TO OUR CUSTOMERS.

The United States Nurseries are situated in Short Hills, N. J., on the D., L. & Western R. R., only 17 miles from New York City. We are pleased to see visitors at any time. A personal visit will facilitate selection of plants and afford an opportunity of seeing the extent of our nurseries.

Terms: Accounts are made up monthly. Our patrons are requested to remit by checks, express, or P. O. money orders on New York Post Office, or currency in registered letters, as we cannot be responsible for money in unregistered letters. From unknown correspondents either a remittance or a reference is required with each order.

No Charges are made for boxes, packing or delivery to the railroad or express office; bags only are charged for. All plants are carefully packed and may be forwarded safely to any part of the globe.

Orders are Solicited at as early a date as possible, that we may have ample time for their execution. Please write plainly, name, post office, express office, and any other necessary information as to the best method of forwarding.

Advices of Shipment, together with the invoice, are sent the same day goods are forwarded.

Complaints, if any, should be made on receipt of goods. We promise prompt and just treatment of all claims presented. We guarantee safe arrival of plants sent by express, but do not assume any responsibility if sent by freight.

Our American seeds have been grown for us by men who are the acknowledged leaders in this branch of farming in the country, and our imported seeds have been procured from the most reliable sources abroad. The crops of many of the leading kinds of vegetable seeds are short this year. We have taken every pains to have the original stock pure and true; the crops have been personally inspected while growing by our representative; and every care has been taken that the seed be properly ripened, carefully dried and cleaned, and all inferior and imperfect specimens rejected.

Prices are subject to change without notice, and to the goods being unsold on receipt of order. We would advise dealers to place their orders early, as prices are likely to advance at the beginning of the selling season.

Our travelers are in all sections of the country the year round and would be pleased to call upon notification to that effect, with prices and samples.

We import, grow and deal extensively in the following, and are prepared, with the heavy stock we carry, to quote advantageous prices:

CHOICE FLOWER SEEDS, RELIABLE VEGETABLE SEEDS, RARE ORCHIDS, NEW CHRYSANTHEMUMS, SCARCE AND POPULAR PALMS, MAGNIFICENT FOLIAGE PLANTS, FERNS OF EVERY DESCRIPTION AND USEFUL HARDY PLANTS.

In our last Fall's Catalogue we announced to our friends and customers that we had added to our extensive Plant establishment,

SEED AND BULB DEPARTMENTS,

which this announcement was met, which encourages us to believe that in a very short time we will attain And it is with great pleasure we take this opportunity to thank our patrons for the gratifying support with the same prominence in this important line we already enjoy in the Plant business.

By a close scrutiny of our prices they will be found to compare with those of any responsible house, and feel that we do not overestimate ourselves when we say that no more care is possible than that exercised by us in the selection and growing of Seeds, Plants and Bulbs; our aim being that nothing shall leave our establishment unless in the best of condition and true to name.

SHORT HILLS, N. J.

CHOICE STRAINS OF FLORISTS' FLOWERS.

Choice Flower Seed Novelties.

TUBEROUS BEGONIAS.

This is a class of plants which has been developed within the past 15 or 20 years by the skill of the hybridizer. Now we have in them bright scarlet, more brilliant than Geraniums, and in all shades of rose-red, pink to white, and of late we have brilliant yellows, from pale straw-color to brilliant bronze, and all both double and single. Our collection of these plants is very large, and the past season we have carefully saved seed from the best flowers, which we offer as below. This seed of our own saving is, we assure our customers, superior to the imported seed usually offered.

OUR PRIZE CHRYSANTHEMUM SEED.

We are now universally considered headquarters for this grand flower, our collection taking the best prizes wherever exhibited. Instead of selling our cut-flowers, we take special pains to induce the choicest varieties to seed by artificial and other means, and have met with such success that we will have for sale a large quantity, including all types and colors, 15c. per packet, \$1.50 per dozen.

CYPRIPEDIUM.

The many calls and inquiries for Orchid seed induced us to save and offer this year in our Spring Catalogue, artificially Hybridized Cypripedium Seed.

We have been successful in raising many new and very valuable varieties from seed ourselves, and believe, from the increasing interest taken in this class of plants, that the seed will meet with a ready sale. 30c. per packet, \$3.00 per dozen. On each packet will appear the Cross of Hybridization,

THE COMET WHITE ASTER.

