champions in 1913, (30) 399.
    - clubs, formation, (28) 792.
    - competitions, (33) 196.
    - school at Berlaer, Belgium, (30) 93.
  - and boys' agricultural clubs, (28) 194.
  - and boys' clubs, notes, (28) 395.
  - and boys on the farm, (26) 299.
  - canning clubs—
    - in Kentucky, (32) 197.
    - in Mississippi, (29) 495.
    - organizing and conducting, (26) 795.
  - club work—
    - in Massachusetts, (34) 394.
    - in Nevada, (34) 899.
    - manual for rural teachers, (36) 294.
    - school credit for, (33) 799; (36) 293.
  - clubs—
    - animal husbandry course for, (35) 396.
    - food production by, (38) 795.
    - gardening for, (36) 496.
    - in Arkansas, (33) 95.
    - Canada, (38) 297; (40) 396.
    - Georgia, (33) 792.
    - Maine, (33) 697.
    - Massachusetts, (30) 597; (31) 598.
    - Michigan, (30) 794.
    - Michigan, projects for, (33) 792.
    - Nebraska, (32) 598.
    - Oklahoma, (36) 94.
    - rural schools, (32) 693.
    - Utah, (31) 693.
    - instructions for, (31) 298, 793, 794.
    - material supplied to, (33) 792.
    - notes, (27) 395; (29) 93, 394, 395; (33) 195, 599, 895.
    - organization, (31) 499; (32) 596, 692; (34) 793.
    - contest clubs, dangers in, (33) 296.
    - contests in Rhode Island, (28) 299.
    - country, life of, (34) 290.
    - demonstration work in the South, (26) 598; (32) 492.
    - domestic science clubs in Pennsylvania, (31) 393.
    - educating for the home, (29) 362.
    - field-crop competitions, (34) 493.
    - gardening clubs in Rhode Island, (31) 693.
    - home economics instruction for, (33) 298.
    - homemakers clubs for, (33) 299.
    - industrial—
      - and vocational training for, (28) 499.
      - clubs in Oregon, (31) 393; (32) 394.
      - clubs in rural schools, (31) 297.
    - pig clubs in Louisiana and Georgia, (31) 598.
    - poultry clubs, organization, (28) 599; (30) 395.
    - science work for, (36) 194.
    - sewing clubs, notes, (29) 395.
    - tomato clubs, notes, (28) 796.
    - training for house servants, (31) 490.
    - vocational training in New York, (40) 597.
  - Glacial deposits of Netherlands, studies, (26) 813.

## Glaciation—

- effect on agriculture, in Ohio, (32) 317.
- in Indiana, (29) 815.
- Glaciers, Alpine, variations, (38) 812.
- Gladioli, evolution, (34) 237.
- Gladiolus—
  - colvilli, bacteriosis of, (29) 844.
  - dry rot, studies, (39) 758.
  - hard rot disease of, (36) 453.
  - history, culture, and hybridization, (36) 643.
  - smut, notes, (26) 446.
  - varieties, (37) 345.
- Gland extracts, action on tubercle and other acid-fast bacilli, (38) 81.
- Glanderoserum, reversible precipitation, (37) 377.
- Glanders—
  - bacillus—
    - agglutination by normal horse serum, (28) 286; (29) 677.
    - as affected by calcium hypochlorite, (40) 478.
    - morphology and biology, (31) 579.
    - organism resembling, (26) 279.
  - chronic, infectiousness, (26) 173.
  - control in—
    - Austria, (37) 781.
    - Canada, (26) 376; (31) 79.
    - England, (36) 275.
    - Hawaii, (34) 477.
    - Kurland, (27) 285.
    - Minnesota, (27) 77.
    - New York, (34) 185, 782.
    - Prussia, (33) 387.
  - detection, (37) 79.
  - diagnosis, (26) 177, 279, 376, 578, 582, 676, 679, 882, 883; (27) 81, 183, 284, 285, 578, 681, 782, 883, (28) 286, 376, 478, 479, 480, 587, 779, 880; (29) 284, 499, 677; (30) 280, 480, 686, 881; (31) 83, 282, 380, 480, 579, 879; (32) 81, 180, 374, 580, 682, 779; (33) 180, 387, 479, 480, 773, 774; (34) 81, 185, 276, 576, 677, 781, 782; (35) 780; (36) 180, 382, 480, 579, 676, 880; (37) 689, 878; (38) 284, 886; (40) 84, 186, 288, 583, 680, 779, 885.
  - diagnosis, intrapalpebral test, (36) 80.
  - disease of mules simulating, (28) 887.
  - dissemination by public drinking troughs, (29) 499.
  - eradication, (27) 576; (34) 677.
  - eye test in, (26) 582.
  - fluctuations of agglutination titer in, (30) 480.
  - immunization, (27) 379, 782; (28) 286, 779; (30) 481, 578; (31) 83; (35) 75; (36) 679.
- in Brazil, (38) 784.
- Connecticut, (34) 274.
- England, (32) 271.
- Germany, (28) 583.
- Great Britain, (31) 177; (34) 382; (36) 378.
- Hawaii, (31) 177.
- Prussia, (27) 181.
- Washington, (37) 477.
- nodules and parasitic nodules, differentiation, (32) 374.
- notes, (26) 373; (27) 475; (39) 283, 387; (40) 86, 676, 778, 880.
- of the lungs in horses, (27) 685.
- outbreak in Waipio Valley, (28) 779.
- outbreaks in England, (38) 282.
- papers on, (34) 576.
- prophylaxis, (34) 782.
- sero-diagnosis, (27) 77, 183, 378, 478.
- serum, preparation, (38) 379.
- spread by open water troughs, (26) 782; (27) 77.
- treatment, (26) 578; (27) 183; (28) 79; (36) 678.
- Glandular—
  - cells, function of (28) 272.
  - diseases, immunization, (35) 574.
- Glass—
  - ground, effect of ingestion, (40) 385.
  - vessels, permanent marking, (40) 609.
- Glassware—
  - chemical, tests, (38) 309.
  - laboratory, drying rack for, (36) 805.
- Glaucoclepis n.g. and n.sp., description, (37) 564.
- Glaucinite—
  - action of fertilizer salts on, (35) 326.
  - as source of potash, (39) 218, 219.
  - extraction of potash from, (27) 323.
  - sand, fertilizing value, (29) 625.

- Glaucum corniculatum**, analyses, (33) 466.  
**Glaze**, notes, (38) 511.  
**Glecoma hederacea**—  
 betains in, (27) 204.  
 poisoning of horses by, (32) 278.
- Glialin**—  
 alcohol solution portion of, (29) 201.  
 as affected by gastric juice, (28) 66.  
 as affected by heat, (26) 866.  
 copper compounds of, (37) 9.  
 determination in flour, (27) 111, 498; (31) 208.  
 determination in wheat, (26) 22.  
 effect on wheat gluten, (26) 67.  
 hydrolysis products of, (33) 867.  
 in flour, quality, (27) 112.  
 lysin content, (29) 408; (31) 559.  
 modifications in, (29) 608.  
 nutritive value, (31) 264; (35) 368.  
 of wheat and barley hordein, relationship, (31) 377.  
 proteoses, physiological action, (34) 71.  
 rôle in nutrition, (28) 864.  
 separation from nonglialin proteins, (34) 610.  
 studies, (29) 201.  
 wheat, hydrolysis, (28) 607.
- Gliocladium** spp. in Norway, (31) 327.  
**Glipotropanium gasteracanthoides**, notes, (38) 566.  
**Globin caseinate**, antigenic properties, (32) 79.  
**Globulin**—  
 determination in milk, (31) 114.  
 from cotton seed, (36) 804.  
 of buckwheat, (39) 201.  
 serum, density and solution volume, (31) 804.
- Globulins**—  
 determination and purification, (26) 709.  
 in bacterial infection and immunity, (36) 778.  
 of the jack bean, (40) 308.  
 plant, preparation, (35) 9.
- Gloopepeziza turricula** n.sp., description, (33) 447.
- Gloeosporium**—  
 affine, notes, (26) 450.  
 alborubrum, notes, (34) 540; (35) 251; (37) 253; (38) 53, 759.  
 ampelophagum, notes, (26) 550; (33) 845; (37) 52, 453.  
 ampelophagum, treatment, (39) 753.  
 amygdalinum, notes, (36) 453.  
 and *Colletotrichum* on chili, identity, (34) 50.  
 campyloae n.sp., description, (37) 844.  
 carphae, notes, (28) 449.  
 caulivorum—  
 description and treatment, (39) 754.  
 notes, (36) 748.  
 on red clover, (34) 155; (35) 546.  
 coffeanum, notes, (38) 51.  
 concentricum, notes, (37) 551.  
 conviva n.sp., description, (37) 557.  
 darlingtoniae n.sp., studies, (30) 351.  
 elasticae, notes, (38) 153.  
 euonymicolum n.sp., description, (39) 758.  
 fructigenum—  
 description and treatment, (30) 50.  
 forms of, (28) 51.  
 notes, (30) 147; (34) 247.  
 studies, (26) 849.  
 gossypii, growth in plant decoctions, (37) 728; (38) 524.  
 heveae, notes, (37) 253.  
 kaki n.sp., description, (27) 251.  
 kaki, notes, (37) 656.  
 lagenarium, notes, (34) 843.  
 limeticolum n.sp., description, (28) 749.  
 lindemuthianum, notes, (39) 249.  
 lindemuthianum, treatment, (32) 843; (33) 846.  
 lunatum, notes, (34) 543.  
 lunatum, studies, (27) 352.  
 lupinus n.sp., description, (28) 648.  
 malicorticis, notes, (27) 249, 448; (29) 153; (31) 53.  
 malicorticis, perfect stage, (27) 649.  
 mangiferae, notes, (27) 750; (34) 442; (35) 153; (37) 755, 838.  
 manihotis, notes, (34) 843; (37) 551.  
 musarum, notes, (29) 547.  
 musarum, treatment, (38) 547.  
 n.spp., descriptions, (37) 748.  
 nervisequum—  
 notes, (27) 747; (32) 347; (37) 550.  
 on sycamores, (38) 646.  
 relation to *Gnomonia veneta*, (30) 351.  
 epstis, notes, (36) 348; (39) 453.
- Gloeosporium**—Continued.  
 polystigmaticum n.sp., description, (29) 752.  
 ribis, notes, (30) 246.  
 rufomaculans, notes, (40) 47.  
 sp., notes, (26) 841; (28) 153, 241; (31) 55.  
 sp. on apples, (34) 644.  
 sp. on bananas, (34) 841.  
 sp. on cassava, (34) 841.  
 sp. on coconuts, (34) 242.  
 sp. on horse chestnut shoots, (36) 52.  
 sp. on rubber, (33) 449.  
 sp. on shade trees, (38) 249.  
 sp. on spice bush, (31) 844.  
 sp. on tomatoes, (33) 445; (34) 841.  
 sp., relation to damping off of truck crops, (35) 844.  
 spp. as affected by temperature, (34) 541.  
 spp. in Barbados, (36) 541.  
 spp., notes, (28) 444.  
 spp., studies, (26) 749; (37) 245.  
 taxicolum, notes, (26) 853.  
 thalictri, notes, (26) 841.  
 tilliae, notes, (37) 550.  
 tilliaeolum, notes, (35) 251.  
 venetum—  
 life history and treatment, (38) 853.  
 notes, (33) 350; (40) 53.  
 perfect stage, (38) 252.  
 studies, (36) 347.  
 treatment, (33) 54.
- Glomerella**—  
 anthurii n.sp., description, (37) 550.  
 as affected by temperature, (32) 749; (34) 541.  
 cingulata—  
 description, (30) 453.  
 notes, (31) 641; (33) 348; (34) 247.  
 on apple, (39) 251, 551.  
 on fig, (39) 757.  
 on pecan, (39) 553.  
 relation to apple rot, (33) 348.  
 relation to temperature and rainfall, (36) 649; (38) 454.  
 utilization of pentoses by, (34) 351.  
 vaccinii, treatment, (39) 749.  
 wintering over, (33) 148.
- (*Colletotrichum*) *lindemuthiana*, notes, (31) 542.  
 culture strains of, (26) 645; (30) 745; (31) 843.  
 gossypii—  
 description and treatment, (29) 751.  
 growth in plant decoctions, (37) 728; (38) 524.  
 nitrogen fixation by, (37) 129.  
 notes, (28) 444, 647; (35) 455; (36) 541; (39) 52.  
 relation to weather, (40) 154.  
 strains of, (30) 538.
- rufomaculans**—  
 as affected by cold, (34) 538.  
 description, (29) 450.  
 enzymes produced by, (29) 648.  
 host relations, (27) 648.  
 notes, (27) 547; (28) 444; (29) 650; (34) 646; (35) 351.  
 on sweet peas, (32) 446.  
 relation to temperature, (33) 545.  
 studies, (37) 155.  
 vaccinii, notes, (39) 55.  
 spp., relation to sweet pea anthracnose, (26) 751.  
 studies, (28) 545.  
 variations in, (26) 645.
- Gloomy scale**, remedies, (26) 654; (27) 55.  
**Glossina**—see also Tsetse flies.  
 morsitans—  
 development of *Trypanosoma rhodesiense* in, (28) 255.  
 dipterous parasite of, (31) 63.  
 transmission of trypanosomes by, (27) 783 884.  
 trypanosomes in, (30) 781.  
 palpalis, development of *Trypanosoma gambiense* in, (26) 150.  
 palpalis, host of *Trypanosoma gallinarum*, (27) 787.  
 parasites of, (39) 566.  
 spp., transmission of *Trypanosoma* spp. by, (26) 151.
- Glossitis**, gangrenous, in horses, (38) 178.  
**Glossonotus** sp., notes, (26) 148

- Glover's scale, notes, (26) 149.  
 Glucal, physiological action, (35) 665.
- Glucinum—**  
 assimilation by *Aspergillus niger*, (31) 224.  
 effect on *Aspergillus* spp., (29) 825.  
 utilization by fungi, (29) 28.
- $\alpha$ -Glucoheptose, hexacetates of, (36) 12.  
 Glucolytic ferment of yeast, (37) 765.
- Glucophose, notes, (30) 203.
- Glucosamin—**  
 hydrochlorid as a source of nitrogen, (29) 827.  
 hydrochlorid, preparation, (34) 803.  
 isomeric pentacetates of, (36) 202.
- Glucosazone reaction, studies, (39) 414.
- Glucose—**  
 absorption in the intestines, (28) 763.  
 and maltose, comparison, (31) 762.  
 as affected by hydrogen peroxid, (28) 202.  
 as dressing in veterinary surgery, (36) 178.  
 assimilation, limit, (35) 369.  
 beta, preparation, (37) 410.  
 bromination as affected by catalyzers, (40) 613.  
 commercial, effect on white rats, (35) 163.  
 composition and use, (29) 460.  
 confectioners', analyses, (29) 867.  
 decomposition by *Bacillus coli communis*, (38) 709.  
 detection in presence of lactose, (28) 205.  
 detection of arsenic in, (39) 113.  
 determination, (26) 709; (40) 312.  
 determination in—  
 juices, (28) 613.  
 presence of other substances, (29) 716.  
 urine, (38) 713.  
 effect on—  
 ammonia production and use in killed plants, (28) 327.  
 autolysis, (31) 763.  
 cooking temperatures of candy sirups, (32) 762.  
 germination of seeds, (27) 201.  
 protein catabolism, (29) 663.  
 respiration of seeds, (27) 729.  
 secretion of diastase by fungi, (31) 13.  
 soil nitrogen, (35) 218.  
 fatty acid esters of, (29) 269.
- formation—**  
 by amylases, (36) 315.  
 from body proteins, (33) 868; (34) 366.  
 in plants, (35) 413.
- history of, (26) 106.  
 humification, (38) 26.  
 in lymph and blood, (39) 670.  
 industry in United States, (30) 711, 791.  
 limit of assimilation, (28) 262.  
 manufacture, (39) 113.  
 manufacture from vine shoots, (26) 613.  
 metabolic relationship of proteins to, (33) 261.  
 methods and results of analysis, (35) 316.  
 preparation from corncobs, (40) 17.  
 properties, (32) 109.  
 relation to polyneuritis gallinarum, (29) 865.  
 resorption in small intestine, (29) 268.  
 separation from lactose and galactose, (26) 202.  
 sirup, analyses, (34) 660.  
 solutions, turbidity, (36) 808.  
 standards for, (29) 867.  
 toxicity, (28) 661.
- d*-Glucose, studies, (37) 109.
- Glucosid alcohols, synthesis, (29) 505.
- Glucosids—**  
 and carbohydrates, treatise, (28) 710.  
 as producers of hydrocyanic acid, (29) 713.  
 biochemical detection, (29) 509.  
 effect on germination of seeds, (33) 825.  
 formation by plants, (36) 329.  
 indigo-yielding, physiology of, (35) 333.  
 occurrence in pears, (26) 327.  
 pigment-producing substances from, (30) 129.  
 preparation and detection, (30) 202.  
 production from glycol and glycerol, (30) 502.  
 relation to anthocyanin in flowers, (31) 427; (33) 427.
- Glucosylose, new, notes, (32) 502.
- Glue—**  
 factory—  
 refuse, analyses, (34) 521.  
 sludge, fertilizing value, (28) 734.  
 waste as source of lime, (38) 22.  
 eather as a cattle feed, (37) 171.
- Glugea—**  
 polymorpha, notes, (27) 456.  
 spp., notes, (30) 362.
- Glutamic acid as a source of ammonia, (29) 723.
- Glutamin—**  
 assimilation by plants, (26) 32.  
 distribution in plants, (30) 129.  
 in germinating corn, (35) 202.  
 grape leaves, (27) 731.  
 stachys tubers and citrus leaves, (26) 107.  
 sugar beets, (28) 810.  
 sugar cane juice, (30) 15.
- Glutaminc acid—**  
 heat of combustion, (26) 160.  
 in tomatoes, (27) 364, 634.  
 preparation and determination, (27) 406.
- Glutelin, lysin content, (31) 559.
- Gluten—**  
 absorption of moisture by, (37) 363.  
 as affected by heat, (26) 866.  
 biolytic cleavage of, (31) 711.  
 bread, analyses, (26) 464.  
 content of flour, factors affecting, (32) 63.  
 determination, (37) 617.  
 determination in cereal products, (29) 799.  
 determination in flour, (27) 498.  
 dry, composition, (27) 807.  
 dry, relation to protein content of flour, (27) 807.  
 feed—  
 analyses, (26) 72, 165, 362, 568, 665, 714, 768, 873; (27) 68, 170, 171, 570, 669, 670, 774, 872; (28) 265, 364, 464, 465, 669; (29) 271, 367, 467, 570, 665, 769; (30) 67, 68, 169, 565; (31) 73, 168, 366, 467, 564, 663; (32) 169, 259, 568, 667, 862; (33) 71, 371, 568, 665; (34) 169, 371, 467, 566, 665; (35) 374, 562, 867; (36) 65, 167, 268, 667, 765; (37) 471, 767; (38) 369, 376; (39) 270, 370, 773; (40) 72, 470, 571.  
 and meal, analyses, (39) 167, 270, 370; (40) 72, 470, 571.  
 and meal, digestibility, (39) 171.  
 ash analyses, (29) 861.  
 definition, (28) 98.  
 efficiency for milk production, (36) 872.  
 for milk production, (40) 572.  
 palatability and nutritive value, (38) 66.  
 proteins, efficiency for milk production, (36) 671.  
 feeds, paper on, (28) 74.  
 flour, amino acid in, (33) 665.  
 flour, examination, (26) 867.  
 foods, examination, (28) 357.  
 inheritance of imperfections in, (27) 500.  
 meal—  
 analyses, (27) 570; (28) 265, 364, 669; (29) 467, 769; (30) 67, 68, 169, 467, 868; (31) 73, 564, 663; (32) 259, 667; (33) 71, 371, 759; (35) 562, 867; (36) 167, 268, 667, 765; (38) 665; (39) 167, 270, 370.  
 definition, (28) 98.  
 digestibility, (39) 171.  
 feeding value, (26) 468.  
 fertilizing value, (34) 520.  
 for laying hens, (39) 578.  
 physical properties, (40) 762.  
 variations, (32) 559; (35) 108.  
 wheat, amino acid in, (33) 665.  
 wheat, colloidal swelling, (34) 111.  
 wheat, hydrolysis, (28) 607.
- Glutenin—**  
 as affected by heat, (26) 866.  
 effect on wheat gluten, (26) 67.  
 lysin content, (31) 559.
- Glucose—**  
 and glucoose in molasses, (40) 313.  
 determination, (37) 617.  
 determination in molasses, (39) 206.  
 notes, (36) 609.
- Glyceria maritima*, growth in presence of salt, (33) 222.
- Glycerids—**  
 low molecular, of fatty acids in milk fat, (33) 806.  
 of fats and oils, studies, (32) 801.  
 of milk fat, (31) 804; (40) 608.
- Glycerin—**  
 action of symbiotes on, (40) 464.  
 as source of carbon for citromyces, (30) 805.  
 bacterial dehydration, (35) 163.  
 detection in cider vinegar, (36) 299.

- Glycerin—Continued.  
determination, (26) 709; (40) 904.  
determination in—  
  fats and soaps, (26) 411.  
  meat products, (29) 800.  
  wine, (34) 506.  
effect on—  
  activity of invertase, (38) 502.  
  alcoholic determinations of beverages, (34) 661.  
  growth of peas, (31) 522.  
  plant respiration, (26) 628.  
germicidal power, (34) 876.  
hemolytic action, (36) 276.  
humification, (38) 26.  
purity, (27) 208.  
toxicity, (38) 283.
- Glycerol—  
as affected by hydrogen peroxid, (29) 309.  
as source of carbon for molds, (30) 226.  
chemical technology of, (29) 413.  
determination, (26) 114.  
determination in—  
  fats, (28) 313.  
  soap lyes, (40) 712.  
  wine, (32) 20.  
effect on solution of casein by sodium hydroxid, (36) 108.  
esters, effect on tubercle bacilli, (27) 681.  
Glycerophosphoric acid, hydrolysis by dilute acid and alkali, (31) 805.  
Glycerotriphosphoric acid of Contardi, (31) 709.
- Glycin—  
action upon esters, (31) 711.  
assimilation by plants, (26) 32.  
canker of, (26) 845.  
effect on action of alcohol on plant cells, (34) 333.  
effect on ethyl butyrate, (28) 409.  
metabolism, studies, (39) 873.  
nitrification rate, (32) 124.  
significance in intermediary metabolism, (40) 71.
- Glycine—  
hispidia, effect on nitrogen content of soils, (31) 733.  
soja, anatomical structure, (31) 314.
- Glyphaghus—  
cadaverum, notes, (40) 855.  
domesticus, fumigation, (39) 161.
- Glycocoll—  
as antidote for benzoic acid poisoning, (32) 165.  
as source of ammonia, (29) 723.  
decomposition by mold fungi, (29) 28.  
effect on baking quality of flour, (26) 356; (30) 555.  
effect on plant growth, (34) 31.  
formation in the body, (29) 63.  
ingested, metabolism rate of, (33) 755.  
ingestion, effect on metabolism, (28) 867.  
isolation from oat farina, (31) 309.  
occurrence in sugar cane juice, (30) 15.
- Glycoeyamilglycylglycin, synthesis, (36) 202.
- Glycogen—  
and diastase of animal tissues, correlation, (30) 204.  
available, in the human body, (31) 466.  
content of liver after protein feeding, (31) 465.  
content of liver of tumor-bearing rats, (30) 477.  
formation in yeast cells, (28) 631.  
from different sources, comparison, (29) 166.  
heat of combustion, (26) 160.  
hydrolysis by diastatic enzymes, (29) 166.  
occurrence in phanerogams, (27) 133.  
relation to hemoglobinemia, (26) 683.  
solutions, effect on plant transpiration and growth, (31) 625.  
sources of, (31) 763.  
storage in the animal body, (27) 576.
- Glycol—  
as source of carbon for molds, (30) 226.  
determination, (26) 709.
- Glycolic acid, decomposition by sunlight, (30) 431.  
Glycolytic power, determination, (29) 663.  
Glycoproteins, antigenic properties, (33) 773.
- Glycosuria—  
and allied conditions, treatise, (30) 277.  
and diabetes, treatise, (32) 474.  
immunity, studies, (30) 277
- Glycuronic acid, isolation from sugar beets, (26) 307.
- Glycyrrhiza lepidota, geographical distribution, (26) 335.
- Glyoxylic acid, transformation into formaldehyde, (40) 507.
- Glypta—  
  brevis n.sp., description, (35) 262.  
  evetriae n.sp., description, (38) 565.
- Glyptoscelis alternata, notes, (35) 364.
- Glyptotermes satsumensis n.sp., description, (35) 255.
- Gmelina arborea, notes, (29) 443.  
“Gnamma holes,” formation, (30) 511.
- Gnamptodon nepticulae n.sp., description, (34) 456.
- Gnathostomum hispidum, physiological investigations, (31) 679.
- Gnathotrichus spp., notes, (32) 552.
- Gnats—  
  bloodsucking, relation to surra, (31) 777.  
  buffalo, relation to pellagra, (28) 853.  
  notes, (28) 156.
- Gnomonia—  
  caryae n.sp., description, (28) 449.  
  iliau—  
    n.sp., description, (28) 53.  
    notes, (29) 846.  
    on sugar cane, (40) 157.  
  leptostyla, description, (30) 151.  
  n.sp. on pecan, (39) 459, 553.  
  on cherry leaves, (37) 246.  
  on eggplant, (37) 752.  
  psidii, notes, (29) 243.  
  rubi, notes, (34) 55.  
  veneta, notes, (34) 56.  
  veneta, parasitic on sycamore, (30) 350, 751.
- Gnomoniella albomaculans n.sp., description, (27) 548.
- Gnorimoschema heliopa, studies, (40) 62, 854.
- Goat—  
  diseases, nature and treatment, (34) 383.  
  industry in Germany, (30) 170.  
  industry in Union of South Africa, (31) 268.  
  manure, analyses, (38) 23.  
  manure, fertilizing value, (34) 219.  
  serum, proteins and antitoxins in, (35) 574.  
  sucker, long-tailed, synopsis of races, (35) 252.  
  wireworm, life history, (29) 476.
- Goats—  
  ancestry, (34) 372.
- Agora—  
  care and management, (34) 380.  
  industry in Northwest, (27) 278.  
  notes, (28) 170; (31) 75.  
  value in land clearing, (28) 573.
- birth data, (27) 71.  
breeding and care, (33) 71; (38) 878.  
breeding and management in Germany, (34) 265.  
breeding experiments, (28) 370; (35) 869.  
breeding in Philippines, (30) 869.  
cacti for, (33) 70.  
care and management, (28) 173; (34) 270.  
clearing land with, (26) 51; (32) 261.  
determination of age, (32) 866.  
diagnosing time of parturition, (31) 876.  
digestion experiments, (29) 373.  
factors affecting pulse rate, (28) 768.  
feeding experiments, (26) 568, 574; (28) 775; (30) 473; (31) 71.  
Grenada, description, (33) 470.  
growth of, (30) 467.  
heredity in, (27) 874.  
immunization against—  
  anthrax, (31) 82.  
  gangrenous mammitis, (30) 83.  
  Malta fever, (26) 183.  
  tuberculosis, (26) 85.
- in British Museum, (30) 767.  
  Germany, (33) 296.  
  Guam, (32) 767.  
  Philippines, (26) 666.  
  Spain, (30) 470.  
inbreeding experiments, (28) 370.  
injury due to grazing, (29) 543.  
involution of uterus, (27) 786.

## Goats—Continued.

- malformations of genital organs, (28) 770.
- management and use, (27) 278.
- measurements of skeleton, (28) 667.
- metabolism cage for, (26) 268; (27) 71.
- milch—
  - care and management, (34) 380.
  - in California, (38) 177.
  - records, (34) 270.
  - summary, (38) 878.
- mountain—
  - host of spotted fever tick, (26) 64.
  - protection in Alaska, (36) 791.
  - relation to spotted fever, (31) 160.
- mucous membrane of, (26) 480.
- newborn, weights, (32) 862.
- of Catanduanes Islands, (27) 771.
- central and eastern Tennessee, (35) 170.
- Nedjed in Arabia, (26) 268.
- Tunis, description, (27) 571.
- on farms in United States, (31) 167.
- origin and development of breeds, (33) 171.
- origin and distribution, (31) 564.
- paunch movement in, (27) 68.
- pine needles for, (28) 768.
- pure-bred, in Montana, (36) 470.
- Pyrenean, notes, (28) 874.
- resistance to trypanosomiasis, (26) 84.
- resistance to tubercle bacilli, (30) 783.
- serum hemolysis in, (27) 476.
- skull and head measurements, (28) 767.
- slaughtering on the farm, (35) 317.
- sterility in, (26) 167.
- structure of third stomach, (28) 271.
- susceptibility to tuberculosis, (26) 178.
- treatise, (37) 769.
- worms infesting, (37) 779.
- Goats' rue, description and control, (37) 142.
- Goatskin trade of Red Sea region, (29) 69.
- Goaishia n. g. and n. sp., description, (38) 857.
- Godetia gracilis n. sp., description, (34) 336.
- Goes sp., notes, (38) 363.
- Goessmann, C. A., biographical sketch, (38) 810.
- Goiter—
  - exophthalmic, metabolism in, (35) 371.
  - in newborn animals, (39) 187.
  - in rats, notes, (31) 451.
  - in swine, (40) 185.
  - relation to iodine content of food, (35) 762.
- Goitrous condition in pigs, (39) 187.
- Gold chlorid, effect on starch ferments, (27) 109.
- Goldenrod—
  - canyon, notes, (29) 441.
  - gall insects affecting, (35) 55.
  - poisoning stock, (39) 184, 787.
  - western, poisoning of sheep by, (37) 482.
- Goldensal—
  - Botrytis blight, (39) 853.
  - culture, (32) 143, 436.
  - culture and preparation, (35) 647.
  - handbook, (27) 346.
  - resistance to root knot nematode, (31) 345.
- Goldfinches, destruction of grain aphids by, (29) 452.
- Goldfish, breeding, (28) 637.
- Golf courses—
  - surrigation and drainage of, (31) 889.
  - turf for, (37) 146.
- Gomolya, bacterial flora of, (26) 881.
- Gomphocarpus fruticosus, bast fibers of, (27) 237.
- Gomphus parvidens n. sp., description, (38) 56.
- Gonadectomy—
  - effect on growth of rats, (34) 263.
  - in relation to secondary sex characters of domestic birds, (38) 170.
- Goniatocerus—
  - anomocerus n. sp., description, (31) 554.
  - bifasciiventris n. sp., description, (37) 667.
  - eximius n. sp., description, (31) 355.
  - gibsoni n. sp., description, (33) 360.
  - gibsoni n. sp., notes, (33) 357.
  - mexicanus in Hawaii, (37) 300.
  - ornatus n. sp., description, (40) 760.
  - ovicenatus n. sp., notes, (34) 657.
  - triguttatus n. sp., description, (36) 259.
- Gonatorus—
  - contortulus parasitic on sugar beet leafhoppers, (33) 747.
  - spp., studies, (40) 265.
- Gonepteryx rhamnii in New Jersey, (36) 54.

## Gongylonema—

- ingluvicola, notes, (31) 287; (40) 587.
- scutatum in Argentina, (34) 478.
- scutatum, life history, (34) 783; (37) 577.
- Gonia crassicornis, notes, (29) 356.
- Goniocera enigmatica, studies, (39) 659.
- Goniocerus sp., notes, (31) 757.
- Goniocotes—
  - gigas, notes, (35) 878.
  - spp. notes, (35) 183.
- Goniodyia zenaidurae n. sp., description, (38) 761.
- Goniomyia unifasciata, parasitic on army worm, (34) 251.
- (Goniozus) cellularis—
  - notes, (29) 253.
  - parasitic on pink bollworm, (37) 667.
- Gonitis, n. sp., description, (29) 456.
- Gonocytes in fowls, investigations, (29) 874.
- Gonorrhoea, rôle of specific fats in complement fixation, (39) 80.
- Goodell, H. H., biographical sketch, (26) 897.
- "Goodness of fit" tables, application, (36) 166.
- Goose—
  - fat, digestibility, (36) 860.
  - fat, digestion and absorption, (34) 257.
  - grass, notes, (29) 144.
- Gooseberries—
  - acidity, (32) 110; (37) 714.
  - aphids affecting, (27) 758; (37) 358.
  - breeding and testing in Minnesota, (40) 148.
  - breeding experiments, (32) 338; (33) 637; (36) 443; (39) 346.
  - crossing experiments, (32) 535.
  - culture, (31) 142, 441; (32) 141; (35) 41.
  - culture and marketing, (38) 844.
  - culture experiments, (28) 436.
  - culture in western Washington, (38) 298.
  - currant mite affecting, (31) 854.
  - fertilizer experiments, (38) 540.
  - for home and commercial planting, (33) 537.
  - growth as affected by meteorology, (29) 510.
  - insects affecting, (38) 843.
  - new, description, (29) 838; (31) 337; (33) 238.
  - of Germany, (33) 838.
  - preservation by freezing, (39) 344.
  - resistance to pine blister rust, (38) 151.
  - spray schedules, (39) 39.
  - transplanting experiments, (35) 37.
  - treatise, (30) 42.
  - varieties, (28) 542; (32) 538; (37) 243.
  - varieties for New York, (26) 239.
  - varieties in Oklahoma, (27) 241.
  - varieties resistant to mildew, (32) 645; (34) 834.
  - variety tests, (32) 141; (40) 340, 342.
- Gooseberry—
  - anthracnose, investigations, (33) 347.
  - aphids, studies, (31) 157.
  - bacterial disease, notes, (36) 751.
  - black currant hybrid, description, (31) 236.
  - disease in Italy, (33) 447.
  - diseases, notes, (30) 647; (39) 652.
  - diseases, treatment, (28) 449.

 red, enzymes of, (38) 9.  
 seed position in planting, (40) 635.  
 selection experiments, (38) 635.  
 varieties, (26) 631; (30) 731; (37) 824, 825; (38) 635.  
 water requirements in India, (27) 429.  
 wilts, notes, (38) 351, 547.
- Grass—  
 blue, culture experiments, (30) 632.  
 blue, seeding on ranges, (30) 35.  
 botanical study, (26) 830.  
 water requirement, (32) 127.
- Gramineae—  
 composition as affected by companion crop,  
   (26) 617.  
 embryology, (30) 633.  
 first stages of development in, (28) 427.  
 mites affecting, (32) 853.  
 serological study, (31) 733.
- Granadilla as trap for fruit flies, (29) 657.
- Granadillas, insects affecting, (27) 453.
- Granaries—  
 for prairie farms, (35) 690.  
 fumigation, (30) 155.  
 in relation to rural credit in Spain, (40) 389, 890.
- Granary—  
 for the farm, portable, (39) 494.  
 modern, construction, (27) 590.
- weevil—  
 broad nosed, fumigation experiments, (32)  
   650.  
 control, (27) 258; (33) 431; (39) 862  
 in warehouses, (39) 463.  
 notes, (26) 453; (31) 57.  
 parasite of, (39) 468
- Grange—  
 educational value, (28) 792.  
 movement in Canada, (35) 497.  
 work of, (30) 496.
- Granger movement, treatise, (30) 693.
- Granges in New Jersey, (38) 594.
- Granite—  
 as sewage filtering material, (28) 789.  
 effect in water culture, (28) 817.  
 meal, fertilizing value, (28) 521.
- Granuloma, coecidial, in cattle, (40) 88.
- Granulomata, habronemic, in horses, (37) 279.
- Grape—  
 anthracnose—  
   in America, (36) 545.  
   notes, (37) 453; (38) 853; (39) 356, 457, 652.  
   studies, (40) 850.  
   treatment, (28) 649; (29) 849; (31) 346; (36)  
     251.  
 aphid, brown, life history, (33) 857.  
 arrepollao or achaparrado, studies, (30) 150.  
 arricciamiento, notes, (28) 650, 749.  
 berry moth—  
   notes, (26) 656; (27) 57, 755; (35) 646.  
   remedies, (35) 659; (37) 852.  
   studies, (28) 453; (35) 358.  
   treatise, (34) 553.  
 berry worm, remedies, (35) 659.  
 black rot—  
   control, (39) 352.  
   description, (34) 543.  
   false, notes, (39) 457.  
   notes, (33) 149.  
   notes and treatment, (29) 349.  
   studies, (29) 849; (40) 850.  
   treatment, (27) 143; (28) 537.  
 black spot, notes, (39) 652, 753.  
 black spot, studies, (40) 850.  
 bug, banded, notes, (33) 252; (34) 752.  
 cake, fertilizing value, (37) 426.  
 chlorosis—  
   notes, (26) 851; (28) 153; (34) 221, 749.  
   prevention, (26) 344.  
   relation to ferruginous soils, (26) 245.  
   relation to lime, (26) 344.  
   resistance to (39) 757.  
   studies, (26) 344; (33) 54.  
   treatment, (27) 651, 750, 850; (30) 542, 543;  
     (34) 544; (35) 753, 754; (38) 51, 151.  
 colaspis in corn fields, (39) 58.  
 court noté—  
   as affected by grafting, (39) 757.  
   notes, (29) 551; (30) 150, 451, 452, 651; (31)  
     151; (38) 552.  
   studies, (28) 54, 550.  
   treatment, (27) 250; (28) 850; (30) 246; (31)  
     53; (32) 445; (37) 152; (38) 754.  
 crown gall, investigations, (28) 650.  
 culture, relation to meteorology, (34) 234.  
 curculio, notes, (26) 753; (28) 454; (37) 58.  
 curculio, studies, (40) 257.  
 cuttings and rooted vines, disinfection, (32) 235  
 cuttings, callusing, (27) 145.  
 dead-arm disease, studies, (32) 52.  
 disease, nonparasitic, studies, (39) 552.  
 diseases and pests—  
   in Baden, (31) 539.  
   in Ontario, (35) 448.  
   treatment, (38) 843.  
 diseases—  
   description and control, (35) 351.  
   fungus, control, (40) 750, 845.  
   hot water treatment, (34) 50, 543.  
   in Barbados, (36) 541.  
   Brazil, (32) 238.  
   California, (37) 352.  
   France, (26) 244.  
   Greece, (36) 651.  
   Italy, (38) 351.  
   northern Italy, (37) 52.  
   São Paulo, (35) 550.  
   Turkestan, (36) 647.  
   Vardar, (36) 651.  
   western Australia, (33) 845.  
 notes, (26) 844; (27) 750, 848; (28) 748; (30)  
   147, 240, 353, 643, 849; (32) 344; (33) 444;  
   (37) 550; (39) 849.  
 papers on, (35) 646.  
 relation to fog, (37) 152.  
 studies, (28) 550; (30) 148; (32) 751; (34) 445.

## Grape—Continued.

- diseases—continued.  
treatment, (27) 546; (28) 748; (31) 843; (34) 748
- downy mildew—  
characteristic spots of, (31) 54.  
conditions determining outbreak of, (33) 853.  
development, (26) 550; (30) 247.  
notes, (28) 349, 749; (29) 350; (30) 353; (32) 149, 446; (35) 50, 352, 550; (36) 347; (39) 56, 151, 356, 357, 457; (40) 53, 750, 845.  
propagation by wind, (26) 344.  
review of investigations, (29) 249.  
studies, (26) 450, 851; (28) 54, 55, 244, 448; (27) 49, 449, 547; (28) 54, 55; (29) 153, 849, 850; (30) 452; (33) 248, 447, 549; (34) 352, 543, 544; (36) 543, 546, 650; (37) 151, 152, 251; (38) 51, 651, 754, 755; (40) 850.  
treatment, (26) 550, 750; (27) 49, 652; (28) 152, 245, 850; (29) 50, 551; (30) 50, 150, 151; (31) 151, 152, 544; (32) 145, 149; (33) 448; (34) 544, 748, 847; (35) 249, 352, 753, 754; (36) 452, 751; (37) 152, 246; (38) 51, 552, 754, 755; (40) 252, 750.
- “Droah,” notes, (28) 241.  
dry leaf disease, notes, (31) 844.
- flca beetle—  
in France, (30) 458.  
lesser, (40) 357.  
notes, (29) 761; (35) 646.
- foliage as feeding stuff, (30) 371.  
foliage, effect on development of fruit, (29) 439.  
frizzle disease, notes, (28) 550, 650.
- gray rot—  
fixation of nitrogen by, (26) 123; (27) 225.  
formation of conidia on (30) 149.  
notes, (27) 851; (29) 349; (31) 544, 749, 844; (33) 646; (34) 847; (35) 246.  
on figs, (37) 457.  
relation to apple rot, (33) 348.  
studies, (26) 749; (27) 50; (28) 847; (37) 47, 350.  
temperature relations, (36) 649.  
treatment, (27) 850; (29) 349, 849; (30) 651.
- gummosis, notes, (28) 650.
- gunworm, notes, (30) 252.
- hybrids—  
resistance to mildew and insects, (26) 138; (28) 840; (30) 741.  
sexual elements of, (30) 43.  
studies, (27) 540.
- industries, developing, (40) 839.
- industry in—  
Algeria, (30) 741.  
California, (35) 343; (38) 541.  
South Australia, (29) 837.
- juice—  
as nutritive remedial agent, (31) 358.  
changes in, (34) 43.  
clarification, (32) 208.  
Concord, (39) 208.  
examination, (26) 660.  
manufacture, (30) 316.  
pasteurization and biorization, (37) 805.  
preservation, (38) 617.  
preservation by pressure, (32) 416.  
studies, (29) 711.  
unfermented, examination, (33) 362.  
unfermented, manufacture, (32) 208, 809.  
use in grafting hickory and walnuts, (33) 643.
- leaf cast, treatment, (30) 50; (32) 345.  
leaf folder, studies, (36) 155.  
leaf mite, notes, (32) 651.  
leaf roll, treatment, (37) 246.  
leaf roller, school chart of, (31) 395.  
leaf scald, notes, (30) 448.  
leaf spot, treatment, (27) 250.
- leafhopper—  
notes, (26) 452; (29) 158; (33) 356; (34) 158.  
remedies, (27) 758; (33) 59.  
studies, (27) 157; (28) 855; (30) 547; (33) 556.
- leaves—  
detached, respiration in, (28) 528.  
infection by *Plasmopara viticola*, (26) 550.  
relation to grape clusters, (30) 132.  
spray injury, (34) 353.  
spraying underside of, (30) 651.
- little leaf, notes, (38) 754.

## Grape—Continued.

- little leaf, studies, (36) 849.  
marc, analyses, (32) 166.  
marc, feeding value, (32) 567.
- mealybug—  
notes, (35) 357.  
remedies, (35) 54.  
studies, (40) 650.
- mildew—  
and leafhoppers, combined spray for, (33) 642.  
development, (27) 851.  
hybrids resistant to, (33) 854.  
in southwest France, (27) 449.  
notes, (31) 841; (34) 749; (36) 850; (38) 548; (40) 850.  
relation to smoke, (28) 152.  
resistant varieties, (39) 151.  
studies, (33) 55.  
treatment, (27) 153, 851; (34) 841, 842; (38) 47; (40) 843.
- mosaic disease, notes, (28) 650.  
must, fermentation under paraffin oil, (35) 617.  
must, proteolytic enzyme in, (27) 803.
- Oidium—  
notes, (33) 549; (39) 356, 457; (40) 850.  
or powdery mildew, notes, (34) 544.  
relation to weather, (34) 543.  
treatment, (28) 152; (38) 552, 651, 757; (40) 252, 750.
- Peronospora—  
disease, studies, (31) 346.  
relation to weather, (27) 547.  
treatment, (29) 449; (30) 448.
- Pestalozzia rot, notes, (39) 52.
- phylloxera—*see* *Athys Phylloxera*.  
control in Italy, (38) 58.  
development, (35) 463; (36) 357.  
emergence of first young, (33) 858.  
in California, (35) 646.  
notes, (27) 53; (29) 356; (30) 251, 358, 845; (40) 262.  
production of inverted leaf galls by, (29) 854.  
remedies, (34) 249; (35) 358, 658.  
resistance, (30) 145.  
resistance, breeding for, (40) 538.  
resistance of different vines to, (31) 550.  
review of investigations, (35) 658.  
spontaneous distribution, (27) 454.  
studies, (32) 847; (39) 657.  
virginoporus forms, (33) 748.
- physiology, notes, (29) 439.
- plume moth, notes, (33) 58.
- pollen as affected by spraying mixtures, (29) 839.
- pourridié, notes, (26) 750.
- powdery mildew—  
hibernation, (34) 847.  
notes, (31) 746; (36) 347.  
treatment, (28) 851; (29) 850; (36) 350, 546; (37) 152, 843; (38) 541.
- red scald, notes, (37) 555.
- red scald, studies, (28) 55; (30) 452.
- red spot, treatment, (26) 144.
- roncet—  
notes, (28) 349, 650, 749; (32) 844.  
studies, (26) 550, 851; (27) 449; (28) 245, 550, 851; (29) 349, 551; (30) 353; (31) 245, 645; (38) 151.
- root borer, notes, (37) 58.  
root borer, studies, (40) 257.  
root rot, studies, (32) 149.  
root weevil, studies, (39) 363.
- root worm—  
new host plant of, (29) 657.  
notes, (34) 65.  
remedies, (26) 864.
- rot, studies, (29) 450.
- rust, notes, (38) 757.  
rusts in India, (27) 353.
- sap as affected by Bordeaux mixture, (30) 647.
- scale, studies, (27) 555.
- scions for American stocks, (27) 644.
- seed oil, analyses and use, (30) 617.  
seed, wild, oil of, (34) 501.  
seedlings, use as scions, (30) 144.
- seeds, removal from husks, (36) 801.
- sirup, investigations, (40) 414.
- skins, isolation of fat from, (29) 459.

Grape—Continued.

- stocks—
  - adaptation to soils, (28) 742.
  - American, use in northern France, (29) 340.
  - behavior in heavy calcareous soils, (30) 237.
  - diseases of, (31) 544.
  - drought resistant, (36) 241.
  - effect on quality and quantity of harvest, (30) 43; (31) 238, 534.
  - for dry and limed soils, (27) 145, 441.
  - modification through breeding, (32) 220.
  - root systems of, (37) 43.
- sugar—
  - effect on nitrification, (26) 721.
  - rectal and intravenous utilization, (35) 368, 369.
  - toxicity toward dogs, (28) 462.
  - tiger moth, notes, (32) 753.
  - white rot, notes, (30) 247, 651.
  - white rot, treatment, (30) 247, 543.
- Grapefruit—
  - analyses, (29) 362; (39) 49, 202, 243.
  - analyses and use, (30) 363.
  - and oranges, hybrid between, (33) 441.
  - bright v. russet fruit of, (34) 535.
  - bud variation, (39) 845.
  - changes in during ripening, (29) 641.
  - chlorosis and yellowing, (39) 458.
  - Cladosporium sp., affecting, (31) 645.
  - composition and culture, (34) 835; (35) 745.
  - decay in transit, (32) 745.
  - diseases, notes, (39) 850.
  - fertilizer experiments, (33) 48; (35) 839.
  - food plant of purple scale, (26) 756.
  - freeze injury, (39) 143.
  - host plant of fruit fly, (26) 758.
  - juice, preparation, (37) 313.
  - maturity standards, (39) 545.
  - Platynota rostrana affecting, (26) 150.
  - production in California, (40) 342.
  - scab, description and treatment, (31) 152.
  - scab in Porto Rico, (38) 454.
  - seedlings, fertilizer experiments, (31) 742.
  - Siamese seedless, description, (31) 48, 837.
  - skins, analyses, (38) 626.
  - spotting, studies, (39) 458.
  - storage experiments, (31) 338.
  - studies, (39) 49, 202, 243, 545.
  - sugar and acid contents, (29) 641.
  - top-working, (38) 541.
  - total solids and acidity of, (34) 661.
  - variations in, (27) 441.
  - varieties for Texas, (38) 40.
  - yellowing caused by limestone, (39) 458.
- Grapes—*see also* Viticulture and Vineyards.
  - absorption of foul gases by, (29) 49.
  - acreage and values in California, (40) 538.
  - adaptation and variety tests, (29) 41.
  - American—
    - culture in Messina, (28) 237.
    - in Italian vineyards, (29) 238.
    - root stocks for, (28) 640.
    - sugar and acid content, (28) 840; (35) 647.
  - analyses, (27) 10.
  - aphids affecting, (37) 358.
  - applying fertilizing solutions to aerial portions, (30) 129.
  - arsenic content, (26) 841.
  - as affected by—
    - asphyxiating gas, (37) 153, 253.
    - geotropic angle of roots, (26) 137.
    - grafting, (28) 236, 437.
    - spraying in flowering season, (31) 534.
    - time of pruning, (31) 534.
  - autolysis, (36) 802.
  - autumn coloration of, (31) 34.
  - bagging experiments, (35) 646.
  - blooming period, (33) 639.
  - Bordeaux injury to, (34) 748.
  - breeding, (29) 641; (35) 646; (37) 449.
  - breeding—
    - and testing in Minnesota, (40) 148.
    - experiments, (32) 338, 835; (33) 641; (35) 239, 448; (36) 741; (39) 346.
    - for phylloxera resistance, (40) 538.
  - calcium carbide spraying, (40) 750.
  - Californian, fermentation organisms, (40) 110.
  - cambial activity, (37) 127.
  - catalytic substances for, (33) 841.
  - changes during ripening, (39) 141.

Grapes—Continued.

- Chasselas, stocks for, (31) 534.
- chemistry of, (26) 512.
- coccid enemies of, (36) 755.
- cold storage, (28) 437.
- coloring matter of, (34) 709.
- composite hybrid of, (28) 542.
- composition, (26) 441; (27) 10.
- conservation, (28) 437.
- conservation in gases, (33) 539.
- cooking qualities of different varieties, (32) 560.
- Corinth, girdling, (39) 242.
- cost of production, (29) 439.
- critical months, (39) 811.
- crossbreeding experiments, (36) 742.
- crown gall affecting, (28) 447.
- culture, (26) 741, 742; (27) 40; (33) 142; (35) 343; (40) 246.
- culture—
  - and marketing, (39) 49.
  - at Paarl viticultural station, (37) 144.
  - experiments, (26) 137; (28) 142, 236, 436; (32) 635; (34) 221; (35) 342, 538; (36) 139.
  - in America, (28) 639.
    - California, (35) 646.
    - cordon, (40) 538.
    - France, (34) 234.
    - Italy, (34) 235.
    - Japan, (33) 539.
    - Mexico, (26) 46.
    - Nasik District, India, (35) 343.

 varieties, (28) 237, 533; (30) 41; (35) 448; (37) 832; (38) 41, 443, 842.  
 varieties—  
   in Oklahoma, (27) 241.  
   in Portugal, (36) 537.  
   resistant to chlorosis, (27) 49.  
   resistant to mildew and frost, (27) 49.  
   resistant to Oidium tuckeri, (28) 245.  
 variety tests, (32) 141; (40) 444.  
 variety tests in Vinifera regions, (33) 538.  
 venation angles and leaf dimensions in, (28) 541.

## Grapes—Continued.

- Vinifera—  
 culture experiments, (37) 544.  
 grafting, (30) 841.  
 protection from frost, (32) 635.  
 winter treatment, (34) 737; (35) 41.  
 waste, vinegar from, (28) 395.  
 white, chromogenic substances of, (26) 407.  
 wine and by-products yielded by, (32) 208.  
 wine, grafting, (31) 47.  
 wine, improvement, (31) 47.  
 winter injury, (37) 655.  
 winter protection, (35) 239.  
 winterkilling, (39) 356.  
 xylophagous enemies of, (31) 849.  
 Grapevine—  
 acariasis, notes, (26) 864.  
 aphid, alternate hosts, (39) 464.  
 aphid, life history, (38) 260.  
 apoplexy, notes, (30) 651.  
 cochylis—  
   control, (40) 456.  
   new parasite of, (27) 262.  
   remedies, (26) 60.  
 flea-beetle, steel-blue, notes, (35) 656.  
 gall mite, remedies, (26) 561.  
 leaf spots, notes, (36) 546.  
 mildew, studies, (30) 845.  
 moths—  
   biology and remedies, (34) 654.  
   control, (39) 764.  
   notes, (35) 54.  
 pyralid, bacterial disease of, (38) 654.  
 pyralid, notes, (27) 57.  
 pyralid, parasites of, (35) 659.  
 sap, composition, (34) 428.  
 sawfly, notes, (37) 255.  
 scrawler or writer, notes, (27) 538.  
 sphinx moth, white-lined, (40) 648.  
 sphinx, notes, (26) 250.  
 tomato gall, notes, (37) 255.  
 trimmings, ground, analyses and feeding value, (26) 468.  
 Grapevines—  
 alterations in wood following pruning, (28) 733.  
 analyses, (34) 767.  
 as affected by fungicides, (27) 850.  
 buried, changes in, (38) 822.  
 chlorosis resistance in, (27) 850.  
 coccid enemies of, (26) 655.  
 composition and digestibility, (31) 72.  
 deterioration in Sicily, (29) 349.  
 drought resistance in, (26) 239.  
 grafted, variations in, (36) 641.  
 node canker of, (32) 149.  
 rejuvenating, (26) 138.  
 renovation by layering, (31) 837.  
 resistance to hot water, (34) 843.  
 training, Oppenheim method, (27) 539.  
 treatment with hot water and sprays, (35) 352, 353.  
 wild, ash analyses, (27) 801.  
 Graphiola—  
 coccoina, notes, (36) 347.  
 phoenicis, notes, (29) 345; (36) 348, 541.  
 spp., notes, (39) 453.  
 Graphiphora alia, notes, (36) 549.  
 Graphite—  
 effect on linseed oil, (28) 714.  
 in soil, effect on plants, (29) 19.  
 Graphium spp., studies, (27) 354.  
 Grapholita—*see also* Laspeyresia.  
 funebrana, bionomics and remedies, (33) 155.  
 leplastriana, notes, (31) 850.  
 schistaceana, notes, (34) 656, 758; (38) 465.  
 spp., injurious to fir and spruce, (34) 855.  
 Graphomyia maculata, studies, (37) 764.  
 Grass—  
 anthracnose, identity, (31) 746.  
 artificial curing, (36) 439.  
 as sole ration for cows, (33) 174.  
 bacillus, metabolism, (33) 771.  
 billbug, little, biology, (29) 56.  
 billbug, notes, (29) 52.  
 blossoming conditions, (36) 332.  
 culms, development, (32) 432.  
 demonstrations in the South, (28) 829.  
 diseases in Württemberg, (29) 845.  
 diseases, treatment, (34) 541.

## Grass—Continued.

- east-coast, analyses, (26) 768, 873.  
 effect on—  
   fruit trees, (26) 639; (33) 339.  
   milk and butter, (34) 570.  
   nitrate content of soils, (29) 819.  
   roots of young forest trees, (33) 645.  
 embryo, morphology, (37) 127.  
 eradication, (37) 532.  
 for irrigated pastures, (38) 130, 337.  
 for pasture and hay in Texas, (37) 827.  
 for shifting sands, (37) 333.  
 fresh—  
   and hay, comparative feeding value, (35) 372.  
   composition and digestibility, (34) 371.  
   feeding value, (26) 574.  
 grubs, notes, (30) 554.  
 hybridization experiments, (34) 228.  
 identification, (36) 333, 527, 541.  
 improvement, (34) 34; (36) 297.  
 meadow, composition and digestibility, (36) 469.  
 mixtures—  
   for canal banks, (28) 829.  
   meadows, (29) 736.  
   pastures, (31) 37.  
   prairie pastures, (36) 437.  
   liming experiments, (40) 322.  
   notes, (30) 829; (31) 830.  
   tests, (26) 231, 630, 830; (28) 532; (29) 32;  
   (30) 229; (31) 430; (32) 506; (33) 430; (35)  
   31; (36) 132, 333; (37) 230, 735; (38) 133, 666;  
   (39) 135, 333, 336; (40) 72, 732, 733.  
 moth, studies, (33) 560.  
 moth, yellow-barred, notes, (39) 557.  
 moths in Quebec, (38) 459.  
 mulch for orchards, (37) 833.  
 native pasture, of United States, (33) 227.  
 planting in small parks, (33) 442.  
 plots, harvesting, (36) 197.  
 plots, harvesting device for, (38) 228.  
 root aphids, notes, (40) 649.  
 rotation experiments, (36) 528.  
 rust, notes, (26) 143.  
 rusts—  
   Relation to cereal rusts, (33) 345.  
   relation to timothy rusts, (31) 344.  
   studies, (34) 744.  
   taxonomy, (33) 130.  
 scale, western cottony, notes, (29) 252.  
 seed—  
   cleaning, (40) 40.  
   depth of planting, (31) 830.  
   germination tests, (36) 338, 437, 638.  
   imported, germination tests, (35) 140.  
   in Maryland markets, (32) 740.  
   inspection in Maryland, (36) 442.  
   production in Europe, (26) 436.  
   purity tests, (36) 638.  
   valuation, (36) 638.  
   vitality, (27) 740.  
 seeding on cut-over land, (37) 228.  
 seeding on ranges, (35) 439.  
 seedlings, comparative anatomy, (34) 134.  
 seeds—  
   awned, abnormal germination, (30) 633.  
   germination and purity tests, (30) 40.  
   germination tests, (29) 740; (31) 227; (32) 331.  
   production, (31) 524.  
   ruse spores in, (30) 241.  
   testing, (31) 43.  
   valuation, (30) 40.  
 sickness in lambs, (34) 383.  
 smut, new, description, (26) 846.  
 smut, treatment, (35) 149.  
 tree as feeding stuff, (33) 72.  
 trees, of South Australia, (37) 548.  
 webworm, *see* *Crambus luteolellus*.  
 with creeping roots, (36) 438.  
 young, feeding value, (36) 439.  
 Grasserie, destruction, (27) 559.  
 Grasses—*see also* Meadows, Pastures, and specific kinds.  
 Alaskan, for silage and hay, (39) 125.  
 Alpine pasture, breeding experiments, (30) 633.  
 analyses, (30) 565, 868.  
 as affected by—  
   associated legumes, (37) 438.  
   frequent clipping, (33) 430.  
   soil acidity, (37) 446.

## Grasses—Continued.

- breeding, (30) 525; (31) 131, 227.  
 breeding experiments, (26) 830; (29) 138, 139; (36)  
 332; (40) 735.  
 breeding technique and methods, (35) 232.  
 British, treatise, (40) 825.  
 changes in during curing, (32) 110.  
 classification of varieties, (27) 31.  
 composition—  
   and digestibility, (27) 669; (31) 863.  
   as affected by drought, (28) 533.  
   as affected by fertilizers, (23) 665.  
   at different stages, (32) 331.  
 crushing and drying, (27) 277.  
 culture, (32) 132, 430; (33) 526, 527; (39) 834.  
 culture—  
   experiments, (26) 237, 830; (28) 532; (29) 224,  
   631; (30) 133, 632, 828; (32) 132; (33) 33;

   (38) 132, 634; (39) 124; (40) 735.  
   for winter forage, (38) 735.  
   in Brazil, (29) 428.  
   Dutch East Indies, (30) 697.  
   Hawaii, (32) 729.  
   Montana, (33) 526.  
   Nebraska, (40) 521.  
   New York, (39) 532.  
   North Wales, (34) 323.  
   Philippines, (26) 361; (30) 230.  
   sand hills of Nebraska, (35) 827.  
   Siegerland, (29) 589.  
   the Ozarks, (29) 427.  
   on moor soils, (38) 132; (39) 438.  
   under dry farming, (36) 528.  
 cyanogen in, (33) 665.  
 development as affected by water, (31) 524.  
 "digested," digestibility, (31) 667.  
 dissemination of fungi by, (28) 442.  
 drying, (27) 669.  
 effect on fruit trees, (29) 339.  
 embryology, (30) 633.  
 exhibits, (29) 93; (31) 495.  
 fertilizer experiments, (26) 232, 631, 734, 817;  
 (27) 530, 724, 833; (28) 520; (29) 735; (30) 133,  
 134, 721, 820; (31) 31, 133, 173, 821; (33) 227,  
 228, 326, 526; (34) 25, 128, 423; (35) 517; (36)  
 121, 438; (38) 218, 829; (39) 22; (40) 134, 735.  
 fodder—  
   of German East Africa, (38) 66.  
   India, (39) 231, 234.  
   Indian forests, (29) 170.  
   Java, (35) 440; (38) 528.  
 for hay, tests, (39) 333.  
 irrigated pastures, (40) 374.  
 lawns, (29) 148.  
 reclaimed swamp lands, (40) 231.  
 germination, (40) 222.  
 growth—  
   as affected by carbon dioxide, (28) 728.  
   on volcanic ash, (29) 726; (32) 36; (39) 124.  
   under drought conditions, (37) 437.  
   with legumes, (33) 527.  
 indigenous to Australia, (26) 830.  
 insects affecting, (27) 552; (34) 651; (38) 557;  
 (39) 556; (40) 163.  
 irrigation experiments, (29) 426; (31) 732; (32)  
 224.  
 lawn, as affected by soil acidity, (40) 125.  
 lawn, new Sclerotium disease, (39) 753.  
 liming experiments, (34) 132.  
 meadow, first year development, (32) 330.  
 metaphanic variation, (39) 531.  
 native, for forage, (31) 824.  
 new, for the South, (29) 428.  
 new or noteworthy, in U. S. National Her-  
 barium, (34) 226.  
 North African desert, roots of, (26) 535.  
 nutritive value, (29) 170.  
 of Ahmadabad and Surat, (32) 37.  
 Australia, (40) 524.  
 German East Africa, composition, (36) 334.  
 German Southwest Africa, (27) 871; (32)  
 167.  
 Guam, (31) 467.  
 Hawaii, (32) 731; (39) 632.  
 Illinois, (39) 231.  
 India, analyses, (28) 768.  
 Java, (31) 431.  
 Nebraska, (33) 131.  
 New Mexico, (27) 431.

## Grasses—Continued.

- of New South Wales, (33) 527.
  - New South Wales, hydrocyanic acid in, (31) 520.
  - Ohio, (38) 528.
  - Philippines, (33) 433.
  - Queensland, analyses, (28) 463.
  - Russia, notes, (28) 364.

Guanosin, metabolism of, (32) 256.  
Guar—  
culture, (32) 226.  
culture experiments, (27) 136; (28) 735; (31) 829.  
culture in New South Wales, (26) 835.  
meal, analyses, (38) 572.  
notes, (26) 362.  
Guava—  
analyses, (40) 763.  
diseases, notes, (29) 243.  
pink disease, notes, (27) 445.  
Guavas—  
analyses, (32) 761.  
analyses and use, (30) 363.  
budding, (32) 143.  
culture in Gujarat, (36) 642.  
host plant of fruit fly, (26) 758.  
insects affecting, (26) 553.  
of Hawaii, (37) 835.  
recipes, (28) 660.  
strawberry, cold storage of, (32) 439.  
Guayule—  
culture experiments, (29) 443.  
rubber and resin content as affected by rainfall, (30) 744.  
Guignardia—  
aesculi—  
n.comb., description, (35) 851.  
studies, (35) 154.  
treatment, (39) 548.  
baccaea, notes, (39) 457.  
bambusae n.sp., studies, (27) 154.  
bidwellii, chlamydospores of, (28) 152.  
bidwellii, studies, (40) 851.  
vaccinii, treatment, (39) 749.  
Guinea-chicken hybrid serum, refractive index, (35) 279.  
Guinea corn—  
culture experiments, (29) 830; (32) 227; (35) 135.  
culture in Jamaica, (32) 229.  
diseases in West Indies, (37) 452.  
fertilizer experiments, (30) 525.  
hydrocyanic acid in, (33) 506.  
varieties, (30) 525; (32) 435.  
Guinea fowl-peacock hybrids, notes, (33) 575.  
Guinea fowls—  
breeding, feeding, and marketing, (38) 174.  
care and management, (39) 176.  
horny tissue on head of, (28) 668.  
interstitial cells, (39) 177.  
management, (40) 177.  
serum proteins of, (32) 861.  
Guinea grass—  
analyses, (38) 368.  
composition and culture, (31) 832.  
culture experiments, (28) 136, 633, 735; (30) 434, 632; (31) 824; (37) 730.  
culture in Guam, (32) 731.  
culture in Philippines, (26) 361; (40) 531.  
effect on fat content of milk, (30) 678.  
fertilizer experiments, (27) 336.  
notes, (26) 362.  
yields, (29) 224.  
Guinea pig serum, anaphylatoxin produced in, (37) 579.  
Guinea pigs—  
as affected by oat diet, (36) 364.  
as affected by tuberculin, (29) 480.  
bleeding, (40) 479.  
breeding, (30) 874.  
breeding experiments, (27) 370.  
care and management, (28) 173; (37) 775.  
castration, (29) 168.  
color, sex, and fertility in, (30) 472.  
composition in milk, (40) 775.  
epilepsy in, (35) 564.  
genetic studies, (34) 464.  
growth in embryo and after birth, (35) 564.  
growth of, (30) 467.

- Guinea pigs—Continued.  
 healthy and tuberculous, temperature, (28) 781.  
 hybridization experiments, (28) 667; (39) 877.  
 identification, (35) 880.  
 immunization against—  
   anthrax, (28) 376; (29) 378.  
   glanders, (27) 782; (30) 578.  
   tuberculosis, (26) 85; (29) 480; (32) 275; (34) 82.  
 immunization experiments, (35) 485.  
 infectious disease, (39) 686.  
 inheritance of—  
   acquired characters in, (28) 877.  
   color in, (26) 878; (27) 573; (38) 776.  
   tricolor in, (30) 265, 266; (35) 770.  
   tuberculo-protein hypersensitiveness in, (26) 182.  
 intra-uterine growth cycles of, (29) 168.  
 morphology of blood, (28) 777.  
 nontubercular mortality in, (26) 182.  
 normal and tubercular, chemical composition, (35) 883.  
 normal metabolism, (38) 572.  
 oestrous cycle, (40) 467.  
 of Laysan Island, (27) 549.  
 physiology of reproduction in, (33) 369.  
 pigmentation, (40) 177.  
 pneumonia in, (30) 579.  
 raising, (29) 472.  
 resistance to tubercle bacilli, (30) 783.  
 rotation of blood plasma and serum in, (29) 881.  
 sex determination and control in, (33) 168.  
 structure simulating Negri bodies in brain of, (28) 584.  
 susceptibility to pneumonic plague, (28) 180.  
 transplanting of ovaries in, (28) 173; (30) 472.  
 treatise, (30) 874.  
 tuberculous, cell content of blood, (28) 283.  
 tuberculous, intra-vitam staining, (30) 81.
- Guizotia—  
 abyssinica, culture for seed, (37) 230.  
 cake, analyses and feeding value, (29) 467.  
 oleifera cake, feeding value, (26) 267.
- Gulaman dagat, use as food, (40) 557.
- Gull, Franklin's notes, (27) 355.
- Gullet worm of sheep and cattle, life history, (34) 783.
- Gulls, reclamation, (33) 392.
- Gulls, North American, distribution and migration, (34) 158.
- Gulonic lactone, preparation, (40) 110.
- Gum—  
 adhesive, preparation from corncobs, (40) 17.  
 arabic, determination, (35) 417.  
 arabic, use in food products, (34) 167.  
 asafetida, lead number of, (32) 300.  
 collecting and distilling, (33) 543.  
 desert, culture experiments, (34) 232.  
 destructive distillation, (27) 745.  
 determination in—  
   gum sirups, (36) 507.  
   linseed cake, (26) 714.  
   sirups, (28) 205, 206.  
   sugar residues, (36) 415.  
 humification, (38) 26.  
 moth in Australia, (40) 857.  
 red, distillation value, (32) 48.  
 resin, extraction from *Boswellia serrata*, (29) 43.  
 resins, methods of analysis, (27) 205.  
 resins of *Araucaria araucana*, (40) 615.  
 tragacanth—  
   as binder for ice cream, (36) 78.  
   bassorin, conversion into bassoric acid, (40) 202.  
   detection, (27) 14.  
   use in food products, (34) 167.  
   weed, water requirement, (32) 127.
- Gumhár, notes, (29) 443.
- Gummosis—  
 notes, (27) 249.  
 soil reaction studies, (39) 56.  
 studies, (30) 747, 749; (35) 331.
- Gum-oleo-resin from *Boswellia serrata*, (40) 248.
- Gums—  
 chemistry of, (31) 409.  
 of Chile, (38) 336.  
 treatise, (30) 310.  
 vegetable, detection in food products, (40) 410.
- Gumwoods, North American, characteristics, (26) 339.
- Gunfire, effect on rainfall, (38) 115, 511.
- Gunpowder, fertilizing value, (29) 625.
- Gur manufacture in United Provinces, (40) 208.
- Gutta-percha—  
 composition and quality, (26) 745.  
 industry in Kaiser Wilhelm Land, (26) 745.
- Guvaicin, chemical formula for, (31) 309.
- Gyalocephalus—  
 capillatus, notes, (39) 686, 892.  
 equi n.sp., description, (39) 892.
- Gymnastis, gaseous metabolism of, (34) 261.
- Gymnocasus spp., notes, (28) 562.
- Gymnocladus canadensis, warty roots of, (31) 546.
- Gymnococina—  
 interstitialis, notes, (29) 50; (37) 457; (38) 454.  
 peckiana, notes, (40) 53.  
 peckiana, selected cycles, (39) 528.
- Gymnogaster buphthalmia, notes, (29) 858.
- Gymnonychus californicus, studies, (36) 260.
- Gymnoparea (*Actia*) pilipennis, notes, (35) 659.
- Gymnosperms, serodiagnostic classification, (38) 731.
- Gymnosporangia on *Myrica* and *Comptonia*, (37) 551.
- Gymnosporangium—  
 biology and taxonomy, (27) 424.
- blasdaleanum—  
 notes, (31) 150, 345; (32) 645.  
 studies, (32) 51; (40) 345.
- chinensis n.sp., description, (30) 453.
- clavariiforme—  
 life history, (30) 745.  
 notes, (37) 550.
- effect on—  
 apple leaves, (26) 649; (30) 245; (32) 751.  
 cedars, (28) 151.
- galls, studies, (35) 46.
- haraeanum, notes, (31), 641.
- host relationships, (35) 244.
- japonicum—  
 notes, (29) 547.  
 teleutospore stage, (27) 648.
- juniper-virginianae—  
 effect on apple leaves, (29) 648.  
 lypolytic action in teliospores of, (35) 225.  
 notes, (28) 243.  
 on apple, (39) 54.  
 studies, (34) 54; (35) 49, 848.
- koreanse, studies, (34) 840.
- macropus—  
 infection of apple leaves by, (29) 647.  
 notes, (40) 53.  
 studies, (34) 157.
- monograph, (26) 243.
- myricatum n. comb, description, (32) 341.
- new Asiatic, in Oregon, (34) 352.
- nootkatensis n.sp., description, (35) 844.
- review of investigations, (35) 650.
- sabinae, notes, (28) 429; (29) 155; (35) 454; (37) 550.
- secondary sporidia of, (30) 653.
- speciosum, aecidial host for, (26) 645.
- spp., galls of, (38) 448.
- spp., in Pennsylvania, (35) 351.
- spp., inoculation experiments, (38) 253.
- spp., notes, (30) 544.
- spp., on apples, (32) 644; (34) 444.
- spp., studies, (38) 151.
- tubulatum on Junipers, (34) 546.
- Gynaikothrips uzeli affecting tobacco, (30) 658.
- Gypona—  
 flavilineata, notes, (33) 58.  
 spp., notes, (27) 859.
- Gypsum—  
 analyses, (27) 327; (32) 424; (38) 521; (39) 121.  
 application to heavy soils, (33) 325.  
 as corrector of soil acidity, (40) 815.  
 decomposition in soils, (34) 217.  
 deposits in Oklahoma, (30) 724.  
 deposits in southwestern Virginia, (30) 724.  
 determination in soils, (32) 806.  
 diffusion in soils, (29) 128.  
 effect on—  
   alfalfa, (37) 33.  
   ammonia-fixing power of soils, (27) 323.  
   ammonification, (28) 724.  
   availability of soil potash, (36) 519.  
   concrete, (29) 891.  
   fermentation of manure, (38) 19.  
   germination of pine seed, (28) 843.

## Gypsum—Continued.

effect on—continued.

- germination of seeds, (29) 328.
- nitrification, (26) 527; (28) 217.
- nitrogen content of soy beans, (28) 721.
- potash solubility, (39) 521.
- protein content of soy beans, (34) 141.
- soil acidity, (37) 23.
- soil microorganisms, (34) 625.
- soil potash, (36) 625.
- soils, (26) 216; (39) 425, 821.
- solubility of phosphates, (28) 818.
- sulfofying power of soils, (37) 119.
- fertilizing value, (26) 725; (27) 321; (28) 137, 737; (33) 841; (34) 133, 725; (36) 23, 425; (37) 626, 825; (39) 222; (40) 440.
- for alfalfa, (40) 730.
- for black alkali soils, (39) 323; (40) 51.
- industry in 1913, (32) 127.
- industry in 1916, (39) 120.
- industry in United States, (34) 221.
- nitrogen absorption capacity, (28) 325.
- on alkali soil, (39) 215.
- production and use in 1913, (33) 26.
- production and use in United States, (31) 125; (36) 124.
- review of investigations, (27) 128.
- use against beet rots, (30) 244.
- use on California soils, (30) 627.
- use on reclaimed waste land, (28) 736.
- uses, (32) 127.

Gypsy moth, *see* Gipsy moth.

## Gyrococcus flaccidifex—

- n. g. and n. sp., description, (27) 661.
- notes, (28) 254.

## Habernaria obtusata, pollination by mosquitoes, (30) 658.

## Habichuela—

- cimarrona, culture, (34) 736.
- parada, culture, (34) 736.

## Habrobracon—

## brevicornis—

- parasitic on bee moth, (26) 657.
- studies, (39) 566.

## hebetor—

- notes, (27) 564; (29) 658.
- parasitic on fig moth, (26) 248.
- johannseni, notes, (36) 155, 655.
- n. sp. on cotton bollworm, (33) 159.
- n. spp., descriptions, (32) 852.
- simonovi n. sp., description, (33) 658.

## Habrocytus—

- fasciatus, notes, (29) 562.
- medicaginis n. sp., description, (35) 262.
- medicaginis, studies, (36) 259.
- North American species, (37) 162.
- obscuripes, notes, (36) 259.
- percei n. sp., description, (26) 352.
- sp., notes, (26) 151.
- thyridopterigis, notes, (27) 558.

## Habrolepoidea depressa n. sp., description, (36) 557.

## Habronema—

- larvae infestation, (40) 586.
- microstoma, notes, (29) 83.
- muscae, life history, (26) 255; (29) 82.

## Habronemiasis, cutaneous, in horses, (37) 279.

## Hackberry—

- as a hedge plant, (37) 241.
- insects affecting, (37) 461.

## Hadena—

- basilinea, notes, (36) 552.
- didyma (oculea), notes, (27) 552.
- fractilinea, notes, (33) 252.
- spp., notes, (27) 659; (39) 765.
- turbulenta, notes, (33) 58.

## Hadronema, species, (39) 657.

## Hadronotus javensis n. sp., description, (32) 348.

## Hadrotettix trifasciatus, remedies, (36) 55.

## Hadrotrichum—

- piri n. sp., notes, (27) 750.
- populi, notes, (37) 550.

## Haemaphysalis—

- chordellis, notes, (33) 351.
- monograph, (35) 263.
- n. spp., descriptions, (27) 361.
- punctata, notes, (28) 82.
- punctata, occurrence in Apenrade, (26) 353.
- silacea n. sp., description, (26) 460.
- spp., notes, (27) 865; (29) 58.

## Haematobia—

- irritans, *see* Horn fly.
- sanguisugens, life history, (35) 760.
- serrata, *see* Horn fly.

## Haematococcus pluvialis, carotinoid content, (31) 803.

## Haematopinus—

- asini, biology and remedies, (38) 184.
- bituberculatus, relation to surra in carabaos, (28) 756.
- microcephalus n. sp., description, (26) 655.
- spp. on cattle, (40) 651.
- suis adventicus n. var., description, (26) 655.
- suis, studies, (40) 652.

## Haematopota, parasitic flagellates of, (26) 84.

## Haematosiphon inodora, notes, (29) 454.

## Haemithacea erythrostroma, parasitic on grapevine sphinx, (26) 250.

## Haemogamasus—

- oudemansi n. sp., description, (32) 353.
- sanguineus n. sp., description, (34) 66.

## Haemogregarina spp., notes, (26) 883.

## Haemonchus contortus—

- anatomy and life history, (35) 678.
- in Guam, (35) 873.
- in Philippines, (37) 277.
- life history, (29) 476.
- notes, (27) 182; (28) 481; (37) 779; (40) 88.

## Haemoproteus—

- columbae, sporogony, (34) 855.
- columbae, transmission, (35) 678.
- danilewski, notes, (26) 883.

## Haemosporidia, classification, (39) 163.

## Haemostrongylus vasorum, notes, (30) 279.

## Haemotrichomonas n. g. and n. spp., notes, (38) 784.

## Hail—

- as affected by forests, (29) 842.
- effect on trees, (37) 250.
- formation, theories, (34) 208.
- in Kansas, (38) 209.
- Maryland, (34) 413.
- Paris region, (36) 208, 719.
- the Tropics, (27) 617.
- United States, (37) 512.
- injury to cereals, (33) 127.
- injury to cultivated plants, (35) 734.
- insurance, (40) 894.
- insurance—

- in Alberta, (39) 496.
- Denmark, (27) 794.
- England and Wales, (29) 189.
- France, (26) 388; (29) 790.
- New England, (36) 192.
- North Dakota, (37) 594.
- various countries, (36) 593.
- report on, (26) 515.
- statistics, (40) 894.
- protection, (27) 15; (31) 22.

## protection—

- electric niagaras for, (30) 511; (34) 208.
- electrical devices for, (31) 416.
- experiments, (40) 118.
- in France, (30) 713.
- squall in Baltimore, (37) 807.
- theories, (37) 512.
- wounds on fruits, notes, (28) 826.
- wounds on woody plants, studies, (29) 131.

## Hailstones, unusual formation, (27) 617; (38) 210.

## Hallstrom—

- at Ballinger, Texas, (37) 513.
- in Kansas, (27) 616.
- of August 8, 1917, (38) 811.
- on James Island, S. C., (29) 721.
- remarkable, in region of Provins, (40) 512.

## Hallstrom—

- and hail prevention in France, (35) 318.
- in Belgium, (30) 17.
- prevention, (27) 719.

## Hallstroms—

- and hail prevention in France, (35) 318.
- in Belgium, (30) 17.
- prevention, (27) 719.

## Hair—

- and hair colors, notes, (27) 369.
- and hair pigments, physiological character, (32) 361.
- and wool, disinfection, (40) 783.
- availability of nitrogen in, (38) 423.
- dog's, hydrolysis of (26) 22.
- tankage, availability of nitrogen in, (26) 523, 725.
- waste, analyses, (28) 523.
- waste, fertilizing value, (33) 125.

- Hairlessness**—  
in newborn animals, (39) 187, 790.  
in pigs, (39) 187; (40) 185.
- Hairy root**, notes, (31) 449.
- Hairy vetch**, see *Vetch*.
- Hakuunboku seed**, oil of, (37) 109.
- Halia wavararia**, notes, (30) 53.
- Hallbut**—  
creatinin content, (31) 760.  
muscle, lysin content, (31) 559.  
shipping long distances, (35) 162.
- Haliotenus**, British, synopsis, (39) 664.
- Haliectus spp.**, bionomics, (35) 468.
- Halids**, method for titration, (38) 204.
- Halisidota**—  
caryae, studies, (38) 464.  
spp., notes, (39) 761.  
spp. on shade trees, (39) 561.
- Halogens**—  
determination in organic compounds, (34) 806.  
effect on action of enzymes, (28) 609.
- Halophytes**—  
physiology, (40) 424.  
transpiration in, (27) 522.
- Halos**—  
notes, (32) 25, 210, 810; (34) 614; (37) 807; (38) 511.  
observations, (34) 413.  
relation to precipitation, (35) 115.  
relation to weather, (34) 207; (39) 511.
- Haltica**—see also *Alicia* and *Flea-beetle*.  
ampelophaga in France, (30) 458.  
bimarginata, notes, (29) 252.  
carinata, notes, (26) 753; (35) 656.  
chalybea, see *Grape flea-beetle*.  
evicta, notes, (32) 556.  
foliacea, notes, (33) 746.  
foliacea, outbreak, (32) 656.  
jamaicensis, life history, (38) 864.  
pagana injurious to strawberries, (30) 758.  
probata, life history and habits, (36) 859.  
spp., notes, (29) 761.
- Halticini attacking Cruciferae in central Europe**, (30) 160.

seeds, after-ripening, (28) 226; (29) 134.
- Hawthorns**—  
of upper South Carolina, (36) 140.  
variability and hybridization in, (36) 630.
- Hay**—see also *specific kinds*.  
Alpine, of Lanzo, analyses, (26) 72.  
analyses, (26) 45; (37) 236.  
and fresh grass, comparative feeding value, (35) 372.  
and grain elevator, description, (30) 690.

## Hay—Continued.

- and pasture region east of Rockies, climatic features, (40) 117.
- as affected by—
  - long storage, (32) 363.
  - precipitation and temperature, (28) 41.
  - time of cutting, (27) 234.
- as carrier of foot-and-mouth disease, (33) 179.
- as human food, (34) 256.
- calculator, (33) 431.
- caps, (37) 699; (39) 687.
- changes in during storage, (30) 525.
- composition, (28) 463.
- composition as affected by—
  - fertilization and cultivation, (28) 633
  - fertilizers, (27) 35.
  - rain and dew, (26) 235.
  - time of cutting, (28) 634.
- composition, factors affecting, (30) 334.
- consumption, bulk of manure produced by, (40) 126.
- cost of production, (33) 831; (35) 691; (37) 191; (40) 292.
- critical period of growing season, (39) 811.
- crops—
  - following wheat, fertilizer experiments, (39) 540.
  - for Texas, (37) 827.
  - production in New York, (39) 532.
  - seeding, (38) 33.
- culture—
  - experiments, (26) 329, 422; (29) 138, 427, 736; (33) 830.
  - in Philippines, (30) 230.
  - in the South, (33) 332.
  - on a small holding, (30) 90.
  - on granitic soils, (32) 126.
  - on moor soils, (39) 437.
- cured in various ways, digestibility, (34) 371.
- curing, (26) 235.
- curing—
  - and harvesting, (33) 38.
  - devices, (30) 191.
  - in wet weather, (37) 189.
  - on trucks, (39) 440.
- damaged by rain, composition, (27) 170.
- digestibility, (28) 363, 463; (32) 167, 363.
- effect on milk and butter, (34) 570.
- English, digestibility, (31) 766.
- ether and chloroform extracts of, (28) 69.
- ether extract of, (23) 108.
- fall sowing, (33) 98.
- fall-sown, (34) 95.
- feeding value, (26) 574.
- fermenting power, (31) 413.
- fertilizer experiments, (26) 31, 422, 535, 629, 630, 725; (27) 532; (28) 124, 325, 735; (29) 228, 427, 517, 530, 631, 728; (30) 133, 134, 428, 519, 626, 632; (31) 829; (33) 330; (34) 22, 131, 294; (35) 430, 520; (40) 134.
- fever—
  - relation to agmantin, (40) 608.
  - toxins and serum, (32) 79.
- flour, analyses, (34) 164.
- from an "alkali flat," analyses, (29) 270.
- grades, (34) 528.
- grain, production, (36) 436.
- harvesting with sweep rake, (38) 88.
- heating during curing, (35) 312.
- irrigation experiments, (29) 631.
- making, (27) 599; (33) 299; (39) 231, 794.
- making, cost data, (38) 793.
- making machinery in England, (38) 190.
- market, notes, (28) 41.
- marketing, (26) 235; (36) 392.
- marsh, digestibility, (32) 363.
- meal, preparation and use, (36) 367.
- measuring for feed, (39) 834.
- measuring in stacks, (29) 532; (33) 831; (36) 227.
- microflora as affected by temperature, (33) 467.
- mixed—
  - analyses, (28) 169.
  - cost of production, (34) 137.
  - energy value, (33) 72.
- mixtures, tests, (38) 830.
- moor, causing excessive licking in cattle, (32) 567.
- moor, digestibility, (32) 363.
- native, analyses, (29) 370; (34) 467.
- native, digestibility, (32) 770.

## Hay—Continued.

- phosphates for, (39) 520.
  - production in Vermont, (29) 736.
  - production, studies, (39) 134.
  - racks, construction, (28) 386.
  - rotation experiments, (38) 133.
  - spontaneous combustion, (37) 788.
  - spontaneous heating of, (26) 767.
  - stackers, (40) 788.
  - tender and rake combination, description, (27) 90.
  - time of cutting, (39) 633.
  - tonnage tables, (33) 228.
  - treatise, (28) 829.
  - varieties, (29) 228.
  - wild, analyses, (33) 469.
  - yield as affected by—
    - ground water level, (29) 531.
    - time of cutting, (28) 634.
  - yield, estimating, (26) 434.
  - yields in Australia, (38) 133.
  - yields in Chester Co., Pennsylvania, (39) 621.
  - Zellers' table for, (33) 831.
- Haze—
- dense, of June 10-11, 1912, (28) 315.
  - effect on evaporation, (29) 721.
  - of July and August, 1916, (36) 419.
  - of May, 1914, (32) 25.
  - over southwestern United States, (36) 19.
  - relation to atmospheric humidity, (29) 120.
- Hazel blight, treatment, (37) 755.
- Hazelnuts—
- culture in Messina, (33) 540.
  - culture in various countries, (36) 142.
  - forcing experiments, (28) 435.
  - grafting, (31) 443.
  - insects affecting, (26) 246.
  - microscopic identification, (28) 565.
  - notes, (35) 145.
  - varieties, (28) 238; (30) 742; (37) 143.
  - yield and cultural value, (26) 337.
- "Head grit" in lambs, (34) 383.
- Headache—
- powders, studies, (27) 365.
  - tablets, methods of analysis, (27) 499.
- Headgates, designs for, (30) 85, 287.
- Health—
- administration, cooperative, in small towns, (32) 254.
  - as affected by saccharin, (26) 257.
  - biscuits, examination, (30) 664.
  - certificates, interstate recognition of, (34) 185.
  - public, *see* Public health.
- Heart muscle as beriberi preventive, (28) 761; (31) 762.
- Heartwood borer, notes, (28) 156.
- Heat—*see also* Temperature.
- and disinfectants, combined action on soils, (31) 620.
  - center of rabbits' brain, puncturing, (29) 479.
  - conductivity of soils, (27) 215.
  - destruction of lice and mites by, (38) 859.
  - development by plants, (31) 323.
  - effect on—
    - availability of phosphate rock, (31) 823.
    - cane sugar dissolved in milk, (34) 164.
    - catalytic power of soils, (28) 118.
    - concentration of soil solution, (37) 719.
    - creaming of milk, (36) 674.
    - emulsion, (26) 310.
    - germination of seeds, (27) 220, 243.
    - gluten, (26) 866.
    - habits of beans, (30) 343.
    - insect larvae, (28) 752.
    - insects, (27) 856.
    - lipoids in foods, (29) 365.
    - mineral constituents of soils, (31) 25.
    - nutritive value of food, (37) 467.
    - nutritive value of milk and its products, (34) 368.
    - peptic and tryptic proteolysis, (31) 107.
    - peroxydiastase of wheat, (26) 866.
    - protozoa, (31) 26.
    - rinderpest-immune bodies, (32) 476.
    - sap, (31) 522, 627.
    - seeds and young plants, (33) 629.
    - soil phosphorus, (27) 122.
    - soil protozoa, (36) 422.
    - soils, (26) 618; (30) 419; (32) 721; (34) 722; (35) 20, 22, 138, 515, 722.

**Heat**—Continued,  
 effect on—continued,  
     specificity of precipitins, (26) 482.  
     starch grains, (29) 409.  
     trees, (31) 348; (32) 144.  
     woody plants, (31) 343.  
 evolution by wounded plants, (27) 830.  
 from the stars, (32) 810.  
 insecticidal value, (28) 157; (34) 253.  
 leaf injury or loss due to, (35) 243.  
 liberation in plant respiration, (27) 28.  
 production—  
     and body surface, relation, (36) 64.  
     by leaves, (28) 630.  
     in physiological, bacteriological, or ferment  
     actions, (26) 872.  
     of the body, (32) 664; (40) 868.  
 radiation, nocturnal, (32) 419.  
 regulation as affected by sugar injections, (32)  
     859.  
 regulation in man, (30) 264.  
 relation to summer diarrhea of infants, (34) 462.  
 solar, seasonal variations in, (34) 415.  
 transmission through building materials, (31)  
     688; (38) 87, 492.  
 use against—  
     bee diseases, (31) 255.  
     insects, (34) 50, 653.  
     mill insects, (30) 155.

**Heath**—  
 deformation on the seashore, (32) 825.  
 grass, purple, ecology of, (33) 527.  
 hens on Marthas Vineyard, (30) 248.  
 reclamation in Netherlands, (31) 691.

**Heather**, burning for grouse and sheep, (40) 667.

**Heating**—  
 and ventilation, treatise, (29) 390.  
 by electricity, (30) 862; (32) 65; (33) 67, 461; (37)  
     387.  
 modern practice in, (30) 893; (31) 387.  
 of buildings, address on, (28) 213.  
 paper on, (31) 189.  
 system, domestic, wet coal for, (38) 87.  
 system, hot water, forcing circulation in, (31)  
     292.  
 system, hot water, piping for, (30) 893.  
 systems for farm houses, (36) 491, 590; (38) 492.

**Healus lineatus**, notes, (27) 859.

**Hectopsylla psittaci**, notes, (28) 753.

**Hedemarken Experiment Station**, report, (30) 134.

**Hedera**—  
 formation of anthocyanin in, (30) 432.  
 helix, intumescences in, (26) 545.

**Hedge**—  
 clippings as source of potash, (37) 817  
 plants, tests, (37) 241.

**Hedgehog**—  
 male generative cycle in, (27) 770.  
 morphology of blood, (28) 777.

**Hedges**—  
 artificial, tests, (30) 134.  
 culture, (32) 839.  
 planting, (33) 291, 442.

**Hedrobracon hebetor**, notes (27) 564.

**Hedychium coronarium** in Brazil, (39) 638.

**Hedyulus** spp., parasitic on fruit flies, (31) 456.

**Hedysarum**—  
 coronarium—  
     as a forage crop, (32) 41.  
     culture experiments, (30) 228, 532.  
     insects affecting, (26) 147.  
     nitrates in, (36) 329.  
     tests, (26) 133.  
     humile, analyses, (33) 466.

**Heeria mucronata**, analyses and digestibility, (27)  
 871; (32) 167.

**Hegari**—  
 culture experiments, (39) 434; (40) 433.  
 dwarf, culture in eastern Oregon, (38) 432.

**Heifers**—  
 age for breeding, (31) 371.  
 as affected by plane of nutrition, (35) 863.  
 breeding, development, (40) 369.  
 care and management, (34) 471.  
 conformation in relation to future production,  
     (39) 782.  
 cost of raising, (33) 765; (34) 470; (36) 76, 872;  
     (38) 176; (39) 782.

**Heifers**—Continued.  
 dairy, wintering, (39) 783.  
 effect of early calving, (40) 877.  
 factors affecting development, (31) 371; (33) 274;  
     (35) 871; (38) 682; (40) 877.  
 feeding experiments, (27) 871; (28) 264, 873; (32)  
     863; (36) 873.  
 French Canadian, cost of raising, (40) 775.  
 open shed, v. stable for, (38) 680.  
 pasturing experiments, (40) 471.  
 raising, (36) 572.  
 selection for milk production, (38) 74.  
 virgin, lactation in, (28) 372.  
 winter feeding, (39) 482.  
 winter rations for, (38) 681.

**Helipus**—  
 bonelli, notes, (30) 454.  
 lauri, notes, (28) 357; (39) 264.

**Helenium tenuifolium**, toxicity, (38) 883; (40) 778.

**Heleniums**, varieties at Wisley, (33) 536.

**Hellanthi**, yields, (30) 134.

**Hellanthus**—  
 annuus, forms of, (30) 140.  
 annuus, water relations, (40) 427.  
 culture experiments, (29) 331.  
 inheritance studies, (40) 131.  
 spp., betains in, (27) 203.  
 strumosus, culture experiments, (30) 632.  
 tuberosus, varieties, (40) 827.  
 tubers as a source of alcohol, (27) 616.  
 varieties at Wisley, (33) 536.

**Helicella itala**, insect enemy, (39) 766.

**Helicobasidium monipa**, notes, (28) 241.

**Helicobia helicis**, notes, (33) 749.

**Helicomycetes sphaeropsis**, notes, (36) 251.

**Helicosporium nymphaeae** n.sp., description,  
 (36) 752.

**Helinus ovatus**, analyses and digestibility, (27) 871;  
 (32) 167.

**Heliophila**—  
 albilinea, *see* Army worm, wheat-head.  
 diffusa, notes, (26) 59.  
 spp. in southern Texas, (34) 453.  
 unipuncta, *see* Army worm.

**Heliothis obsoleta**, *see* Cotton bollworm.

**Heliotrips**—  
 fasciatus—  
     control, (39) 256.  
     internal parasite of, (26) 858.  
     on olive, (35) 157.  
     studies, (28) 249.  
     femoralis, studies, (36) 153.  
     haemorrhoidalis, *see* Greenhouse thrips.  
     n.sp., description, (37) 258.  
     phaseoli n.sp., description, (27) 757.  
     rubrocinctus, notes, (27) 857; (28) 250 ;(35) 254,  
         357; (37) 357, 461; (40) 856.  
     rubrocinctus, studies, (28) 353.  
     sp., affecting tea, (34) 652.  
     spp., in Trinidad, (40) 649.

**Heliotropism**—  
 as affected by salts, (34) 333.  
 in animals and plants, identity, (33) 129.  
 negative, in Puccinia ramhni, (33) 330.

**Helix humboldtiana**, notes, (37) 755.

**Hellebore**—  
 analyses, (27) 441.  
 false, stock poisoning by, (39) 787.

**Hellula undalis**, *see* Cabbage webworm.

**Helminthiasis**, nodular, in cattle, studies, (28) 181.

**Helminthology**, notes, (33) 152.

**Helminthosporium**—  
 acrothecioides n.sp., description, (40) 155.  
 curvulum n.sp., notes, (37) 148.  
 echinulatum, notes, (35) 154.  
 gramineum—  
     notes, (28) 150; (29) 243; (32) 544; (33) 146.  
     studies, (30) 846.  
     treatment, (29) 845; (32) 145, 341; (35) 47;  
         (36) 247; (37) 247.  
 infection of wheat by, (26) 747.  
 mayaguezense n.sp. on Paspalum, (39) 248.  
 n.spp., descriptions, (27) 848.  
 oryzae, notes, (28) 647.

**sacchari**—  
     n.sp., description, (30) 650.  
     notes, (34) 49; (40) 157.  
     studies, (38) 851.

- Helminthosporium**—Continued.  
 sp. on coconut, (38) 758.  
 sp. on corn, (34) 844.  
 spp., notes, (27) 45; (29) 645.  
 spp., treatment, (31) 147, 446.  
 teres, ascigerous stage, (33) 345.  
 teres, longevity, (39) 549.  
 teres, studies, (29) 750.  
 theobromae n.sp., description, (37) 755.  
 turcicum, studies, (34) 844.
- Helminths**—  
 bactericidal properties, (30) 279.  
 dissemination by house flies, (36) 657.  
 in cattle and goats in Philippines, (37) 277.  
 parasite in cattle, (27) 886.  
 parasitic in equines, (27) 583, 888.  
 parasitic, photomicrographs of, (29) 478.  
 pathogenic rôle of, (31) 81.  
 toxic product, studies, (40) 84.
- Heliochara communis**, notes, (27) 859.
- Helodrilus**—  
 parvus as a host of fowl nematode, (30) 485.  
 welchi n.sp., description, (40) 267.
- Helopeltis**—  
 antonii and H. theivora, notes, (37) 55.  
 relation to cacao ant, (39) 156.  
 sp., notes, (26) 354; (33) 153.  
 spp., studies, (30) 854; (38) 259.  
 theivora, notes, (31) 850.
- Helorus** sp., notes, (31) 758.
- Helotiidae**, catalogue, (26) 560.
- Helotium aeruginescens**, notes, (29) 649.
- Hemaenasoldea oculata** n. g. and n.sp., description, (36) 259.
- Hemagglutination**, review and bibliography, (26) 481.
- Hemagglutinin**—  
 in blood of transfused rabbits, (39) 584.  
 Euphorbia, (30) 503.  
 human milk, (29) 175.  
 plants, (26) 431.
- Hemagglutinins**—  
 of plant origin, (26) 676.  
 vegetable, notes, (30) 204.  
 vegetable, studies, (31) 773.
- Hemaglobin**, properties of, (30) 201.
- Hematic phenomena in anaphylaxis**, (40) 880.
- Hematology**—  
 of domestic animals, status, (31) 286.  
 of normal and cholera infected hogs, (32) 582.  
 textbook, (38) 481.
- Hematopinus tuberculatus**, notes, (28) 158.
- Hematoporphyrin in ox muscle**, (36) 109.
- Hematoxins, bacterial**, notes, (26) 676; (32) 78.
- Hematuria**—  
 bovine, in British Columbia, (27) 576.  
 bovine, symptoms and pathology, (38) 486.  
 cystic, in cattle, (30) 383.  
 in cattle, investigations, (26) 586, 881.  
 notes, (31) 176.  
 studies, (36) 180.
- Hemerobius**—  
 gossypii, studies, (29) 355.  
 pacificus, notes, (28) 457; (34) 357.  
 pacificus, parasitic on red spider, (32) 157.  
 sp. destructive to purple scale, (26) 757.
- Hemerocampa**—  
 definita, notes, (30) 655.  
 leucostigma, see Tussock moth, white-marked.
- Hemeroiphila pariana**, notes, (38) 60; (40) 648.
- Hemicellulose**—  
 humification, (38) 26.  
 in roots, rhizomes, and tubers, (30) 130.
- Hemichionaspis**—  
 aspidistrae, see Fern scale.  
 minor, notes, (26) 247; (27) 54; (28) 159; (29) 359, 654; (33) 59; (40) 453.
- Hemichroini**, notes, (40) 761.
- Hemileia vastatrix**—  
 control, (40) 751.  
 effect on coffee culture in Java, (27) 153.  
 notes, (29) 851; (32) 548; (34) 540, 744, 848; (36) 347, 746; (37) 349, 453, 551; (39) 152, 857.  
 treatment, (28) 148; (34) 545; (35) 45, 353; (38) 647.
- Hemileuca oliviae**—  
 larvae, poisonous spines, (39) 561.  
 studies, (35) 259; (36) 55.
- Hemileucidae**, monograph, (32) 850.
- Hemiptera**—  
 American, bibliography, (31) 454.  
 bloodsucking, of Central America, (36) 356.  
 in America north of Mexico, (36) 550; (38) 763.  
 in Florida, (34) 550.  
 intracellular symbiosis, (27) 861.  
 palaearctic, catalogue, (30) 455.  
 polymorphism in, (27) 655.
- Hemiptera-Heteroptera**—  
 of Maine, (33) 59.  
 of New England, (40) 260.
- Hemipterological faunas of Europe and North America**, (27) 655.
- Hemisarcoptes malus**—  
 notes, (27) 861.  
 relation to control of oyster-shell scale, (39) 162.
- Hemispherical scale**, notes, (28) 854; (34) 652.
- Hemiteles**—  
 crassicornis, notes, (33) 862.  
 fulvipes, notes, (38) 768.  
 n.sp., notes, (35) 465.  
 sp., notes, (27) 562; (29) 456.
- Hemitehinae**, notes, (27) 862.
- Hemlock**—  
 bark, use for paper specialties, (36) 417.  
 borer, spotted, notes, (33) 252.  
 disease, new, (39) 153.  
 diseases in southern Appalachians, (31) 646.  
 eastern, studies, (32) 542.  
 importance and range, (28) 440.  
 Japanese, scale insects affecting, (26) 248.  
 poison, notes, (30) 145.  
 pulpwood from, (27) 541.  
 seedlings, root rot of, (34) 546.  
 timber nailed joints, tests, (38) 892.  
 unit stresses for, (36) 91.  
 water, eradication, (27) 733.  
 water, toxicity, (29) 111.  
 western—  
 analyses, (38) 309.  
 Echinodontium-infected, thinning, (40) 842.  
 heart rot, (40) 159.  
 mechanical properties, (28) 544.  
 notes, (27) 846.  
 stimulating seed production in, (38) 644.
- Hemocyamin**, hydrolysis of, (26) 22.
- Hemocytometer**, use, (36) 676.
- Hemoglobin**—  
 and chlorophyll, relation, (32) 711.  
 detection in urine, (26) 114.  
 determination, (29) 408.  
 ox, hydrolysis, (28) 607.  
 solution, proagglutinoïd-like, reaction (40) 779.
- Hemoglobinemia**—  
 of cattle in Sweden, (40) 585.  
 of horses, notes, (26) 683.  
 paroxysmal, notes, (26) 581.
- Hemoglobinuria**—  
 of cattle, immunization, (26) 285.  
 cattle in Chile, (33) 774.  
 cattle in Italy, (40) 782.  
 cattle, notes and treatment, (27) 378.  
 horses, treatment, (26) 588.
- Hemolymph nodes of sheep**, (32) 82.
- Hemolysin production, relation to culture medium**, (26) 481.
- Hemolysins**—  
 and proteolysins, relation, (40) 286.  
 production, (29) 581.  
 production by streptococci, (28) 179; (33) 83.  
 serum, in goats, studies, (27) 476.
- Hemolytic**—  
 complement, preservation, (31) 578.  
 reaction, effect of chemicals on, (36) 878.
- Hemerobius pacificus**, notes, (32) 651.
- Hemorrhage**, intractable, treatment, (37) 177.
- Hemorrhagic septicemia**, see Septicemia.
- Hemp**—  
 and flax fiber, microscopic differences, (26) 828.  
 as affected by lithium salts, (28) 526.  
 as green manure, (26) 631; (27) 337.  
 as weed eradicator and money crop, (28) 834.  
 Asiatic v. Italian, (31) 526.  
 binder twine from, (27) 534.  
 blooming of, (35) 640; (36) 523.  
 broom rape on, (39) 147.  
 change of sex in, (36) 736.  
 Chinese, fertilizer experiments, (33) 432.  
 common, geographical distribution, (26) 335.  
 cost of production, (35) 691.  
 culture, (31) 524; (36) 437; (39) 837;

## Hemp—Continued.

- culture—  
and manufacture, (30) 229, 831.  
experiments, (34) 229; (37) 227; (38) 336, 634;  
(40) 231.  
in Antigua, (38) 336.  
Arizona, (32) 226.  
France, (37) 830.  
Italy, (30) 229, 232.  
Jamaica, (32) 229.  
Wisconsin, (35) 528; (36) 828.  
on moorland, (30) 229.  
Deccan, production in Africa, (40) 238.  
destruction of Canada thistles and quack grass  
by, (27) 31.  
effect on following crop, (40) 734.  
fertilizer experiments, (26) 129; (30) 232; (31) 133;  
(35) 523; (38) 634.  
fiber, strength of, (29) 313.  
fiber, studies, (38) 646.  
flea-beetle, biology and remedies, (30) 255.  
floral anomalies in, (26) 432; (27) 827.  
fungus disease of, (32) 146.  
hurds as paper-making material, (36) 17.  
Indian, rubber from, (30) 614.  
industry—  
in India, (37) 233.  
in New Zealand, (39) 638.  
in Wisconsin, (39) 638.  
wastes, fertilizing value, (37) 219.  
insects affecting, (31) 332; (38) 54.  
Italian, production and manufacture, (33) 530.  
Manila—  
culture and grading, (32) 828.  
culture in Philippines, (30) 230.  
standard grades, (36) 634.  
monograph, (31) 332.  
notes, (29) 330.  
old treatise on, (40) 628.  
pulp, fertilizing value, (40) 629.  
purple-leaved mutation, (28) 834.  
Queensland, culture in the South, (34) 35.  
retting, review of literature, (38) 715.  
seed—  
amino acid in, (33) 665.  
cake, analyses, (36) 571.  
cake, effect on milk and butter, (34) 471.  
distribution of nitrogen in, (36) 269.  
edestin, hydrolysis of, (26) 22.  
for chicks, (34) 871.  
germination, (33) 133.  
germination as affected by green manures,  
(33) 331.  
germination energy of, (29) 538.  
germination tests, (29) 740.  
meal, analyses, (33) 170.  
oil, detection, (29) 613.  
viability as affected by age, (31) 624.  
sex anomalies in, (29) 27.  
sex inequality in, (31) 526.  
sisal—  
analyses and valuation, (30) 138.  
culture experiments, (30) 632.  
date of cutting test, (27) 234.  
disease of, (33) 850, 851.  
standardization, (30) 831.  
sunn—  
as green manure, (27) 637; (36) 232, 624, 737;  
(38) 220.  
composition and use, (27) 727.  
culture and improvement, (28) 633.  
culture experiments, (28) 633; (37) 824; (38)  
336.  
description, (30) 828.  
notes, (27) 36.  
utilization of hydrocyanic acid by, (31) 730.  
varieties, (30) 434; (31) 133; (38) 634.  
water requirement, (32) 226.  
Hen flea, notes, (32) 757; (33) 354; (35) 58; (36) 554.  
Hen louse, *see* Menopon pallidum.  
Hembane—  
breeding experiments, (30) 631.  
improvement by selection, (32) 143.  
Hendersonia—  
coffea, notes, (38) 51.  
diploidioides, studies, (33) 545.  
dodartiae n.sp., description, (35) 844.  
eucalypticola n.sp., description, (27) 548.  
herpotricha, notes, (32) 843.  
herpotrichoides, notes, (28) 445.

## Hendersonia—Continued.

- opuntiae, studies, (27) 352.  
rubi, notes, (27) 448; (34) 55, 241.  
sacchari n.g. and n.sp., description, (30) 650.  
sacchari, notes, (34) 49.  
sp. on mangosteen, (35) 153.  
Henequen—  
binder twine from, (27) 534.  
chemistry of, (27) 717.  
fiber, strength of (29) 313.  
Henna, studies, (35) 449.  
Henrich, George, biographical notes, (29) 121.  
Hens—*see also* Chickens, Fowls, and Poultry.  
abnormality of oviduct in, (33) 471.  
artificial insemination in, (31) 370.  
artificial light for, (34) 669, 770; (36) 374.  
average productive life of, (32) 73.  
correlation between form and function, (28) 73.  
cost of keeping, (33) 76.  
crowing, (34) 268.  
determination of age, (32) 470.  
dwarf egg production by, (36) 73.  
early and late hatched, (39) 275, 780.  
egg production, *see* Egg production.  
external indications of egg production, (35) 480.  
feed requirements, (33) 793.  
feeding, (33) 98.  
feeding experiments, (27) 773; (28) 773; (29) 672;  
(30) 175; (31) 270, 473; (32) 571; (33) 572; (34)  
175, 177, 179, 268; (35) 171, 274, 479, 569, 773;  
(36) 71, 172, 373, 570, 769, 869; (37) 70, 268, 271,  
682, 768, 774, 871; (38) 373.  
feeding for egg production, (28) 773; (31) 569  
(33) 672.  
fish meal for, (35) 769.  
forced molting of, (32) 469.  
histology of oviduct, (28) 575.  
in city back yards, (39) 176.  
individual characteristics, (34) 175.  
laying—*see also* Egg production.  
cottonseed meal for, (39) 480.  
feeding experiments, (39) 74, 176, 275, 376,  
377, 577, 786; (40) 76, 670, 773.  
loss of pigment, (40) 671.  
method for determining, (40) 571.  
nesting habits, (40) 77.  
range v. confinement for, (39) 275, 277, 376,  
480.  
records of different breeds, (29) 276; (30) 675.  
selection, (38) 775; (39) 74, 268, 480, 675.  
vegetable v. animal feeds for, (39) 176.  
yellow color as basis for culling, (39) 378.  
Leghorn, broodiness in, (29) 275.  
Leghorn, remarkable record of, (28) 270.  
molting, care, (33) 698.  
new high egg record, (26) 669.  
range v. confinement for, (34) 669; (35) 171, 377.  
restricted rations for, (36) 72.  
selection, (30) 270, 471; (37) 599.  
selection for production, (33) 173; (37) 573, 871.  
serum proteins of, (32) 861.  
sitting, carbon dioxide under, (31) 172.  
sitting, selection and care, (39) 781.  
synthesis of lecithin in, (28) 269.  
v. pullets for egg production, (38) 677.  
wheat in ration, effects, (39) 74.  
winter egg production in, (34) 470.  
winter rations, (36) 373.  
Hepatic cirrhosis in cattle, cause, (27) 79.  
Hepatitis—  
and nephritis of the hen, (39) 190.  
in pigs, (33) 774.  
Hepialus—  
humuli, notes, (30) 249.  
hyperboreus, notes, (27) 452.  
thule, hymenopterus parasite of, (27) 452.  
Heptadecyclic acid, studies, (30) 110.  
Heptamerocera lonchaeae n.sp., description, (28)  
162.  
Heptane—  
sterilization of soils by, (32) 816.  
use, (31) 744.  
Heptasmicra brasiliensis n.sp., description, (39) 566.  
Herbaceous—  
borders, treatise, (29) 840.  
perennials, rest period in, (33) 223.  
Herbicides, preparation and use, (31) 635.  
Herbs—  
assimilation and chlorophyll content of leaves,  
(28) 728.

## Herbs—Continued.

- culinary, handbook, (28) 259.
  - culture, (26) 393.
  - culture experiments, (26) 237.
  - culture in California, (26) 47.
  - drying, (38) 114.
  - growing and collecting, (36) 743.
  - of Southern Circle of Central Provinces, (32) 144.
  - phloem and bark diseases of, (34) 442.
  - treatise, (26) 239.
- Herd book, origin and use, (27) 672.
- Hereditary—
- infection in cattle ticks (30) 460.
  - material in germ cells, (32) 697.
- Heredity—
- alternative, significance, (29) 67.
  - ancestral law of, (26) 878.
  - and development, treatise, (30) 564.
  - eugenics, treatise, (28) 271.
  - mutation as cell phenomena, (34) 823.
  - sex, manual, (30) 767.
  - vigor, treatise, (35) 371.
- behavior of unit-like series in, (28) 570, 571.
- bibliography, (26) 470; (27) 175; (28) 370; (32) 860; (33) 168, 537; (34) 370.
- calculating possibilities in, (28) 571.
- carriers of, (29) 67.
- chromosome theory, (34) 527; (35) 272; (38) 625.
- control, (26) 672.
- correlation coefficient, (27) 175, 176.
- correlation tables, (27) 870.
- crossing-over in, (35) 866.
- definition, (27) 869.
- Delboeuf's law, (27) 175.
- discontinuity in, (27) 369.
- dynamic, theory of, (26) 169.
- factorial hypothesis, (38) 65.
- facts and principles, (39) 671.
- germ plasm theory (27) 468.
- in alcoholized fowls, (39) 177.
- Amaranthus retroflexus, (32) 726.
- animal breeding, (29) 570.
- apple hybrids, (27) 843.
- apples, (28) 639.
- barley, (30) 335; (40) 825, 826.
- beans, (27) 636; (28) 331; (31) 224; (32) 130, 540; (35) 836; (36) 735, 826.
- beans, velvet-Lyon, (33) 34; (34) 431.
- bees, (29) 860.
- beets, (29) 332, 832.

- Heterothrips—  
new species, description, (35) 853.  
sericatus n.sp., description, (30) 658.
- Heterozygosis—  
in evolution and plant breeding, (29) 31.  
studies, (27) 428.
- Hevea—  
brasiliensis, *see* Rubber.  
canker, notes, (32) 242.  
spp., tapping experiments, (26) 443.
- Hevi, asexual propagation, (32) 142.
- Hexagona spp., on forest trees, (40) 349.
- Hexamethylenamin, determination, (35) 616.
- Hexamethylenetetramin, assimilation by plants,  
(26) 32.
- Hexane—  
effect on soil microorganisms, (31) 27.  
sterilization of soils by, (32) 816.
- Hexaplasta, n.spp., descriptions, (33) 360.
- Hexham scent weed, description, (36) 639.
- Hexoic acid in butter, constitution, (29) 508.
- Hexotrioses, decomposition, (26) 310.
- Hibernation, theories, (37) 156.
- Hibiscus—  
breeding experiments, (27) 741; (29) 235; (32)  
742; (34) 146; (36) 839.  
cannabinus, culture and improvement, (28) 633.  
cannabis, production in Africa, (40) 238.  
culture in Burma, (29) 736.  
insects affecting, (30) 445.  
moscheutos, insects affecting, (40) 754.  
oculiformis, dwarf sport, (34) 335.  
ornamental, in Hawaii, (30) 445, 839.  
propagation, (27) 143.  
sabbdariffa—  
analyses, (31) 366.  
culture and use, (27) 40.  
description and analysis, (29) 161.  
n.vars., descriptions, (31) 535.  
spp., notes, (27) 431.  
spp., root system, (39) 230.  
syriacus, food plant of cotton boll weevil, (31)  
458.  
syriacus, supernumerary carpels in, (28) 832.
- Hickories—  
dying, cause and remedies, (26) 560.  
grafting, inarch method, (31) 443.  
parthenogenesis in, (30) 544; (31) 443.  
shagbark, grafting, (31) 443.  
top-working with pecans, (35) 745.
- Hickory—  
aphis, little—  
on pecan, (38) 157.  
studies, (31) 753.  
as a pollinizer for pecans, (36) 344.  
bark beetle—  
notes, (27) 755; (30) 655; (32) 550; (34) 158.  
remedies, (26) 560; (35) 760; (36) 856.  
bark borer—  
notes, (26) 856; (28) 158; (30) 656; (33) 58, 252.  
remedies, (29) 457.  
borers, notes, (40) 259.  
cossid on pecan, (38) 157.  
destructive distillation, (27) 745.  
distillation value, (32) 48.  
gall aphid, notes, (37) 255.  
grass, notes, (29) 441.  
leaf galls, descriptions, (35) 468.  
leaf stem gall louse, notes, (33) 58.  
manufacture and utilization, (26) 544.  
mealy bug, description, (36) 551.  
nut oil, digestibility, (38) 868.  
nut oil, notes, (30) 165.  
nuts, analyses and food value, (30) 165.  
nuts, distribution of nitrogen in, (36) 269.  
phylloxera on pecan, (38) 157.

- Hickory**—Continued.  
 seeds, storage experiments, (37) 547.  
 shagbark, bearing dates, (33) 643.  
 shagbark, wood structure, (36) 447.  
 tiger-moth injurious to orchards, (38) 464.  
 top-working with pecans, (34) 151.  
 tussock moth, notes, (39) 761.  
 twig girdler on pecan, (38) 157.
- Hides**—*see also* Skins.  
 and skins, book, (27) 775.  
 and skins, world's supply, (39) 477.  
 anthrax infection from (26) 781.  
 cattle, supply of, (32) 91.  
 curing and marketing, (27) 470.  
 disinfection, (31) 677; (33) 178; (34) 781; (38) 784.  
 exports from Mexico, (27) 70.  
 from China, disinfection, (35) 487.  
 prices in India, (30) 896.  
 subcutaneous matter of, composition and feeding value, (35) 376.
- Hieracium**—  
 hybrids, artificial fertilization, (28) 531.  
 spp., notes, (32) 436.
- Hierochloa borealis**, geographical distribution, (26) 334.
- Hieroglyphus rusticolus candicans** in North Dakota, (40) 161.
- Hieroglyphus banian**—  
 control, (23) 249.  
 studies, (27) 55.
- High school**—*see also* Schools.  
 visitors in Texas, (30) 199.
- High schools**, rural relations, (39) 298; (40) 486.
- Highway**—  
 bridges and structures, paper on, (34) 484.  
 cost keeping, (39) 794.  
 engineering—  
 chemistry of, (26) 789.  
 economics of, (35) 389.  
 traffic laws in relation to, (40) 387.  
 treatise, (27) 189; (34) 585.  
 engineers, feet-miles conversion table for, (35) 390.  
 statistics and data, uniformity in, (34) 484.  
 transportation, economic, (40) 387.  
 work, equipment for, (34) 484.
- Highways**, *see* Roads.
- Hilaria**—  
 cenchrroids, seedling on ranges, (30) 35.  
 mutica as hay or silage crop, (38) 471.
- Hilgard, E. W.**—  
 biographical sketch, (34) 301.  
 memorial addresses, (35) 595.
- Hillip bonelli**, notes, (28) 858.
- Hill bull blood**, analyses, (36) 779.
- Himantia stellifera**—  
 notes, (40) 157, 848.  
 studies, (38) 851.
- Hinoki**—  
 fertilizer experiments, (38) 624.  
 wood, essential oil of, (34) 802.
- Hippeastrum**, red leaf spot of, (36) 453.
- Hippobosca maculata**, relation to surra, (31) 777.
- Hippodamia**—  
 ambigua, notes, (28) 161.  
 convergens—  
 collecting, (27) 361.  
 destruction by white fungus, (26) 454.  
 destructive to citrus plant lice, (26) 755.  
 fumigation, (39) 463.  
 life history and habits, (34) 555.  
 notes, (28) 250; (29) 652; (32) 654.  
 studies, (29) 359.  
 spp., life history, (33) 562.  
 spp., notes, (27) 561.  
 spp., studies, (39) 663.
- Hippopotamus liberiensis**, domestication, (30) 672.
- Hippotion celerio** in South Africa, (40) 648.
- Hippuric acid**—  
 assimilation by plants, (26) 32.  
 cleavage by mold fungi, (30) 503.  
 decomposition by mold fungi, (29) 28.  
 determination, (31) 610; (40) 611.  
 effect on development of radishes, (26) 229.  
 effect on spectroscopic test for hemoglobin, (26) 114.  
 excretion as affected by spices, (28) 261.  
 formation in pigs, (32) 262.
- Hirayamaia n.g.** and *n.sp.*, description, (38) 857.
- Hirneola auricula-judae**, studies, (33) 551, 552.
- Hirudo boyn-toni**, transmission of rinderpest by, (33) 876.
- Hispinae**, catalogue, (26) 560.
- Histidin**—  
 betain in *Boletus edulis*, (31) 203.  
 detection, (32) 20.  
 determination, (31) 212.  
 determination in proteins, (26) 22.  
 effect of guinea pig serum on, (30) 478.  
 effect on plant growth, (28) 324.  
 in grape leaves, (27) 731.  
 hops, (32) 502.  
 malt sprouts, (26) 24.  
 soils, (27) 500.  
 notes, (28) 29.  
 nutritive value, (38) 569.  
 preparation, (38) 708.  
 rôle in purin metabolism, (37) 265.
- Histology**—  
 pathologic, treatise, (36) 674.  
 textbook, (29) 676.  
 treatise, (26) 876.
- Hitches**, directions and illustrations, (27) 96.
- Hodotermes turkestanicus**, remedies, (31) 155.
- Hoing machines** for vineyards, tests, (28) 187.
- Hog-breeding crate**, (39) 577.
- Hog bristles**, fertilizing value, (29) 129.
- Hog cholera**—  
 agglutination reactions in, (26) 785; (27) 289, 384.  
 and infectious abortion in pigs, (31) 886.  
 attenuated form, (26) 483.  
 auto-infection in, (34) 279.  
 bacillary, notes, (31) 679.  
 bacilli in intestines of healthy hogs, (26) 184.  
 bacillus, nongas-producing strain, (36) 582.  
 bacillus, virulence after passage through rabbits, (38) 382.  
 blood, attenuation, (36) 777.  
 blood filtrates, (36) 776.  
 cases, paratyphoid bacilli from, (40) 480.  
 cause, (26) 785; (27) 290; (28) 82; (37) 382, 782.  
 cell inclusions in, (34) 679.  
 complement fixation in (34) 582; (39) 392.  
 control, (28) 184, 285; (29) 500, 888; (36) 192; (38) 183, 888; (39) 387, 582; (40) 89, 577.  
 control, importance, (39) 492.  
 control in—  
 California, (30) 484.  
 Canada, (31) 886.  
 Colorado, (31) 885.  
 Germany, (33) 87, 680; (34) 185.  
 Great Britain, (36) 676; (37) 779.  
 Indiana, (31) 781; (32) 676; (36) 482; (37) 882.  
 Iowa, (34) 387; (36) 777; (38) 78.  
 Kansas, (35) 488.

- Horizonetta**, new genus, erection, (37) 758.
- Hormiopterus graciliformis** n.sp., description, (26) 352.
- Hormiscium colocasiae**—  
n.sp., description, (28) 747.  
notes, (29) 345.
- Hormodendron**—  
hordei, notes, (26) 446.  
sp., notes, (29) 647.
- Hormone media**, preparation and use, (39) 583.
- Hormones**, rôle in production of secondary sex characters, (31) 271.
- Horn**—  
fertilizing value, (29) 129.  
fly—  
as affecting milk production, (40) 648.  
as anthrax carrier, (39) 161.  
mites infesting, (26) 252.  
notes, (29) 454; (32) 555; (34) 753.  
parasites of, (29) 53; (34) 59; (37) 847.  
repellants for, (38) 358.  
transmission of poliomyelitis by, (31) 551.  
ground, fertilizing value, (37) 321.  
meal, ammonification and nitrification under laboratory conditions, (30) 218.  
meal, nitrification in soils, (31) 818.
- Hornbeam**, forcing experiments, (28) 435.
- Hornbill**, giant, peculiarity in growth of tail feathers, (34) 850.
- Hornblend** decomposition by soil bacteria and yeast, (31) 121.
- Hornet**, European—  
girdling of hardwood twigs by, (37) 255.  
notes, (28) 752; (34) 752.  
poison of, (29) 57.
- Horns**—  
breeding for, (33) 173.  
inheritance in cattle, (29) 68.  
inheritance in sheep, (27) 468; (28) 267.
- Horn-tails** of North America, (29) 359.
- Hornworms**, studies, (26) 453.
- Horonomia emarginata**, host plant of fruit fly, (26) 768.
- Horse**—  
and mule as twins, (38) 574.  
and zebra hybrids, skull characters, (38) 65.  
barn, plans and specifications, (33) 783.  
barns for prairie farms, (35) 690.  
bean seeds, germinating, nitrogenous substances in, (32) 112.  
beans—  
changes in during ripening, (36) 731.  
composition as affected by companion crop, (26) 617.  
culture and use, (39) 837.  
culture experiments, (31) 829.  
culture for winter forage, (38) 735.  
description, (30) 828.  
distance experiments, (30) 732.  
fertilizer experiments, (26) 631.  
for pigs, (36) 371.  
hybridization experiments, (32) 130.  
inoculation experiments, (26) 617.  
liming experiments, (32) 127.  
notes, (28) 532.  
sulphur as a fertilizer for, (30) 139.  
varieties, (26) 631; (31) 230.  
blood, red and white corpuscles in, (29) 783.  
bots—see also *Gastrophilus* spp.  
relation to pernicious anemia, (39) 81.  
breaking in Argentina, (30) 71.  
Carnot, notes, (34) 869.  
control brands in Germany, (30) 373.  
disease in Patagonia, (39) 85.
- Horse**—Continued.  
diseases—  
control during war, (38) 287.  
handbook, (30) 285; (37) 778, 784; (39) 83, 492.  
in British East Africa, (30) 576.  
nature and treatment, (34) 353.  
notes, (29) 676; (31) 380.  
relation to phosphate depletion of soil, (38) 118.  
report on, (36) 884.  
treatise, (34) 278, 477, 794; (38) 781.  
treatment, (28) 587.  
distemper, immunization, (30) 83.  
entrails, utilization, (30) 567.  
fairs and exhibitions in United States, (28) 796.  
flesh, analyses, (40) 656.  
flesh as human food, (39), 668.  
flesh, preservation and use, (27) 460.  
flies, see *Tabanus striatus*.  
hybrids, fertility of, (26) 163.  
insurance societies in Holland, (30) 493.  
labor, cost, (34) 558, (37) 867; (39) 495.  
labor on the farm, (39) 794, 795.  
lice, biology and remedies, (38) 184.  
mange—  
nature and treatment, (30) 485.  
notes, (40) 89, 676.  
parasitic, in horses, asses, and mules, (29) 588.  
treatment, (38) 82; (39) 283, 291.  
meat—  
detection in bologna, (28) 615.  
detection in canned beef, (34) 113.  
detection in pork products, (28) 510.  
protein as affected by alcohol, (30) 779.  
nettle, destruction, (26) 333.  
racing, plea for, (37) 771.  
saliva—  
amylolytic activity, (38) 180.  
anthrax bacilli in, (30) 83.  
diastatic action, (37) 771.  
orokinase and ptyalin in, (40) 778.  
scab, notes, (34) 576.  
serum—  
antibodies, relation to serum disease, (39) 284.  
effect on hemolytic action of peptones, (35) 881.  
proteins as anaphylactic antigens, (36) 877.  
refractive index, (26) 173.  
tests, (35) 179.  
use against dog distemper, (28) 185.  
utilization in human nutrition, (40) 269.  
sickness—  
African, complement fixing in, (26) 882.  
immunization, (33) 384.  
review of investigations, (31) 177.  
spermatozoa, longevity outside the body, (38) 170.  
stables, location and construction, (28) 188.  
stables, mangers and racks for, (28) 386.  
strongyles, studies, (39) 686, 892.  
tick, tropical, studies, (35) 58.  
troughs, sanitary, descriptions, (28) 686.
- Horse-chestnut**—  
anthracnose, notes, (35) 851.  
flakes, analyses and feeding value, (33) 170.  
leaf blotch—  
description, (35) 851.  
notes, (33) 347.  
studies, (35) 154.  
treatment, (39) 548.  
leaf cast, notes, (37) 658.  
leaf diseases, treatment, (34) 747.  
Phyllosticta disease, (38) 545.  
shoots, *Gloeosporium* on, (36) 52.  
wounds, larvae in, (29) 357.
- Horse-chestnuts**—  
analyses, (38) 410.  
composition and digestibility, (27) 669.  
drying, (27) 669.  
endotrophic mycorrhiza of, (26) 826.  
feeding value, (29) 170; (32) 566; (39) 269.  
forcing experiments, (28) 435.  
new, in Kew Gardens, (31) 236.  
use in bread making, (35) 470.
- Horseflies**—  
as anthrax carriers, (39) 161.  
egg-laying habits and early stages, (37) 853.  
in southern Florida, (37) 563.

- Horseflies**—Continued.  
 notes, (29) 454.  
 of Everglades, peculiar habit, (40) 263.
- Horsegram** as green manure, (38) 220.
- Horsemint**—  
 as source of thymol, (35) 344.  
 thymol content, (39) 712.
- Horsepower**—  
 computing, (27) 485.  
 v. electricity for threshing machinery, (28) 591.
- Horsepox**, studies, (38) 586.
- Horse-radish**—  
 culture, (34) 95.  
 culture experiments, (36) 838.  
 flea-beetle, notes, (29) 761.  
 flea-beetle, studies, (37) 566.  
 webworm, life history and remedies, (28) 656.
- Horses**—  
 abnormal digits in, (27) 369.  
 alimentary intoxications of, (26) 887.  
 amebae affecting, (27) 477.  
 American-bred, in England, (28) 772.  
 American trotting, foreign demand for, (31) 169.  
 anatomy of, treatise, (32) 278, 682.  
 ancestry, (26) 368; (28) 271, 469, 672, 673.  
 anesthesia of, (35) 379.  
 Anglo-Morman, history, (26) 875.  
 antiquity in River Plata region, (28) 469.
- Arabian**—  
 discussion, (26) 571.  
 history and influence, (27) 772.  
 in northern Africa, (26) 875.  
 preservation, (31) 368.  
 stud book, (29) 69.
- Ardennais**, origin and type, (26) 269.
- Argentine polo**, notes, (27) 471.
- army**, breeding in Sao Paulo, (27) 875.
- army**, improvement, (30) 674.
- army**, treatise, (26) 369.
- as affected by—  
 dips, (27) 477.  
 environment, (32) 263.  
 smoke from lead works, (34) 278.
- Assyrian wild**, notes, (26) 668.
- bacterial flora** of large intestine, (29) 466.
- Belgian draft**, monograph, (26) 76; (27) 72.
- Boulonnais breed**, origin and characteristics, (26) 168.
- brains** of, (31) 168.
- breaking**, (38) 775.
- breaking and training**, (33) 271.
- breaking and training**, treatise, (32) 263.
- breeding**, (26) 571; (28) 874; (29) 672; (30) 70; (31) 269, 394; (32) 361; (37) 368, 572; (40) 183.
- breeding**—  
 and management, (27) 72; (33) 71; (38) 274.  
 and training, treatise (34) 869.  
 experiments, (27) 772; (29) 666; (32) 767; (35) 869.  
 for English army, (33) 172.  
 for United States Army, (30) 270; (39) 479.  
 government aid to, in Europe, (26) 896.  
 history, (26) 368.  
 in Algiers, government aid to, (29) 573.  
 Austria-Hungary, (28) 269.  
 British Isles, (29) 272.  
 Denmark, (27) 301.  
 France and Hungary, government aid to, (29) 573.  
 Germany, (27) 72; (30) 170.  
 Great Britain, (27) 772; (33) 471; (38) 71.  
 Great Britain, government aid to, (28) 595.  
 Hungary, (26) 269; (27) 672; (28) 875.  
 Ireland, (27) 471.  
 Italy, (26) 770.  
 Japan, (30) 674.  
 Lombardy, (28) 367.  
 Netherlands, (31) 396.  
 New Jersey, (30) 476.  
 Philippines, (30) 869.  
 Portugal, (33) 172.  
 Prussia, (29) 171; (32) 171.  
 Punjab, (30) 767.  
 Rhenish Prussia, (26) 875.  
 Sao Paulo, (29) 368.  
 South Africa, (27) 72; (34) 263.  
 Tunis, (27) 673.  
 Yorkshire, (27) 374.
- notes, (26) 168.
- Horses**—Continued.  
 breeds, British, (29) 571.  
 breeds in Norway, (32) 868.  
 buying, (30) 270.  
 cactus for, (33) 70.  
 cannon bone size and age of parents, correlation, (36) 371.  
 care and management, (27) 373; (28) 367; (29) 873; (34) 268.  
 care and training, book, (33) 571.  
 caterpillars injurious to, (26) 456.  
 cavalry, improving, (29) 471.  
 Celtic, discussion, (26) 571.  
 changes in form due to fattening, (28) 172; (34) 174.  
 chestnuts of, (26) 672; (28) 772.  
 classification, (26) 668.  
 climatic environment, (27) 174.  
 color factors in hair of, (28) 874.  
 color for in Tropics, (26) 75; (28) 575.  
 color inheritance in, (32) 361; (40) 870.  
 composition of bones, (27) 572.  
 concretions in cyst of mammary gland, (27) 888.  
 correlation between form and function, (27) 373.  
 cost of—  
 feeding in Philippines, (26) 362.  
 keeping, (31) 870; (37) 867; (38) 675, 693, 790.  
 raising, (26) 668; (29) 190; (36) 70; (38) 675.  
 cottonseed meal for, (39) 375.  
 crushed oats for, (36) 866.  
 determination of age, (32) 366.  
 digestion experiments, (28) 463; (29) 671; (32) 262.  
 diseases of—  
 digestive organs, (40) 86.  
 reproductive organs, (37) 473.  
 respiratory tract, (33) 582.  
 dissection, guide, (33) 87; (34) 480.  
 dissection of cranial nerves and blood vessels, (34) 188.
- draft**—  
 breeds of, (32) 262.  
 fattening for market, (38) 71.  
 feeding experiments, (36) 569.  
 judging, (29) 471; (32) 469; (33) 696.  
 raising, (36) 172.  
 selection, (38) 275.
- early maturity** in, (28) 271.
- educated**, notes, (28) 172, 470.
- electro-cardiogram** of, (30) 269, 784.
- emaciated**, treatment, (33) 286.
- English racing**, color of, (35) 377.
- evolution** in South America, (28) 673.
- exports** from United Kingdom, (31) 471.
- factors affecting pulse rate**, (28) 768.
- famous American**, notes, (26) 368.
- famous sires**, (27) 173.
- feed requirements**, (35) 773.
- feeding**, (26) 164; (29) 171; (30) 174; (38) 169, 576, (40) 875.
- feeding**—  
 experiments, (26) 74, 362, 468; (27) 572, 772 (28) 171, 172, 265, 363, 364, 571; (29) 370, 773, 873; (30) 175, 571; (31) 668, 769, 870; (32) 462; (33) 471, 759; (34) 175, 769, 865, 869; (35) 773, 869; (36) 69, 171, 866; (37) 269, 681, 768; (38) 676.  
 in New South Wales, (28) 367.  
 treatise, (27) 471.
- filaria** in blood of, (26) 287.
- fish** for, (32) 862.
- for the army**, (27) 173.
- for the army**, treatise, (26) 770.
- forest**, discussion, (26) 571.
- fossil**, of South America, (28) 269.
- gestation period**, determination, (34) 565.
- glandered**, infectivity of organs, (27) 782.
- grape marc** for, (32) 567.
- great producing families** of, (31) 269.
- growth and body development**, (30) 467; (33) 471.
- hair and hair whorls**, (27) 373.
- handbook**, (27) 772, 875.
- handing and feeding** in winter, (33) 759.
- harness wounds**, (39) 85.
- heated**, watering, (27) 174.
- helminths** affecting, (27) 583, 888.
- history and development**, (31) 769.
- history** in America, (30) 174, 673; (32) 366.
- hitching devices** for, (30) 690.

Horses—Continued.  
 hoof investigations, (27) 673.  
 hoofs, essential points, (27) 876.  
 host of spotted fever tick, (26) 64.  
 Hungarian, filariasis in, (39) 190.  
 immunization against—  
   anthrax, (28) 778; (31) 82.  
   forage poisoning, (38) 383, 384; (39) 587.  
   glanders, (27) 379; (28) 286, 779; (30) 481, 578;  
   (31) 83.  
   hemorrhagic septicemia, (28) 881.  
   influenza, (26) 185; (29) 482, 483.  
   rabies, (30) 282.  
   strangles, (28) 784; (32) 882.  
   tetanus, (27) 331; (29) 781; (31) 480.  
   trypanosome diseases, (32) 81.  
   tuberculosis, (26) 85.  
 immunized, cause of death in, (40) 881.  
 improvement, (35) 377; (37) 768.  
 improvement—  
   in Kansas, (27) 279; (32) 771.  
   in Porto Rico, (31) 864.  
   value of good sires, (37) 866.  
 in Belgium, importation and exportation, (32)  
 668.  
 Germany, (33) 296, 668.  
 Kongo, (31) 865.  
 North Africa, (32) 469.  
 Philippines, (36) 172.  
 Philippines, ancestry, (26) 666.  
 Scotland, Russia, and New Zealand, (38)  
 595.  
 United States, (31) 73.  
 inflammation of brain and spinal cord, (26)  
 373; (27) 181.  
 inflammation of deep air passages of, (31) 287.  
 inheritance—  
   in, treatise, (30) 269.  
   of blood-vessel breaking in, (30) 673.  
   callosities in, (26) 571.  
   coat color in, (27) 370, 467, 876; (30) 70,  
   373, 571; (31) 266, 870; (33) 471.  
   defects in, (34) 576.  
   nontraumatic eye defects in, (26) 672.  
   racing performance in, (27) 875; (29) 773;  
   (30) 674.  
 inspection and disinfection for interstate ship-  
 ment, (34) 185.  
 insurance in England, (32) 489.  
 intestinal flora of, (30) 673.  
 Irish draft, breeding, (26) 369.  
 judging, (27) 373; (33) 71; (36) 597; (37) 94.  
 jumping conformation, (29) 874.  
 labor requirements, (36) 790.  
 lameness in, (36) 280.  
 lateral cartilages of, (30) 784.  
 lavocat for, (30) 67.  
 lessons on, (27) 96, 394.  
 lice control on, (40) 684.  
 light breeds, (39) 479.  
 light, eugenics and breeding, (26) 770.  
 limb tendons of, (29) 870.  
 localization of pigment in, (27) 369.  
 maintenance requirements, (26) 665.  
 manual, (26) 165.  
 marsh, of eastern North Carolina, (28) 772.  
 meaning of breed, race, and type, (28) 469.  
 measurements, (26) 875; (28) 271, 367, 571, 767,  
 772, 874; (32) 262, 263.  
 mechanism of stomach, (28) 367; (30) 673.  
 microorganisms in conjunctival sac of, (26) 176.  
 Mongolian, notes, (26) 668.  
 mucous membrane of, (26) 480.  
 nervous diseases of, (31) 286.  
 oat substitutes for, (39) 274.  
 of Camargue, history and characteristics, (28)  
 367.  
 Catanduanes Islands, (27) 771.  
 East Prussia, measurements, (30) 269.  
 Guam, (30) 69.  
 South Oldenburg, (32) 263.  
 Tunis, description, (27) 571.  
 oil cakes for, (38) 672.  
 on farms in United States, (31) 167.  
 origin and distribution, (31) 564.  
 Para grass for, (40) 366.  
 paralysis in, (26) 185.  
 parasitic affections of, (35) 489.  
 Percheron—  
   at International Livestock Show, (31) 270.

Horses—Continued.

 v. tractors for farm power, (31) 186; (32) 589  
 v. tractors for hauling gravel, (35) 495.  
 value as affected by age, (35) 891.  
 weights and measurements, (31) 269.  
 wheat bran for, (40) 670.

- Horses—Continued.  
 wild, in Nevada, (26) 369.  
 wild, of Argentina, origin, (31) 269.  
 winter ration for, (32) 462.  
 work, pasture for, (39) 479.  
 Zmudian, notes, (27) 875.
- Horseshoeing—  
 handbook, (37) 476; (32) 185; (36) 182.  
 history of, (31) 488.  
 textbook, (31) 887.  
 treatise, (29) 292, 682.
- Horsetail eradication, (27) 733; (31) 741.
- Horsetail, poisoning of horses by, (29) 281.
- Horsine, nature and use, (26) 580.
- Horticultural—  
 associations in Netherlands, (27) 798.  
 courses, notes, (29) 41; (31) 897.  
 courses, sequence and development, (28) 639.  
 education—  
 demonstration orchards in, (29) 41, 94.  
 in Austria-Hungary, (29) 100.  
 in Netherlands, (27) 798; (29) 898; (37) 193.  
 in United States, (29) 791.  
 papers on, (27) 200.  
 report on, (31) 239.  
 examinations in England, (31) 791.  
 exhibition at Chelsea, England, (27) 200.  
 exhibition, royal international, (27) 200.  
 exhibits for fairs, (30) 197.  
 experimental fields in South Holland, report, (29) 145.  
 experimental work in Denmark, (34) 696.  
 fairs and exhibitions in United States, (28) 796.  
 flora of Mindanao, (28) 235.  
 gardens at Lucknow, report, (27) 39, 537; (34) 232.  
 industries in Germany, (27) 144.  
 industry in Ghent, Belgium, (29) 338.  
 inspection in Colorado, (27) 756.  
 inspection law in Colorado, (28) 238, 450.  
 institution at Dahlem, report, (28) 794.  
 institution in Wales, (26) 496.  
 institutions in Germany, (30) 898; (31) 392.  
 institutions in Netherlands, (33) 790.  
 instruction—  
 in Belgium, (26) 794; (27) 694.  
 continuation schools, (28) 795.  
 Netherlands, (27) 694.  
 Ontario, (30) 595, 596; (34) 196.  
 Proskau, (32) 691.  
 Prussia, (30) 793.  
 notes, (30) 494.  
 papers on, (40) 195.  
 investigations—  
 in Alaska, (33) 637.  
 in America, (28) 639.  
 in United States, retrospect, (35) 234.  
 notes, (40) 42.  
 law in Arizona, (29) 341.  
 laws in California, (27) 344; (38) 142.  
 laws in Washington, (37) 342.  
 opportunities for educated women, (34) 492.  
 practice, nutrition basis for, (40) 147.  
 products, marketing, (26) 741.  
 products, preservation, (26) 117.  
 school at Vilvorde, (27) 200.  
 school for women in France, (30) 200.  
 school, of Hohenheim, (28) 193.  
 science, papers on, (39) 541.  
 societies in Pennsylvania, (37) 888.  
 societies in United States and Canada, (27) 144.  
 students, inspection trips for, (35) 498.  
 varieties, propagation by vegetative means, (35) 141.  
 winter schools in Germany, (35) 194.  
 work at Woburn farm, (29) 638.  
 work, notes, (29) 235.
- Horticulture—  
 and the war, (40) 833.  
 elementary, manual, (40) 795.  
 encyclopedia, (32) 436; (36) 137.  
 European, application of science in, (29) 41.  
 extension work, (40) 833.  
 graduate work in, (35) 498, 591.  
 handbook, (27) 644; (31) 832.  
 home projects in, (40) 296.  
 in America, (39) 541.  
 Belgium, (30) 141.  
 Denmark, (29) 693.  
 Netherlands, (28) 838.
- Horticulture—Continued.  
 in New Zealand, (32) 437.  
 Philippines, (27) 537.  
 laboratory manual, (33) 899.  
 north European, notes, (28) 639.  
 notes, (27) 742.  
 on German moorlands, (26) 136.  
 progress in, (31) 239.  
 relation to climate, (29) 40.  
 review of literature, (30) 40.  
 school lessons on, (32) 597; (35) 592.  
 summer practice course in, (34) 292.  
 teaching, (40) 898.  
 textbook, (29) 193; (35) 499.  
 tropical, treatise, (30) 532.  
 use of electricity in, (26) 136.
- Hospital, cooperative, in rural districts, (31) 294.
- Hot—  
 water heating systems, notes, (31) 893.  
 weather of 1911 in Kansas, (26) 214.  
 wave in Los Angeles, (30) 417.  
 wave in Middle West, (30) 417.  
 wave in southern California, (38) 210.
- Hotbeds—  
 construction, (31) 393, 791; (34) 494.  
 construction and management, (28) 694, 838;  
 (30) 532; (32) 140, 834; (34) 40, 737; (35) 234, 445;  
 (37) 41; (39) 39.  
 construction and use, (27) 491; (33) 297.
- Hotels—  
 inspection, (26) 868; (31) 359; (32) 357.  
 inspection in—  
 Indiana, (34) 861.  
 Missouri, (33) 164.  
 Montana, (33) 67.  
 South Dakota, (29) 567; (33) 67.  
 Utah, (33) 165.  
 Virginia, (29) 766; (32) 661.  
 law in Florida, (33) 165.
- Hothouse milliped, studies, (37) 667.
- Hottest region in United States, (34) 118.
- House—  
 cleaning, rules, (28) 694.  
 drainage, intercepting traps in, (28) 591.
- fly—  
 as carrier of *Davainea cesticillius*, (40) 359.  
 as host of chicken cecidæ, (35) 577, 683.  
 bacteria carried by, (26) 251; (28) 356.  
 baits and poisons, tests, (31) 455.  
 biology, (33) 860.  
 breeding habits, (26) 861; (31) 455; (36) 57;  
 (39) 861.  
 chemotropic response of, (35) 466.  
 control, (26) 758, 899; (30) 756; (31) 158, 455;  
 (35) 259, 466; (36) 656; (38) 160; (39) 867.
- fly, control—  
 by maggot trap, (39) 562.  
 in Cleveland, (31) 654.  
 in Minnesota, (28) 653.  
 in New Jersey, (32) 551.
- fly—  
 destruction, (27) 457.  
 development and auto-destruction in  
 horse manure, (35) 660.  
 dispersion under city conditions, (36) 56.  
 distance of flight, (30) 159, 757, 855; (31) 352.  
 effect of metamorphosis on bacteria, (29) 357.  
 extermination, (30) 757.  
 food preference, (36) 855.  
 handbook, (28) 560; (29) 656; (34) 855.  
 hibernation, (29) 559; (30) 757; (34) 254; (35)  
 259; (36) 553; (38) 61, 262; (39) 263.  
 intermediate host of *Monopylidium in-*  
*fundibulum*, (26) 561.  
 larvae, destruction, (33) 455.  
 larvae, fate of *Ankylostoma ova* in, (39) 468.  
 larvae, migratory habit, (30) 756.  
 larvae, parasites of, (30) 457, 552.  
 lesser, at Leeds, England, (30) 658.  
 life history and remedies, (37) 560, 853.  
 maggot trap, (33) 156.  
 notes, (26) 59; (29) 353; (30) 457; (31) 63; (32)  
 60; (33) 455; (38) 60.  
 oviposition as affected by chemicals, (38)  
 563.  
 parasite of, (29) 359.  
 persistence of *Bacillus pyocyaneus* in, (26)  
 61.  
 poisons and repellents for, (33) 860; (40) 859.  
 predacious enemies of, (30) 554.

## House—Continued.

- fly—continued  
 preoviposition period, (34) 654.  
 pupation and overwintering, (33) 656.
- fly, relation to—  
 city garbage, (28) 255.  
 diseases, (31) 852.  
 helminthic diseases, (36) 657.  
 human diseases, (27) 862.  
 leprosy, (29) 457; (31) 851; (36) 554.  
 plague, (33) 456.  
 plague-like disease of rodents, (34) 355.  
 poliomyelitis, (28) 753; (33) 262.  
 public health, (26) 61.  
 surra, (31) 777.  
 temperature, (33) 860.
- fly—  
 response to ammonia and other substances, (36) 156.  
 response to foods and their fermentation products, (37) 159; (39) 762.  
 seasonal abundance in Montana, (37) 764  
 sense reactions, (40) 859.  
 studies, (37) 655; (38) 362.  
 transmission of anthrax by, (26) 678; (28) 678, 756.  
 transmission of trypanosomes by, (26) 656, 884; (27) 457.  
 transmission of typhoid fever by, (28) 356; (37) 854.  
 treatise, (33) 561; (35) 57.  
 wind-forced migration, (39) 861.
- fumigation experiments, (39) 161.  
 sanitation, manual and bibliography, (28) 566.  
 servants, training, (31) 490.
- Household—  
 accounting—*see also* Home economics.  
   course in, (34) 94.  
   notes, (33) 662.  
   on the farm, (39) 594.  
 accounts, manual, (40) 659.  
 biology, primer, (38) 898.  
 budgets, blanks for, (34) 257.  
 business of, treatise, (40) 796.  
 chemistry, textbook, (40) 493.  
 conveniences, (29) 362; (31) 186, 299; (34) 789; (39) 165.  
 decoration and furnishing, notes, (26) 394.  
 efficiency, paper on, (29) 465.  
 equipment, conservation, (40) 595.  
 equipment, selection, (33) 261.  
 exhibits, suggestions for, (30) 496; (32) 597; (34) 94.
- Insects—  
 hydrocyanic acid gas for, (32) 846.  
 notes, (26) 59; (30) 462; (37) 459.  
 remedies, (32) 650; (38) 258.  
 treatise, (32) 449.  
 management, teaching, (34) 92.  
 management, textbook, (31) 298.  
 mechanics, treatise, (36) 891.  
 physics, teaching, (40) 492.  
 power conveniences, notes, (31) 186.  
 science, degree course, (39) 199.  
 thrift in, (40) 96.  
 waste, analyses, (38) 625, 626.  
 waste ashes, analyses, (39) 730.  
 waste, disposal, treatise, (34) 790.
- Housekeeping—  
 conditions among Pennsylvania Germans, treatise, (34) 257.  
 handbook, (28) 763.  
 instruction in, (28) 599, 795.  
 notes, (28) 461; (31) 299.  
 school at Mährisch-Schönberg, (31) 392.  
 schools in Norway, (27) 195; (29) 597; (32) 92; (37) 294; (38) 794.  
 textbook, (27) 96; (33) 598.
- Houses—  
 anchoring in overflow districts, (31) 488.  
 dampness in, (33) 490.  
 disinfection, (32) 456.  
 disinfection with formaldehyde, (32) 683.  
 fire hazard in, (36) 687.  
 for prairie farms, (35) 690.  
 fumigation, (28) 352; (29) 640; (33) 59.  
 heating, (26) 299; (31) 93; (34) 789; (35) 588.  
 heating boilers, tests, (31) 489.  
 heating with electricity, (33) 67, 461.  
 modern improvements for, cost, (31) 291.

## Houses—Continued.

- planning and furnishing, (33) 495.  
 regulation of humidity in, (30) 490.  
 screening, (31) 292.
- Housewives, cooperation among, (32) 89.  
 Housework, manual, (39) 195.  
 Housing and town planning, manual, (31) 293.  
 Housing in rural districts, treatise, (33) 893.  
 Houstonia coerulesa as affected by top dressing, (26) 40.
- Hover flies, economic importance, (40) 356.  
 "Huaicu," notes, (31) 285.
- Huckleberries—  
 acidity, (32) 110; (37) 715.  
 breeding experiments, (36) 443.  
 cost of distribution, (29) 492.  
 drying, (37) 509.  
 garden, cell number in, (27) 733.  
 wood structure, (39) 243.
- Huckleberry juice, preparation, (33) 317.  
 Hudu tonkli tubers, analyses, (31) 366.  
 Huisache girdler, studies, (33) 63.  
 Huisache, notes, (29) 441.
- Human—  
 duodenal contents, lipolytic properties, (31) 761.  
 energy, rational utilization, (31) 861.  
 jaw, power of, (26) 360.  
 nutrition, treatise, (32) 663; (33) 662.  
 serums, antiguinea-pig hemolytic activity, (35) 679.  
 throat, streptococci from, (28) 674.
- Humates—  
 assimilation by plants, (26) 32.  
 effect on plant growth, (30) 323.  
 soluble, as source of nitrogen for plants, (30) 721.  
 soluble, effect on nitrogen fixation, (30) 431; (31) 516.
- Humic acid—  
 assimilation by plants, (26) 32.  
 behavior toward anions, (34) 324.  
 nature of, (35) 120.  
 notes, (28) 409, 518; (36) 622.
- Humic—  
 bodies, formation from organic substances, (34) 515.  
 fertilizers, nitrifying capacity, (28) 124.  
 substances, formation, (32) 19.
- Humicola n.g. and n.spp., descriptions, (34) 226.  
 Humidification, artificial, in textile mills, (31) 70.
- Humidity—  
 and vapor pressure over United States, (37) 314.  
 as affected by forests, (29) 842; (31) 415.  
 coefficient of, (29) 626.  
 determination, (27) 315; (31) 22.  
 determination in greenhouses, (33) 638.  
 effect on—  
   alfalfa, (31) 629.  
   gaseous metabolism, (27) 869.  
   grapes, (29) 839.  
   heat transmission, (38) 87.  
   human body, (34) 464.  
   insects, (37) 254.  
   metabolism, (31) 362, 363.  
   seedlings, (33) 826.  
   the organism, (32) 765.  
 in Death Valley, (29) 722.  
 measurement, (34) 416.  
 of air of mines, (29) 121.  
 regulation in houses, (30) 490.  
 regulator, description, (29) 107.  
 relation to—  
   forests, (36) 843.  
   greenhouse culture of roses, (34) 44.  
   haze, fog, and visibility, (29) 120.  
   plant transpiration, (31) 222.  
 seasonal, effect on structure of tropical plants, (31) 221.  
 studies, (33) 806.
- Humification, notes, (36) 622.
- Humic—  
 formation, (36) 412.  
 nitrogen, determination in feeding stuffs, (40) 510.  
 nitrogen of protein hydrolysis, origin, (35) 311; (36) 108; (38) 201.  
 notes, (27) 671.  
 of protein hydrolysate, (39) 611.  
 substances, treatise, (34) 708.
- Hummingbird, Costa's, (40) 646.

- Humulol** from hops, (31) 311.
- Humulus lupulus**, sterile dwarfs in, (31) 130, 332.
- Humus**—
- acids—
    - and colloids of, (33) 609.
    - chemistry of, (26) 123.
    - effect on soil bacteria, (31) 521.
    - of Sphagnum turf, (27) 322.
    - review of literature, (28) 119.
    - studies, (26) 720; (29) 124; (35) 628.
  - action of neutral salts on, (39) 514.
  - analyses, (35) 128.
  - as affected by crop rotation, (27) 821.
  - guide to soil fertility, (37) 718.
  - source of carbon for green plants, (35) 131.
  - source of energy in nitrogen fixation, (32) 515.
  - assimilation by higher plants, (27) 26.
  - chemistry of, (30) 122.
  - chlorin index, (40) 619.
  - colloid chemistry, (27) 417; (32) 813.
  - constituents, (27) 500; (28) 29.
  - determination, (28) 19; (30) 205.
  - determination in soils, (26) 406; (27) 496, 499; (28) 123, 203, 204, 312; (29) 718, 796; (31) 110, 111; (33) 205; (34) 806; (35) 513; (36) 614.
  - distribution in California soils, (28) 197; (29) 415.
  - effect on—
    - availability of phosphoric acid, (26) 321.
    - Azotobacter, (38) 329.
    - nitrogen assimilation, (31) 120.
    - plant growth, (29) 417.
    - sandy soils, (31) 732.
    - solubility of phenolite, (29) 319.
    - weathering of silicates, (28) 322.
  - extract, effect in water culture, (28) 817.
  - fertilizing value, judging, (37) 216.
  - forest, effect on plant growth, (32) 618.
  - forest, use in agriculture, (29) 622.
  - formation, (35) 627; (36) 115; (38) 26, 27, 720.
  - formation—
    - and decomposition, (31) 120.
    - from sugar, (34) 515.
    - from vegetable compounds, (34) 516, 619.
    - in soils, (34) 811.
    - of black material of, (30) 28.
  - forming materials, effect on soil bacteria, (37) 120.
  - forming substances, rôle in soil absorption, (32) 319.
  - function in cultivated soils, (26) 422.
  - importance of, (31) 215.
  - in California soils, (30) 714; (34) 324.
  - dark soils, (33) 720.
  - Hawaiian soils, studies, (27) 7.
  - mulched basins, (38) 814.
  - soils, nature and maintenance, (30) 695.
  - loss from soils, (28) 217.
  - nature of, theories concerning, (32) 718.
  - nitrogen, and carbon ratios in soils, (28) 217.
  - notes, (37) 629.
  - of acid and alkaline peats, (30) 715.
  - of arid soils, nitrogen content, (34) 719.
  - of loess soils, (34) 806; (35) 511.
  - phosphoric acid of soils, (37) 121.
  - problem in dry farming, (28) 322.
  - production from manures, (37) 20.
  - relation to—
    - bacteria, (28) 727.
    - soil bacteria, (32) 721.
    - soil fertility, (36) 723; (38) 421.
  - review of investigations, (28) 518.
  - rôle in plant nutrition, (36) 31.
  - silicate, fertilizing value, (34) 19.
  - soils as affected by fertilizers, (28) 520.
  - soluble, effect on soil bacteria, (37) 517.
  - studies, (28) 203; (36) 512, 815.
  - substances, effect on weathering of silicates, (29) 123.
  - sugar, preparation, (36) 625.
  - sugar, relation to soil "sickness," (28) 520.
- Hunger**—
- control in health and disease, treatise, (36) 363.
  - nature of, (33) 566.
  - sensation of, (28) 864.
  - studies, (37) 166; (40) 270.
  - theories concerning, (27) 270.
- Hunterellus hookeri**—
- life history, (26) 863.
  - notes, (37) 360.
- Hunting**, review of literature, (27) 845; (30) 238; (33), 49.
- Hurricane**—
- at Pensacola, Fla., (26) 214.
  - Pacific, of September, 1915, (34) 413.
  - tracks, 1912-1915, (36) 419.
  - tropical, in Louisiana, (34) 413; (38) 511.
- Hurricanes**—
- effect on upper air current, (34) 413.
  - in Jamaica, (34) 615.
  - notes, (36) 19, 719.
  - West Indian, (29) 120; (38) 812.
- Hyacinth**—
- beans, yields, (39) 434.
  - bulbs, culture experiments, (30) 145.
  - bulbs, selection and planting, (30) 795.
  - diseases, treatment, (35) 51.
  - pollen, parasite of, (31) 641.
  - yellow disease, notes, (27) 45; (40) 844.
- Hyacinths**—
- as affected by stimulants, (26) 731.
  - nematodes affecting, (30) 448; (31) 450.
- Hyadaphis**—
- pastinacae, new name for, (39) 657.
  - umbellulariae n.sp., description, (26) 859.
- Hyalodema evansii**, notes, (27) 51.
- Hyalomma aegyptium**—
- hereditary infection in, (30) 460.
  - notes, (29) 58.
  - relation to Mediterranean coast fever, (34) 384
- Hyalopeplus pellucidus**, notes, (27) 155.
- Hyalospora polypodii**, studies, (27) 46.
- Hyalopterus**—
- arundinis—
    - cat-tail as summer host, (37) 461.
    - on Rosaceae, (32) 848.
    - remedies, (40) 161.
  - pruni in Egypt, (38) 158.
  - pruni, remedies, (32) 649.
- Hyalopus geophilus** n.sp., description, (33) 447.
- Hybrid, graft**, in apples, (30) 140.
- Hybridization**—see also Breeding, Animal breeding, Plant breeding, and specific animals and plants.
- and mutation as independent phenomena, (32) 326.
  - effect on maturity and yield in corn, (39) 31.
  - effect on water requirements of plants, (33) 726.
  - experiments with—
    - barley, (28) 431.
    - fruits, (28) 435.
    - rye and wheat, (30) 733.
    - strawberries, (29) 742.
    - tobacco, (27) 839.
  - likeness and relationship in, (26) 365.
  - mutations through, (33) 758.
  - natural, in Betula, (39) 30.
  - of animals in United States, (26) 163.
  - rôle in evolution, (37) 432.
  - spontaneous, in plants, (31) 823.
- Hybridizing**, analytical, paper on, (28) 570, 574.
- Hybrids**—
- animal, bibliography, (26) 163.
  - animal, fertility of, (26) 163.
  - equus, notes, (26) 269.
  - first generation, variation in, (30) 328.
  - graft, connecting threads in, (30) 433.
  - graft, description, (27) 31; (30) 329, 740.
  - graft, notes, (32) 726.
  - pigeon-dove, sterility in (27) 769.
- Hychlorite**, toxicity, (39) 586.
- Hydnum**—
- coralloides, fruiting forms, (32) 341.
  - coralloides, notes, (27) 653.
  - septentrionale, notes, (28) 56.
- Hydracids**, effect on starch, (26) 107.
- Hydraecia micacea** as a garden pest, (35) 853.
- Hydraulic**—
- computations, definitions and equivalents, (28) 186.
  - conversion tables and equivalents, (38) 187.
  - development and equipment, treatise, (37) 287.
  - ram, automatic, description, (27) 386.
  - ram, development in Germany, (26) 893.
  - ram, notes, (31) 291.
- rams**—
- construction and operation, (34) 885.
  - for farm water supplies, (35) 294.
  - installation and operation, (27) 589; (32) 87.
  - investigations, (28) 683

- Hydraulic**—Continued.  
rams—continued.  
notes, (27) 292.  
types of, (36) 89.
- Hydraulics**—  
in United States, (27) 188.  
primer, (27) 385.  
problems, notes, (27) 789.  
textbook, (37) 584.  
treatise, (28) 288, 588; (31) 383, 587; (35) 786.
- Hydrazin**—  
effect on blood fat and blood sugar, (36) 164.  
sulphate, effect on hemolytic reaction, (36) 878.
- Hydrellia griseola**, notes, (27) 560.
- Hydrin**, effect on butter and margarin, (26) 778.
- Hydriodic acid salts**, use against tuberculosis, (29) 481.
- Hydriomena spp.**, in Vancouver Island, (34) 651.
- Hydrocampa (Nymphula) nymphaeata**, notes, (37) 847.
- Hydrocarbons**—  
determination, (28) 511.  
fatty, development of fungi on, (29) 133.  
heavy, detection, (29) 529.  
isolation from plants, (26) 106.  
petroleum, absorption in the intestine, (29) 768.
- Hydrochelidon nigra surinamensis**, notes, (27) 355.
- Hydrochinon**, effect on cyanogen formation in plants, (28) 527.
- Hydrochloric acid**—  
effect on—  
action of maltase, (28) 504.  
bread fermentation, (27) 268.  
hemolytic reaction, (36) 878.  
mineral excretion of dogs, (38) 570.  
plants, (37) 224.  
rotatory power of sucrose and invert sugar, (37) 802.  
sprouting of potatoes, (32) 829.  
estimation, colorimetric scale for, (40) 505.  
forcing plants with, (28) 837.  
leaf injury or loss due to, (35) 243.  
salts, use against tuberculosis, (29) 481.  
toxicity, (28) 662.
- Hydrochloroplatinic acid**, preparation, (37) 409.
- Hydrocyanic acid**—  
determination, (32) 300; (34) 11; (35) 413, 503; (40) 804.  
determination in—  
beans, (27) 310; (36) 714.  
feeding stuffs, (33) 506.  
plants, (30) 709.  
sorghum, (37) 113.  
effect on—  
catalytic power of soils, (28) 118.  
hydrolysis in plants, (26) 531.  
plants, (39) 224; (40) 745.  
evolution from laurel leaves, (26) 228.  
evolution from linseed meal, (27) 276.  
for fumigation, preparation, (39) 161.  
formation—  
from proteins, (30) 802.  
in feeding stuffs, (28) 377.  
linseed cake, (28) 377, 378.  
plants, (31) 826.  
seeds, (27) 132; (35) 332.  
fumigation of plants with, (31) 57.
- gas**—  
as fumigant, (35) 53.  
as soil fumigant, (32) 245; (38) 457.  
detection, (38) 258.
- gas**, effect on—  
baking quality of flour, (26) 357.  
cotton, (35) 254.  
cucumbers, (30) 142.  
insects and plants, (37) 660.  
leaf-roller eggs, (40) 162.  
plants, (33) 522; (38) 330.  
scale insect eggs, (33) 855.  
subterranean larvae, (40) 256.  
tobacco, (31) 747.
- gas**—  
fumigating greenhouses with, (29) 41.  
fumigating machines for, (33) 556.  
fumigation, (27) 356; (28) 352; (29) 640; (34) 653; (35) 678; (38) 155, 158, 458.  
generation by portable machines, (34) 191.  
generator, (39) 256.
- Hydrocyanic acid**—Continued.  
**gas**—continued.  
insecticidal value, (34) 252.  
poisoning by, (39) 161.  
toxicity, (26) 864.  
use against household insects, (32) 846; (34) 854.  
use against mill insects, (30) 155.  
in Cassava, (33) 260, 665; (37) 168.  
cherry laurel, studies, (29) 133.  
flax, (28) 477; (30) 380.  
flaxseed screenings, (26) 86.  
fungi, (26) 228.  
grains in hot regions, (30) 30.  
haricot beans, (33) 866.  
Isopyrum spp., (39) 27.  
Johnson grass, (29) 869.  
kafir and sorghum, (30) 584.  
leguminous plants, (37) 28.  
Ornithopus spp., (34) 525.  
plants, (27) 635; (28) 36, 429; (29) 713; (31) 520; (39) 332.  
seed and stone fruits, (27) 11.  
sorghum, (27) 77; (33) 234; (35) 340; (40) 804.  
Tridens flavus, (35) 413.  
white clover, (30) 36.  
liberation from linseed, (35) 167.  
production by bacteria, (30) 802.  
relation to maturity of almonds, (26) 228.  
rôle in plants, (28) 128.  
utilization by plants, (31) 730.
- Hydroecia micacea**, notes, (26) 353.
- Hydroelectric**—  
development at Tallulah Falls, Ga., (27) 316.  
development in California, (34), 682.  
energy for irrigation pumping, (27) 889.  
power, treatise, (36) 783.  
works in United States, (27) 188.
- Hydrogen**—  
analysis, apparatus for, (40) 111.  
chlorid gas, effect on diastase and invertase, (31) 806.  
cyanid, detection, (26) 206.  
cyanid, determination, (28) 310.  
cyanid, in bird's foot clover, (27) 30.  
determination, (37) 803.  
dioxid, effect on soils, (28) 123.  
dioxid solutions, examination, (27) 208.  
electrode, description, (34) 712, 804.  
electrode potential as affected by pressure, (36) 503.  
peroxid—  
action on lactic acid and glucose, (28) 202.  
as food preservative, (30) 364.  
as oxidizer, (37) 409.  
as seed sterilizer, (29) 844.  
detection in milk, (34) 507.  
peroxid, effect on—  
amylase of human milk, (30) 311.  
autolysis of plant proteins, (26) 801.  
ferments, (28) 112.  
germination of seeds, (26) 820; (27) 201.  
glycerol, (29) 309.  
guaiac reaction in milk, (27) 507.  
invert sugar, (27) 812.  
milk, (29) 806.  
milk tests for formaldehyde, (30) 414.  
seeds, (27) 132.  
peroxid, hydrolytic action, (27) 712.  
peroxid, persistence in milk, (35) 11.  
peroxid, saccharification of starch by, (28) 19, 609.  
preparation and purification, (40) 607.  
sulphid—  
effect on concrete, (28) 589.  
generator, description, (39) 714.  
precipitation under pressure, (37) 712.
- Hydrogenation**—  
catalytic, in presence of carbon monoxid, (38) 409.  
of oils, treatise, (32) 416.
- Hydrogen-ion concentration**—  
determination, (35) 110; (36) 13, 111; (37) 50 6; (38) 225; (39) 9.  
effect on germination of Gramineae, (38) 24.  
effect on growth of barley seedlings, (38) 736.  
treatise, (32) 801.

- Hydrogen-ions, effect on—  
 baking quality of flour, (27) 166.  
 metabolism of *Aspergillus niger*, (30) 630.
- Hydrolysis, effect on nitrogen distribution in fibrin, (38) 310.
- Hydrolyzing agents, effect on starch, (26) 107.
- Hydrometeors, classification, (36) 19; (37) 115.
- Hydrometer for latex, (31) 444; (32) 48.
- Hydrophilus piceus*, digestive ferments of, (26) 657.
- Hydrophobia, *see* Rabies.
- Hydroquinone—  
 effect on soil microorganisms, (31) 27.  
 sterilization of soils by, (32) 816.  
 utilization by plants, (36) 329.
- Hydroscaphidae, catalogue, (26) 560.
- Hydrotaea—  
 dentipes, studies, (30) 457, 552.  
 meteorica in North America, (35) 759.  
 spp., studies, (37) 764.
- Hydrotaeas, new, (40) 263.
- Hydrotropism in lupine roots, (34) 223.
- $\alpha$ -hydroxybenzoic acid, notes, (31) 312.
- $\beta$ -Hydroxyglutamic acid, structure, (40) 611.
- Hydroxylamin—  
 assimilation by plants, (26) 32.  
 hydrochlorid, assimilation by plants, (26) 32.
- Hydroxyl-ion concentration, effect on growth of barley seedlings, (38) 736.
- Hydroxyl-ions, effect on clay, (31) 216; (32) 318.
- $\omega$ -Hydroxymethyl furaldehyde, production from carbohydrates, (34) 11.
- Hydroxypridins—  
 antineuritic properties, (35) 711; (40) 271.  
 curative forms, (37) 411.
- Hydrozetes, revision, (38) 460.
- Hygiene—  
 and diet in schools, treatise, (29) 363.  
 and preventive medicine, treatise, (38) 882.  
 and sanitation, military, textbook, (34) 369.  
 bibliography, (32) 760.  
 domestic, papers on, (30) 763.  
 handbook, (28) 461; (30) 63, 763.  
 in rural, suburban, and summer homes, (31) 387.  
 in schools, report on, (31) 261.  
 instruction in Germany, (26) 794.  
 public, legislation concerning, (26) 359.  
 race, notes, (27) 70.  
 treatise, (26) 65, 386; (40) 694, 866, 899.  
 tropical, treatise, (28) 78.  
 veterinary, treatise, (32) 79.
- Hygrometer—  
 chemical, description, (34) 208.  
 kite, improved, (37) 513.
- Hygrometry, improved methods, (37) 16; (38) 210.
- Hylastes ruber* n. sp., description, (35) 856.
- Hylastes trifolii*, notes, (31) 848.
- Hylastinus obscurus*, *see* Clover root-borer.
- Hylecoetus—  
 dermestoides, structure and biology, (28) 858.  
 sp., notes, (27) 458.
- Hylemyia—  
 antiqua, *see* Onion maggot.  
 coarctata, biology, (35) 460.  
 coarctata, notes, (27) 453, 552, 560; (31) 57; (32) 350; (40) 547.
- Hyles (*Deilephila*) *euphorbiae*, notes, (26) 656.
- Hylesinus—  
 n. spp., descriptions, (30) 757.  
 oleiperda, notes, (30) 455.  
 opaculus, notes, (27) 658.  
 spp., notes, (27) 59.
- Hyllobius—  
 abietis, bionomics, (26) 861.  
 abietis, notes, (32) 852.  
 abietis, studies, (30) 856.  
 pales affecting conifers in New England, (35) 747.
- Hylotrupes juniperi* n. sp., description, (34) 254.
- Hymenia—  
 fascialis, notes, (26) 250; (28) 158; (29) 456.  
 fascialis, studies, (26) 249.  
 perspectalis, notes, (28) 854.  
 perspectalis, studies, (29) 455.
- Hymenobosmina verimaculata* n. sp., description, (28) 162.
- Hymenochaete—  
 agglutinans, parasitism, (32) 640.  
 noxia, notes, (26) 851; (27) 451; (28) 241; (29) 547, 749; (31) 55; (33) 449, 741; (34) 442, 540, 744, 849; (35) 45, 251, 551; (36) 347, 746, 846; 851, 852; (38) 52, 53, 354; (39) 153, 849; (40) 53, 249, 349.  
 noxia on cacao roots, (37) 349.  
 noxia, on tea roots, (37) 52.  
 noxia, treatment, (29) 552.  
 rubiginosa, studies, (32) 845.
- Hymenolepis—  
 diminuta and *H. nana* siebold. life history, (37) 163.  
 n. spp., descriptions, (26) 561.  
 spp., dissemination by flies, (30) 659.
- Hymenomyces—  
 association with woody forest plants, (37) 727.  
 fruiting bodies, vitality, (30) 350.  
 on fruit trees, (37) 47.  
 relation to Uredinales, (28) 244.
- Hymenoptera—  
 American, notes, (36) 261.  
 chalcidoid, notes, (36) 60.  
 chalcidoidea, Australian, (39) 154.  
 described by Abbé Provancher, lectotypes of, (39) 663.  
 description, (36) 759.  
 leaf oviposition, (37) 162.  
 microsporidiosis in, (27) 459.  
 new, (26) 63; (30) 59, 661, 758; (31) 355; (36) 260.  
 new pteromalid chalcidoid genus from North America, (35) 857.  
 nidification, biology, and parasites, (27) 656.  
 of Australia, (28) 563.  
 British India, (37) 765.  
 Connecticut, (37) 765.  
 Georgetown Museum, British Guiana, (26) 63, 353; (32) 758.  
 Guam, (31) 62.  
 India, (31) 159.  
 parasitic—  
 habits, (34) 363.  
 immigrant in Hawaii, (40) 265.  
 new, (39) 566, 662, 663; (40) 61, 458, 761.  
 of Guiana, (39) 869.  
 on lac and sal insects, (31) 62.  
 polyembryony, (40) 265.  
 predacious and parasitic, notes, (36) 456, 461.  
 treatise, (26) 352.  
 vespid and sphecoid, in Guatemala, (34) 857.  
 W. M. Giffard collection, (37) 855.
- Hymenopterous—  
 egg parasite, adult habits, (40) 459.  
 parasites, minute, handling, (29) 658.  
 parasites, relation of food to reproduction and longevity in, (26) 457.  
 wing, horismology, (35) 262.
- Hymenoxys floribunda*, description, (39) 386.
- Hyoxyamus niger*—  
 breeding experiments, (30) 631.  
 oil, analyses, (36) 803.
- Hyperamblys albopictus*, life history, (32) 352.
- Hypera punctata*, *see* Clover leaf weevil.
- Hyperamblys albopictus*, notes, (30) 362.
- Hyperallus caliroae*, notes, (26) 153.
- Hyperaspis—  
 binotata larva, description, (36) 658.  
 binotata, studies, (35) 261.  
 lateralis, notes, (26) 149.
- Hyperdiplosis producta* n. sp., description, (27) 57.
- Hypericum perforatum*—  
 chemistry and anatomy of, (34) 522.  
 poisoning of horses by, (32) 278.
- Hypermallus rusticus*, notes, (28) 356.
- Hyperoides fragariae* n. g. and n. sp., description, (33) 159.
- Hyperplasia*, production in plants, (31) 326.
- Hyphantria cunea*, *see* Webworm, fall.
- Hypholoma fasciculare*, composition, (26) 750.
- Hyphomycetes—  
 enzymes in, (30) 241, 805.  
 iron-storing, studies, (27) 527.
- Hypoaspis armatus* n. sp., description, (38) 63.
- Hypochoeris radicata*, geographical distribution, (26) 335.

- Hypochlorite**—*see also* Chloramin-T and Dakin's solution.  
 applying automatically to sewage, (34) 390.  
 calcium, effect on glanders bacillus, (40) 478.  
 of lime in water, effect on vegetation, (29) 242  
 solution—  
   determining carbonic acid in, (39) 205.  
   indicator end-points, (39) 414.  
   studies, (39) 185, 786.  
 solutions—  
   alkaline, methods of analysis, (40) 113, 309.  
   antiseptic value, (40) 182, 284.  
   preparation, (40) 709.  
   prevention of blood clotting by, (40) 182.  
   stabilization, (40) 710.
- Hypochlorites**—  
 action on proteins, (36) 877.  
 and hypochlorite substitutes, (40) 284.  
 determination in solutions, (40) 410.
- Hypochlorous acid**, antiseptic action, (34) 675.
- Hypochnus**—  
 burnati n.sp., description, (35) 351.  
 cucumeris, notes, (26) 446.  
 sacchari, notes, (40) 157.  
 solani—  
   and Rhizoctonia solani, identity, (34) 443,  
   notes, (29) 152; (30) 47; (33) 849.  
   studies, (36) 847; (37) 47, 350.  
 sp., notes, (28) 649.  
 sp. on tea, (39) 452.  
 violaceus, notes, (29) 51.
- Hypochyrella oxyspora**, notes, (28) 545.
- Hypocotyl**, elongation, (28) 39, 739; (34) 134.
- Hypocotyl**, studies, (30) 331; (32) 520.
- Hypoderma**—  
 bovis, biology, (34) 881.  
 bovis, in Canada, (29) 357; (30) 552; (33) 775.  
 bovis, larval stages, (30) 254.  
 brachysporum, notes, (26) 345.  
 deformans n.sp., description, (35) 354.  
 larva, lateral spiracles in, (40) 62.  
 lineatum, biology, (34) 881; (39) 157.  
 spp.—*see also* Ox warble fly.  
   life history, (32) 60.  
   strobicola, notes, (26) 852.
- Hypodermella sulcifera**, notes, (26) 852.
- Hypolycaenaphilippus**, destructive to pineapples,  
 (29) 655.
- Hypomyces**—  
 ipomoeae on sweet potatoes, (31) 544.  
 pernicius, notes, (31) 843.  
 rubi, studies, (34) 352.
- Hyponomeuta**—  
 mallinellus—  
   biology, (32) 554.  
   bionomics and remedies, (30) 755.  
   notes, (33) 653.  
   remedies, (34) 355.  
 of Sweden, (37) 158.  
 padella, hymenopterous parasite of, (26) 658.  
 parasites of, (35) 559.  
 spp., notes, (32) 754.
- Hypophosphites**, determination, (40) 409.
- Hypophysin**, notes, (30) 578.
- Hypophysis extract**, effect on milk production, (30)  
 375; (37) 173.
- Hypoplasia mammaria**, effect on milk, (27) 176.
- Hypopteromalus**—  
 percussor n.sp., description, (38) 768.  
 viridescens, notes, (30) 59.
- Hypoter interjectus n.sp.**, description, (35) 262.
- Hypostena**—  
 sp., notes, (29) 52.  
 sp., parasitic on sugar cane borer, (34) 753.  
 tortricis, notes, (34) 556.
- Hypsulphites**, effect on metabolism and excretion,  
 (26) 69.
- Hypothenemus**—  
 ritchei n.sp., description, (39) 565.  
 tuberculosus n.sp., notes, (27) 458.
- Hypotherites nigrolineatus n.sp.**, description,  
 (30) 60.
- Hypoxanthin**—  
 effect on plant growth, (28) 324.  
 in hops, (32) 502.  
 in rabbit meat, (26) 563.
- Hypsometer**, description, (26) 442.
- Hypsometers**, tests, (36) 144.
- Hypsometric map of Russia**, (34) 118.
- Hypopygia costalis**, *see* Clover-hay worm.
- Hysopus officinalis**, oil of, (36) 803.
- Hysterium coffeanum**, notes, (38) 51.
- Hysteroneura setariae**, *see* Aphis bituberculata and  
 Aphis setariae.
- Ice**—  
 analyses, (33) 165.  
 and mercury, notes, (32) 810.  
 and salt, lowest temperature with, (31) 615.  
 bacteriological examination, (37) 468.  
 box, homemade, description, (36) 687.  
 chest, description, (27) 273.  
 conditions in Danish waters, (33) 717.  
 cream—  
   analyses, (28) 862; (30) 178, 678; (32) 162, 357,  
   856; (35) 176.  
   and ices, manufacture, treatise, (34) 860.  
   bacteria in, (34) 165; (35) 164; (38) 868; (40)  
   777.  
   bacteriological examination, (37) 468; (38) 75.  
   bacteriological standard, (28) 166.  
   binders and fillers, effects of, (36) 78.  
   brick, manufacture, (29) 376.  
   determination of fat content, (27) 497, 499;  
   (33) 16; (37) 507; (40) 81.  
   determination of overrun, (31) 875.  
   examination, (26) 461, 660; (27) 665; (28) 65;  
   (29) 59; (31) 556, 656.  
 cream factories—  
   computer for, (31) 276.  
   in Minnesota, (37) 777.  
   inspection in New Jersey, (32) 254.  
   law in Ohio, (33) 662.
- cream**—  
 fat standard, (27) 763.  
 freezers, tests, (33) 382.  
 from homogenized cream, (29) 879.  
 function of colloids in, (30) 476.  
 gelatin or gum in, (29) 865.  
 laboratory guide, (38) 281.  
 manufacture, (27) 179; (32) 253; (34) 859;  
   (36) 177; (40) 81, 675.  
 manufacture, treatise, (33) 65.  
 marketing, (32) 874.  
 overrun in, (33) 80.  
 plants, inspection, (31) 359.  
 plants, sanitary code for, (33) 81.  
 powders, examination, (26) 660; (30) 604.  
 quality as affected by gelatin, (36) 875.  
 recipes, (36) 79.  
 relation to typhoid fever, (28) 258; (34) 256.  
 sampling, (31) 210.  
 sampling for Babcock test, (30) 274.  
 smoothness and keeping quality, (33) 769.  
 standards, (26) 275; (29) 777; (32) 254, 356,  
   856, 873; (36) 561.  
 storage, (32) 356.  
 stores, inspection in Virginia, (29) 766.  
 studies, (31) 874; (32) 253, 660.  
 sugar substitutes in, (39) 183, 872; (40) 777,  
   802.  
   viability of streptococci in, (32) 174.  
 effect on atmospheric temperature, (31) 511.  
 effect on stream flow, (30) 318.  
 exudation from plant stems, (32) 221.  
 for cream cooling, (37) 592.  
 for the farm, (34) 892.  
 frazil and anchor, dissipation, (28) 716.  
 harvesting, (26) 386; (29) 88; (31) 92; (36) 687.  
 harvesting by electricity, (28) 187; (30) 892; (31)  
   291.  
 house, small, description, (38) 476.  
 houses, construction, (26) 386; (28) 788; (29) 88;  
   (30) 487, 489; (32) 591; (33) 80; (34) 892; (36) 390,  
   687; (38) 190, 292.  
 houses, description, (31) 93.  
 houses for prairie farms, (35) 689.  
 infectiousness, (32) 253.  
 manufacture, (27) 461.  
 of Greenland and its foehm, (38) 812.  
 patrol over north Atlantic Ocean, (31) 615.  
 precooling plant, description, (35) 391.  
 scald of fruits, studies, (29) 135.  
 storm in Illinois, (27) 413; (29) 121.  
 storm in Michigan, (35) 115.  
 storms, forecasting, (35) 808.  
 storms of New England, (32) 210.  
 supplies in railway stations and trains, (32) 456.  
 use in preserving foods in homes, (30) 165.  
 use on dairy farms, (32) 591.  
 vapor pressure, (38) 811.

- Ice-age question, (40) 811.  
 Iceberg debris, nitrifying organisms in, (30) 818.  
 Icebergs, melting, temperature associated with, (28) 716.  
 Iceerya purchasi, *see* Cottony cushion-scale.  
 Iceerya zeteki n.sp., description, (31) 251.  
 Ichneumon—  
   disparis, notes, (28) 455.  
   extrematis, notes, (29) 855; (31) 752.  
   flies—  
     from Java, (40) 458.  
     new, (26) 352; (30) 59; (36) 259.  
     north American, revision, (34) 454.  
     of America, (27) 662.  
     of Great Britain, treatise, (27) 359.  
     type species of, (30) 661.  
 koebeli, notes, (27) 656.  
 laetus, I. canadensis, and I. funestus, identity, (34) 657.  
 nigricornis, notes, (28) 654.  
   sp., parasitic on grapevine sphinx, (26) 250.  
 Ichneumonid parasites, correct names, (40) 760.  
 Ichneumonidae—  
   in British Museum, revision, (31) 656.  
   in Quebec, (36) 461.  
   of British India, (37) 765.  
   of Great Britain, treatise, (34) 657.  
   pimpline, studies, (34) 758.  
   revision, (27) 662; (30) 58; (35) 262.  
 Ichneumonoidea, families and subfamilies, (40) 65.  
 Ichthyura inclusa, notes, (26) 856.  
 Icterus bullocki, destruction of locusts by, (28) 351.  
 Idaecantha magna, notes, (28) 555.  
 Idaein, studies, (34) 709.  
 Idaho—  
   Station, notes, (26) 395; (27) 696; (28) 797; (29) 97, 794; (31) 795, 900; (32) 694, 797; (33) 496; (34) 797; (35) 596; (37) 397; (38) 797; (39) 694; (40) 98, 495, 600.  
   Station, report, (31) 795; (37) 95; (39) 397.  
   University, notes, (26) 393, 694; (27) 696; (28) 300; (29) 97, 794; (30) 497, 698; (31) 795, 900; (32) 694, 797; (33) 496; (34) 495; (35) 596; (36) 796; (37) 397, 497; (38) 399, 797; (39) 694; (40) 495, 696.  
 Idechthis nigricoxalis n.sp., description, (35) 292.  
 Idia fasciata, notes, (29) 354.  
 Idiocerus—  
   fitchi, notes, (35) 853; (37) 157.  
   gemmisimulans n.sp., description, (34) 657.  
   maculipennis, notes, (34) 752.  
   niveosparus, remedies, (38) 360.  
   provancheri—  
     biology, (34) 451.  
     life history, (35) 553.  
     notes, (37) 157.  
   scurra (I. gemmisimulans), studies, (38) 764.  
   sp., notes, (26) 857; (27) 453.  
 Idiogastra, new suborder, (40) 265.  
 Idiopteris nephrolepidis, notes, (28) 854.  
 Idris sp., notes, (31) 650.  
 Igenhauzia triloba, notes, (29) 441.  
 Igenames tubers, analyses, (28) 359.  
 Ignition, effect on solubility of soil phosphates, (26) 726, 803; (28) 312.  
 Iguana tick, studies, (40) 359.  
 Iguanias, blood parasite of, (26) 883.  
 Iteocystis spp., notes, (27) 883.  
 Ilex aquifolium, variations in salt content, (29) 28.  
 Ilex paraguayensis, culture, (32) 142.  
 Ilex parviflorus, reproduction, (39) 656.  
 Illinois—  
   Beekeepers' Association, report, (38) 164.  
   country life conference, (27) 399.  
   Pellagra Commission, report, (28) 663.

   Oregon, (31) 97.  
   public schools, (28) 15.  
   Rhode Island, (28) 497.  
 investigations in Basle, Germany, (28) 65.  
 products, inspection in Belgium, (27) 14.  
 resources of Texas, (33) 788.  
 schools in Korea, (30) 794.  
 training—  
   for boys and girls, (28) 499.  
   in Canada, (30) 596.  
   in colored schools of Kentucky, (30) 298.  
   in public schools of Indiana, (32) 595.  
 wastes, loss of fertilizers in, (37) 630.  
 work in Hamilton County, Indiana, (29) 394.
- Industry**, relation to education, (26) 296.
- Infantile**—  
 malnutrition, prevention, (35) 472.  
 paralysis—*see also* Poliomyelitis.  
   relation to insects, (36) 654; (28) 161; (35) 55, 280.  
   relation to stable flies, (29) 358, 559, 560.  
   studies, (39) 186.
- Infants**—*see also* Children.  
 adaptation of gastric juice to diet of, (32) 66.  
 amount of water required by, (29) 62.  
 and adults, digestion in, (34) 167.  
 artificial feeding and digestive disturbances, (32) 662.  
 boiled milk for, (30) 760; (32) 857.  
 care and feeding, (30) 763; (31) 360, 557, 660.  
 condensed milk for, (26) 81.  
 determination of surface area, (30) 669.  
 diet and care, (34) 861.  
 digestion as affected by starch and lactose, (33) 663.  
 digestion experiments, (34) 167.  
 dried milk for, (32) 760.  
 energy metabolism of, (33) 464.  
 energy requirements, (39) 876.  
 fasting, metabolism of, (30) 562.  
 feeding, (34) 258, 662; (36) 559; (40) 68, 269, 272, 364, 379, 462, 555, 560, 661, 869.  
 feeding—  
   and clothing, (32) 66.  
   and metabolism, treatise, (34) 460.  
   charts for, (31) 557.  
   dangerous practice in, (28) 259.  
   studies, (35) 165, 663.  
   treatise, (26) 763.  
 food requirement, (38) 267.  
 foods—  
   analyses, (35) 558.  
   determination of fitness, (31) 413.

## Infants—Continued.

## foods—continued.

- increasing fat content of, (32) 661.
- proprietary, composition, (32) 660.
- proprietary, nutritive value, (31) 461.
- proprietary, use, (32) 661.
- use of starch in, (28) 359.
- gaseous metabolism in, (32) 461.
- gastric and pancreatic fat digestion in, (29) 365.
- goat's v. cow's milk for, (32) 66.
- growth, as affected by maternal ingestion of placenta, (40) 566.
- growth of, (36) 263.
- importance of breast milk for, (30) 861.
- measurement of surface area, (35) 369.

## metabolism—

- and nutrition, studies, (34) 461.
- of, (34) 462; (36) 763.
- of calcium and phosphoric acid in, (29) 166.
- principles, (27) 767.
- review of literature, (35) 559.
- milk for, (26) 171; (32) 873; (36) 558; (39) 282, 883.
- modified milk for, (33) 163.
- mortality, notes, (27) 365.
- newborn, energy requirements, (32) 257.
- newborn, nutrition and growth, (40) 661.
- newborn, physiology of, (34) 861.
- nursing, as affected by change of diet, (31) 662.
- nutritional disturbances, (36) 865.
- pasteurized milk for, (31) 460; (40) 364.
- prenatal care, (31) 463.
- protein metabolism, (35) 766.
- protein requirement, (34) 68.
- raw milk for, (34) 659.
- respiration experiments, (30) 369.
- respiration incubator for, (32) 860.
- respiratory exchange of, (26) 766.
- respiratory metabolism in, (26) 69.
- role of mineral salts in metabolism, (29) 366.
- soy bean gruel for, (34) 859.
- soy beans and condensed milk for, (35) 556.
- stomachs, acidity of, (34) 167.
- stomachs, gastric secretion, (40) 71.
- summer diarrhea in relation to heat, (34) 462.
- tricalcium phosphate for, (32) 857.
- value of various sugars for, (31) 762.
- wey for, (33) 752.

## Infection—

- and immunity, treatise, (30) 878; (35) 573; (38) 482.
- and resistance, (39) 679.
- and resistance, treatise, (32) 270.
- hereditary, in cattle ticks, (30) 460.
- immunity, and specific therapy, textbook, (38) 781.
- immunity, and specific therapy, treatise, (33) 476.
- leucocytic reaction in, (26) 83.

## Infections—

- acute, in laboratory animals, (31) 479.
- mixed, serodiagnosis, (40) 288.
- of unknown cause, specific antisera for, (40) 678.
- relation to diet, (31) 464.
- specific therapy of, (31) 479.

## Inflammation products, effect on reaction of milk, (28) 680.

## Inflammations, nonspecific, of joints, (36) 676.

## Influenza—

- equine—see also Pleuropneumonia.
- etiology, (26) 587; (27) 86, 685; (31) 87; (36) 85.
- immunization, (26) 185.
- notes, (26) 373, 384; (27) 384; (37) 182; (39) 582.
- papers on (31) 176.
- pectoral form, (26) 787; (28) 483; (32) 278; (34) 681; (36) 182.
- pectoral form, immunization, (29) 482, 483; (31) 184; (33) 183.
- pectoral form, treatment, (29) 385, 483; (30) 285, 385.
- prevalence in Prussia, (27) 181.
- prevention, (34) 184.
- serum diagnoses, (40) 289.
- studies, (28) 184, 482; (30) 186; (31) 382; (39) 392, 492, 493.

## Influenza—Continued.

## equine—continued.

- treatment, (26) 288, 486; (27) 289, 685; (28) 287, 483; (32) 184, 379, 682; (33) 286; (35) 282; (38) 788.
  - virus carriers of, (30) 185.
  - in United States, (37) 274.
  - relation to bedbugs, (40) 548.
  - treatment, (31) 378.
- Infra-red rays absorption by soils, (34) 414, 817.
- Infusoria, purification of water by, (27) 317.
- Infusorial earth—
- analysis, (32) 424.
  - for filtering fruit juices, (33) 318.
- Inga laurina as a honey plant, (27) 856.
- Inga, revision, (36) 32.
- Ingenhouzia, glands of, (39) 431.
- Inheritance, see Heredity.
- Injuries, effect on seed germination, (26) 131.
- Ink berry, Chinese, host plant of fruit fly, (28) 758.
- Ino ampelophaga, notes, (31) 548.
- Inoculation experiments, celluloid cylinder for, (37) 549.
- Inodes exul n.s.p., notes, (28) 841.
- Inorganic constituents, determination in urine, (26) 161.
- Inosit—
- monophosphate in wheat bran, (32) 17.
  - occurrence in grape leaves, (27) 731.
  - phosphoric acid of—
  - cottonseed meal, (36) 299; (37) 502.
  - cottonseed meal and wheat bran, (29) 805.
  - feeding stuffs, (39) 14, 675.
  - phytin and phosphoric acid esters, (27) 406, 712.
  - utilization in the animal organism, (36) 365.
- Insanity among farm people, (32) 791.
- Insect—
- activity, relation to temperature and moisture, (30) 545.
  - and Pest Act, (28) 642.
  - behavior as factor in applied entomology, (37) 156.
  - blood cells, growth in vitro, (37) 759.
  - cages, wire, shading effect, (36) 455.
  - egg parasites, hosts of, (32) 246.
  - eggs as affected by spraying mixtures, (32) 449.
  - eggs, toxicity of volatile organic compounds to, (38) 888.
  - enemies of cotton-boll weevil, (27) 59.
  - flagellates, parasitic in vertebrates, (33) 862.
- galls—
- American, (33) 857; (40) 554.
  - descriptions, (39) 868.
  - in Europe, (30) 852.
  - morphology and biology, (29) 353.
  - notes, (31) 155.
  - of Ohio, (32) 557.
  - uses, (39) 154.
- larvae, arrest of growth, (31) 751.
- larvae as affected by heat, (28) 752.
- larvae, subterranean, fumigation, (40) 256.
- metabolism, influence of atmospheric moisture, (36) 855.
- migration, notes, (27) 452.
- parasites—
- cages for, (38) 566.
  - determining relations in mixed infestation, (40) 164.
  - inoculation of disease germs by, (26) 658.
  - introduction into Hawaii, (34) 548.
  - notes, (30) 454, 455, 753.
  - of domestic animals in Argentina, (26) 730.
  - of domestic fowls, (29) 253.
  - reproduction and longevity in, (26) 457.
  - studies, (34) 751.
  - parasitism, (27) 856; (30) 59.
  - pests of Egypt, (40) 856.
  - pests of the household, (38) 258.
  - pests, summary of information, (39) 255.
  - photography, apparatus for, (37) 156.
  - photography, notes, (27) 255.
  - physiology and morphology, notes, (27) 53.
  - powder, examination, (38) 207.
  - psychology, treatise, (27) 452.
  - p pae, temperature-metabolism curve, (32) 67, 766.
  - records, methods of taking, (31) 848.
  - survey of North Carolina, (39) 358.
  - trap for refuse box, (34) 60.
  - traps, illuminated, tests, (34) 851.
  - visitors of spirea and blackberry, (40) 547.

- Insectary, portable, (40) 752.
- Insecticide—  
 contact, new, (39) 462.  
 dealers, licensed, (27) 663.  
 decisions, (26) 65, 658.  
 emulsions, preparation, (26) 153.  
 law in California, (29) 852.  
 law in Montana, (28) 352.  
 law in New Jersey, (28) 352.  
 law in Ohio, (31) 740.  
 laws in United States, (36) 39.  
 laws, notes, (28) 642.  
 new, description, (36) 252.
- Insecticides—*see also* Sprays and specific forms.  
 analyses, (26) 65; (27) 441, 755; (29) 235; (31) 49,  
 142, 340, 740; (32) 169, 438; (33) 47, 735; (34)

  - Forestry Congress, report, (33) 541.
  - Institute of Agriculture, (29) 1; (30) 899; (33) 91; (39) 497, 690.
  - Institute of Agriculture, decade of work, (38) 701.
  - Irrigation Congress, (31) 88; (35) 885.
  - Ivstock exposition, (36) 199.
  - Meteorological Congress, (31) 213.
  - Phytopathological Congress, (30) 700; (31) 699.
  - Radiotelegraph Conference of 1912, (29) 120.
  - Refrigeration Congress at Vienna, (27) 460.
  - Road Congress, (34) 287.
  - Union of Municipal Dairies, (32) 773.
  - Veterinary Congress, (20) 373; (29) 100; (34) 575.
  - Zoological Congress, proceedings, (27) 655.
- Interpolation as means of approximation, (34) 796.
- Interstate Dry Farming Conference, report, (28) 633.
- Interstitial cells, studies, (39) 177.
- Intestinal—
  - auto-intoxication, relation to amines of organ extracts and body fluids, (34) 778.
  - diseases, studies, (39) 285.
  - flora—
    - as affected by milk feeding, (33) 460.
    - of cattle, (35) 76.
    - of man and animals, (26) 581.
    - regulation through diet, (40) 867.
    - relation to diet, (36) 664, 665.
  - impaction in calves, (26) 279.
  - inflammation, chronic, in bovines, cultivation of bacillus, (27) 482.
  - inflammation, specific chronic, in bovines, (28) 181.
  - juice of dogs, alkalinity, (29) 268.
  - movement, cause, (28) 567.
  - parasites of the dog, (40) 778.
  - protozoa, flagellated, (40) 186.
  - putrefaction as affected by water drinking, (34) 763.
  - trichinae, studies, (40) 476.
- Intestine, large—
  - absorption from, (28) 665.
  - enzymes of, (36) 366.
- Intestines—
  - absorption of fat in, (32) 563.
  - human, fermentation and putrefaction in, (30) 262.
  - methods of examining, (29) 408.
  - physiology of, (28) 763.
  - resorption of sugar in, (29) 268.
- Intoxication, leucocytic reaction in, (26) 83.
- Intracutaneous—
  - absorption, specificity, (28) 482.
  - reaction, diagnostic value for contagious abortion in cows, (29) 586.
- Intradermal test for tuberculosis, (30) 883.
- Intranephritis in domestic animals, (26) 176.
- Intumescences on plants, (39) 353, 355.

- Inulase**—  
 formation in *Aspergillus niger*, (40) 518.  
 in tobacco plant, (31) 204.  
 of *Aspergillus niger*, activity, (37) 203.
- Inulin**—  
 behavior toward hydrolyzing agents, (31) 314.  
 in chicory root, (38) 502; (40) 325, 727.  
 metabolism in chicory, (28) 821; (30) 432.  
 metabolism in plants, (34) 427.  
 saccharification by ultraviolet rays, (26) 802.  
 studies, (39) 202, 524, 732.  
 utilization by yeasts, (31) 224.  
 utilization in diet cures, (30) 464.
- Inulo-coagulase**, notes, (36) 127.
- Invalids**, goat's milk for, (32) 873.
- Invert activity**, determination, (40) 12.
- Invertase**—  
 absorption of hydrogen chlorid by, (31) 806.  
 action, kinetics of, (31) 108.  
 activity, influence of certain substances on, (34) 803.  
 adsorption, (35) 313.  
 as affected by sodium chlorid, (34) 408.  
 as affected by ultraviolet rays, (26) 203.  
 distribution in beets, (34) 524.  
 formation and regulation by mold fungi, (31) 730.  
 formation in yeast, (28) 202, 308.  
 from yeast, hydrolyzing properties, (32) 803.  
 hydrolysis of sucrose by, (30) 811.  
 in alfalfa, (32) 411.  
   *Aspergillus niger*, notes, (28) 727.  
   cane sugar, (36) 802.  
   potato leaves, (35) 334.  
   tobacco plant, (31) 204.  
 investigations, (31) 410.  
 occurrence in honey, (26) 710.  
 rôle of viscosity in action of, (26) 505.  
 temperature coefficients of decomposition, (26) 407, 504.
- Invertebrates**—  
 physiology of, treatise, (31) 154.  
 transmission of diseases by, (30) 249.
- Iodates**, determination, (34) 712.
- Iodids**, effect on caseification of milk, (28) 609.
- Iodimetry**, use of arsenious oxid in, (40) 609.
- Iodin**—  
 action on hypophosphorous and phosphorous acids, (40) 409.  
 and iodine preparations, (39) 387.  
 chlorid, antiseptic value, (40) 779.  
 compounds, relation to bacteria, yeast, and mold fungi, (29) 133.  
 compounds, use against spirochetosis in fowls, (29) 484.  
 determination, (27) 497.  
 determination in—  
   organic matter, (32) 505; (35) 11; (36) 561.  
   presence of chlorids, (35) 803.  
   presence of organic matter, (34) 504.  
   water, (29) 797.  
 effect on—  
   corn, (33) 522.  
   hemp, (33) 432.  
   saccharification of starch, (28) 609.  
   the circulation, (40) 274.  
 for breeding sows, (40) 155.  
 for hairlessness in pigs, (39) 187.  
 for prevention of goiter, (39) 187.  
 in foods, (35) 555, 761; (36) 561.  
   oil, germicidal power, (40) 882.  
   thyroid gland, (34) 580.  
   tuberculous tissue, (33) 283; (34) 580.  
 manufacture from seaweed, (27) 724.  
 titrations, source of error in, (34) 805.  
 toxic effect on plants, (38) 629.  
 toxicity, (39) 556.  
 use against hemorrhagic septicemia in cattle, (31) 780.  
 use in absorption of tuberculous and other tissues, (33) 677.  
 vapor, larvicidal value, (34) 359.
- Iodipin**, nature and use, (26) 580.
- Iodoantipyrin**, periodids of, (36) 313.
- Iodoform**—  
 antiseptic and germicidal value, (37) 176.  
 detection in ethyl alcohol, (29) 312.  
 insecticidal and larvicidal value, (34) 359.
- Iodotannic reagent**, (40) 610.
- Iole**, new. description (40) 351.
- Ionization** in war wounds, (40) 779.
- Ions**—  
 absorption by living and dead roots, (34) 334.  
 absorption by plants, (33) 521.  
 antagonistic activity, (28) 730.  
 diffusion and localization in plants, (31) 325.  
 effect on oxidative processes in the body, (33) 69.
- Iowa**—  
 Bee Keepers' Association, proceedings, (32) 852.  
 College, notes, (26) 194, 395, 694; (27) 197, 600, 697, 799; (28) 396, 696; (29) 97, 600, 698; (30) 796; (31) 99, 397, 496, 796; (32) 396, 694, 900; (33) 99; (34) 96, 396, 495; (35) 96, 300, 500, 900; (36) 499; (37) 196, 299, 600; (38) 198, 699; (39) 95, 695; (40) 696, 900.  
 Highway Commission, organization, (31) 800.  
 State colleges, closer union, (28) 792.  
 State Dairy Association, (30) 377.  
 State Drainage Association, proceedings, (33) 392.  
 Station, notes, (26) 494; (27) 197, 600; (28) 696; (29) 97, 600, 698; (30) 796; (31) 397; (32) 396, 694; (33) 99; (34) 96; (35) 900; (36) 499, 694; (37) 299, 497; (38) 198; (39) 95, 695; (40) 900.  
 Station, report, (35) 696; (37) 95; (40) 397.
- Ipecac alkaloids**, protozoocidal and bactericidal action, (38) 180.
- Iphiaulax clypeolus** n. sp., description, (26) 352.
- Ipidae**—  
 Canadian, economic importance, (31) 848.  
 injurious to tropical plants, (30) 660.  
 key, (39) 65.
- Ipobracon**—  
 grenadensis, notes, (40) 554.  
 saccharalis n.sp., description, (40) 554.
- Ipomoea**—  
 albivenia, fiber from, (39) 442.  
 batatas, analyses, (31) 863.  
 leari, leaf heteromorphy in, (34) 626.  
 pes-caprae, leaf development of, (30) 522.  
 purpurea, heredity in, (38) 750.  
 reptans as affected by seasonal humidity, (31) 221.
- Ips**—  
 n.spp., descriptions, (35) 856.  
 pini, notes, (30) 657.  
 pini, studies, (36) 554.  
 (*Tomicus*) radiatae n.sp., description, (34) 361.  
 tytophagrus killing healthy fir trees, (37) 465.
- Irbisia brachycerus**, notes, (29) 454.
- Iridomyrmex humilis**, see *Ants*, Argentine.
- Iris**—  
 borer, notes, (28) 157; (34) 752; (35) 54.  
 breeding, (36) 142.  
 culture in Alaska, (29) 743.  
 flowers, abnormalities, (37) 130.  
 flowers, oxidases in, (35) 130.  
 flowers, variation in, (35) 329.  
 germanica, chondriosomes of, (34) 524.  
 germanica, epidermal cells, (39) 528, 734.  
 germanica, oxidase in, (31) 626.  
 leaf blotch, studies, (34) 354.  
 leaf spot, studies, (30) 349.  
 pallida bacteriosis, studies, (26) 751.  
 pseudacorus, carotinoïd content, (31) 803.  
 rot, notes, (40) 844.
- Irises**, treatise, (26) 841; (28) 743.
- Irish**—  
 Agricultural Organization Society, report, (33) 593.  
 Milk Commission, report, (30) 679.
- Iron**—see also *Ferric* and *Ferrous*.  
 agricultural study, (40) 726.  
 and aluminum, separation, (33) 313.  
 and manganese, antagonism between, (33) 30.  
 and manganese, antagonistic action on wheat (36) 731.  
 arsenate, insecticidal value, (34) 60.  
 as antidote for cotton-seed meal poisoning, (29) 477; (34) 79; (38) 282, 370.  
 as growth stimulant for hemp, (33) 432.  
 assimilation by—  
   plants, (36) 633.  
   rice, (36) 431; (38) 728.  
 behavior during meat digestion, (28) 665.  
 chlorid, effect on activity of malt diastase, (29) 528.  
 colloidal, assimilation by rice, (32) 427.  
 compounds, inorganic, in chloroplasts of plants, (33) 627.

## Iron—Continued.

- compounds, solubility in soils, (34) 720.
- concentration in subsoil, (31) 720.
- content of cow's milk, (27) 412.
- content of urine, (27) 870.
- corrugated, in irrigation construction, (31) 90.
- deposition on mycelium of aquatic fungi, (26) 825.
- detection in cheese curd, (26) 315; (27) 811.
- detection in dairy salt, (27) 811.
- determination, (27) 409.
- determination in—
  - blood, (39) 507.
  - cane and beet sugar factory products, (29) 613.
  - foods, (29) 809.
  - milk, (26) 314; (27) 411; (28) 611, 808; (33) 875.
  - mineral phosphates, (34) 112.
  - organic substances, (31) 809.
  - plant substances, (33) 502.
  - plants, (29) 797.
  - soil, (33) 814.
  - water, (26) 709; (31) 502; (32) 504.
- effect on—
  - action of calcium cyanamid, (27) 500.
  - Aspergillus fumigatus, (29) 30.
  - Aspergillus niger, (30) 824.
  - chlorosis in plants, (29) 828.
  - color of apples, (28) 145.
  - concrete sand, (34) 787.
  - development of barley, (30) 728.
  - growth of molds, (27) 228.
  - growth of tubercle bacilli, (29) 381.
  - legume bacteria, (29) 733.
  - permeability (34) 34.
  - plants, (36) 520; (35) 727.
- ferrous, in soils, (30) 719.
- filings, effect on tomatoes, (29) 339.
- galvanized, for farm buildings, (28) 188.
- hematoid, compounds in plants, (35) 634.
- immobility in plants, (36) 123; (38) 728.
- in Florida soils, (32) 819.
- in soils, solubility, (39) 821.
- in tomatoes, (32) 762.
- movement in podzol soils, (30) 216.
- ore beds, formation, (26) 326; (27) 527.
- ore deposits in Virginia coastal plain, (29) 513.
- ore waste, fertilizing value, (28) 816.
- oxid, distribution in loam soils, (31) 618.
- oxid, effect on action of cyanamid, (28) 33.
- oxid, effect on germination of seeds, (29) 528.
- pan, formation in soils, (30) 719.
- phosphate as affected by calcium carbonate, (25) 527.
- phosphate, fertilizing value, (26) 428, 622; (31) 823.
- phosphate, solubility and availability, (37) 324.
- precipitating in presence of organic matter, (31) 417.
- precipitation by light and plants, (26) 326.
- pyrites, fertilizing value, (30) 627.
- relation to—
  - chlorosis, (33) 522.
  - conidia of Aspergillus niger, (26) 431.
  - grape chlorosis, (26) 344.
- removal from water supplies, (29) 617.
- rôle in biological oxidation, (28) 864.
- salts, action on plants, (39) 630.
- salts, compounds of, (28) 864.
- salts, detection in wood, (26) 242.
- salts, effect on—
  - ammonification and nitrification in soils, (31) 120.
  - catalase, (25) 504.
  - ferments, (29) 309.
  - nitric-nitrogen accumulation, (4,) 722.
  - solubility of phosphates, (37) 323.
  - toxicity of cottonseed meal, (29) 477; (34) 79; (38) 232, 370.
- salts—
  - reaction in presence of proteins, (28) 410.
  - toxicity in soil, (36) 515.
  - toxicity towards clover, (33) 328.
- separation from aluminum, (38) 10.
- solubility in soils, (38) 727.
- solution and precipitation in soils, (30) 718.
- sprays, effect on forage crops grown on manganese soils, (38) 829.

## Iron—Continued.

- sulphate, destruction of—
    - dandelions by, (31) 835.
    - horsetail by, (31) 741.
    - moss by, (31) 836.
    - weeds by, (26) 333, 839; (28) 838; (31) 532; (34) 228; (35) 340.
  - wild mustard by, (27) 536; (31) 44, 133, 739.
  - sulphate—
    - effect on plant growth, (35) 434.
    - effect on yield of beans, (34) 528.
    - fertilizing value, (26) 536; (30) 326; (31) 31; (33) 841.
    - for cottonseed meal-fed pigs, (31) 578; (36) 471.
    - injection into trees, (32) 754.
    - preparation and use, (40) 748.
    - use against fly larvae, (34) 160.
    - use against grape chlorosis, (27) 850.
    - use against grape white rot, (30) 543.
    - use against plant rusts, (27) 47.
    - use in orchards, (33) 857.
  - sulphid, effect on assimilation of rock phosphate, (29) 419.
  - sulphid, fungicidal value, (37) 48.
  - welding, (29) 593.
- Ironweeds, analyses, (20) 320.
- Ironwood—
  - as lignum vitae substitute, (40) 640.
  - black, fungus disease, (40) 160.
- Irpex flavus, notes, (28) 241; (31) 152.
- Irrigation—
  - address on, (26) 788.
  - alkali distribution by, (40) 719.
  - amount and frequency, (27) 87, 385.
  - and land settlement in Western States, (35) 885.
  - automatic, for truck gardens, (25) 382.
  - bibliography, (31) 287; (32) 588.
  - border experiments, (40) 484.
  - border, slope of land in, (32) 586.
  - by borders or sloping checks, (38) 487.
  - gravity, (26) 788.
  - lateral percolation, (30) 486.
  - pumping, handbook, (28) 889.
  - pumping in western Kansas, (29) 121, 181.
  - underground pipe, (39) 590.
  - "zaaidams," (31) 782.
- canals—
  - and laterals, plaster lining, (33) 886.
  - cleaning, (37) 285.
  - concrete-lined, construction, (35) 186, 490, 491.
  - concrete-lined, enlarging, (34) 388.
  - concrete lining for, (27) 890; (32) 380, 481.
  - construction of curves, (27) 788.
  - excavating with electrically driven dragline scrapers, (34) 885.
  - flow of water in, (33) 183; (35) 185.
  - gate structures for, (31) 782.
  - leakage, prevention, (37) 487.
  - lining, (27) 890; (37) 281.
  - metal flumes for, (30) 588.
  - plant growth in, (37) 281, 285.
  - plaster lining, (33) 886.
  - seepage losses, (33) 885, 886; (36) 585.
  - silt problem in, (32) 882.
  - transmission losses in, (34) 387.
  - use of current meters in, (34) 281.
- centrifugal pumps for, (28) 890; (31) 588.
- computations, definitions and equivalents, (26) 186.
- concrete in, (32) 787
- concrete pipe for, (36) 583.
- concrete pressure pipe line for, (28) 484.
- convoluted tube wells for, (29) 485.
- cooperation in, (27) 883.
- Deschutes project, (33) 880.
- development in United States, (26) 684.
- distribution systems, (37) 185.
- ditches, curves for velocity and discharge, (35) 787.
- ditches, determination of center, (31) 588.
- ditches, pasturing sheep on, (40) 472.
- drilling wells for, (32) 882.
- economic advisability, (37) 184.
- effect on—
  - action of fertilizers, (26) 522.
  - alkali soils, (26) 224; (28) 319; (34) 16.

## Irrigation—Continued.

 anthici n.sp., notes, (29) 357.  
 catalpae, see Catalpa midge.  
 inopis, notes, (29) 656.  
 opuntiae, notes, (33) 252.  
 tritici n.sp., description, (28) 657.
- Itonidae**, feeding habits, (26) 860.
- Itonididae**—  
 of Germany, (31) 158.  
 of New York, (34) 752.  
 studies, (28) 455.  
 zoophagous, list, (33) 255.
- Itoplectis**—  
 conqueror—  
 feeding habits, (29) 261.  
 notes, (28) 755; (31) 752.  
 parasitic on bud moth, (34) 250.  
 masculator, notes, (27) 562.  
 obesus n.sp., description, (38) 565.
- Ittys perditrix n.sp.**, description, (40) 760.
- Iva xanthifolia**, analyses, (34) 39.
- Ives tint photometer**, description, (36) 207.
- Ives tint photometer**, use, (37) 110.
- Ivory**—  
 nut meal, analyses, (38) 369.  
 vegetable, as a coffee adulterant, (28) 862.  
 vegetable, notes, (30) 46.  
 vegetable, studies, (33) 845.
- Ivy**—  
 ground, poisoning of horses by, (32) 278.  
 injurious effects on trees, (35) 636.  
 Japanese, Cladosporium disease of, (31) 347, 844.  
 scale, notes, (29) 654.  
 scale on olive, (38) 157.  
 volatile poison of, (31) 280.
- Ixia maculata**, bacteriosis of, (29) 844.
- Ixodes**—  
 angustus, life history, (30) 60; (31) 79.  
 holocyclus, destruction, (36) 678.  
 holocyclus, notes, (31) 679.  
 n.spp., descriptions, (27) 460.  
 putus, description of larval stage, (27) 361.  
 ricinus, notes, (28) 82; (40) 585, 587.  
 ricinus, occurrence in New Zealand, (26) 460.  
 ricinus, relation to louping-ill, (40) 384.  
 spp., notes, (27) 865; (29) 58.
- Ixodidae**—  
 biology, (29) 58; (34) 857.  
 North American, notes, (27) 460.  
 of Argentina, (38) 468.  
 of Brazil, (27) 361.
- Ixodiphagus caucurtei**, notes, (27) 564; (30) 255.
- Ixodoidea**, monograph and bibliography, (35) 263.
- Jaboticaba**, description, (31) 536.
- Jack bean borer**, notes, (33) 555.
- Jack beans**—  
 as cover crop (33) 535; (34) 736.  
 as green manure, (37) 320.  
 composition and digestibility, (33) 267.  
 culture, (30) 335; (32) 226.  
 culture experiments, (28) 136; (35) 528; (37) 729; (38) 827.  
 culture in Guam, (40) 328.  
 digestibility and productive value, (37) 865.  
 globulins of, (40) 308.  
 injurious to pineapples, (33) 535.  
 insects affecting, (27) 155.  
 notes, (28) 838; (31) 336.  
 proteins of, (37) 8.  
 urease content, (35) 612.  
 varieties, (30) 828.  
 yields, (39) 434.
- Jack cheese**, manufacture, (40) 576.
- Jack fruit**, analyses, (32) 761.
- Jacksals**, relation to canine piroplasmiasis, (28) 83.
- Jacks**—  
 advertising in Indiana, (31) 75.  
 breeding in United States, (39) 74.  
 care and management, (30) 772.  
 in Indiana, (37) 169; (39) 73.  
 Oklahoma, (37) 169; (40) 76.  
 Utah, (37) 681; (39) 73; (40) 473.  
 Wisconsin, (34) 470; (36) 473.  
 licensed, distribution, (26) 168.  
 licensed in Utah, (31) 471.  
 public service, in Wisconsin, (38) 275.  
 pure-bred, in Montana, (36) 470.  
 registration, (32) 771.
- Jaegers**, North American, distribution and migration, (34) 158.
- Jagzlekte** in sheep, studies, (33) 384.
- Jalalia**, culture experiments, (27) 336.
- Jalysus spinosus**, notes, (32) 753; (35) 657.
- Jams**—  
 adulteration, (29) 60.  
 analyses and adulteration, (33) 461.  
 examination, (28) 166; (30) 258.  
 preparation, (31) 315; (32) 253.
- Jand forests of Punjab**, (34) 46.
- Janus abbreviatus**, notes, (37) 255.
- Janus luteipes** injurious to osiers, (33) 659.
- Japan** current and climate of California, (31) 213.
- Japanese**—  
 beetle, see Popillia japonica.  
 beetle fungus, propagation, (29) 652.  
 boiled oil, analyses, (28) 493.  
 cane, see Sugar cane.  
 diet of, (26) 763.
- Jasmine**, yellow, poisoning of cattle, by (34) 80.
- Jassidae**—  
 hymenopterous parasites of, (34) 557.  
 North American, distribution and ecology, (27) 656.
- Jassidophthora n.g. and n.spp.**, descriptions, (27) 554.
- Jassoidea** of—  
 central Mississippi Valley States, (35) 853.  
 Maine, (33) 356.  
 Missouri, (35) 463; (37) 157.  
 North America, key, (30) 754.  
 Tennessee, (36) 654.
- Jassus sexnotatus** attacking rye, (34) 754.
- Jatropha curcas**, poisonous substances in seeds, (31) 775.
- Jaundice**—  
 infectious, see Spirochaeta icterohaemorrhagiae.  
 malignant, see Piroplasmiasis, canine.
- Java Sugar Station**, report, (26) 610.
- Javelle water**—  
 in treatment of wounds, (38) 585.  
 toxicity, (39) 586.
- Jay**, California blue, destructive to almonds, (29) 52.
- Jeffrey pine beetle**, notes, (26) 561.
- Jellies**—  
 adulteration, detection, (27) 806.  
 detection of added acids in, (32) 162.  
 examination, (28) 166; (32) 162.  
 examination methods, (39) 611, 612.
- Jelly**—  
 making, (29) 798; (35) 418; (37) 715; (39) 571, 806; (40) 414.  
 making, pectin test, (40) 558.  
 making, principles, (27) 463; (31) 299.  
 making with sugar savers, (40) 558.  
 pectins forming, (40) 202.  
 plant, culture experiments, (31) 441.  
 powders, examination, (30) 664.  
 preparation, (31) 315; (32) 253; (35) 419; (38) 114.  
 preparation and judging, (30) 259.  
 preparation from citrus fruits, (35) 113.
- Jennets**, care and management, (30) 772.
- Jerusalem corn**—  
 culture experiments, (28) 532.  
 drought resistance of, (28) 633.
- Jewish Agricultural and Industrial Aid Society**, (28) 688; (30) 693; (32) 893; (36) 894; (39) 89.
- Jimson weed** early blight, notes, (38) 451.
- Jimson weed**, notes, (30) 145.
- Jinja**, transmission by blood-sucking insects, (26) 150.
- Job's tears**, notes, (26) 361.
- Job's tears**, variety used as food, (40) 658.

