DECLASSIFIED E.O. 12065 SECTION 3-402/NNDG NO. 775013

45-7
III

TO : HEADQUARTERS, YAMAGUCHI MILITARY GOVERNMENT PREFECTURAL TEAM.

FROM : Central Liaison Office, Tokyo.

SUBJECT : Request for Removal from Reparations List of No. 3 Naval Fuel Depot.

C.L.O. No. 254(ECI-F). 14 August 1946

1. The Central Liaison Office hereby submits an application for removal from the Reparations List of the No. 3 Naval Fuel Depot, which is proposed to be converted to production of chemical fertilizers as per the plan stated in the Annex.

2. The reasons for the above application are stated below:

a. As one of the counter-measures for the present critical conditions of foodstuffs in Japan, the General Headquarters, Supreme Commander for the Allied Powers has ordered the Japanese Government to take effective and appropriate steps immediately to secure the increased production of chemical fertilizers, especially nitrogenous ones.

b. According to the survey of the Japanese Government, the current demand of nitrogenous fertilizers is 1,908,000 tons, which, increasing year by year with the advance of cultivation plan, will reach 2,273,000 tons in 1950.

c. In order to meet the above demand, the Government has planned the yearly supply of nitrogenous fertilizers as 2,104,000 tons (1,727,000 tons of ammonium sulphate and 377,200 tons of calcium cyanamide) in 1950, which is still 169,000 tons short against the demanded amount.

d. Particulars of the production plan of ammonium sulphate, in the above plan of supplying nitrogenous fertilizers, are as follows:

Produced by	(Unit/m.ton)
Rehabilitation of existing ammonium sulphate factories	1,135,000
Permitted conversion factories (conversion from methanol factories)	95,000
Planned conversion factories	437,000
By-product & others	60,000
Total - - - - - - - - - - - - - -	1,727,000

DECLASSIFIED E.O. 12065 SECTION 3-402/NNDG NO. 775013

"Permitted conversion factories" show the three ammonium sulphate factories, of which conversion was approved by the Memorandum regarding the "Production, Distribution, and Use of Fertilizers" dated 17 May 1946.

"Planned conversion factories" mean other factories, of which conversion was planned by the Government, and in which are included three Fuel Depot of Army and Navy together with one adjunct factory.

"By-product" means the ammonium sulphate produced as by-product in iron factories and urban gas plants, and "others" mean small factories yielding less than 10,000 tons yearly.

Namely, most of the existing factories of ammonium sulphate have been extremely superannuated by the lapse of 10 to 15 years after construction, and also by the neglect of repairing during the war due to the lack of materials such as iron, steel, etc. Moreover, the majority of factories are more or less war-damaged, and, even after repair or rehabilitation, their actual production will be unable to reach the maximum 1,240,000 tons of prewar days, as shown in the above table. Even if the amount of ammonium sulphate to be produced by the permitted conversion of methanol factories is added to this, together with the amount of by-product and of other small factories, we could expect only 1,290,000 tons of ammonium sulphate can be expected yearly, which is 437,000 tons short against the total of the supply plan.

This deficit is to be filled up solely by the supply from the conversion factories of liquid fuels. It is to be noted that some cases of the rehabilitation of existing factories and conversion of methanol factories will take so much time before their completion and full capacity running, and that, for the purpose of meeting the urgent demand to increase foodstuff production, the conversion of liquid fuel factories, both Governmental and private, which have nearly all necessary equipments for fertilizer production and can start operation only with partial reconstruction or establishment, is to be relied upon.

e. Among the liquid fuel factories of which conversion to ammonium sulphate production is under planning as mentioned in the proceding paragraph, the following are the Army and Navl Fuel Depots additionally designated to be under the custody, control and protective maintenance of the General Headquarters by the Memorandum regarding the "Custody, Control and Protective Maintenance of Japanese Aircraft Plants, Arsenals and Laboratories" dated 28 May 1946.