This is a lovely new Aster, being sent out for the first time. It is a French novelty and the flowers resemble a Japanese Chrysanthemum; the petals are long, pure-white, and arranged in a way entirely distinct from most asters. Per pkt., 25 cts.

NEW ROSE COLOR AND WHITE "BALL" ASTER.

This novelty bears very double flowers, with very symmetrically incurving petals, making the flower almost exactly spherical. They are rose color and white, and very distinct among Asters, deserving general cultivation. Per pkt., 15 cts.

CARDINAL POPPY.

This is a variety of Papaver somniferum and is distinguished from the type by its dwarfer habit of growth and the size and brilliant color of its flowers. These are immense, very double, brilliant scarlet on a white ground, and are borne 10 to 12 on a plant 18 inches high, lasting for a long time in perfection. A grand annual Poppy which we predict will prove a decided acquisition. Per pkt., 15 cts.

NEW GLOXINIA "CORONA."

This grand flower is remarkable for its size and striking colors. The individual blossoms are 3 to $4\frac{1}{2}$ inches across, with 6, and often 7, divisions or lobes, and a large, richly veined throat of deep violet-red, passing into a beautiful indigo towards the orifice. This color gradually disappears and the pure-white outer ground is margined with innumerable dark-blue dots. Another strong point in its favor is that it nearly always comes true from seed. Per pkt., 30 cts.

NEW HYBRID IMPATIENS SULTANI (BALSAMS).

These new hybrid balsams are offered this year for the first time, and will, we believe, find favor with all flower-lovers. The plant is of an erect free-growing habit and the flowers are borne in great profusion until frost. They are of varying shades from bright-red to delicate pale-pink. They are very superior to the ordinary Sultani Balsams and are a great acquisition. Per pkt., 20 cts.

IMPATIENS SULTANI (BALSAM), "KING ALBERT."

This is one of the varieties described above, of a beautiful shade of rosy crimson, and produced in great profusion. Per pkt., 20 cts.

SCHIZANTHUS PINNATUS NIVEUS.

For the first time a pure-white Schizanthus is offered. It is true that white flowers have been produced by Schizanthus pinnatus albus and Schizanthus grandiflorus albus, but the former are spotted with blue and the latter with yellow. We are confident that this will find favor and prove a valuable addition. Per pkt., 15 cts.

PAPAVER GLAUCUM (TULIP POPPY).

A magnificent new Poppy recently discovered in the mountains of Armenia. The plant rises to a height of 12 to 14 inches and produces above the bluish-green foliage a profusion (often 50 to 60) of large and splendid flowers of the most brilliant and vivid scarlet imaginable. The two outer petals bear a resemblance to a saucer, in which the two inner petals stand nearly upright and as if protecting the stamens. As the flowers fade, two black spots are visible at the base of the petals. The color reminds one of the bright scarlet of the Scarlet Duc van Thol Tulip, and on this account the variety has been named the Tulip Poppy.

This will prove to be one of the very best decorative annuals, its dazzling-red flowers, produced in such profusion, forming a brilliant mass not to be excelled, and serving to brighten up other plants with flowers or foliage of a more somber color. The minute seed will sometimes remain for two-weeks before germinating, but if planted in a hot-bed it will germinate in about eight days. Per pkt., 20 cts.

PYRETHRUM ULIGINOSUM.

For Seed, see Page 21.

CHOICE FLOWER SEEDS IN BULK.

For Florists' and Dealers' Use.

The following list of Flower Seeds will be found to contain the chief kinds most in demand by Florists and Dealers. A more complete list is furnished in our retail catalogue.

On all orders for packets taken from our retail catalogue, for varieties therein quoted, we will allow a discount of 33½ per cent. When kinds are wanted in bulk we will furnish at advertised rates. When prices are quoted at 20, 25 and 50 cents per ounce, not less than half an ounce will be sold; for varieties quoted at 75 cents and \$1.00 per oz., we will furnish quarter ounces, \$1.50 and above, per ounce, ½ of an ounce will be sold at prices quoted; ¼ pound at pound rates.

Growing, as we do, many acres of these most useful and pretty plants, for which there is a steadily increasing demand, assisted by a favorable season, we have saved a quantity of seed of the most important kinds, and offer below a list at prices which will compare favorably with those of the European growers; but when taken into consideration the certainty of germination and extra care with which they are saved, they should receive the preference.

Hardy Perennial Seeds.

General Wholesale List of Vegetable Seeds.