- Johns's—**  
**bacillus—**  
 biology of, (31) 283.  
 caseation of tissues by, (33) 480.  
 culture, (27) 482; (28) 481.  
 pathogenicity, (29) 285.  
 specific agglutination and amboceptor for, (28) 179.  
 studies, (26) 783.  
**disease—**  
 and avian tuberculosis, relationship, (28) 476.  
 animals susceptible to, (29) 285.  
 complement-fixing antibodies in, (31) 882.  
 control in England, (36) 275.  
 diagnosis, (28) 179, 481.  
 in sheep, studies, (29) 81.  
 notes, (28) 181; (33) 180; (34) 184, 575; (39) 81, 582, 589.  
 occurrence and transmission, (36) 382.  
 pathological anatomy, (29) 284  
 studies, (26) 380; (28) 81, 82; (37) 479; (38) 282.  
 treatise, (32) 273.  
 treatment, (29) 587; (31) 283; (35) 76.
- Johnson grass—**  
 analyses, (30) 565.  
 and Sudan grass seeds, distinguishing characters, (35) 834; (37) 236.  
 as forage crop, (31) 829.  
 botanical notes and culture, (35) 640.  
 chloroform extract of, (31) 71.  
 culture experiments, (34) 227.  
 destruction, (27) 536.  
 eradication, (34) 227, 735; (37) 529; (38) 634; (39) 37, 736.  
 feeding value, (29) 869.  
 germination, (40) 222.  
 grades of, (34) 528.  
 hay, composition, (27) 668.  
 hay, digestibility, (27) 669; (37) 168.  
 hay, mineral constituents, digestibility, (40) 769.  
 root system, (36) 438.  
 seed, resistance to desiccation, (40) 39.  
 silage from, (39) 272.

 culture in—  
 Arizona, (32) 226.  
 Guam, (40) 327.  
 Montana, (33) 526.  
 southern Great Plains area, (33) 332.  
 Texas Panhandle, (29) 429; (35) 440.  
 depth of plowing tests, (40) 624.

## Kafir—Continued.

- digestibility, (37) 678.
- digestibility and productive value, (37) 865.
- drought resistance of, (28) 633.
- dwarf, digestibility, (36) 660.
- fats and fatty acids of, (38) 410.
- feeding value, (39) 71, 174; (40) 75, 278.
- fertilizer experiments, (34) 421; (40) 624.
- flour bread, tests, (27) 63.
- fodder, chloroform extract of, (31) 71.
- fodder, composition, (27) 668.
- fodder, digestibility, (27) 669; (37) 163.
- from South Africa, analyses, (34) 530.
- grades of, (32) 138.
- grain smut, notes, (29) 547.
- graphic summary of seasonal work, (39) 495.
- growing with legumes, (40) 822.
- head chop, analyses, (31) 563.
- hydrocyanic acid in, (30) 584.
- improvement, (40) 737.
- inosite phosphoric acids of, (39) 14.
- kernel, physical and chemical study, (39) 164.
- leaves, variation of water and dry matter in, (37) 637.
- meal, analyses, (31) 863; (36) 765.
- melon, analyses, (32) 166.
- milling and baking tests, (40) 361.
- mineral constituents, digestibility, (40) 769.
- notes, (26) 362; (31) 333.
- nutritive value and use in the diet, (29) 864.
- orange, notes, (30) 145.
- score card for, (31) 832.
- seeding experiments, (38) 630; (40) 522.
- silage for calves, (39) 71.
- smut, description and treatment, (32) 146.
- starch content, (35) 103.
- use in bread making, (34) 67.
- varieties, (37) 338; (39) 33.
- varieties for central and southern Great Plains, (35) 832.
- varieties for silage, (39) 134.
- varieties for Texas, (39) 838.
- water requirements, (32) 335.
- weight of heads, relation to number of whorls, (40) 330.
- weight ratios, (36) 131.
- wilting coefficient, (32) 335.
- yields, (40) 330, 331.
- yields of stover, (40) 330.

## Kafirin—

- chemistry of, (37) 8.
- hydrolysis, (40) 110.
- nutritive properties, (38) 570.

## Kaing grass, microscopy of pulp, (27) 315.

## Kainit—

- composition, (27) 422; (28) 819.
- destruction of weeds by, (29) 215; (31) 532, 739; (32) 138; (35) 340; (36) 639; (37) 446.

## effect on—

- coherence of soils, (31) 123.
- germination of salts, (29) 328.
- lime in soil, (33) 326.
- nitrogen fixation, (28) 816.
- resistance of grain to hail, (30) 519.
- soils, (30) 220.
- water conservation in soils, (33) 424.
- yield of cotton, (31) 136.
- fertilizing value, (26) 329, 330, 526, 537, 736; (27) 125, 429, 638, 725, 837; (28) 425, 832; (29) 126, 319, 335, 336; (30) 436, 636; (31) 226, 530, 820, 821, 829; (32) 630; (33) 432; (34) 22, 431; (38) 218, 816.
- for asparagus, (28) 339.
- corn, (32) 732.
- cotton, (31) 40.
- meadows, (33) 330.
- moor soils, (39) 438.
- sweet potatoes, (33) 337.
- hygroscopicity, (35) 631.
- imports into United States, (31) 726.
- Kalusz, analyses, (34) 424.
- nitrogen absorption capacity, (28) 325.
- use against cotton rust, (32) 735.

## Kaki, classification, (31) 639.

## Kakivoria flavofasciata on persimmon, (40) 52, 167.

## Kakothrips pisorova, notes, (37) 257.

## Kakothrips robustus, studies, (34) 450.

## Kala-azar—

- canine and human, relation, (32) 61.
- induced development of, (33) 862.
- monograph, (39) 683.
- notes, (27) 55.
- parasite, development, (28) 655.
- prevalence in India, (28) 655.
- studies, (37) 357.
- transmission by bedbugs, (26) 700.
- transmission by blood-sucking insects, (23) 159.
- Kalanchoe paniculata, analyses and digestibility, (32) 167.

## Kale—

- as forage crop, (39) 338.
- buda, as forage crop for sheep, (28) 267.
- coccinellids affecting, (33) 256.
- cooperative experiments, (29) 138.
- culture experiments, (32) 132; (36) 436.
- culture for forage, (33) 34, 632.
- culture for winter forage, (38) 735.
- fertilizer experiments, (26) 631; (30) 532; (32) 540; (35) 235; (36) 425.
- irrigation experiments, (32) 186.
- lightning injury to, (33) 149.
- marrow-stem, culture experiments, (36) 735.
- pollination experiments, (35) 342.
- Ragged Jack, notes, (27) 435.
- root-louse injury, (40) 60.
- sea, cooking, (31) 856.
- seed, growing, (40) 340.
- seed, home-grown, (38) 298.
- seed selection, (32) 827.
- seed, vitality, (27) 740.
- thousand-headed—
  - as forage crop, (38) 827.
  - culture, (27) 340; (32) 226.
  - culture experiments, (28) 531; (30) 632.
  - culture on muck soils, (33) 33.
  - v. marrow cabbage, (32) 827.
  - varieties, (29) 530; (31) 829.
- varieties, (26) 631, 835; (27) 32; (31) 829; (33) 33

## Kaliofenusa ulmi, notes, (27) 658.

## Kaliosyphinga—

- dohrnii, notes, (32) 550.
- ulmi—see also Kaliofenusa ulmi.
- life history and remedies, (29) 557.
- notes, (28) 57, 351.

## Kalmia latifolia, leaf blight of, (39) 253.

## Kangaroo—

- botfly, notes, (29) 761.
- grass, analyses, (27) 469; (30) 565.

## Kanker-bosje, culture experiments, (30) 632.

## Kanona tankage, availability of nitrogen in, (35) 427.

## Kansas—

## College—

- alumni record, (32) 895.
- history and growth, (30) 297.
- notes, (26) 395; (27) 197, 697, 900; (28) 300, 396, 494, 696, 900; (29) 97, 497, 698; (30) 198, 600, 796; (31) 197, 398, 796; (32) 396, 599, 900; (33) 300, 794; (34) 295, 695, 900; (35) 96, 300, 798; (36) 196, 499, 694; (37) 196, 497, 700; (38) 96, 299, 498, 699; (39) 95, 500, 599, 695; (40) 98, 497, 600, 798.
- Horse Breeders' Association, report, (29) 873.
- State Good Roads Association, report, (28) 786.
- Station, notes, (27) 197, 397, 600, 697; (28) 300, 494, 696, 900; (29) 97, 497, 698; (30) 198, 600, 796; (31) 197, 300, 496, 796; (32) 396; (33) 300, 794; (34) 295, 495, 695, 900; (35) 300, 798; (36) 196, 499, 694; (37) 196, 299, 497; (38) 96, 299, 498, 699; (39) 500, 695; (40) 98, 497, 798.
- Station, report, (34) 693; (36) 195; (38) 697; (40) 397.

## Kanten, chemical studies of algae used in, (40) 110.

## Kaoliang—

- analyses, (33) 361.
- as table food, (33) 361.
- covered kernel smut on, (39) 756.
- culture experiments, (29) 424; (32) 526; (33) 333; (36) 34; (40) 433.
- culture in Texas, (39) 838.
- culture in Texas Panhandle, (29) 430.
- description and culture, (32) 736.
- drought resistance of, (28) 633.
- feeding value, (39) 71.

- Kaoliang**—Continued.  
for pigs, (33) 380.  
grain, digestibility, (36) 661.  
notes, (28) 534.  
starch content, (35) 108.  
varieties, (37) 338.
- Kaolin**—  
adsorption in, (31) 814.  
determination of absorptive power, (31) 514.  
effect on linseed oil, (28) 714.
- Kaong**, culture and use, (32) 46.
- Kapok**—  
culture experiments, (30) 434.  
culture in German colonies, (31) 136.  
fiber, examination, (39) 442.  
fiber, use, (31) 735.  
industry, notes, (30) 233.  
insects affecting, (26) 354.  
notes, (26) 835; (30) 735; (31) 736.  
seed meal for cattle and pigs, (30) 868.  
seed oil, hydrogenated, properties of, (34) 9.  
trees of Togo, (30) 46.
- Karanj cake**, fertilizing value, (26) 631.
- Karite**, insects affecting, (28) 555.
- Karut**, analyses, (27) 268.
- Kastle, J. H.**, biographical sketch, (35) 596.
- Katabolism**, basal, studies, (39) 270.
- Katathermometer**, description, (33) 367.
- Katmai dust cloud**, duration, (30) 417.
- Katmai volcano eruption**, effect on atmospheric transparency, (29) 121.
- Katydids injurious to oranges**, (33) 451.
- Katyk**, microorganisms of, (26) 779.
- Kedani disease**, carrier, (37) 858.
- Keene forest**, description, (36) 243.
- Kefir**—  
analyses, (26) 171.  
and kefir whey, (40) 379.  
bacteriological characteristics, (31) 772.  
bibliography, (27) 75.  
food value, (33) 78.  
method of analysis, (31) 114.  
preparation, (29) 475.  
preparation and use, (27) 75; (34) 474.
- Keithia thujina**, studies, (36) 652.
- Kel grass**, analyses, (28) 768.
- Kelp**—  
analyses, (30) 724; (31) 823; (33) 107.  
as source of nitrogen, (33) 125, 206.  
as source of potash, (27) 22, 23; (30) 27; (31) 321;  
(32) 821; (33) 424, 819; (34) 821; (35) 327; (39)  
204, 521; (40) 128.  
California, organic constituents of, (33) 107.  
chemistry of, (32) 723.  
composition, (27) 421, 500.  
decolorizing carbon from, (40) 12.  
decomposition in soils, (35) 815.  
destructive distillation, (34) 328.  
distribution, (29) 322.  
fertilizer, analyses, (34) 521.  
fertilizing value, (29) 25.  
flies of North America, (40) 263.  
freshly cut, potash from, (29) 519.  
green, fertilizing value, (34) 219.  
industry in British Columbia, (39) 220.  
industry in British Isles, (33) 25.  
industry, notes, (27) 326.  
industry on Pacific coast, (30) 27.  
of Pacific coast, size, (34) 623.  
physiological conditions in, (34) 429.  
potash and other products from, (29) 128.  
production in United Kingdom, (31) 519.  
utilization, (26) 126, 526.
- Kemps**, studies, (26) 473.
- Kentia macarthurii**, leaf spot disease of, (36) 348.
- Kentucky**—  
Station—  
financial statement, (26) 598, 692.  
list of publications, (31) 899.  
notes, (26) 395, 600; (27) 397, 600, 697; (28) 600;  
(29) 97, 397, 794; (30) 396, 600; (31) 695, 796;  
(32) 396, 497; (33) 399, 900; (34) 96, 496; (35)  
96, 596; (36) 397; (37) 398, 896; (38) 699, 900;  
(39) 599, 695; (40) 98, 199, 497, 798.  
report, (31) 396; (34) 694; (38) 697; (39) 499.  
report of director, (26) 598, 692.
- University**, notes, (26) 395, 600; (27) 397, 600, 697;  
(29) 397; (30) 396; (31) 398, 695, 796; (33) 399;  
(34) 96, 496; (35) 397, 596; (37) 398, 497, 896; (38)  
699; (39) 599, 695; (40) 98, 199, 497, 696, 798.
- Keratin**, tryptophan in, (28) 411.
- Keratitis**—  
acute, notes, (26) 482.  
infectiosa in cattle, (37) 691.  
infectiosa in reindeer, (35) 488.  
infectious, studies, (40) 585.
- Kermes**—  
pubescens, chalcidoid parasites of, (26) 254.  
sasserri, notes, (37) 255.
- Kerosene**—  
adaptation to gasoline engines, (31) 187.  
as fuel for internal combustion engines, (30) 892.  
as substitute for gasoline, (32) 788.  
as wood preservative, (32) 841.  
carbureter, description, (31) 92; (38) 492.  
carbureters for, (36) 288.  
effect on corn, (32) 729.  
emulsion, new, description, (36) 252.  
engines, prevention of pounding in, (35) 585.  
for farm tractors, (32) 857.  
for internal combustion engines, (32) 687.  
illuminating power, (32) 487; (34) 488.  
lamps, tests, (27) 388.  
larvicidal value, (37) 464.  
motor, use in irrigation, (27) 290.  
oil, detection, (28) 412.  
power from, (29) 184.  
toxicity, (38) 760.  
tractor, notes, (27) 791.  
trap for fruit flies, (29) 656.  
trap, use against Mediterranean fruit fly, (34)  
360.
- Kerria japonica**, twig and leaf disease, (39) 253.
- Kerstiingella geocarpa**, notes, (30) 235.
- Ketohexoses**, detection, (37) 206.
- Ketonic function in metabolism**, (40) 464.
- Ketoses and aldoses**, separation, (28) 504.
- Khadi-ferment**, toxicity, (29) 460.
- Khaja senegalensis**, insects affecting, (28) 555.
- Khaki University**, notes, (39) 699.
- Kidney worms**—  
in hogs, (32) 479, 783; (37) 482.  
life history, (38) 882.  
localization and development in hogs, (29) 783;  
(31) 484.  
notes, (35) 878.
- Kidneys**—  
from tuberculous animals, changes in, (26) 379.  
heat production of, (30) 65.  
phosphatids of, (30) 477.  
work of, (26) 465.
- Kieselguhr-sulphite mixture**, fertilizing value, (33)  
820.
- Kikuyu grass**—  
culture experiments, (30) 632.  
notes, (37) 29.
- Killdeer**—  
destruction of locusts by, (28) 351.  
notes, (27) 355.
- King, Vernon**, necrological notice, (39) 200.
- Kingbird**—  
food habits, (28) 56; (38) 457.  
western, destruction of locusts by, (28) 351.
- Kingfisher**, ruddy, subspecies of, (35) 252.
- Kinghead**—  
analyses, (32) 169; (34) 39.  
effect on baking quality of wheat, (34) 558.
- Kinosternon pennsylvanicum**, notes, (40) 260.
- Kitchen**—  
economy, (40) 361.  
model French, (29) 362.  
waste, as a feeding stuff, (36) 367.
- Kitchens**—  
communal, (39) 367.  
construction and equipment, (35) 765.  
equipment, (28) 461; (32) 65.  
farm, water system for, (40) 789.  
heating with hot water, (31) 893.  
hotel and restaurant, regulations, (31) 857.  
planning, (28) 694.  
rolling, notes, (32) 562.  
traveling, descriptions, (29) 567.  
ventilation, (33) 68.
- Kite**, meteorological, evolution, (31) 213.
- Kites**, use in upper air exploration, (30) 416.
- Kjeldahl**—  
distillation apparatus, description, (34) 10, 203.  
flask, description, (36) 805.  
flask, modified, description, (32) 807.  
fume remover, description, (35) 612.

- Knapp Agricultural Day, notes, (28) 395; (32) 496.  
 Knapp, Seaman A., school and farm, (30) 495.  
 Knapweed, life history and bionomics, (32) 759.  
 Knop's nutrient solution—  
     composition, (28) 435.  
     preparation, (31) 426.
- Knots**—  
 and splices, description, (35) 495.  
 directions and illustrations, (27) 96.  
 hitches, and splices, making, (31) 590.  
 methods of making, (29) 390.
- Knotweed, toxic effect on pigs, (38) 589.
- Koch expedition across Greenland, (31) 213.
- Kochia**—  
 culture under shade, (27) 741.  
 prostrata, analyses, (33) 466.  
 salsoloids, analyses and digestibility, (27) 872;  
     (32) 167.
- Koch's granules, notes, (26) 882.
- Kohl-rabi**—  
 analyses, (27) 469.  
 combined fungus attacks on, (35) 245.  
 culture experiments, (36) 735.  
 culture in Rhodesia, (27) 32, 637.  
 culture on moor soils, (40) 523.  
 electrical stimulation, (40) 428.  
 fertilizer experiments, (26) 428, 631; (30) 428.  
 fields, weed control in, (40) 536.  
 food value, (36) 863.  
 mulching v. clean culture, (33) 534.  
 pollination experiments, (35) 342.  
 purin content, (40) 205.  
 varieties, (26) 631.
- Koji acid from *Aspergillus oryzae*, (30) 202.  
 Koji diastase, properties, (30) 806.
- Kokan timber, distribution and use, (38) 751.
- Koko tree as source of rubber and chicle, (28) 49.
- Kola**—  
 alkaloids in, (31) 358.  
 culture in Dutch East Indies, (30) 697.  
 insects affecting, (33) 153.  
 trees and nuts, treatise, (26) 139.
- Koosam oil, refining, (27) 210.
- Korra, culture experiments, (32) 227.
- Köszegi motor plough, description and tests, (28) 486.
- Kraal manure**—  
 analyses, (33) 821; (35) 328.  
 fertilizing value, (26) 133.
- Krafft's vaccine**—  
 use against hog cholera, (26) 383.  
 use against swine plague, (26) 184.
- Kra-kie**, notes, (26) 260.
- Kretzschmarie micropus, notes, (39) 452.
- Kriblon, composition and value, (28) 769.
- Kronoleum as wood preservative, (30) 647.
- Kronoleum n.g. and n.spp., descriptions, (26) 860.
- Kroo beans, culture experiments, (32) 227.
- Ktenol, analyses, (30) 555.
- Kudzu**—  
 beans, culture experiments, (33) 31.  
 culture experiments, (35) 337.  
 grass, yields, (29) 224.  
 hay, analyses, (26) 362.  
 vine, culture experiments, (27) 336.  
 vine Japanese, notes, (27) 528.
- Kuehneola**—  
 albida, biology and morphology, (27) 648.  
 albida, notes and treatment, (29) 50.  
 fici, description, (31) 145.
- Ku<sup>2</sup> pi<sup>2</sup>**—  
 and China wood oil tree, crossing, (35) 539.  
 oil, extraction and use, (28) 714.
- Kulthi**—  
 beans, culture, (32) 226.  
 beans, yields, (39) 434.  
 description, (30) 828.  
 liming experiments, (36) 229.  
 notes, (26) 362.
- Kumara, analyses, (28) 459.
- Kumiss**—  
 analyses, (26) 171.  
 food value, (33) 78.  
 microorganisms of, (26) 779.  
 preparation and use, (34) 474.
- Kumquats**—  
 Australian desert, notes, (31) 238.  
 classification, (32) 839.  
 culture in Guam, (30) 41.  
 culture in Texas, (38) 40.  
 monograph, (31) 48.
- Kumri disease in horses, studies, (38) 287.
- Kunkelia nitens n.g. and n.s.p., description, (38) 454.
- Kurloff body, nature, (30) 681.
- Kuromoji seed, oil of, (37) 109.
- Kutter's formula, retardation factor in, (33) 183.
- Kyanization plants, description, (30) 647.
- Kyllingia alba, analyses and digestibility, (32) 167.
- Kymograph for study of small animals, (32) 565.
- Kynurenic acid, effect on nutritive value of diet,  
     (36) 265.
- "La Mancha" in sheep, studies, (28) 182.
- La pataleta, notes, (30) 783.
- Laben raieb, composition, (36) 674.
- Labeo n.sp., parasitic on sugar beet leafhoppers,  
     (33) 747.
- Lablab**—  
 beans, anatomical structure, (28) 660.  
 culture and characteristics, (34) 436.  
 culture experiments, (32) 227.  
 culture in Egypt, (34) 232.
- Labor**—see also Agricultural labor.  
 camps, sanitation and housing for, (33) 691.  
 conditions in Great Britain, (26) 359.  
 costs and seasonal distribution in Utah Valley,  
     (40) 388.  
 exchange for English farmers, (26) 190.  
 in British Columbia, (32) 593.  
 incomes of farmers, (36) 491, 492.  
 manual, studies, (31) 861.  
 redistribution, (37) 290.  
 relation to energy requirement in food, (31) 862.  
 requirements of livestock, (36) 790.  
 saving devices for homes, (26) 790; (28) 566, 662.  
 saving in livestock production, (40) 73.  
 saving methods on the farm, (39) 794, 795.
- Laboratories**—  
 field, for research work, (33) 793.  
 small, for research work, (32) 306.
- Laboratory**—  
 animals, pathologic conditions, (38) 283.  
 conveniences, description, (36) 805.  
 methods of the Army, manual, (39) 786.  
 v. field experiments in soil biology, (36) 213.
- Laborers**—  
 Danish, standard of living, (32) 66.  
 diet, (32) 857.  
 diet in British Guiana, (30) 463.  
 diet in Spain, (32) 562.  
 families in Germany, diet, (26) 358.  
 farm, see Agricultural labor.  
 Finnish, living conditions, (28) 259.  
 food shops for in Christiana, (32) 856.  
 homes for, (31) 293.  
 in America and Europe, standard of living,  
     (26) 359.  
 in Germany, dietary studies, (28) 66.  
 in New Zealand, standard of living, (28) 863.  
 protein requirements, (33) 662.  
 sleeping house for, (34) 229.  
 standard of living—  
     in Chicago stockyards district, (32) 163.  
     in Holland, (32) 163.  
     in various countries, (31) 261.  
     value of small plat of ground to, (38) 792.
- Laboulbeniales, parasitic on Chrysomelidae, (33) 657.
- Labradorite, decomposition by soil bacteria and yeast, (31) 121.
- Lac**—  
 culture in India, (28) 654.  
 industry in India, (40) 550.  
 insect, notes, (26) 248.  
 tapping, (35) 347.
- Laccase, oxidizing influence on vegetable chromo-  
     gens, (34) 33.
- Lace bugs of Ohio, (36) 755.
- Lace bugs, remedies, (37) 256.
- Lace-wing**—  
 brown, notes, (32) 651; (34) 357.  
 fly, California green, (35) 757.  
 fly, notes, (32) 654.
- Lachnellula chrysophthalma, notes, (28) 750.
- Lachnoidius greeni n.s.p., notes, (32) 57.
- Lachnopus sp. notes, (26) 354; (38) 558.
- Lachnosterna—see also June beetle and Phyllo-  
     phaga.  
 implicata, notes, (34) 753.  
 larvae as food supply, (36) 57.  
 larvae, fumigation, (40) 256.

- Lachnosterna**—Continued.  
*patrucis*, notes, (27) 657.  
 revision, (35) 467.  
 spp., bacterial disease of, (32) 61.  
 spp., habits and control, (39) 565.  
 spp., notes, (26) 60; (29) 52, 561; (30) 656; (33) 351; (36) 753.  
 spp., oviposition, (38) 761.  
 studies, (35) 760.  
*tristis*, life history, (29) 359.
- Lachnus**—  
*curvipes* n.sp., description, (28) 60.  
*glehnus* n.sp., description, (35) 56.  
*juniperi*, notes, (27) 255.  
*juniperivora* n.sp., description, (40) 651.  
*parvus*, new genus for, (40) 651.  
*persicae*, remedies, (31) 155.  
*viminalis*, notes, (33) 554.
- Lacquers**, methods of examination, (29) 811.
- Lactade**, manufacture and use, (40) 379.
- Lactalbumin**—  
 composition, (38) 505.  
 determination in milk, (33) 16.  
 hydrolysis products of, (33) 867.  
 lysin content, (31) 559.  
 relation to color of milk fat, (31) 275.  
 tryptophan in, (28) 411.  
 value for growth, (37) 864, 865.
- Lactarius piperatus**, composition, (26) 802.
- Lactase**—  
 in alfalfa, (32) 411.  
 of mammary glands, (30) 204.
- Lactation**—  
 early, effect on development of animals, (33) 265.  
 effect on growth, (40) 877.  
 period, metabolism during, (31) 663.
- Lactescence** in plants, (32) 130.
- Lactic acid**—  
 as affected by—  
 hydrogen peroxid, (28) 202.  
 ultraviolet rays, (28) 201.  
*bacillus*, Bulgarian, notes, (28) 777.  
*bacillus* in butter, notes, (26) 478.  
 bacteria—  
 as affected by acid-destroying yeasts, (29) 8.  
 as affected by proteolytic products of auto-lyzed yeast, (39) 10.  
 biological properties, (31) 506.  
 classification, (28) 75; (34) 76.  
 classification and nomenclature, (35) 178.  
 culture, use in silage, (33) 467.  
 cultures, dried, preparation, (31) 773.  
 development in milk, (29) 172; (36) 475, 502.  
 effect on silage, (35) 373.  
 formation of p-oxiphenylethylamin by, (32) 503.  
 forms of, (29) 475.  
 heat resistance, (39) 78.  
 in dairy products, (28) 276.  
 in milk, origin, (34) 473.  
 in pasteurized milk, (36) 674.  
 proteoclastic power, (36) 673.  
 proteolytic activity in milk, (36) 476.  
 reciprocal action of, (28) 276.  
 relation to keeping qualities of butter, (39) 78.  
 resistance to pasteurization, (33) 675.  
 use in ensiling beet tops, (34) 767.  
 use in pickling cucumbers, (28) 616.  
 use in silage making, (32) 567, 767.  
 behavior in beef extract, (26) 408.  
 behavior toward oxidizing agents, (26) 25.  
 decomposition by yeasts, (37) 202.  
 determination, (27) 498.  
 determination in—  
 biological products, (36) 808.  
 organic substances, (32) 114.  
 presence of protein, (29) 309.  
 tomato products, (26) 25.  
 urine, (34) 613.  
 wine, (29) 119.  
 effect on—  
 baking quality of flour, (37) 861.  
 bread fermentation, (27) 268.  
 hemolytic reaction, (36) 878.  
 plants, (37) 224.  
 extraction with ether, (37) 414.  
 ferment therapy, description, (26) 173.  
 formation in incubated eggs, (28) 564, 711.  
 germicidal effect in milk, (33) 460.
- Lactic acid**—Continued.  
 in corn silage, (29) 712.  
 honey, (26) 25; (28) 166.  
 sisal, (29) 615.  
 sour milk, (39) 613.  
 wine, (31) 315.  
 iodoform reaction of, (30) 414.  
 origin and rôle in muscles, (31) 167.  
 rôle in digestion, (36) 763.  
 starters, preparation and propagation, (40) 79.  
 thiophene test for, (40) 114.  
 use in bread making, (33) 864.  
 volatility of, (30) 707.
- Lactic**—  
 ferment cultures in cheese making, (31) 375.  
 ferment, keeping, (31) 375.  
 fermentation, action of mixtures of salts on, (40) 581.  
 ferments—  
 and streptococci, action of antiseptics on, (38) 77.  
 as affected by temperature, (35) 482.  
 effect on milk protein, (33) 714.  
 habituation to poisons, (33) 803.  
 in therapy, (39) 99.  
 pharmaceutical, bacterial content, (27) 179.  
 use, (27) 170.  
 organism products, effect on *Bacillus typhosus*, (26) 776.  
 starters, tests, (35) 176.
- Lacto**, preparation, (30) 61.
- Lactoantiserum**, use, (30) 112.
- Lactobacillus fermentum**, studies, (35) 278.
- Lactochrome**, investigations, (32) 19.
- Lactoglobulin**—  
 composition, (38) 505.  
 relation to serum proteins, (37) 8.
- Lactose**—  
 absorption in the intestines, (28) 763.  
 acetylated derivatives, optical rotatory powers, (36) 202.  
 antiscorbutic potency, (40) 464.  
 as protective agent for invertase, (26) 504.  
 determination, (26) 709; (34) 611; (39) 315; (40) 507.  
 determination—  
 after heating and addition of sodium bicarbonate, (40) 613.  
 in milk, (27) 506; (28) 205; (30) 414, 508; (33) 503; (34) 506; (38) 615.  
 in milk chocolate, (40) 14.  
 effect on—  
 ammonia production and use in killed plants, (28) 327.  
 ammonification, (28) 718.  
 infant digestion, (33) 663.  
 intestinal flora, (36) 664.  
 plant respiration, (26) 628.  
 examination, (26) 313; (27) 411.  
 extraction from milk serum, (26) 276.  
 free extract as factor in milk judging, (39) 111.  
 heat of combustion, (26) 160.  
 heated, nutritive value, (34) 369.  
 industrial manufacture, (40) 415.  
 manufacture from milk, (30) 378.  
 origin in milk, (30) 204.  
 resorption in small intestine, (29) 268.  
 separation from galactose and glucose, (26) 202.  
 utilization by green plants, (32) 823.
- Lactuca**—  
*scariola*, leaf position, (28) 228.  
 spp., rubber iron, (29) 241.
- Lady beetles**—  
 aphid eating, preservation, (26) 253.  
 ashy-gray, notes, (31) 754.  
 beneficial, in Piedmont, Italy, (28) 757.  
 biology, (30) 754.  
 collecting, (27) 361.  
 common eastern, introduction, (32) 846.  
 common, notes, (32) 654.  
 control of aphids by, (34) 555; (39) 663.  
 corrupted, notes, (29) 458.  
 destruction by white fungus, (26) 454.  
 destructive to citrus plant lice, (26) 755.  
 injurious to potatoes, (30) 255.  
 introduction into California, (34) 361.  
 introduction into Florida, (39) 461.  
 life history, (33) 562.  
 life history and habits, (34) 555.  
 notes, (27) 561; (29) 261.

- Lady beetles—Continued.  
of Connecticut, (30) 856.  
of Oregon, (30) 357.  
oriental, introduction into Peru, (28) 159.  
parasitic on orange scale, (26) 554.  
rare, (33) 58.  
selection and breeding, (33) 558.  
two-spotted, notes, (30) 657.
- Laelaps—  
echidninus, distribution on rats, (29) 755.  
echidninus, notes, (32) 353.  
multispinosus, notes, (34) 66.  
n.sp., description, (35) 264.
- Laemobothrium intermedium n.sp., description  
(38) 761.
- Laemophloeus sp., studies, (37) 356.
- Laestadia—  
aesculi, investigations, (33) 347.  
aesculi, perfect stage of *Phyllosticta paviae*  
(33) 249.  
camelliae, notes, (38) 354.  
sp. on tea, (39) 57.  
theae, notes, (28) 241; (31) 55.  
theae, studies, (33) 650.
- Lagarotis n.spp., descriptions, (34) 466.
- Lagenaria vulgaris, notes, (29) 461.
- Lagerstroemia—  
indica, dimorphic anthers of, (33) 524.  
lanceolata, notes, (29) 443.  
parviflora, notes, (34) 239.
- Lagochirus—  
araneiformis, notes, (30) 356.  
obscoletus, notes, (28) 854.
- Lahani marvel grass, analyses, (28) 768.
- Lake Huron current, (31) 615.
- Lake levels, paper on, (27) 115.
- Lake Tahoe summer level, forecasting, (36) 18.
- Lakes—  
African, desiccation, (38) 15.  
evaporation from, (27) 817.  
meteorological influences on, (38) 317.
- Lallemantia iberica, culture experiments, (39) 229.
- Lamao Experiment Station, notes, (34) 635.
- Lamarckism and animal breeding, lecture on, (28)  
271.
- Lamb—  
changes in during cold storage, (28) 365, 860.  
chop bone, analyses, (38) 626.  
club, cooperative, in Tennessee, (30) 295.  
composition and nutritive value, (34) 256.
- Lambliæ—  
intestinalis, transmission by flies, (38) 563.  
notes, (26) 246.  
spores, transmission by flies, (30) 254.
- Lambs—*see also* Sheep.  
alfalfa and corn for, (27) 899.  
breeding for fur, (29) 872.  
castrating, (26) 167.  
clipping, (39) 775.  
crossbred, tests, (29) 669.  
docking and castrating, (29) 872.  
fall clipping, (40) 569.  
fall feeding, (39) 774; (40) 569.  
fat, breeding for, (39) 273.  
fatty degeneration of muscles, (36) 79.  
feeding experiments, (26) 73, 268, 368, 568; (27)  
372; (28) 671; (29) 271, 669, 772, 870, 871; (30)  
769; (31) 666, 867; (32) 261; (33) 170, 758, 760,  
761; (34) 567, 663; (35) 375, 672, 772; (36) 169,  
170, 866; (38) 66, 670, 671, 672; (40) 874.  
feeding for market, (39) 274.  
fitting for exhibition, (30) 173.  
growth in relation to fat content of ewes' milk,  
(36) 569.  
growth studies, (38) 472.  
hairless, (39) 187.  
hothouse, production, (27) 173.  
kafir for, (39) 71.  
metabolism experiments, (33) 761.  
milk sickness affecting, (26) 74.  
monthly gains, (39) 776.  
on stomach worm pastures, (39) 372.  
open sheds v. barns for, (36) 568.  
orphan, feeding, (40) 278.  
pasturing experiments, (39) 775; (40) 471.  
protein and energy requirements, (31) 666.  
pure-bred v. crossbred, (28) 669.
- quarter—  
analyses, (32) 169; (34) 39.  
coccinellids affecting, (33) 256.
- Lambs—Continued.  
quarter—continued.  
dissemination by farm animals, (26) 839.  
water requirement, (32) 127.  
range, cost of fattening, (29) 572.  
roughages for, (36) 396.  
searing iron v. knife for detailing, (29) 470.  
self feeders and feeding yards for, (29) 872.  
shipping and marketing, (28) 672.  
unborn, disease of, (34) 275.  
winter production, (32) 468.  
winter-fed, loss of, (26) 299.  
worm infestation, (37) 374.
- Lamellicornia of British India, (40) 63.
- Lameness in horses, treatise, (36) 280.
- Laminaria—  
agardhii (saccharina) in permeability studies,  
(39) 26.  
respiration after death, (39) 631.  
saccharina as affected by bivalent cations, (33)  
328.  
saccharina, permeability of cells, (33) 127.  
spp., analyses, (37) 814.
- Laminarin in Fucoideae, (29) 566.
- Laminitis, paper on, (34) 876.
- Lamp traps for cochylys moth, (27) 56.
- Lampatia timber, distribution and use, (38) 751.
- Lampblack, moistening, (33) 322.
- Lampronia rubiella—  
notes, (36) 754.  
remedies, (38) 466.
- Lamprosominae, catalogue, (30) 458.
- Lampsana vulgaris, host plant of lettuce mildew  
(26) 342.
- Lamtoro as shade for coffee, (34) 535.
- Lamziekte—  
in cattle, investigations, (26) 173.  
in South Africa, (35) 678.  
notes, (28) 780.  
papers on, (29) 476.  
review of investigations, (33) 384.  
studies, (28) 280.  
summary and digest of data, (36) 161.
- Land—  
areas, mapping, (37) 651.  
arid, reclamation, (36) 46.  
arid, reclamation in Oregon, (33) 889.  
bank in New York, (39) 796.  
bank in Rhodesia, (27) 795.  
banks in South Africa, (29) 90.  
banks, organization and operation, (29) 692.  
brush, use of goats in clearing, (26) 51.  
classification and tenure, (39) 592.  
clearing, (28) 84; (30) 86; (32) 484, 589; (35) 84;  
(36) 89, 498; (39) 687; (40) 788.  
clearing—  
and grubbing, handbook, (38) 490.  
by-products, (37) 286.  
cost and methods, (36) 785.  
in Lake States, (31) 288.  
in western Washington, (27) 189.  
trials, (39) 493.  
with explosives, (26) 591; (35) 887.  
credit, *see* Agricultural credit.  
cultivated, reverting to natural conditions, (36)  
130.  
cultivated, seeding to meadows, (35) 639.  
cultivation in Mexico, (26) 594.  
cut-over, *see* Cut-over land.  
drag, description and use, (27) 293.  
government valuation, in New Zealand, (30)  
193.  
Grant College Engineering Association, (32) 8;  
(35) 297.  
grant colleges, *see* Agricultural colleges.  
grant of 1862, (40) 195.  
grants in United States, treatise, (34) 594.  
holding, effect on decline of Roman Empire  
(35) 694.  
holding systems in England, (34) 689.  
improvement credit in British India, (26) 793.  
improvement in Province of the Rhine, (37) 697.  
inclosure movement in England, (40) 688.  
laws of Great Britain, revision, (30) 693.  
laying down to grass, (26) 734.  
leasing in Belgium, treatise, (33) 92.  
logged-off, clearing, (37) 87.  
logged-off, of western Washington, (35) 892.  
mortgage associations in Germany, (27) 795.  
mortgage reform in Wisconsin, (30) 592.

## Land—Continued.

- new, preparation for crops, (26) 533.  
not in farms, utilization, (39) 592.
- ownership—  
by negroes in Virginia, (36) 392.  
handbook, (31) 490.  
tenure, and taxation, treatise, (32) 891.  
theories of Karl Marx, (29) 491.
- plaster, *see* Gypsum.
- prairie, drainage, (38) 387.  
private colonization, (40) 192.  
problem and rural welfare, (37) 290, 593.  
problem in Great Britain, (36) 392.  
problem in Texas, (34) 488.  
reform movement in Russia, (35) 392.  
reforms in Russia, (30) 792.  
registration in New Zealand, (35) 793.  
registration, Torrens system, (34) 489.  
rental value in Vaud, Switzerland, (28) 489.  
rented, owner's oversight of, (26) 487.  
renting in England, Scotland, and Ireland, (34) 689.  
settlement, (40) 193, 688.
- settlement—  
and tenure in New Zealand, (40) 195.  
by ex-service men in England and Wales, (35) 296.  
for ex-service men, (39) 89, 648, 702; (40) 389, 591, 687, 790.  
Government aid, (35) 392; (39) 593.  
in America, (32) 481; (34) 482.  
British Empire, (34) 594.  
California, (36) 593; (37) 190; (40) 194, 389, 591.  
Canada, (38) 791; (40) 790.  
Ceylon, (39) 89.  
Great Britain, (37) 190, 390, 791.  
South Africa, (39) 89.  
the Punjab, (40) 595.  
upper Wisconsin, (34) 431; (39) 396.  
on irrigation projects, (40) 687.
- settlement opportunities in—  
Colorado, (39) 90.  
Michigan, (39) 796.  
Montana, (39) 796.
- settlement scheme in Grenada, (27) 92.  
surveying in Queensland, (34) 890.  
surveying, treatise, (34) 485.  
system of Great Britain, treatise, (37) 697.  
taxation, (29) 391, 692; (32) 389.
- tenancy—  
in California, (37) 190.  
central Europe, (29) 895.  
Great Britain and Ireland, (32) 193.  
Illinois, (36) 892.  
Iowa, (30) 491; (34) 193, 792.  
North Atlantic States, (26) 687.  
North Central States, (26) 686.  
southwestern States, (34) 90.  
Texas, (34) 289, 488.  
the South, (36) 893.  
United States, (26) 790; (34) 489; (37) 593.  
Western states, (26) 790.  
profitable, in Iowa, (27) 193.  
social aspects, (40) 890.  
studies, (40) 890, 892.  
v. ownership, (26) 687.
- tenants—  
housing conditions, (34) 488.  
income, (28) 388.  
paying for high-priced land, (26) 487.
- tenure—  
and administration in British India, (32) 891.  
and conveyances in Missouri, (34) 489.  
and settlement in New Zealand, (31) 191; (37) 791.  
in Australia, (26) 291.  
England and Norway, (30) 90.  
England, treatise, (28) 189; (29) 895.  
Illinois, (36) 892.  
Papua, (26) 291.  
Texas, (30) 591.  
problems in United States, (35) 89.  
years of occupancy by, (31) 690.
- tillable, in United States, (30) 692.
- title registration—  
law in Nebraska, (37) 190.  
law in New York, (37) 190.  
manual, (29) 895.  
Torrens system, (37) 492, 888; (39) 89.

## Land—Continued.

- use by schools teaching agriculture, (32) 896, (33) 396, 797; (34) 394.  
use in common, (33) 893.  
use in common in Bavaria, (34) 690.  
uses in Denmark, (31) 390.  
valuation, Christ-Junge method, (29) 595.  
valuation, factors in, (32) 286.  
value and net land revenue, relationship, (28) 790.  
values, improvement, (28) 292.  
values in France, treatise, (40) 892.
- Landlord and tenant—  
contract between, (32) 390.  
distribution of produce between, (31) 390.  
division of capital between, (31) 192.  
partnership between, (30) 399.
- Lands—  
acid, utilization, (30) 23.  
agricultural, in different countries, (31) 390.  
agricultural, in New Jersey, (31) 390.  
agricultural, in United States, (30) 692.  
agricultural, reorganization in Bavaria, (34) 594.  
alluvial, underdrainage, (26) 685; (28) 890.  
arable, of Argentina, (31) 215.  
crawfish, reclamation, (27) 621.  
fallowing experiments, (28) 321.  
forest, *see* Forest lands.  
gullied, of west Tennessee, (30) 19.  
gullied, reclamation, (33) 392.  
heavy, reclamation, (27) 621.  
injured by volcanic ash, reclamation, (32) 31.  
irrigable, classification, (36) 185.  
irrigable, in Utah, (29) 722.
- irrigated—  
drainage, (27) 386; (31) 783; (33) 88, 683; (34) 86, 483; (36) 399; (37) 86, 587; (38) 388.  
pastures for, (32) 628.  
settlement, (29) 491.  
judging, (32) 321.
- logged-off—  
clearing, (26) 787.  
of western Washington, (26) 592.  
reclamation, (32) 485.
- long-term leases for, (26) 593.  
oat sick, notes, (30) 518.  
of Japan, redivision, (40) 892.  
of Nile delta, agricultural value, (31) 119.  
overflowed, reclamation, (29) 85; (30) 787; (32) 883, 884.  
pine, clearing, (28) 289.  
preparation, (30) 697.
- public—  
administration in Minnesota, (34) 594.  
and private, in British Columbia, (32) 593.  
in Alaska, (36) 290.  
in United States, (32) 389; (36) 290.  
settlement in United States, (34) 892.
- scouring, of Somerset and Warwickshire, (32) 215.  
swamp, *see* Swamp.
- tidal, reclamation, (30) 448; (32) 793.  
waste, reclamation, (29) 149; (32) 30; (34) 22; (37) 214.  
wet, of Louisiana, drainage, (31) 185; (39) 291.  
wheat, of western Australia, (29) 315.
- Landscape—  
architecture of the small place, (39) 546.  
areas, grading, (26) 338.  
design, treatise, (38) 542.  
engineering in National Forests, (40) 248.
- gardening—  
in Cleveland, (29) 495.  
in relation to roadside planting, (39) 449.  
list of plants for, (35) 647.  
notes, (32) 143.  
prairie spirit in, (34) 536.  
treatise, (34) 45, 439; (35) 746; (37) 546, 547.  
use of models in, (39) 847.

- Lantana camara, control by parasites, (37) 359.
- Lantern fly injurious to corn, (31) 249.
- Lanthanum, effect on permeability, (34) 34.
- Lantz, D. E., biographical sketch, (39) 400.
- Laphygma—  
exigua, notes, (27) 54; (31) 252, 849.  
exigua remedies, (26) 250.  
frugiperda, *see* Army worm, fall.
- Laramie-Poudre irrigation tunnel, (26) 892.

- Larch**—  
 American, cambium development in, (29) 343.  
 cambial activity, (37) 127.  
 canker, notes, (32) 544, 844.  
 canker, occurrence on pines, (30) 248.  
 case bearer, notes, (28) 57; (32) 448.  
 case bearer, remedies, (33) 859.  
 case bearer, studies, (28) 857.  
 Chermes, studies, (40) 262.  
 defoliated, growth in, (29) 643.  
 European, drought resistance, (38) 44.  
 form variations, (39) 352.  
 insects of bark and wood, (40) 453.  
 leaf disease, notes, (34) 849.  
 longicorn beetle affecting, (32) 155.  
 mistletoe, injurious effects, (34) 547.  
 moth, remedies, (33) 859.  
 needle cast, notes, (30) 545.  
 needles, drying, notes, (29) 156.  
 plantations in Ireland, (31) 240; (33) 542.  
 Razoumofskya infection, (40) 253.  
 roller, gray, notes, (30) 550.  
 sawfly—  
   fungus parasite of, (26) 63.  
   large, biology and remedies, (28) 658.  
   large, chalcidid parasite of, (26) 353.  
   large, notes, (27) 53, 460, 552; (30) 362; (32) 754.  
   large, parasites of, (32) 352.  
   notes, (28) 653; (29) 252; (30) 845; (38) 257.  
   studies, (35) 54.  
 seedlings, absorption of fertilizers by, (26) 443.  
 seeds, germination tests, (27) 444.  
 stands, effect on soil physics, (26) 140.  
 timber, tests of strength, (28) 744.  
 volume tables, (39) 246.  
 western—  
   analyses, (38) 309.  
   description and use, (35) 451.  
   galactan of, (35) 611.  
   growth and adaptation, (36) 144.  
   properties and uses, (29) 43.  
   volume tables for, (34) 641.  
 witches' broom on, (36) 453.
- Lard**—  
 adulteration, (31) 161.  
 adulteration, detection, (27) 716; (29) 798; (32) 802.  
 analyses, (31) 357.  
 and milk fat, comparative value for growth, (36) 160.  
 as affected by feeding stuffs, (32) 21; (40) 772.  
 as affected by peanuts, (37) 367.  
 detection of foreign fats in, (39) 805.  
 digestibility, (34) 364, 659; (40) 268.  
 examination, (28) 65.  
 failure to promote growth, (33) 263.  
 notes, (27) 365.  
 preparation, (35) 317.  
 preservatives, detection, (31) 508.  
 production in United States, (40) 614.  
 refractive index, (27) 615.  
 rôle in glycogen formation, (31) 763.  
 short-weight packages, (26) 461.  
 stearin, refractive index, (27) 615.  
 substitute in Austria, (29) 564.  
 substitute, metallic nickel in, (29) 459.  
 substitutes accessory growth substance in, (38) 265.  
 substitutes for, (33) 660.  
 supply in United States, (38) 866.  
 water content, determination, (26) 207.
- Laria**—*see also* Bruchus.  
 rufimana, studies, (27) 563.
- Lark**—  
 California horned, destruction of locusts by, (28) 351.  
 western meadow, destruction of locusts by, (28) 351.  
 western meadow, feeding habits, (28) 351.
- Larkspur**—  
 anthocyan of, (34) 709.  
 description, (32) 474.  
 notes, (32) 778.  
 of Wyoming, analyses, (30) 577.  
 poisoning of livestock by, (27) 180; (29) 280; (35) 779; (39) 386, 587, 787, 788.  
 seed fluid extract, insecticidal value, (32) 56.  
 tall, eradication, (38) 82.
- Larus franklini**, notes, (27) 355.
- Larus hyperboreus**, subspecies of, (40) 254.  
 Larvae, rearing, (34) 651.  
 Larvicides, tests, (26) 559.  
 Laryngo-tracheal catarrh in horses, (34) 480.  
 Lasconotus, revision, (27) 259.  
 Lasia globosa injurious to alfalfa, (33) 555.  
 Laslocampidae of Japan, (39) 262.  
 Lasioderma serriorme, *see* Cigarette beetle.  
 Lasioderma sp., notes, (26) 560.  
 Lasiodiplodia—  
   nonvalidity of genus, (31) 445; (34) 242.  
   theobromae, notes, (29) 155, 345; (30) 50; (35) 45; (37) 452, 553; (40) 155, 252.  
   triflorae n.sp., studies, (34) 748.  
   tubercicola, description, (30) 150.  
   tubercicola, studies, (34) 242.
- Lasiophthicus pyrastris**—  
 destructive to citrus plant lice, (26) 755.  
 parasitic on rose aphids, (31) 250.
- Lasioptera**—  
 fructuaria n.sp., description, (34) 852.  
 vitis, notes, (37) 255.
- Lasiopteriariae**, studies, (40) 163.
- Lasiosina n.spp.**, descriptions, (40) 263.
- Lasiosphaeria culmorum n.spp.**, studies, (27) 154.
- Lasiostroma pirorum**, notes, (26) 449.
- Lasius**—  
 (Acanthomyops) interjectus, remedies, (34) 62.  
 niger americanus, life history, (29) 860.  
 niger americanus, studies, (30) 546.
- Laspeyresia**—*see also* Grapholitha.  
 caryana, notes, (38) 256, 762; (39) 557.  
 caryana, studies, (38) 157.  
 interstinctana, *see* Clover seed caterpillar.  
 molesta—  
   brief account, (40) 652.  
   description, (36) 358.  
   in Maryland, (38) 154.  
   studies, (39) 259, 260; (40) 756.  
   summary of information, (39) 761.  
 pomonella, *see* Codling moth.  
 prunivora, notes, (40) 756.  
 strobilella, notes, (31) 849.
- Lassen Peak**, eruption of, (36) 419.
- Latania scale**, notes, (28) 854.
- Laterite**—  
 as sewage filtering material, (28) 789.  
 formation and composition, (31) 119.  
 formation in soils, (30) 320.
- Lateritization of soils under arid climates**, (28) 812.
- Laterna columnata**—  
 notes, (39) 30.  
 on sugar cane, (40) 157.
- Latex**—  
 hydrometer, use, (32) 48.  
 of rubber plants, physiology of, (31) 128.  
 physiological studies, (32) 328.
- Latexes, caoutchouc-bearing, constitution**, (27) 244.
- Lath**—  
 industry in Canada, (26) 544; (28) 644; (30) 46; (32) 841; (35) 347; (36) 244; (37) 245; (38) 146.  
 industry in United States, (30) 845.  
 production in 1915, (37) 148.  
 production in 1916, (39) 452.  
 production in 1917, (40) 843.
- Latheticus oryzae**, studies, (37) 356.
- Lathromeroides neomexicanus n.sp.**, description, (34) 556.
- Lathyrus**—  
 culture experiments, (28) 633.  
 sativus—  
   anatomical structure, (31) 314.  
   for pigs, (28) 364.  
   poisoning of horses by, (35) 282.  
 spp., culture experiments, (28) 532.  
 sylvestris, yields, (30) 134.  
 tingitanus as green manure, (39) 31.  
 tingitanus, culture experiments, (30) 632.
- Latitude**—  
 annual variation of, (35) 619.  
 effect on forest development, (30) 45.
- Latreillimyia bifasciata**, notes, (26) 856.
- Latroctetus mactans**, notes, (38) 566.
- Laundering**—  
 home, aids in, (29) 792.  
 suggestions for, (33) 495.
- Laundries, equipping**, (28) 461.
- Laundry**—  
 cooperative, (30) 395; (35) 191.  
 machinery and equipment, notes, (27) 793.

- Laundry—Continued.  
 machinery, use in disinfection and disinsection, (40) 551.
- Laurel—  
 green, analyses, (26) 65.  
 leaves, evolution of hydrocyanic acid from, (26) 228.  
 leaves, free hydrocyanic acid in, (27) 635.  
 psyllid, studies, (37) 849.  
 silver leaf disease affecting, (20) 845.
- Laurentia, North American species, (40) 761.
- Lauric acid salts, solubility, (35) 416.
- Lauric and myristic acids, separation, (35) 416.
- Lauron vinosa, life history and habits, (32) 756.
- Laurus nobilis, oil of, (36) 803.
- Lava—  
 analyses, (30) 899.  
 bricks, efflorescence on, (29) 203.  
 of Hawaii, studies, (33) 413.
- Lavandula spica, oil of, (36) 803.
- Lavatera, tests, (37) 143.
- Lavender, culture in Victoria, (27) 346.
- Lavender Phoma disease, studies, (36) 851.
- Lavocat for horses and cattle, (30) 67.
- Law of minimum—  
 application in irrigation, (32) 481.  
 notes, (27) 721, 823; (28) 420, 518, 722; (30) 135, 228, 321, 519, 627; (31) 17, 28, 118, 221, 327; (34) 218.
- Lawn—  
 grass, Korean, notes, (26) 362.  
 grasses as affected by soil acidity, (40) 125.  
 grasses, new Sclerotium disease, (39) 753.  
 mixtures, tests, (29) 145; (35) 742.
- Lawns—  
 bibliography, (34) 238.  
 construction and maintenance, (35) 145.  
 eradication of dandelions on, (39) 37.  
 fertilizer experiments, (37) 446.  
 handbook, (27) 41.  
 in sand hills of Nebraska, (35) 835.  
 in the South, management, (26) 299.  
 management, (32) 828.  
 notes, (27) 346.  
 preparation and care, (34) 836.  
 starting, (29) 148.
- Lawsonia alba, studies, (35) 449.
- Lead—  
 arsenate—  
 addition of soft soap to, (33) 538.  
 adhesiveness of, (26) 256; (38) 858.  
 analyses, (26) 65, 715, 757; (27) 344, 441, 755, 756, 757; (29) 42; (31) 49, 142; (32) 169; (33) 47, 735; (34) 436, 639; (36) 39; (37) 243; (38) 643; (39) 240.  
 and soap mixtures, soluble arsenic in, (31) 409.  
 as fungicide for apple scab, (36) 50.  
 as summer spray for apples, (33) 46.  
 basic, preparation and properties, (37) 410.  
 chemistry of, (32) 713.  
 costs and efficiency, (40) 163.  
 decomposition by water, (37) 802.  
 different brands, (39) 348.  
 dihydrogen, (39) 767.  
 dust, use with sulphur, (39) 548.  
 effect of soap on settling, (26) 354.  
 effect on apple roots, (39) 40.  
 effect on apples, (33) 46; (40) 639.  
 for boll weevil, (40) 752.  
 fungicidal and insecticidal value, (35) 39.  
 fungicidal value, (27) 153; (31) 151; (33) 237, 648; (34) 146; (35) 549; (39) 652.  
 injury to stone fruits, (37) 848.  
 insecticidal value, (27) 439; (28) 659; (32) 158, 847; (34) 60, 146, 548; (37) 759.  
 insecticidal value of various forms, (31) 350.  
 lime-sulphur mixture, studies, (29) 802.  
 methods of analysis, (27) 496.  
 occurrence in grape products, (27) 243.  
 paste as affected by freezing, (30) 456.  
 poisoning, danger from, (33) 98.  
 poisoning of apples with, (31) 141.  
 powdered, insecticidal value, (30) 455, 840.  
 powdered, use, (29) 852.  
 powdered, use on tobacco, (26) 453.  
 preparation, (26) 539; (40) 801.  
 preparation and properties, (28) 308.  
 preparation and tests, (33) 801.  
 solubility in mixed sprays, (33) 710.
- Lead—Continued.  
 arsenate—continued.  
 studies, (36) 313, 501.  
 tests, (27) 440; (28) 48; (35) 342; (37) 448.  
 use against tobacco hornworms, (29) 356; (31) 454; (38) 159.  
 use in agriculture, (34) 851.  
 use in viticulture (36) 537.  
 use with lime sulphur, (39) 251.  
 use with other sprays, (38) 258.  
 v. calcium arsenate as an insecticide, (33) 339, 340.  
 as affected by—  
 alkaline natural water, (30) 511.  
 various waters, (33) 778.  
 water, (31) 512.  
 basic white v. sublimed, as priming for paint, (33) 91.  
 benzoate, effect on potatoes, (27) 151, 237.  
 boring beetle, (39) 467.  
 chlor arsenate, preparation and properties, (36) 412.  
 chromate, insecticidal value, (27) 161; (29) 758.  
 chromate, use against caterpillars, (32) 850.  
 detection in water, (34) 410.  
 determination in—  
 baking powder, (27) 499; (29) 799, 866; (32) 298.  
 beer, (26) 409.  
 water, (32) 505; (38) 506.  
 effect on germ cells of male rabbits and fowls, (32) 861.  
 effect on nitrogen-fixing bacteria, (38) 428.  
 effect on plant growth, (38) 819.  
 foils for packing tea, (33) 66.  
 in orchard soils, (31) 720.  
 in pharmaceutical zinc oxid, (40) 413.  
 metallic, effect on *Aspergillus niger*, (30) 824.  
 nitrate—  
 effect on growth of corn, (31) 226.  
 effect on sugar beets, (26) 225; (30) 529; (34) 38.  
 preparation, (40) 801.  
 oxid, determination in lead arsenate, (27) 496.  
 oxid, effect on germination of seeds, (29) 528.  
 poisoning—  
 effect on germ cells, (33) 368; (35) 564.  
 in waterfowl, (39) 687.  
 through water supplies, (30) 418.  
 removal from water, (34) 390.  
 salts, effect on—  
 ammonification and nitrification in soils, (31) 120.  
 disease susceptibility in cereals, (29) 844.  
 plants, (28) 731.  
 wheat, (29) 520; (35) 324.  
 salts, fertilizing value, (30) 627.  
 toxic effect on plants, (38) 628.
- Leadwort, notes, (29) 441.
- Leaf—  
 blade, sheath, and internode, physiological unity of, (35) 330.  
 blister mite, notes, (27) 565.  
 bug, dusky, affecting potatoes, (32) 87.  
 bug, dusky, notes, (33) 352.  
 bug, four-lined, *see* *Poecilocapsis lineatus*.  
 color, relation to light absorption, (33) 825.  
 crumpler, notes, (26) 856.  
 development, studies, (37) 324.  
 diseases in Jamaica, (39) 849.  
 epidermis, light sensitivity, (37) 222.  
 etiolation due to cold, (35) 330.  
 fall, relation to light and temperature, (27) 221.  
 fall, studies, (32) 825.  
 hairs, chemotactic reaction, (29) 828.  
 miner, serpentine, notes, (32) 753; (33) 255.  
 miner, serpentine, studies, (29) 857.  
 miner, spike-horned, studies, (36) 156.  
 miners, monograph, (34) 553.  
 miners, notes, (28) 159.  
 miners of Hawaii, (30) 660.  
 mold, analyses, (32) 520; (34) 521.  
 mold, fertilizing value, (29) 622.  
 mold for greenhouse crops, (40) 740.  
 mold, formation, (28) 814; (33) 24.  
 pigments, notes, (31) 728.  
 position of compass plants, studies, (28) 228.  
 roller, oblique banded, notes, (28) 854; (35) 853.  
 rollers, notes, (27) 161.  
 sewer, notes, (38) 358.

## Leaf—Continued.

- sheath, value in descriptive botany, (36) 628.  
 structure as affected by light and shade, (37) 747.  
 structure as related to position on tree, (39) 29.  
 surface films, effect on transpiration, (30) 726;  
 (31) 825.  
 temperature, determination, (30) 223.  
 temperature, review of literature, (32) 640.  
 tissue, parasitized, studies, (27) 543.  
 variegation, transmission through grafts, (26) 529.  
 water in *Gossypium*, studies, (28) 822.  
 weevil, new, in New York, (36) 859; (37) 359.
- Leafhoppers—**  
 egg parasites, (37) 466.  
 life histories, (35) 552.  
 new species, (28) 753.  
 notes, (40) 354.  
 of Maine, (33) 356.  
 of Nova Scotia, (40) 261.  
 of Tennessee, (36) 654.  
 parasites of, (39) 870; (40) 265.  
 studies, (27) 858.
- Leafy twigs, preservation, (37) 837.**  
**Leaming, J. S., biographical sketch, (26) 437.**  
**Least squares, methods of, (36) 419.**
- Leather—**  
 adulteration, (29) 866.  
 availability of nitrogen in, (26) 523; (28) 725; (38) 423.  
 beetle in Hawaii, (40) 266.  
 chemistry, (40) 714.  
 cuttings as cattle feed, (37) 171.  
 fertilizing value, (38) 121.  
 ground, fertilizing value, (26) 323.  
 home manufacture, treatise, (38) 13.  
 manufacture, studies, (30) 615.  
 meal, detection in dried blood, (38) 711.  
 methods of analysis, (27) 205; (32) 314; (35) 316.  
 nitrification of, (31) 724.  
 roasted, availability of nitrogen in, (26) 725.  
 studies, (29) 207.  
 supply of United States, (39) 477.  
 tannery sludge, fertilizing value, (28) 734.  
 volumometer, (40) 208.  
 waste as source of lime, (38) 22.  
 waste, fertilizing value, (29) 129; (33) 125, 327.
- Leathers, identification, (28) 713.**  
**Leavening agents, treatise, (33) 66.**
- Leaves—**  
 absorption of sun energy in, (30) 45.  
 aging, translocation of materials in, (32) 825.  
 analyses, (35) 629.  
 and seeds, dietary relationship, (37) 264.  
 arsenic and manganese content, (29) 628.  
 as affected by rusts, (30) 453.  
 as cause of soil deterioration, (32) 319.  
 as source of potash, (34) 327.  
 autumn coloration, (36) 633.  
 autumn, retention of green color in, (36) 225.  
 bacterial tubercles in, (29) 30.  
 blackening, studies, (30) 524.  
 carbohydrates in, variations, (29) 827.  
 cell shape, (39) 226.  
 chemical transformations in, (36) 633.  
 chlorophyll quotients in, (30) 629.  
 closure of, (36) 129.  
 coloration of, (31) 128.  
 composition and fertilizing value, (38) 722.  
 composition at different periods of growth, (32) 128.  
 dead, utilization, (39) 908.  
 detached, respiration in, (28) 528.  
 development in partial shade, (30) 522.  
 dried, fertilizing value, (27) 337.  
 effect on root formation and geotropic curvature, (37) 325.  
 etiolated, effect of light on, (33) 826.  
 formation of anthocyanin in, (28) 36.  
 green, carbohydrate content, (35) 131.  
 heat production by, (28) 630.  
 incipient drying, (38) 522.  
 leaching of nitrogenous and mineral matter from, (29) 218; (32) 128; (35) 629.  
 light relations, (27) 221.  
 mineral content by day and night, (27) 630.  
 morphology and evolution, (36) 729.  
 movement of minerals in, (27) 229.  
 movement of water in (28) 822.  
 nitrite assimilation in sunlight, (40) 425.

## Leaves—Continued.

- nitrogen content, (28) 328.  
 osmotic pressure in relation to soil moisture, (36) 733.  
 osmotic pressure in, studies, (27) 631.  
 penetration by violet and ultraviolet rays, (31) 129.  
 phosphoric acid and nitrogen content, (27) 731.  
 plant food constituents, (37) 629.  
 red and yellow colorations in, (30) 729.  
 relation of water content to transpiration, (27) 331.  
 resistance to transpiration, (28) 528.  
 respiration in darkness, (26) 822.  
 respiration in, periodicity, (29) 324.  
 respiratory coefficient, (31) 33.  
 rôle in soil absorption, (32) 319.  
 senile changes in, (34) 222.  
 senility in, (32) 728.  
 symbiosis with fungi, (37) 327.  
 translocation of sugars from, (26) 229.  
 transpiration as affected by sprays, (36) 454.  
 transpiration in, (28) 823; (29) 217; (31) 222.  
 transpiration in as affected by light, (28) 529.  
 transpiring power, (36) 824.  
 variegated, anatomy of, (33) 724.  
 variegation of, (26) 529.  
 water content, (26) 627; (38) 223.  
 wet, transpiration in, (27) 222.  
 white speck disease of, (35) 650.  
 winter and summer, comparison, (37) 327.  
 xerophotic movements in, (36) 430.
- Leben, composition, (36) 674.**  
**Lecanobius cockerelli in California, (30) 753.**  
**Lecanodiaspis rufescens, notes, (26) 149.**
- Lecanium—**  
 capreae, chalcid parasites, (40) 651.  
 cerasi, remedies, (33) 653.  
 cerasifex, notes, (27) 455.  
 corni, notes, (26) 555.  
 corni, studies, (37) 662.  
 hesperidum, notes, (33) 746.  
 nigrofasciatum, notes, (29) 353.  
 nigrum, notes, (28) 353.  
 oleae—*see also* Black scale.  
 notes, (27) 357, 857; (30) 455.  
 parasite of, (26) 655.  
 persicae, notes, (36) 355, 755.  
 quercifex, notes, (29) 53.  
 quercifex, studies, (32) 553.  
 spp. in Seychelles, (30) 252; (33) 555.  
 spp., notes, (26) 556, 655.  
 tulipifera, notes, (27) 755.  
 viride, fungus disease affecting, (26) 553.
- Lecychna fruit fly, notes, (29) 652.**  
**Lecithids in cod liver oil, (33) 166.**
- Lecithin—**  
 and allied substances, (39) 202.  
 as source of phosphoric acid, (29) 423.  
 assimilation by ruminants, (31) 71.  
 composition, (35) 201.  
 determination, (26) 709; (27) 502, 612.  
 effect on—  
 calcium and magnesium excretion, (26) 766.  
 complement-containing serums, (31) 478.  
 growth of white mice, (35) 866.  
 hemolytic action of peptones, (35) 881.  
 emulsions, preparation and determination of strength, (29) 809.  
 fatty acids of, (31) 608.  
 flocculations with acids, (27) 612.  
 food preparations from, (32) 854.  
 for pigs, (30) 571.  
 hydrolysis and constitution, (27) 804.  
 importance in animal organism, (33) 758.  
 importance in metabolism of adults, (29) 664.  
 in different tissues, (31) 577.  
 in eggs, (26) 67; (28) 313; (29) 503.  
 in horse kidneys, (30) 477.  
 loss from grass during curing, (32) 111.  
 metabolism of, (26) 159, 765; (32) 764.  
 nutritive value, (26) 565.  
 phosphoric acid in peas, (40) 508.  
 phosphoric acid, loss in, (31) 112.  
 phosphorus, determination in macaroni, etc., (33) 14.  
 products of soils, (32) 718.  
 purification, (30) 410.  
 rôle in nutrition, (27) 67.  
 synthesis, (31) 10.

- Lecithin**—Continued.  
 synthesis in hens, (28) 269.  
 therapeutic use, (27) 67.
- "L'eclair bleu"** reaction, studies, (40) 311.
- Lecythis ollaria**, fungi affecting, (28) 350.
- Leeches**, notes, (33) 659.
- Leeks**—  
 cooking, (31) 856.  
 thrips affecting, (32) 553.  
 wild, occurrence of arsenic in, (27) 269.
- Leersia hexandra**, notes, (26) 362; (30) 230.
- Lees**, lead arsenate in, (27) 243.
- Leghorns**, treatise, (28) 774.
- Legume**—  
 anthracnose, notes, (39) 146; (40) 48.  
 bacteria and nonlegume plants, symbiosis, (37) 819.  
 cultures, distribution, (28) 476.  
 diseases in Switzerland, (37) 47.  
 diseases, notes, (39) 353.  
 diseases, studies, (33) 547.  
 pod maggot, studies, (27) 553.  
 pod moth, studies, (27) 552.  
 proteins, utilization (26) 564.  
 seed, investigations, (40) 39.  
 seeds, abortive position in pod, (40) 521.  
 seeds, hard, germination, (35) 835.  
 seeds, ripening, (35) 523.  
 straw, feeding value, (38) 168.
- Legumes**—  
 analyses, (31) 829.  
 anatomical structure, (28) 660.  
 and flaxseed combinations, preparation, (38) 365.  
 and nonlegumes, associative growth, (32) 432; (40) 821.  
 and nonlegumes, effect of association, (33) 527.  
 as affected by sodium chlorid, (40) 434.  
 food, (34) 164.  
 green manure, (35) 517; (38) 231.  
 orchard cover crops, (28) 144.  
 pasture crops, (39) 130.  
 creatinin in, (32) 560.  
 culture, (39) 334; (40) 39.  
 culture experiments, (33) 31, 227; (34) 228, 736; (38) 526, 527, 634.  
 culture on moor soils, (39) 438.  
 decomposition in soil, (40) 214.  
 digestibility, (33) 361.  
 dried, cooking, (40) 360.  
 effect on—  
 composition of cereals, (34) 230.  
 quality of butter, (29) 278.  
 soil acidity, (38) 20.  
 soil nitrogen, (26) 196.  
 exhibits for farm and school use, (29) 93.  
 fertilizer experiments, (38) 527, 829; (39) 328; (40) 429.  
 fungoid and insect pests, (40) 747.  
 growth and nitrogen-fixing power on acid soils, (36) 514.  
 growth as affected by manganese sulphate, (33) 820.  
 hybridization experiments, (34) 228.  
 importance for milch cows, (38) 779.  
 in desert agriculture, (38) 230.  
 inoculation, (29) 142, 228, 326; (31) 131, 830; (32) 423; (39) 116, 232, 338, 439, 723, 813; (40) 215, 719, 736, 822.  
 inoculation experiments, (26) 322; (27) 322, 419, 531; (29) 316; (30) 335; (31) 524; (32) 630, 818; (35) 322, 727.  
 liming experiments, (36) 229.  
 nitrogen assimilation by, (33) 426.  
 nitrogen fertilization, (27) 235.  
 nitrogen fertilization v. inoculation, (35) 517.  
 nitrogen fixation by, (26) 37; (38) 528.  
 nodule bacteria of, (33) 823.  
 pentosans of, (34) 168.  
 preservation, treatise, (29) 116.  
 production in Spain, (30) 791; (35) 393; (37) 827; (40) 793.  
 purin content, (40) 205.  
 relation to beriberi, (27) 461.  
 selection experiments, (35) 334.  
 silage from, (38) 636.  
 stachyose in, (28) 761; (31) 13.  
 use in the dietary, (29) 862.  
 varieties, (26) 424; (28) 828; (31) 829; (34) 736; (35) 134; (38) 634.)
- Legumes**—Continued.  
 water requirements, (38) 227.  
 wild, culture experiments, (34) 736.
- Leguminosae**—  
 comparative morphology, (31) 624.  
 composition as affected by companion crop, (26) 617.  
 economic value, treatise, (37) 28.  
 nodule bacteria of, (32) 727.  
 seedling structure in, (28) 38.  
 serological study, (31) 733.  
 specialization of nodule bacteria of, (29) 733.  
 tannin content, (30) 227.  
 treatise, (31) 523.
- Leguminosae**—  
 cover crops for Guam, (40) 328.  
 crops for northern Wisconsin, (28) 738.  
 plants—  
 and cereals, associative growth, (28) 720.  
 as green manure, (37) 320.  
 assimilation of nitrogen by, (30) 435; (31) 131, 523.  
 breeding experiments, (29) 138, 139; (31) 830.  
 classification of varieties, (27) 31.  
 culture, (26) 830; (32) 430.  
 plants, culture—  
 continuous, (31) 226.  
 experiments, (27) 32; (29) 631; (30) 828; (31) 628, 733; (37) 330.  
 in Brazil, (29) 428.  
 India, (29) 736.  
 Mexico, (32) 131.  
 North Carolina, (31) 132.  
 plants, effect on—  
 associated nonlegumes, (37) 438.  
 nitrogen content of soils, (31) 733.  
 soil bacteria, (37) 121.  
 plants—  
 embryology, (30) 633.  
 fertilizer experiments, (26) 424, 725; (29) 227; (31) 132, 628, 733; (32) 37.  
 fertilizing value, (29) 820; (30) 125; (37) 214.  
 fertilizing value of above-ground parts, (31) 320.  
 formation of nitrogen by, (26) 7.  
 fungicidal treatment, (29) 326, 22.  
 growth in acetylene gas, (27) 827.  
 illustrated lecture on, (37) 194.  
 insects affecting, (27) 155; (32) 754.  
 irrigation experiments, (37) 639.  
 methods of variety testing, (26) 436.  
 new, analyses and feeding value, (29) 467.  
 nitrates in, (36) 329.  
 nitrogen assimilation by, (29) 326.  
 nitrogenous fertilizers for, (37) 134.  
 notes, (26) 882.  
 pollination experiments, (37) 734.  
 potash fertilizers for, (32) 228.  
 production in New York, (39) 532.  
 root systems of, (31) 830.  
 root tubercles, *see* Root tubercles.  
 seed color variation in, (37) 334.  
 treatise, (32) 432.  
 tubercle bacteria of, (26) 824.  
 value in agriculture, (36) 635.  
 varieties, (29) 138, 427, 631; (30) 525, 828; (31) 524, 628, 733; (32) 37.  
 seeds, germination tests, (36) 437.  
 seeds, hard, germinability, (34) 225.
- Legumins**—  
 in peas, (40) 607.  
 lysin content, (31) 559.
- Leidyana tinei** n.sp., description, (39) 659.
- Lelegnathus morisitans**—  
 n.sp., description, (35) 263.  
 notes, (37) 360.
- Leiomerus granicollis** n.sp., description, (37) 58.
- Leishmania**—  
 donovani, development in mosquitoes, (26) 656.  
 photomicrographs of, (29) 478.  
 relation to *Pulex serraticeps*, (28) 185.
- Leishmaniasis**—  
 in Yucatan, (27) 782.  
 induced development of, (33) 862.  
 notes, (35) 75, 464.  
 transmission by fleas, (36) 654.  
 Leishmanioses, monograph (39) 683.
- Lema melanopus**—  
 life history and control, (34) 857.  
 notes, (31) 654.

- Lemon**—  
 bark blotch, notes, (31) 244.  
 black pit, description, (29) 650.  
 black pit, studies, (30) 652.  
 brown rot gum disease, studies, (33) 55.  
 brown rot, notes, (37) 656.  
 cottony rot, notes, (36) 452.  
 cottony rot, studies, (34) 749.  
 curing rooms, humidifier for, (36) 842.  
 die-back, cause, (31) 450.  
 diseases, notes, (39) 753.  
 diseases, investigations, (32) 238.  
 diseases, notes, (29) 243.  
 essence, analytical methods and standard for, (30) 558.  
 extract, analyses, (35) 663.  
 extract, methods of analysis, (35) 417.  
 extract, terpenes, studies, (26) 462.  
 grass oil, constants of, (36) 319.  
 grass oil, production in United States, (36) 538; (37) 546.

 groves, damage by cold, (40) 342.  
 groves, heating, (40) 540.  
 gum disease, notes, (27) 546; (32) 53.  
 gum diseases, treatment, (34) 240.  
 gummosis, causal agents, (30) 51.  
 gummosis in California, (31) 449.  
 gummosis, studies, (33) 550.  
 gummosis, treatment, (39) 758.  
 industry in California, (29) 440.  
 industry in Italy, (28) 437.  
 juice, ascorbic factor, (40) 364, 869.  
 juice, osmotic pressure, (28) 262.  
 juice, preparation, (33) 316.  
 mottled leaf, cause, (27) 251.  
 oil adulteration, detection, (26) 312; (27) 207.  
 peel, betains in, (27) 204.  
 peel, candied, manufacture and analyses, (27) 205.  
 rots, life history and treatment, (28) 245.  
 scab, notes, (31) 539, 645.  
 scab, studies, (36) 353.  
 seeds, agglutinating properties, (31) 774.  
 seeds, notes, (32) 613.  
 skins, analyses, (38) 626.  
 skins, isolation of fat from, (29) 459.  
 sour rot, description, (37) 843.  
 tree, orange-like fruit, (40) 151.  
 wither-tip, notes, (34) 241.  
 yellow, effect on digestion, (26) 68.  
**Lemonade sirups**, examination, (30) 258.  
**Lemons**—  
 and oranges, hybrid between, (33) 441.  
 as source of citric acid and essential oils, (33) 540.  
 asexual reproduction of seeds, (31) 533.  
 bud selection, (40) 151.  
 bud variation in, (36) 537; (37) 345.  
 crown gall affecting, (28) 447.  
 culture, (36) 538.  
 culture experiments, (28) 236; (40) 339.  
 culture in Messina, (35) 448.  
 culture in Texas, (38) 40.  
 curing, (26) 47.  
 decay in, (36) 546.  
 descriptions, (27) 745.  
 enemies of, (28) 352.  
 examination, (36) 319.  
 fertilizer experiments, (32) 233.  
 food plant of purple scale, (26) 756.  
 forced curing of, (26) 641.  
 frozen, changes in, (40) 539.  
 frozen, composition, (34) 365, 502; (36) 416.  
 grafting experiments, (32) 233.  
 immunity to collar rot, (31) 244.  
 improvement by bud selection, (33) 737; (35) 647.  
 insects affecting, (27) 453.  
 jelly from, (34) 207.  
 old, pruning, (39) 243.  
 optimum soil moisture conditions, (37) 834.  
 persistence of style on, (36) 523.  
 protection against frost, (27) 439.  
 rapid curing, (29) 440.  
 ripening processes, studies, (26) 138.  
 shading, (39) 544.  
 spotting of, (35) 50.  
 storage and curing experiments, (36) 741.  
 variability of yield, (38) 744.  
 variations in, (27) 441.
- Lemurs**, chromatin bodies in erythrocytes of, (29) 478.  
**Lens esculenta** as a green manure, (39) 31.  
**Lentil**—  
 flour, digestibility of protein, (33) 564.  
 seeds, disinfection experiments, (31) 738.  
 seeds, oil content, (27) 716.  
 starch, studies, (31) 828.  
**Lentils**—  
 analyses, (28) 463; (29) 569.  
 culture, (30) 335.  
 culture experiments, (28) 735.  
 description and agricultural value, (36) 635.  
 digestibility, (32) 168.  
 Egyptian, notes, (28) 532.  
 fertilizer experiments, (26) 631; (31) 133.  
 fertilizing value, (26) 233.  
 germination as affected by depth of planting, (36) 437.  
 germination as affected by Roentgen rays, (28) 128.  
 insects affecting, (29) 853.  
 phosphorus content, (27) 461.  
 prevention of beriberi by, (28) 761; (31) 762.  
 sprouting capacity relation to antiscorbutic value, (39) 470.  
 varieties, (26) 631; (31) 133.  
**Lentinus**—  
 lepidus, notes, (27) 653.  
 spp., pseudosclerotia of, (35) 251.  
**Lenzites sepiaria**—  
 effect on greenheart, (34) 56.  
 enzymatic activity, (37) 129.  
 studies, (40) 350.  
 wood decay induced by, (37) 727.  
**Leontodon hirtus**, description, (35) 642.  
**Leopard moth**—  
 description, (35) 55.  
 injurious to apples, (26) 150.  
 life history and remedies, (28) 253.  
 notes, (26) 856; (28) 57, 351; (30) 455; (34) 755.  
 remedies, (31) 652.  
 studies, (26) 556; (27) 658.  
 wood, notes, (28) 353.  
**Lepidota**—  
 albohirta, notes, (32) 555.  
 albohirta, remedies, (36) 658.  
 frenchi affecting sugar cane, (38) 864.  
 frenchi, control, (40) 648.  
 spp. in Queensland, (39) 255.  
 stigma, notes, (35) 467.  
**Lepidium sativum** seeds, germinability, (38) 729.  
**Lepidopria aberrans** n.sp., description, (36) 556.  
**Lepidoptera**—  
 as affected by Roentgen rays, (27) 656.  
 catalogue, (28) 252, 253; (39) 557.  
 classification, (35) 464; (38) 160.  
 collecting and preserving, (35) 594; (39) 560.  
 female, at light traps, (39) 560.  
 habits, (35) 756.  
 in and about Truro, Nova Scotia, (35) 853.  
 infesting peach and apple, (40) 756.  
 injurious to conifers, (39) 656.  
 Japanese, life history, (37) 57.  
 new, from Mexico, (39) 465, 561.  
 new genus allied to *Leucoptera*, (40) 757.  
 new, of Antilles, (34) 64.  
 new, of Mexico, (34) 64, 855.  
 new, of North America, (37) 564.  
 of Hawaii, (34) 556; (38) 557.  
 India, (35) 358.  
 Isle of Pines, (37) 158.  
 North America, (28) 253.  
 North America, check-list, (37) 563.  
 Panama Canal Zone, (34) 855.  
 Yale-Dominican expedition, (34) 855.  
 olfactory organs of, (38) 160.  
 overwintering pupae of, (26) 656.  
 parasites of, (39) 468.  
 scent organs, (27) 558.  
 taxonomic value of larval characters, (36) 254.  
**Lepidopterology**, treatise, (26) 348, 455; (28) 453; (35) 358.  
**Lepidopterous larvae**—  
 acrostatic hairs of, (30) 55.  
 classification, (35) 258.  
 hypopharynx of, (34) 553.  
 of Japan, (40) 456.  
 of Mexico, (38) 765.

- Lepidopus caudatus, analyses, (25) 459.  
 Lepidosaphes—  
   alba, notes, (28) 855.  
   beckii, see Purple scale.  
   ficus in California, (37) 563.  
   gloveri, see Glover's scale.  
   lasianthi, notes, (28) 754.  
   newsteadi, notes, (35) 54.  
   olivina, n.sp., description, (32) 449.  
   spp., notes, (26) 757.  
   ulmi, see Oyster-shell scale.  
 Lepidoscelio viatrix—  
   n.sp., description, (38) 63.  
   notes, (40) 459.  
 Lepiota—  
   procera, prevalence in South Africa, (29) 461.  
   spp., effect on vegetation, (38) 222.  
 Lepisma saccharina, life history and parasites, (35) 657.  
 Leprosy—  
   bacillus, dissemination by house fly, (29) 457.  
   bacillus, studies, (33) 178, 771.  
   in rats, (27) 754; (29) 651.  
   relation to bedbugs, (31) 550.  
   relation to flies, (31) 851.  
   relation to head lice, (27) 858.  
   transmission, (26) 758; (36) 554.  
 Leptinillus validus, parasitism, (31) 60.  
 Leptinotarsa—  
   deceimlineata, see Potato beetle, Colorado.  
   evolution in, (40) 860.  
 Leptinus testaceus, parasitism, (31) 60.  
 Leptopyrsa—  
   explanata, notes, (32) 550; (36) 656.  
   explanata, studies, (34) 451.  
   rhododendri, notes, (32) 550; (37) 563; (40) 753.  
 Leptocarydium alopecuroides—  
   analyses, (36) 334.  
   studies, (38) 66.  
 Leptocera sylvatica in North America, (35) 759.  
 Leptochloa—  
   chinensis, notes, (26) 362.  
   virgata, culture in Hawaii, (32) 729.  
 Leptocoris varicornis, notes, (33) 856; (38) 257; (40) 261.  
 Leptodictya tabida, notes, (29) 353, 357.  
 Leptoglossus—  
   balteatus, notes, (40) 165.  
   membranaceus, notes, (27) 454; (32) 847.  
   occurring north of Mexico, (33) 559.  
   phyllopus on artichoke, (40) 58.  
 Leptohylemyia coarctata—  
   control in Kief, (38) 257.  
   notes, (31) 852.  
 Leptomastix sp., life history, (33) 658.  
 Leptomya n.g. and n.sp., descriptions, (32) 321.  
 Leptophya distinguenda n.sp., description, (37) 563.  
 Leptops hopei, notes, (26) 353.  
 Leptopsylla musculi, bionomics of, (31) 353.  
 Leptosphaeria—  
   cinnamoni n.sp., description, (27) 149.  
   coffeicola, notes, (32) 749.  
   coffeigena, notes, (38) 51.  
   coniothyrium—  
     dissemination by tree crickets, (35) 547.  
     notes, (31) 649.  
     relation to apple canker, (34) 653.  
   cucurbitae n.sp., description, (37) 550.  
   culmifraga, notes, (36) 541.  
   herpotrichoides—  
     notes, (27) 747, 748; (30) 648, 748; (32) 641;  
       (37) 248, 653; (40) 845.  
     studies, (34) 244.  
   napi, notes, (38) 147.  
   sacchari—  
     notes, (26) 445; (29) 345; (36) 846; (37) 553,  
       838; (40) 157, 848.  
     studies, (38) 851.  
   spp., notes, (28) 52; (30) 751; (31) 147.  
   tritici, notes, (32) 843.  
 Leptospora—  
   icterohaemorrhagiae, see Spirochaeta ictero-  
   haemorrhagiae.  
   new genus, notes, (37) 578.  
 Leptospora musae, notes, (27) 50, 449.  
 Leptostroma pinastri, notes, (32) 845.  
 Leptostyla, nearctic, key, (38) 559.  
 Leptostylus—  
   biustus, notes, (28) 855; (38) 363.  
   macula, dissemination of chestnut blight by,  
   (31) 451.  
 Leptostylus—Continued.  
   macula, relation to chestnut bark disease, (35)  
   756.  
   praemorsus, notes, (31) 58.  
 Leptothrips floridensis, notes, (31) 751.  
 Leptothyrium—  
   asparagi n.sp., description, (32) 146.  
   carophillum, notes, (35) 550.  
   caspicum n.sp., notes, (34) 842.  
   pomi, notes, (29) 154; (38) 550.  
   pomi, treatment, (27) 747.  
 Leptotrombidium akamushi—  
   n.g., studies, (37) 858.  
   relation to Leptus autumnalis, (37) 859.  
 Leptopypha, nearctic, key, (38) 559.  
 Leptura zebra, notes, (28) 351; (30) 154.  
 Lepturges spermophagus n.sp., description, (40) 654.  
 Leptus akamushi, studies, (39) 870.  
 Leptus autumnalis, notes, (37) 859.  
 Lepyrionia quadrangularis, life history, (36) 458.  
 Lespedeza, see Clover, Japan.  
 Lestophonus, studies, (36) 757.  
 Lestremiinae, studies, (30) 657.  
 Leteensis Moor Experiment Station, report, (27)  
 723.  
 Lettuce—  
   anthracnose, studies, (39) 355.  
   bacterial—  
     disease, description, (29) 242.  
     diseases, notes, (37) 652.  
     diseases, studies, (33) 742; (39) 455.  
     rot, investigations, (31) 747.  
     stem and leaf disease, (37) 841.  
   Botrytis disease on, (36) 541.  
   breeding experiments, (35) 141.  
   catalytic fertilizers for, (27) 629.  
   culture, (26) 393, 539; (37) 143.  
   culture in Arizona, (39) 745.  
   culture in greenhouses, (26) 740; (33) 42; (38) 344.  
   decay in transit, (35) 444.  
   disease in Rio Grande Valley, (36) 450.  
   diseases in Michigan, (38) 545.  
   diseases, notes, (39) 353.  
   diseases, treatment, (39) 52.  
   drop, description and treatment, (29) 846.  
   drop, notes, (28) 847; (31) 747; (35) 844.  
   electroculture experiments, (28) 326; (30) 788.  
   fertilizer experiments, (34) 520, 532, 821; (39)  
   38, 542, 843; (40) 740.  
   fertilizer requirements, (26) 818.  
   frozen, as affected by rapid thawing, (32) 43.  
   germination in mercury vapor light, (30) 827.  
   Grand Rapids, improving, (38) 142.  
   greenhouse, carbon dioxide for, (39) 38.  
   greenhouse, rot of, (36) 359.  
   growth as affected by electric light, (28) 228.  
   growth in artificial light, (28) 735.  
   growth in shade, (29) 130.  
   handling and precooling, (32) 234; (38) 444.  
   insects affecting, (31) 649; (32) 753.  
   leaf rot, notes, (27) 45.  
   liming experiments, (39) 221.  
   mildew, prevention, (26) 342.  
   mulching v. clean culture, (33) 534.  
   nitrogen content, (39) 542.  
   on acid soils, (39) 115.  
   prickly, rust of, (33) 548.  
   Puccinia disease of, (28) 241.  
   purin content, (40) 205.  
   radioactive fertilizers for, (35) 628.  
   response to carbon dioxide, (40) 820.  
   root knot, notes, (36) 349.  
   rot, treatment, (28) 446; (39) 249.  
   Sclerotinia disease of, (29) 646.  
   Sclerotinia libertiana affecting, (26) 647.  
   sclerotinose, studies, (26) 448.  
   seed, germination tests, (26) 44.  
   seed, production, (38) 142.  
   seedlings, damping-off, (37) 651.  
   seeds, large v. small, (31) 634.  
   sprayed, arsenic on, (38) 55.  
   storage experiments, (31) 533.  
   typhoid bacilli on, (27) 766.  
   varieties, (38) 344.  
   variety tests, (39) 745.  
   watering, continuous, (37) 543.  
   wild, rubber from, (29) 241.  
 Leucaena glauca—  
   analyses, (29) 215.  
   as green manure for tea, (30) 43.  
   as shade for coffee, (34) 535.

- Leucania**—  
*pseudargyria*, notes, (35) 553.  
*unipuncta*, *see* Army worm.
- Leucas pechuelii**, analyses and digestibility, (27) 871; (32) 167.
- Leucaspis**—  
*japonica*, notes, (34) 752; (35) 54.  
*pini* in Argentina, (39) 560.
- Leucin**—  
 anhydrid, a protein-hydrolysis product, (36) 804.  
 as source of ammonia, (29) 723.  
 assimilation by plants, (26) 32.  
 conversion into glycocoll, (29) 64.  
 effect on ammonia production and use in killed plants, (28) 328.  
 effect on baking quality of flour, (26) 356; (30) 555.  
 in sugar cane juice, (30) 15.  
 ingestion, effect on metabolism, (28) 867.
- l-Leucin** in sweet clover silage, (37) 802.
- Leucite**—  
 as source of potash, (26) 426; (27) 23, 323; (30) 216, 221; (34) 328; (39) 218.  
 decomposition by soil bacteria and yeast, (31) 121.  
 effect on activity of soil bacteria, (31) 821.  
 fertilizing value, (27) 725; (29) 319.  
 solubility in sulphurous acid, (36) 414.
- Leucite lavas**, Italian, as source of potash, (39) 219.
- Leucocyte**—  
 dissolving immune bodies, (30) 477.  
 ferments and antiferments, notes, (32) 78.  
 tube, description, (31) 209.
- Leucocytes**—  
 as affected by fasting, (30) 866.  
 bactericidal properties, (26) 175; (27) 882.  
 bactericidal substances, (27) 181.  
 blood and exudate, phagocytic activity, (29) 881.  
 counting, (26) 779.  
 counting in milk, (29) 208.  
 effect on reaction of milk, (28) 680.  
 exudate, effect on antibody formation, (26) 278.  
 fixation of tetanus antitoxin by, (26) 177.  
 fixation of toxins by, (34) 275.  
 from immunized donkeys, phagocytic power, (28) 677.  
 germicidal properties, (26) 883.  
 in milk, (26) 370; (29) 473; (31) 372; (33) 382.  
 of blood and pus, new enzyme of, (38) 583.  
 of human blood, ferment index, (26) 83.  
 protective value in animal diseases, (32) 876.  
 rôle in immunity, (33) 477.  
 rôle in metabolism of carbohydrates, (36) 265.
- Leucocytic**—  
*bacteriolysin*, relation to body fluids, (31) 178.  
 extract, therapeutic value, (29) 500; (31) 377.  
 reaction in infection and intoxication, (26) 83.
- Leucocytosis**, digestive, studies, (40) 71.
- Leucocytotherapy**, notes, (38) 588.
- Leucotoxozoon**—  
*anatis*, notes, (33) 483; (37) 483.  
*piroplasmoides*, notes, (27) 188.  
*struthionis*, notes, (28) 683.
- Leucostoc mesenteroides**, notes, (29) 153.
- Leucophaea surinamensis**, notes, (39) 761.
- Leucopholis rorida**, notes, (35) 467.
- Leucopis**—  
*bella*, notes, (29) 455.  
*grandicornis*, notes, (27) 656.
- Leucoplasts**, primordia of, (39) 332.
- Leucoptera**—  
*coffeella*, *see* Coffee leaf miner.  
 new genus allied to, (40) 757.
- Leucosin**, determination in flour, (27) 498.
- Leucosphaera balsellii**, analyses and digestibility, (27) 871; (32) 167.
- Leucotactic processes** in the animal body, (33) 476.
- Leucotermes**—*see also* *Termes*.  
*flavipes* notes, (35) 54; (38) 157.  
*lucifugus*, notes, (27) 555.  
 (Reticulitermes) *speratus* n.s.p., description, (35) 255.  
 sp., remedies, (36) 355.  
 spp., investigations, (32) 755.
- Leukemia**—  
 and pseudoleukemia in fowls, (38) 179.  
 in fowls, studies, (29) 285; (35) 283; (36) 483.  
 radium treatment of, effect on metabolism, (40) 566.  
 transmission by bedbugs, (31) 550.
- Levan**, occurrence in sugar, (28) 504.
- Levecs**—  
 building by hydraulic dredge, (32) 589.  
 building in California, (30) 289.  
 construction and maintenance, (32) 187.  
 effect on river stages, (26) 417.  
 enlargement, methods and cost, (35) 780.  
 in southeastern Missouri, (33) 780.  
 laws in Indiana, (35) 787.  
 tables for level section, (31) 354.
- Levogulosane**, possible formulas, (40) 110.
- Levulosans**, hydrolysis of, (31) 314.
- Levulose**—  
 absorption by plants, (27) 635.  
 absorption in the intestines, (28) 763.  
 as protective agent for enzymes, (26) 504.  
 determination in presence of glucose, (37) 507.  
 heat of combustion, (26) 160.  
 humification, (38) 26.  
 in Fucoidae, (29) 566.  
 in grape leaves, (27) 731.  
 preparation, (29) 803.  
 reducing power, (35) 416.
- Levuluria** in trypanosomiasis, (30) 381.
- Liautard**, A. F., biographical sketch, (39) 200.
- Libertella** sp. on pimento, (39) 849.
- Libocedrus decurrens**, commercial importance, (38) 731.
- Libraries**, rural, notes, (30) 496.
- Licaria guianensis**, studies, (30) 347.
- Lice**—  
 and nits, destruction in clothing and blankets, (38) 859.  
 and their relation to disease, (37) 762.  
 as affected by heat, (40) 547.  
 as carriers of swine fever, (31) 884.  
 asymmetrical bird, notes, (38) 56.  
 bird biting, distribution and species forming among, (29) 53.  
 biting and sucking, notes, (29) 454.  
 biting, remedies, (39) 360.  
 body and head, life history and habits, (38) 159.  
 body, biology, (35) 460.  
 body, destruction with cyanid gas, (36) 456.  
 body, remedies, (34) 356, 854; (35) 854; (36) 551.  
 borne diseases, prevention, (40) 456.  
 control by laundrying, (40) 353, 551.  
 destruction, (35) 94.  
 destruction by heat, (36) 356.  
 destruction on hogs, (37) 882.  
 disease transmission by, (40) 550.  
 head, relation to leprosy, (27) 858.  
 on cattle, (40) 651.  
   hogs, (40) 652.  
   horses, control, (40) 684.  
   poultry, (32) 481; (35) 183; (37) 357; (40) 754.  
 relation to recurrent fever, (29) 479.  
 relation to trench fever, (39) 658.  
 remedies, (33) 98; (36) 853; (39) 360, 864; (40) 61, 165, 631, 752.  
 studies, (37) 850; (40) 355.  
 transmission of—  
   poliomyelitis by, (28) 753.  
   Trypanosoma evansi by, (28) 756.  
   typhus fever by, (26) 759; (33) 857.
- Lichens**—  
 as food for animals and men, (34) 164.  
 destruction on fruit trees, (33) 857.  
 heat development of, (31) 323.  
 of Great Britain, treatise (27) 25.
- Licorice**—  
*Rhizoctonia* disease of, (35) 48.  
 wild, geographical distribution, (26) 335.
- Lidopus** n.g. and n.sp., description, (38) 560.
- Liebig**, J. von, biographical sketch, (32) 109.
- Life**—  
 insurance for farmers, (27) 794.  
 mechanistic conception, (27) 368.  
 mechanistic conception, treatise, (28) 875.  
 nature, origin, and maintenance, (27) 869.  
 origin of, (30) 129.  
 zones of New Mexico, (29) 755.  
 zones of Wyoming, (38) 255.
- Light**—*see also* Sunlight.  
 action on living organisms, (36) 224.  
 action on organic compounds, (40) 425, 423.  
 and mass impulse, laws concerning, (35) 431.  
 as factor in forest growth, (37) 45.  
 as production factor in forestry, (26) 745.  
 colored, effect on plants, (29) 526.

## Light—Continued.

- determination of intensity, (29) 408.  
 effect on—  
   beet seeds, (29) 332.  
   carbon dioxide production in plants, (29) 324.  
   chlorophyll in algae, (26) 431.  
   chlorophyll production, (28) 731.  
   curing of tobacco, (38) 239.  
   crop yields, (30) 135.  
   development of sugar beets, (27) 642.  
   elimination of oxygen, (28) 801.  
   enzymes, (28) 110.  
   etiolated leaves, (33) 826.  
   flowering of plants, (27) 827.  
   formation and germinability of seeds, (29) 526.  
   germination of seeds, (26) 131, 820, 821; (27) 220, 243, 444; (28) 327, 826; (29) 421, 525, 828, 836; (30) 522, 531; (31) 222, 227, 323; (35) 222, 523, 632.  
   germination of Sphaeropsidales, (38) 225.  
   germination of tobacco, (38) 127.  
   growth and development of trees, (32) 144.  
   growth of cucumbers, (30) 142.  
   growth of elms, (28) 344.  
   growth of sugar beets, (28) 825.  
   metabolism, (29) 567.  
   metabolism in white dogs, (31) 563.  
   plant growth, (27) 521; (28) 227; (29) 421, 526; (33) 128; (34) 223; (35) 129.  
   quality of oak wood, (27) 542.  
   sugar formation in beets, (30) 234.  
   toxicity of magnesium nitrate, (38) 224.  
   transpiration of leaves, (28) 529; (31) 222.  
   transpiration of succulent plants, (26) 430.  
   tubercle bacilli, (33) 282.  
   woody plant seedlings, (30) 430.  
 extinction in atmosphere in region of the ultra-violet, (32) 810.  
 factors affecting in greenhouses, (29) 741.  
 intensities, measurement, (37) 821.  
 intensity and substratum as related to germination, (33) 826.  
 intensity, determination, (26) 532.  
 leaf injury or loss due to, (35) 243.  
 measurement, (38) 629.  
 measurements in forests, (30) 45.  
 measurements in spruce stands, (26) 745.  
 measuring chemical intensity, (28) 37.  
 precipitation of iron by, (26) 326.  
 precipitation, relation to alkali, (27) 816.  
 rays, effect on protoplasmic streaming, (35) 130.  
 relation to—  
   chlorophyll, (31) 127, 222; (33) 29.  
   formation of essential oil, (33) 726.  
   formation of formaldehyde, (29) 132.  
   leaf fall, (27) 221.  
   plant growth, (36) 327.  
   plant succession, (29) 218.  
   powdery mildews, (30) 747; (33) 244.  
   tree growth, (36) 242.  
 requirements of germinating seeds, (33) 826.  
 requirements of plants, studies, (27) 221., rôle in vegetation, (27) 330.  
 sensitivity of foliar organs, (37) 222.  
 sky, polarization, (38) 812.  
 stimuli, transmission in *Avena* seedlings, (28) 529.  
 Lighting—  
   handbook (31) 387.  
   installations for residences, (31) 293.  
   plans for farms, (31) 185.  
   plants, gasoline, notes, (28) 291.  
   systems for country homes, (36) 491.  
 Lightning—  
   at Mount Wilson observatory, (31) 615.  
   ball, on Puy de Dome, (36) 419.  
   conductors, notes, (28) 188.  
   conductors, studies (28) 788.  
   crushing of copper tube by, (34) 118.  
   damage near San Francisco, (29) 121.  
   danger of various trees, (27) 444.  
   discharge, phenomena of, (26) 214.  
   effect on coconut palms, (35) 250.  
   flashes, notes, (32) 210.  
 injury to—  
   citrus trees, (40) 645.  
   cotton and tomato plants, (33) 321.  
   grapevines, (40) 645.  
   herbaceous plants, (40) 645.

## Lightning—Continued.

- injury to—continued.  
   kale, (38) 149.  
   potatoes and cotton, (33) 345.  
   sugar cane, (38) 250.  
   protection against, (29) 88; (33) 321; (34) 416; (38) 15.  
   relation to forest fires, (28) 50; (37) 512.  
   rods, efficacy, (34) 416.  
   rods, notes, (31) 572; (35) 890.  
   stroke, peculiar, (27) 414.  
   strokes, data on, (34) 510.  
 Ligniera—  
   development of fungi, (27) 46.  
   isoetis n.sp., description, (40) 249.  
   n.spp., descriptions, (31) 145.  
 Lignin—  
   formyl and acetyl groups in, (27) 310.  
   humification, (38) 26.  
   liquor as binder for roads, (33) 688.  
 Lignocellulose—  
   and animal assimilation, notes, (29) 65.  
   as affected by ozone, (30) 711.  
 Lignoceric acid from rotten oak wood, (36) 502.  
 Lignum nephriticum mexicanum, source of, (33) 740.  
 Lignum vitæ substitutes, (40) 640.  
 Ligula simplicissima affecting waterfowl, (29) 784.  
 Ligustrum vulgare, formation of fatty acids in, (26) 801.  
 Ligyrus—  
   gibbosus, life history, (37) 567.  
   rugiceps, see Sugar-cane beetle.  
   tumulosus, notes, (36) 753.  
 Lilac—  
   borer, notes, (28) 155.  
   bud sport on, (39) 244.  
   disease, description and treatment, (29) 249.  
   leaf roll, description, (30) 849.  
   trunk disease, notes, (31) 750.  
 Lilacs—  
   as affected by tarring roads, (26) 432.  
   culture, (35) 450.  
   forcing experiments, (28) 435.  
   forcing with radium, (27) 438.  
   history and propagation, (35) 345.  
 Lilies—  
   culture, (35) 450.  
   Easter, aerial bulbs on stems, (38) 446.  
   handbook, (26) 47.  
   nectar secretion, (37) 633.  
   treatise, (29) 341.  
 Liliun croceum, carotinoid content, (31) 803.  
 Lily pollen, longevity, (38) 446.  
 Lily-of-the-valley—  
   culture, (26) 239.  
   fertilizer experiments, (26) 239.  
   forcing experiments, (34) 835.  
   fungus disease, (27) 252.  
   nematodes affecting, (31) 56.  
 Limacinula—  
   caucasica n.sp., description, (36) 245.  
   javanica, notes, (28) 241.  
 Limax—  
   flavus, notes, (40) 56.  
   maximus, biology and remedies, (40) 55.  
 Limber neck in fowls, (40) 176.  
 Lime—see also Liming.  
   absorbed, determination in soils, (30) 215.  
   agricultural—  
     analyses, (39) 329.  
     degree of fineness, (30) 222.  
     determining value, (40) 815.  
   air-slaked, for alfalfa, (37) 34.  
   analyses, (26) 714; (27) 327; (28) 326, 626, 841; (29) 119, 520; (31) 122, 424; (32) 520; (33) 820, 821; (34) 426, 726; (35) 128, 631, 728; (36) 123, 821; (37) 219, 428, 818; (38) 521; (40) 517.  
   analyses and use, (28) 726.  
   and limestone, analyses, (39) 121.  
   and magnesia requirements of plants, (28) 820.  
   and marl, comparison, (40) 321.  
   application, (36) 123.  
   arsenite, analyses, (26) 65.  
   as factor in soil fertility, (40) 300.  
   as fertilizer, (32) 126, 127.  
   as neutralizer in dairy products, (29) 798.  
   as top dressing for pastures, (29) 632.  
   barrel act, Federal, (37) 723.  
   barrels, standard for, (35) 598.

Lime—Continued.

- bread, description, (30) 859.
- burning, (29) 590.
- burnt, fertilizing value, (30) 822; (39) 626.
- burnt shell, fertilizing value, (33) 131.
- burnt, storing, (36) 123.
- carbonate from causticizing plant, analyses and fertilizing value, (31) 125.
- caustic, effect on soil fertility, (32) 399.
- caustic, injury to plant growth, (35) 429.
- caustic, v. limestone, (30) 822.
- chemistry of, (28) 223; (30) 822.
- chlorinated, as a soil ameliorant, (30) 140, 822.
- compounds, analyses, (40), 517.
- compounds in soils, (26) 322.
- cost in Connecticut, (28) 626.
- cost of, (34) 520.
- cost of burning, (40) 816.
- crushing on the farm, (36) 821, 822.
- cyanid as winter spray for fruits, (30) 641.
- deterioration on keeping, (39) 729.
- determination—
  - as calcium sulphate, (38) 312.
  - in ash of cereals, (26) 807.
  - cow feces, (30) 12.
  - peat soils, (39) 504.
  - plant ashes, (29) 609.
  - soils, (27) 514; (36) 299, 611.
- different forms, comparison, (40) 125, 322.
- diseases, notes, (28) 545.
- displacement by water in leaves, (29) 219.
- distribution and loss in soils, (29) 128.
- distribution in loam soils, (31) 618.
- effect on—
  - action of phosphates, (35) 326.
  - alfalfa, (28) 737, 830.
  - alkali tolerance of wheat seedlings, (27) 500; (29) 322.
  - ammonia fixing power of soils, (27) 322.
  - ammonifying and nitrifying efficiency of soils, (32) 818.
  - apples, (29) 438.
- effect on availability of—
  - nitrogen, (28) 724.
  - phosphates, (26) 427; (28) 223.
  - phosphoric acid, (26) 321.
  - soil organic matter, (31) 124.
  - soil potash, (36) 519.
- effect on—
  - bacterial activity of soils, (34) 623.
  - basic slag, (39) 25.
  - cement mortar, (40) 786.
  - clover, (28) 136; (33) 333.
  - composition of crimson clover, (34) 132.
  - cranberries, (30) 143.
  - finger-and-toe disease, (26) 630.
  - grapes, (31) 339; (34) 221.
  - grass lands (30) 133, 134.
  - growth of conifers, (33) 739.
  - humus content of soils, (38) 814.
  - inoculated soil, (39) 519.
  - loss of plant food from soils, (35) 216, 623.
  - lupines, (35) 441.
  - maturity of cotton, (31) 40.
  - moor soils, (29) 823; (34) 18.
  - nitrification, (26) 721; (33) 620.
  - nitrification and bacterial content of acid soils, (40) 620.
  - nitrification in soils, (28) 217; (29) 21, 622.
  - nitrogen content of soy beans, (28) 721.
  - organic compounds in soils, (26) 322.
  - peat soils, (30) 120.
  - phosphate reversion, (39) 521.
  - plant growth, (32) 622; (36) 212.
  - potash absorption, (39) 728.
  - soil acidity, (38) 620; (40) 124.
  - soil aldehydes, (36) 424.
  - soil bacteria, (27) 720.
  - soil fertility, (37) 219.
  - soil granulation; (26) 420.
  - soil nitrogen, (26) 320.
  - soils, (27) 218; (28) 820; (29) 210; (30) 127, 220; (31) 220; (35) 429, 727.
  - soy beans, (39) 741.
  - strawberries, (34) 150; (38) 639.
  - strength of cement mortars, (36) 286.
  - sulphate of ammonia, (26) 320.
  - sulphur content of soils, (38) 327.
  - superphosphate, (39) 119.
  - tea seedlings, (33) 842.

Lime—Continued.

- effect on—continued.
  - utilization of nitrogen in acid soils, (36) 819.
  - vegetation, (26) 325.
  - water-soluble nutrients in soils, (40) 124.
  - yield and composition of oats, (26) 429.
  - yield and nitrogen content of corn, (35) 816.
  - yield of alfalfa, (31) 228.
  - yield of apples, (38) 244.
  - yield of cotton, (38) 534, 816.
  - yield of peaches, (33) 242.
- examination, sampling, and guaranty of, (33) 110.
- feed, analyses, (26) 267; (27) 570.
- feed, methods of analysis, (29) 311; (31) 806.
- feeding value, (28) 265.
- fertilizing value, (26) 630, 725; (27) 32, 429, 436, 638, 639, 831, 835; (28) 123, 124, 520, 820; (30) 25, 519, 526; (31) 424; (33) 227; (34) 129, 132, 520, 621; (35) 22, 323, 535, 629; (36) 122; (37) 214, 626, 733; (38) 133, 217, 230, 422.
- for acid soils, (32) 812.
- Alabama soils, (27) 24.
- alfalfa, (34) 138.
- cotton, (31) 630.
- cranberry bogs, (31) 442.
- flax, (32) 136.
- fowls, (31) 569.
- Missouri soils, (26) 434; (33) 212, 213, 214, 215.
- orchard soils, (36) 724.
- South Carolina soils, (28) 726.
- forms for grassland, (40) 824.
- from manufacturing wastes, (38) 22.
- grinding law in Maryland, (37) 219.
- hydrated—
  - effect on mortar and concrete, (30) 889; (31) 387, 687.
  - for concrete roads, (34) 787; (35) 86, 291.
  - fungicidal value, (39) 548.
  - tests and uses, (33) 487.
- importance in plant and animal nutrition, (34) 662.
- in New Zealand soils, (35) 715.
- phosphatic slag, (26) 34, 205.
- road concrete, (40) 788.
- soil as affected by kainit, (33) 326.
- industry in United States, (32) 324, 424.
- injurious to fish, (29) 821.
- injurious to small fruits, (29) 40.
- insecticidal value, (37) 262.
- inspection in Massachusetts, (27) 327.
- inspection in Ohio, (36) 123.
- inspection in Pennsylvania, (37) 220, 818.
- inspection law in Maryland, (27) 727; (33) 820; (34) 426.
- long-continued use, (34) 128, 132.
- loss from soils, (26) 620; (27) 321; (29) 211; (35) 813.
- metabolism, relation to sexual glands, (28) 370.
- mixing with flowers of sulphur, (34) 51.
- mud, fertilizing value, (26) 630.
- neutralizer, detection in dairy products, (37) 313.
- niter, *see* Calcium nitrate.
- nitrate as winter spray for fruits, (30) 641.
- nitrogen, *see* Calcium cyanamid.
- notes, (27) 326; (30) 27.
- of feeding stuffs, digestibility, (40) 769.
- of Fiji, analyses, (36) 319.
- of Thomas slag, efficiency, (29) 823.
- oils, expressed and distilled, notes, (30) 116.
- phosphate, basic, analyses, (39) 222.
- potash, fertilizing value, (26) 526.
- potash, preparation and use, (27) 326.
- production and use in United States, (31) 125; (36) 123.
- production in 1913, (31) 726.
- production in 1917, (39) 329; (40) 26.
- production in United States, (28) 223.
- products, analyses, (30) 822.
- products, waste, as fertilizer, (35) 24.
- refuse, analyses, (32) 32.
- relation to—
  - cold resistance in plants, (39) 525.
  - decomposition of organic matter in soil, (39) 127.
  - dry spot of cereals, (29) 46.
  - grape chlorosis, (26) 344.
  - magnesia in soils, (36) 519.

**Lime—Continued.**

- removal from soils by smelter fumes, (28) 623; (31) 322.
  - requirement of—
    - animals, (29) 65; (31) 864.
    - lupines, (33) 133.
    - man, (30) 367.
    - plants, (27) 824; (28) 820; (39) 514.
    - soils, *see* Soils, lime requirement.
  - resorption from pasteurized milk, (27) 282.
  - resources of Pennsylvania, (34) 133.
  - review of investigations, (27) 128.
  - rock, ground, fertilizing value, (36) 425.
  - salts, effect on solubility of phonolite, (29) 319.
  - siliceous, use as fertilizer, (29) 520; (30) 127, 822.
  - slaked, fertilizing value, (26) 817; (34) 725.
  - slaking experiments, (36) 123.
  - soil concretions due to, (32) 215.
  - solubility in epidote, (40) 812.
  - sources for plants, (32) 622.
  - sterilization of—
    - soils by, (29) 730; (30) 399; (31) 519; (32) 32.
    - water by, (29) 814; (34) 286.
  - trass, zeolitic properties, (29) 518.
  - trees, *see* Limes.
  - use, (32) 624, 723.
  - use against finger-and-toe disease, (26) 342; (29) 752; (31) 218, 842; (35) 522.
  - use against mosses, (29) 741.
  - use in agriculture, (26) 34; (28) 223; (32) 218, 424; (33) 26; (34) 27, 426; (35) 220; (36) 429, 723; (37) 218, 219, 629; (39) 724.
  - use in greenhouses, (33) 42.
  - use in Scotland, (31) 424.
  - use on—
    - acid soils, (36) 514.
    - calcareous sugar-cane soils, (37) 723.
    - California soils, (30) 627.
    - Iowa soils, (32) 212; (37) 24.
    - Missouri soils, (37) 428.
    - moor soils, (38) 132.
    - pastures, (26) 436.
    - peat soils, (37) 134, 135.
    - soils rich in magnesia, (35) 324.
    - swamp land, (29) 223.
    - Tennessee soils, (39) 120.
    - the farm, (26) 899.
  - use with—
    - barnyard manure, (34) 128.
    - blackleaf, (38) 40, 159.
    - nitrogenous fertilizers, (35) 124; (39) 623, 624.

- Limestone—**
- action on acid soils, (40) 423.
  - analyses, (26) 127, 715; (27) 327; (28) 626; (30) 822; (31) 122; (32) 424, 520; (33) 723, 820, 821; (35) 430; (36) 27; (38) 626; (39) 430.
  - analyses and use, (28) 726.
  - composition, (37) 195.
  - decomposition and utilization, (37) 219.
  - degree of fineness, (39) 25, 220, 222; (40) 423, 720.
  - deposits in South Carolina, (34) 725.
  - deposits in Victoria, (28) 223.
  - dolomitic v. high-calcium, (40) 423.
  - effect of fineness, (34) 133, 821; (37) 428; (38) 21, 220.
  - effect on—
    - carbon dioxide content of soil air, (39) 516.
    - clover and sorrel, (35) 529.
    - plant growth, (35) 726.
    - soil bacteria, (26) 428; (38) 818.
  - fertilizing value, (26) 817; (28) 737; (38) 124.
  - for Kentucky soils, (35) 122.
  - peaty pastures, (36) 740.
  - soil improvement, (35) 727.
  - southern soils, (31) 322.
  - from North Island, New Zealand, analyses, (35) 24.
  - ground—
    - analyses, (31) 424, 823; (34) 521.
    - analyses and use, (37) 523.
    - availability in relation to fineness, (35) 631.
    - diffusion in soils, (29) 128.
    - effect on composition of barley, (34) 132.
    - effect on decomposition of green manure, (34) 130.
    - fertilizing value, (27) 422; (29) 224; (30) 822; (31) 731; (33) 227; (34) 132, 725; (36) 122.
    - for acid silt and clay soils, (37) 420.
    - for acid soils, (33) 26, 220.
    - notes, (34) 294, 796.
    - use on soils, (37) 818.
  - home grinding, (39) 120.
  - injurious to citrus fruits, (37) 656; (39) 458.
  - inspection, (40) 622.
  - loss from soils, (40) 423.
  - magnesian and nonmagnesian, comparison, (32) 518.
  - magnesium v. calcium, (39) 127, 220, 622, 626; (40) 125.
  - marls and shells, analyses, (36) 821.
  - media, growth of sorrel in, (40) 40.
  - methods of analysis, (34) 609.
  - mixing with superphosphate, (34) 26.
  - of Canterbury Province, New Zealand, (36) 220.
  - of New York, (34) 725.
  - of Ohio, analyses, (39) 521.
  - of Queensland, analyses, (30) 421.
  - resources of Michigan, (37) 428.
  - resources of Missouri, (37) 428.
  - resources of Pennsylvania, (38) 22; (40) 816.

- Limestone**—Continued.  
 tester, description, (34) 806; (36) 614.  
 tests, (37) 428.  
 use with green manures, (39) 622.
- Lime-sulphur**—  
 dips, field test for, (32) 612.  
 injury, investigations, (30) 152.  
 lead arsenate mixture, studies, (29) 802.
- Lime**—  
 analyses, (26) 715; (27) 344, 441; (29) 42, 235;  
 (31) 49, 142; (32) 169; (33) 47; (34) 436, 639;  
 (36) 113; (37) 243; (38) 643; (39) 240.  
 as ovidic for codling moth, (28) 857.  
 as summer spray, (26) 741; (29) 146; (33) 46.  
 causing apple drop, (40) 57.  
 chemistry of, (26) 405; (31) 407; (36) 311.  
 composition, (31) 439; (32) 410; (33) 613; (39)  
 508.  
 composition and evaluation, (35) 112.  
 concentrate, preparation, (33) 154.  
 dilution table for, (31) 636.  
 dry, (39) 349.
- mixture, effect on**—  
 apples, (28) 47.  
 peaches, (29) 640.  
 potatoes, (27) 151, 237; (28) 433.  
 solubility of lead arsenate, (33) 710.  
 transpiration of potatoes, (31) 825.
- mixture**—  
 for potatoes, (33) 40.  
 for San José scale, (39) 465.  
 from industrial wastes, (38) 757.  
 fungicidal value, (27) 253; (28) 652; (31) 439,  
 749; (32) 158; (33) 648; (35) 39, 149, 151, 447;  
 (37) 447; (39) 548, 652; (40) 251, 253.  
 home preparation, (29) 543.  
 injurious effects, (31) 439.  
 injurious ingredients of, (29) 41.  
 insecticidal value, (26) 755; (28) 658; (31)  
 409; (32) 846; (37) 53; (40) 162, 163.  
 manufacture, effect on eyesight, (30) 16, 618.  
 methods of analysis, (29) 797; (33) 613; (34)  
 806; (35) 207.  
 microorganisms in, (31) 205.  
 notes, (27) 757.  
 preparation, (26) 539; (28) 841; (40) 801.  
 preparation and use, (27) 39, 242; (28) 247,  
 639; (31) 541, 740; (32) 338; (33) 242; (37)  
 143, 544; (38) 844.  
 properties, (28) 639.  
 self-boiled, fungicidal value, (34) 146.  
 sludge, analyses, (32) 520.  
 substitute for, (37) 251.  
 tests, (27) 439, 440; (28) 48; (35) 549.  
 use against apple scab, (28) 448; (31) 346.  
 against citrus insects, (31) 549.  
 against gooseberry mildew, (29) 249.  
 against larch moth, (33) 859.  
 in seed treatment, (40) 346.  
 of flour paste in, (29) 459.  
 with lead arsenate, (31) 108; (38) 258; (39)  
 251.  
 with nicotine, (40) 162.  
 with oil emulsions, (40) 453, 454.
- v. Bordeaux mixture for apple diseases,  
 (26) 45.  
 v. Bordeaux for potatoes, (35) 831.  
 valuation, (33) 252.  
 value and use, (39) 348.
- Limettin**, notes, (30) 116.
- Limewater**—  
 addition to milk, (36) 559.  
 effect on seed germination, (26) 131.  
 neutralizing cream with, (38) 281.
- Limex agrestis**, notes, (29) 158.
- Liming**—*see also* **Liming**.  
 bacteriological effects, (26) 428; (27) 422.  
 cranberry soils, (40) 214.  
 effect on—  
 bacteria in peat soils, (38) 420.  
 barren soils, (31) 819.  
 composition of turnips, (29) 418.  
 crop production, (28) 624.  
 nitrification, (35) 119.  
 nitrogen content of soil, (38) 213.  
 nitrogen content of soy beans, (34) 632.  
 yield of cotton, (29) 430.  
 effects in cylinder experiments, (40) 321.
- Liming**—Continued.  
 experiments, (26) 324; (27) 638, 833; (28) 624;  
 (29) 25, 215; (32) 31, 132, 518, 624; (34) 132, 133,  
 725; (36) 26, 829; (37) 124; (38) 218; (39) 23, 116,  
 127, 425, 429, 517, 620, 625, 729, 737; (40) 134,  
 321, 515, 724.  
 experiments—*see also special crops*.  
 in Argentina, (31) 726.  
 in Assam, (37) 427.  
 on DeKalb soils, (38) 219; (39) 22.  
 on Kentucky soils, (39) 421.  
 on moor soils, (39) 437; (40) 229.  
 with greenhouse roses, (30) 344.  
 notes, (27) 24; (28) 223; (29) 623; (31) 125, 322;  
 (33) 98; (34) 294; (38) 124, 520, 819; (39) 724.  
 paper on, (40) 595.  
 Yorkshire soils, (40) 128.
- Limnaea truncatula**, bionomics, (39) 290.
- Limnerium**—  
 blackburni, notes, (31) 249.  
 (Campoletis) prodeniae n.sp., description, (26)  
 352.  
 hawaiiense, parasitic on beet webworm, (26) 250.  
 n.sp., parasitic on alfalfa caterpillar, (32) 58.  
 spp., notes, (27) 262.  
 validum, biology, (27) 359.  
 validum, notes, (27) 261.
- Limnobia spongia**, culture for wild ducks, (33)  
 251.
- Limnophora**—  
 septemnotata, hibernation, (34) 254.  
 sp., notes, (27) 560.
- Limold**, fertilizing value, (36) 122.
- Limonia warneckei** fruit, analyses, (35) 806.
- Limonia**—  
 californicus, remedies, (36) 758.  
 californicus, studies, (30) 758.  
 discoides, notes, (32) 651.
- Limothrips denticornis**, notes, (28) 452.
- Limquats**, paper on, (29) 839.
- Lina scripta**, notes, (27) 755; (30) 154.
- Linaceae**—  
 cyanophoric glucosids in, (35) 819.  
 enzymes of, (28) 502, 503; (31) 610.
- Linamarin**—  
 as affected by enzymes, (28) 503.  
 of Java beans, notes, (28) 502.
- Linase**, activity of, (28) 502, 503.
- Lincoln Institute**, Missouri, notes, (30) 797.
- Linden**—  
 American, as a medicinal plant, (30) 145.  
 borer, notes, (30) 655; (35) 54.  
 forcing experiments (28) 435.  
 leaf spot, notes, (35) 251.  
 moth, snow white, notes, (26) 147.  
 seeds, germination, (33) 343.
- Lindera** spp. oils of, (37) 109.
- Lineshafts**, laying out and putting up, (38) 893.
- Linguatula taenioides**, treatment, (29) 676.
- Linguatulid**, new, from Ecuador, (37) 357.
- Linguatulida** from crocodiles, (37) 357.
- Limnium camphorae**, notes, (31) 676.
- Linkage**—  
 in corn, (39) 331.  
 intensities, calculation, (36) 729.
- Linnaemyia fulvicauda** n. sp., description, (31) 456.
- Linoleic acid** as tetrabromid in cottonseed oil, (32)  
 313.
- Linospora sacchari**, notes, (37) 553.
- Linsed**—  
 cake—  
 acidity, (32) 259; (35) 770.  
 adulteration, detection, (28) 873.  
 agglutinating properties, (31) 774.  
 analyses, (26) 165, 266, 267, 363, 809; (27) 469,  
 570, 670, 775, 872; (28) 464; (30) 169, 268,  
 467; (31) 168, 864; (36) 571.  
 determination of purity, (20) 714.  
 effect on composition of milk fat, (26) 170.  
 for steers, (29) 272.  
 formation of hydrocyanic acid in, (28) 377,  
 378.  
 nutritive value, (28) 673.  
 palatability and nutritive value, (38) 66.  
 residual manurial value, (39) 530.
- meal**—  
 acidity and rancidity, (36) 666.  
 ammonification in soils, (33) 808.

- Linseed—Continued.  
meal—continued.  
analyses, (26) 72, 165, 362, 568, 665, 714; (27) 68, 170, 171, 371, 469, 669, 670, 774, 872; (28) 265, 364, 464, 465, 669, 769; (29) 270, 367, 467, 570, 666, 769; (30) 67, 68, 169, 268, 466, 565, 671, 868; (31) 73, 366, 467, 470, 564, 663, 864; (32) 169, 259, 568, 667, 862; (33) 71, 170, 371, 568, 665, 759, 761, 870; (34) 72, 169, 263, 371, 467, 566, 665; (35) 374, 562, 867; (36) 65, 167, 268, 667, 765; (37) 268, 471, 767; (38) 67, 368, 369, 376, 665; (39) 70, 167, 270, 370, 773; (40) 72, 470, 571, 665.  
ash analyses, (29) 861.  
availability of nitrogen in, (26) 124; (27) 723.  
digestibility, (32) 69.  
meal, effect on—  
breeding power of heifers, (36) 773.  
fetal development, (33) 266.  
milk and butter, (34) 471, 570.  
milk production, (36) 872; (40) 572.  
meal—  
evolution of hydrocyanic acid from, (27) 276.  
feeding value, (39) 775, 784; (40) 278, 874.  
fertilizing value, (30) 835; (40) 127.  
for corn-fed pigs, (38) 474.  
for laying hens, (39) 576.  
for skim-milk fed calves, (34) 265; (36) 369.  
in ration, effect on fertilizing constituents excreted, (39) 576.  
protein for milk production, (36) 671.  
protein, hydrolysis, (26) 201.  
sugar content, (37) 208.  
mucilage, studies, (32) 802.  
oil adulteration, detection, (30) 617.  
analyses, (28) 493; (30) 616.  
chemistry of, (39) 411.  
detection, (28) 412; (29) 613.  
industry, statistics, (39) 9.  
oxygen absorption of, (30) 616.  
physical constants, (35) 312.  
production in United States, (40) 614.  
raw, manganese content, (28) 714.  
raw, specifications, (32) 416.  
refractive index, (27) 614.  
role in glycogen formation, (31) 763.  
studies, (39) 208.  
test for gelatinous matter in, (37) 13.  
toxic effect on rats, (36) 61.  
varieties, (30) 435.  
Lint, determination in cottonseed meal, (34) 13.  
Lintner's scale, notes, (29) 251.  
Linum spp., enzymes of, (28) 503.  
Linum usitatissimum, breeding for fiber, (30) 637.  
Linyphia phrygiana, notes, (29) 256.  
Liodontomerus—  
n.spp., descriptions, (38) 165.  
perplexus n.g. and n.s.p., description, (35) 262.  
spp., studies, (40) 862.  
Liogma nodicornis, biological and systematic studies, (32) 153.  
Liothrips—  
glycinicola n.s.p., description, (26) 553.  
montanus n.s.p., description, (30) 250.  
montanus, notes, (31) 351.  
North American species, (37) 561.  
varicornis n.s.p., description, (27) 454.  
Liotropis contaminatus, notes, (28) 451.  
Lip and leg ulceration in sheep, (31) 880; (33) 774.  
Lip sores, spreading, (40) 283.  
Liparis dispar, see Gipsy moth.  
Liparis monacha, see Lymantria monacha.  
Lipase—  
action, specificity, (30) 806.  
agglutinating properties, (31) 773.  
and fat of animal tissues, correlation, (30) 204.  
castor bean, studies, (27) 712.  
heat-tolerating, notes, (26) 608.  
hydrolysis of chicken fat by, (28) 63.  
in alfalfa, (32) 411.  
castor beans, (32) 803.  
Chelidonium seeds, (32) 19.  
eggs, (28) 64.  
human duodenal contents, (31) 761.  
latex of Euphorbia characias, (31) 410.  
soy beans, (34) 111.  
tobacco plant, (31) 204.  
pancreatic, as affected by inorganic salts, (31) 264.  
Lipase—Continued.  
powdered, preparation, (28) 610.  
production by microbes, (26) 803.  
studies, (28) 610.  
Lipeurus—  
dovei n.n. (*L. lineatus*), (39) 364.  
heterographus, notes, (35) 183.  
Lipins—  
importance in diet during growth, (29) 664.  
monograph, (39) 202.  
of egg yolk, physiological properties, (33) 166.  
role in nutrition, (33) 663.  
Lipochrome, of blood serum of cows, (31) 274.  
Lipoid metabolism in developing chicks, (28) 876.  
Lipoidase, properties, (38) 583.  
Lipoids—  
absorption in the intestine, (33) 166.  
anaphylaxis production by, (31) 773.  
antigenic properties, (28) 880, 885; (29) 782.  
as inhibitors of anaphylactic shock, (32) 678.  
chemical and biochemical properties, (31) 577.  
chemistry and biochemistry of, treatise, (26) 802.  
distribution in human blood, (36) 365.  
effect on nutrition and growth, (33), 462.  
extraction from feeding stuffs, (31) 861.  
immunizing with, (26) 779.  
in egg yolk, (26) 67, 503.  
foods, destruction by heat, (29) 365.  
green plastids, (31) 427.  
immunity, (32) 78.  
Nicotiana, (38) 329.  
necessity for in diet, (31) 762.  
of anemic dogs, (38) 583.  
relation to—  
electrical potential in plant organs, (30) 630  
immune reactions, (35) 881.  
plant respiration, (27) 132.  
vitamins, (32) 561.  
role in nutrition, (26) 766.  
Lipolexis rapae, notes, (28) 162.  
Lipolytic actions, studies, (38) 709.  
Liponyssus—  
bursa, notes, (37) 360.  
n.spp., descriptions, (34) 66.  
Lipovaccines, investigations, (38) 584, 782.  
Lippia wrightii, notes, (29) 441.  
Liquid volumes, standardization, (35) 415.  
Liquids—  
animal and plant, drying, (28) 610.  
apparatus for extraction, (26) 26.  
calculation of volume, (36) 299.  
determination of reaction in, (34) 712.  
evaporation in vacuum, (28) 893.  
solubility in liquids, (38) 616.  
surface condition, (34) 414.  
turbid, flocculation by salts, (32) 121.  
Liquor—  
cresoli saponatus, tests, (31) 383.  
from fermented rice, (29) 118.  
Liquors—  
definitions, (31) 114.  
distilled, examination, (30) 258.  
methods of analysis, (31) 114.  
sulphite-cellulose, utilization, (28) 222; (29) 129  
Lissopimpla semipunctata n.s.p., description, (28) 162.  
Lissorhoptrus simplex—  
investigations, (27) 562.  
notes, (29) 259.  
remedies, (33) 257; (37) 568.  
Lister Institute of Preventive Medicine, papers, (31) 277; (32) 874.  
Listronotus latiusculus, notes, (30) 655.  
Listrophorus gibbus, notes, (35) 80.  
Lita solanella—  
notes, (30) 753.  
studies, (40) 854.  
Litchi—  
culture and use, (38) 43.  
culture experiments, (37) 142.  
erinose, treatment, (37) 142.  
insects affecting, (38) 44.  
nut, composition, (39) 203.  
nut, food value, (40) 173.  
seeds, transportation, (35) 538.  
Lithium—  
bromid, effect on powdery mildew infection, (33) 244.  
carbonate, fertilizing value, (30) 627.

- Lithium**—Continued.  
 compounds as plant food, (35) 728.  
 determination, (27) 609.

     fungus disease affecting, (27) 357.  
     in Colorado, (28) 60.  
     in Nebraska, (26) 655.  
 Locusts—Continued.  
   in Philippines, (26) 347, 857.  
   injurious to alfalfa, (32) 553.  
   injurious to potatoes, (37) 157.  
   invasion in Costa Rica, (35) 55.  
   invasions in Egypt, (37) 561.  
   invasions in Jerusalem, (34) 854.  
   Jola or Deccan, notes, (26) 347.  
   lesser migratory, studies, (36) 153.  
   lessons on, (28) 598.  
   life history and remedies, (37) 661; (38) 54.  
   migratory—  
     in Philippines, (28) 753; (31) 549.  
     in South America, (28) 753; (34) 854.  
     notes, (31) 752; (37) 561.  
     notes, (26) 59; (27) 53; 757, (28) 654; (29) 252, 453, 652, 757; (31) 98; (32) 651; (36) 153; (38) 653.  
     of Nova Scotia, (40) 57, 856.  
     outbreaks in United States, (35) 156.  
     parasite of, (32) 60.  
     parasite of, adult habits, (40) 459.  
     periodical, *see* Cicada, periodical.  
     Philippine, propagation and distribution, (30) 546.  
     poison for, device for sowing, (38) 558.  
     17 year, *see* Cicada, periodical.  
     treatise, (38) 359.  
 Lodgepole pine beetle, notes, (32) 552.  
*Loemopsylla cheopis*, infectiousness, (40) 161.  
 Log rules, limitations and corrections, (34) 538.  
 Log slides, velocity determinations, (32) 48.  
 Logan River basin, profile survey, (36) 583.  
 Loganberries—  
   composition, (39) 9, 411.  
   culture, (29) 148; (31) 441; (38) 643; (40) 150.  
   culture experiments, (28) 436.  
   picking and packing, (33) 47.  
   training, (33) 47; (40) 743.  
   varieties in Oklahoma, (27) 241.  
 Loganberry—  
   beetle, notes, (40) 265.  
   by-products, preparation and use, (31) 414.  
   diseases, notes, (27) 448.  
   diseases, notes and treatment, (28) 748.  
   hybrid origin, (36) 141.  
   juice, analyses, (31) 414.  
   juice, manufacture, (39) 412.  
   oil, juice, and pulp, composition, (38) 203.  
   pollen, germination, (35) 731.  
   wilt, description, (34) 55.  
 Logarithmic curves, fitting by method of moments, (32) 766.  
 Loggerhead sponge, fertilizer from, (31) 622.  
 Logging—  
   cost accounting system, (32) 748.  
   terms, (30) 44.  
   textbook, (30) 44.  
 Logs, errors in caliper measurements, (26) 141.  
 Logs, transportation in French colonies, (30) 447.  
 Logwood as factor in dyestuff situation, (40) 16.  
 Lolium—  
   fungi affecting, (26) 545.  
   multiflorum, analyses and culture, (31) 434.  
   perenne, dissemination by insects, (27) 47.  
   spp., germination as affected by light, (30) 531.  
   spp., seeding on ranges, (30) 35.  
   temulentum—  
     as an adulterant of flour, (26) 710.  
     ceptochoeton, culture in Uruguay, (26) 132.  
     synthesis with fungi, (27) 751.  
 Lonchaea—  
   aenea, notes, (34) 856.  
   chalybea, notes, (28) 854.  
   splendida, notes, (27) 54.  
 Lonchocarpus spp. in Central America and Mexico, (37) 819.  
 Long scale, notes, (32) 56.  
 Longavimbo, notes, (28) 542.  
 Longicorn beetles in Australia, (36) 360.  
 Longicorn larvae, remedies, (32) 246.  
 Longulus scale, notes, (28) 452.  
 Loossia n.g. and n.spp., descriptions, (33) 773.  
 Lophidium chamaeropsis n.sp., description, (33) 842.  
 Lophionema chodati n.sp., description, (35) 448.  
 Lophodermium—  
   brachysporum, notes, (26) 852, 853; (29) 851; (30) 448.  
   chamaecyparisii n.sp., description, (27) 149.  
   generic position, (26) 852.  
   macrosporum, notes, (26) 451; (37) 550.

- Lophodermium—Continued.  
 nervisequum, investigations, (27) 854; (32) 752.  
 nervisequum, notes, (27) 350, 450.  
 pinastri, notes, (28) 652; (30) 152, 545; (32) 845; (37) 458, 550.  
 pinastri, studies, (26) 651.
- Lopholatilus chamaeleonticeps, notes, (34) 557.
- Lophophora williamsii, studies, (34) 336.
- Lophortyx californica—  
 notes, (27) 355.  
 vallicola, eating of alfalfa weevil by, (31) 655.
- Lophyrus—*see also* Neodiprion.  
 abbotii, notes, (26) 147.  
 abietis, notes, (38) 257.  
 hercyniae, notes, (30) 249.  
 indicus n.sp., description, (31) 62.  
 pini, notes, (31) 554.  
 simile, *see* Diprion simile.  
 spp. in Europe, (35) 760.
- Lopidea—  
 media in Maryland, (38) 155.  
 robiniae, description, (35) 255.
- Loquat, crown gall affecting, (28) 447.
- Loquats—  
 host plant of fruit fly, (26) 758.  
 studies, (32) 838.
- Loranthaceae—  
 effect on hosts, (28) 548.  
 osmotic pressure of tissue fluids, (37) 47.  
 tropical, transpiration experiments, (31) 324.
- Loranthus—  
 entebbensis, notes, (35) 45.  
 secundiflorum, notes, (26) 549.  
 sp., habits and relations, (30) 745.  
 sp., parasitic on Para rubber, (26) 345.  
 sphaerocarpus, parasitic on Dracaena, (27) 252.  
 spp. on rubber, (33) 651; (38) 53.  
 theobromae, notes, (36) 846.  
 theobromae, relation to citrus knot, (36) 851.
- Losa, description, (30) 35.
- Lotononis sp., analyses and digestibility, (27) 871.
- Lotus—  
 australis, analyses, (27) 68, 469.  
 borer, studies, (40) 756.  
 corniculatus—  
 culture in Hawaii, (32) 730.  
 fertilizer experiments, (27) 24.  
 hydrogen cyanid in, (27) 30.  
 variation in, (29) 321.  
 nodule, bacteria of, (32) 33.
- Loughridge, R. H., biographical sketch, (37) 496.
- Louisiana—  
 Stations—  
 financial statement, (28) 194.  
 notes, (26) 395; (27) 197, 600; (28) 93, 300, 900; (30) 796; (34) 496; (36) 695; (37) 196, 700; (38) 900; (39) 96; (40) 297, 900.  
 report, (30) 696, 899; (33) 96; (35) 396; (37) 599; (39) 598.  
 report of director, (28) 194.  
 University, notes, (26) 395; (27) 697; (30) 497; (32) 396; (38) 97; (40) 900.
- Louping-ill—  
 in sheep, (29) 681; (36) 83.  
 notes, (26) 383.  
 studies, (40) 383.  
 transmission by ticks, (37) 277.
- Low pressure at Paris, (36) 719.
- Lowlands of Missouri, reclamation, (27) 290.
- Loxostege—  
 similis, *see* Garden webworm.  
 sticticalis—  
 life history, (38) 562.  
 notes, (29) 652; (32) 153.  
 studies, (27) 861; (29) 54, 252.  
 treatment, (26) 648.
- Loxostoma sp. on sugar cane, (33) 560.
- Lubber grasshopper, remedies, (36) 55.
- Lubricants for internal combustion engines, (30) 690; (32) 86.
- Lubricating materials, methods of analysis, (27) 205.
- Lucern, *see* Alfalfa.
- Lucilia—  
 sericata—  
 attacking a live calf, (32) 851.  
 heredity of bristles in, (31) 551.  
 notes, (28) 255; (34) 554; (38) 161.  
 studies, (33) 157.  
 sp., relation to leprosy, (31) 851.  
 spp., hibernation, (38) 262.
- Lues, serodiagnosis, (31) 877.
- Luizet stones, hydrocyanic acid content, (27) 12.
- Lulu kernels and oil, analyses, (37) 14.
- Lumbang oil—  
 analyses, (29) 811.  
 notes, (30) 616.
- Lumber—*see also* Timber and Wood.  
 accounting, notes, (34) 896.  
 and its uses, treatise, (31) 840.  
 camps, conservation of life in, (31) 340.  
 cost of logging and manufacturing, (35) 452.  
 deterioration, (33) 243.  
 drying, (28) 239; (36) 809.  
 effect on lasting quality of paint, (33) 90.  
 estimator, book, (29) 240.  
 industry—  
 by-products in United States, (35) 44.  
 control, (36) 744.  
 in British Columbia, (32) 747.  
 Canada, (26) 544; (28) 644; (30) 46; (32) 841; (35) 347; (36) 244; (37) 245; (38) 146, 147.  
 Java and Madoera, (34) 239.

 Trent watershed, Ontario, (31) 445.  
 United States, (30) 536, 791, 844; (32) 48; (33) 344; (36) 644.  
 United States, handbook, (35) 649.  
 Wisconsin, (31) 444.  
 terms used in, (38) 545.  
 kiln drying, (33) 243; (34) 152.  
 kiln drying, treatise, (38) 46.  
 markets on east coast of South America, (35) 453.  
 mold, prevention, (27) 753.  
 of Philippines, (40) 152.  
 prevention of sap stain in, (26) 339.  
 production in 1914-15, (37) 148.  
 production in 1916, (39) 452.  
 production in 1917, (40) 843.  
 resources of Texas, conservation, (34) 489.  
 round-edge, utilization, (36) 145.  
 storage, (37) 349.  
 substitutes, (38) 248.  
 use by wood-working industries, (38) 751.  
 use on California farms, (40) 90.  
 used by manufacturers in Canada, (26) 644.  
 waste as source of potash, (37) 722.  
 waste, utilization, (35) 843.
- Lumbering—  
 bibliography, (26) 442.  
 in California, (36) 745.  
 operations, flumes in, (31) 485.
- Lumbermen, conditions among in Sweden, (37) 890.
- Lumbricidae of North America, (40) 267.
- Lumbricus rubellus, carbon dioxide exhalation of, (26) 619.
- Lumpy jaw, *see* Actinomycosis.
- Lunar—  
 eclipses in 1917, (38) 812.  
 halo of July 24, 1861, (35) 115.  
 periods, effect on climate, (34) 14.  
 rainbow, (38) 511.
- Lunch—  
 room conducted by Board of Health, New York City, (33) 753.  
 rooms, equipment and management, (35) 368.  
 rooms, treatise, (26) 564.
- Lunches—  
 box, planning, (31) 394.  
 for rural schools, (30) 462.  
 school children, (29) 464, 465; (34) 257.  
 school children in Philadelphia, (31) 660.  
 women clerks in Bank of England, (30) 166.  
 recipes and cost data, (33) 68.
- Lung—  
 distome, intermediate host, (35) 384, 631; (36) 577.  
 plague—  
 in bovines, immunization, (26) 578, 676.  
 notes, (26) 873.  
 prevalence in Prussia, (27) 181.  
 Lungs of mammals, weight of, (29) 476.
- Lungworms—  
 life history and treatment, (35) 182; (37) 179.  
 notes, (35) 878.  
 of sheep and deer, relationship, (30) 284.

- Lungworms**—Continued.  
 studies, (34) 879.  
 thread, in goats, (34) 274.  
 treatment, (35) 488.
- Luperinus californicus**, notes, (38) 157.
- Luperodes varicornis**, notes, (34) 555.
- Lupertus rufipes**, notes, (31) 848.
- Lupine**—  
 anthracnose, notes, (28) 648.  
 chlorosis, treatment, (32) 842.  
 disease, new, (39) 53.  
 flakes, analyses, (28) 873.  
 flakes, analyses and feeding value, (33) 170.  
 flakes for sheep, (29) 572.  
 flakes, preparation and use, (36) 367.  
 forage, effect on milk and butter, (34) 570.  
 radicles as affected by metallic salts, (32) 128.  
 seed as affected by disinfectants, (26) 820.  
 seed, composition, (33) 665.  
 seed, germination as affected by green manures, (33) 331.  
 seed, germination tests, (29) 740.  
 seed phasin, agglutinating properties, (31) 774.  
 shoots, etiolated, absorption of nitrogen by, (35) 435.  
 straw as a ground covering for fir, (30) 446.
- Lupines**—  
 absorption—  
 and excretion of electrolytes by, (32) 824.  
 and secretion of salts by, (34) 224.  
 of salt mixtures by, (36) 128.  
 and mustard, continuous culture, (29) 431.  
 as affected by—  
 distilled water, (30) 825.  
 ether, (26) 127.  
 lime, (35) 441.  
 manganese sulphate, (26) 226.  
 smoke, (31) 521.  
 as coffee substitutes, (40) 864.  
 cover crop for orchards, (37) 833.  
 green manure, (35) 629; (40) 229.  
 poisonous plants, (36) 276.  
 sand binder, (29) 427.  
 assimilation of nitrogen by, (31) 523.  
 bacteria as affected by acidity, (39) 722.  
 behavior of organic substances in, (39) 526.  
 behavior toward ammonium salts, (36) 632.  
 blue, germination as affected by fertilizers, (29) 327.  
 blue, toxicity, (39) 184.  
 composition and digestibility, (27) 669.  
 culture experiments, (40) 238.  
 culture in Rhodesia, (27) 32, 637.  
 culture on moorland, (30) 229.  
 culture under dry farming, (30) 435.  
 description, (32) 474.  
 description and agricultural value, (36) 635.  
 drying, (27) 669.  
 fertilizer experiments, (26) 428, 631; (27) 235; (29) 631; (30) 229; (33) 531.  
 fertilizing value, (32) 216.  
 fungus disease of, (26) 747.  
 germination as affected by Roentgen rays, (28) 128.  
 germination tests, (30) 837.  
 growth as affected by—  
 fertilizer salts, (29) 329.  
 phytin, (28) 128.  
 radioactivity, (28) 731.  
 growth in distilled water, (34) 827.  
 growth in heated soils, (26) 815.  
 growth on volcanic ash, (40) 812.  
 hybridization experiments, (26) 834.  
 inoculation experiments, (30) 735; (31) 131, 524; (32) 433; (35) 322; (40) 822.  
 irrigation experiments, (29) 631.  
 lime intolerance, (27) 722.  
 liming experiments, (33) 133.  
 nitrification, (28) 124.  
 nodule bacteria of, (32) 33.  
 relation of tops to roots, (31) 733.  
 removing bitter flavor, (36) 635.  
 sensitiveness to calcium, (34) 724; (35) 430.  
 stock poisoning by, (39) 184, 787.  
 stored, variations in weight of, (31) 235.  
 toxicity, (39) 184.  
 transformation of nitrogen by, (29) 133.  
 utilization of phosphates by, (31) 733.  
 varieties, (26) 631.  
 white, root system, (32) 634.
- Lupines**—Continued.  
 yellow and blue, seed varieties of, (30) 38.  
 yellow, fertilizing value, (26) 323.
- Lupinosis** in horses, (34) 583.
- Lupinus**—  
 albus, phosphatids in, (27) 203.  
 albus, tropisms of in alkali solutions, (31) 325.  
 angustifolius, analyses, (33) 466.  
 hartwegii, culture in Hawaii, (32) 730.  
 luteus, behavior on lime soils, (31) 425.  
 luteus, enzymatic splitting of arginin in, (39) 733.  
 sericeus, description, (39) 386.  
 spp., notes, (32) 778.
- Lupulin** in hops, (33) 530.
- Lupus viruses**, investigations, (26) 884.
- Luteal cells** and hen-feathering, (40) 665.
- Lutein** in egg yolk, (26) 67, 563; (27) 611.
- Luteins**, constitution of, (30) 501.
- Luyaluya**, notes, (26) 362; (30) 230.
- Lycæna**—  
 baetica, notes, (27) 155.  
 spp., behavior of ants toward larvae, (27) 258.
- Lycenid**, reared in Acacia galls by ants, (31) 352.
- Lychnis**—  
 dioica—  
 chemistry and anatomy of, (34) 522.  
 chlorophyll factors in, (35) 227.  
 hermaphroditism in, (30) 842.  
 primary color factors, (27) 733.  
 inheritance in, (36) 331.  
 inhibiting factors in breeding, (26) 827.
- Lycium barbarum**, localization of betain in, (27) 203.
- Lycoperdon** spp., effect on vegetation, (38) 222.
- Lycopersicin**, formation in tomatoes, (32) 203.
- Lycopin**—  
 and its relation to chlorophyll, (32) 824.  
 development in tomatoes, (29) 132.
- Lycyus**—  
 beetles, remedies, (36) 758.  
 planicollis, egg and manner of oviposition, (35) 357.
- Lyda stellata**—  
 egg parasite of, (26) 557.  
 notes, (30) 249.
- Lygaenematus**—  
 erichsonii, *see* *Nematus erichsonii*.  
 moestus, notes, (29) 861; (30) 53.
- Lygeum spartum**, culture and use, (33) 131.
- Lygidea mendax**—  
 food plants of, (36) 356.  
 notes, (26) 147; (28) 752; (30) 359, 852; (32) 550, 651; (33) 58, 252; (34) 158, 752; (35) 54; (36) 856.  
 oviposition, (34) 255.  
 remedies, (35) 456; (39) 760.  
 scars on apples, (39) 257.  
 studies, (34) 754.
- Lygum spartum**, roots of, (26) 535.
- Lygus**—  
 communis—*see also* Apple bug, green.  
 n.sp., description, (36) 550.  
 novascotiensis n.var., description, (36) 550.  
 invitus, notes, (36) 550.  
 invitus, oviposition, (34) 255.  
 invitus, studies, (30) 358; (36) 457.  
 n.forms, descriptions, (40) 353.  
 pratensis, *see* Tarnished plant-bug.  
 revision and biology, (38) 461.  
 spinolae, notes, (38) 57.  
 studies, (40) 353.
- Lymantria monacha**, investigations, (28) 755.
- Lymexylonidae**, structure and biology, (28) 858.
- Lymph and blood**, amino nitrogen and glucose in, (39) 670.
- Lymph antibodies**, origin, (35) 73, 279.
- Lymphadenitis**—  
 caseous, in sheep, (35) 574.  
 in man, (33) 450.
- Lymphadenoma**, transmission by bedbugs, (31) 550.
- Lymphangitis**—  
 epizootic, (39) 190, 283, 291, 339, 679, 789; (40) 85, 289, 586, 885.  
 epizootic—  
 causative organism, (37) 377.  
 diagnosis, (38) 886.  
 immunization, (38) 785.  
 in France, (37) 692.  
 in Hawaii, (39) 679.

- Lymphangitis**—Continued.—  
epizootic—continued.  
in horses, (30) 679; (34) 384.  
studies, (27) 188; (28) 379; (38) 83.  
treatment, (28) 784; (37) 377, 781; (38) 587, 588, 689, 887; (39) 81, 185.  
in cattle, (36) 82.  
in horses, causative organism, (34) 480.  
in horses, studies, (26) 288.  
ixodic, notes, (38) 785.  
staphylo-strepto-cryptococcic, (40) 680.  
terminology, (39) 791.  
treatment, (27) 86; (39) 81, 185, 287, 680, 791.  
ulcerative, (39) 190, 283; (40) 85, 780, 886.  
ulcerative—  
disease simulating in horses and calves, (34) 186.  
in horses, (35) 574; (38) 785, 889.  
in horses, immunization, (37) 583.  
treatment, (39) 185, 287.
- Lymphatic**—  
gland tubercle, histogenesis, (28) 882.  
glands in meat-producing animals, treatise, (34) 876.  
glands of bovines, tubercle bacilli in (26) 281.  
system of bovines, (27) 784.  
system, origin and development, (36) 478.  
**Lymphocystis macropodis**, notes, (27) 883.  
**Lymphocytozoon cobayae**, notes, (27) 882.  
"Lymphoid defense," relation to diet and blood cholesterol, (40) 767.  
**Lynchia maura** in North America, (35) 759.  
Lyndon Institute, farmers' week at, (26) 496.
- Lyperosia**—  
exigua, bionomics, (39) 467.  
exigua, relation to trypanosomiasis, (31) 777.  
irritans, see Horn fly.  
minuta, mouth parts and sucking apparatus of, (29) 760.  
sp., relation to surra in carabaos, (28) 756.  
sp., studies, (26) 559.
- Lyrosoma opaca**, parasitism, (31) 60.
- Lysalbinic acid**, nitrogen distribution in, (38) 310.
- Lysimeter**—  
description, (26) 619.  
investigations, (40) 431.  
rôle in soil solution studies, (27) 500; (28) 28.  
work, equipment for, (37) 521.
- Lysin**—  
as supplement for wheat, corn, and oat proteins, (36) 560.  
content of proteins, (31) 559.  
determination in proteins, (26) 22.  
effect on growth, (35) 238.  
in chernozem soils, (35) 212.  
indispensability for growth, (31) 558.  
isolation from soils, (28) 418.  
nitrogen in protein, (33) 201.  
nutritive value, (38) 569.  
occurrence in gliadin and zein, (29) 408.  
occurrence in sugar beets, (28) 810.  
reaction with nitrous acid, (38) 10.  
rôle in maintenance of young animals, (38) 571.  
rôle in nutrition of chicks, (34) 871; (36) 372.  
synthesis by mammary gland, (40) 72.
- Lysol poisoning** in domestic animals, (26) 581.
- Lysurus texensis** n.sp. and *Anthrus borealis*, relation, (39) 30.
- Lytophilus melanocephalus** n.sp., description, (39) 566.
- $\alpha$ -*D*-Lyxose, crystallography and optical properties, (40) 202.
- Macacus rhesus**, endoparasitic mite in lung of, (31) 356.
- Macadam**—  
surfaces, raveling of, (31) 785.  
transmission of pressure to subgrade of, (33) 486.
- Macaroni**—  
analyses and use, (27) 664.  
notes, (27) 765; (31) 658.
- Macdonald**—  
College, notes, (26) 398; (28) 94.  
Consolidated School, Prince Edward Island, notes, (28) 793.  
Institute of Agriculture and Plant Experiment Station, (40) 500.
- Mace**, analyses and standards, (36) 466.
- Machine design**, treatise, (31) 290.
- Machinery**—see also Agricultural machinery.  
for vine cultivation, tests, (26) 893.
- Macrobasis unicolor**, see Blister beetles, ash-gray.
- Macrocentrus**—  
aegeriae n.sp., description, (33) 749.  
(*Amicroplus*) crambivorus n.sp., description, (26) 352.  
cerasivoranae n.sp., description, (29) 568.  
spp. in Great Britain, (32) 454.
- Macrocheles muscae** n.sp., notes, (30) 757.
- Macrocyrtus** n.g. and n.spp., descriptions, (28) 561.
- Macrocyctis**—  
pyrifer, analyses, (31) 823.  
spp., analyses, (27) 422.
- Macroductylus**—  
subspinus, see Rose chafer.  
uniformis, notes, (26) 452; (37) 746.
- Macrodyctium**—  
omiodivorum, notes, (26) 758.  
sp., notes, (30) 659.
- Macronotua onusta**, notes (28) 157; (34) 752; (35) 54.
- Macroorileya oecanthi**, notes, (31) 650.
- Macrophages** of mammals, definition, (34) 382.
- Macrophoma**—  
coffeae, notes, (38) 51.  
curvispora, notes, (27) 448.  
excelsa infestans, notes, (27) 854.  
sophorae n.sp., description, (27) 848.  
sp., injurious to figs, (26) 449.  
trichosanthis n.sp., notes, (37) 148.  
tumefaciens n.sp., description, (34) 448.  
vestita, notes, (29) 155.
- Macrophya** n.spp., descriptions, (37) 667.
- Macropus longimanus**, notes, (28) 250.
- Macrosargus cuparius**, notes, (33) 58.
- Macrosiagon**—  
flavipennis, notes, (34) 557.  
octomaculatus, notes, (34) 455.
- Macrosiphum**—  
antherini, heredity in, (32) 448.  
British species, (30) 55.  
citrifolii, notes, (26) 755.  
fragariae, notes, (33) 554.  
fragariae, studies, (38) 357.  
granarium, see Grain aphid.  
heucherae, notes, (34) 453.  
illinoisensis, life history, (38) 260.  
injurious to peas, (31) 452.  
lactucae, notes, (27) 758.  
n.spp., descriptions, (31) 754.  
(*Nectarophora*) solanifolii, notes, (28) 554.  
pisi, notes, (28) 556.  
pisi, predatory enemy of, (30) 459.  
pisi, remedies, (32) 652; (34) 755.  
pisi, studies, (34) 62; (35) 461.  
solanii, studies, (39) 149.  
solanifolii—  
notes, (33) 352; (35) 54; (37) 157; (38) 558; (39) 761.  
relation to spinach blight, (39) 551.  
studies, (34) 550; (37) 850; (38) 462, 654; (40) 456.  
spp., alternate host habits, (39) 464.  
spp., notes, (28) 854.  
spp. on Rosaceae, (32) 848.  
spp., wing development, (40) 456.  
viticola, life history, (33) 857.
- Macrosporium**—  
coffeae, notes, (38) 51.  
commune, growth in plant decoctions, (37) 728.  
commune, nitrogen fixation by, (37) 129.  
eribotryae n.sp., description, (31) 746.  
hesperidearum, n.sp., description, (31) 746.  
infection of wheat by, (26) 747.  
lanceolatum, notes, (36) 348.  
on carrot, (39) 52.  
parasiticum sarcinula, notes, (37) 553.  
sarcinaeforme on red clover, (40) 156.  
sarcinula, treatment, (29) 245.  
solanii, description and treatment, (29) 847.  
solanii in tomato seed, (32) 344.  
solanii, notes, (26) 446; (27) 354; (30) 448; (31) 746; (32) 342; (37) 249.  
sommiferi n.sp., description, (40) 155.  
sophorae n.sp., description, (27) 854.  
sophorae n.sp. notes, (40) 160.  
sp., notes, (26) 548.  
sp. on cotton, (32) 642.

- Macrosporium**—Continued.  
 sp. on tomatoes, (34) 644.  
 sydowianum, notes, (36) 149.  
 taxonomic characters, (39) 30.  
 tomato, notes, (32) 240; (37) 150.
- Macuna utilis**, notes, (31) 864.
- Madake**, hydropsy of, (35) 354.
- Madia cakes**, effect on milk, (34) 570.
- Madiza conicola n.sp.**, description, (40) 757.
- Madura foot**, causative agent, (26) 281.
- Magdalis**—  
 armicollis, notes, (27) 256.  
 notes, (40) 759.  
 pruni (ruficornis), notes, (36) 853.  
 synopsis, (30) 357.  
 violacea, notes, (28) 750.
- Maggots affecting animals**, (38) 160.
- Magnesia**—  
 and lime ratio—  
   as affected by concentration, (28) 730.  
   effect on plants, (26) 35; (29) 520; (30) 27.  
   for plants, (27) 824.  
   in grain culture, (30) 519.  
   in soils, (28) 425, 812, 820; (29) 730; (31) 31,  
   218, 623.  
 and lime requirements of plants, (28) 820.  
 deficiency in soils, (28) 820.  
 determination in limestone, (31) 314.  
 displacement by water in leaves, (29) 219.  
 distribution in loam soils, (31) 618.  
 effect on—  
   soils, (30) 220.  
   sugar beets, (34) 38.  
   sulphur content of soils, (38) 327.  
   wheat, (36) 519.  
 excess in soils, correcting, (35) 430.  
 fertilizing value, (35) 30; (39) 530; (40) 725, 824.  
 in New Zealand soils, (35) 715.  
 loss from soils, (26) 422; (29) 211.  
 mica, decomposition by soil bacteria and yeast,  
 (31) 121.  
 of feeding stuffs, digestibility, (40) 769.  
 relation to lime in soils, (36) 519.  
 relation to nitrification and plant growth, (30)  
 326.  
 requirements of plants, (27) 824; (28) 820.  
 requirements of soils, (35) 714.  
 rôle in green plants, (27) 332.  
 solubility in chrysolite, (40) 812.  
 sources for plants, (32) 622.  
 toxic action on plant growth, (26) 723.  
 toxicity toward tomatoes, (31) 218.  
 waste products as source of lime, (38) 22.
- Magnesium**—  
 effect on plant growth, (35) 726.  
 fertilizing value, (40) 815.
- Magnesium**—  
 and calcium, ratio in the diet, (29) 565.  
 as affecting chlorophyll formation, (39) 827.  
 carbonate, diffusion in soils, (29) 128.  
 carbonate, effect on—  
   development of *Digitalis purpurea*, (34) 135.  
   nitrogen fixation by *Azotobacter chroococ-*  
   *cum*, (33) 427.  
   nitrogen transformations, (28) 523.  
   plants, (40) 326.  
   soil acidity, (37) 23.  
   soil potash, (36) 625.  
   soils, (38) 520.  
   strawberries, (34) 150.  
   sulfofying power of soils, (37) 120.
- carbonate—  
   fixation in soils, (31) 25.  
   in humid soils, (31) 815.  
   relation to soil fertility, (33) 513.
- caseinates, studies, (31) 709.
- chlorid, absorption by plants, (35) 435.
- chlorid, effect on—  
   activity of malt diastase, (29) 528.  
   development of eggs, (26) 772.  
   germination of seeds, (29) 327.  
   sheep, (28) 672.  
   soils and plants, (35) 423.
- chlorid, fertilizing value, (27) 125.
- compounds, effect on plant growth, (35) 726.
- concentration in subsoil, (31) 720.
- deficiency, effect on oat plant, (40) 324.
- determination, (28) 507; (34) 712.
- determination—  
   as magnesium oxid, (26) 607.
- Magnesium**—Continued.  
 determination—continued.  
   filter for, (38) 506.  
   in foods, (29) 809.  
   in plants, (23) 797.  
   in water, (31) 502; (35) 805; (37) 412.
- effect on—  
   *Aspergillus* spp., (29) 825.  
   chlorophyll formation, (35) 435; (36) 225.  
   growth of tubercle bacilli, (29) 381.  
   excretion as affected by lecithin, (26) 766.  
   fertilizer, tests, (28) 735.  
   fertilizers, action, (27) 228.  
   fertilizing value, (27) 128.  
   function in plants, (36) 30.  
   glycerophosphate, use against tetanus, (34) 782.  
   hypochlorite in surgery, (36) 379.  
   hypochlorite, toxicity, (39) 586.  
   importance in animal nutrition, (31) 663.  
   in Asiatic foodstuffs, (29) 64.  
   metabolism of *Aspergillus niger*, (30) 727.  
   normal urine, (36) 366.  
   soils, solubility, (39) 821.
- inake, effect on calcium retention by pigs, (29) 66.
- limestone, fertilizing value, (40) 125.
- metabolism in dogs, (38) 569.
- metabolism, studies, (39) 875, 876.
- metabolism, treatise, (28) 569.
- nitrate, effect on toxic salts, (30) 31.
- nitrate, toxicity for squash, (38) 224.
- nutrition of plants, (40) 726.
- occurrence in weeds, (26) 432.
- of carrots and spinach in the diet, (39) 876.
- phosphate, fertilizing value, (31) 823.
- potassium sulphate, preparation, (40) 801.
- relation to chlorosis, (28) 153; (33) 522; (35) 435.
- removal from soil, (39) 517.
- retention in growing pigs, (28) 469.
- rôle in growth of fungi, (29) 28.
- salts, absorption by plants, (35) 433.
- salts as coagulant for rubber latex, (26) 141.
- salts as fertilizers for spinach, (40) 503.
- salts, effect on—  
   action of phosphates, (35) 326.  
   action of phosphoric acid, (27) 623.  
   activity of lipase, (31) 264.  
   ammonia fixing power of soils, (27) 323.  
   *Aspergillus niger*, (28) 824.  
   canned foods, (34) 67.  
   catalase, (26) 504.  
   concrete, (29) 891.  
   ferments, (26) 309.  
   germination and growth of crops, (34) 125.  
   growth of rice, (30) 833.  
   nitric-nitrogen accumulation, (40) 722.  
   soil bacteria, (38) 818.  
   solubility of phosphates, (36) 626; (37) 323,  
   324.  
   wheat, (39) 117.
- salts, toxicity in soil, (36) 515.
- separation from calcium, (28) 409.
- sulphate—  
   antiseptic and germicidal value, (37) 176.  
   antiseptic value, (39) 680.  
   as fertilizer for sugar beets, (30) 234.
- sulphate, effect on—  
   germination of dodder, (27) 28.  
   germination of pine seed, (28) 843.  
   germination of seeds, (29) 328.  
   solubility of phosphates, (28) 818.  
   sugar beets, (31) 233.  
   wheat seedlings, (31) 426.
- sulphate—  
   fertilizing value, (27) 125; (31) 31; (33) 841;  
   (35) 430.  
   in nutrient solutions, effect on plant growth,  
   (39) 28, 331.  
   nitrogen absorption capacity, (28) 325.  
   relation to ammonification and concentra-  
   tion of soil solution, (39) 323.  
   use against tetanus, (26) 783; (27) 381; (29)  
   781; (38) 580.  
   use for anesthesia, (35) 484.
- toxicity toward plants, (30) 128.
- v. high calcium limestone, (39) 127, 220, 622,  
 626; (40) 423.
- Magnetic**—  
 and meteorologic phenomena, relation, (31) 615.
- black, effect on linseed oil, (28) 714.
- observations at Habana, (28) 213; (39) 419.

- Magnetic—Continued.  
 storms and rain, correlation, (38) 15.  
 storms of August, 1916, (38) 210.  
 storms, sun spots, and rainfall, (38) 811.
- Magnets for farm engines, (38) 893.
- Magnifier, binocular, (36) 97.
- Magnolia—  
 cell division in, (40) 518.  
 forcing experiments, (28) 435.  
 oils of, (37) 109.  
 powdery mildew, description, (37) 657.
- Magnolias for northern lawns, (39) 244.
- Maguay—  
 binder twine from, (27) 534.  
 culture in Philippines, (30) 229, 434.  
 production in Philippines, (39) 231.  
 standard grades, (36) 634.
- Mahogany—  
 and its substitutes, (36) 745; (40) 843.  
 borer of Gold Coast, (31) 254.  
 experimental plantings, (38) 749.  
 insects affecting, (28) 555; (30) 546.  
 seedlings, flowering of, (29) 546.  
 tests, (33) 536.
- Maiden cane—  
 analyses, (35) 831.  
 hay, analyses, (26) 362.
- Maine—  
 Agricultural and Industrial League, demon-  
 stration farm, (40) 500.  
 College, history, (36) 594.  
 Station—  
 abstracts of papers, (37) 396.  
 financial statement, (27) 492; (29) 194.  
 index to bulletins, (39) 196.  
 notes, (26) 796; (27) 98, 697; (28) 600, 696;

idiosyncracies toward diet, (27) 466.

immunization against tuberculosis, (29) 884.

infection with avian tuberculosis, (26) 583.

inheritance in, (28) 876; (29) 769.

insects affecting, (27) 53, 453, 552; (28) 248, 554; (29) 252; (30) 53; (32) 448; (33) 746; (34) 651; (35) 853; (37) 560; (38) 459.

insects affecting, treatise, (33) 856; (37) 156, 760.

lime requirements, (30) 367.

malta fever affecting, (26) 84.

measurement of surface area, (34) 68; (35) 369; (36) 64.

mechanical efficiency, (32) 258.

Mendelian characters in, (28) 370, 531.

metabolism during rest, (32) 165.

metabolism experiments, (26) 161, 764, 865; (27) 366, 666; (28) 868; (29) 62, 164, 165; (31) 362, 465; (33) 754; (34) 68; (37) 266.

parasitic amebae of, (26) 375.

plague-like disease of brown squirrels affecting, (34) 355.

power, measuring, (27) 666.

purin metabolism in, (29) 63; (33) 263.

respiration experiments, (23) 559; (34) 290.

sex determination in, (26) 773.

skull measurements, (27) 69.

stomach movements in, (28) 567.

temperature fluctuations in, (27) 768; (32) 564.

tick paralysis in, (30) 182.

urine and other excretions of, treatise, (23) 480.

working power as affected by breakfast and caffeine, (39) 68.

**Manatee—**

grass, analyses, (40) 862.

use as food, (40) 882.

**Mandarin—**

black spot, notes, (31) 843.

black spot, treatment, (32) 445.

brown spot, notes, (34) 644.

brown spot, treatment, (37) 352; (38) 455.

**Mandelic nitrile, effect on plant growth, (37) 632.****Manganese—**

agroteologic studies, (27) 500; (28) 30, 626.

and iron, antagonistic action on wheat, (33) 731.

as fertilizer, (28) 523.

as fertilizer for sugar beets, (27) 643; (35) 736.

**Manganese—Continued.**

as plant food, (34) 306.

carbonate, fertilizing value, (28) 735; (33) 326; (34) 331.

carbonate, oxidation by microbes, (32) 514.

chlorid as treatment for night soil, (26) 425.

chlorid, effect on plant growth, (35) 434.

**compounds—**

effect on growth of sugar beets, (31) 126.

effect on nitrification, (34) 623.

fertilizing value, (27) 327.

solubility in soils, (37) 18.

toxicity toward plants, (33) 327.

concentration in surface soils, (31) 720.

determination, (26) 109, 311; (38) 204.

**determination in—**

drinking water, (31) 806.

minerals and rocks, (31) 16.

plants, (29) 797.

rocks, slags, etc., (30) 505.

soils, (28) 111, 204; (31) 206.

water, (26) 21.

dioxid, effect on germination of seeds, (29) 528.

dioxid, fertilizing value, (36) 220.

**effect on—**

Aspergillus spp., (27) 129, 228; (29) 30.

formation of chlorophyll, (29) 323.

hemp, (33) 432.

legume bacteria, (29) 733.

metabolism of Aspergillus niger, (30) 630.

nitrogen fixation by plants, (38) 122.

nodule bacteria of legumes, (33) 820; (34) 31.

pineapples, (27) 842; (36) 538, 546.

plant cells, (27) 826.

plant growth, (27) 129; (28) 328; (30) 823, 824; (32) 129; (36) 520.

plants, (36) 432.

potatoes, (35) 634.

seed germination, (26) 131.

soils and plants, (40) 820.

sugar beets, (34) 38.

vegetation, (33) 30.

fertilizers, notes, (31) 220.

fertilizing action, (26) 727; (27) 628, 629.

fertilizing value, (27) 128, 500; (28) 34, 125, 820; (39) 749.

in acid soils, (39) 627; (40) 728.

animal organs, (30) 562.

animals, (27) 500, 670.

insect flowers and flower stems, (38) 206.

Kentucky soils, (31) 720.

laxative drug plants, (38) 506.

leaves, (29) 628.

leguminous plants, (37) 28.

natural waters, (35) 424.

pineapple soils, (29) 210.

plants, (27) 830; (29) 28; (30) 30, 31; (38) 409.

plants and animals, (31) 220.

raw linseed oil, (28) 714.

South Australia soils, (31) 720.

the blood, (30) 562.

vegetable food products, (32) 628.

weeds, (26) 432.

wheat, (34) 339.

occurrence and rôle in plants, (37) 130.

oxid as fertilizer, (27) 726.

oxid, effect on nitrogenous compounds, (27) 726.

phosphate, fertilizing value, (31) 823.

relation to chlorosis, (33) 522.

relation to protein formation in plants, (33) 725.

removal from ground water, (27) 511.

rôle in growth of Aspergillus niger, (29) 219.

**salts, effect on—**

ammonification and nitrification, (36) 326; (37) 126.

catalase, (26) 504.

ferments, (26) 309.

growth of sugar beets, (35) 217.

nitric-nitrogen accumulation, (40) 722.

solubility of phosphates, (37) 323.

sugar beets, (31) 233.

wheat, (31) 218.

salts, fertilizing value, (30) 627, 824; (32) 725.

salts, toxicity in soil, (36) 515.

slag, fertilizing value, (38) 723.

soil concretions due to, (32) 215.

solubility in soils, (28) 813.

sulphate, action in wine fermentation, (33) 507.

## Manganese—Continued.

- sulphate, effect on—
  - ammonification, (28) 724.
  - castor bean lipase, (29) 713.
  - germination, (30) 332.
  - growth of barley, (32) 121.
  - nitrogen-fixing bacteria, (38) 429.
  - plant growth, (30) 130.

  - sugar beets, (26) 225.
  - vegetation, (26) 226.
- sulphate—
  - fertilizing value, (26) 126; (27) 628; (29) 151; (31) 31; (34) 331, 632; (36) 124; (39) 729; (40) 440.
  - for grapes, (29) 838.
  - hydrolysis and oxidation in soil, (39) 522.
  - toxicity toward plants, (30) 128; (38) 628.

- Manganous phosphate, fertilizing value, (36) 626.
- Mange—*see also* Cattle, Dog, Horse, and Sheep mange or scab.
  - acari, detection, (33) 281.
  - demodectic, in swine, (37) 477.
  - parasitic, (40) 683.
  - parasitic, in England, (32) 271.
  - parasitic, in Great Britain, (34) 382; (36) 378.
  - parasitic, treatment, (39) 683.
  - treatment, (35) 279; (39) 489, 683.

## Mangel—

- aphids, notes, (29) 454.
- crown gall, notes, (27) 649; (34) 844.
- diseases, notes, (32) 544; (36) 47, 541.
- fly, *see* *Pegomyia hyoscyami*.
- juice, thickened, carbon dioxide formation in, (40) 615.
- leaves as source of potash, (34) 327.
- leaves, carbohydrates in, (28) 128.
- rot, notes, (26) 446.
- seeds in Denmark, (37) 742.

## Mangels—

- analyses, (26) 132; (27) 334, 469, 672; (28) 463; (32) 166, 465; (33) 759; (35) 562; (36) 65; (37) 233; (38) 665, 666.
- analyses and feeding value, (32) 461.
- and sugar beets, comparative yields, (40) 431.
- aphids affecting, (28) 252.
- as affected by spacing, (31) 633.
- silage crop, (39) 134.
- substitute for concentrates for cows, (33) 174.
- winter feed for poultry, (32) 570.
- ash analyses, (29) 861.
- Barres, history in Denmark, (37) 736.
- calcium cyanamid for, (31) 524.
- carbohydrates in, (36) 125.
- composition as affected by fertilizers, (31) 736.
- composition as affected by sodium salts, (29) 420.
- composition during storage, (32) 121.
- continuous culture, (29) 227.
- cost of production, (26) 637; (27) 530; (28) 41; (32) 530.
- culture, (27) 32, 435; (28) 42; (31) 35.
- culture—
  - experiments, (26) 329; (27) 33; (28) 531; (29) 427; (30) 133; (32) 132, 430, 431; (33) 830; (34) 34, 228; (36) 32, 436; (37) 230, 435, 733; (38) 536, 825; (39) 229, 437; (40) 625, 735.
  - in Antigua, (40) 522.
  - Montana, (33) 526.
  - Rhodesia, (27) 32, 637.
  - South Dakota, (40) 32.
  - on moor soils, (40) 523.
  - on muck soils, (33) 33.
- digestibility, (39) 171.
- dry matter content, (26) 436; (31) 233.
- effect on following crop, (40) 623.
- effect on milk and butter, (34) 570.
- electroculture, (27) 231; (28) 533; (40) 428.
- ether extract of, (28) 201.
- feeding value, (38) 665; (39) 777.
- fertilizer experiments, (26) 231, 324, 330, 436, 537, 630, 631, 632, 833, 835; (27) 32, 334, 422, 530, 724, 832; (28) 533; (29) 125, 213, 227, 228, 319, 830; (30) 134, 428, 437, 632, 637; (31) 133, 328, 829; (32) 431, 532, 630; (33) 326, 831; (34) 519; (36) 121, 425, 529, 735, 833; (37) 533; (39) 621, 738; (40) 622, 735.
- for cows, (29) 577; (38) 477.

## Mangels—Continued.

- from same seed ball, characteristics, (31) 633.
- home-grown seed, (40) 340.
- inheritance of sugar and dry matter in, (29) 270
- insects affecting, (26) 553.
- irrigation experiments, (27) 531; (31) 732.
- liming experiments, (30) 724; (31) 820; (40) 322.
- manurial value of tops, (39) 836.
- new scheme for fertilizing, (26) 630.
- poisoning of cattle and pigs by, (27) 780.
- production and use, (26) 132.
- radioactive fertilizers for, (31) 31, 129.
- reducing and nonreducing sugars in, (29) 111.
- relation between size of seed and yield, (26) 434.
- relation between weight, specific gravity, and dry matter content, (26) 437.
- seed from different sources, (40) 735.
- seed production, (33) 226.
- seeding experiments, (29) 224, 432.
- selection experiments, (37) 32.
- siloin, (40) 431.
- sliced, fermenting with lacto-pulp, (27) 170.
- steaming, (39) 269.
- sugar content as affected by sodium manures, (28) 34.
- thinning experiments, (29) 432.
- v. corn for forage, (28) 41.
- v. silage for milk production, (34) 670.
- v. sugar beets for western Nebraska, (32) 224.
- varieties, (26) 232, 331, 436, 537, 631, 835; (27) 32, 334, 531, 637, 736; (29) 228, 530, 830; (30) 33, 134, 834; (31) 133, 736, 829; (32) 37, 132, 431, 528, 532, 630; (33) 33, 330, 631; (34) 229, 865; (35) 637; (36) 133, 735; (37) 32, 228; (38) 31, 432.
- varieties, classification, (27) 31.
- variety tests, (39) 128, 336, 442, 634; (40) 431, 735
- yield as affected by wind-breaks, (28) 40.
- yield of total nutrients, (39) 336.
- yield on alfalfa stubble, (33) 828.
- yields, (39) 334; (40) 734.

## Mangers—

- construction, (28) 386.
- sanitary, for dairy barns, (33) 489.
- Mangifera indica*, new beetle affecting, (26) 151.
- Manginia ampelina*, studies, (40) 850.

## Mango—

- anthracnose, notes, (27) 750; (35) 153.
- anthracnose, studies, (30) 451.
- bacterial disease, (29) 45; (30) 747; (34) 242, 447, bark borer, notes, (29) 457.
- black spot, studies, (39) 149.
- disease in Yucatan, (37) 755.
- diseases, algal, (40) 48.
- diseases and pests in Mysore, (37) 657.
- diseases, treatment, (26) 841.
- fruit disease, notes, (34) 442; (37) 838.
- fruit fly, notes, (26) 354; (27) 359; (29) 453; (40) 56.
- hopper, remedies, (38) 360.
- mildew, notes, (38) 548.
- rash, notes, (33) 164.
- seed weevil, notes, (27) 255.
- tree borer, notes, (40) 655.
- weevil, notes, (27) 759; (32) 352.

## Mangoes—

- analyses, (32) 761.
- analyses and use, (30) 363.
- artificial cross fertilization, (27) 844.
- bark grafting, (35) 538.
- black fly on, (39) 864.
- breeding experiments, (37) 142.
- classification, (32) 745.
- cold storage of, (32) 439.
- culture, (31) 339; (33) 342; (35) 542.
- culture—
  - and canning, (35) 556.
  - experiments, (27) 143; (32) 742; (36) 340; (40) 339.
  - in California, (26) 743.
  - Guam, (30) 41.
  - India, (29) 42.
  - Philippines, (34) 635.
  - Porto Rico, (38) 747.
- East Indian varieties, tests, (33) 535.
- embryony of, (26) 841.
- flowering and pollination, (35) 538.
- fungus diseases of, (26) 445.
- germination tests, (36) 340.
- history in Florida, (37) 745.
- host plant of fruit fly, (26) 758.

- Mangoes—Continued.  
 improvement, (38) 842.  
 in Porto Rico, (40) 44.  
 insects affecting, (26) 354, 841, 856; (27) 453, 857;  
 (34) 349; (36) 457.  
 new beetle affecting, (26) 151.  
 pollination, (37) 835.  
 propagation and grafting, (29) 234.  
 propagation by inarching, (31) 441; (32) 741;  
 (37) 743.  
 recipes, (28) 660, 863.  
 salt as fertilizer for, (32) 324.  
 scale insects affecting, (26) 553.  
 treatise, (26) 841.  
 varieties, (27) 842; (29) 637; (34) 40.
- Mangosteens—  
 analyses and use, (30) 363.  
 disease of, (33) 545.  
 diseases, treatment, (36) 347.  
 notes, (33) 841.
- Mangrove—  
 barks as source of tannin extracts, (28) 146.  
 borer on casaurina, (40) 860.  
 forests of British India, (40) 46.  
 leaf sap, osmotic concentration, (37) 632.  
 red, ecology and physiology, (37) 821; (38) 823.  
 red, physiological studies, (39) 122.  
 tannin extract, manufacture, (27) 210.
- Mangroves—  
 culture in Barbados, (28) 828.  
 sap concentration, (40) 130.  
 transpiration and osmotic pressure in, (30) 30.
- Mani cimarrona, culture, (34) 736.
- Manihot—  
 disease, notes, (28) 552.
- glaziovii—  
 anatomy, (27) 44.  
 blooming habit and seed production, (28)  
 744.  
 collection of latex from, (26) 444.  
 culture in East Africa, (30) 239.  
 culture in Middle Kongo, (33) 646.  
 culture in Uganda, (35) 544.  
 insects affecting, (28) 555.  
 latex of, (31) 128.  
 new coagulant for, (26) 141.  
 plantings in Kongo, (26) 50.  
 tapping experiments, (26) 443, 745; (29) 843;  
 (31) 241.
- Manila—  
 fibers, distinguishing in rope, (39) 15.  
 rope fastenings, tests, (33) 190.  
 rope, manufacture, (29) 86.  
 wastings, analyses, (28) 523.
- Manimanihan, notes, (26) 362; (30) 230.
- Manioc, *see* Cassava.
- Manitoba Agricultural College, notes, (34) 498.
- Manna—  
 ash, composition and adulteration, (33) 443.  
 Boer, varieties, (30) 435.  
 in gymnosperms, (37) 710.
- Manniophyton africanum, description, (28) 829;  
 (30) 35.
- Mannite—  
 antizymotic action, (34) 815.  
 as source of carbon for molds, (30) 226.  
 determination, (26) 709.  
 effect on ammonification, (28) 718.  
 effect on nitrate formation, (36) 321.  
 estimation, (33) 612.  
 extraction from asparagus juice, (27) 502; (31) 10.  
 in silage and its use in explosives, (37) 801.  
 isolation from soils, (28) 418.
- Mannitol—  
 decomposition by *Bacillus coli communis*, (38)  
 709.  
 in *Fucus* and *Laminaria*, (29) 566.  
 in silage, (39) 107.  
 occurrence in palm saps, (30) 16.
- d-Mannoketohexose, chemistry of, (37) 9.
- Mannose—  
 crystalline, preparation and mutarotation, (37)  
 201.  
 toxicity for green plants, (38) 224.
- Manomera blatchleyi, notes, (40) 353.
- Manometer, use, (28) 631; (29) 422.
- Mansakia n.g. and n.sp., description, (38) 857.
- Mansonia—  
 eggs and oviposition in, (36) 552.  
 humeralis n.sp., description, (36) 552.  
 titillans in Canal Zone, (40) 653.
- Manual training—  
 in elementary schools, (29) 297.  
 graded schools, (34) 509.  
 high schools, (31) 394.  
 Iowa schools, (35) 592.  
 New Mexico, (29) 92.  
 rural schools, (34) 395.  
 schools, (30) 794.  
 Wisconsin, (33) 195.  
 instruction in Great Britain, (30) 299.  
 outlines in, (33) 297.  
 teacher training school in, (30) 597.
- Manure—*see also* Cow, Poultry, Sheep, etc.  
 abattoir, composition and use, (39) 117.  
 action, (26) 424.  
 after effect, (29) 729.  
 analyses, (26) 715; (28) 266; (31) 122; (32) 568, 819;  
 (34) 517; (36) 120; (38) 23, 411; (39) 217.  
 analyses and use, (34) 519.  
 and fertilizers, handbook, (28) 538.  
 fertilizers, textbook, (30) 24.  
 nitrification in the soil, (40) 723.  
 products of decomposition, (37) 813.  
 application, (32) 818; (34) 517; (36) 325; (38) 829.  
 applying with green manures, (32) 721.  
 artificial, fertilizing value, (31) 732.  
 as affected by—  
 cake feeding, (30) 125.  
 litter, (26) 424.  
 maggot traps, (39) 562.  
 sulphur, calcium sulphate, and acid phos-  
 phate, (38) 19.  
 as nutrient for soil bacteria, (34) 327.  
 phosphatic fertilizer, (39) 427.  
 source of energy in nitrogen fixation, (32) 515.  
 source of phosphoric acid, (26) 123.  
 top-dressing for hay, (28) 325.  
 ash, analyses, (35) 328.  
 ash, fertilizing value, (36) 228.  
 availability of nitrogen in, (35) 123; (39) 817.  
 bacteriological-chemical investigations, (28) 220.  
 bacteriological tests for, (26) 322.  
 baladi and kufri, fertilizing value, (38) 233.  
 boron-treated, (39) 429.  
 boron-treated, use, (34) 626.  
 broadcasting v. hill fertilizing, (39) 520.  
 care and use, (30) 628.  
 changes in storage, (31) 320; (39) 216.  
 collection from cities, (37) 521.  
 compensation for under tenancy, (29) 420.  
 composition, (27) 420.  
 composition and use, (38) 423.  
 composition and value, (33) 516.  
 conservation, (36) 723, 817.  
 conservation and use in Pennsylvania, (39) 117.  
 conservation as affected by bedding material,  
 (39) 621.  
 decomposition, (35) 426.  
 decomposition in soil, (38) 623.  
 destruction of fly larvae in, (26) 656; (37) 853.  
 determination in milk, (39) 882.  
 disposal in cities, (30) 720.  
 disposal in relation to livestock diseases, (37)  
 780.  
 distribution and utilization of active principles,  
 (28) 124.  
 effect on—  
 action of fertilizers, (26) 522.  
 apples, (29) 438.  
 availability of phosphates, (28) 815; (38) 325;  
 (39) 118, 625, 822.  
 bacterial activity in soils, (26) 31; (31) 121;  
 (32) 216; (35) 216.  
 botanical composition of herbage, (33) 227.  
 burning quality of tobacco, (38) 239.  
 composition of beets, (31) 736.  
 composition of cereals, (34) 230; (37) 827.  
 composition of meadow hay, (34) 620.  
 composition of soils, (29) 416, 417.  
 composition of wheat, (28) 140.  
 corn, (37) 440.  
 decomposition of green manure, (32) 514;  
 (34) 129; (36) 817; (39) 725.  
 foot-and-mouth disease virus, (29) 283.  
 germination of *Orobanche crenata*, (31) 634.  
 grapes, (31) 339.  
 grass lands, (30) 133.  
 inoculated soil, (39) 519.  
 irrigated corn, (31) 428.  
 lime requirement of soils, (28) 122; (37) 125.  
 maturity of cotton, (31) 40.

Manure—Continued.  
 effect on—continued.  
 nitrification in soils, (36) 118.  
 nitrogen balance in soil, (37) 627.  
 nitrogen content of soil, (36) 218; (38) 213.  
 nodule production in soy beans, (40) 828.  
 oats, (39) 639.  
 peach trees, (37) 40.  
 retention of bases by soils, (32) 121.  
 salts and nitrates in soil, (36) 816.  
 "slick spots," (39) 229.  
 soil acidity, (37) 23; (38) 20.  
 soil bacteria, (27) 518; (35) 814; (37) 23, 120.  
 soil fertility, (29) 317.  
 soil moisture, (38) 320, 321; (39) 617.  
 soil nitrogen, (35) 218.  
 soil temperature, (29) 620.  
 solubility of inorganic soil constituents, (37) 422.  
 tobacco quality, (38) 37.  
 yield of apples, (26) 541.  
 export from India, (33) 327.  
 fermentation, (36) 23.  
 fermentation, prevention, (26) 724.  
 fermenting, effect on phosphates, (29) 23.  
 fertilizing values, (26) 129, 233, 323, 329, 330, 424, 522, 534, 535, 536, 629, 630, 638, 639; (27) 137, 336, 337, 420, 519, 530, 532, 534, 832, 834, 835; (28) 42, 47, 124, 125, 221, 325, 338, 520; (29) 32, 35, 227, 427, 632, 737, 830, 831; (30) 134, 230, 526, 731, 820, 821, 829, 835; (31) 37, 122, 124, 517, 820, 829, 893; (32) 530, 629; (33) 432, 516, 624, 625, 722, 729, 731, 732, 828, 830, 831; (34) 128, 219, 621, 630, 723, 735; (35) 22, 30, 125, 323, 438, 519, 535, 536, 629, 815; (36) 121, 217, 228, 425, 528, 533, 623, 735, 829, 839; (37) 214, 229, 320, 534, 626, 731; (38) 33, 36, 120, 133, 134, 217, 218, 219, 228, 238, 239, 244, 298, 337, 422, 431, 432, 438, 534, 620, 630, 634, 825; (39) 22, 32, 116, 130, 137, 227, 334, 434, 435, 436, 437, 445, 446, 529, 530, 531, 725, 745, 816, 817, 834; (40) 135, 228, 229, 319, 331, 333, 422, 429, 430, 431, 432, 516, 630, 636.  
 for apples, (33) 240.  
 arid soils, (34) 621.  
 coffee, (31) 637.  
 grass lands, (29) 531; (32) 630.  
 greenhouse crops, (40) 739, 741.  
 hops, (29) 534.  
 meadows, (33) 330.  
 Missouri soils, (33) 212, 213, 214, 215.

  - Pennsylvania, (27) 475.
  - Porto Rico, (26) 261.
- meal—
  - acidity, (35) 770.
  - analyses, (26) 266, 267, 362, 363, 468, 568, 770; (27) 570, 774, 872; (28) 364, 464; (29) 666, 769; (30) 67, 565; (31) 73, 663; (32) 169, 667; (33) 371; (34) 169, 263, 371, 467, 566, 665; (35) 562; (36) 268, 765; (37) 471; (38) 67, 369; (39) 270; (40) 72.
  - analyses and digestibility, (26) 567.
  - and scrap, analyses, (39) 70, 370.
  - detection in fish meal, (34) 467.
  - effect on composition of bone, (33) 171.
  - effect on fetal development, (33) 266.
  - fertilizing value, (28) 723.
  - for horses, (34) 769.
  - for pigs, (33) 571.
  - for poultry, (26) 669.
  - methods of analysis, (29) 311.
  - v. dried yeast for pigs, (26) 668.
- methods of analysis, (27) 498; (31) 258, 854; (32) 109.
- mycology of, (26) 355.
- oven temperature for, (33) 565.
- packing and curing, (27) 571.
- packing establishments, interstate, sanitary conditions in, (32) 457.
- packing industry in United States, (31) 64; (38) 294.
- physical-chemical method of examination, (28) 806.
- pickling and curing, (28) 65.
- pickling experiments, (28) 564.
- poisoning—
  - causes, (32) 84.
  - control, (29) 564.
  - diagnosis, (31) 878; (32) 375, 856.
  - notes, (26) 66; (28) 164, 677.
  - organisms, studies, (32) 760.
  - outbreaks, relation to rats and mice, (30) 355.
  - papers on, (34) 575.
  - precipitation in, (30) 479.
  - relation to puerperal diseases of cattle, (34) 386.
- post-mortem alterations, (26) 66.
- powder, nutritive value, (40) 463, 464.
- powder proteins, utilization, (26) 663.
- preparation, (28) 860.
- preparations, analyses, (29) 58.
- preservation, (33) 362; (37) 715; (38) 114.
- preservation—
  - on the farm, (36) 717.
  - Teller method, (30) 257.
  - with nascent ozone, (29) 566.
- preservative containing benzoic acid, (29) 266.
- preserved, analyses, (33) 259.
- preserved, discussion, (28) 659; (35) 859.
- prices in—
  - Barcelona, (29) 162.
  - Bern, (32) 162.
  - England, (35) 90.
  - France, (33) 694.
  - Germany, (33) 165.
  - Munich, (32) 91.
  - Paris, (28) 662.
  - Paris, treatise, (30) 256.
  - Russia, (37) 292.
- production—
  - and consumption in United States, (31) 74.
  - and price in Germany, (28) 572.
  - in Argentina, (32) 12; (33) 268.
  - Australia and New Zealand, (33) 268.
  - Central America, (30) 100.
  - Netherlands, (28) 669.
  - the South, (32) 13.
  - United States, (32) 12; (34) 397; (40) 792.
- on high-priced lands, (32) 12; (34) 398.

## Meat—Continued.

- products—
  - detection of blackleg infections in, (29) 882.
  - estimating water content, (40) 807.
  - handbook, (30) 711.
  - in United States, (38) 865.
  - inspection, (29) 566.
  - methods of analysis, (32) 109.
  - preservation, (29) 312; (36) 463.
  - typhoid infections by, (26) 480.
  - water content, (32) 252; (34) 365; (35) 366.
- protein, cooked, digestibility, (32) 256.
- proteins, separation, (27) 498.
- purchasing and use, (38) 867.
- purchasing and use, treatise, (32) 354.
- putrefaction, (30) 861; (34) 163.
- raw chopped, bacteriological investigations, (26) 480.
- refrigerated in Europe, (33) 752.
- ripening and decomposition of, (31) 64, 258.
- ripening of, (33) 460.
- roasting, (30) 395.
- rôle in glycogen formation, (31) 763.
- salted, coloring matter in, (32) 454.
- samples for bacteriological examination, (36) 574.
- scrap—
  - analyses, (26) 665; (28) 265; (29) 367, 769; (30) 67, 565, 868; (31) 73, 168, 366, 569, 663; (32) 169, 259; (33) 371, 568, 665, 870; (34) 169, 263, 371, 467, 767; (35) 374, 562, 867; (36) 167, 268, 667, 765; (37) 268, 471, 767; (38) 67, 368, 572; (39) 70, 270, 370, 773, 780; (40) 72, 470, 571, 665.
  - cooked, analyses, (26) 165.
  - for laying hens, (35) 274; (39) 176, 275, 577; (40) 76, 670, 773.
  - for laying pullets, (34) 177.
  - for poultry, (31) 569.
- selection, (36) 762.
- shrinkage in cooking, (40) 656.
- spoiled, chemical studies, (40) 712, 713.
- statistics, (31) 165.
- statistics in United Kingdom, (38) 494.
- substitutes, purchasing and use, (38) 867.
- supply—
  - and distribution in New South Wales, (29) 862.
  - bibliography, (36) 762.
  - of France, (40) 488.
  - Germany, (30) 256, 567.
  - Great Britain, (27) 470.
  - United States, (29) 770, 896; (30) 100; (31) 564; (32) 98.
  - United States, commission on, (30) 96.
  - western Norway, (30) 268.
  - supplementing with fish, (31) 356.
- tough, cooking, (33) 364.
- trade of Argentina, (26) 573.
- trade of Australia, (29) 666.
- trichinae in, (39) 685.
- trichinous, refrigeration of, (30) 881.
- tuberculous, inspection, (34) 575.
- tuberculous, utilization, (30) 558.
- unsound, sterilization, (38) 265.
- use in French army, (28) 659.
- use in the dietary, (29) 862.
- use in the Tropics, (30) 260.

## Mechanic arts schools—

notes, (31) 692.

of New York, (26) 192; (37) 394.

## Mechanical—

- colleges, *see* Agricultural colleges.
  - engineer's reference book, (31) 287.
  - tissue, formation in plant tendrils, (27) 631.
- Mechanics, household, treatise, (36) 891.
- Meconopsis, inheritance of doubleness, (39) 123.
- Mecoptera of Japan, (30) 754.
- Mecroplitis melianae, notes, (28) 160.
- Media, *see* Culture media.
- Medic—
- black, crossing with alfalfa, (31) 831.
  - black, nodule bacteria of, (32) 33.
  - fertilizer experiments, (27) 24.
- Medicago—
- arborea, culture, (30) 228, 335, 632.
  - ash constituents of, (30) 334.
  - falcata—
    - analyses, (31) 863.
    - germination, (29) 331.
    - studies, (36) 334.
    - tests, (33) 632.

- Medicago—Continued.  
   hardiness, (35) 229.  
   improvement, (37) 136.  
   obicularis, culture, (32) 226.  
   sativa, analyses, (27) 469.  
   sativa, comparative morphology, (31) 624.  
   spp., glandular pubescence, (40) 137.  
   spp., yield of seed, (28) 636.
- Medical—  
   commissions, relation to pure milk, (29) 878.  
   cooperation, rural experiment in, (31) 294.  
   directory of Saxony, (28) 375.  
   periodicals, list, (30) 286.  
   progress, review of investigations, (33) 876.
- Medicinal—*see also* Drug plants.  
   herbs, description, (26) 327; (40) 247.  
   plants, culture experiments, (31) 536.  
   plants, production in United States, (39) 449, 545.
- Medicine—  
   physiology and biochemistry in, (40) 577.  
   relation to entomology, (33) 152.  
   use of "normal" curve of frequency in, (29) 168.
- Medicines—  
   inspection in Missouri, (26) 564.  
   of ancient Egyptians, (30) 559.  
   patent or proprietary, (31) 658; (40) 182.  
   subcutaneous administration, (32) 272.
- Mediterranean coast fever, studies, (34) 383.
- Mediterranean flour moth—  
   destruction by heat, (29) 856.  
   flacherie of, (35) 253.  
   in mills and warehouses, (30) 463.  
   in soldiers' biscuits, (34) 251.  
   notes, (29) 655.  
   parasites of, (27) 564; (39) 566.  
   remedies, (27) 258; (40) 547.
- Medlar—  
   floral parts and genesis, (39) 527.  
   insects affecting, (26) 147.  
   leaves, free hydrocyanic acid in, (27) 635.  
   Monilia affecting, (28) 241.
- Megachile pollinating alfalfa, (39) 661; (40) 264, 760.
- Megacocelus stramineum, life history, (38) 359.
- Megalocentria pseudotrichia, notes, (34) 540.
- Megalopodinae, catalogue, (30) 458.
- Megalopyge krugii, notes, (33) 554.
- Megarhoga theretrae n.sp., description, (29) 562.
- Megarhyssa, studies, (34) 758.
- Megascelinae, catalogue, (30) 458.
- Megastigmus—  
   aculeatus in New Jersey, (37) 856.  
   aculeatus, notes, (26) 861.  
   amelanchieris n.sp., description, (40) 656.  
   laricis n.sp., description, (32) 557.  
   piceae n.sp., description, (33) 658.  
   revision, (29) 458.  
   sp., notes, (31) 849.  
   spermatophorus, oviposition in seed of Douglas fir, (35) 161.
- Megilla—  
   fuscilabris, negative geotropism of, (30) 357.  
   maculata—  
     introduction, (32) 846.  
     life history and habits, (34) 555.  
     notes, (29) 853; (32) 654.  
     studies, (39) 663.
- Megoura solani, notes, (28) 654.
- Megoura viciae, notes, (28) 556.
- Meigenia floralis—  
   biology, (39) 658.  
   parasitic on black alfalfa-leaf beetle, (38) 863.
- Meistagmin reaction—  
   diagnostic value, (26) 181, 579.  
   studies, (31) 178.  
   with malignant tumors, (33) 280.
- Melalopha (Ichthyura) inclusa, notes, (26) 856.
- Melamomphus spp., notes, (35) 364.
- Melampsalta incepta, notes, (29) 558.
- Melampora—  
   albertensis, notes, (26) 340.  
   alpina, notes, (33) 145.  
   betulina, notes, (26) 852.  
   bigelowii on Larix, (36) 651.  
   bigelowii, overwintering, (39) 553.  
   lini, biology, (34) 136.  
   lini, notes, (30) 649; (38) 848.  
   lini, overwintering, (33) 647.  
   medusae, infection experiments, (30) 745.  
   monticola n.sp., description, (38) 252.
- Melampora—Continued.  
   n.spp., descriptions, (35) 251.  
   occidentalis n.sp., description, (39) 254.  
   on Japanese willows, studies, (35) 251.  
   pintorqua, life history, (30) 745.  
   spp., inoculation experiments, (38) 253.  
   spp., notes, (27) 252.  
   spp. on Euphorbia in North America, (38) 252.  
   spp., spore germination, (38) 225.  
   tremulae, notes, (28) 443.
- Melamporaceae, monograph, (36) 647.
- Melamporella—  
   elatina, notes, (29) 451.  
   ricini, notes, (33) 545; (38) 848.  
   ricini, studies, (30) 845.
- Melampsoridium betulae, overwintering, (39) 553.
- Melampsoropsis pyrolae, overwintering, (39) 553.
- Melanchra steropastis—  
   notes, (38) 257.  
   parasites of, (39) 159.
- Melanconis—  
   modonia (M. perniciosa), notes, (36) 752.  
   modonia on chestnut, (33) 56.  
   modonia, studies, (28) 240.  
   spp., notes, (40) 160.
- Melanconium—  
   bambusae n.sp., description, (36) 251.  
   fuliginum, studies, (32) 751.  
   n.sp. on tomatoes, (36) 49.  
   on sugar cane, (40) 157, 844.  
   on tomato, (36) 749.  
   sacchari, notes, (29) 647; (30) 541; (32) 442; (34) 349; (35) 49; (36) 846; (37) 452; (38) 550, 851; (40) 155.  
   sacchari, studies, (36) 648.
- Melandrium—  
   album, anther smut of, (26) 552.  
   album, root system, (37) 542.  
   inheritance of leaf coloration in, (32) 35.
- Melanin—  
   misuse of term, (27) 671.  
   pigment, formation, (40) 665.  
   pigment, origin in feather germs of fowls, (38) 171.  
   studies, (27) 468; (30) 707, 708.
- Melanocheila riparia, studies, (37) 764.
- Melanochlamys leucoptera n.g. and n.sp., description, (35) 243.
- Melanogaster variegatus broomianus, notes, (34) 849.
- Melanomma sp., fixation of nitrogen by, (27) 225.
- Melanophila fulvoguttata, notes, (33) 252.
- Melanoplus—*see also* Locusts.  
   atlantis, studies, (36) 153.  
   differentialis, notes, (35) 657.  
   differentialis, studies, (39) 359.  
   spp., egg-laying habits, (39) 656.  
   spp., injurious to alfalfa, (32) 553.  
   spp., notes, (28) 59.  
   spp., parasitic infections, (40) 164.  
   spp., remedies, (34) 158; (36) 55.
- Melanops—  
   life histories, (36) 246.  
   queruam and Sphaeropsis malorum, identity, (31) 446.
- Melanopsammopsis heveae, notes, (38) 356.
- Melanorrhoea usitata and its oleoresin, (38) 247.
- Melanosis—  
   generalized, in fowls, (27) 671.  
   relation to cancer, (27) 289.
- Melanospora—  
   asparagi n.sp., description, (36) 748.  
   parasitica, notes, (29) 46.
- Melanostoma mellinum, notes, (36) 460.
- Melanotic pigment, origin, (27) 468.
- Melanotos—  
   communis, *see* Corn wireworm.  
   prothetyi in, (35) 261.  
   spp., notes, (32) 556.
- Melanoxanthium—  
   antennatum n.sp., description, (29) 654.  
   saliceti, *see* Aphis saliceti.
- Melanoxanthus soliceti, notes, (28) 254.
- Melasoma scripta, *see* Cottonwood leaf beetle.
- Meleborus laspeyresiae n.sp., description, (38) 165.
- Melezitose in Douglas fir manna, (39) 802.
- Melia azadirachta cake, fertilizing value, (38) 220.
- Meliana abillinea, notes, (28) 160.
- Meliaine, occurrence in buck beans, (26) 24.
- Melibiose, acetates of, (34) 408.

- Melibiose, preparation, (34) 408.  
 Meliethes aeneus, notes, (27) 457; (40) 260.  
 Melilot, white, as green manure, (40) 24.  
 Melilotus—  
   alba, annual variety, (39) 642.  
   as green manure for citrus, (32) 233.  
   fertilizer experiments, (30) 820.  
   indica as green manure, (34) 36; (39) 31.  
   parviflora, description, (36) 639.  
   spp., geographical distribution, (26) 335.  
 Melinis minutiflora—  
   culture in Hawaii, (32) 729.  
   culture in Porto Rico, (29) 631.  
   for dairy cattle, (32) 471.  
   notes, (26) 362.  
 Meliola—  
   arundinis, notes, (38) 550.  
   camelliae, notes, (26) 555.  
   heveae, n.sp., notes, (37) 253.  
   in Porto Rico, (37) 149.  
   palmarum, notes, (28) 241; (38) 758.  
 Meliolis and associated fungi, (40) 249.  
 Melliopis januaris, notes, (40) 56.  
 Mellissoblyptes rufovenalis, notes, (35) 258.  
 Mellitara spp., notes, (28) 451.  
 Melitensis, notes, (27) 681.  
 Melittomma insulare—  
   control in Seychelles, (33) 555.  
   notes, (29) 853.  
 Melittia satyriniformis, *see* Squash borer.  
 Mellen's Food refuse, composition and digestibility, (32) 666.  
 Mellissopus latiferreama, notes, (35) 56.  
 Meloidae—  
   notes, (30) 454.  
   of Mexico, (30) 757.  
 Melolontha—  
   spp., remedies, (34) 454; (37) 467.  
   vulgaris, digestive ferments of, (26) 657.  
 Melolonthinae, catalogue, (30) 458.  
 Melon—  
   aphis—  
     life history and remedies, (38) 764.  
     notes, (27) 299; (28) 158; (33) 746.  
     relation to cucumber mosaic disease, (36) 350.  
     remedies, (32) 151.  
     studies, (29) 355.  
   canker, notes, (27) 353.  
   disease, studies, (31) 52.  
   diseases—  
     in Sweden, (32) 641.  
     notes, (37) 653.  
     treatment, (28) 142; (39) 52.  
   fly, danger of introduction, (39) 467.  
   fly, life history, (32) 452.  
   fly, parasites of, (37) 162, 847; (40) 459.  
   fly, remedies, (31) 757.  
   fly, studies, (33) 562; (37) 566; (39) 155.  
   fungus disease, notes, (26) 244.  
   industry in Valencia, (27) 39.  
   pear, tests, (27) 741.  
 Melons—  
   analyses and use, (30) 363.  
   breeding for disease resistance, (30) 331.  
   cassaba, culture experiments, (33) 43.  
   culture in southern France, (36) 138.  
   culture under irrigation, (28) 839.  
   insects affecting, (27) 53, 453; (31) 248; (37) 760; (38) 653.  
   localization of acids and sugars in, (36) 110.  
   Mendelism in, (32) 140.  
   Monketoan, as a cattle food, (29) 569.  
   notes, (29) 338.  
   oil and press cake from seeds, (40) 803.  
   parthenogenesis in, (29) 837.  
   sampling device for, (37) 711.  
   stock, culture, (34) 630.  
   stock, varieties, (30) 435.  
   varieties at Wisley, (33) 536.  
 Melophagus ovinus, *see* Sheep tick.  
 Melospiza melodia, destruction of grain aphids by, (29) 453.  
 Melusina (*Simulium*) dinellii, notes, (27) 560.  
 Membracidae—  
   bird enemies, (39) 860.  
   of Cayuga Lake basin, (38) 462.  
   of Kansas, (31) 59.  
   of Philippines, (36) 755.  
   parasitic castration in, (26) 148.  
 Membranes, permeability, (38) 126.  
 Memythrus—  
   perlucida n.sp., description, (33) 748.  
   polistiformis, *see* Grape root borer.  
   spp., notes, (28) 155.  
 Mendel monument, notes, (28) 531.  
 Mendelian—  
   characters in plants, animals, and man, (28) 531.  
   characters, models to illustrate segregation and combination, (37) 432.  
   class frequency, probable error, (37) 432.  
   formulas, simplification, (29) 68.  
   inheritance and probable error of class frequencies, (40) 524.  
   inheritance, graphic representation, (33) 822.  
   ratios, test of goodness of fit, (29) 67.  
   segregation, exception to, (32) 521.  
 Mendelism—  
   algebra of, (28) 570, 571.  
   discussion, (27) 769; (29) 67.  
   manual, (38) 367.  
   review of investigations, (34) 564.  
 Mendel's law—  
   notes, (26) 773.  
   paper on, (28) 531.  
   relation to animal breeding, (28) 666.  
 Menesta albaeliella, life history, (34) 64.  
 Menetypus variegatus n.sp., description, (32) 658.  
 Menhaden—  
   fish oil, detection, (28) 412.  
   industry, notes, (29) 318.  
 Meningitis organisms, agglutination test, (40) 83.  
 Meningococcus, food requirements, (37) 178.  
 Meningo-encephalitis, paper on, (32) 271.  
 Meningo-encephalomyelitis in fowls, (36) 782.  
 Menominee County Agricultural School, (32) 794.  
 Menopon—  
   pallidum, notes, (35) 878.  
   spp., parasitic on fowls, (35) 183.  
 Mental—  
   and muscular work, notes, (28) 765.  
   development as affected by nutrition, (31) 557.  
   fatigue, effect on gastric secretion, (26) 160.  
   fatigue, measurement, (28) 570.  
   work, effect on metabolism, (29) 768.  
   work, metabolism in, (31) 363.  
 Mentha piperita, essential oil of, (26) 504.  
 Menthol, effect on hyacinths and tulips, (26) 731.  
 Menthone, inversion, (37) 201.  
 Menus—*see also* Diet and Meals.  
   for boys, (29) 464.  
   children, (31) 760.  
   logging camps, (32) 459.  
   negro farmers, (36) 562.  
   making, (31) 68; (33) 364.  
   outlining and planning, (30) 559.  
   suggestions, (38) 366, 662.  
 Menyanthes trifoliata, new glucosid from, (26) 24.  
 Menziesia glabella, toxicity, (31) 376.  
 Meracantha contracta, life history, (35) 261.  
 Meraporus crassicornis n.sp., description, (30) 661.  
 Mercurialis annua—  
   analyses and feeding value, (33) 70.  
   inheritance of sex-ratios in, (36) 522.  
 Mercuric chlorid—  
   and mercurophen as antiseptics, (39) 586.  
   antiseptic value, (40) 182.  
   detection in wood, (26) 242.  
   effect on catalytic power of soils, (28) 118.  
   effect on complement and antibody production, (40) 287.  
   effect on germination of seeds, (26) 820.  
   insectical value, (39) 762.  
   use in seed treatment, (39) 851.  
 Mercurophen—  
   as germicide, (38) 481.  
   toxicity, (39) 586.  
 Mercury—  
   as growth stimulant for hemp, (33) 432.  
   chlorophenol as a fungicide, (33) 846.  
   detection in urine, (39) 715.  
   detection in water, (34) 410.  
   determination, (40) 712.  
   oxid, effect on germination of seeds, (29) 528.  
   preparations, fungicidal value, (37) 247.  
   purification, apparatus for, (37) 503.  
   suspended in gas, evaporation, (38) 210.  
   toxic effect on plants, (38) 629.  
   vapor lamp, photochemical effects from, (29) 213.

- Mercury—Continued.  
vapor light, effect on germination—  
and early growth of plants, (33) 826.  
of seeds (30) 827.
- Meria laricis, notes, (29) 156.
- Merisus—  
destructor, studies, (35) 466.  
subapterus, *see* *Micromelus subapterus*.
- Mermis sp., notes, (27) 456; (30) 362.
- Merodon equestris—  
life history, (32) 350.  
notes, (27) 53, 356, 359, 457; (30) 56, 458, 757;  
(31) 757.
- Meromyza americana—  
notes, (29) 252; (37) 160.  
parasites of, (31) 355.
- Merula migratoria, coccidiosis in, (26) 187.
- Merulius—  
as affected by fluorin, (32) 308.  
dry rot on wattle, (33) 545.
- lacrymans—  
effect on greenheart, (34) 56.  
germination studies, (32) 150.  
growth as affected by tannic and gallic  
acids, (27) 654.  
injurious to telegraph poles, (33) 745.  
notes, (26) 551, 752; (31) 248, 547; (35) 252;  
(37) 253; (39) 553.  
pigment formation by, (28) 751.  
protection of timber from, (28) 246.  
resistance of oak wood to, (32) 150.  
studies, (29) 157, 852; (30) 850; (40) 350.  
treatment, (33) 151.  
sclerotium, description, (29) 554.  
spp., studies, (28) 751.  
studies, (32) 845.  
sylvestris, studies, (34) 547.
- Mesembrianthemum—  
junceum, ash analyses, (36) 429.  
mahoni roots as a yeast substitute, (29) 460.  
rupicola, analyses and digestibility, (32) 167.
- Mesembryanthemum—  
gas interchange, (40) 29.  
rate and course of growth, (40) 30.
- Meshel grass, analyses, (28) 768.
- Mesidia gillettei n.sp., description, (31) 458.
- Mesochorus—  
luteipes, notes, (30) 59.  
n.spp., descriptions, (26) 352.  
nigrisignis, notes, (28) 160.  
plusiaephilus n.sp., description, (30) 256.  
sp., notes, (28) 558.
- Mesogramma polita, life history, (34) 358.
- Mesoleius—  
tenthredinis, notes, (30) 362; (38) 62.  
transfuga, notes, (30) 362.
- Mesoleuca truncata, notes, (32) 556.
- Mesostenus pomonellae n.sp., description, (28) 162.
- Mesquite—  
aerial galls of, (30) 751.  
analyses, (28) 464.  
beans for pigs, (38) 675.  
blight, description, (30) 248.  
commercial possibilities, (37) 747.  
curly, as a forage crop, (31) 829.  
eradication, (33) 299.  
notes, (28) 643.  
seeding on ranges, (30) 35.  
trunk diseases of, (31) 751.
- Mess management, military hospital, (40) 866.

infants, mineral salts in, (29) 366.  
insects, (39) 761.  
malarial fever, (40) 868.  
men, women, and children, (39) 568.  
nitrogen hunger, (26) 764.

## Metabolism—Continued.

- in old age, (26) 566, 664.
  - plants, (26) 265, 326; (38) 729.
  - plants as affected by acid and alkaline solutions, (32) 626.
  - plants as affected by etherization, (26) 127.
  - quiet or sleeping dogs, (28) 868.
  - white dogs as affected by light, (31) 563.
  - women, (40) 174.
  - young trees, (27) 425.
  - increased, after food ingestion, (30) 168.
  - intermediary, glycin and amino-aldehyde in, (40) 71.
  - ketonic function in, (40) 464.
  - maximum and minimum, (28) 461.
  - mineral, of milch cows, (35) 481; (37) 169; (38) 779; (40) 373.
  - nitrogen, of bacteria, (39) 110.
  - nuclein, of pigs, (26) 363.
  - of a dwarf, (33) 754.
  - acid-fast bacteria, (33) 769.
  - ammonium salts, (30) 64.
  - bacteria in milk, (31) 873.
  - calcium and phosphoric acid in infants, (28) 166.
  - creatin and creatinin, (26) 158; (32) 764.
  - creatin in growing pigs, (28) 269.
  - diet poor in nitrogen, (29) 165.
  - fat, factors affecting, (26) 471.
  - fats, (27) 665; (38) 66; (39) 874.
  - glycin, (39) 873.
  - hypophysectomized dogs, (26) 766.
  - incubating eggs, (26) 877.
  - lecithin, (26) 159, 765.
  - lecithin and cholesterolin, (32) 764.
  - mineral matters, (30) 562.
  - mustard oils, (39) 668.
  - nitrogenous food, (32) 359.
  - nuclein, paper on, (20) 69.
  - organic and inorganic phosphorus compounds, (33) 462.
  - organic phosphorus compounds, (29) 166.
  - phosphoric acid, (26) 765.
  - phosphorus and nitrogen, (30) 465.
  - phosphorus, review of literature, (32) 601.
  - scurvey in an adult, (28) 868.
  - organic nutrients in, (31) 361.
  - protein, (26) 158, 359, 869, 870; (32) 359; (39) 572, 772.
  - protein, after excessive water ingestion, (32) 663.
  - protein, monograph, (28) 167.
  - protein, of the fetus, (26) 363.
  - protein, studies, (26) 764; (28) 664, 665; (31) 661.
  - purin, (29) 365; (31) 760.
  - purin, as affected by potassium salts, (28) 261.
  - purin in ungulates, (32) 166.
  - relation—
    - of nitrogen to sulphur in, (26) 765.
    - to nuclein, (27) 574.
    - to osmosis, (28) 667.
    - to thyroid secretion, (29) 868.
  - respiratory, as affected by salts, (32) 860.
  - respiratory, in infants, (26) 69.
  - review of investigations, (30) 560.
  - studies, (26) 158, 671, 709.
  - treatise, (40) 463.
  - uric acid, studies, (40) 175.
- Metachaeta helymum, notes, (33) 749.
- Metachromatin in the vegetable cell, (40) 325.
- Metal flumes, preservatives for, (36) 585.
- Metal reinforcement, corrosion in concrete, (29) 687.
- Metapalpus torquatus n.g. and n.sp., description, (38) 460.
- Metallic—
- colloids, bactericidal properties, (32) 272.
  - oxids and salts, fertilizing value, (31) 821.
  - salts, reaction with soluble carbonates, (31) 504.
  - salts, rôle in nitrogen assimilation by green plants, (28) 328.
- Metallonidea britannica n.subg. and n.sp., description, (34) 857.
- Metals—
- colloidal, effect on Spirogyra, (31) 129.
  - colloidal, therapeutic value, (38) 585.
  - detection in ethyl alcohol, (29) 312.
  - effect on development of Aspergillus niger, (30) 824.
  - heavy, effect on isolated intestine, (37) 266.