DECLASSIFIED E.O. 12065 SECTION 3-402/NNDG NO. 775013

	Yearly output of Ammonium sulphate after conversion
No.2 Naval Fuel Depot (Yokkaichi)	120,000 m/tons
No.3 Naval Fuel Depot (Tokuyama)	20,000
Iwakuni Army Fuel Depot (Iwakuni)	70,000
Total - - - - - - - - - - - - - -	210,000

The ratios of the above output of the three Fuel Depots against the yield 437,000 tons of conversion factories of liquid fuel, and against that 1,727,000 tons of ammonium sulphate supplying plan are as follows:-

	Ratio against conversion plan of Liquid fuel factories	Ratio against ammonium sulphate supplying plan
No.2 Naval Fuel Depot (Yokkaichi)	27.5%	6.9%
No.3 Naval Fuel Depot (Tokuyama)	4.6%	1.2%
Army Fuel Depot (Iwakuni)	16.0%	4.1%
Total - - - - - - - -	48.2%	12.2%

This shows that the output of the three Fuel Depots reaches about 50% of the total amount of liquid fuel factory conversion plan, whereas it reaches about 12% of that of ammonium sulphate supplying plan. Therefore, without the conversion of these three Fuel Depots, it is utterly impossible to realize the aimed yearly production of 1,727,000 tons of ammonium sulphate.

f. The above cited three Depots are of the earliest completion among these liquid fuel factories under conversion for ammonium sulphate production.

The conversion of No.2 and No.3 Naval Fuel Depots have been undertaken by Japan Fertilizer Company, Ltd. since 10 November 1945 in accordance with the SCAP Memorandum dated 10 October 1945, given to the request of the Japanese Government, thus the No.2 Naval Fuel Depot at Yokkaichi can start partial running this August, and the No.3 Naval Fuel Depot this October.

DECLASSIFIED E.O. 12065 SECTION 3-402/NNDG NO. 775013

Of the Iwakuni Army Fuel Depot, all preparations have been finished in effecting conversion plan, in various kinds of investigation in personnel arrangement, etc., and would be able to commence operation in eight months after starting the reconstruction work.

g. In addition to the above reasons, the following facts are to be noted:

(1) Dire shortage of foodstuffs

(2) Wretched productive condition of nitrogenous fertilizers, especially of ammonium sulphate

(3) Sufficient progress made on the conversion of these factories

(4) At present, for the purpose of these conversion works, so many workers have been employed and so many machines and tools as well as their repairing works necessary for the conversion have been ordered to many machine makers and civil engineering contractors respectively, the expenditure for those having reached about ¥40,000,000 and hitherto the conversion works having progressed so steadily. Consequently a suspension of the work in the present condition would be attended with far-reaching consequences.

3. It is requested that favorable consideration be given to this application by your Headquarters.

FOR THE PRESIDENT:

(K.Asakai)
Director of General Affairs,
Central Liaison Office.

Enclosure: 6 copies of the Plan of conversion.

Re: Removable schedule of A.U. Machineries of Toa Nenryo Kogyo K.K.

Dear Sir,

We beg to inform you as follows by your letter No.71 dated 25th January 1951:

1 - We indicate as attached sheet No.1 to the removable schedule of A.U. Machineries by Memorandum 387.6 (10th Nov. '50), ESS/Ind., GHQ, SCAP.

2 - We also indicate as attached sheet No.2 to the removable schedule of our 2nd application items for reparation equipments. But we have not yet received this authorization, and so we made the schedule as attached sheet No.2 to complete the dissection of these equipments starting on the day we shall receive the authorization.

Yours faithfully,

T. Hirose

Sir:

(1) The attached list reparation equipments, originally located in Reparation Plants in Yamaguchi Prefecture has been in use by the Occupation Forces in Hiroshima Prefecture (Kure ESED).

(2) These equipments have been returned to the Kure Branch of Hiroshima Finance Department and at present is located at Mizuno Ship Yard (one machine, 45-7-241 (103)) located at Chugoku Industry Co., Ltd. inside Ex 11th Air-craft Dept. where custody and maintenance is being carried on.

(3) Subsequent to the return of these equipments they are at present, being the process of evaluation.