We wish to call the attention, especially of market gardeners and florists to our seeds. From personal experience we know the vital importance of purity of stock and high germination. In this department purchasers may have every confidence in the goods we offer, as every article we send out will be tested both for germination and purity. We have spared ourselves no expense in the preparation of seed testing houses and trial and experimental grounds, and have secured only skilled help, many of whom have spent a lifetime in this business.

In all cases the seeds we offer will represent the new crop of 1891, grown by reliable men under our

personal supervision.

Quarter pound furnished at pound rate, ten pound at hundred pound rate, and peck or quarter bushel at bushel rate.

When seeds are to be sent by mail, eight cents per pound for seeds sold by the pound, and fifteen cents per quart for peas and beans, must be enclosed for postage.

TO TEST THE PURITY OF OUR STOCKS OF VEGETABLE SEEDS WE WILL GLADLY SEND SAMPLE PACKETS FREE UPON APPLICATION, ASKING THAT SAME WILL BE REPORTED UPON AT MATURITY.

Plant Novelties.

'The following are the most desirable new plants, recommended to the Florists' trade. They are plants that no progressive Florist can afford to be without, while a grand lot of new Chrysanthemums will be found under another heading.

PTERIS VICTORIÆ. One of the grandest Ferns ever introduced, originally discovered by I. FORSTERMAN. The foliage is neatly divided, the sterile fronds being much broader than the fertile ones. The middle of the frond is beautifully variegated with silvery white, giving the plant a most unique appearance.

Price, Strong, 2 inch, \$1.00 each. \$10.00 per doz.
"Fine 3 " 1.25 " 12.00 " "

- NEW GENISTAS. The following set was raised from seed by Mr. Jas. Dean, and as everybody knows, raised quite a sensation when exhibited at the Lenox Lyceum Exhibition. Genistas have become such popular flowers for Easter decoration that they are indispensable to every Florist. The hybrids as described below are improvements upon the common type, having finer foliage, and a good many having the desirable drooping habit; others again have new colors in flower, and altogether, it is a set of plants that nobody can afford to be without. Plants will be ready March 1st.

 50c. each; \$5.00 per dozen for any of the varieties, or \$5.00 for the set of 12.
- No. 1. El Dorado—A most distinct variety, drooping habit. The flower spikes are large and of a bright yellow, and the plant remains in flower longer than any of the other Genistas.
- No. 2. Gold—Beautiful foliage; flower of good size, deep golden yellow color; habit good, 'and it will make an excellent variety.
- No. 3. California—Very fine Genista, with good, distinct foliage; flower deep yellow, of good size and substance.
- No. 4. Lemon-A pale lemon or yellow color, which is a most distinct shade of color in the Genista.
 - No. 5. Canary-Flower light shade of yellow; foliage distinctly cut and of a new type.
 - No. 6. Oriole—Beautiful plant with dark golden yellow flowers and good foliage.
 - No. 7. Arizona-Very strong grower, fine form and foliage; good yellow flower.
 - No. 8. Primrose—Foliage very distinct and fine cut; flowers pale yellow.
- No. 9. Golden Gate—Fine habit, distinct foliage of a dark green color; flowers bright yellow. A good plant.
 - No. 10. Amber-Foliage distinct; flowers very light lemon color.
- No. 11. Sunshine—Fine robust grower, good foliage; flowers large and of a most beautiful bright yellow color.
 - No. 12. Citron-Very distinct foliage. Plant produces fine spikes of golden yellow flowers.

Florists' Set of New Chrysanthemums.

We have selected the following varieties, embracing the very cream of the different sorts sent out by us this year of our own seedlings, as being superior to all others for commercial purposes. When we say superior, we mean it. What Florist wants to spend his time and money cultivating inferior sorts which command a low price, when he can just as well grow a superior article at a greater profit? Every year brings great improvements in the habit, character and quality of this favorite Fall Flower, and the success attained by us, taking every first premium for pot plants offered at the Madison Square Chrysanthemum Show, Nov. 2d to 9th, proves this fact. This we have accomplished with our new Seedlings, which has thus established their superiority over existing kinds.

New Chry anthe num-Miss Annie Manda.

See Page 41.

New Chrysanthemums.

The large size of the flowers, their strong habit of growth and excellent shipping qualities, recommend them to all, and to those growing flowers for profit we would say, discard all the old worthless sorts and book up with the prize winners.

