ACALYPHA SANDERI.

A Wonderful Novelty that Everyone Will Want.

Every catalogue will probably contain this plant this spring with glowing description, as great effort is being made to sell the plants at high prices, perhaps double my price.

The spikes are 18 to 25 inches long, $\frac{1}{2}$ inch thick, of deep crimson scarlet, contrasting finely with the bright leaves. A very beautiful and striking curiosity. An unsurpassed everblooming decorative plant.

Price, Plants Showing Bloom, 50c. each, postpaid.

NEW MAMMOTH FLOWERING

ALLEGHENY HOLLYHOCKS.

Blooms the First Year From Seed.

A New Type of Hollyhocks.

The flowers of this new variety are so different from the old conventional ones that but for the similar habit of the plant it would not be taken for a Hollyhock. They are from four to six inches in diameter, running from semi-double to double, and so finely fringed and curled that, compared with the old ones, they have the look of a flower from Fairyland. The colors are shell pink, rose and ruby red, a shade or two deeper at the center, and exquisitely tinted toward the edge. The flowers do not, as on the other double Hollyhocks, rot on the stems, but drop as soon as they fade. Every bud to the top of the plant is developed into flowers, making the flowering season considerably longer.

KLONDIKE COSMOS.

The most wonderful Cosmos ever raised. Rich, orange gold, magnificent color. Begins to bloom in June, and is covered with very large flowers long after frost.

New Japanese Camphor Tree, resembles the Rubber Tree, and equals it as a decorative plant. It is easily cared for and is entirely free from all insect pests. And, greater than all, it is claimed that simply growing in the room will keep away the moth fly and is an antidote for fevers. This is Japan's latest gift. Has never been offered in this country, and I have but a small supply of seed, but while it lasts I will give as a premium and sell at 10c. per packet.

NEW MOSAIC-LEAVED COTTON.

This cotton makes a very beautiful decorative plant, when growing, and for cutting in the fall for house use as an everlasting. The foliage of this plant is very beautiful and striking. Some leaves are green, white, yellow and red. Large yellow flowers, followed by large pods bursting with snow white cotton. A very beautiful plant and showy flowers. The pods make beautiful Christmas ornaments. Grows readily from seed.

PURPLE FEATHER GRASS.

This is undoubtedly one of the most ornamental decorative grasses ever introduced, and will be found as useful for room, hall or table decoration as many a palm, while having the advantage of rapid and vigorous growth, and being easier to manage.

Its graceful, narrow curving leaves, produced by the hundreds in succession, are overtopped by most elegant purple feather plumes a foot long, which by themselves are quite ornamental as vase decorations and can also be used for dry grass bouquets.

Sown as late as March, it makes a bold plant, unlike any other in the garden, always a feature of attraction. If grown in pots, no one could wish for anything more graceful. This novelty has been greatly admired wherever shown.

"Nameless" Squash.—Last season I received for trial a few seed of a new squash without name. I had them planted, and to my delight they proved to be the finest squashes in every respect, very far ahead of any I have ever known. Cooking as dry and mashing as fine as any potato without draining in a collander.

I have also received some other novelties in seeds (not tested by me) that are highly praised, such as a new Mammoth Radish from Japan, African Horn Cucumber, and a Pineapple Melon from Louisiana.

I hope you have saved my Catalogue of last year, as lack of room has crowded out some desirable things that I can supply.

Remember that for each and every 25 cents you send, you can select one of the Novelties on this page.

Same as the white kind, only the flowers are deep rosy-pink. 15c. each, 2 for 25c.

The 5 kinds for 50c.

L. Auratum.

Easter Lily.

HYACINTHUS

CANDICANS.

This bulb is very hardy, grows easy and throws up a Yucca like spike 4 to 5 feet high clothed with drooping white flower bells. 2 for 6c., 4 for 10c., 7 for 15c., 10 for 20c.

Fancy Caladiums.

FANCY CALADIUMS.

Nothing can equal these in brilliancy of foliage. To say that there are over 400 combinations of colors is sufficient—all colors, except blue, being represented. Leaves often 18 inches in size! Bulbs 12c., 3 for 30c.

Red Japan.

TIGRIDIAS.

Very beautiful and odd.

Grandiflora. Large scarlet. 4c. each, 3 for 10c.

Alba. Pure white. 4c. each, 3 for 10c.