## Metamasius—

- hemipterus decoratus, notes, (26) 354.
  - hemipterus, notes, (26) 60; (29) 52.
  - ritchiei n. sp., description, (37) 161.
  - ritchiei, notes, (38) 163; (40) 259.
  - sericeus, notes, (34) 753; (37) 162; (39) 58.
  - spp., affecting coconut palms, (29) 858.
- Metamorphosis, retrogressive, in peaches, (27) 230.
- Metaoxytoluic acid in soils, (30) 610.
- Metaphis n.g., description, (40) 60.
- Metaphosphoric, assimilation by plants, (29) 624.
- Metapocyrtus n.g. and n.sp., descriptions, (28) 561.
- Metarrhizium anisopliae—
- description, (33) 459.
  - in Porto Rico, (39) 868.
  - in Queensland, (32) 555.
  - infection tests, (38) 165.
  - notes, (28) 746, 757; (29) 52, 53, 652; (30) 356.
  - use against sugar cane pests, (29) 846.
- Metastromyglus apri—
- life history and treatment, (35) 182.
  - notes, (37) 779.
- Metazoa, diseases due to, (35) 379.
- Meteor, train of, (31) 213.
- Meteoridae, British, notes, (31) 159.
- Meteorologic and magnetic phenomena, relation, (31) 615.
- Meteorological—
- aspects of oceanography, (35) 619.
  - conditions—
    - effect on propagation of sound, (32) 25.
    - relation to fungi, (27) 543.
    - relation to grape downy mildew, (28) 448.
    - relation to growth and yield of oats, (29) 509.
    - relation to plant diseases, (29) 44.
  - cooperation, Pan American, (35) 420.
  - courses for aeronautical engineers, (37) 807.
  - data, (32) 118, 316, 614.
  - data, recording and summarizing, (39) 809.
  - elements, relation to soil temperature, (29) 618.
  - explorations in the Antarctic, (31) 615.
  - factors, effect on milk production, (28) 774.
  - factors, relation to soils, (28) 116.
  - monthly, Chinese, (37) 513.
  - observations—see also Climate, Rainfall, Weather, etc.
    - at Berkeley, California, (31) 316; (35) 209; (36) 616; (40) 716.
    - Cirencester, England, (31) 416.
    - different elevations, (39) 809.
    - Hamburg Observatory, (31) 812.
    - Honolulu, (26) 614.
    - Manila, (40) 19.
    - Ploti Experiment Station, (28) 213; (29) 813.
    - University of California, (29) 121.
    - Wauseon, Ohio, (33) 825.
    - Wisley, (28) 315; (32) 211; (34) 14; (40) 117, 810.
  - importance in engineering, (28) 415.
  - in Alaska, (28) 415; (29) 722; (32) 25; (33) 616; (36) 418, 436; (39) 114.
  - Alberta, (29) 15; (30) 416.

- Truckee-Carson project, (28) 811.
- optics, progress in 1912, (31) 615.
- phenomena, average internal curve for, (35) 419.
- photography, (26) 118.
- radiotelegrams to mariners, (33) 118.
- research, statistical method, (40) 416.
- research, subjects for, (40) 615.

## Meteorological—Continued.

- review for Paris region, (40) 511.
- service in Colombia, (37) 115.
- service in Dutch East Indies, (39) 512.
- services of different crop regions, (39) 718.
- station at Berkeley, California, report, (31) 615.
- stations in Korea, (33) 118.
- study, relation to agriculture, (28) 198.
- symbols, (35) 618.
- work in Chile, (27) 414.
- work in Russia, (28) 116.
- Meteorology—see also Climate, Rainfall, Weather, etc.
- agricultural, (35) 114; (40) 19.
- agricultural—
- at International Institute of Agriculture, (30) 510.
- commission for study of, (31) 415.
- development by Weather Bureau, (33) 615.
- estimating humidity in, (27) 315.
- in Brazil, (30) 618.
- Canada, (35) 15, 718; (36) 510.
- European Russia, (33) 20.
- foreign countries, (34) 504.
- France, (27) 115; (29) 510.
- Germany, (31) 19.
- Great Britain, (34) 319.
- Russia, (29) 314, 510; (34) 207.
- Sweden, (31) 20.
- United States, (36) 616.
- U. S. Weather Bureau, (34) 601.
- increasing interest in, (28) 701.
- international importance, (34) 207.
- method of studying, (28) 115.
- notes, (33) 19.
- periodicity, (39) 317.
- possibilities, (38) 317.
- problems in, (36) 207.
- progress in, (28) 414.
- review of literature, (29) 811; (34) 714.
- theories of statistics and correlation in, (36) 419.
- treatise, (26) 513.
- wireless telegraphy in, (32) 117.
- and agriculture, paper on, (29) 120.
- and aviation, (38) 210, 812.
- antarctic, (34) 118.
- application to agriculture, (34) 606.
- as an exact science, (31) 212.
- at Lick Observatory, (32) 25.
- at Pan American Scientific Congress, (34) 615.
- bibliography, (26) 613; (31) 509, 715; (32) 810; (33) 320, 717.
- C. G. S. system in, (31) 615.
- course in, (26) 596.
- dynamic, (29) 314.
- economic aspect, (38) 317.
- effect on forest types, (34) 640.
- effect on plant diseases, (34) 840; (35) 844.
- history and status, (28) 715.
- in Argentina, (36) 510.
- Australia, (28) 27; (30) 511; (32) 811.
- Brazil, (34) 413.
- Brazil, treatise, (37) 619.
- British Empire, (38) 617.
- California, (34) 509.
- Canada, (34) 208; (38) 618.
- Finland, (27) 414.
- mathematics and physics courses, (33) 321.
- Minnesota, (26) 385.
- Netherlands and vicinity, (34) 614.
- New Zealand, (35) 210.
- Panama Canal Zone, (32) 614.
- the far east, (29) 121.
- international catalogue, (26) 715; (29) 510; (35) 318, 421.
- meaning of "fair" in, (34) 615.
- notes, (26) 613.
- of Greenland's inland ice and its foehn, (38) 812.
- of Mount Rose, Nevada, (35) 505.
- of the moon, (35) 115.
- papers on, (34) 308; (39) 209, 512, 718; (40) 117, 416, 617.
- problems in, (29) 314.
- progress in, (26) 316; (28) 315; (32) 315; (33) 508.
- progress in England since 1866, (35) 317.
- relation to—
- agriculture, (29) 314.
- bird migration, (38) 511.
- grape culture, (34) 234.

- Meteorology**—Continued.  
 relation to—continued.  
   plant and animal life, (26) 513.  
   rust development, (27) 149.  
   winter rye culture, (34) 715.  
 review of literature, (26) 338.  
 station at Grand Saint-Bernard, (38) 812.  
 textbook, (27) 315; (34) 13.  
 treatise, (26) 615; (32) 24; (35) 808.  
 use in European war, (36) 509.  
 world bureau of, (34) 14.  
 yearbook, (34) 494.
- Meteors**—  
 notes, (35) 115, 618.  
 notes to observers of, (29) 121.  
 systematic observation of, (33) 717.
- Meteorus**—  
 archipsidis n.sp., description, (30) 60.  
 archipsidis, notes, (28) 755.  
 dimidiatus, notes, (36) 155.  
 ictericus, notes, (29) 562.  
 laphygmae n.sp., description, (30) 256.  
 manestrae n.sp., description, (31) 554.  
 sp., notes, (27) 262; (29) 455.  
 versicolor, bionomics, (39) 661.  
 versicolor in Maine, (37) 459.  
 versicolor, notes, (27) 456.
- Meth**, description and culture, (40) 231.  
**Methacatin**, periodids of, (34) 502.  
**Methaemoglobinaemia**, infective, in rats, (26) 581.  
**Methane**, analysis, apparatus for, (40) 111.  
**Methi** as fodder crop, (37) 137.
- Methyl alcohol**—  
 as source of carbon for molds, (30) 226.  
 assimilation by yeast and fungi, (28) 824.  
 detection, (27) 815; (30) 210.  
 detection in ethyl alcohol, (29) 312.  
 determination, (29) 411, 810; (31) 115; (37) 111;  
 (40) 15, 204, 310, 413.  
 determination in—  
   alcoholic beverages, (38) 316.  
   presence of ethyl alcohol, (36) 806.  
   spirits, etc., (30) 315.  
 effect on soil microorganisms, (31) 27.  
 formation by yeasts, (38) 316.  
 in foodstuffs and behavior in the body, (40) 204.  
 in silage, (28) 609; (32) 410.  
 pathological effects on human system, (34) 662.  
 treatise, (28) 511.
- Methyl**—  
 carbamate, assimilation by plants, (26) 32.  
 glucosid, cleavage by fungi and yeast, (30) 11.  
 glycol, effect on plant growth, (34) 31.  
 pentose, determination in grapes and wines,  
 (29) 205.  
 salicylate, insecticidal and larvicidal value,  
 (34) 359.  
 salicylate, methods of analysis, (37) 415.  
 xanthin in tea, (31) 358.  
 xanthins, action on isolated intestine, (37) 471.
- β-Methyl fructosid**, notes, (35) 502.  
**Methylamin sulphate**, nitrification rate, (32) 124.  
**Methylamins**, assimilation by plants, (26) 32.
- Methylene blue**—  
 action on abortion bacilli, (34) 679.  
 bactericidal action, (29) 882.  
 effect on—  
   decomposition of pyroracemic acid, (37) 202.  
   formation of carbon dioxide by dead yeast,  
   (37) 203.  
   plant respiration, (27) 523.  
   respiration and alcoholic fermentation of  
   plants, (28) 825.  
 milk method for oxygen determination, (40) 613.  
 solution, preparation, (34) 612.  
 use against contagious abortion, (30) 184; (33)  
 278.  
   against hog cholera, (33) 86.  
   against mastitis, (32) 479.  
   against tuberculosis, (29) 481; (31) 583.  
   in chemical analysis, (37) 111.  
   in iodometric titrations, (28) 311.  
   in judging milk, (28) 473.
- Methylguanidin** in horseflesh, (30) 61.  
**l-Methylinosit**, in Para rubber, (27) 616.  
**Methylpentosans** in germinating bean seeds, (27)  
 730.  
**Metol**, preparation, (40) 504.  
**Metorchis albidus**, infection of pigs with, (38) 82.
- Metric system**—  
 conversion coefficients for, (30) 697.  
 for aeronautics, (36) 718.  
**Metritis**, bovine, etiology, (36) 279.  
**Metrosideros**, Hawaiian species, (38) 45.  
**Metzneria lapella** as a useful insect, (33) 859.  
**Meun mutellina**, analyses, (31) 863.  
**Meyer, F. N.**, biographical sketch, (39) 200.  
**Mgongo nuts**, oil from, (40) 803.  
**Miastor americana**, pedogenesis in, (26) 147.  
**Mica**—  
   as source of potash, (27) 520; (29) 215; (31) 621;  
   (34) 328.  
   deposits in Georgia, (34) 328.  
   schist, fertilizing value, (27) 725; (28) 33.  
**Micaceous minerals**, importance in agriculture, (33)  
 722.  
**Mice**—see also Mouse and Mus.  
 Ascaris infection in, (39) 286, 681.  
 breeding and rearing, (27) 754.  
 breeding experiments, (34) 864.  
 breeding for disease resistance, (28) 370.  
 control in orchards, (39) 860.  
 destruction, (27) 888; (38) 356.  
 destruction in seed rooms, (38) 241.  
 destruction with bacteria, (26) 579; (31) 57.  
 destructive to standing grain, (28) 653.  
 development of ascarid larvae in, (37) 374.  
 directions for raising, (38) 258.  
 feeding experiments, (29) 767.  
 field—  
   as farm and orchard pests, (33) 250.  
   control, (29) 651; (39) 153.  
   destruction by snakes, (34) 751.  
   dissemination and control in Bavaria, (34)  
   850.  
   notes, (37) 156.  
   of Great Britain, (35) 252.  
   relation to seven-day fever, (40) 85.  
 fungus disease, (39) 460.  
 Gaertner group bacilli in, (30) 355.  
 grasshopper, notes, (34) 850.  
 harvest, of Great Britain, (35) 656.  
 harvest, revision, (31) 647.  
 immunity against anthrax bacillus, (29) 378.  
 immunization against trypanosomes, (29) 379.  
 inheritance in, (28) 531.  
 inheritance of color in, (26) 472; (27) 769; (30)  
 264; (35) 776; (40) 275.  
 inheritance of spotting in, (34) 466.  
 injurious to forest trees, (26) 299.  
 inoculation experiments, (27) 555.  
 meadow, in Colorado, (35) 52.  
 meadow, studies, (40) 254.  
 meat feeding experiments with, (30) 260.  
 microbes affecting, (27) 52.  
 new, from Mexico, (37) 757.  
 new, meadow, from Wyoming, (37) 846.  
 new pocket, from Wyoming, (37) 758.  
 notes, (28) 653.  
 of Great Britain, (34) 57.  
 ovulation in, (40) 663.  
 parasites, (27) 754.  
 pine, from Florida, (35) 656.  
 protecting trees against, (27) 344.  
 relation to equine influenza, (28) 482.  
 suckling, gestation in, (40) 469.  
 susceptibility to pneumonic plague, (28) 180.  
 white—  
   analyses at different stages of growth, (36)  
   663.  
   gestation period in, (28) 173.  
   heredity in, (34) 370.  
   infection with a vian tuberculosis, (26) 583.  
   meat-feeding test, (26) 176.  
   morphology of blood, (28) 777.  
   normal growth of, (35) 864.  
   white-footed, remedies, (31) 846.  
   yellow and agouti factors, association, (27) 468.  
   yellow, embryology, (38) 573.  
   yellow homozygous, death in utero, (38) 573.
- Micena** (?) sp. on coffee, (38) 51.  
**Michelia champaca**, oxidases in, (28) 129.
- Michigan**—  
 College, agricultural education in, (31) 692.  
 College, history, (38) 794.  
 College, notes, (27) 300, 698; (28) 94, 397, 900;  
 (29) 300; (30) 95; (31) 99, 300, 600; (32) 694;  
 (33) 700; (34) 96, 695, 797; (35) 500; (36) 196,  
 499, 695; (37) 197; (38) 798.

- Michigan—Continued.  
 Station, financial statement, (27) 196; (28) 493.  
 Station notes, (26) 396; (27) 300; (28) 797, 900;  
 (29) 300, 397; (30) 600; (31) 300, 600; (33) 700;  
 (37) 197; (38) 798.  
 Station, quarterly bulletin, (40) 97, 797.  
 Station, report, (30) 696; (32) 693; (34) 795; (36)  
 795; (39) 397.  
 Station, report of director, (27) 196; (28) 493.  
 Upper Peninsular Station, report, (40) 796.
- Micuaru, composition, (36) 674.
- Microbes—  
 and toxins, treatise, (26) 373.  
 destructive to mice and rats, (27) 52.  
 in indoor and outdoor air, (32) 211.  
 production of lipase by, (26) 803.  
 separation and removal from water, (33) 684.
- Microbial diseases, treatise, (29) 476.
- Microbiology—  
 agricultural, review of literature, (30) 378.  
 laboratory manual, (35) 593.  
 of animal diseases, treatise, (32) 474.  
 treatise, (26) 372; (27) 223, 575; (31) 177; (37) 76.
- Microbiose, notes, (38) 647.
- Microbracon—  
 cephi n.sp., description, (40) 761.  
 dorsator, notes, (31) 752.  
 hemimena n.sp., description, (34) 456.  
 hyslopi n.sp., description, (29) 563.  
 hyslopi, parasitism, (27) 553.  
 juglandis, oviposition and feeding in, (26) 458.  
 mellitor, notes, (27) 864.  
 sanninoideae n.sp., description, (38) 165.  
 sp., notes, (28) 658.  
 vestiticia n.sp., description, (29) 563.
- Microcalorimeter—  
 differential, description, (26) 872.  
 for bacteria, (30) 66.
- Microcentrum rhombifolium, studies, (33) 451.
- Microcera—  
 fujikuroi n.sp., notes, (30) 455.  
 sp., notes, (27) 860.  
 sp., parasitic on citrus white fly, (29) 251.  
 sp., spraying experiments with, (31) 751.
- Microchemistry—  
 of plants, treatise, (30) 310; (32) 308.  
 textbook, (29) 801.
- Microcitrus n.g. and n.sp., descriptions, (34) 235.
- Microcline—  
 as source of potash, (26) 426; (30) 216.  
 decomposition by soil bacteria and yeast, (31)  
 121.  
 extraction of potash from, (27) 323.  
 fertilizing value, (26) 725; (39) 728.
- Micrococci in udder infections, (40) 87.
- Micrococcus—  
 acido proteolyticus I and II, development in  
 cheese, (26) 881.  
 lactis vars., itinerary in butter manufacture,  
 (39) 78.  
 melitensis—see also *Bacillus melitensis*.

  - value in the diet, (29) 862; (36) 763; (39) 471; (40) 179, 280, 359.
  - variation in, (31) 373; (32) 75, 270, 674, 871; (34) 379.
  - variations in fat and solids-not-fat, (39) 483.
  - vegetable, digestibility and food value, (33) 163.
  - vegetable, production, (26) 613.
  - veins, relation to production in dairy animals, (38) 476.
  - veins, significance of, (36) 673.
  - vetch, toxicity, (37) 780.
  - viability of *Bacillus typhosus* in, (26) 776.
  - viscosity, determination, (33) 504.
  - vitamin fraction of, (30) 508.
  - volatile fatty acids in, (27) 113.
  - warm, danger for infants, (28) 259.
  - Washington market, spore-bearing bacteria in, (32) 269.
  - water-decomposing agent in, (38) 802.
  - watered, detection, (26) 210, 211, 314, 410; (27) 111, 506, 809; (28) 112; (29) 806; (30) 113, 414, 508; (31) 209; (32) 299, 370, 413; (33) 208, 504, 613, 715; (36) 571, 807; (37) 13, 804; (38) 11, 413.
  - watered, souring, (35) 616.
  - whey, yellow pigment of, (32) 19.
  - white color, (40) 802.
  - yield as affected by—
    - albuminous food, (28) 774.
    - frequency of milking, (32) 267.
    - milking machines, (28) 472; (29) 774.
    - rainfall, (28) 716.
    - work, (30) 475.
  - yield—
    - computing decrease in, (28) 472.
    - inheritance in cattle, (27) 375.
    - relation to escutcheon, (30) 473.
    - relation to phosphate depletion of soil, (38) 118.
  - yields. determination, (36) 673.
  - zymoscopic testing, (33) 175.
- Milking—
- at unequal periods, (34) 379, 670.
  - Eichloff-Schumann method, (28) 277.
  - Heglund method, (32) 267.
  - machine, (40) 674.
  - machine v. hand, (26) 274.
  - machines—
    - as factor in dairy farming, (36) 272.
    - bacterial contamination of milk, by, (36) 177.
    - descriptions and use, (27) 792.
    - discussion, (27) 387.
    - effect on cell content of milk, (31) 372.
    - effect on yield of milk, (28) 472.
    - electricity for, (32) 886.
    - in production of sanitary milk, (38) 377.
    - motor driven, description, (27) 90.
    - notes, (27) 176; (30) 877; (32) 399.
    - relation to cattle diseases, (26) 673.
    - sterilization and efficiency, (29) 578.
    - tests, (26) 672; (27) 486; (29) 774; (30) 272, 573; (31) 475; (32) 266, 673; (33) 589, 765; (34) 183, 589; (35) 776; (36) 75, 673, 774; (37) 75; (38) 679.
    - use, (27) 473.
    - methods, (29) 373; (32) 75, 267; (34) 299; (36) 375.
    - tests, error in, (32) 75.
- Milkweed—
- anthracnose, notes, (33) 350.
  - geographical distribution, (26) 335.
  - green, leaf variation in, (27) 741.
  - notes, (32) 778.
  - whorled, toxicity, (39) 787.
- Milk—
- feed, analyses, (34) 668.
  - feed grinding and sifting, tests, (30) 292
  - feed, mixed, analyses, (27) 170.

## Mill—Continued.

- fumigants, effect on baking quality of flour, (26) 357.
- insects, destruction by heat, (29) 253.
- insects, life history and remedies, (30) 155.
- products, shipments and prices in Minneapolis, (32) 894.
- Millers, manual and record book for, (40) 863.

## Millet—

- absorption of organic nitrogen by, (29) 628.
- amylase, studies, (31) 609.
- and Sudan grass, comparative yields, (40) 328.
- as cover crop for orchards, (33) 240.
- forage crop, (31) 829.
- green manure, (28) 339.
- midsummer forage crop, (39) 532.
- silage crop, (39) 133.
- source of sugar, (32) 117.
- bran, analyses, (33) 170.
- bread, digestibility, (37) 364.
- breeding for drought resistance, (34) 528.
- broom, classification, (33) 834.
- broom corn, culture in Texas Panhandle, (29) 429.
- bulrush, culture experiments, (32) 227.
- bulrush, varieties, (30) 731.
- caterpillar, notes, (33) 654.
- chloroform extract of, (31) 71.
- composition, (27) 668.
- cost of production, (35) 691.
- culture, (29) 426; (31) 35, 265; (34) 630.
- culture—
  - and utilization, (37) 37.
  - experiments, (26) 422, 632, 737; (27) 532, 735; (28) 735; (29) 137; (30) 133, 136; (31) 733; (32) 227, 526, 529, 530; (33) 31, 633; (35) 529; (36) 32, 133, 829; (37) 227, 436, 730, 734, 824; (38) 334, 336, 433, 830, 831; (39) 227, 435.
  - experiments in India, (40) 332.
  - for chicken feed, (38) 827.
  - for hay, (37) 436.
  - in Dutch East Indies, (30) 697.
  - in eastern Oregon, (38) 432.
  - in Rhodesia, (27) 32, 637.
  - under dry farming, (30) 435; (36) 529; (37) 329.
- depth of sowing tests, (27) 835.
- digestibility, (27) 669; (37) 168.
- ditch, analyses, (30) 565.
- downy mildew, studies, (31) 51.
- effect on following crop, (40) 623, 734.
- effect on nitrate content of soils, (29) 818.
- exhibits of, (31) 495.
- fertilizer experiments, (26) 422, 523, 830; (28) 338, 816; (29) 625; (30) 820; (31) 733; (34) 330, 421; (35) 220, 426; (36) 427, 626; (37) 436; (38) 230, 433, 829; (39) 817; (40) 332.
- fertilizer experiments with bat guanos, (39) 426.
- flour, analyses, (39) 870.
- for late planting, (37) 436.
- giant, analyses, (26) 362.
- grain, as a feeding stuff, (34) 565.
- grass, analyses, (28) 463.
- green manuring experiments, (37) 734.
- growing with corn, (40) 822.
- growth as affected by meteorology, (29) 510.
- growth on partially sterilized soils, (35) 515.
- growth studies, methods, (38) 526.
- hay, ash analyses, (29) 861.
- Hungarian, liming experiments, (39) 221.
- hydrocyanic acid in, (33) 506.
- improvement, (28) 736.
- influence of meteorological factors on, (38) 15.
- irrigation experiments, (33) 884; (40) 331.
- Italian, notes, (30) 233.
- Japanese—
  - analyses, (27) 68.
  - culture experiments, (35) 528.
  - fertilizer experiments, (26) 725.
- maltase content, (31) 204.
- milling experiments, (40) 556.
- mineral constituents, digestibility, (40) 769.
- notes, (26) 362.
- pearl, culture in Porto Rico, (29) 631.
- pearl, root parasites of, (31) 842.
- Polish meal, methods of analysis, (29) 311.
- production in Spain, (28) 736.
- right- and left-handedness in, (27) 236.
- rock phosphate for, (29) 418.
- seed, inspection in Maryland, (36) 442.

## Millet—Continued.

- seed protein, nutritive value, (39) 666.
- seed treatment, (39) 238, 353.
- seeding experiments, (27) 639; (32) 528; (40) 331.
- selection experiments, (37) 32.
- smut—
  - cause and treatment, (30) 47.
  - description and treatment, (39) 248.
  - notes, (31) 841; (32) 544; (35) 348.
  - studies, (39) 353.
  - treatment, (34) 50; (40) 48.
- starch, notes, (28) 408.
- Striga lutea on, (40) 45.
- transpiration in, (36) 226.
- varieties, (26) 233, 830; (27) 32, 334, 530, 532, 736; (28) 736; (30) 525, 731; (31) 36, 732, 733, 829; (32) 226, 528, 529; (33) 33, 527; (35) 229; (36) 36, 133, 529; (37) 32, 233, 329, 331, 436, 825; (38) 433, 630, 830.
- variety tests, (39) 128, 336, 434, 436; (40) 332, 522.
- water requirements, (29) 826; (32) 127; (34) 720; (38) 227.
- wild, as duck food, (30) 545.
- yields, (28) 533; (31) 226; (40) 733, 735.

Millinery teaching in high schools, (36) 595.

## Milling—

- and baking, handbook, (35) 859.
- by-products, effect on baking quality of flour, (26) 356; (30) 555.
- invisible loss in, (29) 661.
- offals, digestion coefficients, (28) 170.
- offals of wheat, composition, (33) 564.
- products, composition, (26) 358.

## Millipedes—

- destructive to vegetables, (26) 458.
- hothouse, new genus, (26) 353.
- remedies, (32) 246.

## Mills, fumigation, (29) 640.

## Milo—

- and corn, transpiration, (39) 440.
- as dry farm crop, (29) 736; (37) 329, 637; (39) 736.
- as pasture crop for pigs, (38) 470.
- as silage crops, (38) 174.
- breeding experiments, (39) 736.
- chemistry of, (40) 508.
- chop, analyses, (26) 467; (28) 464; (34) 169, 467; (36) 765; (38) 369; (40) 571.
- culture, (32) 226.
- culture—
  - experiments, (27) 529; (28) 532; (29) 225; (32) 227, 526; (33) 32, 332, 830; (37) 132, 331, 730; (38) 631, 829, 831; (39) 129, 835; (40) 433.
  - in Arizona, (32) 226.
  - Kansas, (39) 33; (40) 331.
  - sand hills of Nebraska, (35) 827.
  - Texas, (29) 429; (32) 332; (35) 440; (39) 533, 835.
- digestibility and productive value, (37) 865.
- drought resistance of, (28) 633.
- dwarf, digestibility, (36) 661.
- fats and fatty acids of, (38) 410.
- feeding value, (39) 71.
- fertilizer experiments, (29) 32; (33) 830.
- for pigs, (29) 468; (39) 174.
- grades, (32) 138.
- hogging-off, (40) 472.
- improvement, (40) 737.
- irrigation experiments, (27) 529; (40) 330.
- leaves, variation of water and dry matter in, (37) 637.
- maize, see Milo.
- meal, analyses, (36) 765.
- meal, digestibility, (36) 470.
- notes, (26) 362; (31) 333.
- recurving, (37) 642.
- relation to polyneuritis, (39) 369.
- seeding experiments, (33) 38.
- spacing experiments, (32) 332; (34) 229.
- starch content, (35) 108.
- stover yields, (40) 330.
- thinning experiments, (33) 38.
- use in bread making, (34) 67.
- varieties, (37) 338.
- varieties for central and southern Great Plains, (35) 832.
- varieties for Texas, (39) 835, 838.
- water requirement, (32) 335; (35) 825; (38) 229.
- weight ratios, (36) 131.
- wilting coefficient, (32) 335.
- yields, (29) 32, 426.

- Milowia nivea, notes, (26) 551.  
 Milwaukee County School of Agriculture and Domestic Economy, survey, (36) 792.  
 Mimetes setulosus, notes, (35) 364.  
 Mimetic crystals, classification, (40) 609.  
 Mimetite, artificial, preparation, (36) 412.  
 Mimicry—  
   in butterflies, treatise, (37) 55.  
   paper on, (32) 399.  
   treatise, (31) 57.  
 Mimorista flavidissimalis, notes, (28) 451.  
 Mimos—  
 pudica—  
   fertilizing value, (34) 34.  
   notes, (26) 362.  
   permeability of pulvinus, (39) 730.  
   wound stimulus in, (33) 724.  
 thorn caterpillar, notes, (26) 348.  
 velocity of transmission of excitation in, (34) 29.  
 Mincemeat—  
   examination, (27) 463, 763.  
   nitrogen content, (30) 861.  
   studies, (30) 665.  
 Mindarus abietinus, notes, (33) 253.  
 Mine timbers—  
   insects affecting, (27) 554.  
   preservation, (27) 443; (33) 544.  
   Rocky Mountain, tests, (31) 144.  
   supply of England and Wales, (32) 542.  
 Mineola—  
   indiginella, see Leaf crumpler.  
   juglandis, see Walnut case-bearer.  
   vaccinii, see Cranberry fruit worm.  
 Mineral—  
   aggregates, specific gravity, (36) 683.  
   constituents of soils, (28) 215.  
   constituents of soils, composition, (33) 720.  
   constituents, soluble, determination in soils, (27) 515.  
   content of rations, effect on growth and reproduction, (33) 666.  
   deposits, treatise, (30) 719.  
   elements in animal nutrition, (35) 867.  
   elements in poultry feeding, (33) 572.  
   matter—  
   assimilation by plants, (26) 521.  
   detection in wheat flour, (28) 411.  
   effect on development of plantlets, (38) 329.  
   effect on germination of plants, (39) 526.  
   importance in food, (29) 366.  
   metabolism of, (30) 562.  
   removal from soil by plants, (30) 334.  
   metabolism, see Metabolism.  
   nutrients in human dietetics, (35) 269.  
   nutrition of plants, (28) 124, 127, 224.  
   oil, detection in other oils, (26) 611.  
   oils—  
   as affected by added oils, (29) 488.  
   detection, (28) 412.  
   detection in vegetable oils, (26) 114.  
   fluorescent test for, (26) 114.  
   methods of analysis, (27) 205.  
   poisons, detection in organic matter, (26) 206.  
   poisons, effect on growth of wheat seedlings, (38) 628.  
   requirements of cattle, (33) 870.  
   requirements of farm animals, (31) 864.  
   resources of Texas, conservation, (34) 489.  
   resources of United States, (35) 121.  
   salts, see Salts.  
   springs of Alaska, (38) 690.  
   substances, determination in water, (27) 111.  
   substances, soil, changes in, (31) 818.  
   water, see Water.  
 Minerals—  
   composition terminology, new, (28) 318.  
   ground, fertilizing value, (27) 500; (28) 33.  
   movement in leaves, (27) 229.  
   of United States, analyses, (34) 222.  
   radioactive, effect on wheat, (27) 826.  
   sand dune, weathering, (28) 220.  
   soil-forming, microscopic determination, (28) 812.  
   useful, in United States, (31) 322.  
 Mines, humidity of air in (29) 121.  
 Minidoka bird reservation, (37) 355.  
 Minks—  
   breeding for fur, (29) 673.  
   feeding and management, (29) 70.  
   raising, (35) 378; (40) 373.  
 Minneapolis, Minn., as an agricultural and financial center, (36) 494.
- Minnesota—  
 Crookston substation, report, (37) 297.  
 Crop Improvement Association, (32) 592.  
 Duluth substation, report, (37) 298; (39) 499.  
 Field Crop Breeders' Association, (29) 830.  
 Grand Rapids substation, report, (38) 197.  
 Morris substation, report, (37) 298; (39) 499.  
 State Agricultural Society, history, (27) 490.  
 Station, financial statement, (26) 599; (27) 492.  
 Station, notes, (26) 96, 396; (27) 198, 698, 900; (28) 495, 797; (29) 794; (30) 396; (31) 398, 900; (32) 599, 694, 899; (33) 197, 797; (34) 798; (35) 300, 398, 697, 900; (36) 695; (37) 197, 398, 497, 600, 896; (38) 399, 498, 600, 900; (39) 96, 197, 399, 500, 696; (40) 297, 497, 696.  
 Station, report, (31) 195; (35) 396; (37) 297; (39) 397; (40) 797.  
 Station, report of director, (26) 599; (27) 492.  
 University, notes, (26) 96, 396; (27) 198, 397, 698, 900; (28) 397, 495, 697, 797; (29) 196, 794; (30) 396, 797; (31) 398; (32) 396, 599, 694, 797; (33) 197, 797; (34) 496, 798; (35) 300, 398; (36) 98, 196, 500, 695, 797; (37) 197, 299, 398, 497, 896; (38) 399, 498, 600, 699, 900; (39) 96, 197, 399, 500, 696; (40) 297, 497, 600, 696.  
 Mint—  
   cultivated, degeneration, (34) 44.  
   culture, (34) 151.  
   culture in Indiana, (38) 246.  
   fungus disease affecting, (28) 154.  
   rust, notes, (37) 457.  
 Mirabilis jalapa—  
   abscission in, (36) 225.  
   betains in, (27) 204.  
   diseases, inheritance in, (35) 459.  
 Mirage of St. Lawrence River, (28) 716.  
 Mireken nuts, analyses, (31) 631.  
 Miridae—  
   key to subfamilies, (39) 763.  
   North American, synoptical keys, (35) 255.  
 Miris dolabratus, studies, (40) 260.  
 Mirolynx, new genus, (39) 468.  
 Miromphalomya perilampoides n.g. and n.sp., description, (37) 162.  
 Miscogasteridae of Australia, (39) 154.  
 Miso—  
   brewing, (30) 828.  
   cleavage products of, (29) 565.  
   preparation, (32) 560.  
 Mississippi—  
   College, notes, (26) 494; (27) 198; (29) 300, 397; (32) 396; (35) 196, 398; (37) 497; (39) 900.  
   Delta Branch Station, report, (27) 494.  
   McNeill Branch Station, report, (28) 299.  
   River levees, effect on floods, (26) 417.  
   Station, financial statement, (27) 899.  
   Station, notes, (26) 96, 396, 494, 797; (27) 98, 198, 600; (29) 300; (31) 197, 496; (32) 396; (33) 900; (34) 695; (35) 398; (37) 600; (39) 900; (40) 98, 696.  
   Station, report of director, (27) 899.  
 Missouri—  
   Country Life Conference, report, (31) 895; (32) 793.  
   Fruit Station—  
   financial statement, (26) 692; (29) 599.  
   notes, (29) 699; (39) 96.  
   report, (32) 796.  
   report of director, (26) 692; (29) 599.  
   Home Makers' Conference Association, (30) 462.  
   Poultry Experiment Station, notes, (34) 869.  
   River basin, hydrography, (32) 588.  
   Station—  
   financial statement, (27) 299; (29) 696.  
   notes, (26) 695; (27) 98, 698; (28) 600; (29) 699; (30) 300, 698; (31) 796, 900; (32) 497, 695, 797; (33) 197, 399; (34) 96, 198, 695; (35) 96, 300, 398, 597, 697, 900; (36) 98, 599; (37) 398, 897; (38) 498, 798; (39) 197, 696; (40) 297, 497, 696.  
   publications, (27) 299, 899.  
   report, (31) 396; (33) 299; (35) 899; (37) 796; (38) 697.  
   report of director, (27) 299; (29) 696.  
   University, notes, (26) 494, 695, 900; (27) 98, 698; (28) 600, 697; (29) 97, 699; (30) 300; (31) 197, 796, 900; (32) 94, 397, 497, 695, 797; (33) 197, 399; (34) 96, 198, 96, 695; (35) 96, 398, 697; (36) 98, 599, 695; (37) 97, 398, 897; (38) 498, 699, 798; (39) 197, 696; (40) 297, 497, 696.

- Mist ponds, accumulation of water in, (30) 118.
- Mistletoe—  
 arsenic content, (27) 830; (28) 526.  
 composition, (34) 262.  
 control in National Forests, (37) 458.  
 effect on junipers, (31) 540.  
 growth on monocotyledons and succulent con-  
 servatory plants, (29) 352; (30) 521.  
 in Great Britain and Ireland, (31) 731.  
 in West Indies, (40) 155.  
 infection experiments, (30) 434.  
 injurious to larch, (34) 547.  
 injury caused by, (30) 849.  
 injury to conifers, (35) 459; (39) 57.  
 on citrus trees, (39) 56.  
 parasitic on mistletoe, (40) 226.  
 parasitism, (31) 56.  
 propagation, (30) 849.  
 red fruited, infection experiments, (29) 243.  
 seeds, germination studies, (30) 521.  
 species, hosts, (39) 554.
- Mistletoes—  
 false, studies, (40) 253.  
 South African, and their hosts, (36) 548.
- Mitchell grass, culture experiments, (30) 632.
- Mite galls, descriptions, (39) 868.
- Mite, purple, notes, (34) 60.
- Mites—  
 attacking cheese, (39) 664.  
 brown, notes, (35) 253.  
 classification and habits, (32) 551.  
 control in greenhouses, (38) 762.  
 destruction, (35) 94.  
 endoparasitic, in lung of monkeys, (31) 356.  
 harvest, remedies, (32) 258.  
 injurious to—  
 citrus fruits, (28) 457.  
 citrus fruits, remedies, (31) 549.  
 Gramineae, (32) 853.  
 orchard and field crops in Utah, (38) 365.  
 plants in Sweden, (37) 163.  
 tea and citrus, (32) 557.  
 Mexican myrmecophilous, (35) 264.  
 migration, (30) 657.  
 monograph, (34) 458.  
 natural enemies of, (29) 262.  
 new, (37) 860.  
 new American species, (28) 357.  
 notes, (28) 554.  
 of Barbados, (40) 56.  
 of Lesser Antilles, (27) 552.  
 on horn flies, (26) 252.  
 oyster-shell scale, (27) 861.  
 poultry, (32) 481; (35) 183; (37) 357.  
 scale insects, (26) 553.  
 predacious, notes, (31) 656.  
 relation to peach stop-back, (28) 159.  
 remedies, (27) 357; (33) 98; (39) 364.  
 summary of information, (39) 768.  
 transmission of spirochetes by, (32) 279.
- Mitochondria—  
 and the vacuolar system, (39) 730.  
 appearance and activities, (38) 328.  
 evolution and physiological rôle, (32) 524.  
 in myxomycetes, (40) 726.  
 plant and animal cells, (38) 524.

- Molybdenum—  
in plants, (38) 409.  
in soils, (31) 720.  
residues, recovery, (37) 504.
- Molybdenic—  
acid, effect on plant growth, (35) 434.  
acid, recovery, (34) 204, 608; (36) 805.  
trioxide, determination, (27) 208.
- Mometa zemiodes n.g. and n.sp., description, (33) 155.
- Mominae in British Museum, catalogue, (31) 652.
- Monarthropalpus buxi—  
notes, (30) 154, 253; (32) 245; (34) 64, 752; (36) 551; (40) 754.  
remedies, (33) 859; (39) 362.
- Monarthrum—  
mali, notes, (36) 258.  
spp., studies, (31) 852.
- Monas mülleri, studies, (30) 133.
- Monascus—  
heterosporus—  
notes, (28) 241.  
relation to rubber spotting, (29) 451.  
purpureus—  
effect on corn meal, (28) 663.  
relation to forage poisoning, (35) 76.  
storage of oxygen by, (28) 329.  
studies, (33) 224.
- Monocophora bicincta, notes, (38) 557; (40) 453, 856.
- Monilema crassum, notes, (28) 451.
- Monellia—  
caryella on pecan, (38) 157.  
costalis, notes, (38) 762.  
spp., notes, (38) 256.  
spp., studies, (31) 753.
- Moneys, conversion into metric system, (30) 697.
- Mongoose—  
as pest in Trinidad, (31) 547.  
relation to crop damage in Barbados, (38) 154.
- Mongos, liming experiments, (36) 229.
- Monilezia—  
cell division in, (28) 272.  
expansa, infestation of lambs by, (37) 374.  
expansa, life cycle, (39) 162.
- Monileziella bipunctata n.sp., description, (38) 63
- Monilia—  
candida—  
assimilation of nitrogen by, (28) 35.  
experimental propagation, (29) 858; (30) 161.  
capsulata, relation to lymphangitis, (38) 83.  
cinerea—  
description, (27) 152.  
enzymatic activity, (27) 249.  
notes, (35) 54; (35) 454; (36) 751; (38) 50; (40) 749, 845.  
studies, (40) 850.  
treatment, (28) 244; (31) 843.  
fructigena—see also Cherry, Peach, and Plum brown rot.  
(M. laxa), description, (35) 49.  
notes, (27) 850; (35) 248; (36) 649, 750; (37) 151, 457.  
on quince, (33) 54.  
relation to temperature, (33) 545.  
sclerotia of, (29) 445.  
studies, (26) 749; (36) 750; (38) 649; (40) 649.  
treatment; (32) 148; (39) 752.  
laxa, notes, (38) 50.  
linhartiana, notes, (28) 850; (29) 50.  
outbreak on apricot in Rhone Valley, (35) 249.

sitophila, ammonifying power, (32) 29.  
sp. on fruit trees in Oregon, (34) 351.  
sp., relation to apple rot, (33) 348.  
spp. in sugar, (38) 806.  
spp. in Sweden, (33) 846.  
spp. on apple, (38) 453.  
spp. on fruit trees, (35) 654.  
spp., studies, (26) 849.  
vini n.sp., description, (27) 224.  
vini n.sp., notes, (29) 116.
- Moniliosis aderholdii—  
and Rhizictonia solani, identity, (36) 145.  
notes, (34) 749.
- Monilochaetes infuscans—  
notes, (33) 347.  
studies, (34) 156, 646, 747; (40) 347.
- Monkeys—  
chromatin bodies in erythrocytes of, (29) 478.  
susceptibility to pneumonic plague, (28) 180.
- Monks, Japanese, vegetarian diet of, (30) 863.
- Monoamino acids, detection in presence of poly-peptides, (27) 410.
- Monobaeus hegeii n.sp., description, (37) 667.
- Monoblastus caliroae n.sp., description, (29) 563.
- Monocalcium—  
paracaseinate, formation in cheese, (29) 11.  
phosphate—  
as affected by certain soil constituents, (30) 722.  
as green forage preservative, (28) 464.  
determination, (32) 409.  
effect on soils, (26) 216.

- Monochaetia**—  
 desmazieri, notes, (28) 55.  
 mail, inoculation experiments, (31) 150.  
**Monocotyls**, reproduction by grafting and cuttings, (30) 532.  
**Monocrepidius**—  
 exsul, notes, (27) 656.  
 spp., studies, (30) 546.  
 vesperturnus, studies, (33) 63, 158.  
**Monoclonus secundus** n.sp., description, (34) 363.  
**Monodontomerus areatus**, notes, (26) 753; (27) 455 (29) 252; (37) 459.  
**Monohammus fistularis**, notes, (40) 654.  
**Monolepis nuttalliana**, geographical distribution, (26) 335.  
**Monolexis lagrangei** n.sp., notes, (30) 856.  
**Monomethylamin**, relation to flavor of coot, (31) 555.  
**Monomorium**—  
 latinode, relation to Asiatic cholera, (31) 752.  
 pharonsis, trail formation and orientation, (29) 860.  
**Mononchs**, studies, (38) 254.  
**Monophagium**, studies, (40) 869.  
**Monopotassium phosphate** as affected by calcium carbonate, (26) 527.  
**Monopylidium infundibulum**, notes, (26) 561.  
**Monosaccharids**—  
 absorption in the intestines, (28) 763; (29) 268.  
 determination, Barfoed's test, (34) 411.  
 reducing power, (30) 111.  
**Monstera deliciosa**, parthenocarp in, (36) 331.  
**Montana**—  
 College, notes, (29) 97, 397, 600; (30) 497, 698; (31) 496; (32) 94, 497, 797; (33) 198; (34) 97; (35) 196, 399, 698; (36) 899; (38) 400; (39) 500, 696; (40) 199.  
 Fergus County substation, report, (29) 696.  
 Station—  
 financial statement, (28) 395; (29) 696.  
 notes, (26) 396; (27) 98; (28) 797; (29) 97, 397, 600; (30) 698; (31) 496; (32) 94, 497, 797; (33) 198; (34) 97; (35) 96, 196, 399, 698; (36) 99; (37) 299, 498; (38) 400; (39) 500, 696; (40) 199.  
 report, (31) 694; (33) 599; (36) 294; (38) 398; (40) 494.  
 report of director, (28) 395; (29) 696.  
**Moon**—  
 effect on weather, (27) 509, 817; (29) 314; (33) 320; (34) 509; (38) 510.  
 internal structure, (34) 614.  
 relation to autumn storms, (32) 316.  
**Moonflower**, hybridizing experiments, (33) 242.  
**Moonlight**—  
 and sunlight, relation, (38) 811.  
 effect on fish and meat, (31) 759.  
**Moonrise and noonet**, computing time of, (35) 808.  
**Moor culture**—  
 experiments, (39) 437; (40) 229, 522;  
 handbook, (27) 638; (31) 620.  
 in Austria, (31) 118.  
 instruction in high schools, (33) 791.  
 profitableness, (32) 390.  
 review of investigations, (30) 120.  
 treatise, (32) 38.  
**Moor**—  
 hay causing excessive licking in cattle, (32) 567.  
 of Steinhude Lake region, (33) 324.  
 plantations, machinery for, (29) 488.  
 soils—see also Peat soils.  
 analyses, (33) 324.  
 as affected by lime, (29) 823; (31) 220.  
 blasting experiments, (32) 589.  
 bog and moss, fertilizer experiments, (40) 135.  
 bog and moss, water table and root development in, (40) 211.  
 cryptogamic flora of, (28) 727.  
 cultivation and fertilization, (27) 824.  
 decomposition of cellulose in, (31) 25.  
 disinfection experiments, (35) 724.  
 drainage and cultivation, (31) 732.  
 effect of mixing with lighter soil, (29) 19.  
 fertilizer and field trials with, (26) 423.  
 fertilizers for, (29) 516.  
 horticulture on, (26) 136.  
 improvement, (32) 719.  
 inoculation experiments, (40) 822.  
 lime requirements, (31) 726.  
 liming experiments, (34) 18.  
**Moor**—Continued.  
 soils—continued.  
 nitrate content, (30) 325.  
 nitrate formation in, (40) 811.  
 of northwest Germany, studies, (29) 514.  
 of Steinhude Lake region, (33) 324.  
 phosphatic fertilizers for, (27) 325.  
 sulphur in, (36) 424.  
 utilization, (33) 325.  
**Moors**—  
 burning for grouse and sheep, (40) 667.  
 land-climate and sea-climate, (30) 514.  
 upland, formation, (29) 124.  
**Moose**—  
 protection in Alaska, (36) 791.  
 treatise, (38) 53.  
**Mora River**, profile survey, (36) 583.  
**Morchella esculenta**, prevalence in South Africa, (29) 461.  
**Mordellistina unicolor**, notes, (35) 55.  
**Mordwilkoja vagabunda**, notes, (31) 351.  
**Morganella maskelli**, notes, (30) 454.  
**Moricandia arvensis**, analyses, (33) 466.  
**Morning-glories**—  
 extermination, (26) 236; (30) 838; (34) 228.  
 heredity in, (38) 750.  
 spotting by raindrops, (29) 752.  
 wild, spraying for, (38) 140.  
**Morning-glory**—  
 Japanese, crossing experiments, (33) 242.  
 Japanese, inheritance in, (40) 541.  
 seed, impermeable, viability, (35) 740.  
**Morphin**—  
 detection in water, (34) 410.  
 determination, (27) 499.  
 effect on plant growth, (37) 632.  
**Morphology**—  
 as factor in determining relationships, (33) 822.  
 index catalogue, (32) 166.  
**Morse, E. W.**, biographical sketch, (32)-800.  
**Mortar**—  
 as affected by—  
 fineness of sand, etc., (33) 781.  
 hydrated lime, (31) 687.  
 lime, (36) 286.  
 tests, (29) 786.  
 waterproofing, (35) 493.  
**Mortus**, fungicidal value, (34) 843.  
**Mosaic disease**—see also specific host plants.  
 carrier, (40) 251.  
 studies, (31) 52; (38) 48.  
**Mosquito**—  
 bites, palliatives for, (40) 168.  
 larvae, development in relation to bacteria and yeasts, (37) 763.  
 larvae, sex of, (28) 560.  
 larvicide disinfectant, preparation and standardization, (27) 265.  
 larvicides, (40) 458.  
 sanitation, pioneers in, (34) 453.  
 trap, description, (27) 61.  
**Mosquitoes**—see also Anopheles, Culex, and Malaria and malaria in eastern North Carolina, (32) 61.  
 and malaria, notes, (31) 551.  
 anopheline—  
 in California, (37) 565.  
 India, monograph, (26) 349.  
 the South, (33) 255.  
 Tonkin, (26) 677.  
 infectibility, (37) 463.  
 remedies, (29) 759.  
 as affected by salinity of sea water, (36) 255.  
 anthrax carriers, (39) 161.  
 host of *Critidia fasciculata*, (30) 757.  
 winter carriers of malaria, (34) 856.  
 bibliography, (33) 560.  
 biology and control, (39) 867.  
 breeding, (34) 358.  
 breeding grounds of, (26) 860.  
 collecting device for, (36) 255.  
 control, (27) 266, 559, 655, 759; (30) 159, 361, 655; (31) 58, 351; (33) 58, 486, 656; (36) 853, 855, 858; (37) 255; (38) 562; (39) 659, 761, 766, 866; (40) 552, 648, 653.  
 control in—  
 California, (28) 560.  
 Connecticut, (28) 554; (34) 856; (35) 54; (37) 259.  
 India, (35) 361.  
 Mexico, (31) 756.

- Mosquitoes—Continued.**  
 control in—continued.  
 New Jersey, (28) 756; (31) 454; (32) 551; (34) 160; (39) 806.  
 New York, (30) 657; (36) 856  
 Panama, (35) 855.  
 the Tropics, (28) 62.  
 destruction, (37) 86, 464.  
 destruction by—  
 bats, (31) 62.  
 cyanid gas, (36) 456.  
 ducks, (34) 856.  
 Dytiscus, (38) 766.  
 fish, (27) 656.  
 Toxorhynchites immisericors, (26) 349.  
 detecting flight of, (29) 656.  
 development of—  
 Leishmania donovani in, (26) 656.  
 malaria parasite in, (38) 658.  
 disease-bearing, descriptions, (31) 254.  
 dissemination by river vessels, (27) 456.  
 distribution in North America, (27) 655.  
 eradication (27) 560; (29) 293; (34) 358, 553.  
 fish enemies, (37) 260.  
 flight of, (37) 853.  
 growth in catch basins, (39) 157.  
 habits, (33) 154.  
 handbook, (28) 455.  
 in San Juan, (28) 254.  
 lake, in Canal Zone, (40) 653.  
 life history and control, (37) 664.  
 malarial—  
 identification, (39) 867.  
 losses to rural industries from, (33) 749.  
 of India, (35) 759.  
 treatise, (33) 155.  
 midge parasite of, (26) 559.  
 natural enemy, (39) 660.  
 notes, (27) 53, 862; (28) 158, 355; (36) 552; (37) 57, 156.  
 of Bahamas, (38) 766.  
 Brisbane, (35) 258.  
 Colorado, (39) 262.  
 Havana, (38) 580.  
 Minnesota, (38) 155.  
 Montana, (37) 255.  
 mountains of California, (37) 564.  
 New Jersey, (28) 560; (34) 64.  
 New Orleans, (30) 456.  
 North America and West Indies, treatise, (29) 357; (34) 453; (37) 762.  
 Pacific Northwest, (38) 766.  
 Peru, (37) 357.  
 Philippines, (26) 61.  
 San Diego, California, (36) 552.  
 Switzerland, (35) 361.  
 Transvaal, (26) 882; (29) 476.  
 United States, (38) 766.  
 petroleum oil larvicides, (39) 466.  
 pollination of orchids by, (30) 658.  
 relation to—  
 poliomyelitis, (38) 262.  
 salinity of water, (37) 259.  
 sewage disposal, (32) 554.  
 surra, (31) 777.  
 swamp fever in horses, (32) 754; (37) 374.  
 respiration of, (34) 756.  
 rôle of blood in reproduction of, (38) 160.  
 salt marsh, control, (29) 559.  
 screening against, (31) 292, 756, 787.  
 studies, (29) 252.  
 summary of information, (39) 766.  
 transmission of—  
 leprosy by, (26) 759.  
 malaria by, (35) 360, 361.  
 poliomyelitis by, (28) 753.  
 treatise, (26) 251.  
 trematode parasite, (38) 562; (39) 660.  
 wind-forced migration, (39) 861.  
 yellow fever, early name, (36) 552.  
 yellow fever, notes, (29) 656.
- Moss—**  
 as bedding for cattle and horses, (37) 723.  
 ball, anatomy and biological aspects, (26) 729.  
 cleaning from irrigation canals, (37) 285.  
 destruction in pastures, (26) 534.  
 destruction on fruit trees, (33) 857.  
 reindeer, culture experiments, (36) 369.  
 wood, eradication, (31) 836.
- Mosses—**  
 eradication, (29) 741.  
 heat development of, (31) 323.  
 on trees in Denmark, (36) 825.
- Moth bean—**  
 culture, (32) 226.  
 description, (31) 740.  
 hay, digestibility and productive value, (37) 865.  
 meal, analyses, (38) 572.  
 notes, (26) 362.
- Moth beans, yields, (39) 434.**
- Moth borer—**  
 Mexican, notes, (35) 657.  
 new, on pear trees, (37) 847.
- Moth borers—**  
 injurious to sugar cane, (38) 465.  
 notes, (38) 459.  
 remedies, (32) 553.
- Moth, diamond-back, notes, (27) 53.**
- Mothers, nursing, as factor of safety in nutrition of the young, (40) 661.**
- Moths marvel grass, analyses, (28) 768.**
- Moths—see also Lepidoptera.**  
 collecting and preserving, (35) 594.  
 pollination of alfalfa by, (26) 633.  
 treatise, (37) 358.
- Motion, effect on chemical equilibrium, (28) 168.**
- Motor—**  
 and plough combination, description and tests, (28) 486.  
 and wagon hauling, costs, (40) 93.  
 cultivators, *see* Cultivators and Cultivation.  
 plows, *see* Plows.  
 power v. horses, treatise, (29) 388.  
 spirits as substitute for gasoline, (32) 788.  
 truck efficiency, (40) 387.  
 truck loads for highway bridges, (36) 489.  
 truck route, cooperative, (40) 893.  
 trucks—  
 as factor in marketing, (30) 295.  
 effect on road surfaces, (29) 388.  
 fuel for, (30) 892.  
 tractive resistance on roads, (36) 490.  
 use in road maintenance, (27) 88; (35) 888.  
 v. horses, comparison, (29) 489; (30) 387, 388.  
 with trailers, efficiency, (28) 892.  
 vehicle—  
 laws and regulations, (29) 291.  
 registration and revenues, (33) 189.  
 registrations, licenses, and revenues, (35) 585.  
 vehicles—  
 new fuel for, (29) 184.  
 relation to rural life, (26) 685.  
 wind, description, (28) 187.
- Motors—**  
 agricultural, tests, (27) 588, 689, 690.  
 and dynamos, treatise, (29) 892.  
 cost of operation in Montevideo, (28) 385.  
 electric—  
 connecting for direct drive, (30) 190.  
 for farm power, (32) 589.  
 fuel consumption and energy utilization in, (31) 385.  
 service tests, (29) 892.  
 farm, self-steering apparatus for, (32) 86.  
 farm, treatise, (31) 186.  
 for piston pumps and pump jacks, (39) 87.  
 gasoline for, (27) 690.  
 internal combustion, notes, (30) 388.  
 naphthalin, notes, (30) 190.
- Mottled leaf, spread by budding, (26) 441.**
- Mottling disease of sugar cane, *see* Sugar cane.**
- Mouflon, relation to sheep pox, (28) 183.**
- Mountain—**  
 apples, host plant of fruit fly, (26) 758.  
 ash louse on olive, (38) 157.  
 climbing in cold weather, effects, (32) 564.  
 pine beetle, notes, (26) 561; (32) 552.  
 slopes, climatic influence, (29) 414.
- Mountains—**  
 relation to conservation of snow, (28) 414, 514; (31) 510; (36) 17.  
 value to fruit growers, (26) 214.
- Mouse—see also Mice.**  
 bite causing sporotrichosis, (40) 180.  
 favus, relation to Australian wheat, (40) 583.  
 typhoid cultures, tests, (27) 888.  
 typhoid, immunization, (32) 375.

- Mowers—  
 care and repair, (39) 292.  
 motor-driven, descriptions, (27) 485.
- Mowing machine, tests, (27) 892.
- Mowrah—  
 butter, detection, (29) 613.  
 cake, agglutinating properties, (31) 774.  
 fat, detection in edible fats, (32) 507.  
 meal, analyses, (31) 366.  
 meal, analyses and use, (30) 267.  
 seed, composition and nutritive value, (34) 565.
- Mucilage—  
 effect on germination of seeds, (27) 427.  
 linseed, studies, (32) 802.
- Mucilages, plant, studies, (40) 818, 819.
- Mucin—  
 antigenic properties, (33) 773.  
 formation by tubercle bacilli, (31) 284.  
 occurrence in plants, (29) 308.  
 substances, chemistry of, (31) 409.
- Mucinase in yams, (34) 312.
- Muck—  
 agricultural value, (30) 588.  
 analyses, (27) 327; (32) 424, 520; (34) 521; (36) 27.  
 analyses and use, (34) 519.  
 and peat soils, subsidence after drainage, (38) 690.  
 as source of organic ammoniates, (37) 815.  
 availability of nitrogen in, (38) 423.  
 deposits of Vermont, (28) 422.  
 effect on soil granulation, (26) 420.  
 fertilizing value, (36) 516; (40) 134.  
 fertilizing value, judging, (37) 216.  
 soils—  
   analyses, (26) 127.  
   improvement, (33) 33; (34) 885.  
   management, (36) 191, 236.  
   notes, (27) 617.  
   of Florida, analyses, (32) 811.  
   of Washington, potash requirement, (40) 422.  
   or humus, for greenhouse crops, (33) 139.  
   utilization, (32) 213.
- Mucor—  
 ammonifying power, (32) 29.  
 cyanogenes n.sp., description, (38) 824.  
 erectus, notes, (28) 562.  
 mucedo, in tamari-koji, (29) 161.  
 mucedo, notes, (31) 55.  
 n.sp., studies, (36) 734.  
 piriformis, studies, (26) 749.  
 plumbeus, ammonia production by, (35) 513; (36) 221.  
 prainii, notes, (28) 761.
- racemosus—  
 and *Empusa muscae*, relationship, (34) 254.  
 isolation from cheese, (26) 479.  
 notes, (31) 542; (32) 843.  
 occurrence in sugar, (26) 505.  
 studies, (39) 854; (40) 347.
- spp., on citrus, (34) 446.  
 spp., source of nitrogen for, (27) 226.  
 stolonifer, notes, (26) 647; (30) 243.  
 stolonifer, relation to apple rot, (33) 348.  
 variations in, (30) 729.
- Mucorin crystalloids in mitochondria, (35) 635.
- Mucorineae, studies, (27) 134.
- Mucors, identifying sex in, (29) 216.
- Mucous membrane—  
 extract, effect on action of trypsin, (26) 159.  
 of domestic animals, studies, (26) 480.
- Mucuna—  
 lindro, analyses and digestibility, (28) 464.  
 sp., fertilizing value, (34) 34.  
 utilis, analyses, (31) 863.  
 utilis, culture, (30) 335.
- Mud—  
 analyses, (27) 327.  
 fertilizing value, (29) 129, 625.  
 pond, fertilizing value, (27) 825.  
 puppies in Pennsylvania, (31) 648.  
 river and tidal, analyses, (36) 277.  
 transportation by rivers, (27) 511.
- Mulberries—  
 culture experiments, (28) 236.  
 culture in Mexico, (30) 144.  
 red spider affecting, (26) 254.
- Mulberry—  
 blight, American and French, identity, (31) 347.  
 blight in South Africa, (34) 649.
- Mulberry—Continued.  
 diseases in France, (33) 54, 448; (37) 655.  
 diseases in Italy, (33) 448; (37) 655.  
 diseases, notes, (27) 547; (29) 243.  
 diseases, studies, (27) 49; (36) 751; (37) 651.  
 leaves, adenin and asparaginic acid in, (31) 203.  
 leaves, composition as affected by sunlight, (35) 333.  
 leaves, nitrogen in, (37) 525.  
 pests in Formosa, (40) 163.  
 scale—  
   control by parasites, (34) 456.  
   notes, (32) 847.  
   parasites of, (27) 455.  
   remedies, (32) 755.  
   West Indian host plants of, (26) 248.  
 seed oil, chemistry of, (26) 504.  
 white fly, notes, (34) 752.
- Mulch of coffee estates, fertilizing value, (28) 223.
- Mule and horse as twins, (38) 574.
- Mules—  
 brains of, (31) 168.  
 breeding at Poitou, France, (31) 170.  
 breeding in Sao Paulo, (29) 368.  
 care and management, (30) 772.  
 color inheritance in, (38) 574.  
 cost of keeping, (38) 790.  
 cottonseed meal for, (39) 375.  
 destruction by parasites, (28) 82.  
 digestion experiments, (32) 262.  
 feeding experiments, (26) 362; (30) 772; (31) 769; (32) 670; (37) 681.  
 fertility, (36) 372.  
 grape marc for, (32) 567.  
 harness wounds, (39) 85.  
 immunization against—  
   anthrax, (28) 778.  
   hemorrhagic septicemia, (28) 881.  
   trypanosomiasis, (28) 784; (32) 181.  
 in Germany, (33) 296.  
 Kongo, (31) 865.  
 Tunis, description, (27) 571.  
 United States, (31) 73, 167.  
 infection with *Trypanosoma hippicum*, (26) 884; (27) 82.  
 inspection and disinfection for interstate shipment, (34) 185.  
 maintenance tests with oat hulls, (29) 367.  
 mucous membrane of, (26) 480.  
 production, notes, (39) 74.  
 raising in the South, (32) 570; (36) 70.  
 short-faced Abyssinian, notes, (32) 366.  
 spermatogenesis in, (27) 371.  
 sterility in, (34) 568.  
 textbook, (31) 470.
- Mullein—  
 notes, (30) 145.  
 thrips, sex determination in, (38) 558.
- Mullen, eradication, (26) 839.
- Multiceps—  
 gaigeri n.sp., description, (36) 354.  
 multiceps in Wales, (39) 283.  
 multiceps, notes, (27) 182.
- Mungo beans—  
 as green manure, (39) 437.  
 as poultry pasture, (40) 729.  
 culture experiments, (28) 735; (37) 529.  
 culture in Philippines, (40) 231.  
 description, (30) 828; (31) 740.  
 fertilizer experiments, (31) 421; (37) 336.  
 field tests in Fiji, (40) 231.  
 for rice soils, (35) 338.  
 intercropping corn with, (40) 627.  
 notes, (26) 362.  
 raffinase content, (40) 171.  
 varieties, (37) 336.
- Mungo meal, analyses, (38) 572.
- Municipal waste, fertilizers from, (33) 219.
- Murgantia histrionica, see Harlequin cabbage bug.
- Muriate of potash, see Potassium chlorid.
- Muridae—  
 new, of Argentina, Patagonia, and Cape Horn, (37) 357.  
 of Great Britain, (34) 57; (35) 252.
- Murrina, studies, (27) 782.
- Murrina, transmission, (27) 82, 480.
- Mus, see also Mice and Rats.  
 norvegicus, Acari on, (32) 353.  
 norvegicus, parasites of, (26) 833.

- Mus**—Continued.  
 norvegicus, prolificacy of, (26) 346.  
 rattus, bacterial disease of, (29) 53.  
 rattus, breeding in captivity, (26) 654.  
 spp., notes, (29) 158.  
 sylvaticus, control in France, (29) 651.
- Musa** textilis—  
 binder twine from, (27) 534.  
 fiber, strength of, (29) 313.
- Musca**—  
 corvina, hibernation, (34) 254.  
 domestica, *see* House flies.  
 hematophagous species, (30) 756.  
 Indian species, classification, (38) 563.  
 misuse of generic name, (34) 253.  
 oetustissima, notes, (33) 153.  
 specific differences in, (35) 856.
- Muscardinæ**—  
 fungus, green, in Porto Rico, (39) 868.  
 fungus in Queensland, (32) 555.  
 use against sugar cane pests, (29) 846.
- Muscardines**, notes, (32) 63.
- Musci**, carbohydrates of, (36) 609.
- Muscidae** with bloodsucking larvae, notes, (34) 555.
- Muscina**—  
 (*Passeromyia*) heterochaeta, notes, (36) 359.  
 spp., hibernation, (34) 254.  
 spp., notes, (30) 457.  
 spp., studies, (37) 764.  
 stabulans—  
 notes, (26) 147; (28) 255.  
 relation to leprosy, (31) 851.  
 studies, (37) 665.
- Muscivora forficata**, feeding habits, (28) 56.
- Muscles**—  
 chemistry of, (28) 201; (31) 861.  
 chemo-dynamics of, (30) 263; (31) 166.  
 contraction, studies, (27) 666.  
 creatin content, (28) 865; (33) 566.  
 creatin content, effect of autolysis on, (35) 766.  
 creatin content, factors affecting, (30) 65.  
 creatinin content, (32) 764; (33) 566.  
 fibers, occurrence of fat in, (26) 366.  
 from fasting dogs, composition, (29) 664.  
 heat production in, (32) 257.  
 hydrogen-ion concentration during work, (40) 274.  
 juice, proteins of, (30) 766.  
 living smooth, studies, (27) 169.  
 methods of analysis, (35) 614.  
 of healthy and diseased animals, bacterial content, (26) 176.  
 potassium, sodium, and chlorin content, (26) 566.  
 protein, specific heat of, (33) 566.  
 purin bases in, (29) 366.  
 respiratory process in, (37) 266.  
 smooth, ash analyses, (27) 273.  
 striated, interstitial granules, (27) 466.  
 striated, phosphorus in, (32) 561.  
 striated, structure, (27) 768.
- Muscoid**—  
 Diptera, new, of America, (37) 764.  
 flies, new genera, (34) 554, 555, 855.  
 flies, new, of western South America, (30) 56.  
 flies of Peru, (34) 655.  
 flies, studies, (26) 860.  
 genera and species, new, (40) 859.  
 genera, new, for old species, (33) 156.  
 genotypes, notes, (35) 760.  
 species, nonintentional dispersal by man, (35) 259.  
 synonymy, (40) 758.
- Muscoidea**—  
 acalyprate genus of, (34) 65.  
 new, from west and southwest, (34) 855.  
 new genera and species of Australia, (35) 660.  
 new, in Canada and Alaska, (34) 65.  
 of Australia, (36) 554.  
 of Brazil, (39) 563.  
 of New England, (35) 760.  
 synonymical notes, (34) 360, 554.
- Muscovite**—  
 as source of potash, (26) 426; (27) 520; (30) 216; (34) 425; (36) 728; (37) 505.  
 fertilizing value, (27) 725; (28) 33; (29) 625; (39) 728.  
 potash, solubility, (34) 328; (40) 812.
- Muscular**—  
 and mental work, notes, (28) 765.  
 bioenergy of living organisms, (28) 168.  
 contraction, cause, (27) 768.  
 contraction, determination of efficiency, (29) 568.  
 energy, origin, (29) 466.  
 fatigue, measurement, (28) 570.  
 motion, nature, (37) 266.  
 paralysis following tick bite, (31) 656.  
 tissue, function in urea formation, (37) 802.  
 tissue, glycolytic properties, (37) 802.  
 tissue, metabolic changes in, (32) 359.  
 work and the respiratory quotient, (33) 464.  
 work as affected by protein consumption, (33) 166.  
 work, effect on—  
 blood, (32) 765.  
 body temperature, (26) 466.  
 body temperature and pulse rate, (32) 664.  
 carbon dioxide excretion, (29) 569; (31) 561.

 gastric secretion, (26) 160.  
 man, (28) 168.  
 metabolism, (32) 67, 765; (36) 763.  
 women, (29) 568.  
 work—  
 heat production in, (30) 766.  
 importance of training in, (28) 868.  
 metabolic study of, (31) 465.  
 physiology of, (30) 263; (31) 166.  
 static and negative, studies, (26) 871.
- Museum**—  
 educational, at Clark University, (29) 898.  
 pests, remedies, (32) 650.
- Mushroom**—  
 bacterial disease, studies, (33) 446.  
 extracts, effect on red blood corpuscles, (30) 879.  
 Mycogone disease, description, (32) 50.  
 pests and their control, (36) 853.  
 root rot, treatment, (30) 649.  
 spring-tail, remedies, (36) 854.  
 wild winter, (39) 571.
- Mushrooms**—*see also* Fungi, edible.  
 analyses, (34) 761.  
 and other common fungi, (33) 65.  
 and toadstools, handbook, (31) 628.  
 cultivated, nutrition, (26) 440.  
 culture, (27) 842; (38) 147.  
 culture and preparation, (27) 329.  
 description and preparation, (32) 760.  
 diseases and deformities of, (31) 842.  
 edible and nonedible, of Nancy, France, (31) 759.  
 edible and poisonous, (33) 338; (37) 263; (39) 445.  
 edible, detecting adulterations in, (30) 880.  
 fungus diseases, (40) 157.  
 hydrocyanic acid in, (26) 228.  
 insects affecting, (27) 657.  
 loss in blanching, (34) 256.  
 notes, (28) 861.  
 of Minnesota, book, (27) 528.  
 treatise, (34) 532, 761.  
 wild, for food, (38) 768.  
 zymase formation in, (39) 733.
- Musk**—  
 grasses, culture for wild ducks, (33) 251.  
 ox, conservation, (37) 757.  
 ox, variation in, (31) 768.
- Muskmelon**—  
 anthracnose; (35) 652; (40) 250.  
 diseases, notes, (31) 747.  
 leaf spot in Indiana, (39) 52.  
 new Siberian, (39) 346.  
 rinds, analyses, (38) 626.  
 seed, distribution of nitrogen in, (36) 269.  
 wilt, notes, (29) 847.  
 wilt, notes and treatment, (28) 746.
- Muskmelons**—  
 acidity, (32) 110; (37) 714.  
 calcium content, (39) 747.  
 critical period of growing season, (39) 811.  
 culture, (33) 238.  
 culture experiments, (29) 743; (35) 341; (37) 742.  
 culture in Indiana, (38) 241.  
 culture in North Carolina, (34) 41.  
 effect on composition of urine, (31) 761.

- Muskmelons**—Continued.  
 fertilizer experiments, (26) 817; (28) 46; (31) 533; (37) 742.  
 Fusarium disease affecting, (26) 54.  
 grading, packing, and shipping, (34) 737.  
 handling, (39) 240.  
 insects affecting, (31) 248.  
 marketing, (34) 340, 737.  
 shipping, (39) 444.  
 spraying, (39) 345.  
 varieties, (37) 143.  
 water requirement, (32) 127.  
 western, marketing, (36) 138.
- Muskrats**—  
 in Bohemia, (34) 58.  
 new trematode affecting, (37) 52.  
 parasites of, (29) 484; (33) 863; (37) 355.  
 possibilities for fur and meat production, (38) 154.
- Muskus grass**, analyses, (32) 166.
- Mussel-bed mud**, analyses, (39) 121.
- Mussels**—  
 as food, (26) 356; (31) 356; (35) 859; (40) 657.  
 fertilizing value, (33) 820.  
 sewage-polluted, danger from, (27) 866.
- Mussida nigrivenella**, notes, (28) 555.
- Mustard**—  
 analyses, (29) 119; (36) 801.  
 effect of X-rays on fermentation, (27) 231.  
 fermentation, (29) 119; (30) 712.  
 from American native grapes, composition, (30) 16.  
 from grapes infected with fungi, (30) 612.  
 industry in Uruguay, (32) 744.  
 making investigations, (36) 801.  
 Saccharomyces in, (30) 712.  
 separated, analyses, (37) 809.  
 utilization, (27) 441.
- Mustard**—  
 and lupines, continuous culture, (29) 431.  
 applying fertilizing solutions to aerial portions, (30) 129.  
 as affected by cyanamid and dicyanodiamid, (40) 724.  
 as affected by soil disinfectants, (31) 621.  
 as green manure, (35) 426; (40) 24, 229.  
 bacterized peat for, (39) 116.  
 beetle attacking water cress, (36) 658.  
 beetles, notes, (27) 457.  
 black, notes, (30) 145.  
 bran, analyses, (32) 667.  
 cakes, toxicity, (26) 567.  
 culture experiments, (26) 233; (27) 638.  
 destruction, (27) 31.  
 effect on companion crop of oats, (36) 438.  
 eradication, (26) 839.  
 fertilizer experiments, (26) 631; (27) 422; (28) 736, 819; (30) 427; (31) 133; (32) 842; (34) 25, 327, 421, 820; (36) 134; (38) 230; (40) 515.  
 fertilizing value, (27) 831.  
 flour, methods of analysis, (27) 12.  
 gas poisoning, (40) 382.  
 gas, skin lesions produced by, (39) 585.  
 growing, nitrogen compounds in, (26) 824.  
 growth as affected by light, (28) 227.  
 growth as affected by sulphur, (32) 724.  
 growth in shade, (29) 130.  
 Indian, studies, (36) 228.  
 insects affecting, (31) 849.  
 liming experiments, (32) 127.  
 molasses sludge as fertilizer for, (33) 818.  
 nitrification, (28) 124.
- oil**—  
 action on grape must fermentation, (36) 801.  
 detection, (29) 613.  
 determination in rapeseed cake, (37) 416.  
 effect on must and wine, (30) 612.  
 examination, (36) 319.  
 insecticidal value, (34) 359.  
 reducing power, (28) 504.  
 use in preparation of vaccine, (35) 380.
- oils**, metabolism, (39) 668.
- Orobanchae** on, (39) 146.  
 prepared, examination, (26) 867.  
 Sclerotinia libertiana affecting, (26) 647.  
 seed, germination as affected by green manures, (33) 331.  
 seed oil, physical constants, (35) 312.  
 seeds as affected by disinfectants, (26) 820.  
 seeds in feeding stuffs, (40) 637.
- Mustard**—Continued,  
 seeds, phytin of, (32) 16.  
 tokras disease, notes, (38) 351.  
 tumbling, eradication, (33) 337.  
 value in the diet, (29) 664.  
 varieties, (26) 631; (29) 228; (31) 133.  
 white—  
 as affected by lithium salts, (28) 526.  
 as cover crop, (32) 332; (37) 833.  
 as green manure, (32) 423; (34) 631; (40) 24.  
 culture for winter forage, (38) 735.  
 dormancy in seeds, (39) 225.  
 effect on milk and butter, (34) 570.  
 fertilizer experiments, (28) 820; (29) 632; (35) 325.  
 geotropism and phototropism in absence of oxygen, (39) 826.  
 germination tests, (30) 837.  
 notes, (30) 145.  
 selection experiments, (35) 334.
- wild**—  
 analyses, (30) 565.  
 detection, (27) 499; (30) 207.  
 dissemination by farm animals, (26) 839.  
 eradication, (27) 536, 724; (30) 236; (31) 44, 133, 524, 633, 739; (34) 228; (36) 236, 535 639; (37) 342; (39) 744.  
 eradication in potato fields, (33) 33.  
 germination in shade, (31) 235.  
 yield as affected by sulphur, (34) 726.
- Mutation**—  
 and heredity as cell phenomena, (34) 823.  
 and hybridization as independent phenomena (32) 326.  
 in Egyptian cotton, (40) 237, 527.  
 Oenothera, (33) 524; (39) 527, 632, 825.  
 plants, treatise, (34) 629.  
 sugar cane, (40) 634.  
 sweet peas, (40) 541.  
 lecture on, (28) 271.  
 mass, in Oenothera, (40) 132.  
 mass, in Zea mays, (39) 432.  
 nature of, (33) 630.  
 origin of species by, (30) 224.  
 production through hybridization, (33) 758.  
 review of literature, (33) 27.  
 theory, notes, (28) 430.  
 theory of De Vries, objections to, (32) 521.  
 theory, treatise, (30) 432.
- Mutational characters**, relation to cell size, (40) 323.
- Mutations in living beings**, treatise, (26) 472.
- Mutilla spp.**, notes, (34) 556.
- Mutton**—  
 ash analyses, (29) 861.  
 changes in during cold storage, (28) 365, 860.  
 cold storage, statistics, (28) 869.  
 composition and nutritive value, (34) 256.  
 consumption in United States, (29) 770.  
 cost of cold storage, (27) 164.  
 cost of production, (29) 572.  
 defrosting, (27) 470.  
 dressing and preparation, (31) 75.  
 exports from Australia, (33) 268.  
 fat, digestibility, (34) 364.  
 fat, digestion and absorption, (34) 257.  
 finishing on silage, (26) 570.  
 imports into Great Britain, (27) 470.  
 nutritive value and digestibility, (29) 159.  
 prices as affected by cold storage, (28) 871.  
 prices in Ireland, (31) 96.  
 production, (29) 469.  
 recipes, (28) 800; (29) 159.  
 storage in Philippines, (26) 262.  
 tallow, determination in lard, (30) 110.  
 tallow, solidifying and melting points, (34) 201, 202.  
 tapeworm cysts in, (29) 886.
- Mya arenaria** as human food, (35) 859.
- Mycelophthora sulphurea**, optimum culture medium for, (29) 220.
- Mycellium**, intercellular, staining, (26) 51.
- Mycelophagus castaneae**, relation to chestnut black canker, (26) 551.
- Mycetaulus n.sp.**, notes, (34) 361.
- Mycetobia**, notes, (36) 255.
- Mycetoma pedis**, causative agent, (26) 281.
- Mycetophila**—  
 merdigera n.sp., description, (39) 867.  
 spp., notes, (27) 57.

- Mycetophilid larva, dipterous parasite of, (34) 553.  
 Mycetophilidae of North America, (27) 57, 661.  
 Mycobacterium enteritidis chronicae pseudotuberculosis bovis, isolating and cultivating, (26) 783; (28) 480.  
 Mycoderma cervisioe, effect on organic acids, (27) 526.  
 Mycodextran, studies, (33) 411.  
 Mycodiplosis—  
   macgregori n.sp., description, (33) 859.  
   pulvinariae n.sp., description, (27) 57.  
 Mycogalactan, studies, (33) 411.  
 Mycogone—  
   cervina theobromae n.var., notes, (37) 148.  
   perniciosa, description and treatment, (32) 50.  
   sp., notes, (28) 241.  
   sp., relation to rubber spotting, (29) 451.  
 Mycoidea parasitica, notes, (40) 47.  
 Mycological—  
   flora of Tunis, (32) 842.  
   work, Schweinitz's (39) 30.  
 Mycology—  
   bibliography, (29) 626; (30) 349; (33) 846.  
   economic, scientific aspects, (28) 442.  
   of water supplies and sewage, treatise, (30) 418.  
   textbook, (38) 147.  
 Mycophenolic acid in corn, (29) 8.  
 Mycoplasma theory—  
   investigations, (26) 341.  
   notes, (27) 252.  
   of Eriksson, (33) 448.  
 Mycorrhiza—  
   ectotrophic and endotrophic, investigations, (30) 132.  
   endotrophic, of Ericaceae, (39) 26.  
   endotrophic, studies, (37) 129.  
   fungal, cytology and physiology, (30) 826.  
   on cranberry roots, (33) 341.  
   on potatoes, (27) 224.  
   relation to mucorineae, (27) 134.  
 Mycorrhizae—  
   notes, (27) 851.  
   of trees, review of investigations, (36) 527.  
   of trees, studies, (31) 127.  
 Mycoses, treatise, (27) 882.  
 Mycosis, generalized, in cows, (30) 185.  
 Mycosphaerella—  
   aurea n.sp., description, (37) 551.  
   aurea, studies, (38) 546.  
   bambusifolia n.sp., studies, (27) 154.  
   brassicicola, notes, (32) 545; (34) 49, 542; (36) 145.  
   citrullina, inoculation experiments, (29) 847.  
   citrullina, notes, (27) 353; (30) 148, 845.  
   coffea, notes, (30) 751; (32) 749.  
   convexula, studies, (27) 547.  
   eriodendr n.sp., description, (32) 749.  
   fragariae, notes, (40) 158.  
   grossulariae—  
     notes, (37) 551.  
     perfect stage of Septoria ribis, (36) 246.  
     studies, (38) 546.  
   hordicola n.sp., description, (38) 648.  
   horii n.sp., notes, (39) 753.  
   lageniformis n.sp., description, (27) 50.  
   lethalis n.sp., description, (28) 845.  
   n.sp., descriptions, (27) 149.  
   nigerristigma n.sp., description, (32) 844.  
   ontarioensis n.sp., life history, (33) 548.  
   perseae n.sp., notes, (39) 248.  
   phaseolorum n.sp., description, (35) 454.  
   pinodes—  
     life history, (33) 548.  
     notes, (29) 645; (36) 249.  
     relation to Septoria pisi, (29) 447.  
     scutina, notes, (37) 550.  
     sentina, investigations, (33) 347.  
     sentina, relation to weather, (32) 842.  
     sp., notes, (26) 850.  
     (Sphaerella) convexula, notes, (26) 56.  
     studies, (30) 537.  
     virgaureae n.sp., description, (27) 51.  
 Mycotrophic—  
   plants, nutrition physiology of, (28) 430.  
   roots of different plants, reciprocal influence, (35) 654.  
 Mydaea spp., studies, (37) 764.  
 Mydas clavatus larvae, notes, (40) 653.  
 Myeloidis cribrella, notes, (35) 463.  
 Myelophilus piniperda—  
   in New Jersey, (34) 355.  
   notes, (32) 550.  
 Myennis scutellaris, notes, (36) 657.  
 Myiarchus spp., feeding habits, (28) 57.  
 Myiasis—  
   aurium accompanying radical mastoid operation, (31) 777.  
   cutaneous, in man, (36) 359.  
   dipterous larvae in, (32) 450.  
   due to syrphid larvae, (39) 287.  
   in cattle, notes, (29) 482.  
   in man and animals, transmission by flies, (34) 359.  
   in man, insect vector, (37) 357.  
   intestinal, studies, (28) 780.  
   of urinary passages, (32) 450.  
   relation to cheese skipper, (31) 552.  
   relation to flies, (30) 756.  
 Myiochanus spp., feeding habits, (28) 57.  
 Myiophasia—  
   aenea, notes, (27) 864.  
   revision, (34) 360.  
   spp., notes, (36) 256.  
 Mylabris peruanus n.sp., description, (32) 658.  
 Mylacus saccatus, notes, (35) 364.  
 Mymar n.sp., from Maryland, (38) 565.  
 Mymaridae—  
   new, in eastern United States, (35) 263.  
   of Australia, (28) 563; (39) 154.  
 Myobia ensifera, notes, (32) 353.  
 Myochrous—  
   denticollis, investigations, (33) 358.  
   longulus damaging cotton, (38) 61.  
 Myoma, diagnosis, (31) 877.  
 Myonyssus decumani, occurrence in Rhode Island, (29) 755.  
 Myopa, synopsis, (36) 255.  
 Myospila mediatubunda—  
   notes, (30) 553.  
   studies, (37) 764.  
 Myothermic apparatus, description, (32) 257.  
 Myrciaris spp., descriptions, (31) 536.  
 Myriangium duriae—  
   description, (33) 459.  
   notes, (28) 453.  
 Myriapoda—  
   British, check list, (40) 647.  
   handbook, (30) 256.  
   migrating armies of, (34) 364.  
   of Kansas, (30) 759.  
   species injurious to man, (39) 768.  
   studies, (29) 58.  
 Myrica gale, root nodules of, (27) 25.  
 Myrioconium scirpi n.g. and n.sp., studies, (29) 345.  
 Myristic—  
   acid, determination, (31) 508.  
   acid salts, solubility, (35) 416.  
   and lauric acids, separation, (35) 416.  
   and lauric acids, separation, (35) 416.  
 Myristone, occurrence in alfalfa, (26) 802.  
 Myrmelachista ambigua—  
   notes, (38) 558.  
   ramulorum, notes, (29) 642, 652.  
 Myrmica scabrinodis sabuleti, embryology, (29) 860.  
 Myrobalan as rootstock, tests, (40) 445.  
 Myrobalans—  
   as tanning material, (36) 509.  
   season for collecting, (35) 317.  
 Myrtaceous plants, possibilities of, (35) 141.  
 Myrtillin, studies, (34) 709.  
 Myrtle-berry extract as an indicator, (40) 409.  
 Mystin, detection in milk, (26) 806.  
 Mystrosporium alliorum, notes, (31) 539.  
 Mytilasplis—  
   citricola, notes, (30) 853.  
   pomorum, see Oyster-shell scale.  
 Mytilidion n.sp. on Picea, (34) 56.  
 Mytilus edulis as human food, (35) 859.  
 Myxofuscicomm, new genus, description, (26) 845.  
 Myxomyceetes—  
   cytology of, (40) 726.  
   sexuality in, (38) 331.  
 Myxosargus nigricornis n.sp., description, (40) 757.  
 Myxosporidia, filament extrusion, (40) 255.  
 Myxosporium—  
   acerinum, description, (27) 450.  
   corticolum, notes, (33) 348.  
   sp., notes, (29) 49.  
   spp., inoculation experiments, (27) 651.  
 Myzine sexincta, notes, (29) 58.

- Myzocallis pasaniae* n.sp., description, (34) 453.  
*Myzomela rubrata saffordi* n.subsp., description, (37) 758.  
*Myzomyia rossii*, midge parasite of, (26) 559.  
*Myzopsis* n.g., description, (40) 60.
- Myzus**—  
*abietina*, see *Aphis abietina*.  
*braggii* and *Rhopalosiphum hippohaes*, confusion, (34) 357.

  - Forestation Commission, report, (34) 347.
  - State Board of Irrigation, Highways, and Drainage, rules, (27) 86.
  - Station, financial statement, (28) 299; (29) 793.
  - Station, notes, (26) 194, 695; (27) 198, 397, 493, 698; (28) 94, 195, 797; (29) 97, 397, 795; (30) 95, 497, 600, 698; (31) 100, 398, 497, 797; (32) 599; (33) 99, 600; (34) 798; (35) 300, 399, 597, 798; (36) 99, 500, 698, 797; (37) 197, 897; (38) 198, 499, 600, 798; (39) 500; (40) 398, 697.
  - Station, report, (28) 299; (29) 793; (31) 495; (34) 294; (35) 696; (38) 298; (39) 598.
  - University, notes, (26) 194, 494; (27) 198, 493, 698; (28) 94, 495, 697; (29) 97, 397, 795; (30) 95, 698; (31) 100, 398, 497, 797, 900; (32) 599, 695; (33) 99, 198, 496, 600, 795; (34) 198, 396, 798; (35) 300, 399, 597, 798; (36) 99, 500, 797; (37) 197, 600, 897; (38) 97, 198, 499, 600, 798; (39) 96, 300; (40) 398, 697.
- Necator americanus, dissemination by flies, (30) 659.**
- Necrobacillosis**—
- definition, (33) 774.
  - in cattle, (29) 500.
  - goats, (31) 86.
  - hogs, (39) 590; (40) 783.
  - horses and mules, (40) 186.
  - sheep, (29) 783.
  - relation to hog cholera, (39) 589, 590.
  - umbilical, in lambs, (34) 188.
- Neerobia rufipes**—
- infesting cotton bales, (26) 560.
  - notes, (28) 161.
- Necrobiosis in plants, studies, (28) 429.**
- Neurology, (39) 200, 400, 900; (40) 800.**
- Necrosis bacillus, studies, (28) 676; (29) 478.**
- Necrotic ulcers of the tongue, (40) 283.**
- Nectandra rodiaei**—
- durability tests, (34) 56.
  - notes, (28) 544; (36) 745.
- Nectar**—
- secretion, studies, (37) 633.
  - vitamin content, (40) 564.
- Nectarine**—
- brown rot, treatment, (40) 851.
  - pollen, viability, (32) 534.
  - tree disease, notes, (31) 539.

## Nectarines—

- composition as affected by irrigation, (29) 236.
  - correlation between flower and fruit, (29) 424.
  - drying, (27) 146; (37) 114.
  - fruit stocks for, (38) 345.
  - pollination experiments, (34) 233.
  - pruning, (32) 837.
- Nectarophora**—
- pisi, remedies, (30) 654.
  - solanifolia, notes, (28) 554.
- Nectria**—
- bainii hypoleuca n. var., notes, (37) 148.
  - bainii, notes, (29) 548, 749.
  - cancrī n.sp., description, (31) 750.
  - cancrī, studies, (33) 650.
  - castilloae n.sp., description, (35) 45.
  - cinnabarina—
    - in black knot cankers, (32) 52.
    - notes, (26) 57; (33) 647; (35) 456.
    - on mulberry, (33) 54.
    - studies, (27) 49; (36) 751.  - cucurbitula, relation to fir withertip, (35) 850.
  - ditissima—
    - as wound parasite of fruit trees, (33) 853.
    - description, (27) 152.
    - mode of attack, (37) 253.
    - notes, (26) 446; (28) 446; (32) 445, 547; (33) 348; (34) 247; (38) 452; (39) 150.
    - notes and treatment, (29) 49.
    - occurrence in Maine, (31) 151.  - diversispora on tea, (39) 452.
  - galligena—
    - in Quebec, (32) 544.
    - in United States, (30) 537.
    - notes, (26) 448.  - graminicola, notes, (29) 47, 445.
  - graminicola, relation to Fusarium nivale, (30) 846.
  - ipomoeae, notes, (32) 343.
  - ipomoeae, relation to sweet potato stem rot, (29) 647.
  - laurentiana, notes, (29) 647.
  - laurentiana on sugar cane, (40) 157.
  - n.sp., descriptions, (31) 242.
  - rubi n.sp., notes, (26) 450.
  - rubi, studies, (34) 352.
  - sp. on Norway maple, (34) 157; (38) 253.
  - sp. on sugar cane, (37) 553.
  - spp., notes, (27) 51, 546.
  - spp. on cacao, (34) 540; (35) 353.
  - spp. on pear, (40) 251.
  - spp., parasitism, (27) 46.
  - stem canker of *Acacia decurrens*, (33) 545.
  - studies, (30) 537.
  - theobromae, notes, (29) 155.
  - vanillae, description, (27) 450.
- Nectriaceae, studies, (31) 242, 343.**
- Nectriella**—
- cucumeris, n.sp., description, (29) 245.
  - milina on Agave, (40) 844.
- Necydalis ulmi, notes, (30) 455.**
- Neda sanguinea, notes, (33) 860.**
- Neem cake, fertilizing value, (26) 631; (38) 220.**
- Negri bodies**—
- detection, (26) 280.
  - in farm animals, (35) 75.
  - in rabies, (29) 379.
  - occurrence, (39) 588.
  - photomicrographs of, (29) 478.
  - structure simulating in brain of guinea pigs, (28) 584.
- Negro**—
- girls, homemakers' clubs for, (33) 299.
  - problem in the South, (26) 592.
  - rural schools, practical training in, (32) 289.
- Negroes**—
- agricultural and industrial education, (38) 92.
  - as farm laborers and share tenants, (32) 489.
  - county training schools for, (38) 397.
  - in United States, (33) 395.
  - land ownership in Virginia, (36) 392.
- Neighborhood improvement clubs, notes, (28) 194.**
- Nelsonite, utilization, (29) 519.**
- Nematocera**—
- blood-sucking, of Brazil, (29) 54.
  - of British India, treatise, (29) 57.
  - of Venezuela, (27) 862.
- Nematode**—
- galls, descriptions, (39) 868.
  - injury, neutralizing, (26) 845.
  - new, in rats, (30) 279.

- Nematode—Continued.  
 new parasitic, (38) 147.  
 parasites, fourth molt of, (28) 759.  
 parasites of the dog, (30) 279; (40) 89.
- Nematodes—*see also* Heterodera.  
 anatomy and life history, (32) 341, 759.  
 and their relationships, (33) 250.  
 associated with bark beetles, (33) 750.  
 control, (39) 461.  
 counting in soil, (33) 56.  
 culture, (32) 49.  
 destruction with calcium cyanamid, (37) 453.  
 embryology, (30) 555.  
 foliar, notes, (28) 854.  
 free-living, of Switzerland, (35) 460.  
 free-living predatory, in soils and water, (38) 254.  
 giant, in abdominal cavity, (37) 281.  
 giant, in liver of a dog, (36) 681.  
 heteroxenous, larval forms, (37) 361.  
 identification, (33) 459.  
 in Brazil, (30) 857.  
   butterfish in relation to sale warranty, (36) 662.  
   connective tissue of bovines, (28) 81.  
   crop of chickens, (40) 587.  
   digestive tract, treatment, (34) 576.  
   Philippines, (37) 277.
- injurious—  
 in Switzerland, (38) 350.  
 to bananas, (30) 652.  
 to beets, (27) 151, 152, 352; (28) 547; (30) 244.  
 black currant, (37) 843.  
 citrus fruits, (32) 238.  
 citrus trees, (30) 51.  
 clover, (29) 446.  
 coffee, (26) 750; (32) 646; (34) 55.  
*Conostegia subhirsuta*, (28) 658.  
 dashens, (37) 841.  
 ginseng, (32) 641.  
 golden seal, (31) 345.  
 horses, (26) 384.  
 hyacinth bulbs, (31) 450.  
 lily-of-the-valley, (31) 56.  
 muskrats, (29) 484.  
 narcissus bulbs, (36) 752.  
 oats, (28) 149, 346; (30) 649; (32) 750.  
 oranges, (34) 354.

 parasitism, (30) 647.  
 rearing on agar, (33) 547.  
 relation to leaf spot of cereals, (29) 47.  
 relation to potato scab, (32) 443.  
 reproduction in artificial media, (40) 267.  
 review of studies, (31) 154; (32) 347.  
 segmentation in, (38) 254.  
 technique, methods, (37) 549.  
 treatment, (26) 845; (29) 151; (30) 351, 449; (31) 549; (32) 578, 641, 843; (34) 245, 780; (37) 652; (38) 555.
- Nematodirus—  
 filicollis, life history, (34) 187.  
 roscidus, destructive to deer, (26) 653.
- Nematology, notes, (33) 681.
- Nematospora lycopersici n.sp., description, (37) 842.
- Nematus—  
 erichsonii—  
   biology, (33) 746.  
   biology and remedies, (28) 658.  
   fungus parasite of, (26) 63.  
   notes, (27) 53, 460, 552; (29) 252; (30) 362, 845; (32) 754; (35) 54.  
   parasites of, (32) 352.  
   ventricosus, notes, (27) 460.
- Nemorilla maculosa, notes, (35) 659.
- Neobeckia aquatica as affected by environment, (36) 523.
- Neoborus amoenus, notes, (36) 551; (40) 753.
- Neocatolaccus—  
 livii n.sp., description, (36) 556.  
 syrphidis n.sp., description, (36) 556.
- Neocelatoria ferox n.g. and n.sp., description, (31) 352.
- Neocerata rhodophaga, *see* *Dasyneura rhodophaga*.
- Neocosmospora—  
 notes, (29) 444.  
 vasinfecta—  
   notes, (35) 44; (40) 845.  
   on potato and adzuki bean, (36) 450.  
   pisi, studies, (36) 749.  
   studies, (32) 546.
- Neocremastus n.g. and n.sp., description, (38) 660.
- Neoderostenus, occurrence in North America, (36) 556.
- Neodichoera tridens n.g. and n.sp., description, (35) 259.
- Neodiprion n.g. and n.spp., descriptions, (40) 761.
- Neofabrea mallicorticis—  
 description, (29) 153.  
 n.sp., description, (27) 649.  
 notes, (31) 53.  
 temperature relations, (36) 649.
- Neolasiopora hibisci, studies, (40) 754.
- Neolygus nyssae n.sp., description, (40) 353.
- Neomphaloidomyia n.g. and n.spp., descriptions, (38) 768.
- Neopeckia coulteri—  
 new hosts for, (33) 550.  
 notes, (30) 152; (31) 845; (33) 351; (34) 56.  
 spore variation in, (36) 651.
- Neophasia menapia, notes, (26) 863.
- Neopius carinaticeps n.g. and n.sp., description, (38) 165.
- Neoplasms, transplantable, immunity to, (38) 580.
- Neorhizobium n.spp., studies, (38) 464.
- Neosalvarsan—  
 action on swine erysipelas, (39) 590.  
 fixation by blood, (35) 74.  
 notes, (27) 680.  
 qualitative and quantitative tests, (39) 508.  
 toxicity, (38) 181.  
 use against—  
   contagious pneumonia, (32) 682.  
   epizootic lymphangitis, (28) 784.  
   influenza in horses, (33) 286.  
   pectoral influenza, (30) 285.
- Neosclara n.g. and n.spp., descriptions, (40) 858.
- Neosigniphora—  
 elongata n.sp., description, (35) 760.  
 nigra, n.sp., description, (29) 359.
- Neotetrastichus n.g. and n.spp., descriptions, (27) 554.
- Neotoma—  
 cinerea lucida n.subsp., description, (37) 757.  
 fuscipes mohajensis, injuring pines, (38) 53.
- Neottiospora yuccaeifolia n.sp., description, (33) 545.
- Neoxabea bipunctata, studies, (33) 653.
- Neozimmermannia (*Gloeosporium*) *elasticae*, notes, (38) 153.
- Nepa apiculata, death feigning, (27) 457.
- Nepa cinerea, parasitic in dog flea, (33) 862.
- Nephelin—  
 as source of potash, (30) 216.  
 decomposition by soil bacteria and yeast, (31) 121.  
 fertilizing value, (27) 125, 725; (29) 625.  
 potash, solubility, (34) 328.
- Nephele, extraction of potash from, (27) 323.
- Nephelometer, description, (30) 410; (31) 114.
- Nephelometer-colorimeter, description, (37) 205.

- Nephelometry—  
in study of nucleases, (32) 310.  
review of investigations, (34) 202.  
studies, (39) 311.
- Nephoscope, Besson, notes, (30) 17.
- Nephotetix bipunctatus, studies, (39) 862.
- Nephritic affections in domestic animals, pathology, (27) 576.
- Nephritis—  
acute, renal epithelium in, (27) 79.  
in the hen, (39) 190, 393.  
respiratory metabolism in, (37) 267.  
specific purulent, of Equidae, (26) 173.  
spontaneous, in wild rats, (27) 884.  
tartrate, *see* Tartrate nephritis.
- Nephrolepis, variation in, (35) 227; (36) 434.
- Nephroparatyphoid and nephrottyphoid, notes, (32) 374.
- Nepiera benevola—  
fuscifemora n. var., description, (38) 165.  
fuscifemora, notes, (36) 655.  
n. sp., description, (35) 262.
- Nephtula—  
plagiolella, notes, (26) 558.  
sericopeza, notes, (29) 759.  
slingerlandella, life history, (27) 456.  
slingerlandella, studies, (26) 557.
- Nephtulidae of North America, (37) 564.
- Neptunia prostrata as affected by seasonal humidity, (31) 221.
- Neradol, notes, (30) 16.
- Nereocystis leutkeana—  
analyses, (27) 422.  
as source of potash, (26) 726.  
distribution, (29) 322.
- Nerve—  
degeneration in fowls fed on unhusked rice, (32) 579.  
fiber, chemical changes in, (29) 466.
- Nervous system—  
and internal secretions, (30) 201.  
and metabolism, relationship, (28) 765.
- Nesococcus n. g. and n. sp., description, (36) 551.
- Nest eggs, tests, (37) 70.
- Nesting habits of the hen, (40) 77.
- Nests, trap—  
construction, (27) 279, 374; (33) 473; (35) 792.  
description and use, (33) 90.  
for poultry, (33) 473.  
notes, (30) 197.  
records, error in, (26) 572.  
value in poultry breeding, (26) 572.
- Nettle—  
as a textile, (40) 35.  
fiber from India, (39) 442.
- Neurobatra strigifinitella, studies, (33) 656.
- Neurocolpus nubilus, notes, (30) 852; (36) 456.
- Neuropterid insects of Philippines, (36) 656.
- Neuroterus saltatorius, notes, (30) 657.
- Nevada—  
Station—  
financial statement, (29) 194.  
notes, (26) 695; (27) 300, 397; (28) 797, 900; (29) 300, 900; (30) 95, 397; (31) 497; (32) 94, 397, 695, 900; (33) 795; (34) 396, 496, 600; (35) 96, 399, 795; (36) 695; (37) 97, 498, 897; (38) 299, 400, 900; (39) 96, 399; (40) 398, 600.  
report, (31) 98; (33) 698; (36) 97; (37) 95; (39) 196.  
report of director, (29) 194.  
University, notes, (27) 300, 397; (28) 397, 797, 900; (29) 300, 900; (30) 95, 397; (31) 100, 497; (32) 94, 397, 900; (33) 795; (34) 396; (36) 196, 695; (37) 97, 498; (38) 299, 400; (40) 398.
- Névé and atmosphere, aqueous exchange between, (38) 812.
- New Hampshire—  
College, notes, (26) 396; (27) 198, 397, 493, 698; (28) 900; (29) 98, 699; (30) 797; (31) 600, 797; (33) 700; (34) 97; (35) 597, 900; (36) 99, 295; (37) 97, 197, 498; (40) 600.  
Station, financial statement, (29) 793.  
Station, notes, (27) 198; (29) 699; (31) 398, 600; (33) 700; (35) 900; (36) 99.  
Station, report of director, (29) 793.
- New Jersey—  
College, notes, (26) 300; (27) 99, 799; (28) 195; (29) 498; (30) 397; (31) 398; (32) 600, 797; (33) 900; (34) 97, 295, 496, 798; (35) 698; (36) 599, 695, 797; (37) 98, 197, 498; (38) 97; (39) 599, 697; (40) 297, 697.
- New Jersey—Continued.  
State University, notes, (36) 695
- Stations—  
financial statement, (27) 798; (28) 796.  
notes, (26) 300, 695; (27) 99; (28) 195, 697; (29) 498; (30) 397; (32) 600, 695, 797; (33) 900; (35) 97, 300, 698, 900; (36) 196, 599, 797; (37) 98, 197, 498; (38) 97; (39) 599, 697; (40) 297, 697.  
report, (30) 395; (31) 196, 398; (32) 598; (34) 197; (36) 898; (39) 799; (40) 198, 797.  
report of director, (27) 798; (28) 796.
- New Mexico—  
College, notes, (26) 396, 695; (27) 99, 699; (28) 397, 495, 698; (29) 196, 398; (30) 300, 397; (31) 197, 497, 696, 900; (32) 497; (33) 300, 795; (34) 600; (35) 96; (36) 99, 695, 899; (39) 198, 697; (40) 298.  
State engineer, report, (36) 284.  
Station—  
financial statement, (27) 492; (28) 899.  
notes, (26) 396, 695; (27) 99, 699; (28) 397, 495; (29) 398; (30) 300, 397; (31) 197, 497, 696, 794; (32) 397, 497; (33) 300, 795; (34) 600; (35) 96; (36) 99, 695, 899; (38) 299, 799; (39) 198, 697; (40) 298.  
report, (32) 693; (34) 795; (37) 95; (38) 698.  
report of director, (27) 492; (28) 899.
- New York—  
Cornell Station—  
financial statement, (26) 795; (28) 899.  
notes, (26) 397, 900; (27) 99, 493, 699; (28) 195; (29) 196, 398; (32) 695; (33) 198; (35) 97, 197, 399, 798; (37) 98, 498, 600; (38) 699; (39) 96 (40) 199.  
report, (30) 899; (32) 899; (34) 795; (37) 298; (39) 196; (40) 694.  
report of director, (26) 795; (28) 899.  
Department of Foods and Markets, work of, (34) 490.  
Food Investigating Commission, (29) 868.  
Produce Exchange, report, (37) 891.  
State—  
Agricultural Society, (34) 288.  
Agricultural Society, proceedings, (31) 894.  
College of Agriculture, history, (32) 896.  
engineer and surveyor, report, (36) 183, 284.  
State Station—  
financial statement, (26) 299; (28) 194; (29) 899.  
guide to buildings and grounds, (34) 95.  
notes, (26) 397, 695; (27) 398; (28) 397; (29) 196; (30) 397, 699; (31) 300; (32) 95; (34) 97; (35) 96; (36) 99, 400; (37) 197, 400; (39) 299, 797; (38) 299, 400.  
report, (29) 899; (30) 899; (32) 693, 796; (34) 197; (35) 94; (37) 396; (38) 95; (39) 93; (40) 97, 599.  
report of director, (26) 299, 692; (28) 194, 695.  
State Vegetable Growers' Association, (32) 688.  
State Veterinary College, report, (36) 673, 676.
- New Zealand standard time, (38) 811.
- Newark Housekeepers' Insurance Company, (32) 459.
- Nezara—  
hilaris injurious to peaches, (32) 247.  
hilaris, studies, (37) 258.  
viridula—  
notes, (28) 654; (30) 356; (37) 55; (40) 165.  
relation to pecan kernel spot, (39) 763.  
studies, (39) 558.  
Nicine, tests, (30) 156.
- Nickel—  
as growth stimulant for hemp, (33) 432.  
chlorid, effect on olives, (26) 825.  
cooking utensils, usefulness, (33) 68.  
cooking vessels, solubility, (32) 561.  
in hydrogenated oils, (34) 10.  
in lard substitute, (29) 459.  
in soils, (31) 720.  
metallic, effect on *Aspergillus niger*, (30) 824.  
solubility, (32) 763.  
toxic effect on plants, (38) 628.
- Nicotiana—  
abnormalities in, (29) 321; (30) 826; (40) 226.  
abscission in, (39) 226.  
blossom color inheritance, (40) 442.  
breeding experiments, (27) 741.  
controlled pollination in, (40) 131.  
factors affecting flower size in, (34) 225.  
fecundating stimuli and mutation in, (33) 533.  
hereditary reaction systems, (36) 521.

- Nicotiana**—Continued.  
 hybridization experiments, (30) 329, 330.  
 hybrids—  
   inheritance in, (28) 530; (37) 433.  
   inheritance of flower size in, (29) 216.  
   sterility in, (37) 225.  
   studies, (29) 320.  
 inheritance in, (36) 629.  
 inheritance of size in, (35) 819.  
 parthenogenesis—  
   and parthenocarp in, (33) 435.  
   in, (30) 224.  
   parthenocarp, and phenospermy in, (34) 136.  
 rustica, immunity to gummosis, (28) 446.  
 self-sterility in, (38) 823.  
 spp., hybridization experiments, (27) 428.  
 spp. hybrids, studies, (27) 230.  
 studies, (28) 530.  
 tabacum, correlation and inheritance in, (27) 535.  
 tabacum, cytokinesis of pollen mother cells, (40) 518.  
 tabacum, inheritance of characters in, (30) 29.  
 variation of flower size in, (33) 435.  
 viscosum, mosaic disease of, (36) 451.
- Nicotin**—  
 as by-product of tobacco culture, (32) 137.  
 content of tobacco plants, (29) 503.  
 detection on sprayed plants, (38) 56.  
 determination, (27) 14; (29) 810; (31) 613, 714.  
 determination in—  
   insecticides, (32) 296.  
   presence of pyridin bases, (26) 316.  
   tobacco, (26) 412; (28) 412; (37) 14.  
   tobacco extracts, (26) 412, 413, 510, 511.  
 distribution in tobacco plant, (26) 333.  
 effect on larvae of eudemis moth, (26) 860.  
 effect on plant growth, (37) 632.  
 emulsion for, (37) 760.  
 extraction from tobacco, (29) 118.  
 extracts, preparation on the farm, (32) 158.  
 in tobacco compounds, analyses, (26) 714.  
 insecticidal value, (30) 737; (36) 152.  
 oleate, preparation and insecticidal value, (39) 462.  
 oxalate, use on tobacco, (26) 638.  
 paraffin emulsion, use, (39) 763.  
 preparations, analyses, (27) 441.  
 preparations, combining with spray mixtures, (34) 158.  
 solutions, aqueous, concentration and optical rotatory power, (37) 14.  
 sprays, use with soap, (40) 752.  
 sulphate—  
   as codling moth ovicide, (38) 860.  
   insecticidal value, (37) 559, 660.  
   sprays, tests, (40) 161, 162.  
   sprays, wetting power and efficiency, (36) 455.  
   use with Bordeaux, (34) 61.  
 variation in tobacco plant, (27) 830.
- Nicotina**, analyses, (26) 65.
- Nicotinic acid**—  
 in rice bran, (29) 263; (31) 714.  
 in rice polishings, (33) 167.
- Nidorella auriculata**, analyses and digestibility, (27) 871; (32) 167.
- Nigella**, floral anomalies in, (29) 629.
- Niger**—  
 cake, analyses, (30) 176.  
 cake, digestibility, (28) 464.  
 cake, feeding value, (26) 267, 673; (30) 176.  
 seed cake, analyses, (27) 670.  
 seed cake, effect on milk and butter, (34) 570.  
 seed plant, culture for seed, (37) 230.
- Night soil**—  
 analyses, (30) 26; (38) 23, 723.  
 fertilizing value, (26) 631; (27) 337; (35) 323; (38) 624; (39) 817.  
 microorganisms, effect on soil productivity, (27) 722.  
 preservation, (29) 731.  
 treatment with manganese chlorid, (26) 425.
- Night temperature**—  
 increase with height, (40) 314.  
 relation to humidity, (40) 715.  
 studies in Roswell fruit district, (40) 117.
- Night wells**, formation, (30) 511.
- Nigredo**—  
 caryophyllina, internal uredinia of, (35) 635.  
 fallens, aecial stage on red clover, (37) 752.
- Nile**—  
 flood of 1912, (33) 510.  
 river delta, fertility map of, (31) 119.  
 silt, (40) 620.  
 water, fertilizing value, (28) 514.
- Nili maize**, fertilizer experiments, (38) 233.
- Ninebark borer**, notes, (28) 155.
- Ninhydrin reaction**, relation to age and habits of individuals, (33) 876.
- Nipa palm**—  
 alcohol from, (29) 414.  
 fiber, tests, (31) 526.  
 sap, studies, (30) 16.
- Nippon river fever**, see Tsutsugamushi.
- Nipponorthezia**, new genus, description, (37) 358.
- Nishiyana n.g. and n.sp.**, description, (38) 857.
- Nisotra uniformis** on cotton, (40) 256.
- Niter**—  
 cake, effect on barley, (40) 515.  
 cake in superphosphate manufacture, (40) 221.  
 soils, reclamation, (38) 323.  
 spots in cultivated soils, (32) 29.  
 spots in soils, origin, (33) 121; (34) 811, 812; (35) 724.  
 spots in western soils, origin, (36) 423.
- Nitocris**—  
 principles, notes, (31) 61; (32) 847.  
 usambicus, notes, (26) 253.
- Nitragin**—  
 notes, (26) 723; (27) 322.  
 tests, (26) 123, 322, 521; (27) 322; (28) 426; (29) 733.
- $\rho$ -Nitranilin**, insecticidal value, (34) 359.
- Nitrate**—  
 content of—  
   arable soils, fluctuation in, (30) 716.  
   dried soils (32) 817.  
   soils as affected by fallowing, (26) 421.  
   soils as affected by tillage methods, (40) 719.  
   soils, relation to wheat yield, (40) 719.  
 deposits—  
   descriptions and origin, (28) 522.  
   in California, (28) 424.  
   Chile, (27) 519; (28) 522; (29) 517.  
   Idaho and Oregon, (34) 220.  
   United States, (27) 22; (28) 522.  
   origin, (31) 724.  
 dipphosphate, fertilizing value, (34) 327.  
 exports from Chile, (30) 626.  
 ferment, studies, (32) 523; (33) 726.  
 industry in—  
   Chile, (26) 425; (27) 24, 519, 723, 727; (31) 724; (33) 326; (37) 217.  
   Germany, history, (28) 625.  
   Norway, (29) 126.  
 of ammonia, see Ammonium nitrate.  
 lime, see Calcium nitrate.  
 potash, see Potassium nitrate.  
 soda, see Sodium nitrate.  
 phosphate, fertilizing value, (28) 520.  
 salts, industry in India, (37) 722.  
 shales, analyses, (29) 318.  
 supply in United States, (38) 817.
- Nitrates**—  
 absorption by corn and lupine seedlings, (35) 435.  
 absorption by legumes, (36) 329.  
 accumulation as affected by green manuring, (33) 721.  
 accumulation in soils, (38) 211; (39) 323.  
 analyses, (34) 222.  
 and nitrites, determination, (40) 309.  
 artificial, production and use, (29) 517.  
 assimilation, (30) 824; (32) 223.  
 assimilation by—  
   mold fungi, (31) 223.  
   plants, (27) 332; (28) 526; (30) 219.  
   soil microorganisms, (26) 617.  
   Streptothrix, (27) 621.  
 atmospheric, accumulation and utilization in soils, (30) 325.  
 bacterial destruction of, (31) 819.  
 behavior in cultivated soils, (27) 626; (28) 521, 723; (29) 515.  
 circulation in soils, (28) 720; (30) 623.  
 detection, (27) 8; (33) 804.  
 detection in milk, (31) 508.

## Nitrates—Continued.

- detection in sewage, (32) 115.
- detection in water, (26) 511.
- determination, (26) 108, 204; (27) 111, 497; (33) 501.
- determination in—
  - alkali soils, (31) 206.
  - presence of chlorids, (37) 504.
  - soils, (28) 610; (29) 610, 797; (31) 516; (34) 112, 811; (37) 111.
  - water, (26) 110; (28) 19, 509; (37) 506.
- effect on—
  - apples, (29) 438.
  - composition of sugar beets, (26) 196; (31) 435.
  - decomposition of sewage, (26) 725.
  - development of root tubercles, (35) 634.
  - nitrogen-assimilating bacteria, (38) 724.
  - nodule production, (32) 727; (33) 134; (37) 133; (39) 338.
  - oat seedlings, (31) 231, 528.
  - quality of sugar beets, (28) 43.
  - extraction from soils, (26) 524.
  - fertilizing value, (30) 326; (39) 726.
  - flocculating power on clay, (27) 620.
- formation—
  - from peat nitrogen, (29) 624.
  - in acid soils, (36) 22.
  - cultivated soils, (26) 319.
  - forest soils, (30) 624.
  - moor soils, (30) 325.
  - presence of carbohydrates, (34) 127.
  - puddled soils, (31) 127.
  - soil in relation to weeds, (38) 814.
  - soils, (27) 721; (29) 818.
  - soils after freezing, (30) 23.
  - Virginia soils, (30) 516.
- in acid soil, studies, (40) 620.
- chernozem soils, (34) 618.
- Colorado soils, (29) 819; (31) 619.
- orchard soils, (36) 724.
- rain and snow, (40) 19.
- soil, determination, (40) 506.
- soils, (26) 723; (27) 419.
- soils as affected by soil moisture and manure, (36) 816.
- leaching from pervious soils, (37) 23.
- leaching in soils in winter, (36) 119.
- localization in plants, (30) 30.
- loss from soil, (29) 815.
- loss from soil as affected by plant residues, (40) 121.
- loss from soil as affected by sugars, (40) 122.
- loss in drainage water, (26) 421.
- manufacture, (28) 424.
- manufacture—
  - from peat, (31) 321.
  - from the air, (27) 420; (28) 818; (33) 25.
  - inefficiency in, (32) 322.
- movement in soils, (28) 813; (36) 118.
- nitrite formation from, in aqueous solution by sunlight, (40) 425.
- origin and distribution in soils, (29) 621.
- production by *Azotobacter*, (31) 421.
- production in Chile, (32) 517.
- reduction—
  - by bacteria, (31) 324.
  - Streptothrix*, (27) 621.
  - yeasts and molds, (33) 726.
- in cultivated soils, (40) 319.
- Nebraska soils, (29) 734.
- plant cells, (28) 428.
- sterilized soils, (31) 121.
- of, (26) 507.
- without anaerobic conditions, (31) 127.
- relation to cultural practices and plant growth, (37) 813.
- relation to sodium carbonate formation in soils, (28) 719.
- rôle in plant nutrition, (26) 625.
- Schloesing, fertilizing value, (33) 25.
- synthetic, manufacture by electricity, (38) 122.
- titration with ferrous sulphate, (34) 203.
- transformation by soil microorganisms, (38) 723.
- use in Europe and Egypt, (27) 727.
- use in United States, (27) 727.
- utilization by pea seedlings, (27) 730.
- utilization by plants, (35) 28.

## Nitribacillus—

- oligotrophus, notes, (32) 523.
- polytrophus, notes, (32) 523.

## Nitric acid—

- action on aluminum, (35) 802.
  - assimilation by plants, (30) 30, 31.
  - destruction of stumps by, (28) 485; (31) 92.
  - detection in presence of nitrous acid, (28) 19.
  - detection in watered fruit juices, (27) 411.
  - determination, (27) 609; (32) 115.
  - determination in foods, (29) 809.
  - determination in presence of nitrous acid, (31) 503.
  - effect on—
    - action of maltase, (28) 504.
    - bread fermentation, (27) 268.
    - plants, (37) 224.
  - in rain water, (31) 812; (33) 617.
  - industry, status, (27) 128, 519.
  - manufacture, (28) 424; (30) 427; (31) 822.
  - manufacture from ammonia, (29) 517; (30) 721.
  - manufacture from the air, (27) 623; (28) 221; (29) 822.
  - physical and chemical data, (40) 607.
  - production from synthetic ammonia, (38) 710.
  - synthetic, manufacture and use, (35) 428.
  - toxicity, (28) 662.
  - use on alkali soils, (28) 814.
- Nitric—
- compounds, inorganic, behavior in sunlight, (30) 824.
  - nitrogen—
    - determination, (36) 504.
    - in country rock, (22) 28; (36) 423; (37) 518.
    - in soil, influence of salts on, (40) 722.
- Nitrids industry, status, (27) 128, 519.
- Nitrification—
- and soil toxins, studies, (38) 322.
  - as affected by—
    - alfalfa and timothy, (29) 317.
    - alkali salts, (38) 322.
    - calcium carbonate, (40) 723.
    - carbon, (27) 322.
    - carbon dioxide gas, (39) 618.
    - carbon disulphid and toluol, (30) 717; (40) 513.
    - copper salts, (29) 529.
    - crops and fertilizers, (35) 321.
    - ether, (27) 131.
    - ground limestone, (27) 422.
    - gypsum, (26) 527.
    - humus-forming materials, (35) 216.
    - irrigation and crop production, (31) 119.
    - lime-magnesia ratio, (32) 720.
    - liming, (26) 428.
    - manganese, (34) 623; (37) 126.
    - metallic salts, (31) 120.
    - organic substances, (31) 223.
    - partial sterilization, (28) 121.
    - radioactivity, (30) 30.
    - soil moisture, (28) 720; (36) 513; (40) 719.
    - spray mixtures, (30) 423, 424.
    - straw, (40) 719.
    - sulphur, (31) 125.
  - effect on soil fertility, (35) 21; (37) 519.
  - effect on solubility of tricalcium phosphate, (39) 23.
  - factors affecting, (36) 321.
  - in acid humus soils, (30) 424.
  - acid or nonbasic soils, (30) 517.
  - acid soils, (32) 121; (35) 514; (40) 620.
  - arid soils, (29) 21, 211.
  - Colorado soils, (29) 621.
  - cultivated soils, (31) 722.
  - Dunkirk Clay Loam, (26) 434.
  - fallow soils, (28) 417; (31) 722.
  - Hawaii soils, (32) 719.
  - Indian alluvium as affected by potsherds, (40) 24.
  - moor soils, (40) 811.
  - natural soils, (40) 418.
  - pasture soils, (30) 399; (31) 516.
  - Philippine soils, (34) 718.
  - plants, (34) 627.
  - plants as affected by naphthalin, (33) 523.
  - sandy loam soils, (36) 321.
  - semiarid soils, (36) 422.
  - soils, (26) 721, 722, 723, 816; (31) 318, 420, 818; (34) 127, 423, 619; (35) 626; (36) 724; (37) 318; (38) 211.
- in soils—
- and solutions, (30) 218.
  - nature, (36) 513.

## Nitrification—Continued.

- in soils—continued.
  - statistical study, (39) 815.
  - studies, (27) 517; (28) 814; (29) 21; (33) 421, 620.
- in solutions, (31) 420.
  - tilled and untilled fallow, (30) 216.
  - Virginia soils, (29) 621.
- inhibition by alkali salts, (27) 124.
- of green manures, (28) 124; (33) 514.
- of organic compounds in soils, (38) 119.
- of organic manures, (31) 723.
- rate of, (32) 123.
- relation to—
  - crop production, (35) 424.
  - cultural practices and plant growth, (37) 813.
  - soil fertility, (32) 96.
- review of investigations, (30) 11.
- role of *Streptothrix* in, (27) 621.
- seasonal variation, (32) 514.
- studies, (28) 217; (32) 320; (33) 124, 422; (39) 324.

## Nitrifying organisms—

- as affected by cyanamid and dicyanodiamid, (40) 724.
- media for, (35) 226.
- studies, (39) 619.

## Nitrite-forming organism, new, studies, (35) 334.

## Nitrites—

- accumulation in soils, (37) 19.
- assimilation, (32) 223.
- assimilation by mold fungi, (29) 29.
- assimilation by plants, (28) 526; (30) 219, 824.
- detection, (26) 108, 506; (33) 804.
- detection in drinking water, (32) 311.
- detection in sewage, (32) 115.
- detection in water, (26) 511.
- determination, (26) 311; (27) 111; (33) 204; (36) 203; (40) 309, 610.
- determination in—
  - potable waters, (27) 503.
  - presence of nitrous acid, (31) 503.
  - sewage, (26) 407.
  - soils, (29) 797.
  - water, (28) 19.
- effect on determination of oxygen in water, (31) 411.
- formation in aqueous solution by sunlight, (40) 425.
- from nitrates by sunlight, (38) 811.
- in calcium cyanamid, (32) 217.
- in diseased plants, (37) 549.
- in plants, (33) 627.
- localization in plants, (30) 30.
- manufacture, (28) 424.

## Nitrobacteriaceae, genera, (39) 828.

## Nitrobenzene, insecticidal and larvicidal value, (34) 359.

## Nitrobenzol—

- as a parasiticide, (38) 760.
- determination in peanut oil, (31) 413.

## Nitrocultures, preparation and use, (36) 827.

## Nitrogen—

- absorption and leaching in soils, (36) 219; (37) 23.
- absorption by oats, (31) 632.
- absorption by soils, (31) 723.
- absorption by trees, (26) 443.
- accumulation and utilization, (40) 125.
- accumulation in continuous rye culture, (30) 424; (31) 318.
- action on musts and wine, (36) 801.
- activity, determination, (27) 496, 499.
- aliphatic amino, determination, (34) 608.
- amino—
  - and anaphylatoxin, (37) 582.
  - and polypeptid, determination in barley, melt, and beer, (33) 613.
  - determination, (31) 610; (34) 505, 579; (35) 201.
  - determination, foam inhibitor, (38) 613.
  - determination in blood, (37) 14, 206; (38) 713.
  - determination in milk, (40) 509.
  - determination in tissues, (31) 808.
  - in lymph and blood, (39) 670.
  - pea seedlings, (33) 222.
  - protein, (33) 201.
  - soils, (34) 515.
- relation to quality in flour, (37) 206.

## Nitrogen—Continued.

## ammonia—

- behavior in limed and unlimed soil, (26) 320.
- determination, (31) 109; (38) 311.
- determination in urine, (34) 613.
- determination in water, (29) 617.
- fixation by permutite and clay soils, (29) 127, 517.
- utilization by corn plantlets, (27) 634.
- utilization in protein metabolism, (29) 62.
- analysis, apparatus for, (40) 111.
- and carbon, equilibrium in soils, (38) 421.
- apparatus, all-glass, (40) 609, 806.
- as source of muscular energy, (26) 763.
- assimilating bacteria, studies, (39) 722
- assimilation—
  - as affected by humus, (31) 120.
  - by Azolla, (29) 133.
  - corn, (28) 225; (37) 223.
  - fungi, (29) 824.
  - legumes, (29) 326; (30) 435; (31) 523
  - living organisms, (30) 323.
  - mold fungi, (28) 803.
  - plant roots, (27) 634.
  - plants, (26) 617; (27) 226; (32) 121.
  - rice, (26) 41; (38) 340.
  - royal palms, (27) 847.
  - Streptothrix*, (27) 620.
- from nitrates, ammonium salts, and asparagin, (27) 331.
- in meadows, (26) 422.
- plant cells, (28) 428.
- presence of nitrates, (31) 121.
- atmospheric, abnormal fixation, (29) 819.
- atmospheric, assimilation by—
  - alfalfa, (39) 738.
  - mycorrhiza, (30) 826.
  - plant hairs, (32) 327; (33) 30.
  - plants, (31) 223; (35) 435.
  - soil organisms, (32) 29.
  - yeasts and fungi, (30) 629; (32) 728.
- atmospheric, fixation, (28) 222, 522; (29) 517, 730; (39) 428.
- atmospheric, fixation—
  - as affected by plant tissues, (39) 26.
  - by aluminum nitrid, (27) 325, 624.
  - Azotobacter*, (29) 227.
  - bacteria, (26) 123, 824.
  - boron compounds, (29) 822; (32) 125.
  - electricity, (26) 425, 818; (27) 420; (31) 622, 822; (32) 125, 722; (33) 125, 219, 326, 517; (35) 219; (36) 122; (38) 122, 311, 325, 423, 625; (39) 817.
  - feldspar, (29) 518.
  - fungi, (28) 824.
  - legume bacteria, (29) 629.
  - nonlegume plants, (37) 819.
- in soils, (38) 213.
- treatise, (29) 417.
- atmospheric—
  - industrial fixation, (37) 321, 815.
  - utilization, (27) 520, 623; (28) 221, 817; (29) 126, 319, 821; (30) 11, 26, 721; (32) 820; (33) 25, 424.
  - utilization by higher plants, (33) 627.
  - utilization by radishes, (34) 218.
- availability—
  - experiments, (40) 125.
  - in barnyard manure, (26) 323, 424.
  - bat guano, (27) 825.
  - fertilizers, (26) 523; (36) 818.
  - kelp, (33) 206.
  - mineral and organic compounds, (34) 621
- available, cost, (26) 95.
- bacterial, determination in feces, (26) 161.
- balance in pot experiments, (27) 21.
- carbide, fertilizing value, (35) 519.
- carbon, and humus ratios in soils, (28) 217.
- combined, in rain, (27) 212.
- combined, losses of, (28) 424.
- compounds—
  - availability for higher plants, (30) 324.
  - in growing mustard, (26) 824.
  - in rain and snow, (32) 615.
  - manufacture, (28) 424.
  - manufacture from the air, (27) 824.
  - metabolism in etiolated shoots of barley, (35) 434.
  - of fundamental rocks, (32) 121.
  - of soils, (32) 718.

## Nitrogen—Continued.

- compounds—continued.  
of soils and fertilizers, (37) 216.  
physical and chemical data, (40) 607.  
sources in United States, (37) 217.  
synthesis by plants, (36) 631.  
containing bodies in grape leaves, (27) 731.  
containing substances, cleavage by yeast, (26) 607.  
cycle in nature, (34) 423.  
cycle in soils, (27) 517.  
deficiency, effect on oat plant, (40) 324.  
determination, (26) 311, 606; (29) 796, 807; (30) 504; (31) 205; (32) 294, 309, 310; (33) 109; (34) 10, 504; (35) 110; (36) 14, 316; (39) 610; (40) 111, 711, 806.  
determination—  
by colorimetry, (33) 312.  
in alfalfa hay, (37) 309.  
algae, (36) 202.  
ammoniates, (26) 803.  
bacterial cells, (38) 613.  
betain, (27) 814.  
bovine flesh, (39) 201.  
calcium cyanamid, (26) 804; (36) 426; (37) 413.  
caustic soda, (32) 300.  
commercial ammoniates, (27) 8.  
cottonseed meal, (39) 506.  
eggs, (39) 715.  
feeding stuffs, (40) 510.  
fertilizers, (27) 206; (28) 726; (37) 504.  
flour, (27) 498.  
forage plants, (37) 113.  
humus, (30) 112.  
meat extract, (27) 498.  
meat products, (29) 800.  
meats and meat extracts, (32) 299.  
mixtures of calcium nitrate and cyanamid, (33) 711.  
nitrates, (27) 496.  
Norwegian salt-peter, (33) 711.  
organic substances, (30) 807.  
peat, (28) 508.  
raw rubber, (30) 615.  
rubber, (39) 315.  
soil solution, (39) 610.  
soils, (28) 519; (29) 317; (32) 807; (36) 711.  
tobacco leaves, (37) 509.  
urine, (26) 870; (29) 508; (31) 502.  
vegetable matter, (34) 410.  
water, (27) 497.  
water and effluents, (34) 410.  
wheat, (40) 507.  
Kjeldahl apparatus, (36) 14.  
Kjeldahl method, (27) 409, 804; (39) 204.  
micro-Kjeldahl apparatus for, (30) 505.  
digestion—  
apparatus, description, (37) 503.  
as affected by sugar, (32) 362.  
fumeless Kjeldahl, apparatus for, (28) 311.  
distribution—  
during fasting, (27) 465.  
in protalbinic and lylsalbinic acids, (38) 310.  
seeds, determination, (40) 502.  
soils, (37) 517.  
wheat spikes, (26) 739.  
economy in Tennessee soils, (38) 212.  
economy of nature, relation to cellulose decomposition, (28) 720; (30) 424.  
effect on—  
apples, (28) 144.  
carnations and roses, (29) 840.  
devitalized apple trees, (35) 540.  
must and wine, (30) 612.  
peaches, (33) 840.  
variation of tomatoes and beans, (29) 339.  
elimination as affected by diet, (30) 864.  
exchange during fasting, (30) 260.  
fate in the animal body, (35) 473.  
fecal, origin, (26) 663.  
fertilization, effect on development of wheat, (27) 38.  
fertilizing value, (26) 537; (27) 324, 435, 437; (28) 122.  
fixation and oxygen release in green plants, (37) 25.  
fixation as affected by—  
carbohydrates, (28) 816.

## Nitrogen—Continued.

- fixation as affected by—continued.  
carbon disulphid and toluol, (40) 513.  
colloids, (30) 431.  
humus, (32) 515.  
humus-forming materials, (35) 216.  
liming, (26) 428.  
plant residues, (40) 121.  
sodium nitrate, (38) 723.  
soil moisture, (36) 513.  
soil reaction, (39) 722, 723.  
soluble humates, (30) 431, 721; (31) 516.  
stimulants, (27) 131.  
sugar, (40) 122.  
fixation—  
bacteriological studies, (26) 521.  
by aerobic organisms, (27) 729; (31) 721.  
alumina and carbon, (28) 222; (29) 417.  
Azotobacter, (27) 517, 828; (33) 823, 620.  
barium oxid and charcoal, (29) 822.  
fungi, (27) 225; (36) 632.  
grass-green algae, (30) 727; (31) 827.  
leguminous plants, (26) 37, 722; (38) 528.  
microorganisms, (28) 323; (29) 819; (38) 426, 427; (39) 818.  
plants, (28) 35; (29) 133; (37) 129; (38) 122.  
soil bacteria, (28) 628; (30) 217.  
soil flora, (35) 320.  
zeolites, (29) 211.  
electric, (40) 127.  
factors affecting, (36) 321.  
in Colorado soils, (29) 621.  
manure, (38) 27, 325.  
Nebraska soils, (29) 734.  
sandy soils, (33) 619.  
soils, (26) 616; (27) 419; (28) 31; (30) 818; (31) 24, 818; (32) 124, 514; (33) 620; (34) 422, 423, 619.  
soils as affected by sulphur, (31) 125.  
stable manure, (35) 218.  
virgin and cultivated soils, (32) 216.  
recent advances in, (40) 801.  
relation to green manures, (38) 27.  
review of literature, (29) 527.  
rôle of alumina in, (29) 24.  
rôle of microorganisms in, (26) 37.  
seasonal variation, (32) 514.  
studies, (26) 625; (28) 519; (33) 323.  
fixing organisms—  
in Iowa soils, (37) 517.  
media for, (35) 226.  
for barley, (26) 535.  
corn and wheat, (39) 127.  
peaches, (33) 236.  
sweet potatoes, (33) 337.  
form of in soils, (33) 513.  
fraction, new, in soils, (37) 518.  
free amino, in proteins of ox and horse serum, (34) 501.  
free extracts in feeds and foods, (32) 21.  
from alfalfa hay and corn, comparative efficiency, (28) 264.  
from olive-oil residue, (40) 26.  
from Pacific coast kelps, (33) 125.  
gaseous, in swamp rice soils, (37) 424.  
green manure, accumulation in sandy soils, (26) 224; (30) 24.  
humus, notes, (27) 671.  
hunger, metabolism in, (26) 764.  
in alcoholic extracts of leaves, (27) 731.  
alfalfa hay and corn, comparative efficiency, (32) 863.  
amylase preparations from pancreas and malt, (30) 463.  
beet-sugar by-products, (39) 417.  
clays and marls, (32) 121.  
coagulum and serum of Hevea latex, (36) 710.  
cultivated and abandoned lands, (38) 622.  
dry-farm soils, (31) 318.  
eggs, (28) 64.  
forest soils, (33) 720.  
garbage tankage, (40) 134.  
growing pigs as affected by protein consumption, (32) 73.  
humus of arid soils, (34) 719.  
leaves, studies, (28) 328.  
milk, (32) 207.  
mulberry leaves, (37) 525.  
muscles of invertebrates, (31) 861.  
Nebraska soils, (28) 216.

## Nitrogen—Continued.

- in normal diet, minimum, (28) 261.
- parasitic and saprophytic plants, (27) 526.
- peat soils, (39) 10.
- processed fertilizers, (32) 217; (34) 327.
- protein-free milk, (40) 608.
- rain and snow, (29) 209; (30) 211, 815; (32) 120; (38) 416; (40) 724, 809.
- rain water, (35) 620.
- rain water in Alaska, (40) 809.
- rain water in Holland, (26) 614.
- seeds of *Acacia pycnantha*, (34) 729.
- soils as affected by—
  - alfalfa, (40) 319, 719, 722.
  - cultivation and manuring, (29) 417.
  - digestion, (28) 121.
  - heat, (39) 617.
  - molds, (40) 123, 318.
  - soils, notes, (29) 316.

  - volcanic ash, (40) 812.
  - water, relation to plant growth, (39) 332.
  - wheat, studies, (27) 500.
- increase in fermenting manures, (36) 217.
- injurious, in sugar beets, (30) 15; (31) 315.
- injurious, in sugar cane juice, (30) 15.
- inorganic and organic, assimilation by plants, (26) 32.
- insoluble, availability in fertilizers, (35) 426.
- insoluble, in commercial fertilizers, (40) 134.
- in toxication, seasonal character, (40) 463.
- lime, *see* Calcium cyanamid.
- long-continued use, (34) 128.
- loss from—
  - grass during curing, (32) 111.
  - manure, (26) 522; (32) 818.
  - manure, prevention, (31) 320.
  - peat beds, prevention, (38) 514.
  - soils, (27) 321; (28) 217; (29) 227; (35) 812.
- loss in—
  - calcium cyanamid, (27) 824.
  - cultivated soils, (33) 809; (34) 516.
  - drainage water, (26) 421, 620; (33) 122.
  - green manuring, (38) 622.
  - industrial wastes, (37) 630.
- lysin, in proteins, (33) 201.
- metabolic, determination, (37) 672.
- metabolism—
  - during pregnancy, (35) 473.
  - during recuperation after fasting, (35) 165.
  - during underfeeding, (30) 764.
  - in *Aspergillus niger*, (30) 727.
  - in man, (26) 764.
  - of, (30) 465.
  - bacteria, (39) 110.
  - peas, (37) 24.
  - women, (40) 174.
  - on a rice and vegetable diet, (26) 865.
- methods of manufacture, (40) 25.
- minimum—
  - in fever and during work, (32) 564.
  - physiological, studies, (29) 164.
  - studies, (26) 764.
- monopoly in Germany, (33) 624.
- nitrate, determination in soils and fertilizers, (27) 110.
- nitric—
  - assimilation by green plants, (28) 323.
  - determination in mixed fertilizers, (27) 610.
  - determination in soil, (38) 111.
  - in chernozem soils, (34) 618.
  - movement in soils, (26) 616.
  - production and movement in soils, (27) 418.
- nitrous, in irrigated soils, (37) 120.
- nonprotein—
  - determination in blood, (36) 316; (39) 111; (40) 310.
  - determination in flour, (38) 614.
  - determination in milk, (40) 509.
  - in blood of children, (35) 665.
  - in normal human blood, (28) 665.
  - nutritive value, (26) 665.
  - of feeding stuffs, (36) 205.
- nutrition—
  - in plants, studies, (29) 628.
  - of mold fungi, (32) 327; (36) 527.

## Nitrogen—Continued.

- organic—
  - absorption by millet, (29) 628.
  - activity, (27) 206.
  - and mineral, separation, (33) 12.
  - availability, (27) 205; (28) 508; (32) 520.
  - availability in fertilizers, (33) 13.
  - determination of activity, (29) 796.
  - determination of solubility, (26) 523.
  - effect on action of phosphates, (35) 326.
  - in Hawaiian soils, (31) 11; (32) 721; (33) 621.
  - in soils, chemistry of, (26) 320, 615.
  - role in ammonia formation, (32) 818.
- oxidation, (32) 322.
- oxids, determination in atmosphere, (39) 210.
- oxids, utilization, (40) 815.
- peat, formation of nitrates from, (29) 624.
- penetration into plants, (29) 732.
- pentoxid, determination, (26) 708.
- permutite, assimilation by plants, (29) 127, 517.
- peroxid, effect on flour, (31) 162.
- problem in dry farming, (28) 322.
- problem in relation to the war, (40) 25.
- production in United States, (37) 721.
- Products Committee, British, report, (39) 218.
- protein, determination in soil, (39) 204.
- protein table for feeding stuffs, (33) 711.
- ratio as a criterion of quality in flour, (29) 460.
- relation to—
  - citrus nettle leaf, (37) 353.
  - fruit-bud formation, (29) 539.
  - phosphoric acid in flour, (26) 661.
  - sulphur in metabolism, (26) 765.
- relations of crop plants, (40) 821.
- removal by corn crop, (37) 232.
- removal by crops, (39) 724.
- removal from soil, (39) 517.
- residual, in blood before and during absorption of food, (29) 767, 768.
- retention after feeding of urea, (30) 169.
- retention in pigs, (28) 469, 872.
- role in plant nutrition, (26) 530; (27) 26.
- salts, effect on seeds sensitive to light, (35) 222.
- soluble, as factor in judging flour, (29) 60.
- sources in United States, (36) 122.
- sources of, (28) 222.
- synthetic, status of industry, (32) 622.
- total and soluble, in flour, (38) 711, 712.
- transformation—
  - and distribution in citrus soils, (37) 318.
  - as affected by calcium carbonate, (26) 226.
  - in Actinomycetes, (31) 324.
  - in moor soils, (34) 18.
  - in soils, (26) 721; (31) 818.
  - relation to sulfication, (39) 823.
- utilization—
  - and accumulation, (35) 125.
  - by crops grown separately and in mixture, (26) 617.
  - by legumes, (33) 426.
  - by sugar beets, (33) 434.
- waste and recovery in coal-using industries, (28) 221.
- water-insoluble, in fertilizers, (34) 625.
- water-soluble, in feeding stuffs, (34) 72, 501.
- Nitrogenous compounds—
  - as affected by organic substances, (27) 626; (33) 326.
  - assimilation by mold fungi, (33) 726.
  - decomposition in soils, (33) 508.
  - effect on germination of seeds, (33) 825.
  - effect on legume bacteria, (29) 733.
  - in soils, solubility, (29) 108.
  - inorganic, assimilation by plants, (31) 223.
  - nonprotein, effect on nitrogen intake in pigs, (30) 871.
  - organic, as affected by manganese oxid, (27) 726.
  - selection by *Aspergillus*, (33) 824.
- Nitrogenous constituents of—
  - honey, determination, (26) 207.
  - leaves, displacement by water, (29) 218.
  - lime juice, (29) 161.
  - meat extracts, changes in, (26) 356.
  - urine, studies, (26) 161.
- Nitrogenous fertilizer—
  - Rehmsdorfer, (40) 320.
  - situation in United States, (39) 120.
- Nitrogenous fertilizers—
  - action as affected by distribution in soils, (35) 518.

## Nitrogenous fertilizers—Continued.

- artificial, status, (27) 519.  
 availability, (27) 520; (28) 724, 725; (29) 126; (30) 324; (31) 124, 318; (34) 219; (35) 123, 426; (39) 726.  
 availability, determination, (36) 726.  
 availability in presence of sodium nitrate, (38) 723.  
 characteristics, (39) 726.  
 comparison, (26) 31, 33, 125, 324, 425, 523, 536, 725, 735, 736, 829, 836, 837; (27) 24, 218, 519, 531, 626, 724, 832, 833; (28) 325, 723, 725, 736; (29) 23, 125, 213; (30) 125, 626, 632, 839; (31) 36, 517, 518, 820, 821, 822; (32) 323, 336; (33) 25, 219, 220; (34) 24, 25, 129, 327, 518, 621, 622, 820; (35) 22, 126, 323, 325, 427, 518, 519; (36) 121, 626, 818; (37) 321, 426, 739; (38) 133, 220, 516, 517; (39) 327, 328, 537, 622, 623, 726, 817; (40) 125, 242, 539, 724, 824.  
 effect on—  
   acid soils, (39) 627.  
   citrus fruits, (27) 350.  
   composition of beets, (31) 737.  
   composition of sugar beets, (27) 534.  
   flax fiber, (31) 332.  
   grapes, (31) 339.  
   nodule formation, (37) 133.

   bulletins, index, (34) 796.  
   financial statement, (28) 493.  
   notes, (29) 700; (30) 95; (31) 497; (32) 798; (33) 198; (34) 798; (39) 97, 400, 698; (40) 498.  
   report, (30) 696; (31) 694; (33) 196; (35) 94; (36) 498.  
   report of director, (28) 493.  
   Williston substation, report, (29) 299, 496.
- Nose fly, distribution in United States, (40) 458.
- Nosema—  
 apis—  
   notes, (26) 457, 561; (36) 53, 258; (37) 58.  
   pathogenic to insects other than bees, (30) 459.  
   relation to Isle of Wight disease, (37) 360; (39) 768, 869; (40) 65.  
   studies, (27) 468, 759, 761; (29) 761.  
 bombi n.sp., biology and remedies, (32) 759.
- bombycis—  
 review of investigations, (30) 549.  
 spores, filament extrusion, (40) 255

- Nosema—Continued.  
 bombycis—continued.  
 structure and life history, (37) 361.  
 studies, (27) 762.  
 ichneumonis, notes, (30) 857.  
 pulicis n.sp., notes, (36) 257.
- Nosodendridae, catalogue, (26) 560.
- Notoc spp., notes, (28) 31.
- Notanisomorpha meromyzae n.sp., description, (38) 165.
- Notarcha (Nacoleia) octasema, biology and remedies, (38) 59.
- Notch wing, notes, (28) 157.
- Notopocyrus n.g. and n.spp., descriptions, (28) 561.
- Nothodiscus antoniae n.g. and n.sp., notes (37) 630.
- Nothopattella chinensis n.sp., description, (27) 848.
- Notocotyle quinqueserialis n.sp., description, (27) 52.
- Notodontian larvae, notes, (40) 648.
- Notodontidae, coloration and protective attitudes, (32) 850.
- Notodontoidae, pupae of, (37) 663.
- Notoedres muris, notes, (32) 353.
- Notolophus antiqua, see Tussock moth.
- Notophthalmus torosus, studies, (39) 660.
- Notopygus virginianus n.sp., description, (35) 262.
- Notoxus monodon, notes, (28) 755.
- Nova Scotia Agricultural College, notes, (28) 497.
- Novarsenobillon for rat-bite fever, (39) 389.
- Novius cardinalis—  
 acclimation in France, (30) 554.  
 destructive to fluted scale, (31) 60.  
 notes, (34) 851.
- Nuche, studies, (40) 263.
- Nuclear division, mechanism of, (28) 668.
- Nuclease—  
 as affected by temperature, (28) 803.  
 nephelometry in study of, (30) 410.
- Nucleic acid—  
 derivatives in peat, (38) 202.  
 determination in flesh of mammalia, (27) 807.  
 effect on plant growth, (28) 324; (29) 219.  
 effect on soils and plants, (26) 814.  
 examination, (39) 610.  
 isolation from soils, (28) 418.  
 nitrification as affected by lime, (38) 119.  
 plant, preparation, (38) 505.
- Nucleic acids—  
 and their cleavage products, (30) 201.  
 isolation from soils, (26) 814.  
 notes, (32) 678.  
 treatise, (32) 201.  
 undigested, determination, (32) 311.
- Nuclein—  
 assimilation by ruminants, (31) 71.  
 effect on the blood, (26) 482; (27) 577.  
 feeding of animals, (30) 67.  
 humification, (38) 26.  
 importance in the animal organism, (33) 758.  
 metabolism in pigs, (26) 363.  
 metabolism, paper on, (26) 69.  
 notes, (32) 678.  
 relation to metabolism, (27) 574.
- Nucleoproteins—  
 as antigens, (32) 179.  
 bacterial, notes, (32) 78.  
 cleavage products of, (32) 718.  
 formation in chick embryo, (26) 877.  
 metabolism, (27) 464.
- β—Nucleoproteins, antigenic properties, (37) 77.
- Nucleosids, metabolism, (32) 256.
- Nucleus, rôle in heredity, (29) 66.
- Nudacotyle novicia n.g. and n.sp., description, (37) 355.
- Numenius americanus subsp., notes, (39) 654.
- Nummularia—  
 bulliardii, notes, (37) 246.  
 discretæ—  
 dissemination by tree crickets, (35) 548.  
 effect on apple bark, (34) 136.  
 notes, (27) 445, 749; (33) 348; (34) 247, 646; (37) 151.  
 studies, (39) 53.  
 transmission by tree crickets, (34) 653.  
 in Indiana, (36) 542.
- Nun moth—  
 dipterous parasites of, (29) 759.  
 hymenopterous parasites of, (28) 455.  
 notes, (27) 861; (30) 755.
- Nun moth—Continued.  
 studies, (28) 775; (31) 251, 454.  
 tachinid parasite of, (27) 58.  
 wilt disease, notes, (27) 759.  
 wipfelkrankheit, studies, (27) 661.
- Nupserha—  
 apicalis, notes, (32) 347.  
 sp. affecting soy beans, (36) 157.
- Nurseries—  
 insects affecting, (28) 353.  
 seeding machine for, (27) 191.
- Nursery—  
 experimental and research station in Hertfordshire, (34) 199.  
 experiments, error in, (36) 735.  
 industry in Utah, (29) 342; (33) 638.  
 inspection, (28) 553, 642; (33) 57; (35) 53; (37) 254; (39) 760.  
 inspection—  
 certificates, standardization, (33) 745.  
 in Arizona, (29) 341; (31) 155; (33) 745; (35) 656.  
 Canada, (29) 252; (32) 448; (33) 746.

   treatise, (33) 537.  
 edible and oil-producing in West Africa, (36) 611.

## Nuts—Continued.

- edible, of Guam, (28) 142.  
grafting, new method, (33) 643.  
insects affecting, (29) 354; (40) 259.  
investigations, (40) 150.  
marketing cooperatively, (26) 92.  
microscopic identification, (28) 565.  
of Hawaii, composition, (32) 761.  
of Trinidad and Tobago, (39) 449.  
planting in eastern United States, (38) 542.  
prevention of beriberi by, (31) 762.  
propagation, (31) 443.  
pruning, (33) 838.  
soaking, (29) 60, 264.  
varieties, (30) 41, 640; (32) 232; (34) 231; (38) 641.  
varieties for Ceylon, (39) 845.  
varieties for Georgia, (34) 436.  
varieties for Minnesota, (33) 140.  
variety collections, (40) 834.
- Nuttallia equi*—  
description, (31) 382.  
in equine biliary fever in India, (32) 278.  
relation to equine piroplasmiasis, (26) 177.
- Nuttalliosis*—  
in horses, notes, (26) 888.  
in Russian Turkestan, (37) 374.
- Nuttallornis borealis*, feeding habits, (28) 57.
- Nymph*, agglutinating capacity and complement fixing power, (28) 375.
- Nymphaea*—  
alba, chemistry and anatomy of, (34) 522.  
mexicana as a duck food, (30) 545.
- Nymphula*—  
depunctalis, notes, (34) 250.  
nymphaeaata, notes, (37) 847.
- Nymphulinae*, North American, notes, (37) 564.
- Nysius*—  
angustatus, notes, (29) 252.  
delectus, notes, (31) 249.  
ericae (angustatus), remedies, (36) 154.  
ericae (angustatus), studies, (39) 464.  
minutus, notes, (37) 847.  
minutus, remedies, (39) 760.  
senecionis as an enemy of vines, (33) 154.  
senecionis, notes, (29) 854.  
vinitor, notes, (35) 853; (40) 753.
- Nyssorhynchus annulipes*, notes, (35) 258.
- Oak**—  
and beech, union of, (33) 343.  
and birch, union of, (33) 343.  
canker, description, (32) 442.  
cork, introduction into southern California, (28) 543.  
cork, yellow spot disease of, (31) 247.  
cossid on pecan, (38) 157.  
disease in Westphalia, (32) 845.  
diseases in Brittany, (33) 56.  
diseases, notes, (26) 57; (31) 451, 841; (39) 149.  
fungus on nursery stock, (33) 744.  
heart rot, distribution, (32) 150.  
heart rot, studies, (30) 52.  
high forests on the Rhine, yield tables, (29) 747.  
honeycomb heart rot, studies, (34) 448.  
leaf spot, large, notes, (28) 55.  
leaf spot, new, studies, (39) 549.  
leaf spot, unreported, in New Jersey, (33) 250.  
leaves, decomposition in soil, (40) 214.  
mildew—  
classification and host relationships, (37) 155.  
in Alsace-Lorraine, (28) 852.  
in Europe, (27) 153.  
in Hungary, (31) 845.  
notes, (28) 350; (30) 544, 653, 849; (33) 745; (35) 655.  
studies, (27) 253, 548; (35) 51.  
treatment, (26) 451.  
wintering over, (28) 651.
- Moreh, notes, (36) 243.
- Oidium*—  
in France, (37) 756.  
notes, (26) 551; (27) 753, 853; (32) 150; (33) 549.  
studies, (29) 553; (31) 246; (34) 650.  
treatment, (27) 855.
- Oregon, notes, (27) 846.  
phyloxera, life history and habits, (32) 57.  
poisoning of livestock, (39) 386.  
pruner, notes, (33) 58.  
pruner on pecan, (38) 157.

## Oak—Continued.

- reddish or brown heartwood of, studies, (34) 849.  
root diseases, notes, (30) 147.  
root fungus on pear, (40) 252.  
roots, mycorrhiza on, (37) 756.  
scale, golden, notes, (28) 353.  
scale, studies, (32) 553.  
seeds, storage experiments, (37) 547.  
silk, crown gall affecting, (28) 447.  
tortrix, notes, (29) 558.  
tree *Cercocarpus*, notes, (28) 159.  
tree moth, notes, (28) 159.  
twig blight, notes, (27) 651.  
twig girder, remedies, (31) 60.  
twig pruner, see *Elaphidion villosum*.  
unit stresses for, (36) 91.  
white rot, studies, (35) 655.  
wood, *Coniophora cerebella* on, (39) 553.  
wood, protection against dry rot, (27) 654.  
wood, quality as affected by light, (27) 542.  
wood, resistance to dry rot, (26) 732; (32) 150.  
woods, North American, identification, (26) 338.  
worm, orange striped, notes, (29) 353.
- Oakesia sessilifolia*, seed formation in, (31) 225.
- Oaks**—  
absorption of nitrogen by, (26) 443.  
and olives, growing in close proximity, (35) 654.  
as affected by smoke, (31) 521.  
bitter, notes, (36) 540.  
cerambycid beetle affecting, (26) 59.  
chestnut, *Sphaeropsis canker* of, (31) 450.  
chestnut, twig blight of, (30) 453.  
destruction by *Agrilus bilineatus*, (32) 656.  
distillation value, (32) 48.  
dying, in Westphalia, (33) 650.  
dying, notes, (30) 655; (31) 246.  
Emory, in southern Arizona, (27) 647.  
food plant of purple scale, (26) 756.  
forcing experiments, (28) 435.  
fossil, of America, (40) 153.  
germination studies, (40) 47.  
histological variations in, (34) 440.  
hybrid, in United States, (37) 820.  
hybridization experiments, (40) 47.  
Irish, composition and mineral constituents, (36) 804.  
live, carpenter worm affecting, (31) 550.  
live, insects affecting, (28) 159.  
live, seedling structure, (27) 442.  
of central California, (31) 839.  
of North America, (39) 50.  
periodicity in, (29) 442.  
preserving, (38) 554.  
red, cost of growing, (26) 49.  
red, culture and value, (34) 639.  
red, density and porosity, (32) 47.  
red, pith-ray flecks in, (30) 855.  
resistance to *Oidium*, (40) 253.  
root parasite of, (30) 354.  
scarlet, disease of, (34) 448.  
spraying with lead chromate, (31) 60.  
valonia, bibliography, (31) 342.  
white—  
of eastern North America, (33) 646.  
polyembryony in, (40) 226.  
ray system, (40) 153.  
ray tracheids in, (38) 45.  
seedling structure, (27) 442.  
with persistent foliage, leaf structure, (35) 543; (36) 330.
- Oases, irrigation, (31) 287.
- Oat**—  
amylase, studies, (31) 609.  
and pea hay, cost of production, (32) 527.  
and pea silage, notes, (27) 736.
- aphis*—  
alternate hosts, (39) 464.  
cat-tail as summer host, (37) 461.  
correct name, (38) 462.  
in Maryland, (38) 154.  
injurious to apples, (33) 253.  
notes, (31) 753; (32) 755; (40) 648.  
remedies, (36) 857.
- blights, bacterial, notes, (40) 846.  
bran, analyses, (26) 266.  
by-products, analyses, (28) 464; (39) 270.  
by-products, paper on, (28) 74.  
chaff, analyses, (27) 469; (29) 467.  
clippings, analyses, (28) 464.  
clippings, definition, (28) 98.

## Oat—Continued.

- crown rust—
  - aeical stage, staining in host tissue, (39) 248.
  - studies, (37) 749; (38) 645.
  - treatment, (27) 746.
  - winter resistance of uredospores, (29) 645.
- diet, effect on guinea pigs, (36) 364.
- diet, effect on phenol excretion, (40) 273.
- diet, exclusive, injurious effects, (34) 366.
- diseases, life history and treatment, (28) 346.
- diseases, notes, (35) 245.
- diseases, studies, (30) 846.
- dry spot—
  - notes, (26) 447; (27) 849; (28) 149; (29) 151.
  - studies, (33) 546, 547, 847.
  - treatment, (28) 820.
- feed, analyses, (38) 369; (40) 571.
- fields, weed control in, (40) 536.
- flour, analyses, (29) 270; (38) 666.
- fodder, analyses, (36) 65.
- Fusarium diseases in Bavaria, (30) 748.
- grass, culture experiments, (29) 631.
- grass, seeding on ranges, (30) 35.
- grass, tall—
  - analyses, (27) 68; (30) 565.
  - as affected by number of cuttings, (29) 431.
  - culture experiments, (26) 422; (40) 136.
  - digestibility, (32) 168.
  - fertilizer experiments, (26) 422.
  - field tests, (39) 135.
  - for irrigated pastures, (39) 434; (40) 432.
  - irrigation experiments, (32) 224.
  - meadow, yields, (40) 733.
  - moisture content and shrinkage, (34) 828.
  - palatability, (34) 865.
  - pollination experiments, (37) 735.
  - varieties, (29) 139; (30) 434.
  - vitality of seeds, (27) 740.
- grass, yields, (29) 631.
- grey leaf or dry leaf, notes, (31) 243.
- groats, analyses, (38) 665.
- hay—
  - analyses, (29) 467; (32) 465.
  - chloroform extract of, (31) 71.
  - composition, (27) 668.
  - digestibility, (27) 669; (37) 168.
  - forage poisoning due to, (37) 689.
  - injurious effect on horses, (36) 280, 580.
  - mineral constituents, digestibility, (40) 769.
- hulls—
  - analyses, (26) 665; (27) 774; (28) 464; (29) 270, 666; (30) 868; (31) 168; (32) 667; (34) 665; (35) 374, 867; (36) 167; (38) 67, 369; (39) 270; (40) 571, 665.
  - digestibility, (29) 367.
  - ground, analyses, (27) 170; (38) 369.
- hybrids, dominant and recessive characters in, (28) 197; (30) 33.
- hybrids, yields, (31) 527.
- kernel, dietary deficiencies, (37) 61.
- kernel, fatty substances in, (26) 502.
- leaf spot, notes, (27) 246.
- leaf spot, treatment, (27) 149.
- leaves, deformation, (33) 647.
- loose smut—
  - description and treatment, (31) 446.
  - life history and treatment, (28) 445.
  - notes, (32) 48.
  - notes and treatment, (28) 51.
  - prevention, (33) 245.
  - studies, (35) 845.
  - treatment, (27) 445, 734; (31) 344; (32) 40.
- middlings, analyses, (27) 170; (36) 268, 765; (37) 471; (39) 167.
- mildew, notes, (36) 541.
- mildew, studies, (35) 845.
- mite, description, (35) 463.
- plant, nutritive elements, (40) 324.
- powdery mildew, studies, (31) 343; (35) 651; (37) 749.
- products, analyses, (29) 367.
- protein, nutritive value, (39) 665, 666.
- proteins, supplements for, (36) 560.
- rust, description, (35) 47.
- rust, notes, (26) 143.
- rusts in Canada, (34) 51.
- seed, spraying, (39) 248.
- seedlings—
  - as affected by nitrates, (31) 231, 528.
  - as affected by ultraviolet rays, (26) 430.

## Oat—Continued.

- seedlings—continued.
  - distribution of stomata in, (32) 221.
  - etiolated, tropic sensitivity of, (28) 630.
  - hypocotyl development, (38) 525.
  - phototropism in, (30) 725.
- sickness in soils, (32) 442.
- silage, acidity, (39) 310, 878.
- smut—*see also* Smut and Cereal smut.
  - in Indiana, (36) 542.
  - inoculation experiments, (37) 750.
  - notes, (28) 443; (29) 831; (31) 829; (38) 848; (39) 353.
  - notes and treatment, (28) 51, 544.
  - studies, (38) 646.
  - treatment, (27) 137; (31) 98; (34) 744; (36) 449; (37) 750; (39) 137, 248, 353, 354, 549, 851; (40) 49, 155, 156, 630, 735, 747.
- smuts—
  - cause and treatment, (30) 47.
  - descriptions and treatment, (38) 249; (39) 248.
- sprouter, description, (27) 279, 374; (36) 75.
- starch as affected by pancreas diastase, (28) 660.
- starch, studies, (31) 828.
- stem rust, spore morphology, (40) 642.
- stinking smut, notes, (35) 348.
- straw—
  - analyses, (28) 768; (34) 164; (36) 65.
  - analyses and use as human food, (33) 866.
  - as bedding, (39) 621.
  - composition and digestibility, (34) 565.
  - effect on bacterial activity of soils, (35) 216.
  - feeding value, (40) 666.
  - lime and phosphorus content, (26) 873.
  - nitrification of, (31) 724.
  - v. alfalfa hay for steers, (36) 269.
- stripe blight, notes, (40) 846.
- white heads or take-all, notes, (30) 148.
- white heads or take-all, studies, (28) 646.
- Oatmeal—
  - analyses, (26) 267; (31) 467.
  - bread, notes, (27) 664.
  - by-products for feeding, (40) 72.
  - flour, recipes, (40) 67.
  - in bread making, (40) 360.
  - middlings, analyses, (35) 562.
- Oats—
  - acclimatization tests, (27) 138.
  - acid poisoning due to, (34) 766.
  - adjustment to light, (32) 522.
  - alkali tolerance, (40) 719.
  - amino acid in, (33) 665.
  - analyses, (26) 266, 362, 363, 369, 770; (27) 170, 340, 570; (28) 265, 463; (29) 367; (30) 434, 528; (31) 431, 467, 470, 864; (32) 171, 465, 862; (33) 734; (34) 630, 668; (35) 562; (36) 65; (38) 67; (39) 773.
  - anatomical investigations, (29) 831.
  - and barley, comparative growth in nutrient solutions, (40) 134.
  - barley, comparative yields, (40) 135, 328.
  - Canada peas, silage from, (28) 734.
  - clover following various crops, (40) 829.
  - corn, analyses, (40) 665.
  - cowpeas, liming experiments, (40) 126.
  - cowpeas, mixture digestibility, (38) 778.
  - field peas, seeding experiments, (31) 36.
  - oat hay, cost of production in South, (39) 294.
  - and peas—
    - as hay crop, (39) 333, 336; (40) 736.
    - as silage crop, (40) 731.
    - cost of production, (34) 137.
    - seeding and harvesting dates, (37) 135.
    - seeding experiments, (37) 640.
    - yields, (40) 735.
  - and vetch, fertilizer experiments, (40) 134.
  - and vetch for green fallow, (40) 229.
  - as affected by—
    - barium and strontium, (40) 819.
    - calcium and magnesium, (35) 726.
    - companion crop of mustard, (36) 438.
    - greenhouse temperature, (37) 533.
    - lead nitrate, (26) 225.
    - lime, (26) 429.
    - manganese, (28) 328.
    - meteorological conditions, (29) 509.
    - rotation system, (39) 639.
    - soil acidity, (40) 134, 324.

## Oats—Continued.

- as affected by—continued.
    - soil volume and available plant food, (31) 132.
    - sulphur, (38) 221.
    - uranium and lead, (28) 731.
    - water level, (26) 620.
    - weather conditions, (27) 641.
  - food for man, (27) 663.
  - forage crop, (38) 827.
  - green manure, (38) 27; (39) 423.
  - hay and silage crop, (39) 737.
  - meadow cover crop, (40) 137.
  - nurse crop, (31) 524; (40) 329.
  - pasture and hay crop, (28) 231.
  - pasture crop, (38) 470; (39) 880.
  - silage crop, (39) 134.
  - sole ration for animals, (39) 72.
  - sole ration for guinea pigs and rabbits, (35) 781.
  - wheat flour substitute, (39) 871.
- ash analyses, (29) 861.
- assimilation of—
- nitrogen by, (26) 319.
  - phosphorites by, (27) 340.
  - soil constituents by, (31) 632.
- awn development in, (31) 332.
- awning, studies, (39) 234.
- biennial cropping, (32) 226; (38) 430.
- black, eradication, (27) 435.
- bleached with sulphur, notes, (27) 566.
- bleaching with sulphur dioxide, (40) 35.
- breeding, (26) 434; (40) 523.
- breeding and improvement in Sweden, (39) 833.
- breeding experiments, (26) 831; (27) 734; (29) 138, 532; (33) 331; (35) 831; (36) 336, 834; (37) 738, 827; (39) 126, 234, 334; (40) 233, 524.
- bushel weights, (37) 889.
- calcium cyanamid for, (31) 524.
- catalytic fertilizers for, (30) 627.
- change in weight during storage, (30) 639.
- classification, (30) 528.
- classification of varieties (27) 138.
- color and other characters, relations, (40) 239.
- common and bearded, origin and early habitat, (40) 629.
- competition in, (27) 430.
- composition as affected by—
- companion crop, (26) 617.
  - degree of maturity, (27) 340.
  - fertilization and soil preparation, (34) 230.
  - irrigation, (28) 332.
- composition at different stages, (39) 836.
- correlation in, (31) 434; (32) 736, 737.
- cost of production, (29) 690; (32) 530, 594, 688; (33) 293, 831; (35) 691; (37) 191; (40) 292.
- cost of production in Great Plains area, (33) 232.
- critical period of growing season, (39) 811.
- crushed, analyses, (27) 170; (28) 265; (31) 73, 366; (36) 765.
- crushed v. whole, for work horses, (36) 866.
- cultivated, origin, (27) 237; (30) 338, 527; (32) 131.
- culture, (27) 32, 139, 337; (29) 830; (30) 434; (31) 35, 265; (32) 132, 226, 598; (33) 731; (34) 138, 694; (36) 530; (38) 340, 636; (39) 834.
- culture—
- continuous, (37) 137.
  - experiments, (26) 38, 233, 329, 422, 737; (27) 232, 233, 336, 430, 530, 638; (28) 321, 633; (29) 36, 225, 425, 426, 427, 630, 632, 735, 831; (30) 33, 133, 527, 632; (31) 44; (32) 36, 132, 430, 431, 526, 528, 529, 530; (33) 31, 232, 633, 729, 830; (34) 137, 228, 631; (35) 228, 229; (36) 32, 33, 132, 436, 830; (37) 226, 329, 436, 529, 534, 731, 825; (38) 132, 234, 336, 631, 632, 634, 735, 825, 830; (39) 124, 125, 126, 127, 227, 335, 436, 437, 834, 835; (40) 228, 731, 735, 825.
  - for chicken feed, (38) 827.
  - for hay, (37) 436.
  - for silage, (26) 574.
  - in Argentina, (35) 136.
  - Chile, (39) 231.
  - cotton belt, (32) 533.
  - Indiana, (40) 735.
  - Iowa, (39) 136.
  - Mexico, (32) 131.
  - Michigan, (39) 320.
  - Mississippi, (33) 431.
  - Nebraska, (29) 534; (38) 740.

## Oats—Continued.

- culture—continued.
  - in New Mexico, (40) 18.
  - North Carolina, (27) 631.
  - North Dakota, (40) 736.
  - Rhodesia, (27) 32, 637.
  - Texas Panhandle, (29) 429; (35) 440.
  - western Nebraska, (35) 438.
  - Wyoming, (38) 527; (40) 630.
  - on moor soils, (30) 229; (38) 132; (39) 437; (40) 230, 522.
  - on Wisconsin drift soil, (36) 623.
  - relation to rainfall, (33) 715.
  - under dry farming, (26) 828; (36) 528, 529; (37) 329; (39) 131.
  - under irrigation, (34) 528.
- decomposition in soil, (40) 214.
- depth of sowing tests, (27) 835.
- depths of plowing tests, (40) 624.
- description and classification, (26) 41.
- descriptions, (31) 230.
- dietary properties, (37) 264.
- digestibility, (37) 678.
- distance experiments, (30) 732.
- distribution of nitrogen in, (36) 269.
- drawings of, (29) 141.
- drilling v. broadcasting, (33) 33.
- dwarfness in, (40) 827.
- dynamiting and subsoiling experiments, (32) 528.
- effect on—

  - Azotobacter, (40) 618.
  - carbon dioxide content of soil air, (39) 516.
  - companion crop of wheat, (32) 432.
  - flavor of milk, (30) 573.
  - following crop, (40) 623.
  - milk and butter, (34) 570.
  - nitrate content of soils, (27) 818.
  - soil bacteria, (37) 421.
  - soil moisture, (34) 17.
  - succeeding crops, (32) 224.

- electroculture experiments, (37) 336; (38) 525, 526; (39) 230; (40) 428.
- ergot affecting, (27) 149.
- factors affecting composition, (27) 139.
- fall-sown, in Maryland and vicinity, (36) 736.
- feeding value, (34) 867.
- fertilizer experiments, (26) 31, 33, 324, 330, 331, 422, 424, 428, 522, 523, 527, 534, 535, 622, 623, 630, 632, 725, 817, 818, 833; (27) 32, 137, 321, 324, 337, 520, 530, 626, 627, 628, 638, 725, 726, 832, 837; (28) 124, 221, 222, 231, 431, 533, 623, 723, 724, 734, 735, 815, 816, 818, 820; (29) 23, 126, 127, 211, 213, 228, 318, 518, 624, 727, 728, 735, 821, 831; (30) 26, 125, 220, 229, 235, 326, 327, 335, 428, 519, 632, 820, 822; (31) 31, 37, 123, 129, 217, 430, 528, 820, 821, 822, 828, 829; (32) 431; (33) 219, 326, 430, 632, 729, 831; (34) 22, 24, 128, 131, 294, 327, 330, 423, 517, 518, 622, 630, 723, 726, 820; (35) 30, 33, 126, 218, 220, 325, 326, 425, 426, 427, 428, 518, 519, 520, 629; (36) 23, 134, 212, 217, 428, 529, 626; (37) 29, 30, 34, 134, 216, 229, 436, 635, 823; (38) 230, 517, 620, 726, 728, 820, 825, 829; (39) 22, 127, 137, 327, 334, 335, 427, 435, 436, 624, 639, 728, 729; (40) 135, 218, 229, 239, 734, 825.
- fertilizing value, (31) 220.
- Fichtel Mountain, breeding, (30) 38.
- floral anomalies in, (29) 629.
- for cows, (30) 176.
- for cut-over land pasture, (39) 231.
- for summer silage, (29) 473.
- forcing by electricity, (26) 136.
- geotropism and phototropism in absence of oxygen, (39) 826.
- germinating power as affected by age, (27) 740.
- germination as affected by—

  - depth of planting, (36) 437.
  - electrolytes, (35) 332.
  - fertilizers, (29) 327.
  - fungicides, (29) 346.
  - Orwood, (28) 536.
  - stimulants, (26) 131.

- germination—

  - at different dates after threshing, (40) 443.
  - energy of, (29) 538.
  - in acid, base, and salt solutions, (30) 228.
  - in mercury vapor light, (30) 827.
  - tests, (29) 223, 740; (30) 837; (31) 136, 733; (37) 233.
  - tests in hydrogen peroxid, (27) 201.

## Oats—Continued.

- germinative ability and vegetative force, (29) 740.
- germ-ripening experiments, (26) 131.
- Göttinger, characteristics, (28) 738.
- grades, (32) 138.
- green, analyses, (27) 170; (29) 467.
- green manuring experiments, (32) 721; (40) 24.
- ground, analyses, (26) 72, 468, 665; (27) 570, 774; (28) 265, 464; (29) 666, 769; (30) 67; (31) 663, 863; (32) 259; (34) 467; (35) 374; (37) 767; (38) 369, 665; (40) 571.
- ground seaweed for, (40) 724.
- growing—
  - in Coloma sand, (39) 323.
  - with corn, (40) 822.
  - with legumes, (39) 816; (40) 822.
  - with soy beans, (39) 741.
  - without potash, (39) 334.
- growth as affected by—
  - alkali salts, (34) 125; (36) 118.
  - electricity, (28) 827.
  - fertilizer salts, (29) 329.
  - meteorology, (29) 510.
  - spacing, (31) 328.
- growth—
  - in heated soils, (26) 815; (27) 620.
  - in vertical illumination, (32) 129.
  - on sterilized soils, (31) 336.
  - on volcanic ash, (29) 726; (32) 36.
  - studies, methods, (38) 526.
- hardness, relation to sap density, (39) 430.
- hay and silage from, (33) 632.
- heredity of albinism in, (31) 329.
- history, (31) 131, 230.
- hull content, determination, (36) 231.
- hulled, investigations, (29) 141.
- hulled, seed value, (36) 439.
- hull-less, analyses, (33) 759.
- humin nitrogen content, (40) 510.
- husk percentage in, (37) 537.
- hybridization investigations, (26) 831.
- hybridization v. selection in, (29) 635.
- imports from Canada, (31) 95.
- improvement, (28) 431, 828; (29) 532, 535; (32) 630.
- improvement in Canada, (37) 831.
- inheritance in, (37) 332.
- inheritance of—
  - early and late ripening, (40) 528.
  - glume characters in, (36) 834.
  - hull-lessness, (40) 438.
  - tight and loose paleae, (40) 629.
- inoculation experiments, (35) 32.
- inosite phosphoric acids of, (39) 14.
- introduced and acclimated, (40) 429.
- irrigation, (31) 328.
- irrigation experiments, (27) 531; (28) 130, 132, 134, 230, 827; (29) 32, 138, 226, 632; (30) 35; (31) 36; (32) 37, 225; (33) 286, 631, 731, 827, 884; (37) 640, 822.
- kernel-percentage determinations, (40) 35.
- large v. small seeds, (26) 636.
- liming experiments, (29) 223; (32) 31, 132, 812; (34) 132, 133; (36) 27; (39) 221, 729; (40) 322.
- lodging, (39) 436.
- lodging, control, (36) 827.
- loose smut, description and treatment, (26) 341.
- maltase content, (31) 204.
- manurial value, (40) 127.
- manuring experiments, (40) 331, 431, 630.
- market grades, (27) 139.
- measurements, (30) 235.
- molasses sludge as a fertilizer for, (33) 818.
- nematode infection of, (36) 150.
- nematodes affecting, (28) 149; (29) 151; (30) 649; (32) 641, 750.
- new, moisture content, (34) 92.
- new strain, (40) 329.
- northern grown seed, (36) 634.
- notes, (26) 362.
- of Algeria, (34) 36.
- omission of color factor in, (29) 739.
- on inoculated soil, (39) 519.
- pasturing, (35) 827.
- pasturing experiments, (33) 830.
- pedigree, in Wisconsin, (37) 438; (40) 624.
- peptic digestibility, (29) 164.
- phosphoric acid exchange in, (28) 818.
- phytin content, (31) 707.

## Oats—Continued.

- planting and harvesting dates, (26) 533.
- planting experiments, (27) 139.
- plat tests, technique, (40) 227, 623.
- pollination, (36) 527.
- potash fertilizers for, (26) 526.
- precipitin test for, (31) 733.
- prices and shrinkage, (34) 337.
- primary, secondary, and double kernels for seed, (40) 731.
- production in—
  - Argentina, (27) 193.
  - Bohemia, (32) 827.
  - 1911, (26) 595, 792.
  - Russia, (26) 294.
  - Spain, (28) 736.
  - United Kingdom, (26) 793.
- protein content, following black fallow, (34) 230.
- radioactive fertilizer for, (31) 129.
- ratio of straw to grain, (32) 40; (36) 218.
- red roots of, (28) 442.
- relation between size of seed and yield, (26) 434.
- relation of tops to roots, (31) 733.
- relative yielding capacity, (40) 625.
- residual manurial value, (39) 530.
- right- and left-handedness in, (30) 335.
- rock phosphate for, (29) 418.
- rod-row tests, technique, (38) 429.
- rolled—
  - amino acid in, (33) 665.
  - analyses, (30) 68; (32) 667.
  - as flour substitute, (37) 895.
- root pruning experiments, (33) 731.
- root system, (32) 634.
- root system and yield, relationship, (30) 38.
- rotation experiments, (33) 429, 828, 829; (36) 829; (38) 129; (40) 229, 331, 431, 733, 829.
- rust-resistant variety, description, (31) 332.
- rye stalk disease affecting, (26) 546.
- secondary rootlets, (40) 32.
- seed—
  - bed preparation, (33) 232; (37) 29.
  - cleaning, (40) 40.
  - examination, (33) 734.
  - home-grown v. imported, (40) 630.
  - longevity, (32) 634.
  - selection, (31) 226.
  - tests, (39) 137.
  - treatment, (39) 238.
  - viability as affected by age, (31) 624.
- seeding—
  - depths, (40) 227.
  - experiments, (26) 231, 331; (27) 335, 638, 639; (29) 36, 223, 224, 225, 425, 426, 429; (30) 333; (31) 328, 631; (32) 528, 530, 531; (33) 33, 431, 729; (35) 34, 335; (36) 33, 34, 134; (37) 30, 134, 226, 537, 635, 731; (38) 630, 740; (39) 137, 228, 336; (40) 228, 731.
  - experiments, error in, (39) 830.
  - tests under irrigation, (39) 133.
  - time, (40) 728.
- selection experiments, (35) 334, 826; (37) 32, 226; (38) 740; (40) 233, 429, 528.
- selection of varieties, (28) 633.
- selection within pure lines, (33) 38.
- shrinkage tests, (38) 840.
- size and sprout value in relation to yield, (38) 732.
- soil moisture removal by, (40) 430.
- spontaneous omission of color factors in, (28) 531.
- spring v. fall sown (39) 836.
- sprouted—
  - amino acid in, (33) 665.
  - composition, (39) 74.
  - for fowls, (29) 696; (30) 373; (36) 75.
- statistical notes, (40) 626.
- stooling, (27) 735.
- subsoiling experiments, (31) 41, 131; (37) 732.
- sugar as fertilizer for, (27) 722.
- sulphur bleached germination tests, (27) 142.
- sulphur in, (31) 817.
- susceptibility to powdery mildews, (38) 645.
- Swiss types, (27) 338.
- threshing in variety tests, (36) 534.
- thrips affecting, (27) 452; (28) 452; (31) 351.
- transpiration, (34) 522; (39) 517.
- use in bread making, (40) 360, 863.
- utilization of different phosphates by, (31) 733.

## Plants—Continued.

- v. bran for milk production, (30) 576.  
 v. corn for mules, (30) 772.  
 v. corn for pigs, (31) 368.  
 v. corn for work horses, (37) 195.  
 v. spring wheat, (40) 443.  
 valuation, (26) 267.  
 value in the diet, (29) 660.  
 variations in, (31) 832; (32) 736, 737.  
 varieties, (26) 39, 232, 233, 331, 629, 632, 733, 828, 835; (27) 32, 137, 138, 234, 334, 337, 530, 531, 532, 637, 638, 735, 736, 834; (28) 431, 532, 534, 636, 735, 827; (29) 31, 36, 137, 138, 222, 225, 228, 425, 428, 530, 735, 736, 738, 831; (30) 33, 134, 135, 229, 235, 434, 435, 527, 829; (31) 226, 430, 434, 435, 527, 631, 829, 832; (32) 36, 37, 224, 333, 431, 527, 528, 529, 530, 631, 730, 731, 827; (33) 32, 33, 34, 330, 431, 631, 632, 633, 723, 828, 831; (34) 138, 227, 228, 229, 629, 631, 733, 735; (35) 31, 32, 33, 34, 229, 336, 526, 528, 637, 826; (36) 32, 33, 34, 36, 132, 133, 336, 435, 437, 529, 634, 735, 828, 830; (37) 29, 30, 32, 33, 132, 134, 135, 227, 228, 229, 329, 330, 332, 436, 438, 530, 537, 635, 640, 641, 731, 823; (38) 30, 32, 131, 135, 229, 234, 240, 333, 432, 433, 632, 634, 636, 740, 830, 832.  
 varieties—  
 classification, (36) 833.  
 for Alaska, (39) 124, 125, 126.  
 California, (26) 233.  
 Montana dry lands, (35) 735.  
 moor culture, (39) 438.  
 New South Wales, (27) 338; (38) 528.  
 the Dakotas and Montana, (38) 230.  
 Utah dry lands, (38) 230.  
 identification, (40) 238.  
 in Argentina, (40) 630.  
 new Swedish, (39) 634, 833.  
 resistant to fungi, (31) 50.  
 resistant to rust, (26) 447; (30) 230; (38) 849.  
 resistant to smut, (32) 49.  
 variety tests, (39) 127, 128, 129, 130, 136, 227, 228, 333, 334, 336, 337, 435, 436, 437, 634, 639, 735, 737, 738, 835; (40) 32, 138, 228, 233, 328, 332, 431, 624, 728, 729, 730, 731, 732, 733, 735.  
 variety tests—  
 experimental error, (39) 830.  
 rod-row method, (40) 233.  
 technique, (40) 227.  
 vitality as affected by age, (27) 334.  
 volume weight and grain characteristics, (37) 643.  
 water requirements, (26) 129; (39) 826; (32) 127, 335, 813; (34) 720; (35) 633; (38) 227; (40) 630.  
 water requirements in India, (27) 429.  
 weed seeds in, (26) 135.  
 weight as affected by fertilizers, (31) 136.  
 wild—  
 analyses, (32) 169.  
 and cultivated, intermediate form, (28) 636.  
 and false wild, notes, (27) 641.  
 eradication, (30) 531; (38) 38; (39) 744; (40) 630.  
 geographical distribution, (26) 334.  
 germination studies, (31) 235, 624.  
 germinative qualities, (29) 135.  
 percentage of kernels, (40) 731.  
 studies, (29) 337, 538.  
 wilting coefficient, (32) 335.  
 winter, northern limits in United States, (37) 533.  
 Worthy, in Michigan, (39) 335.  
 yield as affected by—  
 dynamiting, (32) 430.  
 ground water levels and soil aeration, (27) 20.  
 pasturing, (30) 633.  
 physical properties of soils, (33) 815.  
 rainfall, (34) 319.  
 sulphur, (34) 726; (35) 529.  
 water table, (29) 427.  
 weight of seed, (35) 335.  
 yield—  
 of light and heavy seeds, (27) 138.  
 of plump v. shrunken seed, (27) 734.  
 on alfalfa stubble, (33) 828.  
 tests, experimental error, (39) 830.  
 yields, (27) 734; (28) 533; (29) 32, 138; (34) 228; (40) 735.  
 yields in Australia, (38) 133.  
 yields in Chester Co., Pennsylvania, (39) 621.

- Oberea tripunctata*—  
 life history, (33) 861.  
 notes, (28) 156.  
*Obrussa* sp., notes, (37) 564.  
 Ocean spindrift and blown spray, effect on chlorin content of inland waters, (31) 813.  
 Ocean temperatures on California Coast, (28) 716.  
 Oceanic circulation and temperatures, (34) 615.  
 Oceanic noises, (34) 117.  
*Oceanodroma leucorhoa* subspp., notes (38) 556.  
 Oceanographical research, new instruments for, (37) 513, 807.  
*Ocellaria vanillae*, description, (27) 450.  
 Ochocho irrigation project, (35) 385.  
 Ochre as priming for paint, (33) 90.  
*Ochroma*—  
 lagopus, microscopical structure, (35) 241.  
 synopsis and new species, (40) 542.  
*Ochsen*a, analyses, (27) 767.  
*Oechthiphilinae*, synopsis, (29) 657; (30) 254.  
*Ocinara lewiniae*, injurious to horses, (26) 456.  
*Ocnerostoma piniariella*, notes (34) 855.  
 Octaacetylgentiobiose, notes, (31) 310.  
 Octalasiun cyanum, carbon dioxide exhalation of, (26) 619.  
*Octotoma plicatula*, notes (27) 347.  
 Ocular infections, dichloramin-T for, (39) 185.  
*Ocymum basilicum*, oil of, (36) 803.  
*Ocypteromima* n.g. and n.sp., description, (37) 359.  
 Odina woder, gums of, (31) 409.  
*Odonaspis ruthae* n.sp., description, (34) 357.  
*Odonata*—  
 biology, (39) 558.  
 of southern Minnesota, (32) 753.  
 review of investigations, (31) 452.  
*Odontia*—  
 sacchari and *O. saccharicola* n.spp., descriptions, (38) 649.  
 saccharicola, notes (40) 848.  
 saccharicola, studies, (38) 851.  
 spp. on sugar cane, (40) 157.  
*Odontobracon oemeovorus* n.sp., description, (38) 165.  
*Odontoglossum crispum*, culture, (34) 741.  
*Odontomerus strangaliae* n.sp., description, (38) 164.  
*Odontopharynx longicaudata* n.g. and n.sp., notes, (29) 360.  
*Odontria*—  
 puncticolis, n.sp., description, (31) 159.  
 spp., notes, (30) 554.  
 zealandica, notes, (28) 757.  
*Odynerus chevrieranus*, parasitic on *Cochylis ambigua*, (27) 263.  
*Oecanthus*—see also Tree crickets.  
 spp., notes, (29) 354.  
 spp., studies, (31) 649; (33) 653.  
*Oeceticus*—  
 omnivorus, notes, (38) 257.  
 platensis, control by parasites, (40) 855.  
 platensis, notes, (27) 559.  
 platensis, remedies, (38) 658.  
*Oecodoma cephalotes*, studies, (31) 656.  
*Oecophora sulphurella*, notes, (27) 552.  
*Oecophyllembus neglectus*, enemies of, (28) 560.  
*Oedaleus nigrofasciatus*, destruction by *Coccobacillus acidiorum*, (33) 154.  
*Oedonometer*, description, (35) 28.  
*Oedemagena*—  
 tarandi, notes, (30) 457.  
 terrae novae n.sp., description, (30) 457.  
*Oedionychis sexamaculata*, notes, (37) 255.  
*Oedipoda nebrascensis*, see *Dissosteira longipennis*.  
*Oedipodinae*, egg-laying habits, (39) 656.  
*Oedocephalum* (*Botrytis*) *anthophilum* n.sp., description, (36) 748.  
*Oemethylus triangularis*, notes, (26) 657.  
*Oenophthira pilleriana*—  
 notes, (27) 57; (34) 63.  
 parasites of, (35) 659.  
*Oenothera*—  
 absence of apogamy in, (30) 631.  
 as affected by climate, (28) 733.  
 biennial habit, constancy, (29) 424.  
 biennis—  
 fasciation in, (39) 330.  
 mutation coefficient of, (33) 129.  
 parallel mutations in, (28) 39; (32) 131.  
 stomatal movement in, (26) 627.

## Oenothera—Continued.

- breeding experiments, (34) 732; (39) 527, 632, 825.
  - dimorphic mutants, (37) 131.
  - embryo sac and fertilization, (40) 521.
  - factors affecting development, (26) 728.
  - genetical studies, (32) 326.
  - germ plasma as affected by chemicals, (39) 30.
  - gigantism and tetraploidy in, (29) 321.
  - gigas, origin, (28) 40.
  - grandiflora of herbarium of Lamarck, (32) 822.
  - hybrid contamination in, (32) 521.
  - hybridization experiments, (38) 28, 331.
  - hybrids, dwarfs in, (35) 330.
  - hybrids, segregation of characters in, (30) 730.
  - hybrids, studies, (32) 628.
  - inheritance of characters in, (34) 823.
  - lamarckiana—
    - as nuclear chimera, (39) 226.
    - origin, (29) 135; (31) 523.
    - semigigas, notes, (28) 40.
    - variability of, (28) 430.
  - mass mutations and twin hybrids, (40) 132.
  - mutilage of, (40) 819.
  - mutants with diminutive chromosomes, (37) 433.
  - mutation in, (31) 35; (32) 426; (33) 28, 129, 221, 524, 630; (34) 629; (35) 128; (36) 222; (37) 328, 724; (39) 527, 632.
  - mutational characters, relation to cell size, (40) 323.
  - nanella—
    - dimorphism in, (27) 30.
    - notes, (27) 528.
    - symbiosis with fungi, (27) 751.
  - negative correlation in, (32) 521.
  - rubricalyx, origin and behavior, (34) 226.
  - seeds, germination, (34) 135.
  - segregation in, (39) 123, 825.
  - spp. in forest of Fontainebleau, (32) 726.
  - sterility and delayed germination in, (35) 223.
  - twin hybrids in, (37) 820.
  - variation in, (37) 525.
- Oesophagodontus robustus, notes, (39) 686.
- Oesophagostomum—
- biramosum, notes, (27) 259.
  - columbianum, life history and structure, (29) 476.
  - columbianum, notes, (27) 182; (37) 779.
  - spp. in Philippines, (37) 277.
  - spp., notes, (29) 287.
  - venulosum, destructive to deer, (26) 653.
- Oestridae, notes, (27) 53, 656.
- Oestrinae of Africa, (38) 263.
- Oestrinae of Brazil, (40) 458.
- Oestrous cycle—
- in the guinea pig, (40) 467.
  - ovarian factor in, (32) 861.
- Oestrus—
- effect on milk and butter production, (34) 670.
  - in swine, (40) 663.
  - macropi n.sp., notes, (29) 761.
  - ovis, life history and remedies, (29) 761.
  - ovis, notes, (26) 781; (27) 182; (29) 856.
- Offals, analyses, (26) 809.
- Office of Experiment Stations, Office of Farm Management, etc., see United States Department of Agriculture.
- Official Dairy Instructors' Association, (35) 799.
- Ohia lehua trees of Hawaii, (38) 45.
- Ohio—
- Engineering Society, report, (36) 384.
  - State Grange, Columbus, meeting, (26) 1.
  - State University, notes, (28) 397, 797; (27) 199, 398, 699, 799; (28) 397, 797; (29) 98, 398, 700; (30) 95, 397, 798; (31) 198, 399, 797, 900; (32) 198, 397, 798; (33) 399, 796; (34) 199, 296, 496; (35) 97, 197, 597, 900; (36) 99, 500, 899; (37) 98, 498, 797; (38) 499, 700; (39) 300; (40) 498, 698.
- Station—
- anniversary, (29) 106.
  - county experiment farm reports, (39) 799.
  - exhibit at county fairs, (26) 299.
  - financial statement, (26) 299; (29) 793.
  - monthly bulletin, (39) 94, 299, 598, 799, 899; (40) 198, 296, 397, 694, 797.
  - notes, (26) 800, 397, 695; (27) 99, 493, 799; (28) 797; (29) 98, 196, 398, 700; (30) 95, 798; (32) 397, 798; (33) 399, 796; (34) 199, 296, 695; (35) 400, 597; (36) 196, 696; (37) 98, 498, 797; (39) 97, 600.

## Ohio—Continued.

- Station—Continued.
- report, (31) 98; (32) 796; (34) 494; (36) 195; (38) 197; (40) 198.
  - report of director, (26) 299; (29) 793.
  - Valley flood of March-April, 1913, (30) 18.
- Oidiomycosis in cattle, (38) 179; (40) 88.
- Oidiopsis taurica, conidiophores of, (27) 351.
- Oidium—
- agatidis n.sp., description, (30) 51.
  - alphitoides, notes, (27) 351.
  - begoniae n.sp., description, (27) 848.
  - caricae, notes, (29) 243.
  - citri, notes, (38) 849.
  - ericinum, notes, (27) 649; (29) 49.
  - euonymi japonici, notes, (37) 550.
  - euonymi japonici, treatment, (37) 246.
  - farinosum, notes, (28) 447.
  - farinosum, parasite of, (31) 544.
- Lactis—
- action on phenylaminoacetic acid, (33) 503.
  - as affecting butter, (39) 785.
  - assimilation of atmospheric nitrogen by, (30) 629.
  - assimilation of nitrogen by, (28) 35.
  - biology, (40) 518.
  - growth in different media, (28) 824.
  - growth in presence of salt, (32) 176.
  - isolation from cheese, (26) 479.
  - itinerary in butter manufacture, (39) 78.
  - notes, (26) 881.
  - protein synthesis by, (27) 525.
  - solani n.var., description, (32) 644.
  - varieties of, (28) 276.
- quercinum—
- in northern France, (31) 546.
  - notes, (30) 653, 746.
  - on chestnut, (38) 455.
- resistance of oaks to, (40) 253.
- sp., notes, (27) 40.
- sp. on carnations, (36) 547.
- sp. on *Photinia serrulata*, (36) 546.
- sp. on sweet peas, (32) 446.
- tingitaniun n.sp., description, (34) 447.
- treatment, (26) 345.
- tuckeri—
- notes, (28) 245; (33) 845; (35) 550.
  - occurrence in Poland, (26) 845.
  - studies, (30) 845.
  - treatment, (28) 851; (34) 748, 841.
- use of powdered fungicides against, (30) 651.
- Oiketicus poeyi, notes, (27) 756.
- Oil—
- adulteration, detection, (28) 412.
  - adulteration, determination, (26) 114.
  - antisepsics, germicidal power, (40) 882.
  - avocado, digestibility, (40) 763.
  - bearing seeds of Philippines, (35) 312.
  - burning in boiler furnaces, (26) 384.
- cake—
- analyses, (30) 67.
  - export from India, (33) 327.
  - fertilizing value, (27) 336; (38) 433.
  - for cows, (29) 577.
  - meal, methods of analysis, (29) 311.
  - meals, analyses, (30) 270.
  - mold fungi in, (31) 377.
- cakes—
- availability of phosphoric acid in, (26) 428.
  - Chinese, analyses, (35) 523.
  - composition and use, (27) 727.
  - effect on milk, (28) 674.
  - feeding value, (38) 572.
  - methods of analysis, (29) 311.
- Chinese wood, polymerization, (34) 607.
- content of egg yolk, (26) 67.
- content of papilionaceous seeds, (27) 716.
- crops, variety tests, (39) 433.
- determination in foliage, (36) 710.
- determination in grains, (29) 507.
- drying, from oilteica, (39) 609.
- effect on fertilizing value of street sweepings, (27) 629.
- emulsion dips, notes, (30) 778.
- emulsion, preparation and use, (29) 585; (31) 740; (37) 143.
- emulsions, use with lime-sulphur, (40) 453, 454.
- extraction apparatus, description, (39) 9.
- extraction by aspiration, (30) 115.
- from aleurone cells of grain, (40) 714.
- apple and pear seeds, (40) 511.

## Oil—Continued.

- from cactus, (33) 234.
  - Camelia drupifera, (39) 501.
  - cherry pits, (39) 8.
  - dogfish, (32) 424, 722.
  - dogfish liver, analyses, (39) 712.
  - fruit seeds, (40) 511, 614, 803.
  - gourd seed, (39) 9.
  - hops, chemistry of, (31) 201.
  - loganberries, (39) 412.
  - manatee blubber, (40) 862.
  - Mgongo nuts, (40) 803.
  - Para rubber seed, (39) 417.
  - raisin, currant, and tomato seeds, (40) 803.
  - raisin seed, (39) 615.
  - rice pollshings, (39) 109.
  - sunflower seed, (40) 533.
  - fuel, tests, (28) 486.
  - globules, elaboration in *Iris germanica*, (34) 524.
  - heavy, as fuel for engines, (30) 188.
  - hydrogenated, digestibility (34) 659.
  - in sandalwoods, (33) 444.
  - industry, statistics, (39) 9.
  - insecticides, effect on citrus fruits, (29) 354.
  - inspectors, charts for, (38) 492.
  - laws in Wyoming, (31) 259.
  - leaf, of Douglas fir, (31) 201.
  - mustard, metabolism, (39) 668.
  - mustard, skin lesions caused by, (39) 585.
  - of black sage, investigations, (33) 202.
  - of cassia, constituents of, (34) 501; (40) 202.
  - of chenopodium—
    - composition, (28) 506.
    - effect on circulation and respiration, (34) 476.
    - effect on intestinal contractility, (34) 381.
    - studies, (39) 585.
  - of citronella, effect on fruit flies, (28) 455.
  - cloves, determination, (29) 798.
  - cloves, larvicidal value, (34) 359.
  - cotton plant, studies, (39) 411.
  - Douglas fir, composition and properties, (27) 115.
  - lavender, detection in ethyl alcohol, (29) 312.
  - lemon, adulteration, (28) 461.
  - rosemary, detection in ethyl alcohol, (29) 312.
  - orchard heating, use against wild garlic, (31) 739.
  - palm, notes, (40) 449, 542.
  - palm of tropical Africa, studies, (31) 143.
  - palm, propagation and yields, (37) 835.
  - palms, improvement, (28) 736.
  - palms, insects affecting, (33) 153.
  - plants, culture experiments, (31) 733.
  - plants of Indo-China, (37) 830; (40) 333.
  - pressure method for soil solution, (39) 20.
  - rot, studies, (27) 850.
  - seed crops for Rhodesia, (40) 333.
  - seed plant, culture experiments, (39) 229.
  - seeds—
    - and feeding cakes, treatise, (34) 565.
    - breeding experiments, (38) 526.
    - culture experiments, (38) 526; (39) 229.
    - determining oil content, (40) 803.
    - from American palms, (36) 803.
    - Indian trade in, (40) 231.
    - new, analyses, (39) 802.
    - of Brazil, (37) 511.
    - of British tropical dependencies, (31) 234.
  - sprays, preparation and use, (31) 63.
  - tractors for the farm, (29) 893.
- Oils—see also Fats, Corn oil, Cottonseed oil, etc.
- acetyl number, determination, (31) 713.
  - and fats—
    - edible, (39) 366, 411.
    - for the diet, (40) 863.
    - handbook, (40) 804.
    - methods of analysis, (40) 312.
    - methods of analysis, handbook, (39) 207, 504.
    - of French colonies, saponification, (39) 411.
    - optical dispersion, (40) 113.
    - production and conservation in United States, (40) 614.
    - specific heat, (40) 68.
    - technical handbook, (39) 8.
    - Valenta test, (39) 110, 504, 805.
  - animal, effect of free fatty acids on, (34) 312.
  - attractiveness for fruit flies, (32) 153.

## Oils—Continued.

- carotin in, (39) 713.
- chemical technology of, (29) 413.
- chemistry of, (31) 201.
- color tests, (37) 13.
- crude, as preservative for poles, (26) 644.
- crude, evaporation, (26) 644.
- determination—
  - in extracts, (27) 499.
  - of saponification value, (34) 410.
  - of specific gravity, (35) 806.
  - of unsaponifiable matter in, (33) 17, 506; (37) 805.
- edible, analyses, (32) 762.
- edible, chemistry of, (35) 9.
- edible, treatise, (26) 258.
- effect on concrete, (29) 184, 891.
- effect on mold growth, (26) 206.
- essential—
  - chemistry of, (36) 12.
  - determination, (26) 113; (34) 808.
  - determination in alcoholic solutions, (26) 99.
  - determination in flavoring extracts, (39) 505.
  - determination in mustard, (30) 114.
  - determination in spices, etc., (29) 309.
  - determination of iodine number, (35) 112.
  - formation in relation to light, (33) 726.
  - from limes and lemons, (33) 540.
  - in India, (38) 8.
  - methods of analysis, (27) 205.
  - of Australian Myrtaceae, (36) 710.
  - of eucalypts, (33) 646.
  - relation to sap flow, (27) 133.
  - rôle of oxidases in, (28) 129.
  - use in preparation of vaccine, (35) 380.
- etheral—
  - in spruce wood, (29) 504.
  - of Dutch East Indies, (30) 697.
  - of Russia, (36) 803.
- examination, (28) 565.
- fatty—
  - and essential, notes, (35) 9.
  - deodorizing, (39) 508.
  - notes, (37) 109.
  - refractive indexes, (27) 614.
- fish-liver, nutritive value, (40) 66.
- for internal combustion engines, (29) 892.
- from horsemint and ajowan seed, (39) 712.
- from seed, digestibility, (39) 571.
- glycerids of, (32) 801.
- hardened, digest of data, (31) 856.
- hardened or solidified, notes, (28) 616.
- hardening by hydrogenation, (28) 762.
- heat of bromination, (34) 803.
- hydrocarbon, treatise, (30) 313.
- hydrogenated—
  - analytical constants, (32) 416.
  - as human food, (32) 660.
  - properties, (34) 9.
- hydrogenation, (29) 413, 459; (36) 414.
- hydrogenation, treatise, (32) 416.
- illuminating, law in Wyoming, (27) 767.
- in cookery, (35) 366.
- insecticidal value, (27) 755.
- inspection in Iowa, (36) 762.
- inspection in Wisconsin, (35) 471.
- laboratory handbook, (29) 811.
- law in Oregon, (35) 471.
- law in Wyoming, (35) 663.
- laws in Ohio, (33) 261.
- lubricating, for internal combustion engines, (32) 86.
- methods of analysis, (26) 202; (30) 314; (31) 509; 806; (32) 314; (33) 258; (35) 205; (36) 205; (38) 206, 804.
- mineral, see Mineral oils.
- miscible, effect on dormant trees, (29) 354.
- miscible, effect on trees, (33) 252.
- nut, digestibility, (38) 867.
- of British tropical dependencies, (31) 234.
- Coniferae, (33) 18, 203, 409; (34) 607.
- Dutch East Indies, (30) 697.
- Malvaceae, (36) 803.
- oxygen absorption by, (29) 613.
- petroleum, fractionating apparatus, (39) 414.
- physical and chemical constants, (36) 502.
- physical constants, (32) 300.
- plant, of Russia, (36) 802.

## Oils—Continued.

- production in plants, (33) 629.
- rancid, evaluation, (37) 114.
- sampling, (38) 206, 804.
- soluble, insecticidal value, (37) 53.
- spontaneous combustion, (37) 788.
- storage changes in, (36) 502.
- sulphonated, methods of analysis, (35) 316.
- sulphuric acid or Maumené number, (37) 805.
- technology and analysis, treatise, (34) 507.
- testing, (37) 13.
- tests, (26) 202, 539.
- treatise, (30) 310.
- use on roads, (35) 288; (37) 490.
- varnish, estimating, (39) 613.
- vegetable—
  - accessory growth substance in, (38) 265.
  - and fats, edible, treatise, (28) 511.
  - bromin absorption by, (29) 612.
  - composition in relation to climate, (37) 418.
  - hydrogenation, (29) 413.
  - hydrolysis and constitution, (27) 804.
  - molecular weights, (35) 312.
  - of India, (29) 413.
  - production and consumption in United States, (40) 614.
  - systematic arrangement, (33) 630.
- viscosity, determination, (39) 716.
- volatile—
  - determination in citrus fruits, (38) 11.
  - determination in liquors, (35) 111, 717.
  - production from wild plants, (26) 612.
  - treatise, (30) 310, 710.
  - wood preserving, antiseptic tests, (29) 111.
- Oistus edmonstoni n.sp., description, (40) 655.
- Oiticica oil, properties, (39) 609.
- Oka Agricultural Institute, Quebec, (32) 895.
- Okanagana viridis n.sp., description, (40) 856.
- Oklahoma—
  - College, notes, (27) 699; (28) 698, 798; (29) 196, 398, 900; (31) 300, 696; (32) 95, 397, 497; (33) 99, 700; (34) 97; (35) 197; (36) 797; (37) 399, 797; (38) 98; (39) 300, 400; (40) 98, 498.
  - Station, financial statement, (27) 299; (28) 695.
  - Station, notes, (26) 397, 699; (27) 699; (28) 698; (29) 398; (31) 300, 696; (32) 95, 397, 497, 798; (33) 99; (34) 296; (36) 797; (37) 399, 797; (38) 98, 600; (39) 300, 400; (40) 98.
  - Station, report, (30) 598; (40) 97, 694.
  - Station, report of director, (27) 299; (28) 695.
- Okra—
  - breeding experiments, (36) 839; (39) 747.
  - culture experiments, (37) 742.
  - culture in Porto Rico, (36) 341.
  - caterpillar, life history, (38) 502.
  - disease, new, studies, (39) 649.
  - disease, notes, (30) 149.
  - fertilizer experiments, (37) 742.
  - heredity in (27) 740; (28) 740; (32) 538.
  - insects affecting, (29) 653.
  - seed, impermeable, viability, (35) 740.
  - Verticillium wilt, studies, (33) 244.
  - wilt, description, (26) 844.
  - wilt disease, studies, (38) 851.
  - wilt diseases, notes, (31) 343.
- Oleaginous fruits, formation of fats in, (26) 801; (29) 201.
- Oleander—
  - bacteriosis, notes, (30) 751; (36) 453.
  - canker, description, (37) 252.
  - canker, description and treatment, (29) 156.
  - poisoning in horses, (34) 780.
  - scale, notes, (28) 834; (29) 654; (32) 56.
  - scale on olive, (38) 157.
- Oleanders—
  - crown gall affecting, (28) 447.
  - destruction by black scale, (26) 555.
  - sap, bark, and seeds of, (28) 202.
- Oleaster, Russian, notes, (29) 441.
- Oleate, proflavin, in wound treatment, (40) 882.
- Oleic acid—
  - and cottonseed oil, hydrogenation of, (34) 10.
  - oxidation in sunlight, (32) 762.
  - relation between iodine value and structure, (28) 806.
  - separation from fatty acids, (26) 112.
- Olein content of egg yolk, (26) 67.
- Oleo—
  - decision of New York Supreme Court, (28) 277.

## Oleo—Continued.

- oil, accessory growth substance in, (38) 265.
- oil, refractive index, (27) 615.
- Oleomargarine—see also Margarin.
  - analyses, (39) 366.
  - color standard, (27) 575.
  - detection of color in, (35) 278; (36) 16; (39) 416.
  - industry in United States, (35) 278.
  - law in Illinois, (29) 61.
  - manufacture, (29) 770.
  - manufacture in Canada, (28) 278.
  - sale in Pennsylvania, (32) 763.
  - treatise, (31) 176.
  - use of fish oil in, (33) 363.
  - viscosity, (31) 209.
- Oleoresins—see also Resins.
  - chemistry and technology, (39) 8.
  - of Douglas fir, (37) 411.
  - of western pines, (28) 512; (31) 744.
- Oleostearin, refractive index, (27) 615.
- Olericulture as field for study, (39) 542.
- Olesicampa flaviventris, notes, (28) 249.
- Olethreutes—
  - frigidana, notes, (32) 448.
  - (Grapholitha) schistaceana, notes, (34) 758.
  - hebesana, studies, (33) 255.
  - hemidesma, notes, (39) 361.
  - oblongana, notes, (35) 463.
  - variegana, studies, (40) 551, 653.
- Oleum lauri as an insectifuge, (26) 755.
- Oleuropéine, notes, (32) 209.
- Olibrus sp., destruction by white fungus, (26) 454.
- Oligia fractilinea, see Ifadena fractilinea.
- Oligoclast, decomposition by soil bacteria and yeast, (31) 121.
- Oligosita—
  - giraulti n.sp., description, (30) 256.
  - giraulti, notes, (30) 251.
  - oophagus n.sp., description, (36) 259.
  - sanguinea claripes n.sp., description, (34) 556.
- Oligota oviformis—
  - notes, (28) 457.
  - parasitic on red spider, (32) 157.
- Oligotrophariæ of New York, (34) 752.
- Oligotropus alopecuri, notes, (37) 463.
- Olive—
  - bacteriosis, treatment, (27) 251.
  - blooms, toxic action of sulphurous anhydrid on, (33) 447.
  - by-products, analyses and nutritive values, (28) 265.
  - diseases—
    - and insect pests, (34) 535.
    - manual, (39) 457.
    - notes, (26) 844.
    - studies, (26) 849; (33) 524.
    - treatise, (32) 344.
    - treatment, (26) 850.
  - exanthema or dieback, studies, (32) 238.
  - flower stigmas, dying, notes, (30) 245.
  - fly, feeding habits, (26) 252.
  - fly, notes, (32) 56.
  - fly, parasites of, (28) 560; (33) 658.
  - fly, remedies, (26) 252; (27) 58; (30) 254, 757; (31) 757; (35) 57.
  - forests in Punjab, (34) 535.
  - fruit fly, danger of introduction, (39) 467.
  - husks, detection in pepper, (26) 805.
  - industry in Corfu, (26) 138.
  - industry in Italy, (31) 142.
  - industry in Spain in 1915, (35) 744.
  - knot disease, dissemination, (27) 652.
  - knot, studies, (28) 54; (34) 241.
- oil—
  - adulteration, (31) 505.
  - analyses, (32) 762.
  - bleaching and decolorization, (29) 118.
  - detection, (27) 207; (29) 613.
  - detection of rape oil in, (39) 804.
  - digestibility, (36) 860.
  - examination, (26) 564.
  - extraction, (26) 414; (27) 744, 814; (30) 115; (32) 142.
  - homogenized, for infants, (34) 258.
  - humification, (38) 26.
  - index of refraction, (37) 508.
  - industry in Algiers, (37) 313.
  - industry in Spain in 1915, (35) 744.
  - industry, statistics, (39) 9.
  - ingestion, effect on metabolism, (28) 867.

- Olive—Continued.  
oil—continued.  
  manufacture, (27) 438.  
  physical constants, (35) 312.  
oil, production—  
  and use, (37) 511.  
  in Spain, (27) 344; (29) 439; (31) 238; (33) 539.  
  in Tunis, (31) 339.  
  in United States, (40) 614.  
oil—  
  rancidity, (32) 762.  
  refractive index, (27) 615.  
  residue as source of potash, (40) 422.  
  residue, fertilizing value, (40) 26.  
  rôle in glycogen formation, (31) 763.  
  stability, (39) 471.  
  standards for, (26) 564.  
  toxicity, (30) 479.  
paste, manufacture, (32) 209.  
pomace for pigs, (34) 74.  
pomace, utilization, (36) 809.  
scale, black, in Chile, (40) 651.  
scale, parasite of, (26) 655.  
seed, germination of, (32) 235.  
seedlings as affected by metallic salts, (26) 825.  
seedlings, growing and grafting, (35) 239.  
sooty mold, remedies, (36) 754.  
thrips, endophagus parasite of, (26) 553.  
weevil, nematode parasite of, (32) 453.
- Olives—  
  and oaks growing in close proximity, (35) 654.  
  as affected by cold storage, (29) 340.  
  bitter principles, (32) 209.  
  botanical studies and varieties, (39) 243.  
  chemistry of, (26) 801.  
  crown gall affecting, (28) 447.  
  culture, (27) 438; (29) 426; (32) 142; (34) 535.  
  culture—  
    in Austria, (32) 838.  
    California, (28) 839.  
    Crimea, (37) 144.  
    environs of Trapani, (35) 449.  
    southern Texas, (32) 539.  
    Spain, (27) 344; (29) 439; (31) 238; (33) 539; (37) 545; (39) 142, 447.  
    Tunis, (31) 339, 534.  
  destruction by black scale, (26) 555.  
  destruction by termites, (28) 563.  
  fertilizers for, (36) 538.  
  floral biology, (28) 743.  
  floral biology and pathology of, (33) 524.  
  food plant of purple scale, (26) 756.  
  freeze injury, notes, (39) 843.  
  graft hybrids, (39) 447.  
  immature, labeling, (36) 139.  
  improvement, (28) 736.  
  insects affecting, (27) 55, 357, 857; (30) 454; (34) 535; (35) 254; (38) 157; (40) 854.  
  newly planted, sun scald of, (35) 538.  
  nitrogen nutrition of, (35) 839.  
  oil content, (37) 43.  
  parthenogenesis in, (27) 241.  
  pickled, sizing, (32) 209.  
  pickling, (32) 142; (38) 617.  
  preservation, (26) 117.  
  preservation by lactic-acid fermentation, (29) 117.  
  propagation, (33) 540.  
  pruning in Italy, (27) 644.  
  sizing, (34) 740.  
  softening, (32) 209.  
  varietal standardization, (36) 537.  
  varieties, classification, (27) 145.
- Olivine, decomposition by soil bacteria and yeast, (31) 121.
- Olla abdominalis, notes, (31) 754.
- Olona as fiber plant, (40) 529.
- Olor columbianus of the Potomac, (40) 161.
- Olipidium—  
  brassicæ, notes, (37) 455.  
  viciae n.sp., description, (28) 649.
- Olpitrichum carpophilum, notes, (28) 648.
- Omiodes—  
  accepta, notes, (26) 758.  
  blackburni in Hawaii, (34) 59.  
  monogona, notes, (27) 155.
- Omissus murarios, notes, (38) 558.
- Ommatothrips n.g. and n.spp., descriptions, (34) 61.
- Omorga frumentaria, parasitic on fig moth, (26) 248.
- Omorgus—  
  n.spp., descriptions, (34) 363.  
  sp., notes, (28) 160.
- Omphalchrysocharis petiolatus n.sp., description, (39) 870.
- Omphale metallicus, notes, (30) 856.
- Omphalia flavida n.sp., notes, (30) 652.
- Omphalocera dentosa, notes, (26) 855; (30) 655.
- Onagraceæ—  
  hybrid contamination in, (32) 521.  
  interspecies crossing in, (35) 228.
- Oncocerca—  
  bovis in Madagasean cattle, (28) 182.  
  bovis, notes, (27) 83.  
  gibsoni—  
    control, (39) 862.  
    notes, (28) 680; (31) 182; (33) 154; (34) 581, 582.  
    parasitic in sheep, (27) 475.  
    studies, (26) 183; (32) 376, 377; (38) 82.  
    transmission, (37) 181.  
  larvae, migration through capsule of worm nodule, (34) 576.  
  spp., studies, (34) 582.
- Oncocerciasis—  
  bovine, etiology, (27) 785.  
  bovine, in Argentina, (38) 183.  
  bovine, in South America (37) 80.  
  in cattle, (34) 581, 582; (36) 883; (39) 589.  
  in imported meat, (27) 83.
- Oncideres—  
  cingulatus, notes, (27) 458; (37) 660; (38) 762.  
  cingulatus on pecan, (38) 157; (39) 557.  
  putator, studies, (33) 63.  
  texana, life history, (35) 661.
- Oncopsis sobrius, notes, (40) 57.
- Oncothrips tepperi n.g. and n.sp., description, (26) 60.
- Onion—  
  anthracnose, studies, (37) 841; (39) 754.  
  bacterial rot and damping off, (37) 452.  
  bacterial rot, notes, (40) 155.  
  black mold, notes, (37) 349.  
  bulb scales, permeability, (39) 223.  
  bulbs, transportation regulations, (30) 346.  
  couch, notes, (27) 35; (32) 121.  
  diseases in Ohio, (40) 747.  
  diseases, notes, (30) 647; (31) 747; (38) 648.  
  diseases, studies, (38) 249.  
  diseases, treatment, (39) 52.  
  flies, notes, (29) 454.  
  fly, barred-winged, notes, (34) 360.  
  fly, lunate, in New Jersey, (40) 654.  
  fly, lunate, notes, (28) 158.  
  Fusarium rot, notes, (36) 47.  
  industry in Barbados, (28) 828.  
  industry in California, (39) 345.  
  maggot—  
    imported, biology, (33) 746.  
    imported, notes, (29) 454; (36) 657; (40) 648.  
    life history and remedies, (33) 357; (34) 360.  
    notes, (26) 855; (27) 53; (31) 350; (34) 252.  
    remedies, (30) 160; (31) 757, 849; (33) 351; (38) 155, 863.  
  mildew, notes, (27) 349.  
  mildew, studies, (37) 553.  
  neck rot, control, (39) 754.  
  neck rot, studies, (35) 547; (38) 450.  
  pink root, notes, (37) 841; (40) 643.  
  scab, notes, (31) 539.  
  seed, germination tests, (25) 44.  
  seed, production, (27) 438; (33) 226.  
  seed, vitality, (36) 39.  
  seedlings, damping off disease of, (35) 44.  
  smut—  
    description and treatment, (27) 445; (29) 245.  
    notes, (36) 349.  
    prevention, (26) 299.  
    studies, (33) 344.  
    treatment, (31) 840; (32) 342; (33) 245.
- spot disease, treatment, (29) 245.
- thrips—  
  control, (40) 548.  
  description and remedies, (29) 453.  
  internal parasite of, (26) 858.  
  notes, (27) 53; (29) 252, 558; (30) 753; (31) 350; (32) 755; (34) 360, 652; (38) 556.  
  on leeks, (32) 553.  
  remedies, (30) 654.

- Onions—  
 alkali tolerance, (40) 719.  
 as affected by preceding crop, (40) 623.  
 ash analyses, (29) 861.  
 bacterial disease affecting, (26) 846.  
 Bermuda—  
 culture experiments, (29) 235.  
 culture in south Texas, (34) 437.  
 seed production, (38) 344.  
 breeding experiments, (37) 240; (39) 542.  
 carbon bisulphid for, (40) 619.  
 catalytic fertilizers for, (27) 629.  
 composition as affected by—  
 irrigation, (28) 333.  
 sodium salts, (29) 419.  
 cost of growing and marketing, (36) 192.  
 critical period of growing season, (39) 811.  
 culture, (26) 393; (27) 39; (31) 740, 836; (34) 41;  
 (36) 640; (40) 833.  
 culture—  
 experiments, (29) 137; (32) 132, 140; (33) 43;  
 (35) 341, 643; (37) 646, 742.  
 in Antigua, (36) 735.  
 Burma, (29) 736.  
 Connecticut Valley, (36) 840.  
 India, (32) 131.  
 on muck lands, (31) 533.  
 treatise, (33) 837.  
 under irrigation, (28) 839.  
 effect on following crop, (38) 337; (40) 623.  
 electrical stimulation, (40) 428.  
 fertilizer experiments, (26) 31; (28) 520; (30) 525;  
 (32) 635; (33) 43; (34) 532; (35) 338, 643; (36) 137;  
 (37) 215, 742; (38) 218, 540.  
 fertilizer requirements, (26) 818.  
 food value, (36) 863.  
 forcing by electricity, (26) 136.  
 growth as affected by sulphur, (29) 215.  
 growth on acid soil, (40) 324.  
 growth on partially sterilized soils, (35) 515.  
 insects affecting, (29) 453; (34) 360; (36) 152.  
 insects affecting in Antigua, (39) 556.  
 irrigation, (31) 782.  
 irrigation experiments, (28) 131, 134, 135; (29)  
 638.  
 liming experiments, (31) 820; (40) 134.  
 mulching v. clean culture, (33) 534.  
 nematodes affecting, (30) 448.  
 radioactive fertilizers for, (35) 628.  
 respiratory activity in sunlight, (34) 30.  
 ridge v. level culture, (33) 535.  
 storage, (34) 637; (39) 770.  
 sugar content as affected by drying, (29) 419.  
 value in the diet, (29) 664.  
 varieties, (30) 525; (31) 835; (33) 735; (34) 232;  
 (35) 643; (36) 137, 237; (37) 646.  
 variety tests, (40) 44.  
 wild, eradication, (27) 643; (31) 739.  
 wild, stock poisoning by, (40) 577.  
 Oniscus asellus, notes, (31) 758.  
 Onobrychis sativa, culture in Hawaii, (32) 730.  
 Ononis spp., analyses, (33) 466.  
 Onophilus n.g., description, (40) 614.  
 Ontario—  
 Agricultural College and Experimental Farm,  
 notes, (32) 392.  
 Corn Growers' Association, report, (30) 37.  
 department of agriculture, fruit branch, report,  
 (27) 39.  
 Good Roads Association, proceedings, (29) 291.  
 Onychothrips, new genus, description, (26) 60.  
 Ooconus quadricarinatus n.sp., description, (36)  
 259.  
 Oocytase, isolation, (26) 877.  
 Oocytase, nonenzymatic character, (28) 876.  
 Oocytin, studies, (39) 502.  
 Ooencyrtus—  
 chrysopoe n.sp., description, (31) 554.  
 clisocampae, notes, (36) 556.  
 pacificus n.sp., notes, (35) 464.  
 pyrillae, n.sp., description, (36) 556.  
 sp., notes, (29) 658.  
 sp., parasitic on tent caterpillar, (37) 667.  
 Oolitic deposits of Department of Yonne, (26) 519.  
 Oomyces, spore germination and infection in, (26)  
 342.  
 Oophorectomy, paper on, (29) 500.  
 Oophthora semiblidis—  
 artificial breeding, (30) 756.  
 biology, (31) 62.  
 notes, (26) 557.
- Oospora—  
 casei n.sp., notes, (28) 276.  
 citri-aurantii, notes, (37) 843.  
 favorum, notes, (28) 562.  
 lactis, see Oidium lactis.  
 oryzaetorum n.sp., notes, (37) 148.  
 piricola n.sp., description, (37) 250  
 scabies, see Potato scab.  
 Ootetrastichus in Hawaii, (40) 854.  
 Opatrum—  
 aequale, notes, (31) 757.  
 crenatum, notes, (29) 858.  
 depressum, studies, (40) 854.  
 sp., notes, (29) 853.  
 Operative technique, discussion, (26) 373.  
 Ophiderma spp. in United States, (38) 764.  
 Ophidia, wounds and diseases, (40) 55.  
 Ophiobolus—  
 graminis, notes, (27) 747, 748; (28) 646; (30) 148,  
 748; (32) 642; (34) 845; (37) 248; (38) 48, 648.  
 graminis, treatment, (35) 750.  
 herpoticus  
 conidial form, (32) 843.  
 notes, (28) 52, 445; (29) 244; (30) 541; (37) 248.  
 studies, (31) 542.  
 oryzae n.sp., notes, (37) 148.  
 sp., notes, (31) 147.  
 spp., notes, (29) 243; (30) 349, 648.  
 Ophiochaeta (Ophiobolus) graminis n.comb., notes,  
 (38) 648.  
 Ophionectria—  
 coccicola, notes, (28) 453; (29) 852; (30) 455.  
 coccicola on purple scale, (38) 157.  
 tetraspora n.sp., notes, (30) 455.  
 Ophioninae, generic corrections, (34) 362.  
 Ophionini, revision, (27) 662.  
 Ophthalmia nodosa, notes, (27) 861.  
 Ophthalmia, periodic, (39) 283.  
 Ophthalmic mallein eye dropper, description, (32)  
 580.  
 Ophthalmic reaction, diagnostic value, (26) 283;  
 (28) 880; (29) 586.  
 Ophthalmology—  
 for veterinarians, (31) 376.  
 for veterinarians, treatise, (29) 377.  
 textbook, (27) 284.  
 Ophya—  
 leucostoma, "critical" point for, (36) 256.  
 nigra, notes, (38) 466.  
 Opiinae, North American, revision, (34) 454.  
 Opiosthorchis felinus, infection of pigs with, (38) 82.  
 Opium—  
 poppy blight, studies, (38) 547.  
 production in Spain, (36) 743.  
 Opus—  
 anastrephae n.sp., description, (30) 256.  
 anthomyiae, notes, (28) 752.  
 (Biosteres) sp., parasitic on bud moth, (34) 250.  
 euthyrrhini n.sp., description, (28) 162.  
 fletcheri, introduction into Hawaii, (37) 162.  
 humilis—  
 in Hawaii, (32) 757.  
 notes, (34) 556.  
 parasitic on fruit fly, (37) 856.  
 studies, (38) 659, 767; (40) 459.  
 n.spp., descriptions, (29) 359; (34) 454; (38) 165.  
 spp., parasitic on fruit flies, (31) 456.  
 tryoni n.sp., description, (28) 162.  
 tryoni, notes, (26) 150.  
 (Utetes) anastrephae n.sp., notes, (29) 652.  
 Opossum—  
 dissemination of anthrax by, (28) 678.  
 new, from Panama, (37) 757.  
 Opostega and its larval affinities, (40) 757.  
 Opsine, growth of bacteria in, (39) 888.  
 Oposnic—  
 index, determination, (26) 85, 180.  
 technique, sources of error in, (28) 675.  
 Oponins—  
 and tropins, bacterial, notes, (32) 78.  
 determination in horse serum, (27) 182.  
 notes, (26) 676; (27) 882.  
 of normal serums, (33) 178.  
 Optical—  
 atmospheric disturbance of 1912-13, (31) 615.  
 methods for identification of organic com-  
 pounds, (39) 415, 506.  
 Opuntia—see also Cacti and Echinocactus.  
 arbuscula, root habits, (26) 728.  
 blakeana and Cissus laciniata, structural rela-  
 tionship, (28) 332.