- Ada McVickar—A grand variety of strong habit, producing immense creamy white flowers with broad, thick, reflexed petals. One of the best for specimen blooms, bush plants or standards,
- Col. H. M. Boies—Vigorous habit. Flowers large rosy pink, with twisted petals veined with a lighter shade; full center. A grand exhibition variety.
- Dr. H. A. Mandeville—Flowers large, full double, bright chrome yellow; petals very long.
- Francis Tarbox—Large flowered and full center; petals broad, convex silvery pink with a narrow line of pale lilac at the extreme edge. A grand early flowering variety.
- George Savage Flowers very large, pure white, with broad, strongly incurved petals, making the flower almost hemispherical and very solid. A grand variety of vigorous free flowering habit, and useful for cut blooms for exhibition.
- Harry May—Flower very large and deep, full double, forming when well opened a massive sphere, color deep old gold, with occasional veins of red; petals very broad and thick, spoonshaped. Foliage very luxuriant, thick and leathery, deep green; quite distinct among chrysanthemums. One of the most vigorous growing varieties in cultivation, and unsurpassed for growing, either as a standard, as a bush plant or for cut blooms for exhibition.
- Miss Annie Manda—Flower very high and compact, perfectly double, incurved, of the purest white. The numerous petals are well furnished with long glandular hair-like outgrowths, giving the flower a unique appearance, far surpassing the celebrated variety, "Mrs. Alpheus Hardy." The plant is of strong and vigorous habit, carrying the flower erect on a stout stem. Another recommendation is that the flower is sweet scented.
- Mr. A. G. Ramsay—Flowers of medium size, full center; petals broad, upper surface of the expanded limb deep Indian red, yellowish at the tip, under surface yellowish, veined with lines of red. A grand and striking variety.
- Miss Bertha N. Robison—Flowers rose pink with red centre, very early, of large size and good substance. One of the earliest and best varieties for exhibition purposes either as pot plants or cut blooms.
- Mr. D. S. Brown—Flower medium size, semi-double, of a clear canary-yellow color when first opening, but changing to cream color as the petals expand. A distinct color.

- Mrs. E. D. Adams—Flower very large, petals of medium width, very long, twisted; the outer ones swirled, as if the flower had been turned swiftly on its stem, color pure white. One of the best and most distinct white chrysanthemums in cultivation. We had specimens measuring eighteen inches over the flower, from tip to tip of petals. Makes a grand bush plant.
- Mrs. Herbert Leon—Flowers very large, full double, pink with broad reflexed petals. A very fine early variety.
- Mrs. H. A. Mandeville—Flowers large, perfectly spherical, with broad, incurved petals of a terra cotta yellow. Plant of vigorous habit and good for exhibition purposes.
- Mr. Hicks Arnold—A very strong and floriferous variety, bearing large, full double flowers of an old gold color, lighting up wonderfully by artificial light. When fully open the flower is almost spherical. The freest growing variety known, and one which may be grown with success for almost any purpose.
- Mrs. J. Hood Wright—Flowers large full double, of the purest white, with reflexed twisted petals. A strong grower and one of the best early varieties in cultivation.
- Mrs. John Eyerman—Flower semi-globular, full double, petals decidedly spoon-shaped, the lower half being tubular, while the limb is broadly expanded; upper surface rose pink, lower pale lilac. A grand variety for exhibition purposes.
- Mrs. E. D. Church—One of the earliest varieties in cultivation; flowers full double, of medium size, borne on stout stems and lasting long in perfection. Color pink in various shades.
- Miss M. Colgate—Flowers perfectly hemispherical, compact, with a full center, pure white; petals, broad incurved. A grand pure white variety, a strong grower and free bloomer. Good for all exhibition purposes.
- Mrs. R. Benner—Flowers medium size, of a deep lilac pink color with a red center. A very striking late variety.
- Mrs. T. F. Mercer—Flowers large, blush white, petals broad, incurved, the inner regularly imbricated, the outer more spreading. One of the best varieties for exhibition purposes, and valuable on account of its late flowering.
- Mrs. W. S. Kimball—Flowers very large, full double, pale blush or creamy white with a yellowish center; petals very broad, reflexed. One of the finest varieties for exhibition purposes

NEW CHRYSANTHEMUMS-Continued.

Mrs. M. F. Gallagher—Flowers large, semiglobular, with full center; petals deep maroon, crimson above, paler below. One of the very best dark varieties.

Newark—Large pure white flower, with very broad and thick round petals. The finest single white variety in cultivation.