Conchiflora. Yellow. 4c. each, 3 for 10c.

Lilacea. New. 5c. each, 3 for 12c.

1 each of the 4 kinds 15c., 3 of each for 40c.

Caladium Esculentum.

CALADIUM ESCULENTUM

(Known as Elephant's Ears.)

At very cheap prices. 10c. each, 3 for 20c., 4 for 25c., 25 for \$1.00, by express. A very effective plant. Leaves 3 feet long by 20 inches wide. By starting bulbs early in a warm place you can transplant May 1, and soon have an elegant show of foliage.

EXCELSIOR PEARL TUBEROSES.

These are the best of all Tuberoses to plant. They are dwarfs, and the immense spike stands erect, covered almost to the foliage with very large, double flowers, sometimes as many as 50 on a spike.

Large bulbs, sure to bloom. 5c. each, 40c. per dozen, \$2. per 100 by express.

Extra large bulbs, 6c. each, 50c. per dozen, \$3. per 100 by express.

NEW VARIEGATED TUBEROSE.

This scarce variety has been neglected because it has been so high in price. Few have ever grown, and not many people have ever seen it. It is a plant of superior excellence, and I have put the price within the reach of all. The leaves are bordered with a conspicuous white band, making it a beautiful border plant. Flowers single, large white, delicious fragrance, but not nearly so heavy as the double sort. The spike is graceful and is much more beautiful when out than the other kinds. Blooms easier and three weeks earlier than the doubles. The bulbs bloom year after year, while the others do not.

Price fine-blooming bulbs, 5c. each, 3 for 12c., 7 for 25c. By express, 50 for \$1.50, 100 for \$2.

HOW TO PLANT.

Set out about the time you do Coleus, in rich, warm soil. Firm the soil around the bottom of the bulb with your hand, and have the top of the bulb just covered with dirt. When the flowers begin to open, if you take the plant up and put it in a pot or box and place it on the piazza or out of the sun and storms, all the flowers will open very white and full.

MILLA BIFLORA (Frost Work).

The flowers have the oddest and most beautiful appearance imaginable. They appear like the most beautiful wax work, only enlivened by a living sparkle. The centre is lovely, the anthers are a delicate lemon yellow; the pistil is curiously carved, and usually covered with honeydew. The fragrance is delightful. Place a stalk in water and the flowers will all open. We have seen eleven stalks shoot up successively from one bulb. The bulbs will flower profusely with great certainty. 5c. each, 3 for 10c., 10 for 25c., \$2.10 per 100.

BESSERA ELEGANS (Coral Drops).

While this is nothing like Milla biflora in appearance, we are glad to say that it is of equal value. It will bloom shortly after being planted in the open ground, and will keep on blooming until frost. We have frequently had seven successive flower spikes from one bulb in a season—a thing not equalled by any other flowering bulb we know of. In point of beauty, it is exquisite. The flower stems are from one to two feet high, supporting a dozen or more bell-shaped flowers of a bright coral scarlet, with white cups and dark blue anthers. The foliage is thin and rush-like, 10 to 12 inches long. Like the Milla, the blooms will last many days when cut. 5c. each, 3 for 10c., 10 for 25c., \$2.10 per 100 Bulbs.

BESSERA ELEGANS (Coral Drops).

CYCLOBOTBRA FLAVA (Golden Shell).

The cup is golden yellow, with fine black dots in the petals. The three colors contrast most beautifully together. A few sprays of each, when placed together, form a cluster heretofore unseen and unattainable in the way of flowering bulbs. A subtle fragrance pervades the flower. 5c. each, 3 for 10c., 10 for 25c., \$2.10 per 100 Bulbs.

The vines begin to bloom when 2 to 3 feet high and continue to bear flowers by the hundreds until frost. The flowers are not only large but superior in every way to the common kind. Snowy throats with blood red border, velvet plum bordered with white, snow-white through all possible shades of blue, and of red from palest pink to darkest reds and purples. They are streaked, mottled, striped, marbled and bordered in wonderful fashion, and sometimes show rare shadings of ash grey, bronze, brown and slate-blue, colors rarely found in any other flowers. I want **all** my customers to try this charming mixture, and have reduced the price to induce all to try it. You can't have too many beautiful Pansies, and I recommend buying seed by weight to be able to make several plantings of this mixture to insure plenty of flowers **always**. Pkt., 100 seeds, **3c.**, $\frac{1}{8}$ oz. **12c.**, $\frac{1}{4}$ oz. **20c.**

SWEET-SCENTED PANSIES.

