The Project

The City of Hannover is connected with **7 twin cities**. Thanks to an inheritance and with logistical support by WMDE and Wikimedians on-site 4 of these could be visited by Wikipedia:Hannover, a group of collaborating Wikimedians.

Possible Transfer

Not every Wikimedian gets the opportunity to travel. But every Wikimedian can check articles about their twin cities, categorize (existing) photos, and add information on Wikidata and, thus, contribute to connecting the world.