W. A. Manda—This is the new golden yellow hairy chrysanthemum. Flowers very large, of a clear golden yellow. The plant is vigorous in growth, and the flower is borne upright on a stout stem. This is the grandest introduction from Japan made during the past year, and no collection can afford to be without this variety.

Fine strong plants ready March 1st,

Palms.

Of Palms we have a fine large stock, clean and well grown. Have not been forced, but grown cold, consequently they are hardier, bear rough handling, and are better adapted for decorative purposes than those grown in strong heat. The kinds enumerated below are the best varieties in cultivation.

TO FLORISTS.

Our extensive stock includes all the rarer and less known desirable plants in all classes, as well as the commoner sorts which are known to every florist. We will take pleasure in giving estimates for filling greenhouses or will send descriptions of special plants of Palms, Tree Ferns, Cycads, Orchids, etc., which may be wanted.

We are also prepared to make selections of hardy herbaceous plants and bulbs for planting out around surburban residences, in beds and borders, or public parks and gardens, however large. Correspondence in regard to matters of this kind is invited.

CUT FLOWERS.

We are at all times prepared to send boxes of cut Orchid flowers, etc., on receipt of a letter or telegram. Some species or other are in blossom at any season of the year, and for special occasions the stock of the local florist is either inadequate or unsuitable. In the autumn and winter when our large collections of Chrysanthemums and Genistas are in blossom, we can supply cut flowers or specimen plants in flower of almost any description and in almost any quantity. We are glad to give information regarding what plants are in flower at any time.

Flowering and Foliage Plants.

Our stock of these classes of plants is very large and embraces all the realy new and rare, as well as the best of the older varieties and we think the most complete in this country.

The following are the best and most profitable sorts for Florists' use, and we can supply these varieties in quantities, but those desiring a more extended list, can by applying for our Retail Catalogue, secure almost anything desired, at a discount off retail prices.

Orchids.

Exactly according to our prediction, Orchids have taken a real hold upon the public favor, and there is no florist who can afford to be without them. Not only are they sold to the customer, but they act as an advertisement, and a two dollar Orchid plant in flower in a store or greenhouse will attract more attention than a two-hundred dollar painted sign. Besides being profitable, they will grow into valuable specimens, and thus in growing them alone they will give better returns for the money invested than any other class of plants. The six best Orchids we can recommend to anyone are Cattleya Trianæ, Cypripedium insigne, Coelogyne cristata, Cattleya Percivaliana, Cypripedium Harrisianum and Lycaste Skinnerii. The above varieties are indispensable, and below we give those that are generally grown for cut flowers, and which are found to be the most profitable.

A species of easy culture, producing very sweet-scented white flowers in the spring 75 7 50 | white on the outside and reddishbrown inside. Produce its flowers on a long stem from February to April |
| O. Rossi majus. A very useful species, flowering during January, February and March | are produced during the winter months |
| ONCIDIUM incurvum. Produces a large spike of pure white, marked with lilac and brown; flowers from May to July | bilis 2 00 20 00 P. Schilleriana. The flowers of a fine rosy color, are produced at the same time as P. anabilis 4 00 40 00 |
| O. ornithorynchum. A free-flower- ing species, producing its rose-pur- ple flowers, with a perfume like the heliotrope, during the spring months. 1 75 17 50 | TRICOPILIA suavis. A very fine species, producing large white flowers, spotted with crimson, in the spring months |

Cypripediums.

This very large class of orchids has attracted more attention than any other, and, therefore, we have put them under a separate heading. It is a well-known fact that Cypripediums are the easiest of all the Orchids to grow, and they last the longest in perfection. We had flowers last in perfect order for over four months on the plants, while when cut they last three to five weeks with a little care. The colors are rich and pleasing and combine well with roses and ferns, in fact with any other flowers. We have the largest, finest and most varied stock of these plants in the world, and recommend the following varieties to all Florists.

| to all Florists. |

Hardy Perennials or Herbaceous Plants.

We make a specialty of hardy herbaceous plants, and devote acres of land to their culture. During the past year or two there has been a greatly increased demand for plants of this class, and there is much to be said in praise of them. With a good selection the garden is gay with their blossoms from the time snow leaves the ground in spring, until late autumn. We are continually adding fine novelties, both from our special collectors and from other sources.

Many species and varieties have proved excellent for forcing, and others that have not as yet been tried, will undoubtedly prove useful in the same direction. For florists and others purchasing plants to supply cut flowers, a large number of plants of few varieties are preferable to a few plants each of many varieties.