By skillful hybridizing, the delicious perfume of the violet has been instilled in this already charming and favorite flower. The odor varies somewhat from faint and delicate to the sweetest and strongest violet. The flowers in a room, dressing case, glove or handkerchief box impart that far-away, subtle violet odor. The flowers are often 2 to 2 $\frac{1}{2}$ inches across, of enduring substance, and **endless colors**, including pure white, yellow, black, maroon, orange and lavender, also striped, blotched, feathered, etc. Pkt., 100 seeds, **6c.**

I sell 10 lbs. of mixed Pansy seed a year. It gives great satisfaction.

TUFTED PANSIES. The New Pansy-Violet.

As the new Pansies have never been offered in this country, I give the originator's description: These new Pansies are called "**Tufted**," because a plant from a single seed will grow and enlarge into a clump or **tuft** of plants, which will live and bloom year after year, and send out "**runners**" like the Violet, hence the name, **Pansy-Violet**. They are a **hardy perennial** plant, living out all winter, increasing and blooming continuously. They are **sweet scented**, like the Violet. The flowers are very large and of great substance, measuring 2 $\frac{1}{4}$ to 2 $\frac{3}{4}$ inches across. The colors are marvelous and endless in variety. Dark and bright, also delicate shades, zoned, pencilled and mottled in wondrous colors. And added to all this, a hardy perennial violet perfumed **Pansy**, increasing in size and numbers each year. Once planted—always "A thing of beauty, a joy forever."
Packet, 100 seeds, 10c.; 3 packets 25c.

COPYRIGHTED BY A. BLAIR

ST. BRIGID, or POPPY, ANEMONE.

Nothing could be more glorious than a bed of these new Irish Poppies when in flower. One might well compare it to a kaleidoscope picture, glistening with and reflecting thousands of bright colors, or to some bright oriental carpet whereon the artist has exercised his ingenuity to blend pleasing and effective colors. Indeed, the flowers produced by this new strain show all the colors of the rainbow and many more, for even black and white are found among them, as well as shades of pink, rose, crimson, fiery scarlet, carmine, maroon, tints of lilac, lavender, blue, purple, even green. Many flowers are curiously mottled, striped, edged, ringed and shaded with the various tints described above, the effect produced being almost bewildering. They are frequently 5 to 6 inches across, some single, but most double, with plain, scalloped or fringed edges.

Sown early and planted in the garden in rich soil, they will bloom profusely and frequently until well after frosts have cut down other tender plants; and, being perfectly hardy, they will bloom again the next season in greater profusion than ever. For unsurpassed, as the flowers and the fern-like foliage remain fresh in water

for over a week.
Pkt. 50 seeds,
10c.; 3 for 25c.

CENTROSEMA

GRANDIFLORA.

Seed sown in April, even in the poorest soil, will thrive from early June until cut down by frost, and produce in the greatest profusion large clusters of inverted pea-shaped flowers, delightfully fragrant, one and a half to two and a half inches in diameter, and ranging in color from rosy-violet to reddish purple, with bright feathered markings through the center. It is well adapted for every purpose desired for a climber, running 6 to 8 feet in one season.

As the seed germinates slowly, we advise soaking it in warm water over night before planting.

IRIS KAEMPFERI.

IRIS KAEMPFERI

These magnificent Iris are among the most beautiful of our summer flowering plants and have already become great favorites. They commence flowering early in July and continue in bloom for five or six weeks. Many of these flowers measure from ten to twelve inches in diameter and almost rival the orchids in their rich colorings and markings. My collection embraces the cream of the hundreds of varieties cultivated by the Japanese. The Iris succeeds in almost any soil and under any conditions. “WILD GARDEN” SEED MIXTURE.

This fad first started in Boston some years ago. It is just beginning to spread in other places. This Mixture is composed of a great number of fresh annuals and all the favorite perennials of bright and showy colors. Sow alongside of some unsightly spot, fence, or filling in waste places and uncared-for nooks. Also in a bed or corner of your garden. A most lovely and interesting display.

"JADOO" Fibre...

A new material in which every Plant thrives without Earth.