## Opuntia—Continued.

- coccinellifera, culture experiments, (30) 632.
  - discata, density of cell sap, (32) 34.
  - floccosa, description, (37) 434.
  - fruits, persorption and multiplication of, (34) 430.
  - monacantha, destruction by Coccus, (39) 559.
  - mulilage of, (40) 819.
  - parasitic on Carnegiea, (39) 148.
  - parvula as host of mistletoe, (29) 352.
  - rate and course of growth, (40) 30.
  - root growth in relation to oxygen, (40) 30.
  - sp., carbohydrate content, (39) 224.
  - spp. as ornamentals, (40) 640.
  - spp., behavior under cultural conditions, (30) 336.
  - spp., descriptions, (33) 231.
  - spp., diseases affecting, (26) 551.
  - spp., insects affecting, (27) 357.
  - spp., root systems, (30) 827.
  - spp., wound periderm in, (40) 728.
  - stems, autonomic movements, (32) 429.
  - transpiring power, (35) 733.
  - water absorption and evaporation, (40) 27.
- Orach, insect and arachnid enemies of, (29) 853.
- Orange—
- black rot, notes, (29) 248; (40) 839.
  - black spot and brown spot, treatment, (37) 352.
  - black spot, notes, (34) 644.
  - blossom-end rot, cause, (35) 749.
  - brown spot, notes, (28) 639.
  - chlorosis, notes, (28) 153.
  - die-back, studies, (33) 55.
  - die-back, treatment, (31) 749.
  - diseases, notes, (26) 138; (39) 152, 253.
  - eruptive disease or "exanthema", notes, (27) 850.
  - extract, methods of analysis, (35) 417.
  - fruit scab, notes, (31) 539.
  - groves, Argentine ant in, (39) 156.
  - gummosis, cause, (27) 350.
  - gummosis, notes and treatment, (28) 651; (29) 351.
  - juice, antiscorbutic activity, (40) 272.
  - juice, osmotic pressure, (28) 262.
  - juice, preparation, (33) 316; (37) 313.
  - leaf blotch, notes, (31) 539.
  - leaves as affected by cement dust, (35) 313.
  - maggot, notes, (26) 860; (29) 759.
  - mal di gomma, studies, (33) 550.
  - melanose, investigations, (29) 242.
  - moths, notes, (30) 252.
  - mottle-leaf, cause, (27) 251.
  - mottle-leaf, prevention, (36) 841.
  - oil, manufacture, (36) 207.
  - oil, production, (36) 416.
  - papilio and its natural enemy, (40) 62.
  - peel as an antiscorbutic, (40) 70.
  - peel, pectins of, (29) 608.
  - pest, new, (40) 169.
  - root rot in Tripoli, (40) 851.
  - rot, studies, (29) 248.
  - scab, notes, (30) 47.
  - scale—
    - fumigation, (39) 463.
    - notes, (28) 158.
    - on olive, (38) 157.
    - studies, (26) 553.
  - scaly bark, treatment, (34) 240.
  - seed, China, agglutinating properties, (31) 774.
  - seeds, oil from, (38) 111.
  - skins, analyses, (38) 626.
  - stocks, distinguishing, (28) 145.
  - thrips—
    - notes, (28) 853.
    - on olive, (38) 157.
    - remedies, (27) 555.
    - studies, (38) 763.
  - tortrid, cork-colored, notes, (26) 150.
  - Tortrix causing decay, (39) 159.
  - tree rot, notes, (31) 646.
  - vinegar and wine, manufacture, (30) 814.
  - vinegar, manufacture, (40) 715.
  - wintertip, description, (30) 746.
  - wintertip, notes, (34) 241.
- Oranges—
- acidity, (33) 441.
  - acidity in relation to maturity, (34) 235.
  - African cherry, studies, (30) 643.
  - and lemons, hybrid between, (33) 441.

## Oranges—Continued

- and pomelos, hybrid between, (33) 441.
- as affected by factory smoke, (27) 831.
- asexual reproduction of seeds, (31) 533.
- blood, dry strain, (39) 142.
- blood, in Caltagirone, (33) 540.
- bright v. russet fruit of, (34) 535.
- bud selection, (40) 151.
- bud variation, (39) 142, 447, 448.
- cause of rotting in, (33) 150.
- changes in during ripening, (29) 641.
- China, seeds of, (32) 613.
- composition as affected by fertilizers, (37) 649.
- cost of production in California, (26) 541.
- crown gall affecting, (28) 447.
- culture, (27) 438; (29) 745; (36) 538.
- culture—
  - experiments, (40) 339.
  - in Alabama, (39) 143.
  - in Montevideo, (30) 533.
  - in southern Texas, (32) 539.
  - treatise, (37) 835.
- decay in transit, (32) 745.
- descriptions (27) 745.
- effect of adjacent leaf area, (39) 541.
- effect on composition of urine, (31) 761.
- enemies of, (28) 352.
- factors affecting maturity, (36) 139.
- fertilizer experiments, (27) 320; (32) 233; (36) 642, 841.
- Florida, composition, (29) 462.
- food plant of purple scale, (26) 756.
- formation of so-called navel in, (28) 524.
- frost protection, (37) 649.
- frosted, detection and elimination, (40) 446.
- frosted, separation, (27) 146.
- frozen, changes in, (40) 539.
- frozen, composition, (34) 365, 502.
- fruit resembling, on lemon, (40) 151.
- fruiting thorn, (40) 151.
- grafting experiments, (32) 233.
- growth in relation to soil moisture, (38) 541.
- host plant of fruit fly, (26) 758.
- hybridization, (31) 48.
- improvement by bud selection, (35) 647.
- insects affecting, (26) 138; (27) 438, 453; (39) 557.
- irrigation, (38) 541.
- irrigation experiments, (36) 841.
- jelly from, (34) 207.
- June drop, (37) 154.
- katydid affecting, (33) 451.
- manuring, Bahian method, (38) 845; (40) 246.
- marketing, (27) 539.
- maturity and wholesomeness, (36) 561.
- maturity in, (34) 235.
- maturity standards, (37) 345, 649.
- mulching experiments, (38) 814.
- navel—
  - analyses, (36) 743.
  - bud mutations in, (34) 43.
  - bud variations in, (36) 141.
  - culture in Brazil, (36) 241.
  - history and culture, (36) 743.
  - improvement by bud selection and top working, (34) 639.
  - June drop, (37) 834; (38) 757.
  - origin and development, (34) 43.
  - pruning, (36) 141.
  - relation of washing to decay in, (33) 737.
  - seedlessness, (39) 243.
  - splits of, (26) 138.
  - variation in, (27) 841.
- nematodes affecting, (34) 354.
- new, description, (31) 337.
- of Florida, composition, (30) 740.
- oil and press cake from seeds, (40) 803.
- packing experiments, (29) 637.
- Porto Rican, handling, (32) 745.
- precooling and handling, (32) 234.
- protection against frost, (27) 115, 145.
- pruning experiments, (38) 43.
- Satsuma—
  - culture, (26) 138; (39) 244.
  - culture experiments, (28) 236.
  - freeze injury, (39) 143.
  - navel variety, (40) 246.
  - varieties, (40) 342.
- scale insects affecting, (27) 455.
- shipping experiments, (30) 841.
- sorting device for, (28) 641.

## Oranges—Continued.

- spotting, (35) 50.
- spraying, cost data, (36) 55.
- stocks for, (33) 736.
- sugar and acid content, (29) 641.
- thornless strains, (40) 151.
- total solids and acidity of, (34) 661.
- Valencia, (39) 448.
- Valencia, variation in, (35) 344.
- variability of yield, (38) 744.
- varieties in, (27) 441.
- varieties, (38) 40.
- wart-like excrescences on leaves of, (30) 48.
- Washington navel, (39) 447.
- Washington navel, fruit shedding, (40) 839.
- waste, utilization, (30) 316, 814.
- yield as affected by humus content of soils, (38) 814.

## Orang-outangs, chromatid bodies in erythrocytes % of, (29) 478.

Oranilla coffeicola, notes, (38) 51.

Orasema viridis, development, (27) 262.

## Orchard—

- bark beetles, notes, (36) 258.
- bark beetles, studies, (31) 852.
- crop diseases, notes, (28) 450.
- crops, insects affecting, (28) 450.
- diseases—
  - and insect pests, control, (35) 461.
  - in Pennsylvania, (35) 351.
  - in Turkestan, (36) 647.
  - notes, (27) 45; (28) 47, 642, 645, 841; (30) 647.
- ermine moths, notes, (36) 549.
- fruits—
  - culture, (27) 144.
  - fertilizer experiments, (27) 144.
  - insects affecting, (27) 344.
  - notes, (27) 537.
  - spraying, (27) 144.
- grass—
  - as affected by number of cuttings, (29) 431.
  - as forage crop, (31) 829.
  - bacterial disease, description, (30) 539; (31) 745.
  - breeding experiments, (26) 830; (32) 431, 532.
  - composition and digestibility, (36) 469.
  - composition as affected by irrigation, (28) 332.
  - composition at different stages, (39) 836.
  - culture experiments, (29) 631; (30) 228; (32) 431; (33) 33; (36) 32; (40) 136.
  - culture in cotton belt, (32) 534.
  - culture in the Ozarks, (29) 427.
  - culture under irrigation, (33) 228.
  - effect on soil fertility, (27) 136.
  - ergot in Indiana, (39) 52.
  - for irrigated pastures, (40) 432.
  - irrigation experiments, (28) 130, 133; (32) 224.
  - liming experiments, (38) 219.
  - moisture content and shrinkage, (34) 828.
  - notes, (26) 362; (31) 830.
  - on bog and moss soils, (40) 212.
  - pollination experiments, (37) 734.
  - root systems of, (35) 639.
  - seed, adulteration, (35) 740.
  - seed, adulteration and misbranding, (27) 141; (29) 144.
  - seed, examination, (36) 442.
  - seed from various countries, tests, (27) 534.
  - seeding on ranges, (29) 531; (30) 35.
  - time of cutting, (39) 693.
  - variation in, (39) 531.
  - varieties, (29) 139; (30) 434.
  - variety tests, (40) 232.
  - yields, (29) 631; (40) 733.
- heaters, description, (26) 741.
- heaters, tests, (27) 439, 745; (28) 741; (29) 147; (32) 534; (33) 237.
- heating, (26) 741; (27) 241; (32) 744; (38) 641; (39) 45; (40) 342, 540.
- heating devices, tests, (26) 539; (34) 747; (35) 142.
- heating in Ohio, (32) 614.
- industry in California, (29) 639.
- industry in South Australia, (29) 837.
- industry in Utah, (29) 342.
- pests, control, (32) 793.
- pests, remedies, (26) 539; (31) 740.
- pinhole borers, notes, (36) 258.
- plant lice, studies, (40) 649.

## Orchard—Continued.

- planting, explosive-fertilizer shell for, (40) 444
  - products, feeding value, (38) 168.
  - soils, dynamite for, (33) 239.
  - soils, nitrates in, (36) 724.
  - survey in New York, Ontario County, (26) 540.
  - survey in Utah, (33) 638.
  - survey in West Virginia, (33) 140, 839.
  - surveys in Ontario, (27) 39; (29) 41.
  - surveys, statistical methods, (26) 540.
- Orcharding—
- dry land, in southern Texas, (32) 338.
  - on rough lands, treatise, (26) 440.
  - textbook, (32) 394.
- Orchards—see also Fruit, Apples, Peaches, etc.
- clean culture v. cover crop, (37) 40.
  - cost of bringing into bearing, (36) 140.
  - cover crop experiments, (34) 437.
  - cover crops for, (27) 144, 743; (28) 47, 144; (29) 147, 395; (30) 197; (32) 635; (37) 833; (38) 346, 443; (39) 39, 445; (40) 444, 739, 741.
  - cover crops, tests, (31) 635.
  - culture, (27) 843.
  - culture experiments, (36) 724.
  - culture on Yuma reclamation project, (29) 226.
  - culture v. grass mulch, (36) 41.
  - demonstration, rôle in horticultural education, (29) 41, 94.
  - drainage, (36) 888.
  - electrical stimulation, (39) 735.
  - enemies, (27) 756.
  - fertilizer experiments, (26) 238; (27) 538; (33) 236, 239; (35) 235, 446; (36) 40, 237; (37) 240; (40) 341.
  - frost injuries to, (36) 40.
  - grass mulch for, (37) 833.
  - in Missouri, (31) 636.
  - in South Australia, (31) 836; (40) 340.
  - insects affecting, (26) 553; (28) 47, 642, 841; (29) 158, 640; (31) 848; (32) 56, 449; (33) 856; (35) 355.
  - irrigated, intercropping, (39) 46.
  - irrigation, (27) 743; (31) 782; (35) 539; (37) 143; (38) 242.
  - irrigation and culture, (28) 484.
  - irrigation and drainage, (29) 745.
  - laws for protection in Michigan, (33) 438.
  - lime for, (28) 223.
  - management, (26) 741; (27) 598; (28) 437, 640; (29) 339; (35) 142; (36) 95, 341, 841; (39) 38.
  - management in British Columbia, (27) 644.
  - management, lessons in, (27) 897.
  - manuring, (31) 636.
  - mulching v. clean culture, (33) 43, 239.
  - pasturage experiments, (27) 538.
  - planting, (26) 597; (30) 443.
  - planting by use of explosives, (29) 183.
  - planting costs, (38) 41.
  - pollination in, (26) 440.
  - protection against frost, (26) 136; (27) 240, 439; (29) 147; (34) 341.
  - pruning experiments, (40) 340, 739.
  - rejuvenation, (27) 538, 897; (28) 47; (29) 745; (33) 97, 240; (34) 341; (36) 40; (38) 242; (40) 341.
  - rejuvenation and operation, (36) 640.
  - rejuvenation, treatise, (27) 241.
  - smudging experiments, (33) 440.
  - soil management, (40) 148, 340, 738.
  - spray calendar, (27) 39.
  - spray gun for, (40) 639.
  - spraying, (28) 156, 352, 653; (30) 344; (32) 637, 834; (33) 47, 98, 735; (36) 535; (38) 796.
- spraying—
- and pruning demonstrations, (30) 40.
  - cooperatively, (32) 637.
  - experiments, (27) 440, 538; (29) 145, 354; (31) 151, 335; (33) 45, 46; (35) 342, 447; (37) 242.
  - penetration system, (28) 787.
  - piping system for, (35) 743.
  - program for, (40) 742.
  - v. dusting, (38) 42.
- straw mulch in, (36) 297.
- use of explosives in, (39) 445.
  - winter injury, (30) 541.
  - winter work in, (32) 743; (38) 698.
  - young, crops for, (27) 144.
  - young, culture experiments, (33) 238.
  - young, intercropping, (35) 342.

- Orchestes**—  
 canus, notes, (28) 156; (34) 254.  
 fagi, notes, (28) 455; (30) 53.  
 mangiferae n.sp., description, (35) 365.  
 pallicornis, remedies, (31) 456.  
 spp., notes, (30) 357.
- Orchid**—  
 bacterial disease, notes, (37) 839.  
 bulbs, fungicidal action, (27) 224.  
 corns or tubers, dried, analyses, (29) 463.  
 diseases, descriptions, (26) 450, 851; (35) 655.  
 diseases, notes, (39) 453.  
 fly, *see* *Isosoma orchidearum*.  
 leaf spot, notes, (34) 442; (40) 844.  
 weevil, new, in Milwaukee, (38) 155.  
 weevils, notes, (40) 655.
- Orchidaceae, endotrophic mycorrhiza, (39) 26.**
- Orchids**—  
 bacterial diseases, (26) 650; (40) 158.  
 breeding, (39) 449.  
 breeding and culture, (33) 143.  
 flowers of, (35) 431.  
 fumigation, (40) 352.  
 hybridization experiments, (30) 329.  
 insects affecting, (36) 555; (40) 754.  
 pollination by mosquitoes, (30) 658.

 diseases, diagnosis, (29) 268.  
 ferments of, (29) 662; (32) 858, 859; (34) 257.  
 function of, (36) 562.  
 internal secretions of, (30) 201.  
 of pigs, structure and growth, (32) 378.  
 pathology, (27) 576.  
 preparations, factors affecting activity and stability, (31) 203.  
 preparations, proteolytic activity, (32) 710; (39) 669.  
 rôle in digestion and absorption of fat, (34) 257.
- Pancreatic—  
 amylase, studies, (40) 504.  
 and gastric fat digestion in infants, (29) 365.  
 ferments, coagulation, (38) 710.  
 juice, nature and properties, (34) 257.  
 juice of dogs, alkalinity, (29) 268.  
 secretion, relation to fats, (29) 465.  
 vitamin, use in malnutrition, (37) 65.
- Pancreatin, studies, (26) 265.
- Pandemis ribeana, notes, (34) 855.
- Pandorina as affected by copper sulphate, (39) 27.
- Panga fruits as tanning material, (36) 509.
- Panicularia—  
 occidentalis n.s.p., description, (34) 336.  
 spp., cyanogen in, (33) 665.
- Panicum—  
 altissimum, distribution of stomata in, (32) 221.  
 barbinoide, culture in Guam, (40) 327.  
 bulbosum, analyses, (27) 469.  
 capillare as host of curlew bug, (27) 162.  
 combisii in Florida, (40) 137.  
 crus-galli, two species of (39) 231.  
 hemitomum, analyses and use, (30) 437; (32) 68; (35) 831.  
 maximum, composition and culture, (31) 832.  
 miliaceum, botanical studies, (37) 336.  
 miliaceum, coloration of glumes, (32) 727.  
 miliaceum of Java, (35) 440.
- Panicum—Continued.  
 numidianum, cercopid enemy, (40) 856.  
 numidianum, notes, (30) 229.  
 palmifolium as forage crop, (38) 827.  
 repens, notes, (30) 230.  
 sanguinale, root system, (36) 438.  
 spp., analyses, (27) 68; (28) 463; (30) 565; (31) 863.  
 spp., analyses and cultural notes, (38) 528.  
 spp., analyses and digestibility, (28) 464; (32) 167.  
 spp., culture experiments, (28) 136.  
 spp., culture under irrigation, (33) 228.  
 spp., notes, (26) 362.  
 spp. of tropical North America, (33) 727.  
 spp., studies, (32) 727.  
 trichopus, analyses and digestibility, (27) 871.
- Panicus geminatus, notes, (31) 355.
- Panolls—  
 griseovariegata, notes, (31) 756.  
 piniperda, notes, (35) 254.  
 piniperda, prevalence in Bohemia, (33) 748.
- Panorpa klugi, life history, (28) 655.
- Panoscopus spp., notes, (35) 364.
- Pansies—  
 breeding experiments, (27) 741.  
 cut, preservation, (31) 837.  
 varieties, (31) 48.
- Pantala flavescens, food habits, (34) 549.
- Pantomorus fulleri, notes, (32) 556.
- Panzeria minor n.s.p., studies, (39) 659.
- Panzeria rudis, biology, (35) 253.
- Papain—  
 digestive value, (28) 110.  
 effect on activity of zymase, (28) 504.  
 extraction experiments, (33) 141.  
 proteolytic activity, (38) 802.
- Papaipema nitela, *see* Stalk borer.
- Papaipema sp., notes, (26) 59.
- Papatasi flies of Malta, (35) 57.
- Papaver—  
 inhibiting factors in breeding, (26) 827.  
 orientale, alkaloids in (32) 327.  
 rhoeas, color inhibitions, (27) 733.  
 rhoeas, self-sterility, (38) 426.  
 somniferum, alkaloids, latex, and oxidases in, (36) 127.
- Papaveraceae, oils and alkaloids of, (36) 628.
- Papaws—  
 analyses and food value, (38) 365.  
 improvement, (38) 542.  
 recipes, (28) 863.  
 specimens in United States, (36) 445.
- Papaya—  
 dioecious character, (28) 238.  
 disease in Barbados, (34) 249.  
 disease, studies, (30) 838.  
 diseases, treatment, (37) 550.  
 flowers, variation in (35) 449; (36) 241.  
 fruit disease, notes, (37) 148.  
 fruit fly, danger of introduction, (39) 467.  
 fruit fly, investigations, (32) 60.  
 leaf disease, studies, (29) 848; (31) 55.
- Papayas—  
 analyses, (32) 761.  
 analyses and use, (30) 363.  
 botany and culture, (33) 440.  
 breeding, (35) 344.  
 breeding experiments, (29) 234; (30) 841; (32) 741; (35) 539; (37) 142; (38) 842.  
 change of sex in, (30) 838, 842.  
 cold storage of, (32) 439.  
 culture, (31) 536; (37) 345.  
 culture—  
 and shipping experiments, (27) 142.  
 and use, (36) 241.  
 experiments, (30) 841; (40) 339.  
 in Philippines, (34) 635.  
 for pigs, (30) 868.  
 grafted, possibilities, (29) 42.  
 host plant of fruit fly, (26) 758.  
 insects affecting, (30) 842.  
 propagation, (27) 142.
- Paper—  
 absorbency, determination, (38) 414.  
 and pulp industry, bibliography, (29) 119.  
 as affected by humidity, (37) 109.  
 bottles, tests, (27) 777.  
 detection of faulty sizing in, (28) 513; (35) 718.  
 discoloration due to fungi, (37) 630.  
 dishes, bacteriology, (32) 856.

 jack pine and hemlock, (27) 541.  
 longleaf pine chips, (38) 809.  
 tomato skins, (28) 660.  
 waste resinous woods, (28) 512.  
 industry in United States, (37) 748.  
 investigations at Forest Products Laboratory, 1918, (40) 641.  
 manufacture from bagasse, (26) 213.  
 measurement of translucency, (27) 114.  
 methods of analysis, (27) 205.  
 mill waste liquors, purification, (33) 520.  
 milling, Ives tint photometer in, (36) 207.  
 parchment, for dairy use, (27) 575.  
 pulleys, tests, (28) 590.  
 pulp—*see also* Pulpwood and Wood pulp.  
 filter, use in quantitative analysis, (34) 712.  
 from dead leaves, (39) 808.  
 from esparto, (31) 832.  
 from long-leaf pine, (30) 615; (31) 144.  
 manufacture from bamboo, (27) 647; (28) 645.  
 materials, (40) 243, 745, 823.  
 microscopy, (27) 315.  
 textile from, (38) 208.  
 technology, manual, (26) 316.  
 testing, constant temperature and humidity room for, (38) 414.  
 waste as source of lime, (38) 22.  
 wet, determination of strength, (36) 509.
- Papilio—  
 androgeus, notes, (39) 59.  
 demoleus, notes, (34) 851.  
 spp., notes, (26) 656, 857.  
 thoas thoantides, notes, (40) 62.
- Papilionaceae, oil content of seeds, (27) 716.
- Papilionidae of Japan, (26) 455.
- Pappataci fever in South America, (26) 656.
- Pappophorum—  
 scabrum, analyses, (36) 334.  
 scabrum, studies, (38) 66.  
 spp. analyses and digestibility, (27) 871; (32) 167.
- Paprika—  
 adulteration, detection, (27) 497, 809; (30) 413.  
 American-grown, (30) 343.  
 ether extract of (26) 99.  
 extracted, detection, (32) 612.  
 methods of analysis, (27) 715.  
 origin and composition, (29) 264.
- Para cymene, nitration, (40) 710.
- Para grass—  
 composition, (27) 668.  
 culture experiments, (28) 136, 735; (35) 829.  
 culture in Guam, (32) 731; (40) 327.  
 culture in Philippines, (26) 361.  
 digestibility, (27) 669; (37) 168.  
 feeding value, (40) 366.  
 hay, analyses, (32) 862.  
 hay, chloroform extract of, (31) 71.  
 hay, mineral constituents, digestibility, (40) 769.  
 notes, (26) 362; (27) 336; (37) 29.  
 silage from, (27) 872.  
 yields, (29) 224.
- Para rubber, *see* Rubber.
- Parabolas, fitting of, (39) 179.
- Parabolocratus viridis, notes, (27) 859.
- Paracalocoris—  
 colon, notes, (30) 852.  
 colon, oviposition, (34) 255.  
 hawleyi, life history and remedies, (38) 559.  
 nearctic species, (36) 654.  
 scrupens, notes, (33) 252; (34) 752.  
 spp., notes, (30) 359.
- Paracasein—  
 compounds, composition and properties, (29) 9.  
 compounds, preparation and properties, (29) 805.  
 digestibility as affected by rennin, (36) 559.  
 of cow's and goat's milk, cleavage, (27) 12.  
 of milk, tryptic and peptic cleavage, (26) 565.  
 preparation, (29) 11.
- Paracharitopus lecanii n.sp., description, (31) 355.
- Parachrysocharis—  
 javensis n.g. and n.sp., description, (37) 667.  
 semiflava n.sp., description, (37) 570.
- Paraclemensia acerifoliella, notes, (28) 157.
- Paracolon infections in fowls, (40) 685.
- Paracresol in oil, germicidal power, (40) 882.
- Para-dichlorobenzene as a fumigant, (32) 650.
- Paradol, notes, (37) 612.
- Paraffin—  
 as wood preservative, (27) 314.  
 destruction by bacteria and molds, (32) 523.  
 effect on accumulation of ammonia and nitrates in soils, (37) 812.  
 effect on turnip seed, (32) 851.  
 emulsions, wetting power, (37) 759.  
 insecticidal value, (27) 755.  
 nicotin emulsion, use, (39) 763.  
 oil emulsion as a contact insecticide, (38) 762.  
 orientation of small objects in, (38) 497.  
 paper as surgical dressing, (39) 488.  
 preservation of eggs with, (29) 172.  
 treatment of burns by, (40) 780.
- Paraffined dressings, action on wounds, (40) 779.
- Paragonimus westermanii, intermediate host, (35) 384, 681.
- Paragrèles, electric, (31) 615.
- Paragus spp., life histories (26) 349.
- Parahydroxybenzoic acid, isolation from soil, (37) 709.
- Paraleptomastix—  
 abnormis in California, (34) 451.  
 abnormis n.sp., description, (34) 456.  
 abnormis, notes, (39) 461; (40) 359.  
 abnormis, studies, (37) 569.  
 notatus n.sp., description, (37) 467.
- Paraleurocerus bicoloripes n.g. and n.sp., description, (34) 857.
- Paraleyrodus perseae, notes, (27) 455.
- Paralysis—  
 in horses and cows due to ingestion of fodder, (29) 780.  
 in lambs, relation to Dermacentor venustus, (29) 482.  
 infectious bulbar, in Brazil, (28) 184.  
 of vestibular nerve in pigeons, etiology, (33) 279.
- Paramecium—  
 resistance to potassium cyanid, (40) 455.  
 selection experiments, (39) 179.
- Parameltensis, notes, (27) 681.
- Paramphistomidae of North America, (38) 365.
- Paramphistomum sp. in Philippines, (37) 277.
- Paramyioconema, new genus, description, (37) 569.
- Parana grass, cercopid enemy, (40) 856.
- Paranagrus n.g. and n.sp., descriptions, (37) 856.
- Parandra brunnea—  
 notes, (28) 156.  
 studies, (33) 457.
- Paranuclain, antigenic properties, (29) 174.
- Paranusia bifasciata n.sp., description, (31) 355.
- Paraphelinus—  
 perkinsi n.sp., description, (38) 467.  
 speciosissimus, studies, (36) 258.  
 spp. of British Guiana, (38) 467.  
 tomaspidis n.sp., description, (31) 458.
- Paraphenyldiamin, effect on milk, (29) 806.
- Paraplegia—  
 enzootic, in sheep, (28) 183; (38) 687, 688.  
 infectious, in horses, studies, (27) 188.
- Paraptochus sellatus, notes, (32) 651.
- Pararabin, effect on horse serum (37) 376.
- Parasa latistriga, notes, (36) 654.
- Parascalops breweri, notes, (31) 154.
- Parasetigena segregata—  
 biology, (35) 253.  
 notes, (27) 58.  
 studies, (29) 760.
- Parasimulium n.g. and n.sp., description, (31) 254.
- Parasiorola cellularis, notes, (29) 253.
- Parasite extracts, complement fixing reactions with (28) 880.
- Parasites—*see also* Animal parasites, Insect parasites, and specific forms.  
 as affected by anthelmintics, (28) 80.  
 genetic relationships, (33) 823.  
 internal, in Queensland, (39) 556.  
 internal, of pigs, (33) 278.  
 intestinal—  
 detection, (34) 682.  
 of poultry, remedies, (38) 83.  
 protection against digestive enzymes, (33) 478; (38) 582.  
 toxins of, (34) 879.  
 vermifuges for, (38) 883.  
 minute hymenopterous, handling, (29) 658.  
 notes, (29) 855.  
 tropical, (38) 580.

- Parasitic—  
 infestation, effect of cold on, (40) 684.  
 specialization, digest of data, (32) 822.
- Parasitoides, lectures on, (30) 587.
- Parasitism—  
 and Eosinophilia, (34) 276.  
 and symbiosis, differentiation, (28) 35.  
 in plants, studies, (26) 433.  
 normal, studies, (38) 647.

- Paspalum—  
 conjugatum—  
 Helminthosporium n.sp. on (39) 248.  
 notes, (30) 229.
- dilatatum—  
 as forage crop, (37) 132.  
 as pasture grass, (30) 435; (35) 562; (40) 327.  
 culture experiments, (28) 136; (35) 829; (37) 730; (38) 827.  
 culture in Guam, (32) 731.  
 culture in Porto Rico, (29) 631.  
 culture in Rhodesia, (27) 32.  
 fertilizer experiments, (27) 32.  
 in New Zealand, (40) 239.  
 poisoning cattle, (39) 891.  
 root disease of, (29) 152.  
 root system, (36) 438.  
 varieties, (27) 32.
- marginatum, notes, (30) 229.  
 notatum, toxicity to cattle, (38) 687.  
 poisoning in cattle, (34) 676.  
 scrobiculatum, analyses, (30) 565.  
 spp., analyses, (31) 431, 863.  
 spp., culture experiments, (27) 234.  
 spp., culture in Hawaii, (32) 729.  
 spp., of Java, (30) 525; (35) 440.  
 spp., notes, (26) 362.  
 stoloniferum, distribution of stomata in, (32) 221.  
 varieties, (30) 434.

- Passalora hevea* n.sp., notes, (30) 453; (34) 442; (38) 356.  
*Passer domesticus*—  
   destruction of locusts by, (28) 351.  
   feeding habits, (28) 450.  
*Passerculus sandwichensis* savanna, destruction of grain aphids by, (29) 452.  
*Passerherbulus* and its allies, (38) 556.  
*Passeriformes*, new pycnonotine family, (38) 856.  
*Pastoromyia heterochaeta*, notes, (36) 359.  
*Pastiflora*—  
   caerulea, formation of mechanical tissue in, (27) 631.  
   edulis as trap for fruit flies, (29) 657.  
   laurifolia, cold storage of, (32) 439.  
   teratological variations in, (32) 35.  
**Pastion**—  
   fruit brown spot, notes, (34) 644.  
   fruit weevil, notes, (26) 657.  
   vine beetle, notes, (40) 654.  
**Pasta Caffaro**, tests, (28) 245.  
**Paste and pastry**, methods of analysis, (32) 505.  
**Pastes**, Italian, analyses, (28) 460.  
**Pasteurella**—  
   equine, relation to equine influenza, (26) 587.  
   studies, (31) 381.  
**Pasteurellosis**—  
   in reindeer, studies, (31) 381.  
   in sheep, (29) 179.  
**Pasteurization**—*see also* Cream, Milk, etc.  
   colon test of efficiency, (32) 775.  
   effect on mold spores, (35) 276.  
   effect on streptococci, (31) 574.  
   for butter making, (27) 179.  
   of cream, studies, (33) 473.  
   milk, (26) 275, 282, 283; (27) 178, 281.  
   milk and cream, (31) 188.  
   milk, efficiency, (27) 178.  
   resistance of lactic acid bacteria to, (33) 675.  
   résumé, (34) 674.  
**Pasteurizer**, home, construction, (31) 771.  
**Pastry**—  
   and hygiene, paper on, (32) 760.  
   as source of infection, (26) 582.  
   detection of milk in, (40) 612.  
**Pasture**—  
   crops—  
     for cut-over lands, (39) 230.  
     for growing pigs and brood sows, (30) 100.  
     handbook, (29) 530.  
     trials, (39) 30, 434.  
     utilization, (39) 880.  
   experiments, (40) 32.  
   grasses—  
     analyses, (33) 227.  
     composition as affected by fertilizers, (27) 125.  
     culture in New York, (39) 532.  
     fall sowing, (33) 98.  
     for Texas, (37) 827.  
     in Guam, (40) 327.  
     mixtures for, (31) 37; (32) 566; (33) 430.  
     mixtures for New Zealand conditions, (39) 835.  
     mixtures, notes, (34) 95.  
     mixtures, tests, (27) 735; (37) 533; (38) 30; (40) 72, 374.  
     native, of United States, (33) 227.  
     tests, (40) 72, 374, 432.  
     water requirements, (33) 228.  
   herbs, indigenous to Australia, (26) 830.  
   land, Alpine, in Italy, (27) 276.  
   land, crane fly affecting, (28) 160.  
   land in United States, (39) 192.  
   land, old, improvement, (40) 824.  
   land, renovation, (26) 436.  
   plants, root systems of, (35) 639.  
   problems, papers on, (40) 300.  
   region east of Rockies, climatic features, (40) 117.  
   region of United States, climatic and edaphic factors, (39) 735.  
   soils, English work on, (28) 216.  
   survey of West Virginia, (39) 169.  
**Pastures**—*see also* Grassland and Meadows.  
   Alpine, effect on milk production, (28) 774.  
   Alpine, in Province of Como, (28) 364.  
   Alpine, treatise, (26) 130.  
   and meadows, treatise, (26) 830.  
   average condition by months, (39) 811.  
**Pastures**—Continued.  
   carrying-capacity tests, (39) 879.  
   composition of herbage, (37) 230.  
   coyote-proof, for sheep, (26) 73.  
   culture experiments, (30) 133.  
   dry land, notes, (30) 435.  
   establishment, (33) 332.  
   fertilizer experiments, (26) 40, 533, 534, 629; (27) 234, 638, 834; (29) 517, 632, 728; (30) 73, 83; (31) 470, 821, 829; (32) 368; (33) 227, 527; (35) 31; (36) 425, 735, 740, 829; (38) 432; (39) 22, 530, 633.  
   for cows, (37) 271; (40) 575.  
   irrigated lands, (32) 628.  
   pigs, (31) 470.  
   pigs in the South, (39) 479.  
   the cotton belt, (32) 534.  
   work horses, (39) 479.  
   importance in dairying, (32) 870.  
   improvement, (26) 533; (37) 230.  
   in Manitoba and Saskatchewan, (36) 437.  
   National Forests, (35) 167.  
   New England, (33) 526.  
   southeastern England, nutritive value and fertility, (32) 121.  
   southeastern Ohio, (36) 34.  
   Wyoming, (39) 135.  
   insects affecting, (37) 847.  
   irrigated—  
     clipping experiments, (38) 30.  
     establishing, (38) 130; (39) 834.  
     grasses for, (36) 132; (38) 337; (39) 434; (40) 432.  
     management, (35) 734; (37) 640.  
     notes, (40) 374.  
     tests, (38) 175.  
     value, (36) 173.  
   lowland moor, management, (37) 333.  
   management, (31) 37; (33) 527.  
   management in Kansas, (39) 439; (40) 330.  
   management in Sweden, (39) 633.  
   moorland, treatise, (31) 830.  
   of central France, improvement, (30) 733.  
   of German East Africa, (28) 364.  
   on peat soils, (38) 134.  
   peaty, fertilizer experiments, (37) 134.  
   permanent, (38) 796.  
   permanent, formation, (37) 826.  
   phosphates for, (31) 174.  
   planting and care, (30) 829.  
   preparation and care, (30) 230.  
   seeding, (31) 830; (38) 33.  
   sheep-carrying capacity, (30) 770.  
   stump-land, tests, (38) 176.  
   top dressing, (27) 599.  
   watering devices for, (33) 188.  
   Pasturing experiments on irrigated fields, (40) 371.  
   Pataleta, notes, (30) 783.  
   Patellina—  
     *fragariae* n.sp., description, (36) 452.  
     sp. on strawberries, (33) 744.  
**Patent medicines**—  
   composition, (40) 182.  
   examination, (37) 63.  
   notes, (32) 661.  
**Pathological technique**, treatise, (26) 276; (40) 676.  
**Pathology**—  
   chemical studies, (40) 201.  
   chemical, treatise, (39) 79.  
   of man and animals, treatise, (33) 476.  
   papers on (29) 676.  
   papers on from Rockefeller Institute, (33) 279.  
   special, guide, (36) 378.  
   studies, (31) 277.  
   tables of statistical error, (26) 773.  
   textbook, (27) 576.  
   treatise, (28) 178; (29) 174; (31) 276; (32) 78, 270.  
**Paths, roads, and bridges**, treatise, (27) 687.  
**Patriotic Farmers' Fund** in New Jersey, (40) 490.  
**Patrogenesis** in plant hybrids, (36) 28.  
**Patrons of Husbandry**, history, (36) 688.  
**Patterns**, drafting, (30) 462.  
**Patwa**, culture and improvement, (28) 633.  
**Pavements**—*see also* Concrete and Roads.  
   and paving materials, treatise, (31) 385.  
   and roads, textbook, (28) 84.  
   bituminous, paper on (26) 890.  
   brick, (40) 888.  
   brick, construction, (35) 183.  
   brick, monolithic construction, (36) 384.

## Pavements—Continued.

- cement-concrete, cracks in (37) 88.  
concrete—  
and brick, tests, (30) 387.  
construction, (27) 386; (35) 390.  
cracking and buckling, (38) 891.  
design, (36) 890.  
failure of, (30) 386.  
stresses on, (31) 186.  
treatise, (30) 386.  
use of hydrated lime in, (31) 387.  
construction, (33) 782.  
construction and maintenance, (27) 189.  
construction, treatise, (36) 285.  
economy of various types, (34) 484.  
for heavy traffic roads, (33) 290.  
macadam and concrete, (36) 188.  
monolithic, in Vermilion County, Illinois, (36) 188.  
rock-asphalt, construction, (29) 591.  
small cube, tests, (30) 689.  
specifications, handbook, (29) 387.  
treatise, (31) 90.
- Pavetta spp.—  
nigroten-fixing bacteria in leaves, (27) 225.  
symbiosis with bacteria, (32) 327.
- Paving—  
block oil, specifications, (26) 544.  
blocks, preservation, (33) 544.  
blocks, wood, improving strength of, (28) 411.  
brick, tests, (35) 390.  
brick, wire-cut and re-pressed, tests, (31) 687.  
cements, asphalt, specifications, (30) 290.
- Pavonia procumbens, variation in, (39) 231.
- Pea, *see also* Peas.  
and oat silage, notes, (27) 736; (37) 75.
- aphis—  
control by lady beetles, (34) 555.  
green, investigations, (35) 461.  
green, remedies, (32) 652.  
remedies, (30) 654.  
studies, (34) 62.  
synonymy, (35) 256.
- bacterial disease, studies, (39) 147.  
blight, notes, (32) 544.  
blight, studies, (28) 844; (29) 447; (33) 344.  
blight, treatment, (31) 840; (35) 545.  
bran, analyses, (26) 714; (36) 765; (38) 368; (40) 571.  
chink, notes, (40) 165.  
collar disease, studies, (36) 749.  
diseases, notes, (27) 45; (38) 48; (39) 52, 354, 453, 850; (40) 845.  
diseases, treatment, (32) 545.  
feed, analyses, (27) 170.  
flour, agglutinating properties, (31) 774.  
flour bread, studies, (40) 762.  
flour, digestibility of protein, (33) 564.  
forage, effect on milk and butter, (34) 570.  
Fusarium wilt, studies, (39) 853.  
hay, analyses, (34) 469.  
hay, veiny, analyses, (33) 759.  
hulls, analyses, (27) 170.  
leaf spot, treatment, (33) 846.  
meal, analyses, (26) 165, 665, 666; (27) 775; (28) 364; (30) 68; (33) 371; (35) 867; (38) 67.  
mildew, notes, (32) 544.  
pods, analyses, (38) 626.  
protein, nutritive value, (39) 666.  
roots, absorption and excretion of salts by, (26) 624.  
seedlings as affected by ultraviolet rays, (26) 430.  
seeds, large v. small, (31) 634.  
silage, acidity, (39) 310, 878.  
sitonid, notes, (40) 358.  
soup, examination, (31) 659.  
starch, studies, (31) 828.  
straw, composition and digestibility, (34) 565.  
thrips, notes (31) 59; (32) 448, 848; (37) 257.  
thrips, studies, (34) 450.  
tree, Siberian, culture in Alaska, (29) 743.  
vine hay, analyses, (26) 714.
- weevils—  
biology and control, (39) 363.  
descriptions and remedies, (40) 64.  
in British Columbia, (37) 459.  
in Hawaiian Islands, (40) 266.  
in South Africa, (40) 861.  
leaf-eating, biology, (34) 65.  
studies, (36) 855.  
summary of information, (40) 170.

## Peach—

- and almond graft hybrid, description, (29) 838.
- aphis—  
black, notes, (38) 463.  
black, remedies, (38) 358.  
green, alternate hosts, (39) 464.  
green, notes, (26) 755; (32) 753; (35) 54; (38) 462.  
green, remedies, (27) 356.  
green, wing development, (40) 456.  
life history and remedies, (30) 156.
- as rootstock, tests, (40) 445.
- bacterial spot, treatment, (37) 842.
- bark beetle, studies, (31) 852.
- borer—  
California, studies, (26) 61.  
control in West Virginia, (35) 657.  
eastern, notes, (26) 452; (28) 853.  
lesser, life history, (32) 349.  
lesser, notes, (36) 549.  
lesser, studies, (37) 159, 396.  
mechanical protector for, (33) 858.  
notes, (26) 150, 857; (27) 755; (28) 752; (31) 848; (37) 158, 159.  
protector, (39) 343.  
remedies, (27) 54; (28) 395; (30) 355; (32) 551; (36) 855; (38) 261, 861; (40) 162.  
studies, (30) 659; (34) 161; (36) 857; (39) 765; (40) 166, 167.
- brown rot—  
canker, studies, (29) 848.  
control, (40) 749, 851.  
dusting, (40) 445.  
notes, (35) 351.  
studies, (32) 751.
- brown rust, treatment, (28) 652; (38) 454; (39) 345, 349.
- bud mite, notes, (26) 759.
- buds, analyses, (31) 837.
- buds, resistance to frost, (30) 839.
- buds, winter injury to (35) 143; (36) 341.
- cankers, notes, (32) 241.
- Coryneum rust, notes, (33) 549.
- crown gall, inoculation experiments, (29) 449.
- curl, notes, (32) 544; (40) 748.
- die-back or winterkilling, notes, (30) 537.
- disease, little, (36) 849; (37) 755; (39) 756.
- disease, new, (39) 151.
- disease, notes, (27) 349.
- diseases—  
and pests in Georgia, (35) 447.  
and pests, treatment, (38) 843.  
description, (31) 449.  
description and treatment, (27) 539.  
in Arkansas, (39) 756.  
in Ontario, (36) 141.  
notes, (26) 55, 137, 239, 742, 844; (27) 452, 652, 849; (31) 644; (32) 641; (33) 741; (36) 750; (38) 50, 550; (39) 345, 349, 353; (40) 249, 251.  
spray calendar for, (26) 539.  
studies, (32) 441, 751; (33) 544.  
treatment, (27) 855; (28) 148; (29) 146; (30) 344; (31) 843; (32) 51; (33) 349; (37) 51.
- drop disease, studies, (33) 445.
- drying industry in Chile, (27) 313.
- flowers, polymorphism in, (28) 540.
- fly, notes, (30) 757.
- foliage, studies, (26) 407.
- fruit buds, winter injuries, (28) 740, 741.
- gummosis, bacterial, (39) 151.
- gummosis, cause, (27) 350.
- gummosis, notes, (28) 246.
- heart rot, notes, (38) 646.
- industry around Vineland, N. J., (32) 534.
- juice, preparation, (33) 316.
- juices, studies, (29) 711.
- kernels, hydrocyanic acid content, (28) 477.
- kernels, microscopic identification, (28) 565.
- leaf—  
and twig curl, notes, (36) 647.  
curl fungus, treatment, (26) 144.  
curl, notes, (30) 353, 647, 750; (34) 144; (36) 347; (38) 546, 848; (39) 146.  
curl, studies, (33) 347; (37) 250, 655.  
curl, treatment, (28) 152; (30) 50; (32) 241; (34) 248; (35) 457, 753; (40) 48, 348, 749.  
glands, taxonomic value and structure, (34) 739.  
rust, description, (28) 549.  
weevil, notes, (36) 549.
- leaves, chlorophyll compounds of, (32) 823

## Peach—Continued.

- leaves, free hydrocyanic acid in, (27) 635.
- mildew, inoculation experiments, (33) 647.
- mildew, notes, (36) 541.
- mildew, studies, (33) 347, 447.
- mold, notes, (31) 539.
- moth, oriental, *see* Laspeyresia molesta.
- nematode root disease, notes, (28) 235.
- nursery stock die-back and gumming, (34) 646.
- orchards, care and management, (35) 447.
- orchards, winter heating, (36) 795.
- package law in New Jersey, (34) 639.
- pollen, frost resistance of, (29) 437.
- pollen, viability, (32) 534; (34) 144.
- powdery mildew, treatment, (36) 350.
- rosette and its control, (40) 158.
- rust, notes, (37) 453.
- rust, treatment, (29) 551; (31) 53; (40) 348.
- sawfly, notes, (26) 856.
- scab—
  - and bacteriosis, notes, (39) 345.
  - artificial production, (31) 449.
  - dusting experiments, (39) 55.
  - in Netherlands, (33) 649.
  - studies, (36) 545.
  - treatment, (33) 247; (34) 146; (39) 349; (40) 445.
- scale, European, *see* Lecanium persicae.
- scale, notes, (38) 464.
- scale, West Indian—
  - control, (28) 452; (32) 755; (34) 456; (36) 355.
  - control in Italy, (29) 854.
  - host plants of, (26) 248.
  - in Argentina, (26) 452; (27) 556; (37) 358.
  - notes, (30) 655; (32) 847.
  - parasites of, (27) 455; (39) 465.
- seed weevil, notes, (27) 255.
- shipping crates, press for, (37) 490.
- shot-hole disease, bacterial, (39) 552.
- skins, isolation of fat from, (29) 459.
- slug, studies, (26) 152.
- soils of Massachusetts and Connecticut, (32) 835.
- spot, notes, (40) 53.
- stem canker, notes, (29) 547.
- stones, histological characteristics, (27) 112.
- stones, hydrocyanic acid content, (27) 12.
- stop-back, notes, (28) 159; (31) 650.
- stop-back, relation to tarnished plant bug, (29) 354; (40) 455.

 black spot canker, (35) 696.  
 black spot, notes, (30) 541.  
 black spot, treatment, (31) 53; (40) 748, 849.  
 blight—  
     beetle, notes, (29) 158; (36) 258.  
     beetle, studies, (31) 852.  
     control, (40) 154.  
     description and treatment, (31) 53.  
     distribution, (33) 149.  
     in mountain countries, (40) 252.  
     notes, (29) 247; (30) 245; (31) 644, 746, 843; (33) 53, 534; (34) 351, 617, 648, 739; (36) 849; (37) 52, 755, 846; (38) 47, 848.  
     resistance to, (38) 350.  
     resistant varieties, (33) 53, 640; (35) 447.  
     studies, (34) 647; (35) 36; (36) 351; (38) 650; (40) 348.  
     treatment, (27) 353; (38) 545; (39) 150.  
 blister disease, notes, (34) 543.  
 blossom bacillus, notes, (40) 749.  
 blossom, bacterial blight, (39) 149, 252, 850.  
 blossom bacterial disease, notes, (32) 148.  
 blossom weevil in Bessarabia, (38) 163.  
 branch blister disease, notes, (37) 842.  
 brown blotch, studies, (36) 149; (40) 451.  
 brown rot, studies, (35) 248.  
 brusone, description, (31) 749.  
 buds, analyses, (31) 836.  
 buds, resistance to frost, (30) 839.  
 canker, description, (32) 238.  
 chlorosis, investigations, (37) 52.  
 chlorosis, treatment, (27) 48; (28) 151, 447; (30) 749.  
 disease, new, description, (31) 53.  
 diseases in New Jersey, (34) 147.  
 diseases in New South Wales, (34) 247.  
 diseases, notes, (26) 55, 844; (32) 641; (33) 447, 741; (35) 249; (37) 51; (38) 50; (40) 53, 251.  
 diseases, studies, (26) 449.  
 diseases, treatment, (33) 349; (37) 51.  
 fire blight, control, (32) 51; (39) 347.  
 fire blight, notes, (29) 348, 848; (31) 749; (32) 844.  
 flowers, polymorphism in, (28) 540.  
 foliage, studies, (26) 407.  
 fruit buds, development, (31) 335.  
 fruit buds, winter injuries, (29) 41.  
 fruit spots, notes, (34) 846.  
 hold-over blight, studies, (26) 646.  
 juice, physico-chemical constants of, (31) 427.  
 juices, studies, (29) 711.  
 leaf blight, investigations, (33) 347.  
 leaf blister-mite—  
     alternate form, (37) 661.  
     notes, (27) 565; (28) 63; (32) 651; (35) 263; (40) 161.  
     remedies, (37) 54.  
 leaf curling midge, notes, (30) 53.  
 leaf scald or fruit spot, description, (26) 449.  
 leaf spot, description and treatment, (30) 650.  
 leaf spot, notes, (27) 750; (35) 454.  
 leaf worm, studies, (36) 260.  
 leaves, green and chlorotic, evaporation from, (30) 451.  
 midge, see *Contarinia pyrivora*.  
 Monilia blight, studies, (34) 351.  
 moth borer, studies, (40) 853.  
 Phytophthora rot, (36) 649.  
 psylla—  
     notes, (26) 147; (27) 755; (28) 158, 752; (29) 355; (31) 548; (33) 58, 252; (34) 158, 752; (36) 854, 856; (40) 261.  
     relation to fire blight, (36) 351.  
     remedies, (28) 60; (29) 354; (33) 556; (34) 147; (36) 855; (39) 762; (40) 162.  
     spraying for, (39) 345.  
     susceptibility to spray mixtures, (31) 651.  
 quince graft hybrid, description, (30) 740.  
 root aphid, European, (37) 661.  
 rust, new, description, (31) 150, 345.  
 rust, notes, (29) 155; (30) 448; (32) 645; (35) 454.  
 rust, studies, (37) 250.  
 rust, treatment, (29) 50.

## Pear—Continued.

- scab, notes, (34) 846; (36) 541; (38) 852, 853.  
 scab, studies, (33) 148; (35) 351.  
 scab, treatment, (27) 143; (36) 545.  
 seedling, description, (32) 539.  
 seeds, composition, (27) 11.  
 seeds, oil from, (40) 511.  
 Septoria leaf spot, investigations, (33) 347.  
 slug in Chile, (40) 648.  
 slug in Chile, investigations, (33) 347.  
 slug, notes, (26) 146, 863; (27) 53; (28) 563; (29) 158; (33) 58; (35) 253.  
 slug, remedies, (28) 659.  
 slug, studies, (27) 459.  
 sooty blotch, notes, (35) 550.  
 stigmose, studies, (33) 349.  
 stocks, blight-resistant, (36) 51; (39) 346.  
 stocks for apple scions, (37) 40.  
 stocks, quince for, (39) 447.  
 stocks, tests, (39) 843.  
 stop-back, relation to tarnished plant bug, (40) 455.  
 sucker, notes, (34) 451.  
 thrips—  
   California, in Maryland, (33) 253.  
   control in British Columbia, (37) 55, 462.  
   distribution of pear blight by, (33) 149.  
   life history and habits, (32) 850.  
   life history and remedies, (27) 358.  
   notes, (28) 158; (29) 252; (30) 656; (31) 548; (33) 252; (34) 752; (36) 856.  
   remedies, (27) 54; (38) 259; (40) 163.  
   studies, (27) 156; (37) 257; (40) 547.  
   tree borer, sinuate, description, (35) 55.  
   tree borer, sinuate, notes, (26) 61; (36) 856.  
   tree slug, notes, (38) 459.  
   tree trunks, introduction of solutions into, (36) 740.  
   tree wood and bark, composition, (26) 407.  
 trees, potassium cyanid inoculation, (39) 225, 762.  
 weevil, oviposition, (39) 363.  
 wine, preparation, (27) 412.  
 Pearl disease and tuberculosis, (30) 582.  
 Pearline as an insecticide, (36) 753.  
 Pears—  
   acidity, (32) 110; (37) 714.  
   and apples, handbook, (26) 45.  
   as affected by foreign pollen, (30) 739.  
   as affected by moisture supply, (32) 638.  
   Bartlett, keeping qualities, (34) 738.  
   Bartlett, ripening, (36) 536.  
   Bartlett, storage, (40) 838.  
   belting, (27) 349.  
   blight-proof, tests, (33) 338.  
   blight resistant—*see also* Pear blight.  
     from China, (34) 55.  
     origin and development, (36) 641.  
   blooming dates, (31) 140, 533.  
   breeding, (36) 444.  
   breeding experiments, (35) 743; (39) 542.  
   breeding for blight resistance, (39) 346.  
   buprestid beetle affecting, (26) 61.  
   butler, parthenocarp in, (36) 331.  
   Chinese wild, tests, (35) 447.  
   cider, propagation, (34) 834.  
   conservation without use of sugar, (38) 716.  
   cooking qualities of different varieties, (32) 560.  
   cost of production, (29) 439.  
   critical months, (39) 811.  
   cross pollination, (27) 598; (30) 643; (38) 345.  
   crossbreeding experiments, (36) 742.  
   crown gall affecting, (28) 447.  
   culture, (27) 40; (34) 833.  
 culture—  
   experiments, (28) 236; (39) 347.  
   in California, (39) 446.  
     Mesa County, Colo., (37) 241.  
     New York, (35) 836.  
     Ontario, (37) 544.  
     southern Texas, (32) 539.  
     southern Utah, (30) 41.  
     Uruguay, (32) 745.  
     western Nebraska, (32) 233.  
 diseased, plaster cast of, (31) 748.  
 dried, analyses, (30) 861.  
 dried, preparation and use, (29) 462.  
 drying, (37) 114, 509.  
 fall v. spring planting, (26) 238; (37) 743.  
 fertile and self-sterile varieties, (40) 638.  
 fertilizer experiments, (29) 539; (31) 534; (39) 347.  
 fibro-vascular system, (27) 538; (29) 542.

## Pears—Continued.

- from frost-killed pistils, (32) 841.  
 frost injuries, (26) 749; (29) 547.  
 frost rings on, (26) 244.  
 frozen, as affected by rapid thawing, (32) 43.  
 greening of wood, (29) 649.  
 growing on grass land, (26) 639.  
 growth as affected by meteorology, (29) 510.  
 hardy and blight-resistant, breeding, (40) 445.  
 harvesting and storage, (39) 844.  
 host of *Archips argyrospila*, (27) 160.  
 identification and classification, (36) 641.  
 index to varieties, (26) 441.  
 inheritance of russet skin in, (28) 734.  
 inoculation experiments with brown rot fungus, (33) 247.  
 insects affecting, (29) 756; (30) 753; (34) 833; (38) 460, 843.  
 internal structure, (36) 41.  
 irrigation experiments, (27) 743; (32) 638.  
 keeping quality as affected by fertilizers, (27) 644; (29) 640.  
 LeConte, somatic segregation of characters in, (32) 637.  
 marketing cooperatively, (29) 392.  
 methods of drying, (27) 146.  
 new, descriptions, (29) 436, 838.  
 nomenclature, Australian, (39) 844.  
 nutrient injections in, (27) 48, 538.  
 occurrence of glucosid in, (26) 327.  
 of Germany, (33) 838.  
 of North America, (36) 742.  
 oriental, and their hybrids, (29) 541.  
 oriental peach moth on, (39) 259; (40) 756.  
 packing, (29) 838.  
 parthenocarp in, (34) 226.  
 parthenogenesis in, (29) 837.  
 planting with dynamite, (35) 236.  
 pollination, (27) 744; (31) 534; (34) 233, 341; (37) 40; (40) 638.  
 precooling and storage investigations, (28) 829.  
 preservation, (29) 312.  
 preservation by pressure, (32) 416.  
 preserved, valuation, (34) 256.  
 pruning, (30) 739; (33) 837.  
 pruning and training, (37) 344.  
 reducing and nonreducing sugars in, (29) 503.  
 ringing experiments, (32) 636.  
 ripening in relation to humidity, (36) 741.  
 seedless, notes, (30) 642; (34) 234.  
 seedling, variations in, (30) 144.  
 sod mulch v. clean culture, (33) 43.  
 spray schedules, (39) 39, 140.  
 spraying, (37) 744.  
 spraying experiments, (27) 143, 439; (28) 652; (30) 641; (34) 147.  
 spraying with lime arsenate, (40) 164.  
 spring v. fall planting, (33) 439.  
 stimulation of sap flow by nutrients, (27) 538.  
 stocks for, (32) 337; (40) 444.  
 susceptibility to bitter pit, (31) 244.  
 temperatures injurious to, (27) 413, 439.  
 tree census in Washington, (40) 340.  
 varieties, (30) 739; (33) 534; (37) 241; (38) 41; (39) 445, 844.  
 varieties—  
   for Australia, (29) 340; (39) 844.  
   Missouri, (40) 341.  
   New Jersey, (33) 439.  
   Ohio, (37) 241.  
   Pacific Northwest, (29) 745.  
   western Washington, (33) 44.  
   in Oklahoma, (27) 241.  
   resistant to disease, (29) 246.  
 vegetable, notes, (29) 461.  
 winter injury, (35) 143; (40) 835.  
 wound stimulation and closure in, (26) 826.  
 Peas—  
   Alaska, amino nitrogen in, (33) 222.  
   Alaska, breeding experiments, (40) 740.  
   alcoholic fermentation in, (26) 731.  
   analyses, (32) 171; (34) 469; (40) 557.  
   and cereals as hay mixture, (39) 333.  
   and oats—  
     as hay crop, (39) 336; (40) 736.  
     as silage crop, (40) 731.  
     for hay or silage, (32) 430.  
   seedling experiments, (37) 640.  
   yields, (40) 735.  
 aphids affecting, (28) 556; (31) 452.

## Peas—Continued.

## as affected by—

- disinfectants, (26) 820
  - ether, (26) 127.
  - niter cake superphosphate, (40) 515.
  - pod position, (34) 134.
  - poisons, (39) 224.
- as green manure, (26) 534.
- green manure under dry-land conditions, (39) 131.
- hay and silage crop, (39) 737.
  - hog pasture, (39) 375.
  - orchard cover crop, (34) 437.
- assimilation of nitrogen by, (26) 32.
- assimilation of organic phosphates by, (29) 423.
- bacteria as affected by acidity, (39) 722.
- bacterial stem blight of, (35) 847.
- betains in, (27) 203.
- breeding, (28) 435.
- breeding and improvement in Sweden, (39) 833.
- breeding experiments, (28) 331; (29) 433; (33) 331.
- bushel weights, (37) 889.

## Canada—

- and oats for forage, (33) 225.
  - and oats, for silage, (28) 734.
  - culture, (27) 32.
  - field, culture, (31) 265.
  - field, culture experiments, (28) 735.
  - field, fertilizer experiments, (30) 820.
  - field, varieties, (33) 830.
- canned, analyses, (31) 461.
- canned, ash content, (33) 260.
- cannery refuse, feeding value, (36) 167.
- canning, (39) 165.
- canning, improvement in Wisconsin, (34) 341.
- composition as affected by companion crop, (26) 617.
- cost of production, (29) 690.
- culture, (26) 539; (34) 630.

## culture—

- experiments, (27) 31, 335; (28) 633; (30) 133; (32) 529, 530; (33) 830; (35) 141, 341; (36) 32; (37) 30, 529, 825; (38) 132, 133; (39) 334.
- in Antigua, (36) 735.
- Philippines, (39) 444.
  - Rhodesia, (27) 32, 637.
  - Washington, (37) 96.
- on moor soils, (39) 438.
- under dry farming, (30) 435; (36) 528, 529.
- under irrigation, (34) 528.

## description and agricultural value, (36) 635.

## device for sorting, (36) 635.

## dietary properties, (40) 762.

## dried, arsenic in, (27) 269.

## drying, (37) 509.

## effect on companion crop of barley, (32) 515.

## effect on soil moisture, (34) 17.

## electroculture experiments, (30) 788; (40) 428.

## fertilizer experiments, (26) 527, 622, 631, 818, 835; (27) 32, 628; (28) 734, 816; (29) 22; (30) 220; (31) 328, 820; (32) 630; (34) 24, 518, 822; (35) 425; (38) 820.

## fertilizing value, (32) 216.

## field—

- and oats, seeding experiments, (31) 36.
  - as cover crop, (32) 332.
  - forage crop, (34) 140; (38) 827.
  - green manure, (28) 339; (32) 539; (35) 438; (39) 31.
  - hog pasture, (38) 470; (39) 479; (40) 75.
  - silage crop, (39) 134.
  - winter green manure, (39) 434.
- Bacillus radiclecola* of, (33) 329.
- chemical study of varieties, (39) 838.
- composition at different stages, (39) 836.
- critical period of growing season, (39) 811.
- culture, (26) 830; (35) (33); (37) 337.

## field, culture—

- at high altitudes, (39) 810.
- experiments, (28) 532; (29) 226, 735; (32) 132, 526, 528, 529; (35) 827; (37) 30, 227; (38) 333, 634; (39) 124, 227, 735; (40) 735.
- for hay and seed, (37) 436.
- for winter forage, (38) 735.
- in eastern Oregon, (32) 730.
- New Mexico, (40) 18.
- southern Texas, (32) 332.
- western Nebraska, (32) 224.
- under dry farming, (31) 429; (34) 734.

## Peas—Continued.

## field—

- depth of sowing tests, (27) 835.
  - effect of position in pod, (40) 521.
  - feeding value, (40) 771.
  - fertilizer experiments, (40) 735.
  - forage production, (39) 838.
  - grazing off, (39) 229.
  - growing with grain, (40) 822.
  - heredity of violet color in (31) 333.
  - hogging-off, (37) 66, 68.
  - irrigation experiments, (37) 640.
  - liming experiments, (39) 221; (40) 126.
  - notes, (35) 340.
  - pedigreed, in Wisconsin, (40) 624.
  - rate of seeding test, (34) 734.
  - relation between size of seed and yield, (26) 434.
  - seeding experiments, (37) 30; (39) 333; (40) 227.
  - selection experiments, (37) 32.
  - tests in Montserrat, (40) 228.
  - utilization of sugar by, (36) 125.
  - varieties, (27) 32, 334, 736; (28) 532, 827; (29) 32, 426; (32) 37, 730, 731; (33) 34; (34) 228, 735; (35) 829; (36) 36; (37) 29, 30, 32, 33, 135, 228, 337 530, 640; (38) 131, 431, 634.
  - varieties for moor soil, (39) 438.
  - variety tests, (39) 128, 227, 229, 333, 334, 435, 738, 838; (40) 730, 731, 732, 735.
  - water requirements, (29) 826; (32) 127.
  - yields, (27) 734; (39) 336; (40) 731.
- forcing by electricity, (26) 136.
- gametic reduplication in, (30) 433.
- garden—
- and field, origin, (32) 327.
  - new bacterial disease of, (29) 245.
  - nodule bacteria of, (32) 33.
  - protein utilization, (26) 564.
  - selection experiments, (38) 635.
  - variations in, (30) 739.
  - varieties, (30) 640; (31) 336; (34) 833.
  - variety tests, (33) 430.
- germinating, starch digestion in, (28) 127.
- germination as affected by—
- depth of planting, (36) 437.
  - fertilizers, (29) 327.
  - mineral matter, (39) 526.
- germination—
- in mercury vapor light, (30) 827.
  - of, (35) 431.
  - tests, (29) 223; (30) 236.
  - tests in hydrogen peroxid, (27) 201.
- grass, culture experiments, (27) 735.
- grass, varieties, (27) 32.
- green, analyses, (27) 170.
- green, as meat substitute, (38) 166.
- ground, analyses, (35) 562.
- ground, digestibility, (28) 464.
- growth as affected by—
- alkali salts, (34) 125.
  - fertilizer salts, (29) 329.
  - glycerin, (31) 522.
  - radioactivity, (28) 731.
  - stimulants, (35) 434.
- growth in relation to temperature, (35) 432.
- harvesting and storage, (38) 41.
- home drying, (38) 41.
- hybridization experiments, (29) 433; (30) 329, 330; (32) 326.
- improvement, (28) 331.
- improvement in Canada, (37) 831.
- inheritance—
- and variation in, (38) 822.
  - correlation, and variation in, (28) 331.
  - from different parts, (36) 27.
  - in, (27) 740; (30) 331.
  - of flowering time in, (28) 531; (35) 329.
- inoculation experiments, (26) 233; (28) 426.
- insects affecting, (26) 857.
- irrigation experiments, (28) 230.
- Jerusalem, varieties, (50) 525.
- legumins in, (40) 607.
- liming experiments, (36) 27.
- limitation studies, (36) 839; (39) 747.
- mulching v. clean culture, (33) 534.
- nitrogen metabolism, (37) 24.
- nodule bacteria, (39) 338.
- of Burma, names and descriptions, (33) 229.
- oil content, (27) 716.

## Peas—Continued.

- partridge, as green manure, (32) 423.
- partridge field, analyses, (28) 463.
- phosphoric acid content, (40) 508.
- plant nutrients removed by, (29) 837.
- precipitin test for, (31) 733.
- preparation and use, (32) 253.
- preservation, (29) 312.
- preservation by pressure, (32) 416.
- production in Spain, (28) 736.
- ratio of tops to roots, (31) 628, 733.
- relation to climate, (28) 27.
- respiration as affected by electricity, (31) 33.
- rogues in, (34) 41.
- root development with other crops, (26) 129.
- root growth at various temperatures, (36) 28.
- Rounceval, culture experiments, (35) 135.
- seed color variation in, (37) 334.
- seed testing, (38) 41.
- seed treatment, (40) 443.
- seeding experiments under irrigation, (39) 133.
- selection and breeding, (31) 829.
- selection experiments, (36) 735.
- split, industry in Tunis, (39) 208.
- sprouting capacity in relation to antiscorbutic value, (39) 470.
- stock or field, description, (30) 828.
- Sturt, hybridization experiments, (26) 834.
- subsoiling experiments, (37) 732.
- Tangier, culture experiments, (30) 632; (32) 132; (33) 33.
- toxic root secretions of, (35) 636.
- transformation of nitrogen by (29) 133.
- varieties, (26) 631, 632, 835; (27) 32, 334, 637; (29) 222, 530; (31) 829; (32) 431, 630; (33) 33; (35) 141; (36) 32, 735; (37) 825; (38) 33.
- varieties and hybrids of, (33) 525.
- varieties, new Swedish, (39) 833.
- variety tests, (40) 434.
- water requirements, (26) 129; (34) 720; (38) 227.
- water requirements in India, (27) 429.
- wire frames for, (33) 891.
- yield of plump v. shrunken seed, (27) 734.
- yields, (28) 533.
- yields in Australia, (38) 133.
- Peasants, Italian, in Sicily, standard of living, (26) 358.
- Peat—see also Moor soils.
- acidity and alkalinity of, (30) 715.
- agricultural value, (30) 588.
- analyses, (27) 327; (29) 119; (32) 520; (34) 521; (36) 27.
- and parent material, composition, (39) 425.
- and peat moors, utilization, (34) 618.
- as fertilizer or fertilizer filler, (34) 332.
- as source of ammonia, (27) 623.
- as source of organic ammoniates, (37) 815.
- availability of nitrogen in, (26) 523; (28) 724, 725; (38) 423.
- bacterial treatment, (30) 721.
- bacterized, (40) 222.
- bacterized and heated, comparison, (36) 219.
- bacterized, fertilizing value, (31) 821, 822, 826; (33) 124; (35) 324, 430, 628; (36) 219, 517, 726; (37) 426, 629, 719, 814; (38) 120, 328; (39) 116, 530.
- beds, denitrification in, (38) 514.
- bogs, converting into meadows, (37) 826.
- bogs in Michigan, (28) 521.
- bogs, utilization, (26) 323.
- burned, analyses, (35) 128.
- decomposition of cellulose in, (31) 25.
- deposits of United States, (39) 425.
- deposits of Vermont, (28) 422.
- digestibility and productive value, (37) 865.
- dust, storage of apples in, (29) 641.
- effect on nitrogen assimilation in plants, (26) 319.
- extract, effect on nitrification, (26) 721.
- fertilizing value, (26) 323; (27) 325; (28) 817, 820; (29) 518; (39) 726.
- fertilizing value, judging, (37) 216.
- filler, analyses, (26) 715.
- fuel, preparation and use, (31) 123.
- hog, descriptions of bones, (28) 767.
- humification, (31) 120.
- industrial use, (33) 488.
- industry in Canada, (36) 322.
- industry in United States, (31) 122; (36) 624.
- industry, notes, (34) 822.

## Peat—Continued.

- litter, absorptive power, (33) 722, 817, 818.
- litter as manure absorbent, (34) 517.
- litter machines, descriptions and tests, (27) 727.
- litter, treatise, (34) 624.
- machinery, tests, (34) 589.
- moistening, (33) 322.
- molasses, digestibility, (30) 568.
- moors and water powers, economic importance (32) 820.
- moss as feeding stuff, (32) 259.
- moss litter manure, notes, (26) 527.
- moss, use as litter, (31) 30, 272.
- mul, methods of analysis, (31) 806.
- nitrogen as affected by heat, (39) 617.
- nitrogen, formation of nitrates from (29) 624.
- nucleic acid derivatives in, (38) 202.
- of German, studies, (30) 715.
- organisms that liquify agar, (35) 227.
- production—
  - and use in 1913, (33) 25.
  - and use in United States, (38) 820; (40) 221.
  - in United States, (34) 332.
- resources of Wisconsin, (34) 786.
- soils—
  - adsorptive power, (34) 515.
  - analyses, (32) 212.
  - as affected by lime, (29) 823.
  - deposits in Virginia coastal plain, (29) 513.
  - drainage, (37) 135; (38) 591, 690.
  - fertility, (28) 733.
  - fertilizer experiments, (39) 428, 729.
  - fertilizers for, (37) 720; (39) 813.
  - for cranberries, (33) 736.
  - improvement, (33) 416; (36) 119.
  - in Minnesota and Wisconsin, (34) 618.
  - lime and phosphoric acid content, determination, (39) 504.
  - management, (37) 134.
  - microorganisms of, (38) 420.
  - nitrification in, (33) 422.
  - nitrogenous fertilizers for, (39) 423.
  - notes, (27) 617.
  - of German East Africa, (37) 317.
  - Massachusetts, (37) 810.
  - Minnesota, analyses, (35) 625.
  - Ohio, (37) 212.
  - Picardy, (27) 619; (30) 514.
  - reclamation and improvement, (29) 890.
  - rotation and manurial experiments on, (33) 227.
  - studies, (39) 10, 11.
  - treatise, (34) 618.
  - treatment, (30) 119.
  - Tunis phosphate for, (29) 519.
  - unproductiveness of, (30) 518.
  - use of manganese sulphate on, (39) 729.
  - vegetation as indicator of quality, (40) 718.
  - water movement in, (33) 322.
- sphagnum, investigations, (28) 518.
- straw, methods of analysis, (31) 806.
- treatment with aerobic soil bacteria, (30) 399.
- use, (27) 24; (28) 521.
- use as fertilizer filler, (35) 24.
- utilization in Italy, (31) 321; (32) 820.
- water movement in, (33) 322.
- Peaty swamp lands, improvement, (28) 32.
- Pecan—
  - catkins, disease of, (37) 844.
  - dieback, studies, (35) 850; (37) 652.
- diseases—
  - and insects in Georgia, (35) 461.
  - control, (39) 459.
  - descriptions, (30) 452.
  - notes, (37) 756; (39) 459, 553.
  - treatment, (31) 245.
- industry in United States, (39) 647.
- kernel spot, transmission, (39) 763.
- leaf blotch, notes, (26) 56.
- leaf case-bearer, studies, (38) 656.
- oil, digestibility, (38) 868.
- rosette in relation to soil deficiencies, (40) 544.
- rosette, investigations, (32) 241.
- rust, studies, (27) 547.
- twig girdler, life history, (35) 661.
- Pecans—
  - analyses, (26) 337.
  - budding and grafting, (36) 743.
  - crown gall affecting, (28) 447.
  - culture, (28) 840; (34) 151, 740; (36) 139.

- Pecans**—Continued.  
**culture**—  
 experiments, (28) 236.  
 in Florida, (29) 542.  
   Georgia, (33) 440.  
   Maryland, (37) 345; (40) 150.  
   North Carolina, (26) 337; (39) 344.  
   southern Texas, (32) 539.  
   southern Utah, (30) 41.  
   Texas, (36) 743.  
 distribution of nitrogen in, (36) 269.  
 insects affecting, (28) 249; (38) 157, 256, 762; (39) 461, 557; (40) 56, 259.  
 monograph, (27) 645.  
 new, descriptions, (29) 436.  
 parent and propagated trees, (35) 145.  
 Phylloxera galls affecting, (32) 553.  
 self-sterility in, (35) 36, 41; (36) 344.  
 shelled, industry in Texas, (29) 61.  
 spraying, (33) 439.  
 storage, (34) 151.  
 studies, (40) 540.  
 top-working, (30) 843; (35) 344.  
 top-working on hickory, (34) 151; (35) 745.  
 value and adaptability in the South, (26) 744.  
 varieties, (34) 151; (37) 44.  
 winterkilling, sun scald, or sour sap, (37) 755.  
 wood rot, (40) 158.
- Pecari angulatus bangsi n.subsp.**, description, (37) 757.
- Pecatonica River**, flood control, (37) 186.
- Pecos River**, profile survey, (36) 583.
- Pectase**, action of, (35) 25.
- Pectic substances of plants**, (37) 309.
- Pectin**—  
 bodies, constitution, (40) 202.  
 determination in spices, (40) 115.  
 determination in sugar residues, (36) 415.  
 methyl alcohol, studies, (40) 204.  
 preparation, (37) 715; (39) 315, 609.  
 studies, (40) 804.  
 test in jelly making, (40) 558.
- Pectinase** in alfalfa, (32) 411.
- Pectinophora gossypiella**, *see* Cotton bollworm, pink.
- Pectins**—  
 of aucuba and sweet orange, (29) 608.  
 use in food products, (34) 167.
- Pedicularis vulgaris**, haustoria of, (39) 358.
- Pediculi**, remedies, (31) 58, 351.
- Pediculidae**, notes, (26) 655.
- Pediculoides ventricosus**—  
 notes, (27) 561, 564, 565; (31) 656.  
 parasitic on fig moth, (26) 248.
- Pediculopsis graminum**—  
 notes, (28) 854.  
 relation to pink bud rot, (28) 750.
- Pediculus**—*see also* Lice.  
 capitis, relation to leprosy, (27) 858.  
 corporis, relation to trench fever, (39) 658.  
 humanis corporis—  
   biology, (35) 460.  
   life history and remedies, (38) 765.  
   remedies, (35) 854; (39) 558.  
 spp., studies, (37) 850; (38) 159.  
 spp., transmission of poliomyelitis by, (28) 753.  
 spp., transmission of typhus fever by, (26) 759.  
 vestimenti, *see* Pediculus humanus corporis.
- Pedigrees**, uniform system for, (29) 665.
- Pedogenesis**, studies (26) 147.
- Pedology**, ancient ideas concerning, (30) 212.
- Peganum harmala**, density of cell sap, (32) 35.
- Pegmatite granite**, potash from, (27) 127.
- Pegomyia**—  
 affinis, notes, (40) 758.  
 brassicae, *see* Cabbage maggot.  
 cepetorum, *see* Onion maggot.  
 chilensis, notes, (40) 648.  
 fusciceps, *see* Phorbia fusciceps.  
 hyoscyami—  
   breeding experiments, (36) 658.  
   life history, (26) 452.  
   notes, (35) 466; (36) 57.  
   studies, (32) 351.  
 planipalpis, studies, (27) 553.  
 ruficeps, notes, (26) 250.  
 spp., breeding experiments, (36) 658.  
 spp., mining dock leaves, (40) 859.  
 spp., notes, (29) 454.  
 vicina in North America, (35) 759.  
 vicina, notes, (28) 752.
- Pelagophycus porra**, analyses, (27) 421.
- Pelargonin**, studies, (34) 709.
- Pelargonium**—  
 bacterial disease of (32) 53.  
 canker, notes, (34) 56.  
 disease, new, (33) 152.  
 poisoning by certain elements, (38) 628.  
 scarlet, coloring matter of, (34) 709.
- Pelargoniums**—  
 breeding experiments, (27) 741.  
 coloring matter, (27) 228.  
 notes, (29) 341.
- Pelatachina pellicuda**, notes, (37) 763.
- Pellagra**—  
 alkali reserve of blood in, (39) 671.  
 and the vitamin hypothesis, (40) 70.  
 cause and prevention, (32) 255; (34) 764.  
 central nervous system in, (35) 560.  
 colloidal silica theory, (36) 763.  
 dietary treatment, (35) 666.  
 etiology, (32) 67; (33) 662.  
 experimental, in dogs, (36) 764.  
 human-like, in dogs, (38) 366.  
 in Italy, notes, (27) 568.  
 in Province of Rome, (31) 859.  
 nature and prevention, (39) 70.  
 photodynamic theory of, (26) 871.  
 prevention, (34) 259, 764; (35) 472.  
 problem in Illinois, (28) 560.  
 producing diets, (39) 266, 665, 666; (40) 69.  
 relation to—  
   corn, (26) 486; (29) 175.  
   corn meal, (29) 768.  
   deficiencies in diet, (30) 764.  
   diet, (26) 263; (33) 464, 565; (34) 258, 259, 764; (35) 560, 767; (36) 763; (38) 268, 568.  
   insects, (27) 156; (28) 855; (33) 555.  
   location of domicile, (33) 565.  
   sand-flies, (26) 656; (29) 357; (31) 455.  
   sewage disposal, (31) 893; (37) 694.  
   Simulium, (31) 452.  
   stable flies, (29) 756.  
 review of investigations, (34) 463; (36) 363.  
 similarity to zeism, (31) 464.  
 studies, (30) 865; (31) 858; (33) 167; (35) 666; (36) 464, 466; (40) 69, 363, 869.  
 summary and digest of data, (36) 161.  
 transmissibility, (36) 363.  
 transmission experiments, (36) 764.  
 treatise, (36) 763.  
 treatment, (32) 255, 564.
- Pelletierine tannate** as a vermifuge, (38) 884.
- Pellicularia**—  
 disease of coffee, (40) 48.  
 koleroga, notes, (32) 645.  
 koleroga on coffee, studies, (31) 450.  
 koleroga, studies, (33) 549.
- Peloria** in flowers, (34) 823.
- Peltophorum africanum**, analyses and digestibility, (27) 871; (32) 167.
- Pempheres affinis**, notes, (40) 553.
- Pemphigidae** of Japan, (38) 857.
- Pemphiginae** affecting *Populus* in Colorado, (31) 361.
- Pemphigus**—  
 acerifolii, notes, (35) 54.  
 betae, *see* Beet aphid and Sugar beet root louse.  
 bursarius, notes, (27) 552.  
 fraxini-dipetalae on olive, (38) 157.  
 gravicornis n.sp., description, (29) 654.  
 imbricator, notes, (26) 147.  
 lactucarius, notes, (28) 655.  
 populi-transversus, studies, (40) 60.  
 spp., notes, (27) 257.  
 tessellata (acerifolii), notes, (26) 753.
- Pemphredon**, nearctic species, (38) 660.
- Penguin guano** from Falkland Islands, (31) 622.
- Penicillaria**, culture experiments, (33) 33.
- Penicillic acid**, formation, (29) 7.
- Penicillium**—  
 ammonifying power, (32) 29.  
 avellanum n.sp., description, (35) 148.  
 camembertii, secretion of diastase by, (36) 328.  
 casei, notes, (26) 479.  
 chrysogenum as affecting butter, (39) 785.  
 chrysogenum, proteolytic activity, (40) 721.  
 conidium production in, (32) 442.  
 crustaceum, notes, (28) 562.  
 crustaceum, resistance to toxic substances, (29) 734.  
 crustaceum, utilization of phytin by, (30) 805.

## Penicillium—Continued.

- digitatum, relation to temperature, (33) 545.  
 expansum, growth in plant decoctions, (37) 728  
 expansum on plums, (34) 445.  
 expansum, temperature relations, (36) 649.  
 formation of coremia in, (28) 745.  
 glaucum—  
 as affected by chemicals, (28) 444.  
 behavior in iron solutions, (27) 527.  
 behavior with acetic acid, (26) 203.  
 cleavage of gluten by, (31) 711.  
 decomposition of fat by, (30) 311.  
 effect on amino acids, (27) 526.  
 factors affecting development, (30) 241.  
 fixation of atmospheric nitrogen by, (26) 123.  
 fixation of nitrogen by, (36) 632.  
 in Stilton cheese, (28) 879.  
 in tamari-koji, (29) 161.  
 isolation from cheese, (26) 479.  
 mutation in, (30) 630; (31) 225.  
 nitrogen fixation by, (31) 711, 721.  
 occurrence in sugar, (26) 505.  
 organic constituents of, (30) 226.  
 penetration of egg shells by, (29) 765.  
 products of, (29) 817.  
 relation to iodine compounds, (29) 133.  
 retarding action of certain substances on, (28) 629.  
 studies, (26) 749.  
 gratiati n.sp., studies, (29) 844.  
 italicum, notes, (28) 241.  
 luteum purpurogenum group, (34) 51.  
 maculans n.sp. on rubber, (32) 347.  
 monograph, (31) 327.  
 pfefferianum, description, (38) 448.  
 pinophilum, excretion of cytase by, (28) 803.  
 puberulum, studies, (27) 729.  
 roqueforti, effect on milk fat, (31) 107.  
 roqueforti, notes, (30) 312.  
 roseum, relation to citrus gummosis, (31) 449.  
 sp., ammonia production by, (35) 513; (36) 221.  
 sp., effect on corn meal, (28) 663.  
 sp. on cranberry, (39) 749.  
 sp. on sweet potato, (39) 854; (40) 347.  
 sp., treatment, (33) 149.  
 spp., cleavage of methyl glucosid by, (30) 11.  
 spp., formation and regulation of enzymes by, (31) 730.  
 spp., formation of tannase by, (27) 408; (29) 132.  
 spp., growth in presence of salt, (32) 176.  
 spp., nitrogen fixation by, (37) 129.  
 spp., notes, (27) 350; (32) 343.  
 spp. on citrus, (34) 446; (35) 748; (39) 56.  
 spp. on orchard fruits, (37) 550.  
 spp. relation to apple rot, (33) 348.  
 spp. studies, (29) 7.  
 spp. toxicity to bees, (38) 564.  
 stoloniferum, studies, (27) 802.  
 variable, self poisoning in, (29) 529.
- Pennisetum**—  
 benthami, composition, (28) 873.  
 cenchroides, notes, (30) 229.  
 ciliare, analyses, (36) 334.  
 ciliare, analyses and digestibility, (32) 167.  
 ciliare, studies, (38) 66.  
 macrostachyum, notes, (26) 362.  
 purpureum—  
 composition and culture, (36) 230.  
 notes, (30) 527.  
 tests, (38) 828.
- spicatum**—  
 analyses and digestibility, (28) 464.  
 description, (29) 59.  
 notes, (27) 32.
- typhoideum, analyses, (38) 368.  
 typhoideum, culture experiments, (31) 733.
- Pennsylvania**—  
 College, notes, (26) 494, 695; (27) 398, 600, 699, 799; (28) 94, 300, 397, 900; (29) 398; (30) 300, 699, 900; (31) 198, 399, 696, 798; (32) 198, 398, 600; (33) 198, 700; (34) 497; (35) 97, 699; (36) 100, 197, 500, 696; (37) 98, 197, 499, 898; (38) 98, 800; (39) 97, 198, 600, 698; (40) 199, 498, 698, 799.  
 Institute of Animal Nutrition, notes, (26) 97, (27) 199; (31) 497; (32) 798; (33) 900; (36) 100; (37) 797; (39) 198, 300.  
 Rural Progress Association, report, (31) 788.  
 Station, financial statement, (28) 194.

## Pennsylvania—Continued.

- Station, notes, (26) 494, 695, 899; (27) 398, 630, 699, 799; (28) 94, 300, 397; (29) 398; (30) 300, 699; (31) 198, 399, 798; (32) 198; (33) 198, 700; (34) 497, 900; (35) 97, 699; (36) 100, 197; (37) 98, 197, 499, 898; (38) 198, 800; (39) 97, 198, 600; (40) 199, 698.
- Station, report, (34) 197; (35) 595; (38) 95.  
 Station, report of director, (28) 194.
- Pentane, sterilization of soils by, (32) 816.  
 Pentaphis (Tychea) trivialis, notes, (28) 655.
- Pentarthron**—  
 caropapsae, biology, (31) 62.  
 caropapsae, notes, (26) 557.  
 minutum, notes, (27) 56.  
 minutum, parasitic on bud moth, (34) 250.  
 minutum, parasitic on pear slug, (26) 863.  
 (Oophthora) semblidii, artificial breeding, (30) 756.  
 retorrimum, notes, (28) 160.
- Pentastomum taenioides, dissemination and action, (27) 479.
- Pentatoma**—  
 juniperina, notes, (30) 657.  
 ligata affecting Sudan grass, (33) 747.
- Pentilia sp., notes, (29) 261.
- Pentosan content of germinating seeds, (29) 525.
- Pentosans**—  
 as source of energy in animal body, (30) 465; (31) 763.  
 chemistry, biology, and occurrence, (30) 10.  
 determination, (33) 713; (36) 807; (40) 114.  
 determination in flour, (39) 205.  
 determination in wheat, (28) 836.  
 in corn, (28) 312.  
 feeding stuffs, (34) 168.  
 germinating bean seeds, (27) 730.  
 humus, (28) 204.  
 plants, studies, (27) 427.
- Pentose, formation in wine, (31) 316.
- Pentoses**—  
 behavior in fermenting mixtures, (27) 502.  
 destruction in alcoholic fermentation, (36) 609.  
 determination, (37) 617.  
 determination in—  
 beet molasses, (38) 113.  
 grapes and wines, (29) 205.  
 presence of other sugars, (32) 113.  
 free, in plant extracts, (33) 712.  
 utilization by Glomerella cingulata, (34) 351.
- Pentosid, guanin, from molasses residue, (26) 116.
- Peonies**—  
 American Botrytis blight of, (29) 650.  
 Botrytis disease, (40) 844.  
 classification, (26) 542.  
 coloring matter of, (34) 710.  
 culture, (35) 745.  
 diseases, notes, (33) 56.  
 herbaceous, culture in Alaska, (29) 743.  
 nomenclature, (39) 833.  
 notes, (29) 194; (39) 449.  
 treatise, (37) 145.  
 varieties, (35) 745.
- Peonin**, studies, (34) 710.
- People's high schools in Denmark, (30) 93.
- Pepino, tests, (27) 741.
- Pepper**—  
 adulteration, (28) 461.  
 adulteration, detection, (26) 805.  
 analyses, (30) 712.  
 analyses and standards, (37) 112.  
 anthracnose, notes, (39) 146; (40) 48.  
 bacterial diseases, notes, (37) 652.  
 black, effect on microorganisms, (35) 557.  
 black spot, notes, (37) 841.  
 blight, notes, (32) 641.  
 breeding and environmental studies, (39) 746.  
 breeding experiments, (28) 539, 739; (29) 434; (32) 536, 635; (34) 144; (36) 838.  
 canker or rot, notes, (27) 849.  
 Cercospora spots, notes, (35) 844.  
 chili, disease of, (31) 745.  
 color inheritance in, (38) 443.  
 cress seeds, germinability, (37) 26, 431; (38) 729.  
 culture, (33) 297.  
 culture—  
 and diseases in Dutch East Indies, (35) 349; (37) 248, 646.

- Pepper**—Continued.  
 culture—continued.  
 experiments, (31) 336; (37) 742.  
 in Burma, (29) 736.  
 in India, (39) 445.  
 in Mexico, (29) 41.  
 destruction by black scale, (26) 555.  
 disease, description, (26) 448.  
 disease, investigations, (38) 646.  
 diseases in India, (38) 547.  
 diseases, studies, (39) 455.  
 fertilizer experiments, (31) 336; (37) 215, 343, 742.  
 fruit disease, notes, (34) 442.  
 fruit rot, notes, (36) 48; (38) 250.  
 fungus disease affecting, (31) 542.  
 greenhouse, carbon dioxide for, (39) 38.  
 heredity in, (27) 740; (28) 739; (30) 342.  
 host plant of fruit fly, (26) 758.  
 hybridization experiments, (29) 434; (30) 533.  
 improvement, (38) 641.  
 industry in Banca, Dutch East Indies, (35) 835.  
 insects affecting, in Banca, Dutch East Indies, (35) 835.  
 irrigation experiments, (29) 638.  
 mosaic disease, characteristics, (31) 345.  
 mosaic disease, notes, (36) 451.  
 nematodes affecting, (28) 746.  
 paprika, culture, (30) 343.  
 parthenogenesis in, (29) 837.  
 red, composition, (29) 263.  
 response to carbon dioxide, (40) 820.  
 shading experiments, (39) 748.  
 Spanish, canning and use, (33) 297.  
 tree caterpillar, larval habit, (31) 752.  
 tree caterpillar, notes, (28) 557; (36) 654.  
 tree, crown gall affecting, (28) 447.  
 value in the diet, (29) 664.  
 weevil, notes, (28) 657.  
 white, examination, (29) 463.  
 wilt, notes, (36) 449; (38) 351.  
 wilt, studies, (40) 157.
- Peppermint**—  
 culture, (34) 151.  
 culture experiments, (29) 331.  
 culture in Indiana, (38) 246.  
 essential oil of, (26) 504.  
 extract, analyses, (35) 663.  
 extract, methods of analysis, (29) 798.  
 oil, factors affecting composition, (36) 344.  
 oil industry in Japan, (30) 710, 711.  
 rust, notes, (33) 848.
- Pepsin**—  
 and chymosin, identity, (26) 107.  
 and trypsin, reaction between, (31) 609.  
 as affected by organic acids, (36) 763.  
 as rennet substitute, (34) 574; (37) 576; (39) 884; (40) 80.  
 digestion of casein by, (28) 407.  
 in eggs, (28) 64.  
 protein cleavage by, (36) 108.  
 separation from rennin, (26) 803.  
 studies, (26) 265; (40) 504.  
 use in cheese making, (37) 175, 373, 778, 875.
- Peptic**—  
 activity, determination, (31) 504.  
 proteolysis as affected by heat, (31) 107, 860.
- Peptid, new, isolation, (40) 611.**
- Peptids**—  
 detection, (28) 503.  
 determination in proteolysis, bloods, and urine, (31) 212.  
 effect on cobra venom hemolysis, (36) 276.
- Peptone**—  
 action as affected by distribution in soils, (35) 518.  
 anaphylatoxin, studies, (37) 581.  
 assimilation by plants, (26) 32.  
 decomposition by *Streptothrix*, (27) 620.
- Peptones**—  
 activation by lecithin, (35) 881.  
 determination in proteolysis, bloods, and urine, (31) 212.  
 effect on—  
 action of alcohol on plant cells, (34) 333.  
 baking quality of flour, (26) 356; (30) 555.  
 determination of sugar, (29) 613, 716.  
 oxidation of sulphur in soils, (30) 222.  
 secretion of diastase by fungi, (31) 13.  
 toxicity of inorganic salts, (31) 730.  
 toxicity of nitrates, (30) 227.
- Peptones**—Continued.  
 in soils, (34) 325.  
 nitrification in soils, (26) 722.  
 rôle in hydrogen formation, (31) 763.  
 synthesis by means of enzymes, (34) 708.  
 transformation in intestinal canal, (31) 463.
- Peranabrus scabricollis, notes, (37) 54.**
- Perchlorates, determination in—**  
 Chile saltpeter, (37) 111.  
 presence of chlorids and chlorates, (26) 511.
- Perchloric acid—**  
 preparation from perchlorates, (40) 13.  
 recovery from potassium residues, (38) 312.
- Perclista quercus n.sp., description, (30) 60.**
- Percolation—**  
 lateral, in soils, (31) 216.  
 losses of moisture and plant food by, (33) 619
- Percrystallization, notes, (37) 409.**
- Perdita, notes, (39) 566.**
- Perdix perdix, feeding habits, (30) 454.**
- Peregrinus maidis—**  
 as corn pest, (31) 249.  
 notes, (27) 657.
- Perennials—**  
 culture, treatise, (27) 645.  
 for Illinois, (28) 840.  
 hardy, treatise, (29) 840; (35) 345.  
 herbaceous, rest period in, (33) 223.  
 propagation, (28) 840.  
 varieties for Illinois, (34) 45.
- Perezia—**  
 legeri n.sp., description, (40) 264.  
 mesnili n.sp., description, (40) 65.
- Perfume plants, treatise, (36) 142.**
- Perhydridae, studies, (26) 310.**
- Perhydrol—**  
 as a mouth wash in milk testing, (26) 712.  
 nature and use, (26) 580.
- Pericarditis, traumatic, paper on, (27) 576.**
- Periconia goldeniana, notes, (38) 51.**
- Pericystis alvei, notes, (28) 562.**
- Peridental membrane, relation to mastication, (26) 360.**
- Perideraerus granellus, notes, (33) 658.**
- Peridermium—**  
 acicolum on *Pinus resinosa*, (36) 454.  
 balsameum, occurrence in Washington, (36) 651.  
 californicum n.sp., description, (31) 845.  
 cedri, notes, (27) 654; (32) 346.  
 cerebrum on jack pines, (33) 351.  
 cerebrum, studies, (40) 349.  
 comptoniae n.comb., notes, (31) 348.  
 comptoniae, notes, (31) 641.  
 filamentosum, notes, (39) 859.  
 filamentosum on yellow pine seedlings, (34) 649.  
 fusiforme and *P. cerebrum*, notes, (31) 445; (39) 859.  
 guatemalense n.sp., description, (31) 845.  
 harknessii—  
 and *Cronartium quercuum*, association, (34) 849; (36) 454, 746.  
 infection experiments, (30) 745.  
 notes, (39) 859.  
 inconspicuum n.sp., description, (27) 746.  
 laricis, description, (29) 554.  
 montanum and *P. acicolum*, identity, (35) 851.  
 n.spp., descriptions, (39) 30.  
 occidentale n.sp., studies, (39) 859.  
 peckii, notes, (27) 648.  
 pini, notes, (28) 750.  
 pini, studies, (31) 153.  
 pyriforme—  
 and *Cronartium comandrae*, identity, (34) 539.  
 new hosts, (27) 649; (34) 354.  
 notes, (34) 242; (39) 859.  
 ribicola, description, (37) 354.  
 sp., notes, (30) 647.  
 spp., alternate forms, (37) 844, 845.  
 spp., infection experiments, (30) 537.  
 spp., inoculation experiments, (32) 647.  
 spp., notes, (26) 57; (27) 252; (29) 451, 547; (31) 348; (39) 859.  
 spp., on pines, (31) 845.  
 stalactiforme, infection of *Castilleja miniata* with acidiospores of, (30) 148.  
 stalactiforme, notes, (30) 538.  
 strobii, *see* White pine blister rust.
- Peridermiums from Ohio, (40) 645.**

- Peridroma**—  
 margaritosa spp., notes, (28) 854.  
 saucia, see Cutworm, variegated.
- Perilampidae** of Australia, (39) 154.
- Perilampidae** syrphi n.g. and n.sp., description, (31) 554.
- Perilampus**—  
 chrysopae laevicephalus n. var., description, (36) 556.  
 chrysopae n.sp., description, (31) 459.
- hyalinus**—  
 investigations, (27) 261  
 leaf oviposition, (37) 162.  
 parasitic on locusts, (32) 60.  
 sp., notes, (27) 262; (31) 757.
- Perilitus**—  
 americanus, parasitic on lady beetles, (31) 355.  
 brevicollis, notes, (30) 459.  
 eleodis n.sp., description, (30) 256.  
 leptopsi, parasitic on apple root borer, (26) 353.
- Perilla** cake—  
 analyses, (29) 467; (30) 267, 466.  
 digestibility, (30) 267.  
 feeding value, (29) 467, 869.
- Perilloides** bioculata, notes, (29) 455.
- Perillus** spp., notes, (27) 755.
- Perinephritis** in domestic animals, (26) 176.
- Periodates**, determination, (34) 712.
- Periodicity**, biological, (39) 317.
- Periodids**, organic, studies, (34) 502; (36) 313.
- Periodol**, studies, (39) 80, 286.
- Periplaneta**—  
 americana, see Cockroaches, American.  
 australasiae as a cotton pest, (32) 348.  
 orientalis, remedies, (28) 157.
- Peripneumonia** in bovines, immunization, (26) 676.
- Perisera**—  
 emigrata n.sp., description, (37) 569.  
 emigrata, parasitic on pink bollworm, (37) 667.  
 nigrifemur, notes, (37) 569.
- Perisoreus** obscurus n.subsp., description, (39) 154.
- Perisporiaceae** of South Africa, (40) 132.
- Perisporium** wrightii, studies, (27) 352.
- Perissarthron**, new genus, (40) 655.
- Perissopterus** pulchellus, notes, (31) 356.
- Peritoneum**, absorption of fat in, (32) 563.
- Peritonitis**—  
 in poultry, (39) 791.  
 purulent, of the hen, (39) 393.
- Peritymbia** (Phylloxera) vitifolii pervastatrix, notes, (32) 847.
- Permanganate**—  
 of potash, use against grape gray rot, (27) 850.  
 solutions, preparation and keeping qualities, (38) 412.
- Permeability**—  
 as affected by trivalent and tetravalent cations, (34) 34.  
 notes, (35) 734.  
 of barley grain, (40) 519.  
 plant tissue, studies, (34) 731; (37) 128, 326, 431, 632; (38) 25; (39) 25, 26, 223, 630, 730.  
 soils, (27) 819.  
 soils, determination, (28) 29.  
 soils, relation to irrigation, (32) 586; (38) 788.  
 protoplasmic, colloidal hypothesis, (40) 818.  
 selective, in living cells, (38) 523.  
 studies, tissue tension method, (37) 326.
- Permutite**—  
 absorption of phosphoric acid by, (28) 518.  
 nitrogen, assimilation by plants, (29) 127, 517.
- Peroicid**, fungicidal value, (34) 847; (35) 46; (38) 151.
- Perodipus ordii** luteolus n.subsp., description, (37) 757.
- Peromyscus eremicus** papagensis n.subsp., description, (37) 757.
- Peronea minuta**, parasites of, (31) 752.
- Peronia ferrugana**, notes, (29) 252.
- Peronoplasmopara**—  
 cubensis, notes, (32) 342.  
 cubensis, studies, (36) 249.  
 sp. on hemp, (38) 753.
- Peronospora**—  
 arborescens, notes, (31) 641; (34) 50; (36) 449; (38) 547.  
 cephalariae n.sp., studies, (29) 552.  
 cubensis, notes, (28) 443.  
 efulsa, notes, (26) 548; (37) 550.  
 efulsa, oospore parasite of, (31) 641.  
 gangliiformis, prevention, (26) 342.  
 grisea, notes, (31) 546.
- Peronospora**—Continued.  
 hyoseyami in tobacco seed beds, (33) 147.  
 hyoseyami, notes, (39) 551.  
 infection studies with, (27) 47, 449.  
 jaapiana in Bohemia, (35) 650.  
 maydis, notes, (31) 242.  
 maydis, studies, (37) 552.  
 n.sp., notes, (32) 442.  
 parasitica on Arabis laevigata, (32) 54.  
 parasitica, staining, (26) 52.  
 pedicularis n.sp., notes, (28) 241.  
 (Plasmopara) viticola, studies, (31) 346.  
 polygami on buckwheat, (36) 646.  
 relation to weather, (28) 550.  
 schachtii, notes, (30) 748; (32) 544.  
 schleideni, notes, (37) 553.  
 sp., notes, (27) 253.  
 sp. on cloves, (36) 348.  
 sp. on hemp, (38) 753.  
 sparsa, notes, (29) 650; (33) 854.  
 spp. treatment, (26) 345; (28) 152, 245, 446, 552.  
 trifoliorum, description, (26) 846.  
 trifoliorum, notes, (28) 52; (32) 543.  
 use of powdered fungicides against, (30) 651.  
 viciae, notes, (29) 243; (39) 850.  
 viciae, treatment, (32) 545.  
 viticola, see Grape downy mildew.
- Peronosporaceae**—  
 notes, (32) 544.  
 perennial mycelium in, (34) 154.
- Peronosporales**, North American, studies, (32) 442.
- Peroxidase**—  
 action on chlorophyll, (37) 203.  
 active principle of, (29) 202.  
 activity in diseased potatoes, (26) 548.  
 as a ferment, (26) 202.  
 as affected by alkalis, (29) 202.  
 ferment nature of, (30) 11.  
 histological-chemical detection, (26) 278.  
 in alfalfa, (32) 411.  
 human milk, (26) 410.  
 mammary gland, (32) 412.  
 milk as affected by heating, (29) 310.  
 milk, inactivation, (40) 11.  
 milk, notes, (29) 413.  
 sterile milk, (28) 411.  
 investigations, (33) 409.  
 isolation from plants, (26) 326.  
 notes, (27) 803.  
 plant, mode of action, (36) 609.  
 properties and action, (28) 609.  
 reactions of milk, (32) 412.  
 relation to respiratory pigments of plants, (26) 326.  
 separation from catalase, (27) 408.  
 use of term, (33) 329.
- Peroxydiastase** of wheat, resistance to heat, (26) 833.
- Perphosphate**—  
 effect on activity of soil bacteria, (31) 821.  
 use in agriculture, (38) 330.
- Perry**, single-variety, (40) 414.
- Perry**—  
 analyses, (35) 717; (38) 114.  
 clarifying with casein, (26) 26.  
 defective, utilization, (40) 116.  
 home manufacture, (40) 116.
- Persea**—  
 gratissima, new beetle affecting, (26) 151.  
 pubescens, analyses, (26) 612.
- Persimmon** codling moth in Japan, (40) 52, 167.
- Persimmons**—  
 acidity, (32) 110; (37) 714.  
 adaptation and variety tests, (29) 41.  
 artificial ripening of, (26) 327.  
 astringency in, (35) 820.  
 beetles affecting, (27) 458.  
 changes in during ripening, (28) 444.  
 culture and use, (32) 744.  
 culture in southern Texas, (32) 539.  
 diseases in Japan, (40) 52.  
 dried, preparation, (27) 344.  
 induction of nonastringency in, (29) 264.  
 Japanese—  
 analyses, (28) 525.  
 anthracnose of, (27) 251; (37) 656.  
 as affected by pollination, (31) 440.  
 culture experiments, (28) 142; (38) 41.  
 culture in California, (36) 141.  
 pollenizers for, (30) 740.  
 ripening artificially, (27) 344.  
 loss of astringency during ripening, (26) 327.

- Persimmons—Continued.**  
 navel, notes, (36) 536.  
 new descriptions, (29) 436; (31) 337.  
 notes, (34) 43.  
 parthenogenesis in, (29) 837.  
 premature dropping, prevention, (26) 237.  
 processing experiments, (27) 344.  
 reducing and nonreducing sugars in, (29) 503.  
 seedless fruits of, (32) 142.  
 stocks for, (32) 337.  
 tannin masses in, (30) 502.  
 tannin-colloid complexes in, (26) 564; (27) 228.
- Pertillation, notes, (37) 409.**
- Peruvian bark, methods of analysis, (37) 113.**
- Pervaporation, notes, (37) 409.**
- Pestalozzia—**  
 briardi, notes, (38) 448.  
 capiomonti n.sp., description, (28) 443.  
 feijoa and *P. lucae* n.sp., (39) 549.  
 funerea, morphology and life history, (32) 346.  
 funerea, notes, (38) 225, 849.  
 funerea, notes and treatment, (27) 548.  
 hartigi, notes, (27) 451.  
 heterospora n.sp., description, (30) 48.  
 palmarum, notes, (26) 145; (28) 241; (33) 545, 650;

 mungo radiatus, nodule formation, (38) 529.  
 radiatus, analyses, (38) 572.  
 semierectus as green manure, (37) 320.  
 semierectus, culture, (34) 736.  
 spp., agglutinating properties of seed, (31) 774.  
 spp., analyses, (31) 863.  
 spp., analyses and digestibility, (28) 464.  
 spp., descriptions, (31) 739.  
 spp., notes, (26) 362.  
 trinervis, notes, (30) 525.  
 variation due to effect of light, (39) 527.  
 vulgaris, relation of mortality to seed weight,  
 (28) 636; (30) 237.  
 vulgaris, tetracotyledonous race, (36) 522.

- Phasianns**—  
and *Gallus* hybrids, sex organs of, (28) 877.  
spp., notes, (27) 355.
- Phasin**, agglutinating properties, (31) 774.
- Phasin**, notes, (30) 204.
- Phaenagella heveae** n.s.p., description, (27) 445.
- Phaasant hybrids**, sterility in, (29) 575.
- Pheasants**—  
and fowls, hybridization experiments, (29) 575.  
artificial insemination in, (31) 370.  
breeding and care, (35) 275.  
breeding experiments, (28) 578.  
care and management, (34) 569.  
Chinese, in Missouri, (27) 550.  
crossbreeding experiments, (34) 564.  
crossing with fowls, (27) 573.  
food habits, (40) 254.  
habits of, (31) 154.  
hybridization, (30) 266, 564; (32) 869.  
notes, (27) 355.  
propagation, (28) 752.  
rudimentary parthenogenesis in, (31) 765.  
secondary sex characters in, (26) 774; (40) 871.  
secondary sex characters in, transmission, (32) 264.  
unilateral development of secondary male characters in, (31) 271.
- Pheidole megacephala**—  
as fruit-fly enemy, (40) 459.  
destructive to flies, (30) 554.  
notes, (38) 557.
- Phellomyces sclerotiphorus**, notes, (36) 544.
- Phenacaspis eugeniae**, notes, (29) 654.
- Phenacetin**, periodicals of, (34) 502.
- Phenacoccus**—  
acericola, notes, (26) 147, 856; (33) 253; (34) 752.  
aceris, notes, (38) 464.  
artemisiae, parasite of, (29) 359.  
n.spp., descriptions, (40) 262.  
spp., notes, (29) 251.
- Phenic acid**, aerobic fermentation, (30) 28.
- Phenice moesta**, notes, (26) 857.
- Phenodonus destruens**, studies, (34) 156.
- Phenol**—  
absorption by barley seeds, (37) 25.  
action on plants, (40) 520.  
antiseptic value, (40) 182.  
antiseptics, (39) 184, 185, 586.  
as milk preservative, (32) 576.  
serum preservative, (33) 280.  
soil disinfectant, (31) 621.  
wood preservative, (27) 314.  
detection, (26) 412; (28) 805.  
disappearance from creosoted wood, (29) 111.  
effect on soil organisms, (31) 27; (38) 420.  
effect on "virus fixe" of rabies, (26) 88.  
excretion by sheep, (28) 874.  
excretion on exclusive oat diet, (40) 273.  
fallacies regarding, (35) 484.  
in oil, germicidal power, (40) 882.  
oxidation by peroxidase, (29) 202.  
polyatomic, detection in apples, (26) 208.  
preservatives, determination in serums, (38) 316.  
sterilization of soils by, (32) 816.  
toxicity, (38) 283.  
use against tetanus, (29) 883.
- Phenolic insecticides and fungicides**, (35) 208.
- Phenological observations**—  
at Wauseon, Ohio, (33) 825.  
importance, (34) 536.  
in British Isles, (37) 717; (40) 210.  
in Holland, (40) 716.  
in Nova Scotia, (36) 208.  
on cereals, (40) 811.
- Phenology**—  
relation to fruit culture and agriculture, (29) 15.  
use in agriculture, (26) 613.  
value of temperature sums in, (27) 509.
- Phenolphthalein**, detection in ethyl alcohol, (29) 312.
- Phenolsulphthalein**—  
electrical conductivity, (37) 409.  
indicators, studies, (40) 202.
- Phenosperry** in *Nicotiana*, (34) 136.
- Phenylalanin**—  
action upon esters, (31) 711.  
as source of ammonia, (29) 723.
- Phenylhydrazids** of acids of sugar group, (37) 201.
- Phenylhydrazin** reaction, modification, (26) 115.
- Phidippus coloradensis**, notes, (29) 455.
- Philaenatomyia**—  
crassirostris, notes, (31) 777.  
insignis, mouth parts and sucking apparatus of, (29) 760.
- Philaenus** spp.—  
injurious to grass, (30) 856.  
life history, (36) 458.
- Phlagathes laetus**, notes, (36) 654.
- Philaronia bilineata**, life history, (36) 458.
- Philephedra theobromae** n.s.p., description, (35) 358.
- Philippine**—  
College of Agriculture, notes, (36) 600; (37) 100.  
Islands, development, (35) 193.
- Phillipsite**—  
extraction of potash from, (27) 323.  
fertilizing value, (27) 725.
- Phillyrea media**, fatty acids of, (31) 312.
- Philogalleria sextuberculata** n.s.p., description, (28) 162.
- Philoponectroma pectinatum** n.s.p., description, (31) 355.
- Philotrypis** n.spp., descriptions, (30) 55.
- Philtraea elegantaria** affecting privet, (38) 765.
- Phlebotrophia mathesonii**, notes, (29) 252.
- Phlebotomi**, Maltese, studies, (35) 57.
- Phlebotomus**—  
atroclavatus n.s.p., notes, (30) 658.  
habits, (29) 856.  
life history, (26) 349.  
minutus africanus, relation to oriental sore, (32) 780.  
minutus, flagellate infection of, (32) 60.  
minutus, natural host of, (30) 159.  
papatasi, notes, (26) 656.  
papatasi, relation to "three days fever," (32) 59; (37) 460.  
review of literature, (30) 159.  
verrucarum, relation to verruga, (30) 252, 658; (32) 248, 350; (37) 358, 460.  
verrucarum, review of investigations, (35) 258  
vexator, feeding habits, (31) 352.
- Phlegthontius**—  
quinque-maculatus, *see* Tobacco worm.  
saxa, *see* Tomato worm.  
spp. injurious to horse nettle, (35) 657.
- Phleospora pteleae** n.s.p., description, (37) 748.
- Phlepsius**—  
apertus, life history, (35) 553.  
irroratus, notes, (27) 858.  
n.s.p., description, (34) 255.
- Phleum**, ash constituents of, (30) 334.
- Phloeophthorus liminaris**, *see* Peach bark beetle
- Phloeosinus** n.spp., descriptions, (35) 856
- Phloeothripidae**, synonymy, (35) 255.
- Phloeothrips oleae**—  
endophasus parasite of, (26) 553.  
enemies of, (26) 246.  
notes, (27) 55.
- Phloeotribus**—  
liminaris, notes, (36) 258.  
oleae, notes, (27) 857.  
porteri, notes, (37) 460.  
puncticollis, notes, (27) 458.
- Phlomis pungens**, drought resistance, (36) 734
- Phlorizin**, action on milk secretion, (37) 272.
- Phlox**—  
as host of eelworm, (34) 349.  
culture in Alaska, (29) 743.  
drummondii, heredity of color in, (33) 644.  
nematodes affecting, (31) 56.  
plant bug in Maryland, (38) 155.  
varieties, (34) 836.
- Phlyctaenia**—  
ferrugalis, notes, (26) 147; (28) 854; (37) 255  
heveae n.s.p., notes, (39) 452.  
rubigalis, notes, (26) 147.
- Phlyctaenodes**—  
mudalis, notes, (31) 849.  
sticticalis, life history and remedies, (31) 550,  
551.  
sticticalis, notes, (31) 155, 157, 548.
- Phobetes albinopennis**, notes, (27) 558.
- Phoebe**, black, destruction of locusts by, (28) 351.
- Phoebes**, feeding habits, (28) 57.
- Phoenicoccus marlatti**—  
notes, (29) 255.  
remedies, (30) 358.

- Phoenix—  
 canariensis, culture in Arizona, (32) 233.  
 dactylifera, culture in Egypt, (27) 645.  
 ripening processes of, (26) 310.  
 skipper, life history and habits, (29) 655.
- Pholiota—  
 adiposa, description, (35) 755.  
 spp. on forest trees, (40) 349.
- Phoma—  
 anethi, notes, (28) 851.  
 apicola, relation to celery root scab, (33) 547.  
 apicola, studies, (30) 847.  
 apicola, treatment, (33) 848.  
 arbuti n.sp., description, (37) 557.  
 asparagi and Cytospora stictostoma, relation, (38) 752.  
 batatae, notes, (29) 153.  
 batatae, studies, (28) 548.  
 betae, nitrogen fixation by, (37) 123.  
 betae, notes, (26) 548; (27) 544, 728; (29) 647; (30) 47, 448; (31) 344; (34) 350.  
 betae on sugar beet leaves, (33) 246.  
 betae, physiology of, (28) 545, 628; (33) 53.  
 betae, relation to sugar beet damping off, (33) 246.  
 betae, studies, (34) 156; (35) 546.  
 betae treatment, (25) 648.  
 brassicae, notes, (34) 241.  
 bumeliae n.form, description, (37) 748.  
 cajani, notes, (34) 52.  
 cinerescens, notes, (38) 454.  
 citricarpa, notes, (34) 644.  
 citricarpa, treatment, (33) 149; (37) 352.  
 cookei rectispora n.var., description, (32) 149.  
 destructiva on tomatoes, (33) 147.  
 foeniculina, notes, (30) 240, 746.  
 (Fusicoccum) cinerescens, notes, (27) 747.  
 hevae, notes, (35) 45.  
 lavandulae, studies, (36) 851.  
 lingam, studies, (40) 846.  
 mali, notes, (34) 543, 646; (37) 842.  
 napobrassicae, notes, (23) 547.  
 nipponia n.sp., description, (35) 348.  
 oleracea, notes, (39) 52.  
 oleracea, studies, (26) 546.  
 pectinata n.sp., description, (37) 748.  
 piceina, description, (27) 450.  
 pigmentivora n.sp., description, (27) 253.  
 pithya, notes, (26) 852.  
 pomi, notes, (27) 652, 849; (30) 541; (38) 550.  
 rostrata n.sp., description, (32) 842.  
 socia n.sp., description, (35) 153.  
 solani, notes, (31) 747.  
 sp. affecting potatoes, (31) 345.  
 sp. affecting sugar cane, (31) 539.  
 sp., injurious to figs, (26) 449.  
 sp., notes, (28) 750; (30) 651, 747.  
 sp. on potatoes, (40) 51.  
 sp. on young cedars, (38) 53.  
 spp., inoculation experiments, (27) 651.  
 spp., notes, (29) 547; (31) 244, 646.  
 spp., treatment, (33) 848.  
 tabifica, notes, (26) 747; (37) 249.  
 tuberosa n.sp., description, (36) 249.  
 umbilicaris n.sp., description, (26) 449.
- Phomopsis—  
 British species, (38) 752.
- citri—  
 description and history, (40) 158.  
 distribution, (38) 757.  
 life history and treatment, (28) 245.  
 n.sp., notes, (28) 549.  
 notes, (29) 248.  
 relation to citrus gummosis, (37) 656.  
 studies, (28) 651; (29) 247; (31) 750; (33) 55; (39) 56.  
 treatment, (33) 149.
- kalmiae n.sp., description, (39) 253.
- mali—  
 inoculation experiments, (31) 150.  
 n.sp., description, (28) 748.  
 n.sp., notes, (29) 154.  
 notes, (34) 247; (36) 451.  
 relation to apple rot, (33) 348.
- palmicola arecae n.var., notes, (37) 148.  
 sp. on eggplant, (39) 454.  
 sp., studies, (26) 449.
- vexans n.comb., studies, (31) 747.
- Phomopsis migrans n.sp., notes, (37) 148.
- Phonolite—  
 as source of potash, (36) 728.  
 effect in water culture, (28) 817.  
 fertilizing value, (26) 726; (27) 125, 421, 725; (28) 522; (29) 215, 319, 625; (30) 221, 427, 527, 724; (31) 423, 519, 527.  
 ground, fertilizing value, (28) 125.  
 ground, zeolitic properties, (29) 518.  
 indirect effects of, (28) 725.  
 meal, fertilizing value, (35) 323.  
 potash, solubility, (34) 328.  
 solubility, (30) 221.
- Phonolites, Austrian, fertilizing value, (38) 726.  
 Phonolith as fertilizer, (26) 526.
- Phora—  
 fasciata, notes, (39) 868.  
 spp., destruction of Melipona bees by, (31) 255.  
 spp., larval morphology, (30) 757.
- Phoracantha—  
 recurva, notes, (36) 360.  
 semipunctata on eucalyptus, (39) 868.
- Phoradendron—  
 juniperinum libocedri, parasitism, (27) 655.  
 parasitic on Phoradendron, (40) 226.  
 sp., notes, (37) 453.  
 villosum, infection experiments, (30) 247.
- Phoranthia occidentis, notes, (36) 255.  
 Phorbas mirabilis, studies, (40) 265.
- Phorbia—  
 brassicae, see Cabbage maggot.  
 ceparum, see Onion maggot.  
 fusciceps—see also Bean fly and Bean maggot.  
 notes, (27) 864; (32) 418; (36) 657; (37) 854.  
 remedies, (30) 355.  
 muscaria, hibernation, (34) 254.
- Phoridae—  
 in United States National Museum, (30) 56.  
 synonymic catalogue, (34) 654.
- Phormia—  
 azurea, sense reactions, (40) 859.  
 regina, hibernation, (38) 262.  
 regina, life history, (30) 656.  
 regina, notes, (28) 255; (34) 554; (38) 161.
- Phormidium tenue, notes, (28) 31.
- Phormium tenax—  
 binder twine from, (27) 534.  
 fiber, strength of, (29) 313.
- Phorocera—  
 claripennis—see also Euphorocera claripennis.  
 notes, (29) 455; (31) 752.  
 parasitic on alfalfa caterpillar, (32) 58.  
 parasitic on army worm, (34) 251.  
 erecta, parasitic on beet webworm, (26) 250.  
 saundersii, notes, (28) 253.  
 xanthura, notes, (27) 559.
- Phorodon humuli, see Hop aphid.
- Phosphates in malt, (34) 502.
- Phosphate—  
 agricultural, fertilizing value, (31) 820.  
 Algerian, fertilizing value, (29) 519, 632; (31) 820.  
 Algerian, utilization in different soils, (30) 221.  
 ammonium-magnesium, from urine, (40) 320.  
 basic, fertilizing value, (35) 428.  
 basic lime, analyses, (39) 222.  
 Belgian, fertilizing value, (34) 518.  
 Bernard, fertilizing value, (31) 820; (32) 323.  
 buffer mixtures, hydrogen electrode potentials of, (35) 801.  
 calcined, analyses, (32) 32.  
 calcined, fertilizing value, (30) 427, 721; (38) 619.  
 citrate-soluble, fertilizing value, (28) 721.  
 deposits—  
 awards for location in Germany, (39) 521.  
 in Alabama, (31) 31.  
 in Alberta, (35) 429.  
 Australia, utilization, (40) 25.  
 Chile, (32) 723.  
 Decatur County, Tennessee, (29) 822.  
 Egypt, (30) 723.  
 Florida, (34) 424, 821.  
 Florida, origin, (30) 222.  
 Idaho, (28) 626; (31) 622; (35) 429.  
 Idaho and Wyoming, (40) 725.  
 Madagascar, (30) 724; (31) 623.  
 Montana, (28) 626; (32) 323; (34) 329; (36) 728.  
 Naura Island, (31) 321.  
 North America, (27) 500; (29) 128.  
 northern Utah, (32) 217.  
 Russia, (27) 521.

Phosphate—Continued.  
deposits—continued.

## Phosphates—Continued.

sources in United States, (26) 819.

trade in, (31) 29.

treatise, (33) 126.

use, (35) 325.

in France, (27) 727.

in Minnesota, (37) 217.

in Victoria, (29) 214.

on New Zealand soils, (29) 730.

on pastures, (26) 437.

on red soils, (32) 723.

utilization by plants, (38) 330.

utilization in different soils, (30) 221.

valuation, (30) 26.

world's supply, (39) 521.

## Phosphates—

action, (27) 407, 408; (28) 110, 202.

as affected by toluol, (28) 803.

investigations, (30) 203.

## Phosphatic—

fertilizer, new, (39) 427, 428.

## fertilizers—

assimilation, (27) 725.

comparison, (26) 31, 123, 426, 536, 537, 538,

622, 817, 837; (28) 124, 721, 816.

effect on keeping quality of fruit, (27) 644.

effect on pasture grasses, (27) 125.

relation to grape chlorosis, (26) 344.

review of investigations, (27) 128.

use in France, (27) 326.

marls, analyses, (36) 821.

sands in Yonne, France, (27) 422.

## slag—

accessory constituents of, (30) 723.

analyses, (30) 27; (37) 323.

analyses and fertilizing value, (35) 520.

application tests, (26) 331.

## slag as affected by—

ammonium sulphate, (28) 818.

calcium carbonate, (26) 428, 527.

crumbling, (30) 722.

## slag—

as soil neutralizer, (37) 815; (40) 125.

availability, (29) 797; (37) 816; (39) 24.

availability of phosphoric acid in, (35) 428.

citrate solubility, (36) 428.

composition, (27) 218; (29) 822; (30) 126.

## slag, effect on—

activity of soil bacteria, (31) 821.

germination of seeds, (29) 328.

maturity of cotton, (31) 39.

potash salts, (28) 508.

the eye, (31) 29.

## slag—

exports from Germany, (30) 724.

extraction with citric acid, (34) 331.

fertilizing value, (26) 33, 233, 331, 426, 533,

534, 536, 630, 817; (27) 234, 530, 535, 627,

638, 639, 725, 736, 834, 837; (28) 425, 721,

816; (29) 31, 228, 233, 319, 418, 519, 632,

635, 737, 829; (30) 126, 134, 230, 427, 436,

721, 835, 839; (31) 139, 518, 630, 820, 829;

(32) 323, 518, 630, 831; (33) 723, 729, 731;

(34) 22, 35, 298, 330, 518, 519; (35) 220, 428,

521; (36) 123, 217, 228, 738, 820, 833; (37)

219, 534, 540, 723, 815; (38) 135, 230, 432,

527, 619, 634; (39) 429, 520.

for fruit trees, (29) 639.

for grass lands, (29) 530; (31) 132; (33) 330,

527.

for moor soils, (39) 438.

for peaty pastures, (36) 425, 740.

industry in Austria-Hungary, (33) 822.

insecticidal value, (28) 563.

inspection in Netherlands, (27) 725.

lime in, (26) 34, 205.

mixing with superphosphate, (37) 816.

open-hearth, (39) 520.

powders, methods of analysis, (33) 610.

preparation and use, (30) 27.

production and use in 1911, (29) 213.

production and use in 1913, (32) 425.

purchasing, (36) 738.

red coloration in, (34) 820.

residual effects, (26) 428; (37) 23.

solubility, (32) 116; (33) 519; (37) 323, 723;

(38) 519.

solubility as affected by fluorspar, (35) 204.

solubility in water saturated with carbon

dioxide, (35) 521.

Phosphatic—Continued.  
slag—continued.

- solubility in weak organic acids, (40) 709.
- soluble silicic acid in, (29) 409.
- use, (37) 723.
- use in Germany, (36) 726.
- use on pastures, (26) 437.
- use on peat soils, (37) 135; (38) 433.
- utilization by oats and lupines, (31) 733.
- utilization in different soils, (30) 221.
- valuation, (29) 823.

## Phosphatids—

- betain from, (26) 713.
- distribution in milk, (36) 862.
- extraction from tissues, (35) 201.
- metabolism, (27) 464.
- nitrogenous hydrolysis products of, (31) 608.
- occurrence in milk, (30) 312.
- of milk, (33) 660.
- of the kidney, (30) 477.
- plant, studies, (27) 202.
- purification, (30) 410.
- studies, (30) 163.

## Phosphites, determination, (40) 409.

## Phosphomolybdic acid as reagent for saffron, (32) 207.

## Phosphoproteins, loss from grass during curing, (32) 111.

## Phosphoric acid—

- absorption by bacteria, (29) 315.
- absorption by forest soils, (28) 421.
- absorption by oats, (31) 632.
- absorption by soils, (31) 723; (33) 515.
- absorption by zeolites, (28) 518.
- action as affected by salts, (27) 623.
- as affected by alumina, (27) 722.
- affected by ammonium sulphate, (28) 818.
- affected by bacteria, (29) 315.
- water sterilizing agent, (29) 474.
- winter spray for fruits, (30) 641.
- assimilation by plants, (31) 219.
- assimilation by rice, (38) 340.
- availability—

- as affected by carbon dioxide, (27)<sup>1</sup>514.
- in barnyard manure, (26) 323, 424.
- basic slag, (29) 797.
- bat guano, (27) 825.
- fertilizers, (32) 409.
- oil cakes, (26) 428.
- soils, (26) 321.
- biological absorption in soils, (27) 216.
- citrate-soluble, in crude phosphates, (31) 16.
- citric-acid soluble—
- determination, (30) 809.
- determination in Thomas slag powder, (29) 409, 410; (32) 611.
- production and fertilizing value, (32) 218.
- concentration in soils, (27) 418.
- determination, (26) 406; (27) 110; (28) 804; (31) 17; (32) 115, 294, 409; (33) 110, 803; (34) 314, 409, 805; (35) 415, 502, 503, 613; (37) 412, 615, 802; (39) 13, 312.

## determination—

- as ammonium-magnesium phosphate, (33) 204.
- filter for, (38) 506.
- in baked goods, etc., (32) 206.
- basic slag, (27) 495.
- beer, (29) 798; (32) 297.
- beverages, (27) 499.
- blood, (40) 16.
- calcium phosphate, (34) 410.
- feed limes, (33) 115.
- fertilizers, (26) 108; (32) 205; (35) 12, 314.
- foods, (29) 809; (37) 618.
- mineral phosphates, (33) 13, 313.
- organic substances, (28) 20.
- peat soils, (39) 504.
- phosphate rock, (28) 111.
- phosphates, (31) 314.
- presence of colloidal silicic acid, (28) 203.
- presence of magnesium chlorid, (29) 609.
- slag, (29) 795.
- soils, (26) 21; (27) 514, 713; (28) 123, 610; (31) 16; (36) 505.
- Thomas slag, (31) 112, 410.
- vinegar, (27) 410.
- wine, (30) 414.
- of availability, (28) 222.
- displacement by water in leaves, (29) 218.

## Phosphoric acid—Continued.

## distribution in—

- blood, (40) 176.
- loam soils, (31) 618.
- milk, (26) 610.

## effect on—

- bread fermentation, (27) 268.
- burning quality of tobacco, (38) 140.
- decomposition of sugar in soils, (37) 628.
- peaches, (33) 840.
- quality of barley, (31) 330.
- soils, (26) 216.
- sugar beets, (30) 438.
- variation of tomatoes and beans, (29) 339.
- weed growth in meadows, (38) 141.
- yield of rubber, (31) 444.

## esters of inosit, studies, (27) 406.

- exchange in plants, investigations, (28) 818.
- extraction from phosphates, (31) 329; (36) 712.
- fertilizing value, (27) 325, 436, 437; (29) 227; (30) 731; (33) 519; (38) 218.
- fixation in soils, (30) 217; (33) 122; (35) 624, 725; (37) 423.

## for meadow soils, (26) 424.

## for peaches, (38) 242.

## for sweet potatoes, (33) 337.

## forcing plants with, (28) 837.

## forms of, in soil, (38) 117.

## from barnyard manure, (26) 123.

## from "mine-run" phosphates, (39) 819.

## hydrochloric-acid-insoluble, in soils, (29) 511.

## importance in the animal organism, (33) 758.

## in alcoholic extracts of leaves, (27) 731.

## animal nutrition, (29) 869.

## feeding stuffs, digestibility, (40) 769.

## Hawaiian soils, (36) 427.

## honey, (33) 164.

## humus of soils, (37) 121.

## loess soils, (35) 809.

## peas, (40) 508.

## soil, solubility, (39) 24.

## soils, notes, (26) 125.

## soils, studies, (27) 500, 821; (28) 29.

## soils, transformation, (28) 417.

## starch, (34) 710; (36) 501.

## wheat, studies, (27) 500.

## inorganic, determination, (33) 111

## inosit, of feeding stuffs, (39) 14, 675.

## insoluble, determination, (38) 205

## isolation from starch, (35) 502.

## long-continued use, (34) 128.

## loss during fusion with ammonium fluorid, (36) 613.

## loss from manure, (32) 818.

## loss from soils, (27) 321; (29) 211.

## loss in drainage water, (26) 620.

## loss in industrial wastes, (37) 630.

## manufacture, (29) 418; (34) 329.

## metabolism, (26) 765.

## metabolism in infants, (29) 166.

## minimum, for plant growth, (29) 22.

## mobilization in soils, (26) 817; (31) 721; (36) 515.

## organic, of cottonseed meal, (28) 505; (30) 707.

## organic, of rice, (32) 712.

## organic, of wheat bran, (32) 17.

## organic v. inorganic, for fowls, (31) 569.

## paper on, (26) 406.

## precipitation as affected by inversion, (28) 715.

## reaction of glycerol with, (31) 709.

## recovering from phosphate rock, (36) 805.

## relation to nitrogen in flour, (26) 661.

## removal by corn crop, (37) 232.

## removal from soil by crops, (39) 724.

## reverted, assimilation by plants, (34) 331.

## reverted, determination, (29) 795; (31) 714.

## reverted, fertilizing value, (30) 428.

## rôle in plant nutrition, (26) 530.

## solubility in soils, (37) 18.

## sources of, (39) 429, 430.

## spring application, (33) 625.

## use on moor soils, (27) 325; (38) 132.

## water-soluble, determination in superphosphate, (30) 809.

## water-soluble v. citrate-soluble, (36) 727.

## Phosphoric anhydrid—

## content of wheat and corn products, (39) 314.

## determination, (27) 206.

## determination in soils, (31) 313.

- Phosphoric acid—  
 in corn meal, (33) 752.  
 solubility in mixed fertilizers, (38) 519.
- Phosphorite—  
 as affected by calcium carbonate, (26) 428, 527  
 deposits in Russia, (35) 521; (38) 817.  
 fertilizing value, (29) 318; (37) 323.  
 Kasan, fertilizing value, (34) 330.  
 soil suitable for, (26) 623.
- Phosphorus—  
 as affected by ammonium salts, (29) 624; (35) 816.  
 assimilation by plants, (27) 340.  
 effect on soils, (26) 30.  
 from Sengillet, (34) 329.  
 Russian, superphosphates from, (27) 627.
- Phosphorus—  
 assimilation by *Aspergillus niger*, (26) 203.  
 assimilation by lower algae, (28) 35.  
 availability in soils, (31) 618.  
 casein, biological significance, (27) 169.  
 compounds—  
 assimilation by ruminants, (31) 71.  
 availability in rations for ruminants, (26) 568.  
 effect on milk, (26) 775.  
 effect on milk secretion, (27) 176.  
 in animal metabolism, (32) 601, 858.  
 in animal nutrition, (29) 869.  
 nutritive value, (26) 565, 765; (27) 775.  
 of cottonseed meal, (37) 502.  
 cottonseed meal and wheat bran, (29) 804.  
 seeds, (26) 501.  
 serum, (35) 714.  
 compounds, organic—  
 and inorganic, metabolism of, (33) 462.  
 decomposition, (26) 501.  
 hydrolysis by dilute acid and alkali, (31) 805.  
 hydrolysis by enzymes, (29) 166.  
 of feeding stuffs, separation, (27) 615.  
 of wheat bran, (28) 17, 505; (33) 11, 464, 802.  
 therapeutic value, (33) 664.  
 compounds, water-soluble, extraction from plants, (27) 407.  
 concentration in surface soil, (31) 720.  
 conservation in urine, (27) 500.  
 deficiency, effect on bones, (32) 561.  
 deficiency, effect on oat plant, (40) 324.  
 determination, (27) 503; (33) 803; (34) 409, 805; (39) 311; (40) 112.  
 determination—  
 as phosphoric acid, (28) 203.  
 citro-molybdate method, (28) 312.  
 in ash, (36) 204.  
 bone ash, (36) 806.  
 feces, (39) 675.  
 fertilizers and feeding stuffs, (32) 805.  
 foods, (29) 799.  
 milk, (27) 208.  
 plant materials, (35) 613.  
 plants, (26) 501.  
 presence of sulphuric acid, (34) 112.  
 proteins, (26) 501.  
 soil extracts, (34) 10.  
 soils, (27) 499; (34) 806; (36) 413, 612; (38) 205.  
 urine and feces, (39) 806.  
 vegetable products, (27) 410.  
 wheat, (40) 507.  
 diffusible, in cow's milk, (34) 271.  
 distribution in—  
 blue grass soils, (36) 424.  
 prairie surface soils, (36) 514.  
 striated muscle, (32) 561.  
 effect on—  
 alfalfa and other legumes, (37) 828.  
*Aspergillus* spp., (29) 825.  
 bacterial activity of soil, (39) 325.  
 chlorophyll formation, (35) 435.  
 development of animals, (30) 465.  
 grapes, (31) 339.  
 growth of bones, (31) 69.  
 nutrition and growth in plants, (28) 225.  
 wheat, (39) 127.  
 for alfalfa, (30) 335.  
 for Missouri soils, (33) 212, 213, 214, 215.
- Phosphorus—Continued.  
 for South Dakota soils, (29) 728.  
 importance in animal nutrition, (31) 663.  
 in animal organism, (30) 669; (33) 167.  
 blood of lactating cows, (37) 308.  
 casein, (32) 606.  
 cottonseed meal, forms, (27) 611.  
 feeding stuffs, (30) 867.  
 flour, (26) 250.  
 foods, relation to nutrition diseases, (26) 264.  
 granitic soils, (37) 522.  
 growing pigs as affected by protein consumption, (32) 72.  
 Indian foodstuffs, (27) 461.  
 matière noire, studies, (26) 814.  
 seeds, variations in, (27) 108.  
 soils, effect on composition of turnips, (29) 417.  
 soils, solubility, (39) 821.  
 soils, studies, (28) 815.  
 turnip roots, relation to availability of soil phosphorus, (38) 326.  
 wheat and flour, (30) 362.
- inorganic—  
 determination, (32) 299; (34) 315.  
 determination in plant substances, (28) 21.  
 determination in turnips, (26) 527.  
 in milk, (37) 208.  
 metabolism of, (30) 669.  
 lecithin, determination in macaroni, etc., (33) 14.  
 lipid and acid-soluble, determination in serum, (34) 613.  
 lipid, in animals, (33) 69.  
 loss in curing hay, (26) 574.  
 manure as source of, (39) 427.  
 manuring, effect on composition of turnips, (26) 527.  
 metabolism—  
 in *Aspergillus niger*, (30) 727.  
 in 14-year old boys, (30) 262.  
 of, (30) 465.  
 of lambs, (33) 761.  
 of women, (40) 174.  
 on a rice and vegetable diet, (26) 865.  
 nutrition of plants, notes, (34) 805.  
 of citrus grove soils, (39) 421.  
 of different sources for oats and lupines, (31) 733.  
 organic—  
 and inorganic, nutritive value, (30) 97; (31) 563.  
 determination in soils, (26) 803; (28) 29.  
 from inorganic phosphates, (26) 772.  
 in soils, (36) 212.  
 pentoxid, determination, (36) 713.  
 physiology of during growth, (27) 169.  
 phytin, determination in plant products, (38) 11.  
 phytin, of feeding stuffs, (40) 772.  
 phytin, utilization by pigs, (39) 675.  
 removal from soil, (39) 517.  
 requirement of barley and oats, (37) 34.  
 resorption and retention by the intestine, (28) 865.  
 retention in growing pigs, (28) 469.  
 soil, as affected by heat and oxidation, (27) 122.  
 soluble, as affected by bacteria, (26) 723.  
 supply of United States, (31) 295.
- Phosphotungstate precipitate of yeast preparation, (35) 311.  
 Phosphotungstic acid, precipitating with, (26) 511.  
 Phosphotungstic-phosphomolybdic compounds as color reagents, (28) 804.  
 Photochemical effects from mercury vapor lamp and sunlight, (29) 218.  
 Photogrammetry, application to forestry, (26) 141.  
 Photometer for plant studies, (39) 524; (40) 521.  
 Photometric analysis, review of investigations, (34) 202.  
 Photomicrography of parasites, (29) 478.  
 Photosynthesis—  
 and low temperatures, review of literature, (32) 640.  
 artificial, studies, (33) 727.  
 as affected by incomplete culture solution, (38) 523.  
 dynamic aspects, (40) 223.  
 in cotton, studies, (27) 732.  
 plants, (27) 427.

- Photosynthesis—Continued.  
 in plants, studies, (33) 627.  
 submerged land plants, (32) 329.  
 mechanism, (36) 730.  
 methods of study, (39) 432.  
 primary sugar of, (36) 30.  
 relation to powdery mildew infection, (33) 244.  
 relation to soil moisture, (36) 525.  
 review of investigations, (35) 821.

- Phytophthora—  
arecae on potatoes, (32) 343.  
cactorum, notes, (29) 549; (37) 550.  
cactorum, studies, (34) 746.  
colocasiae, description and treatment, (31) 52.  
colocasiae, notes, (30) 845; (37) 148.  
disease of cotton, (39) 754.  
diseases of Hevea, (39) 459, 752, 759.  
erythrosetica—  
morphology and cytology of, (33) 53.  
n.sp., description, (29) 550.  
notes, (29) 549; (32) 229; (37) 350; (39) 250.  
sexual organs, (39) 431.  
studies, (31) 543.
- faberi—  
notes, (27) 451; (29) 155, 248, 547; (31) 54, 242, 645; (32) 345; (33) 545; (34) 349, 540, 744, 849; (35) 45, 251; (36) 347, 746, 852, (37) 148, 349, 452, 458; (38) 53; (39) 151; 357, 752, 849; (40) 155, 252.  
relation to cacao canker, (32) 548.  
studies, (33) 549; (38) 554; (40) 54.  
treatment, (27) 750; (30) 543; (38) 759.
- infestans—*see also* Potato late blight.  
notes, (40) 47.  
on tomato, (39) 651, 850.  
meadii n.sp. on Hevea, (40) 845, 852.  
n.spp. from Japan, (39) 753.  
nicotianae, studies, (37) 553.  
notes, (31) 541.
- omnivora—  
arecae, notes, (34) 55.  
arecae, treatment, (36) 48.  
as affected by cold, (34) 538.  
notes, (26) 446; (28) 54, 55; (34) 644; (35) 353 (P. cactorum), notes, (36) 649.  
on ginseng, life history, (31) 447.  
on tomato and belladonna, (40) 844.
- parasitica—  
n.sp., description, (29) 548.  
on coconuts, (34) 349.  
on Vinca rosae, (37) 844.  
studies, (38) 547.
- phaseoli, notes, (39) 52.  
rearrangement of species, (29) 550.  
resting mycelia of, (29) 646.  
review of literature, (31) 242.  
sp. affecting cotton, (29) 749.  
sp., notes, (26) 851; (27) 751.  
sp. on castor beans, (34) 50.  
sp. on coconut, (34) 50; (40) 751.  
sp. on cotton, (40) 155.  
sp. on oats, (35) 651.  
sp. on rubber, (37) 757.  
sp., relation to Hevea canker, (29) 352.  
spp., notes, (29) 445; (39) 146.  
spp. on cacao and nutmeg, (38) 554.  
spp. on rubber, (38) 554, 759.  
studies, (32) 442; (33) 244; (36) 747.  
syringae, description and treatment, (29) 249.  
syringae, notes, (30) 647.  
terrestris n.sp., description, (38) 251.

- Phytophthora**—Continued.  
 terrestria, studies, (39) 457.  
 treatment, (28) 446.
- Phytosephus dissimilis** n.sp., description, (35) 365.
- Phytosterol**—  
 content of soy beans, (26) 607.  
 crude, from coconut fat, (28) 809.  
 detection in animal and vegetable fats, (29) 204;  
 (32) 293.  
 detection in animal fats, (31) 808; (35) 615.  
 in plant fats, (32) 206.
- Piceallini**, recipes, (28) 715.
- Picea**—  
 engelmanni, new leaf and twig disease of, (33) 351.  
 excelsa, phosphorus content, (26) 501.  
 rubens, length of tracheids in, (33) 143.
- Picker dirt**, analyses, (32) 32.
- Pickle worm**, notes, (29) 353.
- Pickle worm**, studies, (34) 855.
- Pickles**—  
 bottled, examination, (29) 361.  
 manufacture, (30) 613.  
 recipes, (32) 560; (38) 95.  
 tomato, recipes, (28) 715.
- Pickling**—  
 and preserving, (39) 614.  
 treatise, (32) 253.
- Picolin carboxylic acid**, effect on plant growth, (28) 324.
- Picotees**, handbook, (26) 139.
- Picramic acid**—  
 in nitrogen determination, (40) 806.  
 preparation, (40) 203.
- Pierasma excelsa** as an insecticide, (32) 649.
- Picric acid**—  
 as titrametric standard, (33) 611.  
 in blood sugar determinations, source of error,  
 (40) 116, 713.  
 insecticidal and larvicidal value, (34) 359.
- Pietou** disease in cattle and horses, cause, (26) 783.
- Pidan**, analyses, (36) 362.
- Pie melons**, feeding value, (31) 265.
- Pieris**—  
 brassicæ—  
 notes, (27) 755.  
 parasites of, (40) 65, 264.  
 remedies, (26) 561.  
 studies, (40) 263, 656.  
 monuste, notes, (28) 453.  
 rapae in Maryland, (38) 154.  
 rapae, studies, (40) 263.  
 sp., notes, (26) 857.  
 spp., feeding habits, (28) 553.
- Plesma capitata**, injurious to sugar beets, (26) 348.
- Pine grass**, analyses and use, (30) 437.
- Pig**—  
 and corn clubs, combining, (30) 694.  
 breeders' association in Bavaria, (30) 258.  
 club manual, (33) 791.  
 clubs—  
 and the swine industry, (39) 498.  
 in Alabama, (29) 792.  
 Arkansas, (33) 95.

decomposition in soil, (40) 214.  
digestibility, (28) 464.  
significance and history, (40) 819.  
nursery stock, growth and mortality, (38) 847.  
nuts, microscopic identification, (28) 565.

## Pine—Continued.

- oil, chemistry of, (33) 19.
  - oil, insecticidal value, (34) 359.
  - reproduction as affected by bear clover, (40) 842.
  - resin, effect on soils, (36) 513.
  - root disease, studies, (27) 854.
  - rust, European, in Wisconsin, (30) 653.
  - rust, overwintering on currants, (31) 54.
  - rust, treatment, (34) 650.
  - rusts in Sweden, (33) 846.
  - rusts, new species, (39) 30.
  - rusts, notes, (29) 547; (31) 641; (40) 349, 645.
  - rusts, studies, (31) 153; (39) 859.
  - sawfly, European, *see* *Diprion simile*.
  - scale in Argentina, (39) 560.
  - seed—
    - as affected by source, (29) 544.
    - beds, disinfection, (33) 250.
    - beds, fungus flora, (40) 852.
    - collection, (29) 444.
    - destruction by squirrels, (31) 154.
    - factors affecting germination, (26) 543.
    - germination as affected by chemicals, (28) 843.
    - germination tests, (27) 444; (38) 447.
    - improvement of quality, (29) 343.
    - selection and extraction, (28) 440.
    - testing, (27) 243; (29) 44; (35) 543.
  - seedling disease, notes, (37) 458.
  - seedlings—
    - absorption of fertilizers by, (26) 443.
    - as affected by shade and moisture, (39) 751.
    - damping-off, (27) 655; (31) 647; (32) 647; (33) 551; (39) 254.
    - drought resistance in, (38) 44.
    - evaporation studies, (31) 824.
    - fertilizer experiments, (32) 47.
    - from dissimilar habitats, (32) 339.
    - growth, (38) 144.
    - root rot of, (34) 546.
    - transpiration and composition, (32) 824.
    - transpiration in, (33) 224.
    - white, development in nursery beds, (31) 640.
    - white spot injury, (40) 53.
  - shoot disease, (32) 845.
  - shoot moth, European—
    - in New Jersey, (34) 355.
    - notes, (34) 752; (36) 854.
    - studies, (32) 654.
  - shoot moth, notes, (33) 58.
  - siskin, destruction of grain aphids by, (29) 452.
  - sleepers, antiseptic treatment, (27) 542.
  - spinner, studies, (35) 759.
  - spray, analyses, (33) 735.
  - stands—
    - effect on soil physics, (26) 140.
    - regenerating, (29) 240.
    - stem height in, (31) 538.
    - succession by oak stands, (34) 537.
  - stem canker, notes, (29) 547.
  - timber, Indian, contraction and warping, (38) 751.
  - tip moth, notes, (37) 255.
  - tipburn, notes, (36) 52.
  - twig borer, notes, (36) 856; (40) 652.
  - unit stresses for, (36) 91.
  - weevil, notes, (32) 852; (33) 252; (34) 158; (36) 856; (38) 459.
  - weevil, remedies, (35) 54; (36) 859.
  - weevil, spotted, notes, (26) 147.
  - western red rot, studies, (35) 655; (36) 753.
  - wood, carbohydrates of, (34) 608.
  - wood, *Coniophora cerebella* on, (39) 553.
  - wood, formation of *tore* in, (28) 826.
  - wood, production of turpentine from, (26) 413.
  - yellow, analyses, (38) 309.
  - yellow, durability, (37) 727.
  - yield graphs, (39) 352.
- Pineal gland, physiological function, (29) 168.
- Pineapple—
- canning industry of the world, (33) 594.
  - chlorosis—
    - cause and treatment, (26) 121.
    - notes, (27) 129.
    - relation to calcareous soils, (29) 623.
    - treatment, (36) 545.
  - disease, new, in Philippines, (38) 853.
  - fruit fly, danger of introduction, (39) 467.
  - fungus, notes, (39) 849.

## Pineapple—Continued.

- fungus on coconut, (40) 751.
  - industry in Porto Rico, (32) 745.
  - juice, ferments of, (35) 713.
  - juice, osmotic pressure, (28) 262.
  - juice, preparation, (33) 316.
  - Kanai wilt, investigations, (37) 155.
  - Phytophthora disease, notes, (39) 849.
  - rots, notes, (31) 844.
  - scale, notes, (28) 854.
  - seedlings, growing, (37) 142.
  - seeds, germination, (37) 142.
  - vinegar, manufacture, (30) 813.
  - weevil, new, in Jamaica, (37) 161, 162.
  - weevil, notes, (38) 163; (40) 259.
  - wilt, studies, (37) 652.
  - wilt, treatment, (37) 550.
  - yellows, notes, (37) 155.
  - yellows, treatment, (36) 850.
- Pineapples—
- analyses and use, (30) 363.
  - as affected by manganese, (27) 842; (36) 538
  - as affected by shade, (33) 535.
  - breeding experiments, (30) 838; (32) 742.
  - canned, keeping in open tins, (39) 317.
  - cold storage of, (32) 439.
  - composition and fertilizer requirements, (40) 446.
  - composition at different stages, (27) 842.
  - cover crops for, (31) 635; (33) 535; (34) 736.
  - culture, (28) 437; (31) 494; (35) 542.
  - culture—
    - experiments, (28) 142; (33) 737.
    - in Burma, (29) 736.
    - Hawaii, (28) 48.
    - Philippines, (34) 635.
  - decay in transit, (32) 745.
  - fertilizer experiments, (30) 525; (38) 748.
  - fumigation experiments, (27) 841.
  - function of manganese in, (27) 129.
  - green manure experiments, (37) 144.
  - growth on calcareous soils, (31) 627, 816.
  - improvement, (37) 142.
  - insects affecting, (27) 453; (28) 49; (38) 459.
  - lime-magnesia requirements, (29) 520.
  - packing, shipping, and marketing, (28) 743.
  - peptolytic enzymes in, (32) 130.
  - phosphorus content, (27) 461.
  - plant-food requirements, (27) 217.
  - Porto Rican, handling, (32) 745.
  - seedling, growing, (38) 841.
  - varieties, (30) 525; (33) 737; (36) 340; (38) 842.
- Pinenes, therapeutic value, (38) 585.
- Pines—
- accretion in lower part of stems, (31) 538.
  - Arizona yellow, growth and density of stand, (37) 837.
  - as affected by—
    - origin and germinative power of seed, (27) 148.
    - smelter gases, (27) 154.
    - smoke, (31) 521, 730.
    - soot, (31) 827.
  - Australian, borer injury, (40) 860.
  - Austrian, individual selection experiments, (29) 442.
  - black, color variation in seed, (32) 144.
  - black, silvicultural management, (32) 48.
  - cost of growing, (26) 49.
  - Cuban and longleaf, oils of, (33) 18.
  - culture experiments, (33) 542.
  - culture in Nordland, (33) 542.
  - diameter growth in, (34) 536.
  - dying in Southern States, (26) 456.
  - East Indian, wood structure, (30) 46.
  - evaporation from, (34) 537.
  - fertilizer experiments, (34) 537.
  - growing with spruce and beech, (27) 542.
  - growth on sand dunes, (27) 217.
  - height growth as affected by weather, (34) 640.
  - identification of species, (36) 144.
  - insects affecting, (28) 750; (30) 249; (36) 853.
  - insignis or Monterey, disease, (39) 653.
  - jack, diseases of, (33) 351.
  - jack, pulpwood from, (27) 541.
  - Jeffrey, injury by pack rat, (38) 53.
  - larch canker affecting, (30) 248.
  - leaf and twig oils of, (33) 409.
  - loblolly, forest management, (30) 446.
  - loblolly, of North Carolina, (33) 844.

## Pines—Continued.

## lodgepole—

- for telephone poles, (30) 843.
- in Rocky Mountains, (32) 542.
- reproduction, (26) 843.
- seed behavior, (37) 244.
- transplanting, (38) 44.
- utilization and management, (33) 443.
- volume table for, (31) 743.

## longevity and yield as affected by depth of planting, (29) 842.

## longleaf—

- conversion into paper pulp, (30) 615.
- creosoting, (39) 394.
- density and porosity, (32) 47.
- distinguishing from other pines, (33) 844.
- fiber dimension studies, (35) 734.
- paper pulp from, (31) 144.
- reproduction, (32) 237.
- reproduction following fire, (39) 51.
- volume tables for, (35) 748.
- yellow, utilization of waste, (34) 839.

## management in Saxony, (29) 342.

## maritime, introduction into Florida, (28) 543.

## maritime, tumors of, (40) 159.

## Monterey, notes, (33) 739.

## mountain, culture experiments, (26) 443.

## mountain, in eastern central Alps, (32) 237.

## natural and artificial regeneration, (31) 537.

## Norrland, diseases of, (28) 750.

## North American, distribution, (29) 149.

## Norway, in Lake States, (32) 339.

## of Rocky Mountain region, (37) 346.

## of Sweden, computation tables, (26) 140.

## of United States, (26) 50.

## pifon, management in New Mexico, (38) 644.

## pitch, characteristics and distribution, (37) 837.

## pitch, disease decaying sapwood, (39) 153.

## primary type and cubical content, (26) 338.

## red, growth measurements, (29) 343.

## reproduction on polar forest border, (29) 442.

## Scotch—

- absolute form quotient, (39) 247.
- as affected by source of seed, (28) 440; (29) 841.
- individual selection experiments, (29) 441.
- leaf cast, notes, (28) 652.
- planting in Pennsylvania, (38) 847.
- seed from various sources, value, (26) 49.
- volume table, (39) 451.
- weevil injury, (39) 159.

## screw, of Philippines, (33) 433.

## scrub, fungus diseases of, (31) 348.

## selection-strip method of cutting, (29) 240.

## shortleaf—

- importance and management, (34) 346.
- in Virginia, (30) 534.
- life history, (33) 443.

## Siberian, distribution and importance, (29) 442.

## site in relation to height and volume, (35) 43.

## slash, distribution and value, (36) 144.

## slash, notes, (36) 345.

## smoke-injured, microscopic analysis, (26) 532.

## southern—

- correlation of strength and durability, (39) 51.
- reproduction, (39) 450.
- utilization of waste, (33) 615.

## spur shoot of, (31) 522.

## stand of in relation to soil moisture, (33) 816.

## sugar, in California, (36) 745.

## sugar, studies, (36) 447.

## Swedish, notes, (38) 447.

## volume and value accretion in, (29) 747.

## western—

- as source of naval stores, (28) 146.
- oleoresins of, (28) 512.
- soft, habits and use, (35) 241.
- turpentine production from, (31) 744.
- white, marking rules in Idaho, (38) 46.
- white, second-growth, source of seed, (38) 145.
- white, seed production, (33) 144.

## western yellow—

- as affected by grazing, (38) 447.
- culture in Black Hills, (34) 640.
- growth in pure and composite stands, (29) 43.
- in Oregon, (36) 645.
- mill scale study, (34) 838.

## Pines—Continued.

## western yellow—continued.

- mill tally, (37) 451.
- needle disease of, (35) 354.
- planting, (29) 544; (39) 51.
- relation to spring rainfall, (39) 847.
- reproduction as affected by grazing, (40) 343.
- seed production in, (26) 543.
- studies, (26) 240.
- test of seed from different sources, (28) 543.
- tests, (37) 89.
- volume tables for, (34) 641.
- yield and reproduction in Arizona and New Mexico, (38) 847.

## white, see White pine.

## white-barked, description, (35) 745.

## yellow—

- habitat extension, (29) 545.
- handbook, (31) 444.
- in California, (36) 745.
- oil from, (31) 19.
- reforestation, (29) 544.
- relation between stand density and wood volume, (31) 743.
- tests of strength, (29) 887.
- windfall damage (34) 640.
- yield tables, (26) 843; (27) 348.
- young, dying about ant hills, (38) 651.

## Pinipestis—

- erythropasa n.sp., description, (32) 850.
- zimmermani, notes, (37) 255.
- zimmermani, studies, (34) 159.

## Pink—

- bollworm, see Cotton bollworm, pink.
- bud rot, notes, (28) 750.
- yeast, occurrence in sugar, (26) 505.

## Pinks—

- and carnations, treatise, (27) 41.
- garden, history, (32) 440.
- handbook, (26) 139.
- insects and diseases affecting, (35) 154.

## Pinnaspis buxi, notes, (28) 854.

## Pifon as source of naval stores, (28) 146.

## Pifon blister rust, studies, (39) 858.

## Pinus—see also Pine and Pines.

- albicaulis, resinous tracheids, (39) 451.
- betheli n.sp., description, (30) 538.
- bungeana, descriptive notes, (35) 745.
- characteristics and classification, (31) 743.
- chondriosomes, (39) 332.
- contorta, utilization and management, (33) 443.
- echinata, life history, (33) 443.
- excelsa as host of white pine blister rust, (31) 647.
- excelsa, blister rust affecting, (31) 349.
- insignis, potash content, (40) 321.
- lambertiana, studies, (36) 447.
- longifolia, silvicultural study, (35) 649.
- longifolia timber, contraction and warping while seasoning, (38) 751.
- montana, in eastern central Alps, (32) 237.
- photomorphic shoots in, (30) 744.
- pinea, Sphaeropsis necatrix on, (39) 859.
- ponderosa—

## as affected by mistletoe, (39) 57.

## seed production in, (26) 543.

## studies, (26) 240.

## radiata, proliferation of spur shoots in, (31) 326.

## rigida, growth studies, (28) 49.

## sabiniana, economic possibilities, (26) 51.

## spp., effect of moisture relations on, (30) 228.

## spp., length of tracheids in, (33) 143.

## spp., Razoumofskya infection, (40) 253.

## strobos, growth studies, (32) 840.

## sylvestris—

## anomolies of growth in, (35) 755.

## tube development in microspore, (40) 223.

## witches' brooms affecting, (27) 253.

## taeda belt of Atlantic coastal plain, (37) 435.

## uncinata, culture experiments, (26) 443.

## virginiana, fungus diseases of, (31) 348.

## Pioneer Irrigation District, drainage system for, (34) 483.

## Pionnotes capillacea n.sp., notes, (37) 148.

## Piophilha casei, see Cheese skipper.

## Piophilidae, synopsis, (37) 665.

## Pipe—

## drains, old, renovation, (31) 685.

## lines, construction, (30) 188, 289.

## Pipe—Continued.

- lines, efficiency, (28) 683.
- lines, metal, construction, (34) 483.
- Piper beetle, composition of leaves, (31) 108.
- Piper methysticum, insects affecting, (27) 453.
- Piperidin, nitrification as affected by lime, (38) 119.

## Pipes—

- cement, for orchard irrigation, (30) 889.
- concrete, construction, (29) 487.
- concrete, for irrigation water, (29) 485.
- corrugated metal, tests, (35) 580; (37) 288.
- flow of water in, (29) 181, 290, 891; (30) 786.
- jointed concrete, tests, (30) 689.
- large, strength of, (31) 186.
- pressure, for water conveyance, (30) 187.
- reinforced concrete, tests, (30) 889; (31) 784; (32) 885.
- theory of loads on in ditches, (29) 685.
- water, loss of head in due to bend, (31) 384.
- wood-stave—
  - construction and use, (33) 886.
  - flow of water in, (36) 281.
  - frictional resistance in, (30) 885.
  - repairing with concrete, (34) 890.
  - specifications, (37) 487.
  - use, (31) 685.

## Pipette—

- absorption, description, (40) 308.
- automatic, description, (36) 202.
- automatic suction attachment, (37) 503.
- capillary, description, (40) 286.
- for measurement of small volumes, (40) 806.
- for sampling milk and its products, (36) 805.
- for tubing culture media, (40) 12.
- holder, description, (36) 275; (40) 581.
- safety, new form, (38) 203.
- washing device, (38) 203, 803.

## Pipiza—

- californica n.sp., description, (38) 863.
- pisticoides, notes, (36) 460.

## Piptadenia peregrina, narcotic snuff from, (36) 734.

## Pipunculidae of Virginia, (35) 259.

## Pipunculids, life history, (33) 860.

## Pipunculus—

- n.spp., descriptions, (34) 857.
- spp., parasitic on sugar beet leafhoppers, (33) 747.

## Piricularia—

- n.spp., descriptions, (40) 156.
- oryzae, notes, (36) 846; (37) 838; (40) 845.
- studies, (40) 156.

## Piroplasma—

- annulatum, notes, (34) 384.
- argentinum, notes, (27) 184.
- bigeminum—
  - and *P. divergens*, cross-immunization tests, (37) 687.
  - immunization, (26) 382.
  - in cows in Eritrea, (38) 888.
  - notes, (27) 182, 784.
  - stage of in cattle ticks, (35) 385.
- caballi—
  - in equine biliary fever in India, (32) 278.
  - notes, (29) 83.
  - relation to equine piroplasmiasis, (26) 177.
- canis, culture in vitro, (30) 481, 781.
- canis, distribution in infected dogs, (26) 486.
- divergens n.sp., description, (26) 683.
- gibsoni, notes, (28) 83.
- infection in healthy cattle, (30) 282.
- notes, (27) 181.
- ovis, occurrence in Dalmatia, (29) 482.
- spp. in cattle in Germany, (28) 82.
- spp., notes, (26) 173, 782.

## Piroplasmiasis—

- bovine, *see* Texas fever.
- canine—
  - in Porto Rico, (31) 781.
  - notes, (27) 782; (28) 83.
  - notes and treatment, (26) 882.
  - of Europe and Africa, (30) 481.
  - studies, (27) 884.
  - treatment, (26) 889; (34) 276.
- equine—
  - in Algeria, (30) 282.
  - in Canal Zone, (29) 83, 483.
  - in Panama, (29) 682.
  - notes, (26) 384.
  - parasites of, (26) 177; (31) 382.
  - relation to biliary fever, (26) 887.

## Piroplasmiasis—Continued.

- immunization, (31) 585.
  - in Barbados, (37) 483.
  - Brazil, (31) 85.
  - cattle in Italy, (40) 782.
  - cattle in Sweden, (40) 585.
  - domestic animals, treatment, (32) 273.
  - European cattle, (34) 82, 478, 575.
  - horses, camels, and hares, (30) 679.
  - Russian Turkestan, (37) 374.
  - sheep, (29) 81, 482; (33) 282.
  - solipeds in Transcaucasia, (29) 582.
  - Yucatan, (27) 782.
  - infection through mucous membranes of dogs, (29) 483.
  - marginal points in, (26) 173.
  - monograph, (30) 79.
  - notes, (36) 880.
  - parvum type, in cattle, (34) 383.
  - relapse in, (33) 281.
  - status and control, (37) 480.
  - transmission to pigs by ingestion, (37) 691.
  - treatment, (27) 184; (35) 379.
- Pissodes—
- notatus, notes, (26) 147; (28) 750.
  - strobi, notes, (26) 856; (28) 353; (33) 252; (34) 158; (36) 856; (38) 459.
  - strobi, remedies, (33) 58; (36) 859.
  - strobi, studies, (39) 159.
  - validirostris, notes, (31) 849.
- Pistaches, culture in southern Texas, (32) 539.
- Pistachio—
- biology and culture, (37) 746.
  - culture in Crimea, (37) 145.
  - leaf spot, notes, (34) 843; (37) 551.
  - nuts, microscopic identification, (28) 565.
- Pistol case-bearer, biology, (40) 757.
- Pisum—
- gametic reduplication in, (30) 433.
  - genetic factors, (38) 226.
  - inheritance studies, (40) 147, 225.
  - sativum—
    - as affected by light, (29) 526.
    - bacterial disease, (40) 844.
    - betains in, (27) 203.
    - relation of seed weight to mortality, (31) 35.
    - respiration in, (27) 523.
    - variations in, (30) 739.
    - tropisms of hypocotyl, (39) 629.
- Pitanga, description and culture, (35) 144.
- Pitcairnia xanthocalyx, glycogen content, (27) 133.
- Pitches, specifications and definitions, (35) 888.
- Pith-ray flecks in wood, (29) 44.
- Pittosporum tobira variegatum, bud variation, (37) 546.
- Pituitary—
- body—
    - active substances of, (30) 578.
    - composition and physiological activity, (36) 267.
    - extracts, effect on cows, (29) 578.
    - growth-controlling principle, (35) 8.
  - extract—
    - effect on growth of chickens, (32) 263.
    - effect on milk secretion, (31) 272; (32) 268, 871; (37) 272.
    - effect on resting ovary in fowls, (33) 472.
    - use in bovine and equine obstetrics, (30) 180.
  - gland, feeding to white rats, (28) 370.
  - substance, effect on—
    - egg production and growth, (34) 75, 668.
    - spp., (36) 468.
    - growth and sexual development, (34) 765.
    - growth of white mice, (35) 865.
    - milk secretion, (30) 272.
- Pituitrin—
- effect on milk secretion, (34) 270.
  - in fetal pituitary and suprarenal glands, (34) 675.
  - pressor effect on, (29) 882.
- Pitymys savi, eradication, (36) 852.
- Pityogenes—
- bidentatus, notes, (31) 61.
  - hopkinsi, studies, (36) 659.
  - n.spp., descriptions, (36) 659.
- Pityokteines elegans n.sp., description, (35) 856.
- Pityophthorus n.spp., descriptions, (34) 361.
- Placenta—
- action of enzymes on, (40) 566.

## Placenta—Continued.

- chemical composition, (37) 100.
- growth-promoting substance in, (40) 566.
- maternal, experimental production, (27) 174.
- Plaesius javanus*, notes, (35) 57.
- Plagia americana*, notes, (28) 253.
- Plagia trepida*, biology, (36) 858.
- Plagioidera versicolora*, notes, (37) 359; (40) 754.
- Plagiognathus politus*, relation to fire blight, (36) 351.
- Plagiolipsis longipes*, studies, (35) 467; (38) 364.
- Plagionotus speciosus*, notes, (26) 147.
- Plague—
  - bubonic, in camels, (30) 784.
  - bubonic, paper on, (26) 245.
  - bubonic, transmission by rodents, (27) 754.
  - dissemination by rats, (34) 548.
  - eradication in cities, (27) 754.
  - eradication in Porto Rico, (29) 158.
  - feet of Siberia and Manchuria, notes, (26) 252.
  - human, in East Suffolk, England, (26) 461.
  - human, vaccine for, (37) 378.
  - in Hawaii, notes, (26) 854.
  - infection in domestic animals, (26) 280.
  - infection in rats, (27) 754.
  - investigations in India, (26) 653.
  - pneumonic, susceptibility of animals to, (28) 180.
  - relation to—
    - fleas, (27) 59, 754.
    - rodents, (34) 355; (40) 161.
    - tarbagans, (27) 454.
    - weasels, chipmunks, and pocket gophers, (26) 59.
  - transmission, (33) 456, 552.
  - transmission—
    - among marmots, (37) 180, 878.
    - by bedbugs, (33) 747; (33) 559.
    - fleas, (26) 61; (33) 749.
    - insects, (29) 756.
    - tarbagans, (26) 653.
- Plane tree leaf scorch, notes, (32) 347.
- Planera aquatica*, culture for wild ducks, (33) 251.
- Plant drag for soils, (32) 789.

## Plant—

- activities, relation to soil moisture, (27) 214.
- activities, relation to sun spots, (38) 114.
- alkaloids, synthesis of, (31) 409.
- alkaloids, treatise, (29) 503.
- anatomy, pathological, treatise, (36) 46.
- anatomy, treatise, (31) 728; (33) 724.
- and animal life, treatise, (28) 897.
- and animal tumors, comparison, (29) 548.
- antigens, hemagglutinating and precipitating capacity of, (26) 607.
- ashes as source of potash, (37) 427.
- ashes, composition, (39) 607.
- associations in western Pennsylvania, (38) 425.
- associations in wild hay meadow, (32) 329.
- associations, studies, (31) 35.
- bases, studies, (31) 309.
- bases, treatise, (31) 10.
- Biology Station in France, (28) 498.
- breeding—
  - and seed control, (40) 245.
  - applicability of pure-lime theory, (39) 573.
  - at Svalöf, Sweden, (31) 830.
  - at Tystofte, (30) 134.
  - bibliography, (28) 145.
  - color transmission in, (39) 734.
  - cooperative, in Wisconsin, (28) 593.
  - experiments, *see also special crops*.
  - experiments, (27) 343, 528, 734, 741; (31) 829.
- breeding experiments—
  - at Svalöf, Sweden, (30) 435.
  - control of stray pollen in, (38) 430.
  - error in, (30) 525; (39) 830, 831, 832.
  - personal equation in, (26) 734.
  - spacing in, (35) 437.
- breeding—
  - for disease resistance, (30) 331; (40) 344.
  - genetic and environmental factors in, (30) 329.
  - heterozygosis in, (27) 428; (29) 31.
  - in Canada, (34) 40.
  - Dahlem, (34) 727.
  - Europe, (27) 239.
  - Germany, (30) 525.
  - Germany, treatise, (26) 43.
  - Italy, (37) 827.

## Plant—Continued.

- breeding—continued.
    - in North America, (27) 239.
    - Scandinavia, handbook, (29) 636.
    - Sweden, notes, (26) 839.
    - Uruguay, (39) 835.
  - Instruction in, (28) 393.
  - methods, (27) 342; (39) 444.
  - notes, (28) 435.
  - physiological correlations and climatic reactions in, (31) 629.
  - plats, management, (29) 636.
  - plats, standing room of plants in, (30) 632.
  - principles of, (30) 732.
  - review of investigations, (38) 367.
  - review of literature, (28) 536; (29) 830.
  - rod-row tests, (38) 429.
  - selection in, (30) 732.
  - selection problem in, (38) 64.
  - station at University of Halle, (28) 736.
  - studies, (39) 746, 747.
  - teaching, (26) 162.
  - textbook, (39) 671; (40) 817.
  - theory of cryptomeria, (29) 434.
  - theory of factors, (29) 433.
  - treatise, (26) 325; (28) 736; (31) 131; (32) 220, 423, 430, 822.
  - work of Luther Burbank, treatise, (32) 143.
- bug, tarnished, *see* Tarnished plant bug.
  - bugs, notes, (28) 752.
  - catalse, physiology of, (26) 803.
  - cell bodies and mitochondria, differentiation, (39) 730.
  - cell membranes, chemistry and structure, (34) 626.
  - cell reactions in relation to aphids, (32) 553.
  - cell substances, electric charge of, (34) 525.
- cells—
    - absorption of uranium by, (27) 826.
    - acidity, (37) 430.
    - as affected by electrolytes, (27) 732.
    - assimilation of nitrates in, (27) 332.
    - changes in during fermentation, (36) 802.
    - chondriosomes in, (29) 217.
    - chromosome number, (40) 817.
    - entrance of coloring matters into, (27) 632.
    - formation of starch in, (27) 133.
    - intake of material by, (34) 333.
    - labile albuminous body in, (36) 225.
    - metachromatin in, (40) 325.
    - mitochondria in, (40) 425, 818.
    - mutation in, (36) 222.
    - nitrogen assimilation in, (28) 428.
    - permeability, (29) 627, 628; (37) 128, 326, 431, 632.
    - permeability as affected by electrical stimulus, (36) 732.
    - permeability in relation to temperature and acidity, (35) 224.
    - physical-chemical analysis, (29) 408.
    - protein synthesis in, (28) 428.
    - protoplasm of, (34) 33.
    - reaction to plant lice, (33) 444.
    - reduction oxidation regions in, (34) 33.
    - reserve albuminous bodies in, (35) 332.
    - role in sap ascent, (27) 829; (34) 727.
    - role of chondriome in, (40) 223, 323.
    - size and shape, (39) 226.
    - size in relation to mutational characters, (40) 323.
    - synthesis, (27) 464.
    - turgescence and water absorption, (39) 731.
  - characteristics, relation to seed weight, (29) 522; (31) 824.
  - chemistry, progress in, (29) 408.
  - chimeras, notes, (32) 726; (33) 429; (40) 826.
  - chlorosis—
    - in nutrient solutions, (36) 633.
    - investigations, (28) 425.
    - notes, (34) 720.
    - relation to soil alkalinity, (30) 50.
  - chromosomes, *see* Chromosomes.
  - colloids, studies, (35) 501.
  - coloring matters, chemistry, (27) 310.
  - communities, ecological classification, (39) 28.
  - competition, studies, (40) 424.
  - constituents, humification, (35) 627; (38) 26, 27.
  - cover, relation to soil acidity, (27) 29.
  - culture, treatise, (35) 499.

Plant—Continued.  
 cultures, nutrient solutions for, (31) 425; (34) 333.  
 cuttings, transportation, (28) 837.  
 development, rôle of reserve material in seeds, (26) 729; (30) 132.  
 disease—  
 myceliums, staining in host tissue, (39) 247.  
 problems in relation to plant introduction, (40) 343.  
 survey, (27) 45; (34) 49.  
 disease survey—  
 in Pennsylvania, (34) 154.  
 South Carolina, (32) 543.  
 Texas, (26) 645.  
 Wisconsin, (28) 844.  
 work, relation of phytopathologists to, (39) 849; (40) 449.  
 diseases—*see also Fungi and different host plants.*

soils, relationship, (28) 37, 718.  
animals affecting, (29) 547; (30) 349.  
antagonistic salt action, (29) 630.  
anthocyanin formation in, (27) 634; (28) 36; (29)  
421; (30) 129.  
anthocyanin in, (33) 824; (37) 633; (39) 224.  
aquiferous vessels in, (35) 224; (39) 826.  
aromatic, culture, (33) 643.  
arsenic content, (28) 526.  
as affected by—  
acids, (37) 224.  
alkali salts, (28) 527.  
aluminum, (34) 525.  
antimoniaic salts, (33) 30.  
artificial closing of stomata, (35) 224.  
ashes, (32) 729.  
asphyxiating gas, (37) 153, 253.  
atmospheric electricity, (30) 430.  
bacteriotoxins, (28) 732.  
barium and strontium, (40) 819.  
basic compounds, (27) 229.  
bilateral illumination, (26) 824.  
centrifugal force, (35) 431.  
chemical fumes, (30) 432.  
chemicals, (30) 343.  
chlorids, (35) 423.  
chloroform, (28) 429.

## Plants—Continued.

- as affected by—continued.
- chromium compounds, (28) 730.
  - climatic complexes and other external factors, (33) 221.
  - coal tar dust, (28) 129.
  - coal tar vapors, (29) 530.
  - colored light, (29) 526.
  - creatinin, (26) 420.
  - distilled water, (31) 730.
  - electricity, (28) 428, 530; (40) 147, 424, 428, 429.
  - environment, (26) 392; (33) 126.
  - ethylene, (34) 626.
  - formaldehyde, (26) 731; (29) 827.
  - freezing, (33) 428.
  - gas, (32) 524, 729; (33) 629; (35) 636; (37) 726, 727.
  - graphite, (29) 19.
  - guanidin, (28) 426.
  - high temperatures, (29) 27.
  - light, (29) 526.
  - light intensity, (39) 225.
  - lime and magnesia ratio, (26) 35.
  - lithium salts, (28) 526.
  - magnesium carbonate, (40) 326.
  - manganese, (32) 129; (40) 820.
  - manganese and copper sulphates, (27) 130.
  - methylene blue, (28) 825.
  - naphthalin, (33) 523.
  - narcotics, (27) 826.
  - nucleic acid, (26) 814.
  - one-sided fertilizing, (28) 624.
  - oxalic compounds, (29) 49.
  - plant metabolism products, (33) 825.
  - potassium cyanid, (38) 855.
  - radiant energy, (27) 521; (30) 431.
  - radioactivity, (28) 529, 731; (30) 30; (31) 129.
  - radium, (27) 134; (36) 526.
  - salicylic aldehyde, (33) 328.
  - salt solutions, (29) 218.
  - size of seed, (30) 725.
  - smoke, (31) 521; (32) 524, 729; (33) 428, 629; (35) 133.
  - soil type, (28) 537.
  - soot, (31) 827; (34) 154.
  - stimulants, (27) 27.
  - sulphur, (27) 27.
  - sulphur dioxide, (35) 636.
  - suppression of endosperm, (29) 629.
  - tar coating, (32) 826.
  - tared roads, (27) 333, 635; (31) 827.
  - tellurium, (31) 826.
  - tobacco smoke, (26) 230; (27) 254, 830; (29) 30.
  - ultraviolet rays, (27) 827; (33) 28.
  - uranium and lead, (28) 731.
  - various colors, (28) 36.
  - wind, (30) 30, 354.
- ash analyses, (27) 623.
- assimilation—
- as affected by sunlight, (29) 26.
  - experiments, (29) 732.
  - in, (30) 332.
  - of humus by, (27) 26.
  - of mineral matter by, (26) 521.
- assimilatory apparatus, (37) 222.
- barium in, (30) 502; (36) 202.
  - beach, transpiration in, (27) 522.
  - behavior in unventilated chambers, (40) 326.
  - behavior of organic substances in, (39) 526.
  - betain in localization, (27) 203; (31) 108.
  - biology of, treatise, (30) 429.
  - blooming dates, (27) 240; (33) 825.
  - brachysm in, (32) 731.
  - bud sports in, (34) 740.
  - bulbous and tuberous, treatise, (26) 337.
  - calcium oxalate in, (39) 827.
  - calcium utilization by, (37) 631.
  - calcium-magnesium ratios, (39) 630.
  - carbohydrate economy, (37) 524.
  - carbon dioxide assimilation, (35) 633; (39) 225.
  - carbon nutrition of, (27) 525; (29) 28; (31) 426.
  - carotinoids in, (31) 803; (34) 627.
  - castration of, (31) 44.
  - certificated by Royal Horticultural Society, (31) 340.
  - change of habitat with elevation, (39) 730.
  - chemical differentiation of species, (26) 106.
  - chemistry of, treatise, (30) 310.

## Plants—Continued.

- Chinese, in British Isles, (38) 39.
- chloroform extract, (27) 500.
- chlorophyll formation as affected by magnesium, (39) 827.
- chlorophyll formation in, (31) 519, 520.
- chondriosomes, (39) 332.
- classification, (36) 411.
- classification, scientific basis, (31) 804.
- classification, treatise, (29) 216.
- climatic change of habitat, (40) 616.
- climatic index, (35) 732; (36) 824.
- climatic injury to, (36) 431.
- climatic relations, (29) 719.
- climbing, treatise, (34) 741.
- collecting, (29) 327.
- collection and preservation, (31) 394.
- colonial, breeding, (28) 736.
- colonial, treatise, (33) 437; (36) 142.
- coloration as affected by crossing varieties, (39) 734.
- composition as affected by—

  - irrigation, (28) 229.
  - salt solutions, (39) 630.
  - sodium salts, (29) 419.
  - soil fertility, (36) 622.

- copper content, (37) 432.
- correlation between—

  - homologous parts, (37) 630.
  - somatic characters and fertility, (32) 628.

- creatinin in, (26) 419.
- cruciferous, club root of, (26) 447.
- cruciferous, *Cystopus* on, (26) 842.
- cryptogamic diseases, (39) 152.
- ecurbitaceous, fungus disease affecting, (26) 244.
- cultivated—

  - determination of races, (28) 331.
  - fruit and seed setting, (27) 329.
  - of East Indies, treatise, (30) 697.
  - relation to soil salts, (28) 426; (31) 627.
  - variety groups of, (26) 43.

- culture experiments, (26) 237.
- culture in sterile media, (27) 333.
- culture indoors, (32) 839.
- culture, treatise, (28) 235.
- cumulative influence of starvation in, (27) 636; (28) 331.
- cyanogen formation in, (28) 527.
- cyanogenetic, new, (39) 332.
- dead, autolysis in, (28) 327.
- dead, autolysis of proteins in, (27) 426.
- deep-rooted, for grass land, (26) 734; (33) 431.
- denitrification in, (29) 325.
- desert—

  - as emergency feed, (40) 276.
  - concentration of cell sap, (36) 823; (39) 29.
  - cryoscopic determinations on tissue fluids, (39) 29.
  - deciduous rootlets, (27) 329.
  - density of cell sap, (32) 34; (36) 327.
  - of Mexico, (31) 132.
  - osmotic pressure in, (33) 628.
  - root habits, (26) 227, 728; (29) 626; (32) 429, 626.
  - root systems, (26) 728; (30) 827; (39) 29.
  - studies, (33) 221.
  - vital statistics, (40) 129.
  - water balance, (26) 530; (27) 29.

- differential septa in, (26) 531.
- dimorphism of chlorophyll grains in, (27) 427.
- dioecious, change of sex ratios in, (36) 736.
- direct absorption of acid solutions, (39) 525.
- disease resistance in, (28) 639.
- distribution, (28) 46; (31) 522; (36) 494; (39) 139.
- distribution—

  - and climatic conditions in United States, (28) 212.
  - and diffusion of nutrients in, (27) 525.
  - as affected by climatic gradient, (26) 821.
  - as affected by sea water, (27) 527.
  - by ocean currents, (38) 125.
  - in glacial plunge basin, (40) 326.
  - of aluminum in, (31) 129.
  - $\beta$ -enzymes in, (28) 503.
  - fat-soluble A in, (36) 61.
  - ions in, (29) 323; (30) 30, 31.
  - oxidases in, (27) 632; (31) 626.
  - on desert mountains, (40) 129.
  - relation to evaporation, (29) 826.

## Plants—Continued.

- distribution—continued.  
 studies, (26) 628; (40) 130.  
 temperature coefficients in, (30) 117.  
 domesticated, as affected by sap of wild grafts,  
 (39) 525.  
 domesticating and improving, (32) 45.  
 drought resisting powers of, (28) 528.  
 dwarf, origin, (34) 335.  
 economic—

 leaf dimorphism in, (26) 128.  
 leaf injury in relation to cold, (37) 224.  
 leguminous, *see* Leguminous plants.

## Plants—Continued.

- light relations, photometer for study of, (39) 524; (40) 521.
- light requirements, (27) 221.
- ligneous, of Eritrea, (26) 643.
- lower, protein synthesis in, (27) 226.
- manganese in, (27) 830; (29) 28.
- marine, tolerance to fresh water, (37) 431.
- maturation in, (35) 131.
- measurements of root systems, (28) 228.
- medicinal, *see* Drug plants.
- Mendelian characters in, (28) 370, 531.
- methods of sugar analysis, (40) 30.
- mineral nutrition, (28) 124, 127; (31) 221.
- monocotyledonous, embryology, (37) 127.
- monoecious, evolution, (34) 225.
- morphological and physiological characters, correlation, (36) 221.
- mosaic diseases, (38) 48.
- mutilated, regeneration, (38) 129.
- mutual stimulation through roots, (30) 522.
- mycotrophic, nutrition physiology of, (28) 430.
- myrtaceous, possibilities of, (35) 141.
- narcois in, (27) 130.
- natural selection in, (28) 430.
- nematodes affecting, (26) 748; (28) 242; (36) 150.
- new, at Kew, (34) 40.
- new, notes, (27) 438.
- new or noteworthy, from Colombia and Central America, (34) 827.
- new or noteworthy, tests, (37) 143.
- nitric salts in localization, (30) 30.
- nitrification in, (34) 627.
- nitrogen—
- assimilation by, (26) 32, 617; (28) 35; (31) 223.
  - atmospheric, assimilation by, (35) 435.
  - formation by, (29) 133.
  - nutrition in, (29) 628.
  - percentage requirement, (40) 425.
  - permutite assimilation by, (29) 127, 517.
  - source for, (26) 723.
- nitrous acid in sap of, (28) 429.
- nonlegume, symbiosis with nodule bacteria, (37) 819.
- notebook for study of, (35) 896.
- nuclear chimeras, (39) 226.
- nutrient solutions for, (36) 31; (39) 331; (40) 520.
- nutritive exchanges in, (33) 425.
- odorous principles, (40) 710.
- of British Guiana, (40) 542.
- Colombia and Central America, (39) 433.
- Connecticut Valley, Mass., handbook, (29) 216.
- Dade County, Florida, (31) 239.
- District of Columbia, (40) 160.
- lower California, (34) 827.
- New Zealand, ecology, (27) 733.
- New Zealand for North American gardens, (33) 842.
- Northern Nigeria, Hausa names, (38) 525.
- sand dunes of Coos Bay, Oregon, (31) 744.
- oil, culture and utilization, (33) 438.
- oil producing, methods of variety testing, (26) 436.
- oil production in, (33) 629.
- on saline soils, (40) 424.
- origin and rôle of oxalate of lime in, (27) 133.
- origin of assimilated carbon in, (27) 227.
- ornamental—
- breeding experiments, (27) 741.
  - bud variation, (37) 546.
  - crown rot of, (35) 754.
  - culture, (32) 839; (36) 535.
  - culture experiments, (27) 438; (28) 827; (30) 441; (31) 340; (32) 337, 540; (34) 231; (36) 137, 241; (37) 241; (38) 444; (39) 139, 444, 843; (40) 741.
  - culture in Arizona, (32) 232.
  - culture in bogs, (38) 447.
  - culture in Mexico, (34) 741.
  - culture in meadows, (34) 536.
  - descriptive notes, (34) 536.
  - diseases, (29) 242; (30) 240; (32) 344; (36) 541; (38) 252; (40) 645.
  - fall v. spring planting, (26) 238.
  - for Florida, (34) 535.
  - home planting, (34) 741; (39) 450.
  - latitude of St. Louis, (34) 439.
  - Maine, (35) 840.
  - Nebraska, (40) 340.

## Plants—Continued.

- ornamental—continued.
- for school grounds, (28) 694.
  - unfavorable city conditions, (33) 442.
  - growth in partially sterilized soils, (26) 815.
  - heredity in, (28) 740.
  - insects affecting, (30) 240; (34) 651.
  - manuring, (30) 445.
  - native to United States, (34) 535.
  - nematodes affecting, (34) 249.
  - new insect enemies, (40) 753.
  - of central Europe, handbook, (30) 742.
  - of Missouri, (28) 439.
  - of New Mexico, (29) 842.
  - Siberian, (39) 244.
  - sports of, (34) 639.
  - tests, Alaska, (36) 443; (37) 142.
  - treatise, (37) 145, 746.
  - varieties, (27) 438; (30) 441; (32) 337; (34) 231.
  - varieties for Illinois, (28) 437.
  - variety tests, (40) 444.
  - wild species, (39) 846.
  - oxidase activity, (37) 326, 429, 430.
  - oxidases in, (35) 130.
  - oxidation and reduction in, (38) 223.
  - oxidation ferments of, (33) 409.
  - oxidative changes in, (34) 731.
  - parasitic—
    - and saprophytic, nitrogen content, (27) 526.
    - arsenic content, (27) 830.
    - effect on hosts, (28) 543.  - parthenogenesis in, (30) 329; (34) 727.
  - pectin substances in, (40) 804.
  - pentosans in, studies, (27) 427.
  - pentose sugars in, (39) 224.
  - perennial—
    - branch development in, (32) 128.
    - for southeastern Alaska, (33) 638.
    - senile changes in leaves of, (32) 728.  - periodicity in, (27) 522; (28) 435; (35) 632; (39) 317.
  - periodicity of specific characters, (30) 224.
  - permeability in, *see* Permeability.
  - Philippine, propagation by cuttings and layerage, (34) 436.
  - phosphate nutrition of, (26) 622.
  - photosynthesis in, *see* Photosynthesis.
  - phototropic and geotropic reactions in, (35) 632.
  - phototropism, (39) 223, 826.
  - phylogenetic relationships, (33) 822.
  - physics of, (36) 107.
  - physiological characters of, (33) 629.
  - physiological functions, relation to weather factors, (39) 809.
  - physiology of heredity in, (34) 822.
  - plasmolytic phenomena, (39) 528.
  - poisoning by certain elements, (38) 628.
  - poisonous—*see also* Cattle, Livestock and Forage poisoning, and *specific plants*.
    - destruction, (26) 333.
    - feeding experiments with, (33) 384.
    - in Western Australia, (33) 846.
    - manual and bibliography, (26) 327.
    - notes, (26) 86; (35) 383; (38) 646; (39) 85, 433, 891, 892; (40) 182, 300.  - of California, (32) 778.
    - Colorado, (34) 576.
    - Idaho, (35) 383.
    - Kentucky, (32) 337.
    - Union of South Africa, (34) 241.  - on ranges, (32) 474; (35) 781; (39) 184, 386, 587, 787, 788, 886.

 and harrows, care and repair, (39) 292.  
 construction and operation, (29) 292.  
 development and utilization, (35) 391.  
 draft of, (28) 85, 199, 891; (32) 86, 687; (34) 125; (39) 88.  
 draft tests, (36) 389.  
 effect of hitch on draft, (27) 689.  
 electric, description, (27) 588.  
 engine, adjustment and operation, (35) 189.  
 engine gang, development, (27) 90.  
 for tractor use, (35) 294, 391.  
 hitches for, (28) 891.  
 moldboard, draft of, (35) 494.  
 motor—  
 calculating work of, (31) 291.  
 description, (28) 84, 685; (30) 590.  
 descriptions and tests, (27) 90.  
 hitches and adjustments, (38) 88.  
 in Germany, (27) 689.  
 management, (35) 494.  
 notes, (27) 191, 791, 792.  
 tests, (27) 690; (29) 86, 185; (30) 388, 789; (31) 487; (32) 188, 189, 281, 789; (33) 190, 589; (34) 686, 788, 891; (35) 87, 585, 688; (36) 189, 588, 589; (37) 591.  
 use in Uruguay, (29) 87.  
 power, driving wheel for, (27) 485.  
 power for, treatise, (26) 89.  
 specifications, (37) 886.  
 steam, dynamometer for, (30) 389.  
 tests, (29) 390; (33) 291, 891.  
 tractor-drawn, notes, (31) 188.  
 wooden v. iron for rice culture, (28) 591.
- Plowsole** in citrus groves, (40) 417.
- Plum**—  
 aphid—  
 cat-tail as a summer host, (37) 461.  
 leaf curling, remedies, (33) 555.  
 mealy, in Egypt, (38) 158.  
 reddish-brown, notes, (37) 562.  
 southern, alternate hosts, (39) 464.  
 bacterial canker, notes, (30) 245, 537.  
 black knot—  
 description and treatment, (38) 853.
- Plum**—Continued.  
 black knot—continued.  
 notes, (37) 555; (40) 53.  
 notes and treatment, (29) 155.  
 studies, (32) 52.  
 black spot, notes, (40) 638.  
 blotch, notes, (39) 857.  
 borer, studies, (33) 454.  
 brown bark spot on, (39) 251.  
 brown rot, notes, (34) 241; (35) 351; (37) 457; (39) 452.  
 brown rot, studies, (31) 749.  
 buds, resistance to frost, (30) 839.  
 butter, Servian, composition and characteristics, (31) 66.  
 Coccomyces disease, wild hosts, (39) 457.  
 curculio—  
 life history, (33) 159.  
 notes, (26) 753, 759; (27) 53, 755; (28) 752; (29) 353; (33) 252, 652.  
 remedies, (26) 860; (28) 57; (30) 355; (33) 59; (37) 262.  
 studies, (27) 863.  
 die-back or winterkilling, notes, (30) 537; (37) 246.  
 diseases—  
 in France, (33) 54.  
 notes, (26) 55, 844; (27) 349; (33) 349, 741; (36) 751; (38) 50; (40) 749, 844, 845.  
 studies, (28) 240; (30) 451; (33) 544.  
 fire blight, notes, (29) 848.  
 flowers, polymorphism in, (28) 540.  
 foliage, studies, (26) 407.  
 fruit gumming, notes, (40) 249, 251.  
 jam, Servian, analyses, (26) 261.  
 juice, osmotic pressure, (28) 262.  
 kernels, hydrocyanic acid content, (28) 477.  
 leaf gall, control, (40) 459.  
 leaf gall mite, remedies, (39) 252.  
 leaf miner, European, notes, (26) 558.  
 leaf miner, studies, (26) 557.  
 leaf spot or shot hole disease, notes, (32) 49.  
 leaf spot, studies, (36) 149; (37) 755; (39) 855.  
 louse, mealy, remedies, (40) 161.  
 nematode root disease, notes, (28) 235  
 oil, composition, (36) 803.  
 pocket, control, (39) 252.  
 pocket, studies, (40) 452.  
 pocket, treatment, (36) 849; (40) 449.  
 rot, treatment, (27) 143.  
 rust, life history, (27) 48.  
 rust, notes, (39) 850.  
 scale, notes and remedies, (27) 455.  
 seed oil, composition, (37) 410.  
 silver leaf, notes, (26) 449, 749; (29) 845; (35) 650; (36) 541; (40) 844.  
 silver leaf, studies, (34) 648.  
 slug caterpillar, notes, (36) 654.  
 slug, studies, (26) 152.  
 stigmonose, studies, (33) 349.  
 stones, histological characteristics, (27) 112.  
 stones, hydrocyanic acid content, (27) 11.  
 tree trunks, introduction of solutions into, (36) 740.  
 twigs, composition, (26) 407.  
 wilt, studies, (34) 747; (36) 51.  
 wine, preparation, (27) 412.  
 wither tip, studies, (40) 850.  
 yellow leaf, description and treatment, (30) 848.  
 yellow leaf, investigations, (33) 347.
- Plumage** patterns in fowls, (33) 75.
- Plumaria** sp., notes, (28) 745.
- Plumbago** scandens, notes, (29) 441.
- Plumber's** blowlamp, use against weeds, (32) 139.
- Plumbing**—  
 country practice in, treatise, (33) 590.  
 fixtures, water testing for, (31) 190.  
 for country homes, (27) 389; (30) 690; (32) 87 (34) 286.  
 for farm kitchens, (36) 390.  
 household, notes, (30) 893.  
 recent development in, (31) 190.  
 system for residences and small institutions, (31) 190.  
 systems, local vents in, (31) 893.  
 treatise, (35) 690.
- Plume** grass, analyses, (28) 463.
- Plums**—  
 acidity, (32) 110; (37) 714.  
 adaptation and variety tests, (29) 41.

## Plums—Continued.

- American, description, (32) 837.  
 analyses, (37) 42.  
 breeding and testing in Minnesota, (40) 148.  
 breeding experiments, (32) 338, 438, 834; (35) 743; (36) 741; (37) 833; (39) 346, 844; (40) 742.  
 breeding of new varieties, (28) 540.  
 Chinese, host plant of fruit fly, (26) 758.  
 composition as affected by irrigation, (29) 236.  
 cost of production, (29) 439.  
 crown gall affecting, (28) 447.  
 crown gall resistance in, (35) 645; (36) 352.  
 culture, (30) 840; (32) 45; (39) 447.  
 culture—  
   experiments, (27) 343; (28) 436.  
   in Alaska, (29) 743.  
   Europe, (37) 42.  
   Maryland, (37) 648.  
   Mesa County, Colorado, (37) 241.  
   New Mexico, (40) 18.  
   New York, (35) 836.  
   Ontario, (32) 744.  
   southern Texas, (32) 337, 539.  
   southern Utah, (30) 442.  
   Uruguay, (32) 745.  
   Utah, (33) 638.  
 Cytospora disease of, (34) 648.  
 destruction in Rhine Provinces, (26) 144.  
 dropping periods, (40) 740.  
 dust v. liquid spraying, (37) 832.  
 dusting experiments, (38) 546.  
 dying in France, (26) 850.  
 effect on composition of urine, (31) 761.  
 European, pollination, (28) 237.  
 excrescences on, (39) 353.  
 fall v. spring planting, (26) 238.  
 fertile and self-sterile varieties, (40) 638.  
 fruit stocks for, (38) 345.  
 greengage, localization of acids and sugars in, (36) 110.  
 growing on grass land, (26) 639.  
 improvement in Minnesota, (34) 637.  
 injuries by freezing, (26) 749; (32) 43.  
 inoculation experiments with brown rot fungus, (33) 247.  
 insects affecting, (30) 753; (33) 54; (38) 460, 843.  
 Japanese and hybrid, wilt disease of, (33) 248.  
 localization of acids and sugars in, (36) 110.  
 Morilla on, (30) 647.  
 new, descriptions, (29) 838; (30) 640; (31) 337; (32) 438; (33) 238.  
 of New York, monograph, (27) 40.  
 oriental peach moth on, (39) 259, 261.  
 pear slug affecting, (26) 863.  
 pear thrips affecting, (27) 156; (40) 547.  
 picking and handling, (34) 437.  
 planting at different ages, (37) 647.  
 pollination, (34) 233, 341; (36) 139; (40) 148, 638, 836.  
 pollination by bees, (36) 536.  
 preservation, (29) 312; (35) 367.  
 preservation by pressure, (32) 416.  
 pruning, (30) 739; (32) 837.  
 pruning and training, (37) 344.  
 pruning experiments, (37) 240; (39) 347.  
 reducing and nonreducing sugars in, (29) 503.  
 ringing experiments, (32) 636.  
 ripening studies, (31) 311.  
 "salmon fly" injury, (39) 257.  
 seedling, variation in, (30) 144.  
 self-sterility in, (26) 239; (40) 148.  
 sod mulch v. culture, (30) 640; (33) 43.  
 spray injury to foliage, (40) 161.  
 spray schedules, (39) 39, 140.  
 spraying experiments, (27) 143, 439; (28) 436, 652; (37) 744; (39) 345.  
 spring v. fall planting, (33) 439.  
 sterility in, (32) 834; (37) 240.  
 sterility studies, (40) 740.  
 stocks for, (32) 337; (40) 445.  
 tree census in Washington, (40) 340.  
 varieties, (29) 235; (32) 538; (33) 638; (37) 143, 241; (38) 41.  
 varieties—  
   American, (32) 744.  
   Australian, (39) 844.  
   for Canada, (30) 840.  
   home orchard, (40) 341.

## Plums—Continued.

- varieties—continued.  
 for Indiana, (39) 447.  
 New Jersey, (33) 439.  
 Northwest, (39) 844.  
 Ohio, (37) 241.  
 Oregon, (39) 241.  
 western Washington, (33) 44.  
 in Oklahoma, (27) 241.  
 new, (39) 346.  
 resistant to brown rot, (34) 444.  
 resistant to disease, (29) 246.  
 variety tests, (39) 346.  
 wild goose, changes in during ripening, (34) 802.  
 wild, recipes, (37) 364.  
 winter injury, (40) 835.  
 winter washes for, (35) 38.  
 winterkilling, (32) 834.  
 Plum-sand-cherry, Cikana, description, (30) 640.  
 Plusia—  
   chalcites, notes, (27) 155, 657; (31) 249.  
   eriosoma, studies, (40) 62.  
   gamma, notes, (26) 147.  
 Plutella—  
   armoracia, life history and remedies, (28) 656.  
   maculipennis, see Diamond-back moth.  
 Plymouth Rocks, see Fowls.  
 Pneumococcus—  
   action of blood from different species on, (40) 286.  
   as affected by serums and leucocytes, (26) 175.  
   hydrogen-ion concentration for growth of, (39) 888.  
   immunity, studies, (40) 676.  
   infection, experimental, chemotherapy of, (39) 185.  
   infection in horses, (40) 784.  
   studies, (40) 480.  
 Pneumonia—see also Pleuropneumonia.  
   action of digitalis in, (37) 375.  
   chronic catarrhal, in sheep, (35) 678.  
   contagious, in donkeys, (37) 692.  
   contagious, in horses, (36) 85.  
   contagious, treatment, (32) 682.  
   enzootic, in young pigs, (37) 477.  
   equine—see also Influenza, equine.  
     treatment, (31) 87; (38) 788.  
   in cattle, studies, (26) 286.  
   in lower animals, (30) 579.  
   infectious, in cattle, (36) 675.  
   interstitial, in lungs of camels, (30) 680.  
   lobar, in domestic animals, (36) 676.  
   septic, in bovines, treatment, (31) 85.  
   septic, in horses, (38) 184.  
   studies, (37) 274.  
   treatment, (26) 484; (27) 576; (31) 378.  
 Pneumonic plague, susceptibility of animals to, (28) 180.  
 Pneumonitis in pigs, (33) 774  
 Pneumonyssus foxi n.s.p., description, (34) 364.  
 Pneumotuber macaci, notes, (31) 356.  
 Poa—  
   alpina, analyses, (31) 863.  
   argentina, to toxicity to sheep, (39) 85.  
   ash constituents of, (30) 334.  
   fertilis, pollination experiments, (37) 735.  
   nevadensis, digestibility, (32) 770.  
   pratensis, germination as affected by light, (30) 531.  
   pratensis, germination tests, (30) 437; (31) 227.  
   spp., germination tests, (28) 327; (29) 143.  
   spp., seeding on ranges, (30) 35.  
   trivialis, composition and digestibility, (36) 469.  
   trivialis, drought resisting qualities, (28) 533.  
 Podabrus prunosus, notes, (30) 459.  
 Podagron mantidiphagum n.s.p., description, (37) 467.  
 Podisma frigida in Alaska, (34) 61.  
 Podisus maculiventris—  
   destructive to pear slug, (26) 863.  
   notes, (29) 456.  
 Podocarpeae, root nodules of, (30) 523.  
 Podocarpineae, root nodules of, (27) 828.  
 Pododermatitis, suppurative, treatment, (40) 181.  
 Podogaster evetivorus n.s.p., description, (32) 852.  
 Podophyllum emodi, culture, (34) 346.  
 Podosia syringae, notes, (28) 155; (36) 659.  
 Podospermum laciniatum, appearance in South Australia, (38) 141.

- Podospaera**—  
 leucotricha—  
   notes, (28) 447; (33) 846; (40) 251.  
   parasite of, (32) 544.  
   treatment, (39) 856.  
 oxycanthae, notes, (32) 641; (40) 53.  
 oxycanthae, treatment, (26) 750.  
 spp., descriptions and treatment, (31) 748.  
 spp., notes, (34) 247.  
 spp., studies, (33) 347.
- Podosporiella**—  
 n.sp. (?) on wheat, (33) 848.  
 verticillata n.sp., description, (34) 644.
- Podotrichus semiflavus** n.g. and n.sp., description, (30) 658.
- Poecilanthrax**, notes, (37) 565.
- Poecilocapsus lineatus**, notes, (28) 158; (33) 58.
- Poecilocois**—  
 latus, notes, (28) 241; (29) 446.  
 spp., notes, (30) 853.
- Poecilonota decipiens**, notes, (30) 455.
- Poecilosectus basalis**, relation to fire blight, (33) 744.
- Pogonarthria fleckii**, analysis and digestibility, (32) 167.
- Pogonomylia**, anthomyid genus, (40) 357.
- Pogonomyrax**—  
 barbata, notes, (29) 453.  
 barbata, remedies, (32) 549; (35) 551.  
 barbatus molefaciens, studies, (27) 263.  
 barbatus rugosus, remedies, (33) 57.  
 californicus, notes, (26) 483.
- Pohna** grass, analyses, (28) 768.
- Poisin**—  
 extraction from brain, (28) 280.  
 ivy, constituents of, (36) 502.  
 ivy, fat of, (38) 202; (39) 27.  
 oak, toxicity, (36) 501.
- Poisoning**, symptoms and therapy, (32) 578.
- Poisonous animals of desert**, (39) 153.
- Poisonous plants**, see *Plants, poisonous*.
- Poisons**—  
 detection, (32) 578.  
 detection in water, (34) 410.  
 economic, consumption and cost in California, (40) 59.  
 effect on—  
   apples and potatoes, (33) 329.  
   germ cells, (33) 368.  
   germ cells of fowls, (37) 370.  
   microorganisms, (32) 308.  
   seeds, (29) 529.  
   vitality of male rabbits, (31) 876.  
 mineral, detection in organic matter, (26) 206.  
 nonprotein, chemical defense against, (32) 78.  
 organic, detection in food, (31) 207.  
 organic, effect on plants, (34) 526; (39) 224; (40) 520.  
 protective action of diet against, (40) 465.  
 treatise, (26) 373.
- Pokeweed**—  
 critical flowering and fruiting temperatures, (38) 330.  
 mosaic disease, studies, (39) 549.  
 notes, (30) 145.
- Polania lüderitziana**, analyses and digestibility, (27) 871; (32) 167.
- Polar explorers**, food for, (32) 857.
- Polarimetry**, book on, (38) 803.
- Polariscope**, sodium lamp for, (34) 804.
- Polarization**, Clerget, source of error in, (32) 717.
- Polarized light**, chemical effects, (31) 759.
- Pole holes**, digging with dynamite, (36) 89.
- Polenske number**, determination, (30) 114; (31) 811.
- Poles**—  
 industry in Canada, (26) 242; (32) 238; (37) 245; (38) 147.  
 industry in 1915, (36) 844.  
 preservation, (26) 242, 644; (27) 846; (30) 146, 239, 845; (33) 544; (37) 651.  
 prices in Canada and United States, (26) 242.  
 production in Canada, (28) 645; (30) 744.  
 telephone, tests, (30) 843.  
 use in Canada, (29) 843.
- Poliomylitis**—  
 acute, notes, (26) 676.  
 and dog distemper, relationship, (30) 781.  
 bodies, action of human and rabbit blood on, (40) 287.  
 in dogs, (40) 483.  
 horses in India, (38) 287.
- Poliomylitis**—Continued.  
 in lower animals and transmission, (35) 280.  
   sheep, (29) 681.  
 relation to rats, (40) 85, 546.  
 relation to stable flies, (29) 559, 560.  
 studies, (39) 186.  
 transmission, (30) 753.  
 transmission by—  
   insects, (28) 753; (38) 262.  
   Lyperosia irritans, (31) 551.  
   rats and insects, (36) 354.  
   stable flies, (28) 160, 161, 560.
- Polistes**—  
 gallica, notes, (27) 862.  
 hebraeus, notes, (38) 164.  
 metricus, life history and habits, (37) 855.  
 spp., notes, (28) 451.
- Political economy instruction in agricultural schools**, (34) 693.
- Pollen**—  
 and pollen disease, studies, (39) 803.  
 as affected by sulphurous acid, (27) 635.  
 development in grapes, (32) 627.  
 extract preparations, (40) 284.  
 formation, (34) 525; (35) 523.  
 germination, (29) 437.  
 grain as a colloidal system, (36) 526.  
 grains, development in citrus fruits, (28) 524.  
 grains, germination experiments, (35) 731.  
 mother cells, cytokinesis, (40) 517.  
 red clover, physiology of, (29) 829.  
 removal by Syrphidae, (39) 734.  
 sterility in relation to crossing, (35) 731.  
 toxin, studies, (29) 377.  
 tube development in microspore of *Pinus sylvestris*, (40) 223.  
 tube protoplasm, studies, (40) 28, 818.  
 viability, (32) 534.  
 vitality, (29) 41, 326.  
 water-soluble B in, (40) 564.
- Pollenia rudis**—  
 hibernation, (34) 254; (38) 262.  
 life history, (36) 359.  
 relation to fire blight, (36) 351.  
 studies, (37) 665.  
 susceptibility to nicotine, (33) 256.
- Poll-evil**—  
 etiology and treatment, (26) 484.  
 handbook, (39) 190.  
 immunization, (31) 378; (34) 580.
- Pollination**—see also *specific plants*.  
 bibliography, (29) 437.  
 controlled, in Nicotiana, (40) 131.  
 effect on fruit of *Diospyros kaki*, (31) 440.  
 improved technique, (40) 627.  
 physiology of, (34) 628.  
 rôle of insects in, (40) 655.
- Pollinia fulva**, analyses, (30) 565.
- Pollinopsis betae** n.g. and n.sp., description, (35) 454.
- Polyarthritis**—  
 in newborn calves, (40) 887.  
 in pigs, notes, (36) 280.  
 in sheep, (31) 286.
- Polycaon confertus**, notes, (27) 857; (29) 657; (35) 58; (38) 157.
- Polychaetoneura elyii** n.g. and n.sp., description, (31) 456.
- Polychrosis**—  
 botrana—  
   biology and remedies, (34) 654.  
   control, (39) 765.  
   monograph, (34) 553.  
   notes, (26) 655; (28) 559; (35) 54, 257.  
   parasites of, (35) 253, 659.  
   polyphagous habits, (32) 554.  
   remedies, (29) 655; (34) 63; (40) 167.  
   viteana, see *Grape berry worm*.
- Polycetidae**—  
 adaptation to parasitic life, (27) 656.  
 viviparity in, (31) 452.
- Polycystus**—  
 clypeatus n.sp., description, (39) 869.  
 foersteri n.sp., description, (30) 661.
- Polydrusus**—  
 impressifrons, notes, (29) 252; (35) 54; (36) 456.  
 impressifrons, studies, (36) 859; (37) 359.  
 spp., habits, (36) 58.
- Polyembryony in *Quercus alba***, (40) 226.