We send out none but healthy stock, true to name, and sure to give satisfaction. A personal visit to our nursery at any time during the summer is sure to be of interest.

Clematis.

We have a fine stock of this most beautiful of climbing plants. The many colors which are now produced by the various hybrids, white, blue, purple, scarlet, in many shades, and the large size of the flowers, together with its hardiness, climbing habit and free-blooming, make them universal favorites.

Any of the following varieties, strong plants, our selection, 35 cents each; customer's selection, 40 cents each.

Clematis Jackmanni Varieties.

Anderson Henryii. White.
Countess of Lovelace. Bluish lilac, double.
Duke of Edinburgh. Rich purple, large.
Gem. Deep lavender, very fine.
Jackmanni. The best known variety, with flowers of a rich purple, with green stamens.
Jackmanni superba. Deeper and larger than Jackmanni.

Gypsy Queen. Velvet purple.
Lord Neville. Rich dark blue.
Rubro Violacea. Maroon shaded purple.
Sir Garnet Wolesley. Bluish shaded bronze.
Star of India. Violet purple, with rosy band.
William Kennet. Deep purple, changing to lavender.

Special Imported Stock for Florists

We would especially call the attention of the trade throughout the country to the fact that we are one of the largest importing houses in this country for the following for Fall delivery:

Azaleas. Indica Varieties.

These we import in all sizes, and of the very best selected New York forcing varieties only. No case-stuff_handled under any circumstances.

| | | | | | 7 01 | won. | 707 700 |
|--------------|----------|-----------|-----------|-------|-------|------|---------|
| First Size. | 27 to 30 | inches in | circumfer | rence | . \$4 | 00 | \$30 00 |
| Second Size. | 35 to 45 | 46 | 66 | | . 7 | 00 | 50 00 |
| Third Size. | 45 to 60 | 4.6 | 4.6 | | | | 75 00 |
| Fourth Size. | 60 to 75 | 4.6 | " | | . 12 | 00 | 95 00 |
| | | | | | | | |

Extra Large Specimens. \$1.50 to \$5 each, according to size

In selecting a suitable size we would suggest that florists take a good portion of the second size, that being the best size at a low price, and will be sure to give satisfaction.

SPECIAL IMPORTED STOCK FOR FLORISTS-Continued.

Azalea. Mollis Varieties.

We handle of these favorites the very best only, of the forcing and effective planting sorts.

Laurus Nobilis. Bay Tree.

These beautiful and hardy decorative plants are now getting in great demand, and we annually import a selected lot of fine specimens, both pyramids and standards.

Prices on application, with full description of sizes.

Bulbs.

Our success the past year in handling bulbs has been unprecedented. Everywhere we hear of the great success and satisfaction given of the quality and character of flowers produced from the bulbs supplied our customers the past season, and we are better prepared the coming year to give our friends the very finest quality of goods procurable, and at the lowest possible prices, and at the earliest possible moment. Do not place your order until you get our figures.

Catalogues will be mailed as soon as possible, containing list of varieties and prices.

Remember

This stock is especially grown for us by the very best growers, and should not be compared to that usually offered in the open markets.

Special Offer to Florists for Easter and Store Decorations.

We are now growing a large quantity of different varieties of Blooming Plants especially for retailers. They are all finely furnished and well set with flowers, and we ask all florists whose trade demands such plants to write to us.

Azaleas.

We have an immense stock of these popular and showy blooming plants, embracing the very cream of the New York market varieties, in all sizes, from specimens in five-inch pots up to extra large plants.

Genistas.

We have one entire house, 200×25 feet, filled entirely with this elegant decorative plant embracing the twelve best sorts grown, all grown with plenty of room, and are elegant plants in six and seven inch pots; also specimens in ten and twelve inch pots.

IRIS GERMANICA.

See Page 62.

LAURUS NOBILIS. (SWEET BAY.)

See Page 70.

Hydrangea Otaksa.

A fine lot of this Easter favorite will be offered, bearing fine large, perfect heads, which we can sell in assorted sizes.

Rhododendrons.

An extremely beautiful assortment of finely colored varieties of this popular class of flowering plants, in great demand, where offered. Nothing can be finer than a few finely headed rhododendrons in full bloom interspersed among the commoner sorts of blooming plants at an Easter decoration.

In addition to the above we have a fine stock of miscellaneous plants, suitable for display purposes, which will be found valuable and profitable.

Prices and sizes of the above on application.

Books.

A list of Horticultural and Gardening books, a selection of which should be in the library of every florist, gardener, or amateur grower, and lover of plants and flowers.

