# Tree Peonies

## (Paeonia Arborea)

### Including the Newest in Double Yellow

Generally speaking the Tree Peony differs from the herbaceous peony in that the stems of the Tree Peony are woody and the plant will attain a height of over 5 feet.

In China Tree Peonies are known as "Hwa Wang", "The King of Flowers".

Tree Peonies bloom abundantly throughout their long life. They are perfectly hardy. Complete planting directions may be had on request and will be sent with every order.

**SIZE OF PLANTS:** At prices quoted we supply strong two to three year old plants. The double yellow varieties are higher priced because of their extreme scarcity.

# The Newest in French Hybrid Lilacs

FRENCH LILACS

These New Hybrid Lilacs produce enormous flower trusses and you will find in them colors that were heretofore unobtainable in Lilacs. The individual flowers of some of these new Lilacs measure over 1 inch across.

We recommend these New Lilacs to you as we know they will be a source of pleasure for years to come. They were originated by that French Genius Lemoine, who produced such unusual things as double yellow Tree Peonies (also offered in this list), Philadelphus Virginal, Chinese double Peonies which have never been equalled, and many other things.

At prices quoted we supply strong 2-3 foot plants. We suggest that you order early as we are releasing only a limited quantity.

The individual flowers, fully 1 inch in diameter, perfectly shaped, are of a bright carmine rose with a pink eye when opening, contrasting with the mauve of the older flowers and the deep carmine of the buds. ## General List of French Hybrid Lilacs

French Lilacs flower when very small and produce an abundance of bloom. They are obtainable in a large range of colors, and are fully as hardy as the common lilac.

We recommend that you plant them in the fall or early spring. Lilacs like a rich soil and it is advisable, when planting to use a reasonable amount of well-decayed stable fertilizer or such as Driconure (dried cow manure and peat mixed).

If delivery balled and burlapped is desired add 20 cents each per plant.

LILIUM PHILIPPINENSE FORMOSANUM, NEW. Like Easter Lily but hardy.....	.25	2.50	18.00

The above varieties are all perfectly hardy and do not require any particular treatment for success. Lilies prefer a well-drained sandy soil. If your soil is heavy, place a few inches of sand under each bulb. Lilies do best when planted between Peonies, so that the ground is shaded by the peony foliage and the top can have the sun.

# The Fashionable Hemerocallis (Yellow Day Lily)

Day lilies bloom, like Peonies, when there is very little color in the garden. The Tulips and other spring bulbs are thru, it is too early for most perennials and annuals and the Peonies, Hemerocallis, Philadelphus Virginal and such things are the only ones you can rely upon during that part of the growing season. These newer Hemerocallis are very interesting and are rapidly coming to the front.

Very good in semi-shady locations or amongst evergreens.

This plant is extremely attractive planted on the edge of water. It harmonizes well with Delphiniums and Veronica Spicata. We offer the outstanding varieties.