- Polyetes abolineata, notes, (30) 553.  
 Polygala butyracea, rot bacteria affecting, (29) 345.  
 Polynotus—  
   spp., parasitism, (31) 458.  
   vernalis n.sp., description, (38) 63.  
 Polygonaceae, development and germination of seed, (32) 329.  
 Polygonia intergradationis, notes, (33) 58.  
 Polygonum—  
   convolvulus, notes, (30) 236.  
   (Fagopyrum) tataricum, notes, (30) 838.  
   persicaria, eradication, (31) 532.  
   persicaria, new leaf spot, (39) 152.  
   sachalinense, analyses, (31) 863.  
   spp., toxic effect on pigs, (38) 589.  
 Polygraphus—  
   major, notes, (26) 351.  
   n.spp., descriptions, (30) 757.  
 Polydes rotundus, analyses, (37) 814.  
 Polymecus lasiopterae n.sp., description, (38) 165.  
 Polymnia edulis, culture experiments, (30) 640.  
 Polymorphism—  
   in fungi, (34) 32.  
   in stamens of fruit tree flowers, (28) 540.  
 Polynema—  
   bifasciatipenne, notes, (31) 650.  
   bifasciatipenne varium n.var., notes, (38) 565.  
   imitatrix n.sp., description, (40) 760.  
   reduvii n.sp., description, (37) 856.  
 Polyneuritis—  
   avian, treatment, (32) 683.  
   development in poultry, (27) 66.  
   dietary factors in, (35) 166.  
   experimental, in birds, (33) 167.  
   experimental, treatment, (29) 463.  
   gallinarum—  
     causative agent, (26) 889.  
     etiology, (28) 185; (33) 279.  
     pathology and treatment, (30) 187.  
     relation to foodstuffs, (29) 865.  
     studies, (29) 180; (30) 687.  
   in birds, studies, (27) 568, 868.  
   fowls, notes, (28) 764.  
   fowls, relation to bread diet, (32) 476.  
   guinea pigs and pigeons, treatment, (30) 79.  
   pigeons, (36) 60.  
   onset, relation to carbohydrate ingested, (32) 163.  
   prevention by foodstuffs, (28) 760; (31) 762.  
   relation to diet, (28) 567; (38) 568.  
   relation to rice bran, (28) 564.  
   relation to "vitamin," (28) 261.  
   studies, (39) 365, 368, 667; (40) 563, 564.  
   treatment, (29) 568; (35) 711; (38) 782.  
 Polypeptides—  
   detection, (28) 503.  
   hydrolytic action, (27) 802.  
   synthesis by means of enzymes, (34) 708.  
 Polyphylla—  
   decemlineata, notes, (32) 556; (35) 364.  
   fullo, digestive ferment of, (26) 657.  
 Polyplax spinulosus, distribution on rats, (29) 755.  
 Polyporaceae—  
   damaging trees, (39) 149.  
   of Montana, (38) 553.  
 Polyporus—  
   adustus, notes, (28) 551; (30) 653; (32) 242.  
   amorphus on pitch pine, (39) 153.  
   berkeleyi, notes, (29) 852.  
   dryadeus, studies, (30) 354.  
   dryophilus, distribution, (32) 150.  
   dryophilus, notes, (29) 851.  
   ellisianus, notes, (35) 655.  
   fulvus, notes, (40) 749.  
   ignarius, studies, (35) 655.  
   lignosus (Fomes semitostus), notes, (33) 741.  
   lignosus, notes, (28) 153; (29) 547; (35) 551; (37) 349.  
   lucidus, notes, (29) 446.  
   lucidus, studies, (39) 654.  
   n.spp., descriptions, (30) 52.  
   rugulosus in Malaya, (38) 52.  
   schweinitzii, notes, (31) 845.  
   schweinitzii, studies, (38) 355.  
   shoreae n.sp., description, (38) 547, 555.  
   shoreae, notes, (38) 332; (39) 146.  
   spp., infection of wood by, (33) 651.  
   spp., notes, (26) 144; (27) 653.  
   spp. on apples in eastern United States, (35) 654.  
   spp. on forest trees, (40) 349.  
 Polyporus—Continued.  
   sulphureus on alder, (40) 844.  
   texanus, notes, (31) 751.  
   vaporarius, notes, (26) 551; (28) 350; (29) 157 (37) 253.  
   vaporarius, studies, (28) 751; (34) 547.  
   versicolor, notes, (31) 751.  
 Polyrhaphis grandini, notes, (30) 657.  
 Polysaccharids—  
   crystallized, from starch, (30) 803.  
   of lower fungi, (33) 411.  
 Polysphincta texana, notes, (31) 355.  
 Polystictus—  
   hirsutus in black knot canker, (32) 52.  
   hirsutus, treatment, (29) 552.  
   spp., notes, (26) 57, 144.  
   spp. on forest trees, (40) 349.  
   versicolor, description, (30) 151.  
   versicolor, notes, (28) 551.  
   versicolor, wound parasite of catalpa, (27) 752.  
 Polystigma ochraceum, notes, (28) 443.  
 Polystigma rubrum, notes, (40) 749.  
 Polystomidae of North America, (38) 365.  
 Polysulphid solutions, analyses, (35) 678.  
 Polysulphids—  
   fungicidal value, (27) 855.  
   insecticidal value, (34) 61; (35) 838.  
 Polysulphur, determination, (35) 207.  
 Polytechnic school at São Paulo, Brazil, (28) 793.  
 Polytrias—  
   amaurea, notes, (26) 362.  
   praemorsa, notes, (30) 229.  
   praemorsa, tests, (38) 828.  
 Polytrichum commune, eradication, (29) 741.  
 Polyurates, effect on development of radishes. (26) 229.  
 Pomace fly—  
   apterous form, (32) 351.  
   attacking blueberries, (34) 852.  
   biological studies, (29) 457.  
   inheritance of length of life in, (32) 555.  
   life duration, (38) 563.  
   notes, (31) 552.  
   pupae as affected by humidity, (39) 563.  
   rearing on sterile media, (31) 63.  
 Pomace wine, composition and detection, (36) 205.  
 Pomaceae of upper South Carolina, (36) 140.  
 Pomaderris apetala, food plant of purple scale, (26) 756.  
 Pomegranate—  
   butterfly, notes, (32) 151.  
   disease, notes, (34) 232.  
   Melanconium sp. on, (39) 453.  
   rot, notes, (31) 539.  
   rot, studies, (28) 549.  
 Pomegranates—  
   acidity, (32) 110; (37) 715.  
   culture, (36) 743.  
   culture in Arizona, (32) 233.  
   culture in southern Texas, (32) 539.  
   freeze injury, notes, (39) 843.  
   varieties, (32) 337.  
 Pomeles, see Grapefruit.  
 Pommritz Agricultural-Chemical Station, report, (27) 718.  
 Pomological—  
   Experiment Station in south Russia, (30) 200.  
   instruction, (40) 196.  
   instruction in Proskau, (32) 691.  
   nomenclature, (39) 833.  
   work at Pennsylvania Station, (35) 644.  
   work at University of California, (38) 446.  
 Pomology—  
   bibliography, (33) 537.  
   course in, (31) 897.  
   extension work in Massachusetts, (35) 592.  
   in Australia, (39) 843.  
   papers on, (39) 541.  
   review of literature, (30) 40.  
   teaching, (28) 639; (29) 694.  
   valuable unpublished work on, (37) 41.  
 Ponhopoea sayi, notes, (28) 158, 352; (34) 752.  
 Pond—  
   lily aphid as a plum pest, (34) 550.  
   lily leaf spot rot, (36) 752.  
   mud, analyses, (38) 626.  
   mud, fertilizing value, (29) 625.  
   weed, floating, growing for wild ducks (29) 373

- Ponds**—  
fertilizer experiments, (26) 811; (29) 731.  
storage, in agricultural districts, (27) 212.
- Pongamia glabra**—  
as a green manure, (38) 220.  
cake, fertilizing value, (38) 220.
- Ponies**—  
British breeds, improvement, (38) 576.  
Mountain and Moorland, notes, (29) 573.  
polo, breeding in England, (29) 874.  
Shetland, treatise, (30) 270.  
textbook, (31) 470.  
Welsh and Exmoor wild, as foundation stock for army remounts, (29) 874.  
Welsh, manual, (31) 170.
- Pontatoma ornatum**, destruction by vegetable parasites, (28) 354.
- Pontia**—  
monuste, notes, (29) 652.  
rapae, *see* Cabbage butterfly and Cabbage worm, imported.
- Poecetes gramineus**, destruction of grain aphids by, (29) 452.
- Pop corn**—  
breeding experiments, (34) 144.  
culture, (29) 743.  
rice, studies, (34) 431.  
seed, sterilization, (38) 629.  
varieties, (29) 426.  
viability tests, (34) 145.
- Pop factories**, inspection, (31) 359.
- Popence, E. A.**, biographical sketch, (29) 699.
- Popillia japonica**—  
introduction, (39) 363.  
larvae, fumigation, (40) 256.  
remedies, (38) 842.
- Poplar**—  
and willow borer, *see* *Cryptorhynchus lapathi*, borer, *see* *Saperda calcarata*.  
canker, studies, (39) 357.  
caterpillar, notes, (28) 155.  
crown gall, notes, (31) 641, 845.  
diseases, descriptions, (27) 451.  
heart rot, distribution, (32) 150.  
leaf beetle, notes, (28) 256, 752.  
leaf miner in New Jersey, (40) 758.  
leafhopper, early stages, (39) 360.  
leafhopper, studies, (38) 764.  
mite, new, (40) 359.  
mocha-stone moth, notes, (26) 856.  
root weevil, notes, (36) 58.  
rust, new, (39) 254.  
rusts, notes, (36) 47.  
sawfly, notes, (30) 655.  
weevil in Wisconsin, (38) 155.  
weevil, notes, (26) 753.  
wood, production in France, (29) 43.
- Poplars**—  
carpenter worm affecting, (31) 550.  
for windbreaks, (36) 143.  
insects affecting, (27) 453.  
yellow, in Tennessee, (30) 535.
- Poponarthria tuberculata**, analyses and digestibility, (27) 871.
- Poppies**—  
breeding experiments, (35) 345.  
coleopteran attacking, (39) 663.  
fertilizer experiments, (26) 129, 425, 630; (34) 820.
- Poppy**—  
alkaloids, latex, and oxidases in, (36) 127.  
blight, notes, (31) 641; (38) 351, 547, 548.  
cake, analyses, (26) 266; (27) 872.  
cake, nutritive value, (28) 673.  
culture, (36) 743.  
diseases, notes, (36) 449.  
floral anomalies in, (29) 629.  
seed cake, analyses, (30) 268.  
seed cake, effect on milk and butter, (34) 570.  
seed meal, analyses, (30) 268.  
seed oil, detection, (29) 613.  
seed, weed seeds in, (35) 444.  
Welsh, inheritance of doubleness, (39) 123.
- Population**—*see also* Agricultural population.  
growth and distribution in Michigan, (31) 595.  
Malthusian theory, treatise, (34) 594.  
of United States, (27) 489.  
relation to agricultural production, (30) 895.  
rural and urban, in United States, (36) 591.
- Populus**—  
canadensis, notes, (27) 454.  
vancouveriana n.sp., description, (34) 336.
- Porbe bjerkandrella**, notes, (33) 554.
- Porcelain**, marking, (26) 715.
- Porcellio**—  
laevis as affected by Roentgen rays, (28) 57.  
laevis, notes, (27) 658.  
spp., notes, (31) 758.
- Porcellionides pruinosus**, notes, (31) 758.
- Porcoidin**, use against swine plague, (26) 587.
- Porla**—  
atrosporia n.sp., description, (29) 451.  
hypobrunnea, notes, (39) 452.  
hypolaterita—  
attacking *Tephrosia candida*, (33) 545.  
notes, (40) 53, 349.  
studies, (37) 458.  
on Hevea, (39) 152.  
vaporaria (*Polyporus vaporarius*), notes, (28) 350.
- Pork**—  
and pork products, preserving and pickling, (33) 259.  
as affected by feeding stuffs, (39) 174, 674.  
as affected by peanuts, (37) 367.  
as substitute for beef in French army, (33) 163.  
butchering and curing, (35) 569.  
Chinese export, notes, (27) 71.  
cold storage, statistics, (28) 869.  
cost of cold storage, (27) 164.  
cost of production, (31) 568; (33) 259.  
cured and salted, in United States, (38) 865.  
curing, (32) 771; (39) 373.  
curing on the farm, (38) 476.  
curing without ice, (28) 465.  
cuts, of, (33) 259.  
fat, digestion and absorption, (34) 257.  
frozen, treatment and utilization, (35) 858.  
home butchering and curing, (40) 772.  
imports into Great Britain, (27) 470.  
inspection and handling in meat trade, (33) 259.  
inspection in China and Siberia, (26) 258.  
preservation, (36) 509.  
prices as affected by cold storage, (28) 871.  
prices in Ireland, (31) 96.  
production—  
contest in North Dakota, (30) 899; (31) 568.  
in Florida, (28) 770.  
in Pacific Northwest, (30) 771; (31) 470.  
notes, (29) 69, 573.  
without milk or potatoes, (28) 574.  
products—  
adulteration, detection, (28) 510.  
international trade, (27) 373.  
market classifications, (30) 373.  
recipes for cooking, (28) 65.  
salting experiments, (27) 471.  
sausage, examination, (28) 166.  
sausage, preservation, (29) 312.  
shipping experiments, (27) 470.  
shrinkage in curing, (28) 465.  
slaughtering and curing, (31) 269.  
soft, from rice bran, (39) 478.  
soft, studies, (39) 673.  
testing and grading on basis of firmness, (39) 673.  
trichinae in, (36) 662.  
trichinism, cold storage experiments, (31) 356.  
value in the diet, (33) 259.
- Porometer**, description and use, (35) 431.
- Porosagrotis**—  
delorata, notes, (31) 352.  
orthogonia, poisoned bait for, (34) 358.  
vetusta, notes, (27) 159.
- Porphyrothrips cottei** n.g. and n.sp., description, (29) 854.
- Porpoise oil**, effect on milk secretion, (32) 471.
- Porricondylariae** of New York, (34) 752.
- Porthesia chrysoorrhoea**, larval disease of, (36) 754.
- Porthetria dispar**, *see* Gipsy moth.
- Porto Rico**—  
College, notes, (29) 900; (30) 96; (33) 900; (35) 98; (36) 100.  
Federal Station, editorial, (38) 605.  
Federal Station, notes, (28) 300, 600; (30) 900; (31) 300, 599, 696, 797; (32) 398; (33) 900; (37) 300; (38) 700, 900.  
Federal Station, report, (27) 899; (29) 696; (31) 694; (33) 599; (36) 396; (38) 796; (40) 97.

## Porto Rico—Continued.

- Insular Station, notes, (26) 300, 696; (27) 900; (35) 400, 597; (37) 98; (38) 499; (39) 198.
- Insular Station, report, (29) 95; (30) 395; (37) 298; (39) 94.
- University, notes, (26) 97; (27) 494; (28) 94, 698; (30) 798.

## Portulaca, inheritance studies, (40) 131.

## Posidonia australis, fiber from, (38) 529.

## Postal savings banks in various countries, (29) 895.

Posts, *see* Fence posts.

## Postum cereal residue, composition and digestibility, (32) 666.

## Pot culture work, equipment for, (37) 521.

## Pot experiments—

- factors affecting yield, (29) 514; (35) 215.
- moisture control in, (35) 319.
- wire cage for, (32) 514.

## Potamogeton natans, growing for wild ducks, (29) 373.

## Potash—

## absorption by bacteria, (29) 315.

## absorption by oats, (31) 632.

## absorption by soils, (31) 723.

## absorption from zeolites, (29) 625.

## American rock, (40) 134.

## as blast furnace by-product, (36) 625.

## cement mill by-product, (36) 625; (37) 817.

## fertilizer for hops, (30) 37.

## top dressing for pastures, (29) 632.

## winter spray for fruits, (30) 641.

## assimilation by rice, (38) 340.

## availability in—

## barnyard manure, (26) 323, 424.

## feldspar, (37) 522.

## feldspathic fertilizers, (29) 796.

## fertilizers, (27) 496.

## New Jersey soils, (37) 629.

## soils, (36) 625.

## soils as affected by lime or gypsum, (36) 519.

## bearing rocks in Wyoming, (26) 623.

## brines, evaporation, (34) 425.

## carriers, comparison, (39) 446.

## citric soluble, production and fertilizing value, (32) 218.

## concentration in subsoil, (31) 720.

## content of coal ash, (39) 329.

## content of seaweeds, (26) 726.

## content of soil, relation to Rhizoctonia, (40) 347.

## deposits—

## at Spur, Texas, (31) 726.

## in Alsace, (40) 320.

## California, (29) 319.

- relation to yellow-berry in wheat, (33) 42.
- removal by corn crop, (37) 232.
- replacement by soda as a fertilizer for sugar beets, (32) 230, 324.
- replacement in Feldspar, (30) 126.
- requirements of nitrogen bacteria, (27) 226.
- residue from oxygen-acetylene plant, analyses, (32) 424.
- residues in Hagerstown soil, condition, (40) 25.

## Potash—Continued.

- resources and use in New Zealand, (37) 218, 629, 817.
- resources of Australia, (37) 322.
- resources of United States, (37) 522.
- rôle in plant nutrition, (26) 530.
- salts—*see also* Potassium salts.
  - absorption by plant leaves, (27) 324.
  - analyses and tests, (37) 322.
  - as affected by phosphatic slag, (28) 508.
  - as protection against frost, (27) 421.
  - drilling v. broadcasting, (31) 123.
- salts, effect on—
  - action of phosphoric acid, (27) 623.
  - asparagus roots, (28) 236.
  - burning quality of tobacco, (38) 140, 239; (39) 34.
  - disease susceptibility in cereals, (29) 844.
  - germination of seeds, (29) 328.
  - soils, (26) 216.
- salts—
  - extraction, (27) 22.
  - fertilizing value, (27) 125, 234, 725; (30) 221; (34) 519.
  - for meadow soils, (34) 22.
  - imports into United States, (31) 726; (32) 723; (33) 625.
  - in sugar beets, studies, (31) 325.
  - of United States, (27) 23.
- salts, production—
  - and use, (27) 327; (33) 218, 219.
  - and use in 1911, (29) 213.
  - and use in 1913, (32) 126, 425.
  - in Germany in 1912, (29) 128.
  - in 1915-16, (37) 523.
- salts—
  - replacing with sodium chlorid, (34) 726.
  - sources and production, (35) 23.
  - substitution for common salt in nephritis, (29) 167.
  - trade in, (31) 29.
  - Wittelsheimer, composition and use, (31) 519.
- scarcity, relation to cotton yields, (40) 335.
- search in America, (26) 526.
- soil, utilizing, (40) 300.
- solubility—
  - as affected by bacteria, (29) 315.
  - as affected by gypsum, (39) 521.
  - in mixed fertilizers, (31) 207.
  - in muscovite, (40) 812.
- sources, (30) 27; (34) 327; (36) 624; (39) 219, 327, 429, 430, 724, 727, 824; (40) 422.
- sources in America, (34) 821.
- sources in Great Britain, (32) 218.
- sources in United States, (29) 419; (31) 321; (36) 26, 124.
- spring application, (33) 625.
- statistics for 1914, (31) 30.
- substitutes for, (34) 327.
- supplies of Great Britain during the war, (35) 126.
- supply, (34) 49.
- supply, German and other sources, (32) 820.
- supply in United States, (32) 126.
- use in agriculture, (34) 27.
- in Germany, (28) 726; (36) 726.
- in 1911, (27) 727; (28) 626.
- on cotton, corn, and potatoes, (40) 516.
- on moor soils, (38) 132.
- on pastures, (26) 437.
- v. phosphate fertilizers, (40) 824.
- v. sodium for sugar beets, (33) 135.
- waste liquor lime, fertilizing value, (34) 26.
- works waste products, fertilizing value, (34) 328.
- works waste water for irrigation, (35) 637.
- world's supply, (34) 724.
- world-wide search for, (31) 323.

## Potassic—

- rocks, utilization, (32) 324.
- superphosphate, fertilizing value, (26) 231; (27) 530.

## Potassium—

- acid phthalate in acidimetry and alkalimetry, (34) 408.
- adsorption by soils, (34) 817.
- aluminum sulphate, fertilizing value, (37) 527.

## Potassium—Continued.

- and calcium sulphate, preparation, (32) 424.
- assimilation by plants, (31) 219.
- availability in soils, (33) 517; (35) 429.
- bichromate—
  - as milk preservative, (27) 677; (32) 576.
  - effect on germination of seeds, (26) 820.
  - effect on milk, (31) 507; (33) 503.
  - effect on plants, (27) 131.
- bisulphate, use in manufacture of superphosphates, (27) 627.
- bromate, effect on enzym action, (38) 611.
- bromid, effect on composition of milk, (30) 178.
- carbonate—
  - effect on germination of dodder, (27) 28.
  - effect on germination of seeds, (29) 328.
  - fertilizing value, (29) 632; (38) 218.
- chlorate injection into trees, (32) 754.
- chlorid—
  - absorption by plants, (35) 435.
  - action on humus, (39) 514.
  - analyses, (28) 326.
- chlorid, effect on—
  - activity of malt diastase, (29) 528.
  - activity of soil bacteria, (31) 821.
  - ammonification and concentration of soil solution, (39) 323.
  - composition of cereals, (37) 827.
  - composition of turnips, (29) 418.
  - germinating plants, (33) 128.
  - germination of seeds, (29) 327.
  - nitrogen content of soil, (38) 213.
  - quality of sugar beets, (28) 44.
  - wheat, (38) 439; (40) 244.
- chlorid—
  - fertilizing value, (26) 329, 526, 630, 736; (27) 32, 137, 234, 325, 338; (28) 832; (29) 625, 830; (30) 25, 427, 437, 636; (31) 731, 829; (32) 136; (35) 535; (36) 121; (38) 218, 422, 816, 825; (39) 434, 737, 740; (40) 516.
- for asparagus, (28) 339.
- carnations, (27) 844.
- citrus fruits, (31) 634.
- cranberries, (34) 150.
- imports into United States, (31) 726.
- preparation, (40) 801.
- secondary and subsidiary effects, (30) 26.
- use with seaweed, (33) 331.
- waste liquors, effect on water supplies, (30) 714.
- content of muscles, (26) 566.
- content of spinach, (40) 451.
- cyanid—
  - analyses, (38) 643.
  - as greenhouse fumigant, (32) 536.
  - as larvicide, (27) 452.
  - conduction in plants, (38) 855.
  - effect on permeability, (37) 326.
  - effect on permeability of vegetable plasma membrane, (34) 333.
  - effect on trees, (33) 154, 556, 725.
  - injection into trees, (32) 152, 754, 846.
  - inoculation, effect on trees, (39) 225, 762.
  - insecticidal value, (35) 755.
  - toxic action on Paramecium and Didinium, (40) 455.
- deficiency, effect on oat plant, (40) 324.
- detection as cobalti-nitrite, (26) 607.
- detection with tartaric acid, (32) 608, 609.
- determination, (28) 569; (29) 307, 609; (32) 714; (33) 710; (34) 503; (35) 315; (36) 111, 299, 611; (37) 110; (39) 413, 714.
- determination—
  - as platonic chlorid, (26) 108; (27) 409.
  - in blood, (40) 116.
  - fertilizers, (29) 409; (35) 12.
  - foods, (29) 809.
  - minerals, (27) 805.
  - potassium silicate, (30) 412.
  - potassium sulphate and kainit, (28) 710.
  - soils, (27) 109; (28) 204.
  - vegetable ash, (38) 311.
- distribution in renal cells, (30) 277.
- effect on—
  - Aspergillus fumigatus, (29) 30.
  - Aspergillus niger, (28) 527.
  - grapes, (31) 339.
  - growth of tubercle bacilli, (29) 381.
  - hydration and growth, (40) 818.
  - yield of rubber, (31) 444.

## Potassium—Continued.

- excretion under normal and pathological conditions, (29) 166.
- ferrocyanid—
  - fertilizing value, (34) 27.
  - residue, fertilizing value, (26) 323.
  - toxicity in soils, (40) 726.
- hydroxid and sulphur, reaction between, (31) 409.
- importance in animal nutrition, (31) 663.
- in metabolism of Aspergillus niger, (30) 727.
- iodid, effect on ammonification, (28) 724.
- iodid, stimulation of radishes by, (39) 730.
- iodid, therapeutic value, (35) 382.
- localization and function in plants, (26) 823.
- mobility in vegetable tissue, (32) 128.
- nitrate—see also Saltpeter.
  - absorption by plants, (35) 432.
  - deposits in Brazil, (39) 817.
  - deposits in New Mexico, (27) 127.
  - deposits in western America, (26) 226.
- nitrate, effect on—
  - alcoholic fermentation by Sterigmatocystis nigra, (37) 223.
  - baking quality of flour, (30) 555.
  - burning quality of tobacco, (38) 140, 239.
  - flow of rubber latex, (29) 748.
  - germinating plants, (33) 128.
  - germination of dodder, (27) 28.
  - germination of seeds, (29) 328.
  - legume bacteria, (29) 733.
  - nitrogen-assimilating bacteria, (38) 724.
  - toxic salts, (30) 31.
  - wheat seedlings, (31) 426.
- nitrate—
  - exports from India, (26) 524.
  - fertilizing value, (31) 518; (36) 626; (38) 218.
  - in hops, (32) 502.
  - in plants, (27) 26.
  - preparation, (40) 801.
- of biotite, availability, (33) 722.
- of soils, studies, (28) 30.
- oxalate, effect on starch ferments, (27) 109.
- oxalate, toxicity, (28) 661.
- oxid, determination in soils, (31) 313.
- palmitate, use in water analysis, (31) 502.
- permanganate—
  - action with plant peroxidases, (37) 726.
  - antiseptic and germicidal value, (37) 176.
  - as antidote for poisonous plants, (37) 688.
  - as soil disinfectant, (31) 621.
  - as soil sterilizer, (26) 322.
  - determination of arsenious acid with, (28) 804.
  - effect on moor soils, (35) 724.
  - effect on plant growth, (35) 434.
  - effect on root growth of cuttings, (39) 826.
  - effect on sweet peas, (27) 621.
  - fertilizing value, (28) 820; (33) 841.
  - reduction in plants, (30) 31.
  - relation to tobacco gummosis, (28) 243.
  - solution, standardization, (31) 501.
  - solutions, preparation, (38) 412.
  - therapeutic value, (38) 585.
  - treatment for seed grains, (34) 844.
  - use against grape oidium, (28) 152.
- persulphate, oxidation of carbohydrates by, (33) 502.
- phosphate, effect on wheat seedlings, (31) 426.
- phosphate, fertilizing value, (27) 342.
- platonic chlorid, reduction, (27) 409; (40) 711.
- relation to carbohydrate formation and decomposition, (27) 635.
- removal from soil, (39) 517, 724.
- requirements of B. subtilis, (39) 619.
- requirements of barley and oats, (37) 34.
- salt as an adulterant of table salt, (29) 867.
- salts—see also Potash salts.
  - absorption by plants, (35) 433.
- salts, effect on—
  - ammonia fixing power of soils, (27) 323.
  - Aspergillus niger, (28) 824.
  - bacterial flora of soils, (28) 815.
  - catalase, (26) 504.
  - composition of plants, (29) 419.
  - frost resistance in plants, (28) 38.
  - germination and growth of crops, (34) 125.
  - hydrogen-ion concentration in soils, (39) 425.
  - nitric-nitrogen accumulation, (40) 722.
  - plants, (32) 538.

## Potassium—Continued.

- salts, effect on—continued.
  - purin metabolism, (28) 261.
  - solubility of phosphates, (36) 626.
- salts—
  - equilibria in solutions, (39) 203, 204.
  - extraction from silicate rocks, (29) 215.
  - fertilizing value, (28) 123; (30) 527.
  - flocculating power in clay, (27) 620.
  - fractional crystallization, (39) 204.
  - hygroscopicity, (35) 631.
  - in salines of United States, (29) 214.
  - toxicity in soil, (36) 515.
- separation from sodium, (29) 807.
- silicate, fertilizing value, (30) 527; (31) 820.
- silicate in phonolite, fertilizing value, (26) 726.
- soil, studies, (27) 500.
- sulphate, as winter spray for fruits, (30) 641.
- sulphate, effect on—
  - activity of soil bacteria, (31) 821.
  - carnations, (36) 446.
  - germination of seeds, (29) 328.
  - marsh plants, (29) 531.
  - powdery mildew infection, (33) 244.
  - soil acidity, (37) 23; (38) 620.
  - tomatoes, (29) 539.
- sulphate—
  - extraction from alunite, (26) 526.
  - extraction from feldspar, (28) 223.
  - fertilizing value, (26) 233, 329, 526, 536, 630, 639, 838; (27) 325, 530, 639; (28) 431; (29) 632, 829; (30) 437, 835; (31) 731; (32) 831; (33) 432; (35) 22; (36) 121, 425; (37) 229, 449, 527, 529, 729; (38) 32, 135, 218; (39) 518, 530, 637; (40) 515, 516, 532, 633, 725, 733, 734.
  - for carnations and roses, (29) 840.
  - citrus fruits, (31) 634.
  - sweet potatoes, (31) 437.
  - tobacco, (31) 738.
  - imports into United States, (31) 726.
  - nitrogen absorption capacity, (28) 325.
  - preparation, (40) 801.
  - secondary and subsidiary effects, (30) 26.
- sulphid, effect on soil acidity, (37) 23.
- sulphocarbonate as an insecticide, (32) 246.
- sulphur mixture, insecticidal value, (34) 60.
- tellurate as a fly repellent, (26) 755.
- toxicity toward plants, (30) 128.

## Potato—

- aphid—
  - alternate hosts, (39) 464.
  - control by lady beetles, (34) 555.
  - notes, (28) 554; (37) 761.
  - pink and green, notes, (39) 761.
  - pink and green, studies, (34) 550; (37) 849; (38) 462; (40) 456.
  - relation to spinach blight, (39) 551.
  - studies, (38) 654.
- Association of America, proceedings, (37) 800; (40) 529.
- bacterial—
  - diseases in Ontario, (37) 150.
  - diseases, notes, (37) 652.
  - diseases, studies, (26) 847.
  - fibrovascular disease, notes, (26) 547.
  - ring rot, studies, (33) 146.
  - rot, notes, (27) 248.
  - rot, studies, (26) 846; (30) 48; (35) 349.
  - wilt, notes, (32) 50.
- beetle, behavior in deserts, (40) 860.
- beetle, Colorado—
  - control by parasites, (37) 760.
  - in Germany, (33) 158; (35) 57.
  - life history, (34) 756.
  - notes, (26) 865; (29) 252, 652; (33) 58; (34) 753; (37) 599; (38) 161, 653.
  - on Pacific coast, (31) 254.
  - oviposition, (34) 655.
  - pigment and color pattern in, (26) 350.
  - relation to tomato leaf spot, (40) 644.
  - remedies, (27) 161; (28) 59; (33) 358; (35) 661, (39) 337, 853; (40) 330.
- beetle, remedies, (30) 852; (40) 734.
- black—
  - canker or wart, (40) 848.
  - canker, treatment, (31) 149.
  - dot disease, notes, (32) 146.
  - heart, description, (33) 741.
  - heart, studies, (30) 149; (34) 242; (35) 349; (38) 835.

## Potato—Continued.

- black—continued.
    - scab, international control, (30) 537.
    - scab, notes, (32) 342.
    - scab, studies, (26) 547.
    - scurf, treatment, (40) 450, 734, 847.
    - wart, notes, (27) 245.
  - blackleg—
    - notes, (30) 197; (31) 641; (36) 250; (40) 449.
    - studies, (36) 648; (39) 148, 456.
    - treatment, (26) 546.
  - blight—
    - infection experiments, (34) 52.
    - notes, (26) 143; (31) 641, 746; (36) 449; (39) 850.
    - prevalence in Ireland, (28) 151; (30) 539.
    - resistance to, (38) 825.
    - treatment, (27) 735; (30) 539; (33) 97; (38) 235.
    - treatment with hot water, (34) 50.
  - blossoms, color variation, (39) 535.
  - blossoms, secretion of stigmatic fluid by, (33) 233.
  - blotch and streak disease, identity, (32) 239.
  - Botrytis disease, (39) 250.
  - bread, recipes, (37) 364.
  - brown streak and blossom abortion, (37) 549.
  - cake, analyses, (36) 65.
  - canker—
    - description, (32) 443.
    - in Sweden, (33) 846.
    - notes, (31) 243.
    - studies, (26) 547.
    - treatment, (34) 247; (37) 249.
  - chips, preparation, (29) 414.
  - club champions in 1913, (30) 399.
  - clubs, suggestions for, (31) 793, 794.
  - collar rot, notes, (32) 442.
  - contests for boys and girls, (28) 194.
  - corky scab, notes, (34) 241; (35) 650.
  - corky scab, occurrence in Scotland, (26) 748.
  - curly dwarf, notes, (31) 748; (38) 545.
  - curly dwarf, studies, (36) 530; (37) 841.
  - curly leaf, studies, (34) 450.
  - diet, effects of, (34) 164.
  - diggers, descriptions, (27) 191.

 digestibility, (31) 767.  
 dried, analyses and digestibility, (32) 168.  
 effect on milk, (34) 471.  
 nutritive value, (29) 665.  
 steaming and ensiling, (31) 467.

## Potato—Continued.

- Rhizoctonia disease—  
in New Jersey, (36) 147.  
notes, (30) 845; (36) 145; (37) 753; (40) 746.  
studies, (32) 147; (34) 350; (37) 653, 654; (38) 250.  
treatment, (32) 441; (36) 49; (40) 847.  
root rot, description, (32) 50.  
root rot, notes, (26) 446; (29) 445.  
root due to *Phytophthora infestans*, (38) 249.  
rot, notes, (26) 648; (30) 243; (31) 145; (32) 343; (34) 50.  
rot, prevention, (26) 342.  
rot, studies, (29) 550; (37) 651.  
rust, notes, (40) 844.  
rust spot, internal, (40) 848.  
scab—  
as affected by fertilizers, (32) 750.  
notes, (30) 539, 748; (31) 243; (32) 48, 239, 443; (37) 551; (38) 149; (40) 48.  
organism as affected by acidity, (40) 644.  
organism, passage through digestive tract of animals, (28) 548.  
relation to beet scab, (33) 547.  
relation to higher bacteria, (27) 650.  
relation to temperature, (33) 245.  
studies, (27) 248; (32) 546.  
treatment, (26) 342, 740; (27) 349; (29) 646; (30) 139, 159, 539, 540; (32) 146, 441; (33) 246; (34) 155, 744; (36) 848; (39) 755, 851; (40) 734, 847.  
treatment, effect on seed vitality, (32) 230, 240.  
varietal resistance to, (31) 643.  
sclerotia, treatment, (40) 746.  
silage—  
analyses, (31) 864.  
composition and digestibility, (31) 467.  
notes, (38) 207.  
preparation, (37) 800.  
silver scurf—  
description, (32) 50.  
in Salt Lake Valley, (32) 643.  
notes, (32) 547; (36) 145.  
studies, (29) 347; (35) 455; (36) 544.  
skins, impermeability, (29) 628.  
skins, isolation of fat from, (29) 459.  
sorters, tests, (27) 589.  
spindling sprout, notes, (33) 52, 346; (39) 630.  
spindling sprout, studies, (36) 530; (38) 249.  
sprayers, tests, (29) 292.  
stalk borer, notes, (25) 253; (35) 657.  
stalk disease, studies, (40) 49.  
stalk or sclerotium disease, notes, (31) 539.  
stalks and berries for sheep, (28) 571.  
starch—  
and dextrin, manufacture, (38) 207.  
baking tests, (34) 460.  
color reaction, (40) 411.  
effect on quality of dough, (26) 761.  
farm manufacture, (37) 800.  
preparation, (33) 162.  
refuse for cows and pigs, (28) 372.  
studies, (31) 828.  
stem borer in Nova Scotia, (39) 160.  
stem lesions, studies, (39) 649.  
stem rot, notes, (26) 446.  
stems, *Rhizoctonia* lesions on, (33) 548.  
storage rot, notes, (31) 345; (32) 547; (38) 298.  
storage rot, studies, (32) 441.  
survey in New York, (31) 225.  
tipburn and early blight, treatment, (37) 753.  
tipburn, notes, (32) 544.  
tops, drying, (27) 775.  
tops, feeding value, (29) 665; (38) 168.  
tuber diseases, descriptions and treatment, (29) 549.  
tuber diseases, notes, (30) 847.  
tuber moth—  
in California, (40) 56.  
investigations, (36) 655.  
notes, (29) 855.  
on imported potatoes, (39) 58.  
remedies, (29) 855.  
tuber rot—  
and wilt, studies, (35) 246; (36) 846.  
notes, (35) 653.  
studies, (34) 246; (38) 149, 235.

## Potato—Continued.

- tuber, special growth-promoting substance, (39) 629.  
tuber worm—  
insensitivity to poisons, (31) 756.  
life history and remedies, (27) 57.  
notes, (26) 655; (27) 53; (28) 160, 355, 555; (34) 250, 851.  
parthenogenesis and oviposition of, (30) 55.  
remedies, (33) 351; (34) 654; (35) 358.  
studies, (30) 550.  
tubers—  
frost necrosis, (37) 842.  
morphology and histology, (29) 628.  
production above ground, (35) 523.  
respiration as affected by loss of water, (39) 731.  
tyrosinase, notes, (35) 414.  
*Verticillium* diseases, (37) 49; (39) 250, 852.  
*Verticillium* wilt, studies, (33) 244.  
warehouse, cooperative, in Wisconsin, (28) 895.  
warehouse, plans, (28) 385.  
wart, black, notes, (40) 848.  
wart disease—  
control in Great Britain, (31) 149.  
in England, (33) 850.  
in Pennsylvania, (40) 157, 543, 848.  
notes, (26) 244, 448; (28) 243, 648; (30) 845; (35) 150, 649; (37) 753; (38) 546.  
quarantine in United States, (36) 245.  
resistant strains, (40) 630.  
studies, (27) 351; (29) 448, 449; (34) 844; (39) 149.  
treatment, (31) 842; (32) 444; (33) 446.  
weevils from Andean South America, (30) 459.  
weevils, notes, (38) 864.  
wilt and tuber rot, studies, (36) 648.  
wilt, studies, (38) 149; (40) 51.  
Potatoes—  
abnormal root formation in, (29) 217.  
absorption of copper fungicides by, (28) 648.  
accumulation of sugar in, (29) 219.  
aerial tuber on, (31) 529.  
after-ripening, (26) 626; (30) 825.  
air-dried, as a feeding stuff, (36) 367.  
alcohol from, (28) 715.  
amylolytic activity, (34) 428.  
analyses, (26) 363, 770; (27) 570; (31) 65, 433, 864.  
applying fertilizing solutions to aerial portions, (30) 129.  
as affected by—  
boiling and steaming, (28) 363.  
Bordeaux mixture, (36) 147.  
copper fungicides, (28) 247.  
ether, (26) 127.  
*Fusarium*, (35) 246.  
guanidin, (28) 427.  
manganese, (35) 634.  
poisoning, (33) 329.  
potash, (31) 333.  
precipitation and temperature, (28) 41.  
soil moisture, (36) 336.  
solanin, (28) 528.  
storage, (29) 230.  
sulphuric acid in irrigation water, (29) 330.  
water level, (26) 620.  
as basal feed for pigs, (30) 269.  
food, (36) 560.  
poultry food, (33) 98.  
substitute for cereals, (38) 166.  
wheat substitute, (39) 67, 870.  
ash analyses, (29) 861.  
assimilation of nitrogen by, (26) 319.  
black discoloration of flesh, (28) 648.  
blast-furnace flue dust for, (39) 118.  
blindness in, (26) 847.  
blue swamp, culture experiments, (28) 738.  
breeding, (36) 636.  
breeding experiments, (30) 233, 338; (33) 233; (34) 634; (36) 336; (37) 827; (39) 534, 740.  
bud mutations, (27) 230.  
bushel weights, (37) 889.  
calcium cyanamid for, (31) 524.  
catalytic fertilizers for, (27) 629.  
changes in during—  
drying, (33) 661.  
rest period, (36) 136, 633.  
sprouting, (30) 825.

## Potatoes—Continued.

- classification and description, (32) 830.
- classification of varieties, (27) 31.
- cold-storage, diastase activity, (33) 315.
- composition as affected by—
  - irrigation, (28) 332.
  - sodium salts, (29) 420.
- conservation for stock food, (35) 505.
- continuous culture, (27) 734.
- cooking tests, (32) 431.
- correlations in, (39) 541.
- cost of distribution, (29) 492.
- cost of production, (26) 190; (32) 530, 688; (33) 831; (36) 232, 492; (37) 191.
- cover crops for, (39) 755.
- critical period of growing season, (39) 811.
- cull, feeding value, (38) 168.
- culture, (26) 740; (27) 196, 298, 337, 738; (28) 738; (29) 194, 336, 395, 535, 830; (30) 39, 832; (31) 231, 232, 435, 528; (32) 136, 738; (33) 40, 98, 398, 636; (34) 36, 528, 630; (36) 498, 531; (38) 437, 535, 835; (39) 834.
- culture—
  - clubs in Idaho, (27) 395.
  - clubs, notes, (28) 899.
  - contests, (34) 493.
  - contests in Canada, (31) 194.
  - experiments, (26) 38, 233, 329, 422, 536, 631, 736; (27) 335, 430, 638, 735, 833; (28) 135, 230, 532; (29) 137, 138, 226, 330, 331, 426, 427; (30) 133, 632, 828; (31) 42, 430, 732, 829; (32) 36, 132, 229, 430, 431, 526, 528, 529, 530; (33) 31, 632, 731, 830, 834; (34) 228, 229; (35) 229, 341, 527; (36) 32, 132, 228, 231, 336, 440, 636; (37) 30, 32, 37, 135, 228, 338, 436, 825; (38) 132, 336, 432, 633, 634, 735, 825; (39) 227, 230, 334, 435, 437, 632, 740, 834; (40) 429, 434, 625, 630, 732, 735.
  - for forage, (33) 34.
  - implements and machines for, (33) 891.
  - in Alaska, (29) 735; (39) 125, 127, 137.
  - Argentina, (37) 823.
  - California, (37) 139.
  - Canada, (39) 537.
  - Colorado, (37) 37; (39) 341.
  - Florida, (30) 828; (36) 835.
  - Germany, (30) 139.
  - Georgia, (34) 435.
  - Hawaii, (32) 730.
  - India, (32) 131; (39) 230.
  - Ireland, (26) 41.
  - Isle of Pines, (30) 528.
  - Kansas, (30) 735.
  - Maine, (38) 738; (40) 335.
  - Michigan, (39) 320.
  - Nebraska, (32) 631.
  - Nevada, (37) 442; (39) 138.
  - New Mexico, (40) 18.
  - northern and western States, (37) 538.
  - sand hills of Nebraska, (35) 827.
  - Scotland, (30) 735.
  - South Dakota, (39) 341.
  - southwestern Russia, (37) 338.
  - Washington, (37) 139.
  - West Virginia, (29) 744.
  - Wisconsin, (28) 738; (31) 736; (37) 442.
- on irrigated land, (26) 636.
- on moor soils, (39) 438; (40) 523.
- on muck soils, (33) 33.
- poster on, (39) 138.
- treatise, (38) 235; (40) 36, 439, 828.
- under dry farming, (28) 533; (30) 435; (33) 632; (36) 528, 529.
- under glass, (37) 643.
- under irrigation, (28) 839; (34) 528; (37) 830; (39) 442.
- with fruit trees, (33) 534.
- Cytophora batata* attacking, (39) 456.
- damaged, drying, (30) 613.
- degeneration, (36) 530; (38) 535.
- desiccated, use, (27) 210.
- desirable types, (31) 643.
- determination of disease resistance in, (27) 545.
- dietary value, (37) 800; (40) 172.
- digestibility, (28) 360, 564.
- disease resistance in, (26) 836; (38) 235.
- disease-free, production, (35) 751.
- diseased, examination, (27) 207.

## Potatoes—Continued.

- diseased, yields, (26) 536.
- distribution of *Fusaria* on, (27) 247.
- dried—
  - analyses, (26) 770.
  - antiscorbutic properties, (40) 172.
  - digestibility, (26) 468.
  - for pigs, (38) 473.
  - notes, (35) 505.
  - use in bread making, (32) 252.
- dusky leaf bug affecting, (32) 57.
- dusting and spraying experiments, (36) 855.
- eelworm-infested, (40) 51.
- effect of change of seed, (33) 331.
- effect on—
  - composition of following wheat crop, (34) 230.
  - composition of urine, (31) 761.
  - following crop, (32) 223; (38) 337; (40) 623.
  - intestinal flora, (40) 867.
  - nitrate content of soils, (29) 818.
  - soil bacteria, (37) 421.
  - soil moisture, (28) 321; (34) 17.
- electroculture experiments, (26) 835; (27) 231; (30) 828; (31) 428; (39) 230; (40) 428.
- endophytic endodermal fungus in, (32) 643.
- ensiling, (32) 364, 567.
- ensiling with lactic acid, (33) 268.
- extraction of starch from, (28) 208.
- factors affecting culinary quality, (30) 63.
- factors affecting health, (34) 746.
- false chinch-bug on, (39) 760.
- feeding for cheese production, (29) 475.
- feeding value, (37) 800.
- ferrous sulphate as top dressing for, (30) 735.
- fertilizer experiments, (26) 31, 232, 324, 329, 422, 423, 424, 425, 428, 522, 536, 631, 636, 727, 817, 836 (27) 32, 125, 137, 321, 324, 421, 422, 530, 626, 633, 629, 724; (28) 230, 431, 520, 535, 723, 735; (29) 23, 125, 129, 213, 227, 228, 318, 330, 427, 635, 727, 821; (30) 38, 124, 134, 220, 229, 327, 528, 626, 820, 821, 832; (31) 31, 36, 41, 129, 133, 328, 333, 421, 431, 820, 822, 829, 833; (32) 132, 325, 431, 739; (33) 33, 219, 237, 286, 326, 517, 625, 728, 831; (34) 24, 294, 518, 519, 622, 723, 820; (35) 34, 126, 218, 323, 425, 427, 430, 519, 629, 724; (36) 25, 121, 132, 217, 220, 425, 529; (37) 138, 215, 228, 337, 436, 521, 533, 635, 739; (38) 32, 220, 432, 433, 520, 540, 634, 820; (39) 130, 230, 327, 338, 334, 427, 435, 621, 625, 738 740; (40) 126, 134, 229, 330, 331, 332, 421, 431, 434, 515, 524, 621, 622, 725, 734, 735.
- fertilizer experiments under irrigation on sandy soils, (33) 286.
- fertilizers for, (32) 335.
- flower-stalk position, (40) 631.
- following alfalfa, (39) 130.
- following alfalfa hay and pasture crops, (40) 430.
- food value, (29) 463.
- for farm stock, (30) 175.
- fattening swine, (35) 376.
- horses, (28) 363.
- late planting, (37) 436.
- milk production, (35) 174.
- pigs, (31) 667; (38) 372, 535.
- recropping sugar-beet land, (40) 431.
- forcing by electricity, (26) 136.
- foreign, danger from, (26) 836.
- formaldehyde treatment, (30) 697.
- frosted and decayed, starch from, (39) 802.
- frozen and decayed, utilization, (37) 806.
- fumigation with carbon bisulphid, (31) 756.
- Fusaria* of, (31) 447.
- germination studies, (30) 30.
- grading, (38) 34, 535, 834.
- graphic summary of seasonal work, (39) 495.
- green manuring experiments, (29) 330; (31) 438; (32) 217; (39) 31, 816.
- ground, analyses, (31) 65.
- ground seaweed for, (40) 724.
- growth as affected by—
  - Azotobacter, (28) 814.
  - electric light, (28) 228.
  - electricity, (30) 827.
  - manganese, (30) 823; (32) 725.
  - sulphur, (29) 215.
- growth—
  - in a cave, (31) 521.
  - acetylene gas, (27) 827.

- Potatoes—Continued.  
 growth—continued.  
   in artificial light, (28) 735.  
   relation to temperature and moisture, (40) 19.  
   shade, (29) 130.  
   of basal and terminal buds, (39) 536, 629.  
   on acid soil, (40) 324.  
 hail injury to, (35) 734.  
 handling and marketing, (36) 136.  
 handling and storing, (39) 149.  
 harvesting and storing, (30) 197; (36) 336.  
 harvesting experiments, (26) 836.  
 hereditary characters in, (28) 632.  
 home-mulched v. northern seed, (32) 631; (33) 336.  
 hypertrophy-structure in, (27) 151.  
 identification of varieties, (33) 297.  
 immature, for seed, (37) 337.  
 importance of clean seed, (37) 96.  
 improvement, (26) 437, 636; (28) 43; (32) 830; (38) 827.  
 improvement by seed selection, (32) 230, 630.  
 improvement, tuber-unit method, (28) 835.  
 in the dietary, (33) 695.  
 ingrowing, sprouts of, (26) 828; (28) 734.  
 inheritance of high starch content, (27) 500.  
 insects affecting, (26) 553, 631; (29) 259, 336; (30) 240, 753; (31) 232; (33) 352; (36) 550; (37) 157; (38) 558; (39) 358, 461, 466, 861; (40) 753.  
 internal spotting, (27) 349.  
 irrigated, manuring experiments, (40) 421.  
 irrigation, (28) 484; (29) 736; (31) 328; (39) 442.  
 irrigation experiments, (27) 531; (28) 130, 133, 135, 230, 588, 827; (29) 32, 138, 182, 226, 425, 426; (32) 37, 186, 225, 531; (33) 286, 827, 884; (34) 229, 721; (35) 636; (36) 35; (37) 30, 37, 84, 740, 822; (38) 320, 633; (39) 132; (40) 331.  
 judging, (36) 97.  
 lady beetles affecting, (30) 255.  
 lessons on, (28) 598.  
 liability to disease, (40) 157.  
 lightning injury, (33) 345; (40) 645.  
 lime for, (28) 223.  
 liming experiments, (29) 223; (37) 733.  
 lining and loading cars, (40) 138.  
 loss in boiling, (34) 660.  
 manurial value of tops, (39) 836.  
 market types, (38) 535.  
 marketing, (31) 893; (33) 40, 693; (34) 288; (38) 535, 834.  
 marketing cooperatively, (29) 392; (33) 491; (34) 288.  
 methods of analysis, (28) 510.  
 methods of variety testing, (26) 436.  
 microscopic tests, (27) 341.  
 mulching experiments, (33) 526.  
 mutation in, (31) 137.  
 nematodes affecting, (26) 748.  
 new nematode infesting, (38) 147.  
 notes, (29) 338.  
 on Caribou loam, (39) 335.  
 origin, (26) 529; (31) 137, 833.  
 origin and early culture, (38) 332, 535.  
 origin of cultivated varieties, (28) 530.  
 osmotic pressure in, (30) 228.  
 oxidases in, (26) 547; (31) 748.  
 Pearl, bastard type, (31) 833.  
 phloem necrosis in, (33) 52.  
 phosphorus content, (27) 461.  
 physiological abnormalities of, (30) 747.  
 planting—  
   dates, (37) 317, 732; (40) 31, 431.  
   dates and distances, (40) 630.  
   experiments, (26) 833; (31) 132; (37) 538; (38) 634.  
   whole v. cut tubers, (38) 534.  
 potash fertilizers for, (26) 526.  
 potash hunger, (37) 800.  
 preparation for exhibition, (28) 738.  
 preservation, (39) 316.  
 preservation by pressure, (32) 416.  
 preservation with lactic acid starter, (31) 467.  
 production—  
   and consumption, (39) 838.  
   in 1911, (26) 595.  
   in United Kingdom, (26) 793.
- Potatoes—Continued.  
 production—continued.  
   in United States, (26) 293.  
   1918 program, (38) 834.  
 propagation by cutting, (36) 636.  
 protection against frost, (27) 421.  
 purin content, (40) 205.  
 quality as affected by weather, (26) 415.  
 quarantine regulations, (31) 149.  
 radioactive fertilizers for, (31) 129; (35) 628.  
 raising, illustrated lecture, (39) 498.  
 rate of seeding tests, (27) 335.  
 raw, antiscorbutic value, (40) 565.  
 rejuvenescence, (30) 730; (40) 732.  
 relation between size of seed and yield, (26) 434.  
 relation of nitrogen to protein content, (28) 636.  
 relation of tops to roots, (31) 733.  
 relation to climate, (28) 27.  
 relative yielding capacity, (40) 625.  
 removal of blossoms, (40) 138.  
 respiration and decay, (29) 565; (32) 111.  
 respiration investigations, (34) 523.  
 rest period in, (30) 825; (32) 129; (36) 223; (40) 224.  
 root systems of, (31) 515.  
 rotation experiments, (33) 429, 829; (36) 528, 829; (38) 129; (40) 229, 331, 430, 734.  
 score card for, (28) 43.  
 second crop, (39) 341.  
 seed—  
   certification, (33) 336; (38) 535; (40) 846.  
   certification in Germany, (34) 444.  
   cold storage v. cellar storage, (29) 336.  
   cutting and sprouting, (40) 135.  
   disinfection, (32) 528.  
   for fall planting, (38) 535.  
   for Ontario, tests, (39) 838.  
   formaldehyde disinfection, (30) 539, 540.  
   from light soils for heavier soils, (33) 531.  
   from sprayed plants, (40) 732.  
   Government farm in India, (40) 625.  
   growing in Nova Scotia, (38) 646.  
   handling and storing, (28) 638.  
   improvement, (29) 230; (37) 823.  
   inspection and certification, (31) 345.  
   inspection in Wisconsin, (31) 736.  
   judging, (28) 243.  
   local v. imported, (29) 331; (40) 434.  
   peelings and cuttings for, (40) 138.  
   plat method of improvement, (39) 740.  
   preparation, (39) 536, 740; (40) 135, 630.  
   production, (37) 753, 800; (39) 841.  
   production and handling, (29) 141.  
   propagation, (39) 534.  
   selection, (28) 535, 738; (29) 37; (30) 197, 228, 637; (34) 338, 494; (35) 396, 696; (36) 638.  
   selection and preparation, (32) 739.  
   selection and treatment, (31) 333.  
   sprouted v. unsprouted, (28) 535; (30) 333, 832.  
   sprouting before planting, (32) 35; (33) 331; (34) 530.  
   storage, (38) 437.  
   tests, (39) 131, 334, 337, 535, 740.  
   treatment, (39) 337, 740, 755; (40) 51, 450, 734, 746, 847.  
 seeding experiments, (29) 224, 226, 425; (30) 134; (33) 227; (38) 132, 534; (39) 127, 337, 536; (40) 732, 734.  
 seeding experiments with skins, (39) 537.  
 seedling, culture, (31) 643.  
 selection, (38) 197; (39) 541.  
 selection experiments, (33) 233, 526, 698; (37) 32, 228, 240; (38) 433; (39) 740; (40) 429, 523.  
 selection of edible types, (30) 39.  
 sensitivity to poison, (35) 457.  
 small v. large tubers for planting, (33) 834.  
 Solanum commersonii resembling, (28) 130.  
 spraying, (29) 194; (37) 538; (38) 135; (39) 345, 541; (40) 747, 748.  
 spraying—  
   experiments, (27) 237, 738; (28) 346, 433; (29) 845; (30) 49, 449, 847; (31) 137; (32) 158, 229, 431, 444, 547; (33) 40, 336; (35) 527, 831; (36) 49, 847; (37) 228; (38) 235; (39) 337, 755, 853.  
   v. dusting, (32) 551; (33) 336, 636; (34) 158.  
   with Bordeaux mixture, (26) 548.  
   with lime arsenate, (40) 164.  
 sprouted, food poisoning by, (40) 557.

## Potatoes—Continued.

- sprouting—  
 as affected by chemicals, (32) 829.  
 in relation to soil moisture, (35) 527.  
 tests, (26) 330.  
 starch content, (35) 108.  
 steamed and dried, for pigs, (30) 470.  
 steamed, composition and digestibility, (31) 467.  
 steaming and ensiling, (31) 467.  
 storage, (29) 696; (38) 89; (39) 770.  
 storage—  
 and marketing, (36) 195.  
 cellars, (40) 191.  
 cellars, description, (38) 391.  
 experiments, (29) 425; (38) 835; (39) 639.  
 house, plans, (38) 137.  
 in sand, (31) 736.  
 stored, chemistry of, (32) 111.  
 stored, new insect pest of, (32) 57.  
 studies for schools, (27) 196.  
 subsoiling experiments, (37) 732.  
 sugar in, (33) 223, 310.  
 sulphur as fertilizer for, (30) 139.  
 surplus, utilization, (31) 149.  
 susceptibility to diseases, (28) 535.  
 susceptibility to Irish blight, (26) 636.  
 swamp, description and culture, (36) 637.  
 symbiosis and tuberization in, (30) 730.  
 testing disease-resistant qualities, (28) 53.  
 thinning and spacing experiments, (33) 526.  
 thinning experiments, (34) 736.

 school in Rio de Janeiro, (30) 194.  
 secondary sexual characters, changes in, (33) 272.  
 selection, (34) 74, 564, 870; (36) 702.  
 sex-limited inheritance in, (26) 878; (27) 876.  
 sex-linked inheritance in, (27) 573; (31) 368; (33) 271.

## Poultry—Continued.

- sex nature of, (29) 466.  
 shipping, (39) 377.  
 shipping into Germany, (26) 669.  
 show, first in America, (32) 265.  
 shows and associations, (33) 872.  
 societies in England, (32) 792.  
 sprouted grain for, (34) 294.  
 sprouted oats for, (39) 74.  
 standards, relation to utility, (37) 775.  
 statistics in Ireland, (34) 291.  
 statistics in United States, (28) 390.  
 storage, (39) 770.  
 "summer poisoning," (36) 884.  
 supply and consumption in Ithaca, N. Y., (33) 572.  
 survey of—  
 a country village in New York, (34) 669.  
 of Jackson County, W. Va., (33) 173.  
 textbook, (30) 696; (31) 474, 568; (36) 597.  
 tonics, analyses, (26) 568.  
 tonics, inspection and analyses, (39) 70.  
 treatise, (26) 270, 473, 669; (27) 72, 73, 674; (28) 270, 470, 673; (29) 69, 193, 371, 573; (30) 270, 572; (31) 270; (33) 77, 173, 473; (34) 269, 377, 470; (37) 769, 775.  
 undrawn, sale, (32) 456.  
 variations in, (30) 374.  
 war-time rations, (37) 573.  
 winter management, (34) 770.  
 work at Oregon Station, (29) 70.  
 world's congress, (40) 499.  
 Poverty weed, eradication, (40) 430.  
 Powder Valley, irrigation project, (27) 414.  
 Powdery mildew—*see also special hosts.*  
 characteristics, (30) 537.  
 relation to host, (33) 244; (35) 844; (37) 749; (38) 645.  
 relation to light, (30) 747.  
 Power—  
 alcohol, crops for production, (40) 524.  
 application to road transportation, (31) 90.  
 for farms, (29) 688; (31) 291.  
 from the sun, (31) 688.  
 laying out and plowing with, (31) 187.  
 mechanical for farms, (30) 789.  
 mechanical, in German agriculture, (30) 387.  
 plant apparatus, testing, (35) 889.  
 plant, electric, at Powersite, Mo., (28) 716.  
 transmission poles, preservation, (26) 644.  
 Pox in domestic animals, treatment, (26) 578.  
 Praepodes vittatus, notes, (34) 753.  
 Prairie—  
 and woodland, ecology of tension zone, (38) 521.  
 berries, cell number in, (27) 733.  
 berries, improvement, (30) 343.  
 berry, crossing with *Solanum nigrum*, (34) 146.  
 berry, improvement, (28) 739; (32) 538.  
 chicken, notes, (27) 355.  
 dogs—  
 control, (29) 651; (34) 57; (39) 59, 460.  
 control in Colorado, (28) 450.  
 destruction, (28) 653; (32) 648; (35) 52.  
 extermination, (30) 697.  
 prevalence in Colorado, (28) 652; (30) 249; (35) 51.  
 susceptibility to rabies, (38) 80.  
 systematic account, (35) 551.  
 grass—  
 alkali tolerance, (40) 719.  
 culture under irrigation, (33) 228.  
 notes, (33) 834.  
 phosphorus compounds in, (31) 864.  
 grove, isolated, paper on, (26) 643.  
 hay—  
 analyses, (29) 270; (30) 671; (36) 65.  
 digestibility, (31) 863.  
 digestibility and productive value, (37) 865, making and baling, (39) 231.  
 mineral constituents, digestibility, (40) 769.  
 western, analyses, (27) 170.  
 plants—  
 assimilation in, (36) 734.  
 ecological histology, (35) 820.  
 evaporation in, (26) 821.  
 transpiration in, (26) 821; (36) 734.  
 soils, sampling, (28) 215.  
 Prairies—  
 and mountain grasslands, comparison, (38) 824.  
 preparation for grain crops, (30) 829.

- Praon**—  
 cocoons, fungus growing from, (40) 459.  
 construction of cocoon, (37) 856.
- Prays**—  
 citri, notes, (30) 252; (32) 56.  
 oleaeus, notes, (30) 455.
- Precipitates**—  
 apparatus for washing, (36) 504.  
 ignition, (27) 713.  
 washing device for, (37) 503.
- Precipitation**—*see also* Rainfall, Snowfall, etc.  
 and altitude in the Sierra, (26) 27.  
 and halos at Wauseon, Ohio, (32) 810.  
 and run-off, Ishikari River, Japan, (29) 813.  
 at New Orleans, La., (32) 614.  
 at State College, Pa., (35) 507.  
 atmospheric, electricity of, (34) 413.  
 averages for large areas, (26) 27.  
 chart, new, (38) 209  
 charts, preparation, (37) 807.  
 chlorin and sulphur content, (30) 422.  
 daytime and nighttime, (36) 717.  
 effect on—  
   drainage water, (26) 619.  
   insects, (37) 355.  
   sugar beets, (26) 738.  
   yield of alfalfa, (37) 717.  
   yield of cereals, (28) 41.  
 factor, seasonal, (39) 611.  
 in British Columbia, (34) 320; (38) 283  
 central Ohio, (40) 117.  
 China, (36) 19.  
 Illinois, (39) 319.  
 1913, (32) 810.  
 north Germany, (36) 208.  
 northern Europe, (31) 316.  
 Russian Turkestan, (31) 812.  
 southeastern Rocky Mountain slopes, (35) 619.  
 Texas Panhandle, (30) 318.  
 United States, (30) 318, 815.  
 western Kansas, (30) 318.  
 observations, working up, (37) 513.  
 reactions, equilibrium in, (34) 779; (37) 877.  
 relation to—  
   run-off and evaporation, (40) 810.  
   stream flow, (29) 121, 812; (35) 116.  
   tree growth, (30) 417, 445.  
   winter wheat yields, (38) 14.  
 seasonal, (40) 616.
- Precipitin**—  
 and sensitizin, relationship, (34) 778.  
 antigen, production from bacteria, (38) 483.  
 for differentiating insoluble proteins, (27) 410.  
 reaction—  
   diagnostic value, (32) 375.  
   for testing seeds, (28) 204.  
   notes, (27) 680; (34) 579.  
 test, diagnostic value, (26) 283.
- Precipitins**—  
 bacterial, notes, (26) 676.  
 notes, (32) 78.  
 production, (29) 581; (33) 84.  
 production by the fowl, (39) 388.  
 relation to complement fixation, (30) 478.  
 relation to other immunity reactions, (36) 478.  
 specifically, (26) 482.
- Precipitoids**, inhibition of precipitation by, (26) 175.
- Precooling plant**, description, (35) 391.
- Pregnancy**—  
 biological investigations, (27) 174, 577.  
 corpus luteum of, in swine, (40) 663.  
 diagnosis, (27) 577, 881; (28) 777; (29) 377, 408,  
 476, 477, 778; (30) 276; (31) 179, 180, 278, 279,  
 378, 877; (32) 80, 372, 474, 578, 579, 875; (33)  
 176, 207, 477; (34) 80, 81, 565, 577, 780; (35) 73,  
 179, 879; (36) 381; (37) 478; (38) 181, 581, 684;  
 (39) 284, 583, 680, 886.  
 early, effect on development of animals, (33) 265.  
 effect on growth, (40) 877.  
 in mares, serodiagnosis, (32) 185.  
 metabolism during, (31) 663.  
 nitrogen metabolism during, (35) 473.
- Premnotrypes solani**—  
 n.g. and n.sp., description, (30) 459.  
 notes, (38) 864.
- Prenelepis minutula atomus fullawayi** n.var.,  
 description, (27) 264.
- Prepotency in animals**, (32) 861.
- Preptoceras mayfieldi** n.sp., description, (34) 264.
- Preservatives**—  
 and other chemicals in foods, (33) 66.  
 chemical, detection and use, (26) 609.  
 chemical, notes, (27) 64.  
 detection in—  
   butter, (31) 811.  
   caviar, (36) 561.  
   fats, (31) 508.  
   milk, (32) 413; (37) 113.  
   milk and its products, (26) 806.  
 effect on—  
   barnyard manure, (28) 220.  
   butter and margarin, (26) 778.  
   cider, (30) 665.  
   guaiac test for milk, (26) 712.  
   oxygen in water, (26) 418.  
   peroxidase reaction of milk, (32) 412.  
 examination, (30) 258.  
 food, advantages and disadvantages, (33) 577.  
 food, physiological significance, (30) 364.  
 wood, tests, (32) 841.
- Preserve jars**, sealing, (39) 717.
- Preserved fruit**, "springing" of tins, (40) 208.
- Preserves**—  
 examination, (28) 166; (39) 611, 612.  
 manufacture, (30) 613.  
 preparation, (35) 419  
 preparation and judging, (30) 259.  
 recipes, (32) 560.
- Preserving**—  
 and canning, recipes, (36) 113.  
 industry in United States, (31) 67.  
 sirups for, (37) 15.  
 treatise, (32) 253; (38) 114; (39) 614, 716.
- Pressure**—  
 change charts, (35) 419.  
 coagulation of albumin by, (32) 417.  
 effect on—  
   bacteria, (38) 584.  
   hydrogen electrode potential, (36) 503.  
   microorganisms, (32) 416.  
   pipes for water conveyance, (30) 187.  
   vertical, distribution in earth, (35) 581.
- Preventive medicine and hygiene**, treatise, (38) 882.
- Price fixing**—  
 and cost of farm products, (39) 687.  
 in England, (40) 487.
- Prickly**—  
 ash, notes, (30) 145.  
 pear, *see* Cacti.
- Primitive Husk corn**, culture experiments, (28) 532.
- Primordia of chloroplasts and leucoplasts**, (39) 332.
- Primrose**—  
 Chinese, formation of pigments in, (27) 633.  
 evening, rusts of, (37) 552.
- Primula**—  
 acaulis, inheritance of heterostylism in, (34) 226.  
 culture in Alaska, (29) 743.  
 hybridization experiments, (30) 329.  
 kewensis and its allies, genetic behavior, (35) 818.  
 sinensis—  
   flower pattern in, (34) 731.  
   giant form, (28) 228.  
   inheritance in, (34) 822; (36) 729; (38) 822.  
   linkage in, (36) 629.  
   variegation in, (34) 226.
- Princeton University Farm**, notes, (28) 99.
- Prioninae**, catalogue, (30) 458.
- Prioninae**, larvae of, (33) 360.
- Prionomerus calceatus**, notes, (37) 560.
- Prionoxystus robiniae**, notes, (27) 658; (28) 159;  
 (31) 550; (35) 356; (40) 161, 853.
- Prionus**—  
 californicus, notes, (32) 651; (35) 656.  
 laticollis, notes, (27) 755.
- Triophorus**—  
 acericaulis, notes, (26) 856; (28) 351.  
 padi, feeding habits, (28) 553.
- Prisoners**, feeding in Germany, (35) 368; (36) 363.
- Pristaulacus strangaliae** n.sp., description, (38) 164.
- Pristocera armifera**, notes, (36) 360.
- Pristomeridia agilis**, parasitism, (33) 353.
- Pristomerus**—  
 hawaiiensis, notes, (29) 253.  
 vulnerator, parasitic on gipsy moth, (31) 652.
- Pristocelis texanus**, notes, (28) 451.

- Privet—  
anthracnose, notes, (31) 641.  
autumn coloration of, (31) 34.  
crown gall, notes, (36) 47.  
formation of fatty acids in, (26) 801.  
leaves, formation of fats in, (29) 201.  
mite, notes, (36) 859.  
swamp, culture for wild ducks, (33) 251.
- Privies—  
construction, (36) 892.  
sanitary, construction and care, (29) 88.  
sanitary, description, (31) 787; (34) 88; (35) 189, 887; (37) 287; (38) 84, 85, 567.
- Privy vaults, flies frequenting, (39) 766.
- Proceras sacchariphaga*, notes, (38) 465.
- Prociphilus*—  
*approximatus* n.sp., description, (37) 850.  
*bumeliae*, notes, (34) 357.  
*corrugatus* on Rosaceae, (32) 848.  
*fitchii* and *P. pyri*, synonymy, (37) 661.  
*fraxini-dipetatae*, notes, (34) 356, 453.  
*pyri*, notes, (34) 854.  
spp., studies, (39) 657.  
*tessellata*, notes, (27) 257.
- Proctacanthus milbertii*, predaceous on alfalfa caterpillar, (32) 58.
- Proctophylloides trisetosus* n.sp., description, (34) 66.
- Prodecatoma—  
*cruzi* n.sp., description, (32) 352.  
sp., description, (37) 59.
- Prodenia*—  
*eridania*, notes, (28) 654.  
*litura*—  
in Philippines, (30) 252.  
notes (27) 862; (29) 456; (30) 252.  
remedies, (28) 355.  
studies, (40) 62.  
*ornithogalli*, notes, (33) 352.  
spp., notes, (30) 356.
- Prodiplosis fitchii* n.sp., description, (28) 657.
- Prodoxus barberella* n.sp., description, (33) 748.
- Produce exchanges—  
function, (40) 791.  
speculation on, (30) 591.
- Profenusa collaris*, see Cherry sawfly leaf-miner.
- Proflavin*—  
antiseptic value, (39) 586, 680.  
oleate in wound treatment, (40) 882.
- Project method in science teaching, (40) 897.
- Projects, definition, (36) 194.
- Prolapse of oviduct in poultry, (39) 791.
- Prolin, fate in the animal body, (28) 568.
- Promecotheca cumingii*, notes, (30) 56; (40) 260.
- Promethea* moth, notes, (30) 655.
- Promusca, erection, (34) 253.
- Prony brake, description and use, (29) 488.
- Protopachyneuron Girault*, notes, (40) 760.
- Protopachyneuron* n.g. and n.sp., notes, (38) 565.
- Prophanurus*—  
*minutissimus*, notes, (31) 459.  
n.spp., descriptions, (31) 459.
- Propionamid as a source of ammonia, (29) 723.
- Propionic acid—  
bacteria in dairy products, (28) 276.  
decomposition by sunlight, (30) 431.  
determination, (38) 506.  
effect on bread fermentation, (27) 268.  
in silage, (28) 608.  
rôle in digestion, (36) 763.
- Propionitrile, assimilation by plants, (26) 32.
- Propyl alcohol—  
as a disinfectant, (40) 581.  
in silage, (28) 608.
- Prosagrotis delorata*, notes, (32) 448.
- Prosimulium* spp., notes, (31) 254.
- Prosmoridea elongatus* n.g. and n.sp., description, (34) 363.
- Proso—  
analyses, (33) 361.  
as a table food, (33) 361.  
bread, digestibility, (37) 364.  
culture—  
experiments, (27) 137; (29) 424; (30) 136; (33) 633; (36) 34; (39) 435.  
in Texas Panhandle, (29) 429 (35) 440.  
in Utah, (38) 230.  
varieties, (32) 334; (36) 33.  
water requirements, (32) 127.
- Proso pis—  
*juliflora*, culture experiments, (36) 340.  
*juliflora*, notes, (28) 643.  
root growth in relation to oxygen, (40) 30.  
*spicigera*, in Punjab, (34) 46.
- Proso podes fugax*, notes, (35) 659.
- Prosoptrips cognatus*—  
in investigations, (33) 354.  
n.sp., description, (30) 658.
- Prospaltella—  
*aurantii*, notes, (26) 247; (28) 754.  
*aurantii*, parasitic on orange scale, (26) 554.  
*berlesii*—  
behavior in Italy, (27) 564.  
notes, (28) 457; (29) 854; (35) 760.  
on *Diaspis*, (39) 465, 663.  
parasitic on mulberry scale, (34) 456.  
remedies, (32) 755.  
*fasciata* n.sp., description, (38) 460.  
*laborensis*, studies, (28) 754.  
*lounsburyi* n.sp., description, (36) 462.  
*lounsburyi*, notes, (38) 467.  
*murfteldtii*, notes, (27) 556.  
*olivina*, notes, (26) 149.
- perniciosi*—  
life history, (33) 257.  
n.sp., description, (29) 459.  
notes, (30) 661; (31) 356; (35) 54.  
parasitic on San José scale, (29) 758.  
parasitism, (32) 245.  
*peruviana* n.sp., description, (29) 359.  
spp., notes, (28) 159.  
spp., studies, (36) 759.
- Protalbinic acid, nitrogen distribution in, (38) 310.
- Protapanteles—  
*chrysiippi* n.sp., description, (26) 352.  
n.sp., notes, (35) 465.
- Protargionia*, new genus, description, (26) 247.
- Protascus colorans* n.g. and n.sp., studies, (33) 548.
- Protease—  
in alfalfa, (32) 411.  
in guinea pig and rabbit serums, (35) 382.  
in mammary gland, (32) 411.
- Proteases—  
nephelometry in study of, (30) 410.  
serum, studies, (34) 674.
- Protein—  
absorption in typhoid fever, (35) 369.  
alcohol-soluble, determination in wheat flour, (27) 111.  
ammonia, determination in water, (33) 501.  
anaerobic decomposition, (27) 226.  
anaphylaxis, treatise, (32) 79.  
as affected by bromin, (34) 803.  
as factor in poultry feeding, (31) 568.  
assimilation—  
by pigs, (32) 170.  
in plants, (27) 525.  
review of investigations, (29) 567.  
availability, determination by feeding experiments, (30) 97.  
barley, transformation during brewing processes, (32) 23.  
biological value and metabolism, (28) 66.  
blood, studies, (36) 773; (37) 375.  
carbon, utilization by the body, (26) 564.  
catabolism—  
as affected by glucose, (29) 663.  
in inanition, diminishing, (26) 465.  
studies, (29) 164.  
compounds, physiological value, (26) 764.  
condition of body, relation to diet, (26) 663.  
copper compounds, (37) 8.  
derivatives, detection, (26) 804.  
derivatives, physiological action, (34) 71.  
diet as protection against tuberculosis, (31) 84.  
diet, effect on creatin-creatinin metabolism, (39) 571.  
differentiation, technique and methods, (26) 676.  
digestibility, determination, (37) 673.  
digestion—  
and absorption in animals, (33) 566.  
by pepsin, (27) 9.  
by serums, (35) 179.  
inhibition by adsorbed tin, (37) 470.  
emaciation following injection of, (35) 179.  
extraction from wheat flour, (34) 610.  
extracts for diagnostic cutaneous tests, preparation, (38) 482

## Protein—Continued.

- fed pregnant swine, effect on offspring, (32) 366.
  - feeding, effect on amino acids in tissues, (31) 661; (40) 562.
  - food products, determination of decomposition in, (33) 112.
  - food, rôle of fats in utilization, (28) 262.
  - foods, selection, (37) 864.
  - foods, use in kidney diseases, (32) 460.
  - free amino groups in, (33) 201; (34) 501.
  - free milk, nitrogen in, (40) 608.
  - free milk, substitutes for, (40) 463.
  - gains in the body, studies, (26) 664.
  - Hopkins-Cole reaction for, (34) 713.
  - horse serum—
    - as anaphylactic antigens, (36) 877.
    - changes in, (26) 374.
    - in milk of immunized sheep, (27) 680.
  - intake, effect on—
    - creatin excretion, (37) 469; (38) 569.
    - growth, (33) 262.
    - muscular work, (33) 166.
    - uric acid formation, (33) 462.
  - iodized, preparation, (35) 201.
  - loss from grass during curing, (32) 111.
  - metabolic relation to glucose, (33) 261, 868; (34) 366.
  - metabolism, (27) 464; (32) 359.
  - metabolism—
    - after excessive water ingestion, (32) 663.
    - after hunger, (32) 66.
    - and energy metabolism, relation, (32) 563.
  - metabolism as affected by—
    - air breathed, (32) 663.
    - carbohydrate and fat, (26) 765; (34) 762.
    - complement, (30) 478.
    - mastication, (33) 366.
  - metabolism—
    - bibliography, (26) 764.
    - digest of data, (35) 165.
    - in fever and during work, (32) 564.
    - in omnivora and herbivora, (32) 566.
    - monograph, (28) 167.
    - of infants, (35) 766.
    - the fetus, (26) 363.
    - white races in Tropics, (33) 366.
    - yeast and mold fungi, (33) 202.
  - relation to thyroid secretion, (29) 868.
  - sparing action of carbohydrates on, (36) 364.
  - studies, (26) 158, 359, 764, 869, 870; (28) 664, 665; (31) 661; (39) 772.
  - utilization of ammonia in, (29) 62, 365.
- minimum—
- for farm animals, (26) 664.
  - in dairy rations, (31) 371.
  - review of literature, (33) 68.
  - studies, (30) 366; (33) 262, 868.
- mixtures, inhibitory action on anaphylaxis, (34) 578.
- nitrogen—
- fertilizing value, (39) 726.
  - of honey, determination, (26) 207.
  - table for feeding stuffs, (33) 711.
- nutrition of lambs, (33) 761.
- nutrition, studies, (27) 68.
- phosphorus-containing, necessity in diet, (32) 561.
- poison, effect on dogs, (30) 180.
- quotient, constancy during digestion and starvation, (40) 660.
- rations, utilization by cows, (39) 75, 381.
- requirements—
- daily, of men, (32) 66.
  - for milk production, (31) 173.
  - in bread diet, (31) 860.
  - in nutrition, (31) 263.
  - of dairy heifers, (33) 274; (35) 871.
  - growing cattle, (26) 768.
  - higher animals and man, (35) 858.
  - infants, (34) 68.
  - workingmen, (33) 662.
- resorption in the cell organism, (31) 361.
- retention in relation to diet, (35) 765.
- solutions—
- electrometric titrations in, (39) 611.
  - refractive indexes, (28) 501.
- split products in relation to immunity and disease, treatise, (30) 379.
- starvation, effect on amino acid content of tissues, (31) 661.

## Protein—Continued.

- storage—
    - in liver, (31) 644.
    - relation to acidosis, (33) 368; (34) 261.
  - substances—
    - as protective agents for enzymes, (26) 504.
    - complement fixation with, (40) 286.
    - decomposition in milk, (33) 714.
    - methods for study of composition, (39) 676.
    - synthesis, (37) 108.
  - supplements for corn gluten, (36) 666.
  - suspensoid, precipitation by ions, (31) 607.
  - synthesis, (31) 10.
  - synthesis—
    - by lactic acid bacteria, (35) 373.
    - by means of enzymes, (34) 708.
    - by yeasts and fungi, (27) 525.
    - in plant cells, (28) 428.
    - relation of carbohydrates to, (40) 562.
  - tissue, cleavage by blood serum of other animal species, (37) 478.
- Proteins—
- Adamkiewicz reaction, (40) 507.
  - agglutination, (29) 502.
  - autolysis in killed plants, (27) 426.
  - biological differentiation, (26) 176.
  - biological individuality of, (26) 876.
  - body and foreign, absorption, (32) 66.
  - chemical changes during digestion, (27) 768.
  - chemical constitution, (27) 803; (31) 607.
  - chemistry—
    - as basis of the life process, (40) 201.
    - of, (28) 201, 801.
    - of, treatise, (29) 408.
    - progress in, (30) 201.
  - cleavage—
    - by microorganisms, (28) 503.
    - in flour, (35) 265.
    - products, biological action, (28) 279.
    - products, fatigue producing, (29) 568.
    - products, utilization, (26) 869.
    - studies, (26) 764.
  - coagulation by—
    - heat, (26) 306; (29) 501, 502.
    - ultraviolet rays, (29) 130, 131; (30) 110.
  - color reaction for, (26) 201; (32) 20.
  - constitution, (29) 715.
  - decomposition—
    - and hypersusceptibility, (28) 777.
    - by electricity, (26) 307.
    - in soils, (36) 25.
  - density and solution volume, (29) 108; (31) 804.
  - detection, (26) 804; (28) 503; (29) 715.
  - detection in saliva, (32) 20.
  - determination, (27) 9; (39) 311.
  - determination—
    - Adamkiewicz test, (31) 807.
    - in butter, (27) 209.
    - honey, (26) 208.
    - meat, (35) 315.
    - milk, (31) 114, 413.
    - muscle, (35) 614.
    - serum of domestic animals, (32) 778.
    - urine, (36) 508.
    - of tyrosin in, (40) 113.
  - dynamic action, (40) 866.
  - effect on—
    - baking qualities of flour, (30) 556.
    - blood sugar in phlorizin diabetes, (35) 863.
    - gaseous metabolism in man, (28) 569.
    - growth of pigs, (28) 98.
    - intestinal flora, (40) 867.
    - nutrition and growth, (33) 462.
    - production and composition of milk, (26) 79.
    - reaction of iron salts, (28) 411.
    - uric acid metabolism, (40) 175.
    - wheat gluten, (26) 67.
  - flesh, products of hydrolysis, (39) 201.
  - foreign, fate in anaphylactic reaction, (38) 79.
  - foreign, liberation of antibodies on injection of, (40) 180.
  - formation—
    - and cleavage, in human body, (26) 69
    - by tubercle bacilli, (31) 284.
    - in animal body, (35) 371.
    - in plants, (27) 226, 634; (31) 224.
    - in ripening seeds, (26) 729.
    - localization in plants, (29) 323.
    - of hydrocyanic acid in, (30) 802
    - treatise, (34) 708.

**Proteins—Continued.**  
 formol-titrametric investigations, (31) 713.  
 from cereals and milk, effect on growth, (33) 465.  
 from different foods, value, (26) 763.  
 from different sources—  
   comparison, (37) 864.  
   effect on growth, (33) 262.  
   for milk production, (33) 275; (36) 174, 671.  
   value, (33) 367; (35) 368, 562; (36) 372.  
 from various grains, digestibility, (33) 361, 564, 758.  
 gastric digestion of, (31) 161.  
 growth-promoting value, expressing numerically, (40) 765.  
 heat-coagulable and water-soluble, in milk, (38) 612.  
 heat coagulation of, (28) 568.  
 hydrolysis, (28) 607.  
 hydrolysis by—  
   enzymes, study of products, (40) 611.  
   pancreatic enzymes, (35) 201.  
 hydrolysis in presence of—  
   aldehydes, (38) 201.  
   carbohydrates and aldehydes, (36) 108.  
   extraneous materials, (39) 611.  
 hydrolysis—  
   products, nutritive value, (28) 167.  
   studies, (27) 501.  
   tryptic, measurement, (31) 711.  
 identification in solutions, (26) 201.  
 importance in egg production, (32) 99.  
 in animal serums, (30) 68.  
   mixed rations, digestibility, (32) 69, 70.  
   nutrition of growing pigs, (32) 71, 72, 73.  
   the diet, (32) 857.  
   the diet, treatise, (28) 567.  
 insoluble, differentiating, (27) 410.  
 isolated—  
   effect on growth of rats, (31) 69.  
   maintenance experiments with, (28) 863.  
   value in the diet, (34) 368.  
 lysin content, (31) 559.  
 maintenance experiments with, (29) 767.  
 methods of analysis, (26) 22; (28) 501; (33) 408; (34) 505; (35) 415.  
 need of under different conditions, (33) 868.  
 new, in milk, (38) 611.  
 nutritive value as affected by starch and fats, (40) 562.  
 of animal tissues, adequacy, (39) 665, 873.  
 blood, studies, (39) 388.  
 chick pea seeds, analyses, (28) 460.  
 cooked meat, digestibility, (32) 256.  
 corn, efficiency, (39) 873.  
 corn, nutritive value, (28) 759; (29) 62; (32) 164.  
 corn, utilization, (26) 358.  
 cottonseed, utilization, (26) 662.  
 flour, chemical constitution, (34) 803.  
 flour, studies, (27) 807.  
 gliadin, modifications in, (29) 608.  
 insects, value for poultry, (35) 71.  
 legumes, utilization, (26) 564.  
 Liebig's meat extract, (27) 363.  
 linseed meal, hydrolysis, (26) 201.  
 malted barley, (39) 232.  
 meat powder, utilization, (26) 663.  
 meat, separation, (27) 498.  
 milk, *see* Milk proteins.  
 muscle juice, studies, (30) 766.  
 muscle, specific heat of, (33) 566.  
 peanuts, (37) 8, 468, 501.  
 potato, autolysis, (26) 801.  
 rations, calculating, (39) 167.  
 rice, reagent for, (29) 881.  
 rice, studies, (27) 166.  
 seeds, nutritive values, (39) 665, 666.  
 seeds, studies, (40) 69, 563.  
 swede turnips, composition and methods of analysis, (37) 410.  
 wheat and almond, studies, (40) 660.  
 yeast and sucrose, relation, (32) 803.  
 physical chemistry, treatise, (38) 708.  
 plant, autolysis, (26) 801.  
 plant, precipitation, (26) 482.  
 precipitation, (27) 107, 303, 804; (31) 504.  
 pure, toxicity and nutritive value, (40) 463, 464.  
 pure vegetable, effect on rats, (32) 875.

**Proteins—Continued.**  
 purified, behavior toward proteolytic enzymes, (36) 108.  
 quality, relation to milk production, (40) 572.  
 rôle in glycogen formation, (31) 763.  
 rôle in growth, (30) 366; (35) 269.  
 salt-soluble, determination in flour, (32) 808.  
 serum, of different animals, (28) 875; (32) 861; (35) 372.  
 serum-precipitin reaction of, (26) 482.  
 specific dynamic action, (37) 266.  
 specificity, (36) 411.  
 studies, (27) 501; (39) 801.  
 sulphur linkages in, (26) 306.  
 toxic action, (27) 466.  
 toxic and nontoxic fractions of, (28) 880.  
 transformations in—  
   intestinal canal, (31) 468.  
   plant and animal organisms, (28) 631.  
   yeast, (31) 223; (35) 634.  
 treatise, (26) 801.  
 tyrosin content, (29) 465.  
 uniformity in structure, (28) 631.  
 utilization as affected by fasting, (29) 268.  
 utilization by different animal species, (40) 464.  
 value in animal nutrition, (27) 276.  
 value in feeding stuffs, (26) 363.  
 value in nutrition, (26) 764.  
 vegetable—  
   biological reactions, (30) 680, 778; (31) 377; (34) 577; (35) 679; (36) 380.  
   nutritive value, (26) 155; (36) 865.  
   review of investigations, (28) 460.  
   studies, (34) 762; (40) 463.  
   utilization by the animal organism, (33) 565.  
 Proteinuria, Bence-Jones, investigations, (38) 569.  
 Protocephalidae, revision, (32) 853.  
 Proteolysis and hemolysis, relation, (40) 286.  
 Proteolysis, studies, (35) 204.  
 Proteolytic—  
   action as affected by halogens, (28) 504.  
   action, methods of examination, (36) 316.  
   action of pancreas preparations, determination, (32) 710.  
   enzymes of plants, inhibitors for, (37) 204.  
   ferments, method of study, (26) 107.  
   ferments of blood, origin, (37) 478.  
   index of human blood leucocytes, (26) 83.  
 Proteopteryx—  
   bolliana, notes, (38) 762; (39) 557.  
   bolliana, studies, (38) 157.  
   willingana, notes, (38) 257.  
 Proteose intoxications and injury of body protein, (37) 167; (39) 572.  
 Proteoses—  
   absorption by digestive apparatus, (38) 366.  
   effect on cobra venom hemolysis, (36) 276.  
   in soils, (34) 325.  
   studies, (26) 23.  
 Protterhinidae, catalogue, (26) 560.  
 Proteus—  
   alveicola n. sp., description, (37) 360.  
   vulgaris, cleavage of gluten by, (31) 711.  
   vulgaris, nitrogen assimilation by, (31) 711.  
 Protist organisms, infective granule in, (30) 577.  
 Protocephalophora—  
   azura infesting birds, (40) 351.  
   azura, studies, (34) 359.  
   larvae parasitizing nestling birds, (40) 647.  
 Protomyces—  
   andinus, notes, (35) 651.  
   helminthiae n. sp., description, (32) 842.  
   n. spp., descriptions, (40) 155.  
 Protoparce—  
   carolina, relation to tomato leaf spot, (40) 645.  
   saxa, *see* Tobacco worm, southern, and Tomato worm.  
 Protoplasm—  
   and gelatin, similarity in behavior, (37) 431.  
   as affected by bivalent cations, (33) 328.  
   as affected by Schumann rays, (33) 224.  
   cause of death in, (28) 631.  
   electric charge of, (34) 525.  
   living, chemical dynamics of, (30) 823; (32) 625.  
   nature of, (36) 526.  
   of plant cells, (34) 33.  
   organization and polarity of, (28) 765.  
   permeability, (33) 127.  
   permeability to ions, (26) 823.  
   permeability to salts, (39) 25.

- Protoplasm**—Continued.  
 permeability to water, (36) 823.  
 physical properties, interpretation, (37) 325.  
 relation to environment, (28) 326.  
 swelling, studies, (40) 520.  
 water absorption by, (38) 502.
- Protoplasmic**—  
 contractions resembling plasmolysis, (29) 134;  
 (30) 130.  
 streaming, stimulation by light rays, (35) 130.
- Protopulvinaria** spp., parasites of, (26) 553.
- Protozoa**—  
 as affected by heat, (31) 26.  
 counting, new method, (33) 809.  
 determination in soils, (29) 123.  
 disease transmitting, treatise, (31) 478.  
 effect on ammonification, (28) 719.  
 effect on bacteria in soils, (28) 330.  
 flagellated and ciliated, tissue-invasive powers,  
 (40) 186.  
 flagellated, rôle in bird diseases, (36) 483.  
 flagellates in cecal and liver infections in birds,  
 (36) 781.  
 from sewage-sick soils, notes, (29) 316.  
 in rice soils, (33) 23.  
 in ruminants' stomachs, (30) 577.  
 in soil—  
 activity, (34) 422; (36) 216.  
 as affected by lime, (30) 127.  
 as affected by toluene, (36) 814.  
 as reduction index, (40) 214.  
 counting, (30) 826; (33) 809; (34) 513; (39) 814.  
 determination, (29) 123.  
 inactivity, (30) 322.  
 notes, (30) 399; (31) 420.  
 paper on, (30) 399.  
 review of investigations, (37) 213.  
 separation, (34) 217.  
 studies, (31) 26, 420, 516; (32) 320, 619; (33)  
 621; (34) 20; (35) 214.  
 infecting bees, (27) 459.  
 infectious, notes, (29) 676.  
 intestinal, transmission by flies, (38) 563.  
 life history, (38) 580.  
 media for multiplication of, (33) 809.  
 of vertebrates and invertebrates, (32) 177.  
 parasitic in *Bufo regularis*, (30) 680.  
 pathogenic—  
 handbook, (26) 246, 865; (27) 460, 551.  
 notes, (26) 276.  
 review of investigations, (28) 178.  
 textbook, (28) 78; (36) 177.  
 treatise, (27) 575.  
 relation to—  
 plant growth, (32) 423.  
 soil bacteria, (29) 123; (30) 517; (33) 515; (34)  
 326; (36) 322, 422, 518, 622.  
 rôle in plants, (33) 425.  
 separation of species, (27) 780.  
 so-called "infective granules" of, (35) 280.  
 toxic action of copper compounds of amino  
 acids on, (37) 375.  
 treatise, (29) 360.
- Protozoan**—  
 diseases, immunization, (26) 676.  
 diseases, in Tonkin, (26) 677.  
 germ plasms, notes, (26) 876.  
 infections, infective granule in, (26) 883.  
 infections of intestinal tract, goblet cells in, (37) 280.
- Protozoology**—  
 review of literature, (27) 77.  
 textbook, (27) 356.  
 treatise, (26) 882.
- Provancher, Abbé**, biographical sketch, (40) 259.
- Provender**, analyses, (26) 72, 665; (28) 265, 364, 465;  
 (30) 67; (32) 259; (34) 169, 371, 467; (35) 374, 562;  
 (38) 369, 665.
- Prunase**, occurrence in Java beans, (28) 502.
- Prunasin** as affected by enzymes, (28) 503.
- Prune**—  
 aphid, remedies, (32) 649.  
 blight, notes, (34) 648.  
 brown rot—  
 investigations, (35) 249.  
 notes, (28) 544.  
 treatment, (32) 645; (38) 544.  
 industry in Oregon, (29) 148.  
 juice, detection in vanilla extracts, (26) 111.  
 kernels, microscopic identification, (28) 565.  
 Monilia blight, studies, (34) 351.
- Prune**—Continued.  
 mushroom root rot, notes and treatment, (28)  
 748.  
 orchards—  
 protection against frost, (29) 147.  
 renovation, (37) 41.  
 root disease, notes, (36) 649.  
 rust in southern California, (34) 352.  
 rust, notes, (36) 845.  
 stones, hydrocyanic acid content, (27) 11.  
 twig borer, notes, (32) 651.  
 twig miner, notes, (35) 253.
- Prunes**—  
 ash analyses, (29) 861.  
 bacterial gummosis, (39) 151.  
 benzoic acid in, (33) 15.  
 brown bark spot on, (39) 251.  
 bud injury, (40) 52.  
 composition as affected by irrigation, (29) 236.  
 culture, (32) 45.  
 culture in New York, (35) 836.  
 culture in southern Utah, (30) 41.  
 culture in southwestern Washington, (31) 441.  
 destruction by black scale, (26) 555.  
 dried—  
 analyses, (30) 861.  
 inoculation experiments with brown rot  
 fungus, (33) 247.  
 microbiology, (34) 460.  
 preparation and use, (29) 462.

*fragaroidea*, organism resembling in milk, (26) 371.  
*gladioli* n.sp., studies, (29) 845.  
*hyacinthi*, notes, (40) 844.  
*juglandis*, studies, (28) 349; (34) 545.  
*medicaginis* in Utah, (31) 642.  
*Pseudomonas*—Continued.  
*olivae*, description, (28) 246.  
*papulae* n.sp. on apple, (38) 251.  
*phaseoli*—  
 notes, (37) 550.  
 studies, (28) 846; (34) 746.  
 treatment, (37) 248.  
*pisi* n.sp., description, (35) 847.  
*polycromigena* n.sp., description, (32) 644.  
*pruni*, notes, (30) 245.  
*radicicola*—see also *Bacillus radicicola*.  
 factors affecting vitality, (26) 824.  
 notes, (27) 26, 828.  
*seminum* n.sp. on *Pisum*, (39) 147.  
*seminum*, notes, (40) 844.  
 sp., notes, (30) 149.  
 sp. on soy beans, (37) 842.  
 sp., relation to barley blight, (35) 845.  
 spp., ammonifying power, (31) 317.  
 spp., nutrient medium for, (27) 729.  
 spp., on iris and hyacinth, (40) 844.  
 spp. on vegetables in Ontario, (37) 150.  
*stewarti*, studies, (40) 846.  
*subretus* n.sp., description, (28) 628.  
*tritici*, n.sp., description, (39) 454.  
*tumefaciens*, notes, (31) 746, 845; (40) 53, 252.  
*vascularium*, notes, (28) 746.  
*Pseudomphale*—  
*anceylae* n.sp., notes, (36) 254.  
 n.spp., descriptions, (34) 66; (36) 555.  
*Pseudopanteles eticellae*, parasitism, (27) 553.  
*Pseudoperonospora humuli* n.n., notes, (32) 442.  
*Pseudopeziza*—  
*medicaginis*, notes, (30) 648; (31) 746; (33) 846.  
*medicaginis*, treatment, (30) 538.  
*ribis*, notes, (30) 246.  
*ribis*, studies, (33) 347.  
*ribis*, treatment, (32) 842.  
*tracheiphila*—  
 notes, (28) 55; (37) 246, 555.  
 studies, (30) 148, 452.  
 treatment, (26) 145; (27) 250.  
*trifolii*—  
 description and treatment, (39) 754.  
*medicaginis*, notes, (28) 52.  
 notes, (30) 538; (32) 443.  
*Pseudophoenix sargentii*, notes, (29) 341.  
*Pseudopteratrix imitatrix* n.g. and n.sp., description, (40) 265.  
*Pseudorabies*—  
 notes, (31) 579.  
 occurrence in Brazil, (28) 184.  
*Pseudorhyncha sternata* n.g. and n.sp., description, (34) 758.  
*Pseudotachinomyia webberi* n.g. and n.sp., description, (37) 763.  
*Pseudotsuga taxifolia*, thinning experiments, (32) 47.  
*Pseudotuberculosis*—  
 in guinea pigs, (37) 377.  
 horses, (37) 378.  
 rodents, pathology, (32) 882.  
 swine, (37) 82.  
 notes, (34) 184.  
*Pseudotuberculous enteritis* of bovines, diagnosis, (26) 783.  
*Pseudomphale eudami* n.sp., description, (39) 869.  
*Psila rosae*, notes, (32) 650.  
*Psila rosae*, remedies, (31) 158.  
*Psilcephala melampodia*, notes, (28) 158.  
*Psilopa petrolei*, notes, (27) 862.  
*Psiloptera fastuosa*, notes, (27) 863.  
*Psithyrus*—  
 n.spp., descriptions, (28) 758.  
 spp. in bumblebee nests, (33) 658.  
 spp., notes, (28) 562.  
*Psocidae*, fumigation, (39) 161.  
*Psophocarpus*, liming experiments, (36) 229.  
*Psoriasis vulgaris*, relation to diet, (31) 463.  
*Psorophora (Janthinosoma) sayi* as anthrax carrier, (39) 161.  
*Psoroptes*—  
*cervinae* n.sp., description, (33) 680.  
*communis*, life history, (35) 678.  
*communis* ovis, life history, (33) 384.  
*communis* ovis, notes, (27) 182; (29) 159.  
*cuniculi*, notes, (35) 80.  
*Psychoda*—  
*albimaculata* n.sp., description, (29) 159.  
*cinerea*, life history, (34) 651.

- Psychoda—Continued.  
 spp., biology, (32) 552.  
 spp. on sewage filters, (40) 356.
- Psychonotua sp., notes, (29) 652.
- Psychotria—  
 bacteriophila, nitrogen-fixing bacteria in leaves, (27) 225.  
 spp., bacterial enlargements on leaves, (26) 451.  
 spp., symbiosis with plants, (26) 545.
- Psylla—  
 buxi, notes, (35) 54.  
 isitis, life history, (31) 755.  
 isitis, life history and remedies, (29) 854.  
 mali, *see* Apple sucker.  
 pyri, *see* Pear sucker.  
 remedies, (34) 253.  
 schizoneuroides, destructive to oranges, (28) 655.
- Psyllia mali, *see* Apple sucker.
- Psyllid, gall-producing, from Syria, (30) 251.
- Psyllidae—  
 American, notes, (26) 148, 755.  
 catalogue, (31) 59.  
 notes, (28) 60.  
 of Hawaiian Islands, (40) 262.  
 Japan, (26) 455.  
 New World, (31) 453.  
 vicinity of Washington, D. C., (40) 354.  
 palaearctic, catalogue, (30) 455.
- Psylliodes—  
 affinis, studies, (35) 253.  
 attacking Cruciferae in central Europe, (30) 161.  
 attenuata, biology and remedies, (30) 255.  
 punctulata—*see* Hop flea beetle.
- Psyllopa punctipennis, life history, (31) 755.
- Psyllopsis fraxinicola, notes, (26) 146.
- Pteridium aquilinum, chemistry, and anatomy of, (34) 522.
- Pteris aquilina—  
 injurious to horses, (37) 182.  
 life history and eradication, (36) 339.  
 toxic effect on horses, (38) 589.
- Pterocarpus—  
 marsupium, notes, (29) 443.  
 santalinus, descriptive account, (38) 146.
- Pterocommi—  
 review, (36) 253.  
 synopsis, (35) 256.
- Pterodontia flavipes, life history, (36) 757.
- Pteromalidae of Australia, (39) 154.

 amyphigena, new aecial hosts, (36) 245.  
 angustata, internal aecidia of, (30) 350.  
 antirrhini, notes, (33) 249; (38) 546.  
 arenariae, biology, (34) 242.  
 asparagi, *see* Asparagus rust.  
 bambusarum and P. mogiphanis n.combs., (40) 133.  
 carduaceus species, (40) 155.  
 chondrilla, notes, (37) 550.
- coronata—  
 infection experiments, (26) 446.  
 uredospore germination, (39) 850.  
 winter resistance of uredospores, (29) 645.
- coronifera, studies, (37) 749.
- dispersa, vitality of uredospores, (28) 346.  
 dispersa, wintering over in uredo stage, (29) 346.
- ellisiana, aecial host of, (31) 540.  
 endiviae, notes, (33) 548.  
 endiviae, studies, (31) 746.  
 fusca, aecidia, (27) 746.  
 geranii, studies, (29) 345.
- glumarum—  
 in barley seeds, (32) 642.  
 Bavaria, (33) 847.  
 United States, (33) 744; (36) 246.  
 Utah, (36) 48.  
 introduction into America, (38) 147.  
 investigations, (26) 647.  
 notes, (30) 649; (34) 843.  
 overwintering, (39) 354.  
 studies, (34) 349.
- graminis—  
 avenae on timothy, (35) 847.  
 biologic forms, (36) 246.  
 in Denmark, (36) 247.  
 in Norway, (35) 545.  
 in wheat seeds, (32) 642.  
 infection through wheat seed, (37) 751.  
 new biologic forms, (39) 454; (40) 642.  
 new strain, (37) 749.  
 notes, (28) 53; (34) 242, 845; (35) 45; (39) 752.  
 overwintering in Australia, (38) 48.  
 relation to barberries, (30) 149.  
 relation to immune host plants, (33) 245, 345.  
 spore morphology, ecological factors, (40) 641.  
 staining, (26) 52.  
 studies, (26) 142; (38) 47; (40) 249, 641, 642, 745.  
 treatment, (28) 242.
- graminis tritici—  
 compacti, notes, (40) 345.  
 inficiens new form, description, (39) 454.  
 resistance to, (40) 344.  
 wintering, (26) 143.
- interstitialis, notes, (40) 158.  
 kuehnl, description, (31) 145.  
 kuehnl, notes, (38) 550.  
 location of spore masses, (36) 825.
- malvacearum—  
 as affected by external stimuli, (31) 326.  
 biology, (32) 54.  
 development, (30) 453; (31) 646.  
 germination of teleutospores, (34) 744.  
 notes, (27) 751.  
 relation to cells of host, (30) 652.  
 spore formation in, (28) 745; (33) 145.  
 studies, (26) 650; (31) 540.  
 transmission, (33) 445.  
 treatment, (26) 750; (31) 245.
- maydis, notes, (35) 44; (37) 452.  
 maydis, studies, (29) 45.  
 menthae, notes, (37) 457.  
 menthae on Japanese peppermint, (33) 848.  
 monograph, (26) 243.

## Puccinia—Continued.

- n.spp., descriptions, (28) 51  
 n.spp. from the Andes, (40) 133.  
 North American species, descriptions, (31) 145.  
 obtegens, gametophytic and sporophytic generations in, (26) 844.  
 on Carex, North American species, (39) 147.  
 oryzae, notes, (37) 50.  
 oryzae, studies, (34) 745.  
 oxalidis, aecial stage, (40) 155.  
 peckiana and Caecoma interstitialis, relation, (40) 155.  
 phleipratensis—  
   infection experiments, (34) 244.  
   notes, (27) 445; (31) 344.  
   origin, (35) 848.  
   studies, (26) 52.  
 poculiformis, studies, (28) 53.  
 prostii, notes, (33) 741.  
 pruni, life history, (27) 48.  
 pruni, notes, (33) 54; (36) 845; (39) 850.  
 pruni-persicae n.s.p., description, (28) 549.  
 pruni-spinosae—  
   description, (35) 654.  
   notes, (27) 850; (34) 352; (36) 750; (37) 550; (40) 749.  
 psidii, notes, (28) 645; (29) 243.  
 pulsatillae, specialization of, (33) 455.  
 purpurea, notes, (36) 641; (37) 452.  
 relation to Uromyces, (26) 645.  
 rhamnii, negative heliotropism of urediniospore germ tubes, (33) 330.  
 rubigo-vera, specialization, (37) 149.  
 sp. on pinks, (35) 154.  
 spp., affecting Carex, revision, (26) 646.  
 spp. as affected by host, (31) 540.  
 spp., cardinal temperature for germination, (27) 149.  
 spp., culture studies, (32) 145.  
 spp. in British East Africa, (37) 453.  
 spp., inoculation experiments, (28) 551; (30) 847; (31) 146.  
 spp., life histories, (30) 745.  
 spp., notes, (26) 340; (28) 443; (29) 445; (30) 240, 448, 746, 845; (33) 145, 146; (35) 47; (37) 550.  
 spp. on corn in Barbados, (33) 445.  
 spp. on Geranium and Polygonum, (36) 547.  
 spp. on Onagraceae, (37) 552.  
 spp., overwintering, (33) 647.  
 spp., overwintering and distribution in South America, (38) 148.  
 spp., parasitism, (38) 448.  
 spp., spore germination, (38) 224.  
 spp., studies, (36) 542.  
 spp., teliospore formation, (34) 745.  
 spp., treatment, (27) 746.  
 spp., viability of teliospores, (31) 540.  
 spp., wintering in Bohemia, (28) 345.  
 spongiosa, notes, (38) 848.  
 stipae, culture experiments, (36) 245.  
 suaveolens, notes, (36) 48.  
 suaveolens on California thistle, (31) 153.  
 subnitens, aecial hosts, (38) 249.  
 subnitens on sugar beets, (31) 842.  
 tanacetii, notes, (28) 747.  
 triticina, notes, (31) 641; (34) 845; (37) 749.  
 vincae, biological observations, (39) 57.  
 vincae, notes, (28) 350.  
 Pucciniaceae, monograph, (36) 647.  
 Pucciniastrum—  
   myrtili—  
     infection experiments, (30) 745.  
     notes, (27) 648; (31) 646.  
   pustulatum—  
     inoculation experiments, (38) 253.  
     new aecial hosts, (36) 245.  
     on Abies lasiocarpa, (36) 651.  
     on Epilobium adenocaulon, (38) 553.  
     spp., overwintering, (39) 553.  
 Pudding compound, examination, (30) 664.  
 Puddings, recipes, (39) 769.  
 Pueraria thunbergiana, notes, (27) 528.  
 Puerperal—  
   diseases in cattle and their relation to meat poisoning, (34) 386.  
   eclampsia, see Milk fever.  
   fever streptococci, sources, (36) 577.  
 Puffinus, notes, (38) 457.

## Pulex—

- irritans, bionomics of, (31) 353.  
 irritans, notes, (26) 781.  
 irritans, relation to leishmaniasis, (36) 654.  
 serraticeps, relation to Leishmania, (28) 185.  
 Pullets—  
   cost of raising, (34) 569.  
   early hatched, for egg production, (34) 95, 377.  
   early v. late hatched, (36) 72.  
   feeding experiments, (30) 872; (31) 472; (32) 570; (34) 376, 769.  
   late fall hatched, for egg production, (34) 178.  
   Leghorn, cost of raising, (36) 770.  
   management, (34) 694, 796.  
   ovariotomy of, (31) 572.  
   v. hens for egg production, (38) 677.  
 Pulleys—  
   and belts, selection, (31) 590.  
   power transmitting capacity, (29) 488.  
   tests, (28) 590.  
   transmitting capacity, (28) 187.  
 Pulmonary emphysema, cause and treatment, (26) 486.  
 Pulp—see also Paper pulp, Pulpwood, and Wood-pulp.  
   analyses, (31) 663.  
   and paper industry, bibliography, (29) 119.  
   from waste resinous woods, (28) 512.  
   manufacture, soda process, (31) 715.  
   mill refuse, analyses, (33) 723.  
   mills of United States, (40) 641.  
 Pulpwood—see also Woodpulp.  
   consumption in 1917, (40) 543.  
   from jack pine and hemlock, (27) 541.  
   industry in Canada, (26) 444; (32) 144; (34) 48; (36) 45; (37) 245, 748.  
   industry in United States, (30) 845; (38) 447.  
   of Brazil, (37) 452.  
   production in Canada, (27) 443; (29) 344.  
   purchasing, (37) 452.  
   rate of replacement on cut-over land, (39) 145.  
 Pulque, manufacture and use, (26) 715.  
 Pulse—  
   crops, fungoid and insect pests, (40) 747.  
   grains, effect on milk and butter, (34) 570.  
   insects affecting, (28) 248; (30) 53.  
   irregularities, in horses, (29) 671.  
   rate in man after muscular work, (32) 664.  
 Pulses—  
   breeding experiments, (37) 827.  
   relation to beriberi, (27) 461.  
 Pulvinaria—  
   acericola, notes, (33) 252.  
   betulae, notes, (38) 464.  
   flocifera in California, (35) 658.  
   gasteralpha, life history, (33) 555.  
   jacksoni, notes, (28) 654.  
   n.spp., descriptions and parasites, (40) 61.  
   psidii, notes, (27) 255; (31) 249; (35) 852; (40) 651.  
   vitis, see Maple scale, coitony.  
   vitis ribesiae, notes, (26) 452, 556.  
 Pumice soils of New Zealand, notes, (27) 513.  
 Pump—  
   gas-driven, description, (26) 893.  
   slippage, calculations, (28) 186.  
 Pumpnickel, making, (36) 159.  
 Pumping—  
   automobile engine for, (40) 188.  
   by electricity, (27) 86.  
   drainage, cost of, (34) 585.  
   for drainage in Louisiana, (39) 292.  
   irrigation, (29) 121, 181; (31) 587, 588; (32) 87; (37) 384.  
   irrigation, cost, (33) 688; (36) 88.  
   irrigation, treatise, (33) 884.  
   from wells, (40) 188.  
 machinery—  
   for drainage, (31) 784.  
   for irrigation, (32) 187.  
   notes, (30) 294, 385, 887.  
   testing, (35) 889.  
 mari, tests, (39) 393.  
 on irrigation projects, (40) 188.  
 plant for drainage, (29) 785.  
 plant for irrigation, description, (27) 385.  
 plants—  
   centrifugal, for irrigation and drainage, (28) 890.

- Pumping—Continued.**  
 plants—continued.  
 for irrigation, (28) 83, 84, 484; (29) 784; (30) 485, 587; (36) 487, 888; (38) 186; (39) 792.  
 of U. S. Reclamation Service, (38) 589.  
 reservoir capacity for, (38) 389.  
 small, notes, (31) 89.  
 steam v. electric, (30) 289; (32) 588.  
 tests and efficiency, (30) 85.
- Pumpkin—**  
 cake, analyses, (26) 165.  
 canned, examination, (30) 664.  
 flies, notes, (26) 349.  
 mosaic, notes, (39) 853.  
 seed cake, acidity, (32) 259.  
 seed cake and bran, acidity of, (35) 770.  
 seeds, large v. small, (31) 634.  
 seeds, oil from, (39) 9.  
 seeds, sprouting, nutritive changes in, (27) 633.  
 seeds, treatment, (40) 443.  
 stem borer, notes, (32) 347.
- Pumpkins—**  
 analyses, (30) 565.  
 breeding experiments, (37) 827.  
 calcium content, (39) 747.  
 canned, keeping in open tins, (39) 317.  
 composition and digestibility, (38) 571.  
 culture, (27) 32.  
 culture experiments, (37) 742.  
 digestion coefficients, (39) 171.  
 drying, (37) 509.  
 fertilizer experiments, (37) 742.  
 germination as affected by depth of planting, (36) 458.  
 growing with corn, (40) 230.  
 insects affecting, (27) 453.  
 parthenogenesis in, (29) 837.  
 transformation of nitrogen by, (29) 133.  
 use by prehistoric Americans, (38) 167.  
 varieties, (26) 233.  
 water requirement, (32) 127.
- Pumps—**  
 air lift, investigations, (27) 892.  
 American Humphrey, description, (33) 488.  
 centrifugal—  
 air pump for priming, (30) 588.  
 balancing devices for, (30) 288.  
 capacity, (27) 140.  
 for irrigation, (31) 588.  
 manual, (37) 585.  
 motors for, (33) 690.  
 notes, (29) 893.  
 operation, (31) 188.  
 priming, (34) 87.  
 rating chart for, (32) 485.  
 specifications, (28) 484.  
 tests, (26) 89.  
 treatise, (34) 482.  
 deep-well, description, (33) 488.  
 for irrigation, (28) 889; (34) 482; (37) 283, 585, 786.  
 motor-driven deep-well, maintenance cost, (37) 585.  
 motor-driven, design and operation, (29) 489.  
 motors for, (39) 87.  
 operation, (28) 893.  
 reciprocating, notes, (29) 292.  
 small centrifugal, tests, (33) 690.  
 small v. large, (28) 186.  
 two-stage turbine, tests, (29) 893.  
 use in drainage, (26) 589, 789; (34) 283.
- Punga bark, fiber from, (37) 535.**
- Purchasing associations in Posen and West Prussia, (34) 893.**
- Purdue University, notes, (26) 96, 494, 694; (27) 697; (28) 93, 396; (29) 698; (30) 796; (31) 197, 600; (32) 198; (33) 99; (34) 495; (35) 596, 697, 900; (37) 97, 196, 497, 700, 896; (38) 96, 198, 399, 600, 797; (39) 95, 300, 695; (40) 496, 696, 900.**
- Purin—**  
 bases, determination in urine and blood, (34) 412.  
 bases in food materials, (40) 205.  
 bases of muscles, behavior during fatigue, (29) 366.  
 bodies, studies, (29) 63.  
 compounds, decomposition in digestive canal, (33) 263.  
 content of foods, (26) 355.
- Purin—Continued.**  
 metabolism—  
 as affected by potassium salts, (28) 261.  
 biochemistry of, (31) 760; (32) 166.  
 studies, (29) 63, 365; (30) 261.
- Purins, formation in soils, (32) 618.**
- Purple scale—**  
 destruction by mites, (26) 553.  
 notes, (27) 455; (32) 56; (34) 60.  
 on citrus fruit, (39) 161.  
 on olives, (38) 157.  
 remedies, (26) 534; (31) 549; (40) 455.  
 studies, (26) 756.
- Purpura hemorrhagica, immunization, (28) 780.**
- Purpura, treatment, (31) 378.**
- Purslane sawflies, notes, (29) 252.**
- Purslane, water requirement, (32) 127.**
- Pus accumulations, latent, biological detection, (26) 278.**
- Putnam's scale, notes, (28) 156.**
- Putorius xanthogenys, susceptibility to plague, (26) 59.**
- Putrefaction—**  
 and fermentation, studies, (26) 308.  
 as affected by fluorin, (32) 308.  
 bacteriology of, (28) 563.  
 intestinal, (27) 465; (30) 262.  
 of meat, game, and fish, (34) 163.
- Puzzolan mixtures for roads, (30) 290.**
- Pycnobaris spp., notes, (30) 357.**
- Pycnoderes quadrimaculatus, notes, (26) 452; (29) 453.**
- Pycnometer, description, (31) 811.**
- Pycnoscelus surinamensis, notes, (39) 761.**
- Pycnosoma megacephala, notes, (29) 482.**
- Pyelonephritis, effect on milk, (32) 479.**
- Pyemia due to Bidré-Sivori bacillus, (40) 683.**
- Pyemia in horses, (29) 179.**
- Pyobacillosis—**  
 in pigs, (30) 484.  
 of mammary gland, description, (32) 376.
- Pyobacillus of sheep and goats, (27) 887.**
- Pyocyanase, properties of, (29) 378.**
- Pyocyanus infection in dogs, (26) 280.**
- Pyolymphangitis, equine, causative agent, (26) 460.**
- Pyometritis—**  
 in cows, treatment, (26) 286.  
 in horses, investigations, (26) 287.
- Pyotherapy—**  
 aseptic, notes, (38) 588.  
 in treatment of harness wounds, (39) 85.  
 in treatment of lymphangitis, (39) 791.  
 local reactions in, (39) 185, 680.  
 studies, (40) 285, 883.
- Pyovaccination, studies, (40) 289.**
- Pyracmon conocola n.sp., description, (38) 164.**
- Pyralid—**  
 moth borer, new, (33) 459.  
 new, from California, (38) 766.
- Pyralidae of Bermuda, (34) 63.**
- Pyralids, new, from British Guiana, (37) 564.**
- Pyralis—**  
 farinalis, *see* Meal moth.  
 vitana, biology and control, (33) 555.
- Pyramis cardui, studies, (32) 851.**
- Pyramidone, periods of, (36) 313.**
- Pyrausta—**  
 nubialis, *see* Corn borer, European.  
 penitalis and P. nubialis, notes, (40) 756.  
 vastatrix, notes, (29) 453.
- Pyraustinae, North American, notes, (37) 564.**
- Pyrella eriophthalma, hibernation, (34) 254.**
- Pyrenochaeta—**  
 bergevini, notes, (30) 448.  
 elodeae n.sp., description, (34) 840.
- Pyrenopeziza medicaginis—**  
 notes, (36) 248.  
 studies, (39) 354.
- Pyrethrum—**  
 and its culture, (40) 151.  
 insecticidal value, (31) 350; (39) 762.  
 manganese content, (38) 207.  
 studies, (40) 752.
- Pyrethrums, varieties, (34) 836.**
- Pyrheliometers, comparison, (38) 210.**
- Pyridin—**  
 bases, detection in ethyl alcohol, (29) 312.  
 derivatives, antineuritic properties, (35) 711.

- Pyridin**—Continued.  
 derivatives in soils, (32) 718.  
 detection in vinegar, (26) 209.  
 determination, (26) 709.  
 disappearance in soils, (36) 432, 725.  
 effect on plant growth, (36) 212.  
 effect on soil organisms, (31) 27; (38) 420.  
 in soils, studies, (38) 119, 129.  
 insecticidal action, (26) 758.  
 relation to aroma of coffee, (31) 165.  
 separation from ammonia, (26) 709.  
 sterilization of soils by, (32) 816.  
 vapor larvicidal value, (34) 359.  
**Pyrilla aberrans**, studies, (38) 462.  
**Pyrrilloxenos compactus** n.g. and n.sp., description, (32) 851.  
**Pyrites**, production and use in 1911, (29) 213.  
**Pyritic cinder**, fertilizing value, (29) 129.  
**Pyrocatechin**—  
 effect on cyanogen formation in plants, (28) 527.  
 presence in plants, (38) 223.  
 utilization by plants, (36) 329.  
**Pyroderces**—  
**rileyi**—  
 description, (37) 564.  
 notes, (27) 657; (36) 56; (40) 453.  
 studies, (35) 256.  
 spp., notes, (27) 862.  
**Pyrogallic acid**, effect on action of soil organic compounds, (34) 127.  
**Pyrogallol**—  
 effect on—  
 cyanogen formation in plants, (28) 527.  
 nitrification in soil, (38) 119.  
 plant growth, (36) 212.  
 soils, (28) 123.  
 extraction with ether, (37) 414.  
 relation to soil "sickness," (28) 520.  
**Pyrol**, culture experiments, (31) 829.  
**Pyroligneous acid**, production from wood, (28) 50.  
**Pyromucric acid**, cleavage by mold enzymes, (30) 503.  
**Pyronia**, description, (35) 743.  
**Pyronota festiva**, notes, (28) 757.  
**Pyrophorus**—  
 luminosus, notes, (32) 555.  
 of America, revision, (40) 655.  
**Pyrophosphate**—  
 assimilation by plants, (29) 624.  
 Giana, fertilizing value, (26) 42.  
**Pyrophosphoric acid**—  
 esters of inosit, (27) 712.  
 relation to toxicity of cottonseed meal, (29) 76.  
**Pyropolyporus**—  
 calkinsii, notes, (26) 751.  
 everhartii as a wound parasite, (32) 752.  
 ribis, notes, (32) 441.  
**Pyroracemic acid**, decomposition by dead plants, (37) 201.  
**Pyrox**—  
 analyses, (26) 65.  
 fungicidal value, (37) 447; (38) 235.  
 insecticidal value, (34) 147.  
**Pyrrhopyge** sp., notes, (30) 657.  
**Pyrrhula europaea**, feeding habits, (28) 450.  
**Pyrrolic acid**, effect on chlorophyll formation, (35) 435.  
**Pyrus**—  
 baccata, notes, (28) 436.  
 malus, inflorescence and fruit of, (36) 331.  
 rivularis as a stock for cultivated apples, (32) 45.  
 sinensis, studies, (29) 541.  
 spp., host of apple aphid, (28) 251.  
 spp. inoculation experiments with brown rot fungus, (33) 247.  
**Pythiacystis**—  
 citricola, notes, (29) 243.  
 citrophthora—  
 description, (34) 353.  
 growth in cultures, (38) 757.  
 notes, (30) 51, 749.  
 studies, (33) 55, 550.  
 treatment, (35) 754.  
 sp. on avocado, (37) 555.  
 sp. on deciduous nursery stock, (34) 353, 646.  
**Pythium**—  
 debaryanum—  
 description, (31) 51, 448.  
 detection in potato tissue, (39) 248.  
**Pythium**—Continued.  
 debaryanum—continued.  
 inoculation experiments, (28) 750.  
 notes, (26) 548, 747; (27) 45, 544, 728; (28) 246; (29) 549, 647; (31) 55; (37) 148.  
 on conifer seedlings, (40) 545.  
 relation to potato leak, (35) 751.  
 relation to sugar beet damping off, (33) 246.  
 treatment, (27) 655; (30) 846; (31) 448, 647; (36) 547; (38) 149.  
 gracile, notes, (27) 747; (28) 241.  
 palmivorum—  
 description and treatment, (32) 149.  
 notes, (27) 353, 751; (28) 241; (34) 643; (36) 47; (38) 354.  
 sp., affecting cotton, (29) 749.  
**Pyxinia** n.spp., descriptions, (37) 558.  
**Quack grass**—  
 creeping rootstock of, (31) 37.  
 description and eradication, (36) 638.  
 destroyer, analyses, (30) 697.  
 dissemination of fungi by, (28) 442.  
 eradication, (27) 31; (28) 235, 834; (30) 738; (31) 438; (32) 530; (34) 339; (35) 35; (37) 227; (40) 734.  
 identification, (29) 741.  
**Quail**—  
 California, notes, (27) 355.  
 California valley, destruction with poisoned barley, (34) 850.  
 California valley, notes, (31) 846.  
 coccidiosis in, (26) 187.  
 domestication, (33) 381.  
 food habits, (39) 860.  
 guano, analyses, (28) 523.  
 propagation, (28) 752.  
 valley, eating of alfalfa weevil by, (31) 655.  
**Quamasia**—  
 spp., notes, (35) 730.  
 walpolei n.s.p., description, (35) 730.  
**Quarantine**—  
 laws, animal, (32) 679.  
 regulations, discussion, (27) 400.  
 regulations in Canada, (31) 80.  
 service, federal, sanitary police work in, (27) 77, 576.  
**Quassia extract**, insecticidal value, (38) 55.  
**Quassini**, insecticidal value, (32) 649; (34) 355.  
**Quaternary halids** in dye making, (40) 711.  
**Quebec Society for the Protection of Plants from Insects and Fungus Diseases**, (32) 151.  
**Quebrachia lorentzii**, notes, (27) 347.  
**Quebracho**—  
 red, studies, (36) 745.  
 wood, uses and substitutes, (27) 347.  
**Quercetin**, determination in wine, (31) 412.  
**Quercus**—  
 agrifolia, Christmas-berry tings affecting, (26) 148.  
 emoryi, notes, (27) 647.  
 garryana, notes, (27) 846.  
 morehus, common name for, (36) 243.  
 n.spp. of lower California, (34) 827.  
 nigra, heart rot affecting, (26) 751.  
 of eastern North America, (33) 646.  
**Quicklime**—  
 and calcium arsenate spray, (39) 311.  
 effect on carbon dioxide content of soil air, (39) 516.  
 effect on organic matter in soils, (35) 522.  
 effect on soils, (30) 127.  
 fertilizing value, (30) 839.  
 treatment of wheat, (40) 337.  
**Quince**—  
 blight, notes, (31) 644; (34) 648.  
 blotch, notes, (30) 541.  
 blotch, studies, (27) 652; (33) 247.  
 borer, notes, (38) 465.  
 crown gall, notes, (28) 447.  
 cureulio, notes, (36) 856.  
 diseases, notes, (33) 741; (37) 51; (38) 50.  
 diseases, treatment, (33) 349; (34) 50.  
 fire blight, description, (33) 447.  
 fire blight, notes, (29) 348, 848.  
 fruit spot, notes, (29) 547.  
 Japanese, destruction, (26) 334.  
 Japanese, fruit of, (34) 256.  
 Japanese, petaliation, (38) 446.  
 juice, fermentation, (29) 116.  
 leaf blight, investigations, (33) 347.

Quince—Continued.

- leaf disease, treatment, (39) 548.
- leaf spot, description and treatment, (30) 650.
- orange rust, notes, (35) 351.
- oriental peach moth on, (39) 259.
- parasitic disease of, (33) 54.
- pear graft hybrid, description, (30) 740.
- rot, studies, (39) 756.
- rust, new, description, (31) 345.
- rust, notes, (26) 52; (32) 645.
- seeds, hydrocyanic acid content, (27) 11.
- stocks for pears, (39) 447; (40) 444.

Quinces—

- acidity, (32) 110; (37) 715.
- culture in New York, (35) 836.
- diseased, plaster cast of, (31) 748.
- drying, (37) 509.
- fibro-vascular system, (29) 542.
- insects affecting, (38) 843.
- pear thrips affecting, (27) 156.
- pruning and training, (37) 344.
- reducing and nonreducing sugars in, (29) 503.
- spray calendar, (39) 242.
- spraying, (27) 439; (37) 744.
- susceptibility to bitter pit, (31) 244.
- varieties for New Jersey, (33) 439.
- varieties in Oklahoma, (27) 241.

Quincy Valley, Wash., irrigation project, (29) 486.

Quinin—

- determination in headache tablets, (27) 499.
- effect on production of egg yolk and albumin, (40) 664.
- effect on respiration of pea seed, (26) 729.
- hydrochlorate, effect on starch ferments, (27) 109.
- hydrochlorid—
  - as an antiseptic, (34) 383.
  - toxicity toward plants, (34) 526.
  - use in preparation of vaccine, (35) 380.
- in animal tissues and liquids, (40) 382.
- industry of Dutch East Indies, (30) 697.
- methods of analysis, (37) 113.
- use against fowl cholera, (30) 286.
- use against gaseous gangrene, (34) 383.
- use against rabies, (29) 883; (31) 480; (33) 580, 774.

Quinolin—

- as a wood preservative, (27) 314.
- bases in dye making, (40) 710.
- disappearance in soils, (36) 432, 725.
- effect on plant growth, (36) 212.
- in soils, studies, (38) 119, 129.
- insecticidal action, (26) 758.
- insecticidal and larvicidal value, (34) 359.

Quinone—

- effect on—
  - action of fertilizers, (26) 224; (27) 520.
  - plant growth, (34) 126.
  - soil microorganisms, (31) 27.
  - wheat, (28) 140; (34) 325.
- phenolate theory of indicators, (36) 711; (37) 409; (40) 202.

Quittor, Bayer's operation, (27) 576.

Ráb, substitutes for, (32) 722.

Ráb, use in preparing rice seed beds, (35) 138.

Rabbit—

- brush, stock poisoning by, (39) 787.
- ear mange, notes, (35) 80.
- injuries to apple trees, prevention, (34) 250.
- macrophages, fixation of tetanus antitoxin by, (26) 177.
- meat, organic bases in, (26) 563.
- serum, anaphylatoxin produced in, (37) 579.
- serum, proteins of, (28) 875.
- skin clippings, fertilizing value, (29) 129.
- ticks, parasite of, (26) 863.

Rabbits—

- agouti-black color in, (29) 466.
- Angora, rearing for wool, (39) 279.
- as a pest in Alaska, (32) 54.
- as affected by killed tubercle bacilli, (28) 377.
- Bacterium tularense in, (33) 451.
- breeding, (30) 874.
- breeding, economic significance, (26) 669.
- breeding in Germany, (32) 173.
- breeds and breeding, (38) 577.
- care and feeding, (28) 173.
- care and management, (37) 775.
- castration, (29) 168.
- color inheritance in, (38) 776.
- control, (32) 778; (38) 456; (39) 59, 153, 460.

Rabbits—Continued.

- cottontail, damage from, (34) 751.
  - cross-breeding experiments, (34) 370, 466.
  - dissemination of anthrax by, (28) 678.
  - effect on vegetation, (37) 758.
  - English, unit-character constants in, (33) 267.
  - epidemic disease in, (29) 677.
  - factors affecting pulse rate, (28) 768.
  - growth of, (30) 467.
  - host of spotted fever tick, (26) 64.
  - immunity to Bacillus suispesticus, (26) 184.
  - immunity to hog cholera bacillus, (38) 382.
  - immunization against—
    - anthrax, (29) 378; (31) 82.
    - fowl cholera, (31) 485, 872.
    - hemorrhagic septicemia, (28) 881.
    - rabies, (30) 282; (32) 180.
    - tuberculosis, (26) 85; (29) 480.
  - infection with avian tuberculosis, (26) 583; (30) 183.
  - inheritance—
    - in, (34) 864.
    - of coat color in, (28) 768; (33) 757.
    - of size in, (32) 573.
  - injection with protein-free antigen and antigen-serum mixture, (27) 382.
  - male, as affected by poisons, (31) 876.
  - metabolism experiments, (28) 261.
  - milk, composition, (40) 775.
  - morphology and function of epithelium of uterine cornua, (28) 875.
  - morphology of blood, (28) 777.
  - normal temperature of, (28) 351.
  - notes, (28) 653.
  - of Laysan Island, (27) 549.
  - protecting trees against, (27) 344.
  - raising, (27) 374.
  - relation to tapeworms in pigs, (29) 482.
  - spermatogenesis, (35) 167.
  - transfused, agglutinating principle in blood, (39) 584.
  - transplanting of ovaries in, (28) 173.
  - treatise, (31) 370, 770; (33) 174; (38) 174.
  - tuberculosis, cell content of blood, (28) 283.
  - typhoid-like disease in, (29) 288.
  - vitality as affected by lead, (32) 861.
- Rabidphaga saliciperda, notes and remedies, (29) 558.
- Rabies—
- a typical case of, (26) 280.
  - control, (36) 880; (37) 274, 577.
  - diagnosis, (26) 679; (27) 475, 479; (28) 881; (31) 283, 580; (33) 180; (36) 80, 880.
  - disease resembling, in dogs, (26) 280.
  - dissemination by bats, (27) 285.
  - dissemination by prairie dogs, (38) 80.
  - epizootic, in Brazil, (27) 285.
  - etiology, (31) 880.
  - hereditary transmission, (36) 383.
  - immunization, (26) 579, 582, 676, 782; (30) 281, 282; (31) 880; (32) 180; (33) 387; (37) 480, 690; (38) 580.
  - infectivity of saliva during presymptomatic stage, (30) 682.
  - Negri bodies in, (29) 379; (36) 179.
  - notes, (28) 373; (27) 77, 884; (35) 75; (36) 79; (40) 86.
  - organism, cultivation, (30) 79.
  - outbreak, (39) 582.
  - outbreak in sheep, (28) 586.
  - papers on, (32) 271.
  - paralysis in, (28) 881.
  - prevalence in Germany, (28) 583.
  - prevalence in Philippines, (26) 89.
  - prevalence in Prussia, (27) 181.
  - quiet, in bovines, (26) 485.
  - relation to fly larvae, (27) 560.
  - review of literature, (30) 79.
  - studies, (40) 183.
  - treatise, (29) 679.
  - treatment, (29) 679, 883; (31) 480; (33) 580, 774; (35) 575.
  - virus—
    - action of ether on, (39) 588.
    - as affected by phenols, (26) 88.
    - culture experiments, (31) 579.
    - filtrate, studies, (31) 580.
    - passage through ocular conjunctival mucous membrane, (39) 789.
- Race breeding, practical aspects of, (26) 299.
- Racemization, studies, (34) 71.

- Rachisia spiralis* n.g. and n.sp., description, (30) 351.  
 Radiant energy, effect on plant processes, (27) 521; (30) 223, 431.
- Radiation—**  
 atmospheric, (36) 19; (38) 210.  
 nocturnal, meteorological conditions affecting, (30) 211.  
 solar, *see* Solar radiation.  
 terrestrial, studies, (36) 617.  
 zones of the earth, (26) 118.
- Radioactive—**  
 deposit from atmosphere, (34) 615.  
 earth, fertilizing value, (33) 123.  
 emanations of soils, (31) 20.  
 emanations, relation to weather, (40) 314.  
 fertilizer, effect on growth of oats, (35) 218.  
 fertilizer, tests, (32) 519.  
 minerals, effect on wheat, (27) 826.  
 ores, fertilizing value, (27) 128; (34) 821, 822; (35) 628; (39) 116.  
 products in the atmosphere, (30) 619.  
 rays, researches with, (30) 202.  
 substances as fertilizers, (32) 324.
- Radioactivity—**  
 determination, (36) 414.  
 determination in water, (35) 187.  
 effect on—  
   development of plants, (28) 529, 731.  
   germination, (29) 326; (30) 131.

## Rainfall—Continued.

- May and June, (37) 315.  
 measurement, (30) 17, 713; (40) 715.  
 minimum, determination, (37) 315.  
 "monsoon," (33) 118.  
 observations, long-period, value, (34) 319.  
 observers, instructions to, (34) 509.  
 on cold days, (36) 419.  
 records, use by waterworks engineers, (40) 715.  
 records, value, (33) 212.  
 regions of United States, (33) 318.  
 relation to—  
   battles, (34) 509.  
   chestnut blight, (37) 557.  
   corn and wheat production, (38) 317.  
   corn yield, (35) 618.  
   cranberry fruit rots, (38) 454.  
   crop production, (26) 415; (28) 716.  
   crop yields, (35) 14; (38) 509.  
   forests, (35) 510.  
   grape downy mildew, (38) 755.  
   ground water, (33) 322.  
   irrigation, (28) 316.  
   lint length in cotton, (40) 827.  
   magnetic storms, (38) 15.  
   moon, (27) 817.  
   protein content of wheat, (33) 41.  
   run-off, (30) 288.  
   seepage, (27) 116.  
   spring wheat yield, (30) 418; (33) 117; (39) 210.  
   succeeding crops, (36) 209.  
   sun spots, (28) 211; (38) 115; (40) 416.  
   water level, (33) 806.  
   water supply, (34) 510.  
   wheat culture, (28) 213, 638; (36) 440.  
   wheat production in Australia, (36) 209.  
 subnormal, frequency in August, (40) 118.  
 summaries, value, (31) 811.  
 sun spots, and magnetic storms, (38) 811.  
 treatise, (31) 511.  
 variation in, (26) 214.  
 variation with altitude, (27) 816, 817.  
 Rainstorm of 1912 in British Isles, (30) 118.  
 Rainstorms in New York City, (30) 417.  
 Rainy season in southern Rhodesia, (32) 211.  
 Raisin—  
   grapes, seedless, (39) 845.  
   industry in California, (35) 343.  
   industry in United States, (34) 835.  
   industry in Valencia, (29) 439.  
   seeds, utilization, (29) 13; (39) 615.  
 Raisins—  
   dried—  
     analyses, (30) 861.  
     inoculation experiments with brown rot fungus, (33) 247.  
     preparation and use, (29) 462.  
   drying, (37) 114.  
   effect on composition of urine, (31) 761.  
   for pigs, (36) 171.  
   insects affecting, (34) 60.  
   making, (34) 235; (35) 647.  
   oil and press cake from seeds, (40) 803.  
   ripening and cap-stemming, (32) 235.  
   seedless, cap-stemming, (28) 742.  
   stored, insects affecting, (32) 245.  
 Raleigh, N. C., as an agricultural and financial center, (36) 494.  
 Rama fiber, tests, (31) 526.  
 Ramie—  
   culture, (37) 830.  
   culture experiments, (35) 337.  
   notes, (28) 335.  
   varieties, (30) 434.  
 Ramona stachyoides—  
   analyses, (26) 612.  
   oil of, (33) 202.  
 Ramularia—  
   areola, notes, (33) 741; (35) 45.  
   betae, notes, (28) 649.  
   brunnea, description, (26) 852.  
   cynarae on artichoke, (32) 341.  
   macrospora, notes, (27) 45.  
   macrospora, relation to apple rot, (33) 348.  
   n.spp., descriptions, (37) 748.  
   paulula, notes, (26) 341.  
   spp. on potatoes, (33) 849.  
   studies, (30) 537.

## Ramularia—Continued.

- trachystemonis n.sp., description, (35) 454.  
 violae, notes, (37) 550.  
 Rana pipiens—  
   feeding habits, (31) 349.  
   upper limit of temperature for, (35) 851.  
 Range—see also Grazing.  
   carrying capacity tests with sheep, (39) 171.  
   caterpillar, poisonous spines, (39) 561.  
   caterpillar, studies, (36) 55.  
   conditions in western United States, (29) 666.  
   conditions on Mica Mountain, (30) 568.  
   cows, maintenance on yucca and sotol, (40) 277.  
   finder, description, (31) 341.  
   grasses in North Dakota, (40) 299.  
   lands, public, management, (36) 791.  
   lands, reseeding, (37) 437.  
   management in New Mexico, (33) 268.  
   plants of Guam, (31) 467.  
   plants of Wallowa National Forest, (37) 818.  
   plants, poisonous, see Plants, poisonous.  
   preservation, relation to erosion, control, (39) 439.  
   stock, emergency feeds, (40) 276, 471.  
   utilization, studies, (39) 773.  
   white sage, destruction, (39) 172.  
 Rangella vitalii, parasitic in dogs, (35) 785.  
 Ranges—  
   depleted, reseeding, (30) 35.  
   elevated, vegetation, (39) 810.  
   improvement, (27) 528; (29) 224; (30) 334.  
   in southern Arizona, (35) 439.  
   management, (32) 227, 731.  
   management in Southwest, (38) 447.  
   natural revegetation, (32) 227.  
 Ranula, notes, (40) 283.  
 Ranunculaceae, oils and alkaloids of, (36) 628.  
 Ranunculus arvensis, habits and eradication, (37) 542.  
 Rapakivi granite, potash from, (27) 127.  
 Rape—  
   analyses, (28) 469; (32) 171.  
   and turnips, crosses between, (31) 528.  
   as cover crop, (32) 332.  
   cover crop for fall planting, (39) 532.  
   forage crop, (31) 829; (33) 226; (38) 827; (39) 338.  
   green manure for wheat, (35) 426.  
   hog pasture, (32) 136; (33) 380; (39) 372, 777, 879; (40) 771.  
   breeding, (28) 835.  
   bug, notes, (40) 260.  
   cake, analyses, (26) 165; (27) 570, 872.  
   cake, effect on milk and butter, (34) 570.  
   cake, residual effects, (31) 319.  
   cake, sulphureted, fertilizing value, (38) 121.  
   cooperative experiments, (29) 138.  
   culture, (27) 32; (28) 835; (31) 35; (32) 226, 337; (33) 238.  
   culture—  
   and pasturing value, (40) 36.  
   experiments, (28) 531, 735; (31) 42; (32) 132, 528; (33) 33, 34; (37) 132; (38) 133.  
   for winter forage, (38) 735.  
   in cotton belt, (32) 533.  
   Hawaii, (32) 729.  
   Porto Rico, (29) 631.  
   Rhodesia, (27) 32, 637.  
   under dry farming, (36) 529.  
   dust, analyses, (28) 523.  
   dust, fertilizing value, (27) 831, 832; (35) 30; (37) 229; (39) 529.  
   fertilizer experiments, (26) 129, 424, 631; (27) 32, 422; (28) 815, 816; (29) 22; (32) 435; (35) 221, 728; (36) 626; (37) 135, 533; (39) 624, 738.  
   fertilizing value, (27) 831.  
   for cut-over land pasture, (39) 231.  
   fattening lambs, (40) 569.  
   pigs, (34) 174.  
   silage, (35) 768.  
   germination as affected by fertilizers, (29) 327.  
   growth as affected by fertilizer salts, (29) 329.  
   growth on volcanic ash, (32) 36.  
   insects affecting, (31) 548.  
   liming experiments, (38) 22; (39) 25.  
   meal, availability of nitrogen in, (35) 426.  
   nibs, analyses, (27) 670.  
   oil, detection, (26) 713; (29) 613; (39) 804.  
   oil, physical constants, (35) 312.  
   pollination experiments, (30) 528.  
   relation between size of seed and yield, (26) 434.

## Rape—Continued.

- root development with other crops, (26) 129.
- root louse injury, (40) 60.
- root system, (32) 634.
- seed, adulteration, (35) 740.
- seed, analyses, (33) 870.
- seed cake—
  - acidity, (32) 259; (35) 770.
  - analyses, (30) 268, 467; (34) 263.
  - as a feeding stuff, (37) 416.
  - examination, (37) 416.
  - fertilizing value, (38) 624.
  - for grass lands, (33) 527.
  - Indian, adulteration, (26) 468.
- seed—
  - imported, germination tests, (35) 140.
  - in Maryland markets, (32) 740.
  - meal, analyses, (30) 268; (31) 467, 864; (33) 170, 870.
  - oil, manufacture, (31) 42.
  - oil, refractive index, (27) 614.
  - production and utilization, (34) 531.
  - production in China, (31) 42.
  - vitality, (27) 740.
- serpentine leaf miner affecting, (29) 857.
- sulphur in, (31) 817.
- susceptibility to swede mildew, (34) 52.
- tops, analyses and feeding value, (34) 664.
- tops, decomposition in soil, (40) 214.
- varieties, (26) 631; (27) 32; (30) 525; (31) 42, 829; (37) 134, 135.
- water requirements, (29) 826; (32) 127.
- yield as affected by sulphur, (34) 726.
- yields, (31) 226.

## Raphanus-Brassica hybrids, studies, (29) 320.

Rapistrum rugosum, notes, (34) 532.

## Raspberries—

- acidity, (32) 110; (37) 715.
- as a medicinal plant, (30) 145.
- breeding, (31) 442; (38) 845.
- breeding and testing in Minnesota, (40) 148.
- breeding experiments, (28) 542; (32) 338, 835; (33) 637; (35) 144, 744; (36) 741; (37) 240; (39) 346; (40) 740, 742.
- crossing experiments, (33) 44.
- culture, (28) 840; (31) 441; (33) 47; (34) 42; (38) 246, 347, 643, 845; (39) 242.
- culture experiments, (27) 343; (28) 436.
- culture in western Nebraska, (32) 233.
- extracted, sale, (28) 661.
- fertilizer experiments, (33) 48; (34) 294; (36) 121; (38) 218, 540.
- for home and commercial planting, (33) 537.
- frost injuries, (27) 349; (29) 547.
- fungus disease affecting, (26) 450.
- hybridization experiments, (28) 436.
- improvement in Minnesota, (34) 637.
- insects affecting, (26) 246; (28) 352; (40) 158.
- irrigation experiments, (33) 683; (36) 640.
- new, description, (29) 838; (33) 238; (35) 37.
- picking and packing, (33) 47.
- preservation by freezing, (39) 344.
- preservation by pressure, (32) 416.
- propagation and shipping experiments, (34) 637.
- shipping experiments, (33) 642.
- training, (33) 47; (40) 743.
- varieties, (28) 542; (33) 47; (35) 742; (37) 243; (38) 246, 643.
- varieties for New York, (26) 239.
- varieties in Oklahoma, (27) 241.
- variety tests, (32) 141; (40) 340, 740.

## Raspberry—

- anthracnose—
  - notes, (40) 53.
  - perfect stage, (33) 350; (38) 252.
  - studies, (36) 347; (38) 853.
  - treatment, (39) 343, 457.
- beetle, notes, (32) 448; (40) 265.
- bluestem, studies, (28) 348.
- bytvirus, notes, (28) 158.
- cane blight, description and treatment, (27) 250; (30) 246.
- cane blight, notes, (28) 148; (32) 49, 441, 544; (38) 546.
- crown gall, notes, (26) 56; (31) 644.
- crown gall, studies, (35) 550.
- diseases, notes, (27) 448; (28) 352, 748; (37) 52; (38) 50; (39) 652; (40) 158.
- fruit rot, notes, (28) 544.
- hurltail, investigations, (29) 260.

## Raspberry—Continued.

- juice, preparation, (33) 316; (40) 763.
- juice, studies, (34) 256.
- mildew, notes, (34) 749.
- Ohta, description, (30) 640.
- orange rust, studies, (37) 457.
- pollen, germination, (35) 731.
- red worm, notes, (36) 754.
- root rot fungus, composition, (26) 750.
- rust, notes, (36) 498.
- rust, notes and treatment, (29) 50.
- spur blight, (36) 396.
- strawberry hybrid, description, (28) 742.
- thimbleberry hybrid, (36) 442.
- wilt, description, (34) 55.
- wine, preparation, (27) 412.
- yellow—
  - description and treatment, (30) 246; (31) 545.
  - immune variety, (40) 154.
  - notes, (30) 647; (32) 49, 149; (39) 353.
  - studies, (26) 646.

## Rat—

- destroying preparations, investigations, (27) 550.
- diseases, papers on, (27) 754.
- flea, Indian, infectiousness, (40) 161.
- fleas—
  - bionomics of, (27) 58; (30) 757.
  - in Suffolk and North Essex, (28) 757; (29) 55.
  - length of life apart from host, (28) 255.
  - life history, (31) 552.
  - longevity, (28) 356.
  - notes, (26) 653; (29) 755; (32) 348; (33) 159.
  - relation to bubonic plague, (30) 254.
  - guard for ships' lines, description, (27) 550.
  - plague, diagnosis, (36) 753.
  - plague of East Suffolk, England, (26) 461.
  - proofing—
    - as an antiplague measure, (27) 754.
    - public docks of New Orleans, (33) 552.
  - serum, anaphylatoxin produced in, (37) 580.
  - traps, efficiency, (30) 851.

## Rat-bite fever—

- cause, (35) 487, 783; (37) 375.
- spirochete, (39) 588; (40) 781.
- streptothrix in, (36) 678.
- studies, (40) 479.
- treatment, (35) 487; (39) 389.

## Raticide, notes, (27) 52.

Ratin, use against voles, (30) 545.

## Rations—

- acid and basic, effect on ammonia production, (33) 368.
- army, *see* Army rations.
- balanced, (33) 97.
- balanced—
  - from restricted sources, (33) 69, 367, 465; (37) 766; (39) 71.
  - from restricted sources, physiological effects, (26) 467.
  - notes, (29) 362.
  - v. unbalanced, for cows, (28) 174.
- balancing, (28) 465; (31) 663.
- box, for army use, (35) 165.
- calculating, (33) 170.
- changes in, (26) 261.
- combining for livestock, (29) 170.
- computing, (28) 364, 770; (31) 266; (38) 73; (39) 167.
- concentrated v. bulky, for cows, (28) 174.
- digestibility of components, (36) 470.
- effect on—
  - composition of urine of dairy cows, (36) 672.
  - development of swine, (33) 375.
  - growth and dairy qualities of cows, (34) 378.
  - intestinal flora of swine, (38) 875.
  - quality and yield of wool, (32) 99.
- emergency for U. S. Army, (35) 664.
- emergency, notes, (32) 562.
- for Arab soldiers, (33) 68.
- cattle and sheep, (30) 567.
- cattle feeding, (34) 72.
- cows, (29) 375, 575; (37) 195.
- cows, computing, (36) 374.
- dairy stock, (35) 378.
- farm animals, (30) 169; (31) 663; (36) 469.
- poor families, (30) 167.
- ruminants, computing, (26) 72.

Rations—Continued.  
 from restricted sources, physiological effects, (28) 872.  
 from single plant sources, tests, (27) 68.  
 high protein—  
   and energy, utilization, (39) 75, 381.  
   v. medium protein, (27) 73.  
 in Philippines, (28) 764.  
 in United States Army, (32) 459, 460.  
 mineral content of, effect on growth, (29) 64.  
 mixed, digestibility, (32) 69, 70; (34) 169; (37) 677.  
 of British and Indian troops in relation to disease, (40) 564.  
 of Italian Navy, (40) 561.  
 of soldiers in the training camps, (40) 68.  
 portable, suggestions for, (31) 68.  
 starch values and fodder units, (27) 276.  
 steamed, (39) 269.

Rats—see also Rodents.  
 acid-fast bacillus from, (26) 653.  
 albino and Norway, treatise, (40) 546.  
 albino, growth in, (36) 267.  
 animal parasites of, (38) 760.  
 as a menace to health, (29) 852.  
 as affected by gonadectomy, (34) 263.  
 as affected by vegetable diet, (27) 271.  
 biology and control, (35) 656.  
 bionomics, (27) 550; (29) 756.  
 black or ship, of Great Britain, (35) 656.  
 breeding experiments, (27) 370; (40) 468.  
 brown, Acari on, (32) 353.  
 brown, in Manitoba, (39) 654.  
 brown, prolificacy, (26) 346.  
 color inheritance in, (38) 776.  
 control, (39) 461.  
 destruction, (27) 356, 888; (30) 153; (36) 653; (38) 356, 497.  
 destruction—  
   on ships, (29) 651; (38) 356.  
   with bacteria, (26) 379.  
   with Danysz bacillus, (35) 52.  
 destructive to sugar cane and coconuts, (26) 857.  
 destructiveness and control, (39) 460.  
 development of ascarid larvae in, (37) 374.  
 directions for raising, (38) 258.  
 economic importance, (38) 255.  
 feeding experiments, (28) 260, 364; (30) 567; (31) 69.  
 feeding experiments with fat-free food mixtures, (28) 863.  
 fertility in relation to age, (40) 468.  
 field, relation to plague, (40) 161.  
 Gaertner group bacilli in, (30) 355.  
 growth as affected by protein intake, (33) 262.  
 growth on restricted rations, (33) 69.  
 habits of, (29) 651.  
 hybrid, sex ratio, (27) 769.  
 immunization against plague, (26) 653.  
 Indian, races of, (26) 346.  
 infection with avian tuberculosis, (26) 583.  
 injurious to cacao, (27) 53.  
 injurious to coffee trees, (33) 536.  
 inoculation experiments, (27) 555.  
 leprosy in, (29) 651.  
 leprosy-like disease in, (29) 756.  
 mammary gland, studies, (40) 467.  
 metabolism cage for, (28) 272.  
 microbes affecting, (27) 52.  
 migratory habits, (34) 548.  
 morphology of blood, (28) 777.  
 natural history, (27) 754.  
 new, from North America, (37) 757.  
 notes, (37) 156.  
 nutrition of, (36) 161.  
 nutritive requirements, (37) 264.  
 of Great Britain, (34) 57; (36) 852.  
 ovulation period, (40) 663.  
 pack, destructive to Jeffrey pine, (38) 53.  
 parasites of, (27) 754; (29) 755.  
 piebald, selection experiments, (39) 877.  
 plague-infected, of Hawaii, (26) 854.  
 relation to—  
   equine influenza, (28) 482.  
   hog cholera, (40) 480.  
   poliomyelitis, (36) 354; (40) 85, 546.  
   public health, (27) 754; (30) 153.  
   Spirochaeta icterohaemorrhagiae, (38) 653, 760.  
 rice, new species of, (34) 850.  
 rice, of North America, (39) 860.

Rats—Continued.  
 serum proteins of, (28) 875.  
 small house, biology, (40) 160.  
 spiny, in Philippines, (40) 646.  
 Spirochaeta icterohaemorrhagiae in, (39) 759.  
 susceptibility to pneumonic plague, (28) 180.  
 undersized, postnatal growth, (40) 469.  
 use in study of anaphylaxis, (37) 582.  
 wharf, notes, (27) 856.  
 white, immunity against anthrax bacillus, (29) 378.  
   wood, host of spotted fever ticks, (26) 64.  
 Rattan supply of Philippines, (33) 646; (35) 44.  
 Rattlepod, fertilizing value, (32) 722.  
 Rattleweed, description, (32) 474.  
 Ravenella, n. spp.—  
   descriptions, (36) 145.  
   notes, (38) 125.  
 Ravens of North America, (39) 860.  
 Ravines, restoration in Russia, (27) 148.  
 Ravinia n.spp., descriptions, (33) 158.  
 Ray fungus disease in South American ox tongues, (31) 882.

Razoumofskya—  
 americana and R. occidentalis abietina, new hosts, (38) 152.  
 americana, host plants, (36) 753.  
 campylopoda inoculation experiments, (38) 253.  
 larids injurious to larch, (34) 547.  
 spp. on conifers, (39) 57, 554.  
 studies, (40) 253.  
 tsugensis in Alaska, (34) 546.  
 tsugensis, new hosts for, (33) 551.

Reagents and reactions, treatise, (39) 803.  
 Reapers, care and repair, (39) 292.  
 Recaredus sp. attacking stored potatoes, (36) 253.

Reclamation—  
 Board Act of California, (35) 490.  
 in United States, (27) 188.  
 of marshlands, (40) 587.  
 project, Belle Fourche, (40) 391.  
 project in California, work of, (39) 497.  
 projects, (40) 391, 786.  
 projects, hints to settlers, (40) 687.  
 Service, see United States Geological Survey.

Reconstruction—  
 agricultural, in Great Britain, (39) 401; (40) 91.  
 and reeducation of disabled soldiers and sailors, (40) 591.  
 in France, (39) 689, 892.  
 in Ireland, (29) 894.  
 problems, relations of agricultural colleges and experiment stations to, (39) 702.  
 rural, in Ireland, (40) 91.

Rectal feeding, plan of, (39) 670.  
 Rectal temperature in childhood, (31) 563.  
 Recurrent fever, etiology, (29) 479.

Recturaria—  
 alnifrutella n.s.p., description, (33) 748.  
 dorsivittata, life history, (33) 655.  
 milleri n.s.p., description, (33) 655.  
 nanella, studies, (31) 252, 755; (36) 656  
 piceaella, notes, (29) 256.

Red—  
 bug, false, notes, (33) 252.  
 bug, lined, notes, (26) 146.  
 bug, notes, (30) 53; (34) 160.  
 bugs, remedies, (38) 257.  
 clover, see Clover, red.  
 dog flour, see Flour, red dog.  
 headed fungus, notes, (26) 358; (29) 852.  
 rice, eradication, (37) 532.  
 sanders tree, descriptive account, (38) 146.  
 scale, fumigation experiments, (39) 463.  
 scale on citrus fruit, (39) 161.  
 spider—  
   control, (39) 870.  
   dissemination by wind, (30) 759.  
   effect on potato foliage, (34) 449.  
   geographical distribution, (32) 63.  
   in Germany, (34) 658.  
   in greenhouses, (39) 65.  
   in Ohio, (34) 59.  
   injurious to alfalfa, (38) 558.  
   injurious to citrus fruits, (28) 457.  
   new species, (36) 660.  
   notes, (26) 856; (29) 360; (30) 362; (32) 56, 251; (34) 60; (35) 254, 356, 657; (37) 460, 461, 847; (38) 365.

- Red—Continued.  
 spider—continued.  
   on beans, (39) 256.  
   cinchona, tea, etc., (40) 656.  
   citrus fruit, (39) 161.  
   cotton, (35) 468; (36) 557.  
   paper on, (39) 461.  
   remedies, (27) 357; (28) 759; (32) 536; (38) 63; (40) 453.  
   studies, (29) 261; (32) 156.  
   tail, European, notes, (27) 255.  
   turpentine beetle, notes, (26) 561.  
   weevil in Ontario, identity, (40) 653.  
   weevil, life history, (26) 654.  
   wings, destruction of locusts by, (28) 351.
- Redonda phosphate, dehydrated, fertilizing value, (28) 816.
- Redpolls, destructive to Chinese cotton scale, (26) 556.
- Redtop—  
 analyses, (29) 270.  
 as affected by companion crop of clover, (37) 438.  
 as forage crop, (31) 829.  
 culture—  
   experiments, (29) 631; (32) 431, 529; (36) 32.  
   in cotton belt, (32) 534.  
   in the Ozarks, (29) 427.  
 effect on following crop, (38) 337; (40) 135, 623.  
 growth on volcanic ash, (32) 36.  
 identity and agricultural characteristics, (39) 532.  
 irrigation experiments, (32) 224.  
 notes, (37) 29.  
 palatability, (34) 865.  
 Sclerotium disease, (31) 641; (39) 753.  
 seed—  
   adulteration and misbranding, (29) 144.  
   analyses, (26) 739.  
   germination and purity tests, (29) 741.  
 seeding on ranges, (29) 531; (30) 35.
- Reductase—  
 animal and vegetable, nonspecificity, (37) 309.  
 detection, (26) 204.  
 in chicken fat, (28) 63.  
 eggs, (28) 64.  
 normal raw milk, (28) 412.  
 tobacco plant, (31) 204.  
 investigations, (33) 409.  
 of plants, (37) 203.  
 origin and use, (28) 19.  
 tests in dairy inspection, (27) 781.
- Reductions in the animal body, (28) 607.
- Reduviidae of North America, (30) 55.
- Redwater—*see also* Texas fever.  
 English, treatment, (39) 891.  
 immunization, (33) 384.  
 in cattle, (28) 182; (30) 383; (33) 384; (38) 486.  
 in cattle, treatment, (26) 382.  
 Rhodesian, *see* African coast fever.
- Redwood—  
 destruction by *Termes lucifugus*, (26) 858.  
 lands, management, (26) 51.  
 long-seasoned, strength tests, (29) 442.  
 mechanical properties, (27) 846.  
 relation to rainfall and fog, (38) 522.  
 volume table, (29) 442.
- Reeds—  
 Spanish, culture under dry farming, (30) 435.  
 wild, analyses, (28) 464.
- Reflux condenser, description, (40) 308.
- Reforestation—*see also* Forestation.  
 and occult condensation, (34) 614.  
 as affected by birds and rodents, (29) 545.  
 by seed trees, (32) 839.  
 general principles, (28) 439.  
 in Black Hills National Forest, (33) 843.  
 France, (33) 541.  
 Massachusetts, (27) 444; (36) 843.  
 mountains of northern Idaho, (33) 242.  
 National Forests, (26) 241; (32) 748; (33) 645; (37) 348.  
 New Hampshire, (36) 744.  
 New South Wales, (28) 51.  
 New York, (35) 451.  
 Pennsylvania, (37) 45; (38) 846.  
 ravines, (26) 643.  
 southern Argentina, (35) 452.  
 Sweden, (27) 44.  
 the Tropics, (26) 141.  
 Wisconsin, (35) 242.
- Reforestation—Continued.  
 notes, (26) 643.  
 of brush fields in northern California, (32) 748; (34) 640.  
   burned areas in high mountains, (36) 144.  
   chestnut land, (31) 341; (37) 451; (38) 45.  
   coastal plain, (36) 646.  
   hardwood areas, (30) 743.  
   mountain burns in Arizona and New Mexico, (31) 839.  
   pine lands, (33) 542; (37) 836.  
   sand hills of Nebraska, (31) 744.  
 papers on, (27) 444.  
 rôle of light in, (37) 45.
- Refractometer—  
 description, (37) 110.  
 differential, (39) 502.  
 immersion, use in vinegar analysis, (27) 112.  
 immersion, water bath for, (27) 14.  
 use in sugar-house work, (28) 612.
- Refractometry—  
 principles of, (32) 309.  
 uses of, (28) 409.
- Refrigerating—  
 machinery, notes, (27) 792.  
 plant for dairies, description, (30) 789.
- Refrigeration—  
 domestic, notes, (31) 592.  
 effect on hops, (29) 13.  
 in dairying, (27) 376.  
 in handling of milk, (31) 575.  
 in transportation of perishable products, (40) 488.  
 mechanical, handbook, (28) 385.  
 notes, (34) 892.  
 of dressed poultry in transit, (30) 71.  
 of food products, (27) 460.  
 of measily beef carcasses, (32) 880.  
 physics of, (28) 563.
- Refrigerator cars—  
 brine tank, for fruit, (36) 640.  
 construction, (30) 72.
- Refrigerators—  
 for farms, (38) 292.  
 iceless, (39) 382.  
 notes, (30) 165.  
 score card for, (35) 663.  
 tests, (27) 486.  
 use, (29) 88.
- Rehmiella ulmicola n.sp., description, (34) 242.
- Reichert-Meissl number, determination, (30) 114; (31) 811; (40) 412.
- Reindeer—  
 breeding in Alaska, (30) 672.  
 cysticerci affecting, (27) 182.  
 industry in Alaska, (31) 368.  
 industry in Russia, (29) 772.  
 milk and cheese, analyses, (30) 476.  
 moss, culture experiments, (36) 369.  
 sarcosporidia in, (28) 885.
- Reithrodontomys, revision, (31) 647.
- Relapsing fever, transmission by bedbugs, (26) 760; (36) 356.
- Relationship coefficient, description and application, (32) 665.
- Relationships, determination, (33) 822.
- Relationships, symbolic statement, (28) 173.
- Remedies, new and nonofficial, (37) 876; (40) 284.
- Remedies, new, compilation, (31) 478.
- Remigia repanda—  
 notes, (29) 356.  
 studies, (33) 560, 654.
- Renal—  
 cells, distribution of potassium in, (30) 277.  
 disease, metabolism in, (35) 371.  
 excretion as affected by salt, (27) 464.
- Rengera in lambs, (38) 687, 688.
- Rennet—  
 action as affected by salts, (26) 477.  
 action, chemistry of, (26) 372.  
 action, inhibition, (28) 18.  
 action on milk, (28) 177.  
 artificial, use in cheese making, (30) 778.  
 calves', immunizing against, (30) 477.  
 cleavage action of, (26) 608.  
 coagulation of milk by, (28) 372; (32) 503; (36) 610.  
 determination of activity, (29) 504.  
 for cheese making, (34) 77.

- Rennet**—Continued.  
 homemade, preparation, (36) 378, 477; (37) 576, 778.  
 in latexes, (31) 409, 410.  
 in *Rhizopus nigricans*, (31) 34.  
 preparation, (36) 571.  
 preparation from calves' stomachs, (34) 574.  
 reaction on milk, (27) 810.  
 substitutes for, (34) 574; (37) 273; (39) 884.  
 whey, factors affecting specific gravity, (26) 478.
- Rennin**—  
 action on casein, (29) 805; (32) 606.  
 effect on digestibility of milk protein, (36) 559.  
 separation from pepsin, (26) 803.  
 studies, (28) 18, 177.
- Reproduction**—  
 as affected by mineral content of rations, (33) 666.  
 bibliography, (26) 470; (33) 168.  
 in birds, physiology, (40) 664.  
 in fowls, studies, (33) 74, 96.  
 in rats as affected by diet, (39) 672.  
 physiology of, (33) 168, 369; (37) 371, 772.
- Reproductive**—  
 cells, vitality, (27) 273.  
 organs as affected by X-rays, (38) 268.  
 tissues, variation in composition, (37) 774.
- Reptiles**—  
 as food, (40) 555.  
 blood parasites of, (33) 152.  
 of North America, check-list, (39) 655.
- Rescue grass**, notes, (37) 29.  
**Rescue grass**, varieties, (30) 434.
- Research**—  
 agricultural, *see* Agricultural research.  
 laboratory, Parke, Davis & Co., papers from, (32) 81.  
 work, factors in, (32) 303.
- Reseda**—  
 lutea, root system, (37) 542.  
 odorata, heredity of self-sterility in, (29) 136.
- Reservoirs**—  
 earth, reducing seepage, (39) 86.  
 effect on climate, (27) 509.  
 for small pumping plants, (38) 389.  
 for the farm, (38) 84.  
 small earthen storage, construction, (33) 885.  
 small storage, notes, (28) 186.  
 storage, linings for, (31) 384.  
 treatise, (31) 511.  
 unlined earth, construction, (37) 585.
- Resin**—  
 clarification, (29) 719.  
 effect on soils, (36) 513.  
 industry in Austria, (32) 48.  
 industry in Tonkin, (31) 839.  
 of *Xanthorrhoea quadrangulata*, (40) 449.  
 secretion in *Balsamorhiza*, (39) 224.  
 yielding plants, treatise, (34) 838.
- Resinous**—  
 tracheids, significance, (39) 451.  
 wood, distillation, (28) 24.  
 wood, waste, utilization, (28) 512.
- Resins**—*see also* Oleoresins.  
 formation and flow in trees, (33) 543.  
 in hops, (27) 814; (33) 507; (34) 502, 711.  
 methods of analysis, (27) 205.  
 of *Araucaria araucana*, (40) 615.  
 of Chile, (38) 336.  
 of Douglas fir, (30) 10.  
 production from wood, (28) 50.  
 soft, in hops, (26) 209; (33) 709.
- Resorcin**—  
 effect on cyanogen formation in plants, (28) 527.  
 factors affecting activity, (28) 609.
- Resorption** in the cellular organism, (31) 261.
- Respiration**—  
 after death in *Laminaria*, (39) 631.  
 anaerobic, in fruits and plant tissues, (29) 538.  
 anaerobic, in seed plants, (29) 525.  
 and carbon dioxid assimilation in plants, (28) 728.  
 and catalase activity in sweet corn, (39) 524.  
 and cell energy, notes, (30) 669.  
 apparatus—  
 description, (28) 272; (30) 767.  
 for ruminants, description, (31) 71.  
 for sheep and swine, (30) 170.  
 for small animals, (29) 569, 869; (33) 265.  
 portable, (40) 465.
- Respiration**—Continued.  
 apparatus—continued.  
 small, description, (26) 766.  
 types of, (34) 260.  
 biochemistry of, (32) 664.  
 calorimeter—  
 description, (28) 463, 570, 865; (39) 676.  
 for large animals, (31) 764.  
 for study of disease, (34) 67.  
 improved, (34) 369.  
 small, description, (35) 768.  
 use in vegetable physiology, (27) 67, 466, 568; (28) 362.  
 demonstrating heat of, (39) 223.
- experiments**—  
 at Cornell University Medical College, (30) 863.  
 with cattle, (32) 169.  
 infants, (30) 369; (32) 257, 461.  
 men, (28) 569; (34) 260.  
 milch cows, (39) 676.  
 newborn infants, (34) 861.  
 plants, (26) 729.  
 ruminants, (32) 767.  
 steers, (33) 72.  
 sweet potatoes, (34) 426.
- in diseased apple leaves**, (32) 751.  
 fruits, (29) 135.  
 fungi, (26) 628.  
 man, apparatus for recording movements in, (29) 665.  
 man as affected by body position, (30) 264.  
 partly dried plant organs, (36) 824.  
 plants, (26) 227; (27) 132, 523.  
 plants as affected by—  
 anesthetics, (37) 821.  
 electricity, (31) 33.  
 enzymes, (27) 221, 426.  
 loss of water, (39) 731.
- in plants**—  
 at various temperatures, (26) 822; (36) 28.  
 biochemistry of, (26) 227.  
 effect of organic substances on, (26) 628.  
 heat of, (39) 223.  
 rôle of fermentation products and phosphates in, (26) 627.  
 studies, (26) 729; (27) 28, 426, 632; (28) 427, 428, 631; (29) 324; (31) 33; (34) 523, 524; (35) 821; (36) 329.  
 studies, apparatus for, (39) 27.  
 variation in, (26) 628.  
 in tropical plants, (31) 222.  
 incubator for infants, (32) 860.  
 intramolecular, in plants, (27) 226.  
 of plants in gases, (29) 525, 538.  
 physiology of, (36) 865.  
 post-mortem, of plants, (27) 731.  
 relation to fermentation in plants, (28) 328.
- Respiratory**—  
 activity, relation to sunlight, (34) 30.  
 chamber, description, (31) 764.  
 chamber for small animals, (34) 370.  
 coefficient of plants, (28) 729; (31) 33.  
 diseases, relation to temperature changes, (36) 64.  
 exchange as affected by—  
 food ingestion, (26) 565.  
 one-sided diet, (31) 361.  
 salts, (33) 69.  
 ventilation, (33) 70.  
 exchange—  
 during muscular work, (33) 464.  
 in animals, treatise, (36) 266.  
 diet poor in nitrogen, (29) 165.  
 fish, (32) 565; (33) 664.  
 green plants, (31) 33.  
 infants, (26) 766.  
 man, (33) 756; (34) 260; (36) 266.  
 organs, tissues, and isolated cells, (30) 201.  
 relation to body surface area, (28) 263; (31) 562.  
 fermenters in plants, notes, (27) 828.  
 pigments in plants, (26) 326.  
 quotient as affected by one-sided diet, (31) 361.  
 quotient of plants, (29) 27.
- Resplendent shield bearer**, notes, (30) 657.
- Restaurants**—  
 for shop girls in Copenhagen, (32) 857.

- Restaurants—Continued.  
inspection, (26) 461, 868; (29) 661; (30) 665; (31) 359; (32) 162.  
inspection in—  
  Argentina, (26) 762.  
  Indiana, (34) 861.  
  Missouri, (33) 164.  
  Montana, (33) 67.  
  Nevada, (33) 661.  
  North Dakota, (28) 661; (33) 753.  
  Virginia, (29) 766; (32) 661.  
law in Florida, (33) 165.  
low-priced, in Christiania and Vienna, (32) 856.  
unsterilized vessels in, (31) 259.
- Resthania atripennis* on castor bean, (40) 453.  
Retaining walls, treatise, (35) 786.  
*Reticulitermes spratus* n.sp., description, (35) 255.  
Retgression, artificial, in peaches, (27) 230.  
Retting, microbiological, notes, (38) 715.  
Reversion in cattle, (33) 668.  
Rhadinin, notes, (33) 681.  
*Rhabdoblatta brunneonigra* n.sp., from China, (34) 255.  
*Rhabdocnemis*—  
  obscurus, notes, (31) 553.  
  obscurus, studies, (26) 237; (39) 868.  
  sp. affecting sugar cane, (34) 556.
- Rhabdophaga*—  
  saliciperda, studies, (28) 559.  
  spp. injurious to willows, (32) 554.
- Rhabdopterus picipes*—  
  remedies, (39) 60.  
  studies, (33) 456; (36) 54.
- Rhabdospora*—  
  alexandrina n.sp., description, (32) 443.  
  bernardiana n.sp., notes, (37) 630.  
  coffea, notes, (38) 51.  
  dodartiae n.sp., description, (35) 844.  
  melongenae n.sp., description, (27) 152.
- Rhacodineura antiqua*, life history and habits, (37) 160.
- Rhaeboscels tenuis*, studies, (40) 754.
- Rhagidia* sp., notes, (29) 458.
- Rhagoletis*—  
  cerasi, notes, (27) 53.  
  cingulata, see Cherry fruit maggot.  
  fausta, notes, (30) 852.  
  fausta, remedies, (31) 757.  
  fausta, wild host, (39) 467.  
  juniperinus n.sp., description, (34) 450.  
  pomonella, see Apple maggot.  
  ribicola, see Currant fruit fly.  
  spp. on cherry, (33) 561.  
  spp., studies, (29) 55.
- Rhamnose*—  
  behavior in fermenting mixtures, (27) 502.  
  determination in presence of other methyl-pentoses, (34) 11.  
  isolation from soils, (28) 418.
- Rhamnus purshiana*, notes, (32) 46.
- Rhaphidophorinae* in America north of Mexico, (34) 854.
- Rhaphidospora coffeicola*, notes, (38) 51.
- Rheosporangium aphanidermatus* n. g. and n.sp., description, (33) 648.
- Rheumatism*—  
  acute articular, organism, (39) 789.  
  articular, immunization, (37) 782.
- Rhigopsidius tucumanus*, notes, (29) 761; (30) 459; (38) 864.
- Rhigozum trichotomum*, analyses and digestibility, (27) 871; (32) 167.
- Rhina**—  
  barbirostris—  
    affecting coconut palms, (29) 858.  
    notes, (26) 354.  
  nigra, notes, (29) 853.  
  notes, (40) 759.
- Rhinanthus*—  
  † crista-galli, eradication, (40) 833.  
  † spp., notes, (30) 141.
- Rhinastus pertusus*, notes, (37) 359.
- Rhinoceros beetle*, see *Oryctes rhinoceros* and *Strategus quadrifoveatus*.
- Rhinocricus arboreus*, scale-feeding habits, (38) 865.
- Rhinotrichum tenellum*, notes, (28) 648.
- Rhipicephalus*—  
  appendiculatus—  
    notes, (29) 58.  
    relation to African Coast fever, (28) 478.
- Rhipicephalus*—Continued.  
  appendiculatus—continued.  
    relation to amakebe, (26) 882.  
    remedies, (27) 476.
- bursa—  
    notes, (29) 482.  
    relation to anaplasmosis, (28) 284.  
    relation to equine piroplasmiasis, (31) 382.
- sanguineus—  
    in Key West, (30) 555.  
    notes, (27) 865.  
    parasite of, (26) 863.  
    transmission of *Trypanosoma cruzi* by, (31) 159.
- simus, notes, (34) 851.  
  simus, relation to anaplasmosis, (26) 585; (29) 584.  
  spp., notes, (27) 361; (28) 83.
- Rhipiphoridae*, catalogue, (30) 458.
- Rhipiphorothrips pulchellus* n.g. and n.sp., description, (31) 550.
- Rhipisalis cassythae*, transpiration in, (32) 522.
- Rhizina**—  
  inflata, notes, (27) 854; (39) 254.  
  inflata, studies, (33) 150.  
  undulata, sexuality in, (40) 226.
- Rhizobia**—  
  determination in soils, (26) 816; (27) 620; (29) 424.  
  spp., notes, (28) 814.
- Rhizobium**—  
  beyerinckii injurious to soy beans, (38) 451.  
  leguminosarum, gum of, (27) 134.  
  leguminosarum, studies, (39) 722.  
  radicola, action of products elaborated by, (29) 222.
- Rhizobius**—  
  lopanthae—  
    destructive to purple scale, (26) 757.  
    notes, (26) 149.  
    parasitic on orange scale, (26) 554.  
  ventralis, parasitic on black scale, (26) 556.
- Rhizoctonia**—  
  as a needle fungus, (39) 554.  
  crocorum, notes, (35) 846; (36) 647.  
  destruens, notes, (36) 449; (38) 848.  
  destruens, treatment, (36) 348.  
  diseases, notes, (39) 146; (40) 48.  
  diseases, studies, (40) 746.  
  investigations, (34) 840.  
  lesions on potato stems, (33) 548.  
  medicaginis, notes, (33) 846; (38) 648.  
  microsclerotia—  
    n.sp., description, (38) 252.  
    n.sp., notes, (37) 652.  
    on fig, (39) 757.  
  morphology and parasitism, (28) 149; (35) 148.  
  napi, relation to *Botrytis cinerea*, (36) 449.  
  on jute as affected by potash deficiency, (40) 48, 347.  
  on potatoes, (32) 136; (39) 456, 649.  
  parasitic in America, (35) 749.  
  pathogenic action, (38) 250.  
  relation to pine seedling damping-off, (33) 551.  
  root rot of peas, (39) 354.
- solani—  
    and *Moniliopsis aderholdii*, identity, (36) 145.  
    in soils, (39) 249.  
    new strain on potato, (37) 654.  
    notes, (32) 239, 443.  
    on beans, (39) 52.  
    on vegetables, (39) 454.  
    rejection of name, (34) 443.  
    studies, (28) 149; (32) 147; (36) 847; (37) 47, 350.  
  spp., description and treatment, (30) 50.  
  sp. in seed beds, (37) 651.  
  sp., notes, (26) 844; (28) 246; (29) 547, 549, 647, 650; (30) 152.  
  sp. on beans, (36) 248.  
  sp. on eggplant, (31) 344.  
  sp. on sweet potatoes, (36) 451.  
  spp., relation to damping off of truck crops, (35) 844.  
  spp., relation to sugar beet damping off, (33) 246.  
  sp., treatment, (27) 655; (30) 846.  
  spp. in America, (33) 350.  
  spp. in India, (34) 50.  
  spp., notes, (28) 241; (29) 445; (30) 47, 48, 538, 845; (34) 350.

- Rhizoctonia**—Continued.  
strains of, (37) 753.
- violacea**—  
asparagi, treatment, (38) 648.  
description and treatment, (28) 847.  
notes, (26) 446; (28) 52; (29) 50, 243, 550; (30) 649; (32) 642; (35) 846; (38) 849.  
studies, (39) 53.  
treatment, (26) 648.
- Rhizococcus falcifer**, notes, (26) 655; (28) 550.
- Rhizoglyphus**—  
echinopus as orchid pest, (29) 659.  
echinopus, notes, (30) 449.  
hyacinthi, notes, (35) 54.  
sp., notes, (27) 457.
- Rhizomes, hemicellulose in**, (30) 130.
- Rhizopertha**—  
dominica, notes, (30) 655; (40) 458.  
dominica, studies, (37) 356.  
pusilla, notes, (26) 453.
- Rhizophidium pollinis** on oospores of *Peronosporaceae*, (31) 641.
- Rhizophora**—  
mucronata as a source of tannin extracts, (28) 146.  
physiological studies, (39) 122.
- Rhizopods in soils**, (35) 121.
- Rhizopogon luteolus**, prevalence in South Africa, (29) 461.
- Rhizopus**—  
detection in fruit tissue, (39) 248.  
maydis n.sp., description, (38) 849.  
n.sp., studies, (28) 745.
- nigricans**—  
affecting tomatoes, (30) 349, 351.  
ammonifying power, (32) 29.  
chemotropic reactions in, (36) 845.  
description, (32) 51.  
growth and sporulation, (28) 524.  
isolation from cheese, (26) 479.  
notes, (26) 647; (27) 763; (31) 447, 645.  
occurrence in sugar, (26) 505.  
on citrus, (35) 748.  
crated strawberries, (36) 452; (37) 351.  
dead or dormant sugar beets, (33) 246.  
strawberries, (38) 252, 646.  
tomatoes, (34) 53.  
protein synthesis by, (27) 525.  
relation to potato leak, (35) 751.  
relation to temperature, (33) 545.  
rennet in, (31) 34.  
studies, (26) 749; (34) 156; (39) 854; (40) 347.  
treatment, (38) 149.  
sp. on crated strawberries, (35) 458.  
spp., ammonia production by, (36) 221.  
spp. on sweet potatoes, (32) 343.  
spp., physiological studies, (34) 539.
- Rhizosphaera kalkhoffii** n.n. on spruce, (32) 150.
- Rhizostibella rubra** n.g. and n.sp., description, (33) 647.
- Rhode Island**—  
College, notes, (26) 300, 900; (27) 199; (29) 399; (30) 699; (31) 697; (37) 99; (39) 600.  
Reds, see Fowls.
- Station**—  
financial statement, (26) 795.  
list of publications, (26) 795.  
notes, (26) 300, 900; (27) 199, 494, 600; (28) 94, 196, 600; (29) 399, 700; (30) 699; (31) 100, 697; (32) 398; (34) 296, 900; (37) 300; (38) 400, 900; (39) 400; (40) 298.  
publications, (37) 96.  
report, (30) 598; (33) 398; (35) 299; (38) 398; (40) 198.  
report of director, (26) 795.
- Rhodes grass**—  
analyses, (30) 565.  
culture, (34) 694.
- culture**—  
experiments, (28) 735; (30) 434, 632.  
in Philippines, (26) 361; (30) 233.  
Porto Rico, (29) 631.  
Texas, (40) 730.  
under irrigation, (33) 228.  
for hay and pasture, (37) 644.  
hay, digestibility and productive value, (37) 865.  
hay, mineral constituents, digestibility, (40) 769.
- Rhodes grass**—Continued.  
notes, (27) 528; (29) 428.  
root system, (36) 438.
- Rhodnius prolixus**, transmission of trypanosomes by, (30) 853.
- Rhodochlorogon**, isolation from air potatoes, (28) 505.
- Rhodochytrium**—  
sp., notes, (30) 647.  
splanthidis, development and cytology, (26) 852.
- Rhododendron**—  
borer, notes, (30) 357.  
lace bug, see *Leptobyrsa* spp.  
tingid, notes, (36) 656.
- Rhododendrons**—  
handbook, (26) 337.  
new, at Kew Gardens, (32) 339.  
new species, (40) 541.  
treatise, (38) 542.
- Rhodoseptoria ussuriensis** n.g. and n.sp., description, (30) 240.
- Rhodosticta onobrychidis** n.sp., description, (35) 454.
- Rhodoxanthin**, mitochondrial origin, (37) 129.
- Rhodymenia palmata**, analyses, (37) 814.
- Rhogadinae** of Philippines, (39) 468, 663.
- Rhogas**—see also Rogas.  
autographae, notes, (28) 253.  
canadensis, notes, (29) 256.  
kitcheneri, notes, (36) 759.  
spp., descriptions, (32) 156.  
terminalis, notes, (36) 60.
- Rhopalocera**, American, mimicry in, (28) 655.
- Rhopalomyia**—  
grossulariae n.sp., notes, (26) 150.  
hypogaea—see also *Diarthronomyia hypogaea*.  
notes, (34) 251.
- Rhopalosiphum**—see also *Aphis*.  
betae n.sp., notes, (29) 454.  
brittenii n.sp., description, (27) 758.  
brittenii, notes, (30) 53.  
hippohaes and *Myzus braggii*, confusion, (34) 357.  
lactucae, notes, (27) 758.  
nymphaeae affecting plums, (34) 550.  
nymphaeae, notes, (28) 854; (37) 461, 562.  
persicae, relation to spinach blight, (39) 551.  
spp., notes, (26) 149.
- Rhopalosma poeyi**, life history, (31) 355.
- Rhopalothrips bicolor** n.g. and n.sp., description, (27) 454.
- Rhopalomyia grossulariae**, notes, (28) 62.
- Rhopobota vacciniana**, see *Eudemis vacciniana*.
- Rhubarb**—  
composition, (34) 255.  
culture, (33) 44; (34) 41; (36) 498.  
culture, treatise, (34) 232.  
curculio, biology, (29) 56.  
diseases, studies, (40) 450.  
fertilizer experiments, (26) 31; (28) 325; (34) 294; (36) 121.  
forcing experiments, (31) 835.  
handling and shipping, (34) 637.  
potato stem borer on, (39) 160.
- Rhus**—  
diversiloba, poisonous principle, (36) 501  
flavones of, (39) 431.  
glabra, notes, (30) 145.  
laurina and *R. diversiloba*, fats from, (38) 202; (39) 27.  
semialata, insect galls on, (38) 764.  
spp., analyses and digestibility, (27) 871; (32) 167.  
toxicodendron, constituents of, (36) 502.  
vernix pollen, toxicity, (31) 280.
- Rhusa grass oil**, distillation, (27) 210.
- Rhusiopathia suum**, studies, (27) 384.
- Rhynchaenus (Orchestes) mangiferae** n.sp., description, (35) 365.
- Rhynchiodesia flavotessellata** n.sp., description, (35) 259.
- Rhynchbites**—  
auratus—  
egg-eating parasite of, (31) 159.  
life history, (34) 361.  
studies, (31) 254.  
bicolor, notes, (32) 651.  
conicus, studies, (39) 363.  
pauillus, notes, (27) 453

- Rhynchites**—Continued.  
 ruber, investigations, (28) 455.  
 ruber, nematode parasite of, (32) 453.  
 spp. in Russia, (34) 857.
- Rhynchophora**—  
 ferruginea in Ceylon, (38) 62.  
 of British India, (37) 765.  
 of northeastern America, treatise, (36) 157.  
 of Philippines, (28) 561.  
 studies, (37) 58; (40) 861.
- Rhynchophorus**—  
 ferrugineus—  
 life history, (26) 654.  
 notes, (27) 858; (29) 653; (30) 660; (33) 154.  
 larvae secretions in cocoon making, (34) 362.  
 palmarum—  
 affecting coconut palms, (29) 858.  
 notes, (26) 354.  
 studies, (39) 468.
- Rhynchosia**—  
 gibba, analyses and digestibility, (27) 871.  
 spp., analyses and digestibility, (32) 167.
- Rhyssa**, studies, (34) 758.
- Rhytisma**—  
 acerinum, host relations, (27) 853.  
 acerinum, studies, (28) 851.  
 punctatum, notes, (34) 843.  
 spp., studies, (28) 852.
- Ribbon cane**, silage from, (39) 272.
- Ribe County Western Agricultural Society**, (30) 134.
- Ribes**—*see also* Currants, Gooseberries, etc.  
 aphid, dark green, notes, (30) 53.  
 as winter host of white pine blister rust, (31) 647.  
 pallidum, fertility of, (31) 225.  
 spp., resistance to pine blister rust, (38) 151.
- Rice**—  
 adulteration, (27) 867.  
 amino acid in, (33) 665.  
 analyses, (27) 140; (31) 65, 863, 864; (34) 560; (37) 363; (38) 67.  
 anatomical studies, (26) 332.  
 and rice cookery, (31) 394.  
 anthocyan pigment in, inheritance, (38) 29.  
 antineuritic vitamins in, (38) 581.  
 artificial cross-pollination, (34) 823.  
 as a food, (26) 865; (29) 865; (36) 464.  
 affected by acids and alkalis and their salts, (34) 31.  
 affected by aluminum salts, (35) 817.  
 an adulterant of flour, (26) 710.  
 host of curlew bug, (27) 162.  
 prepared for food in Bengal, (35) 859.  
 ash analyses, (29) 861.  
 Asiatic, analyses, (28) 360; (29) 865.  
 Asiatic, relation to beriberi, (28) 360.  
 assimilation of—  
 iron by, (32) 427; (36) 431.  
 nitrogen by, (26) 41.  
 nutrients by, (38) 340, 429.  
 bean, description, (31) 739.  
 beer ferment, Indian, analyses, (34) 711.  
 blast, notes, (36) 845; (37) 838; (40) 845.  
 blast, studies, (40) 156.  
 blight, investigations, (27) 47, 248.  
 blooming and associated phenomena in, (32) 130.  
 blooming and fruit development of, (26) 435.  
 borers in Java, (35) 58.  
 borers, studies, (40) 167.  
 bran—  
 analyses, (26) 165, 362, 468, 568, 665, 768; (27) 469; (28) 265, 464, 572; (30) 565; (31) 73, 467, 863; (32) 862; (33) 568, 870; (34) 467, 566, 767; (36) 765; (38) 369; (40) 571.  
 composition, (38) 67.  
 composition and feeding value, (37) 363.  
 digestibility, (31) 863; (37) 678.  
 effect on fertilizing value of oil cakes, (26) 428.  
 for pigs, (39) 478.  
 nicotinic acid in, (29) 263; (31) 714.  
 oryzanin in, (28) 168.  
 preservation as press cake, (40) 614.  
 protective rôle in rice diet, (28) 279.  
 relation to polyneuritis, (28) 564.  
 silica, estimation, (40) 610.  
 branching, (28) 445; (30) 638.
- Rice**—Continued.  
 breeding experiments, (26) 435; (33) 234; (37) 827; (38) 526, 635; (40) 631.  
 breeding experiments, plots for, (40) 336.  
 breeding, notes, (40) 523.  
 broadcasting v. transplanting, (27) 638.  
 brusone, notes, (28) 647.  
 bug, notes, (40) 261.  
 by-products—  
 analyses, (28) 464.  
 composition, (26) 468; (37) 363.  
 feeding value, (26) 468; (27) 469; (40) 875.  
 for pigs, (36) 768; (39) 174, 674.  
 inositol phosphoric acids of, (39) 14.  
 mineral constituents, digestibility, (40) 769.  
 notes, (31) 834.  
 carbon, use in sugar manufacture, (39) 113.  
 caterpillar, notes, (30) 252.  
 chop, analyses, (34) 467.  
 classification, (29) 535; (31) 137.  
 cleaning and polishing industry in United States, (30) 791.  
 coating and polishing, (27) 64; (28) 459.  
 coating, effect on neuritis production, (29) 865.  
 composition—  
 and dietetics of, (32) 252.  
 as affected by fertilizers, (29) 231.  
 at various stages of growth, (34) 435.  
 consumption in Philippines, (36) 532.  
 cooking quality as affected by polishing, (31) 163.  
 copper sulphate for, (39) 235.  
 correlation in, (36) 531; (37) 141.  
 critical period of growing season, (39) 811.  
 cultivated, origin, (33) 428; (35) 34.  
 culture, (30) 638; (31) 855; (32) 226; (38) 236.  
 culture—  
 by machinery, (30) 437.  
 dapoq method, (34) 631.  
 dry-land, (39) 423.  
 experiments, (26) 233; (27) 534, 638; (28) 633; (29) 224, 830; (30) 228, 434, 525, 730, 828; (31) 733, 738; (32) 136, 227, 730; (34) 231; (35) 31, 337; (36) 31, 532, 823, 824, 825; (38) 230, 336, 337, 453, 526, 527, 635, 735; (39) 229, 230, 437, 529, 632, 738; (40) 228, 231, 332, 336, 523, 625, 825.  
 in Argentina, (37) 823, 830.  
 Belgian Kongo, (28) 835.  
 Brazil, (31) 834.  
 Burma, (31) 529; (34) 227; (40) 632.  
 California, (27) 140; (33) 834.  
 Central Provinces, (31) 137.  
 Ceylon, (31) 632.  
 China, (36) 532.  
 Dutch East Indies, (30) 697.  
 Guam, (37) 729; (40) 328.  
 Guiana, (31) 391.  
 India, (28) 736; (32) 131; (35) 138.  
 Indo-China, (40) 241.  
 Italy, (31) 834.  
 Java, (26) 332; (28) 637.  
 Kongo, (29) 336.  
 Madagascar, (29) 635.  
 New South Wales, (37) 442.  
 Oregon, (32) 827.  
 Philippines, (28) 535; (36) 531, 532; (37) 538.  
 Sacramento Valley, (27) 738.  
 Spain, (32) 41; (35) 230.  
 Uruguay, (31) 42.  
 Vercelli, (34) 435.  
 machine plowing in, (33) 190.  
 minimum temperature limits in, (35) 718.  
 Ráb system, (27) 641.  
 "dead grains" of, (32) 335.  
 detection in wheat flour, (28) 411.  
 diet—  
 effect on gastric digestion, (28) 760.  
 effect on pigeons, (37) 571.  
 relation to beriberi, (27) 461.  
 relation to polyneuritis, (27) 568.  
 vitamin supplement, (39) 667.  
 dietary deficiencies, nature of, (34) 367.  
 disease, notes, (29) 548.  
 diseases—  
 and pests, notes, (37) 247.  
 in Brazil, (32) 238.  
 in India, (33) 846; (36) 448.

## Rice—Continued.

- diseases—continued.  
 notes, (31) 641; (34) 49, 744.  
 studies, (30) 244, 540, 845.  
 distance experiments, (30) 731.  
 distribution of nitrogen in, (36) 269.  
 downy mildew, notes, (35) 49.  
 drainage experiments, (27) 641.  
 drying in storage, (30) 736.  
 dry-land, production, (40) 529.  
 dry-land, variety tests, (40) 823.  
 effect on intestinal flora, (40) 867.  
 examination, (28) 357.  
 examination and food value, (30) 665.  
 false smut, notes (29) 445.  
 fat, hemolytic action of, (26) 156.  
 feed meal—  
 acidity, (32) 259.  
 analyses, (26) 165; (33) 870.  
 effect on milk production, (26) 273.  
 methods of analysis, (29) 311.  
 feeds, analyses, (29) 467.  
 fermented, liquor from, (29) 118.  
 fertilizer experiments, (26) 42, 232, 233; (27) 135, 336, 337, 435, 534, 637, 638, 641; (29) 228, 830; (30) 34, 229, 339, 420, 622, 730, 736; (31) 133, 733, 736; (32) 41, 136, 217, 721; (33) 32, 227; (35) 31, 32, 337; (36) 332, 532; (37) 338, 529, 539, 729, 823, 824, 825; (38) 337, 424, 433, 527, 635, 735; (39) 230, 427, 529, 537, 738, 817; (40) 228, 231, 336, 523, 625, 626, 825.  
 field fly, notes, (38) 363.  
 fields as a factor in control of malaria, (37) 565.  
 flour—  
 analyses, (26) 768, 873.  
 availability of nitrogen in, (26) 124; (27) 723.  
 medicinal value, (29) 865.  
 recipes, (39) 871.  
 use in bread making, (33) 260.  
 food value, (30) 557.  
 for growing chicks, (38) 677.  
 germ, composition, (26) 502.  
 germinability in relation to temperature and humidity, (37) 736.  
 germination energy of, (29) 538.  
 germination studies, (29) 740; (30) 437; (31) 529; (38) 24.  
 gluten meal, analyses and feeding value, (32) 266.  
 grading, (34) 560.  
 grains, disintegration by caustic potash, (31) 834.  
 grains, weight of, (36) 531.  
 grasshopper, control, (28) 249.  
 grasshopper, studies (27) 55.  
 green-manuring experiments, (36) 232; (38) 220, 336; (40) 336.  
 ground—  
 analyses, (31) 65.  
 digestibility and productive value, (37) 865.  
 purified, analyses, (29) 666.  
 rough, analyses, (26) 468.  
 growth as affected by alkali salts, (30) 630, 728, 833.  
 growth on calcareous soils, (31) 627, 816.  
 hay and straw, mineral constituents, digestibility, (40) 769.  
 hay, digestibility and productive value, (37) 865.  
 head-to-the-row test, (32) 230.  
 host plant of corn billbug, (26) 862.  
 hull carbon, use in sugarhouse work, (37) 806.  
 hull content, calculating, (37) 363.  
 hulled, volume weight and grain characteristics, (37) 643.  
 huller and polisher, tests, (27) 234.  
 hulling waste product as a feeding stuff, (35) 271.  
 hulls—  
 analyses, (34) 467.  
 burnt, fertilizing value, (30) 731.  
 composition and feeding value, (38) 67.  
 composition and use, (27) 727.  
 determination in feeding stuffs, (29) 810.  
 feeding value, (39) 272.  
 for chicks, (37) 768.  
 ground, analyses, (26) 468; (38) 369.  
 husking in variety tests, (30) 236.  
 hybridization, (26) 733; (38) 236, 526, 635.  
 hybrids, transmission of characters in, (26) 435.  
 Ilocano and Tagalog, selection, (40) 336.  
 imports into United States, (34) 435.

## Rice—Continued.

- improvement, (26) 438; (28) 736; (33) 234  
 industry in Cochin China, (28) 535.  
 industry, statistics, (26) 468.  
 inflorescence of, (34) 531.  
 inheritance of characters, (40) 631.  
 inheritance of flowering time in, (35) 329.  
 inhibitor in, (40) 632.  
 insects affecting, (30) 753; (33) 856; (34) 652; (37) 847; (38) 257, 460; (39) 862.  
 irrigation, (27) 140, 638; (33) 337; (34) 282; (37) 483, 883.  
 irrigation in southern states, (28) 888.  
 judging and study in high schools, (33) 39  
 kernel protein, hydrolysis products of, (33) 867.  
 konda, analyses, (27) 469.  
 leaf disease, notes, (36) 247.  
 leafhopper, studies, (39) 862.  
 liming experiments, (39) 537; (40) 229.  
 loss in weight after harvesting, (38) 635.  
 malting capacity, (40) 808.  
 manuring, (28) 637.  
 meal—  
 acidity, (35) 770.  
 analyses, (26) 267, 363, 568; (27) 570; (28) 265; (29) 367; (30) 67; (31) 73, 366, 467; (32) 465, 862; (33) 170; (34) 263; (38) 572, 666.  
 effect on milk and butter, (34) 570.  
 effect on pigs, (33) 775; (36) 69, 83, 180, for pigs, (33) 761.  
 milled, standards, (39) 871.  
 milling, (34) 559; (37) 363.  
 milling—  
 and by-products, (38) 67, 477.  
 industry in United States, (31) 66.  
 processes, (26) 468.  
 products, analyses, (31) 163.  
 moth, notes, (34) 754.  
 nematodes affecting, (31) 145.  
 new varieties, descriptions, (37) 831.  
 new varieties from Japan, (31) 529, 632.  
 notes, (26) 362.  
 nutritive value and preparation, (31) 855.  
 of Bihar and Orissa, chemical study, (36) 463.  
 of Lower Burma, (35) 230.  
 of Siam, composition, (30) 834.  
 oil and fat, chemistry of, (33) 506.  
 oil, studies, (30) 665.  
 on Yuma project, notes, (40) 434.  
 organic phosphoric acid of, (32) 712.  
 phosphorus and nitrogen content, (26) 865.  
 phosphorus content, (27) 461.  
 pink, heredity in, (40) 632.  
 plats for breeding, (40) 336.  
 polish—  
 analyses, (26) 468, 568, 665, 768; (27) 469; (28) 464, 572; (30) 565; (31) 73, 366, 863; (32) 862; (33) 870; (34) 263, 467; (36) 65, 765; (38) 369; (40) 571.  
 analyses and feeding value, (38) 477.  
 ash analyses, (29) 861.  
 composition and feeding value, (37) 363.  
 digestibility, (31) 863; (37) 678.  
 oil from, (39) 109.  
 polished—  
 and vitamin as a complete food, (32) 67.  
 composition, (29) 565.  
 effect on the brain, (27) 365.  
 nutritive value, (36) 158.  
 use in Philippines, (28) 760; (33) 261.  
 polishings—  
 chemistry of, (33) 564.  
 extract, use against beriberi, (34) 367.  
 phosphotungstate precipitate, (33) 167.  
 use as porridge, (31) 258.  
 vitamin-fraction from, (29) 664.  
 vitamins in, (30) 285.  
 pollination, (36) 527.  
 pollination—  
 and cross-fertilization in, (29) 522; (32) 830.  
 studies, (33) 234.  
 popped, production in China, (40) 557.  
 preparation, (27) 66.  
 preparations, effect on quality of dough, (26) 761.  
 production—  
 and uses, (27) 739; (39) 838.  
 in the Americas, (38) 34.

## Rice—Continued.

- production—continued.  
 in United States, (26) 293; (27) 739.  
 1918 program, (38) 836.  
 products, analyses, (32) 169, 568.  
 proteins, (27) 166.  
 proteins, nutritive value, (39) 665, 666.  
 proteins, reagent for, (29) 881.  
 puffed, analyses, (30) 68.  
 rate of seeding tests, (27) 637, 638.  
 red, control, (39) 529.  
 red, eradication, (37) 532.  
 region, meteorological service, (39) 718.  
 relation to beriberi, (26) 155; (28) 168, 569; (29) 269, 460; (31) 463, 555, 858.  
 relation to polyneuritis, (28) 567.  
 root rot, studies, (29) 447.  
 rotation experiments, (33) 32.  
 salt as fertilizer for, (32) 324.  
 salt water, tests, (30) 233.  
 sampling and grading, (39) 871.  
 sclerotal diseases, (40) 48.  
 screenings, analyses, (27) 774.  
 seed—  
 coats, thickness, (39) 826.  
 germination tests, (27) 534.  
 light v. heavy, (26) 435.  
 selection, (30) 233, 338, 437; (37) 538, 539, 824.  
 selection tests, (40) 523.  
 seeding and transplanting, (36) 532.  
 seeding experiments, (29) 830; (30) 525; (37) 532, 824.  
 seedlings, transplanting, (38) 527.  
 selection experiments, (38) 526, 527; (40) 336, 523, 623.  
 smut, description and bibliography, (35) 247.  
 smut, notes, (29) 245; (35) 243.  
 soil aeration, (38) 828.  
 soils of Hawaii, studies, (30) 420.  
 soils, swamp, gases of, (39) 517.  
 spacing experiments, (36) 532.  
 spets or hulls, determination in rice feed meal, (26) 714.  
 spike disease, notes, (38) 848.  
 starch—  
 content, (35) 108.  
 determination, (26) 709.  
 fractional liquefaction, (32) 633.  
 hydrolysis by diastase, (28) 407; (30) 111.  
 notes, (27) 765.  
 studies, (31) 828.  
 stem borer, studies, (35) 659.  
 stored, insects affecting, (30) 655.  
 straight head disease, (35) 350; (39) 529.  
 straw—  
 as mulch for sugar cane, (40) 633.  
 chloroform extract of, (31) 71.  
 composition, (27) 668.  
 digestibility, (27) 669; (34) 72; (37) 168.  
 feeding value, (38) 168.  
 fertilizing value, (30) 731.  
 sulphur and chlorin content, (29) 231.  
 tipulids and tabanids affecting, (33) 555.  
 transplanted, morphology and development, (37) 643.  
 transplanting, (31) 834; (32) 230; (33) 234; (37) 538, 824, 825; (40) 529.  
 transplanting, Italian method, (34) 36.  
 treatise, (31) 834.  
 ufra disease—  
 notes, (29) 445; (39) 146.  
 studies, (28) 151; (30) 49; (38) 351, 547; (40) 48.  
 treatment, (36) 348, 349.  
 unhusked, relation to beriberi, (32) 67, 579.  
 upland, culture, (37) 539.  
 use by diabetics, (28) 861.  
 in bread making, (34) 460; (40) 360, 657.  
 in diet, (27) 664.  
 in various countries, (29) 865.  
 varieties, (27) 135, 137, 140, 534, 637, 638, 641, 738; (28) 533, 736; (29) 228, 830; (30) 229, 233, 435, 525, 730, 736; (31) 42, 133, 733, 736; (32) 136, 226, 630, 729; (33) 130; (34) 36; (35) 31; (36) 737; (37) 532, 729, 824, 825, 826; (38) 229, 230, 336, 337, 433.  
 varieties—  
 adapted to deep water, (38) 741.  
 differentiating, (32) 633.  
 in India, (26) 536.  
 Madras, (40) 523.

## Rice—Continued.

- varieties—continued.  
 in Philippines, (36) 531.  
 Yamethin district, Burma, (29) 736.  
 variety tests, (39) 230; (40) 228, 242, 332, 336, 523, 625, 823, 825.  
 waste, composition and use, (27) 727.  
 water culture experiments, (30) 832.  
 water requirement, (32) 127.  
 water weevil—  
 habits and remedies, (29) 259.  
 investigations, (27) 562.  
 remedies, (33) 257; (37) 568.  
 weather injuries in Italy, (37) 50.  
 weevil—  
 as affected by Roentgen rays, (28) 57.  
 egg laying habits, (31) 655.  
 in stored cereals, (39) 463, 862.  
 life history and remedies, (28) 455; (31) 354.  
 notes, (26) 453; (27) 657; (28) 158; (29) 458; (30) 655; (31) 57; (34) 754.  
 on stored corn, (40) 861.  
 remedies, (27) 258.  
 studies, (37) 356; (40) 752.  
 wild, cultivation by Indians, (38) 34.  
 wild, ergot of, (34) 444.  
 wild, in tropical Africa, (26) 438.  
 wilt disease, notes, (28) 647.  
 withering of panicle in, (33) 850.  
 worm, notes, (34) 250.  
 xenia in, (32) 230; (40) 632.  
 yellow grains in, cause, (33) 548.  
 yield as affected by deep plowing, (35) 527.  
 yields, determination, (37) 634.  
 Richardsonia (scabra) glabra, culture, (30) 335.  
 Richweed, toxicity, (38) 685, 883.  
 Ricin—  
 agglutinating properties, (31) 773.  
 and its antitoxins, (32) 78.  
 chemical and biological properties, (31) 774.  
 chemical nature and preparation, (30) 204.  
 detection in feeding stuffs, (34) 467.  
 detection in feeds, (30) 204.  
 notes, (26) 676.  
 Ricinus—see also Castor beans.  
 communis for sheep, (26) 368.  
 diseases, notes, (29) 243.  
 poisoning, studies, (34) 466.  
 Rickets—  
 prophylactic therapy, (39) 772.  
 relation to diet, (26) 264; (29) 464; (39) 568.  
 review of investigations, (36) 363.  
 studies, (39) 568, 589.  
 summary and digest of data, (36) 161.  
 Rickia n.spp., descriptions, (27) 460.  
 Rictularia splendida n.sp., description, (32) 185.  
 Riley—  
 n.sp., description, (36) 557.  
 synopsis of species, (40) 760.  
 Rinderpest—  
 antiserum—  
 immune bodies in, (28) 881.  
 preparation, (28) 881.  
 production, (31) 283.  
 atypical, in carabao, (31) 677; (36) 181.  
 blood, virulency in water leeches, (33) 876.  
 chemotherapy, (32) 82.  
 control in island of Panay, (29) 582.  
 control in Philippines, (28) 782.  
 feeding and immunity in, (26) 374.  
 immune bodies, destruction by heat, (32) 476.  
 immune bodies, precipitation, (28) 881.  
 immunization, (26) 377, 578, 676; (31) 283; (32) 580; (35) 487, 784; (37) 480; (38) 484, 888; (39) 81.  
 immunization, use of organ extracts in, (39) 684.  
 in cattle and carabaos, symptoms, (28) 781.  
 Philippine cattle, (39) 684.  
 swine, (37) 79; (38) 80.  
 swine, immunization, (38) 287.  
 notes, (30) 79.  
 outbreak in Davao, (26) 286.  
 peculiar bodies in erythrocytes, (30) 181.  
 prevalence in—  
 east Asia, (26) 377.  
 Formosa, (27) 378.  
 Philippines, (26) 377; (27) 380.  
 relation to coccidiosis in cattle and carabaos, (35) 76.  
 review of literature, (30) 683; (31) 177.  
 studies, (36) 779.  
 transmission experiments, (31) 677; (35) 487.

## Rinderpest—Continued.

- treatment, (28) 82; (35) 784; (39) 489.
- virus, cultivation in vitro, (31) 677.
- virus, culture experiments, (33) 180.
- virus, vitality outside the animal body, (38) 785.

## Ringworm—

- in horses, studies, (28) 184; (38) 83.
- treatment, (35) 279.

## Rio Grande—

- bird reservation, (38) 555.
- flood, (26) 614.
- waters of, (38) 386.

## Ripersia—

- resinophila n.sp., description, (35) 358.
- theae n.sp., notes, (34) 652.

## Riptortus spp. affecting tea, (34) 652.

## River—

- and harbor improvements in Ohio, (35) 83.
- bank experimental road, (29) 85.
- bed materials, evaporation from, (37) 785.
- control in Colorado River Delta, (28) 484.
- discharge—
  - correction for changing stage, (33) 777.
  - determination, (32) 382.
  - handbook, (29) 487; (33) 287; (37) 484.
  - measurements under ice conditions, (29) 813.
- engineering, treatise, (32) 481.
- gauge stations in United States, (34) 84.
- measurement, *see* Stream flow measurement.
- mud, analyses, (30) 223; (32) 424; (36) 27.
- observers, instructions to, (34) 509.
- regulation, treatise, (34) 885.
- stages, daily, (38) 590; (40) 209.
- valleys, air drainage in, (27) 413.

## Rivers—

- African, desiccation, (38) 15.
- gaging, (31) 383.
- in California, notes, (29) 415, 510, 812; (30) 713.
- of Sacramento and San Joaquin watersheds, (26) 27, 214, 614.
- transportation of mud by, (27) 511.
- water level in, (33) 322.

## Rizoberlesia trifolii, notes, (31) 848.

## Roaches—

- common house, as carriers of disease, (30) 156.
- remedies, (27) 55; (32) 650.
- tropical, notes, (28) 351.

## Road—

- aggregates, broken stone, (39) 494
- binders, asphalt, specifications, (30) 290.
- bonds, (34) 190.
- bonds, court decisions concerning, (29) 183.
- building rock, tests, (34) 684, 890; (35) 685; (39) 493.
- building, use of explosives in, (26) 91.
- concrete, hydrated lime in, (40) 788.
- departments, organization, (33) 782.
- dragging contest in Saskatchewan, (37) 695.
- drags and their use, (31) 486.
- drags, construction and use, (34) 684.
- engineering, hand level for, (33) 393, 688.
- engineering in Louisiana, (31) 684.
- grading, use of traction engines in, (26) 685.
- gravels in Iowa, (38) 692.
- improvement, rôle of traffic census in, (28) 684.
- law in—
  - Arizona, (27) 890.
  - Connecticut, (26) 891.
  - Kansas, (31) 289.
  - Missouri, (31) 590.
  - New Jersey, (26) 891.
  - New York, (37) 590.
  - Ohio, (27) 790; (35) 493, 583.
- laws in—
  - Alabama, (36) 386.
  - Iowa, (28) 382; (31) 289; (35) 493; (37) 386.
  - Kentucky, (36) 187.
  - Maine, (37) 289.
  - Minnesota, (32) 385; (38) 789.
  - Oklahoma, (36) 285.
  - Ontario, (32) 885.
  - Oregon, (35) 789.
  - United States, (26) 89; (34) 390; (36) 384.
  - Washington, (31) 385.
  - West Virginia, (34) 684.
- machinery—
  - cost of operation, (34) 484.
  - description, (26) 635; (28) 486.

## Road—Continued.

- machinery—continued.
  - notes, (33) 189, 688.
  - specifications, (33) 289.
- making, treatise, (26) 789.
- materials—
  - bituminous, methods of examination, (34) 318.
  - bituminous, toughness, (37) 885.
  - in Alabama, (26) 891.
    - Canada, (36) 586.
    - Coshocton Co., Ohio, (27) 688.
    - Europe, testing, (27) 688.
    - Florida, (29) 387.
    - Minnesota, (34) 485.
    - Missouri, (27) 688.
    - New York, (33) 782.
    - North Carolina, (33) 688, 780.
    - Ohio, (32) 485.
    - Oklahoma, (27) 291.
    - Wisconsin, (34) 86.
  - nonhomogeneous, specific gravity, (36) 683.
  - physical properties, (35) 84.
  - resources of Minnesota, (26) 385.
  - specifications, (27) 386; (38) 87, 289; (39) 591, 793.
  - tests, (27) 587; (35) 390; (37) 386, 695; (38) 87.
  - models, (33) 393.
  - models of Office of Public Roads, (28) 890.
  - oil inspectors, charts for, (38) 492.
  - oil, tests, (29) 687.
  - pavements, tests, (29) 182.
  - regulations in Ontario, (37) 489.
  - river bank experimental, (29) 85.
  - rollers in Netherlands, (30) 290.
  - rolling, disadvantages of, (30) 888.
  - sections, standard, (38) 189.
  - standards in Iowa, (31) 890.
  - surfacing blocks, tests, (30) 689.
  - surfacing sand-clay mixtures for, (31) 289.
  - surveying in Queensland, (34) 890.
  - sweepings, analyses, (32) 219.
  - system, county, designing, (35) 492.
  - system, county, engineering cost, (37) 386.
  - systems of foreign countries and of the several States, (29) 890.
  - tar fumes, effect on vegetation, (35) 734.
  - tars, naphthalene in, (26) 188.
  - tars, pitches, etc., specifications and definitions, (35) 888.
  - terms, glossary, (31) 90.
  - transportation, application of power to, (31) 90.
- Roadrunner, food habits, (37) 156.
- Roads—*see also* Pavements.
  - Abney hand level for, (33) 688.
  - administration, (33) 290.
  - administration—
    - in Arizona, (36) 386.
    - California, (35) 82.
    - Colorado, (27) 291.
    - Georgia, (27) 687.
    - Idaho, (28) 890; (35) 789.
    - Illinois, (38) 289.
    - Iowa, (34) 683; (36) 587.
    - Kansas, (33) 695; (34) 788.
    - Kentucky, (35) 492.
    - Maine, (33) 889; (36) 587.
    - Maryland, (35) 492, 686; (37) 787.
    - Massachusetts, (34) 587.
    - Michigan, (33) 486.
    - Minnesota, (26) 385; (27) 190; (33) 588; (37) 590.
    - Nebraska, (33) 888.
    - New Jersey, (34) 484.
    - New Mexico, (36) 284; (38) 689.
    - New York, (33) 398; (35) 288; (36) 489.
    - North Carolina, (33) 780.
    - North Dakota, (33) 683; (37) 84.
    - Nova Scotia, (35) 789.
    - Oklahoma, (37) 385.
    - Ontario, (33) 289; (34) 890; (37) 385; (38) 789.
    - Oregon, (34) 684; (35) 389.
    - Pennsylvania, (34) 587.
    - Rhode Island, (35) 288.
    - Texas, (30) 591.
    - United States, (26) 890.
    - Utah, (27) 291; (36) 284.
    - Victoria, (35) 493; (36) 889.
    - Virginia, (35) 188.
    - Washington, (35) 686; (36) 889.

## Roads—Continued.

- administration—continued.
  - in West Virginia, (36) 284.
  - Wisconsin, (37) 590, 695.
  - Wyoming, (29) 84.
  - papers on, (34) 390.
- advantages to rural life, (27) 587.
- and pavements, textbook, (28) 84.
- Arbor Day, (29) 695.
- as affected by calcium chlorid, (30) 486.
- as affected by traffic, (28) 684.
- bibliography, (28) 486.
- binding experiments, (27) 587, 789.
- bitumen bound broken stone, construction, (30) 888.
- bituminous—
  - macadam, construction, (36) 384.
  - macadam, construction field books for, (35) 389.
  - macadam, in Rhode Island, (32) 884.
  - materials for, (27) 291.
  - paper on, (26) 890.
  - surface treatments, (33) 782.
- brick, (35) 686.
- brick—
  - and concrete, maintenance, (34) 484.
  - construction, (30) 86.
  - in Middle West, (40) 888.
  - monolithic, construction, (34) 586.
  - specifications, (30) 87.
  - surfaced, in King County, Washington, (33) 781.
  - surfacing for, (28) 890.
- construction, (27) 292; (29) 86; (30) 888; (34) 890; (36) 90, 187.
- construction and maintenance, (26) 385; (27) 189, 190, 386, 484, 587, 688; (33) 889; (34) 287; (35) 84, 686; (37) 89; (38) 289; (40) 90, 188, 387, 485, 788, 889.
- construction and maintenance—
  - in Nebraska, (29) 289.
  - North Carolina, (28) 485; (29) 687.
  - Ohio, (32) 485.
  - Oregon, (28) 485.
  - papers on, (29) 291.
- construction—
  - and repair, (31) 385, 685.
  - bonds for, (38) 592.
  - chart for, (35) 789.
  - economic factors in, (32) 686.
  - economics of, (33) 688.
  - Federal aid for, (37) 89, 188; (35) 686.
  - financing, (33) 782.
  - gravel for, (37) 288.
  - in Colorado, (27) 789.
  - Florida, (29) 387.
  - Hawaii, (32) 788; (37) 384.
  - Michigan, Wayne Co., (37) 385.
  - mountain country, (32) 884.
  - National Forests, (37) 547.
  - New Jersey, (33) 686.
  - New Mexico, (26) 892.
  - Ontario, (36) 889.
  - Scotland, (31) 90.
  - swamps, (33) 189.
  - the Ozarks, (37) 695.
  - United States, Federal aid, (39) 493.
  - Wisconsin, (38) 87.
- treatise, (26) 285, 393; (28) 382; (37) 590; (38) 592.
- with convict labor, (27) 484, 588; (36) 386; (38) 789.
- cost keeping (39) 794.
- cost of construction, (29) 387.
- cost of construction and maintenance, (29) 890.
- county, economic survey, (36) 187.
- curve tables, (38) 289.
- demonstration, at Texas College, (36) 386.
- design and construction, (29) 182; (31) 590.
- distribution of traffic on, (36) 188.
- drainage, (33) 688, 782; (39) 687.
- drainage and subgrades for, (35) 390.
- drainage methods and foundations, (40) 291.
- dust prevention, (30) 884; (38) 87.
- earth—
  - and sand-clay, construction, (34) 684.
  - construction and maintenance, (36) 787.
  - sand-clay, and gravel, (36) 786.
  - treatise, (32) 85.
- economy of various types, (34) 484.

## Roads—Continued.

- effect of grade and surface on tractive force, (28) 383.
- estimates for in hilly country, (30) 588.
- experimental, (30) 386.
- experimental, in Ohio, (28) 786.
- financing, (28) 186.
- forest, construction, (31) 185.
- grading and improvement, information for bidders, (34) 685.
- gravel and sand clay, (33) 782.
- gravel construction, (36) 386.
- heavy traffic, pavements for, (33) 290.
- improved, value, (27) 890.
- improvement, (26) 890; (36) 386.
- improvement—
  - economics of, (34) 788; (36) 386.
  - illustrated lecture, (37) 598.
  - in Alabama, (26) 891.
  - Connecticut, (26) 891.
  - Illinois, (26) 891.
  - Maine, (26) 891.
  - Maryland, (27) 588.
  - Missouri, (26) 891.
  - New Jersey, (26) 891.
  - Oklahoma, (27) 291.
  - South Carolina, (27) 190.

  - rural life, (37) 89.
  - tire width and weight of load, (33) 782.

## Roads—Continued.

- rural post, Federal aid to, (35) 200.  
 sand-clay—  
   and topsoil, for North Carolina, (33) 688.  
   construction and maintenance, (31) 890.  
 sand, hay, and tar mats for, (39) 87.  
 specifications, (29) 487.  
 standard cross sections for, (31) 890.  
 state administration and control, (40) 688.  
 state management, (33) 290; (34) 788.  
 state, of New York, (27) 386.  
 subcrust movement in, prevention, (31) 785.  
 superelevation of curves, (29) 487; (34) 86.  
 surface oiling of, (35) 288.  
 surfacing, (28) 186.  
 survey and plans for, (33) 782.  
 surveying, (36) 889.  
 surveying and mapping, (33) 688.  
 tarred, effect on vegetation, (26) 432; (27) 30,  
   333, 635; (28) 38, 129; (31) 827.  
 tarred, in France, (27) 190.  
 tarring, (30) 588.  
 textbook, (35) 583.  
 tire widths for, (35) 789.  
 traction resistances, (36) 388, 490; (38) 491.  
 traffic census data, (37) 188.  
 traffic factors, (33) 289.  
 treatise, (27) 687; (31) 90, 685; (33) 393.  
 vitrified brick pavements for, (33) 686.  
 wagon tire width for, (36) 787.  
 yearbook, (28) 486; (29) 388; (35) 583; (37) 590.
- Roadside planting in relation to landscape garden-  
 ing, (39) 449.
- Roaring—  
 etiology, (29) 500.  
 in horses, (31) 585.  
 in horses, treatment, (26) 185; (29) 83; (34) 576.  
 treatment, (27) 188, 576.
- Robin—  
 agglutinating properties, (31) 774.  
 notes, (26) 676.  
 occurrence in locust seeds, (30) 204.  
 toxicity, (31) 774.
- Robinia pseudacacia—  
 as affected by tarring roads, (26) 432.  
 as coffee substitute, (40) 508, 658.  
 poisoning of horses by, (30) 785.  
 poisonous constituent of bark (31) 774.
- Robins—  
 coccidiosis in, (26) 187.  
 economic importance, (31) 349.  
 feeding habits, (32) 648; (38) 457.
- Roborin, feeding value, (29) 467.
- Rochelle salts, toxicity, (28) 661.
- Rock—  
 asphalts of Oklahoma, (29) 591.  
 fertilizers, ground, tests, (30) 327.  
 for road building, *see* Road materials.  
 gardens, treatise, (31) 743.  
 phosphate, *see* Phosphate.  
 potash fertilizer, tests, (32) 518.  
 road-building, tests, (34) 684, 890.
- Rockefeller Institute for Medical Research—  
 papers, (31) 277.  
 studies from, (33) 279.
- Rockeries, making and planting, (39) 245.
- Rockfoils, treatise, (34) 45.
- Roofs—  
 aluminum silicate, of Madagascar and West  
 Africa, (32) 511.  
 availability of plant food in, (31) 621.  
 cementing material, plant food value, (27) 513.  
 crystalline, soils from, (27) 415.  
 for road building, (35) 84, 685; (37) 386.  
 grinding, (27) 500.  
 ground, fertilizing value, (27) 500; (28) 33.  
 microscopic method of analysis, (35) 84.  
 of United States, analyses, (34) 222.  
 potash-bearing, in Wyoming, (26) 623.  
 relation to plant food constituents of resultant  
 soils, (28) 622.  
 silicate, potash salts from, (31) 321.  
 solubility of chemical constituents, (28) 812.  
 weathering, (29) 123.
- Rockweed, analyses, (32) 32.
- Rodent—  
 disease, transmissible to man, (33) 450; (34) 355.  
 pests of the farm, (39) 460.  
 plague, relation to human infection, (34) 355.
- Rodents—*see also* Rats, Mice, etc.  
 control in Colorado, (34) 651.  
 destruction, (27) 52, 784; (37) 558.

## Rodents—Continued.

- destruction on ships, (38) 356.  
 destruction with hydrocyanic acid gas, (35) 53.  
 destructive, notes, (29) 793.  
 effect on reforestation, (29) 545.  
 genus *Aplodontia*, revision, (39) 759.  
 in California, (40) 56.  
 injurious in Canada, (33) 552.  
 injurious to stored products, (39) 161.  
 lengths of intestines, (30) 545.  
 notes, (28) 450; (34) 528.  
 of Colorado, (39) 555.  
 of Iowa, (40) 546.  
 parasitic acari on, (33) 159.  
 plague affecting, in Suffolk and Essex, (26) 461.  
 plague-like disease affecting, (26) 461.  
 prevalence in Colorado, (30) 249.  
 relation to bubonic plague, (27) 754.  
 relation to poliomyelitis, (36) 354.  
 remedies, (31) 846, 848.  
 supergeneric groups, (40) 54.
- Roemeria hybrida*, analyses, (33) 466.
- Röntgen rays—  
 effect on—  
   bacterial diseases, (38) 481.  
   blood, (40) 767.  
   chickens, (31) 369.  
   cigarette beetle, (29) 359; (35) 554; (40) 758.  
   fermentation, (27) 231.  
   formation of antibodies, (35) 679.  
   fungi, (38) 855.  
   germination and growth of plants, (35) 436.  
   germination of seeds, (28) 128.  
   growth of young animals, (31) 664.  
   insects, (28) 57.  
   Lepidoptera, (27) 656.  
   metabolism in lymphatic leukemia, (37)  
   267.  
   microorganisms and ferments, (27) 225.  
   ovaries, (32) 466.  
   plant and animal tissues, (30) 729.  
   seeds of *Vicia faba*, (34) 334.  
   testes of rats, (26) 354.  
   thymus and reproductive organs, (38) 268.  
   tubercle bacilli, (40) 887.  
   vegetation, (33) 31.  
   use against tumors, (29) 476.
- Roeselia antiqua*, parasitic on gipsy moth, (31) 652.
- Roeselia—  
 hypogea, notes, (26) 750.  
 pallida, notes, (36) 851.
- Roestelia—  
 aurantiaca, notes, (29) 547.  
 cancellata, studies, (37) 250.
- Rogas—*see also* Rhogas.  
 laphygmae n. sp., description, (30) 60.  
 n. spp., descriptions, (38) 165.
- Rollers, cement, construction, (29) 688.
- Rollinia—  
 classification, (36) 433.  
 notes, (31) 339.
- Rollinopsis n. g. and n. spp. from Brazil, (36) 220.
- Romatxankalk in animal metabolism, (26) 469.
- Roof paints, tests, (35) 189.
- Roofing—  
 materials for rural structures, (36) 590.  
 metallic, as affected by smoke, (33) 428.
- Roofs, masonry, (36) 399.
- Roobloem, life history, (26) 440.
- Rook, feeding habits, (36) 354.
- Roosevelt Wild-life Forest Experiment Station,  
 (40) 800.
- Roosting closets, notes, (26) 572.
- Root—  
 aphids, nematode parasite of, (35) 658.  
 beer, alcohol content, (35) 557.  
 borers in West Indian soils, (28) 858; (29) 858;  
 (30) 554.  
 cellar, concrete, description, (27) 893.  
 cellar, description, (33) 783.  
 cellars for prairie farms, (35) 690.  
 crop diseases in Saxony, (32) 749.  
 crop diseases, notes, (29) 242.  
 crop seeds in Denmark, (37) 742.  
 crop seeds, production in Sweden, (39) 644.
- Roots—  
 accuracy of dry-matter determinations, (29)  
 310.  
 analyses, (26) 369.  
 as affected by soils, (29) 577.  
 boric acid for, (39) 730.  
 breeding experiments, (40) 735.