A great boon to growers and lovers of flowers, whether plants, cuttings, bulbs or seeds. Success made easy and sure with the finest and most difficult Green House seed, such as Primulas, Cinerarias, Calceolarias, Double Petunias, etc., etc. The most difficult plants and bulbs to grow (which are very often the most beautiful also) will grow, thrive and bloom in "JADOO," with ease and certainty. Bulbs for winter blooming potted in "JADOO" will flower sooner, better and larger, while the material is cleaner, more pleasant and lighter than soil.

1. It is **omni-suitable**. That is, it suits all kinds of plants. It is well-known that in the old way, as many as thirty different kinds of earth mixtures are required for successfully growing the different kinds of plants. This calls for special knowledge and skill possessed only by professional people, and to them, even, it is a matter of laborious and expensive detail. "JADOO" Fibre does away with all of this. If you have a hundred different kinds of plants and vegetables, instead of selecting the different kinds of earth mixtures known to be most suitable, you put them all in "JADOO" Fibre.

2. Transplanted in "JADOO" Fibre plants do not flag. Even those in full bloom can be transplanted with perfect safety and they will continue to bloom.

3. It increases size, brilliancy and intensity of color in flowers.

4. It increases the size and enhances the flavor of fruits and vegetables.

5. Seeds germinate more quickly in "JADOO" Fibre than in earth.

6. Cuttings of all kinds root in half the time.

7. Requires less skill and labor than earth.

8. Favorite plants in a dying condition can be restored to vigorous life and growth in "JADOO" Fibre.

9. "JADOO" Fibre is not a chemical manure.

10. "JADOO" Fibre is cleaner to handle than earth.

11. It always remains sweet and does away with the smell of sour earth in rooms.

12. It is only half as heavy as earth, an item that counts for much in window gardens and hanging baskets.

13. Owing to its spongy nature, it retains moisture twice as long and requires watering only half as often as earth.

"JADOO" Liquid...

Both Meat and Drink to ...Plants...

14. Plants grow more hardy, flowers do not drop off so easily and markings in foliage or in flower are more distinct and brilliant.

15. Plants do not require repotting more than half as often, and pots are two sizes smaller, saving much space. As "JADOO" Fibre only gradually gives off the chemical properties with which it is impregnated it would really take years to exhaust it with most plants.

Asparagus Sprengeri. (Emerald Feather.)

This New Abyssinian Parlor Fern is a plant of exquisite grace, and impressive beauty, greatly admired by all people of refined taste, and destined to supersede "The Smilax and the Fern." It is handsomer for vases, bouquets or festooning. The fronds grow 5 feet in length and will last weeks in water when cut, and perfectly fresh for days without anything. An easy and rapid grower—a lovely plant for church decoration at Christmas or Easter. Strong plants 15c. each, 2 for 25c.

THE BOSTON FERN.

(*Nephrolepis exaltata Bostoniensis*.)

In the vicinity of Boston no other plant is used so extensively as this graceful *Nephrolepis*, which differs from the ordinary fern in having much longer fronds, which frequently attain a length of four feet. These fronds arch and droop over very gracefully, on account of which it is frequently called the fountain fern. This drooping habit makes it an excellent plant to grow as a single specimen on a table or pedestal. 15c., 2 for 25c. New.

"THE AUREOLE GERANIUM."—Mad Bruant.

The most remarkable Geranium ever raised for outside bedding or indoor decoration. The flowers are a wonderful piece of art, almost startling in effect. For bedding purposes no variety equals it. The plant is one of the most beautiful for decorative purposes we have either for window, table or church. Each floret resembles a pansy blossom. They are very large, and remind one of a beautiful plaque of alabaster whiteness, veined with lake, radiating into a beautiful aureole of bright solferino—a flower of celestial loveliness. Price 15c. each, 2 for 25c., 10 for \$1.00; \$7.00 per 100.

NEW WEEPING LANTANA.

The most beautiful basket plant ever grown. Record of one plant.—Planted in an ordinary nail keg in May, was in flower all the time till August, when it had 590 clusters of flowers, continued in full flower (removed to a greenhouse in October) to December, when 350 clusters were counted. At this time every young branch was cut off to propagate, but on January 14th it had 100 beautiful new clusters. The plant has a most graceful drooping habit, grows rapidly, and blooms persistently winter and summer, producing a cluster of flowers at each leaf. Color, most delicate, clear, brilliant, rosy lilac; foliage, bright dark green. Does equally well in winter & summer. 15c. each, 2 for 25c.