The Illustrated Dictionary of Gardening. A practical Encyclopedia of Horticulture for Gardeners and Botanists. By G. Nicholson, and others. Illustrated with numerous full-page plates printed in colors, and over 2,000 accurately executed wood cuts in the text. The most complete work of the kind ever published, giving full particulars regarding all kinds of exotic and hardy plants and vegetables in cultivation. 4 vols., imp. 8vo., including the supplement of new species and varieties, cloth, gilt edges, \$20.

Henderson's New Handbook of Plants and General Horticulture. A dictionary of the principal cultivated plants, with short descriptions and an extensive Glossary of Botanical and Horticultural terms. 1 vol., imp. 8vo, cloth, \$\frac{4}{5}.

The Orchid Grower's Manual. By Benjamin Samuel Williams. New edition, enlarged and revised, containing descriptions of upwards of 1,470 species and varieties. Illustrated with a large number of full page and double page engravings, and some small engravings in the text. 8vo, cloth, \$7.

Choice Stove and Greenhouse Flowering and Ornamental-Leaved Plants. By B. S. Williams. With descriptions of upwards of 1,100 species and varieties with instructions for their culture. With colored frontispiece and many engravings on wood. 2 vols., 12mo, cloth, \$5.

Parsons on the Rose. A treatise on the Propagation, Culture and History of the Rose. By Samuel B. Parsons. New and revised edition, with numerous illustrations. 12mo, cloth, \$1.

Practical Floriculture, a Guide to the Successful Propagation and Cultivation of Florists' Plants. By Peter Henderson. New and enlarged edition. With numerous illustrations. 12mo, cloth, \$1.50.

The Rose. By B. Ellwanger. A Treatise on the History, etc., of the Rose, with directions for its Cultivation, including a descriptive alphabetical list of 956 varieties. 12mo, cloth, \$1.25.

Bulbs. By Edward Sprague Rand. A Treatise on Hardy and Tender Bulbs and Tubers. The best book on the subject for Americans, being written especially for the conditions, climate, etc., of this country. 12mo, cloth, \$2.50.

The Silva of North America. A description of the trees which grow naturally in North America, exclusive of Mexico. By Charles Sprague Sargeant. Illustrated with figures drawn from nature by Charles Edward Faxon. To be complete in 12 volumes, 4to, each volume containing 50 plates; cloth, \$25 per volume. Vols. I. and II. now ready.

The Native Flowers and Ferns of the United States, in their Botanical, Horticultural and Popular Aspects. By Thomas Meehan. *Illiustrated with very many chromo-lithographs*. Two series, together 4 vols., 8vo., cloth, \$28.

BOOKS-Continued.

- Practical Camellia Culture. A Treatise on the Culture and Propagation of Camellia Japonica. By Robert J. Halliday. Illustrated with five colored plates and fifty wood engravings. 12mo, cloth, \$2.
- Practical Azalea Culture. A Treatise on the Propagation and Cultivation of Azalea Indica. By Robert J. Halliday. With illustrations. 12mo, cloth, \$2.
- The Tuberous Begonia, Its History and Cultivation With a select list of varieties. 12mo, paper, 50 cents.
- Chrysanthemum Culture for America. By Jas. Morton. Full instructions for growing flowers for exhibition purposes, etc. 12mo, cloth, \$1.
- Gardening for Pleasure. A guide to the Amateur in the Fruit, Vegetable and Flower Garden, with full Directions for the Greenhouse and Window Garden. By Peter Henderson. With illustrations. 12mo, cloth, \$2.
- Gardening for Profit. A Guide to the Successful Culture of the Market and Family Garden. With numerous illustrations. By Peter Henderson. New edition, entirely rewritten and greatly enlarged. 12mo, cloth, \$2.
- How the Farm Pays. By William Crozier and Peter Henderson. Full information in a popular, not scientific, style. *Profusely illustrated*. 3vo, cloth. \$2.50.
- New American Farm Book. By R. L. Allen, and revised and enlarged by Lewis F. Allen, Treating on all the various branches of industry connected with the farm. 12mo, cloth, \$2.50.
- Grasses of North America, for Farmers and Students. By Prof. W. J. Beal. The most recent and complete work on American Grasses; written in a popular style which can be comprehended by those who have not studied botany. With many illustrations. 8vo, cloth, \$2.50.
- Grasses and Forage Plants. A Practical Treatise on the Fodder Plants of the United States and the British Provinces. By Charles L. Flint, New revised edition. With numerous illustrations. 12mo, cloth, \$2.
- Success with Small Fruits. By E. P. Roe. 12mo, cloth, with numerous illustrations, \$1.50.
- Play and Profit in My Garden. By E. P. Roe. 12mo, cloth, \$1.50.