- Root—Continued.  
 crops—continued.  
   combined fungus attacks on, (35) 245.  
   cooking, (29) 566.  
   culture, (34) 630; (39) 834.  
 crops, culture—  
   continuous, (31) 226.  
   experiments, (29) 431; (30) 632; (33) 227; (36) 228; (37) 732, 733; (38) 133, 634; (40) 228, 625.  
   for fall and winter use, (33) 34.  
   for winter forage, (38) 735.  
   in Brazil, (29) 428.  
   Dutch East Indies, (30) 697.  
   Nebraska, (40) 521.  
   Philippines, (34) 635.  
   South Australia, (34) 341; (35) 835; (38) 540; (40) 340.  
   South Dakota, (40) 32.  
   Sweden, (34) 431.  
   on moor soils, (38) 132; (40) 230, 523.  
 crops—  
   dry matter content, (26) 436; (34) 865.  
   feeding to breeding animals, (26) 95.  
   feeding value, (38) 665; (40) 32.  
   fertilizer experiments, (26) 629, 725; (28) 828; (30) 229, 626.  
   field tests in Philippines, (40) 228.  
   for cows, (29) 577.  
   forage, (28) 41.  
   seed, field tests, (39) 437.  
   work horses, (33) 471.  
   insects affecting, (28) 248; (30) 53; (34) 651.  
   irrigation experiments, (28) 828.  
   liming experiments, (36) 27.  
   "May sick" disease of, (30) 399.  
   of Chile, (38) 336.  
   of Philippines, (40) 231.  
   profitableness of production, (29) 89.  
   seed production, (31) 524.  
   seeding experiments, (29) 432.  
   storage, (26) 95.  
   treatise, (37) 645.  
   varieties, (26) 424, 725; (28) 828; (29) 427; (30) 229, 435; (31) 829; (37) 228, 533, 733; (38) 31, 333, 432, 634.  
   variety tests, (39) 227, 336, 738; (40) 228, 731.  
   winter storage, (38) 442.  
 development as affected by—  
   fertilizer salts, (29) 328.  
   phosphates, (33) 526.  
 formation and geotropic curvature of stem, (37) 325.  
 gall, cause and treatment, (27) 749.  
 geotropism, relation to starch, (29) 322.  
 growth—  
   as affected by carbon dioxide, (40) 820.  
   as affected by oxygen supply, (40) 30.  
   in swampy meadows, (40) 211.  
   methods for studying, (40) 629.  
   of cuttings, stimulation, (39) 826.  
   of forest trees, (35) 223.  
   periodicity in, (34) 29.  
   soil temperature factor, (40) 130, 426.  
   studies, (39) 122.  
 habits of desert plants, (26) 728.  
 hairs, callose in, (29) 326.  
 hairs, glandular, (37) 222.  
 hairs, production in water, (36) 433.  
 hairs, structure, (28) 814.  
 knot nematodes in Hawaiian Islands, (40) 51.  
 knot, notes, (30) 746.  
 knot, studies, (26) 342.  
 knot, treatment, (32) 842; (34) 245; (37) 453.  
 maggot—  
   injurious to crops in Louisiana, (37) 854.  
   notes, (29) 252, 454; (34) 753; (35) 396.  
   remedies, (33) 62; (36) 657.  
   studies, (37) 566, 599.  
 nodules—  
   of *Ceanothus americanus*, (35) 132.  
   of *Podocarpeae*, (27) 828; (30) 523.  
   studies, (38) 731.  
 parasites, notes, (31) 842.  
 rot, control, (39) 852.  
 rot, treatment, (26) 331.  
 secretions, function of, (31) 221.  
 secretions of plants, (30) 228.  
 structure as affected by—  
   abnormal tension, (32) 825.  
   compression, (32) 825.
- Root—continued.  
 systems of—  
   agricultural plants, (31) 733; (33) 526.  
   cereal and forage crops, (39) 230.  
   desert plants, (30) 827; (39) 29.  
   Indian crops, (39) 230.  
   plants, atlas, (32) 634.  
   plants, development, (34) 727.  
   plants in relation to soil moisture, (31) 514.  
   plants, measurements, (28) 228.  
   tips, permeability, (28) 126.  
 tubercles—*see also* Nodule bacteria.  
   formation, (27) 25; (34) 727.  
   formation as affected by nitrogenous salts, (37) 133.  
   production as affected by nitrates, (35) 634.  
   urease in, (35) 334.  
   variations in, (36) 527.  
 tumors, notes, (27) 544; (31) 841.  
 Rootlets—  
   chemotropism in, (32) 128.  
   secondary, of cereals, (40) 32.  
 Roots—*see also* Plant roots.  
 absorption—  
   and excretion of salts by, (26) 624.  
   of ions by, (34) 334.  
   of nutrients by, (37) 222.  
 adsorption of nitrogen by, (29) 732.  
 aeration experiments, (34) 334.  
 anatomical structure in different media, (37) 431.  
 as affected by anesthetics, (32) 626.  
 as affected by illuminating gas, (34) 243.  
 assimilation of atmospheric carbon by, (38) 329.  
 autotropic readjustment, (28) 430.  
 contractile, structure and function, (33) 724.  
 cooking, (29) 566.  
 determination of dry matter in, (26) 312; (27) 9.  
 edible, use in Surinam, (28) 761.  
 effect on soil structure, (30) 120.  
 ensiled, inoculating with lactic acid bacteria, (32) 767.  
 epidermal cells, (37) 128.  
 excretion of acids by, (39) 27.  
 factors affecting branching, (27) 223.  
 for lambs, (29) 271.  
 forest tree, growth, (37) 27.  
 geotropic sensitivity, (36) 330.  
 growth as affected by temperature, (36) 28.  
 growth, relation to oxygen, (36) 525.  
 hemicellulose in, (30) 130.  
 hydrotropism in, (34) 223.  
 injuries by disinfectants, (32) 647.  
 injury by arsenicals, (40) 449.  
 losses in cooking, (28) 460.  
 negative geotropism, (37) 325.  
 of herbaceous plants, treatise, (36) 223.  
 orientation, (36) 129.  
 orientation as affected by media, (35) 223.  
 osmotic pressure in relation to soil moisture (36) 733.  
 oxygen requirements, (38) 628.  
 physical relation to soil factors, (30) 223.  
 reaction to soil temperature, (32) 626.  
 relation to oxygen, (37) 525.  
 sampling device for, (37) 711.  
 secondary, orientation, (37) 27.  
 secretion of toxic substances by, (35) 636.  
 solvent action of, (31) 729.  
 starchy, as food, (36) 560.  
 succulent, food value, (36) 863.  
 thermotropism in, (31) 728; (32) 222.  
 toxic excretions from, (33) 31.  
 tree, adaptations to aquatic mediums, (30) 45.  
 use as condiments, (36) 863.
- Rope—  
 estimation of manila fibers in, (39) 15.  
 fastenings, tests, (33) 190.  
 knots, hitches, and splices with, (31) 590.  
 knotting and splicing, (29) 390; (35) 495.  
 manila, manufacture, (29) 86.  
 manila, transmission of power by, (31) 688.  
 transmitting power, (30) 190.  
 use on the farm, (30) 591; (38) 893.  
 uses, (32) 898.  
 work, exercises in, (32) 597.
- Rosa—  
 hugonis, description, (34) 45.  
 imperfection of pollen and mutability in, (37) 328.  
 rugosa, culture in Alaska, (29) 743.  
 rugosa, tests, (37) 143.

Rosaceae, after-ripening of, (29) 134.

Rose—

- aphid, studies, (31) 250.
  - aphids, descriptions, (32) 848.
  - apples, host plant of fruit fly, (26) 758.
  - beetle, Fuller's, notes, (32) 556.
  - beetle in Samoan Islands, (33) 158.
  - beetle, Japanese, in Hawaii, (34) 59.
  - black spot—
    - description and treatment, (29) 552.
    - investigations, (33) 347.
    - notes, (28) 449.
    - treatment, (34) 157.
  - buds, malformation, (34) 143.
  - canker, brown, studies, (40) 544.
  - canker, studies, (39) 858.
  - chafer—
    - notes, (26) 753; (28) 752; (34) 158; (35) 260, 646; (36) 854.
    - poisoning of chickens by, (34) 655; (35) 489.
    - poisonous character, (35) 279; (36) 281.
    - remedies, (26) 864; (30) 852; (38) 358.
    - western, notes, (33) 746.
  - crown canker, studies, (38) 854.
  - crown gall, notes, (29) 547.
  - curculio, notes, (32) 651.
  - diseases, (35) 840.
  - diseases—
    - in Fernambuco, (39) 152.
    - notes, (31) 844; (33) 854.
    - studies, (37) 353; (38) 553; (40) 159, 751.
    - flea-beetle, life history and habits, (36) 859.

 v. corn for pigs, (31) 869.  
 varieties, (26) 733; (27) 32, 137, 334, 337, 531, 736; (28) 43, 532; (29) 222, 428; (30) 33, 435; (31) 829; (32) 224, 334, 431, 528; (33) 34, 632, 831; (34) 138, 733; (35) 229, 637; (36) 32, 33, 435, 437, 634; (37) 29, 132, 135, 330, 436, 438, 530, 641, 832; (38) 30, 131, 634.  
 varieties—  
   for New South Wales, (27) 338; (38) 528.  
   for the Dakotas and Montana, (38) 230.  
   in Argentina, (40) 625.  
   new Swedish, (39) 833.  
 variety from mountain regions of Italy, (37) 539.  
 variety tests, (39) 125, 126, 228, 337, 436, 437, 738; (40) 233, 332, 333, 529, 530, 728, 730, 731, 732.  
 volume weight and grain characteristics, (37) 643.  
 water requirements, (26) 129; (29) 826; (32) 127.  
 weed seeds in, (26) 135.  
 wheat hybrids, natural, (34) 230.  
 winter, culture in relation to meteorology, (34) 715.  
 winter, rest period in, (30) 732.  
 winter, spring harrowing, (39) 735.  
 wintering of, (26) 733.  
 yellow-foliage variety, (39) 741.  
 yield as affected by—  
   previous crop, (30) 438.  
   previous soil treatment, (30) 834.  
   wind-breaks, (28) 40.  
 yield in relation to—  
   meteorology, (34) 207.  
   physical properties of soils, (33) 815.  
   rainfall, (34) 319.  
 yield on alfalfa stubble, (33) 828.  
 yields, (27) 734; (28) 533; (29) 138, 425; (40) 735.  
 yields in Australia, (38) 133.  
 Sabal serrulata, studies, (35) 807.  
 Sablefish, food value, (37) 165.  
 Sabulodes caberata on olive, (38) 157.  
 Sacbrood—  
   investigations, (36) 659.  
   notes, (29) 57; (31) 554.  
 Saccharin, notes, (27) 813.  
 Saccharic acid, isolation from soils, (28) 418.  
 Saccharimeter, revision of hundred point of, (30) 812.  
 Saccharin—  
   as affected by enzymes, (26) 257.  
   as sugar substitute, (40) 864.  
   bibliography, (26) 257.  
   detection in foods and beverages, (26) 506.  
   determination, (35) 112.  
   determination in compressed tablets, (40) 613.  
   determination in foods, (31) 810; (37) 804.  
   effect on nutrition and health, (26) 257.  
   examination, (30) 258.  
   legislation in Sweden, (26) 564.  
   methods of analysis, (33) 414.  
   substances, decomposition, (26) 307.  
   toxicity, (28) 662; (34) 429.  
   use, (32) 456.  
   use in foods, (26) 868; (27) 665; (31) 557; (34) 256.  
 Saccharogenic and amyloclastic powers, comparison, (30) 463.  
 Saccharometers, notes, (28) 614.  
 Saccharomyces—  
   apiculatus, forms in wine, (30) 712.  
   apiculatus, notes, (29) 116.  
 cerevisiae—  
   notes, (28) 408.  
   occurrence in sugar, (26) 505.  
   symbiosis by, (29) 714.  
   thermal death point, (38) 468.  
 ellipsoideus, effects of salts on, (38) 503.

- Saccharomyces**—Continued.  
 farinosus, assimilation of atmospheric nitrogen by, (30) 629.  
 farinosus, growth in different media, (28) 824.  
 minor in bread leaven, (35) 163.  
 neoformans from tuberculous lungs, (39) 187.  
 spp., assimilation of nitrogen by, (28) 35.  
**Saccharomyces**, utilization of inulin by, (31) 224.  
**Saccharomyces**, utilization of inulin by, (31) 224.  
**Saccharomyces**, utilization of inulin by, (31) 224.  
**Saccharose**—  
 absorption in the intestines, (28) 763.  
 as affected by chloroform and ether, (33) 523.  
 as protective agent for invertase, (26) 504.  
 cleavage in presence of invertase, (30) 806.  
 detection, (29) 808.  
 detection in honey, (26) 608.  
 determination, (26) 709; (27) 813.  
 determination in—  
 condensed milk, (29) 810.  
 food products, (27) 111; (29) 715.  
 frozen beets, (34) 13.  
 plants, (35) 206.  
 effect on—  
 ammonification, (28) 718.  
 availability of nitrogen, (28) 725.  
 plant respiration, (26) 628.  
 formation in sugar beets, (27) 526.  
 humification, (38) 26.  
 hydrolysis, (27) 804.  
 in beets, formation and distribution, (38) 26.  
 inversion by asparaginic acid, (32) 711.  
 inversion by bees' honey, (27) 813.  
 inversion in beets during storage, (30) 15.  
 occurrence in malt sprouts, (26) 24.  
 resorption in small intestine, (29) 268.  
 use in bread making, (33) 461.  
 utilization by pea seedlings, (27) 730.  
**Saccharum spontaneum**—  
 for shifting sands, (37) 333.  
 notes, (26) 362.  
**Sacchulose** as a feeding stuff for horses, (28) 571.  
**Sacculated kidney** in domestic animals, (26) 176.  
**Sacculina**, effect on fat metabolism of host, (26) 471.  
**Sacks** as carriers of swine fever, (32) 881.  
**Saddle-back caterpillar**, notes, (33) 58.  
**Safety valve**, glass, demountable, (40) 709.  
**Safflower**—  
 cake, fertilizing value, (38) 220.  
 cake, notes, (31) 366.  
 culture for seed, (37) 230.  
 disease, notes, (30) 47.  
 Indian, studies, (36) 228.  
**Saffron**, adulteration, detection, (30) 415; (32) 207.  
**Sagaritis websteri** n.sp., description, (29) 563.  
**Sage**—  
 analyses, (26) 612.  
 black, oil of, (33) 202.  
 mountain, water requirement, (32) 127.  
 thrasher, fruit eating habits, (27) 254.  
**Sagittaria**—  
 sagittifolia, nitrites in, (33) 627.  
 spp. as a duck food, (30) 545.  
**Sagrinae**, catalogue, (30) 458.  
**Sagrotan**, disinfecting value, (32) 80; (40) 780.  
**Sahlbergella** spp., notes, (33) 153.  
**Sahuro**, behavior of excised branch of, (35) 820.  
**Sailors**—  
 diet of, (32) 358.  
 discharged, employment in England and Wales, (35) 296.  
 discharged, employment on farms, (38) 293.  
 land settlement for, (36) 290; (37) 190.  
**Sain**, notes, (29) 443.  
**Sainfoin**—  
 culture experiments, (30) 228; (36) 32.  
 culture under dry farming, (30) 435.  
 diseases, notes, (31) 841.  
 effect on milk and butter, (34) 570.  
 fertilizer experiments, (26) 631.  
 germination tests, (30) 837.  
 insects affecting, (39) 556.  
 nodule bacteria of, (32) 33.  
 sclerotia disease affecting, (29) 845.  
 seed, germination energy of, (29) 538.  
 seed, vitality, (27) 740.  
 varieties, (26) 631; (30) 434.  
 yields, (30) 134.  
**Saissetia**—  
 hemisphaerica, see Hemispherical scale.  
 oleae, see Black scale.  
 spp., notes, (28) 453.  
**Saj**, notes, (29) 443.  
**Saké**—  
 composition, (28) 461.  
 utilization of rice proteins by, (29) 565.  
**Sakurashima**, eruption of, (31) 615.  
**Saj**—see also Shorea robusta.  
 beetles affecting, (36) 360.  
 disease, notes, (36) 449; (38) 351.  
 ecology and diseases, (38) 332.  
 forests as affected by drought, (29) 443.  
 reproduction, (36) 453.  
 seed, germination tests, (27) 147.  
 seedlings, development, (30) 649.  
 seedlings, dying back, (36) 345, 844; (40) 47.  
 tree disease, (39) 146; (40) 48.  
**Salad plants**, treatise, (37) 645.  
**Salads**, sandwiches, and chafing-dish dainties, (32) 560.  
**Salamanders** in Pennsylvania, (31) 648.  
**Salep**, analyses, (29) 463.  
**Salicin**—  
 as affected by emulsin, (27) 408.  
 as affected by enzymes, (28) 503.  
 decomposition by emulsin, (29) 505.  
 hydrolysis by enzymes, (29) 506.  
**Salicornia**, growth in presence of salt, (33) 222.  
**Salicylic**—  
 acid—  
 as a food preservative, (30) 364.  
 detection, (26) 412, 805; (27) 12; (28) 22.  
 detection in cheese, (32) 313.  
 detection in milk, (26) 610.  
 acid, determination—  
 error in, (26) 111.  
 in foods, (38) 314.  
 in fruit juices, (28) 112.  
 in wine, (35) 805  
 acid, effect on—  
 amylolytic action of malt extracts, (31) 711.  
 butter and margarin, (26) 778.  
 cyanogen formation in plants, (28) 527.  
 formation of botulinus toxins, (30) 479.  
 acid, methods of analysis, (33) 414.  
 acid, new reactions for, (27) 806.  
 aldehyde—  
 antizymotic action, (34) 815.  
 effect on growth of cowpeas, (36) 731.  
 effect on nitrification in soil, (38) 119.  
 effect on plants, (31) 620; (33) 328; (34) 20,  
 325; (36) 424.  
 in soils, (40) 22.  
 isolation from soils, (28) 418.  
**Saligenin**, utilization by plants, (36) 329.  
**Saline**—  
 cathartics, effect on metabolism, (28) 867.  
 claims in United States, (27) 22.  
 deposits in Great Basin, (29) 518; (31) 423.  
 deposits in southeastern California, (33) 518.  
 solutions, phototransparency of, (28) 317.  
**Salines**—  
 as source of potash, (27) 500; (28) 33.  
 of United States, composition, (28) 33, 725.  
**Saliva**—  
 amyloclastic property, (28) 262.  
 food on starch, (26) 872.  
 food accessories in, (40) 271.  
 horse, orokinase and ptyalin in, (40) 778.  
 human—  
 amylolytic activity, (40) 609.  
 as affected by diet, (29) 164.  
 diastatic power, (28) 567.  
 effect of nutrition on amylase content, (29) 568.  
 ox, diastase in, (36) 82.  
 relation to dental tartar, (26) 160.  
**Salivary**—  
 digestion, relation to gastric digestion, (34) 862.  
 glands in relation to gastric secretion, (40) 867.  
 glands in relation to thirst, (40) 767.  
**Salix**—see also Willow.  
 caprea, enzymes of, (31) 310.  
 hybridization experiments, (37) 432; (40) 546.  
**Salmon**—  
 analyses, (28) 358.  
 and its by-products, preparation, (38) 13.

- Salmon**—Continued.  
 canned—  
   content of bacteria and tin, (38) 166.  
   examination, (40) 205.  
   in United States, (38) 866.  
   nutritive value, (40) 66.  
   nutritive value and recipes, (31) 555.  
 cannery waste, fertilizer from, (26) 324.  
 canning industry in North America, (28) 358.  
 D. E., biographical sketch, (31) 697.  
 fly, studies, (39) 257.  
 industry in Alaska, (36) 862.  
 reprocessed, as a food, (30) 861.  
 shipping long distances, (35) 162.  
 waste, analyses, (34) 28.
- Salmonberries**—  
 breeding experiments, (28) 542.  
 hybridization experiments, (28) 436.
- Salmonberry leaf spot**, notes, (33) 647.
- Salmonellosis porcina**, notes, (30) 185.
- Salol**, determination, (27) 499.
- Salpingogaster nigra**, notes, (30) 457.
- Salsify**—  
 food value, (36) 863.  
 mulching v. clean culture, (33) 534.  
 root knot, notes, (39) 52.  
 soft rot, notes, (31) 641.  
 Verticillium diseases, (39) 852.  
 white rust in Indiana, (39) 52.
- Salsola**—  
 aphylla, analyses and digestibility, (27) 871;  
 (32) 167.  
 kali var. tenuifolia, eradication, (27) 733.  
 vermiculata, analyses, (33) 466.
- Salt**—  
 absorption by plants, (35) 435.  
 adulteration, (29) 867.  
 analyses, (28) 278; (30) 712.  
 and alkali industry, treatise, (36) 428.  
 and ice, lowest temperature with, (31) 615.  
 and water, physiology of, (28) 261.  
 application to heavy soils, (33) 323.  
 as fertilizer for carrots, (30) 138.  
 as winter spray for fruits, (30) 641.  
 bacteriological analyses, (32) 269.  
 bromin compounds in, (31) 657.  
 cattle, analyses, (26) 267.  
 content of—  
   a Kamerun plant, (40) 326.  
   leaves, induced variations in, (29) 134.  
   nonhalophytes, variations in, (29) 28.  
   sweat, (26) 766.  
 dairy, analyses, (26) 81.  
 deposits—  
   in Oklahoma, (30) 724.  
   of Plantegaarde, composition, (26) 426.  
   of southwestern Virginia, (30) 724.  
   of Staffurt, origin, (28) 726.  
 destruction of mustard by, (27) 31.  
 destruction of weeds by, (26) 333.  
 determination in—  
   butter, (27) 614, 812; (33) 16; (39) 505.  
   foods and feeds, (32) 22, 415.  
   sea water, (34) 504.  
   soils, (32) 806.  
 distribution in butter, (30) 877.  
 effect in agglutination, (40) 778.  
 effect on—  
   action of maltase, (28) 504.  
   activity of malt diastase, (29) 528.  
   anaphylaxis, (30) 478.  
   availability of soil potash, (32) 126.  
   bacterial development in butter, (30) 76.  
   butter and cheese, (28) 278.  
   butter flora, (34) 776.  
   coffee and cacao, (27) 824.  
   coherence of soils, (31) 123.  
   cyanids, (26) 206.  
   decomposition of feldspar, (30) 126.  
   development of chromogens, (26) 327.  
   flavor of cheese, (32) 176.  
   germinating plants, (33) 128.  
   germination of seeds, (29) 327.  
   growth of Salicornia, (33) 222.  
   invertase, (34) 408.  
   legumes, (40) 434.  
   nitrification, (27) 124.  
   nitrification in soils, (28) 217.  
   nutrition and renal excretion, (27) 464.
- Salt**—Continued.  
 effect on—continued.  
   olives, (26) 825.  
   plants, (32) 223; (36) 297.  
   proteolytic enzymes, (27) 878; (29) 268.  
   quality of sugar beets, (28) 44.  
   respiratory pigments of plants, (26) 327.  
   serum mixtures, (35) 680.  
   soil bacteria, (26) 322.  
   soils, (27) 622.  
   soils and plants, (35) 423.  
   sprouting of potatoes, (32) 829.  
   storage butter, (38) 77.  
   strength of concrete, (30) 589.  
   sugar beets, (26) 438.  
   water content of butter, (38) 781.  
   weeds, (38) 632.  
   yield and quality of bread, (30) 462.  
 feeding value, (28) 265.  
 fertilizing action, (26) 623.  
 fertilizing value, (26) 34, 630; (27) 125, 128; (30) 428; (31) 829; (32) 324; (33) 841; (34) 519, 726; (35) 327; (36) 220; (37) 636; (39) 117, 334, 428, 438; (40) 134.  
 figures in serum of sick horses, (40) 287.  
 fly in San Francisco Bay, (39) 362.  
 glycosuria, mechanism, (37) 64.  
 importance in rations, (40) 775.  
 marsh grass, analyses, (29) 270.  
 marshes of north coast of Porto Rico, (29) 513.  
 poisoning in pigs, (40) 684.  
 poisoning in pigs and poultry, (39) 680.  
 River national bird reservation, (37) 355.  
 rôle in plant nutrition, (33) 725.  
 rôle in preserved foods, (28) 361.  
 sea, as fertilizer for beets, (26) 43.  
 "sickness," rôle of Panicum combsii in, (40) 137.  
 solutions, effect on—  
   germination of seeds, (27) 330; (29) 218.  
   metabolism, (28) 866.  
   plants, (29) 218.  
   potatoes, (27) 748.  
   soil temperature, (29) 620.  
 spots, relation to plants, (29) 422.  
 sterilization of soils by, (32) 816.  
 toxicity, (28) 661.  
 toxicity toward barley, (33) 323.  
 toxicity toward nitrogen-fixing organisms, (28) 519.  
 trough for sheep, description, (37) 867.  
 use against Canada thistles, (30) 639.  
 use in wound treatment, (35) 882.  
 value in the diet, (29) 664.
- Saltbushes**—  
 as cover crops, (32) 729.  
 culture experiments, (30) 632.  
 destruction by white fly, (26) 859.  
 indigenous to Australia, (26) 830.  
 seeding on ranges, (30) 35.
- Salton Sea**, studies, (29) 415; (32) 429.
- Salt peter**—see also Potassium nitrate and Sodium nitrate.  
 as milk adulterant, (26) 673.  
 as source of potash, (34) 327.  
 composition and use, (27) 727.  
 deposits, new, in Brazil, (39) 817.  
 determination in meat, (27) 504.  
 effect on flow of rubber latex, (29) 748.  
 effect on nutrition and health, (26) 70.  
 fertilizing value, (26) 232; (27) 336, 337.  
 for rubber trees, (26) 339.  
 industry in India, (26) 524.  
 origin and extraction in India, (37) 722.  
 refining in India, (26) 524.  
 use in cheese making, (34) 574.
- Salts**—  
 absorption—  
   and excretion by roots, (26) 624; (34) 224.  
   by cultivated soils, (34) 324.  
   by plants, (35) 432, 433.  
   by roots, (34) 334; (36) 128.  
 acid, alkaline reaction in soils, (30) 122.  
 acid, effect on Aspergillus niger, (29) 734.  
 addition to diet, water distribution and edema following, (33) 664.  
 alkali, determination in soils, (28) 318.  
 alkali, effect on—  
   bacteria, (32) 320.  
   growth of rice, (30) 728.  
   nitrification, (38) 322.

## Salts—Continued.

- alkali, effect on—continued.  
 plants, (28) 527.  
 soil bacteria, (28) 519, 719; (33) 323.  
 and acids, antagonism between, (34) 429.  
 antagonism, (30) 98, 366, 824, 833; (32) 35, 223,  
 320, 728; (31) 317, 627, 721; (33) 31, 323, 521, 628;  
 (34) 126; (35) 823; (36) 128; (37) 431.  
 antagonism, additive effects in, (34) 730.  
 antagonism as affecting soil bacteria, (31) 317.  
 as affected by humic acid, (34) 324.  
 as affected by soil moisture and manure, (36)  
 816.  
 condition in milk, (32) 607.  
 crystallizable, photomicrographs, (36) 804.  
 distribution in living matter, (30) 367.  
 effect on—  
 action of rennet on milk, (26) 477.  
 amyolytic ferments of bread, (34) 660.  
*Aspergillus niger*, (27) 848.  
 bacterial activities of soil, (36) 515.  
 concrete, (29) 686, 891.  
 growth of soy beans, (36) 31.  
 heliotropism, (34) 333.  
 lime requirement of soils, (36) 210.  
 metabolism of pigs, (30) 268.

 permeability of protoplasm, (33) 328.  
 plant growth, (29) 329.  
 reproductive process, (34) 766.  
 respiratory metabolism, (32) 860.  
 root development, (29) 328.  
 secretion of diastase by *Penicillium camembertii*, (36) 328.  
 seeds and seedlings, (29) 421.  
 soil acidity, (35) 22.  
 soils, (26) 618.  
 starch ferments, (27) 109.  
 wheat seedlings, (31) 426.  
 flocculation of turbid liquids by, (32) 121.  
 importance in health and disease, (30) 367.  
 in sandy loam and adobe soils, studies, (30) 517.  
 injurious to cotton plant in Egypt, (34) 227.  
 inorganic, effect on—  
 Actinomycetes, (36) 526.  
 catalase, (26) 504.  
 pancreatic lipase, (31) 264.  
 metallic—  
 effect on lupine radicles, (32) 128.  
 effect on olives, (26) 825.  
 effect on yeasts and other fungi, (28) 527.  
 fertilizing value, (31) 821.  
 reaction with soluble carbonates, (31) 504.  
 rôle in nitrogen assimilation by green  
 plants, (28) 328.  
 toxicity, (28) 662.  
 mineral, rôle in metabolism of infants, (29) 366.  
 movement in alkali soils, (34) 16.  
 movement in semiarid soils, (28) 421.  
 neutral, effect on action of alcohol on plant cells,  
 (34) 333.  
 neutral, effect on castor bean lipase, (30) 409.  
 penetration of protoplasm by, (26) 823.  
 physiological balance in water cultures, (36) 328.  
 plants tolerating, (40) 221.  
 rare earth, effect on coagulation of milk by  
 rennet, (30) 312.  
 reactions of ions and molecules, (37) 201.  
 relation to soil colloids, (35) 16, 622.  
 rôle in infant feeding, (35) 165.  
 rôle in plant life, (34) 135.  
 rôle in preservation of life, (26) 271.  
 soil, effect on vegetation, (27) 215.  
 soil, relation to cultivated plants, (28) 426; (31)  
 627.  
 soluble—  
 effect on absorption of phosphates by soils,  
 (26) 122.  
 effect on clay, (27) 620.  
 effect on soils, (26) 216.  
 excess in humid soils, (38) 418.  
 movement in soils, (33) 513; (38) 417.  
 toxic, as affected by other salts, (30) 31.  
 toxic inorganic, effect on plant growth, (30) 130.  
 toxicity toward—  
 barley, (33) 323.  
*Monilia sitophila*, (31) 730.  
 plants as affected by calcium, (29) 322.  
 Wagner, fertilizing value, (27) 342.  
 Saltusaphis, synopsis, (37) 157.
- Salvarsan—  
 administration, (26) 677; (28) 80.  
 bactericidal action, (39) 488, 590.  
 detection, (26) 411.  
 effect on plants, (27) 131.  
 fixation by blood, (35) 74.  
 qualitative and quantitative tests, (39)-508.  
 toxicity, (38) 181.  
 trypanocidal activity, (36) 679.  
 use against—  
 anthrax, (27) 680; (29) 679; (36) 678.  
 contagious pneumonia, (27) 289.  
 dog distemper, (32) 84; (37) 584.  
 dourine, (28) 478.  
 equine influenza, (26) 288, 486; (28) 287, 483;  
 (29) 385; (30) 186.  
 glands, (27) 183; (28) 79.  
 infectious bulbar paralysis, (33) 179.  
 nonsyphilitic diseases, (31) 775.  
 rabies, (29) 679; (30) 281.  
 septic pneumonia, (31) 85.  
 spirochetosis in fowls, (27) 385.  
 surra, (29) 176.
- Salvia—  
 grandiflora, oil of, (36) 803.  
 nemorosa, root system, (37) 542.  
 pratensis, betains in, (27) 204.  
*Salvia natans*, reactions of root hairs, (29) 828.  
 Samar as a reclamation crop, (30) 234.  
 Sambucus—  
 canadensis, notes, (30) 145.  
 Coryneum-like structures on, (33) 545.  
 nigra, cork from, (31) 312.  
*Samia cecropia*, see *Cecropia* moth.  
 Sampling—  
 device for organic materials, (37) 711.  
 standard methods, (35) 415; (38) 506.  
 San borer, notes, (31) 850.  
 San José scale—  
 control in—  
 Florida, (28) 197.  
 Kansas, (37) 357.  
 Maryland, (27) 552.  
 Missouri, (33) 253.  
 West Virginia, (26) 840; (28) 842; (35) 657.  
 distribution in South Africa, (30) 549.  
 immunity to sprays, (40) 753.  
 in Nova Scotia, (31) 251.  
 life history and remedies, (33) 452.  
 notes, (26) 59, 147, 348; (27) 299, 455, 658, 755,  
 857; (28) 156, 158, 235, 353, 653, 752; (29) 53, 153,  
 251, 353; (30) 53, 157, 655, 752; (31) 60; (32) 448,  
 850; (33) 153, 252, 558; (34) 158, 162, 752; (35)  
 253, 356; (36) 357, 755, 856; (37) 358; (38) 653;  
 (40) 163.  
 occurrence in Transvaal, (26) 455.  
 occurrence in West Virginia, (26) 753.  
 parasites of, (29) 758; (30) 661; (31) 355; (32) 245,  
 449.  
 remedies, (26) 755; (28) 352; (32) 754; (33) 253;  
 (34) 548, 551; (36) 551; (37) 54; (38) 540, 653.  
 spraying, (39) 360, 465.  
 studies, (27) 158.  
 susceptibility to sprays, (34) 551.  
 Sanai as a green manure, (31) 230; (34) 37.  
 Sanatogen, examination, (28) 259.  
 Sand—  
 and gravel deposits in Virginia coastal plain,  
 (29) 513.  
 and plant silica, differentiating, (40) 610.  
 application to grass lands, (32) 630.  
 areas, reclamation, (28) 230; (29) 427.  
 blast tests for timber, (27) 348.  
 cement, investigations, (29) 183.  
 cherry, Champa, description, (30) 640.  
 clay mixtures for road surfacing, (31) 289.  
 concrete, grading, (38) 389.  
 cultures—  
 balance of nutrients in, (36) 212.  
 nitrifying bacteria in, (27) 634.  
 renewal of plant nutrients in, (36) 31.  
 diluvial gray, notes, (27) 416.  
 distribution in ground cinnamon, (26) 564.  
 dunes—  
 afforestation, (26) 543.  
 control and utilization, (35) 719.  
 devastation by, (37) 720.  
 evaporation in, (27) 636.  
 fixation and reclamation, (30) 239.  
 fixation in Russia, (27) 148.

- Sand**—Continued.  
 dunes—continued.  
 of Coos Bay, Oregon, (31) 744.  
 of New Zealand, reclamation, (26) 223.  
 reclamation, (27) 245.

   prevalence in Prussia, (27) 181.  
 Scale—  
   black, see Black scale.  
   flat, notes, (27) 155.  
   fungus, new, description, (39) 52.  
   insect diseases, (30) 55.  
   insect eggs, action of cyanid gas on, (32) 245.

## scale—Continued.

## insects—

- African, descriptions, (27) 358.
- catalogue, (28) 754.
- control, (37) 55.
- control by natural enemies, (35) 254.
- destruction by *Chilocorus similis*, (29) 258.
- destruction by fungi, (28) 556.
- dispersion by wind, (36) 55.
- eggs as affected by hydrocyanic acid gas, (33) 855.
- fungoid parasites of, (33) 558.
- fungus parasites of, (28) 453, 752; (30) 455.
- in British Guiana, (31) 454.
- Colorado, notes, (40) 161.
- Florida, (38) 562.
- German East Africa, (30) 754.
- Hawaii, (34) 59.
- Indiana, (31) 452; (35) 461.
- Missouri, (37) 760; (38) 653.
- South Carolina, notes, (29) 53.

## insects, injurious to—

- citrus fruits, (29) 654.
- coffee, (36) 354.
- limes, remedies, (31) 58.
- mangoes, (26) 553.
- oranges, (27) 455.

## insects—

- insect parasites of, (28) 452.
- monograph, (35) 256.
- new, of Japan, (37) 358.
- notes, (26) 556; (27) 357, 860; (28) 854; (32) 448, 550.
- on citrus fruit, (39) 161, 463.
- on lime trees, destruction, (26) 534.
- parasitism in California, (28) 863.
- preparation for microscopical study, (32) 57.
- remedies, (26) 561; (27) 357, 857; (29) 262; (39) 225, 763.
- resistance to fumigation, (36) 154.
- studies, (28) 754.
- table for separation, (29) 251.
- treatise, (28) 556.
- young, locomotion, (26) 149.
- "longulus" or soft gray, notes, (28) 452; (30) 252.
- oblong, notes, (36) 355.
- pest, oriental, notes, (27) 255.
- red, Florida, notes, (27) 455.
- red, notes, (29) 654.
- red, on olive, (38) 157.
- red, parasite of, importation into California, (30) 753.
- red, studies, (26) 553.
- rufus, notes, (27) 357.
- scurfy, *see* Scurfy scale.
- soft, notes, (26) 556; (28) 854; (34) 652.
- soft, parasites of, (29) 654.
- white, notes, (27) 857; (29) 654.
- yellow, notes, (26) 553.

## Scales—

- Argentine, new, (40) 61.
- formation on chicks' feet, (31) 369.

## Scallops—

- creatin and creatinin content, (31) 760.
- culture, (27) 472.
- examination, (31) 64; (32) 854; (36) 159.
- handling and marketing, (31) 63.
- sewage polluted, danger from (27) 866.

## Scalopus aquaticus, notes, (31) 154.

## Scambus ephialtoides n.sp., description, (33) 565.

## Scambus evertivorus n.sp., description, (34) 456.

## Scapteriscus—

- didactylus*, *see* Mole cricket.
- vicinus*, *see* Mole cricket, West Indian.
- Scaptomyza flaveola*, parasite of, (29) 359.
- Scarabaeid larvae, rearing, (33) 256.
- Scarabaeidae, notes, (26) 60.
- Scarabaeus hemipterus, notes, (34) 454.
- Scarifiers, motor, notes, (31) 188.

## Scarlet—

- fever, relation to milk supply, (28) 674.
- runner, bud variation in, (35) 329.

## Scatophaga stercoraria, habits, (30) 554.

## Scatopsidae, notes, (35) 465.

## Scelio—

- n.spp., descriptions, (29) 562.
- semisanguineus* n.sp., description, (31) 554.

## Scenery preservation in New Zealand, (26) 542.

## Schardinger's enzym, studies, (26) 310.

## Schedius kuvanae, notes, (27) 455.

## Schenkia tenthredinarum n.sp., description, (34) 456.

## Schinopsis spp., studies, (36) 745.

## Schistocephalus dimorphus, description, (26) 561.

## Schistoceera—

- americana*, control, (39) 863.
- americana* on sugar cane, (40) 57.
- capallens*, destruction, (27) 357.
- pallens*, bacterial epizootic of, (26) 247.
- paranensis* in Trinidad, (35) 463.
- paranensis*, notes, (28) 753; (34) 854.
- paranensis*, parasite of, (29) 354.
- peregrina*, control in Algeria, (36) 356; (37) 461.
- tartarica* taken at sea, (40) 649.
- venusta*, remedies, (36) 55.

Schistoceros hamatus, *see* Apple twig borer.

## Schistodepressaria nervosa, notes, (29) 759.

## Schistosoma japonicum, cercaria of, (40) 554.

## Schizanthus anthracnose, studies, (26) 56.

## Schizaspis lobata, parasite of, (39) 566.

## Schizocerophaga leiby n.g. and n.sp., description, (36) 554.

## Schizomyces, nomenclature and classification, (39) 124.

Schizoneura—*see also* Eriosoma.*americana*, studies, (34) 161.*corni*, notes, (37) 258.*rileyi*, notes, (27) 658.

## spp. in Colorado, (33) 857.

## spp., notes, (27) 555; (30) 850.

## Schizonotus sieboldii, biology, (40) 649.

## Schizophyllum—

*aleuon* on sugar cane, (40) 157.*commune*—

- fruit bodies of, vitality, (30) 350.
- notes, (26) 144; (28) 551; (37) 553; (38) 51.
- relation to apple collar rot, (34) 157.
- sp., notes, (26) 57.

## Schizosaccharomyces pombe, symbiosis by, (29) 714.

## Schizotetranychus latitarsus n.sp., description, (38) 63.

## Schizotrypanum—

- cruzi*, notes, (34) 580.
- cruzi*, occurrence in Bahia, (26) 755.
- validity as a genus, (28) 180.

## Schizura—

*concinna*, *see* Apple caterpillar, red-humped.*ipomeae* in Louisiana, (37) 564.

## Schlechtendalia chinensis, life history, (26) 60, 655.

## Schloesing, J. J. T., biographical sketch, (40) 800.

## Schmidtia—

*pappophoroides*, analyses and digestibility, (27) 871.

## spp., analyses and digestibility, (32) 167.

## Schoenobiinae, North American, notes, (37) 564.

## Schoenobius—

*bipunctifer*, notes, (33) 856; (35) 58, 659; (38) 257.*incertellus*, studies, (40) 167.

## School—

## and home gardening, (39) 396, 497; (40) 493, 898.

## and home gardening—

- course for Philippines, (40) 898.
- in San Francisco, (40) 294.
- boys for farm work, (38) 599; (39) 597, 693.
- building, community, at Wheaton, Minnesota, (37) 793.
- buildings, plans and specifications, (30) 390.
- children—

## breakfasts for, (31) 557.

## examination, (29) 297.

## feeding, (26) 763; (27) 269, 270; (28) 664; (29) 464, 465; (31) 261, 463, 494; (32) 358; (35) 471.

## feeding in Philadelphia, (30) 167.

## feeding, necessity for supervision of, (33) 261.

## feeding, treatise, (29) 162; (33) 864.

## food charts for, (31) 557.

## in Kentucky, farm work by, (38) 193.

## in Munich, nourishment, (27) 65.

## lunches for, (27) 665.

## malnutrition in, (29) 465.

## medical inspection, (27) 665.

## medical inspection and nutrition of, (32) 458.

## nutrition of, (34) 561.

## nutritional index for, (32) 256.

## of Antwerp, nutrition coefficient, (29) 364.

## out-of-school work, (38) 192.

## School—Continued.

- children—continued.
  - public feeding, (33) 364.
  - weight and stature of, (36) 264.
- cottage and gardens, model, (28) 491.
- credit for—
  - boys' and girls' club work and extension activities, (36) 293.
  - home practice in agriculture, (35) 694.
  - out-of-school work, (33) 95, 195, 597, 799, 897.
- curriculum, change of stress in, (36) 393.
- demonstration fields, notes, (31) 793.
- dietitian, training, (27) 270; (32) 458.
- districts, consolidation, (29) 597.
- districts, rural, social surveys of (32) 289.
- exhibits—
  - and contests, outlines for, (34) 493.
  - preparation, (32) 596.
  - suggestions for, (32) 597.
- fair exhibits, receptacles for, (40) 96.
- fairs, county, in Virginia, (27) 396; (29) 599.
- fairs in Canada, (35) 594; (36) 897; (38) 795.
- farms—
  - in New York City, (31) 297.

   conference in Illinois, (37) 93.  
   cooking in, (35) 897.  
   cooperation with colleges of agriculture, (26) 296.  
   entomology in, (31) 395.  
   farm mechanics in, (28) 91.  
   fruit growing in, (33) 398.  
   gardening course for, (29) 193.  
   general science course for, (30) 898.  
   home economics in, (29) 792; (31) 297; (32) 494; (33) 94; (34) 395; (35) 898; (36) 594.  
   in Denmark, (35) 695.  
   laboratory exercises for, (33) 494.  
   lunches in, (32) 458.  
   moor culture in, (33) 791.  
   of Minnesota, agriculture in, (26) 391.  
   out-of-school work in, (34) 93.  
   poultry instruction in, (36) 794.  
   rural relations, (39) 298.  
   science and agriculture in, (30) 897.  
   state aid in Arizona, (28) 799.  
   state aid in Nebraska, (29) 99.  
   supervised farm work in, (28) 492.  
 home economics instruction in, (32) 495.  
 home project work for, (36) 896.  
 hotbeds for, (27) 491.  
 housekeeping, in Norway, (29) 597.  
 itinerant dairy, of Ardeche, (28) 297.  
 Knapp Agricultural Day program for, (32) 496.  
 nature study collections for, (30) 696.  
 negro, agriculture in, (38) 92.  
 negro rural, practical training in, (32) 289.  
 nonflush chemical closet for, (38) 84.  
 normal, agriculture in, (26) 497.  
 normal, state aid in Arizona, (28) 799.  
 normal, training of rural teachers in, (32) 690.  
 of California, cooperation with College of Agriculture, (26) 192.  
 Illinois, Winnebago County, (27) 394; (29) 91.  
 Indiana, Hamilton County, (29) 394.  
 Minnesota, regulations and laws concerning, (27) 194.  
 Ontario, agriculture in, (28) 391.  
 tomorrow, (35) 795.  
 patrons' meetings, (26) 394.  
 people's high, in Denmark, (30) 93.  
 public—  
   agriculture in, (26) 299, 898; (27) 94; (31) 494, 896; (32) 392, 493, 596, 897; (33) 597, 791, 798, 897; (37) 192, 494, 893.  
   arbor and good roads days in, (30) 696.  
   cooperation with colleges of agriculture, (26) 296.  
   entomology in, (35) 897; (37) 459.  
   forestry in, (30) 394.  
   gardening in, (31) 896.  
   home economics in, (32) 897; (33) 792; (37) 494.  
   in Alaska, (37) 393.  
   in Philippines, (36) 292.  
   industrial education in, (28) 15; (32) 595.  
   nature study in, (27) 694; (31) 493; (32) 493.  
   relation to community life, (27) 898.  
   specimen or supply cabinets in, (26) 596.  
   vocational courses in, (27) 694.

## Schools—Continued.

- rural—  
 agricultural booklets for, (33) 397.  
 agricultural course for, (29) 192; (30) 393, 394.  
 agricultural extension work in, (29) 899.  
 agriculture in, (26) 191, 295, 596, 697; (27) 598; (28) 90, 193, 492, 693, 897; (29) 92, 695; (30) 795; (31) 298; (32) 691, 897; (33) 95, 597; (34) 92, 693; (35) 395; (36) 596.  
 and country life, treatise, (28) 692.  
 art and hand work in, (30) 462.  
 as social centers, (29) 91, 465.  
 betterment, (30) 298; (32) 689.  
 bibliography, (32) 389.  
 conveniences for, (37) 696.  
 corn lessons for, (39) 299.  
 correlation of industrial and academic subjects, (27) 393.  
 cotton lessons for, (34) 293.  
 defects, (29) 91.  
 exercises with plants and animals, (34) 292.  
 fairs in Canada, (38) 795.  
 farm handicraft for, (37) 699.  
 for city boys, (27) 896.  
 handbook, (29) 494.  
 rural high—  
   address on, (31) 498.  
   as community centers, (31) 493.  
   community spirit in, (33) 194.  
   community work in, (28) 692.  
   in New Hampshire, (31) 692.  
   possibilities, (32) 689.  
   readjustment, (28) 391.  
 rural—  
   home economics in, (28) 694; (32) 897.  
   hot lunches in, (29) 465; (30) 462.  
   housekeeping and sanitation in, (31) 791.  
   hygiene of, (32) 190.  
   improvement, (28) 90; (29) 91; (30) 93, 496, 694; (32) 793.  
   in Denmark, (32) 794.  
   Denmark, treatise, (34) 196.  
   Kansas, (33) 694.  
   Minnesota, (34) 195.  
   Ontario, (32) 896; (34) 196.  
   South Carolina, (28) 391.  
   Wisconsin, (28) 390; (32) 691; (36) 592.  
 industrial club work in, (31) 297.  
 influence, (27) 194.  
 insect specimens, etc., for, (31) 792.  
 lunches for, (32) 692.  
 manual training in, (34) 395; (36) 96.  
 material supplied to, (33) 792.  
 nature study exhibits by, (31) 899.  
 nature study in, (31) 193; (33) 95.  
 needs of, (36) 194.  
 notes, (27) 897.  
 organization and management, (34) 292.  
 papers on, (27) 793; (37) 892; (40) 895.  
 pork production lessons for, (39) 298.  
 poultry lessons for, (36) 597.  
 redirection, (28) 792.  
 relation to agricultural teaching, (31) 194.  
 relation to social survey, (40) 896.  
 relation to the home and farm, (32) 492.  
 sanitation, (36) 892.  
 soil study in, (32) 494.  
 studies, (28) 297.  
 treatise, (30) 392; (32) 391.  
 secondary—  
   agriculture in, (26) 191, 192, 498, 898; (27) 490; (28) 693; (29) 99, 399; (30) 99; (31) 96; (32) 897; (33) 798; (34) 491, 693, 793; (36) 691; (37) 392, 395.  
   curricula of, (33) 896.  
   domestic science in, (26) 394.  
   extension work in, (31) 799.  
   farm mechanics in, (26) 393.  
   judging of horses in, (36) 597.  
   nature study in, (31) 395.  
   poultry husbandry in, (37) 394.  
 sewage disposal for, (37) 884.  
 spring laboratory methods for, (27) 196.  
 state normal, and agricultural colleges, relation, (31) 896.  
 use of land in connection with agricultural teaching, (32) 896.  
 ventilation, (30) 790.  
 vocational, see Vocational schools.  
 weed collections for, (31) 599.

- Schools—Continued.  
 window gardening for, (29) 898.  
 winter, (36) 498.  
 winter, for farmers, (36) 396.
- Schreckensteina festaliella in Wisconsin (38) 155.
- Schumann rays, effect on protoplasm, (33) 224.
- Sciaphobus squalidus, studies, (31) 853.
- Sciara—  
 coprophila injurious to potted plants, (36) 460.  
 revision, (40) 858.  
 sciophila, notes, (28) 858.  
 sp., dipterous parasite of, (34) 553.  
 spp., notes, (27) 657; (28) 156.  
 trifolii n.sp., description, (40) 168.  
 tritici injurious to Primula seedlings, (37) 762.
- Sciasma frontalis n.sp., description, (37) 763.
- Science—  
 adjustment to practice, (36) 2.  
 and agriculture in high schools, (30) 897.  
 and common sense, antagonism between, (34) 401.  
 and industry institute in Australia, (38) 796.  
 courses, elementary, (32) 690.  
 elementary, treatise, (26) 296.  
 first year, laboratory manual, (28) 298.  
 for beginners, textbook, (39) 597.  
 in secondary education, (26) 296.  
 organization for research, (39) 603.  
 yearbook, (34) 494.
- Scientific—  
 activity as a national asset, (39) 101.  
 papers, essentials of, (30) 403.  
 Research Association in Great Britain, (40) 500.  
 Society of Brünn, proceedings, (28) 530.
- Scilla rigidifolia fiber, tests, (31) 526.
- Scions—  
 and stocks, antagonism of, (31) 740.  
 as affected by stock, (27) 540; (28) 541.  
 transmission of variegation to stocks, (26) 529.
- Sciophites obscurus, notes, (32) 651.
- Sciopteron regale, notes, (30) 252.
- Scirpophaga intacta, notes, (34) 758.
- Scirpophaga sericea, notes, (35) 58.
- Scirpus—  
 americanus, analyses, (29) 270.  
 lacustris as a litter for cows, (35) 175.  
 lacustris, fertilizing value, (38) 520.  
 sylvaticus, nematodes affecting, (30) 746.
- Scirrhia bambusae n.sp., description, (36) 251.
- Scirtothrips citri, studies, (38) 763.
- Sciurus—  
 griseus, destruction of conifer seed by, (31) 154.  
 hudsonicus richardsoni, host of spotted fever tick, (26) 64.
- Scleroderma—  
 duarteum n.sp., description, (31) 62.  
 immigrans n.sp., description, (40) 266.  
 vulgare n.sp., description, (31) 127.
- Scleroderris livida, notes, (26) 852.
- Sclerophylls, transpiration in, (27) 522.
- Scleroplea aurantiorum n.sp., description, (27) 50.
- Scleropycnis abietina—  
 n.g. and n.sp., description, (27) 46.  
 notes, (28) 750.
- Scleropycnium aureum n.g. and n.sp., description, (30) 248.
- Sclerosis, diffuse, in horses in India, (38) 287.
- Sclerospora—  
 graminicola, oospore parasite of, (31) 641.  
 graminicola, studies, (31) 51.  
 macrospora in France, (34) 243.  
 macrospora, notes, (28) 647; (35) 49, 150.  
 macrospora on maize, (39) 753.  
 maydis, description and treatment, (31) 51.  
 maydis quarantine in United States, (36) 245.  
 sp., notes, (30) 845.
- Sclerostome—  
 parasites of horses, (35) 785; (37) 280.  
 parasites of horses in England, (36) 280.
- Sclerostomes as cause of debility, (39) 892.
- Sclerostomum—  
 bidentatum, life history, (29) 783.  
 bidentatum, studies, (37) 82.  
 equinum, dissemination by flies, (30) 659.  
 spp., affecting mules, (28) 82.  
 spp., anatomy and biology, (28) 887.  
 spp., embryology, (30) 555.
- Sclerotinia—  
 ciborioides or S. trifoliorum, description, (36) 47.  
 cinerea—  
 and S. fructigena, relationship, (29) 848.  
 apothecial stage, (32) 49.  
 as affected by cold, (34) 538.  
 enzymes of, (40) 745.  
 in Minnesota, (34) 445.  
 in northern Vermont, (35) 849.  
 investigations, (35) 249.  
 notes, (28) 244, 443; (35) 351; (38) 550; (39) 652.  
 studies, (31) 749, 843.  
 temperature relations, (36) 649.  
 diseases, studies, (40) 49.  
 fagopyri n.sp., description, (38) 648.  
 fructigena—  
 and S. cinerea, comparison, (30) 352.  
 notes, (32) 241; (34) 241; (35) 248; (36) 348, 750; (37) 457.  
 studies, (29) 848.  
 transmission by tree crickets, (34) 653.  
 treatment, (32) 148.  
 fuckelliana—  
 and S. libertiana, relationship, (28) 848.  
 notes, (26) 852; (28) 847; (31) 646.  
 relation to Botrytis, (39) 250.  
 treatment, (30) 651.  
 geranii n.sp., description, (40) 249.  
 injurious to plants, (26) 343.  
 libertiana—  
 description, (29) 450.  
 description and treatment, (29) 846.  
 notes, (26) 649; (28) 242; (29) 243, 650, 751, 753; (31) 747; (37) 550, 552, 749; (38) 645.  
 on celery in storage, (31) 447.  
 collards, (37) 48.  
 parsley, (35) 847.  
 peonies, (33) 56.  
 pepper, (39) 455.  
 snap beans, (36) 647.  
 sweet peas, (32) 446.  
 relation to damping-off of truck crops, (35) 844.  
 studies, (26) 448, 647; (34) 749; (36) 251, 751; (37) 155.  
 mali n.sp., description, (36) 148.  
 matthiolae n.sp., description, (38) 850.  
 matthiolae n.sp., studies, (39) 850.  
 n.sp., description, (29) 548.  
 opuntiarum, notes, (34) 543.  
 panacis n.sp., description, (27) 247.  
 panacis, notes, (34) 244.  
 perplexa n.sp., description, (28) 346.  
 sclerotiorum—  
 notes, (27) 446; (31) 539; (40) 847.  
 studies, (34) 443; (37) 350.  
 treatment, (32) 239.  
 sp., notes, (30) 159.  
 sp. on alfalfa, (34) 643.  
 sp., relation to potato stem lesions, (39) 649.  
 spp., fundamental nutrition, (40) 745.  
 spp., notes, (29) 243, 549, 646.  
 spp. on ginseng, (34) 350.  
 trifoliorum—  
 description and treatment, (39) 754.  
 forms and behavior, (36) 246.  
 in Bohemia, (35) 650.  
 investigations, (38) 850.  
 notes, (28) 52, 150, 545, 847; (29) 150, 446, 447, 845; (32) 543; (36) 748; (39) 52.  
 relation to clover sickness, (34) 541; (36) 348.
- Sclerotium—  
 associated with Rhizoctonia on potatoes, (31) 845.  
 bataticola—  
 description, (32) 51.  
 n.sp., description, (30) 150.  
 on peppers, (38) 250.  
 studies, (34) 156; (39) 854; (40) 347.  
 cepivorum, studies, (35) 547.  
 disease of coffee, (40) 252.  
 omnivorum n.sp., description, (33) 647.  
 on lawn grasses, (39) 753.  
 oryzae, notes, (31) 641; (34) 49; (36) 448.  
 oryzae, studies, (30) 244, 540, 845.

- Sclerotium**—Continued.  
 rhizodes, notes, (31) 641.  
 rhizodes, studies, (26) 646; (27) 150.  
 rolfii—  
 description and treatment, (30) 50.  
 notes, (29) 243; (35) 750; (39) 56, 852.  
 on citrus seedlings, (39) 56.  
 fig, (39) 757.  
 grapefruit, (36) 452.  
 sugar cane, (38) 851; (40) 157.  
 sweet potatoes, (36) 451.  
 wheat, (39) 852.  
 resistance of peanuts to, (38) 851.  
 studies, (32) 546; (35) 754; (37) 49, 247, 250.  
 (*Sclerotinia*) *opuntiarum*, notes, (34) 543.  
 sp. on peanuts, (37) 452.  
 tulipae, studies, (39) 655.  
 tuliparum, notes, (26) 851; (27) 851; (35) 51.
- Scolecotria coccicola**, description, (33) 459.
- Scolecotrichum**—  
 caricae, notes, (29) 243.  
 graminis, hosts of, (37) 839.  
 heveae n. sp., notes, (37) 253.  
 sp. on Hevea, (39) 653.
- Scoplesporium coryli** n.sp., description, (37) 748.
- Scolia**—  
 manilae in Hawaii, (40) 854.  
 spp., importation into Mauritius, (39) 869.
- Scolinae** of North America, (28) 858.
- Scolopendrella immaculata**, notes, (28) 854.
- Scolothrips sexmaculata**—  
 notes, (28) 457.  
 parasitic on red spider, (32) 157.
- Scolytid beetles**—  
 characteristics, (30) 554.  
 of Oregon, (37) 666.
- Scolytidae**—  
 feeding habits, (26) 151.  
 identification, (29) 859.  
 key, (39) 65.  
 new species, descriptions, (26) 253.  
 notes, (26) 759.
- Scolytoid beetles**, studies, (32) 758.
- Scolytoidea**—  
 monograph, (32) 658, 758.  
 studies, (32) 658.
- Scolytus**—  
 amygdali, notes, (36) 754.  
 multistriatus, notes, (27) 255; (28) 57.  
 multistriatus, studies, (27) 658.  
 quadrispinosus, notes, (26) 856; (28) 158; (30) 655, 656; (32) 550; (33) 58, 252; (34) 158; (40) 259.  
 quadrispinosus, remedies, (26) 560; (29) 457.  
 rugulosus, see Shot-hole borer.  
 spp., notes, (30) 455; (36) 754.  
 unispinosus, studies, (39) 65.
- Scop wheel**, construction and operation, (27) 687.
- Scopaeothrips unicolor** n. g. and n.sp., description, (27) 454.
- Scopelosoma tristigmata**, notes, (32) 556.
- Score card**—  
 as factor in judging dairy cows, (29) 577.  
 dairy, relation to milk quality, (33) 78.  
 for apples, (28) 492.  
 bread, (30) 859.  
 cheese, (26) 779.  
 corn, (26) 332; (28) 669.  
 creameries and cheese factories, (32) 889.  
 dairies, (30) 679.  
 dairy and beef cattle, (26) 493.  
 dairy farms, (28) 775; (33) 576.  
 farms, (26) 297.  
 food inspection, (29) 661.  
 fruits, (29) 40; (30) 41; (32) 141.  
 Kañr corn, (31) 832.  
 milk stores, (29) 776.  
 potato growing contests, (28) 899.  
 potatoes, (28) 43.  
 restaurants, (28) 661.  
 use in milk inspection, (26) 274.
- Scorias capitata** n.sp., description, (38) 648.
- Scorpion venom**, toxicity, (39) 886.
- Scorpions**, summary of information, (39) 768.
- Scorzonera**—  
 hispanica, accustoming silkworms to, (27) 456.  
 hispanica, betains in, (27) 203.  
 laciniata, appearance in South Australia, (38) 141.
- Scotia saturniae**, parasitic on gipsy moth, (31) 652.
- Scottish**—  
 Agricultural Organization Society, report, (31) 788.  
 Station for Testing and Registration of Agricultural Plants, (40) 700.
- Scottsbluff Experiment Farm**, report, (40) 493.
- Scours** in calves, treatment, (26) 183.
- Scovell, M. A.**, biographical sketch, (27) 401; (34) 694.
- Scrapie** in sheep, (30) 783; (32) 276.
- Scrapie**, notes, (34) 382.
- Screen wire cloth**, durability, (39) 162.
- Screenings**—  
 analyses, (28) 464; (29) 271, 367, 467; (30) 371; (31) 73, 366, 663; (32) 169; (33) 71, 870; (34) 169, 371, 663, 759; (36) 65, 167; (37) 471; (39) 370.  
 analyses and digestibility, (29) 366.  
 as adulterant in feeds, (30) 466.  
 feeding value, (29) 866; (34) 663.  
 for poultry, (33) 763.  
 for sheep, (32) 770.  
 ground, analyses, (34) 665; (38) 67.  
 use in mixed feeds, (32) 770.
- Screws**, use in houses, (31) 787.
- Screws**, wood, transverse strength of, (30) 889.
- Screw-worm**—  
 fly in Hawaii, (40) 263.  
 fly in Panama, (39) 661.  
 fly, new generic name, (34) 756.  
 life history and remedies, (38) 160.  
 notes, (26) 781; (29) 454.  
 relation to myiasis aurium, (31) 777.
- Scrubber** for ammonia distillation, (40) 806.
- Scudderia furcata**—  
 notes, (33) 58.  
 studies, (33) 451.
- Scurfy**—  
 bark louse, see Scurfy scale.  
 scale, notes, (26) 753; (28) 156, 353; (29) 251; (31) 60; (34) 752; (35) 256.  
 scale on Norway maple, (33) 858.
- Scurfy**—  
 experimental, in guinea pigs, (36) 62, 363.  
 in guinea pigs, etiology, (27) 567.  
 in Zhob, Baluchistan, (36) 563.  
 infantile, relation to milk, (30) 861.  
 infantile, studies, (27) 568; (40) 363, 566.  
 infantile, treatment, (40) 869.  
 metabolism of, in an adult, (28) 868.  
 notes, (40) 565.  
 relation to diet, (27) 567; (30) 367, 764; (31) 761; (38) 268, 568.  
 review of investigations, (36) 363.  
 similarity to zeisin, (31) 464.  
 sprouted grains for, (40) 565.  
 studies, (35) 666; (39) 365, 589, 770, 771; (40) 70, 172, 272, 273, 363, 364, 464, 566, 763, 868, 869.  
 summary and digest of data, (36) 161.
- Scutellista**—  
 cyanea, notes, (29) 359.  
 cyanea, parasitic on black scale, (26) 555.  
 gigantea n.sp., description, (33) 460.
- Scutellum coffeanum**, notes, (38) 51.
- Scutigera immaculata**, notes, (27) 655.
- Scydmaenus chevalieri** n.sp., notes, (30) 856.
- Scymnus**—  
 bipunctatus in Philippines, (33) 562.  
 marginicollis, destructive to purple scale, (26) 757.  
 notescens, life history, (29) 253.  
 sordidus, destructive to citrus plant lice, (26) 755.  
 sp., life history, (33) 562.  
 spp., notes, (26) 149; (27) 656; (29) 261.  
 spp. parasitic on red spider, (32) 157.  
 spp., studies, (29) 355.
- Scyphophorus acupunctatus**, studies, (38) 62.
- Sea**—  
 breeze on Long Island, (38) 209.  
 eel, serum of, (40) 880.  
 grass, analyses, (26) 324.  
 lettuce, analyses, (37) 814.  
 mussels, food value, (26) 356.  
 mussels, utilization as food, (31) 356.  
 salt as fertilizer for beets, (26) 43.  
 urchin, canned, analyses, (36) 63.

## Sea—Continued.

- water—  
 as source of potash, (34) 327.  
 bittern, potash from, (39) 328.  
 effect on concrete, (29) 686.  
 effect on nitrification of sewage, (26) 317.  
 use for irrigation, (33) 392.  
 winds, effect on male inflorescences of pine, (38) 331.
- Seals of Laysan Island, (27) 549.  
 Seaside planting, treatise, (40) 447.  
 Seasonal correlations in the Far East, (35) 115; (37) 807.  
 Seasonings, analyses, (30) 257.  
 Seasonings, examination, (31) 656.

## Seasons—

- forecasting, (37) 619.  
 growing, length of, (36) 418.  
 limits of, (34) 14.  
 of Alaska, (39) 124, 125.

## Seaweed—

- analyses, (26) 324; (27) 327, 421; (35) 128, 163, 167, 327; (36) 120.  
 analyses and fertilizing value, (37) 814.  
 as feeding stuff, (35) 167.  
 as fertilizer for potatoes, (38) 432.  
 as food material, (35) 163.  
 biochemistry of, (29) 566.  
 burning in Norway, (29) 517.  
 chemical analyses, (40) 725.  
 composition and use, (26) 126.  
 culture in Ireland, (33) 819.  
 fertilizing value, (26) 324; (31) 517, 829; (38) 624; (40) 724.  
 for packing birds, (32) 672.  
 for potatoes, (33) 330.  
 industry in France, (31) 517.  
 mucilage, use against fruit pests, (32) 56.  
 Philippine, use as food, (40) 557.  
 potash from, (26) 726; (27) 724; (28) 522; (29) 128; (33) 819; (34) 26, 327.  
 utilization, (34) 298.

## Secale—

- cereale, chromosome numbers in, (27) 636.  
 montanum, relation to cultivated rye, (32) 131.

## Secchium edule—

- analyses, (31) 863.  
 culture experiments, (30) 632.  
 notes, (29) 461; (30) 532; (34) 835.  
 Secodella n. spp., descriptions, (34) 363.  
 Secretin, effect on circulating blood, (39) 285.  
 Secretions, internal, treatise, (30) 380.

## Sedge rusts—

- studies, (34) 744.  
 taxonomy, (33) 130.

## Sedges—

- of Guam, (31) 467.  
 of Philippines, (33) 433.  
 Sedimentation glass, description, (31) 811.

## Sedoheptose, notes, (37) 502.

## Sedulothrips insolens in Trinidad, (40) 649.

## Sedum sieboldii as affected by radium, (28) 825

## Seed—

- analyses, interpretation and use, (29) 143.  
 association in Sweden, (40) 823.  
 bed frame, nursery, description, (35) 452.  
 beds, preparation, (37) 227.  
 beds, sterilization, (38) 556.  
 coats, permeability, (34) 626; (38) 126.  
 coats, semipermeability, (30) 132.  
 collection, notes, (29) 242.  
 control—  
 and plant breeding, (40) 245.  
 in Switzerland, (29) 337.  
 measures in various countries, (39) 744.  
 control station—  
 at Christiania, report, (28) 315.  
 Graz, report, (28) 414.  
 Lund, report, (28) 46.  
 Rostock, (32) 833.  
 Zurich, (32) 833.  
 Danish, report, (27) 39.  
 control stations—  
 in Europe, (31) 835.  
 in Finland, report, (30) 599.  
 in Norway, (30) 194.  
 corn maggot, see *Phorbia fusciceps*.  
 corn, storing under tropical conditions, (39) 738.  
 demonstration tests in Alaska, (39) 125.  
 determination of freshness and vitality, (26) 44.

## Seed—Continued.

- drill, hand, description, (28) 736.  
 drill, test, (29) 893.  
 drills, adjustment, (28) 85.  
 drills, tests, (27) 387; (30) 292.  
 examination, (29) 740; (31) 509.  
 fairs in Canada, (33) 697.  
 farms in India, report, (26) 232.  
 formation and parthenocarp in bananas, (31) 535.  
 growers' association in Canada, (26) 839.  
 harvester for clover, (39) 292.  
 houses, fumigation, (29) 641.  
 improvement associations in Sweden, (26) 436.  
 industry in Germany, (36) 638.  
 industry in New York, (34) 40.  
 inspection—  
 and analyses, (35) 140.  
 in Argentina, (37) 823.  
 Arizona, (31) 155.  
 Canada, (30) 236.  
 Colorado, (39) 343.  
 Connecticut, (36) 39.  
 Denmark, (29) 433; (37) 742; (40) 832.  
 England and Wales, (40) 339, 637.  
 Germany, (28) 736.  
 Kentucky, (39) 443.  
 Maine, (26) 838; (29) 144; (31) 43; (32) 833; (34) 736; (36) 467; (37) 40; (39) 343; (40) 443.  
 Maryland, (26) 333; (36) 442; (37) 541; (39) 343; (40) 535, 831.  
 Michigan, (28) 836; (32) 635.  
 Minnesota, (32) 635; (35) 642; (37) 446; (40) 338.  
 Missouri, (38) 633.  
 Montana, (31) 633; (32) 740; (35) 835; (37) 238; (40) 443.  
 New Hampshire, (27) 536; (31) 139; (32) 635; (34) 531; (36) 739; (39) 842.  
 New Jersey, (31) 532; (34) 832; (36) 836; (37) 239, 645; (39) 842.  
 New South Wales, (40) 635.  
 New York State, (29) 40; (31) 139; (32) 741; (35) 740; (39) 541.  
 New Zealand, (37) 446.  
 North Carolina, (27) 536; (29) 144; (31) 139; (33) 836; (38) 240; (40) 338, 443.  
 North Dakota, (33) 138.  
 Pennsylvania, (34) 143; (36) 739; (39) 238.  
 Queensland, (40) 314, 415.  
 Saxony, (32) 689.  
 Vermont, (32) 741; (36) 534; (38) 441.  
 Washington, (29) 266.  
 Wisconsin, (34) 143.  
 Zurich, Switzerland, (38) 538.  
 introduction, relation to phytopathological problems, (40) 343.  
 law in—  
 Canada, (27) 643; (39) 744.  
 Colorado, (38) 140; (39) 238.  
 Maryland, (29) 337; (32) 740; (40) 146.  
 Massachusetts, need of, (28) 395.  
 Michigan, (28) 836.  
 New Hampshire, (27) 536; (29) 741; (31) 139; (39) 842.  
 New Jersey, (28) 339; (31) 532; (35) 835.  
 New York, (29) 40.  
 North Dakota, (30) 342.  
 Oregon, (35) 471.  
 Vermont, (32) 741.  
 Wisconsin, (32) 635; (34) 143.  
 Wyoming, (33) 138.  
 law, notes, (29) 633.  
 law, uniform, proposed principles, (39) 239.  
 oils, digestibility, (39) 571.  
 "preparator," description, (27) 235, 739.  
 production—  
 detrimental conditions, (39) 841.  
 in Sweden, (39) 644.  
 in Switzerland, (40) 833.  
 in western hemlock, (38) 644.  
 physiology of, (30) 433.  
 proteins, nutritive values, (39) 665, 666.  
 proteins, studies, (40) 69, 563.  
 red clover, (40) 627.  
 reports, (38) 343, 441, 639, 743, 841; (39) 38, 138, 238, 343, 443, 644, 744; (40) 146, 245, 338, 535, 831  
 reserve material, effect on development of plants, (26) 729.

Seed—Continued.

rooms, heating to destroy insects, (38) 241.  
 selection, (31) 226, 829.  
 selection—  
     and testing, (36) 638.  
     based on transparency, (30) 233.  
     new basis for, (29) 516.  
     notes, (26) 141.  
 setting by cultivated plants, (27) 329.  
 supply of United States, (39) 443.  
 tester, rag-doll, (39) 238.  
 testing, (27) 95, 142, 491, 840; (31) 43, 835; (35) 93, 140; (39) 238, 847.  
 testing—  
     accuracy and uniformity of results in, (26) 200.  
     at Danish Seed Control Station, (35) 452.  
     international conference, (26) 44.  
     key, (36) 338.  
     methods, standardization, (31) 639.  
     papers on, (39) 238.  
     precipitin reaction, (28) 204; (29) 144.  
     tests, (36) 541.  
     tests, variations in, (40) 145.  
     treatment, (26) 539; (27) 132; (39) 238, 248, 353, 354, 363, 549, 851, 853.  
     treatment with bromin, (40) 443.  
     weight, relation to plant characteristics, (29) 522; (31) 824.  
     weight, relation to plant mortality, (31) 35.  
**Seeding**—  
     drill for nursery rows, (40) 228.  
     experiments, plot competition in, (39) 830.  
     fall, notes, (30) 197; (38) 95.  
     machine for garden or nursery planting, (27) 191.  
**Seedlings**—  
     abnormal, notes, (30) 329; (36) 734.  
     artificial nourishment, (27) 730.  
     as affected by—  
         electrical discharges, (28) 326.  
         narcotics, (31) 730.  
         radium rays, (27) 630.  
     damping-off, (37) 651.  
     damping-off, treatment, (30) 846.  
     fasciated, morphology and physiology, (27) 524.  
     mounting in culture solutions, (31) 426.  
     of trees and shrubs in France, (26) 642.  
     phototropic responses in, (33) 29.  
**Seeds**—  
     abortive, position in pod, (40) 521.  
     absorption of toxic salts by, (37) 527.  
     Acacia, germination, (39) 226.  
     adulteration, (35) 140; (38) 343.  
     after-ripening studies, (29) 527.  
     analyses, (26) 739; (27) 39, 239, 342, 815; (28) 315, 811; (29) 144; (32) 534; (35) 8.  
     and fruits, treatise, (27) 729.  
     and leaves, dietary relationship, (37) 264.  
     apparatus for sterilizing, (26) 32.  
     as affected by—  
         cafein, (27) 330.  
         electrical discharges, (28) 326.  
         electrolytes, (33) 727; (35) 332.  
         pod position, (34) 134.  
         poisons, (29) 529.  
         Roentgen rays, (34) 334.  
     asepticizing, (28) 826; (29) 433.  
     awned grass, abnormal germination, (30) 633.  
     bent, characteristics, (39) 533.  
     bibliography, (29) 626.  
     breeding and distributing by experiment stations, (26) 434.  
     buried, germination, (34) 832.  
     buried, vitality, (34) 732; (36) 330.  
     catalase and oxidase content, (40) 222.  
     chemical treatment, (29) 326.  
     cleaned, (39) 238.  
     cleaning, (40) 40.  
     cleaning and treating, (28) 536.  
     cleaning device, (39) 538.  
     copper determination in, (40) 807.  
     crop tests in Norrland, (40) 832.  
     delayed germination of, (26) 128; (34) 30.  
     determination of—  
         germination energy of, (29) 538.  
         life duration, (32) 221; (33) 128; (38) 822.  
     disinfection, (26) 820; (35) 444.  
     disinfection experiments, (31) 738.  
     disinfection with bromin, (37) 542.

Seeds—Continued.

dissemination by birds, (27) 549.  
 distribution, (28) 46, 488; (33) 694; (36) 494; (39) 139.  
 distribution by ocean currents, (38) 125.  
 distribution in Canada, (28) 638.  
 dormancy in, (36) 330; (39) 225.  
 edible and oil-producing, in West Africa, (36) 611.  
 edible, of Guam, (28) 142.  
 effect—  
     of drying on germination, (27) 201.  
     of size on yield, (29) 632.  
     of soaking in water, (40) 727.  
     on size of fruit, (27) 231, 524.  
 ensiled, germination, (29) 741.  
 exportation from Sweden, (26) 436.  
 extracting establishment in Prussia, (27) 347.  
 factors affecting oil content, (32) 427.  
 forest, effects of environment, (28) 543.  
 forest, preservation experiments, (26) 51.  
 formation as affected by light, (29) 526.  
 formation of hydrocyanic acid in, (27) 132.  
 fruit, hydrocyanic acid content, (27) 11.  
 fumigating, (32) 650.  
 garden, disinfection and fumigation, (40) 638.  
 garden, home production, (39) 444.  
 garden, saving, (38) 241.  
 germ plasm, modifying, (39) 30.  
 germinating—  
     as affected by electricity, (28) 732.

     salt, (32) 223.  
     salt concentration, (39) 732.  
     sulphuric acid, (27) 524; (29) 628.  
     superphosphate, (31) 729.  
     temperature, (26) 200, 821; (31) 222; (35) 222.  
     thorium X, (29) 131.  
     various solutions, (27) 330.  
     volatile conifer products, (32) 618.  
     warm water, (36) 430.  
     weather, (38) 15.  
 germination—  
     experiments, (38) 441.  
     in culture solutions, (31) 426.  
         electrolytes, (37) 431.  
         electrolytic solutions, (31) 427.  
         heated soils, (26) 640; (35) 722.

## Seeds—Continued.

- germination—continued.  
 in light, (31) 222, 323.  
 oxygenated water, (36) 29.  
 partially sterilized soils, (30) 225.  
 salt solutions, (29) 218; (38) 429.  
 physiology, (33) 29.  
 promoting, (28) 395.  
 rôle of oxygen in, (30) 629.  
 studies, (26) 531; (27) 220; (29) 828; (30) 30;  
 (32) 329; (33) 310, 825, 826; (39) 526.  
 tests, (26) 44, 200; (28) 327, 339, 639; (29) 143;  
 (30) 235, 837; (31) 43; (37) 26.  
 germination tests—  
 in natural mediums, (31) 633.  
 suggestions for, (29) 740.  
 tolerance table, (37) 541.  
 v. electrical response in, (35) 523.  
 variable results of, (30) 141.  
 germinative ability and vegetative force, (29)  
 740.  
 grain, as affected by environment, (40) 233.  
 graminaceous, rust in, (32) 642.  
 growing and storing, (31) 139.  
 growing on the farm, (35) 140.  
 hard, germination, (31) 228; (34) 225.  
 hard, treatment, (28) 434.  
 heteromorphic, germination, (28) 631.  
 histological characteristics, (27) 112.  
 home-grown, (40) 340.  
 hydrolytic changes in, (32) 626.  
 identification, biological method, (32) 42.  
 immature, formation of starch in, (33) 523.  
 impermeable, viability, (35) 740.  
 importation law, (28) 536.  
 imported, control and disinfection, (27) 656.  
 imports, (26) 128, 629; (27) 329, 637; (28) 332; (29)  
 424; (30) 730; (31) 327; (32) 628; (33) 827; (34)  
 336, 527; (35) 29; (37) 819; (38) 629; (39) 226, 333,  
 632; (40) 327.  
 improved, distribution in Kansas, (26) 131.  
 improvement, (28) 536.  
 improvement in Canada, (28) 739; (37) 141, 831.  
 improvement in Sweden, (27) 437.  
 impurities of, treatise, (31) 835.  
 in relation to number of ovules, (31) 523.  
 influence of environmental conditions, (40) 727.  
 injuries by disinfectants, (32) 647.  
 insects affecting, (26) 453.  
 large v. small in plant production, (31) 634.  
 lead arsenate in, (27) 243.  
 legume, investigations, (40) 39.  
 leguminous, as affected by heat, (33) 629.  
 leguminous, ash analyses, (29) 861.  
 lessons on, (31) 394.  
 longevity, (32) 634.  
 longevity in relation to temperature, (37) 725.  
 longevity tests, (40) 339.  
 loss of viability in storage, (37) 725.  
 maturation, (36) 731, 824.  
 measuring expansive force of, (35) 28.  
 medicinal, notes, (30) 145.  
 methods of analysis, (31) 806; (32) 741.  
 moisture intake at various temperatures, (35)  
 222.  
 nitrogen distribution in, determination, (40)  
 502.  
 of Bombay, germination tests, (27) 39.  
 cultivated plants and their identification,  
 (38) 240.  
 fleshy fruits, germination, (38) 224.  
 Japanese Brassica, (40) 626.  
 Leguminosae, (31) 523.  
 trees and shrubs in France, (26) 642.  
 oil, *see* Oil seeds.  
 packeted vegetable, germination tests, (28) 143.  
 parasites in, (39) 225.  
 parasitic infection of, (35) 244.  
 pedigree—  
 dissemination, (37) 437.  
 inspecting and distributing, (40) 233.  
 value, (40) 228.  
 permeability, selective, (37) 25.  
 persistence and vitality of bacteria on, (26) 820.  
 phosphorus compounds in, (26) 501.  
 phosphorus content, variation in, (27) 108.  
 planting depths, (40) 227.  
 position in planting, (40) 635.

## Seeds—Continued.

- powdered, respiration, (27) 220.  
 preparation, (26) 436.  
 preparation and mounting, (34) 94.  
 preservation, (36) 340.  
 prices and movement in 1916, (37) 492.  
 production, handling and marketing, (38) 343.  
 protection from insects, (39) 444.  
 protection from rodents, (31) 846.  
 proteins of, differentiation, (34) 577.  
 pure, importance of, (26) 44.  
 purity—  
 tests, (27) 342.  
 tests, apparatus and methods, (34) 832.  
 tests by "count," (31) 139.  
 variations, tolerance table, (36) 442.  
 registered, in Canada, (30) 738.  
 relation—  
 of color to germination, (27) 431.  
 size to development and anatomy of  
 plants, (30) 725.  
 size to plant yield, (26) 434.  
 weight to germinability, (30) 522.  
 to number of ovules, (29) 829; (33) 130.  
 reserve material of, effect of suppression, (30) 132.  
 resistance to desiccation, (40) 39.  
 respiration coefficient of, (29) 525.  
 rest period in, (31) 335; (35) 520.  
 ripening, protein formation in, (26) 729.  
 ripening, reversibility of physiological processes  
 in, (29) 526.  
 rôle of caffeine in, (26) 823.  
 rust spores in, (30) 241.  
 sampling, (34) 832; (40) 145.  
 sampling device for, (33) 836.  
 sowing, (40) 147.  
 size and sprout value, relation to yield of small  
 grain, (38) 732.  
 small, improvement, (26) 838.  
 standards in Canada, (26) 839.  
 sterilia preservation, (33) 727.  
 sterility and delayed germination in, (35) 223.  
 sterilization, (27) 28; (28) 727; (29) 243, 844; (35)  
 46; (38) 629.  
 stored—  
 factors affecting viability, (30) 837.  
 insects affecting, (39) 161.  
 variations in weight of, (31) 235.  
 storing in glass bottles and other containers,  
 (32) 833.  
 submerged, longevity, (33) 30.  
 swelling and germination, (36) 29.  
 threshing, cleaning, and grading, (30) 488.  
 translocation of mineral constituents, (34) 427.  
 transmission of diseases by, (36) 844.  
 transportation regulations, (30) 346.  
 valuation, (30) 40.  
 variability in, (30) 331.  
 variation in color, (26) 36.  
 vegetable, breeding work, (40) 833.  
 vegetable, growing in Canada, (34) 635.  
 viability, (26) 819; (40) 299.  
 viability as affected by cold, (27) 329.  
 vitality, (27) 739.  
 vitality—  
 after passing through cattle, (34) 531; (36)  
 223.  
 conservation, (31) 824.  
 detection, (29) 836.  
 electrical method for determining, (35) 523.  
 experiments, (38) 224.  
 in grain screenings, (29) 366.  
 weed—*see also* Weed seeds.  
 analyses, (28) 464.  
 analyses and digestibility, (29) 366.  
 as affected by sulphuric acid, (27) 524.  
 as an adulterant in feeds, (30) 466.  
 buried, (39) 239.  
 content, (34) 832.  
 description, (31) 835; (34) 143; (36) 534.  
 description and key, (38) 343.  
 destruction, (30) 826.  
 determination in soils, (30) 838.  
 dispersal by birds, (30) 248; (31) 547.  
 germination, (27) 132; (28) 427.  
 germination after passing through digestive  
 tract, (26) 839; (29) 367.  
 germination studies, (30) 332.

Seeds—Continued.  
 weed—continued.  
     germinative ability, (29) 836.  
     identification, (27) 840.  
     in farm lands, (33) 138.  
     grain, (26) 135.  
     imported seed, (38) 539.  
     screenings, (34) 663.  
     soil, (34) 736.  
     notes, (27) 643.  
     school lessons on, (32) 898.  
     treatise, (31) 835.  
     vitality in cultivated soils, (31) 634.  
 weight in relation to pod type, (38) 535.  
 wheat, size as affecting resultant plants, (39) 743.

Seepage—  
 and return waters, (38) 288.  
 effect on quality of sugar beets, (28) 43.  
 experiments in India, (28) 588.  
 from canals, (32) 380.  
 from irrigation systems, (29) 181, 289; (34) 387.  
 measurements, (28) 83.  
 relation to rainfall, (27) 116.

Seeta beans, notes, (26) 362.  
 Seeta beans, varieties, (26) 829.  
 Segregation in plants, (39) 123, 825.  
 Selches in lower Lake Michigan, (28) 415.  
 Seine River, pollution by sewage, (28) 619.  
 Seira nigromaculata injurious to pines, (30) 161.

Seismic—  
 observations at Habana, (28) 213; (39) 419.  
 zones, detection, (34) 113.

Seismology—  
 at Pan American Scientific Congress, (34) 615.  
 bibliography, (32) 810; (33) 320, 717.

Seius pomi, parasitic on red spider, (32) 157.

Selaginella rupestris, allies in southeastern United States, (40) 133.

Selection—  
 effect on heredity characters, (30) 670.  
 effect on plants, (35) 334.  
 experiments with *Paramecium*, probable error of a difference, (39) 179.  
 mass, effects of, (34) 74, 564.  
 Mendelian interpretation of, (33) 822.  
 natural, treatise, (31) 865.  
 review of investigations, (38) 64.  
 rôle in evolution, (39) 573.  
 studies with piebald rats, (39) 877.

Selenospidus articulatus, notes, (31) 58.  
 Selenomastix ruminantium, description, (30) 234.  
 Selenothrips rubrocinctus in Trinidad, (40) 649.  
 Self-binders, adjustment and repair, (28) 291.  
 Self-feeders for pigs, (33) 266; (37) 90, 269, 270; (38) 475, 673.

Semblis lutria, egg parasite of, (26) 557.  
 Semiferous tubules, relation to secondary sex characters, (40) 467.

Semipermeable membranes, diffusion through, (34) 626.

Sempervivum rust, studies, (28) 845.

Senecio—  
 jacobaea, life history and eradication, (36) 535.  
 jacobaea, relation to dunsickness, (26) 490.  
 latifolius, relation to hepatic cirrhosis, (27) 79.  
 vulgaris, heredity of characters in, (29) 216.

Sensitive plant, notes, (26) 362.  
 Sensitive plant, permeability of pulvinus, (39) 730.  
 Sensitizin and precipitin, relationship, (34) 778.

Seoptera colon, trapping, (40) 169.

Sepsidae, synopsis, (37) 665.  
 Sepsis, in calves, notes, (26) 586.  
 Sepsis, treatment, (29) 175.

Septic—  
 arthritis in foals, (26) 384.

tank—  
 and cesspool combined, description, (31) 190.  
 description, (37) 188, 286.  
 plans and specifications, (27) 167.

tanks—  
 construction, (31) 893; (33) 691, 892.  
 construction and operation, (28) 86; (38) 592.  
 design and construction, (28) 686; (34) 887.  
 for creamery sewage, (32) 889.  
 for residential sewage disposal, (31) 787.  
 notes, (30) 789, 790.  
 tile pipe, (39) 86.  
 use in sewage disposal, (28) 86.

Septicemia—  
 bacillary, of *Arctia caja*, (29) 855.  
 contagious, in swine, (39) 790, 891.  
 group of bacteria, (40) 685.  
 hemorrhagic, (39) 81, 183, 390, 488, 582, 587, 679  
 683; (40) 86, 183, 778.  
 hemorrhagic—  
     bacterium, opsonic power of serums against,  
     (27) 285.  
     control in Michigan, (37) 274.  
     diagnosis, (28) 281.  
     feeding and immunity in (26) 374.  
     immunization, (28) 281, 881; (29) 179; (34)  
     184; (35) 77; (37) 83, 179, 379; (38) 784; (40)  
     183.  
     in cattle, (34) 478, 782; (36) 79, 675, 676.  
     cattle, treatment, (31) 780; (32) 82.  
     mules, (38) 184.  
     sheep, (29) 179; (40) 782.  
     swine, (40) 783.  
     United States, (37) 274.  
     notes, (37) 477.  
     organisms, (37) 583; (38) 179.  
     papers on, (34) 184.  
     pleomorphism and mutation in organisms  
     of, (35) 77.  
     preparation of serum, (36) 779.  
     structure of bacillus, (31) 879; (32) 32.  
     studies, (37) 78; (38) 887.  
     treatment, (28) 82; (35) 379, 784.  
     vitality of causative organism, (31) 579.  
 in cockchafer and silkworms, (30) 53.  
 in hogs, due to vaccination, (39) 392.  
 in poultry, investigations, (27) 686.  
 pluriform, in sheep, immunization, (27) 886.  
 pluriformis ovium, immunization, (32) 184.  
 streptococci, treatment, (39) 488.

Septobasidium—  
 albidum, notes, (29) 752.  
 biological notes, (26) 52.  
 conidia-bearing species, (29) 752.  
 pedicellatum, notes, (29) 49.  
 spp., biology of, (28) 556.

Septogloeum—  
 anemones n.sp., description, (34) 242.  
 archidies, notes, (29) 347; (31) 243.  
 niisimae n.sp., description, (37) 652.  
 ochroleucum n.comb., description, (37) 748.  
 sp. on field peas, (36) 846.  
 ulmi, notes, (35) 454.

Septoria—  
 acanthi romana n.var., description, (37) 550.  
 alhaginis n.sp., notes, (34) 842.  
 alhaginis, winter stage of, (35) 844.  
 ampelina, notes, (37) 52.  
 api—  
     graveolentis n.sp., description, (35) 846.  
     pathological forms, (26) 545.  
     relation to celery leaf spot, (33) 547.  
     studies, (30) 847.  
     treatment, (33) 848.  
 aurea, perfect stage, (38) 546.  
 azaleae, notes, (30) 247.  
 bataticola n.sp., description, (32) 51.  
 bataticola, studies, (34) 156.  
 chrysanthemella, notes, (35) 550.  
 cucurbitae n.sp., description, (37) 550.  
 gladioli, studies, (36) 453.  
 glutarum, notes, (38) 646.  
 glycines n.sp., description, (35) 247.  
 graminis, notes, (29) 845.  
 leucanthemi, notes, (31) 641.  
 lycopersici—  
     description and treatment, (32) 147.  
     dissemination, (40) 644.  
     host limitations, (37) 842.  
     notes, (29) 246; (30) 749; (39) 149, 651, 753.  
     on tomatoes, (34) 53.  
     studies, (35) 653.  
     treatment, (29) 435; (33) 53; (35) 350; (36)  
     750; (38) 150; (39) 756.  
 n.spp., descriptions, (27) 848; (37) 748, 749.  
 ochroleuca, notes, (37) 748.  
 oleae n.sp., description, (35) 353.  
 on celery, (39) 753.  
 on peas, (39) 354.  
 parasitica, studies, (28) 750.  
 parietariae, notes, (26) 341.  
 perillae n.sp., description, (34) 242.  
 perillae, notes, (37) 652.

## Septoria—Continued.

- persicariae n.sp., description, (39) 152.  
 petasitidis n.sp., description, (37) 652.  
 petroselini apii—  
 notes, (32) 239, 544, 545; (34) 49, 350; (36) 749.  
 studies, (29) 846; (33) 742; (35) 846.  
 treatment, (30) 348.  
 wintering, (37) 840.  
 petroselini—  
 description and treatment, (28) 847.  
 notes, (27) 849.  
 on celery in storage, (31) 447.  
 piricola, notes, (34) 846; (35) 454; (37) 550; (40) 53.  
 pisi, notes, (32) 544.  
 pisi, relation to pea blight, (29) 447.  
 ribis, notes, (26) 446.  
 ribis, perfect stage, (36) 246.  
 ribis, studies, (33) 347; (38) 546.  
 rubi, notes, (33) 647.  
 sp., notes, (26) 649; (27) 45; (31) 447; (37) 550.  
 sp. on cereals, (32) 843.  
 sp., studies, (30) 349.  
 spp., notes, (29) 49; (30) 448.  
 spp. on Ribes, life histories, (37) 551.  
 spp. on wheat in Australia, (37) 149.  
 studies, (28) 443.

Septum, nasal tubercular, in bovines, (27) 184.

## Sequoia—

- pitch moth, studies, (31) 652.  
 sempervirens, ray tracheids in, (30) 744.  
 Serangium giffardi n.sp., description, (32) 453.  
 Serenoa serrulata, notes, (30) 145.  
 Serica anthracina, notes, (30) 160.  
 Serica n.sp., notes, (29) 858.  
 Sericaria mori, embryology, (30) 456.  
 Sericultural station at Padua, report, (38) 859.  
 Sericulture, *see* Silk culture and Silkworm.  
 Sericothrips n.sp., description, (37) 258, 849.

## Sero diagnosis—

- Castellani test in, (40) 288.  
 treatise, (30) 276.  
 use in grape propagation, (34) 42.  
 Serological investigations, error in, (32) 178.  
 Serology, index catalogue, (32) 578.  
 Seroprotease, studies, (39) 608.  
 Serows in British Museum, (30) 767.

## Serpentine—

- fertilizing value, (32) 622; (40) 815.  
 leaf miner, studies, (29) 857.  
 Serpents, wounds and diseases, (40) 55.  
 Serphoidea, phoresy in, (40) 459.

## Serradella—

- as cover crop for orchards, (37) 833.  
 as green manure, (39) 816.  
 assimilation of nitrogen by, (31) 523.  
 composition and digestibility, (27) 669.  
 culture experiments, (30) 632; (33) 33; (35) 736.  
 culture on moorland, (30) 229.  
 drying, (27) 669.  
 fertilizer experiments, (32) 842; (36) 626.  
 fertilizing value, (26) 438; (32) 216.  
 germination as affected by fertilizers, (29) 327.  
 growth as affected by fertilizer salts, (29) 329.  
 history and botanical notes, (35) 736.  
 inoculation, (31) 131, 524; (35) 322.  
 noddile bacteria of, (32) 33.  
 relation of tops to roots, (31) 733.  
 seeds, microscopic characteristics, (40) 508.  
 water culture experiments, (28) 817.

## Serum—

- albumin, identification in solutions, (26) 201.  
 anaphylaxis in bovines, (32) 178.  
 and vaccine therapy, notes, (29) 377.  
 anti-hog cholera, preparation and use, (26) 87.  
 antistreptococcus, studies, (26) 579.  
 antitypsin during inanition, (35) 486.  
 as affected by agar, (36) 575.  
 as affected by lecithin, (31) 478.  
 as substitute for broth for bacteriological purposes, (36) 575.  
 blood, method of obtaining, (38) 181.  
 bovine, for treatment of infectious diseases, (40) 583.  
 bovine, haptines in, (26) 374.  
 cytotoxic immune, studies, (33) 385.  
 density and solution volume, (31) 804.  
 determination of cholesterol in, (33) 315.  
 determination of viscosity, (26) 374.  
 diagnosis, optical method, studies, (27) 476.  
 distribution, pipette holder for, (40) 581.

## Serum—Continued.

- ferment, preparation and use, (29) 280.  
 from old horses, (40) 580.  
 globulin, identification in solutions, (26) 201.  
 globulins in bacterial infection and immunity, (36) 778.  
 hemolysins in goats, studies, (27) 476.  
 human, autoagglutinin in, (39) 186.  
 inhibitory action on bacteria staining, (37) 478.  
 injections, effect on rectal temperature of guinea pigs, (28) 781.  
 law in Maryland, (29) 385.  
 leucocytic, nature and use, (26) 580.  
 medium, substitute, (39) 583.  
 nontoxic, preparation, (31) 479.  
 normal, opsonins of, (33) 178.  
 of cows immunized against tuberculosis, (33) 181.  
 domestic animals, refraction coefficient, (32) 778.  
 glandered animals as a precipitant for mallein, (26) 483.  
 pigs, refractive index, (33) 483.  
 sea eel, toxicity and properties, (38) 582; (40) 880.  
 sick horses, sodium chlorid figures, (40) 287.  
 various animals, comparison, (30) 68.  
 pathology, notes, (27) 284.  
 physiology, international catalogue, (34) 658; (35) 574; (39) 190; (40) 869.  
 polyvalent hemolytic, preparation, (26) 374.  
 precipitating, from sunflower seeds, (28) 801.  
 precipitin, production, (35) 881.  
 precipitin reactions, discussion, (26) 482.  
 preparation and standardization, (33) 280.  
 preservatives, pharmacological action, (33) 280.  
 proteases, studies, (34) 674.  
 proteid bodies, biological value, (28) 66.  
 proteins of different animals, (28) 875; (32) 861; (35) 372.  
 reactions, mechanism, (37) 477.  
 reactions, relation between, (36) 478.  
 sensitization, relation to antitoxin dosage, (32) 372.  
 sickness, prophylaxis, (40) 580.  
 sickness, studies, (39) 284.  
 study, laboratory course, (35) 73.  
 therapy—  
 and diagnosis, handbook, (26) 578.  
 antigangrenous, (40) 83, 84, 381, 884.  
 in trichinosis, (40) 184.  
 treatise, (31) 177.  
 vaccination, and immunity, treatise, (27) 76.  
 toxicity, primary, notes, (29) 477.  
 treating with parabin, (37) 376.  
 veal agar, notes, (38) 684.  
 Serums—*see also* Antiserum.  
 acid-soluble phosphorus of, (35) 714.  
 analyses and nitrogen distribution, (36) 80, 576.  
 animal, antihemolysin in, (28) 179.  
 antiagressin, notes, (27) 883.  
 antibacterial action, (35) 381.  
 antitoxic—  
 and bactericidal, notes, (32) 78.  
 concentration, (35) 680; (36) 178, 179; (37) 877; (38) 504; (39) 487; (40) 287, 288.  
 production, (40) 580.  
 antituberculous immune, examination, (28) 377.  
 autodigestion, (39) 608.  
 bactericidal action, (26) 175.  
 diagnostic, inspection in Oregon, (32) 778.  
 effect on tissues, (35) 881.  
 guaranties of preparation and distribution, (39) 680.  
 hydrogen-ion concentration, determination, (38) 505.  
 immune—  
 obtaining from large animals, (26) 676.  
 preservation, (26) 83.  
 selective absorption, (40) 678.  
 taenolysins in, (28) 375.  
 treatise, (26) 579; (38) 378.  
 in treatment and diagnosis, (36) 575.  
 infusion apparatus for administering, (32) 272.  
 inhibition of precipitation by, (26) 175.  
 intraspinal injections of, (32) 876.  
 phagocytic action on pathogenic bacteria, (27) 285.  
 polyvalent, use, (36) 277.

Serums—Continued.

- precipitating, (26) 175.
- preparation, (36) 779.
- preparation and sale in United States, (32) 875.
- preservatives in, determination, (38) 316.
- preservatives in, toxicity, (38) 283.
- production—
  - and distribution, (36) 675.
  - and distribution in Holland, (29) 377; (38) 180.
  - and valuation, (27) 476.
- propagation and sale, (28) 677; (39) 787.
- protective and curative, valuation, (32) 78.
- purification, (39) 183.
- syphilitic, precipitation of organic colloid by, (39) 487.

Sesam—

- as honey-producing plant, (40) 65.
- cake—
  - acidity, (32) 259; (35) 770.
  - agglutinating properties, (31) 774.
  - analyses, (26) 165, 266, 267, 363, 770; (27) 570, 872; (29) 467; (30) 67, 268, 467; (31) 467; (33) 170, 870; (34) 263.
  - detection in linseed cake, (28) 873.
  - digestibility, (28) 464.
- cake, effect on—
  - composition of milk, (26) 879.
  - milk and butter, (34) 570.
  - milk production, (26) 273.
  - quality of butter, (26) 369.
- cake—
  - feeding value, (38) 572.
  - fertilizing value, (38) 527.
  - for dairy cattle, (34) 874.
  - meal, analyses, (31) 864.
  - nutritive value, (28) 673.
  - sugar content, (37) 208.
- culture and utilization, (33) 438.
- culture experiments, (27) 336; (38) 336, 527, 635.
- diseases in India, (33) 846.
- effect on following crop of cabbage, (31) 329.
- improvement, (28) 736.
- insects affecting, (28) 555.
- meal, analyses, (30) 268; (34) 467; (38) 665.
- meal, bacterial flora of, (32) 75.
- meal for pigs, (29) 371.
- oil, chemical and physiological tests, (33) 362.
- detection, (26) 207, 497; (29) 613; (37) 13.
- detection in butter, (26) 212.
- digestibility, (36) 860.
- hardened, analyses and digestibility, (33) 564.
- in margarin, (31) 811.
- physical constants, (35) 312.
- press cake, analyses, (40) 72.
- rot bacteria affecting, (29) 345.
- rotation crop for, (36) 830; (38) 526.
- seed, analyses, (31) 864.
- seed, composition and nutritive value, (34) 565.
- varieties, (30) 525, 731.
- wilt, notes, (31) 641; (34) 50; (38) 351.

Sesamia—

- cretica, notes, (27) 53.
- fusca, life history and remedies, (29) 356.
- inferens, notes, (33) 856; (35) 58.
- nonagrioides, notes, (33) 554.
- vuteria, notes, (38) 465.

Sesamum—

- culture in Philippines, (40) 632.
- indicum—
  - analyses, (38) 368.
  - culture experiments, (32) 227.
  - loss in weight after harvesting, (38) 635.

Sesbania—

- aculeata as green manure, (30) 339; (33) 131; (36) 232; (37) 824.
- aegyptiaca as green manure, (37) 320.
- description, (30) 828.
- grandiflora, notes, (30) 525.

Sesla—

- brunneri n.sp., description, (33) 655.
- custaneae n.sp., description, (29) 758.
- geliformis, notes, (38) 762.
- novaroensis, studies, (33) 454.
- rhododendri, notes, (33) 252.
- rileyana, notes, (35) 657.
- spp., notes, (28) 155.
- tipuliformis, see Currant borer.

Setaria—

- flava, notes, (26) 362.
- glauca, analyses, (28) 768.
- italica, culture experiments, (32) 227.
- italica, notes, (30) 233.
- spp., analyses, (28) 463.
- verticillata, analyses and digestibility, (27) 871; (32) 167.
- viridis, analyses, (34) 39.

Setomorpha—

- margalaestriata n.sp., studies, (40) 854.
- on tobacco, (40) 854.

- Settlers, prospective in Alaska, information for, (35) 295; (36) 791.

- Seuratia spp., descriptions, (27) 450.

- Seven-day fever, causative agent, (40) 85.

- Severinia buxifolia as a stock for citrus, (36) 241.

- Sewage—see also Tannery waste, Wool waste, etc.

- activated-sludge, treatment, (35) 490.
- aeration, (37) 87.
- analyses, (28) 811.
- analysis, textbook, (33) 206.
- as affected by added nitrate, (26) 725.
- as source of ammonium sulphate, (34) 424.
- as source of nitrogen, (38) 625.
- bacteria, relation to shellfish pollution, (27) 212.
- bacteriology, (34) 591.
- changes during purification, (39) 216.
- clarification in Germany, (26) 515.
- disinfection, (28) 487.
- disinfection by chlorid of lime, (29) 512.
- disposal, (31) 592, 893; (34) 790, 886.

disposal—

- and treatment, (26) 215.
- biology, (32) 552.
- by broad irrigation, (36) 183.
- for country homes, (27) 389; (28) 86, 487; (29) 194; (30) 690; (31) 291, 292, 786; (32) 87; (34) 88, 286, 790; (35) 83, 691, 887; (36) 184, 591.
- farms, (33) 784, 892; (34) 687; (37) 589; (38) 188.
- farms, handbook, (28) 789.
- rural schools, (37) 696, 884.
- village and rural homes, (37) 286.
- from hospitals and medical establishments, (33) 486.
- in Europe, (28) 619; (30) 512.
- Glasgow, (26) 516.
- Great Britain, (28) 214.
- Illinois, (35) 389.
- industrial and rural communities, (34) 488.
- institutions, (37) 385.
- Milwaukee, (36) 489.
- New South Wales, (29) 785.
- rural districts, (30) 390; (33) 590, 591; (34) 592, 887; (36) 892.
- the Tropics, (31) 489.
- unsewered districts, (32) 387.
- notes, (27) 512; (28) 619; (29) 86; (30) 790.
- on sewer farms, (26) 28.
- plant for Torrance, California, (32) 88.

disposal plants—

- designs, (31) 190.
- for farms, (31) 291.
- residential, design, (27) 17, 590; (32) 890.
- small, (38) 85.
- treatise, (33) 785.

disposal—

- relation to mosquitoes, (32) 554.
- relation to pellagra, (31) 893; (37) 694.
- residential, (33) 691.
- septic tanks for, (28) 86; (31) 787; (34) 591.
- systems, small, construction, (34) 887.
- treatise, (27) 212, 213; (30) 511.
- works, notes, (28) 515.

effluent—

- absorption of oxygen by, (26) 406.
- nitrite content, (26) 406.
- probability of decomposition in, (31) 387.

- farm at Melbourne, (30) 816.
- farm, near Cairo, Egypt, (30) 512.
- farms of Berlin, (26) 317; (27) 318.
- farms of Paris, (28) 619.
- fertilizers from, (33) 219.
- fertilizing value, (26) 716; (28) 514; (30) 621; (31) 316; (34) 886; (35) 629; (40) 135.
- filter files, studies, (40) 356.
- filters, notes, (37) 488, 489.
- filters, tests, (34) 888.

## Sewage—Continued.

- fly, biology, (32) 552.
  - from dairies, purification, (33) 784.
  - from packing houses, treatment, (37) 694.
  - from piggeries, treatment, (33) 684.
  - from sugar refineries, purification, (33) 785.
  - handling, (28) 28.
  - injury to crops, studies, (33) 588.
  - irrigation, (27) 318, 590; (34) 886.
  - irrigation—
    - effect on composition of soils, (26) 614.
    - for forests, (33) 343.
    - in Germany, (34) 687.
    - notes, (37) 185.
    - relation to diseases, (31) 417.
  - methods of analysis, (29) 408; (31) 806.
  - methods of examination, (37) 311; (39) 13.
  - microbiology of, (26) 372.
  - mycology of, (30) 418.
  - nonnitrication in sea water, (26) 317.
  - of New York City, utilization, (33) 124.
  - oxidation without filters, (32) 387; (34) 887.
  - pathogenic organisms in, detection, (38) 188.
  - plants, Imhoff, description, (30) 489.
  - pollution in lower Missouri River, (29) 512.
  - pollution, relation to typhoid fever, (27) 318.
  - purification, (26) 318, 716; (33) 422, 691; (34) 390; (35) 188, 388, 579, 787, 887; (36) 687; (37) 286, 488, 694, 787, 789; (38) 85.
  - purification—
    - and disposal, (32) 88.
    - and disposal in Germany, (34) 687.
    - and utilization, (32) 87.
    - at Atlanta, Georgia, (29) 617.
    - bibliography, (38) 691.
    - by aeration, (34) 488; (38) 490.
    - by bacteria, (28) 686.
    - colloids in, (31) 616.
    - for country houses, (28) 386.
    - Imhoff clarification tank, (26) 215.
    - notes, (28) 124, 318.
    - plant, isolated, construction, (28) 289
    - test of filtering materials, (28) 789.
  - putrescibility test for, (38) 489.
  - residue, analyses, (35) 128.
  - sedimentation tank, new type, (29) 293.
  - sickness in land filtration, (26) 615.
  - sickness in soils, studies, (28) 119.
  - sludge—
    - analyses, (27) 318; (32) 88; (33) 723; (34) 222, 423, 624.
    - as a fertilizer, (32) 88.
    - as a fertilizer in British Isles, (31) 417.
    - cake, analyses, (26) 516.
    - clarification, (31) 417.
    - disposal, (27) 17; (28) 515.
    - disposal, "Grossmann" process, (28) 28.
    - drying, (26) 118.
    - fertilizing value, (27) 318, 327; (30) 621; (31) 316; (33) 423; (34) 219, 222, 423, 624.
    - for arid soils, (34) 621.
    - purification, (28) 289.
    - treatise, (26) 717.
    - treatment in Germany, (26) 515.
    - utilization, (26) 615, 624; (27) 318, 521, 629, 817; (30) 19, 512; (33) 24, 124; (34) 287, 332, 889; (35) 188; (37) 425.
    - utilization in England, (27) 16.
  - tank, rectangular v. circular, (31) 592.
  - tanks, tile pipe, (39) 86.
  - treatment—
    - Dickson centrifuge system, (34) 423.
    - in small communities, (36) 390.
    - plants, residential, construction, (34) 88.
    - plants, small, tests, (35) 287.
    - with activated sludge, (33) 786; (34) 591.
  - use in irrigation, (26) 716.
  - utilization, (26) 716; 717; (29) 617; (30) 399; (31) 417.
  - utilization in Italy, (38) 723.
  - water, methods of analysis, (31) 502.
  - works, small, investigations, (28) 386.
- Sewer—
- air, chemistry and bacteriology of, (28) 592.
  - pipe, methods of testing, (27) 87.
  - pipe, specifications, (29) 290.
  - pipe, tests, (29) 685; (30) 787; (33) 392.
  - systems, rat-proofing, (30) 153.
- Sewerage practice, treatise, (34) 886.

## Sewers—

- design and construction, (29) 182; (34) 886.
  - design and installation, (30) 790.
  - intercepting traps in, (28) 591.
  - ventilation, (28) 592.
- Sewing—
- clubs for girls, notes, (29) 395.
  - contest clubs in Idaho, (28) 694.
  - contests in Rhode Island, (28) 299.
  - in graded schools of Wisconsin, (33) 195.
  - instruction in Porto Rico, (33) 397.
  - lessons in, (28) 299; (31) 693; (32) 394, 598.
  - notes, (28) 694.
  - teaching, (34) 899.
- Sex—
- and heredity, manual, (30) 767.
  - cells, male, biology, (28) 676.
  - cells, notes, (26) 364.
  - characters—
    - in the ruddy duck, (39) 878.
    - secondary, factors affecting, (27) 275.
    - secondary, in birds, (40) 871.
    - secondary, in pheasants, (31) 271.
    - secondary, studies, (26) 364; (27) 869; (28) 668.
    - studies, (40) 467.
  - chromosome in males of domestic chickens, (30) 772.
  - chromosomes in Drosophila, (31) 865.
  - control in pigeons, (35) 771.
  - control in rotifers, (34) 766.
  - cords and germ cells, origin in male chick, (38) 173.
  - determination—
    - in birds, (37) 772, 868.
    - cattle, (33) 669.
    - guinea pigs, (33) 168.
    - mammals, (39) 575.
    - sheep, (31) 267.
    - notes, (26) 364.
    - review of literature, (27) 368, 369; (28) 271.
    - studies, (26) 365, 471, 773; (27) 275, 573; (28) 68, 875; (30) 267; (31) 564, 765; (34) 564, 864; (38) 65, 66.
  - development as affected by pituitary feeding, (34) 765.
  - differences, origin, (27) 369.
  - evolution in plants, treatise, (32) 725.
  - glands, relation to lime metabolism, (28) 370.
  - glands, studies, (27) 770.
  - hormones, action in fetal life of cattle, (40) 466.
  - inheritance in grapes, (39) 242.
  - inheritance in strawberries, (39) 349.
  - organs, female, thyroid gland of, (28) 271.
  - ratio, control, (39) 575.
  - ratio, control in dairy cattle, (38) 175.
  - ratios in pigeons, (33) 369.
  - relation to color and fertility in pigs, (30) 472.
  - sequence in fowls, (39) 781.
  - studies, (40) 664.
  - studies with fowls, (39) 177.
  - trimorphism, studies, (28) 571.
- Shaddocks, culture in Barbados, (28) 828.
- Shade—
- effect on—
    - composition of tobacco, (30) 430.
    - evaporation in plants, (26) 821.
    - plant growth, (29) 130; (30) 343.
    - tobacco, (33) 521.
    - transpiration of white pine seedlings, (33) 224.
    - woody plant seedlings, (30) 430.
  - relation to evaporation and transpiration in nursery beds, (31) 838.
- Shaftal as a forage crop, (38) 230.

  - in South Australia, (31) 853.
  - infested, dipping, (32) 796.
  - life history, (29) 756.
  - notes, (26) 781; (32) 377.
  - paralysis in, (30) 182.
  - trypanosome in, (26) 383.
  - viability, (37) 764.
- treatise, (26) 165; (30) 795; (31) 768; (32) 365.
- uniform classification for fairs, (33) 697.
- use against spotted fever ticks, (30) 162.
- vegetable-ivory meal for, (36) 368.
- warm water for, (37) 268.
- weight of successive clips, (39) 775.
- wild, notes, (31) 367.
- wild, of the Argali type, (31) 768.
- wild, origin and distribution, (29) 469.
- wintering experiments, (28) 573.
- wintering in North Carolina, (35) 97.
- wireworm, life history, (29) 476.
- Yunnan, notes, (35) 375.

Sheepskins, curing and marketing, (27) 470.

Shellac—

- arsenic content, (26) 710.
- detection in ethyl alcohol, (29) 312.
- manufacture, (27) 210.
- methods of analysis, (27) 210.

Shellfish—

- bacteriological examination, (29) 814.
- examination, (32) 854; (36) 159.
- green color in, (36) 861.
- handling and marketing, (31) 63.
- industry in New Jersey, (32) 357; (36) 689.
- industry, sanitary control, (30) 463.
- industry, treatise, (27) 472.
- inspection in New Jersey, (35) 165.
- methods of examination, (35) 287.
- opened, examination, (28) 166.
- pollution, relation to sewage bacteria, (27) 212.
- Potomac River, examination, (35) 287.
- problems, research on, (40) 459.

Shellfish—Continued.

- relation to typhoid fever, (28) 258.
- sewage-polluted, damage from, (27) 866.
- transmission of diseases by, (30) 368.
- Shells, analyses, (35) 430.
- Shelter belts—
  - notes, (37) 837.
  - on the Great Plains, (40) 841, 842.
  - planting in northern Great Plains, (34) 742.
  - renewing, (35) 146.
- Shenandoah River sediment, analyses, (30) 223.
- Sheora grass, analyses, (28) 768.
- Shepherd's purse—
  - geographical distribution, (26) 335.
  - new species, (26) 529.
- Shepherds of Britain, book, (26) 167.
- Shetland ponies, treatise, (30) 270.
- Shield bearer, resplendent, notes, (30) 657.
- Shield scale fungus, notes, (27) 358.
- Shillong—
  - fruit experiment station, report, (33) 238.
  - (Upper) station, report, (33) 227.
- Shingle—
  - industry in Canada, (25) 544; (28) 644; (30) 46; (32) 841; (35) 347; (36) 244; (37) 245; (38) 146.
  - industry in United States, (30) 845.
  - roofs, fire retardants for, (36) 687.
- Shingles—
  - preservation, (38) 248.
  - production in 1915, (37) 148.
  - production in 1916, (39) 452.
  - production in 1917, (40) 843.
- Shiokara, ripening, (28) 359.
- Ship stuff, analyses, (26) 362, 568, 768, 873; (27) 171; (28) 265, 669; (29) 270, 467; (31) 366, 467; (32) 667, 862; (33) 71; (34) 263, 566, 767; (38) 572.
- Shipping associations, cooperative, (33) 91.
- Shipping fever, *see* Influenza, equine.
- Ships' lines, rat guard for, description, (27) 550.
- Shiromoji seed, oil of, (37) 109.
- Shivaphis n.g. and n.sp., description, (40) 650.
- Shoddy—
  - and shoddy waste, analyses, (28) 523.
  - dirty, analyses, (32) 32.
  - fertilizing value, (32) 325; (33) 125, 327.
- "Shogaol," isolation from ginger, (39) 610.
- Shoots, growth as affected by decapitating or inversion, (33) 827.
- Shop work on farms, textbook, (33) 792.
- Shorea robusta—*see also* Sal.
  - ecology, (32) 144; (36) 345, 844.
  - economic value, (30) 239.
  - germination tests, (27) 147.
  - girth increment in even-aged crops, (40) 153.
  - natural reproduction and improvement, (34) 347, 839.
  - regeneration, (40) 843.
- Shorts—
  - analyses, (26) 468, 568; (27) 68, 171, 775; (28) 265, 464; (29) 270, 467, 769; (30) 366, 371, 467; (32) 465, 667, 862; (33) 71, 568, 870; (34) 169, 263, 566, 663, 767; (36) 65, 268; (39) 370; (40) 72, 571, 768.
  - use in poisoned bait for cutworms, (34) 358.
- Shoshone irrigation project, drainage of, (31) 889.
- Shote—
  - pox, studies, (40) 89.
  - typhoid—
    - objections to use of term, (33) 182, 285.
    - relation to hog cholera, (32) 83, 378, 881.
    - studies, (33) 680; (34) 82.
- Shot-hole borer—
  - affecting loquats, (34) 361.
  - affecting tea, (32) 852.
  - digest of data, (38) 564.
  - injurious to sal, (36) 360.
  - notes, (26) 753, 759; (27) 755; (28) 555, 653; (29) 158; (30) 657; (34) 361; (36) 258, 754, 853.
  - occurrence in California, (30) 161.
  - red-shouldered, notes, (38) 762.
  - red-shouldered, on pecan, (38) 157; (39) 557.
  - relation to pear bacterial blight, (26) 144.
  - studies, (31) 852.
- Showers, midsummer, at Galveston, Texas, (29) 812.
- Shoyu, preparation, (32) 560.
- Shredded wheat—
  - analyses, (32) 667.
  - waste, analyses, (27) 872; (30) 68; (33) 371; (34) 665; (35) 373.

- Shrew**—  
 new, from Nova Scotia, (37) 758.  
 new, from Oregon, (40) 351.  
 short-tailed, feeding habits, (32) 54.
- Shrike**, California, destruction of locusts by, (28) 351.
- Shrimp**—  
 analyses and use, (37) 863.  
 canned, tin salts in, (26) 66.  
 creatin and creatinin content, (31) 760.  
 preparation and shipping, (37) 863.  
 waste as fertilizer, (37) 863.
- Shrub** diseases, prevalence in Texas, (26) 645.
- Shrub** seeds, germination, (33) 343.
- Shrubs**—  
 acclimatization, (34) 231.  
 and trees for seaside planting, (40) 447.  
   trees, of central Europe, handbook, (30) 742.  
   trees on the farm, (40) 447.  
   trees, treatise, (30) 445.  
 annual growth of, (35) 841.  
 as affected by freezing, (28) 824.  
 as affected by tarred roads, (27) 30, 333.  
 assimilation and chlorophyll content of leaves, (28) 728.  
 at Belle Fourche experiment farm, (36) 143.  
 berry-bearing, for birds, (34) 238.  
 bibliography, (34) 238.  
 blooming dates for, (26) 237; (27) 240.  
 breeding and culture experiments, (38) 641.  
 Chinese, for Pacific slope and Gulf coast regions, (35) 450.  
 Chinese ornamental, notes, (32) 440.  
 culture, (31) 140; (36) 535.  
 culture—  
   and care, (34) 836.  
   experiments, (26) 237; (28) 147; (32) 542; (37) 241.  
   in California, (26) 47.  
   California, treatise, (33) 441.  
   western Nebraska, (29) 546; (32) 234.  
**evergreen**, winter transpiration of, (31) 728.  
 for eastern Colorado, (37) 837.  
 home grounds, (34) 741; (39) 450.  
 Illinois, (28) 840; (34) 45.  
 Kansas, (35) 43.  
 latitude of St. Louis, (34) 439.  
 northern Minnesota, (37) 241.  
 ornamental plantings, (38) 45.  
 railway gardening, (35) 450.  
 southeastern Alaska, (33) 638.  
 trustee-Carson reclamation project, (31) 835.  
 forcing experiments, (28) 837.  
 handbook, (26) 642; (27) 346.  
 hardy climbing, description, (35) 450.  
 hardy, for Maine, (35) 840.  
 hardy, of the British Isles, treatise, (32) 337.  
 indigenous to Australia, (26) 830.  
 insects affecting, (26) 654; (27) 346.  
 list of seeds, (28) 235.  
 new, in Kew Gardens, (31) 236.  
 new, of Philippines, (38) 247.  
 new or noteworthy, from Columbia and Central America, (34) 827.  
 of central Europe, (31) 538.  
 eastern United States, (37) 746.  
 Europe, encyclopedia, (31) 143.  
 Florida, handbook, (30) 445.  
 Konahuanui region, (34) 637.  
 Mexico, (27) 147.  
 Minnesota, manual, (28) 145.

 North America, (33) 437.  
 Oahu lowlands, (34) 345.  
 Oklahoma, (29) 441.  
 Pacific coast, (34) 152.  
 Southern Circle of Central Provinces, (32) 144.  
 United States, treatise, (33) 437.  
 Wyoming, (38) 255.
- ornamental**—  
 adaptation and variety tests, (29) 41.  
   at Belle Fourche Experiment Farm, (33) 837.  
   at forest nursery in Rhodesia, (40) 641.  
   blooming dates, (34) 144.  
   breeding experiments, (29) 235.  
   causes affecting growth, (33) 49.  
   culture, (29) 148.
- Shrubs**—Continued.  
 ornamental—continued.  
 culture experiments, (29) 235; (32) 437.  
 culture in Alaska, (29) 743.  
 description, (35) 450.  
 destruction by Chinese cotton scale, (26) 556.  
 for Florida, (34) 535.  
   Kansas, (31) 536.  
   Oregon, (39) 241.  
   unfavorable city conditions, (33) 442.  
 insects affecting, (27) 453; (35) 756.  
 notes, (29) 395.  
 of Dade County, Florida, (31) 239.  
 of Hawaii, (37) 546.  
 selecting, (40) 640.  
 tests, (36) 443.  
 treatise, (37) 44.  
 varieties, (29) 235, 540; (36) 837.  
 periodicity and annual ring formation, (28) 340.  
 phenological data, (33) 825.  
 planting on dry farms, (28) 49.  
 propagation, (28) 840; (34) 533.  
 propagation and pruning, (30) 236.  
 propagation by cuttings, (40) 340.  
 pruning, (37) 242.  
 quarantine law in Missouri, (26) 854.  
 relation between root habit, ground water, and species distribution, (29) 136.  
 ripening of growing parts, (35) 542.  
 secondary growth phenomena, (28) 340.  
 transpiration in, (27) 522.  
 transplanting, (27) 491.  
 treatise, (26) 140; (28) 342; (29) 842; (34) 345.  
 varieties, (34) 231; (38) 142, 641.  
 water conductivity of wood, (40) 821.  
 winter injuries, (31) 49.
- Shucks**, ground, analyses, (34) 767.
- Sialia** n.sp., description, (37) 846.
- Sibine** stimulea, see Saddle-back caterpillar.
- Sibinia peruana** n.sp., description, (32) 658.
- Sickness**, effect on growth of the brain, (34) 662.
- Siculades** fulcata, notes, (30) 657.
- Sida**—  
 fiber, tests, (31) 526.
- rhomboifolia**—  
 analyses, (34) 35.  
 analyses and valuation, (30) 138.  
 fiber, examination, (39) 442.
- Sieves**, cement, tests, (30) 888.
- Sigalphus daci** n.sp., description, (26) 152.
- Sigalphus** spp., notes, (27) 564.
- Sigaloesa** n.sp., notes, (35) 259.
- Siphonura**—  
 flavopalliatia occidentalis, notes, (35) 761.  
 giraulti n.sp., description, (31) 554.  
 lutea n.sp., description, (29) 359.  
 merceti n.sp., description, (37) 360; (38) 460.  
 n. spp., descriptions, (31) 355.  
 nigrita, notes, (31) 356.  
 nigrita, parasitic on San José scale, (29) 758.  
 occidentalis, parasitic on orange scale, (26) 554.  
 pulchra, notes, (27) 556.  
 spp., notes, (28) 159.  
 thoreauini n.sp., description, (35) 760.
- Siphonurinae**, monograph, (30) 759.
- Silage**—see also Alfalfa, Clover, etc.  
 analyses, (27) 170, 775; (28) 169, 463; (29) 270, 367; (30) 565; (31) 470; (32) 169, 465; (33) 469, 759; (35) 562; (36) 65; (38) 175, 376.  
 and alfalfa hay for beef production, (33) 373.  
 and cottonseed meal, associative digestibility, (37) 65.  
 and silage fermentation, (36) 710.  
 bacteriology, (32) 363; (34) 766; (35) 769; (36) 611; (38) 379.  
 beet-top, inoculation with lactic-acid bacteria, (34) 767.  
 cane-top, (35) 562.  
 changes in during storage, (30) 525.  
 composition and digestibility, (31) 467.  
 corn—  
   and bean, analyses, (39) 773.  
   soy bean, analyses, (33) 568.  
   soy beans, seeding, (40) 135.  
   sunflowers, yields, (40) 332, 431.  
   culture experiments, (40) 735.  
   varieties, (40) 733.  
   variety tests, (39) 333, 835.  
   yields, (39) 227, 336, 337; (40) 331.

## Silage—Continued.

- cost of production, (30) 333; (32) 527, 530; (33) 831; (35) 691; (36) 167.
- crops—
- culture experiments, (27) 638.
  - for cut-over lands, (39) 231.
  - dairy cows, (38) 174.

- methods of treatment, (40) 116.
- methyl alcohol in, (32) 410.
- microorganisms in, (33) 224; (37) 728.
- normal temperatures and factors influencing quality, (35) 270.
- notes, (27) 872; (28) 274, 581; (29) 689; (31) 72, 786; (32) 666; (34) 565; (38) 368; (40) 331.
- nutritive value, (26) 360; (29) 270.
- oat and pea, analyses, (34) 467, 667.
- palatability, (37) 671.

## Silage—Continued.

- pathogenic anaerobe from, (38) 384.
  - pathogenic bacillus from, (39) 387.
  - phosphated, notes, (31) 422, 623.
  - physical changes during digestion, (39) 476.
  - preparation, (33) 467.
  - preservation, (28) 464.
  - preservation and ripening in warm climates, (40) 116.
  - rape, feeding value, (35) 768.
  - relation to forage poisoning, (39) 586.
  - review of investigations, (27) 170.
  - sorghum and cowpea, mineral constituents, (40) 769.
  - spoiling in metal silos, (32) 285.
  - stack, directions for making, (26) 468.
  - stack system, (29) 768.
  - stacking, (34) 565.
  - studies, (33) 274.
  - summary of data, (26) 393.
  - summer, v. soiling, (26) 574.
  - tests, (29) 633.
  - use, (26) 686; (27) 68.
  - use in Great Britain, (39) 269.
  - v. beets and mangels for milk production, (34) 670.
  - v. cotton-seed hulls for steers, (31) 469; (32) 260, 568.
  - v. soiling crops for dairy cows, (30) 874.
  - value and use, (34) 665.
  - variation in ether extract, (38) 413.
  - volatile aliphatic acids of, (28) 608, 609.
  - volatile fatty acids and alcohols in, (28) 109.
  - wheat, notes, (33) 337.
- Silica—
- absorption by oats, (31) 632.
  - as a plant food, (30) 27.
  - concentration in surface soil, (31) 720.
  - crucibles, marking, (26) 715.
  - determination, (35) 314.
  - distribution in loam soils, (31) 618.
  - extraction from feldspar, (28) 223.
  - from feldspar, (29) 518.
  - of feeding stuffs, digestibility, (40) 769.
  - plant, and sand, differentiating, (40) 610.
  - rôle in cereal nutrition, (32) 121.
  - rôle in plant nutrition, (26) 530.
  - solubility, (38) 310.
  - solution in underground waters, (28) 27.
- Silicate rocks, potash from, (27) 628; (28) 33; (37) 427.
- Silicates—
- as a source of potash, (27) 724; (29) 215, 518, 822
  - decomposition by bacteria, (29) 316.
  - decomposition by soil bacteria and yeast, (31) 121.
  - detection, (26) 311.
  - in milk from glass bottles, (27) 376.
  - v. carbonates as sources of lime and magnesia for plants, (32) 622.
  - weathering, (28) 322; (29) 123.
- Silicic acid—
- determination in soils, (37) 505.
  - determination in water, (33) 711.
  - in lime, effect on soils, (26) 34.
  - in milk sterilized in bottles, (33) 675.
  - soluble, in phosphatic slag, (29) 409.
  - soluble, in Thomas slag powder, (30) 809.
- Silicofluoric acid as wood preservative, (30) 646.
- Silicon—
- importance in animal nutrition, (31) 663.
  - nitrogen, fertilizing value, (31) 821.
- Silk—
- culture—
  - in British colonies and dependencies, (35) 358.
  - California, (30) 854.

- Soda**—  
 caustic, *see* Sodium hydrate and Sodium hydroxid.  
 cellulose, notes, (34) 714.  
 distribution in loam soils, (31) 618.  
 formation in soils, (36) 725.  
 fountain equipment, care and cleaning, (32) 356.  
 in loess soils, (35) 809.  
 lime, history and uses, (34) 804.  
 loss in drainage water, (26) 422.  
 pulp, cooking, (36) 17.  
 replacement of potash by, as a fertilizer for sugar beets, (32) 230, 324.  
 replacement of potash by in microcline, (30) 126.  
 sulphur dips, methods of analysis, (40) 208.  
 use against gooseberry mildew, (36) 646.  
 water, examination, (26) 660.  
 water, hygienic, notes, (32) 356.  
 water sirups, examination, (26) 660.
- Sodium**—  
 acetate for ruminants, (32) 667.  
 acetate, preservation of complement by, (39) 584.  
 acid phthalate in acidimetry and alkalimetry, (34) 408.  
 ammonium sulphate, fertilizing value, (35) 126, 518.  
 arsenate—  
   kerosene emulsion, insecticidal value, (34) 652.  
   methods of analysis, (28) 507.  
   oxidation in dipping fluids, (38) 585.  
   tick-killing properties, (29) 680, 886.  
   toxicity, (29) 586.

## Sodium—Continued.

- arsenite—  
destruction of weeds by, (29) 748.  
effect on soils, (33) 623; (34) 421.  
for weed control, (32) 138, 741; (40) 430.  
killing of ringbarked trees with, (34) 485.  
oxidation in dipping tanks, (29) 585.  
toxicity, (29) 585.
- aspartate, assimilation by plants, (26) 32.
- benzoate—  
as food preservative, (28) 261; (30) 364.  
determination in catsup, (26) 111; (27) 809.  
effect on the animal organism, (32) 164.  
notes, (29) 865.  
physiological effect, (27) 365.  
toxicity, (28) 661.  
toxicity in the diet, (35) 473.
- bicarbonate—  
effect on baking quality of flour, (26) 356.  
effect on hemolytic reaction, (36) 878.  
effect on vitamin content of bread, (36) 465.  
in artesian water of Virginia, (29) 512.
- bisulphate, use in manufacture of phosphatic fertilizers, (29) 319, 418.
- bisulphite, method of analysis, (39) 413.
- borate, effect on sugar beets, (31) 233.
- carbonate, effect on—  
availability of soil potash, (32) 126.  
blood sugar content, (37) 64.  
germination of dodder, (27) 28.  
germination of seeds, (29) 328.  
nitrification, (27) 124.  
plant growth, (27) 500; (28) 29.  
soil bacteria, (26) 322.  
solubility of iron phosphate, (37) 324.
- carbonate—  
fertilizing value, (39) 117.  
formation in calcareous soils, (38) 18.  
formation in soils, (28) 516, 719.  
in soils, (39) 323.  
neutralizing cream with, (38) 281.  
solutions, effect on saccharin substances, (26) 307.  
toxicity towards barley, (33) 323.  
use in Indian rape-seed cake, (26) 468.
- chlorid, *see* Salt.
- citrate—  
action in the body, (36) 467.  
effect on starch ferments, (27) 109.  
prevention of milk curdling by, (31) 710.  
toxicity as affected by diet, (40) 465.
- compounds, effect on baking quality of flour (30) 555.
- compounds, fertilizing value, (39) 117.
- content of muscles, (26) 566.
- cyanid—  
as fumigant for nursery stock, (38) 357.  
as insecticide, (26) 153.  
as soil fumigant, (32) 246; (38) 457.  
industrial synthesis, (32) 116.  
production from sugar beets, (26) 613.  
toxicity to plants, (39) 224.
- determination, (29) 807.
- determination in foods, (29) 809.
- determination in vegetable ash, (38) 311.
- dichromate for liberation of formaldehyde gas from water solutions, (33) 12.
- effect on hydration and growth, (40) 818.
- estimation, (39) 413.
- fertilizers, effect on sugar content of plants, (27) 500.
- fertilizers, time of application, (27) 125.
- fluorid—  
antiseptic value, (40) 779.  
as milk preservative, (32) 576.  
effect on animal body, (32) 80.  
insecticidal value, (34) 252; (39) 762.  
sterilization of soils by, (32) 816.  
use against ants, (36) 555.  
use against roaches, (27) 55.
- hydrate—  
and sulphur dip, preparation, (30) 783.  
effect on permeability, (34) 429.  
fertilizing value, (39) 117.
- hydroxid as disinfectant for hides and skins, (35) 882.

## Sodium—Continued.

- p*-hydroxyphenylarsionate, preparation, (40) 609.
- hypo-iodite, neutral, action on formaldehyde, (34) 11.
- importance in animal nutrition, (31) 663.
- iodate for poisoning flies, (40) 859.
- iodid, effect on the circulation, (40) 274.
- lamp for polariscope, (34) 804.
- malate, action in the body, (36) 468.
- manures, effect on sugar content of plants, (28) 34.
- nitrate—  
action as affected by distribution in soils, (35) 518.  
after effects, (29) 127.  
analyses, (28) 326; (39) 222.  
application, (30) 623; (38) 624.  
application at different depths, (29) 126.  
application to winter grains, (33) 125.  
as feed for dogs and pigs, (31) 265.  
rice fertilizer, (31) 127.  
spray for fruit trees, (36) 535.  
top dressing for beets, (32) 323.  
top dressing for grains, (37) 29.  
top dressing for wheat, (37) 238.  
winter spray for fruits, (30) 640; (31) 338.  
availability, (39) 817.
- nitrate, availability—  
as affected by composition of soil, (32) 516.  
as affected by soils, (39) 726.  
in relation to soils, (34) 130.  
in soils, (36) 819.  
of nitrogen in, (26) 523; (35) 123, 426.
- nitrate—  
behavior in cultivated soils, (28) 521.  
destruction of weeds by, (26) 333.  
drilling v. broadcasting, (31) 123.  
effect of long-continued use, (32) 121.
- nitrate, effect on—  
action of phosphates, (35) 326.  
ammonification, (28) 724.  
apples, (31) 338.  
asparagus roots, (28) 236.  
availability of soil potash, (32) 126.  
burning quality of tobacco, (38) 140.  
carnations, (36) 445.  
coherence of soils, (31) 123.  
composition of beets, (31) 737.  
composition of cereals, (37) 827.  
composition of meadow hay, (34) 620.  
composition of wheat, (38) 518.  
cranberries, (30) 143.  
decomposition of feldspar, (30) 126.  
decomposition of soy bean fodder, (40) 214.  
disease susceptibility in cereals, (29) 844.  
flow of rubber latex, (29) 748.  
flower size of tobacco, (33) 435.  
germinating plants, (33) 128.  
germination of dodder, (27) 28.  
germination of seeds, (29) 328.  
grass lands, (30) 133.  
hydrogen-ion concentration in soils, (39) 425.  
keeping quality of fruit, (27) 644.  
legume inoculation, (40) 215.  
lime requirement of soils, (28) 122.  
maturity of cotton, (31) 40.  
mechanical condition of fertilizers, (26) 33.  
nitrogen-assimilating bacteria, (38) 724.  
nitrogen content of asparagus roots, (26) 45.  
nitrogen content of soil, (38) 213.  
nitrogen transformations in soils, (38) 723.  
nodule formation, (37) 133.  
peaches, (33) 840.  
protein content of soy beans, (34) 141.  
quality of sugar beets, (28) 44.  
resistance of grain to hail, (30) 519.  
soil acidity, (28) 137; (37) 23; (38) 620.  
soils, (27) 622; (28) 520; (29) 417; (30) 220; (35) 516; (36) 118.  
sugar beets, (26) 332; (33) 434.  
tobacco, (33) 732.  
wheat, (36) 197; (37) 799; (38) 438; (40) 244.  
wheat yield, (33) 217.

## Sodium—Continued.

## nitrate—

- fertilizing value, (26) 39, 42, 125, 233, 324, 329, 425, 534, 536, 537, 630, 635, 725, 837; (27) 24, 32, 137, 218, 325, 337, 338, 436, 519, 530, 531, 534, 626, 639, 724, 832, 833, 837; (28) 431, 521, 723, 724, 725, 737, 827, 832; (29) 23, 125, 213, 331, 632, 727, 735, 736, 829, 831; (30) 25, 125, 324, 427, 529, 626, 632, 637, 638, 639, 820, 822, 835, 839; (31) 36, 37, 41, 124, 137, 517, 518, 725, 820, 821, 822, 829; (32) 323, 336, 516, 532, 630, 831, 832; (33) 33, 219, 829; (34) 22, 24, 25, 128, 129, 518, 520, 622, 820; (35) 22, 30, 125, 126, 218, 323, 325, 336, 427, 518, 519, 535, 629; (36) 121, 332, 338, 425, 626, 818, 833; (37) 123, 229, 426, 521, 539, 540, 627, 636, 729, 733; (38) 212, 218, 220, 229, 233, 244, 422, 438, 517, 624, 816, 825; (39) 21, 32, 242, 327, 334, 428, 434, 438, 445, 446, 529, 530, 537, 623, 817; (40) 125, 126.
- fertilizing value as affected by lime, (34) 132.
- for alfalfa, (37) 34.
- apples, (35) 540; (37) 42.
- arid soils, (36) 726.
- asparagus, (28) 339; (36) 138.
- carinations, (27) 844; (40) 741.
- coffee, (40) 43.
- corn, (31) 831; (32) 732.
- corn in the South, (40) 422.
- cranberries, (31) 741; (34) 150, 341.
- early vegetables, (34) 532.
- grass lands, (33) 527.
- mangels, (29) 830.
- moor soils, (40) 230, 822.
- oats, (31) 528.
- orchards, (36) 41.
- pastures, (36) 735.
- pineapples, (38) 748.
- potatoes and sugar beets, (31) 833.
- prunes, (40) 741.
- rubber trees, (26) 339.
- sweet potatoes, (31) 437.
- history and manufacture, (34) 423.
- industry and commerce, (35) 428.
- industry in Austria-Hungary, (33) 822.
- inoculation of alfalfa with, (26) 535.
- loss from soils, (29) 211.
- manufacture, progress in, (29) 730.
- nitrification in soils, (39) 814.
- production and use, (27) 327; (28) 625, 626; (29) 126, 213, 517; (30) 126; (32) 425, 516, 517; (33) 218, 219.
- production in 1913, (31) 725.
- production in 1915-16, (37) 523.
- residual effects, (31) 319.
- sale and distribution, (38) 625.
- secondary and subsidiary effects, (30) 26.
- situation in 1917, (39) 218, 824.
- time of application, (32) 132.
- trade in, (31) 29.
- use, (27) 421.
- use against grape chlorosis, (27) 850.
- use against mosses, (29) 741.
- use in fertilizers, (27) 723.
- use on peat soils, (37) 134, 135; (38) 132, 133.
- v. ammonium sulphate for sugar beets, (31) 422.
- v. cottonseed meal, (40) 516.
- v. dried blood for cotton, (31) 630.
- nitrite—
- fertilizing value, (31) 518.
- oxidation, (39) 619.
- nucleinate—
- assimilation by ruminants, (31) 71.
- effect on coagulation of blood and milk, (33) 177.
- importance in the animal organism, (33) 758.
- oxalate—
- for standardizing potassium permanganate, (31) 501.
- toxicity as affected by diet, (40) 465.
- parstungstate, use in determination of carbon dioxide and nitrogen pentoxid, (26) 708.
- phosphate—
- effect on germination of seeds, (29) 328.
- fertilizing value, (32) 518; (39) 127.

## Sodium—Continued.

- pyrophosphate, toxicity, (34) 476.
- removal from soil, (39) 517.
- requirements of plants, (28) 730.
- rôle in plant nutrition, (40) 424.
- salicylate—
- as a fly poison, (37) 53.
- effect on metabolism in man, (35) 369.
- toxicity, (28) 661.
- salts—
- antiseptic and germicidal value, (37) 176.
- as wood preservatives, (32) 841.
- salts, effect on—
- activity of lipase, (31) 264.
- ammonia fixing power of soils, (27) 323.
- Aspergillus niger, (28) 824.
- catalase, (26) 504.
- composition of plants, (29) 419.
- concrete, (29) 891.
- germination and growth of crops, (34) 125.
- growth of rice, (30) 833.
- nitric-nitrogen accumulation, (40) 722.
- physical properties of soil, (39) 215.
- plants, (29) 625; (32) 538; (35) 816.
- soil colloids, (35) 622.
- wheat seedlings, (36) 431.
- salts—
- equilibria in solutions, (39) 203, 204.
- fertilizing value, (28) 819; (30) 627.
- flocculating power on clay, (27) 620.
- fractional crystallization, (39) 204.
- in soil, antagonistic agents, (39) 619.
- production, (35) 24.
- therapeutic value, (38) 585.
- salts, toxicity—
- in soil, (36) 515.
- soil factors affecting, (40) 315.
- toward nitrogen-fixing organisms, (28) 519.
- silicate as an egg preservative, (28) 359; (32) 870.
- silicate, fertilizing value, (27) 628; (31) 31.
- sozioidolate, use against spirochetosis in fowls, (29) 484.
- sulphate as preservative for immune serums and antigens, (26) 83.
- sulphate, effect on—
- carinations, (36) 446.
- germination of seeds, (29) 328.
- nitrification, (27) 124.
- plant growth, (30) 31.
- soil bacteria, (26) 322.
- soil potash, (36) 625.
- solubility of phosphates, (28) 818.
- sulphate—
- fertilizing value, (27) 125; (39) 117.
- toxicity toward barley, (39) 323.
- sulphid, effect on cement, (38) 691.
- sulphite, physiological action, (29) 269.
- sulphocyanate, use against tuberculosis, (33) 877.
- sulphur mixture, insecticidal value, (34) 60.
- tartrate, toxicity as affected by diet, (40) 285, 465.
- tellurite as test for viability of tubercle bacilli, (33) 877.
- thiosulphate, assimilation by yeast and mold fungi, (29) 29, 30.
- thiosulphate, fertilizing value, (29) 521.
- toxicity toward plants, (30) 128.
- tungstate, effect on plant growth, (35) 434.
- v. potash for sugar beets, (33) 135.
- Soft drink—
- bottlers, sanitary code for, (32) 561.
- establishments, sanitary control, (36) 562.
- Soft drinks—
- examination, (34) 166.
- sugar substitutes in, (40) 68.
- use of second-hand kegs for, (34) 256.
- Softwood lumber industry in Middle West (38) 847.
- Soil—
- abrasion by storms in Russia, (38) 145.
- acidity—see also Soils, acid, and Liming.
- aluminum as factor in, (40) 125.
- as affected by ammonium sulphate, (37) 815.
- affected by drainage, (40) 22.
- affected by fertilizers, (29) 238.
- affected by moisture, (40) 316.

## Soil—Continued.

- acidity—continued.  
 as affected by organic matter, (37) 718.  
 affected by sulphur, (31) 727.  
 blast-furnace slag for, (36) 728.  
 cause, (37) 623, 624.  
 cause and detection, (34) 419.  
 cause and nature, (35) 722.  
 correcting, (26) 723; (35) 727; (36) 429, 519; (38) 819.  
 determination, (30) 715; (31) 112; (32) 30, 610; (33) 206; (34) 609; (35) 23, 503; (36) 117, 210, 505; (38) 419, 720; (40) 213.  
 acidity, effect on—  
 availability of ammonium sulphate, (37) 521.  
 grasses, (37) 446; (40) 125.  
 nitrogen-assimilating bacteria, (39) 722, 723.  
 vetch and oats, (40) 134.  
 acidity—  
 experiments, (35) 324.  
 limestone action on, (40) 423.  
 litmus-paper test, (39) 515.  
 measuring by sugar inversion, (40) 123.  
 nature, (40) 123.  
 neutralizing, (32) 812; (37) 815; (40) 125, 815.  
 notes, (29) 623, 816; (31) 322; (35) 120; (38) 298.  
 acidity, relation to—  
 green manuring, (38) 20; (39) 216, 326, 424.  
 growth of orchids, (40) 812.  
 lime and potash content, (40) 812.  
 mold action, (40) 319.  
 plant cover, (27) 29.  
 plant growth, (39) 513; (40) 324.  
 acidity, studies, (26) 813; (28) 708; (29) 815; (31) 618; (32) 29, 212; (36) 813; (37) 24, 118; (38) 20, 511; (39) 514, 620; (40) 319, 620.  
 air—  
 carbon dioxide content, (28) 320; (39) 516.  
 composition, (40) 619.  
 notes, (33) 618; (34) 514.  
 movement, (26) 619.  
 aldehydes, studies, (40) 22.  
 alkalinity, relation to plant chlorosis, (31) 50.  
 amendments, effect on soil acidity, (37) 23.  
 analysis—  
 as guide to fertilizer needs, (31) 217; (35) 215.  
 by means of the plant, (32) 121.  
 clod method, (28) 717.  
 error in, (29) 316; (30) 505.  
 mechanical, (26) 219, 221; (27) 119; (28) 515, 620; (30) 213; (31) 418; (32) 120.  
 analysis, mechanical—  
 methods, (26) 29; (28) 318; (35) 721; (36) 114, 720; (38) 313.  
 relation to moisture equivalent, (39) 214.  
 shaker for, (32) 611.  
 value, (27) 120.  
 analysis, methods of, (27) 514, 515; (28) 111; (29) 308; (30) 12, 215, 624; (31) 312, 417, 514, 719, 806; (32) 295, 311; (33) 204, 205; (34) 806; (36) 204, 299, 318, 612; (39) 204.  
 antiseptics, tests, (28) 538.  
 bacteria—  
 action of microorganisms on, (39) 332.  
 action of toluene and chloroform on, (36) 815.  
 activity, (29) 20, 123, 817; (30) 217, 718; (31) 126.  
 bacteria, activity as affected by—  
 osmotic pressure, (40) 722.  
 plants, (40) 299, 513.  
 various woods, (39) 325.  
 bacteria—  
 activity, relation to lime requirement, (39) 325.  
 and fungi, ammonifying power, (32) 29.  
 fungi, associative action, (36) 215.  
 fungi, relative importance, (36) 434.  
 protozoa, relation, (36) 322.  
 soil productiveness, relation, (32) 124.  
 bacteria, as affected by—  
 acids and alkalis, (37) 213.  
 alkali salts, (26) 322; (27) 124; (28) 519, 719; (32) 320; (33) 323.  
 antiseptics, (31) 516.  
 arsenic, (38) 322.  
 calcium, (32) 33.  
 continuous croppings, (35) 813.

## Soil—Continued.

- bacteria, as affected by—continued.  
 crops, (37) 421.  
 cyanamid and dicyanodiamid, (40) 724.  
 humus-forming materials, (37) 120.  
 irrigation, (31) 24.  
 lime, (27) 720; (30) 127.  
 limestone, (26) 428.  
 magnesium and calcium salts, (38) 818.  
 manure, (26) 31; (27) 518; (32) 216; (35) 814; (37) 23.  
 mineral fertilizers, (31) 821.  
 phosphates and sulphates, (33) 515.  
 protozoa, (28) 330; (30) 322; (32) 321; (33) 515; (34) 326; (36) 422, 518, 622.  
 salts, (36) 515.  
 seasons, (36) 21; (37) 421.  
 seed bed preparation, (36) 215.  
 sulphur, (30) 532.  
 toluol and carbon bisulphid, (28) 824.  
 volatile conifer products, (32) 618.  
 water, (35) 814; (37) 421.  
 bacteria—  
 at different depths, (36) 21.  
 coli-like, studies, (38) 19.  
 counting, culture media for, (32) 625.  
 decomposition of silicates by, (31) 121.  
 determination, (28) 727; (29) 824; (31) 731; (36) 31.  
 distribution and activities, (27) 822.  
 bacteria, effect on—  
 plant growth, (31) 827.  
 rock phosphate, (35) 723.  
 solubility of phosphoric acid, (36) 515.  
 bacteria—  
 functions of, (31) 127.  
 growth in muck, (36) 516.  
 growth of, (31) 620.  
 in acid soils, studies, (40) 620.  
 migration of, (29) 21.  
 nitrifying, effect on tricalcium phosphate, (39) 23.  
 nitrogen-assimilating, (39) 722.  
 nitrogen-cycle, as affected by auximones, (37) 517.  
 nitrogen fixation by, (26) 123; (28) 628; (30) 217.  
 nitrogen-fixing, in Iowa soils, (37) 517.  
 nitrogen-fixing, studies, (38) 428.  
 nonsymbiotic nitrogen-fixing, (34) 815.  
 notes, (31) 818; (37) 298.  
 nutrition of, (35) 814.  
 of frozen soils in Quebec, (40) 513.  
 oxygen requirements, (37) 221.  
 potash-fixing power, (34) 815.  
 bacteria, relation to—  
 angleworms, (29) 316.  
 evaporation, (27) 516.  
 fertilizers, (34) 326.  
 humus, (32) 721.  
 hydrogen-ion exponent, (39) 723.  
 irrigation, (37) 86.  
 soil fertility, (34) 619; (35) 215.  
 bacteria—  
 respiratory intensity, (31) 313.  
 rôle in relation to phosphates, (40) 620.  
 spore-forming, (35) 523.  
 studies, (29) 221; (31) 818; (35) 626; (37) 19, 516, 517; (40) 739.  
 toxins, (40) 23.  
 vanillin-destroying, (40) 24.  
 variations in, (31) 26.  
 bacteriology, (32) 216.  
 bacteriology—  
 course in, (28) 332.  
 digest of data, (28) 826.  
 discussion, (26) 718.  
 laboratory manual, (27) 728; (33) 791; (36) 692.  
 methods in, (30) 218; (31) 420.  
 notes, (27) 516.  
 review of investigations, (33) 513.  
 studies, (27) 517, 720; (28) 120, 121; (29) 21, 422; (30) 624; (31) 121; (33) 120, 823; (39) 324; (40) 125.  
 treatise, (28) 34.  
 biology—  
 and physics, ancient ideas on, (30) 212.  
 field and laboratory experiments, (36) 213.  
 review of investigations, (30) 119.  
 studies, nitrogen determination in, (40) 711.

## Soil—Continued.

- botany, discussion, (26) 718.
- carbonates, decomposition, (31) 25; (32) 123.
- carbonates, determination, (30) 808; (35) 503; (40) 308.
- catalase, notes, (31) 313.
- colloids—
  - adsorptive power, (34) 18.
  - ammonia-soluble inorganic, (31) 801.
  - as affected by soluble salts, (35) 622.
  - behavior in presence of soluble salts, (33) 324.
  - determination, (33) 118.
  - importance, (29) 817; (34) 816.
  - notes, (30) 513, 718; (32) 318; (35) 512.
  - properties, (31) 514.
  - relation to plowsole, (40) 417.
  - role of, (33) 321, 513.
  - studies, (32) 813; (35) 16, 319, 813; (36) 21; (37) 520.
  - treatise, (34) 515.
- compactness, effect on root development, (26) 327.
- concretions due to manganese or lime, (32) 215.
- conditions—
  - and plant growth, treatise, (39) 512.
  - in Selby smoke zone, (35) 213.
  - in United States and western Canada, handbook, (29) 596.
  - relation to bacterial activity, (34) 813.
- constituents—
  - and ammonium salts, interaction, (32) 121.
  - as semipermeable membranes, (31) 720.
  - assimilation by oats, (31) 632.
  - beneficial, importance, (26) 419.
  - inhibition of plant toxins by, (37) 519.
  - organic, effect on nitrogen fixation by *Azotobacter*, (33) 620, 823.
  - organic, notes, (28) 29.
  - organic, studies, (27) 500.
  - solubility, (30) 221.
  - studies, (28) 324.
- containers, effect of paraffin lining, (37) 812.
- containers for plant culture work, (36) 524.
- crusts, relation to fertilizers, (31) 123.
- decoctions, effect on bacteria, (28) 329.
- depletion, relation to nitrate reduction in plants, (37) 549.
- erosion—
  - as affected by forests, (29) 842.
  - by wind, (29) 811; (31) 317.
  - cause and prevention, (30) 625.
  - coast, *Spartina* for, (40) 530.
  - control, (39) 813.
  - economic waste from, (31) 316.
  - effect of cattle on, (39) 512.
  - in forests, (30) 743.
    - Iowa, (40) 717.
    - Kansas, (38) 422.
    - ravines, prevention, (26) 643.
    - the South, (32) 811.
  - injurious effects, (32) 30.
  - measurement, (31) 24.
  - model for schools, (27) 797.
  - notes, (34) 818, 885.
  - of Sioux Point, S. Dak., (26) 27.
  - on western grazing lands, (39) 439.
  - prevention, (26) 323; (31) 317; (32) 514, 884; (34) 326, 819; (36) 320, 422, 723; (37) 87, 286, 520; (40) 188.
- experiments, (27) 393, 394.
- experiments at New York Cornell Station, (29) 820.
- experiments, standardization, (39) 829.
- extracts—
  - as affected by season and crop growth, (38) 813.
  - as criterion of productivity, (38) 812; (40) 120.
  - as indicating chemical needs of soil, (39) 331.
  - reaction of, (30) 121.
  - ultramicroscopy of, (30) 516.
- factor in crop centers, (39) 734.
- fatigue—
  - notes, (29) 243.
  - review of literature, (34) 326.
  - studies, (30) 426, 624; (33) 31.
  - treatment, (37) 421.
- fauna, rhizopods and flagellates in, (35) 121.

## Soil—Continued.

- fertility—
  - accumulation, (32) 121.
  - and agriculture, question summary, (28) 897.
  - and fertilizers, treatise, (28) 423.
  - and second-growth vegetation, correlation, (39) 115.
- fertility as affected by—
  - alfalfa, (29) 633.
  - crop rotation, (27) 821; (39) 424.
  - fertilizers, (34) 517.
  - glaciation, (32) 317.
  - inundation, (30) 213.
  - lime and chalk, (34) 221.
  - manure, (29) 317.
  - organic matter, (39) 725.
  - sulphur, (35) 728.
- fertility—
  - bacterial theory, (28) 718.
  - conservation and improvement, (27) 818; (29) 125.
  - correlation with seasonal rainfall, (39) 511.
  - determination, (26) 21, 123; (27) 417; (31) 226; (33) 97; (34) 218; (36) 622.
  - dynamic theory, (34) 812.
  - effect on root development, (26) 328.
  - experiments, standardization, (40) 823.
  - factors in, (32) 30.
  - improvement, (28) 533; (34) 528; (38) 219.
  - in China, Korea, and Japan, (27) 518.
  - in India, (27) 319.
  - loss by leaching, (36) 725.
  - loss from cropping, (39) 327.
  - maintenance, (26) 423; (27) 124; (28) 533; (29) 213, 623; (30) 23, 320, 426; (31) 217, 318, 819; (32) 31, 725; (34) 516, 520, 621, 722; (35) 325; (36) 120, 618; (37) 514, 720, 813; (38) 119; (39) 125, 815.
  - maintenance with nature's fertilizers, (39) 816.
  - manual, (30) 517.
  - measurement, (36) 510.
  - misconceptions concerning, (33) 721.
  - new views on, (31) 516.
  - notes, (27) 216, 219; (28) 29; (31) 122, 127, 221; (33) 695; (34) 22, 722; (37) 211, 214.
  - principles, (26) 519; (33) 721.
  - problems, (27) 819.
  - problems in Great Britain, (39) 616.
- fertility, relation to—
  - bacteria, (34) 619.
  - chemical composition, (33) 421.
  - crystalloids and colloids, (28) 814.
  - dairy farming, (27) 280.
  - earthworms, (27) 518.
  - fertilizers, (29) 213; (30) 821.
  - fungi, (29) 824.
  - humus, (37) 718.
  - lime, (28) 223.
  - plant food, (26) 621; (28) 220.
  - plant transpiration, (26) 36.
  - sulphur, (34) 27.
  - weeds, (34) 39.
- fertility—
  - review of investigations, (26) 123.
  - role of nitrification in, (37) 519.
  - studies, (26) 816; (27) 500; (28) 324; (29) 416, 728; (31) 620; (36) 814; (37) 214, 625; (39) 422, 737; (40) 419, 624, 719.
  - testing, (28) 537.
  - treatise, (26) 521.
  - under trees, (38) 816.
  - variation in, (28) 123.
  - work in India, (40) 825.
  - work in Kansas, (40) 319.
  - work in Rhode Island, (38) 325.
- flora—
  - as affected by arsenic compounds, (32) 720.
  - as affected by leaching, (35) 514.
  - nitrogen-fixing powers of, (35) 320.
  - of India, (36) 449.
  - studies, (37) 516, 517; (38) 514.
- flows in polar and subpolar regions, (31) 23.
- formation, relation to animal organisms, (26) 223.
- formation, relation to forest cover, (29) 643.
- forming minerals, microscopic determination, (28) 812.
- Fumigant and Insecticide, tests, (30) 156.

## Soil—Continued.

## fungi—

- activity, (40) 122, 318, 721.
- ammonifying efficiency, (32) 817.
- and their activities, (36) 214, 215.
- in a forest nursery, (40) 852.
- incubation studies, (35) 513; (36) 221.
- notes, (27) 223.
- of Norway, (34) 226.
- pathogenic, control, (40) 747.
- proteolytic activities, (40) 721.
- relation to potato diseases, (39) 249.
- studies, (28) 442; (31) 127.
- gas, radioactivity, (33) 211.
- gases, studies, (34) 514; (35) 120, 212.
- grains, properties, (32) 617.
- granulation, causes, (26) 420.
- granulation products, classification, (31) 418.
- homogeneity, correlation coefficient for, (33) 727.
- humidity, effect on development of cotton, (34) 337.
- hygiene, notes, (30) 125.
- leachings, equipment for investigation, (32) 719.
- microflora and microfauna, device for obtaining, (30) 28.
- microorganisms—
  - activities, (35) 25.
  - ammonia accumulation by, (37) 812.
  - ammonia consumption by, (35) 729.
  - longevity on drying, (34) 732.
  - nitrate transformation by, (38) 723.
  - nitrogen requirements, (31) 313.
  - notes, (28) 323; (29) 122, 123, 515.
- milling machines, tests, (33) 891.
- moisture and plant succession, (37) 418.
- moisture as affected by—
  - alfalfa, (29) 634.
  - cropping, (29) 425.
  - crops, (33) 225; (34) 17.
  - density of stand of trees, (33) 816.
  - desert rainfall, (30) 619.
  - fallowing, (26) 421, 533.
  - fertilizers, (28) 124; (33) 217.
  - organic matter, (40) 811.
  - tillage methods, (40) 719.
- moisture—
  - classification and measurement, (39) 18.
  - coefficient, (29) 626.
  - conservation, (29) 85, 211, 725; (31) 419, 494; (32) 30, 525; (33) 217; (36) 723; (37) 212, 437.
  - content during drought, (39) 617.
  - content, effect on growth of barley, (40) 219.
  - content of surface foot, (39) 813.
  - determination, (28) 204; (32) 216, 719; (39) 714.
  - determination, interpreting, (26) 421.
  - determination, reporting results, (39) 504.
- moisture, effect on—
  - acidity, (40) 316.
  - availability of fertilizers, (28) 420.
  - availability of plant nutrients, (28) 537.
  - composition of grain, (27) 334.
  - fertilizers, (32) 813, 814.
  - growth and maturity in maize, (39) 20.
  - growth of cucumbers, (30) 142.
  - nitrification, (28) 720.
  - plant associations, (33) 425.
  - potato tubers, (36) 336.
  - protein content of wheat, (30) 662, 836.
  - rate of increase of sugar beet root louse, (33) 357.
  - ratio of tops to roots in plants, (31) 628.
  - root development, (26) 327.
  - salts and nitrates, (36) 816.
  - wheat, (32) 814; (37) 340.
  - winterkilling of cereals, (38) 415.
- moisture—
  - equivalents, (26) 421; (39) 214, 215.
  - evaporation index, (30) 223.
  - factors affecting, (26) 421; (27) 320; (28) 218.
  - field study of, (28) 537.
  - in forests and cultivated fields, (37) 418.
  - inactive, measurement, (36) 719.
  - loss by evaporation, and transpiration, (38) 418.
  - loss by percolation, (33) 619; (38) 418.
  - minimum, dynamic, determination, (38) 719.
  - movement, (27) 500.
  - movement and distribution, (37) 623, 808.

## Soil—Continued.

## moisture—continued.

- movement in an Egyptian cotton field, (30) 21.
- movement in relation to temperature, (34) 215.
- notes, (30) 814.
- of surface foot, effect on nitrification, (40) 719.
- moisture, relation to—
  - apple spot diseases, (38) 753.
  - dry farming, (28) 321.
  - forests, (36) 843.
  - orange growth, (38) 541.
  - plant activities, (27) 214.
  - plant growth, (26) 420; (32) 813.
  - plant succession, (32) 128.
  - root systems of plants, (31) 514.
  - temperature, (34) 127.
  - transpiration and photosynthesis in corn, (36) 525.
  - wilting of plants, (27) 515.
- moisture—
  - retaining, (27) 619.
  - review of investigations, (31) 522.
  - studies, (28) 419; (29) 620, 724; (34) 816; (35) 212; (38) 620.
  - under different cropping systems, (40) 429.
  - under dry farming, (38) 319.
  - under irrigation, (38) 320.
  - unfree, and heat of wetting, relation, (40) 20.
- mulch, effect on evaporation, (28) 218.
- mulch, paper on, (36) 197.
- nitrates as affected by—
  - green manuring, (33) 721.
  - resin and tannin, (36) 513.
  - weeds, (38) 814.
- nitrates, effect on wheat yield, (33) 217.
- nitrogen as affected by—
  - crops and fertilizers, (35) 321.
  - heat, (39) 617.
  - legumes, (26) 196.
  - organic materials, (35) 218.
- nitrogen—
  - availability, (26) 434.
  - forms of, (33) 513.
  - meteorological and biological factors affecting, (32) 718.
  - studies, (28) 814.
- organisms, ammonia accumulation, relation to carbon dioxide production, (39) 516.
- organisms as affected by—
  - bacteriotoxins, (28) 628.
  - carbon bisulphid, (33) 323; (35) 20.
  - carbon disulphid and toluol, (40) 513.
- organisms—
  - culture media for, (40) 739.
  - destruction of cellulose by, (26) 825.
  - destruction of paraffin by, (32) 523.
  - effect of toxic substances on, (31) 342.
  - factors affecting growth, (32) 222.
  - microscopic study, (39) 324.
  - monograph, (30) 323.
  - nitrifying, (39) 619.
  - nitrogen-fixing power, (32) 29.
  - proteolytic activities, (40) 721.
  - rapid study of, (35) 226.
  - spore-forming, (39) 325.
  - steam-formalin treatment for, (29) 645.
- particles, distribution, (32) 511.
- particles, separation according to specific weight, (31) 616.
- phosphates—
  - as affected by ignition, (26) 803.
  - solubility, (26) 725.
  - solubility as affected by ignition, (28) 312.
- physics—
  - and management, textbook, (38) 598.
  - discussion, (26) 717.
  - instruction in, (26) 434.
  - laboratory manual, (28) 493.
  - manual, (34) 293.
  - review of investigations, (30) 119.
  - studies, (26) 28; (27) 214, 819.
- plats, biological variations in, (37) 719.
- potash as affected by lime or gypsum, (36) 519.
- potash, availability as affected by various substances, (36) 625.

## Soil—Continued.

- pressures, determining, (36) 684.
- problems in Oklahoma, (26) 434.
- productivity—
  - as affected by sugar, (28) 623.
  - as affected by sugar beets, (28) 336.
  - factors in, (35) 513.
  - increasing, (29) 329.
  - judging, (29) 820; (36) 117, 511.
  - notes, (28) 292.
- profile survey of—
  - Henry's Fork, Idaho, (36) 583.
  - Rio Grande, (36) 583.
- reaction—
  - as affected by lime, (40) 124.
  - as affecting nitrogen-assimilating bacteria, (39) 619, 722, 723.
  - importance, (26) 422.
  - relation to weed growth, (40) 832.
  - sanitation, notes, (34) 744.
- sanitation, relation to cereal cropping, (29) 516, 820.
- scarifier, description and tests, (28) 486.
- science, new, and plant ecology, (36) 523.
- sickness—
  - in wheat lands, (31) 148.
  - investigations, (28) 520.
  - notes, (28) 321.
  - review of investigations, (28) 815.
  - studies, (36) 514.
  - treatment, (26) 322; (31) 146.
- "sicknesses" in Netherlands, (40) 319.
- solution—
  - as affected by boiling, (30) 124.
  - index of biological changes, (39) 813.
  - index of soil fertility, (30) 124; (31) 620.
  - related to growth of barley, (40) 218.
  - colloidal substances in, (28) 516.
  - composition, (27) 500; (37) 116.
  - composition and use, (36) 720.
  - concentration, (28) 28; (34) 323, 419, 721; (37) 116; (38) 16.
- solution, concentration—
  - as affected by sterilization, (37) 719.
  - relation to biological activities, (39) 323.
  - relation to plant growth, (33) 223.
- solution—
  - effect on plant diseases, (26) 826.
  - extraction, (38) 803.
  - flocculation studies, (30) 623.
  - freezing-point, (38) 16, 813.
  - intake by plants, (35) 825.
  - membrane for studying, (40) 718.
  - method of obtaining, (30) 624; (31) 317; (32) 29; (33) 322; (36) 720.
  - monograph, (28) 320.
  - movement of salts in, (39) 323.
  - nature, (33) 322.
  - notes, (27) 819.
  - obtained by hydraulic action, (38) 512.
  - obtained by oil pressure method, (37) 717; (39) 20.
  - physiological balance, (39) 419.
  - plants as indicators of relative density, (29) 212.
  - preparation, (29) 203.
  - protective effect on soil organisms, (34) 732.
  - relation to plant physiology and distribution, (26) 422.
  - rôle in plant nutrition, (28) 321.
  - studies, (30) 516; (40) 512, 718.
  - studies, lysimeter in, (28) 28.
  - treatise, (26) 122.
- specialists, training, (40) 300.
- studies, (27) 118; (36) 618.
- studies—
  - and teaching, methods and aims, (30) 512.
  - botanical method, (37) 515.
  - drainage tanks for, (37) 799.
  - factors in, (37) 18.
  - in United States, (27) 117.
  - in various countries, (27) 320.
  - methods, (31) 514.
  - outline, (32) 494.
  - theory of antagonism of salts in, (30) 98.
- surfaces, penetration by rain, (29) 426.
- survey in Alabama—
  - Barbour Co., (37) 621.
  - Bullock Co., (34) 210.
  - Clay Co., (36) 511.

## Soil—Continued.

- survey in Alabama—continued.
  - Cleburne Co., (34) 119.
  - Dale Co., (29) 16.
  - Escambia Co., (34) 210.
  - Lawrence Co., (34) 615.
  - Limestone Co., (34) 717.
  - Lowndes Co., (40) 216.
  - Monroe Co., (40) 419.
  - Pickens Co., (38) 512.
  - Pike Co., (29) 16.
  - Russell Co., (34) 119.
  - Walker Co., (35) 624.
  - Washington Co., (38) 214.
  - Wilcox Co., (39) 20.
- survey in Alaska, (34) 209.
- survey in Alaska, Kenai Peninsula region, (40) 813.
- survey in Arkansas—
  - Ashley Co., (31) 813.
  - Columbia Co., (34) 717.
  - Craighead Co., (38) 513.
  - Hempstead Co., (38) 812.
  - Jefferson Co., (36) 20.
  - Mississippi Co., (35) 17.
  - Pope Co., (34) 119.
  - Yell Co., (36) 618.
- survey in California—
  - Healdsburg area, (37) 810.
  - Honey Lake area, (38) 214.
  - Livermore area, (29) 17.
  - Lower San Joaquin Valley, (40) 118.
  - Madera area, (29) 17.
  - Merced area, (35) 117.
  - Pasadena area, (38) 215.
  - Red Bluff area, (29) 17.
  - Riverside area, (38) 421.
  - Sacramento Valley, (34) 120.
  - San Diego region, (39) 210.
  - San Fernando Valley area, (38) 621.
  - San Francisco Bay region, (36) 721.
  - Ukiah area, (36) 420.
- survey in Colorado, Uncompahgre Valley area, (29) 17.
- survey in Delaware, New Castle Co., (37) 211.
- survey in Florida, (28) 31.
- survey in Florida—
  - Bradford Co., (31) 813.
  - Fort Lauderdale area, (34) 210.
  - Franklin Co., (36) 114.
  - Hernando Co., (34) 211.
  - Hillsborough Co., (39) 211.
  - Indian River area, (34) 211.
  - Pinellas Co., (32) 26.
  - Putnam Co., (34) 717.
- survey in Georgia—
  - Brooks Co., (39) 211.
  - Bulloch Co., (29) 16.
  - Clay Co., (35) 421.
  - Colquitt Co., (34) 417.
  - Crisp Co., (38) 215.
  - Dekalb Co., (34) 417.
  - Gordon Co., (31) 814.
  - Habersham Co., (32) 513; (37) 211.
  - Jackson Co., (34) 417.
  - Jasper Co., (39) 512.
  - Jeff Davis Co., (32) 317.
  - Jones Co., (32) 513.
  - Laurens Co., (35) 811.
  - Meriwether Co., (38) 718.
  - Miller Co., (31) 814.
  - Polk Co., (35) 508.
  - Richmond Co., (38) 718.
  - Stewart Co., (34) 120; (35) 721.
  - Sumter Co., (29) 16.
  - Talbot Co., (32) 513.
  - Tatnall Co., (34) 510.
  - Terrell Co., (34) 211.
  - Troup Co., (35) 811.
  - Turner Co., (35) 421.
  - Walker Co., (29) 16.
  - Washington Co., (36) 420.
  - Wilkes Co., (36) 420.
- survey in Idaho, Latah Co., (37) 21.
- survey in Illinois—
  - Bond Co., (33) 21.
  - Du Page Co., (37) 720.
  - Edgar Co., (37) 514.
  - Kane Co., (38) 718.
  - Kankakee Co., (36) 20.

## Soil—Continued.

- survey in Illinois—continued.  
 Lake Co., (33) 415.

 Wood Co., (38) 217.  
 surveys—  
 development and economic value, (34) 513.  
 discussion, (26) 118, 519.  
 papers on, (26) 434; (32) 121.  
 probable error of sampling in, (34) 513.

## Soil—Continued.

- suspensions, layer formation in, (39) 420; (40) 620.  
 tank experiments, (31) 723; (33) 24; (35) 812.  
 temperature, (27) 214; (36) 617.  
 temperature as affected by—  
 cultivation, (33) 510.  
 cultural methods, (34) 217.  
 forest cover, (31) 415.  
 plant covering, (30) 122.  
 sand, (27) 516.  
 temperature as factor in agriculture, (34) 419.  
 temperature, effect on—  
 availability of fertilizers, (28) 420.  
 availability of plant nutrients, (28) 537.  
 crop yields, (30) 135.  
 seedling corn, (38) 530.  
 temperature—  
 factor, evaluation, (40) 130, 426.  
 factors affecting, (26) 29; (34) 514.  
 notes, (28) 516.  
 relation to air temperature, (34) 15; (36) 208.  
 relation to climate, (34) 319.  
 relation to plant growth, (29) 19.  
 rise on moistening, (39) 617.  
 studies, (28) 116, 118; (29) 618; (34) 818; (35) 620.  
 surface, (28) 622.  
 surface, measurement, (37) 520.  
 texture, relation to water level, (38) 806.  
 toxins and nitrification, studies, (38) 322.  
 toxins, formation, (31) 620; (34) 218.  
 types, descriptions, (26) 221.  
 variation, relation to crop production, (29) 416.  
 water—*see also* Soil moisture.  
 changes in level of, (35) 813.  
 composition as affected by cultivation and manures, (29) 416.  
 movements of, (26) 28.  
 zeolites, properties of, (30) 23.  
 zones, vertical, in mountainous Russia, (33) 418  
 Soiling crops—  
 culture on moorland, (38) 132.  
 for Iowa, (31) 265.  
 for summer feeding, (29) 473.  
 in Nebraska, (40) 521.  
 notes, (37) 96, 895.  
 tests, (37) 733.  
 v. silage for dairy cows, (30) 874.  
 v. summer silage, (26) 574.  
 Soiling, summer, suggestions for, (26) 72.  
 Soils—  
 absorbent power, cause, (27) 619.  
 absorption—  
 and coagulation in, (35) 813; (40) 212.  
 and solution phenomena in, (32) 421.  
 in, (36) 622.  
 of ammonia by, (36) 425, 816.  
 phosphates by, (26) 122.  
 phosphoric acid in, (27) 216; (33) 515.  
 ultraviolet and infra-red rays by, (34) 817.  
 absorptive—  
 power, (31) 514.  
 power for ammonia, (36) 219.  
 power for fertilizers, (33) 122.  
 power for water, (37) 18.  
 properties, (27) 515.  
 acid—*see also* Soil acidity.  
 aluminum in, (39) 114.  
 and steam digestion, (28) 121.  
 as affected by fertilizers, (35) 22.  
 bacterial activity, (39) 325.  
 bacterial content, (40) 620.  
 growth of legumes on, (36) 514.  
 humus, nitrification in, (30) 424.  
 in Assam, (32) 812.  
 liming, (36) 514.  
 manganese in, (39) 627; (40) 728.  
 manganese in, action, (30) 823.  
 nitrate formation in, (36) 22.  
 nitrification in, (32) 121; (35) 514; (40) 620  
 of Hawaii, (36) 813.  
 Japan, colloidal properties, (32) 318; (33) 215.  
 tropical countries, (31) 419.  
 or nonbasic, nitrification in, (30) 517.  
 studies, (36) 21.  
 utilization, (30) 23.  
 Actinomycetes in, (29) 222; (37) 517.  
 adaptation to wheat or rye, (34) 813.  
 added boron in, (39) 429.

## Soils—Continued.

- adobe, salts in, (30) 517.
- adsorption—
  - and acidity in, (36) 117.
  - in, (30) 321; (31) 814; (33) 22, 411, 420; (37) 624.
  - of potassium and phosphate ions by, (35) 17.
- adsorptive power, (34) 18, 515.
- adsorptive power, determination, (31) 119.
- aeration—
  - and drainage, (33) 97.
  - by earthworms, (26) 619.
  - ecological significance, (37) 213.
  - effect on plant growth, (27) 821.
  - experiments, use of pits in, (40) 629.
  - importance, (36) 724, 733.
  - notes, (27) 419; (28) 684; (34) 334, 514; (36) 320.
  - relation to forestry, (39) 648.
  - relation to root growth, (40) 30, 820.
  - relation to temperature, (34) 216.
  - studies, (40) 718, 739.
- agricultural adaptations of, (26) 718; (31) 35, 418.
- air-dried, changes in, (30) 123.
- algae in, (28) 31.
- alkali, *see* Alkali.
- alluvial, of Falcat basin, Eritrea, (33) 418.
- American, composition, (28) 28.
- amino acids in, (34) 515.
- amino acids in, behavior, (27) 500; (28) 813; (29) 124.
- ammonia—
  - absorption and nitrification in presence of zeolites, (39) 520.
  - absorption by, (34) 719.
  - evaporation and transformation in, (26) 525.
  - extraction from, (40) 203.
  - fixation in, (37) 318.
  - fixing power, (27) 322.
  - formation in, (27) 721.
  - formation in, as affected by salts, (39) 218.
- ammonification, *see* Ammonification.
- ammonifying efficiency, (27) 517; (28) 31.
- analysis, (26) 26, 127; (27) 216, 320, 321, 416; (28) 217, 493, 736; (29) 119; (30) 618, 622, 818; (31) 24; (32) 122; (33) 204, 205, 212, 213, 214, 321; (34) 810; (37) 114; (39) 423.
- analyses—
  - insufficiency, (28) 30.
  - paper on, (32) 121.
  - relation to plant yield, (26) 519.
  - value, (29) 512; (30) 119, 513; (32) 321; (33) 421, 811; (36) 617.
- and crops, textbook, (30) 695.

- plants, water relation between, (34) 521.
- soil fertility, textbook, (28) 794.
- soil management, course in, (38) 897.
- animal organisms of, (34) 306.
- antagonism of salts in, (31) 721.
- arable, formation, (36) 114.
- arable, nitrogen content, (30) 716.
- arid—
  - brown niter spots in, (35) 724.
  - fertilizers for, (36) 726.
  - humus nitrogen problem in, (35) 513.
  - humus of, (34) 719.
  - mechanical analyses, (26) 719.
  - nitrification in, (29) 21, 211.
  - nitrogenous fertilizers for, (34) 219, 621.
- arsenic content, (30) 321, 423.
- as affected by—
  - absorbents, (36) 214.
  - aldehydes, (31) 620.
  - alfalfa, (40) 319, 719, 722.
  - ammonium sulphate, (34) 622.
  - arsenic, (32) 730; (34) 421.
  - bastard trenching, (30) 236.
  - beech leaves and litter, (35) 119.
  - calcium, (32) 33.
  - calcium carbonate and sulphate, (39) 821.
  - caustic lime and chalk, (32) 399.
  - chlorids, (35) 423.
  - climate, (30) 514; (31) 214; (33) 210.
  - continuous cropping, (35) 813.
  - cowpeas, (34) 420.
  - disinfectants, (31) 620.
  - dynamite, (34) 125, 819.

## Soils—Continued.

- as affected by—continued.
  - earthworms, (30) 425.
  - fairy-ring fungi, (38) 222.
  - fertilizers, (27) 622; (30) 219; (32) 31, 721; (33) 122; (35) 216, 516.
  - freezing, (26) 618.
  - frost, (29) 212.
  - fungus parasites of plants, (29) 150.
  - green manuring, (39) 326.
  - heating, (26) 618, 722; (30) 419; (31) 25, 216, 620; (32) 721; (35) 138, 722.
  - humus, (30) 122.
  - irrigation and manure, (36) 816.
  - lime, (27) 218; (29) 210; (31) 220.
  - long-continued one-sided fertilizing, (28) 624.
  - manganese, (40) 820.
  - molasses, (27) 419.
  - nucleic acid, (26) 814.
  - organic solvents, (37) 422.
  - partial sterilization, (28) 121.
  - plant growth and fertilizers, (27) 124; (28) 520.
  - plant residues and sugars, (40) 121.
  - plant roots, (30) 120; (33) 216.
  - radioactivity, (33) 23.
  - salts, (26) 618.
  - sawdust from various woods, (39) 325.
  - silicic acid in lime, (26) 34.
  - smoke, (27) 229; (32) 422.
  - sodium arsenite, (33) 623.
  - soluble salts, (26) 216.
  - sterilization, (29) 22; (35) 515.
  - storage, (38) 619.
  - sugar, (27) 722.
  - volcanic ash, (29) 726.
  - weather, (31) 214.
  - wet cultivation for rice, (38) 117.
- atmospheric pressure in, (26) 323.
- auto-irrigators for, (38) 719.
- bacillus radiclecola in, (29) 423; (33) 121.
- bacterial—
  - content as affected by carbon dioxide gas, (39) 618.
  - flora of, (30) 819.
  - slime in, (27) 620.
  - toxins in, (32) 399.
- bacteriological—
  - analysis, (28) 425; (29) 824; (39) 312.
  - analysis, error in, (36) 214.
  - analysis, sampling for, (39) 618.
  - studies, (28) 416.
  - tests, (26) 322; (40) 317.
- bacterio-toxins in, (27) 621.
- bacterio-toxins, nonpersistence, (40) 23.
- bacterium lactis viscosum in, (40) 214.
- barren, studies, (31) 819.
- benzene derivatives in, (30) 610.
- biochemical factors in, (27) 500; (28) 29.
- biochemical processes in, (34) 217; (40) 515.
- biological—
  - absorption, (27) 20; (31) 313.
  - actions, measuring, (36) 116.
  - activity, relation to concentration of solution, (39) 323.
  - analysis of, (31) 216.
  - changes in, during storage, (37) 17.
  - changes, solution as index, (39) 813.
- biology of, (28) 416.
- black, improvement, (27) 416.
- black, of Oued R'Dom Valley, Morocco, (28) 717.
- black pigment of, (36) 815.
- blasting, (32) 85.
- bleached, in North Sea marshes, (30) 514.
- blow, control, (32) 793.
- blowing, management, (31) 25.
- bog, *see* Bog.
- brown, of Europe and Asia, (27) 416.
- brown, of Java and Malay Peninsula, (34) 811.
- "brown spots" in, (39) 323.
- calcareous—
  - black alkali in, (38) 18.
  - effect on plants, (27) 824; (31) 627, 816; (35) 726.
  - relation to pineapple chlorosis, (26) 121; (29) 623.
  - utilization, (29) 632.
- calcium compounds in, (36) 621.

## Soils—Continued.

- caliche, composition, (35) 511.  
 capacities for irrigation water, (39) 213.  
 capillarity, (28) 622.  
 capillary lift of, measurement, (30) 22; (31) 720.  
 carbon determination in, (40) 308.  
 carbon dioxide production in, (31) 127; (38) 118.  
 carbon dioxide treatment, (39) 618, 620; (40) 739, 820.  
 carbon-nitrogen relations, (38) 421.  
 carbonized material in, (28) 418.  
 Caribou loam, fertilizer requirements, (39) 327.  
 Carrington loam, (27) 18, 512.  
 catalysis, studies, (28) 118.  
 catalytic power, (30) 425.  
 Catlin's River, analyses, (26) 719.  
 cellulose-destroying power of, (31) 313.  
 cementing material, plant food value, (27) 513.  
 characterizing according to molecular composition of silicates, (31) 22.  
 chemical—  
   changes, microbial agency in, (38) 322.  
   characterization, (27) 417.  
   criteria of productivity, (40) 120.  
 chemistry of, (28) 416; (31) 515; (32) 618.  
 chemistry of—  
   discussion, (26) 717.  
   progress in, (30) 212.  
   review of investigations, (30) 119.  
   status, (32) 718.  
   studies, (40) 125.  
   treatise, (30) 512.  
 cherozem—  
   classification, (28) 515.  
   nitrate content, (34) 618.  
   notes, (28) 319.  
   of Northern Caucasus, (37) 516.  
   of Russia, (26) 812; (27) 619.  
   sterilization, (38) 17.  
 cherry orchard—  
   analyses, (35) 720.  
   chemical and biological notes, (33) 640.  
 Chester loam, (27) 17.  
 chlorin absorption, (40) 619.  
 chlorin and sulphur content, (30) 422.  
 circulation of moist air in, (31) 26.  
 circulation of nitrates in, (28) 720; (30) 623.  
 citrus, fertilization, (29) 317.  
 classification, (26) 421; (27) 117, 320, 515; (28) 515, 537; (30) 621; (31) 719; (32) 200, 618; (35) 319, 812, 899; (36) 210, 813; (38) 512.  
 classification—  
   mechanical, (35) 319.  
   mechanical, chemical criteria, and productivity, (40) 120.  
   physical principles, (26) 434.  
 clay—*see also* Clay.  
   as affected by hydroxyl ions, (31) 216; (32) 318.  
   as affected by marling, (30) 23.  
   colloids of, (35) 319.  
   fixation of ammoniacal nitrogen by, (29) 127.  
   improvement, (31) 723.  
   in vicinity of Mexico City, Mexico, (35) 19.  
   of Limburg, Netherlands, (38) 513.  
   plasticity of, (26) 220.  
 cleaning for microscopic examination, (33) 109.  
 climate, and plant growth, relationship, (26) 516.  
 Clyde series, (32) 316.  
 coconut, analyses, (30) 20.  
 coconut, of Malay States, analyses, (32) 420.  
 cogon, crop-producing power, (30) 832.  
 cogon, improvement, (31) 38.  
 cohesion in, (30) 214, 215; (36) 117.  
 colluvial, of Missouri, (31) 720.  
 Coloma sand, studies, (39) 323.  
 colored sandstone, of Germany, (31) 513.  
 compaction by tractors, (36) 400.  
 composition, (28) 620; (30) 513; (34) 619.  
 composition—  
   as affected by moles, (27) 619.  
   affected by rainfall, (35) 514.  
   affected by sewage irrigation, (26) 614.  
   affecting nitrogen utilization, (39) 726.

## Soils—Continued.

- composition—continued.  
   terminology, new, (28) 318.  
   variation in, (37) 811.  
 conservation, (27) 20.  
 copper determination in, (40) 807.  
 cotton, of—  
   India, nature, (27) 823.  
   Nyasaland and Uganda, (27) 217.  
   South Carolina, fertilizer requirements, (28) 196.  
 course in, elementary, (27) 96.  
 course in, extension, (35) 194.  
 courses at Iowa State College, (35) 319.  
 courses in, (36) 595.  
 cranberry, limed, *Azotobacter* in, (40) 214.  
 creatinin in, origin, (26) 815.  
 creatinin isolation from, (26) 419, 420.  
 crop-limiting factors in, (29) 515.  
 cropped and bare, studies, (39) 517.  
 Crowley silt loam, (27) 17.  
 cultivated—  
   absorption by, (29) 315.  
   absorption of salts by, (34) 324.  
   adsorption phenomena, (27) 20.  
   decline in productivity, (29) 516.  
   formation of nitrates in, (26) 319.  
   function of humus in, (26) 422.  
   loss of nitrogen and organic matter from, (33) 809; (34) 516.  
   niter spots in, (32) 29.  
   nitrate reduction in, (40) 319.  
   of Cuba, (27) 117.  
 Cyanophyceae in, (34) 513.  
 dark, correlation of humus and mineral matter in, (33) 720.  
 decalcification by smoke, (31) 521.  
 decomposition of cyanamid and dicyanodiamid in, (40) 724.  
 decomposition of peptone and cellulose in, (34) 813.  
 deep tillage for, in Great Plains, (39) 812.  
 DeKalb, fertilizer experiments, (39) 22; (40) 299, 723.  
 DeKalb, fertilizer requirements, (38) 219.  
 Deli, of Sumatra, investigations, (28) 621.  
 denitrification in, (27) 424; (29) 817; (32) 618.  
 destructive distillation, (33) 120.  
 determination of—  
   biological solution, (33) 120.  
   capillary pull, (33) 618.  
   critical moisture content, (32) 719.  
   easily soluble matter in, (26) 519.  
   firmness and plasticity, (27) 320.  
   outer surface, (26) 219.  
   Rhizobia in, (27) 620.  
   surface area, (30) 816.  
   volume weight, (36) 197; (37) 18; (39) 213.  
 disinfection, (33) 250; (36) 623; (37) 319, 519.  
 disinfection with carbon dioxide, (31) 248.  
 distribution of—  
   silt and clay in, (28) 28.  
   vertical pressure in, (35) 581.  
 dried, bacteriological studies, (29) 325.  
 dried, increased nitrate content, (32) 817.  
 drift, of Norfolk, England, (26) 120.  
 dry-farm, nitrogen and humus content, (31) 318.  
 drying, (27) 121; (28) 622; (33) 810.  
 dynamiting in the Great Plains, (39) 812.  
 effect on—  
   agriculture, (36) 417.  
   availability of fertilizers, (34) 130; (36) 819.  
   burning quality of tobacco, (38) 239.  
   cereals, (26) 814.  
   composition of medicinal plants, (34) 13.  
   composition of wheat, (26) 133; (29) 834; (30) 440; (38) 518.  
   cultivated crops, (33) 825.  
   drainage water, (26) 619.  
   Egyptian cotton, (28) 833.  
   firmness on root development, (30) 136.  
   forest yields, (37) 450.  
   marsh plants, (29) 531.  
   mineral content of feeds, (28) 364.  
   nitrogen relations of crops, (40) 822.  
   pecans, (34) 151.  
   plant varieties, (28) 537.  
   protein content of soy beans, (28) 721.

## Soils—Continued.

- effect on—continued.
  - quality of wine, (26) 813.
  - root crops, (29) 577.
  - root development, (26) 328.
  - roses, (28) 342.
  - sal seedlings, (32) 144.
  - strawberries, (31) 534.
  - substances in suspension and in solution, (29) 19.
  - vegetation, (29) 513.
  - wheat, (29) 835.
- ether and chloroform extracts of, (29) 801.
- evaporation—
  - and run-off, (40) 810.
  - of ammonia from (30) 425.
  - of water from, (28) 622, 812; (29) 125, 211; (30) 321; (31) 25; (32) 815; (36) 421.
  - under arid conditions, (26) 220.
- evapo-transpiration ratio, (39) 517.
- exchange of bases in, (28) 517.
- exchange reactions in, (33) 119.
- fallow, nitrification in, (28) 417.
- fallowing experiments, (28) 321.
- Fargo clay loam, (27) 512.
- fermentation of mannite by, (34) 813.
- fermentation in, (36) 813.
- ferro-index, (40) 214.
- ferrous iron in, (30) 719.
- ferruginous—
  - fixation of phosphates in, (30) 722.
  - relation to grape chlorosis, (26) 245.
- fertilizer requirements, (26) 422; (27) 216; (29) 521; (31) 94, 217, 218; (33) 212, 213, 214, 215; (34) 22, 512, 516, 620, 820; (35) 121.
- fertilizer requirements and chemical and mineralogical composition, relation, (31) 621.
- fertilizer requirements, determination, (30) 119; (31) 217; (32) 620; (33) 22, 817; (35) 215.
- fixation of fertilizers by, (32) 721.
- flocculation in, (36) 21.
- forest—
  - absorption of phosphoric acid by, (28) 421.
  - absorption of rainfall by, (31) 515.
  - and cultivated, evaporation from, (37) 418.
  - animal organisms in, (26) 223.
  - as affected by silvicultural practices, (29) 343.
  - bacteria in, (29) 325; (31) 521.

- solubility—
  - of manganese in, (28) 813.
  - of nitrogenous compounds in, (29) 108.
  - studies, (33) 513.
- soluble salt content, (40) 512.
- specific gravity, (33) 206.
- sponge spicules in, (27) 500, 622.
- steamed, chemistry of, (28) 417, 418.
- steamed, reinoculation, (27) 499; (28) 30.
- sterilization, (26) 322; (28) 324, 623; (32) 321, 423, 620; (35) 21; (36) 518; (37) 213, 319, 421, 519, 719; (38) 17, 420, 514, 556, 720.
- sterilization—
  - and disinfection of, (31) 621.
  - by antiseptics, (32) 816.
  - by caustic lime, (29) 730; (30) 399; (31) 519.
  - by lime, (32) 32.
  - effect on bacterial growth, (28) 329.
  - effect on plant food production, (29) 122.
  - experiments, (40) 147.
  - in forcing houses, (31) 336.
  - partial, (27) 722; (28) 538; (31) 27; (35) 515; (40) 23, 619.
  - review of investigations, (28) 815.
  - studies, (29) 221.
- sterilized—
  - and reinoculated, water-soluble matter in, (29) 22.
  - effect on crop yield, (30) 217.
  - effect on plant growth, (30) 225.
  - nitrate reduction in, (31) 121.
  - productivity, (31) 819.
  - solubility of phosphoric acid in, (28) 417.
- stored, nitrogen content, (39) 421.
- subarctic, unusual features, (38) 732.
- sugar inversion by, (40) 123.
- sulfification in, (36) 22.
- sulfification in as affecting nitrogen transformations, (39) 823.
- sulfifying power, (31) 318; (37) 119.
- sulphates in, determination, (39) 12.
- sulphur—
  - bacteria in, (33) 23.
  - in, (30) 20.

## Soils—Continued.

- sulphur—continued.  
   oxidation in, (34) 19.  
   transformation in, (33) 815  
   treatment, (34) 540.  
 surface area, (33) 216; (34) 419.  
 surface forces, measurement, (35) 733; (36) 319  
 Susquehanna fine sandy loam, (26) 518.  
 swamp, *see* Swamp.  
 swamping, (27) 121.  
 tea, of Java and Sumatra, (39) 423.  
 testing, (31) 215.  
 textbook, (33) 398; (38) 196; (40) 396.  
 thermal diffusivity and water content, (28) 421.  
 thufur or hilly, of Iceland, (30) 515.  
 tillable, of Roumania, (27) 217.  
 tillage, (29) 634; (33) 97.  
 tobacco—  
   analyses, (35) 720; (36) 628.  
   cultivation, (36) 513.  
   of Deli, (29) 815.  
   of Java, (37) 419.  
 toxicity, amelioration, (37) 519  
 toxicity due to aldehydes, (40) 22.  
 toxins of, (39) 423; (40) 23, 728.  
 translocation of calcium in, (40) 719.  
 translocation of salts in, (38) 417.  
 treatise, (26) 215; (27) 821; (31) 118, 719; (34) 321,  
   716, 793; (35) 214, 421; (36) 114, 617.  
 treatment, (26) 520, 539.  
 Trinity clay, (26) 119.  
 tropical—  
   Azotobacter in, (30) 218.  
   black color of, (34) 217.  
   fertilizer needs, (31) 723.  
   mechanical analyses, (26) 719.  
   selection, (29) 727.  
 truck, of Atlantic coast region, (29) 416.  
 usar and regur, of India, (29) 514.  
 use and abuse, (27) 95.  
 valuation, (37) 18.  
 value of field study, (26) 434.  
 vanillin in, (40) 24.  
 variability in and its significance, (39) 815.  
 ventilation and drainage, (34) 217.  
 viable weed seeds in, (29) 536.  
 virgin and cultivated, bacterial activity, (32)  
   216.  
 volcanic, of Japan, (29) 18.  
 volcanic, of St. Vincent, (37) 420.  
 volcanic, petrography, (32) 419.  
 Volusia loam, (27) 18, 319.  
 Wabash clay, (26) 119.  
 warping, in England, (29) 514.  
 washing, (39) 322.  
 water capacity, (26) 218, 619; (28) 622; (31) 313;  
   (34) 494.  
 water capacity and hygroscopic coefficient, (37)  
   117.  
 water capacity, minimum, (30) 121.  
 water content, (37) 116.  
 water-logged, infertility, (37) 19.  
 water-logged, reclamation, (33) 88, 392.  
 water movement in, (26) 619; (28) 219.  
 water-soluble nutrients in as affected by lime,  
   (40) 124.  
 water-supplying power, (34) 721.  
 wet and dried, bacterial activity, (27) 121.  
 wet, importance of draining, (28) 796.  
 wheat, of Cape Province, (37) 622.  
 white, notes, (30) 213, 515.  
 white, of upper Weser River, (31) 513; (34) 16.  
 wilting coefficients, (31) 522; (40) 22.  
 Wisconsin drift, management, (34) 722.  
 zeolitic compounds in, (33) 119.  
 Solanaceae—  
   abscission in, (39) 226.  
   tokra disease, (39) 146.  
 Solanaceous plants, brown rot of, description, (31)  
   745.  
 Solandra longiflora, toxicity, (38) 782.  
 Solangustin, isolation and properties, (32) 309.  
 Solanin—  
   as a potato poison, (34) 164.  
   determination in tomatoes, (34) 255.  
   effect on potatoes, (28) 528.

## Solanum—

- angustifolium, constituents of, (32) 309  
 caldasii, bud mutations in, (33) 222.  
 commersonii—  
   culture experiments, (28) 738.  
   description and culture, (36) 637.  
   mutations in, (35) 330.  
   tests, (26) 437.  
   tubers of, (31) 529.  
   variation in, (28) 130.  
 darwinianum, notes, (32) 726.  
 elaeagnifolium, chymase of, (36) 412.  
 fendleri hybrid, studies, (40) 131, 241.  
 graft hybrids of, (33) 429.  
 grafts between various species, (31) 740.  
 incanum, analyses and digestibility, (27) 871;  
   (32) 167.  
 lycopersicum, carotenoid content, (31) 803.  
 maglia, bud mutations, (27) 230.  
 muricatum, tests, (27) 741.  
 n. spp., descriptions, (31) 425.  
 nigrum—  
   crossing experiments, (35) 445.  
   crossing with prairie berry, (34) 146.  
   mineral nutrition, (28) 224.  
 rest periods, (40) 223.  
 rostratum, description, (38) 539.  
 spp., bud mutations of, (28) 530.  
 spp., bud variations in, (29) 829; (30) 433, 529,  
   730.  
 spp., studies, (26) 529.  
 spp., variations in, (26) 433.  
 torbum, grafting eggplants on, (33) 139.  
 tuberosum, endophytic endodermal fungus in,  
   (32) 643.  
 tuberosum, origin, (31) 833.  
 tubingense, description, (27) 31.  
 wild tuberiferous, descriptions, (31) 824.  
 Solar—  
   activity—  
     and atmospheric optical phenomena, (34)  
       614.  
     and planetary phenomena, (35) 618.  
     relation to rainfall and magnetic storms,  
       (38) 15.  
   atmosphere, motion of, (31) 615.  
   atmosphere, structure, (38) 811.  
   corona, rotation, (34) 414.  
   coronae, (38) 812.  
   corpuseular rays, (36) 419.  
   eclipse at Honolulu, (34) 118.  
   halo at Miami, Fla., (36) 718.  
   halos, notes, (29) 121; (32) 25; (33) 717.  
   photosphere, spectrum and temperature of, (34)  
     413.  
   radiation—  
     and sky radiation at Madison, Wis., (35)  
       419.  
     as affected by clouds, (28) 815.  
   radiation intensities—  
     and air temperature, relation, (32) 24.  
     at Madison, Wisconsin, (28) 315.  
     at Mount Weather, Va., (31) 615; (32) 614.  
     at Washington, (32) 810.  
   radiation—  
     measurements, (35) 115; (38) 114.  
     papers on, (33) 320, 717; (34) 413, 614.  
     seasonal variations in, (34) 415.  
     variations in, (37) 417.  
   rays, decomposition of water by, (28) 416.  
   variability, (35) 619.  
 Soldier—  
   beetles, fungus diseases of, (26) 252.  
   bug, green, studies, (32) 247; (37) 258; (38) 197.  
 Soldiers and sailors—  
   agricultural instruction for, (36) 794; (38) 299;  
     (39) 98, 699; (40) 591.  
   employment in England and Wales, (35) 296.  
   farm work for, (36) 392; (38) 293; (40) 790.  
   forestry pursuits for, (40) 898.  
   land settlement for, (35) 290, 697; (37) 190; (38)  
     791; (39) 89, 648, 702; (40) 389, 591, 687, 790.  
   rehabilitation, (40) 793.  
   rehabilitation, cooperation of agricultural col-  
     leges in, (39) 708.  
 Soldiers, Arab, feeding, (33) 68.

- Solenopsis—  
 debilis, notes, (34) 752.  
 geminata, notes, (27) 264; (28) 853; (29) 653; (34) 753; (39) 59.  
 geminata rufa, notes, (28) 158.  
 molesta, studies, (35) 662.  
 sp., parasitic on bee moth, (29) 860.  
 Solenothrips rubrocinctus, notes, (36) 457.  
 Solihvete, Svalöfs, description, (26) 440.  
 Solidago—  
 n.spp., descriptions, (34) 336.  
 oleraceus, geographical distribution, (26) 335.  
 sparsiflora subcinerea, notes, (29) 441.  
 spectabilis, toxicity, (37) 482; (39) 184.  
 Solids, determination in—  
 evaporated milk, (30) 509.  
 fruit juices and jellies, (29) 798.  
 milk and other fluids, (34) 206.  
 wine, (32) 715.  
 Solubility, determination, (37) 205.  
 Solutions—  
 balanced, and antagonism, (33) 628.  
 balanced, penetration of, (35) 823.  
 colored, acidity of, (36) 299.  
 determination of mineral salt content, (34) 732.  
 electrical conductivity, (36) 503.  
 equilibria in, (39) 203, 204.  
 evaporation apparatus for, (34) 608; (37) 503.  
 handling by suction, (37) 503.  
 lectures on, (31) 309.  
 nutrient, *see* Nutrient.  
 standardizing, (38) 204.  
 Solvents, treatise, (30) 310.  
 Somatic cells as affected by strychnin, (26) 229.  
 Somatogenic characters, inheritance in, (28) 531.  
 Sonchus—  
 crassifolius, analyses, (33) 466.  
 oleraceus, analyses and feeding value, (33) 70.  
 Soot—  
 analyses, (27) 212, 327; (34) 521.  
 availability of nitrogen in, (35) 427.  
 character and composition, (26) 727.  
 dispersal, (27) 212.  
 effect on vegetation, (31) 826; (34) 154.  
 fertilizing value, (27) 212, 832; (29) 129; (33) 821.  
 Sootfall in—  
 English towns and cities, (30) 619; (34) 15.  
 Indianapolis, (32) 254.  
 London, (27) 128, 212.  
 St. Louis, (38) 115.  
 Sooty Crambus, notes, (28) 158.  
 Sooty molds, studies, (27) 848.  
 Sorbite as source of carbon for molds, (30) 226.  
 Sorbus aucuparia, carotinoïd content, (31) 803.  
 Sordaria fimicola, notes, (28) 562.  
 Sordaria oryzae n.sp., notes, (37) 148.  
 Sore—  
 head in chickens, (32) 677.  
 head in chickens, immunization, (30) 785.  
 mouth in dogs, (27) 576.  
 mouth in pigs, (31) 879.  
 throat—  
 epidemic in Baltimore, (28) 674.  
 epidemic, relation to milk supply, (28) 580, 674; (31) 174; (33) 577; (34) 473.  
 septic, transmission by milk, (27) 177; (32) 263; (37) 273.  
 streptococci, sources, (36) 577.  
 Sorex fumeus umbrosus n.subsp., description, (37) 758.  
 Sorex n. forms, descriptions, (40) 351.  
 Sorghum—*see also* Kafr, Milo, *etc.*  
 Amber, yields, (40) 327, 733.  
 analyses, (27) 68, 469; (28) 463.  
 and cowpea mixture for hay, (39) 129.  
 and cowpea silage, digestibility, (31) 863.  
 and cowpea silage, mineral constituents, digestibility, (40) 769.  
 and cowpeas, sowing experiments, (28) 735.  
 aphid enemies of, (31) 755.  
 as affected by bog water, (28) 733.  
 affected by climate and weather, (39) 236.  
 dry land crop, (37) 637.  
 forage crop, (29) 225; (38) 665; (39) 532.  
 silage crop, (29) 575; (39) 134, 231, 272; (40) 330.  
 substitute for sugar, (38) 899.  
 sugar-producing plant, (40) 325.  
 biennial cropping, (38) 430.  
 Black Amber, seeding experiments, (40) 522.  
 Sorghum—Continued.  
 breeding—  
 experiments, (35) 32.  
 experiments, technique, (40) 241.  
 for drought resistance, (34) 528.  
 cultivated, prototype, (33) 531.  
 culture, (27) 32; (31) 35; (32) 132, 226; (34) 630, 694; (35) 33.  
 culture—  
 experiments, (26) 436, 830; (27) 136, 529; (28) 136, 633; (29) 225; (30) 434, 824; (31) 733, 829; (32) 132, 526; (33) 31, 32, 33, 333; (34) 227, 630; (35) 529; (36) 133, 332, 735, 830; (37) 227, 329, 436, 529, 635; (38) 133, 334, 341, 632, 829, 830; (39) 437, 835; (40) 230.  
 for chicken feed, (38) 827.  
 in California, (37) 338.  
 cotton belt, (32) 533.  
 eastern Oregon, (38) 432.  
 Guam, (32) 731.  
 Kansas, (39) 33; (40) 331.  
 Montana, (33) 526.  
 New Mexico, (40) 18.  
 Philippines, (26) 361.  
 sand hills of Nebraska, (35) 827.  
 Tucumán, (37) 134.  
 Washington, (40) 730.  
 under dry farming, (36) 528, 529; (37) 329.  
 value, and uses, (28) 137.  
 depth of sowing tests, (27) 835.  
 digestibility, (38) 778.  
 diseases in West Indies, (37) 452.  
 downy mildew, studies, (31) 51.  
 Early Amber, as a dry land crop, (29) 736.  
 Early Amber, yields, (39) 336.  
 effect on following crop, (35) 827.  
 exhibits, preparation, (31) 495.  
 feeding value, (39) 538; (40) 875.  
 fertilizer experiments, (26) 232, 631, 830; (27) 336; (30) 820; (31) 421, 733, 829; (35) 323; (37) 436; (38) 829.  
 fodder, digestibility, (31) 863.  
 fodder, mineral constituents, digestibility, (40) 769.  
 for forage, (33) 226.  
 for sirup production, (40) 434.  
 forage experiments, (26) 632.  
 formation of sugar in, (28) 225; (29) 409.  
 Freed, culture experiments, (40) 331.  
 Fusarium disease, studies, (36) 348.  
 grain—  
 analyses, (37) 539.  
 and forage, irrigation experiments, (40) 330.  
 as forage and silage crop, (31) 829.  
 as human food, (36) 661; (39) 538, 870, bread from, (37) 539; (40) 66.  
 breeding experiments, (40) 624.  
 chemistry of, (40) 608.  
 classification, (39) 838.  
 composition and feeding value, (35) 372.  
 composition and uses, (33) 835.  
 culture and use, (32) 335.  
 grain, culture—  
 experiments, (27) 532; (30) 136; (34) 229.  
 in Guam, (40) 327.  
 in Texas, (27) 36; (29) 429; (35) 440; (39) 537, 838.  
 in Utah, (38) 230.  
 under dry-land conditions, (31) 429.  
 under irrigation, (34) 229.  
 grain—  
 digestibility, (36) 660.  
 drought resistance of, (28) 633.  
 fats and fatty acids of, (38) 410.  
 food value, (31) 357.  
 improvement, (40) 737.  
 notes, (31) 333.  
 seed selection, (38) 237.  
 starches of, (35) 108, 616.  
 storage, (39) 538.  
 treatise, (31) 834.  
 varieties, (32) 226, 332, 334.  
 variety tests, (40) 433.  
 green manuring experiments, (39) 31.  
 hay, chloroform extract of, (31) 71.  
 hay, composition, (27) 668.  
 hay, digestibility, (27) 669; (31) 863; (37) 168, 865.  
 hay, production in Nebraska, (35) 438.  
 head smut, studies, (31) 747.

## Sorghum—Continued.

- hydrocyanic acid in, (27) 77; (30) 30, 584; (33) 234; (35) 340; (37) 109, 113.  
 improvement, (26) 737; (28) 736.  
 inheritance of stem characters, (37) 234.  
 insects affecting, (28) 555.  
 irrigation experiments, (27) 529; (30) 34; (35) 286.  
 juice, defecation for sirup manufacture, (37) 511.  
 kernel smut, covered, (39) 756.  
 kernel smut, studies, (34) 444; (38) 645.  
 leaves—  
   free hydrocyanic acid in, (27) 635.  
   variation of water and dry matter in, (37) 637.  
 maturity in relation to composition, (40) 330.  
 midge affecting Sudan grass, (33) 746.  
 midge in Argentine, (35) 155.  
 midge, notes, (27) 36; (29) 252.  
 moisture content and shrinkage, (34) 828.  
 nonsaccharine, culture in Philippines, (40) 231.  
 notes, (26) 362; (29) 395.  
 on acid manganese soil, (39) 627.  
 orange, hydrocyanic acid in, (33) 234.  
 pigeon pea mixtures, tests, (26) 631.  
 plumosum, analyses, (30) 565.  
 root system, (36) 827.  
 root systems and leaf areas, (35) 437.  
 rust, notes, (36) 541.  
 saccharatum, analyses, (27) 469.  
 seeding experiments, (37) 330, 331, 339; (38) 32, 630; (40) 227.  
 seeds, formation of hydrocyanic acid in, (27) 132.  
 selection experiments, (37) 32; (38) 433.  
 silage—  
   acetylmethylcarbinol in, (40) 412.  
   analyses, (27) 469.  
   digestibility, (31) 863; (37) 865.  
   feeding value, (39) 71; (40) 666.  
   for cows, (37) 683.  
   forage poisoning due to, (36) 581.  
 sirup—  
   analyses, (30) 665.  
   evaporators, (39) 808.  
   from Arizona cane, analyses, (39) 769.  
   manufacture, (26) 512; (39) 315, 510.  
   notes, (37) 715.  
 smut—  
   life history, (28) 445.  
   notes, (32) 240; (35) 348.  
   treatment, (28) 445; (38) 351; (39) 248.  
 stalks, feeding value, (38) 168.  
 sugar content as affected by castration, (31) 44.  
 sugar content, studies, (40) 325.  
 sweet—  
   as dry-farm crop, (39) 736.  
   forage crop, (39) 236.  
   hay crop, (39) 129.  
   silage crop, (38) 174, 630; (39) 33, 71, 129.  
   covered kernel smut on, (39) 756.  
   critical period of growing season, (39) 811.  
   feeding value of seed, (39) 71.  
   of India, analyses, (32) 136.  
   seeding rates, (40) 729.  
 textbook, (30) 635.  
 toxicity, (27) 78.  
 transpiration in, (34) 522; (36) 226.  
 triple-seeded spikelets in, (36) 532.  
 uses of grain, (39) 538.  
 v. corn for forage, (35) 529.  
 varieties, (26) 233, 631; (27) 32, 337, 736; (28) 533, 735, 827; (29) 426, 535, 631; (30) 828; (31) 36, 133, 733, 829; (32) 729; (34) 227; (35) 337, 526, 528, 832; (36) 33, 131, 133, 830; (37) 32, 132, 329, 331, 435, 436; (38) 32, 334, 341, 431, 433, 630, 828, 829, 830, 831; (40) 331, 823.  
 variety, new, notes, (29) 141.  
 variety tests, (39) 33, 129, 433, 434, 835, 838; (40) 32, 230, 624.  
 vulgare—  
   and *S. halepense*, description and culture, (35) 640.  
   cyanogenesis in, (40) 804.  
   formation of cyanogen in, (28) 527.  
   notes, (27) 32.  
 water requirement, (29) 826; (32) 127, 226, 335; (35) 529, 823; (38) 229.  
 yields, (29) 32.  
 Sorgo and corn, transpiration, (39) 440.  
 Sorindeia oleosa fruit, studies, (28) 360.  
 Sorodiscus callitrichis, tissue invasion by, (40) 50.

Sorolpidium betae, notes, (28) 346.

## Sorosphaera—

- graminis, life history and cytology, (26) 52.  
 veronica, tissue invasion by, (40) 50.

Sorospora uveella (agrotidis), studies, (36) 757.

## Sorosporium—

- panic, description, (30) 351.  
 reilianum, notes, (35) 45.  
 reilianum, studies, (31) 747.  
 simii, n.sp., description, (36) 450.

## Sorrel—

- catalytic fertilizers for, (27) 629.  
 disease, notes, (38) 350.  
 dissemination by farm animals, (26) 839.  
 growth in alkaline media, (40) 40.  
 growth in relation to soil acidity, (35) 529.  
 red, description and eradication, (34) 736; (37) 239.

Sotol as feeding stuff, (40) 277.

Sotol, notes, (29) 441.

Souma, transmission by blood-sucking insects, (26) 150.

## Sound—

- rays, path in air, (36) 719.  
 waves, abnormal propagation, (36) 19.

Soup cubes, composition, (31) 656.

## Soups—

- canned, inspection, (27) 565.  
 condensed, examination, (26) 660; (31) 658.  
 osmotic pressure, (28) 262.

Sour grass, culture experiments, (31) 524.

## Soursop—

- as a stock for cherimoya and atemoya, (32) 143.  
 propagation, (27) 537.

## South Carolina—

Boll Weevil Commission, report, (37) 359.

## Station—

- financial statement, (26) 692; (28) 599.  
 notes, (26) 397, 495, 696; (27) 199, 800; (29) 98, 399; (30) 398, 600; (31) 198, 497; (32) 600; (34) 199, 497; (36) 197, 296, 599, 696, 899; (37) 300, 499, 600; (38) 98, 800.  
 report, (30) 599; (32) 598; (34) 694; (36) 693; (38) 698; (40) 694.  
 report of director, (26) 692; (28) 599.

## South Dakota—

College, notes, (26) 696; (27) 300, 398; (29) 700; (30) 198; (31) 300; (34) 97; (36) 797; (38) 98, 400, 600; (39) 97, 198; (40) 99, 499.

## Station—

- financial statement, (26) 692.  
 notes, (26) 696; (27) 300, 398; (28) 495; (29) 700; (30) 398; (32) 199; (34) 97; (36) 797; (37) 99; (38) 400, 600; (39) 97, 198; (40) 499.  
 report, (30) 697; (33) 398, 599; (34) 197; (37) 195; (39) 398.  
 report of director, (26) 692.

South Oesterbotten Moor Experiment Station, report, (27) 723.

## Southern—

- Educational Association, (26) 200.  
 Forestry Congress, proceedings, (37) 450.  
 States Conference on Secondary Agricultural Education, (34) 799.

## Sow thistle—

- eradication, (31) 739; (39) 744.  
 geographical distribution, (26) 335.

Sowbugs as blister rust carriers, (39) 248.

## Sows—see also Pigs and Swine.

- black pigment in mammary area, (35) 376.  
 breeding during lactation, (39) 274.

## brood—

- alfalfa hay for, (40) 75.  
 body length and fertility in, (36) 371.  
 care and management, (30) 871.  
 feed requirements of, (26) 769.  
 goitrous condition, (39) 187; (40) 185.  
 mineral requirements, (40) 372.  
 cost of wintering, (39) 175.  
 effect of feed on offspring, (27) 279.  
 feeding, (28) 575.  
 gestation period in, (28) 466.  
 milk, composition, (40) 775.  
 ovariectomy in, (27) 875; (30) 673; (31) 870; (33) 871; (35) 376.  
 pregnant, iodine requirement, (37) 278.  
 wintering, (39) 73.  
 wintering, colony-house system, (34) 173.

## Soy bean—

- bacteria as affected by acidity, (39) 722.
- bacterial blight, studies, (37) 842.
- bacterial disease, studies, (38) 451.
- bacterial leaf spot, notes, (36) 47.
- cake—
  - analyses, (26) 266, 767, 809; (27) 872; (29) 270, 467; (30) 268, 467; (36) 65; (38) 771.
  - composition, (29) 712.
  - effect on milk and butter, (28) 372; (34) 570.
  - feeding value, (38) 771.
  - fertilizing value, (26) 42.
  - for cattle, (26) 468, 476; (29) 577.
  - nutritive value, (28) 673.
  - sugar content, (37) 208.
  - v. cotton-seed cake for cows, (29) 172.
- casein, manufacture, (40) 415.
- cheese, analyses, (28) 166.
- chop, analyses, (31) 864.
- diseases, studies, (33) 547.
- dishes, preparation, (26) 68.
- flour, analyses, (39) 769, 870.
- flour and condensed milk for infants, (27) 664.
- flour, use, (34) 859.
- food products, preparation, (32) 560.
- forage, composition, (33) 71; (35) 532.
- Fusarium blight or wilt disease, (37) 50.
- hay—
  - analyses, (35) 562; (38) 376.
  - ash analyses, (29) 861.
  - digestibility, (39) 171.
  - toxic effect on young animals, (36) 79.
- leaf spot, notes, (35) 247.
- meal—
  - ammonification in soils, (33) 808.
  - analyses, (26) 267, 363, 809; (27) 570; (30) 268; (31) 467; (33) 870; (34) 263; (38) 572.
  - analysis, methods, (34) 311.
  - availability of nitrogen in, (26) 124; (27) 723.
  - effect on activity of soil fungi, (36) 215.
  - feeding value, (39) 374, 376, 575, 784.
  - for chicks, (37) 682.
  - for pigs, (27) 874; (29) 371; (38) 474.
  - toxicity, (36) 580.
  - v. cottonseed meal for cows, (32) 573.
- milk, analyses, (39) 769.
- milk, manufacture, (33) 660; (36) 262.
- oil—
  - analyses, (28) 493.
  - as substitute for coconut oil and cacao butter, (30) 614.
  - chemistry of, (36) 206.
  - composition, (26) 414; (27) 611.
  - detection, (28) 412; (29) 613; (30) 413, 617.
  - examination, (26) 414.
  - extraction, (36) 532.
  - hydrogenated, properties, (34) 9.
  - industry, statistics, (39) 9.
  - oxidation and polymerization, (34) 407.
  - physical constants, (35) 312.
  - production and consumption in United States, (40) 614.
  - properties, (26) 24.
  - refractive index, (27) 614.
  - specific heat, (40) 68.
  - studies, (29) 712.
  - use in manufacture of paint, (28) 114.
- phasin, agglutinating properties, (31) 774.
- products, notes, (26) 809.
- products, utilization, (26) 613.
- protein, nutritional value, (40) 463.
- protein, utilization, (26) 564.
- stem borer, notes, (36) 157.
- urease, preserving, (40) 805.

## Soy beans—

- amino acid in, (33) 665.
- analyses, (27) 235, 237, 775; (28) 138, 469; (29) 367; (30) 340; (31) 529; (32) 633; (33) 71; (34) 37, 141, 311; (35) 663; (36) 337.
- anatomical structure, (28) 660.
- and alfalfa hay for milk production, (32) 265.
- condensed milk for infants, (35) 556.
- corn as silage crop, (40) 135.
- corn for silage, seeding experiments, (40) 135.
- cowpeas, comparative yields, (40) 330.
- antineuritic value as affected by heat and alkalis, (40) 565.
- applying fertilizing solutions to aerial portions, (30) 129.

