COMPIDENTIAL

This report covers the first fighter sweep launched from the RANDOLPH against airfields in northern and northwestern KYUSHU during the two days operation of 13 and 14 May 1945. Sixteen HELLCAT's under the leadership of Lt. Commander F.H. MICHAELIS, Commanding Officer of the Fighting TWELVE, proceeded to four airfields: Waifu, Kikuteai, Kumamoto, and Rikuchi. No airborne enemy aircraft were encountered by attacking planes on this or any subsequent flights of the

The furthest of these fields, Kikuchi, lay approximately two hundred miles in a straight line from the point of launch. Maifu was hit first. There, six twin-engine and ten single engine planes were strafed, of which two FRANCES's and a VAL (painted black) were destroyed and two single engine planes damaged. There were three or four dummy aircraft placed in conspicuous revetments at the northwest corner of the field which succeeded in drawing fire on the first pass. Intense and inaccurate medium and light anti-aircraft was encountered.

At Kikutomi, the second target, three yellow planes, presumed to be trainers, and four TORSY's were observed. Two fragmentation bombs were loosed against a hanger from which two yellow tails were protruding; results were undetermined. Two more fragmentation bombs were aimed at the Topsy's. It is believed damage was caused, but no fires were started. No AA was observed at this field.

to the large aircraft assembly plant. Again numerous yellow trainers were found along the west and south edges of the field in camouflaged and sovered revetments. No attack was carried out against this field as the target and not appear to be worth the risk of approaching through the intense antiaircraft fire of all calibres brought to bear by guns placed primarily for the defense of the aircraft factory. Fire was issuing from the nearby town of Kumamoto, from the factory and the field, and the surrounding hills.

Rikuchi, the last field visited, held only five single engine, biplane trainers in revetments. This was the primary target of the mission and all remaining bombs and rockets were launched at the hangar and shop or warehouse area. Hangars appeared to be of flimsy and light construction; one was destroyed and a second seriously damaged.

all planes returned to base safely, having completed a round trip of approximately four hundred and fifty miles, more than half the distance over the hostile territory.
