secure conquests that are made in the first onsets of
an invasion. *Addison.*

OPA'COUS, ò-pá'kús.³¹⁴ *adj.* [*opacus*, Lat.]
Dark; obscure; not transparent.

hinder the eye from judging light to have an equal
diffusion through the whole place that it irradiates,

quently divisible into lesser atoms; and having less-
er pores, gives less scope to our eyes to miss light.

a walnut. It is naturally bright, and
shows all its beauty without the help of
the lapidary: in colour it resembles the
finest mother of pearl; its basis seem-
ing a bluish or greyish white, but with
a property of reflecting all the colours
of the rainbow, as turned differently to
the light. *Hull.*

OP'PIUM, ô-pè-ûm. *n. s.* A juice, partly of the resinous, partly of the gummy kind; brought to us in flat cakes or masses,

very heavy and of a dense texture, not perfectly dry: its colour is a dark brownish yellow; its smell is of a dead faint kind; and its taste very bitter and very acrid.

It is brought from Natolia, Egypt, and the East-Indies, produced from the white garden poppy, with which the fields of Asia-Minor are in many places sown. When the heads grow to maturity, but are yet soft, green, and full of juice, incisions are made in them, and from every one of these a few drops flow of a milky juice, which soon hardens into a solid consistence. The finest *opium* proceeds from the first incisions. What we generally have is the mere crude juice, worked up with water, or honey sufficient to bring it into form. Externally applied it is emollient, relaxing, and discutient, and greatly promotes suppuration. A moderate dose of *opium* taken internally, is generally under a grain, yet custom will make people bear a dram, but in that case nature is vitiated. Its first effect is the making the patient cheerful; it removes melancholy, and dissipates the dread of danger; the Turks always take it when they are going to battle: it afterwards quiets the spirits, eases pain, and disposes to sleep. After the effect is over, the pain generally returns in a more violent manner; the spirits become lower than before, and the pulse languid. An immoderate dose of *opium* brings on drunkenness, cheerfulness, and loud laughter, at first, and, after many terrible symptoms, death itself. Those who have accustomed themselves to an immoderate use of *opium* are apt to be faint, idle, and thoughtless; they lose their appetite, and grow old before their time. *Hill.*

Sleep hath forsook and giv'n me o'er
To death's benumbing *opium* as my only cure. *Milton.*

The colour and taste of *opium* are, as well as its soporifick or anodyne virtues, more powers depending on its primary qualities, whereby it is fitted to produce different operations on different parts of our bodies. *Locke.*

PLA'NET, plân'it.⁹⁹ *n. s.* [*planeta*, Lat.
πλανητα; *planette*, Fr.]

Planets are the errattick or wandering stars, and
which are not like the fixt ones always in the same
position to one another: we now number the earth
among the primary *planets*, because we know it
moves round the sun, as Saturn, Jupiter, Mars,
Venus, and Mercury do, and that in a path or circle
between Mars and Venus: and the moon is ac-
counted among the secondary *planets* or satellites of
the primary, since she moves round the earth: all
the *planets* have, besides their motion round the sun,
which makes their year, also a motion round their
own axes, which makes their day; as the earth's re-
volving so makes our day and night: it is more than
probable, that the diameters of all the *planets* are
longer than their axes: we know 'tis so in our
earth; and Flamsteed and Cassini found it to be so
in Jupiter: sir Isaac Newton asserts our earth's equa-
torial diameter to exceed the other about thirty-four
miles; and indeed else the motion of the earth would
make the sea rise so high at the equator, as to
drown all the parts thereof. *Harris.*

1. Spracle of the skin; passage of perspiration.

Witches, carrying in the air, and transforming themselves into other bodies, by ointments, and anointing themselves all over, may justly move a man to think, that these fables are the effects of imagination; for it is certain, that ointments do all, if laid on any thing thick, by stopping of the *porés*, shut in the vapours, and send them to the head extremely. *Bacon*.

To such a tender ball as th' eye confin'd,
So obvious and so easy to be quench'd;

stole of the artery is called its *pulse*, and the time the spiral fibres are returning to their natural state is the distance between two *pulses*: this *pulse* is in all the arteries of the body at the same time; an high *pulse* is either vehement or strong, but if the dilatation of the artery does not rise to its usual height, it is called a low or weak *pulse*; but if between its dilatations there passes more time than usual, it is called a slow *pulse*: again, if the coats of an artery feel harder than usual from any cause whatsoever, it is called an hard *pulse*; but if by any contrary cause they are softer, then it is called a soft *pulse*. *Quincy.*