- The Home Acre. By E. P. Roe. A popular and instructive book written in an entertaining style, by the well-known and popular novelist, whose country seat at Cornwall-on-the-Hudson was one of the most beautifully laid out places in the country at the time of the author's death. 12mo, cloth, \$1.50.
- How Crops Grow. A Treatise on the Chemical Composition, Structure and Life of the Plant. By Prof. Samuel W. Johnson, of Yale College. New edition, entirely rewritten and greatly enlarged. With numerous illustrations. 12mo, cloth, \$2.
- How Crops Feed. By Prof. Samuel W. Johnson. A Treatise on the Atmosphere and the Soil as relating to the Nutrition of Agricultural Plants. With illustrations. 12mo, cloth, \$2.
- Elements of Agriculture. A Book for Young Farmers. By George E. Waring, Jr. New edition, carefully revised. 12mo, cloth, \$1.
- The Propagation of Plants. Describing the processes of Hybridizing and Crossing Species and Varieties, and also of many different modes by which the cultivated plants may be multiplied. By Andrew S. Fuller. With illustrations. 12mo, cloth, \$1.50.
- Practical Forestry. A Treatise on the Propagation, Planting and Cultivation, with descriptions of the Indigenous Trees of the United States, with notes on a large number of valuable exotic species. By Andrew S. Fuller. *Illustrated*. 12mo, cloth, \$1.50.
- The Nursery Book. A Complete Handbook of Propagation and Pollination. By Prof. L. H. Bailey, of the Cornell Experiment Station. The book tells plainly and briefly what every one who sows a seed, makes a cutting or sets a graft wants to know. With about 100 illustrations. 12mo, cloth, \$1.
- The Horticulturist's Rule Book. By L. H. Bailey. Contains a great many rules and receipts used by florists, gardeners, farmers, etc., etc. Revised edition. 12mo, cloth, \$1.
- Ornamental Gardening for Americans. A Treatise for beautifying Homes, Rural Districts and Cemeteries. By Elias A. Long. With numerous illustrations. 12mo, cloth, \$2.
- Truck Farming at the South. A Guide for the Raising of Vegetables for Northern Markets. By Dr. A Oemler. Gives full cultural directions; also methods for packing. With illustrations. 12mo, cloth, \$1.50.

Any of the above books will be sent by mail or express prepaid on receipt of the stated price. Any other Horticultural or Farm books can be supplied, and at the publisher's price; and subscriptions for any Horticultural paper or magazine will be received at regular rates.

USEFUL GARDENING IMPLEMENTS.

See Pages 73, 74, 77.

SPECIAL

LOW-PRICED OFFERS

---OF---

SURPLUS and GOODS TO ARRIVE

We are constantly receiving very large shipments of the many kinds of goods offered in this list, and issue at different periods of the year, special low-priced offers, both of "Goods to Arrive" and Surplus Stock. Prices therein quoted are always very low and are taken advantage of by all shrewd men in our business. By writing us for these quotations, which apply to Florists', Gardeners' and Jobbers' wants, an immediate reply is guaranteed, and your name will be placed upon our special circular list, for the articles you name.

Should the price on any article quoted in this list not be exactly in keeping with those of any other house, and you wish to favor us with a share of your business, write us to this effect, and we will mail you our special offer in quantity, which we have now ready on Flower Seeds, Vegetable Seeds, Orchids, Bulbs, Hardy Plants, &c.

Remember that we are now

NURSERYMEN, SEEDSMEN AND FLORISTS.

PITCHER & MANDA,

SHORT HILLS,

NEW JERSEY.

THE CATALOGUES WE PUBLISH.

Besides publishing our general catalogue, representing under one cover the many departments of our establishment, we issue separately, and have now ready for mailing, catalogues pertaining to the different departments, as follows:

Our Grand Annual.
Orchids and Cypripediums.
Stove and Greenhouse.
Hardy Perennials.
New and Rare Bulbs.
Seeds.

These catalogues will be found to contain a more extended list of all varieties worthy of cultivation, and, when desired, we will send any or all upon application.

SEE OPPOSITE PAGE FOR SPECIAL OFFERS.