(4) Your instructions for the disposal in regards to these equipments are requested at your earliest possible convenience.

Yours respectfully,

DECLASSIFIED E.O. 12065 SECTION 3-402/NNDG NO. 775013

21 March, 1951

To : The Hon. K. Morioka
Director, Hiroshima Financial Bureau

From : Taiyo Fishing Co., Ltd.
Shimonoseki, Japan.

Subject : Re : Application for Approval of Moving Reparation Facilities being used by the Company and of Installing Incidental Equipments with the Facilities for the new Use.

Dear Sir:

The Company, in accordance with the reasons as mentioned below, desires to move three (3) oil storage tanks, the reparation facilities, which have been used by the Company on the basis of temporaly use in Shimonoseki City, to the location as shown on the attached sketch No.1 & No.2, and to install incidental equipments with the tanks needed for the new use.

1. Details on Tanks to be moved

Code No.	Capacity	Present location	Location where to be moved	Use until present
45-07-14	100 K.L.	Food Processing Plant of Taiyo Fishing Co., Ltd. Shimonoseki Branch. 19, Yamato-cho, Shimonoseki City, Yamaguchi Prefecture. (shown on sketch No.3)	Akkishi Branch Taiyo Fishing Co., Ltd. Shinryu, Akkishi-machi, Akkishi-gun, Hokkaido.	for storage of salted whale meat juice
45-07-15	100 K.L.	- Ditto -	- Ditto -	- Ditto -
45-07-16	150 K.L.	- Ditto -	- Ditto -	- Ditto -

2. Time when the Tanks are to be moved

The Company desires to move those tanks right after the approval is given and the installations of incidential equipments with the tanks are over.

3. Reason for necessitating such Move of Tanks

The Company's Akkishi Branch in Hokkaido is its fishing base of coastal whaling operation, and the amount of catch

45-09 Sec III B
FILE

DECLASSIFIED E.O. 12065 SECTION 3-402/NNDG NO. 775013

to be caught during the fishing season, starting May and ending toward the end of November every year, amounts to 500 heads and the manufactured whale oil thereof aggregates 2,000 M.T. Neverthless, the Branch has such defects as are stated below due mainly to the serious shortage of the oil storing facilities there, and which defects has extremely been hampering the business management of the Branch.

a.) Whale is drilled for oil by a super heated boiler or a parch boiler, and then this crude oil is stored quietly in a receiving tank for a short while. After being separated by the De Laval Separator, the refined whale oil is sent to the settling tank and stored. However, the Branch is in possession of a ten tons and a 20 tons settling tank only, and, therefore, in most case it is compelled to store the most part of those refined oil in drums. Consequently, this poor circumstances stands in the way of the productive activities of the Branch.

b.) Whale oil swells when heated, and, accordingly, there exists around 10 k.g. s' difference in measurement per drum when compared to that got cold. Therefore, when it is filled in drums right after refined and while in high temperature, it causes about 55 drums' (10 M.T.) difference in measurement per 1,000 drums (182 M.T.), thus the Branch has so far been obliged to pay useless transportation expenses.

c.) In the surrounding waters of Hokkaido, the sperm whale, the blue whale, the fin whale and the sei whale are caught and the processed oil thereof have to be stored seperately according to its respective species, - sperm whale oil and sperm should strictly be separated and the other species of oil should be so in principle - However, actual state of things in the Branch is that it has been storing them mixed, exepting sperm whale oil and sperm, due to the acute stortage of the storing tank.

Replenishing the said defects and harmonizing the business management, it is absolutely necessary for the Branch for the present to have in possession of at least 3 storage tanks with the capacity of 100 M.T. or more respectively,
Proposed 3 oil storage tanks, which the Company desires to move, have been used in the Company's Food Processing Plant in Shimonoseki for storage of salted whale meat juice, the substitue material for manufacturing soy sauce, but they have been left unutilized since the middle part of 1950 because of the plant having given up this line of business for the future due to the favorable turn of food situation in Japan. On the other hand, being a remoto place, in Akkishi, Hokkaido, it is not only very hard but also it requires tremendous expenses to have newly in possession of such facilities. Such being the situation, if the Company is permitted to put those 3 tanks in practical use in there for the purposes as stated above, they will contribute immensely to the

DECLASSIFIED E.O. 12065 SECTION 3-402/NNDG NO. 775013

business manegement of the Branch. This is the reason why we apply for your approval.