## Soy beans—Continued.

- as affected by—
    - ammonium sulphate, (40) 30.
    - barium and strontium, (40) 819.
    - calcium and magnesium, (35) 726.
    - lithium salts, (28) 526.
    - magnesia, (40) 726.
    - pod position, (34) 134.
    - sulphur, (38) 221.
  - as animal food, (37) 236.
  - cause of scurvy, (39) 771.
  - cover crop, (32) 332.
  - farm crop, (26) 434.
  - forage crop, (37) 640; (39) 532.
  - grazing crop for pigs, (37) 679.
  - green feed for chickens, (32) 570.
  - green manure, (35) 337; (37) 320, 425; (39) 326, 725.
  - hog pasture, (39) 373, 375, 474.
  - human food, (27) 765; (31) 66; (35) 663; (37) 164, 236; (38) 197, 741; (39) 267, 366, 769, 870, 871; (40) 66, 557, 762.
  - preparatory crop for tobacco, (30) 341.
  - silage crop, (27) 140.
- ash analyses, (29) 861.
  - botanical history, (34) 336.
  - breeding experiments, (33) 331.
  - carbohydrates and enzymes of, (34) 311.
  - commercial products from, (32) 854.
  - composition, (26) 24.
  - composition and characteristics, (26) 68.
  - composition and food value, (32) 64.
  - cost of production, (32) 527; (33) 293; (34) 137.
  - creatinin content, (33) 725.
  - culture, (26) 24, 830; (27) 32, 140, 237; (28) 137; (30) 335; (31) 265; (32) 132, 431; (33) 235, 731; (34) 630; (35) 35; (37) 235; (38) 34, 35, 231, 434.
- culture—
    - and use, (27) 237; (29) 142, 536; (31) 333, 832; (32) 633; (33) 438; (35) 33; (37) 442.
    - climatic control, (38) 415.
    - experiments, (26) 422, 830; (27) 31, 235, 336, 430, 638, 735; (28) 633, 734, 735; (29) 32, 432; (30) 632; (31) 37, 133; (32) 227, 132; (33) 31, 225, 229; (34) 227, 228; (35) 826; (36) 819; (37) 227, 235, 529, 729; (38) 229, 336, 632, 827; (39) 127, 217.
    - for seed, (36) 828.
    - in Alabama, (40) 828, 829.
    - Antigua, (36) 735.
    - Bengal, (30) 438.
    - Cambodia, (30) 438.
    - cotton belt, (32) 533; (39) 138.
    - Dutch East Indies, (30) 697.
    - German East Africa, (27) 419.
    - Illinois, (37) 438.
    - Mississippi, (34) 37; (39) 231.
    - Montana, (33) 526.
    - North Carolina, (31) 132.
    - Pennsylvania, (38) 741.
    - Philippines, (26) 361; (40) 632.
    - Porto Rico, (29) 631.
    - Texas, (40) 729.
    - Washington, (40) 730.
    - on Ozark uplands, (38) 217.
    - under dry farming, (30) 435.
  - decomposition in soil, (40) 214.
  - description, (36) 828.
  - distribution of nitrogen in, (36) 269.
  - economic value, (26) 24.
  - effect on—
    - companion crop of corn, (38) 338.
    - nitrate content of soils, (29) 818.
    - soil moisture, (38) 418.
    - soil nitrogen, (26) 196; (31) 733.
    - succeeding crop, (37) 235; (40) 125, 829.
  - elongation of hypocotyl, (28) 739.
  - feeding value, (34) 37, 867.
  - fertilizer experiments, (26) 32, 422, 631, 830; (27) 638; (28) 138, 721; (29) 137, 830; (30) 34, 820; (31) 133, 430; (34) 132, 294; (35) 220, 724; (38) 217, 218; (39) 127, 217, 421, 531, 728; (40) 439, 828.
  - fertilizing value, (32) 629; (35) 125.
  - field tests in Fiji, (40) 231.
  - formation of oil in, (32) 427.
  - frost resistance in, (30) 438.
  - germination as affected by green manures, (33) 331.

- Soy beans—Continued.  
 growing—  
 in sand media, (36) 297; (39) 28.  
 with corn, (39) 336; (40) 135, 627.  
 with cowpeas, (40) 829.  
 with grain, (39) 741; (40) 822.  
 growth—  
 and nitrogen-fixing power on acid soils, (36) 514.  
 as affected by sulphur, (32) 724.  
 in relation to climate, (29) 616; (33) 116; (36) 809; (38) 318, 627.  
 in various salts, (36) 31.  
 on calcareous soils, (31) 816.  
 harvesting, (37) 895.  
 histology, (30) 363.  
 hogging down, (35) 672.  
 illustrated lecture, (40) 599.  
 immature seeds, oil content, (40) 439.  
 inheritance in, (39) 331.  
 inoculation, (33) 531; (36) 527; (40) 215, 328, 439.  
 inoculation experiments, (33) 229; (36) 835; (38) 34.  
 insects affecting, (27) 155.  
 irrigation, (29) 621.  
 liming experiments, (36) 229; (39) 221, 236, 325, 421, 729, 741; (40) 126, 439.  
 lipase of, (34) 111.  
 Manchurian, analyses, (39) 107.  
 manual, (27) 435.  
 microscopical anatomy, (32) 112.  
 nitrogen assimilation by, (33) 426.  
 nitrogen content, factors affecting, (39) 236, 741.  
 nodule bacteria of, (32) 33, 327, 727; (36) 848; (38) 451; (39) 338.  
 notes, (26) 235, 362, 438; (28) 194; (29) 865; (30) 339.  
 nutritive value, (27) 765; (30) 760; (39) 164, 667.  
 on acid soil, (39) 326.  
 on inoculated soil, (39) 519.  
 pasture for pigs, (33) 762.  
 pedigreed, in Wisconsin, (40) 624.  
 phosphate injury, (39) 727, 827.  
 phytosterol content, (26) 607.  
 production and use, (39) 237, 442, 640, 741.  
 protein content, factors affecting, (34) 140, 632; (36) 232; (39) 236, 741.  
 radium fertilizer for, (32) 821.  
 raffinase content, (40) 171.  
 rotation experiments, (33) 828; (36) 829.  
 seed—  
 color variation in, (37) 334.  
 harvesting, (38) 237.  
 weight in relation to pod type, (38) 535.  
 seeding experiments, (37) 439; (40) 828.  
 selection and breeding, (31) 829.  
 selection experiments, (37) 636; (38) 237; (40) 623.  
 shrinkage tests, (38) 840.  
 silage from, (39) 272.  
 soap from, (30) 614.  
 softening effect on pork fat, (37) 680.  
 strains for rainy and dry seasons, (40) 632.  
 sucrose content, (28) 166.  
 urease of, (32) 803; (35) 10, 109, 110.  
 ureolytic action, (36) 503.  
 use in infant feeding, (34) 859.  
 uses, (30) 760; (36) 336, 532.  
 varieties, (26) 631, 823, 830; (27) 32, 235, 237, 335, 337, 638; (28) 138; (29) 31, 137, 432; (30) 434, 525, 828, 834; (31) 37, 133, 226, 333, 430, 829; (32) 226, 527, 633, 827, 830; (33) 33, 229, 235, 430, 828; (34) 228, 632; (35) 35, 337, 532; (36) 233, 828, 829; (37) 234, 235, 332, 439, 442, 636; (38) 34, 35, 229, 334, 431, 632; (39) 337.  
 varieties for silage, (40) 134.  
 variety tests, (39) 127, 129, 336, 434, 737, 738, 799; (40) 733, 828.  
 water requirement, (32) 127.  
 yields, (31) 226; (34) 228.
- Soy sauce—  
 Japanese, brewing, (30) 828.  
 notes, (26) 809.
- Sphaerophoria sulphuripes, notes, (28) 250.
- Spaghetti as a medium for growth of typhoid fever bacillus, (34) 69.
- Spalangia—  
 muscae, notes, (29) 257.  
 muscidarum n.sp., description, (29) 359.  
 muscidarum, studies, (30) 255, 856.
- Spalangia—Continued.  
 philippinensis n.sp., description, (38) 557.  
 spp., parasitic on fruit flies, (31) 456.  
 Spanioneura fonscolombii, notes, (35) 54.  
 Sparassis radicata n.sp., description, (38) 253.  
 Sparganothis—  
 albicaudana n.sp., description, (33) 748.  
 (Oenophthira) pilleriana, notes, (34) 63.  
 Sparganium railletii—  
 in pigs, (35) 79.  
 n.sp., description, (28) 886.
- Sparrows—  
 American tree, correct name, (40) 161.  
 coccidiosis in, (26) 187.  
 control, (39) 654, 862.  
 destructive to codling moth, (27) 559.  
 destructive to grain aphids, (29) 452.  
 dissemination of Virginia creeper by, (34) 629  
 English—  
 destructive to alfalfa weevil, (31) 655.  
 destructive to locusts, (28) 351.  
 destructive to periodical cicada, (28) 157.  
 dissemination of mites by, (26) 246.  
 egg-laying cycles, (37) 869.  
 food of, (33) 553; (38) 457.  
 notes, (27) 254.  
 house, feeding habits, (28) 450.  
 new seaside, description, (40) 547.  
 relation to blackhead in turkeys, (37) 384.  
 trematode in, (39) 760.
- Spartina—  
 for coast erosion control, (40) 530.  
 glabra, analyses, (29) 270.
- Spartium junceum—  
 carotinoid content, (31) 803.  
 seed, chemistry of, (37) 710.
- Spavin—  
 pathology of, (40) 778.  
 studies, (39) 590, 686.
- Spear grass—  
 analyses, (28) 463.  
 for cattle, (28) 770.  
 giant, microscopy of pulp, (27) 315.
- Spearmint—  
 culture, (34) 151; (38) 246.  
 oil as affected by harvest, drying, and freezing, (38) 807.  
 oil, investigation, (26) 713.
- Species—  
 individuality of proteins, (26) 876.  
 origin of, (26) 728; (27) 467; (28) 667; (30) 224; (31) 35, 823.  
 origin of, treatise, (30) 432.  
 relationships, (36) 221.
- Spectrophotometry—  
 of the blood, (29) 408.  
 use in analysis, (31) 502.
- Spectroscope, use in acidimetric titrations, (39) 503.
- Speeds, calculating, (29) 389.
- Spegazzinia ornata, notes, (29) 647.
- Speisefett, notes, (29) 564.
- Spelt—  
 and wheat, hybridization, (38) 636; (40) 524.  
 as a forage crop, (38) 827.  
 bacterial blight, notes, (35) 845.  
 bran, analyses, (26) 266.  
 classification studies, (31) 327.  
 culture—  
 and variety tests, (40) 333.  
 at Belle Fourche, (40) 332.  
 experiments, (27) 638; (32) 526; (34) 138; (36) 32, 34; (37) 330; (38) 634; (39) 435, 735.  
 in Oregon, (39) 228.  
 southern Idaho, (36) 227.  
 Texas Panhandle, (29) 429; (35) 440.  
 Wyoming, (38) 527.  
 fall-sown, in Maryland and vicinity, (36) 736.  
 fertilizer experiments, (27) 638.  
 milling and baking tests, (40) 234.  
 milling tests, (26) 462.  
 seeding experiments, (40) 334.  
 series of wheat varieties, (40) 636.  
 varieties, (27) 32, 137, 334, 638, 736; (29) 222; (32) 431; (33) 34; (34) 733; (35) 229; (36) 32; (37) 332, 530; (38) 634; (39) 436, 437.  
 yields, (28) 533.
- Sphenophorus callosus, notes, (33) 746.
- Speotyto cunicularia hypogaea, destruction of locusts by, (28) 351.

- Spergula arvensis*—  
analyses, (31) 863.  
as coffee substitute, (40) 508.  
eradication, (31) 532.  
seed oil, notes, (36) 803.
- Sperm**—  
cells of fowls, vitality and activity of, (31) 474.  
iso-agglutinins, production by ova, (29) 167.  
oil, chemistry of, (35) 784.  
oil, hydrogenated, properties of, (34) 9.
- Spermatogenesis**—  
in hybrids, studies, (27) 371.  
in rabbits, (35) 167.
- Spermatogonia**, origin in male chick, (38) 173.
- Spermatoxin**, effect on female organism and ovum, (26) 877; (29) 167.
- Spermatozoa**—  
development outside the egg, (26) 877.  
duration after fecundation in pullets and ducks, (34) 864.  
morphological constituents, (30) 201.  
transportation, (29) 66.
- Spermatozoids**, effect on the blastula, (29) 66.
- Spermophagus**—  
*piurae* n.sp., description, (32) 658.  
*subfasciatus*, remedies, (40) 553.
- Spermophilus**, prevalence in Colorado, (28) 652; (30) 249.
- Spermophilus citillus**, notes, (28) 180.
- Sphacella**—  
*scirpicola*, notes, (29) 345.  
*sorghii*, notes, (38) 848.
- Sphaceloma ampelinum**—  
in America, (36) 545.  
treatment, (28) 649.
- Sphacelotheca**—  
*cruenta* and *S. sorghi*, confusion, (34) 444.  
*reiliana* on corn in Barbados, (33) 445.  
*sorghii*, inoculation experiments, (37) 749.  
*sorghii*, notes, (29) 547; (32) 146, 240; (35) 44; (37) 452.  
*sorghii*, studies, (38) 645; (39) 756.  
spp., notes, (27) 545.
- Sphaenoptera gemellata**, notes, (27) 863.
- Sphaeralcea lindheimeri**, food plant of cotton boll weevil, (31) 458.
- Sphaerella**—  
*caricae* n.sp., studies, (29) 849.  
*coffeicola*, notes, (38) 51.  
*convexula*, notes, (26) 56.  
*fragariae*, treatment, (37) 246.  
*heveae* n.sp., notes, (39) 452.  
*macularis*, notes, (29) 51.  
*maculiformis*, studies, (28) 240.  
*moricola*, notes, (27) 547.  
*nigerristigma* n.sp., description, (32) 844.  
*opuntiae*, studies, (27) 352.  
relation to *Ascochyta*, (28) 849.  
*rubina*, notes, (26) 646.  
*rubina*, studies, (33) 649.  
*sacchari*, notes, (40) 157.  
sp. on chayote, (37) 755.  
spp., notes, (28) 845; (29) 345.  
*tabifica*, notes, (26) 446.  
*tremulicola*, notes, (29) 51.
- Sphaeronema**—  
**fimbriatum**—  
distribution and prevalence, (33) 743.  
notes, (30) 150; (32) 343.  
studies, (34) 156; (39) 854; (40) 347.  
treatment, (28) 849.  
*oreophilum* n.sp., notes, (37) 630.  
*parasticum* n.sp., description, (30) 746.  
sp. affecting sugar cane, (31) 539.
- Sphaeronemella**—  
*fragariae* n.sp., description, (36) 452.  
sp. on strawberries, (33) 744.
- Sphaerophoria cylindrica**, notes, (36) 460.
- Sphaeropsidales**, light and pycnidia formation, (38) 225.
- Sphaeropsis**—  
*ellisii*, notes, (30) 751.  
*maculans*, notes, (37) 748.  
**malorum**—  
as affected by cold, (34) 538.  
ascogenous form of, (30) 651.  
biological strains of, (31) 445.  
description, (29) 752; (30) 50, 650.  
dissemination by tree crickets, (35) 548.  
effect on composition of apples, (36) 148.
- Sphaeropsis**—Continued.  
**malorum**—continued.  
life history, (31) 446.  
notes, (27) 651; (28) 548; (29) 49, 748, 752; (31) 450; (34) 54, 247, 644; (35) 351; (39) 850.  
relation to apple collar rot, (34) 157.  
relation to apple rot, (33) 348.  
studies, (32) 750; (35) 151.  
summary of information, (40) 251.  
temperature relations, (36) 649.  
transmission by tree crickets, (34) 653.  
treatment, (29) 49, 752; (30) 650.  
necatrix, studies, (39) 859.  
pseudodiplodia, notes, (27) 747; (37) 553.  
sp. on peaches, (33) 248.  
sp. on strawberries, (33) 744.  
spp. relation to citrus gummosis, (29) 247.  
spp., studies, (28) 240.  
*turnefaciens* on limes, (34) 349.  
*turnefaciens*, studies, (27) 652.
- Sphaeropyx bicolor**, notes, (31) 355.
- Sphaerostilbe**—  
*coccophila*, description, (33) 459.  
*coccophila*, notes, (27) 358, 860; (28) 196, 453; (29) 852; (30) 455.  
*flavida*, notes, (39) 849.  
parasitic on scale insects, (30) 746.  
*repens*, in Malaya, (38) 52.  
*repens*, notes, (28) 241; (34) 57; (35) 251; (37) 349; (40) 53.  
*repens* on rubber, (33) 449.  
sp., notes, (26) 245; (28) 149; (31) 55.  
sp. on citrus, (37) 452; (40) 155.  
sp. on tea roots, (40) 48.
- Sphaerotheca**—  
**humuli**—  
notes, (29) 547.  
resistance to fungicides, (38) 450.  
studies, (29) 346; (39) 147.
- mors-uvae**—  
in Italy, (33) 447.  
life history, (32) 547.  
notes, (26) 344; (27) 750; (28) 448, 650; (30) 349, 845; (31) 545, 749; (33) 647, 846; (35) 650; (37) 550.  
on currants, (34) 648.  
studies, (33) 347.  
treatment, (26) 345; (28) 349, 650; (29) 249; (30) 750; (31) 841, 843; (34) 843; (36) 751.
- pannosa**—  
control, (40) 751.  
notes, (27) 850; (30) 537; (32) 749; (37) 453, 839.  
on raspberry, (34) 749.  
studies, (33) 347, 447, 854.  
treatment, (34) 442, 750.  
vars., inoculation experiments, (33) 647.  
spp., notes, (26) 450; (40) 53.
- Sphaerulina**—  
*aucubae* n.sp., description, (27) 149.  
*suchumica* n.sp., description, (35) 454.  
*taxi*, notes, (26) 852.
- Sphagnum**—  
bogs, forest growth in, (37) 837.  
moss, digestibility, (30) 568.  
moss, temperature conditions in, (34) 715.  
moss, use in preparation of bandages, (37) 736  
peat, fertilizing value, (31) 826.  
peat, investigations, (28) 518.  
relation to formation of upland moors, (29) 124  
turf, digestibility, (35) 474.  
turf, humus acids of, (27) 322.
- Sphecoidea** of Nebraska, (40) 553.
- Sphenophorus**—  
*callosus*, see Corn billbug.  
*discolor* injurious to small grain, (30) 161.  
*maidis*, life history, (35) 760.  
*nebulosus*, notes, (33) 256.  
*obscurus* on sugar cane, (40) 57.  
*parvulus*, notes, (26) 863; (29) 52, 252.  
*phoeniciensis*, notes, (35) 657.  
*sculptilis*, notes, (33) 58.  
*sericeus*, notes, (28) 752; (30) 56.  
*sordidus*, see *Cosmopolites sordidus*.  
sp., notes, (26) 354, 857.  
spp., control, (40) 655.  
spp., studies, (29) 56.  
*venatus*, notes, (26) 862.

- Sphenoptera**—  
*lineata* geminata, notes, (26) 147.  
*lineata* geminata, paper on, (27) 656.  
*neglecta*, notes, (27) 63.
- Sphenoporea berveridis** n.sp., from the Andes, (40) 133.
- Sphenostylis stenocarpa**—  
 agglutinating properties of seeds, (31) 774.  
 analyses and digestibility, (28) 464.
- Spheg** spp., bionomics, (35) 468.
- Sphingidae**—  
 key, (26) 860.  
 phylogeny, (32) 850.
- Sphinx**, white-lined morning, notes, (28) 654.
- Sphyrapicus** spp., relation to trees and wood products, (26) 58.
- Spicaria**—  
*bassiana*, notes, (27) 56.  
*colorans*, notes, (29) 547.  
*colorans*, studies, (27) 751; (33) 549.  
*farinosa*, notes, (28) 559.  
*solani*, notes, (34) 443.  
*verticillioides* n.sp., notes, (27) 56.  
*verticillioides*, notes, (28) 559.
- Spices**—  
 adulteration, (32) 161.  
 culture experiments, (38) 845.  
 culture in Dutch East Indies, (30) 697; (34) 345.  
 culture in Philippines, (34) 635.  
 effect on hippuric acid excretion, (28) 261.  
 effect on microorganisms, (35) 557.  
 examination, (26) 110, 867; (40) 115, 204, 205.  
 germicidal effect, (36) 863.  
 Gloeosporium disease of, (31) 844.  
 handbook, (27) 242; (34) 166.  
 methods of analysis, (32) 109.  
 preservative value, (38) 469.  
 purin content, (40) 205.  
 use as preservatives, (26) 157.  
 value in the diet, (29) 664.
- Spider mite**, see Red spider.
- Spiders**—  
 habits, (35) 356.  
 hibernating in Spanish moss, (28) 654.  
 injurious to bees; (31) 159.  
 manual, (28) 257.  
 natural enemies of, (29) 262.  
 silk of, (31) 452.  
 summary of information, (39) 768.  
 toxins of, (37) 461.  
 transcanadian, (40) 648.
- Spiderwort**, notes, (29) 441.
- Spilochaetosoma californica** n.g. and n.sp., description, (40) 653.
- Spilocryptus polychrosidis** n.sp., description, (38) 565.
- Spinach**—  
 Algerian, culture experiments, (30) 632.  
 aphid, relation to blight, (39) 551.  
 as affected by radioactive substances, (32) 34.  
 ash absorption from concentrated soil solutions, (40) 502.  
 blight, studies, (39) 550; (40) 450, 648.  
 canned, tin content, (28) 564.  
 carrion beetle, studies, (37) 261.  
 culture, (26) 393, 539; (40) 833.  
 culture experiments, (32) 635; (33) 43.  
 disease, new, description, (26) 55.  
 disease, notes, (30) 847.  
 fertilizer experiments, (28) 735; (32) 540; (34) 532.  
 finger-and-toe disease of, (31) 149.  
 flea beetle, notes, (29) 456, 761.  
 fungus disease of, (32) 147.  
 growth in partially sterilized soils, (26) 815.  
 insects affecting, (29) 556.  
 losses in cooking, (28) 460.  
 maggot, notes, (28) 752.  
 mildew, treatment, (28) 446.  
 mulching v. clean culture, (33) 534.  
 physiological studies, (40) 450.  
 purin content, (40) 205.  
 rust, investigations, (26) 548.  
 seeds, large v. small, (31) 634.  
 value in the diet, (39) 872, 876.  
 varieties, (32) 635; (33) 43.  
 vitamin content, (40) 564.
- Spintherus pulchripennis** n.sp., description, (30) 59.
- Spinus pinus**, destruction of grain aphids by, (29) 452.
- Spiraea**—  
*ulmaria*, notes, (27) 829.  
*vanhouttei*, abnormal inflorescence, (39) 30.
- Spiranthes autumnalis**, tuberization and root infestation, (30) 29.
- Spirea**—  
 culture in Alaska, (29) 743.  
 leaf roller, notes, (39) 361.
- Spirillaceae**, genera, (39) 828.
- Spirillosis**—  
 equine, in Morocco, (36) 483.  
 in fowls, (31) 284; (36) 782.
- Spirillum**—  
 minor, relation to *Spirochaeta morsus-muris*, (40) 781.  
*rubrum*, studies, (33) 178.  
*tyrogenum*, studies, (33) 178.
- Spirits**, bibliography, (31) 339.
- Spirobolus marginatus**, life history, (34) 364.
- Spirochaeta**—  
*anserina*, longevity in fowl tick, (31) 586.  
*anserina*, relation to spirochetosis in fowls, (26) 684.  
*duttoni*, filterability, (31) 81.  
*elusa* n.sp., studies, (31) 81.  
*equi*, notes, (28) 184.  
*gallinarum*, cultivation, (28) 282; (29) 558.  
*gallinarum*, transmission by mites, (32) 279.  
*hebdomadis* n.sp., studies, (40) 85.  
 hyos, antigenic value in hog-cholera serum tests, (35) 784.  
 hyos, inoculation experiments, (33) 879.  
 hyos, relation to hog cholera, (36) 384.  
*icterohaemorrhagiae*—  
 dissemination by rats, (38) 653, 760.  
 in rats, (37) 577; (39) 759.  
 in United States, (39) 890.  
 studies, (39) 889.  
*morsus muris* n.sp., cause of rat-bite fever, (37) 375.  
*recurrens*, lice as hosts, (40) 551.  
*regaudi* n.sp., description, (26) 588.  
 spp., life histories, (26) 460.  
 suis, studies, (29) 682; (30) 383; (32) 378.  
*theileri*—  
 in cattle in Panama, (39) 84.  
 in United States, (33) 385.  
 relation to anaplasmosis, (29) 584.
- Spirochetæ**, photomicrographs of, (29) 478.
- Spirochete**—  
 infection in man, notes, (27) 680.  
 infection, inheritance in *Argas persicus*, (27) 84.  
 of rat-bite fever, (40) 781.
- Spirochetes**—  
 culture, (31) 81.  
 distribution and morphology in ticks, (31) 81.  
 filterability and biology, (32) 579.  
 in digestive tract of swine, (37) 279.  
 in hog cholera, (30) 585.  
 in papillomatous neoplasma in horses, (34) 280.  
 notes, (27) 181; (29) 563; (31) 81.  
 of carcinomas in man and animals, (26) 581.  
 studies, (27) 780; (33) 178; (39) 190.  
 transmission, (30) 578.  
 transmission by stable flies, (26) 150; (28) 756.
- Spirochetosis**—  
 equine, bibliography, (28) 184.  
 in fowls, (26) 684; (29) 588; (31) 383, 485, 586, 782.  
 in fowls, treatise, (27) 385.  
 in Sudanese fowls, (30) 679.  
 résumé, (29) 883.  
 treatment, (29) 484; (31) 284.
- Spirogyra**—  
 as affected by—  
 anesthetics, (26) 824.  
 colloidal metals, (31) 129.  
 copper sulphate, (39) 27.  
 formaldehyde, (26) 731.  
 various salts, (38) 27.  
 cultures, nutrient solution for, (31) 32.  
 inflata, variability in zygospores, (34) 370.  
 maxima, tannin in, (34) 825.  
 resistance to fungi, (38) 350.
- Spiroptera**—  
*megastoma*, injurious to horses, (26) 384.  
*megastoma*, splenic abscess due to, (37) 182.  
 n.sp., affecting rats, (30) 279.  
 n.sp., relation to cancer in rats, (32) 353.  
*reticulata* in imported meat, (27) 83.  
*sanguinolenta*, notes, (28) 759.

- Spiroptera—Continued.  
 spp., physiological investigations, (31) 679.  
 Strongylina, notes, (28) 285.
- Spittle insects—  
 injurious to grass, (36) 856.  
 notes, (30) 655.
- Spizella—  
 fronticola, correct name for tree sparrow, (40) 161.  
 pusilla, coccidiosis in, (26) 187.  
 spp., destruction of grain aphids by, (29) 452.
- Spleen—  
 influence in nutrition, (32) 562.  
 rôle in digestion, (31) 361.  
 rôle in formation of immune bodies, (26) 277.  
 Splenic fever, transmission by ticks, (28) 758.
- Splenic abscess as a secondary infection in horses, (37) 182.
- Splenitis in pigs, (33) 774.
- Splenomegaly, primary, in sheep, (27) 186.
- Splices—  
 directions and illustrations, (27) 96.  
 methods of making, (29) 390.
- Spodopogon lacei n.sp., description, (33) 527.
- Spodoptera mauritia, notes, (27) 155, 656; (29) 456; (38) 257.
- Spogostylum anale, life history, (29) 456.
- Spondias cythereae, asexual propagation, (32) 142.
- Spondylocadium—  
 atrovirens, notes, (32) 50, 239, 443, 547, 643; (34) 443; (37) 350, 551; (38) 753.  
 atrovirens, studies, (29) 347; (35) 455; (36) 544.  
 maculans, n.sp., relation to rubber spotting, (29) 451.  
 sp., notes, (28) 241.
- Sponge—  
 coarse, analyses, (37) 814.  
 loggerhead, fertilizer from, (31) 622.
- Sponges—  
 analyses, (30) 520.  
 fertilizing value, (30) 519.
- Spongospora—  
 on plant roots, (36) 146.  
 scabies, notes, (30) 847; (32) 544; (33) 849.  
 scabies, occurrence in Scotland, (26) 748.  
 solani, notes, (31) 243; (32) 546; (34) 241.  
 solani, occurrence in Maine, (29) 550.  
 solani, studies, (26) 547.  
 subterranea—  
 description, (31) 149.  
 in Oregon, (33) 850.  
 life history, (33) 346.  
 native habitat, (34) 645.  
 notes, (27) 446; (29) 448; (31) 243, 842; (32) 239; (37) 350, 652, 753; (40) 48, 847.  
 studies, (34) 443; (36) 249, 847.
- Spontaneous combustion as a cause of fires, (37) 788.
- Spore plants, treatise, (33) 429.
- Spores—  
 antibodies of, (36) 380.  
 cnidosporean, filament extrusion, (40) 255.  
 method of picking up, (31) 746.
- Sporobolus—  
 argutus, analyses, (31) 863.  
 depauperatus, analyses, (29) 270.  
 indicus, notes, (26) 362.  
 phleoides, notes and analyses, (37) 533.  
 spp., analyses, (36) 334.  
 spp., analyses and digestibility, (27) 871; (32) 167.  
 spp., studies, (38) 66.
- Sporodesmium—  
 fumagineum n.sp., notes, (37) 630.  
 rutrefaciens, description and treatment, (28) 847.  
 putrefaciens, notes, (28) 649; (30) 47; (33) 851; (35) 245.  
 solani varians, notes, (36) 541.  
 sp., notes, (31) 539.
- Sporonema oxycocci, treatment, (39) 749.
- Sporothrix—  
 schenckii, penetration of gastro-intestinal wall by, (36) 379.  
 schenckii-beurmanni, studies, (34) 384.
- Sporotrichoses, treatise, (31) 81.
- Sporotrichosis—  
 equine, in Montana, (37) 82.  
 following mouse bite, (40) 180.  
 notes, (27) 884.  
 of animals, (30) 282; (32) 271.  
 studies, (34) 384, 385.
- Sporotrichum—  
 globuliferum—  
 affecting alfalfa weevil, (36) 58.  
 investigations, (26) 454.  
 notes, (28) 354; (30) 459, 547; (31) 251; (32) 448; (37) 461.  
 on cacao thrips, (38) 57; (39) 158.  
 on chinch-bug, (26) 348.  
 poae, notes, (28) 750; (30) 542.  
 sp., notes, (27) 860.
- Spotted fever—  
 immunization, (35) 881.
- Rocky Mountain—  
 control, (27) 52.  
 etiology, (36) 576, 577.  
 in California, (38) 84.  
 in rabbits, (40) 781.  
 notes, (30) 760.  
 relation to tick control, (26) 63.  
 serum for, (26) 378.  
 studies, (27) 479, 866; (31) 160; (36) 158; (37) 560.  
 therapy, (27) 578.
- tick, Rocky Mountain, *see* Dermacentor venustus.
- Spray—  
 gun for orchards, (40) 639.  
 injury and its prevention, (34) 154.  
 injury, paper on, (28) 48.  
 nozzle—  
 coarse v. mist, (28) 341.  
 description, (30) 651; (35) 88; (39) 541.  
 for large trees, (26) 49; (40) 154.  
 new type, (26) 599.  
 nozzles and hose, (39) 250.  
 nozzles, tests, (29) 640.
- Spraying—*see also special crops.*  
 apparatus—  
 description, (26) 848, 893; (27) 61, 485, 792; (38) 843.  
 notes, (28) 148; (29) 640; (33) 97.  
 portable, for cattle, (28) 181.  
 tests, (26) 893; (27) 792, 855.  
 arsenical residues after, (38) 54.  
 as a cause of apple bitter pit, (26) 55.  
 calendar, (26) 539; (27) 845; (28) 47, 48, 492, 642, 841; (29) 42; (30) 534, 642; (31) 635; (32) 637, 834; (33) 47, 141, 538, 639; (35) 234; (36) 744; (38) 843; (39) 149, 242, 345; (40) 742.  
 calendar—  
 for Georgia, (33) 439.  
 for grapes, (40) 342.  
 for orchards, (32) 637.  
 citrus trees in Florida, (39) 160.  
 cooperation in, (32) 637.  
 cost, (36) 55, 535.  
 effect on yield of apple orchards, (26) 541.  
 experiments, (27) 143; (28) 142, 148, 436; (29) 145, 262, 354, 640; (30) 344; (31) 151, 335; (37) 447; (38) 551, 640.  
 experiments in Nova Scotia, (38) 156.  
 experiments in Virginia, (26) 48.  
 foliage-lifting apparatus for, (39) 762.  
 for fungus diseases, (40) 746.  
 formulas for gardens, (39) 140, 656; (40) 638.  
 formulas for orchards, (39) 762.  
 fruit trees, (39) 39, 140.  
 handbook, (38) 40; (39) 140.  
 in Nova Scotia, (36) 535.  
 injuries to blooms and newly set fruit of grapes, (31) 534.  
 injury to foliage, (40) 449.  
 liquids, promoting adherence in, (30) 248.  
 liquids, wetting power of, (35) 356.  
 machine, description, (31) 439.  
 machinery—  
 accessories, (29) 87, 353.  
 notes, (26) 48, 539; (28) 291, 450; (29) 593; (33) 735; (35) 141.  
 tests, (29) 292.  
 machines, motor power, specifications, (31) 92.  
 mixtures—  
 acid, in relation to scorching, (35) 651.  
 adherent, notes, (29) 554.  
 composition and merits, (35) 46.  
 effect on germination of grape pollen, (29) 839.  
 effect on insect eggs, (32) 449.  
 for stone fruits, (35) 143.  
 hot, use, (35) 352, 353.

## Spraying—Continued.

- mixtures—continued.  
 increasing adhesiveness of, (28) 154.  
 notes, (32) 633; (35) 356.  
 preparation, (27) 357; (32) 637; (33) 47.  
 preparation and use, (33) 538, 735.  
 preparation with hard soap, (39) 59.  
 spreading capacity and adherence, (30) 153; (32) 243.  
 toxic effect on grape pollen, (33) 539.  
 notes, (28) 238; (29) 146, 436, 640; (30) 344; (31) 141, 533; (32) 743, 744, 751; (34) 436, 548; (35) 36, 94, 141, 156, 445, 838; (37) 96, 143, 453, 544, 699, 744; (38) 459, 541, 796, 855; (40) 256.  
 penetration method for codling moth, (31) 439.  
 penetration system, (28) 787.  
 recent developments in, (39) 548.  
 relation to beekeeping, (35) 662.  
 relation to flowering in grapes, (33) 448.  
 service in New York, Niagara Co., (39) 645.
- Sprays—*see also* Insecticides, Fungicides, and specific kinds.  
 acid and alkaline, comparison, (38) 756.  
 carriers and diluents for, (38) 459.  
 combination, review of investigations, (31) 848.  
 copper, *see* Copper.  
 double purpose, (38) 258.  
 dust v. liquid, (32) 530, 836; (37) 832; (38) 42, 540, 551, 843, 844.  
 dust v. liquid, for apples, (31) 449; (37) 242.  
 effect on transpiration of potatoes, (31) 825.  
 oil-lime-sulphur, (40) 453, 454.  
 preparation, (39) 345; (40) 801, 843.  
 preparation and use, (26) 539.  
 repellent, effect on bees, (37) 855.  
 sulphur, preparation and use, (40) 59.
- Spring grass, analyses, (27) 469.  
 Spring of 1917, (37) 808.
- Springs—  
 and ground water, textbook, (29) 15.  
 in California, (32) 587.  
 mineral, of Alaska, (38) 690.  
 radioactivity, (35) 618.  
 relation to public health, (29) 512.
- Springtails—  
 injurious to truck crops, (32) 353.  
 notes, (27) 656.
- Sprocket wheel design, standardization, (36) 400.
- Spruce—  
 accretion in lower part of stems, (31) 538.  
 aphid, notes, (27) 255; (32) 448; (33) 253.  
 aphid, outbreak in England and Ireland, (29) 757.  
 aphid, green, notes, (32) 57.  
 as affected by origin of seed, (29) 841.  
 bark, use for paper specialties, (36) 417.  
 beetle—  
 Engelmann, notes, (26) 561.  
 European, life history and habits, (37) 765.  
 bud moth, notes, (26) 753; (28) 554; (30) 655; (34) 752.  
 bud scale, notes, (33) 253; (34) 752.  
 bud scale, studies, (37) 662.  
 budworm—  
 in New Brunswick, (39) 866.  
 notes, (29) 252; (32) 448.  
 studies, (29) 255.  
 Canadian volume tables, (26) 443.  
 Chermes, studies, (40) 262.  
 cones, insects affecting, (40) 163, 164.  
 diseases in southern Appalachians, (31) 646.  
 Douglas, die-back disease of, (30) 751.  
 effect of early thinnings on stands, (29) 240.  
 Engelmann—  
 and alpine fir, management, (33) 739.  
 for telephone poles, (30) 843.  
 volume tables for, (34) 641.  
 fungus disease affecting, (26) 451.  
 gall aphid, notes, (26) 146; (28) 353; (37) 255.  
 grinding for mechanical pulp, (29) 614.  
 growing with pine and beech, (27) 542.  
 growth after thinning, (38) 45.  
 growth and yield in high mountains, (34) 347.  
 insects affecting, (31) 155.  
 leaf miners, notes, (29) 256.  
 management in Saxony, (29) 342.  
 natural and artificial regeneration, (31) 537.  
 natural distribution of, (31) 444.
- Norway—  
 absolute form quotient, (39) 247.

## Spruce—Continued.

- Norway—Continued.  
 drought resistance, (38) 44.  
 fissures in, (29) 240.  
 weevil injury, (39) 159.
- of Rocky Mountains, (34) 742.  
 red, growth and management, (38) 146.  
 red, reproduction, (38) 45.  
 regeneration in high altitudes, (26) 443.  
 reproduction, (39) 145.  
 rust diseases, studies, (35) 155.  
 rust, new, (39) 254.  
 sawfly, notes, (38) 257.  
 scale, studies, (37) 662.  
 seedling habits, (37) 45.  
 seedlings—  
 absorption of fertilizers by, (26) 443.  
 as affected by shade and moisture, (39) 751.  
 fertilizer experiments, (32) 47.  
 seeds, germination tests, (27) 44.  
 selection experiments in Austria, (38) 545.  
 Sitka, rots of, (40) 349.  
 stands, effect on soil physics, (26) 140.  
 stands, light measurements in, (26) 745.  
 sulphite pulp from, (38) 809.  
 thinning experiments, (35) 241.  
 timber estimating tables for, (36) 345.  
 turpentine, toluol from, (39) 209.  
 unit stresses for, (36) 91.  
 volume and value accretion in, (29) 747.  
 white, in Minnesota, (38) 146.  
 wood coloring in, (27) 527.  
 wood, ethereal oils of, (29) 504.  
 wood, investigations, (28) 642.  
 wood, production of turpentine from, (26) 413.  
 yield as affected by early thinning, (31) 444.  
 yield tables, (27) 348.
- Spruce, review of investigations, (36) 363.
- Spumaria alba, notes, (27) 649.
- Spurry—  
 as affected by liming, (39) 117.  
 as coffee substitute, (40) 508.
- Sputum—  
 gathering from bovines, (27) 382.  
 organisms, fragmentary, (31) 380.  
 tuberculous, bacilli in, (31) 380.  
 tuberculous, chemical properties, (29) 782.
- Squabs—  
 national standard, (30) 175.  
 raising, (33) 872; (40) 280.  
 raising and marketing, (37) 775.
- Squalls, paper on, (31) 213.
- Squash—  
 borer, notes, (39) 765.  
 borer, remedies, (37) 254.  
 capsid, notes, (29) 453.  
 disease, studies, (36) 848.  
 lady beetle, *see* Epilachna borealis.  
 leaf spot in Indiana, (39) 52.  
 mosaic, notes, (39) 853.  
 sclerotinia diseases, (40) 49.  
 seed cake, digestibility, (28) 464.  
 seeds, large v. small, (31) 634.  
 seeds, oil from, (39) 9.  
 vine borer, studies, (33) 255.
- Squashes—  
 asexual reproduction of seeds, (31) 533.  
 breeding experiments, (26) 838; (37) 240.  
 calcium content, (39) 747.  
 culture, (26) 539.  
 culture experiments, (32) 132; (37) 742.  
 effect on following crop, (38) 337; (40) 135, 623.  
 fertilizer experiments, (37) 742.  
 fruit thinning experiments, (27) 741.  
 Hubbard—  
 breeding and marketing, (29) 830.  
 selection experiments, (40) 740.  
 inheritance in, (27) 740; (39) 747.  
 mulching v. clean culture, (33) 534.  
 use by prehistoric Americans, (38) 167.  
 water requirement, (32) 127.
- Squatarola squatarola cynosurae near Washington, (40) 161.
- Squeezer for cattle, description, (26) 385.
- Squirrel-tail grass—  
 geographical distribution, (26) 334.  
 in Iowa, (39) 842.
- Squirrels—  
 care and feeding, (28) 173.  
 conifers damaged by, (26) 552.

## Squirrels—Continued.

- destruction of conifer seed by, (31) 154.  
 eradication, (39) 860.  
 flying, American, (39) 460.  
 flying, new genus and races of, (34) 850.  
 ground—  
   bionomics, (27) 550.  
   control, (29) 651; (38) 456; (39) 153, 460; (40) 350.  
   control in Colorado, (28) 450; (37) 558.  
   destruction, (28) 248; (32) 648; (33) 552.  
   immunity to spotted fever, (31) 160.  
   in Colorado, (28) 652; (34) 651.  
   life history and control, (35) 755.  
   new microflaria from, (26) 653.  
   new race from Wyoming, (37) 758.  
   notes, (28) 450; (30) 249; (34) 753.  
   plague-like disease affecting, (26) 461.  
   relation to plague, (26) 245.  
   relation to Rocky Mountain spotted fever, (27) 479.  
   tuberculosis in, (26) 484.  
   host of spotted fever tick, (26) 64.  
 St. Augustine grass, notes, (26) 362.  
 St. John's—  
   bread, digestibility, (28) 464.  
   wort, poisoning of horses by, (32) 278.  
   wort, toxic effect on pigs, (35) 589.  
 St. Paul, Minn., as an agricultural and financial center, (36) 494.  
 Stable—  
   air as source of bacteria in milk, (34) 183, 473.  
   fly—  
   as affecting milk production, (40) 648.  
   distance of flight over water, (30) 159.  
   feeding habits, (33) 561.  
   geographical distribution, (30) 457.  
   larvae, parasite of, (30) 553.  
   notes, (26) 147, 781; (27) 785; (29) 159, 256, 353, 454, 457, 559, 760; (32) 555; (37) 156.  
   original habitat, (33) 256.  
   outbreak in South Africa, (30) 160.  
   parasite of, (29) 359.  
   fly, relation to—  
   anthrax, (30) 780; (31) 776.  
   anthrax and streptococci, (32) 552.  
   diseases, (29) 760.  
   filaria in horses, (34) 359.  
   leprosy, (31) 851.  
   mal de caderas, (30) 785.  
   pellagra, (29) 756.  
   plague, (33) 456.  
   plague-like disease of rodents, (34) 355.  
   poliomyelitis, (26) 654; (28) 160, 161, 560; (29) 358, 559, 560; (35) 55, 280.  
   surra, (29) 760.  
   swamp fever, (32) 754; (37) 374; (38) 788; (39) 162.  
   fly—  
   remedies, (31) 158.  
   repellents for, (38) 358.  
   role in disease transmission, (26) 150.  
   studies, (29) 559; (37) 665.  
   manure, *see* Manure.  
 Stables—  
   arrangement, (32) 86.  
   construction, (27) 793.  
   descriptions, (28) 86.  
   disinfection, (26) 578; (39) 488.  
   open v. closed, for dairy animals, (30) 676.  
   use of peat in, (39) 425.  
   ventilation, (30) 691.  
 Stachydrin, isolation from—  
   alfalfa hay, (37) 309; (39) 610.  
   stachys tubers and citrus leaves, (26) 107.  
 Stachyidium theobromae n.sp., description, (37) 755.  
 Stachyose—  
   decomposition, (26) 310.  
   in legumes, (28) 761; (31) 13.  
 Stachys—  
   silvatica, betains in, (28) 312.  
   spp., betains in, (27) 204.  
   tuberifera as affected by copper fungicides, (28) 247.  
   tuberifera, isolation of stachydrin from, (26) 107.  
 Stagger grass, stock poisoning by, (39) 886.  
 Staggers—  
   in horses, cattle, and mules, (28) 378.  
   in sheep in Patagonia, (39) 85.  
   notes, (40) 86.

## Stagonospora—

- basellae n.sp., studies, (31) 56.  
 cassavae n.sp., description, (33) 647.  
 convolvuli n.sp., description, (37) 748.  
 Stags, breeding for horns, (33) 173.  
 Staining of microflariae, (31) 383.  
 Staining of yeasts, (31) 478.  
 Stains, removal from textiles, (38) 114.  
 Stains, use in study of bacteria, (29) 630.  
 Stalk borer—  
   notes, (26) 59; (29) 252; (33) 58; (39) 358.  
   summary of information, (39) 765.  
 Stallion—  
   enrollment law in Indiana, (32) 771.  
   law in Kansas, (27) 279.  
   law in New Jersey, (27) 373.  
   law in Ontario, (30) 872.  
   law in Wisconsin, (30) 470.  
   registration law in Kansas, (28) 494; (39) 376  
 Stallions—  
   advertising in Indiana, (31) 75.  
   Asben, from Sudan, (27) 674.  
   breeding, (29) 370.  
   care and management, (29) 873.  
   castration, (27) 471.  
   certification in Victoria, (29) 471.  
   cooperative purchase and use in Denmark, (20) 296.  
   distribution, (32) 171; (35) 377.  
   distribution in Wisconsin, (30) 470.  
   in Indiana, (35) 673; (37) 169; (39) 73.  
   Kansas, (29) 873; (37) 270, 868; (39) 376; (40) 472.  
   Oklahoma, (37) 169; (40) 76.  
   Utah, (37) 681; (39) 73; (40) 473.  
   Wisconsin, (34) 469; (36) 472.  
   legislation in United States, (37) 572.  
   licensed, distribution, (26) 168; (28) 269.  
   licensed in Utah, (31) 471.  
   public service, in Wisconsin, (38) 275.  
   registration, (27) 72; (32) 771.  
   registration in Canada and United States, (30) 872.  
   registration in Victoria, (27) 471.  
 Standard—  
   Container Act, (38) 40.  
   packages and uniform grades, (40) 293.  
 Staphylea—  
   effect of seed on size of fruit, (27) 231, 524.  
   fruit, physico-chemical constants of, (31) 427.  
 Staphylinidae, catalogue, (26) 560.  
 Staphylococcus—  
   albus in udder of healthy cows, (32) 872.  
   liquefaciens aurantiacus n.sp., description, (26) 581.  
   pyogenes albus, notes, (26) 880.  
   pyogenes aureus—  
   as affected by serums and leucocytes, (26) 175.  
   destruction by periodol, (39) 80.  
   lipase of, (29) 177.  
   pyogenes—  
   invading *Cryptococcus farciminosus* lesions, (40) 680.  
   occurrence in sugar, (26) 505.  
   vaccine, tests, (34) 580.  
 Star apples, cold storage of, (32) 439.  
 Star scale, destruction by mites, (26) 553  
 Starch—  
   and diastase of plant tissues, relationship, (28) 729.  
   and skim milk for calves, (36) 370.  
   as affected by—  
   alkalis, (35) 502.  
   hydrolyzing agents, (26) 107.  
   removal of ash and solution, (35) 502.  
   saliva, (26) 872.  
   as binder for ice cream, (36) 78.  
   as substrate for enzym action, (36) 315.  
   chemical constitution, (36) 710.  
   chemistry of, (33) 713.  
   congestion during retarded plant growth, (35) 523.  
   content of cassava roots, (30) 502.  
   crude, determination in cocoa, (32) 298.  
   determination, (26) 804; (27) 497; (29) 716; (32) 109; (40) 114, 204, 312.  
   determination—  
   in bologna, (28) 807.  
   brewers' grains, (26) 807.  
   feeding stuffs, (28) 715.

- Starch—Continued.**  
determination—continued.  
in food products, (27) 807.  
meat and fish products, (29) 798.  
meat products, (27) 499; (28) 358.  
mixtures, (30) 415.  
plants, (32) 807; (35) 206.  
potatoes, (30) 205; (32) 114; (34) 506, 713.  
rye and wheat flours, (31) 869.  
sugar products, etc., (31) 412.  
wheat, (28) 836.  
wood, (25) 202.  
Lintner's polarimetric method, (28) 313.  
of gelatinizing temperature, (35) 616; (37) 410.  
digestibility in mixed rations, (34) 169.  
digestion by young calves, (38) 874.  
digestion in germinating peas, (28) 127.  
distillation in vacuo, (38) 708.  
distillation under reduced pressure, (40) 110.  
effect on—  
ammonification, (28) 718.  
bacterial flora of soils, (28) 815.  
baking qualities of flour, (30) 556.  
geotropism in roots, (29) 322.  
infant digestion, (33) 663.  
nitrification in soils, (28) 218.  
nitrogen fixation, (28) 816.  
nutritive value of proteins, (40) 562.  
oxidation of sulphur in soils, (30) 222.  
peptic digestion, (34) 862.  
soil acidity, (37) 23.  
soil nitrogen, (35) 218.  
soil phosphates, (34) 421.  
toxicity of nitrates, (30) 227.  
elaboration in *Iris germanica*, (34) 524.  
energy values, (40) 365.  
equivalent theory in feeding standards, (33) 870.  
equivalents of feeding stuffs, (26) 467.  
extraction from potatoes, (28) 208.  
factory refuse—  
composition and digestibility, (27) 669.  
drying, (27) 669.  
fertilizing value, (29) 129.  
factory waste waters, studies, (26) 528.  
feeding during inanition, (26) 465.  
ferments as affected by salts, (27) 109.  
formation—  
and decomposition, (31) 128.  
in immature seeds, (33) 523.  
plants, (27) 133; (28) 524; (34) 627.  
sweet potatoes, (27) 435.  
trees, (27) 828.  
underground portions of herbaceous plants, (35) 131.  
from different plants, physical qualities, (33) 426.  
from flowering tubers, (39) 510.  
from frosted and decayed potatoes, (39) 802.  
gelatinization, (30) 461.  
grains—  
cleavage in, (37) 410.  
movements in cells, (27) 426.  
structure, (28) 525.  
studies, (29) 409.  
granules—  
gelatinization point, (30) 10.  
methods of examining, (26) 24.  
swelling in presence of crystalloids, (30) 111.  
history of, (26) 106.  
humification, (34) 516; (38) 26.  
hydrolysis—  
by diastase, (28) 407.  
by malt amylase, (37) 613.  
erythro-dextrin in, (40) 460.  
identification, (32) 559.  
in assimilating organs of Leguminosae, (30) 227.  
in bananas dried at different temperatures, (35) 633.  
industry in Germany, (29) 209; (32) 23, 315.  
industry in United States, (30) 711, 791.  
liquefaction in presence of salts, (35) 556.  
liquefying and saccharifying power of, separation, (31) 609.  
manufacture, handbook, (27) 15.  
methods of analysis, (27) 205; (30) 813; (31) 806; (32) 505.  
microscopy of, (32) 715.  
of glutinous rice, notes, (27) 765.
- Starch—Continued.**  
of grain sorghums, (35) 108, 616.  
green leaves, (35) 131.  
parent stock and hybrids, (36) 222.  
origin and significance, (28) 201.  
phosphoric acid in, (34) 710; (36) 501.  
phosphorus content, (33) 203.  
polysaccharids from, (30) 803.  
products, composition and use, (29) 460.  
products, examination, (34) 11.  
reserve in birch and maple, (33) 523.  
saccharification, (26) 309; (28) 19, 504, 609.  
sirups, determination in fruit products, (26) 115 208.  
soluble—  
determination, (40) 312.  
investigations, (35) 502.  
preparation, (40) 312.  
solutions, diastatic action, (36) 329.  
solutions, stability, (35) 501.  
specificity and complexity, (35) 468.  
studies, (31) 828.  
sugar, treatise, (32) 109.  
transformation in potato leaves and stalks, (36) 126.  
treatise, (31) 804.  
use as food, (28) 460.  
use in canned corn, (32) 161; (35) 765.  
use in food products, (34) 167.  
use in infant foods, (28) 359.  
values in cattle feeding, (33) 673.  
variation in leaves, (29) 827.  
Starches, foreign, effect on quality of dough, (26) 761.  
Starchy feeds, fortified, analyses, (26) 665.  
Starfish—  
analyses, (38) 626.  
analyses and fertilizing value, (30) 520.  
ground, fertilizing value, (40) 125.  
Starlings—  
at Springfield, Massachusetts, (26) 855.  
feeding habits, (27) 550; (28) 450.  
in Pennsylvania, Chester Co., (27) 254.  
notes, (27) 355.  
Starters—  
lactic, tests, (35) 176.  
propagation in dairies, (26) 478.  
use in butter making, (32) 370.  
Starvation—  
effect on catalase content of tissues, (38) 869.  
effect on creatin content of muscles, (30) 65.  
studies, (35) 486; (37) 64, 365.  
*Stasia rodhaini*, notes, (36) 359.  
State departments of agriculture, functions of, (34) 699.  
State universities and agricultural colleges, duplication in, (33) 194.  
*Statenchyma*, notes, (36) 730.  
States Relations Service, *see* United States Department of Agriculture.  
Statistical—  
constants, estimating probable significance of, (31) 130.  
error, tables of, (26) 773.  
theories for meteorology and agriculture, (36) 419.  
theory, notes, (32) 665.  
Statisticians, tables for, (32) 362.  
Statistics—*see also* Agricultural statistics.  
method of calculating frequencies, (27) 275.  
Statoliths—  
in root tips, (36) 330.  
nature and distribution in plants, (36) 729.  
Stature, inheritance of, (40) 275.  
*Stauronotus maroccanus*—  
cocco-bacillus of, (31) 753.  
control in Algeria, (36) 356.  
control in Stavropol, (30) 754.  
destruction by *Coccobacillus acridiorum*, (33) 154.  
notes, (27) 757; (31) 850.  
remedies, (33) 653.  
*Stauropus alternus*, notes, (30) 753.  
Steak, hamburger, analyses, (31) 854.  
Steam—  
effect on soil organisms, (38) 420.  
effect on soils, (28) 123.  
exhaust, utilization, (28) 892.  
pipe systems, installation in dairies, (25) 893.  
plowing in Bombay Presidency, (29) 592.

- Steam**—Continued.  
power v. electricity for filling silos, (32) 590.  
ships, sanitation, (38) 663.  
use in dairies, (27) 690.  
use on farms, (27) 484.  
v. electricity for threshing, (28) 685; (30) 590.  
v. electricity in drainage pumping, (31) 890.

excretion of fertilizing constituents, (39) 576.  
fattening—  
on pasture, (28) 71; (31) 665.  
rate and economy of gains, (37) 471.  
feeding experiments, (26) 266, 508; (27) 371, 872; (28) 69, 72, 169, 265, 266, 572, 669, 670, 873; (29) 169, 271, 272, 367, 368, 666, 667, 771, 870; (30) 372, 468, 567, 767, 869; (31) 169, 366, 469, 470; (32) 68, 259, 462, 467, 568, 768, 769, 864; (33) 265, 371, 373, 468, 569, 759; (34) 665, 666, 768, 866, 867; (35) 271, 475, 563, 670; (36) 65, 168, 269, 270, 470, 563, 564; (37) 66, 68, 270, 365, 471, 674, 768, 769; (38) 68, 270, 271, 272, 369, 667, 770, 870, 872, 873; (39) 168, 371, 474, 475, 575, 576; (40) 768.  
fish meal for, (29) 270.  
grazing on Japanese cane, (37) 572.  
growth data, (30) 370; (35) 868.  
light v. heavy, (38) 667.  
limiting grain ration, (40) 369.  
maintenance, factors affecting cost, (33) 569.  
measurements, weights, and gains, (38) 371.  
on different rations, manure produced by, (40) 126.  
open shed and open lot for, (39) 168.  
open shed feeding, (28) 395.  
open yard v. stable for, (32) 462.  
"optimum age" for fattening off, (40) 667.  
pasture v. confinement for, (39) 474, 475.  
pasturing experiments, (31) 74; (39) 474, 475, 576, 880.  
pasturing fodder crops with, (38) 470.  
physical changes of feed residues in during digestion, (39) 476.  
poisoning with cottonseed meal, (26) 780.  
preparation of corn for, (33) 265; (38) 272.  
respiration experiments, (33) 72; (40) 365.  
roughages for, in the South, (40) 665.  
selection, (28) 72.  
sheltering experiments, (29) 271.  
silage for, (39) 272, 474, 475.  
slaughter tests at Smithfield Show, (31) 565.  
wintering, (38) 271; (39) 168, 370.  
wintering in Alabama, (31) 664.  
wintering on pasture, (28) 70.
- Steganoptycha pincicolana**, notes, (30) 550.
- Steganosporium kosaroffii** n.sp., description, (35) 45.
- Stegomyia**—  
calopus, *see* *Aedes argenteus*.  
fasciata, *see* *Argenteus*.  
scutellaris, notes, (28) 158.  
scutellaris, rôle of blood in reproduction of, (38) 160.
- Steirastoma depressum**, notes, (27) 857.
- Stellaria**—  
intermedia, eradication, (31) 739.  
media, analyses and feeding value, (33) 70.
- Stem borer**, *Dura*, notes, (27) 53.
- Stem diseases**, relation to soils, (26) 646.
- Stemmatosteres apterus** n.g. and n.sp., description, (40) 359.
- Stemphylium**—  
cucurbitacearum n.sp., description, (39) 355.  
sp. on cucumber, (39) 52.
- Steneres** n. sp., notes, (34) 357.
- Stenichneumon trilineatus**, protozoan parasites of, (30) 857.
- Stenobothrus curtippennis**, notes, (28) 59.
- Stenocranophilus quadratus** n.g. and n.sp., description, (32) 851.
- Stenocranus saccharivorus**, notes, (38) 459.
- Stenoma albella**, notes, (26) 147; (30) 657.
- Stenomacra** sp., parasites of, (29) 358.
- Stenomesoidea**, new genus, (39) 468.
- Stenopelmatus** sp. injurious to potatoes, (37) 157.
- Stenopogon picticornis**, predaceous on alfalfa caterpillar, (32) 58.
- Stenoptycha pincicolana** on larches, (34) 63.
- Stenotaphrum americanum**, notes, (26) 362.
- Stenothrips graminum**, notes, (28) 452.
- Stephanias**—  
pyrioides, notes, (40) 753.  
pyrioides, studies, (37) 660, 761.  
rhododendri, notes, (36) 656.
- Stephanoderes**—  
coffea, notes, (32) 847; (34) 851.  
n.sp., notes, (27) 458.  
sp., notes, (38) 363.
- Stephanurus dentatus**—  
description, (34) 280.  
effect on pigs, (32) 479.  
in Philippines, (30) 384.  
life history, (38) 882.  
localization and development in hogs, (29) 783; (31) 484.  
notes, (32) 783; (35) 878; (37) 482, 779.
- Stephensonia** n.g. and n.sp., description, (40) 650.
- Steppes** of Spain, treatise, (39) 122.
- Sterculia alata** irregularis, notes, (28) 821.
- Stereum**—  
albobadium, notes, (28) 551.  
hirsutum in black knot cankers, (32) 52.  
purpureum, notes, (26) 449, 749; (28) 348; (29) 46, 847; (30) 451; (34) 241; (35) 752; (38) 50.  
purpureum, studies, (33) 649.  
subpileatum, studies, (34) 448.
- Sterictiphora**—  
lineata, notes, (29) 252.  
zaddachi, notes, (38) 762.
- Sterigmatocystis**—  
castanea, notes, (28) 549.  
nigra—*see also* *Aspergillus niger*.  
amygdalin diastases in, (30) 241, 805.  
assimilation of zinc by, (30) 523.  
notes, (28) 844; (30) 450; (31) 841; (37) 511, 223.  
occurrence in sugar, (26) 505.  
studies, (32) 844.  
utilization of glucinum by, (29) 28.  
sp., notes, (31) 539.  
sp. on fig, (40) 52.  
sydowi n.sp., notes, (29) 345.
- Sterility**—  
and contagious abortion in cows, (29) 80, 81.  
in bovines and equines, (32) 679.  
cattle, (31) 285; (32) 82; (36) 777; (39) 391, 582.  
cows, treatment, (36) 675; (37) 379; (38) 286.  
hybrid plants, (31) 225.  
rumpless fowls, (26) 878.  
tobacco, (33) 129.
- Sterilization**, effect on—  
oxidation of sulphur in soils, (30) 223.  
plant food in soils, (29) 122.  
soils, (28) 417.
- Sterilizer**, steam, description, (35) 677.
- Sterilizing outfit** for field laboratory, (40) 843.

*Sterna* spp., notes, (27) 355.  
*Stethorus*—  
*picipes*, notes, (28) 457.  
 spp. parasitic on red spider, (32) 157.  
*Stewart, V. B.*, biographical sketch, (40) 199.  
*Stick-lac* insect, biology, (35) 463.  
*Stictiella* n.g., description, (40) 264.  
*Stictis panizzei*, notes, (26) 849.  
*Stictiocephala*—  
*festina*, notes, (35) 657.  
*festina*, studies, (32) 652.  
*inermis*, notes, (32) 651.  
*Stictococcus dimorphus*, notes, (34) 453.  
*Stictomyia longicornis*, notes, (28) 451.  
*Stictopterinae* in British Museum, catalogue, (28) 856.  
 Stiff-sickness in cattle, notes, (26) 882.  
*Stigeosporium marattiacearum* n.sp., description, (37) 630.  
*Stigma*, effect on germination of pollen, (29) 437.  
*Stigonema* sp., notes (28) 31.  
*Stijfziekte*—  
 in cattle, notes, (26) 882.  
 notes, (28) 780.  
 paper on, (29) 476.  
*Stilbella*—  
*flavida*, control, (40) 42.  
*flavida*, notes, (29) 650; (32) 645.  
*flavida*, studies, (33) 549.  
*nana*, notes, (26) 851.  
*Stilbum*—  
*flavidum*, studies, (30) 652, 849.  
*nanum*, notes, (31) 49  
*Stillingia*—  
 seeds, notes, (32) 613.  
 tallow, detection, (29) 613.  
*Stilpnotia salicis*, control by parasites, (39) 658.  
 Stimulation, mechanical, in plants, (36) 525.  
 Stink bugs, notes, (28) 654.  
 Stink grass, analyses, (30) 565.  
 Stinkweed—  
 destruction, (30) 236.  
 dissemination by farm animals, (26) 839.  
 eradication, (39) 744.  
*Stipa*—  
*capillata*, drought resistance, (36) 734.  
 spp., analyses, (30) 565.  
*tenacissima*, culture and use, (33) 131.  
*tenacissima*, notes, (31) 832.  
*vaseyi*, cyanogen in, (33) 665.  
*Stirastoma depressum*, notes, (35) 254.  
*Stizolobin*, new protein, (39) 202.  
*Stizolobium*—  
*aterrimum*, destruction of scale insects by, (26) 534.  
*beans*, culture in Porto Rico, (29) 631.  
 culture experiments, (35) 135, 528.  
 deeringianum, seed and pod structure, (38) 638.  
*pachylobium* beans, feeding value, (34) 262.  
*pachylobium*, description, (30) 828.  
 spp. as cover crop for coconuts, etc., (33) 535.  
 spp., hybridization experiments, (31) 734.  
 spp. in Philippines, (38) 35.  
 spp., semisterility in, (32) 726.  
 spp., studies, (37) 328.  
 varieties, (31) 635.  
*Stizolobiums*, hybridization, (27) 339.  
 Stock, *see* Livestock.  
 Stock foods, *see* Feeding stuffs.  
 Stocks—  
 and scions, antagonism of, (31) 740.  
 breeding experiments, (29) 433.  
 double, notes, (35) 730, 731.  
 for fruit trees, (32) 234; (40) 444.  
 hybridization experiments, (29) 433.  
 inheritance—  
 in, (26) 433; (36) 729.  
 of doubleness in, (30) 631; (36) 826.  
 of hoariness in, (28) 228; (35) 731.  
 Stockyards—  
 disinfection, (36) 675.  
 licensing, (39) 676.  
 Stomach—  
 absorption from, (28) 665.  
 activity, inhibition, (28) 865.  
 contents, methods of examining, (33) 310.  
 glands, secretory, activity under influence of  
 meat extract, (31) 662.  
 physiology of, (28) 567, 864, 865; (32) 858; (33)  
 754; (34) 463; (40) 270, 766, 867.

Stomach—Continued.  
 worms—  
 in Guam, (35) 878.  
 notes, (40) 782.  
 of lambs, (37) 691.  
 of sheep, (37) 477; (39) 372; (40) 88.  
 Stomata—  
 and heliotropic sensitivity, relation, (32) 221.  
 behavior during wilting, (35) 431.  
 estimating aperture, (27) 222, 427.  
 in relation to transpiration, (35) 27; (36) 329.  
 opening and closure, (27) 221.  
 regulation of, (33) 628.  
 studies, (38) 821.  
 Stomatal—  
 aperture in cotton leaves, (27) 732.  
 aperture in plants, studies, (38) 223.  
 investigations, use of porometer in, (35) 431.  
 movement in *Gossypium*, studies, (28) 822.  
 movement, relation to water content of leaves,  
 (26) 627.  
 Stomatitis—  
 contagious, notes, (37) 482.  
 contagious pustular, in horses, (38) 586.  
 differential diagnosis, (40) 283.  
 in pigs and calves, (33) 774.  
 infectious, (40) 183.  
 infectious, in horses, (37) 692; (38) 179.  
 necrotic, notes, (31) 879.  
 vesicular—  
 in cattle, (37) 81.  
 horses and cattle, (38) 787; (39) 390.  
 horses and mules, (37) 182.  
 notes, (38) 80.  
*Stomatoceras pertorvus* n.sp., description, (37) 569.  
 Stomatograph, description, (27) 732.  
*Stomatothrips flavus* n.g. and n.sp., description,  
 (27) 454.  
*Stomoxys calcitrans*, *see* Stable fly.  
 Stone—  
 cells, formation in pears, (26) 449.  
 flies injurious to vegetation, (39) 256.  
 for road building, *see* Road materials.  
 grading for road construction, (37) 787.  
 meal, analyses, (38) 626.  
 meal fertilizer, so-called, warning against, (33)  
 820.  
 meal fertilizers, tests, (30) 327; (32) 520.  
 regulations for national forests, (26) 340.  
 road-making qualities, (37) 695.  
 Stomcock, special, description, (40) 202.  
 Stopcock—  
 batteries, installation and care, (30) 190.  
 central cooperative, in France, (40) 688.  
 effect on—  
 flour, (33) 161.  
 milk, (28) 579.  
 oxygen in water, (26) 418.  
 potatoes, (29) 230.  
 seed cotton, (29) 140.  
 houses for apples, (32) 888.  
 houses, management, (26) 441.  
 rots, relation to temperature, (33) 545.  
 structures, plans, (32) 486.  
 Stored goods, insects affecting, (27) 453.  
 Storehouses, insects affecting, (26) 553.  
 Storer, F. H.—  
 biographical sketch, (31) 698.  
 tribute to and publications of, (33) 801.  
 Stores—  
 cooperative—  
 (36) 192; (38) 894.  
 cooperative—  
 business practice and accounts for, (35) 89 3  
 in the Northwest, (26) 895.  
 United States, (26) 92.  
 Wisconsin, (28) 895.  
 insects affecting, (28) 248.  
 Storm—  
 at Abilene, Texas, (26) 27.  
 Austin, Texas, (27) 316.  
 Dubuque, Iowa, (29) 812.  
 New York City, (27) 316.  
 Pocatello, Idaho, (27) 616.  
 San Diego, California, (37) 513.  
 frequency changes in United States, (34) 118.  
 in eastern North Carolina, (30) 417.  
 of August 10, 1915, (34) 118.  
 July 12-22, 1916, (36) 419.  
 September 13-14, 1912, (28) 415.  
 on Great Lakes, (30) 713.

## Storm—Continued.

- severe, at Galena, Ill., (26) 214.
- severe local, notes, (26) 214.
- warning signals on Great Lakes, (35) 506.
- water run-off, determination, (38) 590.
- Storms—
  - as affected by forests, (29) 842.
  - autumn, relation to moon, (32) 316.
  - electric, in western Kansas, (27) 616.
  - in Belgium, (30) 17.
  - eastern United States, (38) 717.
  - Florida, (29) 721.
  - Jamaica, (28) 716; (34) 615.
  - Louisiana, (30) 417.
  - Ohio, (29) 812.
  - United States, (32) 316.
  - Virginia, (29) 812.
  - insurance against in Denmark, (27) 794.
  - local, in Illinois, (28) 716.
  - magnetic—
    - and rain, correlation, (38) 15.
    - of August, 1916, (38) 210.
    - sun spots, and rainfall, (38) 811.
    - of June 16, 1912, (27) 616.
    - papers on, (27) 816; (29) 510.
    - terms used to designate, (34) 118.
- Stramonium—
  - as affected by composition of soils, (34) 18.
  - breeding experiments, (30) 631.
  - improvement by selection, (32) 143.
- Strangles—
  - immunization, (28) 784; (31) 378; (33) 87; (34) 580; (36) 179.
  - in horses, (26) 373; (34) 185.
  - in horses—
    - causative agent, (36) 85.
    - immunization, (32) 882.
    - in Philippines, (30) 186.
    - in Prussia, (27) 181.
  - streptococcus, specificity, (29) 883.
- Strategus—
  - alveus, affecting coconut palms, (29) 858.
  - anachoreta, notes, (26) 354.
  - quadrifoveatus, notes, (36) 355.
  - sp., notes, (39) 849.
  - sp. on coconut, (40) 751.
  - spp., notes, (36) 753.
  - titanus, destructive to sugar cane, (28) 256.
  - titanus, notes, (30) 356.
- Stratiomys chamaeleon, notes, (37) 847.
- Straussia longipennis, notes, (40) 169.
- Straw—
  - action as affected by distribution in soils, (35) 518.
  - analyses, (26) 767.
  - analyses and nutritive value, (35) 164.
  - as feeding stuff, (35) 669.
  - as human food, (34) 256.
  - baler, description, (27) 191.
  - breaking strength, tests, (33) 534.
  - composition and digestibility, (34) 565.
  - damaged, as source of potash, (34) 327.
  - decomposition by Streptothrix, (27) 620.
  - digestibility, (31) 667.
  - effect on—
    - ammonifying power of soils, (35) 730.
    - denitrification in soils, (29) 817.
    - loamy sand, (29) 19.
    - nitrification, (40) 719.
    - nitrogen assimilation in plants, (26) 319.
  - feeding, (38) 95.
  - feeding value, (29) 271; (38) 168.
  - fermenting power, (31) 413.
  - fertilizing value, (31) 226, 822; (33) 326.
  - for dairy heifers, (36) 873.
  - grades of, (34) 528.
  - humification, (31) 120.
  - in legume silages, (39) 310, 878.
  - litter, absorptive power, (33) 817, 818.
  - manure, denitrifying action of, (26) 424.
  - meal—
    - as feed for pigs, (34) 376.
    - bread for cattle, (34) 767.
    - composition and digestibility, (35) 474.
    - feeding value, (35) 376.
    - preparation and use, (36) 367.
  - measuring for feed, (39) 834.
  - stacks, changes in composition, (28) 768.
  - wheat and oat, as bedding, (39) 621.

## Straw—Continued.

- winter and summer grown, composition and digestibility, (32) 665.
- yields in Australia, (38) 133.
- Strawberries—
  - as affected by—
    - Rhizopus nigricans, (38) 252.
    - soils and fertilizers, (31) 534.
  - breeding—
    - and testing in Minnesota, (40) 148.
    - experiments, (32) 338, 438, 835; (35) 144, 444; (36) 741; (39) 346, 349, 542; (40) 742.
    - experiments in Alaska, (40) 446.
  - bud selection experiments, (31) 335; (33) 236.
  - Carabidae injurious to, (39) 564.
  - cold storage experiments, (31) 535.
  - composition in relation to soils, (37) 648.
  - crossing experiments, (30) 740; (36) 442.
  - cultivated, origin, (35) 144.
  - culture, (26) 741, 743; (27) 242; (28) 840; (29) 439, 745; (31) 441, 837; (32) 45, 541, 751; (33) 47, 142; (34) 42; (37) 447, 648; (38) 143, 246; (39) 242, 350, 447; (40) 838.
  - cure—
    - experiments, (27) 242; (28) 142; (29) 137; (35) 444; (37) 243; (38) 41.
    - in Mexico, (34) 834.
    - North Carolina, (30) 444.
    - the South, (33) 47; (36) 241.
    - Wisconsin, (33) 47.
    - under irrigation, (31) 442; (32) 141.

 of strangles, specificity, (29) 883.  
 pathogenic, hemolysins produced by, (28) 179.  
 pathogenic, studies, (39) 84, 888.  
 significance in water supplies, (36) 489.  
 studies, (40) 881.  
 survival of pasteurization by, (31) 574.  
 transmission by stable fly, (32) 552.
- Streptococci—**  
 diseases in man, treatment, (31) 479.  
 diseases, treatment, (26) 578.  
 infection in sheep, (26) 683.  
 infections of deep air passages of horses, (31) 287.  
 septicemia, treatment, (39) 488.  
 serum, method of action, (32) 179.
- Streptococcus—**  
 acid lactic, notes, (26) 880.  
 apis, relation to foulbrood of bees, (27) 563.  
 disparis n.sp., description, (39) 465.  
 equi, characteristics of, (26) 177.  
 equi, notes, (30) 186.  
 equi, review of investigations, (36) 85.  
 hemolyticus, human and bovine, differentiation, (40) 677.  
 immunity, studies, (40) 676.  
 infection of udders, (40) 87, 184.  
 infection, review of investigations, (40) 184.  
 lacticus—  
   in Stilton cheese, (28) 879.  
   origin in milk, (34) 473.

- Streptococcus**—Continued.  
*lacticus*—continued.  
 relation to milk acidity, (32) 872; (33) 675.  
 types of, (34) 77.  
*lactis fulvus*, itinerary in butter manufacture, (39) 78.  
*lanceolatus*, notes, (26) 176, 586.  
*pyogenes*—  
 affecting pigs, (30) 185.  
 culture medium for, (40) 180.  
 destruction by periodol, (39) 80.  
*solanii* n.sp., notes, (37) 549.  
 spp., differentiation, (27) 177, 281.  
 spp., notes, (26) 575.  
 spp., proteolysis of, (35) 204.  
 vaccine, tests, (34) 580.
- Streptolysin**—  
 immunity to, (32) 179.  
 investigations, (30) 78.
- Streptothrices**, metabolism, (40) 478.
- Streptothrix**—  
 infection of udders, (40) 184, 185.  
*madurae*, biology and morphology, (26) 281.  
*muris ratti*, notes, (35) 487.  
 of rat-bite fever, (40) 479.  
*putorii* associated with weasel-bite fever, (39) 889.  
 rôle in soils, (27) 620.  
 sp., ammonifying power, (31) 317.
- Streptotrichosis** in a bullock, (27) 785.
- Stresses**—  
 determination in tunnel sections, (29) 593.  
 on concrete pavement slabs, determination, (31) 186.
- Striga lutea***—  
 eradication, (36) 236.  
 notes, (31) 842; (40) 48.
- Stromatinia**—  
*cinerea*, notes, (40) 749.  
*geranii* n.sp., description, (40) 249.
- Struggle** sp., destructive to deer, (26) 653.
- Strongyles**—  
 affecting sheep in Algeria, (31) 86.  
 in horses, (27) 887.
- Strongylidae** in horses, (39) 686, 892.
- Strongylidosis**—  
 equine, studies, (35) 489.  
 equine, treatment, (40) 586.
- Strongyloides longus** in pigs, (35) 79.
- Strongyloplasma avium**, notes, (28) 483.
- Strongylosis**—  
 congenital bronchial, in sheep, (27) 886.  
 encephalo-embolic, in horses, (28) 887.  
 encephalo-embolic, notes, (29) 478.  
 in ruminants, treatment, (28) 379.  
 pulmonary, notes, (37) 179.
- Strongylus**—*see also* Lungworms and Stomach worms.  
*armatus*, affecting mules, (28) 82.  
*capillaris* n.sp., description, (30) 884.  
*cervicornis*, notes, (27) 86.  
*douglasii*, life history, (33) 334.  
*douglasii*, notes, (26) 487.  
*filaria*, first stages, (28) 182.  
*(Haemonchus) contortus*, life history, (29) 476.  
*micrurus*, notes, (31) 85.  
 notes, (40) 782.  
*paradoxus*, description, (34) 280.  
*paradoxus*, notes, (35) 878.  
*rufescens*, notes, (30) 351.  
 spp., in lungs of sheep and deer, (30) 285.  
 spp., physiological investigations, (31) 679.  
 studies, (34) 879.
- Strontium**—  
 and calcium, separating and identifying, (26) 21.  
 carbide, manufacture, (28) 222.  
 detection, (28) 409.  
 determination in—  
 presence of phosphoric acid and iron, (36) 14.  
 water, (29) 797; (32) 297; (37) 506.  
 effect on plant growth, (40) 819.  
 effect on *Spirogyra*, (38) 27.  
 function in plants, (30) 523.  
 in plants, (38) 409.  
 in soils, (31) 720.  
 salts, effect on nodule production in vetch, (32) 728.  
 salts, effect on wheat, (36) 520.  
 separation from barium and calcium, (26) 204.
- Strontium**—Continued.  
 separation from calcium, (26) 205.  
 toxicity toward plants, (30) 128.
- I-Strophanthin** in bark and seeds of oleander, (26) 202.
- Strophanthus** spp., agglutinating properties, (31) 774.
- Strophosomus**—  
*coryli*, notes, (27) 552.  
*obesus*, notes, (27) 458.
- Strumella coryneoides**, description, (31) 451.
- Strychnin**—  
 detection in water, (34) 410.  
 effect on plant growth, (37) 632.  
 effect on somatic cells, (26) 229.  
 sulphate, effect on quail, (34) 850.  
 use against polyneuritis, (28) 761.
- Strychnos spinosa**, notes, (30) 145.
- Stubbs, J. E.**, biographical sketch, (31) 100.
- Student** budgets in Smith College, (34) 762.
- Students**—  
 agricultural, practice work for, (28) 597.  
 graduate, as research assistants in experiment stations, (36) 102.  
 high school, standard of living, (29) 767.
- Stump**—  
 burner, description, (37) 385.  
 growths, abnormalities of, (26) 37.  
 puller, description and operation, (27) 387.  
 puller, hand-winch, description, (27) 191.  
 pulling machine, description, (32) 385.
- Stumps**—  
 blasting, (29) 183; (32) 85.  
 blasting experiments, (28) 590; (31) 589.  
 boring machine for, (31) 486.  
 burning, (32) 485; (35) 84; (37) 96.  
 char-pit method of destruction, (26) 787; (27) 890.  
 destruction with acids, (28) 485; (31) 92.  
 pulling and burning, (37) 87.  
 removal, (30) 86; (32) 589; (35) 583; (36) 89, 785; (39) 493, 687; (40) 90.  
 removal with dynamite, (26) 187; (35) 887.  
 removing with explosives, (26) 591.
- Sturmia scutellata**, biology, (36) 858.
- Sturnella**—  
 neglecta—  
 destruction of locusts by, (28) 351.  
 economic importance, (30) 654.  
 feeding habits, (28) 351.  
 spp., feeding habits, (29) 452.
- Sturnira lilium parvidens** n.subsp., description, (37) 757.
- Sturnus vulgaris**—  
 at Springfield, Massachusetts, (26) 855.  
 feeding habits, (28) 450.  
 in Pennsylvania, Chester Co., (27) 254.
- Styloidea picta**, notes, (28) 451.
- Stylops**—  
 anatomy and life history, (32) 62.  
 British, synopsis, (39) 664.
- Styrax**—  
*japonica* seeds, fatty oil of, (35) 611.  
*obassia*, oil of, (37) 109.
- Stysanus**—  
 spp. in Norway, (31) 327.  
*stemonitis*, notes, (32) 50.
- Suaeda maritima**, growth in presence of salt, (33) 222.
- Subcapular cysts** in domestic animals, (26) 176.
- Subirrigation**—  
 for golf greens, (31) 889.  
 in Florida, (36) 88.  
 in Texas, (27) 788.  
 v. surface irrigation for vegetables, (29) 638.
- Sublimoform**—  
 fungicidal value, (31) 242.  
 use against grain smuts, (27) 445.
- Subsoil water**—  
 effect on cotton crop of India, (26) 417.  
 of central United States, (27) 511.  
 of United States, (28) 811.
- Subsoiling**—  
 effect on yield of oats, (31) 41.  
 experiments, (28) 827; (30) 121, 236; (37) 272, 732, 733.  
 experiments with dynamite, (31) 589; (33) 90.  
 experiments with gelignite, (29) 785.  
 in the Great Plains, (39) 812.  
 notes, (31) 131; (38) 334.  
 with explosives, (26) 91; (29) 183; (32) 884.

- Subsoils—  
 analyses, (28) 736.  
 blasting experiments, (30) 386.  
 humid, rawness, (40) 121.  
 moistness, interpretation of field observations on, (40) 211.  
 rawness, (39) 620, 621.
- Succinate, action on isolated intestine, (37) 471.
- Succinea risei, dissemination by bobolinks, (30) 851.
- Succinic acid—  
 assimilation by plants, (31) 426.  
 determination, (39) 715.  
 determination in wine, (31) 13.  
 effect on carbon assimilation of plants, (27) 525.  
 extraction with ether, (37) 414.  
 in beef, (30) 61; (31) 759.  
 in honey, (28) 166.  
 in silage, (27) 205.  
 isolation from soils, (28) 418.  
 reaction of, (33) 414.
- Suck fly, notes, (28) 654.
- Sucrose—  
 activation by acids, (27) 803.  
 from koji, activity in acid solutions, (30) 311.  
 protein substances of, (32) 803.  
 thermoregeneration of, (32) 803.
- Sucrose—  
 acetates of, (34) 408.  
 action of acids on, (37) 802.  
 action of symbiotes on, (40) 464.  
 bromination as affected by catalyzers, (40) 613.  
 content of molasses, determination, (40) 206.  
 content of soy beans, (28) 166.  
 detection in grape juice and wines, (29) 310.  
 detection in maple sirup, (31) 610.  
 determination, (27) 812; (37) 506; (40) 507.  
 determination in—  
 beets, (32) 110.  
 cane products, (35) 716.  
 condensed milk, (34) 612.

  - selection, (31) 232.
  - single-germ, production, (33) 532.
  - soaking in superphosphate solution, (31) 632.
  - transmission of high sugar content by, (30) 834.
  - valuation, (31) 42; (33) 135.
- seedlings in relation to *Phoma betae*, (34) 156.
- sirup, manufacture, (37) 511.
- slices for milch cows, (27) 374.
- soils, nitrates in, (40) 300.
- thrips, studies, (36) 153.
- tops, analyses and digestibility, (29) 367.
- tops, analyses and feeding value, (33) 169; (34) 664.
- tops and leaves, feeding value, (38) 168.
- tops for dairy animals, (30) 473.
- tumors, formation, (34) 845.
- waste, utilization, (23) 767.
- webworm, *see* *Loxostege sticticalis*.
- wireworm, studies, (30) 758.
- yellow, notes, (35) 245.

## Sugar beets—

- absorption and utilization of plant foods by, (29) 737.
- analyses, (23) 132, 409, 770; (27) 36, 334, 341, 371, 469, 570; (23) 493; (29) 113; (30) 466, 697; (31) 42, 436, 737, 864; (32) 431, 435; (33) 434; (33) 634.
- and mangels, comparative yields, (40) 431.
- and sorghum, comparison, (40) 325.
- and their products in bread making, (34) 660.
- animals affecting, (28) 654; (30) 853; (31) 58, 649.
- as affected by—
  - defoliation and nitrates, (31) 435.
  - depth of fertilization, (30) 621.
  - fertilizers, (27) 123, 433, 534; (31) 736.

## Sugar beets—Continued.

- as affected by—continued.
  - lead nitrate, (31) 226.
  - nitrogenous fertilizers, (23) 332.
  - precipitation, (26) 738.
  - size of seed, (31) 42.
  - spacing, (31) 633; (32) 41.
  - static electricity, (27) 500.
  - water, (27) 837.
- as host of *Puccinia subnitens*, (31) 842.
- as human food, (33) 866.
- as silage crop, (39) 134.
- assimilation of—
  - carbohydrates by, (26) 626.
  - nitrogen by, (33) 434.
- breeding experiments, (37) 442.
- catalytic fertilizers for, (26) 225.
- changes in during storage, (27) 210.
- classification, (30) 439.
- classification of varieties, (27) 31.
- composition, (27) 838.
- composition as affected by—
  - drought, (30) 736.
  - irrigation, (28) 332.
  - nitrate, (26) 196.
  - size, (26) 738.
  - sodium manures, (28) 34.
- composition—
  - at various stages, (36) 835.
  - during seed-producing period, (33) 135.
  - in relation to meteorological conditions, (37) 539.
- continuous culture, (40) 419.
- correlation studies, (36) 629; (37) 28, 642.
- cost of production, (27) 530, 637; (35) 138; (40) 139, 440, 737.
- cost of production in Austria, (28) 594.
- critical period of growing season, (39) 811.
- culture, (27) 32, 435; (28) 336; (30) 736; (31) 35, 298; (34) 482; (39) 834.
- culture—
  - experiments, (27) 530, 534, 833; (28) 43, 637; (29) 138, 142, 223, 427; (30) 133, 638; (31) 333; (32) 132, 136, 225, 430, 435, 526; (33) 31; (34) 34, 37, 229; (35) 526; (36) 32, 132, 133, 225, 533; (37) 30, 230, 435, 644; (38) 341, 536, 634; (39) 124, 334, 834; (40) 336, 735.
- in Algeria, (38) 237.
- Austria-Hungary, (31) 689.
- California, (37) 443; (40) 737.
- Cape of Good Hope, (29) 432.
- Colorado, (40) 138.

- treatise, (32) 436.
- under dry land conditions, (31) 429.
- under humid conditions, (30) 529.
- under irrigation, (30) 529; (34) 528.
- defoliating experiments, (30) 39; (36) 233, 732.
- deterioration in quality, (28) 43; (31) 435.
- determination of density, (36) 716.
- determination of fructose in, (40) 507.
- development as affected by light, (27) 642.
- distance experiments, (29) 32; (32) 830.
- drying, (35) 417.
- effect on—
  - composition of milk fat, (33) 674.
  - milk, (34) 472.
  - soil productivity, (28) 336.
- electroculture experiments, (27) 231; (36) 227; (40) 428.
- ensiling, (38) 130.
- examination, (27) 64.
- examination and valuation, (28) 715.
- feeding value, (40) 32.

## Sugar beets—Continued.

- fertilizer experiments, (26) 232, 424, 425, 438, 631, 636; (27) 32, 125, 530, 534; (28) 43, 44, 221, 637, 723; (29) 126, 137; (30) 134, 220, 229, 428, 438, 529, 624, 638, 834; (31) 123, 126, 133, 233, 328, 422, 430, 733, 820, 821, 833; (32) 136, 217, 230, 830; (33) 135, 434, 625, 728; (34) 24, 38, 519; (35) 22, 427, 629, 736; (36) 220, 533; (38) 634; (39) 427, 617; (40) 331, 421, 430, 621, 735.
- flour from, (29) 161.
- following alfalfa, (40) 430.
- for late planting, (37) 436.
- for milch cows, (30) 573.
- forage, production and use, (26) 132.
- formation of saccharose in, (27) 526.
- from same seed ball, characteristics, (31) 633.
- germination, (30) 525.
- glycuronic acid from, (26) 307.
- graphic summary of seasonal work, (39) 495.
- green manuring experiments, (32) 217, 721.
- growth as affected by—  
alkali salts, (34) 125.  
light, (28) 825.  
soils, (29) 416.
- growth in sunlight and in shade, (30) 234.
- improvement, (28) 336.
- increase in sucrose content after removal from soil, (38) 536.
- injurious nitrogen in, (30) 15.
- inorganic fertilizers for, (27) 500.
- insects affecting, (26) 648, 848; (28) 346, 352; (29) 153; (31) 58, 232, 649; (39) 160, 464.
- inspection in Belgium, (27) 14.
- irrigated, manuring experiments, (40) 421.
- irrigation experiments, (28) 130, 133, 134, 230, 827; (29) 32, 226; (30) 35; (31) 328, 732; (32) 37, 225; (33) 287; (35) 637; (36) 35; (37) 30, 32, 85, 741, 822; (38) 320; (40) 331.
- leaf infection with *Cercospora beticola*, (34) 845.
- liming experiments, (40) 134.
- localization of betain in, (27) 203.
- loss in weight by drying, (33) 135.
- losses in the silo, (36) 132.
- magnesia fertilizer for, (30) 234.
- manganese fertilizers for, (27) 643.
- manufacture of alcohol from, (26) 213, 512, 809.
- manuring experiments, (39) 617.
- methods of—  
analysis, (28) 413; (31) 806; (38) 536.  
sampling, (26) 409.  
variety testing, (26) 436.
- mineral matter, composition, (39) 808.
- morphology and physiology, relation to climate, (40) 531.
- mother, isolation of flower stalk, (33) 832.
- nematodes affecting, (27) 151, 152; (33) 851.
- nitrogen content, fluctuation in, (31) 633.
- nitrogenous constituents of, (26) 116.
- nonprotein nitrogenous substances of, (28) 810.
- planting and thinning experiments, (33) 430.
- planting dates, (33) 631.
- poisoning of livestock by, (34) 80.
- pollination by field bees, (26) 332.
- pollination by thrips, (31) 549.
- potash compounds in, (31) 325.
- potash fertilizers for, (26) 526.
- premature flowering, (27) 36.
- production in—  
1913, (31) 391.  
United States, (26) 94; (39) 237.  
Utah and Idaho, (39) 640.
- quality as affected by weather, (26) 415.
- radioactive fertilizer for, (31) 31, 129.
- relation of—  
foliage development to sugar content, (31) 233.  
size of seed to yield, (26) 434.  
size to sugar content, (30) 208; (38) 729.  
tops to roots, (31) 733.  
weight to composition, (31) 19.  
yield to sugar content, (26) 43.
- relation to climate, (28) 27.
- review of investigations, (31) 232.
- rotation experiments, (33) 429, 828, 829; (36) 829; (38) 129; (40) 331, 430.
- saccharose in, (33) 235; (38) 26.
- salt for, (26) 34.
- second season, analyses, (31) 737; (33) 135.
- seed infection in, (34) 747.
- seeding depths, (40) 227, 336.

## Sugar beets—Continued.

- seeding experiments, (29) 138, 427; (31) 334.
- spacing experiments, (40) 336.
- spring v. fall planting, (37) 32.
- statistics, (28) 335.
- studies, (27) 642.
- subsoiling experiments, (29) 137.
- sugar content in relation to—  
chemical characters, (35) 641.  
foliage, (34) 38.  
weight, (35) 640.
- sulphur in, (31) 817.
- thinning dates, (40) 430.
- thinning experiments, (40) 336.
- transplanting experiments, (36) 533.
- treatise, (26) 737; (37) 533.
- tumor formation in, (27) 352.
- utilization of nonsugar substances of, (26) 612
- v. mangels for western Nebraska, (32) 224.
- variability of nitrogen content, (29) 536.
- variation and correlation in, (37) 642.

 Sugar—  
   carbonitiation process, (39) 16.  
   chemistry, progress in, (28) 413.  
   chips, analyses, (26) 770.  
   cold storage experiments, (37) 510.  
   composition and use, (29) 459.  
   compounds, rotary powers, (36) 12.  
   content of—  
     blood, treatise, (31) 277.  
     cornstalks, (27) 314; (30) 14.  
     flaxseed and linseed cake, (32) 802.  
     sorghum, studies, (40) 325.  
     watermelons, (27) 765.  
   cost of production, (28) 294; (39) 443.  
   date-palm, industry in Bengal, (29) 149.  
   decolorizing carbons, new, (40) 12, 510.  
   decomposition—  
     by the cell, (30) 201.  
     in soils, (37) 628.  
     the animal organism, (26) 307.  
     the living cell, (32) 201.  
   defecation precipitate, reducing substances in, (37) 13.  
   denatured, for honeybees, (37) 467.  
   deterioration, (35) 316.  
   determination, (26) 115, 312; (27) 12, 507, 714; (35) 416; (37) 313, 509; (39) 509, 510.  
   determination—  
     biological method, (31) 809.  
     in bagasse, (27) 210; (31) 18.  
     baked articles, (38) 11, 412.  
     beets, (28) 511.  
     condensed milk, (36) 508.  
     feeding stuffs, (37) 208.  
     food products, (31) 18; (34) 205.  
     fruit juices, (28) 639.  
     hay and turnips, (31) 807; (37) 618.  
     juices, (29) 413.  
     meat, (29) 798.  
     meat products, (36) 506.  
     milk, (28) 208; (39) 805.  
     molasses, (33) 207.  
     plant juices, (38) 507.  
     plant material, (32) 113.  
     potatoes, (29) 412.  
     presence of peptone, (29) 716.  
     sugar beets, (26) 409; (29) 113.  
     sweetmeats and sirups, (28) 510.  
     urine, (34) 807; (38) 614; (39) 112; (40) 413.  
     wheat, (28) 836.  
   of raffinose in, (40) 313.  
   development in beets, (31) 737.  
   digest of literature, (27) 615.  
   effect on—  
     ammonia accumulation by microorganisms, (37) 812.  
     ammonification, (28) 718.  
     bacterial content of ice cream, (32) 660.  
     determination of pentoses in plant extracts, (33) 712.  
     digestion, (29) 663.  
     dogs, (28) 462.

## Sugar—Continued.

- effect on—continued.
    - metabolism, (27) 871.
    - nitrification in soils, (28) 218; (31) 819.
  - effect on nitrogen—
    - assimilation in plants, (26) 319.
    - fixation, (28) 816.
    - fixation and nitrate loss in soil, (40) 122.
    - transformation in soils, (30) 717.
  - effect on—
    - oxidation of sulphur in soils, (30) 222.
    - plants, (35) 633.
    - productivity of soils, (28) 623.
    - secretions, (31) 762.
    - soils, (27) 722.
    - toxicity of nitrates, (30) 227.
  - evaporating machinery, studies, (30) 890.
  - experiment station at Prague, report, (28) 414
  - experiment stations in Java, work of, (31) 530.
  - extraction from beets, (28) 413; (31) 18.
  - factories—
    - cooperative in Holland, (27) 487.
    - germicides for, (32) 717.
    - heat balance of, (30) 891.
    - power and steam consumption, (36) 388.
  - factory juice heaters, tests, (36) 387.
  - factory wastes, fertilizing value, (29) 129.
  - feeds, analyses, (29) 467.
  - fertilizing value, (28) 123.
  - filtration of sirups in relation to purity, (39) 206.
  - food value, (29) 65, 459; (32) 662.
  - for children, (34) 164.
  - horses, (34) 769.
  - infants, (34) 258.
  - pigs, (33) 571
- formation—
- and translocation in mangels, (36) 125.
  - as affected by removal of flowers, (28) 225.
  - in plant organs, (39) 732.
    - potato leaves, (36) 126.
    - potatoes, (33) 310.
    - stalks of corn and sorghum, (29) 409.
    - sugar beets, (33) 235.
    - sweet potatoes, (27) 435.
- forms of in fruits, (29) 40, 503.
- from coconut palm sap, (30) 16.
  - cornstalks, (34) 113.
  - millet, (32) 117.
  - sweet sorghums of India, (32) 136.
- hexose, in normal milk, (33) 311.
- humification, (31) 120.
  - humus, preparation, (36) 625.
  - humus, relation to soil "sickness," (28) 520.
  - hydrolysis, investigations, (30) 411.
- in arrowhead tubers, studies, (30) 502.
- floral leaves, (37) 246.
  - potatoes, (29) 219; (33) 223.
  - resting potato tubers, (35) 634.
  - sweet potatoes, nature, (33) 564.
- industry—
- chemistry of, treatise, (33) 615.
  - in Australia, (40) 524.
    - Cuba, (40) 792.
    - Grenada, (39) 738.
    - Guiana, (31) 391.
    - Gurdaspur District, India, (40) 635.
    - Hawaii, (31) 391.
    - island of Negros, (26) 537.
    - Louisiana, (29) 690.
    - Mexico, (32) 231.
    - Natal, (29) 739.
    - Philippines, (28) 535.
    - Queensland, (31) 737; (40) 37.
    - United States, (30) 736, 737, 791.
  - monograph, (28) 637.
- injections, effect on heat regulation, (32) 859.
- inversion—
- and determination, (38) 507.
  - and fermentation in flour, (34) 660.
  - by acids, action of neutral salts on, (40) 802.
  - by colloidal silica, (40) 201.
  - by soils and allied substances, (40) 123.
  - of, (34) 13.
- invert—
- action of acids on, (37) 802.
  - detection, (31) 18.
  - determination, (32) 22.
  - determination in presence of saccharose, (33) 207.
  - determination in presence of sucrose, (35) 504.

## Sugar—Continued.

- invert—continued.
    - formation' n beets during storage, (30) 15.
    - in bananas dried at different temperatures, (35) 633.
    - in malt sprouts, (26) 24.
    - manufacture, (40) 802.
    - notes, (27) 812.
    - use in bread making, (33) 461.
  - juice, evaporation, (28) 893.
  - kelp carbon for decolorizing, (40) 12.
  - localization in fleshy fruits, (35) 226; (36) 110.
  - locating in plant tissues, (34) 729; (39) 27.
  - making, mycology of, (26) 355.
  - mangels, analyses, (26) 132.
  - mangels, production and use, (26) 132.
  - manufacture, (29) 833.
  - manufacture—
    - from corn, (28) 810.
    - from cornstalks, (28) 314; (31) 409.
    - from wood, (28) 571; (30) 711.
    - handbook, (27) 413; (38) 508.
    - in United Provinces, India, (40) 208.
    - sirup precipitate in, (36) 415.
    - technical accounting and chemical control in, (30) 14.
    - treatise, (26) 439; (29) 113, 312; (34) 508; (37) 114.
    - use of decolorizing carbons in, (39) 113.
  - maple—see also Maple sugar.
    - borer, notes, (26) 147.
    - distribution and management, (28) 344.
    - leaves, plant food constituents, (37) 629.
    - sap, composition, (34) 428.
    - volume tables, frustum form factor, (37) 651.
    - wounds, larvae in, (29) 357.
  - massecuite—
    - and sirup, frothy fermentation, (40) 615.
    - purity tables, (40) 116.
    - treatment, (40) 510.
  - metabolism, rapidity of, (35) 764.
  - metabolism, studies, (39) 874.
  - methods of analysis, (27) 411; (32) 109; (33) 258 (35) 114; (36) 716; (38) 803.
  - minimum in nutrition, (40) 563.
  - occurrence of levan in, (28) 504.
  - of birds' eggs, investigations, (28) 65.
  - of different sorts in human nutrition, (31) 762.
  - other than sucrose, distribution in food materials, (39) 68.
- palm—
- culture and use, (32) 46.
  - East Indian, (40) 44.
  - sap, studies, (30) 16.
- pentose, in plants, (39) 224.
- plantations in Queensland, white labor for, (29) 896.
  - polarization, temperature corrections in, (26) 99.
  - powdered, grades of, (31) 164.
  - prices in India, (30) 896.
- production—
- and consumption, (28) 335.
  - chemistry of, (26) 115.
  - economic factors in, (30) 16.
  - handbook, (29) 233.
  - in South Africa, (38) 494.
  - in various countries, (36) 737.
  - 1918 program, (38) 836.
  - treatise, (39) 538.
- products—
- adulteration, (30) 258.
  - determination of solids in, (27) 497.
  - methods of analysis, (32) 109; (38) 315.
- purification, carbon filters for, (40) 511.
- raw, deterioration, (38) 805.
  - raw, from various countries, composition, (40) 208.
  - raw, raffinose in, (26) 115, 116.
  - raw, valuation, (39) 808.
- reducing—
- and nonreducing, in mangels, (29) 111.
  - destruction in cane products, (35) 716.
  - determination, (30) 315; (34) 13, 611; (35) 206, 416; (36) 614; (37) 13.
  - determination in cane products, (35) 616.
  - determination in presence of peptones, (29) 613.
  - determination in vinegar, (29) 798.
  - Fehling's test, (39) 14.
  - in beets, (32) 110; (36) 731.

     in rain and snow, (38) 416; (40) 19.  
     inorganic, rôle in nutrition, (40) 71.  
     loss from soils, (35) 813.  
     reduction in plant cells, (28) 428.  
 Sulphid solutions, alkaline, fungicidal value, (37) 47.  
 Sulphids—  
   effect on cement, (38) 691.  
   effect on metabolism and excretion, (26) 69.  
   insecticidal value, (34) 61; (35) 838.  
 Sulphion, volumetric estimation, (40) 409.  
 Sulphite—  
   cellulose liquors, utilization, (28) 222; (29) 129.  
   cellulose lye waste as cattle feed, (33) 70.  
   in wool, (28) 311.  
   liquor waste, utilization, (35) 14.  
 Sulphites—  
   determination, (37) 205.  
   effect on metabolism and excretion, (26) 69.  
   fertilizing value, (29) 521.  
 Sulphocyanic compounds, assimilation by mold fungi, (29) 29.  
 Sulphocyanid, in ammonium sulphate, (31) 422.  
 Sulphocyanogen, origin in milk, (26) 477.  
 Sulphone-phthalicins, preparation, (36) 111.  
 Sulphonphthalein series of indicators, (36) 711.  
 Sulphur—  
   action in soils, (23) 820.  
   analyses, (27) 441.  
   and phosphate composts, studies, (39) 118, 624, 821.  
   and potassium hydroxid, reaction between, (31) 409.  
   and sulphates, fertilizing value, (39) 729.  
   arsenical dusts, use against strawberry weevil, (37) 466.  
   as fertilizer for grapes, (30) 822.  
   as fertilizer for rice, (29) 232.  
   as soil disinfectant, (31) 621.  
   atomic—  
     analyses, (31) 142.  
     fungicidal value, (34) 146.  
     tests, (29) 146.  
   bacteria—  
     physiology, (28) 728.  
     physiology and distribution, (33) 23.  
     purple, physiology of, (31) 32.  
   compound, soluble, analyses, (34) 436.  
   compounds—  
     effect on metabolism and excretion, (26) 69.  
     fertilizing value, (34) 221.  
     injury to grapevines, (38) 853.  
     of soils, (32) 718.  
   conservation in soils, (38) 327.  
   content of Kentucky soils, (30) 20.  
   content of soils, (31) 720.  
   copper sulphate mixture, testing, (26) 854.  
   detection in inorganic and organic compounds, (26) 109.  
   determination, (26) 511; (31) 109.  
   determination—  
     as barium sulphate, (35) 613.  
     in lime-sulphur solutions, (36) 16.  
     plant material and soils, (37) 614.  
     plants, (29) 797; (31) 817.  
     rice, (29) 231; (31) 110.  
     soils, (28) 123.  
     urine, (33) 415; (35) 13.  
     wine, (35) 617.  
   of fineness, (31) 15.  
   dioxid—  
     determination, (37) 205; (38) 10.  
     determination in dried fruits, (32) 206.

## Sulphur—Continued.

- dioxid—continued.  
 effect on animals, (35) 133.  
 effect on plants, (35) 28, 133, 243, 636.  
 effect on vegetation, (34) 526.  
 effect on wine diseases, (35) 617.  
 effect on yeasts and bacteria in wine and juices, (35) 611.  
 fumes, disappearance from the air, (35) 133.  
 in atmosphere of Selby smoke zone, (34) 716.  
 injury to plants, (34) 745.  
 injury to trees, (31) 146.  
 insecticidal value, (38) 458.  
 leaf injury or loss due to, (35) 243.  
 sterilization of soils by, (32) 816.  
 use against insects, (36) 456.  
 dips, methods of analysis, (40) 208.  
 dust, fungicidal value, (34) 146; (39) 548.  
 dusting v. spraying with, (31) 449.  
 effect on—  
 alfalfa, (37) 33.  
*Aspergillus fumigatus*, (29) 30.  
 availability of mineral phosphates, (36) 26.  
 availability of rock phosphate, (39) 118.  
 bacterial activity of soils, (31) 125.  
 crops and soils, (38) 221.  
 fermentation of manure, (38) 19.  
 growth of red clover, (34) 625.  
 growth of sugar beets, (30) 834.  
 growth of tubercle bacilli, (29) 381.  
 hops, (29) 13.  
 nitrification in soils, (31) 818.  
 plant growth, (31) 623, 817; (34) 331, 726.  
 plants, (27) 27.  
 potato scab, (32) 750.  
 rock phosphate, (40) 128.  
 soil acidity, (31) 727.  
 soil bacteria, (30) 532.  
 soil fungi, (27) 728.  
 sugar beets, (34) 38.  
 wool production, (28) 872.  
 fertilizing action, (26) 819.  
 fertilizing value, (27) 128, 326, 422, 628, 629; (28) 726, 740, 815; (29) 25, 26, 215, 319, 521; (30) 138, 139, 435, 532, 627, 822, 834; (31) 31, 218, 220, 424, 442, 530, 623; (32) 724; (33) 841; (34) 540; (35) 529, 728; (38) 726; (39) 622, 749; (40) 128, 440.  
 finely ground, fungicidal value, (30) 840.  
 for grapes, (31) 442.  
 free, determination, (27) 206.  
 fumes, effect on plant growth, (33) 127.  
 fungicidal value, (33) 648.  
 fungicides, preparation and use, (35) 646; (36) 16.  
 fungicides, source and use, (36) 455.  
 importance in animal nutrition, (31) 663.  
 in Iowa soils, (34) 27.  
 metabolism of *Aspergillus niger*, (30) 727.  
 moor soils, destructive action, (36) 424.  
 plant nutrition, (31) 817.  
 soils and atmospheric precipitation, (30) 422.  
 soils, solubility, (39) 821.  
 insecticidal value, (27) 755; (39) 762.  
 international movement, (34) 426.  
 isolation from soils, (28) 418.  
 judging, (31) 15.  
 liberation from lime-sulphur, (31) 408.  
 linkages in proteins, (26) 306.  
 liver of, emulsion for, (37) 760.  
 liver of, purchase and use, (31) 846.  
 loss in drainage water, (35) 623.  
 loss in soils, (37) 119.  
 mechanism and fertilizing action, (27) 726.  
 metabolism in dogs, (38) 570.  
 metabolism of, (35) 863.  
 methods of analysis, (26) 315; (31) 806.  
 nutrition of plants, (40) 726.  
 oxidation by nitric acid, (27) 245.  
 oxidation in soils, (30) 222; (36) 821.  
 paste as spray for peaches, (36) 351.  
 paste, fungicidal value, (34) 146.  
 powdered, as fungicide, (38) 848.  
 powdered, for gooseberry mildew, (32) 645.  
 powders, testing, (26) 854.  
 production—  
 and use in 1913, (32) 425.  
 and use in 1913-1915, (35) 631.  
 in 1915-16, (37) 524.

## Sulphur—Continued.

- relation to—  
 nitrogen in metabolism, (26) 765.  
 soil fertility, (32) 724; (34) 27.  
 soils and crops, (35) 220; (36) 396.  
 removal from soil, (39) 517.  
 requirement of crops, (26) 726.  
 requirement of red clover, (40) 727.  
 soluble and atomic, fungicidal value, (37) 448.  
 soluble, as summer spray for apples, (33) 46, 47.  
 spray injury, prevention, (34) 154.  
 sprays—  
 fruit spotting from, (39) 856.  
 materials used in, (35) 342.  
 preparation and use, (40) 59.  
 sterilization of soils by, (32) 816.  
 thiosulphate, determination in lime-sulphur solutions, (36) 318.  
 transformation in soils, (33) 815.  
 trioxid of feeding stuffs, digestibility, (40) 770.  
 use against oak mildew, (31) 845.  
 use against potato scab, (29) 646; (30) 139; (32) 146; (33) 246; (36) 848; (39) 755.  
 Sulphured—  
 food products, arsenic in, (39) 206.  
 grain, detection, (28) 807.  
 Sulphuric acid—  
 assay, (28) 661.  
 content of snow and rain, (40) 314.  
 creamery-waste, acid phosphate from, (40), 16.  
 destruction of stumps by, (28) 485; (31) 92.  
 destruction of weeds by, (31) 532; (36) 236.  
 detecting arsenic in, (39) 113.  
 determination, (26) 205; (32) 714.  
 determination in—  
 foods, (29) 809.  
 presence of alkali metals, (26) 109.  
 presence of phosphates, (40) 13.  
 soils, (27) 805.  
 displacement by water in leaves, (29) 219.  
 effect on—  
 bread fermentation, (27) 268.  
 germination of *lespedeza* seed, (35) 441.  
 germination of seeds, (27) 132, 524; (29) 628, 740.  
 plants, (30) 130; (37) 224.  
 rice production, (39) 537.  
 soil organisms, (38) 420.  
 sprouting of potatoes, (32) 829.  
 wheat, (31) 34.  
 fertilizing value, (29) 25; (30) 441.  
 forcing plants with, (28) 837.  
 hydrometer readings, (27) 328.  
 industry, (36) 124.  
 industry—  
 in Great Britain, (40) 816.  
 in United States, (29) 517.  
 notes, (31) 323; (39) 222, 522, 724.  
 larval value, (37) 665.  
 manufacture, (34) 9; (38) 423; (40) 815.  
 manufacture in United States, (27) 22.  
 production and use in 1911, (29) 213.  
 solution, effect on potatoes, (27) 748.  
 titration, (36) 805.  
 use against weeds, (30) 441; (33) 139.  
 in irrigation water, (29) 330.  
 in soil disinfection, (33) 250.  
 on alkali soils, (25) 814.  
 on rice fields, (36) 332.  
 volatility in vacuum drying, (30) 505.  
 waste, utilization, (29) 418.  
 Sulphuric anhydrid, loss on incinerating organic substances, (33) 611.  
 Sulphuring—  
 effect on hops, (33) 709.  
 machines, tests, (29) 347.  
 Sulphurous—  
 acid—  
 action on rock phosphate, (34) 220.  
 as food preservative, (30) 364.  
 effect on pollen, (27) 635.  
 effect on white wines, (29) 264.  
 fertilizing value, (29) 25.  
 free, determination, (33) 611.  
 in candies, (27) 868.  
 in wine making, (28) 209; (32) 208; (34) 207; (36) 801.  
 physiological action, (29) 269.  
 preparation, (37) 205.  
 titration, (32) 116.

- Sulphurous**—Continued.  
 anhydrid, toxicity toward olive blooms, (33) 447.
- Sultanas**, drying, (37) 114.
- Sumac**—  
 as source of tannin, (37) 548.  
 destruction, (26) 334.  
 Indian, notes, (35) 317.  
 industry in America, (39) 752.  
 poison, pollen of, (31) 280.  
 smooth, notes, (30) 145.
- Summer**—  
 grass, analyses, (27) 68.  
 sore in horses, notes, (26) 482.  
 sores, etiology and treatment, (40) 586.
- Summers**—  
 American, classification, (34) 118.  
 classification, (32) 810.  
 warm and cold, (40) 716.
- Sun**—  
 as for producer, (29) 721.  
 Brester's theory, (38) 511.  
 power plant in Egypt, (31) 688.  
 power plant, notes, (30) 890.  
 power plants, steam engines for, (29) 787.  
 spot frequencies, (34) 117.  
 spot numbers, Wolf-Wolfer system, (29) 721.
- spots**—  
 effect on tree growth, (38) 415.  
 magnetic storms, and rainfall, (38) 811.  
 periodicity, (38) 812.  
 relation to climate, (28) 211; (38) 114; (40) 416.  
 relation to weather, (27) 718; (37) 619.  
 temperature and radiation of, (36) 419.
- Sundri timber**, notes, (34) 240.
- Sunflower**—  
 artichoke grafts, studies, (39) 645.  
 cake, analyses, (26) 165, 369.  
 cake, digestibility, (28) 464.  
 fly, notes, (40) 169.  
 pith and stems, utilization, (38) 207.  
 seed, amino acid in, (33) 665.  
 seed, analyses, (31) 834.  
 seed cake—  
 acidity, (32) 259; (35) 770.  
 analyses, (29) 467; (30) 267, 268; (31) 467; (33) 170.  
 effect on milk and butter, (34) 570.  
 effect on milk production and quality, (26) 476.  
 for cows, (29) 577.
- seed**—  
 distribution of nitrogen in, (36) 269.  
 meal, analyses, (30) 268; (31) 864; (33) 870.  
 oil, analyses, (36) 803.  
 oil, detection, (29) 613.  
 Swedish, studies, (40) 533.
- seeds**—  
 betains in, (27) 203.  
 formation of oil in, (32) 427.  
 precipitating serum from protein of, (28) 801.
- silage**—  
 analyses and use, (40) 470.  
 for cows, (39) 182.  
 notes, (37) 230.  
 studies, (40) 331.
- stems**, utilization, (40) 242.
- Sunflowers**—  
 analyses, (27) 68.  
 as affected by lithium salts, (28) 526.  
 forage crop, (40) 242.  
 silage crop, (38) 74; (40) 332, 431.  
 soiling and silage crop, (40) 429.  
 source of potash, (38) 207.
- culture**, (31) 834.  
**culture**—  
 and use, (27) 68.  
 experiments, (35) 228; (37) 332, 730; (39) 437, 835; (40) 230.  
 for chicken feed, (38) 827.  
 for oil, (28) 434.  
 for seed, (37) 230.  
 on moorland, (30) 229.  
 under dry farming, (30) 435.
- elongation of hypocotyl, (28) 39, 739.  
 fertilizer experiments, (26) 129; (36) 626.  
 for dairy cows, (38) 369.  
 forcing with radium, (28) 825.
- Sunflowers**—Continued.  
 forms of, (30) 140.  
 germination as affected by depth of planting, (36) 438.  
 germination studies, (28) 225.  
 glucosid in, (32) 713.  
 growth in, (33) 28.  
 growth on calcareous soils, (31) 816.  
 hybrid, (40) 728.  
 insects affecting, (31) 548; (34) 450.  
 marking factors in, (34) 341.  
 phyllotaxy of, (28) 739.  
 pollination by bees, (32) 556.  
 red, notes, (26) 840.  
 resistance to cold, (39) 525.  
 root systems of, (31) 515.  
 Russian, as silage crop, (39) 134.  
 Russian, breeding experiments, (27) 741.  
 sclerotinia diseases, (40) 49.  
 specific and varietal characters in, (34) 237.  
 studies, (32) 831.  
 variations in, (37) 543.  
 varieties, (27) 736; (31) 829; (33) 527; (37) 339.  
 varieties resistant to *Orobanche cumana*, (29) 851.  
 water requirement, (32) 127; (35) 823.  
 yields of stover, (40) 731.
- Sunlight**—  
 actinic power, (29) 212.  
 and moonlight, relation, (38) 811.  
 effect on—  
 color of apples, (28) 145.  
 composition of leaves, (35) 333.  
 composition of wheat, (29) 834.  
 flower color, (34) 237.  
 germination of seeds, (28) 327.  
 osmotic pressure of leaves, (27) 631.  
 plant acids, (30) 431.  
 plant assimilation, (29) 26.  
 formation of nitrites by, in aqueous solution, (40) 425.  
 measuring with photometer, (39) 524.  
 photochemical effects from, (29) 218.  
 relation to respiratory activity, (34) 30.  
 synthesis by, (30) 129.
- Sunrise and temperature minimum**, difference in time, (40) 314.
- Sun's**—  
 atmosphere, convection in, (35) 419.  
 rays, absorption and utilization of energy from by animals, (31) 661.  
 rays, distribution in forests, (30) 45.
- Sunshine**—  
 effect on protein content of wheat, (30) 836.  
 intensity, method for approximating, (38) 629.  
 measurement, (33) 717.  
 recorders, comparison, (38) 210.
- Superior Council of Agronomic Stations and Laboratories in France**, (40) 99.
- Superphosphate**—  
 addition to barnyard manure, (33) 829.  
 analyses, (28) 627; (39) 222.  
 as affected by—  
 ammonium sulphate, (28) 818.  
 calcium carbonate, (26) 428; (35) 816; (36) 325.  
 calcium cyanamid, (30) 26; (33) 25.  
 crumbing, (30) 722.  
 gaseous ammonia, (35) 519.  
 ground oyster shells, (36) 821.  
 liming, (39) 119.
- as preservative for liquid manure, (31) 422.  
 as winter spray for fruits, (30) 641.  
 double, fertilizing value, (34) 35.  
 double, preparation, (29) 319; (33) 220.  
 drilling v. broadcasting, (31) 123.  
 effect on—  
 asparagus roots, (28) 236.  
 availability of soil potash, (32) 126.  
 carnations, (36) 446.  
 composition of cereals, (37) 827.  
 composition of grasses, (32) 665.  
 composition of prairie grass, (31) 864.  
 composition of turnips, (26) 527; (29) 41.  
 decomposition of green manure, (31) 7 8 4  
 decomposition of soy bean fodder, (40) 21  
 fermentation of manure, (38) 19.  
 germination of seeds, (29) 328; (31) 729.  
 germination of wheat, (27) 840.  
 H-ion concentration in soils, (39) 425.

Superphosphate—Continued.  
effect on—continued.

- maturity of cotton, (31) 39, 136.
- nitrification in soils, (28) 218.
- nitrogen content of soils, (36) 324; (38) 213.
- quality of sugar beets, (28) 44.
- quality of sweet potatoes, (31) 437.
- resistance of grain to hail, (30) 519.
- root system of beets, (35) 23.
- soil acidity, (35) 22; (37) 23; (38) 620.
- soil bases, (37) 126.
- sulfofying power of soils, (37) 119.
- the eye, (31) 29.
- tobacco (33) 733.
- enriched, from precipitated phosphate, (34) 330.
- fertilizing value, (26) 133, 230, 329, 330, 426, 536, 537, 538, 622, 630, 635, 639, 817, 833, 838; (27) 32, 137, 234, 325, 337, 338, 429, 434, 530, 535, 638, 736, 832, 834; (28) 431, 721, 737, 816; (29) 31, 137, 228, 319, 330, 335, 336, 418, 519, 624, 632, 635, 737, 829, 831; (30) 25, 126, 230, 437, 530, 636, 820, 821, 829, 835, 839; (31) 37, 40, 139, 530, 630, 738, 820, 823, 829; (32) 323, 518, 629, 831; (33) 519, 722, 723, 828, 834; (34) 22, 25, 330, 518, 519; (35) 22, 220, 428, 532, 535, 536, 629, 724; (36) 23, 230, 332, 425, 437, 626, 735, 738, 820, 821, 829, 833; (37) 29, 214, 228, 426, 449, 521, 534, 535, 540, 729, 731, 743, 823, 831; (38) 131, 230, 233, 325, 326, 519, 534, 619, 625, 634, 817, 825; (39) 22, 25, 32, 116, 127, 217, 220, 227, 242, 327, 335, 421, 427, 434, 435, 436, 446, 528, 529, 530, 537, 540, 623, 625, 737, 745, 818, 843; (40) 218, 242, 332, 429, 439, 515, 633, 723, 733, 828.
- for acid soils, (39) 115, 326.
- asparagus, (28) 339.
- carnations and roses, (29) 840.
- corn, (32) 732.
- cranberries, (34) 150.
- grass lands, (29) 530; (33) 527.
- Missouri soils, (33) 212, 213, 214, 215.
- moor soils, (39) 438.
- orchards, (36) 41.
- pastures, (36) 735.
- peaty pastures, (36) 425, 740.
- sweet potatoes, (33) 337.
- wheat in New South Wales, (35) 219.
- wheat in semiarid conditions, (34) 519.
- from phosphorites, (36) 122, 727.
- in mixed fertilizers, (32) 527.
- industry—
  - in Austria-Hungary, (33) 822.
  - in Great Britain, (39) 523.
  - in Russia, (26) 693.
- loss from soils, (29) 211.
- manufacture, (29) 418; (31) 725; (32) 323; (33) 126; (34) 329, 724.
- manufacture from Russian phosphorites, (27) 627.
- manufacture in Southern States, (27) 22.
- mixing with—
  - basic slag and rock phosphates, (37) 816.
  - calcium cyanamid, (29) 24; (31) 822.
  - calcium nitrate, (29) 214.
  - limestone, (34) 26.
  - niter-cake, (40) 221, 515.
- of ammonia, new fertilizer, (40) 127.
- ammonia, use on calcareous soils, (32) 622.
- lime, analyses, (33) 723.
- lime, effect on marsh plants, (29) 531.
- in DeKalb soils, (39) 22.
- preparation, (37) 322; (40) 725, 801.
- preparation with—
  - creamery waste sulphuric acid, (40) 16.
  - sulphur dioxide and chlorine, (27) 521.
- prepared with synthetic nitric acid, fertilizing value, (33) 25.
- production—
  - and use in 1911, (29) 213.
  - in 1917, (39) 824.
  - on the farm, (39) 118.
- rational use, (28) 124.
- residual effects, (26) 428; (37) 23.
- reversion, (38) 122; (39) 521.
- secondary and subsidiary effects, (30) 26.
- solubility in mineral and organic acids, (38) 423.
- technology and chemistry of, (36) 726.
- use against tobacco root rot, (36) 32.
- in Hungary, (30) 222.
- in war time, (38) 723.
- on pastures, (26) 437.

## Superphosphate—Continued.

- use on peat soils, (37) 135; (38) 132, 433.
- on red soils, (32) 723.
- utilization by oats and lupines, (31) 733.
- utilization in different soils, (30) 221.
- v. rock phosphate, (35) 520.
- v. rock phosphate for cotton and corn, (33) 32.
- valuation, (26) 311.
- vinasse as a fertilizer, (31) 125.
- Supple jack as lignum vitae substitute, (40) 640.
- Suppurative lesions in horses and calves, (34) 186.
- Suprarenal—
  - bodies, cholesterol content during muscular work, (31) 465.
  - glands—
    - action in sex determination, (26) 773.
    - effect on antitoxins, (30) 479.
    - effect on growth, (28) 571.
    - of domestic animals, anatomy and histology, (28) 778.
- Suprarenin, use against milk fever, (26) 580.
- Suptol-burow, use against swine plague, (26) 88; (28) 682; (30) 586.
- Surface area and gaseous exchange, relation, (31) 562.
- Surface caterpillar, notes, (32) 58.
- Surgery—
  - experimental, studies, (31) 277.
  - papers on, (29) 676.
  - veterinary, handbook, (27) 377.
- Surra—
  - immunity to, (29) 379.

 relation of breed and age to prolificacy, (40) 770.  
 salt poison in, (40) 684.  
 vaccination, after-effects, (39) 392.
- Swiss chard—  
 as forage crop, (28) 267; (31) 137.  
 for dairy cows, (31) 771.
- Sword beans—  
 as cover crop, (31) 635.  
 culture experiments, (27) 233, 841.  
 culture in Porto Rico, (29) 631.  
 description, (30) 828.  
 notes, (28) 838.
- Sycamore—  
 blight, notes, (34) 56.  
 cocoon, notes, (30) 53.  
 lace-bug, studies, (38) 359.  
 maple, forcing experiments, (28) 435.
- Sycamores, wood structure, (39) 50.
- Sycophaga nota n.sp., description, (30) 55.
- Sycoryctes philippinensis n.sp., description, (30) 55.
- Sylepta derogata, notes, (28) 654.
- Sylepta sp., notes, (30) 752.
- Sylvanus, *see* Silvanus.
- Sylvilagus nuttalli, host of spotted fever tick, (26) 64.
- Sylvin, effect on coherence of soils, (31) 123.
- Symbiosis—  
 and parasitism, differentiation, (28) 35.  
 bacterial, in Rubiaceae, (32) 327.  
 in autumnal leaves, (37) 327.  
 review of literature, (28) 130.
- Symbiotes—  
 action on constituents of fat, (40) 464.  
 and vitamins, similarity, (40) 363.  
 as agents of ketonization, (40) 464.
- Symbombycina, origin, (32) 850.
- Symoothis oxyacanthella, hymenopterous parasite of, (26) 658.
- Sympha agromyzae n.sp., description, (30) 855.
- Sympherta mnemonicae n.sp., description, (32) 852.
- Symphoromyia attacking man, (34) 554.
- Symphytium—  
 asperrium, culture and composition, (32) 631.  
 officinale, cell proliferant of, (26) 580.
- Sympiesis—  
 agromyzae n.sp., description, (31) 355.  
 ancyloae n.sp., description, (38) 661.  
 felti n.sp., description, (26) 353.  
 n.sp., descriptions, (30) 661.  
 sericeicornis, studies, (28) 560.  
 stigmatipennis, notes, (36) 655.
- Sympiesomorphellus bicoloriceps n.sp., description, (36) 259.
- Symptomatic anthrax, *see* Blackleg.
- Symyobius—  
 albasiphus n.sp., description, (31) 754.  
 americanus n.sp., description, (40) 262.
- Synaldis incisus n.sp., description, (27) 60.
- Synanthedon—*see also* Aegeria and Sesia.  
 pictipes, life history, (32) 349.  
 pictipes, notes, (36) 549.  
 pictipes, studies, (37) 159.  
 (Sesia) geliformis, notes, (38) 762.
- Synearpia laurifolia, strength and elasticity tests, (27) 43.
- Synchytrium—  
 endobioticum—  
   host plants, (37) 753.  
   notes, (28) 243; (30) 845; (31) 149; (32) 342;  
   (33) 846, 849, 850; (40) 847.  
   studies, (27) 351; (34) 844.  
 solani, notes, (30) 47.  
 spp., studies, (28) 844.  
 transfer of Chrysophlyctis to, (26) 547.
- Syneta albida, notes, (32) 651; (35) 364; (36) 58.
- Syngamus—  
 bronchialis, notes, (39) 892.  
 laryngus from cattle in Philippines, (33) 284.
- Synoptic charts, daily, of the northern Hemisphere, (31) 213.
- Synovitis of coronary joint, treatment, (30) 185.
- Synoxylon basilare—  
 on pecan, (39) 557.  
 studies, (31) 852.
- Syntexis libocedrii n.g. and n.sp., description, (34) 364.
- Synthetocaulus spp., notes, (30) 285.
- Syntomaspis—  
 amelanchieris n.sp., description, (40) 656.  
 druparum, *see* Apple seed chalcid.  
 myrtacearum n.sp., description, (37) 59.
- Syphaerophoria cylindrica, notes, (28) 254.
- Syphilis—  
 diagnosis, (35) 180.  
 in rabbits, treatment, (31) 284.  
 rôle of specific fats in complement fixation, (39) 80.
- Syphilitic serum, toxicity toward guinea pigs, (35) 180.
- Syrirta pipiens, notes, (36) 460.
- Syrphid—  
 fly, breeding and colonizing, (31) 756.  
 fly, economic importance, (40) 356.  
 larvae, myiasis due to, (39) 287.
- Syrphidae—  
 defertilization of flowers by, (39) 734.  
 early spring, in California, (38) 863.  
 in California, (36) 56.  
 life histories, (26) 349; (28) 254.  
 notes, (36) 255, 553.  
 of District of Columbia, (37) 57.  
 of Maine, (36) 460; (38) 302.  
 of Ohio, (30) 552.
- Syrphophagus mesograptae, notes, (31) 758.
- Syrphus—  
 americanus, destructive to citrus plant lice, (26) 755.  
 americanus, life history, (28) 254.  
 fly, corn-feeding, life history, (34) 358.  
 fly, predacious on froghopper nymphs, (30) 457.  
 knabi, life history, (38) 362.  
 oronoensis n.sp., life history, (38) 362.  
 spp. parasitic on rose aphid, (31) 250.  
 xanthostoma, life history, (29) 456.
- Syssphingina, origin, (32) 850.
- Systates irregularis, notes, (29) 853.
- Systellogaster ovivora n.g. and n.sp., description, (38) 165.
- Systema—  
 basalis, notes, (37) 256.  
 spp., notes, (29) 761.  
 taeniata, notes, (35) 54.
- Tabanidae—  
 greenish blood of, (29) 54.  
 larvae, rearing, (38) 60.  
 of Australia and Tasmania, (26) 456.  
 British Columbia, (32) 551.  
 District of Columbia, (40) 757.  
 Saskatchewan, (39) 661.  
 oriental species, revision, (27) 359.
- Tabanus—*see also* Gaddy.  
 americanus, notes, (40) 263.  
 collecting larvae, (40) 757.  
 ignotus injurious to rice, (33) 555.  
 mexicanus, notes, (36) 553.  
 parasitic flagellates of, (26) 84.  
 relation to swamp fever, (39) 162.  
 spp. as anthrax carriers, (39) 161.  
 striatus, biology, (30) 253.  
 striatus, relation to anthrax, (30) 780; (31) 776.  
 striatus, relation to surra, (30) 253; (31) 777.
- Tabebuia spectabilis, notes, (40) 44.
- Table d'hôte meals, economy, (39) 67.
- Table furnishings, origin and development, (31) 856.
- Tabosa grass—  
 digestibility, (31) 863.  
 hay, mineral constituents, digestibility, (40) 769.
- Tachardia lacea—  
 culture in India, (28) 654.  
 notes, (26) 248.  
 studies, (35) 463, 659.
- Tachina—  
 robusta, notes, (31) 752.  
 spp., parasitic in arthropods, (39) 658, 659.  
 spp., parasitic on gipsy moth, (31) 652.
- Tachinid—  
 flies, studies, (26) 860.  
 parasite with intracuticular stage, (33) 157.  
 species, nonintentional dispersal by man, (35) 259.
- Tachinidae—  
 Canadian hosts, (29) 358.  
 new, from North America, (36) 255.

- Tachinidae—Continued.  
 new nocturnal species, (34) 360.  
 new species from New England, (35) 259.  
 of New England, (37) 763.  
 of North America, notes, (27) 457; (40) 653.  
 of Quebec, (32) 757.
- Tachinophyto (*Hypostena*) sp., parasitic on sugar cane borer, (34) 753.
- Taenia—  
*crassicolis* affecting rats, (29) 755.  
*echinococcus* in sheep liver, (39) 283.  
 expansa, infestation of lambs by, (37) 374.  
 expansa, life cycle, (39) 162.  
*hydatigena*, notes, (28) 681.  
*krabbel* affecting reindeer, (27) 182.  
*marginata* in liver of swine, (37) 477.  
*ovis*, notes, (29) 887.  
*pisiformis*, development in kittens, (37) 693.  
*pisiformis* in cats, (40) 685.  
*saginata*—  
 in a child, (33) 864.  
 studies, (29) 782.  
 transmission by flies, (38) 563.  
 spp., dissemination by flies, (30) 659.  
*struthionis*, notes, (26) 487.
- Taeniasis, human, relation to measles of domestic animals, (32) 271.
- Taeniocampa alia, notes, (28) 156.
- Taenioid cestodes of the dog, cat, and related carnivores, (37) 82.
- Taeniolysins, presence in immune serums, (28) 375.
- Taeniopteryx spp., studies, (39) 256.
- Taeniotetes scalaris, notes, (30) 454.
- Taeniothrips—  
*inconsequens*, remedies, (33) 259.  
*inconsequens*, studies, (40) 547.  
 pyri, *see* Pear thrips.
- Tagetes spp., cut, preservation, (31) 837.
- Tagua palm, description and utilization, (30) 46.
- Takadiastase—  
 action on digestive power of animals, (33) 569.  
 cleavage of organic acids by, (30) 503.  
 notes, (29) 609.  
 proteolytic activity, (30) 203.
- Taka-koji, preparation and use, (32) 710.
- Takosis in goats, (37) 477.
- Talahib, notes, (26) 362.
- Talc, relation to polyneuritis gallinarum, (29) 865.
- Talc, use in confectionery, (33) 364.
- Taliparamba Agricultural Station, report, (37) 343.
- Tallow—  
 prices of in India, (30) 896.  
 production in United States, (40) 614.  
 wastes, fertilizing value, (29) 129.
- Tallows, plant, of East Indies, (32) 201.
- Talpa europea, feeding habits, (31) 846.
- Talus slopes, effect on conservation of snow, (29) 814.
- Tamales, preparation, (27) 665.
- Tamarack—  
 for fence posts, (40) 744.  
 unit stresses for, (36) 91.
- Tamari-koji, fungi and composition of, (29) 161.
- Tamarind sirup, manufacture and analyses, (33) 805.
- Tamarindillo, culture, (34) 736.
- Tamarinds, analyses and use, (30) 363.
- Tamarisks, notes, (27) 528.
- Tamarix—  
 spp., notes, (27) 528.  
*usneoides*, analyses and digestibility, (27) 872; (32) 167.
- Tan bark—  
 ashes, analyses, (38) 626.  
 reducing harshness of, (35) 317.
- Tan extracts from mangrove, (40) 47.
- Tan plants of Iowa, (29) 626.
- Tanagers, development of stomach in, (32) 265.
- Tanaomastix n.g., and n.sp., description, (40) 359.
- Tangelos—  
 descriptions and value in Florida, (40) 247.  
 paper on, (29) 839.
- Tangerine—  
 mildew, notes, (34) 649.  
 powdery mildew in southern California, (34) 447.
- Tangier pea, culture experiments, (28) 532.
- Tania—*see also* Tannia.  
 meal, analyses, (40) 173.  
 varieties, (26) 733; (27) 233.
- Tankage—*see also* Garbage, tankage.  
 amino acid in, (33) 665.  
 analyses, (26) 325, 468; (27) 68; (28) 265, 464, 572, 627, 769; (29) 270, 367, 626; (30) 68, 169, 565; (31) 73, 168, 624, 663; (32) 169, 465, 667; (33) 371, 568, 665; (34) 263, 371, 467, 566; (35) 562, 867; (36) 65, 268, 667, 765; (37) 268, 471, 767; (38) 67, 368, 369; (39) 70, 270, 370; (40) 72, 571.  
 as fertilizer, (31) 323.  
 as fertilizer, analyses, (39) 222.  
 ash analyses, (29) 861.  
 availability of nitrogen in, (26) 124; (27) 723; (28) 724; (35) 426.  
 blood, analyses, (34) 371. \*  
 decomposition in soils, (36) 116.  
 digester, analyses, (40) 665.  
 distribution of nitrogen in, (36) 269.  
 effect on composition of wheat, (38) 518.  
 feeding value, (39) 275, 375, 478, 776, 779; (40) 72, 75, 278, 279.  
 fertilizer v. selected, for pigs, (29) 872.  
 fertilizing value, (28) 724, 725; (30) 436; (31) 124; (33) 432; (34) 129; (36) 818; (37) 540; (38) 422, 517; (39) 327, 328, 623.  
 for arid soils, (36) 726.  
 for corn-fed pigs, (38) 474.  
 for pigs, (38) 675.  
 high-grade, fertilizing value, (34) 219.  
 nitrification—  
 in acid soils, (30) 626.  
 in soils, (26) 722; (39) 814.  
 production and use, (27) 327; (29) 517; (30) 126.  
 vegetable, analyses, (39) 270.
- Tanks, construction, (30) 893.
- Tannase—  
 enzym, formation, (27) 408; (30) 411.  
 formation in *Aspergillus niger* and *Penicillium* spp., (29) 132.
- Tannery—  
 effluent, disinfection, (36) 184.  
 sewage, disinfection, (38) 780.  
 waste, analyses and use, (32) 424.  
 waste, disposal, (32) 790.  
 wastes, fertilizing value, (27) 219; (29) 129.
- Tannias—  
 culture and use, (40) 763.  
 varieties, (36) 735; (38) 335.  
 variety tests, (40) 522.
- Tannic acid—  
 as protection for oak wood, (27) 654.  
 determination in tanning materials, (34) 508.  
 effect on—  
 action of alcohol on plant cells, (34) 333.  
 fungi, (28) 444.  
 secretion of diastase by fungi, (31) 13.  
 fermentation, notes, (26) 203; (30) 410, 411.  
 relation to dry rot resistance to oak wood, (32) 150.
- Tannin—  
 content of trees, notes, (27) 828.  
 determination, (35) 317.  
 determination in cider, (32) 207.  
 determination in plant juices, (33) 310.  
 determination with casein, (26) 202.  
 distribution in black wattle, (33) 523.  
 distribution in plants, (28) 227.  
 effect on chestnut blight fungus, (36) 149.  
 effect on soils, (36) 513.  
 extract, mangrove, manufacture, (27) 210.  
 extracts, preparation, (28) 146.  
 extracts, production from wood, (28) 50.  
 formation, relation to mitochondria, (29) 827.  
 humification, (38) 26, 27.  
 in acorns, notes, (28) 528.  
 assimilating organs of Leguminosae, (30) 227.  
 barley seed coats, (27) 730.  
 oak heartwood, (34) 849.  
 Pacific coast trees, (34) 508; (38) 309.  
 persimmons, studies, (27) 228; (30) 502.  
 methods of analysis, (32) 314.  
 physiological significance, (38) 729.  
 plants, treatise, (36) 142.  
 presence and significance in plants, (34) 825.  
 relation to coloration of flowers, (28) 227.  
 substances in Malabar tea, (31) 114.  
 synthetic, notes, (30) 16.  
 use in preparation of tea, (31) 114.  
 utilization by plants, (36) 329.

- Tanning**—  
 chemical handbook, (33) 18.  
 extracts, preparation, (30) 615.  
 materials—  
   from Latin America, (38) 248.  
   in Belgian Kongo, survey, (39) 207.  
   methods of analysis, (32) 314; (40) 714.  
   of Dutch East Indies, (30) 697.  
   sampling, (35) 316.  
 plants of Chile, (38) 336.  
 substances, vegetable, methods of analysis, (30) 813.
- Tannins**—  
 effect on germination of seeds, (33) 825.  
 methods of analysis, (29) 408.  
 monograph, (30) 311.  
 preparation, (29) 408.  
 qualitative analysis, (26) 809.  
 vegetable, qualitative reactions, (26) 808.
- Tans of New Zealand**, (38) 309.
- Tanymecus palliatus**, notes, (31) 655.
- Tanypezidae in United States**, (35) 759.
- Tapeworm**—  
 beef, in a child, (33) 864.  
 beef, studies, (29) 782.  
 bothriocephalid, from the dog, (39) 791.  
 cysts in mutton, (29) 886.  
 in liver of swine, (37) 477.  
 new, from dogs, (36) 354.  
 tri-radiate form in a horse, (36) 183.
- Tapeworms**—  
 biological detection, (31) 281.  
 dissemination by flies, (30) 659.  
 host relations, (33) 681.  
 in fowls, (33) 775; (35) 577.  
   fowls, transmission, (36) 183.  
   horses, (40) 186.  
   pigs, relation to rabbits, (29) 482.  
   sheep, (31) 86; (39) 773.  
   sheep, morphology of, (30) 584.  
   sheep, treatment, (27) 683.  
   water fowl, (29) 784.  
 of Carnivorae in man, (33) 681.  
 protection against digestive enzymes, (33) 478.  
 proteocephalid, monograph, (32) 853.  
 treatment, (28) 80.
- Taphrina**—  
 aurea, notes, (26) 852.  
 bussei, notes, (26) 851.  
 communis, treatment, (40) 449.  
 sp., notes, (26) 747; (28) 241, 747.  
 spp. on plum, (40) 452.
- Tapinostola muscolosa**—  
 life history and remedies, (33) 859.  
 notes, (30) 855; (32) 847.
- Taploca**—  
 diseases, notes, (28) 148.  
 examination, (29) 361.  
 flour, use in baking, (34) 365.  
 starch, baking tests, (34) 460.  
 water content as affected by cooking, (26) 462.
- Tar**—  
 effect on penetration of creosote, (39) 394.  
 exposed to traffic and weathering, changes in, (27) 89.  
 for roads, (34) 684.  
 fumes, effect on vegetation, (35) 734; (37) 327.  
 oils, characteristics, (26) 206.  
 pads for cabbage plants, description, (31) 353.  
 pathological action on plants, (32) 826.  
 products, production from wood, (28) 50.  
 spraying machines, tests, (29) 687.  
 vapors, effect on vegetation, (30) 32.  
 water as soil disinfectant, (31) 621.
- Tarabagani crab**, composition, (40) 171.
- Tarache delecta**, studies, (40) 754.
- Tarall**, composition and nutritive value, (30) 62.
- Tarantula spider** attacking bees, (40) 359.
- Tarbagans**—  
 notes, (27) 454.  
 relation to plague, (26) 653.  
 susceptibility to pneumonic plague, (28) 180.
- Tarchonanthus camphoratus**, analyses and digestibility, (27) 871; (32) 167.
- Tares** as green manure for wheat, (35) 426.
- Targionia**—  
 sacchari, notes, (26) 60; (29) 53.  
 vitis, notes, (26) 655; (36) 755.
- Tarichium uvella**, notes, (36) 757.
- Tariff revision in Belgium**, (26) 93.
- Tarnished plant bug**—  
 biology, (40) 57.  
 egg parasite of, (31) 550.  
 false, as a pear pest, (30) 358.  
 false, notes, (29) 252, 354; (36) 550.  
 false, oviposition, (34) 255.  
 injurious to apples, (28) 453.  
 notes, (28) 159; (30) 655; (32) 849; (33) 352; (35) 253; (37) 255; (38) 57.  
 relation to fire blight, (30) 650; (33) 744.  
 relation to peach "stop-back," (28) 159; (29) 354.  
 remedies, (34) 356.  
 studies, (31) 650; (40) 455.
- Taro**—  
 as food, (36) 561.  
 blight, description and treatment, (31) 52.  
 fertilizer experiments, (26) 135; (29) 233.  
 Hawaiian, as food, (40) 557.  
 notes, (26) 362.  
 preservation and analyses, (39) 208.  
 recipes, (28) 660.  
 yield as affected by deep plowing, (35) 527.
- Tarragon rust**, notes, (28) 747.
- Tars**—  
 coke-oven, of United States, (26) 591.  
 effect on mold growth, (26) 206.  
 refined, as affected by naphthalene, (26) 188.  
 specifications and definitions, (35) 888.
- Tarsonemus**—  
 approximatus, notes, (28) 457.  
 pallidus, notes, (28) 554; (37) 766.  
 pallidus, remedies, (33) 58.  
 pallidus, studies, (37) 856, 857, 858.  
 sp. on Cyclamen, (37) 766.  
 spp., notes, (26) 760.  
 spirifex, description, (35) 468.  
 spirifex, notes, (32) 853.  
 translucens on tea, (40) 656.  
 waitei n.sp., description, (28) 357.  
 waitei n.sp., notes, (26) 760; (28) 159.
- Tartar emetic**, use in treatment of trypanosomiasis, (40) 781.
- Tartaric acid**—  
 action in the body, (36) 468.  
 as affected by yeast, (29) 504.  
 assimilation by plants, (31) 426.  
 behavior toward oxidizing agents, (26) 25.  
 decomposition by sunlight, (30) 431.  
 detection, (28) 23.  
 determination, (30) 612; (35) 417.  
 determination in—  
   fruits and their products, (26) 805.  
   grape products, (27) 499.  
   presence of citric acid, (36) 801.  
   presence of malic acid, (28) 24; (38) 805.  
   presence of metals, (29) 808.  
   wine, (29) 798; (31) 505.  
   wine and grape juice, (32) 297.  
 effect on—  
   bread fermentation, (27) 268.  
   carbon assimilation of plants, (27) 525.  
   fungi, (28) 444.  
   hemolytic reaction, (36) 878.  
   forcing plants with, (28) 837.  
   inversion and disappearance, (36) 801.  
   occurrence in honey, (28) 166.  
   of grape musts and wines, (37) 310.  
   optical rotation, (27) 497.  
   toxicity, (28) 661.
- Tartrate**—  
 action on isolated intestine, (37) 471.  
 nephritis, studies, (40) 285, 383.
- Tartrates**—  
 determination in baking powder, (40) 712  
 toxic action, (40) 465.
- Tartrazin**—  
 determination, (36) 714.  
 determination in mixture of dyes, (38) 12.  
 notes, (36) 300.
- "Tarwad" bark as tanning agent, (37) 147.
- Tätté**—  
 dietetic value, (29) 475.  
 notes, (27) 880.
- Taurin**, use against tuberculosis, (37) 275.
- Taxads of Japan**, (36) 539.
- Taxation**, land, notes, (29) 391.
- Taxonomic papers**, standards for, (26) 855.
- Taxonus nigrisoma** *see* *Ametastegia glabrata*.

## Taxus—

- baccata, culture experiments, (26) 141.
- cuspidata, food plant of purple scale, (26) 756.

## Tea—

- alkaloids in, (31) 358.
- analyses, (31) 358; (32) 856.
- analyses and valuation, (27) 612.
- aphis, notes, (37) 662.
- Arabian, culture in Egypt, (34) 232.
- aroma in, (26) 309.
- artificial coloration, (27) 809.
- black rot, studies, (38) 354.
- blister blight, notes, (28) 241.
- box industry in Assam, (29) 440.
- brown blight, notes, (38) 548.
- brown blight, treatment, (38) 354; (39) 752.
- chemistry and manufacture of, (33) 842.
- commercial, composition, (40) 14.
- cover crops for, (30) 444.
- culture—
  - and manufacture in United States, (26) 641.
  - and manufacture, treatise, (38) 347.
  - at Peradeniya experiment station, (31) 837.
  - handbook, (39) 449.
  - in Ceylon and British India, (28) 542.
  - India, (32) 131.
  - Natal, (28) 341.
  - Nyasaland, (26) 829.
  - Persia and Trans-Caucasian Russia, (33) 841.
  - Sumatra, (35) 449.
  - various countries, (39) 244.
- detection of color in, (30) 207.
- diseases—
  - and pests, control, (33) 643.
  - and pests in Sumatra, (39) 57.
  - control, (40) 349.
  - in India, (32) 346; (33) 650; (37) 252.
  - notes, (26) 51; (27) 747; (30) 48, 845, 849; (31) 55, 56; (32) 340; (33) 545; (34) 744, 835; (38) 351, 354; (39) 452, 753; (40) 48, 53, 851.
- effect on gastric secretion (26) 466.
- evaluation on stem content basis, (35) 266.
- examination, (32) 64.
- factors affecting quality, (35) 367.
- fermentation, investigations, (37) 44.
- fermenting, microorganisms in, (32) 111.
- fertilizer experiments, (30) 43; (32) 46; (34) 236. 835; (39) 647.
- from *Origanum vulgare albidiflorum*, (33) 661.
- fungus blights, notes, (39) 758.
- green manure crops for, (34) 344.
- green manuring experiments, (38) 20.
- heather, as substitute for black tea, (33) 866.
- imports into United States, (34) 43.
- improvement by selection, (37) 43.
- industry in Java and Sumatra, (36) 241.
- industry in Sumatra, (31) 639.
- industry in various countries, handbook, (30) 238.
- infusions, combination of caffeine and tannin in, (29) 463.
- infusions, studies, (29) 566.
- ingestion as protection against cold, (35) 474.
- ingestion, effect on uric acid excretion, (37) 470.
- insects affecting, (26) 553; (30) 753; (32) 340; (34) 549, 652, 835; (36) 355; (38) 461; (39) 556, 862; (40) 259.
- Java, caffeine in, (34) 166.
- leaves, analyses, (38) 626.
- looper caterpillar, notes, (26) 61.
- Malabar, tannin substances in, (31) 114.
- manufacture, (28) 360; (29) 118.
- manurial treatment, (33) 842.
- microorganisms in, (28) 512.
- mites, notes, (32) 557; (40) 656.
- mosquito, notes, (31) 850.
- notes, (29) 463.
- oil, detection, (29) 613.
- osmotic pressure, (28) 262.
- packing in foil containing lead, (33) 66.
- plant, new, description, (26) 139.
- preparation for market, (28) 542.
- prices of in India, (30) 896.
- pruning, (32) 236.
- pruning experiments, (39) 647.
- pruning wounds, treatment, (30) 43.
- red rust, notes, (31) 49; (34) 55, 249.
- rim blight, notes, (38) 355, 548.
- roots and their diseases, (37) 52.
- scale, notes, (28) 754.

## Tea—Continued.

- seed—
    - bug, notes, (29) 446; (30) 853.
    - gardens, care and management, (34) 835.
    - germination, (35) 745.
    - germination and selection, (37) 835.
    - oil of, (37) 109.
    - planting experiments, (33) 842.
    - tests, (30) 444, 742; (31) 339.
  - seedlings, liming experiments, (33) 842.
  - selection experiments, (35) 745.
  - shot-hole borer, notes, (40) 266, 453.
  - soils of Java and Sumatra, (38) 542; (39) 423.
  - spraying apparatus for, (38) 355.
  - statistics in United States, (33) 894.
  - thrips, notes, (40) 59.
  - tortrix, studies, (40) 453.
  - treatise, (29) 265; (36) 241.
  - use by prehistoric Americans, (38) 167.
  - value in the diet, (29) 664.
  - withering, fermentation, and drying, (37) 619.
- Teachers—
- agricultural instruction for, (26) 9, 198, 303, 595, 697, 898; (27) 296, 490; (29) 297; (30) 93; (31) 494, 498; (34) 697, 799.
  - agricultural training for, (28) 8, 691; (30) 98; (32) 897; (33) 596, 799.
  - correspondence courses for, (35) 592; (36) 96.
  - county training schools for in Wisconsin, (36) 690.
  - economic and social conditions of, (31) 462.
  - farm school in Victoria, (35) 92.
  - nature study training for, (29) 298; (34) 692.
  - of rural subjects, qualification, (29) 296.
  - preparation for—
    - nature study and civic biology, (32) 898.
    - rural work, (27) 897.
    - secondary agriculture, (33) 798; (35) 406.
  - relation to boys' corn club work, (26) 794.
  - rural—
    - preparation, (26) 596.
    - training courses for, (28) 897.
    - training in normal schools, (32) 690.
  - summer schools in Canada, (34) 597.
  - training, (35) 92.
  - training—
    - and certification in Indiana, (32) 595.
    - centers for, (33) 194, 195.
    - for agricultural extension, (26) 299; (36) 293.
    - for agricultural instruction, (36) 691.
    - for rural schools, (32) 794.
- Teak—
- annual ring formation in, (34) 839.
  - colonial, strength and elasticity tests, (27) 43.
  - forests in Burma, (26) 141.
  - forests in Java and Madagascara, (34) 239.
  - gummosis, notes, (27) 854.
  - rot bacteria affecting, (29) 345.
  - rotation period, (38) 545.
  - stands, rotation, (39) 648.
  - trees and stands, measuring, (34) 839.
  - wood, natural regenerated, growth, (39) 546.
  - wood, properties and utilization, (34) 440.
  - working plans in Burma, (34) 839.
- Teal, Laysan, new generic name for, (37) 758.
- Teals, reproductive organs of, (26) 876.
- Teasel—
- analyses, (28) 464.
  - aphis, notes, (29) 454.
  - culture, (30) 440; (31) 524.
  - description and culture, (29) 142.
- Teat strictures, treatment, (26) 183.
- Technical—
- education in Canada, (31) 596.
  - instruction in Ireland, (31) 898; (33) 790; (36) 596; (38) 598.
- Technology, chemical—
- of textile fibers, (32) 308.
  - treatise, (29) 413.
- Teclu burner, new, description, (35) 801.
- Tecoma radicans, notes, (27) 346.
- Teeth—
- as affected by diet, (35) 767.
  - degeneration in oxen and sheep, (33) 270.
- Teft—
- brown, culture in Porto Rico, (29) 631.
  - culture experiments, (33) 31.
- 'grass—
- culture experiments, (30) 632; (38) 33.
  - culture in Hawaii, (32) 730.
  - culture in Rhodesia, (27) 637.

- Teff**—Continued.  
 grass—continued.  
   culture under dry farming, (30) 435.  
   notes, (26) 361; (37) 29.  
   notes and analyses, (28) 738.  
   varieties, (30) 435.  
   hay, analyses, (32) 465; (34) 435; (38) 368.  
   history and culture, (34) 435.
- Tegrodera erosa**, notes, (33) 746.
- Telamona sp.**, notes, (26) 148.
- Telea polyphemus**, notes, (26) 656.
- Teleas (?)**, notes, (31) 650.
- Telegony in fowls**, (32) 263.
- Telegraph poles**, dry rot of, (33) 745.
- Telegraphy**, wireless, use in meteorology, (32) 117.
- Telenomus**—  
 clisiocampae, notes, (36) 556.  
 coloradensis, parasitic on tent caterpillar, (37) 667.  
 dilophonotae, notes, (28) 355.  
 n.spp., descriptions, (26) 352; (32) 348.  
 quaintancel, notes, (26) 857; (30) 659.  
 sp., parasitic on army worms, (36) 60.  
 sp., rearing and shipping, (29) 658.  
 spp., notes, (31) 256.  
 sphingis, notes, (29) 658.  
 vassilievi, transportation experiments, (31) 59.
- Telephone**—  
 companies—  
   cooperative, in Minnesota, (32) 688.  
   mutual, in Wisconsin, (28) 593, 895.  
 construction and maintenance in National Forests, (34) 191.  
 systems, rural, in Germany, (31) 592.
- Telephorus lituratus**, studies, (36) 858.
- Telfaria pedata**, oil content, (31) 234.
- Tellurium**, effect on plants and plant parasites, (31) 826.
- Temir experiment field**, report, (26) 620.
- Temnostoma bombylans**, notes, (31) 352.
- Temperature**—*see also* Climate and Soil temperature.
- American, effect on European rainfall, (31) 416.  
 and growing season in Illinois, (39) 319.  
 annual, of United States, (28) 212.  
 as affected by forests, (29) 842.  
 as affected by smoke, (32) 117.  
 at Aas, Norway, (36) 617.  
 at Mt. Weather and vicinity, (27) 316.  
 at various heights from ground, (27) 816.  
 atmospheric—  
   annual variations, (37) 417.  
   as affected by forest growth, (31) 415.  
   as affected by snow and ice, (31) 511.
- body—  
 in man after muscular work, (32) 664.  
 regulation, (28) 666.  
 rise during marching, (26) 566.
- causes and effects of variation in range, (30) 211.  
 changes—  
   due to terrestrial radiation, (36) 617.  
   effect on branch movements in trees, (29) 526.  
   effect on infection of respiratory tract, (36) 64.  
   effect of respiratory exchange of infants, (26) 766.  
   forecasting, (35) 505.  
   in, (33) 19.  
   in Europe and North America, (31) 717.  
   world-wide, (37) 15.
- city and suburban, (27) 414.  
 coefficient of permeability in plants, (38) 25.  
 coefficients in plant geography and climatology, (30) 117.  
 conditions at New Orleans, (27) 816.  
 conditions in cranberry marshes of Wisconsin, (26) 514.  
 control plant, notes, (29) 658.  
 correlations in United States, (38) 509.  
 daily changes, (27) 816.  
 daily ranges in Nevada, (28) 716.  
 departures in United States, (26) 513.  
 determinations in entomology, (37) 355.  
 determining probable minimum, (29) 510, 511.  
 diurnal changes in, (32) 810.
- effect on—  
 alcohol yeast, (29) 714.  
 alfalfa, (31) 629.  
 bacteria in milk, (35) 777.
- Temperature**—Continued.  
 effect on—continued.  
 bacteria in water, (29) 814.  
 carbon dioxide excretion in man, (30) 264.  
 cattle ticks, (26) 459.  
 cement mortar, (33) 589.  
 cereals, (27) 15.  
 Chlamydomonas, (27) 729.  
 complement fixation rate, (37) 688.  
 destruction of invertase, (26) 504.  
 diastases, (33) 30.  
 distribution of insects, (27) 655.  
 expulsion of ascospores of chestnut blight fungus, (31) 451.  
 ferments, (26) 308.  
 flesh of poultry, (30) 259.  
 fumigation, (29) 762.
- effect on germination—  
 and growth of wheat, (29) 731.  
 of conidia of downy mildew, (26) 851.  
 of Gramineae, (38) 24.  
 of seeds, (26) 131, 200; (27) 220, 444; (28) 327; (31) 222; (35) 222.
- effect on—  
 Glomerella, (32) 749; (34) 541.  
 glucose formation in potatoes, (33) 310.  
 gravitation, (36) 419.  
 growth of corn seedlings, (32) 334.  
 growth of parasitic fungi in cultures, (38) 757.  
 growth of peas, (35) 432.  
 growth of small grains, (37) 533.  
 houseflies and mosquitoes, (33) 860.  
 human body, (34) 464.  
 insects, (30) 545; (33) 252.  
 lipolysis of esters, (28) 63.  
 longevity of insects, (32) 244.  
 metabolism, (31) 362.  
 metabolism in animals, (32) 765.  
 microflora of hay, (33) 467.  
 milk fat, (29) 580.  
 milk fat globules, (34) 570.  
 moisture intake of seeds, (35) 222.  
 molting of walking-stick, (28) 353.  
 nitrification in soils, (35) 627.  
 nuclease, (28) 803.  
 oviposition of alfalfa weevil, (33) 257.  
 permeability of plant cells, (35) 224.  
 phototropism, (34) 628.  
 phototropism in oat seedlings, (30) 725.  
 physical processes in soils, (34) 216.  
 plant growth, (33) 129.  
 plant respiration, (28) 428; (36) 28.  
 plant variation, (29) 339.  
 potato scab, (33) 245.  
 proteolytic activity of ferments, (35) 482.  
 quality of wheat, (30) 664.  
 rate of ammonification, (31) 127.  
 reaction of lysin with nitrous acid, (38) 10.  
 respiration coefficient of seeds, (29) 525.  
 respiration of plants, (26) 822.  
 root growth, (36) 28.  
 strength of concrete, (34) 889.  
 the organism, (32) 765.  
 tropic sensitivity of oat seedlings, (28) 630.  
 water movement in soils, (34) 215.  
 winterkilling of cereals, (38) 415.  
 yield of cereals, (28) 41.
- extreme, in 1916, (36) 509.  
 fluctuations in human body, (26) 466; (27) 768.  
 gradients, vertical, (30) 317.  
 gradients, vertical, in Hawaii, (27) 316.  
 high, effect on agglutinin formation, (36) 575.  
 high, effect on frogs, (35) 851.  
 high, use against cereal insects, (32) 246.  
 highest in United States, (33) 716.  
 in British Columbia, (34) 320.  
 central Rocky Mountain region, variations, (26) 117.  
 northern Europe, (31) 316.  
 soils, relation to bacterial activity, (29) 423.  
 United States, (27) 616.  
 western and equatorial Africa, (34) 208.  
 injurious to fruit, (27) 413, 439.  
 interior, of concrete, (26) 214.  
 inversion in Grand River Valley, Colo., (34) 614.  
 inversions in relation to frost, (34) 715.  
 low, after-effects on germinating oats, (35) 330.

## Temperature—Continued.

- low, effect on—  
 anthrax bacillus, (32) 81.  
 decomposition of foods, (31) 659.  
 enzymes, (33) 803.  
 fish, (31) 459.  
 frogs, (34) 751.  
 fruit culture in New York, (34) 737.  
 fruits and cider, (27) 460.  
 fungi and bacteria, (34) 538.  
 germination of beet seeds, (37) 829.  
 germination of seeds, (26) 821.  
 grapes, (29) 839.  
 milk, (31) 373.  
 plant tissue, (32) 42; (35) 234.  
 seeds, (27) 329.  
 spore germination of rusts, (27) 45.  
 trichina, (34) 83.  
 wintering of cereals, (26) 733.  
 young apples, (27) 546.
- low—  
 germicidal effect, (34) 382.  
 in rice culture, (35) 718.  
 in Sudan, (31) 229.  
 of southern Hemisphere, (34) 118.  
 physiological effects, (26) 452.  
 protection of plants against, (27) 333.
- lowest, (38) 210.  
 lowest with salt and ice, (31) 615.  
 mean, time of observation, (27) 616.  
 minimum and sunrise, difference in time, (40) 314.  
 minimum, on Mt. Whitney, (28) 415.  
 minimum, predicting, (32) 811; (38) 209, 812.  
 mountain and valley, (36) 718.  
 of cultivated and uncultivated soils, (33) 510.  
 expired air, (31) 466.  
 glacial plunge basin, relation to vegetation, (40) 326.  
 ocean depths, (36) 719.  
 soils, under different conditions, (27) 214.  
 the atmosphere, (34) 614.
- optimum, for plant growth, (38) 716.  
 records, (30) 17; (31) 416; (32) 717.  
 regulator, description, (29) 567.  
 relation to—  
 cabbage Fusarium disease, (33) 346.  
 chestnut blight, (37) 557.  
 corn and wheat production, (38) 317.  
 corn yield, (35) 618.  
 cranberry fruit rots, (38) 454.  
 crop production, (28) 716; (38) 208.  
 crop systems and production, (26) 415.  
 distribution of marine algae, (34) 32.  
 germination of seeds, (33) 826.  
 grape downy mildew, (27) 49, 449; (28) 448.  
 grape roset, (26) 550; (29) 349.  
 insect development, (31) 349.  
 insects, (31) 847.  
 leaf fall, (27) 221.  
 plant growth, (35) 328; (39) 615.  
 potato diseases, (30) 649.  
 spring wheat yield, (33) 117; (39) 210.  
 sun spots, (38) 115; (40) 416.  
 wheat production in Australia, (36) 209.  
 wind velocity, (40) 715.  
 winter wheat yields, (38) 14.
- rôle in distribution of plants, (31) 522.  
 summations, methods, (39) 810.  
 summer, at Paris and at Reno, Nevada, (33) 717.  
 sums, value in phenology, (27) 509.  
 supramaximal, effect on plants, (29) 27.  
 survey of Nevada, (27) 241.  
 underground, (35) 618.  
 variability, (36) 19.  
 variations—  
 anomalies, (38) 210.  
 in a mountain valley, (34) 613.  
 in among crops, (30) 17.  
 in France, (34) 415.
- Tenant—  
 and landlord—  
 contract between, (32) 390.  
 distribution of produce between, (31) 390.  
 division of capital between, (31) 192.  
 partnership between, (30) 399.  
 farm problems, notes, (29) 634.  
 farmers in Great Britain, condition, (26) 791.
- Tendipedidae of Canary Islands, (39) 868.  
 Tendipes plumosus, notes, (32) 554.

## Tendons—

- chemistry of, (28) 201.  
 form and function, in limbs of work animals, (29) 570.
- Tendrils, nature, (38) 822.
- Tenebrio obscurus—  
 life history, (34) 65.  
 remedies, (27) 258.
- Tenebrionidae—  
 catalogue, (26) 560.  
 larvae, injurious to tobacco, (29) 761.  
 of Philippines, (31) 553.
- Tennessee—  
 Station—  
 financial statement, (28) 796; (29) 696.  
 notes, (26) 397, 900; (27) 398, 700, 900; (28) 196; (29) 98, 700; (30) 900; (32) 398, 600; (33) 198; (35) 98; (37) 198, 499, 600, 797; (39) 97, 698; (40) 199, 499, 600, 900.  
 report of director, (28) 796; (29) 696.  
 reports, (38) 398.  
 University, notes, (26) 397, 900; (27) 398, 700, 900; (28) 196; (29) 98, 700; (30) 900; (32) 398, 600; (33) 198; (35) 98, 400; (36) 197; (37) 198, 300, 600; (38) 700; (39) 97; (40) 199, 698.
- Tenodera sinensis, notes, (27) 755.
- Tension, effect on root structure, (32) 825.
- Tent caterpillar—  
 cocoons poisoning hogs, (40) 586.  
 egg contest, (33) 58.  
 in California, (32) 152.  
 notes, (29) 158, 251, 558; (32) 448, 551; (33) 155, 252; (34) 654, 752; (36) 854.  
 polyhedral virus, (40) 255.  
 remedies, (32) 540, 847.
- Tent materials for frost protection, (33) 48.
- Tenthecoris bicolor, notes, (40) 754.
- Tenthredinidae in Luga district of Government of Petrograd, (34) 758.
- Tenthredinoidea—  
 immature stages, (31) 155; (33) 97.  
 of Argentina, (31) 256.
- Tenuipalpus—  
 bioculatus n.sp., description, (33) 659.  
 bioculatus, notes, (36) 859.  
 californicus, notes, (28) 457.
- Teosinte—  
 and corn, crossing experiments, (26) 40.  
 and corn hybrids, immunity to aphids, (38) 561.  
 as forage crop, (31) 829.  
 culture, (32) 226; (37) 136.  
 culture—  
 experiments, (29) 426; (33) 31, 33; (37) 529; (38) 527.  
 in eastern Oregon, (38) 432.  
 in Philippines, (26) 361.  
 in Rhodesia, (27) 637.  
 notes, (26) 362.  
 water requirement, (32) 127.
- Teparies, studies, (28) 639.
- Tepary beans—  
 as dry farm crop, (29) 736; (39) 736.  
 culture, (32) 226.  
 culture experiments, (29) 426; (32) 526; (33) 31; (38) 631.  
 drought resistance, (39) 835.  
 feeding value, (39) 776.  
 notes, (27) 529.  
 seed production, (38) 828.  
 yields, (35) 527; (39) 434.
- Tephrites onopordinis, oviposition, (40) 457.
- Tephrochlamis canescens, hibernation, (34) 254.
- Tephrosia—  
 candida, culture experiments, (27) 233.  
 hookeriana as a host plant of pink disease, (35) 154.  
 purpurea, analyses and digestibility, (27) 871; (32) 167.  
 purpurea as green manure for rice, (30) 339.  
 purpurea, culture, (30) 335.  
 spp., analyses, (29) 215.  
 spp. as green manure, (36) 324.  
 spp., fertilizing value, (34) 34.
- Teratology—  
 of plants, notes, (36) 734.  
 of plants, treatise, (36) 430.
- Terias nicippe pupae, color variation, (40) 263.
- Termes—see also Leucotermes.  
 flavipes, notes, (27) 657; (30) 154; (35) 54.  
 flavipes on geraniums, (33) 58.

- Termes**—Continued.  
gestroi as pest of Para rubber, (35) 544; (36) 755.  
gestroi, notes, (28) 353.  
gestroi, remedies, (38) 759.  
lucifugus, destruction of redwood by, (26) 858.  
natalensis, notes, (30) 250.
- Terminalia tomentosa**, notes, (29) 443.
- Termites**—  
association with *Entoloma microcarpum*, (31) 58.  
black, of Ceylon, (31) 58.  
control in Malay Peninsula, (38) 460.  
destructive to rubber, (28) 353.  
destructive to trees, (28) 563.  
East African, notes, (30) 250.  
fungi cultivated by, (40) 453.  
Hevea, of Java, (31) 156.  
in Cuba, notes, (40) 453.  
in eastern United States, (32) 755.  
injurious to—  
furniture and woodwork, (36) 355.  
geraniums, (33) 58.  
pecan, (38) 157.  
shotgun cartridges, (37) 255.  
sweet potatoes, (40) 260.  
Japanese, revision, (36) 654.  
lucifuge, studies, (27) 555.  
nature and remedies, (28) 753.  
notes, (27) 54, 454; (30) 154, 657, 853; (35) 54, 853; (40) 352.  
of India, (38) 359, 461.  
of West Africa, (36) 754.  
remedies, (27) 555; (31) 155.  
ridding houses of, (28) 562.  
studies, (27) 357; (28) 159, 562; (34) 754.  
timbers resistant to, (30) 536, 754.
- Terns**, notes, (27) 355.
- Terpenes**, physical constants, (36) 12.
- Terra rossa**, origin, (39) 513.
- Terraces**—  
construction, (32) 514; (34) 819; (37) 87.  
Mangum, notes, (27) 720.
- Terracing**—  
farm lands, (40) 188.  
in Java, (36) 723.  
in Texas, (35) 887.  
moisture and fertility control by, (31) 317.  
notes, (32) 597.  
of Java tea soils, (36) 320.
- Terrapin scale**—  
control in Maryland, (27) 552.  
investigations, (35) 156.  
notes, (29) 353.  
remedies, (26) 755.
- Terrestrial**—  
magnetism and solar radiation, concomitant changes in, (34) 614.  
rotation, effect on atmosphere and ocean, (32) 614.
- Terriers**—  
Airedale, prepotency in, (29) 770.  
popular sires of, (34) 370.
- Testes**—  
as affected by Roentgen rays, (26) 364.  
extract, effect on milk production, (37) 173.  
regeneration after experimental orchectomy in birds, (30) 266.
- Testicle**, interstitial gland, relation to secondary sex characters, (40) 467.
- Testicular**—  
antiserum, toxicity, (28) 676.  
cells, interstitial, in chickens, (34) 264.  
cells, interstitial, rôle of, (27) 69.  
cells, interstitial, studies, (26) 364; (28) 668.
- Tetanus**—  
antitoxin—  
fixation by leucocytes, (26) 177.  
preparation, (35) 384.  
standardization, (31) 880.  
studies, (39) 489.  
bacilli—  
disinfection, (40) 478.  
distribution and habitat, (33) 580.  
in healed wounds, (36) 480.  
studies, (39) 389.  
immunization, (26) 578; (27) 381; (29) 780; (31) 480, 880; (32) 274; (33) 84; (39) 388; (40) 179, 580.  
investigations, (33) 282.  
papers on, (33) 176.  
prophylaxis by antitoxic serum, (36) 181.
- Tetanus**—Continued.  
serum, valuation, (26) 178.  
spores, destruction in vaccine virus, (39) 80.  
spores in street dust, (38) 885.  
toxin—  
action of formaldehyde on, (26) 782.  
and antitoxin, avidity of, (26) 676.  
antitoxin mixtures, immunization with, (34) 580.  
concentration and purification, (34) 579.  
effect on autolysis, (27) 183.  
fixation, (26) 378.  
neutralization of activity, (30) 182.  
production, (36) 383.  
toxins, separation from other toxins, (38) 786.  
treatment, (26) 378, 783; (27) 183, 381; (29) 679, 883; (31) 580; (32) 476; (34) 782; (35) 75, 379, 784; (37) 79; (38) 580, 585; (40) 186, 779.
- Tetany**, parathyroid, in cats and dogs, (27) 787.
- Tethelin**—  
effect on growth of white mice, (35) 865.  
isolation and properties, (35) 8.  
use against tuberculosis, (37) 880.
- Tetracarboximid**—  
identity with cyanuric acid, (38) 202.  
studies, (32) 215.
- Tetradymia glabrata**, toxicity, (39) 184.
- Tetragonolobus purpureus**, nodule bacteria of, (32) 33.
- Tetraleurodes**—  
mori, notes, (33) 59; (34) 752.  
olivinus n.sp., description, (26) 149.  
olivinus, notes, (27) 56.
- Tetralobius fortnumi**, notes, (39) 557.
- Tetrameres fissispinus**, notes, (35) 878.
- Tetramorium caespitum**—  
as pest of cold-frame and greenhouse crops, (34) 657.  
injurious to tobacco, (30) 759.
- Tetramyxa**—  
palustre, tissue invasion by, (40) 50.  
parasitica, studies, (27) 46.
- Tetraneura**—  
ulmi, notes, (28) 655.  
ulmisacculi, notes, (33) 253.
- Tetranitromethan**, assimilation by plants, (26) 32.
- Tetranobia longipes**, notes, (38) 365.
- Tetranychina** n.sp., description, (36) 660.
- Tetranychoides californicus**, notes, (28) 457.
- Tetranychus**—  
bimaculatus—  
in greenhouses, (39) 65.  
notes, (26) 153; (28) 554, 855; (29) 360; (35) 263, 657; (38) 365.  
on castor bean, (40) 453.  
remedies, (28) 759.  
studies, (27) 264; (29) 261; (36) 557.  
bioculatus, notes, (30) 362.  
citri n.sp., description, (36) 261.  
dufour, studies, (35) 254.  
gloveri, notes, (26) 856.  
modestus, notes, (37) 847.  
multidigituli n.sp., description, (38) 63.  
mytilaspidis, occurrence in Oregon, (28) 859.  
n.spp., descriptions, (33) 659; (36) 660.  
pilosus, notes, (26) 254; (33) 659.  
sp., notes, (27) 155; (29) 853.  
spp., life histories and habits, (28) 457.  
spp., notes, (32) 557; (34) 60.  
spp. on cinchona and tea, (40) 656.  
spp., remedies, (31) 549.  
spp., synonymy, (32) 156.  
telarius—  
distribution, (32) 63.  
in Ohio, (34) 59.  
injurious to alfalfa, (38) 558.  
remedies, (40) 453.  
studies, (32) 156.  
tiliarum, notes, (29) 58.  
uniunguis n.sp., description, (38) 63.
- Tetraphosphate**—  
description, (37) 722.  
fertilizing value, (38) 424; (39) 427, 428.
- Tetraphosphoric-acid ester of inosit**, studies, (27) 406.
- Tetraplasy**, notes, (29) 67.
- Tetrastichini**, notes, (30) 857.

- Tetrastichodes detrimctosus* n.sp., description, (31) 355.
- Tetrastichomyia*, new genus, (39) 468.
- Tetrastichopsis prionomeri* n.g. and n.sp., (39) 468.
- Tetrastichus**—
- antigenus* n.sp., description, (26) 352.
  - asparagi*, life history, (28) 858.
  - asparagi*, notes, (39) 468.
  - asparagi*, parasitism, (31) 458.
  - asparagi*, studies, (33) 658.
  - bruchophagi*, studies, (36) 759.
  - ceroplastides* n.sp., description, (31) 355.
  - coccinellae*, biology, (30) 754.
  - doteni* n.sp., description, (26) 863.
  - gentilei* n.sp., description, (26) 553.
  - giffardianus*—
    - in Hawaii, (38) 659.
    - parasitic on fruit fly, (37) 856.
    - studies, (40) 459.
  - giffardii* n.sp., description, (30) 161.
  - isis* n.sp., description, (39) 566.
  - malacosomae**—
    - n.sp., description, (36) 556.
    - parasitic on tent caterpillar, (37) 667.
  - n.sp., descriptions, (30) 857; (31) 355; (34) 66; (35) 262; (38) 165.
  - ovipransus* n.sp., description, (37) 856.
  - ovivorus* n.sp., description, (26) 353.
  - platensis*, notes, (27) 559.
  - pyrillae* n.sp., description, (38) 556.
  - sp., notes, (27) 558.
  - sp., parasitic on alfalfa weevil, (31) 61.
  - sp., parasitic on star scale, (26) 553.
  - sp., studies, (26) 458; (28) 560.
  - spp., notes, (36) 556.
  - spp., parasitic on fruit flies, (31) 456.
  - xanthomelaenae*, importation into United States, (38) 62.
- Tetriginae* (Acridiinae), notes, (27) 858.
- Tetropium gabrieli* crawshayi, notes, (32) 155.
- Tettigidea*, breeding experiments, (40) 367.
- Tettigonia**—
- bifida*, notes, (27) 859.
  - similis*, notes, (29) 53.
- Teucrum**—
- chamaepeptis, analyses, (33) 466.
  - scorodonia as affected by light, (29) 526.
- Texas**—
- College, notes, (26) 97, 194, 397; (27) 99; (28) 495, 798; (29) 197; (31) 198, 497, 600, 798; (33) 400, 600, 700; (34) 497; (36) 599, 899; (37) 99, 898; (38) 800.
  - fever—
    - control in Kentucky, (39) 679.
    - disease resembling, (32) 781.
    - etiology and treatment, (31) 85; (35) 884.
    - immunization, (27) 184; (28) 882; (31) 883; (32) 476; (38) 787.
    - in Australia, (30) 82.
    - in Honduras, (27) 171.
    - in Turkey, (38) 183.
    - nature and treatment, (27) 384.
    - notes, (27) 81, 475, 576; (29) 256; (30) 884; (39) 81, 84, 492.
    - studies, (35) 77.
    - tick, see Cattle tick.
    - treatment, (27) 384; (29) 658; (30) 282; (32) 682; (36) 384.
  - Station—
    - and substations, appropriations asked for, (32) 796.
    - financial statement, (29) 696.
    - notes, (26) 97, 194, 495, 600, 900; (27) 99; (28) 398, 798; (29) 600; (31) 798; (32) 498, 696; (33) 400, 600, 700; (34) 396, 798; (36) 599; (37) 99, 600, 898; (38) 800; (39) 698; (40) 99.
    - report, (32) 291; (34) 494; (36) 396; (39) 499.
    - report of director, (29) 696.
  - Stations, needed appropriations for, (28) 796.
- Textile**—
- fibers**—
    - bibliography, (31) 196.
    - chemical technology of, treatise, (32) 308.
    - from *Epilobium angustifolium*, (32) 509.
    - methods of analysis, (27) 205.
    - industry of the world, (40) 827.
    - law, need for, (30) 666.
    - mills, artificial humidification in, (31) 70.
    - plant fibers, check list, (38) 637.
  - Textile—Continued.**
    - plant fibers, strength of, (29) 312.
    - plants, treatise, (34) 829.
  - Textiles**—
    - choosing, (31) 394.
    - handbook, (30) 598.
    - notes, (32) 597.
    - of ancient America, (38) 167.
    - prices in India, (30) 896.
    - removal of stains from, (38) 114.
    - retting, (38) 715.
    - testing, constant temperature and humidity, room for, (38) 414.
    - "Textilose" from paper pulp, (38) 208.
    - Thalia divaricata*, culture for wild ducks, (33) 251.
    - Thamnotetix geminatus*, notes, (27) 859.
    - Thaneroclerus girodi*—
      - larva, description, (40) 759.
      - notes, (29) 359.
    - Thea**—
      - spp., stomata of, (36) 223.
      - 22-punctata, notes, (36) 754.
    - Thecabius**—
      - populicaulis, notes, (34) 453.
      - spp., notes, (31) 351.
    - Thecodiplosis mosellana*—see also *Diplosis titici* and *Wheat midge*.
      - description, (28) 657.
      - in Ontario, (40) 653.
    - Thecopora pirolae*, overwintering, (33) 647.
    - Theileria parva*—
      - development, (26) 882.
      - morphology and biology, (28) 478.
      - notes, (34) 384.
    - Theileriosis* in Russian Turkestan, (37) 374.
    - Theisoa constrictella*, life history, (33) 655.
    - Thelephora**—
      - lichenicola*, notes, (28) 556.
      - pedicellata*, notes, (27) 445; (28) 545.
    - Thelia bimaculata*—
      - life history, (34) 255.
      - notes, (26) 148.
    - Themeda* spp., notes, (26) 362.
    - Theobroma cacao*—
      - character and habits, (35) 730.
      - insects affecting, (26) 354.
    - Theobromin**—
      - determination in cocoa and chocolate, (37) 312.
      - in tea, (31) 358.
    - Theophila* spp., notes, (27) 456.
    - Theophyllin* in tea, (31) 358.
    - Therapeutic agents**—
      - handbook, (31) 478.
      - newer, notes, (26) 580.
    - Therapeutics**—
      - biological, notes, (33) 876.
      - for veterinarians, textbook, (32) 79.
      - papers on, (29) 676.
      - physiologic principles in, (29) 500.
      - review of literature, (32) 678.
    - Therapy, infection, and immunity**—
      - textbook, (38) 781.
      - treatise, (33) 476.
    - Thercladodes kraussi*, studies, (28) 757.
    - Thereva* sp. as a rye pest, (38) 557.
    - Theridion* spp., notes, (29) 256.
    - Thermal regions of the globe, (32) 25.
    - Thermobia domestica*, notes, (37) 255.
    - Thermodynamics of the atmosphere, (32) 210.
    - Thermograph, differential, description, (30) 17.
    - Thermoisopleths for Washington, D. C., (33) 320.
    - Thermometer**—
      - exposure, uniform, (34) 118.
      - history and use, (32) 210.
      - Kata, notes, (36) 419.
      - use in cookery, (31) 359.
    - Thermometers**—
      - incubator, tests, (36) 770.
      - shade, testis (30) 17.
    - Thermometric scales, revision, (38) 811.
    - Thermo-osmose in soils, (34) 216.
    - Thermoprecipitin reaction—
      - notes, (31) 878.
      - aero-diagnostic value, (27) 86.
    - Thermopsis lanceolata*, carotinoid content, (31) 803.
    - Thermotoxy of cotton in Egypt, (30) 526.
    - Thermotropism of roots, (31) 728; (32) 222.
    - Theronia**—
      - havicans*, parasitic on gipsy moth, (31) 652.
      - fulvescens*, notes, (26) 863.

- hersilochus conotracheli*—  
 notes, (27) 864.  
 studies, (35) 857.
- Thespesia*—  
 glands of, (39) 431.  
 populnea, fertilizing value, (29) 215.
- Thevetia nerifolia*, notes, (27) 862.
- Thielavia*—  
*basicola*—  
 as root parasite of watermelon, (33) 852.  
 conidial characters and behavior, (35) 247.  
 description and treatment, (31) 448, 840.  
 host plants, (36) 349.  
 infection experiments, (28) 547.  
 notes, (26) 551, 849; (27) 45, 249; (29) 245, 549,  
 650, 753; (30) 649; (33) 744; (36) 50; (37) 38.  
 on beans, (36) 248.  
 relation to sweet pea streak disease, (32) 446.  
 resistance of tobacco to, (31) 448.  
 studies, (35) 547; (36) 845; (37) 155.  
 tobacco resistant to, (36) 349.  
 treatment, (32) 545; (36) 50.  
 temperature relations, (39) 854.
- Thielaviopsis*—  
*ethaceticus*, notes, (29) 650; (34) 841; (38) 354,  
 758.  
*paradoxa*—  
 notes, (26) 145; (29) 345, 647; (30) 541; (31)  
 844; (36) 541; (37) 452, 652; (38) 350, 758,  
 851; (39) 849; (40) 47, 751.  
 on sugar cane, (40) 157.  
 relation to temperature, (33) 545.  
 sp., notes, (28) 241.
- Thimbleberry*—  
 crossing with raspberry, (36) 442.  
 rust, notes, (33) 647.
- Thiobarbituric acid*—  
 as precipitant for furfural, (36) 318.  
 as qualitative reagent for ketohexose, (37) 206.  
 with aromatic aldehydes, (36) 313.
- Thiocarbamid*, nitrification rate, (32) 124.
- Thiophene* test for lactic acid, (40) 114.
- Thioploca ingraca*, studies, (28) 826.
- Thiospirillum jense* and its reaction to light  
 stimulus, (35) 431.
- Thiosulphate*—  
 determination, (35) 804.  
 determination in presence of sulphites, (31) 15.  
 fertilizing value, (29) 521.
- Thiothrix* spp., investigations, (28) 728.
- Thiovulum* n.g. and n.sp., studies, (30) 133.
- Thirst, physiological basis, (40) 767.
- Thistle*—  
 butterfly, notes, (32) 651.  
 Canada—  
 control, (40) 339, 430.  
 destruction, (30) 236, 639; (34) 736.  
 distribution and destruction, (29) 538.  
 host of *Heterodera radiceicola*, (31) 642.
- Russian—  
 analyses, (28) 464.  
 as forage crop, (38) 634.  
 as silage crop, (38) 609; (39) 134.  
 eradication, (27) 733; (32) 134.  
 water requirement, (32) 127.
- rust, description, (31) 153.  
 rust, notes, (36) 48.
- Thistles*—  
 analyses, (30) 565.  
 coccinellids affecting, (33) 256.  
 eradication, (26) 538; (39) 744.
- Thitsi* tree and its oleoresin, (38) 247.
- Thlaspi arvense*—  
 dissemination by farm animals, (26) 839.  
 notes, (28) 46; (36) 442.
- Thomas*—  
 meal, notes, (26) 126.  
 slag, see Phosphatic slag.
- Thomomys*—  
*bottae*, susceptibility to plague, (26) 59.  
*jacintus* n.sp., description, (33) 152.  
 revision, (34) 449.
- Thorium*—  
 content of earth's crust, (34) 619.  
 effect on permeability, (34) 34.  
 effect on plant cells, (27) 826.  
 emanations in soils, (27) 418.  
 in soils of United States, (31) 418.  
 X, effect on plant growth, (29) 131.
- Thorn skeletonizer in New York, (38) 60.
- Three-days' fever, notes, (37) 460.
- Threshing*—  
 machine—  
 fires, cause, (32) 86.  
 fires, notes, (32) 386.  
 hand, description, (29) 87.
- machines—  
 cooperative ownership, (34) 392.  
 description, (30) 488.  
 dissemination of smut by, (31) 148.  
 dust explosions and fires in, (35) 688.  
 electrically driven, tests, (31) 188.  
 exhaust fans for, (40) 49, 746.  
 notes, (30) 89.  
 operation, (39) 793.  
 steam v. electricity for, (28) 685.  
 tests, (27) 485; (30) 892; (34) 891.  
 power for (28) 591; (29) 892; (30) 590.  
 with electricity, (32) 282.
- Thricolepis inornata*, notes, (32) 651.
- Triphleps insidiosus*, notes, (28) 457.
- Thripoctenus*—  
 brui, description, (31) 853.  
*nubilipennis* n.sp., description, (35) 756.
- russelli—  
 in England, (32) 348.  
 n.g. and n.sp., description, (26) 863.  
 notes, (28) 250.  
 parasitic on Thysanoptera, (26) 858.  
 studies, (27) 262.
- Thrips*—  
 affecting oats, (27) 452.  
 attacking French beans, (38) 258.  
 corticis, validity, (34) 550.  
 flava as a carnation pest, (26) 347.
- injurious—  
 in British Guiana, (36) 252.  
 to alfalfa, (29) 252.  
 to grapes, (28) 354.  
 to oats, (31) 351.  
 new species, (26) 553.  
 new species, description, (37) 258.  
 new species, in America, (34) 61.  
 notes, (27) 356, 857; (28) 654; (29) 252; (30) 250,  
 658; (31) 155; (32) 56, 753.  
 of British Guiana, (40) 163.  
 of Trinidad, notes, (40) 649.  
*oryzae* n.sp., description, (35) 357.  
 outbreak in orchards, (32) 755.  
*pisivora*, notes, (32) 848.  
 pollination of beets by, (31) 549.  
 red-banded, studies, (28) 353.  
 relation to nonsetting of fruits and seeds, (34)  
 355.  
 remedies, (27) 357.  
 sp. affecting tobacco in Java, (31) 249.  
 tabaci, see Onion thrips.
- Thromboplastin*—  
 hemostatic action, (36) 576.  
 rôle of in coagulation of blood, (26) 580.
- Throsidae* of Brazil, (35) 261.
- Thrushes*—  
 economic importance, (31) 349.  
 feeding habits, (28) 450; (34) 59.
- Thrypticus muhlenbergiae* n.sp., life history, (30)  
 253.
- Thuarea involuta*, notes, (26) 362.
- Thuja occidentalis*, wood structure, (27) 147.
- Thunder*—  
 and hail in region of Paris, (36) 208.  
 distance heard, (38) 210.  
 in Paris region, (36) 719.  
 Mountain, devastated condition, (40) 841.  
 notes, (32) 810.
- Thunderbolt* beetle, notes, (28) 653.
- Thunderstorm*—  
 at Charleston, S. C., (30) 417.  
 at Macon, Ga., (29) 812.  
 at Washington, D. C., (29) 812.  
 in Trinity Co., California, (38) 511.
- Thunderstorms*—  
 effect on milk, (32) 873.  
 forecasting, (34) 614; (35) 808.  
 in Kansas, (29) 510, 721.  
 in United States, (34) 117, 615.  
 notes, (32) 24.  
 studies, (28) 788.
- Thurberia thespesioides*—  
 as host plant of cotton boll weevil, (29) 458; (30)  
 56.

## Thurberia thespesioides—Continued.

- description, (31) 633.
- distribution, (33) 257.
- insects affecting, (31) 350; (33) 57.

## Thuja—

- orientalis, description and culture, (30) 346.
- plicata, damaged by squirrels, (26) 552.

## Thymol—

- as milk preservative, (32) 576.
- as vermifuge, (38) 884.
- chloroform, effect on chlorin content of urine, (40) 614.
- content of horsemint and ajowan seed, (39) 712.
- effect on hyacinths and tulips, (26) 731.
- production from horse mint, (35) 344.

## Thymolsulphophthalein as an indicator, (39) 807.

## Thymus—

- gland as affected by X-rays, (38) 268.
- gland, pathology, (27) 576.
- tissue, cleavage by normal serum, (31) 378.

## Thyreocoris pulicarius on artichoke, (40) 58.

## Thyridaria tarda—

- injurious to rubber, (26) 451.
- notes, (27) 451; (28) 149, 241; (29) 548, 647, 749; (33) 741; (34) 540, 744; (35) 45, 251, 353; (36) 347, 852; (38) 354.
- on sugar cane, (40) 157.
- on tea roots, (37) 52.
- relation to rubber spotting, (29) 451.

## Thyroid—

- feeding, effect on carbohydrate metabolism, (39) 69.
- feeding, effect on catalase content of tissues, (38) 870.
- gland—
  - active constituent, (37) 65; (39) 803.
  - as affected by diet, (26) 159.
  - effect on nitrogenous metabolism in sheep, (32) 562.
  - enlarged, in swine, (40) 185.
  - extract, effect on milk production, (37) 173.
  - iodin in, (34) 580.
  - hyperplasia, (39) 187.
  - secretion, relation to metabolism, (29) 868.

## Thyro-parathyroid, importance in carbohydrate assimilation, (30) 464.

## Thysanoptera—

- anatomy and feeding habits, (34) 355.
- antennal antigeny in, (34) 356.
- British, notes, (37) 257.
- classification, (33) 556.
- generic names, (31) 351.
- head and mouth parts, (33) 653.
- internal parasite of, (26) 858.
- locality and food plant records, (31) 550.
- new, from West Africa, (35) 255.
- new, in America, (34) 62.
- new, in California and Georgia, (26) 553.
- new, in United States, (36) 253.
- notes, (27) 757.
- of Cuba, (40) 453.
- Florida, (40) 353.
- France, (29) 853.
- Plummer's Island, Maryland, (37) 561.
- St. Vincent, (39) 558.

## Thysanosoma actinioides—

- infestation of lambs by, (37) 374.
- life cycle, (39) 162.
- morphology, (30) 584.
- notes, (27) 182.
- treatment, (28) 80.

## Thysanura, destructive to cattle ticks, (28) 758.

## Tick—

- bird, red beaked, notes, (29) 585.
- bite in livestock, treatment, (31) 679; (36) 678.
- destroying agents, tests, (27) 476.
- infestation in Natal, (29) 585.
- infesting turkeys, (33) 354.
- paralysis, notes, (30) 182; (31) 656; (32) 274; (36) 180, 275.
- paralysis, studies, (32) 877.
- pyemia, notes, (38) 785.

## Ticks—see also Cattle tick.

- affecting big game, (38) 487.
- affecting horses, (27) 356.
- as affected by dipping, (34) 186.
- as affected by Roentgen rays, (28) 57.
- as carriers of Dermatobia hominis, (40) 62.
- biology, (34) 857.

## Ticks—Continued.

- brown, remedies, (27) 476.
  - brown, transmission of amabeke by, (26) 882.
  - Canadian, review of literature, (35) 858.
  - control—
    - in Antigua, (31) 679.
    - in Dutch East Indies, (40) 682.
    - in South Africa, (28) 181.
    - relation to Rocky Mountain spotted fever, (26) 63.
  - destruction, (31) 356.
  - destruction by arsenical dips, (29) 886.
  - diseases transmitted by, (34) 576; (40) 587.
  - distribution of spirochetes in, (31) 81.
  - eradication, (28) 759; (29) 585; (31) 182; (32) 81, 251, 274; (33) 679; (34) 184, 185, 273; (36) 675; (37) 477; (38) 179; (39) 679; (40) 880.
  - eradication—
    - effect on cattle industry of the South, (31) 883.
    - in South Africa, (26) 153.
    - in the South, (29) 500.
    - laws and regulations, (37) 881.
  - iguana, studies, (40) 359.
  - in Brazil, (27) 361.
  - British Museum, (37) 560.
  - New South Wales, (30) 684.
  - New Zealand, (39) 567.
  - Queensland, (27) 552.
  - West Indies, (27) 460; (30) 857.
- infesting domestic animals in Russian Turkestan, (37) 360.
- infesting marmots, (37) 879.
  - inflammation following bite of, (29) 585.
  - monograph, (35) 263.
  - new species, descriptions, (26) 460.
  - North American, life histories, (29) 861.
  - notes, (27) 53, 361; (31) 79.
  - of Barbados, (40) 56.
  - Belgian Congo, (35) 366.
  - Nigeria, (34) 851.
  - Paraguay, (38) 468.
  - Uganda, (34) 549.
  - Pajaroello, life history and biting habits, (35) 662.
  - parasite of, (30) 255.
  - protozoan parasites transmitted by, (37) 481.
  - relation to—
    - African Coast fever, (29) 584.
    - anaplasmosis, (26) 584; (29) 584.
    - louping-ill (37) 277; (40) 384.
    - spirochetosis, (29) 883.
    - spirochetosis in fowls, (26) 684.
    - verruca fever, (29) 262.
  - remedies, (29) 680.
  - rôle in disease transmission, (26) 153.
  - salivary secretion, (32) 557.
  - sources of infections from, (26) 460.
  - spinose ear, notes, (40) 656.
  - spinose ear, remedies, (40) 682.
  - spotted fever, eradication, (27) 479.
  - spotted fever, in Montana, (39) 265.
  - studies, (27) 865.
  - summary of information, (39) 768.
  - transmission of—
    - African Coast fever by, (26) 882.
    - A. Anaplasma marginale by, (26) 173.
    - gall sickness by, (26) 883.
- Tiger beetles of Indiana, studies, (39) 767.
- Til wits, studies, (38) 547.
- Tile—
- cement, curing, (27) 586.
  - cement, solubility, (31) 92.
  - clay and concrete, tests, (32) 482, 483.
  - concrete—
    - construction, (34) 685.
    - drain, failures of, (29) 487.
    - durability in alkali soils, (34) 584.
    - tests, (26) 685; (32) 84.
  - drainage—
    - and sewer, beddings for, (37) 187.
    - cost, (32) 481.
    - in Illinois, (27) 484.
    - investigations, (28) 890.
    - machine for testing, (31) 384.
    - manufacture and use, (28) 890.
    - notes, (27) 386.
    - specifications, (29) 290; (37) 587.
    - specifications and tests, (27) 587.

## Tile—Continued.

- drainage—continued.
  - system, (37) 286.
  - tests, (29) 685; (30) 787; (33) 392.
- drains—
  - design and construction, (32) 187.
  - tables for computing cost, (32) 85.
  - methods of testing, (27) 87, 88.
- Tilefish, occurrence and use, (34) 557.
- Tilia—
  - americana as a medicinal plant, (30) 145.
  - europa, hydrocarbons in, (26) 107.
  - of North America, (40) 248.
- Tiling contracts, notes, (27) 789.
- Tillage—
  - deep, in the Great Plains, (39) 812.
  - effect on bacteria in peat soils, (38) 420.
  - experiments at Grignon, France, (35) 688.
  - experiments in New South Wales, (26) 135.
  - machinery, recent inventions in, (35) 494.
  - machines, description, (33) 489, 891.
  - methods for western Nebraska, (35) 438.
  - new basis for, (29) 516.
  - notes, (36) 511.
  - relation to soil moisture, (27) 320.
- Tillandsia recurvata, anatomy and biological aspects, (26) 729.
- Tilletia—
  - caries, detection in flour, bran, and cereals, (26) 408.
  - controversa, notes, (34) 843.
  - foetens—
    - inoculation experiments, (33) 245; (37) 750.
    - morphology, (35) 845.
    - spore germinations of, (31) 642.
    - studies, (38) 645.
    - treatment, (26) 447; (29) 750.
  - horrida, notes, (35) 243, 247; (37) 247.
  - horrida, studies, (30) 540, 845.
  - levis, notes, (29) 243; (34) 644, 845.
  - on wheat, studies, (40) 345.
  - spores, effect on domestic animals, (27) 882.
  - spp., chemical composition, (26) 746.
  - spp., effect on pigs, (26) 888.
  - spp. in Argentina, (38) 148.
  - spp. in Bohemia, (35) 650.

 time of cutting, (39) 633.  
 transpiration, (39) 517.  
 utilization of sugar by, (36) 125.  
 variation in composition, (27) 499.  
 variations in, (35) 232.  
 varieties, (27) 535, 736; (29) 139.  
 variety, new, tests, (39) 633.  
 variety tests, (40) 232.  
 vitamin content, (40) 564.  
 yields, (29) 631; (39) 333, 337, 435; (40) 733.
- Tin—  
 absorption and fate of in the body, (31) 362.  
 adsorbed, effect on digestion of proteins, (37) 470.  
 adsorption by proteins, (37) 12.  
 as affected by organic acids of canned goods, (26) 867.  
 coating on food containers, (37) 715.  
 determination, (37) 110.  
 determination in foods, (26) 99; (27) 498; (32) 298.  
 determination in tinplate, (27) 505.  
 food containers, disappearance of oxygen in, (28) 361.  
 hydrates, effect on guinea pigs, (28) 362.  
 in canned foods, (33) 661.  
 metallic, effect on *Aspergillus niger*, (30) 824.  
 poisoning from canned asparagus, (31) 67, 461.  
 presence in canned goods, (28) 461.  
 salts in canned foods, (26) 66.  
 solution by canned foods, (37) 12.
- Tincture plants, treatise, (36) 142.
- Tinea—  
 cloacella, studies, (36) 156.  
 granella, notes, (33) 252.  
 oleae, notes, (27) 357.  
 pellationella, see *Clothes moth*.
- Tineid moths of Central America, (35) 464.
- Tineina of North America, life histories, (33) 655.
- Tineola biselliella—  
 life history, (38) 657.  
 predacious, (38) 557.
- Tineopsis theobromae n.g. and n.sp., notes, (30) 550.
- Tingidae—  
 American, notes, (38) 158.  
 nearctic, names, (38) 559.
- Tingis pyri—  
 biology, (38) 559.  
 notes, (27) 453.
- Tingitoidea of Ohio, (36) 755.
- Tiphia—  
 inornata, life history and ecology, (32) 352.  
 parallela—  
   establishment in Antigua, (38) 256.  
   establishment in Mauritius, (38) 467.  
   feeding habits, (40) 265.  
   notes, (28) 752; (32) 449; (34) 455.  
 spp., parasitic on May beetles, (31) 458.
- Tipula—  
 oleracea injurious to rice, (33) 555.  
 oleracea, notes, (32) 851.  
 paludosa, biology and economics, (37) 763.  
 simplex, notes, (28) 160.  
 spp., of North America, (31) 551.
- Tipulid larvae in decayed prune wood, (32) 652.
- Tipulidae—  
 North American, biology, (32) 153; (33) 561; (35) 57.  
 oriental, revision, (27) 358.
- Tiqui-tiqui, notes, (31) 258.

- Tires**—  
width in relation to load, (33) 782.  
width of, (36) 787.
- Tischeria camplanella**, studies, (28) 560.
- Tissue**—  
cells, human, resistance to germicides, (37) 176.  
culture method in immunity studies, (40) 179.  
extracts, selective extraction of sensitive substances from, (40) 611.  
invasion by *Plasmodiophora brassicae*, (40) 50.  
living, methods of study, (29) 408.  
living, oxidation processes in, (30) 201.  
mechanical, formation in plant tendrils, (27) 631.  
transplantation—  
and anaphylaxis, (38) 182.  
and immunity, (38) 583; (39) 487, 886; (40) 578.  
negative, cause, (37) 478.
- Tissues**—  
caseation by tubercle and other bacilli, (33) 480.  
chemical functions, (28) 201.  
cultivation outside the body, (28) 272.  
imbibition heat in, (30) 368.  
lecithin content, (31) 577.  
mammalian, growth in vitro, (33) 267.  
regeneration and transplantation, (28) 68.
- Tit**, bush, destructive to codling moth, (27) 559.
- Titanium**—  
concentration in subsoil, (31) 720.  
distribution in loam soils, (31) 618.  
in pineapple soils, (29) 210.  
in plants, (38) 409.
- Titlarks**, destruction of grain aphids by, (29) 453.
- Titmice**, destructive to codling moth, (27) 559.
- Titrating table**, portable, description, (34) 312.
- Titration flask**, description, (37) 614.
- Titrations**, alkalimetric and acidimetric, treatise, (33) 109.
- "T" Kirriemoor** roots as substitute for yeast, (29) 461.
- Tmetis muricatus**, destruction by *Coccobacillus acidiorum*, (33) 154.
- Tmetocera ocellana**, *see* Bud moth.
- Toads**—  
California, economic status, (32) 244.  
eating of alfalfa weevil by, (31) 655.  
of Long Island, (32) 448.  
of Pennsylvania, (31) 648.
- Toadstool poisoning**, treatment, (27) 329.
- Toadstools**—  
and mushrooms, handbook, (31) 628.  
notes, (28) 861.
- Tobacco**—  
alkaloid formation in, (35) 333.  
analyses, (29) 866.  
animals affecting, (29) 551.  
ants affecting, (30) 759.  
aphis, notes, (40) 355.  
arsenic in, (31) 715.  
artificial drying, (37) 417.  
as affected by shade, (31) 326; (33) 521.  
ash, composition, (39) 607.  
ash, composition as affected by fertilizers, (37) 541.  
bacterial disease—  
notes, (29) 423; (31) 127, 539.  
studies, (30) 747.  
barium in, (30) 502; (31) 715; (36) 202.  
barns, plans and specifications, (28) 787.  
"bassara" or "verderame", description, (26) 748.  
beetle—  
as affected by Roentgen rays, (35) 554.  
control in Philippines, (38) 459.  
life history and remedies, (38) 61.  
notes, (26) 560.  
remedies, (35) 856.  
studies, (40) 758.  
biochemistry, (37) 509.  
biometrical studies, (27) 341.  
black rot, notes, (30) 450; (37) 51.  
black rot, treatment, (31) 840.  
black rust, notes, (32) 240.  
black rust, studies, (31) 149.  
blackleg or canker, studies, (31) 448.  
blossom color inheritance, (40) 442.  
blue mold in, (33) 147; (39) 551.
- Tobacco**—Continued.  
breeding, (29) 538; (30) 836; (31) 138.  
breeding experiments, (26) 133; (27) 838; (28) 138; (29) 536; (30) 530; (32) 220; (33) 331; (34) 141; (35) 139; (38) 238, 526, 634.  
breeding in Dalmatia, (33) 137.  
budworm, studies, (37) 663.  
Burley, culture, (35) 534.  
Burley, marketing, (35) 792.  
burning quality, (36) 311.  
burning quality—  
as affected by alkali salts, (39) 34.  
determination, (33) 316.  
studies, (38) 139, 140, 238, 239.  
"carotting", (40) 442.  
caterpillar in Philippines, (30) 252.  
chemistry of, (33) 508.  
chemistry, progress in, (29) 413.  
cigar—  
filler, breeding, (27) 838.  
leaf, culture, (27) 37.  
leaf, curing by artificial heat, (27) 238.  
wrapper, burning quality, (33) 316.  
wrapper, culture in Philippines, (37) 339.  
coleopteran pest, (40) 170.  
composition, (33) 637.  
composition—  
and quality as affected by fertilizers, (33) 732.  
as affected by shade, (30) 430.  
at various stages of growth, (33) 436.  
correlation and inheritance in, (27) 535.  
cost of production, (27) 238; (31) 530; (37) 191, 226.  
critical period of growing season, (39) 811.  
crop of 1912, (28) 638.  
Cuban, classification, (34) 431.  
Cuban types, (26) 837.  
culture, (29) 538; (30) 140, 440, 737; (31) 524; (33) 734; (37) 37, 541; (39) 834.  
culture—  
and improvement, (28) 633.  
experiments, (26) 233, 422, 638; (27) 638; (30) 133, 229, 442, 632; (31) 733; (32) 137, 431; (34) 141, 142; (35) 135, 532; (36) 32, 513; (37) 734; (38) 137, 238, 336, 526, 527, 634; (39) 128, 229, 632; (40) 230, 332, 524, 735.  
for nicotin, (30) 140, 737.  
in Albania, (37) 445.

 mosaic, carrier, (40) 251.  
 mosaic disease—  
 bacterial origin, (37) 549.  
 characteristics, (31) 345.  
 distribution of virus, (34) 247.  
 infection experiments, (32) 643.  
 notes, (26) 181; (35) 752; (36) 451.  
 review of investigations, (33) 447.  
 studies, (28) 649, 746; (30) 450; (34) 52; (35)  
 751; (36) 647; (37) 150; (38) 49, 649; (39)  
 456, 549.  
 treatment, (35) 653.  
 mutation in, (30) 631; (31) 43; (33) 137.  
 nicotine content, variation, (27) 830.  
 of Java, analyses, (37) 419.  
 of Paraguay, (34) 38.  
 origin of alkaloids in, (27) 228.  
 Orobanche on, (39) 146.  
 parthenocarpy and parthenogenesis in, (33) 435.  
 phyllodination or string leaves of, (31) 641.  
 phylogenetic studies, (33) 435.  
 phylogeny of, (35) 436.  
*Phytophthora* disease, notes, (34) 744.  
 plant—  
 distribution of nicotine in, (26) 333.  
 enzymes of, (31) 204.  
 nicotine content, (29) 503.  
 wastes, nicotine content, (26) 413.  
 planting—  
 and harvesting dates, (26) 532  
 experiments, (38) 238.  
 plants, sealed by Paris green, (34) 351.  
 potash fertilizers for, (26) 526.  
 press cake, fertilizing value, (37) 411.  
 production and use in United States, (27) 739.  
 products, analyses, (34) 436.  
 relation to climate, (28) 27.  
 resin, chemistry of, (32) 713.  
 resistance to hydrocyanic acid gas, (31) 747.  
 Réunion, in Mauritius, (40) 442.  
 root rot—  
 notes, (26) 849; (33) 743.  
 strains resistant to, (36) 349.  
 studies, (35) 547; (36) 845; (39) 854.  
 treatment, (31) 840; (36) 32, 50.  
 rot bacteria affecting, (29) 345.  
 rotation experiments, (33) 731, 828; (36) 829.  
 Russian, composition, (28) 46.  
*Sclerotium* disease, studies, (37) 249.  
 seed beds, (30) 140; (40) 242.  
 seed beds—  
 disinfection, (34) 444.  
 management, (36) 32; (38) 634.  
 preparation, (26) 638; (35) 233.  
 steam sterilization, (31) 437; (36) 393; (40)  
 135.  
 treatment for gummosis, (28) 347.  
 seed—  
 cleaning, (29) 144.  
 cleaning and grading, (26) 638.  
 germination, (29) 739; (33) 636.  
 germination in darkness, (38) 127.  
 germination tests, (26) 44.  
 inspection, (39) 443.  
 leaf, changes in during resweating, (35) 208.  
 oil, analyses and use, (37) 411.  
 oil, composition, (35) 9.  
 planting directly in field, (31) 233.  
 production, (31) 138; (32) 740.

- Tobacco—Continued.  
 seed—continued.  
   studies, (39) 538.  
   treatment, (28) 446.  
 seeding device, (38) 137.  
 seeding experiments, (31) 438.  
 selection experiments, (38) 36, 741.  
 self-sterility in, (33) 129.  
 shading, (37) 729.  
 size inheritance in, (35) 819.  
 slug, notes, (40) 56.  
 smoke, effect on plants, (26) 230; (27) 254, 830;  
   (29) 30, 131; (34) 30.  
 smoke, effect on seedlings, (30) 131.  
 smoking qualities, (28) 637.  
 smoking tests, (27) 840.  
 soils, management, (37) 37.  
 sooty mold, studies, (27) 248.  
 South African, investigations, (26) 808.  
 spacing and topping experiments, (38) 36.  
 splitworm, remedies, (33) 351.  
 splitworm, studies, (30) 550.  
 spot disease, notes, (32) 544.  
 stalks as fertilizer, (30) 127.  
 statistics, (26) 595, 639; (33) 894.  
 stems—  
   analyses, (34) 521; (35) 128.  
   and stalks, analyses and use, (34) 519.  
   as vermifuge, (38) 885.  
   fertilizing value, (30) 835.  
   nematode on, (39) 250.  
 Stewart Cuban—  
   field tests with, (33) 137.  
   variety, (31) 334.  
 suck flies, studies, (39) 58.  
 suckering, (35) 533.  
 sun-cured, growing and curing, (27) 436.  
 tarnished plant bug affecting, (26) 638.  
 textbook, (33) 235.  
 thrips affecting, (31) 249.  
 tokra disease, notes, (36) 449; (38) 351.  
 topping experiments, (34) 141, 142; (35) 533, 534.  
 transpiration in, (30) 629.  
 treatise, (29) 265; (36) 142.  
 types, (28) 235.  
 unsatisfactory yields, (36) 628.  
 utilization of lithium salts by, (28) 527.  
 variation in, (31) 138; (37) 339.  
 variation in pure lines, (38) 238.  
 variation of flower size in, (33) 435.  
 varieties, (26) 638; (27) 37, 238, 838; (30) 525;  
   (31) 430, 733; (32) 137, 431, 740; (33) 728; (34)  
   142; (35) 532, 534; (36) 32; (37) 339, 729; (38)  
   33, 36, 238, 634.  
 varieties resistant—  
   to root rot, (31) 448.  
   to slime bacteria, (30) 749.  
   to *Thielavia*, (27) 249.  
 variety tests, (39) 128; (40) 229, 230, 332, 735.  
 warehouse and curing house troubles, (32) 844.  
 warehouses, cooperative, in Wisconsin, (28) 895.  
 waste, analyses, (40) 621.  
 waste, fertilizing value, (39) 429.  
 wildfire, notes, (38) 97, 150.  
 wildfire, studies, (38) 852.  
 wilt, control, (40) 243.  
 wilt, description, (31) 745.  
 wilt in Rangpur district of Bengal, (30) 50.  
 wilt, studies, (38) 250.  
 wilt, treatment, (38) 49.  
 wireworm, notes, (34) 757.  
 wireworm, studies, (31) 253.  
 worm injurious to potatoes, (37) 157.  
 worm, notes, (33) 352.  
 worm, Southern, parasites of, (30) 59.  
 worms, studies, (40) 62.  
 yield of first generation hybrids, (27) 839.  
 Tobosa grass as hay or silage crop, (38) 471.  
 Tofu, preparation, (32) 560.

  - examination, (38) 314.
  - fertilizer experiments, (27) 324; (29) 22, 434; (30) 532, 839; (36) 219, 839; (37) 41, 321; (39) 745, 843; (40) 42, 134, 147.
  - from blighted vines, composition, (35) 643.
  - fruit thinning experiments, (27) 741.
  - glutamic acid in, (27) 634.
  - grafting on cabbage, (35) 341.
  - graphic summary of seasonal work, (39) 495.
  - greenhouse diseases of, (36) 250, 350.
  - greenhouse, investigations, (29) 145; (32) 636.
  - growth—
    - as affected by carbon dioxide, (32) 422.
    - as affected by electric light, (28) 228.
    - in artificial light, (28) 735.
    - in heated soils, (35) 722.
    - in partially sterilized soils, (26) 815.
    - on sterilized soils, (31) 336.
  - hardening by exposure to cold, (40) 26.
  - inheritance—
    - and correlation in, (28) 739; (34) 146.
    - in, (27) 740, 742; (28) 539; (30) 343; (32) 538; (34) 42; (35) 141.
    - of size in, (33) 537; (35) 445.
  - insects affecting, (26) 353; (27) 240; (28) 654; (32) 636, 652.
  - irrigation, (31) 782; (33) 287.

Tomatoes—Continued.

- irrigation experiments, (29) 638; (30) 886; (31) 732.
  - lessons on, (35) 896.
  - lighting injury, (40) 645.
  - liming experiments, (39) 745.
  - localization of acids and sugars in, (36) 110.
  - lycopin and carotin in, (29) 132.
  - manual, (34) 737.
  - marketing by parcel post, (30) 593.
  - mulching v. clean culture, (33) 534.
  - nematodes affecting, (30) 245.
  - new bacterial disease of, (28) 345.
  - oil and press cake from seeds, (40) 803.
  - parthenogenesis in, (29) 837; (34) 233, 727.
  - Phytophthora infestans affecting, (29) 445; (36) 49, 451, 749.
  - picking maturity, (37) 543.
  - planting experiments, (32) 141.
  - pollination, (32) 636; (40) 741, 833.
  - preservation, (29) 312.
  - preservation by pressure, (32) 416.
  - preserved—
    - analyses and adulteration, (31) 358.
    - glutaminic acid in, (27) 364.
    - use of residue, (28) 660.
  - pruning and ringing, (40) 42.
  - pruning experiments, (26) 641; (33) 140.
  - radioactive fertilizers for, (35) 628.
  - rail shipments and distribution of, (33) 837.
  - recipes, (39) 165.
  - red pigment of, (32) 203.
  - red spider attacking, (39) 65.
  - reducing and nonreducing sugars in, (29) 503.
  - relation to cholera, (27) 766.
  - removal of Bordeaux mixture stains from, (35) 644.
  - resistance to cold, (39) 525.
  - resistance to Fusarium, (39) 150.
  - Rhizopus nigricans affecting, (30) 349, 351.
  - seed production and germination, (39) 841.
  - seed treatment, (39) 238.
  - seedless, production, (34) 233.
  - selection experiments, (40) 444.
  - selection for wilt resistance, (34) 646.
  - sodium nitrate for, (39) 328.
  - spraying, (39) 345, 756.
  - spraying and dusting experiments, (36) 750.
  - spraying in relation to delayed ripening, (39) 854.
  - straw mulch for, (39) 241.
  - transpiration as affected by Bordeaux mixture, (38) 126.
  - treatise, (37) 645.
  - variation in, (28) 639; (29) 339.
  - varieties, (26) 840; (29) 145, 235, 434, 745; (31) 47, 236, 439, 835; (32) 141, 438, 636; (33) 140, 438, 735; (34) 146, 232; (35) 539; (36) 137; (37) 645.
  - varieties—
    - for canning, (39) 241.
    - resistant to Cladosporium fulvum, (33) 247.
    - resistant to disease, (38) 843.
    - susceptible to Fusarium wilt, (29) 436.
  - variety tests, (39) 240; (40) 44.
  - variety tests, difficulties in, (29) 41.
  - vegetation and reproduction, (40) 40.
  - water content as affected by cooking, (26) 462.
  - winter, disease of, (38) 546; (40) 155.
  - yield as affected by crossing, (27) 239.
- Tomicus radiatae n.sp., description, (34) 361.
- Tomocera californica, parasitic on black scale, (26) 555.
- Tomostethus multinectus, notes, (26) 254.
- Tonics, bitter, effect on gastric secretion, (32) 858.
- Tonsillitis—
  - epidemics, milk-borne, (32) 577.
  - outbreak, due to milk supply, (26) 575.
- Topography—
  - of Iowa, (28) 316.
  - relation to frost, (28) 414.
- Tor grass, description and eradication, (29) 142.
- Torenia fournieri, mineral nutrition, (28) 224.
- Tornado—
  - at Owosso, Michigan, (26) 614.
  - at Pace, Fla., (34) 614.

## Trees—Continued.

- ornamental—continued.  
 notes, (29) 395.  
 of Dade County, Florida, (31) 239.  
 of Hawaii, (37) 546.  
 storm and drought injury to foliage, (33) 550.  
 tests, (36) 443.  
 treatise, (37) 44.  
 varieties, (29) 41, 235, 540; (36) 837; (38) 142.  
 varieties for Illinois, (28) 437.  
 withertip disease, (27) 152.  
 osmotic pressure as an index of habitat, (38) 348.  
 overthrow by wind, factors in, (39) 847.  
 penetration by solutions, (37) 327.  
 periodicity—  
 and annual ring formation, (28) 340.  
 of synthetic processes in, (27) 425.  
 planting, (26) 543; (27) 241, 299; (36) 843.  
 planting—  
 by farmers, (27) 542.  
 cooperative work, (27) 348.  
 fall v. spring, (33) 236.  
 in Colorado, (38) 643.  
 pastures, (26) 130.  
 plains region, (38) 348.  
 southern Rhodesia, (26) 49.  
 Texas, (37) 452.  
 methods, (33) 738.  
 on dry farms, (28) 49.  
 prairies, (32) 840.  
 sand dunes of Oregon coast, (38) 348.  
 school grounds, (28) 897.  
 sugar plantations in Hawaii, (38) 644.  
 with dynamite, (29) 339; (31) 590; (33) 90.  
 poisoning by gas, (31) 730.  
 Polyporaceae on, (39) 149.  
 propagating by cuttings, (40) 340.  
 propagation and pruning, (30) 236.  
 protection—  
 against rabbits and mice, (27) 344.  
 and surveillance, (27) 444.  
 in Malaya, (31) 50.  
 radial growth and annual ring formation, (36) 223.  
 red-belt injury, (40) 542.  
 regional spread of moisture in, (40) 541.  
 relation—  
 between root habits, ground water, and species distribution, (29) 136.  
 to rainfall, (27) 348.  
 to white grub injury, (35) 159.  
 to woodpeckers, (26) 58.  
 resinous tracheids, (39) 451.  
 resistance to gipsy moth attack, (28) 556.  
 resistance to sulphur dioxide, (31) 146.  
 ring formation, (28) 49, 340.  
 ringbarked, killing with arsenic, (34) 485.  
 ring-porous and diffuse-porous, (39) 122.  
 roadside, in North Carolina, (39) 245.  
 root disease affecting, (27) 445.  
 sap ascent in, (29) 524; (33) 827; (34) 727.  
 sap discharged by, (35) 648.  
 sap of, composition, (35) 822.  
 second growth phenomena, (28) 340; (30) 646.  
 secondary, seeding experiments, (33) 844.  
 seed, for reforesting cut-over areas, (33) 739.  
 shade—  
 acclimatization, (34) 231.  
 and ornamental, diseases, (40) 645.  
 and ornamental, protection, (26) 339.  
 and ornamental, varieties, (38) 842.  
 anthracnose of, (38) 249.  
 care, (31) 536.  
 course of study, (39) 798; (40) 96.  
 culture, (32) 839.  
 diseases of, (26) 57; (30) 151.  
 dying, (28) 345.  
 for Kansas, (28) 643.  
 for Maine, (35) 840.  
 for Oregon, (39) 241.  
 in Newark, New Jersey, (31) 744.  
 insects affecting, (27) 346, 452, 645, 658; (28) 57; (30) 454; (33) 153; (34) 250, 651; (35) 356, 756; (38) 257, 357; (39) 561, 863; (40) 161, 163, 259, 352.  
 management, (36) 842.  
 planting and care, (27) 645; (32) 541; (39) 450.