OUR ROSE BED COLLECTION.

THE GREATEST BEDDING ROSES IN CULTIVATION.

They bloom continuously through the entire Summer.

Careful trials put it beyond the least question of doubt that these famous roses stand at the top of the list as the best Bedding Roses. The most admired ornamentation on our grounds the past season was a bed of these Roses. The large handsome flowers were produced in such amazing numbers as to make the bed a solid sheet of bloom. Plant a bed of these Roses and you will never have cause to regret it.

NEW YELLOW SOUPERT "MOSELLA."

This lovely new addition to the Soupert family we imported from Germany last season. It has the genuine dwarf-growing, free-flowering Soupert habit; produces beautiful clusters of very double, ball-shaped flowers which open like a Camellia. The buds are also very pretty. The color is a white tint on beautiful light yellow ground. A great addition to our Summer Bedding Roses.

Each, 15 cents; 2 for 25 cents.

CLOTHILDE SOUPERT.

This now famous Pot and Bedding Rose (*Polyantha Tea*) was introduced in America in 1880. It is a cross of the free-blooming *Polyantha* Rose and a large flowered Tea, thus giving it, with all the free-blooming qualities of the former, the strongest growth of the Tea class. Its charming coloring, shading from pearly white to purest rose, double blossoms, delightful fragrance, wonderful vigor and freedom of bloom, combine to make it a most beautiful Rose.

Each, 15 cents; 2 for 25 cents.

"PINK SOUPERT."

We find this bright, new Rose a very free-flowering variety, much resembling *Hermosa*, but more double and flowering more freely; it shows the *Polyantha* blood in the full cluster of bloom, and it makes a handsome contrast, bedded or grown with the C. Soupert. The habit of the plant is almost identical with the C. Soupert, a rapid grower and quick to bloom.

Each, 15 cents; 2 for 25 cents.

1 each of the 3 kinds, 30 cents.

NEW DOUBLE GOLDEN RUBECKIA

Price, 15c. each; 2 for 25c.

The plant is easy to grow, begins to flower when very small, and is in flower nearly the year around, for winter or summer, inside or out it is at home. Grows quick from seed. Pkt. of seed, 10c. It produces as freely as a fuchsia, its dazzling, rosy crimson flowers lasting long in perfection, even if grown in smallest pots, under all conditions, in amazing profusion. Plants 10c. each; 3 for 25c.

MEXICAN MOUNTAIN

BEAUTY.

ANTIGONON LEPTOPUS.

Although introduced some fifteen years ago, this most beautiful vine is only just beginning to be appreciated, but it is now so highly thought of that some seedsmen are even illustrating it in colors. Few plants, indeed, are more delightful when in bloom - when it might almost be compared to a scarlet-flowering Wistaria. When thoroughly established, the roots send forth an abundance of bright green foliage, which is almost hidden by the long, dense wreaths of bright carmine flowers, lasting in beauty and perfection for weeks and months, a sight almost impossible to surpass. For porches, verandas, fences or trellises; for clambering over rocks or old trees, it will prove a grand acquisition. The roots are easily raised from seed and are quite hardy, with slight protection.

Roots that will bloom, 15c. each, 2 for 25c.; Seed, 8c., postpaid.

CARMINE BEAUTY. (*Ruellia Makoyana*.)

M. Edourde Andre, one of the greatest horticulturists of France, and perhaps of the world, says of this plant as follows:

"It forms a graceful, branching subject, one of the principal attractions of which is a beautiful **velvety foliage** with the upper surface of a rich olive green, shading to purple, relieved with prominent silvery white midrib and veins. The under side, however, is a bright purplish wine color.

"This precious acquisition is already in great favor with its lucky possessors. It is, indeed, one of the most brilliant flowering plants known, specimens having been shown measuring 30 inches across and carrying more than 300 flowers open at one time. These are of large size and of a bright carmine red, and not only do they appear in the spring, but also most abundantly in the autumn. It is an elegant plant for jardiniers also, and can therefore be highly recommended, especially since it is of the easiest management."

To such high recommendation I scarcely need add a word. Grown indoors in a shady place, the colors of its leaves and flowers are even brighter than in the open ground. It begins to bloom when only in 2 inch pots, and may almost be said to flower forever afterwards. At the recent grand international exhibition at Ghent it received many favorable comments. I am glad to be the first to offer it in this country.