4. The reason necessiating such approval for installing incidential equipments with the tanks to be moved

Whale oil, in its nature, solidifies itself at 16° Centigrade, and, so that the whale oil storing tanks are to be installed with heating pipes so as always able to warm whale oil at or above 20° Centigrade. Without this equipments, whale oil can not be pumped out of the tank in case of temperature being at or below 16° Centigrade. The heating pipes will be applied to those tanks as shown on the attached sketch No.4 and the installation and the detaching of which can easily be made without making any alteration both in the nature and the shape of the tanks. The Company desires to perform the said installation works in Shimonoseki under your supervision before we ship them out. This is the reason why we apply for your approval.

Yours respectfully,

M. Watada

M. Watada
Managing Director,
Manager, Branch Taiyo Fishing Co., Ltd. Shimonoseki.

MEMORANDUM FOR: Reparations Agency, Tokyo

SUBJECT: Application for Movement and Authorized Use of Items Listed for Reparations

1. Reference is R.A.R. No. 448 (MS), 6 March 19 51, subject: Application for Urgent Movement and Authorized Use of Reparations Equipment of Tokuyama Fuel Depot (Code No. 45-07) Filed by Tokuyama Soda Co., Ltd. (Non-reparations plant).

2. The application requesting permission for the transfer and authorized use of the (38) items of reparations machinery and equipment listed in reference 1, above, is approved as indicated in inclosure 1.

3. This permit is issued subject to any and all directives affecting reparations plants which have been issued or may hereafter be issued by the Supreme Commander for the Allied Powers. Reports will be rendered as required by current directives and instructions.

Subject: Application for Urgent Movement and Authorized Use of Reparations Equipment of Tokuyama Fuel Depot (Code No. 45-07) Filed by Tokuyama Soda Co., Ltd. (Non-reparations plant).

R.A.R. No. 448 (WS)

6 March 1951.

1. The Reparations Agency hereby submits to your Headquarters an application for urgent movement and authorized use of 38 items of reparations equipment now lying idle in the Tokuyama Fuel Depot (Code No. 45-07) filed by the Tokuyama Soda Co., Ltd. (Non-reparations plant) together with an application of the Ministry of Finance and a recommendation of the Ministry of International Trade and Industry as enclosed herewith.

2. These equipment have been allocated to this applicant by the Ministries concerned after the suggestion of your Headquarters.

3. As the warehouses where the reparations equipment are now stored have to be promptly evacuated for the Occupation needs, it is requested that your most favorable consideration be given to this application at the earliest practicable date.

DECLASSIFIED E.O. 12065 SECTION 3-402/NNDG NO. 775013

To : General Headquarters, Supreme Commander for the Allied Powers.

From : Reparations Agency, Tokyo.

Subject: Application for Urgent Movement and Authorized Use of Reparations Equipment of Tokuyama Fuel Depot (Code No. 45-07) Filed by Tonda Plant, Tokuyama Steel Sheet Co., Ltd. (Non-reparations plant).

R.A.R. No. 352 (MS)

20 February 1951.

1. The Reparations Agency hereby submits to your Headquarters an application for urgent movement and authorized use of 69 items of reparations equipment now lying idle in the Tokuyama Fuel Depot (Code No. 45-07) filed by the Tonda Plant, Tokuyama Steel Sheet Co., Ltd. (Non-reparations plant), together with an application of the Ministry of Finance and a recommendation of the Ministry of International Trade and Industry as enclosed herewith.

2. These equipment have been allocated to this applicant by the Ministries concerned on suggestion of your Headquarters.

3. As the warehouses where these equipment are now stored have to be promptly evacuated for the Occupation needs, it is requested that your most favorable consideration be given to this application at the earliest practicable date.