- Trees—Continued.  
 shade—continued.  
 pruning, (35) 840.  
 spraying, (26) 48.  
 varieties, (34) 231.  
 silver leaf disease, (39) 553.  
 snow cracks on, (36) 733.  
 snow injury to, (36) 448.  
 stand in relation to soil moisture, (33) 816.  
 standing—  
 determination of form, (27) 646.  
 volume and value accretion, (27) 245.  
 stem analyses, (31) 341.  
 stem analysis for growth studies, (38) 46.  
 street—  
 and park, for Wisconsin, (37) 145.  
 of New York City, (34) 345.  
 planting, (33) 143.  
 roadside, and farm, (40) 447.  
 selection, planting, and care, (27) 541.  
 study of in primary grades, (28) 897.  
 tannin content and starch formation in, (27) 828.  
 taper curves for, (33) 739.  
 tests at Belle Fourche, (40) 340.  
 textbook, (30) 196; (36) 794.  
 timber and rubber, of Costa Rica, (27) 147.  
 timber, of Philippines, (40) 152.  
 timber, of United States, (27) 147.  
 tolerance ranges, limiting factors, (40) 152.  
 toxic atrophy, (37) 147.  
 transpiration in, (27) 522.  
 transplanting, (27) 491; (35) 37; (38) 144.  
 treatise, (26) 140; (28) 642; (29) 842.  
 tropical, growth and rest of, (35) 431.  
 tropical, periodicity, (27) 42, 43.  
 use of explosives in tillage, (39) 445.  
 valuation of form, (26) 338.  
 varieties, (38) 641.  
 varieties for Hawaii, (38) 145.  
 volume—  
 and length measurements, (32) 543.  
 determination, (33) 843.  
 tables for, (27) 348; (34) 641, 743; (35) 748.  
 tables, frustum form factors in, (31) 640.  
 water conductivity of wood, (40) 821.  
 water table as factor in distribution, (30) 223.  
 winter—  
 and frost injuries, (29) 851.  
 identification, (26) 442.  
 injuries, (31) 49.  
 winterkilling, (27) 548.  
 wood-destroying fungi on, (39) 255.  
 wood-oil, of China and Japan, (30) 46.  
 young, harmful effect of grass and weeds on, (33) 645.
- Trefoil—  
 as green manure, (40) 24.  
 bird's-foot, liming experiments, (40) 322.  
 pollination experiments, (37) 735.  
 rate of seeding tests, (27) 836.  
 seed, germination energy of, (29) 538.  
 seed, vitality, (27) 740.  
 varieties, (27) 836.  
 yellow, culture, (30) 335.
- Trehalose, acetates of, (34) 408.
- Trematode—  
 larva encysted in a crab, (37) 558.  
 parasite of mosquitoes, (38) 562; (39) 660.
- Trematodes—  
 injurious to horses, (26) 384.  
 injurious to muskrats, (29) 484.  
 larval, from fresh-water snails, (39) 556.  
 of Australia, (32) 399; (33) 863.  
 of Australian birds, (39) 556.  
 of North America, (33) 863.  
 parasitic in equines, (27) 583.
- Trematopygus ericampoididis n.sp., description, (34) 363.
- Trembles in sheep, etiology, (33) 279.
- Trembling or louping ill in sheep, studies, (29) 681; (36) 83.
- Tremella fuciformis, culture in Japan, (35) 347.
- Trench—  
 diarrhea, carriers, (40) 884.  
 fever, studies, (39) 658; (40) 550.
- Trenching machinery, description, (34) 583.
- Treponema pallidum, studies, (27) 551.
- $\beta$ -Triacetylmethylxylosid, notes, (34) 408.
- Trianaodes bicolor, notes, (37) 847.
- Trialeurodes vaporariorum, see Aleyrodes tabaci.
- Triammonium citrate, manufacture and analyses, (32) 205.
- Triaspis—  
 spp., notes, (27) 864.  
 vestitica n.sp., description, (29) 563.
- Triatoma—  
 geniculatus, relation to mal de caderas, (30) 785.  
 infestans, relation to mal de caderas, (31) 82.
- Tribolium—  
 castaneum, studies, (38) 356; (40) 855.  
 confusum, remedies, (27) 258.  
 ferrugineum, notes, (34) 754.  
 navale, notes, (30) 655.  
 spp. in mills and warehouses, (39) 464.  
 spp., notes, (26) 453.
- Tribroma bicolor, character and habits, (35) 730.
- Tribulus—  
 spp., analyses and digestibility, (27) 871.  
 terrestris, analyses, (33) 466.  
 terrestris, analyses and digestibility, (32) 167
- Tricalcium—  
 arsenate, studies, (39) 310.  
 carbonate as affected by calcium carbonate, (26) 527.  
 phosphate—  
 determination, (32) 409.  
 fertilizing value, (36) 626.  
 for infants, (32) 857.  
 formation in mixed fertilizers, (34) 26.  
 solubility, (39) 23.
- Tricella acuminata n.g. and n.sp., description, (27) 746.
- Trichina—  
 biology, (34) 83.  
 encysted forms, in polar bear, (37) 483.  
 inspection, guide, (28) 482.  
 larvae in cerebrospinal fluid, (34) 881.
- Trichinae—  
 destruction by cold, (36) 680.  
 detection in pigs, (26) 485.  
 in pork in relation to sale warranty, (36) 662.  
 intestinal, studies, (40) 476.  
 transmission, (39) 685.
- Trichinella spiralis—  
 as affected by cold storage, (31) 356.  
 as affected by radium, (37) 578.  
 larvae as affected by cold, (30) 881.  
 larvae as affected by refrigeration, (34) 680.  
 life history, (37) 578.  
 notes, (26) 84.  
 studies, (34) 83.
- Trichiniasis—  
 diagnosis, (26) 84.  
 review of literature, (34) 478.  
 X-ray appearances, (39) 589.
- Trichinosis—  
 immunization, (37) 784.  
 in Denmark, (38) 787.  
 in dogs and cats, (29) 83.  
 in United States, (34) 276.  
 notes, (30) 685.  
 serum diagnosis, (26) 281.  
 serum therapy in, (40) 184.  
 studies, (28) 79; (36) 181.
- Trichocampus viminalis, notes, (30) 655.
- Trichosoma tibialis, notes, (30) 657.
- Trichlorethylene—  
 as a soy-bean oil extractor, (36) 580.  
 use in determination of fat, (26) 507.
- Trichobaris texana—  
 destruction by white fungus, (26) 454.  
 n.sp., description, (36) 556.
- Trichocephalus—  
 affinis, destructive to deer, (26) 653.  
 depressusculus, embryology, (30) 555.  
 trichius—  
 dissemination by flies, (30) 659.  
 relation to appendicitis, (26) 678.  
 transmission by flies, (38) 563.
- Trichocheilus (Pristoscelis) texanus, notes, (28) 451.
- Trichodectes—  
 hermsi—  
 n.sp., description, (34) 274.  
 n.sp., notes, (35) 255.  
 notes, (34) 552.  
 scalaris, control, (40) 652.  
 sphaerocephalus, notes, (32) 377.  
 spp., biology and remedies, (38) 184.

- Trichoderma**—  
 ammonifying power, (32) 29.  
 köningi—  
 notes, (30) 150.  
 on apple roots, (36) 351.  
 on rubber, (32) 347.  
 relation to sweet potato ring rot, (26) 748.  
 studies, (34) 156; (40) 347.  
 lignoruni, notes, (28) 246.  
 lignorum, studies, (34) 226.  
 sp., relation to apple rot, (33) 348.  
 spp. on conifer seedlings, (40) 545.
- Trichogramma**—  
 evanescens, development, (37) 856; (39) 265.  
 evanescens, studies, (40) 265.  
 japonicum, notes, (26) 63.  
 minutum—  
 notes, (29) 53, 658; (31) 752.  
 parasitic on bud moth, (34) 250.  
 parasitism, (33) 353.  
 studies, (37) 460, 569; (39) 265.  
 pretiosa—see also *Trichogramma minutum* and *Pentarthron minutum*.  
 notes, (27) 356.  
 parasitic on bud moth, (34) 250.  
 sp., life history and habits, (30) 256.  
 spp., notes, (30) 759.  
 spp., parasitic on codling moth, (34) 358.  
 spp., rearing experiments, (38) 164.
- Trichogrammatidae** of Australia, (28) 563; (39) 154.
- Trichogrammatodea signiphoroides** n.sp., description, (31) 355.
- Trichogrammatomyia tortricis** n.g. and n.sp., description, (36) 260.
- Trichogramminae**, European, synopsis, (35) 661.
- Tricholaena**—  
 rosea, analyses, (31) 863.  
 rosea, notes, (26) 362.  
 spp., analyses and digestibility, (32) 167.  
 teneriffae, analyses, (27) 68; (28) 463.
- Tricholoma**—  
 nudum, variations in, (32) 822.  
 personatum, prevalence in South Africa, (29) 461.
- Tricholyga sorbillans**, notes, (27) 865.
- Trichomagdalis** n.g. and n.sp., notes, (30) 357.
- Trichomalus apantelotenus** n.sp., description, (26) 63.
- Trichomonas**—  
 intestinalis, studies, (40) 186.  
 notes, (26) 246.  
 pullorum, notes, (37) 785.
- Trichomoniasis**—  
 in chicks, (37) 784.  
 intestinal, (37) 183.  
 intestinal, tissue-infection in, (36) 781.
- Trichomyia urbica**, biology, (32) 59.
- Trichomiscus roseus**, notes, (31) 758.
- Trichophyton felineum**, notes, (28) 783.
- Trichopria capensis**, parasitic on fruit flies, (31) 456.
- Trichoseptoria fructigena**—  
 notes, (27) 449; (29) 247; (30) 647; (38) 647.  
 on quince and apple, (34) 54.
- Trichosiphum** n.sp., description, (38) 857.
- Trichosoma strumosum**, notes, (31) 287.
- Trichosomum meleagris gallopavo** n.sp., notes, (28) 83.
- Trichosphaeria sacchari**, notes, (26) 445; (36) 846; (40) 157.
- Trichostibas parvula**, notes, (31) 752.
- Trichostrongylus**—  
 extenuatus, notes, (28) 481.  
 n.sp., descriptions, (29) 555.  
 spp. parasitic in man, (36) 577.
- Trichothecium** sp., notes, (27) 45.
- Trichothrips nigricans**, notes, (27) 155.
- Trichotoxon heynemanni**, notes, (29) 853.
- Trichuris**—  
 crenata, notes, (37) 779.  
 ovis in Philippines, (37) 277.  
 spp., physiological investigations, (31) 679.  
 (*Trichocephalus*) *trichiurus*, dissemination by flies, (30) 659.
- Tricolepsis** sp., notes, (35) 364.
- Tricresol**—  
 as a serum preservative, (33) 280.  
 as a soil sterilizer, (26) 322.  
 toxicity, (38) 283.
- Tridens flavus**—  
 cyanogen in, (33) 665.  
 hydrocyanic acid in, (35) 413.
- Trifolium**—  
 alexandrinum—  
 culture in Hawaii, (32) 730.  
 description and use, (30) 733.  
 notes, (29) 140.  
 angulatum, notes, (30) 440.  
 ash constituents of, (30) 334.  
 fragiferum—  
 culture experiments, (30) 632.  
 introduction into Victoria, (26) 833.  
 lupinaster—  
 culture experiments, (32) 36; (36) 436.  
 tests, (33) 632.  
 parviflorum, notes, (30) 440.  
 perenne, notes, (30) 434.  
 pratense perenne, notes, (31) 134.  
 repens as an adulterant of white clover seed, (26) 40.  
 resupinatum as a forage crop, (38) 230.  
 spp., comparative morphology, (31) 624.  
 studies, (29) 522.
- Triglyphothrix striatidens** in United States, (36) 859.
- Trigona clypeata**, notes, (27) 865.
- Trigonella foenum-graecum**—  
 as green manure, (39) 31.  
 culture experiments, (30) 228.
- Trigonellin**, occurrence in—  
 stachys tubers and citrus leaves, (26) 107.  
 sugar beets, (28) 810.
- Trigonoderus** spp. of North America, (38) 768.
- Triheptadecylene**, studies, (30) 110.
- Triketohydrindene hydrate**, use for detection of protein, (26) 804; (33) 207.
- Trimagnesium phosphate**, fertilizing value, (36) 626.
- Trimeromeris maculatus** n.g. and n.sp., description, (35) 262.
- Trimethylamin**—  
 assimilation by plants, (26) 32.  
 in dried herring roe, (29) 863.  
 in urine, (32) 764.  
 isolation from soils, (28) 418.
- Trinitrotoluene waste**, utilization, (29) 319.
- Triodontophorus** spp.—  
 anatomy and biology, (28) 887.  
 notes, (39) 686.
- Trionymus**—  
 n.spp., description, (40) 262.  
 violascens n.sp., description, (29) 255.
- Trioxys auctus**, notes, (31) 757.
- Triozoa**—  
 alacris—  
 notes, (37) 157, 849.  
 occurrence in California, (26) 859.  
 studies, (39) 360.  
 tripunctata, notes, (28) 752.
- Triozinae**, notes, (26) 149.
- Tripe**, preparation, (28) 860; (35) 317.
- Triphenin**, periodids of, (34) 502.
- Triphleps**—  
 insidiosus—  
 notes, (28) 250; (32) 654.  
 parasitic on red spider, (32) 157.  
 relation to corn-ear rot, (36) 55.  
 tristicolor, (29) 261.
- Tripodosporium tenue** n.sp., description, (36) 245.
- Tripotassium nitrophenoldisulphonate**, preparation, (26) 110.
- Tripsacum**—  
 and *Euchlaena*, hybrid between, (36) 27, 28.  
 dactyloides, analyses, (27) 68.  
 dactyloides as host of curlew bug, (27) 162.
- Triraphis ramosissima**, analyses and digestibility, (32) 167.
- Trirhabda**—  
 brevicollis, notes, (31) 751; (33) 50.  
 canadensis, notes, (35) 656.
- Trissolcus trinidadensis** n.sp., description, (31) 554.
- Tristania conferta**, strength and elasticity tests, (27) 43.
- Trithiobenzaldehyde**, isolation from soils, (28) 418.
- Triticum**—  
 and *Aegilops*, hybrids between, (30) 341.  
 dicoccum dicoccoides, notes, (28) 761.  
 eloboni, inheritance in, (40) 525.  
 monococcum, origin, (30) 531.  
 polonicum, inheritance in, (40) 140, 525.  
 spp., chromosome numbers in, (27) 636.  
 spp., relationship, (26) 827.  
 vulgare and *T. monococcum*, cross between, (30) 140.

- Tritoxa flexa*, notes, (29) 454; (34) 360.  
*Triumfetta semitriloba*, description, (28) 829; (30) 35.  
*Trocarocephalus strangulatus*, notes, (29) 858.  
*Trogoderma tarsale*—  
 larvae of, (38) 467.  
 life history and habits, (29) 55.  
*Trollius caucasicus*, carotinoid content, (31) 803.  
*Trombidiasis*—  
 in goats, (31) 480.  
 of man and domestic animals, (31) 284.  
*Trombididae*, synopsis, (27) 565.  
*Trombidium*—see also Chiggers.  
 akamushi, studies, (40) 554.  
 holosericeum, remedies, (34) 682.  
 sp., notes, (33) 354.  
*Tropaeolum*, inheritance in, (36) 729.  
 Tropical—  
 diseases, manual, (32) 177.  
 medicine and hygiene, treatise, (35) 379.  
*Tropidia quadrata*, notes, (36) 460.  
*Tropidobracon meromyzae* n.sp., description, (31) 355.  
*Tropidocera*, development of eggs, (33) 681.  
*Tropidopria conica*, notes, (26) 254.  
*Tropidosteptes cardinalis*, notes, (35) 255.  
 Tropin research, technique and methods, (26) 676.  
*Tropinota turanica*, biology, (31) 159.  
 Tropins—  
 and opsonins, bacterial, notes, (32) 78.  
 bacterial, determination in horse serum, (27) 182.  
 Tropisms in lupine seedlings, (31) 325.  
 Trout—  
 brook, poisoning by rose chafers, (35) 279.  
 brown, respiratory exchange in, (32) 565; (33) 661.  
 growth, variability, and correlation in, (28) 173.  
 Trout-perch breeding in rice fields, (30) 676.  
 Truck crop—  
 aphids, control, (40) 163.  
 diseases, (39) 354, 649.  
 diseases in Florida, (38) 48.  
 diseases in Texas, (26) 645.  
 diseases, notes, (28) 238; (32) 641; (38) 648.  
 industry in United States, (37) 543.  
 insects in Louisiana, (40) 57.  
 organization in Monmouth Co., N. J., (39) 746.  
 pests in Georgia, (35) 461.  
 seed beds, steam sterilizing, (40) 135.  
 Truck crops—  
 culture—  
 experiments, (36) 839.  
 in Georgia, (34) 436.  
 south Mississippi, (30) 639.  
 southern New Jersey, (35) 643.  
 West Virginia, (30) 40.  
 on Yuma irrigation project, (29) 226.  
 fertilizers for, treatise, (29) 837.  
 insects affecting, (28) 156, 238, 854; (29) 853; (30) 853; (32) 753; (34) 851; (35) 461; (37) 157, 356, 459; (38) 157, 257, 459, 558.  
 irrigation experiments, (33) 683.  
 irrigation in Florida, (36) 734.  
 marketing, (31) 894.  
 marketing cooperatively, (30) 591.  
 on Truckee-Carson project, (28) 839.  
 protection against frost, (26) 214; (33) 237.  
 spraying costs, (38) 558.  
 treatise, (30) 639.

 Truck—  
 farming, handbook, (27) 644.  
 farms in New Jersey, (40) 299.  
 farms, renting in southwestern New Jersey, (35) 892.  
 gardening—  
 in Florida, treatise, (26) 237.  
 North Carolina, (28) 339.  
 gardens, automatic irrigation for, (28) 382.  
 growers' cooperative organization in Virginia, (27) 389.  
 marketing, cooperative, (40) 488.  
 soils of Atlantic coast region, (29) 416.  
 Truckers' association in Maryland, (26) 791.  
 Trucking—  
 in Florida, treatise, (30) 442.  
 Ohio and Kanawha River valleys, (31) 44.  
 Texas, (31) 439.  
 Trucks, see Motor trucks.  
 Truffle sausages, adulteration, (26) 258.  
 Truffles, conservation, (36) 615.  
 Trumbull County experiment farm, (35) 94.  
 Trumpet creeper—  
 leaf miner, notes, (27) 347.  
 notes, (27) 346.  
 Trypsinase, activity in diseased potatoes, (26) 548.  
 Trypanblue, use against—  
 bovine piroplasmosis, (32) 273, 682.  
 canine piroplasmosis, (26) 882.  
 equine biliary fever, (32) 278.  
 infectious anemia, (26) 483.  
 Texas fever, (26) 382; (29) 658.  
 tuberculosis, (33) 481.  
*Trypanidae*, Ethiopian genera, (39) 362, 467.  
*Trypanoplasma*, notes, (26) 246.  
*Trypanosoma*—  
 americanum, studies, (27) 82; (29) 680; (30) 882.  
 boylei n.sp., notes, (27) 555.  
 brucei, life cycle, (35) 366.  
 congolense infection in swine, (38) 485.  
 cruzi, transmission by Reduviidae, (30) 853.  
 cruzi, transmission by *Rhipicephalus sanguineus*, (31) 159.  
 equinum, transmission by *Chrysops* spp., (31) 82.  
 equiperdum—  
 in European Russia, (29) 479.  
 infection in dogs, (38) 484, 485.  
 morphology, (30) 282.  
 studies, (26) 88.  
 treatment, (28) 478.  
 evansi—  
 relation to flies, (27) 58.  
 schizogony in, (28) 180.  
 transmission by insects, (31) 777; (37) 180.  
 transmission by lice, (28) 756.  
 franki, relation to *T. theileri*, (26) 84.  
 gallinarum, development in *Glossina palpalis*, (27) 787.  
 gambiense—  
 development in ducks, (27) 787.  
 development in *Glossina palpalis*, (26) 150.  
 relation to antelopes, (28) 80.  
 hippicum—  
 infection of mules by, (27) 82.  
 investigations, (27) 480.  
 lesions caused by, (26) 679.  
 notes, (27) 783; (28) 784.  
 reduction of virulence in, (26) 884.  
 transmission by house flies, (26) 656, 884; (27) 457.  
 leporis-sylvaticus n.sp., description, (27) 81.  
 lewisii—  
 pathogenicity, (31) 82.  
 studies, (33) 159.  
 n.spp., descriptions, (27) 82; (34) 480.  
 rhodiense—  
 development in *Glossina morsitans*, (28) 255.  
 relation to game, (34) 187.  
 simiae n.sp., studies, (30) 79.  
 spp., notes, (27) 783, 884.  
 spp., occurrence in Gambia, (26) 486.  
 spp., studies, (30) 80.  
 spp., transmission by *Glossina* spp., (26) 151.  
 spp., transmission by stable fly, (26) 150.  
 theileri—  
 notes, (30) 782.  
 of cattle in Panama, (39) 84.  
 vesperillonis, nonpathogenicity for laboratory animals, (33) 552.  
 Trypanosome—  
 anaphylatoxin, studies, (37) 578.  
 disease of camels, notes, (26) 85.  
 disease of horses, immunization, (28) 784.  
 diseases—  
 diagnosis, (27) 480, 783; (30) 580; (36) 578.  
 immunity to, (29) 379.  
 immunization, (29) 380; (32) 81.  
 in Anglo-Egyptian Sudan, (30) 679.  
 in German East Africa, (30) 781.  
 studies, (30) 381.  
 transmission by game, (30) 781.  
 treatise, (29) 77.  
 treatment, (31) 284.  
 from *Conorhinus rubrofasciatus*, (27) 555.  
 new, in cattle in Uruguay, (26) 584.  
 of Vinchuca, studies, (34) 580.  
 Trypanosomes—  
 agglutination tests with, (28) 282.  
 as affected by liver and serum, (30) 381; (32) 780.  
 concentrating in peripheral blood, (39) 84.  
 dead, immunizing with, (32) 374.  
 development in invertebrate hosts, (32) 399.

- Trypanosomes—Continued.**  
 differentiation, (30) 580.  
 East African, antigenic properties, (33) 282.  
 effect on heat production in rabbits, (29) 479.  
 filterability, (34) 880.  
 immunity reactions with, (29) 176.  
 in a cow in England, (28) 885.  
 beef cattle, (28) 284.

 from bovines, examination, (26) 281.  
 Gossio's vital reaction for, (31) 880.  
 granulated, detection, (31) 777.  
 granulated, staining, (31) 777.  
 growth as affected by anilin dyes, (37) 481.  
 growth in arsenic solutions, (35) 281.  
 human and bovine—  
   differentiation, (26) 582, 783; (27) 480; (29) 382; (30) 283; (32) 181; (38) 285.  
   double infection with, (31) 580.  
   effect of daylight and drying on, (33) 282.  
   in children, (29) 286; (32) 878.  
   investigations, (26) 281.  
   relationship, (27) 579, 783, 784, 884, 885.  
   relative importance, (26) 178, 680.  
   separation, (31) 580, 778, 881.  
 human, in milk of vaccinated cows, (29) 583.  
 human, metabolism of, (33) 769.  
 human type, in cattle, (34) 581.  
 hydrolysis, (28) 585.

## Tubercle bacilli—Continued.

- identifying, (38) 485.
  - immunizing tests on guinea pigs, (34) 82.
  - in apparently nontuberculous animals, (34) 277.
  - bile of tuberculous animals, (29) 582; (31) 481.
  - blood of bovines, (33) 84.
  - blood stream of tuberculous subjects, (28) 283.
  - butter, (31) 576; (37) 481.
  - certified milk, (37) 881.
  - cheese, (28) 278.
  - circulating blood, (26) 281; (27) 480; (30) 283, 581, 683, 783; (31) 83; (32) 476.
  - dairy products, (28) 372.
  - Edinburgh milk supply, (32) 674.
  - feces, blood, and milk of cows, (32) 376.
  - feces of dairy cattle, (37) 879.
  - healthy udder tissue of cows, (31) 777.
  - market milk, (31) 674.
  - milk, (36) 278, 573.
  - milk and lymphatic glands of bovines, (26) 281.
  - milk and milk products, (27) 878.
  - nontuberculous respiratory passages, (33) 678.
  - sputum, (29) 382, 582; (30) 482; (36) 383; (38) 486.
  - sputum and other body fluids, (36) 680.
  - street dust, (38) 885.
  - uncooked food, (26) 880.
  - whey, resistance to heat, (26) 779.
  - indicators for, (40) 584.
  - inhalation of, (26) 179.
  - intra-peritoneal lysis of, (31) 778.
  - isolation and cultivation, (35) 783.
  - isolation and preparation from diseased organs, (29) 381.
  - lipase of, (29) 177.
  - lipoid-free, immunizing tests with, (29) 782.
  - longevity in milk, (37) 378.
  - longevity outside animal body, (38) 81.
  - mammalian, fate of in sparrows and chickens, (36) 81.
  - microscopical detection, (33) 387.
  - modification by passage through animals, (26) 886.
  - new culture medium for, (29) 380; (36) 383.
  - nutrition with mineral substances, (29) 381.
  - of swine tuberculosis, (27) 287.
  - passage through the skin, (27) 183.
  - permeability for fat soluble dyes, (29) 177.
  - permeability of ultramicroscopic forms, (28) 677.
  - potentiometer test, (38) 284.
  - reactions to sperm oil and its constituents, (35) 784.
  - resistance of animals toward, (27) 381.
  - resistance of cows toward, (27) 383.
  - resistance to heat, (26) 582; (35) 487.
  - retention in lymphatic glands, (30) 483.
  - sensitiveness to acids, (38) 80.
  - spores, studies, (29) 582.
  - stability in living animals, (26) 885.
  - staining, (26) 379, 887; (39) 82.
  - staining with carbol fuchsin, (37) 180.
  - studies, (33) 178.
  - thermal death point, (36) 474, 877.
  - tissue reactions, (38) 485.
  - types, (28) 780; (33) 85; (34) 575; (38) 588.
  - virulence, (38) 380.
  - virulence in "rayed caseation," (31) 481.
  - virulence of different types, (32) 677.
  - vitality of, (29) 178.
  - vitality outside the body, (37) 782.
- Tubercle**—
- bacteria of legumes, studies, (26) 824.
  - endotoxin, effect on opsonins in healthy rabbits, (26) 180.
  - wax, antigenic properties, (35) 883.
- Tubercles**—
- of fowls, fat content, (28) 785.
  - permeability for—
    - fat-soluble dyes, (29) 177.
    - iodine compounds and proteins, (28) 584.
  - vital staining of, (30) 80.
- Tubercular**—
- infection, defense of organism against, (35) 784.
  - processes, determination of age, (29) 381.
  - septum, nasal, in bovines, (27) 184.
- Tubercularia coccicola n.s.p.**, description, (39) 52.
- Tuberculides** in bovines, (32) 181.

## Tuberculin—

- activator for, (27) 885.
  - anaphylaxis, notes, (27) 381.
  - aqueous, precipitation, (26) 85.
  - avian, diagnostic value, (26) 380.
  - Besredka, diagnostic value, (33) 283.
  - chemistry of, (30) 182.
  - composition, (31) 285.
  - delayed reactions following injection, (34) 187.
  - diagnostic value, (26) 485, 676; (35) 575.
  - distribution, (28) 476.
  - effect on—
    - autolysis, (27) 183.
    - nontubercular guinea pigs, (29) 480.
    - the healthy organism, (31) 182.
  - from different tubercle bacilli, tests, (31) 482.
  - Hochst's new, tests, (26) 180.
  - hypersensitiveness to, (30) 283; (31) 482.
  - in diagnosis and treatment, manual, (30) 284, 382.
  - reaction—
    - analyses, (32) 879.
    - conjunctival, diagnostic value, (35) 384.
    - diagnostic value, (26) 180.
    - in bovines, studies, (27) 481.
    - pigs, (33) 877.
    - studies, (35) 883.
  - retests with, (29) 885.
  - test—
    - and retest, (38) 380.
    - application, (38) 179.
    - avian, value, (36) 480.
    - certificates for cattle exhibits, (38) 179.
    - combined and follow-up systems, (36) 383.
    - description, (38) 81.
    - effect on milk yield, (39) 288.
    - for chickens, (27) 181.
    - East Indian buffaloes, (26) 378.
    - fowls, (31) 582.
    - guinea pigs, (39) 288.
    - guinea pigs and rabbits, (33) 283.
    - imported cattle in Germany, (26) 282.
    - in certified dairies, (34) 880.
    - Hawaii, (31) 177.
    - North Carolina, (29) 383.
    - Wisconsin, (32) 275.
    - intra-dermal, application to eyelid, (32) 477.
    - intra-dermal, notes, (27) 382; (31) 177.
    - intra-palpebral and intra-dermic palpebral, (32) 780.
    - intra-palpebral, studies, (34) 385.
    - investigations, (26) 282, 283; (35) 576.
    - limitations, (26) 783; (36) 676.
    - new methods, (27) 77.
    - notes, (26) 583; (27) 381, 576; (29) 79, 885; (30) 180, 482; (34) 274; (36) 378, 474.
    - nullifying, (28) 283.
    - paper on, (29) 499.
    - reliability, (29) 178, 179.
    - studies, (33) 387; (34) 278.
    - subcutaneous, diagnostic value, (26) 283.
    - technique, (38) 182.
    - thermal, diagnostic value, (26) 379.
    - value and use, (27) 83.
  - tests—
    - and post-mortem findings, studies, (26) 282.
    - comparison, (29) 583.
    - notes, (39) 679.
    - potency, (40) 680.
  - therapeutic value, (32) 182, 183.
  - turtle, use against tuberculosis, (30) 284.
  - use, (34) 679.
- Tuberculina**—
- maxima—
    - studies, (34) 750.
    - use against pine blister rust, (31) 50.
  - nomuriana n.s.p., description, (35) 348.
  - sp. attacking Cronartium, (38) 253.
- Tuberculinization**, historical survey, (39) 890.
- Tuberculinum purum**, use against tuberculosis, (26) 284.
- Tuberculo-protein**, hypersensitiveness to, (26) 181, 182; (30) 283.
- Tuberculosan**—
- notes, (29) 886; (31) 882.
  - tests, (26) 680, 681; (29) 384.
- Tuberculosis**—
- active and inactive in bovines, differentiation, (29) 583.
  - and blastomycosis, (39) 187.

## Tuberculosis—Continued.

- and our livestock industry, (40) 681.
  - and pearl disease, (30) 582.
  - antigen for, (29) 583; (38) 786.
  - antigen for complement fixation, (36) 81.
  - as affected by organ extracts, (26) 484.
  - atypical, in slaughtered animals, (20) 882.
  - avian—
    - and mammal, relationship, (26) 178.
    - blood picture in, (29) 285.
    - diagnosis, (30) 381; (34) 880; (36) 480.
    - etiology and control, (33) 389.
    - growth and virulence of causative organisms, (30) 482.
    - immunization, (36) 881.
    - in mammals, (26) 583.
    - in pigs, (33) 282, 283; (34) 277.
    - in swine, (40) 185.
    - notes, (27) 181, 381; (29) 273; (32) 480, 585, 778; (35) 576, 786; (36) 179.
    - studies, (27) 686; (28) 476, 883; (31) 581, 582.
    - transmission to hogs, (31) 683.
    - transmission to man, (31) 581.
  - biochemistry and chemotherapy, (28) 584; (29) 177; (30) 80; (33) 481, 482, 677, 877; (35) 181; (39) 685.
  - blood transfusion in treatment, (40) 385.
  - bovine, (39) 582, 679.
  - bovine—
    - and porcine, virulence of apparently sound tissue in, (37) 583.
    - causes, (26) 178.
    - continuous temperature records, (36) 82.
    - control, (27) 286; (38) 687, 887.
  - bovine, control in—
    - Colorado, (32) 581.
    - dairy herds, (38) 81.
    - Germany, (27) 482.
    - Great Britain, (30) 382.
    - Hawaii, (34) 477; (39) 679.
    - Minnesota, (38) 282.
  - bovine—
    - cycle, (27) 83.
    - detecting, (26) 583; (40) 782.
    - diagnosis, (26) 484, 679; (27) 184, 286, 382, 482; (28) 380, 679; (29) 178, 885; (30) 883; (31) 379; (33) 387, 481; (35) 74; (36) 579; (37) 80; (38) 887.
    - early stages, (29) 286.
    - eradication, (29) 78, 286, 287; (30) 273, 383; (32) 780; (33) 85; (37) 379; (38) 82, 380, 686.
    - frequency, (26) 178.
    - immunization, (28) 180; (29) 384, 480, 499, 884; (30) 482; (31) 85, 779; (32) 679; (34) 185, 575, 581, 678; (38) 81.
  - in Argentina, (40) 86.
  - children, (34) 673; (37) 782.
  - Hawaii, (37) 374.
  - horses, (37) 378.
  - Illinois, (34) 185.
  - man, (37) 879.
  - Queensland, (38) 182.
  - the Punjab, (39) 491.
  - increasing resistance to, (34) 478.
  - infectiousness, (31) 284.
  - intra-dermal test for, (34) 185.
  - investigations, (26) 887; (27) 82; (29) 178; (31) 881.
  - nature and treatment, (28) 585.
  - New York commission on, (31) 498.
  - notes, (27) 682, 885; (29) 79; (30) 381; (31) 80; (36) 81.
  - notes and treatment, (28) 679.
  - nurse cow factor, (38) 179.
  - physical examination and clinical diagnosis, (34) 184.
  - prevention, (29) 886.
  - prophylaxis in, (26) 485.
  - serous, (33) 282.
  - spread among farm animals, (34) 678.
  - studies, (36) 579; (40) 86.
  - transmission by swine, (38) 684.
  - transmission to man, (28) 375, 585, 780; (30) 382, 581; (31) 285, 779; (32) 271; (33) 85.
  - transmission to offspring, (33) 278.
  - treatise, (28) 883; (30) 82; (38) 286.
  - treatment, (29) 384; (32) 182.
- canine and human, relation, (35) 181.
- caseation in, (32) 274.
- cause and eradication, (29) 179.

## Tuberculosis—Continued.

- caused by inhalation, (30) 381; (32) 181, 274.
- causes of, treatise, (39) 890.
- chemotherapy, (29) 481; (36) 278, 279; (37) 379.
- complement fixation in, (28) 885; (39) 82; (40) 481, 886, 887.
- complement-fixing antibodies in, (31) 882; (32) 181.
- control, (39) 288, 390, 582, 679, 862; (40) 380, 577, 681, 778.
- control by milk commissions, (38) 381.
- control in—
  - Belgium, (26) 378.
  - England, (36) 275.
  - France, (27) 885.
  - Germany, (27) 784.
  - Michigan, (37) 274.
  - Norway, (33) 85.
  - Oregon, (37) 374.
  - Pennsylvania, (37) 577.
  - Sweden, (28) 781.
  - Wisconsin, (32) 275.
- cutaneous, in man, (28) 180.
- delayed or latent infection, (37) 378.
- diagnosis, (26) 85, 180, 181, 283, 284, 379, 578, 582, 783; (27) 480, 481, 580, 681, 784, 885; (28) 284, 377; (29) 285, 382, 583; (30) 482; (31) 181, 379, 481, 878, 880; (32) 179, 181, 183, 376, 878; (34) 81; (35) 575; (36) 181, 278, 676, 881; (40) 680.
- diagnosis—
  - complement-fixation test, (37) 180, 481.
  - intrapalpebral test, (36) 579, 779.
  - of open cases, (38) 179.
- disease resembling in guinea pigs, (39) 686.
- effect on—
  - chemical composition of the animal body, (35) 883.
  - opsonins in healthy rabbits, (26) 180.
  - organs and tissues of rabbits, (28) 280.
- equine—
  - description, (26) 282.
  - investigations, (29) 385.
  - notes, (38) 486.
  - symptomatology, (29) 479.
- eradication, (27) 77, 382, 475, 482, 576; (31) 380, 676, 882.
- eradication from cattle and swine, (38) 686.
- eradication from herds, (29) 500, 886.
- experimental epidemiology in, (36) 81.
- fallacies in royal commission report, (28) 679.
- hemolytic reactions in, (26) 379.
- human and bovine—
  - differentiation, (26) 281.
  - method of infection, (26) 484.
  - relation, (26) 886; (27) 381, 480, 784; (29) 479, 884; (30) 882; (31) 182, 676; (35) 75, 181; (37) 80, 181.
- human—
  - bone and joint, (37) 181.
  - bovine, and avian, relation, (31) 581.
  - control, (29) 382.
  - control in England, (31) 779.
  - forms of, (26) 680.
  - immunization, (29) 884.
  - investigations, (26) 884.
  - transmission to bovines, (26) 378.
  - types of bacilli in, (35) 576.
- immune blood transfusion for, (40) 385.
- immunity, review of investigations, (28) 180.
- immunity studies, (33) 480.
- immunity to, (26) 181.
- immunization, (26) 181, 284, 379, 380, 578, 584, 676, 680, 681; (27) 184, 383, 482, 682; (28) 180, 585, 680; (29) 79, 481, 584, 782, 886; (30) 582, 782; (31) 380; (32) 182, 183, 275, 375; (33) 181, 284, 481, 878; (34) 274; (35) 883; (37) 880.

- udder of bovines in Sweden, (31) 482.
- open, diagnosis, (33) 678; (36) 675.
- open, detection in bovines, (29) 384.
- open liver, in bovines and pigs, (30) 581.
- origin and development, (27) 579.
- papers on, (27) 77.
- prevention, (27) 480.
- primary pudic and vaginal, in bovines, (31) 481.
- problem in relation to meat inspection, (40) 577.
- production in guinea pigs, (35) 281.
- pulmonary—
  - diagnosis, (27) 83, 382; (32) 181; (33) 181; (34) 581; (35) 180.
  - induced by inhalation, (30) 82.
  - infection, (39) 288.
  - prognosis, (32) 879.
- relation to—
  - buffaloes' milk, (36) 573.
  - cockroaches, (26) 347.

## Tuberculosis—Continued.

- relation to—continued.
  - diet, (31) 464.
  - fibrosis, (26) 179.
  - Johne's disease, (29) 284.
  - milk supply, (26) 275; (28) 276, 674; (30) 574; (32) 472.
  - review of literature, (29) 582.
  - serum diagnosis, (32) 179; (33) 283.
  - serum, specific action of, (30) 183, 184.
  - serum test, (39) 80.
  - studies, (26) 181; (27) 285, 783; (34) 575.
  - testing purebred herds for, (38) 286.
  - therapy of, (28) 284, 585.
- transmission—
  - by factory-infected candy, (34) 366.
  - by house flies, (26) 61.
  - by milk, (30) 882.
  - from animal to man, (27) 579.
  - from man to bovine, (26) 680.
  - treatment, (26) 284, 578; (27) 378, 384, 480, 682, 888; (28) 679; (30) 184, 284, 683; (31) 583; (32) 182, 375, 880; (33) 677, 877; (37) 275, 880.
  - treatment by transfusion of immune and normal blood, (40) 385.
  - treatment with enzymes, (31) 607.
  - use of protein diet against, (31) 84.
- Tuberculous—
  - antibodies, production in sound animals, (28) 585.
  - antigens and antibodies, inhibition reaction of, (31) 481.
  - antigens, preparation, (26) 783.
  - excretions, examination, (27) 885.
  - foci, old, virulence in bovines, (29) 479.
  - infection, immune reaction to, (37) 275.
  - material, inhalation by cats, (30) 183.
  - sputum, chemical properties, (29) 782.
  - tissue—
    - as antigens in complement fixation reaction, (29) 285.
    - chemical changes in, (40) 584.
    - iodin in, (33) 283; (34) 580.
- Tubers—
  - etherized, enzymatic activities of, (30) 728.
  - formation, (30) 29.
  - hemicellulose in, (30) 130.
  - sampling device for, (37) 711.
  - starchy, analyses, (28) 359.
  - translocation of mineral constituents, (34) 427.
- Tubes, circular, stress analysis of, (29) 593.
- Tufa cement, tests, (28) 589.
- Tule, fertilizing value, (38) 520.
- Tulp—
  - Botrytis disease, (39) 858.
  - bulbs as food, (32) 855.
  - bulbs, culture experiments, (30) 145.
  - diseases, notes, (27) 851.
  - diseases, treatment, (35) 51.
  - poplar, characteristics and value, (37) 147.
  - soft scale, notes, (27) 755.
  - tree, fertilizing value, (29) 215.
  - tree scale, notes, (28) 554; (33) 58, 253.
  - trees, description, (27) 442.
- Tulips—
  - as affected by stimulants, (26) 731.
  - breaking sickness in, (35) 550.
  - certificated by Royal Horticultural Society, (31) 340.
  - classification, (37) 836.
  - culture experiments, (37) 836.
  - fungus disease affecting, (26) 851.
  - manual, (31) 48.
  - studies, (39) 144, 653.
- Tulipwood, description, (27) 442.
- Tulucuna fat, detection, (29) 613.
- Tumalo irrigation project in Oregon, (34) 85.
- Tumbleweed, water requirement, (32) 127.
- Tumbling mustard, eradication, (39) 744.
- Tumidiscapus—
  - new genus, description, (26) 152.
  - oophagus n.sp., description, (38) 661.
- Tumor—
  - growth, control, (39) 666.
  - hereditary, in *Drosophila*, (40) 860.
  - immunity, notes, (38) 580.
- Tumors—
  - chemistry of, (32) 78.
  - diagnosis, dialysis method, (31) 877.
  - immunization, (33) 477.
  - in domestic fowl, (34) 480.

- Tumors**—Continued.  
 in man and plants, relationship, (34) 249, 845.  
 malignant, origin of melanotic pigment in, (27) 468.  
 plant and animal, comparison, (29) 548.  
 spontaneous, in chickens, (31) 485.  
 treatise, (31) 280.  
 treatment, (29) 476.
- Tung tree**, culture in United States, (30) 535.
- Tunis grass**—  
 culture experiments, (38) 630, 831.  
 culture in Arizona, (32) 226.  
 culture in Hawaii, (32) 729.  
 culture in Philippines, (26) 361, 362.  
 notes, (29) 233, 428.
- Tupelo**, distillation value, (32) 48.
- Turbidimeter**, new, description, (31) 615.
- Turdus avnolaschkae pallasi**, coccidiosis in, (27) 187.
- Turcena juncoidea n.sp.**, description, (33) 545.
- Turf**—  
 as bedding for cattle and horses, (37) 723.  
 digestibility, (32) 862.  
 for golf courses, treatise, (37) 146.  
 meal as filler for feeding stuffs, (30) 672.
- Turicin**—  
 properties, (31) 309.  
 synthesis, (31) 310.
- Turkey**—  
 fat, constants, (27) 111.  
 gnat, notes, (29) 454.  
 industry in United States, (37) 573.
- Turkeys**—  
 aberrant intestinal protozoan parasites, (35) 684.  
 as egg producers, (27) 774.  
 breeding and management, (33) 77.  
 care and management, (34) 377; (39) 176.  
 eating of alfalfa caterpillar by, (32) 58.  
 hatching and rearing artificially, (26) 95.  
 management, (40) 177.  
 protozoan organisms in rectal and cecal contents, (26) 684.  
 raising, (36) 384, 871.  
 raising and marketing, (37) 573.  
 raising with special reference to blackhead, (35) 284.  
 serum proteins of, (32) 861.  
 tick infesting, (33) 354.  
 treatise, (26) 270; (31) 271.
- Turmeric leaf**—  
 disease, notes, (27) 747; (38) 548.  
 spot, notes, (28) 241.
- Turnip**—  
 aphid, notes, (37) 254.  
 bacterial soft rot, description, (32) 148.  
 cake, analyses, (26) 267, 363.  
 clubroot, notes, (32) 48.  
 clubroot, treatment, (38) 646.  
 finger-and-toe disease—  
 prevention, (35) 522.  
 treatment, (26) 342; (30) 848; (31) 424.  
 flavor in butter, (32) 270.  
 flavor, removal from milk, (26) 673.  
 flea-beetle—  
 notes, (29) 761.  
 remedies, (32) 851; (33) 158.  
 striped, in Maryland, (38) 154.  
 flower beetle, notes, (27) 457.  
 gall weevil, notes, (35) 467.  
 leaf silage, notes, (27) 669.  
 leaf spot, studies, (37) 753.  
 louse, investigations, (34) 452.  
 moth larvae injurious to tobacco, (31) 60.  
 sawfly, notes, (38) 164.  
 seed, germination as affected by turpentine and paraffin, (32) 851.  
 seed in Denmark, (37) 742.  
 seed, vitality, (27) 740.  
 shoots, use in salads, (40) 864.  
 tops, dried v. ensiled, energy value, (32) 768.  
 weed, notes, (34) 532.
- Turnips**—  
 analyses, (27) 334, 469; (32) 465; (36) 65.  
 analyses and feeding value, (32) 461; (38) 665.  
 and rape, crosses between, (31) 528.  
 and swedes, crosses between, root nodules of, (33) 848.  
 as affected by boiling and steaming, (28) 363.  
 as catch crop after wheat, (37) 136.  
 assimilation of nitrogen by, (26) 319.
- Turnips**—Continued.  
 black hearted, (33) 53.  
 composition as affected by acid phosphate, (26) 527.  
 composition as affected by phosphorus in soils, (29) 417.  
 cost of production, (32) 530; (33) 831.  
 culture, (28) 42; (31) 35; (32) 337; (33) 238.  
 culture—  
 experiments, (26) 329; (27) 33; (28) 531; (29) 138, 427; (32) 36, 132, 431; (33) 632, 830; (34) 34; (36) 32, 435, 436; (37) 733; (38) 132; (39) 124, 125; (40) 625, 735.  
 for stock food, (33) 41.  
 in Dutch East Indies, (30) 697.  
 in South Dakota, (40) 32.  
 on moor soils, (39) 437; (40) 230, 523.  
*Cytospora batata* attacking, (39) 456.  
 digestion coefficients, (39) 171.  
 effect on composition of milk, (29) 277.  
 effect on following crop, (40) 624.  
 electroculture experiments, (40) 429.  
 elongation of hypocotyl, (28) 39.  
 factors affecting composition, (38) 432.  
 fertilizer experiments, (26) 324, 330, 537, 631, 817; (27) 137, 334; (28) 632, 735; (29) 22, 126, 213, 227, 228; (30) 134; (31) 133, 829; (32) 431, 630, 832; (33) 326, 831; (34) 519, 532, 632; (36) 427, 529, 626; (39) 427, 621, 735.  
 food value, (36) 863.  
 for cattle, (37) 866.  
 for cows, (38) 477.  
 for sheep, (26) 299.  
 growth on volcanic ash, (32) 36.  
 heredity in, (31) 43.  
 heredity of form and color in, (29) 332.  
 insects affecting, (26) 553; (32) 735.  
 irrigation experiments, (31) 732.  
 liming experiments, (31) 424; (40) 322.  
 manual value of tops, (39) 836.  
 mulching experiments, (38) 344.  
 mulching v. clean culture, (33) 534.  
 radioactive fertilizer for, (31) 129.  
 relation between size of seed and yield, (26) 434.  
 relative yielding capacity, (40) 625.  
 resistance to club root, (35) 52.  
 root development with other crops, (26) 129.  
 root-ouse injury, (40) 60.  
 rotation experiments, (29) 227.  
 sclerotinia diseases, (40) 49.  
 seed production, (33) 226.  
 seeding experiments, (29) 224.  
 spraying, apparatus for, (39) 762.  
 subsoiling experiments, (37) 732.  
 sugar as fertilizer for, (27) 722.  
 sulphur as fertilizer for, (28) 740; (30) 138.  
 susceptibility to swede mildew, (34) 52.  
 thinning experiments, (29) 432.  
 varieties, (26) 331, 630, 631; (27) 32, 334, 637; (29) 222, 228, 530; (30) 228; (31) 133, 829; (32) 431, 532, 630; (33) 33, 34, 330, 831; (34) 865; (37) 228; (38) 133, 140, 432.  
 varieties for moor culture, (39) 438; (40) 230.  
 varieties resistant to finger-and-toe disease, (30) 848.  
 variety tests, (39) 336; (40) 735.  
 water requirement, (32) 127.  
 weed control in fields of, (40) 536.  
 yield as affected by planting distance, (34) 527, yields, (40) 730.  
 zebra caterpillar on, (39) 160.
- Turpentine**—  
 adulteration, detection, (26) 611.  
 analyses, (30) 616.  
 as a vermifuge, (38) 884.  
 beetle, red, notes, (26) 561; (32) 552.  
 detection in ethyl alcohol, (29) 312.  
 effect on turnip seed, (32) 551.  
 from *Boswellia serrata*, (40) 248.  
 from waste resinous woods, (28) 512.  
 industry in—  
 Austria, (32) 48.  
 Tonkin, (31) 839.  
 United States, (30) 744, 791.  
 Italian, studies, (38) 713.  
 larvicidal value, (34) 359.  
 methods of analysis, (27) 210.  
 methods of extracting, (26) 513.  
 oil, distillation and composition, (29) 719.  
 oil, thermal figure of, (31) 414.

- Turpentine**—Continued.  
 operations, timber available for, (33) 543.  
 possibilities on Pacific coast, (31) 743.  
 spruce, toulou from, (39) 209.  
 substitutes, analyses, (28) 493.  
 sulphite, recovery, (38) 810.  
 testing and analysis, (40) 804.  
 tree, strength and elasticity tests, (27) 43.  
 wood, investigations, (28) 512.  
 wood, production and uses, (26) 413.  
 yield from double chipping, (38) 46.
- Turtle**—  
 meat adulteration, detection, (26) 110.  
 tuberculin, use against tuberculosis, (30) 284.
- Tussilago farfara**, hydrocarbons in, (26) 107.
- Tussock**—  
 caterpillars, false, (39) 561.  
 grass, analyses, (32) 166.  
 moth—  
 antique or rusty, notes, (32) 651.  
 hickory, (39) 761.  
 in apple orchards, (26) 541.  
 in Nova Scotia, (35) 853; (40) 57.  
 notes, (28) 159; (38) 358; (39) 863; (40) 57.  
 moth, white-marked—  
 control, (39) 561, 861.  
 in Minnesota, (38) 155.  
 notes, (27) 356, 554, 658, 755, 861; (28) 57,  
 155, 158; (36) 55, 655; (40) 259.
- Twenty-eight hour law**, (32) 679.
- Twig borer**—  
 notes, (29) 657.  
 studies, (31) 852.  
 western, notes, (35) 58.
- Twig girdler**, notes, (28) 159; (37) 660.
- Twig pruner**, sombre, studies, (28) 757.
- Twigs**—  
 forcing, (38) 39.  
 mounting for school work, (31) 394.
- Twilight**—  
 colors at Mt. Weather, Va., (31) 213.  
 duration, (35) 115.  
 studies, (36) 718.
- Twilights**, Italian, in 1913, (31) 213.
- Twinning** in cattle, (40) 873.
- Twins**, mammalian, biology, (38) 574.
- Twitch grass**, destruction, (31) 739.
- Tychea**—  
 brevicornis, treatment, (26) 648.  
 trivialis, notes, (28) 655.
- Tychius**—  
 gossypii n.sp., description, (33) 159.  
 lineellus, notes, (35) 364.  
 picrostris, notes, (36) 456.  
 5-punctatus, life history and habits, (36) 860.
- Tydeus coccophagus**, notes, (27) 861.
- Tylenchulus semipenetrans**—  
 affecting oranges, (34) 354.  
 in Florida, (33) 550.  
 life history, (31) 450.
- Tylenchus**—  
 acutocaudatus on coffee, (38) 51.  
 angustus—  
 injurious to rice, (38) 351, 547.  
 n.sp., studies, (30) 540.  
 notes, (39) 146.  
 on rice, (34) 49.  
 studies, (40) 48.  
 devastatrix—  
 affecting narcissus, (36) 752; (38) 455, 460.  
 notes, (28) 847; (29) 150; (30) 159, 448, 647;  
 (32) 448; (34) 249; (39) 57, 250, 254.  
 relation to clover sickness, (36) 348.  
 treatment, (29) 151.  
 dipsaci—  
 and T. tritici, notes, (34) 841.  
 control in Westphalia, (26) 545.  
 in the United States, (31) 746.  
 injurious to hyacinth bulbs, (31) 450.  
 injurious to phlox, (31) 56.  
 notes, (28) 750; (37) 246.  
 penetrans n.sp., description, (38) 147.  
 similis affecting bananas, (36) 347.  
 similis, description, (34) 50.  
 sp., injurious to rice, (28) 151.  
 sp., notes, (28) 658; (29) 445.  
 sp., relation to rice ufra disease, (30) 49.  
 tritici—  
 in Virginia, (38) 850.  
 in wheat heads, (37) 840.
- Tylenchus**—Continued.  
 tritici—continued.  
 notes, (29) 243; (30) 243; (36) 348; (39) 649;  
 (40) 144, 849.  
 parasitism, (30) 648.
- Tylidae**, erection, (37) 846.
- Tyloderma foveolatum**, notes, (32) 556.
- Tyloses** in American woods, (30) 844.
- Tympanuchus americanus**, notes, (27) 355.
- Tyora sterculiae**, notes, (28) 655.
- Typha**—  
 culture and utilization, (40) 443.  
 fiber from, (39) 510.  
 spp., culture and selection experiments, (29)  
 531.  
 spp., studies, (29) 522.
- Typhilitis**, warty, in pheasants, studies, (26) 684.
- Typhlocyba**—  
 comes, see Grape leafhopper.  
 cymba n.sp., description, (40) 261.  
 rosae—see also Empoia rosae.  
 notes, (28) 157; (36) 857.  
 spp., studies, (33) 860.
- Typhlo-hepatitis**, infectious, in turkeys, (26) 384,  
 588.
- Typhlodendron lineatum**, studies, (39) 65.
- Typhoid**—  
 and paratyphoid bacilli, detection in water and  
 sewage, (38) 188.  
 bacilli—  
 as affected by lactic organisms in milk, (27)  
 176.  
 destruction in sour milk, (40) 476.  
 growth-producing substance in cultures,  
 (39) 82.  
 migration in rabbits, (36) 576.  
 viability in sour cream, (32) 675.  
 coli group, specific ferments for, (34) 278.  
 fever—  
 caused by food at public dinner, (34) 69.  
 control in Virginia, (30) 319.  
 diagnosis, (31) 878.  
 diet in, (32) 564.  
 dissemination, (28) 258.  
 fever, dissemination—  
 by chickens, (32) 477.  
 clothing, food, etc., (31) 68.  
 oysters, (35) 162.  
 vegetables, (26) 661; (27) 766; (28) 258;  
 (38) 166.  
 fever—  
 epidemic at Rock Island, Illinois, (29) 617.  
 evolution of, (39) 285.  
 immunization, (26) 567.  
 immunized milk for, (34) 272.  
 in horses, investigations, (28) 184; (30) 186.  
 prevention, (26) 567.  
 fever, relation to—  
 bedbugs, (28) 251.  
 butter, (38) 265.  
 house flies, (28) 356.  
 milk bottles, (28) 879.  
 milk supply, (26) 478; (27) 376; (28) 674;  
 (38) 377.  
 oysters, (27) 866; (31) 460.  
 sewage pollution, (27) 318.  
 water supply, (30) 319.  
 fever—  
 rôle of specific fats in complement fixation,  
 (39) 80.  
 serodiagnosis, (31) 877.  
 transmission by factory-infected candy,  
 (34) 366.  
 transmission by house flies, (26) 61; (37) 854.  
 treatment, (38) 585.  
 fly, see House fly.  
 human, relation to hog cholera, (26) 881.  
 infection of horses, (40) 289.  
 like diseases of birds, (40) 685.  
 outbreak due to polluted water cress, (30) 64.  
 patients, metabolism experiments with, (35)  
 369.  
 vaccine, effect on tuberculous guinea pigs, (37)  
 481.  
 vaccine, standardization, (39) 82.
- Typhula graminum**—  
 in Bohemia, (35) 650.  
 notes, (28) 52.

- Typhus**—  
 diagnosis, (35) 182.  
 exanthematous, transmission by lice, (33) 857.  
 fever organism in lice, (37) 851.  
 fever, transmission, (26) 759.  
 in dogs, (34) 682.
- Typhophorus canellus**—  
 in Maryland, (38) 155.  
 notes, (35) 54.
- Tyrannus**—  
 spp., feeding habits, (28) 56.  
 verticalis, destruction of locusts by, (28) 351.
- Tyroglyphus**—  
 americanus, notes, (26) 863; (28) 457.  
 farinae, see Flour mite.  
 lintneri, notes, (27) 657.  
 sp. notes, (27) 556.  
 spp. on cheese, (39) 664.
- Tyromyces ellisianus**, notes, (35) 655.
- Tyrosin**—  
 and cystin, separation, (31) 807.  
 as source of ammonia, (29) 723.  
 assimilation by plants, (26) 32.  
 content of proteins, (29) 465.  
 detection, (28) 805.  
 determination, (40) 113, 207.  
 determination in proteins, (28) 805; (31) 711, 712, 807.  
 effect on action of alcohol on plant cells, (34) 333.  
 effect on Stilton cheese, (27) 474, 475.  
 in Roquefort cheese, (26) 313.  
 ingestion, effect on metabolism, (28) 867.  
 necessity in the diet, (36) 265.  
 occurrence in—  
 milk, (26) 776.  
 stachys tubers and citrus leaves, (26) 107.  
 sugar beets, (28) 810.  
 preparation and determination, (27) 406.
- Tyrosinase**—  
 action, studies, (37) 110.  
 and deamination, studies, (36) 412.  
 composition, (30) 708.  
 of beets and potatoes, (35) 414.  
 production and action, (28) 503.
- Tyrothrix** sp. in Stilton cheese, (28) 879.
- Udamoselis pigmentaria**, notes, (29) 54.
- Udder**—  
 and process of milk production, (39) 679.  
 bacteria, (27) 280; (28) 275; (29) 279; (35) 674; (38) 76, 478; (39) 383; (40) 184, 185.  
 bacteria, effect on quality of milk, (36) 476.  
 bacteria in milk, (39) 384.  
 disease, unusual cause, (27) 186.  
 diseases, notes, (32) 376.  
 diseases, treatment, (36) 693.  
 elimination of artificial coloring matter by, (30) 474.  
 histological appearances, (29) 278.  
 infections, (39) 890; (40) 87.  
 surgical affections of passages, (26) 380.  
 traumatic lesions of, (26) 285.
- Udo**, culture experiments, (37) 742.
- Udo**, notes, (31) 140.
- Ufens niger**, notes, (31) 752.
- Ula** spp., of North America, (33) 561.
- Ulcers**, treatment, (26) 580.
- Ulla** grass, production, (40) 243.
- Ulmus**—  
 campestris, variations in salt content, (29) 28.  
 fulva, mucin-like substances of, (31) 409.
- Ultrafilter**, new form, description and uses, (39) 804.
- Ultrafiltration**—  
 apparatus, description, (36) 111.  
 aseptic, apparatus for, (38) 225.
- Ultramicroscope**, description, (37) 711.
- Ultramicroscopy**—  
 of soil extracts, (30) 516.  
 treatise, (26) 82.
- Ultraviolet rays**—  
 absorption by—  
 arable soil, (34) 414.  
 chlorophyll, (28) 37.  
 plants, (39) 733.  
 soils, (34) 817.  
 action on fig must, (37) 314.  
 antibiotic action, (28) 129.  
 coagulation of proteins by, (29) 130, 131; (30) 110.  
 decomposition of carbon dioxide by, (30) 431.
- Ultraviolet rays**—Continued.  
 effect on—  
 amylase, (31) 711.  
 cane sugar, (26) 308.  
 carbohydrates, (28) 529.  
 chlorophyll-containing cells, (33) 28.  
 diastase and invertase, (26) 203.  
 enzymes, (28) 110.  
 fungi, (38) 855.  
 lactic acid, (28) 201.  
 phosphorescent bacteria, (36) 526.  
 plant reproductive organs, (35) 334.  
 plants, (26) 430; (27) 827; (29) 130.  
 the eye, (34) 113.  
 in treatment of wounds, (38) 585.  
 lamp, description, (28) 214.  
 metabiotic action, (31) 379; (32) 475.  
 penetration of leaves by, (31) 129.  
 penetration of plant organs by, (33) 427.  
 purification of water by, (32) 87; (37) 588.  
 saccharification of inulin by, (26) 802.  
 sterilization of milk by, (28) 277, 373, 675.  
 sterilization of water by, (26) 28; (27) 317; (28) 214, 317, 416, 514; (29) 415; (30) 419, 816.
- Ultuna** agricultural institute and farm, (37) 892.
- Uva lactuca**—  
 analyses, (26) 324.  
 sources of nitrogen for, (31) 828.
- Umatilla Experiment Farm**—  
 report, (30) 441; (40) 494.  
 work, (29) 540.
- Umbilical necrobacillosis**, studies, (33) 676.
- Umbrella tree**, host plant of fruit fly, (26) 758.
- Uncinaria canina**, notes, (34) 275.
- Uncinariasis** in dogs, (36) 676.
- Uncinula**—  
 acris, symbiosis with maple leaves, (37) 327.  
 americana (necator?), occurrence in Poland, (26) 845.  
 necator, hibernation, (34) 847.  
 necator, notes, (36) 347.  
 spiralis, treatment, (34) 841.
- Underfeeding**, effect on blood, (26) 360.
- Uniform grades** and standard packages, (40) 293.
- Unilachnus** n.g., erection, (40) 651.
- United States Department of Agriculture**—  
 Agricultural Commission to Europe, (40) 493.  
 and experiment stations, relationship, (29) 604.  
 annual reports, (27) 196; (37) 297.
- appropriations**—  
 1912-13, (27) 301.  
 1913-14, (28) 301.  
 1914-15, (31) 1.  
 1915-16, (32) 401.  
 1916-17, (35) 301.  
 1917-18, (36) 401.  
 1918-19, (39) 301.
- Bureau of Animal Industry**—  
 animal nutrition investigations, (27) 469.  
 as a war auxiliary, (40) 577.  
 report, (27) 196; (29) 793.
- Bureau of Chemistry**, color laboratory, (40) 16.
- Bureau of Plant Industry**—  
 activities, (28) 898.  
 forest pathology laboratory, (40) 500.  
 reclamation project farms, (40) 493, 494.
- Bureau of Soils**—  
 activities, (36) 323.  
 field operations, (31) 512; (34) 321.  
 contributions to chemical journals, (36) 600.  
 development and activities, (37) 592.  
 farmers' bulletins, index, (35) 299.
- Forest Service**—  
 exhibit at San Francisco, (34) 347.  
 organization and policy, (35) 451.  
 research activities, war-time, (40) 743.  
 scope of investigations, (28) 842.  
 silviculture plans, (36) 143.  
 work, (39) 648.
- functions**, (27) 706.  
 history, (36) 598.  
 index to legislation, (26) 899.  
 laws relating to, (29) 899; (32) 693; (33) 698.  
 Library, accessions, (26) 95, 599, 899; (27) 97, 599, 798; (23) 299, 599, 899; (29) 299, 599.  
 Library, cooperation with other libraries, (34) 494.  
 market service, (30) 197.  
 notes, (28) 495, 699; (30) 96; (36) 798.

## United States Department of Agriculture—Contd.

- Office of Experiment Stations—  
 notes, (27) 199.  
 nutrition investigations of, (30) 258.  
 report, (28) 695; (29) 899; (33) 299.  
 review, (33) 2.
- Office of Farm Management—  
 notes, (40) 500.  
 organization and work, (40) 890.  
 work, (39) 592, 593.
- Office of Home Economics, work, (38) 662.
- Office of Markets and Rural Organization,  
 work, (34) 194, 490.  
 opportunities in, (27) 897.  
 organization list, (30) 197; (31) 599; (34) 94; (36)  
 794; (39) 497.  
 plant disease survey, (37) 500.  
 program of work, (33) 698.  
 publications for—  
 farm women, (30) 197.  
 housekeepers, (30) 560.  
 teachers, (26) 692.  
 relation to agricultural colleges and experiment  
 stations, (32) 194.  
 reorganization, (32) 402.  
 reports, (29) 496; (31) 195; (32) 795; (35) 94; (40)  
 493.  
 retirement of Secretary Wilson, (28) 307.  
 semicentennial, (27) 701.
- States Relations Service—  
 establishment, (33) 1.  
 notes, (36) 296; (37) 500; (38) 99; (39) 699.  
 work of interest to women, (38) 898.  
 statutory history, (34) 796.  
 war emergency funds, (37) 301.  
 Weather Bureau. (*See* Weather Bureau.)  
 work in 1915, (32) 496.  
 work in 1917, (36) 396.  
 work of, (40) 688.  
 work of, for housekeepers, (31) 359.  
 yearbook, (27) 599; (29) 496; (31) 396; (33) 299;  
 (35) 195; (37) 599; (39) 499.  
 yearbooks, index, (29) 599.
- United States—  
 Department of Commerce, Commissioner of  
 Fisheries, report, (35) 366.
- Food Administration—  
 notes, (39) 98.  
 policies and plans, (38) 792.
- Geological Survey—  
 gaging stations, (27) 116; (33) 89.  
 publications on water resources, (27) 116.  
 Reclamation Service, report, (31) 383; (33)  
 485; (35) 284; (37) 84.
- Livestock Sanitary Association, report, (27) 77;  
 (34) 184, 185, 273; (36) 675; (38) 178.
- Universities, American system, (27) 896.
- University—  
 graduates, professional distribution, (28) 192.  
 Home and School League of University of  
 Texas, (31) 598.  
 of Manchester, notes, (30) 199.  
 of the Philippines, notes, (28) 399.
- Univoltin silk moth, development of eggs, (27) 456.
- Uranium—  
 acetate, effect on olives, (26) 825.  
 effect on—  
 plant cells, (27) 826.  
 plants, (32) 325.  
 sugar beets, (34) 38.  
 nitrate, effect on—  
 growth of *Aspergillus niger*, (29) 422.  
 plant growth, (35) 434.  
 oxid, effect on germination of seeds, (29) 528.  
 oxid, fertilizing value, (29) 731.  
 salts, effect on plants, (28) 38, 731.  
 salts, fertilizing value, (30) 627.  
 sulphate—  
 effect on sugar beets, (31) 233.  
 fertilizing value, (27) 628.  
 toxic effect on plants, (38) 628.
- Uranyl sulphate, effect on germination of seeds,  
 (29) 828.
- Urban—  
 growth in United States, (34) 193.  
 population in—  
 Germany, standard of living, (26) 358.  
 United States, (27) 489; (30) 893; (36) 591.
- Urd, description, (31) 740

## Urea—

- adding to diet, (34) 762.  
 as feed for pigs, (31) 265.  
 assimilation by—  
 plants, (26) 32.  
 Streptothrix, (27) 621.  
 yeasts and fungi, (28) 824.  
 concentration in the tissues, (40) 562.  
 decomposition by mold fungi, (29) 28.  
 determination, (30) 764; (35) 112; (38) 110.  
 determination in—  
 blood, (40) 207.  
 urine, (26) 870; (33) 116; (40) 202.  
 urine and blood, (36) 317.  
 distribution in and elimination from the body,  
 (32) 165.  
 effect on—  
 carbon dioxid production in soils, (30) 123.  
 hemolytic reaction, (36) 878.  
 inversion of sucrose, (28) 613.  
 nitrogen retention in goats, (32) 261.  
 excretion, rate of, (36) 163.  
 feeding to dogs and pigs, (30) 170.  
 fertilizing value, (28) 736; (30) 326; (31) 518, 821;  
 (33) 25; (34) 518; (35) 325, 427, 518; (37) 216.  
 formation, (28) 664.  
 formation from cyanamid, (32) 125.  
 formation in the animal body, (40) 866.  
 from lime-nitrogen, fertilizing value, (34) 25.  
 in normal human blood, (28) 665.  
 nitrate, fertilizing value, (31) 822; (34) 25, 518;  
 (35) 325; (36) 134.  
 nitrification in soils, (26) 722.  
 origin and distribution in nature, (38) 110.  
 solutions, effect on metabolism, (28) 866.  
 synthesis, (38) 110.  
 utilization by soil fungi, (39) 623.
- Urease—  
 action of, (32) 804.  
 in castor beans, (30) 409.  
 jack beans, (35) 612.  
 legume nodules and other plant parts, (35)  
 334.  
 plants, (27) 633; (35) 313; (37) 204.  
 soy beans, (32) 803; (35) 10, 109, 110.  
 preparation, (33) 116.
- Uredinales—  
 from New Mexico, (39) 147.  
 monograph, (26) 243; (32) 49.  
 of Guatemala, (40) 327.  
 of Porto Rico, (37) 749.  
 of the Andes, (40) 133.  
 on Onagraceae, (37) 552.  
 relation to *Hymenomyces*, (28) 244.
- Uredineae—  
 cultures of, (32) 145; (39) 147.  
 dispersal of spores by, (28) 645.  
 germination of teleutospores, (28) 241; (34) 744.  
 infection experiments with, (26) 845.  
 inoculation experiments, (32) 750; (35) 650.  
 location of spore masses, (36) 825.  
 monograph, (36) 647.  
 new species, (40) 327.  
 of Colombia, (35) 245.  
 of North America, (31) 145.  
 on Carex in North America, (29) 750.  
 sexuality in, (34) 526.
- Uredinia, internal, notes, (35) 635.
- Uredinopsis—  
 copelandi, aecial stage, (35) 553.  
 mirabilis, infection experiments, (30) 745.  
 spp., hosts of, (29) 645.  
 spp., life histories, (30) 47.
- Uredo—  
 arachidis—  
 notes, (37) 452, 551; (40) 155.  
 treatment, (32) 612; (34) 746; (39) 548.  
 chamaecyparidis nutkaensis n. var., studies,  
 (31) 246.  
 concors, notes, (40) 17.  
 ericae n. sp., notes, (29) 49.  
 fici, notes, (37) 453.  
 gossypii, notes, (29) 548; (33) 741.  
 manihoti, injurious to *Manihot glaziovii*, (27)  
 753.  
 (*Melampsora*) spp., notes, (27) 252.  
 mülleri, biology and morphology, (27) 648.  
 mülleri, notes and treatment, (29) 50.  
 nootkatensis and *Aecidium sorbi*, identity, (35)  
 844.

- Uredo**—Continued.  
 orchidis, notes, (34) 442.  
 ricini, notes, (39) 53.  
 scabies, description, (27) 450.  
 sp., treatment, (35) 44; (37) 550.  
 spp., notes, (28) 645.  
 spp., overwintering, (33) 647.  
 vitis, notes, (36) 541.
- Uremia** of acarian origin in horses, (40) 89.  
**Urena lobata** fiber, tests, (31) 526.
- Uric acid**—  
 as affected by foods, (27) 464.  
 assimilation by plants, (26) 32.  
 assimilation by *Streptothrix*, (27) 621.  
 decomposition by mold fungi, (29) 28.  
 detection, (28) 805.  
 determination, (37) 470; (40) 207.  
 determination in—  
   blood, (34) 412; (40) 16.  
   milk, (40) 509.  
   urine, (32) 716; (34) 412; (40) 413.  
 diathesis, treatment, (26) 765.  
 effect on hemolytic reaction, (36) 878.  
 excretion—  
   as affected by diet, (30) 864.  
   as affected by light and dark meat, (29) 663.  
   constancy in individuals, (31) 761.  
   on meat-free diet, (33) 663.  
 formation from a purin base, (32) 256.  
 formation, relation to protein intake, (33) 462.  
 in normal human blood, (28) 665.  
 metabolism, studies, (40) 175.  
 nitrification rate, (32) 124.  
 production in chick embryo, (26) 877.  
 puncture, notes, (30) 261.  
 solvent power of normal urine, (35) 664.  
 synthesis in human body, (34) 763.
- Uric nitrate**, fertilizing value, (28) 736.  
**Uricolysis**, notes, (32) 257.  
**Uriella**, notes, (36) 556.
- Urinary**—  
 carbon, determination, (40) 206.  
 constituents, relation to diet, (36) 162.  
 creatin, exogenous origin, (40) 365.
- Urine**—*see also* Manure, liquid.  
 ammonia and gastric secretion, (40) 766.  
 ammonia nesslerization in, (39) 111.  
 aromatic constituents, (36) 313.  
 as affected by light and dark meat, (28) 261.  
 bloody, in cattle, (38) 486.  
 calcium and magnesium content, (36) 366.  
 calorific values, (26) 360.  
 carbon dioxide content, (39) 670.  
 chemistry of, treatise, (26) 809.  
 chlorin content, as affected by thymol-chloro-  
   form, (40) 614.  
 composition—  
   as affected by feed, (36) 672.  
   as affected by foods, (31) 761.  
   during fasting, (32) 460.  
 conservation of phosphates in, (29) 317.  
 conservation of phosphorus in, (27) 500.  
 detection of substances in, (29) 408.  
 determination of hippuric acid in, (40) 611.  
 determination of sugar in, (40) 413.  
 energy factors of, (26) 161.  
 examination, (26) 161; (32) 578; (39) 715.  
 excretion in sheep as affected by feeding stuffs,  
   (28) 874.  
 fertilizing material from, (40) 320.  
 food accessories in, (40) 271.  
 hydrogen-ion concentration, (36) 365.  
 methods of analysis, (30) 466; (33) 116, 207.  
 nitrogen content after feeding, (35) 863.  
 of dairy cows, analyses, (36) 672.  
   domestic animals, iron content, (27) 870.  
   male bovines, apparatus for collection, (29)  
   408.  
   man and animals, treatise, (26) 160.  
 output, relation to epithelial changes, (27) 79.  
 phosphorus content, determination, (39) 806.  
 proteins, studies, (36) 508.  
 sugar content, (39) 112, 874.  
 trimethylamin in, (32) 764.  
 volume of on constant diet, (36) 163.
- Urios**, new genus, description, (26) 152.  
**Urobacillus pasteurii** in soy beans, (35) 110.  
**Urochrome** and lactochrome, identity, (32) 19.
- Urocystis**—  
 agropyri on *Bromus erectus*, (40) 156.  
 bornmülleri n.sp., description, (28) 546.  
 cepulae, description and treatment, (27) 445;  
   (29) 245.  
 gladioli, notes, (26) 446.  
 occulta—  
   description and treatment, (38) 543.  
   notes, (28) 443, 846; (30) 448, 649; (33) 851.  
   studies, (36) 146.  
   treatment, (32) 843; (39) 354.  
 spp., life history and cytology, (26) 341.  
 tritici, notes, (34) 845; (38) 48.  
 tritici, treatment, (29) 845; (31) 746; (34) 644.  
 violae, prevention, (34) 750.
- Urodynamis taitensis pheletes** n.subsp., descrip-  
 tion, (40) 55.
- Uromyces**—  
 acuminatus, notes, (26) 340.  
 alhaginis n.sp., notes, (34) 842.  
 andropogonis, inoculation experiments, (28)  
   551.  
 appendiculatus—  
   control, (40) 845.  
   notes, (31) 746; (39) 249, 852.  
   treatment, (37) 248.  
 betae, description and treatment, (28) 847.  
 betae, notes, (28) 129; (30) 47; (32) 544, 750; (35)  
   245; (37) 249.  
 caryophyllinus—  
   internal uredinia of, (35) 635.  
   notes, (27) 351.  
   specialization of, (33) 545.  
   studies, (28) 149.  
 fabae, treatment, (32) 545.  
 fallens, life history, (37) 752.  
 fallens on red clover, (39) 550.  
 hyalosporus n.sp., description, (28) 851.  
 junci, new aecial hosts, (36) 245.  
 location of spore masses, (36) 825.  
 monograph, (26) 243.  
 n.spp., descriptions, (28) 51.  
 pisi, studies, (26) 650; (31) 347.  
 relation to *Puccinia*, (26) 645.  
 scillarum, notes, (33) 741.  
 short-cycled, of North America, (37) 749.  
 spp., notes, (28) 443; (37) 453.  
 spp. on *Fritillaria*, (38) 548.  
 spp. on *Geranium* and *Polygonum*, (36) 547.  
 striatus, notes, (27) 445; (28) 52; (33) 846.  
 trifolii, description and treatment, (39) 754.  
 trifolii, spore germination, (38) 225.
- Urophlyctis**—  
 alfaeae, notes, (28) 52; (30) 348; (33) 742; (34)  
   241; (35) 245; (36) 747.  
 alfaeae, studies, (28) 150; (36) 543.  
 lathyri n.sp., description, (28) 241.
- Urophora solstitialis**, life history and bionomics,  
 (32) 759.
- Uropyxis quitensis** n.sp. from the Andes, (40) 133.  
**Urosigalphus**, revision, (32) 557.
- Urothripidae**, notes, (27) 656.
- Urotropin**, use against bloat in cattle, (33) 389.
- Urtica**—  
 dioica, carotinoid content, (31) 803.  
 urens, analyses, (33) 466.
- Urticaria bullosa**, relation to swine plague, (28) 682.  
**Uscana semifumipennis**, notes, (29) 253.  
**Uscanopsis carlylei** n.g. and n.sp., description, (36)  
 259.
- Uspulun**, fungicidal value, (34) 51; (35) 47.
- Ustilaginolideae**—  
 penniseti n.sp., description, (27) 848.  
 virens, notes, (29) 445; (37) 247.  
 virens, studies, (30) 540, 845.
- Ustilaginoidella musaeperda**, studies, (27) 50.
- Ustilaginous spores**, determination—  
 in flour, bran, and cereals, (26) 408; (36) 146.  
 in wheat bran, (27) 310.
- Ustilago**—  
 antherarum—  
   infection studies, (29) 552.  
   investigations, (26) 552.  
   spore formation in, (28) 745.  
 arrhenatheri n.sp., description, (35) 349.  
 avenae and *U. levis*, inoculation experiments,  
   (37) 750.  
 bromivora, treatment, (30) 241.  
 carbo, effect on horses, (27) 882.

## Ustilago—Continued.

- cruenta, occurrence in America, (27) 545.  
 ewarti n.sp., description, (26) 846.  
 hordei—  
   longevity in infected seed, (30) 241.  
   notes, (30) 448.  
   nuda, biology of, (31) 50.  
   treatment, (27) 445; (40) 156.  
   vars., notes, (33) 146.  
 jensemi, mycelium formation in, (31) 242.  
 jensemi, notes, (33) 851.  
 levis, prevention, (33) 245.  
 maydis—  
   control in Queensland, (33) 51.  
   effect on corn, (26) 447.  
   introduction into New South Wales, (26) 53.  
   on corn in Barbados, (33) 445.  
   nuda in Dutch East Indies, (38) 448.  
   nuda, infection experiments, (30) 240.  
   panic-gracilis, description, (30) 351.  
   panic-millacei, notes, (32) 544.  
   reliana, inoculation on Guinea corn, (34) 644.  
   sacchari, notes, (26) 848; (34) 50; (37) 551; (38) 550; (40) 157.  
   shiraiana in United States, (36) 653.  
   sorghii, notes, (32) 240.  
   spp., behavior of cells and nuclei during development, (29) 46.  
   spp., description and treatment, (38) 548.  
   spp. in Argentina, (38) 148.  
   spp., life history and cytology, (26) 341.  
   spp., nature and treatment, (32) 145.  
   spp., notes, (28) 443; (30) 747.  
   spp. on oats, (38) 646.  
   spp., spore germinations of, (31) 642.  
   spp., studies, (39) 353.  
   spp., treatment, (26) 546; (31) 841; (33) 145; (36) 247.  
   striaeformis, studies, (36) 247, 543.  
   tragopogonis, notes, (37) 550.  
   trebouxi n.sp., description, (28) 51.  
 tritici—  
   distribution of fruiting bodies, (33) 647.  
   life history, (37) 839.  
   notes, (34) 845; (38) 48, 448.  
   treatment, (27) 746; (28) 746.  
 vaillantii—  
   life history, (31) 246.  
   notes, (33) 742.  
 zeae—  
   dissemination by tree crickets, (35) 548.  
   life history, (33) 345.  
   notes, (37) 452, 750.  
   studies, (38) 249.
- Ustilina—  
   on Hevea, (39) 152.  
 zonata—  
   notes, (30) 849; (31) 55; (35) 551; (38) 52, 354; (39) 452; (40) 53.  
   on rubber, (34) 57.  
   studies, (37) 52.
- Uta, insect vector of, (35) 464.
- Utab—  
   College, notes, (26) 495; (27) 99, 399, 494; (28) 798; (29) 99; (32) 498; (33) 199; (34) 497, 695; (35) 400, 699; (36) 100, 197, 696; (37) 99, 300; (39) 97, 198, 400, 699; (40) 200, 799.  
   Station, notes, (27) 99, 494; (28) 798; (29) 900; (31) 300; (32) 498; (33) 199; (34) 695; (35) 400, 699; (36) 100, 696; (37) 99, 198, 300, 600, 797; (38) 98, 499; (39) 97, 400, 699; (40) 200, 499, 698, 799.  
   Station, publications, list, (40) 599.  
   Station, work of, (40) 599.  
   University, school gardening in, (26) 193.
- Utele, description, (30) 39.
- Utensils, choice and care of, (28) 694.
- Uterine—  
   cornua of mammals, morphology and function of epithelium, (28) 875.  
   diseases in cattle, (36) 279.
- Utetes anastropheae n.sp., notes, (29) 652.
- Uveal pigment, immunologic properties, (39) 583.
- V moth, notes, (30) 53.
- Vaccination—  
   accidents in, (26) 384.  
   of hogs, after-effects, (39) 392.  
   serum-therapy, and immunity, treatise, (27) 76.  
   technical errors in, (31) 178.  
   with paratyphoid bacilli, (40) 289.
- Vaccine—  
   and serum therapy, notes, (29) 377.  
   antirabic, preparation, (26) 782.  
   antityphoid, standardization, (39) 82.  
   hog cholera and swine plague, preparation, (27) 482.  
   hog cholera, notes, (27) 786.  
   organisms, culture media for, (40) 677.  
   sensitized and nonsensitized, studies, (35) 782; (37) 780.  
   therapy—  
     bacterial, studies, (30) 779.  
     in veterinary practice, (33) 82.  
     modified, notes, (26) 83.  
     treatise, (31) 875.  
   treatment, studies, (35) 486.  
   virus, purification by brilliant green, (39) 80.
- Vaccines—  
   autogenous, use, (31) 378.  
   bacterial—  
     nature and use, (26) 580.  
     standardization, (30) 780.  
     studies, (40) 286.  
     use and abuse, (33) 477.  
   combined, investigations, (33) 477.  
   for anthrax, preparation, (28) 376.  
   guaranties of preparation and distribution, (39) 680.  
   in treatment and diagnosis, (36) 575.  
   inspection in Oregon, (32) 778.  
   investigations, (35) 73.  
   manufacture, (26) 372.  
   preparation, (33) 280, 386; (38) 283.  
   preservatives in, toxicity, (38) 283.  
   standardization, (28) 287; (33) 82, 280; (36) 676.
- Vaccinia—  
   complement fixation in, (34) 877.  
   in horses, (38) 586.
- Vaccinium—  
   corymbosum, fruit of, (36) 502.  
   oxycoctus, desiccation, (32) 117.  
   vitis-idaea, notes, (33) 143.
- Vachellia farnesiana, notes, (29) 441.
- Vacuaria dryophila, notes, (37) 562.
- Vacuum—  
   cleaners, dissemination of bacteria by, (30) 390.  
   cleaning, notes, (29) 593.  
   cleaning systems, treatise, (32) 89.  
   desiccator, electrically heated, (36) 504.  
   evaporators, heat transmission and entrainment in, (28) 893.  
   juice heaters, studies, (36) 387.  
   oven pump, regulating device for, (35) 313.
- Vaginal catarrh—  
   contagious, in bovines, immunization, (28) 380.  
   infectious, in cattle, (31) 285.  
   infectious, notes, (28) 373.  
   treatment, (30) 279.
- Vaginitis—  
   contagious, in cows, treatment, (27) 287, 288.  
   granular, in cattle, (39) 391.  
   granular, relation to abortion, (28) 781.  
   infectious, in cattle, studies, (28) 586.
- Vahlkamfia—  
   calkensi, life history, (34) 858.  
   soli n.sp., description, (31) 420.
- Valerianic acid, rôle in digestion, (36) 763.
- Vallisneria spiralis, growing for wild ducks, (29) 373.
- Valsa—  
   japonica n.sp., studies, (37) 251.  
   leucostoma, inoculation experiments, (36) 149.  
   leucostoma, notes, (26) 144; (30) 537; (35) 351.  
   paulowniae n.sp., description, (37) 557; (38) 648.  
   prunastri, notes, (35) 456.  
   sp., notes, (34) 247.  
   spp. on apples, (36) 846.  
   spp., relation to apple sour sap, (38) 452.  
   vitis, notes, (28) 749.
- Valsaria subtropica, notes, (37) 553.
- Vampyrus spectrum nelsoni n.subsp., description, (37) 757.
- Vanadium—  
   effect on—  
     determination of soil phosphorus, (36) 413.  
     plant growth, (32) 288.  
   in plants, (38) 409.  
   in soils, (31) 720.  
   salts, effect on plant growth, (28) 38.  
   toxic effect on plants, (38) 628.
- Vanuzaea arquata, life history, (34) 754.

- Vanessa—  
 antiopa, notes, (28) 752.  
 californica, notes, (29) 356.  
 cardui, notes, (32) 651.
- Vanilla—  
 as affected by foreign pollen, (40) 840.  
 as binder for ice cream, (36) 78.  
 bacterial disease, description, (26) 649.  
 beans as affected by curing, (36) 416.  
 Conchaspis angroeci on, (40) 56.  
 culture, (27) 844.  
 culture experiments, (31) 637; (33) 536; (36) 343;  
 (38) 749.  
 culture in Madagascar, (32) 142.  
 detection of coumarin in, (39) 505.  
 diseases, descriptions, (27) 450.  
 diseases, notes, (40) 47.  
 diseases, treatment, (36) 347.  
 extract—  
   adulteration, detection, (26) 111.  
   analyses, (35) 663.  
   composition, (26) 99.  
   examination, (28) 166.  
   factors affecting quality, (35) 764.  
   from Tahiti and Fiji beans, (27) 499.  
   methods of analysis, (29) 798.  
 fertilizer experiments, (38) 144.  
 industry in Tahiti and Moorea, (36) 445.  
 powder, effect on bacterial content of ice cream,  
 (32) 660.  
 production in French colonies, (31) 639.  
 production, studies, (40) 43.  
 types in Tahiti, (35) 129.  
 value in the diet, (29) 664.  
 varieties, (29) 642.
- Vanillin—  
 determination, (28) 313.  
 determination in flavoring extracts, (28) 807.  
 determination in vanilla, (36) 507; (40) 15.  
 disappearance in soil, (36) 432, 225; (38) 129.  
 effect on—  
   action of fertilizers, (26) 224; (27) 520.  
   citrus fruits, (37) 656.  
   growth of cowpeas, (36) 731.  
   nitrification in soil, (38) 119.  
   plant growth, (32) 619; (34) 126; (35) 21, 424;  
   (36) 212, 424.  
   wheat, (28) 140; (34) 325.  
 in soils, (30) 610; (40) 22, 24.  
 in soils, origin, (32) 320.  
 methods of analysis, (33) 413; (37) 12.
- Vapor—  
 pressures over United States, (37) 314.  
 tension in western and equatorial Africa, (34)  
 320.
- Vaporite as spray for subterranean insects, (26) 256.
- Vapors, injury to vegetation, (32) 826.
- Variability and amphimixis in *Spirogyra inflata*,  
 (34) 370.
- Variation—  
 and selection in plants, (33) 822.  
 and sexual dimorphism in Ginkgo, (39) 123.  
 bibliography, (26) 470; (27) 175; (33) 168.  
 in carrots and beets, (39) 734.  
 Cichorium intybus, (40) 225, 427.  
 copper-treated corn, (39) 526.  
 corn, (39) 837.  
 Cucurbita and Datura, (39) 747.  
 Micromycetes, (39) 124.  
 Oenothera, (39) 123, 825.  
 Pavonia procumbens, (39) 231.  
 Phaseolus vulgaris, (39) 330.  
 Plantago lanceolata, (39) 330.  
 plants, (29) 321; (34) 635.  
 plants—  
   cell measurement as aid in analysis, (39)  
   527.  
   in response to screening, (39) 825.  
   studies, (30) 328.  
   treatise, (26) 227.  
   potato blossom, (39) 535.  
   Spiraea inflorescence, (39) 30.  
   wheat, (39) 743.  
 intra-individual, definition, (26) 162.  
 Mendelian interpretation of, (33) 822.  
 metaphanic, in Dactylis, (39) 531.  
 non-Mendelian, in plants, (37) 725.  
 of fertility in mammals, (40) 662.  
 of glume length in wheat, (40) 525.  
 review of literature, (27) 368.
- Variation—Continued.  
 somatic, in pears, (32) 637.  
 treatise, (26) 472; (28) 876.
- Varicella, complement fixation in, (34) 877.
- Varichaeta aldrichi, notes, (27) 261.
- Variation in Capsicum, (39) 123.
- Varietal nomenclature of field crops, (39) 833.
- Variety tests—  
 correcting for soil differences, (34) 829.  
 error in, (28) 221; (39) 830.  
 factors affecting results, (32) 216.  
 methods, (30) 33, 134; (31) 226; (36) 527.  
 papers on, (37) 240.  
 rod-row, technique, (38) 429.  
 technique, (40) 227.  
 value, (29) 329.
- Variola—  
 and vaccine, paper on, (32) 271.  
 bovine, in chickens, (27) 685.  
 complement fixation in, (34) 877.  
 equine, studies, (38) 586.  
 of sheep and goats, investigations, (26) 678.
- Varnish—  
 methods of analysis, (29) 811; (31) 509, 806; (33)  
 17; (39) 613.  
 notes, (31) 658.
- Vasculomyces xanthosomae n.sp., description, (29)  
 345.
- Vaseline oil, effect on balsam plants, (28) 825.
- Veal—  
 bob, detection and use, (28) 65.  
 bob, digestibility, (35) 762.  
 calves, raising in California, (39) 76.  
 immature, as human food, (34) 557.  
 profitable production, (28) 374.  
 rejection as human food, (32) 662.
- Vegetable—  
 acids, toxicity, (28) 443.  
 adulterant, new, (26) 868.  
 baskets and containers, standards for, (35) 598.  
 canning industry in New Jersey, (32) 65.  
 chromogens, oxidation and reduction in, (34) 32.  
 compounds, humification, (34) 516.  
 conserves, methods of analysis, (32) 109.  
 diet, effects, (27) 271; (33) 867.  
 diseases—  
   and pests, (37) 832; (38) 241.  
   and pests in Baden, (31) 539.  
   control, (39) 140, 649; (40) 747.  
   in Porto Rico, (39) 52.  
   in relation to transportation, (39) 849.  
   in Württemberg, (29) 845.  
   investigations, (26) 142.  
   notes, (27) 344, 438, 848; (30) 47, 147, 148, 240,  
   746; (31) 438, 747; (35) 148; (36) 746.  
   overwintering and control, (40) 245.  
   studies, (39) 454.  
   treatment, (27) 438, 845.  
 dyestuffs in Madras, (36) 319.  
 fats, *see* Fat.  
 ferments, proteolytic, in latexes, (31) 409.  
 ferments, saccharification of starch by, (28) 609.  
 food as affected by meat extracts, (27) 365.  
 food products, investigations, (34) 256.  
 foods—  
   cooked, analyses, (29) 659.  
   course in use and preparation, (26) 597.  
   digestibility, (28) 462.  
   of German Africa, (29) 59.  
   preparation and use, (34) 899.  
   tropical, notes, (31) 855.  
 garden, advantages of, (26) 391.  
 gardening, (39) 39, 139, 240, 344, 444, 498, 542, 645,  
 748.  
 gardening—  
   in city and suburban districts, (39) 139, 498.  
   South Carolina, (40) 245.  
   the city, (40) 833.  
   the college curriculum, (28) 639.  
   the North, (39) 139.  
   the South, (39) 139.  
   textbook, (39) 899.  
   treatise, (26) 538; (40) 340, 536.  
 growers in North Carolina, list, (31) 894.  
 growing, bibliography, (29) 436.  
 industry in—  
   Germany, (31) 635.  
   New Jersey, (36) 689.  
   South Australia, (29) 837.  
 inspection service, Federal, (40) 344.

## Vegetable—Continued.

- ivory meal, composition and digestibility, (36) 367.
  - ivory meal, digestibility, (39) 171.
  - ivory, notes, (30) 46.
  - marrow fly, notes, (36) 654.
  - marrow, inheritance in, (36) 729.
  - marrow mildew, notes, (36) 541.
  - materials containing tannin, methods of analyses, (35) 316.
  - matter, showers of, (37) 808.
  - meat extract, analyses, (27) 767.
  - oils, *see* Oils, vegetable.
  - parasites, treatise, (32) 777.
  - pear, notes, (29) 461.
  - physiology, progress in 1911, (27) 616.
  - physiology, use of respiration calorimeter in, (27) 67, 466, 568; (28) 362.
  - powders, adulteration, detection, (30) 415.
  - product plants, establishing, (39) 894.
  - production, stimulation during the war, (40) 833.
  - products—
    - marketing, (29) 492.
    - microscopical examination, (30) 709.
    - purin content, (40) 205.
  - proteins, *see* Proteins.
  - rots, notes, (40) 844.
  - saps, physico-chemical properties, (31) 427; (34) 30.
  - seed industry in United States, (36) 535.
  - seedlings, damping-off, (39) 454.
  - seeds—
    - analyses, (26) 739.
    - breeding work, (40) 833.
    - germination as affected by electricity, (26) 136.
    - home production, (39) 444.
    - longevity in storage, (37) 742.
    - longevity tests, (40) 339.
  - seeds, production—
    - at Vineland, Ontario, (37) 343.
    - in Canada, (34) 635.
    - in Sweden, (39) 644.
    - in Switzerland, (40) 833.

 as an indicator of agricultural value of soils, (30) 628.  
 British, treatise, (27) 328.  
 climatic injury to, (36) 431.  
 distribution in United States, (40) 130.  
 effect on—  
   composition of drainage water, (26) 421.  
   movement of water in soils, (30) 121.  
 rainfall, (39) 418.  
 soil temperature, (30) 122.

## Vegetation—Continued.

- establishment in ravines, (26) 643.
  - growth on volcanic ash, (28) 219.
  - in Australia, climatic factors, (40) 716.
  - rain-forest and desert mountains, (38) 330.
  - South Africa, (37) 526.
  - vicinity of Leyni, (31) 35.
  - movements of in Salton Sink, (33) 525.
  - native, of Colorado, (37) 209.
  - of a desert mountain range, (36) 27.
  - of a wild hay meadow, (32) 329.
  - Breckland, ecology, (40) 424.
  - Cape Breton Island, (40) 152.
  - East Friesland, (30) 321.
  - glacial plunge basin in New York, (40) 326.
  - Long Island, dynamic studies, (39) 730.
  - Nantucket, (33) 27.
  - New York, (35) 146.
  - northern Florida, (33) 525.
  - Paraguay, (38) 824.
  - Pinus taeda* belt of Virginia and the Carolinas, (37) 435.
  - Sable Island, (29) 242.
  - sand hills of Nebraska, (31) 425.
  - south Florida, (32) 826.
  - southeastern Washington and adjacent Idaho, (38) 824.
  - Tooele Valley, Utah, (30) 628.
  - on steppes of Spain, (39) 122.
  - prairie, studies, (38) 521.
  - relation to—
    - electricity, (27) 231.
    - nitrogen content of water, (39) 332.
    - soil moisture, (30) 223.
  - Rocky Mountain, monograph, (37) 434.
  - rôle of water and light in, (27) 330.
  - specialization in, (32) 34.
  - spring, precocity, (37) 633.
  - tests for fertilizers, methods for making, (33) 711.
- Vegetative associations in Manti National Forest, climatic factors, (39) 809.
- Vellosiella cajani* n.g. and n.sp., description, (34) 52.
- Velvas lawn* sandweed killer and fertilizer, analyses, (33) 735.
- Velvet bean—
- caterpillar, *see* *Anticarsia gemmatilis*.
  - feed, analyses, (40) 72, 571.
  - feed, description, (40) 72.
  - feed, flaked, analyses, (40) 571.
  - meal, analyses, (38) 572; (40) 571.
  - meal, digestibility, (39) 475.
  - meal, feeding value, (39) 370, 474, 482, 784; (40) 279, 672, 874.
  - meal, identification, (38) 638.
  - meal v. cottonseed meal for cows, (38) 680.
- Velvet beans—
- analyses, (26) 362; (29) 271, 569; (32) 862.
  - as cover crop, (31) 635; (34) 736.
  - cover crop for coconuts, etc., (33) 535.
  - forage crop, (38) 336; (39) 231.
  - grazing crop, (39) 577.
  - green manure, (32) 423; (35) 337; (37) 320.
  - bacteria as affected by acidity, (39) 722.
  - botanical studies, (37) 328.
  - breeding experiments, (27) 338.
  - Chinese, globulin of, (39) 202.
  - Chinese, yields, (39) 434.
  - crossing with Lyon beans, (33) 34.
  - culture, (30) 335.
  - culture—
    - and use, (37) 445; (39) 538.
    - continuous, (31) 732.
    - experiments, (27) 336, 841; (30) 632; (33) 31; (35) 528; (36) 332; (37) 529, 729; (38) 33, 827; (40) 230.
    - in Georgia, (38) 342.
    - Guam, (40) 328.
    - Mississippi, (38) 342.
    - North Carolina, (31) 132.
    - Philippines, (26) 361.
    - Rhodesia, (27) 32, 637.
    - under dry farming, (30) 435.
    - with corn, (39) 529.
  - description, (30) 828.
  - effect on nitrogen content of soils, (31) 733.
  - effect on yield of corn, (37) 29.
  - feeding value, (39) 575; (40) 76, 573, 772.
  - fertilizer experiments, (26) 631; (37) 635; (40) 230.
  - for cattle and pigs, (38) 770.
  - for steers, (36) 563.

## Velvet beans—Continued.

- Georgia and Alabama varieties, origin, (40) 141.
  - Georgia, notes, (33) 533.
  - growing with corn, (40) 729.
  - hybridization experiments, (27) 338; (29) 228; (31) 734; (34) 431; (35) 829.
  - insects affecting, (27) 155.
  - notes, (26) 362.
  - pure lines, (27) 339.
  - seed and pod structure, (38) 638.
  - selection experiments, (37) 636.

## Vermont—Continued.

Dairymen's Association, report, (29) 774.

## Station—

financial statement, (27) 599; (29) 194.  
 notes, (26) 495; (29) 197, 498; (31) 198; (33) 199; (36) 236, 600; (37) 499, 797; (38) 98, 499.  
 publications, (25) 692; (36) 294.  
 publications, distribution, (36) 598.  
 report, (33) 97; (36) 294, 598; (38) 497.  
 report of director, (27) 599; (29) 194.

University, notes, (26) 495; (27) 700; (28) 94, 699; (29) 197, 498, 700; (30) 497; (31) 198, 597, 900; (32) 696; (33) 199; (34) 97, 900; (35) 197, 597; (36) 296, 600; (37) 99, 499, 700, 797; (38) 98, 499; (39) 198.

## Vernin—

and guanin pentosid, identity, (27) 407.  
 in malt sprouts, (26) 24.  
 in sugar beets, (28) 810.

## Veronica diseases, notes, (31) 546.

## Veronicella—

lapas in Porto Rico, (39) 58.  
 occidentalis, notes, (40) 56.

## Verruga—

and Carrion's fever, identity, (30) 658.  
 and Oroya fever, identity, (37) 356, 377.  
 etiology and transmission, (29) 262.  
 investigations, (32) 350; (34) 355, 858.  
 relation to lizards, (31) 847.  
 transmission by—

biting flies, (32) 248.  
 insects, (37) 356, 358, 460.  
 Phlebotomus, (30) 252.  
 sand flies, (29) 856.

vector of, (30) 658.

## Vertebrae of animals, studies, (26) 353.

## Vertebrates—

anatomy of, (28) 668.  
 Australian, erythrocytes of, (34) 577.  
 comparative anatomy, (40) 777.  
 treatise, (27) 452.

## Verticillium—

## alboatrum—

affecting okra, (31) 343; (38) 851.  
 affecting potatoes, (27) 247; (31) 345.  
 infection experiments with, (27) 247.  
 notes, (26) 847; (29) 243, 444, 646; (30) 351, 649; (32) 136.  
 studies, (37) 49, 350; (40) 51.  
 treatment, (39) 250.

## diseases, studies, (39) 852.

## heterocladium—

description, (33) 459.  
 notes, (27) 860.  
 on citrus white fly, (33) 157. ]  
 puparum, notes, (29) 562.  
 sp. on potatoes, (32) 239.  
 sp., relation to apple rot, (33) 348.  
 wilts, studies, (33) 244.

## Vesicular eruption—

in horses and bovines, (26) 373, 678.  
 prevalence in Prussia, (27) 181.

## Vespa—

crabro, *see* Hornet, European.  
 vulgaris injurious to wheat, (37) 667.

## Vespa minima sequoia, studies, (31) 652.

## Vesperus katartii, notes, (29) 858.

## Vessels in wood, notes, (26) 51.

## Vetch—

analyses, (26) 770; (28) 463.  
 and oats, fertilizer experiments, (40) 134.  
 and oats for green fallow, (40) 229.  
 aphid, predatory enemy of, (30) 459.  
 as affected by—  
 lithium salts, (28) 526.  
 smoke, (31) 521.  
 soil acidity, (40) 134.  
 as cover crop, (32) 332, 431; (37) 833.  
 forage crop, (31) 829.  
 green manure, (39) 31; (40) 24.  
 green manure for citrus, (32) 233.  
 winter cover crop, (40) 133.  
 bacteria as affected by acidity, (39) 722.  
 behavior of organic substances in, (39) 526.  
 betains in, (27) 203; (28) 312.  
 coccinellids affecting, (33) 256.  
 composition as affected by companion crop, (26) 617.  
 composition at different stages, (39) 836.

## Vetch—Continued

cost of production, (32) 527.

culture, (27) 32, 337; (30) 37; (32) 431.

## culture—

and uses, (28) 337.  
 experiments, (28) 231, 735; (32) 132, 529, 530; (34) 138; (36) 32; (38) 634; (39) 126, 735; (40) 735.  
 for winter forage, (38) 735.  
 in North Carolina, (31) 132.  
 the South, (29) 233.  
 Washington, (37) 96.  
 western Nebraska, (32) 224.  
 on moorland, (30) 229.  
 under dry farming, (30) 435; (31) 429.

description and agricultural value, (36) 635.

diseases, notes (31) 841.  
 effect on activity of soil fungi, (36) 215.  
 effect on milk and butter, (34) 570.  
 fertilizer experiments, (26) 631; (28) 734; (34) 517; (39) 624; (40) 735.

fertilizing value, (26) 438; (27) 831; (29) 233; (35) 125.

forcing with radium, (28) 825.

germination as affected by depth of planting, (36) 438.

growing with grain, (40) 822.

growth as affected by radioactivity, (28) 731.

## hairy—

as cover crop for orchards, (33) 240; (34) 231.  
 as fall-sown cover crop, (39) 532.  
 as green manure, (32) 124; (33) 338.  
 culture, (31) 43; (33) 734.

## hairy, culture—

experiments, (27) 735; (33) 33.  
 in cotton belt, (32) 533, 534.  
 in Porto Rico, (29) 631.  
 in Texas, (40) 729.

## hairy—

effect on soil moisture, (38) 418.  
 fertilizing value, (26) 233.  
 harvesting for seed, (38) 431.  
 liming experiments, (39) 221.  
 seed production, (28) 139.  
 sowing with fall crops at different rates, (40) 243.

## hay—

analyses, (33) 759.  
 chloroform extract of, (31) 71.  
 composition, (27) 668.  
 digestibility, (27) 669; (37) 168.  
 for milk and beef production, (32) 773.  
 mineral constituents, digestibility, (40) 769.  
 hydrocyanic acid content, (28) 477.  
 injury by bollworm, (39) 764.  
 inoculation, (40) 215, 822.  
 inoculation experiments, (28) 426.  
 insects affecting, (39) 556.

## kidney—

as meadow crop, (40) 136.  
 liming experiments, (40) 322.  
 variety tests, (40) 232.

milk, toxicity, (37) 780.

native, analyses, (27) 68.

nodule bacteria of, (32) 33, 327; (39) 338.

nodule production in, (32) 727.

notes, (26) 362; (28) 532.

on moor soils, inoculation, (40) 822.

production in Spain, (28) 736.

purple, (39) 539.

purple, as cover crop for citrus, (34) 344.

rate of seeding tests, (27) 836.

reaction to illumination, (33) 129.

relation of tops to roots, (31) 733.

root development with other crops, (26) 129.

sand, culture under dry farming, (36) 529.

Sclerctium disease, experimental, (39) 753.

Scotch, as green manure, (32) 423.

## seed—

adulteration and misbranding, (27) 141; (29) 636.  
 germination energy, (29) 538.  
 germination tests, (28) 338; (29) 740.  
 hay, digestibility, (38) 368.  
 impermeable, viability, (35) 740.  
 inspection in Maryland, (31) 438; (36) 442.  
 oil content, (27) 716.  
 production, (40) 431.

**Vetch**—Continued.

- spring, grow on volcanic ash, (32) 36.
- treatise, (30) 737.
- utilization of sugar by, (36) 125.
- varieties, (26) 631; (27) 32, 836; (29) 222; (32) 226, 827; (33) 33; (35) 526; (37) 332, 531; (38) 431, 634; (39) 227, 738; (40) 735.
- water requirement, (32) 127.
- wild, effect on baking quality of wheat, (34) 558.
- yield as affected by sulphur, (34) 726.
- yields, (39) 434.

   cruciatum, infection experiments, (29) 243.  
   verruculosum, notes, (36) 652.

Vitamin A, *see* Fat-soluble A and Vitamin, fat-soluble.

Vitamin—

- antiberiberi, distribution, (40) 868.
- antineuritic—
  - as affected by heat, (38) 481.
  - identity with water-soluble B, (38) 503.
  - in cereals, (38) 581, 869.
  - studies, (39) 365; (40) 271, 272.
- antiscorbutic, studies, (40) 272, 869.
- B, *see* Water-soluble B and Vitamin, antineuritic.
- effect on growth, (30) 865.
- factor in animal tissues, (39) 665, 873.
- fat-soluble, studies, (39) 770.
- fraction—
  - determination in milk, (30) 508.
  - from yeast, (35) 311.
  - from yeast and rice polishings, (29) 664.
  - from yeast, chemistry of, (29) 463.
  - from yeast, studies, (39) 667.
- hypothesis and deficiency diseases, (40) 70.
- milk as source of, (39) 570.
- requirements for maintenance and growth, (39) 665.
- theory, discussion, (33) 279.
- water-soluble, studies, (40) 271.

Vitamins—

- and amino acids in the diet, (32) 857.
- and diet, quantitative relationship, (32) 163, 164.
- and symbiotes, similarity, (40) 363.
- chemical nature, (35) 269, 711; (37) 411; (38) 580.
- chemistry of, (36) 314.
- destruction by alkalis, (36) 465.
- destruction by heat, (31) 660.
- determination in—
  - cereal products, (36) 465.
  - food products, (35) 472.
  - vegetables, (40) 410.
- digest of data, (32) 67, 662; (36) 161.
- effect on amino-acid content of media, (40) 201.
- effect on nutrition and growth, (33) 462.
- importance in diet, (32) 763.
- importance in nutrition, (32) 359.
- in animal nutrition, (40) 577.
- bacterial culture, (39) 668.
- brewers' yeast, (36) 864.
- corn, (39) 368.
- corn and wheat products, (39) 314.
- food, (31) 558.
- food, physiological value, (30) 865, 866.
- infant feeding, (40) 269.
- milk, (36) 665.
- Philippine vegetables, (40) 410.
- rice polishings, (30) 285.
- typhoid bacillus cultures, (39) 82.
- necessary for in diet, (31) 762.
- notes, (28) 261; (30) 561; (31) 362; (37) 468.
- pancreatic, use in malnutrition, (37) 65.
- paper on, (35) 100.
- relation to beriberi, (29) 169.
- relation to lipoids, (32) 561.
- review of investigations, (35) 166; (36) 363.
- rôle in metabolism of carbohydrates, (31) 463.
- rôle in nutrition, (35) 269, 472, 861.
- rôle in the diet, (38) 568.
- studies, (40) 363, 465, 563, 564, 565.
- treatise, (32) 578.

Vitellin, lysin content, (31) 559.

Viticultural—

- instruction in schools, (35) 646.
- school at Feldsberg, Austria, (27) 695.
- station at Lausanne, (35) 839.

Viticulture—*see also* Grapes and Vineyards.

- Walnuts—  
 as affected by tarring roads, (26) 432.  
 black—  
   as host of *Archips argyrospila*, (27) 160.  
   culture in Minnesota, (32) 840.  
   development of fat in, (30) 411.  
   root-pruning, (38) 44.  
   varieties, (37) 143.  
 bleaching, (26) 239.  
 breeding, (34) 639.  
 budding, (26) 542.  
 crown gall affecting, (28) 447.  
 culture—  
   experiments, (32) 540.  
   in Arizona, (33) 49; (34) 236.  
   in California, (28) 342; (35) 145.  
 distribution of nitrogen in, (36) 269.  
 English—  
   bacterial blight affecting, (27) 349.  
   bearing dates, (33) 643.  
   culture, (27) 41.  
   diseases, (32) 238; (38) 52.  
 French and Asiatic varieties, (34) 835.  
 grafting, (34) 236.  
 insects affecting, (28) 342; (40) 259.  
 microscopic identification, (28) 565.  
 new form, (30) 644; (32) 46.  
 oak-like mutant of, (35) 840.  
 parthenogenesis in, (30) 544.  
 Persian—  
   culture in Maryland, (40) 150.  
   culture in southern Texas, (32) 539.  
   in United States and Canada, (33) 143.  
   monograph, (28) 543.  
 pruning, (35) 145.  
 Quercina, origin, (32) 338; (34) 236.  
 stocks for, (32) 337.  
 variability of yield, (38) 744.  
 varieties, (37) 241.  
 varieties in California, (32) 746.  
 varieties in France, (28) 342.
- Wampee, description, (32) 742.
- Wapato as a duck food, (30) 545.
- Wapiti, hybridization experiments, (29) 171.
- War bread, analyses, (35) 367.
- War bread, notes, (33) 162.
- War-time dishes, recipes, (37) 63.
- Warble flies, *see* *Hypoderma* spp., *Bots, and Ox*  
 warble fly.
- Warblers of North America, (37) 846.
- Warehouse—  
 Act, Federal, (35) 308.  
 elevators, cooperative in Wisconsin, (28) 593.  
 law in Texas, (33) 492.
- "Warmth of dawn" theory, (40) 314.
- Warp deposits in England, (29) 514.
- Wash bottle, nonspattering, description, (36) 13.
- Washers, strength and design, (32) 687.
- Washing powders as insecticides, (36) 753.
- Washington—  
 Adams Branch Station, report, (37) 195.  
 College, notes, (26) 194, 398, 797, 900; (27) 100, 494, 700; (28) 398, 600, 900; (29) 197, 399; (30) 96, 497; (31) 198, 498, 799; (32) 95, 696; (33) 199, 700; (34) 97, 600; (35) 799; (36) 296; (37) 798; (38) 99, 400, 800; (39) 400, 600, 699; (40) 99, 698, 900.  
 Irrigation Institution, proceedings, (37) 281.  
 Station bulletins, index, (36) 598; (38) 497.  
 Station, financial statement, (26.) 795.  
 Station, notes, (26) 194, 398, 696, 900; (27) 100, 494, 700; (28) 398, 600, 900; (29) 99, 197, 399; (30) 497; (31) 198, 498; (32) 95, 398, 696; (33) 199, 700, 900; (34) 600, 798; (36) 697; (37) 99, 798; (38) 99, 400, 800; (39) 400, 699; (40) 99, 698.

## Washington—Continued.

- Station, report, (26) 795; (28) 796; (32) 796; (34) 796; (37) 96; (40) 797.
- Substation, Western, monthly bulletin, (39) 94, 196, 398, 598, 799, 899; (40) 97, 296, 397, 494, 694, 797.
- western station, report, (28) 599; (33) 97.
- Washington—  
disease of, (31) 845.
- filifera, culture in Arizona, (32) 233.
- Wasp parasite of *Phytalus smithi*, (40) 265.
- Wasp, parasitic, studies, (39) 566.
- Wasps—  
and bees, differences, (38) 256.
- bembicine, of North America, (40) 264.
- digger, of North America, (28) 858.
- fossorial, studies, (25) 455.
- gall, type species, (38) 63; (40) 862.
- hunting, treatise, (35) 468.
- injurious to wheat, (37) 667.
- of Georgetown Museum, (32) 758.
- of Nebraska, (40) 554.
- of West Indies, (34) 857.
- pollination of alfalfa by, (26) 633.
- relation to *Nosema apis*, (27) 761.
- scollid, importation into Mauritius, (39) 869.
- solitary, natural history, (27) 359.
- studies, (40) 553.
- wood, Nearctic species, (39) 869.
- wood, studies, (30) 59.
- Wassermann reaction—  
in rabbits after injection with luetic liver, (35) 383.
- technique, (32) 272.
- Waste products, utilization, treatise, (40) 415.
- Watabura n.g. and n.sp., description, (38) 857.
- Water—  
absorbed, determination in soils, (31) 313.
- absorption—  
and secretion by living plants, (34) 111.
- by butter, (32) 577.
- by timbers, (32) 48.
- in plants, studies, (23) 822.
- added, determination in ground meats and sausage, (37) 414.
- alkali—  
effect on dairy cows, (30) 775.
- effect on dairy products, (27) 282.
- effect on lead, (30) 511.
- notes, (28) 27.
- still for, (28) 796.
- analyses, (26) 118; (27) 165, 317, 719, 817; (28) 27, 442, 618, 811; (29) 210; (30) 620; (31) 316, 358, 509; (32) 281, 357, 456, 487; (33) 165, 779; (34) 84; (35) 8, 83, 490, 663; (36) 86, 888; (37) 114, 693, 883; (38) 691.
- analysis—  
reporting results of, (32) 807.
- textbook, (33) 206.
- treatise, (26) 418; (30) 12; (32) 807.
- and air, review of literature, (28) 115.
- and salt, physiology of, (28) 231.
- appropriation and distribution in Colorado, (31) 587.
- artesian—  
and subartesian, of New South Wales, analyses, (27) 116.
- for irrigation in Montana, (36) 486.
- in Argerich, Argentina, (28) 214.
- in Australia, (29) 16; (33) 486; (34) 284, 483.
- in Black Hills vicinity, South Dakota, (40) 291.
- in Missouri, (31) 812.
- as affected by—  
decaying *Nymphaea* rhizomes, (35) 579.
- storage and preservatives, (26) 418.
- ascent and descent in trees, (29) 524.
- bacterial content as affected by storage, (30) 713.
- bacteriological examination, (34) 284, 285, 286; (37) 187; (38) 11, 591.
- bacteriology of, (26) 174.
- bacteriology, treatise, (29) 814.
- bacteriotoxic action of, (33) 188.
- balance—  
in rest and mountain climbing, (27) 768.
- of desert plants, (26) 530; (27) 29.
- of succulent plants, (26) 227.
- bath, description, (31) 811.
- bath for immersion refractometer, (27) 14.

## Water—Continued.

- bibbs, discharge table for, (31) 784.
- biological analysis, (32) 205, 311.
- biology, treatise, (39) 554.
- black alkaline and calcium sulphate, close proximity, (29) 415.
- bog, effect on plants, (28) 733.
- bog, effect on *Tradescantia* root hairs, (29) 523.
- boiled, use in bread making, (28) 660.
- bottled, bacteria in, (35) 388.
- brackish, irrigation with, (30) 886.
- bubble fountains, bacteriology of, (35) 860.
- buffalo, *see* Carabao.
- capacity of soils, (26) 218, 619.
- channels in leaflets, structure and function, (28) 629.
- chemistry of, (26) 607.
- colloid-holding, purification by soils, (35) 388.
- colon-aerogenes group in, (38) 591.
- composition, (28) 316.
- composition and properties, (30) 620.
- conductivity, preparation, (36) 504.
- conduits, designing, (30) 887.
- conduits for, (34) 483.
- conservation—  
by storage, treatise, (33) 885.
- in British Columbia, (38) 288.
- in New South Wales, (29) 785; (33) 583, 889; (34) 785.
- in soils, (29) 85.
- treatise, (31) 214.
- containing hypochlorite of lime, effect on vegetation, (29) 242.
- content of—  
foods as affected by cooking, (26) 462.
- leaves, studies, (26) 627.
- soils, effect on development of wheat, (27) 38.
- continuous application to vegetables, (37) 325, 543.
- control, bibliography, (32) 588.
- control in irrigation, power, etc., book, (31) 383.
- conveyance, (28) 484.
- conveyance and diversion in India, (33) 683.
- conveyance, treatise, (33) 390, 586.
- core of apples, (26) 449.
- courses, lining, (27) 889.
- Cuban, analyses, (36) 511.
- culture experiments, (39) 122.
- culture experiments—  
aeration of nutrient solution, (39) 28.
- distilling water for, (38) 26.
- interpretation, (36) 731.
- source of error in, (32) 128.
- culture, new method, (28) 817; (33) 628.
- culture solutions, studies, (38) 730.
- cultures, growth of plant seedlings in, (38) 329.
- decomposition by solar rays, (28) 416.
- detection by divining rod, (39) 17.
- determination—  
calcium carbide method, (27) 408.
- in beet seeds, (27) 615.
- bread, (36) 506.
- butter, (26) 806; (27) 311, 312; (28) 474; (30) 113; (32) 508.
- calcium nitrate, (26) 606.
- canned tomatoes, (27) 310.
- cereals, (27) 713.
- cheese, (27) 811; (28) 612; (29) 311, 810; (31) 613, 811.
- corn, (30) 506.
- desiccated milk, (37) 508.
- flour, (27) 498.
- flour and meal, (30) 506.
- food materials, (40) 204.
- foods, (27) 498; (29) 799; (30) 505.
- lard, (26) 207.
- milk fat, (31) 508.
- plant substances, (30) 507; (36) 713.
- sirups, (34) 611.
- soap, (39) 716.
- soils, (28) 204; (32) 216; (33) 206; (36) 719.
- spices and similar products, (37) 414.
- sugar and molasses, (29) 800.
- sugar factory products, (38) 616.
- of hardness, (27) 9, 111; (38) 112.
- of zinc in, (39) 205.
- direct transfer of in ruminants, (29) 66.
- disinfection, (36) 886.

- Water—Continued.
- disinfection by—
    - bleaching powder, (38) 592.
    - bleaching powder and liquid chlorin, (34) 885.
    - chlorid of lime, (28) 214.
  - displacement—
    - n soils, apparatus for measuring, (33) 420.
    - of plant nutrients by, (27) 525; (29) 218.
  - distillation for water culture experiments, (38) 26.
  - distilled—
    - carbonation, (39) 804.
    - effect on lupines, (30) 825.
    - effect on plants, (31) 730; (32) 627; (34) 825.
    - toxicity, (34) 827.
  - distilling apparatus, (39) 804.
  - distribution in butter, (30) 877.
  - dog or western newt, rôle in mosquito control, (39) 660.
  - drainage, investigations, (26) 619.
  - drainage, loss of fertilizer constituents in, (27) 519.
  - drinking—
    - analyses, (32) 357, 456.
    - as source of disease, (38) 298.
    - chemistry of, (33) 683.
    - course of in stomach and intestine of horses, (30) 673.
    - effect on body temperature, (26) 466.
    - effect on digestibility of solid substances, (33) 462.
    - effect on digestion in horses, (29) 672.
    - examination, (28) 509.
    - examination and judgment, (30) 714.
    - filtration, (33) 883.
    - heating for cows, (28) 175.
    - judging, (33) 90.
    - methods of examination, (36) 362.
    - microscopy, (32) 205.
    - need of careful regulation, (30) 169.
    - passage through the stomach, (31) 468.
    - purification, (37) 488.
    - sterilization, (39) 80; (40) 414.
    - studies, (26) 360, 566; (27) 168, 465; (29) 267; (30) 765, 766, 866; (32) 663; (34) 763, 862; (40) 766.
  - duty of, (28) 484, 889; (29) 138, 180, 621; (31) 587; (34) 282.
  - duty of—
    - in Idaho, (26) 27.
    - in irrigation, (29) 588; (30) 687; (34) 883; (35) 82; (37) 185, 281; (38) 186.
    - in orchard irrigation, (31) 782.
    - investigations, (33) 583.
    - meaning, (27) 788.
  - economy of dry-land crops, (27) 531.
  - economy of the earth, (32) 84.
  - effect on—
    - beet pulp, (27) 210.
    - composition of wheat, (37) 38.
    - crop yields, (30) 135.
    - denitrification in soils, (29) 817.
    - development of grass and forage plants, (31) 524.
    - digestion of solid substances, (31) 264.
    - digestive efficiency of saliva, (29) 267.
    - gastric secretion, (26) 466.
    - germination of pine seeds, (27) 243.
    - lead, (31) 512; (33) 778.
    - nitrogen changes in soils, (36) 513.
    - root development of cereals, (30) 136.
    - soil bacteria, (35) 814.
    - strength of concrete, (29) 487; (37) 490.
    - sugar beets, (27) 837.
    - yield in pot experiments, (29) 514.
    - zinc pipes, (31) 189.
  - elevator, automatic, description, (31) 292.
  - elimination during normal respiration, (32) 764.
  - elimination from skin and respiratory passages, (37) 267.
  - elm, culture for wild ducks, (33) 251.
  - evaporation—
    - (28) 219.
    - evaporation—
      - by corn, (29) 525.
      - formula, (37) 882.
      - from soils, (30) 321; (32) 815; (36) 421.
      - tests, equipment for, (29) 814.
  - examination, (26) 69, 660.
- Water—Continued.
- examination, treatise, (29) 506; (34) 609; (38) 11, 313.
  - excess, detection in chopped meat, (29) 460.
  - excretion in the breath, (28) 168, 666.
  - filters, notes, (29) 815; (30) 620.
  - filtration and purification, (31) 383.
  - finder, automatic, (31) 813.
  - finder, automatic, tests, (35) 286.
  - flood, storage for irrigation, (30) 688.

- in animal organs, (29) 767.
- in meat products, (34) 365.
- ingestion—
  - after prolonged fast, influence of, (26) 360.
  - effect on allantoin output, (27) 168.
  - effect on fatty changes of liver in fasting rabbits, (30) 262.
  - effect on metabolism, (28) 866.
  - effect on protein metabolism, (32) 663.
- inspection in Argentina, (26) 762.
- inspection in California, (30) 558.

## irrigation—

- alkali content, (36) 487.
- analyses, (34) 512.
- application, (37) 281.
- chart for calculating deliveries, (26) 788.
- composition and action, (28) 637.
- computing for sugar cane, (31) 383.
- concrete pipe for, (29) 485, 487.
- conservation, (30) 687; (37) 238.
- conservation and distribution, (30) 385.
- cost per acre, (29) 486.
- distribution, (29) 684; (32) 586; (36) 887; (37) 281, 883.
- diversion from Arizona streams, (31) 89.
- duty of, see Water, duty of.
- economical use, (34) 282 (37) 84.
- effect on soil bacteria, (37) 421.
- forecasting supply, (38) 416.
- from potassium chlorid works, (34) 328.
- from vicinity of industrial works, (33) 588.
- in upper Italy, (37) 586.
- measurement, (27) 686; (28) 83, 484; (33) 682, 886; (34) 388, 881; (35) 185, 286, 490, 684; (37) 282, 436, 586, 882, 883; (38) 186; (40) 785.
- measurement and distribution, (27) 585.
- measurement terms, (28) 186.
- measuring devices for, (32) 683.
- methods of applying, (28) 135.
- notes, (32) 883.
- of high Alps, analyses, (34) 85.
- of south coast of Porto Rico, (33) 121.
- of Utah, composition, (39) 792.
- overflow basins for, (29) 485.
- pumping, (32) 187; (37) 281.
- pumping costs, (38) 589.
- pumping with oil engines, (33) 688.
- seasonal duty of, (28) 889.
- storage, (27) 787; (30) 688.
- temperature as affecting citrus seedlings, (34) 235.
- textbook, (34) 481, 482.
- use, (40) 187, 386.
- use in Idaho, (35) 186.
- use of sulphuric acid in, (29) 330.
- wood pipe for, (32) 585.
- judging, (31) 502.
- judgment, (34) 389.
- leeches, transmission of rinderpest by, (33) 876.
- lemons, cold storage of, (32) 439.
- level—
  - as affected by pumping from shallow well, (38) 388.
  - effect on cultivated plants, (26) 620.
  - effect on root and shoot development in plants, (32) 330.
  - effect on yield of cotton, (31) 229, 230.
  - in Gangetic plain, (34) 586.
  - in wells, relation to rainfall, (34) 319.
  - near a tidal river, (40) 187.

## Water—Continued.

## level—continued.

- relation to barometric pressure, (39) 17.
- relation to rainfall and soil texture, (33) 806
- variations, (35) 813.
- levels, adjacent, regulating, (33) 586.
- levels, method of determining, (26) 417.
- lily, banana, as a duck food, (30) 545.
- lime-softened, effect on enzym action, (31) 204.
- loss—
  - from canals by seepage, (36) 585.
  - in irrigation systems, (31) 782.
  - of head in 90°-pipe bends, (35) 186.
  - of head in strainers, orifices, and sand, (35) 786.
  - through evaporation, percolation, and absorption, (30) 418.
- measurement, (30) 887; (40) 187, 188, 785.
- measurement—
  - and division, (27) 188.
  - for irrigation, (29) 683; (31) 782.
  - hook gage for, description, (36) 783.
- measuring—
  - devices, (33) 682.
  - devices, tests, (32) 683.
  - flow, bibliography, (40) 785.
- mechanically filtered, characteristics, (34) 483.
- metabolic, production and rôle, (27) 201.
- meteoric, of antarctic region, studies, (30) 818.
- meter, Dethridge, description, (34) 682.
- meter, Venturi, abnormal coefficients of, (35) 886.
- meters, rating, (30) 386.
- meters, tests, (32) 684.
- methods of analysis, (29) 408, 412, 797; (30) 13; (31) 502, 785, 806; (37) 187, 311, 714.
- methods of examination, (35) 287; (36) 15; (39) 13.
- methods of sampling, (29) 814.
- microorganisms in, (26) 372.
- mineral—
  - analyses, (26) 515, 614; (29) 866; (31) 316; (38) 690.
  - and potable, analyses, (34) 683; (39) 493.
  - content as affecting canned goods, (34) 67.
  - of Illinois, classification, (29) 617.
  - of Iowa, (28) 316.
- moor, destruction of concrete by, (31) 290.
- movement in—
  - aerated soils, (38) 321.
  - gumbo soils, (36) 210.
  - irrigated soils, (27) 819.
  - leaves, (28) 822.
  - peat, (33) 322.
  - plants, (30) 202; (32) 221; (35) 432.
  - soils, (26) 619; (27) 500; (28) 219, 622; (29) 620; (34) 215; (37) 116, 623, 808.
- mud-laden, use in drilling wells, (34) 884.
- needs of body in relation to salivary glands, (40) 767.
- nitrite content, (26) 407.
- nitrogen content, relation to plant growth, (39) 332.
- nitrogen-fixing bacteria in, (38) 419.
- of Argentina, analyses, (37) 693.
- Egypt, papers on, (28) 416.
- Illinois, analyses, (29) 617.
- Neva drainage basin, (26) 621.
- New South Wales, analyses, (29) 785.

 introduced into Imperial Valley, Calif., (31) 36.  
 lessons on, (31) 394.  
 manual, (32) 232.  
 method for study, (37) 542.  
 notes, (28) 148; (30) 632; (31) 438; (36) 534.  
 occurrence of barium in, (26) 432.  
 of arable lands, (29) 30; (30) 399.  
     Argentine wheat fields, (40) 637.  
     barley fields of European Russia, (32) 833.  
     Canada, notes, (27) 643.  
     Cherson government, Russia, (26) 135.  
     cultivated soils in Germany, (29) 337.  
     grassland, English, (39) 439.  
     Idaho, (26) 538.  
     Indiana, treatise, (29) 144.  
     Iowa, Minnesota, and Wisconsin, (35) 35.  
     Kentucky, (32) 337.  
     Kherson, Russia, (37) 542.  
     Maryland, (26) 333.  
     Michigan, (27) 343; (36) 739.  
     Minnesota, (40) 339.  
     Montana, (35) 835.  
     North Carolina, eradication and control, (38)  
     141.  
     Novgorod, (37) 239.  
     Ontario, (27) 733.  
     Sind, (39) 541.  
     Switzerland, (38) 350.  
     western Pennsylvania, (40) 536.  
     Wisconsin, report on, (26) 538.  
 on cultivated land in India, (39) 229.  
 on cultivated marsh soils, (26) 538.  
 parasitic, description, (26) 739.  
 peculiarities and distribution, (26) 739.  
 preservation for school work, (31) 394.  
 propagation, (26) 739.  
 relation to—  
     cultivation of corn, (28) 233.  
     drought, (31) 515.  
     soil fertility, (34) 39.  
     soils, (27) 29, 417; (29) 523.  
 root systems, (37) 542.  
 study in schools, (26) 333; (35) 593.  
 treatise, (31) 835.  
 useful, (40) 832.  
 utilization by lambs, (38) 672.  
 varieties, (31) 133.  
 water requirements, (29) 826.  
 Weevil—  
     larvae, dung-bearing, notes, (34) 556.  
     New York, studies, (40) 861.  
     stalk borer, bird enemies of, (34) 849.  
 Weevils—  
     and weevil products, use in food and medicine,  
     (34) 361.  
     attraction by water, (40) 855.  
     habits of, (35) 261.  
     in beans and peas, remedies, (38) 41.  
     in stored grain, (39) 558.  
     in stored grain, remedies, (33) 34.  
     injurious—  
         in Great Britain, (38) 364.  
         to fruit buds, (35) 363.

Weevils—Continued.  
 injurious—continued.  
     to potatoes and yams, (38) 864.  
     to wheat, (26) 352.  
     of northeastern America, treatise, (36) 157.  
     studies, (37) 58.  
 Weights—  
     and measures—  
         inspection, (29) 266.  
         inspection in Maine, (36) 467.  
         inspection in Nevada, (33) 661.  
         law in Iowa, (26) 261.  
         law in Nebraska, (31) 67.  
         law in Nevada, (30) 165.  
         law in Ohio, (33) 261, 662.  
         conversion into metric system, (30) 697.  
 Weir formulas, derivation, (36) 282.  
 Weir notches, flow of water through, (34) 88.  
 Weirs—  
     chart for, (31) 888.  
     Cippoletti, end contractions in, (31) 782.  
     construction and use, (37) 882.  
     discussion and use, (32) 684.  
     flow of water over, (33) 484; (35) 886; (37) 693.  
     inverted, notes, (33) 288.  
     irrigation, description, (34) 388.  
     notes, (31) 383.  
     portable, construction, (37) 486.  
     proportional flow, notes, (31) 784.  
     proportional flow, tests, (34) 785.  
     steel, adjusting length of crest, (29) 684.  
     tests, (35) 386; (37) 586.  
     treatise, (35) 288.  
     use, (33) 885.  
 Well casings, corrosion, (34) 483.  
 Well equipment, notes, (30) 385.  
 Wells—  
     and ground water, textbook, (30) 620.  
     artesian, of Australia, (39) 86.  
     boring, (34) 683.  
     boring in New South Wales, (29) 785.  
     breathing, (34) 614; (35) 115.  
     convoluted tube, for irrigation, (29) 485.  
     deep, bacteria in, (38) 488.  
     drilling, use of mud-laden water in, (34) 884.  
     flow of water into, (36) 87.  
     for irrigation, drilling, (32) 882.  
     in Imperial Valley, (35) 82.  
     of South Dakota, (40) 291.  
     of United States, (28) 811.  
     protection, (34) 790.  
     pumping from, (40) 188.  
     relation to public health, (29) 512.  
     shallow—  
         concrete caisson curb for, (29) 484.  
         developing, (32) 586.  
         in Illinois, (28) 717.  
         of Indiana, (29) 16.  
         protection, (31) 813.  
     use in land drainage, (34) 885.  
 Wenatchee River Basin, Washinton, hydrography,  
 (32) 786.  
 Wesmaelia spp. in America, (37) 855.  
 West Indies Department of Agriculture, notes, (26)  
 693.  
 West Virginia—  
     Station, bulletin, (30) 94; (32) 899; (34) 197.  
     Station, notes, (26) 194, 398, 696; (27) 199; (28)  
     398; (29) 600; (30) 300, 798; (31) 198; (32) 95,  
     498; (33) 400; (34) 98; (35) 98, 500; (36) 697; (37)  
     198.  
     Station, publications, (36) 294; (40) 494.  
     Station, report, (30) 94; (32) 796; (39) 196.  
     University, notes, (26) 194, 696; (27) 199; (28)  
     398; (29) 197, 600; (30) 300, 798; (31) 198, 400,  
     799; (32) 95; (33) 400; (34) 98; (35) 98, 500, 900;  
     (36) 697; (37) 198.  
 Western—  
     Australian Farm School, (31) 500.  
     Canada Irrigation Association, (31) 88; (33) 780.  
     pine beetle, notes, (26) 561; (32) 552.  
     twig borer, notes, (30) 255.  
 Western-wolths grass, culture experiments, (36) 735.  
 Wethers—  
     cost of fattening, (29) 572.  
     feeding experiments, (26) 468.  
     metabolism experiments, (26) 469.  
 Whale—  
     guano, analyses, (32) 32.  
     meal, analyses and digestibility, (26) 567.

## Whale—Continued.

- meat, fertilizer from, (39) 524.
- oil, hydrogenated, properties of, (34) 9.
- oil industry, statistics, (39) 9.

## Wheat—

- Alaska and Stoner, or "Miracle," (35) 139.
- amylase, studies, (31) 609.
- analyses, (26) 43, 767, 873; (27) 461; (28) 463, 666; (29) 271; (30) 434, 565; (31) 65, 334, 431, 863, 864; (32) 252, 760, 862; (33) 160, 161, 568; (34) 760; (35) 8, 162, 367; (37) 38, 39.
- and barley hybrid, (34) 339; (37) 823.
- clover following various crops, (40) 829.
- grain mixtures, nutritive deficiencies, (35) 577.
- its milling products, composition, (30) 257.
- its products, treatise, (38) 538.
- pea silage, acidity, (39) 878.
- peas as hay crop, (39) 333.
- rye, fertile hybrid of, (30) 341.
- rye hybrid, description, (38) 735.
- rye hybrid, heredity in, (37) 432.
- rye, hybrids, natural, (34) 230.
- spelt, hybridization, (38) 636; (40) 524.
- anomaly of anthers, (40) 39.
- antineuritic vitamins in, (38) 581.
- aphis, western, studies, (35) 757.
- as affected by—
  - age, (27) 363.
  - alkali, (39) 736; (40) 315, 719.
  - asparagin, (27) 731.
  - barium, (40) 515.
  - barium and strontium, (40) 819.
  - boron, (38) 22; (39) 429.
  - calcium and magnesium, (35) 726.
  - companion crop, (32) 432.
  - copper and lead salts, (35) 324.
  - disinfectants, (26) 820.
  - greenhouse temperature, (37) 533.
  - guanidin, (28) 427.
  - lithium, zinc, and lead salts, (29) 520.
  - magnesia, (39) 117.
  - manganese, (40) 820.
  - metallic salts, (31) 218.
  - osmotic pressure of soil solution, (37) 128.
  - planting out of season, (31) 234.
  - potassium chlorid, (40) 244.
  - radioactive minerals, (27) 826.
  - radioactivity, (30) 224.
  - salt solutions, (39) 840.
  - sodium compounds, (39) 117.
  - sodium nitrate, (38) 438; (40) 244.
  - soil and climate, (39) 342.
  - soil moisture, (32) 814; (37) 340; (39) 841.
  - soil nitrogen, (39) 342.
  - soil volume and available plant food, (31) 132.
  - spacing in breeding plats, (30) 633.
  - sulphur, (38) 221.
  - sulphuric acid, (31) 34.
  - temperature, (30) 664.
  - weight of seed, (39) 743.
- as dry-farm crop, (39) 131, 736, 744.
- green manure, (38) 27.
- hog pasture, (39) 375.
- nurse crop for alfalfa, (32) 430.
- silage crop, (39) 134; (40) 730.
- sole ration for animals, (33) 367; (36) 865; (39) 72.
- ash analyses, (29) 861.
- assimilation and utilization of plant food, (39) 127.
- Australian—
  - culture in England, (26) 135.
  - government marketing, (40) 592.
  - milling and baking qualities, (2) 659; (40) 66.
- availability of nitrogen in, (26) 124.
- bacterial blight, notes, (35) 845.
- bacterial disease in Punjab, (39) 454.
- bacterial disease, notes, (29) 423; (31) 127.
- baking quality as affected by—
  - climate, (31) 43.
  - storage, (30) 667.
- baking tests, (26) 67.
- beardless and bearded, prices of, (26) 43.
- behavior of organic substances in, (39) 526.
- belt, climatic and edaphic factors, (39) 734.
- belts, winter and spring, climatic features, (40) 117.

## Wheat—Continued.

- black foot disease, notes, (27) 748.
- black stem rust, notes, (39) 851.
- botanical notes, (30) 240.
- bran—
  - amino acid in, (33) 665.
  - analyses, (26) 72, 210, 266, 267, 363, 468, 568, 768, 770, 873; (27) 170, 469, 570, 670, 774, 872; (28) 265, 364, 464, 465, 572, 669; (29) 270, 367, 467, 666, 769; (30) 67, 68, 169, 565, 868; (31) 366, 467, 564, 569, 663, 863; (32) 169, 259, 667, 862; (33) 371, 568, 870; (34) 72, 169, 263, 371, 467, 566, 665, 767; (35) 373, 562, 867; (36) 167, 268, 667, 765; (37) 268, 471, 767; (38) 67, 368, 369, 572; (39) 167, 270, 370, 773; (40) 72, 470, 571, 665.
  - chemistry of, (28) 17.
  - composition and adulteration, (38) 712.
  - determination of indigestible residue, (39) 502.
  - determination of smut spores in, (27) 310.
  - digestibility, (37) 678.
  - digestible nutrients, (28) 171.
  - distribution of nitrogen in, (36) 269.
  - energy value, (33) 72.
  - extract, effect on growth of rats, (34) 258.
  - feeding value, (39) 733, 784; (40) 670, 672.
  - fertilizing value, (39) 726.
  - for steers, (29) 272.
  - in animal nutrition, (31) 762.
  - inosite phosphoric acids of, (39) 14.
  - organic phosphorus compounds of, (28) 505; (32) 17; (33) 11, 464, 802.
  - phosphorus compounds in, (29) 804.
  - phytic acid in, (30) 707.
  - value in food, (28) 258.
- bread as affected by organic acids, (27) 462.
- bread, recipes, (37) 364.
- bread, use of potato flour in, (26) 156.
- bread-making—
  - for warm climates, breeding experiments, (40) 143.
  - qualities, (39) 469.
  - quality as affected by artificial drying, (31) 162.
- breeding, (26) 434; (29) 538; (31) 234, 829; (36) 441; (37) 799, 827; (40) 38, 523.
- breeding—
  - and improvement in Sweden, (39) 833.
  - experimental error in, (29) 38; (39) 830.
  - experiments, (26) 639; (27) 437; (28) 828; (29) 31, 33, 143, 532, 835; (30) 331, 441, 525; (31) 531, 831; (32) 532; (33) 331; (35) 825; (36) 828; (37) 731; (38) 526; (39) 126, 129, 334, 634, 642, 643, 736; (40) 140, 143, 233, 330, 524, 525, 635, 636, 830.
  - for disease resistance, (28) 147.
  - drought resistance, (28) 537.
  - milling quality, (28) 633.
  - rust resistance, (39) 550.
  - variation in nitrogen content, (29) 835.
  - selection in, (30) 733.
- bug, notes, (30) 854.
- bulb fly, biology, (35) 460.
- bulb fly, notes, (27) 552; (31) 57; (32) 350; (40) 547.
- bulk handling in Washington, (39) 643.
- bunt—see also Wheat smut, stinking.
  - notes, (32) 544.
  - treatment, (26) 845.
  - wind dissemination, (40) 642.
- burned, milling and baking tests, (38) 567.
- bushel weights, (37) 889.
- by-products, analyses, (26) 568, 665; (27) 670; (28) 265, 364, 464; (29) 769.
- by-products, ash analyses, (29) 861.
- by-products, judging, (31) 809.
- catalytic fertilizers for, (30) 627.
- chafer, notes, (31) 155.
- chaff, analyses, (29) 467.
- chaff, digestibility, (31) 667.
- change in weight during storage, (30) 639; (31) 257.
- changes in proportions of hard and soft kernels, (40) 142.
- chop, analyses, (31) 863.
- chromosome numbers in, (27) 636.
- classification, (39) 539.

## Wheat—Continued.

## classification—

- and descriptions, (33) 436.
- and grading, (37) 860.
- studies, (31) 327.
- committee of India, (40) 894.
- comparative anatomy, (38) 741.
- competition in, (27) 430.
- composition, (26) 358; (29) 262; (31) 759; (33) 564.
- composition and nutritive value, (27) 267.
- composition as affected by—
  - environment, (26) 133; (29) 263; (30) 440, (32) 431.
  - fertilization and soil preparation, (34) 230.
  - fertilizers, (28) 140, 535; (40) 434.
  - irrigation, (28) 332.
  - maturity, (28) 836.

## composition—

- at different stages, (30) 137.
- during growth and ripening, (35) 738.
- factors affecting, (29) 833.
- in relation to soils, (38) 518.
- conservation in United States, (38) 792.
- continuous culture, (27) 831, 832, 833; (29) 227; (30) 124; (40) 32, 419, 431, 731, 733, 824.
- cooperative experiments, (29) 138.
- correlation and variation in, (32) 832.
- correlation in, (31) 738; (37) 141.
- cost of harvesting, (36) 441; (38) 839.
- cost of production, (26) 830; (29) 690; (32) 530, 594, 688; (33) 293, 831; (35) 691; (37) 191; (39) 840; (40) 292, 488.
- cost of production in Austria, (28) 594.
- cost of production in 1917, (39) 688.
- creatinin content, (33) 725.
- critical period of growing season, (39) 811.
- cross fertilization, (29) 636; (36) 441.
- crosses, suppression of characters in, (36) 738.
- crossing experiments, (31) 531.
- cultivated, origin, (32) 131.
- culture, (26) 134; (27) 337; (30) 434; (31) 35, 532; (32) 132, 226; (34) 138, 694; (35) 33; (37) 340, 736; (38) 33, 38, 140, 240, 441, 527, 636; (39) 834.

## culture—

- at high altitudes, (39) 810.
- climatic limits, (28) 513.
- contests in Western Australian schools, (30) 794.
- continuous, (30) 120; (32) 533; (34) 138; (35) 30, 536, 813; (37) 445; (39) 529.
- experiments, (26) 38, 131, 233, 329, 422, 630, 737, 830; (27) 31, 299, 232, 233, 299, 335, 336, 342, 638; (28) 431, 434, 734, 827; (29) 225, 425, 426, 427, 429, 433, 538, 630, 735, 836; (30) 33, 133, 141, 526, 531, 632; (31) 733; (32) 36, 132, 430, 431, 526, 528, 529, 530, 531; (33) 31, 137, 332, 633, 729, 830; (34) 39, 137, 227, 228, 230, 339, 632, 735; (35) 31, 228, 229, 534; (36) 32, 33, 132, 234, 235, 739, 830; (37) 30, 330, 436, 438, 534, 734, 823, 824, 825; (38) 38, 132, 133, 229, 333, 334, 336, 432, 433, 526, 630, 632, 634, 635, 735, 825, 830; (39) 124, 125, 126, 127, 128, 217, 227, 229, 333, 334, 335, 336, 435, 436, 437, 530, 632, 742, 834; (40) 125, 218, 319, 329, 330, 636, 730, 731, 733, 735.

## culture experiments in—

- Argentina, (40) 533.
- Australia, (40) 230, 332.
- Canada, (40) 228, 333, 533.
- India, (40) 230, 332, 523, 825.
- Rhodesia, (40) 230, 825.
- South Africa, (40) 831.

## culture—

- for chicken feed, (38) 827.
- for hay, (37) 436.
- for silage, (26) 574.
- in Alabama, (32) 137; (40) 142.
- America, treatise, (26) 134.
- Argentina, (35) 136, 740.
- arid region of Portugal, (40) 33.
- Australia, (34) 227.
- Canada, meteorological factors in, (35) 15.
- Chile, (39) 231.
- cotton belt, (32) 533.
- east Siberia, (32) 138.
- eastern Oregon, (36) 830.
- eastern United States, (31) 438.

## Wheat—Continued.

- feed, analyses, (36) 167; (40) 665.
- feeding, (34) 494.
- feeding flour, analyses, (40) 665.
- feeding value, (34) 867.
- fertilization in relation to frost injury, (35) 642.
- fertilizer experiments, (26) 131, 232, 422, 424, 426, 439, 522, 527, 537, 538, 630, 631, 639, 727, 818, 829, 838; (27) 32, 125, 137, 324, 335, 336, 337, 342, 629, 831, 832, 834, 840; (28) 124, 221, 338, 493, 723, 724, 735; (29) 25, 126, 127, 227, 228, 632, 727, 728, 736; (30) 125, 229, 235, 325, 326, 335, 531, 627, 821; (31) 31, 123, 133, 139, 328, 421, 430, 733, 738, 828; (32) 137, 322, 431, 629, 630, 814, 819; (33) 137, 219, 226, 326, 625, 632, 817, 828; (34) 22, 25, 128, 131, 423, 424, 518, 519, 520, 622, 630, 632, 723, 809; (35) 22, 30, 126, 218, 220, 325, 326, 424, 425, 427, 430, 520, 536, 724; (36) 217, 220, 235, 325, 338, 425, 428, 437, 440, 529, 735, 829; (37) 30, 214, 215, 229, 238, 323, 337, 436, 438, 627, 734, 823, 831; (38) 133, 217, 240, 432, 433, 518, 620, 630, 726, 820, 829; (39) 22, 116, 127, 171, 227, 334, 335, 421, 427, 436, 529, 530, 531, 540, 624, 738, 742, 816, 839; (40) 39, 218, 230, 231, 319, 332, 333, 434, 523, 524, 533, 621, 622, 734, 735, 824, 825, 831.
- fields, weed control in, (40) 536, 637.
- fixity of races in, (30) 341.
- flag smut, notes, (28) 846.
- flag smut, treatment, (29) 845; (31) 746; (34) 644.
- flintiness and starchiness in, (36) 235.
- flour, *see* Flour.
- flour substitutes, (39) 67, 164, 267, 470, 769, 871; (40) 66, 67, 173, 360, 657, 762, 863.
- flour substitutes—
  - analyses, (39) 870.
  - milling experiments, (40) 556.
  - protecting from insects, (40) 59.
  - recipes, (40) 361.
- flowering and pollination of, (32) 832.
- fly, notes, (29) 357; (31) 50.
- following alfalfa, (39) 436.
- foot disease, notes, (28) 51, 52; (29) 150; (30) 242, 243, 349, 541; (31) 51; (40) 845.
- foot rot, treatment, (36) 535.
- for pigs, (33) 73.
- for summer silage, (29) 473.
- French, gluten content, (32) 63.
- from imported and home-grown seed, quality, (33) 41.
- from Sunpan, China, description, (26) 135.
- from trans-Volga districts, nitrogen content, (31) 334.
- frost injuries, (27) 349; (38) 148.
- frosted, germination, (40) 443.
- frosted, notes, (29) 242.
- frozen, for pigs, (28) 772.
- fumigation with hydrocyanic acid gas, (33) 522.

## Wheat—Continued.

- Fusarium diseases in Bavaria, (30) 748.
- garlicky, drying and cleaning, (36) 361.
- germ, analyses, (27) 872.
- germ, digestion coefficients, (28) 170.
- germ ripening experiments, (26) 131.
- germ, use in bread making, (39) 870.
- German and foreign, bread making qualities, (30) 257.
- German, composition and baking quality, (32) 252.
- germinated, baking and milling tests, (29) 661, 863.
- germinated, baking quality, (30) 555; (37) 862.
- germinating—
  - anaerobic respiration, (29) 539.
  - disease of, (34) 644.
  - energy transformations, (36) 525.
  - investigations, (35) 632.
  - new disease of, (33) 847.
  - pentosan content, (29) 525.
- germination and purity tests, (37) 238.
- germination as affected by —
  - age, (27) 740.
  - anesthetics, (27) 220.
  - calcium cyanamid, (33) 818.
  - carbon bisulphid, (27) 131, 342.
  - copper sulphate, (32) 749.
  - depth of planting, (36) 437.
  - fertilizers, (29) 327.
  - formaldehyde, (36) 638.
  - fungicides, (26) 845; (29) 346.
  - fungicides and insecticides, (30) 242, 837.
  - hot water treatment, (30) 449.
  - orwood, (28) 536.
  - Roentgen rays, (28) 128.
  - silver nitrate, (34) 31.
  - stimulants, (26) 131.
  - superphosphates, (27) 840.
  - temperature, (29) 731; (30) 531.
- germination—
  - at different dates after threshing, (40) 443.
  - effect on baking quality of flour, (26) 356.
  - energy of, (29) 538.
  - in electrolytic solutions, (31) 427.
  - in mercury vapor light, (30) 827.
  - studies, (31) 530.
  - tests, (29) 223, 740; (30) 236, 837; (31) 733.
  - tests in hydrogen peroxid, (27) 201.
- germinative ability and vegetative force, (29) 740.
- germs, analyses and feeding value, (29) 467.
- Ghirka, improvement, (36) 337.
- gliadin and barley hordein, relationship, (31) 377.
- gliadin, hydrolysis, (26) 22; (28) 607.
- glume rust, notes, (36) 747.
- gluten—
  - as affected by vegetable proteins, (26) 67.
  - colloidal swelling, (34) 111; (36) 862.
  - content, decreasing, (33) 659.
  - formation, (37) 341.
  - hydrolysis, (28) 607.
- grades, (32) 138.
- grading, (29) 661; (30) 663; (32) 634; (37) 863; (39) 871; (40) 39, 144, 145.
- grain color, environmental influences, (33) 538.
- grains from different parts of ear, (36) 440, 534.
- graphic summary of seasonal work, (39) 495.
- grass—
  - as pasture crop, (39) 130.
  - field tests, (39) 135.
  - identification, (29) 741.
  - irrigation experiments, (32) 224.
  - monograph, (29) 141.
  - slender, culture experiments, (32) 528.
  - slender, seeding on ranges, (30) 35.
  - slender, yields, (40) 733.
  - water requirement, (32) 127.
  - western, bacterial disease, (34) 349; (38) 249.
  - western, characteristics, (36) 638.
  - western, Phoma disease of, (34) 846.
- green, analyses, (29) 467.
- green manuring experiments, (35) 426; (36) 234; (37) 425, 734; (39) 326, 725; (40) 824.
- greensand potash for, (40) 423.
- grinding, power required for, (35) 586.

## Wheat—Continued.

- ground—  
 analyses, (27) 774; (31) 65.  
 puffed, analyses, (29) 666.  
 v. whole, for pigs, (31) 869.  
 growing in sand media, (36) 297.  
 growing without potash, (40) 134.  
 growth as affected by—  
 alkali, (34) 125; (36) 118.  
 concentration of nutrient solution, (35) 436.  
 electricity, (30) 827.  
 light, (28) 227.

 red spring, comparison, (33) 361.  
 red spring, milling tests, (30) 662.  
 softening in Arizona, (40) 142.  
 spring, culture, (33) 337.  
 spring, varieties, (34) 39.  
 hardness, relation to sap density, (39) 430.  
 hardness and softness, inheritance, (40) 143.  
 harvest, 1916, (36) 396.  
 harvest, 1918, handling in Kansas, (40) 92.  
 harvesting at different stages, (40) 333.  
 harvesting experiments, (26) 838.  
 hay, analyses, (29) 467.  
 hay, character and digestibility, (31) 364.  
 head disease, description, (27) 351.  
 heads, determination of density, (32) 42; (38) 537.  
 heads, fungus disease of, (34) 845.  
 heating, moisture content, (38) 538.  
 heredity of albinism in, (31) 329.  
 history of, (31) 131.  
 humin nitrogen content, (40) 510.  
 Humpback, (36) 533.  
 Hungarian, grain characters in, (31) 531.  
 hybrid, new, (37) 445.  
 hybrid, notes, (30) 140.  
 hybrid, spontaneous appearance, (29) 636.  
 hybridization experiments, (26) 831; (28) 828; (30) 733; (34) 228; (36) 436.  
 hybrids, repulsion in (31) 531.  
 ideal climate for, (38) 717.  
 improvement, (28) 141, 638; (32) 630; (36) 338.  
 improvement—  
 by selection, (29) 532; (31) 438, 531, 829.  
 in Argentina, (37) 823; (38) 741.  
 in Australia, (32) 399; (40) 635.  
 in Canada, (37) 831.  
 of nitrogen content, (26) 739.  
 improvers, notes, (26) 358.  
 in northern Turkestan, (32) 231.  
 Indian, handbook, (29) 789.  
 Indian, milling and baking quality, (26) 135.  
 infection by soil fungi, (26) 746.  
 inheritance—  
 in, (34) 531; (37) 332; (40) 140, 525.  
 of awn color in, (33) 836.  
 characters in, (28) 638; (35) 233.  
 flowering and ripening periods, (40) 830.  
 grain texture, (40) 143.  
 winter resistance in, (29) 635.  
 inoculation experiments, (35) 32.  
 insect survey, (39) 863.  
 insects affecting, (26) 753; (34) 851; (38) 197; (39) 863.  
 irrigated, chemical studies, (30) 460.  
 irrigated, protein content, (39) 342.

## Wheat—Continued.

- irrigation, (29) 621; (31) 328; (39) 132, 343; (40) 636.  
 irrigation experiments, (27) 536; (28) 130, 132, 134, 230, 588, 638; (29) 32, 138, 226; (30) 35; (31) 36; (32) 37, 225, 531; (33) 225, 631, 827, 884; (36) 35, 234, 235, 385, 886; (37) 30, 238, 340, 640, 822; (38) 636; (39) 132; (40) 230.  
 jointworm, control, (39) 863; (40) 170.  
 jointworm in Ohio, (39) 863.  
 kernel, crease of, (30) 666.  
 kernel, development, (31) 234; (34) 633; (37) 24.  
 kernel, factors affecting shape, (40) 244.  
 lands of western Australia, fertility, (29) 315.  
 leaf miner, studies, (29) 257.  
 leaves, anatomy of, (35) 443.  
 lessons on, (26) 392; (28) 393.  
 lime-magnesia requirements, (29) 521.  
 liming experiments, (28) 223, 624; (29) 223; (32) 31; (34) 132, 133; (36) 27, 38; (39) 116, 221, 421, 529, 530; (40) 815.  
 localization of betain in, (27) 203.  
 lodging in relation to vascular bundles, (33) 332.  
 loose smut—  
 description and treatment, (26) 341.  
 life history, (37) 839.  
 notes, (30) 448; (38) 548.  
 resistant varieties, (39) 852.  
 studies, (28) 545, 845.  
 treatment, (26) 546; (27) 246, 746, 848; (28) 445, 646; (29) 45, 548; (31) 147, 342; (37) 247; (38) 240.  
 loss in weight after harvesting, (38) 635.  
 louse, notes, (30) 658.  
 macaroni and bread, linkage in crosses, (39) 643.  
 magnesia for, (40) 824.  
 maltase content, (31) 204.  
 manganese in, (34) 339.  
 manuring experiments, (40) 636, 730, 731.  
 manuring in winter, (37) 195.  
 marketing, car supply in, (31) 790.  
 marketing in Pacific coast region, (26) 293.  
 Marquis, (35) 443.  
 Marquis, history and culture, (30) 738; (36) 137.  
 Marquis, milling quality, (30) 666, 760.  
 meal, digestibility, (30) 566.  
 measurements, (30) 235.  
 methods of analysis, (37) 11.  
 Mexican, composition and quality, (32) 63.  
 middlings—  
 analyses, (26) 72, 768, 873; (27) 170, 171, 371, 469, 670, 774, 872; (28) 265, 364, 465, 669; (29) 666, 769; (30) 67, 68, 169, 565, 671, 868; (31) 73, 366, 467, 564; (32) 169, 259, 667; (33) 371, 759; (34) 72, 371, 467, 665, 767; (35) 373, 374, 562, 867; (36) 167, 268, 667, 765; (37) 268, 471, 767; (38) 67, 368, 369, 572, 665; (39) 167, 270, 370, 773; (40) 72, 571, 665.  
 digestibility, (37) 677.  
 feeding value, (40) 278, 668.  
 white, definition, (28) 98.  
 midge—  
 control, (39) 863.  
 in Ohio, (39) 766, 863.  
 Ontario, identity, (40) 653.  
 Sweden, (39) 159, 866.  
 notes, (28) 657; (29) 357.  
 on barley, (39) 159.  
 mildew—  
 in Australia, (38) 48.  
 notes, (27) 349; (28) 149; (34) 243, 644.  
 relation to light, (30) 747.  
 resistant varieties to, (27) 545.  
 studies, (27) 545; (33) 847.  
 mill market for, (38) 895.  
 milling, (31) 759.  
 milling and baking—  
 qualities, (32) 159, 160, 333; (33) 361, 659; (36) 862.  
 studies, (26) 461; (30) 460, 661, 663, 664, 666, 668, 759.  
 tests, (26) 43; (27) 165; (28) 458, 862; (29) 226, 262, 661, 863; (31) 256, 258; (32) 760; (33) 361; (35) 162, 265, 367, 534, 555, 835, 859; (36) 441, 464, 531, 500, 831; (37) 39, 361, 860, 863; (38) 239, 439, 663; (40) 658.  
 milling—  
 properties, (27) 266, 867.  
 qualities, (28) 761; (37) 570.

## Wheat—Continued.

- milling—continued.
  - quality as affected by barley and rye, (29) 866.
  - quality as affected by germination, (29) 863.
  - quality in relation to physical characteristics of kernel, (35) 555.
  - tests, (28) 334; (36) 761.
- mineral nutrition, (28) 224.
- mineral requirements, (37) 799.
- mites, studies, (40) 855.
- mixed feed, analyses, (34) 169.
- moisture capacity, (37) 362.
- moisture content, (26) 462.
- Montana-grown, types and quality, (37) 361.
- morphological studies, (39) 341.
- mutation variety of, (31) 234.
- natural crossing in, (40) 142.
- nematode disease, (39) 649; (40) 144, 849.
- nematodes affecting, (30) 243, 448; (32) 448; (38) 850.
- nitrate in, (40) 300.
- nitrogen and phosphoric acid in, (26) 661; (27) 500.
- nitrogen, biological value, (40) 660.
- nitrogen content as affected by culture, (34) 735.
- nitrogen content, variation in, (35) 340.
- North Dakota, screenings in, (29) 866.
- October sown v. December sown, (33) 831.
- of Algeria and Tunis, (34) 227.
  - Baluchistan, Khorassan, and Kurram Valley, (37) 446.
  - Colorado, properties, (39) 238, 443.
  - Colorado, studies, (40) 39.
  - Queensland, analyses, (40) 314.
  - Victoria, milling and baking qualities, (31) 256.
  - Washington, classification, (37) 237.
  - west-central Minnesota, phosphates for, (40) 320.
  - Wisconsin, milling and baking qualities, (40) 761.
- offal, analyses, (27) 570; (28) 669; (31) 564; (39) 270.
- offal, classification and standardization, (31) 71.
- official standards, (40) 39, 144.
- oil, toxic effects on rats, (36) 61.
- on inoculated soil, (39) 519.
- orange leaf rust of, (31) 641.
- origin, (28) 761.
- parentage of, (26) 529.
- pedigreed, in Wisconsin, (40) 624.
- pedigreed, yields in Wisconsin, (37) 438.
- peptic digestibility, (29) 164.
- percentages of flour from, (36) 662.
- phenological observations, (40) 811.
- phosphorus content, (27) 461; (30) 362.
- physical structure and physiology, (26) 358.
- physiological requirements, (39) 28, 331.
- phytic acid and its salts in, (37) 108.
- plant—
  - composition, (35) 832.
  - methods of analysis, (37) 11.
  - microchemical studies, (37) 631.
  - mineral requirements, (39) 331.
- planting and harvesting dates, (26) 533.
- plat tests, technique, (40) 227, 623.
- plats, hoop harvesting, (39) 539.
- poisoning of horses by, (27) 888.
- Polish, inheritance in, (40) 140, 525.
- Polish, milling and baking tests, (40) 234.
- pollination, (36) 527.
- Portuguese varieties, (30) 40.
- powdery mildew, infection, (26) 646; (33) 244.
- powdery mildew, studies, (35) 651, 844; (37) 749.
- precipitin test for, (31) 733.
- premature death of, (29) 151.
- prices—
  - and shrinkage, (34) 337.
  - in England, (26) 190.
  - in Germany, (30) 896.
  - in United States, (38) 742.
  - movement, (31) 894.
  - three centuries of, (40) 792.
- problem of 1917 harvest, (39) 688.
- production—
  - and consumption, (30) 391, 692.
  - marketing, (26) 791.
  - prices in 1915, (35) 793.

## Wheat—Continued.

- production—continued.
  - and prices in United States, 1908-1918, (40) 93.
  - rainfall, correlation, (35) 14.
- in Argentina, (27) 193.
- Australia, (40) 635.
- California, (38) 134.
- Canada, (26) 838.
- India, (36) 92.
- 1911, (26) 595, 792.
- 1913, (31) 95.
- Russia, (26) 294.
- Spain, (28) 736.
- the Tropics, (40) 637.
- United Kingdom, (26) 793.
- United States, (26) 293; (38) 743.
- 1918 program, (38) 837.
- present and prospective, (38) 595.
- products—
  - analyses, (26) 43, 665; (29) 769; (30) 169; (32) 169; (38) 665.
  - growth-promoting properties, (40) 67.
  - moisture capacity, (37) 362.
  - preparation, (38) 365.
  - vitamin content, (39) 314.
- protein content—
  - following black fallow, (34) 230.
  - improvement, (39) 742.
  - relation to rainfall, (28) 537; (33) 41.
  - relation to soil moisture, (30) 662.
  - variations in, (30) 836.
- protein—
  - efficiency for milk production, (33) 276.
  - nutritive value, (26) 155; (39) 665, 666.
- proteins—
  - alcohol-soluble, (33) 162.
  - effect of feeding at different planes of intake, (36) 361.
  - supplements for, (36) 560.
- puffed, analyses, (30) 67, 68.
- pure line, variation in, (31) 130.
- pure strains, tests, (39) 129.
- purebred, mutation in, (29) 433.
- purslane sawflies affecting, (29) 252.
- quicklime treatment, (40) 337.
- rate of seeding tests, (27) 335, 639; (28) 135; (32) 42.
- ratio of grain to straw, (36) 218.
- ratio of tops to roots, (31) 628, 733.
- Red Olona, improvement, (37) 141.
- Red Rock, (37) 799; (40) 233.
- Red Rock, in Michigan, (39) 335.
- region, meteorological service, (39) 718.
- relation of size of seed to yield, (26) 434.
- relation to climate and soils, (26) 434.
- relationship of species, (26) 827.
- relative yielding capacity, (40) 625.
- requirements and production of the Allies, (40) 487.
- resistance to cold, (39) 525.
- resistance to diseases and insects, determination, (26) 246.
- Rièti hybrid of, (30) 531.
- rod-row tests, technique, (38) 429.
- root aphids, notes, (29) 252.
- root development—
  - in, (26) 327.
  - in India, (39) 230.
  - of seedlings, (30) 136.
- root system, (32) 529, 530, 634.
- rotation experiments, (28) 338; (29) 227; (31) 738; (33) 429, 728, 828, 829; (36) 437, 829; (38) 129; (40) 331, 431, 731, 733.
- Russian, (40) 535, 831.
- Russian, nitrogen content, (32) 833.
- rust—
  - effect on feeding value of straw, (40) 768.
  - fungus, wintering over, (26) 846.
  - host relations, (26) 142.
  - in Bavaria, (33) 847.
  - in Norway, (35) 545.
  - infection through seed, (37) 751.
  - investigations, (26) 647.
  - mode of infection, (26) 143.
  - new form, (39) 454.
  - new, in United States, (33) 744.
  - new strain, (40) 345.

## Wheat—Continued.

- rust—continued.  
 notes, (29) 152, 445; (30) 845; (31) 641; (34) 843; (35) 45; (36) 247; (37) 247, 453, 749; (39) 752.  
 overwintering in Australia, (38) 48.  
 resistance in, (30) 242; (31) 147; (35) 749; (36) 146; (39) 550; (40) 745.  
 resistance, inheritance, (29) 532.  
 resistant hybrid, (27) 849.  
 resistant varieties, (26) 439, 447; (30) 230, 748; (32) 750; (38) 645, 646; (39) 336, 852; (40) 344.  
 spores in seeds of, (30) 241.  
 studies, (33) 546; (38) 43; (40) 642.  
 treatment, (26) 143; (28) 242.  
 wintering over in uredospore form, (33) 546.  
 rusts, description, (35) 47.  
 rusts in Canada, (34) 51.  
 rye hybrid, notes, (36) 739.  
 salvage, analyses, (26) 714; (37) 268.  
 sampling and grading, (38) 140; (40) 39.  
 scab and corn root rot, relation, (40) 49.  
 scab, notes, (39) 851.  
 Sclerotium rolfsii on, (39) 852.  
 scourings extracts, effect on baking quality of flour, (26) 356.  
 screenings, analyses, (26) 568; (27) 170 ;(28) 464, 465; (30) 671; (32) 862; (33) 371; (34) 168.  
 screenings, composition and digestibility, (32) 666.  
 screenings, composition and value, (28) 769.  
 screenings, digestibility, (30) 566; (31) 766.  
 secondary rootlets, (40) 32.  
 seed—  
 bed, preparation, (33) 217; (34) 632; (36) 131, 215.  
 cleaning, (40) 40.  
 distribution in India, (29) 538.  
 durum, resting period, (36) 825.  
 failure to germinate, (34) 541.  
 fungus disease of, (31) 148; (32) 750.  
 germination as affected by disinfectants, (31) 824.  
 home-grown v. imported, (40) 636.  
 locally-grown, (40) 658.  
 longevity, (38) 822.  
 longevity in relation to temperature, (37) 725.  
 position in planting, (40) 635.  
 resistance to desiccation, (40) 39.  
 selection, (32) 231; (36) 638.  
 selection tests, (40) 334.  
 size and sprout value in relation to yield, (38) 732.  
 size as affecting resultant plants, (39) 743.  
 tests and treatment, (29) 446.  
 treatment, (26) 299; (28) 442; (33) 546; (39) 238, 363; (40) 443.  
 viability as affected by age, (31) 624.  
 seeding—  
 depths, (40) 227.  
 experiments, (26) 43, 135; (29) 223, 224, 225, 425, 429; (30) 135, 526; (31) 328; (32) 525, 528, 530, 531, 533, 832; (33) 137, 729, 734; (35) 336, 534; (36) 33, 34, 38, 134, 338, 437, 829, 835; (37) 134, 226, 530, 731; (38) 240, 630; (39) 227, 228, 334, 744, 839; (40) 228, 333, 334, 337, 429, 636, 730, 731, 733.  
 experiments, error in, (39) 830.  
 experiments under irrigation, (39) 133.  
 in furrows, (36) 831.  
 late in the fall, (26) 299.  
 with vetch, (40) 243.  
 seedlings, alkali tolerance, (27) 500; (29) 322.  
 seedlings as affected by—  
 acid or alkaline conditions, (27) 130.  
 cerium chlorid, (31) 325.  
 creatinin and creatin, (27) 621.  
 seedlings—  
 distribution of stomata in, (32) 221.  
 growth as affected by salts, (31) 425, 426.  
 growth in bacterized peat, (31) 826.  
 growth in sand cultures, (36) 212.  
 living and killed, respiration, (30) 522.  
 purification, (29) 645.  
 respiration of, (31) 427.  
 respiratory activity in sunlight, (34) 30.  
 transpiration in, (28) 537, 629.

## Wheat—Continued.

- selection, (40) 523.  
 selection experiments, (35) 336, 527, 534; (36) 440, 735; (37) 32, 226; (38) 342, 633, 635; (39) 126; (40) 233.  
 selection of varieties, (28) 633.  
 self-fertilization in, (33) 437.  
 sensitiveness to fungicidal treatment, (29) 151.  
 Septoria disease in Australia, (37) 149.  
 sheath miner, notes, (37) 255.  
 sheath miner, studies, (37) 160.  
 sheath worm, description, (36) 59.  
 shipment via Panama Canal, (40) 637.  
 shorts, analyses, (26) 768; (27) 469; (28) 572; (29) 769; (30) 169, 671; (31) 863; (33) 371; (34) 467; (35) 562; (36) 765; (38) 369.  
 shorts, digestibility, (37) 678.  
 shorts, digestibility and productive value, (37) 865.  
 shredded, analyses, (27) 774.  
 shrinkage tests, (38) 840.  
 shrunken, analyses, (32) 169.  
 silage for dairy cows, (37) 75.  
 silage, notes, (33) 337.  
 smut—  
 as affected by date of planting, (31) 50.  
 cause, (30) 47.  
 in Dutch East Indies, (38) 448.  
 in Washington, (40) 49.  
 notes, (40) 730.  
 prevention, (27) 840.  
 resistant varieties, (26) 43; (40) 346.  
 resistant variety, (29) 244.  
 spores, effect on domestic animals, (27) 882.  
 studies, (37) 46, 149, 750; (38) 645, 849; (40) 345, 346, 642, 746.  
 treatment, (27) 137, 334, 649; (29) 152, 223; (30) 47, 242, 748; (34) 51, 844; (36) 739; (39) 248, 353, 549, 851; (40) 49, 334, 346, 535, 636.  
 wind dissemination, (40) 642.  
 smuts—  
 descriptions and treatment, (31) 446; (38) 249, 548.  
 in Australia, (38) 48.  
 life history and treatment, (28) 445.  
 notes, (28) 544; (35) 348.  
 treatment, (28) 51, 745; (31) 344; (33) 846.  
 soil exchange experiments, (27) 500; (29) 835; (30) 440.  
 soil moisture removal by, (40) 430.  
 soils in United States, (37) 799.  
 spikes, distribution of nitrogen in, (26) 739.  
 spikes, forms of, (32) 634.  
 spring—  
 culture in Illinois, (40) 443.  
 culture in Indiana, (40) 735.  
 culture in Ohio, (40) 738.  
 culture in Wyoming, (40) 636.  
 glume formation in, (32) 231.  
 handling and storage, (39) 540.  
 in England and western Europe, (37) 445.

- sage, disappearance on ranges, (39) 172.
- scale, notes, (29) 654.
- scours in calves, (26) 286; (34) 275; (38) 787; (40) 778.
- scours in calves, treatment, (36) 675.
- top, analyses, (30) 565.
- top and its control, (40) 738.
- weed as affected by top dressing, (26) 40.

## Whitefish—

- breeding in Switzerland, (35) 774.
- creatinin content, (31) 760.
- of Masurian Lakes of East Prussia, (31) 356.

## Whitewashes, notes, (27) 599.

## Whiting, use as a food, (38) 468.

## Whooping cough, transmission by factory-infected candy, (34) 366.

## Whortleberry, coloring matter of, (34) 709.

## Wicker, rural structures of, (35) 88.

## Wigeon-grass, culture for wild ducks, (33) 251.

## Wild—

- duck foods, propagation, (36) 753.
- life conservation, treatise, (32) 447.
- onions, eradication, (36) 740.

## Willamette River basin, Oregon, hydrography, (32) 786.

## Willia anomala, protein synthesis by, (27) 525.

## Willow—

- aphid, giant, notes, (33) 554.
- beetle, imported, notes, (40) 754.
- borer, *see* *Cryptorhynchus lapathi*.
- buprestid beetles on roses, (33) 256.
- canker, studies, (39) 357.
- caterpillar, notes, (26) 348.
- galls, aeriferous tissue in, (37) 26.
- grove plant louse, notes, (28) 254.
- leaf beetle, *see* *Galerucella decora*.
- posts, preservation, (36) 244.
- rust, overwintering, (39) 553.
- scale, notes, (28) 156.
- tree caterpillar, notes, (28) 355.
- witches' broom on, (33) 56.
- wood midge, remedies, (29) 558.

## Willows—

## basket—

- breeding, (28) 543.
- culture, (31) 839; (32) 339.
- culture experiments, (28) 147; (38) 644.
- description of varieties, (26) 745.
- for Idaho, (37) 244.
- insect pests, (39) 557.
- carpenter worm affecting, (31) 550.
- cecidomyiid flies attacking, (32) 554.
- change from radial to bilateral symmetry, (32) 426.
- culture, (35) 747.
- culture and preparation for market, (31) 49.
- culture and use, (34) 347.
- cutting from irrigation canals, (37) 285.
- insects affecting, (27) 654; (28) 453.
- plantings, (38) 44.
- Polyporus lucidus* on, (39) 654.
- water, black knot disease of, (26) 853.

## Wilson, James, retirement, (28) 307.

## Wilt disease of garden plants, cause, (27) 223.

## Wilt virus, studies, (40) 255.

## Wilting—

- coefficient determinations, use, (28) 537.
- coefficient of soils, dilatometer method, (40) 22.
- determination, (40) 427.
- in plants, studies, (34) 728.

## Wind—

- at Mount Tamalpais, Calif., (36) 419.
- avalanche, at Juneau, (37) 513.
- dissemination of—
  - chestnut blight by, (31) 451.
  - gipsy moth by, (28) 656.
  - red spider by, (30) 759.
- diurnal variation, (32) 810; (39) 17.
- easterly, at Blue Hill Observatory, (29) 721.

## Wind—Continued.

- easterly, at Tatoosh Islands, Washington, (35) 619.
- effect on—
  - form of trees, (29) 27.
  - plants, (30) 30; (32) 825.
  - transpiration in plants, (30) 726.
- erosion, notes, (29) 811.
- foehn, of Greenland ice, (38) 812.
- foehn type, near San Francisco Bay, (38) 811.
- forecasting, (35) 808.
- in the free air, (31) 212.
- insurance, mutual, in Illinois, (36) 791.
- motor, description, (28) 187.
- movement at Point Reyes Light, (26) 27.
- observations, working up, (34) 614.
- of United States, economic uses, (27) 511.
- of Yosemite Valley, (26) 214.
- origin of, (33) 321.
- pathological effects on plants, (30) 354.
- power—
  - determination, (30) 88.
  - generation of electricity by, (27) 388; (29) 184.
  - use, (28) 187.
  - use in Egypt, (30) 788.
  - use on farms, (27) 484.
- relation to—
  - grape downy mildew, (28) 448.
  - potato late blight, (27) 544.
- role in formation of soils, (31) 317.
- role in land depletion, (37) 115.
- scale, Beaufort, (33) 321.
- sea, effect on inflorescence of pine, (38) 331.
- sea, on Long Island, (38) 209.
- storm of April 2, 1912, (27) 414.
- storms of May 25-June 6, 1917, (37) 807.
- synoptic, and rainfall, relation, (35) 115.
- velocity—
  - and elevation, (35) 115.
  - diurnal period, (33) 118.
  - effect on meteorological elements in atmosphere, (40) 715.
  - indicator, (35) 618.

## Windbreak plants, variety tests, (40) 444.

## Windbreaks—

- artificial, tests, (28) 40; (30) 134.
- for irrigated sandy soils, (32) 839.
- for Montana, (40) 447.
- for railways, (36) 745.
- notes, (37) 46, 147.
- trees for, (33) 339.
- use against frost, (27) 240.

## Windmill—

- generating plants, tests, (37) 387.
- homemade, description, (35) 189.

## Windmills—

- as a source of power, (31) 186.
- economic use, (27) 511.
- for electric lighting and power, (29) 788.
- irrigation in India, (29) 891.
- irrigation pumping, (29) 484; (38) 186.
- pumping, (32) 87; (33) 391.
- power, notes, (27) 790.

## Windstorm at Seattle, Washington, (29) 812.

## Windstorm, severe, in Indiana, (26) 614.

## Windstorms at Springfield, Ill., (26) 214.

## Wine—

- abnormal, treatment with milk or charcoal, (29) 119.
- acid reduction in, (35) 617.
- acid titration, indicators in, (30) 413.
- acidity in, (35) 113.
- acids of, (37) 310.
- adulterated, detection, (31) 412.
- alcohol-free, preparation, (29) 312.
- aldehydes in, (37) 805.
- analyses, (26) 312; (29) 119; (30) 612, 712; (35) 617; (36) 801; (37) 12, 310; (38) 203.
- arsenic content, (26) 841.
- as affected by grafting, (28) 437.
- as affected by phosphates, (27) 326.
- bibliography, (31) 339.
- blending, (35) 647.
- bromin absorption of, (31) 412.
- by-products, utilization, (26) 512.
- chemistry of, (26) 512.
- citric acid in, (33) 613.
- clarification, (39) 114.
- composition as affected by clarification, (29) 414.

## Wine—Continued.

- crystalline deposits in, (30) 612.  
 definitions, (31) 114.  
 determination of solids in, (32) 715.  
 diminution of acidity in, (29) 117.  
 diseased, examination and treatment, (30) 712.  
 diseases, notes, (26) 512.  
 distillation residues, utilization, (32) 209.  
 dry, handbook, (26) 715.  
 effect of X-rays on fermentation, (27) 231.  
 exports from South Australia, (29) 837.  
 fermentation, (35) 616, 647.  
 fermentation—  
   action of manganese sulphate in, (38) 507.  
   changes in, (30) 612.  
   sulphurous acid and selected yeast in, (36) 113.  
 formation, (34) 43.  
 from American native grapes, (30) 16; (35) 647.  
 fruit, fermentation, (37) 509.  
 fruit, manufacture, (38) 806.  
 fruit, pure yeast in, (36) 509.  
 grape and fruit, lactic acid in, (31) 315.  
 growers' schools, instruction in, (30) 195.  
 home manufacture, (40) 116.  
 Hungarian, analyses, (36) 466.  
 Hungarian, production and composition, (35) 266.  
 industry in—  
   Argentina, (31) 47.  
   California, (26) 46; (35) 343, 646.  
   German East Africa, (27) 40.

   United States, (35) 744.  
   Uruguay, (32) 744.  
 lead arsenate n, (27) 243.  
 "l'clair bleu" test, (40) 311.  
 lees, dried, fertilizing value, (29) 129.  
 making—  
   cooperative societies in France, (34) 690.  
   experiments, (30) 612; (37) 144.  
   grapes for, fermentation organisms, (40) 110.  
   investigations, (28) 209; (36) 801.  
   methods, efficiency, (32) 208.  
   notes, (29) 414; (32) 117, 208.  
   school at Klosterneuburg, report, (29) 414.  
   yeast and sulphurous acid in, (34) 207.  
 manufacture, treatise, (26) 512.  
 methods of analysis, (26) 805; (27) 205; (30) 612; (31) 114.  
 microorganisms in, (29) 209.  
 of high alcohol content, fermentation, (36) 716.  
 orange, manufacture, (30) 814.  
 pentose and furfural formation in, (31) 316.  
 pomace, composition and detection, (36) 205.  
 preparation, (27) 412.  
 preparing and conserving, (35) 343.  
 press residues, utilization, (29) 117.  
 production in Spain, (27) 344; (29) 439; (31) 238; (33) 539; (36) 742; (39) 845.  
 production in United States, (33) 894.  
 quality as affected by fineness of soils, (26) 813.  
 refermentation, (30) 612.  
 residues, methods of analysis, (31) 806.  
 secondary fermentations in, (30) 712.  
 utilization, (27) 441.  
 vinegar disease, treatment, (37) 314.  
 white, sulphurous acid in, (29) 264.  
 yeast, effects of salts on, (38) 503.  
 yeasts in, (30) 711, 712; (36) 802.  
 yellow coloring matter in, (31) 412.
- Wines—  
 Californian, analyses, (28) 461.  
 plastered, tablet reagents for, (26) 608.
- Winnemana argei n.g. and n.sp., description, (26) 63.
- Winter—  
 cress, destruction, (26) 333.  
 cress, eradication, (37) 742.  
 indoor aridity, (37) 807.  
 injury in plants, overcoming, (28) 639.  
 minimum temperature, forecasting, (35) 115.  
 moth problem, (40) 547.  
 moth, small, notes, (33) 656.  
 of 1916-17, (37) 513, 807.  
 of 1916-17 in British Isles, (37) 418.  
 of 1917-18, (39) 114.  
 stratus, formation, (37) 116.  
 weather in Florida, (28) 415.

## Wintergreen—

- extract, analyses, (35) 663.  
 oil, manufacture in India, (38) 9.
- Winters—  
 classification, (29) 120; (32) 810.  
 of eastern United States, (32) 810, 811.  
 of Washington and Paris, (32) 810.
- Winthemia—  
 fumiferana n. sp., description, (27) 457.  
 quadripustulata—  
   notes, (31) 752; (36) 255.  
   parasitic on army worm, (34) 251.  
   studies, (39) 659.
- Winthrop Farm School, Rock Hill, South Carolina, (34) 597.
- Winton disease in cattle and horses, cause, (26) 780.
- Wire—  
 cage for pot experiments, (32) 514.  
 fences, construction, (34) 487; (35) 88; (37) 886.  
 fences, cost data, (34) 486.  
 fences, deterioration, (27) 793.  
 fencing materials, composition, (35) 587.  
 frames for beans and peas, (33) 891.  
 insect cages, shading effect, (36) 455.  
 rope, tests, (35) 292.
- Wireless telegraphy, use in meteorology, (32) 117.
- Wireworm, common, larval and pupal stages, (37) 765.
- Wireworms—  
 destructive to cereal and forage crops, (35) 261.  
 false, of Pacific Northwest, (27) 259.  
 false, studies, (39) 363.  
 in corn, (29) 858.  
   corn, extermination, (26) 753.  
   ostriches, life history, (35) 678.  
   sheep, treatment, (27) 683; (28) 586.  
 injurious to potatoes, (37) 157.  
 injurious to strawberries, (32) 556.  
 life history and remedies, (38) 54.  
 life history and structure, (29) 476.  
 notes, (29) 252, 653; (30) 454, 753; (31) 155; (32) 753.  
 protection of seed corn from, (33) 657.  
 remedies, (32) 246; (36) 758.  
 studies, (30) 546; (32) 555; (40) 647.  
 twisted, in sheep, (40) 88.
- Wisconsin—  
 Potato Growers' Association, report, (28) 738.  
 River flood, (28) 415.  
 River flood of October, 1911, (26) 614.  
 rivers, profile surveys, (37) 84.  
 Station—  
   association, report, (35) 899.  
   financial statement, (28) 899.  
   notes, (26) 195, 600; (27) 100, 800; (29) 399, 700; (30) 498, 600, 699; (31) 799, 900; (32) 199, 398; (33) 796; (34) 98, 396, 798; (37) 99, 198; (38) 299; (39) 97; (40) 200, 900.  
   report, (31) 899; (33) 398; (35) 595; (36) 898.  
   report of director, (28) 899.  
 University, notes, (26) 195, 495, 600; (27) 100, 800; (28) 398, 495; (29) 99, 399, 700; (30) 498, 600, 699; (31) 600, 799, 900; (32) 199, 900; (33) 796; (34) 98, 396, 798; (35) 699; (37) 99, 198; (38) 99, 299; (39) 97; (40) 200, 900.

## Wood—Continued.

preservation, (28) 744; (29) 444; (30) 447, 646, 647; (31) 840; (33) 845; (35) 843; (38) 248, 249, 317; (39) 292.

## preservation—

handbook, (36) 844.  
importance, (34) 240.  
papers on, (36) 45.  
textbook, (33) 243.  
with fluorids, (27) 148; (30) 239.

preservative, siliceous, notes, (30) 647.

## preservatives—

analyses, (29) 344.  
containing fluorin, (30) 646.  
investigations, (28) 441.  
tests, (32) 309, 841.  
toxicity, (33) 651.  
use, (27) 746.  
valuation, (27) 746.

preserving industry in America, (28) 844; (30) 347.

preserving oils, antiseptic tests, (29) 111.

products, relation to woodpeckers, (26) 58.

protection against decay, (27) 648.

protection against dry rot, (26) 544.

pulleys, tests, (28) 590.

## pulp—

ground, notes, (35) 114.  
industry in Canada, (34) 48.  
industry in United States, (37) 748; (38) 447.  
manufacture, (37) 148.  
manufacture, soda process, (31) 715.  
mills of United States, (40) 641.  
production in 1917, (40) 543.  
sulphite process, (38) 809.  
treatise, (26) 142.

residue as a feeding stuff, (30) 565.

resinous tracheids, (39) 451.

rich resinous, studies, (28) 826.

sawing rigs, (40) 588.

screws, transverse strength of, (30) 889.

seasoning, (37) 886.

seasoning, treatise, (38) 248.

specific heat, (28) 50.

specimens in Madras Government Museum, (37) 748.

spectrophotometric investigations, (32) 144.

stave pipe, construction and use, (33) 886.

stave pipe, use, (31) 685.

stave pipe, use in irrigation, (29) 84.

structure, bibliography, (28) 744; (29) 344.

structure of East Indian pines, (30) 46.

structure, terminology, (26) 442.

substitutes for, (38) 248.

sugar from, (30) 711.

sycamore, distinguishing characters, (39) 50.

testing, large v. small test pieces, (28) 441.

tick, control in Bitter Root Valley, (29) 658.

tick, notes, (37) 459.

transportation in French colonies, (30) 447.

transverse strength in, (35) 347.

turpentine, production and uses, (26) 413.

turpentines, investigations, (28) 512.

use, (33) 297.

used by manufacturers in Canada, (26) 644.

## using industries in—

Arkansas, (27) 443.  
Connecticut, (28) 644.  
Florida, (29) 644.  
Indiana, (34) 153.  
Iowa, (30) 46.  
Kentucky, (34) 839.  
Maine, (28) 743.  
New Hampshire, (29) 240.  
New York, (30) 536; (38) 146.  
Ohio, (30) 536.  
Ontario, (29) 843.  
Prairie Provinces, Canada, (33) 646.  
Quebec, (39) 648.  
South Carolina, (30) 536.  
United States, (38) 751.  
Vermont, (28) 843.  
West Virginia, (35) 44.

utilization, (28) 50.

utilization, rôle of chemistry in, (34) 538.

vessels in, notes, (26) 51.

vinegar, condensation, (35) 347.

volume and increment tables, (34) 743.

wasps, Nearctic, (39) 869.

wasps, studies, (30) 59.

## Wood—Continued.

waste as source of ethyl alcohol, (40) 17.

waste, utilization, (26) 613; (29) 149; (30) 711;

(34) 839; (35) 748, 843; (39) 146.

waste utilization, treatise, (35) 148.

water conductivity, (40) 821.

Woodchuck, host of spotted fever tick, (26) 64.

## Woodchucks—

relation to spotted fever, (31) 160.

revision, (33) 57.

Wooden frames, design and construction, (36) 586.

Woodhouse, E. J., geographical sketch, (39) 200.

## Woodland—

and prairie, ecology of tension zone, (38) 521.

surveys, graphic calculation in, (40) 153.

## Woodlands—

British, yield tables, (27) 646.

farm, development under Smith-Lever Act, (40) 641.

management, (38) 543.

of Guindos hacienda in Chile, (35) 842.

on the farm, (39) 546.

Woodlawn school garden, description, (31) 393.

## Woodlot products—

handling and marketing, (38) 543.

marketing, (34) 839; (35) 147, 453; (36) 45, 244,

745; (37) 195, 548, 838, 895; (40) 343, 744.

marketing cooperatively, (32) 192.

use, (36) 745.

## Woodlots—

care and improvement, (34) 839.

county or community working plans, (35) 841.

farm, (33) 242.

farm, handbook, (31) 640.

farm, handling, (35) 242.

farm, notes, (28) 897.

for central Indiana, (27) 442.

fuel from, (38) 248.

growing from seed, (27) 148.

improvement, (39) 546.

in eastern United States, (37) 245.

New England, (37) 451.

United States, (35) 746.

Wisconsin, (36) 744.

management, (27) 745; (28) 147; (31) 445; (36)

447; (37) 451.

notes, (32) 440; (38) 348, 847.

regenerating, (38) 846.

survey in New York, (34) 741.

taxation, (39) 247.

## Woodman's—

certificate of English Aboricultural Society, (28) 795.

handbook, (27) 846; (36) 446.

## Woodpecker—

Jamaica, economic status, (40) 254.

Lewis, feeding habits, (29) 51.

## Woodpeckers—

British, food habits, (35) 460.

destructive to codling moth, (27) 559.

destructive to leopard moth, (26) 557.

of Colorado, (39) 556.

partridge, coccidiosis in, (26) 187.

relation to trees and wood products, (26) 58.

## Woods—

## American—

handbook and bibliography, (27) 42.

specific gravity and weight, (30) 445.

specimen book, (26) 442; (30) 445.

tyloses in, (30) 844.

cedar, characteristics and use, (29) 842.

commercial, of United States, (26) 50.

Coniophora cerebella on, (39) 553.

dicotyledonous, intercellular canals, (39) 145.

foreign species, culture in Prussia, (26) 140.

Kerry, notes, (27) 646.

management, (27) 745.

oak, of North America, (26) 338.

of Alaska, (29) 342.

America, mechanical properties, (28) 440.

Argentina, (28) 239.

Brazil, (34) 440.

British Guiana, (35) 543; (39) 647.

Dutch East Indies, (39) 246.

Indo-China, (40) 46.

Montana, (35) 842.

New York, structure, (35) 897.

Ohio, (35) 147.

Pacific coast, handbook, (35) 649.

Philippines, (36) 644.

Woods—Continued.  
 of Philippines, identification, (29) 747; (33) 844.  
 Philippines, tests, (28) 343.  
 Philippines, uses, (28) 439.  
 Queensland, (37) 548.  
 Sao Paulo forests, (39) 351.  
 United States, (30) 46.  
 United States, manual, (27) 541.  
 United States, mechanical properties, (28) 843; (37) 885.  
 protection against fungi, (27) 354.  
 relative durability, (28) 345.  
 resinous, distillation by saturated steam, (27) 745.  
 resinous, utilization of waste, (28) 512.

 strumarium, analyses, (33) 466.
- Xanthogramma—  
 divisa, life history, (38) 362.  
 grandicornis, notes, (27) 656.  
 scutellaris, notes, (30) 156.
- Xanthohumol from hops, (31) 311.
- Xanthomelanodes peruanus, notes, (29) 358.
- Xanthophyll—  
 elaboration in *Iris germanica*, (34) 524.  
 fate of during digestion, (31) 275.  
 formation, (29) 827; (37) 632.  
 pigment, elaboration, (38) 127.  
 spectro-colorimetric estimation in plants, (31) 520.
- Xanthorhoe praefectata—  
 life history and remedies, (38) 257.  
 parasites of, (39) 159.  
 studies, (40) 265.
- Xanthorrhoea—  
 quadrangulata, resin formation, (40) 449.  
 spp. of South Australia, (37) 548.
- Xanthosoma—  
 culture experiments, (40) 434.  
 spp., analyses and culture, (31) 41.  
 storage roots, (35) 750.  
 varieties, (35) 134; (38) 526.
- Xanthostylum sp., notes, (28) 858.
- Xanthoxylum, polyembryony, (39) 527.
- Xenia—  
 and other influences following fertilization, (38) 526.  
 in beans, (28) 431; (31) 224, 836.  
 corn, (37) 537.  
 fowls, (33) 471.  
 pears, (30) 740.  
 rice, (32) 230.  
 walnuts, (35) 449.  
 wheat, (30) 235.  
 white mustard, (35) 335.
- Xenocrepis mexicana n.sp., description, (36) 555.
- Xenoparasitism, structural relations in, (28) 332; (30) 223.
- Xenopsylla cheopis—  
 bionomics of, (29) 756; (31) 353.  
 distribution on rats, (29) 755.  
 remedies, (31) 353.
- Xenufens ruskini n.sp., description, (34) 556.
- Xeromorphy in marsh plants, studies, (27) 829.
- Xerophily of ericads, relation of winter to, (31) 728.
- Xerophthalmia, relation to diet, (38) 268.
- Xestopsylla gallinaea, see *Hen flea*.
- Xiphidium varipenne, notes, (27) 155; (31) 249.
- Xiphydria, Nearctic species, (39) 869.
- X-rays, see Roentgen rays.
- Xylaria—  
 polymorpha and *X. digitata*, notes, (38) 249.  
 polymorpha, notes, (36) 649.  
 spp. on apple roots, (37) 457, 754.  
 spp., relation to black root rot, (40) 251.  
 vagans n.sp., description, (35) 244.
- Xylebiops basilare—  
 notes, (38) 762.  
 on pecan, (38) 157; (39) 557.  
 studies, (31) 852.
- Xyleborinus (*Xyleborus*) pecanis, notes, (38) 762.
- Xyleborus—  
 coffeae, notes, (27) 458.  
 compactus, notes, (31) 849.  
 compactus, studies, (32) 758.  
 dispar, notes, (27) 857; (30) 161; (31) 61; (34) 851; (37) 255.  
 dispar, studies, (29) 858.  
 fornicatus, digest of data, (38) 564.  
 fornicatus, notes, (32) 758, 852; (40) 266, 453.  
 immaturus in Hawaii, (34) 59.  
 immaturus, notes, (29) 234.  
 parvulus, notes, (28) 353.  
 perforans, notes, (26) 354.  
 sp., notes, (26) 60; (29) 53, 858; (31) 249; (33) 554.  
 spp., notes, (27) 458; (28) 555; (29) 158.  
 spp., studies, (31) 852.  
 xylographus, studies, (39) 65.
- Xylina—see also Green fruit worm.  
 bethunei, carnivorous habits, (34) 255.  
 sp., notes, (27) 755.  
 spp. remedies, (33) 59.
- Xylobiops, see Xylebiops.
- Xylomeges sunia, remedies, (37) 256.
- Xylometer, description, (38) 46.
- Xylomiges eridamia on castor bean, (40) 453.
- Xylophagus lugens, notes, (28) 158.
- Xylophruridea agrilli—  
 n.g. and n. sp., notes, (32) 250.  
 n.sp., description, (29) 563.
- Xylorrhiza parryi, analyses, (26) 503.
- Xylose—  
 behavior in fermenting mixtures, (27) 502.  
 decomposition by yeast, (36) 609.  
 determination, (26) 709; (37) 617.  
 isomeric tetracetates of, (34) 408.  
 preparation from corncobs, (40) 17.  
 preparation from cottonseed hulls, (37) 410.  
 reducing power, (33) 314.
- $\alpha$ -D-Xylose, crystallography and optical properties, (40) 202.
- Xylothrips—  
 flavipes, injurious to silk, (27) 456.  
 gibbicollis, lead-boring, (39) 467.
- Xylotrechus aceris n.sp., description, (37) 566.
- Xylotrya sp., notes, (31) 254.
- Yacca gum, notes, (40) 449.
- Yackas of South Australia, (37) 548.
- Yacon, culture experiments, (30) 640.
- Yakima Indian Reservation drainage project, (29) 289.
- Yakima irrigation project, Sunnyside unit, (27) 586.
- Yaks, measurements, (27) 672.
- Yam—  
 diseases, notes, (39) 248, 453.  
 mucin, notes, (29) 308.  
 scale, notes, (40) 259.
- Yams—  
 analyses and cooking tests, (40) 557.  
 as food, (36) 561.  
 beetle attacking, (40) 260.  
 culture and use, (40) 763.  
 culture experiments, (29) 637; (32) 227; (38) 336; (40) 434.  
 culture in Philippines, (26) 361; (40) 231.  
 fertilizer experiments, (29) 637; (30) 525.

## Yams—Continued.

- Indian, composition, (27) 268.
  - insects affecting, (27) 453; (30) 546; (34) 349.
  - leaf disease of, (36) 348.
  - mucinase in, (34) 312.
  - notes, (26) 362, 840; (27) 842; (31) 334.
  - treatise, (33) 437.
  - tuber and wilt diseases, (37) 452.
  - varieties, (26) 534, 733; (27) 233; (28) 828; (29) 637; (30) 525; (31) 524; (33) 535; (35) 134; (36) 735; (33) 33, 335, 526; (40) 231, 522, 637.
  - weevils affecting, (38) 864.
- Yaqona, insects affecting, (27) 453.
- Yarn making, textbook, (40) 899.
- Yarrow seed, vitality, (27) 740.
- Yarrow, violatle oil of, (35) 807.
- Yautias—
- as food, (36) 561.
  - culture, (33) 231.
  - culture and analyses, (32) 37.
  - culture experiments, (29) 637.
  - culture in Philippines, (40) 244.
  - fertilizer experiments, (29) 637.
  - notes, (26) 362; (27) 842.
  - varieties, (29) 637; (33) 535.
- Yearbooks of United States Department of Agriculture, index, (29) 599.
- Yeast—

- accessory growth substance in, (38) 503.
  - accustomation to galactose, (28) 202.
  - acid-destroying, effect on lactic bacteria, (29) 8.
  - alcohol production by, (40) 326.
  - and vinegar grains, analyses, (36) 667.
  - antineuritis base of, (28) 67.
  - antipolyneuritic substances from, (40) 174.
  - as affected by—
    - metallic salts, (28) 527.
    - spices, (38) 469.
    - volatile conifer products, (32) 618.  - as beriberi preventive, (28) 761.
  - feeding stuff, (36) 367.
  - food, (34) 164.
  - leavening agents, (33) 66.
  - polyneuritis preventive, (28) 761.
- assimilation—
- investigations, (28) 824.
  - of nitrogen by, (28) 35; (30) 629; (32) 728.
  - of sodium thiosulphate by, (29) 29, 30.
- autofermentation of, (26) 867.
- autolysis, (39) 10.
- autolysis, synthetic processes in, (32) 710.
- bacteria, and molds, treatise, (27) 727.
- baker's, studies, (31) 555.
- cell, nutritional physiology of, (32) 308.
- cells—
- assimilation of nutrients by, (29) 732.
  - formation of glycogen in, (28) 631.
  - living, as affected by phosphates, (26) 309.
  - permeability, (26) 326.
- chemistry of, (34) 711.
- cleavage of methyl glucosid by, (30) 11.
- combination as feeding stuff, (30) 565.
- composition and digestibility, (27) 669; (34) 165.
- cooked, as cattle feed, (27) 277.
- culture and tests, (30) 712.
- cultures, pure, use in wine making, (28) 209.
- dead, formation of carbon dioxide by, (37) 203.
- decomposition of lactic acid by, (37) 202.
- decomposition of silicates by, (31) 121.
- determination of acidity, (29) 864.
- development in various media, (30) 111.
- development of reproductive organs, (37) 631.
- dietetic value, (36) 153.
- differentiation of various kinds, (33) 611.
- dried—
- analyses and feeding value, (36) 571.
  - as feeding stuff, (33) 467; (34) 298.
  - composition, (33) 467.
  - effect on milk, (34) 471.
  - enzymes of, (30) 504.
  - feeding value, (26) 468.
  - for cows, (36) 374.
  - domestic animals, (28) 363.
  - horses, (30) 175.
  - pigs, (27) 874.
  - nutritive value, (36) 864.
  - use in preparation of molasses feeds, (26) 557.
  - v. meat meal for pigs, (25) 658.
- dry beer, analyses and feeding value, (29) 467.

## Yeast—Continued.

- drying, (27) 669.
  - effect on—
    - betain, (33) 312.
    - fermentation of tea, (32) 111.
    - protein formation, (31) 223; (35) 634.
    - soils, (31) 818.
    - tartaric acid, (29) 504; (36) 801.  - examination, (30) 669.
  - factories, fermentation processes in, (29) 509.
  - fermentation of albumin in, (33) 824.
  - fixation of atmospheric nitrogen by, (26) 123.
  - Food, Arkady, effects, (40) 762.
  - food hormones of, (36) 865; (40) 463.
  - food, tests, (39) 366.
  - for bread making, (39) 203.
  - for cows, (32) 871.
  - for the Tropics, (31) 166.
  - formation of invertase in, (28) 202, 408.
  - forms of in wine, (30) 711, 712.
  - fungi, protein metabolism of, (33) 202.
  - glycolytic ferment, (27) 765.
  - grains, analyses, (38) 665; (40) 72, 571, 665.
  - grains, dried, analyses, (35) 867; (38) 67, 369.
  - growth in arsenic solutions, (35) 281.
  - growth-promoting substance in, (36) 160.
  - in butter, notes, (26) 478.
  - in silage, (27) 204.
  - in wine fermentation, (36) 802.
  - invertase content, increasing, (31) 410.
  - invertase, hydrolyzing properties, (32) 803.
  - isolation and testing of pure cultures, (29) 119.
  - isolation of fat from, (29) 459.
  - making, old-time method, (40) 854.
  - manufacture, (26) 358.
  - mixed cultures v. pure cultures, (29) 714.
  - new glycolytic ferment of, (28) 710.
  - nitrate reduction by, (33) 726.
  - nutriments in bread making, (36) 261.
  - nutritive value, (36) 464.
  - osmotic pressure and electrical conductivity of, (30) 523.
  - penetration of egg shells by, (29) 765.
  - preparation and utilization as food, (35) 266.
  - preparation of vitamin fraction, (35) 311.
  - production of alcohol by, (29) 714.
  - protein, examination, (36) 501.
  - protein substances of, (32) 803.
  - protein synthesis by, (27) 525.
  - proteoclastic enzymes, (39) 667.
  - pure, use in wine making, (32) 117, 208.
  - relation to iodine compounds, (29) 133.
  - relation to organic soil constituents, (29) 817.
  - resistance to disinfectants, (29) 478.
  - respiratory pigments of, (26) 325.
  - staining, Gram's method, (31) 478.
  - stimulation by poisonous substances, (27) 131.
  - storage of oxygen by, (28) 329.
  - symbiosis by various types of, (29) 714.
  - therapeutic action in polyneuritis, (30) 79.
  - thermal death point, (38) 468.
  - use in carbohydrate analysis, (35) 206, 315.
  - use in preparation of media, (40) 403.
  - use in wine making, (34) 207.
  - utilization in the human organism, (27) 168.
  - utilization of inulin by, (31) 224.
  - vitamin-fraction from, (29) 664.
  - vitamins, studies, (39) 667.
  - waste as feeding stuff, (34) 262.
  - wine, effects of salts on, (38) 503.
- Yellow fever—
- investigations, (37) 357.
  - mosquito—see also Stegomyia.
  - distribution and bionomics, (27) 656.
  - early name, (36) 532.
  - notes, (29) 656.
  - occurrence in Russia, (33) 749.
- Yellow—
- jasmine, poisoning of cattle by, (34) 80.
  - necked caterpillar, notes, (27) 755; (39) 761.
  - rattle as a weed on arable land, (30) 141.
  - rattle, eradication, (40) 833.
  - rocket, eradication, (37) 742.
  - scale, notes, (23) 553.
- Yerba maté—
- adulteration, (40) 553.
  - alkaloids in, (31) 358.
  - culture, (32) 142.
  - seeds, germination, (36) 445.
  - tea, analyses, (32) 856; (35) 693.

- Yerba—  
rosario, culture, (34) 736.  
sante mealy bug, notes, (29) 455.
- Yew—  
culture experiments, (26) 141.  
diseases, notes, (26) 853.  
Pacific, density and porosity, (32) 47.
- Yezosiphium n.g., description, (40) 60.
- Yoghourt—  
analyses, (26) 80.  
bacillus, cultivation, (27) 765.  
bacillus, studies, (35) 278.  
bacillus, tests of strains, (34) 574.  
bacteriology of, (29) 279, 376, 377.  
bread, notes, (27) 765.  
manufacture, (28) 177.  
methods of analysis, (31) 114.  
preparation, (29) 376, 377.  
preparation and use, (27) 75; (34) 474.  
preparations, notes, (28) 278.  
preparations, supervision of trade in, (28) 374.  
studies, (29) 59.  
use against calf dysentery, (26) 682.
- Yohimbine, nature and use, (26) 580.
- Yokohama beans—  
culture, (32) 226.  
yields, (29) 224.
- Yolk—  
formation, peculiar, (26) 573.  
nucleus, structure and origin, (28) 766.
- Yorkshire fog, notes, (30) 434.
- Yothers' Formula IV, tests, (29) 262.
- Young, J. R., biographical notes, (40) 869.
- Yponomeuta—  
malinella, *see* Apple ermine moth.  
spp., notes, (29) 252; (36) 549.  
spp., studies, (28) 557.
- Ypophaemyia malacosomae n.g. and n.sp., description, (36) 554.
- Ypsophaemyia ligulellus, *see* Palmer worm.
- Yttrium, effect on permeability, (34) 34.
- Yucca—  
culture in Cuba, (38) 538.  
elata as emergency forage, (39) 772.  
elata as silage crop, (38) 471.  
filamentosa, saponin of, (37) 9.
- Yuccas—  
of Durango, Mexico, (31) 132.  
use in feeding, (40) 276, 277, 471.
- Yukon River basin, hydrology, (32) 382.
- Yuma—  
Experiment Farm, work, (39) 497.  
Experiment Farm, report, (40) 494.  
project, irrigation requirements, (40) 484.
- "Zaadams" in irrigation, (31) 782.
- Zacate, notes, (26) 361.
- Zacaton—  
as paper-making material, (34) 318.  
description and culture (37) 141.
- Zaghouaniaceae, monograph, (36) 647.
- Zagrammosoma flavolineatum, notes, (36) 655.
- Zailha flumineum, death feigning, (27) 457.
- Zaleptopygus oberea n.g. and n.sp., description, (29) 562.
- Zalophothrix mirum—  
notes, (28) 452.  
parasitic on black scale, (26) 556.
- Zanthoxylum spp., notes, (30) 145.
- Zaommoencyrtus submicans n.g. and n.sp., description, (35) 761.
- Zapupe—  
binder twine from, (27) 534.  
fiber, strength of, (29) 313.  
manufacture of alcohol from, (26) 415.
- Zarzabacoa, culture, (34) 736.
- Zatropis deuterus n.sp., description, (26) 352.
- Zea—  
caragua, analyses, (31) 863.  
ramosa and Z. tunicata, hybrids of, (37) 536.  
tunicata and Z. ramosa, hybrids, (38) 525.
- Zebra—  
caterpillar in Nova Scotia, (39) 160; (40) 57.  
horse hybrids, skull characters, (38) 65.  
hybridization experiments, (30) 270.  
hybrids, utilization, (26) 369.  
in pleistocene fauna of France, (27) 468.  
mountain, hybrid, notes, (26) 269.  
mountain, hybrids, fertility, (26) 163.
- Zebras—  
teeth, studies, (27) 674.  
treatise, (28) 269.  
utilization, (26) 369.
- Zebrolds, fertility of, (26) 163.
- Zebu hybrids, notes, (27) 872.
- Zebu-cattle hybrids—  
characteristics, (32) 669.  
heredity in, (28) 68.  
measurements, (27) 672.  
notes, (31) 664.
- Zebus—  
and bantengs, zoological relationship, (34) 466.  
crossing with cattle, (26) 472; (29) 369, 666; (30) 567; (33) 870.  
digestion experiments, (29) 69; (30) 568.  
half-bred, milk production, (30) 74.  
hybridization experiments, (28) 670.  
in Brazil, (33) 469.  
Formosa and India, measurements, (28) 365.  
Jamaica, (27) 172.  
Philippines, (32) 260.  
Tunisia, (33) 469.  
introduction into Texas, (28) 874.  
measurements, (27) 672.  
piroplasm of, (26) 782.  
value for tick-infested regions, (38) 69.
- Zein—  
as affected by gastric juice, (28) 66.  
effect on wheat gluten, (26) 67.  
in nutrition and growth, (31) 559.  
lysin content, (29) 408; (31) 559.  
nutritive value, (31) 264; (35) 368.  
proteoses, physiological action, (34) 71  
utilization, (30) 316.
- Zeism, similarity to pellagra, (31) 464.
- Zeitschrift für—  
Analytische Chemie, index, (30) 117.  
Angewandte Chemie, index, (26) 306; (29) 501.
- Zele spp. in Great Britain, (32) 454.
- Zelia—  
vertebrata, notes, (35) 259.  
wilderdmuthii n.sp., description, (35) 259.
- Zelleria haimbachi n.sp., description, (33) 748.
- Zelotypa fungicola n.sp., description, (33) 360.
- Zenillia pexops, life history, (32) 352.
- Zeolite—  
artificial, as source of potash, (37) 322.  
as source of potash, (29) 625; (36) 728.  
potash, solubility, (34) 328.
- Zeolites—  
absorption of phosphoric acid by, (28) 518.  
commercial, analyses, (40) 588.  
fertilizing value, (29) 211.  
relation to ammonia absorption and nitrification, (39) 520.  
soil, properties of, (30) 23.
- Zephyranthes-Cooperia hybrids, description, (29) 341.
- Zengophora scutellaris, notes, (40) 758.
- Zeuzera pyrina, *see* Leopard moth.
- Zicrona caerulea, notes, (30) 459.
- Zignoella—  
garciniae, notes, (35) 153.  
nobilis n.sp., notes, (37) 148.
- Zinc—  
antagonism to alkali salts, (39) 619.  
arsenate, insecticidal value, (34) 60.  
arsenite—  
analyses, (27) 756; (31) 49, 142; (38) 643.  
effect of soap on settling, (26) 354.  
insecticidal value, (27) 161; (29) 253; (32) 153, 846.  
tests, (30) 156.  
as growth stimulant for hemp, (33) 432.  
assimilation by *Aspergillus niger*, (30) 523, 630, 824; (31) 224.  
chlorid—  
antiseptic and germicidal value, (37) 176.  
as timber preservative, (26) 644; (38) 248  
detection in wood, (26) 242.  
effect on starch ferments, (27) 109.  
use in soil disinfection, (33) 250  
compounds—  
effect on plant growth, (32) 121  
toxicity toward plants, (33) 327  
detection in water, (34) 410.  
determination, (40) 610.

- Zinc—Continued.  
determination in—  
  gelatin, (40) 712.  
  treated wood, (33) 208.  
  water, (39) 205.  
effect on—  
  *Aspergillus niger*, (28) 226, 824.  
  *Aspergillus* spp., (29) 825.  
  nitrogen-fixing bacteria, (38) 428.  
fertilizing value, (27) 500; (28) 34.  
fluorid as pole preservative, (27) 148.  
in glass containers as source of error in water culture experiments, (32) 128.  
oxid, effect on germination of seeds, (29) 528.  
oxid, pharmaceutical, lead in, (40) 413.  
pipe, use in water supplies, (31) 189.  
pipes for carrying water, (33) 188.  
poisoning, notes, (28) 677.  
rôle in growth of fungi, (29) 28.  
salts—  
  action on plants, (39) 630.  
  as wood preservatives, (32) 841.  
  effect on ammonification and nitrification in soils, (31) 120.  
  effect on disease susceptibility in cereals, (29) 844.  
  effect on wheat, (29) 520; (31) 218.  
  silicofluorid as wood preservative, (30) 646.  
sulphate, effect on—  
  ammonification, (28) 724.  
  olives, (26) 825.  
  plant growth, (30) 130; (31) 325.  
  sulphate, fertilizing value, (30) 627; (40) 440.  
  toxic effect on plants, (38) 628.  
  vessels in culture experiments, effect of, (33) 623.  
  white, effect on linseed oil, (28) 714.  
  yellow, effect on linseed oil, (28) 714.  
*Zinckenia fascialis*, notes, (26) 250.  
Zingiberone—  
  corrected name for, (39) 412.  
  isolation and chemical constitution, (37) 612.  
Zinnias, cut, preservation, (31) 837.  
Zinyamunga, composition, (28) 873.  
"Zipangu," analyses, (31) 759.  
Zirconia, distribution in loam soils, (31) 618.  
Zirconium in soils, (31) 720.  
Zizania, cultivation by Indians, (38) 34.  
Zizera labradus, injurious to alfalfa, (26) 655.  
Zizyphus mucronatus, analyses and digestibility, (32) 167.  
Zodiacal light, (30) 713.  
Zodiacal light—  
  and counter glow, photography of, (35) 618.  
  Birkeland's theory, (31) 615.  
  nature, (34) 117.  
  notes, (32) 25, 614.  
Zodion, synopsis, (36) 255.  
Zonocerus elegans, notes, (29) 853.  
Zonocerus elegans, remedies, (30) 54.  
Zootrichia albicollis, coccidiosis in, (26) 187.  
Zoocercaria—  
  of Cassel and adjacent districts, catalogue, (26) 65.  
  of northeastern United States and eastern Canada, (39) 868.  
  of Switzerland, catalogue, (31) 656.  
Zoocercids of North Africa, (27) 564; (28) 357.  
Zoogeographical elements of continental regions, (31) 452.  
Zoological—  
  congress, international, proceedings, (27) 655.  
  index of genera and subgenera, (29) 157.  
  philosophy, treatise, (33) 552.  
Zoologists, vertebrate, rôle in national efficiency, (38) 555.
- Zoology—  
  agricultural, textbook, (30) 248.  
  bibliography, (26) 753; (28) 247; (31) 56; (33) 450; (36) 151.  
  Canadian, bibliography, (26) 59; (27) 551; (30) 52; (31) 648; (34) 651; (38) 256.  
  contributions to human welfare, (38) 663.  
  dictionary, (26) 652.  
  economic—  
    fall manual, (27) 756.  
    textbook, (33) 652.  
    treatise, (30) 52; (38) 456.  
  experimental, treatise, (26) 163.  
  International Congress, (33) 450.  
  medical and veterinary, index-catalogue, (26) 753; (28) 248.  
  review of literature, (27) 368; (28) 247.  
  studies, (31) 277.  
  textbook, (26) 652.  
  vertebrate, subspecific intergradation in, (40) 254.  
  yearbook, (34) 494.  
Zootechny—  
  instruction in, (28) 597.  
  treatise, (26) 873; (30) 170, 174.  
Zophodia—  
  convolutella, notes, (33) 652.  
  grossulariae, see Gooseberry fruit worm.  
Zorotypus hubbardi n.sp., notes, (40) 260.  
Zostera marina—  
  analyses, (37) 814.  
  culture for wild ducks, (33) 251.  
Zoysia pungens, notes, (26) 362.  
Zuider Zee—  
  draining, (40) 487.  
  reclamation, (32) 481.  
Zukalia—  
  n.spp., descriptions, (36) 245.  
  nantoensis n.sp., notes, (39) 753.  
  theae n.sp., description, (38) 648.  
Zygadenin—  
  isolation from death camas, (28) 197.  
  notes, (28) 506; (30) 412.  
Zygodenus—  
  chemical studies, (33) 177.  
  description, (32) 474.  
  intermedius—  
    analyses, (26) 503; (30) 412.  
    crystalline alkaloid of, (28) 506.  
    examination, (27) 881.  
    toxicity, (39) 184.  
  monograph, (33) 177.  
  venenosus, description, (39) 386.  
  venenosus, notes, (32) 778.  
Zygaena ampelophaga, notes, (40) 648.  
Zygophyllum—  
  affine microcarpum, analyses and digestibility, (27) 871; (32) 167.  
  tobago, analyses, (33) 466.  
Zygoptera of Illinois, (39) 763.  
Zygorhynchus—  
  moelleri, occurrence in Michigan, (27) 223.  
  vuilleminii, ammonia production by, (36) 221.  
  vuilleminii, ammonifying power, (32) 29.  
Zygosaccharomyces—  
  priorianus, symbiosis by, (29) 714.  
  spp. in wine, (30) 711.  
Zygosporium paraense n.sp., notes, (37) 253.  
Zygotaxis, notes, (30) 328.  
Zymase—  
  formation in plants, (39) 733.  
  in potatoes and sugar beets, (35) 634.  
  in yeast, (26) 309.  
  increasing and inhibiting activity of, (28) 504.  
Zymases as affected by toluol, (28) 803.  
Zymin, enzymes of, (30) 504.
